| **SW** | **Perpendicular** | | | |

1029 **Ramp Slope**

- *As-Built Description:* Running slope of existing perpendicular curb ramp is less than 5% or greater than 8.3%.
- *As-is Measurement:* 10.0%
- *Proposed Solution:* Demolish existing and provide new, parallel curb ramp, including detectable warning surfaces, and top and bottom landing as required.

1. **Locator Number:** - base and its corresponding GIS database.
2. **Year to be Completed:** header.)
3. **Orientation:** there is more than one curb ramp per corner, or no curb ramp):
   - NW, SW, SE, and NE are the most commonly used directions;
   - NNE, ENE, ESE, SSE, SSW, WSW, WNW, and NNW identify individual curb ramps in situations involving multiple curbs ramps at one corner;
   - I-NW, I-NE, I-SW, I-SE, etc, identify curb ramps located on medians and pedestrian refuge islands.
4. Category of accessible feature in which the barrier belongs.
5. **Ramp Type:** , no curb ramp, etc.).
6. **Intersection ID:**
7. **As-Built Description:** Description of as-built barrier based on applicable accessibility codes.
8. **Survey Street:** .
9. **As-is Measurement:** Existing condition/dimension featured on the ramp measured as the most severe barrier on the particular ramp.
10. **Proposed Solution:** Description of steps necessary to remove barrier and, if applicable, an interim solution or notes.
11. **Codes / Info:**
    - PCODE:
    - ADAPROW: Guidelines to enforce Federal accessibility standards in the public rights-of-way.
    - CBC 2007/CBC 2013: The state's adoption of the National Americans with Disability Act.
    - ADA-1991/ADA 2010: The Federal Standard for accessibility adopted by the Department of Justice.
12. **Unit Cost:** year of mitigation, design approach and chosen method of mitigation)
13. **Cross Street:** .
14. **Ramp Features:** Features of curb ramp measured to determine accessibility.
15. **Measurements:** Existing condition/dimension determined for each ramp.
    - (in) measurement in inches
    - (%) measurement in percentage grade
    - **BOLD** text indicate non-compliant dimensions.
    - Normal text indicate compliant dimensions.
16. **Priority:** severity of the barrier. Measured on a scale of 1 to 200 with 200 being the highest priority and 1 being the least.

# SURVEY DATA

## NE Parallel

4206 Ramp Landing

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Running slope at top landing of existing perpendicular curb ramp exceeds the 1:48 (2%) maximum.

• *As-is Measurement:* 5.8%

• *Proposed Solution:*

Demolish existing and provide new, perpendicular curb ramp, including detectable warning surfaces, and top and bottom landings as required.

## NW Parallel

4205 Gutter

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

The slope of the gutter area or street at the foot of a curb ramp or blended transition exceeds 1:20 (5%) in the direction of the pedestrian crossing.

• *As-is Measurement:* 11.4%

• *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp or blended transition with slope no greater than 5%.

## SE Parallel

4207 Ramp Slope

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Running slope of existing parallel curb ramp, where the run is less than 15' in length, is less than 5% or more than 8.3%.

• *As-is Measurement:* Left: 3.4% Right: 11.5%

• *Proposed Solution:*

Demolish existing and provide new parallel curb ramp including detectable warning surfaces, and top and bottom landings as required.

## S Curb Ramp Not Provided

9073 Access Route

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• *Proposed Solution:*

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

*PCODE* PC01B
*ADAPROW* **R207.1**
*ADA-1991* **4.7.1**
*CBC 2007* **1127B.5.1**
Unit Cost **$6000.00**

| X Slope of the Ramp | (%) | |

## W Parallel

9072 Ramp Slope

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Running slope of existing parallel curb ramp, where the run is less than 15' in length, is less than 5% or more than 8.3%.

• *As-is Measurement:* Left: 18.7% Right: 10.5%

• *Proposed Solution:*

Demolish existing and provide new parallel curb ramp including detectable warning surfaces, and top and bottom landings as required.

