3. No provision of any such standard, specifications, manual, code or instruction shall be effective to change the duties and responsibilities of CITY, CONTRACTOR or CONSULTANT, or any of their Sub-Contractors, agents or employees from those set forth in the Contract Documents, nor shall it be effective to assign to CITY, CONSULTANTS or any of CONSULTANT's agents or employees any duty or authority to supervise or direct the furnishing or performance of the Work or any duty or authority to undertake responsibility inconsistent with the provisions of para 9.11 (Limitations on Consultant) or any other provision of the Contract Documents.

3.5 AMENDING CONTRACT DOCUMENTS:

3.5.1 The Contract Documents may be amended to provide for additions, deletions and revisions in the Work or to modify the terms and conditions thereof by a Change Order (pursuant to Article 10, Changes in Work).
3.5.2 Additionally, the requirements of the Contract Documents may be supplemented and minor variations and deviations in the Work may be authorized, in one or more of the following ways:
3.5.2.1 A Change Order (pursuant to paragraph 10, Changes in Work)
3.5.2.2 CONSULTANT's approval of a Shop Drawings or sample (pursuant to paragraph 6.11, Shop Drawings and Samples), or
3.5.2.3 CONSULTANT's written interpretation or clarification (pursuant to paragraph 9.4, Clarifications and Interpretations).

3.6 REUSE OF DOCUMENTS:

3.6.1 Neither CONTRACTOR nor any Sub-Contractor or Supplier or other persons or organizations performing or furnishing any of the Work under a direct or indirect contract with the CITY shall have or acquire any title to or ownership rights in any of the Contract Documents, drawings, Special Conditions or other documents used on the Work; and, they shall not reuse any of these on extensions of the Project or any other project without prior written consent of the CITY and CONSULTANT.

ARTICLE 4 – SITE OF WORK

4.1 AVAILABILITY OF LANDS:

4.1.1 The CITY shall furnish, as indicated in the Contract Documents, the lands upon which the Work is to be performed; rights-of-way and easements for access thereto and such other lands which are designated for the use of the CONTRACTOR. Easements for permanent structures or permanent changes in existing facilities shall be obtained and paid for by the CITY, unless otherwise provided in the Contract Documents. Nothing contained in the Contract Documents shall be interpreted as giving the CONTRACTOR exclusive occupancy of the lands of rights-of-way provided. CONTRACTOR shall provide for all additional lands and access thereto that may be required for temporary construction facilities of storage of materials and equipment.

4.1.2 Occupying Private Land: The CONTRACTOR shall not enter upon nor use any property not under the control of the CITY until a written temporary construction easement agreement has been executed by the CONTRACTOR and the property owner, and a copy of such easement furnished to the CITY and CONSULTANT prior to said use; and neither the CITY nor the CONSULTANT shall be liable for any claims or damages resulting from the CONTRACTOR's trespass on or use of any such properties. The CONTRACTOR shall provide the CITY with a signed release from the property owner confirming that the lands have been satisfactorily restored upon completion of the Work.

4.1.3 Work in State, County and CITY Rights-of-Way and Easements: When the Work involves the installation of sanitary sewers, storm sewers, drains, water mains, manholes, underground structures, or other disturbances of existing features in or across streets, rights-of-way, easements, or other property; the CONTRACTOR shall (as the Work progresses) promptly back-fill, compact, grade and otherwise restore the disturbed area to a basic condition which shall permit resumption of pedestrian or vehicular traffic and any other critical activity or function consistent with the original use of the land. Unsightly mounds of earth, large stones, boulders, and debris shall be removed so that the Site presents a neat appearance as part of the Contract.

4.1.4 Work Adjacent to Telephone, Power, Cable TV, and Gas Company Structures: In all cases where Work is to be performed near telephone, power, water, sewer, drainage, cable TV, or gas company facilities; the CONTRACTOR shall provide written notification to the respective companies of the areas of which Work is to be performed, prior to the actual performance of any Work in these areas.

4.1.5 Use of Public Streets: The use of public streets and alleys shall be such as to provide a minimum of inconvenience to the public and to other vehicular and non-vehicular traffic. The CONTRACTOR shall remove any earth or excavated materials spilled from trucks and clean the streets to the satisfaction of the CITY, the CONSULTANT, the Florida Department of Transportation, or other agency or governmental entity having jurisdiction, as applicable.

4.2 REPORTS OF PHYSICAL CONDITIONS:

4.2.1 **Subsurface Explorations:** Where applicable, reference is made in the Special Conditions for identification of those reports of explorations and tests of subsurface conditions at the Site that have been utilized by CONSULTANT in preparation of the Contract Documents.

4.2.2 **Existing Structures:** Where applicable, reference is made to the Special Conditions for identification of those drawings of physical conditions in or relating to existing surface and subsurface structures (except Underground Facilities referred to in paragraph 4.3 herein) which are at or contiguous to the Site that have been utilized by CONSULTANT in preparation of the Contract Documents.

4.2.3 Neither the CITY nor CONSULTANT makes any interpretation as to the completeness of the reports or drawings referred to in paragraphs 4.2.1 "Subsurface Explorations" or 4.2.2 "Existing Structures" above or the accuracy of any data or information contained herein. CONTRACTOR may rely upon the general accuracy of the technical data contained in such reports and drawings but not for the completeness thereof for CONTRACTOR''s purposes including but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by the CONTRACTOR and safety precautions and programs incident thereto. The CONTRACTOR may not rely upon any interpretation of such technical data, including any interpolation or extrapolation thereof, or any non-technical data, interpretations, and opinions contained therein.

4.2.4 Where the dimensions and location of existing structures are of importance to the installation or connection of new Work, the CONTRACTOR shall verify such dimensions and locations in the field before the fabrication of any materials or equipment which is dependent on the correctness of such information. There shall be no additional cost to the CITY for CONTRACTOR's failure to verify such dimensions and locations, or for inaccurate verifications by CONTRACTOR. CONTRACTOR shall bear the full cost of any modifications to the Work which result from subsurface conditions which result from subsurface conditions which could have been reasonably been discovered prior to commencement of the Work or a portion of the work.

4.3 PHYSICAL CONDITIONS – UNDERGROUND FACILITIES:

4.3.1 **Indicated:** The information and data indicated in the Contract Documents with respect to existing Underground Utilities at or contiguous to the Site is based on information and data furnished to the CITY or CONSULTANT by the owners of such Underground Facilities or by others.

4.3.1.1 The CITY and CONSULTANT shall not be responsible for the accuracy or completeness of any such information or data, and

4.3.1.2 The CONTRACTOR shall notify the Underground Service Alert (USA) System, Phone No. 1-800-227-2600 and Sunshine State One Call Services (1-800-432-4770) at least forty-eight (48) hours in advance of the commencement of Work at any site to allow the member of utilities to examine the construction site and mark the location of the utilities' respective facilities.

4.3.1.3 The CONTRACTOR acknowledges that some (or all) of the utility companies with facilities shown on the drawings may not be members of the USA System or Sunshine State One Call Services; and therefore, not automatically contacted by the above referenced telephone number. The CONTRACTOR will be responsible for making themselves aware of utility company facilities not reported by the USA System or Sunshine State One Call Services, and shall be liable for any and all damages stemming from repair or delay costs or any other expenses resulting from the unanticipated discovery of underground utilities. The CONTRACTOR shall be responsible for notifying all of the utilities at least forty-eight (48) hours in advance of the commencement of Work at any site to allow the utilities to examine the construction site and mark the location of the utilities' respective facilities. The CONTRACTOR shall also be responsible for verifying that each utility has responsibly responded to such notification.

4.3.1.4 CONTRACTOR shall have full responsibility for reviewing and checking all such information and data. Further, the

CONTRACTOR shall be responsible for locating all Underground Facilities whether or not shown or indicated in Contract Documents, for coordination of the Work with the owners of such Underground Facilities during construction, for the safety and protection thereof as provided in paragraph 6.10, and repairing any damage thereto resulting from Work, the cost of all of which shall be considered as having been included in the Contract Price.

4.3.1.5 All water pipes, sanitary sewers, storm drains, force mains, gas mains, or other pipes, telephone or power cables or conduits, pipe or conduit casings, curbs, sidewalks, service lines, and all other obstructions, whether or not shown, shall be temporarily removed from or supported across utility line excavations. Where it is necessary to temporarily interrupt services, the CONTRACTOR shall notify both the CITY and occupant of such facilities five (5) calendar days before the interruption and again immediately before service is resumed. Before disconnecting any pipes or cables, the CONTRACTOR shall obtain permission from the CITY or occupant, or shall make suitable arrangements for their disconnection by the CITY or occupant. The CONTRACTOR shall be responsible for all damages to any such pipes, conduits or cables, and shall restore them to service promptly, as part of the Work, as soon as the Work has progressed past the point involved. Approximate locations of known water, sanitary, drainage, natural gas, power, telephone and cable TV installations along the route of new pipelines or in the vicinity of new Work are shown, but are to be verified in the field by the CONTRACTOR prior to performing the Work. The CONTRACTOR shall uncover these pipes, ducts, cables, etc. carefully by hand prior to installing their work. Any discrepancies or differences found shall be immediately brought to the attention of the CONSULTANT in order that necessary changes may be made to permit installation of the Work.

4.3.2 **Not Indicated:** If an Underground Facility is uncovered or revealed at or contiguous to the Site which was not shown, nor located by the facilities owner and which CONTRACTOR could not reasonably have been expected to be aware of; CONTRACTOR shall promptly, after becoming aware of thereof and before performing any Work affected thereby (except in an emergency as permitted by paragraph 6.10), identify the owner of such Underground Facility and give written notice thereof to that owner, the CITY and CONSULTANT. The CONSULTANT shall promptly review the Underground Facility to determine the extent to which the Contract Documents should be modified to reflect and document the consequences of the existence of the Underground Facility. The Contract Documents shall be amended or supplemented to the extent necessary. During such time, CONTRACTOR shall be responsible for the safety and protection of such Underground Facility as provided in paragraph 6.13.

4.4 DIFFERING SITE CONDITIONS

4.4.1 The CONTRACTOR shall notify the CONSULTANT in writing, of the following unforeseen conditions, hereinafter called differing Site conditions, within twenty-four (24) hours upon their discovery (but in no event later than seven (7) days after their discovery) and before they are disturbed:

4.4.1.1 Subsurface or latent physical conditions at the Site of Work differing materially from those indicated, described, or delineated in the Contract Documents, including those reports discussed in paragraph 4.2 and 4.3 (Physical Conditions, Underground Facilities), and

4.4.1.2 Any unknown physical conditions at the Site of the Work of an unusual nature differing materially from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents including those reports and documents discussed in paragraph 4.2 and 4.3

4.4.2 CONSULTANT shall promptly review the pertinent conditions, determine the necessity of obtaining additional explorations or tests with respect thereto, and advise the CITY in writing (with a copy to the CONTRACTOR) of CONSULTANT's findings and conclusions.

4.4.3 If CONSULTANT concludes that because of newly discovered conditions a change in the Contract Documents is required, a Change Order shall be issued as provided in Article 10 (Changes in Work) to reflect and document the consequences of the difference.

4.4.4 In each such case, an increase or decrease in the Contract Price or an extension or shortening of the Contract Time, or any combination thereof, shall be allowable to the extent that they are attributable to any such inaccuracy or difference. No such change shall occur if the differing site conditions could reasonably have been discovered by CONTRACTOR prior to commencement of Work, or a portion of the Work, through the subsurface explorations described in Sections 4.2 and 4.3. If the CITY and CONTRACTOR are unable to agree as to the amount or length thereof, a claim may be made therefor as provided in Article 11 (Change of Contract Price) and Article 12 (Change of Contract Time).

4.4.5 The CONTRACTOR's failure to give notice of differing Site conditions within twenty-four (24) hours or no later than seven (7) days of their discovery and before they are disturbed, shall constitute a waiver of all claims in connection therewith, whether direct or consequential in nature.

4.5 REFERENCE POINTS:

4.5.1 The CITY shall provide, if available, engineering surveys to establish reference points for construction, which in CONSULTANT's judgment are necessary to enable CONTRACTOR to proceed with the Work.

4.5.2 CONTRACTOR shall be responsible for laying out the Work (unless otherwise specified in the General Requirements), shall protect and preserve the established reference points and shall make no changes or relocations without the prior written approval of the CITY. The CONTRACTOR shall report to the CONSULTANT whenever any reference point is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points by professionally qualified personnel.

ARTICLE 5 – BONDS AND INSURANCE

5.1.1 CONTRACTOR shall upon delivery of the executed Contract or receipt of Award letter from the CITY, furnish Performance and Payment Bonds, each in an amount at least ONE HUNDRED PRECENT (100%) of the Contract Price as security for the faithful performance and payment of all CONTRACTOR's obligations under the Contract Documents. Said bonds must be provided to the CITY within ten (10) business days of the Award Letter or delivery of a Purchase Order or contract to the CONTRACTOR to execute and return to the CITY; or the CITY, at its sole discretion and option may terminate the contract. These bonds shall remain in effect at least until one (1) year

after the date when final payment becomes due, except as otherwise provided by Law or Regulation or by the Contract Documents. CONTRACTOR shall also furnish such other Bonds as are required by the Special Conditions. Each Bond shall be furnished in an amount equal to ONE HUNDRED PERCENT (100%) of the amount of the Contract award. The form and conditions of the Bond and the Surety shall be as specified and supplied by the CITY in the Bid Documents.

5.1.2 The Surety shall be a nationally recognized Surety Company, acceptable to the CITY, listed on the current list of "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and Acceptable Reinsuring Companies" as published in Circular 570 (amended) by the Audit Staff, Bureau of Government Financial Operations vs Treasury Department, and meet other requirements of Section 287.0935 Florida Statutes.

For projects exceeding five hundred thousand dollars ($500,000), all bonds shall be placed with sureties with Best Ratings as stated below:

The name, address, and telephone number of the surety and its agent must be listed on the bond.

5.1.3 For contracts up to $499,999.99, the surety shall have twice the minimum surplus and capital required by the Florida Insurance Code at the time the Bid is issued for the Work, otherwise the surety shall have the minimum ratings:

CONTRACT AMOUNT	BEST KEY RATING
Under $500,000	Class IX A or better
$500,000 to $2,499,999.99	Class XI A or better
Over $2,500,000	Class XIV A or better

5.1.4 The Bond shall specifically incorporate and acknowledge the Surety's responsibility for liquidated damages.

5.1.5 Bonds shall be executed and issued by a registered agent, licensed and having an office in the State of Florida representing such corporate sureties.

5.1.6 If the CONTRACTOR is a partnership, the Bond shall be signed by each of the individuals who are partners; if a corporation, the Bond shall be signed in the correct corporate name by duly authorized officer, agent, or attorney-in-fact. There shall be an appropriate number of executed counterparts of the bond corresponding to the number of counterparts in the Contract. Each executed bond shall be accompanied by a) appropriate acknowledgement of the respective parties; b) appropriate duly certified copy of Power-of-Attorney or other certification of authority where Bond is executed by agent, officer or other representative of CONTRACTOR or Surety; c) duly certified extract from by-laws or resolutions of Surety under which Power-of-Attorney, or other certificate of Authority of its agent, officer or representative was issued.

5.1.7 If the Surety on any Bond furnished by CONTRACTOR is declared bankrupt or becomes insolvent, or its right to do business is terminated in the state of Florida or it ceases to meet the requirements of paragraph 5.1.3 and 5.1.4, CONTRACTOR shall within five (5) days thereafter substitute another Bond and Surety, both of which must be in conformance with paragraph 5.1.3 and 5.1.4. **Under no circumstances shall the successful CONTRACTOR begin Work until they have supplied to the CITY Performance and Payment Bonds and Affidavit for Bond using the CITY's form, and the CITY has approved the Bond.**

5.1.8 **The Bonds must be recorded in the Legal Records Department of Palm Beach County, Florida. Proof of recordation must be submitted to Procurement Services Division. The Bond number must be stated on the first page of the Bond.**

5.2 INSURANCE:

5.2.1 The CONTRACTOR agrees to, in the performance of Work and services under this Agreement, comply with all federal, state, and local laws and regulations now in effect, or hereinafter enacted during the term of this Agreement that are applicable to the CONTRACTOR, its employees, agents, or Sub-Contractors, if any, with respect to the Work and services described herein. The CONTRACTOR shall obtain at CONTRACTOR's expense all necessary insurance in such form and amount as required by the CITY's Risk Management Department before beginning work under this Agreement. The CONTRACTOR shall maintain such insurance in full force and effect during the life of this Agreement. The CONTRACTOR shall provide to the CITY's Risk Management Department, all insurance certificates required under this section prior to beginning any work under this Agreement. The CONTRACTOR shall indemnify and save the CITY harmless from any damage resulting to it for failure to either CONTRACTOR or any Sub-Contractor to obtain or maintain such insurance.

The following are required types and minimum limits of insurance coverage, which the CONTRACTOR agrees to maintain during the term of this Contract, unless otherwise stated:

FOR PROJECTS $ 0 - $ 1,000,000:	MINIMUM REQUIRED LIMITS	
Commercial General Liability, including:	Each Occurrence	$ 1,000,000
Premises/Operations	General Aggregate	$ 1,000,000
Contractual Liability	Products – Comp/Op Aggregate	$ 1,000,000
Explosion, Collapse, Underground Hazard	Personal & Advertising Injury	$ 1,000,000
Broad Form Property Damage		
Cross Liability and Severability of Interest Clause		
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident	$ 1,000,000
	Disease Policy Limit	$ 1,000,000
	Disease Each Employee	$ 1,000,000

FOR PROJECTS $ 1,000,000 – $ 2,000,000:

Commercial General Liability, including:	Each Occurrence	$ 2,000,000
Premises/Operations	General Aggregate	$ 2,000,000
Contractual Liability	Products – Comp/Op Aggregate	$ 1,000,000
Explosion, Collapse, Underground Hazard	Personal & Advertising Injury	$ 1,000,000
Broad Form Property Damage		
Cross Liability and Severability of Interest Clause		
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident	$ 1,000,000
	Disease Policy Limit	$ 1,000,000
	Disease Each Employee	$ 1,000,000

FOR PROJECTS $ 2,000,000 – $ 3,000,000:

Commercial General Liability, including:	Each Occurrence	$ 3,000,000
Premises/Operations	General Aggregate	$ 3,000,000
Contractual Liability	Products – Comp/Op Aggregate	$ 1,000,000
Explosion, Collapse, Underground Hazard	Personal & Advertising Injury	$ 1,000,000
Broad Form Property Damage		
Cross Liability and Severability of Interest Clause		
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident	$ 1,000,000
	Disease Policy Limit	$ 1,000,000
	Disease Each Employee	$ 1,000,000

FOR PROJECTS $ 3,000,000 – $ 4,000,000:

Commercial General Liability, including:	Each Occurrence	$ 4,000,000
Premises/Operations	General Aggregate	$ 4,000,000
Contractual Liability	Products – Comp/Op Aggregate	$ 1,000,000
Explosion, Collapse, Underground Hazard	Personal & Advertising Injury	$ 1,000,000
Broad Form Property Damage		
Cross Liability and Severability of Interest Clause		
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident	$ 1,000,000
	Disease Policy Limit	$ 1,000,000
	Disease Each Employee	$ 1,000,000

FOR PROJECTS $ 4,000,000 – $ 5,000,000:

Commercial General Liability, including:	Each Occurrence	$ 5,000,000
Premises/Operations	General Aggregate	$ 5,000,000
Contractual Liability	Products – Comp/Op Aggregate	$ 1,000,000
Explosion, Collapse, Underground Hazard	Personal & Advertising Injury	$ 1,000,000
Broad Form Property Damage		
Cross Liability and Severability of Interest Clause		
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident	$ 1,000,000
	Disease Policy Limit	$ 1,000,000
	Disease Each Employee	$ 1,000,000

FOR PROJECTS $ 5,000,000 – $ 6,000,000:

Commercial General Liability, including:	Each Occurrence	$ 6,000,000
Premises/Operations	General Aggregate	$ 6,000,000
Contractual Liability	Products – Comp/Op Aggregate	$ 1,000,000
Explosion, Collapse, Underground Hazard	Personal & Advertising Injury	$ 1,000,000
Broad Form Property Damage		
Cross Liability and Severability of Interest Clause		
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident	$ 1,000,000
	Disease Policy Limit	$ 1,000,000
	Disease Each Employee	$ 1,000,000

FOR PROJECTS $ 6,000,000 – $ 7,000,000:

Commercial General Liability, including: Premises/Operations Contractual Liability Explosion, Collapse, Underground Hazard Broad Form Property Damage Cross Liability and Severability of Interest Clause	Each Occurrence General Aggregate Products – Comp/Op Aggregate Personal & Advertising Injury	$ 7,000,000 $ 7,000,000 $ 1,000,000 $ 1,000,000
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident Disease Policy Limit Disease Each Employee	$ 1,000,000 $ 1,000,000 $ 1,000,000

FOR PROJECTS $ 7,000,000 – $ 8,000,000:

Commercial General Liability, including: Premises/Operations Contractual Liability Explosion, Collapse, Underground Hazard Broad Form Property Damage Cross Liability and Severability of Interest Clause	Each Occurrence General Aggregate Products – Comp/Op Aggregate Personal & Advertising Injury	$ 8,000,000 $ 8,000,000 $ 1,000,000 $ 1,000,000
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident Disease Policy Limit Disease Each Employee	$ 1,000,000 $ 1,000,000 $ 1,000,000

FOR PROJECTS $ 8,000,000 – $ 9,000,000:

Commercial General Liability, including: Premises/Operations Contractual Liability Explosion, Collapse, Underground Hazard Broad Form Property Damage Cross Liability and Severability of Interest Clause	Each Occurrence General Aggregate Products – Comp/Op Aggregate Personal & Advertising Injury	$ 9,000,000 $ 9,000,000 $ 1,000,000 $ 1,000,000

Workers Compensation	Each Accident Disease Policy Limit Disease Each Employee	$ 1,000,000 $ 1,000,000 $ 1,000,000

FOR PROJECTS $ 9,000,000 – $ 10,000,000:

Commercial General Liability, including: Premises/Operations Contractual Liability Explosion, Collapse, Underground Hazard Broad Form Property Damage Cross Liability and Severability of Interest Clause	Each Occurrence General Aggregate Products – Comp/Op Aggregate Personal & Advertising Injury	$ 10,000,000 $ 10,000,000 $ 1,000,000 $ 1,000,000
Auto Liability	Combined Single Limit	$ 1,000,000
Workers Compensation	Each Accident Disease Policy Limit Disease Each Employee	$ 1,000,000 $ 1,000,000 $ 1,000,000

5.2.2 The CITY reserves the right to require higher limits depending upon the scope of work under this Agreement.

5.2.3 Neither the CONTRACTOR nor any Sub-Contractor shall commence work under this Contract until they have obtained all insurance required under this section and have supplied the CITY with evidence of such coverage in the form of an insurance certificate and endorsement. The CONTRACTOR shall ensure that all Sub-Contractors shall comply with the above guidelines and shall maintain the necessary coverage throughout the term of this Agreement. In the CITY's sole discretion, CONTRACTOR's failure to timely secure all required insurance shall void this Agreement and the Bid Award and the CITY may select and contract with another reasonable Bidder.

5.2.4 All insurance carriers shall be rated at least A-VII per A.M. Best's Key Rating Guide and be licensed to do business in Florida. Policies shall be "Occurrence" form. Each carrier shall give the CITY sixty (60) days notice prior to cancellation.

5.2.5 The CONTRACTOR's general liability insurance policies shall be endorsed to add the CITY of Boynton Beach, its employees, representatives and elected officials as an "additional insured". The CONTRACTOR's Worker's Compensation carrier shall provide a Waiver of Subrogation to the CITY. The CONTRACTOR shall be responsible for the payment of all deductibles and self-insured retentions.

5.2.6 The CITY may require that the CONTRACTOR purchase a contract or performance bond equal to the cost of the Project. If the CONTRACTOR is to provide professional services under this Agreement, the CONTRACTOR must provide the CITY with evidence of Professional Liability Insurance with, at a minimum, a limit of $1,000,000 per occurrence and $2,000,000 in the aggregate. "Claims-Made" forms are acceptable for Professional Liability Insurance.

5.2.7 The CITY may require higher limits for Professional Liability Insurance depending on the size of the project. In any event, the Bidder shall maintain such Professional Liability Insurance in effect for three (3) years after the completion of the Project.

5.2.8 If any operations are to be undertaken or are about navigable waters, the CITY will require coverage included with the Worker's Compensation Insurance, the U.S. Longshoremen and Harbor Workers Act and/or Jones Act.

5.2.9 The CITY requires the CONTRACTOR to carry Builder's Risk Insurance for the Project, it must be in the amount equal to the completed cost of the Project.

5.2.10 Fulfillment by the CONTRACTOR of the insurance provisions does *not* limit theCONTRACTOR's liability to the amount of the policy limits.

ARTICLE 6 – CONTRACTOR'S RESPONSIBILITIES

6.1 CONTRACTOR STATUS:

6.1.1 The CONTRACTOR is an independent contractor and is not an employee or agent of the CITY. Nothing in this Contract shall be interpreted to establish any relationship other than that of an independent contractor, between the CITY and the CONTRACTOR, its employees, agents, Sub-Contractors, or assigns, during or after the performance of this Contract. The CONTRACTOR shall take the whole responsibility for the means, methods, techniques, sequences, and production of the Work.

6.2 CONTRACTOR RISK:

6.2.1 The CONTRACTOR shall bear all losses resulting to CONTRACTOR, on account of the amount or character of the Work, or because of the nature of the ground beneath, in or on which the Work is done is different from what was assumed or expected, or because of bad weather, or because of errors or omissions in their or its bid on the Contract Price, or except as otherwise provided in the Contract Documents because of any other causes whatsoever. Execution of this Contract by the CONTRACTOR is a representation that the CONTRACTOR has visited the Site, has conducted sufficient investigation of the surface and sub-surface conditions in order to submit its bid, has become familiar with the local conditions under which the Work is to be performed, and correlated personal observations with the requirements of the Contract Documents.

6.2.2 The CONTRACTOR shall protect the entire Work, all materials under the Contract and the CITY's property (including machinery and equipment) in, or on, or adjacent to the Site of the Work until final completion of Work, from action of the elements, acts of other contractors, or except as otherwise provided in the Contract Documents, and from any other causes whatsoever; should any damage occur by reason of any of the foregoing, the CONTRACTOR shall repair at their own expense to the satisfaction of the CITY or its Project Manager. Neither the CITY, nor its officers, employees, or agents assume any responsibility for collection of indemnities or damages from any person or persons causing injury to the Work of the CONTRACTOR.

6.2.3 At its expense, the CONTRACTOR shall take all necessary precautions (including without limitation) the furnishing of guards, fences, warning signs, walks, flags, cables and lights for the safety of and the prevention of injury, loss and damage to persons and property. The term "persons" includes without limitations, members of the public, the CITY and its employees and agents, the Project Manager and his/her employees, CONTRACTOR's employees, CONTRACTOR''s Sub-Contractors and Sub-Contractors respective employees, who are on or about or adjacent to the premises where said Work is to be performed. CONTRACTOR shall comply with all applicable provisions of safety laws, rules, ordinances, regulations and orders of duly constituted federal, state, and local authorities and building codes.

6.2.4 The CONTRACTOR assumes all risk of loss, damage and destruction to all of its materials, tools, appliances and property of every description and that of its Sub-Contractors and Sub-Contractor's respective employees or agents, and injury to or death of the CONTRACTOR, its employees, Sub-Contractors or Sub-Contractor's respective employees or agents, including legal fees, court costs or other legal expenses, arising out of or in connection with the performance of this Contract.

6.3 SUPERVISION AND SUPERINTENDENCE:

6.3.1 The CONTRACTOR shall supervise and direct the Work. It shall be solely responsible for the means, methods, techniques, sequences and procedures of construction. The CONTRACTOR shall employ and maintain at the Worksite(s), a qualified supervisor or superintendent who shall have been designated in writing by the CONTRACTOR as its CONTRACTOR's representative at the Site. The supervisor shall have full authority to act on behalf of the CONTRACTOR and all communications given to the supervisor shall be as binding as if given to the CONTRACTOR. The supervisor shall be present on the Site at all times as required to perform adequate supervision and coordination of the Work. (Copies of written communications given to the superintendent shall be mailed to the CONTRACTOR's home office). CONTRACTOR shall notify the CITY in writing of the name, title and contact information for the designated supervisor/superintendent.

6.4 LABOR, MATERIALS AND EQUIPMENT:

6.4.1 The CONTRACTOR shall provide competent, suitably qualified personnel to survey and lay out the Work and perform construction as required by the Contract Documents. They shall at all times maintain good discipline and order at the Site. Except in connection with the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise indicated in the Contract Documents, all Work at the Site shall be performed during regular working hours as defined in the Special Conditions herein, and CONTRACTOR shall not permit overtime work or the performance of Work on Saturday, Sunday, or any legal holiday observed by the CITY, without the CITY's Project Manager's written consent.

6.4.2 Materials and Equipment: The CONTRACTOR shall furnish all materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water and sanitary facilities and all other facilities and incidentals necessary for the execution, testing, initial operation and completion of the Work. All material stored on the job site shall remain the

responsibility of the CONTRACTOR until incorporated in the Work. The CITY shall not reimburse the CONTRACTOR for materials lost, stolen, or damaged while stored on the job site.

6.4.3 Condition of Materials: All materials and equipment shall be new. When special makes or grades of material which are normally packaged by the supplier or manufacturer are specified or approved, such materials shall be delivered to the Site in their original packages or container with seals unbroken and labels intact.

6.4.4 Installation/Assembly: All materials and equipment shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with the instructions of the applicable manufacturer, fabricator or processors, except as otherwise provided in the Contract Documents.

6.4.5 Materials, Equipment, Products and Substitutions: CONTRACTOR shall verify that materials, equipment, and products incorporated in the Work are fit for their intended purpose before being purchased by the CONTRACTOR. However, the CONTRACTOR shall submit to the CONSULTANT and the CITY's Project Manager a list of proposed materials, equipment or products, together with such samples considered substitutes as may be necessary to determine their acceptability and obtain approval, pursuant to Section 32, Instruction to Bidders if prior to award, or after award, within ten (10) calendar days after the CONTRACTOR should have been aware of the need for substitution, unless otherwise stipulated in the Special Conditions. No request for payment for "or equal" equipment shall be approved until this list has been received and approved by the CONSULTANT. The CITY may require the CONTRACTOR to furnish at CONTRACTOR's expense, a special performance guarantee or other surety with respect to any substitute.

6.4.5.1 Whenever a material, article, or piece of equipment is identified on the Drawings or Specifications by reference to brand name or catalogue number, it shall be understood that this is referenced for the purpose of defining the performance or other salient requirements, and that other products of equal capacities, quality and function may be considered. The CONTRACTOR may request the substitution of a material, article, or piece of equipment of equal substance and function for those referred to in the Contract Documents by reference to brand name or catalogue number and if, the opinion of the CONSULTANT and CITY, such material, article, or piece of equipment is of equal substance and function to that specified, the CONSULTANT with concurrence of the CITY's Project Manager may approve its substitution and use by the CONTRACTOR.

6.4.5.2 The application shall state that the evaluation and acceptance of the proposed substitute shall not prejudice CONTRACTOR's achievement of Substantial Completion on time, whether or not acceptance of the substitute for use in the Work shall require a change in any of the Contract Documents (or in the provisions of any other direct contract with the CITY for Work on the Project) to adapt the design to the proposed substitute and whether or not incorporation or use of the substitute in connection with the Work is subject to payment of any license fee or royalty. All variations of the proposed substitute from that specified shall be identified in the application and available maintenance, repair, and replacement service shall be indicated.

6.4.5.3 The application shall also contain itemized estimate of all costs and cost savings that shall result directly or indirectly from acceptance of such substitute, including costs or redesign and claims of other contractors affected by CONSULTANT in evaluating the proposed substitute. CONSULTANT may require CONTRACTOR to furnish at CONTRACTOR's expense, additional data about the proposed substitute.

6.4.5.4 Incidental changes or extra component parts required to accommodate the substitute shall be made by the CONTRACTOR without an increase in the Contract Price or Contract Time. The CONTRACTOR shall reimburse the CITY for charges of the CONSULTANT and CONSULTANT'S consultants for evaluating each proposed substitution. These costs shall include transportation, to operating installation at factories, etc.

6.4.5.5 No substitute shall be ordered or installed without the written approval of the CONSULTANT with the CITY's Project Manager's concurrence.

6.4.5.6 Delay caused by obtaining approvals for substitute materials or installations shall be attributable to CONTRACTOR and shall not be considered justifiable grounds for an extension of construction time.

6.4.5.7 Should any work or materials, equipment or products not conform with requirements of the Drawings and Specifications or become damaged during the progress of the Work, such Work or materials shall be removed and replaced, together with any work disarranged by such alterations, at any time before completion and acceptance of the Project. All such work shall be done at the expense of the CONTRACTOR.

6.4.5.8 No materials or supplies for the Work shall be purchased by the CONTRACTOR or by any Sub-Contractor subject to any chattel mortgage or under conditional sale or other agreement by which an interest is retained by the Seller. The CONTRACTOR warrants that it has clear title to all materials and supplies used by them in the Work.

6.4.5.9 If a specific means, method, technique, sequence or procedure of construction is indicated in or required by the Contract Documents, CONTRACTOR may furnish or utilize a substitute means, method, sequence, technique or procedure of construction, if applicable, to the CITY and CONSULTANT, if CONTRACTOR submits sufficient information to allow CITY and CONSULTANT to determine that the substitute proposed is equivalent to that indicated or required by the Contract Documents. The procedure for review by the CITY and CONSULTANT shall be similar to that provided in paragraph 6.4.5.1 (Materials, Equipment, Products and Substitutions, par. 2) as applied by CONSULTANT and as may be supplemented in the Special Conditions.

6.4.5.10 Any two (2) or more pieces of material or equipment of the same kind, type or classification, and being used for identical types of service, shall be made by the same manufacturer.

6.5 CONCERNING SUBCONTRACTORS:

6.5.1 The CONTRACTOR shall not employ any sub-contractor, other persons or organization (whether initially or as a substitute) against whom the CITY or the CONSULTANT may have reasonable objection, nor shall the CONTRACTOR be required to employ any sub-contractor against whom it has reasonable objection. The CONTRACTOR shall not make any substitution for any sub-contractor who has been accepted by the CITY's Project Manager and the CONSULTANT, unless the CONSULTANT determines that there is good cause for doing so. If after bid opening and prior to the award of the Contract, the CITY objects to certain suppliers or sub-contractors, the CITY may permit CONTRACTOR to submit an acceptable substitute so long as there is no change in the Contract Price or Contract Time. If the Contract Price or Contract Time is increased or extended, the CITY may return the Bid Bond and award the Contract to the next qualified, competent Bidder. If after the award of the Contract, the CITY objects to certain suppliers or sub-contractors, the CITY shall permit CONTRACTOR to make an appropriate and acceptable substitution which is also acceptable to the CITY. No acceptance by the CITY or the CONSULTANT of any such sub-contractor, supplier, or other person or organization shall constitute a waiver of any right of the CITY or CONSULTANT to reject *defective* Work.

6.5.2 Responsibility: The CONTRACTOR shall be fully responsible for all acts and omissions of its Sub-Contractors and of persons and organizations directly or indirectly employed by the CONTRACTOR and of persons and organizations for whose acts any of

CONTRACTOR or Sub-Contractor may be liable to the same extent that they are responsible for the acts and omissions of persons directly employed by CONTRACTOR. Nothing in the Contract Documents shall create any contractual relationship between CITY or CONSULTANT and any Sub-Contractor or other person or organization having a direct contract with CONTRACTOR, nor shall it create any obligation on the part of CITY or CONSULTANT to pay or to see to the payment of any moneys due any sub-contractor or other person or organization, except as may otherwise be required by law. CITY or CONSULTANT may furnish to any sub-contractor or other person or organization, to the extent practicable, evidence of amounts paid to CONTRACTOR on account on specific Work done in accordance with the Schedule of Values.

6.5.3 Division of Work: The divisions and sections of the Specifications and the identifications of any Drawings shall not control the CONTRACTOR in dividing the Work among sub-contractors or delineating the Work to be performed by any specific trade.

6.5.4 Terms and Conditions: The CONTRACTOR agrees to bind specifically every sub-contractor to the applicable terms and conditions of the Contract Documents for the benefit of the CITY.

6.5.5 Agreement: Any and all Work performed for the CONTRACTOR by a sub-contractor shall be pursuant to an appropriate agreement between the CONTRACTOR and the sub-contractor.

6.5.6 Responsibility: The CONTRACTOR shall be responsible for the coordination of the trades, sub-contractors and material men engaged upon in work of the Project...

6.5.7 The CONTRACTOR shall cause appropriate provisions to be inserted in all subcontracts relative to the Work, to bid sub-contractors to the CONTRACTOR by the terms of these General Conditions and other Contract Documents insofar as applicable to the Work of sub-contractors, and to give the CONTRACTOR the same power as regards terminating any sub-contract that the CITY may exercise over the CONTRACTOR under any provisions of the Contract Documents.

6.5.8 The CITY or CONSULTANT shall not undertake to settle any differences between the CONTRACTOR and his sub-contractors or between sub-contractors.

6.5.9 If in the opinion of the CITY's Project Manager or CONSULTANT, any subcontractor on the Project proves to be incompetent or otherwise unsatisfactory; such Sub-Contractor shall be replaced if and when directed in writing.

6.5.10 CONTRACTOR shall also:

6.5.10.1 Observe work of each subcontractor to monitor compliance with Schedule.
6.5.10.2 Verify that labor and equipment are adequate for the Work and the Schedule.
6.5.10.3 Verify that product procurement schedules are adequate.
6.5.10.4 Verify that product deliveries are adequate to maintain schedule.
6.5.10.5 Report non-compliance to CONSULTANT with recommendation for changes.

6.6 PATENTS, FEES AND ROYALTIES:

6.6.1 The CONTRACTOR shall pay all license fees and royalties and assume all cost incidents to the use of any invention, design, process or device which is the subject of patent rights or copyrights held by others. They shall indemnify and hold harmless the CITY and CONSULTANT and anyone directly or indirectly employed by either of them from and against all claims, damages, losses and expenses (including attorney's fees) arising out of any infringement of such rights during or after completion of the Work, and shall defend all such claims in connection with any alleged infringement of such rights.

6.6.2 Patent rights: The CONTRACTOR shall be responsible for determining the application of patent rights and royalties on materials, appliances, articles or systems prior to bidding. However, they shall not be responsible for such determination on systems which do not involve purchase by them of materials, appliances and articles.

6.7 PERMITS, LAWS AND REGULATIONS:

6.7.1 Permits: The CONTRACTOR shall secure and pay for all construction permits and licenses and shall pay all governmental charges and inspection fees necessary for the prosecution of the Work, which are applicable at the time of its Bid. The CITY shall assist the CONTRACTOR, when necessary, in obtaining such permits and licenses. The CITY shall be invoiced at actual cost without markup.

6.7.2 The CONTRACTOR shall also pay all public utility charges. The CONTRACTOR shall be responsible for obtaining dewatering permits as required. CONTRACTOR shall be responsible for complying with the South Florida Water Management District (SFWMD), Florida Department of Environmental Regulations, United States Environmental Protection Agency and any other regulatory agency requirements including financial responsibility (fines, etc).

6.7.3 Laws and Regulations: The CONTRACTOR shall give all notices and comply with all laws, ordinances, rules and regulations applicable to the Work. If the CONTRACTOR observes that the Specifications or Drawings are at variance therewith, they shall give the CONSULTANT prompt written notice thereof, and any necessary changes shall be adjusted by an appropriate modification. If the CONTRACTOR performs any Work knowing it to be contrary to such laws, ordinances, rules and regulations, and without such notice to the CONSULTANT, they shall bear all costs arising therefrom; however, is shall not be their primary responsibility to make certain that the Drawings and Specifications are in accordance with such laws, ordinances, rules and regulations.

6.8 TAXES:

6.8.1 Cost of all sales and other taxes for which the CONTRACTOR is liable under the Contract shall be included in the Contract Price stated by the CONTRACTOR.

6.9 RECORD DOCUMENTS/RIGHT TO AUDIT:

6.9.1 The CONTRACTOR shall keep in a safe place one record copy of all Specifications, Drawings, Addenda, Modifications, and Shop Drawings at the site in good order and annotated to show all changes made during the construction process. Such documents shall be available to the CONSULTANT and shall be delivered to the CONSULTANT for the CITY upon completion of the Project. Such documents

shall be used for this purpose only. Final acceptance of the project shall be withheld by the CITY until approval of all documents specified herein is made by the CITY's Project Manager.

6.9.2 The awarded CONTRACTOR shall maintain during the term of the Contract all books, reports, and records in accordance with generally accepted accounting practices and standards for records directly related to this Contract. The form of all records and reports shall be subject to the approval of the CITY's auditor. The awarded CONTRACTOR agrees to make available to the CITY's auditor, during normal business hours, all books of account, reports, and records relating to this Contract for the duration of the Contract and retain them for a minimum period of three (3) years.

6.9.3 The awarded CONTRACTOR shall be aware that the Palm Beach County, Office of Inspector General investigators shall have the power without limitation to audit, investigate, monitor, inspect and review the operations, activities, performance and procurement process of the CONTRACTOR, its Sub-Contractors and lower tier subcontractors and its officers, agents and employees relating to the Contract.

6.9.4 If the CONTRACTOR submits a claim to the CITY for additional compensation, the CITY shall have the right, as a condition to considering the claim, and as a basis for evaluation of the claim, and until the claim has been settled to audit the CONTRACTOR's books to the extent they are relevant. This right shall include the right to examine books, records, documents, and other evidence and accounting procedures and practices, sufficient to discover and verify all direct and indirect costs of whatever nature claimed to have been incurred or anticipated to be incurred and for which claim has been submitted. The right to audit shall include the right to inspect the CONTRACTOR's plants, or such parts thereof, as may be or have been engaged in the performance of the Work. The CONTRACTOR further agrees that the right to audit encompasses all subcontracts and is binding upon all Sub-Contractors. The rights to examine and inspect herein provided for shall be exercisable through such representatives as the CITY deems desirable during the CONTRACTOR's normal business hours at the office of the CONTRACTOR. Upon request by the CITY, CONTRACTOR shall provide the accounting records and documents, and other financial data and shall submit true copies of requested records to the CITY.

6.10 SAFETY, PROTECTION AND EMERGENCIES:

6.10.1 CONTRACTOR shall be responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the Work. CONTRACTOR shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury or loss to:

6.10.1.1 All employees on the Work and other persons, who may be affected thereby,
6.10.1.2 All the Work and all materials or equipment to be incorporated therein, whether in storage on or off the Site, and
6.10.1.3 Other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures and utilities not designated for removal, relocation or replacement in the course of construction.

6.10.2 CONTRACTOR shall comply with all applicable laws, ordinances, rules and regulations of any public body having jurisdiction for the safety of persons or property or to protect them from damage, injury or loss on or off the Work and shall erect and maintain all necessary safeguards for such safety and protection.

6.10.3 CONTRACTOR shall notify owner of adjacent property and of Underground Facilities and utility owners when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation and replacement of their property.

6.10.4 All damage, injury or loss to any property referred to in paragraph 6.10.1.2 or 6.10.1.3 caused directly or indirectly, in whole or in part, by CONTRACTOR, any Sub-Contractor, Supplier or any other person or organization directly or indirectly employed by any such entity to perform or furnish any of the Work for anyone for whose acts may be liable, shall be remedied by CONTRACTOR. CONTRACTOR shall not be liable for acts or omissions attributable to the CITY or CONSULTANT.

6.10.5 CONTRACTOR's duties and responsibilities for the safety and protection of the Work shall continue until such time as all the Work is completed and CONSULTANT has issued a notice to the CITY and CONTRACTOR in accordance with paragraph 14.6 (Substantial Completion) that the Work is acceptable or until any and all final "punch list" items are completed, whichever is later.

6.10.6 The safety provisions of applicable laws and building and construction codes shall be observed and the CONTRACTOR shall take or cause to be taken such additional safety and health measures as the Local Public Agency involved may determine to be reasonably necessary. Machinery, equipment and all hazards shall be guarded in accordance with the safety provisions of the "Manual of Accident Prevention in Construction" as published by the Associated General Contractors of America, Inc. to the extent that such provisions are not in conflict with applicable laws.

6.10.7 The CONTRACTOR shall maintain an accurate record of all cases of death, occupational disease, or injury requiring medical attention or causing loss of time from Work, arising out of an and in the course of employment on Work under the Contract. The CONTRACTOR shall promptly furnish the reports concerning these matters to the appropriate Local Public Agency within forty-eight (48) hours of the event or as per specific timeframe specified by such Local Public Agency.

6.10.8 SAFETY REPRESENTATIVE: CONTRACTOR shall designate a responsible representative at the Site whose duty shall be prevention of accidents. This person shall be CONTRACTOR's superintendent unless otherwise designated in writing by CONTRACTOR to the CITY.

6.10.9 HAZARD COMMUNICATION PROGRAMS: CONTRACTOR shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available to or exchanged between or among employees at the Site in accordance with Laws and Regulations.

6.10.10 SUPERINTENDENT: The CONTRACTOR shall designate a responsible member of their organization at the Site whose duty shall be prevention of accidents. This person shall be the CONTRACTOR's superintendent unless otherwise designated in writing by the CONTRACTOR to the CITY's Project Manager.

6.10.11 EMERGENCIES: In emergencies affecting the safety of the persons or the Work or property of the Site or adjacent thereto, the CONTRACTOR, without special inspection or authorization from the CONSULTANT or the CITY's Project Manager is obligated to act, at its discretion, to prevent damage, injury or loss.

6.10.12 CONTRACTOR shall give CITY's Project Manager and CONSULTANT prompt written notice if CONTRACTOR believes that any

significant changes in the Work or variations from the Contract Documents have been caused thereby. If CONSULTANT determines that a change in the Contract Documents is required because of the action taken in response to an emergency, a Change Order shall be issued to document the consequences of the changes or variations.

6.10.13 During adverse weather, and against the possibility thereof, the CONTRACTOR shall take all necessary precautions to ensure that the Work shall be done in a good and workmanlike condition and is satisfactory in all respects. When required, protection shall be provided by the use of tarpaulins, wood and other acceptable means. The CONTRACTOR shall be responsible for all changes caused by adverse weather, including unusually high winds and water levels and they shall take such precautions and procure such additional insurance as they deem prudent. The CONSULTANT may suspend construction operations at any time when in their judgment, the conditions are unsuitable or the proper precautions are not being taken, whatever the weather or water level conditions may be, in any season.

6.10.14 If the CONTRACTOR believes that additional work done by them in an emergency which arose from causes beyond their control entitles them to an increase in the Contract Price or an extension of the Contract Time, they may make a claim therefor as provided in Article 11 (Change in Contract Price) and Article 12, (Change in Contract Time).

6.10.15 **NATIONAL EMERGENCY:** In the event the CITY is prevented from proceeding with any or all of the Work as stated in the Contract due to a declaration of war, or national emergency by the United States government, whereas the construction of the type contracted for herein is specifically prohibited by statute or government edict, or due to the stoppage of construction caused by any governmental agency, state, CITY, town, or county regulations, orders, restrictions, or due to circumstances beyond the CITY's control; then the CITY herein reserves the right to either suspend the Work to be done for an indefinite period of time or to cancel this Contract outright by giving notice by registered mail of such intention to the CONTRACTOR herein. In the event of any conditions above mentioned occurring after the Work herein has already commenced, then the CITY shall be liable for only the cancellation or suspension without the addition of prospective profits or other change whatsoever.

6.11 SHOP DRAWINGS AND SAMPLES:

6.11.1 Shop Drawings: After checking and verifying all field measurements, the CONTRACTOR shall submit to the CONSULTANT and the CITY's Project Manager for review in accordance with the accepted schedule of Shop Drawing submissions, (see paragraph 2.9) copies (or at the CONSULTANT's option, one reproducible copy) of all Shop Drawings, which shall have been checked by and stamped with the approval of the CONTRACTOR. The data shown on the Shop Drawings shall be complete with respect to dimensions, design criteria, materials of construction and the like to enable the CONSULTANT to review the information as required.

Shop Drawings shall include but not be limited to the following information:

6.11.1.1 Fabrication and Installation Drawings and details
6.11.1.2 Template placement diagrams
6.11.1.3 Manufacturer's installation instructions
6.11.1.4 Product patterns and colors
6.11.1.5 Coordination Drawings
6.11.1.6 Schedules
6.11.1.7 Product mix formula
6.11.1.8 Product design or engineering calculations
6.11.1.9 Other information as required by project

After review, produce copies and distribute per Submittal Procedures article above and for Record Documents purposes described in Section 6.37 Closeout Submittals. Submit to CONSULTANT for purpose of checking conformance with information given and design concept and on to the CITY's Project Manager.

6.11.2 SAMPLES: The CONTRACTOR shall also submit to the CONSULTANT for review, with such promptness as to cause no delay in Work, all samples required by the Contract Documents. All samples must have been checked by and stamped with the approval of the CONTRACTOR, identified clearly as to material, manufacturer, any pertinent catalogue numbers and the use for which intended.

CONTRACTOR shall submit to CONSULTANT for purpose of checking conformance with information given and design concept expressed in the documents.

After review, CONSULTANT shall submit color board to CITY's Project Manager per Submittal Procedures. Samples shall also conform to the following:

6.11.2.1 Sample finishes and colors shall be from full range or manufacturers' standard and colors, textures, and patterns for CONSULTANT's selection and preparation of color board for CITY's approval.
6.11.2.2 After review and approval by the CITY, provide duplicates and distribute per Submittal Procedures.
6.11.2.3 Submit samples to illustrate functional and aesthetic characteristics of the product, with integral parts and attachment devices. Coordinate sample submittals for interfacing work.
6.11.2.4 Include identification on each sample with full project information.
6.11.2.5 Submit number of samples specified in specifications, one of which CONSULTANT shall retain. Reviewed samples may be used in Work, if indicated.

6.11.3 DEVIATIONS: At the time of each submission, the CONTRACTOR shall, in writing, call the CONSULTANT's attention to any deviations that the Shop Drawings or sample may have from the requirements of the Contract Documents.

6.11.4 CONFORMANCE REVIEW: The CONSULTANT shall review within fifteen (15) days or as extended by CITY; Shop Drawings and samples, but their review shall be only for conformance with the design concept of the Project and for compliance with the information given in the Contract Documents. The review of a separate item as such shall not indicate review of the assembly in which the item functions. The CONTRACTOR shall make any corrections required by the CONSULTANT at the CONTRACTOR's expense and shall return the required number of corrected copies of Shop Drawings and resubmit new samples until the review is satisfactory to the CONSULTANT. The CONTRACTOR shall direct specific attention in writing or on resubmitted Shop Drawings to revisions other than the corrections called for by the CONSULTANT on previous submissions. The CONTRACTOR's stamp of approval on any Shop Drawings or sample shall constitute a representation to the CITY and the CONSULTANT that the CONTRACTOR has either determined and verified all quantities, dimensions, field construction criteria, materials, catalogue numbers and similar data or they assume full responsibility for

doing so, and that they have reviewed or coordinated each Shop Drawing or sample with the requirements of the Work and the Contract Documents. Shop Drawings submitted without the CONTRACTOR's stamp or specific written indication shall be returned without action. Shop Drawings and submittal data shall be reviewed two times, thereafter all further review time shall be charged to the CONTRACTOR.

6.11.5 APPROVAL: No work requiring a Shop Drawing or sample submission shall be commenced until the submission has been reviewed and approved by the CONSULTANT. A copy of each Shop Drawing and each approved sample shall be kept in good order by the CONTRACTOR at the site and shall be available to the CONSULTANT.

6.11.6 SPECIFIC DEVIATIONS: The CONSULTANT's review of Shop Drawings or samples shall not relieve the CONTRACTOR from their responsibility for any deviations from the requirements of the Contract Documents unless the CONTRACTOR has in writing, called the CONSULTANT's attention to such deviation at the time of submission and the CONSULTANT has given written approval to the specific deviation, nor shall any review by the CONSULTANT relieve the CONTRACTOR from responsibility for errors or omission in the Shop Drawings.

6.11.7 Where a Shop Drawing or sample is required by the Specifications, any related Work performed prior to CONSULTANT's review and acceptance of the pertinent submission shall be at the sole expense and responsibility of the CONTRACTOR.

6.12 SITE CLEAN UP:

6.12.1 SITE: The CONTRACTOR shall clean up behind the Work as much as is reasonably possible as the Work progresses. Upon completion of the Work, and before acceptance of and final payment for the Project by the CITY, the CONTRACTOR shall remove all their surplus and discarded, and excavated materials, and rubbish from the roadways, sidewalks, parking areas, lawns and all adjacent property; shall clean all portion of Work involved in any building under this Contract, so that no further cleaning by the CITY is necessary prior to their occupancy; shall restore all property, both public and private, which has been disturbed or damaged during the prosecution of the Work; and shall leave the whole in a neat and presentable condition.

6.12.2 BUILDING CLEAN-UP: Clean-up operations shall consistently be carried on by the CONTRACTOR at all times to keep the premises free from accumulation of waste materials and rubbish. Upon completion of the Work, they shall remove all rubbish, tools, scaffolding, surplus materials, etc., from the building and shall leave their work "broom clean" or the like, unless specified elsewhere in the Contract. The CONTRACTOR shall do the following special cleaning for all trades upon completion of the Work:

6.12.2.1 Remove putty stains and paint from and wash and polish all glass. Do not scratch or otherwise damage glass.
6.12.2.2 Remove all marks, stains, fingerprints and other soil and dirt from painted, stained and decorated work.
6.12.2.3 Remove all temporary protections and clean and polish floors.
6.12.2.4 Clean and polish all hardware for all trades; this shall include removal of all stains, dust, dirt, paint, etc.
6.12.2.5 General: In case of dispute, the CITY may remove the rubbish and charge the cost to the CONTRACTOR.

6.13 PUBLIC CONVENIENCE AND SAFETY:

6.13.1 Convenience: The CONTRACTOR shall, at all times, conduct the Work in such a manner as to insure the least practicable obstruction to public travel. The convenience of the general public and of the residents along and adjacent to the area of the Work shall be provided for in a satisfactory manner, consistent with the operation and local conditions.

6.13.2 Safety: "Street Closed" signs shall be placed immediately adjacent to the Work, in a conspicuous position, at such locations as traffic demands. At any time that streets are required to be closed, CONTRACTOR shall obtain approval to close the street from the appropriate regulatory agencies having jurisdiction. The CONTRACTOR shall notify law enforcement agencies, fire departments, and parties operating emergency vehicles before the street is closed and also as soon as area is opened. Approval from the CITY shall be coordinated through the Department of Public Works/Engineering, including notification of the news media and affected property owners. Access to fire hydrants and other fire extinguishing equipment shall be provided and maintained at all times. Traffic paths shall be maintained for local traffic.

6.14 SANITARY PROVISIONS:

6.14.1 The CONTRACTOR shall furnish necessary toilet conveniences, secluded from public observation, for use of all personnel on the Work, whether or not in their employ. They shall be kept in a clean and sanitary condition and shall comply with the requirements and regulations of the public authorities having jurisdiction. They shall commit no public nuisance. Temporary sanitary facilities shall be removed upon completion of the Work and the premises shall be left clean.

6.15 INDEMNIFICATION:

6.15.1 CONTRACTOR agrees to protect, defend, indemnify, and hold harmless the CITY, its employees, representatives, and elected officials from any and all claims and liabilities including all attorney's fees and court costs, including appeals for which the CITY, its employees, representatives, and elected officials can or may be held liable as a result of injury (including death) to persons or damage to property occurring by reason of any negligence, recklessness, or intentional wrongful misconduct of the CONTRACTOR, its employees, or agents, arising out of or connected with this Agreement. The CONTRACTOR shall not be required to indemnify the CITY or its agents, employees, representatives, or elected officials when an occurrence results solely from the wrongful acts or omissions of the CITY, or its agents, employees or representatives.

6.15.2 The CONTRACTOR, without exemption, shall indemnify and hold harmless, the CITY, its employees, representatives and elected officials from liability of any nature or kind, including cost and expenses for or on account of any copyright, service marked, trademarked patented or unpatented invention, process, or any other intellectual property right or item manufactured by the CONTRACTOR. Further, if such a claim is made, or is pending, the CONTRACTOR may, at its option or expense, procure for the CITY the right to use, replace, or modify the item to render it non-infringing. If none of the alternatives are reasonably available, the CITY agrees to return the article on request to the CONTRACTOR and receive reimbursement from the CONTRACTOR for such. If the CONTRACTOR used any design, device or materials covered by letters, patent or copyright, it is mutually agreed and understood, without exception, that the Bid prices shall include all royalties or cost arising from the use of such design, device or materials in any way involved in the Work. This article shall survive the termination of any contract with the CITY of Boynton Beach.

6.15.3 The parties agree that Twenty-five Dollars ($25.00) of the total compensation paid to the CONTRACTOR for performance of this Agreement shall represent the specific consideration for the CONTRACTOR's indemnification of the CITY.

6.15.4 The CITY reserves the right to select its own legal counsel to conduct any defense in any such proceedings and all costs and fees associated therewith shall be the responsibility of the CONTRACTOR under this indemnification agreement.

6.15.5 It is the specific intent of the parties hereto that the foregoing indemnification complies with F.S. § 725.06 (Chapter 725). It is further the specific intent and agreement of the parties that all of the Contract Documents on this Project are hereby amended to including the foregoing indemnification and the "Specific Consideration" therefor.

6.15.6 Nothing contained herein is intended nor shall be construed to waive the CITY's rights and immunities under the common law or Florida Statutes § 768.28, as amended from time to time.

6.16 CLAIMS:

6.16.1 In any and all claims against the CITY or the CONSULTANT or any of its agents or employees, by any employee of the CONTRACTOR, any Sub-Contractor, anyone directly or indirectly employed for whose acts may be liable; the indemnification obligation under paragraph 6.15 (Indemnification) shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the CONTRACTOR or any Sub-Contractor under workers' compensation acts, disability benefit acts or other employee benefit acts.

6.16.2 Obligation: The obligations of the CONTRACTOR under paragraph 6.13 shall not extend to the liability of the CONSULTANT's negligent acts, errors or omissions or their employees or agents.

6.17 RESPONSIBILITY FOR CONNECTING TO EXISTING WORK:

6.17.1 It shall be the express responsibility of the CONTRACTOR to connect their Work to each part of the existing work or work previously installed as required by the Drawings and Specifications to provide a complete installation.

6.18 WORK IN STREET, HIGHWAY AND OTHER RIGHTS-OF-WAY:

6.18.1 Excavation, grading, fill, storm drainage, paving and other construction or installations in rights-of-way of streets, highways, pubic carrier lines, utility lines (either aerial, surface or subsurface) etc. shall be done in accordance with requirements of these Specifications and authorities having jurisdiction. The CONTRACTOR shall be responsible for obtaining all permits necessary for the Work. Upon completion of the Work, CONTRACTOR shall present to CONSULTANT certificates, in triplicate from the proper authorities stating that the Work has been done in accordance with their requirements.

6.18.2 The CITY shall cooperate with the CONTRACTOR in obtaining action from any utilities or public authorities involved in the above requirements.

6.19 COOPERATION WITH GOVERNMENTAL DEPARTMENTS, PUBLIC UTILITIES, ETC.:

6.19.1 The CONTRACTOR shall be responsible for making all necessary arrangements with governmental departments, public utilities, public carriers, service companies and corporations owning or controlling roadways, railways, water, sewer, gas, electrical, cable television, telephone, and telegraph facilities such as pavements, tracks, piping, wires, cables, conduits, poles, guys, etc. , including incidental structures connected therewith, that are encountered in the Work in order that such items may be properly shored, supported and protected, or the CONTRACTOR may relocate them with utility owner's approval.

6.19.2 NOTICES: The CONTRACTOR shall give all proper notices, shall comply with requirements of such parties in the performance of their Work, shall permit entrance of such parties on the Project in order that they may perform their necessary work, and shall pay all charges and fees made by such parties for this Work.

6.19.3 GOVERNMENT AGENCY CAUSED DELAYS: The CONTRACTOR's attention is called to the fact that there may be delays on the Project due to work to be done by governmental departments, public utilities, and others in repairing or moving poles, conduits, etc. The CONTRACTOR shall cooperate with the above parties in every way possible, so that the construction can be completed in the least possible time.

6.19.4 CODES, LAWS, ORDINANCES AND REGULATIONS: The CONTRACTOR shall have made themselves familiar with all codes, laws, ordinances and regulations which in any manner affect those engaged in the Work, or materials and equipment used in the Work, or in any way affect the conduct of the Work, and no plea of misunderstanding shall be considered on account of their ignorance thereof.

6.20 USE OF PREMISES:

6.20.1 CONTRACTOR shall confine construction equipment, the storage of materials and equipment and the operations of workers to the project site and land and areas identified in, and permitted by the Contract Documents and other land and areas permitted by laws, ordinances, and regulations, rights-of-way, permits, easements, and directions of the CITY's Project Manager or Representative, and shall not reasonably encumber the premises with construction equipment or other materials or equipment.

6.20.2 CONTRACTOR shall assume full responsibility for any damage to any such land or area, or to the CITY or occupant thereof or of any land or areas contiguous thereto, resulting from the performance of the Work. Should any claim be made against the CITY or CONSULTANT by any such owner or occupant because of the performance of the Work, CONTRACTOR shall promptly attempt to settle with such other party by Contract or otherwise resolve the claim. CONTRACTOR shall to the fullest extent permitted by laws and regulations, indemnify and hold the CITY harmless from and against all claims, damages, losses and expenses (including, but not limited to fees of engineers, architects, attorneys and other professionals and court costs) arising directly, indirectly or consequentially out of any action, legal or equitable, brought by any such other party against the CITY or CONSULTANT to the extent based on a claim arising out of CONTRACTOR's performance of the Work.

6.20.3 During the progress of the Work, CONTRACTOR shall keep the premises free from accumulations of waste materials, rubbish and other

debris resulting from the Work. At the completion of the Work, CONTRACTOR shall remove all waste materials, rubbish and debris from and about the premises as well as all tools, appliances, construction equipment and machinery, and surplus materials, and shall leave the Site clean and ready for occupancy by the CITY. CONTRACTOR shall restore to original condition all property not designated for alteration by the Contract Documents.

6.20.4 CONTRACTOR shall not overload or permit any part of any structure to be loaded with such weight as shall endanger its safety, nor shall it subject any part of the Work to stresses or pressures that shall endanger it.

6.20.5 CONTRACTOR shall enforce the CITY's Project Manager's instructions in connection with signs, advertisements, fires and smoking.

6.20.6 CONTRACTOR shall arrange and cooperate with CITY in routing the parking of automobiles of its employees, sub-contractors and other personnel, and in routing material delivery trucks and other vehicles to the Project Site.

6.21 PROTECTION OF EXISTING PROPERTY IMPROVEMENTS:

6.21.1 Any existing surface and subsurface improvements, such as pavements, curbs, sidewalks, pipes or utilities, footings, or structures (including portions thereof), trees and shrubbery, not indicated on the Drawings or noted in the Specifications as being removed or altered shall be protected from damage during construction of the Project. Any such improvements damaged during construction of the Project, whether or not such improvements appear on the Drawings, shall be restored to a condition equal or better, to the original state at the time of award of Contract. Such restoration or repair shall be at the sole expense of the CONTRACTOR, and no claim for an increase in the Contract Price under paragraph 6.21 or under Article 10 shall be allowed.

6.22 TEMPORARY HEAT:

6.22.1 The CONTRACTOR shall provide heat, fuel and services as necessary to protect all work and materials, within all habitable areas of permanent building construction against injury from dampness and cold, until final acceptance of all work and materials for the Project, unless building is fully occupied by the CITY prior to such acceptance. In which case the CITY shall assume all expenses of heating from date of full occupancy. Unless otherwise specifically permitted by Special Conditions, the permanent heating system shall not be used to provide temporary heat. CONTRACTOR's proposed methods of heating shall be submitted for approval.

6.23 SCHEDULE:

6.23.1 CONTRACTOR shall submit to CONSULTANT for review and comment (to the extent indicated in paragraph 2.6 Finalizing Schedule) proposed adjustments in the progress schedule to reflect the impact thereon of new developments; these shall conform generally to the progress schedule then in effect and additionally shall comply with any provisions of the General Requirements applicable thereto. All approved changes shall be memorialized as change orders.

6.24 CONTINUING THE WORK:

6.24.1 CONTRACTOR shall carry on the Work and adhere to the progress schedule during all disputes or disagreements with the CITY. No Work shall be delayed or postponed pending resolution of any disputes or disagreements, except as permitted by Article 15 (Suspension and Termination of Work) or as CONTRACTOR and the CITY may otherwise agree in writing.

6.25 CONTRACTOR'S GENERAL WARRANTY AND GUARANTEE:

6.25.1 CONTRACTOR warrants and guarantees to CITY and CONSULTANT that all work shall be in accordance with the Contract Documents and shall not be *defective*. That CONTRACTOR guarantees to repair, replace or otherwise make good to the satisfaction of the CITY any defect in workmanship or material appearing in the Work; and further guarantees the successful performance of the Work for the service intended.

CONTRACTOR's warranty and guarantee hereunder excludes defects or damage caused by:

6.25.1.1 Abuse, modification, or improper maintenance or operation by persons other than CONTRACTOR, sub-contractors or suppliers; or

6.25.1.2 Normal wear and tear under normal usage

6.25.2 CONTRACTOR's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following shall constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of CONTRACTOR's obligation to perform the Work in accordance with the Contract Documents:

6.25.2.1 Observations by CONSULTANT.

6.25.2.2 Recommendation of any progress or final payment by CONSULTANT.

6.25.2.3 The issuance of a certificate of Substantial Completion or any payment by CITY or CONTRACTOR under the Contract Documents.

6.25.2.4 Use or occupancy of the Work or any part thereof by CITY.

6.25.2.5 Any acceptance by CITY or any failure to do so; and

6.25.2.6 Any review and approval of a Shop Drawing or Sample submittal or the issuance of a notice of acceptability by CONSULTANT pursuant to paragraph 14.10.

6.26 DELETION/OVERSIGHT/MISSTATEMENT:

6.26.1 Any deletion, oversight or misstatement of the Specifications shall not release the Bidder from the responsibility of completing the Project within the agreed upon timeframe.

6.26.2 The cost of incidental work described in these Contract requirements, for which there are no specific Contract items shall be considered as part of the general cost of doing the Work and shall be included in the prices for the various Contract items. No additional payment will be made therefore.

6.27 EXCEPTIONS TO SPECIFICATIONS:

6.27.1 Any exceptions to the Specifications and/or drawings must be brought to the attention of the CITY's Procurement Services Division in writing prior to the expiration of the Bid question period. Failure to list any exceptions with the Procurement Services Division in writing prior to the end of the Bid question period means that the Bidder is complying 100% with the Specifications. All materials may be inspected by the CITY upon delivery for compliance with said Specifications. Deviations from the Specifications shall be cause for the Bid to be rejected as non-responsive unless the deviation was approved prior to the submittal of bids.

6.27.2 Any deletion, oversight or misstatement of these Specifications shall not release the Bidder from full responsibility for unsatisfactory workmanship and/or materials, together with all appurtenances necessary for unrestricted operation, as determined by the CITY in its sole discretion.

6.28 SILENCE OF SPECIFICATIONS:

6.28.1 The apparent silence of any Specification as to any details, or the omission from the Specifications of a detailed description concerning any point shall be regarded as meaning that only the best commercial practices are to prevail and that materials of the first quality and correct type, size and design are to be used. All workmanship is to be of first quality.

6.28.2 Work not specified in the Specifications, but involved in carrying out their intent or in the complete and proper execution of the Work, is required and shall be performed by the CONTRACTOR as though it were specifically delineated or described.

6.29 QUALITY:

6.29.1 Items delivered as a result of award from this Bid shall be free of defects. Any item(s) not meeting this specification shall be replaced by the awarded Bidder/CONTRACTOR at no additional charge to the CITY.

6.30 CONDITIONS OF MATERIALS:

6.30.1 All materials and products supplied by the CONTRACTOR in conjunction with this Bid shall be new, warranted for merchantability, fit for a particular purpose, free from defects and consistent with industry standards. The products shall be delivered to the CITY in excellent condition. In the event that any of the products supplied to the CITY are found to be *defective* or do not conform to the Specifications, the CITY reserves the right to return the product to the Bidder at no cost to the CITY.

6.30.2 The successful CONTRACTOR shall furnish all guarantees and warranties to the CITY's Project Manager or designee prior to final acceptance and payment. The warranty period shall commence upon final acceptance of the product.

6.31 DISPOSAL:

6.31.1 Before the CONTRACTOR disposes of any existing improvements or equipment which is to be removed as a portion of the Work, and for which disposition is not specifically provided for elsewhere in these Specifications, it shall contact the CITY to determine if the removal items are to be salvaged. Items to be salvaged by the CITY shall be neatly stockpiled or stored in a neat and acceptable manner at the construction site easily accessible to the CITY. Equipment and materials that shall not be salvaged by the CITY shall become the property of the CONTRACTOR to be removed from the Site and disposed in an acceptable manner, pursuant to local, state and federal laws and regulations.

6.32 OCCUPATIONAL HEALTH AND SAFETY:

6.32.1 If the CONTRACTOR, delivers any toxic substance items as defined in the Code of Federal Regulations Chapter 29, it shall furnish to the CITY's Procurement Services Division, a Material Safety Data Sheet (MSDS). The Material Safety Data Sheet shall be provided to the CITY with initial shipment and shall be revised on a timely basis as appropriate. The MSDS must include the following information:

6.32.1.1 The chemical name and the common name of the toxic substance.

6.32.1.2 The hazards or other risks in the use of the toxic substance to include:

6.32.1.2.1 The potential for fire, explosion, corrosion and reactivity.

6.32.1.2.2 The known acute and chronic health effects of risks from exposure, including the medical conditions which are generally recognized as being aggravated by exposure to the toxic substance; and

6.32.1.2.3 The primary routes of entry and symptoms of overexposure.

6.32.1.3 The proper precautions, handling practices, necessary personal protective equipment, and other safety precautions in the use of or exposure to the toxic substances including appropriate emergency treatment in case of overexposure.

6.32.1.4 The emergency procedure for spills, fire, disposal and first aid.

6.32.1.5 A description in lay terms of the known specific potential health risks posed by the toxic substance intended to alert any person reading this information.

6.32.1.6 The year and month, if available, that the information was compiled and the name, address and emergency telephone number of the manufacturer responsible for preparing the information. Any questions regarding this requirement should be directed to: Department of Labor and Employment Security, Bureau of Industrial Safety and Health, Toxic Waste Information Center, 2551 Executive Center Circle West, Tallahassee, FL. 32301-5014, Telephone: 1-800-367-4378.

6.33 OCCUPATIONAL, SAFETY AND HEALTH ASSOCIATION (OSHA)

6.33.1 The CONTRACTOR warrants that the product/services supplied to the CITY shall conform in all respects to the standards set forth in the Occupational Safety and Health Act 1970, as amended, and the failure to comply with this condition shall be considered as a breach of Contract.

6.34 CONDITIONS AND PACKAGING:

6.34.1 CONTRACTOR understands and agrees that any item offered or shipped pursuant to this Bid shall be new (current production model at

the time of the Bid). All containers shall be suitable for storage or shipment, and all prices shall include standard commercial packaging.

6.35 UNDERWRITERS' LABORATORIES (UL):

6.35.1 Unless otherwise stipulated in the Bid, all manufactured items and fabricated assemblies shall be UL listed or re-examination tested where such item has been established by UL for the items offered and furnished.

6.36 ASBESTOS:

6.36.1 CONTRACTOR shall not use any asbestos or asbestos-based fiber materials in the Work performed under this Contract.

6.36.2 If the CONTRACTOR during the course of the Work observes the existence of asbestos in any structure, building or facility, the CONTRACTOR shall promptly notify the CITY and the CONSULTANT. The CONTRACTOR shall not perform any Work pertinent to the asbestos material prior to receipt of written notice with special instructions from the CITY through the CONSULTANT.

6.37 CLOSE-OUT SUBMITTALS

6.37.1 SCOPE OF WORK:

6.37.1.1 Close-out procedures
6.37.1.2 Final cleaning
6.37.1.3 Adjusting
6.37.1.4 Project record documents
6.37.1.5 As-built survey
6.37.1.6 Operation and maintenance data
6.37.1.7 Spare parts and maintenance products
6.37.1.8 Warranties and bonds
6.37.1.9 Maintenance service

6.37.2 CLOSE-OUT PROCEDURES

6.37.2.1 The CONTRACTOR shall submit written certification to the CITY and CONSULTANT that the Contract Documents were reviewed, Work inspected and that Work is complete in accordance with Contract Documents and ready for CITY's Project Manager and CONSULTANT's review.

6.37.2.2 The CONTRACTOR shall provide submittals to CONSULTANT and CITY's Project Manager that are required by local, state and federal authorities.

6.37.2.3 The CONTRACTOR shall submit final application for payment to CONSULTANT and CITY's Project Manager identifying total adjusted contract sum, previous payments and sum remaining due.

6.37.2.4 CITY may opt to occupy portions of completed facilities upon Substantial Completion of those portions of Work.

6.37.3 FINAL CLEANING

6.37.3.1 The CONTRACTOR shall execute final cleaning prior to final project assessment.
6.37.3.2 The CONTRACTOR shall clean interior and exterior glass and surfaces exposed to view; remove temporary labels, stains and foreign substances, wax, clean and polish transparent and glossy surfaces, vacuum carpet and soft surfaces.
6.37.3.3 The CONTRACTOR shall clean equipment and fixtures to sanitary condition with cleaning materials per manufacturer's written recommendations.
6.37.3.4 The CONTRACTOR shall replace filters of operating equipment
6.37.3.5 The CONTRACTOR shall clean debris from roofs, gutters, downspouts and drainage systems.
6.37.3.6 Clean Site; The CONTRACTOR shall sweep paved areas, rake clean landscaped surfaces.
6.37.3.7 The CONTRACTOR shall remove waste and surplus materials, rubbish, and construction facilities from Site.
6.37.3.8 The CONTRACTOR shall clean and sanitize water fountains (coolers).
6.37.3.9 The CONTRACTOR shall clean ledges, countertops, and shelves with all-purpose and non-abrasive cleaners leaving no residue.

6.37.4 ADJUSTING

6.37.4.1 The CONTRACTOR shall adjust operating products and equipment to ensure smooth and unhindered operations.

6.37.5 PROJECT RECORD DOCUMENTS

6.37.5.1 CONTRACTOR shall maintain in accordance with the Special Conditions in a safe place at the Site, one (1) record copy of all Drawings, Specifications, Addenda, Change Orders, Field Change Directives and written interpretations and clarifications (issued pursuant to para. 9.4) in good order and annotated to show all changes made during construction. The record documents together will all approved samples and counterpart of all approved Shop Drawings will be available to the CONSULTANT for reference at all times. Upon completion of the Work, these record documents, samples, and Shop Drawings will be delivered to CONSULTANT for the CITY.

6.37.6 OPERATION AND MAINTENANCE DATA:

6.37.6.1 The CONTRACTOR shall submit documentation as noted in individual product specifications and as noted herein.

6.37.7 SPARE PARTS AND MAINTENANCE PRODUCTS:

6.37.7.1 The CONTRACTOR shall provide spare parts; maintenance and extra products in quantities specified in the Specifications to

the CITY and obtain receipt prior to final payment.

6.37.8 WARRANTIES:

6.37.8.1 The CONTRACTOR shall submit documentation as noted in individual product specifications and as noted herein and Provide duplicate notarized copies to the CITY.

6.37.8.2 The CONTRACTOR shall execute and assemble transferrable warranty documents from sub-contractors, suppliers and manufacturers.

6.37.8.3 The CONTRACTOR shall provide such warranty documents with a Table of Contents and assemble in D-size, 3-ring white binders with typed title sheet of contents inside durable plastic front cover.

6.37.8.4 The CONTRACTOR shall submit above-referenced warranties to the CITY prior to Final Application for Payment.

6.37.9 MAINTENANCE SERVICE:

6.37.9.1 The CONTRACTOR shall furnish service and maintenance of components indicated in specification sections for one-year from date of Substantial Completion.

6.37.9.2 The CONTRACTOR shall examine, clean, adjust, and lubricate system components as required for reliable operation.

6.37.9.3 The CONTRACTOR shall include systematic examination, adjustment, and lubrication of components repairing or replacing parts as required with parts produced by the manufacturer of the original component.

6.37.9.4 CITY shall approve in writing transfers or reassignments of maintenance service tasks.

6.37.10 ASBESTOS CERTIFICATION:

6.37.10.1 The CONTRACTOR shall provide a notarized letter to CITY certifying that no asbestos containing building materials were used as a building material in the Project, pursuant to Florida Statutes § 255.40.

6.37.11 PRODUCTS:

6.37.11.1 APPROVED PRODUCTS: The CONTRACTOR shall use only cleaning and maintenance products approved for use pursuant to local, state and federal laws and regulations.

6.38 TEMPORARY BARRIERS AND ENCLOSURES:

6.38.1 SCOPE OF WORK:

6.38.1.1 The CONTRACTOR shall provide temporary barriers and enclosures to provide construction work areas separate from Owner's on-going business operations.

6.38.1.2 The CONTRACTOR shall protect new work, existing facilities and grounds from damage, theft, vandalism, and unauthorized entry.

6.38.1.3 The CONTRACTOR shall provide a chain link fencing surrounding and separating areas under construction, including areas for CONTRACTOR's mobilization and parking separate from existing CITY facilities and on-going business activities.

6.38.1.4 The CONTRACTOR shall provide demising walls and other barriers as required to separate building area under construction that permits safe and unobstructed exiting of partially Owner occupied buildings.

6.38.1.5 The CONTRACTOR shall provide safety of construction workers and CITY staff and visitors located in areas of CITY's facilities not under renovation or construction.

6.38.1.6 The CONTRACTOR shall control dust, erosion and sediment, noise, pollution, rodent and environmental control.

6.38.2 ENTRY CONTROL:

6.38.2.1 The CONTRACOR shall restrict entrance of persons and vehicles onto Project site and existing facilities in accordance with Special Conditions – 01540 and 01541 Security Procedures.

6.38.2.2 Prior to Project commencement, CONTRACTOR's on-site personnel shall meet with CITY's Project Manager to delineate areas for CONTRACTOR's operations to include storage, office trailers, parking, and lay-down areas.

6.38.2.3 Interruption of pre-approved entry controls shall be coordinated with the CITY's Project Manager prior to proposed interruption.

6.38.2.4 The CONTRACTOR shall allow entrance only to the Project site to authorized persons with proper identification.

6.38.2.5 CONTRACTOR/CM shall post "No Trespassing" and "Hard Hat Area" signs along Project perimeter and at construction access points. "No Trespassing" sign shall include statutory language that area is construction site and that trespassing and theft are felonies and violators will be prosecuted. "No Trespassing" sign shall include name of CONTRACTOR/CM. "No Trespassing" signs shall not be larger than 24" (600mm) by 24" (600mm). "Hard Hat Area" sign shall not be larger than 12" (300mm) by 12" (600mm).

6.38.3 DEMISING WALLS:

6.38.3.1 Where the location of construction is contiguous to or within existing CITY premises, the CONTRACTOR shall provide demising walls to physically separate new or renovation work from existing on-going CITY operations.

6.38.3.2 Demising walls shall be contiguous plywood with vapor barrier and wood framing to prevent unauthorized entrance, dust or debris from entering occupied portion of the area.

6.38.3.4 Where construction is overhead, the CONTRACTOR shall provide safe and secure method of access through or adjacent to work with system of scaffolding, plywood or wood planking overhead to prevent falling debris or materials from interrupting safe passage through construction area.

6.38.4 TEMPORARY FENCING:

6.38.4.1 Areas under construction including areas for CONTRACTOR's mobilization and parking shall be separated from CITY facilities to allow for ongoing activities.

6.38.4.2 The CONTRACTOR shall provide chain link fencing along construction zone boundaries.

6.38.4.3 CONTRACTOR shall submit a detailed temporary fencing plan to the CITY and CONSULTANT for review and approval. The plan shall comply with all applicable regulatory code requirements including the latest edition of the Florida Building Code.

6.38.4.4 The CONTRACTOR shall provide access gates required by code for CITY's and CONTRACTOR's access to occupied portion of project site and for construction access.

6.39 ENVIRONMENTAL CONTROLS:

The CONTRACTOR shall:

6.39.1 Protect existing building and adjacent property from dust produced by construction operations. Use encapsulating or wetting devices to control moisture content of traffic and construction areas.

6.39.2 Control surface drainage to prevent off-site discharge or pollutants and prevent erosion and sedimentation.

6.39.3 Provide berms, dikes or drains to divert water flow away from existing structures into storm water retention areas.

6.39.4 Provide methods necessary to prevent mud and debris from entering storm water system.

6.39.5 Provide methods necessary to prevent excessive noise on Site. CONTRACTOR shall comply with OSHA and CITY's noise requirements.

6.39.6 Provide methods necessary to prevent pests and insects from damaging the Work.

6.39.7 Provide methods necessary to prevent contamination of soil, water, and atmosphere from discharge of noxious, toxic substances or pollutants from construction operations.

6.39.8 SUBMITTALS:

6.39.8.1 Comply with Section 2.10 "Submittal Procedures."

6.39.8.2 Submit site plan and floor plans indicating locations and material construction of proposed protective structures.

6.39.9 TEMPORARY FENCING:

6.39.9.1 Provide a six (6) foot high, minimum ten (10) gage minimum or galvanized steel fabric.

6.39.9.2 Fencing shall have six (6) foot high visual fabric cover to block visual access to construction activities.

6.39.9.3 Provide 5/8" C/D plywood sheets, pressure treated or other means of weather protection, with 2 x 4 wood framing at edges and 24" maximum vertical spacing.

6.39.10 TEMPORARY WALLS:

6.39.10.1 Provide demising Wall: 5/8" C/D plywood sheets, 2 x 4 wood framing at 24" maximum spacing, and 10 mil black polyethylene vapor barrier covering with sealed joints.

6.39.10.2 Provide overhead Protection: Metal scaffolding with ¾" B/C plywood or 2" x 12" wood planking.

6.39.11 EXECUTION/INSTALLATION AND REMOVAL:

6.39.11.1 Install temporary fencing prior to start of vertical construction and removed upon completion of work.

6.39.11.2 Install demising walls prior to start of renovations or building additions and removed work.

6.39.11.3 Protect or remove walls during storm events where winds are anticipated over seventy-four (74) miles per hour.

6.40 SECURITY PROCEDURES:

6.40.1 The CONTRACTOR shall protect new work, existing facilities and grounds from damage, theft, vandalism, and unauthorized entry.

6.40.2 The CONTRACTOR shall initiate security program in coordination with Owner's existing security system at time of Project, mobilizing to ensure safety of employees or persons at the unaffected areas.

6.40.3 The CONTRACTOR shall maintain a security program throughout construction period until Owner's Project acceptance.

6.40.4 PERSONNEL IDENTIFICATION:

6.40.4.1 CONTRACTOR/CM on-site staff, sub-contractors and vendors on Site shall wear identification badges at all times.

6.40.4.2 Identification badges shall be current at time of Project and shall be re-verified and re-issued annually if Project extends past original badge expiration date.

6.40.5 SUBMITTALS:

6.40.5.1 The CONTRACTOR shall comply with Section 2.10 "Submittal Procedures".

6.40.5.2 The CONTRACTOR shall provide a list of personnel proposed to be utilized.

6.40.5.3 The CONTRACTOR shall submit a list of personnel proposed to be substituted for persons already identified to be utilized on the Project.

6.40.5.4 The CONTRACTOR shall provide a security plan to CITY indicating how construction site is to be secured to include normal and emergency egress and ingress.

6.41 PRODUCT SUBSTITUTION PROCEDURES

6.41.1 The CONTRACTOR shall follow the administrative and procedural requirements listed below in Section 6.41.2 for consideration of request for substitution during the design and construction phases.

6.41.2 CONTRACTOR'S SUBMITTAL PROCEDURES:

6.41.2.1 Transmit each substitution request on company letterhead.

6.41.2.2 During bidding phase, substitution requests shall be directed to the CITY's Procurement Services Division.

6.41.2.3 During the construction phase, substitution requests shall be directed to the CONSULTANT.

6.41.2.4 Substitution requests shall identify Project, CONTRACTOR/CM and CONSULTANT during the bidding phase plus Sub-Contractor or supplier during construction phase, indicating Specification Section and Paragraph Number of specified material and pertinent drawing and detail numbers, as appropriate. Include complete information as required in the Substitution Form. Incomplete information will result in automatic rejection of the substitution request.

6.41.2.5 Apply CONTRACTOR's stamp; signed or initialed certifying that review, approval, verification of products required, field dimensions, adjacent construction work, and coordination of information are in accordance with the requirements of the Work and Contract Documents.

6.41.2.6 Schedule submittals to expedite the Project, and deliver to CONSULTANT or CONTRACTOR/CM at business address. Coordinate submission of related items.

6.41.2.7 For each submittal for review, allow fifteen (15) working days including delivery time to and from the CONSULTANT or CONTRACTOR/CM.

6.41.2.8 Identify variations from Contract Documents and product or system limitations, which may be detrimental to successful performance of the completed work.

6.41.2.9 Provide space for CONTRACTOR/CM and CONSULTANT review stamps.

6.41.2.10 When revised for resubmission, identify all changes made since previous submission.

6.41.2.11 Distribute copies of review submittals as appropriate. Instruct parties to promptly report any inability to comply with requirements.

6.41.2.12 Submittals not requested will not be recognized or processed.

6.41.3 SUBSTITUTION REQUESTS

Requests for substitutions shall be made no later than ten (10) calendar days prior to Bid date. Requests received afterwards may not be considered.

6.41.4 SCOPE OF WORK:

The CONTRACTOR shall follow the administrative and procedural requirements set forth in Section 6.41.5 to assure quality of construction before and during construction.

Section 6.41.5 states the CONTRACTOR's general requirements for mockups and field samples, constructed, applied or assembled at the Site for review for use as a quality standard.

6.41.5 COORDINATION AND PROJECT CONDITIONS

6.41.5.1 Coordinate scheduling, submittals, and work to ensure efficient and orderly sequence of installation of interdependent construction elements, with provisions for accommodating items installed later.

6.41.5.2 Verify utility requirements and characteristics of operating equipment are compatible with building utilities.

6.41.5.3 Coordinate work of various sections having interdependent responsibilities for installing, connecting to, and placing in service, such equipment.

6.41.5.4 Coordinate space requirements, supports and installation of mechanical and electrical work that is indicated diagrammatically on Drawings.

6.41.5.5 Follow routing shown for pipes, ducts and conduits as closely as practicable; place runs parallel with line of building. Utilize spaces efficiently to maximize accessibility for other installations for maintenance, and for repairs.

6.41.5.6 Within finished areas, except as otherwise indicated; conceal pipes, ducts, and wiring within the construction. Coordinate locations of fixtures and outlets with finish elements.

6.41.5.7 Coordinate completion and clean up work of separate sections in preparation for Substantial Completion and for portions of work designated for CITY's partial occupancy.

6.41.5.8 After CITY occupancy of premises, coordinate access to Site for correction of *defective* work and work not in accordance with the Contract Documents, to minimize disruption of CITY's activities.

6.41.5.9 Change orders for extra work required by CONTRACTOR/CM due to poor coordination with sub trades will not be considered by the CITY.

6.42 FIELD ENGINEERING

CONTRACTOR shall employ Land Surveyor registered in State of Florida approved by CITY.

6.42.1 CONTRACTOR shall locate and protect survey control and reference points.

6.42.2 CONTRACTOR shall control datum for survey established by CITY provided survey.

6.42.3 CONTRACTOR shall verify setbacks and easements; confirm drawing dimensions and elevations.

6.42.4 CONTRACTOR shall provide field engineering services and establish elevations, lines and levels, utilizing recognized engineering survey practices.

6.42.5 CONTRACTOR shall submit copy of site drawing and certificate signed by the Land Surveyor that the elevations and locations of the Work are in conformance with the Contract Documents.

ARTICLE 7 – OTHER WORK

7.1 RELATED WORK AT SITE:

7.1.1 The CITY may perform other work related to the Project at the Site pursuant to other direct contracts therefor which shall contain General Conditions similar to these. If the fact that such other work is to be performed was not noted in the Contract Documents, written notice thereof shall be given to CONTRACTOR prior to starting any such Other Work; and if CONTRACTOR believes that such performance shall involve additional time and the parties are unable to agree as to the extent thereof, CONTRACTOR may make a claim therefore as provided in Article 11 (Change in Contract Price) and Article 12 (Changes in Contract Time). If the performance of additional work by other contractor or the CITY is noted in the Contract Documents, no additional adjustment of time or compensation shall be considered.

7.1.2 CONTRACTOR shall afford the CITY and other contractors who are party to such a direct contract (or the CITY, if the CITY is performing the additional work with the CITY's employees) proper and safe access to the Site and a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such work, and shall properly connect and coordinate the work with the CONTRACTOR's. CONTRACTOR shall do all cutting, fitting and patching of the Work that may be required to make its several parts come together properly and integrate with such other work. CONTRACTOR shall not endanger any work of other contractors by cutting, excavating or otherwise altering other contractor's work and shall only cut or alter other contractor's work with the written consent of the CITY and CONSULTANT and the other contractors whose work shall be affected. The duties and responsibilities of CONTRACTOR under this paragraph are for the benefit of the CITY and other contractors to the extent that there are comparable provisions for the benefit of CONTRACTOR in such direct contracts between the CITY and other contractors.

7.1.3 If any part of CONTRACTOR's work depends for proper execution for results upon the work of any such other contractor, other than CONTRACTOR's own SubContractor, CONTRACTOR shall inspect and promptly report to CONSULTANT in writing, any delays, defects or deficiencies in such other contractor's work that render it unavailable or unsuitable for such proper execution and results of CONTRACTOR's work. CONTRACTOR's failure to report shall constitute an acceptance of the other contractor's work as fit and proper for integration with CONTRACTOR's work except for latent defects and deficiencies in the other contractor's work.

7.2 COORDINATION:

7.2.1 If the CITY contracts with others for the performance of other work on the Project at the Site, the person or organization who shall have authority and responsibility for coordination of the activities among the various prime contractors shall be identified in the Special Conditions and the specific matters to be covered by such authority and responsibility shall be itemized, and the extent of such authority and responsibilities shall be provided in the Special Conditions. Unless otherwise provided in the Special Conditions, neither the CITY nor the CONSULTANT shall have any authority or responsibility in respect of such coordination.

ARTICLE 8 – THE CITY'S RESPONSIBILITIES

8.1 COMMUNICATIONS TO CONTRACTOR:

8.1.1 CITY shall issue all communications to CONTRACTOR, and provide a copy to CONSULTANT.

8.2 FURNISH DATA:

8.2.1 CITY shall promptly furnish the data required of the CITY under the Contract Documents.

8.3 PAYMENTS:

8.3.1 CITY shall make payments to CONTRACTOR promptly when they are due as provided in Section 14.5 (Review of Application for Progress Payment) and Section 14.10 (Final Payment and Acceptance) of the General Conditions.

8.4 LANDS, EASEMENTS: REPORTS AND TESTS:

8.4.1 The CITY's duties in respect to providing lands and easements and providing engineering surveys, if available and to establish reference points are set forth in paragraphs 4.11 (Availability of Land) and 4.5.1 (Reference Points) of the General Conditions.

8.4.2 The CITY shall identify and make available to CONTRACTOR copies of reports of physical conditions at the Site and Drawings of existing structures that have been utilized in preparing the Contract Documents as set forth in Paragraph 4.2 (Report of Physical Conditions).

8.5 CHANGE ORDERS:

8.5.1 The CITY shall execute Change Orders as provided in Article 10 (Changes in the Work) of the General Conditions.

8.6 SUSPENSION OF WORK:

8.6.1 The CITY's may stop Work, suspend Work or terminate the services of CONTRACTOR pursuant to Paragraph 13.5 (CITY May Stop Work), Paragraph 15.1 (CITY May Suspend Work). Paragraph 15.2 (CITY May Terminate for Cause) and Paragraph 15.3 (CITY May Terminate Without Cause).

8.7 ESTIMATED DOLLAR VALUE:

8.7.1 No guarantee of the dollar amount of this Bid is implied or given. Final amount will be based on actual usage/quantities.

8.8 QUANTITIES:

8.8.1 Quantities shown are estimates only. No guarantee or warranty is given or implied by the CITY as to the total amount that may or may not be purchased from any resulting contract. The CITY reserves the right to decrease or increase quantities or add or delete any item from the contract if it is determined that it best serves the interests of the CITY. Orders shall be placed as needed by individual locations during the contract period. The CONTRACTOR agrees that the price(s) offered shall be maintained irrespective of the quantity actually purchased.

8.9 ADDITIONAL TERMS AND CONDITIONS:

8.9.1 No additional terms and conditions included with the Bid response shall be evaluated or considered, have any force or effect, and are inapplicable to this Bid. It is understood and agreed that the conditions in these Bid Documents are the only conditions applicable to this Bid and the CONTRACTOR's authorized signature on the Bid Form attests to this.

ARTICLE 9 – CONSULTANT'S STATUS DURING CONSTRUCTION:

9.1 CITY'S REPRESENTATIVE:

9.1.1 The CONSULTANT (if specifically designated), or a specifically designated employee of the CITY, shall act as the CITY's Representative during the construction period. .

9.1.2 The CONSULTANT's or CITY's Representative's decision with the consent of the CITY's Project Manager in matters relating to aesthetics shall be final, if pursuant to the terms of the Contract Documents.

9.1.3 CONSULTANT or CITY's Representative shall work with the CITY to:
- 9.1.3.1 Establish on-site lines of authority and communications; and
- 9.1.3.2 Schedule and conduct pre-construction meeting and progress meetings.

9.1.4 CONSULTANT or CITY's Representative shall also work with the CITY to establish procedures for:
- 9.1.4.1 Submittals
- 9.1.4.2 Reports and Records
- 9.1.4.3 Recommendations
- 9.1.4.4 Coordination of drawings
- 9.1.4.5 Schedules
- 9.1.4.6 Resolution of conflicts

9.1.5 CONSULTANT shall also:
- 9.1.5.1 Interpret Contract specifications and Drawings
- 9.1.5.2 Transmit written interpretations to CONTRACTOR, and to other concerned parties;
- 9.1.5.3 Assist in obtaining permits and approvals
- 9.1.5.4 Verify that CONTRACTOR and SubContractors have obtained inspections for Work and for temporary facilities; and
- 9.1.5.5 Assist CITY to control the use of Site.

9.2 VISITS TO SITE:

9.2.1 After written Notice to Proceed with the Work, the CONSULTANT shall make visits to the Site at intervals appropriate to the various stages of construction or as per CONSULTANT's contract with CITY to observe the progress and quality of the executed Work and to determine in general, if the Work is proceeding in accordance with the Contract Documents. On the basis of its on-site observations, as an experienced and qualified design professional, CONSULTANT shall keep the CITY informed of the progress of the Work and endeavor to guard the CITY against defects and deficiencies in the Work of the CONTRACTOR.

9.3 PROJECT REPRESENTATION:

9.3.1 The CITY of Boynton Beach or its authorized agents, inspectors or representatives shall act within the scope of duties entrusted to them by the CITY.

9.4 CLARIFICATIONS AND INTERPRETATIONS:

9.4.1 The CONSULTANT or CITY's Representative shall issue with reasonable promptness such written clarifications or interpretations of the requirements of the Contract Documents (in the form of Drawings or otherwise) as the CITY may determine necessary, which shall be consistent with the Contract Documents. If CONTRACTOR believes that a written clarification of interpretation justifies an increase in the Contract Price or an extension of the Contract Time and the parties are unable to agree to the amount or extent thereof, CONTRACTOR may make a claim therefore as provided in Article 11 (Change in Contract Price) and Article 12 (Change in Contract Time) of the General Conditions.

9.5 MEASUREMENTS:

9.5.1 MEASUREMENTS: All Work completed under the Contract shall be measured by the CONSULTANT's or CITY's Representative or Project Representative according to the United States Standard Measures. All linear surface measurements shall be made horizontally or vertically as required by the item measured.

9.6 REJECTING DEFECTIVE WORK:

9.6.1 The CONSULTANT, CITY's Representative or Project Representative shall have authority to disapprove or reject Work which is "defective" (which term is hereinafter used to describe Work that is unsatisfactory, faulty or defective, or does not conform to the requirements of the Contract Documents or does not meet the requirements of any inspection, test or approval referred to in the Contract Documents, or has been damaged prior to final inspection). The CONSULTANT, CITY's Representative or Project Representative shall also have authority to require special inspection or testing of the Work as may be individually or severally deemed necessary, whether or not the Work is fabricated, installed or completed.

9.7 SHOP DRAWINGS, CHANGE ORDERS AND PAYMENTS:

9.7.1 The CONSULTANT's responsibility for Shop Drawings and samples shall be pursuant to Sections 6.11 (Shop Drawings and Samples) of the General Conditions.

9.7.2 The CONSULTANT's responsibilities as to Change Orders shall be pursuant to Article 10, (Changes in Work), Article 11 (Change in Contract Price) and Article 12 (Change in Contract Time) of the General Conditions.

9.7.3 The CONSULTANT's responsibilities in respect to Applications for Payment, etc. shall be pursuant to Article 14 (Payment to Contractor and Completion) of the General Conditions.

9.8 DETERMINATIONS FOR UNIT PRICES:

9.8.1 The CITY's Project Manager and CONSULTANT shall determine the actual quantities and classifications of Unit Price Work performed by CONTRACTOR. The CITY's Project Manager and CONSULTANT shall review with CONTRACTOR, CONSULTANT's preliminary determinations on such matters before rendering a written decision by recommendation of an Application for Payment or otherwise. The CITY's Project Manager's written decisions shall be final and binding upon the CITY and CONTRACTOR unless, within ten (10) days after the date of any such decision, the CONTRACTOR delivers to the CITY and to CONSULTANT written notice of intention to appeal from such a decision.

9.9 DECISIONS ON DISPUTES:

9.9.1 The CITY's Project Manager with the input of the CONSULTANT shall be the initial interpreter of the requirements of the Contract Documents and evaluator of the acceptability of the Work under the Contract. Claims, disputes and other matters relating to the acceptability of the Work or the interpretation of the requirements of the Contract Documents pertaining to the performance and furnishing of the Work and claims under Articles 11 (Change in Contract Price) and Article 12 (Change in Contract Time) in respect to changes in the Contract Price or Contract Time shall be referred initially to CONSULTANT with the consent of the CITY's Project Manager, the CONSULTANT shall render a decision on the claim or disputed matter in writing within a reasonable time. Written notice of each such claim, dispute and other matter shall be delivered by the claimant to the CITY's Project Manager and CONSULTANT and the other party(ies) to the Contract promptly (but in no event later than ten (10) days) after the start of the occurrence or event giving rise thereto, and written supporting data shall be submitted to the CITY's Project Manager and CONSULTANT within ten (10) days after such occurrence, unless CONSULTANT with the consent of the CITY's Project Manager allows an additional period of time to ascertain more accurate data in support of such claim, dispute or other matter.

9.9.2 The CITY's Project Manager and CONSULTANT shall submit any response to the claimant within ten (10) days after receipt of the claimant's last submittal (unless the CITY's Project Manager and CONSULTANT allow additional time). CONSULTANT with the consent of the CITY's Project Manager shall render a formal decision in writing by thirty (30) days after receipt of the opposing party's submittal, if any, in accordance with this paragraph. The CITY's Project Manager's written decision, on such claim, dispute, or other matter shall be final and binding upon CONTRACTOR unless:

i) an appeal from CITY/CONSULTANT's decision is taken within the time limits and in accordance with the procedures set forth pursuant to Article 16 (Dispute Resolution); or

ii) a written notice of intention to appeal from the CITY's Project Manager and CONSULTANT's written decision is delivered by CONTRACTOR to the CITY's Project Manager and CONSULTANT within ten (10) days after the date of such decision and a formal proceeding is instituted by the appealing party in forum of competent jurisdiction to exercise such rights or remedies as the appealing party may have with respect to such claim, dispute or other matter in accordance with applicable laws and regulations within thirty (30) days of the date of such decision, unless otherwise agreed in writing by CITY and CONTRACTOR.

9.9.3 The rendering of a decision by the CITY's Project Manager pursuant to Paragraphs 9.8.1, (Determinations of Unit Prices), 9.9.1 and 9.9.2 (Dispute Resolution) with respect to any such claim, dispute or other matter (except any which have been waived by the making or acceptance of final payment as provided in Paragraph 14.11 (Waiver of Claims) shall be a condition precedent to any exercise by CONTRACTOR of such rights or remedies as either may otherwise have under the Contract Documents or by laws or regulations in respect of any such claim, dispute or other matter pursuant to Article 16.

9.10 INSPECTION AND TESTING:

9.10.1 CONSULTANT shall inspect Work to assure performance pursuant to the requirements of Contract Documents as follows:
9.10.1.1 Administer special testing and inspections of suspect Work.
9.10.1.2 Reject Work which does not comply with requirements of Contract Documents.

9.10.2 Coordinate Testing Laboratory Services:
9.10.2.1 Verify that required laboratory personnel and present.
9.10.2.2 Verify that tests are made in accordance with specified standards.
9.10.2.3 Review test reports for compliance with specified criteria.
9.10.2.4 Recommend and administer any required re-testing.

9.11 LIMITATIONS ON CONSULTANT:

9.11.1 Neither CONSULTANT's authority to act under this Article 9 or elsewhere in the Contract Documents nor any decision made by CONSULTANT either to exercise or not exercise such authority shall give rise to any duty or responsibility of CONSULTANT to CONTRACTOR, any SubContractor, any Supplier or any other person or organization performing any of the Work, or to any surety.

9.11.2 Whenever in the Contract Documents the term "as ordered", "as directed", "as required", "as allowed", "as approved", or terms of like effect or import are used, or the adjectives "reasonable", "suitable", "acceptable", "proper", or "satisfactory", or adjectives of the like effect or import are used to describe a requirement, direction, review or judgment of the CONSULTANT as to the Work, it is intended that such requirement, direction, review or judgment shall be solely to evaluate the Work for compliance with the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective shall not be effective to assign to CONSULTANT any duty or authority to supervise or direct the furnishing or performance of the Work or any duty or authority to undertake responsibility contrary to the provisions of Paragraphs 9.11.3 or 9.11.4 of the General Conditions.

9.11.3 CONSULTANT shall not be responsible for CONTRACTOR's means, methods, techniques, sequences or procedures of construction, or the safety precautions and programs incident thereto, and CONSULTANT shall not be responsible to CONTRACTOR or CONTRACTOR's failure to perform or furnish the Work pursuant to the Contract Documents.

9.11.4 CONSULTANT shall not be responsible for the acts or omissions of CONTRACTOR or of any SubContractor, any Supplier, or of any other person or organization performing or furnishing any of the Work.

ARTICLE 10 – CHANGES IN THE WORK

10.1 AUTHORIZED CHANGES IN THE WORK

10.1.1 Without invalidating the Contract and without notice to any surety, the CITY may at any time order additions, deletions or revisions in the Work; these changes shall be authorized by a Field Order or Change Order. Upon receipt of any such order or document, CONTRACTOR shall promptly proceed with the Work involved that shall be performed under the applicable conditions of the Contract Documents, except as otherwise specifically provided.

10.1.2 If the CITY and CONTRACTOR are unable to agree as to the extent, if any, of an increase or decrease in the Contract Price or an extension or shortening of the Contract Time that should be allowed as a result of a Change Order, a claim may be made therefor as provided in Article 11 (Change in Contract Price) and Article 12 (Change in Contract Time) of the General Conditions.

10.2 UNAUTHORIZED CHANGES IN THE WORK

10.2.1 CONTRACTOR shall not be entitled to an increase in the Contract Price or an extension of the Contract Time with respect to any Work performed that is not required by the Contract Documents as amended, modified and supplemented as provided in Section 3.2 (References to Standards) except in the case of an emergency as provided in Paragraph 6.10.11 (Emergencies) or except in the case of uncovering Work as provided in Paragraph 13.4.2 (Uncovering Work).

10.3 EXECUTION OF CHANGE ORDERS:

10.3.1 The CITY and CONTRACTOR shall execute appropriate Change Orders (or Written Amendments) covering:
10.3.1.1 Changes in Work, which are ordered by the CITY, pursuant to Paragraph 10.1.1 (Changes in the Work) or are required because of acceptance of *defective* Work under Paragraph 13.9, or are agreed by the parties.
10.3.1.2 Changes in the Contract Price or Contract Time which the parties agree to.
10.3.1.3 Changes in Contract Price or Contract Time which embody the substance of any written decision rendered by CONSULTANT pursuant to Paragraph 9.9.1 (Decisions on Disputes), provided that, in lieu of executing any such Change Order, an appeal may be taken from any such decision in accordance with the provisions of the Contract Documents and applicable laws and regulations, but during any such appeal, CONTRACTOR shall carry on the Work and adhere to the progress schedule as provided in Paragraph 6.24.1.

10.3.2 Surety: It is distinctly agreed and understood that any changes made in the Contract Documents for this Work (whether such changes increase or decrease the amount thereof) or any change in the manner or time of payments or time of performance made by the CITY to the CONTRACTOR shall in no way annul, release or affect the liability and surety on the Bonds given by the CONTRACTOR. If notice of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to Contract Price or Contract Time) is required by the provisions of any Bond to be given to a Surety, the giving of any such notice shall be the CONTRACTOR's responsibility, and the amount of each applicable Bond shall be adjusted accordingly.

10.3.3 Notwithstanding, anything to the contrary contained within the Contract Documents, all change orders involving additional cost or extensions of time, shall be governed pursuant to the ordinances of the CITY.

ARTICLE 11 – CHANGE OF CONTRACT PRICE

11.1 GENERAL

11.1.1 The Contract Price constitutes the total compensation (subject to authorized adjustments) payable to CONTRACTOR for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by CONTRACTOR shall be at its expense without change in the Contract Price.

11.1.2 The Contract Price may only be changed by a Change Order. Any claim for an increase or decrease in the Contract Price shall be based on written notice delivered by the party making the claim to the other party and to CONSULTANT promptly (not later than ten (10) days) after the occurrence of the event giving rise to the claim and stating the general nature of the claim. Notice of the amount of the claim with supporting data shall be delivered within thirty (30) days after such occurrence and shall be accompanied by claimant's written statement that the amount claimed covers all known amounts (direct, indirect and consequential) to which the claimant is entitled as a result of the occurrence of such event. All claims for adjustment in the Contract Price shall be determined by CITY and CONSULTANT in accordance with Paragraph 9.8.1, if the CITY and CONTRACTOR cannot otherwise agree on the amount involved. Any claim for an adjustment in the Contract Price shall not be waived if not submitted in accordance with this Paragraph 11.1.2.

11.1.3 The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Price shall be determined in one of the following ways:

11.1.3.1 Where the Work involved is covered by unit prices contained in the Contract Documents by application of unit prices to the quantities of the items involved (subject to provisions of Section 11.5. (Unit Price Work) inclusive).

11.1.3.2 By mutual acceptance of a lump sum (which shall include an allowance for overhead and profit in accordance with Paragraph 11.3.1.2a (Contractor's Fee).

11.1.3.3 On the basis of the Cost of the Work (determined as provided in Section 11.2, inclusive) plus a CONTRACTOR's fee for overhead and profit) determined as provided in Section 11.3, Contractor's Fee, inclusive.

11.2 COST OF THE WORK:

11.2.1 **General**: The term Cost of the Work means the sum of all costs necessary incurred and paid by CONTRACTOR in the proper performance of the Work. Except as otherwise may be agreed to in writing by the CITY, such costs shall be in amounts no higher than those prevailing in the locality of the Project and must be approved by the CITY and CONSULTANT before any payment. Such costs shall include only the following items listed below in Paragraphs 11.2.2 thru 11.2.6 and shall not include any of the costs itemized in Paragraph 11.2.7 (Exclusions to Cost of the Work).

