Voting Members will either attend in person or by telephone conference call or video presentation. Items listed may be considered in any order

IMPORTANT NOTICE REGARDING PUBLIC PARTICIPATION

This meeting will be open to the public. Adherence to COVID-19 safety measures are recommended. If you would like to make a public comment, either in person or remotely, please review the information on the City's website and complete and submit the comment form found here: https://www.buckeyeaz.gov/government/city-clerk/meeting-agendas-minutes/meetings-agendas-minutes

1. Call to Order/Invocation/Pledge of Allegiance/Roll Call

2. Comments from the Public- Members of the audience may comment on any item of interest.
Council Action: Open Meeting Law does not permit Council discussion of items not specifically on the agenda

3. Awards/Presentations/Proclamations

4. Minutes

4.A Council to take action on approval of the November 8, 2021 Council Workshop Minutes, November 16, 2021 Council Workshop Minutes, and November 16, 2021 Regular Council Meeting Minutes.

5. Expenditures

5.A Council to take action on the request to ratify the payment of the accounts payable expenditures made. Copies of invoices are available at City Hall.
Staff Liaison: William Kauppi. Chief Financial Officer, wkauppi@buckeyeaz.gov, (623) 349-6161

6. CONSENT AGENDA ITEMS / NEW BUSINESS
Approval of items on the Consent Agenda -All items with an (*) are considered to be routine matters and will be enacted by one motion and vote of the City Council. There will be no separate discussion of these items unless a Council member requests, in which event the item will be removed from the consent agenda and considered in its normal sequence

***6.A** Council to take action on Resolution No. 88-21 enlarging City of Buckeye Street Lighting Improvement District No. 2021-SLID-003 and ordering recording and filing of this Resolution.
Summary: Street Lighting Improvement Districts (SLIDs) are established to purchase (not generate) energy for street lighting or public park lighting with the District and adjacent streets so that the costs are not borne by the City in its Highway User Revenue Fund.
Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.B** Council to take action on Resolution No. 90-21 accepting a Petition for formation of a Street Lighting Improvement District; declaring its intention to form a Street Lighting Improvement District; designating such District as "City of Buckeye, Street Lighting Improvement District No. 2020-SLID-004"; providing for the annual levy of taxes or assessments equally apportioned upon all of the non-public property owners in the District to purchase energy for the lighting of public streets and parks within and adjacent to the District; and ordering recording and filing of this Resolution.
Summary: Street Lighting Improvement Districts (SLIDs) are established to purchase (not generate) energy for street lighting or public park lighting with the District and adjacent streets so that the costs are not borne by the City in its Highway User Revenue Fund.
Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.C** Council to take action on Resolution No. 91-21 accepting a Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye; declaring the intention to form a Maintenance Improvement District; designating such District as "City of Buckeye Maintenance Improvement District No. 2020-MID-004"; and providing for the annual levy of taxes or an annual assessment against the lots within the District in proportion to the benefits received.
Summary: Both SLIDs and MIDs provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for residents/owners of a particular development without an undue burden upon the existing community. Maintenance Improvement Districts (MIDs) are responsible for maintaining parkways and parking on streets within the District.
Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.D** Council to take action on Resolution No. 92-21 ordering the work as described in Resolution

No. 90-21; ordering the formation of City of Buckeye Street Lighting Improvement District No. 2020-SLID-004; ordering recording and filing of this Resolution.

Summary: SLIDs are formed in the City of Buckeye in accordance with Ordinance No. 43-05 and assess the owners within a development for the cost of the electricity for the streetlights within the boundaries of the development SLID, including any public road street lighting that is of benefit to the development. SLIDs are established to purchase (and not generate) energy for street or public park lighting within the District and adjacent streets so that the costs are not borne by the City in its general HURF fund, though there are administrative services provided by the City.

Staff Liaison: Scott Lowe, Public Works Director, SLowe@buckeyeaz.gov, (623) 349-6815

***6.E** Council to take action on Resolution No. 93-21 ordering the work as described in Resolution No. 91-21; ordering the formation of City of Buckeye Maintenance Improvement District No. 2020-MID-004; ordering recording and filing of this Resolution.

Summary: MIDs are formed in the City of Buckeye in accordance with Ordinance No. 42-06 and assess the owners within a development for the cost of maintenance of the landscaping along the rights-of-ways within a development MID. MIDs are not activated unless the development's owners should fail or otherwise go out of business, since the owner is charged with that maintenance responsibility; however, the MID is standing by as a protection for the City to ensure that there is adequate revenue to take on the maintenance.

Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.F** Council to take action on Resolution No. 97-21 enlarging City of Buckeye Street Lighting Improvement District No. 2007-SLID-010 and ordering recording and filing of this Resolution.

Summary: Street Lighting Improvement Districts (SLIDs) are established to purchase (not generate) energy for street lighting or public park lighting with the District and adjacent streets so that the costs are not borne by the City in its Highway User Revenue Fund.

Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.G** Council to take action on Resolution No. 98-21 accepting a Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye; declaring the intention to form a Maintenance Improvement District; designating such District as "City of Buckeye Maintenance Improvement District No. 2019-MID-006"; and providing for the annual levy of taxes or an annual assessment against the lots within the District in proportion to the benefits received.

Summary: MIDs are formed in the City of Buckeye in accordance with Ordinance No. 42-06 and assess the owners within a development for the cost of maintenance of the landscaping along the rights-of-ways within a development MID. MIDs are not activated unless the development's owners should fail or otherwise go out of business, since the owner is charged with that maintenance responsibility; however, the MID is standing by as a protection for the City to ensure that there is adequate revenue to take on the maintenance.

Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.H** Council to take action on Resolution No. 99-21 ordering the work as described in Resolution No. 98-21; ordering the formation of City of Buckeye Maintenance Improvement District No. 2019-MID-006; ordering recording and filing of this Resolution.

Summary: MIDs are formed in the City of Buckeye in accordance with Ordinance No. 42-06 and assess the owners within a development for the cost of maintenance of the landscaping along the rights-of-ways within a development MID. MIDs are not activated unless the development's owners should fail or otherwise go out of business, since the owner is charged with that maintenance responsibility; however, the MID is standing by as a protection for the City to ensure that there is adequate revenue to take on the maintenance.

Staff Liaison: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815

***6.I** Council to take action on the License Agreement between the City of Buckeye, as Licensee, and the United States of America Department of Energy, Western Area Power Administration, related to the Hassayampa to Liberty 230-kV Transmission Line; and authorizing the City Manager to execute and deliver said License Agreement on behalf of the City.

Summary: Requesting approval council for proposed curbing, signal push buttons and waterline crossing easement that will cross under, over, or across WAPA's Hassayampa to Liberty 230-kV. WAPA concurs and agrees that the Curb, Waterline, and light controls can proposed by the licensee and will not interfere with the operations and maintenance of the described Transmission Line as shown on Exhibits A-1 to A-6.

Staff Liaison: Paul Lopez, Deputy City Engineer, plopez@buckeyeaz.gov, (623) 349- 6204

***6.J** Council to take action on the Sole Source procurement of a premium rubber surfacing for the Buckeye Aquatics Center Pool Deck from RubCorp Distribution LLC, with a total expenditure not to exceed $227,150.

Summary: The Construction and Contracting division is recommending RubCorp Distribution LLC, to provide products, installation and warranty through a "Sole Source" procurement of Rubcorp's premium rubber surfacing for the Buckeye Aquatics Center Pool deck. The collective installation experience of Rubcorp Distribution LLC has led to an accumulation of proprietary and exclusive techniques, procedures, assessments and products that have no comparison within the rubber surfacing industry. These elements combined with the attributes of the Rubcorp Rubber Surfacing Systems lead to the conformed conclusion that there is no alternative combination of surfacing system and installation practices that can be compared in a relative sense to best suit the requirements of the City Aquatic Center pool deck. The expenditure is not to exceed $227,150.

Staff Liaison: Chris Williams, Construction and Contracting Manager, cwilliams@buckeyeaz.gov, (623)-349-6225

***6.K** Council to take action on Task Order No. 1 (Contract 2017-013-001) between the City of Buckeye, an Arizona municipal corporation, and Dibble Engineering, an Arizona corporation, to provide planning services for the update to the Master Plan at Buckeye Municipal Airport; and authorizing the Mayor to execute and deliver said Task Order on behalf of the City.

Summary: The Construction and Contracting division is recommending Dibble Engineering to

provide Planning services through Task Order No. 1 (Contract 2017-013-001) for the update to the Master Plan at the Buckeye Municipal Airport with an expenditure not to exceed $446,185. The Study will seek to address the Airport's operational, maintenance and improvement considerations, development priorities, natural environment and land use compatibility and factors related to proper financial management to meet operational and capital improvement fiscal goals.
Staff Liaison: Chris Williams, Construction and Contracting Manager, cwilliams@buckeyeaz.gov, (623) 349-6225

***6.L** Council to take action on the Construction Contract (No. 2022012) between the City of Buckeye, an Arizona municipal corporation, and GCON, Inc., an Arizona corporation, to provide labor, materials, and equipment required for the expansion of the Buckeye Senior Center Kitchen and remodeling of the existing kitchen; and authorizing the Mayor to execute and deliver said Contract on behalf of the City.
Summary: This project will expand the Buckeye Senior Center Kitchen and remodel the existing kitchen at the east and south sides of the building. This project will add approximately 1,500 square feet onto the building and remodel 560 square feet. The Scope of Work includes, but is not limited to HVAC, flooring, electrical, gas connection, and plumbing. ADA accessibility and other furniture fixtures and equipment are included in the Scope of Work, The total not to exceed amount of the Contract is $1,725,043 with $600,000 of the total funded by a Community Development Block Grant.
Staff Liaison: Chris Williams, Construction and Contracting Manager, cwilliams@buckeyeaz.gov, (623) 349-6225

***6.M** Council to take action on Resolution No. 95-21 accepting and approving a grant from the Department of Justice relating to the partial reimbursement for the purchase of bulletproof vests for Police Officers of the City of Buckeye.
Summary: The Bullet Proof Vest Partnership allows Police Officers to purchase bulletproof vests and the cost of the vests are reimbursed by the U.S. Department of Justice and the City of Buckeye. The total cost of vests purchased is reimbursed fifty percent by the U.S. Department of Justice up to $12,500 total. Award notification and grant management are through the Bulletproof Vest Partnership website.
Staff Liaison: Larry Hall, Police Chief, lhall@buckeyeaz.gov, (623) 349-6438

***6.N** Council to take action on Ordinance No. 19-21 declaring as a public record that document on file with the City Clerk entitled the “City of Buckeye Commercial Vehicle Amendments, December 2021”; adopting the “City of Buckeye Commercial Vehicle Amendments, December 2021” by reference; and amending the City of Buckeye Code, Chapter 12 Traffic Code, Article 12-2 Traffic Regulations, by amending Section 12-2-8 Commercial Vehicle Restrictions; providing for repeal of conflicting ordinances; providing for severability; providing for penalties; and declaring an emergency.
Summary: The proposed Ordinances amends language of the City's Code, Chapter 12 Traffic Code, Article 12-2 Traffic regulations by amending Commercial Vehicle Restrictions.

Staff Liaison: Michael Saltz, Lieutenant - Legal Advisor, msaltz@buckeyeaz.gov, (623) 349-6417

***6.O** Council to take action on a final plat of Verrado Victory District Phase 3C Unit 1, generally located on the northwest corner of Indian School Road and Exeter Boulevard within the Verrado Victory District.

Summary: The applicant has requested approval of a final plat of Verrado Victory District Phase 3C Unit 1 (PLZV-21-00035), consisting of 87 single-family lots on approximately 15 acres generally located on the northwest corner of Indian School Road and Exeter Boulevard within the Verrado Victory District. Approval of the requested final plat would enable the applicant to develop additional single-family housing in the Verrado Victory District. Requested by David Nilsen of Verrado ARC, LLC.

Staff Liaison: Sean Banda, Senior Planner, sbanda@buckeyeaz.gov, (623) 349-6215

***6.P** Council to take action on a final plat titled Sienna Hills - Parcels 4 North 6 North, generally located on the northwest corner of McDowell Road and the 211th Avenue alignment.

Summary: The applicant is requesting approval of a final plat titled Sienna Hills Parcels 4 North 6 North, which is generally located on the northwest corner of McDowell Road and the 211th Avenue alignment. The plat is 111.6 acres and includes 127 single-family residential lots, with approximately 82 acres of landscaped/open space, parks, recreation areas and trails within the Sienna Hills Community Master Plan (CMP). Approval of this plat will create new lots for development for future single family residential home product. Requested by Scott Eisenhart, PE, Huitt-Zollars, Inc., on behalf of Mike Cronin, JEN Arizona 40 LLC.

Staff Liaison: Andrea Marquez, Planner II, amarquez@buckeyeaz.gov, (623) 349-6220

***6.Q** Council to take action on a final plat titled Sienna Hills - Parcel 5 North, generally located on the northwest corner of McDowell Road and the 211th Avenue alignment.

Summary: The applicant is requesting approval of a final plat titled Sienna Hills Parcel 5 North, which is generally located on the northwest corner of McDowell Road and the 211th Ave alignment. The plat is 19.16 acres and includes 49 single-family residential lots, with approximately 5 acres of landscaped/open space areas and natural trails within the Sienna Hills Community Master Plan (CMP). Approval of the final plat will allow development of traditional 60-foot by 120-foot wide lots. Requested by Scott Eisenhart, PE, Huitt-Zollars, Inc., on behalf of Mike Cronin, JEN Arizona 40 LLC.

Staff Liaison: Andrea Marquez, Planner II, amarquez@buckeyeaz.gov, (623) 349-6220

***6.R** Council to take action on a final plat titled Sienna Hills - Parcel 7B North, generally located on the northwest corner of McDowell Road and the 211th Avenue alignment.

Summary: The applicant is requesting approval of a final plat titled Sienna Hills Parcel 7B North, which is generally located on the northwest corner of McDowell Road and the 211th Avenue alignment. The plat is 55 acres and includes 50 single-family residential lots, with approximately 43 acres of landscaped/open space areas and natural trails within the Sienna Hills Community Master Plan (CMP). Approval of the final plat will allow development of traditional

60-foot by 120-foot wide lots. Request by Scott Eisenhart, PE, Huitt-Zollars, Inc., on behalf of Mike Cronin, JEN Arizona 40 LLC.
Staff Liaison: Andrea Marquez, Planner II, amarquez@buckeyeaz.gov, (623) 349-6220

***6.S** Council to take action on the National Opioids Distributor Settlement Agreement and the Janssen Settlement Agreement; and authorize the Mayor to execute and deliver each applicable Settlement Participation form on behalf of the City evidencing City approval of the Agreements.
Summary: State and local governments across the country have been litigating against the opioid industry alleging the industry utilized unethical and illegal practices with respect to promoting the use of opioids. In December 2020 Council approved the One Arizona Opioid Settlement Memorandum of Understanding (MOU) between the State and Participating Local Governments. The MOU served to jointly approach settlement negotiations with the Pharmaceutical Supply Chain Participants. In November 2021 Council approved the One Arizona Opioid Agreement. The next step in the process if for Council to approve and submit the Subdivision Settlement Participation Form, from the national settlement administrators.
Staff Liaison: Nancy Love, Human Resources Director, nlove@buckeyeaz.gov, (623) 349-6255

7. Public Hearings / Non-Consent - New Business

7.A Council to take action on Resolution No. 94-21 expanding the geographic area within and near the Downtown Buckeye Activity Center eligible for existing reduced development user fees for development of certain uses; amending the Development User Fee Schedule to include the expanded area eligible for existing reduced development user fees for certain development uses; establishing an expiration date for incentive; repealing conflicting resolutions; and providing for severability.
Summary: The Development Services Department is requesting approval of the amended Development User Fee Schedule that maintains the existing fees and policies with the exception of an amended Section 7: Incentive District, to expand the Downtown Incentive District by creating a second geographic incentive area, subject to restrictions on land use and limited to a three-year effective period. The Incentive District expansion aims to provide long-term economic benefits to the community and specifically Downtown Buckeye.
Staff Liaison: Brian Craig, Development Services Director, bcraig@buckeyeaz.gov, (623) 349-6209

7.B Council to take action on the authorization of the 2022 Legislative Agenda.
Summary: In order to work effectively and measure success within the fast pace of the legislative session, staff seeks approval of advance directives and permissions in the form of legislative goals, priorities and programs.

1. Preserve local control,
2. Preserve State Shared Revenues to cities and towns,
3. Restore Highway User Revenue Fund,
4. Defend Local Transaction Privilege Tax,
5. Preserve Construction Sales Tax revenues,

6. Defend city impact fees,
7. Maintain accountability in Community Facilities Districts,
8. Revise SB1487 (2016) state law; local violations; penalties to permit local control,
9. Preserve limitations of sober living homes in single-family residential zoning districts and the ability to hold them accountable,
10. Hold short-term rentals accountable for their impact on neighborhoods,
11. Preserve the City's authorities related to water resources acquisition, water rights, treatment, production, delivery, and storage of water and effluent,
12. Support legislation enabling and funding state grants to counties, cities, districts and tribes to eradicate Salt Cedar in prime threatened and endangered habitat, where the eradication would also conserve water and, prevent fire and flood,
13. Pursue appropriation(s) from the state legislature to fund transportation improvements inside the City of Buckeye and region,
14. Engage in the process to minimize the impact of Master Services and Infrastructure District legislation on cities and towns.
15. Support legislation enabling the Proposition 400 extension; and
16. Support legislation addressing occupational licensing for military spouses.

Staff Liaison: George Diaz, Intergovernmental Affairs Director, gdiaz@buckeyeaz.gov, (623) 980-0956

7.C Council to take action on Resolution No. 96-21 approving the First Amendment to Intergovernmental Agreement between City of Buckeye and Buckeye Elementary School District No. 33 for Development, Construction and Joint Use of Public Facilities; authorizing the Mayor to execute and deliver said Amendment and related documents on behalf of the City; and approving and authorizing the transfer of $250,000 from contingency funds for said Amendment.

Summary: Buckeye Elementary School District No. 33 is expanding the Buckeye Elementary School's gym and will be building an outdoor stage with certain portions of the stage being constructed on City-owned property at the 6th Street Plaza. The agreement will allow the Elementary School to expand its facilities, while enhancing the City's property for programs and events. The IGA will formalize the agreement and provide $250,000 in City funds to the Elementary School District towards the construction of the outdoor stage. The Elementary School will be responsible for regularly mowing and maintaining the grass area with the City continuing to maintain irrigation systems.

Staff Liaison: Miranda Gomez, Community Services Director, mgomez@buckeyeaz.gov, (623) 349-6353

8. City Manager's Report and Summary of Current Events

BUCKEYE, AZ

CITY OF BUCKEYE
COUNCIL WORKSHOP
NOVEMBER 8, 2021
MINUTES

City Council Chambers
530 East Monroe Avenue
Buckeye, AZ 85326
3:30 PM

1. Call to Order/Roll Call

Mayor Orsborn called the meeting to order at 3:30 p.m.

Members Present: Councilmember Goodman, Councilmember HagEstad, Councilmember Guy, Councilmember Hess, Councilmember Heustis, Vice Mayor Youngker (arrived at 3:49 p.m.), and Mayor Orsborn

Members Absent: None.

Departments Present: City Manager Roger Klingler, Assistant City Manager James Shano, Deputy City Manager Dave Roderique, City Attorney Shiela Schmidt, City Clerk Lucinda Aja, Deputy City Clerk Summer Stewart, Assistant to Mayor Christine Grundy, Human Resources Director Nancy Love, and Information Technology Director Greg Platacz.

2. Workshop Items

2.A Presentation and discussion regarding the City Manager recruitment and selection process.
Staff Liaison: Nancy Love, Human Resources Director

Ms. Love opened the presentation and provided an overview of the City Manager recruitment and selection process. Buckeye City Manager, Roger Klingler, notified Council he will be retiring in the coming months. Executive search firm GovHR USA was selected to assist with the recruitment of this critical position. Sarah McKee, Sr. Vice President of GovHR USA, reviewed the recruitment schedule; advertisements for the position have been posted and applications are due December 3, 2021. Applications will be reviewed as they are received; qualified applicants will be evaluated and initial interviews will be conducted. Council will receive a list of all applicants for review. Councilmember Heustis requested further information regarding the applications process. Ms. McKee stated Council will receive for review the cover letter and resume submitted by each applicant along with a standardized resume completed by GovHR USA. Further interviews will be held as directed by Council and City tours will take place; the entire recruitment and selection process is scheduled to be complete in February 2022. Mayor Orsborn asked if the process may be expedited. Ms. McKee stated the process could be expedited but reference checks and background checks will not be completed; stated the importance of proper vetting of applicants. Councilmember Hess requested further clarification regarding the recruitment schedule. Ms. McKee confirmed the deadline for submission of resumes is December 3, 2021 and GovHR USA will need three weeks to review resumes and conduct initial background checks and interviews; Council will then receive the information for review. Mayor Orsborn requested that the process move along as quickly as possible. Ms. McKee stated the importance of following the recruitment schedule and process to ensure the most qualified applicants are interviewed. Councilmember Guy stated the importance of following a process and schedule that allows Council to choose the best candidate. Councilmember Heustis requested further clarification regarding the recruitment

schedule. Ms. McKee stated the importance of hiring the best candidate and allowing time for the process to take place; stated a thirty-day period to receive applications is standard. Councilmember Goodman stated he is satisfied with the schedule as presented; requested further clarification regarding the initial interviews conducted by GovHR USA. Ms. McKee confirmed each applicant interviewed will be asked the same questions with follow-up questions asked as necessary; stated the questions asked will be provided to Council; stated Council may provide input and suggestions. Vice Mayor Youngker requested further clarification regarding the recruitment schedule. Ms. McKee stated the application deadline is December 3, 2021 and initial interviews will take place thereafter, with an expected timeframe for Council to interview candidates beginning in January 2022. General discussion was held regarding the recruitment schedule and process. Mayor Orsborn confirmed a candidate has not been chosen at this time and Council will follow the process for recruitment and selection. Ms. McKee suggested a department head panel and a stakeholder panel be formed to meet candidates; stated a meet and greet may also be held for staff and citizens to interact with candidates; provided additional information regarding the interview process. Vice Mayor Youngker requested further clarification regarding a stakeholder panel. Mayor Orsborn stated the stakeholder panel may include members from the development community and elected officials from other organizations. Ms. McKee provided additional suggestions for members that may be on the stakeholder panel. Councilmember Goodman requested clarification regarding the selection process. Ms. McKee stated it would be Council's discretion to have the stakeholder panel interview all candidates or the final few candidates chosen by Council. Councilmember Goodman stated his preference that the stakeholder panel interview final candidates. Councilmember Guy requested clarification regarding tours and one on one interviews; stated one on one interviews may be facilitated during tours of the City. Ms. McKee provided suggestions for tours and potential one on one interviews. Councilmember Hess requested further clarification regarding potential candidates; stated her support of interviews held by Council and then by stakeholder and/or department heads. Ms. McKee provided clarification regarding the interview process. Ms. Schmidt clarified submitted resumes and applications are public record; confirmed Council interviews can be held in executive session; stated public records requests must be responded to in a reasonable timeframe. General discussion was held regarding a possible stakeholder panel and the schedule for interviewing candidates.

3. Adjournment.

A motion was made by Vice Mayor Youngker and seconded by Councilmember Goodman to adjourn the meeting at 4:25 p.m. Motion passed unanimously.

_____
Eric W. Orsborn, Mayor

ATTEST:

_____
Lucinda J. Aja, City Clerk

I hereby certify that the foregoing minutes are a true and correct copy of the Council Workshop held on November 8, 2021. I further certify that a quorum was present.

_____
Lucinda J. Aja, City Clerk

BUCKEYE, AZ

CITY OF BUCKEYE
COUNCIL WORKSHOP
NOVEMBER 16, 2021
MINUTES

City Council Chambers
530 East Monroe Avenue
Buckeye, AZ 85326
3:15 PM

1. Call to Order/Roll Call

Mayor Orsborn called the meeting to order at 3:15 p.m.

Members Present: Councilmember Goodman, Councilmember HagEstad, Councilmember Guy, Councilmember Hess, Councilmember Heustis, Vice Mayor Youngker, and Mayor Orsborn

Members Absent: None.

Departments Present: City Manager Roger Klingler, Assistant City Manager James Shano, Deputy City Manager Dave Roderique, City Clerk Lucinda Aja, Deputy City Clerk Summer Stewart, Assistant to Mayor Christine Grundy, Public Works Director Scott Lowe, Human Resources Director Nancy Love, and Information Technology Director Greg Platacz.

2. Workshop Items

2.A Luke Air Force Base presentation and update from Brigadier General Gregory Krueder, Commander, 56th Fighter Wing.
Staff Liaison: Christine Grundy, Assistant to the Mayor

Commander Krueder provided an overview of the 56th Fighter Wing, which is the largest Fighter Wing in the Air Force with more than 165 aircraft and 7,000 personnel. Allies and partners were listed and reviewed; airspace and ranges were described. Measures taken during the COVID-19 pandemic were summarized; Air Force diversity and inclusion efforts were reviewed. Community support and initiatives were described. Councilmember Heustis requested further information regarding partner sharing and physical training. Commander Krueder stated other countries participate in pilot training and may take that information and implement similar training in their country, but may have difficulty depending on their airspace; provided further information regarding physical training, which is similar to a CrossFit workout. Commander Krueder was thanked for his presentation and the positive relationship between the City and Luke Air Force Base.

2.B National Demographics Corporation (NDC) will present information regarding redistricting services.
Staff Liaison: Lucinda Aja, City Clerk

Ms. Aja opened the presentation and introduced Douglas Johnson and Ivy Beller Sakanski with National Demographics Corporation. The City entered into a contract with consultant NDC to provide redistricting services for the City's six districts. Redistricting occurs every ten years and after each census. Mr. Johnson presented information regarding the redistricting process. Public outreach meetings have been held and the interactive mapping tool was made available to the public to submit their preferred map(s). Four maps were

displayed for Council review and consideration; maps A, B, and C were created by NDC; public map 101 was submitted through the interactive mapping tool. All four maps comply with federal laws, Arizona State Statutes, and traditional redistricting principles. Councilmember Guy requested further information regarding public outreach meetings. Ms. Beller Sakanski and Mr. Johnson confirmed map B appeared to be the preferred map based on feedback received from the public during the public outreach meetings. Councilmember Heustis stated the map he submitted keeps the entire community of Sundance in District 5 and maintains a balanced population among all districts and places the community of Blue Horizons in District 2. Councilmember Guy stated public map 101 does not maintain the integrity of District 2 because it shifts the District to the east and encompasses the community of Blue Horizons. Councilmember Hess requested clarification regarding map B. Mr. Johnson clarified the boundary lines for District 3 included in map B. General discussion was held regarding map B and public map 101. Mr. Johnson provided a demonstration of the interactive review map that includes all draft maps for review. Mayor Orsborn requested clarification regarding map B. Mr. Johnson confirmed map B places the southern portion of the Sundance community in District 3 and places the Blue Horizons community in District 5. Councilmember Hess requested further information regarding the community of Sundance; requested clarification regarding the incumbent address used for District 3. Mr. Johnson clarified the proposed boundaries related to the Sundance community. Ms. Aja confirmed the incumbent address used for District 3 is the most current address on file for Councilmember Hess. Mayor Meck stated there appears to be a preference for map B; requested NDC provide an additional draft map that keeps the entire Sundance community in District 5. Ms. Aja requested clarification regarding Council direction. Mayor Orsborn confirmed staff is directed to bring map B and an additional option that keeps the entire community of Sundance in District 5 to Council for review and possible adoption. Councilmember Hess stated her preference is map B. Councilmember Guy stated her preference is map B but also understands Councilmember Heustis' preference to keep the Sundance community in one district. Councilmember Goodman stated his preference is map B; stated the importance of balancing the districts in an equitable and fair manner and making decisions that are in the best interests of the City. Councilmember HagEstad stated he prefers District 4 be shifted north of I-10 as is shown in map B. Vice Mayor Youngker stated his preference is map B with public map 101 as a secondary choice. Mayor Orsborn stated it appears the preference is map B; directed staff to bring map B to Council for possible approval. Ms. Aja requested clarification regarding Council direction. Mayor Orsborn confirmed staff is directed to bring map B *and* an additional option that keeps the entire community of Sundance in District 5 to Council for review and possible adoption. Mr. Johnson stated the challenge with keeping the Sundance community in one district is determining which district the Blue Horizons community should be placed in. Councilmember Hess requested clarification regarding the District 3 west boundary depicted in map B. Mr. Johnson clarified the west boundary of District 3 is SR 85. Councilmember Heustis confirmed his preference to keep the entire community of Sundance in District 5.

A break was taken from 4:30 p.m. to 4:40 p.m.

2.C Presentation regarding housing information from Director Tom Simplot of Arizona Department of Housing.
Staff Liaison: Christine Grundy, Assistant to the Mayor

Mr. Simplot provided an Arizona Department of Housing update and housing needs. The State is taking a strategic approach to housing and the current housing shortage. It is estimated that Maricopa County is short 250,000 housing units across the spectrum of housing from single-family homes, to apartments, to workforce housing. Funding resources were reviewed; the State currently has enough funds to address the housing needs. State-wide strategic plans to address housing issues are being created to identify gaps and areas of possible partner collaboration. Plans to mitigate homelessness were summarized. Vice Mayor Youngker stated the importance of proper planning with regard to the housing shortage and the need to build the right housing units in the right place. Councilmember Goodman presented statements regarding workforce housing in Buckeye and the need to construct this housing in the right area in the City; requested further information regarding funding and incentives for construction of workforce housing. Mr. Simplot stated construction and labor costs are borne

by the developer regardless of the type of housing being constructed; provided additional information regarding loan and housing tax credits and how developers can use those credits to construct housing units; stated a developer seeking to build workforce housing will seek to tap into the tax credit allocation provided to the State; stated there is grant money coming to Arizona from the federal government that will be allocated throughout the State. Councilmember Heustis requested clarification regarding use of grant funds and apartment complexes. Mr. Simplot stated Arizona is seeking to increase the allocation for low-income housing; stated with all the apartment complexes currently under construction there is still a massive housing shortage. Councilmember Guy requested further information regarding the distribution of grant funds. Mr. Simplot confirmed the allocation of loan and housing tax credits takes place annually; provided additional information regarding the process for allocating federal funds in Arizona. Councilmember Hess requested further information regarding Buckeye's ability to participate in the process. Mr. Simplot recommends Councilmembers reach out to potential developers and direct them to contact the Arizona Department of Housing to address housing issues and financing options; stated the United States Department of Housing and Urban Development (HUD) determines opportunity zones; stated apartment complexes and higher density housing communities use less resources. Mr. Simplot was thanked for his presentation and the information provided.

3. Adjournment.

A motion was made by Vice Mayor Youngker and seconded by Councilmember Heustis to adjourn the meeting at 5:13 p.m. Motion passed unanimously.

_____
Eric W. Orsborn, Mayor

4.A Council to take action on approval of the October 19, 2021 Council Workshop Minutes and October 19, 2021 Regular Council Meeting Minutes.

A motion was made by Vice Mayor Youngker and seconded by Councilmember Goodman to approve the October 19, 2021 Council Workshop Minutes and October 19, 2021 Regular Council Meeting Minutes.

5. Expenditures

5.A Council to take action on the request to ratify the payment of the accounts payable expenditures made.

A motion was made by Councilmember Heustis and seconded by Vice Mayor Youngker to ratify the payment of the accounts payable expenditures made.

6. CONSENT AGENDA ITEMS / NEW BUSINESS

Approval of items on the Consent Agenda -All items with an (*) are considered to be routine matters and will be enacted by one motion and vote of the City Council. Councilmember Heustis requested Items *6.G and *6.H be pulled for discussion. After discussion was held regarding Items *6.G and *6.H, a motion was made by Councilmember Heustis and seconded by Councilmember Guy to approve Items 6.A, *6.B, *6.C, *6.D, *6.E, *6.F, *6.G, *6.H, *6.I., and *6.J. Motion passed unanimously.

***6.A Council to take action on the Agreement to Share Costs for the Feasibility Study of Bartlett Dam Modification Alternatives Among Cost-Share Partners and Salt River Project Agricultural Improvement and Power District; and authorize the Mayor to execute and deliver said Agreement on behalf of the City.**
Staff Liaison: Alisha Solano, Water Resources Director

Council approved the Agreement to Share Costs for the Feasibility Study of Bartlett Dam Modification Alternatives among Cost-Share Partners and Salt River Project Agricultural Improvement and Power District; and authorize the Mayor to execute and deliver said Agreement on behalf of the City.

***6.B Council to take action on the Revocation of the Agreement and Notice of Municipal Provider Reporting Requirements for Wingate and Wingate East (ML# 044-14-0926) Regarding Membership in the Central Arizona Groundwater Replenishment District; and authorize the City Manager to execute and deliver same on behalf of the City of Buckeye.**
Staff Liaison: Alisha Solano, Water Resources Director

Council approved the Revocation of the Agreement and Notice of Municipal Provider Reporting Requirements for Wingate and Wingate East (ML# 044-14-0926) Regarding Membership in the Central Arizona Groundwater Replenishment District; and authorize the City Manager to execute and deliver same on behalf of the City of Buckeye.

***6.C Council to take action on Resolution No. 87-21 acknowledging that certain subdivision plats and maps of dedication previously approved by the City were never effective as subdivision plats and maps of dedication and relinquishing any rights the City may have with respect to easements and/or rights-of-way dedicated therein.**
Staff Liaison: Adam Copeland, Deputy Director of Planning

Council adopted Resolution No. 87-21 acknowledging that certain subdivision plats and maps of dedication previously approved by the City were never effective as subdivision plats and maps of dedication and relinquishing any rights the City may have with respect to easements and/or rights-of-way dedicated therein.

***6.D Council to take action on a final plat titled Algodon Phase 2 generally located on the northeast corner of West Southern Avenue and South Apache Road.**
Staff Liaison: Andrea Marquez, Planner II

Council approved a final plat titled Algodon Phase 2 generally located on the northeast corner of West Southern Avenue and South Apache Road.

***6.E Council to take action on a final plat for Sun City Festival Parcel H2 Phase 1 generally located southwest of the intersection of Sun Valley Parkway and Canyon Springs Boulevard.**
Staff Liaison: Robert Busick, Planner II

Council approved a final plat for Sun City Festival Parcel H2 Phase 1 generally located southwest of the intersection of Sun Valley Parkway and Canyon Springs Boulevard.

***6.F Council to take action on the budgeted expenditure for the Municipal Firefighters Cancer Reimbursement Fund Fee in the amount of $206,219.32 for billed assessment fees.**
Staff Liaison: William Kauppi, Chief Financial Officer

Council approved the budgeted expenditure for the Municipal Firefighters Cancer Reimbursement Fund Fee in the amount of $206,219.32 for billed assessment fees.

***6.G Council to take action on Delivery Order No. 2 (Contract 2019012.01) between the City of Buckeye, an Arizona municipal corporation, and Felix Construction Company, an Arizona corporation, for labor, materials, equipment and services required to complete the rehabilitation of Sequence Batch Reactor 1 and 2; approving the Cost of Construction in excess of the maximum delivery order contract price established in the Job Order Contract; and authorizing the Mayor to execute and deliver said Contract on behalf of the City.**
Staff Liaison: Chris Williams, Construction and Contracting Manager

Councilmember Heustis requested this item be pulled for discussion and requested clarification regarding the costs associated with this Delivery Order. Mr. Williams stated the approved Job Order Contract has an expected contract price range of $500,000 to $1,000,000, but allows for a single Contract Price of up to $5,000,000 with Council approval. The work to be performed under this Delivery Order is the first of five phases for the Sundance Wastewater Treatment repairs and upgrades; costs to be expended under this Delivery Order shall not exceed $3,030,870.31. Mr. Williams stated all Delivery Orders issued under the Job Order Contract contain a not to exceed amount to be expended. Council approved Delivery Order No. 2 (Contract 2019012.01) between the City of Buckeye, an Arizona municipal corporation, and Felix Construction Company, an Arizona corporation, for labor, materials, equipment and services required to complete the rehabilitation of Sequence Batch Reactor 1 and 2; approving the Cost of Construction in excess of the maximum delivery order contract price established in the Job Order Contract; and authorizing the Mayor to execute and deliver said Contract on behalf of the City.

***6.H Council to take action on Task Order No. 1 to On-Call Consulting for Engineering and Architectural Services Contract (No. 2016-020-017) between the City of Buckeye, an Arizona municipal corporation, and Ritoch-Powell & Associates, an Arizona corporation, to provide survey and civil engineering design services for Apache Road and Broadway Road intersection improvements; and authorize the Mayor to execute and deliver said Task Order on behalf of the City.**
Staff Liaison: Chris Williams, Construction and Contracting Manager

Councilmember Heustis requested this item be pulled for discussion and requested clarification regarding the timeline for construction of Apache Road and Southern Avenue intersection improvements. Mr. Williams clarified this Task Order relates to the design of Apache Road and Broadway Road intersection improvements. The design has been completed for the construction of Apache Road and Southern Avenue intersection improvements and the City is in the process of purchasing the needed right-of-way; once the right-of-way has been purchased the City will move forward with awarding a contract for the construction of Apache Road and Southern Avenue intersection improvements. Council approved Task Order No. 1 to On-Call Consulting for Engineering and Architectural Services Contract (No. 2016-020-017) between the City of Buckeye, an Arizona municipal corporation, and Ritoch-Powell & Associates, an Arizona corporation, to provide survey and civil engineering design services for Apache Road and Broadway Road intersection improvements; and authorize the Mayor to execute and deliver said Task Order on behalf of the City.

***6.I Council to take action on the Cooperative Contract Purchase Addendum (CCPA No. 2022021) between the City of Buckeye, an Arizona municipal corporation and CCS Facility Services, a Colorado corporation, for City-wide Custodial services for Fiscal Year 2021-2022 with an annual aggregate expenditure not to exceed $450,000 for Fiscal Year 2021-2022; and authorizing the Mayor to execute and deliver said Cooperative Contract Purchase Addendum on behalf of the City.**
Staff Liaison: Chris Williams, Construction and Contracting Manager

Council approved the Cooperative Contract Purchase Addendum (CCPA No. 2022021) between the City of Buckeye, an Arizona municipal corporation and CCS Facility Services, a Colorado corporation, for City-wide Custodial services for Fiscal Year 2021-2022 with an annual aggregate expenditure not to exceed $450,000 for Fiscal Year 2021-2022; and authorizing the Mayor to execute and deliver said Cooperative Contract Purchase Addendum on behalf of the City.

***6.J Council to take action on the removal of Christopher Thurlby as an Alternate Member (District 3) of the Planning and Zoning Commission and the appointment of Darwin Meighan as an Alternate Member (District 3) of the Planning and Zoning Commission with a term expiration date of December, 2025.**
Staff Liaison: Summer Stewart, Deputy City Clerk

Council approved the removal of Christopher Thurlby as an Alternate Member (District 3) of the Planning and Zoning Commission and the appointment of Darwin Meighan as an Alternate Member (District 3) of the Planning and Zoning Commission with a term expiration date of December, 2025.

7. Public Hearings / Non-Consent - New Business

7.A Council to hold a public hearing and take action on the request for a Series 10 Beer and Wine Store Liquor License Application for Dollar City located at 427 North 1st Street.
Staff Liaison: Lucinda Aja, City Clerk

Mayor Orsborn opened a public hearing at 6:10 a.m. to hear citizen input regarding the request for a Series 10 Beer and Wine Store Liquor License for Dollar City located at 427 North 1st Street. Ms. Aja provided an overview of the request. Councilmember Heustis asked the applicant about store hours of operation. Applicant Zulfikar Virani stated the hours of operation are 10:00 a.m. to 8:00 p.m. There being no further comment, Mayor Orsborn closed the public hearing at 6:11 p.m. A motion was made by Councilmember Heustis and seconded by Vice Mayor Youngker to approve the Series 10 Beer and Wine Store Liquor License Application for Dollar City located at 427 North 1st Street. Motion passed unanimously.

7.B Council to take action on Ordinance No. 17-21 declaring as a public record that certain document on file with the City Clerk entitled "PLZM-21-00247 - Buckeye Sign Code" by reference; and amending the City of Buckeye Code, Chapter 7 - Development Code, Article 5 - Development and Design Standards and Guidelines, Section 5.11 - Signs, of the City of Buckeye Municipal Code; providing for the repeal of conflicting ordinances; providing for severability; and providing for penalties.
Staff Liaison, Hobart Wingard, Principal Planner

Mr. Wingard provided an overview of the proposed Buckeye Sign Code amendments. The City is seeking approval to amend the development code in regards to signage resulting from the United States Supreme Court ruling in Reed v. Town of Gilbert, Arizona on June 18, 2015, which prevents a local government from adopting sign regulations according to message type. Approval of the proposed amendments will bring the code into compliance with the Supreme Court decision. The proposed amendments also include provisions for Lawful Temporary Event signage, Model Home Complex signage, and Neighborhood identity signage. All internal departments have reviewed and

approved the proposal. Vice Mayor Youngker requested further information regarding signage permitting. Mr. Wingard stated there is a signage permit process through the City's Facilities Division. Councilmember Heustis requested clarification regarding the amended sections. Mr. Wingard clarified the proposed amendments relate to Section 5.11 of the City's Municipal Code. A motion was made by Councilmember Heustis and seconded by Vice Mayor Youngker to adopt Ordinance No. 17-21 declaring as a public record that certain document on file with the City Clerk entitled "PLZM-21-00247 - Buckeye Sign Code" by reference; and amending the City of Buckeye Code, Chapter 7 - Development Code, Article 5 - Development and Design Standards and Guidelines, Section 5.11 - Signs, of the City of Buckeye Municipal Code; providing for the repeal of conflicting ordinances; providing for severability; and providing for penalties. Motion passed unanimously.

7.C Council to take action on funding of two recommended Economic Development Catalyst Program requests in the amount of $78,750, plus certain City fees eligible for reimbursement.
Staff Liaison: Tennille Hiller, Economic Development Coordinator

Ms. Hiller provided an overview of the request to fund two Economic Development Catalyst Program projects. This Program exists to promote the rehabilitation of existing commercial, industrial, or mixed-use properties by offering up to $50,000 of City funding (per project) toward improvement costs. Not all commercial, industrial, or mixed-use properties within the City are eligible for this program; only those that serve a public purpose are eligible. Fees may be included but only those fees that are associated with a project that serves a public purpose. These properties must already have applicable zoning or be rezoned before being eligible. Past projects were listed and reviewed. Four applications were received and reviewed; two applications have been recommended for approval, in a total amount of $78,750, plus certain City fees eligible for reimbursement, such as fees for permitting and lot combinations. The recommended projects include Calvert Oil Company improvements and Ware building improvements. Councilmember Guy expressed her support of this Program. Councilmember Heustis requested clarification regarding the projects. Ms. Hiller stated the project includes an asphalt parking lot; stated the Calvert Oil Company project includes painting the buildings, tanks, parking canopy and loading racks; confirmed the project will require a design approval process to include approval of paint color. Mayor Orsborn presented statements regarding the success of this program; requested further information regarding annual funding allocations. Ms. Hiller stated the funds are allocated annually in the amount of $250,000. A motion was made by Councilmember Heustis and seconded by Vice Mayor Youngker to approve funding of two recommended Economic Development Catalyst Program requests in the amount of $78,750, plus certain City fees eligible for reimbursement. Motion passed unanimously.

8. City Manager's Report and Summary of Current Events

Mr. Klingler presented a brief summary of current events.

9. Comments from the Mayor and Council

Vice Mayor Youngker: invited residents to attend upcoming City events.

Councilmember HagEstad: no comment.

Councilmember Goodman: no comment.

Councilmember Heustis: wished staff and residents a safe and happy Thanksgiving; thanked participants of recent Veterans Day Parade.

Councilmember Guy: no comment.

Councilmember Hess: absent (excused at 6:29 p.m.).

Mayor Orsborn: no comment.

10. Council will make a motion to adjourn the meeting

A motion was made by Vice Mayor Youngker and seconded by Councilmember Goodman to adjourn the meeting at 6:36 p.m. Motion passed unanimously.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.A. Resolution No. 88-21. Intent to expand of Street Lighting Improvement District No. 2021-SLID-003 - Jackrabbit Crossing
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 6
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 88-21 enlarging City of Buckeye Street Lighting Improvement District No. 2021-SLID-003 and ordering recording and filing of this Resolution.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
Street Lighting Improvement Districts (SLIDs) are established to purchase (not generate) energy for street lighting or public park lighting with the District and adjacent streets so that the costs are not borne by the City in its Highway User Revenue Fund.

BENEFITS:
Both SLIDS and Maintenance Improvement Districts (MIDSs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents /owners of a particular development without an undue burden upon the existing community. SLIDS ensure that only owners that have benefit from the lighting in their community pay for that service. Having the costs of street and public park lighting within a SLID borne by the owners in a development ensures that the revenue needed to fund these costs is always in place.

FUTURE ACTION:
A budget and further Council action will take place at the beginning of the next fiscal year to implement this District.

FINANCIAL IMPACT STATEMENT:

PETITION, WAIVER AND CONSENT TO INCLUSION OF ADDITIONAL LAND WITHIN AN EXISTING STREET LIGHTING IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

JACKRABBIT CROSSING
ANNEXATION TO 2021-SLID-003

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned property owner (the "*Petitioner*") respectfully petitions the City Council of the City of Buckeye, Arizona ("*City Council*") to order the enlargement of the existing City of Buckeye Street Lighting Improvement District No. 2021-SLID-003 (the "*District*") under the Improvement District Law. In support of this Petition, Waiver and Consent to Inclusion of Additional Land within an Existing Street Lighting Improvement District by the City of Buckeye (this "*Petition*"), the Petitioner agrees to waive certain rights under the Improvement District Law and hereby consents to the annexation and inclusion of the land shown on *Exhibits A*, *B*, and *C* to be annexed into the District.

1. Area to be Added to District. The property comprising the proposed additions to the existing District is described by a legal description, Assessor's parcel numbers and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*, attached hereto and incorporated herein by this reference. The proposed enlarged District consists of an aggregate of 17.5193 acres and is entirely within the corporate boundaries of the City of Buckeye, Arizona (the "*City*"). The Petitioner respectfully requests that the land shown on *Exhibits A*, *B* and *C* be annexed into and become included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description or Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

2. Authority. The Petitioner is the sole owner of all non-public real property within the area proposed to be annexed to the District.

3. Purpose. The District was formed solely for the purchase of energy for lighting the streets and public parks within and adjacent to the District.

4. Public Convenience and Necessity. The necessity for the enlargement of the District is the purchase of energy for lighting the streets and public parks within the proposed

enlarged District by the levying of an annual ad valorem tax or by an equal apportionment of taxes upon all of the non-public real property of the District as provided in A.R.S. § 48-616(C).

5. Payment of Costs by Petitioner. The Petitioner agrees to pay the costs and expenses of operation, repair and energy for street lighting within and surrounding the proposed addition to the District that operate prior to July 1, 2022, because the District will not be able to levy taxes for such expenses of the area added to the District prior to the City's fiscal year 2022/2023. Tax collections of taxes levied on the addition to be annexed to the District will not be posted to the City until on or about July 1, 2022 and the City does not expect to receive taxes from the property described in *Exhibits A*, *B* and *C* before November 1, 2022.

6. Reimbursement. The Petitioner agrees to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the enlargement of the District.

7. Expansion of or Annexation to the District. The Petitioner waives any objections to, or protest against, future enlargement or enlargements of the District and also waives all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries; the Petitioner further waives any objection to, or protest against, the consolidation of the District with any other similar district or districts.

8. Waiver and Consent. The Petitioner, with full knowledge of its rights being waived hereunder, hereby expressly waives:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that resulted in or will result in the adoption of the Resolution(s) of Intention, the Resolution Forming the District, and the Resolution(s) Enlarging the District, or any Notices pertaining thereto;

b) Any necessity for publication, posting, or mailing of the Resolution(s) Enlarging the District, Notices of Proposed Improvements, or Notices described in A.R.S. §§ 48-574(J) and 48-616(M);

c) All protest rights whatsoever under A.R.S. §§ 48-579(A)-(B) and 48-616(M), which provide for protests against the work or objections to the extent of the enlargement of the District; and

d) Any necessity for any notice or hearing with respect to land owned by the Petitioner now within the District or within the property comprising the proposed additions to the District.

9. Fees. The Petitioner has paid, or will pay, any and all District application fees.

10. Equal Apportionment. The Petitioner hereby petitions the City Council to equally apportion the District's annual taxes based on the number and classifications of properties within the proposed enlarged District pursuant to A.R.S. § 48-616(J).

11. Waiver. This Petition shall also be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the proposed addition to the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

12. Public Benefit. The purchase of energy to operate street lighting improvements within the area to be annexed is of more than local or ordinary public benefit.

13. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioner who hereafter own or have an interest in the property described in *Exhibits A*, *B* and *C* attached hereto.

14. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

[Remainder of Page Intentionally Left Blank]

[Signature Page Follows]

IN WITNESS WHEREOF, the undersigned has executed this Petition as of the 16TH day of NOVEMBER, 2021.

LEGAL DESCRIPTION
Jackrabbit Trail and Indian School Road
Street Light Improvement District No. 2021-SLID-003 (Expansion Area)

Lots 1 through 5, Jackrabbit Crossing, recorded in Book 1602, page 25, Maricopa County Records (MCR) and portions of public right-of-way lying within the northeast quarter of Section 29, Township 2 North, Range 2 West, of the Gila and Salt River Meridian, Maricopa County, Arizona, secondarily described as follows:

BEGINNING at the northeast corner of said Section 29, a 3-inch Maricopa County Department of Transportation (MCDOT) brass cap in handhole, from which the north quarter corner of said section, a 3-inch MCDOT brass cap flush, bears North 89°54'17" West (basis of bearing), a distance of 2649.86 feet;
THENCE along the east line of said section, South 00°05'52" West, a distance of 659.75 feet;
THENCE leaving said east line, North 89°54'17" West, a distance of 65.00 feet, to the east line of that certain parcel of land recorded in Document 1994-0519749, MCR;
THENCE along said east line, North 00°05'52" East, a distance of 626.75 feet, to the northeast corner of said certain parcel of land;
THENCE leaving said east line, along the north line of said certain parcel of land, North 89°54'17" West, a distance of 129.00 feet, to the northwest corner of said certain parcel of land and the northeast corner of said Jackrabbit Crossing;
THENCE leaving said north line, along the east line of said Jackrabbit Crossing, South 00°05'52" West, a distance of 712.25 feet, to the southeast corner of said Jackrabbit Crossing;
THENCE leaving said east line, along the south line of said Jackrabbit Crossing, North 89°54'17" West, a distance of 960.75 feet, to the southwest corner of said Jackrabbit Crossing;
THENCE leaving said south line, along the west line of said Jackrabbit Crossing and the northerly prolongation of said west line, North 00°05'52" East, a distance of 745.25 feet, to the north line of said section;

Legal Description
Jackrabbit Trail and Indian School Road
Street Light Improvement
District No. 2021-SLID-003 (Expansion Area)

THENCE leaving said prolongation, along said north line, South 89°54'17" East, a distance of 1154.75 feet, to the **POINT OF BEGINNING**.

Containing 763,140 square feet or 17.5193 acres, more or less.

This parcel description is based on client provided information and is located within an area surveyed by Wood, Patel & Associates, Inc. during the month of August, 2019. Any monumentation noted in this parcel description is within acceptable tolerance (as defined in Arizona Boundary Survey Minimum Standards dated 02/14/2002) of said positions based on said survey.

RESOLUTION NO. 88-21

RESOLUTION ENLARGING CITY OF BUCKEYE STREET LIGHTING IMPROVEMENT DISTRICT NO. 2021-SLID-003 AND ORDERING RECORDING AND FILING OF THIS RESOLUTION.

WHEREAS, on September 21, 2021, the Mayor and City Council of the City of Buckeye, Arizona (the "*City*") passed and adopted Resolution No. 60-21 ordering the formation of City of Buckeye Street Lighting Improvement District No. 2021-SLID-003 (the "*District*"), solely for the purpose of purchasing (and not generating) energy for lighting of public streets and parks; and

WHEREAS, the owner of certain property adjoining the District has filed a petition seeking to enlarge the District to include the property described in the attached *Exhibits A*, *B* and *C* (collectively, the "*Annexed Area*"); and

WHEREAS, by this Resolution the City Council of the City will enlarge the District by adding the Annexed Area to the District;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. District Enlargement. The District is enlarged by the addition of the Annexed Area, as shown on *Exhibits A*, *B* and *C* attached hereto and incorporated by reference into this Resolution. The Assessor's parcel numbers shown on *Exhibit B* are for convenience only. If either the legal description or the Assessor's parcel numbers on *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern and be determinative of a parcel's inclusion within, or exclusion from, the District, subject to the restrictions of Section 2 of this Resolution.

Section 2. Excluded Property; Annual Tax. No publicly owned land or property owned by a homeowners' association will be liable to pay any portion of the District's costs and expenses. The annual tax levied upon the District will remain in full force and effect and will apply to the District as enlarged by this Resolution. The District taxes will continue to be levied based on the number and classification of non-public parcels within the enlarged District, excluding those parcels which are publicly owned or owned by a homeowners' association.

Section 3. Recording and Filing. The City Clerk is ordered and directed to cause a certified copy of this Resolution to be recorded in the office of the Maricopa County Recorder.

The City Clerk is further ordered and directed to file certified copies of this Resolution with the Director of the Arizona Department of Revenue and the Maricopa County Assessor, pursuant to A.R.S. § 42-17257.

Section 4. Extension for Filing. If either the enlargement of the District occurs after November 1 of the year preceding the year in which initial taxes are to be levied, or this Resolution is not filed with both the Arizona Department of Revenue and the Maricopa County Assessor prior to such November 1, the Mayor and City Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Arizona Department of Revenue extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2021.

PASSED AND ADOPTED by the Mayor and City Council of the City of Buckeye, Arizona, this 21st day of December, 2021.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.B. Resolution No. 90-21 - Bentridge Intent to form a Street Lighting Improvement District No. 2020-SLID-004
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 3
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 90-21 accepting a Petition for formation of a Street Lighting Improvement District; declaring its intention to form a Street Lighting Improvement District; designating such District as "City of Buckeye, Street Lighting Improvement District No. 2020-SLID-004"; providing for the annual levy of taxes or assessments equally apportioned upon all of the non-public property owners in the District to purchase energy for the lighting of public streets and parks within and adjacent to the District; and ordering recording and filing of this Resolution.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
Street Lighting Improvement Districts (SLIDs) are established to purchase (not generate) energy for street lighting or public park lighting with the District and adjacent streets so that the costs are not borne by the City in its Highway User Revenue Fund.

BENEFITS:
Both SLIDS and Maintenance Improvement Districts (MIDSs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents/owners of a particular development without an undue burden upon the existing community. SLIDS ensure that only owners that have benefit from the lighting in their community pay for that sere. Having the costs of street and public park lighting within a SLID borne by the owners in a development ensures that the revenue needed to fund these costs is always in place.

FUTURE ACTION:
A budget and further Council action will take place at the beginning of the next fiscal year to implement this District.

PETITION, WAIVER AND CONSENT TO FORMATION OF A STREET LIGHTING IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

BENTRIDGE
2020-SLID-004

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned non-public real property owner (the "*Petitioner*") within the City of Buckeye, Arizona (the "*City*"), respectfully petitions the Mayor and City Council (the "*City Council*") of the City to order the formation of a street lighting improvement district under the Improvement District Law. In support of this Petition, Waiver and Consent to Formation of a Street Lighting Improvement District by the City of Buckeye (this "*Petition*"), the Petitioner agrees to waive certain rights under the Improvement District Law and hereby consents to the formation of a street lighting improvement district encompassing the land shown on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein.

1. Name of District. The Petitioner hereby requests the proposed district to be named the "City of Buckeye Street Lighting Improvement District No. 2020-SLID-004" (the "*District*").

2. Area of District. The property comprising the proposed District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*. Such property is entirely within the corporate boundaries of the City. The Petitioner respectfully requests that the property shown on *Exhibits A*, *B* and *C* be included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

3. Ownership. The Petitioner is the sole owner of all non-public, non-exempt real property within the proposed District.

4. Purpose. The District is proposed to be formed for the purpose of purchasing, and not generating, energy for street and public park lighting.

5. Public Convenience and Necessity. Public convenience, necessity and welfare will be promoted by the formation of the District, the inclusion of the property described in *Exhibits A*, *B*, and *C* within the District, and the levying of an annual ad valorem tax or equal apportionment of taxes upon all of the non-public real property within the District as provided in A.R.S. § 48-616(C).

6. Fees and Reimbursement. The Petitioner has paid all application fees for the formation of the District and further agrees to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the formation of the District.

7. Expansion of or Annexation to the District. The Petitioner waives any objection to, or protest against, any future enlargement or enlargements of the District and also waives all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioner further waives any objection to, or protest against, the consolidation of the District with any other similar district or districts.

8. Waiver and Consent. The Petitioner, with full knowledge of its rights being waived hereunder, hereby expressly waives:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings resulting in the resolution of intention and the resolution ordering the work relating to the formation of the District;

b) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that result in the adoption of any and all future resolutions of intention, resolutions ordering work, resolutions enlarging the District, and notices pertaining thereto;

c) Any necessity for publication, posting, mailing, or recording of any resolution(s) of intention, resolution(s) ordering work, resolution(s) enlarging the District, or notices of proposed improvements as described in A.R.S. §§ 48-578 and 48-581;

d) All protest rights whatsoever under A.R.S. § 48-579(A) and (B), which provide for protests against the work;

e) All objections to the extent of the District under A.R.S. § 48-579(C);

f) All objections to the lack of plans and specifications, the engineer's estimate and an assessment diagram, all of which are unnecessary for completion of the District's formation or purpose; and

g) Any necessity for any notice or hearing with respect to land owned by the Petitioner now within the proposed boundaries of the District.

9. Equal Apportionment. The Petitioner hereby petitions the City Council to equally apportion the District's annual taxes based on the number and classification of properties within the District pursuant to A.R.S. § 48-616(J). The Petitioner further requests that no publicly owned land or property owned by a homeowners' association shall be liable to pay any expenses of the District.

10. Waiver of Petition. This Petition shall be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

11. Public Benefit. The purchasing of energy to operate street lighting improvements within the District is of more than local or ordinary public benefit and should be charged against the property within the District, all of which will benefit thereby.

12. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioner who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

13. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

The Petitioner hereby requests the City Council of the City to adopt a resolution of intention to order the proposed improvements and to proceed with the improvements requested herein.

IN WITNESS WHEREOF, the undersigned representative of the Petitioner has executed this Petition as of the date shown below.

RESOLUTION NO. 90-21

A RESOLUTION OF THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ACCEPTING A PETITION FOR FORMATION OF A STREET LIGHTING IMPROVEMENT DISTRICT; DECLARING ITS INTENTION TO FORM A STREET LIGHTING IMPROVEMENT DISTRICT; DESIGNATING SUCH DISTRICT AS THE "CITY OF BUCKEYE STREET LIGHTING IMPROVEMENT DISTRICT NO. 2020-SLID-004"; PROVIDING FOR THE ANNUAL LEVY OF TAXES OR ASSESSMENTS EQUALLY APPORTIONED UPON ALL OF THE NON-PUBLIC PROPERTY OWNERS IN THE DISTRICT TO PURCHASE ENERGY FOR THE LIGHTING OF PUBLIC STREETS AND PARKS WITHIN AND ADJACENT TO THE DISTRICT; AND ORDERING RECORDING AND FILING OF THIS RESOLUTION.

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. Acceptance and Findings. A Petition for the formation of the City of Buckeye Street Lighting Improvement District No. 2020-SLID-004 to purchase (and not generate) energy for street and public park lighting within the District and streets adjacent thereto has been filed with the Clerk and presented to the Governing Body of the City. The Petition is accepted. The Petition purports to be signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders. After verification of such ownership, the Governing Body finds that the Petition was signed by all of the real property owners in the proposed District, exclusive of mortgagees and other lienholders or the owners of any Public Property.

Section 2. Definitions. In this Resolution, the following terms shall have the following meanings:

"*APS*" shall mean the Arizona Public Service Company.

"*City*" shall mean the City of Buckeye, Arizona.

"*Clerk*" shall mean the Clerk of the City, located at 530 East Monroe Avenue, Buckeye, Arizona 85326.

"*Director*" shall mean the Director of the Arizona Department of Revenue.

"*District*" shall mean the City of Buckeye Street Lighting Improvement District No. 2020-SLID-004, as described by the legal description, Assessor's parcel numbers, and map in *Exhibits A*, *B* and *C* attached hereto and incorporated by reference herein.

"*Governing Body*" shall mean the Mayor and City Council of the City.

"*Incidental Expenses*" shall mean the costs of posting, publication, mailing, recording, engineering and legal fees with respect to the formation of the District and the annual levy of taxes.

"*Petition*" shall mean the Petition, Waiver, and Consent to Formation of a Street Lighting Improvement District by the City of Buckeye, requesting formation of the District, on file in the Clerk's office.

"*Public Property*" shall mean any lot or parcel belonging to the United States; the state of Arizona (the "*State*"); any county, city, town, school district or political subdivision; or any institution of the State or county that is physically located within the District, including without limitation any public street, avenue, alley or public easement located within the District hereinafter dedicated to public use.

"*Street Lighting System*" shall mean all publicly owned street and traffic lights and all wire, apparatus and other facilities now in place or hereafter constructed or acquired for the lighting of public streets and parks within the District and on streets adjacent to the District.

"*Work*" shall mean the purchasing of energy for the operation of the Street Lighting System.

Section 3. Declaration of Intention to Order Formation of the District. The public interest and convenience require, and it is the intention of the Governing Body to order, the Work through formation of the District pursuant to A.R.S. Title 48, Chapter 4, Article 2. The District's sole purpose shall be the purchase, not generation, of energy to operate the Street Lighting System, including as it is hereafter modified or enlarged. The District shall encompass the property described on *Exhibits A*, *B*, and *C*, attached hereto. The Assessor's parcel numbers shown on *Exhibit B* are for convenience only. If either *Exhibit A* or *Exhibit B* or both conflict with *Exhibit C*, *Exhibit C* shall govern and be determinative of a parcel's inclusion within, or exclusion from, the District, subject to the restrictions of Section 5 of this Resolution. For purposes of this Resolution and of all resolutions, ordinances and notices pertaining hereto, the District shall be known as and is hereby designated as "City of Buckeye Street Lighting Improvement District No. 2020-SLID-004".

Section 4. Statutory Authority; Payment of Incidental Expenses. All proceedings pertaining to the District shall be done under and as authorized by A.R.S. Title 48, Chapter 4, Article 2, and all amendments thereto including, without limitation, A.R.S. §§ 48-616 and -617. All Incidental Expenses shall become the obligation of the District.

Section 5. Excluded Property. No Public Property or property owned by a homeowners' association will be liable to pay any portion of the District's costs and expenses.

Additionally, any public streets, avenues, alleys, or public easements hereafter dedicated to public use shall become exempt after such dedication.

Section 6. Protests and Objections to Extent of District. In the Petition, the signer has made written consents and waivers pertaining to the ordering of the Work and to the formation of the District and has specifically waived all protests against formation of, and objections to, the extent of the District. City staff has verified that all non-public real property owners within the District have signed the Petition, and the Governing Body finds as a fact that all non-public property owners within the District have signed such Petition. Therefore, pursuant to A.R.S. § 48-617(A), no publication, mailing or posting of any notice pertaining to formation of the District will be made.

Section 7. Engineer's Estimate, Plans and Specifications. As financing for the acquisition and construction of the initial Street Lighting System has been, or will be, provided, the District's sole purpose will be to purchase, and not generate, energy to operate the Street Lighting System. No engineer's estimate, plans, or specifications have been filed with the Clerk. In the Petition, all owners of land within the District specifically waived the filing of an engineer's estimate, plans, or specifications.

Section 8. Determination of Type of Lighting and Consideration of the Rate to be Paid. The type of lighting shall be the type now in place within the District, to be operated nightly from dusk to dawn, or such other lighting facilities as may be acquired in the future by the City or some other entity for use within the District. The District's costs and expenses of purchasing energy for the operation of the Street Lighting System are subject to change due to inflation, new construction, new technology, updated APS rate schedules as approved by the Arizona Corporation Commission, updated APS or City specifications as approved by the City Engineer, or acquisition of additional portions of the Street Lighting System.

Section 9. Recordation. A certified copy of this Resolution shall be recorded in the office of the Maricopa County Recorder within ten (10) days of its adoption to give notice of formation of the District, as required by A.R.S. § 48-574(M).

Section 10. Extension for Filing. If either the formation of the District occurs after November 1 of the year preceding the year in which initial assessments are to be levied, or the resolution ordering the Work is not filed with both the Arizona Department of Revenue and the Maricopa County Assessor prior to such November 1, the Mayor and Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Arizona Department of Revenue extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2021.

PASSED AND ADOPTED by the Mayor and City Council of the City of Buckeye, Arizona, this 21st day of December, 2021.

Eric W. Orsborn, Mayor

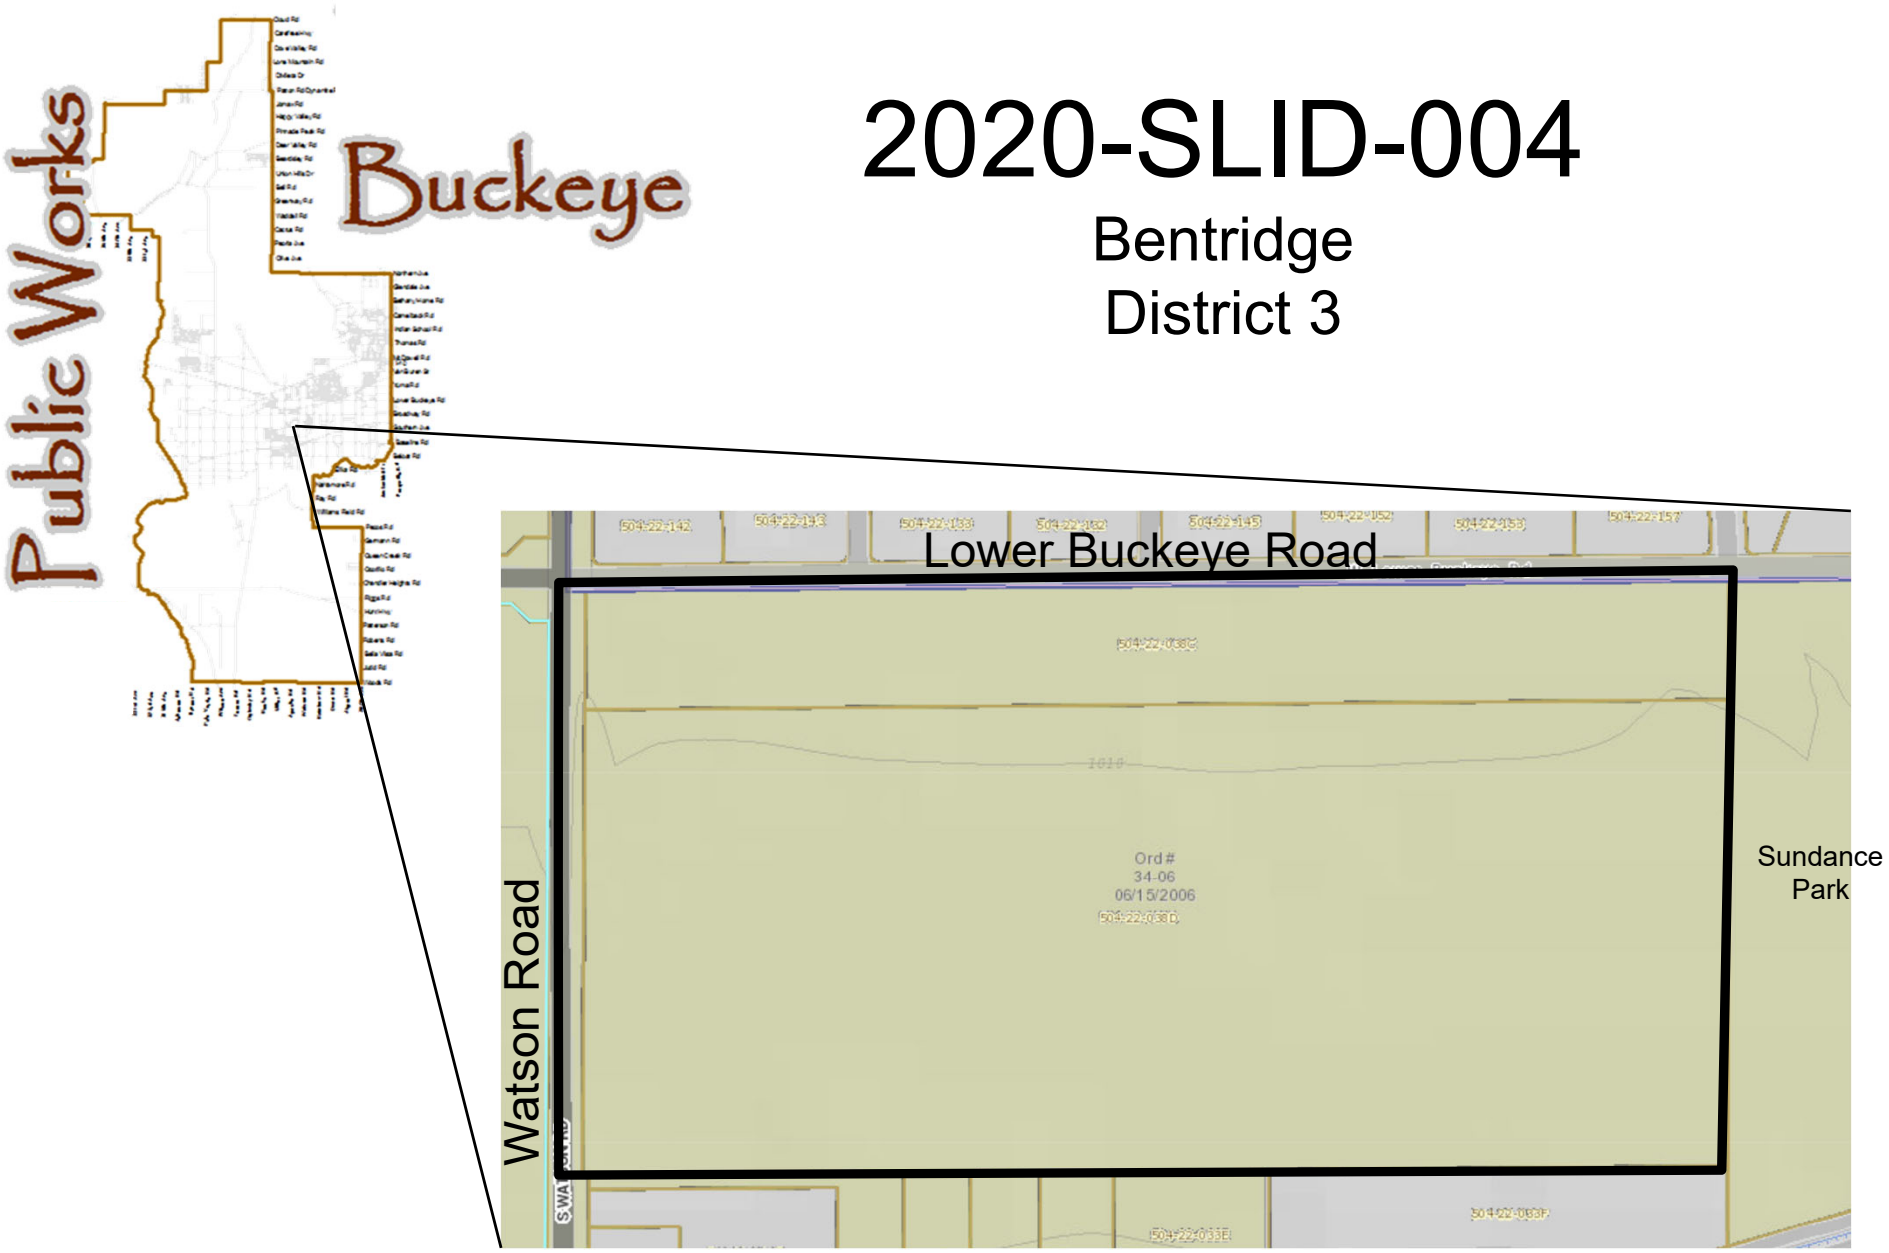
Bentridge
District 3



BUCKEYE, AZ

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.C. Resolution 91-21 - Bentridge Intent to form Maintenance Improvement District No. 2020-MID-004
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 3
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 91-21 accepting a Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye; declaring the intention to form a Maintenance Improvement District; designating such District as "City of Buckeye Maintenance Improvement District No. 2020-MID-004"; and providing for the annual levy of taxes or an annual assessment against the lots within the District in proportion to the benefits received.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
Both SLIDs and MIDs provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for residents/owners of a particular development without an undue burden upon the existing community. Maintenance Improvement Districts (MIDs) are responsible for maintaining parkways and parking on streets within the District.

BENEFITS:
Having the costs of parkways and parking assessed against the land within the development and not borne by the City, MIDs provide assurance for the City that should a development's owners become unable to maintain the rights-of-ways that they are responsible for, that the City, when assuming these responsibilities, will have the revenues in place to defer the cost.

FUTURE ACTION:
A budget and further Council action will take place at the beginning of the next fiscal year to implement this District.

FINANCIAL IMPACT STATEMENT:

PETITION, WAIVER AND CONSENT TO FORMATION OF A MAINTENANCE IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

BENTRIDGE
2020-MID-004

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned non-public real property owner (the "*Petitioner*") respectfully petitions the Mayor and City Council (the "*City Council*") of the City of Buckeye, Arizona (the "*City*") to order the formation of a residential municipal maintenance improvement district under the Improvement District Law. In support of this Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye (this "*Petition*"), the Petitioner agrees to waive certain rights under the Improvement District Law and hereby consents to the formation of a residential municipal maintenance improvement district encompassing the land shown on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein.

1. Name of District. The Petitioner hereby requests the proposed district to be named the "City of Buckeye Maintenance Improvement District No. 2020-MID-004" (the "*District*").

2. Area of District. The property comprising the proposed District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*. The proposed District consists of an aggregate of 79.849 acres which are entirely within the corporate boundaries of the City. The Petitioner respectfully requests that the land shown on *Exhibits A*, *B* and *C* be included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

3. Ownership. The Petitioner is the sole owner of all non-public, non-exempt real property within the proposed District.

4. Purpose. The District is proposed to be formed for the purpose of providing for operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins within, adjacent to, or that serve the District, and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins. To enhance such purposes the Petitioner grants to the City the public use of all such parkings, parkways, retention basins and detention basins and access thereto across the Petitioner's property to carry out all District purposes.

5. Public Convenience and Necessity. Public convenience, necessity and welfare will be promoted by the formation of the District, the inclusion of the property described in *Exhibits A*, *B*, and *C* within the District, and the levying of an annual ad valorem tax or annual special assessment upon all of the non-public real property within the District.

6. Fees and Reimbursement. The Petitioner has paid all application fees for the formation of the District and further agrees to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the formation of the District.

7. Document Requirements. The Petitioner has previously submitted the following documents to the City's Public Works Department:

a) Street landscaping layout plans.

b) One 24" x 36" copy of the District diagram showing each lot or parcel.

c) A metes and bounds legal description of the District boundary, accompanied by a list of Assessor's parcel numbers within the proposed District and a map showing the District boundary (with back-up material showing that the boundary closes, as necessary).

The Petitioner or the Petitioner's engineer will submit the following documents to the City's Public Works Department concurrently with the submission of this fully executed Petition:

a) Proof of payment of the District application fees.

b) Two 8-1/2" x 11" recordable copies of a legal description of the District boundary and a map showing the District boundary.

8. Expansion of or Annexation to the District. The Petitioner waives any objection to, or protest against, any future enlargement or enlargements of the District and also waives all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioner further waives any objection to, or protest against, the consolidation of the District with any other similar district or districts.

9. Waiver and Consent. The Petitioner, with full knowledge of its rights being waived hereunder, hereby expressly waives:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings resulting in the resolution of intention and the resolution ordering the work relating to the formation of the District;

b) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that result in the adoption of any and all future resolutions of intention, resolutions ordering work, resolutions enlarging the District, and notices pertaining thereto;

c) Any necessity for publication, posting, mailing or recording of the resolution of intention and the notice of proposed improvements pursuant to A.R.S. § 48-578;

d) All protest rights whatsoever under A.R.S. § 48-579(A) and (B), which provide for protests against the work;

e) All objections to the extent of the District under A.R.S. § 48-579(C);

f) All objections to the lack of plans and specifications, the engineer's estimate and an assessment diagram, all which are unnecessary for completion of the District's formation or purpose; and

g) Any necessity for any notice or hearing with respect to land owned by the Petitioner now within the proposed boundaries of the District.

10. Expenses. The Petitioner hereby petitions the City Council to provide for the expenses of the District by assessment of the total sum upon the several lots, each respectively in proportion to the benefits to be received by each lot within the District, pursuant to A.R.S. § 48-574(D). The Petitioner further requests that no publicly owned land or property owned by a homeowners' association shall be liable to pay any expenses of the District. The Petitioner hereby agrees that each non-public parcel within the property proposed to be included in the District receives the same benefits as each other non-public parcel proposed to be included in the District.

11. Waiver of Petition. This Petition shall be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

12. Public Benefit. The operation, maintenance, repair and improvements of parkings, parkways, retention basins and detention basins within, adjacent to, or serving the District is of more than local or ordinary public benefit and the costs and expense thereof should be charged against the property within the District, all of which will benefit thereby.

13. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioner who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

14. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

The Petitioner hereby requests the City Council of the City to adopt a resolution of intention to order the proposed improvements and to proceed with the improvements requested herein.

IN WITNESS WHEREOF, the undersigned representative of the Petitioner has executed this Petition as of the date shown below.

RESOLUTION NO. 91-21

RESOLUTION OF THE COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ACCEPTING A PETITION, WAIVER AND CONSENT TO FORMATION OF A MAINTENANCE IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE; DECLARING THE INTENTION TO FORM A MAINTENANCE IMPROVEMENT DISTRICT; DESIGNATING SUCH DISTRICT AS "CITY OF BUCKEYE MAINTENANCE IMPROVEMENT DISTRICT NO. 2020-MID-004"; AND PROVIDING FOR THE ANNUAL LEVY OF TAXES OR AN ANNUAL ASSESSMENT AGAINST THE LOTS WITHIN THE DISTRICT IN PROPORTION TO THE BENEFITS RECEIVED.

BE IT RESOLVED BY THE MAYOR AND COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. Acceptance and Findings. A Petition for the formation of the City of Buckeye Maintenance Improvement District No. 2020-MID-004 to operate, maintain, repair and improve Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins has been filed with the Clerk and presented to the Mayor and Council at the meeting at which this Resolution was adopted. The Petition is accepted. The Petition purports to be signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders. After verification of such ownership, the Mayor and Council find that the Petition was signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders.

Section 2. Definitions. In this Resolution, the following terms shall have the following meanings:

"*City*" shall mean the City of Buckeye, Arizona.

"*Clerk*" shall mean the Clerk of the City of Buckeye, Arizona located at 530 East Monroe Avenue, Buckeye, Arizona 85326.

"*Detention Basin*" shall mean a flood control structure that captures and diverts stormwater runoff and typically does not retain a permanent pool of water.

"*District*" shall mean the City of Buckeye Maintenance Improvement District No. 2020-MID-004, encompassing the property described in *Exhibits A*, *B*, and *C* attached hereto.

"*Mayor and Council*" shall mean the Mayor and Council of the City.

"*Landscaping*" shall mean trees, plants, grass, ornamental structures, lighting structures and facilities for watering or otherwise maintaining such landscaping that are now in place or hereafter constructed or acquired for beautification of streets within or adjacent to the District.

"*Parking*" shall mean the landscaped public area lying between a sidewalk and the adjacent street.

"*Parkway*" shall mean a street with landscaped sides and/or a landscaped center median and shall also include ornamentation that enhances the beauty of a street.

"*Petition*" shall mean the petition, waiver and consent to formation of a municipal parkway maintenance improvement district by the City on file in the Clerk's office.

"*Public Property*" shall mean any lot or parcel belonging to the United States, the state of Arizona (the "*State*"), any county, city, town, school district or any political subdivision or institution of the State or county that is physically located within the District, including, without limitation any public street, avenue, alley or public easement located within the District hereinafter dedicated to public use.

"*Retention Basin*" shall mean a stormwater control structure that captures and retains stormwater runoff and typically retains a permanent pool of water.

"*Work*" shall mean the operation, maintenance, repair and improvement of Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins.

Section 3. Declaration of Intention to Order Formation of the District. The public interest and convenience require and it is the intention of the Mayor and Council to order the Work through formation of the District pursuant to Title 48, Chapter 4, Article 2, Arizona Revised Statutes. The District's sole purpose shall be for the operation, maintenance, repair and improvement of Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins. For purposes of this Resolution and

of all resolutions, ordinances and notices pertaining hereto, the District shall be known as, and is hereby designated, "City of Buckeye Maintenance Improvement District No. 2020-MID-004".

Section 4. Omission of Public Property from District. Any Public Property or property owned by a homeowners' association that is included within the District shall be omitted from all assessments or taxes hereafter to be made with respect to the District. Additionally, any public streets, avenues, alleys, or public easements hereafter dedicated to public use shall become exempt after such dedication.

Section 5. Statutory Authority. All proceedings pertaining to the District shall be done under and as authorized by Title 48, Chapter 4, Article 2, Arizona Revised Statutes, and all amendments thereto including, without limitation, Section 48-574.

Section 6. Protests and Objections to Extent of District. In the Petition, the signer has made written consents and waivers pertaining to the ordering of the Work and to the formation of the District and has specifically waived all protests against formation of, and objections to, the extent of the District. City staff has verified that all non-public real property owners within the District exclusive of mortgagees and other lienholders have signed the Petition, and the Mayor and Council find as a fact that all such property owners within the District have signed such Petition. Therefore, no publication or posting of any notice pertaining to formation of the District will be made.

Section 7. Engineer's Estimate. The District's sole purpose will be for the operation, maintenance, repair and improvement of Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins. No engineer's estimate, plans, or specifications have been filed with the Clerk. In the Petition, the signer specifically waived the filing of an engineer's estimate, plans, or specifications.

Section 8. Recordation. A certified copy of this Resolution shall be recorded in the office of the Maricopa County Recorder within ten (10) days of its adoption to give notice of formation of the District, as required by A.R.S. § 48-574(M).

Section 9. Extension for Filing. If either the formation of the District occurs after November 1 of the year preceding the year in which initial assessments are to be levied, or the resolution ordering the Work is not filed with both the Arizona Department of Revenue and the Maricopa County Assessor prior to such November 1, the Mayor and Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Arizona Department of Revenue extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2021.

PASSED AND ADOPTED by the Mayor and Council of the City of Buckeye, Arizona on December 21, 2021.

Eric W. Orsborn, Mayor

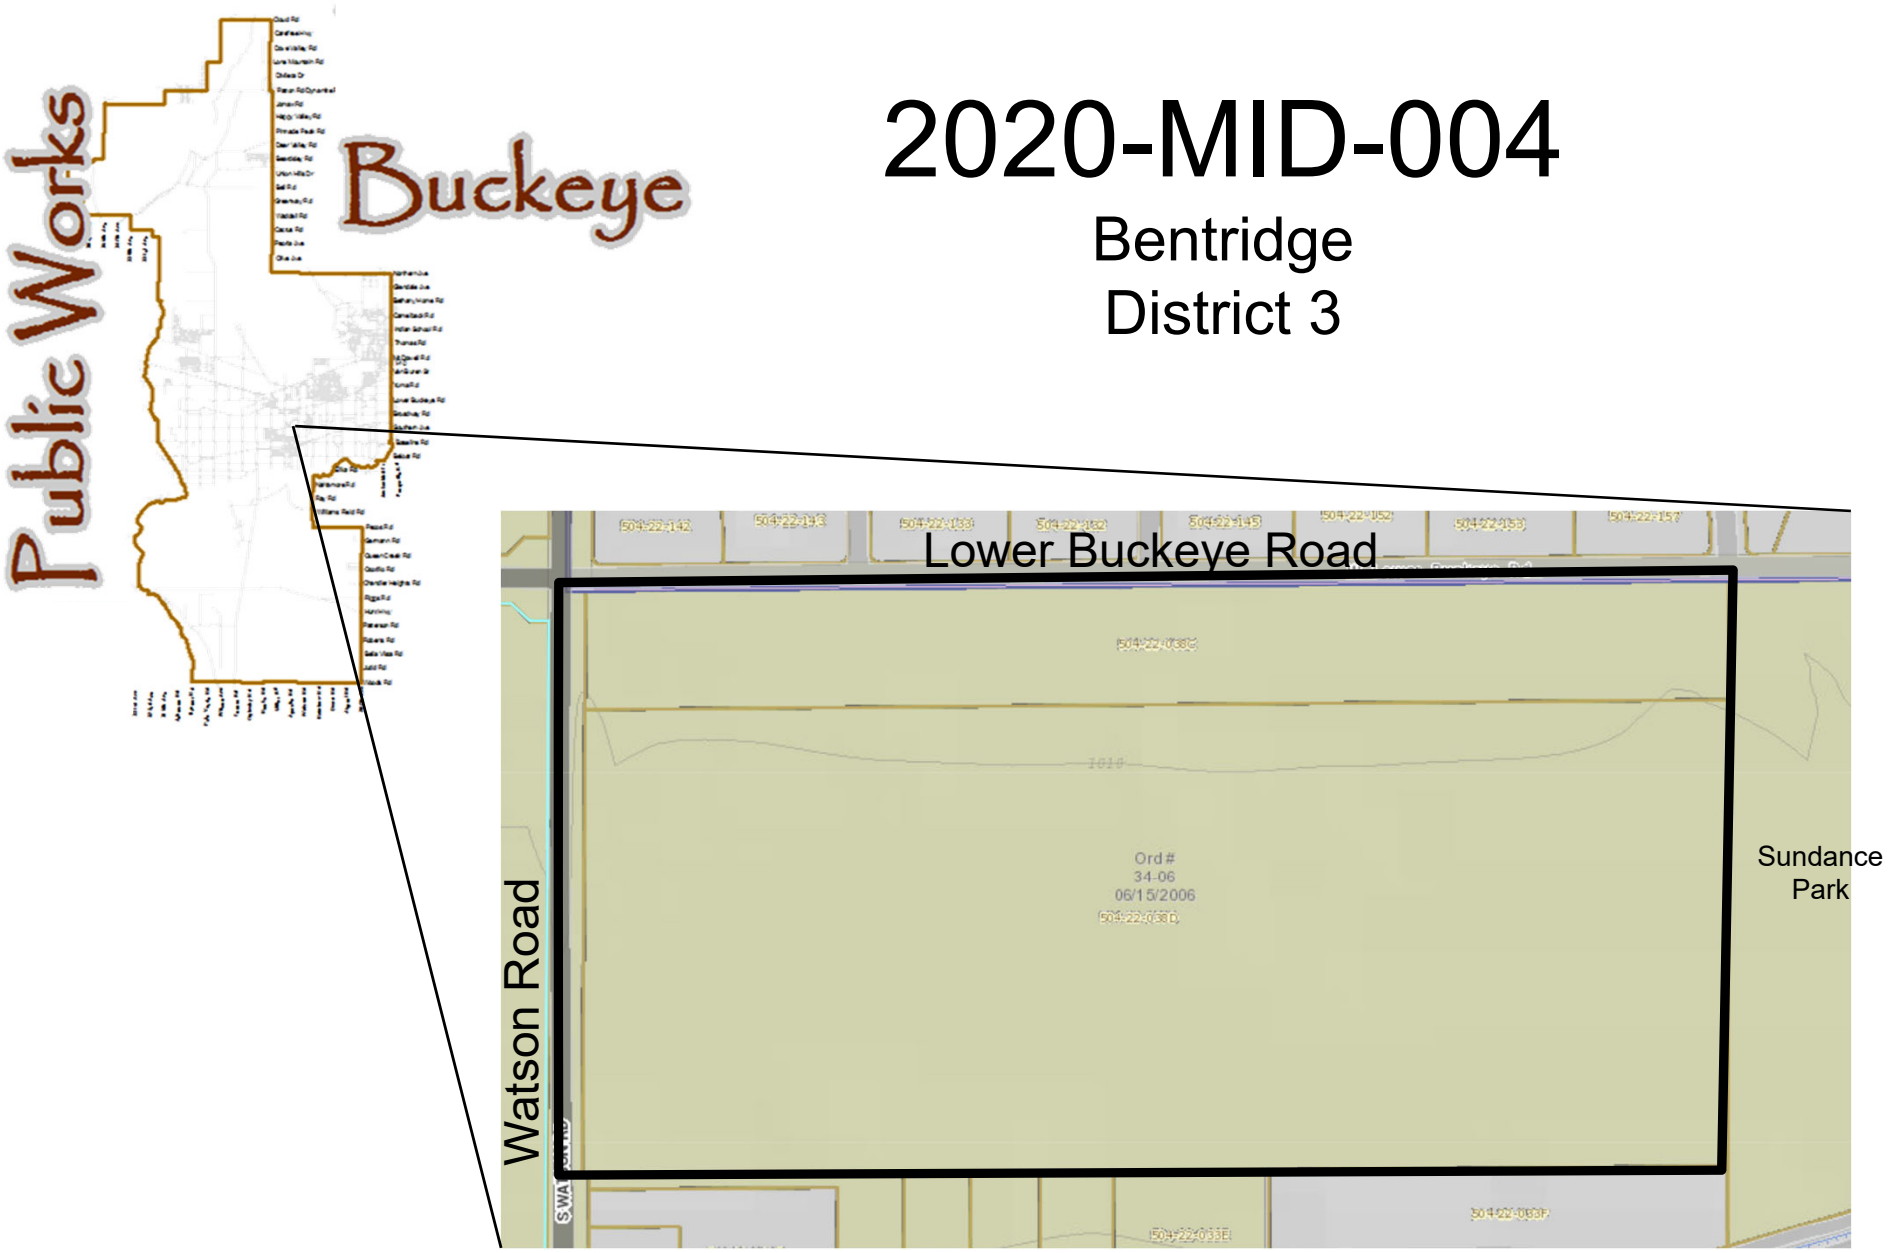
Bentridge
District 3



BUCKEYE, AZ

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.D. Resolution No. 92-21. Bentridge Ordering the work of Street Lighting Improvement District No. 2020-SLID-004
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 3
STAFF LIAISON: Scott Lowe, Public Works Director, SLowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council) Council to take action on Resolution No. 92-21 ordering the work as described in Resolution No. 90-21; ordering the formation of City of Buckeye Street Lighting Improvement District No. 2020-SLID-004; ordering recording and filing of this Resolution.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:

SLIDs are formed in the City of Buckeye in accordance with Ordinance #43-05 and assess the owners within a development for the cost of the electricity for the streetlights within the boundaries of the development SLID, including any public road street lighting that is of benefit to the development. SLIDs are established to purchase (and not generate) energy for street or public park lighting within the District and adjacent streets so that the costs are not borne by the City in its general HURF fund, though there are administrative services provided by the City.

BENEFITS:

Both Street Lighting Improvement Districts (SLIDs) and Maintenance Improvement Districts (MIDs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents/owners of a particular development without an undue burden upon the existing community. SLIDs ensure that only the owners that benefit from the lighting in their community pay for that service. Having the costs of street and public park lighting within a District borne by the owners in a development ensure that the revenue needed to fund these costs is always in place.

FUTURE ACTION:

This resolution will be recorded and a conformed copy delivered to the Maricopa County Assessor and the Arizona State Department of Revenue within ten (10) business days of Council action to ensure that this SLID is on the tax rolls for fiscal year 2022/2023.

PETITION, WAIVER AND CONSENT TO FORMATION OF A STREET LIGHTING IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

BENTRIDGE
2020-SLID-004

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned non-public real property owner (the "*Petitioner*") within the City of Buckeye, Arizona (the "*City*"), respectfully petitions the Mayor and City Council (the "*City Council*") of the City to order the formation of a street lighting improvement district under the Improvement District Law. In support of this Petition, Waiver and Consent to Formation of a Street Lighting Improvement District by the City of Buckeye (this "*Petition*"), the Petitioner agrees to waive certain rights under the Improvement District Law and hereby consents to the formation of a street lighting improvement district encompassing the land shown on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein.

1. Name of District. The Petitioner hereby requests the proposed district to be named the "City of Buckeye Street Lighting Improvement District No. 2020-SLID-004" (the "*District*").

2. Area of District. The property comprising the proposed District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*. Such property is entirely within the corporate boundaries of the City. The Petitioner respectfully requests that the property shown on *Exhibits A*, *B* and *C* be included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

3. Ownership. The Petitioner is the sole owner of all non-public, non-exempt real property within the proposed District.

4. Purpose. The District is proposed to be formed for the purpose of purchasing, and not generating, energy for street and public park lighting.

5. Public Convenience and Necessity. Public convenience, necessity and welfare will be promoted by the formation of the District, the inclusion of the property described in *Exhibits A*, *B*, and *C* within the District, and the levying of an annual ad valorem tax or equal apportionment of taxes upon all of the non-public real property within the District as provided in A.R.S. § 48-616(C).

6. Fees and Reimbursement. The Petitioner has paid all application fees for the formation of the District and further agrees to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the formation of the District.

7. Expansion of or Annexation to the District. The Petitioner waives any objection to, or protest against, any future enlargement or enlargements of the District and also waives all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioner further waives any objection to, or protest against, the consolidation of the District with any other similar district or districts.

8. Waiver and Consent. The Petitioner, with full knowledge of its rights being waived hereunder, hereby expressly waives:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings resulting in the resolution of intention and the resolution ordering the work relating to the formation of the District;

b) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that result in the adoption of any and all future resolutions of intention, resolutions ordering work, resolutions enlarging the District, and notices pertaining thereto;

c) Any necessity for publication, posting, mailing, or recording of any resolution(s) of intention, resolution(s) ordering work, resolution(s) enlarging the District, or notices of proposed improvements as described in A.R.S. §§ 48-578 and 48-581;

d) All protest rights whatsoever under A.R.S. § 48-579(A) and (B), which provide for protests against the work;

e) All objections to the extent of the District under A.R.S. § 48-579(C);

f) All objections to the lack of plans and specifications, the engineer's estimate and an assessment diagram, all of which are unnecessary for completion of the District's formation or purpose; and

g) Any necessity for any notice or hearing with respect to land owned by the Petitioner now within the proposed boundaries of the District.

9. Equal Apportionment. The Petitioner hereby petitions the City Council to equally apportion the District's annual taxes based on the number and classification of properties within the District pursuant to A.R.S. § 48-616(J). The Petitioner further requests that no publicly owned land or property owned by a homeowners' association shall be liable to pay any expenses of the District.

10. Waiver of Petition. This Petition shall be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

11. Public Benefit. The purchasing of energy to operate street lighting improvements within the District is of more than local or ordinary public benefit and should be charged against the property within the District, all of which will benefit thereby.

12. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioner who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

13. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

The Petitioner hereby requests the City Council of the City to adopt a resolution of intention to order the proposed improvements and to proceed with the improvements requested herein.

IN WITNESS WHEREOF, the undersigned representative of the Petitioner has executed this Petition as of the date shown below.

RESOLUTION NO. 92-21

A RESOLUTION OF THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ORDERING THE WORK AS DESCRIBED IN RESOLUTION NO. 90-21 AND ORDERING THE FORMATION OF CITY OF BUCKEYE STREET LIGHTING IMPROVEMENT DISTRICT NO. 2020-SLID-004; ORDERING RECORDING AND FILING OF THIS RESOLUTION.

WHEREAS, on December 21, 2021, the Mayor and City Council of the City of Buckeye, Arizona (the "*City*") passed and adopted Resolution No. 90-21 (the "*Resolution of Intention*"), which Resolution of Intention declared the Mayor and Council's intention to form the City of Buckeye Street Lighting Improvement District No. 2020-SLID-004 (the "*District*"), within the area known as Bentridge, solely for the purpose of purchasing energy for lighting of the public streets within and adjacent to the District; and

WHEREAS, a petition (the "*Petition*") for the formation of the District was presented to the Mayor and Council, which Petition purported to be signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders; and

WHEREAS, the Mayor and Council found that the Petition was signed by all such owners and have verified such finding of such fact; and

WHEREAS, in the Petition the signer waived all protests against the proposed Work (as defined in the Resolution of Intention), all objections to the extent of the District, all publication, posting and mailing of the Resolution of Intention, and the passage of time between adoption of the Resolution of Intention and this Resolution; and

WHEREAS, pursuant to A.R.S. §§ 48-616 and 48-617, the Mayor and Council hereby find and determine that they have jurisdiction to order the Work of purchasing energy for lighting of public streets and parks within the District and hereby order the formation of the District described in the Resolution of Intention;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. Ordering the Work and District Formation. All protests against the Work, or the formation of the District, and all objections to the extent of the District being waived by the owners of all non-public real property within the District, exclusive of mortgagees and

lienholders, pursuant to A.R.S. §§ 48-616 and 48-617, the Work, as described in the Resolution of Intention, is hereby ordered and the formation of the City of Buckeye Street Lighting Improvement District No. 2020-SLID-004 is hereby ordered. The District shall encompass the property described on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein. The Assessor's parcel numbers shown on *Exhibit B* are for convenience only. If either *Exhibit A* or *Exhibit B* or both conflict with *Exhibit C*, *Exhibit C* shall govern and be determinative of a parcel's inclusion within, or exclusion from, the District, subject to the restrictions of Section 2 of this Resolution.

Section 2. Excluded Property. No publicly owned land or property owned by a homeowners' association will be liable to pay any portion of the District's costs and expenses. This exclusion shall apply to all public streets, avenues, alleys, or public easements within the District that may hereafter be dedicated to public use.

Section 3. Annual Tax or Annual Assessment. Subject to the restrictions of Section 2 of this Resolution, the City shall annually, commencing in tax year 2023 and for the City's 2023-2024 fiscal year, make annual statements and estimates of the expenses of the District and shall submit the same to the Board of Supervisors of Maricopa County for the levy and collection of ad valorem taxes upon the assessed value of all taxable property, real and personal, in the District or by equal apportionment of taxes based on the number and classification of properties within the District, and shall publish notice of the statements and estimates, hold hearings on them and adopt them at the times and in the manner provided for incorporated cities and cities' statements and estimates by applicable portions of Title 42, Chapter 17, Article 3, Arizona Revised Statutes, and shall annually set, fix and cause to be levied and assessed the amount to be raised by ad valorem taxes upon all of the taxable property of the District or by an equal annual charge and shall cause to be collected, as county taxes are collected, the amounts shown by the statements and estimates so adopted by the Mayor and Council. As provided in A.R.S. § 48-616, all statutes providing for the levy and collection of general county taxes, including collection of delinquent taxes and sale of property for nonpayment of taxes, are applicable to the District taxes as provided to be levied by this section.

Section 4. Recording and Filing. The City Clerk is ordered and directed to cause a certified copy of this Resolution to be recorded in the office of the Maricopa County Recorder. The City Clerk is further ordered and directed to file certified copies of this Resolution with the Arizona Department of Revenue (the "*Department*") and the Maricopa County Assessor, pursuant to A.R.S. § 42-17257, together with all other information prescribed by the Director of the Department relating to the boundaries of newly created taxing jurisdictions.

Section 5. Extension for Filing. If either the formation of the District occurs after November 1 of the year preceding the year in which initial taxes are to be levied, or this Resolution is not filed with both the Department and the Maricopa County Assessor prior to such November 1, the Mayor and Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Department extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2021.

PASSED AND ADOPTED by the Mayor and City Council of the City of Buckeye, Arizona on December 21, 2021.

Eric W. Orsborn, Mayor

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.E. Resolution No. 93-21. Bentridge Ordering the work Maintenance Improvement District No. 2020-MID-004
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 3
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 93-21 ordering the work as described in Resolution No. 91-21; ordering the formation of City of Buckeye Maintenance Improvement District No. 2020-MID-004; ordering recording and filing of this Resolution.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:

MIDs are formed in the City of Buckeye in accordance with Ordinance #42-06 and assess the owners within a development for the cost of maintenance of the landscaping along the rights-of-ways within a development MID. MIDs are not activated unless the development's owners should fail or otherwise go out of business, since the owner is charged with that maintenance responsibility; however, the MID is standing by as a protection for the City to ensure that there is adequate revenue to take on the maintenance.

BENEFITS:

Maintenance Improvement Districts ensure that only the owners that benefit from the improvements to their community pay for that service. Having the costs of maintenance, repair and improvement of parkways and parks within a District borne by the owners in a development ensure that the revenue needed to fund these costs are always in place. Both Street Lighting Improvement Districts (SLIDs) and Maintenance Improvement Districts (MIDs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents/owners of a particular development without an undue burden upon the existing community.

FUTURE ACTION:

This resolution will be recorded and a conformed copy delivered to the Maricopa County Assessor and the Arizona State Department of Revenue within ten (10) business days of Council action to ensure that this MID is on the tax rolls for fiscal year 2023/2024.

PETITION, WAIVER AND CONSENT TO FORMATION OF A MAINTENANCE IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

BENTRIDGE
2020-MID-004

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned non-public real property owner (the "*Petitioner*") respectfully petitions the Mayor and City Council (the "*City Council*") of the City of Buckeye, Arizona (the "*City*") to order the formation of a residential municipal maintenance improvement district under the Improvement District Law. In support of this Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye (this "*Petition*"), the Petitioner agrees to waive certain rights under the Improvement District Law and hereby consents to the formation of a residential municipal maintenance improvement district encompassing the land shown on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein.

1. Name of District. The Petitioner hereby requests the proposed district to be named the "City of Buckeye Maintenance Improvement District No. 2020-MID-004" (the "*District*").

2. Area of District. The property comprising the proposed District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*. The proposed District consists of an aggregate of 79.849 acres which are entirely within the corporate boundaries of the City. The Petitioner respectfully requests that the land shown on *Exhibits A*, *B* and *C* be included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

3. Ownership. The Petitioner is the sole owner of all non-public, non-exempt real property within the proposed District.

4. Purpose. The District is proposed to be formed for the purpose of providing for operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins within, adjacent to, or that serve the District, and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins. To enhance such purposes the Petitioner grants to the City the public use of all such parkings, parkways, retention basins and detention basins and access thereto across the Petitioner's property to carry out all District purposes.

5. Public Convenience and Necessity. Public convenience, necessity and welfare will be promoted by the formation of the District, the inclusion of the property described in *Exhibits A*, *B*, and *C* within the District, and the levying of an annual ad valorem tax or annual special assessment upon all of the non-public real property within the District.

6. Fees and Reimbursement. The Petitioner has paid all application fees for the formation of the District and further agrees to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the formation of the District.

7. Document Requirements. The Petitioner has previously submitted the following documents to the City's Public Works Department:

a) Street landscaping layout plans.

b) One 24" x 36" copy of the District diagram showing each lot or parcel.

c) A metes and bounds legal description of the District boundary, accompanied by a list of Assessor's parcel numbers within the proposed District and a map showing the District boundary (with back-up material showing that the boundary closes, as necessary).

The Petitioner or the Petitioner's engineer will submit the following documents to the City's Public Works Department concurrently with the submission of this fully executed Petition:

a) Proof of payment of the District application fees.

b) Two 8-1/2" x 11" recordable copies of a legal description of the District boundary and a map showing the District boundary.

8. Expansion of or Annexation to the District. The Petitioner waives any objection to, or protest against, any future enlargement or enlargements of the District and also waives all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioner further waives any objection to, or protest against, the consolidation of the District with any other similar district or districts.

9. Waiver and Consent. The Petitioner, with full knowledge of its rights being waived hereunder, hereby expressly waives:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings resulting in the resolution of intention and the resolution ordering the work relating to the formation of the District;

b) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that result in the adoption of any and all future resolutions of intention, resolutions ordering work, resolutions enlarging the District, and notices pertaining thereto;

c) Any necessity for publication, posting, mailing or recording of the resolution of intention and the notice of proposed improvements pursuant to A.R.S. § 48-578;

d) All protest rights whatsoever under A.R.S. § 48-579(A) and (B), which provide for protests against the work;

e) All objections to the extent of the District under A.R.S. § 48-579(C);

f) All objections to the lack of plans and specifications, the engineer's estimate and an assessment diagram, all which are unnecessary for completion of the District's formation or purpose; and

g) Any necessity for any notice or hearing with respect to land owned by the Petitioner now within the proposed boundaries of the District.

10. Expenses. The Petitioner hereby petitions the City Council to provide for the expenses of the District by assessment of the total sum upon the several lots, each respectively in proportion to the benefits to be received by each lot within the District, pursuant to A.R.S. § 48-574(D). The Petitioner further requests that no publicly owned land or property owned by a homeowners' association shall be liable to pay any expenses of the District. The Petitioner hereby agrees that each non-public parcel within the property proposed to be included in the District receives the same benefits as each other non-public parcel proposed to be included in the District.

11. Waiver of Petition. This Petition shall be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

12. Public Benefit. The operation, maintenance, repair and improvements of parkings, parkways, retention basins and detention basins within, adjacent to, or serving the District is of more than local or ordinary public benefit and the costs and expense thereof should be charged against the property within the District, all of which will benefit thereby.

13. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioner who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

14. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

The Petitioner hereby requests the City Council of the City to adopt a resolution of intention to order the proposed improvements and to proceed with the improvements requested herein.

IN WITNESS WHEREOF, the undersigned representative of the Petitioner has executed this Petition as of the date shown below.

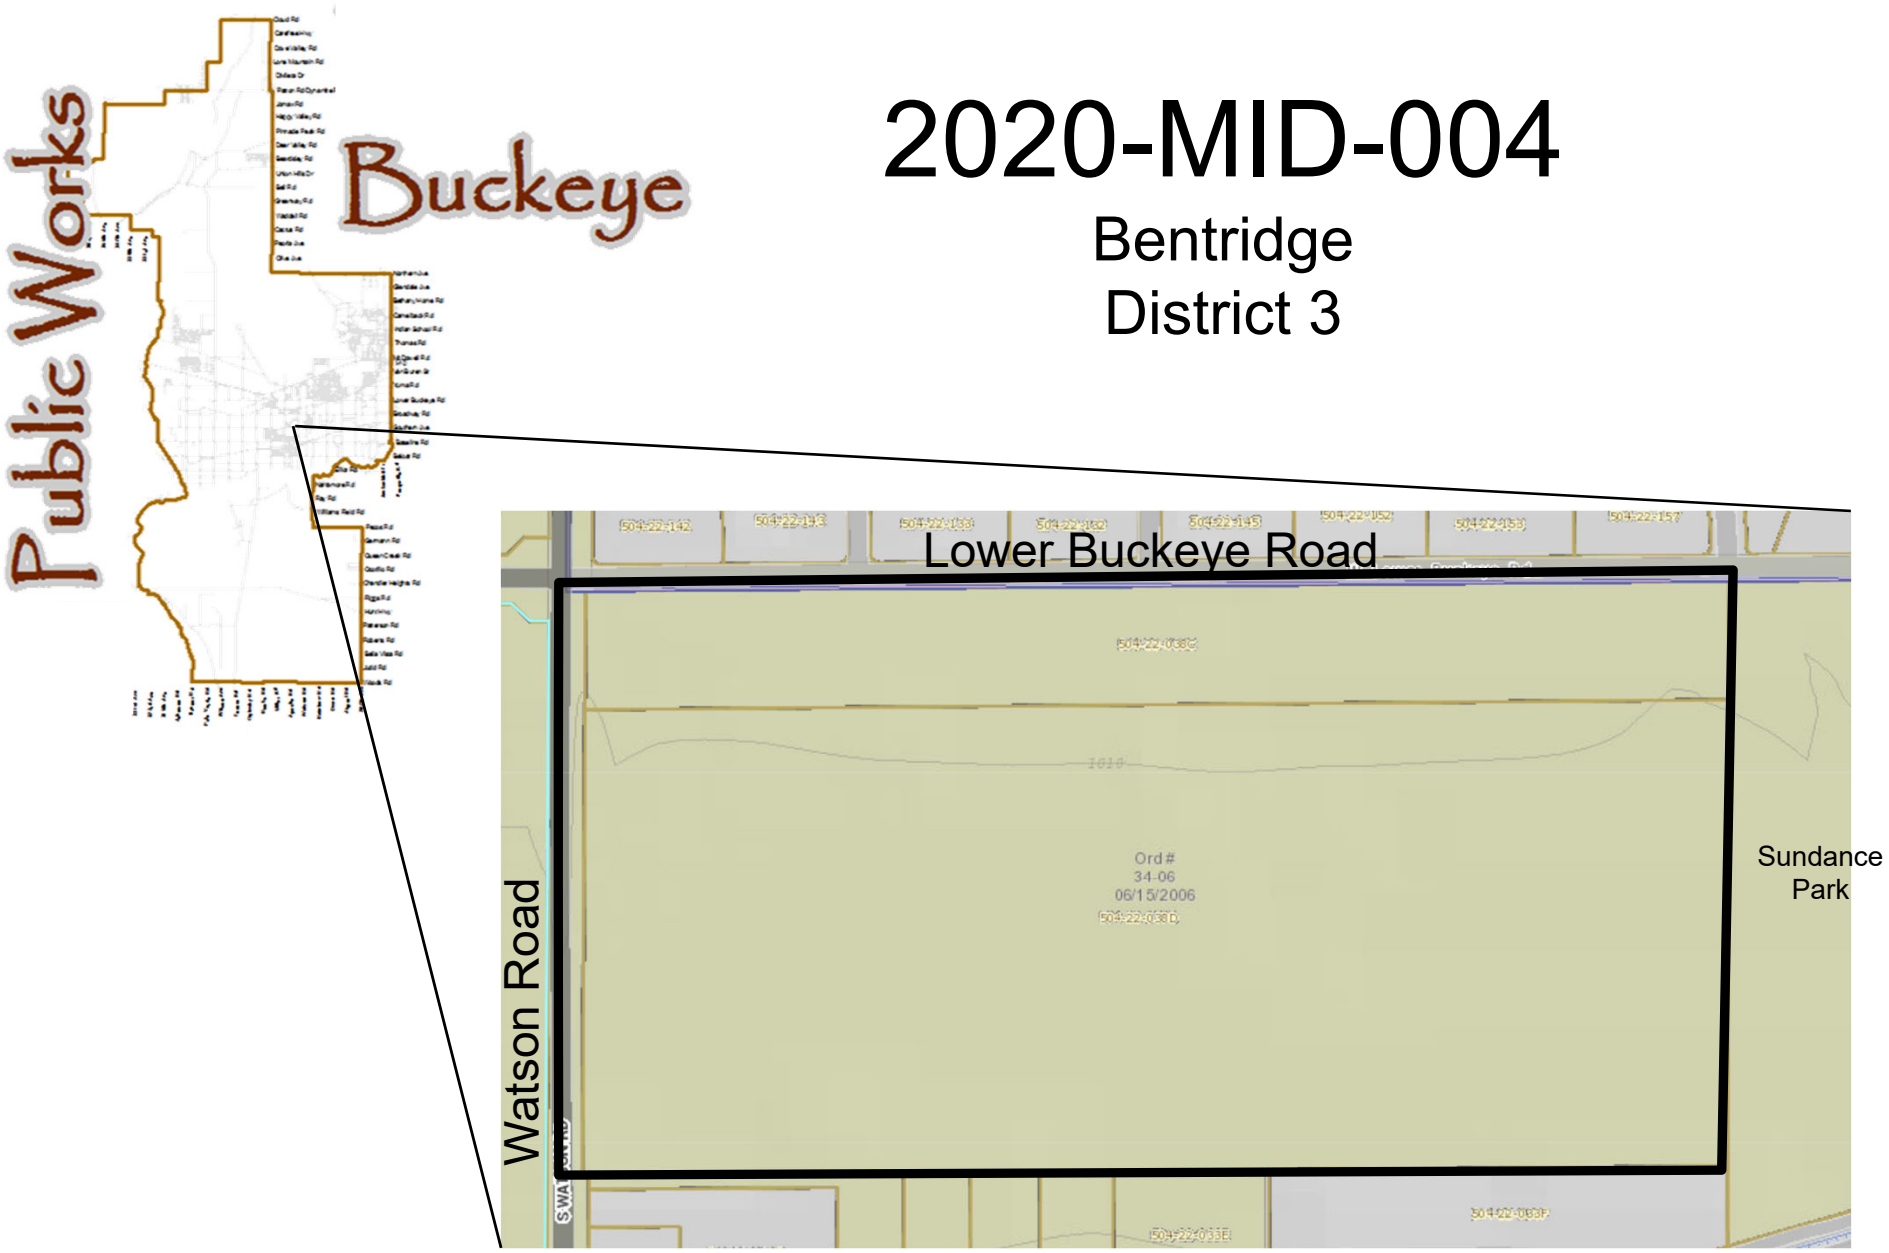
District 3



BUCKEYE, AZ

When Recorded, Return to:

Lucinda J. Aja, City Clerk
City of Buckeye
530 East Monroe Avenue
Buckeye, Arizona 85326

RESOLUTION NO. 93-21

RESOLUTION OF THE COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ORDERING THE WORK AS DESCRIBED IN RESOLUTION NO. 91-21; ORDERING THE FORMATION OF CITY OF BUCKEYE MAINTENANCE IMPROVEMENT DISTRICT NO. 2020-MID-004; ORDERING RECORDING AND FILING OF THIS RESOLUTION.