## SW Curb Ramp Not Provided

2170 Access Route

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

| | |
|---|---|
| Width of Ramp | (in) |
| Slope of the Ramp | (%) |
| X Slope of the Ramp | (%) |

• *As-Built Description:*

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• *Proposed Solution:*

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

*PCODE* PC01B
*ADAPROW* **R207.1**
*ADA-1991* **4.7.1**
*CBC 2007* **1127B.5.1**
Unit Cost **$6000.00**

***Total Costs for Curb Ramps at :*** **Alameda de Las Pulgas** ***and*** **Covington Rd** **$12,000.00**

## NE Parallel

*4166* Gutter

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** 1 single X-walk

• *As-Built Description:*

The slope of the gutter area or street at the foot of a curb ramp or blended transition exceeds 1:20 (5%) in the direction of the pedestrian crossing.

• *As-is Measurement:* 9.0%

• *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp or blended transition with slope no greater than 5%.

## S Parallel

*9091* Ramp Landing

**Stop/Yield Control:** No

**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Bottom landing at existing parallel curb ramp is less than 48" x 48" (60" x ramp width preferred).

• *As-is Measurement:* 35.5"

• *Proposed Solution:*

Demolish existing and provide new parallel curb ramp including detectable warning surfaces, and top and bottom landings as required.

• *Notes:* Parallel with no Left Flare

## SE Perpendicular

*1171* Gutter

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

The slope of the gutter area or street at the foot of a curb ramp or blended transition exceeds 1:20 (5%) in the direction of the pedestrian crossing.

• *As-is Measurement:* 14.4%

• *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp or blended transition with slope no greater than 5%.

## E Perpendicular

*1426* Ramp Flare

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Slope of flare(s) along curb at perpendicular curb ramp exceed(s) 10%.

• *As-is Measurement:* Left: 17.2% Right: 22.2%

• *Proposed Solution:*

Demolish existing and provide new, perpendicular curb ramp, including detectable warning surfaces, and top and bottom landings as required.

## S Curb Ramp Not Provided

1020 Access Route

**Stop/Yield Control:** No
**Crosswalks Served:** No Marked X-walk

• *As-Built Description:*

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• *Proposed Solution:*

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

*PCODE* PC01B
*ADAPROW* **R207.1**
*ADA-1991* **4.7.1**
*CBC 2007* **1127B.5.1**
Unit Cost **$6000.00**

## SW Perpendicular

*1336* Ramp Landing

**Stop/Yield Control:** Yes-Yield Sign
**Crosswalks Served:** 1 single X-walk

• *As-Built Description:*

Top landing at existing perpendicular curb ramp is less than 48" x 48" (60" length x ramp width preferred).

• *As-is Measurement:* 0"

• *Proposed Solution:*

Demolish existing and provide new, perpendicular curb ramp, including detectable warning surfaces, and top and bottom landings as required.

## W Perpendicular

*1245* Ramp Flare

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** 2 X-walks

• *As-Built Description:*

Slope of flare(s) along curb at perpendicular curb ramp exceed(s) 10%.

• *As-is Measurement:* Left: 21.7% Right: 16.3%

• *Proposed Solution:*

Demolish existing and provide new, perpendicular curb ramp, including detectable warning surfaces, and top and bottom landings as required.

## N Perpendicular

9099 Ramp Landing

**Stop/Yield Control:** Stop Light
**Crosswalks Served:** N/A

• *As-Built Description:*

Cross slope at top landing of existing perpendicular curb ramp exceeds 2%.

• *As-is Measurement:* 3.8%

• *Proposed Solution:*

Demolish existing and provide new, perpendicular curb ramp, including detectable warning surfaces, and top and bottom landings as required.

## NW Perpendicular

*1107* Gutter

**Stop/Yield Control:** Stop Light
**Crosswalks Served:** 1 single X-walk

• *As-Built Description:*

The slope of the gutter area or street at the foot of a curb ramp or blended transition exceeds 1:20 (5%) in the direction of the pedestrian crossing.