11.2.2 **Labor**: The term Cost of the Work includes payroll costs for employees in the direct employ of CONTRACTOR in the performance of the Work under schedules of job classifications including the expenses of performing work after regular hours on Saturday, Sunday and legal holidays, agreed upon by the CITY and CONTRACTOR. Payroll costs for employees not employed full time on the Work shall be apportioned on the basis of their time spent on the Work. Payroll costs shall include, but not limited to, salaries and wages plus the cost of fringe benefits which shall include social security contributions, unemployment, excise and payroll taxes, workers' or workmen's compensation, health and retirement benefits, sick leave, vacation and holiday pay applicable thereto. Employees under this paragraph shall include superintendents and foremen on site.

11.2.3 **Materials and Equipment:** The term Cost of Work includes cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and Supplier's field services required in connection therewith. All cash discounts shall accrue to CONTRACTOR unless the CITY deposits funds with CONTRACTOR with which to make payments, in which case, the cash discounts shall accrue to the CITY. All trade discounts, rebates and refunds, and all returns from sale of surplus materials and equipment shall accrue to the CITY, and CONTRACTOR shall make provisions so that they may be obtained.

11.2.4 **Subcontractor:** The term Cost of the Work includes payments made by CONTRACTOR to the SubContractors for Work performed by SubContractors, The CONTRACTOR shall obtain competitive bids from subcontractors acceptable to CONTRACTOR and shall deliver such bids to the CITY who shall then determine with the advice of the CONSULTANT, which bids shall be accepted. If a subcontract provides that the subcontractor is to be paid on the basis of Cost of Work plus a fee, the subcontractor's Cost of the Work shall be determined in the same manner as CONTRACTOR's Cost of Work. All subcontracts shall be subject to all provisions of the Contract Documents.

11.2.5 **Costs of Special Consultants:** The term Cost of the Work includes special consultants employed for services specifically related to the Work including but not limited to engineers, architects, testing laboratories, surveyors, attorneys and accountants.

11.2.6 **Supplemental Costs:** The term Cost of the Work includes the following:

a. Costs, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office and temporary facilities at the site and tools not owned by the workers that are consumed in the performance of Work, and costs less than market value of such items used but not consumed which remain the property of the CONTRACTOR.

b. Rentals of all construction equipment and machinery and the parts thereof, whether rented from CONTRACTOR or others in accordance with rental agreements approved by the CITY with the advice of CONSULTANT, and the costs of transportation, loading, unloading, installation, dismantling and removal thereof – in accordance with terms of such rental agreements. The rental of any such equipment, machinery or parts shall cease when the use thereof is no longer necessary for the Work.

c. Cost of premiums for additional bonds and insurance required because of changes in the WORK.

11.2.7 **Exclusions to Cost of the Work:** The term Cost of the Work shall not include any of the following:

11.2.7.1 **Payroll costs** and other compensation of CONTRACTOR's officers, executives, principals (of partnership and sole proprietorships) general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expeditors, timekeepers, clerks and other personnel employed by CONTRACTOR whether at the site in CONTRACTOR''s principal or branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications referred to in Paragraph 11.2.2 (Labor) or specifically covered by Paragraph 11.2.5 (Costs of Special Consultants) – all of which are to be considered administrative costs covered by the CONTRACTOR's fee pursuant to Paragraph 11.3 of the General Conditions.

11.2.7.2 **Expenses** of any of CONTRACTOR's offices, including principal and branch offices, other than CONTRACTOR's office at the Site.

11.2.7.3 **Any part** of CONTRACTOR's capital expenses including interest on CONTRACTOR's capital employed for the Work and charges against CONTRACTOR for delinquent payments.

11.2.7.4 **Cost of premiums** for all Bonds and for all insurance whether or not CONTRACTOR is required by the Contract Documents to purchase and maintain the same (except for the cost of premiums covered by subparagraph 11.2.6 (c) above.

11.2.7.5 **Costs due** to the negligence or intentional acts of the CONTRACTOR, any subcontractor, supplier or anyone whose acts CONTRACTOR or subcontractor may be liable, including but not limited to, the correction of *defective* Work, disposal of materials or equipment wrongly supplied and making good any damage to property.

11.2.7.6 **Costs associated** with fringe benefits that are greater than actual costs; i.e. where worker hours exceed a typical 8-hour day and 40-hour workweek.

11.2.7.7 **Other overhead** or general expense costs of any kind and the costs of any item not specifically and expressly included in Section 11.2 (Cost of the Work).

11.3 CONTRACTOR'S FEE:

11.3.1 The CONTRACTOR's fee for overhead and profits shall be determined as follows:

11.3.1.1 A mutually acceptable fixed fee; or if none can be agreed upon;

11.3.1.2 A fee based on the following percentages of the various portions of the Cost of the Work:

a. For costs incurred under Paragraphs 11.2.2 (Labor) and 11.2.3 (Materials and Equipment) the CONTRACTOR's fee shall be five (5%) percent.

b. For costs incurred under Paragraph 11.2.4 (Subcontractors), the CONTRACTOR's fee shall be five (5%) percent; and if a subcontract is on the basis of Cost of the Work plus a fee, the maximum allowable to CONTRACTOR on account of overhead and profit of all subcontractors shall be five (5%) percent.

c. No fee shall be payable on the basis of costs itemized under Paragraphs 11.2.5 (Cost of Consultants), 11.2.6 (Supplemental Costs) and 11.2.7 (Exclusions).

d. The amount of credit to be allowed by CONTRACTOR to the CITY for any such change which results in a net decrease in cost shall be the amount of the actual net decrease plus a deduction in CONTRACTOR's fee by an account equal to ten (10%) percent of the net decrease; and

e. When both additions and credits are involved in any one change, the adjustment in CONTRACTOR's fee shall be computed on the basis of net change in accordance with Paragraphs 11.3.1.2(a) through 11.3.1.2(d) inclusive.

11.3.2 Whenever the cost of any work is to be determined pursuant to Paragraph 11.2.1 (General) or Paragraph 11.2.7 (Exclusions), CONTRACTOR shall submit in writing to the CITY and CONSULTANT and in form acceptable to CONSULTANT, an itemized breakdown together with supporting data.

11.4 ALLOWANCES:

11.4.1 It is understood that CONTRACTOR has included in the Contract Price all allowances named in the Contract Documents and shall cause the Work so covered in the Contract documents to be done by such subcontractors or suppliers and for such sums within the limit of the allowances as acceptable to the CITY, CONTRACTOR agrees that:

11.4.1.1 The allowances include the cost to CONTRACTOR (less any applicable trade discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes and

11.4.1.2 CONTRACTOR's costs for unloading and handling on the Site, including labor, installation costs, overhead, profit and other expenses contemplated for the allowances have been included in the Contract Price and not in the allowances. No demand for additional payment on account of any thereof shall be valid.

11.4.1.3 Prior to final payment, an appropriate Change Order shall be issued as recommended by CONSULTANT to reflect actual amounts due CONTRACTOR on account of Work covered by allowances and the Contract Price shall be correspondingly adjusted.

11.5 UNIT PRICE WORK:

11.5.1 Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price shall be deemed to include for all Unit Price Work, an amount equal to the sum of the established unit prices for each separately identified item of Unit Price Work, times the estimated quantity of each item as indicated in the Contract. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Determinations of the actual quantities and classifications of Unit Price Work performed by CONTRACTOR shall be made by CONSULTANT and CITY in accordance with Paragraph 9.8 - Determination of Unit Prices.

11.5.2 Each unit price shall be deemed to include an amount considered by CONTRACTOR to be adequate to cover CONTRACTOR's overhead and profit for each separately identified item.

11.5.3 Where the quantity of any item of Unit Price Work performed by CONTRACTOR differs materially and significantly from the estimated quantity of such item indicated in the Contract and there is no corresponding adjustment with respect to any other item of work, and if CONTRACTOR believes that CONTRACTOR has incurred additional expense as a result thereof, CONTRACTOR may make a claim pursuant to applicable provisions of these General Conditions for an increase in the Contract Price, if the parties are unable to agree as to the amount of any such increase.

11.5.4 Where the quantity of any item of Unit Price Work performed by CONTRACTOR differs materially and significantly from the estimated quantity of such item indicated in the Contract and there is no corresponding adjustment with respect to any other item of work and if the CITY believes that CONTRACTOR has incurred reduced expense as a result thereof, CITY may make a claim for a decrease in the Contract Price in accordance with Article 11 – Change in Contract Price if the parties are unable to agree as to the amount of any decrease.

11.6 OMITTED WORK:

11.6.1 The CITY may at any time, by written order, without Notice to the Sureties, require omission of such contract Work as it may find necessary or desirable. An order for omission of Work shall be valid only by an executable Change Order. All Work so ordered must be omitted by the CONTRACTOR. The amount by which the Contract Price shall be reduced shall be determined as follows:

11.6.1.1 By such applicable unit prices, or rates for work of a similar nature or character as set forth in the Contract, or

11.6.1.2 By the appropriate lump sum price set forth in the Contract, or

11.6.1.3 By the reasonable and fair estimated cost of such omitted Work and profit percentage as determined by the CONTRACTOR and the CONSULTANT, and approved by the CITY.

ARTICLE 12 – CHANGE OF CONTRACT TIME

12.1 GENERAL

12.1.1 The Contract Time may only be changed by a Change Order. Any claim for an extension or shortening of Contract Time shall be based on written notice delivered by the party making the claim to the other party and to CONSULTANT promptly (but in no event later than seven (7) days) after the occurrence of the event giving rise to the claim and stating the general nature of the claim. Notice to the extent of the claim with supporting data shall be delivered within seven (7) days after such occurrence and shall be accompanied by the claimant's written statement that the adjustment claimed is the entire adjustment to which the claimant has reason to believe it is entitled as a result of the occurrence of such event. Claims made beyond these time limits shall be null and void. Reporting of the general nature of the claim shall include at a minimum:

12.1.1.1 Nature of the delay or change in the Work.

12.1.1.2 Dates of commencement/cessation of the delay or change in the Work.

12.1.1.3 Activities on the progress schedule current as of the time of delay or change in the Work affected by the delay or change in the Work.

12.1.1.4 Identification and demonstration that the delay or change in the Work impacts the construction schedule.

12.1.1.5 Identification of the source of delay or change in the Work.

12.1.1.6 Anticipation on impact extent of the delay or change in the Work.

12.1.1.7 Recommended action to minimize delay.

12.1.2 Requests for extension of time shall be fully documented and shall include copies of daily logs, letters, shipping orders, delivery tickets, and other supporting information. In case of continuing cause of delay, only one (1) claim is necessary. Normal working weeks are based on a five (5) day week. All claims for adjustment of the Contract Time shall be determined by the CITY with input from the CONSULTANT. No claim for an adjustment in the Contract Time shall be valid if not submitted in accordance with the requirements of this Article 12 the General Conditions.

12.1.3 If CONTRACTOR is prevented from completing any part of the Work within the Contract Times (or Milestones) that, in the sole judgment of the CITY whose decision shall be binding upon CONTRACTOR is due to delay beyond the control of the CONTRACTOR, the Contract Times (or Milestones) shall be extended in an amount equal to the time lost due to such delay if a claim is made therefore as provided in Article 12 of the General Conditions.

12.1.4 Delays beyond the control of CONTRACTOR shall include acts or neglect by the CITY, acts or neglect by utility owners or other contractors performing other work as contemplated by Article 7 – Related Work at Site, fires, floods, epidemics, or acts of God.

12.1.5 The CONTRACTOR must mitigate any loss of time to include but not be limited to performing ancillary Work as is applicable to the Project.

12.1.6 Claims for delay due to inclement weather (i.e. beyond the 10-year mean average) shall be the made within ten (10) days of the inclement weather occurrence.

12.1.7 Delays attributable to and within the control of a SubContractor or supplier shall be deemed to be delays within the control of the CONTRACTOR.

12.1.8 If the CONTRACTOR is prevented from completing any part of the Work within the Contract Time (or Milestones) due to delay beyond the control of both CITY and CONTRACTOR, an extension of the Contract Times (or Milestones) in an amount equal to the time lost due to such delay shall be CONTRACTOR's sole and exclusive remedy for such delay. In no event shall CITY be liable to CONTRACTOR, and SubContractor, any supplier, any other person or organization, or to any surety or employee or agent of any of them, for damages arising out of or resulting from (i) delays caused by or within the control of the CONTRACTOR, or (ii) delays beyond the control of both parties including but not limited to fires, floods, epidemics, abnormal weather conditions, acts of God or acts of neglect by utility owners or other contractors performing work as contemplated by Article 7 – Related Work at Site.

12.2 LIQUIDATED DAMAGES

12.2.1 The CITY and CONTRACTOR recognize and acknowledge that time is of the essence of this Contract and that the CITY shall suffer financial loss if the Work is not completed within the times specified in Paragraph 2.3 – Notice to Proceed plus any extensions thereof allowed in accordance with Article 12 – Change of Contract Time. Each of the parties acknowledge that it has attempted to quantify the damages which would be suffered by CITY in the event of the failure of CONTRACTOR to perform in a timely manner, but neither one has been capable of ascertaining such damages with any certainty. CITY and CONTRACTOR also recognize and acknowledge the delays, expenses and difficulties involved in providing proof of such damages in a legal proceeding, the actual loss suffered by the CITY if the Work is not completed on time. Accordingly, instead of requiring any such proof, the CITY and CONTRACTOR agree that as liquidated damages for delay (but not as a penalty) CONTRACTOR shall pay the CITY:

BASE BID	LIQUIDATED DAMAGES PER DAY

$1,000 to $20,000	$100
$20,001 to $75,000	$200
$75,001 to $150,000	$500
$150,001 to $350,000	$750
$350,001 to $750,000	$800
$750,001 to $1,000,000	$1,000
$1,000,001 to $2,000,000	$1,200
$2,000,001 to $3,000,000	$1,500
$3,000,001 to $4,000,000	$1,600
$4,000,001 to $5,000,000	$1,700
$5,000,001 to $6,000,000	$1,800
$6,000,001 to $7,000,000	$1,900
$7,000,001 to $8,000,000	$2,000
$8,000,001 to $9,000,000	$2,100
$9,000,001 to $10,000,000	$2,200
$10,000,001 to $11,000,000	$2,300
$11,000,001 to $12,000,000	$2,400
$12,000,001 and over	$2,500

For each day that expires after the time specified in Paragraph 2.3 – Notice to Proceed, for Substantial Completion until the Work is substantially complete.

12.2.2 After Substantial Completion, if CONTRACTOR shall neglect, refuse or fail to complete the remaining Work within the Contract Time or any proper extension thereof granted by the CITY, CONTRACTOR shall pay CITY:

BASE BID	LIQUIDATED DAMAGES PER DAY
$1,000 to $20,000	$25.00
$20,001 to $75,000	$50.00
$75,001 to $150,000	$125.00
$150,001 to $350,000	$187.50
$350,001 to $750,000	$200.00
$750,001 to $1,000,000	$250.00
$1,000,001 to $2,000,000	$300.00
$2,000,001 to $3,000,000	$370.00
$3,000,001 to $4,000,000	$400.00
$4,000,001 to $5,000,000	$425.00
$5,000,001 to $6,000,000	$450.00
$6,000,001 to $7,000,000	$475.00
$7,000,001 to $8,000,000	$500.00
$8,000,001 to $9,000,000	$525.00
$9,000,001 to $10,000,000	$550.00
$10,000,001 to $11,000,000	$575.00
$11,000,001 to $12,000,000	$600.00
$12,000,001 and over	$625.00

For each day that expires after the time specified in Paragraph 2.3 – Notice to Proceed.

12.2.3 This sum is not a penalty. The CITY reserves the right to additionally recover direct job site expenses, including CONSULTANT's expenses incurred during the period of any delay. The CONTRACTOR shall be liable for liquidated damages even if the Contract is terminated by the CITY for cause or if the CONTRACTOR abandons the Work. The liability of the CONTRACTOR and its surety or sureties for damages provided by this Article is joint and several.

ARTICLE 13 – TESTS AND INSPECTIONS, CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

13.1 NOTICE OF DEFECTS:

13.1.1 Prompt notice of all defects for which CITY or CONSULTANT have actual knowledge shall be given to CONTRACTOR. All *defective* Work, whether or not completed, may be rejected, corrected or accepted as provided in Article 13 – Tests and Inspections: Correction, Removal or Acceptance of Defective Work.

13.1.2 Unremedied defects identified for correction during the guarantee period but remaining after its expiration shall be considered as part of the obligations of the guarantee. Defects in material, workmanship or equipment which are remedied as a result of obligations of the guarantee, shall subject the remedied portion of the Work to an extended guarantee period of one (1) year after the defect has been remedied. The Surety shall be bound with and for the CONTRACTOR in the CONTRACTOR's observance of the guarantee.

13.2 ACCESS TO WORK:

13.2.1 CONSULTANT's and CONSULTANT's representatives, other representatives of the CITY, testing agencies and governmental agencies with jurisdictional interests shall have access to the Work at reasonable times for their observation, inspecting and testing. CONTRACTOR shall provide proper and safe conditions for such access.

13.3 TESTS AND INSPECTIONS:

13.3.1 CONTRACTOR shall give CONSULTANT timely notice of readiness of the Work for all required inspections, tests or approvals.

13.3.2 If any federal, state or local laws and regulations require any Work (or part thereof) to specifically be inspected, tested or approved,

CONTRACTOR shall assume full responsibility therefore pay all costs in connection therewith, and furnish CONSULTANT the required certificates of inspection, testing or approval. CONTRACTOR shall also be responsible for and pay all costs in connection with any inspection or testing required in connection with the CITY's or CONSULTANT's acceptance of supplier of materials or equipment proposed to be incorporated in the Work, or of materials or equipment submitted for approval prior to CONTRACTOR's purchase thereof for incorporation in the Work.

13.3.3 All inspections, tests or approvals other than those required by federal, state, or local laws or regulations shall be performed by organizations acceptable to the CITY and CONSULTANT.

13.3.4 If any work (including the work of others) that is to be inspected, tested or approved is covered without written concurrence of CONSULTANT, it must, if requested by CONSULTANT, be uncovered for observation. Such uncovering shall be at CONTRACTOR's expense unless CONTRACTOR has given CONSULTANT timely written notice of CONTRACTOR's intention to cover the same and CONSULTANT has not acted with reasonable promptness in response to such notice.

13.3.5 Observations by CITY, CONSULTANT inspections or tests or approvals by others shall not relieve CONTRACTOR from CONTRACTOR's obligation's to perform the Work in pursuant to the Contract Documents.

13.3.6 General: For tests specified to be made by the CONTRACTOR, the testing personnel shall make the necessary inspections and tests, the testing work and testing report thereof shall be in such form as will facilitate checking to determine compliance with the Contract Documents. Five (5) copies of the report shall be submitted and authoritative certification thereof must be furnished to the CONSULTANT as a prerequisite for the acceptance of any material or equipment.

13.3.7 If, in the making of any test of any material or equipment, it is ascertained by the CONSULTANT that the material or equipment does not comply with the Contract Documents, the CONTRACTOR will be notified thereof and it will be directed to refrain from delivering such material or equipment, or to remove it promptly from the Site or from the Work and replace it with acceptable material, without cost to the CITY.

13.3.8 Tests of electrical and mechanical equipment and appliances shall be conducted in accordance with the recognized test codes.

13.3.9 Costs. All inspection and testing or materials furnished under this Contract will be provided by the CONTRACTOR, unless otherwise expressly specified.

13.3.10 Materials and equipment submitted by the CONTRACTOR as the equivalent of those specifically named in the Contract may be tested by the CITY for compliance. The CONTRACTOR shall reimburse the CITY for the expenditures incurred in making such tests of materials and equipment which are rejected for non-compliance.

13.3.11 Certificate of Manufacture: CONTRACTOR shall furnish CONSULTANT authoritative evidence in the form of Certificate of Manufacture that the materials to be used in the Work have been manufactured and tested in conformity with the Contract Documents.

13.3.12 These Certificates of Manufacture shall be notarized and include copies of the results of physical tests and chemical analyses, where necessary, that have been made directly on the product or on similar products of the manufacturer.

13.3.13 Start-up Tests: As soon as conditions permit, the CONTRACTOR shall furnish all labor, materials and instruments and shall make start-up tests of equipment.

13.3.14 If the start-up tests disclose any equipment furnished under the Contract which does not comply with the requirements of the Contract Documents, the CONTRACTOR shall, prior to demonstration tests, make all changes, adjustments and replacements required. The CONTRACTOR shall assist in the start-up tests as applicable.

13.4 UNCOVERING WORK:

13.4.1 If any Work is covered contrary to the request of CONSULTANT, it must, if requested by CONSULTANT, be uncovered for CONSULTANT's observation and replaced at CONTRACTOR's expense.

13.4.2 If CONSULTANT requests that covered Work be observed by CONSULTANT or inspected or tested by others, CONTRACTOR, at CONSULTANT's request shall uncover, expose or otherwise make available for observation, inspection or testing as CONSULTANT may require, that portion of the Work in question, furnishing all necessary labor, material and equipment. If it is found that such Work is *defective*, CONTRACTOR shall bear all direct, indirect and consequential costs of such uncovering, exposure, observation, inspection and testing and of satisfactory reconstruction, (including but not limited to fees and charges of engineers, architects, attorneys and other professionals), and the CITY shall be entitled to an appropriate decrease in the Contract Price, and if the parties are unable to agree as to the amount thereof, may make a claim therefore as provided in Article 11. If however, such Work is found to be *defective*, CONTRACTOR shall be allowed an increase in Contract Price or an extension of the Contract Time, or both, directly attributable to such uncovering, exposure, observation, inspection, testing and reconstruction; and if the parties are unable to agree as to the amount or extent thereof, CONTRACTOR may make a claim therefore as provided in Article 11 – Change in Contract Price and Article 12 – Change in Contract Time in the General Conditions.

13.5 CITY MAY STOP THE WORK:

13.5.1 If the Work is *defective*, or CONTRACTOR fails to supply sufficient skilled workers or suitable materials or equipment, or fails to furnish or perform the Work in such a way that the completed Work shall conform to the Contract Documents, the CITY may order CONTRACTOR to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, this right of the CITY to stop the Work shall not give rise to any duty on the part of the CITY to exercise this right for the benefit of CONTRACTOR or any other party.

13.6 CORRECTION OR REMOVAL OF DEFECTIVE WORK:

13.6.1 If required by CONSULTANT, CONTRACTOR shall promptly, as directed, either correct all *defective* Work, whether or not fabricated,

installed or completed, or if the Work has been rejected by CONSULTANT, remove it from the Site and replace with non-*defective* Work. CONTRACTOR shall bear all direct, indirect, and consequential costs of such correction or removal (including but not limited to fees and charges of engineers, architects, attorneys and other professionals) made necessary thereby.

13.6.2 If the CONTRACTOR refuses to comply, the CITY may do of the following:

13.6.2.1 The CITY shall correct any work so performed by the CONTRACTOR and deduct the expenses for doing so from the final payment due to the CONTRACTOR, or

13.6.2.2 The CITY shall hold back final payment due CONTRACTOR until such time as the Work is completed to the satisfaction of the CITY's Project Manager and in compliance with the CITY's specifications. The CITY's Project Manager shall have the discretion to determine if the Work is satisfactory and in compliance with the specifications.

13.6.3 The remedies contained herein are not exclusive and the CITY/OWNER reserves the right to pursue any and all other remedies it deems applicable.

13.7 ONE-YEAR CORRECTION PERIOD:

13.7.1 If within one (1) year after the date of Acceptance of Work or such longer period of time as may be prescribed by federal, state or local laws and regulations, or by the terms of any applicable special guarantee required by the Contract Documents, or by any specific provision of the Contract Documents; any Work is found to be *defective*, CONTRACTOR shall promptly, without cost to the CITY and in accordance with the CITY's written instructions, either correct such *defective* Work, or if it has been rejected by the CITY, remove it from the Site and replace it with non-*defective* Work.

13.7.2 If CONTRACTOR does not promptly comply with the terms of such instructions or incase of an emergency where delay would cause serious risk of loss or damage; the CITY may have the *defective* Work corrected or the rejected Work removed and replaced, and all direct, indirect and consequential costs of such removal and replacement (including but not limited to fees and charges of engineers, architects, attorneys and other professionals) shall be paid by CONTRACTOR.

13.7.3 In special circumstances where a particular item of equipment is placed in continuous service before Final Acceptance of all the Work, the correction period for that item may start to run from an earlier date if so provided in the Specifications.

13.7.4 Nothing herein shall be deemed a waiver of the statute of limitations as provided in Florida Law.

13.7.5 Where *defective* Work (and damage to other Work resulting therefrom) has been corrected, removed or replaced under this Paragraph 13.7 – "One Year Correction Period", the correction period hereunder with respect to such Work shall be extended for an additional period of one (1) year after such correction or removal and replacement has been satisfactorily completed.

13.8 ACCEPTANCE OF DEFECTIVE WORK:

13.8.1 Instead of requiring correction or removal and replacement of *defective* Work, CITY (prior to CONSULTANT's recommendation of final payment), if CONSULTANT prefers to accept *defective* Work CITY may accept *defective* Work. If CITY accepts *defective* Work pursuant to this Paragraph 13.8. CONTRACTOR shall pay all claims, costs, losses and damages attributable to CITY's evaluation of and determination to accept such *defective* Work (such costs to be approved by CONSULTANT as to reasonableness and to include but not limited to fees and charges of engineers, architects, attorneys and other professionals).

13.8.2 If any such acceptance of *defective* work occurs prior to CONSULTANT's recommendation of final payment, a Change Order shall be issued incorporating the necessary revisions in the Contract Documents with respect to the Work; and the CITY shall be entitled to an appropriate decrease in the Contract Price, and, if the parties are unable to agree as to the amount thereof, the CITY may make a claim therefor as provided in Article 11 – Change of Contract Price. If acceptance occurs after such recommendation, CONTRACTOR shall pay an appropriate amount to the CITY.

13.9 CITY MAY CORRECT DEFECTIVE WORK:

13.9.1 If CONTRACTOR fails within thirty (30) days after written notice of CONSULTANT to proceed to correct *defective* Work, or remove and replace rejected Work as required by CONSULTANT in accordance with paragraph 13.7.1, or if CONTRACTOR fails to perform the Work in accordance with the Contract Documents, or if CONTRACTOR fails to comply with any other provision of the Contract Documents, the CITY may, after seven (7) days written notice to CONTRACTOR correct and remedy any such deficiency.

13.9.2 To the extent necessary to complete corrective and remedial action, the CITY may exclude CONTRACTOR from all or part of the Work, and suspend CONTRACTOR's services related thereto, take possession of CONTRACTOR's tools, appliances, construction equipment and machinery at the Site and incorporate in the Work, all materials and equipment stored at the Site or for which the CITY has paid CONTRACTOR but which are stored elsewhere. CONTRACTOR shall allow the CITY, the CONSULTANT, the CITY's Representative agents and employees, such access to the Site as may be necessary to enable the CITY to exercise the rights and remedies under this Paragraph.

13.9.3 All direct, indirect and consequential costs of the CITY in exercising such rights and remedies under this Paragraph shall be charged against CONTRACTOR by CITY, and a Change Order shall be issued incorporating the necessary revisions in the Contract Documents with respect to the Work. The CITY shall be entitled to an appropriate decrease in the Contract Price, and if the parties are unable to agree as to the amount thereof, the CITY may make a claim therefore as provided in Article 11 – Change of Contract Price. Such direct, indirect and inconsequential costs shall include but not be limited to fees and charges of engineers, architects, attorneys and other professionals, all court costs, and all costs of repair and/or replacement of Work of others destroyed or damaged by correction, removal or replacement of CONTRACTOR's *defective* work. CONTRACTOR shall also be responsible for restoring any other sites affected by such repairs or remedial work at no cost to the CITY. CONTRACTOR shall not be allowed an extension of the Contract Time because of any delay in performance of the Work attributable to the exercise by the CITY of the CITY's rights pursuant to Paragraph 13.9 of the General Conditions.

ARTICLE 14 – PAYMENTS TO CONTRACTOR AND COMPLETION:

14.1 SCHEDULE OF VALUES

14.1.1 The schedule of values established as provided in Paragraph 2.9 – Finalizing Schedules, shall serve as the basis for progress payments and shall be incorporated into a form of Application for Payment acceptable to CITY and CONSULTANT.

14.2 UNIT PRICE BID SCHEDULE

14.2.1 Progress payments on account of Unit Price Work shall be based on the number of units completed.

14.2.2 The quantities for payment under this Contract shall be determined by actual measurement of the completed items in place, ready for service and accepted by the CITY, in accordance with the applicable method of measurement therefore contained pursuant to these General Conditions.

14.2.3 The CONTRACTOR shall receive and accept the compensation provided in the Bid and the Contract documents as full payment for furnishing all materials, labor, tools and equipment for performing all operations necessary to complete the Work under the Contract and also in full payment for all loss or damages arising from the nature of the Work or from any discrepancy between the actual quantities of Work and quantities herein estimated by the CONSULTANT, or from the action of the elements or from any unforeseen difficulties which may be encountered during the prosecution of the Work until final acceptance by the CITY.

14.2.4 The prices stated in the Bid include all costs and expenses for taxes, labor, equipment, materials, commissions, transportation charges and expenses, patent fees and royalties, labor for handling materials during inspection, together with any and all other costs and expenses for performing and completing the Work as shown on the Drawings and specified herein. The basis of payment for an item at the unit price stated in the Bid shall be in accordance with the description of that item.

14.3 APPLICATION FOR PAYMENTS:

14.3.1 Unless otherwise prescribed by federal, state or local law, at the end of each calendar month, the CONTRACTOR shall submit to the CONSULTANT for review, an Application for Payment (AFP) filled out and signed by the CONTRACTOR, covering the Work completed as of the date of the Application and accomplished by such supporting documentation pursuant to the Contract Documents.

14.3.2 The Net Payment Due to the CONTRACTOR shall be the above-mentioned subtotal from which shall be deducted from the amount of retainage specified in the Contract, and the total amount of all previous approved Applications for Progress Payment submitted by CONTRACTOR. Retainage shall be calculated based upon the above-mentioned sub-total.

14.3.3 The CONTRACTOR shall list each Change Order executed prior to date of submission, at the end of the continuation sheets and shall list by Change Order Number, and description, as for an original component item of work.

14.3.4 As provided for in the Application for Payment (AFP) form, the CONTRACTOR shall certify for each current pay request that all previous progress payments received from the CITY, under this Contract have been applied by the CONTRACTOR to discharge in full all obligations of the CONTRACTOR in connection with Work covered by prior Application for Payment (AFP), and all materials and equipment incorporated into the Work are free and clear of all liens, claims, security interest and encumbrances. CONTRACTOR shall attach to each Application for Payment (AFP) like obligation discharge affidavits by all subcontractors.

14.4 CONTRACTOR'S WARRANTY OF TITLE:

14.4.1 The CONTRACTOR warrants and guarantees that title to all Work and equipment covered by an Application for Payment, whether incorporated in the Project or not, shall have passed to the CITY prior to the making of an Application for Payment, free and clear of all liens, claims, security interests and encumbrances (hereafter in these General Conditions referred to as "Liens"), and that no work or equipment covered by an Application for Payment shall have been acquired by the CONTRACTOR or by any other party performing the Work at the Site or furnishing equipment for the Project, subject to an agreement under which an interest therein or encumbrances thereon is retained by the seller of such products or otherwise imposed by the CONTRACTOR or such other person.

14.5 REVIEW OF APPLICATIONS FOR PAYMENT:

14.5.1 CONSULTANT shall, within ten (10) days after receipt of each Application for Payment, either indicate in writing, a recommendation of payment and present the Application to the CITY, or return the Application to CONTRACTOR indicating in writing CONSULTANT's reasons for refusing to recommend payment. In the latter case, CONTRACTOR may make necessary corrections and resubmit the Application. Thirty (30) days after receipt of the Application for Payment by the CITY with CONSULTANT's recommendation, the amount recommended shall (subject to the provisions of the last sentence of paragraph 14.5.4) become due and when due shall be timely paid by the CITY to CONTRACTOR.

14.5.2 CONSULTANT's recommendation of any payment requested in the Application for Payment shall not prohibit the CITY from withholding payment or prohibit the CITY from paying additional sums regarding other matters or issues between the parties.

14.5.3 CONSULTANT's recommendation of final payment shall constitute a representation by CONSULTANT to the CITY that the conditions precedent to CONTRACTOR's being entitled to final payment as set forth in Paragraph 14.10, Final Payment and Acceptance, have been fulfilled.

14.5.4 CONSULTANT may refuse to recommend in whole or any part of any payment if, in CONSULTANT's opinion, it would be incorrect to make such representations to the CITY. The CONSULTANT may also refuse to recommend any such payment, or, because of subsequently discovered evidence or the results of subsequent inspections or tests, nullify any such payment previously recommended, to such extent as may be necessary in CONSULTANT's opinion to protect the CITY from loss, including but not limited to:

14.5.4.1 The Work is *defective* or completed Work has been damaged requiring correction or replacement.

14.5.4.2 The Contract Price has been reduced by a Written Amendment or Change Order.

14.5.4.3 The CITY has been required to correct *defective* Work or complete Work pursuant to Paragraph 13.9, or

14.5.4.4 The CONSULTANT's actual knowledge of the occurrence of any of the events enumerated in Paragraphs 15.2.1 through 15.2.1.9 inclusive (CITY May Terminate).

14.5.5 The CITY may refuse to make payment of the full amount recommended by the CONSULTANT because claims have been made against the CITY on account of CONTRACTOR's performance or furnishing of the Work, or there are other items entitling the CITY to credit against the amount recommended but the CITY must give CONTRACTOR written notice (with a copy to CONSULTANT) stating the reasons for such action. Reasons the CITY may refuse to make payment include but are not limited to:

14.5.6 The Work for which payment is requested cannot be verified by the CITY.

14.5.7 Claims or Liens have been filed against the CITY relating to the Project or there is reasonable evidence indicating the probable filing thereof.

14.5.8 Upon unsatisfactory obligation of the Work, including failure to clean up as required.

14.5.9 Upon CONTRACTOR's persistent failure to cooperate with other contractors on the Project and persistent failure to carry out the Work in accordance with the Contract Documents.

14.5.10 Upon liquidated damages payable by the CONTRACTOR, or

14.5.11 Upon any other violation of, or failure of CONTRACTOR to comply with, the provisions of the Contract Documents.

14.6 SUBSTANTIAL COMPLETION:

14.6.1 When the CONTRACTOR considers the entire Work ready for its intended use, the CONTRACTOR shall notify the CITY and the CONSULTANT in writing that the Work is substantially complete and request that the CONSULTANT prepare a Certificate of Substantial Completion.

14.6.2 The CITY, the CONSULTANT and the CONTRACTOR shall make an inspection of the Work within fifteen (15) calendar days after notice from the CONTRACTOR that the Work is substantially complete to determine the status of completion. If the CONSULTANT does not consider the Work substantially complete, the CONSULTANT shall notify the CONTRACTOR in writing giving the reasons therefor. If the CONSULTANT considers the Work to be substantially complete, the CONSULTANT shall prepare and deliver to the CITY for its execution and recordation, the Certificate of Substantial Completion, signed by the CONSULTANT and CONTRACTOR, which shall affix the Date of Substantial Completion.

14.6.3 The CITY shall have the right to exclude CONTRACTOR from the Work after the date of Substantial Completion, but the CITY shall allow CONTRACTOR reasonable access to complete or correct items on the "punch list", pursuant to Paragraph 14.12 of the General Conditions.

14.7 PARTIAL UTILIZATION:

14.7.1 The CITY shall have the right to enter the premises for the purpose of doing work not covered by the Contract Documents. This provision shall not be construed as relieving the CONTRACTOR of the sole responsibility for the care and protection of the Work, or the restoration of any damaged work except such as may be caused by agent or employees of the CITY.

14.7.2 Prior to Substantial Completion, the CITY, with the approval of the CONSULTANT and with written notice to the CONTRACTOR, may use any completed or substantially completed portion of the Work. Such use shall not constitute an acceptance of such portions of the Work.

14.7.3 Use by the CITY of any finished part of the Work, which has specifically been identified in the Contract Documents, or which the CITY, CONSULTANT, and CONTRACTOR agree constitutes a separately functioning and usable part of the Work that can be used by the CITY without significant interference with CONTRACTOR's performance of the remainder of the Work, may be accomplished prior to Substantial Completion of all Work subject to the following:

14.7.3.1 The CITY at any time may request CONTRACTOR in writing to permit the CITY to use any such part of the Work which the CITY believes to be ready for its intended use and substantially complete. If CONTRACTOR agrees, CONTRACTOR shall certify to the CITY and CONSULTANT that said part of the Work is substantially complete and request CONSULTANT to issue a Certificate of Substantial Completion for that part of the Work. CONTRACTOR at any time may notify the CITY and CONSULTANT in writing that CONTRACTOR considers any such part of the Work ready for its intended use and substantially complete and request CONSULTANT to issue a Certificate of Substantial Completion for that part of the Work. Within fifteen (15) days after either such request, the CITY, CONTRACTOR and CONSULTANT shall make an inspection of that part of Work to determine its status of completion. If CONSULTANT does not consider that part of the Work to be substantially complete, CONSULTANT shall notify the CITY and CONTRACTOR in writing giving the reasons therefore. If CONSULTANT considers that part of the Work to be substantially complete, the provisions of Paragraphs 14.6.1 and 14.6.2 shall apply with respect to Certification of Substantial Completion of that part of the Work and the division of responsibility in respect thereof and access thereto.

14.7.3.2 The CITY may at any time, request CONTRACTOR in writing to permit the CITY to take over operation of any such part of the Work although it is not substantially complete. A copy of such request shall be sent to CONSULTANT and within fifteen (15) days thereafter, the CITY, CONTRACTOR and CONSULTANT shall make an inspection of that part of the Work to determine its status of completion and shall prepare a list of items remaining to be completed or corrected thereon before final payment. If CONTRACTOR does not object in writing to the CITY and CONSULTANT that such part of the Work is not ready for separate operation by the CITY; CONSULTANT shall finalize the list of items to be completed or corrected and shall deliver such list to the CITY and CONTRACTOR together with a written recommendation as to the division of responsibilities pending final judgment between the CITY and CONTRACTOR with respect to security, operation, safety, maintenance, utilities, insurance, warranties and guarantees for that part of the Work which shall become binding upon the CITY and CONTRACTOR at the time when the CITY takes over such operation (unless CONTRACTOR shall have otherwise agreed in writing and so informed CONSULTANT). During such operation and prior to Substantial Completion of such part of the Work, the CITY shall allow CONTRACTOR reasonable access to complete or correct items on such list and to complete other related Work.

14.8 FINAL INSPECTION:

14.8.1 Upon written notice from the CONTRACTOR that the entire Work or an agreed upon portion thereof is complete, CONSULTANT shall make a final inspection with the CITY and CONTRACTOR and shall notify CONTRACTOR in writing of all particulars in which this inspection reveals that the Work is incomplete, *defective*, or not in accordance with the Contract Documents. CONTRACTOR shall immediately take such measures as necessary to remedy such deficiencies.

14.9 FINAL APPLICATION FOR PAYMENT:

14.9.1 After CONTRACTOR has completed in writing all such corrections to the satisfaction of CONSULTANT and delivered all maintenance and operating instructions, schedules, guarantees, Bonds, certificates of inspection, marked-up record documents (as provided in Paragraph 14.6, Substantial Completion) and other documents- all as required by the Contract Documents, and after CONSULTANT has indicated in writing that the Work is acceptable and has been completed in conformance with the drawings and specifications and any approved changes thereto, CONTRACTOR may make application for final payment following the procedure for progress payments. The final Application for Payment shall be accompanied by: (i) all documentation called for in the Contract Documents, including but not limited to the evidence of insurance required, (ii) consent of the surety, if any, to final payment, and (iii) complete and legally effective releases or waivers (satisfactory to CITY) of all Liens arising out of or filed in connection with the Work.

14.10 FINAL PAYMENT AND ACCEPTANCE:

14.10.1 Upon receipt of written notice from the CONTRACTOR that the Work has been completed in conformity with the Drawings and Specifications and any approved changes thereto, and receipt of the Final Application for Payment with the Warranty of Title and accompanying documentation; the CITY's CONSULTANT shall promptly examine the Work and making such tests as he/she may deem proper, and using all of the care and judgment normally exercised in the examination of completed Work by a properly qualified and experienced professional Consultant, shall satisfy themselves that the CONTRACTOR's statement appears to be correct and the CONTRACTOR's other obligations under the Contract Documents have been fulfilled. The CONSULTANT shall then inform the CITY in writing that CONSULTANT have examined the Work and that it appears, to the best of the CONSULTANT's knowledge and belief, to conform to the Contract Drawings, Specifications and any approved Change Orders that the CONTRACTOR's other obligations under the Contract Documents have been fulfilled, and that CONSULTANT therefore recommend acceptance of the Work for ownership and Final Payment to the CONTRACTOR. However, it is agreed by the CITY and the CONTRACTOR that such statement by the CITY's CONSULTANT does not in any way relieve the CONTRACTOR from their responsibility to deliver a fully completed job in a good and workmanlike condition, and does not render the CONSULTANT or the CITY liable for any faulty Work done or defective materials or equipment used by the CONTRACTOR.

14.10.2 The CONSULTANT shall then make a final estimate of the value of all Work done and shall deduct all previous payments which have been made. The CONSULTANT shall report such estimate to the CITY together with his/her recommendation as to the acceptance of the Work or his/her findings as to any deficiencies therein. After receipt and acceptance by the CITY of the properly executed Final Warranty of Title and after approval of the CONSULTANT's estimate and recommendation to the CITY, the CITY shall make final payment to the CONTRACTOR of the amount remaining after deducting all prior payments and all amounts to be kept or retained under the provisions of the Contract Documents, or as may be lawfully retained, including but not limited to, Liquidated Damages, as applicable. Title passes and warranty begins at final acceptance.

14.10.3 All prior estimates are subject to correction in the final estimate. Thirty (30) days after approval by the CITY of the Application for Final Payment, the amount recommended by CONSULTANT shall become due and shall be paid to the CONTRACTOR.

14.11 WAIVER OF CLAIMS:

14.11.1 The making and acceptance of Final Payment shall constitute:

14.11.1.1 Waiver of all claims by CITY against CONTRACTOR, except claims arising from unsettled Liens from *defective* Work appearing after final inspection, pursuant to Paragraph 14.8, Final Inspection, from failure to comply with the Contract Documents or the terms of any special guarantees specified therein, or from CONTRACTOR's continuing obligations under the Contract Documents or the Performance and Payment Bonds; and

14.11.1.2 Waiver of all claims by CONTRACTOR against CITY other than those previously made in writing and still unsettled at the time of making an acceptance of Final Payment.

14.12 PUNCHLIST PROCEDURES:

As per Florida Statutes § 218.735(7)(a)(ii), punchlist procedures to render the Work complete, satisfactory and acceptable are established as follows:

14.12.1 Within fifteen (15) days of Substantial Completion of the construction services purchased as defined in the Contract, CONTRACTOR shall schedule a Substantial Completion Walkthrough with CITY and CONSULTANT. The purpose of the Substantial Completion Walkthrough is to develop a preliminary punchlist ("Punchlist") of items to be performed by the CONTRACTOR, based upon observations made jointly between the CONTRACTOR, CONSULTANT and CITY during the Substantial Completion Walkthrough. Completion of the Work as defined by the Contract, again predicated upon the CONTRACTOR's timely initiation of a request for the Substantial Completion Walkthrough. At its option, CITY may conduct Substantial Completion Walkthrough with its Field Inspector and CONSULTANT.

14.12.2 CONTRACTOR shall endeavor to address and complete as many items as possible noted on the Punchlist either during the Substantial Completion Walkthrough itself, or thereafter for a period of thirty (30) days from the date of the Substantial Completion Walkthrough.

14.12.3 No later than thirty (30) days following the scheduled Substantial Completion Walkthrough, CONTRACTOR shall again initiate and request a second walkthrough of the Project with CITY. The purpose of this second walkthrough is to identify which items remain to be performed from the Substantial Completion Walkthrough Checklist and to supplement that list as necessary (based, for example, upon work which may have been damaged as a result of the CONTRACTOR's performance of completion of items contained on the Substantial Completion Walkthrough Punchlist) and for the purpose of developing a joint Final Punchlist.

14.12.4 The intent of this section is for the CITY and the CONTRACTOR to cooperate to develop a Final Punchlist to be completed no later than thirty (30) days from the date of reaching Substantial Completion of the construction services or as defined in the Contract Documents.

14.12.5 In no event may the CONTRACTOR request payment of final retainage under Florida Statutes § 218.735(7)(d) until the CONTRACTOR considers the Final Punchlist to be 100% complete.

14.12.6 CONTRACTOR agrees to complete the Final Punchlist items within thirty (30) days of the date of its issuance by CITY.

14.12.7 CONTRACTOR acknowledges and agrees that no item contained on the Final Punchlist shall be considered a warranty item until such time as the Final Punchlist is 100% complete.

14.12.8 CONTRACTOR acknowledges and agrees that CITY may, at its option, during performance of the Work and prior to Substantial Completion, issue lists of identified non-conforming or corrective work for the CONTRACTOR to address. The intent of any such CITY generated lists prior to Substantial Completion is to attempt to streamline the Punchlist process upon achieving Substantial Completion, and to allow for the CONTRACTOR to address needed areas of corrective work as they may be observed by CITY during performance of the Work.

14.12.9 CONTRACTOR acknowledges and agrees that in calculating 150% of the amount which may be withheld by CITY as to any Final Punchlist item for which a good faith basis exists as to it being complete, as provided for by Florida Statutes § 218.735(7)(d), CITY may include within such percentage calculation its total costs for completing such item of work, including its administrative costs as well as costs to address other services needed or areas of work which may be affected in order to achieve full completion of the Final Punchlist item. Such percentage shall in no event relate to the Schedule of Value associated with such work activity, but rather total costs are based upon the value (i.e. cost) of completing such work activity based upon market conditions at the time of Final Punchlist completion.

14.13 RETAINAGE PROCEDURES:

14.13.1 Pursuant to Florida Statutes § 218.735(8)(a). The CITY may withhold retainage of five (5%) percent of all monies earned by the CONTRACTOR and shall be retained by the CITY until Final Completion of the construction services purchased (defined as that point at which 100% of the constriction of the work as defined in the Contract Schedule of Values has been performed under the contract by the CONTRACTOR) has been reached and acceptance by the CITY as defined in Florida Statutes § 218.735(7)(d).

14.13.2 This section does not prohibit the CITY from withholding retainage at a rate less than five (5%) percent of each progress payment, from incrementally reducing the rate of retainage pursuant to a schedule provided for in the Contract, or from releasing at any point all or a portion of any retainage withheld by the CITY which is attributable to the labor, services, or materials supplied by the CONTRACTOR or by one or more subcontractors or suppliers. If the CITY makes any payment of retainage to the CONTRACTOR which is attributable to the labor, services, or materials supplies by one or more subcontractors or suppliers, the CONTRACTOR shall timely remit payment of such retainage to those subcontractors and suppliers.

14.13.3 This section does not require the CITY to pay or release any amounts that are subject of a good faith dispute, the subject of a claim brought pursuant to Florida Statutes § 255.05 or otherwise the subject of a claim or demand by the CITY or CONTRACTOR.

14.13.4 The time limitations set forth in this section for payment requests, apply to any payment request for retainage made pursuant to this section.

14.13.5 Paragraph 14.13.2 do not apply to construction services purchased by the CITY which are paid for, in whole or in part, with federal funds and are subject to federal grantor laws and regulations or requirements that are contrary to any provision of the Local Government Prompt Payment Act.

14.13.6 This subsection does not apply to any construction services purchased by the CITY if the total cost of the construction services as identified in the contract is $200,000 or less.

14.13.7 All payments dues under this section and not made within the time periods specified by this section shall bear interest at the rate of one (1%) percent per month, or the rate specified by contract, whichever is greater.

ARTICLE 15 – SUSPENSION OF WORK AND TERMINATION:

15.1 CITY MAY SUSPEND/STOP WORK:

15.1.1 THE CITY MAY SUSPEND WORK: The CITY may, at any time and without cause, suspend the Work or any portion thereof for period of not more than ninety (90) days by notice in writing to CONTRACTOR and CONSULTANT which shall affix the date on which Work shall be resumed. CONTRACTOR shall resume the Work on the date so affixed. If CONTRACTOR claims an increase in the Contract Price or an extension of the Contract Time, or both, directly attributable to any suspension, CONTRACTOR may make a claim as provided in Articles 11 (Change of Contract Price) and Article 12 (Change of Contract Time) of the General Conditions.

15.1.2 THE CITY MAY STOP WORK: The CITY or CITY's Representative may stop the Work or any portion thereof when it has been determined that the CONTRACTOR is not complying with the Drawings or Specifications or the intent thereof. The Stop Work order may be verbal and the CONTRACTOR shall cease work immediately except for leaving the Work area in a safe and acceptable condition. A verbal Stop Work order shall be followed by a confirmation in writing. The CONTRACTOR shall not be allowed an increase in the Contract Price or an extension of the Contract Time during the Stop Work period. A Start Work order may be verbal and shall be followed by a confirmation in writing.

15.2 CITY MAY TERMINATE FOR CAUSE:

15.2.1 Upon the occurrence of any one or more of the following events:

15.2.1.1 If CONTRACTOR commences a voluntary case under any chapter of the Bankruptcy Code (Title 11, United States Code), as now or hereafter in effect, or if CONTRACTOR takes any equivalent or similar action by filing a petition or otherwise under any other federal or state law in effect at such timing relating to CONTRACTOR's bankruptcy or insolvency;

15.2.1.2 If a petition is filed against CONTRACTOR under any chapter of the Bankruptcy Code (Title 11, United States Code) as now

or hereafter in effect at the time of filing, or if a petition is filed seeking any such equivalent or similar relief against CONTRACTOR under any other federal or state law in effect at the time relating to CONTRACTOR's bankruptcy or insolvency;

15.2.1.3 If CONTRACTOR makes a general assignment for the benefit of creditors;

15.2.1.4 If a trustee, receiver, custodian or agent of CONTRACTOR is appointed under applicable law or under Contract, whose appointment or authority to take charge of property of CONTRACTOR is for the purpose of enforcing a Lien against such property or for the purpose of general administration of such property for the benefit of CONTRACTOR's creditors;

15.2.1.5 If CONTRACTOR admits in writing an inability to pay the debts generally as they become due;

15.2.1.6 If CONTRACTOR fails to perform the Work in accordance with the Contract Documents (including but not limited to, failure to supply sufficient skilled workers suitable materials or equipment or failure to adhere to the progress schedule established under Paragraph 2.6 as revised from time to time);

15.2.1.7 If CONTRACTOR disregards any federal, state or local laws and or regulations of any Local Public Agency regulations that apply.

15.2.1.8 If CONTRACTOR disregards the authority of CONSULTANT; or

15.2.1.9 If CONTRACTOR otherwise violates any provisions of the Contract Documents;

15.2.1.10 In the event of termination; the CITY may take possession of the premises and all materials, tools, and appliances, thereon and finish the Work by whatever method it may deem expedient. In such cases, the CONTRACTOR shall only be entitled to receive payment for Work satisfactorily completed prior to the termination date, subject to any setoffs due the CITY in completing the Project and for reimbursement for damages incurred. The CITY may take possession of and use any materials, plant, tools, equipment, and property of any kind furnished by CONTRACTOR to complete the Work. In such case CONTRACTOR shall not be entitled to receive any further payment until the Work is finished. If the expense incurred by the CITY to finish the Work (including additional managerial and administrative services, plus the CITY's direct, indirect and consequential losses), exceeds the unpaid balance on the Contract, the CONTRACTOR or Surety shall pay the difference to the CITY promptly upon demand. The expense incurred through the CONTRACTOR's default, shall be certified by the CITY's Project Manager. The CONTRACTOR shall be responsible for both liquidated damages attributable to delay and for excess completion costs. The liability of the CONTRACTOR and its surety or sureties for such damages and costs is joint and several. The obligations of the CONTRACTOR and their surety with respect to the warranty and maintenance shall remain in full force and effect for the portion of the Work completed by the CONTRACTOR and shall not expire until the expiration of the prescribed time period measured from the final acceptance of the Project in its entirety. These clauses shall survive the termination of this CONTRACT. If the CITY makes a determination pursuant to this Contract to hold the CONTRACTOR in default and terminate the Contract for cause and it is subsequently determined that any such determination was improper, unwarranted, or wrongful, then any such termination shall be deemed for all purposes as a termination without cause as described below. The CONTRACTOR agrees that it shall be entitled to no damages, allowances or expenses of any kind other than as provided in this Agreement in connection with such termination, any and all claims for consequential damages, loss of bonding capability, destruction of business, unabsorbed home office overhead, lost profit and related claims.

15.2.2 Where CONTRACTOR's services have been terminated by the CITY, the termination shall not affect any rights or remedies of the CITY against CONTRACTOR then existing or which may thereafter accrue. Any retention or payment of monies due CONTRACTOR by the CITY shall not release CONTRACTOR from liability.

15.3 CITY MAY TERMINATE WITHOUT CAUSE:

15.3.1 The CITY may terminate this Contract without cause by giving seven (7) days prior written notice to the CONTRACTOR, and in such event, the CITY shall pay the CONTRACTOR for that portion of the Contract Sum, less the aggregate of previous payments, allocable to the Work completed as of the Date of Termination, plus reasonable termination expenses. The CITY also shall reimburse the CONTRACTOR for all costs necessarily incurred for organizing and carrying out the stoppage of Work paid directly to the CONTRACTOR, not including overhead, general expenses or profit. The CITY shall not be responsible to reimburse the CONTRACTOR for any continuing contractual commitments to subcontractors or material men or for penalties or damages for canceling such contractual commitments, (with the exception that the CITY shall reimburse the CONTRACTOR for major materials or equipment purchased before termination, if the CONTRACTOR can show proof of such purchases prior to notice of termination) inasmuch as the CONTRACTOR shall make all subcontracts and other commitments subject to this provision. In the event of termination by the CITY, the CITY may require the CONTRACTOR promptly to assign to it, all or some subcontracts, construction, plants, materials tools, equipment, appliances, rental agreements, and other commitments which the CITY, in its sole discretion, chooses to take by assignment, and in such event the CONTRACTOR shall promptly execute and deliver to the CITY written assignments of the same.

15.4 REMOVAL OF EQUIPMENT DUE TO TERMINATION:

15.4.1 Removal of Equipment: In the case of termination of this Contract before completion, for any cause whatever, the CONTRACTOR, if notified to do so by the CITY or CITY's Project Manager, shall promptly remove any part of all of this equipment and supplies from the property of the CITY. Should the CONTRACTOR not remove such equipment and supplies, the CITY shall have the right to remove them at the expense of the CONTRACTOR. Equipment and supplies shall not be construed to include such items for which the CONTRACTOR has been paid in whole or in part.

15.5 CONTRACTOR MAY STOP WORK OR TERMINATE:

15.5.1 If, through no act or fault of CONTRACTOR, the Work is suspended for a period of more than ninety (90) days by the CITY, or under an order of court or other public authority, or CONSULTANT fails to act on any Application of Payment within thirty (30) days after it is submitted, or the CITY fails to pay any sum finally determined to be due within sixty (60) days to CONTRACTOR, CONTRACTOR may upon CITY's and CONSULTANT's receipt of seven (7) days written notice to the CITY and CONSULTANT, terminate the Contract and the CITY shall pay the CONTRACTOR for that portion of the Contract Sum, less the aggregate of previous payments, allocable to the Work completed as of the Date of Termination. The CITY shall not be responsible to reimburse the CONTRACTOR for any continuing contractual commitments for canceling such contractual commitments inasmuch as the CONTRACTOR shall make all subcontracts and other commitments subject to this provision. The CITY may require the CONTRACTOR to promptly assign CITY all or some subcontracts, construction, plant, materials, tools, equipment, appliances, rental agreements, and any other commitments which the CITY, in its sole discretion, chooses to take by assignment, and in such event, the CONTRACTOR shall promptly execute and deliver to the CITY written assignments of the same. In addition and in lieu of terminating the Contract, if CONSULTANT has failed to act on an Application for Payment or the CITY has failed to make any payment as aforesaid, CONTRACTOR may upon seven (7) days written notice to the CITY

and CONSULTANT, stop the Work until payment of all amount becomes due. The provisions of this paragraph shall not relieve the CONTRACTOR of the obligations under Paragraph 6.24 – Continuing the Work, to carry on the Work in accordance with the progress schedule and without delay during disputes and disagreements with the CITY or CONSULTANT.

ARTICLE 16 -DISPUTE RESOLUTION

16.2 GOOD FAITH EFFORT:

16.2.1 Any disputes relating to interpretation of the terms of this Contract or a question or fact arising under this Contract, shall be resolved through good faith efforts upon the part of the CONTRACTOR and the CITY or CITY's Project Manager. At all times, the CONTRACTOR shall carry on the Work and maintain its progress schedule in accordance with the requirements of the Contract and the determination of the CITY or its representatives, pending a final resolution of the dispute, including, if necessary, any determination by a Court of competent jurisdiction. Any dispute which is not resolved by mutual agreement of CONTRACTOR and CITY's or CITY's Project Manager shall be decided by the CITY MANAGER or CITY MANAGER's designee who shall reduce the decision to writing. The decision of the CITY MANAGER or CITY MANAGER's designee shall be final and conclusive unless determined by a court of competent jurisdiction to be fraudulent, capricious, arbitrary, so grossly erroneous as to necessarily imply bad faith, or not be supported by substantial evidence.

16.3 MEDIATION:

16.3.1 Prior to initialing any litigation concerning this Contract, the CITY reserves the right to submit the disputed issue or issues to a mediator for non-binding mediation. The parties shall agree on a mediator chosen from a list of certified mediators available from the Clerk of Court for Palm Beach County. The fee of the mediator shall be shared equally by the parties. To the extent allowed by law, the mediation process shall be confidential and the results of the mediation or any testimony or argument introduced at the mediation shall not be admissible as evidence in any subsequent proceeding concerning the disputed issue.

ARTICLE 17 – MISCELLANEOUS:

17.1 GIVING NOTICE:

17.1.1 All notices, requests, consents and other communications required or permitted under this Contract shall be in writing and shall be (as elected by the person giving such notice) hand delivered by messenger or courier service, or mailed by registered or certified mail (postage prepaid) return receipt requested, addressed to :

To CITY:
User Department
100 E. Ocean Avenue
Boynton Beach, Florida 33435

WITH A COPY TO:
Director of Financial Services
Procurement Services Division
100 E. Ocean Avenue
Boynton Beach, Florida 33435

CONTRACTOR:
Individual or to a member of the firm or to an officer of the
corporation for whom it is intended.

17.2 COMPUTATION OF TIME:

17.2.1 When any period of time is referred to in the Contract Documents by days, it shall be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a federal or state legal holiday, such day shall be omitted from the computation.

17.3 NOTICE OF CLAIM:

17.3.1 Should CITY or CONTRACTOR suffer injury or damage to person or property because of any error, omission or act of the other party or of any of the other party's employees or agents or others for whose acts the other party is legally liable, claim shall be made in writing to the other party within seven (7) calendar days of the first observance of such injury or damage. The provisions of this Paragraph 17.3 shall not be construed as a substitute for a waiver of the provisions of any applicable statute of limitations or repose or an actual waiver of the provisions.

17.4 CULMULATIVE REMEDIES:

17.4.1 The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto, and, in particular but without limitation, the warranties, guarantees and obligations imposed upon CONTRACTOR by Sections 6 – Contractor's Responsibilities, Section 13 – Test and Inspections, Correction, Removal or Acceptance of Defective Work, Section 14 – Payments to Contractor and Completion, and Section 15 – Suspension of Work and Termination, and all of the rights and remedies available to the CITY and CONSULTANT thereunder, are in addition to and are not to be construed in any way as a limitation of, any rights and remedies available to any or all duties and obligations which are otherwise imposed or available by federal, state and local laws or regulations, by special warranty or guarantee or by any other provisions of this paragraph shall be as effective as if repeated specifically in the Contract Documents, and the provisions of this paragraph shall be as effective as if stated specifically in the Contract Documents in connection with each particular duty obligation, right and remedy. All representations warranties and guarantees made in the Contract Documents shall survive final payment and termination of completion of the Contract.

17.5 ACCIDENT AND PREVENTION:

17.5.1 The safety provisions of applicable laws and building and construction codes shall be observed and the CONTRACTOR shall take or cause to be taken such additional safety and health measures as the Local Public Agency involved may determine to be reasonably necessary. Machinery, equipment and all hazards shall be guarded in accordance with the safety provisions of the "Manual of Accident Prevention in Construction" as published by the Associated General Contractors of America, Inc. to the extent that such provisions are not in conflict with applicable laws. The CONTRACTOR shall maintain an accurate record of all cases of death, occupational diseases, or injury requiring medical attention or causing loss of time from Work, arising out of and in the course of employment on Work under the Contract. The CONTRACTOR shall promptly furnish the local public agency with reports concerning these matters.

17.6 FLORIDA PRODUCTS AND LABOR:

17.6.1 The CONTRACTOR shall comply with Florida Statutes § 255.04, which requires that on public building contracts, Florida products and labor shall be used whenever price and quality are equal.

17.7 EMPLOYEES:

17.7.1 All labor described in these specifications or indicated on the Drawings and the Work specified or indicated shall be executed in a thoroughly substantial and workmanlike manner by mechanics skilled in the applicable trades.

17.7.2 Any person employed on the Project who fails, refuses, or neglects to obey the instructions of the CONTRACTOR in anything relating to this Project, or who appears to the CITY or CITY's Representative to be disorderly, intoxicated, insubordinate, or incompetent, shall upon the order of the CITY, be discharged at once and will no longer be employed in any part of the Work. Any interference with, or abuse or threatening conduct toward the CITY, CONSULTANT, or their inspectors by the CONTRACTOR or its employees or agents, shall be authority for the CITY to annul the Contract and re-let the Project. No intoxicating substance shall be allowed at the Project Site.

17.8 NON-DISCRIMINATION:

17.8.1 The CONTRACTOR shall not discriminate against employees or applicants for employment because of race, creed, color, religion, sex, age, handicapped status, disabilities, or national origin. Such action shall include but not be limited to the following: employment, upgrading, demotion or transfer, recruitment advertising; layoff or termination, rates of pay or other form of compensation; and selection for training including apprenticeship. The CONTRACTOR agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this non-discrimination clause. These provisions apply to all subcontractors and CONTRACTOR is responsible for the subcontractor compliance.

17.9 DRUG-FEE WORKPLACE:

17.9.1 The CITY requires all prospective CONTRACTORS to maintain a Drug-Free Workplace and have their Drug-Free Workplace policy posted in their offices and available for inspection by the CITY.

17.10 PUBLIC ENTITY CRIMES:

17.10.1 Pursuant to Florida Statutes § 287.133, as amended; a person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a Bid on a contract to provide any goods or services to a public entity, may not submit a Bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit Bids on leases of real property to a public entity, may not be awarded to perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity in excess of the threshold amount provided in Florida Statutes § 287.017 for CATEGORY TWO or higher for a period of thirty-six (36) months from the date of being placed on the convicted vendor list.

17.11 ASSIGNMENT:

17.11.1 This Contract nor any monies due hereunder, or any part thereof; shall not be assigned or transferred by CONTRACTOR without written consent of the party sought to be bound. The CITY shall not be liable to any assignee or transferee of the Contract or any monies due hereunder without the previous written consent of the CITY, to the assignment or transfer. The CITY shall not release or discharge CONTRACTOR from any obligation hereunder. The CITY shall not approve an assignment or transfer unless the Surety on the Contract Performance and Payment Bonds has informed the CITY in writing that it consents to the assignment or transfer.

17.12 VENUE:

17.12.1 This Contract shall be interpreted as a whole unit and section headings are for convenience only. All interpretations shall be governed by the laws of the State of Florida with venue lying in Palm Beach County, Florida.

17.13 FUNDING OUT:

17.13.1 It is necessary that fiscal funding out provisions be included in all Bids in which the terms are for periods longer than one year. Therefore, the following funding out provisions are an integral part of this Invitation to Bid and CONTRACTOR agrees that:

17.13.2 The CITY during the contract period may terminate or discontinue the items covered in this Bid for lack of appropriated funds upon the same terms and conditions.

17.13.3 Such prior written notice shall state that the lack of appropriated funds is the reason for termination.

17.14 CITY's PURCHASING CARD:

17.14.1 The CITY has authorized use of a Purchasing Card to expedite small dollar purchases for materials, supplies and other items needed for

daily operations. CONTRACTOR may be presented these Purchasing cards by authorized CITY personnel for the above mentioned purchases.

17.14.2 The CITY reserves the right to use the Purchasing Cards as an optional payment method to pay invoices for the project Work submitted by the CONTRACTOR.

17.15 DEBARMENT:

17.15.1 The CITY shall have the authority to debar a person/corporation/contractor for cause for consideration of award of future contacts. The debarment shall be for a period commensurate with the seriousness of the causes, generally not to exceed three (3) years. When the offense is willful or blatant, a longer term of debarment may be imposed, up to an indefinite period.

17.16 REQUIREMENTS FOR PERSONNEL ENTERING CITY PROPERTY:

17.16.1 Possession of firearms shall not be tolerated in or near CITY buildings. Nor shall violation of Federal, State and local laws and policies regarding Drug-Free Workplace be tolerated. Violators shall be subject to immediate termination.

17.16.2 "Firearm" means any weapon (including a starter gun or antique firearm) which is designed to, or may readily be converted to expel a projectile by the action of an explosive; the frame of receiver of any such weapon; any destructive device; or any machine gun.

17.16.3 No person who has a firearm in their vehicle may park their vehicle on CITY premises.

17.16.4 If any employee of CONTRACTOR or Sub-Contractor is found to have brought a firearm on CITY property, such employee must be terminated from the Project by the CONTRACTOR or Sub-Contractor. If the Sub-Contractor fails to terminate such employee, the Sub-Contractor's agreement with the CONTRACTOR for the CITY project shall be terminated. If the CONTRACTOR fails to terminate such employee or fails to terminate the agreement with the Sub-Contractor who fails to terminate such employee, the CONTRACTOR's agreement with the CITY shall be terminated.

17.17 PRODUCT RECALL:

17.17.1 In the event the CONTRACTOR receives notice that a product delivered by the CONTRACTOR to the CITY has been recalled, seized, or embargoed, and/or has been determined misbranded, adulterated, or found to be unfit for human consumption by a packer, processor, subcontractor, retailer, manufacturer, or by any state or federal regulatory agency, the CONTRACTOR shall notify the CITY's Procurement Services Division within two (2) business days of receiving such notice. The CITY's acceptance or failure to reject the affected product as non-conforming shall not in any way impact, negate, or diminish the CONTRACTOR's duty to notify the CITY, CONSULTANT and CITY's Procurement Services Division that the affected product has been recalled, seized or embargoed, and/or has been determined to be misbranded, adulterated, or found to be unfit for human consumption. The form and content of such notice to the CITY shall include the name and description of the affected product; the approximate date the affected product was delivered to the CITY; the bid number; and relevant information relating to the proper handling of the affected product and/or proper disposition of the affected product by the CITY, if necessary to protect the health, welfare, and safety of CITY employees, and any health hazards known to the CONTRACTOR which may be caused or created by the affected product.

17.17.2 The CONTRACTOR shall, at the option of the CITY's Procurement Services Division, either reimburse the purchase price or provide an equivalent replacement product at no additional cost to the CITY. The CONTRACTOR shall be responsible for removal and/or replacement of the affected product within the time specified by the CITY, without causing significant inconvenience to the CITY.

17.17.3 At the option of the CITY, the CONTRACTOR may be required to reimburse storage, disposal and/or handling fees to be calculated from time of delivery and acceptance to actual removal or disposal. The CONTRACTOR shall bear all costs associated with the removal and proper disposal of the affected product. The failure to reimburse the purchase price and storage and/or handling fees or to removal and/or replace the affected product with an equivalent replacement within the time specified by the CITY, without causing significant inconvenience to the CITY shall be considered a default of the Contract.

17.18 RIGHTS TO BID DOCUMENTS:

17.18.1 All copies and contents of any proposal, attachment, and explanation thereof submitted in response to this Invitation to Bid (except copyright material), shall become the property of the CITY of Boynton Beach. The CITY reserves the right to use, at its discretion, and in any manner it deems appropriate, any concept, idea, technique or suggestion contained therein. All copyright and industrial/commercial proprietary, confidential and/or privileged information such as financial records, must be clearly identified, as such confidentiality is protected until award of contract, in accordance with Florida Statutes, Chapter 119. Such material shall be returned to the Bidders prior to award of contract so as to preserve the proprietary and confidential nature of its contents.

17.19 SEVERABILITY:

17.19.1 Indulgence by the CITY on any non-compliance by the CONTRACTOR does not constitute a waiver of any rights under this Invitation to Bid. If any term or provision of this Bid or resulting Contract, or the application thereof to any person or circumstances shall to any extent be held invalid or unenforceable, the remainder of this Bid or Contract, or the application of such terms or provisions to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected, and every other term provision of this Bid/Contract shall be deemed valid and enforceable to the extent permitted by law.

17.20 VERIFICATION OF EMPLOYMENT STATUS:

17.20.1 The CITY shall not intentionally award publicly-funded contracts to any contractor who knowingly employs unauthorized immigrant workers, constituting a violation of the employment provisions contained in U.S. C. Section I324a(e) (Section274A9e) of the Immigration and Nationality Act (INA). The CITY shall consider the employment by any contractor of unauthorized aliens a violation by the recipient of the employment provisions contained in Section 274A(e) of the INA shall be grounds for unilateral cancellation of this Agreement by the CITY.

17.21 ABBREVIATIONS AND SYMBOLS:

17.21.1 Referenced Standards: Any reference to published specifications or standards of any organization or association shall comply with the requirements of the specifications or standards which is current on the date of Advertisement of Bids. In case of a conflict between the referenced specifications or standards, the one having the more stringent requirement shall govern.

17.21.2 In case of conflict between the referenced specifications or standards and the Contract Documents, the Contract Documents shall govern.

17.21.3 ABBREVIATIONS:

EMI	Electromagnetic Inference
ER	Equipment Room, Replacing "TR"
FMC	Flexible metallic conduit
FCC	Federal Communications Commission
FD	Floor Distributor (replacing network room, intermediate and horizontal cross-connect, and telecommunications as "building service" room identifiers). Also, Floor Drain as part of building plumbing system.
FDDI	Fiber Distribution Data Interface
FEXT	Far-End Crosstalk
FOTP	Fiber Optic Test Procedure
Freq	Frequency
GE	Ground equalizer (replacing TBBIBC)
Gnd	Ground
HB	Handbox, also hose bibb for water supply part of plumbing system
HC	Horizontal Cross-Connect (replaced by floor distributor "FD")
HH	Handhole
HVAC	Heating, Ventilation, and Air-Conditioning
Hz	Hertz
IC	Intermediate Cross-Connect (replaced by "BD" or "FD"
IEEE	Institute of Electrical and Electronics Engineers
IMC	Intermediate metal conduit
ISO	International Organization for Standardization
ISP	Inside Cable Plant
LFMC	Liquidtight flexible metal conduit
LFNC	Liquidtight flexible non-metallic conduit
Mbps	Megabits per second
MC	Main Cross-Connect (replaced by campus distributor "CD")
MDF	Main Distributor Frame (replaced by "CD" or "BD")
MER	Main Equipment Room
MH	Maintenance Hole
MHz	Megahertz
NBR	Acrylonitrile-butadiene rubber
NEC	National Electric Safety Code, C2-1997
NFPA	National Fire Protection Association
NDPES	National Pollutant Discharge Elimination Systems
NR	Network Room
OSHA	Occupational Safety and Health Administration
OCP	Outside Cable Plant
OTDR	Optical Time Domain Reflectometer
PR	Pair
RCDD®	Registered Communications Distribution Designer
RFI	Radio Frequency Interference
RH	Relative Humidity
RNC	Rigid nonmetallic conduit
SM	Single Mode
TBB	Telecommunication Bonding Backbone
TBBIBC	Telecommunication Bonding Backbone Interconnecting Bonding Conductor (replaced by ground equalizer "GE")
TE	Telephone Equipment (Wall Mounted Equipment Rack)
TGB	Telecommunications Grounding Buss Bar
TIA	Telecommunications Industry Association
TMGB	Telecommunications Main Grounding Buss Bar
TR	Telecommunications Room (being replaced with "ER")
UL	Underwriters Laboratory
UPS	Uninterruptible Power Supply
WAO	Work Area Outlet

SECTION 01000 - GENERAL REQUIREMENTS

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: The work to be done consists of the furnishing of all labor, materials and equipment, and the performance of all work included in this Contract. The summary of the Work is presented in Section SC01010: Summary of Project.

B. Work Included:

1. The Contractor shall furnish all labor, superintendence, materials, plant power, light, heat, fuel, water, tools, appliances, equipment, supplies, and means of construction necessary for proper performance and completion of the work. The Contractor shall perform and complete the work in the manner best calculated to promote rapid construction consistent with safety of life and property and to the satisfaction of the Consultant, and in strict accordance with the Contract Documents. The Contractor shall clean up the work and maintain it during and after construction, until accepted, and shall do all work and pay all costs incidental thereto. The CONTRACTOR shall repair or restore all structures and property that may be damaged or disturbed during performance of the work.

2. The cost of incidental work described in these Contract Requirements, for which there are no specific Contract Items, shall be considered as part of the general cost of doing the work and shall be included in the prices for the various Contract Items. No additional payment will be made aforementioned incidental work.

3. The Contractor shall provide and maintain such modern plant, tools, and equipment as may be necessary, in the opinion of the Consultant, to perform in a satisfactory and acceptable manner all the work required by this Contract. Only equipment of established reputation and proven efficiency shall be used. The Contractor shall be solely responsible for the adequacy of its workmanship, materials, and equipment.

1.02 CONTRACT DOCUMENTS

A. The Technical Specifications consist of three (3) parts: General, Products and Execution. The General part of a Specification contains General Requirements which govern the work. Products and Execution Parts modify and supplement the General Requirements by detailed requirements for the work and shall always govern whenever there appears to be a conflict.

B. Intent:

1. Work not specified in the Specifications, but involved in carrying out their intent or in the complete and proper execution of the work, is required and shall be performed by the Contractor as though it were specifically delineated or described.

2. The silence of the Specifications as to any detail, or the omission from them of a detailed description concerning any work to be done and materials to be furnished, shall be regarded as meaning that only the best general practice is to prevail and that only material and workmanship of the best quality is to be used, the interpretation of these Specifications shall be made upon that basis.

1.03 MATERIALS AND EQUIPMENT

A. Manufacturer:

1. All transactions with the manufacturers or subcontractors shall be through the Contractor.

2. Any two (2) or more pieces of material or equipment of the same kind, type or classification, and being used for identical types of service, shall be made by the same manufacturer.

B. Delivery:

1. The Contractor shall deliver materials in ample quantities to insure the most speedy and uninterrupted progress of the work so as to complete the work within the allotted time.

2. The Contractor shall also coordinate deliveries in order to avoid delay in, or impediment of, the progress of the work of any related Contractor.

1.04 INSPECTION AND TESTING

A. General:

1. For tests specified to be made by the Contractor, the testing personnel shall make the necessary inspections and tests and the reports thereof shall be in such form as will facilitate checking to determine compliance with the Contract Documents. Five (5) copies of the reports shall be submitted and authoritative certification thereof must be furnished to the Consultant as a prerequisite for the acceptance of any material or equipment.

2. If, in the making of any test of any material or equipment, it is ascertained by the Consultant that the material or equipment does not comply with the Contract Documents, the Contractor will be notified thereof and he will be directed to refrain from delivering said material or equipment, or to remove it promptly from the site or from the work and replace it with acceptable

material, without cost to the CITY.

3. Tests of electrical and mechanical equipment and appliances shall be conducted in accordance with the recognized federal, state and local law test codes and manufacturer recommendation.

B. Costs:

1. All inspection and testing of materials furnished under this Contract will be provided by the Contractor, unless otherwise expressly specified.

2. Materials and equipment submitted by the Contractor as the equivalent to those specifically named in the Contract may be tested by the CITY for compliance. The Contractor shall reimburse the CITY for the expenditures incurred in making such tests of materials and equipment which are rejected for non-compliance.

C. Certificate of Manufacture:

1. Contractor shall furnish Consultant authoritative evidence in the form of Certificate of Manufacture that the materials to be used in the work have been manufactured and tested in conformity with the Contract Documents upon Project completion.

2. These certificates shall be notarized and shall include copies of the results of physical tests and chemical analyses, where necessary, that have been made directly on the product or on similar products of the manufacturer.

D. Start up Tests

1. As soon as conditions permit, the Contractor shall furnish all labor, materials, and instruments and shall make start-up tests of equipment.

2. If the start-up tests disclose any equipment furnished under this Contract which does not comply with the requirements of the Contract Documents, the Contractor shall, prior to demonstration tests, make all changes, adjustments and replacements required. The furnishing Contractor shall assist in the start-up tests as applicable.

1.05 CARE AND PROTECTION OF PROPERTY

The Contractor shall be responsible for the preservation of all public and private property, and shall use every precaution necessary to prevent damage thereto. If any direct or indirect damage is done to public or private property by or on account of any act, omission, neglect, or misconduct in the execution of the work on the part of the Contractor, such property shall be restored by the contractor, at his expense, to a condition similar or equal to that existing before the damage was done, or he shall make good the damage in other manner acceptable to the Consultant.

1.06 MEASUREMENT AND PAYMENT

Payments will be made on completion of each phase of the Work and acceptance by the CITY shall be made pursuant to this Contract.

1.07 WORKING HOURS:

1. Working on this Contract shall be conducted during normal working hours (7:00 AM to 5:00 PM) on weekdays. Unless otherwise authorized in writing by the Project Manager, no work shall be performed on weekends, on City observed holidays or between 5:00 PM and 7:00 AM on weekdays.

2. Construction observation and/or inspection services needed beyond normal working hours as defined above, shall be paid for by the Contractor at an hourly rate of $100.00 for each inspector providing such services.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01010 - SUMMARY OF PROJECT

PART 1 – GENERAL
(Also refer to Division 1 – Summary (011000)

1.01 WORK COVERED BY CONTRACT DOCUMENTS/REQUIREMENTS INCLUDED

A. The work under this project consists of: The project consists of the interior renovation/ improvements to the existing Water Quality Lab and other areas of the building, including structural, mechanical, electrical, and plumbing work as indicated in the drawings.

B. Omission of a specific item or component of a system obviously necessary for the proper functioning of the equipment or system shall not relieve the Contractor of the responsibility of furnishing the item as part of the work at no additional expense to the Owner.

C. Except as specifically noted elsewhere, Contractor(s) shall provide and pay for all labor, materials, equipment, tools, construction equipment and machinery, transportation, water, heat, utilities, and temporary facilities necessary for the proper execution and completion of work.

1.02 RELATED REQUIREMENTS

A. Section SC01025: Measurement and Payment

B. Construction Facilities and Temporary Controls: Section SC01500

C. Restoration of Surface Improvements: Section SC02960

1.03 CONTRACTS

A. Construct the Work in accordance with Section SC01025: Measurement and Payment Procedures.

1.04 CONTRACTOR'S USE OF SITE/PREMISES

A. Contractor shall limit their use of the premises for Work and storage, to the areas designated.

B. Coordinate use of premise under direction of CITY and/or Consultant.

C. Assume full responsibility for the protection and safekeeping of Products under this Contract, stored on the site.

D. Move any stored Products, under Contractor's control, which interfere with operations of the CITY, other contractors or the general public.

1.05 SAFETY AND OSHA COMPLIANCE

A. The Contractor shall comply in all respects with all Federal, State and Local safety and health regulations. Copies of the Federal regulations may be obtained from the U.S. Department of Labor, Occupation Safety and Health Administration (OSHA), Washington, DC 20210 or their regional offices.

B. The Contractor shall comply in all respects with the applicable Workman's Compensation Laws.

PART 2 – PRODUCTS

2.1 All materials are to be ***MADE IN THE UNITED STATES OF AMERICA***. Allowable exceptions are ductile iron fittings supplied by American Cast Iron Pipe Company from Brazil, Sigma Corporation from China, and Star-Pipe Products from the United States and China, and Tyler Union from the United States and China; and Electronic Marking System (EMS) full-range makers by 3M from Mexico.

2.2 SALVAGED MATERIALS

In the absence of special provisions to the Contract, salvaged materials, equipment or supplies that occur are the property of the CITY and shall be cleaned, stored and delivered to the CITY as directed by the CITY's Project Manager.

2.3 CERTIFIED CHEMICALS

The Contractor shall use U.S. Department of Agriculture certified chemicals only during performance of all work under this contract. All chemicals used during project construction or furnished for project whether herbicide, pesticide, disinfectant, polymer, reactant or other classification, must show approval of either EPA or USDA and be accompanied by an MSDS. Use of all such chemicals and disposal of residue shall be in strict conformance with manufacturer's instructions.

PART 3 – EXECUTION

3.1 CONTRACTOR SUPERVISION

A. As required by the Contract Documents, the Contractor's Project Representative (Superintendent) shall be on site at all times and actively engaged in controlling and coordinating all on site project activities including direction and oversight of self-performed and subcontractor work activities.

B. The Superintendent/Contractor's Project Representative shall have the full authority to receive instructions to execute the orders or directions of the CITY and Consultant.

3.2 GENERAL

A. The Contractor shall, prior to entering any section, prepare Pre-Construction video and digital photographs, in accordance with Section 01390 VIDEO SITE SURVEY, of each applicable property/ area and Right-of-Way (ROW) areas to determine existing site

conditions. Together the video and photographs will provide the basis for the condition of restoration required in Section 02960 RESTORATION OF SURFACE IMPROVEMENTS.

D. The Contractor shall not start major construction activities, just prior to extended holiday periods such as the typical week taken off at the end of each year.

END OF SECTION

SECTION 01025 - MEASUREMENT AND PAYMENT PROCEDURES

PART 1 GENERAL

1.01 GENERAL

A. The Contractor shall receive and accept the compensation provided in the Bid and the Contract as full payment for furnishing all materials, labor, tools and equipment, for performing all operations necessary to complete the work under the Contract, and also in full payment for all loss or damages arising from the nature of the work, or from the action of the elements or from any unforeseen difficulties which may be encountered during the prosecution of the work until the final acceptance by the CITY.

B. The prices stated in the Bid include all costs and expenses for taxes, labor, equipment, materials, commissions, transportation charges and expenses, patent fees and royalties, labor for handling materials during inspection, together with any and all other costs and expenses for performing and completing the work as shown on the Drawings and specified herein.

C. The Contractor's attention is again called to the fact that the quotations for the various items of work are intended to establish a total price for completing the work in its entirety. Should the Contractor feel that the cost for any item of work has not been established by the Bid Form or Payment Items, he shall include the cost for that work in some other applicable bid item, so that his proposal for the project does reflect his total price for completing the work in its entirety.

1.04 RELATED SECTIONS:

A. Applications for Payments: Section SC01027

B. Shop Drawings, Working Drawings, and Samples – Section SC01340

C. Schedule of Values: Section SC01370

D. Change Order Procedures: Section SC01153

E. Quality Requirements: Section SC01400

F. Record Drawing Requirements – Section SC01705

1.05 ALLOWANCES

A. Section includes administrative and procedural requirements governing allowances.

B. Section includes administrative and procedural requirements governing allowances.

1. Certain items are specified in the Contract Documents by allowances. Allowances have been established in lieu of additional requirements and to defer selection of actual materials and equipment to a later date when direction will be provided to Contractor. If necessary, additional requirements will be issued by Change Order.

C. Types of allowances include the following:

1. Lump-sum allowances.

D. LUMP-SUM ALLOWANCES

1. Allowance shall include cost to Contractor of specific products and materials ordered by Owner or selected by Architect under allowance and shall include taxes, freight and delivery to Project site.

2. Unless otherwise indicated, Contractor's costs for receiving and handling at Project site, labor, installation, overhead and profit, and similar costs related to products and materials

ordered by Owner and selected by Architect under allowance shall be included as part of the Contract Sum and not part of the allowance.

3. Unused Materials: Return unused materials purchased under an allowance to manufacturer or supplier for credit to Owner, after installation has been completed and accepted.

   - If requested by Architect, retain and prepare unused material for storage by Owner. Deliver unused material to Owner's storage space as directed.

4. Allowances where drawings/ documents defining scope of work are not issued as part of the bid documents, once drawings/ documents are issued, the Contractor shall provide 3 separate bids per discipline for Owner's review and selection prior to commencing with work and use of allowance. Contractor to provide any additional back-up documentation requested by the Owner for substantiation of costs.

E. ADJUSTMENT OF ALLOWANCES

1. Allowance Adjustment: To adjust allowance amounts, prepare a Change Order proposal based on the difference between purchase amount and the allowance, multiplied by final measurement of work-in-place where applicable. If applicable, include reasonable allowances for cutting losses, tolerances, mixing wastes, normal product imperfections, and similar margins.

   - Include installation costs in purchase amount only where indicated as part of the allowance.

   - If requested, prepare explanation and documentation to substantiate distribution of overhead costs and other margins claimed

   - Submit substantiation of a change in scope of work, if any, claimed in Change Orders related to unit-cost allowances.

   - Owner reserves the right to establish the quantity of work-in-place by independent quantity survey, measure, or count.

F. SCHEDULE OF ALLOWANCES

1. Allowance No. 1: Lump Sum Allowance: Include a Lump Sum Allowance of $50,000.00 for permit fees reimbursement. Re-inspection or re-review fees are not covered under this allowance. Re-inspection / re-review fees shall be the responsibility of the contractor

1.06 SCHEDULE OF VALUES

A. Submit Schedule of Values at the Pre-Construction Meeting.

B. The Schedule of Values shall be a computer generated original. When the Contractor's proposed Schedule of Values is accepted by the CITY, it shall become the basis for the Application for Payment.

C. Contractor shall only revise the accepted Schedule of Values to identify, as separate line items approved on a Field Order or Change Order. The CITY may issue a Field Order substituting or modifying Schedule of Value items.

1.07 APPLICATIONS FOR PAYMENT

A. Refer to Section SC01027 – APPLICATIONS FOR PAYMENT

B. Submit one (1) original Application for Payment (AFP) for review, authorization and processing.

G. Content and Format: Utilize Schedule of Values for listing items in Application for Payment outlining the following:

1. Provide a column for each of the following:

a. Item Number

b. Item Description

c. Quantity

d. Unit of measurement

e. Scheduled Value

f. Change Orders

g. Work Completed:
1. Previous Period (Quantity and Value)
2. This Period (Quantity and Value)

h. To Date (Quantity and Value)

i. Percentage of Completion

j. Balance to Finish

k. Retainage

NOTE: There is no column for "Materials Stored", the CITY does not pay for items ordered and/or stored on site. As defined later in this Section, payment for pay items are paid for once the item is installed, measured in place, completed and accepted.

H. Include one (1) set of progress photographs with each Application for Payment. Refer to the Contract Documents, specifically Section SC01380 CONSTRUCTION PHOTOGRAPHS for specific details and requirements.

I. Application for Final Payment must be marked FINAL. Contractor must include in the FINAL AFP package, proof of completion of all project close out requirements.

1.08 MEASUREMENT OF AND PAYMENT FOR WORK

A. **Monthly Payments to the Contractor.** The Contractor shall plan its work for construction on the basis of twelve (12) monthly pay periods per year. So long as the work is prosecuted in compliance with the provisions of the Contract, the Contractor will, on or about the last day of the pay period, make an approximate estimate, in writing on a form approved by the CITY of the proportionate value of the work done, items, and locations of the work performed up to and including the last day of the period then ending. The CONSULTANT will then review such estimate and make the necessary recommendations to the Contractor for revision. The Contractor shall revise the Application for Payment and resubmit to the CONSULTANT for review and Certification. **Redlined Applications for Payment will not be accepted by the CITY.** If the Contractor and the CONSULTANT do not agree on the approximate estimate of the proportionate value of the work done for any pay period, the determination of the CONSULTANT shall be binding. The amount of such estimate after deducting ten percent (10%) and all previous payments, shall be due and payable to the Contractor in accordance with the Florida Prompt Payment Act, §218.70 Florida Statutes, as may be amended from time to time.

B. Substantiating Data: When the CONSULTANT requires substantiating information, Contractor shall submit data justifying quantities and dollar amounts in question. Contractor shall provide three (3) copies of data with cover letter for each copy of submittal showing application number and date, and line item by number and description.

1.09 MEASUREMENT AND PAYMENT - LUMP SUM PRICES

A. Measurement methods delineated in individual specification sections complement criteria of this section. In event of conflict, requirements of individual specification section govern.
1. Contractor shall be responsible for determining and verifying all quantities.

General

A. Mobilization/Demobilization, Bonds & Insurance, As-Built Record Drawings – Bid Item No. 1 - 2

1. Payment for the General Conditions shall be based on a percentage of the Lump Sum Price. This payment shall be considered as full compensation for preparatory work and operations involved in mobilizing and demobilizing the project. This includes, but is not limited to, operations necessary for the transportation of personnel, equipment, supplies, and incidentals to and from the project site. It also includes the establishment of temporary offices/field trailers, buildings, safety equipment, sanitary and other facilities, and compliance with permit conditions for permits secured by either the Owner or Contractor. This pay item will include all General Requirements not listed as separate items. The cost of bonds, required insurance, permits, and any other pre-construction expenses necessary for the start of the work, such as preparation and maintenance of as-built record drawings as specified in technical specification SC01340 SHOP DRAWINGS, WORK DRAWINGS AND SAMPLES and the requirements of this Special Conditions, will also be included in the General Conditions.

2. Indemnification - Consideration for Indemnification – Payment under this item is in accordance with the Front-End Contract Documents.

B. Selective Demolition - Bid Item No. 3 - 9

3. Demolition of existing elevator cab finishes – see plans
4. Demolition of existing partitions – see plans
5. Demolition of existing floors, wall and ceiling finishes – see plans
6. Removal of existing light fixtures – see plans
7. Removal of existing plumbing fixtures in laboratories, lunch room and second floor restroom – see plans
8. Removal of existing stair railings and finishes – see plans
9. Removal of existing equipment – see plans.

C. Concrete - Bid Item No. 10

10. Installation of concrete work – see plans

D. Structural Steel - Bid Item No. 11

11. Installation of structural steel work for roof top equipment – see plans

E. Miscellaneous Metals - Bid Item No.

12

12. Installation of new stair railings and miscellaneous metal.

F. Finish Carpentry - Bid Item No. 13

13. Installation of finish carpentry work – see plans

G. Architectural woodwork - Bid Item No. 14

14. Installation of new base cabinets, upper cabinets, counter tops, etc. – see plans

H. Thermal Insulation - Bid Item No. 15

15. Installation of wall and ceiling insulation – see plans

I. Membrane Roofing - Bid Item No. 16

16. Patch and repair existing roof due to removal and addition of roof top equipment – see plans.

J. Doors and Frames – Bid Item No. 17

17. Installation of doors, frames and hardware – see plans

K. Plaster and Drywall - Bid Item No. 18 - 19

18. F & I gypsum board, studs, furring, backboard, etc. and finish per plans.
19. Patch and repair existing partitions walls and ceilings due to renovations – see plans.

L. Acoustical panel ceilings - Bid item No. 20

20. F & I ceiling grid and tiles per plans.

M. Resilient Flooring and Carpet - Bid item No. 21

21. Installation of flooring and base finishes – see plans

N. Tile and Terrazzo - Bid Item No. 22

22. Installation of floor / wall tile finishes and base – see plans

O. Paint and Wall Covering - Bid Item No. 23 - 25

23. Installation of ceiling and wall coatings – see plans.
24. Doors/ frames and trim paint coatings - see plans
25. Repair/ repainting of existing wall partitions – see plans

P. Signage - Bid Item No. 26

26. F & I typical room signage - see plans

Q. Toilet and Bath accessories - Bid Item No. 27

27. F & I restroom accessories - see plans

R. Equipment - Bid Item No. 28

28. F & I Equipment – see plans.

S. Elevator Finishes - Bid Item No. 29

29. F & I elevator cab finishes – see plans.

T. Plumbing - Bid Item No. 30 - 34

30. F & I restroom plumbing fixtures – see plans
31. F & I laboratory plumbing

fixtures – see plans

32. F & I Emergency eyewash/ shower fixture – see plans
33. F & I drinking fountain – see plans
34. F & I acid waste and gas lines – see plans

U. HVAC - Bid item No. 35 - 36

35. F & I Diffusers, grilles, ductwork, new HVAC equipment, etc. for new system – see plans.
36. F & I new hood system – see plans

V. Electrical - Bid Item No. 37

37. Installation of electrical work – see plans.

W. Access control - Bid Item No. 38

38. Access control requirements per openings – see plans.

X. Fire Alarm System - Bid Item No. 39

39. Upgrades/ improvements to fire alarm system -see plans.

Y. Specialties - Bid Item No. 40 - 41

40. Installation of fire extinguishers/ cabinets - see plans
41. Fire caulking and patching – see plans

PART 2 PRODUCTS (NOT USED)

PART 3 EXECUTION (NOT USED)

** SPECIAL NOTE:*

The CITY retains the option to utilize up to 20% of the excess material from excavation and trenching operations. If the CITY exercises this option, Contractor shall stockpile the excess material and deliver to the CITY's facility as directed by the CITY's Representative.

END OF SECTION

SECTION 01027 - APPLICATIONS FOR PAYMENTS

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: Submit Applications for Payment to the CONSULTANT in accordance with schedule established by Conditions of the Contract and Agreement between CITY and Contractor.

B. Related requirements described elsewhere:

1. Agreement:

2. Application for Payment Form.

3. Progress Schedules: Section SC01310.

4. Schedule of Values: Section SC01370

5. Construction Photographs: Section SC01380.

6. Contract Closeout: Section SC01700.

7. Project Record Documents: Section SC01720.

1.02 FORMAT REQUIRED

A. Submit applications typed on form acceptable to CITY, Documents (Application for Payment Form), with itemized data typed on 8-1/2 inch x 11 inch or 8-1/2 inch x 14-inch white paper continuation sheets.

1.03 PREPARATION OF APPLICATION FOR EACH PROGRESS PAYMENT

A. Application Form:

1. Fill in required information, including that for Change Orders executed prior to date of submittal of application.

2. Fill in percent complete for each activity and dollar value to agree with respective percents.

3. Execute certification with signature of a responsible officer of Contract firm.

B. Continuation Sheets:

1. Fill in total list of all scheduled component items of work, with item number and scheduled dollar value for each item.

2. Fill in dollar value in each column for each scheduled line item when work has been performed. Round off values to nearest dollar, or as specified for Schedule of Values.

3. List each Change Order executed prior to date of submission, at the end of the continuation sheets. List by Change Order Number, and description, as for an original component item of work.

4. As provided for in the "Application for Payment" form, the Contractor shall certify, for each current pay request, that all previous progress payments received from the CITY, under this Contract, have been applied by the Contractor to discharge in full all obligations of the Contractor in connection with Work covered by prior Applications for Payment, and all materials and equipment incorporated into the Work are free and clear of all liens, claims, security interest and encum¬brances. Contractor shall attach to each Application for Payment like affidavits by all subcontractors.

1.04 SUBSTANTIATING DATA FOR PROGRESS PAYMENTS

A. Contractor shall submit suitable information, with a cover letter identifying:

1. Project.
2. Application number and date.
3. Detailed list of enclosures.

B. Submit one (1) copy of data and cover letter for each copy of application.

C. The Contractor is to maintain an updated set of drawings to be used as record drawings in accordance with Section SC01720: Project Record Documents. As a prerequisite for monthly progress payments, the Contractor is to submit the updated record drawings for review by the CITY and the CONSULTANT.

D. Each monthly application for payment shall incorporate the corresponding "monthly progress status report" prepared per the requirements of Section SC01310: Progress Schedules.

E. Contractor shall submit a duly executed

letter from surety consenting to payment due and progress to date.

F. Provide construction photographs in accordance with Section SC01380: Construction Photographs.

1.05 PROGRESS PAYMENT PROCEDURES

A. The Contractor will prepare and submit one (1) original monthly invoice for work completed during the one-month period. Application for Payment shall be submitted in the format of the sample form provided by the CITY. All information must be completed for the pay application to be accepted. CITY's purchase order number for the project must be placed on each application. The Application for Payment must be submitted at least three (3) days in advance in an electronic format for review by the CITY and CONSULTANT for approval. Redlined Applications for Payment will not be accepted by the CITY.

B. If the Application for Payment and support data are not approved, the Contractor is required to submit new, revised or missing information according to the CONSULTANT's instructions. Otherwise, the Contractor shall prepare and submit to the CITY or CONSULTANT an invoice in accordance with the estimate as approved. CITY will pay Contractor, in accordance with Florida Prompt Payment Act, §218.70, Florida Statutes, as may be amended from time to time.

C. Each Application For Payment shall be accompanied by an updated project schedule (three-week ahead schedule) along with the Construction/Progress photographs and Project Record Drawings in accordance with Section SC01720: PROJECT RECORD DOCUMENTS and SC01380: CONSTRUCTION PHOTOGRAPHS or as directed by the CITY. Any Application For Payment that is received without these items will be returned to the Contractor without review.

D. The Contractor shall prepare a schedule of values by phases of work to show a breakdown of the Contract Sum corresponding to the payment request breakdown and progress schedule line items. The schedule of values must also show dollar value for each unit of work scheduled. Approved Change Order items shall be added as separate line items.

E. Prior to initial payment request, the Contractor shall submit the following documents to the CITY and Consultant for their review and approval:

1. List of principle subcontractors and suppliers.

2. Schedule of values.

3. Shop drawing log.

4. Project schedule.

1.06 PREPARATION OF APPLICATION FOR FINAL PAYMENT

A. Fill in Application form as specified for progress payments. Provide information as required by the General Conditions and Section SC01700: Contract Closeout.

B. Furnish evidence of completed operations insurance in accordance with the General Conditions.

C. Provide Final Release of Lien and other closeout submittals as required by the General Conditions.

1.07 SUBMITTAL PROCEDURES

A. Submit Applications for Payment to the CITY at the time stipulated in the Agreement. Review the percents complete with the CONSULTANT and resolve any conflicts or discrepancies.

B. Number of copies for each Final Application for Payment:

1. CITY: One (1) copy.

2. CONSULTANT: One (1) copy

C. When the CONSULTANT finds Application properly completed and correct, it will transmit the certificate for payment to the CITY, with copy for the Contractor.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.01 Upon receipt by CONSULTANT and CITY of Contractor's written Notice of Final Completion of its work under this Contract, CONSULTANT and CITY shall verify all work has been completed on the project. When all work has been verified as complete, and the Contractor submits the items listed below, the Contractor may submit a final Application for Payment:

A. Complete work listed as incomplete at the time of Substantial Completion and

obtain CONSULTANT certification of completed Work.

B. Provide copy of records indicating notification to all subcontractors and material suppliers of Contractor's Performance and Payment Bonds.

C. Transfer operational, access, security and similar provisions to CITY; remove temporary facilities, tools and similar items.

END OF SECTION

SECTION 01041 - PROJECT COORDINATION

PART I – GENERAL

1.01 REQUIREMENTS INCLUDED

A. The Contractor shall:

1. Coordinate work of its employees and subcontractors.

2. Expedite its work to assure compliance with schedules.

3. Coordinate its work with that of work by CITY.

4. Comply with orders and instructions of CONSULTANT.

1.02 RELATED REQUIREMENTS

A. Section SC01010: Summary of Project.

B. Section SC01027: Applications for Payment.

C. Section SC01200: Project Meetings.

D. Section SC01310: Progress Schedules.

E. Section SC01340: Shop Drawings, Work Drawings and Samples.

F. Section SC01500: Construction Facilities and Temporary Controls.

G. Section SC01700: Contract Closeout.

1.03 CONSTRUCTION ORGANIZATION & START-UP

A. CONSULTANT shall establish on-site lines of authority and communications:

1. Schedule and conduct pre-construction meeting and progress meetings as specified in Section SC01200: PROJECT MEETINGS.

2. Establish procedure for:

a. Submittals

b. Reports and records

c. Recommendations

d. Coordination of drawings

e. Schedules

f. Resolution of conflicts

3. Interpret Contract Documents:

a. Transmit written interpretations to Contractor, and to other concerned parties.

4. Assist in Obtaining permits and approvals:

a. Verify that Contractor and subcontractors have obtained inspections for Work and for temporary facilities.

5. Control the use of Site:

a. Allocate space for Contractor's use for field offices, sheds, and work and storage areas.

6. Inspection and Testing:

a. Inspect work to assure performance in accord with requirements of Contract Documents.

b. Administer special testing and inspections of suspect Work.

c. Reject Work, which does not comply with requirements of Contract Documents.

d. Coordinate Testing Laboratory Services:

1. Verify that required laboratory personnel are present.

2. Verify that tests are made in accordance with specified standards.

3. Review test reports for compliance with specified criteria.

4. Recommend and administer any required re-testing.

1.04 CONTRACTOR'S DUTIES

A. Construction Schedules:

1. Prepare a detailed schedule of basic operations.

2. Monitor schedules as work progresses:

a. Identify potential variances between scheduled and probable completion dates for each phase.

b. Recommend to CITY adjustments in schedule to meet required completion dates.

c. Document changes in schedule; submit to CITY, CONSULTANT and to involved subcontractors.

3. Observe work of each subcontractor to monitor compliance with schedule.

a. Verify that labor and equipment are adequate for the work and the schedule.

b. Verify that product procurement schedules are adequate.

c. Verify that product deliveries are adequate to maintain schedule.

d. Report noncompliance to CONSULTANT, with recommendation for changes.

B. Process Shop Drawings, Product Data and Samples:

1. Prior to submittal to CONSULTANT, review for compliance with Contract Documents:

a. Field dimensions and clearance dimensions.

b. Relation to available space.

c. Effect of any changes on the work of any subcontractor.

A. Review Drawings prepared by Mechanical and Electrical subcontractors:

1. Prior to submittal to CONSULTANT, review for compliance with Contract Documents:

B. Prepare Coordination Drawings as required to resolve conflicts and to assure coordination of the work of, or affected by, mechanical and electrical trades, or by special equipment requirements.

1. Submit to CONSULTANT.

2. Reproduce and distribute copies to concerned parties after CONSULTANT review.

C. Maintain reports and records at job site, available to CONSULTANT and CITY.

1. Daily log of progress of work.

2. Records.

a. Contracts.

b. Purchase orders.

c. Materials and equipment records.

d. Applicable handbooks, codes and standards.

3. Maintain file of record documents.

1.05 CONTRACTOR'S CLOSE-OUT DUTIES

A. Mechanical and Electrical equipment start-up:

1. Coordinate checkout of utilities, operational systems and equipment.

2. Organize initial start-up and testing.

3. Record dates of start of operation of systems and equipment.

4. Submit to CITY written notice of beginning of warranty period for equipment put into service.

B. At completion of Work, conduct an inspection to assure that:

1. Specified cleaning has been accomplished.

2. Temporary facilities have been removed from site.

C. Substantial Completion:

1. Conduct an inspection to develop a list of Work to be completed or corrected.

2. Assist CONSULTANT in inspection.

3. Supervise correction and completion of work of subcontractors.

1.06 CONSULTANT'S CLOSE-OUT DUTIES

A. Final Completion:

1. When Contractor determines that work is finally complete, conduct an inspection to verify completion of Work.

B. Administration of Contract closeout:

1. Receive and review Contractor's final submittals.

2. Transmit to CITY with recommendations for action.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01065 - PERMITS AND FEES

PART 1 – GENERAL

A. The Contractor shall obtain all permits and licenses related to its work, including but not limited to, the necessary construction permits. Cost of permit fees shall be paid by Contractor. CITY to be invoiced at actual cost without markup.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION

END OF SECTION

SECTION 01070 - ABBREVIATIONS AND SYMBOLS

PART 1 - GENERAL

1.01 STANDARDS AND ABBREVIATIONS

A. Referenced Standards: Any reference to published specifications or standards of any organization or association shall comply with the requirements of the specification or standard which is current on the date of Advertisement for Bids. In case of a conflict between the referenced specifications or standards, the one having the more stringent requirements shall govern.

B. In case of conflict between the referenced specifications or standards and the Contract Documents, the Contract Documents shall govern.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01091 - REFERENCE SPECIFICATIONS

PART 1 - GENERAL

1.01 GENERAL

A. Applicable Publications. Whenever in these Specifications references are made to published specifications, codes, standards, or other requirements, it shall be understood that wherever no date is specified, only the latest speci¬fications, standards, or requirements of the respective issuing agencies which have been published as of the date that the Work is advertised for bids, shall apply; except to the extent that such standards or requirements may be in conflict with applicable federal, state and local laws, ordinances, or governing codes. No requirements set forth herein or shown on the Drawings shall be waived because of any provision of or omission from such standards or requirements.

B. Assignment of Specialists. In certain instances, the Specifications require (or imply) that specific Work is to be assigned to specialist or expert entities who must be engaged for the performance of the Work. Such assignments shall be recognized as special requirements over which the Contractor has no choice or option. These requirements shall not be interpreted so as to conflict with the enforcement of building codes and similar regulations governing the Work. These requirements are not intended to interfere with local union jurisdiction settlements and similar conventions. Such assignments are intended to establish which party or entity involved in a specific unit of Work is recognized as "expert" for the indicated construction processes or operations. Nevertheless, the final responsibility for fulfillment of the entire set of contract requirements remains with the Contractor.

1.02 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Without limiting the generality of other requirements of the Specifications, all Work specified herein shall conform to, or exceed, the requirements of such documents and are not in conflict with the requirements of these Specifications or applicable codes.

B. References herein to "Building Code" shall mean the Florida Building Code, or the approved building code which replaces it. The latest edition of the code as adopted by the CITY as of the date of award as adopted by the Local Public Agency having jurisdiction shall apply to the Work herein, including all addenda, modifications, amendments, or other lawful changes thereto.

C. In case of conflict between codes, reference standards, drawings, and the other Contract Documents, the most stringent requirements shall govern. All conflicts shall be brought to the attention of the CONSULTANT for clarification and directions prior to ordering or providing any materials or labor. The Contractor shall bid the most stringent requirements.

D. Applicable Standard Specifications. The Contractor shall construct the Work specified herein in accordance with the requirements of the Contract Documents and the referenced portions of those referenced codes, standards, and Specifications listed.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01153 - CHANGE ORDER PROCEDURES

PART 1 – GENERAL

1.01 SCOPE:

A. The CITY, without invalidating the Contract, may make adjustments to bid item quantities by adding to or deducting from the quantities on the Schedule of Bid Items, as the Work progresses. These adjustments shall be in accordance with the unit or line item price set forth on the Schedule of Bid Items and are tracked as Work progresses, and approved on the monthly Application for Payment form.

1.02 REQUIREMENTS INCLUDED

A. Promptly implement Change Order procedures.

1. Provide full written data required to evaluate change.

2. Maintain detailed records of work done on a time and material/force account basis.

3. Provide full documentation to CONSULTANT on request.

B. Designate in writing the member of Contractor's organization.

1. Who is authorized to accept changes in the Work.

2. Who is responsible for informing others in the Contractor's employ the authorization of changes in the Work.

C. CITY will designate in writing the person who is authorized to execute Change Orders.

1.03 RELATED REQUIREMENTS

A. Bid Form.

B. Agreement.

C. General Conditions.

D. Supplementary Conditions.

E. Section SC01027: Applications for Payments.

F. Section SC01310: Progress Schedules.

G. Section SC01370: Schedule of Values.

H. Section SC01630: Substitutions and Product Options.

I. Section SC01700: Contract Closeout.

1.04 DEFINITIONS

A. Change Order: See General Conditions.

B. Construction Change Authorization: A written order to the Contractor, signed by CITY and CONSULTANT, which amends the Contract Documents as described, and authorizes Contractor to proceed with a change that affects the Contract Sum or the Contract Time, for inclusion in a subsequent Change Order.

C. Field Order: A written order, instructions, or interpretations, signed by CONSULTANT making minor changes in the Work not involving a change in Contract Sum or Contract Time.