WHEREAS, on December 21, 2021, the Mayor and City Council of the City of Buckeye, Arizona (the "*City*") passed and adopted Resolution No. 91-21 (the "*Resolution of Intention*"), which Resolution of Intention declared the Mayor and City Council's intention to form the City of Buckeye Maintenance Improvement District No. 2020-MID-004 (the "*District*"), solely for the purpose of operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins (collectively, the "*Work*"); and

WHEREAS, a legal description, Assessor's parcel numbers and a map of the proposed District boundaries are attached hereto as *Exhibits A*, *B*, and *C* and incorporated by reference herein; and

WHEREAS, prior to adoption of the Resolution of Intention, a petition (the "*Petition*") for the formation of the District was presented to this Mayor and City Council, which Petition purported to be signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders; and

WHEREAS, the Mayor and City Council accepted the Petition and found that the Petition was signed by all such owners and have verified such finding of such fact; and

WHEREAS, in the Petition the signer waived all protests against the proposed Work, all objections to the extent of the District, and all publication, posting and mailing of the Resolution of Intention and this Resolution; and

WHEREAS, pursuant to A.R.S. §§ 48-574 and -579, the Mayor and City Council hereby find and determine that they have jurisdiction to order the Work of operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain

inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins that are or hereafter will be within or adjacent to the District as it is described in the Resolution of Intention or is hereafter modified or enlarged, and by this Resolution order the formation of the District described in the Resolution of Intention;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. Ordering the Work and District Formation. All protests against the Work or the formation of the District and all objections to the extent of the District being waived by the owners of all non-public real property within the District, exclusive of mortgagees and lienholders, the Work as described in the Resolution of Intention is hereby ordered and the formation of the City of Buckeye Maintenance Improvement District No. 2020-MID-004 is hereby ordered. The legal description, Assessor's parcel numbers and boundary map of the District are set forth in *Exhibits A*, *B*, and *C*.

Section 2. Excluded Property. No publicly owned land or property owned by a homeowners' association will be liable to pay any portion of the District's costs and expenses. This exclusion shall apply to all public streets, avenues, alleys, or public easements within the District that may hereafter be dedicated to public use.

Section 3. Annual Tax or Annual Assessment. Subject to the restrictions of Section 2 of this Resolution, the City shall annually, commencing in tax year 2023 and for the City's 2023-2024 fiscal year, make annual statements and estimates of the expenses of the District, if any, and shall submit the same to the Board of Supervisors of Maricopa County for the levy and collection of ad valorem taxes upon the assessed value of all taxable property, real and personal, in the District or by equal apportionment of taxes based on the number and classification of properties within the District, and shall publish notice of the statements and estimates, hold hearings on them and adopt them at the times and in the manner provided for an incorporated city's statements and estimates by applicable portions of Title 42, Chapter 17, Article 3, Arizona Revised Statutes, and shall annually set, fix and cause to be levied and assessed the amount to be raised by ad valorem taxes upon all of the taxable property of the District and shall cause to be collected, as county taxes are collected, the amounts shown by the statements and estimates so adopted by the Mayor and City Council. As provided in A.R.S. § 48-574, all statutes providing for the levy and collection of general county taxes, including collection of delinquent taxes and sale of property for nonpayment of taxes, are applicable to the District taxes as provided to be levied by this section.

Section 4. Recording and Filing. The City Clerk is ordered and directed to cause a certified copy of this Resolution to be recorded in the office of the Maricopa County Recorder within ten (10) days of the adoption of this Resolution. The City Clerk is further ordered and directed to file certified copies of this Resolution with the Arizona Department of Revenue (the "*Department*") and the Maricopa County Assessor, as required by A.R.S. § 42-17257, together with all other information prescribed by the Director of the Department relating to the boundaries of newly created taxing jurisdictions.

Section 5. Extension for Filing. If either the formation of the District occurs after November 1 of the year preceding the year in which initial assessments are to be levied, or this Resolution is not filed with both the Department and the Maricopa County Assessor prior to such November 1, the Mayor and City Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Department extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2021.

PASSED AND ADOPTED by the Mayor and Council of the City of Buckeye, Arizona, on December 21, 2021.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.F. Resolution No 97-21. Desert Moon Estates Intent to expand Street Lighting Improvement District No. 2007-SLID-010
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 4
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 97-21 enlarging City of Buckeye Street Lighting Improvement District No. 2007-SLID-010 and ordering recording and filing of this Resolution.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
Street Lighting Improvement Districts (SLIDs) are established to purchase (not generate) energy for street lighting or public park lighting with the District and adjacent streets so that the costs are not borne by the City in its Highway User Revenue Fund

BENEFITS:
Both SLIDS and Maintenance Improvement Districts (MIDSs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents /owners of a particular development without an undue burden upon the existing community. SLIDS ensure that only owners that have benefit from the lighting in their community pay for that service. Having the costs of street and public park lighting within a SLID borne by the owners in a development ensures that the revenue needed to fund these costs is always in place.

FUTURE ACTION:
A budget and further Council action will take place at the beginning of the next fiscal year to implement this District.

FINANCIAL IMPACT STATEMENT:
N/A

CURRENT FISCAL YEAR TOTAL COST:

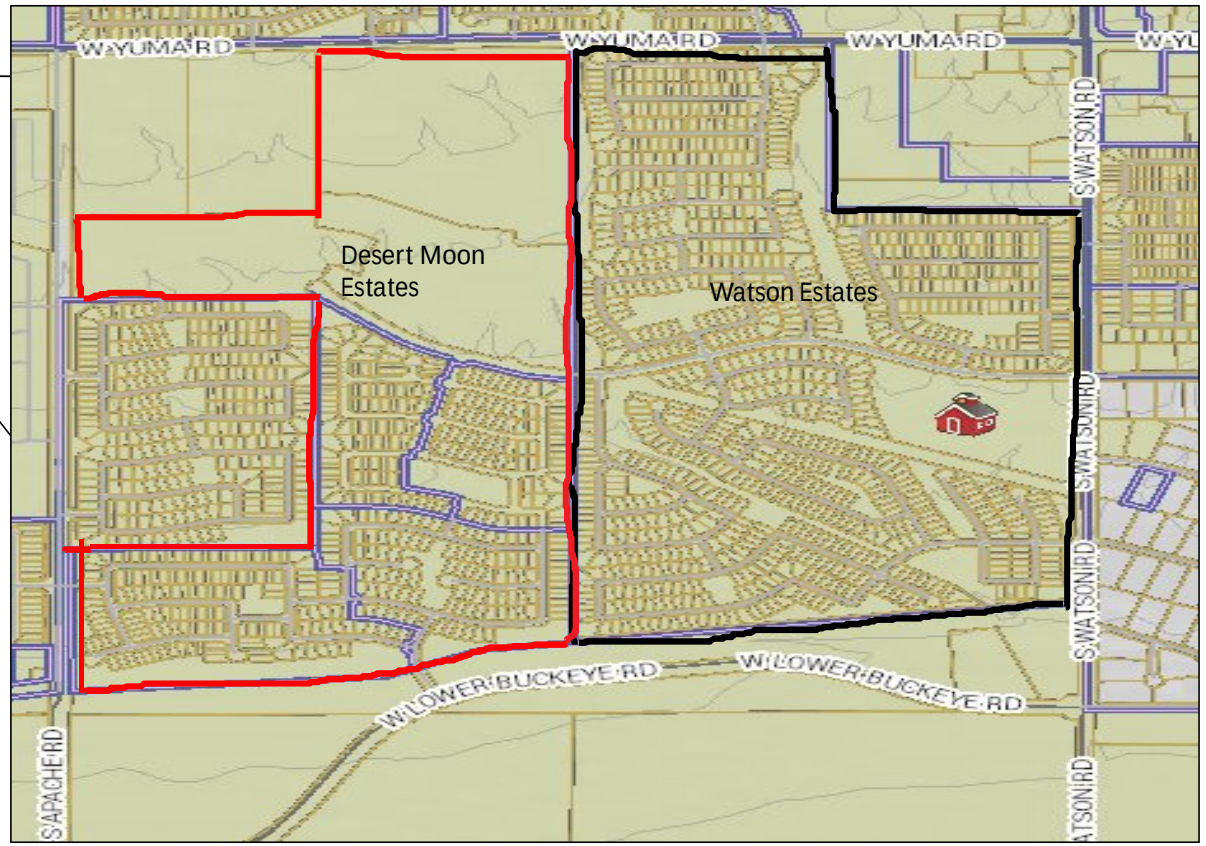
Desert Moon Estates Expansion
District 4



BUCKEYE, AZ

When Recorded, Return to:

Lucinda J. Aja, City Clerk
City of Buckeye
530 East Monroe Avenue
Buckeye, Arizona 85326

RESOLUTION NO. 97-21

RESOLUTION ENLARGING CITY OF BUCKEYE STREET LIGHTING IMPROVEMENT DISTRICT NO. 2007-SLID-010 AND ORDERING RECORDING AND FILING OF THIS RESOLUTION.

WHEREAS, on November 17, 2009, the then Mayor and Town Council of the Town of Buckeye, Arizona (the "*Town*") passed and adopted Resolution No. 87-09 ordering the formation of Town of Buckeye Street Lighting Improvement District No. 2007-SLID-010, solely for the purpose of purchasing (and not generating) energy for lighting of public streets and parks; and

WHEREAS, thereafter the Town became the City of Buckeye ("*City*") and the Town of Buckeye Street Lighting Improvement District No. 2007-SLID-010 became known as the City of Buckeye Street Lighting Improvement District No. 2007-SLID-010 (the "*District*"); and

WHEREAS, the owners of certain property adjoining the District (the "*Petitioners*") have filed a petition seeking to enlarge the District to include the property described in the attached *Exhibits A*, *B*, and *C* (collectively, the "*Added Territory*"); and

WHEREAS, the Petitioners have waived publication and posting of notice of the Added Territory, any protest against the enlargement of the District, and any objection to the extent of the enlarged District; and

WHEREAS, the Mayor and City Council hereby find and determine that they have jurisdiction to order the enlargement of the District and hereby order the Added Territory to be added to the District;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. District Enlargement. The District is enlarged by the addition of the Added Territory, as shown on *Exhibits A*, *B*, and *C* attached hereto and incorporated by reference into this Resolution. The Assessor's parcel numbers shown on *Exhibit B* are for convenience only. If the legal description in *Exhibit A* or the Assessor's parcel numbers in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern and be determinative of a parcel's inclusion within, or exclusion from, the District, subject to the restrictions of Section 2 of this Resolution.

Section 2. Excluded Property; Annual Tax. No publicly owned land or property owned by a homeowners' association will be liable to pay any portion of the District's costs and expenses. The annual tax levied upon the District will remain in full force and effect and will apply to the District as enlarged by this Resolution. The District taxes will continue to be levied based on the number and classification of parcels within the enlarged District, excluding those parcels which are publicly owned or owned by a homeowners' association.

Section 3. Recording and Filing. The City Clerk is ordered and directed to cause a certified copy of this Resolution to be recorded in the office of the Maricopa County Recorder. The City Clerk is further ordered and directed to file certified copies of this Resolution with the Director of the Arizona Department of Revenue and the Maricopa County Assessor, pursuant to A.R.S. § 42-17257.

Section 4. Extension for Filing. If either the enlargement of the District occurs after November 1 of the year preceding the year in which initial taxes are to be levied, or this Resolution is not filed with both the Arizona Department of Revenue and the Maricopa County Assessor prior to such November 1, the Mayor and City Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Arizona Department of Revenue extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2022.

PASSED AND ADOPTED by the Mayor and City Council of the City of Buckeye, Arizona, this 21st day of December, 2021.

PETITION, WAIVER AND CONSENT TO INCLUSION OF ADDITIONAL LAND WITHIN AN EXISTING STREET LIGHTING IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

DESERT MOON ESTATES
ANNEXATION TO 2007-SLID-010

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned property owners (the "*Petitioners*") respectfully petition the Mayor and City Council of the City of Buckeye, Arizona ("*City Council*") to order the enlargement of the existing City of Buckeye Street Lighting Improvement District No. 2007-SLID-010 (the "*District*") under the Improvement District Law. In support of this Petition, Waiver and Consent to Inclusion of Additional Land within an Existing Street Lighting Improvement District by the City of Buckeye (this "*Petition*"), the Petitioners agree to waive certain rights under the Improvement District Law and hereby consent to the annexation and inclusion of the land shown on *Exhibits A*, *B*, and *C* into the District.

1. Area to be Added to District. The property comprising the proposed addition to the existing District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C* attached hereto and incorporated herein by this reference. The proposed addition consists of an aggregate of 426 lots, 43 tracts and three un-subdivided parcels which are entirely within the corporate boundaries of the City of Buckeye, Arizona (the "*City*"). The Petitioners respectfully request that the land shown on *Exhibits A*, *B*, and *C* be annexed into and become included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

2. Ownership. The Petitioners are the sole owners of all non-public real property within the area proposed to be added to the District.

3. Purpose. The District was formed solely for the purchase of energy for lighting the streets and public parks within and adjacent to the District.

4. Public Convenience and Necessity. The necessity for the enlargement of the District is the purchase of energy for lighting the streets and public parks within and adjacent to the proposed enlarged District by the levying of an annual ad valorem tax or by an equal apportionment of taxes upon all of the non-public real property within the District as provided in A.R.S. § 48-616(C).

5. Payment of Costs by Petitioner. The Petitioners agree to pay the costs and expenses of energy for street lights within and surrounding the proposed addition to the District that operate prior to July 1, 2023, because the District will not be able to levy taxes for such expenses of the area added to the District prior to the City's fiscal year 2023/2024. Tax collections of taxes levied on the property to be annexed to the District will not be posted to the City until on or about July 1, 2023, and the City does not expect to receive taxes from the property described in *Exhibits A*, *B*, and *C* before November 1, 2023.

6. Fees and Reimbursement. The Petitioners have paid all application fees for the expansion of the District and further agree to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the enlargement of the District.

7. Expansion of or Annexation to the District. The Petitioners waive any objection to, or protest against, this or any future enlargement or enlargements of the District and also waive all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioners further waive any objection to, or protest against, the consolidation of the District with any other similar district or districts.

8. Waiver and Consent. The Petitioners, with full knowledge of their rights being waived hereunder, hereby expressly waive:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that resulted in the original formation of the District or previous enlargements of the District or will result in the adoption of the resolution ordering enlargement of the District pursuant to this Petition and any and all future resolution(s) of intention, resolution(s) enlarging the District, and notices pertaining thereto;

b) Any necessity for publication, posting, mailing or recording of the resolution(s) enlarging the District, notices of proposed improvements, or notices described in A.R.S. §§ 48-574(J) and 48-616(M);

c) All protest rights whatsoever under A.R.S. §§ 48-579(A)-(B) and 48-616(M), which provide for protests against the work or objections to the extent of the enlargement of the District;

d) All objection rights whatsoever under A.R.S. § 48-574(L), which provides for objections against the proposed inclusion of the territory proposed to be added to the District; and

e) Any necessity for any notice or hearing with respect to land owned by the Petitioner now within the District or within the property comprising the proposed addition to the District.

9. Equal Apportionment. The Petitioners hereby petition the City Council to equally apportion the District's annual taxes based on the number and classifications of properties within the proposed enlarged District, pursuant to A.R.S. § 48-616(J). The Petitioners further request that no publicly owned land or property owned by a homeowners' association be liable to pay any expenses of the District.

10. Waiver. This Petition shall also be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the proposed addition to the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

11. Public Benefit. The purchase of energy to operate street lighting improvements within the area proposed to be added to the District is of more than local or ordinary public benefit and should be charged against the property within the proposed enlarged District, all of which will benefit thereby.

12. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioners who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

13. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

PROPERTY: See Exhibits A, B, and C.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.G. Resolution No. 98-21 Desert Moon Estates Intent to form a Maintenance Improvement District No. 2019-MID-006
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 4
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 98-21 accepting a Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye; declaring the intention to form a Maintenance Improvement District; designating such District as "City of Buckeye Maintenance Improvement District No. 2019-MID-006"; and providing for the annual levy of taxes or an annual assessment against the lots within the District in proportion to the benefits received.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:

MIDs are formed in the City of Buckeye in accordance with Ordinance #42-06 and assess the owners within a development for the cost of maintenance of the landscaping along the rights-of-ways within a development MID. MIDs are not activated unless the development's owners should fail or otherwise go out of business, since the owner is charged with that maintenance responsibility; however, the MID is standing by as a protection for the City to ensure that there is adequate revenue to take on the maintenance.

BENEFITS:

Maintenance Improvement Districts ensure that only the owners that benefit from the improvements to their community pay for that service. Having the costs of maintenance, repair and improvement of parkways and parks within a District borne by the owners in a development ensure that the revenue needed to fund these costs are always in place. Both Street Lighting Improvement Districts (SLIDs) and Maintenance Improvement Districts (MIDs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents/owners of a particular development without an undue burden upon the existing community.

FUTURE ACTION:

This resolution will be recorded and a conformed copy delivered to the Maricopa County Assessor and the Arizona State Department of Revenue within ten (10) business days of Council action to ensure that this MID is on the tax rolls for fiscal year 2023/2024.

PETITION, WAIVER AND CONSENT TO FORMATION OF A MAINTENANCE IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

DESERT MOON ESTATES
2019-MID-006

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned property owners (the "*Petitioners*") respectfully petition the Mayor and City Council (the "*City Council*") of the City of Buckeye, Arizona (the "*City*") to order the formation of a residential municipal maintenance improvement district under the Improvement District Law. In support of this Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye (this "*Petition*"), the Petitioners agree to waive certain rights under the Improvement District Law and hereby consent to the formation of a residential municipal maintenance improvement district encompassing the land shown on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein.

1. Name of District. The Petitioners hereby request the proposed district to be named the "City of Buckeye Maintenance Improvement District No. 2019-MID-006" (the "*District*").

2. Area of District. The property comprising the proposed District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*. The proposed District consists of an aggregate of 426 lots, 43 tracts and three un-subdivided parcels which are entirely within the corporate boundaries of the City. The Petitioners respectfully request that the land shown on *Exhibits A*, *B* and *C* be included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

3. Ownership. The Petitioners are the sole owners of all non-public real property within the proposed District.

4. Purpose. The District is proposed to be formed for the purpose of providing for operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins within, adjacent to, or that serve the District, and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins. To enhance such purposes the Petitioners grant to the City the public use of all such parkings, parkways, retention basins and detention basins and access thereto across the Petitioners' property to carry out all District purposes.

5. Public Convenience and Necessity. Public convenience, necessity and welfare will be promoted by the formation of the District, the inclusion of the property described in *Exhibits A*, *B*, and *C* within the District, and the levying of an annual ad valorem tax or annual special assessment upon all of the non-public real property within the District.

6. Fees and Reimbursement. The Petitioners have paid all application fees for the formation of the District and further agree to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the formation of the District.

7. Document Requirements. The Petitioners have previously submitted the following documents to the City's Public Works Department:

a) Street landscaping layout plans.

b) One 24" x 36" copy of the District diagram showing each lot or parcel.

c) A metes and bounds legal description of the District boundary, accompanied by a list of Assessor's parcel numbers within the proposed District and a map showing the District boundary (with back-up material showing that the boundary closes, as necessary).

The Petitioners or the Petitioners' engineer will submit the following documents to the City's Public Works Department concurrently with the submission of this fully executed Petition:

a) Proof of payment of the District application fees.

b) Two 8-1/2" x 11" recordable copies of a legal description of the District boundary and a map showing the District boundary.

8. Expansion of or Annexation to the District. The Petitioners waive any objection to, or protest against, any future enlargement or enlargements of the District and also waive all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioners further waive any objection to, or protest against, the consolidation of the District with any other similar district or districts.

9. Waiver and Consent. The Petitioners, with full knowledge of their rights being waived hereunder, hereby expressly waive:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings resulting in the resolution of intention and the resolution ordering the work relating to the formation of the District;

b) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that result in the adoption of any and all future resolutions of intention, resolutions ordering work, resolutions enlarging the District, and notices pertaining thereto;

c) Any necessity for publication, posting, mailing or recording of the resolution of intention and the notice of proposed improvements pursuant to A.R.S. § 48-578;

d) All protest rights whatsoever under A.R.S. § 48-579(A) and (B), which provide for protests against the work;

e) All objections to the extent of the District under A.R.S. § 48-579(C);

f) All objections to the lack of plans and specifications, the engineer's estimate and an assessment diagram, all which are unnecessary for completion of the District's formation or purpose; and

g) Any necessity for any notice or hearing with respect to land owned by the Petitioners now within the proposed boundaries of the District.

10. Expenses. The Petitioners hereby petition the City Council to provide for the expenses of the District by assessment of the total sum upon the several lots, each respectively in proportion to the benefits to be received by each lot within the District, pursuant to A.R.S. § 48-574(D). The Petitioners further request that no publicly owned land or property owned by a homeowners' association shall be liable to pay any expenses of the District. The Petitioners hereby agree that each non-public parcel within the property proposed to be included in the District receives the same benefits as each other non-public parcel proposed to be included in the District.

11. Waiver of Petition. This Petition shall be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

12. Public Benefit. The operation, maintenance, repair and improvements of parkings, parkways, retention basins and detention basins within, adjacent to, or serving the District is of more than local or ordinary public benefit and the costs and expense thereof should be charged against the property within the District, all of which will benefit thereby.

13. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioners who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

14. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

15. Counterparts. For convenience, this Petition may be executed in one or more counterparts and each executed counterpart shall for all purposes be deemed an original and shall have the same force and effect as an original, but all of which together shall constitute in the aggregate but one and the same instrument.

The Petitioners hereby request the City Council of the City to adopt a resolution of intention to order the proposed improvements and to proceed with the improvements requested herein.

PROPERTY: See Exhibits A, B, and C.

IN WITNESS WHEREOF, the undersigned representatives of the Petitioners have executed this Petition as of the dates shown below.

Buckeye, Arizona 85326

RESOLUTION NO. 98-21

RESOLUTION OF THE COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ACCEPTING A PETITION, WAIVER AND CONSENT TO FORMATION OF A MAINTENANCE IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE; DECLARING THE INTENTION TO FORM A MAINTENANCE IMPROVEMENT DISTRICT; DESIGNATING SUCH DISTRICT AS "CITY OF BUCKEYE MAINTENANCE IMPROVEMENT DISTRICT NO. 2019-MID-006"; AND PROVIDING FOR THE ANNUAL LEVY OF TAXES OR AN ANNUAL ASSESSMENT AGAINST THE LOTS WITHIN THE DISTRICT IN PROPORTION TO THE BENEFITS RECEIVED.

BE IT RESOLVED BY THE MAYOR AND COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. Acceptance and Findings. A Petition for the formation of the City of Buckeye Maintenance Improvement District No. 2019-MID-006 to operate, maintain, repair and improve Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins has been filed with the Clerk and presented to the Mayor and Council at the meeting at which this Resolution was adopted. The Petition is accepted. The Petition purports to be signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders. After verification of such ownership, the Mayor and Council find that the Petition was signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders.

Section 2. Definitions. In this Resolution, the following terms shall have the following meanings:

"*City*" shall mean the City of Buckeye, Arizona.

"*Clerk*" shall mean the Clerk of the City of Buckeye, Arizona located at 530 East Monroe Avenue, Buckeye, Arizona 85326.

"*Detention Basin*" shall mean a flood control structure that captures and diverts stormwater runoff and typically does not retain a permanent pool of water.

"*District*" shall mean the City of Buckeye Maintenance Improvement District No. 2019-MID-006, encompassing the property described in *Exhibits A*, *B*, and *C* attached hereto.

"*Mayor and Council*" shall mean the Mayor and Council of the City.

"*Landscaping*" shall mean trees, plants, grass, ornamental structures, lighting structures and facilities for watering or otherwise maintaining such landscaping that are now in place or hereafter constructed or acquired for beautification of streets within or adjacent to the District.

"*Parking*" shall mean the landscaped public area lying between a sidewalk and the adjacent street.

"*Parkway*" shall mean a street with landscaped sides and/or a landscaped center median and shall also include ornamentation that enhances the beauty of a street.

"*Petition*" shall mean the petition, waiver and consent to formation of a municipal parkway maintenance improvement district by the City on file in the Clerk's office.

"*Public Property*" shall mean any lot or parcel belonging to the United States, the state of Arizona (the "*State*"), any county, city, town, school district or any political subdivision or institution of the State or county that is physically located within the District, including, without limitation any public street, avenue, alley or public easement located within the District hereinafter dedicated to public use.

"*Retention Basin*" shall mean a stormwater control structure that captures and retains stormwater runoff and typically retains a permanent pool of water.

"*Work*" shall mean the operation, maintenance, repair and improvement of Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins.

Section 3. Declaration of Intention to Order Formation of the District. The public interest and convenience require and it is the intention of the Mayor and Council to order the Work through formation of the District pursuant to Title 48, Chapter 4, Article 2, Arizona Revised Statutes. The District's sole purpose shall be for the operation, maintenance, repair and improvement of Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins. For purposes of this Resolution and

of all resolutions, ordinances and notices pertaining hereto, the District shall be known as, and is hereby designated, "City of Buckeye Maintenance Improvement District No. 2019-MID-006".

Section 4. Omission of Public Property from District. Any Public Property or property owned by a homeowners' association that is included within the District shall be omitted from all assessments or taxes hereafter to be made with respect to the District. Additionally, any public streets, avenues, alleys, or public easements hereafter dedicated to public use shall become exempt after such dedication.

Section 5. Statutory Authority. All proceedings pertaining to the District shall be done under and as authorized by Title 48, Chapter 4, Article 2, Arizona Revised Statutes, and all amendments thereto including, without limitation, Section 48-574.

Section 6. Protests and Objections to Extent of District. In the Petition, the signer has made written consents and waivers pertaining to the ordering of the Work and to the formation of the District and has specifically waived all protests against formation of, and objections to, the extent of the District. City staff has verified that all non-public real property owners within the District exclusive of mortgagees and other lienholders have signed the Petition, and the Mayor and Council find as a fact that all such property owners within the District have signed such Petition. Therefore, no publication or posting of any notice pertaining to formation of the District will be made.

Section 7. Engineer's Estimate. The District's sole purpose will be for the operation, maintenance, repair and improvement of Parkings, Parkways, Retention Basins and Detention Basins within, adjacent to, or that serve the District, and public Landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such Parkings, Parkways, Retention Basins and Detention Basins. No engineer's estimate, plans, or specifications have been filed with the Clerk. In the Petition, the signer specifically waived the filing of an engineer's estimate, plans, or specifications.

Section 8. Recordation. A certified copy of this Resolution shall be recorded in the office of the Maricopa County Recorder within ten (10) days of its adoption to give notice of formation of the District, as required by A.R.S. § 48-574(M).

Section 9. Extension for Filing. If either the formation of the District occurs after November 1 of the year preceding the year in which initial assessments are to be levied, or the resolution ordering the Work is not filed with both the Arizona Department of Revenue and the Maricopa County Assessor prior to such November 1, the Mayor and Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Arizona Department of Revenue extend the deadline prescribed by A.R.S. § 42-17257(A) to December 20, 2022.

PASSED AND ADOPTED by the Mayor and Council of the City of Buckeye, Arizona on this 21st day of December, 2021.

Eric W. Orsborn, Mayor

ATTEST:

Lucinda J. Aja, City Clerk

APPROVED AS TO FORM:

Shiela B. Schmidt, City Attorney

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.H. Resolution No. 99-21 Desert Moon Estates Ordering the work Maintenance Improvement District No. 2019-MID-006
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 4
STAFF LIAISON: Scott Lowe, Public Works Director, slowe@buckeyeaz.gov, (623) 349-6815	
DEPARTMENT: Public Works	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 99-21 ordering the work as described in Resolution No. 98-21; ordering the formation of City of Buckeye Maintenance Improvement District No. 2019-MID-006; ordering recording and filing of this Resolution.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
MIDs are formed in the City of Buckeye in accordance with Ordinance #42-06 and assess the owners within a development for the cost of maintenance of the landscaping along the rights-of-ways within a development MID. MIDs are not activated unless the development's owners should fail or otherwise go out of business, since the owner is charged with that maintenance responsibility; however, the MID is standing by as a protection for the City to ensure that there is adequate revenue to take on the maintenance.

BENEFITS:
Maintenance Improvement Districts ensure that only the owners that benefit from the improvements to their community pay for that service. Having the costs of maintenance, repair and improvement of parkways and parks within a District borne by the owners in a development ensure that the revenue needed to fund these costs are always in place. Both Street Lighting Improvement Districts (SLIDs) and Maintenance Improvement Districts (MIDs) provide for the benefit of ensuring that there is a balance of revenue and expenditures to provide for the quality of life for the residents/owners of a particular development without an undue burden upon the existing community.

FUTURE ACTION:
This resolution will be recorded and a conformed copy delivered to the Maricopa County Assessor and the Arizona State Department of Revenue within ten (10) business days of Council action to ensure that this MID is on the tax rolls for fiscal year 2023/2024.

PETITION, WAIVER AND CONSENT TO FORMATION OF A MAINTENANCE IMPROVEMENT DISTRICT BY THE CITY OF BUCKEYE

DESERT MOON ESTATES
2019-MID-006

To: Honorable Mayor and Councilmembers
City of Buckeye, Arizona

Pursuant to Arizona Revised Statutes ("*A.R.S.*") Title 48, Chapter 4, Article 2 (the "*Improvement District Law*"), the undersigned property owners (the "*Petitioners*") respectfully petition the Mayor and City Council (the "*City Council*") of the City of Buckeye, Arizona (the "*City*") to order the formation of a residential municipal maintenance improvement district under the Improvement District Law. In support of this Petition, Waiver and Consent to Formation of a Maintenance Improvement District by the City of Buckeye (this "*Petition*"), the Petitioners agree to waive certain rights under the Improvement District Law and hereby consent to the formation of a residential municipal maintenance improvement district encompassing the land shown on *Exhibits A*, *B*, and *C*, attached hereto and incorporated by reference herein.

1. Name of District. The Petitioners hereby request the proposed district to be named the "City of Buckeye Maintenance Improvement District No. 2019-MID-006" (the "*District*").

2. Area of District. The property comprising the proposed District is described by a legal description, Assessor's parcel numbers, and a map or plat of the area, all as set forth in *Exhibits A*, *B*, and *C*. The proposed District consists of an aggregate of 426 lots, 43 tracts and three un-subdivided parcels which are entirely within the corporate boundaries of the City. The Petitioners respectfully request that the land shown on *Exhibits A*, *B* and *C* be included within the District. The Assessor's parcel numbers set forth in *Exhibit B* are for convenience only. Should either the legal description set forth in *Exhibit A* or the Assessor's parcel numbers set forth in *Exhibit B* conflict with *Exhibit C*, *Exhibit C* shall govern.

3. Ownership. The Petitioners are the sole owners of all non-public real property within the proposed District.

4. Purpose. The District is proposed to be formed for the purpose of providing for operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins within, adjacent to, or that serve the District, and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins. To enhance such purposes the Petitioners grant to the City the public use of all such parkings, parkways, retention basins and detention basins and access thereto across the Petitioners' property to carry out all District purposes.

5. Public Convenience and Necessity. Public convenience, necessity and welfare will be promoted by the formation of the District, the inclusion of the property described in *Exhibits A*, *B*, and *C* within the District, and the levying of an annual ad valorem tax or annual special assessment upon all of the non-public real property within the District.

6. Fees and Reimbursement. The Petitioners have paid all application fees for the formation of the District and further agree to reimburse the City for all reasonable legal and engineering fees and costs incurred by the City with respect to the formation of the District.

7. Document Requirements. The Petitioners have previously submitted the following documents to the City's Public Works Department:

a) Street landscaping layout plans.

b) One 24" x 36" copy of the District diagram showing each lot or parcel.

c) A metes and bounds legal description of the District boundary, accompanied by a list of Assessor's parcel numbers within the proposed District and a map showing the District boundary (with back-up material showing that the boundary closes, as necessary).

The Petitioners or the Petitioners' engineer will submit the following documents to the City's Public Works Department concurrently with the submission of this fully executed Petition:

a) Proof of payment of the District application fees.

b) Two 8-1/2" x 11" recordable copies of a legal description of the District boundary and a map showing the District boundary.

8. Expansion of or Annexation to the District. The Petitioners waive any objection to, or protest against, any future enlargement or enlargements of the District and also waive all notices of such enlargement or enlargements, whether required to be published, posted, or mailed with respect to the later enlargement of the District's boundaries. The Petitioners further waive any objection to, or protest against, the consolidation of the District with any other similar district or districts.

9. Waiver and Consent. The Petitioners, with full knowledge of their rights being waived hereunder, hereby expressly waive:

a) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings resulting in the resolution of intention and the resolution ordering the work relating to the formation of the District;

b) The right to challenge or object to any and all irregularities, illegalities or deficiencies which may exist in the acts or proceedings that result in the adoption of any and all future resolutions of intention, resolutions ordering work, resolutions enlarging the District, and notices pertaining thereto;

c) Any necessity for publication, posting, mailing or recording of the resolution of intention and the notice of proposed improvements pursuant to A.R.S. § 48-578;

d) All protest rights whatsoever under A.R.S. § 48-579(A) and (B), which provide for protests against the work;

e) All objections to the extent of the District under A.R.S. § 48-579(C);

f) All objections to the lack of plans and specifications, the engineer's estimate and an assessment diagram, all which are unnecessary for completion of the District's formation or purpose; and

g) Any necessity for any notice or hearing with respect to land owned by the Petitioners now within the proposed boundaries of the District.

10. Expenses. The Petitioners hereby petition the City Council to provide for the expenses of the District by assessment of the total sum upon the several lots, each respectively in proportion to the benefits to be received by each lot within the District, pursuant to A.R.S. § 48-574(D). The Petitioners further request that no publicly owned land or property owned by a homeowners' association shall be liable to pay any expenses of the District. The Petitioners hereby agree that each non-public parcel within the property proposed to be included in the District receives the same benefits as each other non-public parcel proposed to be included in the District.

11. Waiver of Petition. This Petition shall be deemed to be a petition of more than one-half (1/2) of the taxable property units and more than one-half (1/2) of the assessed valuation within the District and as such shall also be deemed to be a waiver of any and all requirements to file a petition under A.R.S. § 48-576, as amended.

12. Public Benefit. The operation, maintenance, repair and improvements of parkings, parkways, retention basins and detention basins within, adjacent to, or serving the District is of more than local or ordinary public benefit and the costs and expense thereof should be charged against the property within the District, all of which will benefit thereby.

13. Successors and Assigns. To the extent permitted by law, this Petition shall be binding on all successors or assigns of the Petitioners who hereafter own or have an interest in the property described in *Exhibits A*, *B*, and *C* attached hereto.

14. Recordation. This Petition may be recorded in the office of the Maricopa County Recorder and in the office of the Superintendent of Streets of the City.

15. Counterparts. For convenience, this Petition may be executed in one or more counterparts and each executed counterpart shall for all purposes be deemed an original and shall have the same force and effect as an original, but all of which together shall constitute in the aggregate but one and the same instrument.

The Petitioners hereby request the City Council of the City to adopt a resolution of intention to order the proposed improvements and to proceed with the improvements requested herein.

PROPERTY: See Exhibits A, B, and C.

IN WITNESS WHEREOF, the undersigned representatives of the Petitioners have executed this Petition as of the dates shown below.

RESOLUTION NO. 99-21

RESOLUTION OF THE COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ORDERING THE WORK AS DESCRIBED IN RESOLUTION NO. 98-21; ORDERING THE FORMATION OF CITY OF BUCKEYE MAINTENANCE IMPROVEMENT DISTRICT NO. 2019-MID-006; ORDERING RECORDING AND FILING OF THIS RESOLUTION.

WHEREAS, on December 21, 2021, the Mayor and City Council of the City of Buckeye, Arizona (the "*City*") passed and adopted Resolution No. 98-21 (the "*Resolution of Intention*"), which Resolution of Intention declared the Mayor and City Council's intention to form the City of Buckeye Maintenance Improvement District No. 2019-MID-006 (the "*District*"), solely for the purpose of operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins within, adjacent to, or that serve the District, as it now exists or is hereafter dedicated, constructed, modified or enlarged, and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins (collectively, the "*Work*"); and

WHEREAS, a legal description, Assessor's parcel numbers and a map of the proposed District boundaries are attached hereto as *Exhibits A*, *B*, and *C* and incorporated by reference herein; and

WHEREAS, prior to adoption of the Resolution of Intention, a petition (the "*Petition*") for the formation of the District was presented to this Mayor and City Council, which Petition purported to be signed by all of the non-public real property owners in the proposed District, exclusive of mortgagees and other lienholders; and

WHEREAS, the Mayor and City Council accepted the Petition and found that the Petition was signed by all such owners and have verified such finding of such fact; and

WHEREAS, in the Petition the signer waived all protests against the proposed Work, all objections to the extent of the District, and all publication, posting and mailing of the Resolution of Intention and this Resolution; and

WHEREAS, pursuant to A.R.S. §§ 48-574 and -579, the Mayor and City Council hereby find and determine that they have jurisdiction to order the Work of operation, maintenance, repair and improvement of parkings, parkways, retention basins and detention basins and public landscaping, street lights, all headwalls, pumps, piping, canals, washes, ditches, storm drain

inlets, scuppers, dry wells, and other adjuncts and appliances related to such parkings, parkways, retention basins and detention basins that are or hereafter will be within or adjacent to the District as it is described in the Resolution of Intention or is hereafter modified or enlarged, and by this Resolution order the formation of the District described in the Resolution of Intention;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. Ordering the Work and District Formation. All protests against the Work or the formation of the District and all objections to the extent of the District being waived by the owners of all non-public real property within the District, exclusive of mortgagees and lienholders, the Work as described in the Resolution of Intention is hereby ordered and the formation of the City of Buckeye Maintenance Improvement District No. 2019-MID-006 is hereby ordered. The legal description, Assessor's parcel numbers and boundary map of the District are set forth in *Exhibits A*, *B*, and *C*.

Section 2. Excluded Property. No publicly owned land or property owned by a homeowners' association will be liable to pay any portion of the District's costs and expenses. This exclusion shall apply to all public streets, avenues, alleys, or public easements within the District that may hereafter be dedicated to public use.

Section 3. Annual Tax or Annual Assessment. Subject to the restrictions of Section 2 of this Resolution, the City shall annually, commencing in tax year 2023 and for the City's 2023-2024 fiscal year, make annual statements and estimates of the expenses of the District, if any, and shall submit the same to the Board of Supervisors of Maricopa County for the levy and collection of ad valorem taxes upon the assessed value of all taxable property, real and personal, in the District or by equal apportionment of taxes based on the number and classification of properties within the District, and shall publish notice of the statements and estimates, hold hearings on them and adopt them at the times and in the manner provided for an incorporated city's statements and estimates by applicable portions of Title 42, Chapter 17, Article 3, Arizona Revised Statutes, and shall annually set, fix and cause to be levied and assessed the amount to be raised by ad valorem taxes upon all of the taxable property of the District and shall cause to be collected, as county taxes are collected, the amounts shown by the statements and estimates so adopted by the Mayor and City Council. As provided in A.R.S. § 48-574, all statutes providing for the levy and collection of general county taxes, including collection of delinquent taxes and sale of property for nonpayment of taxes, are applicable to the District taxes as provided to be levied by this section.

Section 4. Recording and Filing. The City Clerk is ordered and directed to cause a certified copy of this Resolution to be recorded in the office of the Maricopa County Recorder within ten (10) days of the adoption of this Resolution. The City Clerk is further ordered and directed to file certified copies of this Resolution with the Arizona Department of Revenue (the "*Department*") and the Maricopa County Assessor, as required by A.R.S. § 42-17257, together with all other information prescribed by the Director of the Department relating to the boundaries of newly created taxing jurisdictions.

Section 5. Extension for Filing. If either the formation of the District occurs after November 1 of the year preceding the year in which initial assessments are to be levied, or this Resolution is not filed with both the Department and the Maricopa County Assessor prior to such November 1, the Mayor and City Council hereby request, subject to the November 30 deadline for such request as provided in A.R.S. § 42-17257(B), that the Director of the Department extend the deadline prescribed by A.R.S. § 42-17257 to December 20, 2022.

PASSED AND ADOPTED by the Mayor and Council of the City of Buckeye, Arizona, on this 21st day of December, 2021.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.I. Hassayampa to Liberty 230-kV Transmission Line License Agreement
DATE PREPARED: 12/16/21	**DISTRICT NO.:**
STAFF LIAISON: Paul Lopez, Deputy City Engineer, plopez@buckeyeaz.gov, (623) 349- 6204	
DEPARTMENT: Engineering	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on the License Agreement between the City of Buckeye, as Licensee, and the United States of America Department of Energy, Western Area Power Administration, related to the Hassayampa to Liberty 230-kV Transmission Line; and authorizing the City Manager to execute and deliver said License Agreement on behalf of the City.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 3: A Well-Planned Urban Community

SUMMARY

PROJECT DESCRIPTION:
Requesting approval from council for proposed curbing, signal push buttons and waterline crossing easement that will cross under, over, or across WAPA's Hassayampa to Liberty 230-kV. WAPA concurs and agrees that the Curb, Waterline, and light controls can proposed by the licensee and will not interfere with the operations and maintenance of the described Transmission Line as shown on Exhibits A-1 to A-6.

BENEFITS:
The agreement's benefits include new streetlights, waterline extension, roadway widening, and pedestrian signal improvements.

FUTURE ACTION:
The agreement does not grant any right, privilege, or interest in the land, and Licensee will be responsible for obtaining any necessary land rights from the underlying owner. Any relocation or changes will require additional concurrence by WAPA. The Licensee agrees that if any changes or relocation are involved, WAPA will be at no cost. The Licensee's responsibility is to notify WAPA at least 45 days before commencing maintenance or installation of the facility to WAPA and remain in compliance with standards set forth by the National Electric Safety Code (NESC) and the Occupational Safety and Health Administration standards (OSHA). The license agreement shall terminate upon two years of non-use for the purpose or purposes granted herein.

FINANCIAL IMPACT STATEMENT:

There is no cost to the City of Buckeye.

CURRENT FISCAL YEAR TOTAL COST:
N/A

BUDGETED:
No

Items related to a project or facility location must include an attached vicinity map for Council Review.

Gila & Salt River Meridian, Maricopa County, State of Arizona

Vicinity of Structure(s): 113-2 to 113-3

LICENSE AGREEMENT

THIS LICENSE AGREEMENT is made this _____ day of _____, 2021, between CITY OF BUCKEYE, 530 East Monroe Avenue, Buckeye, AZ, (LICENSEE), whether one or more, and the UNITED STATES OF AMERICA, Department of Energy, Western Area Power Administration (WAPA), represented by the officer executing this License Agreement, pursuant to the Reclamation Act, Act of June 17, 1902, 32 Stat. 388, and acts amendatory thereof and supplementary thereto, and the Department of Energy Organization Act, Act of August 4, 1977, 91 Stat. 565.

WITNESSETH:

WAPA concurs that the Curb, Waterline and light controls (FACILITY) (***as described within the application***) crossing under, over or across WAPA's Hassayampa to Liberty 230-kV Transmission Line, proposed by the LICENSEE, will not interfere with the operation and maintenance of the Hassayampa to Liberty 230-kV Transmission Line, if constructed in the manner and at the locations shown on Exhibits A-1 to A-6, attached hereto and made a part hereof.

In consideration of WAPA's concurrence, the LICENSEE agrees to the following:

(a) This License Agreement does not grant any right, privilege, or interest in the land. The LICENSEE is responsible for obtaining any necessary land rights from the underlying landowner.

(b) This License Agreement is only valid provided the FACILITY is constructed, operated, and maintained in conformance with the attached drawings and/or exhibits. Any relocations, changes, or upgrades require additional concurrence by WAPA. LICENSEE agrees to alter or relocate its FACILITY, at no cost to WAPA, to accommodate future modifications of WAPA's facilities, including but not limited to, upgrades of the transmission line.

(c) LICENSEE shall notify WAPA at least 45 business days prior to commencing maintenance or installation of the FACILITY to permit inspection by WAPA. WAPA's Point of Contact: Terry Kugler, Foreman III at 602-605-2716 or email at kugler@wapa.gov.

(d) To abide by and comply with all applicable Federal, State, and local laws as well as building and safety codes including the latest edition of the National Electric Safety Code (NESC) and Occupational Safety and Health Administration standards (OSHA) applicable to the design and construction of the aforesaid FACILITY.

(e) In accordance with the National Electric Safety Code (NESC), a clearance of 15 feet from transmission line conductors to the top of equipment must be maintained at all times.

(f) Induced voltages and currents may occur on the FACILITY constructed or placed under or near high voltage transmission lines. The LICENSEE shall be responsible for the protection of personnel and equipment in their design, construction, operation, and maintenance of the FACILITY described in this License Agreement.

(g) Indemnify and hold harmless WAPA, its employees, or agents, from any loss or damage and from any liability on account of personal injury, death, or property damage arising out of LICENSEE's, its agents, contractors, or subcontractors use of the land covered by this License Agreement.

(h) WAPA requires unimpeded access to its right-of-way at all times. WAPA uses vehicles that have a 42 kip (42,000 pounds) axle load and is not liable for any damage caused to the FACILITY when patrolling, performing maintenance, or reconstructing the transmission line.

(i) No appreciable change shall be made to the character of the existing topography. Safe conductor phase-to-ground clearance must be maintained at all times. Steep sloping which will impede heavy line equipment and vehicles from traversing the lands within the transmission line right-of-way shall not be allowed. The gradient must not be steeper than 6:1 run to rise.

(j) This License Agreement shall terminate upon two consecutive years of non-use for the purpose or purposes granted herein.

(k) Light standards shall not exceed fifteen (10) feet in height (including base and pole). In addition, do not place light standards directly under the transmission line conductors (wires) and make field adjustments as necessary.

(l) Upon completion of the project, the Licensee will submit a copy of the as-builts and/or photographs of the FACILITY to WAPA Lands (P.O. Box 6457, Phoenix, AZ 85005-6457).

Remainder of Page left blank intentionally.

(m) This License Agreement shall be binding on the successors or assigns of the LICENSEE and WAPA.

GENERAL PERMITTING NOTES

1. ALL CONSTRUCTION IN THE PUBLIC RIGHTS-OF-WAY OR IN EASEMENTS GRANTED FOR PUBLIC USE MUST CONFORM TO THE LATEST MARICOPA ASSOCIATION OF GOVERNMENTS (MAG) UNIFORM STANDARD SPECIFICATIONS AND UNIFORM STANDARD DETAILS FOR PUBLIC WORKS CONSTRUCTION AS AMENDED BY THE LATEST VERSION OF THE CITY OF BUCKEYE DESIGN STANDARDS. IF THERE IS A CONFLICT, THE CITY OF BUCKEYE STANDARDS WILL GOVERN.
2. THE APPROVAL OF THE PLANS IS VALID FOR ONE (1) YEAR FROM THE DATE OF THE CITY ENGINEER'S SIGNATURE. IF AN ENCROACHMENT PERMIT FOR THE CONSTRUCTION HAS NOT BEEN ISSUED WITHIN ONE (1) YEAR, THE PLANS MUST BE RESUBMITTED TO THE CITY FOR REAPPROVAL.
3. A CITY OF BUCKEYE INSPECTOR WILL INSPECT ALL WORKS WITHIN THE CITY OF BUCKEYE RIGHTS-OF-WAY AND IN EASEMENTS. NOTIFY THE CITY 24 HOURS PRIOR TO THE INSPECTION BY CALLING (623) 349-6248.
4. CITY PERMITS ARE REQUIRED FOR ALL WORK IN PUBLIC RIGHTS-OF-WAY AND EASEMENTS GRANTED FOR PUBLIC PURPOSES. A CITY PERMIT WILL BE ISSUED BY THE CITY ONLY AFTER ALL FEES HAVE BEEN PAID AND THE PERMIT HAS AN APPROVED MARICOPA COUNTY ENVIRONMENTAL SERVICES DUST PERMIT AND AN APPROVED STORM WATER POLLUTION PREVENTION PLAN ATTACHED. THE SWPPP SHALL COMPLY WITH ALL FEDERAL, STATE, AND LOCAL REQUIREMENTS.
5. COPIES OF ALL PERMITS AND MOST RECENT APPROVED PLANS MUST BE RETAINED ON-SITE AND BE AVAILABLE FOR INSPECTION AT ALL TIMES. FAILURE TO PRODUCE THE REQUIRED PERMITS AND PLANS WILL RESULT IN IMMEDIATE SUSPENSION OF ALL WORK UNTIL PROPER PERMIT DOCUMENTATION AND/OR PLANS ARE OBTAINED. ALL OF THESE REQUIREMENTS APPLY TO ONSITE GRADING AND IMPROVEMENT PLANS.

CITY OF BUCKEYE GENERAL CONSTRUCTION NOTES

ALL CITY OF BUCKEYE GENERAL NOTES AND UTILITY NOTES ARE ACCESSIBLE ON THE CITY OF BUCKEYE WEBSITE AT www.buckeyeaz.gov, UNLESS OTHERWISE ATTACHED.

STREET LIGHT NOTES

1. ALL MATERIALS AND CONSTRUCTION SHALL CONFORM TO THE REQUIREMENTS OF THE SPECIFICATION.
2. POLE SHALL COMPLY WITH CURRENT AASHTO LOADING REQUIREMENTS FOR STRUCTURAL SUPPORTS FOR HIGHWAY SIGNS, LUMINAIRES, AND TRAFFIC SIGNALS.
3. REFER TO BUCKEYE DETAIL FOR ANCHOR BOLT DETAILS.
4. THE FOUNDATION HOLE SHALL BE AUGERED AND MAG CLASS "A" (3,000 PSI) CONCRETE, POURED AGAINST UNDISTURBED COMPACTED EARTH.
5. UNSTABLE SOIL AND / OR A STEEP SLOPE WILL REQUIRE A DEEPER FOUNDATION. REFER TO MANUFACTURE REQUIREMENTS, DESIGN PLANS, AND SPECIAL PROVISIONS FOR DETAILS.
6. EACH POLE SHALL HAVE AN 10' X 5/8" COPPER CLAD GROUND ROD, DRIVEN OUTSIDE THE AREA EXCAVATED FOR THE POLE APPROXIMATELY 18" FROM POLE GROUND RODS SHALL BE LOCATED IN THE CITY OF BUCKEYE JUNCTION BOX. A #6 BARE COPPER LEAD SHALL BE USED BETWEEN THE GROUND ROD AND THE LANDING LUG IN HAND HOLE.
7. THE POLE SHALL BE STRAIGHT PIPE.
8. ALL WELDS SHALL BE GROUNDED SMOOTH, AND ALL BURRS AND SHARP EDGES SHALL BE REMOVED PRIOR TO ANY PAINTING.
9. ALL DIMENSIONS ARE NOMINAL.
10. REFER TO PLAN DETAILS FOR VARIATIONS IN POLE APPLICATIONS.
11. AT NO TIME SHALL SLIP-BASE POLES, BASES, FOUNDATIONS, ect. BE PERMITTED FOR USE.
12. A METAL TAG SHALL BE PERMANENTLY ATTACHED WITH RIVETS TO THE POLE ABOVE THE HAND HOLE STATING THE MANUFACTURERS NAME, POLE TYPE, MAST ARM TYPE, WATTAGE, AND DISTRUBUTION TYPE PER THE STREETLIGHT PLANS AND CITY DETAIL #6. ALL OTHER ITEMS SHOULD BE ATTRIBUTES IN THE DATA BASE. APS WILL PROVIDE POLE NUMBERS PER THE UTILITIES REQUIREMENTS.
13. A HAND HOLE COVER LOCKING DEVICE SHALL BE USED.
14. THE HAND HOLD SHALL BE 3"X5", AND THE COVER PLATE WILL BE AT LEAST 16 GAUGE.
15. POLE GROUND SHALL BE 5/16" DIA X 10' COPPER CLAD GROUND ROD PER CITY DETAIL #6
16. HAND HOLE SHALL BE ORIENTED SO THAT IT IS ALIGNED WITH THE MAST ARM AND AS FAR FROM VEHICULAR TRAFFIC AS POSSIBLE.
17. HAND HOLE HEIGHT TO BE 2'-6" FOR BASE MOUNTED POLE & 3'-6" FOR DIRECT BURIED POLES FROM CENTER OF HAND HOLE TO THE BASE PLATE OF THE POLE.

BUCKEYE, AZ	CITY OF BUCKEYE STANDARD DETAIL	ROADWAY POLE AND LUMINAIRE SPECIFICATIONS	DATE:	DETAIL #7 1 OF 2

STREET LIGHT NOTES

18. HAND HOLE COVER MAY BE RECTANGULAR SHAPE OR OVAL SHAPE.
19. ANCHOR BOLTS SHALL CONFORM TO THE POLE MANUFACTURER'S STANDARDS AND BE MINIMUM ASTM F 1554 GRADE 55 STEEL.
20. ALL ANCHOR BOLTS, NUTS, AND WASHERS SHALL BE FULLY GALVANIZED PER ASTM A153.
21. REBAR SHALL BE PER ASTM A 615 LATEST EDITION GRADE 60 AND SHALL BE TIED TOGETHER. NO TACK WELDING ALLOWED.
22. REBAR SHALL NOT BE SET CLOSER THAN 3" TO ANY EXTERIOR SURFACE.
23. THE TOP OF THE POLE FOUNDATION AND PULLED BOXES SHALL MATCH EXISTING SIDEWALK GRADE WHEREVER POSSIBLE. IF NO SIDEWALK EXISTS THAN THE POLE FOUNDATION SHALL EXTEND 1" ABOVE THE FINISHED GRADE. PULL BOXES SHALL BE SET TO MATCH THE EXISTING SLOPE.
24. PULL BOXES SHALL HAVE BOLTS INSTALLED PRIOR TO ENERGIZING. THE BOLTS SHALL BE A SECURITY TYPE REQUIRING A SPECIALIZED TOOL TO REMOVE. MINIMUM OF PENTA-HEAD STYLE BOLTS SHALL BE REQUIRED.
25. COMPACTION BENEATH AND AROUND THE PULL BOXES SHALL BE A MINIMUM OF 95 PERCENT PER MAG SPECS. SECTION 601.
26. THE PULL BOX COVER SHALL READ " C.O.B. STREET LIGHTING"
27. POLE OFFSET SHALL COMPLY WITH THE POLE SCHEDULE AND DESIGN PLANS. FIELD ADJUSTMENTS MAY BE PERMITTED AT THE DISCRETION OF THE DESIGN ENGINEER.
28. CONDUIT SHALL EXTEND A MINIMUM OF 2" ABOVE THE FOUNDATION.
29. THE USE OF CONDUIT CAPS SHALL BE REQUIRED TO KEEP THE SWEEP FREE FROM DIRT AND DEBRIS DURING THE FOUNDATION CONSTRUCTION. **DO NOT GLUE ON CAPS.**
30. IF THE STREETLIGHT IS PLACED IN SIDEWALK, EXTEND THE ANCHOR BOLTS TO THE MAXIMUM OF 3¼" ABOVE THE FOUNDATION.
31. THE CONCRETE FOUNDATION SHALL BE POURED IN DRILLED HOLES. USE OF A MINIMUM 18" DEEP SONOTUBE AT THE TOP OF THE FOUNDATION IS REQUIRED TO PROVIDE A UNIFORM AND CONTROLLED FOUNDATION.
32. THE FOUNDATION TEMPLATE SHALL BE REMOVED AFTER THE CONCRETE HAS SET.
33. THE FOUNDATION SHALL BE TROWELED SMOOTH WITH A SLIGHT SLOPE TO PROMOTE MOISTURE RUNOFF FINISH WITH ½" ROUNDED EDGE.
34. IF STREET LIGHT POLE FOUNDATIONS ARE TO BE PLACED IN A CONCRETE PAD (SIDEWALK, HANDI-CAP RAMP) THERE SHALL BE A ½" PIECE OF EXPANSION MATERIAL BETWEEN THE FOUNDATION AND THE CONCRETE PAD.
35. WIRE FROM JUNCTION BOX TO LAMP SHALL BE 2-#14Cu-THWN-2 AND 1#14 BARE COPPER GROUND. COLORED PER THE NEC REQUIREMENT.
36. JUNCTION BOX TO CONTAIN 10 AMP WATER TIGHT 10AMP FUSE IN 65U BREAK AWAY FUSE HOLDER ON EACH POWER CONDUCTOR. FUSE IN HAND HOLE IS NOT REQUIRED BY THE CITY OF BUCKEYE.
39. ALL STREETLIGHTS SHALL BE INSPECTED BY A CITY OF BUCKEYE INSPECTOR.
40. ALL STREETLIGHTS MUST HAVE A 3 DAY BURN PERIOD PRIOR TO INSPECTION.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.J. Buckeye Aquatics Center Pool Deck Surfacing Project
DATE PREPARED: 12/16/21	**DISTRICT NO.:** All
STAFF LIAISON: Chris Williams, Construction and Contracting Manager, cwilliams@buckeyeaz.gov, (623)-349-6225	
DEPARTMENT: Construction and Contracting	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on the Sole Source procurement of a premium rubber surfacing for the Buckeye Aquatics Center Pool Deck from RubCorp Distribution LLC, with a total expenditure not to exceed $227,150.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
The Construction and Contracting division is recommending RubCorp Distribution LLC, to provide products, installation and warranty through a "Sole Source" procurement of Rubcorp's premium rubber surfacing for the Buckeye Aquatics Center Pool deck. The collective installation experience of Rubcorp Distribution LLC has led to an accumulation of proprietary and exclusive techniques, procedures, assessments and products that have no comparison within the rubber surfacing industry. These elements combined with the attributes of the Rubcorp Rubber Surfacing Systems lead to the conformed conclusion that there is no alternative combination of surfacing system and installation practices that can be compared in a relative sense to best suit the requirements of the City Aquatic Center pool deck. The expenditure is not to exceed $227,150.00.

BENEFITS:
The performance and durability of the Rubcorp system leads to a long-lasting surface that will eliminate budgeting for regular reapplications and leads to a cost-effective option for reduced maintenance and customer satisfaction for the Buckeye Aquatic Center.

FUTURE ACTION:
Once approved, the Construction and Contracting will issue a Notice to Proceed (NTP) and Purchase order to obligate funds.

FINANCIAL IMPACT STATEMENT:
The project will be paid through the current fiscal year's budget by Fund/Department. The expenditure is not to exceed $227,150.00 for FY 2021/2022.

CURRENT FISCAL YEAR TOTAL COST:
$227,150.00

BUDGETED:
Yes

FISCAL YEAR:
FY 2021/2022

FUND/DEPARTMENT:
10003172-540040

Items related to a project or facility location must include an attached vicinity map for Council Review.

Pool Deck - Safety Rubber Surfacing Quote.pdf

CITY OF BUCKEYE
SOLE-SOURCE OR NON-COMPETITIVE
PROCUREMENT APPROVAL REQUEST
FOR COMMODITIES AND SERVICES

(Commodity: something that is bought and sold, especially a manufactured product or raw material)

1. **City Department making the request:** Public Works Division

   Requestor's name: Robert Linton and Scott Tijerina

   Requestor's phone: Robert 623-349-8057 and Scott 623-765-4859

2. **Description of commodities/services to be purchased:** Supply & Install Rubcorp Destination line premium rubber surfacing for COB Aquatics Center Pool Deck.

3. **What are the requirements of <u>this</u> purchase?**

   Council approval for the expenditure approved in the Fiscal 2021/2022 Budget. Once approved, the Construction and Contracting Division will place an order with Rubcorp for the product and installation. The project must be completed prior to Aquatic Center opening.

4. **Describe the unique circumstances believed to justify this purchase a sole-source or non- competitively solicited commodity or service:**

   Rubcorp proprietary processes and products to include Rubcorp training academy, Rubcorp Primer, Rubcorp swipe stick, Resin to Rubber ratio, RC-11 Topcoat, Rubcorp destinations and Rubber Surfacing Systems attributes summarized in attached document.

5. **Describe the unique experience/qualifications this potential vendor possesses that pertain to the commodities/services required:**

   Rubcorp has developed a process of specialized methods and techniques, as well as product innovations that provide their surfaces to stand apart in both endurance and experience. The collective installation experience of Rubcorp Distribution LLC has led to an accumulation of proprietary and exclusive techniques, procedures, assessment and products that have no comparison within the rubber surfacing industry. (See attachment)

6. **Describe the efforts/activities undertaken to identify other potential vendors:**

   The Public Works Division researched multiple Companies that supply surfaces for pool deck to address issues with moisture. A rubber decking is the latest technology utilized on public pool decks. The rubber product reduces slip liability, surface drainage and is flexible in order to avoid cracks, chipping from moisture coming up through concrete. The installation, products, technique are proprietary to Rubcorp.

7. **What is the estimated value of the commodities being purchased?** $227,150.00

8. **Note term of potential relationship:**

   (a) Vendor relationship will be ongoing: Yes __x__ No _____

9. **Is installation required?** Yes __x__ No _____

CITY OF BUCKEYE
SOLE-SOURCE OR NON-COMPETITIVE
PROCUREMENT APPROVAL REQUEST
FOR COMMODITIES AND SERVICES

Public Works Division (Requesting Department) Hereby requests approval for Rubcorp/ Robert Linton (Proposed Vendor/Individual)

to be designated a sole source to provide the specific goods, work/services for the amount and term as described above.

Requestor's Information:

Requestor's Name (Print): Robert Linton	
Requestor's Signature:	
Requestor's Title: Public Works Operations Manager	Date: 11/24/2021

Department Head Validation:

Department Head Name (Print): Scott Lowe	
Dept. Head Signature	Date: 11/24/2021

Please consider this memo as my approval of this request. The exemption is granted pursuant to ARS 41-2536 and 3-4-21 of the City of Buckeye Procurement Code, based upon information provided and is contingent upon the accuracy of such information. This exemption may be rescinded in the event reliable information becomes available upon which I am able to determine that the goods or services sought may in fact be contracted for in a more effective manner.

AUTHORIZED BY: CA Williams — Manager, Construction and Contracting

Signature: Chris Williams City Manager/Procurement Officer	Date: 11/24/2021

Distribution:

1. Original - City Manager's file
2. Copy 1- Requestor
3. Copy 2 - Requestor provides for Department Head
4. Copy 3 - Include in receiving package when forwarded to A/P for payment
5. Other copies distributed as appropriate

DATE: November 17, 2021

SUBJECT: **SUMMATION OF INTELLECTUAL AND PROCEDURAL PROPRIETY AND EXCLUSIVITY**

Overview of Rubcorp Rubber Surfacing Systems

Rubcorp Rubber Surfacing Systems are comprised of specified components, which are combined in a proprietary quantity and procedure, and applied using a hand-troweled technique, and is supplemented by a series of additional products and procedures depending on the application.

Rubcorp Exclusive Surfacing Components

The materials used for the installation of Rubcorp Rubber Surfacing Systems are sourced from a small number of manufacturing facilities which have undergone onsite inspection and been vetted by our Executive Team. Rubcorp Distribution LLC does not procure, offer, or utilize systems components that do not meet our specifications for raw material sourcing, manufacturing process, and packaging material and procedure. Only premium products are used and undergo standardized QA/QC testing updates. The primary components, points of inspection, and specified variances for Rubcorp Rubber Surfacing Systems are as follows:

- **Rubcorp Specific EPDM** *(Rubber Granules)*
  - No natural rubber is used as a part of our dedication to environmentally sustainable construction practices.
  - No recycled materials used, thereby avoiding harmful toxins and compromised material purification of other systems
  - Sulphur cured coloring that is vulcanized, and moisture cured to eliminate color loss after installation
  - Weight-based coloring to ensure accuracy and consistency
  - Non-permeable and encapsulated granular formation preventing the possibility of chemical penetration
  - Specified polymer content for optimal balance between durability and texture
  - 9 redundant dust removal systems and procedures to maximize system integrity
  - Deliberate granular structure allowing for highly durable and intentional water porous surfacing system

- **Rubcorp Family of Resins** *(Polyurethane Binder)*
  - *Although one-part polyurethane binding agent is used throughout the rubber surfacing industry, Rubcorp incorporates a specific design for optimal performance for pool decks.*
  - Transparent and specified additives ensure the prevention of "whitening" and flaking
  - Custom-blending allows for flexible working time in a wide range of temperatures and humidity
  - Specific and time-tested ratio of resin to rubber to maximize longevity
  - **Rubcorp UV** – an aliphatic binder that is **exclusive** and uniquely resistant to elevated exposures to ultraviolet spectrum
    - Industry best durability in "ultraviolet hot zones."

Rubcorp Distribution LLC
801 Hammond Street
Suite 375
Coppell, Texas 75019

    - Eliminated discoloration resulting from the chemical reaction of ultraviolet light ("ambering")
- **Rubcorp XTRM** – an aromatic binder that is unique and specific to Rubcorp Rubber Surfacing Systems.
    - Formulated for use in commercial installations, provides for the most durable rubber surfacing system available while allowing for the attributes of the system to remain.

Rubcorp Proprietary Processes and Products

Possessing more than 3 million square feet of experience in rubber surface installation experience, Rubcorp has developed a stable of specialized methods and techniques, as well as product innovations that provide their surfaces to stand apart in both endurance and experience. Some of the following items are the details that place Rubcorp Rubber Surfacing Systems in an entirely separate category of surfacing and are ONLY available through Rubcorp:

- **Rubcorp Academy** – training is a pillar that elevates the prevalence of the Rubcorp Rubber Surfacing System. As a hand-crafted system, it is skill more than procedure that has solidified the trust of the most influential luxury and recreational brands across the globe. The curriculum of this institution is based on the experience of the staff. The techniques are not only taught but are practiced by the installation teams from Rubcorp in the most exclusive resorts, venues, professional athletic institutions, federal and municipal facilities, and beyond. These techniques are exclusive to Rubcorp and are executed across North America and many regions beyond.

- **Rubcorp Primer** – a registered trademark and proprietary blend of diluted polyurethane binder; this element is centric to surface stability and integrity. This industry specific priming solution is not an adhering product but penetrates the porous substrate and provides for the surface to chemically cure, leading to a system that will enhance the structural stability of the substrate and elongate the life of the surface in its combined entirety.

- **Rubcorp Swipe Stick** – a simple tool developed from those who have most directly interacted with the installation of rubber surfacing systems. This trademarked item is exclusive to Rubcorp and its trained installation partners and is essential to the procedural step that solidifies the enduring reputation of the Rubcorp Rubber Surfacing System. "Closing" is the final iteration of the Rubcorp installation procedure that forms the completed surface that secures its systems. Compacting the granulated rubber within the system and to the primed substrate is a globally unique finish that has no competitor.

- **Resin-to-Rubber Ratio** – the combination of the environmentally indicated binder with the premium granulated EPDM rubber granule blend has been tested and tried across millions of square feet of installed surfacing to provide a recipe that is specified for its outlasting performance through intensely tested venues.

- **RC-11 Topcoat** – a revolution in the resurfacing industry, RC-11 is a 2-part clear coating that has never been used in conjunction with a rubber surfacing system. Through years of research and development, RC-11 has proven to be a revolutionary product that coats the system without reducing porosity while easing maintenance, adding durability, elongating endurance, and enhancing aesthetic; maintains the coefficient of friction beyond established indicators that place safety at the forefront of consideration.

- **Rubcorp Destinations** – a dedicated line of installation that focuses the attributes of the Rubcorp Rubber Surfacing System to the potential liability, maintenance challenges, desired tranquility, and luxury experience of the most pragmatic municipalities and exclusive private resorts throughout the U.S., Mid-Atlantic, Caribbean, Canadian, European, and Central American regions of the world.

Rubcorp Rubber Surfacing System – Attributes

Defining the individual components of the Rubcorp Rubber Surfacing Systems in terms of specificity and premium quality leads to a combined system which provides an unparalleled number of attributes relative to all other surfacing options. The attributes of the Rubcorp Destinations surfacing system can be summarized as follows:

- **Anti-Microbial, Anti-Fungal, Anti-Parasitic**
  - Opportunistic organisms cannot exist or grow
- **Acoustic Absorbent**
  - Noise cancelling reverberation equivalent to recording studio
- **Thermal Conductivity**
  - Never reaches a temperature that cannot be engaged by bare skin
- **Anti-Slip**
  - Coated with RC-11 or uncoated, far exceeds risk management requirement for slip/falls and liability
- **Impact Absorbent**
  - In the rare case of falls, result in a "bruise-not-break" impact
- **Maintainability and Safety**
  - Following maintenance and stain-removal procedures leads to a long-lasting surface that will eliminate budgeting for regular reapplication, and lead to an extremely cost-effective option that reduces budgetary dedication and creates surplus funding relative to liability, safety, and maintenance.

Rubcorp Rubber Surfacing System – Summary

The collective installation experience of Rubcorp Distribution LLC has led to an accumulation of proprietary and exclusive techniques, procedures, assessments, and products that have no comparison within the rubber surfacing industry. These elements combined with the attributes of the Rubcorp Rubber Surfacing Systems lead to the conformed conclusion that there is no alternative combination of surfacing system and installation practices that can be compared in a relative sense.

The performance and durability of the Rubcorp system provides the very best in liability protection and post-installation support, reduced maintenance, and customer satisfaction!

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.K. City of Buckeye Municipal Airport Master Plan Proposal
DATE PREPARED: 12/16/21	**DISTRICT NO.:** all
STAFF LIAISON: Chris Williams, Construction and Contracting Manager, cwilliams@buckeyeaz.gov, (623) 349-6225	
DEPARTMENT: Construction and Contracting	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Task Order No. 1 (Contract 2017-013-001) between the City of Buckeye, an Arizona municipal corporation, and Dibble Engineering, an Arizona corporation, to provide planning services for the update to the Master Plan at Buckeye Municipal Airport; and authorizing the Mayor to execute and deliver said Task Order on behalf of the City.

RELEVANT GOALS:
GOAL 4: Adequate, Well-Maintained and Well-Planned Public Infrastructure

ADDITIONAL RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:
The Construction and Contracting division is recommending Dibble Engineering to provide Planning services through Task Order No. 1 (Contract 2017-013-001) for the update to the Master Plan at the Buckeye Municipal Airport with an expenditure not to exceed $446,185.00. The Master Plan will address the Airport's operational, maintenance and improvement considerations, development priorities, natural environment and land use compatibility and factors related to proper financial management to meet operational and capital improvement fiscal goals. To accomplish this effort, the Master Plan will follow FAA guidance and address short, medium and long-term plans for airport development to include Public involvement, Inventory of existing conditions, Aviation activity forecasts, Facility requirements with Capacity analysis, Preparation of long-range Capital improvement, Airport layout plans and Executive summary brochure.

BENEFITS:
The Master Plan Study will be a long-term, comprehensive development plan that meets the Airport's unique goals, objectives and complies with all relevant Federal Aviation Administration (FAA) requirements. The Study will seek to address the Airport's operational, maintenance and improvement considerations, development priorities, natural environment and land use compatibility and factors related to proper financial management to meet operational and capital improvement fiscal goals.

FUTURE ACTION:
Once approved, the Construction and Contracting Division will issue a Notice to Proceed (NTP) and Purchase order to obligate funds. The Consultant will conduct an in-person project kickoff meeting with the City. The meeting is intended to ensure all project team members clearly understand the goals for

the project, scope of services, project schedule, Outreach and Communication with internal and external stakeholders, as well as the public, to provide knowledge and support for the resulting study.

FINANCIAL IMPACT STATEMENT:
Task Order No. 1 (Contract 2017-013-001) will be paid through the current fiscal year's budget by Fund/Department. The expenditure is not to exceed $446,185.00 for FY 2021-2022.

CURRENT FISCAL YEAR TOTAL COST:
$446,185.00

BUDGETED:
Yes

CITY OF BUCKEYE
ON-CALL CONSULTING FOR
AIRPORT PLANNING SERVICES

CONTRACT #: 2017-013-001

THIS CONTRACT, ("Contract") is entered into by and between the CITY OF BUCKEYE, an Arizona municipal corporation, hereafter called (the "CITY") and Dibble Engineering an Arizona corporation hereafter called "CONSULTANT".

RECITALS

The CITY OF BUCKEYE, Arizona, is authorized and empowered by the City Code to execute contracts

NOW, THEREFORE, in consideration of the premises and the mutual promises herein contained, The City and Consultant agree as follows:

This Contract shall be in full force and effect only when it has been approved as required by the City Code and executed by the duly authorized City officials.

1.0 SCOPE OF SERVICES

The City desires to obtain Professional On-Call Airport Planning Services for Airport Improvement projects. In accordance with the contract documents, a specific scope of services and fee proposal shall be negotiated for each project and be executed by individual Task Orders. Services provided by the Consultant under this agreement shall be performed in a manner consistent with that degree of care and skills ordinarily exercised by members of the same profession currently practicing under similar conditions.

The Consultant shall perform all services within the cost and time frames defined in executed Task Orders, and comply in all respect, as described herein for the consideration stipulated, and in compliance with applicable Federal, State and City Codes. Services at the City's request may include, in general, but are not limited to the following:

On-Call Airport Planning Services:

- Proficiency in On-Call Engineering- Airport Planning Services
- Preparation of Airport Master Plans
- Airport layout plans and drawings
- Knowledge of all applicable Federal Aviation Administration and Arizona Department of Transportation guidelines for airport and related grant administration
- Aircraft noise studies
- Airport Facilities Planning

- Land use Compatibility Planning
- Cost/Benefit Studies for Airport Improvement Grants
- General planning and estimating services
- Prepare planning and environmental documentation to Federal Aviation Administration (FAA)
- Work in accordance with Federal Aviation Administration (FAA) and Arizona Department of Transportation (ADOT) standards.
- Meet all Federal, State, City, FAA advisory Circulars, National Environmental Policy Act (NEPA) and Arizona Environmental statues.
- Preliminary Environmental review/analysis for proposed developments
- Preliminary Wildlife Hazard Mitigation plans
- Quantitative Air Analysis study
- Biological or cultural resource surveys
- Preparation of Documented Categorical Exclusion (Catex)

A detailed scope of services will be prepared for each individual project by the Consultant and submitted to the City. Requests for services will be issued in the form of a written Task Order ("Task Order") document initiated by the Manager, Construction and Contracting. The Task Order will include a description of the project, detailed scope of services, project schedule, and the approved fee. The Consultant should receive prior approval from the Manager, Construction and Contracting prior to commencement of services on project assignments released under this Contract.

2.0 FEES AND PAYMENTS

2.1 REGISTRATION REQUIREMENT IN VENDOR SELF SERVICE (VSS)

In order to do business with the City, register at https://selfservice.buckeyeaz.gov/MSS Please be aware vendors that do not register and verify their information, including uploading a W-9 form to their profile, may experience delays in processing of invoices and will not be able to do business with the City.

2.2 FEE SCHEDULE

Consultant shall be paid according to the schedule set forth in Exhibit A. Each "Task Order" over One Hundred Thousand Dollars ($100,000.00) shall be subject to City Council Approval.

2.3 PAYMENT APPROVAL

The time spent for each task shall be recorded and submitted to the Contract Administrator. Consultant shall maintain all books, papers, documents, accounting records and other evidence pertaining to time billed and to costs incurred and make such materials available at all reasonable times during the contract period.

Monthly payments shall be made to the Consultant on the basis of a progress report prepared and

submitted by the Consultant for work completed through the last day of the preceding calendar month. Each task shall be subject to review and approval by the Contract Administrator to determine acceptable percentage of completion.

The Contract Administrator reserves the exclusive right to determine the amount of work performed and payment due the Consultant on a monthly basis.

All charges must be approved by the Contract Administrator prior to payment.

3.0 GENERAL TERMS AND CONDITIONS

3.1 CONTRACT ADMINISTRATOR

The Contract Administrator for the City shall be the Purchasing Agent, in the Construction and Contracting Division or designee. The Contract Administrator shall oversee the performance of this Contract; assist the Consultant in contacting members associated with the project, audit billings, and approve payments.

The Consultant shall submit all reports and special requests through the Contract Administrator.

3.2 TERM OF CONTRACT

The Contract initial term is established for a term commencing on the date of execution and ending the same date in 2019, with automatic renewals, unless otherwise terminated by either party, for four (4) additional one-year terms. Consultant shall provide services under the contract for specific project assignments with a Task Order issued no later than the final day of the effective Contract terms.

3.3 TERMINATION OF CONTRACT

The City has the right to terminate this Contract or abandon any portion of a Task Order, which has not been performed by the Consultant.

Termination for Convenience: City and Consultant reserve the right to terminate this contract or any part hereof for its sole convenience with thirty (30) days written notice. In the event of such termination, Consultant shall immediately stop all work hereunder, and shall immediately cause any of its suppliers and SubConsultants to cease such work. As compensation in full for services performed to the date of such termination, the Consultant shall receive a fee for the percentage of services actually completed. This fee shall be in the amount to be mutually agreed upon by the Consultant and the City, based on the agreed Scope of Work and the value to the City of the services completed. If there is no mutual agreement, the Contract Administrator shall determine the percentage of completion of each task detailed in the Scope of Work and the Consultant's compensation shall be based upon such determination. The City shall make this final payment within sixty (60) days after the Consultant has delivered the last of the partially completed items. Consultant shall not be paid for any work done after

receipt of the notice of termination, or for any costs incurred by Consultant's suppliers or SubConsultants, which Consultant could reasonably have avoided.

Termination for Cause: City may also terminate this contract or any part hereof with seven (7) days written notice for cause in the event of any default by the Consultant, or if the Consultant fails to comply with any of the material terms and conditions of this contract. By way of example and not limitation, unsatisfactory performance as judged by the Contract Administrator and failure to provide City, upon written request, with adequate assurances of future performance shall all be causes allowing City to terminate this contract for cause. In the event of termination for cause, CITY shall not be liable to Consultant for any amount after the issuance of written notice, and Consultant shall be liable to City for any and all damages sustained by reason of the default that gave rise to the termination.

In the event Consultant is in violation of any Federal, State, County or City law, regulation or ordinance, the City may terminate this contract immediately upon giving written notice to the Consultant.

In the event the City shall terminate this Contract or any part of the services as herein provided, the City shall notify the Consultant in writing, and immediately upon receiving such written notice, the Consultant shall discontinue advancing the work under this Contract and/or awarded Task Order.

Upon such termination or abandonment, the Consultant shall deliver to the City all drawings, special provisions, field survey notes, reports, and estimates, entirely or partially completed, in any format, including but not limited to written or electronic media, together with all unused materials supplied by the City.

The Consultant shall appraise the work it has completed and submit its appraisal to the City for evaluation.

If through any cause, the Consultant shall fail to fulfill in a timely and proper manner its obligations under this Contract, or if the Consultant shall violate any of the covenants, agreements, or stipulations of this Contract, the City may withhold any payments to the Consultant for the purpose of setoff until such time as the exact amount of damages due the City from the Consultant is determined.

3.4 FUNDS APPROPRIATION

If the City Council does not appropriate funds to continue this Contract and pay for charges hereunder, the City may terminate this Contract at the end of the current fiscal period, or at the time that funds are no longer available to meet the City's payment obligations hereunder. The City agrees to give written notice of termination to the Consultant at least thirty (30) days prior to any termination for a lack of funds and will pay to the Consultant all approved charges incurred prior to Consultant's receipt of such notice, subject to the availability of funds therefore.

3.5 AUDIT

The City may audit all of the Consultant's records, calculations, and working documents pertaining to this work at a mutually agreeable time and place.

Consultant's records (hard copy, as well as computer readable data), and any other supporting evidence deemed necessary by the City to substantiate charges and claims related to this contract shall be open to inspection and subject to audit and/or reproduction by City's authorized representative to the extent necessary to permit evaluation and verification of cost of the work, and any invoices, change orders, payments or claims submitted by the Consultant or any of his payees pursuant to the execution of the contract. The City's authorized representative shall be afforded access, at reasonable times and places, to all of the Consultant's Records and personnel pursuant to the provisions of this article throughout the term of this contract and for a period of three years after last or final payment.

Consultant shall require all SubConsultants, to comply with the provisions of this article by insertion of the requirements hereof in a written contract agreement between Consultant and payee. Such requirements will also apply to any and all SubConsultants.

If an audit in accordance with this article, discloses overcharges, of any nature, by the Consultant to the City in excess of five percent (5%) of the total contract billings, the actual cost of the City's audit shall be reimbursed to the City by the Consultant.

Any adjustments and/or payments, which must be made as a result of any, such audit or inspection of the Consultant's invoices and/or records, shall be made within a reasonable amount of time (not to exceed 60 days) from presentation of CITY's findings to Consultant.

3.6 OWNERSHIP OF PROJECT DOCUMENTS

All documents, including but not limited to, field notes, design notes, tracings, data compilations, studies, and reports in any format, including but not limited to, written or electronic media, which are prepared in the performance of this Contract will become and are the property of City.

3.7 COMPLETENESS AND ACCURACY

The Consultant shall be responsible for the accuracy of its work, including but not limited to, survey work, reports, supporting data, and drawings, sketches, etc. prepared or compiled pursuant to this Contract and shall correct, at its expense, all negligent errors or omissions therein which may be disclosed. The cost necessary to correct those errors attributable to the engineering errors shall be chargeable to the Consultant. Additional Scope(s) of work which may be added to the Task Order shall not be considered the responsibility of the Consultant unless the need for same was created solely by any negligent error, omission, or negligent act of the Consultant and does not result in betterment to the City. The fact that the City has accepted or approved the Consultant's work shall in no way relieve the Consultant of any of its responsibilities.

3.8 ATTORNEY'S FEES

In the event either party brings any action for any relief, declaratory or otherwise, arising out of this Contract, or on account of any breach or default hereof, the prevailing shall be entitled to receive from the other party reasonable attorneys' fees and reasonable costs and expenses, which shall be deemed to have accrued from the commencement of such action.

3.9 SUCCESSORS AND ASSIGNS

This Contract shall extend to and be binding upon the Consultant, its successors and assigns, including any individual, company, partnership, or other entity with or into which the Consultant shall merge, consolidate, or be liquidated, or any person, corporation, partnership, or other entity to which the Consultant shall sell its assets.

3.10 ASSIGNMENT

Services covered by this Contract shall not be assigned or subcontracted in whole or in part without the prior written consent of the Contract Administrator.

3.11 SUBCONSULTANTS

During the performance of the Contract, the Consultant may engage such additional SubConsultants as may be required for the timely completion of this Contract. The addition of any SubConsultants shall be subject to the prior approval of the City.

In the event of subcontracting, the sole responsibility for fulfillment of all terms and conditions of this Contract rests with the Consultant.

3.12 ALTERATIONS OR ADDITIONS TO SCOPE OF SERVICES

The total scope of Services to be performed in accordance with this Contract will be identified in each Task Order. Services, which are not included in this Contract, will be considered Additional Services. The Consultant shall not perform these Additional Services without written authorization in the form of an approved Change Order from the City.

3.13 MODIFICATIONS

Any amendment, modification or variation from the terms of this Contract shall be in writing and shall be effective only after approval of all parties signing the original Contract.

3.14 CONFLICT OF INTEREST

This Contract is subject to cancellation pursuant to the provisions of A.R.S. 38-511.

3.15 FORCE MAJEURE

Neither party shall be responsible for delays or failures in performance resulting from acts beyond their control. Such acts shall include, but not be limited to, acts of God, riots, acts of war, epidemics, governmental regulations imposed after the fact, fire, communication line failures, power failures, or earthquakes.

3.16 TAXES

The fee listed in this Contract includes any and all taxes applicable to the activities hereunder. The City shall have no obligation to pay additional amounts for taxes of any type.

3.17 ADVERTISING

No advertising or publicity concerning the City using the Consultant's services shall be undertaken without prior written approval of such advertising or public City by the Contract Administrator.

3.18 COUNTERPARTS

This Contract may be executed in one or more counterparts, and each executed duplicate counterpart of this Contract shall be deemed to possess the full force and effect of the original.

3.19 ENTIRE AGREEMENT

This Contract constitutes the entire understanding of the parties and no representations or agreements, oral or written, made prior to its execution shall vary or modify the terms herein.

3.20 ARIZONA LAW

This Contract shall be governed and interpreted according to the laws of the State of Arizona.

3.21 EQUAL EMPLOYMENT OPPORTUNITY

The Consultant shall comply with Executive Order No. 11245, entitled "Equal Employment Opportunity", as amended by Executive Order No. 11375, and as supplemented in Department of Labor Regulations (41 CFR Part 60).

3.22 NOTICES

All notices or demands required to be given, pursuant to the terms of this Contract, shall be given to the other party in writing, delivered by hand or registered or certified mail, at the addresses set forth below, or to such other address as the parties may substitute by written notice given in the manner prescribed in this paragraph.

On behalf of the Consultant:

Name: Dibble Engineering
Address: 7878 N. 16th Street, Suite 300
Address: Phoenix, Arizona 85020

F :(602) 254-4878

Notices shall be deemed received on date delivered if delivered by hand and on the delivery date indicated on receipt if delivered by certified or registered mail.

3.23 INDEPENDENT CONSULTANT

The services Consultant provides under the terms of this Contract to the City are that of an Independent Consultant, not an employee, or agent of the City. The City will report the value paid for these services each year to the Internal Revenue Service (I.R.S.) using Form 1099.

City shall not withhold income tax as a deduction from contractual payments. As a result of this, Consultant may be subject to I.R.S. provisions for payment of estimated income tax. Consultant is responsible for consulting the local I.R.S. office for current information on estimated tax requirements.

3.24 INDEMNIFICATION

To the fullest extent permitted by law, the Consultant shall indemnify and hold harmless the City and each council member, officer, employee or agent thereof (the City and any such person being herein

called an "Indemnified Party"), for, from and against any and all losses, claims, damages, liabilities, costs and expenses (including, but not limited to, reasonable attorneys' fees, court costs and the costs of appellate proceedings) to which any such Indemnified Party may become subject, under any theory of liability whatsoever ("Claims"), insofar as such Claims (or actions in respect thereof) are caused by the negligent acts, intentional misconduct, errors, mistakes or omissions, in connection with the work or services of the Consultant, its officers, employees, agents, or any tier of SubConsultant in the performance of this Contract. The amount and type of insurance coverage requirements set forth below will in no way be construed as limiting the scope of the indemnity in this Section.

3.25 E-VERIFY REQUIREMENTS

To the extent applicable under Arizona Revised Statues § 41-4401, the Consultant and its Subconsultants warrant compliance with all federal immigration laws and regulations that relate to their employees and their compliance with the E-verify requirements under ARIZ. Revised Statues. § 23-214(A). The Consultant or Subconsultant's breach of the above-mentioned warranty shall be deemed a material breach of the Contract and may result in the termination of the Contract by the City of Buckeye. The City of Buckeye retains the legal right to randomly inspect the papers and records of the Consultant or Subconsultant employee who work on the Contract to ensure that the Consultant and its Subconsultants are complying with the above-mentioned warranty.

The Consultant and its SubConsultants warrant keeping the papers and records open for random inspection during normal business hours by the City. The Consultant and its SubConsultants shall cooperate with City's random inspections including granting the City's entry rights onto its property to perform the random inspections and waiving their respective rights to keep such papers and records confidential.

3.26 SCRUTINIZED BUSINESS OPERATIONS

Pursuant to Arizona Revised Statues §§ 35-391.06 and 35-393.06, the Consultant certifies that it does not have a scrutinized business operation in Sudan or Iran. For the purpose of this Section the term "scrutinized business operations" shall have the meanings set forth in ARIZ. Revised Statues § 35-391 or and 35-393, as applicable. If the City determines that the Consultant submitted a false Certification, the City may impose remedies as provided by law including terminating this Contract.

3.27 COMPLIANCE WITH LAWS

In performing any work required hereunder, Consultant shall comply with all applicable laws, ordinances, and codes of Federal, State and local governments, in effect during this Contract.

3.28 COOPERATIVE PURCHASING

Specific eligible political subdivisions and nonprofit educational or public health institutions ("Eligible Procurement Unit(s) ") are permitted to utilize procurement agreements developed by the City, at their discretion and with the agreement of the awarded Consultant. Consultant may, at its sole discretion, accept orders from Eligible Procurement Unit(s) for the purchase of the Materials and/or Services at the prices and under the terms and conditions of this Agreement, in such quantities and configurations as may be agreed upon between the parties. All Cooperative procurements under this Agreement shall be transacted solely between the requesting of the Eligible Procurement Unit. The exercise of any rights, responsibilities or remedies by Eligible Procurement Unit shall be the exclusive obligation of such unit. The City assumes no responsibility for payment, performance or any liability or obligation associated with any cooperative procurement under this Agreement. The City shall not be responsible for any disputes arising out of transactions made by others.

4.0 INSURANCE

A Standard Accord Certificate of Insurance is acceptable provided it is contains the additional language and deleted language as required in this contract. Failure to provide a Certificate of Insurance with the appropriate verbiage as required by this contract will result in rejection of the Certificate and delay contract execution.

Additionally, Certificates of Insurance submitted without referencing a Contract number will be subject to rejection and returned or discarded.

4.1 Insurance Representations and Requirements

4.1.1 General: Consultant agrees to comply with all City ordinances and state and federal laws and regulations.

Without limiting any obligations or liabilities of Consultant, Consultant shall purchase and maintain, at its own expense, hereinafter stipulated minimum insurance with insurance companies duly licensed by the State of Arizona (admitted insurer) with an AM Best, Inc. rating of A or above or an equivalent qualified unlicensed insurer by the State of Arizona (non-admitted insurer) with policies and forms satisfactory to City of Buckeye. Failure to maintain insurance as specified may result in termination of this Contract at City of Buckeye's option.

No Representation of Coverage Adequacy: By requiring insurance herein, City of Buckeye does not represent that coverage and limits will be adequate to protect Consultant. City of Buckeye reserves the right to review any and all of the insurance policies and/or endorsements cited in this Contract but have no obligation to do so. Failure to demand such evidence of full compliance with the insurance requirements set forth in this agreement or failure to identify any insurance deficiency shall not relieve Consultant from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Contract.

4.1.3 Additional Insured: All insurance coverage and self-insured retention or deductible portions, except Workers Compensation insurance and Professional Liability insurance if applicable, shall name, to the fullest extent permitted by law for claims arising out of the performance of this contract, City of Buckeye, its agents, representatives, officers, directors, officials and employees as Additional Insured as specified under the respective coverage sections of this agreement.

4.1.4 Coverage Term: All insurance required herein shall be maintained in full force and effect until all work or services required to be performed under the terms of subject contract is satisfactorily performed, completed and formally accepted by the City of Buckeye, unless specified otherwise in this Contract.

4.1.5 Primary Insurance: Consultant's insurance shall be primary insurance as respects performance of subject contract and in the protection of City of Buckeye as an Additional Insured.

4.1.6 Claims Made: In the event any insurance policies required by this Contract are written on a "claims made" basis, coverage shall extend, either by keeping coverage in force or purchasing an extended reporting option, for three (3) years past completion and acceptance of the work or services evidenced by submission of annual Certificates of Insurance citing applicable coverage is in force and contains the provisions as required herein for the three year period.

4.1.7 Waiver: All policies, except Professional Liability insurance, shall contain a waiver of rights of recovery (subrogation) against City of Buckeye, its agents, representatives, officials, directors, officers, and employees for any claims arising out of the work or services of Consultant. Consultant shall arrange to have such subrogation waivers incorporated into each policy via formal written endorsement thereto.

4.1.8 Policy Deductibles and or Self Insured Retentions: The policies set forth in these requirements may provide coverage, which contain deductibles or self-insured retention amounts. Such deductibles or self-insured retention shall not be applicable with respect to the policy limits provided to City of Buckeye. Consultant shall be solely responsible for any such deductible or self-insured retention amount. CITY OF BUCKEYE, at its option and cost, may require Consultant to secure payment of such deductible or self-insured retention by a surety bond or irrevocable and unconditional Letter of Credit.

4.1.9 Use of SubConsultants: If any work under this agreement is subcontracted in any way, Consultant shall execute written agreement with SubConsultant containing the same Indemnification Clause and Insurance Requirements set forth herein protecting City of Buckeye and Consultant. Consultant shall be responsible for executing the agreement with SubConsultant and obtaining Certificates of Insurance verifying the insurance requirements.

4.1.10 Evidence of Insurance: Prior to commencing any work or services under this Contract, Consultant shall furnish City of Buckeye with Certificate(s) of Insurance, or formal endorsements as required by this Contract, issued by Consultant's insurer(s) as evidence that policies are placed with acceptable Insurers as specified herein and provide the required coverage(s), conditions, and

limits of coverage specified in this Contract and that such coverage and provisions are in full force and effect. If a Certificate of Insurance is submitted as verification of coverage, City of Buckeye shall reasonably rely upon the Certificate of Insurance as evidence of coverage but such acceptance and reliance shall not waive or alter in any way the insurance requirements or obligations of this agreement. Such certificates shall identify the Contract work number and be sent to the designated City of Buckeye- Contract Administrator. If any of the above cited policies expire during the life of this Contract, it shall be Consultant's responsibility to forward renewal Certificates within ten (10) days after the renewal date containing all the aforementioned insurance provisions. Certificates shall specifically cite the following provisions:

1. City of Buckeye, its agents, representatives, officers, directors, officials and employees is an Additional Insured as follows:

A) Commercial General Liability - Under ISO Form CG 20 10 11 85 or equivalent.
b) Auto Liability- under ISO Form CA 20 48 or equivalent.
c) Excess Liability- Follow Form to underlying insurance.

2. Consultant's insurance shall be primary insurance as respects performance of subject contract.

3. All policies, except Professional Liability, waive rights of recovery (subrogation) against City of Buckeye, its agents, representatives, officers, directors, officials and employees for any claims arising out of work or services performed by Consultant under this contract.

4. Certificate shall cite a 30 day advance notice cancellation provision. If ACORD Certificate of Insurance form used, the phrases in the cancellation provision "endeavor to" and "but failure to mail such notice shall impose no obligation or liability of any kind upon the company, its agents or representatives" shall be deleted. Certificate forms other than ACORD form shall have similar restrictive language deleted.

4.2 Required Coverage

4.2.1 Commercial General Liability: Consultant shall maintain "occurrence" form Commercial General Liability insurance with an unimpaired limit of not less than $1,000,000 for each occurrence, $2,000,000 Products and Completed Operations Annual Aggregate, and a $2,000,000 General Aggregate Limit.

The policy shall cover liability arising from premises, operations, and independent Consultants, products-completed operations, personal injury and advertising injury. Coverage under the policy will be at least as broad as Insurance Services Office, Inc. policy form CG 00 010 93 or equivalent thereof, including but not limited to, separation of insureds clause. To the fullest extent allowed by law, for claims arising out of the performance of this contract, the City of Buckeye, its agents, representatives, officers, directors, officials and employees shall be cited as an Additional Insured under Insurance Service Offices, Inc. Commercial General Liability Additional Insured Endorsement form CG 20 10 11 85,

or equivalent, which shall read "Who is an Insured (Section II) is amended to include as an insured the person or organization shown in the Schedule, but only with respect to liability arising out of "your work" for that insured by or for you." If any Excess insurance is utilized to fulfill the requirements of this paragraph, such Excess insurance shall be "follow form" equal or broader in coverage scope then underlying insurance.

4.2.2 Professional Liability: If the Contract is the subject of any professional services or work, or if Consultant engages in any professional services or work adjunct or residual to performing the work under this Contract, Consultant shall maintain Professional Liability insurance covering errors and omissions arising out of the work or services performed by Consultant, or anyone employed by Consultant, or anyone for whose acts, mistakes, errors and omissions Consultant is legally liable, with liability insurance limit of $1,000,000 each claim and $2,000,000 all claims. In the event the Professional Liability insurance policy is written on a "claims made" basis, coverage shall extend for three (3) years past completion and acceptance of the work or services, and Consultant shall be required to submit Certificates of Insurance evidencing proper coverage is in effect as required above.

4.2.3 Vehicle Liability: Consultant shall maintain Business Automobile Liability insurance with a limit of $1,000,000 each occurrence on Consultant's owned, hired, and non-owned vehicles assigned to or used in the performance of the Consultant's work or services under this Contract. Coverage will be at least as broad as Insurance Services Office, Inc. coverage code "1" "any auto" policy form CA 00 01 12 93 or equivalent thereof. To the fullest extent allowed by law, for claims arising out of the performance of this contract, the City of Buckeye, its agents, representatives, officers, directors, officials and employees shall be cited as an Additional Insured under Insurance Service Offices, Inc. Business Auto policy Designated Insured Endorsement form CA 20 48 or equivalent. If any Excess insurance is utilized to fulfill the requirements of this paragraph, such Excess insurance shall be "follow form" equal or broader in coverage scope then underlying insurance.

4.2.4 Worker's Compensation Insurance: Consultant shall maintain Workers Compensation insurance to cover obligations imposed by federal and state statutes having jurisdiction of Consultant's employees engaged in the performance of work or services under this Contract and shall also maintain Employers Liability Insurance of not less than $500,000 for each accident, $500,000 disease for each employee and $1,000,000 disease policy limit.

Umbrella/Excess Liability: Umbrella/Excess Liability insurance with a limit of not less than $2,000,000 per occurrence combined limit Bodily Injury and Property

Damage, that "follows form" and applies in excess of the Commercial General Liability, Automobile Liability, and Employer's Liability, as required above.

5.0 SOFTWARE LICENSES

As to all software licenses provided to the City as part of Consultant's obligations under this Contract, the following provisions apply:

5.1 SOURCE CODE AVAILABILITY

Consultant shall furnish City, without charge, a single copy of the Source Code for the Software immediately upon the occurrence of any of the following:

1. Consultant becomes insolvent; or

2. Consultant ceases to conduct business; or

3. Consultant makes a general assignment for the benefit of creditors; or

4. A petition is filed in Bankruptcy by or against Consultant.

5.1.1 Use of the Source Code shall be subject to the same restrictions as to which the Software itself is subject.

5.1.2 City shall have the right to modify Source Code in any manner it deems appropriate, provided that the Source Code as modified shall remain subject to the restrictions set forth in immediately above.

5.2 PROPRIETARY PROTECTION

5.2.1 City acknowledges that to the extent Consultant advises the City that the Software is confidential information or is a trade secret property of the Consultant, the Software is thereby disclosed on a confidential basis under this Contract and is to be used only pursuant to the terms and conditions set forth herein.

5.2.2 Consultant shall not use or disclose any knowledge, data or proprietary information relating to CITY obtained in any manner whatsoever.

5.2.3 To the extent permitted by Arizona Law, the parties agree, both during the term of this Contract and for a period of seven (7) years after termination of this Contract and of all licenses granted hereunder, to hold each other's confidential information in confidence. The parties agree, unless required by government regulations or order of court, not to make each other's confidential information available in any form to any third party or to use each other's confidential information for any purposes other than the implementation of this Contract provided, however, that if Consultant's confidential information is requested to be divulged under the provisions of the Arizona Public Records Act, A.R.S., Title 39, Consultant shall reimburse to City the full cost of City's refusal to release the information, including costs of litigation, City's attorney fees, fines, penalties or assessments of opposing party's attorney fees. Each party agrees to take all reasonable steps to ensure that confidential information is not disclosed or distributed by its employees or agents in violation of the provisions of this Contract.

5.3 NON-INFRINGEMENT

Consultant warrants that the Software provided hereunder does not and will not infringe upon or violate any patent, copyright, trade secret or other proprietary or property right of any person or entity. In the event of a claim against City asserting or involving such an allegation, Consultant will defend, at Consultant's expense, and will indemnify City and hold City harmless against any loss, cost, expense (including attorney fees) or liability arising out of such claim, whether or not such claim is successful. In the event an injunction or order should be obtained against use of the Software by reason of the allegations, or if in Consultant's opinion the Software is likely to become the subject of such a claim of infringement, Consultant will, at its option and its expense: (I) procure for the City the right to continue using the Software; or (ii) replace or modify the same so that it becomes non-infringing (such modification or replacement shall be functionally equivalent to the original); or (iii) if neither (i) nor (ii) is practicable, repurchase the Software on a depreciated basis utilizing a straight line five (5) year period, commencing on the date of acceptance.

5.4 THIRD PARTY LICENSE

Consultant shall sublicense to City any and all third party Software required in the execution of this Contract. City reserves the right to accept or reject third party license terms. If the City rejects the terms of a third party license, it shall be Consultant's responsibility to negotiate acceptable terms or to supply Software from another source with terms acceptable to City. City's acceptance of the third party license terms shall not be unreasonably withheld.

6.0 SEVERABILITY AND AUTHORITY

6.1 SEVERABILITY

If any term or provision of this Contract shall be found to be illegal or unenforceable, then notwithstanding such illegality or unenforceability, this Contract shall remain in full force and effect and such term or provision shall be deemed to be deleted.

6.2 AUTHORITY

Each party hereby warrants and represents that it has full power and authority to enter into and perform this Contract, and that the person signing on behalf of each party has been properly authorized and empowered to enter this Contract. Each party further acknowledges that it has read, understands, and agrees to be bound by the terms and conditions of this Contract.

6.3 ISRAEL COMPLIANCE

Pursuant to Arizona Revised Statute § 35-393.01, Contractor certifies that it is not currently engaged in, and agrees for the duration of the Contract to not engage in, a boycott of Israel.

RE: CITY OF BUCKEYE / BUCKEYE MUNICIPAL AIRPORT
RFQ #2017-013
On-Call for Airport Planning Services
Proposed Contract Rates for 2018-2019

We sincerely appreciate being selected as the consultant for the On-Call for Airport Planning Services contract for Buckeye Municipal Airport. Per your request, attached are Dibble's and our sub-consultants' proposed rate sheets and associated classifications/personnel. As a summary, our full team includes the following firms and roles:

Dibble Engineering.....Prime Consultant (Planning and Environmental)

Genesis Consulting Group (DBE).....Planning support services

SWCA Environmental.....Environmental services

Woolpert Inc. .....FAA Airport Survey (AGIS)

It is understood that these rates shall be in effect for one year from the date of contract execution (2018-2019). Therefore, with the City's concurrence, Dibble would like an opportunity to submit new rates for each one-year renewal period, provided we have the opportunity to be renewed for this contract.

We are very much looking forward to working with the City of Buckeye and Buckeye Municipal Airport. If you need additional information or have questions, please do not hesitate to call.

Sincerely,
Dibble Engineering

CITY OF BUCKEYE
ON-CALL CONTRACT #2017-013-001
CONTRACT EXTENSION

THIS CONTRACT, made and entered into on the 20th day of March, 2018, by and between the City of Buckeye, an Arizona municipal corporation (the "City"), and Dibble Engineering Inc., an Arizona corporation, hereafter called (the "Consultant").

The following paragraphs of Contract 2017-013-001 shall be changed as follows:

3.2 TERM OF CONTRACT
In accordance with "Section 3," "General Terms and Conditions" of the Contract. The contract term is being extended for an additional year commencing on March 20, 2021 through March 19, 2022.

3.13 MODIFICATIONS
In accordance with "Section 3, Paragraph 3.13 "Modifications". The Consultant has updated the Price sheet for all positions and it is attached as Exhibit A. The 2021/2022 price sheet shall replace the original price sheet and become effective upon execution of Change Order 3.

All other terms and conditions of the original contract remain in full force and effect.

IN WITNESS WHEREOF, the City of Buckeye by its Manager of Construction and Contracting has hereunto subscribed his name.

Buckeye, AZ 85326

RE: ***Airport Master Plan – Buckeye Municipal Airport***

Dear Mr. Webbe:

We appreciate the opportunity to provide planning services for the update to the Master Plan at the Buckeye Municipal Airport. The Airport Master Plan Study will be a long-term, comprehensive development plan that meets the Airport's unique goals and objectives and complies with all relevant Federal Aviation Administration (FAA) requirements. The Study will also seek to address the Airport's operational, maintenance, and improvement considerations; development priorities; natural environment and land use compatibility considerations; and factors related to proper financial management to enable the Airport to meet operational and capital improvement fiscal needs. This proposal has been prepared in accordance with our understanding of the Study goals and objectives based on our conversations with you and others within the City.

We have prepared a scope of work describing our proposed services along with a fee proposal for your review and approval. Dibble's total fee per the attached scope of work is:

Planning Services:

1. Dibble (prime consultant) ……total fee = $341,359.00
2. NV5 Geospatial (aka Quantum Spatial) (sub-consultant) ……total fee = $79,888.00
3. Genesis Consulting Group, LLC (sub-consultant)……..total fee = $24,938.00
4. SWCA Environmental Consultants (sub-consultant)……total fee = $24,060.00

Total Fee = $446,185.00

We look forward to working with you on this important project. If you need additional information or have questions, please do not hesitate to call us at 602-957-1155.

Sincerely,

Charlie McDermott, LEED AP
Aviation Planning Manager, Airport Development
Dibble

Ryan Toner, PE
Vice President,
Airport Development Practice
Dibble

SCOPE OF WORK

Airport Master Plan

Buckeye Municipal Airport

In an effort to establish an appropriate plan for the future development of Buckeye Municipal Airport (BXK or Airport), the City of Buckeye (the Sponsor), operator of the Airport, has elected to undertake a Master Plan Study (the Study) for the Airport. The Master Plan Study will be a long-term, comprehensive development plan that meets the Airport's unique goals and objectives and complies with all relevant Federal Aviation Administration (FAA) requirements. The Study will also seek to address the Airport's operational, maintenance, and improvement considerations; development priorities; natural environment and land use compatibility considerations; and factors related to proper financial management to enable the Airport to meet operational and capital improvement fiscal needs.

Dibble and its teaming partners NV5 Geospatial & Genesis Consulting Group, LLC will provide the necessary services for this Study. This Scope of Work (SOW) covers the planning services and tasks associated with Study. In accordance with the Agreement for Airport Planning Consultant Services, the contract type is lump sum (see **Attachment 1**). The Study is anticipated to be completed within 12 – 18 months after official Notice to Proceed is received from the City.
This document provides information on the following aspects:

- Airport background information and description of the master planning effort.
- Areas of emphasis for this Study; and
- Project scope elements/tasks.

Background Information

The Airport is located approximately nine miles northwest of the Buckeye's city center near Interstate 10 in the West Valley of Metro Phoenix. The Airport is classified as a general aviation facility and publicly owned by the City of Buckeye. BXK currently is home to 60 fixed-wing based aircraft and experiences roughly 54,000 total annual operations per year. Several flight schools and other specialty services are located at BXK. The last Airport Maser Plan was published in 2007.

Since that time, especially in the last several years, the City of Buckeye has seen an increase in its population and employment sectors. With this growth comes more interest in the Airport and its surrounding land uses. An update to the Master Plan is needed to accurately reflect the present-day conditions and operations, as well as ensure the Airport can support any increase in forecasted operations and based aircraft to meet future demand. Additionally, identification of airfield and business development needs and opportunities will ensure that the Airport keeps pace with the growing community.

To accomplish this effort, this Study will follow FAA guidance in accordance with Advisory Circular 150/5070-6B (Change 2 or most current version), *Airport Master Plans*. As the AC outlines, an airport master plan is a comprehensive study that addresses short-, medium-, and long-term plans for airport development and includes the following elements:

1) Public involvement program;
2) Inventory of existing conditions, including an environmental resource overview;
3) Aviation activity forecasts;
4) Facility requirements assessment, including capacity analysis;
5) Alternatives development and evaluation;
6) Preparation of recommended airport improvement plan;
7) Preparation of long-range Capital Improvement Plan;
8) Airport Layout Plans (update);
9) Financial feasibility analysis; and
10) Executive summary brochure

Buckeye Airport Master Plan Areas of Emphasis

- Review and refinement of airport goals, objectives, vision, and initiatives.
- Unique and customized public involvement program including public meetings, stakeholder meetings, establishment of a Study Committee; meetings with Airport staff, the Study Committee, city council presentations, mayor briefings, and an outreach/communications plan.
- FAA Phoenix ADO and ADOT Aeronautics coordination including meetings, conference calls, planning memos, etc.
- Development of forecasts of aviation activity to determine existing and future general aviation land utilization and growth needs.
- Landside alternatives development and analysis.

- Examination of the configuration of all airfield pavements in consideration of current FAA standards and guidance, with recommendations for resolution of any deficiencies.
- Analysis of business opportunities
- Provide guidance on requirements for future environmental studies required to implement Master Plan Study recommendations.

Reference Documents

Components and preparation for both the Airport Master Plan narrative and revisions to the Airport Layout Plan (ALP) shall include all items required by the ALP checklist contained in FAA Standard Operating Procedure (SOP) 2.00, *Standard Procedure for FAA Review and Approval of Airport Layout Plans (ALPs);* and SOP 3.00, *Standard Operating Procedure for FAA Review of Exhibit "A" Airport Property Inventory Maps.* The Study will be conducted in accordance with current FAA requirements and guidance, including FAA Advisory Circular (AC) AC 150/5070-68, *Airport Master Plans;* AC 150/5300-13A, *Airport Design;* FAA Order 1050.1E, *Environmental Impacts: Policies and Procedures;* FAA Order 5050.48, *National Environmental Policy Act (NEPA) Implementing Instructions for Airport Projects;* FAA Advisory Circular for *Airports Geographic Information Systems* (AC 150/5300-16A, 17C and 188), Title 14 Code of Federal Regulations (14 CFR) Part 77, *Safe, Efficient Use, and Preservation of the Navigable Airspace*; FAA Order 5100.38D, *Airport Improvement Program Handbook*; and other applicable FM regulations, orders, ACs and guidance.

The scope of services to complete the Study are organized into the following tasks:

1. Project Management and Administration
2. Public Involvement Program
3. Inventory of Existing Conditions
4. Aerial Imagery Acquisition / FAA AGIS Survey
5. Forecasts of Aviation Activity
6. Facility Requirements and Capacity Analysis
7. Alternatives Development, Evaluation, & Recommendations
8. Airport Layout Plan Drawing Set
9. Implementation Plan and Funding Analysis
10. Recycling and Solid Waste Management Plan
11. Documentation

Element 1 – Project Management and Administration:

Dibble will manage the project on behalf of the City including the services of our planning team subconsultants. The subconsultants are:

Subconsultants	Services
NV5 Geospatial (aka Quantum Spatial)	Aeronautical Obstruction Survey/AGIS
SWCA Environmental Consultants (SWCA)	Environmental Services (Task 3.4)
Genesis Consulting Group, LLC (Genesis)	Analysis of Business Opportunities (Task 6.5)

1.1 General Project Management and Administration

This task includes interrelated actions, processes, resource assignments, and communication among the project team for purposes of tracking the progress of the Study. Managing the technical work tasks is necessary for a successful project. Project management administrative duties include:

- Developing and documenting the project plan
- Organizing the project team
- Accounting set-up
- Creation, distribution, and periodic updating of project schedule
- Sub-consultant administration
- Internal project team meetings and coordination
- Executing project activities
- Managing/mitigating risks and solving challenges
- Invoicing and monitoring project budget
- All project communications
- Project close out

1.2 Project Kickoff Meeting

Dibble will conduct an in-person project kickoff meeting with the City. This meeting is intended to ensure that all project team members clearly understand the goals for the project, the scope of the services, project schedule, project deliverables, etc. It will also be an opportunity for the City staff to offer comments related to the project. Dibble will provide meeting minutes to the attendees within five business days of the meeting. The meeting will be attended by the Project Manager and Senior Planner.