• *As-is Measurement:* 7.2%

• *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp or blended transition with slope no greater than 5%.

## NE Parallel

*1001* Ramp Landing

**Stop/Yield Control:** Yes-Stop Sign
**Crosswalks Served:** 1 single X-walk

- *As-Built Description:*

Running slope at top landing of existing perpendicular curb ramp exceeds the 1:48 (2%) maximum.

- *As-is Measurement:* 5.5%
- *Proposed Solution:*

Demolish existing and provide new, perpendicular curb ramp, including detectable warning surfaces, and top and bottom landings as required.

## SW Perpendicular

9042 Compliant Curb Ramp

**Stop/Yield Control:** No
**Crosswalks Served:** 2 X-walks

• *As-Built Description:*

Curb ramp or blended transition surveyed for the following items are in compliance with the ADA and applicable building codes.

• *Proposed Solution:*

Provide routine inspection and maintenance to maintain accessible access route.

*PCODE* PC01Z
*ADAPROW* **R204.1**
*ADA-1991* **4.7.1**
*CBC 2007* **1127B.5.1**

## N Curb Ramp Not Provided

*1387* Access Route

**Stop/Yield Control:** Yes-Stop Sign

**Crosswalks Served:** No Marked X-walk

| | |
|---|---|
| Width of Ramp | (in) |
| Slope of the Ramp | (%) |
| X Slope of the Ramp | (%) |

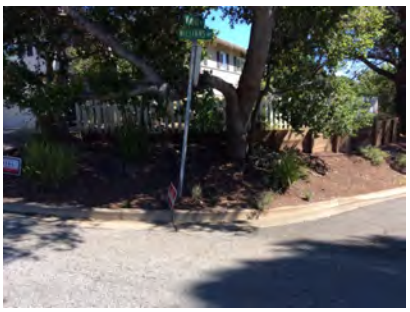
• *As-Built Description:*

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• *Proposed Solution:*

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

*PCODE* PC01B
*ADAPROW* **R207.1**
*ADA-1991* **4.7.1**
*CBC 2007* **1127B.5.1**
Unit Cost **$6000.00**



## SW Curb Ramp Not Provided

*1386* Access Route

**Stop/Yield Control:** No
**Crosswalks Served:** No Marked X-walk

| | |
|---|---|
| Width of Ramp | (in) |
| Slope of the Ramp | (%) |
| X Slope of the Ramp | (%) |

• *As-Built Description:*

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• *Proposed Solution:*

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

1. **Locator Number:** -
   base and its corresponding GIS database.
2. **Year to be Completed:**
   header.)
3. **Orientation:**
   - NW, SW, SE, and NE are the most commonly used directions;
   - NNE, ENE, ESE, SSE, SSW, WSW, WNW, and NNW identify individual pedestrian signal system in situations involving multiple signal systems at one corner;
   - I-NW, I-NE, I-SW, I-SE, etc, identify pedestrian signal systems located on medians and pedestrian refuge island.
4. Category of accessible feature in which the barrier belongs.
5. **Intersection ID:**
6. **As-Built Description:** Description of as-built barrier based on applicable accessibility codes.
7. **Survey Street:**
8. **As-is Measurement:** Existing condition/dimension featured on the signal system measured as the most severe barrier on the particular signal.
9. **Proposed Solution:** Description of steps necessary to remove barrier and, if applicable, an interim solution or notes.
10. **Codes / Info:**
    - PCODE:
    - ADAPROW: Guidelines to enforce Federal accessibility standards in the public rights-of-way.
    - CBC 2013: The state's adoption of the National Americans with Disability Act.
    - ADA-1991/ADA 2010: The Federal Standard for accessibility adopted by the Department of Justice.
    - MUTCD The FHWA
11. **Unit Cost:**
    year of mitigation, design approach and chosen method of mitigation)
12. **Cross Street :**
13. **Ped. Signal Features:** Features of the pedestrian signal system measured to determine accessibility.
14. **Measurements:** Existing condition/dimension determined for each pedestrian signal system.
    - (in) measurement in inches
    - (%) measurement in percentage grade
    - **BOLD** text indicate non-compliant dimensions.
    - Normal text indicate compliant dimensions
15. **Priority:**
    severity of the barrier. Measured on a scale of 1 to 200 with 200 being the highest priority and 1 being the least.