1.05 PRELIMINARY PROCEDURES

A. CONSULTANT may initiate changes by submitting a Proposal Request to Contractor. Request will include:

1. Detailed description of the change, products, and location of the change in the Project.

2. Supplementary or revised Drawings and Specifications.

3. The projected time span for making the change, and a specific statement as to whether overtime work is, or is not, authorized.

4. A specific period of time during which the requested price will be considered valid.

5. Such request is for information only, and is not an instruction to execute the changes, nor to stop work in progress.

B. Contractor may initiate changes by submitting a written notice to Consultant containing:

1. Description of the proposed changes.

2. Statement of the reason for making the changes.

3. Statement of the effect on the Contract Sum and the Contract Time.

4. Statement of the effect on the Work of separate contractors.

5. Documentation supporting any change in Contract Sum or Contract Time, as appropriate.

1.06 CONSTRUCTION-CHANGE AUTHORIZATION

A. In lieu of Proposal Request, CONSULTANT may issue a construction change authorization for Contractor to proceed with a change for subsequent inclusion in a Change Order.

B. Authorization will describe changes in the Work, both additions and deletions, with attachments of revised Contract Documents to define details of the change, and will designate the method of determining any change in the Contract Sum and any change in Contract Time.

C. CITY and CONSULTANT will sign and date the Construction Change Authorization as authorization for the Contractor to proceed with the changes.

D. Contractor shall sign and date the Construction Change Authorization to indicate agreement with the terms therein.

1.07 DOCUMENTATION OF PROPOSALS AND CLAIMS

A. Support each quotation for a lump-sum proposal, and for each unit price which has not previously been established, with sufficient substantiating data to allow CONSULTANT to evaluate the quotation.

B. On request provide additional data to support time and cost computations:

1. Labor required.

2. Equipment required.

3. Products required.

a. Recommended sources of purchase and unit cost.

b. Quantities required.

4. Taxes, insurance, and bonds.

5. Credit for work deleted from Contract, similarly documented.

6. Overhead and profit.

7. Justification for any change in Contract Time.

C. Support each claim for additional costs, and for work done on a time-and-material/force account basis, with documentation as required for a lump-sum proposal, plus additional information:

1. Name of CITY's authorized agent who ordered the work, and the date of the order.

2. Dates and times work was performed, and by whom.

3. Time record, summary of hours worked, and hourly rates paid.

4. Receipts and invoices for:

a. Equipment used, listing dates and times of use.

b. Products used, listing of quantities.

c. Subcontractors.

D. Document requests for substitutions for products as specified in Section SC01630.

1.08 PREPARATION OF CHANGE ORDERS

A. CONSULTANT will initiate each Change Order.

B. Change Order will describe changes in the Work, both additions and deletions, with attachments of revised Contract Documents to define details of the change.

C. Change Order will provide an accounting of the adjustment in the Contract Sum and in the Contract Time.

1.09 LUMP-SUM/FIXED PRICE CHANGE ORDER

A. Content of Change Orders will be based on, either:

1. CONSULTANT's Proposal Request and Contractor's Responsive Proposal as mutually agreed between CITY and Contractor; or

2. Contractor's Proposal for a change, as recommended by the CONSULTANT.

B. CITY and CONSULTANT will sign and date the Change Order as authorization for the Contractor to proceed with the changes.

C. Contractor shall sign and date the

Change Order to indicate agreement with the terms therein.

.

1.12 CORRELATION WITH CONTRACTOR'S SUBMITTALS

A. Contractor shall periodically revise Schedule of Values and Request for Payment forms to record each change as a separate item of work, and to record the adjusted Contract Sum.

B. Contractor shall periodically revise the Construction Schedule to reflect each change in Contract Time.

1. Contractor shall revise sub-schedules to show changes for other items of work affected by the changes.

C. Upon completion of work under a Change Order, Contractor shall enter pertinent changes in Record Documents.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01200 - PROJECT MEETINGS

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. The Owners Representative shall schedule and administer pre-construction meeting, monthly progress meetings, and specifically called meetings throughout the progress of the Work. The Owner's Representative shall:

a. Prepare agenda for meetings.

b. Make physical arrangements for meetings.

c. Preside at meetings.

2. Representatives of Contractor, subcontractors and suppliers attending meetings shall be qualified and authorized to act on behalf of the entity each represents.

3. The Contractor shall attend meetings to ascertain that work is expedited consistent with Contract Documents and construction schedules. The Owner's Representative shall record the pre-construction meeting and each progress meeting in its entirety, and shall provide the Owner's Representative with a voice recording, having good quality and clarity, and a typed transcript of the minutes of each meeting. A copy of the minutes of each progress meeting shall be available five (5) business days after the meeting.

B. Related Requirements Described Elsewhere:

1. Progress Schedules: Section SC01310.
2. Shop Drawings, Working Drawings, and Samples: Section SC01340.
3. Security and Safety Procedures for Infrastructure Projects: Section SC01540
4. Project Record Documents: Section SC01720.

1.02 PRE-CONSTRUCTION MEETING

A. The Owner's Representative shall schedule a preconstruction meeting within ten (10) days after the effective date of the contract.

B. Location: A local site, convenient for all parties, designated by the Owner's Representative.

C. Attendance:

1. CITY's representative.

2. Consultant and Consultant's professional consultants.

3. Resident project representative.

4. Contractor and its superintendent.

5. Major subcontractors.

6. Representatives of major suppliers and manufacturers as appropriate.

7. Governmental and Utilities representatives as appropriate.

8. Others as requested by the Contractor, CITY and Consultant.

D. The purpose of the pre-construction meeting is to designate responsible personnel and establish a working relationship. Matters requiring coordination will be discussed and procedures for handling such matters established. The suggested agenda should include:

1. Distribution and discussion of:

a. List of major subcontractors and suppliers.

b. Projected schedules.

c. Schedule of Values

d. NPDES plan

2. Critical work sequencing: Relationships and coordination with other contracts and/or work.

3. Major equipment deliveries and priorities.

4. Project coordination: Designation and responsible personnel.

5. Procedures and processing of:

a. Field decisions.

b. Proposal requests.

c. Request for Information.

d. Submittals.

e. Change Orders.

f. Applications for Payment.

6. Submittal of Shop Drawings, project data and samples.

7. Adequacy of distribution of Contract Documents.

8. Procedures for maintaining Record Documents.

9. Use of premises:

   a. Office, work and storage areas.

   b. CITY's requirements.

   c. Access and traffic control.

10. Construction facilities, controls and construction aids.

11. Temporary utilities.

12. Safety and first aid procedures.

13. Check of required Bond and Insurance certifications.

14. Completion time for Contract and liquidated damages.

15. Request for extension of Contract Time.

16. Weekly job meeting for all involved.

17. Security procedures.

18. Procedures for making partial payments.

19. Guarantees on completed work.

20. Equipment to be used.

21. Staking of work.

22. Project inspection.

23. Labor requirements.

24. Laboratory testing of material requirements.

25. Provisions for material stored on site.

26. Requirements of other organizations.

27. Rights-of-way and easements.

28. Housekeeping procedures.

29. Liquidated damages.

30. Posting of signs.

31. Pay request submittal dates.

32. Equal opportunity requirements.

1.03 PROGRESS MEETINGS

A. The Owner's Representative shall schedule and conduct regular periodic meetings. The progress meetings will be held every thirty (30) days and at other times as required by the progress of the Work. The first meeting shall be held within thirty (30) days after the preconstruction meeting or thirty (30) days or less after the date of Notice to Proceed.

B. Hold called meetings as required by progress of the Work.

C. Location of the meetings: Site selected by Consultant.

D. Attendance:

   1. Consultant and its representatives as needed.

   2. Contractor.

   3. CITY's representatives.

   4. Subcontractors (active on the site).

   5. Others as appropriate to the agenda (suppliers, manufacturers, other subcontractors, etc.).

E. The Owner's Representative shall preside at the meetings and provide for keeping minutes and distribution of the minutes to the CITY, Consultant and others. The purpose of the meetings will be to review the progress of the Work. The agenda will include but not be limited to the following:

   1. Review approval of minutes of previous meeting.

   2. Review of work progress since previous meeting and work scheduled (3-week look ahead schedule).

   3. Field observations, problems, and conflicts.

   4. Problems which impede construction Schedule.

   5. Review of off-site fabrication, delivery schedules.

6. Corrective measures and procedures to regain projected schedule.

7. Status of approved construction schedule.

8. Progress schedule during succeeding work period.

9. Coordination of schedules.

10. Review status of submittals, expedite as required.

11. Maintenance of quality standards.

12. Pending changes and substitutions.

13. Shop Drawing problems.

14. Review proposed changes for:

    a. Effect on construction schedule and on completion date.

    b. Effect on other contracts of the Project.

15. Construction schedule.

16. Critical/long lead items.

17. Other business.

F. The Contractor is to attend monthly progress meetings and is to study previous meeting minutes and current agenda items, and be prepared to discuss pertinent topics and provide specific information including but not limited to:

1. Status of all submittals and what specifically is being done to expedite them.

2. Status of all activities behind schedule and what specifically will be done to regain the schedule.

3. Status of all material deliveries, latest contact with equipment manufacturer and specific actions taken to expedite materials.

4. Status of open deficiencies and what is being done to correct the same.

G. The Contractor is to provide a current submittal log at each progress meeting in accordance with Section SC01340: Shop Drawings, Working Drawings and Samples.

PART 2- PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01310 - PROGRESS SCHEDULES

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. Prior to Pre-Construction Meeting, Contractor shall prepare and submit to the Owner's Representative/ CONSULTANT initial construction schedule(s) demonstrating complete fulfillment of all Contract requirements utilizing a Critical Path Method (hereinafter referred to as CPM) in planning, coordinating and performing the Work under this Contract (including all activities of subcontractors, equipment vendors and suppliers). The principles and definition CPM terms used herein shall be as set forth in the Associated General Contractors of America (AGC) publication, The Use of CPM in Construction, A Manual for General Contractors and the Construction Industry, latest edition, but the provisions of this Specification shall govern the planning, coordinating and performance of the Work. Assumed notice to proceed date for this schedule shall be ninety (90) days from bid opening date.

2. After issuance of Notice To Proceed, Contractor shall submit revised progress schedules on a bi-weekly basis. No partial payments shall be approved until there is an approved construction progress schedule on hand.

B. Related Requirements Described Elsewhere:

1. Summary of Project: Section SC01010

2. Applications for Payment: Section SC01027

3. Change Order Procedures: Section SC01153

4. Project Meetings: Section SC01200

5. Shop Drawings, Working Drawings, and Samples: Section SC01340

6. Schedule of Values: Section SC01370

1.02 QUALIFICATIONS

A. A statement of computerized CPM capability shall be submitted by Contractor in writing prior to the award of the Contract and shall verify that either Contractor's organization has in-house capability to use the CPM technique or that Contractor will employ a CPM consultant who is so qualified.

B. In-house capability shall be verified by description of construction projects to which Contractor or Contractor's consultant has successfully applied computerized CPM and shall include at least two (2) projects valued at least half the expected value of this Project.

1.03 FORM OF SCHEDULES

A. Maximum Sheet Size: 24 inches by 36 inches.

1.04 CONTENT OF SCHEDULES

A. Construction Progress Schedule:

1. Show the complete sequence of construction by activity.

2. Show the dates for the beginning of, and completion of, each major element of construction in no more than a two (2) week increment scale. Specifically list, but not limit to:

a. Obtaining all permits/construction easements (if needed)
b. Shop Drawing submitted/review time
g. Subcontractor work
h. Equipment installations
i. Finishings
j. Instrumentation
k. Painting
l. Operator training
m. Testing
n. Start-up
o. Receipt of spare parts

3. Show projected percentage of completion for each item, as of the first day of each month.

4. Show projected dollar cash flow requirements for each month of construction and for each activity as indicated by the approved Schedule of Values.

B. Submittals schedule for Shop Drawings and Samples shall be in accordance with Section SC01340: Shop Drawings,

Product Data and Samples. Indicate on the Schedule the following:

1. The dates for Contractor's submittals.

2. The dates submittals will be required for CITY-furnished products, if applicable.

3. The dates approved submittals will be required from the CONSULTANT.

C. A typewritten list of all long lead items (equipment, materials, etc.).

D. To the extent that the progress schedule or any revised progress schedule shows anything not jointly agreed upon or fails to show anything jointly agree upon, it shall not be deemed to have been approved by the Owner's Representative/ CONSULTANT. Failure to include any element of work required for the performance of this Contract shall not excuse the Contractor from completing all work required within any applicable Completion Date, notwithstanding the Owner's Representative/ CONSULTANT's approval of the progress schedule.

1.05 PROGRESS REVISIONS

A. Indicate progress of each activity to date of submission.

B. Show changes occurring since previous submission of schedule:

1. Major changes in scope.

2. Activities modified since previous submission.

3. Revised projections of progress and completion.

4. Other identifiable changes.

C. Provide a narrative report as needed to define:

1. Problem areas, anticipated delays, and the impact on the schedule.

2. Corrective action recommended, and its effect.

3. The effect of changes on schedules of other prime contractors.

D. If the Work falls behind the critical path schedule by two (2) weeks or more, the Contractor must prepare a recovery schedule.

1.06 SUBMISSIONS

A. Submittal Requirements.

1. Logic network and/or time phased bar chart, computer generated.

2. Computerized network analysis:

a. Sort by early start

b. Sort by float

c. Sort by predecessor/successor

3. Narrative description of the logic and reasoning of the schedule.

B. Within ten (10) working days after the conclusion of the Owner's Representative/ CONSULTANT's review of initial schedule, Contractor shall revise the network diagram as required and resubmit the network diagram and a tabulated schedule produced therefrom. The revised network diagram and tabulated schedule shall be reviewed and accepted or rejected by the Owner's Representative/ CONSULTANT within fifteen (15) working days after receipt. The network diagram and tabulated schedule when accepted by the Owner's Representative/ CONSULTANT shall constitute the Project work schedule unless a revised schedule is required due to substantial changes in the work scope, a change in Contract Time or a recovery schedule is required and requested.

C. Acceptance. The finalized schedule will be acceptable to the Owner's representative/ CONSULTANT, when in the opinion of the Owner's Representative/ CONSULTANT; it demonstrates an orderly progression of the Work to completion in accordance with the Contract requirements. Such acceptance will neither impose on the Owner's representative/ CONSULTANT responsibility for the progress or scheduling of the Work nor relieve Contractor from full responsibility therefore. The finalized schedule of Shop Drawing submittals will be acceptable to the Owner's representative/ CONSULTANT, when in the opinion of the Owner's Representative/ CONSULTANT, it demonstrates a workable arrangement for processing the submittals in accordance with the requirements. The finalized Schedule of Values (lump sum price breakdown), as applicable, will be acceptable to the Owner's Representative/ CONSULTANT as to form and content, when in the opinion of

the Owner's representative/ CONSULTANT, it demonstrates a substantial basis for equitably distributing the Contract Sum. When the network diagram and tabulated schedule have been accepted, The Contractor shall submit to the Owner's Representative/ CONSULTANT five (5) copies of the time-scaled network diagram, five (5) copies of a computerized tabulated schedule in which the activities have been sequenced by numbers, five (5) copies of a computerized tabulated schedule in which the activities have been sequenced by early starting date, and five (5) copies of a computerized, tabulated schedule in which activities have been sequenced by total float, and five (5) copies sorted by predecessor/successor.

D. Revised Work Schedules. Contractor, if requested by the Owner's Representative/ CONSULTANT, shall provide a revised work schedule if, at any time, the Owner's Representative/ CONSULTANT considers the completion Date to be in jeopardy because of "activities behind schedule." The revised work schedule shall include a new diagram and tabulated schedule conforming to the requirements of Paragraph 1.09, herein, designed to show how Contractor intends to accomplish the work to meet the completion date. The form and method employed by Contractor shall be the same as for the original work schedule. No payment will be made if activities fall more than two (2) weeks behind schedule and a revised work schedule is not furnished.

E. Schedule Revisions. The Owner's representative/ CONSULTANT may require Contractor to modify any portions of the work schedule that become infeasible because of "activities behind schedule" or for any other valid reason. An activity that cannot be completed by its original latest completion date shall be deemed to be behind schedule. No change may be made to the sequence, duration or relationships of any activity without approval of the Owner's representative/ CONSULTANT.

1.07 DISTRIBUTION

A. Contractor shall distribute copies of the reviewed schedules to:

1. CONSULTANT

2. Jobsite file

3. Subcontractors

4. Other concerned parties

5. CITY (two copies)

B. Instruct recipients to report promptly to the Contractor, in writing, any problems anticipated by the projections shown in the schedules.

1.08 CHANGE ORDERS

A. Upon approval of a Change Order, the approved changes shall be reflected in the next scheduled revision or update submittal by Contractor.

1.09 CPM STANDARDS

A. CPM, as required by this Section, shall be interpreted to be generally as outlined in the Associated General Contractor's (AGC) publication, The Use of CPM in Construction, A Manual for General Contractors and the Construction Industry, Copyright 1976.

B. Work schedules shall include a graphic network and computerized, tabulated schedules as described below. To be acceptable the schedule must demonstrate the following:

1. A logical succession of work from start to finish.

2. Definition of each activity.

3. A logical flow of work crews/equipment (crews are to be defined by manpower category and man-hours; equipment by type and hours).

4. Show all work activities and interfaces including submittals as well as major material and equipment deliveries.

C. Networks.

1. The CPM network, or diagram, shall be in the form of a time-scaled diagram of the customary activity-on-type and may be divided in to a number of separate pages with suitable notation relating the interface points among the pages. Individual pages shall not exceed 36 inches by 60 inches. Notation on each activity line shall include a brief work description and a duration, as described in Paragraph 1.09D., herein.

2. All construction activities and procurement shall be indicted in a time-scaled format, and a calendar shall be shown on all sheets along

the entire sheet length. Each activity arrow shall be plotted so the beginning and completion dates of such activity can be determined graphically by comparison with the calendar scale. All activities shall be shown using the symbols that clearly distinguish between critical path activities, non-critical path activities and float for each non-critical activity. All non-critical path activities shall show estimated performances time and float time in scaled form.

D. The duration indicated for each activity shall be in calendar days and shall represent the single best time considering the scope of the Work and resources planned for the activity including time for inclement weather. Except for certain non-labor activities, such as curing concrete or delivering materials, activity durations shall not exceed fourteen (14) days nor be less than one (1) day unless otherwise accepted by the Owner's representative/ CONSULTANT.

E. Tabulated Schedules. The initial schedule shall include the following minimum data for each activity.

1. Activity Beginning and Ending Numbers, single activity numbers may be used.

2. Duration.

3. Activity Description.

4. Early Start Date (Calendar Dated).

5. Early Finish Date (Calendar Dated).

6. Identified Critical Path.

7. Total Float (Note: No activity may show more than 20 days float).

8. Cost of Activity.

9. Equipment Hours by type, man power/hours by crew or trade.

F. Project Information. Each tabulation shall be prefaced with the following summary data.

1. Project Name.

2. Contractor.

3. Type of Tabulation (Initial or Updated).

4. Project Duration.

5. Project Scheduled Completion Date.

6. Effective or Starting Date of the Schedule.

7. New Projects Completion Date and Project Status, if an updated or revised schedule.

8. Actual Start Date and Finish Date for all update schedules.

1.10 SCHEDULE MONITORING

A. At not less than monthly intervals or when specifically requested by Owner's Representative/ CONSULTANT, Contractor shall submit to the Owner's Representative/ CONSULTANT a computer printout of an updated schedule for those activities that remain to be completed.

B. The updated schedule shall be submitted in the form, sequence, and number of copies requested for the initial schedule.

1.11 PROGRESS MEETINGS

For the monthly progress meeting, Contractor shall submit a revised CPM schedule and a 3-week look-ahead schedule, showing all activities in progress, uncompleted or scheduled to be worked during the weeks. The 3 weeks include the current week plus the next 2 weeks. All activities shall be from the approved CPM and must be as shown on the CPM unless behind or ahead of schedule.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01340 - SHOP DRAWINGS, WORKING DRAWINGS, AND SAMPLES

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. The Contractor shall submit to the Owner's representative/ CONSULTANT for review and approval, such Shop Drawings, Test Reports and Product Data on materials and equipment (hereinafter in this Section called Data), and material samples (hereinafter in this Section called Samples) as are required for the proper control of work, including but not limited to those Shop Drawings, Data and Samples for materials and equipment specified elsewhere in the Specifications and in the Contract Drawings.

2. With the Contractor's executed agreement and Bond Submittal, the Contractor shall submit to the Owner's Representative/ CONSULTANT a complete list of preliminary Data on items for which Shop Drawings are to be submitted. Included in this list shall be the names of all proposed manufacturers furnishing specified items. Review of this list by the Owner's Representative/ CONSULTANT shall in no way expressed or implied relieve the Contractor from submitting complete Shop Drawings and providing materials, equipment, etc., fully in accordance with the Specifications. This procedure is required in order to expedite final review of Shop Drawings. The Contractor shall include Shop Drawing review time on the Project schedule (see section SC01310).

3. The Contractor is to maintain an accurate updated submittal log and will bring this log to each scheduled progress meeting with the City and the Owner's Representative/ CONSULTANT. This log should include the following items:

a. Submittal-Description and Number assigned.

b. Date to Owner's Representative/ CONSULTANT.

c. Date returned to Contractor.

d. Status of Submittal (Approved as Noted, Rejected/Re-submit).

e. Date of Resubmittal and Return (as applicable).

f. Date material release for fabrication.

g. Projected date of fabrication.

h. Projected date of delivery to site.

i. Status of O&M manuals submittal.

j. Specification Section.

k. Drawings Sheet Number.

B. Related Requirements Described Elsewhere:

1. General Conditions:

2. Progress Schedules: Section SC01310.

3. Material and Equipment: Section SC01600.

4. Project Record Documents: Section SC01720.

5. Operating and Maintenance Data: Section SC01730.

1.02 CONTRACTOR'S RESPONSIBILITY

A. The Contractor shall furnish the Owner's Representative/ CONSULTANT a schedule of Shop Drawings submittals fixing the respective dates for the submission of Shop Drawings, the beginning of manufacture, testing and installation of materials, supplies and equipment. This schedule shall indicate those that are critical to the progress schedule.

B. The Contractor shall not begin any of the work covered by a Shop Drawing, Data, or a Sample returned for correction until a revision or correction thereof has been reviewed and returned to him, by the Owner';s Representative/ CONSULTANT, with approval.

C. The Contractor shall submit to the Owner's Representative/ CONSULTANT

all drawings and schedules sufficiently in advance of construction requirements to provide no less than twenty-one (21) calendar days for checking and appropriate action from the time the Consultant receives them.

D. All submittals shall be accompanied with a transmittal letter prepared in duplicate containing the following information:

1. Date.

2. Project Title and Number.

3. Contractor's name and address.

4. The number of each Shop Drawings, Project Data, and Sample submitted.

5. Notification of Deviations from Contract Documents.

a. The Contractor shall indicate in **bold type** at the top of the cover sheet of submittal of Shop Drawing if there is a deviation from Contract Drawings, Project Specifications and referenced specifications or codes.

b. The Contractor shall also list any deviations from Contract Drawings, Project Specifications and referenced specifications or codes and identify in "green" ink prominently on the drawings.

6. Submittal Log Number conforming to Specification Log Number.

E. The Contractor shall submit SHOP DRAWINGS electronically to the Owner;s Representative/ CONSULTANT through eBuilder. The Owner's representative/ CONSULTANT will review the submittal and return to the Contractor with appropriate review comments.

F. The Contractor shall be responsible for and bear all costs of damages which may result from the ordering of any material or from proceeding with any part of work prior to the completion of the review by the Owner's Representative/ CONSULTANT of the necessary Shop Drawings.

G. The Contractor shall not use Shop Drawings as means of proposing alternate items to demonstrate compliance to Contract requirements.

H. Each submittal will bear a stamp indicating that Contractor has satisfied Contractor's obligations under the Contract Documents with respect to Contractors review and approval of that submittal.

I. Drawings and schedules shall be checked and coordinated with the work of all trades and sub-contractors involved, before they are submitted for review by the Owner';s Representative/ CONSULTANT and shall bear the Contractor's stamp of approval as evidence of such checking and coordination. Drawings or schedules submitted without this stamp of approval shall be returned to the Contractor for resubmission.

1.03 CONSULTANT'S REVIEW OF SHOP DRAWINGS

A. The CONSULTANT's review of Shop Drawings, Data and Samples as submitted by the Contractor, will be to determine if the items(s) conform to the information in the Contract Documents and are compatible with the design concept. The CONSULTANT's review and exceptions, if any, will not constitute an approval of dimensions, connections, quantities, and details of the material, equipment, device, or item shown.

B. The review of drawings and schedules will be general, and shall not be construed:

1. As permitting any departure from the Contract requirements.

2. As relieving the Contractor of responsibility for any errors, including details, dimensions, and materials.

3. As approving departures from details furnished by the Consultant, except as otherwise provided herein.

C. If the drawings or schedules as submitted describe variations and show a departure from the Contract requirements which the CONSULTANT finds to be in the interest of the City and to be so minor as not to involve a change in Contract Price or time for performance, the CONSULTANT may return the reviewed drawings without noting an exception.

D. "Approved As Noted" - Contractor shall incorporate CONSULTANT's comments into the submittal before release to manufacturer. The Contractor shall send a letter to the CONSULTANT

acknowledging the comments and their incorporation into the Shop Drawing.

E. "Amend And Resubmit" - Contractor shall resubmit the Shop Drawing to the CONSULTANT. The resubmittal shall incorporate the CONSULTANT's comments highlighted on the Shop Drawing.

F. "Rejected" - Contractor shall resubmit Shop Drawing for review by Consultant.

G. Resubmittals will be handled in the same manner as first submittals. On resubmittals the Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, to revisions other than the corrections requested by the CONSULTANT on previous submissions. The Contractor shall make any corrections required by the CONSULTANT.

H. If the Contractor considers any correction indicated on the drawings to constitute a change to the Contract Drawings or Specifications, the Contractor shall give written notice thereof to the CONSULTANT.

I. When the Shop Drawings have been completed to the satisfaction of the CONSULTANT, the Contractor shall carry out the construction in accordance therewith and shall make no further changes therein except upon written instructions from the CONSULTANT.

J. No partial submittals will be reviewed. Submittals not deemed complete will be stamped "Rejected" and returned to the Contractor for resubmittal. Unless otherwise specifically permitted by the CONSULTANT, make all submittals in groups containing all associated items for:

1. Systems.
2. Processes.
3. As indicated in specific Specifications Sections.

K. All drawings, schematics, manufacturer's product Data, certifications and other Shop Drawing submittals required by a system specification shall be submitted at one time as a package to facilitate interface checking.

L. Only the CONSULTANT shall utilize the color "red" in marking Shop Drawing submittals.

M. For any submittal returned to the Contractor marked “Amend and Submit” or “Rejected,” Contractor shall pay CITY a resubmittal fee of $250.00. Monies shall be deducted from monies owed Contractor by CITY monthly and incorporated into a Change Order at completion of the contract.

1.04 SHOP DRAWINGS

A. Shop Drawings shall be complete and detailed and shall consist of fabrication, erection and setting drawings and schedule drawings, manufacturer's scale drawings, and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature, and performance and test data, shall be considered only as supportive information. As used herein, the term "manufactured" applies to standard units usually mass-produced; and "fabricated" means items specifically assembled or made out of selected materials to meet individual design requirements.

B. Manufacturer's catalog sheets, brochures, diagrams, illustrations and other standard descriptive data shall be clearly marked to identify pertinent materials, product or models. Delete information which is not applicable to the Work by striking or cross-hatching.

C. Each Shop Drawing shall have a blank area 3-1/2 inches by 3-1/2 inches, located adjacent to the title block. The title block shall display the following:

1. Project Title and Number.
2. Name of Project building or structure.
3. Number and title of the Shop Drawing.
4. Date of Shop Drawing or revision.
5. Name of Contractor and subcontractor submitting drawing.
6. Supplier/manufacturer.
7. Separate detailer when pertinent.
8. Specification title and number.
9. Specification section.
10. Application Contract Drawing Number.

D. Data on materials and equipment include, without limitation, materials and equipment lists, catalog data sheets,

cuts, performance curves, diagrams, materials of construction and similar descriptive material. Materials and equipment lists shall give, for each item thereon, the name and location of the supplier or manufacturer, trade name, catalog reference, size, finish and all other pertinent Data.

1.05 WORKING DRAWINGS

A. When used in the Contract Documents, the term "Working Drawings" shall be considered to mean the Contractor's plan for temporary structures such as temporary bulkheads, support of open cut excavation, support of utilities, ground water control systems, forming and false work; for underpinning; and for such other work as may be required for construction but does not become an integral part of the Project.

B. Working Drawings shall be signed by a registered Professional Consultant, currently licensed to practice in the State of Florida.

1.06 SAMPLES

A. The Contractor shall furnish, for the approval of the Consultant, samples required by the Contract Documents or requested by the CONSULTANT. Samples shall be delivered to the CONSULTANT as specified or directed. The Contractor shall prepay all shipping charges on samples. Materials or equipment for which samples are required shall not be used in work until approved by the CONSULTANT.

B. Samples shall be of sufficient size and quantity to clearly illustrate:

1. Functional characteristics of the product, with integrally related parts and attachment devices.

2. Full range of color, texture and pattern.

3. A minimum of two (2) samples of each item shall be submitted.

C. Field samples and mock-ups:

1. Contractor shall erect, at the Project site, at a location acceptable to the Consultant.

2. Size of area: 15 feet long x 6 feet high or that specified in the respective specification section.

3. Fabricate each sample and mock-up complete and finished.

4. Remove mock-ups at conclusion of Work or when acceptable to the Consultant.

D. Each sample shall have a label indicating:

1. Name of Project.

2. Name of Contractor and Subcontractor.

3. Material or Equipment Represented.

4. Place of Origin.

5. Name of Producer and Brand (if any).

6. Location in Project.

Samples of finished materials shall have additional marking that will identify them under the finished schedules.

E. The Contractor shall prepare a transmittal letter in triplicate for each shipment of samples containing the information required in Paragraph 1.06B above. It shall enclose a copy of this letter with the shipment and send a copy of this letter to the CONSULTANT. Approval of a sample shall be only for the characteristics or use named in such approval and shall not be construed to change or modify any Contract requirements.

F. Approved samples not destroyed in testing shall be sent to the CONSULTANT or stored at the site of the Work. Approved Samples of the hardware in good condition will be marked for identification and may be used in the work. Materials and equipment incorporated in work shall match the approved Samples. Samples which failed testing or were not approved will be returned to the Contractor at its expense, if so requested at time of submission.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01370 - SCHEDULE OF VALUES

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. Contractor shall submit to the Consultant a Schedule of Values allocated to the various lump sum portions of the Work, within fifteen (15) days of the Notice to Proceed date.

2. Upon request of the Owner's Representative/ Consultant, Contractor shall support the values with data which will substantiate their correctness. The data shall include, but not be limited to quantity of materials, all sub-elements of the activity and their units of measure.

3 Schedule of Values shall establish the actual value for each activity of the Work to be completed taken from the approved Critical Path Method (CPM), and shall be used as the basis for the Contractor's Applications for Payment.

B. Related Requirements Described Elsewhere:

1. Conditions of the Construction Contract.

1.02 FORM AND CONTENT OF SCHEDULE OF VALUES

A. Type schedule on an 8-1/2 inch by 11 inch or 8-1/2 inch by 14 inch white paper. Contractor's standard forms and computer printout will be considered for approval by the Consultant upon Contractor's request. Identify schedule with:

1. Title of Project and location.

2. Consultant and Project number.

3. Name and address of Contractor.

4. Contract designation.

5. Date of submission.

B. Schedule shall list the installed value of the component parts of the Work in sufficient detail to serve as a basis for computing item prices for progress payments during construction.

C. Identify each line item with the number and the title of the respective section of the Specifications.

D. For each line item, list sub-values of major products or operations under the item.

E. For the various portions of the Work:

1. Each item shall include a directly proportional amount of the Contractor's overhead and profit.

2. For items on which progress payments will be requested for stored materials, break down the value into:

a. The cost of the materials, delivered unloaded, with taxes paid. Paid invoices required for materials. Payment for materials shall be limited to the invoiced amount only.

b. The total installed value.

F. The sum of all lump sum values listed in the schedule shall equal the total Contract Sum.

1.04 REVIEW AND RESUBMITTAL

A. After review by Consultant, Contractor shall revise and resubmit Schedule of Values and Schedule of Unit Material values pursuant to this Section.

B. Contractor shall resubmit revised Schedules in same manner pursuant to this Section.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01380 - CONSTRUCTION PHOTOGRAPHS

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: The Contractor shall employ a competent professional photographer to take construction record photographs periodically during the course of the Work using a digital camera and a preconstruction video inspection.

B. Related Requirements Described Elsewhere:

1. General Requirements: Section SC01000.

2. Summary of Project: Section SC01010.

3. Video and Photographic Site Survey: Section 01390

4. Project Record Documents: Section SC01720.

1.02 PHOTOGRAPHY REQUIRED

A. Photographs taken in conformance with this Section shall be furnished to the Consultant with each Application for Payment.

B. Views and Quantities Required:

1. Five (5) views of overall Project site monthly, or as directed by the Consultant (for facilities projects only).

2. Two (2) aerial views of overall Project site after completion of site restoration and landscaping (for facilities projects only).

3. Provide electronically at least five (5) photographs (views) of progress work with each Application for Payment.

4. Additional aerial photographs may be used upon prior approval by the CITY.

C. In addition to the general progress photographs required, photographs of each tie-in point shall be taken prior to backfill and turned in with the monthly Application for Payment.

1.03 COSTS OF PHOTOGRAPHY

A. The Contractor shall pay costs for specified photography and prints. Parties requiring additional photography or prints shall pay the photographer directly.

PART 2 - PRODUCTS

2.01 NEGATIVES/DIGITAL FILES

A. The negatives/digital files are to be categorized by month taken and must correspond to the progress photographs that accompany each. At project closeout, the negatives/digital files are to be submitted to the CITY. If the Contractor uses digital photography, then the images shall be provided on CD.

PART 3 - EXECUTION

3.01 TECHNIQUE

A. Factual Presentation.

B. Correct exposure and focus.

1. High resolution and sharpness.

2. Maximum depth-of-field.

3. Minimum distortion.

3.02 VIEWS REQUIRED

A. Photograph from locations to adequately illustrate condition of construction and state of progress.

1. At successive periods of photography, take at least one (1) photograph from the same overall view as previously.

2. Consult with the Consultant at each period of photography for instructions concerning views required.

3. All views to contain a relative dimension reference that is easily recognizable by the average person. In views where dimensions are critical, use of recognizable measuring devices such as a folding ruler, measuring tape in a manner the makings are clear and sharp in the photograph and the device located in close relationship with subject of photograph.

3.03 DELIVERY OF PHOTOGRAPHS

A. Deliver electronic files to the CONSULTANT to accompany each Application for Payment.

END OF SECTION

SECTION 01400 - QUALITY REQUIREMENTS

PART 1 GENERAL

1.01 GENERAL

A. Contractor is required to follow all technical specification requirements with regards to material quality, certification, placement and installation. If the Contractor has questions concerning these items, it is required to generate and issue a Request For Information to the CITY and Consultant for resolution and or guidance.

1.02 RELATED SECTIONS

A. Section SC01025 – Measurement and Payment Procedures

C. Section SC01340 – Shop Drawings, Work Drawings and Samples

1.03 Field QA/QC

A. The Contractor shall monitor quality control over suppliers, subcontractors, products and workmanship, to produce work of specified quality.

B. Comply with manufacturers' instructions, including each step in sequence.

C. Should manufacturers' instructions conflict with Contract Documents, issue Request For Information to the Consultant before proceeding.

D. Comply with specified standards as minimum quality for the work except where more stringent tolerances, codes, or specified requirements indicate higher standards or more precise workmanship.

E. Perform work by persons qualified to produce required and specified quality.

F. Verify that field measurements are as indicated on shop drawings / catalog cut sheets or as instructed by the manufacturer.

G. Secure products in place with positive anchorage devices designed and sized to withstand stresses, vibration, physical distortion, or disfigurement.

1.04 TOLERANCES

B. Monitor fabrication and installation tolerance control of products to produce acceptable Work. Do not permit tolerances to accumulate.

C. Comply with manufacturers' tolerances. Should manufacturers' tolerances conflict with Contract Documents, request clarification from Consultant before proceeding.

D. Adjust products to appropriate dimensions, position before securing products in place.

1.05 TESTING SERVICES

A. Contractor required to hire a professional, licensed independent firm to perform tests and other services specified.

C. Certified, signed and sealed test reports will be submitted by the independent firm to the Consultant, CITY and Contractor, indicating observations and results of tests and indicating compliance or non-compliance with Contract Documents.

D. Cooperate with independent firm; furnish samples of materials, design mix, equipment, tools, storage, safe access, and assistance by incidental labor as requested.

E. Testing does not relieve Contractor to perform work to Contract requirements.

F. Re-testing required because of non-conformance to specified requirements shall be performed by the same independent firm on instructions by the CITY or Consultant.

1.06 INSPECTION SERVICES

A. The CITY shall appoint, employ, and pay inspector for specified services for inspection. These services may be from the Consultant, or from the CITY or any combination of the above.

B. The Inspector shall perform construction observation, inspections and other services specified in individual specification sections and as required by the CITY and/or Consultant.

C. The Contractor shall cooperate with Inspector; furnish safe access and assistance by incidental labor as requested. Additionally, the Contractor shall keep the inspection personnel fully informed of the needs, scheduling and progress of the project.

D. This inspection does NOT relieve the Contractor from performing their own QA/QC on the Work as required in this and other technical specification sections.

1.07 MANUFACTURERS' FIELD SERVICES

A. When specified in the Contract documents, requiring material or product suppliers or manufacturers to provide qualified staff personnel to observe site conditions, conditions of surfaces and installation, quality of workmanship, start-up of equipment, test, adjust and balance of equipment as applicable, and to initiate instructions when necessary.

B. Report observations and site decisions or instructions given to applicators or installers that are supplemental or contrary to manufacturers' written instructions.

PART 2 PRODUCTS
(Not Used)

PART 3 EXECUTION

3.01 EXAMINATION

A. The Contractor shall verify that existing site conditions and substrate surfaces are acceptable for subsequent Work. Beginning new Work means acceptance of existing conditions.

B. Verify that existing substrate is capable of structural support or attachment of new Work being applied or attached.

C. Perform “receiving” inspection of materials, structures and equipment.

D. Perform “in-process” inspection as the Work progresses.

E. Monitor and inspect the work performed by subcontractors as the Work progresses.

F. Examine and verify specific conditions described in individual technical specification sections.

G. Notify the CITY and Consultant, forty-eight (48) hours prior to the expected time for inspection purposes and/or the witnessing of pressure testing. All pressure testing shall be witnessed by the CITY and/or Consultant.

END OF SECTION

SECTION 01500 - CONSTRUCTION FACILITIES AND TEMPORARY CONTROLS

PART 1 – GENERAL

1.01 REQUIREMENTS INCLUDED

A. Contractor shall furnish, install and maintain temporary utilities required for construction. Remove on completion of work.

1.02 RELATED REQUIRMENTS

A. General Conditions.

B. Section SC01010: Summary of Work

1.03 REQUIREMENTS OF REGULATORY AGENCIES

A. Comply with National Electric Code.

B. Comply with Federal, State, and local codes and regulations and with utility company requirements.

PART 2 – PRODUCTS

2.01 MATERIALS, GENERAL

A. Materials may be new or used, but must be adequate in capability for the required usage of the CITY, must not create unsafe conditions, and must not violate requirements of applicable codes and standards.

2.02 TEMPORARY TELEPHONE SERVICE

A. Superintendent, foreman or other contractor personnel in charge shall be equipped with a functioning cell phone during the term of the contract.

2.03 TEMPORARY WATER

A. Schedule use and provide deposit to the City's Utility Department for a portable hydrant meter. No water shall be taken from the existing water distribution system unless it's through the portable hydrant meter. The Contractor shall install and maintain a certified backflow preventer or check valve on all CITY issued portable hydrant meters; **no exceptions**. Using water from private homes and/or business' is strictly forbidden.

B. Water utilization for concrete plaster and mortar shall meet the respective requirements and standards set forth for water utilized in these construction materials.

2.04 TEMPORARY SANITARY FACILITIES

A. Provide sanitary facilities in compliance with Federal, state and local laws and regulations.

B. Service, clean and maintain facilities and enclosures.

2.05 TEMPORARY CONTROLS

A. Noise Control: See Section SC01100 – Special Project Procedures

B. Dust Control:

1. Provide positive methods and apply dust control materials to minimize raising dust from construction operations, and provide positive means to prevent airborne dust form dispensing into the atmosphere.

C. Pest and Rodent Control:

1. Provide pest and rodent control prior to start of construction to prevent infestation of surrounding neighborhood.

   a. Employ methods and use materials that will not adversely affect conditions at the site or on adjoining properties.

   b. Should the use of rodenticides be considered necessary, submit an informational copy of the proposed program to the Consultant. Clearly indicate:
      1) The area or areas to be treated
      2) The rodenticides to be used, with a copy of the manufacturer's printed instructions.
      3) The pollution preventative measures to be employed.

2. The use of any rodenticide shall be in full accordance with the Manufacturer's printed instructions and recommendations.

D. Debris Control:

1. Maintain all areas under Contractor's control free of extraneous debris.

2. Initiate and maintain a specific program to prevent accumulation of debris at construction site, storage and parking areas, or along access roads and haul routes.

   a. Provide acceptable containers for deposit of debris.

   b. Prohibit overloading of trucks to prevent spillages on access and haul routes.
      1) Provide periodic inspection of traffic areas to enforce requirements.

3. Schedule periodic collection and disposal of debris.

   a. Provide additional collections and disposals of debris whenever the periodic schedule is inadequate to prevent accumulation.

E. Pollution Control:

1. Provide methods, means and facilities required to prevent contamination of soil, water or atmosphere by the discharge of noxious substances from construction operations.

2. Provide equipment and personnel, perform emergency measures required to contain any spillages, and to remove contaminated soils or liquids.

   a. Excavate and dispose of any contaminated earth off-site, and replace with suitable compacted fill and topsoil.

3. Take special measure to prevent harmful substances from entering public waters.

   a. Prevent disposal of wastes, effluents, chemicals, or other such substances adjacent to streams, or in sanitary or storm sewers.

4. Provide systems for control of atmospheric pollutants

   a. Prevent toxic concentrations of chemicals

   b. Prevent harmful dispersal of pollutants into the atmosphere

PART 3 – EXECUTION

3.01 GENERAL

A. Maintain and operate systems to assure continuous service.

B. Modify and extend systems, as work progress requires.

3.02 REMOVAL

A. Completely remove temporary materials and equipment when their use is no longer required.

B. Clean and repair damage caused by temporary installations or use of temporary facilities.

END OF SECTION

SECTION 01505 – MOBILIZATION

PART I - GENERAL

1.01 DEFINITION AND SCOPE

A. Mobilization shall include the Contractor obtaining of all permits, insurance, and bonds; moving onto the site of all plant and equipment, temporary buildings and other construction facilities; all as required for the proper performance and completion of the Work. Mobilization shall include, but not be limited to, the following principal items:

1. Move onto the site all Contractor's plan and equipment required for first month operations.

2. Install temporary construction power, wiring, and lighting facilities.

3. Establish fire protection plan and safety program.

4. Secure construction water supply.

5. Provide on-site sanitary facilities and potable water facilities as specified.

6. Arrange for and erect Contractor's work and storage yard and employees' parking facilities.

7. Submit all required insurance certificates and bonds.

8. Obtain all required permits.

9. Post all OSHA, EPA, Department of Labor, and all other required notices.

10. Have Contractor's superintendent at the job site full time.

11. Submit a detailed construction CPM schedule acceptable to the Consultant as specified.

12. Submit a Schedule of Values of the Work.

13. Submit a schedule of submittals.

1.02 DEMOBILIZATION

A. Demobilization is the timely and proper removal of all contractor- owned material, equipment or plant, from the job site and the proper restoration or completion of work necessary to bring the site into full compliance with the Contract Documents.

1.03 PAYMENT FOR MOBILIZATION/DEMOBILIZATION

A. Contractor shall be limited to a maximum of 3.0 percent of the total price bid for mobilization. The cost of mobilization/demobilization shall be shown in the Schedule of Values.

B. Demobilization shall be shown in the schedule of values as a minimum 25 percent of the value for mobilization.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01525 - CONSTRUCTION AIDS

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: The Contractor shall furnish, install and maintain required construction aids and remove on completion of work.

B. Related Requirements Described Elsewhere:

1. Summary of Work: Section SC01010

C. Contractor must comply with applicable requirements of the specified in Sections of Divisions 2 through 16 - Technical Specifications

PART 2 - PRODUCTS

2.01 MATERIALS

A. Materials may be new or used, suitable for the intended purpose, but must not violate requirements of applicable codes and standards.

2.02 CONSTRUCTION AIDS

A. Contractor shall provide construction aids and equipment required by personnel and to facilitate execution of the Work: scaffolds, staging, ladders, stairs, ramps, runways, platforms, railings, hoists, cranes, chutes and other such facilities and equipment such as temporary valves and fittings. Refer to respective Technical Specifications Sections for particular requirements for each trade.

B. When permanent stair framing is in place, provide temporary treads, platforms and railings, for use by construction personnel.

C. Maintain facilities and equipment in first-class condition.

PART 3 - EXECUTION

3.01 PREPARATION

A. Contractor shall consult with the CONSULTANT, review site conditions and factors which affect construction procedures and construction aids, which may be affected by execution of the Work.

3.02 GENERAL

A. Comply with applicable requirements specified in sections of Divisions 2 through 16.

B. Relocate construction aids as required by progress of construction, by storage of work requirements and to accommodate legitimate requirements of CITY and other contractors employed at the site.

3.03 REMOVAL

A. Completely remove temporary materials, equipment and services:

1. When construction needs can be met by use of permanent construction.

2. At completion of work.

B. Clean and restore areas damaged by installation by use of temporary facilities.

1. Remove foundations and underground installations for construction aids.

2. Restore area of site affected by temporary installations to required elevations, slopes, ground cover and clean the area.

C. Restore permanent facilities used for temporary purposes to specified condition or in kind if not specified.

END OF SECTION

SECTION 01540 - SECURITY AND SAFETY PROCEDURES FOR INFRASTRUCTURE PROJECTS

PART 1 GENERAL

1.01 As a minimum, the Contractor shall provide and assure that all of its personnel have and wear common colored Company shirts, safety vests, hard hats and substantial leather work shoes / boots. Other Personal Protective Equipment (PPE) as required by governing local, state and Federal laws and regulations.

1.02 SECTION INCLUDES

A. Responsibility for Work Security

B. Protection of Work in Progress, Materials and Equipment

C. Protection of Existing Property

D. Security Program

E. Entry Control

F. Personnel Identification

G. Security Service

H. Miscellaneous Restrictions

1.03 RELATED SECTIONS

A. Section 01010 – Summary of Project

B. Section 01500 - Temporary Facilities and Controls

1.04 RESPONSIBILITY OF WORK SECURITY

A. Contractor shall, at its expense, at all times conduct all operations under the Contract in a manner to avoid the risk of loss, theft or damage by vandalism, sabotage or other means to any property. Contractor shall promptly take all reasonable precautions that are necessary and adequate against any conditions that involve a risk of loss, theft or damage to its property, at a minimum.

B. Contractor shall continuously inspect all its work, materials, equipment and facilities to discover and determine any such conditions and shall be solely responsible for discovery, determination and correction of any such condition.

C. Contractor shall prepare and maintain accurate reports of incidents of loss, theft or vandalism and shall furnish these reports to CITY within three (3) days of each incident.

1.05 PROTECTION OF WORK IN PROGRESS, MATERIALS AND EQUIPMENT

A. Contractor shall be responsible for and shall bear any and all risk of loss or damage to work in progress, all materials delivered to the site, and all materials and equipment involved in the Work until completion and final acceptance of Work under this Contract. Excluded from Contractor's responsibility is any loss or damage that results from the sole active negligence of the CITY or its representatives.

1.06 PROTECTION OF EXISTING PROPERTY

A. Contractor shall so conduct its operations as not to damage, close, or obstruct any utility installation, highway, road or other property until permits therefore have been obtained. If facilities are closed, obstructed, damaged or rendered unsafe by Contractor's operations, Contractor shall, at its expense, make such repairs and provide temporary guards, lights and other signals as necessary or required for safety and as will be acceptable to the CITY.

B. Contractor shall conduct its operation so as not to damage any existing buildings or structures. The Contractor shall verify that means and methods of construction used inside, adjacent to, under or over existing buildings will not cause damage. The Contractor shall provide protection methods that are acceptable to the CITY.

C. Unless otherwise specifically provided in the Contract, Contractor shall not do any work that would disrupt or otherwise interfere with the operation of any pipeline, telephone, electric, radio, gas, transmission line, ditch or other structure, nor enter upon lands in their natural state until approved by the CITY.

D. Thereafter, and before it begins such work, Contractor shall give due notice to CITY of its intention to start such work. Contractor shall not be entitled to any extension of time or any extra compensation on account of any postponement, interference or delay caused by any such line, ditch or structure on or adjacent to the site of work.

E. Contractor shall preserve and protect all cultivated and planted areas and vegetation such as trees, plants, shrubs and grass on or adjacent to the premises, which, as determined by CITY, do not reasonably interfere with the performance of this Contract.

F. Contractor shall be responsible for damage to any such areas and vegetation and for unauthorized cutting of trees and vegetation, including, without limitation, damage arising from the performance of its work through operation of equipment or stockpiling of materials. All cost in connection with any repairs or restoration necessary or required by reason of any such damage or unauthorized cutting shall be borne by Contractor.

1.07 SECURITY PROGRAM

A. At the Pre-Construction Meeting, the CITY will make a final determination on which, if any, of the following requirements are to be implemented.

1. Protect Work existing premises and CITY's operations from theft, vandalism, and unauthorized entry.

2. Initiate program at project mobilization.

3. Maintain program throughout construction period until CITY acceptance precludes the need for Contractor security.

1.08 RESTRICTIONS

A. Do not allow cameras on site or photographs taken except by written approval of the CITY.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

SECTION 01600 - MATERIAL AND EQUIPMENT

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: Material and equipment incorporated into the Work:

1. Manufactured and fabricated products:

a. Design, fabricate and assemble in accord with the best engineering and shop practices.

b. Manufacture like parts of duplicate units to standard sizes and gauges, to be interchangeable.

c. Two (2) or more items of the same kind shall be identical, by the same manufacturer.

d. Products shall be suitable for service conditions.

e. Equipment capacities, sizes and dimensions shown or specified shall be adhered to unless variations are specifically approved in writing.

2. Do not use material or equipment for any purpose other than that for which it is designed or specified.

1.02 MANUFACTURER'S INSTRUCTIONS FOR INSTALLATION

A. When Contract Documents require that installation of Work shall comply with manufacturer's printed instructions. Contractor shall obtain and distribute copies of such instructions to parties involved in the installation, including five (5) copies to the Consultant.

1. Maintain one (1) set of complete instructions at the job site during installation and until completion.

B. Contractor shall handle, install, connect, clean, condition and adjust products in strict accord with such instructions and in conformity with specified requirements.

1. Should job conditions or specified requirements conflict with manufacturer's instructions, consult with Consultant for further instructions.

2. Do not proceed with Work without clear instructions.

C. Contractor shall perform work in accordance with manufacturer's instructions. Do not omit any preparatory step or installation procedure unless specifically modified or exempted by Contract Documents.

1.03 TRANSPORTATION AND HANDLING

A. Contractor shall arrange deliveries of products in accordance with progress schedules, coordinate to avoid conflict with work and conditions at the site.

1. Deliver products in undamaged condition, in manufacturer's original containers or packaging, with identifying labels intact and legible.

2. Immediately on delivery, inspect shipments to assure compliance with requirements of Contract Documents and approved submittals, and that products are properly protected and undamaged.

B. Contractor shall provide equipment and personnel to handle products by methods to prevent soiling or damage to products or packaging.

1.04 STORAGE AND PROTECTION

A. The Contractor shall furnish a covered, weather-protected storage structure providing a clean, dry, non-corrosive environment for all mechanical equipment, valves, architectural items, electrical and instrumentation equipment, and special equipment to be incorporated into this Project. Storage or equipment shall be in strict accordance with the "instructions for storage" of each equipment supplier and manufacturer including connection of heaters, placing of storage lubricants in equipment, etc. Corroded, damaged or deteriorated equipment and parts shall be replaced before acceptance of the Project. Equipment and materials not properly stored will not be included in a payment estimate.

B. Contractor shall store products in accord with manufacturer's instructions, with seals and labels intact and legible.

1. Store products subject to damage by the elements in weather-tight enclosures.

2. Maintain temperature and humidity within the ranges required by manufacturer's instructions.

3. Store fabricated products above the ground, on blocking or skids, prevent soiling or staining. Cover products which are subject to deterioration with impervious sheet coverings, provide adequate ventilation to avoid condensation.

4. Store loose granular materials in a well-drained area on solid surfaces to prevent mixing with foreign matter.

C. All materials and equipment to be incorporated in the Work shall be handled and stored by the Contractor before, during and after shipment in a manner to prevent warping, twisting, bending, breaking, chipping, rusting, and any injury, theft or damage of any kind whatsoever to the material or equipment.

D. Contractor shall store under a roof or off the ground cement, sand and lime, and shall be kept completely dry at all times. All structural and miscellaneous steel, and reinforcing steel shall be stored off the ground or otherwise to prevent accumulations of dirt or grease, and in a position to prevent accumulations of standing water and to minimize rusting. Beams shall be stored with the webs vertical. Precast concrete beams shall be handled and stored in a manner to prevent accumulations of dirt, standing water, staining, chipping or cracking. Brick, block and similar masonry products shall be handled and stored in a manner to reduce breakage, chipping, cracking and spalling to a minimum.

E. All materials, which, in the opinion of the Consultant, have become so damaged as to be unfit for the use intended or specified, shall be promptly removed by the Contractor from the site of the Work, and the Contractor shall receive no compensation for the damaged material or its removal.

F. Contractor shall arrange storage in a manner to provide easy access for inspection. Make periodic inspections of stored products to assure that products are maintained under specified conditions, and free from damage or deterioration.

G. Protection After Installation: Contractor shall provide substantial coverings as necessary to protect installed products from damage from traffic and subsequent construction operations. Remove covering when no longer needed.

H. The Contractor shall be responsible for all material, equipment and supplies sold and delivered to the CITY under this Contract until final inspection of the Work and acceptance thereof by the CITY. In the event any such material, equipment and supplies are lost, stolen, damaged or destroyed prior to final inspection and acceptance, the Contractor shall replace same without additional cost to the CITY.

I. Should the Contractor fail to take proper action on storage and handling of equipment supplied under this Contract within seven (7) days after written notice to do so has been given, the CITY retains the right to correct all deficiencies noted in previously transmitted written notice and deduct the cost associated with these corrections from the Contractor's Contract. These costs may be comprised of expenditures for labor, equipment usage, administrative, clerical, engineering and any other costs associated with making the necessary corrections.

1.05 STORAGE AND HANDLING OF EQUIPMENT ON SITE

A. Because of the long period allowed for construction, special attention shall be given to the storage and handling of equipment on site. As a minimum, the procedure outlined below shall be followed by Contractor:

1. All equipment having moving parts such as gears, electric motors, etc. and/or instruments shall be stored in a temperature and humidity controlled building approved by the Consultant, until such time as the equipment is to be installed.

2. All equipment shall be stored fully lubricated with oil, grease, etc. unless otherwise instructed by the manufacturer.
3. Manufacturer's storage instructions shall be carefully studied by the Contractor and reviewed with the Consultant by him. These instructions shall be carefully followed and a written record of this kept by the Contractor.

4. Moving parts shall be rotated a minimum of once weekly to insure proper lubrication and to avoid metal-to-metal "welding". Upon installation of the equipment, the Contractor shall start the equipment, at least half the load, once weekly for an adequate period of time to insure that the equipment does not deteriorate from lack of use.

5. Lubricants shall be changed upon completion of installation and as frequently as required thereafter during the period between installation and acceptance. Mechanical equipment to be used in the Work, if stored for longer than ninety (90) days, shall have the bearings cleaned, flushed and lubricated prior to testing and startup, at no extra cost to the CITY.

6. Prior to acceptance of the equipment, the Contractor shall have the manufacturer inspect the equipment and certify that its condition has not been detrimentally affected by the long storage period. Such certifications by the manufacturer shall be deemed to mean that the equipment is judged by the manufacturer to be in a condition equal to that of equipment that has been shipped, installed, tested and accepted in a minimum time period. As such, the manufacturer will guarantee the equipment equally in both instances. If such a certification is not given, the equipment shall be judged to be defective. It shall be removed and replaced at the Contractor's expense.

1.06 SPARE PARTS

A. Spare parts for certain equipment provided under Divisions 11: Equipment; 13: Special Construction; 15: Mechanical; and 16: Electrical have been specified in the pertinent sections of the Technical Specifications. The Contractor shall collect and store all spare parts so required in an area to be designated by the Consultant. In addition, the Contractor shall furnish to the Consultant an inventory listing all spare parts, the equipment they are associated with, the name and address of the supplier, and the delivered cost of each item. Copies of actual invoices for each item shall be furnished with the inventory to substantiate the delivered cost.

1.07 GREASE, OIL AND FUEL

A. All grease, oil and fuel required for testing of equipment shall be furnished with the respective equipment. The CITY shall be furnished with a year's supply of required lubricants including grease and oil of the type recommended by the manufacturer with each item of equipment supplied.

B. The Contractor shall be responsible for changing the oil in all drives and intermediate drives of each mechanical equipment after initial break-in of the equipment, which in no event shall be any longer than three (3) weeks of operation.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01630 - SUBSTITUTIONS AND PRODUCT OPTIONS

PART 1 – GENERAL
Also refer to/ coordinate with specification section **012500 – Substitution Procedures**

1.01 REQUIREMENTS INCLUDED

A. Contractor shall furnish and install products specified under options and conditions for substitutions stated in this Section.

1.02 RELATED REQUIREMENTS

A. Information for Bidders and General Conditions.

B. Section SC01410: Testing Laboratory Services.

C. Section SC01650: Start-up.

D. Section SC01700: Contract Closeout.

1.03 PRODUCTS LISTED

A. Within thirty (30) days after award of Contract, submit to Consultant six (6) copies of complete list of major products which are proposed for installation.

B. Tabulate products by specification section number and title.

C. For products specified only by reference standards, list for each such product:

1. Name and address of manufacturer.

2. Trade name.

3. Model or catalogue designation.

4. Manufacturer's data:

a. Reference standards.
b. Performance test data.

1.04 CONTRACTOR'S OPTIONS

A. For products specified only by reference standard, select product meeting that standard, by any manufacturer.

B. For products specified by naming several products or manufacturers, select any one of those products and manufacturers named which complies with Specifications.

C. For products specified by naming only one or more products or manufacturers and stating "or equal", select one of those named products or manufacturers. After award of Contract, submit a request as for substitutions, for any product or manufacturer which is not specifically named.

D. For products specified by naming only one product and manufacturer, there is no option and no substitution will be allowed.

1.05 SUBSTITUTIONS

A. Within a period of thirty (30) days after award of Contract, Consultant will consider formal requests from the Contractor for substitution of products in place of those specified:

1. After the end of that period, the request will be considered only in case of product unavailability or other conditions beyond the control of the Contract Documents:

B. Submit a separate request for each substitution. Support each request with:

1. Complete data substantiating compliance of the proposed substitution. Support each request with:

a. Product identification, including manufacturer's name and address.

b. Manufacturer's literature; identify:

1) Product description.

2) Reference standards.

3) Performance and test data.

c. Samples, as applicable.

d. Name and address of similar projects on which product has been used, and the date of each installation.

2. Itemized comparison of the proposed substitution with product specified; list significant variations.

3. Data relating to changes in the construction schedule.

4. Any effect of the substitution on separate contracts.

5. List of changes required in other work or products.

6. Accurate cost data comparing proposed substitution with product specified.

7. Designation of required license fees or royalties.

8. Designation of availability of maintenance services and sources of replacement materials.

C. Substitutions will not be considered for acceptance when:

1. They are indicated or implied on Shop Drawings or product data submittals without a formal request from Contractor.

2. They are requested by anyone other than Contractor.

3. Submitted without data relating to changes in construction schedule.

4. Any effect of substitution on separate contracts is not included.

5. A list of changes required in other work or products is not included.

6. Accurate cost data comparing proposed substitution with product specified is not included.

7. Designation of required license fees or royalties is not included.

8. Designation of availability of maintenance services, sources of replacement materials is not included.

9. Acceptance will require substantial revision of Contract Documents.

D. Substitute products shall not be ordered or installed without written acceptance of Consultant.

E. Consultant will determine the acceptability of proposed substitutions. Contractor shall pay all costs associated with Consultant's review.

1.06 CONTRACTOR'S REPRESENTATION

A. In making formal request for substitution Contractor represents that:

1. It has investigated the proposed product and has determined that it is equal to or superior in all respects to that specified.

2. It will provide same warranties or bonds for substitution as for product specified.

3. It will coordinate installation of accepted changes as may be required for the Work to be complete in all respects.

4. It waive claims for additional costs caused by substitution which may subsequently become apparent.

5. It will pay all costs, resulting under separate contracts, which result from the substitution.

6. It will pay all engineering costs for redesign or revision of the Contract Documents.

7. Cost data is complete and includes related costs under this Contract, but not:

a. Costs under separate contracts.

b. Consultant's costs of redesign or revision of Contract Documents.

1.07 CONSULTANT DUTIES

A. Review Contractor's requests for substitutions with reasonable promptness.

B. Notify Contractor in writing of decision to accept or reject requested substitution.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01650 - START-UP

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: Contractor shall demonstrate to CITY and Consultant that the Work functions as a complete and operable system under normal and emergency operating conditions.

B. Related Work Described Elsewhere:

1. Progress Schedules: Section SC01310.

2. Contract Closeout: Section SC01700.

3. Operating and Maintenance Data: Section SC01730.

PART 2 - PRODUCTS

2.01 START-UP PLAN

A. Submit for Consultant approval a detailed Start-Up Plan outlining the schedule and sequence of all tests and start-up activities, including training and equipment manufacturer representative visits. Start-up and commissioning may not begin until the plan is approved.

PART 3 - EXECUTION

3.01 COMPONENT TEST AND CHECK-OUT

A. Start-up Certification: Prior to system start-up, Contractor shall successfully complete all the testing required of the individual components of the Work. Submit five (5) copies of CHECK-OUT MEMO signed by Contractor or subcontractor and the manufacturer's representative. All copies of the Operation and Maintenance Manuals must be provided before start-up may begin. These forms shall be completed and submitted before Instruction in Operation to CITY or a request for final inspection.

B. Demonstrate to the Consultant that all temporary jumpers and/or bypass have been removed and that all of the components are operating under their own controls as designated.

C. Coordinate start up activities with the CITY's operating personnel and with the Consultant prior to commencing system start-up.

D. Provide seventy-two (72) hour notice of intent to start-up.

3.02 START UP

A. Confirm that all equipment is properly energized, that the valves are set to their normal operating condition and that the flow path through the new work is unobstructed.

B. Slowly fill each hydrostatic structure in the process flow stream with water.

C. Initiate start up in accordance with the plant operation and maintenance manual.

D. Observe the component operation and make adjustments as necessary to optimize the performance of the Work.

E. Coordinate with CITY for any adjustments desired or operational problems requiring debugging.

F. Make adjustments as necessary.

3.03 START-UP DEMONSTRATION AND TESTING

A. After all Work components have been constructed, field tested and started-up in accordance with the individual specifications and manufacturer requirements, perform the Start-Up Demonstration and Testing in the presence of the Consultant and the CITY. The demonstration shall be held upon completion of all systems at a date to be agreed upon in writing by the CITY or his representative.

B. The start-up testing will be conducted for seven (7) consecutive days. The Work must operate successfully during the seven (7) day testing period in the manner intended. If the Work does not operate successfully, or if the start-up is interrupted, the problems will be corrected and the test will start over from day one.

C. During the start-up demonstration period, operate the Work, instruct designated plant operating personnel in the function and operation of the work, and cause various operational circumstances to occur. As a minimum, these circumstances will include average and peak daily flows, random equipment failures, tank overflows, surcharges and bypasses. Demonstrate the essential features of the equipment and its relationship to other equipment. Prior to the substantial completion, the Contractor shall submit a detailed

schedule of operational circumstances. Coordination of the various contract schedules will be accomplished through the Consultant.

D. Acceptability of the Work's performance will be based on the Work performing as specified, under these actual and simulated operating conditions as defined in the Contract Documents. The intent of the start-up demonstration and testing is for the Contractor to demonstrate to the CITY and the Consultant that the Work will function as a complete and operable system under normal as well as emergency operating conditions and is ready for acceptance.

E. Demonstrate the essential features of all the mechanical systems including, but not limited to, the following as they apply to the Work. Each system shall be demonstrated once only, after completion of testing.

1. Variable frequency drives
2. Chlorination equipment
3. Recarbonation System
4. Control Systems
5. Relocated Pumping Systems
6. Valves
7. Ventilation system
8. Air conditioning system
9. Security system

F. Demonstrate the essential features of all electrical systems including, but not limited to, the following as they apply to the work:

1. Electrical systems controls and equipment.
    a. Electrical power equipment.
    b. Motor control centers.
    c. Motor control devices.
    d. Relays.
    e. Special transformers.
    f. Starting devices.
2. Lighting fixtures (including relamping and replacing lenses).
    a. Exit and safety fixtures.
    b. Fixtures, indoor and outdoor.
    c. Floodlighting.
3. Panelboards.
    a. Distribution panels.
    b. Lighting panels.
    c. Main panels, power panels.
    d. Switchboard.
4. Transfer switch.
5. Wiring devices.
    a. Face plates.
    b. Low-voltage controls.
    c. Outlets: convenience, special purpose.
    d. Switches: regular, time.

G. Certificate of Completed Demonstration Form (Section 00866): Submit five (5) copies of Certificate of Completed Demonstration, signed by the Contractor, Subcontractor and CITY and insert one (1) copy in each Operation and Maintenance Manual.

END OF SECTION

SECTION 01700 - CONTRACT CLOSEOUT

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: Contractor shall comply with requirement stated in Conditions of the Contract and in specifications for administrative procedures in closing out the Work.

B. Related Requirements Described Elsewhere:

1. Cleaning: Section SC01710

2. Project Record Documents: Section SC01720

3. Operating and Maintenance Data: Section SC01730

4. Warranties and Bonds: Section SC01740.

1.02 SUBSTANTIAL COMPLETION

A. The Work will not be substantially complete, and Contractor may not request substantial completion inspection unless the following submittals and work is completed:

1. All work specified herein and shown on the drawing is complete.

2. Project Record Documents have been submitted and reviewed to the requirements of Section SC01720.

3. All deficiencies noted on inspection reports or non-conformances are corrected or the correction plan approved.

4. Contractor to submit evidence of compliance with the requirements of governing authorities.

B. When the conditions of paragraph 1.02 A. are met the Contractor shall submit to the Consultant:

1. A written notice that it considers the Work, or portion thereof, is substantially complete, and request an inspection.

C. Within a reasonable time after receipt of such notice, the Consultant will make an inspection to determine the status of completion.

D. When the Consultant finds that the Work is substantially complete, Consultant will:

1. Attend a Substantial Completion walk-through of the facility to include the CITY, Contractor and Consultant and/or Engineer of Record to determine the completeness of the Project and readiness of the facility for occupancy.

2. Prepare and deliver to CITY a Certificate of Substantial Completion with the punchlist of items to be completed or corrected before final inspection.

1.03 FINAL INSPECTION

A. Prior to Contractors request for a final inspection the following submittals and Work must be complete:

1. Project Record Documents must be approved.

2. Equipment and systems have been tested in the presence of the CITY's representative and are operational and training, when applicable.

3. All punchlist items have been corrected.

B. The Consultant will, within reasonable time, make an inspection to verify the status of completion with reasonable promptness after receipt of Contractor's request.

C. Should the Consultant consider that the Work is incomplete or defective:

1. The Consultant will promptly notify the Contractor in writing, listing the incomplete or defective work.

2. Contractor shall take immediate steps to remedy the stated deficiencies, and send another written certification to the Consultant that the Work is complete.

3. The Consultant will within a reasonable amount of time, reinspect the Work and the Contractor shall be liable for reinspection fees as described in paragraph 1.04.

D. When the Consultant finds that the Work is acceptable under the Contract Documents, the Contractor may make closeout submittals.

1.04 REINSPECTION FEES

A. Should the Consultant perform reinspections due to failure of the Work to comply with the claims of status of completion made by the Contractor:

1. Contractor will compensate the CITY for such additional services.

2. CITY will deduct the amount of such compensation from the final payment to the Contractor.

1.05 CONTRACTOR'S CLOSEOUT SUBMITTALS

A. Warranties and Bonds: To requirements of Section SC01740.

B. Evidence of Payment and Release of Liens: To requirements of General and Supplementary Conditions.

C. Certificate of Insurance for Products and Completed Operations.

D. Final Application for Payment

E. Certificate of Substantial Completion.

F. Certificate of Final Inspection, Testing, and Acceptance

G. Closeout of all applicable permits:
1. State or other jurisdictional permits (as applicable):
   a. FDOT
   b. LWDD
   c. SFWMD
   d. USACE
   e. FEC
   f. CSX
2. PBC ROW/MOT
3. PBC Health Department
4. PBC Building Department
5. City of Boynton Beach – Right-of-Way (ROW)
6. City of Boynton Beach Building Department

1.06 FINAL ADJUSTMENT OF ACCOUNTS

A. Submit a final statement of accounting to the Consultant.

B. Statement shall reflect all adjustments to the Contract Sum:

1. The original Contract Sum.

2. Additions and deductions resulting from:

   a. Previous change orders or written amendment.

   b. Allowances.

   c. Unit prices.

   d. Deductions for uncorrected work.

   e. Deductions for liquidated damages.

   f. Deductions for reinspection payments.

   g. Other adjustments.

3. Total Contract Sum, as adjusted.

4. Previous payments.

5. Sum remaining due.

C. Consultant will prepare a final Change Order, reflecting approved adjustments to the Contract Sum which were not previously made by Change Orders.

1.07 FINAL APPLICATION FOR PAYMENT

A. Contractor shall submit the final Application for Payment in accordance with procedures and requirements stated in the Conditions of the Contract.

1.08 RECORD DOCUMENT SUBMITTAL REQUIREMENTS

A. Submit data on 8 ½ x 11inch pages in three-ring binders with durable covers.

B. Prepare binder cover and binder spine with printed title “RECORD DOCUMENT MANUAL”, title of project, and subject matter of binder when multiple binders are required.

C. Internally subdivide the binder contents with permanent page dividers and tabs.

D. Contents: Prepare a Table of Contents as follows:

1. Part 1: Directory, listing names, addresses, and telephone numbers of Engineer, Contractor, Subcontractors and major equipment suppliers.
2. Part 2: Project documents and certificates, including the following:
   a. Certificate of Substantial Completion with signed-off Substantial Completion punchlist.
   b. Certificate of Final Acceptance.
   c. Warranty of Title, form WT-1
   d. Final Release of Lien
   e. Pre- and Post-construction videos and photographs on DVD or CD.
   f. Certifications of closeout of all applicable permits (NPDES, PBC Health Department,

SFWMD, LWDD, PBC or CBB Building Permits, etc.)

E. Submit Operation and Maintenance (O & M) Manuals for all equipment. The O&M Manuals shall include the following information:
   a. Manufacturer's name, address, and telephone number.
   b. List of equipment
   c. Parts list for each component
   d. Operating instructions
   e. Maintenance instructions for equipment and systems.

F. Submit to the CITY, one (1) draft copy of the RECORD DOCUMENT MANUAL fifteen (15) days prior to the request for Final Inspection, Testing and Acceptance. This copy will be reviewed and returned prior to Final Inspection, Testing and Acceptance, with the CITY's comments. Revise content of all document sets as required.

G. Submit one (1) revised FINAL RECORD DOCUMENT MANUAL and six (6) sets for all Operation and Maintenance Manuals, within ten (10) days after Final Inspection, Testing and Acceptance. .

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.1 CLOSEOUT PROCEDURES

A. Submit written certification that the Work has been completed in accordance with Contract Documents and is ready for the Substantial Completion and/or Final Completion walk-throughs.

B. Provide submittals to the Consultant and the CITY that are required by governing or permitting authorities such as Palm Beach County Health Department, Palm Beach County Traffic/Land Development, FDOT, etc. in order to closeout the project.

C. Submit final Application for Payment identifying total adjusted Contract Sum, previous payments, and full release of retainage.

D. Final payment and release of retention with NOT be made until the RECORD DOCUMENT MANUALS, Operation and Maintenance Manuals, and the "AFTER" photographic survey, video, and photographs on DVD/CD have been received and accepted by the CITY.

END OF SECTION

SECTION 01705 - RECORD DRAWING REQUIREMENTS

PART 1 GENERAL

1.01 The terms “Record Drawing” and “As-Built Drawing” shall be synonymous. However, it is the CITY’s preference to refer to these drawings as “Record Drawings”. The Record Drawings are prepared by the Contractor and are used to document the actual construction and other conditions noted in the Contract Documents.

1.02 REQUIREMENTS INCLUDE

A. Contractor shall maintain at the site, a record copy of:

1. Drawings

2. Approved Shop Drawings, Product Data and Samples

3. Field Test Records

1.03 RELATED SECTIONS:

A. Measurement and Payment – Section SC01025

B. Shop Drawings, Work Drawings, and Samples – Section SC01340

C. Testing Laboratory Services – Section SC01410

D. Substitutions and Product Options – Section SC01630

1.04 RELATED REQUIREMENTS

A. The completed final Record Drawings shall be certified by a Florida Registered Land Surveyor. This certification shall consist of the surveyor’s embossed seal bearing his/her registration number, the surveyor’s signature and date (of the survey) on each sheet of the drawing set (including the cover and key sheet). Standard Detail sheets are not required to be included in the Record Drawing set. In addition, all Record Drawing sheets shall list the company name, business address, and telephone number of surveyor. Additionally, the Record Drawings shall meet all Minimum Technical Standards (MTS) requirements.

B. AutoCAD computer generated progress Record Drawings are required to be submitted with each Application for Payment.

1.05 MAINTENANCE OF RECORD DRAWINGS

A. The Contractor shall maintain full size (24”x36”) field drawings to reflect the installed / accepted items of work as the Work progresses. Upon completion of the Work, the Contractor shall submit two (2) sets of full size, signed and sealed Record Drawings and one (1) CD or DVD with the electronic PDF and AutoCAD files (AutoCAD 2010 or newer format). All Record Drawings shall be generated with AutoCAD, and conversions from any other CAD platform to AutoCAD once the drawings are finished are not allowed. Points collected shall be generated with AutoCAD Land Desktop or AutoCAD Civil 3D. An electronic set of the design drawings (including all pertinent XREF’s, CTB files, images, etc.) will be furnished to the Contractor by the design engineer at no cost.

B. Contractor shall label each document, “PROJECT RECORD DRAWING” in neat large printed letters, or by rubber stamp.

C. Contractor shall maintain documents in a clean, dry, legible condition and in good order. Do not use record documents for construction purposes.

D. Record information must be created concurrently with construction progress. Contractor shall not conceal any work until required information is recorded.

E. Contractor shall make documents and samples available for inspection by CITY and CONSULTANT at all times.

1.06 RECORD DRAWINGS

A. Survey/GPS Points: All points shall be collected via NAD83 FL State Plane coordinates and elevations collected via the NAVD88 vertical datum. All drawings shall be in the proper coordinate base, coordinates shall be called out on the drawings, and all field collected data shall be submitted in comma delimited text electronic format.

B. Record Drawings shall include complete as installed information including paving and drainage relative to pavement location; concrete curb; gutter and sidewalks; elevations of surface drainage flows to insure proper routings of storm water runoff; location of inlets, manholes, outfalls, endwalls and

control structures; as well as pipe inverts, top of grates, rim elevations, and other features that were constructed in the Project.

C. The Record Drawings shall include complete as installed information of the utility systems, (water, sanitary sewer and storm water systems) including service laterals, sample points, valves, backflow preventers, information relative to location of manholes, valve pits (enclosures), wet wells, lift stations, as well as the inverts and rim elevations, and any other features that were either constructed as part of the project or discovered during the construction of the project. Any and all As-Built utilities that vary from the design drawing set shall be moved spatially to its correct locations and reflected accordingly in the AutoCAD, PDF, and hard copy Record Drawings.

D. Dimensional ties to water lines shall be provided, both horizontal and vertical, at a minimum of every 200 linear feet (lf). Each water line dimensional tie shall include centerline stationing and be referenced to the nearest edge of roadway paving with elevation of the top of the pipe.

E. Contractor's Record Drawings shall include the key sheet / key map with exact system pipe line and valve locations indicated including GPS coordinates.

F. Computer generated Record Drawings shall be submitted; data in tabular form will not be accepted.

G. Additionally, Station & Offset and GPS coordinates certified by the surveyor, shall be provided for:

1. Water Mains (including raw water as applicable): Valves, fittings, fire hydrants, permanent sample points, service taps and meters.

2. Sanitary Sewers: - Manholes and cleanouts.

3. Stormwater systems: Inlets, manholes and outfalls (including MES).

4. Force Mains: Valves and fittings.

5. Reuse Mains: Valves, fittings, permanent sample points, service taps and meters.

6. Wellfields: Wellheads and valves

7. General: Street light poles, hand-holds and pull boxes

H. Representative items of work that shall be shown on the Record Drawings as verified, changed or added are shown below:

1. Plans:

a. Structure types, location with grade of rim and flow-line elevations.

b. Piping system type (water main, gravity sewer, etc.), length, size and elevations.

c. Utility type, length, size and elevation in conflict structures

d. All maintenance access structures, valve pits, valves and hydrants within right-of way.

e. Critical spot elevations at high or low intersections and the midpoint of all intersections.

f. Sewer laterals.

2. Pavement Marking and Signing Plans: Sign location where installed if different from plans.

I. Record Drawing shall include the following criteria at a minimum.

1. Record Drawings of water lines shall include the following information:

a. Top of pipe elevations and horizontal location every 100 linear feet (lf).

b. Separation callouts between water main, sanitary sewer mains and laterals, reclaimed water and storm drainage piping and structures.

c. Final elevations of surface feature including roadway crown, edge of

pavement (roadway and sidewalk) and swale elevations every 200 liner feet (lf).

d. Station and Offset, GPS locations and elevations of fittings, valves, fire hydrants, permanent sample points and water service taps and meters.

e. All tie-ins to existing lines shall be shown in an enlarged detail of the tie-in configuration.

f. All water services

2. Record Drawings of all gravity sanitary sewer lines include the following information:

a. Rims, inverts and length of piping between structures as well as slopes.

b. Separation callouts between water main, sanitary sewer mains and laterals and storm drainage piping and structures.

c. The stub ends of all sewer laterals shall be located via GPS and if there are any cleanouts installed on the sewer laterals then the invert elevation of these cleanouts need to be obtained.

.

3. Force main Record Drawings shall be prepared the same as the water line Record Drawings.

4. Record Drawings of all storm water drainage systems shall include the following information:

a. Structures, grate elevations, inverts and diameter and length of pipe line between structures, type of drainage system (conveyance and/or exfiltration) and weir elevations if applicable.

b. Separation callouts between water main, sanitary sewer mains and laterals and storm drainage piping and structures.

c. Cross section (ROW to ROW) every 50 feet or critical change in elevation and at each inlet showing sidewalk, inlet grate and/or top and bottom of swale/slope, edge of roadway, roadway crown, edge of roadway, grate and sidewalk elevations.

6. All rock and asphalt Record Drawings for parking lot, roadways and swales areas shall consist of the following:

a. Rock elevations at all high and low points, and at enough intermediate points to confirm slope consistency and every 50’ for roadways.

b. Rock elevations shall be taken at all locations where there is a finish grade elevation shown on the design plans.

c. All catch basin and manhole rim / grate elevations shall be shown.

d. Elevations around island areas are required.

e. As constructed elevations shall be taken on all paved and unpaved swales prior to placement of asphalt and/or topsoil/sod, at enough intermediate points to confirm slope consistency and conformance to the plan details.

7.

b. If a change is made via field order or deviation to any structure, pipeline, etc., a new

location shall be noted on the Record Drawings. The Consultant may request additional Record Drawing information to verify horizontal or vertical locations.

1.07 SUBMITTAL

A. Record Drawings - As a condition precedent to the Contractor's request for Substantial Completion Inspection, the Contractor shall furnish to CITY a complete set of full size paper prints, marked-up Record Drawings with "RECORD DRAWINGS" clearly printed on each sheet for review and approval and acknowledge the receipt of marked up plans, comments that shall be addressed before Final Completion. If there was no change to the drawing, it shall be marked "RECORD DRAWING – NO CHANGE" All final Record Drawing sheets shall be certified, signed and sealed by the Contractor's surveyor.

B. Additionally, the Contractor shall certify by stamping and signing each Record Drawing sheet indicating the fact that it has been reviewed and accepted.

C. Initially, two (2) signed and sealed paper prints are to be submitted to the Project Manager for review. Following review by the Consultant and CITY, any comments are to be addressed. On final submission, the following items shall be provided:

1. Two (2) sets of signed and sealed drawings (24 in. x 36 in.). If sent by mail or courier, the drawings shall be packaged in properly sized shipping tubes.

2. PDF and AutoCAD electronic files on CD or DVD. All proposed data must be crossed out and the computer generated As-Built data must be easily identified and put on AutoCAD layers other than those used by the Design Engineer, with the text "ASB" preceding the layer name. A bold or different font and line weight may be used. A sample of record data must be added to the legend and shown on each plan/profile sheet.

D. The electronic files submitted must be in PDF and AutoCAD 2017 or newer format. All digital files are to be copied on CD or DVD. All fonts and line types shall be from the standard AutoCAD library. Any attachments to drawings (i.e., XREFs, Images, CTB files, or any such attached files) shall be written to CD or DVD. Original layer states shall be saved in AutoCAD prior to making any changes to drawings using the Layer State Manager under the Layer Properties Manager dialog box. As a minimum requirement, electronic files must include all features that were shown on the approved construction plans.

E. When identified on the Schedule of Bid Items as a separate pay item, Record Drawings shall be paid for once the FINAL project Record Drawings have been submitted to and accepted by the CITY and CONSULTANT.

PART 2 PRODUCTS - Not Used.

PART 3 EXECUTION - Not Used.

END OF SECTION

SECTION 01710 – CLEANING

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work: Contractor shall execute cleaning, during progress of the Work and at completion of the Work.

1.02 DISPOSAL REQUIREMENTS

A. Contractor shall conduct cleaning and disposal operations to comply with codes, ordinances, regulations, and anti-pollution laws.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Use only those cleaning materials which will not create hazards to health or property and which will not damage surfaces.

B. Use only those cleaning materials and methods recommended by manufacturer of the surface material to be cleaned.

C. Use cleaning materials only on surfaces recommended by cleaning material manufacturer.

PART 3 - EXECUTION

3.01 DURING CONSTRUCTION

A. Execute daily cleaning to keep the Work, the site and adjacent properties free from accumulations of waste materials, rubbish and windblown debris, resulting from construction operations or personal activities.

B. Remove waste materials, debris and rubbish from the site as needed and dispose of at legal disposal areas away from the site.

C. Contractor shall coordinate and cooperate with the CITY for the routine collection of garbage, debris and recycle materials by assuring access to oversized vehicles. If access to the property owner pick-up points, Contractor shall gather the collection bins, stage them in a pick-up area and then return to the individual property owners after the garbage and/or recycle has been picked-up.

3.02 DUST CONTROL

A. Clean interior spaces prior to the start of finish painting and continue cleaning on an as-needed basis until paint is finished.

B. Schedule operations so that dust and other contaminants resulting from cleaning process will not fall on wet or newly-coated surfaces.

3.03 FINAL CLEANING

A. Employ skilled workmen for final cleaning.

B. Remove grease, mastic, adhesives, dust, dirt, stains, fingerprints, labels, and other foreign materials from sight-exposed interior and exterior surfaces.

C. Prior to final completion, or Owner occupancy, Contractor shall conduct an inspection of sight-exposed interior and exterior surfaces and all work areas, to verify that the entire Work is clean.

END OF SECTION

SECTION 01720 - PROJECT RECORD DOCUMENTS

PART 1 - GENERAL

1.01 IN-PROGRESS PROJECT RECORD DOCUMENTS

A. All dimensions and annotations that are noted below shall be included on the progress and final Record Drawings. Contractor shall maintain on site one (1) record copy for the Consultant of the following as it progresses:

1. Drawings:

2. Specifications

3. Addenda.

4. Change Orders and other modifications of the Contract.

5. Consultant's Field Orders or written instructions.

6. Approved Shop Drawings, Working Drawings and Samples.

7. Field Test records.

9. Construction photographs.

B. Related Requirements Described Elsewhere:

2. Shop Drawings, Working Drawings and Samples: Section SC01340.

3. Construction Photographs: Section SC01380.

4. Video and Photographic Site Survey: Section SC01390

1.02 RECORDING

A. Label each document "PROJECT RECORD" in neat large printed letters.

B. Record information concurrently with construction progress.

1. Do not conceal any work until required information is recorded.

C. Drawings: Legibly mark to record actual construction:

1. Depths of various elements of foundation in relation to finish first floor datum.

2. Location of existing internal utilities and appurtenances concealed in the construction, referenced to visible and accessible features of the structure.

3. Field changes of dimension and detail.

4. Changes made by Field Order or by Change Order.

5. Details not on original Contract Drawings.

6. Equipment and piping relocations.

D. Specifications and Addenda: Legibly mark each section to record:

1. Manufacturer, trade name, catalog number of Supplier of each product and item of equipment actually installed.

2. Product substitutions and alternates utilized.

3. Changes made by Field Order or by Change Order.

1.02 SUBMITTAL

A. At Contract closeout, deliver Record Documents to the Consultant for the CITY.

B. Accompany submittal with transmittal letter in duplicate, containing:

1. Date.

2. Project title and number.

3. Contractor’s name and address.

4. Title and number of each Record Document.

5. Signature of Contractor or his authorized representative.

PART 2 - PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01730 - OPERATING AND MAINTENANCE DATA

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. Contractor shall compile product data and related information appropriate for CITY's maintenance and operation of products furnished under Contract.

a. Prepare operating and maintenance data as specified in this Section and as referenced in other pertinent sections of Specifications.

2. Contractor shall instruct CITY's personnel in maintenance of products and in operation of equipment and systems.

B. Related Requirements Described Elsewhere:

1. Contract Closeout: Section SC01700

2. Project Record Documents: Section SC01720

1.02 QUALITY ASSURANCE

A. Preparation of data shall be done by personnel:

1. Trained and experienced in maintenance and operation of described products.

2. Familiar with requirements of the Section.

3. Skilled as technical writer to the extent required to communicate essential data.

4. Skilled as draftsman competent to prepare required drawings.

1.03 FORM OF SUBMITTALS

A. Prepare data in form of an instructional manual for use by CITY's personnel.

B. Format:

1. Size: 8-1/2 inches x 11 inches.

2. Paper: 20 pound minimum, white, for typed pages.

3. Text: Manufacturer's printed data, or neatly typewritten.

4. Drawings:

a. Provide reinforced punched binder tab, bind in with text.

b. Reduce larger drawings and fold to size of text pages but not larger than 14 inches x 17 inches.

5. Provide fly-leaf for each separate product, or each piece of operating equipment.

a. Provide typed description of projects and major component parts of equipment.

b. Provide identified tabs.

6. Cover: Identify each volume with typed or printed title "OPERATING AND MAINTENANCE INSTRUCTIONS". List:

a. Title of Project.

b. Identity of separate structure as applicable.

c. Identity of general subject matter covered in the manual.

C. Binders:

1. Commercial quality three-post binders with durable and cleanable plastic covers.

2. Maximum post width: 2 inches.

3. When multiple binders are used, correlate the data into related consistent groups.

1.04 CONTENT OF MANUAL

A. Neatly typewritten table of contents for each volume, arranged in systematic order.

1. Contractor, name of responsible principal, address and telephone number.

2. A list of each project required to be included, indexed to content of the volume.

3. List, with each project, name, address and telephone number of:

a. Subcontractor or installer.

b. A list of each product required to be included, indexed to content of the volume.

c. Identify area of responsibility of each.

d. Local source of supply for parts and replacement.

4. Identify each product by product name and other identifying symbols as set forth in Contract Documents.

B. Product Data:

1. Include only those sheets which are pertinent to the specific product.

2. Annotate each sheet to:

a. Clearly identify specific product or part installed.

b. Clearly identify data applicable to installation.

c. Delete references to inapplicable information.

C. Drawings:

1. Supplement product data with drawings as necessary to clearly illustrate:

a. Relations of component parts of equipment and systems.

b. Control and flow diagrams.

2. Coordinate drawings with information in Project Record Documents to assure correct illustration of completed installation.

3. Do not use Project Record Documents as maintenance drawings.

D. Written test, as required to supplement product data for the particular installation:

1. Organize in consistent format under separate headings for different procedures.

2. Provide logical sequence of instruction of each procedure.

E. Copy of each warranty, bond and service contract issued.

1. Provide information sheet for CITY's personnel, give:

a. Proper procedures in event of failure.

b. Instances which might affect validity of warranties or bonds.

1.05 MANUAL FOR MATERIALS AND FINISHES

A. Submit **six (6) copies** of complete manual in final form to the CITY through the CONSULTANT.

B. Content: for architectural products, applied materials and finishes:

1. Manufacturer's data, giving full information on products.

a. Catalog number, size, composition.

b. Color and texture designations.

c. Information required for reordering special manufacturing products.

2. Instructions for care and maintenance.

a. Manufacturer's recommendation for types of cleaning agents and methods.

b. Cautions against cleaning agents and methods which are detrimental to product.

c. Recommend schedule for cleaning and maintenance.

C. Content, for moisture protection and weather-exposed products:

1. Manufacturer's data, giving full information on products.

a. Applicable standards.

b. Chemical composition.

c. Details of installation.

2. Instructions for inspection, maintenance and repair.

D. Additional requirements for maintenance data: Respective sections of Specifications.

1.06 MANUAL FOR EQUIPMENT AND SYSTEMS

A. Submit five (5) copies of complete manual in final form to the CITY through the CONSULTANT.

B. Content, for each unit of equipment and system, as appropriate:

1. Description of unit and component parts.

a. Function, normal operating characteristics, and limiting conditions.

b. Performance curves, engineering data and tests.

c. Complete nomenclature and commercial number of replaceable parts.

2. Operating procedures:

a. Start-up, break-in, routine and normal operating instructions.

b. Regulation, control, stopping, shut-down and emergency instructions.

c. Summer and winter operating instructions.

d. Special operating instructions.

3. Maintenance procedures:

a. Routine operations.

b. Guide to "trouble-shooting".

c. Disassembly, repair and reassembly.

d. Alignment, adjusting and checking.

4. Servicing and lubrication required.

5. Manufacturer's printed operating and maintenance instructions.

6. Description of sequence of operation by control manufacturer.

7. Original manufacturer's parts list, illustrations, assembly drawings and diagrams required for maintenance.

a. Predicted life of parts subject to wear.

b. Items recommended to be stocked as spare parts.

8. As-installed control diagrams by controls manufacturer.

9. Each contractor's coordination drawings.

a. As-installed color coded piping diagrams.

10. Charts of valve tag numbers, with location and function of each valve.

11. List of original manufacturer's spare parts, manufacturer's current prices and recommended quantities to be maintained in storage.

12. Other data as required under pertinent sections of specifications.

C. Content, for each electric and electronic systems, as appropriate:

1. Description of system and component parts.

a. Function, normal operating characteristics, and limiting conditions.

b. Performance curves, engineering data and tests.

c. Complete nomenclature and commercial number of replaceable parts.

2. Circuit directories and panelboards.

a. Electrical service

b. Controls

c. Communications

3. As installed color coded wiring diagrams.

4. Operating procedures:

a. Routine and normal operating instructions.

b. Sequences required.

c. Special operating instructions.

5. Maintenance procedures:

a. Routine operations.

b. Guide to "trouble-shooting".

c. Disassembly, repair and reassembly.

6. Manufacturer's printed operating and maintenance instructions.

7. List of original manufacturer's spare parts, manufacturer's current prices, and recommended quantities to be maintained in storage.

8. Other data as required under pertinent sections of specifications.

D. Prepare and include additional data when the need for such data becomes apparent during instruction of CITY's personnel.

E. Additional requirements for operating and maintenance data: Respective sections of Specifications.

1.07 SUBMITTAL SCHEDULE

A. Submit two (2) copies of completed data in final form to the CITY through the CONSULTANT no later than thirty (30) days following the Consultant's review of the last shop drawing and/or other submittal specified under Section SC01340.

1. One copy will be returned with comments to be incorporated into final copies.

B. Submit **six (6) copies** of approved manual in final form directly to the offices of the Consultant, within thirty (30) calendar days of product shipment to the project site and preferably within 30 days after the reviewed copy is received.

C. Append six (6) copies of addendum to the operation and maintenance manuals as applicable and certificates as specified within thirty (30) days after final inspection and plant start-up test.

1.08 INSTRUCTION OF CITY'S PERSONNEL

A. Fully instruct CITY's designated operating and maintenance personnel in operation, adjustment and maintenance of products, equipment and systems.

B. Review operating and maintenance manual with CITY's operating and maintenance personnel in full detail to explain all aspects of operations and maintenance.

C. A list shall be provided to the CITY detailing the date, time and attendees of all training sessions.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01740 - WARRANTIES AND BONDS

PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. Contractor shall compile specified warranties and bonds, as in Article 5 and 13 of the General Conditions and as specified in these Specifications.

B. Related Work Described Elsewhere:

1. General Conditions: Articles 5 and 13

2. Contract Closeout: Section SC01700.

1.02 SUBMITTAL REQUIREMENTS

A. Assemble warranties, bonds and service and maintenance contracts, executed by each of the respective manufacturers, suppliers, and subcontractors.

B. Number of original signed copies required: Two (2) each.

C. Table of Contents: Neatly typed, in orderly sequence. Provide complete information for each item.

1. Product of work item.

2. Firm, with name of principal, address and telephone number.

3. Scope.

4. Date of beginning of warranty, bond or service and maintenance contract.

5. Duration of warranty, bond or service maintenance contract.

6. Provide information for CITY's personnel:

a. Proper procedure in case of failure.

b. Instances which might affect the validity of warranty or bond.

7. Contractor, name of responsible principal, address and telephone number.

1.03 FORM OF SUBMITTALS

A. Prepare in duplicate packets.

B. Format:

1. Size 8-1/2 inches by 11 inches, punch sheets for standard three (3) post binder.

a. Fold larger sheets to fit into binders.

2. Cover: Identify each packet with typed or printed title "WARRANTIES AND BONDS". List:

a. Title of Project.

b. Name of Contractor.

C. Binders: Commercial quality, three (3) post binder, with durable and cleanable plastic covers and maximum post width of two (2) inches.

1.04 WARRANTY SUBMITTALS REQUIREMENTS

A. For all major pieces of equipment, submit a warranty from the equipment manufacturer. The manufacturer's warranty period shall be concurrent with the Contractor's for one (1) year, unless otherwise specified, commencing at the time of final acceptance by the CITY.

B. The Contractor shall be responsible for obtaining certificates for equipment warranty for all major equipment specified under technical specifications for Divisions 11: Equipment; 13: Special Construction; 15: Mechanical; and 16: Electrical and which has at least a 1 hp motor or which lists for more than $1,000. The Consultant reserves the right to request warranties for equipment not classified as major. The Contractor shall still warrant equipment not considered to be "major" in the Contractor's one-year warranty period even though certificates of warranty may not be required.

C. In the event that the equipment manufacturer or supplier is unwilling to provide a one (1) year warranty commencing at the start of the Correction Period, the Contractor shall obtain from the manufacturer a two (2) year warranty commencing at the time of equipment delivery to the job site. This two (2) year warranty from the manufacturer shall not relieve the Contractor of the one (1) year warranty.

D. The CITY shall incur no labor or equipment cost during the guarantee period.

E. Guarantee shall cover all necessary labor, equipment and replacement parts resulting from faulty or inadequate equipment design, improper assembly or

erection, defective workmanship and materials, leakage, breakage or other failure of all equipment and components furnished by the manufacturer.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01800 - MISCELLANEOUS WORK AND CLEANUP

1 PART 1 - GENERAL

1.01 DESCRIPTION

A. Scope of Work:

1. This Section includes operations which cannot be specified in detail as separate items but can be sufficiently described as to the kind and extent to work involved. The Contractor shall furnish all labor, materials, equipment and incidentals to complete the work under this Section.

2. The work of this Section includes, but is not limited to, the following:

a. Restoring of driveways and fences.

b. Cleaning up.

c. Incidental work.

2 PART 2 - PRODUCTS

2.01 MATERIALS

A. Materials required for this Section shall be of the same quality as materials that are to be restored. Where possible, the Contractor shall reuse existing materials that are removed and then replaced.

3 PART 3 - EXECUTION

3.01 RESTORING OF DRIVEWAYS AND FENCES

A. Existing public and private driveways disturbed by the Contractor shall be replaced. Paved drives shall be repaved to the limits and thickness existing prior to construction. Gravel drives shall be replaced and regraded.

B. The Contractor shall remove, store and replace existing fences during construction. Only the sections directed by the Consultant shall be removed. If any section of fence is damaged due to the Contractor's negligence, it shall be replaced with fencing equal to or better than that damaged, and the work shall be satisfactory to the Consultant.

3.02 CLEAN UP

A. The Contractor shall remove all construction material, buildings, equipment and other debris remaining on the job as the result of construction operations and shall render the site of the work in a neat and orderly condition.

3.03 INCIDENTAL WORK

A. Do all incidental work not otherwise specified, but obviously necessary for the proper completion of the contract as specified and as shown on the Drawings.

BID BOND

WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION

BID No.: UTL25-002

STATE OF FLORIDA)

COUNTY OF PALM BEACH)

KNOW ALL MEN BY THESE PRESENTS, that _____

as Principal, and _____, as Surety, authorized to do business in the State of Florida are held and firmly bound unto the Owner, City of Boynton Beach in the penal sum of _____ Dollars ($_____) lawful money of the United States, for the payment of which sum will and truly to be made, we bond ourselves, our heirs, executors, administrators, and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that whereas the Principal has submitted the accompanying bid, dated _____, 20____, for:

(**WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION**)

NOW THEREFORE,

A. If the principal shall not withdraw such Bid within ninety (90) days after date of opening of the same, and shall within ten (10) days after the prescribed forms are presented to the principal for signature, enter into a written Contract with the Owner in accordance with the Bid as accepted, and give bonds with goods and sufficient surety or sureties, as may be required, for the faithful performance and proper fulfillment of such Contract, then the above obligations shall be void and of no effect, otherwise to remain in full force and effect.

B. In the event of the withdrawal of such Bid within the period specified, or the failure to enter into such Contract and give such bonds within the time specified, if the principal shall pay the Owner the difference between the amount specified in such Bid and the amount for which the Owner may procure the required work and supplies, if the latter amount be in excess of the former then the above obligations shall be void and of no effect, otherwise to remain in full force and effect.

_____, being first duly sworn, deposes and says that:

1) He is _____ of _____, the Vendor that
(Title) (Name of Corporation or Integrator)
has submitted the attached Bid:

2) He is fully informed respecting the preparation and contents of the attached submittal and of all pertinent circumstances respecting such submittal;

3) By signing and submitting this bid, the Vendor certifies that this bid is made independently and free from collusion;

4) Further, the said Vendor nor any of its officers, partners, owners, agents, representatives, employees or parties in interest, including this affiant, has in any way colluded, conspired, connived, or agreed, directly or indirectly with any other Vendor, integrator or person to submit a collusive or sham BID in connection with the Contract for which the attached BID has been submitted or to refrain from bidding in connection with such Contract, or has in any manner, directly or indirectly, sought by agreement or collusion or communications or conference with any other Vendor, integrator or person to fix the price or prices in the attached Bid or of any other Vendor, or to fix any overhead, profit or cost element of the Bid price or the Bid price of other Vendor or to secure through any collusion, conspiracy, connivance or unlawful agreement any advantage against the City of Boynton Beach or any person interested in the proposed Contract; and

5) The price or prices quoted in the attached bid are fair and proper and are not tainted by any collusion, conspiracy, connivance, or unlawful agreement on the part of the Vendor or any of its agents, representatives, owners, employees, or parties in interest, including this affiant.

6) Vendor shall disclose below, to their best knowledge, any City of Boynton Beach officer or employee, or any relative of any such officer or employee as defined in Section 112.3135(1)(c), Florida Statutes, who is an officer of director or, or has a material interest in, the Vendor's business, who is in a position to influence this procurement. Any City of Boynton Beach officer or employee who has any input into the writing of specifications or requirements, solicitation of offers, decision to award, evaluation of offers, or any other activity pertinent to this procurement is presumed, for purposes hereof, to be in a position to indirectly own any of the total assets or capital stock of any business entity owned or operated by the Vendor, or if they otherwise stand to personally gain if the contract is awarded to this Vendor.

CERTIFICATION PURSUANT TO FLORIDA STATUTE § 287.135

WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION

BID No.: UTL25-002

TO BE COMPLETED AND UPLOADED ONLINE

I, _____, on behalf of _____certify

Print Name and Title Company Name

that _____does not:

Company Name

1. Participate in a boycott of Israel; and
2. Is not on the Scrutinized Companies that Boycott Israel List; and
3. Is not on the Scrutinized Companies with Activities in Sudan List; and
4. Is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List; and
5. Has not engaged in business operations in Syria.

Submitting a false certification shall be deemed a material breach of contract. The City shall provide notice, in writing, to the Consultant of the City's determination concerning the false certification. The Consultant shall have ninety (90) days following receipt of the notice to respond in writing and demonstrate that the determination of false certification was made in error. If the Consultant does not demonstrate that the City's determination of false certification was made in error then the City shall have the right to terminate the contract and seek civil remedies pursuant to Florida Statute § 287.135.

Section 287.135, Florida Statutes, prohibits the City from:

1) Contracting with companies for goods or services if at the time of bidding on, submitting a proposal for, or entering into or renewing a contract if the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, F.S. or is engaged in a boycott of Israel; and

2) Contracting with companies, for goods or services that are on either the Scrutinized Companies with activities in the Iran Petroleum Energy Sector list, created pursuant to s. 215.473, or are engaged in business operations in Syria.

As the person authorized to sign on behalf of the Consultant, I hereby certify that the company identified above in the section entitled "Consultant Name" does not participate in any boycott of Israel, is not listed on the Scrutinized Companies that Boycott Israel List, is not listed on either the Scrutinized Companies with

activities in the Iran Petroleum Energy Sector List, and is not engaged in business operations in Syria. I understand that pursuant to section 287.135, Florida Statutes, the submission of a false certification may subject the company to civil penalties, attorney's fees, and/or costs. I further understand that any contract with the City for goods or services may be terminated at the option of the City if the company is found to have submitted a false certification or has been placed on the Scrutinized Companies with Activities in Sudan list or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.

WARRANTIES

WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION

BID No.: UTL25-002

TO BE COMPLETED AND UPLOADED ONLINE

In consideration of, and to induce the Award of **THE CITY OF BOYNTON BEACH, FLORIDA,** Construction Contract described in these Bid Documents, the Vendor represents and warrants to the City of Boynton Beach, Florida:

1. The Vendor is financially solvent and sufficiently experienced and competent to perform all of the work required of the Vendor in the Construction Contract; and

2. That the facts stated in the Vendor's Bid and information given the Vendor pursuant to the request or proposal for Bids, instructions to Vendors and Specifications are true and correct in all respects; and

3. That the Vendor has read and complied with all of the requirements set forth in the request for Bids, instructions to Vendors and Specifications; and

4. That the Vendor warrants all materials supplied by it under the terms of the Construction Contract are delivered to the City of Boynton Beach, Florida, free from any security interest, and other lien, and that the Vendor is a lawful owner having the right to sell the same and will defend the conveyance to the City of Boynton Beach, Florida, against all persons claiming the whole or any part thereof; and

5. That the materials supplied to the City of Boynton Beach, Florida, under the Construction Contract are free from the rightful claims of any persons whomsoever, by way of patent or trademark infringement or the like; and

6. That the materials supplied under the Construction Contract are merchantable within the meaning of the Uniform Commercial Code Section 2-314; and

7. That the materials supplied under the Construction Contract are free from defects in materials and workmanship under normal use and service and that any such materials found to be defective shall be replaced by the Vendor as per the attached Warranty.

8. That the materials supplied pursuant to the Construction Contract are fit for the purposes for which they are intended to be used; that under normal use and maintenance, the material will continue to be fit for such purposes for the warranty period after delivery, provided that the City shall give the Vendor notice that the materials failed to fulfill the warranty; such notice shall state in what respect the materials have failed to fulfill the warranty, whereupon the Vendor shall be allowed a reasonable time after receipt of such notice to correct the defect and the City agrees to cooperate in this regard. If the materials cannot be made to fulfill the Contract within the warranty period the Vendor will either furnish duplicate materials, or at its option, refund the amount paid, which shall constitute a settlement in full for all damages occasioned by reason at this warranty of fitness; and

9. That this Warranty is included in exposures for which the Vendor has products liability and completed operations insurance, in minimum amounts of One Million ($1,000,000.00) Dollars for property damage and One Million ($1,000,000.00) Dollars for personal injury as shown on the

Certificates of such Insurance attached hereto, and the Vendor agrees to keep such insurance coverage during the period of this Warranty; and

10. That it is an express condition of this Warranty that the item(s) hereby warranted shall be operated and maintained by the City in accordance with the manufacturer's recommendations as to those portions of the item(s) that are not fabricated by the Vendor, and in accordance with the Vendor's recommendations, a copy of which has either been supplied to the City of Boynton Beach should maintain complete and accurate records made at the time of performance of maintenance showing compliance with such instructions, and by acceptance of this Warranty, the City of Boynton Beach, Florida, agrees to present such records to the Vendor upon request in the event of a claim hereunder by the City;

11. The foregoing Warranties apply as a minimum and are supplemental to other Warranties offered. They are not substituted, but in addition to, any other Warranties offered; and

12. That it is agreed and understood by the Vendor that the City of Boynton Beach, Florida, is induced to enter the Construction Contract in reliance upon this Warranty.

CITY OF BOYNTON BEACH
E-VERIFY FORM UNDER SECTION 448.095, FLORIDA STATUTES
TO BE COMPLETED AND UPLOADED ONLINE

Project Name: **WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION**

Solicitation No.: **UTL25-002**

1. Definitions:

   "CONTRACTOR" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for salary, wages, or other remuneration. "CONTRACTOR" includes, but is not limited to, a vendor or consultant.

   "SUB-CONTRACTOR" means a person or entity that provides labor, supplies, or services to or for a CONTRACTOR or another SUB-CONTRACTOR in exchange for salary, wages, or other remuneration.

   "E-Verify system" means an Internet-based system operated by the United States Department of Homeland Security that allows participating employers to electronically verify the employment eligibility of newly hired employees.

2. Effective January 1, 2021, CONTRACTORS, shall register with and use the E-Verify system in order to verify the work authorization status of all newly hired employees. CONTRACTOR shall register for and utilize the U.S. Department of Homeland Security's E-Verify System to verify the employment eligibility of:

   a) All persons employed by a CONTRACTOR to perform employment duties within Florida during the term of the contract; and

   b) All persons (including sub-vendors/sub-consultants/sub-CONTRACTORS) assigned by CONTRACTOR to perform work pursuant to the contract with the City of Boynton Beach. The CONTRACTOR acknowledges and agrees that registration and use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City of Boynton Beach; and

   c) Should vendor become the successful CONTRACTOR awarded for the above-named project, by entering into the contract, the CONTRACTOR shall comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes, but is not limited to registration and utilization of the E-Verify System to verify the work authorization status of all newly hired employees. CONTRACTOR shall also require all SUB-CONTRACTORS to provide an affidavit attesting that the SUB-CONTRACTOR does not employ, contract with, or subcontract with, an unauthorized alien. The CONTRACTOR shall maintain a copy of such affidavit for the duration of the contract.