1.3 Sponsor and/or FAA/ADOT Aeronautics Coordination

Status briefings will take place throughout the Master Plan Study process. These briefings will take place in person, via telephone call, or email between the Airport Coordinator and **Dibble's** Project Manager on an as-needed basis. Additional Study team members or representatives from the FAA and/or ADOT Aeronautics may also occasionally be invited to meetings when applicable. These briefings will include status reports of current work, upcoming meetings and work effort, and discussion of challenges affecting the schedule, process, and budget. Dibble anticipates up to **four (4)** meetings may be held throughout the course of the project. Additionally, the Project Manager and Senior Planner may each attend up to **six (6)** meetings on behalf of the Airport as a part of the City's Airport Specific Area Plan project.

Element 2 – Public Involvement Program:

The purpose of the Public Involvement Program is to facilitate open and proactive communication with internal and external stakeholders, as well as the public, to provide knowledge and support for the resulting Study. Participation by stakeholders and members of the public ensure that each group has a vested interest in the resulting Study.

2.1 Study Committee Meetings

Dibble will facilitate the establishment of an advisory committee for the Study. Typically referred to as a Planning Advisory Committee (PAC), the committee will consist of approximately 8 to 10 individuals. Membership typically consists of interested stakeholders including technical experts, airport staff, and City staff representing the planning, zoning, and engineering departments, as examples. The PAC may also include airport tenants, local businesses, ADOT, and FAA representatives. To obtain additional input, Dibble may also conduct in person interviews with some stakeholders.

A kick-off meeting will be held with the PAC to review the goals and objectives of the Study, along with gathering feedback from participants regarding the planning process. Follow-on meetings will be held to present the draft findings of the Study as it progresses. **Dibble** anticipates facilitating **four (4)** meetings of approximately one-hour in duration with the PAC to be held periodically during the Study. All meetings will be attended by the Project Manager and Senior Planner.

Dibble will distribute electronic working papers to the committee a minimum of two weeks prior to the meetings. **Dibble** will also prepare all necessary meeting materials such as

PowerPoint presentations, handouts, sign-in sheets, and will prepare meeting minutes. Meeting minutes will be submitted to the City within one week for review. Once the City approves the meeting minutes, Dibble will distribute them to the committee and address any follow-on questions as needed.

2.2 Outreach and Communications Plan

It is understood that stakeholder input from the community, airport users, and government agencies needs to be a key element of this Master Plan Study to achieve a successful outcome. **Dibble** will coordinate with Airport staff to manage stakeholder and public outreach, identifying media to share the Airport's vision with stakeholders, providing assistance with the staffing of public meetings and producing exhibits, press releases, website and presentation materials. The City will assist the Consultant with selecting and approving the venue(s) for the public meetings. **Dibble** will coordinate and secure the venue for all public meetings and provide light refreshments at each public meeting.

Three public information meetings will be held at the City approved locations during the Study. The meetings will be no more than three hours each and will be an open-house style format. The opportunity to address questions from the public will be made available. Additionally, **one** Study briefing to the Buckeye City Council during a regularly scheduled city council meeting will also occur. Both the public meetings and City Council briefing will be attended by the Project Manager and Senior Planner.

To promote the Airport Master Plan project and engage with the public, **Dibble** will participate in the Buckeye Air Fair on February 18th 19th & 20th. Dibble will have one display booth promoting the Airport Master Plan project. The booth will also be used to seek input from the public about issues and concerns related to the airport. Dibble will have two aviation professionals at the display booth for four hours each day on the 18th and 19th and two hours on the 20th.

Table 1 summarizes the meetings and conference calls anticipated throughout the Study.

Table 1 – Summary of Meetings, Events and Conference Calls	
	Mtgs, Event, Calls
Study Kickoff Meeting	1
Study Coordination Meetings with Sponsor	12
Study Coordination Calls with the FAA and/or ADOT Aeronautics	4

Airport Master Plan Study

Planning Advisory Committee (PAC) meetings (virtual or in-person)	4
Public Outreach meetings	3
Study Briefing to City Council	1
Buckeye Airport Specific Area Plan Meeting Attendance	6
Buckeye Air Fair project display booth (February 18th 19th & 20th)	3

Element 3 – Inventory of Existing Conditions:

This element includes tasks that systematically document BXK assets, activities, conditions, and environmental resources to establish an informational baseline for the Study. The information gathered as part of this task will result in written and graphic documentation in the Airport Master Plan.

3.1 Existing Conditions Site Visit

Dibble will conduct a one-day, on-site inventory at the airfield to verify the location and condition of various components of the Airport, such as pavement, airfield lighting, pavement markings, and navigational aids. In general, the following will be inventoried:

- **Airfield:** Runway, taxiways, aprons, airfield lighting, visual and navigational aids, perimeter fencing and access control gates, and any other facility or component related to the airside portion of the airfield.

- **General Aviation Facilities:** The quantity, type, and general condition of hangars, transient aircraft parking aprons, tie-down positions, and general aviation services will be inventoried.

- **Airport Property:** The existing airport property boundary will be confirmed with information provided to the Consultant by the City. Any land that was released, or that is planned to be released, will be identified; and

- **Ancillary/Support Facilities:** Fuel storage and tanks, equipment storage facilities, surrounding emergency response, and other airport administration and maintenance facilities will be inventoried. Existing capacities including number of tanks, types of fuel, and available equipment and adequacy of storage tanks based on existing and forecasted aviation demand will be determined.

- **Vehicle Access, Circulation, and Parking:** General condition and lighting of ground access will be inventoried and evaluated on the adequacy for existing and future use of the Airport;

- **Utilities:** Utilities supporting the Airport will be identified and documented. Electrical power, emergency power, natural gas service, sanitary and storm sewer, potable water, telecommunication, and suppliers will be identified. The inventory will use readily available information, maps, and data provided by the County.

3.2 Data Collection & Review

Dibble will obtain copies of existing reports, plans, electronic imagery, or other documents which may provide data on the history of the Airport, economic impact, area transportation systems, utilities, airspace, jurisdictional boundaries, or other data and information pertinent to the Study. Flight data will also be gathered from sources such as FlightAware, Airport IQ data center by GCR, or other reliable sources acceptable to the County and FAA. Dibble will assemble and review the data for use in later tasks.

3.3 Existing Land Use and Zoning Inventory

Dibble will obtain copies of existing local planning and land use regulations and mapping within the airport influence area (i.e. 14 CFR Part 77 airspace surfaces) for review. This effort will concentrate on identifying the boundaries of controlling jurisdictions and the land uses by type. These types will be general and will include, but are not limited to, residential, commercial, agricultural, recreation, conservation, and public uses. In addition, readily available information will be obtained that will identify the typical characteristics which may influence construction and planning for an Airport. Existing, or currently proposed, airport zoning will be evaluated to determine compliance with existing FAA grant assurances and level of protection afforded to the Airport.

3.4 Environmental Resources Overview

Dibble will complete a preliminary review of existing environmental resources within the vicinity of the Airport to develop an understanding of potential environmental setting which may impact alternatives related to future airport development. The environmental overview includes summarizing existing environmental resources as well as previous airport environmental studies including Environmental Assessments (EAs) and Categorical Exclusions (CATEXs). The environmental overview effort will be documented in the Plan and is not intended to satisfy the National Environmental Policy Act (NEPA) requirements.

On October 5, 2018, H. R. 302, "FAA Reauthorization Act of 2018" was signed into law (P.L. 115-254). Section 163 of the Act necessitates changes in how the FAA has historically operated with respect to oversight of airports. Section 163(a) narrows the scope of the FAA's authority over airport land uses by generally prohibiting the FAA from "directly or indirectly regulating" airport land. Section 163 also changed prior practices of the FAA is a reduction in the FAA's ALP approval authority. **Dibble** will coordinate, compile and submit to FAA the required documentation about the airport property allowing FAA to make a Section 163 determination for the airport.

Dibble will coordinate, review and incorporate the findings of an airport-wide cultural resource study prepared by **SWCA Environmental Consultants** into the Airport Master Plan (see attachment). Any prior cultural resources discovered will also be incorporated into the study prepared by SWCA. The cultural resource study will include all existing airport land and the proposed 74 acres of land to be acquired as described in the Land Acquisition Environmental Assessment, Finding Of No Significant Impact (FONSI) dated September 2015.

3.5 Climate and Wind Data Collection and Analysis

Dibble will collect meteorological and wind observation data from the Airport's Automated Weather Observing System (AWOS) to assess crosswind conditions. This data will be used in developing an All-weather, Visual Flight Rules (VFR), and Instrument Flight Rules (IFR) wind roses based on 10.5, 13, 16, and 20-knots crosswind components. Wind and weather data for the most recent ten-year period available will be collected.

Element 4 – Aerial Imagery Acquisition:

Airport Geographic Information System (AGIS) for Master Plan studies typically involves aerial imagery collection and analysis, field survey in support of imagery acquisition, and planimetric mapping and data attribution. To date, the Airport has not had an aerial survey or mapping conducted for the FAA's AGIS program. **Dibble** and **NV5 Geospatial** will work collectively to collect aerial imagery in accordance with FAA guidance as outlined in NV5 Geospatial's proposal (see attachment).

Element 5 – Forecasts of Aviation Activity

Dibble will examine the most significant factors associated with the demand for aviation and develop annual forecasts of aviation activity anticipated to occur during the 20-year planning

horizon. The aviation forecasts will be developed using acceptable forecasting analysis techniques consistent with FAA guidance, including *Forecasting Aviation Activity by Airport* (July 2001) and *Guidance on Review and Approval of Local Aviation Forecasts* (June 2008). Any substantial differences between the forecast and the FAA's *Terminal Area Forecast* (TAF) will be resolved before work continues on subsequent parts of the Project.

5.1 Collection and Evaluation of Historical and Existing Activity Data

Dibble will collect historic and existing data from a variety of sources to assist in the forecasting element. This includes the existing airport master plan, current airport management records, the FAA's *TAF*, the FAA's *National Aerospace Forecast*, FAA's *Traffic Flow Management System Counts (TFMSC*), and Arizona's most recent State Aviation System Plan, along with any City planning documents.

Dibble will also review local, regional, and national trends influencing and affecting aviation demand at the Airport. Economic factors, demographic characteristics, and geographic attributes of the service area and the role of the airport in the local and regional aviation systems, will be documented along with aviation-related aspects. Any factors specific to the Airport will also be evaluated and summarized.

5.2 Aviation Activity Demand Projections

Dibble will compile a summary of aviation activity and operational data for the Airport to indicate historical growth and present a basis for statistical analysis of based aircraft, aircraft mix, annual aircraft operations, and related factors.

Projections of aviation demand will be developed using standard forecasting methodologies in accordance with FAA Advisory Circular 150/5070-6B. Projections of short-, intermediate-, and long-term demand levels (i.e., 5, 10, and 20-years) will be developed. Demand forecasts will be developed for the following key elements:

- Total based aircraft and fleet mix
- Annual general aviation operations (local vs. itinerant)
- General aviation operations by category and fleet mix
- Percentage of touch and go operations
- Annual military operations (local vs. itinerant)
- Annual instrument approaches (AIA's), if applicable

- Peak hour operations

Methodologies for developing new forecasts may include:

- Comparative analysis of the previous and existing forecasts listed above
- Trend analysis of historical activity levels projected forward
- Market share analysis using a top-down relationship between national, regional, state and local activity levels with historical market shares calculated and used as a basis for projecting future market shares
- Per capita analysis correlating future growth to future population growth
- Cohort analysis or a combination of the other forecasting analysis

Dibble will assess these forecasts with varying levels of certainty, analyzing the probability of a low-, mid-, and high-level forecast scenario for total based aircraft and total aircraft operations, ultimately recommending a preferred forecast for each factor.

Results of this element will be used to determine future needs for airside, landside, and support facility components at the Airport. Methodologies used in this task will be reviewed with Airport staff and the FAA Phoenix ADO before the element is finalized. Close coordination will be maintained to ensure acceptance of the approach to the aviation activity projections.

5.3 Critical Aircraft Determination

Dibble's final important element of the forecast task is the determination and recommendation of a critical aircraft for use in subsequent facility planning evaluation. The critical aircraft is that aircraft that uses (or is highly likely to use) the airport on a regular basis. Regular basis is defined by the FAA as a minimum of 500 annual operations (excluding touch-and-go operations). Using existing annual aircraft data and forecasts of future fleet mix, a critical aircraft will be identified for each runway at the Airport and referenced with the corresponding Runway Design Code (RDC).

5.4 Coordination and Approval of Forecasts

Dibble will compare the aviation activity forecasts to the FAA's TAF using the recommended FAA format to identify any inconsistencies. Consideration will be given to FAA's guidance related to forecast consistency with the *TAF*. The FAA considers a master plan forecast for annual operations and based aircraft to be consistent with the *TAF* for

non-hub airports if forecasts differ by less than ten (10) percent in the five (5) year forecast and 15 percent in the (10) ten-year period.

The forecasts will be submitted to the FAA Phoenix ADO for review and approval. Once approved by the FAA, these findings will be incorporated and used within the Master Plan report.

Deliverable: Working Paper 1

The Inventory (Element 3) and Forecasts (Element 5) will be summarized into draft Working Paper 1 (WP1). At this juncture, draft WP1 will be submitted for review by Airport management and the PAC. Once reviewed, a separate technical memorandum containing BXK's aviation demand forecasts for the current planning horizon will be submitted to the FAA (PHX ADO). The BXK Forecast Technical Memorandum will include the standard FAA TAF comparison tables. Once approved, the FAA-approved forecast will provide the basis for the development of the remaining Master Plan report.

Element 6 – Facility Requirements and Capacity Analysis

Analysis of the facilities required to accommodate demand will be conducted, including airfield capacity. Furthermore, current FAA standards and dimensional criteria related to the physical layout of airport facilities will be reviewed for compliance with standards. Additional airfield layout and geometry (e.g., runway length, taxiway design, hot spots, dual purpose pavements, indirect taxiway access, etc.), instrument approach capabilities, and navigational aids and lighting will be considered, as well as landside and support facility needs.

6.1 Standard FAA Capacity Analysis

Using established FAA criteria and the findings from the inventory and forecast demand projections, **Dibble** will review the existing runway configuration to determine its theoretical capacity and limitations. Inputs for this analysis will include aircraft fleet mix, navigation aids, physical orientation of runways and taxiways, spacing of taxiway exits, flight training activity, user preference, weather/wind conditions, and peaking characteristics. The capacity of the Airport's existing aviation facilities will be compared to demand projections for the short-term (5-year), intermediate-term (10-year), and long-term (20-year) planning periods. Existing and projected capacity surpluses and deficits will be identified, and the consequences explained.

6.2 FAA Design Standards Review/Evaluation

Dibble will identify the appropriate FAA design standards applicable to the airfield, airspace, and terminal area as determined by the design aircraft forecast. Airport design standards will be analyzed using current FAA regulations and policies, including FAA AC 150/5300-13A, Change 1, *Airport Design*; AC 150/5300.1G, *Modifications to Agency Airport Design, Construction and Equipment Standards*; 14 CFR Part 77, *Safe, Efficient Use and Preservation of the Navigable Airspace*; and Engineering Brief No. 99, *Changes to Tables 3-2 and 3-4 of Advisory Circular 150/5300-13A, Airport Design*.

6.3 Identify Airfield Facility Requirements

Utilizing current FAA planning criteria and the existing master plan documents, **Dibble** will review the overall facility needs based on existing and projected future activity and the Airport's role in the local, regional, and national aviation and economic system. Airside facilities to be analyzed include:

- Runways and associated safety and protected areas
- Taxiways and associated safety and protected areas
- Runway Protection Zones (RPZs)
- Approach and departure surfaces
- NAVAIDS, lighting, signage, and associated critical areas

6.4 Identify Landside and Support Facility Requirements

Utilizing current FAA planning criteria and the existing master plan documents, **Dibble** will review landside and support facility needs based on projected future activity and the Airport's role in the local, regional and national aviation and economic system. Landside facilities to be analyzed include:

- Aircraft parking apron areas
- FBO, corporate, and general aviation facilities
- Aircraft storage and hangar areas
- ARFF and other Support facilities
- Fuel farms
- Utilities
- Perimeter fencing and gates
- Airport access and circulation
- Vehicle parking

6.5 Analysis of Business Opportunities (NOT FAA AIP ELIGIBLE)

Genesis will conduct a business analysis and evaluation to identify the aviation businesses and airport intensive industries that are best suited for both the community (based upon economic/demographic profile) and the Airport (based on capabilities and infrastructure). Furthermore, **Genesis** will identify the existing relevant attributes of the Airport and will also identify national and local trends in general aviation, as well as current and forecasted Airport/area usage patterns. Based on the revised aviation demand forecasts prepared as part of Element 5 and on City/Airport input, this task will also analyze proposed businesses for the Airport, identify specific industries, and evaluate factors that will be relevant to the success of those ventures. Based upon these factors, and those outlined in previous tasks, target business types and activities for both airside and landside development will be identified (see attachment).

Element 7 – Alternatives Development, Evaluation, and Recommendations

Based on established goals and desires of the City and Airport staff, a specific plan and program for airport development and improvement will be prepared representing recommendations that are workable, implementable, and defensible.

7.1 Alternatives Development Process

Dibble will prepare development alternatives incorporating both airfield and landside components based on the findings from the inventory, forecasts of aviation activity, and facility requirements findings, as well as input from Airport management, the FAA, and the PAC. These alternatives will identify options and configurations to meet projected facility requirements for each major facility component (i.e., airfield and landside development). The alternatives will undergo a screening and evaluation of criteria largely framed by operational performance, construction feasibility, environmental considerations, and financial feasibility.

The alternatives evaluation will investigate the advantages and disadvantages of providing new facilities, facility closure, facility creation and expansion, and facility repurposing. Based on alternatives evaluation criteria and Airport development goals, the evaluation process is structured to systematically evaluate options and provide the technical basis for arriving at a preferred development concept.

7.2 Preferred Development Alternative

Dibble will identify and carry forward a preferred Airport development concept as a direct result from the evaluation process. An exhibit of the preferred development will be created and provided to Airport management and the PAC (including an FAA representative) for review. Once finalized, the exhibit of the preferred development will be carried forward to be used for the ALP, Capital Improvement Plan (CIP), cost estimates, and funding analysis.

Deliverable: Working Paper 2

The Facility Requirements and Capacity Analysis (Element 6) and Alternatives Development (Element 7) will be summarized into draft Working Paper 2 (WP2). Draft WP2 will be submitted for review by Airport management and the PAC. Any edits or changes will be incorporated after a review period and finalized to be used in the final Master Plan.

Element 8 – Airport Layout Plan Drawing Set

Dibble will prepare the Airport Layout Plan (ALP) Drawing Set according to FAA standards as defined in Advisory Circular (AC) *15015070-68, Airport Master Plans, AC 150/5300-13A, Airport Design,* and FAA Airports Standard Operating Procedure (SOP) 2.00, *Standard Procedure for FAA Review and Approval of Airport Layout Plans (ALPs)* and FAA SOP 3.00, *FAA Review of Exhibit 'A' Airport Property Inventory Maps.*

In addition to the AGIS data described herein (provided by **NV5 Geospatial**), sources of information for these drawings in this element will include previous Airport Layout Plans (ALPs) and master planning documentation, published instrument procedures (IAPs), USGS mapping, legal descriptions, property surveys, local and regional government mapping, aeronautics databases, and other sources readily available to the Consultants. The drawing set will include the following sheets, at a minimum:

- Title
- Airport Data Summary
- Airport Layout Plan (ALP)
- Terminal Area Plan
- Airport Airspace Plan and Profile (14 CFR Part 77 surfaces)
- Inner Portion of the Approach Surface – Runway 17
- Inner Portion of the Approach Surface – Runway 35
- Departure Surface (Future) – Runway TBD
- Airport Land Use (On- and Off-airport)
- Airport Property Inventory Map (Exhibit "A")

8.1 Title Sheet

The Title Sheet will be prepared and will include applicable information such as the name and location of the airport and sponsor, location and vicinity maps, an index of sheets contained within the set and the date of the set.

8.2 Airport Data Summary Sheet

This sheet will contain all pertinent data associated with the existing and future airport development summarized in tables according to the FAA SOP 2.00 checklist.

8.3 Airport Layout Plan (ALP) Sheet

An Airport Layout Plan (ALP) will be prepared in accordance with the findings, recommendations, and approvals resulting from the Study, as well as from FAA AC 150/5070.6B, Appendix F, *Airport Layout Drawing Set*, and AC 150/5300-13A, *Airport Design*. The ALP shall be developed using AGIS base mapping provided by **NV5 Geospatial** and from information gathered from previous tasks. The ALP will depict the configuration and general dimensioning of existing and future airport facilities (within the 20-year planning period).

8.4 Terminal Area Development Plan Sheet

A Terminal Area Development Plan will be created reflecting development of building areas at the airport, typically the FBO or Airport Administration area at GA airports, to reflect the recommended development. Other areas that may be included in this drawing are surface access, security fencing, and other airport facilities. Access and vehicle parking facilities for the Airport will also be included in this drawing as needed.

8.5 Airport Airspace Sheet

The Airport Airspace drawing will be prepared depicting obstacle identification surfaces for the ultimate Airport development configuration. Based on the AGIS survey, it will also depict airspace obstructions for the portions of the surfaces excluded from the Inner Portions of the Approach Surface Drawing.

Per criteria outlined in 14 CFR Part 77, a topographic drawing will be prepared depicting a plan view of the ultimate Airport 14 CFR Part 77 surfaces and a small-scale profile view of the 14 CFR Part 77 approach surfaces. Natural and manmade obstructions to the airspace surrounding the Airport will be identified. The obstacle data obtained will be used as a basis

for developing the drawing. Airspace case studies for proposed structures near the Airport will be reviewed for potential new objects and or obstructions to the 14 CFR Part 77 Airspace.

8.6 Inner Portion of the Approach Surfaces and Departure Surface Sheets

In accordance with FAA SOP 2.00, the Inner Portion of the Approach Surface Drawings will be prepared depicting the plan and profile view of the area from the runway threshold out to where the ultimate approach surface slope is 100 feet above the threshold elevation, including existing and planned approach slopes, controlling structures and other objects penetrating approach surfaces using AGIS survey information from previous tasks. These drawing also will include a runway centerline profile that shows the full length of the runway and runway safety areas, the RSA, runway elevations, RSA gradients and all vertical curves. This may require additional drawing sheet to show runway vertical curves.

A plan showing the existing and future runway safety areas, runway protection zones, and associated approach areas will be developed for each runway end. Plan and profile views of each area will be developed identifying all physical obstructions. The obstruction's height and location will be noted by dimension lines. Any obstruction requiring removal or relocation to meet FAA standards will be noted and an action plan identified. A corresponding obstruction table will be provided with each approach surface identified.

Additionally, should an instrument approach procedure (IAP) for either Runway 17, 35, or both, be agreed upon during the Facility Requirements and Alternatives Development, a departure surface drawing will be required for the corresponding runway end opposite of the runway end with the IAP. A separate obstruction table will be included delimitating departure surface obstructions and proposed disposition.

8.7 Land Use Plans

This sheet will depict existing and recommended uses of all land within the ultimate Airport property line (on airport) and within the vicinity of the Airport (off airport). This will include area surrounding the Airport that falls within the existing Airport Influence Area, as well as consideration of recent development proposals near the Airport. Land uses will be depicted by general land use categories as found within the City and/or County land use and zoning codes. Places of public assembly will be denoted, including churches, schools and parks. In addition, local zoning restrictions that are in place to protect the airport and surrounding airspace will be shown, if applicable.

Existing and future noise contours for BXK will be developed using the FAA's Aviation Environmental Design Tool (AEDT) and existing and projected aircraft operations data. These contours will be displayed on the Land Use Plan drawing, as well as used in other areas of the ALP set and/or Master Plan report.

8.8 Airport Property Inventory Map (Exhibit "A")

In accordance with FAA SOP 3.00, *Standard Operating Procedure for FAA Review of Exhibit "A" Airport Property Inventory Maps*, an Exhibit 'A' Airport Property Inventory Map will be updated using the existing Airport Property Map, as well as any other existing or supplemental property and/or easement information supplied by the Airport. This scope of services does not include significant title or parcel research or title commitment work and will not incorporate any property/parcel information other than that provided by Airport or other secondary sources. This drawing will be prepared using existing documents, maps, and land use plans furnished to the Consultants or readily accessible through the County Assessor or Recorder Office.

8.9 Airport Public Disclosure Map

Dibble will prepare a Public Airport Disclosure Map in accordance with A.R.S. 28-8486 as part of the Study. Dibble will provide the Airport with an electronic file of the completed map separately from the ALP set so that the Airport may submit the map to the City's Recorder's Office.

Element 9 – Implementation Plan and Funding Analysis

This element provides an overview of the development via a phased project list, or implementation program, as well as a financial analysis related to funding the projects presented as a part of this Master Plan Study.

9.1 Prepare Probable Costs

Dibble will prepare probable costs of proposed projects, based on current dollars, for the first five-year period; a more generalized cost breakdown will be prepared for the six-through twenty-year period. Proposed project costs will be prepared using unit prices extended by the size of the facility tempered with some specific considerations. Probable cost estimates will be based the Consultant's knowledge of major development projects within the region, construction material suppliers, and work performed at comparable

facilities. Probable cost estimates are intended to be used for planning purposes only and are not to be construed as final engineering construction costs.

9.2 Implementation Schedule and Airport Capital Improvement Program (ACIP)

Dibble will prepare an implementation schedule and capital improvement plan for the Airport. The implementation schedule identifies all airport development projects within the 5-year, 10-year and 20-year planning periods. The short-term (5-year) plan will be integrated and developed into the upcoming Airport Capital Improvement Program (ACIP) where applicable, recognizing that local, state, and federal funding may already be dedicated.

The Capital Improvement Program (CIP) in general found within this task identifies all projects noting total estimated development costs (as described above), project priorities, and appropriate types of FAA funds to be programmed for implementation. The CIP will also consider the potential for other sources of funding for projects not considered eligible for FAA funding or considered a low priority for FAA funding.

9.3 Evaluate Funding Sources

Dibble will evaluate project funding sources, including FAA and ADOT grant programs, to assist in identifying the appropriate funding sources available for future capital improvement projects listed on the recommended ACIP and beyond.

Element 10 – Recycling and Solid Waste Management Plan

Dibble will prepare an airport solid waste recycling plan in accordance with the *FAA Modernization and Reform Act of 2012* (FMRA) and the September 30, 2014, FAA Memorandum titled, *Guidance on Airport Recycling, Reuse and Waste Reduction Plans*. This effort will be conducted in coordination with the City of Buckeye (Sponsor) and/or representatives from the City's contractors and tenants, including the FBO, as needed.

As specified by the FAA, this effort will address the recycling, reuse, and reduction of municipal solid waste (MSW) including construction and demolition debris, compost, and other material which can be disposed of in a non-hazardous waste landfill and excluding other types of solid waste such as hazardous waste, universal waste, or industrial waste. As specified by the FAA, the scope of this element includes "all areas under direct control of the sponsor, and when applicable, areas over which the sponsor has influence." This plan will be developed through the following tasks, which are aligned with the FMRA requirements and FAA guidance:

10.1 Facility Description and Background

The Consultant will gather, assess, and describe background information about the Airport, the Airport's current solid waste recycling, reuse, and waste reduction efforts (if any) and program performance. One telephone interview with City, Airport and/or FBO staff will be conducted to gather data for this task. Photographs of and other information about waste-related infrastructure and practices will be gathered during the inventory phase of the master plan (no separate visit is planned under this task). City, Airport and/or FBO staff may be asked to provide additional data and information collected under the existing program (copies of invoices and contracts, etc.).

10.2 Waste Audit

The Consultant will examine records and other information provided by the Airport to identify and document the source, composition, and baseline quantity of MSW waste streams generated at the facility. A physical waste sort will not be conducted under this task.

10.3 Review of Recycling Feasibility

The Consultant will research, assess, and describe factors affecting the Airport's ability to recycle and identify and describe constraints.

10.4 Operation and Maintenance (O&M) Requirements

The Consultant will review and describe waste handling and parties responsible for each area and waste stream.

10.5 Review of Waste Management Contract

The Consultant will review and describe current contracting and funding for waste management at the Airport.

10.6 Potential for Cost Savings or Revenue Generation

The Consultant will develop, and present recycling program recommendations based on review of the preceding work and compare the cost of landfilling waste with recycling, compost, or reuse.

10.7 Plan to Minimize Solid Waste Generation

The Consultant will develop and document recycling program recommendations based on review of the preceding work and compare the cost of landfilling waste with recycling,

compost, or reuse. The Consultant will develop and document the final recycling, reuse, and waste reduction program recommendation(s), based on information obtained in the previous tasks.

This task will describe:

- The Airport's program to recycle paper, plastic bottles and cups, and aluminum cans
- The Airport's plan to reduce the amount of waste being disposed of in landfills,
- Recommended updates to contracts, leases, or other agreements,
- Any capital improvements recommended to support waste diversion,
- Alignment of waste plan with other Airport plans,
- How waste diversion will be included in new development,
- How the Airport will track the recommendations and improve performance,
- Enhancements for future consideration,
- Conditions that will trigger re-evaluation, and
- Recommendations education and outreach to employees, tenants, and the travelling public on recycling.

Deliverable: Working Paper 3

The Implementation Plan and Funding Analysis (Element 9) will be summarized into draft Working Paper 3 (WP3). Draft WP3 will be submitted for review by Airport management and the PAC. Likewise, a draft of the complete Airport Layout Plan Drawing Set and the Recycling and Solid Waste Management Plan (RSWMP) will also be submitted for by Airport management and the PAC separately during this time. Any edits or changes to WP3 or the draft ALP set or RSWMP will be incorporated after a review period and finalized to be used in the final Master Plan.

Element 11 – Documentation

An effective airport master plan places emphasis on developing concise, effective study documentation. Several types of materials will be produced to document the planning process as noted below. The chapters will be provided as drafts for Airport and PAC review and revised into Draft and Final reports. Where possible, working papers and memos will be prepared and distributed electronically to reduce paper waste.

11.1 Working Papers, Memorandums, and Meeting Materials

Dibble will prepare three Working Papers (containing draft report sections that will, when finalized, become chapters in the Draft and Final Reports). Digital copies will be distributed in advance of PAC or other meetings. Dibble will provide hard copies for Airport staff and the PAC members as required and if requested.

Additionally, memorandums or other meeting materials documenting each phase of the study's technical analysis will be prepared as needed and distributed for the Airport's and PAC's review and comment. Dibble will also develop graphics (boards or PowerPoint presentations) to convey the project information as necessary for various meetings.

11.2 Draft and Final ALP Drawing Set

Dibble will prepare the draft Airport Layout Plan drawing set and complete the FAA ALP checklists (SOP 2.00 & SOP 3.00) and distribute to the City, FAA, and ADOT for review and comment. Final documents will reflect appropriate responses to comments received on draft materials from all reviewing agencies. This task includes time needed for revisions, as well as coordination between the Airport and FAA during the submittals process.

11.3 Draft and Final Master Plan Report

Dibble will prepare the draft Master Plan report and distribute electronically to the City, PAC, FAA, and ADOT for review and comment. Comments received will be incorporated and distributed to the City for review prior to the final report publication. **Dibble** will also assemble review comments and public input from the public involvement program and will incorporate them into the final report, as appropriate.

The final Master Plan report will be submitted for approval and adoption by the City. **Dibble** will assist Airport staff with the local adoption process by the Buckeye City Council and Mayor of Buckeye. Appropriate copies of minutes or other documentation describing the municipalities' action to adopt the Master Plan Study and associated ALP Drawing Set will be provided to the FAA.

Dibble will provide two (2) hard copies of the final Master Plan and ALP Drawing Set to the City. Additionally, digital copies will be provided on a thumb drive or through electronic file transfer containing the full report, appendices, and ALP drawing set. The FAA requires one (1) hard copy of the Final Report and ALP set for their files, as well as digital copies (in PDF format). At this time, ADOT only requires electronic copies of the final report and ALP set.

11.4 Executive Summary

Dibble will prepare an Executive Summary of the Airport Master Plan Study, summarizing the results of the analysis and outcomes. The format of the Executive Summary is to be determined, but it will be like other Master Plan Study documents. The Executive Summary

will be prepared as a stand-alone document and provided electronically to Airport staff for printing and distribution as needed, unless hard copies are specifically requested.

Summary of Work Product Deliverables

Work products prepared by Dibble or its Subconsultants at various stages throughout the Study are summarized in **Table 2**. All deliverables intended for public use will be in a format that can be uploaded to the City or Airport website.

Table 2 – Summary of Work Product Deliverables

Deliverables	City	PAC	FAA	ADOT
Draft Working Paper 1 (electronic)	1	1	-	-
BXK Aviation Activity Forecasts Technical Memorandum (electronic)	1	-	1	-
Draft Working Paper 2 (electronic)	1	1	-	-
Draft Working Paper 3 & Draft Recycling Plan (electronic)	1	1	-	-
Draft ALP Drawing Set (electronic)	1	1	1	1
Final ALP Drawing Set (hard copy - signed)	2	-	1	-
Final ALP Drawing Set (electronic – signed)	1	-	1	1
Draft Final Master Plan Report (electronic)	1	1	1	1
Draft Executive Summary (electronic)	1	-	-	-
Final Master Plan Report (electronic)	1	-	1	1
Final Master Plan Report (hard copy)	2	-	-	-
Final Executive Summary (electronic)	1	-	1	1

Exceptions and Assumptions for this Scope of Work

- Dibble assumes that all information provided related to the Airport's current based aircraft count and annual operations are up-to-date and that the Airport has input their current based aircraft count into the FAA's Based Aircraft Registry at www.basedaircraft.com
- This scope of work does not include an actual property survey. All property boundary description information (i.e., metes and bounds, township/range/section, lot and block, plat or other appropriate property description) will be collected via the County Recorders Office or provided from the appropriate City department to the Consultant.
- A physical waste sort and inventory will not be conducted as a part of the Recycling and Waste Reduction Management Plan.
- A Study-specific website will not be created as a part of the project. All documents and announcements of the Airport Mater Plan will reside on the Airport's existing website. Dibble will provide all documents and text related to the Airport Master Plan and the City IT or other designated department will be responsible for its upload to the Airport's webpage.

Phoenix, AZ 85020

Project: 039869 | Aeronautical Obstruction Survey – Buckeye Municipal Airport (BXK)

Dear Mr. McDermott,

This summary of work describes our understanding of the scope of work and services required for an aeronautical obstruction survey and Airport Layout Plan update at the Buckeye Municipal Airport (BXK) located in Buckeye, AZ. The project will be done in compliance with Airports GIS Program policies and will include an airport airspace analysis for vertically guided operations for existing Runway 17/35. The Advisory Circulars identified below detail the data collection requirements and accuracies for the project and the verification process by the Federal Aviation Administration (FAA) and the National Geodetic Survey (NGS).

- AC 150/5300-16B "General Guidance and Specifications for Aeronautical Surveys: Establishment of Geodetic Control and Submission to the National Geodetic Survey"
- AC 150/5300-17C, Change 1 "Standards for Using Remote Sensing Technologies in Airport Surveys"
- AC 150/5300-18B, Change 1 "Survey and Data Standards for Submission of Aeronautical Data Using Airports GIS

Summary of Work

We understand that the purpose of this project is to accomplish an FAA Airport Airspace Analysis Survey for all surfaces defined in FAA Advisory Circular 150/5300 - 18B: Section 2.7.1.1 Runways with Vertical Guidance and to create planimetric and topographic for the airport property.

For this project, we will acquire new vertical stereo digital imagery at a physical image scale of 1"=2,500 of the obstruction surface areas and 1"= 1,250' of the airport property. The aerial imagery will cover all of the VG Airspace Analysis surfaces using an UltraCam Falcon Prime (UCFp), or comparable, during leaf-on conditions.

From the 1"=2,500 imagery, we will produce the following:

- Limited landmark feature planimetric mapping
- Color digital orthophotos with a 1.0' pixel resolution
- Identification and mapping of obstruction obstacles for all of the VG surfaces

From the 1"= 1,250 imagery, we will produce the following:

- 100 scale mapping with 2' contours of the existing airport property (808 acres)
- Identification and mapping of obstruction obstacles for the VGRPS, VGPCS, VGPS & NVGPS surfaces

The online SOW will be prepared during project initiation with input from the airport, client and Quantum Spatial. Quantum Spatial will be responsible for preparation and submittal of the Survey and Quality Control Plan, Imagery Acquisition Plan, Imagery Acquisition Report and all associated data files as required for submission to the FAA Airport Data and Information Portal (ADIP).

Quality Standards

The project has been designed to conform to the National Map Accuracy Standards for 1"=100' scale planimetric feature collection, two foot contours and six and twelve inch orthophoto production. In addition, we ensure that the photogrammetric mapping will meet all FAA and NGS standards. We will exercise reasonable care and will conform to the standards of practice ordinarily used by the photogrammetric profession.

Project Area

The project area encompasses all of Buckeye Municipal Airport (BXK) inclusive of the obstruction surfaces as defined in AC 150/5300-18B.

Control Surveying

The aerial photography will be completed with ABGPS control which will be used for the base control for the geo-referencing of the aerial imagery. Quantum Spatial will process the ABGPS data using COR stations and reference it to the project control datums:

Horizontal: North American Datum of 1983/2011 (NAD 83(2011)), in the AZ State Plane Coordinate System, Central Zone in International survey feet.
Vertical: North American Vertical Datum of 1988 (NAVD 88)

QSI will complete all of the remaining on-site ground control surveys, including:

- Geodetic control validation of the existing airport PACS and SACS stations or establish temporary airport control according to the guidelines established in AC 150/5300-16B
- Establishing all necessary photo-identifiable ground control and FAA mandated check-points required to validate the ABGPS and IMU control. Quantum Spatial will provide information on the specific locations of the required control and check points.
- Collection of all the airport runway end positions
- Collection of vertical profiles for all runways
- Collection of the position, elevation, and where required the appropriate navigational aid perpendicular point of all electronic and visual navigational aids (NAVAIDS) located on the airport and associated with any current instrument approach servicing the airport
- All other tasks, not specifically listed above, as outlined in FAA AC-18B, Table 2-1 "Airport Layout Plan"
- Final Survey Report

Photogrammetric Mapping

We will collect the features designated in the attachment at 1"=100' scale mapping within the mapping limits identified in the attached exhibit. We will build a digital terrain model (DTM) by collecting masspoints and breaklines. These DTM elements will be used to construct a triangulated irregular network (TIN) surface from which 2' contours will be interpolated. Contours will be dashed in areas where the ground is obscured by trees, dense brush, deep shadows or other obstructing features. Dashed contours indicate a lower level of accuracy. Additional field surveys should be performed in areas of dashed contours prior to design. All contours will be continuous polylines. The final data will be delivered in ESRI Shapefile format (FAA) and ESRI Shapefile and AutoCAD format (Dibble).

Orthophoto Mapping

We will use the control solution and imagery to generate a Digital Elevation Model (DEM) of the VG surfaces. The imagery will be processed into color digital orthophotos using the aforementioned DEM to rectify the images. Orthophotos for the entire project area will be developed with a 1.0' pixel resolution and for the airport property, with a 0.5' pixel resolution. Orthos will be delivered in a GeoTIFF file format.

18B Obstruction Surveys

The Obstructions Surfaces to be uploaded to ADIP will satisfy the requirements of AC 150/5300-18B:

- 2.7.1.2 Analysis of EXISTING Runway 17/35 with Vertically Guided Operations
  (Surfaces include the VGRPS, VGPCS, VGAS, VGPS, VGATS, VGHS and VGCS)

The specific types and quantities of obstructions for each surface are outlined and clearly defined for the particular surface in each circular section. Any obstructions that meet the requirement of the circular, but are of a nature that elevations at the highest point of the obstruction are virtually impossible to read through photogrammetric methods (cell tower, electrical tower, etc.), will be identified and relayed to the surveyor to initiate field surveyed elevations for the obstruction.

The obstruction delivery will include the limited landmark planimetric feature collection.

The final data will be uploaded to ADIP in ESRI Shapefile format.

Deliverables

QSI will submit all data collected and associated required deliverable in the formats specified in the appropriate advisory circulars to the FAA Office of Airports, Airports Surveying-GIS Program. All data submissions to the FAA will be through the program's web site at http://airports-gis.faa.gov.

The AC 150/5300-17C project data deliveries that will not be submitted through the web site will be delivered on external hard drives or DVDs.

The 18B deliverables that will be uploaded to ADIP include:

- Imagery Plan and Survey and Quality Control Plan
- Image Delivery (sent to FAA)
- Color digital orthophotos (sent to FAA)
- Digital limited landmark detail outside the airport
- Obstruction survey data for **EXISTING** Runway 17/35
- Photogrammetrically derived and surveyed attributes in defined format
- Surveyed ends and profile for each runway
- NAVAID data
- FGDC compliant metadata
- Final Report

We will deliver the following items to Dibble:

- Two foot contours and planimetrics in Civil 3D format format
- Color digital orthophotos with a 1.0' pixel resolution in GeoTIFF (project area)
- Color digital orthophotos with a 0.5' pixel resolution in GeoTIFF (airport property)
- 2 color enlargements (30"x40") covering the airport and surrounding area (mounted/laminated/framed)

All digital files will be delivered on external hard drive, FTP or CD/DVD.

Cost and Payment Terms

Compensation for the above services will be provided as a lump sum cost of U.S. $79,888.00.

Client Responsibilities

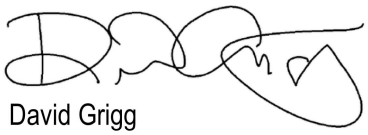
The successful and timely completion of this project is dependent upon a number of elements and work tasks, some of which involve participation by Dibble. You will be responsible for designating a representative for the project who will have the authority to transmit instructions, receive information, and make timely decisions with respect to the services provided by Quantum Spatial.

Quantum Spatial Representative

Jill Mahoney, Project Manager and Marlin Zook, Technical Manager, will represent us during the performance of the services to be provided under this agreement. Each has the authority to transmit and receive instructions and make decisions with respect to the services. Each is authorized to commit the necessary resources towards completing the services described herein.

We look forward to working with you and your staff to complete this project in a timely and cost effective manner. Should you have any questions, please call me at 803-351-3136 or email me at the address shown below.

Sincerely,
Quantum Spatial, Inc.



David Grigg
Aviation Program Director
dgrigg@quantumspatial.com

Scope of Work
Airport Master Plan – Analysis of Business Opportunities
Buckeye Municipal Airport

Genesis Consulting Group, LLC (Genesis), as a Subconsultant to Dibble, will conduct a business analysis and evaluation to identify the aviation businesses and airport intensive industries that are best suited for both the community (based upon economic/demographic profile) and the Airport (based on capabilities and infrastructure). Furthermore, Genesis will identify the existing relevant attributes of the Airport and will also identify national and local trends in general aviation, as well as current and forecasted Airport/area usage patterns. Based on the revised aviation demand forecasts prepared as part of Element 5 and on City/Airport input, this task will also analyze proposed businesses for the Airport, identify specific industries, and evaluate factors that will be relevant to the success of those ventures. Based upon these factors, and those outlined in previous tasks, target business types and activities for both airside and landside development will be identified. Major elements of this process will include the following:

Document Development Outline

Situational Analysis
A current operational evaluation of airport facilities and services, developable space, analysis of existing service area, and traditional markets.

General Aviation, Commercial Airline and Air Cargo Services
Evaluation of current and future opportunities for GA activities including critical passenger service, flight training, and personal flying operations. Additionally, evaluate the airports capability to attract and accommodate additional services such as a Corporate Jet Center, Emergency service aviation, Scheduled commercial airline service, commercial charter services, and air cargo and package services.

Opportunities for Corporate and Facility Development
Analysis of airside and adjacent landside development locations providing office, research & development, and warehousing space, with access primarily to local, intrastate and some interstate markets.

MRO Development, Maintenance and Storage Hangar Development
Evaluate opportunities for major maintenance facilities and support operations along with large aircraft storage options.

Airport Concessions and Small Business
Airports often support opportunities for smaller business entities such as restaurants, rental car facilities, bookstores, and shops. This element will evaluate the potential and demand for such concessions at Buckeye Municipal Airport.

Emerging Technologies
Currently the world is experiencing a major surge in new transportation systems or "emerging technologies" that include everything from autonomous ground and air vehicles to VTOL local air systems, to UAS or "drone" systems for the movement of people and cargo. Many of these "emerging technologies" can be a good fit for the airport environment. This section will analyze some of the opportunities that could be accommodated at Buckeye Municipal Airport.

Summary
Based on the evaluation of factors shown above, target business types and activities for both airside and landside development will be identified, and recommendations made for their inclusion in future Buckeye Municipal Airport planning efforts.

Deliverables

Dibble will perform a QA/QA review of draft and final documents and incorporate into the Airport Master Plan. Deliverables include:

1 Draft Document
1 Final Document

Re: Buckeye Municipal Airport Cultural Resources Inventory

Dear Charlie:

SWCA Environmental Consultants (SWCA) appreciates the opportunity to provide you with our scope of work and cost estimate to complete a cultural resources inventory of the Buckeye Municipal Airport in Maricopa County, Arizona, in preparation for a new Airport Master Plan. It is our understanding that this project will require the following: 1) a Class I cultural resources records review; 2) a Class III pedestrian cultural resources survey; and 3) a report that meets the requirements of the Federal Aviation Administration, the Arizona State Museum, and the Arizona State Historic Preservation Office.

The cost to complete these tasks, as described in the attached scope of work, is a **Fixed-Fee** total of **$24,060**. SWCA can begin work immediately upon successful execution of a contract and receipt of notice to proceed from Dibble Engineering. We understand that this project would fall under our on-call contract with the airport and the rates associated with the on-call. The cost estimate is valid for 3 months, after which time we reserve the right to create a new cost estimate.

Thank you for providing us with the opportunity to work with you. If the scope of work and cost estimate are acceptable to you, please provide us with contractual arrangements. After receipt of a signed contract, we will be able to start work immediately. Please contact me at egladding@swca.com or (520) 348-3384 if you have any questions regarding this proposal.

Sincerely,

Eleanor R. Gladding

Eleanor Gladding
Senior Biologist/Project Manager

SCOPE OF WORK

CULTURAL RESOURCES SURVEY

SWCA Environmental Consultants (SWCA) will conduct a cultural resources inventory of the approximately 780-acre project area, which consists of the existing and northern ultimate extent of the Buckeye Municipal Airport, Buckeye, Maricopa County, Arizona. SWCA understands that the project area consists of Arizona State Land Department State Trust land and City of Buckeye–managed land in Sections 8, 17, and 20, Township 1 North, Range 4 West (Gila and Salt River Baseline and Meridian).

The cultural resources inventory includes three components: a Class I cultural resources records review, fieldwork, and report preparation. These three components are detailed below.

CLASS I CULTURAL RESOURCES RECORDS REVIEW

Prior to undertaking fieldwork, SWCA will conduct a cultural resources records review (Class I) to identify any previously conducted cultural resources projects, previously recorded archaeological sites, and any National Register of Historic Places (NRHP)-listed buildings and structures within 1.0 mile of the project area. This research will include a review of the AZSITE database, which contains records from the Arizona State Historic Preservation Office (SHPO), Arizona State Museum (ASM), Arizona State University, and Bureau of Land Management. Additional background research sources include General Land Office plat maps, historic-era topographic quadrangles, aerial photographs, and the NRHP database. The results of the records search will be summarized in the survey report described below. Copies of the previously conducted survey reports will be obtained and provided to the client.

CLASS III PEDESTRIAN CULTURAL RESOURCES SURVEY

Prior to field survey, SWCA will file a notice of intent to survey state/municipal lands with the ASM under authority of SWCA's Arizona Antiquities Act (AAA) permit. Next, SWCA archaeologists will conduct a full-coverage pedestrian cultural resources survey (Class III) of the unpaved portions of the project area and a judgmental reconnaissance survey of the paved portions, adhering to survey methods established by the ASM. The archaeologists will examine the project area for the presence of archaeological artifacts, sites, and historic buildings/structures. Any previously identified archaeological sites will be updated and mapped, with significant changes in site characteristics described. Newly discovered archaeological sites will be mapped to scale and fully recorded in accordance with ASM and SHPO guidelines. Historic-era buildings and structures, if present, will be photographed. SWCA will evaluate the significance of all identified historic and prehistoric resources in terms of their eligibility for listing in the NRHP.

REPORT PREPARATION

Once fieldwork is complete, SWCA will prepare a report summarizing the results of background research and the survey. The report will evaluate the NRHP eligibility of all cultural resources identified in the project area and provide recommendations regarding the management of any significant cultural resources in the project area. The report will be prepared in a format acceptable to the Federal Aviation Administration and in accordance with current ASM and SHPO reporting standards.

COST ESTIMATE AND ASSUMPTIONS

Total cost to complete the cultural resources inventory: $24,060.

ASSUMPTIONS

- If for any reason the field crew is not able to access the project area as a result of access restrictions, additional costs could be incurred beyond the amount proposed herein.
- The cost includes the registration and curation fees with the ASM.
- Four archaeological sites are estimated to be identified and documented during fieldwork. No (0) in-use historic structures are estimated to be identified and documented during fieldwork. The documentation of additional sites or historic structures would require additional funds to complete.
- Deliverables will be provided to the client in electronic (PDF) format; no printed reports will be provided.
- This scope of work includes a single round of revisions to the report text. Any other reviews or revisions can be completed for an additional cost.
- SWCA will submit final deliverables to the ASM in accordance with ASM's submittal requirements.
- Any task not expressly described herein is not included in the proposed cost.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.L. Community Center Kitchen Remodel and Addition
DATE PREPARED: 12/16/21	**DISTRICT NO.:** 2
STAFF LIAISON: Chris Williams, Construction and Contracting Manager, cwilliams@buckeyeaz.gov, (623) 349-6225	
DEPARTMENT: Construction and Contracting	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on the Construction Contract (No. 2022012) between the City of Buckeye, an Arizona municipal corporation, and GCON, Inc., an Arizona corporation, to provide labor, materials, and equipment required for the expansion of the Buckeye Senior Center Kitchen and remodeling of the existing kitchen; and authorizing the Mayor to execute and deliver said Contract on behalf of the City.

RELEVANT GOALS:
GOAL 3: A Well-Planned Urban Community

ADDITIONAL RELEVANT GOALS:
GOAL 2: Enhanced Economic Well-Being and Vitality

SUMMARY

PROJECT DESCRIPTION:
This project will expand the Buckeye Senior Center Kitchen and remodel the existing kitchen at the east and south sides of the building. This project will add approximately 1,500 square feet onto the building and remodel 560square feet. The Scope of Work includes but is not limited to HVAC, flooring, electrical, gas connection, and plumbing. ADA accessibility, and other furniture fixtures and equipment are included in the Scope of Work, A solicitation was issued on September 9, 2021 and bids were due on October 14, 2021. The following three contractor submitted bids:

AP Southwest, LLC dba Adolfson & Peterson Construction $1,798,110.48

AW Contracting $1,987,866.00

GCON, Inc.$1,725,045.00

GCON, Inc. is the lowest most responsive and responsible bidder and best suited to be awarded the contract for this project.

BENEFITS:
Visitation and demand for meals/services at the Community Center has increased with the population growth in Buckeye, which results in the need for the expansion and remodel.

FUTURE ACTION:
None

FINANCIAL IMPACT STATEMENT:
This project is partially funded by a grant from the Community Development Block Grant from HUD and monitored by Maricopa County. Amount of Grant is $600,000. The balance of the project will be funded by the General Fund.

CURRENT FISCAL YEAR TOTAL COST:
$1,725,043.00

BUDGETED:
Yes

FISCAL YEAR:
2022

FUND/DEPARTMENT:
CIP2020019 50214150-543113

Items related to a project or facility location must include an attached vicinity map for Council Review.

CONSTRUCTION CONTRACT
BETWEEN
CITY OF BUCKEYE
AND
GCON, INC.

CONTRACT NO. 2022012

THIS CONTRACT is entered into between the CITY OF BUCKEYE, an Arizona municipal Corporation ("City") and GCON, Inc., an Arizona corporation ("Contractor"). The terms of this Contract are to be construed consistently with the other Contract Documents enumerated in Article 1 of the General Conditions of the Construction Contract.

In consideration of the mutual promises of the parties, the City and the Contractor agree as follows:

1. THE WORK: The Contractor shall furnish all labor, materials, equipment and services required for the remodeling and expansion of the Buckeye Senior Center Kitchen, pursuant to Exhibit C.

2. CONTRACT TIME: The Contractor shall commence Work only if and when directly by a written the Notice to Proceed signed by the City. Nothing in this Section shall be construed to prevent the City, at its sole discretion, from issuing a Partial Notice to Proceed. In the event of any conflict between the provisions of this Section and the General Conditions, this Section shall prevail. Substantial Completion, as defined herein, shall be achieved within **One Hundred Sixty (160) calendar days**. In view of the difficulty or impossibility of determining the City's damages from delay, should the Contractor fail to achieve Substantial Completion by that date, as extended by any City approved Change Orders, the Contractor agrees to pay and will pay to City, in addition to all other sums pursuant to the Contract Documents, the sum of **Seven Hundred Ten Dollars and Zero Cents ($710.00)** for each calendar day of delay as liquidated damages for such delay and not as a penalty. This sum may be withheld from the balance of the Contract Price as it becomes due. Should liquidated damages exceed the Contract Price due or to become due, then the Contractor shall pay the City the difference within 3 days of receipt of written demand.

3. CONTRACT PRICE: Subject to increases and decreases for Change Orders in accordance with the Contract Documents, the City shall pay to the Contractor the following Contract Price, in progress payments as provided in the Contract Documents: **One Million, Seven Hundred Twenty Five Thousand Forty-Three Dollars and Zero Cents ($1,725,043.00)** pursuant to Exhibit D.

4. SUPPLEMENTAL TERMS AND CONDITIONS: The following supplemental terms and conditions and/or documents are part of this Contract:
Exhibit A: General Conditions of the Construction Contract.
Exhibit B: Special Provisions.
Exhibit C: Technical Specification and Plans.
Exhibit D: Bid Forms.

THEREFORE, the City of Buckeye by its Mayor and City Clerk have hereunto subscribed their names this _____.

GENERAL CONDITIONS

ARTICLE 1
GENERAL DEFINITIONS

"Addenda" means clarifications or changes in the Work provided to bidders in writing prior to the public bid on the Contract.

"Contract Documents" or "Contract" means the Construction Contract between City and Contractor, the General Conditions of the Construction Contract, any Supplemental Conditions of the Construction Contract, the Drawings, the Specifications, the Performance and Payment Bonds, the Project Manual, Addenda and Modifications.

"Date of Substantial Completion" shall be the date certified by the City that the work is in the Condition defined herein as substantial completion.

"Day" means calendar day unless specifically otherwise provided herein or by law.

"Modifications" means Change Orders signed by the City, or other written amendments signed by both the City and the Contractor at or after the execution of the Contract, or the City's written interpretations or directions for minor changes in the Work. A “minor change” is defined as one having no impact on cost or time or the City’s approved design intent, as determined by the City.

"Project" means all components of the improvements to be constructed for the City, regardless of whether the Work is all or only a part.

"Project Manual" means the written volume so titled which includes the bid documents, sample forms, specifications, and description of the project.

"Substantial Completion" means the Contractor's work is sufficiently complete in accordance with the Contract Documents so that the City can occupy or utilize the work or designated portion thereof for the use for which it is intended.

"Work" consists of all labor (including supervision), materials, equipment, supplies and other items reasonably required to construct all or a portion of the Project according to the Contract Documents.

ARTICLE 2
INTENT

A. The Contract represents the entire and integrated agreement between the City and the Contractor, and it supersedes all prior oral or written negotiations, representations or agreements. The Contract may only be changed by written modifications, and the Contractor understands and agrees that if the Contractor proceeds with any work upon verbal request only, Contractor is agreeing by his conduct that such work, or change in the work, constitutes a minor change.

B. The Contract Documents are to include all items reasonably necessary to construct the Work, expressly or by inference. Words and abbreviations which have well-known technical or trade meanings are used in the Contract Documents in accordance with such recognized meanings.

ARTICLE 3
CONTRACTOR

A. The Contractor is the individual or legal entity identified in the Contract Documents who is licensed to perform the Work under the laws of the State of Arizona. The Contractor shall only use duly licensed Subcontractors in connection with the Work, subject to the provisions for City approval contained in the Contract Documents.

ARTICLE 4
OTHER CONTRACTORS AND COOPERATION

A. The City reserves the right to award other contracts related to the Project, or to perform certain work itself. Such other work may or may not be known to the City or disclosed to the Contractor prior to bidding this project. The Contractor shall afford the City and other contractors reasonable opportunity for the introduction and storage of their materials and equipment and the execution of their work, and shall properly coordinate its Work with theirs in such manner as the City may direct. The Contractor shall also assure at its own cost reasonable access of other contractors to the site and their work.

B. Upon request of the Contractor, the City will provide the Contractor with a copy of all plans, specifications, schedules and other data relating to other contracts or work. The Contractor shall thoroughly examine these documents and shall within three (3) days of completing such examination notify the City in writing of any conflicts with the Work to be performed by the Contractor. In no event shall such notice be given so late as to interfere with or delay the work to be performed by the Contractor. Failure of the Contractor to request, review, or provide written notice as provided above shall constitute a waiver of any objections or claims the Contractor may have as a result of the necessity to coordinate the Contractor's work with other activities.

C. Should the Contractor sustain any damage through any act or omission of any other contractor, Contractor shall have no claim or cause of action against the City for such damage and hereby waives any such claim. The Contractor does not waive any claim or cause of action against any other contractor or subcontractor to recover any and all damages sustained by reason of the acts or omissions of such other contractor. The phrase "acts or omissions" as used in this section shall be defined to include, but not be limited to, any reasonable delay on the part of any such other contractor, whether due to negligence, gross negligence, inadvertence or any other cause.

D. Should the Contractor cause damage to the work or property of any other contractor or of the City, the Contractor shall upon receiving due notice, promptly attempt to settle with such other contractor by agreement, repair or otherwise to resolve the dispute. If such separate contractor sues or initiates a proceeding against the City on account of any damage alleged to have been caused by the Contractor, the City shall notify the Contractor who shall, to the furthest extent permitted by law, indemnify and hold harmless for, from, and against defend such proceedings, and if any

judgment or award against the City arises there from the Contractor shall pay or satisfy it and shall reimburse the City for all attorney's fees and court or other costs which the City has incurred.

ARTICLE 5
SITE CONDITIONS AND ENVIRONMENTAL MATTERS

A. The Contractor shall thoroughly acquaint himself with all available information concerning the conditions of the Work and is responsible for correctly and fully estimating the difficulty and cost of successfully performing the Work.

B. The Contractor agrees that it has thoroughly examined the site, plans and specifications, boring data and all other soils information and as-built data made available and by submission of the bid herein avows that it has satisfied itself as to the character, quality and quantity of surface and subsurface materials or existing obstacles to be encountered. The Contractor acknowledges that boring data and other soils information and as-built data made available is only a general indication of materials and/or conditions likely to be found adjacent to holes bored or in existing structures or facilities or other areas. If the Contractor determines that the information is erroneous, inadequate or ambiguous, it shall immediately report its conclusions to the City in writing. If the Contractor determines that the information is erroneous, inadequate, or ambiguous, and after reporting its conclusions to the City, remains dissatisfied or uninformed, the Contractor shall refrain from submitting a bid, or if the Contractor does submit a bid, the Contractor shall be deemed to have waived any claim it may have as the result of the alleged erroneous, inadequate or ambiguous information.

C. The Contractor shall immediately, and before such conditions are disturbed, notify the City in writing of:

1. Subsurface or latent physical conditions encountered at the site which differ materially from those indicated in the Contract and which were not known by the Contractor or could not have been discovered by careful examination and investigation of the information available at bid time and which could adversely affect the timely performance of the Work or its cost; or

2. Unknown and unexpected physical conditions at the site, of an unusual nature, differing materially from those ordinarily encountered in the locale or generally recognized as inherent in Work of the character provided for in the Contract.

D. The City shall within ten (10) days, or such other reasonable time as necessary, investigate the conditions discovered. If the City find that conditions are so materially different as to support an equitable adjustment in the Contract Price or the Contract Time, this will be done by written Change Order. If the City determine that no Change Order will be issued, the Contractor shall continue with the Work at no additional cost and under no change in Contract Time.

E. No claim by the Contractor for an increase in the Contract Price or Contract Time hereunder shall be allowed without proper advance notice and an adequate opportunity for the City to investigate.

F. Environmental Matters: Contractor shall provide or cause to be provided a copy of this Section (Environmental Matters) to each Subcontractor and each Sub-subcontractor participating in the Work.

1. Definitions. The following terms will have their respective designated meanings:

"**Environmental Law**" means any and all laws, ordinances, regulations, rules and administrative and court decisions (federal, state and local) now or hereafter in effect and as in effect from time to time and as amended from time to time pertaining to environmental conditions or to protection or regulation of the environment (including, without limitation, the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended (42 U.S.C. Section 9601, et seq.); the Resource Conservation and Recovery Act of 1976 and the Solid Waste Disposal Act (42 U.S.C. 6901, et seq.); the Toxic Substances Control Act of 1976 (15 U.S.C. Section 2601, et seq.); the Superfund Amendments and Reauthorization Act of 1986, Title III (42 U.S.C. Section 11001 et seq.); the Clean Air Act (42 U.S.C. Section 7401, et seq.); the Federal Water Pollution Control Act (33 U.S.C. Section 1251, et seq.); the Safe Drinking Water Act (42 U.S.C. Section 300f, et seq.); the Hazardous Materials Transportation Act (49 U.S.C. Section 5101, et seq.); the Oil Pollution Act (33 U.S.C. Section 2701 et seq.); the Arizona Environmental Quality Act (Arizona Revised

statutes Section 49-101, et seq.); the Arizona Underground Storage Tank Act (A.R.S. Section 49-1001, et seq.); the Arizona Water Quality Assurance Revolving Fund Act (A.R.S. Section 49-281, et seq.) and any successor statutes to the foregoing and any regulations, rules or guidelines promulgated pursuant thereto.)

"**Hazardous Substance**" means any of the following: (i) any petroleum, oil, gasoline, kerosene, other petroleum product, flammable substance, volatile organic compound, volatile solvent, explosive, asbestos, polychlorinated biphenyl, dioxin, toxic herbicide or pesticide, radioactive material, radon gas and materials containing formaldehyde; (ii) any material, substance or waste now or hereafter defined as or included in the definition of "hazardous substances," "hazardous wastes," "hazardous materials," "extremely hazardous wastes," "extremely hazardous substances," "restricted hazardous wastes," "toxic substances," "regulated substances," "solid wastes," "pollutant," or "contaminant" or words of similar import in any Environmental Law; (iii) any other material, substance or waste now or hereafter classified or regulated as "hazardous" or "toxic" under any Environmental Law; (iv) any material, substance or waste now or hereafter listed in the United States Department of Transportation Table (49 CFR 172.101) or classified by the United States Environmental Protection Agency as "hazardous" (40 CFR Part 302) or in any successor or replacement tables or classifications as in effect from time to time; and (v) any Hazardous Waste.

"**Hazardous Waste**" means "hazardous waste", as defined in the Resource Conversation and Recovery Act of 1976 and the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.) and any successor statutes and any regulations, rules or guidelines promulgated pursuant thereto as in effect from time to time (including, without limitation, any such waste resulting from removal of, demolition of, modifications of or additions to part or all of any existing structure, facility or equipment).

"**Contractor Hazardous Waste**" means any Hazardous Waste arising during or from the Work that is generated by the acts or omissions of Contractor, a Subcontractor or any Sub-subcontractor

(including, without limitation, a Contractor Release) and that is not City Hazardous Waste.

"**City Hazardous Waste**" means Hazardous Waste (i) that consists of Hazardous Substances in any existing structure, facility or equipment on City's property or otherwise present on City's property at commencement of the Work, and (ii) that has become Hazardous Waste due to any part of the Work. However, City Hazardous Waste does not include any Hazardous Substance that has become a Hazardous Waste due to any Contractor Release.

"**Project Hazardous Waste**" means any Hazardous Waste arising on City's property from the Work (including, without limitation, Contractor Hazardous Waste and City Hazardous Waste), regardless of: (a) whether generated by the acts or omissions of City, Contractor, a Subcontractor or a Sub-subcontractor; (b) whether it consists of Hazardous Substances that were on or in City's property at commencement of the Work and that have become Hazardous Waste in the course of the Work; and (c) whether it consists of Hazardous Substances that are brought on to City's property for or during the Work by Contractor, a Subcontractor or a Sub-subcontractor and that have become Hazardous Waste in the course of the Work.

"**OSHA**" means the Federal Occupational Safety and Health Act (29 U.S.C. Section 651 et seq.) and any successor statutes and any regulations, rules or guidelines promulgated pursuant thereto as in effect from time to time.

"**Release**" means any discharging, disposing, dumping, emitting, emptying, escaping, injecting, leaching, leaking, pouring, pumping, releasing, spilling, or similar action or event.

"**Contractor Release**" means a Release of a Hazardous Substance (including, without limitation, Hazardous Substances that were on or in City's property at commencement of the Work) arising from acts or omissions of Contractor or any Subcontractor or Sub-subcontractor or their employees or workers. However, Contractor Release does not include Releases of pre-existing Hazardous Substances on City's property of which City had not made Contractor aware and as to which Contractor, Subcontractors and Sub-subcontractors acted reasonably.

G. General Requirements.

1. Compliance with Environmental Law and OSHA. Contractor shall comply with, and shall cause all Subcontractors and Sub-subcontractors to comply with, this section and with all Environmental Law and OSHA applicable to (i) Contractor, (ii) Subcontractors, (iii) Subsubcontractors, (iv) the Work and (v) all of their activities in respect of the Work.

2. Hazardous Substances. (i) Hazardous Substances may be transported to and from and stored, used and be present on City's property in such quantities as are generally recognized to be usual and customary for performance of the Work. (ii) Hazardous Waste may be generated on City's property of such kinds and in such quantities as are generally recognized to be usual and customary in connection with performance of the Work. Hazardous Waste so generated may be stored temporarily on City's property. (iii) Prior to final completion of the Work, Contractor shall remove or cause to be removed from City's property and disposed of in accordance with Environmental Law and OSHA any Hazardous Substances (other than Project Hazardous Waste) brought onto City's

property during the Work or used in connection with the Work. (iv) Other than as provided in (i), (ii) and (iii), Contractor shall not, and Contractor shall cause all Subcontractors and Sub-subcontractors to not, dispose of, generate, manufacture, process, produce, Release, treat or otherwise store, use or have in or on or transport to or from City's property any Hazardous Substance, regardless of whether the Hazardous Substance is preexisting on City's property or otherwise.

3. Releases of Hazardous Substances. Upon any Release of any Hazardous Substance in connection with the Work, whether relating to a pre-existing condition on City's property (for example, arising from any demolition of, modification of, or addition to any structure, facility or equipment) or relating to acts or omissions of Contractor, a Subcontractor or a Sub subcontractor, Contractor shall take any immediate action reasonably necessary to contain the Release. City may elect to have Contractor control and carry out any containment, clean-up, removal and remediation activity. Alternatively, City shall have the right to elect to control and carry out any containment, clean-up, removal and remediation activity. Regardless of who takes the actions, Contractor shall absorb, without reimbursement from City, all costs and expense incurred by Contractor in connection with any Contractor Release. In addition, Contractor shall pay or reimburse City for all costs and expenses incurred by City relating to any Contractor Release. If the amount is not paid promptly, City may offset the amount against any amount payable by City to Contractor under the Contract Documents or otherwise. Remediation, removal, and other cleanup action arising from any Release shall be in full compliance with Environmental Law and OSHA and shall be subject to approval by City. In addition, City may require remedial, removal or other cleanup action in excess of applicable minimum requirements of Environmental Law and OSHA (A) as reasonably necessary or appropriate in the judgment of City to permit human use and habitation of City's property and to permit use of City's property, and (B) as reasonably consistent in the judgment of City with such habitation and uses.

4. Hazardous Waste. City will arrange for handling, storage and disposal of any Project Hazardous Waste. On an interim basis until City can make arrangements, Contractor shall assure proper handling (including, without limitation, segregation from waste that is not Hazardous Waste) and storage of Project Hazardous Waste in full compliance with Environmental Law and OSHA. Contractor shall pay all of City's expenses of storing, handling and disposing of Contractor Hazardous Waste. City will deliver a statement to Contractor showing City's expenses, and Contractor will promptly pay such amount to City. If the amount is not paid promptly, City may offset the amount against any amount payable by City to Contractor under the Contract Documents or otherwise.

5. Notifications to City. Contractor shall notify City's Project Manager immediately upon occurrence of any of the following: (i) any discovery by Contractor, a Subcontractor or any Sub-subcontractor of any Hazardous Substance in any existing structure, facility or equipment on City's property. (ii) any Release of any Hazardous Substance on City's property in connection with the Work; (iii) the creation or generation of any Hazardous Waste resulting from the Work (including, without limitation, Hazardous Waste arising from the removal of, demolition of, modification of, or addition to any existing structure, facility or equipment); (iv) the need for any remediation or removal of any Hazardous Substance relating to the Work whether relating to a pre-existing condition on City's property or to acts or omissions of Contractor, a Subcontractor or a Sub-subcontractor; or (v) any claim, demand, inquiry, investigation, litigation or other action or proceeding by any governmental authority or other person relating to any Hazardous Substance,

Hazardous Waste, Environmental Law or OSHA relating to the Work. Except for immediate action to contain any Release of any Hazardous Substance and except for interim handling and storage of Project Hazardous Waste, Contractor shall not take any action as to any matter in **(i), (ii), (iii), (iv)** or **(v)** without the prior written approval of City and City shall have the right to elect to control and carry out any such action or matter.

6. Other Asbestos. Contractor and each Subcontractor and Sub-subcontractor to comply with all requirements of Environmental Law and OSHA concerning any other asbestos in the Work area.

H. Construction Site Safety Requirements: Contractor shall have sole responsibility and liability for construction site safety. Without limiting other actions in this regard, Contractor shall, and shall cause each Subcontractor and Sub-subcontractor to, comply with worker health and safety requirements in Environmental Law and OSHA. In addition, Contractor shall take all reasonable necessary and appropriate steps to assure the health and safety of persons occupying any part of the facility in which the Work site is located or in the vicinity of or passing by the Work site and shall also take all reasonable necessary and appropriate steps to protect from damage or destruction the property of City and other persons in any part of the Facility in which the Work site is located or in the vicinity of or passing by the Work site. Among other actions in this regard Contractor shall comply with the requirements of the applicable fire code.

I. Environmental, Health and Safety Concerns by Contractor, Subcontractors or Subsubcontractors. If in the course of the Work, any environmental, health or safety concern exists or arises, whether relating to a Hazardous Substance, OSHA or otherwise, then the Work activities related to the concern must be discontinued until the concern is resolved. This means prior to disturbing a suspected Hazardous Substance or otherwise interacting with a potential health or safety hazard. The City's Project Manager must be notified immediately of the concern. Work shall not resume until approval has been provided by City. Close coordination will be maintained between City and Contractor so the Project schedule is impacted the least amount possible.

J. Scope of Indemnity. The indemnity in Article 13 of this Contract includes any claim by any person and City's attorneys' fees and other costs and expenses in defending any claim by any person that City is responsible or liable for any of the following arising from the acts or omissions of Contractor, any Subcontractor, any Sub-subcontractor or any of their employees or other workers relating to the Work: (i) any violation of Environmental Law or OSHA; (ii) any failure by Contractor, any Subcontractor or any Sub- subcontractor to perform or comply with any obligation or requirement in this Article, (iii) any Contractor Release of any Hazardous Substance; (iv) any improper disposition of any Hazardous Substance or Hazardous Waste; (v) any claim by any employee, agent, independent contractor or other worker of Contractor, any Subcontractor or any Sub-subcontractor and any claim by any other person of personal Injury, death or property damage arising from any Contractor Release of any Hazardous Substance or arising from any failure by Contractor, any Subcontractor or any Sub-subcontractor to comply with any Environmental Law or OSHA or this section.

ARTICLE 6
PRODUCT SAMPLES, TESTS, AND CERTIFICATES

A. The Contractor shall furnish Product Samples of all items requested or required by the City. Product Samples shall be properly identified and submitted with such promptness as to cause no delay in Work or in the work of any other contractor and to allow time for consideration by the City. The City will review Product Samples.

B. Each Product Sample must be accompanied by a letter of transmittal containing the following information:

1. Date of Submission
2. Name of Project
3. Location of Project
4. Branch of Work (Specification Section Number)
5. Project Number
6. Name of Submitting Contractor
7. Name of Subcontractor

C. The Contractor shall furnish to the City a certificate stating that material or equipment submitted complies with Contract Documents. If a certificate originates with the manufacturer, the Contractor shall endorse it and submit it to the City together with a statement of compliance in its own name.

D. No tests, inspections or approvals performed or given by the City or others acting for the City or any agency of Federal, State or Local government nor any acts or omissions by the City in administering this Contract shall relieve the Contractor from its duty to perform the Work in accordance with the Contract Documents and applicable law.

E. Unless the City is authorized at the time of submittal to return samples at the Contractor's expense, rejected samples will be destroyed.

F. After delivery of materials, the City may make such tests as it deems necessary, with samples required for such tests being furnished by and at the cost of the Contractor. Any test is for the benefit of the City and shall not relieve Contractor of the responsibility for providing quality control measurements to assure that Work strictly complies with the Contract Documents. No test shall be construed as implying acceptance of materials, work, workmanship, equipment, accessories or any other item or thing.

G. On the basis of the test results, materials, workmanship, equipment or accessories may be rejected even though general approval has been given. If items have been incorporated in Work, the City shall have the right to cause their removal and replacement by items meeting Contract Document requirements or to demand and secure appropriate reparation to the City from the Contractor.

ARTICLE 7
AS-BUILT DRAWINGS

A. Prior to Substantial Completion, the Contractor shall complete and turn over to the City the As-Built Drawings. The As-Built Drawings shall consist of a set of drawings which indicate all field changes that were made to adapt to field conditions, changes resulting from contract Change Orders and all buried and concealed installation of piping, conduit and utility services. All buried and concealed items both inside and outside the facility shall be accurately located on the As-Built Drawings as to depth and in relationship to not less than two permanent features such as interior or exterior wall faces. The As-Built Drawings shall be clean and all changes, corrections and dimensions shall be given in a neat and legible manner in a contrasting color.

B. For any changes or corrections in the Work which are made subsequent to Substantial Completion, revisions shall be submitted to the City prior to Final Payment.

ARTICLE 8
SUPERINTENDENCE BY THE CONTRACOR

A. The Contractor shall have a competent superintendent on the site at all times during the progress of the Work. Contractor's superintendent must be acceptable to the City. The superintendent shall have such assistants with such individual specialized competencies including, but not limited to, CPM scheduling, as may be necessary to fully understand and oversee all aspects of the Work. The superintendent and his assistants all shall be physically fit for their Work and capable of going to all locations where Work is being performed. A communication to the superintendent or his designated assistants by the City is binding upon the Contractor. The Contractor's superintendent shall be responsible for the prevention of accidents at the site. The Commercial Construction Safety Code of the Arizona Industrial Commission shall apply to all Work, and a copy of the Code shall be available at the site.

B. The Contractor shall at all times enforce strict discipline and good order among the workers on the Project and shall not employ or continue to employ any unfit person on the Project or any person not skilled in the work assigned to him. The Contractor shall be responsible to the City for all acts and omissions of its employees, Subcontractors, Suppliers, anyone whom the Contractor may allow to perform or inspect or supervise any Work, and their agents and employees together with anyone whom the Contractor may allow to come on the Project site. In addition, if the Contractor receives written notice from the City to dismiss those subcontractors or employees or one who is a hindrance to proper or timely execution of the Work, the Contractor shall dismiss those employees and agrees to replace those dismissed without delay to the Project and at no additional cost to the City.

C. The Contractor shall competently and thoroughly direct and superintend all of the Work and shall be solely responsible for all construction safety, means, methods, techniques, sequences and procedures. It shall coordinate and schedule all Work under this contract, the performance of all its employees, Subcontractors, and Suppliers, and the timely procurement of all necessary labor, materials, equipment, supplies, and all else needed to do the Work.

ARTICLE 9
SUBCONTRACTS

A. The Contractor shall supply with its bid to the City a written list of all proposed subcontractors and suppliers. The City will promptly reply to the Contractor in writing stating whether the City, after due investigation, has any objection to any such proposed subcontractor or supplier. The Contractor shall not employ any subcontractor or supplier against whom the City has reasonable objection. If, prior to the award of the Contract, the City has a reasonable objection to any subcontractor or supplier and refuses in writing to accept such person or organization, the apparent low bidder may, prior to the award, either withdraw his bid without forfeiture of bid security or may propose an acceptable substitution thereof provided that same results in no change in the bid price. Failure of the bidder to submit an acceptable substitute in a timely manner shall render its bid nonresponsive.

B. No substitution or change shall be made by the Contractor in the subcontractor/supplier list after its submission to the City without prior written approval by the City. Unapproved or untimely substitutions may be cause for invalidation of the Contractor's bid in the City's discretion, thereby rendering the Contract voidable.

C. All work performed for the Contractor by a subcontractor shall be pursuant to an appropriate written agreement which specifically binds the subcontractor to all applicable terms and conditions of the Contract Documents, but no contractual relationship shall exist between any subcontractor or supplier of any tier and the City, unless the City invokes the assignment provisions of the following subsection. Upon request, the Contractor shall provide fully executed copies of any subcontracts and purchase orders to the City.

D. The Contractor hereby assigns to the City (and its assigns) all its interest in any subcontracts and purchase orders now existing or hereinafter entered into by the Contractor for performance of any part of the Work, which assignment will be effective upon termination of the Contract by the City and only as to those subcontracts and purchase orders which the City assumes in writing. All subcontracts and purchase orders shall provide that they are freely assignable by the Contractor to the City and its assigns. Such assignment is part of the consideration to the City for entering into this Contract with the Contractor and may not be withdrawn prior to final completion.

E. The City may require each proposed subcontractor whose subcontract will exceed $100,000.00 to furnish a performance bond and a payment bond on City-approved forms in the full amount of its subcontract. The City will reimburse the Contractor for the documented cost of the subcontractor's performance bond premiums in the event the City requires such bonds by the subcontractor.

ARTICLE 10
COMMUNICATIONS

A. All project notices, requests, instructions, modifications, approvals, and claims must be in writing, unless expressly specified otherwise in the Contract.

B. Communications will be deemed to have been made if delivered in person or if mailed to the address designated in the Contract or otherwise agreed upon by the parties.

ARTICLE 11
PERMITS, TAXES, AND FEES

A. The Contractor shall secure and pay for any necessary building permits and for all other permits, fees, licenses and inspections necessary for the proper execution and completion of the Work, and shall immediately deliver copies to the City. The Contractor shall be responsible for complying with all applicable Federal, State and local laws, codes, notice requirements, and regulations applicable to the site and prosecution of the Work. Contractor shall be responsible for and pay any costs associated with or arising from any non-compliance.

B. The Contractor shall pay all taxes for and related to the Work or its portion thereof which are legally enacted at the time bids are received, whether or not yet effective.

ARTICLE 12
INSURANCE

A. Insurance Requirements: Concurrently with the execution of the Contract, the Contractor shall furnish the City of Buckeye a certificate of insurance on a standard insurance industry ACORD form. The ACORD form shall be issued by an insurance company authorized to transact business in the State of Arizona.

B. Contractor, subcontractors and subconsultants shall procure and maintain until all of their obligations have been discharged, including any warranty periods under this Contract are satisfied, insurance against claims for injury to persons or damage to property, which may arise from or in connection with the performance of the work hereunder by the Contractor, his agents, representatives, employees, or subcontractors.

C. The insurance requirements herein are minimum requirements for this Contract and in no way limit the indemnity covenants contained in this Contract.

D. The City in no way warrants that the minimum limits contained herein are sufficient to protect the Contractor from liabilities that might arise out of the performance of the work under this Contract by the Contractor, his agents, representatives, employees, subcontractors or subconsultants and Contractor is free to purchase such additional insurance as may be determined necessary.

E. Minimum Scope and Limits of Insurance. Contractor shall provide coverage at least as broad and with limits of liability not less than those stated below. The Contractor waives all rights of subrogation under the following policies.

(1) Commercial General Liability-Occurrence Form Policy shall include bodily injury, property damage, broad form contractual liability and XCU coverage.

General Aggregate	$2,000,000

Products-Completed Operations Aggregate	$1,000,000
Personal & Advertising Injury	$1,000,000
Each Occurrence	$1,000,000

The policy shall be endorsed to include the following additional insured language: "The City of Buckeye shall be named as an additional insured with respect to liability arising out of the activities performed by, or on behalf of the Contractor".

The policy shall contain a waiver of subrogation against the City of Buckeye.

(2) Automobile Liability- Bodily injury and property damage for any owned, hired, and non-owned vehicles used in the performance of this Contract

Combined Single Limit (CSL)	$1,000,000

The policy shall be endorsed to include the following additional insured language: "The City of Buckeye shall be named as an additional insured with respect to liability arising out of the activities performed by, or on behalf of the Contractor including automobiles owned, leased, hired or borrowed by the Contractor".

(3) Workers Compensation and Employers Liability Workers Compensation

(4) Statutory

Employers' Liability	
Each Accident	$ 1,000,000
Disease-Each Employee	$ 1,000,000
Disease-Policy Limit	$ 1,000,000

(5) Umbrella/Excess Liability: Umbrella/Excess Liability insurance with a limit of not less than

$5,000,000 per occurrence combined limit Bodily Injury and Property Damage, that "follows form" and applies in excess of the Commercial General Liability, Automobile Liability, and Employer's Liability, as required above.

The policy shall contain a waiver of subrogation against the City of Buckeye.

F. Additional Insurance Requirements. The policies shall include, or be endorsed to include, the following provisions:

(1) On insurance policies where the City of Buckeye is named as an additional insured, the City of Buckeye shall be an additional insured to the full limits of liability purchased by the Contractor even if those limits of liability are in excess of those required by this Contract.

(2) The Contractor's insurance coverage shall be primary insurance and non-contributory with respect to all other available sources.

(3) Coverage provided by the Contractor shall not be limited to the liability assumed under the indemnification provisions of this Contract.

G. Subconsultant's and Subcontractor's Insurance. Contractor's certificate(s) shall include all subcontractors as additional insureds under its policies or subcontractors shall maintain separate insurance as determined by the Contractor, however, subcontractor's limits of liability shall not be less than
$1,000,000 per occurrence / $2,000,000 aggregate. All coverages for subcontractors and subconsultants shall be appropriate to cover all of its work performed herein.

H. Notice of Cancellation. Each insurance policy required by the insurance provisions of this Contract shall provide the required coverage and shall not be suspended, voided, canceled by either party, reduced in coverage or in limits except after thirty (30) days prior written notice has been given, by certified mail, return receipt requested to:

Christopher A. Williams
Manager Construction & Contracting Division
City of Buckeye
530 East Monroe Avenue
Buckeye, Arizona 85326

I. Acceptability of Insurers. Insurance is to be placed with insurers duly licensed in the State of Arizona and with an A. M. Best's rating of no less than A -. The City in no way warrants that the above required minimum insurer rating is sufficient to protect the Contractor from potential insurer insolvency.

J. Verification of Coverage

(1) Contractor shall furnish the City Certificates of Insurance (ACORD form or equivalent approved by the City) and with original endorsements effecting coverage as required by this Contract. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. *Any policy endorsements that restrict or limit coverages shall be clearly noted on the certificate of insurance.*

(2) All certificates and endorsements are to be received and approved by the City before work commences. Each insurance policy required by this Contract must be in effect at or prior to the earlier of commencement of work under this Contract or the signing of this Contract and remain in effect for the duration of the Project. Failure to maintain the insurance policies as required by this Contract or to provide evidence of renewal is a material breach of contract.

(3) All certificates of insurance required by this Contract shall be sent directly to the City of Buckeye, Manager, Construction & Contracting. The contract number and project description shall be included on the Certificates of Insurance. The City reserves the right to require complete, certified copies of all insurance policies required by this Contract, at any

time.

K. Approval. Any modification or variation from the insurance requirements in this Contract shall be approved by the City, whose decision shall be final.

L. Liability Notwithstanding Insurance: Approval, disapproval or failure to act by Owner regarding any insurance supplied by Contractor or its Subcontractors shall not relieve the Contractor of full responsibility or liability for damages, errors, omissions or accidents as set forth in this Contract. Neither the bankruptcy or insolvency of Contractor's insurer nor any denial of liability by Contractor's insurer shall exonerate Contractor from the liability or responsibility of Contractor set forth in this Contract.

ARTICLE 13
INDEMNIFICATION

A. To the fullest extent permitted by law, Contractor agrees to defend, indemnify and hold Owner, its officers, agents and employees, harmless for, from and against any and all claims, lawsuits, judgments, costs and expenses for personal injury (including death), property damage or other harm for which recovery of damages is sought, suffered by any person or persons, that may arise out of or be occasioned by Contractor's breach of any of the terms or provisions of this Contract, or by any negligent, grossly negligent or strictly liable act or omission of Contractor, its officers, agents, or employees, in the performance of this Contract; except that the indemnity provided for in this paragraph shall not apply to any liability resulting from the sole negligence or fault of Owner, its officers, agents, employees or separate contractors. The provisions of this paragraph are solely for the benefit of the parties hereto and are not intended to create or grant any rights, contractual or otherwise, to any other person or entity.

ARTICLE 14
PROGRESS AND SCHEDULING

A. Planning, scheduling and progress monitoring are essential functions of the Contractor. Within ten (10) days after the award of the Contract, the Contractor shall prepare and submit for the City a Schedule of Values allocating the Contract Price among the various portions of the Work for purposes of progress payments. The Schedule of Values shall be substantially equivalent to AIA Forms G702 and G703 or as specified by the City.

B. The Contractor shall also furnish the City with a Narrative Report corresponding with each monthly update which shall include a description of current and anticipated problem areas, delaying factors and their impact, fragmentary networks (fragnet) of delays, and an explanation of corrective action taken or proposed. If the Project is behind schedule in any month, the Contractor's Narrative Report shall indicate precisely what measurements it will take in the next thirty days to put the Work back on schedule.

C. The Contractor shall employ and supply a sufficient force of workers, material and equipment, and shall prosecute the Work with such diligence so as to maintain the rate of progress

indicated on the Progress Schedule, to prevent work stoppage, and to ensure completion of the Project within the Contract Time.

D. The Contractor shall be responsible to prepare, submit and maintain the schedules and Narrative Reports indicated above, and the failure to do so may be considered a material breach of this Contract. Any additional or unanticipated cost or expense required to maintain the schedules shall be solely the Contractor's obligation and shall not be charged to the City.

ARTICLE 15
LOG

A. The Contractor shall maintain a daily log of construction activities for each calendar day of the Contract Time, using a form approved by the City. The Contractor shall document all activities at the Project site, including:

1. Weather conditions showing the high and low temperatures during work hours, the amount of precipitation received on the job site, and any other weather conditions which adversely affect Work at the site;
2. Soil conditions which adversely affect Work at the site;
3. The hours of operation by Contractor and individual Subcontractor personnel;
4. The number of Contractor and Subcontractor personnel present and working at the site, by subcontract and trade, and updated schedule activity number.
5. The equipment active or idle at the site;
6. A description of the Work being performed at the site, by updated schedule activity number.
7. Any delays, disruptions or unusual or special occurrences at the site;
8. Materials received at job site; and
9. A list of all visitors at the site.

B. The Contractor shall provide copies of the daily logs to the City on a weekly basis. The daily log does not constitute written notice to the City when such notice is required by the Contract Documents.

ARTICLE 16
MISCELLANEOUS DUTIES

The Contractor shall submit to the City upon request all payrolls, reports, estimates, records and any other data concerning Work performed or to be performed and concerning materials supplied or to be supplied, as well as Subcontractor payment applications and each Subcontractor's progress payment check. The requirements of this subsection shall be provided in all contracts between the Contractor and its Subcontractors.

A. During construction and for five (5) years after Final Payment, the Contractor shall retain and shall also require all Subcontractors to retain for review and/or audit by the City all correspondence,

meeting minutes, memoranda, electronic media, books, accounts, reports, files, time cards, material invoices, payrolls, and evidence of all communications, direct and indirect costs, and all other matters related to the bidding and performance of the Work.

B. Upon request by the City, a legible copy or the original of any or all such records shall be produced by the Contractor at any time during or after construction as the City may request.

C. The Contractor shall be responsible for laying out its own Work and for any damage which may occur to work of any other contractor because of the Contractor's own errors or inaccuracies. The Contractor shall also be responsible for unloading, uncrating, storing and handling all materials and equipment to be erected or placed by it, whether furnished by the Contractor or others.

D. The Contractor, Subcontractors, and Suppliers shall be responsible for taking all appropriate field measurements prior to fabrication and installation of any item. Such measurements shall be taken sufficiently in advance so as to avoid any delay or potential delay. Failure to adhere to this provision shall render such delays the responsibility of the Contractor.

E. Unless otherwise specifically mentioned, all anchors, bolts, screws, fittings, fillers, hardware, accessories, wiring, conduit, ductwork, trim and other parts required for or in connection with any item or material to make a complete, serviceable, finished and quality installation shall be furnished and installed as part of the item whether or not expressly called for by the Drawings or Specifications.

F. All materials shall be shipped and stored and handled in a manner that will afford protection and ensure their being in factory-new condition at the time they are incorporated in the Work. After installation, they shall be properly protected against damage or deterioration until Final Completion of the Project.

G. When standards and specifications issued by The American Society of Testing and Materials, the American Institute of Steel Construction, the U.S. Department of Commerce (Commercial Standards), or other technical or standard setting organizations are cited in the Contract Documents, such standards or specifications (and all related standards or specifications) shall be equally as binding and have the full force and effect as though incorporated word for word. Unless otherwise specifically stated, the standards and specifications referred to shall be the latest edition or revision of such specifications that is in effect on the date of the public bid.

H. Any part of the Work damaged during installation or prior to final acceptance of Work shall be repaired so as to be unnoticeable and to be equal in quality, appearance, serviceability and other respects to an undamaged item or part of the Work. Where this cannot be fully accomplished the damaged item or part shall be replaced. After installation, all exposed surfaces and parts of an item or of the Work shall be cleaned in a manner that will not damage the finish or any of the parts of the item, so that the completed work is left in first class condition, free of all defects. All damaged or defaced Work shall be repaired or replaced to the City's satisfaction at the expense of Contractor.

I. The Contractor shall procure and furnish to the City all guarantees, warranties, manuals, and spares that are called for by the specifications or that are mentioned in the manufacturer's product

literature. Guaranties and warranties shall commence as of the date of Substantial Completion of the Project.

J. The Contractor shall pay all royalties and license fees. The Contractor shall defend all suits or claims for infringement of any patent rights and shall save the City harmless from loss on account thereof, except that the City shall be responsible for loss attributable when a particular design, process or the product of a particular manufacturer or manufacturers is specified. If the Contractor has any reason to believe that the design, process or product specified could be an infringement of a patent, it shall be responsible for such loss unless it promptly gives such information in writing to the City.

K. The Contractor shall limit its operations to the confines of the Project, except as necessary to connect to existing utilities, and shall not, without the prior written permission of the affected property City, and encroach on property outside the site. Contractor shall not permit unauthorized persons or activities on the site and shall maintain the site in a safe and secure manner.

L. The Contractor shall prearrange time with the City whenever it becomes necessary to interrupt any service to make connections, alterations or relocations and shall fully cooperate with the City in doing Work so as to cause the least annoyance and interference with the continuous operation of the City's business or official duties. Any existing plumbing, heating, ventilating, air conditioning or electrical disconnections which may affect portions of this construction or building or any other building must be coordinated with the City to avoid any disruption of operation within the building or construction or other building or utilities. In no case, unless previously approved in writing by the City, shall utilities be left disconnected at the end of a workday or over a weekend. Any interruption of utilities, whether negligently, intentionally, or accidentally, shall not relieve the Contractor's responsibility for the interruption or from liability for loss or damage caused by such interruption even though such loss or damage was not foreseeable by Contractor or subcontractor, or from responsibility for repairing and restoring the utility to normal service. Repairs and restoration shall be made before the workmen responsible for the repair and restoration leave the job.

M. The Contractor at all times shall keep the premises free from accumulation of waste materials or rubbish caused by his operations. If the Contractor fails to properly clean up during construction, or if a dispute arises between the Contractor and/or separate Contractors as to their responsibility for cleaning up, the City may clean up and charge the costs thereof to the Contractors responsible as determined by the City. At the completion of the work he shall remove all his waste materials and rubbish from and about the Project as well as all his tools, construction equipment, machinery and surplus materials. If the Contractor fails to clean up at the completion of the work, the City may do so and the cost thereof shall be charged to the Contractor.

ARTICLE 17
INSPECTION OF WORK

All Work done and all materials are subject to inspection by the City to determine if they conform to the Contract Documents. The City shall at all times have access to the Work, including materials being fabricated or stored off site. The Contractor shall furnish at the Contractor's cost any facilities

necessary for sufficient and safe access to the Work.

A. Inspections, tests, measurements, or other acts of the City are for the sole purpose of assisting the City in determining that the Work, materials, rate of progress, and quantities comply with the Contract Documents and/or Contractor's requests for payment. These acts or functions shall not relieve the Contractor from performing the Work in full compliance with contract requirements nor relieve the Contractor from any of the quality, compliance and responsibility for the Work assigned to it by the Contract Documents. No inspection by the City shall constitute or imply acceptance or waiver of rights.

B. Nonconforming Work or materials may be rejected and Contractor shall correct such rejected Work without additional compensation, even if the Work or materials have been previously inspected or accepted by the City or even if the City failed to observe the unsuitable Work or materials.

C. Any Work required to be inspected by the City prior to being covered, which is covered up without prior inspection or without prior consent of the City, must be uncovered and recovered by the Contractor, if requested by the City, at no cost to City, notwithstanding the provisions of the following subsection.

D. Contractor shall notify the City in writing at least 48 hours prior to the time at which the City must be present to perform an inspection. Failure to provide such notice will place the Contractor at risk for all consequences of non-inspection and having to uncover work.

ARTICLE 18
CORRECTION OF WORK

If any portion of the Work is covered over contrary to the request of the City or as required by the Contract or the applicable building standards, it must be uncovered for observation at the Contractor's expense if requested by the City in writing.

A. If any portion of the Work, other than those portions required to be inspected by the City prior to being covered, has been covered over, the City may request that it be uncovered for observation. If such portion is found to be in accordance with the requirements of the Contract Documents, the cost of uncovering it shall be charged to the City as a Change Order. If such portion is found not to be in accordance with the requirements of the Contract Documents, the Contractor shall bear such costs.

B. The Contractor shall promptly remove from the site and replace any material or correct any Work found by the City to be defective or failing to conform to the requirements of the Contract, whether or not fabricated, installed or completed, and whether discovered before or after Substantial Completion. The Contractor shall bear all costs of correcting such Work or material, including the cost of necessary additional professional services and the cost of repairing or replacing all work of separate contractors or subcontractors damaged by such removal or correction. The City shall notify the Contractor immediately in writing upon its knowledge that additional professional services will be necessary and of the extent and estimated costs of the additional services. The City

may consent to accept such Work or material with an appropriate adjustment in Contract Price.

C. If the Contractor does not promptly replace or correct such Work or material, the City may replace or correct the Work or material, and charge or deduct the cost of removal and replacement from any monies due to the Contractor, or recover such costs from the Contractor.

D. If, within two (2) years after the date of Substantial Completion, any of the Work is found to be defective or not in accordance with the requirements of the Contract, the Contractor shall correct it promptly after receipt of a written notice from the City to do so. If the Contractor does not promptly replace or correct such Work or material, the City may replace or correct the Work or material, and charge or deduct the cost of removal and replacement from any monies due to the Contractor, or recover such costs from the Contractor. Nothing contained in this section shall be construed to establish a period of limitation with respect to any obligation of the Contractor under the Contract or the law. The obligation of the Contractor under this section shall be in addition to and not in limitation of any obligations imposed by special guaranties or warranties required by the Contract, given by the Contractor, or otherwise recognized or prescribed by law.

E. If, during the running of a guarantee or warranty period, the Contractor must perform repair work to any portion of the Work, the running of the warranty or guarantee period is tolled from the time the defect or deficiency is discovered through the time when the Contractor successfully completes all repairs and retesting and start-up activities.

ARTICLE 19
DELAYS AND TIME EXTENSITONS

If the Contractor is delayed at any time in the progress of the Work by any act or neglect of the City, or by any separate Contractor employed by the City, or by changes in the Work, or by labor disputes, fire, unusual delay in transportation, unusually severe weather conditions, adverse soil conditions, unavoidable casualties, delays specifically authorized by the City, or by causes beyond the Contractor's control, avoidance, or mitigation, and without any fault or negligence of the Contractor or Subcontractor or Supplier at any tier, then the Contract Time shall be extended by Change Order for such reasonable time as the City may determine that such event has delayed the critical path of the Work or individual milestone or overall completion of the Work after considering the advice of the City, if the Contractor complies with the notice and documentation requirements set forth below. The Contractor shall pay any additional fees or costs incurred by the City as the result of delays caused by the Contractor for circumstances not excused as provided herein.

A. Initial notice of any delay in the Work shall be made in writing to the City immediately but in no event later than 24 hours after discovery of the event giving rise to the delay. Then, Contractor shall provide additional details of the delay in writing to the City within seven (7) calendar days from the beginning of the delay. Failure to meet these time requirements shall absolutely bar any and all later claims. The detailed notice shall indicate the cause of the delay, the anticipated length of the delay, the probable effect of such delay upon the progress and cost of the Work, and potential mitigation plans. If the cause of the delay is continuing, the Contractor must give written notice every month at the same time it submits the updated progress Narrative Report to the City. Within fifteen (15) days after the elimination of any such delay, the Contractor shall submit further

documentation of the delay and, if applicable, a formal written request covering an extension of time for such delay. The written request for time extension shall state the cause of the delay, the number of days' extension requested and provide a fully documented analysis of the Progress Schedule, including a fragnet and any other data demonstrating a delay in the critical path of the Work or individual milestone or the overall project completion. If the Contractor does not comply with the notice and documentation requirements set forth above, the claim for delay is absolutely barred.

B. If the Contractor incurs damages related to expenses caused by a delay for which the City is solely responsible, which is unreasonable under the circumstances, and which was not contemplated by the parties at the time of formation of this Contract, then the parties shall attempt to reach an agreement on the Contractor's claim, provided that the Contractor has notified the City in writing as specified above, including why the City is believed by the Contractor to be solely responsible for the delay. Failure to provide such timely notice shall be deemed an absolute and final waiver of any rights to additional sums. Any disputes will be resolved in accordance with the City of Buckeye Procurement Code, as amended or superseded.

C. The Contractor shall have no right to claim for alleged extended or unabsorbed home office overhead; claims for delays shall be limited to provable extended site costs.

D. The date of beginning and the time for completion as specified herein are ESSENTIAL CONDITIONS of this Contract; and it is further mutually understood and agreed that the Work embraced in this Contract shall be commenced on a date to be specified in the notice to proceed or at a preconstruction meeting, but in no event later than ten (10) days after the execution of this Contract, whichever first occurs. Said Work shall be prosecuted regularly, diligently, and uninterruptedly at such rate of progress as will ensure full completion thereof within the time specified. The time for completion of the same takes into consideration the average climatic range and usual industrial conditions prevailing in this locality. If the Contractor shall neglect, fail or refuse to complete the Work within the time herein specified, or any extension thereof granted by the City, then the Contractor does hereby agree to pay to City the per diem amount specified in the Contract. This amount is agreed to be liquidated damages for such breach and not a penalty therefore. The per diem amount shall be paid for each and every calendar day that the Contractor shall be in default after the time stipulated in the Contract for completing the Work. The amount is fixed and agreed upon by and between the Contractor and City because of the impracticality and extreme difficulty of fixing and ascertaining the actual damages the City would in such event sustain. Said sums may be withheld by the City from any amounts due to the Contractor from the City, whether as the result of this Contract or any other obligation between the City and the Contractor.

E. The parties hereby agree that if the Contractor submits an original or updated schedule which shows the project and/or individual Milestone(s) completing earlier than required by the adjusted contractual completion date(s), the differences between the forecasted early completion and the required completion shall be considered Project-owned float available for use by both the City and the Contractor.

F. The Contractor shall not sequester shared float through such strategies as extending activity duration estimates to consume available float, using preferential logic, using extensive

crew/resource sequencing, etc. Since float time within the schedule is jointly owned, no time extensions will be granted nor delay damages paid until a delay occurs which extends the work beyond the adjusted Contract completion date. Since float time within the Construction Schedule is jointly owned, it is acknowledged that City-caused delays on the project may be offset by City-caused time savings (i.e., critical path submittals returned in less time than allowed by the Contract, approval of substitution requests which result in a savings of time to the Contractor, etc.). In such an event, the Contractor shall not be entitled to receive a time extension or delay damages until all City-caused time savings are exceeded and the Contract completion date or milestone date is also exceeded.

G. It is agreed that no time extensions shall be granted nor delay damages paid unless the delay is clearly demonstrated by the updated Construction Schedule current as of the month the change was issued or the delay occurred and which delay cannot be mitigated, offset, or eliminated through such actions as revising the intended sequence of work or other reasonable means.

ARTICLE 20
SUSPENSION OF WORK

A. The City may, at any time and without cause, order the Contractor in writing or cause the Contractor to suspend, delay or interrupt all or any part of the Work for such period of time as the City may determine to be appropriate for its convenience. Equitable adjustment shall be made for any increase in the Contract Time necessarily caused by such suspension or delay by written Change Order.

ARTICLE 21
RIGHT TO STOP WORK

A. If the Contractor fails to correct defective Work as required, or fails to carry out the Work in accordance with the Contract Documents, the City by written notice, may order the Contractor to stop the Work or any portion of the Work, until the cause for the order has been eliminated to the satisfaction of the City.

B. The City may stop Work without written notice for 24 hours whenever in its professional opinion such action is necessary or advisable to ensure conformity with the Contract Documents. The Contractor shall not be entitled to an adjustment in the Contract Price or Contract Time under this subsection. The right of the City to stop the Work shall not give rise to a duty on the part of the City to exercise this right for the benefit of the Contractor or others.

ARTICLE 22
CHANGES

A. After this Contract is signed, Modifications in the Contract Price, the Contract Time or Scope of the Work may only be made by written Change Order.

B. By written directive at any time, the City may make any changes within the general scope of the Contract or issue additional instructions, require additional or modified Work or direct deletion

of Work. The Contractor shall not proceed with any change involving an increase or decrease in cost or time without prior written authorization from the City and shall proceed in accordance with the procedures set forth in this section. If the Contractor proceeds with any change involving an increase or decrease in cost or time without written authorization as required by this paragraph, the Contractor hereby waives all rights or claims Contractor may have as a result of the change. The City's right to make changes shall not invalidate the Contract or relieve the Contractor of any liability. Any requirement of notice of change to the Surety shall be the responsibility of the Contractor.

C. The cost or credit to the City resulting from a change in Work shall be determined in one or more of the following ways:

1. By unit prices stated in the Contract.

2. By cost, as defined below, properly itemized and supported by sufficient, substantiating data to permit evaluation, plus a fee of ten percent (10%) of items (a) through (h) described below. Such costs shall be itemized by crafts as defined within the schedule of values and limited to the following items directly allocable to the change in the Work:

(a) Cost of materials, including delivery but excluding Subcontractor-supplied materials.

(b) Fully-burdened cost of labor, including, but not limited to, payroll taxes, social security, old age and unemployment insurance, vacation and fringe benefits required by agreement or routinely paid by contractor, and worker's or workman's compensation insurance but excluding Subcontractor's labor.

(c) Rental value of equipment and machinery to be established by rental receipts and not to exceed reasonable and customary rates for the locale of the Work. For owned equipment, contractor must prove reasonable rental rate pursuant to actual ownership costs.

(d) Cost of Subcontracted work calculated as above and Subcontractor's Field Supervision calculated in accordance with paragraph (e) below, plus Subcontractor's insurance and bond premiums as applicable. Insurance and bond premium cost shall not exceed a total of two percent (2%) of Subcontractor's documented cost.

(e) Contractor's Field Supervision not to exceed five percent (5%) of (a), (b) and (d) above; the parties agree that this mark-up shall fully cover all contractor Field Supervision overhead.

(f) Contractor's insurance and bond premiums not to exceed a total of two percent (2%), or documented cost.

(g) Sales tax at full value.

(h) If this method of cost or credit calculation is selected, in no event shall the

combined total fee including all levels or tiers of Subcontractors exceed twenty percent (20%) of the total cost of paragraphs (a), (b), (c) and (d). Field Supervision is to be excluded at all levels for the purposes of the limit imposed by this paragraph.

3. By mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation; provided that such lump sum shall not exceed that amount calculated under item 2 above.

D. If none of the above methods is agreed upon, the Contractor shall promptly proceed with performing the change, upon receipt of a written order signed by the City. Any dispute regarding the pricing methodology or cost of the change shall not relieve the Contractor from proceeding with the change as directed by the City. The cost or credit to the City shall be determined by the City on the basis of the preceding subsection.

E. A fully executed Change Order shall be full and final settlement of all claims for direct, indirect, delay, disruption, inefficiency and any other consequential costs related to items covered or affected, as well as time extensions. Any such claim not presented by the Contractor for inclusion in the Change Order is irrevocably waived.

F. In an emergency affecting the safety of life, or of the structure, or of adjoining property, the Contractor, without special instruction or authorization from the City, is permitted to act at its discretion to prevent threatened loss or injury. Any compensation claimed by the Contractor on account of such emergency work shall be determined in accordance with this section.

ARTICLE 23
PAYMENT

A. Payments on account of the Contract Price will be made monthly as Work progresses. Payment Applications, covering labor, material, equipment, supplies, and other items completed, delivered, or suitably stored on site during a period ending on the last calendar day of each month, shall be submitted to the City by the Contractor on the current edition of AIA Documents G702 and G703, within five (5) days after end of the period. Payment Applications shall be notarized, shall be supported by such data substantiating the Contractor's right to payment as the City may require, and reflect retainage, if any, as is provided. All payments shall be subject to any offset or retainage provisions of the Contract.

B. Each payment made to the Contractor shall be on account of the total amount payable to the Contractor, and title to all Work covered by a paid partial payment shall thereupon pass to the City. Nothing in this section shall be construed as relieving the Contractor from the sole responsibility for care and protection of materials and Work upon which payments have been made, for restoration of any damaged Work, or as a waiver of the right of the City to require fulfillment of all terms of Contract Documents.

C. The City, within seven (7) days after receipt of the Payment Application, will either issue a Certificate for Payment for such amount as is properly due or issue written notice of the reasons for withholding such a certificate.

D. The issuance of a Certificate for Payment will constitute a representation by the City, observations at the site and the data comprising the Application for Payment, that the Work is in accordance with the Contract Documents (subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to the results of any subsequent tests required by or performed under the Contract Documents, to minor deviations from the Contract Documents correctable prior to completion, and to any specific qualifications stated in his certificate); and that the Contractor is entitled to payment in the amount certified.

E. Payment may be withheld in whole or in part to protect the City on account of:

1. Unsatisfactory job progress as determined by the City.
2. Defective Work or materials not remedied.
3. Disputed Work or materials.
4. Claims or other encumbrances filed or reasonable evidence indicating probable filing of claims or other encumbrances by Subcontractors or Suppliers, or others.
5. Failure of the Contractor to make payment to Subcontractors or Suppliers within seven (7) days after receipt of each progress payment.
6. A reasonable doubt as determined by the City that the Work can be completed for the unpaid balance of the Contract Price or within the Contract Time.
7. The Contractor's failure to perform any of its contractual obligations under the Contractor Documents, or any other Contract with the City.
8. Deficiencies or claims asserted by City against Contractor arising from any other project. Within fourteen (14) days following the receipt of the Certificate of Payment, the City shall pay to the Contractor the value of the Work in place and materials suitably stored at the site. The remaining 10% shall be retained by the City until the Contract is 50% completed at which time the retainage shall be reduced to 5%; provided that: (a) the Contractor is making satisfactory progress on the Contract; and (b) in the City's sole judgment, there is no specific cause or claim requiring a greater amount than 5% to be retained. Thereafter, the City shall pay the Contractor 95% of the value of the Work, unless and until it determines satisfactory progress is not being made, at which time the 10% retainage may be reinstated. Such 10% reinstatement would be 10% of the total contract value of Work in place and materials stored. The City's sole judgment concerning the satisfactory progress of the Work shall be final.

F. Within sixty (60) days after the issuance of the Certificate of Final Completion by the City and receipt of all other documents required by the Contract, all retained amounts shall be paid to Contractor as part of Final Payment:

1. The Final Payment shall not become due until the Contractor delivers to the City full and final unconditional releases from Subcontractors and major Suppliers acknowledging payment in full. Any claim filed thereafter shall be the responsibility of the Contractor.

2. If any claim remains unsatisfied after all payments are made, the Contractor shall

immediately upon demand refund to the City all monies that the latter may be compelled to pay in discharging such claim including all costs, interest and attorneys' fees.

G. If any payment of the Contract Price is not made within thirty (30) days and without just cause, interest shall thereafter accrue on the unpaid principal balance at the minimum rate allowed by state law (A.R.S. § 44-1201) on the due date.

ARTICLE 24
WARRANTY

A. The Contractor warrants that all materials and equipment furnished under this Contract will be new unless otherwise specified, and that all Work will be free from faults and defects and in strict conformance with the Contract Documents.

B. Neither provision of manufacturers' warranties nor Final Payment nor use or occupancy of all or a portion of the Premises by the City shall constitute an acceptance of Work not performed in accordance with the Contract Documents or relieve the Contractor or its sureties of liability with respect to any warranties or responsibility for faulty materials and workmanship.

C. This warranty shall continue for a period of 1 year from the date of final acceptance of the work. If the City takes possession of any part of the work before final acceptance, this warranty shall continue for a period of 1 year from the date the City takes possession.

D. The Contractor or its sureties shall remedy any defects in the Work and any resulting damage to the Work or the Work of others at its own expense.

E. The Contractor shall be liable for correction of all damage resulting from defective Work. If the Contractor fails to remedy any defects or damage, the City may correct the Work or repair the damages and the cost and expense incurred in such event shall be paid by or be recoverable from the Contractor.

F. The warranties provided in this section shall be in addition to and not in limitation of any other warranty or remedy provided by law or by the Contract Documents.

ARTICLE 25
SUBSTANTIAL COMPLETION

A. When the Contractor requests a Substantial Completion Inspection for the Work or a designated portion thereof, the City shall determine the validity of the request. A list of items to be completed or corrected shall be prepared by the Contractor and presented to the City with the request for inspection. By submitting a request for Substantial Completion Inspection the Contractor thereby certifies that it has performed a thorough inspection of the Project in preparing the list of items to be completed or corrected, has consulted with its subcontractors, and that the remaining incomplete or defective work shall be completed within thirty (30) days of submission of the request. The City shall evaluate the Contractor's request and list of uncompleted items and, if appropriate in their judgment, add to or delete items from the list necessary to complete the work.

The failure to include items on any punch list shall not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents. By submitting a request for Substantial Completion Inspection, the Contractor thereby certifies that the remaining incomplete or defective Work required by the Contract Documents shall be completed within thirty (30) days.

B. If the City, on the basis of Substantial Completion inspection, determines that the Work has been substantially completed in accordance with the Contract Documents, then the City will prepare a Certificate of Substantial Completion, which shall establish the date of Substantial Completion; shall state the responsibilities of the Contractor for remaining punchlist items, maintenance, heat and utilities, security, and damage to the work; and shall fix the time, not to exceed thirty (30) days, within which the Contractor shall complete the punch list. The Certificate of Substantial Completion shall be submitted by the City to the Contractor for their written acceptance of the responsibilities assigned to them in such Certificate. The Project shall not be deemed substantially complete until the Certificate is issued irrespective of City occupancy.

ARTICLE 26
FINAL INSPECTION

When the Contractor submits in writing to the City a request for a final inspection of the Work, the City shall determine the validity of the request. Following the inspection, if there are items to be completed or corrected, the City will determine the dollar value to be withheld in accordance with the retainage provisions of the Contract. In the event that the Contractor has not completed the punch list items within the time designated in the Certificate of Substantial Completion, the City retains the right to have these items corrected at the expense of the Contractor, including all architectural, engineering and inspection costs and expenses incurred by the City.