## NE Clear Floor Space

4002 • *As-Built Description:*

The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

• *As-is Measurement:* 8.7%

• *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope(s) not exceeding the required 1:48 (2%) maximum in any direction.

ADAAG: **4.3.7**
ADA 2010: **305.1**
CBC 2016: **11B-305.1**
PROWAG: **R404.2**

Unit Cost **$5300.00**

• *Additional Items:*

Provide 30"x48" level 2% max. clear space at base of signal device. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a button locator tone.

| | | |
|---|---|---|

## SE Clear Floor Space

4001 • *As-Built Description:*

Clear floor or ground space at the pedestrian signal device is less than the required 30" x 48" minimum.

• *Proposed Solution:*

Provide the required 30" x 48" minimum clear floor or ground space at the pedestrian signal device.

ADAAG: **4.2.4.1**
ADA 2010: **305.1**
CBC 2016: **11B-305.1**
PROWAG: **R404.3**

Unit Cost **$5300.00**

• *Additional Items:*

Remount push button to 48" max. height to center of button. Remove the obstruction or reposition the pedestrian signal device to not exceed the 10" maximum side reach depth and 48" high in reach height. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a button locator tone.

## NNE Continuous Access Route

2007 • *As-Built Description:*

Pedestrian access routes does not connect to one or more of the following components: walking surfaces, ramps, curb ramps, blended transitions, crosswalks, pedestrian overpasses and underpasses, elevators, and platform lifts.

• *Proposed Solution:*

Provide an accessible connection between the pedestrian route and elements required to be accessible.

• *Additional Items:*

Provide 30"x48" level 2% max. clear space at base of signal device. Remove the obstruction or reposition the pedestrian signal device to not exceed the 10" maximum side reach depth and 48" high in reach height. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a button locator tone.

## S Clear Floor Space

38 • *As-Built Description:*

The cross slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

• *As-is Measurement:* 8.7%

• *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope(s) not exceeding the required 1:48 (2%) maximum in any direction.

ADAAG: **4.3.7**
ADA 2010: **302.1**
CBC 2016: **11B-302.1**
PROWAG: **R404.2**

Unit Cost **$5300.00**

| | | |
|---|---|---|
| Accessible Path | (y/n) | Yes |
| Clear Floor Space | (y/n) | Yes |
| Clear Floor Slope | (%) | 0.4 |
| Clear Floor X Slope | (%) | **8.7** |
| Button Ht. | (in) | 45.75 |

## WSW Clear Floor Space

9059 • *As-Built Description:*

The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

• *As-is Measurement:* 2.1%

• *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope(s) not exceeding the required 1:48 (2%) maximum in any direction.

ADAAG: **4.3.7**
ADA 2010: **305.1**
CBC 2016: **11B-305.1**
PROWAG: **R404.2**

Unit Cost **$5300.00**

• *Additional Items:*

Provide 30"x48" level 2% max. clear space at base of signal device. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a button locator tone.

**ADA Transition Plan**
**ADDENDUM 1**
**2022 Evaluation and Update**

## OVERVIEW

The ADA Transition Plan Was presented to the City Council in 2018 and the work to complete the important actions in the plan is ongoing. To comply with the requirements for accessibility to City programs, services and activities, the City performs an annual Self-Evaluation of its policies, procedures and practices and to identify physical barriers in its facilities, parks, parking lots and public right of way. In March 2018, access compliance surveys of the City's facilities, parks and public right of way were completed. In November 2019, the City completed a Self-Evaluation of City policies, procedures, and practices for FY 2018-19. Since the content of the plan was not dramatically altered, this update is aimed to inform on progress made to date. The City is completing such Self-Evaluation every fiscal year.