3. Contract Termination

   a) If the City has a good faith belief that a person or entity with which it is contracting has knowingly violated s. 448.09 (1) Fla. Stat., the contract shall be terminated.

   b) If the City has a good faith belief that a SUB-CONTRACTOR knowingly violated s. 448.095 (2), but the CONTRACTOR otherwise complied with s. 448.095 (2) Fla. Stat., shall promptly notify the CONTRACTOR and order the CONTRACTOR to immediately terminate the contract with the SUB-CONTRACTOR.

TO BE CONSIDERED COMPLETE AND ACCEPTABLE

c) A contract terminated under subparagraph a) or b) is not a breach of contract and may not be considered as such.

d) Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination.

e) If the contract is terminated for a violation of the statute by the CONTRACTOR, the CONTRACTOR may not be awarded a public contract for a period of 1 year after the date of termination.

DRAFT
CONSTRUCTION CONTRACT
WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION

SUBJECT TO REVISIONS PRIOR TO SIGNING

THIS AGREEMENT is entered into by and between the CITY OF BOYNTON BEACH, a municipal corporation organized and existing under the laws of Florida, with a business address of 100 East Ocean Ave., Boynton Beach, FL 33435, hereinafter referred to as "CITY", and [type of entity: corporation/partnership/sole proprietor] authorized to do business in the State of Florida, with a business address of _____, hereinafter referred to as the "CONTRACTOR".

WHEREAS, the CITY has selected the CONTRACTOR to perform construction services related the **WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION PROJECT**; and,

WHEREAS, at its meeting of **XXXX, X, 2024**, by Resolution No. _____, the CITY Commission approved this award to CONTRACTOR and authorized the proper CITY officials to execute this Agreement hereinafter referred to as Contract No.: **UTL25-002** and used interchangeably with "Contract".

NOW, THEREFORE, CITY and VENDOR, in consideration of the mutual covenants hereinafter set forth, agree as follows:

Article 1. SCOPE OF WORK. VENDOR shall furnish all labor, materials, equipment, services, and incidents necessary to perform all "WORK" described in the Contract Documents (as defined in Article 8 below) and related thereto for the Project.

Article 2. CONSULTANT. Shall mean the (CITY of Boynton Beach) / _____("CONSULTANT"), which has designed the Project and will assume all duties and responsibilities and will have the rights and authority assigned to CONSULTANT in connection with the completion of the WORK in accordance with the Contract Documents.

Article 3. CONTRACT TIME; TERMINATION; LIQUIDATED DAMAGES.

3.1. **Contract Time.** The WORK will be substantially completed within (210) [two hundred ten] calendar days from the effective date of this Agreement, when the Contract Time commences to run as provided in paragraph 2.3 of the General Conditions and completed and ready for final payment in accordance with paragraph 14.9 of the General Conditions within 30 calendar days from the date of Substantial Completion.

3.2. **Termination for Convenience.** This Agreement may be terminated by CITY for convenience, upon providing fourteen (14) business days of written notice to VENDOR for such termination. In the event of termination, VENDOR shall be paid its compensation for services performed until the termination date, including services reasonably related to termination. In the event that VENDOR abandons this Agreement or causes it to be terminated, VENDOR shall indemnify CITY against loss pertaining to this termination.

3.3. **Termination for Cause**. In addition to all other remedies available to CITY, this Agreement shall be subject to cancellation by CITY for cause, should VENDOR neglect or fail to perform or observe any of the terms, provisions, conditions, or requirements herein contained, if such neglect or failure shall continue for a period of thirty (30) days

after receipt by VENDOR of written notice of such neglect or failure.

3.4. **Liquidated Damages.** The CITY and VENDOR recognize and acknowledge that time is of the essence of this Contract and that the CITY will suffer financial loss if the WORK is not completed within the times specified in paragraph 3.1 above, plus any extensions thereof allowed in accordance with Article 12 of the General Conditions. Each of the parties acknowledges that it has attempted to quantify the damages which would be suffered by the CITY in the event of the failure of VENDOR to perform in a timely manner, but neither one has been capable of ascertaining such damages with certainty. CITY and VENDOR also recognize and acknowledge the delays, expense, and difficulties involved in proving in a legal preceding the actual loss suffered by the CITY if the WORK is not completed on time. Accordingly, instead of requiring any such proof, the CITY and VENDOR agree that as liquidated damages for delay (but not as a penalty) VENDOR shall pay the CITY, [_____] Dollars ($_____) for each day of that expires after the time specified in paragraphs 3.1 for substantial completion until the WORK is substantially complete. After Substantial Completion, if VENDOR shall neglect, refuse or fail to complete the remaining WORK within the Contract Time or any proper extension thereof granted by the CITY, VENDOR shall pay CITY [_____] Dollars [$_____] for each day that expires after the time specified in paragraph 3.1 for completion and readiness for final payment.

Article 4. CONTRACT PRICE.

CITY shall pay VENDOR, for the faithful performance of the Contract, in lawful money of the United States of America, and subject to the additions and deductions as provided in the Contract Documents, a total sum as follows:

Based on the Contract prices shown in the Bid Form submitted to the CITY as subsequently revised and as stated herein, a copy of such Bid Form being a part of the Contract Documents, the aggregate amount of this Contract (obtained from either the lump sum price, the application of unit prices to the quantities shown in the Bid Form or the combination of both) not to exceed:

_____

(Written) **(Numerical)**

Article 5. PAYMENT PROCEDURES.

VENDOR shall submit Applications for Payment in accordance with **Article 14** of the General Conditions. CITY will process Applications for Payment as provided in the General Conditions.

5.1 Progress Payments. VENDOR may submit an Application for Payment as recommended by CONSULTANT, for WORK completed during the Project at intervals of not more than once a month. All progress payments will be on the basis of the progress of WORK measured by the schedule of values established in Paragraph **2.9.1** of the General Conditions and in the case of Unit Price Work based on the number of units completed or, in the event there is no schedule of values, as provided in the General Requirements.

5.2 Prior to Substantial Completion progress payments will be made in an amount equal to 90% of WORK completed, but, in each case, less the aggregate of payments previously made and less such amounts as CONSULTANT shall determine, or CITY may withhold, in accordance with paragraph **14.5** of the General Conditions.

5.3 VENDOR shall submit with each Application for Payment, an updated progress schedule acceptable to the CITY and a Warranty of Title/Release of Liens relative to the Work that is the subject of the Application. Each Application for Payment shall be submitted to the CITY for approval. The CITY shall make payment to the VENDOR within thirty (30) days after approval by the CITY of VENDOR'S Application for Payment and submission of an acceptable updated progress schedule.

5.4 Five percent (5) of all monies earned by the VENDOR shall be retained by the CITY until Final Completion of the construction services purchased (defined as that point at which one hundred (100) percent of the construction of the work as defined in the Contract Schedule of Values has been performed under the contract by the VENDOR) has been reached and acceptance by CITY.

5.5 The CITY may withhold, in whole or in part, payment to such extent as may be necessary to protect itself from loss on account of:

a. Defective Work not remedied.
b. Claims filed or reasonable evidence indicating probable filing of claims by other parties against VENDOR.
c. Failure of VENDOR to make payments properly to SUBCONTRACTORS or for material or labor.
d. Damage to another VENDOR not remedied.
e. Liquidated damages and costs incurred by the CITY for extended construction administration.

When the above grounds are removed or resolved or VENDOR provides a surety bond or consent of Surety, satisfactory to the CITY, which will protect the CITY in the amount withheld, payment may be made in whole or in part.

5.6 Final Payment. Upon final completion and acceptance of the WORK in accordance with paragraph **14.10** of the General Conditions, CITY shall pay the remainder of the Contract Price as recommended by CONSULTANT as provided in paragraph **14.10**.

5.7 All payments shall be governed by the Local Government Prompt Payment Act, as set forth in Part VII, Chapter 218, Florida Statutes.

Article 6. RETAINAGE.

Within 30 calendar days after reaching the earlier of substantial completion or beneficial occupancy, the City/Owner and the Vendor will inspect the work and develop a punch list covering those items required to render complete, satisfactory, and acceptable construction services purchased by the City/Owner. The punch list will include a schedule of values that provides the estimated cost to complete each item on the punch list. If the City/Owner and Vendor are unable to agree on an item or value, the City/Owner has final discretion whether to include an item and the amount for valuation of the cost to complete each item on the punch list. Within 20 business days after the creation of the punch list, the remaining contract balance, including retainage, will be paid to the Vendor less an amount equal to 150 percent of the cost to complete the items on the punch list. Upon reaching final acceptance for an item or all items, the 150 percent withheld for each item will be released with final payment. For projects valued at $10 million or more, the 30-calendar day period may be extended to 45 days.

Article 7. CONTRACTOR GUARANTEE.

VENDOR warrants all work, materials, and equipment shall be free from damages and/or defects owing to faulty materials or workmanship for a period of one (1) year after completion of the WORK covered by this Contract. The VENDOR, free of all costs to the CITY, shall replace any part of the equipment, materials, or work included in this Contract, which proves to be defective by reason of faulty materials, damages, and/or workmanship within twelve (12) month period.

Article 8. CONTRACT DOCUMENTS.

The Documents hereinafter listed shall form the Contract, and they are as fully a part of the Contract as if attached hereto:

8.1 Request for Bid

8.2 Instructions to Proposers / Bidders

8.3 Proposal Forms (including the Proposal, Schedule(s), Submission Requirements of Proposer / Bidder, and all required certificates, affidavits, and other documentation)

ARTICLE 9. NOTICE: All notices required in this Contract shall be sent by certified mail, return receipt requested, and if sent to CITY shall be mailed to:

Daniel Dugger, City Manager City
of Boynton Beach
100 East Ocean Ave,
Boynton Beach, FL 33435
Telephone No. (561) 742-6000

And if sent to the VENDOR shall be mailed to:

Telephone #:
Email:

Article 10. INDEMNITY.

10.1 The VENDOR shall indemnify and hold harmless the CITY and its officers, employees, agents, instrumentalities, and the State of Florida, Division of Emergency Management from liability, losses or damages, including attorneys' fees and costs of defense through the conclusion of any appeals, which the CITY or its officers, employees, agents or instrumentalities may incur as a result of claims, demands, suits, causes of actions or proceedings of any kind or nature arising out of or resulting from the negligence, recklessness, or intentional wrongful misconduct of VENDOR, its employees, agents, partners, principals or subcontractors during the term of this Agreement or resulting thereafter. The VENDOR shall pay all claims and losses in connection therewith and shall investigate and defend all claims, suits or actions of any kind or nature in the name of the CITY, where applicable, including appellate proceedings, and shall pay all costs, judgments, and attorneys' fees which may issue thereon. The VENDOR expressly understands and agrees that any insurance protection required by this Agreement or otherwise provided by the VENDOR shall in no way limit the responsibility to indemnify, keep and save harmless and defend the CITY or its officers, employees, agents and instrumentalities as herein provided.

10.2 VENDOR's aggregate liability pursuant to this indemnification provision shall not exceed one and one-half (1 1/2) times the contract price or One Million Dollars ($1,000,000) per occurrence, whichever is greater.

10.3 Upon completion of all services, obligations, and duties provided for in this Agreement, or in the event of termination of this Agreement for any reason, the terms and conditions

of this Article shall survive indefinitely.

10.4 CITY reserves the right to select its own legal counsel to conduct any defense in any such proceeding and all costs and fees associated therewith shall be the responsibility of VENDOR.

10.5 Nothing contained herein is intended nor shall be construed as a contractual waiver of the CITY's rights, limits, and immunities under the common law or Section 768.28, Florida Statutes, as may be amended from time to time, nor a waiver of any defense the CITY may have and shall not be construed as consent to be sued by third parties based on any claims arising under this Contract. VENDOR and CITY agree that any liability of the CITY under this Contract shall be limited to the amounts set forth in Sec. 728.68, Florida Statutes.

Article 11. REIMBURSEMENT OF CONSULTANT EXPENSES.

Should the completion of this Contract be delayed beyond the specified or adjusted time limit, VENDOR shall reimburse the CITY for all expenses of consulting and inspection incurred by the CITY during the period between said specified or adjusted time and the actual date of final completion. All such expenses for consulting and inspection incurred by the CITY will be charged to the VENDOR and be deducted from payments due VENDOR as provided by this Contract. Said expenses shall be further defined as CONSULTANT charges associated with the construction contract administration, including resident project representative costs.

Article 12. FLORIDA'S PUBLIC RECORDS LAW.

The CITY is a public agency subject to Chapter 119, Florida Statutes. The VENDOR shall comply with Florida's Public Records Law. Specifically, the VENDOR shall:

12.1 Keep and maintain public records required by the CITY to perform the service;

12.2 Upon request from the CITY's custodian of public records, provide the CITY with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statue or as otherwise provided by law;

12.3 Ensure that public records that are exempt or that are confidential and exempt from public record disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and, following completion of the contract, VENDOR shall destroy all copies of such confidential and exempt records remaining in its possession once the VENDOR transfers the records in its possession to the CITY; and,

12.4 Upon completion of the contract, VENDOR shall transfer to the CITY, at no cost to the CITY, all public records in VENDOR's possession. All records stored electronically by VENDOR must be provided to the CITY, upon request from the CITY's custodian of public records, in a format that is compatible with the information technology systems of the CITY.

12.5 **IF THE VENDOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE VENDOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS:**

CITY CLERK'S OFFICE
100 E. OCEAN AVENUE
BOYNTON BEACH, FLORIDA 33435
561-742-606
CityClerk@bbfl.us

Article 13. E-VERIFY.

13.1 VENDOR certifies that it is aware of and complies with the requirements of Section 448.095, Florida Statutes, as may be amended from time to time and briefly described herein below.

13.1.1 Definitions for this Section:

A. "Contractor" means a person or entity that has entered or is attempting to enter into a contract with a public employer to provide labor, supplies, or services to such employer in exchange for a salary, wages, or other remuneration. "Contractor" includes, but is not limited to, a vendor or consultant.

B. "Subcontractor" means a person or entity that provides labor, supplies, or services to or for a contractor or another subcontractor in exchange for a salary, wages, or other remuneration.

C. "E-Verify system" means an Internet-based system operated by the United States Department of Homeland Security that allows participating employers to electronically verify the employment eligibility of newly hired employees.

13.1.2 Registration Requirement; Termination: Pursuant to Section 448.095, Florida Statutes, effective January 1, 2021, Contractors, shall register with and use the E-Verify system in order to verify the work authorization status of all newly hired employees. Contractor shall register for and utilize the U.S. Department of Homeland Security's E- Verify System to verify the employment eligibility of:

A. All persons employed by a Contractor to perform employment duties within Florida during the term of the contract; and

B. All persons (including sub-vendors/sub-consultants/sub-contractors) assigned by Contractor to perform work pursuant to the contract with the City of Boynton Beach. The Contractor acknowledges and agrees that registration and use of the U.S. Department of Homeland Security's E-Verify System during the term of the contract is a condition of the contract with the City of Boynton Beach; and

C. The Contractor shall comply with the provisions of Section 448.095, Fla. Stat., "Employment Eligibility," as amended from time to time. This includes, but is not limited to registration and utilization of the E-Verify System to verify the work authorization status of all newly hired employees. Contractor shall also require all subcontractors to provide an affidavit attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien. The Contractor shall maintain a copy of such affidavit for the duration of the contract. Failure to comply will lead to termination of this Contract, or if a subcontractor knowingly violates the statute, the subcontract must be terminated immediately. Any challenge to termination under this provision must be filed in the Circuit Court no later than twenty (20) calendar days after the date of termination. Termination of this Contract under this Section is not a breach of contract and may not be considered as such. If this contract is terminated for a violation of the statute by the Contractor, the Contractor may not be awarded a public contract for a period of one (1) year after the date of termination.

Article 14. PROHIBITION AGAINST CONSIDERING SOCIAL, POLITICAL OR IDEOLOGICAL INTERESTS IN GOVERNMENT CONTRACTING -- F.S. 287.05701.

VENDOR is hereby notified of the provisions of section 287.05701, Florida Statutes, as amended, that the CITY will not request documentation of or consider VENDOR's social, political, or ideological interests when determining if the VENDOR is a responsible contractor. VENDOR is further notified that the CITY's governing body may not give preference to a Vendor based on the VENDOR's social, political, or ideological interests.

Article 15. SCRUTINIZED COMPANIES.

By execution of this Agreement, VENDOR certifies that VENDOR is not participating in a boycott of Israel. VENDOR further certifies that VENDOR is not on the Scrutinized Companies that Boycott Israel list, not on the Scrutinized Companies with Activities in Sudan List, and not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has VENDOR been engaged in business operations in Syria. Subject to limited exceptions provided in state law, the CITY will not contract for the provision of goods or services with any scrutinized company referred to above. Submitting a false certification shall be deemed a material breach of contract. The CITY shall provide notice, in writing, to the VENDOR of the CITY's determination concerning the false certification. VENDOR shall have five (5) days from receipt of notice to refute the false certification allegation. If such false certification is discovered during the active contract term, the VENDOR shall have ninety (90) days following receipt of the notice to respond in writing and demonstrate that the determination of false certification was made in error. If the VENDOR does not demonstrate that the CITY's determination of false certification was made in error then the CITY shall have the right to terminate the contract and seek civil remedies pursuant to Section 287.135, Florida Statutes, as amended from time to time.

Article 16. COVENANT AGAINST CONTINGENT FEES.

The VENDOR warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for the VENDOR, to solicit or secure this Agreement, and that VENDOR has not paid or agreed to pay any company or person, other than a bona fide employee working solely for the VENDOR any fee, commission, percentage, brokerage fee, gifts, or any other consideration contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, the CITY shall have the right to annul this Agreement without liability or, in its discretion to deduct from the contract price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift, or contingent fee.

Article 17. TRUTH IN NEGOTIATION CERTIFICATE.

A. Execution of this Agreement by the VENDOR shall act as the execution of a truth-in-negotiation certificate certifying that the wage rates and costs used to determine the compensation provided for in this Agreement is accurate, complete, and current as of the date of the Agreement and no higher than those charged to the VENDOR's most favored customer for the same or substantially similar service.

B. The said rates and cost shall be adjusted to exclude any significant sums should the CITY determine that the rates and costs were increased due to inaccurate, incomplete, or non-current wage rates or due to inaccurate representations of fees paid to outside vendors. The CITY shall exercise its rights under this "Certificate" within one (1) year following payment.

Article 18. ENTITIES OF FOREIGN CONCERN.

The provisions of this section apply only if Vendor or any subcontractor will have access to an individual's personal identifying information under this Agreement. Vendor represents and certifies: (i) Vendor is not owned by the government of a foreign country of concern; (ii) the government of a foreign country of concern does not have a controlling interest in Vendor; and (iii) Vendor is not organized under the laws of and does not have its principal place of business in, a foreign country of concern. Prior to Vendor and any subcontractor having access to personal identifying information pursuant to this Agreement, Vendor and any subcontractor shall submit to City executed affidavit(s) under penalty of perjury, in a form approved by City attesting that the entity does not meet any of the criteria in Section 287.138(2), Florida Statutes. Compliance with the requirements of this section is included in the requirements of a proper invoice. Terms used in this section that are not otherwise defined in this Agreement shall have the meanings ascribed to such terms in Section 287.138, Florida Statutes.

Article 19. ANTI-HUMAN TRAFFICKING.

On or before the Effective Date of this Agreement, VENDOR shall provide CITY with an affidavit attesting that the VENDOR does not use coercion for labor or services, in accordance with Section

787.06(13), Florida Statutes.

Article 20. MISCELLANEOUS.

20.1 Any and all legal action necessary to enforce the terms of this Agreement shall be governed by the laws of the State of Florida. Any legal action arising from the terms of this Agreement shall be submitted to a court of competent jurisdiction located exclusively in Palm Beach County.

20.2 No assignment by a party hereto of any rights under or interests in the Contract Documents will be binding on another party hereto without the written consent of the party sought to be bound; and specifically but without limitation, moneys that may become due and moneys that are due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

20.3 City and VENDOR each bind itself, their partners, successors, assigns, and legal representatives to the other party hereto, their partners, successors, assigns, and legal representatives in respect of all covenants, agreements, and obligations contained in the Contract Documents.

20.4 In the event that either party brings suit for enforcement of this Agreement, each party shall bear its own attorney's fees and court costs, except as otherwise provided under the indemnification provisions set forth herein above.

20.5 Prior to final payment of the amount due under the terms of this Agreement, to the extent permitted by law, a final waiver of lien shall be required to be submitted by the VENDOR, as well as all suppliers and subcontractors who worked on the project that is the subject of this Agreement. Payment of the invoice and acceptance of such payment by VENDOR shall release City from all claims of liability by VENDOR in connection with this Agreement.

20.6 At all times during the performance of this Agreement, VENDOR shall protect CITY's property from all damage whatsoever on account of the work being carried on under this Agreement.

20.7 It shall be the VENDOR’s responsibility to be aware of and comply with all statutes, ordinances, rules, orders, regulations, and requirements of all local, city, state, and federal agencies as applicable.

20.8 This Agreement represents the entire and integrated agreement between City and VENDOR and supersedes all prior negotiations, representations, or agreements, either written or oral. This Agreement is intended by the parties hereto to be the final expression of this Agreement, and it constitutes the full and entire understanding between the parties with respect to the subject hereof, notwithstanding any representations, statements, or agreements to the contrary heretofore made. In the event of a conflict between this Agreement, the solicitation, and the VENDOR’s bid proposal, this Agreement shall govern then the solicitation, and then the bid proposal.

20.9 U.S. Produced Iron and Steel. VENDOR shall comply with the requirements of Section 255.0993, Florida Statutes, which requires any iron or steel product permanently incorporated in the project must be produced in the United States.

20.10 Waiver of Chapter 558, Florida Statutes. Pursuant to Section 558.005(1), VENDOR and CITY agree to opt out of the requirements of Chapter 558, Florida Statutes.

20.11 This Agreement will take effect once signed by both parties. This Agreement may be executed by hand or electronically in multiple originals or counterparts, each of which shall be deemed to be an original and together shall constitute one and the same agreement. Execution and delivery of this Agreement by the Parties shall be legally binding, valid and effective upon delivery of the executed documents to the other party through facsimile

transmission, email, or other electronic delivery.

Article 21. DEFAULT OF CONTRACT & REMEDIES.

21.1 **Correction of Work.** If, in the judgment of CITY, work provided by VENDOR does not conform to the requirements of this Agreement, or if the work exhibits poor workmanship, CITY reserves the right to require that VENDOR correct all deficiencies in the work to bring the work into conformance without additional cost to CITY, and/or replace any personnel who fail to perform in accordance with the requirements of this Agreement. CITY shall be the sole judge of non-conformance and the quality of workmanship.

21.2 **Default of Contract.** The occurrence of any one or more of the following events shall constitute a default and breach of this Agreement by VENDOR:

21.2.1 The abandonment of the project by VENDOR for a period of more than seven (7) business days.

21.2.2 The abandonment, unnecessary delay, refusal of, or failure to comply with any of the terms of this Agreement or neglect, or refusal to comply with the instructions of the CITY's designee.

21.2.3 The failure by VENDOR to observe or perform any of the terms, covenants, or conditions of this Agreement to be observed or performed by VENDOR, where such failure shall continue for a period of seven (7) days after written notice thereof by CITY to VENDOR; provided, however, that if the nature of VENDOR's default is such that more than seven (7) days are reasonably required for its cure, then VENDOR shall not be deemed to be in default if VENDOR commences such cure within said seven (7) day period and thereafter diligently prosecutes such cure to completion.

21.2.4 The assignment and/or transfer of this Agreement or execution or attachment thereon by VENDOR or any other party in a manner not expressly permitted hereunder.

21.2.5 The making by VENDOR of any general assignment or general arrangement for the benefit of creditors, or the filing by or against VENDOR of a petition to have VENDOR adjudged a bankruptcy, or a petition for reorganization or arrangement under any law relating to bankruptcy (unless, in the case of a petition filed against VENDOR, the same is dismissed within sixty (60) days); or the appointment of a trustee or a receiver to take possession of substantially all of VENDOR's assets, or for VENDOR's interest in this Agreement, where possession is not restored to VENDOR within thirty (30) days; for attachment, execution or other judicial seizure of substantially all of VENDOR's assets, or for VENDOR's interest in this Agreement, where such seizure is not discharged within thirty (30) days.

21.3 **Remedies in Default.** In case of default by VENDOR, CITY shall notify VENDOR, in writing, of such abandonment, delay, refusal, failure, neglect, or default and direct VENDOR to comply with all provisions of the Agreement. A copy of such written notice shall be mailed to the Surety on the Performance Bond. If the abandonment, delay, refusal, failure, neglect or default is not cured within seven (7) days of when notice was sent by CITY, CITY may declare a default of the Agreement and notify VENDOR of such declaration of default and terminate the Agreement. The Surety on the Performance Bond shall within ten (10) days of such declaration of default, rectify or cause to be rectified any mismanagement or breach of service in the Agreement and assume the work of VENDOR and proceed to perform services under the Agreement, at its own cost and expense.

21.3.1 Upon such declaration of default, all payments remaining due VENDOR at the time of default, less all sums due CITY for damages suffered, or expenses incurred by reason of default, shall be due and payable to Surety. Thereafter the Surety shall receive monthly payments equal to those that would have been paid by the VENDOR had the VENDOR continued to perform the services under the Agreement.

21.3.2 CITY may complete the Agreement, or any part thereof, either by day labor, use of

a subcontractor, or by re-letting a contract for the same, and procure the equipment and the facilities necessary for the completion of the Agreement, and charge the cost of same to VENDOR and/or the Surety together with the costs incident thereto to such default.

21.3.3 In the event CITY completes the Agreement at a lesser cost than would have been payable to VENDOR under this Agreement, if the same had been fulfilled by VENDOR, CITY shall retain such differences. Should such cost to CITY be greater, VENDOR shall pay the amount of such excess to the CITY.

21.3.4 Notwithstanding the other provisions in this Article, CITY reserves the right to terminate the Agreement at any time, whenever the service provided by VENDOR fails to meet reasonable standards of the trade after CITY gives written notice to the VENDOR of the deficiencies as set forth in the written notice within thirty calendar (30) days after the receipt by VENDOR of such notice from CITY.

SIGNATURE PAGE FOLLOWS

"This Agreement will take effect once signed by both parties. This Agreement may be signed by the parties in counterparts, whether signed physically or electronically, which together shall constitute one and the same agreement among the parties. A facsimile signature shall constitute an original signature for all purposes."

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals on the day and year set forth below their respective signatures.

PERFORMANCE BOND

WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION
BID No.: UTL25-002

KNOW ALL MEN BY THESE PRESENTS: that _____
(Insert name of Vendor)

_____as Principal, (Address or legal title of Vendor)

hereinafter called Vendor, and _____
(Name and address of Surety)

_____

as Surety, hereinafter called Surety, are held and firmly bound unto CITY OF BOYNTON BEACH, P.O. BOX 310, BOYNTON BEACH, FLORIDA 33425-0310 as Obligee, hereinafter called Owner, in the amount of _____Dollars ($_____),

for payment whereof Vendor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS,

Vendor has by written agreement dated _____, 20__, entered into a contract with Owner for _____ in accordance with drawings and specifications prepared by _____ which contract is by reference made a part of hereof, and is hereinafter referred to as the Contract.

NOW THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Vendor shall promptly and faithfully perform such Contract, then this obligation shall be null and void; otherwise it shall remain in full force and effect.

The Surety hereby waives notice of any alteration or extension of time made by the Owner.

Whenever Vendor shall be, and declared by Owner to be in default under the Contract, the Owner having performed Owner's obligations thereunder, the Surety may promptly remedy the default, or shall promptly:

1. Arrange for the Vendor, with the consent of the Owner, to perform and complete the Contract in accordance with its terms and conditions, or

2. Undertake to perform and complete the Contract itself, through its agents or independent Vendors; or

3. Obtain a bid or bids from qualified Vendors acceptable to the Owner for completing the Contract in accordance with its terms and conditions, and upon determination by Surety of the most responsible vendor, or, if the Owner elects, upon determination by the Owner and the Surety jointly of the most responsible vendor, arrange for a contract between such vendor and Owner, and make available as work progresses (even though there should be a default or a succession of defaults under the contract or contracts of completion arranged under this paragraph) sufficient funds to pay the cost of completion less the balance of the contract price; but not exceeding, including other costs and damages for which the Surety may be liable hereunder, the amount set forth in the first paragraph hereof. The term "balance of the contract price", as used in this paragraph, shall mean the total amount payable by Owner to Vendor under the contract and any amendments thereto, less the amount properly paid by Vendor to Principal.

If the Surety does not proceed as provided above with reasonable promptness, the Surety shall be deemed to be in default on this bond seven days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this bond, and the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided above, and the Owner refuses the payment or the Surety has denied liability, in whole or in part, without further notice the Owner shall be entitled to enforce any remedy available to the Owner.

If the Surety elects to act as set forth above, then the responsibilities of the Surety to the Owner shall not be greater than those of the Vendor under the Contract, and the responsibilities of the Owner to the Surety shall not be greater than those of the Owner under the Contract. Subject to the commitment by the Owner to pay the balance of the Contract Price, the Surety is obligated, without duplication, for:

1. The responsibilities of the Vendor for correction of defective work and completion of the Contract;
2. Additional legal, design professional and delay costs resulting from the Vendor's default, and resulting from the actions or failure to act of the Surety set forth above; and
3. Liquidated damages, or if no liquidated damages are specified in the Contract, actual damages caused by delayed performance or non-performance of the Vendor.

If the Surety elects to act in accordance with the requirements of this bond, the Surety's liability is limited to the amount of this bond.

The Surety shall not be liable to the Owner or others for obligations of the Vendor that are unrelated to the Contract, and the balance of the Contract Price shall not be reduced or set off on account of any such unrelated obligations. No right of action shall accrue on this bond to any person or entity other than the Owner or its heirs, executors, administrators, successors and assigns.

Any suit under this bond must be instituted before the expiration of one (1) year from the date on which final payment under the Contract falls due, or within one (1) year after the Vendor ceased working, or within one (1) year after the Surety refuses or fails to perform its obligations under this bond. If the provisions of this paragraph are void or prohibited by law, the minimum period of limitation available to sureties in the jurisdiction of the suit shall be applicable.

No right of action shall accrue on this bond to or for the use of any person or corporation other than the Owner named herein or the heirs, executors, administrators or successors of the Owner.

This bond is issued in compliance with Section 255.05, Florida Statutes as may be amended. A claimant, except a laborer, who is not in privity with the Vendor and who has not received payment for its labor, materials, or supplies shall, within 45 days after beginning to furnish labor, materials, or supplies for the prosecution of the work, furnish the Vendor with a notice that he intends to look to the bond for protection. A claimant who is not in privity with the Vendor and who has not received payment for its labor, materials, or supplies shall, within 90 days after performance of the labor or after complete delivery of the materials or supplies, deliver to the Vendor and to the Surety written notice of the performance of the labor or delivery of the materials or supplies and the nonpayment. No action for the labor, materials, or supplies may be instituted against the Vendor or the Surety unless both notices have been given. No action shall be instituted against the Vendor or the Surety on the bond after one (1) year from the performance of the labor or completion of delivery of the materials or supplies.

When this bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this bond conflicting with said statutory or legal requirement shall be deemed deleted here from and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this bond shall be construed as a statutory bond and not as a common law bond.

END OF PERFORMANCE BOND

THIS FORM SHALL BE EXECUTED BY CONTRACTOR
AND SUBMITTED AT AWARD

THE PROVISIONS AND LIMITATIONS OF SECTION 255.05 FLORIDA STATUTES, INCLUDING BUT NOT LIMITED TO THE NOTICE AND TIME LIMITATIONS IN SECTIONS 255.05(2) AND 255.05(10), ARE INCORPORATED IN THIS BOND BY REFERENCE.

PAYMENT BOND

WEST WATER TREATMENT PLANT – WATER QUALITY LABORATORY RENOVATION

BID No.: UTL25-002

THIS BOND IS ISSUED SIMULTANEOUSLY WITH PERFORMANCE BOND IN FAVOR OF THE OWNER CONDITIONED ON THE FULL AND FAITHFUL PERFORMANCE OF THE CONTRACT

KNOW ALL MEN BY THESE PRESENTS: that _____
(Insert name of Vendor)

_____as Principal,
(Address or legal title of Vendor)

hereinafter called Principal, and _____
(Name and address of Surety)

_____

as Surety, hereinafter called Surety, are held and firmly bound unto CITY OF BOYNTON BEACH, P.O. BOX 310, BOYNTON BEACH, FLORIDA 33425-0310 as Obligee, hereinafter called Owner, for the use and benefit of claimants as here below defined, in the amount of

_____ Dollars

($_____), for payment whereof Principal and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal has by written agreement dated _____, 2024, entered into a contract with Owner for _____ in accordance with drawings and specifications prepared by _____ which contract is by reference made a part of hereof, and is hereinafter referred to as the Contract.

NOW THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Principal shall promptly make payment to all claimants as hereinafter defined, for all labor and material used or reasonably required for use in the performance of the Contract, then this obligation shall be null and void; otherwise it shall remain in full force and effect, subject, however, to the following conditions:

1. A claimant is defined as one having a direct contract with the Principal or with a subcontractor of the Principal for labor, material or both, used or reasonably required for use in the performance of the Contract, labor and material being construed to include that part of water, gas, power, light, heat, oil,

gasoline, telephone service or rental of equipment directly applicable to the Contract.

2. The above named Principal and Surety hereby jointly and severally agree with the Owner that every claimant as herein defined, who has not been paid in full before the expiration of a period of ninety (90) days after the date on which the last of such claimant's work or labor was done or performed, or materials were furnished by such claimant, may sue on this bond for the use of such claimant, prosecute the suit to final judgment for such sum or sums as may be justly due claimant, and have execution thereon. The Owner shall not be liable for the payment of any costs or expenses of any such suit.

3. If there is no Owner default under the Contract, the Surety's obligation to the Owner under this bond shall arise after the Owner has notified Principal and Surety of claims, demands, liens, or suits against the Owner or Owner's property by any person seeking payment for labor, materials, or equipment furnished for use in the performance of the Contract and tendered defense of such claims, demands, liens, or suits to the Principal and Surety.

4. No suit or action shall be commenced hereunder by any claimant:

   a. Unless claimant, other than one having a direct contract with the Principal, shall have given written notice to any two of the following: the Principal, the Owner, or the Surety above named, within ninety (90) days after such claimant did or performed the last of the work or labor, or furnished the last of the materials for which such claimant is made, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were furnished, or for when the work or labor was done or performed. Such notice shall be served by mailing the same by registered mail or certified mail, postage prepaid, in an envelope addressed to the Principal, Owner or Surety, at any place where an office is regularly maintained for the transaction of business, or served in any manner in which legal process may be served in the State in which the aforesaid project is located, save that such service need not be made by a public officer.

   b. After the expiration of one (1) year following the date on which Principal ceased work on such Contract, it being understood, however, that if any limitation embodied in this bond is prohibited by any law controlling the construction hereof such limitation shall be deemed to be amended so as to be equal to the minimum period of limitation permitted by such law.

   c. Other than in a State Court of competent jurisdiction in and for the County or other political subdivision of the State in which the Project, or any part thereof, is situated, or in the United States District Court for the district in which the Project, or any part thereof, is situated, and not elsewhere.

5. When a claimant has satisfied the conditions of section 4, Surety shall promptly and at the Surety's expense take the following actions:

   a. Send an answer to claimant with a copy to the Owner, within sixty (60) days after receipt of the claim, stating the amounts that are undisputed and the basis for challenging any amounts that are disputed; and

   b. Pay or arrange for payment of any undisputed amounts.

   c. The Surety's failure to discharge its obligations under section (a) or (b) shall not be deemed to constitute a waiver of defenses the Surety or Principal may have or acquire as to a claim, except as to undisputed amounts for which the Surety and claimant have reached agreement. If, however, the Surety fails to discharge its obligations under section (a) or (b), the Surety shall indemnify the claimant for the reasonable attorney's fees the claimant incurs thereafter to recover any sums found to be due and owing to the claimant.

6. The amount of this bond shall be reduced by and to the extent of a payment or payments made in good faith hereunder, inclusive of the payment by Surety of mechanics liens which may be filed of record against such improvements, whether or not claim for the amount of such lien be presented under and against this bond.

THIS FORM SHALL BE EXECUTED BY CONTRACTOR
AND SUBMITTED AT AWARD

7. The Surety shall not be liable to the Owner, claimants or others for obligations of the Principal that are unrelated to the Contract. The Owner shall not be liable for the payment of any costs or expenses of any claimant under this bond, and shall have under this bond no obligation to make payments to, or give notice on behalf of, claimants or otherwise have any obligations to claimants wider this bond.

8. The Surety hereby waives notice of any change, including changes of time, to the Contract or to related subcontracts, purchase orders, and other obligations.

9. This bond is issued in compliance with Section 255.05, Florida Statutes, as may be amended, and the provisions and limitations of Section 255.05, Florida Statutes, including, but not limited to the notice and time limitations in Sections 255.05(2) and 255.05(10) are incorporated into this bond by reference. A claimant, except a laborer, who is not in privity with the Principal and who has not received payment for its labor, materials, or supplies shall, within 45 days after beginning to furnish labor, materials, or supplies for the prosecution of the work, furnish the Principal with a notice that he intends to look to the bond for protection. A claimant who is not in privity with the Principal and who has not received payment for its labor, materials, or supplies shall, within 90 days after performance of the labor or after complete delivery of the materials or supplies, deliver to the Principal and to the Surety written notice of the performance of the labor or delivery of the materials or supplies and the nonpayment. No action for the labor, materials, or supplies may be instituted against the Principal or the Surety unless both notices have been given. No action shall be instituted against the Principal or the Surety on the bond after one (1) year from the performance of the labor or completion of delivery of the materials or supplies.

10. When this bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this bond conflicting with said statutory or legal requirement shall be deemed deleted here from and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this bond shall be construed as a statutory bond and not as a common law bond.

11. Upon request by any person or entity appearing to be a potential beneficiary of this bond, the Principal and Owner shall promptly furnish a copy of this bond or shall permit a copy to be made

12. The Principal and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner to pay for labor, materials, and equipment furnished for use in the performance of the Contract, which is incorporated herein by reference, subject to the terms set forth above.

ATTACHMENT "A"

SAMPLE PERFORMANCE EVALUATION QUESTIONNAIRE
(FOR INFORMATIONAL PURPOSES ONLY)

Instructions: Performance evaluations shall be completed by the Project Manager for the following: (1) all Contracts; (2) all individual Task Orders/Work Orders. Task Orders/Work Orders with a term of six (6) months or more at a minimum, the Project Manager shall complete performance evaluations at the mid-point of the project term or at more frequent intervals as required by the Task Order/Work Order **and** at the time of Task Order/Work Order or Contract completion.

It is especially important for the Project Manager to contact a Procurement representative to advise of any performance issues so that Procurement can assist with efforts to bring performance back to acceptable standards. It is equally important to complete this form whenever any of the performance indicators are either "marginal" or "unsatisfactory" even when this is not within the normal review cycle. In the event the Average Rating Score is "marginal" or "unsatisfactory" even after reasonable efforts have been taken by the City to improve performance, the Project Manager shall coordinate with Procurement to determine what action needs to be taken under the circumstances.

When completed, forward the evaluation form to Procurement. Procurement will keep track of the Average Rating Scores (Line 11) for all evaluations completed for the entire term of the Contract, Task Order, and Work Order. The completed Performance Evaluation form will be retained in Procurement and will be available as a record of current performance for use in the evaluation process of future solicitations released by the District. The completed evaluation is available to the contractor upon a Public Records request pursuant to Chapter 119, F.S.

Contract/Work Order No.	Consultant	Evaluation Period ☐ Interim ☐ Final
Project Title		If evaluating under a work order contract, specify type

Check the appropriate ratings for Lines 1 through 8.
Sum the individual ratings, by column, to produce the Individual Column Ratings on Line 9.
Sum the Individual Column Ratings in Line 9 to produce the Total Rating Score on Line 10.
Divide the Total Rating Score in Line 10 by the number 8 (the number of performance indicators in Lines 1-8) to produce the Average Rating Score in Line 11.

	Performance Indicators	**Rating** Unsatisfactory	Marginal	Satisfactory	Very Good	Exceptional

City of Boynton Beach
Agenda Item Request Form

Meeting Date: 02/ 4/2025

Proposed Ordinance No. 25-001- First Reading- An Ordinance of the City of Boynton Beach, Florida, approving the abandonment of the twenty-foot (20') wide alley abutting the approved Villages of East Ocean (north) mixed-use development as recorded in Plat Book 1, Page 23 of the public records of Palm Beach County; authorizing the City Manager to execute a disclaimer, which shall be recorded with this ordinance in the public records of Palm Beach County, Florida; and providing an effective date.

Requested Action: Staff recommends approval of Proposed Ordinance No. 25-001 on First Reading.

Explanation of Request:

The applicant is requesting abandonment (ABAN 2024.12.75233) of the remaining portion of the 20-foot wide alley abutting the approved Villages of East Ocean (North) mixed-use development (MSPM 17-003). As part of the site plan approval (MSPM 17-003), all right-of-way (ROW) within the block were abandoned (ORB 30293 PG 1088), except for the twenty (20)-foot wide alley in question. The abandonment request is outlined below:

Twenty (20)-foot wide Alley (ABAN 2024.12.75233): The applicant is requesting the abandonment of the remaining alley located between the Villages of East Ocean (North) and 401 E Ocean Avenue, a vacant commercial parcel (see Exhibit A – Location Map). The abandoned alley will be allocated in equal portions to the abutting property owner(s) per state statute. The abandoned alley will be developed to provide driveway access to 401 E. Ocean Avenue and Villages at East Ocean (North). Additionally, the property owner is required to record a non-exclusive ingress and egress easement, along with a construction agreement (see Exhibit C - Conditions of Approval).

The subject area is approximately 1,000 square feet, 20 feet wide by 50 feet (see Exhibit B – Legal Sketch and Description).

How will this affect city programs or services? None

Account Line Item and Description: None

Fiscal Impact: None

ORDINANCE NO. 25-001

AN ORDINANCE OF THE CITY OF BOYNTON BEACH, FLORIDA, APPROVING THE ABANDONMENT OF THE TWENTY-FOOT (20') WIDE ALLEY ABUTTING THE APPROVED VILLAGES OF EAST OCEAN (NORTH) MIXED-USE DEVELOPMENT AS RECORDED IN PLAT BOOK 1, PAGE 23 OF THE PUBLIC RECORDS OF PALM BEACH COUNTY; AUTHORIZING THE CITY MANAGER TO EXECUTE A DISCLAIMER, WHICH SHALL BE RECORDED WITH THIS ORDINANCE IN THE PUBLIC RECORDS OF PALM BEACH COUNTY, FLORIDA; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, Applicant is requesting the abandonment of the remaining portion of the twenty-foot (20') wide alley located between the Villages of East Ocean (North) and 401 E Ocean Avenue, as recorded in Plat Book 1, Page 23 of the Public Records of Palm Beach County, Florida, lying between Lots 6 and 7 of said Block 5; and

WHEREAS, staff has determined that the requested abandonment would not adversely impact traffic or other City functions, and would not adversely impact other adjacent property owners; and

WHEREAS, comments have been solicited from the appropriate City Departments, and public hearings have been held before the City Commission on the proposed abandonment; and

WHEREAS, staff has determined that the subject right-of-way no longer serves a public purpose and therefore recommends approval of the request, subject to the accompanying conditions.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF BOYNTON BEACH, FLORIDA THAT:

Section 1. The foregoing "Whereas" clauses are true and correct and incorporated herein by this reference.

Section 2. The City Commission of the City of Boynton Beach, Florida, does hereby abandon the twenty-foot (20') wide alley located between the Villages of East Ocean (North) and 401 E. Ocean Avenue, as recorded in Plat Book 1, Page 23 of the Public Records of Palm Beach County. The property being abandoned is more particularly described as follows:

> A PARCEL OF LAND IN THE NORTHEAST QUARTER (N.E.1/4) OF SECTION 28, TOWNSHIP 45 SOUTH, RANGE 43 EAST, CITY OF BOYNTON BEACH, PALM BEACH, COUNTY, FLORIDA, BEING DESCRIBED AS FOLLOWS:
>
> THAT PORTION OF A 20' ALLEY LYING IN BLOCK 5 OF THE PLAT OF BOYNTON, RECORDED IN PLAT BOOK 1, PAGE 23, OF THE PUBLIC RECORDS OF PALM BEACH COUNTY, FLORIDA, LYING BETWEEN LOTS 6 AND 7 OF SAID BLOCK 5.
>
> CONTAINING 1,000 SQUARE FEET, MORE OR LESS.

Section 3. The City Manager is hereby authorized and directed to execute the attached Disclaimer and cause the same to be filed, with this Ordinance, in the Public Records of Palm Beach County, Florida.

Section 4. This Ordinance shall take effect immediately upon passage.

PROJECT: Villages of East Ocean (North) ROW Abandonment
Abandonment of twenty (20)-foot wide Alley (ABAN 2024.12.75233)

REQUEST: Approval of the abandonment application (ABAN 2024.12.75233) of the 20-foot wide alleyway abutting the Villages of East Ocean (North) mixed-use development. Applicant: Manuel Mato, BB North, LLC.

BACKGROUND

The applicant is requesting abandonment (ABAN 2024.12.75233) of the remaining portion of the 20-foot wide alley abutting the approved Villages of East Ocean (North) mixed-use development (MSPM 17-003). As part of the site plan approval (MSPM 17-003), all right-of-way (ROW) within the block were abandoned (ORB 30293 PG 1088), except for the twenty (20)-foot wide alley in question. The abandonment request is outlined below:

> Twenty (20)-foot wide Alley (ABAN 2024.12.75233): The applicant is requesting the abandonment of the remaining alley located between the Villages of East Ocean (North) and 401 E Ocean Avenue, a vacant commercial parcel (see Exhibit A – Location Map). The abandoned alley will be allocated in equal portions to the abutting property owner(s) per State Statute. The abandoned alley will be developed to provide driveway access to 401 E Ocean Avenue and Villages at East Ocean (North). Additionally, the property owner is required to record a non-exclusive ingress and egress easement, along with a construction agreement (see Exhibit C - Conditions of Approval).

The subject area is approximately 1,000 square feet, 20 feet wide by 50 feet (see Exhibit B – Legal Sketch and Description).

The applicant has provided a project narrative and justification statements for the abandonment requests (see Exhibit D – Project Narrative).

The following is a description of the zoning districts and land uses of the properties that surround the subject abandonment requests:

Adjacent Uses:

North: Vacant parcels approved for a mixed-use development known as Villages at East Ocean – North (MSPM17-003), zoned Mixed-Use Core (MXC) with a Future Land Use classification of Mixed Use High (MXH).

South: Vacant lot zoned Neighborhood Commercial District (C2) with a Future Land Use classification of Local Retail Commercial (LRC).

East: Vacant parcel approved for a mixed-Use development known as Villages at East Ocean – North (MSPM17-003), zoned Mixed-Use Core (MXC) with a Future Land Use classification of Mixed Use High (MXH).

West: Right-of-Way of NE 3rd Street; further west, are developed residential parcels zoned Multi-family Residential (R3) with a Future Land Use classification of Local Retail Commercial (LRC) and Median Density Residential (MEDR).

ANALYSIS

A notice of the requests was mailed to owners of properties within 400 feet of the subject properties. and signs were posted for the City Commission meeting dates. The applicant has certified that they posted signage and mailed notices in accordance with Ordinance No. 04-007 & 05-004. A summary of the responses received from the City Engineering and Utilities, and the utility companies follows:

CITY DEPARTMENTS/DIVISIONS

Engineering	No objection.
Public Works/Utilities	No objection.
Planning and Zoning	No objection.

PUBLIC UTILITY COMPANIES

Florida Power and Light	No objection. If easements and relocation of utilities are necessary they will be at the developer's cost.
AT&T	No objection. If easements and relocation of utilities are necessary they will be at the developer's cost.
Florida Public Utilities	No objection.
Comcast:	No objection.

RECOMMENDATION

Staff has determined that the requested abandonment (ABAN 2024.12.75233) would not adversely impact traffic or other City functions and would not adversely impact other adjacent properties. Based on the above-analysis, staff has determined that the subject alley segment no longer serves a public purpose other than retention of necessary utilities and therefore recommends APPROVAL of the request. Any conditions requested by the Commission will be placed in Exhibit C – Conditions of Approval.

BB North, LLC is the owner of the entire block bordered by the railroad to the east, Boynton Beach Blvd. to the north, Ocean Avenue to the south, and 3rd Street to the west, with the exception of the corner parcel at Ocean Avenue and 3rd Street. In 2017, under previous ownership, the property was approved for the *Villages at East Ocean* project. As part of the approval, all Rights of Way (ROW) within the block were vacated (ORB 30293 Pg 1088), with the exception of a small portion of the 20-foot alley in question.

An affiliate of BB North, LLC, Little BB North, LLC, has since acquired the corner parcel. As part of the project's engineering requirements, sewer lines will need to cross the alley location, necessitating the abandonment of the remaining 20-foot ROW section for the project to proceed. Provided is a sketch and legal of the area of ROW to be abandoned, prepared by Brown & Phillips, Inc. Both BB North and Little BB North have agreed to abandon the alley to facilitate these plans; the abandonment is to be divided equally and allocated to each adjacent property owner.

Abandonment of the right of way is also in compliance with the following criteria (with responses in bold):

a. Access – Does the subject land provide a legal means of access to a lot of record, subdivision or development? Would the vacation and abandonment cause or result in a permanent stoppage, interruption, or an unacceptable level of service for the subject lot or on neighboring lots, subdivisions, or developments with respect to police, fire, or other emergency services; or solid waste removal?

   Response: The abandonment of the right of way would not affect the properties for the following reasons:
   - **Both properties are under control by the same ultimate owner**
   - **Both properties are currently vacant lots with no driveways**
   - **Both properties front city streets and do not need the current alley for access**
   - **Both properties are providing each other with access easements over the right of way once abandoned**

b. Utilities – Does the subject land contain, support, or allow potable water, sanitary sewer, or any other utility (e.g. cable, telephone, electricity, gas, etc.), which would be

permanently stopped or interrupted, or cause an unacceptable level of service to the subject lot or neighboring lots, subdivisions, or developments?

Response:
- **There are no utilities located in the right of way and we have obtianed letters of no objection from all providers including Boynton Beach Utilities, FPL, Comcast, AT&T and Florida Gas**
- **The properties are all vacant**

c. Drainage and Wastewater Management – Does the subject land contain, support, or allow a legal means of drainage or wastewater management for such lot or on neighboring lots, subdivisions, or developments which would cause or result in the stoppage, interruption, or unacceptable level of service?

Response:
- **No, there is no drainage or wastewater management located in the right of way. The adjacent properties are current empty fields and a new development is planned which will have its own drainage**

d. Conservation – Does the subject land contain, support, or allow the means for the conservation or preservation of flora or fauna?

Response:
- **No**

We appreciate your consideration of this request for a ROW Abandonment Application (which is understood to classify as a Major Development Application) for the Villages of East Ocean – North project. Should you need any additional information, the project managers at UDS are Bradley Miller (bmiller@udsflorida.com) and Ailish Villalobos (avillalobos@udsflorida.com) who can be reached at 561-366-1100.

Public Hearing 6 P.M. or as soon thereafter as the agenda permits. The City Commission will conduct these public hearings in its dual capacity as Local Planning Agency and City Commission.

City of Boynton Beach
Agenda Item Request Form

Meeting Date: 02/ 4/2025

Proposed Ordinance No. 25-002- First Reading- An Ordinance of the City of Boynton Beach, Florida, amending Code of Ordinances Part III, "Land Development Regulations," Chapter 1, "General Administration," Article II, "Definitions," and Chapter 2, "Land Development Process," Article VI, "Impact and Selected Fees," Section 7, "Palm Beach County Fees" and establishing Section 10, "Mobility Fees;" providing for update of definitions; providing for repeal of the collection of County road impact fees within the mobility fee assessment area; providing for collection of mobility fees within the mobility fee assessment area; providing for authority; setting forth general provisions for mobility fees, definitions, purpose, the mobility fee technical report, and rules of construction; providing for imposition and a mobility fee schedule; providing for establishment of a mobility fee assessment area; providing for the process for review of alternative and special fee determinations, credits, establishment of a mobility fee benefit district, fund accounts, expenditures, refunds, effects on land development regulations, development of an administrative procedures and service charges, requirements for annual reporting, review and updates, agreements, interlocal agreements, vested rights, and penalties for violations; providing for conflicts; providing for severability; providing for scrivener's errors; providing for liberal interpretation; providing for modifications; providing for conflicts, severability and an effective date.

Requested Action:

Staff recommends approval of Proposed Ordinance No. 25-002, on First Reading.

Explanation of Request:

On October 24, 2023, the City Commission authorized a study to move forward with development of a mobility fee. The Florida Legislature adopted House Bill 479 in 2024 that amended Florida Statutes to provide further guidance to local governments pursuing alternatives to transportation concurrency and road impact fees. The amendment included definitions for mobility plans and mobility fees and explicitly stated that any local government may adopt an alternative transportation system based on a mobility plan and a mobility fee.

The Mobility Fee Technical Report documents the future growth, the data and methodology

used to develop a mobility fee to mitigate the impact of new development, and establishment of a benefit district within the City. The updated Mobility Plan Projects serve as the basis to develop the City's Mobility fee and provide a foundation for the City to provide proactively prioritize projects to meet the growth, travel, and mobility needs of the community in a manner that is coordinated with the Future Land Use Element in the City's Comprehensive Plan. The updated Mobility Plan Projects contains walking and streetscape enhancements, curbless shared streets, roadway improvements, shared-use paths, sidewalks, bike lanes, boardwalks, transit circulators, water taxi service, mobility hubs, and multimodal programs, services, and studies.

The Mobility Fee is based on the updated Mobility Plan Projects, which is consisting of improvements, programs, and services, to: (1) improve the City's multimodal transportation system; (2) promote compact, mixed-use, and interconnected development; and (3) enhance mobility within the City for residents, employees, businesses, students, and visitors. The Mobility Fee is intended to be assessed on all new development within the Mobility Fee Assessment Area.

- Mobility Fees are not: (1) a reoccurring tax; (2) assessed to existing residential or non-residential property; or (3) deposited into general revenue funds of the City.
- Mobility Fees are: (1) a streamlined one-time assessment on new development; (2) intended to offset the impact of new development; and (3) deposited into special revenue funds for Mobility Fees to be expended within a defined benefit district.

Mobility Fees are legally and statutorily required to be spent on Mobility Projects that provide a mobility benefit to the new development that paid the Mobility Fee.

How will this affect city programs or services? Approval of this Ordinance will also develop, enhance, and maintain the transportation system which will serve needs of all sectors of the City in a safe, efficient, cost effective, and aesthetically pleasing manner that promotes multi-modal transportation options including walking, bicycling, and public transit.

Account Line Item and Description: N/A

Fiscal Impact: The approval of the proposed ordinance increases City revenue by imposing a Mobility Fee.

ORDINANCE 2025-

AN ORDINANCE OF THE CITY OF BOYNTON BEACH, FLORIDA, AMENDING CODE OF ORDINANCES PART III, "LAND DEVELOPMENT REGULATIONS," CHAPTER 1, "GENERAL ADMINISTRATION," ARTICLE II, "DEFINITIONS," AND CHAPTER 2 ,"LAND DEVELOPMENT PROCESS," ARTICLE VI, "IMPACT AND SELECTED FEES," SECTION 7, "PALM BEACH COUNTY FEES" AND ESTABLISHING SECTION 10, "MOBILITY FEES;" PROVIDING FOR UPDATE OF DEFINITIONS; PROVIDING FOR REPEAL OF THE COLLECTION OF COUNTY ROAD IMPACT FEES WITHIN THE MOBILITY FEE ASSESSMENT AREA; PROVIDING FOR COLLECTION OF MOBILITY FEES WITHIN THE MOBILITY FEE ASSESSMENT AREA; PROVIDING FOR AUTHORITY; SETTING FORTH GENERAL PROVISIONS FOR MOBILITY FEES, DEFINITIONS, PURPOSE, THE MOBILITY FEE TECHNICAL REPORT, AND RULES OF CONSTRUCTION; PROVIDING FOR IMPOSITION AND A MOBILITY FEE SCHEDULE; PROVIDING FOR ESTABLISHMENT OF A MOBILITY FEE ASSESSMENT AREA; PROVIDING FOR THE PROCESS FOR REVIEW OF ALTERNATIVE AND SPECIAL FEE DETERMINATIONS, CREDITS, ESTABLISHMENT OF A MOBILITY FEE BENEFIT DISTRICT, FUND ACCOUNTS, EXPENDITURES, REFUNDS, EFFECTS ON LAND DEVELOPMENT REGULATIONS, DEVELOPMENT OF AN ADMINISTRATIVE PROCEDURES AND SERVICE CHARGES, REQUIREMENTS FOR ANNUAL REPORTING, REVIEW AND UPDATES, AGREEMENTS, INTERLOCAL AGREEMENTS, VESTED RIGHTS, AND PENALTIES FOR VIOLATIONS; PROVIDING FOR CONFLICTS; PROVIDING FOR SEVERABILITY; PROVIDING FOR SCRIVENER'S ERRORS; PROVIDING FOR LIBERAL INTERPRETATION; PROVIDING FOR MODIFICATIONS; PROVIDING FOR CONFLCTS, SEVERABILITY AND AN EFFECTIVE DATE.

WHEREAS, pursuant to Article VIII, Section (1)(g) of the Florida Constitution and Chapter 166, Florida Statutes, the City has broad home rule powers to adopt ordinances to provide for and operate transportation systems, including bicycle lanes, boardwalks, pathways, shared-use paths, sidewalks, trails, transit circulators, mobility hubs, new roads, widen roads, curbless shares streets, walking and streetscape enhancements, multimodal corridors, water taxis, park once environments, programs, services and studies within the City; and

CODING: Words in ~~strike through~~ type are deletions from existing law;

Words in <u>underlined</u> type are additions.

WHEREAS, Palm Beach County currently has an established transportation concurrency and road impact fee system, which has been one part of an overall growth management program as set forth in the City of Boynton Beach Comprehensive Plan; and

WHEREAS, the Palm Beach County transportation concurrency and road impact fee system is principally focused on vehicular mobility, whereas a mobility fee system takes a comprehensive view of the provision of mobility through walking, biking, transit, motor vehicles, and new personal mobility technology; and

WHEREAS, section 163.3180, Florida Statutes, encourages any local government to develop tools and techniques, including the adoption of long-term strategies to facilitate development patterns that support multimodal solutions, adoption of area-wide service standards that are not dependent on any single road segment function, and establish multimodal service standards that rely primarily on non-vehicular modes of transportation where existing or planned community design will provide an adequate level of personal mobility; and

WHEREAS, section 163.3180, Florida Statutes, authorizes any local government to repeal transportation concurrency and encourages the adoption of an alternative transportation system; and

WHEREAS, pursuant to section 163.3180, Florida Statutes, the City has developed a Mobility Fee Technical Report with updated Mobility Plan Projects; and

WHEREAS, the City of Boynton Beach intends to replace collection of the current Palm Beach County road impact fee with a mobility fee system administered and programmed by the City to be paid by new development within the Mobility Fee Assessment Area consistent with the requirements for alternative transportation systems pursuant with section 163.3180, Florida Statutes;

WHEREAS, the mobility fee system focuses on person travel demand, which includes walking, biking, transit, and motor vehicular trips, generated by new development and the resulting impact on the capacity of the transportation system and accordingly requires the expenditure of revenue derived under that system to be used on mobility plan projects that increase person capacity; and

WHEREAS, the mobility fee system includes but is not limited to, considerations of the impact of person travel demand generated by new development on the person capacity of the transportation system as well as considerations of the impact of new development on overall mobility in the City; and

WHEREAS, the City is experiencing growth and new development that necessitates the addition and expansion of transportation facilities for a variety of modes to meet the

person travel demands of new development, including adequate and efficient mobility projects; and

WHEREAS, imposition of a mobility fee requiring new development within the Mobility Fee Assessment Area to contribute its attributable share of the cost of growth-necessitated mobility projects necessary and reasonably related to the public health, safety, and welfare of the people of the City, provided that the mobility fee does not exceed the actual amount necessary to offset the person travel demand on mobility projects generated by new development; and

WHEREAS, in 2019, the City Commission of the City of Boynton Beach adopted amendments to the Boynton Beach Comprehensive Plan that provided various goals, objectives, and policies that established the process and framework for the development of a Complete Streets Mobility Plan and Mobility Fee pursuant to section 163.3180, Florida Statutes; and

WHEREAS, the City, in its Transportation Element, sets out goals, objectives, and policies to develop and maintain a safe, convenient, efficient transportation system that recognizes present needs, reflects the Future Land Use Plan, and provides for safe, efficient multimodal transportation linkages; and

WHEREAS, the City Commission finds that this Ordinance supports and furthers those stated goals, objectives, and policies of the Transportation Element of the Comprehensive Plan as follows:

GOAL 2: "To develop and maintain a transportation system which will serve the transportation needs of all sectors of the City of Boynton Beach in a safe, efficient, cost-effective, and aesthetically pleasing manner that promotes multi-modal transportation options, such as walking, bicycling, and transit;"

Objective 2.4: "The City shall develop and maintain a safe, convenient, multi-modal transportation system, including walking, bicycling, and public transit, which will meet future as well as current transportation needs, particularly within the TCEA and the CRA;"

Policy 2.6.3: "The City may seek to repeal and replace Palm Beach County transportation concurrency, proportionate fair-share, and road impact fees with a Mobility Fee based upon a Complete Streets Mobility Plan. Repeal of Palm Beach County transportation concurrency, proportionate fair-share, and road impact fees will require consultation with Palm Beach County. The City may also apply a Mobility Fee to the city-maintained facilities, repealing City transportation concurrency and proportionate fair-share applicable to local roadways;"

Policy 2.6.4: "The Mobility Fee may be implemented and adopted citywide or may be adopted only for specific areas or districts within the City. For each such specific area

or district, an adopted Mobility Fee shall replace both Palm Beach County transportation concurrency, proportionate fair-share and road impact fees and City transportation concurrency and proportionate fair-share;"

Policy 2.6.6: "Should the City Commission elect to adopt a Mobility Fee, the City, within one year of adoption of the implementing Ordinance, shall update the Transportation and Capital Improvement Elements of the Comprehensive Plan to reflect the repeal of transportation concurrency, proportionate fair-share and road impact fees and update policies related to level and quality of service standards, complete streets, capacity determinations, backlogged facilities, transportation and associated multi-modal policies and other elements addressed in the Complete Streets Mobility Plan;"

Policy 2.6.7: "The Complete Streets Mobility Plan shall include provisions that address mobility between destinations and should address accessibility to, from destinations, and between modes of travel. The improvements in the Plan shall be based upon the expected, anticipated, or desired increase in new development, infill development, and redevelopment by the established horizon year and the associated increase in vehicular and person travel demand. The Complete Streets Mobility Plan shall include quality and level of service standards for all modes of travel;"

Policy 2.6.9: "The Complete Streets Mobility Plan may serve as a Master Plan for roads and transit within the City, and also function as a Bicycle, Pedestrian, Trails, Blueways, Greenways and other non-vehicular modes or travel Master Plan;"

Policy 2.6.10: "The Complete Streets Mobility Plan may also incorporate provisions for reduced heat island effects and improve air quality through trees and landscaping and to reduce stormwater run-off and water quality through the integration of low impact development techniques, bio-swales, rain gardens and other green techniques that can be incorporated into the planning, design and construction of transportation improvements;"

Policy 2.6.11: "The Complete Streets Mobility Plan may include policies related to land use to encourage multi-modal supportive development. The Plan may also include provisions that allow for reduction in development parking requirements in recognition of car and bicycle sharing in complete streets and parking strategies that reduce parking requirements for mixed-use, multi-modal development, and affordable housing;"

Policy 2.6.12: "The Mobility Fee would be a one-time assessment on new development or redevelopment that results in an impact to the transportation system through an increase in vehicular trips or vehicular miles of travel or an increase in person trips or person miles of travel. The Mobility Fee, consistent with State Statute, shall be

required to meet the dual rational nexus test and shall be reasonably attributable to the travel demand impact of new development, infill, and redevelopment;"

Policy 2.6.13: "The Mobility Fee may include provisions to encourage and incentivize new development, infill, and redevelopment within targeted areas of the City. The Mobility Fee may also include provisions to encourage affordable and workforce housing, mixed-use, multi-modal supportive development, and desired land uses that increase employment and attract economic development;"

Policy 2.6.14: "An application for private development may not be required to pay a Mobility Fee and also meet transportation concurrency, proportionate-fair share, and road impact fees to the extent the Mobility Fee address the same facilities and travel demand impacts as would be addressed through the application of transportation concurrency, proportionate-fair share and road impact fees for City and/or County or State maintained facilities;"

Policy 2.6.15: "In consideration of a future Complete Streets Mobility Plan, the City may review the Land Development Regulations to consider incentives for and accommodate the needs of compact four-and-two-wheel vehicles (such as hybrids, smart cars, and vespas/scooters, etc.) by assessing the parking requirements and other provisions of the code;" and

WHEREAS, the mobility fees imposed hereby (1) are in compliance with the "dual rational nexus test" developed under Florida case law, (2) meet the "essential nexus" and "rough proportionality" requirements established by the United States Supreme Court, in *Nollan v. California Coastal Commission*, 483 U.S. 825 (1987) and *Dolan v. City of Tigard*, 512 U.S. 374 (1994), (3) are consistent with the requirements set forth in section 163.3180, Florida Statutes, and (4) are consistent with and being imposed in accordance with section 163.31801, Florida Statutes; and

WHEREAS, the City Council has determined that the proposed Ordinance adopting a mobility fee will help to preserve and enhance the rational nexus between the need for mobility projects to meet the person travel demands generated by new development in the City and the mobility fees imposed on that new development based on mobility plan projects; and

WHEREAS, the establishment of a Mobility Fee Assessment Area defines the area within which mobility fees will be assessed and collected, and the Mobility Fee Benefit District defines the area within which mobility fees will be expended, ensuring that a rational nexus is established and maintained between the person travel demand from future development within the Mobility Fee Assessment Area and the funding of mobility

projects within the Mobility Fee Benefit District providing a mobility benefit to the new development for which the mobility fees were paid; and

WHEREAS, mobility fees collected will be deposited in the mobility fee fund created for the related mobility fee benefit district established herein and expended for the purposes set forth herein; and

WHEREAS, mobility fees imposed hereunder achieve the goals, objectives, and policies of the Comprehensive Plan and utilize the tools and techniques encouraged by section 163.3180, Florida Statutes; and

WHEREAS, the City has developed a Mobility Fee Technical Report with updated Mobility Plan Projects dated January 2025 prepared by NUE Urban Concepts, LLC, that provides the technical analysis to determine the mobility fee, based on the updated mobility plan projects on City, County, and State right-of-way within and adjacent to the City, which constitutes a proper factual predicate for imposition and expenditure of the mobility fees; and

WHEREAS, the City has determined that the enactment of this Ordinance adopting a mobility fee based on mobility plan projects will help to preserve and enhance the rational nexus between the extraordinary increase in-person travel demands generated by new development in the Mobility Fee Assessment Areas and the mobility fees imposed on that new development to fund mobility projects on City, County, and State right-of-way within and adjacent to the City that address that demand; and

WHEREAS, the City Commission has determined, based upon project development time frames, which are often delayed depending upon economic realities, to authorize the refund of collected mobility fees after seven (7) years; and

WHEREAS, the City shall assess an administrative service charge and may establish fees, based upon a Study accepted by the City Commission, associated with requests for mobility fee determinations, special assessments and studies, off-sets, and credits, and the administration and implementation, including amendments and updates, to the mobility plan and the mobility fee system, not to exceed actual cost consistent with section 163.3180, Florida Statutes; and

WHEREAS, the City shall develop administrative policies and procedures, accepted by the City Commission, for the administration, implementation, and update of the mobility plan and mobility fee to include, but not limited to, assessments, credits, determinations, imposition, off-sets, and studies; and

WHEREAS, the mobility fee shall be adjusted annually, based on the most recently published construction cost inflation factor from the most localized available sources, and

the City shall publish the adjusted mobility fees not more than 90 days before the annual adjustment, consistent with section 163.31801, Florida Statutes; and

WHEREAS, the City Commission has noticed, advertised, scheduled, and held public hearings in compliance with Florida Statutes on this proposed Ordinance; and

WHEREAS, the City Commission has determined that it is advisable and in the public interest to adopt and implement the proposed Mobility Fee Ordinance.

NOW THEREFORE, BE IT ORDAINED by the City Commission of the City of Boynton Beach, Florida, that:

Section 1. The recitations set forth above are incorporated herein.

Section 2. Part III, "Land Development Regulations," Chapter 1, "General Administration," Article II, "Definitions" of the City of Boynton Beach Code of Ordinances is amended as follows:

ARTICLE II. DEFINITIONS

…

ASSESSMENT AREA – A geographic area of the city or a specific development pattern where Mobility Fees are assessed for new development.

…

BENEFIT DISTRICT – A geographic area of the city where mobility fees paid by new development are expended on mobility projects.

…

COMPLETE STREETS – A transportation policy and design approach that requires multimodal transportation improvements to be planned, designed, operated, and maintained to enable safe, convenient, and comfortable travel and access for users of all ages and abilities regardless of their mode of transportation and to allow for safe travel by those walking, bicycling or using other forms of non-motorized travel, riding public transit or driving motor vehicles or low speed electric vehicles.

COMPLETE STREETS MOBILITY PLAN – The plan adopted by the City that identifies mobility projects to meet the person travel demands of new development.

…

DEVELOPMENT – A single use or combination of uses, proposed or approved, that may include but not be limited to a single-family subdivision, townhomes, rental apartments, condominiums, public facilities, commercial buildings, shopping centers, or industrial projects, possibly of similar design, constructed as a unified community. Development shall also include the meaning given in ~~F.S. §~~ section 380.04, Florida Statutes, pursuant to a development order or permit. For purposes of mobility fees, development means any new residential and non-residential construction or expansion of building(s), lane(s),

structure(s), or any changes in the use of any building(s), structure(s), or land use that will generate additional impact on the City's public facilities. See "Flood, Development."

…

EASEMENT, SPECIAL PURPOSE – Any easement dedicated in perpetuity to the public or the City, which authorizes a specific use including, but not limited to, the use, installation, construction, operation, maintenance, or repair of City facilities, including transportation, public access, communications, solar, and conservation. This term shall not include utility and/or drainage easements.

…

IMPACT – Any new development that results in an increase in person travel demand above the demand generated by the existing use of property.

…

MOBILITY – The ability to move people and goods from an origin to a destination by multiple modes of travel in a timely (speed) manner.

MOBILITY FEE – A monetary exaction imposed on new development to fund the most recently adopted mobility plan projects.

MOBILITY FEE ASSESSMENT AREA – A geographic area of the city where mobility fees are assessed on new development at the time of development permit application and paid prior to issuance of the permit.

MOBILITY FEE BENEFIT DISTRICT – A geographic area where mobility fees paid by future development are expended on multimodal projects identified in the Complete Streets Master Plan.

MOBILITY FEE EXPENSE – Expenses include: (a) the repayment of principal and interest or any redemption premium for loans, advances, bonds, bond anticipation notes, and any other form of indebtedness then outstanding consistent with statutory allowances and used to advance mobility projects identified in the Mobility Plan; (b) reasonable administrative and overhead expenses necessary or incidental to expanding and improving mobility projects; (c) crosswalks, traffic control and crossing warning devices, landscape, trees, multimodal way finding, irrigation, hardscape, and lighting related to projects; (d) micromobility devices, microtransit vehicles, programs and services, (e) mobility hubs, transit circulators, facilities, programs, shuttles, services and vehicles; (f) reasonable expenses for engineering studies, stormwater reports, soil borings, tests, surveys, construction plans, and legal and other professional advice or financial analysis relating to projects; (g) the acquisition of right-of-way and easements for the improvements, including the costs incurred in connection with the exercise of eminent domain; (h) the clearance and preparation of any site, including the demolition of structures on the site and relocation of utilities; (i) floodplain compensation, wetland mitigation and stormwater management facilities; (j) all expenses incidental to or

connected with the issuance, sale, redemption, retirement, or purchase of bonds, bond anticipation notes, or other forms of indebtedness, including funding of any reserve, redemption, or other fund or account provided for in the ordinance or resolution authorizing such bonds, notes, or other form of indebtedness consistent with statutory allowances and used to advance mobility projects identified in the Mobility Plan; (k) reasonable costs of planning, design, engineering, and construction, including mobilization, maintenance of traffic during construction and CEI (construction engineering and inspection) services of mobility projects, (l) city administration, implementation updates to the mobility plan and mobility fee, including any analysis, assessments, counts, data collection, plans, programs or studies needed for mobility projects, (m), local match for federal, state and county funded projects.

MOBILITY FEE OFF-SET – the equivalent amount of a mobility fee associated with an existing use of a building that is being redeveloped or where a change of occupancy or use is requested. The equivalent mobility fee shall be based on the current use of the building or the most recent use of the building for a vacant building. Upon demolition of a building, offsets shall be available for the period of time specified in the implementing ordinance from the date of demolition unless otherwise provided for in a written agreement with the City.

MOBILITY FEE TECHNICAL REPORT – The City of Boynton Beach Mobility Fee Technical Report with Updated Mobility Plan Projects dated January 2025, that documents the analysis, data, and methodology used to develop a mobility fee, as may be amended from time to time, and is adopted pursuant to an implementing ordinance which authorizes imposition of the mobility fee.

MOBILITY PLAN – The Streets Plan, Multimodal Corridors Plan, Transit Plan, and Mobility Plan Programs included in the City of Boynton Beach Mobility Fee Technical report dated January 2025, as may be amended from time to time, or updates to the City's Complete Street Mobility Plan, to meet future person travel demand and serves as the basis for the City's Mobility Fee.

MOBILITY PLAN PROGRAM – The mobility initiatives, plans, services, and studies that the City will undertake to implement the Mobility Plan that are not defined mobility projects and may be funded by mobility fees.

MOBILITY PLAN PROJECT – Corridor and intersection improvements such as bike lanes, buffered bike lanes, protected bike lanes, intersections, interchanges, landscape, shared-use paths, boardwalks, pedestrian overpasses or underpasses, roads, roundabouts, sidewalks, streets, and streetscape. Mobility plan projects also include policies, programs and services, wayfinding, micromobility devices, and transit vehicles, lanes, stops, and facilities, along with mobility hubs. Projects can include new or additional road travel lanes and turn lanes,

upgrade of roads that results in a change in functional classification of the road, complete and low speed streets, curbless shared streets, new or upgraded traffic signals, traffic synchronization, mobilization, maintenance of traffic, survey, geotechnical and engineering, utilities, construction, PD&E, planning, engineering and inspection, utility relocation, right-of-way, easements, land acquisition, stormwater management facilities. These projects may also be referred to as mobility projects, multimodal projects, or projects in the Mobility Fee Technical Report and Mobility Fee Ordinance.

…

MULTI-FAMILY RESIDENTIAL SQUARE FEET – The sum of the area (in square feet) of each building measured from the exterior surface of the exterior walls. This includes common areas, lobbies, leasing offices, and residential amenities not accessible to the public. Retail or office square footage leased to a third party would pay the applicable mobility fee rate. Square footage does not include parking garages or structures.

…

NON-RESIDENTIAL SQUARE FEET – The sum of the gross floor area (in square feet) of the area of each floor level under cover, including cellars, basements, mezzanines, penthouses, corridors, lobbies, stores, and offices, that are within the principal outside faces of exterior walls, not including architectural setbacks or projections. Included are all areas that have floor surfaces with clear standing head room (six feet six inches, minimum) and are used as part of the primary use of the property. If an area within or adjacent to the principal outside faces of the exterior walls is not enclosed, such as outdoor restaurant seating, areas used for storage of goods and materials, or merchandise display, and is determined to be a part of the primary use of property, this gross floor area is considered part of the overall square footage of the building. Areas for parking, circulation, ingress, egress, buffers, conservation, walkways, landscape, stormwater management, and easements or areas granted for transit stops or multimodal parking are not included in the calculation of square feet.

…

PERSON MILES OF CAPACITY (PMC) – The number of persons' "capacity" that can be accommodated, at a determined standard, on a facility while walking, bicycling, riding transit, driving, or using a mobility-assisted device over a defined distance.

PERSON MILES OF TRAVEL (PMT) – A unit used to measure person travel made by one person where each mile traveled is counted as one person mile. PMT is calculated by multiplying person trip length by the number of person trips. The increase in future person miles of travel is used to plan mobility project needs that form the basis for a mobility fee.

PERSON TRAVEL DEMAND (PTD) – The travel demand from new development based on trip generation, the percentage of new trips, vehicle trip lengths, limited access travel,

origin-destination factors, vehicle miles of travel, and person miles of travel factors. The resulting mobility fees are roughly proportional to the person travel demand per use and assessment area provided on the mobility fee schedule.

PERSON TRIP – a trip by one person by one or more modes of travel including, but not limited to, driving a motor vehicle or low speed electric vehicle, riding transit, walking, bicycling, or form of person powered, electric powered, or gasoline powered device.

…

SINGLE-FAMILY RESIDENTIAL SQUARE FEET – the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls.

…

TRANSPORTATION SYSTEM – The right-of-way, easements, roads, streets, alleyways, curb-cuts, traffic control devices, stormwater management facilities, utilities, and multimodal facilities that allow for circulation, mobility, and parking within the City and accessibility to land uses, property, and modes of transportation within the City.

…

VEHICLE MILES OF TRAVEL (VMT) – A unit to measure vehicle travel made by a private motor vehicle, such as an automobile, van, pickup truck, or motorcycle, where each mile traveled is counted as one vehicle mile regardless of the number of persons in the vehicle. VMT is calculated by multiplying the length of a road segment by the total number of vehicles on that road segment.

VEHICLE TRIP – a single motor vehicle, regardless of the number of persons in the motor vehicle.

…

Section 3. Part III, "Land Development Regulations," Chapter 2, "Impact and Selected Fees," Article VI, "Impact and Selected Fees," Section 7, "Palm Beach County Fees" of the City of Boynton Beach Code of Ordinances is amended as follows:

Sec. 7. Palm Beach County Fees.

Palm Beach County ordinances require that certain impact fees be paid concurrent with development activities and collectible prior to the issuance of certain permitting fees. Developers in Boynton Beach shall pay such fees in accordance with Palm Beach County ordinances, except for road impact fees within the Mobility Fee Assessment Area. Developers within the Mobility Fee Assessment Area shall pay mobility fees to the City as a replacement for County Road impact fees in accordance with Chapter 2, Article VI, Section 10.

Section 4. Part III, "Land Development Regulations," Chapter 2, "Impact and Selected Fees," Article VI, "Impact and Selected Fees," Section 10, "Mobility Fees" of the

City of Boynton Beach Code of Ordinances is established as follows:

Sec. 10. Mobility Fees

A. General.

1. Purpose and Intent. This section is intended to impose a mobility fee, assessed at application for a development permit for new development that results in an increase in person travel demand and to be paid to the City prior to issuance of the development permit, in an amount based upon the person travel demand attributable to new development and the cost of providing the person miles of capacity needed to serve such person travel demand. This section shall not be construed to authorize the imposition of mobility fees related to mobility project needs attributable to existing development.

2. Pro Rata Share. This section is intended to allow new development in compliance with the comprehensive plan to share in the burdens of growth. New development shares in this burden by paying a pro rata share of the reasonably anticipated costs of mobility projects needed to accommodate the person travel demands created by new development, as well as by complying with other appropriate development order conditions.

3. Technical Report. Towards this end, mobility fees are based upon the calculation methodology incorporated in the "City of Boynton Beach Mobility Fee Technical Report with Updated Mobility Plan Projects" dated January 2025, approved by Resolution No. 25-036, as may be amended from time to time.

4. Applicability. A mobility fee is hereby imposed on new development within the Mobility Fee Assessment Area that results in an increase in person travel demand above and beyond the current use of property in accordance with Section 10. C. of this Article. The limits of the Mobility Fee Assessment Area are delineated in the Mobility Fee Technical Report. The general limits of the Assessment Area consist of all areas of the City east of Interstate 95 and portions of the City west of Interstate 95 with a western boundary that meanders and parallels Congress Avenue.

5. Benefit District. To ensure adherence with the benefits requirement of the dual rational nexus test, a Mobility Fee Benefit District has been established and is delineated in the Mobility Fee Technical Report. In recognition that person travel does not always end at city limits, but the Mobility Fee Benefit District extends beyond city limits. The general limits of the Benefit District consist of the northern boundary formed by Hypoluxo Road from US Hwy 1 to Military Trail, the eastern boundary is formed by portions of US Hwy 1, the Intercoastal, and the Atlantic Ocean, the southern boundary is formed by city limits and the L 30 Canal from the Intercoastal to Military Trail, and the western boundary is formed by Military Trail.

6. Terms and Definitions. See Chapter 1, Article II or the Mobility Fee Technical Report for the terms and definitions associated with mobility fees. Definitions provided in Chapter 1, Article II shall control over the Technical Report as it relates to mobility fees.

7. Waiver. Any request to waive a mobility fee shall be in accordance with the City Code of Ordinances Part II, Chapter 8, Economic Development, Section 8-1.

B. Adoption of Mobility Fee Technical Report. The report entitled "City of Boynton Beach Mobility Fee Technical Report with Updated Mobility Plan Projects dated January 2025," approved by Resolution No. 25-036, as may be amended from time to time, is hereby adopted. This adoption includes but is not limited to, the following: the mobility plan projects included in the Technical Report, the basis of the assumptions, conclusions, and findings in such report as to the basis of the mobility fee, the methodology to calculate the mobility fee, and detailed methodology supporting the City of Boynton Beach mobility fees consistent with the mobility plan projects included in the Technical Report. The Technical Report consists of maps identifying mobility plan projects for future consideration, tables identifying specific mobility projects reflected on the maps, and mobility projects consisting of services and programs not reflected on the maps, such as mobility programs. The Technical Report shall be maintained and made available by the City upon request.

C. Mobility Fee Imposition. The mobility fee imposed by this section shall apply to new applications for development permits submitted on or after May 20, 2025, for future development that results in an increase in person travel demand above and beyond the current use of property.

1. Exclusion. This section shall not be imposed on following permits:

a. No Increase in Demand. Room additions, remodeling, rehabilitation, or other improvements to an existing structure, provided there is no increase in person trips or person travel demand and no increase in square footage for non-residential uses and no increase in the number of dwelling units for residential uses;

b. Improvements for Mobility Impaired Persons. Room additions, remodeling, rehabilitation, or other improvements to an existing structure, provided there is a demonstration the changes are needed to an existing residence to accommodate a mobility impaired person or home care that requires additional space to live or recover for medical reasons;

c. Rebuilding of Structure. Rebuilding of a damaged or destroyed structure, whether voluntary or involuntary, provided there is no increase in the intensity of use or no increase in square footage for non-residential uses and no increase in the number of dwelling units for residential uses;

d. Change in Use. A change in use that does not generate additional person trips or person travel demand or any increase in square footage for non-residential uses or increase in the number of dwelling units for residential uses; or

e. Accessory Structures. Accessory buildings that do not result in an increase in person trips or person travel demand will be exempt from the fee (e.g., detached garages, sheds, parking structures, covered parking).

2. Imposition. There is hereby imposed upon all new development that results in an increase in person travel demand above and beyond the current use of land, a mobility fee assessed at the time of development permit application and due prior to the issuance of the development permit. No development permit shall be issued until said mobility fee shall have been paid except as otherwise herein provided. Mobility fees are assessed at the mobility fee rate in effect at the time of development permit application. If the development permit is for less than the entire contemplated development, the fee shall be computed for the amount of development covered by the development permit. The obligations for payment of mobility fees shall run with the land.

a. Attributable Travel. The mobility fee is calculated based on the person travel demand attributable to the uses included in the mobility fee schedule.

b. Increase in Demand. Additionally, the mobility fee will be imposed for any structure that is altered, expanded, replaced, or has a change in use that results in an increase in person travel demand above and beyond the existing use of land.

c. Proportionate Share. Any developer, who, prior to the effective date for mobility fees, paid City proportionate share may be eligible for a pro-rata credit. Administrate procedures shall detail the requirements for a proportionate share credit agreement and said agreement shall be required prior to issuance or utilization of any credit. The credit shall also be adjusted to account for service charges or payment of the service charges based on the amount of credit provided.

d. Change in Size or Use. If the person travel demand increases due to a change in size or use, the mobility fee assessed shall be the incremental difference resulting from the alteration, expansion, replacement, or change in use as determined by the uses in the mobility fee schedule. less the mobility fee that would be imposed based on the existing use prior to the alteration, expansion, or replacement.

e. Reduction in Impact. If there is a change in use that results in a decrease in person travel demand generated by the previously allowed use, the applicant shall not be entitled to a refund or credit.

f. Abandoned Use. A structure or use of land that is inactive and has been abandoned for a period of more than three (3) years shall not be considered an existing

or active use for purposes of calculating mobility fee off-sets. The mobility plan and mobility fee are to be updated every three (3) years, and person travel demand is measured on a yearly basis. Therefore, person travel associated with the use is no longer captured in collected data travel demand, which is used to plan for future needed mobility projects. The City shall be required to document its findings and provide evidence the use or structure has been vacant for more than three (3) years. The applicant would be required to document and provide evidence that the City finding was not accurate if a request for a mobility fee is requested, and the City has found that the use was vacant more than three (3) years.

g. Prior Mitigation. For uses and structures considered to be active, any previous payment of proportionate share, mobility fees, or road impact fees under this section may be credited against the appropriate mobility fees owed because of a change of use or reestablishing a use of land or structure that has been vacant is not considered abandoned.

h. Request for Credit or Off-Set. Any request for credit or offsets of a mobility fee shall be made prior to the submittal of a development permit application and shall be resolved prior to issuance of a development permit unless otherwise stated in a written agreement per the applicant and the City per the requirements detailed in the administrative procedures. Any credits or off-sets not so claimed shall be deemed waived by the fee payer.

D. Mobility Fee Schedule. Any person who shall initiate any new impact generating land development activity, except as otherwise provided for herein, shall pay a mobility fee, based on the applicable assessment area established in the mobility plan and mobility fee technical report, as set forth in the following Mobility Fee Schedule:

Mobility Fee Schedule

Use Categories, Use Classifications, and Representative Uses	Mobility Fee
Residential Uses per sq. ft., unless otherwise indicated	
Single-Family Residential Dwelling (Attached, Detached, Duplex, Accessory Dwelling, Townhouse) [1]	$2.81
Multi-Family Residential Dwelling (Apartment, Condo, 3 or more Attached Dwellings, Dormitory) [2]	$3.31
Mobile Residence (Mobile Home (MH), Recreational Vehicle (RV), MH and/or RV Park) [3] per space or lot	$3,059
Institutional per sq. ft.	

Community Serving (Civic Club, Gallery, Museum, Performance Venues, Place of Assembly or Worship)	$3.70
Group Home (Assisted Living, Care or Recovery Homes, Congregate Living Facility, Nursing Home)	$3.66
Private Education (Afterschool, Family Day Care, K-12, Pre-K, Trade School, Tutor)	$7.93
Commercial Recreational Uses [4] per sq. ft., unless otherwise indicated	
Marina (wet berths, dry slips, ancillary repair, yacht club) per berth	$3,168
Entertainment, Outdoor (Amusement, Golf, Multi-Purpose, Recreation, Sports, Tennis) per acre	$28,850
Entertainment, Indoor (Amusement Arcade, Exercise Studio, Fitness, Gym, Health, Indoor Sports, Recreation)	$16.34
Industrial Uses per sq. ft.	
Industrial (Assembly, Brewery, Development and Testing, Distribution and Processing, Microbrewing, Trades, Utilities)	$2.95
Commercial Storage (Boat / Vehicle, Junk /Salvage Yard, Recycling / Waste Management, Open, Self-Service, Warehouse) [5]	$1.18
Office Uses per sq. ft.	
Office (Administrative, Business, Hospital, Post Secondary Education, Professional, Real Estate)	$5.89
Medical or Dental Office (Clinic, Dental, Health Service, Laboratory, Professional Care, Emergency Care, Rehab, Veterinary)	$14.78
Retail Uses per sq. ft.	
Retail (Auto / Boat Rental or Sales, New or Used Merchandise, Personal or Pet Care, Sales, Services, Stores) [6]	$7.92
High Impact Retail (Alcoholic Beverages, Banks, Grocery Store, Pharmacy & Drug Store, Sit-Down Restaurant) [7]	$17.24
Convenience Retail (Convenience Store, Fast Food Restaurant, Gasoline Station) [7]	$41.38
Non-Residential Uses per applicable unit of measure [8]	

Auto / Boat / Car Wash (Automated, Cleaning, Dry, Detailing, Polishing, Self-Serve, Vacuum, Wash, Wax) [9] per lane or stall plus per five (5) Stations	$16,134
Auto Charging or Fueling (Commercial Facility which requires Membership or Payment) [10] per charging or fueling position	$14,039
Auto or Boat Repair / Service (Brakes, Install, Maintenance, Major, Minor, Quick Lube, Repair, Tint, Tires) [11]	$8,580
Bank or Financial Drive-Thru Lane or Free-Standing ATM [12] per lane or ATM	$20,661
Fast Food or Quick Service Restaurant Drive Thru [13] per lane	$37,215
Overnight Lodging (B&B, Condo Hotel, Hotel, Motel, Short-term Rental, Transient) [3] per room	$4,108
Retail Drive-Thru (Dry Cleaner, Dollar Store, Grocery Store, Pharmacy & Drug Store, Retail) [14] per lane	$18,288

Mobility Fee Schedule Footnotes

[1] Single-Family Residential Square Feet is the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls.

[2] Multi-Family Residential Square Feet is the sum of the area (in square feet) of each building measured from the exterior surface of the exterior walls. This includes common areas, lobbies, leasing offices, and residential amenities not accessible to the public. Retail or office square footage leased to a third-party would pay the applicable mobility fee rate. Square footage does not include parking garages or structures.

[3] Any retail, office, or non-residential square footage that is leased to a third-party use to provides drinks, food, goods, or services to the public shall be required to pay the applicable mobility fee per the individual uses identified in the mobility fee schedule.

[4] For Commercial Recreational Uses that feature both indoor facilities and outdoor recreation, the indoor shall be based on the indoor mobility fee rate, the outdoor shall be made on the outdoor rate, any other uses shall pay the applicable mobility fee for the land use.

[5] Acreage for any unenclosed material and vehicle storage, including but not limited to boats, commercial vehicles, recreational vehicles (RV), and trailers, sales and display shall be converted to square footage.

[6] Retail includes all uses that do not fall under High Impact or Convenience Retail and generate less than 75 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study.
[7] High Impact Retail includes banks, pharmacies, sit down restaurants (non-fast food), grocery stores, supermarkets, beer, liquor, package, wine and spirits stores, bars, nightclubs, lounges. These uses generate between 75 and 250 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study. Convenience Retail includes convenience stores, gas stations, service stations, coffee, donut, sandwich, food and beverage that would be considered fast food or quick service restaurants. These uses generate between more than 250 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study.
[8] Non-residential uses are assessed applicable mobility fees per unit of measure in addition to the mobility fee assessed with the square footage of the building.
[9] Auto / Boat / Car Wash shall mean any car wash, wax, or detail where a third party or automatic system performs the cleaning service. Mobility Fees are assessed per bay or stall, plus per five (5) finishing stations. See definition for further detail. The applicable mobility fee rate would also be assessed for any additional building square footage under retail uses.
[10] Auto Charging or Fueling per position apply to a convenience store, gas station, general store, grocery store, supermarket, superstore, variety store, wholesale club or service stations with charging stations or fuel pumps. In addition, there shall be a separate mobility fee for the square footage of any retail building per the applicable mobility fee rate under retail uses. The number of charging or fueling positions is based on the maximum number of vehicles that could be charged or fueled at one time. Non-commercial vehicle charging stations associated with residential or non-residential uses that are required by the City or are provided by the owner as an amenity and not a commercial purpose shall not be assessed a mobility fee.
[11] Auto or Boat Repair/Service includes maintenance, repair, and servicing of motor vehicles. Mobility Fees are assessed per bay or stall, plus a retail rate associated with any additional building sq. ft. under retail uses for waiting areas, parts, and sales.

[12] Banks shall pay the High Impact Retail rate for the square footage of the building under the retail use category. Drive-thru lanes, Free Standing ATM's and Drive-thru lanes with ATM's are assessed a separate fee per lane or per ATM and are added to any mobility fee associated with a bank building. The free-standing ATM is for an ATM only and not an ATM within or part of another non-financial building, such as an ATM within a grocery store.

[13] Any drive-thru associated with a fast food restaurant will be an additive fee in addition to the applicable Convenience Retail mobility fee per square foot of the building. The number of drive-thru lanes will be based on the number of lanes present when an individual places an order or picks up an order, whichever is greater.

[14] Any drive-thru associated with a Retail or High Impact retail use will be assessed an additive mobility fee in addition to the applicable retail use mobility fee rate per square foot of the building. The number of drive-thru lanes shall be based on the total number of lanes available for either pick-up, drop-off, or placement of an order for goods or services.

E. Mobility fee determination.

1. Determination. The mobility fee shall be determined using the land use classifications in the mobility fee schedule pursuant to Section 10.D. Mobility Fee Schedule of this Article.

2. Closest use determination. In the event a project involves a use not contemplated under the mobility fee land use classifications in Section 10.D. Mobility Fee Schedule, the Planning and Zoning Director or their designee shall determine the mobility fee utilizing the closest land use classifications in the Technical Report approved by Resolution No. 25-036 and the administrative manual.

3. Mixed-use. In the event of a development that involves a mixed-use project, the mobility fee administrator shall determine the mobility fee based on each separate mobility fee land use classification included in the proposed mixed-use project.

4. Assessment. The mobility fee will be determined using the appropriate use category, land use classification, assessment rate, and rate established pursuant to Section 10.D. of this Article.

F. Alternative Determination.

Alternative mobility fee or special mobility fee determinations may be authorized. In the event an applicant believes that the cost to mitigate the impact of the development of improvements needed to serve the applicant's proposed development is less than the fee established in this Section, the applicant may request consideration of and submit an alternative mobility fee or special mobility fee determination request, along with an application and review fee as determined by the City and support materials to substantiate the request to the mobility fee administrator pursuant to the provisions of this section. If the mobility fee administrator finds that the data, information, assumptions, formulae, and methodology used by the applicant to calculate the alternative mobility fee or special mobility fee satisfy the requirements of this section, the alternative mobility fee or special mobility fee shall be deemed the mobility fee due and owing for the proposed development.

1. Calculation of Fee. The mobility fee administrator is responsible for calculating mobility fees in accordance with the provisions of this Section. If an applicant believes project impacts are lower than justified by the findings of this Section, or believes the proposed use is incorrectly assigned as identified in the mobility fee schedule, or that the assumptions that derive the mobility fee are not applicable to a specific proposed land use, an adjustment to the fees may be requested along with an application and review fee. The mobility fee administrator shall determine whether the request shall be reviewed as either an alternative mobility fee determination or a special mobility fee determination, based upon the impact of the proposed use on the multimodal transportation system. The process for reviewing alternative mobility fee determinations is listed below in Section 10.F of this Article The process for special mobility fee determinations for minor projects with significantly less impacts is found in Section 10.F of this Article.

2. Alternative Mobility Fee Determination.

a. The alternative mobility fee determination shall be based on data, information, assumptions, formulae, and methodology contained in this Article and the mobility fee study referred to in Section 10.B of this Article herein, or independent sources, provided that:

(1). The independent source is an accepted standard source of transportation engineering or planning data or information; or

(2). The independent source is a local study carried out by a qualified planner or engineer pursuant to an accepted methodology of planning or engineering; or

(3). Where different data, information, assumptions, formulae, or methodology are employed, such differences shall be specially identified and justified.

b. An alternative mobility fee calculation shall be undertaken through the submission of an application for review of an alternative mobility fee determination for the mobility fee component for which an alternative mobility fee calculation is requested. A developer shall submit such an application prior to the submittal of a building or special use permit application or as otherwise agreed to in the Mobility Fee. The City may submit such an application for any proposed land development activity for which it concludes the nature, timing, or location of the proposed development makes it likely to generate impacts costing substantially more to remedy than the amount of the fee that would be generated by the use of the Mobility Fee Schedule in Section 10.D.

c. Within twenty (20) days of receipt of an application for review of an alternative mobility fee determination, the mobility fee administrator, shall determine if the application is complete. If the mobility fee administrator determines that the application is not complete, a written statement specifying the deficiencies shall be sent to the applicant. The application shall be deemed complete if no deficiencies are specified. The mobility fee administrator shall take no further action on the application until it is deemed complete.

d. When the mobility fee administrator determines the application is complete, it shall be reviewed, and a written decision shall be rendered in thirty (30) days on whether the mobility fee should be modified and, if so, what the amount should be.

e. If the mobility fee administrator finds that the data, information, assumptions, formulae, and methodology used by the applicant to compute the alternative mobility fee calculation satisfies the requirements of this Article, the re-determined mobility fee shall be deemed the mobility fee due, and owing for the proposed land development activity. This adjustment in the fee shall be set forth in a mobility fee agreement which shall be entered into pursuant to Sections 10.H, Presumption, Agreements, and Security Requirements.

f. A determination by the mobility fee administrator that the alternative mobility fee re-determination does not satisfy the requirements of this Article may be appealed to the City Commission.

g. The applicant shall be responsible for the full costs that the City may incur to review the alternative mobility fee data and methodology, which may include consultant and legal costs. Payment will be due at the time of the request for the alternative calculations.

h. An applicant who submits a proposed alternative mobility fee pursuant to this section and desires the issuance of a building permit or special use permit prior to the resolution of the pending alternative mobility fee shall pay the applicable mobility fee

prior to, or at the time said applicant desires the building permit. Said payment shall be deemed paid "under protest" and shall not be construed as a waiver of any rights. Any difference in the amount of the mobility fee after the determination of the pending alternative mobility fee shall be refunded to the applicant.

3. Special Mobility Fee Determination. An applicant may request a special mobility fee determination for smaller, less intense projects when data and information are presented that substantiates that a project has unique characteristics other than those upon which the mobility fee calculation was based. It is the applicant's responsibility to submit adequate justification and support data to substantiate a lower impact to the mobility fee administrator. The mobility fee administrator may review the request and ask for additional information. The applicant is responsible for additional costs that the City may incur to review these special requests, including consultant and legal costs. Payment will be due at the time of request for the determination.

G. Reserved.

H. Reserved.

I. Mobility Fee Credits.

1. Capital Improvements Program. Only mobility projects included in the capital improvements program are eligible for mobility fee credits, except as provided for in Section 10.I. An applicant may request that the City Commission add mobility projects to the capital improvements program. The mobility projects requested for inclusion in the capital improvements program shall be based upon the mobility plan. The administrative manual shall detail the information required to request mobility projects be added to the capital improvements program for purposes of establishing mobility fee credits.

2. Adopted Plans. Mobility projects included in plans adopted by the City Commission, a Community Redevelopment Agency, the Palm Beach County Transportation Planning Agency (TPA), the Florida Department of Transportation (FDOT), Palm Beach County, a Transit Authority, a State of Florida Department, the Treasure Coast Regional Planning Council, or other governmental entity or utility provider may be considered for credit eligibility if the mobility fee administrator, in consultation with the City's Planning and Public Works Department, determines the mobility project implements the mobility goals of the Comprehensive Plan. The administrative procedures shall detail the information required to request consideration for multimodal projects identified in an adopted plan for purposes of establishing mobility fee credits.

3. Development Orders or Permits. An applicant may request mobility fee credit against any mobility fee assessed pursuant to Section 10.D. in an amount equal to

the cost of mobility projects or contributions of land, money or services for multimodal projects contributed or previously contributed, paid for or committed to by the applicant or his predecessor in interest where the mobility project is a condition of a development order or permit. The administrative procedures shall detail the information required to request establishing mobility fee credits for off-site multimodal projects or the upgrade of on-site mobility projects in excess of plan or code requirements pursuant to Section 10.I. of this Article that are a condition of a development order or permits issued by the City, County, or FDOT, or requested by the City Engineer, that increase person capacity above and beyond that needed to serve the new development may request credit. Mobility fee agreements pursuant to Section 10.H., shall be required.

4. Plan and Code Requirements. Mobility projects required to meet minimum Comprehensive Plan and Land Development Code requirements are not eligible for any mobility fee credit. Site access improvements for turn lanes, sidewalks, bike lanes, paths, trails, mobility hubs, round-a-bouts, or traffic signals internal to the development, along the adjacent boundary of the development, at development entrances, or immediately adjacent to the development and considered site-related are not eligible for any credit, except as provided for in Section 10.J. of this Article.

5. Amount of Mobility Fee Credit. The amount of developer contribution credit to be applied to the mobility fee shall be determined according to the following standards of valuation:

a. The appraised fair market land value of the contributed parcel as of the date of building permit, agreement to contribute, or contribution, whichever is earlier. The administrative manual shall detail requirements for qualifications of appraisers and establish a process if the City disagrees with the appraised value. No credit should be granted pursuant to this section unless the cost of the improvements or dedication of land were paid for and the contributions made within the last three (3) years; and

b. The cost of mobility projects shall be based upon documentation certified by a professional engineer or registered planner, and such documentation shall be reviewed and approved by the City Engineer. The City reserves the right to require the developer to competitively bid in accordance with the City Code, in which case the credit shall be limited to the actual cost or 100 percent of the lowest responsible bid amount, whichever is less. All bidders shall be qualified to construct the multimodal projects. The administrative manual shall provide additional detail on the types of documentation to be provided and detail the cost components of multimodal projects that may be eligible for credit; and

c. The administrative manual shall detail additional requirements for mobility fee credit documentation and the options available and process for any excess mobility fee credit.

6. Transfer of Mobility Fee Credit. Credit for contributions, payments, construction, or dedications of a mobility fee shall not be transferable to another property where a mobility fee is imposed, unless provided for in a developer agreement, mobility fee agreement, or as provided for in Florida Statute. Credit shall first be used for the full development potential of the land development activity for which a development order was approved before any excess credit can be considered for transfer to another property. The establishment, tracking and agreement to allow credit transfer shall be consistent with the processes and requirements detailed in the administrative procedures or as specified in a developer agreement or mobility fee agreement.

J. Mobility Fee Benefit District.

1. Intent. The establishment of mobility fee benefit district is the best method of ensuring that the mobility fees paid by new development provide a benefit to the new development which paid the mobility fees as required in the benefits test of the dual rational nexus test.

2. Expenditure. The mobility fee benefit district provides a clearly defined boundary for the expenditure of mobility fee revenue. Using the mobility fee benefit district ensures that funds paid by new development are spent on multimodal projects to accommodate person travel demand within the benefit district, providing a reasonable nexus between the expenditure of mobility fee revenue and the development for which the mobility fees are paid.

3. Establishment. The extent of the mobility fee benefit district shall be all areas within city limits, including existing County enclaves. For purposes of mobility fee expenditures, the Technical Report provides a Mobility Fee Benefits District Map.

K. Mobility Fee Fund Account. There is hereby-established a mobility fee fund account for the mobility fee benefit district. For accounting purposes, mobility fees shall be considered special revenue funds. Mobility fees collected from property located within the mobility fee benefit district shall be deposited into the corresponding mobility fee fund. Funds withdrawn from these accounts shall be used solely in accordance with the provision of sections 10.J. and 10.L. The mobility fee fund account is subject to audit and reporting requirements of section 163.31801, Florida Statutes, or as amended by the Legislature.

L. Mobility Fee Expenditures.

1. Expenditure of Funds. Amounts on deposit in the mobility fee fund account shall be used by the City solely for developing multimodal projects or for financing directly, or as a pledge against bonds, revenue certificates, and other obligations of indebtedness, the costs of multimodal projects, or portions thereof, that are located in the mobility fee benefit district from which the funds were collected, that are included in the capital improvement element or program, an adopted plan, as a development order or permit condition, or where the City Commission agrees to add the mobility project to the capital improvements program.

2 Prohibition. The amounts on deposit in the mobility fee fund shall not be used for an expenditure that would be classified as a transportation operation and maintenance expense unless expressly included in the capital improvements program or mobility plan with justification for using funds for the operation and maintenance of a mobility project.

3. Use of Funds. Funds withdrawn from the mobility fee account must be used solely in accordance with the provisions of this section. The disbursal of such funds shall require the approval of the City Commission upon recommendation of the City Manager.

4. Finding of Benefit. The use of mobility fees outside city limits but within the Mobility Fee Benefit District shall require a written finding with evidence that the expenditure of funds will provide a mobility benefit to the development that paid a mobility fee to the City.

5. Interest-Bearing Accounts. Any mobility fee funds on deposit not immediately necessary for expenditure shall be invested in interest-bearing accounts. Funds may be pooled for investment, provided all income derived from the fund's assets is deposited in the applicable fund account.

M. Mobility Fee Refunds.

1. Refund Required. The mobility fees collected pursuant to Section 10.D. of this Article shall be returned to the then present owner of the development if the fees have not been encumbered or spent by the end of the calendar quarter immediately following seven (7) years from the date the fees were collected, or if the development for which the fees were paid was never begun.

2. Refund Process. Mobility fees collected shall be deemed to be encumbered or expended on a “first in-first out” basis (i.e., the first money placed in a fee fund shall deemed to be the first money expended or encumbered). The following procedure will apply for requests for eligible refunds:

a. The then present owner must petition the City Commission for the refund within one (1) year following the end of the calendar quarter immediately following seven (7) years from the date on which the fee was received.

b. The petition must be submitted to the City Manager and must contain:

(1) A notarized sworn statement that the petitioner is the current owner of the property or his authorized agent; and

(2) A copy of the dated receipt issued for payment of the fee or other competent evidence of payment; and

(3) A certificate of title or attorney's title opinion showing the petitioner to be the current owner of the property or his authorized agent; and

(4) A copy of the most recent ad valorem tax bill; and

(5) A copy of the building permit or development agreement pursuant to which the mobility fees were paid.

c. Within sixty (60) days from the date of receipt of a petition for refund, the City Manager or designee shall advise the petitioner and the City Commission of the status of the fee requested for refund. For the purposes of determining whether fees have been spent or encumbered, the first money placed in a trust fund account shall be deemed to be the first money taken out of that account when withdrawals have been made in accordance with section 10.L.

d. When the money requested is still in the mobility fee fund account and has not been spent or encumbered by the end of the calendar quarter immediately following seven (7) years from the date the fees were paid, the money shall be returned with interest at the rate of one (1) percent per annum.

e. When a refund is requested because construction was never begun, all development order approvals shall have expired, and the applicant shall execute an agreement acknowledging the expiration of development order approval.

f. A request for a refund of mobility fees must be made one (1) year from the issuance of the building permit or special use permit or six (6) months from the expiration of the permit, whichever is later only if no development activity has started. The refund amount will be less ten (10) percent of the fees that were ultimately to have been paid, regardless of the amount actually paid, to cover administrative costs. If the applicant does not apply within the time limits stated above, there will be no refund.

N. Effect on Land Use and Development Regulations.

1. Land Use. The listing of a use in the mobility fee schedule is solely for purposes of establishing the applicable mobility fee schedule for such use, and such listing does not mean that the use is permitted or available under the applicable Comprehensive Plan Future Land Use Element and Zoning District requirements. In addition, the listing of the use in the mobility fee schedule shall not be considered evidence that the use is appropriate in any existing or future land use classification or zoning district.

2. Land Development Code. The payment of mobility fees does not ensure nor grant compliance with the City's land development code, including regulations relating to site access, corridor access management, substandard roads, secondary access, timing, and phasing, or mobility impact or site impact review. However, if such regulations require transportation mitigation for the same travel demand impacts addressed through the payment of mobility fees, such regulations shall be deemed to provide for mobility fee credit against imposed mobility fees consistent with Federal and State laws and this section.

O. Administrative Manual and Service Charges.

1. Administrative Procedures. The City shall prepare and periodically update mobility fee administrative procedures that addresses administration, implementation, and update of the mobility plan and mobility fee. The administrative manual shall address assessments, credit and off-set request, fee and land use determinations, special studies, expenditures, and monitoring. The administrative manual shall require acceptation by resolution of the City Commission.