A. The City shall not be required to release the retainage until such items have been completed and inspected.

ARTICLE 27
ASSIGNMENT OF CLAIMS

A. The City and Contractor recognize that in actual economic practice overcharges resulting from antitrust violations are in fact borne by City. Therefore, the Contractor hereby assigns to City any and all claims for such overcharges. The Contractor in all subcontracts shall require all Subcontractors to likewise assign all claims for overcharges to the City.

ARTICLE 28
DISPUTES

A. All of Contractor's claims and disputes shall first be referred to the City for initial determination, by written notice, not more than seven (7) days from the occurrence of the event which gives rise to the dispute, or not more than seven (7) days from the date that the Contractor knew or should have known of the problem. Unless the claim is made in accordance with these time requirements, it is irrevocably waived. The City shall render a written decision within a reasonable time. The City's decision may be reviewed in accordance with City of Buckeye Procurement Code, as

amended or superseded. Any claim not timely filed or not complete at the time of filing is irrevocably waived.

B. Any failure of the City to make a decision within the time limit set forth shall not be construed as acquiescence in all or any part of the Contractor's claim for relief. Unless otherwise agreed in writing, the Contractor shall carry on the Work and maintain its progress during any claims and controversy proceedings, and the City shall continue to make payments to the Contractor in accordance with the Contract Documents.

ARTICLE 29
FORUM

A. No suit or action shall be commenced hereunder by any claimant other than in the Arizona Superior Court, and only after all contractual and administrative procedures have been fulfilled. By submitting a bid for this project, Contractor agrees to be bound by the City of Buckeye Procurement Code Dispute Resolution Procedures and waives any objections to those procedures.

ARTICLE 30
TERMINATION BY THE CITY

A. This Contract may be terminated by the City under the conditions stated in A.R.S. § 38-511.

ARTICLE 31
TERMINATION FOR CAUSE

A. The City may terminate the Contract upon the occurrence of any one or more of the following events:

1. If the Contractor refuses or fails to prosecute the Work, or any separable part, with such diligence as will ensure its completion within the Contract Time; or if the Contractor fails to complete the Work within the Contract Time;

2. If the Contractor or any of its key subcontractors is adjudged a bankrupt or insolvent or makes a general assignment for the benefit of creditors, or if the Contractor or any of its key subcontractors or a third party files a petition to take advantage of any debtor's act or to reorganize under the bankruptcy or similar laws concerning the Contractor or any of its key subcontractors, or if a trustee or receiver is appointed for the Contractor or any of its key subcontractors or for any of the Contractor's property on account of the Contractor's insolvency, and the Contractor or its successor in interest or any of its key subcontractors does not provide adequate assurance of future performance in accordance with the Contract within ten (10) days after receipt of a request for assurance from the City;

3. If the Contractor fails to supply sufficient skilled workmen or suitable materials or equipment;

4. If the Contractor fails to make prompt payments to subcontractors or suppliers at any tier,

or for labor, materials or equipment;

5. If the Contractor fails to comply with laws, ordinances, rules, codes, regulations, orders or similar requirements of any public entity having jurisdiction;

6. If the Contractor fails to follow any reasonable instructions by the City;

7. If the Contractor performs Work which deviates from the Contract Documents, and neglects or refuses to correct rejected Work; or

8. If the Contractor otherwise violates in any material way any provisions or requirements of the Contract Documents. Once the City determines that sufficient cause exists to justify the action, the City may terminate the Contract without prejudice to any other right or remedy the City may have, after giving the Contractor and its Surety seven (7) days' notice by issuing a written Declaration of Default. The City shall have the sole discretion to permit the Contractor to remedy the cause for the contemplated termination without waiving the City's right to terminate the Contract.

B. If the Contract is terminated, the City may take over the Work and prosecute it to completion, by contract or otherwise, and may exclude the Contractor from the site. The City may take possession of the Work and of all of the Contractor's tools, appliances, construction equipment, machinery, materials, and plant which may be on the site of the Work, and use the same to the full extent they could be used by the Contractor, without liability to the Contractor. In exercising the City's right to prosecute the completion of the work, the City may also take possession of all materials and equipment stored at the site or for which the City has paid the Contractor but which are stored elsewhere, and finish the Work as the City deems expedient. In such case, the Contractor shall not be entitled to receive any further payment until the Work is finished.

C. If the unpaid balance of the Contract Price exceeds the direct and indirect costs and expenses of completing the Work, and all City damages including liquidated damages and compensation for additional professional and consultant services, such excess shall be used to pay the Contractor for the cost of the Work it performed and a reasonable allowance for overhead and profit. If such costs exceed the unpaid balance, the Contractor shall immediately upon demand pay the difference to the City. In exercising the City's right to prosecute the completion of the Work, the City shall have the right to exercise its sole discretion as to the manner, methods, and reasonableness of the costs of completing the Work, and the City shall not be required to obtain the lowest figure for Work performed in completing the contract. If the City takes bids for remedial Work or completion of the project, the Contractor shall not be eligible for the award of such contracts.

D. If the Contract is terminated, the City may demand that the Contractor's Surety take over and complete the Work on the Contract. The City may require that in so doing, the Contractor's Surety not utilize the Contractor in performing the Work. Upon the failure or refusal of the Contractor's Surety to take over and begin completion of the Work within 20 days after the demand, the City may take over the Work and prosecute it to completion as provided above.

E. The City shall have the option of requiring any, all or none of the Subcontractors to perform according to their subcontracts and may assign any or all of the subcontracts to a general contractor

selected to complete the Work.

F. If the City takes over the Work, unexecuted orders entered into by the Contractor for performance of any part of the Work will be effective upon acceptance by the City in writing and only as to those subcontracts and purchase orders which the City designates in writing.

G. The Contractor shall be liable for any damage to the City resulting from the termination or from the Contractor's refusal or failure to complete the Work, and for all costs necessary for repair and completion of the Project over and beyond the amount of the Contract. The Contractor shall be liable for all legal fees and costs required to enforce the provisions of the Contract.

H. If the City terminates the Contract, the Contractor shall remain liable for liquidated damages for delay until such reasonable time as may be required for final completion of the Work. Such damages shall be in addition to and not in lieu of any other damages sustained by City in completing the Work.

I. In the event the Contract is terminated, the termination shall not affect any rights of the City against the Contractor. The rights and remedies of the City under this section are in addition to any other rights and remedies provided by law or under this Contract. Any retention or payment of monies to the Contractor by the City will not release the Contractor from liability.

J. If the Contract is terminated under this section, and it is determined for any reason that the Contractor was not in default under the provisions of this Section, the termination shall be deemed a Termination for Convenience of the City and, the rights and obligations of the parties shall be determined in accordance with the following section.

ARTICLE 32
TERMINATIN FOR CONVENIENCE OF THE CITY

The City, by written notice to the Contractor, may terminate this Contract in whole or in part when sufficient appropriated or other funds are not available or in the sole discretion of the City it is in the City's best interest. In such case, the Contractor shall be paid for all Work executed and reasonable termination expenses, and a reasonable allowance for profit and overhead on Work done, provided that such payments exclusive of termination expenses shall not exceed the total Contract Price as reduced by other contract payments previously made to the Contractor and as further reduced by the value of the Work as yet not completed. The Contractor shall not be entitled to profit and overhead on Work, which was not performed.

ARTICLE 33
ASSIGNMENT OF CONTRACT

Contractor shall not assign any amount or part of the Contract or any of the funds to be received under the Contract unless Contractor has the prior written approval of the City and the Contractor's Surety has been given notice and has given written consent to any such assignment.

ARTICLE 34
LAW TO GOVERN

This Contract is made under and shall be construed in accordance with the laws of the State of Arizona. If any portion of this Contract is found to be unenforceable the rest and remainder of the Contract shall remain in full force and effect so as to effectuate the intent of the parties. Each party acknowledges that it has had an opportunity to review this Contract with counsel and this document shall be construed fairly and equitably so as to effectuate the intention of the parties irrespective of who is determined to have been the drafter of the document.

ARTICLE 35
E-VERIFY REQUIREMENTS

To the extent applicable under Ariz. Rev. Stat. §41-4401, the Contractor and its subcontractors or subconsultants warrant compliance with all federal immigration laws and regulations that relate to their employees and compliance with the E-verify requirements under Ariz. Rev. Stat. §23-214(A). The Contractor's or its subcontractor's or subconsultant's failure to comply with such warranty shall be deemed a material breach of this Agreement and may result in the termination of this Agreement by the City.

ARTICLE 36
COMPLIANCE WITH FEDERAL IMMIGRATION LAWS AND REGULATIONS

Consultant warrants that it complies with all Federal Immigration laws and regulations that relate to its employees and complies with A.R.S. § 23-214.A. Consultant acknowledges that pursuant to A.R.S. § 41-4401 and effective September 30, 2008, a breach of this warranty is a material breach of this contract subject to penalties up to and including termination of this contract, and that the City retains the legal right to inspect the papers of any employee who works on the contract to ensure compliance with this warranty.

ARTICLE 37
ISRAEL

Pursuant to Arizona Revised Statute § 35-393.01, Contractor certifies that it is not currently engaged in, and agrees for the duration of the Contract to not engage in, a boycott of Israel, or any entity that does business in Israel or any territories controlled by Israel.

EXHIBIT B
SPECIAL PROVISIONS

SECTION 500

Form 1, The Bidder's Information Form: Required to be submitted with each bid.

All other forms in this section: To be completed by the apparent low bidder and submitted by the deadline indicated on the form. If there is no deadline on the form, it should be submitted within 5 days of notification of bid results.

Form	Title
1	BIDDERS INFORMATION FEDERALY FUNDED PROJECT FORM (required with the bid)

NOTICE TO PRIME AND LOWER TIER CONTRACTORS

THIS IS A FEDERALLY FUNDED PROJECT

The following information regarding the prime contractor is required to be submitted WITH YOUR BID. Following award, the prime will supply the forms to the lower tier contractors as a part of the pre Notice to Proceed paperwork.

Company Name:	GCON Inc.
Phone:	623-581-6300
Street # and Street Name or P.O. Box:	1606 W Whispering Wind Dr.
City:	Phoenix
State:	AZ
Zip:	85085
Federal ID number or Social Security number:	68-0542135
Type of License:	Contractor License
License number:	B1-ROC 182765
DUNS number:	189633568
All Bidders must be registered in SAM.gov (System for Award Management) prior to award. All subcontractors must be registered in SAM.gov prior to the issuance of the Notice to Proceed.	
Owner Name:	Tiffany Fisher
Date:	10/18/21
Signature	
CERTIFICATION ON FEDERALLY FUNDED CONTRACTS **Form 2**
PUBLIC LAW 100-690, SECTION 5152
DRUG-FREE WORKPLACE ACT OF 1988

The OWNER has adopted a policy and certified to all Federal Agencies that have granted federal funds to the OWNER that OWNER will provide a drug-free workplace for our employees and that Contractors providing property or services to OWNER with a value of $25,000 or more under a federally funded contract must also provide a drug-free workplace for their employees.

DRUG-FREE WORKPLACE REQUIREMENTS FOR CONTRACTORS ON FEDERALLY FUNDED CONTRACTS

(A) DRUG-FREE WORKPLACE REQUIREMENT.

(1) REQUIREMENT FOR PERSONS OTHER THAN INDIVIDUALS. -- No person, other than an individual, shall be considered a responsible source, under the meaning of such term as defined in the section 4(8) of the Office of Federal Procurement Policy Act [41 U.S.C. 403(8)], for the purposes of being awarded a contract for the procurement of any property or services of a value of $25,000 or more from any Federal agency unless such person has certified to the contracting agency that it will provide a drug-free workplace by -

(a) publishing a statement notifying employees that the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited in the persons workplace and specifying the actions that will be taken against employees for violations of such prohibition;

(b) establishing a drug-free awareness program to inform employees about

(i) the dangers of drug abuse in the workplace;

(ii) the person's policy of maintaining a drug-free workplace;

(iii) any available drug counseling, rehabilitation, and employee assistance programs; and

(iv) the penalties that may be imposed upon employees for drug abuse violation;

(c) making it a requirement that each employee to be engaged in the performance of such contract be given a copy of the statement required by subparagraph (A);

(d) notifying employees in the statement required by subparagraph (A), that as a condition of employment on such contract, the employee will-

(i) abide by the terms of the statement; and

(ii) notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five (5) days after such conviction;

(e) notifying the contracting agency within ten (10) days after receiving notice under subparagraph (D)(ii) from an employee or otherwise receiving actual notice of such conviction;

(f) imposing a sanction on, or requiring the satisfactory participation in a drug abuse assistance or rehabilitation program by, any employee who is so convicted, as required by section 5154; and

(g) making a good faith effort to continue to maintain a drug-free workplace through implementation of subparagraphs (A), (B), (C), (D), (E), and (F).

(2) REQUIREMENT FOR INDIVIDUALS. No Federal agency shall enter into a contract with an individual unless such contract includes a certification by the individual that the individual will not engage in the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance in the performance of the contract.

(B) SUSPENSION, TERMINATION, OR DEBARMENT OF THE CONTRACTOR.

(1) GROUNDS FOR SUSPENSION, TERMINATION, OR DEBARMENT. -- Each federally -funded contract shall be subject to suspension of payments under the contract or termination of the contract, or both, and the contractor thereunder or the individual who entered the contract, as applicable, shall be subject to suspension or debarment in accordance with the requirements of this section if the head of the contracting agency determines that -

(a) the contractor or individual has made a false certification under subsection (a);

(b) the contractor violates such certification by failing to carry out the requirements of subparagraph (A), (B), (C), (D), (E), or (F) of subsection (a)(1); or

(c) such a number of employees of such contractor have been convicted of violations occurring in the workplace as to indicate that the contractor has failed to make a good faith effort to provide a drug-free workplace as required by subsection (a).

(2) CONDUCT OF SUSPENSION, TERMINATION, AND DEBARMENT PROCEEDINGS. -

(a) If a contracting officer determines, in writing, that cause for suspension of payments, termination, or suspension or debarment exists, an appropriate action shall be initiated by a contracting officer of the agency, to be conducted by the agency concerned in accordance with the Federal Acquisition Regulation and applicable agency procedures.

(b) The Federal Acquisition Regulation shall be revised to include rules for conducting suspension and debarment proceedings under this subsection, including rules providing notice, opportunity to respond in writing or in person, and such other procedures as may be necessary to provide a full and fair proceeding to a contractor or individual in such proceeding.

(3) EFFECT OF DEBARMENT. -- Upon issuance of any final decision under this subsection requiring debarment of a contractor or individual, such contractor or individual shall be ineligible for award of any contract by any Federal agency, and for participation in any future procurement by any Federal agency, for a period specified in the decision, not to exceed (5) years.

BY SUBMISSION OF ITS BID OR PROPOSAL, THE UNDERSIGNED CONTRACTOR _____ , ACKNOWLEDGES RECEIPT OF THIS PUBLIC LAW INFORMATION AND CERTIFIES IT WILL COMPLY WITH THE DRUG-FREE WORKPLACE REQUIREMENTS DESCRIBED ABOVE. THE UNDERSIGNED CONTRACTOR HEREBY AGREES THAT THIS CERTIFICATION SHALL BECOME, WITHOUT ANY FUTURE ACTION OF THE PARTIES, A BINDING AND ENFORCEABLE PROVISION OF ANY CONTRACT RELATING TO THE ACTIVITY OR PROJECT DESCRIBED IN THESE SPECIFICATIONS UPON AWARD OF A CONTRACT TO CONTRACTOR.

EQUAL EMPLOYMENT OPPORTUNITY CERTIFICATION Form 3

200.420 Equal Opportunity Clause to be included in contracts and subcontracts.

(a) The following equal opportunity clause shall be included in each contract and subcontract which is not exempt: During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of the nondiscrimination clause.

(2) The contractor will in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard race, creed, color, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notices in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order 10925 of March 6 1961, as amended, and of the regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

(5) The contractor will furnish all information and reports required by Executive Order 10925 of March 6, 1961, as amended, and by the regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records, and accounts by HUD and the Committee for purposes of investigation to ascertain compliance with such regulations, and orders.

(6) In the event of the contractor's non-compliance with the nondiscrimination clause of this contract or with any of the said regulations, or orders, this contract may be cancelled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or Federally-assisted construction contracts in accordance with procedures authorized in Executive Order 10925 of March 6, 1961, as amended, and such other sanctions may be imposed and remedies invoke s provided in the said Executive Order or by regulations, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

(7) The contractor will include the provisions of Paragraphs(1) through (7) in every subcontract or purchase order unless exempted by regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to Section 303 of Executive Order 10925 of March 6, 1961, as amended, so that such provisions will be binding upon each subcontractor or vender. The contractor will take such action with respect to any subcontract or purchase orders as HUD may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vender as a result of such direction by HUD, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

(b) Except in subcontracts for the performance of construction work at the site of construction, the clause is not required to be inserted in subcontracts below the second tier. Subcontracts may incorporate by referenced to the equal opportunity clause.

(In the event a prospective contractor and/or subcontractor does not have such an Affirmative Action Plan for employment practices, the following is for your information and may be used as an alternative. Such a plan is necessary to meet Federal requirements for CDBG funded projects).

_____

(Individual or Company Responsible)

undertakes a program of Affirmative Action, to which good faith efforts will be directed to:

1. Determine the extent to which minorities and women are utilized.

2. Identify and eliminate employment practices, which have an adverse impact on minorities, women and others protected by applicable law.

3. Develop recruitment efforts and measures to ensure that qualified minorities, women, and handicapped persons are included to help reduce underutilization.

4. Establish organizational structures and monitoring systems which will assure effective operation of the affirmative action program.

NOTE: The bidder's execution of the signature portion of this proposal shall also constitute execution of this assurance.

CERTIFICATION OF 24 CFR part 75 Section 3 Clause **Form 5**

1. The work to be performed under this contract is subject to the requirements of Section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u (Section 3). The purpose of Section 3 is to ensure that the employment and other economic opportunities generated by HUD assistance or HUD-assisted activities covered by Section 3, shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly persons who are recipients of HUD assistance for housing.

2. The parties to this contract agree to comply with HUD's regulations in 24 CFR part 75, which implement Section 3. As evidenced by their execution of this contract, the parties to this contract certify that they are under no contractual or other impediment that would prevent them from complying with the part 75 regulations.

3. The contractor agrees to

a. Send to each labor organization or representative of workers with which the contractor has a collective bargaining agreement or other understanding, if any, a notice advising the labor organization or workers' representative of the contractor's commitments under this Section 3 clause.

b. Post copies of the notice in conspicuous places at the work site where both employees and applicants for training and employment positions can see the notice.

The notice shall describe the Section 3 preference, shall set forth minimum number and job titles subject to hire, availability of apprenticeship and training positions, the qualifications for each; and the name and location of the person(s) taking applications for each of the positions; and the anticipated date the work shall begin.

4. The contractor agrees to include this Section 3 clause in every subcontract subject to compliance with regulations in 24 CFR part 75, and agrees to take appropriate action, as provided in an applicable provision of the subcontract or in this Section 3 clause, upon a finding that the subcontractor is in violation of the regulations in 24 CFR part 75. The contractor will not subcontract with any subcontractor where the contractor has notice or knowledge that the subcontractor has been found in violation of the regulations in 24 CFR part 75.

5. The contractor will certify that any vacant employment positions, including training positions, that are filled

a. after the contractor is selected but before the contract is executed, and

b. with persons other than those to whom the regulations of 24 CFR part 75 require employment opportunities to be directed, were not filled to circumvent the contractor's obligations under 24 CFR part 75.

6. Noncompliance with HUD's regulations in 24 CFR part 75 may result in sanctions, termination of this contract for default, and debarment or suspension from future HUD assisted contracts.

7. With respect to work performed in connection with Section 3 covered Indian housing assistance, section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e) also applies to the work to be performed under this contract. Section 7(b) requires that to the greatest extent feasible (i) preference and opportunities for training and employment shall be given to Indians, and (ii) preference in the award of contracts and subcontracts shall be given to Indian organizations and Indian-owned Economic Enterprises. Parties to this contract that are subject to the provisions of Section 3 and section 7(b) agree to comply with Section 3 to the maximum extent feasible, but not in derogation of compliance with section 7(b).

The President's Executive Order 13465 of June 6, 2008 and Arizona Revised Statutes (A.R.S.) Section 41-4401, require Maricopa County to ensure that each government entity, contractor and subcontractor it conducts business with complies with federal immigration laws and regulations that relate to their employees and A.R.S. Section 23-214, Subsection A. All governmental entities, vendors, contractors and subcontractors MUST certify use of the *E-Verify* system established by the Department of Homeland Security.

All contractors and subcontractors must certify compliance with items 1 and 2 below.

1. The government entity, organization or company shown below is in compliance with the Immigration Reform and Control Act of 1986 in relation to all employees performing work in the United States and does not knowingly employ persons in violation of the United States Immigration laws. The government entity, organization or company shown below will obtain this certification from all subcontractors who will participate in the performance of this contract and maintain subcontractor certifications for inspection by the County if such inspection is requested; and

2. By the date of the delivery of the product and/or performance of services, the government entity, organization or company shown below will have implemented or will be in the process of implementing the *E-Verify* program for all newly hired employees in the United States who will perform work on behalf of the Maricopa County.

I certify that the government entity, organization or company shown below is in compliance with items 1 and 2 above and that I am authorized to sign on its behalf.

Applicability

The Project or Program to which the construction work covered by this contract pertains is being assisted by the United States of America and the following Federal Labor Standards Provisions are included in this Contract pursuant to the provisions applicable to such Federal assistance.

A. 1. (i) Minimum Wages. All laborers and mechanics employed or working upon the site of the work, will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act (29 CFR Part 3), the full amount of wages and bona fide fringe benefits (or cash equivalents thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics. Contributions made or costs reasonably anticipated for bona fide fringe benefits under Section l(b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of 29 CFR 5.5(a)(1)(iv); also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs, which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period.

Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in 29 CFR 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: Provided, That the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classification and wage rates conformed under 29 CFR 5.5(a)(1)(ii) and the Davis-Bacon poster (WH-1321) shall be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible, place where it can be easily seen by the workers.

(ii) (a) Any class of laborers or mechanics which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. HUD shall approve an additional classification and wage rate and fringe benefits therefor only when the following criteria have been met:

(1) The work to be performed by the classification requested is not performed by a classification in the wage determination; and

(2) The classification is utilized in the area by the construction industry; and

(3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(b) If the contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and HUD or its designee agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by HUD or its designee to the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Washington, D.C. 20210. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise HUD or its designee or will notify HUD or its designee within the 30-day period that additional time is necessary. (Approved by the Office of Management and Budget under OMB control number 1215-0140.)

(c) In the event the contractor, the laborers or mechanics to be employed in the classification or their representatives, and HUD or its designee do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), HUD or its designee shall refer the questions, including the views of all interested parties and the recommendation of HUD or its designee, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise HUD or its designee or will notify HUD or its designee within the 30-day period that additional time is necessary. (Approved by the Office of Management and Budget under OMB Control Number 1215-0140.)

(d) The wage rate (including fringe benefits where appropriate) determined pursuant to subparagraphs (1)(ii)(b) or (c) of this paragraph, shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(iii) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.

(iv) If the contractor does not make payments to a trustee or other third person, the contractor may consider as part

of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, Provided, That the Secretary of Labor has found, upon the written request of the contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program. (Approved by the Office of Management and Budget under OMB Control Number 1215-0140.)

2. Withholding. HUD or its designee shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld from the contractor under this contract or any other Federal contract with the same prime contractor, or any other Federally-assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees and helpers, employed by the contractor or any subcontractor the full amount of wages required by the contract In the event of failure to pay any laborer or mechanic, including any apprentice, trainee or helper, employed or working on the site of the work, all or part of the wages required by the contract, HUD or its designee may, after written notice to the contractor, sponsor, applicant, or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased. HUD or its designee may, after written notice to the contractor, disburse such amounts withheld for and on account of the contractor or subcontractor to the respective employees to whom they are due. The Comptroller General shall make such disbursements in the case of direct Davis-Bacon Act contracts.

3. (i) Payrolls and basic records. Payrolls and basic records relating thereto shall be maintained by the contractor during the course of the work preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records shall contain the name, address, and social security number of each such worker, his or her correct classification, hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in Section l(b)(2)(B) of the Davis-bacon Act), daily and weekly number of hours worked, deductions made and actual wages paid. Whenever the Secretary of Labor has found under 29 CFR 5.5 (a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in Section l(b)(2)(B) of the Davis-Bacon Act, the contractor shall maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual cost incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs. (Approved by the Office of Management and Budget under OMB Control Numbers 1215-0140 and 1215-0017.)

(ii) (a) The contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to HUD or its designee if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the payrolls to the applicant sponsor, or owner, as the case may be, for transmission to HUD or its designee. The payrolls submitted shall set out accurately and completely all of the information required to be maintained under 29 CFR 5.5(a)(3)(i) except that full social security numbers and home addresses shall not be included on weekly transmittals. Instead the payrolls shall only need to include an individually identifying number for each employee (e.g., the last four digits of the employee's social security number). The required weekly payroll information may be submitted in any form desired. Optional Form WH-347 is available for this purpose from the Wage and Hour Division Web site at *http://www.dol.gov/esa/whd/forms/wh347instr.htm* or its successor site. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors. Contractors and subcontractors shall maintain the full social security number and current address of each covered worker, and shall provide them upon request to HUD or its designee if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the payrolls to the applicant sponsor, or owner, as the case may be, for transmission to HUD or its designee, the contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or audit of compliance with prevailing wage requirements. It is not a violation of this subparagraph for a prime contractor to require a subcontractor to provide addresses and social security numbers to the prime contractor for its own records, without weekly submission to HUD or its designee. (Approved by the Office of Management and Budget under OMB Control Number 1215-0149.)

(b) Each payroll submitted shall be accompanied by a "Statement of Compliance," signed by the contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:

(1) That the payroll for the payroll period contains the information required to be provided under 29 CFR 5.5 (a)(3)(ii), the appropriate information is being maintained under 29 CFR 5.5(a)(3)(i), and that such information is correct and complete;

(2) That each laborer or mechanic (including each helper, apprentice, and trainee) employed on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in 29 CFR Part 3;

(3) That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification of work performed, as specified in the applicable wage determination incorporated into the contract.

(c) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission of the "Statement of Compliance" required by subparagraph A.3.(ii)(b).

(d) The falsification of any of the above certifications may subject the contractor or subcontractor to civil or criminal prosecution under Section 1001 of Title 18 and Section 231 of Title 31 of the United States Code.

(iii) The contractor or subcontractor shall make the records required under subparagraph A.3.(i) available for inspection, copying, or transcription by authorized representatives of HUD or its designee or the Department of Labor, and shall permit such representatives to interview employees during working hours on the job. If the contractor or subcontractor fails to submit the required records or to make them available, HUD or its designee may, after written notice to the contractor, sponsor, applicant or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR 5.12.

4. Apprentices and Trainees.

(i) Apprentices. Apprentices will be permitted to work at less than the predetermined rate for the work they performed when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Office of Apprenticeship Training, Employer and Labor Services, or with a State Apprenticeship Agency recognized by the Office, or if a person is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Office of Apprenticeship Training, Employer and Labor Services or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to the contractor as to the entire work force under the registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman's hourly rate) specified in the contractor's or subcontractor's registered program shall be observed. Every apprentice must be paid at not less than the rate specified in the registered program for the apprentice's level of progress, expressed as a percentage of the journeymen hourly rate specified in the applicable wage determination. Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination. In the event the Office of Apprenticeship Training, Employer and Labor Services, or a State Apprenticeship Agency recognized by the Office, withdraws approval of an apprenticeship program, the contractor will no longer be permitted to utilize apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(ii) Trainees. Except as provided in 29 CFR 5.16, trainees will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant ',to and individually registered in a program which has received prior approval, evidenced by formal certification by the U.S. Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination which provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate who is not registered and participating in a training plan approved by

the Employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, the contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(iii) Equal employment opportunity. The utilization of apprentices, trainees and journeymen under 29 CFR Part 5 shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR Part 30.

5. Compliance with Copeland Act requirements. The contractor shall comply with the requirements of 29 CFR Part 3 which are incorporated by reference in this contract

6. Subcontracts. The contractor or subcontractor will insert in any subcontracts the clauses contained in subparagraphs 1 through 11 in this paragraph A and such other clauses as HUD or its designee may by appropriate instructions require, and a copy of the applicable prevailing wage decision, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in this paragraph.

7. Contract termination; debarment. A breach of the contract clauses in 29 CFR 5.5 may be grounds for termination of the contract and for debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

8. Compliance with Davis-Bacon and Related Act Requirements. All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR Parts 1, 3, and 5 are herein incorporated by reference in this contract

9. Disputes concerning labor standards. Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR Parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between the contractor (or any of its subcontractors) and HUD or its designee, the U.S. Department of Labor, or the employees or their representatives.

10. (i) Certification of Eligibility. By entering into this contract the contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in the contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of Section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1) or to be awarded HUD contracts or participate in HUD programs pursuant to 24 CFR Part 24.

(ii) No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of Section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1) or to be awarded HUD contracts or participate in HUD programs pursuant to 24 CFR Part 24.

(iii) The penalty for making false statements is prescribed in the U.S. Criminal Code, 18 U.S.C. 1001. Additionally, U.S. Criminal Code, Section 1 01 0, Title 18, U.S.C., "Federal Housing Administration transactions", provides in part: "Whoever, for the purpose of . . . influencing in any way the action of such Administration..... makes, utters or publishes any statement knowing the same to be false..... shall be fined not more than $5,000 or imprisoned not more than two years, or both."

11. Complaints, Proceedings, or Testimony by Employees. No laborer or mechanic to whom the wage, salary, or other labor standards provisions of this Contract are applicable shall be discharged or in any other manner discriminated against by the Contractor or any subcontractor because such employee has filed any complaint or instituted or caused to be instituted any proceeding or has testified or is about to testify in any proceeding under or relating to the labor standards applicable under this Contract to his employer.

B. Contract Work Hours and Safety Standards Act. The provisions of this paragraph B are applicable where the amount of the prime contract exceeds $100,000. As used in this paragraph, the terms "laborers" and "mechanics" include watchmen and guards.

(1) Overtime requirements. No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which the individual is employed on such work to work in excess of 40 hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of 40 hours in such workweek.

(2) Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the clause set forth in subparagraph (1) of this paragraph, the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in subparagraph (1) of this paragraph, in the sum of $10 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of 40 hours without payment of the overtime wages required by the clause set forth in sub paragraph (1) of this paragraph.

(3) Withholding for unpaid wages and liquidated damages. HUD or its designee shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contract, or any other Federally-assisted contract subject to the Contract Work Hours and Safety Standards Act which is held by the same prime contractor such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in subparagraph (2) of this paragraph.

(4) Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clauses set forth in subparagraph (1) through (4) of this paragraph and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in subparagraphs (1) through (4) of this paragraph.

C. Health and Safety. The provisions of this paragraph C are applicable where the amount of the prime contract exceeds $100,000.

(1) No laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his health and safety as determined under construction safety and health standards promulgated by the Secretary of Labor by regulation.

(2) The Contractor shall comply with all regulations issued by the Secretary of Labor pursuant to Title 29 Part 1926 and failure to comply may result in imposition of sanctions pursuant to the Contract Work Hours and Safety Standards Act, (Public Law 91-54, 83 Stat 96). 40 USC 3701 et seq.

(3) The contractor shall include the provisions of this paragraph in every subcontract so that such provisions will be binding on each subcontractor. The contractor shall take such action with respect to any subcontractor as the Secretary of Housing and Urban Development or the Secretary of Labor shall direct as a means of enforcing such provisions.

"General Decision Number: AZ20210031 10/08/2021

Superseded General Decision Number: AZ20200031

State: Arizona

Construction Type: Building

County: Maricopa County in Arizona.

BUILDING CONSTRUCTION PROJECTS (does not include single family homes or apartments up to and including 4 stories).

Note: Under Executive Order (EO) 13658, an hourly minimum wage of $10.95 for calendar year 2021 applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least $10.95 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in calendar year 2021. If this contract is covered by the EO and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must pay workers in that classification at least the wage rate determined through the conformance process set forth in 29 CFR 5.5(a)(1)(ii) (or the EO minimum wage rate,if it is higher than the conformed wage rate). The EO minimum wage rate will be adjusted annually. Please note that this EO applies to the above-mentioned types of contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but it does not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60). Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

==========

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

PART 1 - GENERAL

1.1 WORK COVERED BY CONTRACT DOCUMENTS

A. Project Identification: Project consists of PHASE I: New 1,450 square foot Kitchen Addition and PHASE II: 560 square foot Remodel of Existing Kitchen, Miscellaneous Improvements to Multi-purpose Room, and all associated demolition and improvements as indicated in the Drawings.

Project Location: **BUCKEYE SENIOR CENTER- Kitchen Addition & Remodel**
201 East Centre Avenue
Buckeye, AZ. 85326

1. Owner: **City of Buckeye**

B. Architect Identification: The Contract Documents consisting of Drawings & Technical Specifications dated 23 August 2021, 100% Construction Documents, were prepared for this project by:

Michael Wilson Kelly, Architects, Ltd.,
331 N. First Avenue, Suite 108, Phoenix, AZ. 85003
TEL: 480.433.3502 (mobile)
EMAIL: mike@mwkarch.com

C. The Work consists of all labor, materials, equipment, services, and transportation necessary to construct the Project.

1. **Site Preparation & Site Work, Landscaping, Utilities, Grading & Drainage, Selected Demolition, New 1,450 sf Kitchen Addition, Remodeling of 560 sf Existing Kitchen, and Miscellaneous Improvements as indicated in the Drawings.**

1.2 WORK SEQUENCE

A. The Work shall be conducted in two phases in order to remain operational during construction:

B. Phase I: Utilities, Site Work & New Addition.

C. Phase II: Remodel Existing Kitchen & Miscellaneous Improvements in Multi-purpose Room as indicated.

1. All Work of these phases shall be substantially complete in accordance with City of Buckeye Invitation for Bids (IFB).

1.3 USE OF PREMISES

A. General: Contractor shall have limited use of premises for construction operations, including use of Project site, during construction period. Contractor's use of premises is limited per City IFB Instructions.

1.4 WORK REQUIRING CONTRACTOR COORDINATION WITH PRE-EXISTING WORK

1. Utilities: Sewer, Domestic Water, Fire Lines & Riser, Gas and Electrical Service are existing. Utility Services are to remain functional during Construction to the greatest extent possible.

2. Earthwork, Rough Grading & Drainage: Contractor will be responsible for potholing to locate any existing conduit, pipes and utilities under the existing patio slab and for maintaining their effectiveness. Contractor shall be responsible for restoring perimeter grading to within 1 inch of perimeter concrete walkways affected by new work.

3. Landscaping: Perimeter: Protect existing landscaping and irrigation identified to remain during construction while installing new work in the Drawings. Terminate existing irrigation lines as required at ground floor Addition.

4. Interior Improvements: Maintain a high degree of public safety, safe access and operations, provide dust control and environmental quality compliance, and protect all existing unaffected adjacent improvements and systems during Construction. Coordinate operations closely with ACC Staff throughout the entire Construction period.

END OF SECTION 01100

SECTION 01125 – **MEASUREMENT AND PAYMENT**

PART 1 - GENERAL

1.01 SECTION INCLUDES:

A. Measurement and payment criteria applicable to Work performed under payment method as defined.

1.02 COSTS INCLUDED

A. Prices included on the Bid Form shall include full compensation for all labor, products, tools, equipment, plant, transportation, services and incidentals: erection, application or installation of an item of Work including Contractor's overhead, profit and sales tax.

1.03 UNIT QUANTITIES SPECIFIED

A. Quantities indicated in the Bid Form are for bidding and contract purposes only.

1.04 SUMMARY OF WORK REQUIREMENTS

A. Summary of the Scope of Work Description: Replace restroom building as specified in the Plans and Specifications. Measurement and payment for all pay items in the proposal shall be as specified in the applicable section of the Maricopa Association of Governments Uniform Standard specifications for Public Works Construction (MAG Specifications) latest edition, and supplements, and any applicable City specifications or Standards as specified in these Technical Specifications. In the event of a conflict between these Specifications and the requirements of the plans, detail drawings, or City Standard Details and the MAG Specifications, these Specifications shall prevail.

1.05 PAYMENT

A. Payment of the contract items shall be compensation in full for furnishing all overhead, labor, material, tools, equipment, and appurtenances necessary to complete the work in a good, neat, and satisfactory manner as indicated on the plans, or as specified, with all necessary connections and appurtenances for the satisfactory use of fully functional, up to current Codes, and safe operation of said item. No additional payment will be made for work related to each item unless specifically noted or specified. Measurement will be in place for the completed work with no allowances for waste.

1.06 PAYMENT ITEMS

A. Item 1 – Mobilization & Temporary Facilities

1. Description: The work under this section shall consist of preparatory work and operations, including, but not limited to, the movement of personnel, equipment, supplies, and incidentals to the project site; the establishment of mobile storage units, and other facilities necessary for work on the project; for all other work and operations that must be performed and costs incurred prior to beginning work on the project site. Mobilization shall include Temporary Facilities as described in Section 01500. This pay item also includes all work associated with demobilizing from the project site.
2. Method of Measurement: Mobilization & Temporary Facilities shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Mobilization & Temporary Facilities shall be paid as a percentage of the total work performed less the mobilization item. Payment for this item shall be based on the following Schedule:

Percentage of Construction Completed	Percent Payment
10%	25%
25%	50%
50%	100%

B. Item No. 2 – Selected Demolition & Removal
1. Description: The work under this item shall conform to the Project Plans, to MAG Section 350, and to the Technical Specifications. The Contractor shall carefully remove, salvage and return designated items identified for salvage to the City for their use. The Contractor shall take necessary measures to protect all existing Utilities, trees, site lighting, signage and other elements intended to remain on site. Demolition shall include removal of all materials and items noted on Demolition Plans.
2. Method of Measurement: Selected Demolition & Removal shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Selected Demolition & Removal shall be paid for as the contract lump sum price. This price shall be full compensation for the disassembling, removing, storing, and maintaining the materials, and for all labor, equipment, tools, and incidentals necessary to complete the item for the duration of the project.

C. Item No. 3 – Concrete Foundations with Cold Applied Bituminous Waterproofing Membrane, Concrete Saw-cutting, and Concrete Slabs on Engineered Fill
1. Description: The work under this item shall consist of all materials, equipment, and labor to install Concrete Foundations with cold applied Bituminous Waterproofing Membrane below grade where indicated, all Concrete Saw-cutting, and 4 inch Concrete Slabs over 4 inch Engineered Fill complete in place as specified and as shown on the Plans.

2. Method of Measurement: Concrete Foundations with Cold Applied Bituminous Waterproofing Membrane where indicated, Concrete Saw-Cutting, and 4 inch Concrete Slabs over 4 inch Engineered Fill shall be measured as a lump sum including all work required to complete in place as specified and shown on Plans.
3. Basis of Payment: Concrete Foundations with Cold Applied Bituminous Waterproofing Membrane where indicated, all Concrete Saw-Cutting, and 4 inch Concrete Slabs over 4 inch Engineered Fill shall be paid for per the Contract lump sum price upon completion.

D. Item No. 4 – Structural Steel, Metal Fabrications & Miscellaneous Metals
1. Description: The work under this item shall consist of all materials, equipment, and labor to furnish and install all Structural Steel, Metal Fabrications and Miscellaneous Metals including Steel Stairs, Steel Columns & Beams, Steel Imbeds, Steel Framing, Steel Lintels, Steel Decking and patch/repair of all affected Galvanized Steel Roof Decking and associated trims, and other Miscellaneous Metals complete in place as specified and as shown on the Plans.
2. Method of Measurement: all Steel and Miscellaneous Metals shall be measured as a lump sum including all work required to complete in place as specified and shown on plans.
3. Basis of Payment: all Steel and Miscellaneous Metals described above shall be paid for per the Contract lump sum price upon completion.

E.. Item No. 5 – Rough Carpentry, Wood Framing & Wood Sheathing
1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Rough Carpentry, Wood Framing Sheathing including all Wood Framing as required for the project.
2. Method of Measurement: Rough Carpentry, Wood Framing & Floor Sheathing shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Rough Carpentry, Wood Framing & Floor Sheathing shall be paid for as the Contract lump sum price upon completion.

F. Item No. 6 – Interior Architectural Millwork
1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Interior Architectural Millwork as required for the project.
2. Method of Measurement: Interior Architectural Millwork shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Interior Architectural Millwork shall be paid for as the Contract lump sum price upon completion.

G. Item No. 7 – Building Thermal & Acoustical Batt Insulation
1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install

Building Thermal & Acoustical Insulation, including wired to structure as required for the project.

2. Method of Measurement: Building Thermal & Acoustical Insulation shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Building Thermal & Acoustical Insulation shall be paid for as the Contract lump sum price upon completion.

H. Item No. 8– Spray Foam Roofing, Patch & Repair and Metal Flashing Specialties

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Spray Foam Roofing, Patch & Repair and Metal Flashing Specialties as required for the project.
2. Method of Measurement: Spray Foam Roofing, Patch & Repair and Metal Flashing Specialties shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Spray Foam Roofing, Patch & Repair and Metal Flashing Specialties shall be paid for as the Contract lump sum price upon completion.

I. Item No. 9 – Thru-Penetration Firestop Systems

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Thru-Penetration Firestop Systems as required for the project.
2. Method of Measurement: Thru-Penetration Firestop Systems shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Thru-Penetration Firestop Systems shall be paid for as the Contract lump sum price upon completion.

J. Item No. 10 – Joint Sealants, Caulking and Accessories

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Joint Sealants, Caulking and accessories as required for the project.
2. Method of Measurement: Joint Sealants, Caulking and accessories shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Joint Sealants, Caulking and accessories shall be paid for as the Contract lump sum price upon completion.

K. Item No. 11 – Flush Solid Wood Doors, Door Glazing & Hollow Metal Frames

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Flush Solid Wood Doors including Door Glazing where indicated and Hollow Metal Frames as required for the project.
2. Method of Measurement: Flush Solid Wood Doors including Door Glazing and Hollow Metal Frames shall be measured as a lump sum including all work required to complete the item.

3. Basis of Payment: Solid Wood Doors including Door Glazing and Hollow Metal Frames shall be paid for as the Contract lump sum price upon completion.

L. Item No. 12 – Hollow Metal Doors & Frames

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Hollow Metal Doors & Frames where indicated as required for the project.
2. Method of Measurement: Hollow Metal Doors & Frames shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Solid Wood Doors including Door Glazing and Hollow Metal Frames shall be paid for as the Contract lump sum price upon completion.

M. Item No. 13 – Access Doors & Frames

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Access Doors & Frames complete in place as specified and shown on the Plans.
2. Method of Measurement: Access Doors & Frames shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Access Doors & Frames shall be paid for per the Contract lump sum price upon completion.

N. Item No. 14 – Aluminum Framed Storefront Systems, Glazing & Window Tint Specialties

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Aluminum Framed Storefront System remodeling, new Interior Fixed Window Frames, Glazing and 3M Window Tinting Specialties complete in place as specified and shown on the Plans.
2. Method of Measurement: Aluminum Framed Storefront System remodeling, new Interior Fixed Window Frames, Glazing and 3M Window Tinting Specialties shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Aluminum Framed Storefront System remodeling, new Interior Fixed Window Frames, Glazing and 3M Window Tinting Specialties shall be paid for per the Contract lump sum price upon completion.

O. Item No. 15– City provided Door Hardware Vendors' Coordination

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Door Hardware and accessories complete in place in coordination with City of Buckeye Security Access Hardware vendor and Standard Hardware supplier/vendor.
2. Method of Measurement: Door Hardware Coordination shall be measured as a lump sum including all work required to complete in place in

coordination with City of Buckeye Security Access Hardware vendor and Standard Hardware supplier/vendor.

3. Basis of Payment: Door Hardware Vendors' Coordination shall be paid for per the Contract lump sum price upon completion.

P. Item No. 16– Non-Load Bearing Steel Framing & Furring Systems

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Non-Load Bearing Steel Framing & Furring complete in place as specified and shown on the Plans.
2. Method of Measurement: Non-Load Bearing Steel Framing & Furring shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Non-Load Bearing Steel Framing & Furring shall be paid for per the Contract lump sum price upon completion.

Q. Item No. 17 – Gypsum Board, Texture & Finishes

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Gypsum Board, Texture & Finishes as required for the project.
2. Method of Measurement: Gypsum Board, Texture & Finishes shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment Gypsum Board, Texture & Finishes shall be paid for as the Contract lump sum price upon completion.

R. Item No. 18 – Wall Cladding- FRP & Stainless Steel

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Wall Cladding- FRP & Stainless Steel as required for the project.
2. Method of Measurement: Wall Cladding- FRP & Stainless Steel shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Wall Cladding- FRP & Stainless Steel shall be paid for as the Contract lump sum price upon completion.

S. Item No. 19 – Ceramic Tile & Metal Edge Trims

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Ceramic Tile & Metal Edge Trims as required for the project.
2. Method of Measurement: Ceramic Tile shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Ceramic Tile & Metal Edge Trims shall be paid for as the Contract lump sum price upon completion.

T. Item No. 20 – Vinyl Composition Tile

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Vinyl Composition Tile as required for the project.
2. Method of Measurement: Ceramic Tile shall be measured as a lump sum including all work required to complete the item.

3. Basis of Payment: Ceramic Tile shall be paid for as the Contract lump sum price upon completion.

U. Item No. 21 – Quarry Tile Flooring & Coved Base

1. Description: The work under this item shall consist of furnishing all materials, labor, and equipment necessary to complete furnish and install Quarry Tile Flooring & Coved Base
2. Method of Measurement: Quarry Tile Flooring & Coved Base shall be measured as a lump sum including all work required to complete the item.
3. Basis of Payment: Quarry Tile Flooring & Coved Base shall be paid for as the Contract lump sum price upon completion.

V. Item No. 22 – Acoustical Panel Ceilings

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Acoustical Panel Ceilings complete in place as specified and shown on the Plans.
2. Method of Measurement: Acoustical Panel Ceilings shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Acoustical Panel Ceilings shall be paid for per the Contract lump sum price upon completion.

W. Item No. 23– Painting- Interior & Exterior

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Painting- Interior & Exterior, complete in place as specified and shown on the Plans.
2. Method of Measurement: Painting- Interior & Exterior, shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Painting- Interior & Exterior, shall be paid for per the Contract lump sum price upon completion.

X. Item No. 24 – Signage

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide Signage (including Restroom Signage, ADA Signage/Notices, halo LED Address Numerals and surface mounted Address Numerals) complete in place as specified and shown on the Plans.
2. Method of Measurement: Signage as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Signage as described above shall be paid for per the Contract lump sum price upon completion.

Y. Item No. 25 – Fire Extinguishers & Cabinets

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide all Fire Extinguishers & Cabinets complete in place as specified and shown on the Plans.

2. Method of Measurement: Fire Extinguishers & Cabinets as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Fire Extinguishers & Cabinets shall be paid for per the Contract lump sum price upon completion.

Z. NOT USED

AA. Item No. 27 – Commercial Kitchen Equipment, Walk-in Cooler & Freezer, Custom Stainless Steel Specialties, and all Appliances

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide all Commercial Kitchen Equipment, Walk-in Cooler & Freezer, Custom Stainless Steel Specialties, and all Appliances complete in place as specified and shown on the Plans.
2. Method of Measurement: Commercial Kitchen Equipment, Walk-in Cooler & Freezer, Custom Stainless Steel Specialties, and all Appliances as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Commercial Kitchen Equipment, Walk-in Cooler & Freezer, Custom Stainless Steel Specialties, and all Appliances shall be paid for per the Contract lump sum price upon completion.

BB. Item No. 28 – Horizontal Louver Blinds

1. Description: The work under this item shall consist all materials, equipment, and labor necessary to provide all Horizontal Louver Blinds complete in place as specified and shown on the Plans.
2. Method of Measurement: Horizontal Louver Blinds as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Horizontal Louver Blinds shall be paid for per the Contract lump sum price upon completion.

CC. Item No. 29 – Mechanical and Plumbing

1. Description: The work under this item shall consist of all materials, equipment, and labor necessary to provide all Mechanical and Plumbing specified and as shown on the Plans.
2. Method of Measurement: Mechanical and Plumbing as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Mechanical and Plumbing as described above shall be paid for per the Contract lump sum price upon completion.

DD. Item No. 30– Electrical & Lighting

1. Description: The work under this item shall consist of all materials, equipment, and labor to install Electrical & Lighting (including, but not limited to the following: Trenching and Backfill, Wire Feeds in Conduit, Conductors and Bond Wires, Terminations and Splices, Service Work including Power to New Distribution Panels, Power Wiring and Lighting Wiring in conduit, Convenience outlets and receptacles, and all Lighting Fixtures,

Miscellaneous Electrical Connections and Equipment including wire connectors, straps, brackets, splice kits, Unistrut supports, and mounting as required) complete in place as specified and shown on the Plans.

2. Method of Measurement: Electrical & Lighting as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Electrical & Lighting as described above shall be paid for per the Contract lump sum price upon completion.

EE. Item No. 31– Fire Alarm System

1. Description: The work under this item shall consist of all materials, equipment, and labor to install a new Fire Alarm System extending throughout the building.
2. Method of Measurement: Fire Alarm System as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Fire Alarm System as described above shall be paid for per the Contract lump sum price upon completion.

FF. Item No. 32– Automatic Fire Extinguishing System (AFES), i.e., Fire Sprinklers

1. Description: The work under this item shall consist of all materials, equipment, and labor to extend Fire Sprinklers to all new areas and existing sprinklers to be modified as required where remodeling occurs, complying with all current City of Buckeye published Fire Codes.
2. Method of Measurement: Fire Sprinklers as described above shall be measured as a lump sum including all work required to complete in place as specified and as shown on the Plans.
3. Basis of Payment: Fire Sprinklers as described above shall be paid for per the Contract lump sum price upon completion.

END OF SECTION 01025- MEASUREMENT AND PAYMENT

SECTION 01140 - **WORK RESTRICTIONS**

PART 1 - GENERAL

1.1 USE OF PREMISES

A. Use of Site: Limit use of premises to work in areas indicated. Do not disturb portions of site beyond areas in which the Work is indicated.

1. Limits: Confine construction operations to Limits of Construction as defined in the Drawings.
2. Driveways & Streets: Keep perimeter driveways and streets serving premises clear and available to Owner, Owner's employees, and emergency vehicles at all times. Do not use these areas for parking or storage of materials.

1.2 OCCUPANCY REQUIREMENTS

A. Partial Owner Occupancy: Owner reserves the right to occupy and to place and install equipment in completed areas of building before Substantial Completion, provided such occupancy does not interfere with completion of the Work. Such placement of equipment and partial occupancy shall not constitute acceptance of the total Work.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01140

SECTION 01290 - **PAYMENT PROCEDURES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section specifies administrative and procedural requirements necessary to prepare and process Applications for Payment. These requirements are in addition to Owner Pay Application procedures.

1.2 SCHEDULE OF VALUES

A. Coordination: Coordinate preparation of the Schedule of Values with preparation of Contractor's Construction Schedule.

1. Correlate line items in the Schedule of Values with other required administrative forms and schedules, including Submittals Schedule and Application for Payment forms with Continuation Sheets.
2. Submit the Schedule of Values to Architect at earliest possible date but no later than **seven** days before the date scheduled for submittal of initial Applications for Payment.
3. Sub-schedules: Where the Work is separated into phases requiring separately phased payments, provide sub-schedules showing values correlated with each phase of payment.

B. Format and Content: Use the Project Manual table of contents as a guide to establish line items for the Schedule of Values. Provide at least one line item for each Specification Section.

1. Identification: Include the following Project identification on the Schedule of Values:

a. Project name and location.
b. Name of Architect.
c. Architect's project number.
d. Contractor's name and address.
e. Date of submittal.

2. Arrange the Schedule of Values in tabular form with separate columns to indicate the following for each item listed:

a. Related Specification Section or Division.
b. Description of the Work.
c. Name of subcontractor.
d. Name of manufacturer or fabricator.
e. Name of supplier.
f. Change Orders (numbers) that affect value.

g. Dollar value.

1) Percentage of the Contract Sum to nearest one-hundredth percent, adjusted to total 100 percent.

3. Provide a breakdown of the Contract Sum in enough detail to facilitate continued evaluation of Applications for Payment and progress reports. Coordinate with the Project Manual table of contents. Provide several line items for principal subcontract amounts, where appropriate.
4. Round amounts to nearest whole dollar; total shall equal the Contract Sum.
5. Provide a separate line item in the Schedule of Values for each part of the Work where Applications for Payment may include materials or equipment purchased or fabricated and stored, but not yet installed.
6. Provide separate line items in the Schedule of Values for initial cost of materials, for each subsequent stage of completion, and for total installed value of that part of the Work.
7. Allowances: Provide a separate line item in the Schedule of Values for each allowance. Show line-item value of unit-cost allowances, as a product of the unit cost, multiplied by measured quantity. Use information indicated in the Contract Documents to determine quantities.
8. Each item in the Schedule of Values and Applications for Payment shall be complete. Include total cost and proportionate share of general overhead and profit for each item.

   a. Temporary facilities and other major cost items that are not direct cost of actual work-in-place may be shown either as separate line items in the Schedule of Values or distributed as general overhead expense, at Contractor's option.

9. Schedule Updating: Update and resubmit the Schedule of Values before the next Applications for Payment when Change Orders or Construction Change Directives result in a change in the Contract Sum.

1.3 APPLICATIONS FOR PAYMENT

A. Each Application for Payment shall be consistent with previous applications and payments as certified by Architect and paid for by Owner.

   1. Initial Application for Payment, Application for Payment at time of Substantial Completion, and final Application for Payment involve additional requirements.

B. Payment Application Times: The date for each progress payment is indicated in the Agreement between Owner and Contractor. The period of construction Work covered by each Application for Payment is the period indicated in the Agreement.

C. Payment Application Times: The date for each progress payment is the **15th** day of each month. The period covered by each Application for Payment starts on the day following the end of the preceding period and ends **15** days before the date for each progress payment.

D. Payment Application Forms: Use **AIA Document G702 and AIA Document G703 Continuation Sheets**. Application Preparation: Complete every entry on form. Notarize and execute by a person authorized to sign legal documents on behalf of Contractor. Incomplete applications will be returned without action.

1. Entries shall match data on the Schedule of Values and Contractor's Construction Schedule. Use updated schedules if revisions were made.
2. Include amounts of Change Orders and Construction Change Directives issued before last day of construction period covered by application.

E. Transmittal: Submit **5** signed and notarized original copies of each Application for Payment to **Owner** (Anthem Community Council) **& Architect** electronically. One copy shall include waivers of lien and similar attachments if required.

1. Transmit each copy with a transmittal form listing attachments and recording appropriate information about application.

F. Waivers of Mechanic's Lien: With each Application for Payment, submit waivers of mechanic's lien from every entity who is lawfully entitled to file a mechanic's lien arising out of the Contract and related to the Work covered by the payment.

1. Submit partial waivers on each item for amount requested in previous application, after deduction for retainage, on each item.
2. When an application shows completion of an item, submit final or full waivers.
3. Owner reserves the right to designate which entities involved in the Work must submit waivers.
4. Submit final Application for Payment with or preceded by final waivers from every entity involved with performance of the Work covered by the application who is lawfully entitled to a lien.

G. Initial Application for Payment: Administrative actions and submittals that must precede or coincide with submittal of first Application for Payment include the following:

1. List of subcontractors.
2. Schedule of Values.
3. Contractor's Construction Schedule (preliminary if not final).
4. Submittals Schedule (preliminary if not final).
5. List of Contractor's staff assignments.
6. Copies of building permits.
7. Copies of authorizations and licenses from authorities having jurisdiction for performance of the Work.
8. Certificates of insurance and insurance policies.
9. Performance and payment bonds.
10. Data needed to acquire Owner's insurance.

H. Application for Payment at Substantial Completion: After issuing the Certificate of Substantial Completion, submit an Application for Payment showing 100 percent completion for portion of the Work claimed as substantially complete.

1. Include documentation supporting claim that the Work is substantially complete and a statement showing an accounting of changes to the Contract Sum.

2. This application shall reflect Certificates of Partial Substantial Completion issued previously for Owner occupancy of designated portions of the Work.

I. Final Payment Application: Submit final Application for Payment with releases and supporting documentation not previously submitted and accepted, including, but not limited, to the following:

1. Evidence of completion of Project closeout requirements.
2. Insurance certificates for products and completed operations where required and proof that taxes, fees, and similar obligations were paid.
3. Updated final statement, accounting for final changes to the Contract Sum.
4. AIA Document G706, "Contractor's Affidavit of Payment of Debts and Claims."
5. AIA Document G706A, "Contractor's Affidavit of Release of Liens,"
6. AIA Document G707, "Consent of Surety to Final Payment,"
7. Evidence that claims have been settled.
8. Final meter readings for utilities, a measured record of stored fuel, and similar data as of date of Substantial Completion or when Owner took possession of and assumed responsibility for corresponding elements of the Work.

END OF SECTION 01290

SECTION 01310 - **PROJECT MANAGEMENT AND COORDINATION**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative provisions for coordinating construction operations on Project including, but not limited to, the following:

1. General Project coordination procedures.
2. Coordination Drawings.
3. Project meetings.

B. See Division 1 Section "Execution Requirements" for procedures for coordinating general installation and field-engineering services, including establishment of benchmarks and control points.

1.2 COORDINATION

A. Coordination: Coordinate construction operations included in various Sections of the Specifications to ensure efficient and orderly installation of each part of the Work. Coordinate construction operations, included in different Sections that depend on each other for proper installation, connection, and operation.

1. Schedule construction operations in sequence required to obtain the best results where installation of one part of the Work depends on installation of other components, before or after its own installation.
2. Coordinate installation of different components with other contractors to ensure maximum accessibility for required maintenance, service, and repair.
3. Make adequate provisions to accommodate items scheduled for later installation.

B. If necessary, prepare memoranda for distribution to each party involved, outlining special procedures required for coordination. Include such items as required notices, reports, and list of attendees at meetings.

1. Prepare similar memoranda for Owner and separate Contractors if coordination of their Work is required.

C. Administrative Procedures: Coordinate scheduling and timing of required administrative procedures with other construction activities and activities of other contractors to avoid conflicts and to ensure orderly progress of the Work. Such administrative activities include, but are not limited to, the following:

1. Preparation of Contractor's Construction Schedule.
2. Preparation of the Schedule of Values.
3. Installation and removal of temporary facilities and controls.

4. Delivery and processing of submittals.
5. Progress meetings.
6. Pre-installation conferences.
7. Project closeout activities.

1.3 SUBMITTALS

A. Coordination Drawings: Prepare Coordination Drawings if limited space availability necessitates maximum utilization of space for efficient installation of different components or if coordination is required for installation of products and materials fabricated by separate entities.

1. Indicate relationship of components shown on separate Shop Drawings.
2. Indicate required installation sequences.

1.4 PROJECT MEETINGS

A. General: Schedule and conduct meetings and conferences at **Project site, unless otherwise indicated**.

1. Attendees: Inform participants and others involved, and individuals whose presence is required, of date and time of each meeting. Notify Owner and Architect of scheduled meeting dates and times.
2. Agenda: Prepare the meeting agenda. Distribute the agenda to all invited attendees.
3. Minutes: Contractor shall take Meeting Minutes and record significant discussions and agreements achieved. Distribute the meeting minutes to everyone concerned, including Owner and Architect, within **3** days of the meeting.

B. Preconstruction Conference: Schedule a preconstruction conference before starting construction, at a time convenient to Owner and Architect. Hold the conference at Project site or another convenient location. Conduct the meeting to review responsibilities and personnel assignments.

1. Attendees: Authorized representatives of Owner, Architect, and their consultants; Contractor and its superintendent; major subcontractors; manufacturers; suppliers; and other concerned parties shall attend the conference. All participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
2. Agenda: Discuss items of significance that could affect progress, including the following:

a. Proposed Construction Schedule.
b. Phasing.
c. Critical work sequencing.
d. Designation of responsible personnel.
e. Procedures for processing field decisions and change orders.

f. Procedures for processing Applications for Payment.
g. Distribution of the Contract Documents.
h. Submittal procedures.
i. Preparation of Record Documents.
j. Use of the premises.
k. Responsibility for temporary facilities and controls.
l. Parking availability.
m. Office, work, and storage areas.
n. Equipment deliveries and priorities.
o. First aid.
p. Security.
q. Progress cleaning.
r. Working hours.

C. Progress Meetings: Conduct progress meetings as determined by the City of Buckeye. Coordinate dates of meetings with preparation of payment requests.

1. Attendees: In addition to representatives of Owner and Architect, each contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
2. Agenda: Review and correct or approve minutes of previous progress meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.

a. Contractor's Construction Schedule: Review progress since the last meeting. Determine whether each activity is on time, ahead of schedule, or behind schedule, in relation to Contractor's Construction Schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
b. Review present and future needs of each entity present, including the following:

1) Interface requirements.
2) Sequence of operations.
3) Status of submittals.
4) Deliveries.
5) Off-site fabrication.
6) Access.
7) Site utilization.
8) Temporary facilities and controls.
9) Work hours.
10) Hazards and risks.
11) Progress cleaning.
12) Quality and work standards.
13) Change Orders.

14) Documentation of information for payment requests.

3. Reporting: Distribute minutes of the meeting to each party present and to parties who should have been present. Include a brief summary, in narrative form, of progress since the previous meeting and report.

   a. Schedule Updating: Revise Contractor's Construction Schedule after each progress meeting where revisions to the schedule have been made or recognized. Issue revised schedule concurrently with the report of each meeting.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01310

SECTION 01320 - **CONSTRUCTION PROGRESS DOCUMENTATION**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for documenting the progress of construction during performance of the Work, including the following:

1. Contractor's Construction Schedule.
2. Submittals Schedule.
3. Weekly construction reports.
4. Field condition reports.
5. Construction photographs.

B. See Division 1 Section "Payment Procedures" for submitting the Schedule of Values.

C. See Division 1 Section "Closeout Procedures" for submitting digital progress photos as Project Record Documents at Project closeout.

1.2 DEFINITIONS

A. Critical Path: The longest continuous chain of activities through the network schedule that establishes the minimum overall Project duration and contains no float.

B. Float: The measure of leeway in starting and completing an activity.

1. Float time belongs to Owner.

C. Fragment: A partial or fragmentary network that breaks down activities into smaller activities for greater detail.

D. Major Area: A story of construction, a separate building, or a similar significant construction element.

1.3 SUBMITTALS

A. Submittals Schedule: Submit seven (7) printed copies of schedule and provide in electronic PDF format. Arrange the following information in a tabular format:

1. Scheduled date for first submittal.
2. Specification Section number and title.
3. Submittal category (action or informational).
4. Name of subcontractor.

5. Description of the Work covered.
6. Scheduled date for Architect's final release or approval.

B. Contractor's Construction Schedule: Submit seven (7) printed copies of initial schedule large enough to show entire schedule for entire construction period, 11 x 17 landscape format preferred, provide in electronic PDF format.

C. CPM Reports: Concurrent with CPM schedule, submit seven (7) printed copies of each of the following computer-generated reports. Format for each activity in reports shall contain activity number, activity description, original duration, remaining duration, early start date, early finish date, late start date, late finish date, and total float.

1. Activity Report: List of all activities sorted by activity number and then early start date, or actual start date if known.
2. Total Float Report: List of all activities sorted in ascending order of total float.
3. Construction Photographs: Provide digital progress photos on CD, tow copies.

D. Weekly Construction Reports: Submit electronic PDF format copies at 7-day intervals with expected 3-week Look-ahead daily activity schedules.

E. Field Condition Reports: Submit electronic PDF copies at time of discovery of differing conditions.

1.4 QUALITY ASSURANCE

A. Photographer Qualifications: An individual of established reputation who has been regularly engaged as a professional photographer for not less than three years.

1.5 COORDINATION

A. Coordinate preparation and processing of schedules and reports with performance of construction activities and with scheduling and reporting of separate contractors.

B. Coordinate Contractor's Construction Schedule with the Schedule of Values, list of subcontracts, Submittals Schedule, progress reports, payment requests, and other required schedules and reports.

1. Secure time commitments for performing critical elements of the Work from parties involved.
2. Coordinate each construction activity in the network with other activities and schedule them in proper sequence.

C. Auxiliary Services: Cooperate with photographer and provide auxiliary services requested, including access to Project site and use of temporary facilities including temporary lighting.

PART 2 - PRODUCTS

2.1 SUBMITTALS SCHEDULE

A. Preparation: Submit a schedule of submittals, arranged in chronological order by dates required by construction schedule. Include time required for review, re-submittal, ordering, manufacturing, fabrication, and delivery when establishing dates.

1. Coordinate Submittals Schedule with list of subcontracts, the Schedule of Values, and Contractor's Construction Schedule.
2. Submit concurrently with the first complete submittal of Contractor's Construction Schedule.

2.2. CONTRACTOR'S CONSTRUCTION SCHEDULE, GENERAL

A. Time Frame: Extend schedule from date established for the Notice to Proceed to date of Final Completion.

B. Activities: Treat each separate area as a separate numbered activity for each principal element of the Work. Comply with the following:

1. Activity Duration: Define activities so no activity is longer than **30** days, unless specifically allowed by Architect.
2. Procurement Activities: Include procurement process activities for long lead items and major items, requiring a cycle of more than 60 days, as separate activities in schedule. Procurement cycle activities include, but are not limited to, submittals, approvals, purchasing, fabrication, and delivery.

3. Submittal Review Time: Include review and re-submittal times indicated in Division 1 Section "Submittal Procedures" in schedule. Coordinate submittal review times in Contractor's Construction Schedule with Submittals Schedule.
4. Substantial Completion: Indicate completion in advance of date established for Substantial Completion, and allow time for Architect's administrative procedures necessary for certification of Substantial Completion.

C. Constraints: Include constraints and work restrictions indicated in the Contract Documents and as follows in schedule, and show how the sequence of the Work is affected.

1. Work Stages: Indicate important stages of construction for each major portion of the Work.

D. Milestones: Include milestones indicated in the Contract Documents in schedule, including, but not limited to, the Notice to Proceed, Substantial Completion, and Final Completion.

E. Contract Modifications: For each proposed contract modification and concurrent with its submission, prepare a time-impact analysis using fragments to demonstrate the effect of the proposed change on the overall project schedule.

2.2 CONTRACTOR'S CONSTRUCTION SCHEDULE (GANTT CHART)

A. Gantt-Chart Schedule: Submit a comprehensive, fully developed, horizontal Gantt-chart-type, Contractor's Construction Schedule within 30 days of date established for Notice of Award of Construction Contract. Base schedule on the Preliminary Construction Schedule and whatever updating and feedback was received since the start of Project.

B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line.

C. CPM Schedule Preparation: Prepare a list of all activities required to complete the Work. Using the preliminary network diagram, prepare a skeleton network to identify probable critical paths.

1. Activities: Indicate the estimated time duration, sequence requirements, and relationship of each activity in relation to other activities. Include estimated time frames for the following:

    a. Preparation and processing of submittals.
    b. Purchase of materials.
    c. Delivery.
    d. Fabrication.
    e. Installation.

2. Processing: Process data to produce output data or a computer-drawn, time-scaled network. Revise data, reorganize activity sequences, and reproduce as often as necessary to produce the CPM schedule within the limitations of the Contract Time.
3. Format: Mark the critical path. Locate the critical path near center of network; locate paths with most float near the edges.

D. Initial Issue of Schedule: Prepare initial network diagram from a list of straight "early start-total float" sort. Identify critical activities. Prepare tabulated reports showing the following:

1. Contractor or subcontractor and the Work or activity.
2. Description of activity.
3. Principal events of activity.
4. Immediate preceding and succeeding activities.
5. Early and late start dates.
6. Early and late finish dates.
7. Activity duration in workdays.
8. Total float or slack time.

9. Average size of workforce.

E. Schedule Updating: Concurrent with making revisions to schedule, prepare tabulated reports showing the following:

1. Identification of activities that have changed.
2. Changes in early and late start dates.
3. Changes in early and late finish dates.
4. Changes in activity durations in workdays.
5. Changes in the critical path.
6. Changes in total float or slack time.
7. Changes in the Contract Time.

2.3 REPORTS

A. Weekly Construction Reports: Prepare a daily construction report recording events at Project site, including the following:

1. List of subcontractors.
2. High and low temperatures and general weather conditions.
3. Accidents.
4. Stoppages, delays, shortages, and losses.
5. Meter readings and similar recordings.
6. Orders and requests of authorities having jurisdiction.
7. Services connected and disconnected.
8. Equipment or system tests and startups.

B. Field Condition Reports: Immediately on discovery of a difference between field conditions and the Contract Documents, prepare a detailed report. Submit with a request for information **on CSI Form 13.2A** or similar form provided Contractor. Include a detailed description of the differing conditions, together with recommendations for changing the Contract Documents.

PART 3 - EXECUTION

3.1 CONTRACTOR'S CONSTRUCTION SCHEDULE

A. Contractor's Construction Schedule Updating: At weekly intervals, update schedule to reflect actual construction progress and activities. Issue schedule one week before each regularly scheduled progress meeting.

1. Revise schedule immediately after each meeting or other activity where revisions have been recognized or made. Issue updated schedule concurrently with the report of each such meeting.

2. Include a report with updated schedule that indicates every change, including, but not limited to, changes in logic, durations, actual starts and finishes, and activity durations.
3. As the Work progresses, indicate Actual Completion percentage for each activity.

B. Distribution: Distribute copies of approved schedule to Architect, Owner, separate contractors, testing and inspecting agencies, and other parties identified by Contractor with a need-to-know schedule responsibility.

1. Post copies in Project meeting rooms and temporary field offices.
2. When revisions are made, distribute updated schedules to the same parties and post in the same locations. Delete parties from distribution when they have completed their assigned portion of the Work and are no longer involved in performance of construction activities.

C. Periodic Construction Photographs: Take not less 15 color digital photographs monthly, coinciding with cutoff date associated with each Application for Payment. Photographer shall select vantage points to best show status of construction and progress since last photographs were taken.

1. Field Office Prints: Retain one set of prints of periodic photographs in field office at Project site, available at all times for reference. Identify photographs the same as for those submitted to Architect.

END OF SECTION 01320

SECTION 01330 - **SUBMITTAL PROCEDURES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for submitting Shop Drawings, Product Data, Samples, and other miscellaneous submittals.

B. See Division 1 Section "Quality Requirements" for submitting test and inspection reports and Delegated-Design Submittals and for erecting mockups.

C. See Division 1 Section "Closeout Procedures" for submitting warranties Project Record Documents and all requirements for Operations and Maintenance manuals.

1.2 DEFINITIONS

A. Action Submittals: Written and graphic information that requires Architect's responsive action.

B. Informational Submittals: Written information that does not require Architect's approval. Submittals may be rejected for not complying with requirements.

1.3 SUBMITTAL PROCEDURES

A. Coordination: Coordinate preparation and processing of submittals with performance of construction activities.

1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, and related activities that require sequential activity.
2. Coordinate transmittal of different types of submittals for related parts of the Work so processing will not be delayed because of need to review submittals concurrently for coordination.

a. Architect reserves the right to withhold action on a submittal requiring coordination with other submittals until related submittals are received.

B. Submittals Schedule: Provide list of submittals and time requirements for scheduled performance of related construction activities.

C. Processing Time: Allow enough time for submittal review, including time for re-submittals, as follows. Time for review shall commence on Architect's receipt of submittal.

1. Initial Review: Allow **7 days** for initial review of each submittal. Allow additional time if processing must be delayed to permit coordination with subsequent submittals. Architect will advise Contractor when a submittal being processed must be delayed for coordination.
2. If intermediate submittal is necessary, process it in same manner as initial submittal.
3. Allow **5 days** for processing each re-submittal.
4. No extension of the Contract Time will be authorized because of failure to transmit submittals enough in advance of the Work to permit processing.

D. Identification: Place a permanent label or title block on each submittal for identification.

1. Indicate name of firm or entity that prepared each submittal on label or title block.
2. Provide a space approximately 4 by 5 inches on label or beside title block to record Contractor's review and approval markings and action taken by Architect.
3. Include the following information on label for processing and recording action taken:

    a. Project name.
    b. Date.
    c. Name and address of Architect.
    d. Name and address of Contractor.
    e. Name and address of subcontractor.
    f. Name and address of supplier.
    g. Name of manufacturer.
    h. Unique identifier, including revision number.
    i. Number and title of appropriate Specification Section.
    j. Drawing number and detail references, as appropriate.
    k. Other necessary identification.

E. Deviations: Highlight, encircle, or otherwise identify deviations from the Contract Documents on submittals. **Provide point-by-point comparison.**

F. Additional Copies: Unless additional copies are required for final submittal, and unless Architect observes noncompliance with provisions of the Contract Documents, initial submittal may serve as final submittal.

1. Additional copies submitted for maintenance manuals will **not** be marked with action taken and will be returned.

G. Transmittal: Package each submittal individually and appropriately for transmittal and handling. Transmit each submittal using a transmittal form. Architect will return submittals, without review received from sources other than Contractor.

1. Include Contractor's certification stating that information submitted complies with requirements of the Contract Documents.
2. Transmittal Form: Use AIA Document G810, CSI Form 12.1A or similar.

H. Distribution: Furnish copies of final submittals to manufacturers, subcontractors, suppliers, fabricators, installers, authorities having jurisdiction, and others as necessary for performance of construction activities. Show distribution on transmittal forms.

I. Use for Construction: Use only final submittals with mark indicating action taken by Architect in connection with construction.

PART 2 - PRODUCTS

2.1 ACTION SUBMITTALS

A. General: Prepare and submit Action Submittals required by individual Specification Sections.

1. Procedure: Electronic transmittal of submittals is permissible, unless physical samples are required. A hard copy transmittal shall accompany physical samples. Submit 2 physical samples to Architect. Architect will return submittal review and one sample. Contractor and Architect shall each retain review and sample as part of the Project Record.

B. Product Data: Collect information into a single submittal for each element of construction and type of product or equipment.

1. If information must be specially prepared for submittal because standard printed data are not suitable for use, submit as Shop Drawings, not as Product Data.
2. Mark each copy of each submittal to show which products and options are applicable.
3. Include the following information, as applicable:

a. Manufacturer's written recommendations.
b. Manufacturer's product specifications.
c. Manufacturer's installation instructions.
d. Manufacturer's catalog cuts.
e. Wiring diagrams showing factory-installed wiring.
f. Printed performance curves.
g. Operational range diagrams.
h. Compliance with recognized trade association standards.
i. Compliance with recognized testing agency standards.

C. Shop Drawings: Prepare Project-specific information, drawn accurately to scale. Do not base Shop Drawings on reproductions of the Contract Documents or standard printed data.

1. Preparation: Include the following information, as applicable:

a. Dimensions.
b. Identification of products.
c. Fabrication and installation drawings.
d. Roughing-in and setting diagrams.

e. Wiring diagrams showing field-installed wiring, including power, signal, and control wiring.
f. Shopwork manufacturing instructions.
g. Templates and patterns.
h. Schedules.
i. Notation of coordination requirements.
j. Notation of dimensions established by field measurement.

2. Wiring Diagrams: Differentiate between manufacturer-installed and field-installed wiring.
3. Sheet Size: Except for templates, patterns, and similar full-size drawings, submit Shop Drawings and Specification Sheets on sheets at least 8-1/2 by 11 inches but no larger than 30 by 40 inches.

D. Coordination Drawings: Comply with requirements in Division 1 Section "Project Management and Coordination."

E. Samples: Prepare physical units of materials or products, including the following:

1. Comply with requirements in Division 1 Section "Quality Requirements" for mockups.
2. Samples for Initial Selection: Submit manufacturer's color charts consisting of units or sections of units showing the full range of colors, textures, and patterns available.

   a. Submit **two** full set**s** of available choices where color, pattern, texture, or similar characteristics are required to be selected from manufacturer's product line. Architect will return one set of submittal with options selected.

3. Samples for Verification: Submit full-size units or Samples of size indicated, prepared from the same material to be used for the Work, cured and finished in manner specified, and physically identical with the product proposed for use, and that show full range of color and texture variations expected. Samples include, but are not limited to, partial sections of manufactured or fabricated components; small cuts or containers of materials; complete units of repetitively used materials; swatches showing color, texture, and pattern; color range sets; and components used for independent testing and inspection.

   a. Submit **two** sets of Samples. Architect will retain **one** Sample sets; remainder will be returned to Contractor.

4. Preparation: Mount, display, or package Samples in manner specified to facilitate review of qualities indicated. Prepare Samples to match Architect's sample where so indicated. Attach label on unexposed side.
5. Submit Samples for review of kind, color, pattern, and texture for a final check of these characteristics with other elements and for a comparison of these characteristics between final submittal and actual component as delivered and installed.
6. Disposition: Maintain sets of approved Samples at Project site, available for quality-control comparisons throughout the course of construction activity.

Sample sets may be used to determine final acceptance of construction associated with each set.

F. Product Schedule or List: Prepare a written summary indicating types of products required for the Work and their intended location.

G. Delegated-Design Submittal: Comply with requirements in Division 1 Section "Quality Requirements."

H. Submittals Schedule: Comply with requirements in Division 1 Section "Construction Progress Documentation."

I. Application for Payment: Comply with requirements in Division 1 Section "Payment Procedures."

J. Schedule of Values: Comply with requirements in Division 1 Section "Payment Procedures."

K. Subcontractor List: Prepare a written summary identifying individuals or firms proposed for each portion of the Work, including those who are to furnish products or equipment fabricated to a special design. Use **CSI Form 1.5A** or similar.

2.2 INFORMATIONAL SUBMITTALS

A. General: Prepare and submit Informational Submittals required by other Specification Sections.

1. Number of Copies: Submit **two** copies of each submittal, unless otherwise indicated. Architect will not return copies.
2. Certificates and Certifications: Provide a notarized statement that includes signature of entity responsible for preparing certification. Certificates and certifications shall be signed by an officer or other individual authorized to sign documents on behalf of that entity.
3. Test and Inspection Reports: Comply with requirements in Division 1 Section "Quality Requirements."

B. Contractor's Construction Schedule: Comply with requirements in Division 1 Section "Construction Progress Documentation."

C. Qualification Data: Prepare written information that demonstrates capabilities and experience of firm or person. Include lists of completed projects with project names and addresses, names and addresses of architects and owners, and other information specified.

D. Product Certificates: Prepare written statements on manufacturer's letterhead certifying that product complies with requirements.

E. Welding Certificates: Prepare written certification that welding procedures and personnel comply with requirements. Submit record of Welding Procedure

Specification (WPS) and Procedure Qualification Record (PQR) on AWS forms. Include names of firms and personnel certified.

F. Installer Certificates: Prepare written statements on manufacturer's letterhead certifying that Installer complies with requirements and, where required, is authorized for this specific Project.

G. Manufacturer Certificates: Prepare written statements on manufacturer's letterhead certifying that manufacturer complies with requirements. Include evidence of manufacturing experience where required.

H. Material Certificates: Prepare written statements on manufacturer's letterhead certifying that material complies with requirements.

I. Material Test Reports: Prepare reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting test results of material for compliance with requirements.

J. Compatibility Test Reports: Prepare reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting results of compatibility tests performed before installation of product. Include written recommendations for primers and substrate preparation needed for adhesion.

K. Field Test Reports: Prepare retesting reports written by Owner's qualified testing agency, on testing agency's standard form, indicating and interpreting results of field tests performed either during installation of product or after product is installed in its final location, for compliance with requirements.

L. Product Test Reports: Prepare written reports indicating current product produced by manufacturer complies with requirements. Base reports on evaluation of tests performed by manufacturer and witnessed by a qualified testing agency, or on comprehensive tests performed by a qualified testing agency.

M. Research/Evaluation Reports: Prepare written evidence, from a model code organization acceptable to authorities having jurisdiction, that product complies with building code in effect for Project.

N. Maintenance Data: Prepare written and graphic instructions and procedures for operation and normal maintenance of products and equipment. Comply with requirements in Division 1 Section "Closeout Procedures."

O. Design Data: Prepare written and graphic information, including, but not limited to, performance and design criteria, list of applicable codes and regulations, and calculations. Include list of assumptions and other performance and design criteria and a summary of loads. Include load diagrams if applicable. Provide name and version of software, if any, used for calculations. Include page numbers.

P. Manufacturer's Instructions: Prepare written or published information that documents manufacturer's recommendations, guidelines, and procedures for installing or operating a product or equipment. Include name of product and name, address, and telephone number of manufacturer.

Q. Manufacturer's Field Reports: Prepare written information documenting factory-authorized service representative's tests and inspections.

R. Insurance Certificates and Bonds: Prepare written information indicating current status of insurance or bonding coverage. Include name of entity covered by insurance or bond, limits of coverage, amounts of deductibles, if any, and term of the coverage.

S. Construction Photographs: Comply with requirements in Division 1 Section "Construction Progress Documentation."

PART 3 - EXECUTION

3.1 CONTRACTOR'S REVIEW

A. Review each submittal and check for compliance with the Contract Documents. Note corrections and field dimensions. Mark with approval stamp before submitting to Architect.

B. Approval Stamp: Stamp each submittal with a uniform, approval stamp. Include Project name and location, submittal number, Specification Section title and number, name of reviewer, date of Contractor's approval, and statement certifying that submittal has been reviewed, checked, and approved for compliance with the Contract Documents.

3.2 ARCHITECT'S ACTION

A. General: Architect will not review submittals that do not bear Contractor's approval stamp and will return them without action.

B. Action Submittals: Architect will review each submittal, make marks to indicate corrections or modifications required, and return it. Architect will stamp each submittal with an action stamp and will mark stamp appropriately to indicate action taken.

C. Informational Submittals: Architect will review each submittal and will not return it, or will reject and return it if it does not comply with requirements. Architect will forward each submittal to appropriate party.

D. Submittals not required by the Contract Documents will not be reviewed and may be discarded.

END OF SECTION 01330

SECTION 01400 - **QUALITY CONTROL REQUIREMENTS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for quality assurance and quality control.

B. The Contactor shall be responsible for maintaining a **Quality Control Program**, which later serves as an **Operations & Maintenance Manual** complete with all Warranty Certificates.

1. The intent of Contractor Quality Control (CQC) is to positively control the quality of Work, including the work of sub-contactors and suppliers, through preparatory, initial and follow-up activities to assure delivery of Work that meets the requirements of the Contract Documents for performance, quality, and timeliness.

2. DEFINITIONS & ABBREVIATIONS:

a. Contractor Quality Control: the Contractors management system to prepare, initiate and verify the quality of Work required by the Contract Documents.

b. CPM: Critical Path Method: Network method of describing the interdependence of tasks in the Work, determining critical tasks incorporating CQC tasks that control the project completion time, and projecting the completion time of the work.

c. Payment:

1). Monthly progress reports by the Contractor are part of the data substantiating the Contractor's right to payment as the Owner or Architect may require.

3. PRODUCTS

a. Critical Path Method Analysis: Contractor shall use a familiar software program for the CPM analysis and output plan, reports and chart. A simple Gantt chart will suffice.

4. EXECUTION

a. General: The Contractor is responsible for the quality control and shall establish and maintain an effective quality control system in compliance with the Contract Documents. The quality control system shall consist of plans, procedures, staff and organization necessary to produce an end product which complies with the Contract Documents. The system shall cover all

construction operations, both on-site and off-site, and shall be keyed to the proposed Construction Sequence.

b. Construction Plan: The Construction Plan prepared by the Contractor shall include, as a minimum, the following to cover all Construction Operations, both on-site and off-site, including work by the Contractor, Subcontractors, Fabricators, Suppliers, and Purchasing Agents:

1). RFI's Review & Response: Part of Contractor Quality Control includes reviews of all elements of the Work and generating and tracking Requests for Clarification to the Architect sufficiently in advance of the Work in order to allow adequate response time and avoid delays in the Work.

2). Monthly Summary Reports: To be submitted with Application and Certificate for Payment

c. Submittal: Shall be as specified in Section 1330, SUBMITTAL PROCEDURES.

d. Control: Contractor Quality Control is the means by which the Contractor ensures that the Work complies with the Contract Documents. The controls shall cover all the Construction Operations, including both on-site and off-site fabrication, and will be keyed to the proposed Construction Sequence.

1). A check to assure that all materials and/or equipment have been tested, submitted, and approved.

2). Examination of the Work area to assure that all required preliminary Work has been completed and is in compliance with the Contract Documents.

3). A physical examination of required materials, equipment and sample work to assure that they are on hand, conform to approved shop drawings or submitted data, and are properly stored.

4). A simple review to assure applicable safety requirements are met.

5). Discussion with workers and supervisors of procedures for Construction of the Work including Construction Tolerances and Workmanship Standards for that phase of the Work.

e. Tests

1). The Contractor shall hire a qualified third party to perform tests and special inspections required to verify that control measures are adequate to provide a product or system which conforms to the Contract Documents. Testing includes operation, acceptance and/or performance tests when specified. Provide a list of tests including the test name, frequency, specification paragraph containing the test requirements, and

who is responsible for each type of test. The Contractor shall perform the following activities and record and provide the following data:

a). Verify that the testing procedures comply with Contract Documents.

b). Verify that the facilities and testing equipment are available when needed for this Work and comply with testing standards.

c). Results of all tests taken, both passing and failing tests, will be recorded in the monthly report for the date taken.

d). **Special Structural Inspections will be provided by Engineer of Record, Roy Rood, PE or Rood Engineering, or approved equal,** and paid via Allowance in the Architect's Contract. Contractor's responsibility is to coordinate requests for inspections in a timely manner, and pay for duplicative re-inspections when failing inspection(s). **The required Special Inspections are listed in the Structural General Structural Notes in the Drawings.**

f. Monthly Reports: Contractor shall issue monthly reports summarizing activity, results. Reports shall cover the following minimum items, and any additional reports or data required by the Owner:

1). Test Approval Log: List all tests conducted during the reporting period and results.

2). Submittal Tracking System Reports: List the status of all submittals required on the project, including original deadline for submittal, each date of submittal or re-submittal, and final action by the Architect or current status.

C. Testing and inspecting services are required to verify compliance with requirements specified or indicated. These services do not relieve Contractor of responsibility for compliance with the Contract Document requirements.

1. Specified tests, inspections, and related actions do not limit Contractor's quality-control procedures that facilitate compliance with the Contract Document requirements.
2. Requirements for Contractor to provide quality-control services required by Architect, Owner, or authorities having jurisdiction are not limited by provisions of this Section.

D. See Divisions 2 through 16 Sections for specific test and inspection requirements

1.2 DEFINITIONS

A. Mockups: Full-size, physical example assemblies to illustrate finishes and materials. Mockups are used to verify selections made under Sample submittals, to demonstrate aesthetic effects and, where indicated, qualities of materials and execution, and to review construction, coordination, testing, or operation; they are not Samples. Mockups establish the standard by which the Work will be judged. Mock-ups can become part of the work is accepted.

B. Testing Agency: An entity engaged to perform specific tests, inspections, or both. Testing laboratory shall mean the same as testing agency.

1.3 DELEGATED DESIGN

A. Performance and Design Criteria: Where professional design services or certifications by a design professional are specifically required of Contractor by the Contract Documents, provide products and systems complying with specific performance and design criteria indicated.

1. If criteria indicated are not sufficient to perform services or certification required, submit a written request for additional information to Architect.

1.4 SUBMITTALS: Shall be as specified in Section 1330, SUBMITTAL PROCEDURES.

A. Permits, Licenses, and Certificates: For Owner's records, submit copies of permits, licenses, certifications, inspection reports, releases, jurisdictional settlements, notices, receipts for fee payments, judgments, correspondence, records, and similar documents, established for compliance with standards and regulations bearing on performance of the Work.

1.5 QUALITY ASSURANCE

A. Fabricator Qualifications: A firm experienced in producing products similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units.

B. Factory-Authorized Service Representative Qualifications: An authorized representative of manufacturer who is trained and approved by manufacturer to inspect installation of manufacturer's products that are similar in material, design, and extent to those indicated for this Project.

C. Installer Qualifications: A firm or individual experienced in installing, erecting, or assembling work similar in material, design, and extent to that indicated for this Project, whose work has resulted in construction with a record of successful in-service performance.

D. Manufacturer Qualifications: A firm experienced in manufacturing products or systems similar to those indicated for this Project and with a record of successful in-service performance.

E. Professional Engineer Qualifications: A professional engineer who is legally qualified to practice in jurisdiction where Project is located and who is experienced in providing engineering services of the kind indicated. Engineering services are defined as those performed for installations of the system, assembly, or products that are similar to those indicated for this Project in material, design, and extent.

F. Testing Agency Qualifications: An agency with the experience and capability to conduct testing and inspecting indicated, as documented by ASTM E 548, and that specializes in types of tests and inspections to be performed.

G. Mockups: Before installing portions of the Work requiring mockups, build mockups for each form of construction and finish required by the Specifications to comply with the following requirements, using materials indicated for the completed Work:

1. Build mockups in location and of size indicated or, if not indicated, as directed by Architect.
2. Notify Architect **seven** days in advance of dates and times when mockups will be constructed.
3. Demonstrate the proposed range of aesthetic effects and workmanship.
4. Obtain Architect's approval of mockups before starting work, fabrication, or construction.
5. Maintain mockups during construction in an undisturbed condition as a standard for judging the completed Work.
6. Demolish and remove mockups when directed, unless otherwise indicated.

1.6 QUALITY CONTROL

A. Contractor’s Responsibilities: All quality-control and testing services are indicated as Contractor’s responsibility. Contractor will engage a qualified testing agency to perform these services.

1. Contractor Responsibilities: Unless otherwise indicated, provide quality-control services specified and required by authorities having jurisdiction.

2. Where services are indicated as Contractor’s responsibility, Contractor will engage a qualified testing agency to perform these quality-control services.

3. Contractor shall notify Owner and all Testing Agencies employed by the Contractor at least **24** hours in advance of time when Work that requires testing or inspecting will be performed.
4. Special Tests and Inspections: Contractor will engage a qualified third party testing agency to conduct special tests and inspections required by authorities having jurisdiction as the responsibility of Contractor.

5. Testing agency will notify Owner, Architect and Contractor promptly of irregularities and deficiencies observed in the Work during performance of its services.
6. Testing agency will submit a certified written report of each test, inspection, and similar quality-control service to Owner and Architect with copy to Contractor and to authorities having jurisdiction.
7. Testing agency will submit a final report of special tests and inspections at Substantial Completion, which includes a list of unresolved deficiencies.
8. Testing agency will interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from the Contract Documents.
9. Testing agency, employed by Contractor, will retest and re-inspect corrected work.

10. Retesting/Re-inspecting: Provide all required retesting and re-inspecting services for construction that revised or replaced Work that failed to comply with requirements established by the Contract Documents.
11. All associated costs for retesting and re-inspecting construction performed that replaces or is necessitated by work that failed to comply with the Contract Documents will be charged to Contractor as a direct cost expense.

B. Testing Agency Responsibilities (where testing agency is a sub-contractor to the Contractor): Cooperate with Architect and Contractor in performance of duties. Provide qualified personnel to perform required tests and inspections.

1. Notify Owner, Architect and Contractor promptly of irregularities or deficiencies observed in the Work during performance of its services.
2. Interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from requirements.
3. Submit a certified written report, in duplicate, of each test, inspection, and similar quality-control service through Contractor.
4. Do not release, revoke, alter, or increase requirements of the Contract Documents or approve or accept any portion of the Work.
5. Do not perform any duties of Contractor.

C. Associated Services: Cooperate with agencies performing required tests, inspections, and similar quality-control services, and provide reasonable auxiliary services as requested. Notify agency sufficiently in advance of operations to permit assignment of personnel. Provide the following:

1. Access to the Work.
2. Incidental labor and facilities necessary to facilitate tests and inspections.
3. Adequate quantities of representative samples of materials that require testing and inspecting. Assist agency in obtaining samples.
4. Facilities for storage and field-curing of test samples.
5. Delivery of samples to testing agencies.
6. Preliminary design mix proposed for use for material mixes that require control by testing agency.

7. Security and protection for samples and for testing and inspecting equipment at Project site.

D. Coordination: Coordinate sequence of activities to accommodate required quality-assurance and quality-control services with a minimum of delay and to avoid necessity of removing and replacing construction to accommodate testing and inspecting.

1. Schedule times for tests, inspections, obtaining samples, and similar activities.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 REPAIR AND PROTECTION

A. General: On completion of testing, inspecting, sample taking, and similar services, repair damaged construction and restore substrates and finishes.

1. Provide materials and comply with installation requirements specified in other Sections of these Specifications. Restore patched areas and extend restoration into adjoining areas in a manner that eliminates evidence of patching.
2. Comply with the Contract Document requirements for Division 1 Section "Cutting and Patching."

B. Protect construction exposed by or for quality-control service activities.

C. Repair and protection are Contractor's responsibility, regardless of the assignment of responsibility for quality-control services.

END OF SECTION 01400

SECTION 01420 - **REFERENCES**

PART 1 - GENERAL

1.1 DEFINITIONS

A. General: Basic Contract definitions are included in the Conditions of the Contract.

B. "Approved": When used to convey Architect's action on Contractor's submittals, applications, and requests, "approved" is limited to Architect's duties and responsibilities as stated in the Conditions of the Contract.

C. "Directed": A command or instruction by Architect. Other terms including "requested," "authorized," "selected," "approved," "required," and "permitted" have the same meaning as "directed."

D. "Indicated": Requirements expressed by graphic representations or in written form on Drawings, in Specifications, and in other Contract Documents. Other terms including "shown," "noted," "scheduled," and "specified" have the same meaning as "indicated."

E. "Regulations": Laws, ordinances, statutes, and lawful orders issued by authorities having jurisdiction, and rules, conventions, and agreements within the construction industry that control performance of the Work.

F. "Furnish": Supply and deliver to Project site, ready for unloading, unpacking, assembly, installation, and similar operations.

G. "Install": Operations at Project site including unloading, temporarily storing, unpacking, assembling, erecting, placing, anchoring, applying, working to dimension, finishing, curing, protecting, cleaning, and similar operations.

H. "Provide": Furnish and install, complete and ready for the intended use.

I. "Installer": Contractor or another entity engaged by Contractor as an employee, Subcontractor, or Sub-subcontractor, to perform a particular construction operation, including installation, erection, application, and similar operations.

1. Using a term such as "carpentry" does not imply that certain construction activities must be performed by accredited or unionized individuals of a corresponding generic name, such as "carpenter." It also does not imply that requirements specified apply exclusively to trades people of the corresponding generic name.

J. "Experienced": When used with an entity, "experienced" means having successfully completed a minimum of **three** previous projects similar in size and scope to this Project; being familiar with special requirements indicated; and having complied with requirements of authorities having jurisdiction.

K. "Project Site": Space available for performing construction activities. The extent of Project site is shown on Drawings and may or may not be identical with the description of the land on which Project is to be built.

1.2 INDUSTRY STANDARDS

A. Applicability of Standards: Unless the Contract Documents include more stringent requirements, applicable construction industry standards have the same force and effect as if bound or copied directly into the Contract Documents to the extent referenced. Such standards are made a part of the Contract Documents by reference.

B. Publication Dates: Comply with standards in effect as of date of the Contract Documents, unless otherwise indicated.

C. Conflicting Requirements: If compliance with two or more standards is specified and the standards establish different or conflicting requirements for minimum quantities or quality levels, comply with the most stringent requirement. Refer uncertainties and requirements that are different, but apparently equal, to Architect for a decision before proceeding.

1. Minimum Quantity or Quality Levels: The quantity or quality level shown or specified shall be the minimum provided or performed. The actual installation may comply exactly with the minimum quantity or quality specified, or it may exceed the minimum within reasonable limits. To comply with these requirements, indicated numeric values are minimum or maximum, as appropriate, for the context of requirements. Refer uncertainties to Architect for a decision before proceeding.

D. Copies of Standards: Each entity engaged in construction on Project must be familiar with industry standards applicable to its construction activity. Copies of applicable standards are not bound with the Contract Documents.

1. Where copies of standards are needed to perform a required construction activity, obtain copies directly from publication source and make them available on request.

1.3 ABBREVIATIONS AND ACRONYMS

A. Industry Organizations: Where abbreviations and acronyms are used in Specifications or other Contract Documents, they shall mean the recognized name of the entities indicated in Gale Research's "Encyclopedia of Associations" or in Columbia Books' "National Trade & Professional Associations of the U.S."

B. Industry Organizations: Where abbreviations and acronyms are used in Specifications or other Contract Documents, they shall mean the recognized name of the entities, a complete list of which are available upon request in the Architect's office.

C. N.I.C.: Not in Contract

D. O.F.C.I.: Owner furnished, Contractor Installed

E. O.F.O.I: Owner furnished, Owner Installed

1.4 PRODUCTS (Not Used)

PART 2 - EXECUTION (Not Used)

END OF SECTION 01420

SECTION 01500 - **TEMPORARY FACILITIES AND CONTROLS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes requirements for temporary facilities and controls, including temporary utilities, support facilities, and security and protection facilities.

B. See Division 1 Section "Execution Requirements" for progress cleaning requirements.

1.2 DEFINITIONS

A. Permanent Enclosure: As determined by Architect, permanent or temporary roofing is complete, insulated, and weather tight; exterior walls are insulated and weather tight; and all openings are closed with permanent construction or substantial temporary closures.

1.3 USE CHARGES

A. General: Cost or use charges for temporary facilities are not chargeable to Owner or Architect and shall be included in the Contract Sum. Allow other entities to use temporary services and facilities without cost, including, but not limited to, Owner's Facilities Maintenance forces, occupants of Project, Architect, testing and inspecting agencies, and personnel of authorities having jurisdiction.

B. Water Service: Use domestic potable water service from Owner's existing system without metering and without payment of use charges.

C. Electric Power Service: Use electric power from Owner's existing system without metering and without payment of use charges.

1.4 SUBMITTALS

A. Temporary Utility Reports: Submit reports of tests, inspections, meter readings, and similar procedures performed on temporary utilities.

1.5 QUALITY ASSURANCE

A. Standards: Comply with ANSI A10.6, NECA's "Temporary Electrical Facilities," and NFPA 241.

1. Electric Service: Comply with NECA, NEMA, and UL standards and regulations for temporary electric service. Install service to comply with NFPA 70.

B. Tests and Inspections: Arrange for authorities having jurisdiction to test and inspect each temporary utility before use. Obtain required certifications and permits.

1.6 PROJECT CONDITIONS

1. Temporary Utilities: All Utilities available from Senior Center Building.

PART 2 - PRODUCTS

2.1 MATERIALS

A. General: Provide new materials. Undamaged, previously used materials in serviceable condition may be used if approved by Architect. Provide materials suitable for use intended.

B. Pavement: Comply with Division 2 if applicable.

C. Portable Chain-Link Fencing: Minimum 2-inch 9-gage, galvanized steel, chain-link fabric fencing; minimum 6 feet high with galvanized steel pipe posts; minimum 2-3/8-inchOD line posts and 2-7/8-inchOD corner and pull posts, with 1-5/8-inch OD top and bottom rails. Provide galvanized steel bases for supporting posts. Provide GREEN SCREEN with air vent flaps on all chain link fencing.

D. Tarpaulins: Fire-resistive labeled with flame-spread rating of 15 or less.

E. Water: Potable.

F. Job Office Trailer: Provide secure temporary Job Office Trailer and locate where directed.

G. Temporary Secure Storage Container: 30 ft. CONEX box or equal with dual heavy-duty master locks. Locate where directed.

2.2 EQUIPMENT

A. Fire Extinguishers: Hand carried, portable, UL rated. Provide class and extinguishing agent as indicated or a combination of extinguishers of NFPA-recommended classes for exposures.

1. Comply with NFPA 10 and NFPA 241 for classification, extinguishing agent, and size required by location and class of fire exposure.

B. Self-Contained Toilet Units: Single-occupant units of chemical, aerated re-circulation, or combustion type; vented; fully enclosed with a glass-fiber-reinforced polyester shell or similar nonabsorbent material.

C. Drinking-Water Fixtures: Containerized, tap-dispenser, bottled-water, drinking-water unit, including paper cup supply.

D. Electrical Outlets: Properly configured, NEMA-polarized outlets to prevent insertion of 110- to 120-V plugs into higher-voltage outlets; equipped with ground-fault circuit interrupters, reset button, and pilot light.

E. Power Distribution System Circuits: Where permitted and overhead and exposed for surveillance, wiring circuits, not exceeding 125-V ac, 20-A rating, and lighting circuits may be nonmetallic sheathed cable.

F. Contractor Temporary Office/Storage Unit: Provide as required to meet the needs of the project for Contractor's temporary storage. Coordinate location with City of Buckeye staff. Remove at the end of the project.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Locate facilities where they will serve Project adequately and result in minimum interference with performance of the Work. Relocate and modify facilities as required.

B. Provide each facility ready for use when needed to avoid delay. Maintain and modify as required. Do not remove until facilities are no longer needed or are replaced by authorized use of completed permanent facilities.

3.2 TEMPORARY UTILITIES

A. General: Use Owner Utilities.

1. Arrange with Owner, and existing users for time when service can be interrupted, if necessary.
2. Verify adequate capacity at each stage of construction.

B. Water Service: Use Owner water service and distribution piping in sizes and pressures adequate for construction until permanent water service is in use. Sterilize temporary water piping before use.

C. Sanitary Facilities: Provide temporary toilets, wash facilities, and drinking-water fixtures. Comply with regulations and health codes for type, number, location, operation, and maintenance of fixtures and facilities.

1. Disposable Supplies: Provide toilet tissue, paper towels, paper cups, and similar disposable materials for each facility. Maintain adequate supply. Provide covered waste containers for disposal of used material.
2. Toilets: Install self-contained toilet units.

3. Drinking-Water Facilities: Provide potable drinking water.

D. Electric Power Service: Use of Owner's existing electric power service will be permitted, as long as equipment is maintained in a condition acceptable to Owner.

E. Electric Distribution: Provide receptacle outlets adequate for connection of power tools and equipment.

1. Provide waterproof connectors to connect separate lengths of electrical power cords if single lengths will not reach areas where construction activities are in progress. Do not exceed safe length-voltage ratio.

F. Lighting: Provide temporary lighting with local switching that provides adequate illumination for construction operations and traffic conditions.

1. Install and operate temporary lighting that fulfills security and protection requirements without operating entire system.
2. Provide one 60W CFL lamp per 500 sq. ft., or equivalent, uniformly distributed, for general lighting, or equivalent illumination.

G. Telephone Service: Provide temporary telephone service throughout construction period for common-use facilities used by all personnel engaged in construction activities.

1. Post a list of important telephone numbers, including police and fire departments, ambulance service, Contractor's home office, Architect's office, all Engineers' offices, Owner's office, and principal subcontractors' field and home offices.
2. Provide voice-mail service on superintendent's telephone.
3. Provide a portable cellular telephone for superintendent's use in making and receiving telephone calls.

3.3 SUPPORT FACILITIES INSTALLATION

A. General: Comply with the following:

1. Locate storage sheds, sanitary facilities, and other temporary construction and support facilities for easy access in areas designated.
2. Provide incombustible construction for on-site storage sheds located within construction staging area designated. Comply with NFPA 241.
3. Maintain support facilities until near Substantial Completion. Remove before Substantial Completion. Personnel remaining after Substantial Completion will be permitted to use permanent facilities, under conditions acceptable to Owner.

B. Project Identification and Temporary Signs: Prepare Project identification and other signs as required by public safety operations and as approved by the Owner (ACC). Install signs where required to inform public and persons seeking entrance to Project. Do not permit installation of unauthorized signs.
1. Prepare temporary signs to provide directional information to construction personnel and visitors.
2. Contractor identity banners allowed with permission of the City of Buckeye.

C. Waste Disposal Facilities: Provide waste-collection containers in sizes adequate to handle waste from construction operations. Containerize and clearly label hazardous, dangerous, or unsanitary waste materials separately from other waste. Comply with Division 1 Section "Execution Requirements" for progress cleaning requirements.

1. If required by authorities having jurisdiction, provide separate containers, clearly labeled, for each type of waste material to be deposited.
2. Develop a waste management plan for Work performed on Project. Provide information on destination of each type of waste material and means to be used to dispose of all waste materials.

D. Lifts and Hoists: Provide facilities for hoisting materials and personnel. Truck cranes and similar devices used for hoisting materials are considered "tools and equipment" and not temporary facilities.

E. Job Office Trailer: Provide secure temporary Job Office Trailer and locate where directed.

F. Temporary Secure Storage Container: 30 ft. CONEX box or equal with dual heavy-duty master locks. Locate where directed.

3.4 SECURITY AND PROTECTION FACILITIES INSTALLATION

A. Environmental Protection: Provide protection, operate temporary facilities, and conduct construction in ways and by methods that comply with environmental regulations and that minimize possible air, waterway, and subsoil contamination or pollution or other undesirable effects. Avoid using tools and equipment that produce harmful noise. Restrict use of noisemaking tools and equipment to hours that will minimize complaints from persons or firms near Project site.

B. Landscaping Protection: Protect all trees, plants and ground cover. Restore landscape materials and replace in kind at the conclusion of the Project as required.

F. Security Enclosure and Lockup: Install substantial temporary enclosure around partially completed areas of construction. Provide lockable entrances to prevent unauthorized entrance, vandalism, theft, and similar violations of security.

G. Barricades, Warning Signs, and Lights: Comply with standards and code requirements for erecting structurally adequate barricades. Paint with appropriate colors, graphics, and warning signs to inform personnel and public of possible hazard.

1. Temporary Enclosures: Provide temporary enclosures for protection of construction, in progress and completed, from exposure, foul weather, other construction operations, and similar activities.
2. Vertical Openings: Close openings of 25 sq. ft. or less with plywood or similar materials.
3. Horizontal Openings: Close openings in floor or roof decks and horizontal surfaces with load-bearing construction.

H. Temporary Fire Protection: Until fire-protection needs are supplied by permanent facilities, install and maintain temporary fire-protection facilities of types needed to protect against reasonably predictable and controllable fire losses. Comply with NFPA 241.

1. Provide fire extinguishers, installed on walls on mounting brackets, visible and accessible from space being served, with sign mounted above.

    a. Locate fire extinguishers where convenient and effective for their intended purpose; provide not less than one extinguisher on each floor at or near each usable stairwell.

2. Store combustible materials in containers in fire-safe locations.
3. Maintain unobstructed access to fire extinguishers, fire hydrants, temporary fire-protection facilities, stairways, and other access routes for firefighting. Prohibit smoking in hazardous fire-exposure areas.
4. Supervise welding operations, combustion-type temporary heating units, and similar sources of fire ignition.
5. Permanent Fire Protection: At earliest feasible date in each area of Project, complete installation of permanent fire-protection facility, including connected services, and place into operation and use. Instruct key personnel on use of facilities.
2. Develop and supervise an overall fire-prevention and first-aid fire-protection program for personnel at Project site. Review needs with local fire department and establish procedures to be followed. Instruct personnel in methods and procedures. Post warnings and information.

3.5 OPERATION, TERMINATION, AND REMOVAL

A. Supervision: Enforce strict discipline in use of temporary facilities. To minimize waste and abuse, limit availability of temporary facilities to essential and intended uses.

B. Maintenance: Maintain facilities in good operating condition until removal. Protect from damage caused by freezing temperatures and similar elements.

C. Termination and Removal: Remove each temporary facility when need for its service has ended, when it has been replaced by authorized use of a permanent facility, or no later than Substantial Completion. Complete or, if necessary, restore permanent construction that may have been delayed because of interference with temporary facility. Repair damaged Work, clean exposed surfaces, and replace construction that cannot be satisfactorily repaired.
    1. At Substantial Completion, clean and renovate permanent facilities used during construction period. Comply with final cleaning requirements in Division 1 Section "Closeout Procedures."

END OF SECTION 01500

SECTION 01600 - **PRODUCT REQUIREMENTS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for selecting products for use in Project; product delivery, storage, and handling; manufacturers' standard warranties on products; special warranties; product substitutions; and comparable products.

B. See Division 1 Section "Closeout Procedures" for submitting warranties for contract closeout.

C. See Divisions 2 through 16 Sections for specific requirements for warranties on products and installations specified to be warranted.

1.2 DEFINITIONS

A. Products: Items purchased for incorporating into the Work, whether purchased for Project or taken from previously purchased stock. The term "product" includes the terms "material," "equipment," "system," and terms of similar intent.

1. Named Products: Items identified by manufacturer's product name, including make or model number or other designation, shown or listed in manufacturer's published product literature, that is current as of date of the Contract Documents.
2. New Products: Items that have not previously been incorporated into another project or facility, except that products consisting of recycled-content materials are allowed, unless explicitly stated otherwise. Products salvaged or recycled from other projects are not considered new products.
3. Comparable Product: Product that is demonstrated and approved through submittal process, or where indicated as a product substitution, to have the indicated qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics that equal or exceed those of specified product.

B. Substitutions: Changes in products, materials, equipment, and methods of construction from those required by the Contract Documents and proposed by Contractor.

C. Basis-of-Design Product Specification: Where a specific manufacturer's product is named and accompanied by the words "basis of design," including make or model number or other designation, to establish the significant qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics for purposes of evaluating comparable products of other named manufacturers.

D. Manufacturer's Warranty: Preprinted written warranty published by individual manufacturer for a particular product and specifically endorsed by manufacturer to Owner.

E. Special Warranty: Written warranty required by or incorporated into the Contract Documents, either to extend time limit provided by manufacturer's warranty or to provide more rights for Owner.

1.3 SUBMITTALS

A. Product List: Submit a list, in tabular from, showing specified products. Include generic names of products required. Include manufacturer's name and proprietary product names for each product.

1. Coordinate product list with Contractor's Construction Schedule and the Submittals Schedule.
2. Completed List: Within **15** days after date of commencement of the Work, submit **3** copies of completed product list. Include a written explanation for omissions of data and for variations from Contract requirements.
3. Architect's Action: Architect will respond in writing to Contractor within **15** days of receipt of completed product list. Architect's response will include a list of unacceptable product selections and a brief explanation of reasons for this action. Architect's response, or lack of response, does not constitute a waiver of requirement that products comply with the Contract Documents.

B. Substitution Requests: Submit three copies of each request for consideration. Identify product or fabrication or installation method to be replaced. Include Specification Section number and title and Drawing numbers and titles.

1. Substitution Request Form: Use **CSI Form 13.1A** or **same content form provided by Contractor.**
2. Documentation: Show compliance with requirements for substitutions and the following, as applicable:

a. Statement indicating why specified material or product cannot be provided.
b. Coordination information, including a list of changes or modifications needed to other parts of the Work and to construction performed by Owner and separate contractors that will be necessary to accommodate proposed substitution.
c. Detailed comparison of significant qualities of proposed substitution with those of the Work specified. Significant qualities may include attributes such as performance, weight, size, durability, visual effect, and specific features and requirements indicated.
d. Product Data, including drawings and descriptions of products and fabrication and installation procedures.
e. Samples, where applicable or requested.
f. List of similar installations for completed projects with project names and addresses and names and addresses of architects and owners.
g. Material test reports from a qualified testing agency indicating and interpreting test results for compliance with requirements indicated.

h. Research/evaluation reports evidencing compliance with building code in effect for Project, from a model code organization acceptable to authorities having jurisdiction.
i. Detailed comparison of Contractor's Construction Schedule using proposed substitution with products specified for the Work, including effect on the overall Contract Time.
j. Cost information, including a proposal of change, if any, in the Contract Sum.
k. Contractor's certification that proposed substitution complies with requirements in the Contract Documents and is appropriate for applications indicated.
l. Contractor's waiver of rights to additional payment or time that may subsequently become necessary because of failure of proposed substitution to produce indicated results.

3. Architect's Action: If necessary, Architect will request additional information or documentation for evaluation within one week of receipt of a request for substitution. Architect will notify Contractor of acceptance or rejection of proposed substitution within **10** calendar days of receipt of request, or **5** calendar days of receipt of additional information or documentation, whichever is later.

a. Form of Acceptance: Change Order.
b. Use product specified if Architect cannot make a decision on use of a proposed substitution within time allocated.