The 2022 ADA Transition Plan update and adoption of the plan represents a moment in time to evaluate the ongoing progress and highlight next steps. The goal of this evaluation and update is to achieve the following:

- Understand the progress made to date on the recommendations outlined in the plan
- Ensure that the City is making progress on the recommendations outlined in the plan
- Identify any roadblocks preventing progress, ways to improve workflows, or adjustments that need to be made to the recommendations

Additionally, one of the purposes of the Transition Plan Update is to identify physical barriers that may limit access to City programs and services. Many of the potential barriers identified are associated with facilities that have accessible features such as designated parking, accessible restrooms, access ramps, accessible door hardware, and other code compliant and usable features. The needs of the community of persons with disabilities inform the removal of barriers and are incorporated into the work to create more access.

The City of Belmont is committed to providing accessible services to the community. Pedestrian improvements, building renovations, and the delivery of services have been accomplished with consideration of the needs of people with disabilities. This report covers Program activities during the fiscal year 2021-22, as the City continued making progress in updating its annual ADA Self Evaluation and the Transition Plan. This work is presented in Table A.

The City of Belmont is also working on programmatic changes to existing City's policies to assist individuals with disabilities. The Department of Public Works is in the process of adopting an ADA Residential Parking policy. In 2022 the Department of Parks and Recreations adopted a policy to define aide accommodation for a camper.

The Transition Plan Update is intended to provide a framework for the continuous improvement of City facilities for people with disabilities. This is a living document, regularly updated as barriers are removed, and existing facilities are renovated.

# STAFF REPORT

| | |
|---|---|
| **Meeting Date:** | March 14, 2023 |
| **Agency:** | City of Belmont |
| **Staff Contact:** | Bozhena Palatnik, Public Works, (650) 595-7463, bpalatnik@belmont.gov |
| **Agenda Title:** | Ralston Avenue Pavement Rehabilitation Project, CCN 2023-622 |
| **Agenda Action:** | Resolution |

## Recommendation

Adopt a resolution approving plans and specifications, authorizing advertisement for sealed bids, authorizing a budget appropriation of $2,173,296 from Measure I Fund balance to the Ralston Segment 3 Re-Pavement Project #3116, authorizing the City Manager to execute a contract with the lowest responsible bidder for an amount not to exceed $1,850,123 plus a ten percent construction contingency, and approving a task order for construction management services with MNS Engineers, Inc. for an amount not to exceed $258,525 for the Ralston Avenue Pavement Rehabilitation Project, CCN 2023-622.

## Strategic Focus Area

Infrastructure and Mobility

## Background

The City recently completed improvements on Ralston Avenue between South Road and Villa Avenue, as part of the Ralston Avenue Corridor Improvements project – Segment 3. The improvements installed to date include modifications to the curb, gutter, sidewalk and new pedestrian crossings. The improvement plans also included pavement section base repairs followed by slurry seal and striping improvements. However, during construction it was realized that the condition of the pavement had deteriorated further than was initially identified during the design process and therefore the pavement dig-outs and slurry seal would not provide suitable pavement rehabilitation strategy prior to the placement of the pavement markings. After discussions with the contractor and additional research, the City determined that the Ralston Avenue pavement should be rehabilitated using Cold In-Place Recycling (CIR) method.

CIR is a rehabilitation technique that reuses existing pavement without applying heat. It involves grinding the top 3-6 inches of existing asphalt surface. The reclaimed asphalt pavement is sized per design specifications and mixed with a recycling agent and/or binder in the machine's heavy-duty chamber before it is put down on the same road. The new mix is spread uniformly across the road by the machine's spreading auger, which allows the paving screed to place and compact in a single sweep.