2. Service Charges. The City shall prepare and periodically update mobility fee service charges to ensure that the City's general fund does not bear the full burden of administering and implementing the mobility fees, provided that the service charges does not exceed the City's actual costs of administration and implementation of the mobility fee system per Section 163.31801, Florida Statutes. Mobility fee service charges shall be in addition to the imposed mobility fee and shall account for future updates of the mobility plan and mobility fee in the service charge determination. The mobility fee service charge shall require acceptance by resolution of the City Commission.

P. Annual Report.

The City shall comply with all audit requirements of Florida Statutes. The City shall include in its annual Capital Improvements Plan update an accounting of projects funded by mobility fees. The annual budget shall indicate mobility fee revenues and expenditures.

Q. Review and Update.

1. Mobility Plan and Mobility Fee Update. The Mobility Plan and Mobility Fee shall be updated by the City at least once every four (4) years, with no more than five (5)

years between adoption. The Mobility Plan and Mobility Fee shall be reviewed annually during either the capital improvements budget process or the preparation of the mobility fee annual report. The review shall include a recommendation regarding the need for any interim updates due to factors such as increased cost, amendments to the Future Land Use Element and Map that result in the need for additional infrastructure, and the update of professional technical reports such as the ITE Trip Generation Manual or Highway Capacity Manual or the National Household Travel Survey used in the calculation of a mobility fee. The review and updates shall consider all factors utilized in the most recent computation of mobility fees. Any update more frequent than four (4) years would require a finding of extraordinary circumstances as provided for in Florida Statutes. However, if a full reevaluation and updates are not complete within the required four (4) year period, the last adopted mobility fee shall remain in effect until the reevaluation is complete.

2. Required Notice for Increase. Updates to the mobility fee that result in an increase shall be required to provide 90 days' notice before the increased fees are assessed on new development per Section 163.31801, Florida Statutes.

3. Annual Inflation Adjustment. To ensure that mobility fees keep pace with inflation, on January 1st of each calendar year, starting in 2026, the mobility fees in section 10.B. shall increase by the projected rate of inflation for the upcoming calendar year as determined by the most recent and localized inflation data available.

4. Annual Adjustment. The City shall adjust the mobility fees in section 10.D. of this Article on or before September 30th of each calendar year, starting in 2025, if necessary due to inflation.

5. Notice Provided. The City shall advertise any increase in mobility fees in a publication of general circulation available to City residents and businesses or as permitted by State Statute, on the City's website. The advertisement shall be published and posted 90 days prior to the increase of the mobility fees. The requirements of Section 10.Q.of this Article shall serve as the statutorily required notice to the public that mobility fees will increase on an annual basis, adjusted for inflation, and that Section 10.Q shall be deemed to address Statutory requirements that notice be provided 90 days prior to an increase in a mobility fee. The notice requirement related to sections 10.Q.3. and 4. is provided as a courtesy reminder only.

R. Developer Agreements.

1. Applicability. An applicant may enter into a developer agreement with the City to provide equivalent mobility projects necessary to serve new development.

2. Approval. Any developer agreement proposed by an applicant shall be presented to and approved by the City Commission prior to the issuance of permits. Any

such agreement shall provide for execution by any mortgagees, lienholders, or contract purchasers in addition to the landowner, and shall require the applicant to record such agreement in the public records of Palm Beach County. The City Commission shall approve such an agreement only if it finds that the new agreement will apportion the burden of expenditure for new facilities in a just and equitable manner, consistent with applicable Florida Statutes, case law, and this section.

3. Developer Agreement Amendment. If an applicant has previously entered into a developer agreement with the City with conditions, the applicant or applicant's successor in interest may request an amendment of the prior agreement to bring the conditions into consistency with this section. Applicant must file a request for such modification with the City within one (1) year of the effective date of this section.

S. Vested Rights.

1. Request. It is not the intent of this section to abrogate, diminish or modify the rights of any persons that have vested rights pursuant to a valid governmental act of the City. An applicant may petition the City Commission for a vested rights determination which could exempt the applicant from portions of this section. The City shall evaluate the petition and submit a recommendation to the City Commission based on the following criteria:

a. A valid, unexpired governmental act of the City authorizing the building for which applicants seek a certificate of occupancy exists.

b. Expenditures or obligations made or incurred in reliance upon the authorizing act are reasonably equivalent to the mobility fee required by Section 10.D.

c. That it would be inequitable to deny the applicant the opportunity to occupy a previously approved building under the conditions of the previous approval by requiring the applicant to comply with the provisions of this section.

T. Penalty. Violations of this section shall constitute a misdemeanor enforceable in accordance with the City Code, or by an injunction or other legal or equitable relief in the circuit court against any person violating this article, or by both civil injunctive and criminal relief.

Section 5. Codification. It is the intention of the City Commission of the City of Boynton Beach, Florida, and it is hereby ordained that the provisions of this Ordinance shall become and be made a part of the Code and Ordinances of the City of Boynton Beach, Florida and that Sections of this Ordinance may be renumbered, re-lettered and

the word “Ordinance” may be changed to “Section,” “Article,” or such other word or phrase in order to accomplish such intention.

Section 6. Scrivener’s Errors. Corrections of typographical errors which do not affect the intent of this Ordinance may be authorized by the City Attorney without a public hearing by filing a corrected or re-codified copy with the City Clerk.

Section 7. Conflicts. That all Ordinances, parts of Ordinances, Resolutions, or parts of Resolutions in conflict herewith, be and the same are repealed to the extent of such conflict.

Section 8. Ordinance to be Liberally Construed. This Ordinance shall be liberally construed to effectively carry out the purposes hereof, which are deemed not to adversely affect public health, safety, or welfare.

Section 9. Severability. If any clause, section, or other part of this Ordinance shall be held by any court of competent jurisdiction to be unconstitutional or invalid, such unconstitutional or invalid part shall be considered eliminated and in no way affect the validity of the other provisions of this Ordinance.

Section 10. Effective Date. That this Ordinance shall take effect ninety (90) days after passage.

EXECUTIVE SUMMARY

In 1985, the Florida Legislature passed the Growth Management Act that required all local governments in Florida to adopt Comprehensive Plans to guide future development and mandated that adequate public facilities be provided "concurrent" with the impacts of new development. Transportation concurrency became the measure used by local governments to ensure that adequate public facilities, in the form of road capacity, was available to meet the transportation demands from new development.

By 1993, the Florida Legislature recognized that an unintended consequence of transportation concurrency is that it discouraged development in urban areas where road capacity was constrained and pushed development to suburban and rural areas where road capacity was either available or was cheaper to construct. In 2007, the Legislature introduced the concept of mobility plans and mobility fees as an alternative to transportation concurrency, proportionate share, and road impact fees. Mobility fees are a way for new development to equitably mitigate its impact (i.e., traffic) through a streamlined and transparent one-time payment to local governments.

In 2011, the Legislature eliminated state mandated transportation concurrency and made it optional for any local government. In 2013, the Legislature encouraged local governments to adopt alternative mobility funding systems, such as a mobility fee, based on a plan of improvements. In 2019, the Legislature required mobility fees follow the same statutory process requirements as impact fees.

In 2021, the City of Boynton Beach adopted a Complete Streets Mobility Plan that established a framework to enhance mobility for people walking, bicycling, riding transit and driving vehicles. The Plan emphasized safety and connectivity on arterial and collector roads, the majority of which are maintained and owned by Palm Beach County and the Florida Department of Transportation (FDOT). The Complete Streets Mobility Plan was also intended to serve as a basis for adoption of a mobility fee as an alternative to transportation concurrency and County road impact fees. There were events that occurred in 2021 that resulted in the City deciding to not move forward with adoption of a mobility fee.

In 2024, the City authorized a study to move forward with development of a mobility fee. The Florida Legislature adopted House Bill 479 in 2024 that amended Florida Statute to provide further guidance to local governments pursuing alternatives to transportation concurrency and road impact fees. The amendment included definitions for mobility plans and mobility fees and explicitly stated that any local government may adopt an alternative transportation system based on a mobility plan and a mobility fee. The amendment also stated that only one fee to mitigate transportation impacts from new development may be assessed by the local government that issues building permits. HB 479 provided guidance for a municipality to enter into an interlocal agreement with a county where the county assessed a transportation mitigation fee within the municipality.

The 2025 Boynton Beach Mobility Fee is based on updated Mobility Plan Projects that emphasize safe, convenient, connected, and visible projects primarily on City maintained and owned streets. City streets feature lower traffic volumes and slower speeds, which are more conducive to encouraging people to walk, bicycle, and ride transit. The updated Mobility Plan Projects also include County and State Road improvements. Over the next 20 years, the total cost of the updated Mobility Plan Projects is $271,969,256, of which $28,432,500, or 10.45%, are the cost for County Road improvements. Over the past 20 years, the County has collected over $32 million in road impact fees from new development in Boynton Beach and has expended roughly $2 million in the City. Over the next five (5) years, mobility fees collected by the City should be primarily expended on updated Mobility Plan Projects in the City.

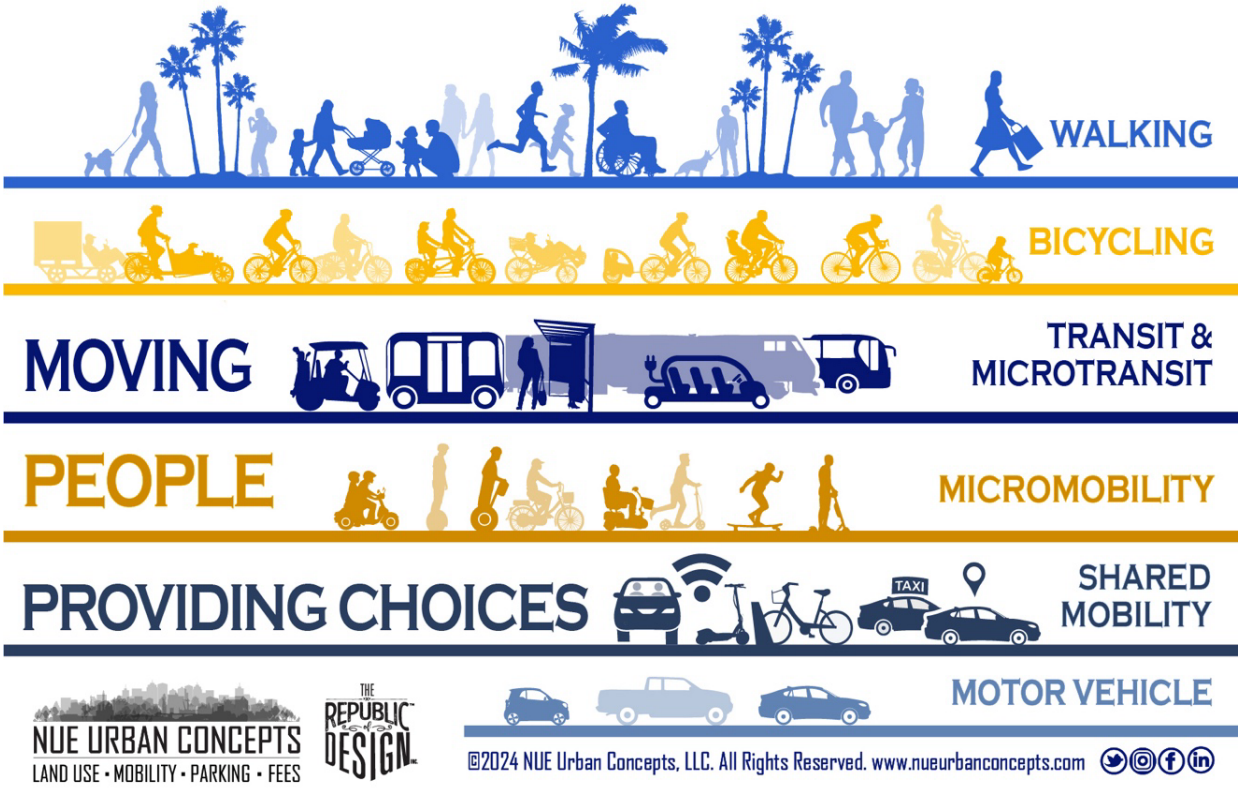
UPDATED MOBILITY PLAN PROJECTS

The updated Mobility Plan Projects serve as the basis to develop the City's Mobility Fee. The updated Mobility Plan Projects provide a foundation for Boynton Beach to proactively prioritize projects to meet the growth, travel, and mobility needs of the community in a manner that is coordinated with the Future Land Use Element in the City's Comprehensive Plan. The updated Mobility Plan Projects support the City's ongoing initiatives to transition its transportation system from primarily moving vehicles, towards a multimodal system focused on safely moving people, whether they choose to walk, bicycle, ride transit, or continue to drive their vehicles. **Mobility Plan Projects consist of walking and streetscape enhancements, curbless shared streets, roadway improvements, shared-use paths, sidewalks, bike lanes, boardwalks, transit circulators, water taxi service, mobility hubs, and multimodal programs, services, and studies.**



The updated Mobility Plan Projects consist of separate Plans for: (1) Streets; (2) Multimodal Corridors; and (3) Transit. The Streets Plan includes projects for walking & streetscape enhancement, curbless shared streets, and complete street roadway widening. The Multimodal Corridors Plan include bike lanes, boardwalks, shared-use paths, sidewalks, and multimodal corridor evaluations crossing I-95. The Transit Plan includes transit circulators, mobility hubs, water taxi docks, and parking facilities. The updated Mobility Plan Projects also includes several Mobility Programs to be further evaluated and implemented.

STREETS PLAN (Page IX)

The Streets Plan emphasizes improving accessibility, connectivity, and mobility within Boynton Beach. The Streets Plan consist of the following types of projects: (1) Walking & Streetscape Enhancement; (2) Curbless Shared Streets; and (3) Complete Street Roadway Widening.

Walking & Streetscape Enhancement

Mobility Plan Projects for Walking & Streetscape Enhancement are proposed to be designed with the intent to prioritize people walking and feature lower speeds, safer crossings, with appropriate traffic calming and streetscape measures. Walking & Streetscape Enhancements are already under construction along portions of Boynton Beach Blvd and proposed along portions of 1st Avenue, 4th Street, MLK Jr. Blvd, and Federal Hwy (US 1).

Curbless Shared Streets

Curbless Shared Streets are a relatively new concept in the U.S. The recent reconstruction of portions of Clematis Street and Rosemary Avenue within Downtown West Palm Beach are both examples of Curbless Shared Streets. These Streets prioritize creating a walkable environment where vehicles drive slow enough to allow for people to safely bicycle and access transit circulators within shared travel lanes. East Ocean Avenue between US 1 and Seacrest is an ideal initial corridor for conversion to a Curbless Shared Street within Downtown.

Complete Street Roadway Widenings

The Streets Plan includes proposed widenings of portions of 23rd Avenue, 8th Street and Miner Road to construct either center turn lanes or raised landscape medians, along with enhanced multimodal improvements for people walking and bicycling. The Streets Plan also includes the widening of High Ridge Road to four (4) lanes between Gateway Blvd and Miner Road, along with enhanced multimodal improvements for people walking and bicycling.

MULTIMODAL CORRIDORS PLAN (Page X)

The Multimodal Corridors Plan establishes Principal, Major, and Minor Multimodal Corridors to safely connect residents with schools, parks, and major destinations. The Multimodal Corridors are comprised of bike lanes, shared-use paths, sidewalks, street lighting, and high visibility crosswalks, along with hardscape and landscape enhancements. Each Multimodal Corridor is comprised of smaller improvements to City Streets, with some improvements on County and State Roads. The Corridor concept is similar to that of roadway classifications. Principal Corridors are the primary routes for multimodal travel. Major and minor corridors provide connectivity for residents to the primary corridors. The Multimodal Corridors Plan also includes boardwalks along portions of the intercoastal waterway and two (2) potential multimodal crossings of 95.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Principal Multimodal Corridors

There are two (2) Principal Multimodal Corridors, one east of 95 and one west of 95, that have been established to provide for a continuous, safe, and visible multimodal route for people walking and bicycling that runs from the northern limits to the southern limits of the Mobility Study Area. The Principal Multimodal Corridor east of 95 is intended to provide a higher quality alternative to Seacrest Blvd for people walking and bicycling. The Principal Multimodal Corridor west of 95 is intended to provide a higher quality alternative to Congress Avenue for people walking and bicycling, along with providing access to the existing TRI-Rail Station.

Major Multimodal Corridors

There are a total of six (6) Major Multimodal Corridors. The first is east of 95 that connects Downtown, the future FEC Rail Station, and the Woolbright Mobility District. The second is west of 95 and connects the TRI-Rail Station with Boynton High School, Renaissance Commons, the Boynton Beach Mall, and Congress Middle School. The third runs along US 1 and would connect several proposed water taxi stops (within parks along the intercoastal) with Downtown and the Woolbright Mobility District. The fourth connects US 1, Galaxy Elementary, Galaxy and Barton Memorial Parks. Proposed corridors along Boynton Beach Blvd and Gateway Blvd provide east-west connectivity.

Minor Multimodal Corridors

Minor Multimodal Corridors provide connectivity between residents and a specific school, park, or major destination. These corridors tend to be shorter routes, but are a key component to providing a convenient, safe, and visible multimodal network.

Boardwalks

The Multimodal Corridors Plan identifies several boardwalk project along the intercoastal. The boardwalk projects are intended to fill in gaps between existing publicly accessible boardwalks and docks. These boardwalks would either be freestanding wooden structures or provided in conjunction with docks or seawalls. The boardwalks will provide enhanced connectivity to existing City parks and may serve as docks or stops for future water taxi services.

Multimodal Crossing Evaluations

The Multimodal Corridors Plan includes studies to evaluate the feasibility of two (2) proposed multimodal crossings of 95 and the TRI-Rail tracks west of 95. Both corridors are longer term visions to enhance multimodal connectivity between Boynton Beach east and west of 95, without the need for people walking and bicycling to travel along multi-lane arterials and cross major interchanges. Both corridors will require additional evaluation to determine the feasibility of the proposed improvements.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

TRANSIT PLAN (Page XI)

The Transit Plan identifies transit circulators, mobility hubs, and water taxi service to create multiple park once environments at major destinations within the City. The Transit Plan also incorporates the existing on demand transit service provided by Circuit and funded by the Community Redevelopment Agency (CRA). The circulator routes are subject to change.

Transit Circulators

The Transit Plan identifies five (5) transit circulators connected to mobility hubs throughout the City. The transit circulators are proposed to be either 15 to 25 passenger vehicles or smaller low speed vehicles that can accommodate anywhere from three (3) to eight (8) passengers. They are intended to serve mobility within the City and complement the County level service provided by Palm Tran. The following are the five (5) proposed transit circulator routes (subject to change):

(1) **Downton to Beach** is already being provided from Downtown to Ocean Front Beach Park.

(2) **Downtown to Mall** would connect the Downtown and Boynton Beach Mall mobility hubs.

(3) **Circulator East** is proposed to primarily run along Gateway Blvd and US 1 and connect mobility hubs at the TRI-Rail Station, Downtown, and in the Woolbright Mobility District.

(4) **Circulator West** is proposed to connect mobility hubs at the TRI-Rail Station, Renaissance Commons, the Mall, SW 8th Street, and the Woolbright Mobility District.

(5) **Woolbright to Hospital** would connect Bethesda Baptist Memorial Hospital to the Woolbright Mobility District, which provides access to Downtown, the Mall, and TRI-Rail by riding either the Circulator East or West routes from the Woolbright Mobility District.

Mobility Hubs

Mobility hubs are locations where multiple ways of travel (e.g., walk, bike, transit) converge and feature various amenities (e.g., covered waiting areas, pick-up / drop-off lanes). These mobility hubs can be located within mobility districts, in mixed-use developments, or at major developments. The Transit Plan identifies ten (10) potential mobility hubs, all interconnect by proposed transit circulators. The final location of mobility hubs requires further evaluation.

Water Taxi

The Transit Plan includes future water taxi routes and ADA accessible docks along the intercoastal that could provide additional connectivity and access to future rail service Downtown. Water taxi service at this present time would likely not be successful without either greater densities downtown or future rail service to serve as a draw to residents along the intercoastal. The Transit Plan has identified ten (10) water taxi stops, located within parks, along the intercoastal.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

MOBILITY PROGRAMS

The updated Mobility Plan Projects include initiatives to be implemented overtime. The following are proposed Mobility Programs: (1) Low Speed Streets Pilot Program; (2) Micromobility and Low Speed Electric Vehicle Program; (3) Vision Zero Action Plan; (4) Wayfinding Program; (5) ADA Curb Ramp Retrofit Program; (6) Mobility Access Program; (7) Multimodal Plans, Programs, Services & Studies; and (8) Mobility Plan & Fee Implementation Program.

PARK ONCE ENVIRONMENTS

The integration of parking into the updated Mobility Plan Projects through the creation park-once environments is an essential component to addressing existing and future congestion within the City. Creating park-once environments consist of planning for future parking, mobility hubs, and transit circulators at key destinations within the City. Creating park once environments recognizes that people will still sometimes need to drive vehicles; however, the goal is to facilitate parking at a centralized location and then make it convenient and desirable to walk, bicycle, or ride a transit circulator to reach their final destination.

QUALITY OF SERVICE STANDARDS

Florida Statute 163.3180 (5)(f)(5) identifies the establishment of multimodal quality of service (QOS) standards as part of an alternative transportation system. Street quality of service (QOS) standards, based on posted speed limits, are intended to be used in conjunction with areawide roadway LOS standards as a planning tool used for innovative street design. Multimodal QOS standards are based on the types of facilities for people walking and bicycling. Transit QOS standards are based on the type, frequency, and span of service.

COMPLETE STREET MOBILITY PLAN UPDATE

The Mobility Fee Technical Report includes detail for each of the updated Mobility Plan Projects and Mobility Programs. The Technical Report also includes additional detail related to quality of service standards (QOS) and the establishment of park once environments. The Mobility Fee Technical Report is not intended to be a Mobility Plan. It does summarize elements to be further expanded upon in the City's Complete Street Mobility Plan.

The City will commence with an update to its Complete Street Mobility Plan in 2025. The updated Mobility Plan Projects included in the Mobility Fee Technical Report maybe further refined as part of the update. The Complete Street Mobility Plan will further evaluate establishment of Quality of Service (QOS) standards for streets, sidewalks, bike lanes, and transit. The Complete Street Mobility Plan may also establish baseline existing multimodal conditions and performance measures to evaluate effectiveness and progress of the Plan. The establishment of park once environments Downtown and within mobility districts will also be further evaluated.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

MOBILITY FEE

The basis for the City of Boynton Beach Mobility Fee is the updated Mobility Plan Projects intended to meet future travel demand from new development, consistent with Florida Statutes 163.3180 and 163.31801. **New development** is defined as **"any new residential and non-residential construction or expansion of building(s), lanes(s), structure(s), or any changes in the use of any building(s) or structure(s) or land use that will generate additional impact on the city's public facilities." Impact** is defined as **"any new development that results in an increase in person travel demand above the demand generated by the existing use of property."**

The updated Mobility Plan Projects are intended to provide the person miles of capacity needed to meet future person miles of travel demand, consistent with the **"needs"** requirement of the dual rational nexus test. The Mobility Fees collected from new development are to be used to fund the Mobility Plan Projects that provide a mobility benefit to new development and accommodate the increase in person travel demand from that new development, consistent with the **"benefits"** requirement of the dual rational nexus test.

MOBILITY FEE ASSESSMENT AREA (Page XII)

The Mobility Fee will be assessed on all new development within the Mobility Fee Assessment Area. The Assessment Area includes all portions of the City east of I-95. The limits of the Assessment Area vary west of I-95 with the western boundary of the Area meandering parallel to Congress Ave. New development in the City outside of the Area and areas than annex into the City would continue to be subject to the County's transportation concurrency system and road impact fee. The City would need to update the Technical Report to include portions of the City outside of the Assessment Area.

MOBILITY FEE BENEFIT DISTRICT (Page XIII)

The Mobility Fee Benefit District includes all areas of the City, portions of adjacent municipalities, and portions of unincorporated Palm Beach County. Travel does not stop at City limits. There may be instances where a share of mobility fees is expended on improvements on City, County, or State Roads outside the City that provide a mobility benefit to the new development that paid the City's Mobility Fees.

MOBILITY FEE SCHEDULE (Page XIV)

The Mobility Fee schedule includes a variety of land uses and units of measure. The Mobility Fee Technical Report dated January 2025 details the data and methodology used to calculate the Mobility Fee for each land use. The Mobility Fee schedule is streamlined compared to Palm Beach County's road impact fee schedule. The Mobility Fee Technical Report includes a comparison between the City's Mobility Fee and the County's road impact fee. Further detail for each land use included in the Mobility Fee schedule is provided in the Technical Report.

BOYNTON BEACH MOBILITY FEE SCHEDULE		
USE CATEGORIES, USE CLASSIFICATIONS & REPRESENTATIVE USES	**UNIT OF MEASURE (UOM)**	**MOBILITY FEE RATE PER USE (MFu)**
Residential Uses		
Single-Family Residential Dwelling (Detached, Duplex, Accessory Dwelling, Townhome, Townhouse, Tiny Home) [1]	per Sq. Ft.	$2.81
Multi-Family Residential Dwelling (Apartment, Condo, 3 or more Attached Dwellings, Dormitory) [2]	per Sq. Ft.	$3.31
Mobile Residence (Mobile Home (MH), Recreational Vehicle (RV), MH and / or RV Park) [3]	per space / lot	$3,059
Institutional Uses		
Community Serving (Civic / Fraternal Club, Gallery, Museum, Performance Venues, Place of Assembly or Worship)	per Sq. Ft.	$3.70
Group Home (Assisted Living, Care or Recovery Homes, Congregate Living Facility, Nursing Home)	per Sq. Ft.	$3.66
Private Education (Afterschool, Family Day Care, K-12, Pre-K, Trade School, Tutor)	per Sq. Ft.	$7.93
Commercial Recreational Uses [4]		
Marina (wet berths, dry slips, ancillary repair, yacht club)	per Berth	$3,168
Entertainment, Outdoor (Amusement, Golf, Multi-Purpose, Recreation, Sports, Tennis)	per Acre	$28,850
Entertainment, Indoor (Amusement Arcade, Exercise Studio, Fitness, Gym, Health, Indoor Sports, Recreation)	per Sq. Ft.	$16.34
Industrial Uses		
Industrial (Assembly, Brewery, Development and Testing, Distribution and Processing, Microbrewing, Trades, Utilities)	per Sq. Ft.	$2.95
Commercial Storage (Boat / Vehicle, Junk /Salvage Yard, Recycling / Waste Management, Open, Self-Service, Warehouse) [5]	per Sq. Ft.	$1.18
Office Uses		
Office (Administrative, Business, Hospital, Post Secondary Education, Professional, Real Estate)	per Sq. Ft.	$5.89
Medical or Dental Office (Clinic, Dental, Health Service, Laboratory, Professional Care, Emergency Care, Rehab, Veterinary)	per Sq. Ft.	$14.78
Retail Uses		
Retail (Auto / Boat Rental or Sales, New or Used Merchandise, Personal or Pet Care, Sales, Services, Stores) [6]	per Sq. Ft.	$7.92
High Impact Retail (Alcoholic Beverages, Banks, Grocery Store, Pharmacy & Drug Store, Sit-Down Restaurant) [7]	per Sq. Ft.	$17.24
Convenience Retail (Convenience Store, Fast Food Restaurant, Gasoline Station) [7]	per Sq. Ft.	$41.38
Non-Residential Uses Per Unit of Measure [8]		
Auto / Boat / Car Wash (Automated, Cleaning, Dry, Detailing, Polishing, Self-Serve, Vacuum, Wash, Wax) [9]	per Lane or Stall plus per five (5) Stations	$16,134
Auto Charging or Fueling (Commercial Facility which requires Membership or Payment) [10]	per Charging or Fueling Position	$14,039
Auto or Boat Repair / Service (Brakes, Install, Maintenance, Major, Minor, Quick Lube, Repair, Tint, Tires) [11]	per Bay or Stall	$8,580
Bank or Financial Drive-Thru Lane or Free-Standing ATM [12]	per Lane / ATM	$20,661
Fast Food or Quick Service Restaurant Drive Thru [13]	per Lane	$37,215
Overnight Lodging (B&B, Condo Hotel, Hotel, Motel, Short-term Rental, Transient) [3]	per Room	$4,108
Retail Drive-Thru (Dry Cleaner, Dollar Store, Grocery Store, Pharmacy & Drug Store, Retail) [14]	per Lane	$18,288

BOYNTON BEACH MOBILITY FEE SCHEDULE FOOTNOTES

[1] Single-Family Residential Square Feet is the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls.

[2] Multi-Family Residential Square Feet is the sum of the area (in square feet) of each building measured from the exterior surface of the exterior walls. This includes common areas, lobbies, leasing offices, and residential amenities not accessible to the public. Retail or office square footage leased to a third-party would pay the applicable mobility fee rate. Square footage does not include parking garages or structures.

[3] Any retail, office, or non-residential square footage that is leased to a third-party use to provides drinks, food, goods, or services to the public shall be required to pay the applicable mobility fee per the individual uses identified in the mobility fee schedule.

[4] For Commercial Recreational Uses that feature both indoor facilities and outdoor recreation, the indoor shall be based on the indoor mobility fee rate, the outdoor shall be made on the outdoor rate, any other uses shall pay the applicable mobility fee for the land use.

[5] Acreage for any unenclosed material and vehicle storage, including but not limited to boats, commercial vehicles, recreational vehicles (RV), and trailers, sales and display shall be converted to square footage. See Commercial Storage definition for further detail.

[6] Retail includes all uses that do not fall under High Impact or Convenience Retail and generate less than 75 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study.

[7] High Impact Retail includes banks, pharmacies, sit down restaurants (non fast food), grocery stores, supermarkets, beer, liquor, package, wine and spirits stores, bars, nightclubs, lounges. These uses generate between 75 and 250 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study. Convenience Retail includes convenience stores, gas stations, service stations, coffee, donut, sandwich, food and beverage that would be considered fast food or quick service restaurants. These uses generate between more than 250 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study.

[8] Non-residential uses are assessed applicable mobility fees per unit of measure in addition to the mobility fee assessed with the square footage of the building.

[9] Auto / Boat / Car Wash shall mean any car wash, wax, or detail where a third party or automatic system performs the cleaning service. Mobility Fee are assessed per bay or stall, plus per five (5) finishing stations. See definition for further detail. The applicable mobility fee rate would also be assessed for any additional building square footage under retail uses.

[10] Auto Charging or Fueling per position apply to a convenience store, gas station, general store, grocery store, supermarket, superstore, variety store, wholesale club or service stations with charging stations or fuel pumps. In addition, there shall be a separate mobility fee for the square footage of any retail building per the applicable mobility fee rate under retail uses. The number of charging or fueling positions is based on the maximum number of vehicles that could be charged or fueled at one time. Non-commercial vehicle charging stations associated with residential or non-residential uses that are required by the City or are provided by the owner as an amenity and not a commercial purpose shall not be assessed a mobility fee.

[11] Auto or Boat Repair / Service includes maintenance, repair, and servicing of motor vehicles. Mobility Fee are assessed per bay or stall, plus a retail rate associated with any additional building sq. ft. under retail uses for waiting areas, parts, and sales.

[12] Banks shall pay the High Impact Retail rate for the square footage of the building under the retail use category. Drive-thru lanes, Free Standing ATM's and Drive-thru lanes with ATM's are assessed a separate fee per lane or per ATM and are added to any mobility fee associated with a bank building. The free-standing ATM is for an ATM only and not an ATM within or part of another non-financial building, such as an ATM within a grocery store.

[13] Any drive-thru associated with a fast food restaurant will be an additive fee in addition to the applicable Convenience Retail mobility fee per square foot of the building. The number of drive-thru lanes will be based on the number of lanes present when an individual places an order or picks up an order, whichever is greater.

[14] Any drive-thru associated with a Retail or High Impact retail use will be assessed an additive mobility fee in addition to the applicable retail use mobility fee rate per square foot of the building. The number of drive-thru lanes shall be based on the total number of lanes available for either pick-up, drop-off, or placement of an order for goods or services.

Re: City of Boynton Beach Mobility Fee Technical Report with Updated Mobility Plan Projects

Dear Amanda:

Enclosed is the City of Boynton Beach Mobility Fee Technical Report with Updated Mobility Plan Projects dated January 2025. The Mobility Fee is based on the updated Mobility Plan Projects. The Technical Report has been prepared for consideration by the City Commission. The Mobility Fee Technical Report would be adopted through an implementing ordinance. The earliest that an implementing ordinance could become effective is a minimum of 90 calendar days after first public notice per Florida Statute 163.31801.

The updated Mobility Plan Projects address the future mobility needs for the residents, businesses, employees, students, and visitors to Boynton Beach. The updated Mobility Plan Projects include walking and streetscape enhancements, curbless shared streets, sidewalks, bike lanes, pathways, shared-use paths, boardwalks, transit circulators, mobility bubs, water taxi service, and roadway improvements. The updated Mobility Plan Projects are illustrated on Street, Multimodal, and Transit Plans included in both the Mobility Fee Technical Report and a separate Executive Summary. The Executive Summary provides a high level overview that summarizes the 250 plus page Technical Report.

The Mobility Fee is designed to allow new development to mitigate its impact to the City's multimodal transportation system and serve as a revenue source to fund the updated Mobility Plan Projects. The updated Mobility Plan Projects and Mobility Fee serve as an alternative transportation system per Florida Statute Section 163.3180 that will replace the City's transportation concurrency exception area (TCEA) policies and serve as an alternative to Palm Beach County's transportation concurrency and road impact fee system to mitigate transportation impacts. The calculated Mobility Fee is consistent with all legal and statutory requirements and meets the dual rational nexus test and the rough proportionality test consistent with Florida Statute Sections 163.3164, 163.3180, 163.31801, and Florida Statute Chapter 380.

After adoption, the City will need to update its interlocal agreement with Palm Beach County consistent with House Bill 479 adopted in 2024. The City is intending to update its Complete Streets Mobility Plan and will also need to commence with an amendment to its Comprehensive Plan to ensure consistency. The NUE Urban Concepts team looks forward to continuing to work with City staff on finalize the Mobility Fee Technical Report and updated Mobility Plan Projects per direction from the City Commission.

Sincerely,

Jonathan B. Paul

Appendix Y.	**Comparison of Mobility Fees with County Road Impact Fees**
Appendix Z.	**Multimodal Characteristics Inventory**

© 2025 NUE Urban Concepts, LLC. All rights reserved.

INTRODUCTION

In 2021, the City of Boynton Beach adopted a Complete Streets Mobility Plan that established a framework to enhance mobility for people walking, bicycling, riding transit and driving vehicles. The Plan emphasized safety and connectivity on arterial and collector roads, the majority of which are maintained and owned by Palm Beach County and the Florida Department of Transportation (FDOT). The Complete Streets Mobility Plan was also intended to serve as a basis for adoption of a mobility fee as an alternative to transportation concurrency and County road impact fees.

In 2024, the City authorized a study to move forward with development of a mobility fee. The Florida Legislature adopted House Bill 479 in 2024 that amended Florida Statute to provide further guidance to local governments pursuing alternatives to transportation concurrency and road impact fees. The amendment included definitions for mobility plans and mobility fees and explicitly stated that any local government may adopt an alternative transportation system based on a mobility plan and a mobility fee.

The City of Boynton Beach intends for the mobility fee to provide an alternative transportation system to replace transportation concurrency for all new development within the Mobility Fee Assessment Area. The Mobility Fee is based on updated ***Mobility Plan Projects, consisting of improvements, programs, and services, to: (1) improve the City's multimodal transportation system; (2) promote compact, mixed-use, and interconnected development; and (3) enhance mobility within the City for residents, employees, businesses, students, and visitors.***

The City has previously amended its Comprehensive Plan to establish the legislative intent to develop a mobility plan and mobility fee. Within one year from the date of adoption of the Mobility Fee, the City will transmit amendments for its Comprehensive Plan to ensure that the Comprehensive Plan is consistent with the requirements of Florida Statute Sections 163.3164, 163.3177, 163.3180 and 163.31801.

The Mobility Fee is intended to be assessed on all new development within the Mobility Fee Assessment Area. **Development** is defined as ***"any new residential and non-residential construction or expansion of building(s), lanes(s), structure(s), or any changes in the use of any building(s) or structure(s) or land use that will generate additional impact on the city's public facilities."*** **Impact** is defined as ***"any new development that results in an increase in person travel demand above the demand generated by the existing use of property."***

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Mobility Fees are not: ***(1) a reoccurring tax; (2) assessed to existing residential or non-residential property; or (3) deposited into general revenue funds of the City.***

Mobility Fees are: ***(1) a streamlined one-time assessment on new development; (2) intended to offset the impact of new development; and (3) deposited into special revenue funds for Mobility Fees to be expended within a defined benefit district.***

The Mobility Fee system features a single **Assessment Area** that includes all portions of the City east of 95 and select portions of the City west of 95 **(Map A).** An assessment area defines where new development is assessed a mobility fee. The mobility fee system has been developed to assess a uniform mobility fee rate per land use established on the mobility fee schedule. Mobility fees are assessed at the time of development permit application and are paid at the time a development permit is issued by the City.

The Mobility Fee system features one **Benefit District** that covers the entire City and adjacent areas outside City limits to address extra jurisdictional impacts **(Map B).** The **Benefit District** extends beyond the Assessment Area as people from new development will walk, bicycle, ride transit, and drive vehicles through-out the City and surrounding areas. There may be instances where it makes sense to fund or contribute to a Mobility Project beyond the Assessment Area to enhance mobility, to the extent there is a mobility benefit provided to the new development. This Technical Report includes an Origin and Destination evaluation that demonstrates the majority of travel in the future will occur within City limits and surrounding areas.

When Mobility Fees are paid by new development, they will be deposited into a special revenue fund to be established by the City. Mobility Fees are legally and statutorily required to be spent on Mobility Projects that provide a mobility **"benefit"** to the new development that paid the Mobility Fee. The City Commission may also elect to add Mobility Projects to the Capital Improvements Program (CIP) to make the Projects eligible to be fully or partially funded through Mobility Fees. The City Commission shall determine how Mobility Fee revenues are allocated and expended through its annual Capital Improvements Program (CIP).

The City Commission may also elect to provide matching funds for Mobility Projects identified in the most recently adopted Palm Beach County Transportation Planning Agency (TPA) Long Range Transportation Plan (LRTP) or the Florida Department of Transportation (FDOT) Transportation Improvements Program (TIP). The City Commission will be required to amend the CIP to identify the expenditure of any Mobility Fee revenues on Mobility Projects that are on the LRTP or TIP, but not the City's adopted CIP.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Mobility Fee expenditures for Mobility Projects shall be included in the City's annual CIP update. The City's Chief Financial Officer, or functional equivalent, is required as part of the City's Annual Financial Report submitted to the State of Florida, to submit a statement that the Mobility Fees were collected and expended consistent with Florida Statute 163.31801.

The Boynton Beach Mobility Fee is based on updated Mobility Plan Projects that emphasize safe, convenient, connected, and visible projects primarily on City maintained and owned streets. City streets feature lower traffic volumes and slower speeds, which are more conducive to encouraging people to walk, bicycle, and ride transit. The updated Mobility Plan Projects also include County and State Road improvements.

The recently adopted HB 479 requires municipalities and counties that both assess transportation mitigation within a municipality to enter into an interlocal agreement. The amendments in HB 479 states that only one (1) fee to mitigate transportation impacts from new development may be assessed and that the local government that issues building permits is to be the entity that collects the transportation mitigation. HB 479 provides additional guidance for a municipality to enter into an interlocal agreement with a county to negotiate expenditure of the transportation mitigation.

Over the next 20 years, the total cost of the updated Mobility Plan Projects is $271,969,256. This Technical Report includes a section that identifies the updated Mobility Plan Projects that are located on County Roads. **These Mobility Plan Projects are projected to cost $28,432,500, which represents 10.45% of the overall cost of the Mobility Plan Projects.** This Technical Report includes an analyses of Palm Beach County road impact fee collections from new development within the City. **The analyses show that over the past 20 years, the County has collected over $32 million in road impact fees from new development in Boynton Beach.** The annual impact fee reports prepared by the County during that time frame indicate that the County has expended roughly $2 million in the City. It is recommended that the City utilize the information provided in this Technical Report to negotiate an interlocal agreement with the County.

The City of Boynton Beach Mobility Fee Technical Report, dated January 2025, documents future growth, the **"need"** for updated Mobility Plan Projects, the data and methodology used to develop a Mobility Fee to mitigate the impact of new development, and the establishment of a **"benefit"** district. The updated Mobility Plan Projects and Mobility Fees meets legally established dual rational nexus requirements for **"need"** and **"benefit"** and the Mobility Fee is **"rough proportionality"** to the impact of new development. The updated Mobility Plan Projects and Mobility Fee have been developed consistent with the requirements of Florida Statute Sections 164.3164, 163.3180, 163.31801, and Florida Statute Chapter 380.

LEGISLATIVE BACKGROUND

'The State of Florida passed the Growth Management Act of 1985 that required all local governments in Florida adopt Comprehensive Plans to guide future development. The Act mandated that adequate public facilities must be provided "concurrent" with the impacts of new development. State mandated "concurrency" was adopted to ensure the health, safety, and general welfare of the public by ensuring that adequate public facilities would be in place to accommodate the demand for public facilities created by new development.

Transportation concurrency became the measure used by the Florida Department of Community Affairs (DCA), Florida Department of Transportation (FDOT), Regional Planning Councils (RPCs), and local governments to ensure that adequate public facilities, in the form of road capacity, was available to meet the transportation demands from new development. To meet the travel demand impacts of new development and be deemed "concurrent", transportation concurrency was primarily addressed by constructing new roads and widening existing roads.

Traditional transportation concurrency allowed governmental entities to deny development where road capacity was not available to meet the travel demands from new development. Transportation concurrency also allowed governmental entities to require that developments be timed or phased concurrent with the addition of new road capacity. In addition, transportation concurrency also allowed governmental entities to require new development to improve (widen) roads that were already overcapacity (aka "deficient" or "backlogged').

In urban areas throughout Florida, traditional transportation concurrency had the unintended consequence of limiting and stopping growth in urban areas. This occurred because roads were often over capacity based on traffic already on the roads or the combination of that traffic and trips from approved developments. Further, the ability to add road capacity in urban areas was more limited as right-of-way was often constrained by existing development and utilities, physical barriers, and environmental protections.

Stopping development in urban areas encouraged suburban sprawl by forcing new development to suburban and rural areas where road capacity was either readily available or cheaper to construct. In the late 90's, as the unintended impact of transportation concurrency became more apparent, the Legislature adopted Statutes to provide urban areas with alternatives to address the impact of new development through Transportation Concurrency Exception Areas (TCEA) and Transportation Concurrency Management Areas (TCMA).

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The intent of TCEAs and TCMAs was to allow local governments alternative solutions to provide mobility within urban areas by means other than providing road capacity and to allow infill and redevelopment in urban areas. In the mid 2000's, Florida experienced phenomenal growth that strained the ability of local governments to provide the necessary infrastructure to accommodate that growth. Many communities across the State started to deny new developments, substantially raise impact fees, and require significant transportation capacity improvements.

In 2005, the Legislature enacted several laws that weakened the ability of local governments to implement transportation concurrency by allowing new development to make proportionate share payments to mitigate its travel demand. The Legislature also introduced Multi-Modal Transportation Districts (MMTD) for areas that did qualify for TCEAs or TCMAs.

In 2007, the Florida Legislature introduced the concept of mobility plans and mobility fees to allow development to equitably mitigate its impact and placed additional restrictions on the ability of local governments to charge new development for over capacity roadways. The Legislature directed the Florida Department of Community Affairs (DCA) and the Florida Department of Transportation (FDOT) to evaluate mobility plans and fees and report the findings to the Legislature in 2009.

In 2009, the Legislature designated Dense Urban Land Areas (DULA), which are communities with a population greater than 1,000 persons per square mile, as TCEA's. The Legislature accepted the findings of the DCA and FDOT analysis for mobility plans and mobility fees but did not take any formal action as the State was in the great recession. The Legislature also placed further restrictions on local government's ability to implement transportation concurrency, by adding direction on how to calculate proportionate share and how overcapacity roads are addressed.

In 2011, the Florida Legislature through House Bill (HB) 7207 adopted the "Community Planning Act" which implemented the most substantial changes to Florida's growth management laws since the 1985 "Local Government Comprehensive Planning and Land Development Regulation Act," which had guided comprehensive planning in Florida for decades.

The 2011 legislative session eliminated State mandated concurrency, made concurrency optional for local governments, and eliminated the Florida Department of Community Affairs (DCA) and replaced it with the Florida Department of Economic Opportunity (DEO). The Act essentially removed the DEO, Florida Department of Transportation (FDOT), and Regional Planning Councils (RPC) from the transportation concurrency review process.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Although local governments are still required to adopt and implement a comprehensive plan, the requirements changed significantly and shifted more discretion to local governments to plan for mobility within their community and enacted further restrictions on the implementation of transportation concurrency, proportionate share, and backlogged roads.

The Florida Legislature did not include any provisions in House Bill 7207 exempting local governments existing transportation concurrency system, when it elected to abolish statewide transportation concurrency, made transportation concurrency optional for local governments, and enacted further restrictions on the implementation of transportation concurrency.

House Bill 319, passed by the Florida Legislature in 2013, amended the Community Planning Act and brought about more changes in how local governments could implement transportation concurrency and further recognized the ability of local governments to adopt an alternative mobility funding system, such as mobility fees based on a plan of improvements, to allow development, consistent with an adopted Comprehensive Plan, to equitably mitigate its travel demand impact.

Prior to the passage of the Florida Community Planning Act by the Legislature on June 2, 2011, transportation concurrency was mandatory for local governments statewide, except those with approved TCEAs or MMTDs. After adoption of the Community Planning Act, transportation concurrency became optional for any local government. The Legislature encouraged local governments to adopt alternative mobility funding systems and specifically referenced mobility fees, based on a plan for mobility improvements.

The Community Planning Act enabled local governments to break the transportation concurrency cycle by transitioning away from regulating road capacity and toward planning for mobility **(Figure 1)**. Florida Commerce, which replaced the Department of Economic Opportunity (DEO), which replaced the Department of Community Affairs (DCA), provides direction to local governments related to elimination of transportation concurrency and adoption of a mobility fee-based plan, in accordance with Florida Statute 163.3180 **(Appendix A)**.

Figure 1. Concurrency Cycle

In 2019, the Florida Legislature, through House Bill 7103, amended the Community Planning Act and required mobility fees to be governed by the same procedures as impact fees. This amendment further confirmed that mobility fees are an equivalent form of mitigation to impact fees that allow development activity to mitigate its impact to the transportation system consistent with the needs identified in the local governments adopted mobility plan per Florida Statute Section 163.3180(5)(i).

In 2024, the Florida Legislature, through House Bill 479, amended the Community Planning Act to reaffirm that any local government can repeal transportation concurrency. The legislature replaced the term **"alternative mobility funding systems"** with **"alternative transportation systems"** in recognition that there are local governments in Florida with alternative systems that where not explicitly required to follow the processes and procedures required under Florida Statute Section 163.31801. The following is the amended version of Florida Statute Section 163.3180(5)(i) related to an alternative transportation system **(Appendix B).**

"(i) If a local government elects to repeal transportation concurrency, the local government may adopt an alternative transportation system that is mobility-plan and fee-based or an alternative transportation system that is not mobility-plan and fee-based. The local government may not use an alternative transportation system to deny, time, or phase an application for site plan approval, plat approval, final subdivision approval, building permits, or the functional equivalent of such approvals provided that the developer agrees to pay for the development's identified transportation impacts via the funding mechanism implemented by the local government. The revenue from the funding mechanism used in the alternative transportation system must be used to implement the needs of the local government's plan which serves as the basis for the fee imposed. An alternative transportation system must comply with s. 163.31801 governing impact fees. An alternative transportation system may not impose upon new development any responsibility for funding an existing transportation deficiency as defined in paragraph (h)."

For the first time since the terms mobility fees and mobility plans were introduced in 2007, the Florida Legislature, through HB 479, defined both terms in the Community Planning Act. The following are the recently adopted definitions for a mobility fee and a mobility plan per Florida Statute Section 163.3164 **(Appendix B)**:

© 2025 NUE Urban Concepts, LLC. All rights reserved.

"(32) "Mobility fee" means a local government fee schedule established by ordinance and based on the projects included in the local government's adopted mobility plan.

(33) "Mobility plan" means an alternative transportation system mobility study developed by using a plan-based methodology and adopted into a local government comprehensive plan that promotes a compact, mixed use, and interconnected development served by a multimodal transportation system in an area that is urban in character, or designated to be urban in character, as defined in s. 171.031."

One of the most significant amendments under HB 479 was the recognition that where a county and a municipality both charge a fee for transportation capacity impacts, that only one fee may be assessed on development activity. The amendment requires a county and a municipality to enter into an interlocal agreement to establish that only one fee is to be collected by the local government issuing building permits.

The interlocal agreement is also required to address negotiations between the county and municipality related to the distribution of collected revenue from development activity to mitigate transportation impacts. The following are the recent additions to Florida Statute 163.3180(5)(j):

"1. If a county and municipality charge the developer of a new development or redevelopment a fee for transportation capacity impacts, the county and municipality must create and execute an interlocal agreement to coordinate the mitigation of their respective transportation capacity impacts.

2. The interlocal agreement must, at a minimum:

a. Ensure that any new development or redevelopment is not charged twice for the same transportation capacity impacts.

b. Establish a plan-based methodology for determining the legally permissible fee to be charged to a new development or redevelopment.

c. Require the county or municipality issuing the building permit to collect the fee, unless agreed to otherwise.

d. Provide a method for the proportionate distribution of the revenue collected by the county or municipality to address the transportation capacity impacts of a new development or redevelopment, or provide a method of assigning responsibility for the mitigation of the transportation capacity impacts belonging to the county and the municipality.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

3. By October 1, 2025, if an interlocal agreement is not executed pursuant to this paragraph:

a. The fee charged to a new development or redevelopment shall be based on the transportation capacity impacts apportioned to the county and municipality as identified in the developer's traffic impact study or the mobility plan adopted by the county or municipality.

b. The developer shall receive a 10 percent reduction in the total fee calculated pursuant to sub subparagraph a.

c. The county or municipality issuing the building permit must collect the fee charged pursuant to sub-subparagraphs a. and b. and distribute the proceeds of such fee to the county and municipality within 60 days after the developer's payment.

4. This paragraph does not apply to:

a. A county as defined in s. 125.011(1).

b. A county or municipality that has entered into, or otherwise updated, an existing interlocal agreement, as of October 1, 2024, to coordinate the mitigation of transportation impacts. However, if such existing interlocal agreement is terminated, the affected county and municipality that have entered into the agreement shall be subject to the requirements of this paragraph unless the county and municipality mutually agree to extend the existing interlocal agreement before the expiration of the agreement."

The requirement for an interlocal agreement and collection of a single fee applies to all local governments in Florida, except for Hillsborough, Miami Dade and Monroe Counties under Florida Statute Section 125.011(1). A county and a municipality with an interlocal agreement as of October 1st, 2024, are also exempt until the interlocal agreement expires or is terminated.

No local government is prohibited from adopting an alternative transportation system, even municipalities within a Charter County that requires transportation concurrency. Further, a municipality within a County that is exempted under Florida Statute Section 125.011(1) does not mean that the municipality could not negotiate an interlocal agreement with the exempted County to address mitigation or even a reduction in fees where a municipality adopts a mobility plan and a mobility fee.

IMPACT FEE & MOBILITY FEE COMPARISON

The Florida Constitution grants local governments broad home rule authority to establish special assessments, impact fees, mobility fees, franchise fees, user fees, and service charges as revenue sources to fund specific governmental functions and capital infrastructure. Payment of impact fees or mobility fees are one of the primary ways local governments can require new development, along with redevelopment or expansion of existing land uses that generate additional transportation demand, to mitigate its impact to a local governments transportation system. While road impact fees and mobility fees are both intended to be a means in which a development can mitigate its transportation impact, the following are the major differences between the two fees:

Road Impact Fees

- Partially or fully fund road capacity improvements, including new roads, the widening of existing roads, and the addition or extension of turn lanes at intersections to move people driving vehicles (i.e., cars, trucks, SUVs, motorcycles).
- Are based on increases in trip generation, vehicle trip length, and road capacity, along with the cost of road capacity improvements and the projected vehicle miles of travel from development.
- May be based on either an adopted LOS standard (aka standards or consumption-based fee) or on future road improvements (aka plan or improvements-based fee).

Mobility Fees

- Pay for the cost associated with adding new multimodal capacity to move people walking, bicycling, scooting, riding transit, driving vehicles, or using shared mobility technology.
- Partially or fully fund multimodal projects, including sidewalks, paths, trails, bike lanes, streetscape and landscape, complete and low speed streets, micromobility (i.e., electric bikes, electric scooters) devices, programs, and services, microtransit (i.e., golf carts, neighborhood electric vehicles, autonomous transit shuttles, trolleys) circulators, services and vehicles, new roads, the widening of existing roads, and turn lanes, signals, and ADA upgrades at intersections.
- Are based on increases in person trips, person trip lengths, and person miles of capacity from multimodal projects, along with projected person miles of travel from development.
- Assessment areas may include all or portions of a municipality or county, and may vary based on geographic location (e.g., downtown) or type of development (e.g., mixed-use).
- Must be based on future multimodal projects adopted as part of a mobility plan and incorporated or referenced in the local governments Comprehensive Plan.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

THE IMPACT FEE ACT & CASE LAW OVERVIEW

In the late 1970's and early 1980's Local governments throughout Florida began adopting road impact fees as a means for new development to pay for its traffic impact and generate revenue to fund transportation infrastructure improvements. Counties, especially Charter Counties, began requiring that municipalities collect road impact fees on their behalf to fund improvements to the county road system. Throughout the 1980's, 1990's, and 2000's, municipalities throughout Florida challenged the ability of counties to compel them to collect road impact fees for new development. The opposition stemmed in part from an unintended consequence of transportation concurrency which was that it essentially stopped development in urban areas (aka "municipalities"). Both municipalities and development activity were constrained in their ability to add road capacity due to the cost of acquiring developed land and receiving opposition from existing residents concerned about increased traffic and the impact new road capacity would have on their neighborhoods.

The inability of development activity in urban areas to meet transportation concurrency resulted in development moving to suburban and rural areas (aka "urban sprawl") where fewer residents were likely to oppose new road capacity improvements and where road capacity was either available or cheaper to construct. Municipalities found themselves in the unenviable position of sending road impact fees to counties when development activity met concurrency requirements, only to watch road impact fees being spent on new road capacity projects outside of urban areas, which ultimately facilitated sprawl beyond municipal boundaries.

Furthermore, the courts often ruled in favor or counties, as municipalities that challenge solutions for of being compelled to collect impact fees failed to present alternative solutions for addressing the traffic impacts of new development. These challenges all occurred prior to the Florida Legislature adopting the "Impact Fee Act" through Florida Statute 163.31801. Additionally, these challenges existed prior to the introduction of mobility plans and mobility fees and the adoption of the "Community Planning Act" through Florida Statute 163.3180.

Before the Florida "Impact Fee Act" was adopted, many local governments had already developed impact fees through their home rule powers. In 2006, the Legislature adopted the "Impact Fee Act" to provide process requirements for the adoption of impact fees and formally recognized the authority of local governments to adopt impact fees. Prior to 2006, the Florida Legislature, unlike many States throughout the U.S. that adopted enabling legislation, elected to defer to the significant case law that was developed in both Florida and throughout the U.S. to provide guidance to local governments to adopt impact fees.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

In 2009, the Legislature made several changes to the "Impact Fee Act", the most significant of which was placing the burden of proof on local governments, through a preponderance of the evidence, that the imposition of the fee meets legal precedent and the requirements of Florida Statute Section 163.31801. Prior to the 2009 amendment, Courts generally deferred to local governments as to the validity of an imposed impact fee and placed the burden of proof, that an imposed impact fee was invalid or unconstitutional on the plaintiff.

In 2019, the Legislature, through HB 207 and HB 7103, made several changes to the "Impact Fee Act", the most significant of which was the requirement that fees cannot be collected prior to building permit issuance. The changes also expanded on the requirements of the dual rational nexus test, the collection and expenditure of fees, credits, and administrative cost.

In 2020, the Legislature, through SB 1066, made several additional changes to the Impact Fee Act to clarify that new or updated impact fees cannot be assessed on a permit if the permit application was pending prior to the new or updated fee. The bill also made credits assignable and transferable to third parties.

In 2021, the Legislature, through HB 337 made significant amendments to the "Impact Fee Act", which the Governor subsequently approved. The amendments require that impact fees be based on planned improvements and that there is a clear nexus between the need for improvements and the impact from new development.

The amendments have a greater impact on increases to existing impact fees and have phasing requirements for increases to existing fees. There are provisions that allow a local government to fully implement updated fees based on a finding of extraordinary circumstances, holding public hearings, and requiring a super majority approval by elected officials.

In 2024, the Legislature, through HB 479 made amendments to the "Impact Fee Act" that requires fee studies be completed and adopted within 12 months from the date of initiation of the study. The amendment also stipulated that data used in fee studies should not be older than four years. The amendment also requires alternative transportation systems recognize transportation or road impact fee credits granted prior to adoption of the alternative transportation systems. The most recently enacted version of Florida Statute Section 163.31801 is provided in **Appendix C**.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

One of the purposes of this Technical Report, consistent with Florida Statute Section 163.31801(4)(f) and (g), is to demonstrate that City of Boynton Beach's Mobility Fee is proportional and reasonably connected to, or has a rational nexus with, both the **"need"** for Mobility Projects and the mobility **"benefits"** provided to those who pay the fee, otherwise known as the "dual rational nexus test", herein further described as:

The "Need" for additional (new) capital facilities (projects) to accommodate the increase in demand (impact) from growth (new development), and

The "Benefit" that the new growth (new development) receives from the payment and expenditure of fees to construct the new capital facilities (projects).

In addition to the "dual rational nexus test", the U.S. Supreme Court in Dolan v. Tigard also established a "rough proportionality test" to address the relationship between the amount of a fee imposed on development activity and the impact of the development activity. The "rough proportionality test" requires that there be a reasonable relationship (proportional and reasonably connected) between the impact fee and the impact of development activity based upon the applicable unit of measure for residential and non-residential uses. The "rough proportionality test" further requires that the variables used to calculate a fee are reasonably assignable and attributable to the impact of development activity.

The Courts recognized the authority of a municipality to impose "impact fees" in Florida occurred in 1975 in the case of City of Dunedin v. Contractors and Builders Association of Pinellas County, 312 So.2d 763 (2d DCA. Fla., 1975), where the court held: "that the so-called impact fee did not constitute taxes but was a charge using the utility services under Ch. 180, F. S." The Court set forth the following criteria to validate the establishment of an impact fee:

"…where the growth patterns are such that an existing water or sewer system will have to be expanded in the near future, a municipality may properly charge for the privilege of connecting to the system a fee which is in excess of the physical cost of connection, if this fee does not exceed a proportionate part of the amount reasonably necessary to finance the expansion and is earmarked for that purpose." 312 So.2d 763, 766, (1975).

The case was appealed to the Florida Supreme Court and a decision rendered in the case of Contractors and Builders Association of Pinellas County v. City of Dunedin 329 So.2d 314 (Fla. 1976), in which the Second District Court's decision was reversed. The Court held that "impact fees" did not constitute a tax; that they were user charges analogous to fees collected by privately owned utilities for services rendered.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

However, the Court reversed the decision, based on the finding that the City did not create a separate fund where impact fees collected would be deposited and earmarked for the specific purpose for which they were collected, finding:

"The failure to include necessary restrictions on the use of the fund is bound to result in confusion, at best. City personnel may come and go before the fund is exhausted, yet there is nothing in writing to guide their use of these moneys, although certain uses, even within the water and sewer systems, would undercut the legal basis for the fund's existence. There is no justification for such casual handling of public moneys, and we therefore hold that the ordinance is defective for failure to spell out necessary restrictions on the use of fees it authorizes to be collected. Nothing we decide, however prevents Dunedin from adopting another sewer connection charge ordinance, incorporating appropriate restrictions on use of the revenues it produces. Dunedin is at liberty, moreover, to adopt an ordinance restricting the use of moneys already collected. We pretermit any discussion of refunds for that reason." 329 So.2d 314 321, 322 (Fla. 1976)

The case tied impact fees directly to growth and recognized the authority of a local government to impose fees to provide capacity to accommodate new growth and basing the fee on a proportionate share of the cost of the needed capacity. The ruling also established the need for local government to create a separate account to deposit impact fee collections to help ensure those funds are expended on infrastructure capacity.

The Utah Supreme Court had ruled on several cases related to the imposition of impact fees by local governments before hearing Banberry v. South Jordan. In the case, the Court held that: "the fair contribution of the fee-paying party should not exceed the expense thereof met by others. To comply with this standard a municipal fee related to service like water and sewer must not require newly developed properties to bear more than their equitable share of the capital costs in relation to the benefits conferred" (Banberry Development Corporation v. South Jordan City, 631 P. 2d 899 (Utah 1981). To provide further guidance for the imposition of impact fees, the court articulated seven factors which must be considered (Banberry Development Corporation v. South Jordan City, 631 P. 2d 904 (Utah 1981):

"(1) the cost of existing capital facilities;

(2) the manner of financing existing capital facilities (such as user charges, special assessments, bonded indebtedness, general taxes or federal grants);

(3) the relative extent to which the newly developed properties and the other properties in the municipality have already contributed to the cost of existing capital facilities (by such means as user charges, special assessments, or payment from the proceeds of general taxes);

(4) the relative extent to which the newly developed properties in the municipality will contribute to the cost of existing capital facilities in the future;

© 2025 NUE Urban Concepts, LLC. All rights reserved.

(5) the extent to which the newly developed properties are entitled to a credit because the municipality is requiring their developers or owners (by contractual arrangement or otherwise) to provide common facilities (inside or outside the proposed development) that have been provided by the municipality and financed through general taxation or other means (apart from user fees) in other parts of the municipality;

(6) extraordinary costs, if any, in servicing the newly developed properties; and

(7) the time-price differential inherent in fair comparisons of amounts paid at different times."

The Court rulings in Florida, Utah and elsewhere in the U.S. during the 1970's and early 1980's led to the first use of what ultimately became known as the "dual rational nexus test" in Hollywood, Inc. v. Broward County; which involved a Broward County ordinance that required a developer to dedicated land or pay a fee for the County park system. The Florida Fourth District Court of Appeal found to establish a reasonable requirement for dedication of land or payment of an impact fee that:

"… the local government must demonstrate a reasonable connection, or rational nexus between the need for additional capital facilities and the growth of the population generated by the subdivision. In addition, the government must show a reasonable connection, or rational nexus, between the expenditures of the funds collected and the benefits accruing to the subdivision. In order to satisfy this latter requirement, the ordinance must specifically earmark the funds collected for the use in acquiring capital facilities to benefit new residents." (Hollywood, Inc. v. Broward County, 431 So. 2d 606 (Fla. 4th DCA), rev. denied, 440 So. 2d 352 (Fla. 1983).

In 1987, the first of two major cases were heard before the U.S. Supreme Court that have come to define what is now commonly referred to as the "dual rational nexus test". The first case was Nollan v. California Coastal Commission which involved the Commission requiring the Nollan family to dedicate a public access easement to the beach in exchange for permitting the replacement of a bungalow with a larger home which the Commission held would block the public's view of the beach.

Justice Scalia delivered the decision of the Court: "The lack of nexus between the condition and the original purpose of the building restriction converts that purpose to something other than what it was...Unless the permit condition serves the same governmental purpose as the development ban, the building restriction is not a valid regulation of land use but an out-and-out plan of extortion (Nollan v. California Coastal Commission, 483 U. S. 825 (1987)". The Court found that there must be an essential nexus between an exaction and the government's legitimate interest being advanced by that exaction (Nollan v. California Coastal Commission, 483 U. S. 836, 837 (1987).

The second case, Dolan v. Tigard, heard by the U.S. Supreme Court in 1994 solidified the elements of the "dual rational nexus test". The Petitioner Dolan, owner, and operator of a Plumbing & Electrical Supply store in the City of Tigard, Oregon, applied for a permit to expand the store and pave the parking lot of her store. The City Planning Commission granted conditional approval, dependent on the property owner dedicating land to a public greenway along an adjacent creek and developing a pedestrian and bicycle pathway to relieve traffic congestion. The decision was affirmed by the Oregon State Land Use Board of Appeal and the Oregon Supreme Court. The U.S. Supreme Court overturned the ruling of the Oregon Supreme Court and held:

"Under the well-settled doctrine of "unconstitutional conditions," the government may not require a person to give up a constitutional right in exchange for a discretionary benefit conferred by the government where the property sought has little or no relationship to the benefit. In evaluating Dolan's claim, it must be determined whether an "essential nexus" exists between a legitimate state interest and the permit condition. Nollan v. California Coastal Commission, 483 U. S. 825, 837. If one does, then it must be decided whether the degree of the exactions demanded by the permit conditions bears the required relationship to the projected impact of the proposed development." Dolan v. City of Tigard, 512 U.S. 383, 386 (1994)

The U.S. Supreme Court in addition to upholding the "essential nexus" requirement from Nollan also introduced the "rough proportionality" test and held that:

"In deciding the second question-whether the city's findings are constitutionally sufficient to justify the conditions imposed on Dolan's permit-the necessary connection required by the Fifth Amendment is "rough proportionality." No precise mathematical calculation is required, but the city must make some sort of individualized determination that the required dedication is related both in nature and extent to the proposed development's impact. This is essentially the "reasonable relationship" test adopted by the majority of the state courts. Dolan v. City of Tigard, 512 U.S. 388, 391 (1994)"

An often-overlooked component of Dolan v. City of Tigard is the recognition that while multimodal facilities may off-set traffic congestion there is a need to demonstrate or quantify how the dedication of a pedestrian / bicycle pathway would offset the traffic demand generated. per the following excerpt from the opinion of the Court delivered by Chief Justice Rehnquist:

"The city made the following specific findings relevant to the pedestrian/bicycle pathway: "In addition, the proposed expanded use of this site is anticipated to generate additional vehicular traffic thereby increasing congestion on nearby collector and arterial streets. Creation of a convenient, safe pedestrian/bicycle pathway system as an alternative means of transportation could offset some of the traffic demand on these nearby streets and lessen the increase in traffic congestion." We think a term such as "rough proportionality" best encapsulates what we hold to be the requirement of the Fifth Amendment. No precise mathematical calculation is required, but the city must make some sort of individualized determination that the required dedication is related both in nature and extent to the impact of the proposed development.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

With respect to the pedestrian/bicycle pathway, we have no doubt that the city was correct in finding that the larger retail sales facility proposed by petitioner will increase traffic on the streets of the Central Business District. The city estimates that the proposed development would generate roughly 435 additional trips per day. Dedications for streets, sidewalks, and other public ways are generally reasonable exactions to avoid excessive congestion from a proposed property use. But on the record before us, the city has not met its burden of demonstrating that the additional number of vehicle and bicycle trips generated by the petitioner's development reasonably relate to the city's requirement for a dedication of the pedestrian/bicycle pathway easement. The city simply found that the creation of the pathway "could offset some of the traffic demand . . . and lessen the increase in traffic congestion."

"As Justice Peterson of the Supreme Court of Oregon explained in his dissenting opinion, however, "[t]he findings of fact that the bicycle pathway system could offset some of the traffic demand' is a far cry from a finding that the bicycle pathway system will, or is likely to, offset some of the traffic demand." 317 Ore., at 127, 854 P. 2d, at 447 (emphasis in original). No precise mathematical calculation is required, but the city must make some effort to quantify its findings in support of the dedication for the pedestrian/bicycle pathway beyond the conclusory statement that it could offset some of the traffic demand generated." Dolan v. City of Tigard, 512 U.S. 687 (1994).

The U.S. Supreme Court recently affirmed, through Koontz vs. St. Johns River Water Management District, that the "dual rational nexus" test equally applies to monetary exactions in the same manner as a governmental regulation requiring the dedication of land. Justice Alito described:

"Our decisions in Nollan v. California Coastal Commission, 483 U. S. 825 (1987), and Dolan v. City of Tigard, 512 U. S. 374 (1994), provide important protection against the misuse of the power of land-use regulation. In those cases, we held that a unit of government may not condition the approval of a land-use permit on the owner's relinquishment of a portion of his property unless there is a "nexus" and "rough proportionality" between the government's demand and the effects of the proposed land use. In this case, the St. Johns River Water Management District (District) believes that it circumvented Nollan and Dolan because of the way in which it structured its handling of a permit application submitted by Coy Koontz, Sr., whose estate is represented in this Court by Coy Koontz, Jr. The District did not approve his application on the condition that he surrender an interest in his land. Instead, the District, after suggesting that he could obtain approval by signing over such an interest, denied his application because he refused to yield." Koontz v. St. Johns River Water Management District 1333 S. Ct. 2586 (2013).

"That carving out a different rule for monetary exactions would make no sense. Monetary exactions—particularly, fees imposed "in lieu" of real property dedications—are "commonplace" and are "functionally equivalent to other types of land use exactions." To subject monetary exactions to lesser, or no, protection would make it "very easy for land-use permitting officials to evade the limitations of Nollan and Dolan." Furthermore, such a rule would effectively render Nollan and Dolan dead letters "because the government need only provide a permit applicant with one alternative that satisfies the nexus and rough proportionality standard, a permitting authority wishing to exact an easement could simply give the owner a choice of either surrendering an easement or making a payment equal to the easement's value." Koontz v. St. Johns River Water Management District 1333 S. Ct. 2599 (2013).

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The Florida First District Court of Appeals recently affirmed, through The BoCC of Santa Rosa County vs. the Builders Association of West Florida, that impact fees are required to meet the "dual rational nexus" test to avoid being found to be an unconstitutional tax. The Court cited the following sections of Florida Statute:

"Second, the Florida Impact Fee Act sets forth the minimum statutory requirements for a valid impact fee. § 163.31801(3), Fla. Stat. (2019). The Act requires impact fees to be based on the "most recent and localized data." § 163.31801(3)(a), Fla. Stat." The Board of County Commissioners v. Home Builders Assoc. of West Florida, Inc., 325 So. 3d 981, 985 (Fla. Dist. Ct. App. 2021).

The Court cited expert testimony that the County's school impact fee did not recognize differences in growth or needs that would be the basis for different fees based on geographic location and needs due to new growth:

"the impact fees failed the dual rational nexus test because they did not account for the differences between the northern and southern parts of the county. This resulted in impact fees that were disproportionate to the growth in these geographical regions." The Board of County Commissioners v. Home Builders Assoc. of West Florida, Inc., 325 So. 3d 981, 985 (Fla. Dist. Ct. App. 2021).

The U.S. Supreme Court in April 2024 issued a unanimous decision in Sheetz v. County of El Dorado, California (144 S.Ct. 893) where the Court narrowly determined that legislatively enacted impact fees are not exempt from the requirements set forth in two previous property rights cases (Nollan v. California Coastal Commission and Dolan v. City of Tigard, Oregon). Thus, local governments that impose impact fees will now be subjected to a standard requiring them to demonstrate the relationship and relative impact of the development on the community. Specifically, local governments will have to show that conditions (impact fees) to obtain a land-use permit have an "essential nexus" (relationship) to the government's land-use interest and a "rough proportionality" between the weight on the property owner and the development's effects of the proposed land use.

The Impact Fee Act already requires that imposed impact fees and mobility fees demonstrate an "essential nexus" between the fee and the impact from development activity. The Supreme Court ruling reinforces the prior impact fee case law that the amount of impact fees or mobility fees imposed must be "rough proportionality" to the impact from development activity. The ruling also stipulated that required monetary payments in the form of impact fees are an exaction just like requiring development activity to dedicate land for a governmental purpose and could be subject to a takings claim if the impact fees imposed do not demonstrate an "essential nexus" between the amount and imposition and the impact from development activity.

DEVELOPING A MOBILITY FEE

There update of Mobility Plan Projects and development of the Mobility Fee for the City of Boynton Beach involved several steps. The following is an overview of the process used to update Mobility Plan Projects and develop a Mobility Fee consistent with statutory requirements **(Figure 2).**

Figure 2. Developing a Mobility Fee

© 2025 NUE Urban Concepts, LLC. All rights reserved.

COMPREHENSIVE PLAN

In 2019, the City amended the Transportation Element of the Comprehensive Plan to establish legislative intent to develop a mobility plan and fee. As of January 2025, the following are the Goals, Objectives, and Policies in the Transportation Element of the Comprehensive Plan:

TRANSPORTATION ELEMENT

GOAL 2: "To develop and maintain a transportation system which will serve the transportation needs of all sectors of the City of Boynton Beach in a safe, efficient, cost effective, and aesthetically pleasing manner that promotes multi-modal transportation options, such as walking, bicycling, and transit."

Figure 3. Integrating Land Use, Transportation, Parking & Funding

Objective 2.4 "The City shall develop and maintain a safe, convenient, multi-modal transportation system, including walking, bicycling, and public transit, which will meet future as well as current transportation needs, particularly within the TCEA and the CRA."

Policy 2.6.3 "The City may seek to repeal and replace Palm Beach County transportation concurrency, proportionate fair-share and road impact fees with a Mobility Fee based upon a Complete Streets Mobility Plan. Repeal of Palm Beach County transportation concurrency, proportionate fair-share and road impact fees will require consultation with Palm Beach County. The City may also apply a Mobility Fee to the city-maintained facilities, repealing City transportation concurrency and proportionate fair-share applicable to local roadways."

Policy 2.6.4 "The Mobility Fee may be implemented and adopted citywide or may be adopted only for specific areas or districts within the City. For each such specific area or district, an adopted Mobility Fee shall replace both Palm Beach County transportation concurrency, proportionate fair-share and road impact fees and City transportation concurrency and proportionate fair-share."

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Policy 2.6.5 "The Complete Streets Mobility Plan and Mobility Fee may be adopted by resolution of the City Commission. The Mobility Fee would go into effect per the provisions of the Mobility Fee ordinance."

Policy 2.6.6 "Should the City Commission elect to adopt a Mobility Fee, the City, within one year of adoption of the implementing Ordinance, shall update the Transportation and Capital Improvement Elements of the Comprehensive Plan to reflect the repeal of transportation concurrency, proportionate fair-share and road impact fees and update policies related to level and quality of service standards, complete streets, capacity determinations, backlogged facilities, transportation and associated multi-modal policies and other elements addressed in the Complete Streets Mobility Plan."

Policy 2.6.7 "The Complete Streets Mobility Plan shall include provisions that address mobility between destinations and should address accessibility to, from destinations, and between modes of travel. The improvements in the Plan shall be based upon the expected, anticipated or desired increase in new development, infill development and redevelopment by the established horizon year and the associated increase in vehicular and person travel demand. The Complete Streets Mobility Plan shall include quality and level of service standards for all modes of travel."

Policy 2.6.8 "The City, as part of a Complete Streets Mobility Plan, may adopt quality and/or level of service standards for pedestrians, bicycle, transit and other multi-modal facilities included in the Plan. Quality of Service standards shall be related to the overall travel experience of the user with higher standards established in areas where walking, bicycling, transit and other non-vehicular modes of travel are encouraged. Level of Service standards shall be related to the width or size of pedestrian, bicycle and non-vehicular facilities with wider and larger facilities in areas where non-vehicular modes of travel are encouraged and frequency of transit service with greater frequencies and spans of service in areas where transit is encouraged."

Policy 2.6.9 "The Complete Streets Mobility Plan may serve as a Master Plan for roads and transit within the City, and also function as a Bicycle, Pedestrian, Trails, Blueways, Greenways and other non-vehicular modes or travel Master Plan."

Policy 2.6.10 "The Complete Streets Mobility Plan may also incorporate provisions for reduced heat island effects and improve air quality through trees and landscaping and to reduce stormwater run-off and water quality through the integration of low impact development techniques, bio- swales, rain gardens and other green techniques that can be incorporated into the planning, design and construction of transportation improvements."

Policy 2.6.11 "The Complete Streets Mobility Plan may include policies related to land use to encourage multi-modal supportive development. The Plan may also include provisions that allow for reduction in development parking requirements in recognition of car and bicycle sharing in complete streets, and parking strategies that reduce parking requirements for mixed-use, multi-modal development and affordable housing."

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Policy 2.6.12 "The Mobility Fee would be a one-time assessment on new development or redevelopment that results in an impact to the transportation system through an increase in vehicular trips or vehicular miles of travel or an increase in person trips or person miles of travel. The Mobility Fee, consistent with State Statute, shall be required to meet the dual rational nexus test and shall be reasonably attributable to the travel demand impact of new development, infill and redevelopment."

Policy 2.6.13 "The Mobility Fee may include provisions to encourage and incentivize new development, infill and redevelopment within targeted areas of the City. The Mobility Fee may also include provisions to encourage affordable and workforce housing, mixed- use, multi-modal supportive development, and desired land uses that increase employment and attract economic development."

Policy 2.6.14 "An application for private development may not be required to pay a Mobility Fee and also meet transportation concurrency, proportionate-fair share and road impact fees to the extent the Mobility Fee address the same facilities and travel demand impacts as would be addressed through the application of transportation concurrency, proportionate-fair share and road impact fees for City and/or County or State maintained facilities."

Policy 2.6.15 "In consideration of a future Complete Streets Mobility Plan, the City may review the Land Development Regulations to consider incentives for and accommodate the needs of compact four-and-two-wheel vehicles (such as hybrids, smart cars, and vespas/scooters, etc.) by assessing the parking requirements and other provisions of the code."

GROWTH

The first requirement of the **"dual rational nexus"** for the City's Mobility Fee is to demonstrate that there is a need for Mobility Projects to accommodate projected growth in person travel demand. An evaluation of the existing and projected population and employment was conducted for the City of Boynton Beach Mobility Study Area **(Map C).** The Mobility Study Area includes all areas of the City east of Interstate 95 and varying areas of the City between Interstate 95 and Congress Avenue and around the Boynton Beach Mall.

The population and employment data were obtained from the Traffic Analysis Zones (TAZs) used in the 2045 Palm Beach Long Range Transportation Plan (LRTP). The population and employment analysis demonstrates that there is projected to be an increase in population, households, and employment for the Mobility Study Area, the City and surrounding areas **(Table 1)**. The projected increase in population, households, and employment will generate additional person travel demand and will create a need for mobility projects to meet that travel demand.

TABLE 1. PROJECTED GROWTH

	MOBILITY FEE STUDY AREA			CITYWIDE & SURROUNDING AREAS		
Year	Households	Population	Employment	Households	Population	Employment
2015	26,640	56,255	32,833	40,944	95,652	52,395
2045	35,677	83,273	47,431	54,447	126,766	69,418
Increase	11,037	27,018	14,598	11,037	27,018	14,598

Source: Projected growth analysis prepared by NUE Urban Concepts, LLC. Data was extracted from Traffic Analysis Zones (TAZs) from the 2015/2045 Southeast Regional Planning Model. The model files were obtained from the Palm Beach County Transportation Planning Agency (TPA) webpage. The data was projected for the Mobility Fee Study area, the City, and surrounding areas. There is some overlap in data due to TAZs extending beyond City limits into surrounding areas.

VEHICLE MILES OF TRAVEL (VMT)

The growth in vehicle miles of travel (VMT) is one of the factors evaluated to determine the need for future Mobility Projects within the Mobility Study Area. The evaluation of future vehicle miles of travel (VMT) includes minor and major collectors as well as arterials.

The VMT analyses includes City, County, and State roads within the Mobility Study Area **(Map C)**. The growth rates from the model data used for the 2045 LRTP were used to determine the VMT growth of **396,230** within the Mobility Study Area between 2024 and 2045 **(Table 2)**.

TABLE 2. GROWTH IN VEHICLE MILES OF TRAVEL (VMT)

Year	VMT Arterials & Collectors	VMT Limited Access	VMT All
2024 (Mobility Plan base year)	975,600	1,937,230	2,912,830
2045 (Model & Plan future year)	1,344,830	2,024,470	3,369,300
VMT increase (2024 to 2045)	369,230	87,240	456,470

Source: Projected growth in VMT prepared by NUE Urban Concepts, LLC based on the Traffic Characteristics Data for the Mobility Study Area **(Appendix D)**. The VMT data were calculated based on applying the annual growth rate of 1.54% in VMT based on base year and future year model data for the Mobility Study Area **(Map C)**. The VMT increase is based on the difference between 2024 and 2045. The major roads network does not include roads classified as local. The projected increase in VMT for the arterial and collector roads in the Mobility Study Area is projected to increase by 37.8% [(1,344,830 – 975,600) = 369,230; (369,230 / 975,600) = 0.378%)]. The annual growth rate of 0.21% for I-95 is significantly lower than for arterials and collectors (SEFRPM 8.541). The limits for I-95 extend from Atlantic Ave (SR 806) in Delray Beach to Lantana Road in Lantana to account for travel to the next interchange exits outside the Mobility Study Area.

The VMT data for limited access facilities (i.e., Interstate 95) will be used to adjust the travel demand for land uses established in the mobility fee schedule. Travel on limited access facilities is excluded from both road impact fee and mobility fee studies as the limited access facilities serve intercity and regional travel.

Furthermore, improvements to Interstate 95 would be funded through federal and state gas tax revenues. The data for limited access facilities extend roughly one mile (1) north and three (3) miles south of the Mobility Study Area to account for travel to the next Interstate 95 interchange.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

PERSON MILES OF TRAVEL (PMT)

The growth in vehicle miles of travel (VMT) is often used in road impact fees to evaluate the need for road capacity improvements to move vehicles. Mobility Fees utilize person miles of travel (PMT) to evaluate the need for multimodal projects to move people. To account for multimodal trips made by people walking, biking, riding transit, and the number of people per vehicle (aka vehicle occupancy), the projected increase in vehicle miles of travel (VMT) demand is converted into person miles of travel (PMT) demand for arterial and collector roads.

The conversion is based on person and vehicle trips and trip length data obtained from the 2022 National Household Travel Survey (NHTS). The NHTS data is used to calculate a person miles of travel factor (PMTf) based on PMT and VMT per trip purpose. The evaluation of the vehicle and person data from the 2022 NHTS resulted in a person miles of travel factor (PMTf) of 1.54 **(Appendix E)**. The increase in PMT is based on the projected increase in VMT multiplied by the applicable person miles of travel factor (PMTf) illustrated in further detail in **Figure 4**.

Figure 4: Person Miles of Travel Increase (PMTi)

Person Miles of Travel increase (PMTi)

∑ VMT = (∑ Vehicle per Trip x ∑ Average Vehicle Trip Length)

∑ PMT = (∑ Persons per Trip x ∑ Average Person Trip Length)

PMTf = (∑ of PMT / ∑ of VMT)

VMTi = (2045 VMT - 2024 VMT)

PMTi = (VMTi x PMTf)

Where:

VMT	=	Vehicle Miles of Travel
PMT	=	Person Miles of Travel
∑ VMT	=	Sum of Vehicle Miles of Travel by trip purpose (Appendix E)
∑ PMT	=	Sum of Person Miles of Travel by trip purpose (Appendix E)
PMTf	=	Person Miles of Travel factor of 1.54 (Appendix E)
VMTi	=	Vehicle Miles of Travel Increase (Table 2)
PMTi	=	Person Miles of Travel increase (Table 3)

Prepared by NUE Urban Concepts, LLC

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The projected increase in PMT within the Mobility Fee Study Area, excluding I-95, between the Mobility Plan base year of 2024 and the future year of 2045 is **568,614 (Table 3)**. The increase was calculated per the formula illustrated in **Figure 4**. The projected person miles of travel (PMT) increase of **586,614** demonstrates that there are future person miles of travel demand projected by 2045 that will result in the **"need"** for Mobility Projects to accommodate the increase in person travel demand **(Table 3)**. The documented increase in PMT and the identification of updated Mobility Plan Projects, consistent with the **"needs"** test of the dual rational nexus test.

TABLE 3. INCREASE IN PERSON MILES OF TRAVEL (PMT)

Vehicle & Person Miles of Travel	(VMT & PMT)
2024 Mobility Plan Base Year	
2024 Base Year Vehicle Miles of Travel (VMT)	975,600
Person Miles of Travel factor (PMTf)	1.54
2024 Base Year Person Miles of Travel (PMT)	1,502,424
2045 Mobility Plan Future Year	
2045 Future Year Vehicle Miles of Travel (VMT)	1,344,830
Person Miles of Travel factor (PMTf)	1.54
2045 Future Year Person Miles of Travel (PMT)	2,072,038
Increase in VMT & PMT	
Vehicle Miles of Travel increase (VMTi)	369,230
Total Increase in Person Miles of Travel (PMTi)	568,614

Source: The 2045 VMT increase was obtained from **Table 2**. PMTi obtained by multiplying VMTi by 1.54 (**Figure 4**.)

QUALITY OF SERVICE (QOS)

The adoption of an alternative transportation system is an opportunity to expand beyond the current practice of evaluating the current transportation system solely on the availability of road capacity on a segment-by-segment basis. Florida Statute Section 163.3180 allows local governments to establish level of service (LOS) and quality of service (QOS) standards for people bicycling, walking, accessing transit, and making roads safer for all users. The LOS and QOS standards are intended to be used for the following planning and design activities and incorporation into the Comprehensive Plan (CP) and Land Development Regulations (LDRs):

(1) Identification of Mobility Projects to periodically update the Complete Streets Mobility Plan,
(2) Performance measures to evaluate over time changes in service and mobility provided,
(3) Determining multimodal capacities for Mobility Projects,
(4) Prioritize Mobility Projects for annual capital improvement programming,
(5) Develop Complete Streets design standards in the LDRs for new and retrofitted streets,
(6) Implement FDOT's Context Classifications for Complete Streets,
(7) Develop mobility strategies in the CP and LDRs for new development,
(8) Develop multimodal site access analysis and internal street evaluation requirements, and
(9) Develop multimodal criteria to review CP amendments and Planned Unit Developments.

Florida Statute 163.3180 (5)(f)(5) identifies the establishment of multimodal quality of service (QOS) standards as part of an alternative transportation. Street quality of service (QOS) standards, based on posted speed limits, are intended to be used a planning tool used for innovative street design. Multimodal QOS standards are based on the types of facilities for people walking and bicycling. Transit QOS standards are based on the type, frequency, and span of service for future transit.

The establishment of street quality of service (QOS) standards based on the posted speed limit is both an alternative and a complement to areawide roadway LOS standards. While areawide roadway LOS standards are based on road capacity to move cars, street QOS standards are intended to enhance mobility and safety for all users of the transportation system by prioritizing slower speeds for cars. Street QOS standards are intended to enhance mobility and move towards safer streets for all modes of travel by prioritizing slower speeds for cars. Studies have shown there is a direct correlation between the speed of car travel and the severity of crashes. As speeds increase, so does the probability that a crash involving people walking, bicycling, or driving will result in one or more fatalities, especially given the increasing popularity and size of SUVs and pick-up trucks.

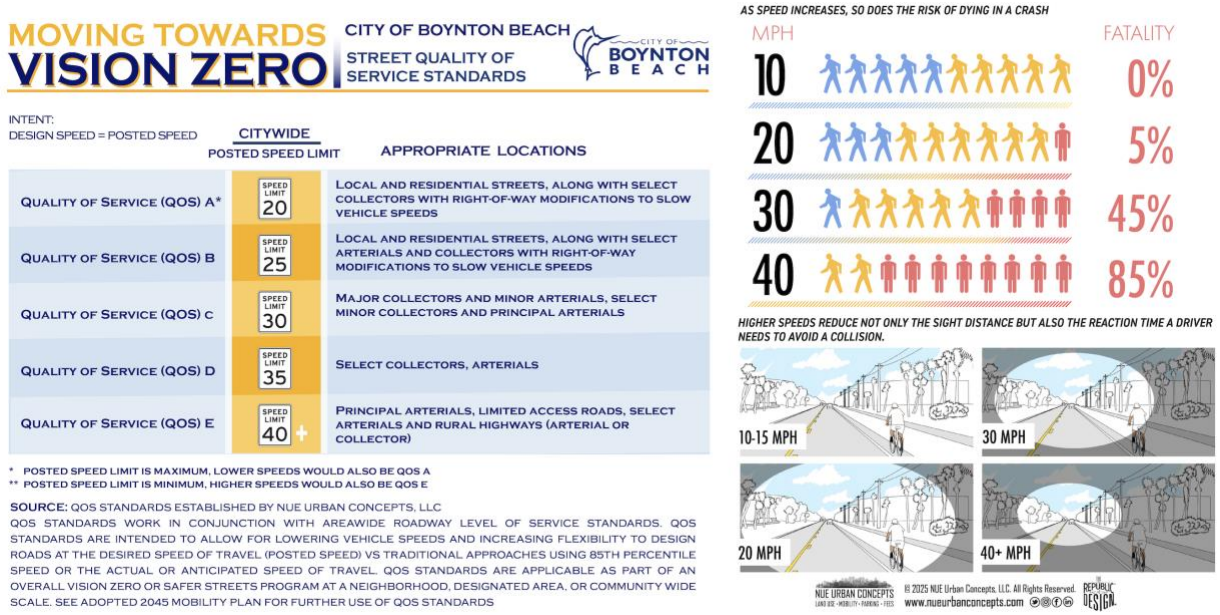
© 2025 NUE Urban Concepts, LLC. All rights reserved.

The street QOS standards are the inverse of roadway LOS standards in that as speed limits go down, street QOS goes up and provides the City with increased flexibility to design safer streets for all users. Whereas, for roadway LOS, as speed limits go down, road LOS also goes down, requiring the City to look at ways to add road capacity. Street QOS standards that promote slower speeds provide planners and engineers with greater flexibility to implement innovative street designs, such as low speed streets, shared streets, complete streets, appropriately sized travel lanes, and locating buildings and trees closer to travel lanes.

To ensure streets are designed to be safer for all users, design speeds are intended to be based on posted speed limits. This approach differs greatly from the 85th percentile speed of travel traditionally used to design road and streets based on the speeds at which 85% of drivers travel. This traditional approach prioritizes driving vehicles. The proposed QOS standards prioritize slower speeds, where more people walk and bike, and recognizes higher posted speeds are more appropriate on corridors carrying higher volumes of motor vehicles.

The QOS standards and corresponding posted speed limit for the City are proposed to vary by both geographic location and type of multimodal facility, street, and roadway **(Figure 5)**. The adoption of Street QOS standards is the first step in providing increased flexibility in street design and moving towards the goal of zero fatalities (aka Vision Zero).

FIGURE 5. STREET QUALITY OF SERVICE (QOS) STANDARD



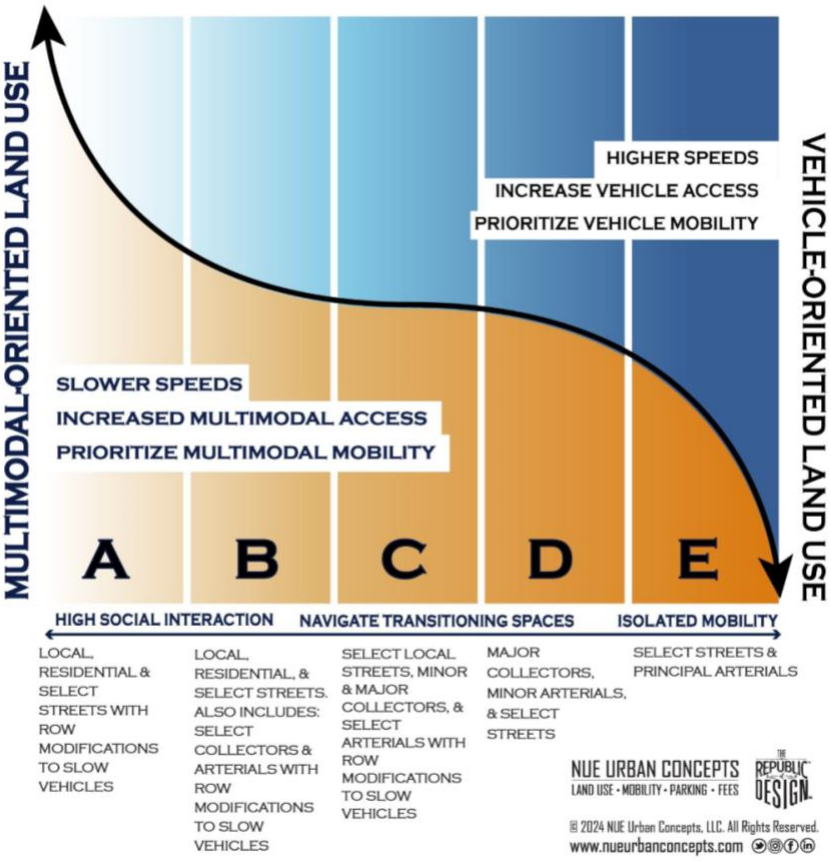
© 2025 NUE Urban Concepts, LLC. All rights reserved.

However, just because a lower speed limit is posted, does not necessarily mean drivers will reduce their speed. Reducing the speed of vehicles requires physical changes to the street right-of-way that result in people driving slower and people feeling more comfortable bicycling and walking. Changes in speed limits and resulting changes in street QOS standards would be phased in over time as part of: (1) designing new mobility projects; (2) reimagining and repurposing existing right-of-way to emphasize the safe movement of people, rather than the quick movement of cars (aka road diets, lane narrowing, shared streets); and (3) as part of neighborhood traffic calming projects to improve safety and potentially reduced cut through traffic.

The lower the design speed, the greater the emphasis on the safe movement of people, whether they are walking, bicycling, or driving. Establishing street QOS standards based on posted speed limits more accurately reflects: (1) the intended purpose of a street; (2) the desired level of people walking and bicycling; and (3) the type of access to adjacent land uses. As the speed decreases, accessibility to adjacent land uses by people walking and bicycling increases. As the speed limit increases, access to adjacent land uses becomes more restrictive, due to a greater emphasis on the movement of vehicles and access via driving, rather than walking and bicycling **(Figure 6)**.

FIGURE 6. SPEED, ACCESSIBILITY & MOBILITY

A Street QOS standard of "A" prioritizes slower vehicle speeds, accessibility, and mobility for people. These streets not only help people reach their destinations; they can be destinations in and of themselves that offer a high level of social interaction. On the other end of the spectrum, Street QOS "E" standards prioritize higher vehicle speeds between destinations. The City has the ability to modify speed limits on City streets. Adjustment of speed limits on County and State Roads would require their approval.



© 2025 NUE Urban Concepts, LLC. All rights reserved.

As the City continues to transition its transportation system from one that prioritizes moving cars towards a multimodal system that emphasizes moving people, there may need to be an update of standards to guide the retrofit of existing streets and the design of future streets serving new development. Proposed Curbless Shared Streets and Walking and Streetscape Enhancements would be the ideal streets to implement higher Streets QOS Standards. The proposed multimodal QOS standards, which are based on multimodal facilities rather than performance measures, are used to establish multimodal capacities for the mobility fee calculations. The proposed multimodal QOS standards can also be used for: (1) performance measures; (2) mobility planning; (3) design standards; and (4) prioritizing multimodal projects.

The proposed multimodal QOS standards for people bicycling and walking on off-street sidewalks, paths, and trails are based on: (1) the width of the facility (i.e., bike lane, path, sidewalk); (2) the type of physical separation between multimodal facilities and travel lanes for cars, SUVs, and other motor vehicles; and (3) the posted speed limit. The following are multimodal QOS standards for people bicycling and walking on off-street multimodal facilities: **(Figure 7):**

Figure 7. Bicycling and Walking Quality of Service (QOS) Standards

MOVING TOWARDS VISION ZERO

CITY OF BOYNTON BEACH

OFF-STEERT MULTIMODAL QUALITY OF SERVICE (QOS) FOR BICYCLING & WALKING

FACILITY TYPE	ROW FEATURES (SEE NOTES FOR ROW WITH MULTIPLE FEATURES)

NOTES: THE PRESENCE OF TWO ROW ELEMENTS, EXCEPT FOR LIMITED SEPERATION, SUCH AS ON-STREET PARKING AND STREET TREES WOULD RESULT IN AN INCREASE IN ONE ADDITIONAL LETTER GRADE. FOR EXAMPLE, A TEN (10) FOOT WIDE PATH WITH STREET TREES AND ON-STREET PARKING WOULD RESULT IN A QOS OF "A". THE PRESENCE OF THREE OR MORE ROW ELEMENTS, EXCEPT FOR LIMITED SEPARATION, SUCH AS A FIVE (5) FOOT SIDEWALK, WITH A LANDSCAPE BUFFER AND A POSTED SPEED LIMIT OF 25 MPH WOULD RESULT IN A QOS OF "C", OR AN INCREASE OF TWO LETTER GRADES. PHYSICAL BARRIER INCLUDES ANY TYPE OF PERMANENT, PHYSICAL VERTICAL SEPARATION. GRASS BUFFER MUST BE AT LEAST FIVE (5) FEET IN WIDTH BETWEEN VEHICLE TRAVEL LANES AND THE FACILITY. LANDSCAPE INCLUDES VERTICAL LANDSCAPE ELEMENTS THAT WOULD PROVIDE A DEGREE OF PROTECTION FOR MULTIMODAL USERS.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The multimodal QOS standards for on-street bike lanes or cycle tracks that accommodate travel demand for people skating, riding a bicycle, scooter, skateboard, or micromobility device are based on the width of the facility, the level of physical separation from motor vehicle travel lanes, the visibility of the facility, and the posted speed limit. The proposed multimodal QOS standards for people bicycling and riding micromobility devices are intended for on-street facilities. These modes, specifically bicycles, may also make use of sidewalks, shared-use paths, and multi-use trails if permitted by the City **(Figure 8)**.

FIGURE 8. BICYCLING & MICROMOBILITY QUALITY OF SERVICE (QOS) STANDARDS

FACILITY TYPE	ROW FEATURES (SEE NOTES FOR ROW WITH MULTIPLE FEATURES)				
ON-STREET STANDARD	LIMITED SEPARATION	PROTECTED	BUFFERED	ENHANCED VISIBILTY	SPEED LIMIT 25 MPH OR LESS
BICYCLE LANE (6' WIDE OR MORE)	B	A	A	A	B
BICYCLE LANE (5' WIDE)	C	A	B	B	B
BICYCLE LANE (4' WIDE)	D	B	C	C	C
PAVED SHOULDER (AKA UNDESIGNATED BICYLCE LANE)	E	-	D	-	C
BICYCLE BOULEVARD (WITH SHARROWS)	C	-	-	B	C

SOURCE: QOS STANDARDS ESTABLISHED BY NUE URBAN CONCEPTS, LLC
INTENT: MOBILITY PLANNING & MEASURE PERFORMANCE OF MULTIMODAL PROJECTS OVER TIME.
PROTECTED: INCLUDES SEPARATED OR RAISED BICYCLE LANES OR CYCLE TRACKS
BUFFERED: MINIMUM OF DOUBLE 6" WHITE EDGE LINES SEPARATING THE BIKE LANE FROM ADJACENT TRAVEL LANES. IDEALLY BUFFER IS AT LEAST 3' WIDE (40 MPH OR FASTER) OR 2' WIDE (30 MPH TO 35 MPH). FLEX POST, RAISED PAVEMENT MARKINGS, OR VERTICAL DEFLECTION BARRIERS SHOULD BE PROVIDED WHERE FEASIBLE.
ENHANCED VISIBILITY: USE OF GREEN PAVEMENT MARKINGS, CONTRAST BOX BEHIND SHARROWS AND BICYCLE SYMBOLS, ON-STREET MARKINGS WITH SPEED LIMITS OR SHARE THE ROAD.
NOTES: THE PRESENCE OF TWO OR MORE ROW FEATURES, EXCEPT FOR LIMITED SEPARATION, WOULD RESULT IN AN INCREASE ON ONE ADDITIONAL LETTER GRADE.

The multimodal transit QOS standards are only for corridors with existing or future transit service. It should be recognized that the City has little say in the headways provided by future express bus or bus service. The City does have greater ability to pursue higher QOS standards for microtransit and trolley circulators. The following multimodal QOS standards are for future transit based on the frequency of service and the type of transit service provided **(Figure 9)**.

www.nueurbanconcepts.com

NOTES: A SPAN OF SERVICE EXCEEDING 16 HOURS WOULD RESULT IN AN INCREASE IN ONE ADDITIONAL LETTER GRADE.
A FUNCTION OF BEING ABLE TO ACHIEVE QOS A AND B FREQUENCY IS THE PROVISION OF MULTI-MODAL LANES AND WAYS, DEDICATED TRANSIT LANES, AND HOV LANES.

The City's currently adopted roadway LOS standards are primarily intended to implement transportation concurrency and identify the need for additional road capacity on a segment-by-segment basis. It is also recommended that the City consider proposed multimodal QOS standards for Complete Streets, walking, bicycling, micromobility, and transit.

These multimodal QOS standards promote creating a safe and efficient multimodal system to encourage walking, biking, and transit use. The proposed multimodal QOS standards will allow for effective mobility planning, measuring mobility plan performance over time, developing Complete Street design standards for new and retrofitted streets, and developing mobility criteria to be met by new development.

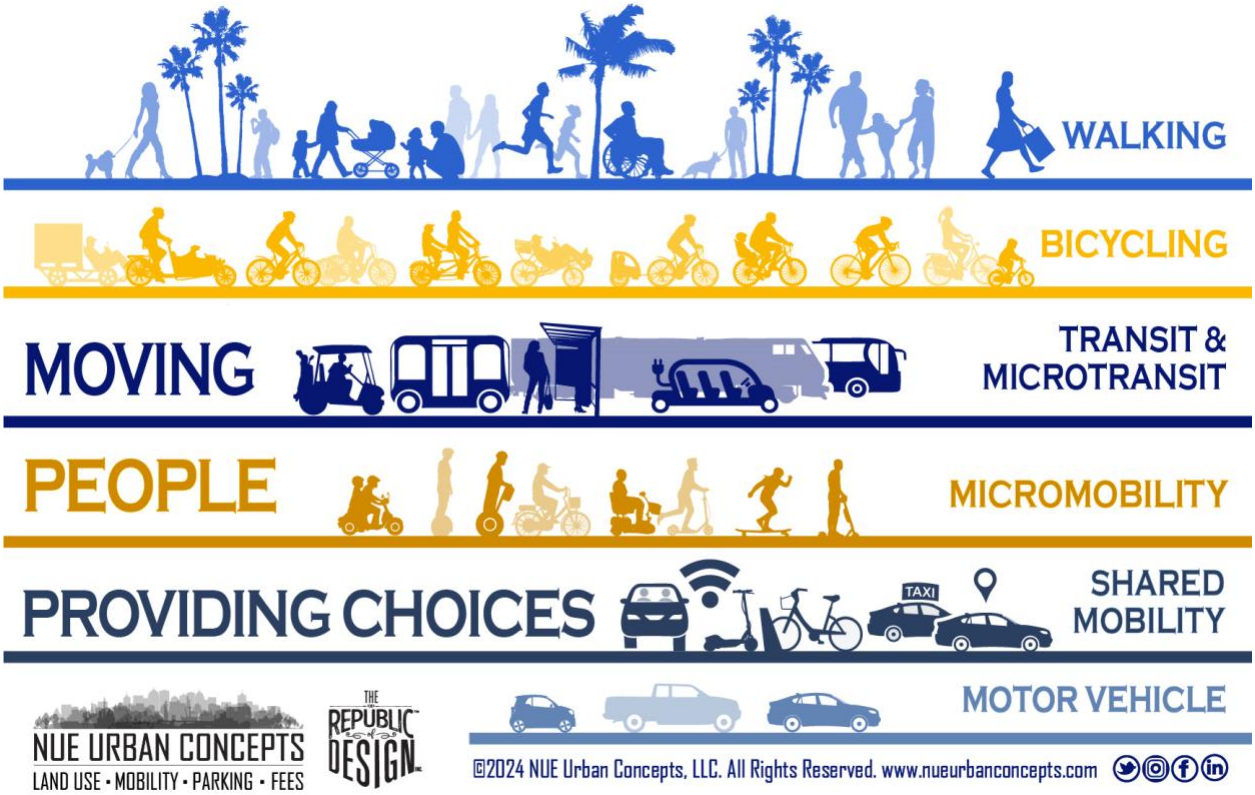
UPDATE MOBILITY PLAN PROJECTS

The updated Mobility Plan Projects serve as the basis to develop the City's Mobility Fee. The updated Mobility Plan Projects provide a foundation for Boynton Beach to proactively prioritize projects to meet the growth, travel, and mobility needs of the community in a manner that is coordinated with the Future Land Use Element in the City's Comprehensive Plan. The updated Mobility Plan Projects support the City's ongoing initiatives to transition its transportation system from primarily moving vehicles, towards a multimodal system focused on safely moving people, whether they choose to walk, bicycle, ride transit, or continue to drive their vehicles **(Figure 10)**.