C. Basis-of-Design Product Specification Submittal: Comply with requirements in Division 1 Section "Submittal Procedures." Show compliance with requirements.

1.4 QUALITY ASSURANCE

A. Compatibility of Options: If Contractor is given option of selecting between two or more products for use on Project, product selected shall be compatible with products previously selected, even if previously selected products were also options.

1.5 PRODUCT DELIVERY, STORAGE, AND HANDLING

A. Deliver, store, and handle products using means and methods that will prevent damage, deterioration, and loss, including theft. Comply with manufacturer's written instructions.

1. Schedule delivery to minimize long-term storage at Project site and to prevent overcrowding of construction spaces.
2. Coordinate delivery with installation time to ensure minimum holding time for items that are flammable, hazardous, easily damaged, or sensitive to deterioration, theft, and other losses.
3. Deliver products to Project site in an undamaged condition in manufacturer's original sealed container or other packaging system, complete with labels and instructions for handling, storing, unpacking, protecting, and installing.

4. Inspect products on delivery to ensure compliance with the Contract Documents and to ensure that products are undamaged and properly protected.
5. Store products to allow for inspection and measurement of quantity or counting of units.
6. Store materials in a manner that will not endanger Project structure.
7. Store products that are subject to damage by the elements, under cover in a weathertight enclosure above ground, with ventilation adequate to prevent condensation.
8. Comply with product manufacturer's written instructions for temperature, humidity, ventilation, and weather-protection requirements for storage.
9. Protect stored products from damage.

1.6 PRODUCT WARRANTIES

A. Warranties specified in other Sections shall be in addition to, and run concurrent with, other warranties required by the Contract Documents. Manufacturer's disclaimers and limitations on product warranties do not relieve Contractor of obligations under requirements of the Contract Documents.

B. Special Warranties: Prepare a written document that contains appropriate terms and identification, ready for execution. Submit a draft for approval before final execution.

1. Manufacturer's Standard Form: Modified to include Project-specific information and properly executed.
2. Retain subparagraph above or below, or both, depending on what is specified in individual Specification Sections.
3. Refer to Divisions 2 through 16 Sections for specific content requirements and particular requirements for submitting special warranties.

C. Submittal Time: Comply with requirements in Division 1 Section "Closeout Procedures."

PART 2 - PRODUCTS

2.1 PRODUCT OPTIONS-

A. General Product Requirements: Provide products that comply with the Contract Documents, that are undamaged and, unless otherwise indicated, that are new at time of installation.

1. Provide products complete with accessories, trim, finish, fasteners, and other items needed for a complete installation and indicated use and effect.
2. Standard Products: If available, and unless custom products or nonstandard options are specified, provide standard products of types that have been produced and used successfully in similar situations on other projects.
3. Owner reserves the right to limit selection to products with warranties not in conflict with requirements of the Contract Documents.

4. Where products are accompanied by the term "as selected," Architect will make selection.
5. Where products are accompanied by the term "match sample," sample to be matched is Architect's.
6. Descriptive, performance, and reference standard requirements in the Specifications establish "salient characteristics" of products.

B. Product Selection Procedures: Procedures for product selection include the following:

1. Product: Where Specification paragraphs or subparagraphs titled "Product" name a single product and manufacturer, provide the product named.

    a. Substitutions may be considered, unless otherwise indicated.

2. Manufacturer/Source: Where Specification paragraphs or subparagraphs titled "Manufacturer" or "Source" name single manufacturers or sources, provide a product by the manufacturer or from the source named that complies with requirements.

    a. Substitutions may be considered, unless otherwise indicated.

3. Products: Where Specification paragraphs or subparagraphs titled "Products" introduce a list of names of both products and manufacturers, provide one of the products listed that complies with requirements.

    a. Substitutions may be considered, unless otherwise indicated.

4. Manufacturers: Where Specification paragraphs or subparagraphs titled "Manufacturers" introduce a list of manufacturers' names, provide a product by one of the manufacturers listed that complies with requirements.

    a. Substitutions may be considered, unless otherwise indicated.

5. Available Products: Where Specification paragraphs or subparagraphs titled "Available Products" introduce a list of names of both products and manufacturers, provide one of the products listed or another product that complies with requirements. Comply with provisions in "Comparable Products" Article to obtain approval for use of an unnamed product.

6. Available Manufacturers: Where Specification paragraphs or subparagraphs titled "Available Manufacturers" introduce a list of manufacturers' names, provide a product by one of the manufacturers listed or another manufacturer that complies with requirements. Comply with provisions in "Comparable Products" Article to obtain approval for use of an unnamed product.

7. Basis-of-Design Products: Where Specification paragraphs or subparagraphs titled "Basis-of-Design Product" are included and also introduce or refer to a list of manufacturers' names, provide either the specified product or a comparable product by one of the other named manufacturers. Drawings and Specifications indicate sizes, profiles, dimensions, and other characteristics that are based on

the product named. Comply with provisions in "Comparable Products" Article to obtain approval for use of an unnamed product.

a. Substitutions will be considered, unless otherwise indicated.

8. Visual Matching Specification: Where Specifications require matching an established Sample, select a product (and manufacturer) that complies with requirements and matches Architect's sample. Architect's decision will be final on whether a proposed product matches satisfactorily.

a. If no product available within specified category matches satisfactorily and complies with other specified requirements, comply with provisions of the Contract Documents on "substitutions" for selection of a matching product.

9. Visual Selection Specification: Where Specifications include the phrase "as selected from manufacturer's colors, patterns, textures" or a similar phrase, select a product (and manufacturer) that complies with other specified requirements.

a. Standard Range: Where Specifications include the phrase "standard range of colors, patterns, textures" or similar phrase, Architect will select color, pattern, or texture from manufacturer's product line that does not include premium items.
b. Full Range: Where Specifications include the phrase "full range of colors, patterns, textures" or similar phrase, Architect will select color, pattern, or texture from manufacturer's product line that includes both standard and premium items.

2.2 PRODUCT SUBSTITUTIONS

A. Timing: Architect will consider requests for substitution submitted 15 calendar days prior to Bid date and during the Construction Submittal Review period.

B. Conditions: Architect will consider Contractor's request for substitution when the following conditions are satisfied. If the following conditions are not satisfied, Architect will return requests without action, except to record noncompliance with these requirements:

1. Requested substitution offers Owner a substantial advantage in cost, time, energy conservation, or other considerations, after deducting additional responsibilities Owner must assume. Owner's additional responsibilities may include compensation to Architect for redesign and evaluation services, increased cost of other construction by Owner, and similar considerations.
2. Requested substitution does not require extensive revisions to the Contract Documents.
3. Requested substitution is consistent with the Contract Documents and will produce indicated results.
4. Substitution request is fully documented and properly submitted.
5. Requested substitution will not adversely affect Contractor's Construction Schedule.

6. Requested substitution has received necessary approvals of authorities having jurisdiction.
7. Requested substitution is compatible with other portions of the Work.
8. Requested substitution has been coordinated with other portions of the Work.
9. Requested substitution provides specified warranty.

2.3 COMPARABLE PRODUCTS

A. Where products or manufacturers are specified by name, submit the following, in addition to other required submittals, to obtain approval of an unnamed product:

1. Evidence that the proposed product does not require extensive revisions to the Contract Documents, that it is consistent with the Contract Documents and will produce the indicated results, and that it is compatible with other portions of the Work.
2. Detailed comparison of significant qualities of proposed product with those named in the Specifications. Significant qualities include attributes such as performance, weight, size, durability, visual effect, and specific features and requirements indicated.
3. Evidence that proposed product provides specified warranty.
4. List of similar installations for completed projects with project names and addresses and names and addresses of architects and owners, if requested.
5. Samples, if requested.

SECTION 01700 - **EXECUTION REQUIREMENTS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes general procedural requirements governing execution of the Work including, but not limited to, the following:

1. Construction layout.
2. General installation of products.
3. Progress cleaning.
4. Starting and adjusting.
5. Protection of installed construction.
6. Correction of the Work.

B. See Division 1 Section "Closeout Procedures" for submitting final property survey with Project Record Documents, recording of Owner-accepted deviations from indicated lines and levels, and final cleaning.

1.2 SUBMITTALS

A. Landfill Receipts: Submit copy of receipts issued by a landfill facility, licensed to accept hazardous materials, for hazardous waste disposal.

1.3 QUALITY ASSURANCE

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 EXAMINATION

A. Existing Conditions: The existence and location of site improvements, utilities, and other construction indicated as existing are not guaranteed. Before beginning work, investigate and verify the existence and location of mechanical and electrical systems and other construction affecting the Work.

1. Before construction, verify the location and points of connection of utility services.

B. Existing Utilities: The existence and location of underground and other utilities and construction indicated as existing are not guaranteed. Before beginning site work,

investigate and verify the existence and location of underground utilities and other construction affecting the Work.

1. Before construction, verify the location and invert elevation at points of connection of sanitary sewer, storm sewer, and water-service piping; and underground electrical services.
2. Furnish location data for work related to Project that must be performed by public utilities serving Project site.

C. Acceptance of Conditions: Examine substrates, areas, and conditions, with Installer or Applicator present where indicated, for compliance with requirements for installation tolerances and other conditions affecting performance. Record observations.

1. Verify compatibility with and suitability of substrates, including compatibility with existing finishes or primers.
2. Examine roughing-in for mechanical and electrical systems to verify actual locations of connections before equipment and fixture installation.
3. Examine walls, floors, and roofs for suitable conditions where products and systems are to be installed.
4. Proceed with installation only after unsatisfactory conditions have been corrected. Proceeding with the Work indicates acceptance of surfaces and conditions.

3.2 PREPARATION

A. Existing Utility Information: Furnish information to local utility and Owner that is necessary to adjust, move, or relocate existing utility structures, utility lines, services, or other utility appurtenances located in or affected by construction. Coordinate with authorities having jurisdiction.

B. Field Measurements: Take field measurements as required to fit the Work properly. Recheck measurements before installing each product. Where portions of the Work are indicated to fit to other construction, verify dimensions of other construction by field measurements before fabrication. Coordinate fabrication schedule with construction progress to avoid delaying the Work.

C. Space Requirements: Verify space requirements and dimensions of items shown diagrammatically on Drawings.

D. Review of Contract Documents and Field Conditions: Immediately on discovery of the need for clarification of the Contract Documents, submit a request for information to Architect. Include a detailed description of problem encountered, together with recommendations for changing the Contract Documents. **Submit requests on CSI Form 13.2A, "Request for Interpretation," or similar form supplied by Contractor.**

3.3 CONSTRUCTION LAYOUT

A. Verification: Before proceeding to lay out the Work, verify layout information shown on Drawings, in relation to existing conditions. If discrepancies are discovered, notify Architect promptly.

B. Site Improvements: Locate and lay out site improvements, including paving, grading, fill and topsoil placement, utility slopes, and invert elevations.

C. Building Lines and Levels: Locate and lay out control lines and levels for structures, building foundations, column grids, and floor levels, including those required for mechanical and electrical work.

3.4 INSTALLATION

A. General: Locate the Work and components of the Work accurately, in correct alignment and elevation, as indicated.

1. Make vertical work plumb and make horizontal work level.
2. Where space is limited, install components to maximize space available for maintenance and ease of removal for replacement.
3. Conceal pipes, ducts, and wiring in finished areas, unless otherwise indicated.

B. Comply with manufacturer's written instructions and recommendations for installing products in applications indicated.

C. Install products at the time and under conditions that will ensure the best possible results. Maintain conditions required for product performance until Substantial Completion.

D. Conduct construction operations so no part of the Work is subjected to damaging operations or loading in excess of that expected during normal conditions of occupancy.

E. Tools and Equipment: Do not use tools or equipment that produce harmful noise levels.

F. Templates: Obtain and distribute to the parties involved templates for work specified to be factory prepared and field installed. Check Shop Drawings of other work to confirm that adequate provisions are made for locating and installing products to comply with indicated requirements.

G. Anchors and Fasteners: Provide anchors and fasteners as required to anchor each component securely in place, accurately located and aligned with other portions of the Work.

1. Mounting Heights: Where mounting heights are not indicated, mount components at heights directed by Architect.

2. Allow for building movement, including thermal expansion and contraction.
3. Coordinate installation of anchorages. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that are to be embedded in concrete or masonry. Deliver such items to Project site in time for installation.

H. Joints: Make joints of uniform width. Where joint locations in exposed work are not indicated, arrange joints for the best visual effect. Fit exposed connections together to form hairline joints.

I. Hazardous Materials: Use products, cleaners, and installation materials that are not considered hazardous.

3.5 PROGRESS CLEANING

A. General: Clean Project site and work areas daily, including common areas. Coordinate progress cleaning for joint-use areas where more than one installer has worked. Enforce requirements strictly. Dispose of materials lawfully.

1. Comply with requirements in NFPA 241 for removal of combustible waste materials and debris.
2. Do not hold materials more than 7 days during normal weather or 3 days if the temperature is expected to rise above 80 deg F.
3. Containerize hazardous and unsanitary waste materials separately from other waste. Mark containers appropriately and dispose of legally, according to regulations.

B. Site: Maintain Project site free of waste materials and debris.

C. Work Areas: Clean areas where work is in progress to the level of cleanliness necessary for proper execution of the Work.

1. Remove liquid spills promptly.
2. Where dust would impair proper execution of the Work, broom-clean or vacuum the entire work area, as appropriate.

D. Installed Work: Keep installed work clean. Clean installed surfaces according to written instructions of manufacturer or fabricator of product installed, using only cleaning materials specifically recommended. If specific cleaning materials are not recommended, use cleaning materials that are not hazardous to health or property and that will not damage exposed surfaces.

E. Concealed Spaces: Remove debris from concealed spaces before enclosing the space.

F. Exposed Surfaces in Finished Areas: Clean exposed surfaces and protect as necessary to ensure freedom from damage and deterioration at time of Substantial Completion.

G. Waste Disposal: Burying or burning waste materials on-site will not be permitted. Washing waste materials down sewers or into waterways will not be permitted.

H. During handling and installation, clean and protect construction in progress and adjoining materials already in place. Apply protective covering where required to ensure protection from damage or deterioration at Substantial Completion.

I. Clean and provide maintenance on completed construction as frequently as necessary through the remainder of the construction period. Adjust and lubricate operable components to ensure operability without damaging effects.

J. Limiting Exposures: Supervise construction operations to assure that no part of the construction completed or in progress, is subject to harmful, dangerous, damaging, or otherwise deleterious exposure during the construction period.

3.6 STARTING AND ADJUSTING

A. Start equipment and operating components to confirm proper operation. Remove malfunctioning units, replace with new units, and retest.

B. Adjust operating components for proper operation without binding. Adjust equipment for proper operation.

C. Test each piece of equipment to verify proper operation. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

D. Manufacturer's Field Service: If a factory-authorized service representative is required to inspect field-assembled components and equipment installation, comply with qualification requirements in Division 1 Section "Quality Requirements."

3.7 PROTECTION OF INSTALLED CONSTRUCTION

A. Provide final protection and maintain conditions that ensure installed Work is without damage or deterioration at time of Substantial Completion.

B. Comply with manufacturer's written instructions for temperature and relative humidity.

3.8 CORRECTION OF THE WORK

A. Repair or remove and replace defective construction. Restore damaged substrates and finishes. Comply with requirements in Division 1 Section "Cutting and Patching."

1. Repairing includes replacing defective parts, refinishing damaged surfaces, touching up with matching materials, and properly adjusting operating equipment.

B. Restore permanent facilities used during construction to their specified condition.

C. Remove and replace damaged surfaces that are exposed to view if surfaces cannot be repaired without visible evidence of repair.

D. Repair components that do not operate properly. Remove and replace operating components that cannot be repaired.

E. Remove and replace chipped, scratched, and broken glass or reflective surfaces.

SECTION 01732 - **SELECTIVE DEMOLITION**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes demolition and removal of the following:

1. Selected portions of a building or structure.
2. Repair procedures for selective demolition operations.

1.2 DEFINITIONS

A. Remove: Detach items from existing construction and legally dispose of them off-site, unless indicated to be removed and salvaged or removed and reinstalled.

B. Remove and Salvage: Detach items from existing construction and deliver them to Owner ready for reuse.

C. Remove and Reinstall: Detach items from existing construction, prepare them for reuse, and reinstall them where indicated.

D. Existing to Remain: Existing items of construction that are not to be removed and that are not otherwise indicated to be removed, removed and salvaged, or removed and reinstalled.

1.3 MATERIALS OWNERSHIP

A. Except for items or materials indicated to be reused, salvaged, reinstalled, or otherwise indicated to remain Owner's property, demolished materials shall become Contractor's property and shall be removed from Project site.

1.4 SUBMITTALS

A. Proposed Control Measures: Submit statement or drawing that indicates the measures proposed for use, proposed locations, and proposed time frame for their operation. Identify options if proposed measures are later determined to be inadequate. Include measures for the following:

1. Dust control.
2. Noise control.

B. Schedule of Selective Demolition Activities: Indicate detailed sequence of selective demolition and removal work, with starting and ending dates for each activity, interruption of utility services, locations of temporary partitions and means of egress.

C. Pre-demolition Photographs or Videotape: Show existing conditions of adjoining construction and site improvements that might be misconstrued as damage caused by selective demolition operations. Submit before Work begins.

1.5 QUALITY ASSURANCE

A. Demolition Firm Qualifications: An experienced firm that has specialized in demolition work similar in material and extent to that indicated for this Project.

B. Regulatory Requirements: Comply with governing EPA notification regulations before beginning selective demolition. Comply with hauling and disposal regulations of authorities having jurisdiction.

C. Standards: Comply with ANSI A10.6 and NFPA 241.

D. Pre-demolition Conference: Conduct conference at Project site.

1.6 PROJECT CONDITIONS

A. Owner will occupy portions of building immediately adjacent to selective demolition area. Conduct selective demolition so Owner's operations will not be disrupted. Provide not less than **72** hours' notice to Owner of activities that will affect Owner's operations.

B. Maintain access to existing walkways, corridors, and other adjacent occupied or used facilities.

1. Do not close or obstruct walkways, corridors, or other occupied or used facilities without written permission from authorities having jurisdiction.

C. Owner assumes no responsibility for condition of areas to be selectively demolished.

1. Conditions existing at time of inspection for bidding purpose will be maintained by Owner as far as practical.

D. Hazardous Materials: It is not expected that hazardous materials will be encountered in the Work.
1. If materials suspected of containing hazardous materials are encountered, do not disturb; immediately notify Architect and Owner.

E. Storage or sale of removed items or materials on-site will not be permitted.

F. Utility Service: Maintain existing utilities indicated to remain in service and protect them against damage during selective demolition operations.

1. Maintain fire-protection facilities in service during selective demolition operations.

1.7 WARRANTY

A. Existing Warranties: Do not to void existing warranties.

PART 2 - PRODUCTS

2.1 REPAIR MATERIALS

A. Use repair materials identical to existing materials.

1. If identical materials are unavailable or cannot be used for exposed surfaces, use materials that visually match existing adjacent surfaces to the fullest extent possible.
2. Use materials whose installed performance equals or surpasses that of existing materials.

PART 3 – EXECUTION

3.1 EXAMINATION

A. Verify that utilities have been disconnected and capped.

B. Survey existing conditions and correlate with requirements indicated to determine extent of selective demolition required.

C. Inventory and record the condition of items to be removed and reinstalled and items to be removed and salvaged.

D. When unanticipated mechanical, electrical, or structural elements that conflict with intended function or design are encountered, investigate and measure the nature and extent of conflict. Promptly submit a written report to Architect.

E. Engage a professional engineer to survey condition of building to determine whether removing any element might result in structural deficiency or unplanned collapse of any portion of structure or adjacent structures during selective demolition operations.

3.2 UTILITY SERVICES

A. Existing Utilities: Maintain services indicated to remain and protect them against damage during selective demolition operations.

B. Do not interrupt existing utilities serving occupied or operating facilities unless authorized in writing by Owner and authorities having jurisdiction. Schedule and coordinate change new work affecting utilities with Owner to minimize any disruption of service. If necessary, provide temporary services during interruptions to existing utilities, as acceptable to Owner and to authorities having jurisdiction.

1. **Provide at least 7 days notice to Owner if shutdown of service is required.**

C. Utility Requirements: Locate, identify, disconnect, and seal or cap off indicated utilities serving areas to be selectively demolished.

1. Arrange to shut off indicated utilities with utility companies.
2. If utility services are required to be removed, relocated, or abandoned, provide temporary utilities before proceeding with selective demolition that bypass area of selective demolition and that maintain continuity of service to other parts of building.
3. Cut off pipe or conduit in walls or partitions to be removed. Cap, valve, or plug and seal remaining portion of pipe or conduit after bypassing.

3.3 PREPARATION

A. Site Access and Temporary Controls: Conduct selective demolition and debris-removal operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.
1. Do not close or obstruct streets, walks, walkways, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction. Provide alternate routes around closed or obstructed traffic ways if required by governing regulations.
2. Erect temporary protection, such as walks, fences, railings, canopies, and covered passageways, where required by authorities having jurisdiction.
3. Protect existing site improvements, appurtenances, and landscaping to remain.

B. Temporary Facilities: Provide temporary barricades and other protection required to prevent injury to people and damage to adjacent buildings and facilities to remain.

C. Temporary Enclosures: Provide temporary enclosures for protection of existing building and construction, in progress and completed, from exposure, foul weather, other construction operations, and similar activities. Provide temporary weather tight enclosure for building exterior.

3.4 POLLUTION CONTROLS

A. Dust Control: Use water mist, temporary enclosures, and other suitable methods to limit spread of dust and dirt. Comply with governing environmental-protection regulations.

B. Disposal: Remove and transport debris in a manner that will prevent spillage on adjacent surfaces and areas.

C. Cleaning: Clean adjacent structures and improvements of dust, dirt, and debris caused by selective demolition operations. Return adjacent areas to condition existing before selective demolition operations began.

3.5 SELECTIVE DEMOLITION

A. General: Demolish and remove existing construction only to the extent required by new construction and as indicated. Use methods required to complete the Work within limitations of governing regulations.

B. Removed and Salvaged Items:

1. Clean salvaged items.
2. Arrange for protective storage of salvaged items designated for reuse.
3. Transport items to storage area on-site as designated by Owner.
4. Protect items from damage during storage.

C. Removed and Reinstalled Items:
1. Protect items from damage during transport and storage.
2. Reinstall items in locations indicated. Comply with installation requirements for similarly new materials and equipment. Provide connections, supports, and miscellaneous materials necessary to make item functional for use indicated.

D. Existing Items to Remain: Protect construction indicated to remain against damage and soiling during selective demolition.

2.2 PATCHING AND REPAIRS

A. General: Promptly repair damage to adjacent construction caused by selective demolition operations.

2.8 DISPOSAL OF DEMOLISHED MATERIALS

A. General: Promptly dispose of demolished materials. Do not allow demolished materials to accumulate on-site.

B. Burning: Do not burn demolished materials.

1. Disposal: Transport demolished materials off Owner's property and legally dispose of them.

END OF SECTION 01732

SECTION 01770 - **CLOSEOUT PROCEDURES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for contract closeout, including, but not limited to, the following:

1. Inspection procedures.
2. Project Record Documents.
3. Operation and maintenance manuals.
4. Warranties.
5. Instruction of Owner's personnel.
6. Final cleaning.
7. 12-month Warranty Review.

B. See Division 1 Section "Payment Procedures" for requirements for Applications for Payment for Substantial and Final Completion.

C. See Division 1 Section "Construction Progress Documentation" for submitting Final Completion construction photographs and negatives.

D. See Divisions 2 through 16 Sections for specific closeout and special cleaning requirements for products of those Sections.

1.2 SUBSTANTIAL COMPLETION

A. Preliminary Procedures: Before requesting inspection for determining date of Substantial Completion, complete the following. List items below that are incomplete in request.

1. Prepare a list of items to be completed and corrected (punch list), the value of items on the list, and reasons why the Work is not complete.
2. Advise Owner of pending insurance changeover requirements.
3. Submit specific warranties, workmanship bonds, maintenance service agreements, final certifications, and similar documents.
4. Obtain and submit releases permitting Owner unrestricted use of the Work and access to services and utilities. Include occupancy permits, operating certificates, and similar releases.
5. Prepare and submit Project Record Documents, operation and maintenance manuals, Final Completion construction photographs, damage or settlement surveys, property surveys, and similar final record information.
6. Deliver tools, spare parts, extra materials, and similar items to location designated by Owner. Label with manufacturer's name and model number where applicable.

7. Make final changeover of permanent locks and deliver keys to Owner. Advise Owner's personnel of changeover in security provisions.
8. Complete startup testing of systems.
9. Submit test/adjust/balance records.
10. Terminate and remove temporary facilities from Project site, along with mockups, construction tools, and similar elements.
11. Advise Owner of changeover in heat and other utilities.
12. Submit changeover information related to Owner's occupancy, use, operation, and maintenance.
13. Complete final cleaning requirements, including touchup painting.
14. Touch up and otherwise repair and restore marred exposed finishes to eliminate visual defects.

B. Inspection: Submit a written request for inspection for Substantial Completion. On receipt of request, Architect will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare the Certificate of Substantial Completion after inspection or will notify Contractor of items, either on Contractor's list or additional items identified by Architect, that must be completed or corrected before certificate will be issued.

1. Reinspection: Request reinspection when the Work identified in previous inspections as incomplete is completed or corrected.
2. Results of completed inspection will form the basis of requirements for Final Completion.

1.3 FINAL COMPLETION

A. Preliminary Procedures: Before requesting final inspection for determining date of Final Completion, complete the following:

1. Submit a final Application for Payment according to Division 1 Section "Payment Procedures."
2. Submit certified copy of Architect's Substantial Completion inspection list of items to be completed or corrected (punch list), endorsed and dated by Architect. The certified copy of the list shall state that each item has been completed or otherwise resolved for acceptance.
3. Submit evidence of final, continuing insurance coverage complying with insurance requirements.
4. Submit pest-control final inspection report and warranty.
5. Instruct Owner's personnel in operation, adjustment, and maintenance of products, equipment, and systems.

B. Inspection: Submit a written request for final inspection for acceptance. On receipt of request, Architect will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare a final Certificate for Payment after inspection or will notify Contractor of construction that must be completed or corrected before certificate will be issued.

1. Reinspection: Request reinspection when the Work identified in previous inspections as incomplete is completed or corrected.

1.4 LIST OF INCOMPLETE ITEMS (PUNCH LIST)

A. Preparation: Submit **three** copies of list. Include name and identification of each space and area affected by construction operations for incomplete items and items needing correction including, if necessary, areas disturbed by Contractor that are outside the limits of construction. **Use CSI Form 14.1A. or Similar.**

1. Organize list of spaces in sequential order, starting with exterior areas first and proceeding from lowest floor to highest floor.
2. Organize items applying to each space by major element, including categories for ceiling, individual walls, floors, equipment, and building systems.

1.5 PROJECT RECORD DOCUMENTS

A. General: Do not use Project Record Documents for construction purposes. Protect Project Record Documents from deterioration and loss. Provide access to Project Record Documents for Architect's reference during normal working hours.

B. Record Drawings: Maintain and submit one set of black-line white prints of Contract Drawings and Shop Drawings.

1. Mark Record Prints to show the actual installation where installation varies from that shown originally. Require individual or entity who obtained record data, whether individual or entity is Installer, subcontractor, or similar entity, to prepare the marked-up Record Prints.

    a. Give particular attention to information on concealed elements that cannot be readily identified and recorded later.
    b. Record data as soon as possible after obtaining it. Record and check the markup before enclosing concealed installations.

2. Mark record sets in colors to distinguish between changes for different categories of the Work at the same location.
3. Note Construction Change Directive numbers, Change Order numbers, alternate numbers, and similar identification where applicable.
4. Identify and date each Record Drawing; include the designation "PROJECT RECORD DRAWING" in a prominent location. Organize into manageable sets; bind each set with durable paper cover sheets. Include identification on cover sheets. Provide 3 hard copies in 24 x 26 format and 3 electronic copies on labeled CD or DVD.

C. Miscellaneous Record Submittals: Assemble miscellaneous records required by other Specification Sections for miscellaneous record keeping and submittal in connection with actual performance of the Work. Bind or file miscellaneous records and identify each, ready for continued use and reference.

1.6 OPERATION AND MAINTENANCE MANUALS

A. Assemble a complete set of operation and maintenance data indicating the operation and maintenance of each system, subsystem, and piece of equipment not part of a system. Include operation and maintenance data required in individual Specification Sections and as follows:

1. Operation Data: Include emergency instructions and procedures, system and equipment descriptions, operating procedures, and sequence of operations.
2. Maintenance Data: Include manufacturer's information, list of spare parts, maintenance procedures, maintenance and service schedules for preventive and routine maintenance, and copies of warranties and bonds.

B. Organize operation and maintenance manuals into suitable sets of manageable size. Bind and index data in heavy-duty, three-ring, vinyl-covered, loose-leaf binders, in thickness necessary to accommodate contents, with pocket inside the covers to receive folded oversized sheets. Identify each binder on front and spine with the printed title **"BUCKEYE SUNDANCE RECREATION CENTER- OPERATION AND MAINTENANCE MANUAL,"** and subject matter of contents. Provide 3 identical electronic copies in 8.5 x 11 format on labeled CD-ROM or DVD format.

1.7 WARRANTIES

A. Submittal Time: Submit written warranties on request of Architect for designated portions of the Work where commencement of warranties other than date of Substantial Completion is indicated.

B. Organize warranty documents into an orderly sequence based on the table of contents of the Project Manual.

1. Combine and organize warranties and bonds in 8-1/2-by-11-inch format, scan warranties with original signatures, and provide 3 electronic copies on labeled CD or DVD.
2. Provide a typed description of the product or installation, including the name of the product and the name, address, and telephone number of Installer.
3. Identify with the typed or printed title "**WARRANTIES,"** Project name, and name of Contractor.

C. Provide additional copies of each warranties to include in **Operation and Maintenance manuals.**

D. **12-MONTH WARRANTY REVIEW:** A warranty review will be conducted just prior to the twelfth month following the Certificate of Occupancy to review the operations and maintenance of all installed systems, subsystems, materials, and finishes for potential claims for defects.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Cleaning Agents: Use cleaning materials and agents recommended by manufacturer or fabricator of the surface to be cleaned. Do not use cleaning agents that are potentially hazardous to health or property or that might damage finished surfaces.

PART 3 - EXECUTION

3.1 FINAL CLEANING

A. General: Provide final cleaning. Conduct cleaning and waste-removal operations to comply with local laws and ordinances and Federal and local environmental and antipollution regulations.

B. Cleaning: Employ experienced workers or professional cleaners for final cleaning. Clean each surface or unit to condition expected in an average commercial building cleaning and maintenance program. Comply with manufacturer's written instructions.

1. Complete the following cleaning operations before requesting inspection for certification of Substantial Completion for entire Project or for a portion of Project:

    a. Clean Project site, yard, and grounds, in areas disturbed by construction activities, including landscape development areas, of rubbish, waste material, litter, and other foreign substances.
    b. Sweep paved areas broom clean. Remove petrochemical spills, stains, and other foreign deposits.
    c. Rake grounds that are neither planted nor paved to a smooth, even-textured surface.
    d. Remove tools, construction equipment, machinery, and surplus material from Project site.
    e. Clean exposed exterior and interior hard-surfaced finishes to a dirt-free condition, free of stains, films, and similar foreign substances. Avoid disturbing natural weathering of exterior surfaces. Restore reflective surfaces to their original condition.
    f. Remove debris and surface dust from limited access spaces, including roofs, plenums, shafts, trenches, equipment vaults, manholes, attics, and similar spaces.
    g. Sweep concrete floors broom-clean in unoccupied spaces.
    h. Vacuum carpet and similar soft surfaces, removing debris and excess nap; shampoo if visible soil or stains remain.
    i. Clean transparent materials, including mirrors and glass in doors and windows. Remove glazing compounds and other noticeable, vision-obscuring materials. Replace chipped or broken glass and other damaged transparent materials. Polish mirrors and glass, taking care not to scratch surfaces.

j. Remove labels that are not permanent.
k. Touch up and otherwise repair and restore marred, exposed finishes and surfaces. Replace finishes and surfaces that cannot be satisfactorily repaired or restored or that already show evidence of repair or restoration.

1) Do not paint over "UL" and similar labels, including mechanical and electrical nameplates.

l. Wipe surfaces of mechanical and electrical equipment, and similar equipment. Remove excess lubrication, paint and mortar droppings, and other foreign substances.
m. Replace parts subject to unusual operating conditions.
n. Clean plumbing fixtures to a sanitary condition, free of stains, including stains resulting from water exposure.
o. Replace disposable air filters and clean permanent air filters. Clean exposed surfaces of diffusers, registers, and grills.
p. Clean light fixtures, lamps, globes, and reflectors to function with full efficiency. Replace burned-out bulbs, and those noticeably dimmed by hours of use, and defective and noisy starters in fluorescent and mercury vapor fixtures to comply with requirements for new fixtures.
q. Leave Project clean and ready for occupancy.

C. Comply with safety standards for cleaning. Do not burn waste materials. Do not bury debris or excess materials on Owner's property. Do not discharge volatile, harmful, or dangerous materials into drainage systems. Remove waste materials from Project site and dispose of lawfully.

END OF SECTION 01770

SECTION 01781 - **PROJECT RECORD DOCUMENTS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for Project Record Documents, including the following:

1. Record Drawings.
2. Record Specifications.
3. Record Product Data.

B. See Division 1 Section "**Closeout Procedures** & **Operation and Maintenance Data**" for **Operation and Maintenance Manual requirements**.

C. See Divisions 2 through 16 Sections for specific requirements for Project Record Documents of products in those Sections.

1.2 SUBMITTALS

A. Record Drawings: Comply with the following:
1. Number of Copies: Submit copies of Record Drawings as follows:
a. Final Submittal: Submit **two sets** of marked-up Record Prints, and the following:
1) Two copies printed from Record Field Changes. Print each Drawing, whether or not changes and additional information were recorded.

PART 2 - PRODUCTS

2.1 RECORD DRAWINGS

A. Record Prints: Maintain one set of blue- or black-line white prints of the Contract Drawings and Shop Drawings.

1. Preparation: Mark Record Prints to show the actual installation where installation varies from that shown originally. Require individual or entity who obtained record data, whether individual or entity is Installer, subcontractor, or similar entity, to prepare marked-up Record Prints.

a. Give particular attention to information on concealed elements that would be difficult to identify or measure and record later.
b. Record data as soon as possible after obtaining it. Record and check the markup before enclosing concealed installations.

2. Mark the Contract Drawings or Shop Drawings, whichever is most capable of showing actual physical conditions, completely and accurately. If Shop Drawings are marked, show cross-reference on the Contract Drawings.
3. Mark record sets with erasable, red-colored pencil. Use other colors to distinguish between changes for different categories of the Work at same location.
4. Note Construction Change Directive numbers, alternate numbers, Change Order numbers, and similar identification, where applicable.

B. Format: Identify and date each Record Drawing; include the designation **"PROJECT RECORD DRAWING**" in a prominent location.

1. Record Prints: Organize Record Prints and newly prepared Record Drawings into manageable sets. Bind each set with durable paper cover sheets. Include identification on cover sheets.

a. Project name.
b. Date.
c. Designation "PROJECT RECORD DRAWINGS."
d. Name of Architect.
e. Name of Contractor.

PART 3 - EXECUTION

3.1 RECORDING AND MAINTENANCE

A. Recording: Maintain one copy of each submittal during construction period for Project Record Document purposes. Post changes and modifications to Project Record Documents as they occur; do not wait until end of Project.

B. Maintenance of Record Documents and Samples: Store Record Documents and Samples in the field office apart from the Contract Documents used for construction. Do not use Project Record Documents for construction purposes. Maintain Record Documents in good order and in clean, dry, legible condition, protected from deterioration and loss. Provide access to Project Record Documents for Architect's reference during normal working hours.

END OF SECTION 01781

SECTION 01782 - **OPERATION AND MAINTENANCE DATA**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes administrative and procedural requirements for preparing operation and maintenance manuals, including the following:

1. **Operation & Maintenance Manuals** for systems, subsystems, products, materials, finishes, and equipment.

2. Emergency Manual(s).

B. See Divisions 2 through 16 Sections for specific operation and maintenance manual requirements for products in those Sections.

1.2 SUBMITTALS

A. Manual: Submit **2 copies** of O & M Manual in final form at least **15** days before final inspection. Architect will return copy with comments within **15** days after final inspection.

1. Correct or modify each manual to comply with Architect's comments. Submit **3** copies of each corrected manual within **15** days of receipt of Architect's comments.

PART 2 - PRODUCTS

2.1 **Operation & Maintenance Manuals**, GENERAL

A. Organization: Unless otherwise indicated, organize each manual into a separate section for each system and subsystem, and a separate section for each piece of equipment not part of a system. Each manual shall contain a title page, table of contents, and manual contents.

B. Title Page: Enclose title page in transparent plastic sleeve. Include the following information:

1. Subject matter included in manual.
2. Name and address of Project.
3. Name and address of Owner.
4. Date of submittal.

5. Name, address, and telephone number of Contractor.
6. Name and address of Architect.
7. Cross-reference to related systems in other operation and maintenance manuals.

C. Table of Contents: List each product included in manual, identified by product name, indexed to content of volume, and cross-referenced to Specification Section number in Project Manual.

D. Manual Contents: Organize into sets of manageable size. Arrange contents alphabetically by system, subsystem, and equipment. If possible, assemble instructions for subsystems, equipment, and components of one system into a single binder.

1. Binders: Heavy-duty, 3-ring, vinyl-covered, loose-leaf binders, in thickness necessary to accommodate contents, sized to hold 8-1/2-by-11-inch paper; with clear plastic sleeve on spine to hold label describing contents and with pockets inside covers to hold folded oversize sheets.

    a. Identify each binder on front and spine, with printed title " **BUCKEYE SUNDANCE RECREATION CENTER - OPERATION & MAINTENANCE MANUAL**," Project title or name, and subject matter of contents. Indicate volume number for multiple-volume sets.

2. Dividers: Heavy-paper dividers with plastic-covered tabs for each section. Mark each tab to indicate contents. Include typed list of products and major components of equipment included in the section on each divider, cross-referenced to Specification Section number and title of Project Manual.
3. Protective Plastic Sleeves: Transparent plastic sleeves designed to enclose diagnostic software diskettes for computerized electronic equipment.
4. Drawings: Attach reinforced, punched binder tabs on drawings and bind with text.

    a. If oversize drawings are necessary, fold drawings to same size as text pages and use as foldouts.
    b. If drawings are too large to be used as foldouts, fold and place drawings in labeled envelopes and bind envelopes in rear of manual. At appropriate locations in manual, insert typewritten pages indicating drawing titles, descriptions of contents, and drawing locations.

2.2 OPERATION MANUALS

A. Content: In addition to requirements in this Section, include operation data required in individual Specification Sections and equipment descriptions, operating standards, operating procedures, operating logs, wiring and control diagrams, and license requirements.

B. Descriptions: Include the following:

1. Product name and model number.
2. Manufacturer's name.

3. Equipment identification with serial number of each component.
4. Equipment function.
5. Operating characteristics.
6. Limiting conditions.
7. Performance curves.
8. Engineering data and tests.
9. Complete nomenclature and number of replacement parts.

C. Operating Procedures: Include startup, break-in, and control procedures; stopping and normal shutdown instructions; routine, normal, seasonal, and weekend operating instructions; and required sequences for electric or electronic systems.

D. Systems and Equipment Controls: Describe sequence of operation, and diagram controls as installed.

E. Piped Systems: Diagram piping as installed, and identify color-coding where required for identification.

2.3 PRODUCT MAINTENANCE MANUAL

A. Content: Organize manual into a separate section for each product, material, and finish. Include source information, product information, maintenance procedures, repair materials and sources, and warranties and bonds, as described below.

B. Source Information: List each product included in manual, identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual.

C. Product Information: Include the following, as applicable:

1. Product name and model number.
2. Manufacturer's name.
3. Color, pattern, and texture.
4. Material and chemical composition.
5. Reordering information for specially manufactured products.

D. Maintenance Procedures: Include manufacturer's written recommendations for inspection procedures, types of cleaning agents, methods of cleaning, schedule for cleaning and maintenance, and repair instructions.

E. Repair Materials and Sources: Include lists of materials and local sources of materials and related services.

F. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.

2.4 SYSTEMS AND EQUIPMENT MAINTENANCE MANUAL

A. Content: For each system, subsystem, and piece of equipment not part of a system, include source information, manufacturers' maintenance documentation, maintenance procedures, maintenance and service schedules, spare parts list and source information, maintenance service contracts, and warranty and bond information, as described below.

B. Source Information: List each system, subsystem, and piece of equipment included in the manual, identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual.

C. Manufacturers' Maintenance Documentation: Manufacturers' maintenance documentation including maintenance instructions, drawings and diagrams for maintenance, nomenclature of parts and components, and recommended spare parts for each component part or piece of equipment.

D. Maintenance Procedures: Include test and inspection instructions, troubleshooting guide, disassembly instructions, and adjusting instructions that detail essential maintenance procedures.

E. Maintenance and Service Schedules: Include service and lubrication requirements, list of required lubricants for equipment, and separate schedules for preventive and routine maintenance and service with standard time allotment.

F. Spare Parts List and Source Information: Include lists of replacement and repair parts, with parts identified and cross-referenced to manufacturers' maintenance documentation and local sources of maintenance materials and related services.

G. Maintenance Service Contracts: Include copies of maintenance agreements with name and telephone number of service agent.

H. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.

PART 3 - EXECUTION

3.1 MANUAL PREPARATION

A. Product Maintenance Manual: Assemble a complete set of maintenance data indicating care and maintenance of each product, material, and finish incorporated into the Work.

B. Operation and Maintenance Manuals: Assemble a complete set of operation and maintenance data indicating operation and maintenance of each system, subsystem, and piece of equipment not part of a system.

C. Manufacturers' Data: Where manuals contain manufacturers' standard printed data, include only sheets pertinent to product or component installed. Mark each sheet to identify each product or component incorporated into the Work. If data include more than one item in tabular format, identify each item using appropriate references from the Contract Documents. Identify data applicable to the Work and delete references to information not applicable.

D. Drawings: Prepare drawings supplementing manufacturers' printed data to illustrate relationship of component parts of equipment and systems and to illustrate control sequence and flow diagrams. Coordinate these drawings with information contained in Record Drawings to ensure correct illustration of completed installation.

    1. Do not use original Project Record Documents as part of operation and maintenance manuals.

E. Comply with Division 1 Section "Closeout Procedures" for the schedule for submitting operation and maintenance documentation.

END OF SECTION 01782

SECTION 02230 - **SITE CLEARING**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:
   1. Clearing and grubbing.
   2. Temporary erosion and sedimentation control measures.

1.2 MATERIAL OWNERSHIP

A. Except for stripped topsoil or other materials indicated to remain Owner's property, cleared materials shall become Contractor's property and shall be removed from Project site.

1.3 PROJECT CONDITIONS

A. Traffic: Minimize interference with adjoining roads, streets, walks, and other adjacent occupied or used facilities during site-clearing operations.

   1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction.
   2. Provide alternate routes around closed or obstructed traffic ways if required by authorities having jurisdiction.

B. Salvable Improvements: Carefully remove items indicated to be salvaged and store on Owner's premises where indicated.

C. Utility Locator Service: Notify utility locator service for area where Project is located before site clearing.

D. Do not commence site clearing operations until temporary erosion and sedimentation control measures are in place.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS- **Consult Owner's Geotechnical Report.**

A. Satisfactory Soil Materials: Requirements for satisfactory soil materials are specified in Division 2 Section "Earthwork."

   1. Obtain approved borrow soil materials off-site when satisfactory soil materials are not available on-site.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect and maintain benchmarks and survey control points from disturbance during construction.

B. Locate and clearly flag trees and vegetation to remain or to be relocated.

C. Protect existing site improvements to remain from damage during construction.

1. Restore damaged improvements to their original condition, as acceptable to Owner.

3.2 UTILITIES

A. Locate all underground Utilities and flag prior to beginning Building Pad preparation.

1. Arrange with utility companies to connect utilities as required.

B. Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary utility services according to requirements indicated:

1. Notify Owner not less than **seven days** in advance of proposed utility interruptions.
2. Do not proceed with utility interruptions without Owner's written permission.

3.3 CLEARING AND GRUBBING

A. Fill depressions caused by clearing and grubbing operations with satisfactory soil material unless further excavation or earthwork is indicated.

1. Place fill material in horizontal layers not exceeding a loose depth of 8 inches and compact each layer to a density equal to adjacent original ground.

3.4 TOPSOIL STRIPPING

A. Strip topsoil to whatever depths are encountered in a manner to prevent intermingling with underlying subsoil or other waste materials.

B. Stockpile topsoil materials away from edge of excavations without intermixing with subsoil. Grade and shape stockpiles to drain surface water. Cover to prevent windblown dust.

3.5 DISPOSAL

A. Disposal: Remove surplus soil material, unsuitable topsoil, obstructions, demolished materials, and waste materials including trash and debris, and legally dispose of them off Owner's property.

SECTION 02260 - **EXCAVATION SUPPORT AND PROTECTION**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes temporary excavation support and protection systems.

1.2 PERFORMANCE REQUIREMENTS

A. Design, furnish, install, monitor, and maintain excavation support and protection system capable of supporting excavation sidewalls and of resisting soil and hydrostatic pressure and superimposed and construction loads.

1. Provide professional engineering services needed to assume engineering responsibility, including preparation of Shop Drawings and a comprehensive engineering analysis by a qualified professional engineer.

1.3 SUBMITTALS

A. Shop Drawings for Information: Prepared by or under the supervision of a qualified professional engineer for excavation support and protection systems.

1. Include Shop Drawings signed and sealed by the qualified professional engineer responsible for their preparation.

1.4 PROJECT CONDITIONS

A. Survey adjacent structures and improvements, employing a qualified professional engineer or land surveyor; establish exact elevations at fixed points to act as benchmarks. Clearly identify benchmarks and record existing elevations.

1. During installation of excavation support and protection systems, regularly resurvey benchmarks, maintaining an accurate log of surveyed elevations and positions for comparison with original elevations and positions. Promptly notify Architect if changes in elevations or positions occur or if cracks, sags, or other damage is evident in adjacent construction.

PART 2 - PRODUCTS

2.1 MATERIALS

A. General: Provide materials that are either new or in serviceable condition.

B. Structural Steel: ASTM A 36/A 36M, ASTM A 690/A 690M, or ASTM A 992/A 992M.

C. Steel Sheet Piling: ASTM A 328/A 328M, ASTM A 572/A 572M, or ASTM A 690/A 690M; with continuous interlocks.

D. Wood Lagging: Lumber, mixed hardwood, nominal rough thickness of 4 inches.

E. Cast-in-Place Concrete: ACI 301, of compressive strength required for application.

F. Reinforcing Bars: ASTM A 615/A 615M, Grade 60 (Grade 420), deformed.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards that could develop during excavation support and protection system operations.

B. Install excavation support and protection systems to ensure minimum interference with roads, streets, walks, and other adjacent occupied and used facilities.

C. Monitor excavation support and protection systems daily during excavation progress and for as long as excavation remains open. Promptly correct bulges, breakage, or other evidence of movement to ensure that excavation support and protection systems remain stable.

D. Promptly repair damages to adjacent facilities caused by installing excavation support and protection systems.

3.2 REMOVAL AND REPAIRS

A. Remove excavation support and protection systems when construction has progressed sufficiently to support excavation and bear soil and hydrostatic pressures. Remove in stages to avoid disturbing underlying soils or damaging structures, pavements, facilities, and utilities.

1. Remove excavation support and protection systems to a minimum depth of 48 inches below overlying construction and abandon remainder.
2. Repair or replace, as approved by Architect, adjacent work damaged or displaced by removing excavation support and protection systems.

B. Leave excavation support and protection systems permanently in place.

END OF SECTION 02260

SECTION 02300 - **EARTHWORK**

PART 1 - GENERAL

See *Geotechnical Engineering Report* provided at the end of this Section which takes precedence in all cases.

Rough and final grading, and the preparation of the Building and Concrete Paving Pad for finish grades as indicated on the Drawings shall be prepared and compacted by Contractor as part of the Work for this Project.

1.1 SUMMARY

A. This Section includes the following:

1. Preparing sub-grades for slabs-on-grade, walks, and pavements.
2. Excavating and backfilling for buildings and structures.
3. Drainage course for slabs-on-grade.
4. Sub-base course for concrete walks and pavements.
5. Excavating and backfilling for utility trenches.

1.2 DEFINITIONS

A. Backfill: Soil material used to fill an excavation.

1. Initial Backfill: Backfill placed beside and over pipe in a trench, including haunches to support sides of pipe.
2. Final Backfill: Backfill placed over initial backfill to fill a trench.

B. Base Course: Course placed between the sub-base course and hot-mix asphalt paving.

C. Bedding Course: Course placed over the excavated sub-grade in a trench before laying pipe.

D. Borrow Soil: Satisfactory soil imported from off-site for use as fill or backfill.

E. Drainage Course: Course supporting the slab-on-grade that also minimizes upward capillary flow of pore water.

F. Excavation: Removal of material encountered above sub-grade elevations and to lines and dimensions indicated.

1. Authorized Additional Excavation: Excavation below sub-grade elevations or beyond indicated lines and dimensions as directed by Architect. Authorized

additional excavation and replacement material will be paid for according to Contract provisions changes in the Work.

2. Unauthorized Excavation: Excavation below sub-grade elevations or beyond indicated lines and dimensions without direction by Architect. Unauthorized excavation, as well as remedial work directed by Architect, shall be without additional compensation.

G. Fill: Soil materials used to raise existing grades.

H. Structures: Buildings, footings, foundations, retaining walls, slabs, tanks, curbs, mechanical and electrical appurtenances, or other man-made stationary features constructed above or below the ground surface.

I. Sub-base Course: Course placed between the sub-grade and base course for hot-mix asphalt pavement, or course placed between the sub-grade and a cement concrete pavement or a cement concrete.

J. Sub-grade: Surface or elevation remaining after completing excavation, or top surface of a fill or backfill immediately below sub-base, drainage fill, or topsoil materials.

K. Utilities: On-site underground pipes, conduits, ducts, and cables, as well as underground services within buildings.

1.3 PROJECT SITE CONDITIONS

A. **Soils Report:** All procedures, recommendations and testing requirements shall take precedence.

1. Soils Report was provided by the RAMM to the Architect via City of Buckeye for design of this project entitled: ***Geotechnical Engineering Report, Kitchen Addition-Buckeye Community Center,*** *201 East Centre Avenue, Buckeye, AZ RAMM Project No. G26095*, dated November 26, 2019. Full Report is provided at the end of this Section 02300.

2. Neither the Owner or Architect guarantees the accuracy of the report nor the continuity of the soil conditions indicated at boring locations.

3. Portions of the Soil Report incorporated, either by reprint or reference, into these Specifications are those which relate to the quality of materials and workmanship and become a part of the Contract Documents. Quantities of excavation and fill materials shall be as required by actual conditions as depicted by the soil bearings presented in the Soil Report.

B. Existing Conditions:

1. Bidders are expected to visit the site to form their own conclusions as to the character of the Work under this Section.

C. Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted in writing by Owner and then only after arranging to provide temporary utility services according to requirements indicated.

1.4 QUALITY ASSURANCE

A. Regulatory Requirements: Comply with applicable Federal, State, and local ordinances, including Arizona Highway Department Standard Specifications and MAG Specifications. Where Geotechnical Report, General Structural notes, or Notes on Drawings state more restrictive requirements, the requirements of the Geotechnical Report, General Structural Notes, or Notes on Drawings shall govern.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. General: Provide borrow soil materials when sufficient satisfactory soil materials are not available from excavations.

B. Fill and Backfill Materials: In accordance with Soils Report.

C. Sub-base Material: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; with at least 90 percent passing a 1-1/2-inch sieve and not more than 12 percent passing a No. 200 sieve.

D. Base Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; with at least 95 percent passing a 1-1/2-inch sieve and not more than 8 percent passing a No. 200 sieve.

E. Engineered Fill: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; with at least 90 percent passing a 1-1/2-inch sieve and not more than 12 percent passing a No. 200 sieve.

F. Bedding Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; except with 100 percent passing a 1-inch sieve and not more than 8 percent passing a No. 200 sieve.

G. Drainage Course: Narrowly graded mixture of washed, crushed stone, or crushed or uncrushed gravel; ASTM D 448; coarse-aggregate grading Size 57; with 100 percent passing a 1-1/2-inch sieve and 0 to 5 percent passing a No. 8 s

PART 3- EXECUTION

3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by earthwork operations.

B. Preparation of sub-grade for earthwork operations including removal of vegetation, topsoil, debris, obstructions, and deleterious materials from ground surface is specified in Division 2 Section "Site Clearing."

3.2 EXCAVATION

A. Unclassified Excavation: Excavate to sub-grade elevations regardless of the character of surface and subsurface conditions encountered. Unclassified excavated materials may include rock, soil materials, and obstructions. No changes in the Contract Sum or the Contract Time will be authorized for rock excavation or removal of obstructions.

1. If excavated materials intended for fill and backfill include unsatisfactory soil materials and rock, replace with satisfactory soil materials.

3.3 EXCAVATION FOR STRUCTURES

A. Excavate to indicated elevations and dimensions within a tolerance of plus or minus 1 inch. If applicable, extend excavations a sufficient distance from structures for placing and removing concrete formwork, for installing services and other construction, and for inspections.

B. Excavations for Footings and Foundations: Do not disturb bottom of excavation. Excavate by hand to final grade just before placing concrete reinforcement. Trim bottoms to required lines and grades to leave solid base to receive other work.

3.4 EXCAVATION FOR WALKS AND PAVEMENTS

A. Excavate surfaces under walks and pavements to indicated lines, cross sections, elevations, and sub-grades.

3.5 EXCAVATION FOR UTILITY TRENCHES.

A. Excavate trenches to indicated gradients, lines, depths, and elevations.

B. Excavate trenches to uniform widths to provide the following clearance on each side of pipe or conduit. Excavate trench walls vertically from trench bottom to 12 inches higher than top of pipe or conduit, unless otherwise indicated.

1. Clearance: 12 inches each side of pipe or conduit

C. Trench Bottoms: Excavate and shape trench bottoms to provide uniform bearing and support of pipes and conduit. Shape sub-grade to provide continuous support for bells, joints, and barrels of pipes and for joints, fittings, and bodies of conduits. Remove projecting stones and sharp objects along trench sub-grade.

1. Excavate trenches 6 inches deeper than elevation required in rock or other unyielding bearing material, 4 inches deeper elsewhere, to allow for bedding course.

D. Compact sub-base and base course at optimum moisture content to required grades, lines, cross sections, and thickness to not less than **95** percent of maximum dry unit weight according to ASTM D 698.

3.6 UNAUTHORIZED EXCAVATION

A. Fill unauthorized excavation under foundations or wall footings by extending bottom elevation of concrete foundation or footing to excavation bottom, without altering top elevation. Lean concrete fill, with 28-day compressive strength of 2500 psi, may be used when approved by Architect.

B. Fill unauthorized excavations under other construction or utility pipe as directed by Architect.

3.7 STORAGE OF SOIL MATERIALS

A. Stockpile borrow soil materials and excavated satisfactory soil materials without intermixing. Place, grade, and shape stockpiles to drain surface water. Cover to prevent windblown dust.

1. Stockpile soil materials away from edge of excavations. Do not store within drip line of trees.

3.8 UTILITY TRENCH BACKFILL

A. Place backfill on sub-grades free of mud, frost, snow, or ice.

B. Place and compact bedding course on trench bottoms and where indicated. Shape bedding course to provide continuous support for bells, joints, and barrels of pipes and for joints, fittings, and bodies of conduits.

C. Backfill trenches excavated under footings and within 18 inches of bottom of footings with satisfactory soil; fill with concrete to elevation of bottom of footings. Concrete is specified in Division 3 Section Cast-in-Place Concrete.

D. Place and compact initial backfill of sub-base material or satisfactory soil, free of particles larger than 1 inch in any dimension, to a height of 12 inches over the utility pipe or conduit.

1. Carefully compact initial backfill under pipe haunches and compact evenly up on both sides and along the full length of utility piping or conduit to avoid damage or displacement of piping or conduit. Coordinate backfilling with utilities testing.

E. Place and compact final backfill of satisfactory soil to final sub-grade elevation.

3.9 SOIL FILL

A. Plow, scarify, bench, or break up sloped surfaces steeper than 1 vertical to 4 horizontal so fill material will bond with existing material.

B. Place and compact fill material in layers to required elevations as follows:

1. Under grass and planted areas, use satisfactory soil material.
2. Under walks and pavements, use satisfactory soil material.
3. Under steps and ramps, use engineered fill.
4. Under building slabs, use engineered fill.
5. Under footings and foundations, use engineered fill.

3.10 SOIL MOISTURE CONTROL

Provide in accordance with the Soils Investigation Report.

3.11 COMPACTION OF SOIL BACKFILLS AND FILLS

A. Place backfill and fill soil materials in layers not more than 6 inches in loose depth for material compacted by heavy compaction equipment. Place backfill and fill soil materials evenly on all sides of structures to required elevations, and uniformly along the full length of each structure.

B. Compact soil materials to not less than the following percentages of maximum dry density according to ASTM D 698.

1. Under structures, building slabs, steps, and pavements, scarify and re-compact per recommendations of Soils Investigation Report.
2. Under walkways, scarify and re-compact below sub-grade and compact each layer of backfill or fill soil material at percentage recommended by Soils Investigation Report.

3.12 GRADING

A. General: Uniformly grade areas to a smooth surface, free of irregular surface changes. Comply with compaction requirements and grade to cross sections, lines, and elevations indicated.

B. Site Grading: Slope grades to direct water away from buildings and to prevent ponding. Finish sub-grades to required elevations within the following tolerances:

1. Unpaved Areas: Plus or minus 1 inch.
2. Walks: Plus or minus 1 inch.
3. Pavements: Plus or minus 1/2 inch

G. Grading inside Building Lines: Finish sub-grade to a tolerance of 1/2 inch when tested with a 10-foot straightedge.

2.2 SUB-BASE AND BASE COURSES

A. Place sub-base and base course on sub-grades free of mud.

B. On prepared sub-grade, place sub-base and base course under pavements and walks as follows:

1. Shape sub-base and base course to required crown elevations and cross-slope grades.
2. Compact sub-base and base course at optimum moisture content to required grades, lines, cross sections, and thickness to not less than 95 percent of maximum dry unit weight according to ASTM D 698.

2.3 FIELD QUALITY CONTROL

A. Testing Agency: Contractor shall engage a qualified independent geotechnical engineering testing agency to perform field quality-control testing.

B. Allow testing agency to inspect and test sub-grades and each fill or backfill layer. Proceed with subsequent earthwork only after test results for previously completed work comply with requirements.

C. Footing Sub-grade: At footing sub-grades, at least one test of each soil stratum will be performed to verify design bearing capacities. Subsequent verification and approval of other footing sub-grades may be based on a visual comparison of sub-grade with tested sub-grade when approved by Architect.

D. Testing agency will test compaction of soils in place according to ASTM D 1556, ASTM D 2167, ASTM D 2922, and ASTM D 2937, as applicable.

E. When testing agency reports that sub-grades, fills, or backfills have not achieved degree of compaction specified, scarify and moisten or aerate, or remove and replace soil to depth required; re-compact and retest until specified compaction is obtained.

2.4 PROTECTION

A. Protecting Graded Areas: Protect newly graded areas from traffic, freezing, and erosion. Keep free of trash and debris.

B. Repair and reestablish grades to specified tolerances where completed or partially completed surfaces become eroded, rutted, settled, or where they lose compaction due to subsequent construction operations or weather conditions.

C. Where settling occurs before Project correction period elapses, remove finished surfacing, backfill with additional soil material, compact, and reconstruct surfacing.

1. Restore appearance, quality, and condition of finished surfacing to match adjacent work, and eliminate evidence of restoration to greatest extent possible.

2.5 DISPOSAL OF SURPLUS AND WASTE MATERIALS

A. Disposal: Remove surplus satisfactory soil and waste material, including unsatisfactory soil, trash, and debris, and legally dispose of it off Owner's property.

Subject: Geotechnical Engineering Report
Kitchen Addition – Buckeye Community Center
201 East Centre Avenue
Buckeye, Arizona

RAMM Project No. G26095

Attached to this letter is the Geotechnical Engineering Report for the proposed Kitchen Addition – Buckeye Community Center in Buckeye, Arizona.

The proposed development will consist of an approximately 1,800-square foot, single story addition to the southeast side of an existing building. The results of our field explorations; laboratory testing; and engineering analysis, evaluation and recommendations are presented in this report.

The following is a brief summary of selected recommendations.

A. Foundations:

- Support on undisturbed site soils and/or compacted fill.
- Found at least 2.0 feet or 2.5 feet below finished grade.
- Design for allowable bearing pressure of 2000 psf or 2500 psf, respectively.
- Foundation elements must extend through any existing fill and/or disturbed soils.

B. Site Soils:

- Use as fill and backfill in all areas of the site.

The attached report was prepared based on project and site data available at this time and was prepared in a manner and to the standards of the local geotechnical engineering practice. Our services did not include evaluations for the presence of hazardous materials; for concrete durability and corrosion potential with respect to on-site soils and site use water sources; for area subsidence resulting from groundwater withdrawal; or for other geologic hazards.

If you have any questions, please do not hesitate to call.

Respectfully submitted,

RICKER • ATKINSON • McBEE • MORMAN & ASSOCIATES, INC.

REPORT

INTRODUCTION

This report presents the results of our geotechnical engineering services for proposed Kitchen Addition – Buckeye Community Center in Buckeye, Arizona. The scope of our services included performing a field exploration program, laboratory analysis and geotechnical engineering evaluation, analysis and recommendations. The geotechnical recommendations presented herein consist of foundation design, site development, material suitability and requirements, and site preparation and grading procedures. We would be pleased to discuss with you any additional recommendations you may require. In addition, we are available to review project specifications and plans for conformance with our recommendations at no charge to you.

This firm should be notified for additional evaluation and recommendations should the building design parameters (location, type, sizes, structural loads), site use or conditions encountered during construction differ from those presented herein.

PROPOSED CONSTRUCTION

The proposed development will consist of an approximately 1,800-square-foot, single story addition of masonry and/or frame construction to the southeast side of an existing building. It is anticipated that maximum structural loads for the building addition will be on the order of 2 to 4 kips per linear foot for bearing walls and 10 to 40 kips for columns. The concrete slab-on-grade floor will be founded at existing floor grade in the adjacent existing building.

SITE CONDITIONS

The site of the proposed Kitchen Addition – Buckeye Community Center will be located at 201 East Centre Street in Buckeye, Arizona. At the time of our filed exploration the site was a relatively flat gravel surfaced area adjacent to a single story at-grade building and an attached partially below grade building. The site was devoid of vegetation.

FIELD EXPLORATIONS

Subsurface conditions at the site were explored by drilling Test Boring 1 to a depth of 30.0 feet in the addition area, at the location shown on the Site Plan in Appendix A. The test boring was drilled with a CME 75 drill rig using 7-inch diameter, hollow-stem augers. The drilling equipment and crew were provided by Wildcat Drilling, Inc. The test boring location was determined in the field by a field technician from our firm who also directed the drill crew. During the field explorations, representative undisturbed samples were obtained, the test boring logged, and soils field classified

Senior Center Kitchen - CDBG2101
Contract 2022012
GCON, Inc.
662

by our field technician. The relatively undisturbed samples (ring samples) were obtained by driving a 3-inch diameter, ring-lined, open-end sampler into the soil with a 140-pound hammer dropping 30 inches. In addition to drilling and sampling, continuous penetration testing using a 2-inch diameter rod and the 140-pound hammer dropping 30 inches was performed and extended to a depth of 7.0 feet adjacent to Test Boring 1. The results of the field explorations are presented on the Test Boring Logs in Appendix A.

LABORATORY ANALYSIS

Representative samples obtained during the field exploration were subjected to the following tests in our laboratory.

Type of Test	Type of Sample	Number of Samples Tested
Compression	Undisturbed	1
Swell	Remolded	1
Percent Passing No. 200 Sieve and Atterberg Limits	Representative	1
Moisture Content/Dry Density *	Undisturbed	4
Moisture Content *	Representative	1

* Reported in the Test Boring Logs

The results of the laboratory tests are presented in Appendix B.

SUBSURFACE CONDITIONS

The results of the test boring are presented in Appendix A in the Test Boring Logs. In general, the near surface soils encountered at Test Boring 1 and extending to a depth of 30.0 feet, consisted of sandy clay to clayey sand with trace amounts of gravel. These soils were firm to stiff and loose to medium dense, were stiff to very stiff and medium dense to dense below a depth of four feet. Soil moisture contents were described as damp to moist through the depths explored. No groundwater was observed in the test boring during the drilling operations.

DISCUSSION OF TEST RESULTS

A remolded sample of the surface soils from the site exhibited a low swell potential following wetting when tested in the laboratory. An undisturbed sample from anticipated foundation grades underwent slight compression during loading to approximate foundation loads. Upon wetting at approximate foundation loads these soils underwent some additional compression.

FOUNDATION DESIGN RECOMMENDATIONS

Spread Footings:

The proposed addition can be supported on shallow spread footings. The footings should be founded on undisturbed site soil and/or compacted fill. Footings thus founded may be designed using an allowable bearing pressure of 2000 psf or 2500 psf, provided the bottom of the footings are at least 2.0 feet or 2.5 feet, respectively, below finished grade. Finished grade is defined as the lowest adjacent finished grade within 5 feet of the perimeter of the foundation. New footings should be at the same depth as existing footings within two footing widths from the existing building. The new footings can then be stepped up or down to the recommended embedment depth. Temporary excavations adjacent to existing footings should not expose more than 8 feet of the existing footings at any one location. Foundation elements must extend through any fill and/or disturbed soils. Structural loads should not exceed 6 kips per linear foot for walls and 80 kips for columns. All footing excavations should be reviewed by a representative of the geotechnical engineer prior to placing reinforcing steel or concrete. Any fill, loose, disturbed or unstable soils should be removed from the bearing surface or the footing bottom extended through the fill zone.

The allowable bearing capacity should be applied to maximum, design dead plus live loads and may be increased by one-third when considering temporary loads such as transient wind or seismic loads. A one-third increase may also be used for toe pressures due to eccentric or lateral loadings, assuming the entire footing bearing surface remains in compression. The weight of the footing concrete below grade may be neglected in dead load computations. The recommended minimum footing widths are 2.0 and 1.33 feet for isolated columns and continuous wall footings, respectively. A Site Class designation of D should be used for the site per the 2012, 2015 and 2018 International Building Code (IBC). The soil profile and site class designations are based on site conditions and a review of available well holes within a one-mile radius of the site. This data was available on ADWR's website and indicated that stiff material exists to depths over 100 feet in the immediate vicinity of the site.

The estimated total and differential footing settlements for the loading conditions described above are less than ½ inch if soils below footing level remain at or below the construction moisture content. Additional post-construction, differential movements of equal magnitude could occur if bearing soils become wet after construction. Therefore, continuous footings and stem walls should be reinforced, and masonry walls constructed with properly designed reinforcement and with

Contract 2022012
GCON, Inc.

frequent expansion/contraction joints. Positive drainage away from the perimeter of the building is essential to minimize the potential for moisture infiltration into bearing soils.

Lateral Earth Pressures:

The following tabulation presents the recommended lateral earth pressures and base friction values which should be used in the lateral design of footings and retaining walls. The lateral pressures are equivalent fluid pressures for average anticipated conditions.

Backfill Pressures:
- Unrestrained walls ---------- 40 psf/ft
- Restrained walls ---------- 60 psf/ft

Passive Pressures:
- Continuous ---------- 250 psf/ft
- Isolated column footings ---------- 350 psf/ft

Coefficient of Base Friction:
- Concrete to soil ---------- 0.40
- Plastic membrane to soil ---------- 0.25

The above equivalent fluid pressures are for vertical walls with horizontal backfills and do not include temporary loads imposed by compaction equipment or permanent loads resulting from backfill swell pressures, hydrostatic pressures or surcharge loads. All retaining walls should contain weep holes to reduce the potential for the buildup of hydrostatic pressures.

SITE DEVELOPMENT RECOMMENDATIONS

Concrete Slab-On-Grade Support:

The near surface soils have medium plasticity, and when compacted and wetted, these soils exhibit a low swell potential. These soils may be used as fill in all areas of the site. Interior slabs should be founded on a minimum 4-inch thickness of base material. All unreinforced slabs-on-grade should be jointed in accordance with ACI (American Concrete Institute) or PCA (Portland Cement Association) guidelines.

Vapor retarders/barriers such as plastic membranes may be required in vapor-sensitive floor covering areas or in humidity controlled areas. Should plastic vapor retarders/barriers be used, the membrane should be at least 15 mil in thickness, have all seams and penetrations sealed per manufacturer's recommendations and should be placed in accordance with ACI 302.2R.

Surface Drainage:

Most soils will undergo some degree of volume change as the result of wetting. The degree of volume change will depend on the type of soil, swell potential, natural soils structure or degree of compaction (if a fill). These volume changes could result in movements in overlying buildings and non-structure elements including sidewalks, planters, retaining walls, floor slabs, etc. Therefore, good site and surface drainage away from these elements is required. In addition, water should not be allowed to pond within 10 feet of the buildings or other elements which are sensitive to movements. The exterior footing excavation backfill must be well compacted to minimize the possibility of moisture infiltration through this zone. All joints in the concrete floor slabs and at walls of the buildings must be sealed with flexible waterproof joint sealer.

Excavatability:

The excavatability of site materials is difficult to evaluate based only on the exploration equipment used during this project report. Therefore, we recommend that the contractor evaluate the excavatability of site materials by performing test excavations with the size and type of equipment the contractor plans on using at the site. For design purposes, the following paragraph presents our best analysis as to the excavatability of site soils.

The near surface and underlying soils to depths of at least 15 feet can probably be removed with conventional excavating equipment. OSHA requires all excavations over five feet in depth, in which personnel are to enter, be either braced or sloped in accordance with OSHA regulations.

Workability:

Wetting site soils such that moisture contents are at or above optimum could result in moderate to extensive soil pumping under dynamic loadings such as heavy construction equipment driving over the area. In building areas, some pumping is not detrimental to foundation or floor slabs provided the specified percent compaction is achieved. However, in building areas where severe pumping has damaged subgrade conditions, the area should be allowed to dry until soils are workable without pumping or the wetted areas removed and replaced with drier site soils.

MATERIALS SUITABILITY AND REQUIREMENTS

Site Soils:

The near surface soils exhibit medium plasticity and a low swell potential when compacted and wetted. These soils may be used as fill in all areas of the site. All materials should be free of organics, debris and material greater than 6 inches in size.

Imported Soils:

Imported soils required to raise the building above footing level or in exterior slab areas, or for use as retaining wall backfills, should meet the following requirements:

Minimum Percent Passing No. 4 Sieve ---------- 40%
Maximum Particle Size ----------4 inches
Maximum Swell Potential ----------1.5%*

* Based on a sample which is remolded to 95% of the ASTM D698 maximum dry density at a moisture content of 2 percent below optimum, placed under a surcharge load of 100 psf and wetted.

Imported soils should have a low corrosion potential as determined by a corrosion expert and/or material supplier and should meet ACI 318 negligible sulfate exposure durability requirements for concrete.

Base Material:

Base material used below concrete slabs should conform to the requirements of Maricopa Association of Governments (MAG) Specifications for Aggregate Base (Section 702).

SITE PREPARATION AND GRADING PROCEDURES

Building Addition:

Recommendations presented in the previous sections of this report are based upon the following site preparation and grading procedures. Therefore, all earthwork should be accomplished with observation and testing by a qualified technician under the direction of a registered geotechnical/ materials engineer. The following apply to the areas within and extending 5 feet beyond the footprint of the building addition and in exterior slab areas.

1. Clear and grub the site by removing and disposing of all vegetation in areas to be developed, any debris or rubble, and remnants of any former developments

2. Strip the site of all existing fill zones, fill piles, backfill zones and unstable soils. During stripping observe the surface for evidence of buried debris, vegetation or disturbed materials which will require additional removal. Areas steeper than 5H to 1V should be benched and any depressions widened to accommodate compaction equipment.

3. Prepare the ground surface in at-grade areas, in fill areas and in areas cut to grade by scarifying, moisture conditioning and compacting the exposed surface soils to a depth of 10 inches.

4. Moisture condition and place all fill and backfill materials required to achieve specified grades. Fill materials should be moisture conditioned, placed and compacted in horizontal lifts of thicknesses compatible with the compaction equipment being used.

5. Compact subgrade, fill, backfill, subbase fill or base material to the following minimum percent compaction of the ASTM D698 maximum dry density for each lift.

Material	Minimum Percent Compaction
Soil:	
Below foundations sections	95
Below concrete floor slabs and exterior slabs	90
Base Material:	
Below floor slabs	95
Backfill: *	90

* Outside of building, exterior slab areas.

6. The moisture content of soil and base materials at the time of compaction should be:

Type	Area of Use	Moisture Content
On-site	Addition, Exterior Slabs	Optimum plus or minus 3%
Imported	Addition, Exterior Slabs	Optimum plus or minus 3%
Base Material	Addition	Optimum plus or minus 3%

7. Any soils which are disturbed or overexcavated by the contractor outside the limits of the plans or specifications should be replaced with materials compacted as specified above. The above compaction requirements will also apply to any disturbance occurring within the construction limits, including but not limited to backfilling of trenches inside and outside of the building pad.

APPENDIX B
LABORATORY ANALYSIS

LABORATORY TEST RESULTS

Date: 11-Nov-19

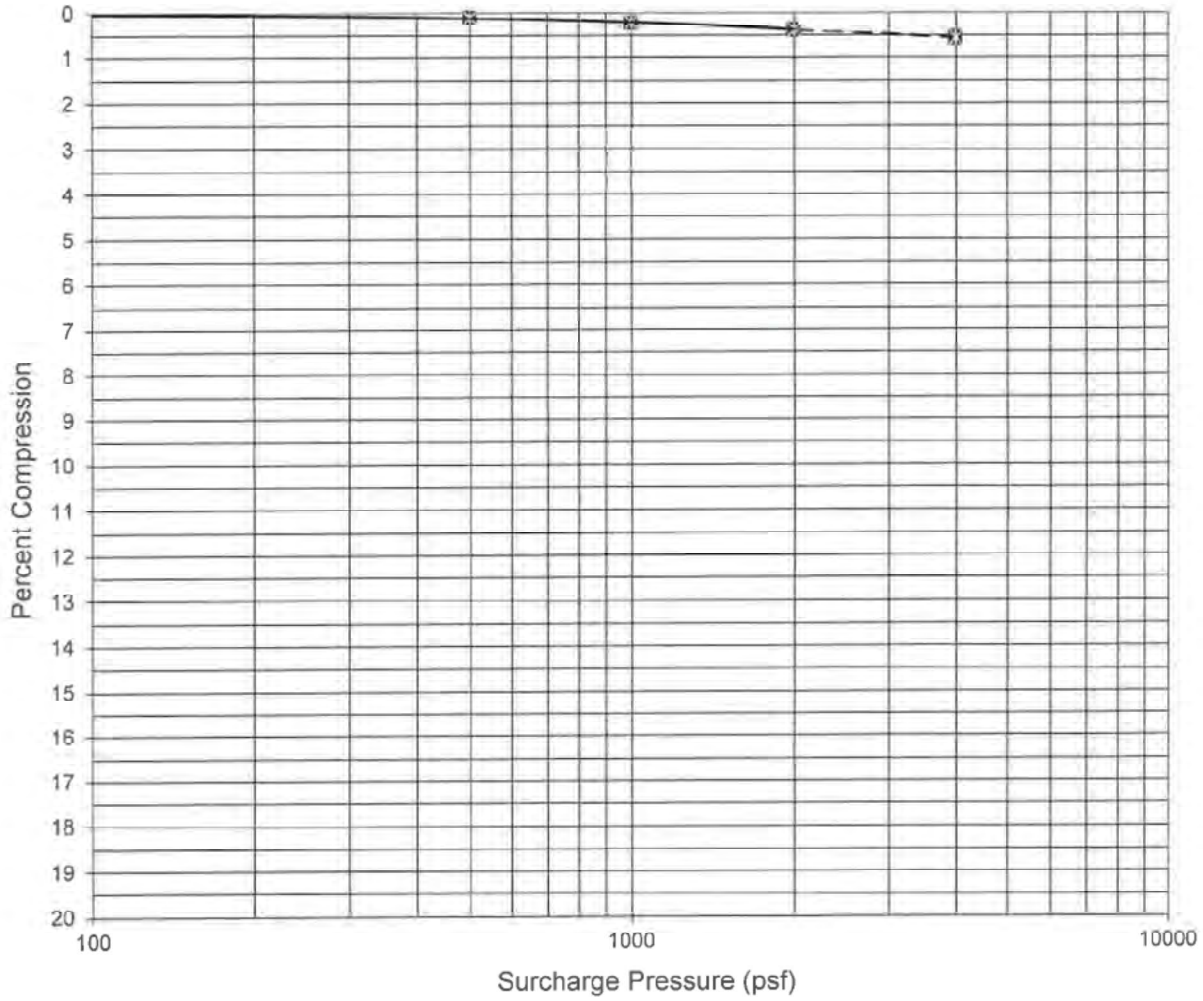
SAMPLE SOURCE: 1 @ 1.5'-2.5'

TESTING PERFORMED: Compression (ASTM D2435) - Driven Ring Sample

SAMPLED BY: RAMM/Durot

RESULTS:

Dry Density (pcf): 103 Moisture Content (%): 12



REMARKS: Sample submerged at 2000 psf.

LABORATORY TEST RESULTS

Date: 11-Nov-19

SAMPLE SOURCE: As noted below

TESTING PERFORMED: Percent Passing No. 200 Sieve, Atterberg Limits, Percent Expansion (ASTM D1140, D4318, D4546)

SAMPLED BY: RAMM/Durot

RESULTS:

Sample Source	Percent Retained No. 4 Sieve	Percent Passing No. 200 Sieve	Liquid Limit	Plasticity Index	Percent Expansion*	Remolded Dry Density (pcf)	Remolded Moisture Content (%)
1 @ 0'-3'	1	55	36	20	1.5	114	13

* Based upon sample remolded to 95% of the estimated maximum dry density at 2% below the estimated optimum moisture content, with a surcharge pressure of 100 psf.

SECTION 02361 - **TERMITE CONTROL**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Soil treatment with termiticide under new concrete slabs and foundations and all other locations where concrete removal is required for new work.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated. Include the EPA-Registered Label for termiticide products.

B. Product certificates.

C. Soil Treatment Application Report: Include the following:

1. Date and time of application.
2. Moisture content of soil before application.
3. Termiticide brand name and manufacturer.
4. Quantity of undiluted termiticide used.
5. Dilutions, methods, volumes used, and rates of application.
6. Areas of application.
7. Water source for application.

D. Warranties: Sample of special warranties.

1.3 QUALITY ASSURANCE

A. Installer Qualifications: A specialist who is licensed according to regulations of authorities having jurisdiction to apply termite control treatment and products in jurisdiction where Project is located and who employs workers trained and approved by manufacturer to install manufacturer's products.

B. Regulatory Requirements: Formulate and apply termiticides and termiticide devices according to the EPA-Registered Label.

1.4 PROJECT CONDITIONS

A. Environmental Limitations: To ensure penetration, do not treat soil that is water saturated or frozen. Do not treat soil while precipitation is occurring. Comply with

requirements of the EPA-Registered Label and requirements of authorities having jurisdiction.

B. Coordinate soil treatment application with excavating, filling, grading, and concreting operations. Treat soil under footings, grade beams, and ground-supported slabs before construction.

1.5 WARRANTY

A. Soil Treatment Special Warranty: Manufacturer's standard form, signed by Applicator and Contractor, certifying that termite control work, consisting of applied soil termiticide treatment, will prevent infestation of subterranean termites. If subterranean termite activity or damage is discovered during warranty period, re-treat soil and repair or replace damage caused by termite infestation.

1. Warranty Period: Ten years from date of Substantial Completion.

1.6 MAINTENANCE SERVICE

A. Continuing Service: Beginning at Substantial Completion, provide 12 months' continuing service including monitoring, inspection, and re-treatment for occurrences of termite activity. Provide a standard continuing service agreement. State services, obligations, conditions, terms for agreement period, and terms for future renewal options.

PART 2 - PRODUCTS

2.1 SOIL TREATMENT

A. Termiticide: Provide an EPA-Registered termiticide, complying with requirements of authorities having jurisdiction, in an aqueous solution formulated to prevent termite infestation. Provide quantity required for application at the label volume and rate for the maximum termiticide concentration allowed for each specific use, according to product's EPA-Registered Label.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work shall be the following:

a. BASF Corporation, Agricultural Products; **Termidor SL**.

2. Service Life of Treatment: Soil treatment termiticide that is effective for not less than ten years against infestation of subterranean termites.

PART 3 - EXECUTION

3.1 APPLICATION, GENERAL

A. General: Comply with the most stringent requirements of authorities having jurisdiction and with manufacturer's EPA-Registered Label for products.

3.2 APPLYING SOIL TREATMENT

A. Examine substrates, areas, and conditions, with Applicator present, for compliance with requirements for moisture content of soil per termiticide label requirements, interfaces with earthwork, slab and foundation work, landscaping, utility installation, and other conditions affecting performance of termite control.

B. Proceed with application only after unsatisfactory conditions have been corrected.

C. Soil Treatment Preparation: Remove foreign matter and impermeable soil materials that could decrease treatment effectiveness on areas to be treated. Loosen, rake, and level soil to be treated except previously compacted areas under slabs and footings. Termiticides may be applied before placing compacted fill under slabs if recommended in writing by termiticide manufacturer.

1. Fit filling hose connected to water source at the site with a backflow preventer, complying with requirements of authorities having jurisdiction.

D. Application: Mix soil treatment termiticide solution to a uniform consistency. Provide quantity required for application at the label volume and rate for the maximum specified concentration of termiticide, according to manufacturer's EPA-Registered Label, to the following so that a continuous horizontal and vertical termiticidal barrier or treated zone is established around and under building construction. Distribute treatment evenly.

1. Slabs-on-Grade: Under ground-supported slab construction, including footings, building slabs, and attached slabs as an overall treatment. Treat soil materials before concrete footings and slabs are placed.
2. Foundations: Adjacent soil, including soil along the entire inside perimeter of foundation walls; along both sides of interior partition walls; around plumbing pipes and electric conduit penetrating the slab; around interior column footers, piers, and chimney bases; and along the entire outside perimeter, from grade to bottom of footing. Avoid soil washout around footings.
3. Penetrations: At expansion joints, control joints, and areas where slabs will be penetrated.

E. Avoid disturbance of treated soil after application. Keep off treated areas until completely dry.

F. Protect termiticide solution, dispersed in treated soils and fills, from being diluted until ground-supported slabs are installed. Use waterproof barrier according to EPA-Registered Label instructions.

G. Post warning signs in areas of application.

H. Reapply soil treatment solution to areas disturbed by subsequent excavation, grading, landscaping, or other construction activities following application.

END OF SECTION 02361

SECTION 02741 - **HOT-MIX ASPHALT PAVING**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes hot-mix asphalt paving, patching, and paving overlay.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated. Include technical data and tested physical and performance properties.

B. Job-Mix Designs: Certification, by authorities having jurisdiction, of approval of each job mix proposed for the Work.

C. Material certificates.

1.3 QUALITY ASSURANCE

A. Manufacturer Qualifications: Manufacturer shall be registered with and approved by authorities having jurisdiction or the DOT of the State in which Project is located.

B. Regulatory Requirements: Comply with **MAG standards** asphalt paving work.

C. Asphalt-Paving Publication: Comply with AI MS-22, "Construction of Hot Mix Asphalt Pavements," unless more stringent requirements are indicated.

1.4 PROJECT CONDITIONS

A. Environmental Limitations: Do not apply asphalt materials if subgrade is wet or excessively damp or if the following conditions are not met:

1. Tack Coat: Minimum surface temperature of 60 deg F and conforming to MAG Section 321.
2. Asphalt Base Course: Minimum surface temperature of 40 deg F and rising at time of placement.
3. Asphalt Surface Course: Minimum surface temperature of 60 deg F at time of placement.

B. Pavement-Marking Paint: Proceed with pavement marking only on clean, dry surfaces and at a minimum ambient or surface temperature of 40 deg F for oil-based materials, 50 deg F for water-based materials, and not exceeding 95 deg F.

PART 2 - PRODUCTS

2.1 AGGREGATES

A. Coarse Aggregate: ASTM D 692, sound; angular crushed stone, crushed gravel, or properly cured, crushed blast-furnace slag conforming to MAG Sections 310 & 702.

B. Fine Aggregate: ASTM D 1073, sharp-edged natural sand or sand prepared from stone, gravel, properly cured blast-furnace slag, or combinations thereof.

2.2 ASPHALT MATERIALS

A. Asphalt Binder: ASTM D2026, Grade MC-70 or MC-250 liquid asphalt, meeting requirements of Section 712 of MAG Specifications.

B. Tack Coat: Mixing type emulsion SS-I-H, as specified in MAG Section 713, diluted in proportion to approximately 50 percent water and 50% emulsion. See MAG 321.

C. Asphaltic Concrete Paving:

1. Refer to MAG 710.

2. Asphalt concrete shall be Type c-3/4 single course mix. Percentage asphalt range: 5.0-6.0

3. When test procedures determine aggregate is subject to stripping, add dry hydrated lime conforming the the requirements of ASTM C207, Type, N; Portland cement conforming to Section 725 of MAG Specifications; or other approved anti-strip agent.

D. Composition and Grading: Comply with MAG Section 710.3. Aggregates and mix to be incorporated into Work shall show loss in I. A. Rattler ASTM C131 after 500 revolutions of 40% max.

E. Surface Seal Coat:

1. Emulsified Asphalt: Provide emulsified asphalt Grade SS-1h as specified in MAG Section 713, diluted with a minimum one part water to one part of emulsified asphalt.

2. Sand Blotter: In accordance with the following sieve analysis:

a. 3/8 inch: 100%

b. No.4: 905-100%

c. No.200: 0-12%

2.3 AUXILIARY MATERIALS

A. Herbicide: Commercial chemical for weed control, registered by the EPA. Provide in granular, liquid, or wetable powder form.

B. Pavement-Marking Paint:

1. Colors: White, Yellow, Blue, and As indicated.

2. Manufacturers:

a. Traffic Surface Paint: Provide one of the following or as approved.

1). Dunn-Edwards: Vin-L-Stripe W8D1 Series acrylic latex.

2). Sherwin-Williams: Acrylic Waterborne Traffic Marking Paint.

3). ICI Dulux: 22683 (white), 22685 (yellow), 26564 (red), or 20090 (handicap blue). ICI Performance Coatings waterborne traffic paint.

4). Frazee: 502 Traffic Line Paint- Acrylic.

5). Pervo: 3080 (white), 3082 (yellow), 3083 (green) or 3084 (black) Waterborne Traffic Coating and 3033 Daek handicap Blue Traffic Line Paint-Waterborne.

C. Wheel Stops: Precast, air-entrained concrete, 2500-psi minimum compressive strength, 4-1/2 inches high by 9 inches wide by 72 inches long. Provide chamfered corners and drainage slots on underside and holes for anchoring to substrate.

1. Dowels: Galvanized steel, 3/4-inch diameter, 10-inch minimum length.

2.4 MIXES

A. Hot-Mix Asphalt: Dense, hot-laid, hot-mix asphalt plant mixes per **MAG Section 710.**

1. Provide mixes with a history of satisfactory performance in geographical area where Project is located.
2. Base Course: Per Soils Report Recommendations.
3. Surface Course: Per Soils Report Recommendations.

PART 3 - EXECUTION

3.1 PATCHING

A. Hot-Mix Asphalt Pavement: Saw cut perimeter of patch and excavate existing pavement section to sound base. Excavate rectangular or trapezoidal patches, extending 12 inches (300 mm) into adjacent sound pavement, unless otherwise

indicated. Cut excavation faces vertically. Remove excavated material. Recompact existing unbound-aggregate base course to form new subgrade.

B. Tack Coat: Apply uniformly to vertical surfaces abutting or projecting into new, hot-mix asphalt paving at a rate of 0.05 to 0.15 gal./sq. yd.

C. Patching: Fill excavated pavements with hot-mix asphalt base mix and, while still hot, compact flush with adjacent surface.

3.2 SURFACE PREPARATION

A. Backfill curbs prior to paving.

B. Base Preparation: Comply with MAG Section 321.5.1.

3.3 HOT-MIX ASPHALT PLACING

A. Asphalt Prime Coat:

1. Comply with requirements of MAG Section 315.

2. Apply to aggregate base course, concrete surfaces joined by asphaltic paving such as concrete curbs and existing paving at cut edges.

3. Apply at a rate of 0.35 gallons minimum and 0.4 gallons maximum per square yard.

4. Prime coat to penetrate into aggregate base and be free of puddles before paving operations begin.

B. Tack Coat:

1. Apply tack coat to vertical surfaces of existing paving, curbs, gutters and construction joints, against which additional material is to be placed, to a new or old pavement to be overlaid, and to other surfaces as designated by Architect.

2. Tack coat to be slow setting type emulsion as specified. If emulsion is applied undiluted, apply at a rate of 0.02 to0.10 gallons per square yard; if emulsion is applied diluted 1:1 with water, apply at a rate of 0.05 to0.10 gallons per square yard.

3. Clean surfaces of loose and foreign material prior to application of tack coats.

C. Asphaltic Concrete:

1. Construct asphalt pavement in accordance with applicable requirements of MAG Section 321.

2. **Place asphaltic concrete in 3 inch thickness over 8 inch compacted fill.**

3. If pavement is constructed in lifts using asphalt concrete base in the first lifts, base to be thoroughly cleaned by whatever means necessary prior to application of tack coat and placement of surface layer.

D. Compaction: Comply with requirements of MAG Section 321.5.4

1. Compact asphalt concrete surfacing to a density of 95% of 75 blows (ASTM D1559).

2. Measure asphalt density by means of a nuclear density gauge, or core testing. Nuclear gauge method is preferred.

E Upon completion, pavement surface to be smooth dense and of uniform texture and appearance.

1. All areas to properly drain and be free of standing water. Compacted thickness to be not less than ¼ inch to that shown on Drawings.

2. Finished surface not to vary more than ¼ inch in 25 foot distance as determined by a straight-edge placed ion any position on finish surface, except across flow lines.

F. Corrective Requirements for Deficiencies: Comply with MAG Section 321.6.

G. Paving Termination:

1. Provide thickened edge at paving terminations that do not have wood header forms of concrete curbs.

2. Pavement termination to be minimum 12 inches wide X 8 inches deep or as shown on Drawings.

H Surface Seal Coat: Comply with MAG Section 334.

1. Preparation of Surfaces:

a. Immediately before applying emulsion, clean area to be surfaces of dirt and loose material by means of power brooms, supplemented by hand brooms if necessary, except when the fog seal is applied within 24 hours from the time the bituminous paving is completed.

b. Do not apply seal coat until an inspection of surfaces has been made by the City Construction Manager and/or Quality Control Manager and it is deemed that surfaces are suitable for application of emulsion.

2. Application of Asphalt Emulsions:

a. Mix diluted material well before applying.

b. Apply by distributor truck equipped with fog nozzles at approximate rate of 0.10 gallon per square yard.

c. Distributor truck shall comply with MAG Section 712.

3. Sand Blotter:

a. After asphalt emulsion has cured to such an extent that emulsion will not be picked up by traffic, apply sand blotter as directed or required by Architect where there is an excess of asphalt.

b. After treated area has been opened to traffic, immediately cover excess asphalt emulsion which comes to surface with additional sand.

3.4 PAVEMENT MARKING

A. Do not apply pavement-marking paint until layout, colors, and placement have been verified with Architect.

B. Allow paving to age for 30 days before starting pavement marking.

C. Sweep and clean surface to eliminate loose material and dust.

D. Apply paint with mechanical equipment to produce pavement markings, of dimensions indicated, with uniform, straight edges. Apply at manufacturer's recommended rates to provide a minimum wet film thickness of 15 mils.

1. Broadcast glass spheres uniformly into wet pavement markings at a rate of 6 lb/gal.

3.5 WHEEL STOPS

A. Securely attach wheel stops into pavement with not less than two galvanized steel dowels embedded at one-quarter to one-third points. Securely install dowels into pavement and bond to wheel stop. Recess head of dowel beneath top of wheel stop.

3.6 FIELD QUALITY CONTROL

A. Smoothness Tests:
1. Finished surface to be smooth and finished to specified grade. Cut out and replace any spots deficient in thickness with fresh mixture which is properly bonded to existing pavement.
2. test conformance to crown and grade of pavement as directed by Architect. Immediately after initial rolling, correct variations by adding or removing material as required.
3. After final rolling, retest surface and correct irregularities in excess of specified tolerance by removing defective Work and replacing with new material.

4. Furnish at least one 25-foot straight-edge, true to line for its entire length.

END OF SECTION 02741

SECTION 02751 - **CONCRETE PAVEMENT & SLABS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes exterior cement concrete pavement for the following:

1. Exterior Walkways & Finished Concrete Flatwork.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Design Mixtures: For each concrete pavement mixture.

1.3 QUALITY ASSURANCE

A. Manufacturer Qualifications: Manufacturer of ready-mixed concrete products who complies with ASTM C 94/C 94M requirements for production facilities and equipment.

B. ACI Publications: Comply with ACI 301, "Specification for Structural Concrete," unless modified by requirements in the Contract Documents.

C. Comply with applicable Federal, State, and local ordinances. Where Geotechnical (Soils) Report, General Structural Notes, or notes on Drawings state more restrictive requirements, they shall govern.

PART 2 - PRODUCTS

2.1 STEEL REINFORCEMENT

A. Plain-Steel Welded Wire Reinforcement: ASTM A 185, fabricated from as-drawn steel wire into flat sheets.

B. Deformed-Steel Welded Wire Reinforcement: ASTM A 497, flat sheet.

C. Reinforcing Bars: ASTM A 615/A 615M, Grade 60 deformed.

D. Plain Steel Wire: ASTM A 82, as drawn.

E. Deformed-Steel Wire: ASTM A 496.

F. Bar Supports: Bolsters, chairs, spacers, and other devices for spacing, supporting, and fastening reinforcing bars, welded wire reinforcement, and dowels in place. Manufacture bar supports according to CRSI's "Manual of Standard Practice."

2.2 CONCRETE MATERIALS

A. Expansion Joint Filler: MAG Section 729 or equal.

B. Epoxy Resin: Sta-Crete Epoxy Resin no. 15-J or 20.

C. Curing Compound: ASTM C309, Type 1, Class B: Acrylic type.

2.3 CONCRETE MIXING

A. Ready-Mixed Concrete: Measure, batch, and mix concrete materials and concrete according to ASTM C 94/C 94M and/or ASTM C 1116. Furnish batch certificates for each batch discharged and used in the Work.

2.4 SUB-BASE

A. Engineered Fill: Provide 4 inches of Engineered Fill under all concrete flatwork.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Proof-roll prepared sub-base surface below concrete pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding.

3.2 EDGE FORMS AND SCREED CONSTRUCTION

A. Set, brace, and secure edge forms, bulkheads, and intermediate screed guides for pavement to required lines, grades, and elevations. Install forms to allow continuous progress of work and so forms can remain in place at least 24 hours after concrete placement.

B. Clean forms after each use and coat with form-release agent to ensure separation from concrete without damage.

3.3 STEEL REINFORCEMENT

A. General: Comply with CRSI's "Manual of Standard Practice" for fabricating, placing, and supporting reinforcement.

3.4 JOINTS

A. General: Form construction, isolation, and contraction joints and tool edgings true to line with faces perpendicular to surface plane of concrete. Construct transverse joints at right angles to centerline, unless otherwise indicated.

B. Construction Joints: Set construction joints at side and end terminations of pavement and at locations where pavement operations are stopped for more than one-half hour unless pavement terminates at isolation joints.

C. Isolation Joints: Form isolation joints of preformed joint-filler strips abutting concrete curbs, catch basins, manholes, inlets, structures, walks, other fixed objects, and where indicated.

D. Contraction Joints: Form weakened-plane contraction joints, sectioning concrete into areas as indicated. Construct contraction joints for a depth equal to at least one-fourth of the concrete thickness to match jointing of existing adjacent concrete pavement.

E. Edging: Tool edges of pavement, gutters, curbs, and joints in concrete after initial floating with an edging tool to a 3/8-inch radius. Repeat tooling of edges after applying surface finishes. Eliminate tool marks on concrete surfaces.

3.5 CONCRETE PLACEMENT

A. Moisten sub-base to provide a uniform dampened condition at time concrete is placed.

B. Comply with ACI 301 requirements for measuring, mixing, transporting, and placing concrete.

C. Deposit and spread concrete in a continuous operation between transverse joints. Do not push or drag concrete into place or use vibrators to move concrete into place.

D. Screed pavement surfaces with a straightedge and strike off.

E. Commence initial floating using bull floats or darbies to impart an open textured and uniform surface plane before excess moisture or bleed water appears on the surface. Do not further disturb concrete surfaces before beginning finishing operations or spreading surface treatments.

3.6 FLOAT FINISHING

A. General: Do not add water to concrete surfaces during finishing operations. Initial floating operation is included in "Concrete Placement" Article.

B. Exterior Walkway Float Finish: Begin the second floating operation when bleed-water sheen has disappeared, and concrete surface has stiffened sufficiently to permit operations. Float surface with power-driven floats, or by hand floating if area is small or inaccessible to power units. Finish surfaces to true planes. Cut down high spots and fill low spots. Re-float surface immediately to uniform granular texture.
   1. Finish: Medium-to-Coarse-Textured Broom Finish: Provide a coarse finish by striating float-finished concrete surface 1/16 to 1/8 inch deep with a stiff-bristled broom, perpendicular to line of traffic.

3.7 CONCRETE PROTECTION AND CURING

A. General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures.

B. Comply with ACI 306.1 for cold-weather protection.

C. Evaporation Retarder: Apply evaporation retarder to concrete surfaces if hot, dry, or windy conditions cause moisture loss approaching 0.2 lb/sq. ft. x h before and during finishing operations. Apply according to manufacturer's written instructions after placing, screeding, and bull floating or darbying concrete, but before float finishing.

D. Begin curing after finishing concrete but not before free water has disappeared from concrete surface.

E. Curing Methods: Cure concrete by moisture curing.

3.8 PAVEMENT TOLERANCES

A. Comply with tolerances of ACI 117 and as follows:

   1. Elevation: 1/4 inch.
   2. Thickness: Plus 3/8 inch, minus 1/4 inch.
   3. Surface: Gap below 10-foot long, unleveled straightedge not to exceed 1/4 inch
   4. Joint Spacing: 3 inches
   5. Contraction Joint Depth: Plus 1/4 inch, no minus.
   6. Joint Width: Plus 1/8 inch, no minus.

3.9 REPAIRS AND PROTECTION

A. Remove and replace concrete pavement that is broken, damaged, or defective or that does not comply with requirements in this Section.

B. Protect concrete from damage. Exclude traffic from pavement for at least 14 days after placement.

C. Maintain concrete pavement free of stains, discoloration, dirt, and other foreign material. Sweep concrete pavement not more than two days before date scheduled for Substantial Completion inspections.

END OF SECTION 02751

SECTION 02764 - **PAVEMENT JOINT SEALANTS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Expansion and contraction joints within cement concrete pavement and adjacent to new foundations and where new concrete expansion joints are noted on the Drawings.

PART 2 - PRODUCTS

2.1 MATERIALS, GENERAL

A. Compatibility: Provide joint sealants, backing materials, and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by joint-sealant manufacturer based on testing and field experience.

B. Colors of Exposed Joint Sealants: **Gray to match concrete flatwork**.

2.2 JOINT-SEALANT BACKER MATERIALS

A. General: Provide joint-sealant backer materials that are non-staining; are compatible with joint substrates, sealants, primers, and other joint fillers; and are approved for applications indicated by joint-sealant manufacturer based on field experience and laboratory testing.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants to comply with joint-sealant manufacturer's written instructions.

B. Joint Priming: Prime joint substrates where indicated or where recommended in writing by joint-sealant manufacturer, based on pre-construction joint-sealant-substrate tests or prior experience.

C. Sealant Installation Standard: Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

D. Install backer materials to support sealants during application and at position required to produce optimum sealant movement capability. Do not leave gaps between ends of backer materials. Do not stretch, twist, puncture, or tear backer materials. Remove absorbent backer materials that have become wet before sealant application and replace them with dry materials.

E. Install sealants at the same time backings are installed to completely fill recesses provided for each joint configuration and to produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum sealant movement capability.

F. Tooling of Non-sag Sealants: Immediately after sealant application and before skinning or curing begins, tool sealants to form smooth, uniform beads of configuration indicated; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint.

G. Clean off excess sealants or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved by manufacturers of joint sealants and of products in which joints occur.

END OF SECTION 02764

SECTION 02810 – **IRRIGATION SYSTEM**

Except as otherwise required in these specifications, construction of this project shall be in accordance with all applicable Maricopa Association of Governments (M.A.G.) Uniform Standard Specifications and any City of Buckeye Supplemental Specifications and Details, as applicable.

PART 1 - GENERAL

1.01 SCOPE OF WORK

A. The work consists of installing a complete underground irrigation system for all landscaped areas as shown on the drawings and as hereinafter specified, including the furnishing of all labor, equipment, appliances, and materials including water and in performing all operation in connection with the construction of the landscape irrigation system. Work shall include furnishing and installing all plastic and copper pipe and fittings, automatic control valves, valve access boxes, electric controllers, electric wire, as required for a complete system as shown on the drawings and as called for in these specifications or as may be required for proper operation of the system. The Contractor is responsible for all costs of water used in connection with the installation of the irrigation system. The final grade shall be completed and shall have been approved by the Town of Buckeye Representative or Landscape Architect before the contractor starts the irrigation layout.

B. Whenever any material is specified by name and/or number thereof, such specifications shall be deemed to be used for the purpose of facilitating a description of the materials and establishing quality, and shall be deemed and construed to be followed by the words "or approved equal". No substitutions will be permitted which have not been submitted for approval prior to bidding.

C. All materials shall be new and the best of their class and kind. Sufficient descriptive literature and samples must be furnished for any materials submitted for "approved equal".

D. Irrigation lines shown on the drawings are essentially diagrammatic. Actual locations of all heads, valves, piping, wiring, etc., shall be established by the Contractor at the time of construction with the approval of the City of Buckeye Representative.

E. Unless otherwise specified or indicated on the drawings, the construction of the irrigation system shall include the furnishing, installing and testing of all mains, laterals, risers, and fittings, the furnishing and installing of irrigation heads, control valves, controllers, low and high voltage electric wire, controls, sleeving, restoration of existing improvements, excavation and backfill, and all other work in accordance with the plans and specifications as required for a complete system.

1.02 SUBMITTALS

A. Prepare "as-built" drawings on Field Set Documents which show deviations from the bid documents made during construction which affect mainline pipe, controller locations, remote control valves, quick coupling valves, and emitters. Drawings shall indicate size, material, and manufacturer's name and catalog number. Drawings shall be delivered to the City of Buckeye Representative before final acceptance of work.

Provide the Owner with the following, in addition to what is shown on the drawings:
1. Manufacturer's operating and maintenance instructions.
2. Project record drawings of the system.
3. Schedule showing the length of time each valve is to be open to produce a given amount of precipitation.
4. Six extra emitters of each size and type.
5. Two valve keys for manual valves.
6. Wrench for removing and installing each type head.
7. A permanent identification of valve stations and areas irrigated on the 8½" x 11" chart to be placed on the inside door to the appropriate controller. The chart shall be plasticized and sealed for permanency. Xerox reduction of print, sealed in plastic will be acceptable.
8. Two valve keys for mainline gate valves, when mainline gate valves are required, per plans.

1.03 COORDINATION

A. Review installation procedures under other sections and coordinate the installation of items that must be installed with the irrigation system. These items may include, but are not limited to; electrical conduit and sleeves for piping under paving.

B. Contractor is not to begin this section until the landscape grading is complete; and he has called for and obtained 'Blue Stake' information.

PART 2 - MATERIALS

2.01 GENERAL

A. Unless otherwise specified or shown on the drawings, the construction of irrigation lines and installation of control wiring shall include excavation and backfill, the furnishings, installing and testing of irrigation pipe and fittings, and the removal and/or restoration of existing improvements and all other work in accordance with the Plans and Specifications.

2.02 PLASTIC PIPE LINES

A. Plastic pipe shall be rigid un-plasticized PVC - Type I, 1120-1120 extruded from virgin parent material of the type specified on the drawings. The pipe shall be homogeneous throughout and free from visible cracks, holes, foreign materials, blisters, deleterious wrinkles, and dents. Plastic pipe shall be as manufactured by CertainTeed, Johns-Mansville, Pacific Western, A.S.C., or approved equal. Contractor shall make provisions for storing all irrigation PVC pipe out of sunlight throughout the installation period of the irrigation system.

2.03 IDENTIFICATION

A. All pipe shall be continuously and permanently marked with the following information: Manufacturer's name or trademark, size, schedule, and type of pipe, working pressure at 73 degrees F. and National Sanitation Foundation approval (N.S.F.).

B. All piping shall be purple in color to identify the use of reclaimed water.

2.04 DELIVERY

A. Plastic pipe shall be delivered to the site in unbroken bundles or rolls, packaged in such a manner as to provide adequate protection for the pipe ends, either threaded or plain.

2.05 EMITTERS

A. The work under this item consists of furnishing and installing the emitter assemblies, single outlet, and multi outlet, at the locations designated and in accordance with the details shown on the project plans and the manufacturer's recommendations. Irrigation emitter layout shall be approved by the Town of Buckeye Representative or Landscape Architect prior to installation.

2.06 TURF SPRINKLERS- ROTARY

A. The sprinkler shall be of the gear-driven, rotary type. The sprinkler shall have radius adjustment capabilities by means of a stainless-steel nozzle retainer/radius adjustment screw.

B. The sprinkler shall be available in both full-circle and adjustable part-circle configurations. The adjustable part circle unit shall be minutely adjustable from 40° to 360°. The adjustable unit shall be adjustable in all phases of installation (i.e., before installation, after installation while static, and after installation while in operation).

C. The sprinkler shall have a rubber cover firmly attached to the top of the sprinkler riser. When specified, the sprinkler shall have a cover molded of purple Alcryn rubber to indicate the use of reclaimed water. The sprinkler shall be equipped with a drain check valve to prevent low head drainage, and be capable of checking up to 10 feet (3.0 m) in elevation change. The unit shall have a 3/4-inch Female National Pipe Thread (FNPT) inlet. The sprinkler shall be serviceable after installation in the field by unscrewing the body cap, removing the riser assembly, and extracting the inlet filter screen.

D. The body and riser of the sprinkler shall be constructed of corrosion resistant, impact resistant, heavy-duty A.B.S. It shall have a stainless steel spring for positive retraction of the riser when irrigation is complete. When specified, the 4 and 6-inch models shall have the riser and nozzle-turret assembly encased in stainless steel.

2.07 TURF SPRINKLERS- SPRAY

A. The sprinkler shall be available with a 6-inch pop-up stroke, depending on the body specified, to bring the nozzle into a clean environment. The sprinkler shall have the option of either a factory-installed or field-installed drain check valve capable of checking up to 10 feet (3.0 m) in elevation change. When specified as factory-installed, the sprinkler shall have the words “CHECK VALVE” stamped in white lettering on the body cap. The sprinkler shall have available an optional, snap-on cap, molded in purple alcryn rubber, or a replacement body cap, molded in purple to indicate the use of reclaimed water.

B. The sprinkler shall have a standard pressure-regulating device as an integral part of the pop-up riser. This regulator will prevent fogging or misting of the nozzle spray pattern by maintaining a constant nozzle outlet pressure of 30 PSI with inlet pressures of up to 100 PSI, regardless of the nozzle installed.

The body of the sprinkler shall be constructed of corrosion and UV-resistant, heavy-duty A.B.S. The riser of the sprinkler shall be constructed of abrasion and UV-resistant A.B.S. and shall be adjustable for pattern alignment. The riser shall be compatible with female threaded nozzles and shall have a stainless steel spring for positive retraction when irrigation is complete.

The sprinkler shall have a pressure-activated, multi-function, UV stable wiper seal that will clean debris from the pop-up stem while it retracts. This seal shall prevent the sprinkler from sticking in the up position and be capable of sealing the sprinkler riser stem to the sprinkler cap under normal operating pressures. The seal shall be removable from the cap for easy service and shall be replaceable.

The sprinkler shall have a factory-installed, removable flush cap with a pull-up tab that shall prevent debris from entering the sprinkler during installation and allow the system to be flushed before installing the nozzle. The flush cap shall have a directional flushing action that allows the water to escape only in one direction. The flush cap shall open as the stem extends and completely close when the stem is in the retracted position.

The sprinkler shall have an exposed surface diameter after installation of 2-1/4 inches (6 cm). The sprinkler shall have a 1/2-inch Female National Pipe Thread (FNPT) bottom inlet. In addition, the 6-inch (15 cm) sprinklers shall be equipped with a standard 1/2-inch FNPT side inlet.

2.08 VALVES

A. Unless otherwise specified, the installation of all valves shall include the excavation and backfill, the furnishing, installing and testing of risers, nipples, fittings, valves, and valve boxes, and the removal and/or restoration of existing improvements and all other work in accordance with the plans and specifications and as required for the completed installation.

B. All valves shall have a purple handle to identify the use of reclaimed water.

2.09 AUTOMATIC REMOTE CONTROL VALVES, ELECTRIC SOLENOID TYPE

A. The automatic remote control valves to be installed where shown on the drawings and shall be slow acting diaphragm type electric solenoid operated valves of sizes as indicated on the drawings, or approved equal. Contractor shall install only one valve assembly per valve box.

2.10 PRESSURE REGULATOR

A. The work under this item consists of furnishing and installing the riser assembly complete, including valve box, pressure regulator, WYE-Strainer and other appurtenances as detailed on the project plans, at the locations shown and in accordance with these special provisions. Contractor shall install only one valve assembly per valve box.

2.11 ELECTRIC WIRE CONNECTIONS

A. Wire connections to remote control electric valve and splices of wire in the field, shall be made in the following manner using Pen-Tite wire connectors and sealing cement:

1. Strip ends of wires and push wires through the holes of the base socket.
2. Twist wires together and mechanically bond together using crimp sleeve and crimp pliers.
3. Pull wire connection back into base socket as far as possible.
4. Apply solvent cement to outside of sealing plug then fill cavity of sealing plug completely with solvent cement.
5. Push sealing plug into base socket, using slight twisting motion, until it bottoms.
6. Push wires unseating sealing plug. This assures cement completely sealing around wire insulation and waterproofing the connection.

B. It is important the joint be absolutely waterproof so that there is no chance for leakage of water and corrosion build-up on the joint.

C. If splices are required between the controller and any remote control valve, Contractor shall make this splice inside a valve box.

2.12 VALVE BOXES

A. Master Valve and Remote Control Valves: Carson 1324 with T style cover, purple in color to identify the use of reclaimed water.

B. Junction Box, Pull Box (Low Voltage): Carson 1419 with T style cover

C. All Valve Boxes to have all openings sealed with approved geo-textile fabric.

PART 3 - INSTALLATION

3.01 GENERAL

A. The Contractor shall lay out the system using stakes or paint to indicate the location of the various components as well as the location of each run of pipe and controller wire. Preliminary adjustments to conform to actual site conditions shall be accomplished at this time and the approval of the Owner or his authorized representative on the layout of the system shall be obtained prior to any actual work being performed.

3.02 TRENCHING

A. Unless otherwise indicated on the plans, all pressure main lines and control wiring shall have a minimum cover of 24 inches, and all lateral lines shall be installed with minimum cover of 18 inches based on finish grades in the turf and planter areas. All plastic lines installed in sleeves beneath concrete paving shall have a minimum of 24 inch cover, 30" (inches) beneath A.C., and backfill shall conform to the minimum compaction test of the paved area involved. Trench depths are from top of pipe to finished earth grade.

B. Alignment of pipe shall be for a simple layout with pipe running parallel or perpendicular to features such as curbs and sidewalks as may be possible with on-site conditions and to avoid future conflict with the plant root balls.