CIR is typically a faster, cheaper, safer and greener method to improve roadway surfaces. CIR uses a single unit train that does not leave a lowered section or hole that limits access for emergency vehicles. The CIR surface can be traveled on within minutes of completion. This translates into reduced disruption of services to the traveling public.

## Analysis

In in May 2022 Council authorized additional funding (Measure I) to augment existing grant funds to reconstruct the pavement, focusing the project benefits on the long-term investment to the roadway using CIPR. However, since Council approval in May, the contractor was unable to commit to the schedule for work to occur during summer of 2022 and before start of school's fall schedules, and more problematically, they did not honor the originally estimated cost to complete the cold in-place recycled pavement rehabilitation. As a result, and to prevent cost overruns and disruptions to the heavily traveled corridor, the pavement work is proposed for construction in summer 2023 under a separate contract to complete pavement rehabilitation and restriping work along the Ralston Segment 3 project corridor.

Staff solicited proposals from qualified civil engineering firms under its on-call agreements to provide design services and selected Wilsey Ham to design the project. The design is now complete and includes pavement rehabilitation of Ralston Avenue between Villa Avenue and South Road consisting of pavement base repairs, 3-inch cold-in-place-recycled pavement overlaid with 1.5" Hot Mix Asphalt.

To ensure proper construction management support, staff requested proposals from its on-call consultants and selected MNS Engineers, Inc. based on their previous successful experience with these types of projects. The project construction time is estimated at 45 working days. The engineer's construction estimate for this project is $1,850,123. The construction management and inspection services cost are $258,525.

The construction management and inspection component of the project are essential for successful implementation. The following tasks are covered by construction management services:

- Conduct constructability review
- Provide construction oversight and full-time inspection of work
- Address unforeseen field conditions and provide directions to the contractor based on input from Project Manager and Project Engineer
- Check contractor's certified payroll and its compliance with Caltrans rates
- Organize and conduct weekly progress meeting
- Review construction submittals for compliance
- Coordinate third party compaction testing
- Track and manage contract updates
- Estimate and track extra work
- Produce daily inspection logs
- Review and process progress payments and change orders
- Organize project completion punch list items, compile final punch list and ensure its completion
- Produce as-built redlines

## Alternatives

1. Take no action.
2. Refer back to staff for more information.

**Fiscal Impact**

☐ No Fiscal Impact

☒ Funding Source Confirmed: Total estimated project cost, including design, construction, and construction management cost, is $2,423,296. The Ralston Segment 3 Re-Pavement Project #3116 in the Measure I Fund (Account #102-3-730-3116-9030) has a current fiscal FY 2023 budget of $250,000. As such, $2,173,296 additional budget appropriation is needed from the Measure I Fund balance.

# RESOLUTION NO. 2023 –

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BELMONT (1) APPROVING PLANS AND SPECIFICATIONS, AUTHORIZING ADVERTISEMENT FOR SEALED BIDS, AUTHORIZING A BUDGET APPROPRIATION OF $2,173,296 FROM MEASURE I FUND BALANCE TO THE RALSTON SEGMENT 3 RE-PAVEMENT PROJECT #3116, AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH THE LOWEST RESPONSIBLE BIDDER FOR AN AMOUNT NOT TO EXCEED $1,850,123 PLUS A TEN PERCENT CONSTRUCTION CONTINGENCY, AND (2) AUTHORIZING THE CITY MANAGER TO EXECUTE A TASK ORDER FOR CONSTRUCTION MANAGEMENT SERVICES WITH MNS ENGINEERS, INC. FOR AN AMOUNT NOT TO EXCEED $258,525 FOR THE RALSTON AVENUE PAVEMENT REHABILITATION PROJECT, CCN 2023-622**

WHEREAS, the Department of Public Works has prepared plans and specifications for the Ralston Avenue Pavement Rehabilitation Project, CCN 2023-622; and,

WHEREAS, the project is categorically exempt from the California Environmental Quality Act (CEQA) under the CEQA Guidelines Section 15301 I for the maintenance, repair or minor alteration of existing facilities; and,

WHEREAS, the project was budgeted from the Measure I Account Number 102-3-730-3116-9030/Ralston Segment 3 Re-Pavement Project; and,

WHEREAS, Staff solicited proposals from qualified civil engineering firms under existing on-call agreements to provide construction management and inspection services; and,

WHEREAS, MNS Engineers, Inc. was selected to provide the City with on-call pavement program and design services for an amount not to exceed $258,525.