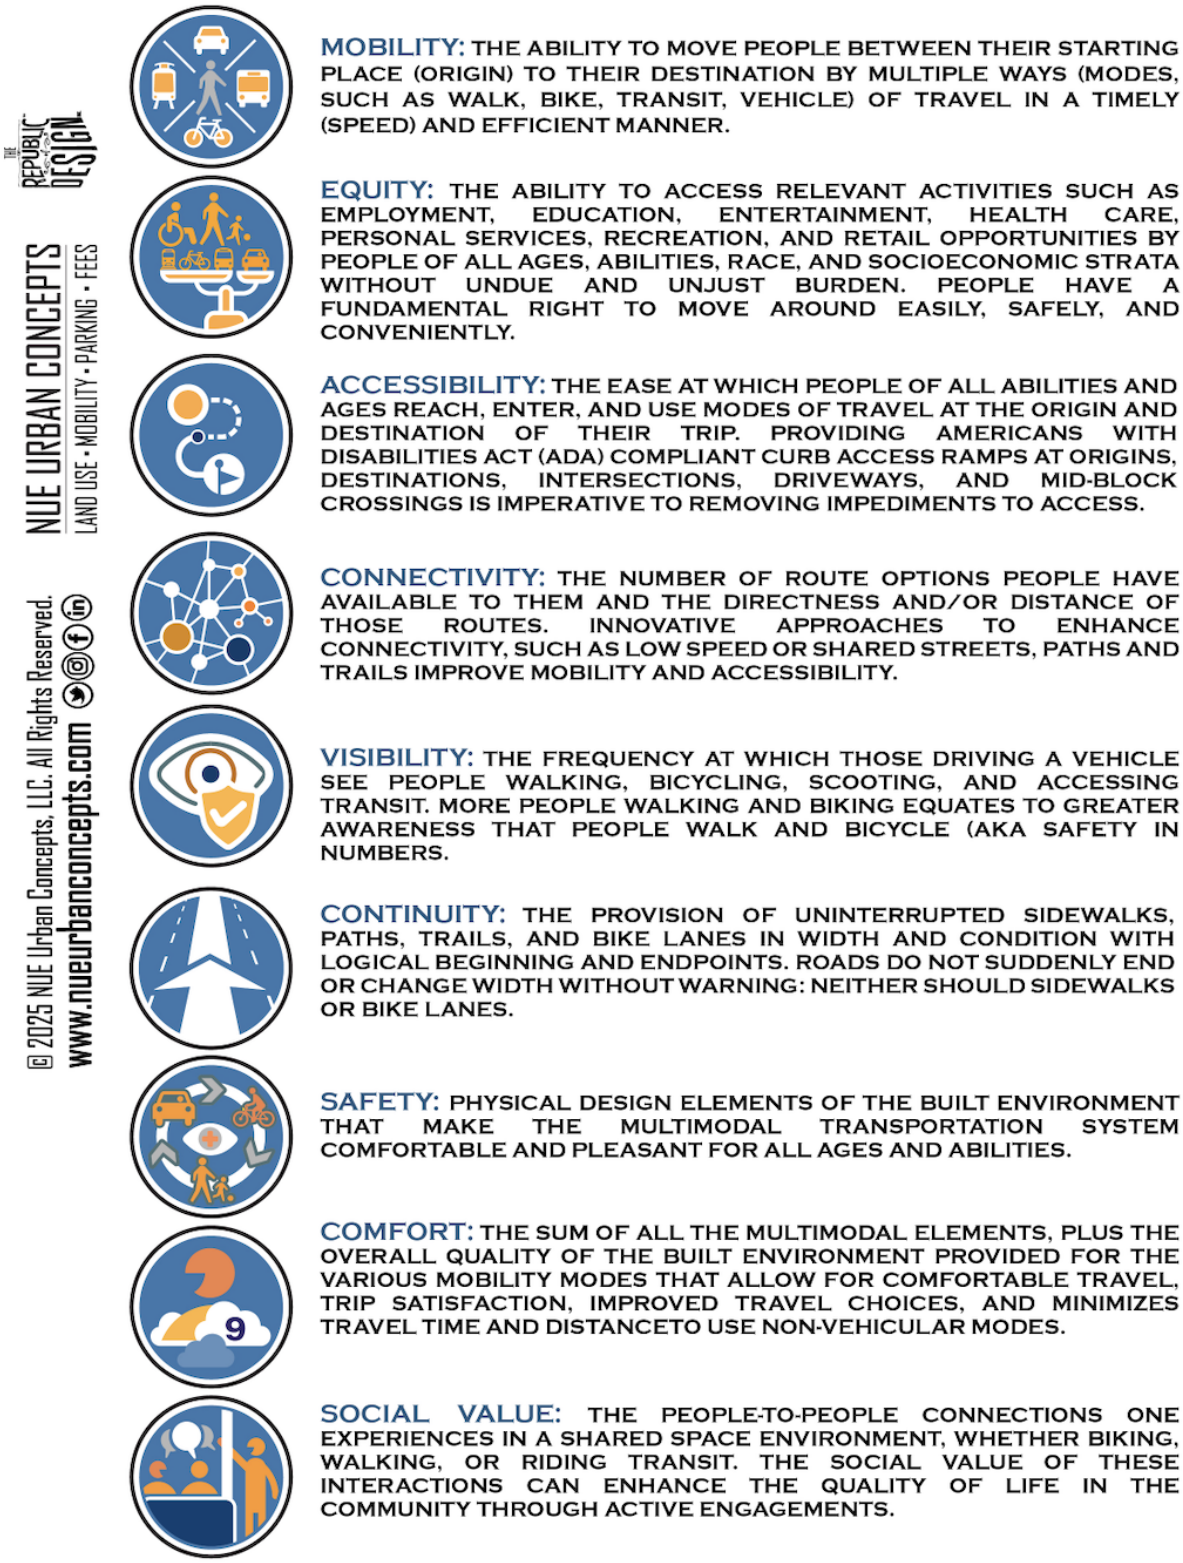
Figure 10. Moving People, Providing Choices



Updated Mobility Plan Projects (aka Mobility Projects) consist of improvements to curbless, low speed, and wider streets, shared-use paths, sidewalks, bike lanes, boardwalks, transit circulators, water taxi service, mobility hubs, and mobility programs, services, and studies. The updated Mobility Plan Projects were established based on the multimodal elements necessary to transition from a transportation system focused on moving cars, towards a safe, comfortable, and convenient multimodal system focused on moving people **(Figure 11)**.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

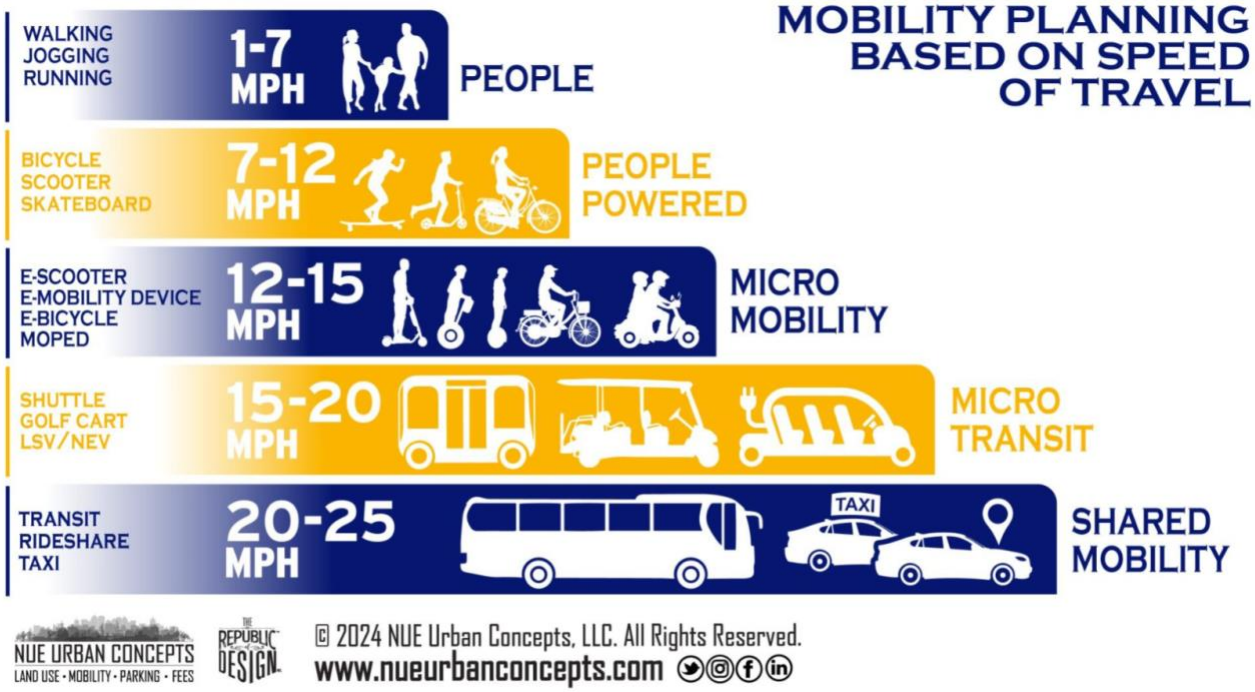
Figure 11. Multimodal Elements



© 2025 NUE Urban Concepts, LLC. All rights reserved.

To facilitate the transition from a transportation system focused on moving cars towards a multimodal system focused on the movement of people, it's important to understand that the speed of travel varies greatly whether a person is walking, bicycling, scooting, riding transit or driving. As micromobility (e.g., electric bikes and electric scooters), microtransit (e.g., golf carts, neighborhood electric vehicles, and autonomous transit shuttles), and shared mobility (e.g., ride-share and car-share) devices, services, and programs expand, there will be a need to reimagine and repurpose road and street rights-of-way and travel lanes to accommodate different speeds of travel. The speed of multimodal travel generally falls within five tiers, each of which requires appropriate Mobility Projects, to accommodate the desired speed of travel **(Figure 12)**.

Figure 12. Speed of Travel



The updated Mobility Plan Projects consist of three (3) separate plans for: (1) Streets; (2) Multimodal Corridors; and (3) Transit. The Streets Plan includes projects for walking & streetscape enhancement, curbless shared streets, and complete street roadway widening. The Multimodal Corridors Plan include bike lanes, boardwalks, shared-use paths, sidewalks, and multimodal corridor evaluations crossing I-95. The Transit Plan includes transit circulators, mobility hubs, water taxi docks, and parking facilities. The Mobility Plan also includes the following Programs: (1) Low Speed Streets Pilot Program; (2) Micromobility and Low Speed Electric Vehicle Program; (3) Vision Zero Action Plan; (4) Wayfinding Program; (5) ADA Curb Ramp Retrofit Program; (6) Mobility Access Program; (7) Multimodal Plans, Programs, Services & Studies; and (8) Mobility Plan & Fee Implementation Program.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

STREETS PLAN

The Streets Plan emphasizes improving accessibility, connectivity, and mobility within Boynton Beach. The Streets Plan consist of the following types of projects: (1) Walking & Streetscape Enhancement; (2) Curbless Shared Streets; and (3) Complete Street Roadway Widening **(Map D)**. The detail for the Streets Plan includes the limits, length and description for each project, along with the associated planning level cost, person miles of capacity, reasonably anticipated sources of funding, and a projected timeframe **(Appendix F).**

Walking & Streetscape Enhancement

Updated Mobility Plan Projects for Walking & Streetscape Enhancement are proposed to be designed prioritize walking with lower speeds, safer crossings, and in longer blocks and key destinations providing mid-block crossings with appropriate traffic calming and streetscape measures. Walking & Streetscape Enhancement projects could be provided through the construction of wider sidewalks and streetscape improvements as part of resurfacing or new road, intersection, or safety improvements. The City may desire to update standards in its Land Development Regulations to require new development to be setback from the adjacent street right-of-way at a distance that will accommodate wider sidewalks, along with room for on-street parking, streetscape features such as shade-trees and seating areas. The City may also consider offering new development Mobility Fee credits or reimbursements through the construction of off-site sidewalk and streetscape improvements that are beyond the limits or boundaries of the development that help to create an environment that is welcoming to people walking and accessing transit.

Curbless Shared Streets

Curbless Shared Streets are a relatively new concept in the U.S. The recent reconstruction of portions of Clematis Street and Rosemary Avenue within Downtown West Palm Beach are both examples of Curbless Shared Streets. These Streets prioritize creating a walkable environment where vehicles drive slow enough to allow for people to safely bicycle and access transit circulators within shared travel lanes. East Ocean Avenue between US 1 and Seacrest is an ideal initial corridor for conversion to a Curbless Shared Street within Downtown.

Complete Street Roadway Widenings

The Streets Plan does include proposed widenings of portions of SE/SW 23rd Avenue, Miner Road, and SW 8th Street to construct either center turn lanes or raised landscape medians, along with enhanced multimodal improvements for people walking and bicycling. The Streets Plan also includes the widening of High Ridge Road to four (4) lanes between Gateway Blvd and Miner Road, along with enhanced multimodal improvements for people walking and bicycling.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

MULTIMODAL CORRIDORS PLAN

The Multimodal Corridors Plan establishes Principal, Major, and Minor Multimodal Corridors to safely connect residents with schools, parks, and major destinations **(Map E)**. The Multimodal Corridors Plan also includes boardwalks along portions of the intracoastal waterway and two (2) potential multimodal crossings of Interstate 95. The detail for the Multimodal Corridors Plan includes major destinations connected by the corridors, the starting and ending points, the length, and description for each corridor, along with the associated planning level cost, person miles of capacity, reasonably anticipated sources of funding, and a projected timeframe **(Appendix G1).** Multimodal Corridor connections to Public Schools will require further coordination with the Palm Beach County School Board. The majority of connections to schools are intended for school use only.

The Multimodal Corridors are comprised of bike lanes, shared-use paths, sidewalks, street lighting, and high visibility crosswalks, along with hardscape and landscape enhancements. Each Multimodal Corridor is comprised of multiple smaller improvements to City streets, with some improvements on County and State Roads. These improvements are intended to be flexible in terms of the types of multimodal improvements to be made and also identify gaps in the sidewalk network. There are a greater number of City streets with proposed improvements east of Interstate 95 due to the existing gridded roadway network, especially north of Woolbright Road **(Appendix G2)**. There are a number of City streets that also make up the multimodal corridors west of Interstate 95; however, the segments tend to be longer without as much variation block to block **(Appendix G3)**.

Principal Multimodal Corridors

There are two (2) Principal Multimodal Corridors, one east of I-95 and one west of I-95, that have been established to provide for a continuous, safe, and visible multimodal route for people walking and bicycling that runs from the northern limits to the southern limits of the Mobility Study Area. The Principal Multimodal Corridor east of Interstate 95 is intended to provide a higher quality alternative to Seacrest Blvd for people walking and bicycling. The Principal Multimodal Corridor west of Interstate 95 is intended to provide a higher quality alternative to Congress Avenue for people walking and bicycling, along with providing access to the existing TRI-Rail Station.

The concept behind Principal Multimodal Corridors is similar to principal arterial roads. Principal Multimodal Corridors are the foundation for the multimodal transportation system, just as principal arterial roads are the foundation for the motor vehicle transportation system. Principal Multimodal Corridors are connected to residents, schools, parks, and major destinations, through connections with Major and Minor Multimodal Corridors. The Principal Multimodal Corridors provide for an organizing element from which to develop the multimodal network, as opposed to taking a piecemeal approach to providing multimodal improvements.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Major Multimodal Corridors

The concept behind Major Multimodal Corridors is similar to major arterial or collector roads. Major Multimodal Corridors feed into the Principal Multimodal Corridors, just as major arterial and collector roads feed into principal arterials for the motor vehicle transportation system. Major Multimodal Corridors connect residents with schools, parks, and major destinations with the Principal Multimodal Corridors. There are a total of six (6) Major Multimodal Corridors.

The first is a Major Multimodal Corridor east of I-95 that connects the Principal Multimodal Corridor to Downtown, the future FEC Rail Station, and the Woolbright Mobility District. The second is a Major Multimodal Corridor west of I-95 that connects the TRI-Rail Station with Boynton High School, Renaissance Commons, the Boynton Beach Mall, and Congress Middle School.

The third is a Major Multimodal Corridor that runs along US 1 (Federal Highway) that will connect several proposed water taxi stops within parks along the intracoastal with Downtown and the Woolbright Mobility District. The fourth is a Major Multimodal Corridor that connects US 1, the Principal and Major Multimodal Corridors East, Galaxy Elementary, Galaxy Park, and Barton Memorial Park. The fifth and sixth Major Multimodal Corridors are along Gateway Blvd and Boynton Beach Blvd to provide east-west connectivity.

Minor Multimodal Corridors

The concept behind Minor Multimodal Corridors is similar to minor arterial or collector roads. Minor Multimodal Corridors feed into the Principal and Major Multimodal Corridors, just as minor arterial and collector roads feed into major and principal arterials for the motor vehicle transportation system. Minor Multimodal Corridor tend to provide connectivity between residents and a specific school, park, or major destination. These tend to be shorter overall routes, but are a key component to providing a convenient, safe, and visible multimodal network.

Boardwalks

The Multimodal Corridors Plan identifies several boardwalks project along the intracoastal. The boardwalk projects are intended to fill in gaps between existing publicly accessible boardwalks and docks. These boardwalks would either be freestanding wooden structures or provided in conjunction with docks or seawalls. The boardwalks will provide enhanced connectivity to existing City parks and may serve as docks or stops for future water taxi services. Future updates of the Mobility Plan may include connections to other boardwalks, to the extent there is permission and easements granted by private property owners to allow access to the public or there are future developments that provide publicly accessible boardwalks, or seawalls have to be constructed either within public lands or with assistance by a governmental entity that requires public access.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Multimodal Crossing Evaluations

The Major Multimodal Corridors along Boynton Beach Blvd and Gateway Blvd both require crossing Interstate 95 utilizing busy interchanges. Although multimodal improvements are planned in conjunction with major interchange reconstruction projects, the high traffic volume and numerous on-ramps and off-ramps, make both corridors less suitable for people walking and bicycling.

The Multimodal Corridors Plan includes two (2) proposed multimodal crossings of Interstate 95 and the TRI-Rail tracks west of I-95. The first corridor would be a multimodal bridge for people walking and bicycling that would connect Ocean Avenue and Ocean Drive, both of which were previously interconnected prior to the construction of Interstate 95.

The second corridor would ideally be an underpass along the Boynton Canal below I-95 and the TRI-Rail tracks for people walking and bicycling that would open up access to the TRI-Rail Station via High Ridge Road and access to Renaissance Commons and the Boynton Beach Mall via the Major Multimodal Corridor West.

Both corridors are longer term visions to enhance multimodal connectivity between Boynton Beach east and west of I-95, without the need for people walking and bicycling to travel along multi-lane arterials and cross major interchanges. Both corridors will require additional evaluation to determine the feasibility of the proposed improvements.

The corridor crossings would be expensive and would require funding from multiple sources. A portion of the cost for the evaluations is included in the Mobility Fee calculation, no cost for any property acquisition or construction activity is included in the Mobility Fee calculation. If feasible, the projects could be included as part of future updates to the Complete Streets Mobility Plan.

TRANSIT PLAN

The Transit Plan identifies transit circulators, mobility hubs, and a water taxi service to create multiple park once environments at major destinations within the City **(Map F)**. The Transit Plan also incorporates the existing on demand transit service located within the Community Redevelopment Agency (CRA) boundaries and funded by the CRA.

The detail for the Transit Plan includes transit circulator routes, major destinations connected by the corridors, the starting and ending points, the length, and description for each corridor, along with the associated planning level cost, person miles of capacity, reasonably anticipated sources of funding, and a projected timeframe **(Appendix H).** The transit routes are conceptual and are subject to change upon further evaluation.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Transit Circulators

The Transit Plan identifies five (5) transit circulators connected to mobility hubs throughout the City. The transit circulators are proposed to be either 15 to 25 passenger vehicles or smaller low speed vehicles that can accommodate anywhere from three (3) to eight (8) passengers. The following are the five (5) proposed transit circulator routes (routes subject to change upon further evaluation):

(1) **Downton to Beach** is the first route and is already being provided from Downtown to Ocean Front Beach Park.

(2) **Downtown to Mall** is the second route and would connect the Downtown mobility hub to a mobility hub proposed at the Boynton Beach Mall.

(3) **Circulator East** is the third route that is proposed to primarily run along Gateway Blvd and US 1 and connect mobility hubs at the TRI-Rail Station, Downtown, and in the Woolbright Mobility District.

(4) **Circulator West** is the fourth route that is proposed to connect mobility hubs at the TRI-Rail Station, Renaissance Commons, the Mall, SW 8th Street, and the Woolbright Mobility District.

(5) **Woolbright to Hospital** is the fifth and final proposed route and would connect mobility hubs at the Woolbright Mobility District and the Bethesda Baptist Memorial Hospital. Passengers from the Hospital could then access Downtown, the Mall, or TRI-Rail riding either the Circulator East or West routes from the Woolbright Mobility District.

Mobility Hubs

Mobility hubs are locations where multiple ways (modes) to travel (e.g., walk, bike, transit) converge and feature various amenities (e.g., covered waiting areas, pick-up / drop-off lanes), that allow a person to easily switch modes of travel to reach their destination. The Transit Plan identifies ten (10) potential mobility hubs within the City, all interconnect by proposed transit circulators. The final location of mobility hubs shall be determined through further evaluation and potential partnerships with existing developments, redevelopment, and existing property owners.

The Downtown mobility hub is proposed to feature a parking structure. There is an existing parking structure at the proposed mobility hub within the Woolbright Mobility District at the NW corner of US 1 and Woolbright Road. There are several large surface parking lots at the Boynton Beach Mall and the TRI-Rail Station that could be repurposed as mobility hubs. Mobility hubs are proposed in the vicinity of US 1 and Gateway Blvd, MLK Jr. Blvd and Seacrest, Bethesda Baptist Memorial Hospital, SW 8th and Woolbright, and within the Renaissance Commons development. As part of the City's update of the Complete Streets Mobility Plan, mobility hubs will be further refined.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Water Taxi

The Mobility Plan includes future water taxi routes and ADA accessible docks along the intracoastal that could provide additional connectivity and access to the future rail passenger service Downtown. Water taxi service at this present time would likely not be successful without either greater densities Downtown or future rail service to serve as a draw to residents along the intracoastal. The Cities of North Miami, Port St. Lucie, and St. Augustine have incorporated water taxi routes, mobility hubs, access to future rail service, and parking structures into their Mobility Plans. The Transit Plan has identified ten (10) potential water taxi stops along the intracoastal.

MOBILITY PLAN PROGRAMS

There are significant planning and design initiatives beyond the update of Mobility Plan Projects and the update of the Mobility Fee. The updated Mobility Plan Projects also recommends implementing the following Programs: (1) Low Speed Streets Pilot Program; (2) Micromobility and Low Speed Electric Vehicle Program; (3) Vision Zero Action Plan; (4) Wayfinding Program; (5) ADA Curb Ramp Retrofit Program; (6) Mobility Access Program; (7) Multimodal Plans, Programs, Services & Studies; and (8) Mobility Plan & Fee Implementation Program **(Appendix I)**.

The Low Speed Streets Pilot Program was originally incorporated into the Streets Plan with various recommendations for traffic calming. The intent of the program is to slow down vehicle traffic and prioritize the safe and efficient movement of people bicycling, walking, and accessing transit. Traffic calming is not something that is always agreeable to residents along an existing street. Rather than take a top down approach, the Pilot Program would start by collecting input from residents.

There are four (4) initial areas east of Interstate 95 that have been identified as potential locations for implementation of the Low Speed Streets Pilot Program **(Map G)**. The details of the Low Speed Streets Pilot Program require further development. The framework would include establishing criteria for residents to request traffic calming measures while encouraging them to engage with their neighbors and involve them in the process of evaluating various traffic calming options. Best practices include engaging and gaining their support in the process is a more effective approach than pre-determining the most suitable traffic calming option for a given street. Traffic calming measures that garner community support could be added to future Complete Streets Mobility Plan updates.

COMPLETE STREETS MOBILITY PLAN UPDATE

The City will be undertaking a more holistic update of its Complete Streets Mobility Plan. The updated Mobility Plan Projects maybe further refined and defined as part of the Complete Streets Mobility Plan update. The updated Complete Streets Plan will further evaluate updates of Quality of Service Standards, mobility hubs, parking, and transit circulation.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

MOBILITY FEE

The basis for the City of Boynton Beach Mobility Fee is the updated Mobility Plan Projects identified to meet future travel demand from new development, consistent with Florida Statutes 163.3180 and 163.31801. **Development** is defined as **"any new residential and non-residential construction or expansion of building(s), lanes(s), structure(s), or any changes in the use of any building(s) or structure(s) or land use that will generate additional impact on the city's public facilities."** **Impact** is defined as **"any new development that results in an increase in person travel demand above the demand generated by the existing use of property."**

The updated Mobility Plan Projects are intended to provide the person miles of capacity needed to meet future person miles of travel demand, consistent with the **"needs"** requirement of the dual rational nexus test. The Mobility Fees collected from new development are to be used to fund the updated Mobility Plan Projects that provide a mobility benefit to new development and accommodate the increase in person travel demand from that new development, consistent with the **"benefits"** requirement of the dual rational nexus test **(Figure 13)**.

Figure 13. Mobility Projects and Mobility Fee

© 2025 NUE Urban Concepts, LLC. All rights reserved.

EXISTING CONDITIONS EVALUATION (ECE)

Florida Statute prohibits local governments from charging new development for an existing transportation deficiency (aka over capacity or backlogged roads). An existing conditions evaluation has been conducted to ensure that new development is not being charged for existing transportation deficiencies. The evaluation includes a system-wide analysis of all arterials and collectors within the Mobility Study Area **(Map C)**.

The existing conditions evaluation (ECE) is achieved by dividing the vehicle miles of travel (VMT) by the vehicle miles of capacity (VMC). The arterials and collectors within the Mobility Study Area include City, County, and State roads **(Appendix D)**. A VMT/VMC ratio greater than **1.00** indicates that there are system-wide deficiencies. The VMT/VMC ratio in 2024 is **0.85** based on the existing conditions evaluation **(Table 4A)**.

TABLE 4A. 2024 EXISTING CONDITIONS EVALUATION (ECE)

Functional Classification	Length (miles)	2024 VMT	2024 VMC	VMT to VMC Ratio
Minor Collector	12.7	81,560	248,170	0.33
Major Collector	17.2	201,700	619,660	0.33
Minor Arterial	11.1	299,810	805,440	0.37
Principal Arterial	10.4	392,530	891,070	0.44

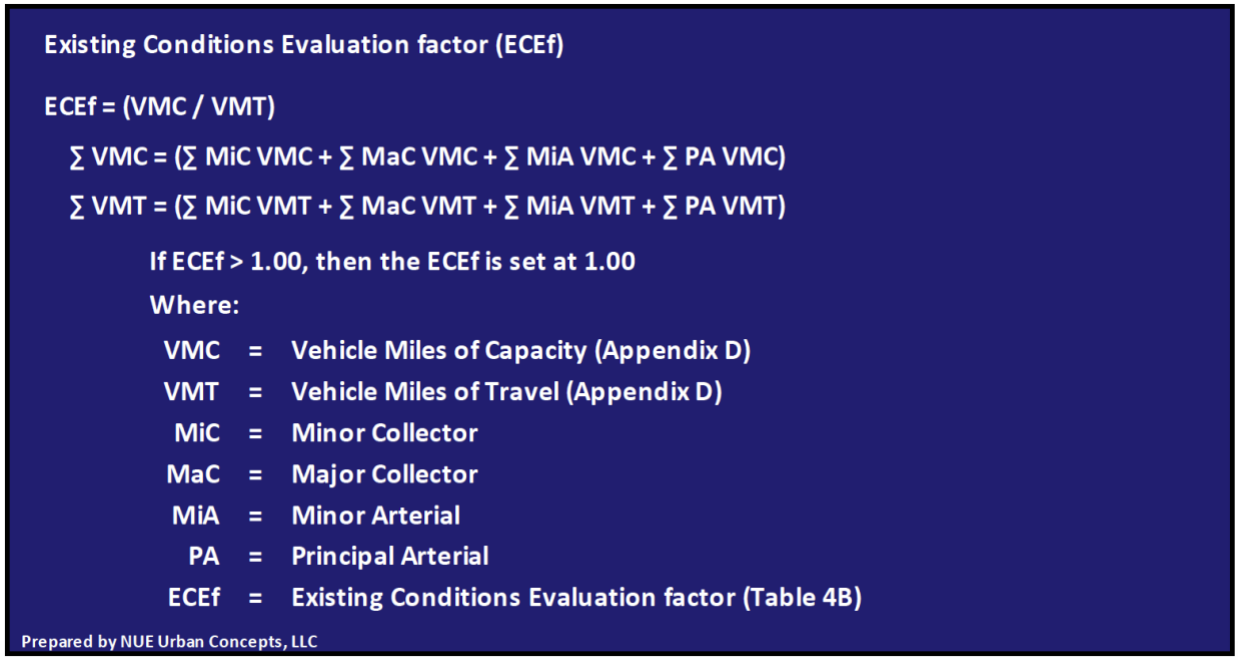
Source: Existing conditions are based on Traffic Characteristics Data for the Mobility Study Area **(Appendix D)**. The Traffic Characteristics Data was obtained from the City, County, FDOT, and 2045 Long Range Transportation Plan for Palm Beach County. VMT is based on AADT x length of a road segment. VMC is based on the daily capacity x length of a road segment. Capacities for roads are based on the 2023 FDOT Generalized Tables based on Context Classification **(Appendix J).** Level of Service Standards are based on the City's Comprehensive Plan.

The mobility fee calculation includes an existing conditions evaluation factor (ECEf) to adjust mobility fee cost for system-wide deficiencies for arterials and collectors within the Mobility Study Area. The existing conditions evaluation factor (ECEf) is determined by dividing the vehicle miles of capacity (VMC) by the vehicle miles of travel (VMT) as illustrated in **Figure 14**.

The Remainder of This Page is Intentionally Left Blank

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Figure 14: Existing Conditions Evaluation Factor (ECEf)



A VMC/VMT ratio greater than **1.00** indicates that the current system has adequate capacity to accommodate existing traffic. The VMC/VMT ratio is **2.63** based on the existing conditions evaluation **(Table 4B)**. Thus, development activity is not being assessed for any system-wide deficiencies. For the Mobility Fee calculation, the ECEf will be set to **1.00**.

TABLE 4B. EXISTING CONDITIONS EVALUATION FACTOR (ECEf)

Functional Classification	Length (miles)	2024 VMC	2024 VMT	VMC / VMT
Minor Collector	12.7	81,560	248,170	3.04
Major Collector	17.2	201,700	619,660	3.07
Minor Arterial	11.1	299,810	805,440	2.69
Principal Arterial	10.4	392,530	891,070	2.27
Total	51.3	975,600	2,564,340	2.63

Source: Existing conditions are based on Traffic Characteristics Data for the Mobility Study Area **(Appendix D)**.

UPDATED MOBILITY PLAN PROJECT SUMMARY

The updated Mobility Plan Projects include detailed descriptions that serves as the basis for development of the Mobility Fee. Planning level cost (PLC) estimates have been developed for the Mobility Projects based on cost from the City, Palm Beach County, FDOT District Six, and the Palm Beach Transportation Planning Agency **(Appendix K)**. The PLC estimates are subject to change as mobility projects are further developed through design and engineering.

Multimodal capacities (MC) have been developed for each type of Mobility Project **(Appendix K)**. The establishment of these multimodal capacities have been used to calculate a person miles of capacity (PMC) for each Mobility Project. These multimodal capacities account for the capacity of sidewalks, bicycle lanes, shared-use paths, and streets.

The updated Mobility Plan Projects include existing funded projects, projects that are under construction, and projects needed to meet future travel demand needs. The attributable planning level cost (PLC) and person miles of capacity (PMC) account for projects that are already funded, under construction, or where funding is reasonably anticipated over the next 21 years. The following is a summary of the total length, and the attributable planning level cost (PLC) and person miles of capacity (PMC) for the updated Mobility Plan Projects **(Table 5)**.

TABLE 5. UPDATED MOBILITY PLAN PROJECTS SUMMARY

Plans & Programs	Length (Miles)	Planning Level Cost (PLC)	Person Miles of Capacity Increase (PMCi)
Streets Plan	9.71	$110,534,256	127,795
Multimodal Plan	45.44	$101,350,000	214,080
Transit Plan	33.14	$50,410,000	144,750
Mobility Plan Programs	7.0 miles & 8.0 programs	$9,675,000	16,800
Total	7.0 miles & 8.0 programs	$271,969,256	503,425

Source: Streets Plan **(Appendix F).** Multimodal Corridors Plan **(Appendix G1).** Transit Plan **(Appendix H)** Mobility Plan Programs **(Appendix I)**. The basis for the attributable Planning Level Cost (PLC) and Person Miles of Capacity (PMC) are summarized in **Appendix K**.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

REASONABLY ANTICIPATED FUNDING

The availability of funding for the updated Mobility Plan Projects over the next 20 years is projected to come from a variety of funding sources. These sources include the City, the Community Redevelopment Authority (CRA), new development, the federal government, Palm Beach County, partnerships, the State of Florida, and various transit providers. The updated Mobility Plan Projects is the first step in a multi-step process to fund mobility within the City. Proactively collaborating with new development is a way to advance Mobility Projects by entering into partnerships to extend these projects beyond development boundaries.

Palm Beach County and Boynton Beach could allocate a portion of gas taxes and infrastructure sales tax towards updated Mobility Plan Projects. However, gas taxes have been declining locally, statewide, and nationally as vehicles have become more fuel efficient and the percentage of electric vehicles and hybrid vehicles increase. The federal government has not raised gas taxes in a number of years. The State of Florida annually adjust gas taxes on the first day of the year based on the prior year Consumer Price Index to adjust for inflation. The vast majority of gas taxes at all levels of government are largely earmarked for maintenance and operations of the existing transportation system, leaving minimal revenues available for new capacity and multimodal improvements.

There has been some discussion of a VMT tax to replace the gas tax at the federal and state level. Given the current political climate, a VMT tax is unlikely to pass anytime soon. However, as a greater number of electric vehicles and autonomous vehicles come online, there may be renewed interest in replacing the gas tax with a VMT fee in the future. The County's existing infrastructure sales tax provides a broader opportunity to have available funds to contribute towards Mobility Plan projects.

The Palm Beach TPA has available federal and state funding identified through the 2045 Cost Feasible Long Range Transportation Plan (LRTP). A large portion of projected funding is allocated towards improvements on the Strategic Intermodal System (SIS), with a significant amount of the funds allocated toward the Florida Turnpike and Interstate 95.

Historically, the Palm Beach TPA has a number of funding opportunities through grants and various pool of funds identified in the LRTP to allocate towards multimodal projects. Funding for mobility projects for federal and state roads would be allocated through the most recently adopted LRTP and the five year FDOT Transportation Improvement Program (TIP).

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Palm Beach County currently collects a road impact fee within the City of Boynton Beach and unincorporated County. Palm Beach County has collected over **$10,500,0000** in road impact fees from development within Boynton Beach between 2014 and 2023 **(Appendix L1)**. Between 2004 and 2013, the City collected over **$21,500,0000** in road impact fees on behalf of Palm Beach County from development within Boynton Beach **(Appendix L2)**. Over the last 20 years, Palm Beach County has collected over **$32,000,000** from development within Boynton Beach. During that same period, based on data provided through the County's annual impact fee reports, a little over $2,000,000 has been expended in Boynton Beach. The road impact fees collected by the County from development in the City could be a funding source for Mobility Projects on County Roads.

Over the next 20 plus years, it is reasonably anticipated that roughly $93,982,756 in funding will be available to fund updated Mobility Plan Projects **(Table 6)**. More than 50% of the funding for the Streets Plan has already been programmed and is currently being expended on the walking and streetscape improvements along Boynton Beach Blvd between US 1 and I-95 **(Appendix F)**.

Roughly $10,000,000 in funding is already programmed for Multimodal Corridor improvements along NE / SE 1st Street and Boynton Beach Blvd between I-95 and Congress Ave **(Appendix G1)**. It is reasonably anticipated that over the next 20 years, an additional $20 million dollars a year or approximately $1 million dollars a year, will be obtained from a variety of funding sources to fund a portion of the updated Mobility Plan projects **(Table 6)**. It should be noted, that as of January 2025, the $20 million dollars is not currently programmed.

The Transit Plan identifies $31.5 million in funding for the Downtown mobility hub and future rail station along the FEC Railroad **(Appendix H).** Of that funding, roughly $13.5 million would be allocated from parking revenues to off-set the cost for the Downtown mobility hub parking structure **(Appendix H).** The majority of the cost for a future rail station, approximately $18 million, would be funded through county, federal, state, and private sources **(Appendix H).**

TABLE 6. REASONABLY ANTICIPATED FUNDING SUMMARY

Streets Plan	**$21,906,756**
Multimodal Corridors Plan	**$32,871,000**
Transit Plan	**$39,205,000**
Total	**$93,982,756**

Source: Streets Plan **(Appendix F).** Multimodal Corridors Plan **(Appendix G1). Transit Plan (Appendix H).** The reasonably anticipated funding for multimodal corridors includes $20 million dollars ($1 million a year, over 20 years) through various city, county, federal and state funds.

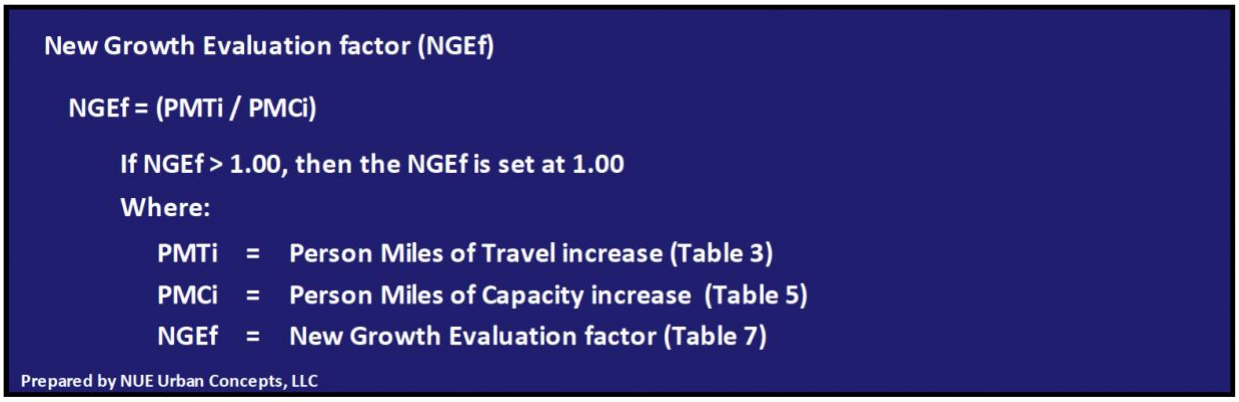
NEW GROWTH EVALUATION (NGE)

A new growth evaluation has been conducted to ensure that new development is not paying for more than its attributable share of the cost of the updated Mobility Plan Projects, as required by Florida Statute. The new growth evaluation factor (NGEf) is based on the increase in person miles of travel (PMT) and person miles of capacity (PMC) from the Mobility Projects (**Figure 15)**.

FIGURE 15. NEW GROWTH EVALUATION FACTOR (NGEf)



The new growth evaluation factor (NGEf) is 1.13 **(Table 7)**. A NGEf ratio that is less than 1.00 indicates that more capacity is being planned than what is needed to meet future demand. The calculated NGEf ratio is greater than 1.00. Thus, the updated Mobility Plan Projects are not assessing new development for more person miles of capacity (PMC) than what is needed to accommodate the projected increase in person miles of travel (PMT). For purposes of the calculation of the Mobility Fee rate, the new growth evaluation factor (NGEf) is set to 1.00.

TABLE 7. NEW GROWTH EVALUATION (NGE)

Increase in Person Miles of Travel (PMTi)	**568,614**
Increase in Person Miles of Capacity (PMCi)	**503,425**
New Growth Evaluation factor (NGEf)	**1.13**

Source: The increase in person miles of travel is based on **Table 3**. The increase in person miles of capacity is based on **Table 5**. The new growth evaluation calculation is based on the formula in **Figure 15**.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

PERSON MILES OF CAPACITY RATE (PMCR)

The first component for calculating a Mobility Fee is the calculation of a person miles of capacity rate (PMCr). The attributable planning level cost (PLCa) is based on the planning level cost (PLC) for the updated Mobility Plan Projects less the reasonably anticipated funding (AF). The assignable Mobility Plan Project cost (MPCa) is calculated by multiplying the attributable planning level cost (PLCa) by the existing conditions evaluation factor (ECEf) and the new growth evaluation factor (NGEf). The assignable Mobility Plan cost (MPCa) is then divided by the increase in person miles of capacity (PMCi) to determine the person miles of capacity rate (PMCr) **(Figure 16)**.

FIGURE 16. PERSON MILES OF CAPACITY RATE (PMCr)

Person Miles of Capacity rate (PMCr)

$\sum$ PLC = ($\sum$ SPc + $\sum$ MCPc + $\sum$ TPc + $\sum$ MPPc)

$\sum$ AF = ($\sum$ SPf + $\sum$ MCPf + $\sum$ TPf)

PLCa = ($\sum$ PLC - $\sum$ AF)

MPCa = ((PLCa x ECEf) x NGEf)

PMCr = (MPCa / PMCi)

Where:

PLC = Planning Level Cost (Table 5)

SPc = Street Plan cost (Appendix F)

MCPc = Multimodal Corridor Plan cost (Appendix G1)

TPc = Transit Plan cost (Appendix H)

MPPc = Mobility Plan Program cost (Appendix I)

AF = Anticipated Funding (Table 6)

SPf = Street Plan funding (Appendix F)

MMPf = Multimodal Plan funding (Appendix G1)

TPf = Transit Plan funding (Appendix H)

PLCa = Attributable Cost of Mobility Plan Projects (Table 8)

ECEf = Existing Conditions Evaluation factor of 1.00 (Table 4B)

NGEf = New Growth Evaluation factor of 1.00 (Table 7)

MPCa = Assignable Cost of Mobility Plan Projects (Table 8)

PMCi = Person Miles of Capacity increase (Table 5)

PMCr = Person Miles of Capacity Rate (Table 8)

Prepared by NUE Urban Concepts, LLC

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The following is the calculation for the Person Miles of Capacity Rate (PMCr) illustrated in **Figure 16**:

(SPc + MCPc + TPc + MPPc) = PLC; (SPf + MCPf + TPf) = AF

(PLC - AF) = PLCa; ((PLCa x ECEf) x NGEf) = MPCa; (MPCa / PMCi) = PMCr.

($110,534,256 + $101,350,000 + $50,410,000 + $9,675,000) = PLC of $271,969,256

($21,906,756 + $32,871,500 + $39,205,000) = AF of $93,982,000

($271,969,256- $93,982,756) = $197,986,500; (($197,986,500 x 1.00) x 1.00) = $197,986,500;

($197,986,500/ 503,425) = $393.28

With an assignable Mobility Plan Cost (MPCa) of **$197,986,500** and a Person Miles of Capacity increase (PMCi) of **503,425**, the calculated Person Miles of Capacity PMC rate (PMCr) is **$393.28 (Table 8)**. The PMCr will be multiplied by the Person Travel Demand per land use on the Mobility Fee schedule to calculate the Mobility Fee rate per land use.

TABLE 8. PERSON MILES OF CAPACITY RATE (PMCr)

Planning Level Cost (PLC)	**$271,969,256**
Anticipated Funding (AF)	**$93,982,756**
Attributable Planning Level Cost (PLCa)	**$197,986,500**
Existing Conditions Evaluation Factor (ECEf)	**1.00**
New Growth Evaluation Factor (NGEf)	**1.00**
Assignable Mobility Plan Cost (MPCa)	**$197,986,500**
Increase in Person Miles of Capacity (PMCi)	**503,425**
Person Miles of Capacity Rate (PMCr)	**$393.28**

PERSON TRAVEL DEMAND PER USE (PTDU)

The second component for calculating a Mobility Fee for land uses in the Mobility Fee schedule is the calculation of person travel demand (PTD) for each use. The factors utilized in the calculation of person travel demand (PTD) for each use are the principal means to achieve the "rough proportionality" test established by the courts and Florida Statute 163.31801.

Trip Generation

Trip generation rates are based on daily trip information published in the *Institute of Transportation Engineers' (ITE) Trip Generation Manual, 11th edition.* The detail for the daily trip generation rates for each land use is included in **Appendix M**. For uses where daily trips are not provided or there are only a few samples, the AM and PM Peak hours of adjacent street traffic were averaged and divided by a peak-to-daily ratio to derive daily trips.

The Mobility Fee schedule requires that trip generation rates for non-residential uses be based on multiple land uses. The trip generation for Mobility Fee schedule land uses such as Community Serving, Long Term Care, and Overnight Lodging are based on weighted AM and PM trip generation data to develop the daily trip generation rates. Additional detail is provided in **Appendix M.**

The simplest way to calculate the daily trip generation rate for a use, where trip generation is based on multiple trip generation rates, would be to simply average the trip rates. The issue with a simple average is that the ITE Manual may only have one (1) or two (2) studies for a given land use and 50 studies for another use. Generally, the greater the number of studies, the more accurate the trip generation rate is for a given use. To ensure that a trip generation rate based on one (1) study does not have the same weight as a trip generation rate based on 30 studies, a weighted trip generation rate is calculated for each Land Use where daily trips are based on more than one ITE land use code.

% New Trips

The percentage of new trips is based on a combination of the various pass-by analyses provided in ITE's Trip Generation Handbook, 3rd edition and various traffic studies conducted throughout Florida. The percentage of new trips differs slightly from the commonly used pass-by trip term as it is the percentage difference in trips after pass-by trips are deducted. The concept is better understood based on the following example:

(10 trips x (100% - 30% pass-by rate)) = 7 trips or 70% new trips).

© 2025 NUE Urban Concepts, LLC. All rights reserved.

While ITE's Trip Generation Handbook does not recognize pass-by rates for uses other than retail, pass-by rates are utilized for uses such as medical offices, day care, entertainment, and recreation use to reflect how people move about the community. A pass-by trip is a trip that is traveling and stops at another land use between an origin point (commonly a dwelling) and a destination (place of employment). The detail for the % new trips is included in **Appendix N**.

Vehicle Trip Length (VTl)

The vehicle trip length (VTl) is used to calculate the vehicle miles of travel for land uses in the mobility fee schedule. Vehicle trip lengths are based on the 2022 National Household Travel Survey (NHTS). The NHTS vehicle trip length data is based on travel surveys collected for the South Atlantic Region of the U.S., which includes Florida.

The travel surveys are from metropolitan statistical areas with a population of more than 1,000,000 people with heavy rail service, which includes Palm Beach County **(Appendix O)**. Vehicle trip lengths vary by trip purpose. Several trip purposes have been combined to more accurately reflect trip characteristics of the uses established in the Mobility Fee schedule.

The travel survey data utilized are for trips of 10.0 miles or less. The U.S. Department of Transportation has been evaluating household trip length data for all counties in the U.S. The trip length data measures population staying at home, population making trips, trips of 5 miles or less, 5 to 10 miles, and varying trip lengths greater than 10 miles. The data has been collected monthly since 2019. Within Palm Beach County, more than 65% of all household trips are 5 miles or less and 81% of all household trips are 10 miles or less **(Appendix P)**. Trips over 10 miles in length would primarily be using limited access roads such as Interstate 95.

Limited Access Evaluation Factor (LAEf)

Travel on Interstate 95, which is a limited access facility, is excluded from Mobility Fee calculations as the Interstate System is principally funded and maintained by the Federal Government in coordination with FDOT. To ensure development activity is not charged for travel on I-95, a limited access factor has been developed. Typically, the limited access factor is based on travel on the Interstate system within City limits. However, given the long distance of almost four (4) miles between the I-95 Interchanges at Woolbright Road and Atlantic Avenue (SR 806) and the relatively short distance of just over one (1) mile between the I-95 Interchanges at Hypoluxo Road and Lantana Road, additional analysis was required. Based on the volumes and length of I-95 between Lantana Road and Atlantic Avenue (SR 806), adjustments were required, otherwise all travel would be assumed to use the Interstate System. To better account for travel on I-95 within the City, the on and off ramp volumes along I-95 were evaluated **(Appendix Q).**

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The analysis of on-ramp and off-ramp volumes, based on 2023 counts from FDOT, resulted in roughly 20% of the total daily traffic counts on Interstate 95 between Lantana Road and Atlantic Avenue. The 20% accounts for on and off ramp movements, it does not fully account for travel along the entire length or for vehicles that were already on I-95 north of Lantana Road and south of Atlantic Avenue. To account for this travel, an additional 20% of the travel was assumed to be related to some portion of I-95 to and from the Mobility Study Area, consistent with the 20% of travel that could be quantified based upon on and off ramp movements.

In determining the limited access adjustment factor, data collected for arterial and collector roads is utilized to determine that share of travel within the Mobility Study Area that does not use I-95. Data is not currently available for travel on local roads within the Mobility Study Area. If more traffic counts were collected, it is likely that the share of travel on limited access facilities may be reduced.
A more detailed analyses of I-95 travel to and from Boynton Beach may result in different adjustment factors. Collection of traffic counts for more local roads and I-95 would be a very expensive undertaking and may or may not affect the limited access evaluation factor. The following is the calculation for the limited access evaluation factor (LAEf) of **0.56** to account for the roughly 44% of travel occurring on Interstate 95 in 2024 **(Table 9)**:

Limited Access VMT x Local Adjustment factor = Adjusted Limited Access VMT

Adjusted Limited Access VMT + Arterial & Collector Roads VMT = Total VMT

Arterial & Collector Roads VMT divided by Total VMT = Limited Access Evaluation factor

1,937,230 x 0.40 = 774,892; 774,892 + 975,600 = 1,750,492; (975,600 / 1,750,492) = 0.56

TABLE 9. LIMITED ACCESS EVALUATION FACTOR (LAEf)

Functional Classification	2024 VMT
Limited Access (I-95) VMT	1,937,230
Local Adjustment Factor	0.40
Adjusted Limited Access (I-95) VMT	774,892
Arterial & Collector Roads VMT	975,600
Total VMT	1,750,492
Limited Access Evaluation Factor (LAEf)	0.56

Source: The arterial, collector, and limited access VMT data was obtained from **Table 4A**. The local adjustment factor of 0.40 is based on the analysis of I-95 on and off ramp movements **(Appendix Q).** The limited access evaluation factor is calculated based on the formula provided above **Table 9**.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Origin Destination Factor (ODf)

Trip generation rates represent trip-ends at the site of a land use. Thus, a single origin trip from home to work counts as one trip-end for the residence and from work to the residence as one trip-end, for a total of two trip ends. This distributes the impact of travel between origins and destinations of trips based on the overall share of travel by trip purpose. The application of the origin and destination factor (ODf) eliminates double charging new development for the same trip. The ODf is used in the calculation of PTDu (**Appendix N**).

Vehicle Miles of Travel (VMT)

The vehicle miles of travel are calculated based on trip generation, percent new trips, vehicle trip length, the limited access evaluation factor, and the origin and destination factor (**Figure 17**). The vehicle miles of travel (VMT) for land uses in the mobility fee schedule are then converted into person travel demand (PTD) based on the person miles of travel (PMT) factor.

Person Miles of Travel Factor (PMTf)

The person miles of travel factor (PMTf) are used to convert the vehicle miles of travel (VMT) to person travel demand (PTD) for land uses in the mobility fee schedule. The PMTf allows for the conversion of vehicle travel to person travel by accounting for people walking, bicycling, riding transit, and for vehicle occupancy. The person miles of travel factor (PMTf) are based on the are based on the 2022 National Household Travel Survey (NHTS) . The NHTS vehicle trip length data is based on travel surveys collected for the South Atlantic Region of the U.S., which includes Florida.

The travel surveys are from metropolitan statistical areas with a population of more than 1,000,000 people with heavy rail service, which includes Palm Beach County **(Appendix O)**. The person miles of travel factor (PMTf) vary by trip purpose. Several trip purposes have been combined to more accurately reflect trip characteristics of the uses established in the Mobility Fee schedule.

Person Travel Demand per Land Use (PTDu)

The result of multiplying vehicle miles of travel (VMT) by the person miles of travel factor (PMTf) is the establishment of a Person Travel Demand per land use (PTDu) **(Appendix N)**. The PTD per land use reflects projected person travel during an average weekday for the various land uses in the Mobility Fee schedule. The following is the calculation for Person Travel Demand (PTD), with an example for how PTD is calculated for a single family residential use per 1,000 sq. ft. **(Figure 17)**:

((((TG x % NT) x VTl) x LAEf) x ODf) = VMT; (VMT x PMTf) = PTDu

((((4.10 x 1.00) x 3.86) x 0.56) x 0.50) = 4.43; (4.43 x 1.61) = 7.13

MOBILITY FEE ASSESSMENT AREA

There are two kinds of geographic areas in mobility fee systems: assessment areas and benefit districts. Assessment areas are based on either a physical location, such as a downtown, or a type of development pattern, such as a traditional neighborhood development (TND).

New development within the City only pays the mobility fee rate applicable to the Assessment Area in which the new development is located. A benefit district is a geographic location within which mobility fees collected are earmarked for expenditure as required by the **"benefits"** test of the dual rational nexus test.

The establishment of different assessment areas is done in recognition that certain geographic locations or types of developments will result in shorter trips, more people walking and bicycling, and higher levels of internal capture; thus, minimizing impact to the external roadway network. Multiple assessment areas are established for mobility fees to reflect differences dues to internal capture or external distribution of trips.

The Mobility Fee features a single Assessment Area for the Mobility Study Area (**Map A**). Thus, all new development within the Assessment Area will pay the same Mobility Fee rate per the applicable land use and unit of measure. In the future, the City could elect to adopt Assessment Areas that vary either by location or mobility projects.

Should the City elect to eventually extend the Mobility Fee through-out the City, then an update to the Mobility Plan and Mobility Fee would be required to extend the Mobility Fee citywide. Those areas of the City outside the current Mobility Study Area may end up with a different Mobility Fee based on the need for future updates of the Complete Street Mobility Plan.

The Mobility Fee Ordinance will address assessment and imposition of the Mobility Fee on new development. The Mobility Fee Ordinance may either incorporate the Assessment Area map by reference or include the map as an exhibit to the Ordinance.

The Remainder of This Page is Intentionally Left Blank

MOBILITY FEE SCHEDULE

To ensure the rough proportionality test is addressed, the person travel demand of individual land uses is used to calculate the Mobility Fee rate per use (MFru) in the Mobility Fee Schedule **(Appendix R)**. The Mobility Fee rate is based on the person travel demand for each use (PTDu) listed on the Mobility Fee schedule multiplied by the person miles of capacity rate (PMCr).

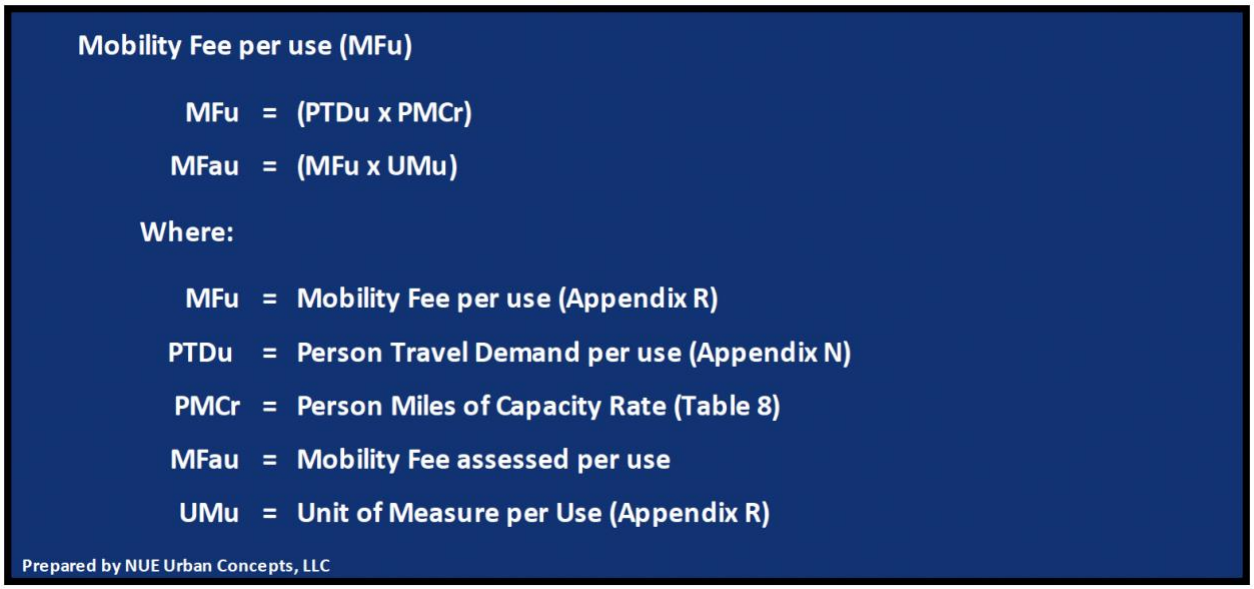
The calculated person travel demand for each use (PTDu) represents the full person travel demand impact of that land use within the Mobility Study Area **(Appendix N)**. The Mobility Fee rate per land use (MFru) has been developed to fund the updated Mobility Plan Projects needed on City, County, and State Roads to address growth in future travel demand. Payment of the Mobility Fee assessed based on land uses in the Mobility Fee schedule allows new development to equitably mitigate its impact to the City's multimodal transportation system.

The Mobility Fee schedule provides fee rates on a per 1,000 square foot or applicable unit of measure basis **(Appendix R)**. New development is assessed a Mobility Fee per use (MFau) at the time of building permit application on a per square foot basis or applicable unit of measure. The calculations for determining the Mobility Fee are illustrated in **Figure 18.** The following is an example of the mobility fee calculation for a 1,750 sq. ft. single-family residential dwelling unit of measure (UM) is per 1,000 sq. ft.:

(PTDu x PMCr) = MFru; Sq. Ft. (sf) / 1,000 = UMu; MFru x UMu = MFau

(7.13 x $393.28) = $2,806; (1,750 / 1,000) = 1.75; (1.75 x $2,806) = $4,910

FIGURE 18. MOBILITY FEE PER USE (MFu)



© 2025 NUE Urban Concepts, LLC. All rights reserved.

The Mobility Fee schedule seeks to strike a balance between the City's Comprehensive Plan and current market trends. The uses included on the Mobility Fee schedule enable Boynton Beach to use the Mobility Fee as an additional tool to further integrate land use and transportation planning consistent with the City's Comprehensive Plan. The calculated Mobility Fee per land use is provided in **Appendix R**.

The Mobility Fee schedule of uses is broken down into five (5) components that are further described below the figure: (1) category of land uses; (2) individual land use classifications; (3) representative land uses; (4) Assessment Area; and (5) the mobility fee rates per land use. The following is an example the five (5) components of the mobility fee schedule **(Figure 19).**

FIGURE 19. MOBILITY FEE SCHEDULE COMPONENTS

Five (5) Components of a Mobility Fee Schedule	
Use Categories, Use Classifications & Representative Uses	**(4th Assessment Area)**
	Citywide
(1st Use Category) = Institutional Uses per sq. ft.	
(2nd Use Classification) = Community Serving **(3rd Representative Use) = (Assembly, Centers, Lodges, Museum, Performance Venues, Religious Institution, Studios)**	**(5th Mobility Fee Rates)**

The first (1st) component are overall categories of land uses, such as residential or office. Under each overall category there are multiple uses for which a mobility fee is calculated. The overall category is generally consistent with the function of a given land use for the individual land use classification. These overall categories are generally consistent with the City Comprehensive Plan and the ITE Trip Generation Manual. These categories headings also specify if the individual uses are calculated on a per 1,000 square feet or a different unit of measure, such as the number of rooms for overnight lodging.

The second (2nd) component are individual land use classifications, such as community serving or commercial storage. These individual land use classifications have similar person travel demand characteristics and / or similar functions to the overall land use category. These individual land use classifications are generally consistent with the ITE Trip Generation Manual classification under a given category of land uses. The individual land use classifications will specify the unit of measure to calculate the mobility fee if it differs from a rate per 1,000 square feet.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The third (3rd) component is representative land uses under the individual land use classifications. These representative land uses are shown in brackets such as (Child Care, Day Care, Private Primary School, Pre-K) after the individual land use classification of Private Education. These representative land uses have similar person travel demand characteristics and functions to the individual land use classification.

The land uses are not exhaustive and are intended to serve as a guide to describe the types of use that would be assessed a mobility fee based on the rate for the individual land use classification. The definition of each individual land use classification provides further detail on the types of representative land uses that would fall under an individual land use classification. These representative land uses are generally consistent with the ITE Trip Generation Manual classification under a given category of land uses and individual land use classifications.

The fourth (4th) component is the Assessment Area. The mobility fee schedule includes a single citywide assessment area. In the future, the City could consider additional assessment areas.

The fifth (5th) component is the Mobility Fee rates per land use classification. The Mobility Fee rates are illustrated for each land use. The Mobility Fee for an individual land use is determined by multiplying the mobility fee rate by the applicable unit of measure.

Residential Land Uses

The Mobility Fee schedule includes a streamlined approach to residential mobility fees that is easy to administer and addresses affordability. The schedule includes a flat residential Mobility Fee rate per square foot for single-family residential uses and multi-family residential uses.

The Mobility Fee is calculated so that a 600 sq. ft. tiny home pays for 600 sq. ft., a 1,600 sq. ft. townhome pays for 1,600 sq. ft., and a 2,000 sq. ft. single-family detached dwelling pays for 2,000 sq. ft. There is a direct correlation between the square footage of a single-family dwelling unit and the Mobility Fee to be paid.

The Mobility Fee for multi-family uses is calculated based on the square footage of the entire building. For a tri-plex or quadraplex, the square footage would primarily be the dwelling units. For apartments and condos, shared common areas such as a lobby or fitness center are included in the square footage of the building. Parking garages or parking structures are not included in the square footage.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The calculation of Mobility Fees per sq. ft. fee is consistent with how the building industry prices permits and is a tool available to the City to address affordability. The assessment of a mobility fee on a per square foot basis for residential uses reflects that as the size of a residential dwelling unit increases, there is a corresponding increase in the number of bedrooms specific to Boynton Beach based on parcel data from the Palm Beach County Property Appraiser **(Appendix S)**.

An analysis of data from the American Community Survey for Boynton Beach illustrates that there is a strong correlation between the number of bedrooms and the number of vehicles per household; this applies equally to owner occupied units and rental units **(Appendix T).** Data from the 2022 National Household Survey illustrates that as the number of vehicles increases, so does household size and vehicle miles of travel per household **(Appendix U).** Thus, similar to the trip generation rates for non-residential land uses, as the size of a dwelling unit increases, so does the number of associated vehicle trips.

Affordable or Workforce Housing

The Mobility Fee schedule does not feature a calculated Mobility Fee rate for affordable or workforce housing. The City of Boynton Beach per Florida Statute Section 163.31801 (11) could elect to waive mobility fees for affordable housing consistent with the requirements of Florida Statute Section 420.9071.

Institutional Uses

The Mobility Fee schedule features three institutional use classifications: (1) community serving; (2) group homes; and (3) private education. Community serving uses include civic uses, museums, performing arts venues, and places of assembly, such as clubs, lodges, and places of worship. Long term care uses include assisted living facilities, congregate care facilities, and nursing homes. Private education uses include day cares, private schools, and Pre-K. Public and charter schools are exempt from mobility fees and impact fees per Florida Statute.

Commercial Recreational Uses

The Mobility Fee schedule includes three commercial recreational use classifications: (1) marina; (2) entertainment, outdoor and; and (3) entertainment, indoor. A marina may include wet berths and dry slips, as well as ancillary maintenance, repair and fueling facilities, and small retail operations. Recreation, retail, and restaurant uses that are accessible and open to the public (i.e., they are not storing a boat) would pay a mobility fee per the applicable rate and unit of measure. Outdoor recreation and entertainment uses consist of uses such as golf courses, tennis courts, and multipurpose recreation facilities, and the mobility fee is based on the number of acres. A separate indoor recreation and entertainment category is included and is based on a rate per sq. ft. for indoor uses such as gyms, health clubs, yoga, and dance studios.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Industrial Uses

The Mobility Fee schedule features two industrial use categories. The industrial category includes general industrial uses such as assembly, manufacturing, and trades. The commercial storage category includes uses such as mini-warehouses, outdoor storage, and warehouses.

Office Uses

The Mobility Fee schedule features two office use categories. The first use is for general office uses such as accounting or real estate. The general office use also includes hospitals and higher education. The second use is medical, such as clinics, dentist, medical doctors, and veterinary. Medical uses generate two to three times the number of trips as a non-medical office use.

Retail Land Uses

The Mobility Fee schedule includes three retail use classifications: (1) retail; (2) high impact retail; and (3) convenience retail. A significant update in the 11th edition of the ITE Trip Generation Manual is the addition of several multi-tenant retail center use classifications. This change prompted the development of a general retail use classification. These uses tend to have similar trip generation characteristics that are generally less than 75 trips per 1,000 square feet.

The second category is high impact retail. These uses tend to have similar trip generation characteristics of roughly 75 to 125 trips per 1,000 square feet and consist of banks, grocery stores, sit down restaurants, and pharmacies. The third category is convenience retail and includes uses such as gas stations and fast-food restaurants. These uses tend to have trip generation rates over 250 trips per 1,000 square feet.

Non-Residential Uses

The Mobility Fee schedule has seven non-residential uses where the mobility fee is based on a unit of measure other than per 1,000 sq. ft. These uses include: (1) auto or boat cleaning; (2) auto charging or fueling; (3) auto or boat repair or service; (4) bank or financial service drive-thru; (5) fast food or quick service drive-thru; (6) overnight lodging; and (7) retail drive-thru.

With the exception of overnight lodging, these land uses reflect higher levels of travel demand that necessitate assessing additive mobility fees. As more land uses downsize, a Mobility Fee based solely on building square footage does not fully capture the travel demand impact of certain high travel demand uses. A Mobility Fee for any retail building would be assessed at the appropriate mobility fee rate. In addition, uses with a bank, pharmacy, or retail drive-thru, quick service restaurant drive-thru, pharmacy drive-thru, car wash, or a commercial auto charging or fueling position would pay additive fees based on the applicable unit of measure.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Non-Residential Use: Overnight Lodging per room

Overnight lodging includes hotels, motels, bed and breakfast, and other transient accommodations. The Mobility Fee for overnight lodging is based on a rate per room. Any square footage leased to third party uses, such as office, retail, or restaurant uses, would pay the applicable rate for those uses.

Non-Residential Use: Fast-Food or Quick Service Restaurant per drive-thru

Fast food restaurant uses have the highest impact of any retail land use and are experiencing a transformation where buildings are getting smaller, while the number of drive-thru lanes and delivery services are increasing. Due to their high travel demand impact, an additive fee has been calculated per fast food drive-thru lane to capture the impact of fast food uses that offer one or more drive-thru lanes.

Some fast food uses are migrating to walk-up ordering, outdoor seating only, with two drive-thru lanes and one delivery pick-up lane, further increasing travel demand. This impact is not captured by simply evaluating the building. The fast food space will continue to evolve to accommodate more vehicles as quickly as can be served.

Non-Residential Use: Banks or Financial Institutions per drive-thru or free-standing ATM

Some financial institutions, especially Credit Unions, are increasing their brick-and-mortar presence to attract additional customers. Other banks are eliminating branches entirely and just offering drive-thru or walk-up free-standing ATMs. For banks with drive-thru lanes, an additional Mobility Fee is assessed per drive-thru lane. A Mobility Fee is also assessed for any free-standing walk-up ATMs or ATMs accessed via drive-thru lanes.

Non-Residential Use: Auto charging or fueling per position

Convenience uses have primarily been uses with motor vehicle fueling. Increasingly superstores, supermarkets, variety stores, and wholesale clubs have started to add vehicle fueling. The additive mobility fees will be assessed to any use that offers commercial vehicle charging and fueling and is accessible to the public or through a membership club.

The mobility fee is assessed per commercial charging station or fueling position. If electric charging is provided as an accessory use, such as at a multi-family residential complex for residents or a retail center for customers and not a commercial or principal use of property, then additive mobility fees would not be assessed for the EV charging stations.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Non-Residential Use: Auto or boat cleaning per lane, stall, bay & per 5 finishing stations

Uses with a car wash shall be required to pay a mobility fee per lane, stall, or bay for the use, plus any mobility fee associated with any building space that are not captured as part of a lane, stall, or bay. The uses would also pay per five (5) finishing stations, such as detailing, drying, vacuuming, or waxing. Any structure solely for maintenance or supply purposes that does not include spaces for personnel would not be required to pay a mobility fee for the structure.

Non-Residential Use: Auto or boat repair or service per bay or stall

Uses with auto or boat repair or services shall be required to pay a mobility fee per bay or stall, plus any mobility fee associated with any building space that are not captured as part of a lane, stall, or bay. These uses would include repair or service, quick lube, tire stores, as well as any accessories or modifications.

Non-Residential Use: Retail drive-thru

Covid ushered in ways for retail uses to still serve customers by bringing orders to their vehicles while stores were closed to customers. These retail uses have started to evolve to include drive-thru lanes to pick-up mobile or online orders. Increasingly grocery stores are starting to include a pharmacy drive-thru lane in newer stores.

Most stand-alone pharmacies provide a drive-thru lane. Further, uses such as dry cleaners have also provided drive-thru and pick-up lanes. As more customers place mobile or order on-line orders, retail uses will continue to accommodate either customers picking up orders from the vehicle or have a third-party service provider pick-up items and deliver them to the customer.

The Remainder of This Page is Intentionally Left Blank

MOBILITY FEE BENEFIT DISTRICT

The benefit test of the dual rational nexus test requires that local governments establish defined areas or districts within which mobility fees collected are earmarked for expenditure. The geographic limits of the proposed Mobility Fee Benefit District include the Mobility Fee Assessment Area, the remainder of the City, and surrounding areas **(Map B).** The extension of a Mobility Fee Benefit District beyond the Assessment Area was done in recognition that travel demand does not start or stop at the limits of the Assessment Area or the City **(Map B)**. The portion of the Benefit District outside City limits is referred to as the extra jurisdictional benefit district.

Having a Mobility Fee Benefit District that extends beyond the Mobility Fee Assessment Area ensures that the City can expend Mobility Fees on Mobility Projects cross enclaves or terminate at logical endpoints. If the limits of the Mobility Fee Benefit District mirrored the Mobility Assessment Area, then Mobility Fees could not be expended to address any extra jurisdictional impacts.

There may be instances that a local match for improvements on County or State Roads would advance a Mobility Plan Project. The Mobility Fee Benefit District provides the City with flexibility to work in partnership with other governmental, non-profit, and private entities to improve mobility within the Mobility Fee Assessment Area and Benefit District.

To advance Mobility Projects and to form public / private partnerships, the City may elect to establish a development specific Mobility Fee Benefit District. A development specific benefit district would accommodate instances where new development advances mobility projects within a defined area. The benefit district could be a tool to collect Mobility Fees from various end users within a development then reimburse the new development that advanced the Mobility Project.

The Benefit District could also include unaffiliated third party development activity within a defined area that would pay its Mobility Fee, and the City would reimburse the development that provided a mobility benefit outside of the limits of its development boundary. Any development specific benefit district would be established through a developer agreement between the City and the development.

The City will be required to establish a Mobility Fee special revenue account to ensure that Mobility Fees are expended within the Benefit District and are appropriately accounted for to address annual State mandated audit requirements for Mobility Fee collections and expenditures. Audit requirements also apply to any other impact fee collected by the City.

PARK ONCE ENVIRONMENTS

The integration of parking into the updated Mobility Plan Projects through the creation of park-once environments is an essential component to addressing existing and future congestion within the City. Creating park-once environments consists of planning for future parking, mobility hubs, and transit circulators at key destinations within the City. Creating park once environments recognizes that people will still sometimes need to drive vehicles. However, the goal is to facilitate parking at a centralized location and then make it convenient and desirable to walk, bicycle, or ride a transit circulator to reach their final destination.

Downtown Parking Structure

The updated Mobility Plan Projects include the construction of a 500 space publicly accessible parking structure within Downtown. The proposed parking structure would be connected to mobility hubs, identified on the Transit Plan, and key destinations throughout the City through future transit circulators and water taxi routes **(Map F)**.

A potential location for the parking structure is on City property, near City Hall, along NE 1st Street. The parking structure could also be located adjacent to a future rail station along the FEC railroad between Boynton Beach Blvd and Ocean Avenue. If the parking structure were to be co-located with the future rail station, there would likely be a need for an additional 175 to 225 spaces for those using future rail service.

Downtown Mobility Plan Projects

The construction of a publicly accessible parking structure within Downtown would provide the City with greater flexibility to construct curbless shared streets and walking and streetscape enhancements identified in the Streets Plan **(Map D)**. The majority of streets within Downtown have Mobility Projects that are either identified on the Streets Plan or the Multimodal Plan. During construction of various Mobility Projects, existing on-street parking may be unavailable. The construction of a parking structure would provide parking that may be temporarily unavailable during construction of Mobility Projects.

With the introduction of curbless shared streets, available on-street parking is likely to be reduced on Ocean Avenue and other corridors. West Palm Beach found that, along Clematis Street and Rosemary Avenue curbless shared streets identified in the City's Mobility Plan, on-street parking spaces are best used for pick-up and drop-off, loading zones, and valet. The City of West Palm also utilizes on-street parking spaces provided on curbless shared streets as vendor spaces when the streets are closed off to traffic for special events.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The construction of a parking structure within Downtown could also be used for the staging of future transit circulators included in the Transit Plan. These circulators will vary in size, with some being 15 to 25 passenger vehicles, and others being smaller low speed vehicles that can accommodate anywhere from three (3) to eight (8) passengers. These transit circulators are proposed to connect with mobility hubs located at destinations within the City, including the existing TRI-Rail Station.

Development Parking Inventory

An inventory of parking demand and parking to be provided by developments within Downtown was undertaken based on recently constructed development. These developments have either recently been constructed, are in various stages of site plan review, or has recently received site plan (Planning and Zoning) approval. There are 3,222 residential dwelling units, with some ancillary retail and office uses, that have either recently been constructed or that are in various stages of site plan review **(Appendix V)**.

A total of 6,936 parking spaces are needed, based on current City requirements, to accommodate this development. A total of 6,889 parking spaces have been proposed, of which 6,121 would be standard parking spaces **(Appendix W).** A total of 115 of the planned spaces are reserved for mobility impaired individuals as required through the American With Disabilities (ADA) Act. A total of 198 parking spaces would be compact spaces, with another 134 spaces designed for tandem parking associated with planned townhome developments **(Appendix W).**

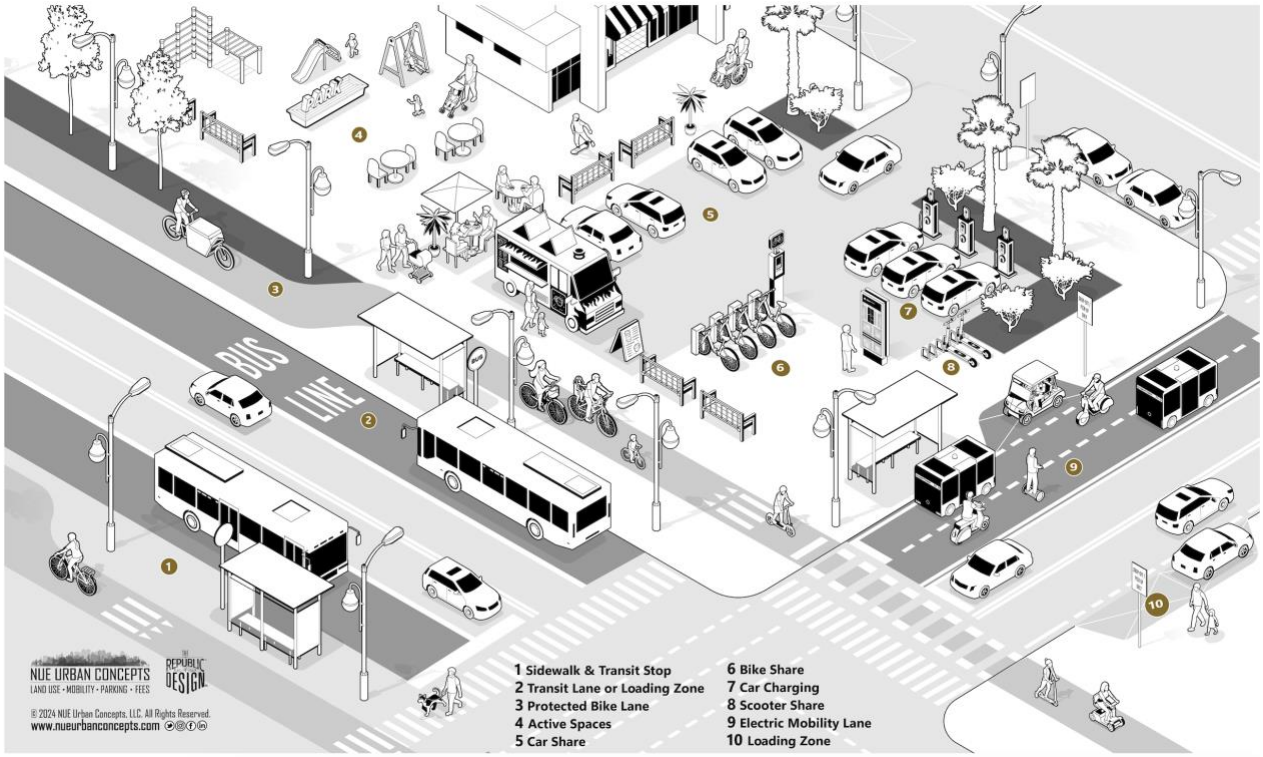
The proposed parking spaces to be provided by development include 162 parallel on-street parking spaces and 159 spaces either reserved for electric vehicles, motorcycles, or some form of on-street parking **(Appendix W).** The City of Boynton Beach Community Redevelopment Agency (CRA) has contracts to lease a total of 473 of the parking spaces to be provided. The spaces being leased by the CRA are not in addition to required parking spaces, they are part of the required number of spaces.

Mobility Hubs

The Transit Plan identifies ten (10) potential mobility hubs at major destinations in the City. The mobility hubs are proposed to be interconnected by proposed transit circulators. Mobility hubs are locations where multiple ways (modes) to travel (walk, bike, transit) converge at a safe and convenient location, and feature various levels of amenities (e.g., covered waiting areas, pick-up / drop-off lanes). These allow a person to easily switch modes of travel to reach their destination as illustrated in **Figure 20**. The mobility hubs could be located within mixed-use developments, existing developments, governmental properties, institutional uses, and various destinations through-out the City. As part of the City's update of the Complete Streets Mobility Plan, mobility hubs will be further refined and incorporated into the Plan.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Figure 20. Mobility Hub



The Downtown mobility hub would be integrated into a future parking structure. There is an existing parking structure at the NW corner of US 1 and Woolbright Road that could include mobility hub elements. There are existing surface parking lots that could be repurposed for potential mobility hubs at the Boynton Beach Mall and the TRI-Rail Station. Additional mobility hubs are proposed in the vicinity of US 1 and Gateway Blvd, MLK Jr. Blvd and Seacrest, Bethesda Baptist Memorial Hospital, SW 8th and Woolbright, and within the Renaissance Commons development. These mobility hubs are all proposed to be connected by transit circulators identified in the Transit Plan **(Map F).** The final location of mobility hubs is subject to further evaluation and negotiations or partnerships with property owners and maybe further refined as part of the Complete Streets Mobility Plan update.

One Size Does Not Fit All

The design of mobility hubs can vary based upon need and projected demand. The mobility hubs identified on the Transit Plan are intended to be larger community serving facilities with various levels of amenities as illustrated in **Figure 20.** However, mobility hubs can also be enhanced transit stops, school bus stops, or pick-up and drop-off locations integrated into existing and proposed developments. Smaller mobility hubs likely would not feature surface or structured parking, but could still include covered waiting areas, pick-up and drop-off locations and may provide access to bicycle or scooter share programs **(Figure 21)**. The City could integrate these into their land development regulations for larger developments or offer reductions in parking where mobility hubs are provided.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Figure 21. Smaller Mobility Hub

Water Taxis

Part of creating park once environments is looking for creative ways to move people without the need to drive their vehicle. The Transit Plan includes future water taxi routes and ADA accessible docks along the intracoastal that could provide additional mobility options. The water taxis could also be combined with transit circulators and mobility hubs to improve access to existing TRI-Rail service and future rail service along the FEC railroad in Downtown. Water taxi service at this present time would likely not be successful without either greater densities downtown or future rail service to serve as a draw to residents along the intracoastal. The Transit Plan has identified ten (10) potential water taxi stop along the intracoastal water taxi route **(Map F)**. Stop locations are subject to change.

Resiliency

Coastal communities throughout Florida increasingly are dealing with flooding of low lying areas during storm events. As these storm events intensify and flooding becomes more frequent, there will be an increased need to reduce surface parking areas and incorporate more resilient stormwater management features within existing rights-of-way.

Further, residents will need a safe place to park their vehicles during storm events to avoid damage from flooding. A number of coastal communities have started to make their parking structures available to its residents to park their vehicles and provide a higher level of protection than otherwise may be available by leaving their vehicles parked on-street or on their property.

Many communities will need to start designing and requiring that new or reconstructed buildings and structures are designed to withstand ground level flooding. The construction of new parking structure(s) can be designed to address periodic flooding on the first level. These parking structures should also incorporate appropriate safety and structural measures to address both access and the need for innovative ways to park vehicles during storm events.

Transitioning to park once environments not only enhance mobility within the City, but it is also part of the overall strategy to making coastal communities more resilient. The continued addition of impervious surfaces through wider roadways and off-street surface parking will only exacerbate flooding during storm events. Requiring new development to meet tougher stormwater design standards is part of the solution. However, many communities are dealing with the reality that existing developments approved over the last 50 years were not designed to today's standards and many of these areas are experiencing flooding for the first time.

Public Private Partnerships

The creation of park once environments provide the opportunity for public private partnerships with existing or proposed developments. The City can work with these developments to repurpose existing surface parking areas to construct mobility hubs that will improve multimodal access to the development and could potentially allow for adjacent infill development. The City can also work with private development or other government entities to consider:

1) adding additional public spaces to parking structures;

2) allowing for further reductions in parking requirements where a mobility hub is constructed; or

3) requiring these entities to lay the groundwork for park once environments.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Infill & Redevelopment

Establishing park once environments with and without parking structures provides the opportunity to encourage infill and redevelopment by reducing the need to provide off-street surface parking. Infill and redevelopment can either be given a parking reduction for providing mobility hubs or be allowed to meet or offset parking requirements where parking structures are constructed.

Reducing off-street surface parking areas also reduces the need for multiple curb cuts that introduce conflicts between people parking and people walking and bicycling. It also reduces impervious surfaces, allowing for more opportunities to introduce open spaces, stormwater management facilities, or more efficient use of private property.

The City could explore opportunities to incorporate or promote attainable and workforce housing within mobility hubs and parking structures through innovative designs. Future residents would have access to enhanced mobility and where property is owned by governmental entities, the potential for reducing the cost basis of land could make attainable and workforce housing more economically viable. Creating park once environments and enhancing mobility options are effective tools to implement Comprehensive Plan policies 6.2.6 and 6.3.1.

Complete Streets Mobility Plan Update

The further establishment and refinement of park once environments are something that the City could further explore as part of the update of the Complete Streets Plan. Parking is a major component of a City's overall transportation system. It has too often been something that is addressed separately through land development regulations. In reality, it is something that should be addressed in conjunction with mobility planning as it has a major impact on the type and amount of traffic drawn to a given land use and area. Parking requirements also have a major impact on land uses, building design, site layouts, stormwater, and accessibility.

The level of density, the compactness of a given area, the availability of transit through buses, circulators, and rail, and the feasibility of walking and bicycling that need to be present to allow someone the ability not to drive or have access to a vehicle only occurs in limited instances through-out Florida in places such as Miami Beach or Gainesville. However, even in those places, vehicles still provide a primary means of mobility and access. The establishment of park once environments is a recognition that people still drive vehicles, but once they reach a given destination, the availability of other mobility options allows them the choice to get around in ways other than driving. Park once environments are a bridge towards less reliance on vehicles as a primary means of mobility.

ORIGIN & DESTINATION EVALUATION

An origin and destination evaluation was conducted to evaluate travel within the Mobility Study Area and travel to and from each of the Palm Beach County road impact fee zones. The evaluation was performed for the AM and PM peak hours, based on projected 2045 land uses. The origin and destination evaluation conducted used the most recent version of the Southeast Florida Regional Planning Model (SEFPM 8.541) used for the 2045 Long Range Transportation Plan.

The traffic analysis zones (TAZs) from the SEFPM were assigned to each of the five (5) Palm Beach County road impact fee zones **(Map H)**. For internal testing purposes, road impact fee zones 1, 2, 4 and 5 were divided into districts east and west of Interstate 95. The Mobility Study Area was separated into six (6) districts for internal evaluation purposes **(Map I)**.

A future expansion zone for the areas of Boynton Beach not within the Mobility Study Area and surrounding areas bounded by Hypoluxo to the north, the Mobility Study Area to the east, the boundary with Delray Beach to the south, and Military Trail to the west. For final summary purposes, the expansion zone was assigned to road impact fee zone 4 and each of the County road impact fee TAZs were aggregated into their respective County road impact fee zones.

For reasons not specified, Boynton Beach south of SE / SW 23rd Avenue is within County road impact fee zone 5. The Mobility Study Area for Boynton Beach is based on the Mobility Study Area and does not split the City at SE / SW 23rd Avenue. For purposes of the origin and destination evaluation, the Mobility Study Area is evaluated based on its own district boundaries, not the County road impact fee zones.

The County's road impact fee zones were chosen due to the legal requirement that impact fees be expended within the zone or district in which they were collected. The vast majority of the Mobility Study Area is within road impact fee zone 4; with the very southern portion of the Mobility Study Area within road impact fee zone 5 **(Map I)**.

The origin and destination evaluation was conducted for the AM and PM peak hours, based on 2045 conditions, to determine flow patterns into and out of the County's road impact fee zones and the Mobility Study Area **(Appendix X)**. For the AM Peak hours, trips leaving the Mobility Study Area represents the impacts to the County from development in the Mobility Study Area. During the AM peak hours there are also trips that travel to and from areas internal to the Mobility Study Area that do not have an external impact.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

During the AM peak hours, trips from the Mobility Study Area (origin) to each of the County's road impact fee zones (destination) represents the future trip impact attributable to development within the Mobility Study Area **(Table 10)**. AM peak hours trips from the County's road impact fee zones to the Mobility Study Area represent trips impacts from the County and surrounding municipalities within the Mobility Study Area **(Appendix X)**.

TABLE 10. AM PEAK HOURS TRIPS (2045)

Origin to Destination	Trips	Trip Percentage
From Mobility Study Area to Road Impact Fee Zone 1	1,218	1.4%
From Mobility Study Area to Road Impact Fee Zone 2	4,590	5.4%
From Mobility Study Area to Road Impact Fee Zone 3	866	1.0%
From Mobility Study Area to Road Impact Fee Zone 4	6,916	8.2%
From Mobility Study Area to Road Impact Fee Zone 5	6,923	8.2%
All trips in Mobility Study Area	64,313	75.8%
Total	84,825	100%

Source: **Appendix X** includes more detailed results for this Origin and Destination evaluation. The origin and trip destination data are based on internal trips within the Mobility Study Area and trips from the Mobility Study Area to County road impact fee zones **(Map H)**. Mobility Study Area Districts and road impact fee are aggregations of traffic analysis zones (TAZs) from the Southeast Florida Regional Planning Model (SEFRPM 8.541). All trips in the Mobility Study Area includes internal trips, trips attributable to the Mobility Study Area and trips attributable from the County and surrounding municipalities.

The projected AM Peak Hours impact of trips from the Mobility Study Area to the County's road impact fee zones represents 24.2% of the trips, with the impact of all trips within the Mobility Study Area representing 75.8% of the trips **(Table 10)**. The impact internal to the Mobility Study Area is more than 300% greater than the impact from the Mobility Study Area to the County's five (5) road impact fee zones.

The attributable impact from development within the Mobility Study Area within County road impact fee zone 4, outside of the Mobility Study Area, is just 8.2% of trips during AM peak hours **(Table 10)**. The majority of road impact fees currently collected from development in the Mobility Study Area are required to primarily be expended within road impact fee zone 4, while road impact fees currently collected from development from the southern portions of the Mobility Study Area are required to be expended within road impact fee zone 5.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The impacts from the PM peak hours are opposite from the AM peak hours. For the PM Peak hours, trips entering the Mobility Study Area represent the impacts to the County from development in the Mobility Study Area **(Appendix X)**. During the PM peak hours there are also trips that travel to and from areas internal to the Mobility Study Area that do not have an external impact.

During the PM peak hours, trips from the Mobility Study Area (origin) to each of the County's road impact fee zones (destination) represents the future trip impacts from the County and surrounding municipalities within the Mobility Study Area **(Table 11)**. PM peak hour trips from the County's road impact fee zones to the Mobility Study Area represent trips impacts attributable to development within the Mobility Study Area **(Appendix X)**.

TABLE 11. PM PEAK HOUR TRIPS (2045)

Origin to Destination	Trips	Trip Percentage
From Road Impact Fee Zone 1 to Mobility Study Area	1,885	0.9%
From Road Impact Fee Zone 2 to Mobility Study Area	9,343	4.7%
From Road Impact Fee Zone 3 to Mobility Study Area	1,582	0.8%
From Road Impact Fee Zone 4 to Mobility Study Area	16,288	8.1%
From Road Impact Fee Zone 5 to Mobility Study Area	15,717	7.8%
All trips in Mobility Study Area	155,987	77.7%
Total	200,802	100%

Source: **Appendix X** includes more detailed results for this Origin and Destination evaluation. The origin and trip destination data are based on internal trips within Mobility Study Area and trips from the County road impact fee zones to the Mobility Study Area **(Map H)**. Mobility Study Area Districts and road impact fee are aggregations of traffic analysis zones (TAZs) from the Southeast Florida Regional Planning Model (SEFRPM 8.541). All trips in Mobility Study Area includes internal trips, trips attributable to the Mobility Study Area and trips attributable from the County and surrounding municipalities.

The projected PM Peak Hours impact of trips from the County's road impact fee zones to the Mobility Study Area represents 22.3% of the trips, with the impact of all trips within the Mobility Study Area representing 77.7% of the trips **(Table 11)**. The impact within the Mobility Study Area is more than 300% greater than the impact from the Mobility Study Area to the County's road impact fee zones. The attributable impact from development within the Mobility Study Area within County road impact fee zone 4, outside of the Mobility Study Area, is just 8.1% of trips during PM peak hours **(Table 11)**. Even though the projected trips during the PM peak hours are more than 200% higher than the AM peak hours, the external impact attributable to development within the Mobility Study Area during the PM peak hours is 2% less than the AM peak hours.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The origin and destination evaluation was undertaken to determine the share of external impact attributable to future development within the Mobility Study Area and the share of impact within the Mobility Study Area from development within the County and surrounding municipalities. While there is some external impact attributable to future development within the Mobility Study Area by 2045, the majority of impact from future trips from the County and the City has the most significant impact within the Mobility Study Area, not unincorporated Palm Beach County or within County road impact fee zones 4 and 5.

Further, the projected impact from development within the County and surrounding municipalities on travel within the Mobility Study Area is projected to be greater than the external impact attributable to future development within the Mobility Study Area. Thus, it could be reasonably interpolated, from the origin and destination evaluation, that at a bare minimum the external impact from the Mobility Study Area and impact from the County and surrounding municipalities within the Mobility Study Area cancel each other out. The origin and destination evaluation illustrates that the impacts from future development in the County into the City are greater than the impacts from future development in the City into the County.

The Remainder of This Page is Intentionally Left Blank

MOBILITY FEE COMPARISON

A comparison between the City of Boynton Beach Mobility Fee and the existing Palm Beach County road impact fee has been prepared **(Appendix Y).** While the comparison is a useful metric, the City Mobility Fee and County road impact fee: (1) use very different methodologies; (2) were calculated by different consultants; and (3) were prepared at different times. The land uses listed in the City and County fee schedule are not the same. Therefore, a best fit analysis was used to allow for the comparison. The County's road impact fee is based on rates from their 2022 road impact fee study. The City Mobility Fee is based on the most recent and localized data as of 2024. The County provides 49 different impact fee rates. The Mobility Fee schedule is more streamlined with a total of 23 rates.

The County road impact fee uses a consumption-based methodology based on an adopted level of service standard, rather than specific road projects that the County intends to construct. The Boynton Beach Mobility Fee uses a plan-based methodology where the Mobility Fee is based on the cost to construct specific Mobility Projects. The County's road impact fee uses vehicle miles of travel and trip lengths to determine its road impact fee based on studies completed in the 1990's and 2000's. The City Mobility Fee uses person miles of travel, person miles of capacity, person travel demand, and trip lengths based on the 2022 National Household Travel Survey (NHTS). The land uses and units of measure also differ when comparing the County road impact fee and the City's Mobility Fee.

The City's Mobility Fee for residential land uses is based on the habitable square footage for single-family residential uses and total square footage under roof for multi-family residential uses. The Palm Beach County road impact fee for residential land uses is calculated per dwelling unit, regardless of the square footage. On a per 1,000 sq. ft. basis, the Boynton Beach Mobility Fee is lower than the County road impact fee per dwelling unit. However, the Mobility Fee for a 2,000 square foot single-family detached residential dwelling results in a slightly higher fee than the County's road impact fee for the same dwelling **(Appendix Y)**. Likewise, the Mobility Fee for a multi-family residential development / building will be similar to the County when considering total square footage.

The City's Mobility Fee is higher than the County road impact fee for all land uses, with the exception of day care and convenience retail. Day care is different due to the City's Mobility Fee for private education including both day care and private (K-12) schools per 1,000 square feet. The County road impact fee includes a fee per student for private schools and a fee per 1,000 square feet for day care. Public and Charter Schools are Statutorily exempt from impact fees or mobility fees. The Mobility Fee for convenience retail, which includes convenience stores with and without fueling and fast food, is slightly lower. This is due to the City Mobility Fee being higher per fueling position than the County road impact fee and the City Mobility Fee including a separate mobility for drive-thru lanes.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

UPDATED MOBILITY PLAN PROJECTS ON COUNTY ROADS

The updated Mobility Plan Projects includes projects on City, County, and State Roads. The share of the cost of Mobility Projects on County Roads in relation to the overall cost of the updated Mobility Plan Projects is the primary way to determine what share of Mobility Fees should be set aside for the funding of Mobility Projects on County Roads.

Since the Mobility Fee is based on the updated Mobility Plan Projects, versus utilizing the Origin and Destination evaluation or looking at existing traffic flows, setting aside a percentage of the Mobility Fee based on the share of Mobility Projects on County Roads is an alternative approach to develop an interlocal agreement with the County to address transportation mitigation.

The updated Mobility Plan Projects includes projects to improve existing streets and multimodal facilities within the Mobility Study Area. The updated Mobility Plan Projects also includes transit circulators that connect with proposed mobility hubs through-out the City. These mobility hubs are proposed within existing or future developments, not within existing rights-of-way. The transit circulators would primarily run along City streets and State Roads. The transit circulators would be funded through various sources.

The Streets Plan includes widening portions of SE / SW 23rd Avenue (between US 1 and SW 4th) and Miner Road (between Congress Ave and High Ridge Road) from two (2) lane undivided roads to two (2) lane divided roads **(Map D).** There are also proposed walking and streetscape enhancements along Woolbright Road from US 1 to SW 2nd Street.

The proposed multimodal facilities, such as bike lanes, pathways, and sidewalks, within the Mobility Study Area are primarily planned along City Streets as a part of a planned network of multimodal corridors **(Map E)**. For connectivity to schools, parks, and other multimodal corridors, there are portions of County Roads where multimodal facilities are proposed.

The Multimodal Corridos Plan includes multimodal improvements along portions of: (1) Miner Road east of I-95 to connect Rolling Greens Elementary to the proposed Principal Multimodal Corridor East; (2) Miner Road west of I-95 to connect Congress Ave to the proposed Principal Multimodal Corridor West; (3) Seacrest Blvd and SW 23rd Avenue as part of the Principal Multimodal Corridor East; and (4) High Ridge Road as part of the Principal Multimodal Corridor West **(Map E).**

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The analysis in **Table 12** shows that Mobility Projects on County Roads are **5.63%** of the overall mileage of the updated Mobility Plan Projects. The Planning Level Cost (PLC) for Mobility Projects on County Roads is **10.45%** of the overall cost of the updated Mobility Plan Projects. The total cost for updated Mobility Plan Projects on County Roads is **$28,432,500**; while the total cost of all the updated Mobility Plan Projects is estimated at **$271,969,256 (Table 12)**. The greatest need within the Mobility Study Area is to enhance mobility through Mobility Projects on City Streets.

TABLE 12. UPDATED MOBILITY PROJECTS ON COUNTY ROADS

Mobility Plan Project	Length (Miles)		Planning Level Cost (PLC)	
Miner Road (Seacrest to Summit Rd) Minor Multimodal Corridor (East)	0.40	0.42%	$800,000	0.29%
Seacrest Blvd (NE 14th Ave to Palmetto Green Trail) Principal Multimodal Corridor (East)	0.11	0.12%	$440,000	0.16%
SW 23rd Avenue (SW 3rd Street to SW 5th Street) Principal Multimodal Corridor (East)	0.20	0.21%	$400,000	0.15%

DEFINITIONS

Access Improvements mean on-site improvements required to provide motor vehicle and multimodal ingress and egress to new development, which may include rights-of-way, easements, paving of adjacent or connecting roadways, turn lanes, sidewalks, bike lanes, shared-use paths, transit stops, mobility hubs, along with traffic control devices, roundabouts, traffic signals, mid-block crossings, mid-block signals, signage, markings, drainage, and utilities intended to serve the development activity.

Additive Fee means a mobility fee rate based on a unit of measure that generates high levels of person travel demand per unit such as service bays, car wash stalls, or fueling for motor vehicles or drive-thru lanes for banks, quick service restaurants, and pharmacies. Additive mobility fees per unit of measure are assessed in addition to mobility fees assessed per use based on square footage or the applicable unit of measure for the use.

Amenities and Ancillary Uses means buildings, structures, and lands that are not open to the public and are not a commercial use such as a clubhouse, meeting spaces, laundry facilities, guard houses, fields, courts, indoor or outdoor recreation uses, garages, parking structures, barns, sheds, landscape maintenance facilities that do not generate additional person travel demand. These amenities are generally associated with residential developments and overnight lodging. These uses are not assessed a mobility fee unless they are open to the public and charge for use either through cash or electronic payment or through membership or club dues.

Assessment Area means a geographic area of the City or a specific development pattern where Mobility Fees are assessed on new development.

Auto means a car, SUV, truck, van, or motorcycle that is either electric powered, gasoline powered, a hybrid, or some other fuel source that propels the automobile (aka motor vehicle).

Auto, Boat, Car Wash shall mean a building, stalls, stations, or tunnels for the cleaning, detailing, polishing, washing, or waxing of motor vehicles or boats which fall under the description of ITE Trip Generation Manual Land Use Code Series 800 and 900. This use includes full-service, partial service, and self-service uses. The unit of measure shall be the number of bays or stalls for self-service cleaning, and the number of approach lanes for automated, semi-automated, or tunnel washes where payment is rendered or a card, code, or other means is used to access the cleaning service. For uses with automated, semi-automated, or tunnels, finishing stations for detailing, drying, or vacuuming Mobility Fees shall also be assessed at a rate of one (1) station per every five (5) finishing stations. For uses with self-service bays or stalls, which typically feature a greater number of facilities than automated or semi-automated facilities, finishing stations for detailing, drying, or vacuuming, Mobility Fees shall also be assessed at a rate of one (1) station per every ten (10) finishing stations.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Auto Charging or Fueling means the total number of vehicles that can be charged or fueled at one time (fueling positions). Increasingly, land uses such as superstores, (i.e., super Wal-Mart), variety stores, (i.e., Dollar General), and wholesale clubs (i.e., Costco) are also offering vehicle charging and fueling with or without small convenience stores. Outside of Florida, several grocery store chains are also starting to sell fuel. Free standing vehicle charging stations that charge a fee for use and are not a requirement of the City as an ancillary use of a development shall be required to pay a mobility fee. The mobility fee rate per charging or fueling position would be in addition to any mobility fee per square foot under the applicable retail land use with vehicle charging or fueling. Motor vehicle charging stations that are not a primary use or function of a commercial or retail use and are either required by the City or provided as an ancillary use are exempt from payment of the mobility fee. The City shall have the ability to determine if a charging or fueling station is a commercial use.

Auto, Boat Repair or Service shall mean a building, bays, service bays, stalls, or stations for the routine maintenance of motor vehicles including oil changes, cleaning, or replacing filters, replacing windshield wipers, changing tires, providing for maintenance, service, and repair, and changing and topping off vehicle fluids and falls under the description of ITE Trip Generation Manual Land Use Code Series 800 and 900. Any building square footage associated with motor vehicle service would fall under retail uses and pay the applicable mobility fee per the square footage of the building not associated with the quick lube service.

Bank or Financial Service Drive-Thru or Free-Standing ATM means any bank, financial institution, credit union, with a drive-thru lane used for banking purposes such as deposits, withdrawals, balance inquires, or bill pay. The drive-thru may include either a teller window, pneumatic device for transferring banking information or funds, or an Automated Teller Machine (ATM). An ATM inside or attached to a building that has a use open to the public or end user is not assessed a separate fee as a stand-alone ATM. This use also includes free standing bank drive-thru lanes and freestanding walk-up or drive-thru ATM machines. The fee shall be based upon the total number of drive-thru lanes with a banking window, pneumatic device, or ATM and/or the total number of free-standing ATM's. Free-standing ATM's may be either walk-up or feature drive-thru lanes.

Benefit District means areas a geographic area of the City where mobility fees paid by new development are expended on Mobility Projects.

Capacity means the maximum sustainable flow rate, at a service standard, at which persons or vehicles can reasonably be expected to traverse a point or a uniform section of a bicycle facility, pedestrian facility, roadway, or shared-use multimodal facility during a given time-period under prevailing conditions. For transit, the capacity is the maximum number of persons reasonably accommodated riding a transit vehicle, along with the frequency and duration of transit service.

Commercial Recreation Uses shall mean those indoor and outdoor recreation and entertainment activities which provide for the use of buildings, property, or structures for recreational and entertainment uses, and which include those uses specified in the ITE Trip Generation Manual under Land Use Code Series 400.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Community Serving means those uses that are operated by non-profit civic organizations, governmental entities, foundations, or fraternal organizations, including places of assembly. Community serving also includes uses such as YMCA, museum, art studio, gallery, cultural center, community meeting spaces, community theater, library, or a fraternal or masonic lodge or club, or any community and civic based uses that do not sell retail goods or services for profit and that participates in community and public activities. Food, beverages, goods, and services may be offered for ancillary fundraising and sales to support the community serving use.

Commercial storage means facilities or acreage in which one or more warehouses, storage units or vaults are rented for the storage of goods and/or acreage or is providing for the storage of boats, RVs, vehicle trailers and other physical items that are larger than what is typically stored within an enclosed structure. The acreage for outdoor storage, excluding drive aisles, buffers, and stormwater management areas, shall be converted to square footage for purposes of calculating the fee. This shall not include an individual's personal property where such items are stored by the owner of the land and not for commercial purposes, subject to City regulations.

Convenience Retail shall mean a use that sell convenience beverages, food, goods, products, and fuel. Uses include convenience stores, gas stations, fast food, and quick service restaurants with and without drive-thru lanes. Convenience retail uses fall under ITE Land Use Code Series 800 and 900 and include retail uses that generate 250 or more trips per 1,000 square feet or similar trips per an equivalent unit of measure.

Development shall mean any new residential and non-residential construction, or expansion of building(s), lane(s), structure(s), or any changes in the use of any building(s), structure(s), or land use that will generate additional impact on the city’s public facilities.

Entertainment, Indoor means facilities that primarily focus on individual or group fitness, exercise, training or provide recreational activities. The uses typically provide exercise, dance or cheerleading classes, weightlifting, yoga, Pilates, cross-fit training, fitness, and gymnastics equipment. Indoor commercial recreation also includes uses such as bowling, pool, darts, arcades, video games, batting cages, trampolines, laser tag, bounce houses, skating, climbing walls, and performance centers. Food, beverages, equipment, and services may be offered for ancillary sales.

Entertainment, Outdoor means outdoor recreational activity including land uses with miniature golf, batting cages, video arcade, bumper boats, go-carts, golf driving ranges, tennis, racquet or basketball courts, soccer, baseball and softball fields, paintball, skating, cycling or biking that require paid admittance, membership or some other type of fee for use. Buildings for refreshments, bathrooms, changing and retail may be included. The fee shall be based upon the total acreage of the facility for active uses outside of buildings and all buildings used to carry out a primary function of the land use activity. Areas for parking, buffers and stormwater that are not active features of the land use are excluded from the fee acreage. The use would generally fall under the ITE Land Use Code Series 400.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Fast Food or Quick Service Drive-Thru means a quick service restaurant where an order for food is placed or a pick-up/delivery lane where an order is picked-up by either a customer that placed an online order or a delivery service. Fast Food restaurants are establishments serving beverages, food, or both with higher turnover, quick service, and may feature either counter service or selection of items from a counter and would fall under the descriptions of ITE Trip Generation Manual Land Use Codes 930, 933, 934, 935, 936, 937, and 938. The vehicle will proceed to one or more common pick-up windows, lockers, stations, or functional equivalent after the order has been placed. A fast food restaurant with drive-thru may be located in multi-tenant retail or free-standing retail buildings. This use also includes any quick service restaurants that do not offer indoor seating and are intended to primarily be served by vehicle delivery services, or pick-up or drive-thru only orders placed online. These uses may provide a walk-up order window.

Group Home means communities designed for long term care of on-site residents, such as assisted living facilities, congregate care facilities and nursing homes, with common dining and on-site health facilities for residents that is not a general retail or commercial use open to the public. This use includes ITE Trip Generation Manual Land Use Codes 253, 254, 255, and 620.

High Impact Retail shall mean grocery stores, supermarkets, superstores, variety stores, package stores, liquor, or alcohol for off-site consumption, where 50% or more of the gross square footage of the use is for the sale of edible or drinkable goods. These uses may offer other goods, products, and services such as on-site consumption of food or beverages, pharmacies, cleaning and household supplies, pharmacies, and other personal services. High Impact Retail uses also include banks, credit unions, sit-down restaurants, and pharmacies. These uses generally generate between 75 and 250 daily trips per 1,000 sq. ft.

Impact shall mean any new development that results in an increase in person travel demand above the demand generated by the existing use of property.

Industrial means uses that typically have ancillary office space and may have display or merchandise display areas for various trades and industries that are not open to the general public. Industrial uses are also located in land uses and zoning districts intended for industrial uses.

Industrial Uses means those activities which are predominantly engaged in the assembly, distribution, fabrication, finishing, packaging, processing, production, storage, and/or warehousing of goods and products and which include those uses specified in the ITE Trip Generation Manual under Land Use Code Series 000 and 100 but excluding governmental uses.

Institutional Uses means those public or quasi-public uses that serve one or more community's social, educational, health, cultural, and religious needs and which include those uses specified in the ITE Trip Generation Manual under the Land Use Code Series 500, and includes Land Use Codes 253, 254, 255, and 620. Land Use Codes 540 and 550 are included in office uses and 580 and 590 falls under community serving. Federal, state, and local government institutional uses, except for community development districts, are exempt from payment of mobility fees.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

ITE Trip Generation Manual means and refers to the latest edition of the report entitled "Trip Generation" produced by the Institute of Transportation Engineers (ITE), and any official updates hereto.

Level of Service (LOS) means a quantitative stratification of the level of service provided to a facility, roadway, or service stratified into six letter grade levels, with "A" describing the highest level and "F" describing the lowest level; a discrete stratification of a level of service continuum.

Marina shall mean facilities that provide docks, slips and berths for boats, including yacht clubs. Any buildings for shops, retail, or restaurants accessible to the public would fall under retail land use and pay the mobility fee rate for retail uses. The mobility fee is assessed per wet berth and per ten dry slips. Maintenance, repair, service, or sales of goods associated with the marina and for the storage or launch of boats from the marina would be considered accessory and not assessed a mobility fee.

Medical Office means a building or buildings that provide medical, dental, or veterinary services and care. Medical office shall also include any clinics, emergency care uses, and any uses specified in the ITE Trip Generation Manual under Land Use Code Series 600, including Land Use Code 720. Land Use Code 620 is included under Long Term Care land uses.

Micromobility means electric powered personal mobility devices such as electric bicycles, electric scooters, hoverboards, One-Wheel, Unicycle, electric skateboards, and other electric assisted personal mobility devices. Low speed vehicles such as golf carts or mopeds are not considered personal micromobility devices.

Mobile Residence means land uses for the temporary or permanent placement of RVs, tiny homes on wheels, mobile homes, or travel trailers within parks or multi-unit developments with predefined lots or spaces that have connections for communications, electric, water and wastewater. Mobile residential parks may have common amenities and building with recreation uses, laundry and park office that are not assessed a Mobility Fee.

Mobility means the ability to move people and goods from an origin to a destination by multiple modes of travel in a timely (speed) manner.

Mobility Fee means a monetary exaction imposed on new development to fund Mobility Plan projects identified in the most recently adopted Mobility Plan.

Mobility Fee Expenses means expenditures for: (a) the repayment of principal and interest or any redemption premium for loans, advances, bonds, bond anticipation notes, and any other form of indebtedness then outstanding consistent with statutory allowances and used to advance mobility projects identified in the Mobility Plan; (b) reasonable administrative and overhead expenses necessary or incidental to expanding and improving mobility projects; (c) crosswalks, traffic control and crossing warning devices, landscape, trees, multimodal way finding, irrigation, hardscape, and lighting related to projects; (d) micromobility devices, microtransit vehicles, programs and services,

© 2025 NUE Urban Concepts, LLC. All rights reserved.

(e) mobility hubs, transit circulators, facilities, programs, shuttles, services and vehicles; (f) reasonable expenses for engineering studies, stormwater reports, soil borings, tests, surveys, construction plans, and legal and other professional advice or financial analysis relating to projects; (g) the acquisition of right-of-way and easements for the improvements, including the costs incurred in connection with the exercise of eminent domain; (h) the clearance and preparation of any site, including the demolition of structures on the site and relocation of utilities; (i) floodplain compensation, wetland mitigation and stormwater management facilities; (j) all expenses incidental to or connected with the issuance, sale, redemption, retirement, or purchase of bonds, bond anticipation notes, or other forms of indebtedness, including funding of any reserve, redemption, or other fund or account provided for in the ordinance or resolution authorizing such bonds, notes, or other form of indebtedness consistent with statutory allowances and used to advance mobility projects identified in the Mobility Plan; (k) reasonable costs of planning, design, engineering, and construction, including mobilization, maintenance of traffic during construction and CEI (construction engineering and inspection) services of mobility projects, (l) city administration, implementation updates to the mobility plan and mobility fee, including any analysis, assessments, counts, data collection, plans, programs or studies needed for mobility projects, (m), local match for federal, state and county funded projects.