3.03 INSTALLATION OF PLASTIC PIPE AND FITTINGS

A. Plastic pipe shall be installed in a manner so as to provide for expansion and construction as recommended by the manufacturer. Maximum of two laterals per trench allow a minimum of 16 inches between all trenches.

B. Plastic pipe shall be cut with a cutter designed specifically for PVC pipe, in a manner so as to ensure a square cut. Burrs at cut ends shall be removed prior to installation so that smooth unobstructed flow will be obtained.

C. Solvent welded connections shall be made using primer and solvent compatible with pipe. Pipe shall be fully inserted in all sockets.

D. Threaded male adapters shall be compounded per manufacturers recommendation. Adaptor shall then be hand tightened, plus one turn with a strap wrench. 6" (inch) main line pipe or larger shall be "Ring Tite" with bolt-type fittings. Concrete thrust block all mainline fittings, behind fittings. No concrete on any inserted PCV joints.

E. Piping under paved or concrete areas shall be sleeved in schedule 40 PVC pipe as shown on the drawings. Coordinate with General Contractor for installation of irrigation sleeving prior to placing of any pavement. Where any cutting of A.C. pavement, sidewalks and/or concrete work is necessary, it shall be removed and replaced by the Landscape Contractor. Permission to cut roadway, sidewalks and/or concrete shall be obtained from the Owner.

F. All mainline pipe in rocky soils shall be thoroughly embedded 6" (inches) all around in sand or ¼" minus decomposed granite. All lateral pipe in rocky soils shall be thoroughly embedded in sand or approved topsoil.

G. All main line pipe shall be identified with 3" (inch) wide metallic marking tape for future locating of lines.

H. All pipe lines shall have a minimum clearance of six inches from each other and 12 inches from lines of other trades. Parallel lines shall not be installed directly over one another.

3.04 INSTALLATION OF EQUIPMENT

A. Solenoid valves shall be installed and wired as shown on the plans. Waterproof connectors shall be installed as per manufacturer's directions. All wiring shall be in conformance with applicable codes.

B. Pressure regulators and filters shall be installed as shown on the drawings.

3.05 FLUSHING AND TESTING OF PLASTIC PIPE

A. Main and lateral irrigation lines shall be capped and tested in place before backfilling for a period of not less than two hours, and shall show no loss of water or pressure through fittings. Pressure shall be 150 psi static pressure. Pipe sections shall be center loaded and all couplings shall be exposed. Before testing, the line shall have been filled with water for at least four hours before the test and provisions made for thoroughly bleeding the line of air. All hydrostatic tests shall be made only in the presence of the Town of Buckeye or its representative. The contractor shall provide notice of test to Town of Buckeye or its representative 48 hours prior to testing. No pipe shall be backfilled until it has been inspected, tested, and approved in writing.

B. All piping under paving shall be tested under hydrostatic pressure of 150 psi and proved water tight prior to paving.

C. All PVC lateral line pipe shall be tested at working line pressure with couplings exposed and swing joints and other outlets exposed.

D. After all new irrigation piping and risers are in place and connected, and all necessary division work has been completed, and prior to the installation of irrigation heads, control valves shall be opened and a full head of water used to flush out the system. After the system is thoroughly flushed, emitters and end caps shall be installed. There shall be a maximum of two full flushings for each valved zone.

3.06 INSTALLATION OF IRRIGATION HEADS AND RISERS

A. Heights of irrigation heads in relation to ground level shall be as shown on the plans and in the details. The City of Buckeye Representative shall verify and approve the Contractor's setting of the heads.

B. Irrigation heads and riser assemblies shall be installed as shown on the plans.

C. Irrigation heads shall not be assembled to risers until flushing is completed. Care shall be taken prior to emitter installation and pipe kept free of foreign matter after flushing and prior to emitter installation.

D. Coordination of heads with planting is a requirement. In cases where irrigation and planting is contracted to separate parties, final coordination of heads shall be the responsibility of Landscape Contractor. In the case where more than one emitter outlet is required to a single plant, irrigation contractor shall install emitters equal distance around base of plant.

3.07 EXCAVATION, BACKFILLING & COMPACTING

A. Excavation for sleeve placement shall be as required by sleeve size with sleeve placement at 18" to top of sleeve measured from the roadway surface and 12" deep under sidewalks. Sleeves shall extend 8" minimum beyond edge of roadway surface, and no damage shall result to adjacent paving, curb, gutter or sidewalk.

B. Pipe shall be bedded and covered with at least 6 inches of sand on all sides of the PVC pipe or sleeve to provide a firm, uniform bearing.

C. The trench shall be backfilled and compacted in 8" (inch) lifts and leveled to the grade of adjacent soil. Compaction shall be 95% of the maximum density of adjacent soil. Any settling of trenches shall be brought up to grade as necessary.

D. Sleeve diameter shall be 2 times the diameter of main line/lateral line combined.

E. Individual sleeves shall be provided for irrigation electrical wires, and irrigation main lines and laterals.

PART 4 - AUXILIARY EQUIPMENT

4.01 VALVE BOXES

A. All remote control valves, unless otherwise indicated shall be installed in suitable plastic or other type valve access box of proper size as required for easy access to the valve. Access boxes shall be complete with plastic or other approved type locking cover. Keys shall be provided for the non-rusting locking covers. Valve Boxes shall be Carson or approved equal. All valve boxes shall be purple in color. Label all valve boxes and vaults with durable tags or markings carrying the warning **DANGER-UNSAFE WATER** or **NON-POTABLE WATER.**

B. Controller designation shall be clearly and neatly etched into top of valve box lid. All valve access boxes shall be provided with proper length and size extensions, wherever required, to bring the valve boxes level with the finish grade.

PART 5 - CLEAN UP

5.01 CLEAN UP

A. Clean up shall be made daily as each portion of the Work progresses. Refuse and excess dirt shall be removed from the site, and walks and paving shall be broomed or washed down daily. Any damage shall be repaired to original conditions at Contractor's expense.

PART 6 - RECORD DRAWINGS AND GUARANTEES

6.01 RECORD DRAWINGS

A. During progress of the work, keep an up-to-date set of drawings showing field and shop drawing modifications. Record dimensioned locations and depths for each of the following:

1. Irrigation pressure line routing (Provide dimensions for each 100 lineal feet {maximum} along each routing, and for each change in directions).
2. Gate valves and butterfly valves.
3. Irrigation control valves
4. Control wire routing
5. Sleeves under paving
6. Other related items as may be directed by the Town of Buckeye Representative
7. Maintain as-builts on a daily basis to ensure accuracy.

B. Locate all dimensions from two permanent points (buildings, monuments, sidewalks, curbs, or pavements).

C. Record all changes which are made from the Contract Drawings, including changes in the pressure and non-pressure lines.

D. Record all required information on a set of blackline prints of the Drawings using colored pencil or pen. Do not use these prints for any other purpose.

E. Maintain information daily. Keep drawings at the site at all times and available for review by the City of Buckeye Representative.

F. When record drawings have been approved by the City of Buckeye Representative, the Landscape Architect shall transfer all information to a set of CAD Record Documents.

6.02 GUARANTEES

A. Submit for approval a written guarantee in addition to manufacturer's guarantees or warranties. All work shall be guaranteed for one (1) year from date of final acceptance against defects in material, equipment, and workmanship by the Contractor. Guarantee shall also include repairs to any part of the premises resulting from leaks or other defects in materials. Guarantee shall be signed by the Contractor and subcontractor, if applicable.

6.03 OPERATION AND MAINTENANCE DATA

A. Submit detailed operation and maintenance data for all equipment and accessories provided under this Section including assembly and part lists for each type of valve, emitter, etc., furnished to the City of Buckeye Representative.

B. The Contractor shall furnish 6 copies of a hard operation and maintenance manual prepared by the manufacturers of all items of equipment furnished under this Section. The manual shall include maintenance instructions, copies, of approved shop and installation drawings for all equipment and manufacturers' recommended lubricant and spare parts lists.

6.04 CONTROLLER CHARTS

A. Do not prepare charts until record drawings have been approved by the City of Buckeye Representative.

B. Provide one controller chart for each automatic controller installed.

1. Chart may be a reproduction of the Record Drawing, if the scale permits fitting the controller door. If photo reduction prints are required, keep reduction to maximum size possible to retain full legibility.
2. Chart shall be blackline print of the actual system, showing the area covered by that controller.

C. Identify the area of coverage of each remote control valve, using a distinctly different, legible color, drawn over the entire area of coverage.

D. Following approval of charts by the City of Buckeye Representative, they shall be hermetically sealed between two layers of 20 mil thick plastic sheet.

E. Charts must be completed and approved prior to final acceptance of the irrigation system.

END OF SECTION 02810

SECTION 02900 - **LANDSCAPING**

Except as otherwise required in these specifications, construction of this project shall be in accordance with all applicable Maricopa Association of Governments (M.A.G.) Uniform Standard Specifications and the Town of Buckeye Supplemental Specifications and Details, as applicable.

PART 1 - GENERAL

1.01 QUALITY ASSURANCE

A. The landscape contractor shall have performed similar work as required in this specification for a period of five years previous to the award of this contract.

1.02 SCOPE OF WORK

A. Contractor shall provide all labor, materials, including water, equipment and incidentals as shown, specified and required to perform landscaping work. The extent of the landscaping work is shown on the drawings and in schedules. The types of landscaping required include the following:

1. Landscape grading.
2. Ground cover areas.
3. Turf Lawns
4. Trees, shrubs and other nursery stock.
5. Stakes and guys, mulches, and all other material necessary to complete the planting job as specified.
6. Maintenance work as specified until completion of the Contract.
7. Soil amendments.
8. Rock Mulch
9. Fertilizers.
10. Miscellaneous landscape materials.
11. Guarantees.

Note: Contractor shall not begin planting operations until landscape grading and irrigation system has been installed and is fully operable. Large box trees may be placed prior to completion of irrigation to those trees.

1.03 COORDINATION

A. Review installation procedures under other sections and coordinate the installation of items that must be installed with the landscaping.

1.04 OBSTRUCTIONS BELOW GROUND AND UTILITIES

A. Landscape Contractor shall call for "Blue Stake" as required. Exercise extreme caution in all planting operations, as there are underground electric and telephone cables, sewer lines and water lines throughout the entire area. Contractor shall study and be familiar with the location of these obstructions and underground utilities. Place plantings where shown on the plans. If there are obstructions or underground utilities, relocate plants clear of any interference at the direction of the Landscape Architect. Landscape Contractor shall repair all damages caused by him to obstructions and underground utilities at no expense to Town of Buckeye.

PART 2 - INSTALLATION

2.01 GENERAL

A. Determine location of underground utilities and perform work in a manner which will avoid possible damage. Hand excavate, as required, to minimize possibility of damage to underground utilities. Maintain grade stakes until removal is mutually agreed upon by all parties concerned. The Contractor shall layout all plant material using stakes or flags to indicate the location of all plant materials. Spacing of shrub and groundcover material shall be as specified in schedule on plans. Location and spacing of trees shall be determined by the plan scale and located as accurately as the scale permits. Preliminary adjustments to conform to actual site conditions shall be accomplished at this time. The Landscape Architect or the Town of Buckeye Representative shall approve the staked locations of all plant material.

2.02 LANDSCAPE GRADING

A. The work under this section shall consist of landscape fine grading, contouring, smoothing, or otherwise shaping areas at the locations designated on the project plans beyond the mass grading indicated on the Civil Engineering plans.

1. Topsoil shall conform to Section 4.01.

2. Fine grade by hand raking or dragging with an approved drift, removing all debris and rocks ½-inch diameter and greater. True surface to finished grade, even and firm at all points. Finished earth grade shall be 3 inches below tops of adjacent curbs, walks and slabs to allow for placement of rock mulch or turf.

2.03 EXCAVATION FOR PLANTING

A. Planting pits for trees and shrubs shall be excavated to a volume 2 times the diameter of the root ball and to a depth equal to the depth of the root ball.

Contractor shall stockpile native soil excavated. The native soil will be used for backfilling planting pits. Scarify the walls of the planting pit.

2.04 FIRST BACKFILL

A. Planting pits shall be backfilled with a combination of 2/3 native soil and 1/3 sand and be watered settled to a grade sufficient, that in the setting of the plant, the finish grade level after settlement will be the same as that at which the plants were grown (see details in landscape plans). Backfill soil shall be mixed thoroughly outside of the planting pit.

2.05 SETTING PLANTS

A. Container Removal: Remove container by turning plant upside down, supporting root ball with hand and tapping container gently to dislodge plant. Support root ball with both hands until planted in pit. Do not injure root ball, or hold plant by the stem.

1. After removal of plant from container, superficially cut edge-roots with a sharp knife on three sides and tease out feeder roots to assure positive contact and embedment into planting soil.

B. Box Removal: Remove bottom of plant boxes before planting. Remove sides of box without damage to root ball after positioning plant in planting pit. Trees shall be placed so that best side of tree is most viewable.

1. Set container and boxed stock on undisturbed native soil, plumb, and hold rigidly in center of pit or trench with top of ball at elevation as shown on planting details. After removal of plant from box, superficially cut edge-roots with a sharp knife on four sides and tease out feeder roots to assure positive contact and embedment into planting soil. When set, place soil backfill around base and sides of ball, and work each layer to settle soil backfill to eliminate voids and air pockets. When excavation is approximately ½, water settle thoroughly before placing remainder of soil backfill. Water settle planting pit thoroughly when backfilling is complete.

2. See Section 7.01 for placement of fertilizer tablets.

3. After thorough watering, any settlement within basins shall be refilled to required grade with native soil.

4. Prune, thin out and shape trees and shrubs in accordance with standard horticultural practice. Prune trees to retain required height and spread. Unless otherwise directed, do not cut tree leaders, and remove only injured or dead branches.

5. Excessively pruned or mis-formed stock resulting from improper pruning shall be removed from site and replaced at no additional cost to the Town of Buckeye.

6. Stake trees if necessary immediately after planting. See Part 7, Section 7.03, "Tree Staking."

PART 3 - MATERIALS: TREES, SHRUBS, AND GROUNDCOVERS

3.01 GENERAL

1. The Contractor shall coordinate pre-approval of plant material at plant nurseries with the Town of Buckeye Representative and/or Landscape Architect and applicable nurseries as required prior to delivery of plant materials to site.

3.02 PROTECTION AFTER DELIVERY

A. Upon delivery to the site, all nursery stock shall be planted as soon as possible. Until planting, plants shall not be exposed to excessive sun or drying winds. Stock that is not satisfactory in the opinion of the Town of Buckeye Representative or Landscape Architect even after delivery to site shall be immediately replaced with acceptable stock at no additional cost to the Town of Buckeye.

3.03 PLANTING SEASON

1. The planting of all trees and shrubs shall be performed during favorable weather conditions, during the season or seasons that are normal for such work, as determined by acceptable local practice.

3.04 OBSTRUCTION BELOW GROUND

A. Any rock or other underground obstructions shall be removed, if possible, to the depth necessary to permit proper planting, according to plans and specifications. If underground construction, obstructions, or rock are encountered in the excavation of planting areas, other locations for planting may be selected by the Contractor only with approval of the Landscape Architect. Prior to any work, the Contractor must be knowledgeable of the locations of all existing underground installations, and their protection is his responsibility. All damage will be corrected at the expense of the Contractor to the satisfaction of the Town of Buckeye Representative. Coordinate all work with other trades so conflicts will not exist or delay the work in any way. Coordinate grades with earthwork and with placement of the irrigation system.

PART 4 - SOIL PREPARATION

4.01 PLANTING PIT SOIL

A. Topsoil (existing on site) shall be fertile, friable soil free from nut grass, refuse, roots, heavy clay, noxious weeds or any material toxic to plant growth. Contractor shall test for pH, and pH shall not be lower than 5.5 nor exceed 8.3, and soluble salts shall not exceed 1,500 ppm. Contractor shall add amendments as required to meet

the above specification. If the native topsoil cannot meet the requirements listed above, the Contractor shall import topsoil meeting the requirements.

PART 5 - ROCK MULCH

5.01 MATERIALS

A. Rock mulch shall be native, local, crushed stone. Size and color as specified on the plans. The rock mulch shall be from a single source, free from coating, clay, caliche or organic matter. Contractor shall provide Landscape Architect with sample of material for approval before delivery to site.

B. Chemical pre-emergent shall be Dachtol, Surflan or equal approved by the Town of Buckeye Representative or Landscape Architect.

5.02 SUBGRADE PREPARATION

A. Contractor must examine the sub-grade, verify the elevations and observe the conditions under which the work is to be performed. The existing grade shall be fine graded and raked free of organic matter and other debris 1/2" diameter and larger. Any settling at planting pits or irrigation trenching shall be filled and compacted. Contractor shall apply one application of pre-emergent herbicide per manufacturer's directions prior to installing rock mulch and one application after rock mulch has been installed, raked level, and compacted.

5.03 ROCK MULCH INSTALLATION

A. Landscape Planter Areas

1. Installed rock mulch shall be raked to remove any irregularities. Installation shall provide a two-inch depth of rock mulch after compacting. Methods of compacting include rolling and water settling. Unless otherwise specified in the drawings, rock mulch finish grade shall be one inch below top of curb or sidewalk surfaces.

PART 6 - LAWN PLANTING

6.01 LAWNS

A. See Section 2920 for Sodded Lawn and Hydro-seeded Lawn Specifications.

PART 7 - MISCELLANEOUS LANDSCAPE MATERIALS

7.01 PLANT MATERIAL FERTILIZER

A. Fertilizer shall be Agri-Form tablets or approved equal. 1 per shrub/accent/groundcover, 3 per tree, placed below location of drip emitter(s). Place fertilizer tablet in planting pit after backfilling by 2/3.

7.02 TREE STAKING

A. All trees shall be staked in line with prevailing winds. Stakes shall be 2-inch round knot-free pine, length as required and installed as follows: Stakes shall be placed immediately adjacent to, but in no case through, the root ball, and penetrate at least 6 inches into undisturbed soil, be aligned vertically, be pointed at one end, and be aligned so as not to interfere with the existing branch structure of the tree, extending 5 to 6 feet above grade. Vinyl for fastening trees to stakes shall be stapled to the wood stakes, or otherwise
attached to prevent removal of the vinyl. Provide not less than two (2) stakes spaced equally around trees (see tree staking details).

PART 8 - CLEAN UP

8.01 CLEAN UP

A. During landscape work, store materials and equipment where directed. Keep pavements and sidewalks clean and work area in an orderly condition. Protect landscape work and materials from damage due to landscape operations, operations by other contractors and trades and trespassers. Maintain protection during installation and maintenance periods. Treat, repair or replace damaged landscape work as directed.

B. Remove all rubbish, equipment and rejected material daily from the site.

C. Protection includes all temporary fences, barriers and signs and other work incidental to proper maintenance.

PART 9 - INSPECTIONS

9.01 INSPECTIONS

A. When the landscape work is substantially completed, including maintenance, the Town of Buckeye Representative and/or Landscape Architect will make a pre-final and final inspection to determine acceptability. Where inspected landscape work does not comply with the requirements, replace rejected work and continue specified maintenance until re-inspected by the Town of Buckeye Representative or Landscape Architect and found to be acceptable. Remove rejected plants and materials promptly from the project site.

PART 10 - MAINTENANCE, GUARANTEE AND REPLACEMENT

10.01 MAINTENANCE

A. Contractor shall begin maintenance immediately after the complete landscape installation has been accepted by the Town of Buckeye Representative or Landscape Architect.

B. Contractor shall maintain landscape work until final acceptance, but in no case less than 90 days after the work has been accepted by the Town of Buckeye Representative or Landscape Architect.

10.02 SCOPE OF WORK

A. The Contractor shall furnish all labor, materials, equipment, tools, services, skill, etc., required to maintain the landscape in an attractive condition throughout the contract period. Maintenance of plant materials shall include, but not be limited to, pruning, weeding, mowing, fertilizing, irrigation programming, pest control, and landscaped areas debris clean up, per specifications. Maintenance shall be performed a minimum of once a week throughout the maintenance period.

10.03 WORK FORCE

A. Contractor Supervisor shall be responsible for the training and supervision of the maintenance personnel's performance of their duties during the maintenance period.

10.04 MATERIALS

A. All materials as noted (but not limited to this list) shall conform to the bid specifications:

1. Pre-emergent
2. Fertilizer
3. Seed
4. Plant material
5. Decomposed granite

10.05 TREE AND SHRUB CARE

A. Maintain trees and shrubs in a healthy, growing condition by performing necessary operations, including the following:

1. Pruning: Prune and shape only as necessary to maintain the usual form of the plant, to stimulate growth, to maintain growth within space limitations, and to maintain a natural appearance.

2. Staking: Stakes are to be inspected weekly and adjusted or removed as necessary.

3. Weed Control: In all landscape areas keep areas between plants free of weeds. Use recommended, legally approved, herbicides. Avoid soil cultivation.

10.06 ROCK MULCH CARE

A. Foster attractiveness at all times by following these practices:

1. Rock Mulch Areas: Shall be inspected weekly. Man-made debris shall be removed and weeds and grass controlled with chemicals. Keep all landscape areas free of broadleaf or grassy weeds, with pre-emergent and/or selective contact herbicides. Cultivating or hoeing weeds is not a recommended practice. Project shall not be accepted until all noxious weeds and grasses are eradicated.

10.07 LAWN CARE

A. See Section 2920 for lawn care specifications:

10.08 IRRIGATION SYSTEM

A. Watering shall be scheduled by supervisor on automatic controllers in quantities and frequencies consistent with seasonal requirements of the plant materials in the landscape.

B. Where practical, watering shall be done at night or early morning.

PART 11 - GUARANTEE

11.01 GUARANTEE AND REPLACEMENT

A. Guarantee all plant materials under this contract to be in good, healthy, and flourishing condition of active growth at end of guarantee period. Replace all dead plants and all plants not in vigorous, thriving condition without cost to Town of Buckeye immediately during maintenance period, and as soon as weather conditions permit during normal growing season during the guarantee period. Replace contract plantings that die back and lose form and size originally specified even though they have taken root and are growing after die back. Frost kill or damage caused by other than inadequate staking is not covered by this guarantee. However, Contractor shall, if requested, make replacement at reasonable cost and include replaced plants within maintenance and guarantee of project. Except for failures beyond control of Contractor, such as neglect, damage by others, vandalism, and floods, make replacements of comparable quality, type, and size. Continue replacements until each plant has successfully established itself for required guarantee time period. A sum sufficient to cover estimated cost of possible replacement, but not exceeding 5 percent of contract price including materials

and labor may be retained by Town of Buckeye until replacement obligations are complete.

11.02 GUARANTEE AND MAINTENANCE TIME SCHEDULE

	Guarantee Period	Maintenance Period
Shrubs	One year	90 days
Trees	One year	90 days
Turf	One Year	90 days

11.03 LANDSCAPE GUARANTEE AND MAINTENANCE PERIOD

A. Upon acceptance of the landscape after the maintenance period, furnish a written guarantee on plant material agreeing to guarantee active plant material growth for the specified guarantee periods.

C. The Contractor shall be responsible for watering and maintenance of all landscape material during the maintenance period. The Town of Buckeye shall be responsible for watering and maintenance of all landscape material during the guarantee period. The Contractor shall inspect the landscape materials periodically during the guarantee period and shall notify the Town of Buckeye Representative in writing, if, in the Contractor's opinion, the landscape materials are not receiving proper care.

11.04 LANDSCAPE ACCEPTANCE

A. Contractor shall notify Town of Buckeye Representative in writing when Contractor believes that the landscaping is substantially complete to begin the maintenance period. Notification shall be submitted in writing, through the General Contractor, and received by the Town of Buckeye Representative at least seven (7) days prior to the requested maintenance period observation. Upon subsequent observation and acceptance of landscaping by the Town of Buckeye Representative or Landscape Architect, the maintenance period start date shall be established. At completion of the maintenance period, the landscaping will again be observed by the Town of Buckeye Representative to determine acceptance and the start date of the guarantee period.

END OF SECTION 02900

SECTION 03300 - **CAST-IN-PLACE CONCRETE**

PART 1 - GENERAL: **See General Structural Notes which shall take precedence.**

1.1 SUMMARY

A. This Section specifies cast-in place concrete, including formwork, reinforcement, concrete materials, mixture design, placement procedures, and finishes at new foundations**.**

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Design Mixtures: For each concrete mixture, submit Admixtures for approval.

C. Material test reports & certificates.

1.3 QUALITY ASSURANCE

A. Manufacturer Qualifications: A firm experienced in manufacturing ready-mixed concrete products and that complies with ASTM C 94/C 94M requirements for production facilities and equipment.

1. Manufacturer certified according to NRMCA's "Certification of Ready Mixed Concrete Production Facilities."

B. ACI Publications: Comply with the following unless modified by requirements in the Contract Documents:

1. ACI 301, "Specification for Structural Concrete," Sections 1 through 5.
2. ACI 117, "Specifications for Tolerances for Concrete Construction and Materials."
3. ACI 318, "Building Code Requirements for Structural Concrete."

PART 2 - PRODUCTS

2.1 FORM-FACING MATERIALS

A. Smooth-Formed Finished Concrete: Form-facing panels that will provide continuous, true, and smooth concrete surfaces. Furnish in largest practicable sizes to minimize number of joints.

2.2 STEEL

1. Reinforcing Bars: **Per General Structural Notes & Drawings.**

2.3 CONCRETE MATERIALS

A. Cementitious Material: Use the following cementitious materials, of the same type, brand, and source, throughout Project:

1. Portland Cement: ASTM C 150, Type II

B. Normal-Weight Aggregates: ASTM C 33, graded, 3/4-inch (19-mm) nominal maximum coarse-aggregate size.

1. Fine Aggregate: Free of materials with deleterious reactivity to alkali in cement.

C. Water: ASTM C 94/C 94M and potable.

D. Air-Entraining Admixture: ASTM C 260.

E. Chemical Admixtures: Provide admixtures certified by manufacturer to be compatible with other admixtures and that will not contribute water-soluble chloride ions exceeding those permitted in hardened concrete. Do not use calcium chloride or admixtures containing calcium chloride.

1. Water-Reducing Admixture: ASTM C 494/C 494M, Type A.
2. Retarding Admixture: ASTM C 494/C 494M, Type B.
3. Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type D.
4. High-Range, Water-Reducing Admixture: ASTM C 494/C 494M, Type F.
5. High-Range, Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type G.
6. Plasticizing and Retarding Admixture: ASTM C 1017/C 1017M, Type II.

F. Synthetic Fiber: Monofilament or fibrillated polypropylene fibers engineered and designed for use in concrete pavement, complying with ASTM C 1116, Type III, 1/2 to 1-1/2 inches long.

2.4 VAPOR RETARDERS

A. Plastic Vapor Retarder, ASTM E 1745, Class A.

2.5 CURING MATERIALS

A. Evaporation Retarder: Waterborne, monomolecular film forming, manufactured for application to fresh concrete.

B. Absorptive Cover: AASHTO M 182, Class 2, burlap cloth made from jute or kenaf, weighing approximately 9 oz./sq. yd. when dry.

C. Moisture-Retaining Cover: ASTM C 171, polyethylene film or white burlap-polyethylene sheet.

D. Water: Potable.

E. Clear, Waterborne, Membrane-Forming Curing Compound: ASTM C 309, Type 1, Class B, dissipating.

2.6 RELATED MATERIALS

A. Expansion- and Isolation-Joint-Filler Strips: ASTM D 1751, asphalt-saturated cellulosic fiber.

2.7 CONCRETE MIXTURES

A. Prepare design mixtures for each type and strength of concrete, proportioned on the basis of laboratory trial mixture or field test data, or both, according to ACI 301.

B. Proportion normal-weight concrete mixture as follows:

1. Minimum Compressive Strength at 28 days: 2500 psi foundations, 3000 psi concrete slabs
2. Maximum Allowable Slump without Plasticizer: 5 inches
3. Air Content: Do not allow air content of troweled finished floors to exceed 3 percent.

2.8 FABRICATING REINFORCEMENT

A. Fabricate steel reinforcement according to CRSI's "Manual of Standard Practice."

2.10 CONCRETE MIXING

A. Ready-Mixed Concrete: Measure, batch, mix, and deliver concrete according to ASTM C 94/C 94M and/or ASTM C 1116, and furnish batch ticket information.

1. When air temperature is between 85 and 90 deg F reduce mixing and delivery time from 1-1/2 hours to 75 minutes; when air temperature is above 90 deg F reduce mixing and delivery time to 60 minutes.

PART 3 - EXECUTION

3.1 FORMWORK

A. Design, erect, shore, brace, and maintain formwork according to ACI 301 to support vertical, lateral, static, and dynamic loads, and construction loads that might be applied, until structure can support such loads.

B. Construct formwork so concrete members and structures are of size, shape, alignment, elevation, and position indicated, within tolerance limits of ACI 117.

C. Radius exterior corners and edges of permanently exposed concrete.

3.2 EMBEDDED ITEMS

A. Place and secure anchorage devices and other embedded items required for adjoining work that is attached to or supported by cast-in-place concrete. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.

3.3 VAPOR RETARDERS

A. Plastic Vapor Retarders: Place, protect, and repair vapor retarders according to ASTM E 1643 and manufacturer's written instructions.

1. Lap joints 6 inches and seal with manufacturer's recommended tape.

3.4 STEEL REINFORCEMENT

A. General: Comply with CRSI's "Manual of Standard Practice" for placing reinforcement.

1. Do not cut or puncture vapor retarder. Repair damage and reseal vapor retarder before placing concrete.

3.5 JOINTS

A. General: Construct joints true to line with faces perpendicular to surface plane of concrete.

B. Construction Joints: Install so strength and appearance of concrete are not impaired, at locations indicated or as approved by Architect.

C. Isolation Joints in Slabs-on-Grade: After removing formwork, install joint-filler strips at slab junctions with vertical surfaces, such as column pedestals, foundation walls, grade beams, and other locations, as indicated.

3.6 CONCRETE PLACEMENT

A. Before placing concrete, verify that installation of formwork, reinforcement, and embedded items is complete and that required inspections have been performed.

B. Deposit concrete continuously in one layer or in horizontal layers of such thickness that no new concrete will be placed on concrete that has hardened enough to cause seams or planes of weakness. If a section cannot be placed continuously, provide construction joints as indicated. Deposit concrete to avoid segregation.

1. Consolidate placed concrete with mechanical vibrating equipment according to ACI 301.

C. Cold-Weather Placement: Comply with ACI 306R.

D. Hot-Weather Placement: Comply with ACI 305R.

E. Water is not to be added to the concrete mix at the site.

3.7 FINISHING FORMED SURFACES

A. Smooth-Formed Finish: As-cast concrete texture imparted by form-facing material, arranged in an orderly and symmetrical manner with a minimum of seams. Repair and patch tie holes and defects. Remove fins and other projections that exceed specified limits on formed-surface irregularities.

1. Apply to concrete surfaces exposed to public view, to receive a rubbed finish, or to be covered with a coating or covering material applied directly to concrete.

3.8 FINISHING FLOORS AND SLABS: **See SECTION 02751 - CONCRETE PAVEMENT**

3.9 CONCRETE PROTECTING AND CURING

A. General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures. Comply with ACI 306.1 for cold-weather protection and ACI 301 for hot-weather protection during curing.

B. Evaporation Retarder: Apply evaporation retarder to unformed concrete surfaces if hot, dry, or windy conditions cause moisture loss approaching 0.2 lb/sq. ft. x h before and during finishing operations. Apply according to manufacturer's written instructions after placing, screeding, and bull floating or darbying concrete, but before float finishing.

C. Cure concrete according to ACI 308.1, by one or a combination of the following methods:

1. Moisture Curing: Keep surfaces continuously moist for not less than seven days.

2. Moisture-Retaining-Cover Curing: Cover concrete surfaces with moisture-retaining cover for curing concrete, placed in widest practicable width, with sides and ends lapped at least 12 inches and sealed by waterproof tape or adhesive. Cure for not less than seven days. Immediately repair any holes or tears during curing period using cover material and waterproof tape.

3.10 CONCRETE SURFACE REPAIRS

Defective Concrete: Repair and patch defective areas when approved by Architect. Remove and replace concrete that cannot be repaired and patched to Architect's approval.

310 FIELD QUALITY CONTROL

A. Testing and Inspecting: Contractor will engage a qualified independent testing and inspecting agency to perform field tests and inspections and prepare test reports.

1. Testing Services: Tests shall be performed according to ACI 301.

END OF SECTION 03300

SECTION 04816 - **CONCRETE UNIT MASONRY ASSEMBLIES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes unit masonry assemblies consisting of the following:

1. Concrete masonry units (CMUs). **See also Masonry General Structural Notes on Drawings.**

2. Light mortar wash to match existing.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples for each type and color of exposed masonry units and colored mortars.

C. Material Certificates: For each type of product indicated. Include statements of material properties indicating compliance with requirements including compliance with standards and type designations within standards.

1. For masonry units include material test reports substantiating compliance with requirements.

D. Mix Designs: For each type of mortar and grout. Include description of type and proportions of ingredients.

1.3 PROJECT CONDITIONS

A. Hot-Weather Requirements: Comply with hot-weather construction requirements contained in ACI 530.1/ASCE 6/TMS 602.

PART 2 - PRODUCTS

2.1 COLORS, TEXTURES, AND PATTERNS

A. Exposed Masonry Units: As indicated by manufacturer's designations.

1. Products: No substitutions allowed, product to match existing.

a. **OLDCASTLE, Superlight, Phoenix via Young Block Company, Tucson: Slump Block,** Manufacturer's standard sizes and shapes as indicated on drawings. Color to match existing.

2.2 CONCRETE MASONRY UNITS (CMUs)

A. Shapes: Provide special shapes for lintels, corners, jambs, sashes, movement joints, headers, bonding, solid cap blocks and all other special conditions.

B. Integral Water Repellent: Provide units made with liquid polymeric, integral water-repellent admixture that does not reduce flexural bond strength for exposed units and where indicated.

C. Concrete Masonry Units: ASTM C 90, Medium Weight, Grade N, F'm = 1,500 psi, running bond, Mortar Type S, 1,800 psi, Grout 2,000 psi.

2.3 MORTAR AND GROUT MATERIALS

A. Portland Cement: ASTM C 150, Type I or II, except Type III may be used for cold-weather construction.

B. Hydrated Lime: ASTM C 207, UBC Standard 21-13, Type S.

C. Masonry Cement: ASTM C 91, UBC Standard 21-11.

D. Mortar Pigments: Iron oxides and chromium oxides, compounded for use in mortar mixes. Use only pigments with a record of satisfactory performance in masonry mortar.

1. Products:

a. Bayer Corporation, Industrial Chemicals Div.; Bayferrox Iron Oxide Pigments.
b. Davis Colors; True Tone Mortar Colors.
c. Solomon Grind-Chem Services, Inc.; SGS Mortar Colors.

E. Aggregate for Mortar: ASTM C 144.

1. For joints less than 1/4 inch thick, use aggregate graded with 100 percent passing the No. 16 sieve.
2. Colored-Mortar Aggregates: Natural sand or crushed stone of color necessary to produce required mortar color.

F. Aggregate for Grout: ASTM C 404.

G. Water-Repellent Admixture: Liquid water-repellent mortar admixture intended for use with concrete masonry units, containing integral water repellent by same manufacturer.

1. Products:

   a. Addiment Incorporated; Mortar Tite.
   b. Grace Construction Products, a unit of W. R. Grace & Co. - Conn.; Dry-Block Mortar Admixture.
   c. Master Builders, Inc.; Color Cure Mortar Admix or Rheomix Rheopel.

H. Water: Potable.

2.4 REINFORCEMENT-

A. Uncoated Steel Reinforcing Bars: ASTM A 615/A 615M or ASTM A 996/A 996M, Grade 60. All bars #5 or larger.

B. Masonry Joint Reinforcement: ASTM A 951, UBC Standard 21-10; mill galvanized, carbon-steel wire for interior walls and hot-dip galvanized, carbon-steel wire for exterior walls.
   1. Wire Size for Side Rods: W1.7 or 0.148-inch, W2.8 or 0.188-inch, and W2.8 or 0.188-inch diameter as indicated.
   2. Wire Size for Veneer Ties: W1.7 or 0.148-inch and W2.8 or 0.188-inch diameter as indicated.
   3. Spacing of Cross Rods, Tabs, and Cross Ties: Not more than 16 inches o.c.
   4. Single-Wythe Masonry: Either ladder or truss type with single pair of side rods.

2.5 TIES AND ANCHORS

A. Materials:

   1. Hot-Dip Galvanized, Carbon-Steel Wire: ASTM A 82; with ASTM A 153/A 153M, Class B-2 coating.
   2. Steel Sheet, Galvanized after Fabrication: ASTM A 1008/A 1008M, Commercial Steel, hot-dip galvanized after fabrication to comply with ASTM A 153/A 153M.
   3. Steel Plates, Shapes, and Bars: ASTM A 36/A 36M.

B. Wire Ties, General: Unless otherwise indicated, size wire ties to extend at least halfway through veneer but with at least 5/8-inch cover on outside face. Outer ends of wires are bent 90 degrees and extend 2 inches parallel to face of veneer.

C. Individual Wire Ties: Rectangular units with closed ends and not less than 4 inches wide.

   1. Wire: Fabricate from 3/16-inch, or 1/4-inch-diameter, hot-dip galvanized steel wire.

2.6 MASONRY CLEANERS

A. Proprietary Acidic Cleaner: Manufacturer's standard-strength cleaner designed for removing mortar/grout stains from new masonry without damaging masonry. Use product approved for intended use by cleaner manufacturer and manufacturer of masonry units being cleaned.

1. Manufacturers:

a. Diedrich Technologies, Inc.
b. EaCo Chem, Inc.
c. ProSoCo, Inc.

2.7 MORTAR AND GROUT MIXES

A. General: Do not use admixtures, unless otherwise indicated.

1. Do not use calcium chloride in mortar or grout.
2. Limit cementitious materials in mortar for exterior and reinforced masonry to portland cement and lime.

B. Mortar for Unit Masonry: Comply with ASTM C 270 & UBC Standard 21-15, Proportion Specification.

1. Color: Integral color pigment to match existing.

C. Mortar for Unit Masonry: Comply with ASTM C 270 & UBC Standard 21-15, Property Specification.

1. For masonry below grade or in contact with earth, use Type S.
2. For reinforced masonry, use Type S.
3. For mortar parge coats, use Type S.
4. For exterior, above-grade, load-bearing and non-load-bearing walls and parapet walls; for interior load-bearing walls; for interior non-load-bearing partitions; and for other applications where another type is not indicated, use Type N.
5. For interior non-load-bearing partitions, Type O may be used instead of Type N.

D. Grout for Unit Masonry: Comply with ASTM C 47 & UBC Standard 21-19.

1. Use grout of type indicated or, if not otherwise indicated, of type (fine or coarse) that will comply with Table 1.15.1 in ACI 530.1/ASCE 6/TMS 602 & Table 21-C in the Uniform Building Code for dimensions of grout spaces and pour height.
2. Provide grout with a slump of 8 to 11 inches as measured according to ASTM C 143/C 143M.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Use full-size units without cutting if possible. If cutting is required, cut units with motor-driven saws; provide clean, sharp, un-chipped edges. Allow units to dry before laying unless wetting of units is specified. Install cut units with cut surfaces and, where possible, cut edges concealed.

B. Select and arrange units for exposed unit masonry to produce a uniform blend of colors and textures.

C. Comply with tolerances in ACI 530.1/ASCE 6/TMS 602 and with the following:

1. For conspicuous vertical lines, such as external corners, door jambs, reveals, and expansion and control joints, do not vary from plumb by more than 1/8 inch in 10 feet..
2. For conspicuous horizontal lines, such as lintels, sills, parapets, and reveals, do not vary from level by more than 1/8 inch in 10 feet.

3.2 LAYING MASONRY WALLS

A. Lay out walls in advance for accurate spacing of surface bond patterns with uniform joint thicknesses and for accurate location of openings, movement-type joints, returns, and offsets. Avoid using less-than-half-size units, particularly at corners, jambs, and, where possible, at other locations.

B. Bond Pattern for Exposed Masonry: Lay standard gray masonry in running bond pattern; Lay Astra-glaze CMU accent walls in a stack bond pattern; do not use units with less than nominal 8-inch horizontal face dimensions at corners or jambs.

C. Built-in Work: As construction progresses, build in items specified in this and other Sections. Fill in solidly with masonry around built-in items.

D. Fill space between steel frames and masonry solidly with mortar, unless otherwise indicated.

E. Fill cores in hollow concrete masonry units with grout 24 inches under bearing plates, beams, lintels, posts, and similar items, unless otherwise indicated. See Structural Drawings.

3.3 MORTAR BEDDING AND JOINTING

A. Lay hollow concrete masonry units as follows:

1. With face shells fully bedded in mortar and with head joints of depth equal to bed joints.

2. With webs fully bedded in mortar in grouted masonry, including starting course on footings.
3. With entire units, including areas under cells, fully bedded in mortar at starting course on footings where cells are not grouted.

B. Tool exposed joints slightly concave when thumbprint hard, using a jointer larger than joint thickness, unless otherwise indicated.

1. Flush joints to match existing using integral color matching mortar.

3.4 MORTAR WASH

A. Match existing consistency and transparency, apply with a sponge.

3.4 MASONRY JOINT REINFORCEMENT

A. General: Install in mortar with a minimum cover of 5/8 inch on exterior side of walls, 1/2 inch elsewhere. Lap reinforcement a minimum of 6 inches.

B. Interrupt joint reinforcement at control and expansion joints, unless otherwise indicated.

C Provide continuity at wall intersections by using prefabricated T-shaped units.

D. Provide continuity at corners by using prefabricated L-shaped units.

3.5 ANCHORING MASONRY TO STRUCTURAL MEMBERS

A. Anchor masonry to structural members where masonry abuts or faces structural members to comply with the following:

1. Provide an open space not less than 1/2 inch in width between masonry and structural member, unless otherwise indicated.
2. Anchor masonry to structural members with anchors embedded in masonry joints and attached to structure.
3. Space anchors as indicated.

3.6 REINFORCED UNIT MASONRY INSTALLATION

A. Temporary Formwork and Shores: Construct formwork and shores as needed to support reinforced masonry elements during construction.

B. Construct formwork to provide shape, line, and dimensions of completed masonry as indicated. Make forms sufficiently tight to prevent leakage of mortar and grout. Brace, tie, and support forms to maintain position and shape during construction and curing of reinforced masonry.

4. Do not remove forms and shores until reinforced masonry members have hardened sufficiently to carry their own weight and other temporary loads that may be placed on them during construction.

B. Placing Reinforcement: Comply with requirements in ACI 530.1/ASCE 6/TMS 602 and Section 2104.5 in the Uniform Building Code.

C. Grouting: Do not place grout until entire height of masonry to be grouted has attained enough strength to resist grout pressure.

1. Comply with requirements in ACI 530.1/ASCE 6/TMS 602 and Section 2104.6 in the Uniform Building Code for cleanouts and for grout placement, including minimum grout space and maximum pour height.
2. Limit height of vertical grout pours to not more than 72 inches.

3.8 CLEANING

A. In-Progress Cleaning: Clean unit masonry as work progresses by dry brushing to remove mortar fins and smears before tooling joints.

B. Final Cleaning: After mortar is thoroughly set and cured, clean exposed masonry as follows:

1. Test cleaning methods on sample wall panel; leave one-half of panel un-cleaned for comparison purposes.
2. Protect adjacent surfaces from contact with cleaner.
3. Wet wall surfaces with water before applying cleaners; remove cleaners promptly by rinsing surfaces thoroughly with clear water.
4. Clean masonry with a proprietary acidic cleaner applied according to manufacturer's written instructions.
5. Clean concrete masonry by cleaning method indicated in NCMA TEK 8-2A applicable to type of stain on exposed surfaces.

C. Excess Masonry Waste: Remove excess masonry waste and legally dispose of off Owner's property.

END OF SECTION 04816

SECTION 05120 - **STRUCTURAL STEEL**

PART 1 - GENERAL **See General Structural Notes which take precedence.**

1.1 SUMMARY

A. This Section includes structural steel and grout.

1.2 PERFORMANCE REQUIREMENTS

A. Connections: Provide details of simple shear connections required by the Contract Documents to be selected or completed by structural-steel fabricator to withstand ASD-service & LRFD loads indicated and comply with other information and restrictions indicated.

1. Select and complete connections using schematic details indicated and AISC's "Manual of Steel Construction, Load and Resistance Factor Design," Volume 2, Part 9 & AISC's "Manual of Steel Construction, Allowable Stress Design," Part 4.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Shop Drawings: Show fabrication of structural-steel components.

C. Welding certificates.

D. Mill test reports.

E. Source quality-control test reports.

1.4 QUALITY ASSURANCE

A. Welding: Qualify procedures and personnel according to AWS D1.1, "Structural Welding Code--Steel."

B. Comply with applicable provisions of AISC's "Code of Standard Practice for Steel Buildings and Bridges."

PART 2 - PRODUCTS

2.1 STRUCTURAL-STEEL MATERIALS **See Structural General Notes & Drawings for Specifications:**

A. Channels, Angles

B. Cold-Formed Hollow Structural Sections:

C. Structural tubing.

D. Steel Pipe.

E. Welding Electrodes: Comply with AWS requirements.

2.2 BOLTS, CONNECTORS, AND ANCHORS **See General Structural Notes and Drawings for Specifications**

2.3 PRIMER

A. Primer: SSPC-Paint 25, Type II, iron oxide, zinc oxide, raw linseed oil, and alkyd.

B. Primer: Fabricator's standard lead- and chromate-free, non-asphaltic, rust-inhibiting primer.

2.4 GROUT

A. Metallic, Shrinkage-Resistant Grout: ASTM C 1107, factory-packaged, metallic aggregate grout, mixed with water to consistency suitable for application and a 30-minute working time.

B. Nonmetallic, Shrinkage-Resistant Grout: ASTM C 1107, factory-packaged, nonmetallic aggregate grout, noncorrosive, non-staining, mixed with water to consistency suitable for application and a 30-minute working time.

2.5 FABRICATION

A. Structural Steel: Fabricate and assemble in shop to greatest extent possible. Fabricate according to AISC's "Code of Standard Practice for Steel Buildings and Bridges" and AISC's "Specification for Structural Steel Buildings-Allowable Stress Design and Plastic Design &Load and Resistance Factor Design Specification for Structural Steel Buildings."

B. Shear Connectors: Prepare steel surfaces as recommended by manufacturer of shear connectors. Use automatic end welding of headed-stud shear connectors according to AWS D1.1 and manufacturer's written instructions.

2.6 SHOP CONNECTIONS

A. High-Strength Bolts: Shop install high-strength bolts according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts" for type of bolt and type of joint specified.

B. Weld Connections: Comply with AWS D1.1 for welding procedure specifications, tolerances, appearance, and quality of welds and for methods used in correcting welding work.

2.7 SHOP PRIMING

A. Shop prime steel surfaces except the following:

1. Surfaces embedded in concrete or mortar. Extend priming of partially embedded members to a depth of 2 inches
2. Surfaces to be field welded.
3. Surfaces to be high-strength bolted with slip-critical connections.
4. Surfaces to receive sprayed fire-resistive materials.
5. Galvanized surfaces.

B. Surface Preparation: Clean surfaces to be painted. Remove loose rust and mill scale and spatter, slag, or flux deposits. Prepare surfaces according to the following specifications and standards:

1. SSPC-SP 2, "Hand Tool Cleaning."
2. SSPC-SP 3, "Power Tool Cleaning."

C. Priming: Immediately after surface preparation, apply primer according to manufacturer's written instructions and at rate recommended by SSPC to provide a dry film thickness of not less than 1.5 mils. Use priming methods that result in full coverage of joints, corners, edges, and exposed surfaces.

2.8 SOURCE QUALITY CONTROL

A. Owner shall engage an independent testing and inspecting agency to perform shop tests and inspections and prepare test reports. Comply with testing and inspection requirements of Part 3, Article "Field Quality Control."

B. Contractor shall correct deficiencies in Work that test reports and inspections indicate does not comply with the Contract Documents.

C. In addition to visual inspection, shop-welded shear connectors will be tested and inspected according to requirements in AWS D1.1 for stud welding.

PART 3 - EXECUTION

3.1 ERECTION

A. Examination: Verify elevations of concrete- and masonry-bearing surfaces and locations of anchor rods, bearing plates, and other embedments, with steel erector present, for compliance with requirements.

1. Proceed with installation only after unsatisfactory conditions have been corrected.

B. Set structural steel accurately in locations and to elevations indicated and according to AISC's "Code of Standard Practice for Steel Buildings and Bridges" and "Specification for Structural Steel Buildings--Allowable Stress Design and Plastic Design, Load and Resistance Factor Design Specification for Structural Steel Buildings."

C. Base and Bearing Plates: Clean concrete- and masonry-bearing surfaces of bond-reducing materials, and roughen surfaces prior to setting base and bearing plates. Clean bottom surface of base and bearing plates.

1. Set base and bearing plates for structural members on wedges, shims, or setting nuts as required.
2. Weld plate washers to top of base plate.
3. Snug-tighten or Pretension anchor rods after supported members have been positioned and plumbed. Do not remove wedges or shims but, if protruding, cut off flush with edge of base or bearing plate before packing with grout.
4. Promptly pack grout solidly between bearing surfaces and base or bearing plates so no voids remain. Neatly finish exposed surfaces; protect grout and allow to cure. Comply with manufacturer's written installation instructions for shrinkage-resistant grouts.

D. Maintain erection tolerances of structural steel within AISC's "Code of Standard Practice for Steel Buildings and Bridges."

3.2 FIELD CONNECTIONS

A. High-Strength Bolts: Shop install high-strength bolts according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts" for type of bolt and type of joint specified.

1. Joint Type: Snug tightened or Pre-tensioned.

B. Weld Connections: Comply with AWS D1.1 for welding procedure specifications, tolerances, appearance, and quality of welds and for methods used in correcting welding work.

1. Comply with AISC's "Code of Standard Practice for Steel Buildings and Bridges" and "Specification for Structural Steel Buildings--Allowable Stress Design and Plastic Design, Load and Resistance Factor Design Specification for Structural

Steel Building" for bearing, adequacy of temporary connections, alignment, and removal of paint on surfaces adjacent to field welds.

3.3 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified independent testing and inspecting agency to inspect field welds and high-strength bolted connections.

B. Bolted Connections: Shop-bolted connections will be tested and inspected according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts."

C. Welded Connections: Field welds will be visually inspected according to AWS D1.1.

1. In addition to visual inspection, field welds will be tested according to AWS D1.1 and the following inspection procedures, at testing agency's option:

a. Liquid Penetrant Inspection: ASTM E 165.
b. Magnetic Particle Inspection: ASTM E 709; performed on root pass and on finished weld. Cracks or zones of incomplete fusion or penetration will not be accepted.
c. Ultrasonic Inspection: ASTM E 164.
d. Radiographic Inspection: ASTM E 94.

D. Contractor to correct deficiencies in Work that test reports and inspections indicate does not comply with the Contract Documents.

END OF SECTION 05120

SECTION 05310 - **STEEL DECK**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:
   1. Non-composite steel deck at Can Wash cover.

1.2 SUBMITTALS

A. Product Data: For each type of deck, accessory, and product indicated.

B. Shop Drawings: Include layout and types of deck panels, anchorage details, reinforcing channels, pans, deck openings, special jointing, accessories, and attachments to other construction.

C. Product certificates.

D. Welding certificates.

E. Research/evaluation reports.

1.3 QUALITY ASSURANCE

A. Welding: Qualify procedures and personnel according to AWS D1.1, "Structural Welding Code--Steel," and AWS D1.3, "Structural Welding Code--Sheet Steel."

B. Fire-Test-Response Characteristics: Where indicated, provide steel deck units identical to those steel deck units tested for fire resistance per ASTM E 119 by a testing and inspection agency acceptable to authorities having jurisdiction.

   1. Fire-Resistance Ratings: Indicated by design designations from UL's "Fire Resistance Directory" or from the listings of another testing and inspecting agency.
   2. Steel deck units shall be identified with appropriate markings of applicable testing and inspecting agency.

C. AISI Specifications: Calculate structural characteristics of steel deck according to AISI's "Specification for the Design of Cold-Formed Steel Structural Members."

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Basis of Design Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:
   1. VERCO or equal roof deck, 1.5 inch deep X 20 gage- **See Structural**

2.2 ROOF DECK

A. Steel Roof Deck:
   1. Galvanized Steel Sheet

2.3 ACCESSORIES

A. Accessories: Steel deck manufacturer's standard accessory materials, including mechanical fasteners, closure strips, pour stops, and closures for deck.

B. Shear Connectors: ASTM A 108, Grades 1010 through 1020 headed stud type, cold-finished carbon steel, AWS D1.1, Type B, with arc shields.

C. Galvanizing Repair Paint: ASTM A 780, or SSPC-Paint 20, or DOD-P-21035, with dry film containing a minimum of 94 percent zinc dust by weight.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install deck panels and accessories according to applicable specifications and commentary in SDI Publication No. 29, manufacturer's written instructions, and requirements in this Section.

B. Place deck panels on supporting frame and adjust to final position with ends accurately aligned and bearing on supporting frame before being permanently fastened. Do not stretch or contract side-lap interlocks.

C. Place deck panels flat and square and fasten to supporting frame without warp or deflection.

D. Cut and neatly fit deck panels and accessories around openings and other work projecting through or adjacent to decking.

E. Provide additional reinforcement and closure pieces at openings as required for strength, continuity of decking, and support of other work.

F. Comply with AWS requirements and procedures for manual shielded metal arc welding, appearance and quality of welds, and methods used for correcting welding work.

1. Mechanical fasteners may be used in lieu of welding to fasten deck. Locate mechanical fasteners and install according to deck manufacturer's written instructions.

G. Roof Deck Accessories: Install sump pans and sump plates, ridge and valley plates, finish strips, cover plates, end closures, and reinforcing channels according to deck manufacturer's written instructions. Fasten to substrate to provide a complete deck installation.

H. Repairs and Protection:

1. Galvanizing Repairs: Prepare and repair damaged galvanized coatings on both surfaces of deck with galvanized repair paint according to ASTM A 780 and manufacturer's written instructions.
2. Repair Painting: Wire brush and clean rust spots, welds, and abraded areas on both surfaces of prime-painted deck immediately after installation, and apply repair paint.

3.2 FIELD QUALITY CONTROL

A. Testing: Owner will engage a qualified independent testing agency to perform field quality-control testing.

B. Field welds will be subject to inspection.

C. Shear connector stud welds will be tested and inspected according to AWS D1.1.

D. Remove and replace work that does not comply with specified requirements.

E. Additional testing and inspecting, at Contractor's expense, will be performed to determine compliance of corrected work with specified requirements.

END OF SECTION 05310

SECTION 05500 - **METAL FABRICATIONS**

PART 1 - GENERAL

1.1 SUMMARY **See General Structural Notes & Drawings which take precedence.**

A. This Section includes the following:

1. Stair railings.

2. Steel weld plates and angles.

3. Miscellaneous steel trim.

1.2 SUBMITTALS

A. Shop Drawings: Include plans, elevations, sections, and details of metal fabrications and their connections. Show anchorage and accessory items.

B. Templates: For anchors and bolts.

PART 2 - PRODUCTS

2.1 METALS

A. Metal Surfaces, General: Provide materials with smooth, flat surfaces without blemishes.

B. Ferrous Metals:

1. Steel Plates, Shapes, and Bars: ASTM A 36.

2.2 FASTENERS

A. General: Type 304 or 316 stainless steel fasteners for exterior use and zinc-plated fasteners with coating complying with ASTM B 633, Class Fe/Zn 5, at exterior walls. Provide stainless-steel fasteners for fastening aluminum. Select fasteners for type, grade, and class required.

B. Cast-in-Place Anchors in Concrete: Threaded or wedge type; galvanized ferrous castings, either ASTM A 47 malleable iron or ASTM A 27 cast steel. Provide bolts, washers, and shims as needed, hot-dip galvanized per ASTM A 153.

2.3 MISCELLANEOUS MATERIALS

A. Universal Shop Primer: Fast-curing, lead- and chromate-free, universal modified-alkyd primer complying with MPI #79.

B. Zinc-Rich Primer: Complying with SSPC-Paint 20 or SSPC-Paint 29 and compatible with topcoat.

1. Products:

a. Benjamin Moore & Co.; Epoxy Zinc-Rich Primer CM18/19.

b. International Coatings Limited; Interzinc 315 Epoxy Zinc-Rich Primer.

c. PPG Architectural Finishes, Inc.; Aquapon Zinc-Rich Primer 97-670.

d. Sherwin-Williams Company (The); Corothane I GalvaPac Zinc Primer.

e. Tnemec Company, Inc.; Tneme-Zinc 90-97.

C. Galvanizing Repair Paint: SSPC-Paint 20, high-zinc-dust-content paint for re-galvanizing welds in steel.

D. Non-shrink, Nonmetallic Grout: Factory-packaged, non-staining, noncorrosive, nongaseous grout complying with ASTM C 1107.

E. Concrete Materials and Properties: Comply with requirements in Division 3 Section "Cast-in-Place Concrete" for normal-weight, air-entrained, ready-mix concrete with a minimum 28-day compressive strength of 3000 psi unless otherwise indicated.

2.4 FABRICATION

A. General: Pre-assemble items in the shop to greatest extent possible. Use connections that maintain structural value of joined pieces.

1. Cut, drill, and punch metals cleanly and accurately. Remove burrs and ease edges. Remove sharp or rough areas on exposed surfaces.

2. Weld corners and seams continuously. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals. Obtain fusion without undercut or overlap. Remove welding flux immediately. Finish exposed welds smooth and blended.

3. Form exposed connections with hairline joints, flush and smooth, using concealed fasteners where possible. Locate joints where least conspicuous.

4. Fabricate seams and other connections that will be exposed to weather in a manner to exclude water. Provide weep holes where water may accumulate.

5. Where units are indicated to be cast into concrete or built into masonry, equip with integrally welded steel strap anchors, not less than 24 inches o.c.

B. Shelf Angles: Fabricate shelf angles of sizes indicated and for attachment to framing. Fabricate with horizontally slotted holes to receive 3/4-inch bolts, spaced not more than 6 inches from ends and 24 inches o.c.

1. Shelf Angles on Exterior Walls: Prime with zinc-rich primer.

C. Miscellaneous Steel Trim: Fabricate units from steel shapes, plates, and bars of profiles shown with continuously welded joints and smooth exposed edges. Miter corners and use concealed field splices where possible. Provide cutouts, fittings, and anchorages as needed to coordinate assembly and installation with other work.

1. Exterior Miscellaneous Steel Trim: Prime with zinc-rich primer.

2.5 FINISHES

A. Comply with NAAMM's "Metal Finishes Manual for Architectural and Metal Products" for recommendations for applying and designating finishes. Finish metal fabrications after assembly.

B. Steel and Iron Finishes:

1. Hot-dip galvanize items as indicated to comply with ASTM A 123/A 123M or ASTM A 153/A 153M as applicable.
2. Preparation for Shop Priming: Prepare uncoated ferrous-metal surfaces to comply with requirements indicated below for environmental exposure conditions of installed metal fabrications:

a. Exteriors (SSPC Zone 1B) and Items Indicated to Receive Zinc-Rich Primer: SSPC-SP 6/NACE No. 3, "Commercial Blast Cleaning."

b. Interiors (SSPC Zone 1A): SSPC-SP 3, "Power Tool Cleaning."

3. Shop Priming: Apply shop primer to uncoated surfaces of metal fabrications, except those with galvanized finishes and those to be embedded in concrete, sprayed-on fireproofing, or masonry, to comply with SSPC-PA 1, "Paint Application Specification No. 1: Shop, Field, and Maintenance Painting," for shop painting.

PART 3 - EXECUTION

3.1 INSTALLATION

A. General: Perform cutting, drilling, and fitting required for installing metal fabrications. Set metal fabrications accurately in location, with edges and surfaces level, plumb, and true.

1. Fit exposed connections accurately together. Weld connections that are not to be left as exposed joints but cannot be shop welded. Do not weld, cut, or abrade surfaces of exterior units that have been hot-dip galvanized after fabrication.

2. Provide anchorage devices and fasteners where metal fabrications are required to be fastened to in-place construction.

3. Provide temporary bracing or anchors in formwork for items that are to be built into concrete, masonry, or similar construction.

B. Set bearing and leveling plates on cleaned surfaces using wedges, shims, or leveling nuts. After bearing members have been positioned and plumbed, tighten anchor bolts and pack solidly with non-shrink, nonmetallic grout.

C. Touch up surfaces and finishes after erection.

1. Painted Surfaces: Clean field welds, bolted connections, and abraded areas and touch up paint with the same material as used for shop painting.

2. Galvanized Surfaces: Clean field welds, bolted connections, and abraded areas and repair galvanizing to comply with ASTM A 780.

END OF SECTION 05500- METAL FABRICATIONS

SECTION 06100 - **ROUGH CARPENTRY**

PART 1 - GENERAL

1.1 SUMMARY **See General Structural Notes & Drawings which take precedence.**

A. This Section includes the following:
   1. Framing with dimension lumber.
   2. Plywood backing panels.

B. Product Data: For each type of process and factory-fabricated product.

1.2 QUALITY ASSURANCE

A. Forest Certification: For the following wood products, provide materials produced from wood obtained from forests certified by an FSC-accredited certification body to comply with FSC STD-01-001, "FSC Principles and Criteria for Forest Stewardship":

   1. Dimension lumber framing.
   2. Miscellaneous lumber.

PART 2 - PRODUCTS

2.1 WOOD PRODUCTS, GENERAL

A. Lumber: DOC PS 20 and applicable rules of grading agencies indicated. If no grading agency is indicated, provide lumber that complies with the applicable rules of any rules-writing agency certified by the ALSC Board of Review. Provide lumber graded by an agency certified by the ALSC Board of Review to inspect and grade lumber under the rules indicated.

   1. Factory mark each piece of lumber with grade stamp of grading agency.
   2. Provide dressed lumber, S4S, unless otherwise indicated.

B. Engineered Wood Products: Provide engineered wood products acceptable to authorities having jurisdiction and for which current model code research or evaluation reports exist that show compliance with building code in effect for Project.

   1. Allowable Design Stresses: Provide engineered wood products with allowable design stresses, as published by manufacturer, that meet or exceed those indicated. Manufacturer's published values shall be determined from empirical data or by rational engineering analysis and demonstrated by comprehensive testing performed by a qualified independent testing agency.

2.2 DIMENSION LUMBER FRAMING

A. Maximum Moisture Content: 19 percent.

B. Framing: No. 2 grade of the following species:
   1. Douglas fir-larch; WCLIB or WWPA.

2.3 MISCELLANEOUS LUMBER

A. General: Provide miscellaneous lumber indicated and lumber for support or attachment of other construction, including the following:

   1. Blocking.
   2. Nailers.
   3. Cants.
   4. Furring.
   5. Grounds.

B. For items of dimension lumber size, provide Construction or No. 2 grade lumber with 19 percent maximum moisture content of any species.

C. For concealed boards, provide lumber with 19 percent maximum moisture content and any of the following species and grades:
   1. Western woods, Construction or No. 2 Common grade; WCLIB or WWPA.

2.4 PLYWOOD BACKING PANELS

A. Telephone and Electrical Equipment Backing Panels: DOC PS 1, Exterior, AC, fire-retardant treated, in thickness indicated or, if not indicated, not less than 3/4-inch nominal thickness.

2.5 FASTENERS

A. General: Provide fasteners of size and type indicated that comply with requirements specified.

   1. Where rough carpentry is exposed to weather, in ground contact, pressure-preservative treated, or in area of high relative humidity, provide fasteners with hot-dip zinc coating complying with ASTM A 153/A 153M.

B. Power-Driven Fasteners: NES NER-272.

C. Bolts: Steel bolts complying with ASTM A 307 or Grade A with ASTM A 563 hex nuts and, where indicated, flat washers.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Set rough carpentry to required levels and lines, with members plumb, true to line, cut, and fitted. Fit rough carpentry to other construction; scribe and cope as needed for accurate fit. Locate furring, nailers, blocking, grounds, and similar supports to comply with requirements for attaching other construction.

B. Where wood-preservative-treated lumber is installed adjacent to metal decking, install continuous flexible flashing separator between wood and metal decking.

C. Comply with AWPA M4 for applying field treatment to cut surfaces of preservative-treated lumber.

D. Securely attach rough carpentry work to substrate by anchoring and fastening as indicated, complying with the following:

1. NES NER-272 for power-driven fasteners.
2. Table 2304.9.1, "Fastening Schedule," in ICC's International Building Code.

END OF SECTION 06100

SECTION 06160 - **SHEATHING**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Plywood Roof Sheathing- **see Structural GSN.**

1.2 ACTION SUBMITTALS

A. Product Data: For each type of process and factory-fabricated product. Indicate component materials and dimensions and include construction and application details.

   1. Include data for wood-preservative treatment from chemical treatment manufacturer and certification by treating plant that treated plywood complies with requirements.
   2. Include data for fire-retardant treatment from chemical treatment manufacturer and certification by treating plant that treated plywood complies with requirements.

1.3 INFORMATIONAL SUBMITTALS

A. Evaluation Reports: For following products, from ICC-ES:

   1. Preservative-treated plywood.
   2. Fire-retardant-treated plywood.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Fire-Test-Response Characteristics: For assemblies with fire-resistance ratings, provide materials and construction identical to those of assemblies tested for fire resistance per ASTM E 119 by a testing and inspecting agency acceptable to authorities having jurisdiction.

   1. Fire-Resistance Ratings: Indicated by design designations from UL's "Fire Resistance Directory."

2.2 FASTENERS

A. General: Provide fasteners of size and type indicated that comply with requirements specified in this article for material and manufacture.

1. For roof and wall sheathing, provide fasteners with hot-dip zinc coating complying with ASTM A 153/A 153M of Type 304 stainless steel.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Do not use materials with defects that impair quality of sheathing or pieces that are too small to use with minimum number of joints or optimum joint arrangement. Arrange joints so that pieces do not span between fewer than three support members.

B. Cut panels at penetrations, edges, and other obstructions of work; fit tightly against abutting construction unless otherwise indicated.

C. Securely attach to substrate by fastening as indicated, complying with the following:

1. NES NER-272 for power-driven fasteners.
2. Table 2304.9.1, "Fastening Schedule," in ICC's "International Building Code."
3. Table R602.3(1), "Fastener Schedule for Structural Members"

D. Coordinate wall sheathing installation with water-proofing, flashing and joint-sealant installation so these materials are installed in sequence and manner that prevent exterior moisture from passing through completed assembly.

E. Do not bridge building expansion joints; cut and space edges of panels to match spacing of structural support elements.
1. Apply glass-fiber sheathing tape to glass-mat gypsum sheathing joints and apply and trowel silicone emulsion sealant to embed entire face of tape in sealant. Apply sealant to exposed fasteners with a trowel so fasteners are completely covered. Seal other penetrations and openings.

END OF SECTION 06160

SECTION 06402 - **INTERIOR ARCHITECTURAL WOODWORK**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes interior woodwork including for the following applications:
   1. Plastic-laminate cabinets.
   2. Solid-surfacing-material countertops.

B. Interior architectural woodwork includes wood furring, blocking, shims, and hanging strips, unless concealed within other construction before woodwork installation.

1.2 SUBMITTALS

A. Product Data: For the following:

   1. Cabinet hardware and accessories.
   2. Finishing materials and processes.

B. Shop Drawings: Include location of each item, plans and elevations, large-scale details, attachment devices, and other components.

C. Samples:
   1. Plastic-laminate-clad panel products, for each type, color, pattern, and surface finish.
   2. Thermoset decorative-overlay surfaced panel products, for each type, color, pattern, and surface finish.
   3. Solid-surfacing materials.

1.3 QUALITY ASSURANCE

A. Installer Qualifications: Fabricator of woodwork.

B. Quality Standard: Unless otherwise indicated, comply with AWI's "Architectural Woodwork Quality Standards" for grades of interior architectural woodwork, construction, finishes, and other requirements.

   1. Provide AWI certification labels or compliance certificate indicating that woodwork complies with requirements of grades specified.

1.4 PROJECT CONDITIONS

A. Environmental Limitations: Do not deliver or install woodwork until building is enclosed, wet work is complete, and HVAC system is operating and maintaining

temperature and relative humidity at levels planned for building occupants during the remainder of the construction period.

PART 2 - PRODUCTS

2.1 WOODWORK FABRICATORS

A. Fabricators: Subject to compliance with requirements.

2.2 MATERIALS

A. Wood Products:

1. Solid Hardboard: AHA A135.4.
2. Medium-Density Fiberboard: ANSI A208.2, Grade MD
3. Particleboard: ANSI A208.1, Grade M-2
4. Softwood Plywood: DOC PS 1, Medium Density Overlay.
5. Hardwood Plywood and Face Veneers: HPVA HP-1 made with adhesive containing no urea formaldehyde.

B. Thermoset Decorative Overlay: Particleboard or medium-density fiberboard with surface of thermally fused, melamine-impregnated decorative paper complying with LMA SAT-1.

C. High-Pressure Decorative Laminate: NEMA LD 3.
1. Manufacturers: Subject to compliance with requirements, provide products by the following:

a. **NEVAMAR** (Basis of Design Product). Colors and textures as indicated in the Drawings.

D. Solid-Surfacing Material: Homogeneous solid sheets of filled plastic resin complying with ANSI Z124.3, for Type 5 or Type 6 material and performance requirements, without a pre-coated finish.
1. Manufacturers: Subject to compliance with requirements, provide products by the following:

a. **WILSONART** (Basis of Design Product) as indicated in the Drawings

2.3 CABINET HARDWARE AND ACCESSORIES

A. General: Provide cabinet hardware and accessory materials for a complete installation of architectural woodwork.

B. Hardware Standard: Comply with BHMA A156.9 for items indicated by referencing BHMA numbers or items referenced to this standard.

C. Frameless Concealed Hinges (European Type): BHMA A156.9, B01602, self-closing

D. Back-Mounted Pulls: BHMA A156.9, B02011. (Brushed Nickel Finish).

E. Catches: Magnetic, BHMA A156.9, B03141

F. Adjustable Shelf Standards and Supports: BHMA A156.9, B04071; with shelf rests, B04081

G. Drawer Slides: Side-mounted, full-extension, zinc-plated steel drawer slides with steel ball bearings, BHMA A156.9, B05091, and rated for the following loads:

1. Box Drawer Slides: 100 lbf
2. File Drawer Slides: 200 lbf (heavy duty)
3. Pencil Drawer Slides: 45 lbf

H. Door Locks: BHMA A156.11, E07121, include catch at inactive door, all master keyed to one key, each room on separate key.

I. Drawer Locks: BHMA A156.11, E07041

J. Exposed Hardware Finishes: Complying with BHMA A156.18 for BHMA finish number indicated.
1. Nickel Plated, Brushed Satin Finish, Steel Base Material

2.4 INSTALLATION MATERIALS

A. Furring, Blocking, Shims, and Hanging Strips: Softwood or hardwood lumber, kiln-dried to less than 15 percent moisture content.

B. Handrail Brackets: Extruded Stamped from malleable iron with wall flange drilled for exposed anchor, drilled and tapped for concealed hanger bolt and with support arm for screwing to underside of rail. Sized to provide 1-1/2-inch clearance between handrail and wall.

2.5 FABRICATION

A. General: Complete fabrication to maximum extent possible before shipment to Project site. Where necessary for fitting at site, provide allowance for scribing, trimming, and fitting.

1. Interior Woodwork Grade: **Custom grade** complying with the referenced quality standard.
2. Shop cut openings to maximum extent possible. Sand edges of cutouts to remove splinters and burrs.
3. Install glass to comply with applicable requirements in Division 8 Section "Glazing" and in GANA's "Glazing Manual." For glass in wood frames, secure glass with removable stops.

4. For trim items wider than available lumber, use veneered construction. Do not glue for width.
5. Back-out or groove backs of flat trim members and kerf backs of other wide, flat members, except for members with ends exposed in finished work.
6. Assemble casings in plant except where limitations of access to place of installation require field assembly.

7. Provide dust panels of 1/4-inch plywood or tempered hardboard above compartments and drawers, unless located directly under tops.

B. Plastic-Laminate Cabinets:
1. AWI Type of Cabinet Construction: Flush overlay on face frame or as indicated.
2. Laminate Cladding for Exposed Surfaces: High-pressure decorative of grade indicated.

a. Horizontal Surfaces other than countertops.
b. Post-formed Surfaces
c. Vertical Surfaces
d. Edges 0.018-inch minimum thickness, matching laminate in color, pattern.

3. Materials for Semi-exposed Surfaces Other Than Drawer Bodies: High-pressure decorative laminate, Grade VGS

a. Drawer Sides and Backs: Thermoset decorative overlay.
b. Drawer Bottoms: Thermoset decorative overlay.

4. Colors, Patterns, and Finishes: As indicated on the Drawings.
5. Provide dust panels of 1/4-inch plywood or tempered hardboard above compartments and drawers, unless located directly under tops.

C. Plastic-Laminate Countertops:

1. High-Pressure Decorative Laminate.
2. Colors, Patterns, and Finishes: As indicated on the Drawings.
3. Edge Treatment: Same as laminate cladding on horizontal and vertical surfaces.
4. Core Material at Sinks: Medium-density fiberboard made with exterior glue.

D. Solid-Surfacing-Material Countertops:

1. Solid-Surfacing-Material Thickness: 1/2 inch
2. Colors, Patterns, and Finishes: As indicated by manufacturer's designations on the Drawings
3. Comply with solid-surfacing-material manufacturer's written recommendations for adhesives, sealers, fabrication, and finishing.

2.6 SHOP FINISHING

A. Finish architectural woodwork at fabrication shop. Defer only final touchup, cleaning, and polishing until after installation.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Condition woodwork to average prevailing humidity conditions in installation areas and examine and complete work as required, including removal of packing and back priming before installation.

B. Quality Standard: Install woodwork to comply with AWI Section 1700 for the same grade specified in this Section for type of woodwork involved.

C. Quality Standard: Install woodwork to comply with WIC Section 26 for the same grade specified in this Section for type of woodwork involved.

D. Install woodwork level, plumb, true, and straight to a tolerance of 1/8 inch in 96 inches. Shim as required with concealed shims.

E. Scribe and cut woodwork to fit adjoining work, and refinish cut surfaces and repair damaged finish at cuts.

F. Anchor woodwork to anchors or blocking built in or directly attached to substrates. Secure with countersunk, concealed fasteners and blind nailing as required for complete installation. Use fine finishing nails or finishing screws for exposed fastening, countersunk and filled flush with woodwork and matching final finish if transparent finish is indicated.

G. Cabinets: Install without distortion so doors and drawers fit openings properly and are accurately aligned. Adjust hardware to center doors and drawers in openings and to provide unencumbered operation.

1. Fasten wall cabinets through back, near top and bottom, at ends and not more than 16 inches o.c. with No. 10 wafer-head screws sized for 1-inch penetration into wood framing, blocking, or hanging strips or No. 10 wafer-head sheet metal screws through metal backing or metal framing behind wall finish.

H. Countertops: Anchor securely by screwing through corner blocks of base cabinets or other supports into underside of countertop. Caulk space between backsplash and wall with sealant specified in Division 7 Section "Joint Sealants."

I. Radius edges on all Millwork Countertops at all exposed corners.

J. Paneling: Anchor paneling to supporting substrate with concealed panel-hanger clips or splined connection strips. Do not use face fastening, unless covered by trim.

SECTION 07141 - **COLD FLUID-APPLIED WATERPROOFING**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Single-component modified polyurethane waterproofing.

B. Related Section: Division 7 Section "Joint Sealants" for joint-sealant materials and installation.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Product test reports.

1.3 QUALITY ASSURANCE

A. Installer Qualifications: A firm that is acceptable to waterproofing manufacturer for installation of waterproofing required for this Project.

B. Pre-installation Conference: Conduct conference at Project site.

1. Review waterproofing requirements including surface preparation, substrate condition and pretreatment, minimum curing period, forecasted weather conditions, special details and flashings, installation procedures, testing and inspection procedures, and protection and repairs.

1.4 PROJECT CONDITIONS

A. Environmental Limitations: Apply waterproofing within the range of ambient and substrate temperatures recommended by waterproofing manufacturer.

1.5 WARRANTY

A. Special Manufacturer's Warranty: Manufacturer's standard form in which waterproofing manufacturer and Installer agree to repair or replace waterproofing that does not comply with requirements or that fails to remain watertight within specified warranty period.

1. Warranty Period: Five years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 SINGLE-COMPONENT POLYURETHANE WATERPROOFING

A. Single-Component, Modified Polyurethane Waterproofing: Comply with ASTM C 836 and with manufacturer's written physical requirements.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:

a. Carlisle Coatings & Waterproofing Inc.; CCW-525, or equal.

2.2 AUXILIARY MATERIALS

A. Primer: Manufacturer's standard, factory-formulated polyurethane or epoxy primer.

B. Sheet Flashing: 50-mil- minimum, non-staining, uncured sheet neoprene.

1. Adhesive: Manufacturer's recommended contact adhesive.

C. Membrane-Reinforcing Fabric: Nonwoven, needle-punched white polyester fabric.

D. Joint Reinforcing Strip: Manufacturer's recommended fiberglass mesh or polyester fabric.

2.3 PROTECTION COURSE

A. Protection Course: Molded-polystyrene board insulation, ASTM C 578, Type I, 0.90-lb/cu. ft. minimum density, 1-inch minimum thickness.

PART 3 - EXECUTION

3.1 SURFACE PREPARATION

A. Clean and prepare substrate according to manufacturer's written recommendations. Provide clean, dust-free, and dry substrate for waterproofing application.

B. Mask off adjoining surfaces not receiving waterproofing to prevent spillage or overspray affecting other construction.

C. Remove grease, oil, bitumen, form-release agents, paints, curing compounds, acid residues, and other penetrating contaminants or film-forming coatings from concrete.

D. Remove fins, ridges, and other projections and fill honeycomb, aggregate pockets, and other voids.

E. Prepare vertical and horizontal surfaces at terminations and penetrations through waterproofing and at expansion joints, drains, and sleeves according to ASTM C 1471 and manufacturer's written instructions.

1. Apply waterproofing in two separate applications and embed a joint reinforcing strip in the first preparation coat when recommended by waterproofing manufacturer.

F. Prepare, treat, rout, and fill joints and cracks in substrate according to ASTM C 1471 and waterproofing manufacturer's written instructions. Remove dust and dirt from joints and cracks, complying with ASTM D 4258, before coating surfaces.

G. Install sheet flashing and bond to wall substrates where indicated or required according to waterproofing manufacturer's written instructions.

1. Extend sheet flashings onto perpendicular surfaces and other work penetrating substrate according to ASTM C 898.

3.2 WATERPROOFING APPLICATION

A. Apply waterproofing according to ASTM C 1471 and manufacturer's written instructions.

B. Unreinforced Waterproofing Applications:

1. Apply one or more coats of waterproofing to obtain a seamless membrane free of entrapped gases, with an average dry film thickness of 60 mils and a minimum dry film thickness of 50 mils at any point.

C. Install protection course with butted joints over nominally cured membrane before starting subsequent construction operations.

1. Board insulation may be used in place of a separate protection course to vertical applications when approved by waterproofing manufacturer.

3.3 CURING, PROTECTION, AND CLEANING

A. Cure waterproofing according to manufacturer's written recommendations, taking care to prevent contamination and damage during application stages and curing.

B. Protect waterproofing from damage and wear during remainder of construction period.

C. Clean spillage and soiling from adjacent construction using cleaning agents and procedures recommended by manufacturer of affected construction.

END OF SECTION 07141

SECTION 07210 - **BUILDING INSULATION**

PART 1 - GENERAL –

1.1 SUMMARY

A. This Section includes the following:

1. Concealed building insulation.
2. Acoustical batt insulation
3. Extruded Polystyrene Board Insulation Furring System.

1.2 SUBMITTALS

A. Product Data: For each product indicated.

B. Product test reports.

C. Research/evaluation reports.

1.3 QUALITY ASSURANCE

A. Fire-Test-Response Characteristics: Provide insulation and related materials with the fire-test-response characteristics indicated, as determined by testing identical products per ASTM E 84 for surface-burning characteristics and other methods indicated with product, by UL or another testing and inspecting agency acceptable to authorities having jurisdiction. Identify materials with appropriate markings of applicable testing and inspecting agency.

PART 2 - PRODUCTS

2.1 INSULATING MATERIALS

A. General: Provide insulating materials that comply with requirements and with referenced standards and, for preformed units, in sizes to fit applications indicated, selected from manufacturer's standard thicknesses, widths, and lengths.
1. Batts shall be a single thickness to meet required R-Values. Multiple Layers will not be accepted.

B. Acoustical Batt Insulation:

1. Unfaced, Formaldehyde Free Flexible Glass-Fiber Insulation: ASTM C 612, Type IA; ASTM C 553, Types I, II, and III; or ASTM C 665, Type I; with maximum

flame-spread and smoke-developed indices of 25 and 50, respectively; and of the following properties:

a. Combustion Characteristics: Passes ASTM E 136.
b. Wall Insulation: OWENS CORNING EcoTouch PINK Fiberglass, in thicknesses and R-Values indicated on Drawings.
c. Above Offices Ceiling- OWENS CORNING EcoTouch SONOBATTS Insulation with PureFiber Technology, 6.25 inch, R-19.
d. Locations: where indicated on Drawings.
e. Walls: Existing acoustical wall insulation shall be verified and installed where missing, at new walls, and in walls being extended to underside of deck.
f. Above Ceiling: Provide acoustical batts throughout all Administrative Office Areas and where missing in ceiling above Activity Room 3 (Suite 106).

C. Building Batt Insulation:

1. Kraft faced, Formaldehyde Free Flexible Glass-Fiber Insulation: ASTM C 612, Type IA; ASTM C 553, Types I, II, and III; or ASTM C 665, Type I; with maximum flame-spread and smoke-developed indices of 25 and 50, respectively; and of the following properties:
   a. Combustion Characteristics: Passes ASTM E 136.
   b. Resistance values: General: Wall & Roof Insulation, match existing where missing or disturbed by new work.
   c. R-Values for new insulation: Walls: R-20, Ceilings/Attics: R-38.

D. Black Vinyl Scrim:

1. 6-mil black vinyl scrim covering any exposed building fiberglass batts at underside of roof.
   a. Wire to exposed structure for a tight, uniform, neat appearance where exposed to view.

E. Extruded Polystyrene Board Insulation: ASTM C 578, Type IV

1. Basis of Design Product: CERTISTUD, DiversiFoam Products, Inc., CertiFoam brand pre-furred wall insulation, 2 inch X 48 inches X 96 inches, rigid extruded polystyrene foam board with imbedded furring strips at 24 inches on center: R-10.

PART 3 - EXECUTION

3.1 INSTALLATION

A. General: Install insulation to comply with insulation manufacturer's written instructions applicable to products and application indicated. Extend insulation in thickness indicated to envelop entire area to be insulated. Cut and fit tightly around obstructions and fill voids with insulation. Remove projections that interfere with placement.

B. Replace Building Insulation in kind where missing and disturbed by new work.

C. **DO NOT place above ceiling acoustical batts over, or within 3 inches of recessed light fixtures that are not ICC rated.**

D. Wire black vinyl scrim over R-38 fiberglass batt insulation to exposed structure for a tight, uniform appearance where exposed to view.

E. Mechanically fasten extruded polystyrene boards vertically to CMU walls where indicated and cover with 5/8 inch gypsum board sheathing oriented horizontally with staggered running bond pattern seams.

END OF SECTION 07210

SECTION 07570

COATED FOAM INSULATED ROOFING SYSTEM

SCOPE - WORK SPECIFIED **NOTE: Contractor to coordinate with City of Buckeye Public Works Director Scott Lowe or Facilities Director Scott Tijerina for approved roofer and product specifications via interface with existing Warranty on recently installed spray foam roof.**

All labor, materials, transportation, storage facilities, equipment, and services necessary to furnish and install spray applied monolithic rigid urethane insulation and waterproofing and protection systems, including all accessories and devices necessary to complete the roof insulation and waterproofing as indicated and specified.

SUBMITTAL QUALIFICATIONS

Submit manufacturer's technical product data, application rates, installation and maintenance instructions, proposed details and manufacturer-contractor warranty for the system prior to start of installation. Submit a complete fully cured sample of the roofing system proposed. Sample shall be at least 4 inches by eight inches, having the full depth of all materials as specified and intended. Each component layer shall be drawn back in a fashion exposing each successive component of the system.

WARRANTY

A representative of the system or manufacturer shall provide a final inspection and punch list of the installation prior to issuing Substantial Completion. This punch list shall be given to the Owner and shall become part of the contractor's punch list work. This is required by the Owner whether or not it is a condition of the manufacturer for issuance of the warranty.

The roof system shall be guaranteed to be free from defects, leakage or deterioration, for a period of ten years from the date of final installation acceptance. Warranties from different sources shall be combined into a single warranty offering the Owner a single source of responsibility for all warranty items.

The warranty shall cover 100% of the cost of labor and materials necessary to restore watertightness or deterioration throughout the period of the warranty. As condition of the warranty, the Contractor agrees to respond to warrantee repair requests within four (4) hours of the call and complete all repairs or work within 24 hours of the repair request. If repairs cannot be completed within the 24 hour period, temporary repairs providing a watertight assembly must be completed before leaving the Project site.

As part of the warranty, the roofer or manufacturer shall conduct an annual inspection of the roof and provide a written inspection report to the Owner.

APPROVED APPLICATORS and QUALITY ASSURANCE

The contractor shall be a factory or manufacturer certified and trained installer of the proposed system.

Installers must has successfully completed at least five roof systems of the same type and size as this project within the past three years. The lead installer or foreman must have experience in this roof type application.

A pre-installation meeting with the contractor, Owner and campus representative shall be held at least one week prior to beginning the work. Methods and procedures to be used shall be discussed, including inspection and discussion of the substrate; conditions of all penetrations, including roof drains; preparatory work required; review of any apparent structural deficiencies, including inspection of deck for flatness; review of the roofing system requirements, specifications and details; finalize schedule and availability of

materials and crews; coordination of campus operation issues and potential conflicts; and review of any in-progress or final inspections by the system/materials manufacturer necessary to obtain the warranty.

All areas which fail to meet specification requirements with respect to thickness, foam quality, etc., shall be repaired and resprayed at the expense of foam applicator.

PRODUCT HANDLING

1. Product handling shall be as per manufacturer's instructions.

2. Urethane insulation, waterproofing materials, aggregates and protective coatings shall be processed and applied, using only that equipment specifically designed for roofing application.

3. All materials shall be stored and protected from excessive heat and cold, in accordance with materials manufacturer's instructions.

4. Provide verification that products approved are products installed on the job.

INSPECTIONS AND CONDITIONS OF SURFACES

1. Manufacturer's representative is to provide a "pre-project inspection report" prior to any work commencing.

2. At the completion of the roofing project, manufacturer's representative is to provide a "completed project inspection report".

3. Roofer shall assume inspect the subsurface to receive the new roofing system and provide written notification to the Owner of any unacceptable conditions. Start of installation of the new roofing system indicates acceptance of substrate for application of the roofing and waives any future claims for pre-existing conditions.

TESTS AND CERTIFICATIONS

The insulations used in the roofing system must be tested and acceptable as a composite roof covering in accordance with UL-790 test methods. The roofing system shall meet the requirements for:

A. Class A spread of flame in accordance with E-108 fire test for roof coverings.
B. Test for insulated roof deck construction in accordance with U.L. 1256.

The entire system, as installed, shall have a Class A rating and have a current I.C.B.O. approval.

MATERIALS

Changes to the materials and applications rates shall be made for prior approved systems. All materials used shall have U.L approval and show U.L. labels on the wrapping or containers.

1. Primer shall be General Polymers, applied at the rate of 300 square feet per gallon.

2. Urethane foam insulation shall be a two-component spray applied polyurethane foam manufactured for roofing applications. Install a minimum of 1 1/2" of foam throughout, with thicker application as necessary to provide positive drainage in all areas of the roof. Application shall result in a high quality seamless layer of urethane insulation meeting the following requirements:

	ASTM Method	Minimum Property
Density in place	D-1622	2.5 to 3.0 lb/ft
Compressive strength	D-1621	40 psi
Tensile strength	D-1623	60 psi
"k" Factor	C-518	.14 to .18 per inch
Closed cell content	D-2856	90+
Dimensional stability		
% volume change	D-2126	NET CHANGE:
at 100% RH:	1 week	2%
	4 weeks	8%

Surface Burning Characteristics per U.L. 723, ASTM E-84:
Flamespread: 30 Contribution: 0 Smoke Density: 500+

The foam shall be CFC free.

3. Fluid Applied Waterproofing at Vertical Surfaces:

a. Shall be one component elastomeric coating.

b. Shall be spray applied in a two three coat application.

c. Shall result in a total average dry film thickness of 30 mils.

d. Application of fluid applied waterproofing shall result in a seamless membrane with the following performance requirements:

Tensile Strength	ASTM-D412	440 psi @ 0°/250 @ 75°
Elongation	ASTM-D412	320%
Hardness Shore "A"	ASTM-D2240	5565 Shore A
Permeance @ 20 mils	ASTM-E398	2.9 perms
Fire Resistance	#108	System rated Class "A" by Underwriters Lab
Color		White

4. Cementitious Coating shall be manufactured for use in the proposed roofing system. The coating shall be a one or two part system, composed of cementitious asbestos-free powder and a compatible acrylic emulsion. The coating shall be applied in two separate passes resulting in at least an average thickness of 1/4" on all horizontal roof surfaces. The material characteristics shall meet or exceed:

Color		White
Reflectance	ASTM E424-71	.85
UV Resistance	ASTM D-822	2,000 hrs/No Effect
High Temperature	ASTM D-794	No Effect Stability
Solar Reflectance (RS)	ASHRAE Standard	.74
Solar Absorption (RS)	ASHRAE Standard 74-73	.26

APPLICATION

1. Pre-Application

   a. Any roof deck or surface that is to be receive sprayed urethane foam shall be securely fastened to the building structure.

   b. Remove any contaminants that will interfere with total adhesion of sprayed urethane foam to the substrate. Surfaces shall be free of loose gravel, particles, rust, scale, grease, dirt, laitance, or other contaminants.

   c. A dry surface is one that is free of visible moisture and that when tested with moisture meter, registers a reading of less than ten (10) percent.

   d. No foam shall be sprayed on a roof deck if the deck temperature is within 5° of the dewpoint.

   e. Sprayed foam shall not be applied on a roof deck surface having a measured temperature of less than 50°F unless a foam specifically formulated for low temperature application is employed. In this event, the permissible minimum measured deck temperature will be 35°F.

2. Primer shall be applied to surfaces before proceeding with urethane foam as determined by the foam manufacturer's representative.

3. Sprayed Urethane Insulation

   a. Sprayed urethane foam shall be metered to material supplier specifications through proportioning equipment which provides thermostatically controlled material temperatures. Hoses between the proportioner and spray gun shall be temperature controlled.

   b. Foam normally shall not be applied when the measured deck temperature is below 50°F. (Refer to foam manufacturer's tech data on specific cold weather foam requirements.) Foam shall not be applied when the relative humidity is above 95%. Foam shall not be applied when wind velocities exceed 15 miles per hour, unless suitable wind barriers are employed.

   c. Surface texture of installed foam may range from a smooth to medium coarse (orange peel) finish. "Popcorn" or "tree bark" are not acceptable.

   d. Filleting of a foam to parapet walls, vents, roof mounted equipment, etc., shall provide a relatively smooth transition to the roof deck, shall be of uniform cross-section thickness, and shall meet all other foam surfaces texture requirements. All existing sheet metal flashing and counterflashing of the existing roofing shall be encapsulated within the new foam application.

   e. All areas which fail to meet specification requirements with respect to thickness, foam quality, etc., shall be repaired and resprayed at the expense of foam applicator.

   f. Application of spray foam shall not commence during inclement weather or when precipitation is imminent. Areas shall be kept clear of traffic from other trades during and for twenty-four hours after completion of application.

   g. Mask off metal and other surfaces not to receive foam.

   h. Prevent damage from overspray of foam insulation. Caution shall be taken to protect those areas not to receive spray foam, including vehicles nearby.

i. Spray foam application on parapet walls shall be minimum 3/4" thick and applied up to and under the rear edge of existing sheet metal cap flashing or up and over the top of the parapet if no flashing exists.

j. Application of lifts of 1/2" minimum to reach the minimum thickness of 1-1/2" of foam throughout. The finished foam surface shall be uniform and pitched to avoid ponded water.

k. Minimum pitch of 1/4" per foot is required, including valleys at crickets. Crickets shall be installed on the "uphill" side of any obstructions to the drainage path. It shall be the The roofing contractor's responsibility to verify that the roof pitch requirement has been designed and provided by the installation of the substrate and **IF NOT -- THIS REQUIREMENT SHALL BE MET BY TAPERING THE INSULATION. This shall be included in the contractor's original bid.**

l. Where foam surface has been sanded, planed or trimmed, and surface skin removed, such as areas shall be given an **ADDITIONAL APPLICATION OF COATING BASE COAT IMMEDIATELY AFTER EXPOSURE** and before applying normal base coat to entire area.

m. Apply spray foam insulation in accordance with manufacturer's instruction.

4. Waterproofing & Protection System

a. Fluid Applied Waterproofing

(1) Spray apply elastomeric membrane over insulation at the manufacturer's recommended rate in one application.

(2) Spray apply final application of elastomeric membrane at the manufacturer's recommended rate per 100 square feet.

(3) Total dry thickness of elastomeric membrane exclusive of aggregate, shall be an average of 25 mils.

(4) Spray or roll a fluid applied flashing over foam insulation at all parapet walls, mechanical equipment and other vertical surfaces in three applications at the manufacturer's recommended rate per 100 square feet per application (two base coats and one top coat).

b. Protective-Reflective Surface

Apply polymer modified cementitious roof coating into embedded aggregate at average 1/4" thickness to provide the final reflective, abuse resistant surface.

c. No traffic shall be permitted on completed roof surface for a minimum of five days.

d. Clean all excess materials from roof area and project site.

END OF SECTION

SECTION 07841 - **THROUGH-PENETRATION FIRESTOP SYSTEMS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes through-penetration firestop systems for the following types of fire-resistance-rated assemblies:
   1. Walls and partitions.
   2. Construction enclosing compartmentalized areas.

1.2 PERFORMANCE REQUIREMENTS

A. F-Ratings: Provide firestop systems with F-ratings equaling or exceeding fire-resistance rating of constructions penetrated as determined per ASTM E 814.

B. T-Ratings: Provide firestop systems with T-ratings required, as well as F-ratings, determined per ASTM E 814, where systems protect penetrating items with potential to contact adjacent materials in occupiable floor areas including, but not limited, to the following:

   1. Penetrations located outside wall cavities.
   2. Penetrations located outside fire-resistive shaft enclosures.
   3. Penetrations located in construction containing fire-protection-rated openings.
   4. Penetrating items larger than 4-inch- diameter nominal pipe or 16 sq. in. in overall cross-sectional area.

C. For firestop systems exposed to view, traffic, moisture, and physical damage, provide products that after curing do not deteriorate when exposed to these conditions both during and after construction.

   1. For piping penetrations for plumbing and wet-pipe sprinkler systems, provide moisture-resistant firestop systems.
   2. For floor penetrations with annular spaces exceeding 4 inches in width and exposed to possible loading and traffic, provide firestop systems capable of supporting floor loads involved either by installing floor plates or by other means.
   3. For penetrations involving insulated piping, provide firestop systems not requiring removal of insulation.

D. For through-penetration firestop systems exposed to view, provide products with flame-spread indices of less than 25 and smoke-developed indices of less than 450, when tested per ASTM E 84.

1.3 SUBMITTALS

A. Product Data: For each product indicated.

B. Shop Drawings: Include details of installation and design designation of testing and inspecting agency acceptable to authorities having jurisdiction that evidences compliance with requirements for each condition indicated.

C. Product certificates and/or test reports.

1.4 QUALITY ASSURANCE

A. Fire-Test-Response Characteristics: Provide rated systems identical to those tested per ASTM E 814 and with products bearing the classification marking of a qualified testing and inspecting agency acceptable to authorities having jurisdiction.

B. Coordinate sizing of sleeves, openings, core-drilled holes, or cut openings to accommodate firestop systems.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Products: The design for through-penetration firestop systems is based on products named in the Through-Penetration Firestop Schedule at the end of Part 3 by design designation of a qualified testing and inspecting agency. Subject to compliance with requirements, provide the named product or a comparable product by one of the following:

1. A/D Fire Protection Systems Inc.
2. DAP Inc.
3. Firestop Systems Inc.
4. Hilti Construction Chemicals, Inc.
5. Instant Firestop Mfg. Inc.
6. International Protective Coatings Corp.
7. Isolatek International.
8. Nelson Firestop Products.
9. NUCO Industries.
10. Specified Technologies Inc.
11. 3M Fire Protection Products.
12. Tremco.
13. United States Gypsum Company.

2.2 FIRESTOP SYSTEMS

A. Compatibility: Provide firestop systems that are compatible with the substrates forming openings, and with the items, if any, penetrating firestop systems, under conditions of service and application, as demonstrated by manufacturer based on testing and field experience.

B. Accessories: Provide accessories required to install fill materials that comply with requirements of tested assemblies, are approved by qualified testing and inspecting agency that performed testing, and are specified by manufacturer of tested assemblies. Accessories include, but are not limited to, the following:

1. Permanent forming/damming/backing materials.

    a. Slag-/rock-wool-fiber insulation.
    b. Sealants used in combination with other forming/damming/backing materials to prevent leakage of fill materials in liquid state.
    c. Fire-rated form board.
    d. Fillers for sealants.

2. Temporary forming materials.
3. Substrate primers.
4. Collars.
5. Steel sleeves.

PART 3 - EXECUTION

3.1 INSTALLATION

A. General: Install through-penetration firestop systems to comply with "Performance Requirements" Article and firestop system manufacturer's written installation instructions and published drawings for products and applications indicated.

B. Clean openings immediately before installing firestop systems.

1. Remove foreign materials that could interfere with adhesion of firestop systems.
2. Remove laitance and form-release agents from concrete.
3. Produce clean, sound surfaces capable of developing optimum bond with firestop systems. Remove loose particles remaining from cleaning operation.

C. Priming: Prime substrates when recommended in writing by firestop system manufacturer using that manufacturer's recommended products and methods. Confine primers to areas of bond; do not spill primers or allow them to migrate onto adjoining surfaces.

D. Masking Tape: Use masking tape where required to prevent contact of firestopping with adjoining surfaces that otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove firestopping smears. Remove tape immediately after installation without disturbing firestopping seal.

E. Accessories: Install accessories of types required to support fill materials during their application and in the position necessary to produce cross-sectional shapes and depths required to achieve fire ratings indicated.

1. After installing fill materials, remove combustible forming materials and other accessories that are not permanent components of firestop systems.

F. Install fill materials for firestop systems by proven techniques.

1. Fill voids and cavities formed by openings, forming materials, accessories, and penetrating items as required to achieve fire-resistance ratings indicated.
2. Apply materials so they contact and adhere to substrates formed by openings and penetrating items.
3. For fill materials that will remain exposed after completing Work, finish to produce smooth, uniform surfaces that are flush with adjoining finishes.

G. Identification: Identify firestop systems with pressure-sensitive, self-adhesive, preprinted vinyl labels. Attach labels permanently to surfaces of penetrated construction on both sides of each firestop system installation where labels will be visible. Include the following information on labels:

1. The words: "Warning--Through-Penetration Firestop System--Do Not Disturb. Notify Building Management of Any Damage."
2. Contractor's name, address, and phone number.
3. Through-penetration firestop system designation of applicable testing and inspecting agency.
4. Date of installation.
5. Firestop system manufacturer's name.
6. Installer's name.

H. Clean excess fill materials adjacent to openings as installation progresses by methods and with cleaning materials that are approved in writing by manufacturers and that do not damage materials in which openings occur.

3.2 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified independent testing and inspecting agency to perform field tests and inspections and to prepare test reports.

1. Notify Owner's inspecting agency at least seven days in advance of firestop system installations; confirm dates and times on days preceding each series of installations.

B. Do not cover up firestop system installations that will become concealed behind other construction until inspecting agency and building inspector, if required by authorities having jurisdiction, have examined each installation.

C. Inspecting agency will state in each report whether inspected firestop systems comply with or deviate from requirements.

D. Enclosing firestop systems with other construction only after inspection reports are issued.

E. Where deficiencies are found, repair or replace firestop systems to comply with requirements.

3.3 THROUGH-PENETRATION FIRESTOP SYSTEM SCHEDULE

A. Where UL-classified systems are indicated, they refer to the alpha-alpha-numeric designations listed in UL's "Fire Resistance Directory" under product Category XHEZ. Should other types of penetrations or alternative equivalent 1-hr. rated systems be required during the course of Construction, consult the Architect for approval of preferred system types, and firestop materials.

B. Firestop Systems for Metallic Pipes, Conduit, or Tubing. Comply with the following:

1. UL-Classified Systems: C-AJ-1087, or W-J-1042

C. Firestop Systems for Miscellaneous Electrical Penetrants. Comply with the following:

1. UL-Classified Systems: C-AJ-1089 or C-AJ-1091

D. Firestop Systems for Miscellaneous Mechanical Penetrations. Comply with the following:

1. UL-Classified Systems: W-J-7002 OR W-J-7003

E. Firestop Systems for Groupings of Penetrations. Comply with the following:
1. UL-Classified Systems: C-AJ-1088.

END OF SECTION 07841

SECTION 07920 - **JOINT SEALANTS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes joint sealants for the following including those specified by reference to this Section.

1. Exterior joints in vertical surfaces and horizontal non-traffic surfaces.
2. Exterior joints in horizontal traffic surfaces.
3. Interior joints in vertical surfaces and horizontal non-traffic surfaces.
4. Interior joints in horizontal traffic surfaces.

B. See Division 2 Section "Pavement Joint Sealants" for sealing joints in pavements, walkways, and curbing.

C. See Division 8 Section "Glazing" for glazing sealants.

1.2 PERFORMANCE REQUIREMENTS

A. Provide elastomeric joint sealants that establish and maintain watertight and airtight continuous joint seals without staining or deteriorating joint substrates.

B. Provide joint sealants for interior applications that establish and maintain airtight and water-resistant continuous joint seals without staining or deteriorating joint substrates.

1.3 SUBMITTALS

A. Product Data: For each joint-sealant product indicated.

B. Preconstruction field test reports.

C. Compatibility and adhesion test reports.

D. Product certificates.

1.4 QUALITY ASSURANCE

Pre-construction Compatibility and Adhesion Testing:

A. Pre-construction Field-Adhesion Testing: Before installing elastomeric sealants, field test their adhesion to Project joint substrates according to the method in ASTM C 1193 that is appropriate for the types of Project joints.

1.5 WARRANTY

1. Warranty Period: **Two years** from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Available Products: Subject to compliance with requirements, products that may be incorporated into the Work include, but are not limited to, products listed in other Part 2 articles.

B. Products: Subject to compliance with requirements, provide one of the products listed in other Part 2 articles.

2.2 MATERIALS, GENERAL

A. Compatibility: Provide joint sealants, backings, and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by sealant manufacturer, based on testing and field experience.

B. Colors of Exposed Joint Sealants: **Match adjacent material finish color.**

2.3 ELASTOMERIC JOINT SEALANTS

A. Elastomeric Sealants: Comply with ASTM C 920 and other requirements indicated for each liquid-applied chemically curing sealant specified, including those referencing ASTM C 920 classifications for type, grade, class, and uses related to exposure and joint substrates.

B. Stain-Test-Response Characteristics: Where elastomeric sealants are specified to be non-staining to porous substrates, provide products that have undergone testing according to ASTM C 1248 and have not stained porous joint substrates indicated for Project.

C. Multi-component Non-sag Urethane Sealant

1. Available Products or equal:
   a. Sika Corporation, Inc.; Sikaflex - 2c NS TG.
   b. Sonneborn, Division of ChemRex Inc.; NP 2.
   c. Tremco; Vulkem 227.
   d. Tremco; Vulkem 322 DS.

2. Type and Grade: M (multi-component) and NS (non-sag).
3. Class: 25.

4. Uses Related to Exposure: T (traffic) and NT (non-traffic).
5. Uses Related to Joint Substrates: M, G, A, and, as applicable to joint substrates indicated, O.

2.4 SOLVENT-RELEASE JOINT SEALANTS

A. Acrylic-Based Solvent-Release Joint Sealant: Comply with ASTM C 1311 or FS TT-S-00230.

B. Butyl-Rubber-Based Solvent-Release Joint Sealant: Comply with ASTM C 1085.

C. Pigmented Narrow-Joint Sealant Manufacturer's standard, solvent-release-curing, pigmented, synthetic-rubber sealant complying with AAMA 803.3 and formulated for sealing joints 3/16 inch or smaller in width.

2.5 LATEX JOINT SEALANTS

A. Latex Sealant: Comply with ASTM C 834, Type O P, Grade NF.

2.6 ACOUSTICAL JOINT SEALANTS

A. Acoustical Sealant for Exposed and Concealed Joints: Manufacturer's standard non-sag, paintable, non-staining latex sealant complying with ASTM C 834 that effectively reduces airborne sound transmission through perimeter joints and openings in building construction as demonstrated by testing representative assemblies according to ASTM E 90.

B. Acoustical Sealant for Concealed Joints: Manufacturer's standard, nondrying, non-hardening, non-skinning, non-staining, gunnable, synthetic-rubber sealant recommended for sealing interior concealed joints to reduce airborne sound transmission.

2.7 PREFORMED JOINT SEALANTS

A. Preformed Silicone-Sealant System: Manufacturer's standard system consisting of pre-cured low-modulus silicone extrusion, in sizes to fit joint widths indicated, combined with a neutral-curing silicone sealant for bonding extrusions to substrates.

B. Preformed Foam Sealant: Manufacturer's standard mildew-resistant, non-migratory, non-staining, preformed, pre-compressed, open-cell foam sealant that is manufactured from high-density urethane foam impregnated with a nondrying, water-repellent agent.

2.8 JOINT-SEALANT BACKING

A. General: Provide sealant backings of material and type that are non-staining; are compatible with joint substrates, sealants, primers, and other joint fillers; and are approved for applications indicated by sealant manufacturer based on field experience and laboratory testing.

B. Cylindrical Sealant Backings: ASTM C 1330, Type C (closed-cell material with a surface skin), or as approved in writing by joint-sealant manufacturer for joint application indicated, and of size and density to control sealant depth and otherwise contribute to producing optimum sealant performance:

C. Elastomeric Tubing Sealant Backings: Neoprene, butyl, EPDM, or silicone tubing complying with ASTM D 1056, nonabsorbent to water and gas, and capable of remaining resilient at temperatures down to minus 26 deg F Provide products with low compression set and of size and shape to provide a secondary seal, to control sealant depth, and to otherwise contribute to optimum sealant performance.

D. Bond-Breaker Tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer for preventing sealant from adhering to rigid, inflexible joint-filler materials or joint surfaces at back of joint where such adhesion would result in sealant failure. Provide self-adhesive tape where applicable.

2.9 MISCELLANEOUS MATERIALS

A. Primer: Material recommended by joint-sealant manufacturer where required for adhesion of sealant to joint substrates indicated, as determined from pre-construction joint-sealant-substrate tests and field tests.

B. Cleaners for Nonporous Surfaces: Chemical cleaners acceptable to manufacturers of sealants and sealant backing materials, free of oily residues or other substances capable of staining or harming joint substrates and adjacent nonporous surfaces in any way, and formulated to promote optimum adhesion of sealants to joint substrates.

C. Masking Tape: Non-staining, nonabsorbent material compatible with joint sealants and surfaces adjacent to joints.

PART 3 - EXECUTION

3.1 PREPARATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants.

1. Remove all foreign material from joint substrates that could interfere with adhesion of joint sealant.

a. Clean porous joint substrate surfaces by brushing, grinding, blast cleaning, mechanical abrading, or a combination of these methods to produce a clean, sound substrate capable of developing optimum bond with joint sealants. Remove loose particles remaining after cleaning operations above by vacuuming or blowing out joints with oil-free compressed air.

2. Remove laitance and form-release agents from concrete.

a. Clean nonporous surfaces with chemical cleaners or other means that do not stain, harm substrates, or leave residues capable of interfering with adhesion of joint sealants.

B. Joint Priming: Prime joint substrates, where recommended in writing by joint-sealant manufacturer, based on pre-construction joint-sealant-substrate tests or prior experience. Apply primer to comply with joint-sealant manufacturer's written instructions. Confine primers to areas of joint-sealant bond; do not allow spillage or migration onto adjoining surfaces.

C. Masking Tape: Use masking tape where required to prevent contact of sealant with adjoining surfaces that otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove sealant smears. Remove tape immediately after tooling without disturbing joint seal.

3.2 INSTALLATION

A. Sealant Installation Standard: Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

B. Acoustical Sealant Application Standard: Comply with recommendations in ASTM C 919 for use of joint sealants in acoustical applications as applicable to materials, applications, and conditions indicated.

C. Install sealant backings of type indicated to support sealants during application and at position required to produce cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum sealant movement capability.

1. Do not leave gaps between ends of sealant backings.
2. Do not stretch, twist, puncture, or tear sealant backings.
3. Remove absorbent sealant backings that have become wet before sealant application and replace them with dry materials.

D. Install bond-breaker tape behind sealants where sealant backings are not used between sealants and backs of joints.

E. Install sealants using proven techniques that comply with the following and at the same time backings are installed:

1. Place sealants so they directly contact and fully wet joint substrates.
2. Completely fill recesses in each joint configuration.

3. Produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum sealant movement capability.

F. Tooling of Non-sag Sealants: Immediately after sealant application and before skinning or curing begins, tool sealants according to requirements specified below to form smooth, uniform beads of configuration indicated; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint.

1. Remove excess sealant from surfaces adjacent to joints.
2. Use tooling agents that are approved in writing by sealant manufacturer and that do not discolor sealants or adjacent surfaces.
3. Provide concave joint configuration per Figure 5A in ASTM C 1193, unless otherwise indicated.

G. Installation of Preformed Silicone-Sealant System: Comply with manufacturer's written instructions.

H. Installation of Preformed Foam Sealants: Install each length of sealant immediately after removing protective wrapping, taking care not to pull or stretch material, producing seal continuity at ends, turns, and intersections of joints. For applications at low ambient temperatures where expansion of sealant requires acceleration to produce seal, apply heat to sealant in compliance with sealant manufacturer's written instructions.

I. Clean off excess sealant or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved in writing by manufacturers of joint sealants and of products in which joints occur.

END OF SECTION 07920

SECTION 08111 - **STANDARD STEEL DOORS & FRAMES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes standard hollow-metal steel doors and frames.

1.2 SUBMITTALS

A. Product Data: Include construction details, material descriptions, core descriptions, label compliance, fire-resistance rating, fire-resistance and temperature-rise ratings, and finishes for each type of steel door and frame specified.

B. Shop Drawings: Provide a schedule of standard steel doors and frames using same reference numbers for details and openings as those on Drawings.

C. Product test reports.

1.3 DELIVERY, STORAGE, AND HANDLING

A. Deliver doors and frames palletized, wrapped, or crated to provide protection during transit and Project-site storage. Do not use non-vented plastic.

B. Deliver welded frames with two removable spreader bars across bottom of frames, tack welded to jambs and mullions.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Available Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Steelcraft; an Ingersoll-Rand Company.
2. Ceco Door Products; an ASSA ABLOY Group Company.
3. CURRIES Company; an ASSA ABLOY Group Company

2.2 MATERIALS

A. Cold-Rolled Steel Sheet: ASTM A 1008/A 1008M, Commercial Steel (CS), Type B; suitable for exposed applications.

B. Hot-Rolled Steel Sheet: ASTM A 1011/A 1011M, Commercial Steel (CS), Type B; free of scale, pitting, or surface defects; pickled and oiled.

C. Metallic-Coated Steel Sheet: ASTM A 653/A 653M, Commercial Steel (CS), Type B; with minimum A40 zinc-iron-alloy (galv-annealed) coating designation.

D. Electrolytic Zinc-Coated Steel Sheet: ASTM A 591/A 591M, Commercial Steel (CS), Class B coating; mill phosphatized.

E. Supports and Anchors: After fabricating, galvanize units to be built into exterior walls according to ASTM A 153/A 153M, Class B.