NOW, THEREFORE, the City Council of the City of Belmont resolves as follows:

SECTION 1. Approves plans and specifications, authorizes the advertisement for sealed bids, and authorizes the City Manager to execute a contract with the lowest responsible bidder for an amount not to exceed $1,850,123 plus a ten percent construction contingency for the Ralston Avenue Pavement Rehabilitation Project, City Contract Number 2023-622.

SECTION 2. The City Manager is authorized to execute a Task Order with MNS Engineers, Inc. to provide construction management services for an amount not to exceed $258,525 for the Ralston Avenue Pavement Rehabilitation Project, City Contract Number 2023-622.

SECTION 3. Appropriation of $2,173,296 from Measure I Fund balance to the Ralston Segment 3 Re-Pavement Project #3116 is approved.

**March 1, 2023**

**Ms. Bozhena Palatnik, Senior Civil Engineer**

City of Belmont
1 Twin Pines Lane
Belmont, CA 94002

**SUBJECT: Constructability Review Services, Construction Management Services and Inspection Services for Ralston Avenue Pavement Rehabilitation Project**

Dear Ms. Palatnik,

MNS Engineers, Inc. is pleased to present a cost proposal and scope of work to provide constructability review services, construction management services and inspection services on the upcoming Ralston Avenue Pavement Rehabilitation Project. (City Contract #2023-622).

Our proposed staff's experience on the previous Ralston Avenue, Segment 3 Project give us a detailed understanding of what is needed to complete the upcoming project.

Please feel free to contact me if you have any questions or require additional information.

Sincerely,

James E Scott,

Principal Construction Manager
**MNS Engineers, Inc.**

**Scope of Work**

**Ralston Avenue Pavement Rehabilitation Project**

Perform the following services

## I. Pre-Construction Services

- Constructability review
- Bid support
- Attend pre-bid meeting (if any)
- Leading the preconstruction meeting

## II. Construction Services

- Submittal and RFI coordination
- Project inspection and documentation
- Review of progress payment requests
- Prepare Weekly Statement of Working Days
- Progress Schedule review
- Contract change order analysis and negotiation
- Potential claims analysis and resolution
- Resolution of resident & business concerns
- Utility coordination assistance
- Coordination of materials testing
- Office engineering and document control
- Conduct weekly meetings as needed to coordinate work with City and Contractor
- Address unforeseen field conditions and provide direction to the contractor based on input from Project Manager and Project Engineer
- Check contractor's certified payroll and its compliance with prevailing wage rates
- Estimate and track extra work

## III. Contract Close out

- Preparation of punch list items
- Preparation of red lined record drawings

City Tasks
MNS Tasks
Critical Tasks in Construction
Limited Construction Activity
42 Working Day Construction Window

**Assumptions:**

**1. Project to be advertised March 2023 for approximately 30 days; 30 calendar days to award project**
**2. Limited Notice to Proceed (NTP) will be given within 5 working days after award of contract**
**3. 10 WD allocated for the review/approval of key submittals required before any field activities can occur.**
**4. 42 working day construction contract, plus minor work during Limited NTP phase**
**5. Field activities will start May 2023. Field inspector scheduled for 42+ WD**
**6. Cost proposal excludes costs for delays due to weather, CCO, R/W, and claims filed by the contractor**
**7. Cost proposal excludes costs for adjustment of PG&E boxes. PG&E will adjust boxes after completion of construction project**
**8. No RE field office facilities are included in above cost.**
**9. Budget does not include material testing or construction surveying costs. Material testing and surveying to be performed by others.**