Mobility Fee Off-Set means the equivalent amount of a mobility fee associated with an existing use of a building that is being redeveloped or where a change of occupancy or use is requested. The equivalent mobility fee shall be based on the current use of the building, or the most recent use of the building for a vacant building. Upon demolition of a building, offsets shall be available for up to five years from the date of demolition, unless otherwise provided for in a written agreement with the City or specified in an implementing ordinance.

Mobility Fee Schedule means the uses for which a Mobility Fee is to be assessed on new development. The schedule includes the Mobility Fee rates per unit of measure for each land use.

Mobility Fee Technical Report shall mean the City of Boynton Beach Mobility Fee Technical Report dated January 2025 and prepared by NUE Urban Concepts, LLC that documents the analysis, data and methodology used to develop a Mobility Fee and is adopted pursuant to an implementing ordinance which authorizes imposition of the Mobility Fee.

Mobility Plan shall mean the Streets Plan, Multimodal Corridors Plan, Transit Plan, and Mobility Plan Programs included in the City of Boynton Beach Mobility Fee Technical report dated January 2025 and prepared by NUE Urban Concepts, LLC, or updates to the City's Complete Street Mobility Plan, to meet future person travel demand and serves as the basis for the City's Mobility Fee.

Mobility Plan Program shall mean mobility initiatives, plans, services, and studies that the City will undertake to implement the Mobility Plan that are not defined Mobility Projects and maybe funded by Mobility Fees.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Mobility Plan Project shall mean corridor and intersection improvements such as bike lanes, buffered bike lanes, protected bike lanes, intersections, interchanges, landscape, shared-use paths, boardwalks, pedestrian overpasses or underpasses, roads, roundabouts, sidewalks, streets, and streetscape. Mobility Plan projects also include policies, programs and services, wayfinding, micromobility devices, and transit vehicles, lanes, stops, and facilities, along with mobility hubs. Projects can include new or additional road travel lanes and turn lanes, upgrade of roads that results in a change in functionally classification of the road, complete and low speed streets, curbless shared streets, new or upgraded traffic signals, traffic synchronization, mobilization, maintenance of traffic, survey, geotechnical and engineering, utilities, construction, PD&E, planning, engineering and inspection, utility relocation, right-of-way, easements, land acquisition, stormwater management facilities. These projects may also be referred to as Mobility Projects, Multimodal Projects, or Projects in the Mobility Fee Technical Report and Mobility Fee Ordinance.

Mode means the choice of travel that a person undertakes and can include walking, jogging, running, bicycling, paddling, scooting, flying, driving a vehicle, riding a boat, transit, taxi or using a new mobility technology.

Multi-Family Residential means a dwelling unit and shall include those uses specified in the ITE Trip Generation Manual under Land Use Codes Series 200, except for Land Use Codes 200, 210, 253, 254, and 255.

Multi-Family Residential Square Feet means the sum of the area (in square feet) of each building measured from the exterior surface of the exterior walls. This includes common areas, lobbies, leasing offices, and residential amenities not accessible to the public. Retail or office square footage leased to a third-party would pay the applicable mobility fee rate. Square footage does not include parking garages or structures.

Multimodal means multiple modes of travel including, but not limited to walking, bicycling, jogging, rollerblading, skating, scootering, riding transit, driving a golf cart, low speed electric vehicle or motor vehicle.

Multimodal facility means a sidewalk, bicycle lane, buffered or protected bicycle lane, sharrow, bicycle boulevard, high occupancy vehicle lane, shared-use path, boardwalk, pathway, transit stop, transit station, transit pull-out, crosswalk, mid-block crossing, pedestrian signal, mobility hub, low speed street, shared street, traffic calmed street, streetscape, hardscape, traffic calming, water taxi, multimodal corridor.

Multimodal transportation system means the right-of-way, easements, roads, streets, alleyways, curb-cuts, traffic control devices, stormwater management facilities, utilities, and multimodal facilities that allow for circulation, mobility, and parking within the City and accessibility to land uses, property, and modes of transportation within the City.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Non-Residential Square Feet means the sum of the gross floor area (in square feet) of the area of each floor level under cover, including cellars, basements, mezzanines, penthouses, corridors, lobbies, stores, and offices, that are within the principal outside faces of exterior walls, not including architectural setbacks or projections. Included are all areas that have floor surfaces with clear standing head room (six feet six inches, minimum) and are used as part of the primary use of the property. If an area within or adjacent to the principal outside faces of the exterior walls is not enclosed, such as outdoor restaurant seating, areas used for storage of goods and materials, or merchandise display, and is determined to be a part of the primary use of property, this gross floor area is considered part of the overall square footage of the building. Areas for parking, circulation, ingress, egress, buffers, conservation, walkways, landscape, stormwater management, and easements or areas granted for transit stops or multimodal parking are not included in the calculation of square feet.

Office means banks, financial services, general offices, hospitals, higher education such as colleges and universities, post-secondary trade schools, and professional activities primarily involving the provision of professional or skilled services, including but not limited to accounting, legal, real estate, insurance, financial, engineering, architecture, accounting, and technology.

Office Uses means those businesses which provide professional services to individuals, businesses, or groups and which include those uses in the ITE Trip Generation Manual under Land Use Code Series 600 and 700 and includes Land Use Codes 540, 550, 911 and 912. Land Use Code 620 is included under institutional uses.

Off-site Improvement means improvements located outside of the boundaries of development activity or on the opposite side of a right-of-way not adjacent to the boundary of the development activity, excluding improvements such as mid-block crossings, traffic signals, left turn lanes that are part of development activity relate access improvements. If an improvement provides a benefit to person travel not associated with development activity such as a turn lane serving another development or an off-site sidewalk connection to a school or park shall generally be considered an off-site improvement. Off-site improvements also include mobility projects that are not a site-related or development activity requirement of the Comprehensive Plan, land development regulations, development order condition, or a condition of an access or right-of-way permit.

Overnight Lodging means places of accommodations, such as bed and breakfast, inns, motels, hotels and resorts that provide places for sleeping and bathing and may include supporting facilities such as restaurants, cocktail lounges, meeting and banquet rooms or convention facilities, and limited recreational facilities (pool, fitness room) intended for primary use by guest(s) and which include those uses specified in the ITE Trip Generation Manual under the Land Use Code Series 300.
Person Miles of Capacity (PMC) means the number of persons "capacity" that can be accommodated, at a determined standard, on a facility while walking, bicycling, riding transit, driving, or using a mobility assisted device over a defined distance.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Person Miles of Travel (PMT) means a unit used to measure person travel made by one person where each mile traveled is counted as one person mile. PMT is calculated by multiplying person trip length by the number of person trips. The increase in future person miles of travel is used to plan mobility project needs that form the basis for a mobility fee.

Person Miles of Travel Factor (PMTf) shall mean the factor utilized to convert vehicle miles of travel to person miles of travel based on the 2022 National Household Travel Survey.

Person Travel Demand (PTD) means travel demand from development activity based on trip generation, pass-by trips, vehicle trip lengths, limited access travel, origin and destination factors, vehicle miles of travel, and person miles of travel factors. The resulting mobility fees are roughly proportional to the person travel demand per use and assessment area provided on the mobility fee schedule.

Person Trip (PT) means a trip by one person by one or more modes of travel including, but not limited to, driving a motor vehicle or low speed electric vehicle, riding transit, walking, bicycling or form of person powered, electric powered or gasoline powered device.

Person Trip Length (PTl) means the total length, in miles, of a person trip per trip purpose.

Private Education means building or buildings used for pre-school, private school, childcare, or day care where students are educated by a non-governmental entity with grades ranging from pre-kindergarten to 12th grade. Private schools do not include Charter Schools, which are exempt from local government fees per Florida Statute. Childcare and day care shall mean a facility where care for young children is provided, normally during the daytime hours. Day care facilities generally include classrooms, offices, eating areas and playgrounds. Postsecondary education falls under office uses. These uses are under ITE Trip Generation Manual under Land Use Code Series 500.

Quality of Service (QOS) means a quantitative stratification of the quality of service of personal mobility stratified into six letter grade levels, with "A" describing the highest quality and "F" describing the lowest quality: a discrete stratification of a quality-of-service continuum.

Residential Uses mean a dwelling unit and shall include those uses specified in the ITE Trip Generation Manual under the Land Use Code Series 200, except for Land Use Codes 253, 254, and 255.

Retail means personal service and retail uses. This includes land uses under ITE Land Use Codes Series 800, and 900. Retail includes all uses that do not fall under High Impact or Convenience Retail uses.

Retail Drive-Thru means any drive-thru lane associated with a personal service or retail use. The drive-thru may include an order window or a door, window, or other means of access to drop-off or pick-up of goods, items, services, ordered through a mobile app or online. Common uses include dry cleaners or pharmacies. Increasingly retail uses include drive-thru lanes to pick up ordered goods. Drive-thru lanes associated with a bank, fast food or quick service restaurant, financial institution, or

© 2025 NUE Urban Concepts, LLC. All rights reserved.

auto / car wash are assessed additive Mobility Fees. Retail uses include those under ITE Land Use Codes Series 800 and 900, except those land uses included on the Mobility Fee schedule with established Mobility Fee rates.

Retail Uses mean those commercial activities which provide for sale, lease, or rent of goods, products, services, vehicles, or accommodations for use by individuals, businesses, or groups and which include those uses specified in the ITE Trip Generation Manual under Land Use Code Series 800 and 900.

Service Standard means the adopted or desired quality or level of service for a bicycle facility, pedestrian facility, roadway, shared-use multimodal facility, or transit.

Shell Building means the foundational and structural elements that separate interior and exterior space and includes the roof, walls, windows, doors, mechanical systems, and rough plumbing and electric. Common areas are typically finished. Interior spaces are designed to be finished by the tenant with wall coverings, ceiling, flooring, lighting, electrical and plumbing finishes, and furnishings. The floor may or may not be finished with concrete to allow for flexibility in the location of plumbing service lines.

Single-Family Residential means a dwelling unit and shall include those uses specified in the ITE Trip Generation Manual under Land Use Codes 210 and 215 Series 200, except for Land Use Codes 253, 254, and 255. Residential includes tiny homes and accessory dwelling units.

Single-Family Residential Square Feet means the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls.

Streetscape means hardscape elements such as pavers, benches, lighting, trash and recycling receptacles, fountains, seating, shade structure, crosswalks, landscape elements such as canopy and understory trees, shrubs, bushes, grasses and flowers, green infrastructure and architectural structures and projections that provide shade and protection from various weather conditions.
Trip means travel between locations, often times between an origin, such as a home, to a destination, such as a business, but the trip can end and begin at the same location, such as walking a dog in the neighborhood where the home is both the origin and destination.

Trip Length shall mean the length of a trip per trip purpose.

Trip Purpose means the primary purpose at the destination of a trip such as travel to buy goods, services, or meals, entertainment, recreation, school, work, places of assembly, errands, medical, day care, or work related. Trip purpose may be either home based, meaning the trip originates at a residence, or non-home based, meaning the trip originates at a destination other than a residence.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

Use shall mean a use of land for residential or non-residential purposes. For Mobility Fee purposes the terms land use and use are interchangeable. The inclusion of a land use or use on the Mobility Fee schedule does not mean that land use or use is permitted by the City's Comprehensive Plan or Land Development Regulations.

Vehicle Miles of Travel (VMT) means a unit to measure vehicle travel made by a motor vehicle where each mile traveled is counted as one vehicle mile regardless of the number of persons in the vehicle. VMT is calculated by multiplying the length of a road segment by the total number of vehicles on that road segment.

Vehicle Occupancy (VO) means the total number of persons in a single motor vehicle making a trip.

Vehicle Trip means a single motor vehicle, regardless of the number of persons in the motor vehicle.

Any defined term in this Technical Report does not supersedes definitions in the City's Comprehensive Plan or Land Development Regulations for purposes of non-mobility fee related items.

The Remainder of This Page is Intentionally Left Blank

MOBILITY PLAN PROGRAMS

The updated Mobility Plan Projects identifies Mobility Plan Programs to be developed. Several of the Programs would implement Mobility Projects identified in the Streets Plan, the Multimodal Corridors Plan, and the Transit Plan. The following are the Mobility Plan Programs **(Appendix I)**:

(1) **Low Speed Streets Program:** The City shall consider development of a Low Speed Streets Program to provide residents various low speed street treatments that could be applied to streets in their neighborhood. The intent of the program is to be resident driven, where residents gather support from their adjacent neighbors to implement low speed street treatments and traffic calming measures. Initial priority areas are those streets that provide access to parks, schools, and connectivity between multimodal corridors. Low Speed Streets feature posted speed limits between 20 MPH and 25 MPH that carry low traffic volumes and feature changes to the physical geometry of the street right-of-way to achieve these posted speed limits. Physical changes can include treatments such as narrow travel lanes through restriping to add on-street parking, on-street bicycle lanes, or pilot projects that add on-street sidewalks through pavement markings where sidewalks do not exist. Physical changes may also include traffic calming features such as such as chicanes, chokers, curb extensions, mini traffic circles, painted or raised intersections, roundabouts, or speed tables. The Program may also include green street improvements such as reclaiming existing swales with low impact development stormwater treatments or adding canopy and understory street trees.

(2) **Micromobility & Low Speed Electric Vehicle Program:** The City shall consider development of a Micromobility & Low Speed Electric Vehicle Program and Ordinance regulating the use of micromobility devices (e.g., e-bike, e-scooters) and low speed electric vehicles within the City. The City will coordinate with the County and FDOT regarding use of micromobility devices and low speed electric vehicles on and crossing County and State Roads. The Program and Ordinance will address hours of operation, safety, providers, rentals, and equipment.

(3) **Vision Zero Action Plan:** Vision Zero is a national program that seeks to eliminate all traffic fatalities and severe injuries, while increasing education, safety, health, and mobility for all users. A Vison Zero Action Plan uses crash data to identify the high injury crash network, then programs countermeasures (including but not limited to capital improvements, law enforcement campaigns, and safety studies) to address the documented safety deficiencies.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

(4) **Wayfinding Program:** The City shall consider development of a wayfinding program to further enhance the efficiency of the transportation system, improve access, and facilitate placemaking. Wayfinding and route signage are an essential component of multimodal planning elements beyond construction of a continuous, interconnected network of multimodal infrastructure. Wayfinding can be both physical and virtual tools that provide predictability and consistency in the way people find their point of interests. The Wayfinding Program would establish a brand identity and design standards and specifications for signage, maps, a digital app, etc.

(5) **ADA Curb Ramp Retrofit Program:** Fund upgrades to existing curb ramps to enhance mobility, safety, improve the quality of service in the community and comply with the American with Disability Act (ADA) requirements. The projects identified through the Curb Ramp Upgrade Program can be used for future Mobility Plan and Mobility Fee updates.

(6) **Mobility Access Program:** Develop programs and pursue funding sources and public private opportunities to provide bikes, electric bikes, electric scooters, and passes for car share, ride share, and transit services to provide mobility to underserved members of the community.

(7) **Multimodal Plans, Programs, Services & Studies:** Prepare corridor, multimodal, street, and transit plans and studies, develop traffic count program, pursue matching grant fund opportunities through County, FDOT, Federal, State, and TPA Funding Programs, update mobility plan and fee, develop complete street policies, design standards, and programs. Explore shared mobility services and shared mobility, microtransit and transit services with adjacent municipalities, FDOT, Palm Beach County, transit authorities and private entities.

(8) **Mobility Plan & Fee Implementation Program:** Update the Comprehensive Plan to reflect the updated Mobility Plan projects and adoption of a Mobility Fee. Further explore establishing Street, Multimodal, and Transit Quality of Service Standards. Develop follow-on plans, studies, and establish criteria and standards for Walking & Streetscape Enhancements, Multimodal Corridors, Curbless Shared Streets, Multimodal Crossing Evaluations, and Water Taxi Service. Consider development of mobility fee administrative manual or policies and service charges. Actively implement Mobility Plan Projects and Programs.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

RECOMMENDED NEXT STEPS

The adoption of the updated Mobility Plan Projects and Mobility Fee requires additional tasks to administer and implement. The following are recommended next steps that the City of Boynton Beach should consider commencing:

(1) **Complete Street Plan Update:** The City intends to update its Complete Street Mobility Plan in 2025. The updated will incorporate and may further define and refine the updated Mobility Plan Projects. The update would also further evaluate quality of service standards and the establishment of park once environments.

(2) **Comprehensive Plan Amendment:** Within one year from the date of adoption of the Mobility Fee, the City will need to amend the Comprehensive Plan to recognize adoption of the updated Mobility Plan Projects and Mobility Fee and amend policies related to Transportation Concurrency Exception Areas (TCEA's) and Transportation Concurrency. The Amendments should also integrate street, multimodal, and transit quality of service (QOS) standards into the Comprehensive Plan. The City would utilize the Multimodal Characteristics Inventory developed as part of the Mobility Fee as part of the Data, Inventory, and Analysis (DIA) in support of the amendment **(Appendix Z)**.

(3) **FDOT, Palm Beach Transportation Planning Agency (TPA) Coordination:** Boynton Beach should begin discussions with FDOT and the Palm Beach TPA on integrating the Mobility Plan projects into any updates of the 2050 LRTP. The coordination should also address the incorporation of mobility projects into existing funded and planned projects, and the pursuit of funding for mobility projects through existing or upcoming grant and funding request.

(4) **Palm Beach County Interlocal Agreement:** Boynton Beach should begin discussions with the County to enter into an updated Interlocal Agreement consistent with the requirements of HB 479 and Florida Statute Section 163.3180 and. The Interlocal Agreement should address the funding of mobility projects on County and State Roads through any extension of the County's infrastructure sales tax and the $32 million dollars of road impact fees that the County has collected over the past 20 years (**Appendix L1 & L2**).

© 2025 NUE Urban Concepts, LLC. All rights reserved.

(5) **Annexation of Unincorporated Property**: The City should consider pursing annexations of unincorporated Palm Beach County areas adjacent to the City and in enclaves that could potentially be developed or redeveloped to increase mobility fee revenues. These areas are using the multimodal transportation system within the Mobility Study Area. The City would better be able to coordinate Mobility Projects and review the impacts from development.

(6) **Service Charge Study:** Boynton Beach should also consider undertaking a service charge study for administering and implementing its Mobility Fee. Florida Statute limits administrative charges to the cost of administering and implementing mobility fees. The service charge study would provide a factual basis for assessment of a service charge to offset administrative cost. The service charge would also address future updates and application fees for special studies, request for credits or offsets, and special assessments.

(7) **Administrative Manual:** Boynton Beach should consider developing or updating administrative procedures to administer and implement the Mobility Fees. The mobility fee ordinance will address big picture legal and statutory requirements. The Administrative Manual will govern day to day administration and provide the City with continuity of service should staff turnover occur.

(8) **Traffic Count Program:** Boynton Beach should consider collecting traffic counts on collectors, minor collectors and major local roads throughout the City. Future County negotiations and the pursuit of funds for safety and mobility will depend on having existing traffic count data. The Low Speeds Streets Pilot Program and Vision Zero program will also benefit from more recent and localized traffic data.

(9) **Mobility Hubs:** Boynton Beach should consider integrating mobility hubs as part of existing and future transit service. Mobility Hubs are the evolution of transit and bus stops that provides safe and convenient drop-off and pick-up areas for microtransit, transit, and shared mobility services, incorporates lockers for package and mail delivery, adds spaces for mobile delivery services, provides stations for bikes and micromobility devices, and charging stations for electric vehicles. The City's LDRs could be updated to provide development with the opportunity to partially reduce off-street parking through the construction of a mobility hub.

(10) **Land Development Regulations:** The Land Development Regulations should be updated to address necessary changes to transition from a transportation concurrency exception area system to a mobility fee system. The City should also consider replacing traffic impact analysis with site access assessments or mobility solutions reports.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The LDRs should be updated to ensure that new development is designing its internal streets in a Complete Street manner and that external impacts and improvements appropriately address multimodal transportation. The City should also consider implementing FDOT's Context Classification and expand on the initial application of FDOT's Context Classification that has already been undertaken as part of the Mobility Plan **(Figure 22)**.

Figure 22. FDOT's Context Classification

CONCLUSION

The City of Boynton Beach 's Mobility Fee is based on the updated Mobility Plan Projects. The future travel demand analysis provided in this Technical Report clearly demonstrates there is growth in travel demand projected within the City. The updated Mobility Plan Projects establishes the framework over the next 20 years to move people, provide choices, and meet future travel demand through expansion of the City's multimodal transportation system. The City intends to update its Complete Street Mobility Plan in 2025. The updated Plan will incorporate and may further define and refine the updated Mobility Plan Projects. The update would also further evaluate quality of service standards and the establishment of park once environments.

The City's Mobility Fee is a streamlined, equitable way for development activity to mitigate its impact to the multimodal transportation system. Updated Mobility Plan Projects and the Mobility Fee are based on the projected increase in person miles of travel and person miles of capacity between 2024 and 2045: consistent with the **"needs"** requirement of the dual rational nexus test. The Mobility Fee is also based on the person travel demands attributable to development activity and is roughly proportional to the impact the new development has on City, County, and State Roads within the Mobility Study Area, consistent with Florida Statute Sections 163.3180 and 163.31801.

The implementation of a Mobility Fee Benefit District, where a Mobility Fee paid by development is to be expended to fund projects within the Mobility Fee Benefit District, ensures that the Mobility Fee will meet the **"benefits"** requirement of the dual rational nexus test. The City's Mobility Fee will be implemented within the Assessment Area and collected by the City on development that results in an increase in person travel demand. The Mobility Fee has been developed to offset the impact of development on City, County, and State Roads within the Mobility Study Area.

The updated Mobility Plan Projects, based on growth in population and increases in person miles of travel, includes Mobility Projects that provide the person capacity **"needed"** to meet the travel demands of development. The new growth evaluation demonstrates that development is not being assessed more than its **"attributable and assignable"** share of the cost of the updated Mobility Plan Projects. The person travel demand for each use included in the Mobility Fee schedule meets the **"rough proportionality test"** established through case law.

It is strongly recommended that any use of Mobility Fee revenues be included in the City's CIP. The City's Chief Financial Officer, or functional equivalent, is required as part of the City's Annual Financial Report submitted to the State of Florida, to submit a statement that the Mobility Fees were collected and expended consistent with Florida Statute 163.31801.

© 2025 NUE Urban Concepts, LLC. All rights reserved.

The recently adopted HB 479 requires municipalities and counties that both assess transportation mitigation within a municipality to enter into an interlocal agreement. The amendments in HB 479 states that only one (1) fee to mitigate transportation impacts from new development may be assessed and that the local government that issues building permits is to be the entity that collects the transportation mitigation. HB 479 provides additional guidance for a municipality to enter into an interlocal agreement with a county to negotiate expenditure of the transportation mitigation.

Over the next 20 years, the total cost of the updated Mobility Plan Projects is $271,969,256. This Technical Report includes a section that identifies the updated Mobility Plan Projects that are located on County Roads. **These Mobility Plan Projects are projected to cost $28,432,500, which represents 10.45% of the overall cost of the Mobility Plan Projects.**

This Technical Report includes an analyses of Palm Beach County road impact fee collections from new development within the City. **The analyses show that over the past 20 years, the County has collected over $32 million in road impact fees from new development in Boynton Beach.** The annual impact fee reports prepared by the County during that time frame indicate that the County has expended roughly $2 million in the City. It is recommended that the City utilize the information provided in this Technical Report to negotiate an interlocal agreement with the County.

The City's next step is to adopt a Mobility Fee Ordinance. The Mobility Fee Ordinance would establish the effective date for the Mobility Fee. The City will need to notify the County that upon adoption of the Mobility Fee, that City would no longer be collecting Palm Beach County's road impact fee from new development within the Mobility Fee Assessment Area. The City will need to begin discussions with the County on an updated interlocal agreement consistent with HB 479. Within a year from the date of adoption of the Mobility Fee Ordinance, the City will need to amend its Comprehensive Plan to ensure it is consistent with Florida Statute and fully implements the updated Mobility Plan Projects and Mobility Fee. The amendment should reflect any Complete Street Mobility Plan updates.

The City of Boynton Beach Mobility Fee Technical Report, dated January 2025, documents future growth, the **"need"** for updated Mobility Plan Projects, the data and methodology used to develop a Mobility Fee to mitigate the impact of new development, and the establishment of a **"benefit"** district. The updated Mobility Plan Projects and Mobility Fees meets legally established dual rational nexus requirements for **"need"** and **"benefit"** and the Mobility Fee is **"rough proportionality"** to the impact of new development. The updated Mobility Plan Projects and Mobility Fee have been developed consistent with the requirements of Florida Statute Sections 164.3164, 163.3180, 163.31801, and Florida Statute Chapter 380.

Transportation Element

Section 163.3177(6)(b), Florida Statutes, establishes the requirements for transportation and mobility planning in local government comprehensive plans. Comprehensive plans must focus on providing a multimodal transportation system that emphasizes public transportation systems, where feasible, and encourages economic development through flexible transportation and mobility options for Florida communities. Links to transportation planning related issues and organizations are included below to help provide additional information on transportation mobility planning in Florida.

Multimodal Transportation

A multimodal transportation system recognizes the importance of providing mobility options through a variety of integrated travel modes, such as by bus or rail transit, bicycle, automobile, or foot. A well-designed multimodal transportation network minimizes impacts to the environment and enhances the livability of neighborhoods by increasing transportation options, expanding access, and increasing connectivity between destinations.

A well-designed and efficient transportation network can help create a sustainable development pattern that contributes to the community's prosperity, enhances transportation efficiency by minimizing vehicle trips and contributes to a healthier environment by reducing air pollution and greenhouse gas emissions.

The Transportation Element of a local government's comprehensive plan should contain policies that will create a well-connected multi-modal transportation network; support increased residential densities and commercial intensity; help walking become more practical for short trips; support bicycling for both short- and long-distance trips; improve transit to serve frequented destinations; conserve energy resources; reduce greenhouse gas emissions and air pollution; while maintaining vehicular access and circulation. Key multimodal transportation strategies can include the following:

- Create an interconnecting grid network of streets, connectors, arterials and sidewalks that provide a complete and accessible transportation network;
- Establish land use patterns that support a mixture of residential, commercial and retail uses, and dense populations and urban intensities, so that transit service may be provided more efficiently and economically;
- Increase the viability of pedestrian and bicycle travel;
- Integrate land use and transportation planning to create communities that provide transportation choice; and,
- Accommodate the flow of freight throughout the state so that the economy can continue to grow.

Other multimodal transportation planning efforts, such as transit-oriented developments, defined in section 163.3164(46), Florida Statutes, are being developed and planned by the Cities of Boca Raton, Clearwater, Gainesville, Jacksonville, Miami, Tampa and West Palm Beach, and in Broward, Miami-Dade, Palm Beach and Pinellas Counties and other locations. Below are a several examples of successful multimodal transportation planning efforts in Florida:

- **Alachua County, Department of Growth Management, Transportation Planning** - Alachua County's Mobility Plan includes transit-oriented development and multimodal transportation planning as one of several methods being implemented to provide mobility options.
- **City of Gainesville Comprehensive Planning** - The City of Gainesville comprehensive plan includes six mixed-use categories and eight Special Area Plans based on Traditional Neighborhood Development standards and an established Urban Infill and Redevelopment Area.

Complete Streets

Complete Streets is a transportation strategy to develop an integrated, connected networks of streets that are safe and accessible for all users, including pedestrians, bicyclists, motorists, and transit riders of all ages and abilities. According to Smart Growth America and the National Complete Streets Coalition, *Complete Streets* make active transportation such as walking and bicycling convenient, provide increased access to employment centers, commerce, and educational institutions, and allow greater choice in travel.

In Florida, complete streets are *context-sensitive*. For example, a street considered complete for use within a dense urban area would look and function very differently from one located in a rural area, and a complete suburban street would look and function differently from both the urban and rural complete streets. One way to think about what elements are necessary to create a complete street is to determine its context within the community and based upon that context, match the design and operation of that street with the direction and guidance provided in the local government's comprehensive plan.

As an example, some communities use an Urban-Rural Transect (or simply *Transect*) to assign portions of their community into approximately five or six "context zones" based on the degree of development intensity desired and geographic location, ranging from very low intensity rural context zones to more intense urban context zones. For each context zone, the community establishes a context in terms of appropriate public facility design, urban design, general spatial form, and appropriate street types.

This approach allows the local government to determine, in its comprehensive plan or other public planning document, which portions of the community fit within which context zone, and to provide guidance within the comprehensive plan as to what mobility functions (such as walking, biking, transit use) are most important in that context zone, and what design features and operational characteristics are appropriate for streets in that location.

Several examples of communities have initiated complete streets planning in Florida. Here are a few excellent examples:

- Model Design Manual for Living Streets - Los Angeles County, 2011
- Deerfield Beach Complete Street Guidelines
- Ft. Lauderdale Complete Streets

Transportation Concurrency

In accordance with the Community Planning Act, local governments may establish a system that assesses landowners the costs of maintaining specified levels of service for components of the local government's transportation system when the projected impacts of their development would adversely impact the system. This system, known as a concurrency management system, must be based on the local government's comprehensive plan. Specifically, the local government comprehensive plan must provide the principles, guidelines, standards, and strategies, including adopted levels of service, to guide the application of its transportation concurrency management system.

Prior to June 2, 2011, transportation concurrency was mandatory for local governments. Now that transportation concurrency is optional, if a local government chooses, it may eliminate the transportation concurrency provisions from its comprehensive plan and is encouraged to adopt a mobility fee based plan in its place (see below). Adoption of a mobility fee based plan must be accomplished by a plan amendment that follows the Expedited State Review Process. A plan amendment to eliminate transportation concurrency is not subject to state review.

It is important to point out that whether or not a local government chooses to use a transportation concurrency system, it is required to retain level of service standards for its roadways for purposes of capital improvement planning. The standards must be appropriate and based on professionally accepted studies, and the capital improvements that are necessary to meet the adopted levels of service standards must be included in the five-year schedule of capital improvements. Additionally, all local governments, whether implementing transportation concurrency or not, must adhere to the transportation planning requirements of section 163.3177(6)(b), Florida Statutes.

Mobility Fee Based Plans

If a local government elects to repeal transportation concurrency, it is encouraged to adopt an alternative mobility funding system that uses one or more of the tools and techniques identified in section 163.3180(5)(f), Florida Statutes:

- Adoption of long-term strategies to facilitate development patterns that support multimodal solutions, including urban design, appropriate land use mixes, intensity and density.
- Adoption of an area wide level of service not dependent on any single road segment function.
- Exempting or discounting impacts of locally desired development.
- Assigning secondary priority to vehicle mobility and primary priority to ensuring a safe, comfortable, and attractive pedestrian environment with convenient interconnection to transit.
- Establishing multimodal level of service standards that rely primarily on non-vehicular modes of transportation where existing or planned community design will provide adequate a level of mobility.
- Reducing impact fees or local access fees to promote development within urban areas, multimodal transportation districts, and a balance of mixed-use development in certain areas or districts, or for affordable or workforce housing.

Requirements for Transportation Concurrency

If a local government elects to use transportation concurrency, it must adhere to the following concurrency requirements in section 163.3180(5), Florida Statutes:

- Include principles, guidelines, standards, and strategies, including adopted levels of service, to guide the application of concurrency to transportation.
- Use professionally accepted studies to evaluate the appropriate levels of service.
- Adopt appropriate amendments to the capital improvements element of the comprehensive plan consistent with the requirements of section 163.3177(3), Florida Statutes.
- Allow for proportionate share contributions to mitigate transportation impacts for all developments, including developments of regional impact (DRIs), consistent with section 163.3180(5)(h), Florida Statutes.
- Consult with the Florida Department of Transportation when proposed amendments affect the Strategic Intermodal System.
- Exempt public transit facilities from concurrency.

In addition, local governments are encouraged to develop tools and techniques to complement the application of transportation concurrency consistent with section 163.3180(5)(f), Florida Statutes, and to coordinate with adjacent local governments for the purpose of using common methodologies for measuring impacts to transportation facilities.

APPENDIX B

Laws of Florida HB 479
(Chapter 2024 – 266)

CHAPTER 2024-266

Committee Substitute for House Bill No. 479

An act relating to alternative mobility funding systems and impact fees; amending s. 163.3164, F.S.; providing definitions; amending s. 163.3180, F.S.; revising requirements relating to agreements to pay for or construct certain improvements; authorizing certain local governments to adopt an alternative transportation system that is mobility-plan and fee-based in certain circumstances; prohibiting an alternative transportation system from imposing responsibility for funding an existing transportation deficiency upon new development; requiring counties and municipalities to create and execute interlocal agreements if a developer is charged a fee for transportation impacts for a new development or redevelopment; providing requirements for such agreements; providing requirements for when such interlocal agreements are not executed by a specified date; authorizing a local government that issues the building permit to collect a fee for transportation impacts under certain circumstances unless otherwise agreed; amending s. 163.31801, F.S.; revising requirements for the calculation of impact fees by certain local governments and special districts; requiring local governments transitioning to alternative transportation systems to provide holders of impact fee credits with full benefit of intensity and density of prepaid credit balances as of a specified date in certain circumstances; amending s. 212.055, F.S.; conforming a cross-reference; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsections (32) through (52) of section 163.3164, Florida Statutes, are renumbered as subsections (34) through (54), respectively, and new subsections (32) and (33) are added to that section, to read:

163.3164 Community Planning Act; definitions.—As used in this act:

(32) "Mobility fee" means a local government fee schedule established by ordinance and based on the projects included in the local government's adopted mobility plan.

(33) "Mobility plan" means an alternative transportation system mobility study developed by using a plan-based methodology and adopted into a local government comprehensive plan that promotes a compact, mixed use, and interconnected development served by a multimodal transportation system in an area that is urban in character, or designated to be urban in character, as defined in s. 171.031.

Section 2. Paragraphs (h) and (i) of subsection (5) of section 163.3180, Florida Statutes, are amended, and paragraph (j) is added to that subsection, to read:

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

163.3180 Concurrency.—

(5)

(h)1. Local governments that continue to implement a transportation concurrency system, whether in the form adopted into the comprehensive plan before the effective date of the Community Planning Act, chapter 2011-139, Laws of Florida, or as subsequently modified, must:

a. Consult with the Department of Transportation when proposed plan amendments affect facilities on the strategic intermodal system.

b. Exempt public transit facilities from concurrency. For the purposes of this sub-subparagraph, public transit facilities include transit stations and terminals; transit station parking; park-and-ride lots; intermodal public transit connection or transfer facilities; fixed bus, guideway, and rail stations; and airport passenger terminals and concourses, air cargo facilities, and hangars for the assembly, manufacture, maintenance, or storage of aircraft. As used in this sub-subparagraph, the terms "terminals" and "transit facilities" do not include seaports or commercial or residential development constructed in conjunction with a public transit facility.

c. Allow an applicant for a development-of-regional-impact development order, development agreement, rezoning, or other land use development permit to satisfy the transportation concurrency requirements of the local comprehensive plan, the local government's concurrency management system, and s. 380.06, when applicable, if:

(I) The applicant in good faith offers to enter into a binding agreement to pay for or construct its proportionate share of required improvements in a manner consistent with this subsection. The agreement must provide that after an applicant makes its contribution or constructs its proportionate share pursuant to this sub-sub-subparagraph, the project shall be considered to have mitigated its transportation impacts and be allowed to proceed if the applicant has satisfied all other local government development requirements for the project.

(II) The proportionate-share contribution or construction is sufficient to accomplish one or more mobility improvements that will benefit a regionally significant transportation facility. A local government may accept contributions from multiple applicants for a planned improvement if it maintains contributions in a separate account designated for that purpose. A local government may not prevent a single applicant from proceeding after the applicant has satisfied its proportionate-share requirement if the applicant has satisfied all other local government development requirements for the project.

d. Provide the basis upon which the landowners will be assessed a proportionate share of the cost addressing the transportation impacts resulting from a proposed development.

CODING: Words stricken are deletions; words underlined are additions.

2. An applicant shall not be held responsible for the additional cost of reducing or eliminating deficiencies. When an applicant contributes or constructs its proportionate share pursuant to this paragraph, a local government may not require payment or construction of transportation facilities whose costs would be greater than a development's proportionate share of the improvements necessary to mitigate the development's impacts.

a. The proportionate-share contribution shall be calculated based upon the number of trips from the proposed development expected to reach roadways during the peak hour from the stage or phase being approved, divided by the change in the peak hour maximum service volume of roadways resulting from construction of an improvement necessary to maintain or achieve the adopted level of service, multiplied by the construction cost, at the time of development payment, of the improvement necessary to maintain or achieve the adopted level of service.

b. In using the proportionate-share formula provided in this subparagraph, the applicant, in its traffic analysis, shall identify those roads or facilities that have a transportation deficiency in accordance with the transportation deficiency as defined in subparagraph 4. The proportionate-share formula provided in this subparagraph shall be applied only to those facilities that are determined to be significantly impacted by the project traffic under review. If any road is determined to be transportation deficient without the project traffic under review, the costs of correcting that deficiency shall be removed from the project's proportionate-share calculation and the necessary transportation improvements to correct that deficiency shall be considered to be in place for purposes of the proportionate-share calculation. The improvement necessary to correct the transportation deficiency is the funding responsibility of the entity that has maintenance responsibility for the facility. The development's proportionate share shall be calculated only for the needed transportation improvements that are greater than the identified deficiency.

c. When the provisions of subparagraph 1. and this subparagraph have been satisfied for a particular stage or phase of development, all transportation impacts from that stage or phase for which mitigation was required and provided shall be deemed fully mitigated in any transportation analysis for a subsequent stage or phase of development. Trips from a previous stage or phase that did not result in impacts for which mitigation was required or provided may be cumulatively analyzed with trips from a subsequent stage or phase to determine whether an impact requires mitigation for the subsequent stage or phase.

d. In projecting the number of trips to be generated by the development under review, any trips assigned to a toll-financed facility shall be eliminated from the analysis.

e. The applicant shall receive a credit on a dollar-for-dollar basis for impact fees, mobility fees, and other transportation concurrency mitigation requirements paid or payable in the future for the project. The credit shall be

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

reduced up to 20 percent by the percentage share that the project's traffic represents of the added capacity of the selected improvement, or by the amount specified by local ordinance, whichever yields the greater credit.

3. This subsection does not require a local government to approve a development that, for reasons other than transportation impacts, is not qualified for approval pursuant to the applicable local comprehensive plan and land development regulations.

4. As used in this subsection, the term "transportation deficiency" means a facility or facilities on which the adopted level-of-service standard is exceeded by the existing, committed, and vested trips, plus additional projected background trips from any source other than the development project under review, and trips that are forecast by established traffic standards, including traffic modeling, consistent with the University of Florida's Bureau of Economic and Business Research medium population projections. Additional projected background trips are to be coincident with the particular stage or phase of development under review.

(i) If a local government elects to repeal transportation concurrency, the local government may ~~it is encouraged to~~ adopt an alternative transportation system that is mobility-plan and fee-based or an alternative transportation system that is not mobility-plan and fee-based. The local government ~~mobility funding system that uses one or more of the tools and techniques identified in paragraph (f). Any alternative mobility funding system adopted~~ may not use an alternative transportation system ~~be used~~ to deny, time, or phase an application for site plan approval, plat approval, final subdivision approval, building permits, or the functional equivalent of such approvals provided that the developer agrees to pay for the development's identified transportation impacts via the funding mechanism implemented by the local government. The revenue from the funding mechanism used in the alternative transportation system must be used to implement the needs of the local government's plan which serves as the basis for the fee imposed. An alternative transportation ~~A mobility fee-based funding~~ system must comply with s. 163.31801 governing impact fees. An alternative transportation system may not impose ~~that is not mobility fee-based shall not be applied in a manner that imposes~~ upon new development any responsibility for funding an existing transportation deficiency as defined in paragraph (h).

(j)1. If a county and municipality charge the developer of a new development or redevelopment a fee for transportation capacity impacts, the county and municipality must create and execute an interlocal agreement to coordinate the mitigation of their respective transportation capacity impacts.

2. The interlocal agreement must, at a minimum:

a. Ensure that any new development or redevelopment is not charged twice for the same transportation capacity impacts.

b. Establish a plan-based methodology for determining the legally permissible fee to be charged to a new development or redevelopment.

c. Require the county or municipality issuing the building permit to collect the fee, unless agreed to otherwise.

d. Provide a method for the proportionate distribution of the revenue collected by the county or municipality to address the transportation capacity impacts of a new development or redevelopment, or provide a method of assigning responsibility for the mitigation of the transportation capacity impacts belonging to the county and the municipality.

3. By October 1, 2025, if an interlocal agreement is not executed pursuant to this paragraph:

a. The fee charged to a new development or redevelopment shall be based on the transportation capacity impacts apportioned to the county and municipality as identified in the developer's traffic impact study or the mobility plan adopted by the county or municipality.

b. The developer shall receive a 10 percent reduction in the total fee calculated pursuant to sub-subparagraph a.

c. The county or municipality issuing the building permit must collect the fee charged pursuant to sub-subparagraphs a. and b. and distribute the proceeds of such fee to the county and municipality within 60 days after the developer's payment.

4. This paragraph does not apply to:

a. A county as defined in s. 125.011(1).

b. A county or municipality that has entered into, or otherwise updated, an existing interlocal agreement, as of October 1, 2024, to coordinate the mitigation of transportation impacts. However, if such existing interlocal agreement is terminated, the affected county and municipality that have entered into the agreement shall be subject to the requirements of this paragraph unless the county and municipality mutually agree to extend the existing interlocal agreement before the expiration of the agreement.

Section 3. Paragraph (a) of subsection (4), paragraph (a) of subsection (5), and subsection (7) of section 163.31801, Florida Statutes, are amended to read:

163.31801 Impact fees; short title; intent; minimum requirements; audits; challenges.—

(4) At a minimum, each local government that adopts and collects an impact fee by ordinance and each special district that adopts, collects, and administers an impact fee by resolution must:

(a) Ensure that the calculation of the impact fee is based on a study using the most recent and localized data available within 4 years of the current impact fee update. The new study must be adopted by the local government within 12 months of the initiation of the new impact fee study if the local government increases the impact fee.

(5)(a) Notwithstanding any charter provision, comprehensive plan policy, ordinance, development order, development permit, or resolution, the local government or special district that requires any improvement or contribution must credit against the collection of the impact fee any contribution, whether identified in a development order, proportionate share agreement, or any ~~other~~ form of exaction, related to public facilities or infrastructure, including monetary contributions, land dedication, site planning and design, or construction. Any contribution must be applied on a dollar-for-dollar basis at fair market value to reduce any impact fee collected for the general category or class of public facilities or infrastructure for which the contribution was made.

(7) If an impact fee is increased, the holder of any impact fee credits, whether such credits are granted under s. 163.3180, s. 380.06, or otherwise, which were in existence before the increase, is entitled to the full benefit of the intensity or density prepaid by the credit balance as of the date it was first established. If a local government adopts an alternative transportation system pursuant to s. 163.3180(5)(i), the holder of any transportation or road impact fee credits granted under s. 163.3180 or s. 380.06 or otherwise that were in existence before the adoption of the alternative transportation system is entitled to the full benefit of the intensity and density prepaid by the credit balance as of the date the alternative transportation system was first established.

Section 4. Paragraph (d) of subsection (2) of section 212.055, Florida Statutes, is amended to read:

212.055 Discretionary sales surtaxes; legislative intent; authorization and use of proceeds.—It is the legislative intent that any authorization for imposition of a discretionary sales surtax shall be published in the Florida Statutes as a subsection of this section, irrespective of the duration of the levy. Each enactment shall specify the types of counties authorized to levy; the rate or rates which may be imposed; the maximum length of time the surtax may be imposed, if any; the procedure which must be followed to secure voter approval, if required; the purpose for which the proceeds may be expended; and such other requirements as the Legislature may provide. Taxable transactions and administrative procedures shall be as provided in s. 212.054.

(2) LOCAL GOVERNMENT INFRASTRUCTURE SURTAX.—

(d) The proceeds of the surtax authorized by this subsection and any accrued interest shall be expended by the school district, within the county and municipalities within the county, or, in the case of a negotiated joint

county agreement, within another county, to finance, plan, and construct infrastructure; to acquire any interest in land for public recreation, conservation, or protection of natural resources or to prevent or satisfy private property rights claims resulting from limitations imposed by the designation of an area of critical state concern; to provide loans, grants, or rebates to residential or commercial property owners who make energy efficiency improvements to their residential or commercial property, if a local government ordinance authorizing such use is approved by referendum; or to finance the closure of county-owned or municipally owned solid waste landfills that have been closed or are required to be closed by order of the Department of Environmental Protection. Any use of the proceeds or interest for purposes of landfill closure before July 1, 1993, is ratified. The proceeds and any interest may not be used for the operational expenses of infrastructure, except that a county that has a population of fewer than 75,000 and that is required to close a landfill may use the proceeds or interest for long-term maintenance costs associated with landfill closure. Counties, as defined in s. 125.011, and charter counties may, in addition, use the proceeds or interest to retire or service indebtedness incurred for bonds issued before July 1, 1987, for infrastructure purposes, and for bonds subsequently issued to refund such bonds. Any use of the proceeds or interest for purposes of retiring or servicing indebtedness incurred for refunding bonds before July 1, 1999, is ratified.

1. For the purposes of this paragraph, the term "infrastructure" means:

a. Any fixed capital expenditure or fixed capital outlay associated with the construction, reconstruction, or improvement of public facilities that have a life expectancy of 5 or more years, any related land acquisition, land improvement, design, and engineering costs, and all other professional and related costs required to bring the public facilities into service. For purposes of this sub-subparagraph, the term "public facilities" means facilities as defined in s. 163.3164(41) ~~s. 163.3164(39)~~, s. 163.3221(13), or s. 189.012(5), and includes facilities that are necessary to carry out governmental purposes, including, but not limited to, fire stations, general governmental office buildings, and animal shelters, regardless of whether the facilities are owned by the local taxing authority or another governmental entity.

b. A fire department vehicle, an emergency medical service vehicle, a sheriff's office vehicle, a police department vehicle, or any other vehicle, and the equipment necessary to outfit the vehicle for its official use or equipment that has a life expectancy of at least 5 years.

c. Any expenditure for the construction, lease, or maintenance of, or provision of utilities or security for, facilities, as defined in s. 29.008.

d. Any fixed capital expenditure or fixed capital outlay associated with the improvement of private facilities that have a life expectancy of 5 or more years and that the owner agrees to make available for use on a temporary basis as needed by a local government as a public emergency shelter or a staging area for emergency response equipment during an emergency

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

officially declared by the state or by the local government under s. 252.38. Such improvements are limited to those necessary to comply with current standards for public emergency evacuation shelters. The owner must enter into a written contract with the local government providing the improvement funding to make the private facility available to the public for purposes of emergency shelter at no cost to the local government for a minimum of 10 years after completion of the improvement, with the provision that the obligation will transfer to any subsequent owner until the end of the minimum period.

e. Any land acquisition expenditure for a residential housing project in which at least 30 percent of the units are affordable to individuals or families whose total annual household income does not exceed 120 percent of the area median income adjusted for household size, if the land is owned by a local government or by a special district that enters into a written agreement with the local government to provide such housing. The local government or special district may enter into a ground lease with a public or private person or entity for nominal or other consideration for the construction of the residential housing project on land acquired pursuant to this sub-subparagraph.

f. Instructional technology used solely in a school district's classrooms. As used in this sub-subparagraph, the term "instructional technology" means an interactive device that assists a teacher in instructing a class or a group of students and includes the necessary hardware and software to operate the interactive device. The term also includes support systems in which an interactive device may mount and is not required to be affixed to the facilities.

2. For the purposes of this paragraph, the term "energy efficiency improvement" means any energy conservation and efficiency improvement that reduces consumption through conservation or a more efficient use of electricity, natural gas, propane, or other forms of energy on the property, including, but not limited to, air sealing; installation of insulation; installation of energy-efficient heating, cooling, or ventilation systems; installation of solar panels; building modifications to increase the use of daylight or shade; replacement of windows; installation of energy controls or energy recovery systems; installation of electric vehicle charging equipment; installation of systems for natural gas fuel as defined in s. 206.9951; and installation of efficient lighting equipment.

3. Notwithstanding any other provision of this subsection, a local government infrastructure surtax imposed or extended after July 1, 1998, may allocate up to 15 percent of the surtax proceeds for deposit into a trust fund within the county's accounts created for the purpose of funding economic development projects having a general public purpose of improving local economies, including the funding of operational costs and incentives related to economic development. The ballot statement must indicate the intention to make an allocation under the authority of this subparagraph.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

Section 5. This act shall take effect October 1, 2024.

Approved by the Governor June 25, 2024.

Filed in Office Secretary of State June 25, 2024.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

APPENDIX C

Impact Fee Act
(Florida Statute Section 163.31801)

Title XI COUNTY ORGANIZATION AND INTERGOVERNMENTAL RELATIONS

Chapter 163 INTERGOVERNMENTAL PROGRAMS

SECTION 31801 Impact fees; short title; intent; minimum requirements; audits; challenges.

163.31801 Impact fees; short title; intent; minimum requirements; audits; challenges.—

(1) This section may be cited as the “Florida Impact Fee Act.”

(2) The Legislature finds that impact fees are an important source of revenue for a local government to use in funding the infrastructure necessitated by new growth. The Legislature further finds that impact fees are an outgrowth of the home rule power of a local government to provide certain services within its jurisdiction. Due to the growth of impact fee collections and local governments’ reliance on impact fees, it is the intent of the Legislature to ensure that, when a county or municipality adopts an impact fee by ordinance or a special district adopts an impact fee by resolution, the governing authority complies with this section.

(3) For purposes of this section, the term:

(a) “Infrastructure” means a fixed capital expenditure or fixed capital outlay, excluding the cost of repairs or maintenance, associated with the construction, reconstruction, or improvement of public facilities that have a life expectancy of at least 5 years; related land acquisition, land improvement, design, engineering, and permitting costs; and other related construction costs required to bring the public facility into service. The term also includes a fire department vehicle, an emergency medical service vehicle, a sheriff’s office vehicle, a police department vehicle, a school bus as defined in s. 1006.25, and the equipment necessary to outfit the vehicle or bus for its official use. For independent special fire control districts, the term includes new facilities as defined in s. 191.009(4).

(b) “Public facilities” has the same meaning as in s. 163.3164 and includes emergency medical, fire, and law enforcement facilities.

(4) At a minimum, each local government that adopts and collects an impact fee by ordinance and each special district that adopts, collects, and administers an impact fee by resolution must:

(a) Ensure that the calculation of the impact fee is based on a study using the most recent and localized data available within 4 years of the current impact fee update. The new study must be adopted by the local government within 12 months of the initiation of the new impact fee study if the local government increases the impact fee.

(b) Provide for accounting and reporting of impact fee collections and expenditures and account for the revenues and expenditures of such impact fee in a separate accounting fund.

(c) Limit administrative charges for the collection of impact fees to actual costs.

(d) Provide notice at least 90 days before the effective date of an ordinance or resolution imposing a new or increased impact fee. A local government is not required to wait 90 days to decrease, suspend, or eliminate an impact fee. Unless the result is to reduce the total mitigation costs or impact fees imposed on an applicant, new or increased impact fees may not apply to current or pending permit applications submitted before the effective date of a new or increased impact fee.

(e) Ensure that collection of the impact fee may not be required to occur earlier than the date of issuance of the building permit for the property that is subject to the fee.

(f) Ensure that the impact fee is proportional and reasonably connected to, or has a rational nexus with, the need for additional capital facilities and the increased impact generated by the new residential or commercial construction.

(g) Ensure that the impact fee is proportional and reasonably connected to, or has a rational nexus with, the expenditures of the funds collected and the benefits accruing to the new residential or nonresidential construction.

(h) Specifically earmark funds collected under the impact fee for use in acquiring, constructing, or improving capital facilities to benefit new users.

(i) Ensure that revenues generated by the impact fee are not used, in whole or in part, to pay existing debt or for previously approved projects unless the expenditure is reasonably connected to, or has a rational nexus with, the increased impact generated by the new residential or nonresidential construction.

(5)(a) Notwithstanding any charter provision, comprehensive plan policy, ordinance, development order, development permit, or resolution, the local government or special district that requires any improvement or contribution must credit against the collection of the impact fee any contribution, whether identified in a development order, proportionate share agreement, or any form of exaction related to public facilities or infrastructure, including monetary contributions, land dedication, site planning and design, or construction. Any contribution must be applied on a dollar-for-dollar basis at fair market value to reduce any impact fee collected for the general category or class of public facilities or infrastructure for which the contribution was made.

(b) If a local government or special district does not charge and collect an impact fee for the general category or class of public facilities or infrastructure contributed, a credit may not be applied under paragraph (a).

(6) A local government, school district, or special district may increase an impact fee only as provided in this subsection.

(a) An impact fee may be increased only pursuant to a plan for the imposition, collection, and use of the increased impact fees which complies with this section.

(b) An increase to a current impact fee rate of not more than 25 percent of the current rate must be implemented in two equal annual increments beginning with the date on which the increased fee is adopted.

(c) An increase to a current impact fee rate which exceeds 25 percent but is not more than 50 percent of the current rate must be implemented in four equal installments beginning with the date the increased fee is adopted.

(d) An impact fee increase may not exceed 50 percent of the current impact fee rate.

(e) An impact fee may not be increased more than once every 4 years.

(f) An impact fee may not be increased retroactively for a previous or current fiscal or calendar year.

(g) A local government, school district, or special district may increase an impact fee rate beyond the phase-in limitations established under paragraph (b), paragraph (c), paragraph (d), or paragraph (e) by establishing the need for such increase in full compliance with the requirements of subsection (4), provided the following criteria are met:

1. A demonstrated-need study justifying any increase in excess of those authorized in paragraph (b), paragraph (c), paragraph (d), or paragraph (e) has been completed within the 12 months before the adoption of the impact fee increase and expressly demonstrates the extraordinary circumstances necessitating the need to exceed the phase-in limitations.

2. The local government jurisdiction has held not less than two publicly noticed workshops dedicated to the extraordinary circumstances necessitating the need to exceed the phase-in limitations set forth in paragraph (b), paragraph (c), paragraph (d), or paragraph (e).

3. The impact fee increase ordinance is approved by at least a two-thirds vote of the governing body.

(h) This subsection operates retroactively to January 1, 2021.

(7) If an impact fee is increased, the holder of any impact fee credits, whether such credits are granted under s. 163.3180, s. 380.06, or otherwise, which were in existence before the increase, is entitled to the full benefit of the intensity or density prepaid by the credit balance as of the date it was first established. If a local government adopts an alternative transportation system pursuant to s. 163.3180(5)(i), the holder of any transportation or road impact fee credits granted under s. 163.3180 or s. 380.06 or otherwise that were in existence before the adoption of the alternative transportation system is entitled to the full benefit of the intensity and density prepaid by the credit balance as of the date the alternative transportation system was first established.

(8) A local government, school district, or special district must submit with its annual financial report required under s. 218.32 or its financial audit report required under s. 218.39 a separate affidavit signed by its chief financial officer or, if there is no chief financial officer, its executive officer attesting, to the best of his or her knowledge, that all impact fees were collected and expended by the local government, school district, or special district, or were collected and expended on its behalf, in full compliance with the spending period provision in the local ordinance or resolution, and that funds expended from each impact fee account were used only to acquire, construct, or improve specific infrastructure needs.

(9) In any action challenging an impact fee or the government’s failure to provide required dollar-for-dollar credits for the payment of impact fees as provided in s. 163.3180(6)(h)2.b., the government has the burden of proving by a preponderance of the evidence that the imposition or amount of the fee or credit meets the requirements of state legal precedent and this section. The court may not use a deferential standard for the benefit of the government.

(10) Impact fee credits are assignable and transferable at any time after establishment from one development or parcel to any other that is within the same impact fee zone or impact fee district or that is within an adjoining impact fee zone or impact fee district within the same local government jurisdiction and which receives benefits from the improvement or contribution that generated the credits. This subsection applies to all impact fee credits regardless of whether the credits were established before or after June 4, 2021.

(11) A county, municipality, or special district may provide an exception or waiver for an impact fee for the development or construction of housing that is affordable, as defined in s. 420.9071. If a county, municipality, or special district provides such an exception or waiver, it is not required to use any revenues to offset the impact.

(12) This section does not apply to water and sewer connection fees.

(13) In addition to the items that must be reported in the annual financial reports under s. 218.32, a local government, school district, or special district must report all of the following information on all impact fees charged:

(a) The specific purpose of the impact fee, including the specific infrastructure needs to be met, including, but not limited to, transportation, parks, water, sewer, and schools.

(b) The impact fee schedule policy describing the method of calculating impact fees, such as flat fees, tiered scales based on number of bedrooms, or tiered scales based on square footage.

(c) The amount assessed for each purpose and for each type of dwelling.

(d) The total amount of impact fees charged by type of dwelling.

(e) Each exception and waiver provided for construction or development of housing that is affordable.

APPENDIX F

Street Plan

APPENDIX F: STREETS PLAN

Project ID	Street	From	To	Length (Miles)	Project Type (Streets Plan Map)	Construction / Maintenance Entity	Project Description	Planning Level Cost (PLC)	Reasonably Anticipated Funding (AF)	Attributable Planning Level Cost (PLCa)	Attributable Person Miles of Capacity (PMCa)	PLC & PMC Notes	Funding Source	Timeframe
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.														
800	NE 1st Avenue	NE 3rd Street	NE 1st Street	0.09	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$945,000		$945,000	1,080	5		2025 to 2035
805		NE 1st Street	Seacrest Blvd	0.12				$1,260,000	$630,000	$630,000	720	5	50% by adjacent development	2025 to 2035
810	SE 1st Avenue	SE 3rd Street	SE 1st Street	0.09	Curbless Shared Street	City / Developer	Upgrade existing street to a curbless shared street with streetscape enhancements.	$1,575,000		$1,575,000	2,655	10		2025 to 2035
815		SE 1st Street	Seacrest Blvd	0.13	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$1,365,000	$682,500	$682,500	780	5	50% by adjacent development	2025 to 2035
820	NE 1st Street	Boynton Beach Blvd	NE 1st Avenue	0.06	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Project is currently slated for improvement via adjacent land uses. Improvement provides multimodal alternative parallel to Seacrest Blvd and is extension of NE 1st MMC north of Boynton Beach Blvd. Alternative is development approved plans.	$630,000	$315,000	$315,000	360	5	50% by adjacent development	2025 to 2035
825		NE 1st Avenue	E. Ocean Avenue	0.06	Curbless Shared Street	City / Developer	Upgrade existing street to a curbless shared street with streetscape enhancements. Improvement provides multimodal alternative parallel to Seacrest Blvd and is extension of NE 1st MMC north of Boynton Beach Blvd.	$1,050,000		$1,050,000	1,770	10		2025 to 2035
830	SE 1st Street	E. Ocean Avenue	SE 1st Avenue	0.06	Curbless Shared Street	City / Developer	Upgrade existing street to a curbless shared street with streetscape enhancements. Improvement provides multimodal alternative parallel to Seacrest Blvd and is extension of NE 1st MMC north of Boynton Beach Blvd.	$1,050,000		$1,050,000	1,770	10		2025 to 2035
835		SE 1st Avenue	SE 2nd Avenue	0.06	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Project is currently funded. Improvement provides multimodal alternative parallel to Seacrest Blvd and is extension of NE 1st MMC north of Boynton Beach Blvd.	$630,000	$315,000	$315,000	360	5	50% by adjacent development	2025 to 2035
840	SE 2nd Avenue	Federal Hwy (US 1)	SE 4th Street	0.08	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$840,000		$840,000	960	5		2025 to 2035
845		SE 3rd Street	SE 1st Street	0.08				$840,000		$840,000	960	5		2025 to 2035
850		SE 1st Street	Seacrest Blvd	0.12				$1,260,000	$630,000	$630,000	720	5	50% by adjacent development	2025 to 2035
855	N/S East 3rd Street	Boynton Beach Blvd	E. Ocean Avenue	0.12	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$1,260,000		$1,260,000	1,440	5		2025 to 2045
860		E. Ocean Avenue	SE 2nd Avenue	0.12				$1,260,000		$1,260,000	1,440	5		2025 to 2045
865	N/S East 4th Street	Boynton Beach Blvd	E. Ocean Avenue	0.12	Curbless Shared Street	City / Developer	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$2,100,000		$2,100,000	3,540	10		2025 to 2035
870		E. Ocean Avenue	SE 2nd Avenue	0.12	Curbless Shared Street	City / Developer	Upgrade existing street to a curbless shared street with streetscape enhancements.	$2,100,000		$2,100,000	3,540	10		2025 to 2035
875		SE 2nd Avenue	SE 12th Avenue	0.56	Walking & Streetscape Enhancement	City / Developer	Widen existing sidewalks (8' to 15' wide) and add landscape and street trees within curb extensions and bulb-outs to define on-street parking. Enhance existing streetscape. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$5,880,000		$5,880,000	6,720	5		2025 to 2045
880	SE 5th Avenue	Federal Hwy (US 1)	SE 3rd Street	0.14	Walking & Streetscape Enhancement	City	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$1,470,000		$1,470,000	1,680	5		2025 to 2045
885	Boynton Beach Blvd (SR 804)	Federal Hwy (US 1)	Interstate 95 East Ramps	0.83	Walking & Streetscape Enhancement	FDOT	FDOT has commenced construction (2024) on a 15' wide sidewalk on the south side of the ROW and a 8' wide shared-use path on the north side of the ROW.	$11,564,256	$11,564,256	$0	--	5	100% Federal & State Sources	2025
890	Federal Hwy (US 1)	MLK Jr Blvd (NE 10th Avenue)	Boynton Beach Blvd (SR 804)	0.49	Walking & Streetscape Enhancement	City / FDOT	Coordinate with FDOT to widen existing sidewalks (8' to 15' wide), add streetscape enhancements and decorative marked crosswalks at intersections along both sides of the ROW. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$5,145,000	$2,572,500	$2,572,500	5,880	5	50% Federal & State Sources	2025 to 2045
895		Boynton Beach Blvd (SR 804)	E. Ocean Avenue	0.12				$1,260,000	$630,000	$630,000	1,440	5		2025 to 2045
900		E. Ocean Avenue	Woolbright Road	0.87				$9,135,000	$4,567,500	$4,567,500	10,440	5		2025 to 2045
910	High Ridge Road	Miner Road	NW 25th Avenue	0.32	Complete Street Road Widening (4 Lanes)	City	Widen from 2 lanes to 4 lane divided with 10' shared-use paths on both sides of the ROW. Project is in the 2045 LRTP.	$6,400,000		$6,400,000	7,834	20		2025 to 2035
915	MLK Jr. Blvd	Railroad Avenue	Seacrest Blvd	0.36	Walking & Streetscape Enhancement	City	Upgrade street to include 8' wide on-street parking, 5' wide sidewalks, 2' valley curbs, 10' travel lanes and streetscape.	$3,780,000		$3,780,000	4,320	5		2025 to 2035
920		Seacrest Blvd	SW 5th Street	0.51				$5,355,000		$5,355,000	6,120	5		2025 to 2035

APPENDIX F: STREETS PLAN

Project ID	Street	From	To	Length (Miles)	Project Type (Streets Plan Map)	Construction / Maintenance Entity	Project Description	Planning Level Cost (PLC)	Reasonably Anticipated Funding (AF)	Attributable Planning Level Cost (PLCa)	Attributable Person Miles of Capacity (PMCa)	PLC & PMC Notes	Funding Source	Timeframe
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.														
925	Miner Road	High Ridge Road	Congress Avenue	0.96	Complete Street Road Widening (2 Lane Divided)	City / County	Widen from 2 lanes to 2 lane divided with an 8' to 10' wide protected bike lane on one side of the ROW, or 5' to 6' wide protected bike lanes on both sides of the ROW. Construct an 8' to 10' wide shared-use path on the south side of the ROW. Project is in the 2045 LRTP.	$8,880,000		$8,880,000	13,814	15		2025 to 2035
931	SW 8th Street	Boynton Beach Blvd (SR 804)	New Lake Drive	0.65	Complete Street Road Widening (2 Lane Divided)	City	Widen from 2 lanes to 2 lane divided with an 8' to 10' wide protected bike lane on one side of the ROW, or 5' to 6' wide protected bike lanes on both sides of the ROW. Construct an 8' to 10' wide shared-use path on the south side of the ROW. Project is in the 2045 LRTP.	$6,012,500		$6,012,500	9,354	15		2036 to 2045
935	Ocean Avenue	Intercoastal	Federal Hwy (US 1)	0.25	Walking & Streetscape Enhancement	City	Widen existing sidewalks (8' to 15' wide) and add streetscape enhancements. Portions of improvements will occur along with adjacent development. City may amend land development regulations (LDRs) to develop standards.	$2,625,000		$2,625,000	3,000	5		2025 to 2045
940		Federal Hwy (US 1)	Seacrest Blvd	0.37	Curbless Shared Street	City	Upgrade existing street to a curbless shared street with streetscape enhancements.	$6,475,000		$6,475,000	10,915	10		2025 to 2035
945		Seacrest Blvd	SW 4th Street	0.47	Walking & Streetscape Enhancement	City	Widen existing sidewalks to shared-use paths, mark on-street parking, add traffic calming features if warranted. Add landscape and street trees in curb extensions and bulb-outs to define on-street parking.	$4,935,000		$4,935,000	5,640	5		2025 to 2035
950	SE / SW 23rd Avenue	Federal Hwy (US 1)	Seacrest Blvd	0.41	Complete Street Road Widening (2 Lane Divided)	City / County	Coordinate with County to upgrade road from a rural open swale corridor to an urban two (2) lane divided cross-section with 10' to 12' wide shared use paths or 5' to 6' wide sidewalks adjacent to 5' to 6' wide protected bicycle lanes along both sides of the ROW. Add landscape and marked crosswalks at intersecting roads.	$3,792,500		$3,792,500	5,900	15		2036 to 2045
955		Seacrest Blvd	SW 4th Street	0.42	Complete Street Road Widening (2 Lane Divided)			$3,885,000		$3,885,000	6,044	15		2036 to 2045
960	Woolbright Road	Federal Hwy (US 1)	Seacrest Blvd	0.30	Walking & Streetscape Enhancement	City / County	Coordinate with County to widen existing sidewalks (8' to 15' wide), add streetscape enhancements and decorative marked crosswalks at intersections along both sides of the ROW.	$3,150,000		$3,150,000	3,600	15		2025 to 2035
965		Seacrest Blvd	SW 2nd Street	0.25				$2,625,000		$2,625,000	3,000	5		2025 to 2035

Notes: The total lenght of mobility projetcs is 9.71 miles. The total Attributable Planning Level Cost (PLCa) for development activity used to calculate the mobility fee is $88,627,500. The total Attributable Person Miles of Capacity (PMC) for development activity used to calculate the mobility fee is 127,795. The total anticipated funding is $21,906,756.
The Planning Level Cost (PLC) and Person Miles of Capacity (PMC) notes are described in **Appendix K**.

APPENDIX G1

Multimodal Corridors Plan

APPENDIX G1: MULTIMODAL CORRIDORS PLAN

Multimodal Corridors (Colors correspond to Multimodal Corridors Plan Map)	From	To	Length (Miles)	Construction / Maintenance Entity	Project Description	Planning Level Cost (PLC)	Reasonably Anticipated Funding (AF)	Attributable Planning Level Cost (PLCa)	Attributable Person Miles of Capacity (PMCa)	PLC & PMC Notes	Funding Source	Timeframe
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.												
Principal Multimodal Corridor (East) **Major Destinations: Hester Community Center, Palmetto Green Park, Poinciana Elementary, Wilson Park, Galaxy E3 Elementary, Forest Park Elementary, Little League Park, Bethesda Memorial Hospital, & Seacrest Scrub Natural Area.**	Seacrest Blvd @ Mentone Road	Gulfstream Blvd @ Seacrest Blvd	6.71	City	Construct an interconnected multimodal corridor for people walking and bicycling from the northern to the southern limits of the City east of Interstate 95. Multimodal improvements may include bicycle lanes, buffered bicycle lanes, curbless shared streets, sharrows, sidewalks, shared-use paths, traffic calming, and upgraded trails. Construct enhanced street lights, landscape, and hardscape for people walking and bicycling as appropriate. Construct high visibility crosswalks, raised intersections, rectangular rapid flashing beacons (RRFBs) and Pedestrian Hybrid Beacons (PHB). The multimodal improvements are to be designed in a context sensitive manner appropriate for adjacent land uses. The design of multimodal improvements will be based on available right-of-way (ROW), driveway and utility locations, and other natural and manmade features within the ROW.	$13,420,000		$13,420,000	32,208	**25**		2025 to 2045
Principal Multimodal Corridor (West) **Major Destinations: High Ridge Scrub Natural Area, Lake Worth Christian School, Imagine Charter School, TRI-Rail Station, Pioneer Canal Park, Laurel Hills Park & Caloosa Park.**	High Ridge Road @ Newport Place (Discovery Village)	SW 11th Ave @ Caloosa Park	6.10	City	Construct an interconnected multimodal corridor for people walking and bicycling from the northern to the southern limits of the City west of Interstate 95. Multimodal improvements may include bicycle lanes, buffered bicycle lanes, curbless shared streets, sharrows, sidewalks, shared-use paths, traffic calming, and upgraded trails. Construct enhanced street lights, landscape, and hardscape for people walking and bicycling as appropriate. Construct high visibility crosswalks, raised intersections, rectangular rapid flashing beacons (RRFBs) and Pedestrian Hybrid Beacons (PHB). The multimodal improvements are to be designed in a context sensitive manner appropriate for adjacent land uses. The design of multimodal improvements will be based on available right-of-way (ROW), driveway and utility locations, and other natural and manmade features within the ROW.	$12,200,000		$12,200,000	29,280	**25**		2025 to 2045
Major Multimodal Corridor (East): **Major Destinations: Rolling Green Elementary, Palmetto Green Park, Downtown, Future Rail Station, Woolbright Mobility District, Betty Thomas Park, & Seacrest Scrub Natural Area**	NE 1st Lane @ NE 26th Avenue	Seacrest Blvd @ SE 31st Avenue	5.72	City	Construct an interconnected multimodal corridor for people walking and bicycling. Multimodal improvements may include bicycle lanes, buffered bicycle lanes, curbless shared streets, sharrows, sidewalks, shared-use paths, traffic calming, and upgraded trails. Construct enhanced street lights, landscape, and hardscape for people walking and bicycling as appropriate. Construct high visibility crosswalks, raised intersections, rectangular rapid flashing beacons (RRFBs) and Pedestrian Hybrid Beacons (PHB). The multimodal improvements are to be designed in a context sensitive manner appropriate for adjacent land uses. The design of multimodal improvements will be based on available right-of-way (ROW), driveway and utility locations, and other natural and manmade features within the ROW. Portion of the Corridor uses the US 1 Multimodal Corridor between SE 12th Ave and SE 21st Ave,	$11,440,000	$3,247,000	$8,193,000	27,456	**25**	100% Federal & State Funding for SE 1st Street	2025 to 2045
Major Multimodal Corridor (West) **Major Destinations: Boynton Beach High School, Renaissance Commons, Boynton Beach Mall, & Congress Middle School**	Park Ridge Blvd @ High Ridge Blvd	Ocean Drive @ SW 18th Street	3.34	City	Construct an interconnected multimodal corridor for people walking and bicycling. Multimodal improvements may include bicycle lanes, buffered bicycle lanes, curbless shared streets, sharrows, sidewalks, shared-use paths, traffic calming, and upgraded trails. Construct enhanced street lights, landscape, and hardscape for people walking and bicycling as appropriate. Construct high visibility crosswalks, raised intersections, rectangular rapid flashing beacons (RRFBs) and Pedestrian Hybrid Beacons (PHB). The multimodal improvements are to be designed in a context sensitive manner appropriate for adjacent land uses. The design of multimodal improvements will be based on available right-of-way (ROW), driveway and utility locations, and other natural and manmade features within the ROW. Coordination will be required with the Palm Beach County School Board, Palm Beach County, FDOT, the South Florida Water Management District, the Lake Worth Drainage District and private property owners.	$6,680,000		$6,680,000	16,032	**25**		2025 to 2045
Major Multimodal Corridor (US 1) **Includes Major Multimodal Corridor East between SE 12th Ave & SE 21st Ave** **Major Destinations: Intracoastal Park, Harvey E. Oyer Jr Park, Downtown, Woolbright Mobility District, & Jaycee Park**	US 1 @ Northern City Limits	US 1 @ Gulfstream Blvd	4.38	City / State	Multimodal improvements include high visibility buffered bicycle lanes. Construct high visibility crosswalks and Pedestrian Hybrid Beacons (PHB). The design of buffered bicycle lanes will be based on available right-of-way (ROW), driveway and utility locations, and other features within the ROW. Coordination will be required with FDOT.	$8,760,000	$4,380,000	$4,380,000	21,024	**25**		2025 to 2045
Major Multimodal Corridor (Galaxy) **Major Destinations: (Principal, Major & US 1 Multimodal Corridors, Galaxy E3 Elementary, Galaxy Park, & Barton Memorial Park)**	US 1 @ SE 6th Avenue	Primary Multimodal Corridor (East) @ NW 12th Avenue	1.64	City	Construct an interconnected multimodal corridor for people walking and bicycling. Multimodal improvements may include bicycle lanes, buffered bicycle lanes, curbless shared streets, sharrows, sidewalks, shared-use paths, traffic calming, and upgraded trails. Construct enhanced street lights, landscape, and hardscape for people walking and bicycling as appropriate. Construct high visibility crosswalks, raised intersections, rectangular rapid flashing beacons (RRFBs) and Pedestrian Hybrid Beacons (PHB). The multimodal improvements are to be designed in a context sensitive manner appropriate for adjacent land uses. The design of multimodal improvements will be based on available right-of-way (ROW), driveway and utility locations, and other natural and manmade features within the ROW. Coordination will be required with the Palm Beach County School Board, FDOT, and the Florida East Coast Railway (FEC).	$3,280,000		$3,280,000	7,872	**25**		2025 to 2045
Major Multimodal Corridor (Gateway Blvd)	US 1 @ Gateway Blvd	US 1 @ Congress Ave	2.24	City	Gateway Blvd is a major east-west vehicular corridor. The available ROW along the corridor varies greatly. Between US 1 and 1st Street NE, the corridor consist of enhancements to the existing bicycle lanes. Between 1st Street NE and Seacrest Blvd, there is a proposal for shared-use paths as part of the Principal Multimodal Corridor (East). Between Seacrest Blvd and Congress Avenue, the proposal is for wider sidewalks and buffered bicycle lanes.	$4,480,000		$4,480,000	10,752	**25**		2025 to 2045
Major Multimodal Corridor (Boynton Beach Blvd)	E. Boynton Beach Blvd @ E. Marina Way	W. Boynton Beach Blvd @ Winchester Park Blvd	2.25	City / State	The Boynton Beach Blvd Corridor is shown for connectivity purposes. The position of the corridor east of US 1 exist. The portion of the corridor between US 1 and I-95 is under construction. The portion from I-95 to Congress Ave is funded. Shared-use paths are proposed between Congress and Winchester Park Blvd. PLC for	$5,520,000	$5,244,000	$276,000	10,800	**25**	95% to 100% Federal & State funding	2025 to 2045
Minor Multimodal Corridor (East)	Multiple Locations east of Interstate 95		5.37	City	Multimodal improvements include either on-street bicycle lanes and filling in sidewalk gaps, or the construct of a shared-use path. The corridos provide connectivity between Principal and Major Multimodal Corridors and also connections to schools and parks. Due to ROW and differences is existing sidewalks, the needed improvements vary along Corridors.	$10,740,000		$10,740,000	25,776	**25**		2025 to 2045
Minor Multimodal Corridor (West)	Multiple Locations west of Interstate 95		5.38	City	Multimodal improvements include either on-street bicycle lanes and filling in sidewalk gaps, or the construct of a shared-use path. The corridos provide connectivity between Principal and Major Multimodal Corridors and also connections to schools and parks. Due to ROW and differences is existing sidewalks, the needed improvements vary along Corridors.	$10,760,000		$10,760,000	25,824	**25**		2025 to 2045
Multimodal Corridor Evaluation	Multiple Locations east of Interstate 95		1.47	City	There are two proposed corridors to cross Interstate 95 and the TRI-Rail tracks west of I-95. Both corridors are longer term visions to enhance multimodal connectivity between Boynton Beach east and west of I-95 without the need for people walking and bicycling to travel along multi-lane arterials. Both corridors require additional evaluation to determine the feasibility of the proposed improvements.	$1,470,000		$1,470,000	-	**30**		2025 to 2045
Boardwalks	Multiple Locations along Intercoastal Waterway		0.84	City	Multimodal improvements include construction of a new 12' to 14' boardwalk for fill small gap between existing boardwalks along the Intercoastal. The boardwalks will also connect to existing City parks. Future water taxi stops may also be located along the boardwalk or at parks along the intercoastal.	$12,600,000		$12,600,000	7,056	**35**		2025 to 2045

Notes: The total length of mobility projects is 45.44 miles. The total Attributable Planning Level Cost (PLCa) for development activity used to calculate the mobility fee is $88,479,000. The total Attributable Person Miles of Capacity (PMC) for development activity used to calculate the mobility fee is 214,080. The total anticipated funding is $12,871,000.
The Planning Level Cost (PLC) and Person Miles of Capacity (PMC) notes are described in **Appendix K**.

APPENDIX G2

Multimodal Corridors Plan Detail: East

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Principal Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	Mentone Road	Seacrest Blvd	Ocean Parkway	0.17	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes; (2) an 8' to 10' wide shared-use path by replacing sidewalk on southside of ROW; (3) a 5' wide sidewalk adjacent to the existing sidewalk on the south side of the ROW; or (4) an 8' to 10' wide shared-use path on the north side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Ocean Parkway	Mentone Road	Atlantic Drive	0.38	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes and 5' to 6' sidewalks on both sides of the ROW; or (2) an 8' to 10' shared-use path on one side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
		Atlantic Drive	Miner Road	0.17	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes on both sides of the ROW through restriping of existing travel lanes and a 5' to 6' wide sidewalk on the east side of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on west side of ROW; (3) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW; or (4) an 8' to 10' shared-use path on the east side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible. Construct a raised intersection at Miner Rd & Ocean Pkwy with high visibility crosswalks.
		Miner Road	4th Court NE	0.10	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes on both sides of the ROW through restriping of existing travel lanes; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
Principal Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	4th Court NE	Ocean Parkway	NE 27th Court	0.06	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes on both sides of the ROW through restriping of existing travel lanes; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 27th Court	4th Court NE	NE 1st Street	0.14	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes on both sides of the ROW through restriping of existing travel lanes and fill in sidewalk gaps on the southside of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on south side of the ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the north side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 1st Street	NE 27th Court	NE 26th Avenue	0.11	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 1st Lane	NE 26th Avenue	Gateway Blvd	0.24	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on west side of ROW; or (3) a parallel 5' wide sidewalk adjacent to the existing sidewalk. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	NE 26th Avenue	Gateway Blvd	0.35	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate the addition of green pavement markings to the existing bicycle lanes at intersections and driveways, and at the approach and departure of access connections. Evaluate periodic green pavement markings on the corridor, even if a conflict is not present, to increase visibility of the bicycle lanes. Construct high visibility crosswalks at Gateway Blvd.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Major Multimodal Corridor (Gateway Blvd)	Gateway Blvd	Federal Hwy (US 1)	NE 4th Street	0.16	**Major Multimodal Corridor (Gateway Blvd)**	City	Add green pavement markings to increase visibility of existing bicycle lanes. Provide a 1' wide buffer along existing bike lane by adding a parallel 4" pavement markings and install RPMs within the buffer. Implement access management thru treatments such as a shared driveway or a median separated drive-aisle along the south side of ROW, to be constructed in conjunction with future redevelopment of the parcels.
		NE 4th Street	NE 1st Lane	0.51	**Major Multimodal Corridor (Gateway Blvd)**	City	Reconfigure existing travel lanes to narrow the thru-lanes to 10' or 11' wide and a 11' to 12' wide center turn lane. Provide 5' to 6' wide buffered bicycle lanes with green pavement markings and install RPMs within the buffer.
		NE 1st Lane	Seacrest Blvd	0.05	**Major Multimodal Corridor (Gateway Blvd)**	City	Replace existing sidewalks with 8' to 10' wide shared-use paths on both sides of the ROW. Provide enhanced crosswalks across NE 1st Street with on and off-ramps from the shared-use paths to the bicycle lanes east of NE 1st Street. The improvement was require acquisition of ROW or easements. Due to the high traffic volumes and speed limits, sharrows are not recommended and on-street bicycle lanes cannot be provided. The safest alternative are shared-use paths with on and off ramps to the bicycle lanes on Gateway Blvd east of NE 1st Street. Add do not block the box signage on intersection approaches with Gateway Blvd.
		Seacrest Blvd	I-95 East Ramps	0.14	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing and future interchange improvements. Currently 2045 LRTP project.
Multimodal Connector (Connectivity to Rolling Greens Elementary School & Rosemary Scrub Natural Area)	Miner Road	Seacrest Blvd	Ocean Parkway (Principal Multimodal Corridor East)	0.20	**Minor Multimodal Corridor (East)**	City / County	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on north side of ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on south side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on the south side of the ROW, sidewalk maybe separated from existing sidewalk to accommodate existing landscape or replace and enhance existing landscape. Construct high visibility crosswalk with a raised island and either a rapid rectangular flashing beacon (RRFB) or pedestrian hybrid beacon (PHB) on Seacrest Blvd at Miner Road to access Rosemary Scrub Natural Area and for Rolling Green Elementary School. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
		Ocean Parkway (Principal Multimodal Corridor East)	Summit Road	0.20	**Minor Multimodal Corridor (East)**	City / County	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on south side of ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on south side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on the south side of the ROW, sidewalk maybe separated from existing sidewalk to accommodate existing landscape or replace and enhance existing landscape. Construct high visibility crosswalk or raised intersection at Ocean Parkway (part of Principal Multimodal Corridor East). Construct high visibility crosswalk with a rapid rectangular flashing beacon (RRFB) on Miner Road to access Rolling Green Elementary School. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Rolling Green Elementary	Miner Road	NE 26th Avenue	0.23	**Minor Multimodal Corridor (East)**	City / School Board	To the extent feasible while ensuring student safety, provide a continuous multimodal corridor to connect Miner Road and proposed improvements to NE 26th Avenue (Major Multimodal Corridor East). Connection would be after NE 26th Avenue improvements. Corridor would be for school use only and open during school hours. Requires coordination with Palm beach County School Board.
Major Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	NE 26th Avenue	NE 1st Street (Principal Multimodal Corridor East)	NE 4th Street	0.50	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on north side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on the north side of the ROW, sidewalk maybe separated from existing sidewalk to accommodate existing landscape or replace and enhance existing landscape. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 4th Street	NE 26th Avenue	Gateway Blvd	0.33	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on east side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on the east side of the ROW, sidewalk maybe separated from existing sidewalk to accommodate existing landscape or replace and enhance existing landscape. Construct high visibility crosswalk with a raised island and either a rapid rectangular flashing beacon (RRFB) or pedestrian hybrid beacon (PHB) on Gateway Blvd at NE 4th Street. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
MULTIMODAL CORRIDORS PROPOSED BETWEEN GATEWAY BLVD & BOYNTON CANAL							
Principal Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	NE 1st Lane	Gateway Blvd	NE 19th Avenue	0.27	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Add high visibility crosswalks or a raised intersection at NE 19th Avenue. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 19th Avenue	NE 1st Lane	Seacrest Blvd	0.06	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Construct a high visibility crosswalk with a raised island with either a rapid rectangular flashing beacon (RRFB) or pedestrian hybrid beacon (PHB) on Seacrest Blvd at NE 19th Avenue. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Hester Community Center	NE 19th Avenue	17th Ave NW	0.18	**Principal Multimodal Corridor (East)**	City	Construct an 8' to 10' wide shared-use path within the Hester Community Center parallel to Seacrest Blvd, but outside of the Seacrest Blvd ROW. The shared-use path can meander through the Community Center parcel to the extent the corridor is accessible and not enclosed by gates or a fence. The shared-use path can replace existing sidewalks within the Hester Community Center or be constructed parallel. If land is constrained, the shared-use path can be narrowed to a 5' to 6' wide shared-use path where it runs parallel to existing sidewalks on Seacrest Blvd and 17th Ave NW. The alignment is conceptual and subject to change. Where the shared-use path runs parallel to an existing sidewalk within the Community Center, the width can be reduced to 5' to 6' wide.
	NW 1st Court	17th Avenue NW	NW 14th Avenue	0.28	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Construct a high visibility crosswalk to raised crosswalk on 17th Ave NW at NW 1st Court. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 14th Avenue	NW 1st Court	Seacrest Blvd	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the either side of the ROW. Construct a high visibility crosswalk, marked bike lanes, or a raised raised intersection at NW 1st Court and NW 14th Avenue. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Seacrest Blvd (west side of ROW)	NE 14th Avenue	Palmetto Green Trail (Boynton Canal)	0.11	**Principal Multimodal Corridor (East)**	City / County	Widen, if feasible, sidewalk on west side of ROW to 8' to 10' shared-use path. Would require property acquisition. Upgrade, if necessary, pedestrian bridge over Boynton Beach Canal on west side of Seacrest Blvd. Upgrade connection to Palmetto Green Trail. Construct a Pedestrian Hybrid Beacon (PHB) at intersection of Seacrest & NE 14th Ave and a PHB at intersection of Seacrest & Palmetto Greens Trail, or construct raised crosswalks or high visibility crossings and Rectangular Rapid Flashing Beacons (RRFBs) at both intersections.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	Gateway Blvd	NE 15th Avenue	0.54	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate the addition of green pavement markings to the existing bicycle lanes at intersections and driveways, and at the approach and departure of access connections. Evaluate periodic green pavement markings on the corridor, even if a conflict is not present, to increase visibility of the bicycle lanes. Evaluate the construction of high visibility crosswalks and a pedestrian hybrid beacon (PHB) at NE 15th Avenue.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Major Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	NE 4th Street	Gateway Blvd	NE 15th Avenue	0.53	Major Multimodal Corridor (East)	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on both sides of ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on either side of the ROW, and fill in any existing sidewalk gaps. Construct high visibility crosswalk, bike lane markings (if on-street bike lanes) or a raised intersection at NE 15th Ave. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 15th Avenue	Federal Hwy (US 1)	NE 4th Street	0.07	Major Multimodal Corridor (East)	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on the north side of the ROW; or (3) an 8' to 10' wide shared-use path on the south side of the ROW with replacement of existing sidewalk where permitted by the FEC railway. Work with FEC railroad and FDOT to upgrade multimodal crossing and connection to US 1.
	NE 4th Street	NE 15th Avenue	NE 14th Avenue	0.07	Major Multimodal Corridor (East)	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on both sides of ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on either side of the ROW, and fill in any existing sidewalk gaps. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 14th Avenue	NE 4th Street	Seacrest Blvd	0.36	Major Multimodal Corridor (East)	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on south side of ROW; (2) an 8' to 10' wide shared-use path by replacing sidewalk on either side of ROW; or (3) a 5' wide sidewalk parallel to the existing sidewalk on either side of the ROW, and fill in any existing sidewalk gaps. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Seacrest Blvd (east side of ROW)	NE 14th Avenue	Palmetto Green Trail (Boynton Canal)	0.11	Major Multimodal Corridor (East)	City / County	Widen sidewalk on east side of ROW to 8' to 10' shared-use path. Would require property acquisition. Construct a 10' to 12' wide pedestrian bridge over Boynton Beach Canal on east side of Seacrest Blvd. Upgrade Palmetto Green Trail connections. In the interim, with the construction of RRFBs or PHBs at 14th Ave on the northside of the canal and the Palmetto Green Trail on the southside of the canal, the corridor can utilize the west side multimodal improvements. If easements or ROW could be acquired and use of ROW granted by the SFWMD, the bridge could be located anywhere between US Hwy 1 and Seacrest Blvd.
Boynton Canal Multimodal Corridor Evaluation (East)	Boynton Canal Multimodal Corridor	NW 1st Court (Principal Multimodal Corridor East)	High Ridge Rd	0.75	Multimodal Corridor Evaluation	City / FDOT	Evaluate the construction of a multimodal corridor that includes a crossing of Interstate 95, the TRI-Rail railroad tracks, and the Boynton Canal. The crossing of I-95 and the railroad tracks would be either by a multimodal overpass bridge or a multimodal underpass. The Boynton Canal crossing would feature a multimodal bridge. The multimodal corridor should accommodate people walking and bicycling. The width of multimodal improvements would be based on the modes of travel accommodated. The evaluation should include a 10' to 12' wide shared-use path or multi-use trail through City property west of 4th Street and either: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared use path replacing the existing sidewalk on either side of the ROW; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW along 4th Street NW and NW 14th Ave.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	NE 15th Avenue	Boynton Canal	0.16	Major Multimodal Corridor (US 1)	City / FDOT	Evaluate the addition of green pavement markings to the existing bicycle lanes at intersections and driveways, and at the approach and departure of access connections. Evaluate periodic green pavement markings on the corridor, even if a conflict is not present, to increase visibility of the bicycle lanes.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
MULTIMODAL CORRIDORS PROPOSED BETWEEN BOYNTON CANAL & BOYNTON BEACH BLVD							
Principal Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	Palmetto Greens Trail (West) (Boynton Canal)	Seacrest Blvd	NW 13th Avenue	0.38	**Principal Multimodal Corridor (East)**	City	Widen existing multi-use trail to 12' wide to accommodate people walking and bicycling. Add enhanced landscape and hardscape features along the trail and shade trees or structures to the extent permitted by regulatory agencies.
	NW 4th Street	NW 13th Avenue	MLK Jr Blvd (NW 10th Ave)	0.15	**Principal Multimodal Corridor (East)**	City	Add 4' to 5' wide on-street bicycle lanes with green pavement markings and provide 16' to 18' of pavement width for motor vehicle travel without a marked center line. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible. Construct high visibility crosswalks or a raised intersection at MLK Jr. Blvd.
	NW 4th Street	MLK Jr Blvd (NW 10th Ave)	NW 8th Avenue	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' wide sidewalk along the east side of the ROW; (2) an 8' to 10' wide shared-use path on east side of ROW; (3) an 8' to 10' wide shared-use path on west side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible. Construct high visibility crosswalks or a raised intersection at NW 8th Ave.
	NW 4th Street	NW 8th Avenue	NW 4th Avenue	0.25	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes and 5' wide sidewalks on both sides of the ROW ; or (2) an 8' to 10' wide shared-use path on either side of ROW and a 5' wide sidewalk on the opposite side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 4th Street	NW 4th Avenue	Boynton Beach Blvd (SR 804)	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' wide sidewalk along the east side of ROW; (2) an 8' to 10' wide shared-use path on east side of ROW; (3) an 8' to 10' wide shared-use path on west side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW. Construct a raised intersection or add enhanced pavement markings at NW 4th Avenue intersection. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
Multimodal Connector (Connectivity to Poinciana Elementary School & Palmetto Green Trail)	Poinciana Elementary	Palmetto Greens Trail (West)	Poinciana Elementary	0.22	**Minor Multimodal Corridor (East)**	City / School Board	To the extent feasible while ensuring student safety, provide a continuous multimodal corridor to connect the Palmetto Greens Trail (West) with Poinciana Elementary. Portions of the corridor access may be limited for school use only and open during school hours. Requires coordination with Palm beach County School Board.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Major Multimodal Corridor East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd	Palmetto Greens Trail (East)	Seacrest Blvd	NE 13th Avenue	0.20	**Major Multimodal Corridor (East)**	City	Widen existing multi-use trail to 10' to 12' wide to accommodate people walking and bicycling. Add enhanced landscape and hardscape features along the trail and shade trees or structures to the extent permitted by SFWMD.
	NE 13th Avenue	Palmetto Greens Trail (East)	NE 2nd Street	0.04	**Major Multimodal Corridor (East)**	City	Add 5' to 6' sidewalks along south side of ROW or evaluate the most appropriate treatments to calm traffic, lowers speeds, and provide a high visibility connection between the trail connection and NE 2nd Street. Consider raised intersection or use of decorative pavers or art along NE 13th Ave to transition between the trail connection and NE 2nd Street. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 2nd Street	NE 13th Avenue	MLK Jr. Blvd (NE 10th Avenue)	0.16	**Major Multimodal Corridor (East)**	City	Convert NE 2nd Street to a bicycle Blvd. Evaluate the most appropriate treatments to calm traffic to provide safe speeds for people to walk and bicycle and slow down motor vehicles. Use pavement markings and signage to indicate priority route for multimodal travel. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 2nd MMC	MLK Jr. Blvd (NE 10th Avenue)	NE 9th Avenue	0.07	**Major Multimodal Corridor (East)**	City	Construct a 12' to 14' wide multi-use trail between Martin Luther King Jr Blvd and NE 9th Ave. This property is currently owned by the Boynton Beach CRA. As an alternative to a multi-use trail, consider extension of NE 2nd Street as either a complete street or a curbless shared street. Property ownership varies between MLK Jr Blvd and NE 9th Ave. If an extension of NE 2nd Street is not viable, evaluate other connection options and property acquisition.
	NE 9th Avenue	NE 2nd MMC	NE 1st Street	0.07	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 1st Street	NE 9th Avenue	NE 6th Avenue	0.17	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the east side of the ROW; or (2) an 8' to 10' wide shared-use path on the west side of ROW where there is no existing path or sidewalk. Evaluate the feasibility of adding on-street parking along one side of the ROW to slow down traffic, in conjunction with the multimodal improvement, if ROW is available. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 1st Street	NE 6th Avenue	NE 4th Avenue	0.13	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the east side of the ROW; or (2) an 8' to 10' wide shared-use path on the west side of ROW where there is no existing path or sidewalk. Evaluate the feasibility of adding on-street parking along one side of the ROW to slow down traffic, in conjunction with the multimodal improvement, if ROW is available. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 1st Street	NE 4th Avenue	Boynton Beach Blvd (SR 804)	0.12	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the east side of the ROW; or (2) an 8' to 10' wide shared-use path on the west side of ROW where there is no existing path or sidewalk. Evaluate the feasibility of adding on-street parking along one side of the ROW to slow down traffic, in conjunction with the multimodal improvement, if ROW is available. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Multimodal Connector (Connectivity between MLK Jr Blvd, US Hwy 1 & Palmetto Green Trail)	Palmetto Greens Trail (East)	NE 13th Avenue	Railroad Avenue	0.23	**Minor Multimodal Corridor (East)**	City	Widen existing multi-use trail to 10' to 12' wide to accommodate people walking and bicycling. Add enhanced landscape and hardscape features along the trail and shade trees or structures to the extent permitted by SFWMD.
	Railroad Avenue	NE 13th Avenue	MLK Jr. Blvd (NE 10th Avenue)	0.17	**Minor Multimodal Corridor (East)**	City	Construct a 5' wide sidewalk along the west side of the ROW.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	Boynton Canal	MLK Jr. Blvd (NE 10th Avenue)	0.21	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate the addition of green pavement markings to the existing bicycle lanes at intersections and driveways, and at the approach and departure of access connections. Evaluate periodic green pavement markings on the corridor, even if a conflict is not present, to increase visibility of the bicycle lanes. Restripe north bound buffered bicycle lane across Boynton Canal to a proper buffered bicycle lane. Add buffer to bike lanes on both sides of ROW from Boynton Canal to MLK Jr Blvd.
Multimodal Connector (Connects Major Multimodal Corridors (East & US 1), Principal Multimodal Corridor (East) & Galaxy Park Trails)	MLK Jr. Blvd (NE 10th Avenue)	Federal Hwy (US 1)	Railroad Avenue	0.04	**Minor Multimodal Corridor (East)**	City	Widen existing sidewalks along both sides of the ROW to 8' to 10' wide shared-use paths. Widen sidewalks across FEC Railroad to the maximum extent feasible and allowed by FEC.
	Railroad Avenue	MLK Jr. Blvd (NE 10th Avenue)	NE 9th Avenue	0.07	**Minor Multimodal Corridor (East)**	City	Convert to a one-way road northbound. Construct an 8' to 10' wide shared-use path along the west side of the ROW where adequate ROW exist or can be acquired. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 9th Avenue	Railroad Avenue	NE 2nd MMC	0.15	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. NE 9th Ave between NE 2nd MMC and NE 1st Street is part of Major Multimodal Corridor (East). Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 8th Avenue (portion of the corridor from NE 2nd MMC to NE 1st Street is part of the Major Multimodal Corridor East)	NE 1st Street	Seacrest Blvd	0.13	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. The multimodal corridor can be located on either NE 8th Ave or NE 7th Ave, whichever provides a safer crossing of Seacrest Blvd. Provide a raised median and a high visibility crosswalk with an rectangular rapid flashing beacon (RRFB) at the intersection with Seacrest Blvd. The high visibility crosswalk could be located at NE 7th Avenue to serve existing transit stops. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 8th Corridor (includes portions of NW 1st Street)	Seacrest Blvd	NW 2nd Street	0.24	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in existing sidewalk gaps on NW 8th Ave between Seacrest Blvd and NW 1st Street; or (2) an 8' to 10' wide shared-use path on either side of ROW. A portion of this corridor uses NW 1st Street to connect NW 8th Avenue. If on-street bicycle lanes are constructed, 5' wide sidewalks should be constructed along NW 1st Street and NW 8th Avenue between NW 1st Street and NW 2nd Street. Construct a raised intersection with NW 2nd Street to address existing intersection off-set. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 8th Avenue	NW 2nd Street	NW 4th Street	0.15	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalks on one side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 8th Avenue	NW 4th Street	Galaxy Park Trail	0.10	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on south side of ROW. Corridor cross-section should be consistent with appropriate multimodal connections to the Major Multimodal Corridor (Galaxy).

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	MLK Jr. Blvd (NE 10th Avenue)	NE 6th Avenue	0.25	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Evaluate the construction of high visibility crosswalks and a pedestrian hybrid beacon (PHB) at NE 6th Avenue. Longer term evaluate the construction of curbside bicycle lanes and modify existing chevrons and on-street parking. Consider requirements for additional ROW to add on-street parking or curbside or buffered bicycle lanes as part of future redevelopment.
Major Multimodal Corridor (Galaxy Elementary & Galaxy Park)	NE 6th Avenue	Federal Hwy (US 1)	NE 3rd Street	0.13	**Major Multimodal Corridor (Galaxy)**	City	In the interim, the use of sharrows with high visibility markings can be provided. Conduct a study to determine the most appropriate multimodal facility as adjacent parcels redevelop. Ideally on-street bike lanes and sidewalks on both sides of the ROW or an 8' to 10' shared-use path would be constructed as adjacent land uses redevelop. NE 6th is the only FEC railroad crossing between Boynton Beach Blvd and MLK Jr Blvd. This would be a longer term project as ROW is constrained and adjacent land uses are industrial with paved access and parking across the existing ROW.
	NE 6th Avenue	NE 3rd Street	NE 1st Street (Major Multimodal Corridor East)	0.13	**Major Multimodal Corridor (Galaxy)**	City	Upgrade sidewalk on north side of ROW to an 8' to 10' wide shared-use path. Multimodal improvement subject to change based on type of facility connecting to Federal Hwy (US 1). Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NE 4th Avenue (Corridor uses part of Major Multimodal Corridor East between NE 6th and NE 4th)	NE 1st Street (Major Multimodal Corridor East)	Seacrest Blvd	0.12	**Major Multimodal Corridor (Galaxy)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalks on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Provide a high visibility crosswalk with a raised median and an RRFB or pedestrian hybrid beacon (PHB) at the intersection with Seacrest Blvd. Corridor could be relocated to NE 5th Avenue. The current ROW is constrained, additional ROW would be needed from the CRA prior to redevelopment of adjacent parcels. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible. Type of improvement subject to change based on LDRs and redevelopment of adjacent land uses.
	NW 4th Avenue	Seacrest Blvd	NW 4th Street	0.34	**Major Multimodal Corridor (Galaxy)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on south side of ROW. The south side of the ROW would provide a connection between Galaxy Park and the Barton Memorial Park Trail. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 4th Avenue	NW 4th Street	Galaxy Park	0.10	**Major Multimodal Corridor (Galaxy)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on either side of ROW replacing the existing sidewalk; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Galaxy Park Trail	NW 4th Avenue	NW 8th Avenue	0.36	**Major Multimodal Corridor (Galaxy)**	City	Upgrade existing sidewalk within Galaxy Park to provide an 8' to 10' wide shared use path. Construct an 8' to 10' wide shared-use path from the baseball field to NW 8th Avenue in a context sensitive manner. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	NW 8th Avenue	NW 4th Street	Barton Memorial Park Trail	0.06	**Major Multimodal Corridor (Galaxy)**	City	Construct an 8' to 10' wide shared-use path on south side of ROW to connect the Galaxy Park Trail and the Barton Memorial Park Trail. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	Barton Memorial Park Trail	NW 8th Avenue	NW 12st Avenue	0.25	**Major Multimodal Corridor (Galaxy)**	City	Enhance and upgrade the Barton Memorial Park Trail to include hardscape and landscape improvements. Install street lighting for people walking and bicycling.
	NW 12th Avenue	Barton Memorial Park Trail	NW 4th Street (Principal Multimodal Corridor East)	0.15	**Major Multimodal Corridor (Galaxy)**	City	Construct on-street bicycle lanes or a bicycle blvd if ROW is constrained to connect Barton Memorial Park and Principal Multimodal Corridor (East). Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	NE 6th Avenue	Boynton Beach Blvd (SR 804)	0.25	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Construct high visibility crosswalks at Boynton Beach Blvd. Longer term evaluate the construction of curbside bicycle lanes and modify existing chevrons and on-street parking. Consider requirements for additional ROW to add on-street parking or curbside or buffered bicycle lanes as part of future redevelopment.
Major Multimodal Corridor (Boynton Beach Blvd)	E. Boynton Beach Blvd	NE 6th Street	US Hwy 1	0.16	**Major Multimodal Corridor (Boynton Beach Blvd)**	City	Corridor was updated based on prior mobility plan. Shown for connectivity and illustration purposes only.
	E. Boynton Beach Blvd	US Hwy 1	I-95 East Ramps	0.89	**Major Multimodal Corridor (Boynton Beach Blvd)**	FDOT	Project currently under construction with 9' wide sidewalks on the north and 15' wide sidewalks on the south. Shown for connectivity and illustration purposes only.
MULTIMODAL CORRIDORS PROPOSED BETWEEN BOYNTON BEACH BLVD & WOOLBRIGHT RD							
Principal Multimodal Corridor East of Interstate 95 providing enhanced multimodal access to Forest Park Elementary School	Boynton Beach Blvd (SR 804)	NW 4th Street	NW 3rd Street	0.06	**Principal Multimodal Corridor (East)**	City / FDOT	Construct high visibility crosswalks and a pedestrian hybrid beacon (PHB) to connect the Principal Multimodal Corridor East of Interstate 95 across Boynton Beach Blvd.
	NW 3rd Street	Boynton Beach Blvd (SR 804)	W. Ocean Avenue	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on east side of ROW; (3) an 8' to 10' wide shared-use path on west side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW. Construct a raised intersection or add enhanced pavement markings at W. Ocean Ave intersection. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 3rd Street	W. Ocean Avenue	SW 2nd Avenue	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on east side of ROW; (3) an 8' to 10' wide shared-use path on west side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 3rd Street	SW 2nd Avenue	SW 4th Avenue	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on west side of ROW; (3) an 8' to 10' wide shared-use path on east side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the east side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 4th Avenue	SW 3rd Street	SW 3rd Street	0.08	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill sidewalk gap on the north side of ROW; (2) an 8' to 10' wide shared-use path on south side of ROW; or (3) an 8' to 10' wide shared-use path on north side of ROW replacing existing sidewalk. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 3rd Street	SW 4th Avenue	SW 14th Avenue	0.57	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on east side of ROW; (3) an 8' to 10' wide shared-use path on west side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 14th Avenue	SW 3rd Street	SW 2nd Street	0.13	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Construct a raised intersection or high visibility crosswalk at SW 2nd Street. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 2nd Street	SW 14th Avenue	Woolbright Road	0.07	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on the west side of the ROW; (2) an 8' to 10' wide shared-use path on west side of ROW; (3) an 8' to 10' wide shared-use path on east side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the east side of the ROW. Construct a pedestrian hybrid beacon (PHB) on Woolbright Road at SW 2nd Street. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Major Multimodal Corridor East of Interstate 95 provide an interconnected multimodal alternative to Seacrest Blvd	NE / SE 1st Street	Boynton Beach Blvd (SR 804)	SE 2nd Avenue	0.25	**Major Multimodal Corridor (East)**	City	Various multimodal upgrades constructed by proposed developments or proposed curbless shared street to be constructed by the City (See Streets Plan)
	SE 1st Street	SE 2nd Avenue	Woolbright Road	0.75	**Major Multimodal Corridor (East)**	City	Funded 10' wide shared-use path on the west side of the ROW.
	SE 12th Avenue	Federal Hwy (US 1)	SE 1st Street	0.19	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street buffered bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on either side of ROW replacing the existing sidewalk; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Coordinate with FEC Railway on the most appropriate multimodal improvements across railroad tracks and connecting to SE. 1st Street. Provide high visibility crosswalk or raised intersection at SE 1st Street.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	Boynton Beach Blvd (SR 804)	W. Ocean Avenue	0.12	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Construct high visibility crosswalks at W. Ocean Ave.
Ocean Ave Multimodal Corridor Evaluation	Ocean Corridor	SW 3rd Street (Principal Multimodal Corridor East)	SW 8th Street (Principal Multimodal Corridor West)	0.72	**Multimodal Corridor Evaluation**	City / FDOT	Evaluate the construction of a multimodal bridge over Interstate 95 and the railroad tracks for people walking and bicycling. The evaluation shall include the appropriate types of access ramps and stairs along both sides of the Interstate, with enhanced design considerations adjacent to residential dwellings east of I-95. The evaluation would also include determining the most appropriate multimodal improvements to be constructed along W. Ocean Ave (east of I-95) and W. Ocean Drive (west of I-95).
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	W. Ocean Avenue	SE 5th Avenue	0.29	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Evaluate the construction of high visibility crosswalks and a pedestrian hybrid beacon (PHB) at SE 5th Avenue.
Multimodal Connector Major Multimodal Corridor (US 1) to Principal Multimodal Corridor (East)	SE 5th Avenue	Federal Hwy (US 1)	SE 3rd Street	0.14	**Minor Multimodal Corridor (East)**	City	See Streets Plan for Walking and Streetscape Enhancement
	SE 5th Avenue	SE 3rd Street	SE 1st Street	0.11	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Coordinate with FEC Railway on the appropriate type of multimodal improvement across railroad tracks.
	SE 6th Avenue	SE 1st Street	Seacrest Blvd	0.12	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Construct high visibility crosswalk at Seacrest Blvd with either a RRFB or a PHB.
	SW 6th Avenue	Seacrest Blvd	SW 2nd Street	0.25	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill sidewalk gap on the north side of ROW; (2) an 8' to 10' wide shared-use path on south side of ROW; or (3) an 8' to 10' wide shared-use path on north side of ROW replacing existing sidewalk.
	SW 6th Avenue	SW 2nd Street	SW 3rd Street	0.13	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Construct raised intersection or high visibility crosswalk at SW 3rd Street.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	SE 5th Avenue	SE 12th Avenue	0.39	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Evaluate the construction of high visibility crosswalks and a pedestrian hybrid beacon (PHB) at SE 12th Avenue.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Multimodal Connector (Connects Major Multimodal Corridor (East), Principal Multimodal Corridor (East) & Forest Park Elementary School)	SE 12th Avenue	SE 1st Street	Seacrest Blvd	0.11	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on either side of ROW replacing the existing sidewalk; or (3) a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct high visibility crosswalk at Seacrest Blvd with either a RRFB or a PHB.
	SW 12th Avenue	Seacrest Blvd	SW 2nd Street	0.24	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on south side of ROW; (3) an 8' to 10' wide shared-use path on north side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the north side of the ROW.
	SW 12th Avenue	SW 2nd Street	SW 3rd Street	0.13	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on north side of ROW; (3) an 8' to 10' wide shared-use path on south side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the south side of the ROW. Construct raised intersection or high visibility crosswalk at SW 3rd Street. Evaluate for additional traffic calming, if warranted.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	SE 12th Avenue	Woolbright Road	0.19	**Major Multimodal Corridor (US 1) & Major Multimodal Corridor (East)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Construct high visibility crosswalks at Woolbright Road.
MULTIMODAL CORRIDORS PROPOSED BETWEEN WOOLBRIGHT RD & GULFSTREAM BLVD							
Principal Multimodal Corridor (East of Interstate 95 providing an interconnected multimodal alternative to Seacrest Blvd)	Little League Park (Woolbright R	SW 2nd Street	SW 3rd Street	0.13	**Principal Multimodal Corridor (East)**	City	Construct an 8' to 10' shared-use path adjacent to Woolbright Road ROW. If property is constrained, construct a 5' wide sidewalk adjacent to existing sidewalk along Woolbright Road.
	SW 3rd Street	Little League Park (Woolbright Road)	SW 23rd Avenue	0.46	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Construct high visibility crosswalk with an RRFB or PHB at intersection with SW 23rd Avenue.
	SW 23rd Avenue	SW 3rd Street	SW 5th Street	0.20	**Principal Multimodal Corridor (East)**	City / County	Construct an 8' to 10' wide shared-use path and replace the existing sidewalk on the south side of the ROW or provide a separate 5' to 6' wide sidewalk parallel to the existing SW 23rd Avenue to provide a total of 10' to 12' for people walking and bicycling.
	SW 5th Street	SW 23rd Avenue	SW 25th Avenue	0.12	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW and replace the existing sidewalk; or (3) a 5' to 6' wide sidewalk parallel to the existing sidewalk along either side of the ROW.
	SW 5th Street	SW 25th Avenue	SW 27th Avenue	0.17	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in existing sidewalk gaps on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW and replace small portions of the existing sidewalk.
	SW 27th Avenue	SW 5th Street	SW 4th Street	0.05	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW.
	SW 4th Street	SW 27th Avenue	SW 28th Avenue	0.21	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW.
	Churchill Drive	SW 28th Avenue	Chapel Hill Blvd	0.15	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Construct a raised intersection or high visibility crosswalks at Chaple Hill Blvd.
	Chapel Hill Blvd	Churchill Drive	Seacrest Blvd	0.06	**Principal Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW.
	Seacrest Blvd	Chapel Hill Blvd	Gulfstream Blvd	0.48	**Principal Multimodal Corridor (East)**	City / County	Construct on-street bike lanes with green pavement markings similar to the cross-section within Delray Beach.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Multimodal Connector (Forest Hills Park)	SW 25th Avenue	SW 5th Street (Principal Multimodal Corridor East)	SW 6th Street	0.05	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW and replace the existing sidewalk; or (3) a 5' to 6' wide sidewalk parallel to the existing sidewalk along either side of the ROW.
	SW 25th Avenue	SW 6th Street	Forest Hills Park	0.23	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Within the park, either: (1) construct an 8' to 10' wide shared-use path and replace the existing sidewalk; or (2) construct a parallel 5' to 6' wide sidewalk which may be separate from the existing sidewalk to accommodate landscape.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	Woolbright Road	SE 21st Avenue	0.37	**Major Multimodal Corridor (US 1) & Major Multimodal Corridor (East)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Underground existing overhead utilities. Evaluate the construction of high visibility crosswalks and a pedestrian hybrid beacon (PHB) at SE 21st Avenue.
Major Multimodal Corridor East of Interstate 95 provide an interconnected multimodal alternative to Seacrest Blvd	SE 21st Avenue	Federal Hwy (US 1)	SE 3rd Street	0.17	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Construct high visibility crosswalk and a PHB at Federal Hwy (US 1).
	SE 3rd Street	SE 21st Avenue	SE 23rd Avenue	0.14	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the east side of the ROW; (2) an 8' to 10' wide shared-use path on the west side of ROW; (3) an 8' to 10' wide shared-use path on the east side of ROW and replace existing sidewalk.
	SE 23rd Avenue	SE 3rd Street	SE 2nd Street	0.06	**Major Multimodal Corridor (East)**	City	Widen existing sidewalk on the south side of the ROW. Coordinate with FEC Railroad on the appropriate type of multimodal upgrade along the south side of the ROW. Construct a high visibility crosswalk with an RRFB or PHB on SE 23rd Avenue at SE 3rd Street.
	SE 2nd Street	SE 23rd Avenue	SE 26th Avenue	0.19	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW; (2) an 8' to 10' wide shared-use path on east side of ROW; (3) an 8' to 10' wide shared-use path on west side of ROW replacing the existing sidewalk; or (4) a 5' wide sidewalk adjacent to the existing sidewalk on the west side of the ROW.
	SE 26th Avenue	SE 2nd Street	SE 1st Street	0.10	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the north side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW and replace existing sidewalk and fill in sidewalk gaps on the side of the ROW without a shared-use path.
	SE 1st Street	SE 26th Avenue	SE 27th Avenue	0.07	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the west side of the ROW; or (2) an 8' to 10' wide shared-use path on east side of ROW; or (3) construct a 5' wide sidewalk parallel to the existing sidewalk then construct an 8' to 10' wide shared use path to fill existing gap on west side of the ROW.
	SE 27th Avenue	SE 1st Street	SE 2nd Street	0.10	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and construct sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW.
	SE 2nd Street	SE 27th Avenue	SE 31st Avenue	0.39	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the east side of the ROW; or (2) an 8' to 10' wide shared-use path on west side of ROW and fill in the gap in the sidewalk on the east side of the ROW; or (3) construct a 5' wide sidewalk parallel to the existing sidewalk then construct an 8' to 10' wide shared use path to fill existing gap on east side of the ROW. Multimodal corridor may run within portions of Betty Thomas Park.
	SE 31st Avenue	SE 2nd Street	Seacrest Blvd	0.38	**Major Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and construct sidewalk on either side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW. Coordinate with County on access connections to Seacrest Scrub Natural Area if connections can be closed when the natural area is closed to the public.