F. Inserts, Bolts, and Fasteners: Provide items to be built into exterior walls, hot-dip galvanized according to ASTM A 153/A 153M.

2.3 STANDARD STEEL FRAMES

A. General: Comply with ANSI A250.8 and with details indicated for type and profile.

B. Interior Frames: Fabricated from cold-rolled steel sheet, unless otherwise indicated to comply with exterior frame requirements.

1. Fabricate frames with mitered or coped and welded face corners and seamless face joints.
2. Fabricate knocked-down frames with mitered or coped corners, for field assembly where indicated.
3. Fabricate knocked-down, drywall slip-on frames for in-place gypsum board partitions.
4. Frames for Borrowed Lights: 0.042-inch-thick steel sheet, unless otherwise indicated.

C. Supports and Anchors: Fabricated from electrolytic zinc-coated or metallic-coated steel sheet.

D. Jamb Anchors: Masonry, stud-wall, compression, or post-installed expansion type; not less than 0.042 inch thick.

E. Floor Anchors: Formed from same material as frames, not less than 0.042 inch thick.

2.4 STOPS AND MOLDINGS

A. Moldings for Glazed Lites in Doors: Minimum 0.032 inch thick, fabricated from same material as door face sheet in which they are installed.

B. Fixed Frame Moldings: Formed integral with standard steel frames, minimum 5/8 inch high, unless otherwise indicated.

C. Loose Stops for Glazed Lites in Frames: Minimum 0.032 inch thick, fabricated from same material as frames in which they are installed.

2.5 FABRICATION

A. General: Fabricate standard steel doors and frames to be rigid and free of defects, warp, or buckle. Accurately form metal to required sizes and profiles, with minimum radius for thickness of metal. Where practical, fit and assemble units in manufacturer's plant. To ensure proper assembly at Project site, clearly identify work that cannot be permanently factory assembled before shipment.

B. Standard Steel Frames: Where frames are fabricated in sections due to shipping or handling limitations, provide alignment plates or angles at each joint, fabricated of same thickness metal as frames.

1. Welded Frames: Weld flush face joints continuously; grind, fill, dress, and make smooth, flush, and invisible.
2. Provide countersunk, flat- or oval-head exposed screws and bolts for exposed fasteners, unless otherwise indicated.
3. Plaster Guards: Weld guards to frame at back of hardware mortises in frames installed in concrete or masonry.
4. Floor Anchors: Weld anchors to bottom of jambs and mullions with at least four spot welds per anchor.
5. Jamb Anchors: Locate anchors not more than 18 inches (457 mm) from top and bottom of frame. Space anchors not more than 32 inches (813 mm) o.c.
6. Door Silencers: Except on weather-stripped doors, drill stops to receive door silencers as follows. Provide plastic plugs to keep holes clear during construction.

C. Hardware Preparation: Factory prepare standard steel doors and frames to receive templated mortised hardware; include cutouts, reinforcement, mortising, drilling, and tapping, according to the Door Hardware Schedule and templates furnished as specified in Division 8 Section "Door Hardware."

1. Comply with applicable requirements in ANSI A250.6 and ANSI/DHI A115 Series specifications for door and frame preparation for hardware. Locate hardware as indicated on Shop Drawings or, if not indicated, according to ANSI A250.8.

D. Stops and Moldings: Provide stops and moldings around glazed lites where indicated. Form corners of stops and moldings with butted or mitered hairline joints.

1. Provide fixed stops and moldings welded on secure side of door or frame.
2. Provide loose stops and moldings on inside of doors and frames.

2.6 FINISHES

A. Steel Finish: Factory priming for field-painted finish.

1. Shop Primer: Manufacturer's standard, fast-curing, lead- and chromate-free primer complying with ANSI A250.10 acceptance criteria.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Remove welded-in shipping spreaders installed at factory.

B. Provide frames of sizes, thicknesses, and designs indicated. Install standard steel door frames plumb, rigid, properly aligned, and securely fastened in place; comply with Drawings and manufacturer's written instructions.

C. Standard Steel Frames: Install standard steel frames for doors, sidelights, transoms, & borrowed lights and other openings, of size and profile indicated. Comply with SDI 105.

1. Set frames accurately in position; plumbed, aligned, and braced securely until permanent anchors are set. After wall construction is complete, remove temporary braces, leaving surfaces smooth and undamaged.

a. At fire-protection-rated openings, install frames according to NFPA 80.
b. Apply bituminous coating to backs of frames that are filled with mortar, grout, and plaster containing anti-freezing agents.
c. Fit hollow-metal doors accurately in frames. Shim and caulk as necessary.

D. Final Adjustments: Check and readjust operating hardware items immediately before final inspection. Leave work in complete and proper operating condition. Remove and replace defective work, including standard steel door frames that are warped, bowed, or otherwise unacceptable.

E. Prime-Coat Touchup: Immediately after erection, sand smooth rusted or damaged areas of prime coat and apply touchup of compatible air-drying primer.

END OF SECTION 08111

SECTION 08211 - **FLUSH WOOD DOORS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes solid core doors as follows:

1. Doors with wood-veneer faces and factory finishing to match existing.
2. Factory fitting wood doors to frames and factory machining for hardware.

B. See Division 8 Section 08800 "Glazing" for glass view panels in flush wood doors.

C. See Division 8 Section 08811 “Standard Steel Door Frames” for Interior hollow metal frames.

1.2 SUBMITTALS

A. Product Data: For each type of door indicated. Include factory-finishing specifications.

B. Shop Drawings: Indicate location, size, and hand of each door; elevation of each kind of door; construction details not covered in Product Data; location and extent of hardware blocking; and other pertinent data.

1. Indicate dimensions and locations of mortises and holes for hardware.
2. Indicate dimensions and locations of cutouts.
3. Indicate requirements for veneer matching.
4. Indicate doors to be factory finished and finish requirements.

1.3 QUALITY ASSURANCE

A. Quality Standard: In addition to requirements specified, comply with AWI's "Architectural Woodwork Quality Standards Illustrated."

1. Doors: Provide sample of at least one fully-installed door with final finishing coat applied.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Basis of Design: V.T.INDUSTRIES Architectural Wood Doors

2.2 DOOR CONSTRUCTION, GENERAL

A. Low-Emitting Materials: Provide doors made with adhesives and composite wood products that do not contain urea formaldehyde.

B. Adhesives shall be 100% waterproof.

C. Structural-Composite-Lumber-Core Doors:

1. Structural Composite Lumber: WDMA I.S.10.

a. Screw Withdrawal, Face: 700 lbf (3100 N).
b. Screw Withdrawal, Edge: 400 lbf (1780 N).

2.3 VENEERED-FACED DOORS FOR TRANSPARENT FINISH

A. Interior Solid-Core Doors:

1. Grade: Premium, with Grade AA faces.
2. Species: **match existing (VERIFY)**
3. Cut: Plain sliced (flat sliced).
4. Match between Veneer Leaves: Book match.
5. Assembly of Veneer Leaves on Door Faces: Balance match.
6. Pair and Set Match: Provide for doors hung in same opening or separated only by mullions.
7. Core: Either glued wood stave or structural composite lumber.
8. Construction: Five or seven plies. Stiles and rails are bonded to core, then entire unit abrasive planed before veneering.
9. Finish: Factory Finish (clear).

2.4 FABRICATION

A. Factory machine doors for hardware that is not surface applied.

B. Openings: Cut and trim openings through doors in factory.

1. Light Openings: **Trim openings with wood moldings** of material and profile to match existing. Provide radiused trims.
2. Glazing: Factory install glazing in doors indicated to be factory finished. Comply with applicable requirements in Division 8 Section "Glazing."

PART 3 - EXECUTION

3.1 INSTALLATION

A. Hardware: For installation, see Division 8 Section "Door Hardware."

B. Installation Instructions: Install doors to comply with manufacturer's written instructions and the referenced quality standard, and as indicated.

C. Job-Fitted Doors: Align and fit doors in frames with uniform clearances and bevels; do not trim stiles and rails in excess of limits set by manufacturer. Machine doors for hardware. Seal edges of doors, edges of cutouts, and mortises after fitting and machining.

1. Clearances: Provide 1/8 inch (3.2 mm) at heads, jambs, and between pairs of doors. Provide 1/4 inch (3.2 mm) from bottom of door to top of decorative floor finish or covering unless otherwise indicated. Where threshold is shown or scheduled, provide 1/4 inch (6.4 mm) from bottom of door to top of threshold unless otherwise indicated.

2. Consult Mechanical Plans for 1 inch air return undercuts.

END OF SECTION 08211

SECTION 08313 - **ACCESS DOORS AND FRAMES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes access doors and frames for walls and ceilings as required.

1.2 SUBMITTALS

A. Product Data: For each type of access door and frame indicated.

B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.

C. Samples: For each door face material in specified finish.

D. Schedule: Types, locations, sizes, latching or locking provisions, and other data pertinent to installation.

1.3 QUALITY ASSURANCE

A. Fire-Rated Access Doors and Frames: Units complying with NFPA 80 that are identical to assemblies tested for fire-test-response characteristics per the following test method and that are listed and labeled by UL or another testing and inspecting agency acceptable to authorities having jurisdiction:

1. NFPA 252 or UL 10B for vertical access doors and frames.
2. ASTM E 119 or UL 263 for horizontal access doors and frames.

1.4 COORDINATION

A. Verification: Determine specific locations and sizes for access doors needed to gain access to concealed plumbing, mechanical, or other concealed work, and indicate in the schedule specified in "Submittals" Article.

PART 2 - PRODUCTS

2.1 STEEL MATERIALS

A. Steel Plates, Shapes, and Bars: ASTM A 36/A 36M.

1. ASTM A 123/A 123M, for galvanizing steel and iron products.

2. ASTM A 153/A 153M, for galvanizing steel and iron hardware.

B. Steel Sheet: Electrolytic zinc-coated, ASTM A 591/A 591M with cold-rolled steel sheet substrate complying with ASTM A 1008/A 1008M, Commercial Steel (CS), exposed.

C. Metallic-Coated Steel Sheet: ASTM A 653/A 653M, Commercial Steel (CS) with A60 (ZF180) zinc-iron-alloy (galvannealed) coating or G60 (Z180) mill-phosphatized zinc coating.

D. Steel Finishes: Comply with NAAMM's "Metal Finishes Manual for Architectural and Metal Products" for recommendations for applying and designating finishes.

1. Factory-Primed Finish: Manufacturer's standard shop primer.

E. Drywall Beads: 0.0299-inch (0.76-mm) zinc-coated steel sheet to receive joint compound.

2.2 ACCESS DOORS AND FRAMES FOR WALLS AND CEILINGS

A. Available Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

B. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Acudor Products, Inc.
2. Babcock-Davis; A Cierra Products Co.
3. Bar-Co, Inc. Div.; Alfab, Inc.
4. Cendrex Inc.
5. Dur-Red Products.
6. Elmdor/Stoneman; Div. of Acorn Engineering Co.
7. Jensen Industries.
8. J. L. Industries, Inc.
9. Karp Associates, Inc.
10. Larsen's Manufacturing Company.
11. MIFAB, Inc.
12. Milcor Inc.
13. Nystrom, Inc.
14. Williams Bros. Corporation of America (The).

C. Flush Access Doors and Frames with Exposed Trim: Fabricated from metallic-coated steel sheet.

1. Locations: Wall and ceiling.
2. Door: Minimum 0.060-inch- thick sheet metal.
3. Frame: Minimum 0.060-inch- thick sheet metal with 1-1/4-inch wide, surface-mounted trim.
4. Hinges: Continuous piano.

5. Latch: Cam latch with interior release.

D. Fire-Rated, Insulated, Flush Access Doors and Frames with Exposed Trim: Fabricated from steel sheet.

1. Locations: Wall and ceiling surfaces.
2. Fire-Resistance Rating: Not less than that of adjacent construction.
3. Temperature Rise Rating: 250 deg F (139 deg C) at the end of 30 minutes.
4. Door: Flush panel with a core of mineral-fiber insulation enclosed in sheet metal with a minimum thickness of 0.036 inch (0.9 mm)
5. Frame: Minimum 0.060-inch- (1.5-mm-) thick sheet metal with 1-inch (25-mm-) wide, surface-mounted trim.
6. Hinges: Continuous piano.
7. Automatic Closer: Spring type.
8. Latch: Self-latching device operated by flush key or ring turn with interior release.

E. Hardware: Provide the following:

1. Hinges: Heavy-duty, stainless-steel butt hinges with stainless-steel pins.
2. Latch: Stainless-steel slam latch.
3. Hardware Material: Manufacturer's standard Stainless steel, including latch and lifting mechanism assemblies, hold-open arms, and all brackets, hinges, pins, and fasteners.

2.3 FABRICATION

A. General: Provide access door and frame assemblies manufactured as integral units ready for installation.

B. Metal Surfaces: For metal surfaces exposed to view, provide materials with smooth, flat surfaces without blemishes to receive paint.

C. Doors and Frames: Grind exposed welds smooth and flush with adjacent surfaces. Furnish attachment devices and fasteners of type required to secure access panels to types of supports indicated.

D. Recessed Access Doors: Form face of panel to provide recess for application of applied finish. Reinforce panel as required to prevent buckling.

E. Latching Mechanisms: Furnish number required to hold doors in flush, smooth plane when closed.

1. For cylinder lock, furnish two keys per lock and key all locks alike.
2. For recessed panel doors, provide access sleeves for each locking device. Furnish plastic grommets and install in holes cut through finish.

F. Epoxy Coating: After fabrication, apply 4 Mil epoxy coating on steel frame that will come in contact with concrete.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Comply with manufacturer's written instructions for installing access doors and frames.

B. Set frames accurately in position and attach securely to supports with plane of face panels aligned with adjacent finish surfaces.

C. Install doors flush with adjacent finish surfaces or recessed to receive finish material.

3.2 ADJUSTING AND CLEANING

A. Adjust doors and hardware after installation for proper operation.

B. Remove and replace doors and frames that are warped, bowed, or otherwise damaged.

END OF SECTION 083113

SECTION 08411 - **ALUMINUM-FRAMED ENTRANCES AND STOREFRONTS**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Interior & Exterior storefront window and door framing.

PERFORMANCE REQUIREMENTS

A. General Performance: Aluminum-framed systems shall withstand the effects of the following performance requirements without exceeding performance criteria or failure due to defective manufacture, fabrication, installation, or other defects in construction:

2. Movements of supporting structure indicated on Drawings including, but not limited to, story drift and deflection from uniformly distributed and concentrated live loads.
3. Dimensional tolerances of building frame and other adjacent construction.
4. Failure includes the following:

a. Deflection exceeding specified limits.
b. Thermal stresses transferring to building structure.
c. Framing members transferring stresses, including those caused by thermal and structural movements to glazing.
d. Noise or vibration created by wind and by thermal and structural movements.
e. Loosening or weakening of fasteners, attachments, and other components.
f. Failure of operating units.

B. Deflection of Framing Members:

1. Deflection Normal to Wall Plane: Limited to edge of glass in a direction perpendicular to glass plane shall not exceed L/175 of the glass edge length for each individual glazing lite or an amount that restricts edge deflection of individual glazing lites to 3/4 inch (19 mm), whichever is less.
2. Deflection Parallel to Glazing Plane: Limited to amount not exceeding that which reduces glazing bite to less than 75 percent of design dimension and that which reduces edge clearance between framing members and glazing or other fixed components directly below them to less than 1/8 inch (3.2 mm) and clearance between members and operable units directly below them to less than 1/16 inch (1.5 mm).

C. Structural-Test Performance: Provide aluminum-framed systems tested according to ASTM E 330 as follows:

1. When tested at 150 percent of positive and negative wind-load design pressures, systems, including anchorage, do not evidence material failures, structural distress, and permanent deformation of main framing members exceeding 0.2 percent of span.
2. Test Durations: 10 seconds.

D. Air Infiltration: Provide aluminum-framed systems with maximum air leakage through fixed glazing and framing areas of 0.06 cfm/sq. ft. (0.03 L/s per sq. m) of fixed wall area when tested according to ASTM E 283 at a minimum static-air-pressure difference of 6.24 lbs./sq. ft. (300 Pa).

E. Water Penetration under Static Pressure: Provide aluminum-framed systems that do not evidence water penetration through fixed glazing and framing areas when tested according to ASTM E 331 at a minimum static-air-pressure difference of 20 percent of positive wind-load design pressure, but not less than 6.24 lbs./sq. ft. (300 Pa).

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Shop Drawings: For aluminum-framed systems. Include plans, elevations, sections, details, and attachments to other work.

1. Include details of provisions for system expansion and contraction and for drainage of moisture in the system to the exterior.

C. Samples: For each type of exposed finish required.

D. Product test reports.

E. Field quality-control reports.

F. Maintenance data.

G. Warranties: Sample of special warranties.

1.3 QUALITY ASSURANCE

A. Installer Qualifications: Manufacturer's authorized representative who is trained and approved for installation of units required for this Project.

B. Testing Agency Qualifications: Qualified according to ASTM E 699 for testing indicated.

C. Engineering Responsibility: Prepare data for aluminum-framed systems, including Shop Drawings, based on testing and engineering analysis of manufacturer's standard units in systems similar to those indicated for this Project.

D. Product Options: Information on Drawings and in Specifications establishes requirements for systems' aesthetic effects and performance characteristics. Aesthetic effects are indicated by dimensions, arrangements, alignment, and profiles of components and assemblies as they relate to sightlines, to one another, and to adjoining construction. Performance characteristics are indicated by criteria subject to verification by one or more methods including preconstruction testing, field testing, and in-service performance.

E. Source Limitations for Aluminum-Framed Systems: Obtain from single source from single manufacturer.

F. Pre-installation Conference: Conduct conference at Project site.

1.4 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace components of aluminum-framed systems that do not comply with requirements or that fail in materials or workmanship within specified warranty period.

1. Warranty Period: **10** years from date of Substantial Completion.

B. Special Finish Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace components on which finishes do not comply with requirements or that fail in materials or workmanship within specified warranty period. Warranty does not include normal weathering.

1. Warranty Period: **10** years from date of Substantial Completion.

PART 2 - PRODUCTS

A. Match existing storefront system for all new interior window frames.

2.1 MATERIALS

A. Aluminum: Alloy and temper recommended by manufacturer for type of use and finish indicated.

1. Sheet and Plate: ASTM B 209 (ASTM B 209M).
2. Extruded Bars, Rods, Profiles, and Tubes: ASTM B 221 (ASTM B 221M).
3. Extruded Structural Pipe and Tubes: ASTM B 429.
4. Structural Profiles: ASTM B 308/B 308M.

2.2 FRAMING SYSTEMS

A. Framing Members: Manufacturer's standard extruded-aluminum framing members of thickness required and reinforced as required to support imposed loads.

1. Construction: Thermally broken.

2. Glazing System: Retained mechanically with gaskets on four sides.
3. Glazing Plane: Center.

B. Brackets and Reinforcements: Manufacturer's standard high-strength aluminum with non-staining, nonferrous shims for aligning system components.

C. Fasteners and Accessories: Manufacturer's standard corrosion-resistant, non-staining, non-bleeding fasteners and accessories compatible with adjacent materials.

1. Use self-locking devices where fasteners are subject to loosening or turning out from thermal and structural movements, wind loads, or vibration.
2. Reinforce members as required to receive fastener threads.
3. Use exposed fasteners with countersunk Phillips screw heads, fabricated from stainless steel.

D. Concrete and Masonry Inserts: Hot-dip galvanized cast-iron, malleable-iron, or steel inserts, complying with ASTM A 123/A 123M or ASTM A 153/A 153M.

E. Concealed Flashing: Manufacturer's standard corrosion-resistant, non-staining, non-bleeding flashing compatible with adjacent materials.

F. Framing System Gaskets and Sealants: Manufacturer's standard, recommended by manufacturer for joint type.

1. Provide sealants for use inside of the weatherproofing system that have a VOC content of 250 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).

2.3 GLAZING SYSTEMS

A. Glazing: As specified in Division 8 Section "Glazing."

B. Glazing Gaskets: Manufacturer's standard compression types; replaceable, molded or extruded, of profile and hardness required to maintain watertight seal.

C. Spacers and Setting Blocks: Manufacturer's standard elastomeric type.

2.4 FABRICATION

A. Form or extrude aluminum shapes before finishing.

B. Weld in concealed locations to greatest extent possible to minimize distortion or discoloration of finish. Remove weld spatter and welding oxides from exposed surfaces by descaling or grinding.

C. Framing Members, General: Fabricate components that, when assembled, have the following characteristics:

1. Profiles that are sharp, straight, and free of defects or deformations.

2. Accurately fitted joints with ends coped or mitered.
3. Means to drain water passing joints, condensation within framing members, and moisture migrating within the system to exterior.
4. Physical and thermal isolation of glazing from framing members.
5. Accommodations for thermal and mechanical movements of glazing and framing to maintain required glazing edge clearances.
6. Provisions for field replacement of glazing from the exterior.
7. Fasteners, anchors, and connection devices that are concealed from view to greatest extent possible.

D. Entrance Door Frames: Reinforce as required to support loads imposed by door operation and for installing entrance door hardware. Fit to existing door. Field verify exact size prior to fabrication.

E. Entrance Doors: Reinforce doors as required for installing entrance door hardware.

F. After fabrication, clearly mark components to identify their locations in Project according to Shop Drawings.

2.5 ALUMINUM FINISHES

A. Match Existing Black Anodized Aluminum Finish.

PART 3 - EXECUTION

3.1 INSTALLATION

A. General:

1. Comply with manufacturer's written instructions.
2. Do not install damaged components.
3. Fit joints to produce hairline joints free of burrs and distortion.
4. Rigidly secure non-movement joints.
5. Install anchors with separators and isolators to prevent metal corrosion and electrolytic deterioration.
6. Seal joints watertight unless otherwise indicated.

B. Metal Protection:

1. Where aluminum will contact dissimilar metals, protect against galvanic action by painting contact surfaces with primer or applying sealant or tape, or by installing nonconductive spacers as recommended by manufacturer for this purpose.
2. Where aluminum will contact concrete or masonry, protect against corrosion by painting contact surfaces with bituminous paint.

C. Install components to drain water passing joints, condensation occurring within framing members, and moisture migrating within the system to exterior.

D. Set continuous sill members and flashing in full sealant bed as specified in Division 7 Section "Joint Sealants" to produce weathertight installation.

E. Install components plumb and true in alignment with established lines and grades, and without warp or rack.

F. Install glazing as specified in Division 8 Section "Glazing."

G. Entrance Doors: Install doors to produce smooth operation and tight fit at contact points.

1. Exterior Doors: Install to produce weathertight enclosure and tight fit at weather stripping.

3.2 FIELD QUALITY CONTROL

A. Testing Agency: Engage a qualified independent testing and inspecting agency to perform field tests and inspections.

B. Testing Services: Testing and inspecting of representative areas to determine compliance of installed systems with specified requirements shall take place as follows. Do not proceed with installation of the next area until test results for previously completed areas show compliance with requirements.

1. Water Spray Test: Before installation of interior finishes has begun, areas designated by Architect shall be tested according to AAMA 501.2 and shall not evidence water penetration.

a. Test Area: Entire installation shall be tested.

C. Repair or remove work if test results and inspections indicate that it does not comply with specified requirements.

D. Additional testing and inspecting, at Contractor's expense, will be performed to determine compliance of replaced or additional work with specified requirements.

E. Aluminum-framed assemblies will be considered defective if they do not pass tests and inspections.

F. Prepare test and inspection reports.

END OF SECTION 08411

SECTION 08710
DOOR HARDWARE

PART 1 GENERAL

1.01 SECTION INCLUDES

A. Hardware for wood and hollow steel doors.

B. Hardware for fire-rated doors.

C. Electrically operated and controlled hardware.

D. Lock cylinders for doors for which hardware is specified in other sections.

E. Thresholds.

F. Weatherstripping, seals and door gaskets.

G. Gate locks.

H. Mock-up, See General Requirements.

1.02 RELATED REQUIREMENTS

A. Section 08 11 13 - Hollow Metal Doors and Frames.

B. Section 08 12 13 - Hollow Metal Frames.

C. Section 08 14 16 - Flush Wood Doors.

D. Section 28 31 05 - Fire Alarm System Equipment: Electrical connection to activate door closers.

1.03 REFERENCE STANDARDS

A. 36 CFR 1191 - Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities; Final Rule; current edition; (ADA Standards for Accessible Design).

B. ANSI/ICC A117.1 - American National Standard for Accessible and Usable Buildings and Facilities; International Code Council; 2009.

C. ASTM B221 - Standard Specification for Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wire, Profiles, and Tubes; 2013.

D. BHMA A156.1 - American National Standard for Butts and Hinges; Builders Hardware Manufacturers Association, Inc.; 2006 (ANSI/BHMA A156.1).

E. BHMA A156.2 - American National Standard for Bored and Preassembled Locks & Latches; Builders Hardware Manufacturers Association; 2011 (ANSI/BHMA A156.2).

F. BHMA A156.3 - American National Standard for Exit Devices; Builders Hardware Manufacturers Association; 2008 (ANSI/BHMA A156.3).

G. BHMA A156.4 - American National Standard for Door Controls - Closers; Builders Hardware Manufacturers Association, Inc.; 2008 (ANSI/BHMA A156.4).

H. BHMA A156.5 - Cylinders and Input Devices for Locks; Builders Hardware Manufacturers Association; 2010 (ANSI/BHMA A156.5).

I. BHMA A156.6 - American National Standard for Architectural Door Trim; Builders Hardware Manufacturers Association; 2010 (ANSI/BHMA A156.6).

J. BHMA A156.7 - American National Standard for Template Hinge Dimensions; Builders Hardware Manufacturers Association; 2003 (ANSI/BHMA A156.7).

K. BHMA A156.8 - American National Standard for Door Controls - Overhead Stops and Holders; Builders Hardware Manufacturers Association, Inc.; 2010 (ANSI/BHMA A156.8).

L. BHMA A156.9 - American National Standard for Cabinet Hardware; Builders Hardware Manufacturers Association; 2010 (ANSI/BHMA A156.9).

M. BHMA A156.15 - American National Standard for Release Devices - Closer Holder, Electromagnetic and Electromechanical; Builders Hardware Manufacturers Association; 2011 (ANSI/BHMA A156.15).

N. BHMA A156.16 - American National Standard for Auxiliary Hardware; Builders Hardware Manufacturers Association; 2008 (ANSI/BHMA A156.16).

O. BHMA A156.17 - American National Standard for Self Closing Hinges & Pivots; Builders Hardware Manufacturers Association, Inc.; 2004 (ANSI/BHMA A156.17).

P. BHMA A156.18 - American National Standard for Materials and Finishes; Builders Hardware Manufacturers Association, Inc.; 2012 (ANSI/BHMA A156.18).

Q. BHMA A156.21 - American National Standard for Thresholds; Builders Hardware Manufacturers Association; 2009 (ANSI/BHMA A156.21).

R. BHMA A156.22 - American National Standard for Door Gasketing and Edge Seal Systems, Builders Hardware Manufacturers Association; 2012 (ANSI/BHMA A156.22).

S. BHMA A156.115 - Hardware Preparation in Steel Doors and Steel Frames; 2006.

T. BHMA A156.115W - Hardware Preparation in Wood Doors with Wood or Steel Frames; 2006.

U. DHI (LOCS) - Recommended Locations for Architectural Hardware for Standard Steel Doors and Frames; Door and Hardware Institute; 2004.

V. DHI WDHS.3 - Recommended Locations for Architectural Hardware for Flush Wood Doors; Door and Hardware Institute; 1993; also in WDHS-1/WDHS-5 Series, 1996.

W. ITS (DIR) - Directory of Listed Products; Intertek Testing Services NA, Inc.; current edition.

X. NFPA 80 - Standard for Fire Doors and Other Opening Protectives; 2013.

Y. NFPA 101 - Life Safety Code; National Fire Protection Association; 2012.

Z. UL (BMD) - Building Materials Directory; Underwriters Laboratories Inc.; current edition.

1.04 ADMINISTRATIVE REQUIREMENTS

A. Coordinate the manufacture, fabrication, and installation of products onto which door hardware will be installed.

B. Furnish templates for door and frame preparation to manufacturers and fabricators of products requiring internal reinforcement for door hardware.

C. Convey Owner's keying requirements to manufacturers.

D. Preinstallation Meeting: Convene a mandatory preinstallation meeting one week prior to commencing work of this section; require attendance by all affected installers.

E. Sequence installation to ensure utility connections are achieved in an orderly and expeditious manner.

1.05 SUBMITTALS

A. See Section 01 30 00 - Administrative Requirements, for submittal procedures.

B. Product Data: Manufacturer's catalog literature for each type of hardware, marked to clearly show products to be furnished for this project.

C. Hardware Schedule: Detailed in DHI Vertical format listing of each item of hardware to be installed on each door. Use door numbering scheme as included in the Contract Documents. Identify electrically operated items and include power requirements.

D. Keying Schedule: Submit for approval of Owner.

E. Manufacturer's Installation Instructions: Indicate special procedures, perimeter conditions requiring special attention.

F. Project Record Documents: Record actual locations of concealed equipment, services, and conduit.

G. Maintenance Data: Include data on operating hardware, lubrication requirements, and inspection procedures related to preventative maintenance.
   1. Submit manufacturer's parts lists and templates.
   2. Bitting List: List of combinations as furnished.

H. Keys: Deliver with identifying tags to Owner by security shipment direct from hardware supplier.

I. Warranty: Submit manufacturer's warranty and ensure that forms have been completed in Owner's name and registered with manufacturer.

J. Maintenance Materials and Tools: Furnish the following for Owner's use in maintenance of project.
   1. See Section 01 60 00 - Product Requirements, for additional provisions.
   2. Tools: One set of all special wrenches or tools applicable to each different or special hardware component, whether supplied by the hardware component manufacturer or not.
   3. Upon completion of the project, provide one owners manual consisting of a copy of the final hardware schedule with approved keying schedule, installation instructions, operating instructions, manufacturers addresses, maintenance data and any special tools required for the project hardware.

1.06 QUALITY ASSURANCE

A. Manufacturer Qualifications: Company specializing in manufacturing the products specified in this section with minimum three years of documented experience.

B. Hardware Supplier Qualifications: Company specializing in supplying commercial door hardware with 5 years of experience.

C. Hardware Supplier Personnel: Employ an Architectural Hardware Consultant (AHC) to assist in the work of this section.

1.07 DELIVERY, STORAGE, AND HANDLING

A. Package hardware items individually; label and identify each package with door opening code to match hardware schedule.

B. Deliver hardware f.o.b. jobsite (street address) to contractors authorized agent to transfer legal possession. Furnish in manufacturers original packaging, clearly marked to correlate with the hardware schedule.

C. Contractor shall provide secure storage of ample space for all project hardware. Distribution of hardware shall be strictly controlled to prevent loss or damage. Required replacement of lost or damaged items will be the responsibility of the contractor.

1.08 WARRANTY

A. See Section 01 78 00 - Closeout Submittals, for additional warranty requirements.

B. All hardware to be warranted against defects in materials and workmanship by the manufacturer for a period of two year from the date of occupancy. Provide extended warranty for following products:
   1. Locksets……10 years
   2. Mechanical panic devices …. 3 years
   3. Manual closers …….. 30 years
   4. Electric products …… … 1 year

PART 2 PRODUCTS

2.01 MANUFACTURERS

A. Products of manufacturers are shown as No-Substitute products, Owner Standards.

2.02 DOOR HARDWARE - GENERAL

A. Provide all hardware specified or required to make doors fully functional, compliant with applicable codes, and secure to the extent indicated.

B. Provide all items of a single type of the same model by the same manufacturer.

C. Provide products that comply with the following:
   1. Applicable provisions of federal, state, and local codes.
   2. ADA Standards for Accessible Design.

3. ANSI/ICC A117.1, American National Standard for Accessible and Usable Buildings and Facilities.
4. Applicable provisions of NFPA 101, Life Safety Code.
5. Fire-Rated Doors: NFPA 80.
6. All Hardware on Fire-Rated Doors: Listed and classified by UL as suitable for the purpose specified and indicated.
7. Hardware for Smoke and Draft Control Doors (Indicated as "S" on Drawings): Provide hardware that enables door assembly to comply with air leakage requirements of the applicable code.
8. Products Requiring Electrical Connection: Listed and classified by UL as suitable for the purpose specified and indicated.

D. Function: Lock and latch function numbers and descriptions of manufactures series as listed in hardware schedule.

E. Electrically Operated and/or Controlled Hardware: Provide all power supplies, power transfer hinges, relays, and interfaces required for proper operation; provide wiring between hardware and control components and to building power connection.

F. Finishes: Identified in schedule.

G. Finishes: All door hardware the same finish unless otherwise indicated.
1. Primary Finish: Satin chrome plated over nickel on brass or bronze, 626 (approx US26D).
2. Secondary Finish: Or satin stainless steel (BHMA 630) as noted in the hardware sets.
3. Finish Definitions: BHMA A156.18.
4. Exceptions:
   a. Where base metal is specified to be different, provide finish that is an appearance equivalent according to BHMA A156.18 Plated.
   b. Hinges for Fire-Rated Doors: Steel base metal with painted finish.
   c. Door Closer Covers and Arms: Color as indicated in sets.
   d. Aluminum Surface Trim and Gasket Housings: Anodized to match door, not to match other hardware.
   e. Hardware for Aluminum Storefront Doors: Finished to match door, except hand contact surfaces to be satin stainless steel.

H. Fasteners:
1. Mineral Core Wood Doors: Sex bolts.
2. Concrete and Masonry Substrates: Stainless steel machine screws and lead expansion shields.

2.03 HINGES

A. Hinges: Provide hinges on every swinging door. Pivots at Exterior Aluminum openings.
1. Provide five-knuckle full mortise butt hinges unless otherwise indicated.
2. Provide ball-bearing hinges at all doors having closers.
3. Provide hinges in the quantities indicated.
5. Provide non-removable pins on outswinging interior doors at all doors with a lockset.
6. Where electrified hardware is mounted in door leaf, provide power transfer.

B. Butt Hinges: Comply with BHMA A156.1 and A156.7; heavy weight, unless otherwise indicated.
1. Provide hinge width required to clear surrounding trim.

C. Quantity of Hinges Per Door:
1. Doors up to 60 inches High: Two hinges.
2. Doors From 60 inches High up to 90 inches High: Three hinges.
3. Doors 90 inches High up to 120 inches High: Four hinges.
4. Doors over 120 inches High: One additional hinge per each additional 30 inches in height.
5. Dutch Doors: Two hinges each leaf.

D. Manufacturers - Hinges:
1. Stanley, Hager, Ives

2.04 LOCKS AND LATCHES

A. Locks: Provide a lock for every door, unless specifically indicated as not requiring locking.
   1. Hardware Sets indicate locking functions required for each door.
   2. If no hardware set is indicated for a swinging door provide an office lockset.
   3. Trim: Provide lever handle or pull trim on outside of all locks unless specifically stated to have no outside trim.
   4. Lock Cylinders: Provide key access on outside of all locks unless specifically stated to have no locking or no outside trim. Best – Owners standards.
      a. Final cores must be Deliverd by registered service to Facilities Manager: Owner to install final cores.
   5. In door sections, where a lock cylinder referenced to Section 08 71 00 is specified, furnish and install a mortise lock cylinder construction keyed to the building.
   6. Provide brass construction cores during construction period. Construction cores to be returned to supplier after final cores are installed by owner.

B. Electrically Operated Locks: Fail secure unless otherwise indicated.

C. Keying: Grand master keyed.
   1. Key to existing **Best Cormax** keying system. **No Substitution.**
   2. Supply keys in the following quantities:
      a. 10 ea Construction keys.
      b. 6 ea Master keys.
      c. 1 ea construction control keys and 2 ea control keys (by owner).
      d. 3 ea change keys per lock.
   3. When providing keying information, comply with DHI Handbook "Keying systems and nomenclature".

2.05 CYLINDRICAL LOCKSETS

A. Locking Functions: As defined in BHMA A156.2, and as follows:
   1. Passage: No locking, always free entry and exit.
   2. Privacy: emergency tool unlocks.
   3. Office: Grade 1, key not required to lock, thumbturn button.
   4. Storeroom Always-Locked: key required to lock, may not be left unlocked.

B. Manufacturers - Locksets:
   1. Best 9K No substitutions - owner's standard.

2.06 FLUSHBOLTS

A. Flushbolts: Lever extension bolts in leading edge of door, one bolt into floor, one bolt into top of frame.
   1. Pairs of Swing Doors: At inactive leaves, provide flush bolts of type as required to comply with code.
   1. Ives: Owner's prior approval.

2.07 EXIT DEVICES

A. Locking Functions: Functions as defined in BHMA A156.3, and as follows:
   1. Entry/Exit, Always-Unlocked: Outside lever unlocked, no outside key access, no latch holdback.
   2. Entry/Exit, Free Swing: Key outside retracts latch, latch holdback (dogging) for free swing during occupied hours, not fire-rated; outside trim must be specified as lever or pull.
   3. Entry/Exit, Always-Latched: Key outside locks and unlocks lever, no latch holdback (dogging).

4. Entry/Exit, Always-Locked: Key outside retracts latchbolt but does not unlock lever, no latch holdback.
5. Exit Only, Secure: No outside trim, no key entry, no latch holdback, deadlocking latchbolt.

B. Manufacturers:
1. Von Duprin, Precision - owner's standard.

2.08 CLOSERS

A. Closers: Complying with BHMA A156.4.
1. Provide surface-mounted, door-mounted closers unless otherwise indicated.
2. Provide through bolts on every door, Mandatory by Owner Standards.
3. Provide a door closer on every fire- and smoke-rated door. Spring hinges are not an acceptable self-closing device unless specifically so indicated.
4. On pairs of swinging doors, if an overlapping astragal is present, provide coordinator to ensure the leaves close in proper order. No cutting of astragal for strikes allowed per Owner requirements.
5. At corridors, locate door-mounted closer on room side of door.
6. At outswinging exterior doors, mount closer in inside of door.

B. Manufacturers - Closers:
1. LCN, Stanley – owner's standard

2.09 STOPS AND HOLDERS

A. Stops: Complying with BHMA A156.8; provide a stop for every swinging door, unless otherwise indicated.
1. Provide wall stops, unless otherwise indicated.
2. If wall stops are not practical, due to configuration of room or furnishings, provide overhead stop.
3. Ives: – Owner's prior approval.

2.10 GASKETING AND THRESHOLDS

A. Gaskets: Complying with BHMA A156.22.
1. On each door in smoke partition, provide smoke gaskets; top, sides, and meeting stile of pairs. If fire/smoke partitions are not indicated on drawings, provide smoke gaskets on each door identified as a "smoke door" and 20-minute rated fire doors.
2. On each exterior door, provide weatherstripping gaskets, unless otherwise indicated; top, sides, and meeting stiles of pairs.
a. Where exterior door is also required to have fire or smoke rating, provide gaskets functioning as both smoke and weather seals.
3. On each exterior door, provide door bottom sweep, unless otherwise indicated.
4. On doors indicated as "sound-rated", "acoustical", or with an STC rating, provide sound-rated gaskets and automatic door bottom; make gaskets completely continuous, do not cut or notch gaskets for installation.
5. On doors indicated as "lightproof", provide gaskets similar to smoke gaskets.
6. Drip Guard: Provide projecting drip guard over all exterior doors unless they are under a projecting roof or canopy.

B. Thresholds:
1. At each exterior door, provide a threshold unless otherwise indicated.
2. Field cut threshold to frame for tight fit. Sealant as indicated by Architect.

C. Fasteners At Exterior Locations: Non-corroding.

D. Manufacturers - Gasketing and Thresholds:
1. Zero, Pemko, NGP Owner's prior approval.

2.11 PROTECTION PLATES AND ARCHITECTURAL TRIM

A. Protection Plates:
   1. Kickplate: Provide on push side of every door as scheduled.
   2. Armor Plates: Provide on push side of every door as scheduled.

B. Manufacturers - Protection Plates and Architectural Trim:
   1. Ives: Owner's prior approval.

PART 3 EXECUTION

3.01 EXAMINATION

A. Verify that doors and frames are ready to receive work; labeled, fire-rated doors and frames are present and properly installed, and dimensions are as indicated on shop drawings.

B. Verify that electric power is available to power operated devices and of the correct characteristics.

3.02 INSTALLATION

A. Install hardware in accordance with manufacturer's instructions and applicable codes.

B. Use templates provided by hardware item manufacturer.

C. Do not install surface mounted items until finishes applied to substrate are complete.

D. Install hardware on fire-rated doors and frames in accordance with code and NFPA 80.

E. Mounting heights for hardware from finished floor to center line of hardware item: as listed here. Match Existing
   1. For steel doors and frames: Comply with DHI "Recommended Locations for Architectural Hardware for Steel Doors and Frames." and in compliance with the American Disabilitiers Act (ADA).
   2. For steel doors and frames: See Section 08 11 13.
   3. For wood doors: Comply with DHI "Recommended Locations for Architectural Hardware for Wood Flush Doors."
   4. Wood doors: See Section 08 14 16.

3.03 FIELD QUALITY CONTROL

A. Field inspection and testing will be performed under provisions of Section 01 40 00.

B. Provide an Architectural Hardware Consultant to inspect installation and certify that hardware and installation has been furnished and installed in accordance with manufacturer's instructions and as specified.

3.04 ADJUSTING

A. Adjust work under provisions of Section 01 70 00.

B. Adjust hardware for smooth operation.

C. Adjust gasketing for complete, continuous seal; replace if unable to make complete seal.

3.05 CLEANING

A. Clean adjacent surfaces soiled by hardware installation. Clean finished hardware per manufacturer's instructions after final adjustments has been made. Replace items that cannot be cleaned to manufacturer's level of finish quality at no additional cost.

3.06 PROTECTION

A. Protect finished Work under provisions of Section 01 70 00.

B. Do not permit adjacent work to damage hardware or finish.

3.07 HARDWARE SETS

A. While the following hardware sets are intended to cover all doors, and establish a type and standard of quality, it is the responsibility of the hardware supplier to examine the plans and specifications and furnish proper hardware for all openings. The hardware supplier shall review the entire specification versus the door schedule and notify the architect of any errors, inconsistencies, or omissions during the bid period.

END OF SECTION

SECTION 08800 - **GLAZING**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes glazing for the following products and applications, including those specified in other Sections where glazing requirements are specified by reference to this Section:

1. Windows.
2. Doors.
3. Storefront framing.

1.2 PERFORMANCE REQUIREMENTS

A. General: Provide glazing systems capable of withstanding normal thermal movement and wind and impact loads (where applicable) without failure, including loss or glass breakage attributable to the following: defective manufacture, fabrication, and installation; failure of sealants or gaskets to remain watertight and airtight; deterioration of glazing materials; or other defects in construction.

B. Glass Design: Glass thickness designations indicated are minimums and are for detailing only. Confirm glass thicknesses by analyzing Project loads and in-service conditions. Provide glass lites in the thickness designations indicated for various size openings, but not less than thicknesses and in strengths (annealed or heat treated) required to meet or exceed the following criteria:

1. Glass Thicknesses: Select minimum glass thicknesses to comply with ASTM E 1300, according to the following requirements:
   a. Specified Design Wind Loads: As indicated, but not less than wind loads applicable to Project as required by ASCE 7 "Minimum Design Loads for Buildings and Other Structures": Section 6.0 "Wind Loads."
   b. Design Wind Loads: Determine design wind loads applicable to Project from basic wind speed indicated in miles per hour at 33 feet above grade, according to ASCE 7, "Minimum Design Loads for Buildings and Other Structures": Section 6.5, "Method 2-Analytical Procedure," based on mean roof heights above grade indicated on Drawings.

C. Thermal Movements: Provide glazing that allows for thermal movements resulting from the following maximum change (range) in ambient and surface temperatures acting on glass framing members and glazing components. Base engineering calculation on surface temperatures of materials due to both solar heat gain and nighttime-sky heat loss.

1. Temperature Change (Range): 120 deg F ambient; 180 deg F material surfaces.

D. Thermal and Optical Performance Properties: Provide glass with performance properties specified based on manufacturer's published test data, as determined according to procedures indicated below:

1. For monolithic-glass lites, properties are based on units with lites 6.0 mm thick or of thickness indicated.
2. For laminated-glass lites, properties are based on products of construction indicated.
3. For insulating-glass units, properties are based on units of thickness indicated for overall unit and for each lite 6.0 mm thick and a nominal 1/2-inch wide interspace.
4. Center-of-Glass Values: Based on using LBL-44789 WINDOW 5.0 computer program for the following methodologies:

   a. U-Factors: NFRC 100 expressed as Btu/ sq. ft. x h x deg F
   b. Solar Heat Gain Coefficient: NFRC 200 or better.
   c. Solar Optical Properties: NFRC 300 or better.

E. Safety Glazing Labeling: Where safety glazing labeling is indicated, permanently mark glazing with certification label of the SGCC or another certification agency acceptable to authorities having jurisdiction. Label shall indicate manufacturer's name, type of glass, thickness, and safety glazing standard with which glass complies.

F. Fire-Protection-Rated Glazing Labeling: Permanently mark fire-protection-rated glazing with certification label of a testing agency acceptable to authorities having jurisdiction. Label shall indicate manufacturer's name, test standard, whether glazing is for use in fire doors or other openings, whether or not glazing passes hose-stream test, whether or not glazing has a temperature rise rating of 450 deg F (250 deg C), and the fire-resistance rating in minutes.

G. Insulating-Glass Certification Program: Permanently marked either on spacers or on at least one component lite of units with appropriate certification label of IGC

1.3 SUBMITTALS

A. Product Data: For each glass product and glazing material indicated.

B. Samples: 12-inch- square, for each type of glass product indicated, other than monolithic clear float glass.

C. Glazing Schedule: Use same designations indicated on Drawings.

1.4 QUALITY ASSURANCE

A. Glazing for Fire-Rated Door & Window Assemblies: Glazing for assemblies that comply with NFPA 80 and that are listed and labeled by a testing and inspecting agency acceptable to authorities having jurisdiction, for fire ratings indicated, based on testing according to NFPA 257.

B. Safety Glazing Products: Comply with testing requirements in 16 CFR 1201.

C. Glazing Publications: Comply with published recommendations of glass product manufacturers and organizations below, unless more stringent requirements are indicated. Refer to these publications for glazing terms not otherwise defined in this Section or in referenced standards.

1. GANA Publications: GANA Laminated Division's "Laminated Glass Design Guide" and GANA's "Glazing Manual."
2. IGMA Publication for Insulating Glass: SIGMA TM-3000, "Glazing Guidelines for Sealed Insulating Glass Units."

D. Insulating-Glass Certification Program: Permanently marked either on spacers or on at least one component lite of units with appropriate certification label of the Insulating Glass Certification Council Associated Laboratories, Inc.

1.5 WARRANTY

A. Manufacturer's **Special Warranty** for Coated-Glass Products: Manufacturer's standard form, made out to Owner and signed by coated-glass manufacturer agreeing to replace coated-glass units that deteriorate as defined in "Definitions" Article, f.o.b. the nearest shipping point to Project site, within specified warranty period indicated below.

1. Warranty Period: **10** years from date of Substantial Completion.

B. Manufacturer's **Special Warranty** on Laminated Glass: Manufacturer's standard form, made out to Owner and signed by laminated-glass manufacturer agreeing to replace laminated-glass units that deteriorate as defined in "Definitions" Article, f.o.b. the nearest shipping point to Project site, within specified warranty period indicated below.

1. Warranty Period: **Five** years from date of Substantial Completion.

C. Manufacturer's **Special Warranty** on Insulating Glass: Manufacturer's standard form, made out to Owner and signed by insulating-glass manufacturer agreeing to replace insulating-glass units that deteriorate as defined in "Definitions" Article, f.o.b. the nearest shipping point to Project site, within specified warranty period indicated below.

1. Warranty Period: **10** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. In other Part 2 articles where titles below introduce lists, the following requirements apply to product selection:

1. Match existing glazing products to the greatest extent possible unless noted otherwise.

2.2 GLASS PRODUCTS

A. Annealed Float Glass: ASTM C 1036, Type I (transparent flat glass), Quality-Q3; of class indicated.

B. Heat-Treated Float Glass (TEMPERED): ASTM C 1048; Type I (transparent flat glass); Quality-Q3; of class, kind, and condition indicated.

1. Fabrication Process: By horizontal (roller-hearth) process with roll-wave distortion parallel to bottom edge of glass as installed, unless otherwise indicated.
2. Provide Kind HS (heat-strengthened) float glass in place of annealed float glass where needed to resist thermal stresses induced by differential shading of individual glass lites and to comply with glass design requirements specified in Part 1 "Performance Requirements" Article.
3. For uncoated glass, comply with requirements for Condition A.
4. For coated vision glass, comply with requirements for Condition C (other uncoated glass).
5. Provide Kind FT (fully tempered) float glass in place of annealed or Kind HS (heat-strengthened) float glass where tempered safety glass is indicated.

2.3 GLAZING SEALANTS

A. General: Provide products of type indicated, complying with the following requirements:

1. Compatibility: Select glazing sealants that are compatible with one another and with other materials they will contact, including glass products, seals of insulating-glass units, and glazing channel substrates, under conditions of service and application, as demonstrated by sealant manufacturer based on testing and field experience.
2. Suitability: Comply with sealant and glass manufacturers' written instructions for selecting glazing sealants suitable for applications indicated and for conditions existing at time of installation.
3. Colors of Exposed Glazing Sealants: As selected by Architect from manufacturer's full range to match frames.

B. Elastomeric Glazing Sealants: Comply with ASTM C 920 and other requirements indicated for each liquid-applied chemically curing sealant specified, including those referencing ASTM C 920 classifications for type, grade, class, and uses related to exposure and joint substrates.

1. Single-Component Neutral and Basic-Curing Silicone Glazing Sealants

a. Products:

1) Per manufacturer's recommendations for interior and exterior locations.

b. Type and Grade: S (single component) and NS (nonsag).
c. Class: 100/50.
d. Use Related to Exposure: Per manufacturers recommendations.
e. Uses Related to Glazing Substrates: M, G, A, and, as applicable to glazing substrates indicated, O.

2.4 GLAZING TAPES

A. Back-Bedding Mastic Glazing Tapes: Preformed, butyl-based elastomeric tape with a solids content of 100 percent; non-staining and non-migrating in contact with nonporous surfaces; with or without spacer rod as recommended in writing by tape and glass manufacturers for application indicated; packaged on rolls with a release paper backing; and complying with ASTM C 1281 and AAMA 800 for products indicated below:
   1. AAMA 806.3 tape, for glazing applications in which tape is subject to continuous pressure.
   2. AAMA 807.3 tape, for glazing applications in which tape is not subject to continuous pressure.

B. Expanded Cellular Glazing Tapes: Closed-cell, PVC foam tapes; factory coated with adhesive on both surfaces; packaged on rolls with release liner protecting adhesive; and complying with AAMA 800 for the following types:

   1. Type 1, for glazing applications in which tape acts as the primary sealant.
   2. Type 2, for glazing applications in which tape is used in combination with a full bead of liquid sealant.

2.5 MISCELLANEOUS GLAZING MATERIALS

A. General: Provide products of material, size, and shape complying with referenced glazing standard, requirements of manufacturers of glass and other glazing materials for application indicated, and with a proven record of compatibility with surfaces contacted in installation.

B. Cleaners, Primers, and Sealers: Types recommended by sealant or gasket manufacturer.

C. Setting Blocks: Elastomeric material with a Shore, Type A durometer hardness of 85, plus or minus 5.

D. Spacers: Elastomeric blocks or continuous extrusions with a Shore, Type A durometer hardness required by glass manufacturer to maintain glass lites in place for installation indicated.

E. Edge Blocks: Elastomeric material of hardness needed to limit glass lateral movement (side walking).

F. Cylindrical Glazing Sealant Backing: ASTM C 1330, Type O (open-cell material), of size and density to control glazing sealant depth and otherwise produce optimum glazing sealant performance.

2.6 FABRICATION OF GLAZING UNITS

A. Fabricate glazing units in sizes required to glaze openings indicated for Project, with edge and face clearances, edge and surface conditions, and bite complying with written instructions of product manufacturer and referenced glazing publications, to comply with system performance requirements.

PART 3 - EXECUTION

3.1 GLAZING

A. General: Comply with combined written instructions of manufacturers of glass, sealants, gaskets, and other glazing materials, unless more stringent requirements are indicated, including those in referenced glazing publications.

1. Glazing channel dimensions, as indicated on Drawings, provide necessary bite on glass, minimum edge and face clearances, and adequate sealant thicknesses, with reasonable tolerances. Adjust as required by Project conditions during installation.
2. Protect glass edges from damage during handling and installation. Remove damaged glass from Project site and legally dispose of off Project site. Damaged glass is glass with edge damage or other imperfections that, when installed, could weaken glass and impair performance and appearance.
3. Apply primers to joint surfaces where required for adhesion of sealants, as determined by preconstruction sealant-substrate testing.
4. Install setting blocks in sill rabbets, sized and located to comply with referenced glazing publications, unless otherwise required by glass manufacturer. Set blocks in thin course of compatible sealant suitable for heel bead.
5. Do not exceed edge pressures stipulated by glass manufacturers for installing glass lites.
6. Provide spacers for glass lites where length plus width is larger than 50 inches. Provide edge blocking where indicated or needed to prevent glass lites from moving sideways in glazing channel, as recommended in writing by glass manufacturer and according to requirements in referenced glazing publications.

B. Tape Glazing: Position tapes on fixed stops so that, when compressed by glass, their exposed edges are flush with or protrude slightly above sightline of stops. Install tapes continuously, but not necessarily in one continuous length. Do not stretch tapes to make them fit opening.

1. Cover vertical framing joints by applying tapes to heads and sills first and then to jambs. Cover horizontal framing joints by applying tapes to jambs and then to heads and sills.
2. Place joints in tapes at corners of opening with adjoining lengths butted together, not lapped. Seal joints in tapes with compatible sealant approved by tape manufacturer.
3. Apply heel bead of elastomeric sealant.
4. Center glass lites in openings on setting blocks and press firmly against tape by inserting dense compression gaskets formed and installed to lock in place against faces of removable stops. Start gasket applications at corners and work toward centers of openings.
5. Apply cap bead of elastomeric sealant over exposed edge of tape.

C. Gasket Glazing (Dry): Fabricate compression gaskets in lengths recommended by gasket manufacturer to fit openings exactly, with allowance for stretch during installation.

1. Insert soft compression gasket between glass and frame or fixed stop so it is securely in place with joints miter cut and bonded together at corners.
2. Center glass lites in openings on setting blocks and press firmly against soft compression gasket by inserting dense compression gaskets formed and installed to lock in place against faces of removable stops. Start gasket applications at corners and work toward centers of openings. Compress gaskets to produce a weathertight seal without developing bending stresses in glass. Seal gasket joints with sealant recommended by gasket manufacturer.
3. Install gaskets so they protrude past face of glazing stops.

D. Sealant Glazing (Wet): Install continuous spacers, or spacers combined with cylindrical sealant backing, between glass lites and glazing stops to maintain glass face clearances and to prevent sealant from extruding into glass channel and blocking weep systems until sealants cure. Secure spacers or spacers and backings in place and in position to control depth of installed sealant relative to edge clearance for optimum sealant performance.

1. Force sealants into glazing channels to eliminate voids and to ensure complete wetting or bond of sealant to glass and channel surfaces.
2. Tool exposed surfaces of sealants to provide a substantial wash away from glass.

3.2 CLEANING AND PROTECTION

A. Protect exterior glass from damage immediately after installation by attaching crossed streamers to framing held away from glass. Do not apply markers to glass surface. Remove nonpermanent labels, and clean surfaces. Protect glass from contact with contaminating substances resulting from construction operations, including weld splatter. If, despite such protection, contaminating substances do come into contact with glass, remove substances immediately as recommended by glass manufacturer.

B. Remove and replace glass that is broken, chipped, cracked, or abraded or that is damaged from natural causes, accidents, and vandalism, during construction period.

SECTION 09111 - **NON-LOAD-BEARING STEEL FRAMING**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Non-load-bearing steel framing systems for interior gypsum board assemblies.

1.2 SUBMITTALS

A. Product Data: Submit data describing standard framing member materials and finish, product criteria, load charts, limitations, and installation instructions.

B. Certificates: Mill Certification shall be provided with shipment to verify chemical composition, yield strength, tensile strength, elongation and coating thickness. Include listing of applicable ASTM standards specified in this section and comparison of ASTM requirements to actual materials provided to jobsite.

C. Manufacturer's letter: Manufacturer shall provide letter stating that the material supplied to the specific project meets or exceed the performance standards listed in these specifications.

1.3 QUALITY ASSURANCE

A. Perform Work in accordance with the following:
1. ASTM C 754 requirements.
2. Applicable Code and Regulatory Requirements.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Fire-Test-Response Characteristics: Provide materials and construction identical to those tested according to ASTM E 119.

2.2 MANUFACTURERS

A. Furnish products as manufactured by a manufacturing member of the Steel Stud Manufacturers Association (SSMA), subject to compliance with Specification requirements.

2.2 FRAMING SYSTEMS

A. Steel Studs, Runners and Furring Channels:

1. Steel complying with ASTM C645-07 for metal: C-channel, roll-formed from hot dipped galvanized steel; complying with ASTM A1003 and ASTM A653 G40or equivalent corrosion resistant coating. the latest edition of the SSMA Product Technical Information Manual. Use either steel studs and runners or dimpled steel studs and runners of equivalent minimum base-metal thickness.

2. Material Thickness: In accordance with the latest edition of the SSMA Product Technical Information Manual, Limiting Wall Height Tables- Non-Composite, using 5psf, L/240 criteria, as required by height of wall.

3. Minimum Base-Metal Thickness 0.027 inch (0.68 mm) (20 gage).
4. Depth: As indicated on Drawings

B. Flat Strap and Backing Plate: Steel sheet for blocking and bracing in length and width required.

1. Minimum Base-Metal Thickness: 0.033 inch (0.84 mm) (18 gage)

2.3 AUXILIARY MATERIALS

A. Fasteners for Metal Framing: Of type, material, size, corrosion resistance, holding power, and other properties required to fasten steel members to substrates.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Installation Standard: ASTM C 754.

B. Install supplementary framing, and blocking to support fixtures, equipment services, heavy trim, grab bars, toilet accessories, furnishings, or similar construction.

C. Install bracing at terminations in assemblies.

D. Do not bridge building control and expansion joints with non-load-bearing steel framing members. Frame both sides of joints independently.

3.2 INSTALLING FRAMED ASSEMBLIES

A. Install framing system components according to spacings indicated, but not greater than spacings required by referenced installation standards for assembly types.

B. Where studs are installed directly against exterior masonry walls or dissimilar metals at exterior walls, install isolation strip between studs and exterior wall.

C. Minimum Typical Connections unless noted otherwise in details:

1. Stud to track: (1) screw each side.

2. Hanging stud to support clip: (2) screws.

3. Soffit track to studs: (2) screws each side.

4. Stud to vertical movement clip: (2) screws

5. Base track to concrete foundation/slab: Pins at 16 inches on center, typical.

D. Minimum Screw Size by gage:

1. To 20-ga (33) max., #8

2. To 16-ga (54) max., #10

E. Steel Shot Pins by HILTI:

1. Pin to be “X-U”, .157” knurled per ESR-2269 by HILTI

2. Pin penetration into concrete, 3/4 inch min.

END OF SECTION 09111

SECTION 09260 - **GYPSUM BOARD ASSEMBLIES**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Interior gypsum wallboard.
2. Non-load-bearing steel framing. **(See also Section 09111 Non-Load Bearing Steel Framing).**

1.2 SUBMITTALS

A. Product Data: For each product indicated.

B. Samples: For each textured finish indicated and on same backing indicated for Work.

1.3 QUALITY ASSURANCE

A. Fire-Test-Response Characteristics: For gypsum board assemblies with fire-resistance ratings, provide materials and construction identical to those tested in assembly indicated according to ASTM E 119 by an independent testing and inspecting agency acceptable to authorities having jurisdiction.

PART 2 - PRODUCTS

2.1 STEEL FRAMING

A. Steel Framing, General: Comply with ASTM C 754 for conditions indicated.

1. Steel Sheet Components: Metal complying with ASTM C 645 requirements.

a. Protective Coating:

1) Interior Applications: ASTM A 653/A 653M, G40 hot-dip galvanized manufacturer's standard corrosion-resistant zinc coating.

b. Anchors: Fabricated from corrosion-resistant materials with holes or loops for attaching hanger wires and capable of sustaining, without failure, a load equal to **5** times that imposed by construction as determined by testing according to ASTM E 488 by a qualified independent testing agency.

c. Powder-Actuated Fasteners: Suitable for application indicated, fabricated from corrosion-resistant materials, with clips or other devices for attaching hangers of type indicated, and capable of sustaining, without failure, a load equal to **10** times that imposed by construction as determined by testing according to ASTM E 1190 by a qualified independent testing agency.

2. Furring Channels (Furring Members):

a. Cold Rolled Channels: 0.0538-inch bare steel thickness, with minimum 1/2-inch- wide flange, 3/4 inch deep.
b. Steel Studs: ASTM C 645, in depth indicated.

1) Minimum Base Metal Thickness: As indicated

3. Flat Strap and Backing Plate: Steel sheet for blocking and bracing in length and width indicated.

a. Minimum Base Metal Thickness: As indicated in Section 09111**.**

4. Cold-Rolled Channel Bridging: 0.0538-inch bare steel thickness, with minimum 1/2-inch- wide flange, and in depth indicated.

a. Clip Angle: 1-1/2 by 1-1/2 inch, 0.068-inch thick, galvanized steel.

5. Cold-Rolled Furring Channels: 0.0538-inch bare steel thickness, with minimum 1/2-inch wide flange, and in depth indicated.

a. Furring Brackets: Adjustable, corrugated-edge type of steel sheet with minimum bare steel thickness of 0.0312 inch
b. Tie Wire: ASTM A 641/A 641M, Class 1 zinc coating, soft temper, 0.0625-inch-diameter wire, or double strand of 0.0475-inch- diameter wire.

6. Z-Shaped Furring: With slotted or non-slotted web, face flange of 1-1/4 inches, wall attachment flange of 7/8 inch, minimum bare metal thickness of 0.0179 inch and depth required to fit insulation thickness indicated.

7. Fasteners for Metal Framing: Of type, material, size, corrosion resistance, holding power, and other properties required to fasten steel members to substrates.

2.2 PANEL PRODUCTS

A. Panel Size, General: Provide in maximum lengths and widths available that will minimize joints in each area and correspond with support system indicated.

B. Gypsum Wallboard: ASTM C 36.

1. Regular Type: In thickness indicated and with long edges tapered, rounded, or beveled.
2. Type X: In thickness indicated and with long edges tapered, rounded, or beveled.
3. Water Resistant: In thickness indicated.
4. Impact Resistant: In thickness indicated.

C. Available Products: or equal

a. National Gypsum Company; Gold Bond Hi-Abuse Wallboard.
b. United States Gypsum Co.; SHEETROCK Brand Abuse-Resistant Gypsum Panels.

2.3 TRIM ACCESSORIES

A. Interior Trim: ASTM C 1047.

1. Cornerbead: Use at outside corners
2. LC-Bead: Use at exposed panel edges.
3. L-Bead: Use where indicated
4. U-Bead: Use where abutting masonry wall

B. Aluminum Trim: Extruded accessories of profiles and dimensions indicated.

1. Available Products: or equal

a. Fry Reglet Corp.; As indicated by designation on Drawings.
b. Gordon, Inc.; As indicated by designation on Drawings
c. MM Systems Corporation; As indicated by designation on Drawings.

2. Aluminum: Alloy and temper with not less than the strength and durability properties of ASTM B 221, alloy 6063-T5.

JOINT TREATMENT MATERIALS

C. General: Comply with ASTM C 475.

D. Joint Tape:

1. Interior Gypsum Wallboard: Paper.
2. Glass-Mat Gypsum Sheathing Board: 10-by-10 glass mesh.
3. Tile Backing Panels: As recommended by panel manufacturer.

E. Joint Compound for Interior Gypsum Wallboard: For each coat use formulation that is compatible with other compounds applied on previous or for successive coats.

1. Pre-filling: At open joint, rounded or beveled panel edges, and damaged surface areas, use setting-type taping compound.

2. Embedding and First Coat: For embedding tape and first coat on joints, flanges of trim accessories, and fasteners, use setting-type taping compound or drying-type, all-purpose compound.

   a. Use setting-type compound for installing paper-faced metal trim accessories.

3. Fill Coat: For second coat, use setting-type, sandable topping compound or drying-type, all-purpose compound.
4. Finish Coat: For third coat, use setting-type, sandable topping compound.
5. Skim Coat: For final coat of Level 5 finish, use setting-type, sandable topping compound.

F. Joint Compound for Tile Backing Panels:

1. Water-Resistant Gypsum Backing Board: Use setting-type taping and setting-type, sandable topping compounds.
2. Glass-Mat, Water-Resistant Backing Panel: As recommended by manufacturer.
3. Cementitious Backer Units: As recommended by manufacturer.

2.4 AUXILIARY MATERIALS

A. General: Provide auxiliary materials that comply with referenced installation standards and manufacturer's written recommendations.

B. Acoustical Sealant for Exposed and Concealed Joints: Nonsag, paintable, nonstaining, latex sealant complying with ASTM C 834 that effectively reduces airborne sound transmission through perimeter joints and openings in building construction as demonstrated by testing representative assemblies according to ASTM E 90.

1. Products:

   a. Pecora Corp.; AC-20 FTR Acoustical and Insulation Sealant.
   b. United States Gypsum Co.; SHEETROCK Acoustical Sealant.

C. Acoustical Sealant for Concealed Joints: Nondrying, nonhardening, nonskinning, nonstaining, gunnable, synthetic-rubber sealant recommended for sealing interior concealed joints to reduce airborne sound transmission.

1. Products:

   a. Ohio Sealants, Inc.; Pro-Series SC-170 Rubber Base Sound Sealant.
   b. Pecora Corp.; BA-98.
   c. Tremco, Inc.; Tremco Acoustical Sealant.

D. Steel Drill Screws: ASTM C 1002, unless otherwise indicated.

1. Use screws complying with ASTM C 954 for fastening panels to steel members from 0.033 to 0.112 inch thick.
2. For fastening cementitious backer units, use screws of type and size recommended by panel manufacturer.

E. Isolation Strip at Exterior Walls:

1. Asphalt-Saturated Organic Felt: ASTM D 226, Type I (No. 15 asphalt felt), nonperforated.
2. Foam Gasket: Adhesive-backed, closed-cell vinyl foam strips that allow fastener penetration without foam displacement, 1/8 inch thick, in width to suit steel stud size.

F. Sound Attenuation Blankets: ASTM C 665, Type I (blankets without membrane facing) produced by combining thermosetting resins with mineral fibers manufactured from glass, slag wool, or rock wool. **See Section 07210: BUILDING INSULATION.**

PART 3 - EXECUTION

3.1 NON-LOAD-BEARING STEEL FRAMING INSTALLATION

A. General: Comply with ASTM C 754, and ASTM C 840 requirements that apply to framing installation.

B. Partition Framing:

1. Where studs are installed directly against exterior walls, install isolation strip between studs and wall.
2. Extend partition framing full height to structural supports or substrates above suspended ceilings, except where partitions are indicated to terminate at suspended ceilings. Continue framing over frames for doors and openings and frame around ducts penetrating partitions above ceiling to provide support for gypsum board.
3. Frame door openings to comply with GA-600 and with gypsum board manufacturer's applicable written recommendations, unless otherwise indicated. Screw vertical studs at jambs to jamb anchor clips on door frames; install runner track section (for cripple studs) at head and secure to jamb studs.

    a. Install two studs at each jamb, unless otherwise indicated.
    b. Extend jamb studs through suspended ceilings and attach to underside of floor or roof structure above.

4. Frame openings other than door openings the same as required for door openings, unless otherwise indicated. Install framing below sills of openings to match framing required above door heads.

3.2 PANEL PRODUCT INSTALLATION

A. Gypsum Board: Comply with ASTM C 840 and GA-216.

1. Space screws a maximum of 12 inches o.c. for vertical applications.
2. On partitions/walls, apply gypsum panels horizontally (perpendicular to framing), unless otherwise indicated or required by fire-resistance-rated assembly, and minimize end joints.

   a. Stagger abutting end joints not less than one framing member in alternate courses of board.
3. Single-Layer Fastening Methods: Apply gypsum panels to supports with steel drill screws.

3.3 FINISHING

A. Installing Trim Accessories: For trim with back flanges intended for fasteners, attach to framing with same fasteners used for panels. Otherwise, attach trim according to manufacturer's written instructions.

B. Finishing Gypsum Board Panels: Treat gypsum board joints, interior angles, edge trim, control joints, penetrations, fastener heads, surface defects, and elsewhere as required to prepare gypsum board surfaces for decoration.

1. Pre-fill open joints, rounded or beveled edges, and damaged surface areas.
2. Apply joint tape over gypsum board joints, except those with trim having flanges not intended for tape.
3. Glass-Mat, Water-Resistant Backing Panels: Finish according to manufacturer's written instructions.

C. Cementitious Backer Units: Finish according to manufacturer's written instructions.

D. Gypsum Board Finish Levels: Finish panels to levels indicated below, according to ASTM C 840, for locations indicated:
1. **Level 4**: (all publicly visible work) Embed tape and apply separate first, fill, and finish coats of joint compound to tape, fasteners, and trim flanges at panel surfaces that will be exposed to view, unless otherwise indicated. **A true Level 4 finish will be required with no visible joints.**

E. Finish Texture: **Match existing** as approved by Architect and City of Buckeye from samples.

3.4 APPLYING TEXTURE FINISHES

A. Surface Preparation and Primer: Prepare and apply primer to gypsum panels and other surfaces receiving texture finishes. Apply primer to surfaces that are clean, dry, and smooth.

B. Texture Finish Application: Mix and apply finish using powered spray equipment, to produce a uniform texture matching approved mockup and free of starved spots or other evidence of thin application or of application patterns.

C. Prevent texture finishes from coming into contact with surfaces not indicated to receive texture finish by covering them with masking agents, polyethylene film, or other means. If, despite these precautions, texture finishes contact these surfaces, immediately remove droppings and overspray to prevent damage according to texture finish manufacturer's written recommendations.

END OF SECTION 09260

SECTION 09310 - **CERAMIC TILE**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Ceramic tile.

2. Quarry tile.
3. Waterproof membrane.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated on the Drawings.

B. Samples:

1. Each type and composition of tile and for each color and finish required.
2. Assembled samples, with grouted joints, for each type and composition of tile and for each color and finish required.

1.3 QUALITY ASSURANCE

A. Mockups: Build mockups to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

1. Build mockup of each type of floor tile installation.
2. Build mockup of each type of wall tile installation.
3. Approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.4 EXTRA MATERIALS

A. Furnish extra materials that match and are from same production runs as products installed and that are packaged with protective covering and identified with labels describing contents.

1. Tile and Trim Units: Furnish quantity of full-size units equal to **10 percent** of amount installed for each type, composition, color, pattern, and size indicated.

PART 2 - PRODUCTS

2.1 TILE PRODUCTS

A. ANSI Ceramic Tile Standard: Provide Standard grade tile that complies with ANSI A137.1 for types, compositions, and other characteristics indicated.

B. Tile products shall conform to Finish Plan & Schedule in the Drawings.

2.2 TILE BACKING PANELS

A. See Section 09250 Gypsum Board for tile backing panels (5/8" Water Resistant Gypsum Board) or Cement Board as applicable.

2.3 WATERPROOF MEMBRANE

A. General: Manufacturer's standard product, selected from the following, that complies with ANSI A118.10 and is recommended by the manufacturer for the application indicated.

B. Fabric-Reinforced, Fluid-Applied Membrane: System consisting of liquid-latex rubber or elastomeric polymer and continuous fabric reinforcement.

C. Fluid-Applied Membrane: Liquid-latex rubber or elastomeric polymer.

D. Latex-Portland Cement: Flexible mortar consisting of cement-based mix and latex additive.

2.4 SETTING MATERIALS

A. Setting materials to be selected after specific tile products have been confirmed, and shall conform to manufacturer's recommendations.

2.5 GROUT MATERIALS

A. Grout material to be selected after specific tile products have been confirmed. Colors to be selected from a full range of colors from an acceptable manufacturer.

2.6 ELASTOMERIC SEALANTS

A. General: Provide sealants, primers, backer rods, and other sealant accessories that comply with the following requirements and with the applicable requirements in Division 7 Section "Joint Sealants."

1. Use sealants that have a VOC content of 250 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).

B. One-Part, Mildew-Resistant Silicone Sealant: ASTM C 920; Type S; Grade NS; Class 25; Uses NT, G, A, and, as applicable to nonporous joint substrates indicated, O; formulated with fungicide, intended for sealing interior ceramic tile joints and other nonporous substrates that are subject to in-service exposures of high humidity and extreme temperatures.

1. These sealants to be used only on non-traffic surfaces.

2. Products: Subject to compliance with requirements, available products that may be incorporated into the Work.

C. Multipart, Pourable Urethane Sealant for Use T: ASTM C 920; Type M; Grade P; Class 25; Uses T, M, A, and, as applicable to joint substrates indicated, O.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work.

2.7 MISCELLANEOUS MATERIALS

A. Trowelable Underlayments and Patching Compounds: Latex-modified, portland cement-based formulation provided or approved by manufacturer of tile-setting materials for installations indicated.

B. Metal Edge Strips: Angle or L-shape, stainless steel, ASTM A 666, 300 Series exposed-edge material. SCHULTER trims or equal.

C. Grout Sealer: Manufacturer's standard silicone product for sealing grout joints and that does not change color or appearance of grout.
   a. Products: Subject to compliance with requirements, available products that may be incorporated into the Work.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions where tile will be installed, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of installed tile.

1. Verify that substrates for setting tile are firm, dry, clean, free of coatings that are incompatible with tile-setting materials including curing compounds and other substances that contain soap, wax, oil, or silicone; and comply with flatness tolerances required by ANSI A108.01 for installations indicated.

3.2 PREPARATION

A. Fill cracks, holes, and depressions in concrete substrates for tile floors installed with adhesives or thin-set mortar with trowelable leveling and patching compound specifically recommended by tile-setting material manufacturer.

B. Where indicated, prepare substrates to receive waterproofing by applying a reinforced mortar bed that complies with ANSI A108.1A and is sloped 1/4 inch per foot (1:50) toward drains.

C. Blending: For tile exhibiting color variations, use factory blended tile or blend tiles at Project site before installing.

D. Field-Applied Temporary Protective Coating: If indicated under tile type or needed to prevent grout from staining or adhering to exposed tile surfaces, pre-coat them with continuous film of temporary protective coating, taking care not to coat unexposed tile surfaces.

3.3 INSTALLATION

A. Comply with TCA's "Handbook for Ceramic Tile Installation" for TCA installation methods. Comply with parts of the ANSI A108 Series "Specifications for Installation of Ceramic Tile" that are referenced in TCA installation methods, and apply to types of setting and grouting materials used.

1. For the following installations, follow procedures in the ANSI A108 Series of tile installation standards for providing 95 percent mortar coverage:
   a. Tile floors in wet areas.

B. Extend tile work into recesses and under or behind equipment and fixtures to form complete covering without interruptions unless otherwise indicated. Terminate work neatly at obstructions, edges, and corners without disrupting pattern or joint alignments.

C. Accurately form intersections and returns. Perform cutting and drilling of tile without marring visible surfaces. Carefully grind cut edges of tile abutting trim, finish, or built-in items for straight aligned joints. Fit tile closely to electrical outlets, piping, fixtures, and other penetrations so plates, collars, or covers overlap tile.

D. Jointing Pattern: Lay tile in grid pattern unless otherwise indicated. Lay out tile work and center tile fields in both directions in each space or on each wall area. Lay out tile work to minimize the use of pieces that are less than one quarter of a tile. Provide uniform joint widths unless otherwise indicated.

E. Joint Widths: Unless otherwise indicated, install tile with the following joint widths:

1. Floor Tile: 1/8 inch (3.2 mm).
2. Wall Tile: 1/16 inch (1.6 mm).

F. Lay out tile as indicated on the Drawings (Interior Elevations).

G. Expansion Joints: Provide expansion joints and other sealant-filled joints, including control, contraction, and isolation joints, where indicated. Form joints during installation of setting materials, mortar beds, and tile. Do not saw-cut joints after installing tiles.

1. Where joints occur in concrete substrates, locate joints in tile surfaces directly above them.
2. Prepare joints and apply sealants to comply with requirements in Division 7 Section "Joint Sealants."

H. Metal Edge Strips: Install where exposed edge of tile flooring meets carpet, wood, or other flooring that finishes flush with or below top of tile and no threshold is indicated.

I. Grout Sealer: Apply grout sealer to cementitious grout joints in tile floors according to grout-sealer manufacturer's written instructions. As soon as grout sealer has penetrated grout joints, remove excess sealer and sealer from tile faces by wiping with soft cloth.

J. Install cementitious backer units and fiber-cement underlayment and treat joints according to ANSI A108.11 and manufacturer's written instructions for type of application indicated. Use latex-portland cement mortar for bonding material unless otherwise directed in manufacturer's written instructions.

K. Install waterproofing to comply with ANSI A108.13 and manufacturer's written instructions to produce waterproof membrane of uniform thickness and bonded securely to substrate.

END OF SECTION 09310

SECTION 09511 - **ACOUSTICAL PANEL CEILINGS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes acoustical panels and exposed suspension systems for ceilings.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples: For each exposed finish.

C. Product test reports.

D. Research/evaluation reports.

E. Maintenance data.

1.3 QUALITY ASSURANCE

A. Comply with the provisions of ASTM C635 and ASTM C 636.

B. Acoustical Testing Agency Qualifications: An independent testing laboratory or an NVLAP-accredited laboratory.

C. Seismic Standard: Comply with the following:

1. Standard for Ceiling Suspension Systems Requiring Seismic Restraint: Comply with ASTM E 580 for Seismic one 2B.

D. Mockups: Build mockups to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

1. Approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

E. Pre-installation Conference: Conduct conference at Project site.

1.4 EXTRA MATERIALS

A. Furnish extra materials described below that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Acoustical Ceiling Panels: Full-size panels equal to **10.0** percent of quantity installed.
2. Suspension System Components: Quantity of each exposed component equal to **5.0** percent of quantity installed.

PART 2 - PRODUCTS

2.1 ACOUSTICAL PANEL CEILINGS, GENERAL

A. Acoustical Panel Standard: Comply with ASTM E 1264.

B. Metal Suspension System Standard: Comply with ASTM C 635.

C. Attachment Devices: Size for five times the design load indicated in ASTM C 635, Table 1, "Direct Hung," unless otherwise indicated. Comply with seismic design requirements.

D. Wire Hangers, Braces, and Ties: Zinc-coated carbon-steel wire; ASTM A 641/A 641M, Class 1 zinc coating, soft temper.

1. Size: Select wire diameter so its stress at 3 times hanger design load (ASTM C 635, Table 1, "Direct Hung") will be less than yield stress of wire, but provide not less than 0.106-inch- (2.69-mm-) diameter wire.

E. Seismic perimeter stabilizer bars, seismic struts, and seismic clips.

F. Metal Edge Moldings and Trim: Type and profile indicated or, if not indicated, manufacturer's standard moldings for edges and penetrations that comply with seismic design requirements; formed from sheet metal of same material, finish, and color as that used for exposed flanges of suspension system runners.

2.2 SMOOTH TEXTURE PANELS FOR ACOUSTICAL PANEL CEILING

A. Basis-of-Design Product:

1. Armstrong World Industries, Inc. 'Kitchen Zone' square tegular lay-in.

B. Color: White.

C. NRC: N/A

D. Acoustic CAC: 33

E. Thickness: 1" (edge thickness)

F. Modular Sizes: 24 x 48 x 1 inches

G. Fire Performance: ASTM E84 surface burning characteristics. **Class A** (flame spread 25 or less (UL labeled). Smoke Developed Index 50 or less (UL labeled).

2.3 METAL SUSPENSION SYSTEM FOR ACOUSTICAL PANEL CEILING

A. Basis-of-Design Product:

1. Armstrong World Industries, Inc.

B. Color: White.

1. Grid: **Armstrong PRELUDE 15/16 XL Exposed Tee grid Systems**

PART 3 - EXECUTION

3.1 INSTALLATION

A. Coordinate work of all other trades that install items which penetrate ceiling panels, such as (but not limited to) fire sprinklers, speakers, etc. All items which must penetrate a ceiling tile shall be placed in the center of the tile.

B. Comply with ASTM C 636 and seismic design requirements indicated, per manufacturer's written instructions and CISCA's "Ceiling Systems Handbook."

C. Measure each ceiling area and establish layout of acoustical panels to balance border widths at opposite edges of each ceiling. Avoid using less-than-half-width panels at borders.

D. Suspend ceiling hangers from building's structural members, plumb and free from contact with insulation or other objects within ceiling plenum. Splay hangers only where required to miss obstructions; offset resulting horizontal forces by bracing, counter-splaying, or other equally effective means. Where width of ducts and other construction within ceiling plenum produces hanger spacings that interfere with location of hangers, use trapezes or equivalent devices. When steel framing does not permit installation of hanger wires at spacing required, install carrying channels or other supplemental support for attachment of hanger wires.

1. Do not support ceilings directly from permanent metal forms or floor deck; anchor into concrete slabs.
2. Do not attach hangers to steel deck tabs or to steel roof deck.

E. Install edge moldings and trim of type indicated at perimeter of acoustical ceiling area and where necessary to conceal edges of acoustical panels. Screw attach moldings to substrate at intervals not more than 16 inches o.c. and not more than 3 inches from ends, leveling with ceiling suspension system to a tolerance of 1/8 inch in 12 feet. Miter corners accurately and connect securely.

F. Install suspension system runners so they are square and securely interlocked with one another. Remove and replace dented, bent, or kinked members.

G. Install acoustical panels with undamaged edges and fit accurately into suspension system runners and edge moldings. Scribe and cut panels at borders and penetrations to provide a neat, precise fit.

END OF SECTION 09511

SECTION 09651 - **RESILIENT FLOOR TILE**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Vinyl composition floor tile to match existing.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples: Full-size units of each color and pattern of floor tile required.

1.3 PROJECT CONDITIONS

A. Maintain ambient temperatures within range recommended by manufacturer in spaces to receive floor tile.

B. Until Substantial Completion, maintain ambient temperatures within range recommended by manufacturer.

C. Close spaces to traffic during floor tile installation.

D. Close spaces to traffic for 48 hours after floor tile installation.

E. Install floor tile after other finishing operations, including painting, have been completed.

1.4 EXTRA MATERIAL

A. Provide an additional 2%, or a minimum of one box, of each type/color of installed material, clearly labeled with manufacturer, size, type and color.

PART 2 - PRODUCTS

2.1 VINYL COMPOSITION FLOOR TILE

A. Products: See the Room Finish Schedule on the Drawings for products.

2.2 INSTALLATION MATERIALS

A. Trowel-able Leveling and Patching Compounds: Latex-modified, portland cement based or blended hydraulic-cement-based formulation provided or approved by manufacturer for applications indicated.

B. Adhesives: Water-resistant type recommended by manufacturer to suit floor tile and substrate conditions indicated.

1. Use adhesives that comply with the following limits for VOC content when calculated according to 40 CFR 59, Subpart D (EPA Method 24):

a. VCT Adhesives: Not more than 50 g/L.

C. Floor Polish: Provide protective liquid floor polish products as recommended by manufacturer.

PART 3 - EXECUTION

3.1 PREPARATION

A. Prepare substrates according to manufacturer's written instructions to ensure adhesion of resilient products.

B. Concrete Substrates: Prepare according to ASTM F 710.

1. Verify that substrates are dry and free of curing compounds, sealers, and hardeners.
2. Remove substrate coatings and other substances that are incompatible with adhesives and that contain soap, wax, oil, or silicone, using mechanical methods recommended by manufacturer. Do not use solvents.
3. Alkalinity and Adhesion Testing: Perform tests recommended by manufacturer. Proceed with installation only after substrates pass testing.
4. Moisture Testing: Perform tests recommended by floor covering manufacturer and as follows. Proceed with installation only after substrates pass testing.

a. Perform anhydrous calcium chloride test, ASTM F 1869. Proceed with installation only after substrates have maximum moisture-vapor-emission rate of 3 lb of water/1000 sq. ft. in 24 hours.
b. Perform relative humidity test using in situ probes, ASTM F 2170. Proceed with installation only after substrates have a maximum **75%** relative humidity level measurement.

C. Fill cracks, holes, and depressions in substrates with trowel-able leveling and patching compound and remove bumps and ridges to produce a uniform and smooth substrate.

D. Do not install floor tiles until they are same temperature as space where they are to be installed.

1. Move resilient products and installation materials into spaces where they will be installed at least 48 hours in advance of installation.

E. Sweep and vacuum clean substrates to be covered by resilient products immediately before installation.

3.2 FLOOR TILE INSTALLATION

A. Comply with manufacturer's written instructions for installing floor tile.

B. Lay out floor tiles from center marks established with principal walls, discounting minor offsets, so tiles at opposite edges of room are of equal width. Adjust as necessary to avoid using cut widths that equal less than one-half tile at perimeter.

1. Lay tiles square with room axis. Begin layouts at building expansion joints where occurs.

C. Match floor tiles for color and pattern by selecting tiles from cartons in the same sequence as manufactured and packaged, if so numbered. Discard broken, cracked, chipped, or deformed tiles.

1. Lay tiles with grain direction alternating in adjacent tiles.

D. Scribe, cut, and fit floor tiles to butt neatly and tightly to vertical surfaces and permanent fixtures including built-in furniture, cabinets, pipes, outlets, and door frames.

E. Extend floor tiles into toe spaces, door reveals, closets, and similar openings. Extend floor tiles to center of door openings.

F. Maintain reference markers, holes, and openings that are in place or marked for future cutting by repeating on floor tiles as marked on substrates. Use chalk or other nonpermanent, non-staining marking device.

G. Adhere floor tiles to flooring substrates using a full spread of adhesive applied to substrate to produce a completed installation without open cracks, voids, raising and puckering at joints, telegraphing of adhesive spreader marks, and other surface imperfections.

3.3 CLEANING AND PROTECTION

A. Comply with manufacturer's written instructions for cleaning and protection of floor tile.

B. Floor Polish: Remove soil, visible adhesive, and surface blemishes from floor tile surfaces before applying liquid floor polish and apply number of coats recommended by manufacturer.

C. Cover floor tile until Substantial Completion.

END OF SECTION 09651

SECTION 09653 - **RESILIENT WALL BASE AND ACCESSORIES**

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Resilient base.
2. Resilient molding accessories.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples: For each type of product indicated, in manufacturer's standard-size Samples but not less than 12 inches long, of each resilient product color, texture, and pattern required.

1.3 PROJECT CONDITIONS

A. Maintain ambient temperatures within range recommended by manufacturer in spaces to receive resilient products.

B. Until Substantial Completion, maintain ambient temperatures within range recommended by manufacturer.

C. Install resilient products after other finishing operations, including painting, have been completed.

PART 2 - PRODUCTS

2.1 RESILIENT BASE

A. Resilient Base:

1. See the Room Finish Schedule on Drawings for the Basis of Design products.

B. Resilient Base Standard: ASTM F 1861.

1. Material Requirement: Type TS (rubber, vulcanized thermoset).
2. Manufacturing Method: Group I (solid, homogeneous).
3. Style: Cove (base with toe).

C. Minimum Thickness: 0.125 inch

D. Height: 4 inches at toe spaces and walls.

E. Lengths: Coils in manufacturer's standard length.

F. Outside Corners: Preformed.

G. Inside Corners: Preformed.

H. Finish: Standard.

I. Colors and Patterns: As selected by Architect from full range of industry colors.

2.2 RESILIENT MOLDING ACCESSORIES

A. Resilient Molding Accessories:
   a. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work.
   b. Basis of Design Products: **Johnsonite**

B. Description: Carpet edge for glue-down applications, Reducer strip for resilient floor covering, Joiner for tile and carpet.

C. Material: Rubber.

D. Profile and Dimensions: As indicated, coved.

E. Colors and Patterns: As selected by Architect from full range of industry colors.

2.3 INSTALLATION MATERIALS

A. Trowel-able Leveling and Patching Compounds: Latex-modified, portland cement based or blended hydraulic-cement-based formulation provided or approved by manufacturer for applications indicated.

B. Adhesives: Water-resistant type recommended by manufacturer to suit resilient products and substrate conditions indicated.

   1. Use adhesives that comply with the following limits for VOC content when calculated according to 40 CFR 59, Subpart D (EPA Method 24):

      a. Cove Base Adhesives: Not more than 50 g/L.

C. Metal Edge Strips: Extruded aluminum with mill finish of width shown, of height required to protect exposed edges of tiles, and in maximum available lengths to minimize running joints.

PART 3 - EXECUTION

3.1 PREPARATION

A. Prepare substrates according to manufacturer's written instructions to ensure adhesion of resilient products.

B. Concrete Substrates for Resilient Accessories: Prepare according to ASTM F 710.

1. Verify that substrates are dry and free of curing compounds, sealers, and hardeners.
2. Remove substrate coatings and other substances that are incompatible with adhesives and that contain soap, wax, oil, or silicone, using mechanical methods recommended by manufacturer. Do not use solvents.
3. Alkalinity and Adhesion Testing: Perform tests recommended by manufacturer.
4. Moisture Testing: Perform tests recommended by manufacturer

C. Fill cracks, holes, and depressions in substrates with trowelable leveling and patching compound and remove bumps and ridges to produce a uniform and smooth substrate.

D. Do not install resilient products until they are same temperature as the space where they are to be installed.

1. Move resilient products and installation materials into spaces where they will be installed at least 48 hours in advance of installation.

E. Sweep and vacuum clean substrates to be covered by resilient products immediately before installation.

3.2 RESILIENT BASE INSTALLATION

A. Comply with manufacturer's written instructions for installing resilient base.

B. Apply resilient base to walls, columns, pilasters, casework and cabinets in toe spaces, and other permanent fixtures in rooms and areas where base is required.

C. Install resilient base in lengths as long as practicable without gaps at seams and with tops of adjacent pieces aligned.

D. Tightly adhere resilient base to substrate throughout length of each piece, with base in continuous contact with horizontal and vertical substrates.

E. Do not stretch resilient base during installation.

3.3 RESILIENT ACCESSORY INSTALLATION

A. Comply with manufacturer's written instructions for installing resilient accessories.

B. Resilient Molding Accessories: Butt to adjacent materials and tightly adhere to substrates throughout length of each piece. Install reducer strips at edges of carpet and resilient floor coverings that would otherwise be exposed.

3.4 CLEANING AND PROTECTION

A. Comply with manufacturer's written instructions for cleaning and protection of resilient products.

END OF SECTION 09653

SECTION 09911 - **EXTERIOR PAINTING**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes surface preparation and the application of paint systems on the following exterior substrates:
   1. Steel
   2. Metals

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples: For each finish and for each color and texture required.

C. Product List: Printout of current "MPI Approved Products List" for each product category specified in Part 2, with the proposed product highlighted.

1.3 QUALITY ASSURANCE

A. MPI Standards:

   1. Products: Complying with MPI standards indicated and listed in "MPI Approved Products List."
   2. Preparation and Workmanship: Comply with requirements in "MPI Architectural Painting Specification Manual" for products and paint systems indicated.

B. The Owner reserves the right to take samples of materials for chemical analysis; to gage wet or dry film thickness; or to utilize any other standard inspection procedures necessary to assure quality and compliance with requirements of the Contract Documents.

1.4 EXTRA MATERIALS

A. Furnish extra materials described below that are from same production run (batch mix) as materials applied and that are packaged for storage and identified with labels describing contents, including manufacturer's name, color name and formula.

   1. Quantity: Furnish a minimum of 1 gal. of each material and color applied.
   2. Provide a typed list, by area, of paint used including manufacturer, year purchased, color name, finish type (satin, semi-gloss, etc.) and formula.

PART 2 - PRODUCTS

2.1 PAINT, GENERAL

A. Acceptable Manufacturers:

1. **Dunn Edwards**. Basis of Design Products

B. All paint materials shall be manufacturer's premium grade product. Insofar as possible, all components of the paint system shall be products of the same manufacturer.

C. Material Compatibility:

1. Provide materials for use within each paint system that are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
2. For each coat in a paint system, provide products recommended in writing by manufacturers of topcoat for use in paint system and on substrate indicated.

D. Colors: Match existing adjacent color and sheen as applicable.

2.2 METAL PRIMERS

A. Waterborne Galvanized-Metal Primer: MPI #134. See Exterior Paint Schedule in Part 3.

1. VOC Content: E Range of E3.

2.3 EXTERIOR LATEX PAINTS

A. Exterior Latex (Semi-gloss or match existing sheen): MPI #11 (Gloss Level 5). See Exterior Paint Schedule in Part 3.

1. VOC Content: E Range of E3.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum moisture content and other conditions affecting performance of work.

B. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.

C. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.

1. Beginning coating application constitutes Contractor's acceptance of substrates and conditions.

D. Finish exterior hollow metal doors on tops, bottoms and side edges same as exterior faces, unless otherwise indicated.

3.2 PREPARATION AND APPLICATION

A. Comply with all OSHA safety requirements.

B. Comply with State and Federal VOC requirements.

C. Comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting Specification Manual" applicable to substrates and paint systems indicated.

D. Clean substrates of substances that could impair bond of paints, including dirt, oil, grease, and incompatible paints and encapsulants.

1. Remove incompatible primers and re-prime substrate with compatible primers as required to produce paint systems indicated.

E. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.

F. Minimum Coating Thickness: Apply materials at not less than manufacturer's recommended spreading rate, to establish a total dry film thickness as indicated or, if not indicated, as recommended by coating manufacturer. Apply additional coats when undercoats, stain or other conditions show through final coat of paint, until paint film is of uniform finish, color and appearance. Give special attention to insure that surfaces, including edges, corners, crevices, welds, and exposed fasteners receive a dry film thickness equivalent to that of flat surfaces.

G. Remove or protect hardware, hardware accessories, machined surfaces, lighting fixtures, and similar items that are not to be painted to ensure that no paint is applied to these surfaces. Reinstall items or remove protection upon completion of painting of the adjacent surfaces.

H. Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.

I. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

3.3 EXTERIOR PAINTING SCHEDULE

A. Provide the following coating systems for substrates indicated. Apply each material at the coverage rate required to produce the total composite dry film thickness (DFT) indicated. Materials containing low solids content by volume shall be applied in multiple coats as required to build DFT.

B. Primers are not required on substances specified to be factory primed under other sections unless required as a bond coat.

C. Galvanized-Metal Substrates:

1. Latex over Latex Primer System: 5.0 dry mils total thickness.

a. Prime Coat: Dunn-Edwards Ultrashield Galvanized Metal Primer (UGM00); applied at 2.0 mils DFT. (MPI #134 Best).
b. Intermediate Coat: Dunn-Edwards Evershield Ext. / Int. 100% Acrylic Semi-Gloss Paint (EVSH50); applied at 1.5 mils DFT per coat. (MPI #11 Best).
c. Topcoat: Dunn-Edwards Evershield Ext. / Int. 100% Acrylic Semi-Gloss Paint (EVSH50); applied at 1.5 mils DFT per coat. (MPI #11 Best).

D. Ferrous Metal: 5.0 dry mils total thickness.

1. Two finish coats over a primer.

a. Primer: Bloc-Rust Rust Preventative Metal Primer (BRPR00); applied at 2.0 mils DFT.
b. Intermediate Coat: Aristoshield Int. / Ext. Semi-Gloss Paint (ASHL50); applied at 1.5 mils DFT.
c. Topcoat: Aristoshield Int. / Ext. Semi-Gloss Paint (ASHL50); applied at 1.5 mils DFT.

E. Stucco: Match existing elastomeric paint finish and colors.
1. Two finish coats over a primer: 24.5 – 29.5 dry mils total thickness.

a. Primer Coat: Dunn-Edwards Flex-Prime Select Int. / Ext. Flexible Masonry Primer (FPSL00); applied at 2.5 – 3.5 mils DFT.
b. Intermediate Coat: Enduralastic 10 Elastomeric Wall Coating (EDLX10); applied at 11.0 to 13.0 mils DFT. per coat.
c. Topcoat: Enduralastic 10 Elastomeric Wall Coating (EDLX10); applied at 11.0 to 13.0 mils DFT. per coat.

END OF SECTION 09911

SECTION 09912 - **INTERIOR PAINTING**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes surface preparation and the application of paint and sealer systems on the following interior substrates:
   1. Gypsum board.
   2. Hollow metal frames (steel).
   3. Miscellaneous metals.
   4. Interior concrete floor sealer.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Samples: For each finish and for each color and texture required.

C. Product List: Printout of current "MPI Approved Products List" for each product category specified in Part 2, with the proposed product highlighted.

1.3 QUALITY ASSURANCE

A. MPI Standards:

   1. Products: Complying with MPI standards indicated and listed in "MPI Approved Products List."
   2. Preparation and Workmanship:
      a. For new construction: Comply with requirements in "MPI Architectural Painting Specification Manual" for products and paint systems indicated.
      b. For repainting of existing surfaces: Comply with manufacturer's written instructions and recommendations in "MPI Maintenance – Repainting Manual" applicable to substrates indicated.

B. Benchmark Samples (Mockups): Provide a full-coat benchmark sample of each paint system indicated and each color and finish selected to verify preliminary selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

   1. Wall and Ceiling Surfaces: Provide samples of at least 10 sq. ft.
   2. Other Items: Architect will designate items or areas required.
   3. Final approval of color selections will be based on benchmark samples.

1.4 EXTRA MATERIALS

A. Furnish extra materials described below that are from same production run (batch mix) as materials applied and that are packaged for storage and identified with labels describing contents, including manufacturer's name, color name and formula.

1. Quantity: Furnish a minimum of **1 gal.** of each material and color applied.
2. Provide a typed list, by area, of paint used including manufacturer, year purchased, color name, finish type (satin, semi-gloss, etc.) and formula.

PART 2 - PRODUCTS

2.1 PAINT, GENERAL

A. Acceptable manufacturers:

1. Dunn Edwards, basis of design products

B. All paint materials shall be manufacturer's premium grade product. Insofar as possible, all components of the paint system shall be products of the same manufacturer.

C. Material Compatibility:

1. Provide materials for use within each paint system that are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
2. For each coat in a paint system, provide products recommended in writing by manufacturers of topcoat for use in paint system and on substrate indicated.

D. Colors: As indicated on the Drawings.

2.2 PRIMERS/SEALERS

A. Interior Latex Primer/Sealer: MPI #50.

2.3 METAL PRIMERS

A. Rust-Inhibitive Primer (Water Based): MPI #107.

B. Waterborne Galvanized-Metal Primer: MPI #134.

2.4 LATEX PAINTS

A. Interior Latex (Velvet): MPI #44 (Gloss Level 2). **See Interior Paint Schedule in Part 3.**

1. VOC Content: E Range of E3.
2. Environmental Performance Rating: EPR 3.

B. Interior Latex (Semigloss): MPI #54 (Gloss Level 5). **See Interior Paint Schedule in Part 3.**

1. VOC Content: E Range of E3.
2. Environmental Performance Rating: EPR 4.

2.5 CONCRETE FLOOR SEALER

A. Sealer, Water Based, for Concrete Floors: MPI #99.

1. VOC Content: E Range of E2.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum moisture content and other conditions affecting performance of work.

B. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows:

1. Concrete: 12 percent.
2. Wood: 15 percent.
3. Gypsum Board: 12 percent.

C. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.

D. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.

1. Beginning coating application constitutes Contractor's acceptance of substrates and conditions.

3.2 PREPARATION AND APPLICATION

A. Comply with all OSHA safety requirements.

B. Comply with State and Federal VOC requirements.

C. For new construction, comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting Specification Manual" applicable to substrates indicated.

D. For existing surfaces to be repainted, comply with manufacturer's written instructions and recommendations in "MPI Maintenance – Repainting Manual" applicable to substrates indicated.

E. Remove or protect hardware, hardware accessories, machined surfaces, lighting fixtures, and similar items that are not to be painted to ensure that no paint is applied to these surfaces. Reinstall items or remove protection upon completion of painting of the adjacent surfaces.

F. Clean substrates of substances that could impair bond of paints, including dirt, oil, grease, and incompatible paints and encapsulants.

1. Remove incompatible primers and reprime substrate with compatible primers as required to produce paint systems indicated.

G. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.

H. Minimum Coating Thickness: Apply materials at not less than manufacturer's recommended spreading rate, to establish a total dry film thickness as indicated or, if not indicated, as recommended by coating manufacturer. Apply additional coats when undercoats, stain or other conditions show through final coat of paint, until paint film is of uniform finish, color and appearance. Give special attention to insure that surfaces, including edges, corners, crevices, welds, and exposed fasteners receive a dry film thickness equivalent to that of flat surfaces.

I. Paint surfaces behind movable equipment and furniture same as similar exposed surfaces. Paint surfaces behind permanently-fixed equipment or furniture.

J. Paint back sides of access panels, and removable or hinged covers to match exposed surfaces.

K. Finish exterior doors on tops, bottoms and side edges same as exterior faces, unless otherwise indicated.

L. Metal doors and hollow metal door and window frames shall be spray painted unless otherwise stated.

M. Painting Electrical Work: Paint items exposed in occupied spaces to match adjacent wall color including, but not limited to, the following:

1. Electrical Work:
   a. Panelboards.

N. Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.

O. Provide "Wet Paint" signs as required to protect newly-painted finishes.

P. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

3.3 INTERIOR PAINTING SCHEDULE

A. Provide the following coating systems for substrates indicated. Apply each material at the coverage rate required to produce the total composite dry film thickness (DFT) indicated. Materials containing low solids content by volume shall be applied in multiple coats as required to build DFT.

B. Primers are not required on substances specified to be factory primed under other sections unless required as a bond coat.

C. Galvanized-Metal Substrates:

1. Latex over Latex Primer System: 5.0 dry mils total thickness.

   a. Prime Coat: Dunn-Edwards Ultrashield Galvanized Metal Primer (UGM00); applied at 2.0 mils DFT.
   b. Intermediate Coat: Dunn-Edwards Evershield Ext. / Int. 100% Acrylic Semi-Gloss Paint (EVSH50); applied at 1.5 mils DFT per coat.
   c. Topcoat: Dunn-Edwards Evershield Ext. / Int. 100% Acrylic Semi-Gloss Paint (EVSH50); applied at 1.5 mils DFT per coat.

D. Ferrous Metal: 5.0 dry mils total thickness.

1. Two finish coats over a primer.

   a. Primer: Dunn-Edwards Bloc-Rust Rust Preventative Metal Primer (BRPR00); applied at 2.0 mils DFT.
   b. Intermediate Coat: Dunn-Edwards Aristoshield Int. / Ext. Semi-Gloss Paint (ASHL50); applied at 1.5 mils DFT.
   c. Topcoat: Dunn-Edwards Aristoshield Int. / Ext. Semi-Gloss Paint (ASHL50); applied at 1.5 mils DFT.

E. Gypsum Board Substrates:

1. Latex System: 4.5 dry mils total thickness.

   a. Prime Coat: Dunn-Edwards Vinylastic Plus Int. Latex Wall Sealer.
   b. Intermediate Coat: Dunn-Edwards Spartawall Low Odor Int. Velvet Paint (SWLL20); applied at 1.5 mils DFT.
   c. Topcoat: Dunn-Edwards Spartawall Low Odor Int. Velvet Paint (SWLL20); applied at 1.5 mils DFT.

   CEILINGS: Flat finish for gypsum board ceilings, use Dunn-Edwards Spartawall Int. Flat Paint (SWLL10); MPI #53, Gloss Level 1. For a semi-gloss finish for use in areas such as restrooms, use Dunn-Edwards Evershield Ext. / Int. 100% Acrylic Semi-Gloss Paint (EVSH50); MPI #54, Gloss Level 5. Color: Antique White

F. Concrete Floor Sealer:

1. 2 coats: Rust-Oleum, Seal Krete Clear-Seal Concrete Protective Sealer, satin finish.

END OF SECTION 09912

SECTION 10431 - **SIGNS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Metal Fire Lane Signage as indicated.
2. Updated Interior Fire Dept signage.
3. Plastic panel signs for interior use including ADA Braille room name and number, and plastic EXIT signage adjacent to exit doors.
4. Plastic panel room identification signs.
5. Signage accessories.

1.2 SUBMITTALS

A. Product Data: For each product indicated.

B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other Work.

1. Verify dimensions by field measurements before fabrication and indicate measurements on Shop Drawings.
2. Provide message list for each sign, including large-scale details of wording, lettering, artwork, and braille layout.

C. Samples: For each sign material indicated that involves color selection.

1.3 QUALITY ASSURANCE

A. Regulatory Requirements: Comply with the Americans with Disabilities Act (ADA) and with code provisions as adopted by authorities having jurisdiction.

PART 2 - PRODUCTS

2.1 SIGNS

A. General: Provide signs that comply with requirements indicated for materials, thicknesses, finishes, colors, designs, shapes, sizes, and details of construction.

1. **Per Buckeye Municipal Standards, see representative Interior signage EXAMPLES as observed on site. Provide in similar quantities, sizes, and content suitable for this Addition and Remodel in all areas affected. Provide**

FIRE LANE and Fire Riser, FACP, FAACP, and Roof Access signs per Fire Dept Notes on Cover Sheet.

1. Install signs level, plumb, and at heights indicated, with sign surfaces free from distortion and other defects in appearance.
2. Interior Wall Signs: Install signs on walls adjacent to latch side of door where applicable. Where not indicated or possible, such as double doors, install signs on nearest adjacent walls. Locate to allow approach within 3 inches of sign without encountering protruding objects or standing within swing of door.

B. Interior Signage: All Interior Signage shall comply with applicable ADA requirements.
1. Base: Melamine plastic laminate, 1/8 inch thick, rated non-static, fire retardant and self-extinguishing.
   a. Colors: To match existing and in accordance with local and Federal requirements.
   b. Mounting: Screw attach to the wall or door or door frame as directed by Owner, minimum 2 screws per sign. Height shall be 60 inches above finish floor to centerline of sign at wall mounted signs.
   c. Finish and Contrast:
      1). Matte Finish
      2). Characters shall contrast with backgrounds by at least 20 percent.
2. Letters and Braille characters:
   a. Raised 1/32 inch upper case, sans serif or simple serif, and accompanied by Grade 2 Braille, to match existing. Raised characters shall be at east 5/8 inches high, but not higher than 2 inches.
   b. Letters and numbers: Width-to-height ratio from 3:5 to 1:1, and stroke width-to-height ratio from 1:5 to 1:10.
   C. Text: Required quantity of each sign shall be as directed by Architect.

C. ADA Signage: All Interior Signage shall comply with applicable ADA requirements.
1. Base: Melamine plastic laminate 1/8 inch thick, rated non-static, fire retardant and self-extinguishing.
   a. Colors: in accordance with local and Federal requirements.
   b. Sizes: as indicated on the Drawings.
   b. Mounting: Screw attach to the wall or door or door frame as indicated by, minimum 2 screws per sign. Height shall be 60 inches above finish floor to centerline of sign at wall mounted signs.
   c. Finish and Contrast:
      1). Matte Finish
      2). Characters shall contrast with backgrounds by at least 20 percent.
2. Letters and Braille charcacters:
   a. Raised 1/32 inch upper case, sans serif or simple serif, and accompanied by Grade 2 Braille, to match existing. Raised characters shall be at east 5/8 inches high, but not higher than 2 inches.
   b. Letters and numbers: Width-to-height ratio from 3:5 to 1:1, and stroke width-to-height ratio from 1:5 to 1:10.

B. Tactile and Braille Copy: Manufacturer's standard process for producing copy complying with ADA Accessibility Guidelines and ICC/ANSI A117.1. Text shall be

accompanied by Grade 2 braille. Produce precisely formed characters with square cut edges free from burrs and cut marks.

1. Raised-Copy Thickness: Not less than 1/32 inch

2.2 ACCESSORIES

A. Mounting Methods: Use concealed fasteners fabricated from materials that are not corrosive to sign material and mounting surface.

B. Anchors and Inserts: Provide nonferrous-metal or hot-dip galvanized anchors and inserts for exterior installations and elsewhere as required for corrosion resistance.

PART 3- EXECUTION

3.1 INSTALLATION

A. General: Locate signs and accessories where indicated, using mounting methods of types described and in compliance with manufacturer's written instructions.

1. Install signs level, plumb, and at heights indicated, with sign surfaces free from distortion and other defects in appearance.
2. ADA Wall Signs: Install signs on walls adjacent to latch side of door where applicable. Where not indicated or possible, such as double doors, install signs on nearest adjacent walls. Locate to allow approach within 3 inches of sign without encountering protruding objects or standing within swing of door.

B. Wall & Door Mounted Signs: Attach panel signs to wall surfaces using appropriate methods indicated below:

1. Stud Mount: use concealed fasteners to mount cast aluminum letters and bronze dedication plaques to CMU walls.
2. Vinyl-Tape Mounting: Use double-sided foam tape to mount signs to smooth, nonporous surfaces. Do not use this method for vinyl-covered or rough surfaces.
2. Silicone-Adhesive Mounting: Use liquid-silicone adhesive recommended in writing by sign manufacturer to attach signs to irregular, porous, or vinyl-covered surfaces. Use double-sided vinyl tape where recommended in writing by sign manufacturer to hold sign in place until adhesive has fully cured.
3. Shim Plate Mounting: Provide 1/8-inch thick, concealed aluminum shim plates with predrilled and countersunk holes, at locations indicated, and where other mounting methods are not practicable. Attach plate with fasteners and anchors suitable for secure attachment to substrate. Attach panel signs to plate using method specified above.
4. Concealed Mechanical Fasteners: Use non-removable concealed mechanical fasteners placed through predrilled holes. Attach signs with fasteners and anchors suitable for secure attachment to substrate as recommended in writing by sign manufacturer.

END OF SECTION 10431

SECTION 10522 - **FIRE EXTINGUISHER CABINETS**

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes fire protection cabinets for fire extinguishers.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Shop Drawings: For fire protection cabinets. Include plans, elevations, sections, details, and attachments to other work.

C. Maintenance data.

1.3 QUALITY ASSURANCE

A. Coordinate size of fire protection cabinets to ensure that type and capacity of fire extinguishers indicated are accommodated.

B. Coordinate sizes and locations of fire protection cabinets with wall depths.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Cold-Rolled Steel Sheet: ASTM A 1008/A 1008M, Commercial Steel (CS), Type B.

B. Tempered Float Glass: ASTM C 1048, Kind FT, Condition A, Type I, Quality q3, 3 mm thick, Class 1 (clear).

2.2 FIRE PROTECTION CABINET

A. Cabinet Type: ADA Compliant, suitable for fire extinguisher as specified in Section 10523 Fire Extinguishers.

B. Cabinet Construction: Non-rated.

C. Cabinet Material: Steel sheet.

D. Recessed Cabinet: Cabinet box recessed in walls of sufficient depth to suit style of trim indicated.
   1. Exposed Flat Trim: One-piece combination trim and perimeter door frame overlapping surrounding wall surface with exposed trim face and wall return at outer edge (backbend).

E. Cabinet Trim Material: Steel sheet.

F. Door Material: Steel sheet.

G. Door Style: Center glass panel with frame.

H. Door Glazing: Tempered float glass (clear).

I. Door Hardware: Manufacturer's standard door-operating hardware of proper type for cabinet type, trim style, and door material and style indicated.

J. Accessories:

   1. Mounting Bracket: Manufacturer's standard steel, designed to secure fire extinguisher to fire protection cabinet, of sizes required for types and capacities of fire extinguishers indicated, with plated or baked-enamel finish.
   2. Door Lock: Cam lock that allows door to be opened during emergency by pulling sharply on door handle.

K. Finishes:

   1. Manufacturer's standard baked-enamel paint for the following:

      a. Exterior of cabinet , door, and trim, except for those surfaces indicated to receive another finish.
      b. Interior of cabinet and door.

2.3 FABRICATION

A. Fire Protection Cabinets: Provide manufacturer's standard box (tub), with trim, frame, door, and hardware to suit cabinet type, trim style, and door style indicated. Miter and weld joints and grind smooth.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Examine walls and partitions for suitable framing depth and blocking where recessed cabinets will be installed and prepare recesses as required by type and size of cabinet and trim style.