APPENDIX G2: MULTIMODAL CORRIDOR PLAN DETAIL (EAST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
MULTIMODAL CORRIDORS PROPOSED BETWEEN NORTHERN CITY LIMITS AND GATEWAY BLVD							
Multimodal Connector Connectivity to Principal & Major Multimodal Corridors (East)	Bethesda Hospital (Baptist Healt	SW 23rd Avenue (Principal Multimodal Corridor East)	Seacrest Blvd	0.26	**Minor Multimodal Corridor (East)**	City / Hospital	Coordinate with Bethesda Hospital (Baptist Health) on the construction of a context sensitive multimodal improvement that connects SW 23rd Avenue with Seacrest Blvd. The preference would be a 10' to 12' wide shared-use path either within a ROW or an easement. The intent of the multimodal improvement would be to connect the Principal and Major Multimodal Corridors East with the Hospital. The alignment shown on the map is conceptual and the attempt is to run along the perimeter of the property to minimize any conflicts with internal circulation of the hospital.
	SE 26th Avenue	Seacrest Blvd	SE 1st Street (Major Multimodal Corridor East)	0.18	**Minor Multimodal Corridor (East)**	City	Construct one of the following: (1) on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps on the north side of the ROW; or (2) an 8' to 10' wide shared-use path on either side of ROW and replace existing sidewalk and fill in sidewalk gaps on the side of the ROW without a shared-use path. Construct high visibility crosswalks at Seacrest Blvd.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	SE 21st Avenue	SE 23rd Avenue	0.14	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Underground existing overhead utilities. Construct high visibility crosswalks at SE 23rd Avenue.
	Federal Hwy (US 1)	SE 23rd Avenue	Old Dixie Hwy	0.45	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Underground existing overhead utilities. Evaluate the construction of high visibility crosswalks and a pedestrian hybrid beacon (PHB) at the intersection of US Hwy 1 and Old Dixie Hwy.
Multimodal Connector Major Multimodal Corridor (US 1) to Principal Multimodal Corridor (East)	Old Dixie Hwy	Federal Hwy (US 1)	Gulfstream Blvd	0.79	**Minor Multimodal Corridor (East)**	City	Widen existing sidewalks to shared-use paths or construct protected bicycle lanes adjacent to existing sidewalks along both side of the ROW. Evaluate intersections for multimodal safety enhancements.
	Gulfstream Blvd	Federal Hwy (US 1)	Seacrest Blvd	0.50	**Minor Multimodal Corridor (East)**	City	Widen existing sidewalk on the north side of ROW to a 10' to 12' wide shared-use path. Add landscape and enhanced crosswalks along the north side of the ROW.
Major Multimodal Corridor (US 1)	Federal Hwy (US 1)	Old Dixie Hwy	Gulfstream Blvd	0.67	**Major Multimodal Corridor (US 1)**	City / FDOT	Evaluate adding additional 4" pavement marking adjacent to existing bike lanes along both sides of the ROW to provide an additional buffer. Add periodic green pavement markings along bicycle lanes to increase visibility. Underground existing overhead utilities. Construct high visibility crosswalks at Gulfstream Blvd.
BOARDWALKS PROPOSED BETWEEN GATEWAY BLVD & GULFSTREAM BLVD							
Boardwalks	New Boardwalk	NE 6th Ave	Boynton Beach Blvd	0.18	**Boardwalk**	City	Construct 12' to 14' wide boardwalk along intercoastal.
	New Boardwalk	E Ocean Ave	SE 2nd Ave	0.10	**Boardwalk**	City	Upgrade existing boardwalk along intercoastal adjacent to the Coastal Towers Condo Association.
	New Boardwalk	Snug Harbor Dr	Existing boardwalk at Seagate Condos	0.37	**Boardwalk**	City	Construct 12' to 14' wide boardwalk along intercoastal.
	New Boardwalk	Tuscan Wy (Existing Boardwalk)	Jaycee Park	0.17	**Boardwalk**	City	Construct 12' to 14' wide boardwalk along intercoastal.
	New Boardwalk	Jaycee Park (Existing boardwalk)	Colonial Club (Existing boardwalk)	0.02	**Boardwalk**	City	Construct new 12' to 14' boardwalk in small gap between existing boardwalks at Jaycee Park and the Colonial Club

APPENDIX G3

Multimodal Corridors Plan Detail: West

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)

Corridor	Street	From	To	Length (Mi)	Project Type	Construction / Maintenance Entity	Project Description
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Principal Multimodal Corridor (West of Interstate 95 providing an interconnected multimodal alternative to Congress Avenue) **Connects the following:** **Lake Worth Christian School, Imagine Chancellor School, TRI-Rail Station, Pioneer Canal Park, Laurel Hills Park, Private Community Parks, & Caloosa Park**	High Ridge Rd	Newport Place	Oakwood Ct	0.39	**Principal Multimodal Corridor (West)**	City / County	Widen existing sidewalks to 8' to 10' wide shared-use paths or construct 5' to 6' protected bike lanes parallel to existing sidewalks along both sides of the ROW. Enhances multimodal connectivity to Discovery Village and High Ridge Scrub Natural Area.
	High Ridge Rd	Oakwood Ct	Miner Rd	0.41	**Principal Multimodal Corridor (West)**	City / County	Widen existing sidewalks to 8' to 10' wide shared-use paths or construct 5' to 6' protected bike lanes parallel to existing sidewalks along both sides of the ROW. Enhances multimodal connectivity to Imagine Chancellor Charter School and Lake Worth Christian School.
	High Ridge Rd	Miner Rd	Gateway Blvd	0.55	**Principal Multimodal Corridor (West)**	City	Construct 10' shared-use paths on both sides of the ROW. Project is in the 2045 LRTP. High Ridge is proposed to be widened to four lanes from NW 25th Avenue to Miner Road (See Streets Plan).
	High Ridge Rd	Gateway Blvd	Park Ridge Blvd	0.63	**Principal Multimodal Corridor (West)**	City	Construct a 8' to 10' wide shared-use path west side of the ROW replacing the existing sidewalk. As an alternative, construct a 5' wide sidewalk adjacent to the existing sidewalk along the west side of the ROW.
	High Ridge Rd	Park Ridge Blvd	Stanley Weaver Canal	0.15	**Principal Multimodal Corridor (West)**	City	Construct an 8' to 10' wide shared-use path as a replacement of the existing sidewalk along the west side of the ROW. As an alternative, fill in the gap in the existing sidewalk to the canal and construct a 5' wide sidewalk adjacent to the existing sidewalk.
	Stanley Weaver Canal	High Ridge Rd	Pioneer Canal Park	0.21	**Principal Multimodal Corridor (West)**	City	Construct a 12' wide multimodal bridge across the Stanley Weaver Canal. Construct a 10' to 12' wide shared-use path along the south side of the canal. Coordinate with South FL WMD on use of canal ROW. As an alternative, seek to acquire an easement or purchase ROW from private property and construct the 10' to 12' wide shared-use path along the north side of the ROW and construct the multimodal bridge to connect with Pioneer Canal Park.
	Pioneer Canal Park	Stanley Weaver Canal	NW 13th Avenue	0.27	**Principal Multimodal Corridor (West)**	City	Construct a 10' to 12' wide shared-use path through the park to align with NW 7th Court. The shared-use path may be split into separate 5' to 6' wide paths to maneuver around existing trees or existing structures.
	NW 7th Court	NW 13th Avenue	NW 8th Avenue	0.28	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and complete sidewalk gaps along both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along either side of the ROW and replace the existing sidewalk. Or fill in sidewalk gaps on one side of the ROW and construct a parallel 5' wide sidewalk (Provides a total of 10' of multimodal improvements for walking and bicycling).
	NW 8th Avenue	NW 7th Court	NW 7th Street	0.06	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and a 5' wide sidewalk along the north side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along the south side of the ROW and replace the existing sidewalk. Or construct a parallel 5' wide sidewalk on the south side of the ROW (Provides a total of 10' of multimodal improvements for walking and bicycling). The proposed improvement shifts to NW 7th Street due to limited ROW along NW 7th Court between NW 8th Avenue and NW 4th Avenue.
	NW 7th Street	NW 8th Avenue	NW 5th Avenue	0.16	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and complete sidewalk gaps along both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along either side of the ROW and either replace the existing sidewalk or construct a parallel 5' wide sidewalk. If constructing a shared-use path, fill in gaps on the side of the ROW where the path is constructed.
	Laurel Hills Park	NW 5th Avenue	NW 4th Avenue	0.07	**Principal Multimodal Corridor (West)**	City	Construct an 8' to 10' wide shared-use path through Laurel Hills Park due to a 30' wide ROW along NW 7th Street from NW 5th Avenue to Boynton Beach Blvd. The shared-use path may be split into separate 5' wide paths to maneuver around existing trees or existing structures.
	NW 4th Avenue	NW 7th Street	NW 7th Court	0.05	**Principal Multimodal Corridor (West)**	City	Construct an 8' to 10' wide shared-use path through Laurel Hills Park. The shared-use path may be split into separate 5' wide paths to maneuver around existing trees or existing structures. Construct a raised table-top crosswalk with a vertical crossing to transition from the north side of the ROW to the south side of the ROW and avoid the need to acquire an easement or ROW along the north side of NW 4th Avenue outside of the park parcel.
	NW 7th Court	NW 4th Avenue	Boynton Beach Blvd (SR 804)	0.14	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and complete sidewalk gaps along the west side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along the east side of the ROW and fill in the sidewalk gaps on the west side of the ROW. Or fill in the sidewalk gaps on the west side of the ROW and construct a parallel 5' wide sidewalk on the west side of the ROW (provides a total of 10' for walking and bicycling).

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Principal Multimodal Corridor (West of Interstate 95 providing an interconnected multimodal alternative to Congress Avenue) **Connects the following:** **Lake Worth Christian School, Imagine Chancellor School, TRI-Rail Station, Pioneer Canal Park, Laurel Hills Park, Private Community Parks, & Caloosa Park**	Boynton Beach Blvd (SR 804)	NW 7th Court	SW 8th Street	0.11	**Principal Multimodal Corridor (West)**	City / FDOT	Provide high-visibility cross-walks along the north side of the ROW where crossing an intersection or driveway. Evaluate the acquisition of an easement or ROW to provide a 10' wide shared-use path on the north side of the ROW. Provide high visibility crosswalks at SW 8th Street. Upgraded bicycle lanes and sidewalk improvements are currently funded in FY 25 / 26 as part of a resurfacing project along Boynton Beach Rd.
	SW 8th Street	Boynton Beach Blvd (SR 804)	Ocean Drive	0.28	**Principal Multimodal Corridor (West)**	City	Construct protected bike lanes along both sides of the ROW adjacent to the existing sidewalks. Provide high visibility crosswalks across intersections. If not feasible, add on-street bicycle lanes and a 8' to 10' wide shared-use path along the west side of the ROW. The shared-use path can either replace the existing sidewalk or construct an adjacent 5' wide sidewalk. A center turn lane is also proposed for this corridor (See Streets Plan).
	Ocean Drive	SW 8th Street	SW 18th Street	0.36	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide a raised intersection, high visibility crosswalks, or a roundabout at SW 18th Street. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 18th Street	Ocean Drive	Woolbright Rd	0.84	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide high visibility crosswalks at Woolbright Road. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 18th Street	Woolbright Rd	SW 23rd Avenue	0.56	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide high visibility crosswalks and a pedestrian hybrid beacon (PHB) at SW 23rd Avenue. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 12th Court	SW 23rd Avenue	SW 11th Street	0.25	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps along both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Fill in gaps in the sidewalk system along the side of the ROW where the shared-use path is constructed. Construct a raised intersection or high visibility crosswalks at SW 11th Street. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 11th Street	SW 23rd Avenue	Caloosa Park Trail	0.49	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk along one side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the small portions of existing sidewalks. Construct a raised intersection or high visibility crosswalks at SW 27th Avenue. Construct the improvements to the existing multimodal bridge over the canal. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)

Corridor	Street	From	To	Length (Mi)	Project Type	Construction / Maintenance Entity	Project Description
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Major Multimodal Corridor (West of Interstate 95 providing an interconnected multimodal alternative to Congress Avenue) **Connects the following:** **Boynton Beach High School, Renaissance Commons, Boynton Beach Mall, & Congress Middle School**	Park Ridge Blvd	High Ridge Rd	Alpha Dr	0.41	**Major Multimodal Corridor (West)**	City	Construct a 10' wide shared-use path along the south side of the ROW or add a 5' wide sidewalk adjacent to the existing sidewalk along the north side of the ROW.
	Park Ridge Connector	Park Ridge Blvd	Renaissance Commons Blvd	0.52	**Major Multimodal Corridor (West)**	City / Other Government	Construct a 10' wide shared-use path that connects the proposed Park Ridge Blvd shared-use path and runs along the north side of the Stanley Weaver Canal and includes a multimodal bridge over the Lake Ida Canal to connect with the existing multimodal facility parallel to the Stanley Weaver Canal. If the multimodal facility on the north side of the ROW is privately owned between the Lake Ida Canal and Renaissance Commons Blvd, evaluate construction of an 8' to 10' wide shared-use path within the canal ROW. Coordinate use of canal ROW with School Board and S. FL. WMD.
	Renaissance Commons Blvd	North side of canal	South side of canal	0.03	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Provide high-visibility crosswalks or raised crosswalks and rapid rectangular flashing beacons (RRFBs) on north and south sides of the bridge at the crossing locations for multimodal facilities.
	Renaissance Commons Connector	Renaissance Commons Blvd	Congress Ave	0.15	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Construct an 8' to 10' wide shared-use path or a 5' to 6' wide path on the north side of the existing sidewalk. Coordinate use of canal ROW with S. FL. WMD. Construct a high visibility crosswalk and a pedestrian hybrid beacon (PHB) at Congress Ave. Separate facilities for people walking and bicycling is preferred to maintain existing landscape. Install lighting along the multimodal facilities. **Alternative:** If a PHB is not permitted at Congress Ave, then direct people walking and bicycling to travel south (.10 miles) along the west side of Congress Ave to cross at the Boynton Village traffic signal.
	Renaissance Commons Connector	Congress Ave	Boynton Mall Trail	0.26	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Construct an 8' to 10' wide shared-use path on the southside of the canal. Coordinate use of canal ROW with Lake Worth Drainage District. If the S. FL. WMD and Lake Worth Drainage District does not grant use of the canal ROW, coordinate with CDD and private property owners to evaluate use of Audace Ave and Mall Entrance Road to provide a parallel multimodal facility to the shared-use path along the canal. **Alternative:** If a PHB is not permitted at Congress Ave, then consider an 8' wide shared-use path along the northern access connection to Congress Ave that aligns with the Boynton Village traffic signal or upgrade the current 5' wide sidewalk along the west side of Congress Avenue to an 8' to 10' wide shared-use path. Construct a high visibility crosswalks along the north side of the Congress Ave intersection.
	Boynton Mall Trail	Renaissance Commons Connector	Winchester Park Blvd	0.85	**Major Multimodal Corridor (West)**	City / Developer	Construct an 8' to 10' wide shared-use path along the western and southern portions of the mall from the canal to the Mall Entrance Road that aligns with Winchester Park Blvd. Construction of the shared-use path will require coordination with the Mall Owners and obtaining a public access easement for the multimodal facility.
	Winchester Park Blvd	Boynton Mall Trail	Boynton Beach Blvd (SR 804)	0.37	**Major Multimodal Corridor (West)**	City / FDOT	Widen existing sidewalks to 8' to 10' wide shared-use paths or construct 5' to 6' protected bike lanes parallel to existing sidewalks along both sides of the ROW. Due to turn lanes, portions of the bicycle lanes may need to share the facility with the existing sidewalk. Construct high visibility crosswalks at both Old Boynton Road and Boynton Beach Blvd.
	Ocean Drive Connector	Boynton Beach Blvd (SR 804)	Congress Ave	0.37	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Construct a 12' to 14' wide multi-use trail that connects Congress Avenue and Boynton Beach Blvd at the intersection with Winchester Park Blvd. The multimodal corridor will require coordination with adjacent property owners to secure the necessary rights-of-way (ROW) or easements. Construct high visibility crosswalks at Congress Avenue.
	Ocean Drive	Congress Ave	SW 18th Street	0.39	**Major Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
Major Multimodal Corridor (Gateway Blvd)	Gateway Blvd	I-95 East Ramps	High Ridge Rd	0.20	**Major Multimodal Corridor (Gateway Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing and future interchange improvements. Currently 2045 LRTP project.
	Gateway Blvd	High Ridge Rd	Quantum Blvd	0.55	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks where ROW is available. Construct buffered bicycle lanes in conjunction with future resurfacing
	Gateway Blvd	Quantum Blvd	Renaissance Commons Blvd	0.41	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks where ROW is available. Construct buffered bicycle lanes in conjunction with future resurfacing
	Gateway Blvd	Renaissance Commons Blvd	Congress Ave	0.22	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks where ROW is available. Construct buffered bicycle lanes in conjunction with future resurfacing
Major Multimodal Corridor (Boynton Beach Blvd)	Boynton Beach Blvd (SR 804)	I-95 East Ramps	I-95 West Ramps	0.18	**Major Multimodal Corridor (Boynton Beach Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing and future interchange improvements. Currently funded in FY 25 / 26.
	Boynton Beach Blvd (SR 804)	I-95 West Ramps	Congress Avenue	1.00	**Major Multimodal Corridor (Boynton Beach Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing. Currently funded in FY 25 / 26. A portion of this facility (0.16 miles) between NW 7th Street and SW 8th Street is part of the Principal Multimodal Corridor West of I-95.
	Boynton Beach Blvd (SR 804)	Congress Avenue	Winchester Park Blvd	0.20	**Major Multimodal Corridor (Boynton Beach Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing.

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Multimodal Connector (Connect existing multimodal facilities on Congress Avenue with proposed Principal Multimodal Corridor (West)	Miner Road	High Ridge Rd	Quantum Connector Trail	0.32	**Minor Multimodal Corridor (West)**	City / County	Construct a 10' wide shared-use path on the south side of the ROW. Provide a connection to the Quantum Connector Trail. Proposed center turn lane (See Streets Plan).
	Miner Road	Quantum Connector Trail	Congress Ave	0.63	**Minor Multimodal Corridor (West)**	City / County	Construct an 8' to 10' wide shared-use path on the south side of the ROW to provide a connection to Congress Avenue. Proposed center turn lane (See Streets Plan).
Multimodal Connector (Connects Miner Road, Thomas A. McGillicuddy Eco-Park and existing multimodal facilities on Quantum Blvd & Congress Avenue)	Quantum Blvd Connector	Miner Road	Quantum Blvd	0.43	**Minor Multimodal Corridor (West)**	City	Construct a 10' to 12' wide shared-use path within the Thomas A. McGillicuddy Eco-Park At Quantum Corporate Park that connects the proposed multimodal connector on Miner Rd to the existing shared-use path on Quantum Blvd. Construct a Rectangular Rapid Reflective Beacon (RRFB) at the existing crosswalk.
	Quantum Blvd (existing shared-use path)	Quantum Blvd Connector	Gateway Blvd	0.37	**Minor Multimodal Corridor (West)**	City	An 8' wide shared-use path exist on the west side of the ROW. Construct high visibility crosswalks at intersections and driveways. Add hardscape and landscape amenities along the corridor. The existing shared-use path provides connectivity to Gateway Blvd.
		Quantum Blvd Connector	Congress Ave	0.83	**Minor Multimodal Corridor (West)**	City	An 8' wide shared-use path exist on the south side of the ROW. Construct high visibility crosswalks at intersections and driveways. Add hardscape and landscape amenities along the corridor. The existing shared-use path provides connectivity to Congress Ave.
Multimodal Connector (Connects Principal Multimodal Corridor (West) with Woolbright Ave)	SW 8th Street	Ocean Drive	Woolbright Rd	0.74	**Minor Multimodal Corridor (West)**	City	Evaluate direction protected bicycle lanes on both sides of the ROW and a bi-directional protected bicycle lane on the east side of the ROW. Where ROW is constrained, bicycle lanes and shared-use paths can be merged into one multimodal facility. If protected bicycle lanes are not feasible, evaluate buffered or standard on-street bicycle lanes. A shared-use path on the west side of the ROW or a wider shared-use path on the east side of the ROW is an alternative to bike lanes.
Multimodal Connectors (Connects Principal Multimodal Corridor (West) with Congress Ave, Woolbright Road and SW 23rd Ave)	SW Congress Blvd	SW 18th Street	Congress Avenue	0.45	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a raised intersection or high visibility crosswalk at SW 22nd Street.
	SW 22nd Street	SW Congress Avenue	Woolbright Road	0.26	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide high visibility crosswalks and a pedestrian hybrid beacon (PHB) at Woolbright Rd. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals.
	SW 22nd Street	Woolbright Road	SW 19th Avenue	0.18	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a raised intersection or high visibility crosswalk at SW 19th Avenue.
	SW 19th Avenue	SW 18th Street	Congress Avenue	0.39	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a raised intersection or high visibility crosswalk at SW 18th Avenue.
	Campanelli Blvd	SW 18th Street	SW 23rd Avenue	0.31	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a high visibility crosswalk with an RRFB or PHB at SW 23rd Avenue.
	SW 27th Avenue	SW 11th Street	Congress Avenue	0.47	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk along one side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the small portions of existing sidewalks. Construct a raised intersection or high visibility crosswalks at SW 27th Avenue. Construct the improvements to the existing multimodal bridge over the canal. An alternative maybe to construct 5' wide sidewalks along both sides of the ROW to fill in gaps in the existing sidewalk network.

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)

Corridor	Street	From	To	Length (Mi)	Project Type	Construction / Maintenance Entity	Project Description
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Principal Multimodal Corridor (West of Interstate 95 providing an interconnected multimodal alternative to Congress Avenue) **Connects the following:** **Lake Worth Christian School, Imagine Chancellor School, TRI-Rail Station, Pioneer Canal Park, Laurel Hills Park, Private Community Parks, & Caloosa Park**	High Ridge Rd	Newport Place	Oakwood Ct	0.39	**Principal Multimodal Corridor (West)**	City / County	Widen existing sidewalks to 8' to 10' wide shared-use paths or construct 5' to 6' protected bike lanes parallel to existing sidewalks along both sides of the ROW. Enhances multimodal connectivity to Discovery Village and High Ridge Scrub Natural Area.
	High Ridge Rd	Oakwood Ct	Miner Rd	0.41	**Principal Multimodal Corridor (West)**	City / County	Widen existing sidewalks to 8' to 10' wide shared-use paths or construct 5' to 6' protected bike lanes parallel to existing sidewalks along both sides of the ROW. Enhances multimodal connectivity to Imagine Chancellor Charter School and Lake Worth Christian School.
	High Ridge Rd	Miner Rd	Gateway Blvd	0.55	**Principal Multimodal Corridor (West)**	City	Construct 10' shared-use paths on both sides of the ROW. Project is in the 2045 LRTP. High Ridge is proposed to be widened to four lanes from NW 25th Avenue to Miner Road (See Streets Plan).
	High Ridge Rd	Gateway Blvd	Park Ridge Blvd	0.63	**Principal Multimodal Corridor (West)**	City	Construct a 8' to 10' wide shared-use path west side of the ROW replacing the existing sidewalk. As an alternative, construct a 5' wide sidewalk adjacent to the existing sidewalk along the west side of the ROW.
	High Ridge Rd	Park Ridge Blvd	Stanley Weaver Canal	0.15	**Principal Multimodal Corridor (West)**	City	Construct an 8' to 10' wide shared-use path as a replacement of the existing sidewalk along the west side of the ROW. As an alternative, fill in the gap in the existing sidewalk to the canal and construct a 5' wide sidewalk adjacent to the existing sidewalk.
	Stanley Weaver Canal	High Ridge Rd	Pioneer Canal Park	0.21	**Principal Multimodal Corridor (West)**	City	Construct a 12' wide multimodal bridge across the Stanley Weaver Canal. Construct a 10' to 12' wide shared-use path along the south side of the canal. Coordinate with South FL WMD on use of canal ROW. As an alternative, seek to acquire an easement or purchase ROW from private property and construct the 10' to 12' wide shared-use path along the north side of the ROW and construct the multimodal bridge to connect with Pioneer Canal Park.
	Pioneer Canal Park	Stanley Weaver Canal	NW 13th Avenue	0.27	**Principal Multimodal Corridor (West)**	City	Construct a 10' to 12' wide shared-use path through the park to align with NW 7th Court. The shared-use path may be split into separate 5' to 6' wide paths to maneuver around existing trees or existing structures.
	NW 7th Court	NW 13th Avenue	NW 8th Avenue	0.28	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and complete sidewalk gaps along both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along either side of the ROW and replace the existing sidewalk. Or fill in sidewalk gaps on one side of the ROW and construct a parallel 5' wide sidewalk (Provides a total of 10' of multimodal improvements for walking and bicycling).
	NW 8th Avenue	NW 7th Court	NW 7th Street	0.06	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and a 5' wide sidewalk along the north side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along the south side of the ROW and replace the existing sidewalk. Or construct a parallel 5' wide sidewalk on the south side of the ROW (Provides a total of 10' of multimodal improvements for walking and bicycling). The proposed improvement shifts to NW 7th Street due to limited ROW along NW 7th Court between NW 8th Avenue and NW 4th Avenue.
	NW 7th Street	NW 8th Avenue	NW 5th Avenue	0.16	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and complete sidewalk gaps along both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along either side of the ROW and either replace the existing sidewalk or construct a parallel 5' wide sidewalk. If constructing a shared-use path, fill in gaps on the side of the ROW where the path is constructed.
	Laurel Hills Park	NW 5th Avenue	NW 4th Avenue	0.07	**Principal Multimodal Corridor (West)**	City	Construct an 8' to 10' wide shared-use path through Laurel Hills Park due to a 30' wide ROW along NW 7th Street from NW 5th Avenue to Boynton Beach Blvd. The shared-use path may be split into separate 5' wide paths to maneuver around existing trees or existing structures.
	NW 4th Avenue	NW 7th Street	NW 7th Court	0.05	**Principal Multimodal Corridor (West)**	City	Construct an 8' to 10' wide shared-use path through Laurel Hills Park. The shared-use path may be split into separate 5' wide paths to maneuver around existing trees or existing structures. Construct a raised table-top crosswalk with a vertical crossing to transition from the north side of the ROW to the south side of the ROW and avoid the need to acquire an easement or ROW along the north side of NW 4th Avenue outside of the park parcel.
	NW 7th Court	NW 4th Avenue	Boynton Beach Blvd (SR 804)	0.14	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and complete sidewalk gaps along the west side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path along the east side of the ROW and fill in the sidewalk gaps on the west side of the ROW. Or fill in the sidewalk gaps on the west side of the ROW and construct a parallel 5' wide sidewalk on the west side of the ROW (provides a total of 10' for walking and bicycling).

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Principal Multimodal Corridor (West of Interstate 95 providing an interconnected multimodal alternative to Congress Avenue) **Connects the following:** **Lake Worth Christian School, Imagine Chancellor School, TRI-Rail Station, Pioneer Canal Park, Laurel Hills Park, Private Community Parks, & Caloosa Park**	Boynton Beach Blvd (SR 804)	NW 7th Court	SW 8th Street	0.11	**Principal Multimodal Corridor (West)**	City / FDOT	Provide high-visibility cross-walks along the north side of the ROW where crossing an intersection or driveway. Evaluate the acquisition of an easement or ROW to provide a 10' wide shared-use path on the north side of the ROW. Provide high visibility crosswalks at SW 8th Street. Upgraded bicycle lanes and sidewalk improvements are currently funded in FY 25 / 26 as part of a resurfacing project along Boynton Beach Rd.
	SW 8th Street	Boynton Beach Blvd (SR 804)	Ocean Drive	0.28	**Principal Multimodal Corridor (West)**	City	Construct protected bike lanes along both sides of the ROW adjacent to the existing sidewalks. Provide high visibility crosswalks across intersections. If not feasible, add on-street bicycle lanes and a 8' to 10' wide shared-use path along the west side of the ROW. The shared-use path can either replace the existing sidewalk or construct an adjacent 5' wide sidewalk. A center turn lane is also proposed for this corridor (See Streets Plan).
	Ocean Drive	SW 8th Street	SW 18th Street	0.36	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide a raised intersection, high visibility crosswalks, or a roundabout at SW 18th Street. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 18th Street	Ocean Drive	Woolbright Rd	0.84	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide high visibility crosswalks at Woolbright Road. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 18th Street	Woolbright Rd	SW 23rd Avenue	0.56	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide high visibility crosswalks and a pedestrian hybrid beacon (PHB) at SW 23rd Avenue. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 12th Court	SW 23rd Avenue	SW 11th Street	0.25	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and fill in sidewalk gaps along both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Fill in gaps in the sidewalk system along the side of the ROW where the shared-use path is constructed. Construct a raised intersection or high visibility crosswalks at SW 11th Street. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
	SW 11th Street	SW 23rd Avenue	Caloosa Park Trail	0.49	**Principal Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk along one side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the small portions of existing sidewalks. Construct a raised intersection or high visibility crosswalks at SW 27th Avenue. Construct the improvements to the existing multimodal bridge over the canal. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)

Corridor	Street	From	To	Length (Mi)	Project Type	Construction / Maintenance Entity	Project Description
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Major Multimodal Corridor (West of Interstate 95 providing an interconnected multimodal alternative to Congress Avenue) **Connects the following:** **Boynton Beach High School, Renaissance Commons, Boynton Beach Mall, & Congress Middle School**	Park Ridge Blvd	High Ridge Rd	Alpha Dr	0.41	**Major Multimodal Corridor (West)**	City	Construct a 10' wide shared-use path along the south side of the ROW or add a 5' wide sidewalk adjacent to the existing sidewalk along the north side of the ROW.
	Park Ridge Connector	Park Ridge Blvd	Renaissance Commons Blvd	0.52	**Major Multimodal Corridor (West)**	City / Other Government	Construct a 10' wide shared-use path that connects the proposed Park Ridge Blvd shared-use path and runs along the north side of the Stanley Weaver Canal and includes a multimodal bridge over the Lake Ida Canal to connect with the existing multimodal facility parallel to the Stanley Weaver Canal. If the multimodal facility on the north side of the ROW is privately owned between the Lake Ida Canal and Renaissance Commons Blvd, evaluate construction of an 8' to 10' wide shared-use path within the canal ROW. Coordinate use of canal ROW with School Board and S. FL. WMD.
	Renaissance Commons Blvd	North side of canal	South side of canal	0.03	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Provide high-visibility crosswalks or raised crosswalks and rapid rectangular flashing beacons (RRFBs) on north and south sides of the bridge at the crossing locations for multimodal facilities.
	Renaissance Commons Connector	Renaissance Commons Blvd	Congress Ave	0.15	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Construct an 8' to 10' wide shared-use path or a 5' to 6' wide path on the north side of the existing sidewalk. Coordinate use of canal ROW with S. FL. WMD. Construct a high visibility crosswalk and a pedestrian hybrid beacon (PHB) at Congress Ave. Separate facilities for people walking and bicycling is preferred to maintain existing landscape. Install lighting along the multimodal facilities. **Alternative:** If a PHB is not permitted at Congress Ave, then direct people walking and bicycling to travel south (.10 miles) along the west side of Congress Ave to cross at the Boynton Village traffic signal.
	Renaissance Commons Connector	Congress Ave	Boynton Mall Trail	0.26	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Construct an 8' to 10' wide shared-use path on the southside of the canal. Coordinate use of canal ROW with Lake Worth Drainage District. If the S. FL. WMD and Lake Worth Drainage District does not grant use of the canal ROW, coordinate with CDD and private property owners to evaluate use of Audace Ave and Mall Entrance Road to provide a parallel multimodal facility to the shared-use path along the canal. **Alternative:** If a PHB is not permitted at Congress Ave, then consider an 8' wide shared-use path along the northern access connection to Congress Ave that aligns with the Boynton Village traffic signal or upgrade the current 5' wide sidewalk along the west side of Congress Avenue to an 8' to 10' wide shared-use path. Construct a high visibility crosswalks along the north side of the Congress Ave intersection.
	Boynton Mall Trail	Renaissance Commons Connector	Winchester Park Blvd	0.85	**Major Multimodal Corridor (West)**	City / Developer	Construct an 8' to 10' wide shared-use path along the western and southern portions of the mall from the canal to the Mall Entrance Road that aligns with Winchester Park Blvd. Construction of the shared-use path will require coordination with the Mall Owners and obtaining a public access easement for the multimodal facility.
	Winchester Park Blvd	Boynton Mall Trail	Boynton Beach Blvd (SR 804)	0.37	**Major Multimodal Corridor (West)**	City / FDOT	Widen existing sidewalks to 8' to 10' wide shared-use paths or construct 5' to 6' protected bike lanes parallel to existing sidewalks along both sides of the ROW. Due to turn lanes, portions of the bicycle lanes may need to share the facility with the existing sidewalk. Construct high visibility crosswalks at both Old Boynton Road and Boynton Beach Blvd.
	Ocean Drive Connector	Boynton Beach Blvd (SR 804)	Congress Ave	0.37	**Major Multimodal Corridor (West)**	City / Developer / Other Government	Construct a 12' to 14' wide multi-use trail that connects Congress Avenue and Boynton Beach Blvd at the intersection with Winchester Park Blvd. The multimodal corridor will require coordination with adjacent property owners to secure the necessary rights-of-way (ROW) or easements. Construct high visibility crosswalks at Congress Avenue.
	Ocean Drive	Congress Ave	SW 18th Street	0.39	**Major Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Install street lighting for people walking and bicycling, along with landscape and hardscape as feasible.
Major Multimodal Corridor (Gateway Blvd)	Gateway Blvd	I-95 East Ramps	High Ridge Rd	0.20	**Major Multimodal Corridor (Gateway Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing and future interchange improvements. Currently 2045 LRTP project.
	Gateway Blvd	High Ridge Rd	Quantum Blvd	0.55	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks where ROW is available. Construct buffered bicycle lanes in conjunction with future resurfacing
	Gateway Blvd	Quantum Blvd	Renaissance Commons Blvd	0.41	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks where ROW is available. Construct buffered bicycle lanes in conjunction with future resurfacing
	Gateway Blvd	Renaissance Commons Blvd	Congress Ave	0.22	**Major Multimodal Corridor (Gateway Blvd)**	City	Construct wider sidewalks where ROW is available. Construct buffered bicycle lanes in conjunction with future resurfacing
Major Multimodal Corridor (Boynton Beach Blvd)	Boynton Beach Blvd (SR 804)	I-95 East Ramps	I-95 West Ramps	0.18	**Major Multimodal Corridor (Boynton Beach Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing and future interchange improvements. Currently funded in FY 25 / 26.
	Boynton Beach Blvd (SR 804)	I-95 West Ramps	Congress Avenue	1.00	**Major Multimodal Corridor (Boynton Beach Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing. Currently funded in FY 25 / 26. A portion of this facility (0.16 miles) between NW 7th Street and SW 8th Street is part of the Principal Multimodal Corridor West of I-95.
	Boynton Beach Blvd (SR 804)	Congress Avenue	Winchester Park Blvd	0.20	**Major Multimodal Corridor (Boynton Beach Blvd)**	City / FDOT	Construct wider sidewalks and buffered bicycle lanes as part of resurfacing.

APPENDIX G3: MULTIMODAL CORRIDOR PLAN DETAIL (WEST)							
Corridor	**Street**	**From**	**To**	**Length (Mi)**	**Project Type**	**Construction / Maintenance Entity**	**Project Description**
ALL PROJECTS ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH PROJECT WILL REQUIRE FURTHER EVALUATION & DESIGN. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT TYPE DUE TO FISCAL, NEIGHBORHOOD, RIGHT-OF-WAY, STORMWATER, TOPOGRAPHICAL & UTILITY CONSTRAINTS.							
Multimodal Connector (Connect existing multimodal facilities on Congress Avenue with proposed Principal Multimodal Corridor (West)	Miner Road	High Ridge Rd	Quantum Connector Trail	0.32	**Minor Multimodal Corridor (West)**	City / County	Construct a 10' wide shared-use path on the south side of the ROW. Provide a connection to the Quantum Connector Trail. Proposed center turn lane (See Streets Plan).
	Miner Road	Quantum Connector Trail	Congress Ave	0.63	**Minor Multimodal Corridor (West)**	City / County	Construct an 8' to 10' wide shared-use path on the south side of the ROW to provide a connection to Congress Avenue. Proposed center turn lane (See Streets Plan).
Multimodal Connector (Connects Miner Road, Thomas A. McGillicuddy Eco-Park and existing multimodal facilities on Quantum Blvd & Congress Avenue)	Quantum Blvd Connector	Miner Road	Quantum Blvd	0.43	**Minor Multimodal Corridor (West)**	City	Construct a 10' to 12' wide shared-use path within the Thomas A. McGillicuddy Eco-Park At Quantum Corporate Park that connects the proposed multimodal connector on Miner Rd to the existing shared-use path on Quantum Blvd. Construct a Rectangular Rapid Reflective Beacon (RRFB) at the existing crosswalk.
	Quantum Blvd (existing shared-use path)	Quantum Blvd Connector	Gateway Blvd	0.37	**Minor Multimodal Corridor (West)**	City	An 8' wide shared-use path exist on the west side of the ROW. Construct high visibility crosswalks at intersections and driveways. Add hardscape and landscape amenities along the corridor. The existing shared-use path provides connectivity to Gateway Blvd.
		Quantum Blvd Connector	Congress Ave	0.83	**Minor Multimodal Corridor (West)**	City	An 8' wide shared-use path exist on the south side of the ROW. Construct high visibility crosswalks at intersections and driveways. Add hardscape and landscape amenities along the corridor. The existing shared-use path provides connectivity to Congress Ave.
Multimodal Connector (Connects Principal Multimodal Corridor (West) with Woolbright Ave)	SW 8th Street	Ocean Drive	Woolbright Rd	0.74	**Minor Multimodal Corridor (West)**	City	Evaluate direction protected bicycle lanes on both sides of the ROW and a bi-directional protected bicycle lane on the east side of the ROW. Where ROW is constrained, bicycle lanes and shared-use paths can be merged into one multimodal facility. If protected bicycle lanes are not feasible, evaluate buffered or standard on-street bicycle lanes. A shared-use path on the west side of the ROW or a wider shared-use path on the east side of the ROW is an alternative to bike lanes.
Multimodal Connectors (Connects Principal Multimodal Corridor (West) with Congress Ave, Woolbright Road and SW 23rd Ave)	SW Congress Blvd	SW 18th Street	Congress Avenue	0.45	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a raised intersection or high visibility crosswalk at SW 22nd Street.
	SW 22nd Street	SW Congress Avenue	Woolbright Road	0.26	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Provide high visibility crosswalks and a pedestrian hybrid beacon (PHB) at Woolbright Rd. If on-street bicycle lanes are provided, provide access ramps to sidewalks where the are structures over canals.
	SW 22nd Street	Woolbright Road	SW 19th Avenue	0.18	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a raised intersection or high visibility crosswalk at SW 19th Avenue.
	SW 19th Avenue	SW 18th Street	Congress Avenue	0.39	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a raised intersection or high visibility crosswalk at SW 18th Avenue.
	Campanelli Blvd	SW 18th Street	SW 23rd Avenue	0.31	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the existing sidewalk or construct a 5' wide sidewalk adjacent to the existing sidewalk on either side of the ROW. Construct a high visibility crosswalk with an RRFB or PHB at SW 23rd Avenue.
	SW 27th Avenue	SW 11th Street	Congress Avenue	0.47	**Minor Multimodal Corridor (West)**	City	Construct on-street bicycle lanes on both sides of the ROW and a 5' to 6' wide sidewalk along one side of the ROW. As an alternative, construct an 8' to 10' wide shared-use path on either side of the ROW replacing the small portions of existing sidewalks. Construct a raised intersection or high visibility crosswalks at SW 27th Avenue. Construct the improvements to the existing multimodal bridge over the canal. An alternative maybe to construct 5' wide sidewalks along both sides of the ROW to fill in gaps in the existing sidewalk network.

APPENDIX H

Transit Plan

APPENDIX H: TRANSIT PLAN

Project Name	From	To	Length (Miles) or Quantity	Type	Maintenance	Project Description	Planning Level Cost (PLC)	Attributable Person Miles of Capacity (PMCa)	Reasonably Anticipated Funding (AF)	Attributable Planning Level Cost (PLCa)	Projected Headways (minutes)	Funding Source	Timeframe
ALL TRANSIT ROUTES ARE IDENTIFIED FOR MOBILITY PLANNING PURPOSES. EACH ROUTE WILL REQUIRE FURTHER EVALUATION. THE FROM AND TO LIMITS ARE SUBJECT TO CHANGE AS ARE THE PROJECT DESCRIPTIONS DUE TO FISCAL CONSTRAINTS AND POTENTIAL OVERLAP WITH EXISTING TRANSIT SERVICE.													
Circulator East	**Tri-Rail Station**	**Woolbright Mobility Hub**	5.04	Transit Circulator	City / County / State	Evaluate the viability of a transit circulator route that connects the TRI-Rail Station along High Ridge Rd with the proposed Downtown Mobility Hub and the Woolbright Mobility District. The circulator route would primarily run along Gateway Blvd and Federal Hwy (US 1). In Downtown, the circulator route may run along Boynton Beach Blvd, NE 1st St, and Ocean Ave. Within the Woolbright Mobility District, the route would need to be coordinated with private development. There may be a need to coordinate with FDOT to provide for a transit pre-emption signal to allow crossing of Federal Hwy at locations other than Woolbright Rd.	$2,150,000	24,200	$1,075,000	$1,075,000	**30**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Circulator West	**Tri-Rail Station**	**Woolbright Mobility Hub**	6.37	Transit Circulator	City / County / State	Evaluate the viability of a transit circulator route that connects the TRI-Rail Station along High Ridge Rd with Renaissance Commons, the Boynton Beach Mall, multi-family residential development along SW 8th Street and the Woolbright Mobility District. The circulator route would primarily run along Gateway Blvd, Renaissance Commons Blvd, Old Boynton Rd, SW 8th St and Woolbright Rd. Within Renaissance Commons, the Mall, and the Woolbright Mobility District, the route would need to be coordinated with private development.	$2,150,000	30,600	$1,075,000	$1,075,000	**30**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Downtown to Beach	**Downtown Mobility Hub**	**Ocean Front Beach Park Mobility Hub**	1.33	Transit Circulator	City / County / State	Evaluate the viability of a transit circulator route that connects the proposed Downtown Mobility Hub with the City's beach access along A1A. The route would run along NE 1st St, Ocean Ave, and A1A. The route is currently being served by on-demand service and may continue to be in the future.	$990,000	4,250	$495,000	$495,000	**15**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Downtown to Mall	**Downtown Mobility Hub**	**Boynton Beach Mall Mobility Hub**	3.99	Transit Circulator	City / County / State	Evaluate the viability of a transit circulator route that connects Downtown with the Boynton Beach Mall. The circulator route would connect the future Downtown Mobility Hub along NE 1st St and a future rail station along NE 4th St. The route would long along E. Ocean Ave in Downtown and Boynton Beach Blvd and Winchester Park Blvd and would serve the Mall and possibly Renaissance Commons. Thirty (30) minute headways, 15 passenger vehicle, 16 hour span of service, four (4) vehicles.	$2,150,000	19,150	$1,075,000	$1,075,000	**30**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Woolbright to Hospital	**Woolbright Mobility Hub**	**Bethesda Hospital Mobility Hub**	2.03	Transit Circulator	City / County / State	Evaluate the viability of a transit circulator route that connects the Woolbright Mobility District with the Hospital District. The route would run along Federal Hwy (US 1) and SE 23rd Ave. The route would need to be coordinated with private development within the Woolbright District and the Hospital. The route could be served by on-demand transit service. Fifteen (15) minute headways, 5 passenger vehicle, 16 hour span of service, eight (8) vehicles.	$990,000	6,500	$495,000	$495,000	**15**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
On Demand Transit	**Boynton Beach Community Redevelopment Area (CRA)**		10.00	Transit Circulator	City / County / State	The City's CRA is currently funding on-demand transit service within Downtown and the current CRA boundary limits. The service could be extended to other areas or additional types of vehicles added. The vehicles could be stationed at the proposed Downtown Mobility Hub. The service would be coordinated with the proposed transit circulator. Fifteen (15) minute headways, 5 passenger vehicle, 16 hour span of service, sixteen (16) vehicles.	$1,230,000	32,000	$615,000	$615,000	**15**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Water Taxi Program	**Intercoastal Park**	**Gulfstream Golf Club**	4.38	Water Taxi	City / County / State	Evaluate the feasibility of water taxi service along the intercoastal. Hub (dock and marina) locations are subject to further evaluation. Total of ten (10) ADA accessible docks. Demand for service would become higher in conjunction with the future rail station Downtown.	$3,500,000	28,050	$1,750,000	$1,750,000	**30**	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Mobility Hubs	**Transit Circulator Routes**		9.00	Mobility Hubs	City / County / State	Construct new ADA accessible mobility hubs (transit stops) with shelters and amenities. Upgrade existing transit stops with shelters, ADA accessibility improvements, and amenities. Coordinate with Palm Tran, the County, FDOT, and private developments to construct mobility hubs. Locations include: TRI-Rail Station, Boynton Beach Mall, Woolbright, Ocean Front Beach Park, Woolbright, Bethesda Hospital. Planning level cost of $225,000 per mobility hub.	$2,250,000	Capacity captured through transit circulators	$1,125,000	$1,125,000	--	50%, up to 100%, could come from city, county, federal and state funds, along with public private partnerships	2025 to 2035
Downtown Mobility Hub	**Downtown**		1.00	Mobility Hub	City / County / Developer / State	Construct a mobility hub that accommodates transit, bicycles, micromobility devices, and provides structured parking with up to 500 spaces to create a park once environment in Downtown along NE 1st St. Pursue public / private partnerships to provide parking. The Boca Raton Brightline station has 455 parking spaces.	$15,000,000	Capacity captured through multimodal corridors, streets, & transit circulators	$13,500,000	$1,500,000	--	90%, up to 100%, could come from county, federal and state funds, parking fares, and public private partnerships	2025 to 2035
NE 4th St Rail Station	**Downtown**		1.00	Rail Station	City / County / Developer / State	Construct a rail station along the FEC corridor to accommodate future rail service. The construction of the rail station would involve coordination with multiple entities. Coordinate parking and access with the Downtown Mobility Hub to serve the rail station. The parking need would be between 175 and 225 spaces compared to the Brightline Avenutra Station (225 spaces).	$20,000,000	Capacity captured through multimodal corridors, streets, & transit circulators	$18,000,000	$2,000,000	--	90%, up to 100%, could come from county, federal and state funds, parking fares, and public private partnerships	2025 to 2035

The total Attributable Planning Level Cost (PLCa) for development activity used to calculate the mobility fee is $14,705,000. The total Attributable Person Miles of Capacity (PMC) for development activity used to calculate the mobility fee is 28,950. The total anticipated funding is $42,705,000, with $31,500,000 of that funding for the Downtown Mobility Hub & NE 4th Street Rail Station.

Planning Level Cost (PLC): (1) Transit Circulator: Thirty (30) minute headways, 15 passenger vehicle, 16 hour span of service, four (4) vehicles. Vehicle cost $225,000 each. Cost of transit service is $250,000 per year for ten (10) years. (2) Transit Circulator: Fifteen (15) minute headways, 5 passenger vehicle, 16 hour span of service, eight (8) vehicles. Vehicle cost $30,000 each. Cost of transit service is $150,000 per year for ten (10) years. (3) Water Taxi: Thirty (30) minute headways, 20 passenger vessel, 16 hour span of service. Boats and service would be contracted out or part of a public private partnership. Cost of docks is $250,000 each. Cost of service is $200,000 per year for ten (10) years.

Person Miles of Capacity (PMC): (1) Transit Circulator: Thirty (30) minute headways equals 4 vehicles an hour multiplied by 15 passengers for 16 hours = 960. Multiply 960 by the length of the route, then multiply by 10 to reflect 10 years of service. (2) Transit Circulator: Fifteen (15) minute headways equals 8 vehicles an hour multiplied by 5 passengers for 16 hours = 640. Multiply 640 by the length of the route, then multiply by 10 to reflect 10 years of service. (3) Water Taxi: Thirty (30) minute headways equals 4 vessels an hour multiplied by 20 passengers for 16 hours = 1,280. Multiply 1,280 by the length of the route, then multiply by 10 to reflect 10 years of service.

APPENDIX I

Mobility Plan Programs

APPENDIX I: MOBILITY PLAN PROGRAMS

Project Name	Location	Project Description	Attributable Planning Level Cost (PLC)	Attributable Person Miles of Capacity (PMC)	Timeframe
Low Speed Streets Program	**Low Speed Streets Map**	The City shall develop a Low Speed Streets Program to provide residents various low speed street treatments that could be applied to streets in their neighborhood. The intent of the program is to be resident driven, where residents gather support from their adjacent neighbors to implement low speed street treatments and traffic calming measures. Initial priority areas are those streets that provide access to parks, schools, and connectivity between multimodal corridors. Low Speed Streets feature posted speed limits between 20 MPH and 25 MPH that carry low traffic volumes and feature changes to the physical geometry of the street right-of-way to achieve these posted speed limits. Physical changes can include treatments such as narrow travel lanes through restriping to add on-street parking, on-street bicycle lanes, or pilot projects that add on-street sidewalks through pavement markings where sidewalks do not exist. Physical changes may also include traffic calming features such as such as chicanes, chokers, curb extensions, mini traffic circles, painted or raised intersections, roundabouts, or speed tables. The Program may also include green street improvements such as reclaiming existing swales with low impact development stormwater treatments or adding canopy and understory street trees where feasible. Total length 7.0 miles.	$7,000,000	16,800	2025 to 2045
Micromobility & Low Speed Electric Vehicle Program	**Citywide**	The City shall consider development of a Micromobility & Low Speed Electric Vehicle Program and Ordinance regulating the use of micromobility devices (e.g., e-bike, e-scooters) and low speed electric vehicles within the City. The City will coordinate with the County and FDOT regarding use of micromobility devices and low speed electric vehicles on and crossing County and State Roads. The Program and Ordinance will address hours of operation, safety, shared mobility providers, rentals, and equipment.	$75,000	Captured through PMC for multimodal and street projects.	2025 to 2030
Vision Zero Action Plan	**Citywide**	Vision Zero is a national program that seeks to eliminate all traffic fatalities and severe injuries, while increasing education, safety, health, and mobility for all users. A Vison Zero Action Plan uses crash data to identify the high injury crash network, then programs countermeasures (including but not limited to capital improvements, law enforcement campaigns, and safety studies) to address the documented safety deficiencies	$250,000	Captured through PMC for multimodal and street projects.	2025 to 2030
Wayfinding Program	**Citywide**	The City shall consider development of a wayfinding program to further enhance the efficiency of the transportation system, improve access, and facilitate placemaking. Wayfinding and route signage are an essential component of multimodal planning elements beyond construction of a continuous, interconnected network of multimodal infrastructure. Wayfinding can be both physical and virtual tools that provide predictability and consistency in the way people find their point of interests. The Wayfinding Program would establish a brand identity and design standards and specifications for signage, maps, a digital app, etc.	$100,000	Captured through PMC for multimodal and transit projects.	2025 to 2035
ADA Curb Ramp Retrofit Program	**Citywide**	Fund upgrades to existing curb ramps to enhance mobility, safety, improve the quality of service in the community and comply with the American with Disability Act (ADA) requirements. The projects identified through the Curb Ramp Upgrade Program can be used for future Mobility Plan and Mobility Fee updates.	$500,000	Captured through PMC for multimodal, street, and transit projects.	2025 to 2035
Mobility Access Program	**Citywide**	Develop programs and pursue funding sources and public private opportunities to provide bikes, electric bikes, electric scooters, and passes for car share, ride share, and transit services to provide mobility to underserved members of the community.	$125,000	Captured through PMC for multimodal and transit projects.	2025 to 2035
Multimodal Plans, Programs, Services & Studies	**Citywide**	Prepare corridor, multimodal, street, and transit plans and studies, develop traffic count program, pursue matching grant fund opportunities through County, FDOT, Federal, State, and TPA Funding Programs, update mobility plan and fee, develop complete street policies, design standards, and programs. Explore shared mobility services and joint shared mobility, microtransit and transit services with adjacent municipalities, CRA, FDOT, Palm Beach County, transit authorities and private entities.	$1,250,000	Captured through PMC for multimodal, street, and transit projects.	2025 to 2035
Mobility Plan & Fee Implementation Program	**Citywide**	Update the Comprehensive Plan to reflect the Mobility Plan and adoption of a Mobility Fee. Further explore establishing Street, Multimodal, and Transit Quality of Service Standards. Develop follow-on plans, studies, and establish criteria and standards for Walking & Streetscape Enhancements, Multimodal Corridors, Curbless Shared Streets, Multimodal Crossing Evaluations, and Water Taxi Service. Consider development of mobility fee administrative manual or policies and service charges. Actively implement mobility plan projects and programs.	$375,000	Captured through PMC for multimodal, street, and transit projects.	2025 to 2030

Note: The total Attributable Planning Level Cost (PLC) for development activity used to calculate the mobility fee is $9,675,000. The total Attributable Person Miles of Capacity (PMC) is $16,800.

APPENDIX M

Trip Generation

APPENDIX M: TRIP GENERATION (TG)			
Use Categories, Uses Classifications, & Representative Uses	UNIT OF MEASURE (UOM)	TRIP GENERATION (TG)	ITE LAND USE CODES
Residential Uses			
Single-Family Residential Dwelling (Detached, Duplex, Accessory Dwelling, Townhome, Townhouse, Tiny Home)	per 1,000 Sq. Ft.	4.10	See Single-Family Residential
Multi-Family Residential Dwelling (Apartment, Condo, 3 or more Attached Dwellings, Dormitory)	per 1,000 Sq. Ft.	4.84	See Multi-Family Residential
Mobile Residence (Mobile Home (MH), Recreational Vehicle (RV), MH and / or RV Park)	per space / lot	4.47	See Mobile Residence
Institutional Uses			
Community Serving (Civic / Fraternal Club, Gallery, Museum, Performance Venues, Place of Assembly or Worship)	per 1,000 Sq. Ft.	5.52	See Community Serving
Group Home (Assisted Living, Care or Recovery Homes, Congregate Living Facility, Nursing Home)	per 1,000 Sq. Ft.	6.68	See Long Term Care
Private Education (Afterschool, Family Day Care, K-12, Pre-K, Trade School, Tutor)	per 1,000 Sq. Ft.	9.82	See Private Education
Commercial Recreational Uses			
Marina (wet berths, dry slips, ancillary repair, yacht club)	per Berth	2.41	420
Entertainment, Outdoor (Amusement, Golf, Multi-Purpose, Recreation, Sports, Tennis)	per Acre	27.43	See Outdoor Recreation
Entertainment, Indoor (Amusement Arcade, Exercise Studio, Fitness, Gym, Health, Indoor Sports, Recreation)	per 1,000 Sq. Ft.	24.86	See Indoor Recreation
Industrial Uses			
Industrial (Assembly, Brewery, Development and Testing, Distribution and Processing, Microbrewing, Trades, Utilities)	per 1,000 Sq. Ft.	5.80	See Industrial
Commercial Storage (Boat / Vehicle, Junk /Salvage Yard, Recycling / Waste Management, Open, Self-Service, Warehouse)	per 1,000 Sq. Ft.	2.34	See Commercial Storage
Office Uses			
Office (Administrative, Business, Hospital, Post Secondary Education, Professional, Real Estate)	per 1,000 Sq. Ft.	11.58	See Office
Medical or Dental Office (Clinic, Dental, Health Service, Laboratory, Professional Care, Emergency Care, Rehab, Veterinary)	per 1,000 Sq. Ft.	32.84	See Medical Office
Retail Uses			
Retail (Auto / Boat Rental or Sales, New or Used Merchandise, Personal or Pet Care, Sales, Services, Stores)	per 1,000 Sq. Ft.	42.00	See Retail
High Impact Retail (Alcoholic Beverages, Banks, Grocery Store, Pharmacy & Drug Store, Sit-Down Restaurant)	per 1,000 Sq. Ft.	106.33	See Impact Retail
Convenience Retail (Convenience Store, Fast Food Restaurant, Gasoline Station)	per 1,000 Sq. Ft.	342.66	See Convenience Retail
Non-Residential Uses Per Unit of Measure			
Auto / Boat / Car Wash (Automated, Cleaning, Dry, Detailing, Polishing, Self-Serve, Vacuum, Wash, Wax)	per Lane or Stall plus per five (5) Stations	321.08	See Vehicle Cleaning
Auto Charging or Fueling (Commercial Facility which requires Membership or Payment)	per Charging or Fueling Position	279.39	See Vehicle Fueling
Auto or Boat Repair / Service (Brakes, Install, Maintenance, Major, Minor, Quick Lube, Repair, Tint, Tires)	per Bay or Stall	34.15	See Motor Vehicle Service
Bank or Financial Drive-Thru Lane or Free-Standing ATM	per Lane / ATM	137.06	See Financial Services
Fast Food or Quick Service Restaurant Drive Thru	per Lane	507.99	See Quick Service Restaurant Drive-Thru
Overnight Lodging (B&B, Condo Hotel, Hotel, Motel, Short-term Rental, Transient)	per Room	6.67	See Overnight Lodging
Retail Drive-Thru (Dry Cleaner, Dollar Store, Grocery Store, Pharmacy & Drug Store, Retail)	per Lane	125.26	See Drive-Thru

SINGLE-FAMILY RESIDENTIAL TRIP GENERATION									
ITE LAND USE	ITE LAND USE CODE	UNIT OF MEASURE	DAILY TRIP GENERATION (DT)	TOTAL NUMBER OF STUDIES (TS)	AVERAGE SQUARE FOOTAGE	SQUARE FOOTAGE (PER 1,000 SQ. FT.)	TRIP GENERATION (PER 1,000 SQ. FT.)	TRIP STUDIED (WEIGHTED) (TSw)	TRIP GENERATION (WEIGHTED) (TGw)
SINGLE-FAMILY DETACHED	210	Dwelling Unit	9.43	174	2,292	2.292	4.11	0.888	3.65
SINGLE-FAMILY ATTACHED	215	Dwelling Unit	7.20	22	1,796	1.796	4.01	0.112	0.45
Total	--	--	--	196	--	--	--	1.000	4.10

Notes: Single Family Residential trip generation rates (DT) are based on the 11th Edition of the ITE Trip Generation Manual. The trip generation rates are converted into trip rates per 1,000 square feet. The first step in the conversion was assigning the average square footage by type of residential use in Boynton Beach based on data from the Palm Beach County Property Appraiser. The assigned square footage of each unit type is then divided by 1,000 (square footage adjusted). The trip generation rate is then divided by the adjusted square footage. Single-Family Detached Residential conversion: (2,292 / 1,000) = 2.292; (9.43 / 2.292) = 4.11 trips per 1,000 square feet. Average square footage per dwelling includes all enclosed areas under roof, including garages. Average square footage does not include unenclosed balconies, decks, patios, or porches.

For Single-Family Residential, there are two (2) land uses (ITE Code 210 & 215) utilized to calculate the trip generation. Thus, a weighted trip generation rate is calculated. The total number of studies (TS) conducted are used to calculate a Weighted Trip Study (TSw). The Daily Trips (DT) generation is based on ITE Trip Generation Manual 11th edition. The Weighted Trip Generation (TGw) is calculated based on Trip Generation (TG) multiplied by the Weighted Trip Study (TSw). The total trips per 1,000 SQ. FT. is the sum of the Weighted Trip Generation (TGw). Single-Family Detached Residential example: TSw = (174 / 196) = 0.888; TGw = (4.11 x 0.888) = 3.65. Single-Family Residential Trip Generation is the sum of (3.65 +0.45) = 4.10 trips per 1,000 square feet.

MULTI-FAMILY RESIDENTIAL TRIP GENERATION									
ITE LAND USE	ITE LAND USE CODE	UNIT OF MEASURE	DAILY TRIP GENERATION (DT)	TOTAL NUMBER OF STUDIES (TS)	AVERAGE SQUARE FOOTAGE	SQUARE FOOTAGE (PER 1,000 SQ. FT.)	TRIP GENERATION (PER 1,000 SQ. FT.)	TRIP STUDIED (WEIGHTED) (TSw)	TRIP GENERATION (WEIGHTED) (TGw)
MULTI-FAMILY (LOW-RISE)	220	Dwelling Unit	6.74	22	1,206	1.206	5.59	0.537	3.00
MULTI-FAMILY (MID-RISE)	221	Dwelling Unit	4.54	11	1,101	1.101	4.12	0.268	1.11
MULTI-FAMILY (MID-RISE)	222	Dwelling Unit	4.54	8	1,207	1.207	3.76	0.195	0.73
Total	--		--	41	--	--	--	1.000	4.84

Notes: Residential trip generation rates (DT) are based on the 11th Edition of the ITE Trip Generation Manual. The trip generation rates are converted into trip rates per 1,000 square feet. The first step in the conversion was assigning the average square footage by type of Multi-Family Residential use in Boynton Beach based on data from the Palm Beach County Property Appraiser. The average square footage for each land use type is then divided by 1,000 (square footage per 1,000 sq. ft.). The trip generation rate is then divided by the square footage per 1,000 sq. ft.. Multi-Family Residential (Low Rise) example: (1,206 / 1,000) = 1.206; (6.74 / 1,206) = 5.59 trips per 1,000 square feet. Average square footage per dwelling includes common area, hallways, and all areas under roof, except for unenclosed balconies or patios.

A weighted trip generation was calculated for Multi-Family Residential land uses. The total number of studies (TS) conducted are used to calculate a Weighted Trip Study (TSw). The Weighted Trip Generation (TGw) is calculated based on Trip Generation per 1,000 sq. ft. multiplied by the Weighted Trip Study (TSw). The total trips per 1,000 SQ. FT. is the sum of the Weighted Trip Generation (TGw). Multi-Family Residential (Low Rise) example: TSw = (22 / 41) = 0.537; TGw = (5.59 x 0.537) = 3.00. Multi-Family Residential Trip Generation is the sum of (3.00 + 1.11 + 0.73) = 4.84 trips per 1,000 square feet.

BOYNTON BEACH RESIDENTIAL SQUARE FOOTAGE CONVERSION FOR TRIP GENERATION					
DWELLING UNIT TYPE PER ITE TRIP GENERATION MANUAL	LAND USE CODES	SQ. FT.	TOTAL UNITS	AVERAGE SQ. FT. PER UNIT	1,000 SQ. FT. CONVERSION
Single-Family Residential Detached	100, 300, 800, 900, 909	2,617,923	1,142	2,292	2.29
Single-Family Residential Attached	110, 2700	3,446,065	1,919	1,796	1.80
Multi-Family Residential: (Low Rise)	220, 240, 400, 2800, 2900	3,745,747	3,105	1,206	1.21
Multi-Family Residential: (Mid Rise)	230, 260, 400	4,196,413	3,810	1,101	1.10
Multi-Family Residential: (High Rise)	400	712,160	590	1,207	1.21

Source: Land Use types based on ITE Trip Generation Manual, 11th Edition. Land Use Codes from the Palm Beach County Property Appraiser. Single-Family Residential Attached includes duplexs and townhomes. Multi-Family Residential (Low Rise) includes apartments and condos three (3) stories or less. Multi-Family Residential (Mid Rise) includes apartments and condos four (4) to ten (10) stories. Multi-Family Residential (HIgh Rise) includes condos greater than (10) stories.

MOBILE RESIDENCE TRIP GENERATION												
ITE LAND USE	ITE LAND USE CODE	VARIABLE	AM PEAK (7 to 9)	AM PEAK FACTOR	AM NUMBER OF STUDIES	PM PEAK (4 to 6)	PM PEAK FACTOR	PM NUMBER OF STUDIES	TOTAL NUMBER OF STUDIES	CALCULATED DAILY	TRIP STUDIED (WEIGHTED)	TRIP GENERATION (WEIGHTED)
MOBILE HOME PARK	420	UNIT	0.39	0.079	9	0.58	0.094	9	18	5.55	0.45	2.50
RV PARK	416	LOT	0.21	0.066	4	0.27	0.071	6	10	3.49	0.25	0.87
RECREATIONAL HOME	260	ROOM	0.22	0.060	6	0.29	0.080	6	12	3.65	0.30	1.09
TOTAL	--	--	--	--	19	--	--	21	40	--	1.00	4.47

Notes: Mobile Residence Trip Generation based on the AM and PM Peak of adjacent street traffic per room based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Trip Study Weight (TSW). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles. The Trip Generation Weight (TGW) is calculated based on daily trips multiplied by Trip Study Weighting. The total trips per room is the sum of the weighted Trip Generation (TGW). RV Park Example: DT = ((0.21 / .066) + (0.27 / 0.071)) = 3.49; TSW = (10 / 40) = 0.25; TGW = (3.49 x 0.50) = 0.87. RV Park Trip Generation: Sum (2.50 + 0.87 + 1.09) = 4.47. ***Average values in the last row are shown in italics for informational purposes only.***

COMMUNITY SERVING TRIP GENERATION												
ITE LAND USE	ITE LAND USE CODE	VARIABLE	AM PEAK (7 to 9)	AM PEAK FACTOR	AM NUMBER OF STUDIES	PM PEAK (4 to 6)	PM PEAK FACTOR	PM NUMBER OF STUDIES	TOTAL NUMBER OF STUDIES	CALCULATED DAILY TRIPS (TG)	TRIP STUDIED (WEIGHTED)	TRIP GENERATION (WEIGHTED)
CHURCH	560	1000 SF	0.32	0.070	6	0.49	0.07	11	17	5.79	0.89	5.18
MUSEUM	580	1000 SF	0.28	0.070	1	0.18	0.07	1	2	3.29	0.11	0.35
TOTAL	--	--	--	--	7	--	--	12	19	--	1.00	5.52

Notes: Community Serving Trip Generation based on the AM and PM Peak of adjacent street traffic per room based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Trip Study Weight (TSW). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on a peak to daily factor of 0.07. The Trip Generation Weight (TGw) is calculated based on daily trips multiplied by Trip Study Weight (TSw). The total trips per room is the sum of the weighted Trip Generation (TGw). Church Example: = ((0.32 / .07) + (0.49 / 0.07)) = 5.79; TSw = (17 / 19) = 0.89; TGw = (5.79 x 0.89) = 5.18. Community Serving Trip Generation is the sum of the weighted trip generation (5.18 + 0.35) = 5.52.

LONG TERM CARE TRIP GENERATION

CONTINUING CARE RETIREMENT COMMUNITY	255	1000 SQ. FT.	0.38	0.047	15	0.48	0.081	15	30	6.92	0.41	2.84
NURSING HOME	620	1000 SQ. FT.	0.55	0.075	8	0.59	0.074	8	16	7.65	0.22	1.68
TOTAL / *AVERAGE*			*0.39*	*0.066*	36	*0.53*	*0.081*	37	73	*6.46*	1.00	6.68

Notes: Long Term Care Trip Generation based on the AM and PM Peak of adjacent street traffic based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. Congregate Care Facilities and Continuing Care Retirement Community were converted from units to 1,000 sq. ft. based on unit sizes of 330 sq. ft. and 400 sq. ft. respectively. Congregate Care Facilities AM and PM Peak Trips were multiplied by 3.3 to convert 330 sq. ft. units to 1,000 sq. ft. Continuing Care Retirement Community AM and PM Peak Trips were multiplied by 2.5 to convert 400 sq. ft. units to 1,000 sq. ft. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Trip Study Weight (TSW). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles. The Trip Generation Weight (TGW) is calculated based on daily trips multiplied by Trip Study Weighting. The total trips per 1,000 sq. ft. is the sum of the weighted Trip Generation (TGW). Nursing Home Example: DT = ((0.55 / .075) + (0.59 / 0.074)) = 7.65; TSW = (16 / 73) = 0.22; TGW = (7.65 x 0.22) = 1.68. Long Term Care TG: Sum(1.51 + 0.65 + 2.84 + 1.68) = 6.68. ***Average values in the last row are shown in italics for informational purposes only.***

CALCULATED DAILY TRIP GENERATION RATE PER 1,000 SQ. FT. IS (1.96 x 5) = 9.82 PER 1,000 SQ. FT.										9.82

DAILY TRIP GENERATION RATE OF 9.82 PER 1,000 SQ. FT. BASED ON 1,000 SQ. FT. DIVIDED BY THE AVERAGE SQUARE FEET PER STUDENT OF 200 SQ. FT. MULTIPLIED BY WEIGHTED TRIP GENERATION PER STUDENT: (1,000 / 200 = 5.00); (1.96 X 5.00 = 13.76). TRIP GENERATION ROUNDED TO NEAREST 100TH PLACE. DAILY TRIPS BASED ON THE SUM OF THE AM AND PM PEAK HOUR OF GENERATOR TIMES A PEAK-TO-DAILY FACTOR OF 1.5: (E.G., CHARTER HIGH SCHOOL 0.94 + 0.73 = 1.67; 1.67 X 1.5 = 2.51). PEAK HOUR DATA HAD SIGNIFICANTLY MORE STUDIES THAN DAILY DATA. TOTAL NUMBER OF STUDIES BASED ON THE SUM OF THE NUMBER OF STUDIES FOR THE AM AND PM PEAK HOUR OF GENERATOR PER SCHOOL TYPE. ALL TRIP GENERATION DATA BASED ON THE ITE TRIP GENERATION MANUAL, 11TH EDITION.

AVERAGE SQUARE FEET PER STUDENT = 142.5 SQ. FT. BASED ON A WEIGHTED AVERAGE OF STUDENTS PER SCHOOL TYPE BASED ON TABLE 10 FROM THE FLORIDA DEPARTMENT OF EDUCATION REVIEW & ADJUSTMENT FOR FLORIDA'S COST PER STUDENT STATION (JANUARY 2020).

Notes: Outdoor Commercial Recreation Trip Generation based on the AM and PM Peak of adjacent street traffic based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The trip generation for golf driving ranges was converted from tees to acreage based on two (2) tees per acre. The trip generation for a soccer complex was converted from fields to acreage based on two and a half acres (2.5) per field. The trip generation for tennis courts and a raquest / tennis court was converted from courts to acreage based on two (2) courts per acre. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Trip Study Weight (TSW). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles. The Trip Generation Weight (TGW) is calculated based on daily trips multiplied by Trip Study Weighting. The total trips per acre is the sum of the weighted Trip Generation (TGW). Golf Course Example: DT = ((0.19 / .083) + (0.28 / 0.083)) = 2.83; TSW = (6 / 33) = 0.18; TGW = (2.83 x 0.18) = 0.51. Outdoor Comercial Recreation TG is equal to the sum of the following: (0.29 + 0.51 + 0.32 + 14.58 + 6.15 + 5.58) = 27.43. ***Average values in the last row are shown in italics for informational purposes only.***

Notes: Indoor Entertainment Trip Generation based on the AM and PM Peak of adjacent street traffic per 1,000 square feet (SQ. FT.) based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Trip Study Weight (TSW). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles for ITE Land Use Code 495 (Recreational Community Center). This was the only indoor recreational use with a reported daily trip distribution. The Trip Generation Weight (TGW) is calculated based on daily trips multiplied by Trip Study Weighting. The total trips per 1,000 SQ. FT. is the sum of the weighted Trip Generation (TGW). Community Center Example: DT = ((1.91 / .068) + (2.50 / 0.123)) = 24.21; TSW = (27 / 52) = 0.52; TGW = (24.41 x 0.52) = 12.57. Indoor Commercial Recreation Trip Generation is the sum of (0.65 + 0.84 + 0.35 + 1.23 + 6.37 + 4.69 + 12.57) = 24.86. ***Average values in the last row are shown in italics for informational purposes only.***

Notes: Industrial Trip Generation based on the Daily Rate from the 11th Edition of the ITE Trip Generation Manual. The total number of studies (TS) conducted for Daily Trips (DT) are used to calculate a Trip Study Weight (TSw). The Trip Generation Weight (TGw) is calculated based on daily trips multiplied by weighted Trip Study. The total trips per 1,000 sq. ft. is the sum of the weighted Trip Generation (TGw). Light Industrial Example: TSW = (37 / 152) = 0.243; TGW = (4.87 x 0.243) = 1.185. The trip generation (TG) for Industrial uses is the sum of (1.185 + 0.599 + 1.656 + 0.013 + 1.051 + 1.292) = 5.80. *Average DT shown in italics for informational purposes only.*

TOTAL	--	--	--		184	--	--	204	388	--	--	2.34

Notes: Commercial Storage Trip Generation based on the AM and PM Peak of adjacent street traffic per 1,000 squate feet (SQ. FT.) based on the 11th Edition of the ITE Trip Generation Manual. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Weighted Trip Study (TSw). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on the closest 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles. The Weighted Trip Generation (TGw) is calculated based on daily trips multiplied by Weighted Trip Study (TSw). The total trips per 1,000 SQ. FT. is the sum of the Weighted Trip Generation (TGw). High Cube Fullfillment Example: DT = ((0.16 / .0113) + (0.16 / 0.113)) = 1.42; TSw = (44/ 388) = 0.113; TGw = (1.42 x 0.11) = 0.16. Commercial Storage Weighted Trip Generation (TGw) is the sum of (0.61 + 0.14 + 1.10 + 0.16 + 0.14 + 0.12 + 0.08) = 2.34.

OFFICE TRIP GENERATION						
USE	ITE	VARIABLE	DAILY TRIPS (DT)	NUMBER OF STUDIES (TS)	WEIGHTED TRIP STUDY (TSw)	WEIGHTED TRIP GENERATION (TGw)
OFFICE	710	1,000 SQ. FT.	10.84	59	0.38	4.15
SMALL OFFICE	712	1,000 SQ. FT.	14.39	21	0.14	1.96
CORPORATE HEADQUATERS	714	1,000 SQ. FT.	7.95	7	0.05	0.36
SINGLE TENANT	715	1,000 SQ. FT.	13.07	12	0.08	1.02
HOSPITAL	610	1,000 SQ. FT.	10.77	7	0.05	0.49

RESEARCH & DEVELOPMENT	760	1,000 SQ. FT.	11.08	22	0.14	1.58
BUSINESS PARK	770	1,000 SQ. FT.	12.44	16	0.10	1.29
TOTAL				154	1.00	11.58

Notes: Office Trip Generation based on Daily Weekday Trip Generation per 1,000 squate feet (SQ. FT.) based on the 11th Edition of the ITE Trip Generation Manual. The total number of studies (TS) conducted are used to calculate a Weighted Trip Study (TSw). The Daily Trips (DT) generation is based on ITE Trip Generation Manual 11th edition. The Weighted Trip Generation (TGw) is calculated based on Daily Trips (DT) multiplied by the Weighted Trip Study (TSw). The total trips per 1,000 SQ. FT. is the sum of the Weighted Trip Generation (TGw). Office Example: TSw = (59 / 154) = 0.38; TGw = (10.84 x 0.38) = 4.15. Office Trip Generation is the sum of (4.15 + 1.96 + 0.36 + 1.02 + 0.49 + 0.72 + 1.58 + 1.29) = 11.58.

MEDICAL OFFICE TRIP GENERATION						
USE	**ITE**	**VARIABLE**	**DAILY TRIPS (DT)**	**NUMBER OF STUDIES (TS)**	**WEIGHTED TRIP STUDY (TSw)**	**WEIGHTED TRIP GENERATION (TGw)**
MEDICAL OFFICE	**720**	**1,000 SQ. FT.**	**36.00**	**18**	**0.49**	**17.51**
CLINIC	**630**	**1,000 SQ. FT.**	**37.60**	**9**	**0.24**	**9.15**

Notes: Retail Trip Generation based on Daily Weekday Trip (DT) Generation per 1,000 square feet (SQ. FT.) based on the 11th Edition of the ITE Trip Generation Manual. The simple average for daily trips is for information purposes only to illustrate the difference compared to weighted trips. The total number of studies (TS) conducted are used to calculate a Weighted Trip Study (TSw). The Weighted Trip Generation (TGw) is calculated based on Daily Trips (DT) multiplied by the Weighted Trip Study (TSw). The total trips per 1,000 SQ. FT. is the sum of the Weighted Trip Generation (TGw). Variety Store Example: TSw = (29 / 386) = 0.08; TGw = (63.66 x 0.08) = 4.78. Retail Trip Generation is the sum of (0.57 + 9.42 + 4.78 + 2.93 + 1.76 + 10.36 + 1.22 + 0.56 + 1.30 + 0.98 + 1.72 + 0.93 + 2.20 + 0.49 + 1.51 + 0.53 + 0.41 + 0.30) = 42.00. ***Average values in the last row are shown in italics for informational purposes only.***

DRIVE-THRU & FUEL POSITION TRIP GENERATION ADJUSTMENT												544.55
NET TRIP GENERATION (BASED ON TGw PER 1,000 SQ. FT. MINUS DRIVE-THRU & FUEL POSITION TRIP GENERATION ADJUSTMENT: 887.21 - 544.55 = 588.82)												342.66

Notes: Convenience Retail Trip Generation based on Daily Weekday Trip (DT) Generation per 1,000 square feet (SQ. FT.) based on the 11th Edition of the ITE Trip Generation Manual. The simple average for daily trips is for information purposes only to illustrate the difference compared to weighted trips. The total number of studies (TS) conducted are used to calculate a Weighted Trip Study (TSw). The Weighted Trip Generation (TGw) is calculated based on Daily Trips (DT) multiplied by the Weighted Trip Study (TSw). The total trips per 1,000 SQ. FT. is the sum of the Weighted Trip Generation (TGw). Convenience Store Example: TSw = (78 / 798) = 0.10; TGw = (913.60 x 0.10) = 89.30. Convenience Retail Trip Generation is the sum of (89.30 + 19.24 + 316.74 + 42.76 + 124.64+ 103.92 + 76.44 + 114.17) = 887.21.

The same methodology applies to the Drive-Thru and Fuel Position Trip Generation Adjustmemt. The total number of studies (TS) is as follows: (Drive-Thru = 35; Fuel Position = 386; 35 + 386 = 421). The trip study weight (TSw) is as follows: (35 / 421 = 0.083; 386 / 421 = 0.917). The weighted trip generation TGw is as follows: (507.99 x 0.083) = 42.23; (279.39 x 2) = 558.77; (558.77 x 0.917) = 512.32). The trip generation for fuel positions is multiplied by two to account for the number of positions per 1,000 sq. ft. The trip generation adjustment is equal to the following: (42.23 + 512.32 = 544.55). The trip generation analysis for Quick Service Restaurant Drive-Thru's and Motor Vehicle Fuel Positions is provided in the trip generation appendix.

Notes: Car Wash Trip Generation based on the PM Peak of adjacent street traffic per unit of measure based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The total number of studies (TS) conducted for the PM Peak are used to calculate a Weighted Trip Study (TSw). The Daily Trips (DT) generation is based on the PM Peak divided by the PM Peak factor. PM Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles for ITE Land Use Codes 949. The Weighted Trip Generation Weight (TGw) is calculated based on Daily Trips multiplied by Weighted Trip Study. The total trips is the sum of the Weighted Trip Generation (WTG). Self-Service Car Wash Example: DT = ((5.54 / .087) = 63.68; TSw = (6 / 10) = 0.60; TGw = (63.68 x 0.60) = 38.21. Car Wash Trip Generation is the sum of (38.21 + 267.24 + 15.63) = 321.08. Automated car washed typically feature one (1) lane and one (1) tunnel. Some high volume car washes will feature two (2) or (3) approach lanes. Self service or full service car washes may feature between four (4) and eight (8) stalls. The high volume car washes will feature multiple finishing stations for vacuuming and detailing vehicles. An additional analysis based on total units of measure was performed to illustrate that on a daily trip basis, car washes produce similar results for the facility as a whole. For car washes with a tunnel system, the trip generation would also apply to every three (3) finishing stations based on TGw divided by Average Number of Stalls multiplied by three (3): (585.69 / 6 = 97.61); (97.61 x 3 = 328.02). Accounting for the number of finishing stations levels the trip generation between self service and automated car washes. For automated stations, the trip generation would also include 321.08 trip per five (5) finishing stations.

MOTOR VEHICLE FUELING TRIP GENERATION

NET TRIP GENERATION TGw PER BANK DRIVE-THRU MINUS TGw FOR HIGH-IMPACT RETAIL (PER 1,000 SQ. FT.) (243.39 - 106.33) = 137.06												**137.06**

Notes: Bank Drive-Thru Trip Generation based on the AM and PM Peak of adjacent street traffic per room based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Trip Study Weight (TSW). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles for ITE Land Use Codes 912. The Trip Generation Weight (TGw) is calculated based on daily trips multiplied by Trip Study Weight (TSw). The total trips per room is the sum of the weighted Trip Generation (TGw).

The trip generation per drive-thru is based on the weighted daily trips per drive-thru of 243.39 minus the weighted daily trips per 1,000 sq. ft. for High-Impact Retail Uses 106.33 for a net trip generation of 137.06 (243.39 - 106.33 = 137.06). The mobility fee for the square footage of the Financial Services building is based on the trip generation for High-Impact Retail land uses.

NET TRIP GENERATION BASED ON AVERAGE OF WEIGHTED DRIVE-THRU & WEIGHTED PHARMACY DRIVE-THRU: (260.27 + 277.89 = 538.16); (538.16 / 2 = 269.08)												269.08
NET TRIP GENERATION BASED ON AVERAGE OF FIVE (5) MINUTE WAIT TIME OVER ONE (1) HOUR DIVIDED BY A WEIGHTED AVERAGE PM PEAK HOUR FACTOR OF 0.0958: (60 / 5 = 12); (12 / 0.0958 = 125.26)												125.26

Notes: Drive-Thru Trip Generation based on the AM and PM Peak of adjacent street traffic per 1000 Sq Ft based on the 11th Edition of the ITE Trip Generation Manual due to the limited number of daily studies. The total number of studies (TS) conducted for the AM and PM Peaks are used to calculate a Weighted Trip Study (TSw). The Daily Trips (DT) generation is based on the average of the AM Peak divided by the AM Peak factor and the PM Peak divided by the PM Peak factor. AM and PM Peak factors based on the 11th Edition ITE Trip Generation Manual Vehicle Time of Day Distribution for Vehicles. The Weighted Trip Generation Weight (TGw) is calculated based on Daily Trips multiplied by Weighted Trip Study. The total trips per drive-thru is the sum of the Weighted Trip Generation (WTG). Fast Food with Drive-Thru Example: DT = ((43.00 / .035) + (59.50 / 0.067)) = 1058.32; TSw = (7 / 180) = 0.04; TGw = (1058.32 x 0.04) = 41.16. Drive-Thru Trip Generation is the sum of (41.16 + 57.62 + 161.49) = 260.27. A trip generation per drive-thru was then calculated for pharmacies based on AM and PM peak hour trip generation for a pharmacy with and with-out a drive-thru. The difference in daily trip generation between a pharmacy with and with-out a drive-thru was then calculated. The difference was then calculated for a typically size pharmacy of 13,000 sq. feet. The average of the two drive-thru analysis was then calculated for an average weighted daily trip generation of 269.08 for a drive-thru. The land uses tend to be higher trip generators. A trip generation rate was then calculated assuming 12 vehicles and hour using a drive-thru (5 minutes per vehicle). This average value was then converted to a daily trip generation rate based on the weighted average PM Peak Hour factor for all land uses (0.0958). The new trip generation result is a daily trip generation of 125.26 per drive-thru. This analysis was done to illustrate that the calculated rates did not exceed those of higher trip generating land uses. ***Average values in the last row are shown in italics for informational purposes only.***

Note: The total trips by distance, the percentage of total trips, the total trips and percentage less than 5 miles, less than 10 miles and more than twenty five miles was prepared by NUE Urban Concepts, LLC as of April 2024. The data for the years 2019 thru 2023 are total household trips for the entire year.

Source: U.S. Department of Transportation (DOT) Bureau of Transportation Statistics (BTS). Trips by Distance –Palm Beach County, FL (Federal Information Processing Standard (FIPS) Code 12099): The Trips by Distance data and number of people staying home and not staying home are estimated for the Bureau of Transportation Statistics by the Maryland Transportation Institute and Center for Advanced Transportation Technology Laboratory at the University of Maryland. The travel statistics are produced from an anonymized national panel of mobile device data from multiple sources. All data sources used in the creation of the metrics contain no personal information. Data analysis is conducted at the aggregate national, state, and county levels. Trips are defined as movements that include a stay of longer than 10 minutes at an anonymized location away from home. Home locations are imputed on a weekly basis. A movement with multiple stays of longer than 10 minutes before returning home is counted as multiple trips. Trips capture travel by all modes of transportation. including driving, rail, transit, and air. Website: https://data.bts.gov/Research-and-Statistics/Trips-by-Distance-County/p3sz-y9us/about_data

BOYNTON BEACH MOBILITY FEE SCHEDULE FOOTNOTES

[1] Single-Family Residential Square Feet is the sum of the area (in square feet) of each dwelling unit measured from the exterior surface of the exterior walls.

[2] Multi-Family Residential Square Feet is the sum of the area (in square feet) of each building measured from the exterior surface of the exterior walls. This includes common areas, lobbies, leasing offices, and residential amenities not accessible to the public. Retail or office square footage leased to a third-party would pay the applicable mobility fee rate. Square footage does not include parking garages or structures.

[3] Any retail, office, or non-residential square footage that is leased to a third-party use to provides drinks, food, goods, or services to the public shall be required to pay the applicable mobility fee per the individual uses identified in the mobility fee schedule.

[4] For Commercial Recreational Uses that feature both indoor facilities and outdoor recreation, the indoor shall be based on the indoor mobility fee rate, the outdoor shall be made on the outdoor rate, any other uses shall pay the applicable mobility fee for the land use.

[5] Acreage for any unenclosed material and vehicle storage, including but not limited to boats, commercial vehicles, recreational vehicles (RV), and trailers, sales and display shall be converted to square footage. See Commercial Storage definition for further detail.

[6] Retail includes all uses that do not fall under High Impact or Convenience Retail and generate less than 75 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study.

[7] High Impact Retail includes banks, pharmacies, sit down restaurants (non fast food), grocery stores, supermarkets, beer, liquor, package, wine and spirits stores, bars, nightclubs, lounges. These uses generate between 75 and 250 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study. Convenience Retail includes convenience stores, gas stations, service stations, coffee, donut, sandwich, food and beverage that would be considered fast food or quick service restaurants. These uses generate between more than 250 daily trips per 1,000 sq. ft. per the latest ITE Generation Manual or alternative study.

[8] Non-residential uses are assessed applicable mobility fees per unit of measure in addition to the mobility fee assessed with the square footage of the building.

[9] Auto / Boat / Car Wash shall mean any car wash, wax, or detail where a third party or automatic system performs the cleaning service. Mobility Fee are assessed per bay or stall, plus per five (5) finishing stations. See definition for further detail. The applicable mobility fee rate would also be assessed for any additional building square footage under retail uses.

[10] Auto Charging or Fueling per position apply to a convenience store, gas station, general store, grocery store, supermarket, superstore, variety store, wholesale club or service stations with charging stations or fuel pumps. In addition, there shall be a separate mobility fee for the square footage of any retail building per the applicable mobility fee rate under retail uses. The number of charging or fueling positions is based on the maximum number of vehicles that could be charged or fueled at one time. Non-commercial vehicle charging stations associated with residential or non-residential uses that are required by the City or are provided by the owner as an amenity and not a commercial purpose shall not be assessed a mobility fee.

[11] Auto or Boat Repair / Service includes maintenance, repair, and servicing of motor vehicles. Mobility Fee are assessed per bay or stall, plus a retail rate associated with any additional building sq. ft. under retail uses for waiting areas, parts, and sales.

[12] Banks shall pay the High Impact Retail rate for the square footage of the building under the retail use category. Drive-thru lanes, Free Standing ATM's and Drive-thru lanes with ATM's are assessed a separate fee per lane or per ATM and are added to any mobility fee associated with a bank building. The free-standing ATM is for an ATM only and not an ATM within or part of another non-financial building, such as an ATM within a grocery store.

[13] Any drive-thru associated with a fast food restaurant will be an additive fee in addition to the applicable Convenience Retail mobility fee per square foot of the building. The number of drive-thru lanes will be based on the number of lanes present when an individual places an order or picks up an order, whichever is greater.

[14] Any drive-thru associated with a Retail or High Impact retail use will be assessed an additive mobility fee in addition to the applicable retail use mobility fee rate per square foot of the building. The number of drive-thru lanes shall be based on the total number of lanes available for either pick-up, drop-off, or placement of an order for goods or services.

APPENDIX Y

Comparison of Mobility Fees with County Road Impact Fees

APPENDIX Y: COMPARISON WITH COUNTY FEES						
USE CATEGORIES, USE CLASSIFICATIONS & REPRESENTATIVE USES. NOTE: CITY & COUNTY LAND USES DIFFER. THIS ANALYSIS REFLECTS THE CLOSEST COMPARABLE LAND USES. THE CITY DATA IS BASED ON 2024 CONDITIONS. THE COUNTY STUDY WAS CONDUCTED IN 2022. THE CITY MOBILITY FEE METHODOLOGY DIFFERS FROM THE COUNTY ROAD IMPACT FEE METHODOLOGY.	UNIT OF MEASURE (UOM)	PERSON TRAVEL DEMAND (PTDu)	MOBILITY FEE RATE PER USE (MFu)	COUNTY ROAD IMPACT FEE	DIFFERENCE CITY VS COUNTY	NOTE: FOR SPECIFIC COUNTY RATES, SEE PALM BEACH COUNTY ROAD IMPACT FEE SCHEDULE.
Residential Uses						
Single-Family Residential Dwelling (Detached, Duplex, Accessory Dwelling, Townhome, Townhouse, Tiny Home)	per 1,000 Sq. Ft.	7.13	$2,806	$5,597	Lower	City per sq. ft., (2K house $5,612) - County per dwelling
Multi-Family Residential Dwelling (Apartment, Condo, 3 or more Attached Dwellings, Dormitory)	per 1,000 Sq. Ft.	8.42	$3,312	$3,788	Lower	City per sq. ft. (total building), County per dwelling
Mobile Residence (Mobile Home (MH), Recreational Vehicle (RV), MH and / or RV Park)	per space / lot	7.78	$3,059	$2,076	Higher	
Institutional Uses						
Community Serving (Civic / Fraternal Club, Gallery, Museum, Performance Venues, Place of Assembly or Worship)	per 1,000 Sq. Ft.	9.42	$3,704	$2,898	Higher	
Group Home (Assisted Living, Care or Recovery Homes, Congregate Living Facility, Nursing Home)	per 1,000 Sq. Ft.	9.30	$3,657	$2,949	Higher	City per sq. ft., County per bed (assume 4 beds)
Private Education (Afterschool, Family Day Care, K-12, Pre-K, Trade School, Tutor)	per 1,000 Sq. Ft.	20.16	$7,928	$7,787	Lower	Based on County Day Care, Higher than Private Ed (K-12)
Commercial Recreational Uses						
Marina (wet berths, dry slips, ancillary repair, yacht club)	per Berth	8.06	$3,168	--	N/A	County does not list
Entertainment, Outdoor (Amusement, Golf, Multi-Purpose, Recreation, Sports, Tennis)	per Acre	73.36	$28,850	$26,611	Higher	County based on 2 tennis courts (~1 acre)
Entertainment, Indoor (Amusement Arcade, Exercise Studio, Fitness, Gym, Health, Indoor Sports, Recreation)	per 1,000 Sq. Ft.	41.55	$16,342	$14,426	Higher	
Industrial Uses						
Industrial (Assembly, Brewery, Development and Testing, Distribution and Processing, Microbrewing, Trades, Utilities)	per 1,000 Sq. Ft.	7.50	$2,949	$2,170	Higher	
Commercial Storage (Boat / Vehicle, Junk /Salvage Yard, Recycling / Waste Management, Open, Self-Service, Warehouse)	per 1,000 Sq. Ft.	2.99	$1,176	$873	Higher	
Office Uses						
Office (Administrative, Business, Hospital, Post Secondary Education, Professional, Real Estate)	per 1,000 Sq. Ft.	14.97	$5,888	$4,871	Higher	
Medical or Dental Office (Clinic, Dental, Health Service, Laboratory, Professional Care, Emergency Care, Rehab, Veterinary)	per 1,000 Sq. Ft.	37.57	$14,777	$11,245	Higher	
Retail Uses						
Retail (Auto / Boat Rental or Sales, New or Used Merchandise, Personal or Pet Care, Sales, Services, Stores)	per 1,000 Sq. Ft.	20.13	$7,918	$6,758	Higher	County average of three retail fees
High Impact Retail (Alcoholic Beverages, Banks, Grocery Store, Pharmacy & Drug Store, Sit-Down Restaurant)	per 1,000 Sq. Ft.	43.83	$17,236	$14,507	Higher	County average of five retail fees
Convenience Retail (Convenience Store, Fast Food Restaurant, Gasoline Station)	per 1,000 Sq. Ft.	105.21	$41,379	$46,042	Lower	County average of two fees, City has additive fees
Non-Residential Uses Per Unit of Measure						
Auto / Boat / Car Wash (Automated, Cleaning, Dry, Detailing, Polishing, Self-Serve, Vacuum, Wash, Wax)	per Lane or Stall plus per five (5) Stations	41.02	$16,134	$6,913	Higher	
Auto Charging or Fueling (Commercial Facility which requires Membership or Payment)	per Charging or Fueling Position	35.70	$14,039	$8,436	Higher	County average of three fees, note City convenience is lower, which is part of difference
Auto or Boat Repair / Service (Brakes, Install, Maintenance, Major, Minor, Quick Lube, Repair, Tint, Tires)	per Bay or Stall	21.82	$8,580	$6,917	Higher	
Bank or Financial Drive-Thru Lane or Free-Standing ATM	per Lane / ATM	52.54	$20,661	--	N/A	County does not list
Fast Food or Quick Service Restaurant Drive Thru	per Lane	94.63	$37,215	--	N/A	County does not list
Overnight Lodging (B&B, Condo Hotel, Hotel, Motel, Short-term Rental, Transient)	per Room	10.45	$4,108	$2,498	Higher	
Retail Drive-Thru (Dry Cleaner, Dollar Store, Grocery Store, Pharmacy & Drug Store, Retail)	per Lane	46.50	$18,288	--	N/A	County does not list

Re: House Bill 479 Overview

The Florida Legislature recently adopted House Bill 479 that amended Florida Statute Sections 163.3180 related to Concurrency and 163.31801 related to Impact Fees. The concurrency amendments specifically addressed alternative transportation systems such as mobility fees. House Bill 479 was passed by a unanimous vote of the House of Representatives and a 39 to 1 vote by the Senate. The Governor signed HB 479 into law on June 25th, 2024. The effective date of HB 479 is October 1st, 2024.

The amendments to Florida Statute Section 163.3180 explicitly allow any local government to adopt an alternative transportation system to replace transportation concurrency. A mobility fee, based on an adopted mobility plan, is the primary alternative transportation system identified in the amended sections of 163.3180. There are no exemptions for this allowance for any Charter County.

The amendments to Florida Statute Section 163.31801 establish a time frame of one year for adoption of an impact fee study after an analysis has commenced and establishes that alternative transportation system honor existing impact fee credit. The processes and procedures established for impact fees under Florida Statute Section 163.31801, such as basing fees on the most recent and localized data, time frames for adoption of studies, and extraordinary circumstances, also apply to alternative transportation systems per Florida Statute Section 163.3180.

The most significant component of HB 479 is to explicitly state that **only one fee** to mitigate transportation impact maybe collected. Further, the entity **responsible for collection of that fee** is the **local government who issues building permits**. The exception is if a local government agrees through an interlocal agreement to allow the County to be the entity to collect the mitigation fee. This is a substantial clarification in Florida Statute and applies to all local governments, including all Charter Counties.

There are two exemptions for certain provisions of HB 479. Miami Dade County and Hillsborough County are the only two Charter Counites that are exempt from certain provisions of HB 479. Any municipality and county that has an interlocal agreement that jointly coordinates the mitigation of transportation impact prior to October 1st, 2024, would also be exempt from HB 479 until such time as the interlocal agreement expires or is terminated by either a municipality or a county.

HB 479 does require that municipalities and counties, through an interlocal agreement, coordinate the mitigation of transportation impacts through a mobility plan adopted into the Comprehensive Plan. The primary intent of HB 479 is to address the double charging of development that occurs when a municipality adopts a transportation impact fee or mobility fee, and a county also requires that municipality to collect a transportation impact fee or mobility fee on behalf of the county.

Boynton Beach does not currently collect a mobility fee or transportation impact fee. It does collect Palm Beach County's transportation impact fee. Under HB 479, the City may adopt its own mobility fee for all or a portion of the City and negotiate with the County on any transportation mitigation and sharing of the City's mobility fee.

The amendments in HB 479 stipulate that an interlocal agreement between a county and a municipality shall at a minimum ensure that:

(1) Development is not charged twice for the same impact;

(2) The alternative transportation system fee is plan based (i.e., mobility plan);

(3) The local government issuing the building permit is the entity responsible for collection of a fee assessed under an alternative transportation system; and

(4) The alternative transportation system methodology shall establish a system for assigning mitigation between the county and municipality.

The amendments in HB 479 further stipulate that if a local government does not adopt an interlocal agreement by October 1st, 2025, then the alternative transportation fee assignment between a county and a municipality shall:

(1) Either be based on a developer traffic study, or the mobility plan adopted by the county or municipality; and

(2) If an interlocal is not entered into between the county and a municipality, the developer is entitled to receive a 10% discount on the assessed alternative transportation mitigation; and

(3) Upon completion of the study or plan, the county or city must distribute funds collected to the other entity within 60 days from the date of collection.

The provision for a developer study and a 10% reduction are not required for counties and municipalities that already have an interlocal agreement that complies with HB 479; unless either a county or municipality elects to terminate the interlocal agreement. Once the agreement is terminated, then the county and municipality are both bound to the coordination requirements for an interlocal agreement and that the apportionment of funds between the county and municipality is subject to either a developer traffic study or the adopted local government mobility plan after October 1st, 2025.

The City of DeBary and Palm Beach County currently have an interlocal agreement that stipulates the City will collect the County's transportation impact fee. Upon adoption of a City mobility fee, the City may notify the County that it intends to no longer collect the County's transportation impact fee and may enter into an updated interlocal agreement with the County to address impacts on County Roads.

The City's Mobility Plan update and its draft Mobility Fee address impact to City, County, and State Roads. The share of Mobility Plan projects on County Roads is roughly 5% of the overall City Mobility Plan. The implementing ordinance will stipulate that the update of the Mobility Plan and Mobility Fee should start no later than four years from the date of adoption and be adopted within five years from the last update. Thus, the share of County projects may change in the future as part of updates to the Plan and Fee.

Should the City elect to move forward with its Mobility Fee, it should send notice to the County that they will no longer require development to pay the County's transportation impact fee. All transportation related mitigation fees would be paid to the City within the limits of the mobility plan and fee study area. Outside of the study area, the City would still collect the County fee and implement transportation concurrency until such time as the City elects to develop and adopt a Citywide Mobility Plan and Fee.

The City would provide the County with a new interlocal agreement to reflect HB 479. Note, the City of Palm Beach Gardens has already notified the County that is would no longer collect the County's transportation impact fee or implement transportation concurrency within the areas of the City east of the Beeline Highway where that City has adopted a Mobility Plan and Mobility Fee. NUE Urban Concepts is assisting the City with development of a Citywide Mobility Plan and Mobility Fee.

The City of West Palm Beach has provided notice to the County that it no longer intends to collect the County's transportation impact fee. The City has indicated that they intend to develop a City Mobility Plan and Mobility Fee. It is recommended that the City's legal counsel reach out to the legal counsel for Palm Beach Gardens and West Palm Beach prior to taking any formal action.

Once the City determines if it wants to move forward with an update of its Mobility Plan and adoption of a Mobility Fee, it should formally notify the County that it intends to adopt a Mobility Plan and Mobility Fee within the Mobility Study Area, and that the City intends to only collect its Mobility Fee. The notice should also state that the City will work in a cooperative manner to advance the Mobility Plan projects on County Roads within the City and provide a share of funding equivalent to the share of cost the projects represent in comparison to all of the projects identified in the City's Mobility Plan.

If the City were to move forward with a Mobility Plan and Mobility Fee for the remainder of the City, there would be a need for additional travel demand modeling, origin and destination analysis, and updated traffic counts on City, County, and State Roads. The ITE Trip Generation Manual is also being updated in summer of 2025. The City, as part of the mobility plan and mobility fee, may want to consider collecting city specific trip generation rates or time any update to coincide with new trip generation rates. It should be noted that the majority of major roads west of the Mobility Study Area are County Roads and that a larger share of collected Mobility Fees would likely need to be allocated to the County.

Upon review of the updated Mobility Plan and proposed Mobility Fee, should the City elect to move forward, it would need to develop an implementing ordinance for the Mobility Plan and Mobility Fee. The City's Comprehensive Plan will need to be amended to reflect the Mobility Plan and Mobility Fee.

The City would need to send notice to the County of its intent related to the Mobility Plan and Mobility Fee. The City would also want to start discussions with the County on development of a new interlocal agreement related to the Mobility Fee and the share to be set aside for the funding of County projects identified in the Mobility Plan.

NUE Urban Concepts has assisted the Cities of Longwood and Oviedo develop a mobility plan and mobility fee to replace Seminole County's mobility fee. In 2023, Indiantown and Martin County agreed to a 70% Village and a 30% County mobility fee, and the County agreed to spend the 30% in the Village on County Roads based on the mobility plan and mobility fee developed by NUE Urban Concepts. Altamonte Springs and Port St. Lucie are having NUE Urban update the mobility plans and fees, both of the adopted versions were developed by NUE Urban, to update their interlocal agreements with their respective Counties. The Village of Palm Springs and the City of Palm Beach Gardens have engaged NUE Urban to develop or update their plans and fees to implement HB 479.

The adoption of HB 479 provides the City with the opportunity to adopt a Mobility Fee, based on an updated Mobility Plan, within the Mobility Study Area. The City would determine how, where, and when Mobility Fee are expended within the City. Development within the City has contributed substantial transportation impact fees to the County over the last 20 plus years with few improvements constructed within the City relative to the amount of fees paid by new development. Adoption of a Mobility Fee would provide the City with the opportunity to ensure fees paid by new development are expended with the City to the benefit of City residents and businesses that paid the Mobility Fee.

Sincerely,

Jonatan B. Paul, AICP Principal