B. Install fire protection cabinets in locations and at mounting heights indicated or, if not indicated, at heights acceptable to authorities having jurisdiction.

C. Fire Protection Cabinets: Fasten cabinets to structure, square and plumb.

D. Adjust fire protection cabinet doors to operate easily without binding. Verify that integral locking devices operate properly.

E. Replace fire protection cabinets that have been damaged or have deteriorated beyond successful repair by finish touchup or similar minor repair procedures.

END OF SECTION 10522

SECTION 10523 - **FIRE EXTINGUISHERS**

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes portable, hand-carried fire extinguishers to be located in semi-recessed fire extinguisher cabinets. See SECTION 10522 Fire Extinguisher Cabinets.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Operation and maintenance data.

C. Warranty: Sample of special warranty.

1.3 QUALITY ASSURANCE

A. NFPA Compliance: Fabricate and label fire extinguishers to comply with NFPA 10, "Portable Fire Extinguishers."

B. Fire Extinguishers: Listed and labeled for type, rating, and classification by an independent testing agency acceptable to authorities having jurisdiction.

C. Coordinate type and capacity of fire extinguishers with fire protection cabinets to ensure fit and function.

1.4 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace fire extinguishers that fail in materials or workmanship within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Failure of hydrostatic test according to NFPA 10.
b. Faulty operation of valves or release levers.

2. Warranty Period: **5** years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PORTABLE, HAND-CARRIED FIRE EXTINGUISHERS

A. Fire Extinguishers: Type, size, and capacity for locations indicated. Provide one fire extinguisher, mounted in accessible locations, for every 3,000s.f. of floor area and within a maximum 75 ft. travel distance from all floor areas per IFC 1401.1.

1. Manufacturers: Subject to compliance with requirements.

2. Instruction Labels: Include pictorial marking system complying with NFPA 10, Appendix B and bar coding for documenting fire extinguisher location, inspections, maintenance, and recharging.

B. Multipurpose Dry-Chemical Type: **UL-rated 2-A:10-B:C, 5-lb** (2.3-kg) nominal capacity, with mono ammonium phosphate-based dry chemical in manufacturer's standard enameled container.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Examine fire extinguishers for proper charging and tagging.

1. Remove and replace damaged, defective, or undercharged fire extinguishers.

B. Place portable fire extinguishers in cabinets at locations indicated on the Drawings and in compliance with requirements of authorities having jurisdiction.

END OF SECTION 10523

SECTION 11400 - FOOD SERVICE EQUIPMENT

PART 1 - GENERAL

1.1 SUMMARY

A. SECTION INCLUDES:

1. The food service equipment indicated on the FS drawings and Schedules. And as specified in this Section of the Project Specifications:
2. Work, in general, shall include furnishing, fabricating, delivering, erecting, setting-in-place and securing all of the food service equipment at locations shown on the Drawings.
3. Owner-Furnished Equipment: Where indicated on Equipment Schedule(s). Owner will furnish, and install equipment items.
4. Vendor-Furnished Equipment: Where indicated on Equipment Schedule(s). Vendor will furnish equipment items as close as possible to specified. If vendor requires utilities other than specified, Owner must inform General Contractor with copy to Architect prior to rough-ins.

B. RELATED SECTIONS:

1. Division 15 - Plumbing services and hook-up, including grease interceptors, shut-off valves, trim, traps and related fittings except as specified under individual equipment items in PART 3.
2. Division 15 - Mechanical services and hook-up including ventilator duct work upstream from ceiling and welded connections to ventilators and vent ducts.
3. Division 16 - Electrical services and hook-up, including wiring, line switches, safety cut-outs, control panels, contractors, fuse boxes or other related electrical controls and fittings except as specified under individual equipment items in PART 3.

1.2 SUBMITTALS

A. SHOP DRAWINGS:

1. Plumbing, Mechanical and Electrical Rough-In Drawings detailed and fully dimensioned to a minimum scale of 1/4" = 1'-0". Drawings shall show exact location and requirements of all floor and wall stubs and sleeves for plumbing, electrical, refrigeration lines, beverage lines and ventilation ducts.
2. Depression Plans for drain troughs and insulated floor areas detailed and fully dimensioned to a minimum scale of 1/4" = 1'-0".
3. Drawings of all equipment specified for fabrication detailed and fully dimensioned to a minimum scale of 3/4" = 1'-0". Show all dimensions, details of construction, installation and relation to adjoining work, reinforcing, anchorage and other work required for the complete food service equipment installation.
4. Manufacturer's Shop Drawings for hoods, ventilators, walk-in coolers and other specialized or customized equipment items not covered by standard Specification Sheets.
5. Submit one reproducible transparency and two direct prints of each shop drawing.

B. MANUFACTURER'S SPECIFICATION SHEETS:

1. Equipment Specification Sheets for all items of standard manufacture which show the manufacturer's name, size, descriptive data, capacities, utility requirements, approval labels, etc. Bind in brochure form in numerical sequence in its entirety and submit six copies for review and approval.

C. EQUIPMENT SERVICE MANUALS:
1. Compile product data and related information appropriate for Owner's maintenance and operation of products furnished under Contract which shall include equipment specification sheets, operating instructions, parts lists, service instructions, maintenance instructions, etc. Bind in brochure form in numerical sequence in its entirety and submit three copies for review and approval.

1.3 QUALITY ASSURANCE
A. CODES AND REGULATIONS:
1. All work under this section shall be installed in strict conformance with all federal, state and local codes, laws, regulations and rules that govern food service facilities and operations.
2. All work under this section shall comply, as applicable, with:

a. National Sanitation Foundation and bear NSF label.
b. Underwriters Laboratories and bear UL label.
c. American Gas Association and bear AGA label.
d. American Society of Mechanical Engineers and bear ASME label.
e. National Fire Protection Association Standard NFPA-96

B. FIELD MEASUREMENTS:
1. Take field measurements prior to fabrication of custom equipment items. All equipment must conform to the finished building conditions. Where obstructions occur, the equipment must be scribed, fitted to and around same, resulting in a sanitary homogeneous fixture.

1.4 DELIVERY, STORAGE AND HANDLING
A. DELIVERY: Deliver standard manufactured equipment items to the site ready for use in the manufacturer's original and unopened containers and packaging except those items incorporated in the custom fabrication work. Containers to bear labels stating manufacturer's name, model number and project item number.
B. STORAGE: Store all products and materials under cover in a dry and clean location, off the ground.
C. HANDLING: Protect finishes from damage during handling and construction of other work in the same space. Wrap and crate each item of equipment as necessary for protection from damage. Remove all products and materials which are damaged or otherwise not suitable for installation from the job site and replace with suitable products and materials.

1.5 PROJECT CONDITIONS
A. EXISTING AND PROPOSED: Verify all conditions at job site including utilities, door openings, passage sizes and elevator sizes to assure ingress of equipment.

1.6 WARRANTY
A. STANDARD: Compile Warranties executed and issued by respective manufacturers and suppliers. Bind in brochure form in numerical sequence in its entirety.
B. SPECIAL: All compressors supplied for refrigerated units, either remote connected or as an integral part, shall be supplied with the manufacturer's four year extended warranty to provide a total of five years protection from the date of signed final acceptance. Include in same binders as described above for Standard Warranties.
C. SERVICE CONTRACT: In addition to warranties stated above, provide Service Contract to include labor, materials and parts necessary to replace, repair or restore work of this section that fails or does not operate properly for a period of one year from date of signed final acceptance.

PART 2 - PRODUCTS

2.1 MATERIALS

A. STAINLESS STEEL (S/S): Shall be AISI Type 302 extra low carbon, non-magnetic, Austenitic 18% chrome, 8% nickel corrosion resistant alloy steel (ASTM A 240).

B. GALVANIZED IRON (G.I.): Shall be a commercial quality steel - ASTM A 526 or ASTM A 527 for extensive forming. G90 zinc coated by the hot dip process.

C. GAUGES: Gauges for sheet iron and steel shall be U.S. Standard Gauges and finished equipment gauge thickness shall not vary more than 5% plus or minus from thickness indicated below:

1.

GAUGE	THICKNESS
#10	0.1406 (3.50mm)
#12	0.1094 (2.75mm)
#14	0.0781 (2.00mm)
#16	0.0625 (1.50mm)
#18	0.0500 (1.25mm)
#20	0.0375 (1.00mm)

D. STAINLESS STEEL PIPE AND TUBING: Shall be seamless or welded of gauge specified. Seamless tubing shall be thoroughly and correctly annealed, pickled and ground smooth. Welded tubing shall be thoroughly heat treated and properly quenched to eliminate precipitation, drawn true to size and polished to match stainless steel sheets.

E. STRUCTURAL STEEL: Framing members consisting of angles, bars, channels, etc. shall be ductile in quality, free of hard spots, runs, checks, cracks and other defects. They shall be smooth galvanized by the hot dip process with all surplus removed and be free of runs, blisters, excess spelter and uncoated spots or patches.

F. PLASTIC LAMINATE: Laminated plastic materials shall be Formica, Nevamar or as selected complying with NEMA LD 1 and NSF Standard 35 when applicable.

2.2 MANUFACTURED UNITS

A. STANDARD CATALOG ITEMS: Provide as listed and described in the SCHEDULE portion of PART 3 and Equipment Schedules shown on the Drawings.

B. ELECTRICAL REQUIREMENTS:

1. All portable equipment and items, which plug-in for normal use are to be furnished with an approved cord set to mate with receptacles furnished in the project.
2. In the event that any item of equipment to be included in the work is not available in the electrical characteristics furnished on the project, provide a suitable transformer to make the item work properly on the available power supply.

2.3 SHEET METAL FABRICATION

A. STRENGTH:

1. Include all necessary reinforcing, bracing, welding and the proper number and spacing of uprights and cross members.
2. Wherever size permits, equipment shall be fabricated of a single sheet of metal.
3. Equipment not braced in a rigid manner and which is subject to rattle or wobble will be unacceptable.

B. FINISH:

1. Stainless steel where exposed shall be polished to a #4 commercial finish. Where unexposed, finish may be #2B. The grain of polishing shall run in the same direction on all horizontal and vertical surfaces of each item.

2. Exterior galvanized parts, exposed members of framework and wrought steel pipe where specified to be painted shall be cleaned, properly primed with rust inhibiting primer, degreased and finished with two coats epoxy-based gray Hammertone paint.

C. WELDING:
1. All welding shall be done by the Heliarc method.
2. Where filler rods are used, they should be of the same grade composition as the materials to be joined and contain a flux to minimize carbide precipitation.
3. Welds shall be complete, strong and ductile, sound, non-porous, free of pits, cracks and other mechanical imperfections. Excess metal shall be ground off and polished smooth creating one homogeneous color and finish.
4. Unexposed welds shall be pacified and suitably coated to prevent corrosion.
5. In no case shall soldering be considered as a replacement for welding.
6. Where galvanizing has been burned off, touch up weld with high grade aluminum paint.

D. FIXTURES:
1. All custom fixtures shall be fabricated by one manufacturer.
2. In general, fixtures shall be shop fabricated of one-piece construction and shipped to the job site completely assembled ready to install. Equipment too large to transport or enter the building as one piece shall be constructed so that welded field joints can be made at the job site.
3. Exposed surfaces shall be free from bolt, screw and rivet heads. When bolts are required they shall be of concealed type and be of similar composition as the metal to which they are applied. Where bolts, screws or studs on the interior of fixtures are visible or may come in contact with hands or wiping cloths, they must be capped with an acorn nut with lock washer.
4. Suitable pipe slots shall be provided through all undershelves to accommodate necessary service lines. These slots shall be proper size and neatly made with turned up edges on all four sides to eliminate cutting or defacing equipment on the job site. Cabinet bases shall be provided with an inner panel duct at ends or rear of cabinet to allow for concealed pipe space.
5. Ends of all back splashes and hollow sections to be closed during fabrication of the fixture.

E. SOUND DEADENING:
1. Provide 1/2" wide rope sealant continuously between frame members and underside of table tops, drainboards, overshelves and undershelves. Tighten stud nuts for maximum compression of sealant.

F. PAINTING:
1. Provide the types of painting and coating materials which after drying or curing, are suitable for use in conjunction with food service, and which are durable, non-toxic, non-dusting, not-flaking, mildew resistant and comply with governing regulations for food service use
2. Finish fixtures, except stainless steel fixtures, in gray hammertone air dried enamel, glossy and without blemish.
3. Baked Enamel Finish. Oven bake for minimum of 1-1/2 hours at minimum temperature of 300 degrees F.

G. TRIM AND SEALING:
1. Trim is not an acceptable substitute for accuracy and neatness.
2. Equipment that butts walls shall be scribed and sealed to the walls with a silicone rubber sealant (Dow Corning 780, General Electric Series SE1200, or accepted substitute).
3. Where two or more pieces of equipment join, the seam shall be sealed with a silicone rubber sealant as above.
4. Hi-Temp silicone sealant shall be used at joints adjacent to or between pieces of heat producing equipment.

H. FABRICATION ELECTRICAL REQUIREMENTS:
1. All components and assemblies incorporated in the work shall bear the U.L. label.
2. Wiring shall be make in accordance with prevailing building codes and regulations.
3. Wiring and components shall be waterproof.

4. All fabricated equipment shall be completely wired internally where electrical services are required. All outlets, receptacles, switches, controls, electrical devices and equipment built into or forming an integral part of the fixture shall be furnished, installed and pre-wired to junction boxes. All wiring terminating in junction boxes shall be tagged showing item number, voltage, characteristics and load information.
5. Electrically heated equipment shall be internally wired to a thermostatic control and an "on/off" red neon pilot light both to be mounted in a terminal box on a removable control panel.
6. Rigid steel conduit shall be used for this work, zinc coated where unexposed and chrome plated where exposed.
7. Fluorescent light fixtures shall be complete with ballast and warm white lamps.
8. Receptacles for evaporator coils shall be twist lock type.

I. FABRICATION PLUMBING REQUIREMENTS:
1. All necessary faucets and drains shall be furnished with the food service equipment.
2. Water inlets shall be located above the positive water level to prevent siphoning of liquids into the water system. When submerged inlets are required, suitable check valves and vacuum breakers shall be furnished and installed on the fixture. Where exposed, the piping shall be chrome plated.
3. Cabinet type and closed fixtures shall have indirect wastes pre-piped within fixture to point of discharge above floor sinks. Piping to be chrome plated or stainless steel when exposed.

J. FABRICATION REFRIGERATION REQUIREMENTS:
1. Provide air-cooled condensing units mounted on friction slides in compressor housings with adequate air supply and exhaust for proper operation.
2. All refrigeration systems to be furnished with compressor, expansion valve, isolating valve, sight glass, strainer, dehydrator, relief valve, charging valve, lines and all necessary components to make a completely operable self-contained system.
3. Normal operating temperatures to be:
   a. Refrigerators +35 degrees F.
   b. Freezers -10 degrees F.
   c. Cold Pans +10 degrees F.
4. All refrigerated pans and cabinets shall be fitted with breaker strips where adjoining top or cabinet face materials.

K. CHANNEL FRAME CONSTRUCTION:
1. All equipment of channel frame construction shall be supported by 1" X 5" X 1" X 14 Ga. galvanized channels secured to underside of tops with welded concealed studs, lock washers and acorn cap nuts (S/S when exposed).
2. Where channels intersect each other, they shall be fully welded.
3. Spacing of channels shall be on approximate 30" centers but so located to accommodate drawer enclosures, sinks, enclosed bases, etc.
4. All channels exposed to view shall be 14 Ga. S/S with ends closed.

L. LEGS, FEET & CROSSRAILS:
1. Equipment shall be supported on legs of 1-5/8" O.D. 16 Ga. seamless S/S fitted with S/S bullet-type feet. Standard-Keil Series 1044, or equal. Feet shall have a minimum vertical adjustment of 1-1/2" without showing any evidence of threading. Height to the equipment shall be as specified with the feet exposed to a 2" vertical dimension so as to allow a maximum adjustment of 3/4" above and below that height.
2. Legs shall be attached by means of sanitary type fully enclosed conical gussets of 16 Ga. S/S. Standard-Keil 1018-0206-1283, or equal. Gussets shall be fully welded to channels or gusset plates.
3. All legs shall be braced with crossrails of 1-5/8" 16 Ga. S/S tubing coved and fully welded to legs at 10" above the floor unless specified otherwise. Where crossrails join cabinet bodies, provide Standard-Keil 1016-0206-1283 Leg Socket welded to body.
4. Legs shall not be spaced more that 5'-0" apart.
5. Cabinet bodies supported by legs to have minimum of 6" clearance between floor and bottom of cabinet

M. WORK TOPS:
1. All table tops, counter tops and drainboards shall be 14 Ga. S/S unless specified otherwise.
2. Tops shall have Flat Edge as specified under “Edge Types” on all exposed sides.
3. Where top overhangs body, a minimum gap of 3/4” shall be provided between bottom edge of top and cabinet body.
4. Where back splash or end splash is specified, an angled splash shall be formed by turning up top 90 degrees for 4”, breaking back 2” on a 45 degree angle, and turning up 1”. Close both ends.
5. Where flat splash or flat turn-up is specified, turn edge of top up 90 degrees with “Hug Edge” ground smooth.

N. UNDERSHELVES - OPEN CONSTRUCTION:
1. Undershelves in open base fixtures shall be constructed of 16 Ga. S/S notched at corners and fully welded to legs from the back side. Shelves shall be reinforced longitudinally with 1” X 5” X 1” channels.
2. Front edges of undershelves shall be formed with a Flat Edge as specified under “Edge Types”. Ends & rear to be turned up 2” flat unless specified otherwise.
3. Height of bottom shelf shall be 10” above the floor unless otherwise specified.

O. EDGE TYPES:
1. Rolled Edge shall be formed by the top being rolled down 180 degrees on a 1-1/2” diameter.
2. Bullnose Edge shall be formed by the top being rolled down 120 degrees on a 1-3/4” diameter.
3. Flat Edge shall be formed by turning down the edge of the top 1-1/2” and then back 1/2” at 30 degree angle.
4. Inverted “V” Edge (Marine Edge) shall be formed by raising the edge of the top 1/2” high on a 45 degree angle, then turning down 1-1/2” and back 1/2” at 30 degree angle.
5. Raised Curb or Raised Rolled Edge shall be formed by the top being turned up 3” high and rolled in a 1-1/2” diameter to form a 190 degree closure with corners fully ground. All horizontal and vertical corners to be fully coved.

P. COMPARTMENT TYPE SINKS:
1. Sinks shall be fabricated of 14 Ga. S/S with all interior corners rounded to a 3/4” radius both horizontally and vertically. Front edge of sinks shall be Raised Rolled Edge. Back, bottom and front of all sinks shall be one continuous piece. Bottom of each compartment to be creased to a center waste outlet.
2. Drainboards shall be of 14 Ga. S/S, integral with the sinks, pitched 1/4” per foot to the sinks and with the same backsplash and rolled edge forming one continuous horizontal plane. Polish all backsplashes and tops to have metal grain running in one direction.
3. Partitions between compartments to be 1” wide X full depth double wall construction.
4. Multiple sink compartments shall be provided with continuous and seamless front without applied trim strips, panels or full width facing piece.
5. Back splashes and end splashes for sinks to be as specified above in Paragraph 2.3.M except turned up 8” in lieu of 4” before the 45 degree break.
6. Freestanding sinks to have rear of backsplash fully enclosed with 16 Ga. S/S.
7. Bottom of each sink to be fitted with a cast brass 2” rotary handle operated waste valve complete with S/S strainer, S/S handle assembly and connected overflow. Fisher Mfg. Co. Model 10707, or equal.
8. One Compartment Sinks to be complete with (1) Fisher Mfg. Co. No.13269 Faucet. Two Compartment Sinks to be complete with (1) Fisher Mfg. Co. No. 13269 Faucet. Three Compartment Sinks to be complete with (2) Fisher Mfg. Co. No. 5412 Faucets.

Q. COUNTER SINKS:
1. Sinks shall be fabricated of 14 Ga. S/S with all interior corners rounded to a 3/4” radius both horizontally and vertically. Bottom of sink to be creased to a center waste outlet.
2. Sinks shall be set into table tops with top perimeter fully welded to edge of opening in table top to create one integral unit.
3. Bottom of each sink to be fitted with a cast brass 2” rotary handle operated waste valve

complete with S/S strainer and S/S handle assembly. Fisher Mfg. Co. Model 10758, or equal.

4. Each sink to be complete with (1) Fisher 13269 Faucet (Splash mount) or (1) Fisher 3312 Faucet (Deck mount) as applicable.

R. ENCLOSED CABINET TYPE BASE:

1. Cabinet type bodies shall be formed of 18 Ga. S/S reinforced with 14 Ga. formed hat sections to create a rigid structure.
2. Ends of cabinet bodies to close to wall.
3. Base shall be welded construction with front rails, aprons, mullions and other components welded and polished to appear as one-piece construction.
4. Vertical mullions shall be 1-1/2" wide X 3/4" deep with the inside completely closed with a S/S channel that has top & bottom closed.
5. Interior shelves shall be 16 Ga. S/S all welded, suitably reinforced and formed with 1-1/2" Flat Edge on front. Rear and ends of shelves to be turned-up 2" and feathered slightly to insure tight fit to cabinet ends and/or partitions and be welded in place. Bottom shelves shall have front edge flush to and integral with front face of vertical mullions and to have rear and ends turned up as specified above.
6. Legs and feet shall be as specified in Paragraph 2.3.L above

S. HINGED DOORS

1. Hinged Doors to be double pan construction with 16 Ga. S/S exterior pan, 18 Ga. magnetic type 430 S/S interior pan and full size core of 1" thick urethane.
2. Doors to be flush mounted.
3. Hinges to be S/S lift-off slip-joint type with body side flush mounted in mullion and door side flush mounted in door edge. Standard-Keil 2874 Series, or equal.
4. Pulls to be S/S recessed-type tack welded in place. Standard-Keil 1260-1014-1283, or equal.
5. Magnetic catches to be heavy duty floating magnet type. Standard-Keil Number 2932-1010-3000, or equal.
6. Doors at compressor housings to be single pan 16 Ga. S/S construction with 3" X 1" 18 Ga. magnetic type 430 S/S channel full perimeter inside frame. Weld all corners. Provide small diamond mesh expanded metal inset. Milcor "Small Mesh", or equal (11,000 meshes per square yard). Spray mesh with aluminum paint.

T. DRAWERS

1. Drawer faces to be double pan construction with 16 Ga. S/S exterior pan, 18 Ga. S/S interior pan and full size core of 1" thick urethane.
2. Provide full perimeter rubber bumper with mitered corners on inside pan of drawer face. Standard-Keil 2740-1212-3000, or equal.
3. Drawers to be provided with heavy duty ball-bearing extension roller slides spot welded to pan frame. Standard-Keil 1415-1022-1000, or equal. Drawers to be make self-closing by pitching slides 3/4" back to front.
4. Pan Frame shall be 16 Ga. S/S. Sides and rear of 3/4" X 2" angles and front of 1" X 4" angle. Weld front to inner pan of drawer face.
5. Drawer to be enclosed in 16 Ga. S/S housing secured to underside of table with studs, lock washers and cap nuts.
6. Pulls shall be S/S recessed- type tack welded in place. Standard-Keil 1260-1410-1283, or equal.
7. Locks when specified shall be Standard-Keil 1230-3216-3000, or equal.
8. Provide each drawer complete with 20" X 20" X 5" S/S coved corner drawer pan. Standard-Keil 1481-2020-3282, or equal.

U. CASTERS:

1. Medium duty ball bearing casters with capacity of 300 pounds each.
2. Tires to be 5" diameter X 1-1/8" wide of non-marking red polyurethane.
3. Each mobile unit shall be provided with (2) brake casters (Standard-Keil 1123-3445 3000) and (2) non-brake casters (Standard-Keil 1123-3446-3000), or equal. Mount brake casters diagonally.

V. OVERSHELVES:

1. Wall Hung Shelves shall be 16 Ga. S/S with 1-1/2" Rolled Edge on front, 1-1/2" Flat Edge on ends and 2" high integral back risers.
2. Wall Hung Shelves to be supported on 14 Ga. S/S cantilevered triangular brackets of all welded construction. Top, bottom & back flanges of brackets shall be 1-1/2" wide and secured to wall with S/S bolts with toggles or expansion shields. Secure brackets to studs welded on bottom of shelves with lock washers and S/S cap nuts. Height of wall bracket shall be 6/10 of shelf width. Brackets shall have maximum longitudinal spacing of 5'-0".
3. Install shelves 60" A.F.F. to top surface of shelf unless specified otherwise.
4. Fixture Overshelves shall be 16 Ga. S/S with 1-1/2" Rolled Edge on front, 1-1/2" Flat Edge on ends and 2" high integral back risers.
5. Fixture Overshelves to be supported on 1-1/4" O.D. 16 Ga. S/S tube supports thru top of splash and welded to top framing extended back thickness of splash. Tube supports to be fitted with 14 Ga. S/S brackets welded to supports and sized as indicated above for wall shelves. Weld tube supports full perimeter at penetrations of back splash, grind and polish.
6. Install shelves 60" A.F.F. to top surface of shelf unless specified otherwise.

2.4 PRODUCT REFRIGERATION

A. SYSTEMS:

1. Provide all equipment refrigeration work indicated on the drawings, equipment schedules and specifications including but not limited to: condensing units, evaporator units, controls, piping and all accessories and components as required to provide complete and operable systems in accordance with approved refrigeration practice.
2. Manufacturer's directions shall be followed in all cases where the manufacturer furnishes directions covering points not shown on the drawings and specifications.

B. PIPING:

1. Routing must be coordinated with other trades to avoid conflict of space use.
2. All horizontal and vertical runs of tubing shall be securely supported and/or fastened to prevent sagging. No sharp bends or kinks will be permitted. Piping and manifolds to be kept high as practicable to avoid trapping suction lines.
3. After lines have been run, all sleeves including sleeves through refrigerator bodies shall be, caulked and made water-tight using Permagum, Pecora or equivalent material.
4. Connections in piping shall be accomplished using sweat fittings except at easily accessible valves and controls where flared fittings may be used.
5. Cap all piping until final connections are made.
6. Refrigerant pipe shall be type "L" all hard drawn seamless copper tubing with silver soldered joints.
7. Piping within walk-in compartments shall be finished with Chromotone paint.
8. All lines outside of refrigerated compartments shall be insulated the entire length from evaporator to the condensing unit with 3/8" thick Armstrong "Armaflex", or accepted substitute. Group insulation of lines is not permitted.
9. Provide drain line heaters wired for evaporator line voltage in all freezer compartments.

C. SYSTEM COMPONENTS:

1. Each system shall consist of refrigerant, Type "L" piping, liquid & suction line stop valves, evaporator, thermostatic expansion valve, heat exchanger, liquid line solenoid valve, filter-drier, liquid indicator, vibration eliminator and condensing unit.
2. Temperature of refrigerated compartments shall be controlled by means of a thermostat wired to actuate a solenoid valve in the liquid line.
3. Provide and install all hangers for evaporator coils as required.
4. Refrigerant shut-off valves in the refrigerant piping shall be Henry, or accepted substitute, for line sizes 7/8" O.D. and larger and packless diaphragm type for smaller sizes.
5. Expansion valves shall be Sporran, or accepted substitute, and placed in the liquid line at the point where line enters the evaporator.
6. Filter-Drier shall be Sporran, or accepted substitute.

7. Sight-glass shall be Sporran, or accepted substitute, and placed in the liquid line.
8. Solenoid valves shall be Sporran type with manual lift stem, or accepted substitute, and placed in the liquid line with room thermostat.

D. TESTING:
1. Lines shall be blown out with dry nitrogen prior to making final connections.
2. Accomplish pressure test to 150 pounds (or higher if required by code).
3. Evacuate system with a vacuum pump for a period of 24 hours. Break vacuum with refrigerant to 0 PSIG, re-establish vacuum and charge with refrigerant for operation. Run operational check for 3 days.

2.5 PRE-FABRICATED WALK-IN COOLERS & FREEZERS

A. PANELS:
1. Pre-fabricated modularized sectional-constructed panels with a 4" thick core of rigid urethane "foamed in place" insulation. Urethane to bind tenaciously to interior and exterior metal pans to form a rigid structurally sound wall without the use of any wood support members. Slab urethane, polystyrene, high-density rails or wood shall not be acceptable in any panel including doors, walls and ceilings. "U" Factor shall not exceed .035. Finish to be 20-gauge stainless steel exposed exterior. Interior walls shall be 0.35 stucco embossed aluminum, interior ceiling shall be 0.35 aluminum with white acrylic finish, and non-exposed exterior shall be 26 ga. Galvanized steel. Overall height to be 8'-6-1/4" high.
2. Panel joints shall be tongue and groove with flexible double bubble vinyl gasket foamed attachment to the flange of the metal skins along inside and outside at the abutting interface of each panel joint.
3. Panels shall be joined with cam action hooked locking arms engaging steel rods in adjacent panel with a minimum of three locks on each vertical joint.
4. Ceiling panels to be 5" thick core of rigid urethane "foamed in place" insulation with a U factor of .028.

B. INTERIOR PARTITIONS:
1. When required, shall be of same construction as the perimeter panels.

C. FLOORS:
1. Pre-fabricated Floor: When required, to be constructed of insulated modularized panels made to withstand loads up to 700 pounds per square foot and with .100 aluminum foamed-in-place treadplate wearing surface. .100 aluminum treadplate reinforced ramps at each door.
2. Built-in insulated floors: Provide floor screeds with gaskets when the building floor at walk-in locations has been properly insulated and fitted with redwood breakers. Floor Screeds to be furnished for all wall panels and be secured and sealed to the building floor.
Provide for depressed subfloor membrane and insulation assembly as per detail drawing including the following:
Apply to clean, smooth an level subfloor asphalt emulsion (ASTM D1187 claytype). Cover with Alumiseal Zero Perm vapor barrier (0.00 perm as determined by ASTM E96-80) joints lapped 6 inches minimum, and flashed up sides of recess.

Install 2 layers of 2" thick rigid urethane boardform same density and conductivity as panel insulation, joints shall be staggered.

Apply 15 pound protective felt strip over insulation, flashed up the sides of the wall panels the height of the cove base, with joints lapped 6 inches minimum.

D. COVED BASE:
1. When Pre-fabricated floors are specified, provide 18 gauge S/S Coved Base at all

exterior walls.

2. When Walk-ins are erected on built-in insulated building floors, provide 18 gauge S/S Coved Base at all interior walls and exposed exterior walls when quarry tile coved base is not provided as part of the building floor.

E. LISTINGS: Walk-Ins shall be listed with U.L. and NSF and bear their labels. Additional each compartment shall bear a label indicating "Class 1-Insulated panel as certified by an independent testing laboratory" to have surface burn spread25 or less determined by ASTM E-84.

F. DOORS:

1. Doors are to be in-fitting flush-type with:
   a. Clear Opening of 36" X 78".
   b. 15" X 20" Tri-Pane glass vision panel with heater wire full perimeter.
   c. Replaceable dual-blade adjustable rubber wiper gasket.
   d. Kason model 58 (padlock hole) keyed latch with inside release.
   e. Kason No. 1256 cam-lift chrome plated hinges. (three per door)
   f. Bellows type gasket with vulcanized corners and continuous magnetic core.
   g. Heater wires in perimeter of door. Pre-wire to electric splice box. Non exposed electrical in both cooler and freezer doors.
   h. 36" high kickplate of 1/8" diamond treadplate on interior and exterior door and jamb.
   i. Adjustable hydraulic arm door closer, with hold open feature.\
   j. Front, back and edges of door(s) shall be clad with 20 gauge #304 stainless steel. Sheet metal joints of door shall be heliarc welded, ground smooth and polished.
   k. All hardware shall be mounted with reinforced 1/8" steel tapping plates.
   l. Interior door bumper bar shall be ¼" x 2" aluminum channel, 3'-0" above finished floor.

G. DOOR FRAME:

1. Door frame to match finish and construction of wall panels and be fitted with:
   a) Kason No. 1830 two-way heated pressure relief ventilator port (In freezers only).
   b) Kason four foot fluorescent fixture No. 1810F00048.
   c) Factory install and wire interior and exterior companion 3-way and or 4-way AC press-switches, where indicated, mounted in "FS" boxes adjacent to latch side of door opening. Switch covers shall be neoprene, weatherproof press-switch with embedded red plastic pilot light. Interior red light shall be constant burning and exterior indicating lights are on. Rigid UL listed conduit and wiring shall be run within insulated wall panel. Conduit shall be terminated with "EI" seal off at exterior of roof panel. Only conduit and wiring within wall panel. Including boxes, light fixture, switches and cover plates, shall be furnished as part of this section .
   d) Exterior flush dial thermometer 2 ½".
   e) Extruded Aluminum threshold and heater wire channel with 12 gauge stainless steel threshold.
   f) All hardware shall be 3/16" stainless steel machine screws with nyloc, drilled and tapped.
   g) Door casing raised ¼" an 4 inches wide at sides and head, clad with 18 gauge stainless steel.

H. CLOSURE PANELS: When open spaces occur between top of walk-in and building finished ceiling, and/or between walk-in walls and building walls, close openings with 20 gauge stainless steel closure panels or trim to match exterior walls of walk-ins.

2.6 MILLWORK FABRICATION

A. STANDARDS

1. Construction and installation of all millwork shall be as indicated on the drawings and shall conform to the requirements of all Architectural Woodwork Institute Standards of "custom grade" work.

B. MATERIALS

1. Millwork and materials shall conform in all respects to codes for fire retardant treatments.
2. Unexposed wood shall be Grade B Red Gum, Yellow Poplar, Birch or other suitable hardwood standard with the mill shop. Plywood shall be Douglas Fir or Birch of the thickness indicated on the drawings or as required, good one or both sides as conditions require. Exposed faces shall be surfaced with a medium density phenolic overlay. Hardwood, plywood, particleboard core, good one or both sides as required. Shall have face veneers of the species and match indicated on the drawings. Moldings, trim, solid hardwood exposed to view, etc. shall be of the shapes and sizes indicated on the drawings. Birch shall be plain sawn and oak shall be plain sawn "Red Oak" unless otherwise indicated. Plastic laminate for cabinetwork shall be Formica, Nevamar, or as approved. All materials shall be laminated to close-grained plywood such as birch or douglas fir of selected smooth sanded stock to insure a ripple free surface. Top sheet shall be placed on and over finished edge. Millwork that abuts exterior walls shall be back primed.

2.7 EXISTING EQUIPMENT

A. UTILITY CONNECTIONS:
1. Work of this Section does not include disconnecting or reconnecting of plumbing, electrical or mechanical services from and/or to the existing food service equipment.
2. Disconnecting and reconnecting Work is to be performed by the respective trades per Paragraph 1.1B or the Food Service Equipment Specifications.

B. REMOVAL & STORAGE:
1. Remove and store at a location as directed, for the duration of the Construction Phase, all equipment scheduled for re-use.

C. EQUIPMENT CONDITION:
1. Existing Equipment scheduled for re-use has been inspected and found to be in good working order. If this Contractor finds any concealed damage or other conditions detrimental to re-use during the process of removing and reconditioning, he shall notify the Owner and/or General Contractor of his findings.

D. RECONDITIONING:
1. Steam clean all grease coated or food encrusted items of equipment.
2. Perform minor surface repairs, reweld, grind & polish broken welds, replace broken or missing small parts such as knobs and repaint all damaged painted surfaces with paint matching original.

PART 3 - EXECUTION

3.1 EXAMINATION

A. INSPECTION:
1. Study the contract drawings and specifications with regard to the work as shown and required under this Section so as to insure its completeness.
2. Examine surfaces and conditions to which this work is to be attached, or applied, or occupy . Starting on the work shall imply acceptance of the surfaces and conditions to perform the work as specified.
3. Verify by measurements taken at the job site, those dimensions affecting the work. Bring field dimensions which are at variance with those on the approved shop drawings to the attention of the Architect. Obtain decision regarding corrective measures before the start of fabrication or installation.
4. Coordinate equipment provided and all utility requirements with respective drawings and specifications to assure proper rough-in, utility services and conformance to applicable code requirements.
5. Cooperate in the coordination and scheduling of the work of this Section with the work of other sections so as not to delay job progress.

3.2 INSTALLATION

A. GENERAL:
1. Install all equipment in strict accordance with manufacturer's directions and recommendations by skilled mechanics of trades generally associated with individual items. Secure and seal all items in place as shown on the drawings.
2. Provide competent field representative to be present to advise the respective trades (Such as utility rough-in work and hook-up), and verify size and location of all concealed utility work before it is covered.

3.3 PROTECTION AND CLEANING
A. PROTECTION:
1. Protect the installed work using adequate and suitable means, during and after installation and until accepted by Owner.
2. Perform all final adjustments just prior to final inspection.
B. REPAIR:
1. Surfaces which become damaged, marred, scratched, abraded or are not sound shall be repaired or removed and replaced, as determined by the Owner.
C. CLEANING:
1. Clean surfaces of grime, dust and general construction dirt and polish all equipment prior to final inspection and acceptance.

3.4 TESTING AND REGULATING
A. GENERAL:
1. Test, regulate and prove to the Owner or his representative that all equipment is operating properly.
B. START-UP:
1. During testing and start-up, the Manufacturer's Representative for each item of standard manufacture shall be present and shall instruct the Owner's personnel in proper operation, maintenance and safety procedures.

3.5 SCHEDULE OF EQUIPMENT
A. ITEM SPECIFICATIONS:
1. Refer to Equipment Schedule on Drawings.
2. Item Equipment Numbers correspond to equipment item numbers on the drawing plans, elevations and details. Item Specifications describe equipment desired and required for this project.
3. Requests submitted in accordance with requirements for Substitutions or Prior Approvals will be governed equal by comparison to standard specified manufacturer's published specifications in regard to sizes, capacities, function, finish and project compatibility of utility sizes and characteristics.

ITEM 1 - AIR CURTAIN (1 REQ'D)
Mars Air Systems Model LPV242-1UA-PW
LoPro Series 2 Air Curtain, for 42" wide door, Unheated, (1) 1/6 HP motor, Pearl White powder coated cabinet (Standard Production Color), cETLus

Accessories:
1 ea 5 year parts warranty
1 ea Model 99-014 Steel Mechanical Universal Surface-mounted Plunger/Roller Switch

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 2 - EMPLOYEE LOCKERS LOCKER (3 REQ'D)
SPG International Model 4K0034

Kelmax Locker, two tier, single wide, (2) 12"W x 15"D x 36"H doors, beige powder coated paint finish, double latch, 6" legs

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 3 - MOP SINK (1 REQ'D)
GSW USA Model SE2424FM
Mop Sink, floor mount, 20"W x 20"D x 10"H bowl, includes plastic basket strainer, stainless steel construction, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 4 - SERVICE FAUCET (1 REQ'D)
Fisher Model 8253
1 ea K.E.C. to provide faucet with inlet Check stops for the HW & CW connections.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 5 - ICE MACHINE ASSEMBLY (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to remain.

ITEM 6 - BREW STATION TABLE W/ SINK (1 REQ'D)
Custom Fabricated Stainless Steel
304 16 ga S/S top with 4" back splash, (1) 10" x 14"x 10" fully welded sink bowl with deck mount faucet and basketwaste. Provide with S/S legs and 16 ga S/S undershelf per plans and elevations.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 7 - COFFEE BREWER (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 8 - ICED TEA BREWER (1 REQ'D)
BUNN Model 36700.0300
36700.0300 TB6 Twin Iced Tea Brewer, (2) 3-gallon capacity, 16.3 gallon/hour, rotating brew basket, base platform adapter, dedicated dilution nozzles, brew selection switch, adjustable sleep time, SplashGard® funnel, color coded decals, designed for brewing into (2) 3.5 gallon BUNN narrow tea dispensers, , cord attached, UL, NSF

Accessories:
2 ea TDO-N-3.5 Narrow Iced Beverage Dispenser, 3.5 gallon capacity, sump dispense valve, front-back handles, 8" cup clearance, for use with BUNN TB-3, TB-3Q and ITCB brewers with 29" trunk height, NSF

Provide and install in location shown on plan and per manufactures recommendations complying

with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 9 - SPARE NUMBER

ITEM 10 - CHEMICAL STORAGE SHELVING UNIT (1 REQ'D)
NEXEL Model EPOXY
Starter Shelving Unit, wire, 86"H, (5) shelves, (4) posts & plastic shelf clips, Nexelon™ blue metallic epoxy finish with Nexgard anti-microbial coating, NSF. See plan for size and configuration.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 11 - REACH-IN FREEZER (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 12 - SPARE NUMBER

ITEM 13 - SPARE NUMBER

ITEM 14 - SPARE NUMBER

ITEM 15 - WALK-IN COOLER / FREEZER (1 REQ'D)
American Panel Corporation Custom Prefabricated Unit
Prefabricated 4" insulated panel construction. Walk in cooler/freezer as per plan, 8'6" High, diamond Tread Plate, door kick Plates, strip Curtain, vision Window. Monitoring System, LED Light Fixtures, Bulbs by others, refer to walk in drawing FS 6.1 for complete details and specifications. KEC to assemble walk in cooler and provide closure trim panels to fully seal walk-in panels to building walls and ceiling.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 16 - COOLER EVAP COIL (1 REQ'D)
American Panel Corporation Model ADT130
Evaporator Coil , Cooler compartment. Refer to walk in drawing FS 6.1 for complete details and specifications. installation of evaporator coil and remote Condenser by KEC

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 17 - COOLER CONDENSING UNIT (1 REQ'D)
American Panel Corporation Model FFAP-017Z
Condensing Unit, Cooler compartment. Refer to walk in drawing FS 6.1 for complete details and specifications. Installation of evaporator coil and remote Condenser by KEC. KEC to provide approved shop drawings to GC for final review and approval.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 18 - FREEZER EVAP COIL (1 REQ'D)
American Panel Corporation Model LET075
Evaporator Coil , Freezer compartment. Refer to walk in drawing FS 6.1 for complete details and specifications. installation of evaporator coil and remote Condenser by KEC

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 19 - FREEZER CONDENSING UNIT (1 REQ'D)
American Panel Corporation Model AVA2510ZXTXC
Condensing Unit, Freezer compartment. Refer to walk in drawing FS 6.1 for complete details and specifications. Installation of evaporator coil and remote Condenser by KEC. KEC to provide approved shop drawings to GC for final review and approval.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 20 - WIRE SHELVING UNIT (13 REQ'D)
NEXEL Model Epoxy
Starter Shelving Unit, wire, 86"H, (5) shelves, (4) posts & plastic shelf clips, Nexelon™ blue metallic epoxy finish with Nexgard anti-microbial coating, NSF

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 21 - SPARE NUMBER

ITEM 22 - HAND SINK (3 REQ'D)
GSW USA Model HS-1217S
Hand Sink, wall mount, one compartment, 12-5/8"W x 17-7/8"D x 13-3/8"H overall size, 9-3/4" wide x 13-3/4" front-to-back x 5-5/8" deep sink bowl, welded splash guards, includes: no lead wall mount gooseneck faucet (AA-410G) & strainer (AA-141), 304 stainless steel construction, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 23 - CAN RACK (1 REQ'D)
New Age Model 1250
Can Storage Rack, stationary design with adjustable feet, sloped glides for automatic can retrieval, aluminum construction, holds (162) #10 cans or (216) #5 cans, NSF, Made in USA

Accessories:
1 ea Lifetime warranty against rust & corrosion, 5 year workmanship and material defects warranty

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet

utility requirements listed on rough-in plans.

ITEM 24 - DRY STORAGE SHELVING UNITS (12 REQ'D)
NEXEL Model Chrome
Starter Shelving Unit, wire, 86"H, (5) shelves, (4) posts & plastic shelf clips, electro-plated nickel-chrome finish, KD, NSF. See plan for size and configuration.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 25 - CORNER GUARDS & S/S WALL CAPS (8 REQ'D)
Custom Fabricated Stainless Steel
304 S/S construction. 2" x 2" angle with hug edges from cove base to ceiling. Verify with field conditions prior to fabrication.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 26 - WORK TABLE (1 REQ'D)
John Boos Model ST6R5-2472SSK
Work Table, 72"W x 24"D, 16/300 stainless steel top with 5" backsplash, with Stallion Safety Edge front, 90° turndown on sides, stainless steel legs & adjustable undershelf, adjustable bullet feet, NSF, CSA-Sanitation, KD

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 27 - WALL SHELVES (2 REQ'D)
GSW USA Model WS-W1272
Shelf, wall-mounted, 72"W x 12"D x 10"H, holds up to 200 lb. capacity, includes (4) brackets & hardware, 18 gauge polished stainless steel, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 28 - SPARE NUMBER

ITEM 29 - SHEET PAN RACK (4 REQ'D)
New Age Model 1331
Bun Pan Rack, mobile, full height, end loading, open sides, accommodates (20) 18" x 26" pans, slides on 3" centers, all welded aluminum construction, (4) 5" platform casters, NSF, Made in USA

Accessories:
4 ea Lifetime warranty against rust & corrosion, 5 year workmanship and material defects warranty, standard
4 ea 5" platform type casters, std.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 30 - SPARE NUMBER

ITEM 31 - PREP TABLE W/ SINKS (1 REQ'D)
Custom Fabricated Stainless Steel
304 14 ga S/S top with 6" high back splash, S/S legs and 16 ga undershelf. Provide with (2) 24" x 24" x 14" fully welded sink bowls with 1/4" S/S rod support brackets for cutting board insets, splash mount faucet and leverwastes. Provide with 1" thick white poly cutting boards that sit flush with top when installed. Include S/S cutting board storage brackets.

Accessories:
1 ea Faucet Aerator, 1.5 gpm, 55/64" female inlet & 15/16" male inlet
1 ea K.E.C. to provide faucet with inlet Check stops for the HW & CW connections.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 32 - WALL SHELVES (4 REQ'D)
GSW USA Model WS-W1266
Shelf, wall-mounted, 66"W x 12"D x 10"H, holds up to 200 lb. capacity, includes (5) brackets & hardware, 18 gauge polished stainless steel, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 33 - PRE-RINSE FAUCET ASSEMBLY, WITH ADD ON FAUCET (2 REQ'D)
T&S Brass Model B-2285-12-CR-BC
EasyInstall Pre-Rinse Unit, single-deck mount, single temperature, add-on faucet, 12" swing nozzle, 24" riser, quarter-turn Cerama cartridge with check valves, lever handle, 44" stainless steel flex hose, heat-resistant handle, 0.65 GPM low flow spray valve (B-0107-C), 6" wall bracket (B-0109-01), 1/2" NPSM male inlet, polished chrome-plated brass body, low lead content, cCSAus, EPAct 2005 compliant

Accessories:
1 ea Faucet Aerator, 1.5 gpm, 55/64" female inlet & 15/16" male inlet
1 ea K.E.C. to provide faucet with inlet Check stops for the HW & CW connections.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 34 - SLICER (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 35 - FOOD PROCESSOR (1 REQ'D)
Robot Coupe Model R2N
Commercial Food Processor, 3 liter gray polycarbonate bowl with handle, vegetable prep attachment with external ejection, kidney-shaped opening, includes: (1) "S" blade (27055), (1) 2mm grating disc (27577),

(1) 4mm slicing disc (27566), continuous feed, bowl attachment designed for vertical cutting & mixing, on/off & pulse switch, single speed, 1725 RPM, 1 HP, , cETLus, ETL-Sanitation

Accessoies:
1 ea 1 year parts & labor warranty
1 ea 3 year motor warranty
1 st Model SP5DISC SP5Disc, (5) disc package includes: (1) 1/4" grating disc, (1) 1/4" x 1/4" julienne disc, (1) 5/64" julienne disc, (1) 1/32" slicing disc, (1) 1/4" slicing disc

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 36 - PLASTIC SHELVING UNIT (3 REQ'D)
Cambro Model Elements
Camshelving® Elements Mobile Unit, 78"H, 4-tier, withstands temperature from -36°F (-38°C) to 190°F (88°C), includes: (4) vented reinforced polypropylene shelf plates with Camguard® antimicrobial protection, (4) composite posts, pre-assembled post connectors & wedges, (8) mobile traverses & (4) bags of 8 count dovetails (16 each A & B), (4) premium swivel casters with total locking brake, 750 lbs. max capacity, brushed graphite, NSF

Accessories:
3 ea Lifetime warranty against corrosion and rust
10 ea Model CSDR7151 Camshelving® Vertical Drying & Storage Cradle, 10-1/4"W x 23-1/2"L x 3-3/4"H, 7-slot rack, allows sufficient air circulation (maximum product width of 1-5/16"), fits all 24" wide Camshelving®, Camshelving® Elements, Mobile or Stationary up to 24"L to 72"L shelving units, soft gray, high impact ABS, NSF

ITEM 37 - SPARE NUMBER

ITEM 38 - PREP TABLE W/ SINK (1 REQ'D)
Custom Fabricated Stainless Steel

304 14 ga S/S top with 6" high back splash, S/S legs and 16 ga undershelf. Provide with (1) 24" x 24" x 14" fully welded sink bowls with 1/4" S/S rod support brackets for cutting board inset, splash mount faucet and leverwastes. Provide with 1" thick white poly cutting boards that sit flush with top when installed. Include S/S cutting board storage bracket.

Accessories:
1 ea Faucet Aerator, 1.5 gpm, 55/64" female inlet & 15/16" male inlet
1 ea K.E.C. to provide faucet with inlet Check stops for the HW & CW connections.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 39 - WALL SHELVING (2 REQ'D)
GSW USA Model WS-W1248
Shelf, wall-mounted, 48"W x 12"D x 10"H, holds up to 250 lb. capacity, includes (3) brackets & hardware, 18 gauge polished stainless steel, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 40 - EXHAUST HOOD (1 REQ'D)
Captive-Aire Model 6030ND-2-PSP-F
S/S construction, S/S type grease filters, front eye brow make-up air plenum. Hoods to be pre-piped for fire suppression system. See manufacturer Data sheet for additional information.

1. Stainless steel construction where exposed
2. Hood to be UL listed
3. Stainless steel Captrate Solo type baffle filters.
4. Provide stainless steel closure panels from top of hood to building ceiling
5. Incandescent light fixtures w/ wire lamp guards located as shown on plans
6. Mount unit to overhead building structure w/ bottom of hood at 78" above finished floor

Provide to site in crated for installation by G.C. Coordinate delivery schedule with G.C. Item should be provided with all accessories listed and shown on hood submittal pans in FS plan set and meet utility requirements listed on rough-in plans.

ITEM 41 - FIRE SUPPRESSION SYSTEM (1 REQ'D)
Captive-Aire Model R-102
Wet chemical, pre-piped system with mechanical gas shut off valve, chrome plated drops where exposed, nozzles, tanks and fuses for a complete and operable system. KEC to provide with all tests & permits with installation.

1. Wet chemical pre-piped system for type I exhaust hoods.
2. System to provide ventilator, duct and surface protection in compliance w/ NFPA and all applicable codes
3. System to be complete with mechanical shut-off valves, chrome plated nozzles and exposed piping, cables, conduit, cylinders, pull stations, micro-switch w/ dual contacts and parts of every description for a complete operable system.
4. System to be installed by authorized personnel in accordance w/ UL listing
5. Provide, install and label remote pull station where indicated on plans.
6. Provide complete system including all required permits and testing.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 42 - ELECTRICAL CONTROL PACKAGE (1 REQ'D)
Captive-Aire Model SC-311110MA
Ventilation control panel for Exhaust Fans, Supply Fan, Exhaust on in Fire, Lights out in Fire, Fans activate based on duct temperature. INVERTER DUTY THREE PHASE MOTOR REQUIRED! Room temperature sensor shipped loose for field installation. Includes 3 Duct Thermostat kits.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 43 - S/S WALL FLASHING (1 REQ'D)
Custom Fabricated Stainless Steel
304 18 ga S/S construction from cove base to + 79" AFF with "T" trim strip moldings.

Provide and install in location shown on plan and per manufactures recommendations complying

with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 44 - DOUBLE CONVECTION OVEN (1 REQ'D)
Vulcan Model VC44GD
Convection Oven, gas, double-deck, standard depth, solid state controls, electronic spark igniters, 60 minute timer, (5) nickel plated racks per oven, 8" high legs, stainless steel front, top and sides, stainless steel doors with windows, 50,000 BTU each section, NSF, CSA Star, CSA Flame, ENERGY STAR®

Accessories
1 ea 1 year limited parts & labor warranty
1 ea (2) total, (2) 6' cords with plugs
1 ea Gas manifold piping included with stacking kit to provide single point gas connection
1 ea ¾" Quick disconnect Hose, 48" long gas flex hose & quick disconnect with restraining device
1 st Casters, set of (4) in lieu of standard legs

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 45 - STEAMER W/ STAND (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 46 - 30 GAL TILT SKILLET (1 REQ'D)
Groen Model BPM-30GC
Braising Pan, gas, 30-gallon capacity, 10" deep pan, 38" pan height, IPX6 water rated electronic Classic controls, manual tilt, standard etch marks, faucet bracket, round tubular open leg base, stainless steel construction, bullet feet, electric spark ignition, 104,000 BTU/hr, cCSAus, NSF, IPX6, Made in USA

Accessories:
1 ea (1) year parts & labor, (10) year pan warranty
1 ea 2" Tangent draw-off with perforated strainer
1 ea Model 146222 Faucet, double pantry, with swing spout & riser, left or right-sided mounting
1 ea Model 146221 Flanged Feet, for all BPM & BPP models (set of 2)

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 47 - FLOOR TROUGH (1 REQ'D)
John Boos Model FTFG-1836
Floor Trough, 36"W x 18"D, subway-style fiberglass grating, 4" deep all-welded drain pan with built-in pitch, accommodates up to a 4" diameter pipe, includes stainless steel removable perforated strainer, 14/300 stainless steel

Provide to site in crated for installation by G.C. Coordinate delivery schedule with G.C. Item should be provided with all accessories listed and shown on hood submittal pans in FS plan set and meet utility requirements listed on rough-in plans.

ITEM 48 - 6 O.B. RANGE W/ OVEN (1 REQ'D)
Imperial Model IR-6-C

Restaurant Range, gas, 36", (6) open burners, convection oven, (3) chrome racks, removable crumb tray, stainless steel front, sides, backguard, landing ledge & kick plate, 6" legs, adjustable feet, 1/4 HP, 222,000 BTU, NSF, CE, CSA Flame, CSA Star

Accessories:
1 ea Limited one year parts and labor warranty
1 ea cord & plug
1 ea Stainless steel backguard with shelf
1 ea Swivel casters (set of 4) two with brakes, per set
1 ea ¾" Quick disconnect Hose, 48" long gas flex hose & quick disconnect with restraining device

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 49 - WORK TABLE (1 REQ'D)
GSW USA Model WT-P3072B
Premium Work Table, 72"W x 30"D x 35"H, 16/304 stainless steel top, 18 gauge stainless steel legs with side & rear cross rails, adjustable plastic bullet feet, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 50 - WALL SHELF (1 REQ'D)
GSW USA Model WS-W1272
Shelf, wall-mounted, 72"W x 12"D x 10"H, holds up to 200 lb. capacity, includes (4) brackets & hardware, 18 gauge polished stainless steel, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 51 - INGREDIENT BIN (4 REQ'D)
Cambro Model IBS27148
Ingredient Bin, mobile, 27 gallon capacity, 1-pc seamless polyethylene bin, 2-pc sliding polycarbonate lid, S-hook on front (scoop NOT included), (4) 3" heavy duty casters (2 front swivel, 2 fixed), white with clear cover, NSF

Accessories:
4 ea Model SCP24CW135 Camwear® Scoop, 24 oz., polycarbonate, clear, NSF

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 52 - PLANETARY MIXER (1 REQ'D)
Globe Model SP08
Planetary Mixer, 8 qt., countertop model, 3-speed (fixed), gear-driven transmission, front-mounted touchpad controls with 15-minute digital timer, safety interlocked bowl lift, thermal overload protection, includes: polycarbonate bowl guard with chute, stainless steel bowl & whip, aluminum beater & spiral dough hook, cast aluminum body, 1/4 HP, cord, , NSF, cETLus

Accessories:
1 ea 2-year parts & labor warranty (1-year parts only warranty on agitator and hub accessories, no labor provided)

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 53 - PLANETARY MIXER (1 REQ'D)
Globe Model SP60
Planetary Mixer, 60 qt., floor model, 3-speed (fixed), #12 hub, includes: stainless steel removable bowl guard with built-in ingredient chute, stainless steel wire whip, aluminum flat beater, aluminum spiral dough hook & bowl truck, safety interlocked bowl guard & bowl lift, gear-driven, high torque transmission, heat-treated hardened steel alloy gears & shafts, thermal overload protection, front-mounted touchpad controls with 60-minute digital timer & last batch recall, non-slip rubber feet, cast iron body, 6 ft cord & plug, 3 HP, NSF, cETLus

Accessories:
1 ea 2-year parts & labor warranty (1-year parts only warranty on agitator and hub accessories, no labor provided) (excludes wear items)

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 54 - COUNTERTOP GRIDDLE (1 REQ'D)
Imperial Model ITG-60
Griddle, countertop, gas, 60" W x 24" D cooking surface, 1" thick polished steel plate, thermostatic controls, 4" wide front grease trough, removable grease can, stainless steel front, sides, splash guards & ledge, 4" legs, 150,000 BTU, cETLus, NSF, CE

Accessories:
1 ea Limited one year parts and labor warranty
1 ea ¾" Quick disconnect Hose, 48" long gas flex hose & quick disconnect with restraining device

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 55 - REFRIGERATED BASE (1 REQ'D)
True Manufacturing Co., Inc. Model TRCB-52-60
Refrigerated Chef Base, 51-7/8"W base, 60"W one-piece 300 series 18 gauge stainless steel top with V edge, (2) drawers (accommodates (3) 12" x 20" x 4" pans, NOT included), stainless steel front/sides, aluminum back, aluminum interior with stainless steel floor, 4" castors, 1/3 HP, , cULus, UL EPH Classified, CE, Made in USA

Accessories:
1 ea Self-contained refrigeration
1 ea Warranty - 5 year compressor
1 ea Warranty - 3 year parts and labor
1 ea 4" Castors, standard

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 56 - DROP-IN HOT FOOD WELL (1 REQ'D)
Alto-Shaam Model 200-HWIS/D6
Halo Heat® Hot Food Well Unit, Drop-In, Electric, 44-3/8"W x 14-15/16"D, (2) 12" x 20" full-size pan capacity (pans NOT included), 6-3/8" deep well, holds 6" deep pans, (2) individual adjustable thermostatic controllers, stainless steel construction, EcoSmart®, cULus, UL EPH Classified, CE, IPX3, TUV NORD, EAC

Accessories:
1 ea 6 ft. cord, , standard
1 ea Cord located on back of control box

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 57 - WORK TABLE (2 REQ'D)
John Boos Model ST6-3672SSK
Work Table, 72"W x 36"D, 16/300 stainless steel flat top, with Stallion Safety Edge front & back, 90° turndown on sides, stainless steel legs & adjustable undershelf, adjustable bullet feet, NSF, CSA-Sanitation, KD

Accessories:
2 ea Model OSE16FK-1272 Overshelf, single, 72"W x 12"D, 16/300 stainless steel flat top, mounted 18" above table top, 1" stainless steel post, KD, NSF

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 58 - TABLE MOUNTED POT RACK (1 REQ'D)
John Boos Model PRTC3
Pot Rack, table mount, oval, 67-1/4"W x 18"D x 48"H overall size, 3/16" x 2" stainless steel flat bar, includes (18) stainless steel double hooks, 16/300 stainless steel construction, NSF, CSA-Sanitation

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 59 - REACH-IN REFRIGERATOR (1 REQ'D)
True Manufacturing Co., Inc. Model T-23-HC
Refrigerator, reach-in, one-section, (1) solid door, (3) PVC coated adjustable wire shelves, interior lighting, stainless steel door, stainless steel front, aluminum sides, clear coated aluminum interior with stainless steel floor, 4" castors, R290 Hydrocarbon refrigerant, 1/4 HP, , cULus, UL EPH Classified, CE, Made in USA, ENERGY STAR®

Accessories:
1 ea Self-contained refrigeration
1 ea Warranty - 5 year compressor

1 ea 4" stem castors
1 ea Warranty - 3 year parts and labor
1 ea Door hinged per plan

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 60 - PASS-THRU MOBILE HEATED CABINET (1 REQ'D)
Metro Model C569-NDS-UPDSA
C5™ 6 Series Heated Holding Cabinet, mobile, full height, pass thru, insulated, solid Dutch doors, top mount controls & analog thermometer, ducted heating system, thermostat 70° to 200°F temp, universal wire slides (17) 18" x 26" or (32) 12" x 20" x 2-1/2" pan capacity, 3" OC (adjustable on 1-1/2" increments), 5" casters (2 with brakes), aluminum, , cULus, NSF

Accessories:
1 ea Door hinged per plan

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 61 - ISLAND PREP TABLE (1 REQ'D)
John Boos Model ST6-3672SSK
Work Table, 72"W x 36"D, 16/300 stainless steel flat top, with Stallion Safety Edge front & back, 90° turndown on sides, stainless steel legs & adjustable undershelf, adjustable bullet feet, NSF, CSA-Sanitation, KD

Accessories:
1 ea Model X-0208A Cutout per sketch
1 ft Model X-0208J Apron in front of sink or drop-in for modular base work tables
1 ea Model EBOX24 Single gang junction box (empty), welded in stainless steel mounting bracket, mounts below table top or overshelf
1 st Model CAS01-R Casters, 5", heavy duty, locking, for 1-5/8" diameter legs (set of 4)
1 ea Model OSE16FK-1272 Overshelf, single, 72"W x 12"D, 16/300 stainless steel flat top, mounted 18" above table top, 1" stainless steel post, KD, NSF

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 62 - SERVING COUNTER (1 REQ'D)
N.I.K.E.C. - Supplied and installed by G.C. See architectural plans for specification & detail.

ITEM 63 - SNEEZE GUARD, STATIONARY (1 REQ'D)
BSI Model XG3930
XGuard™ Food Shield, single, self service, fully adjustable, 20-1/2" height, 14" wide tempered glass top & lower sneeze guard, 1" diameter tubing double supports, NSF-Component, cULus

Accessories:
1 ea 1" radius corner
1 ea Brushed Stainless Steel Finish, to be verified with Architect prior to order.
1 ea Model 605 Stealth™ Warmer & Light Combo, (specify voltage & length), cULus, NSF

1 ea Remote Infinite
1 ea Wiring exit point per electrical rough-in plan
1 ea Model MWU5 Millwork Undercounter Mount, includes heavy duty flange & stainless steel wood screws, nylon grommet, requires undercounter access, NSF, UL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 64 - DROP- IN COLD FOOD WELL (1 REQ'D)
Vollrath Model FC-4C-04120-R
Refrigerated Cold Pan, drop-In, 4-pan, 8" deep well, accommodates standard 12" x 20" pans with adaptor bars, drip-free flange, polyurethane foam insulated, 300 series stainless steel, 20 gauge galvanized exterior housing, self contained refrigeration, 1/3 HP, cord with , cULus, NSF, Made in USA

Accessories:
1 ea Model 36915-2 Perforated False Bottom

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 65 - DROP-IN HOT FOOD WELL (1 REQ'D)
Vollrath Model 3640460HD
Hot Food Well Unit, Drop-In, electric, (3) 12" x 20" individual 20 gauge/316 marine grade stainless steel insulated wells, 41-1/2"W x 26"D x 21-1/2"H (overall), wet operation only, auto-fill, individual infinite controls mounted in panel with cord, power indicator light, drip-free flange, 1" copper manifold drain with individual well shutoffs & manifold shutoff, 18 gauge stainless steel top, stainless steel exterior housing, includes positioning clips, cord with , NSF, cULus, Made in USA

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 66 - DROP-IN HOT / COLD FOOD WELL (1 REQ'D)
Vollrath Model FC-6HC-03120-AD
Hot/Cold Well, Drop-In, top mount, (3) pan, remote mountable panel with on-off switch, hot/cold toggle with indicator lights for hot or cold, thermostatic temperature rotary knob control in hot mode, preset cold control, automatic manifold drain, 300 series stainless well & flange, galvanized wrapper, per well, cord with , cULus, NSF, Made in USA

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 67 - COLD FOOD WELL UNIT (1 REQ'D)
Vollrath Model FC-4C-02120-R
Refrigerated Cold Pan, drop-In, 2-pan, 8" deep well, accommodates standard 12" x 20" pans with adaptor bars, drip-free flange, polyurethane foam insulated, 300 series stainless steel, 20 gauge galvanized exterior housing, self contained refrigeration, 1/5 HP, cord with , cULus, NSF, Made in USA

Accessories:

1 ea Model 36913-2 Perforated False Bottom

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 68 - TRAY SLIDE (1 REQ'D)
Custom Fabricated Stainless Steel
304 16 ga S/S construction. Flat surface with fold down hardware. Provide with 1/2" white poly board cutting boards.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 69 - BACK SERVICE COUNTER BASE (1 REQ'D)
Custom Fabricated Stainless Steel
304 18 ga S/S sub top, 18 ga S/S cabinet base with open shelves and finished openings for undercounter equipment. Provide with cut out in top for built in hand sink per plans and elevations.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 70 - HAND SINK (1 REQ'D)
Advance Tabco Model 7-PS-42
Recessed Hand Sink, 14"W x 10"D x 5" deep sink bowl, includes: 4" OC deck mounted gooseneck faucet with aerator, soap & paper towel dispensers, 4"H side splashes, 304 stainless steel, NSF (countertop opening not to exceed 17-1/4" (front to back) x 17-3/8" (left to right))

Accessories:
1 ea Model K-08 Low-flow aerator 0.5gpm
1 ea Model 7-PS-14 P-trap, 1-1/2", 22 gauge

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 71 - SOILED DISH TABLE W/ DUMP SINKS (1 REQ'D)
Custom Fabricated Stainless Steel
304 14 ga S/S top with 8" landing ledge, 10" back splash, 3" sanitary rolled edge, provide with scrap sink with perforated insert basket, pass winow with 2” x 2” framed opening with hig edges. sinks with perforated s/s basket inserts, Stainless Steel legs, cross ails and adjustable bullet feet. Provide with cut out in top for disposer cone and control bracket for disposer controls.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 72 - COMMERCIAL WASTE CONTAINER (1 REQ'D)
Rubbermaid Commercial Products Model FG263256GRAY

BRUTE® Food Processing Container, without lid, 32 gallon, 22"D x 27-1/4"H, with "Inedible" black imprint, reinforced rims, built in handles, double rimmed base, high-impact plastic construction, gray , NSF, Made in USA

Accessories:
1 ea Model FG264043BLA BRUTE® Quiet Dolly, 18-1/4"D x 6-5/8"H, non-marking casters, black, NSF, Made in USA
1 ea San Jamar Model KA3244 KatchAll® Flatware Retriever, 25" x 9-1/2", fits 32 & 44 gallon round can, dishwasher safe, plastic (does not attract 18/8 or 18/10 silverware)

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 73 - DISHTABLE SORTING SHELF (1 REQ'D)
GSW USA Model DT-WS2442
Wall Mounted Slanted Rack Shelf, 42"W x 24"D, 16 gauge, 304 stainless steel, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 74 - PRE-RINSE FAUCET ASSEMBLY (1 REQ'D)
T&S Brass Model B-0133-CR-V-BCE
EasyInstall Pre-Rinse Unit, 8" wall mount, 44" flex hose, 6" wall bracket, 18" riser, lever handle, ceramic cartridge, vacuum breaker, 0.65 GPM low flow spray valve, low lead, 1/2" NPT, EPAct2005 compliant, NSF (B-0230-K) (B-0107-C)

Accessories:
1 ea K.E.C. to provide faucet with inlet Check stops for the HW & CW connections.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 75 - 44" CONVEYOR DISH MACHINE (1 REQ'D)
Jackson WWS Model RACKSTAR 44CE
RackStar® 44 Dishwasher, conveyor type, high temperature sanitizing with electric tank heat, single tank design, approximately (223) racks/hour capacity (0.35 gallons per rack), fully automatic including auto-fill, digital temperature readout, double-wall insulated doors on front, EnergyGuard™ controls, Dual Rainbow Rinse™ - Econo (0.35 gpr) or Turbo (0.51 gpr), vent cowl collar with adjustable damper, vent fan control, strike plate table limit switch, splash shields, stainless steel construction, adjustable bullet feet, 3 HP pump, 1/4 HP conveyor, cETLus, NSF, ENERGY STAR®

Accessories:
1 ea Right to left operation
1 ea wash tank heater
1 ea Model OBH-40 Onboard Booster Heater, 40° rise
1 ea Single point connection
1 ea Higher than standard height hood, 25" clearance
1 ea Model 05700-002-88-07 Table limit switch with strike plate (unmounted) (standard)
1 ea Model 05700-002-64-67 Water Hammer Arrestor,1/2"

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 76 - CONDENSATE HOOD (1 REQ'D)
Captive-Aire Model 4830VHB-G
304 S/S construction with 3" perimeter gutter, removable mesh filter. Refer to manufacturer shop drawings for additional spec & detail info.

Provide to site in crated for installation by G.C. Coordinate delivery schedule with G.C. Item should be provided with all accessories listed and shown on hood submittal pans in FS plan set and meet utility requirements listed on rough-in plans.

ITEM 77 - S/S WALL FLASHING (1 REQ'D)
Custom Fabricated Stainless Steel
304 18 ga S/S construction from cove base to + 79" AFF with "T" trim strip moldings.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 78 - CLEAN DISHTABLE (1 REQ'D)
GSW USA Model DT60C-L
Clean Dishtable, straight design, right-to left operation, 60"W x 30"D x 34"H, 16/304 stainless steel construction, 8" backsplash, stainless steel legs & cross-braces, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 79 - WALL SHELF (1 REQ'D)
GSW USA Model WS-W1236
Shelf, wall-mounted, 36"W x 12"D x 10"H, holds up to 250 lb. capacity, includes (3) brackets & hardware, 18 gauge polished stainless steel, ETL

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 80 - 3 COMPARTMENT SINK (1 REQ'D)
GSW USA Model SH18243D
Sink, three compartment, 90-3/8"W x 30"D x 45"H, 16-gauge stainless steel construction, 18"W x 24" front-to-back x 14" deep compartments, 18" drainboards on left & right, 11-1/2"H backsplash, 8" OC splash mount faucet holes, includes (3) strainers with 3-5/8" dia. openings, stainless steel legs & side cross bracing, ETL

Accessories:
1 ea Model AA-714G Commercial Duty Faucet, 8" wall mount, 14" swivel spout, 1/2" NPT female inlets, reinforced double O-Ring valves with hot & cold mark on stem, color coded Red & Blue handles, brass construction & polished chrome body, no lead, MAX 2.2GPM @ 60PSI
1 ea K.E.C. to provide faucet with inlet Check stops for the HW & CW connections.

1 ea Faucet Aerator, 1.5 gpm, 55/64" female inlet & 15/16" male inlet

ITEM 81 - POT RACK (1 REQ'D)
John Boos Model PRW23A
Pot Rack, wall mount, double bar, 84"W x 12"D x 16"H overall size, 3/16" x 2" stainless steel flat bar, includes (14 stainless steel double hooks, NSF, CSA-Sanitation

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 82 - SPARE NUMBER

ITEM 83 - BEVERAGE COUNTER (1 REQ'D)
N.I.K.E.C. - Supplied and installed by G.C. See architectural plans for specification & detail.

ITEM 84 - GLASS RACK SLIDES (1 LOT REQ'D)
Custom Fabricated Stainless Steel
304 14 ga S/S construction with rack stops. Coordinate depth with millwork shop drawings.

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 85 - COFFEE AIR POTS (3 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 86 - TEA / COFFEE DISPENSER (2 REQ'D)
BUNN Model 39600.0001
39600.0001 TDO-N-3.5 Narrow Iced Beverage Dispenser, 3.5 gallon capacity, sump dispense valve, front-back handles, 8" cup clearance, for use with BUNN TB-3, TB-3Q and ITCB brewers with 29" trunk height, NSF

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 87 - TRASH RECEPTACLE, INDOOR (2 REQ'D)
Rubbermaid Commercial Products Model FG354060GRAY
Slim Jim® Container, 23 gallon, 22"W x 11"D x 30"H, with venting channels, molded-in handles, general purpose waste, open type without lid, high-impact plastic construction, gray, Made in USA

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 88 - TABLETOP WASTE BIN (1 REQ'D)
Vollrath Model 3Y0502 Dimensions: 2(h)
Garbage Waste Chute, 6-9/16" x 2" deep, round, 22 gauge stainless steel, Made in USA

Provide and install in location shown on plan and per manufactures recommendations complying

with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 89 - ICE DISPENSER (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 90 - NUGGET ICE MAKER (1 REQ'D)
Follett LLC Model HCD710ABT
Horizon Elite™ Chewblet® ice machine, air-cooled, self-contained condenser, for mounting on Follett ice storage bins, up to 759 lb production of Chewblet® ice in 24 hours, NSF, ETL, ENERGY STAR®

Accessories:
1 ea 3 year parts & labor warranty, additional 2 years compressor warranty
1 ea 3 year parts and labor standard warranty
1 ea 5 year compressor parts
1 ea 6' cord
1 ea 3M Purification Model ICE145-S (5616204) 3M™ Water Filtration Products Water Filter System, with gauge, 14-7/8"H x 5-1/16"D, valve-in-head, high turbidity water, single vessel, 1/4-turn shut off valve, max pressure of 125 psi at 100°F, 3 micron, 2.1 gpm flow rate, 25,000 gallons capacity, for sediment, chlorine taste & odor, scale, includes: (1) integral mounting bracket and (1) o-ring seal cartridge filter, 3/8" FNPT connections, NSF
1 ea 3M Purification Model HF45-S (5613309) 3M™ Water Filtration Products Replacement Cartridge, large diameter, 3 micron, 2.1 gpm flow rate, 25,000 gallons capacity, reduces sediment, chlorine taste & odor, scale inhibitor

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 91 - TOASTER (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 92 - MICROWAVE OVEN (1 REQ'D)
N.I.K.E.C. - Existing unit supplied by Owner to be relocated to new location shown in plans by G.C.

ITEM 93 - U/C REFRIGERATOR (2 REQ'D)
True Manufacturing Co., Inc. Model TUC-48-ADA-HC~SPEC3
SPEC SERIES® Undercounter Refrigerator, 34" working height, 33 - 38°F, SPEC Package 3 includes: (2) heavy-duty stainless steel doors, steel handles, door lock standard, (4) PVC coated adjustable wire shelves, electronic temperature control with digital temperature display, 16-ga. stainless steel top, stainless steel sides & back, stainless steel interior,3" castors, R290 Hydrocarbon refrigerant, 1/5 HP, , cULus, UL EPH Classified, CE, ADA Compliant, Made in USA

Accessories:
2 ea Self-contained refrigeration
2 ea Warranty - 5 year compressor
2 ea Warranty - 3 year parts and labor
2 ea 3" castors

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 94 - U/C HEATED CABINET (2 REQ'D)
Alto-Shaam Model 750-S
Halo Heat® Low Temp Holding Cabinet, on/off simple controller with adjustable thermostat, indicator light, capacity (10) 12" x 20" pans, (2) chrome plated side racks, (3) wire shelves, stainless steel exterior, 2-1/2" casters; 2 rigid, 2 swivel with brakes, EcoSmart®, cULus, UL EPH ANSI/NSF 4, CE, IPX3, TUV-NORD, EAC, N11942

Accessories:
2 ea 5 ft. cord
2 ea Solid door hinged per plan

Provide and install in location shown on plan and per manufactures recommendations complying with all local codes and regulations. Item should be provided with all accessories listed and meet utility requirements listed on rough-in plans.

ITEM 95 - BACK SERVICE COUNTER TOP (1 REQ'D)
N.I.K.E.C. - Supplied and installed by G.C. See architectural plans for specification & detail.

END OF SECTION 11400

SECTION 12491 - **HORIZONTAL LOUVER BLINDS**

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following blinds with aluminum louver slats:
   1. Miniblinds.

1.2 SUBMITTALS

A. Product Data: For each product indicated.

B. Shop Drawings: Include plans, elevations, sections, details, details of installation, operation al clearances, and relationship to adjoining Work.

   1. Verify dimensions by field measurements before fabrication and indicate measurements on Shop Drawings.

C. Samples: For each exposed finish and for each color and texture required.

D. Window Treatment Schedule: Use same room designations indicated on Drawings.

E. Maintenance data.

1.3 QUALITY ASSURANCE

A. Horizontal Louver Blinds Fire-Test-Response Characteristics: Provide products passing flame-resistance testing according to NFPA by a testing agency acceptable to authorities having jurisdiction.

B. Corded Window Covering Product Standard: Unless otherwise indicated, comply with WCMA A 100.1.

C. Mockups: Install mockups to verify selections made under sample Submittals and to demonstrate aesthetic effects and qualities of materials and execution.

   1. Install mockups.
   2. Approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

PART 2 - PRODUCTS

2.1 HORIZONTAL LOUVER BLINDS

A. Products: Basis of Design:
   1. Levolor Contract; Cordless Mark I Lightmaster 1” (Basis of Design)

B. Finish: Ionized coating; antistatic, dust-repellent, baked polyester.

   1. Slats: One color as indicated
   2. Headrails/Valance: Match louver slats as indicated.
   3. Component Color: Rails, cords, ladders, and exposed-to-view metal and plastic matching or coordinating with slat
   4. Colors, Textures, Patterns, and Glosses: As selected from manufacturer's full range

C. Louver Slats: Aluminum, alloy and temper recommended by producer for type of use and finish indicated; with crowned profile and radiused corners.

   1. Miniblinds:

      a. Nominal Slat Width: 1 inch
      b. Slat Spacing: Manufacturer's standard

   2. Nominal Slat Thickness: Not less than 0.008 inch.
   3. **Perforated Slats**: Openness factor of 6 to 7 percent.

D. Headrail: Formed steel or extruded aluminum; long edges returned or rolled; fully enclosing operating mechanisms on three sides and ends.

E. Bottom Rail: Formed-steel or extruded-aluminum tube, sealed with plastic or metal capped ends; with enclosed and protected ladders and tapes to prevent their contact with sill.

   1. Top contoured to match crowned shape of louver slat.
   2. Bottom contoured for minimizing light gaps.

F. Maximum Light Blocking Blinds: Designed for eliminating all visible light gaps if slats are tilted closed; with tight tape spacing indicated and slats with minimal-sized rout holes for ladders hidden and placed near back edge for maximum slat overlap; with headrail and bottom rail extended and formed for light-tight joints between rail and adjacent slats or construction.

G. Tilt Control: Enclosed worm gear mechanism, slip clutch or detachable wand preventing over-rotation, and linkage rod.

   1. Tilt Operation: Manual with clear plastic wand

2. Length of Tilt Control: Length required to make operation convenient from floor level
3. Tilt: Full.

H. Lift Operation: Manual, cord lock; locks pull cord to stop blind at any position in ascending or descending travel.

I. Lift Operation: Manual, top-locking cord lock; locks pull cord to stop blind in either fully opened or fully closed position only and is equipped with a ring pull not more than 4 inches long.

J. Valance: Manufacturer's standard.

K. Mounting: As indicated, permitting easy removal and replacement without damaging blind or adjacent surfaces and finishes; with spacers and shims required for blind placement and alignment indicated.

1. Provide intermediate support brackets if end support spacing exceeds spacing recommended by manufacturer for weight and size of blind.

2.2 FABRICATION

A. Product Standard and Description: Comply with AWCMA Document 1029, unless otherwise indicated.

B. Concealed Components: Noncorrodible or corrosion-resistant-coated materials.

1. Lifting and Tilting Mechanisms: With permanently lubricated moving parts.

C. Unit Sizes: Fabricated in sizes to fill window and other openings as follows, measured at 74 deg F:

1. Blind Units Installed between (Inside) Jambs:

a. Width: Equal to 1/4 inch per side or 1/2 inch total, plus or minus 1/8 inch less than jamb-to-jamb dimension of opening in which each blind is installed.
b. Length: Equal to 1/4 inch plus or minus 1/8 inch, less than head-to-sill dimension of opening in which each blind is installed.

2. Blind Units Installed Outside Jambs: Width and length as indicated, with terminations between blinds of end-to-end installations at centerlines of mullion or other defined vertical separations between openings.

D. Installation Brackets: Designed for easy removal and reinstallation of blind, for supporting headrail, valance, and operating hardware, and for hardware position and blind mounting method indicated.

E. Installation Fasteners: Not fewer than two fasteners per bracket, fabricated from metal non-corrosive to blind hardware and adjoining construction; type designed for securing to supporting substrate; and supporting blinds and accessories under conditions of normal use.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install blinds level and plumb and aligned with adjacent units according to manufacturer's written instructions. Install intermediate support as required to prevent deflection in headrail. Allow clearances between adjacent blinds and for operating glazed opening's operation hardware, if any.

B. Flush Mounted: Install blinds with louver edges flush with finish face of opening if slats are tilted open.

C. Jamb Mounted: Install headrail flush with face of opening jamb and head.

D. Head Mounted: Install headrail on face of opening head.

E. Recessed: Install headrail concealed within blind pocket.

F. Adjusting: Adjust horizontal louver blinds to operate smoothly, easily, safely, and free from binding or malfunction throughout entire operational range.

G. Cleaning: Clean blind surfaces after installation, according to manufacturer's written instructions.

- 2010 ADAAG

FIRE DEPARTMENT NOTES

1. PROJECT WILL COMPLY WITH THE CITY OF BUCKEYE ADOPTED FIRE CODE 2018 AND THE INTERNATIONAL FIRE CODE 2018.
2. SEE SHEET A00.05 FOR ADDITIONAL FIRE NOTES AND REQUIREMENTS.

DEFERRED SUBMITTALS

1. AFES FIRE SPRINKLERS - EXTENDED TO NEW AREAS AND MODIFIED WHERE REMODELING OCCURS.
2. FIRE ALARM SYSTEM - NEW SYSTEM, WHOLE BUILDING FIRE ALARM WITH EXPANDABLE FACP.
3. EXHAUST HOOD AND LAW SYSTEM.

GENERAL NOTES:

1. THESE NOTES ARE APPLICABLE TO ALL DRAWINGS IN THIS SET.
2. THESE DRAWINGS AND SPECIFICATIONS ARE THE PROPERTY AND COPYRIGHT OF THE ARCHITECT AND SHALL NOT BE USED ON ANY OTHER WORK EXCEPT BY WRITTEN AGREEMENT WITH THE ARCHITECT.
3. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS AND DIMENSIONS.
4. ONLY WRITTEN DIMENSIONS SHALL BE USED. DO NOT SCALE DRAWINGS. DIMENSIONS SHALL BE VERIFIED ON THE JOB SITE. ANY DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE ARCHITECT PRIOR TO THE COMMENCEMENT OF ANY WORK.
5. THESE DOCUMENTS ARE INTENDED TO DEFINE THE SCOPE OF THE WORK. CONTRACTOR SHALL BE RESPONSIBLE FOR ANY ADDITIONAL DESIGN WORK REQUIRED FOR THEIR RESPECTIVE TRADES AS WELL AS ADHERING TO ALL APPLICABLE CODES AND STANDARD ACCEPTED PRACTICES FOR THEIR RESPECTIVE TRADES.
6. ALL MATERIALS TO BE SUPPLIED OR REQUIRING OFF SITE FABRICATION WILL BE SUBMITTED TO THE ARCHITECT IN THE FORM OF SHOP DRAWINGS AND/OR CATALOG CUTS FOR REVIEW. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SUBMITTING THIS INFORMATION IN A TIMELY MANNER SO AS NOT TO IMPEDE THE PROGRESS OF THE WORK.
7. ALL WOOD COMING IN CONTACT WITH CONCRETE OR EARTH SHALL BE TREATED LUMBER.
8. VERIFY LOCATION OF EXISTING UTILITIES PRIOR TO SAW CUTTING AND / OR TRENCHING.
9. IT IS THE INTENT OF THESE CONTRACT DOCUMENTS TO DEFINE A COMPLETE FINISHED FACILITY / PROJECT. ANY MATERIAL, SYSTEM, EQUIPMENT OR ASSEMBLY WHICH NORMALLY WOULD BE REQUIRED SHALL BE PROVIDED AND FINISHED AS IF SPECIFICALLY NOTED.
10. COORDINATE WITH ALL TRADES THE LOCATIONS OF SLEEVES OR OTHER INSET ACCESSORIES INVOLVING OTHER TRADES.
11. ALL PATCH WORK SHALL MATCH EXISTING COLOR, TEXTURE AND MATERIALS.
12. THE STARTING OF WORK BY ANY CONTRACTOR OR SUBCONTRACTOR SHALL BE CONSIDERED PRIMA FACIE EVIDENCE THAT HE HAS INSPECTED AND ACCEPTED ALL CONDITIONS INVOLVED IN HIS WORK AND FINDS THEM SATISFACTORY.
13. THE CONTRACTOR SHALL VERIFY ALL EQUIPMENT LOADS AND NOTIFY THE STRUCTURAL ENGINEER OF ANY CHANGES IN SIZE, WEIGHT, AND LOCATION, OR ADDITIONAL LOAD TO THOSE INDICATED ON THE DRAWINGS.
14. BIDDING OF CONTRACT DOCUMENTS BY SUBCONTRACTOR AND GENERAL CONTRACTOR SHALL BE BASED UPON COMPLETE SETS. CONTRACTORS ARE EXPECTED TO HAVE A FULL UNDERSTANDING AND COORDINATION OF ALL TRADES AND CONDITIONS TO BE ENCOUNTERED DURING THE COURSE OF CONSTRUCTION. BIDDING FROM SUB-SETS OF PLANS IS PROHIBITED.
15. ALL DIMENSIONS SHOWN ARE FROM FINISHED FACE OF WALL TO FINISHED FACE OF WALL OR FACE OF CMU UNLESS OTHERWISE INDICATED.
16. WHERE A NUMBERED KEYNOTE SYSTEM IS USED, NOT ALL KEYNOTES LISTED ON A PARTICULAR SHEET ARE KEYED ON THAT SHEET.

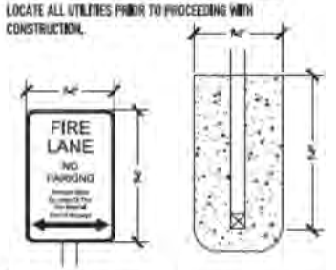
KEYNOTES:

1. NEW 1459 SF KITCHEN ADDITION.
2. NEW 5% SLOPE ADA RAMP.
3. EXISTING TRASH CONTAINERS.
4. EXISTING PARKING TO REMAIN (NO CHANGE).
5. EXITING SIDEWALK AND STAIRS TO REMAIN.
6. EXISTING PARK TRAIL HEAD (NO CHANGE).
7. RELOCATE CURB APPROXIMATELY 5'-0" TO THE SOUTH - SEE CURB PLAN.
8. EXISTING SIDEWALK TO REMAIN.
9. EXISTING 5% SLOPE LOADING RAMP.
10. EXISTING SENIOR CENTER KITCHEN.
11. EXISTING SENIOR CENTER MULTI-PURPOSE.
12. NEW METAL ROOF OVER OUTDOOR CAN WASH.
13. UNDERGROUND GREASE INTERCEPTOR - SEE CIVIL & PLUMBING PLANS.
14. W850 FIRE RADIUS.
15. EXISTING FIRE HYDRANT.
16. EXISTING FIRE RISER ROOM (NO CHANGE).
17. FIRE LANE CURB PAINTED RED AND LABELED "FIRE LANE NO PARKING" IN 3" BLOCK LETTERS (3/4" STROKE) COLOR: SIGNAL RED TRAFFIC GRADE PAINT.
18. KNOX BOX LOCATION.
19. SAW CUT & REMOVE ONE STANDARD SECTION OF WALKWAY AS REQ. - PATCH & REPAIR SIDEWALK.
20. 10" STORM DRAIN PIPE - SEE CIVIL PLANS.
21. 6" FRENCH DRAIN - SEE CIVIL PLANS.
22. RETENTION SYSTEM - SEE CIVIL PLANS.

GENERAL NOTES:

1. LOCATE ALL UTILITIES PRIOR TO PROCEEDING WITH CONSTRUCTION.



1 FIRE LANE SIGN DETAIL

FIRE LANE NOTES:

1. AT THE BEGINNING AND END OF THE FIRE LANE, THE SIGN SHALL HAVE A SINGLE HEADED ARROW POINTING IN THE DIRECTION THE REGULATION IS IN EFFECT. THE INTERMEDIATE SIGNS SHALL HAVE DOUBLE HEADED ARROWS POINTING IN BOTH DIRECTIONS.
2. THE MAXIMUM SPACING OF THE SIGNS SHALL BE 100', CONTINGENT UPON THE CITY ENGINEER'S REVIEW AND APPROVAL.
3. THE SIGNS SHALL BE SET AT AN ANGLE OF NOT LESS THAN 30 DEGREES NOR MORE THAN 45 DEGREES WITH THE CURB OR LINE OF TRAFFIC FLOW.
4. THE CLEARANCE TO THE BOTTOM OF THE SIGN SHALL BE 7'. THERE SHALL BE NO OTHER SIGNS ATTACHED TO THE SIGN OR SIGN POLE.
5. THE SIGN PLATE SHALL BE A MINIMUM OF 12" X 18" WITH A THICKNESS OF .8".
6. THE SIGN FACE SHALL MEET THE COB SIGN SHEETING STANDARDS. USE THE STANDARD SIGN FACE BLANK FOR A R7-32 OR EQUIVALENT.
7. SIGNAGE LETTER SHALL BE FROM THE "CLEARVIEW" FONT.

KEYNOTES:

1. EXISTING SEWER-VERIFY LOCATION.
2. EXISTING 2" WATER LINE-VERIFY LOCATION.
3. EXISTING GAS LINE-VERIFY LOCATION.
4. EXISTING GAS METER.
5. EXISTING TRANSFORMER-TO BE REPLACED.
6. EXISTING ELECTRICAL TO STREET LIGHTS-VERIFY LOCATION.
7. EXISTING IRRIGATION-VERIFY LOCATION.
8. EXISTING 5% SLOPE LOADING RAMP (NO CHANGE).
9. EXISTING 400 AMP SES TO BE ENLARGED TO 800 AMP- SEE ELECTRICAL.
10. EXISTING SIDEWALK AND STAIRS TO REMAIN.
11. NEW 5% SLOPE ADA RAMP.
12. EXISTING PARK TRAILHEAD (NO CHANGE).
13. EXISTING PARKING (NO CHANGE).
14. REMOVE SECTION OF PARAPET.
15. RELOCATE CURB APPROXIMATELY 5'-0" TO THE SOUTH.
16. 1450 SF KITCHEN ADDITION.
17. NEW METAL ROOF OVER OUTDOOR CAR WASH.
18. NEW 4'-0" RETAINING WALL.
19. NEW TROUGH DRAIN.
20. UNDERGROUND GREASE INTERCEPTOR - SEE CIVIL & PLUMBING PLANS.
21. DETECTABLE WARNING ON CONCRETE LANDING.
22. KNOX BOX LOCATION.
23. FIRE LANE CURB PAINTED RED AND LABELED "FIRE LANE NO PARKING" IN 3" BLOCK LETTERS (3/4" STROKE) AS PER THE COB ADOPTED FIRE CODE.
24. 10" STORM DRAIN PIPE - SEE CIVIL PLANS.
25. 8" FRENCH DRAIN - SEE CIVIL PLANS.
26. RETENTION SYSTEM - SEE CIVIL PLANS.
27. SAW CUT & REMOVE ONE STANDARD SECTION OF SIDEWALK AS REQ. PROVIDE POSITIVE SLOPE TO EXISTING SIDEWALL DRAIN - PATCH AND REPAIR SIDEWALK.
28. EXISTING FIRE RISER ROOM ACCESSIBLE FROM INTERIOR ONLY.

GENERAL NOTES:

1. FIRE RISER ROOM AND FACP ACCESS DOOR TO BE LABELED.
2. AERIAL FIRE APPARATUS ACCESS ROADS SHALL HAVE A MINIMUM UNOBSTRUCTED WIDTH OF 26'-0".
3. OVERHEAD UTILITY AND POWER LINES SHALL NOT BE LOCATED OVER THE AERIAL FIRE APPARATUS ACCESS ROAD OR BETWEEN THE AERIAL FIRE APPARATUS ROAD AND THE BUILDING.
4. A KNOX BOX WILL BE REQUIRED FOR THE FRONT DOOR AND FIRE RISER ROOM OF BUILDING.
5. 36" CLEARANCE FOR ALL FIRE HYDRANTS IS REQUIRED.
6. FIRE LANES WILL INCLUDE ALL REQUIRED COB FD STRIPING AND MARKING.
7. BUILDING ADDRESS MUST BE VISIBLE FROM EACH ENTRANCE POINT.
8. ALL FIRE EXTINGUISHERS MUST BE INSTALLED BY A LICENSED FIRE PROTECTION CONTRACTOR WITH SERVICE TAGS AND SURVEYED FOR PROPER COVERAGE.
9. THIS PROJECT WILL COMPLY WITH THE CITY OF BUCKEYE 2014 ADOPTED 2012 INTERNATIONAL FIRE CODE AND AMENDMENTS.

ALL FLOOD ZONES ARE SHOWN IN THIS PLAN SET.

GENERAL PERMITTING NOTES

1. ALL CONSTRUCTION IN THE PUBLIC RIGHTS-OF-WAY OR IN EASEMENTS GRANTED FOR PUBLIC USE MUST CONFORM TO THE LATEST MARICOPA ASSOCIATION OF GOVERNMENTS (MAG) UNIFORM STANDARD SPECIFICATIONS AND UNIFORM STANDARD DETAILS FOR PUBLIC WORKS CONSTRUCTION AS AMENDED BY THE LATEST VERSION OF THE CITY OF BUCKEYE DESIGN STANDARDS. IF THERE IS A CONFLICT, THE CITY OF BUCKEYE STANDARDS WILL GOVERN.
2. THE APPROVAL OF THE PLANS IS VALID FOR ONE (1) YEAR FROM THE DATE OF THE CITY ENGINEER'S SIGNATURE. IF AN ENCROACHMENT PERMIT FOR THE CONSTRUCTION HAS NOT BEEN ISSUED WITHIN ONE (1) YEAR, THE PLANS MUST BE RESUBMITTED TO THE CITY FOR REAPPROVAL.
3. A CITY OF BUCKEYE INSPECTOR WILL INSPECT ALL WORKS WITHIN THE CITY OF BUCKEYE RIGHTS-OF-WAY AND IN EASEMENTS. NOTIFY THE CITY 24 HOURS PRIOR TO THE INSPECTION BY CALLING (623) 349-6248.
4. CITY PERMITS ARE REQUIRED FOR ALL WORK IN PUBLIC RIGHTS-OF-WAY AND EASEMENTS GRANTED FOR PUBLIC PURPOSES. A CITY PERMIT WILL BE ISSUED BY THE CITY ONLY AFTER ALL FEES HAVE BEEN PAID AND THE PERMIT HAS AN APPROVED MARICOPA COUNTY ENVIRONMENTAL SERVICES DUST PERMIT AND AN APPROVED STORM WATER POLLUTION PREVENTION PLAN ATTACHED. THE SWPPP SHALL COMPLY WITH ALL FEDERAL, STATE, AND LOCAL REQUIREMENTS.
5. COPIES OF ALL PERMITS AND MOST RECENT APPROVED PLANS MUST BE RETAINED ON-SITE AND BE AVAILABLE FOR INSPECTION AT ALL TIMES. FAILURE TO PRODUCE THE REQUIRED PERMITS AND PLANS WILL RESULT IN IMMEDIATE SUSPENSION OF ALL WORK UNTIL PROPER PERMIT DOCUMENTATION AND/OR PLANS ARE OBTAINED. ALL OF THESE REQUIREMENTS APPLY TO ONSITE GRADING AND IMPROVEMENT PLANS.

UTILITY COMPANIES

		DATE SUBMITTED
ELECTRIC	ARIZONA PUBLIC SERVICE	
TELEPHONE	CENTURY LINK	
CATV	COX COMMUNICATIONS	
WATER	CITY OF BUCKEYE	
SEWER	CITY OF BUCKEYE	
GAS	SOUTHWEST GAS	

UTILITY NOTE

LOCATION OF ALL UTILITIES SHOWN ON THESE PLANS ARE BASED ON INFORMATION SUPPLIED TO THE ENGINEER BY THE APPROPRIATE UTILITY COMPANIES. ENGINEER DOES NOT GUARANTEE THAT ALL UTILITIES ARE SHOWN OR THEIR LOCATIONS. IT IS THE RESPONSIBILITY OF THE CONTRACTOR OR OWNER TO CONTACT BLUE STAKE AND ANY OTHER INVOLVED AGENCIES TO LOCATE ALL UTILITIES PRIOR TO CONSTRUCTION.

STORM WATER DRAINAGE CERTIFICATE

1. THE DEVELOPMENT WILL PROVIDE FOR ON-SITE RETENTION FOR THE RUNOFF FROM A 100-YEAR 2-HOUR STORM.
2. ALL FLOWS FROM THE 10-YEAR STORM WILL BE CONTAINED WITHIN THE STREET (FROM CURB TO CURB).
3. ALL STORM WATER RETENTION WILL BE DRAINED WITHIN 36-HOURS. IF BASINS DO NOT DRAIN WITHIN 36-HOURS, DEVELOPER/OWNER SHALL ENACT MEASURES TO CORRECT.
4. ALL DRAINAGE DESIGN WILL COMPLY WITH THE CITY OF BUCKEYE CURRENT GRADING AND DRAINAGE DESIGN STANDARDS.
5. FINISH FLOOR ELEVATIONS MUST BE A MINIMUM OF 14-INCHES ABOVE THE OUTFALL TOP OF CURB ELEVATION AND 12-INCHES ABOVE THE COMPUTED 100-YEAR WATER ELEVATIONS AND 1-FOOT ABOVE THE EMERGENCY OUTFALL ELEVATIONS AT ANY ADJACENT RETENTION BASIN, WHICH EVER IS GREATER.
6. ALL RETENTION BASINS SHALL HAVE A MINIMUM OF 1-FOOT OF FREEBOARD.

	SCH. 0	PVC MAINLINE, 1 1/
	CLASS 200	PVC PIPE TO EMITTERS, 3/
	FLUSH NG END CAP	INSTALL IN SEPARATE 10 PLASTIC VALVE BOX

NOTES:

1. USE BOWSMITH EMITTERS PER EMITTER SCHEDULE.
2. INSTALL #12 TRACER WIRE ABOVE NEW WATER SOURCE LINE.
3. USE #12, DIRECT BURIAL WIRE FOR ALL 2 -VOLT WIRING.
4. INSTALL VALVES IN PLASTIC VALVE BOXES WITH LOCKING LIDS, BY CARSON INDUSTRIES INC. OR APPROVED EQUAL BY OWNER'S REPRESENTATIVE - ONE VALVE PER VALVE BOX. INSTALL TAN COLOR VALVE BOXES IN DECOMPOSED GRANITE AREAS

EMITTER SCHEDULE

PLANT SIZE	EMITTER TYPE	GPH/ OUTLET	OUTLETS/ PLANT	TOTAL GPH PER PLANT
36 BOX	2 MULTI-PORT	2	8	16
2 BOX	2 MULTI-PORT	2	6	12
5 GALLON	1 MULTI-PORT	1	1	1
1 GALLON	1 MULTI-PORT	1	1	1

IRRIGATION SYSTEM

1. MAINTAIN EXISTING IRRIGATION SYSTEM TO EXISTING PLANT MATERIAL DURING CONSTRUCTION.
2. PROVIDE FULL COVERAGE TO ALL EXISTING AND NEW PLANT MATERIAL AT COMPLETION OF CONSTRUCTION. CUT, CAP, AND EXTENDED EXISTING IRRIGATION SYSTEM AS REQUIRED. FIELD VERIFY EXISTING IRRIGATION SYSTEM.

NOTE

THE IRRIGATION PLAN IS SCHEMATIC. THE PIPING, VALVES, ETC., SHALL BE INSTALLED IN PLANTING AREAS WHERE PIPING AND EQUIPMENT IS SHOWN RUNNING PARALLEL TO AND OUTSIDE OF PLANTING AREAS.

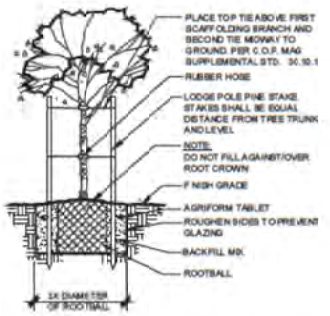
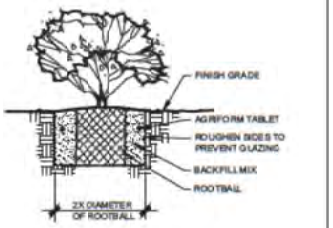
IRRIGATION PLAN

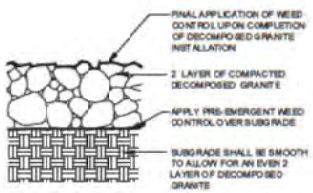
L2
3 OF 3



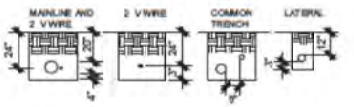
1 TREE PLANTING N.T.S.



2 SHRUB PLANTING N.T.S.



3 DECOMPOSED GRANITE N.T.S.



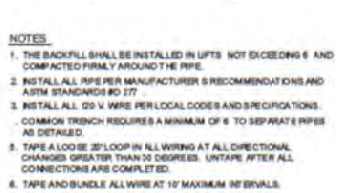
NOTES

1. THE BACKFILL SHALL BE INSTALLED IN LIFTS NOT EXCEEDING 6" AND COMPACTED FIRMLY AROUND THE PIPE.
2. INSTALL ALL PIPE PER MANUFACTURER'S RECOMMENDATIONS AND ASTM STANDARDS #D 2774.
3. INSTALL ALL 220 V. WIRE PER LOCAL CODES AND SPECIFICATIONS. COMMON TRENCH REQUIRES A MINIMUM OF 6" TO SEPARATE PIPES AS DETAILED.
5. TAPE A LOOSE 20" LOOP IN ALL WIRING AT ALL DIRECTIONAL CHANGES GREATER THAN 30 DEGREES. UNTAPE AFTER ALL CONNECTIONS ARE COMPLETED.
6. TAPE AND BUNDLE ALL WIRE AT 10' MAXIMUM INTERVALS.

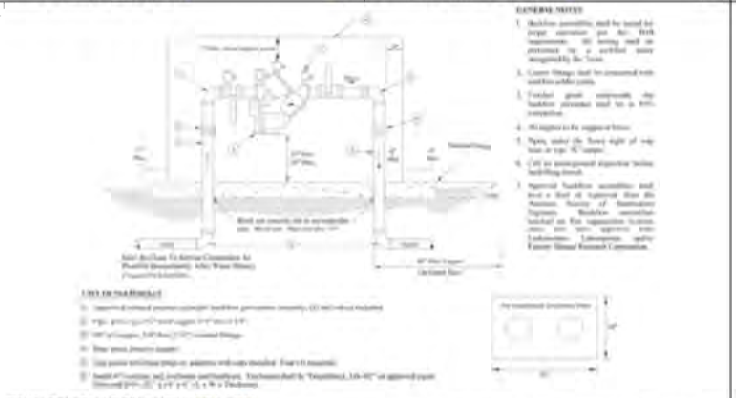
4 TRENCH DETAIL N.T.S.

NOTE

ALL SLEEVES TO BE PVC SCHEDULE 0, UNLESS NOTED OTHERWISE. INSTALL ALL SLEEVES A MINIMUM OF 2' BELOW GRADE.

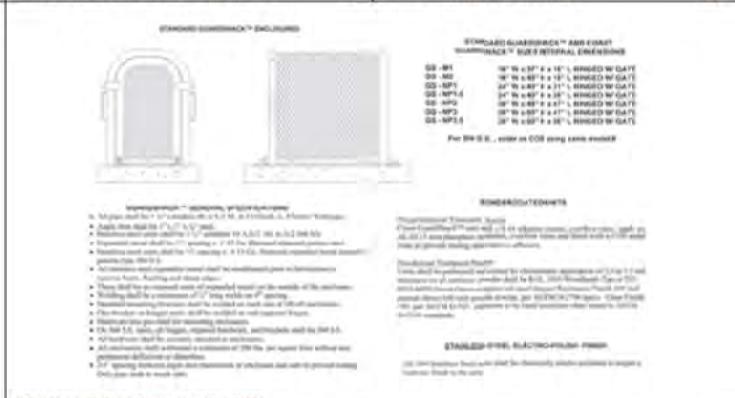


5 SLEEVE DETAIL N.T.S.



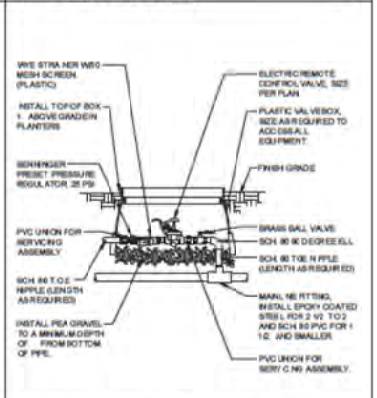
TOWN OF BUCKEYE STANDARD DETAIL 31353

6 REDUCED PRESSURE PRINCIPAL BACKFLOW ASSEMBLY, 3/4" THROUGH 2 1/2" N.T.S.



TOWN OF BUCKEYE STANDARD DETAIL 31358

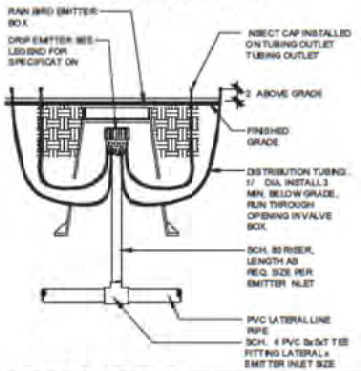
8 BACKFLOW PREVENTION ENCLOSURES N.T.S.



10 REMOTE CONTROL VALVE N.T.S.

NOTE

INSTALL EMITTERS IN RAIN BIRD BE-XT-X EMITTER BOX



11 MULTI-PORT EMITTER N.T.S.

1. THE LANDSCAPE CONTRACTOR SHALL FURNISH AND PROVIDE ALL MATERIALS, EQUIPMENT, LABOR, AND INCIDENTALS NECESSARY TO INSTALL ALL LANDSCAPE MATERIALS AS INDICATED ON PLAN OR AS SPECIFIED.
2. ANY AND ALL SUBSTITUTIONS AND/OR FIELD CHANGES SHALL BE APPROVED BY THE OWNER'S REPRESENTATIVE.
3. ALL PLANTS SHALL BE NURSERY GROWN UNDER CLIMATIC CONDITIONS SIMILAR TO THOSE OF THE PROJECT. ALL PLANTS SHALL MEET A.N.A. SIZE SPECIFICATIONS. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL PLANTS AND MATERIALS SHOWN ON PLAN. THE QUANTITIES LISTED ON THE PLANT MATERIALS LIST ARE FOR THE CONTRACTOR'S CONVENIENCE ONLY.
5. THE OWNER'S REPRESENTATIVE RESERVES THE RIGHT TO REFUSE ANY MATERIAL HE DEEMS UNACCEPTABLE.
6. SUBMIT WRITTEN GUARANTEES, "AS-BUILTS" DRAWINGS AND COMPLETE MAINTENANCE INSTRUCTIONS ON THE CARE AND FEEDING OF THE PLANTS TO THE OWNER'S REPRESENTATIVE.
7. SUBMIT DECOMPOSED GRANITE SAMPLES TO THE OWNER'S REPRESENTATIVE FOR APPROVAL PRIOR TO INSTALLATION.
8. THE LANDSCAPE CONTRACTOR SHALL REVIEW THIS WORK WITH THE OWNER'S REPRESENTATIVE PRIOR TO STARTING ANY WORK.
9. THE LANDSCAPE CONTRACTOR SHALL VERIFY ALL SITE CONDITIONS PRIOR TO START OF ANY WORK AND SHALL BRING ANY DISCREPANCIES TO THE ATTENTION OF THE OWNER'S REPRESENTATIVE FOR CLARIFICATION. DO NOT START ANYWORK UNTIL UNSATISFACTORY CONDITIONS ARE CORRECTED.
10. THE LANDSCAPE CONTRACTOR SHALL MAINTAIN THE LANDSCAPE FOR A PERIOD OF 90 CALENDAR DAYS FROM DATE OF APPROVED SUBSTANTIAL COMPLETION OF THE PROJECT BY OWNER'S REPRESENTATIVE.
11. GUARANTEE ALL PLANTS TO BE ALIVE AND IN HEALTHY, VIGOROUS CONDITION FOR A PERIOD OF 1 YEAR AFTER FINAL ACCEPTANCE OF THE PROJECT BY THE OWNER'S REPRESENTATIVE.
12. ALL WEEDS AND UNWANTED GRASSES SHALL BE TREATED WITH A NON-TOXIC HERBICIDE PER MANUFACTURER'S INSTRUCTIONS AND REMOVED. RE-APPLY AS NECESSARY. REMOVE ALL DEBRIS FROM SITE. HERBICIDE SHALL NOT CONTAIN GLYPHOSATE.
13. BACKFILL ALL PLANT PITS WITH A MIXTURE OF 2 PARTS NATIVE SOIL AND 1 PART NITROGENIZED WOOD MULCH.
14. ADD "AGRIFORM" FERTILIZER TABLETS (20-10-5), AT THE FOLLOWING RATES:
    - BOXED PLANTS - 5 TABLETS
    - 15 GALLON PLANTS - 3 TABLETS
    - 5 GALLON PLANTS - 2 TABLETS
    - 1 GALLON PLANTS - 1 TABLETS
15. UNLESS OTHERWISE NOTED ON PLANS, DECOMPOSED GRANITE SHALL EXTEND UNDER SHRUBS / GROUND COVER AND RAKED UNIFORMLY ALONG WALLS, SIDEWALKS, AND CURBS.
16. SEE ENGINEERING DRAWINGS FOR DRAINAGE FLOWS. THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE THAT THESE ARE PROVIDED AND NOT IMPAIRED BY OBSTRUCTIONS.
17. FINISH GRADE OF ALL DECOMPOSED GRANITE AREAS, (TOP OF FINISHED MATERIAL), SHALL BE 3" BELOW ADJACENT PAVING / CURB.
18. THE LANDSCAPE CONTRACTOR SHALL WATER TEST ALL PLANTING HOLES PRIOR TO PLANTING. IF HOLES DO NOT DRAIN PROPERLY, EXCAVATE FURTHER UNTIL IMPERMEABLE LAYER IS BREACHED.
19. STAKE ALL TREES OUTSIDE ROOTBALL.
20. THE LANDSCAPE CONTRACTOR SHALL CONTACT THE OWNER'S REPRESENTATIVE PRIOR TO EACH APPLICATION OF PRE-EMERGENT FOR VERIFICATION.
21. REMOVE ALL WASTE MATERIAL AND LEGALLY DISPOSE OF OFF-SITE.
22. THE OWNER'S REPRESENTATIVE SHALL BE GIVEN [illegible] DAYS NOTICE PRIOR TO THE FOLLOWING:
    - UPON INSTALLATION OF THE IRRIGATION SYSTEM, PRIOR TO BACKFILLING TRENCHES
    - AFTER SPOTTING LOCATIONS, BUT PRIOR TO INSTALLING PLANT MATERIAL
    - UPON COMPLETION OF ALL WORK

12 PLANTING NOTES

1. THE LANDSCAPE CONTRACTOR SHALL FURNISH AND INSTALL ALL MATERIALS, EQUIPMENT, LABOR AND INCIDENTALS NECESSARY TO CONSTRUCT A COMPLETE IRRIGATION SYSTEM AS INDICATED ON PLAN, OR AS MAY BE REQUIRED FOR THE PROPER OPERATION OF THE IRRIGATION SYSTEM.
2. ALL WORK SHALL CONFORM TO APPLICABLE CODES AND ORDINANCES.
3. ALL MATERIALS SHALL BE INSTALLED PER THE MANUFACTURER'S RECOMMENDATIONS. PROVIDE THE OWNER'S REPRESENTATIVE WITH MANUFACTURER'S PRODUCT DATA, CATALOG OF PARTS, WRITTEN OPERATION AND MAINTENANCE INSTRUCTIONS, AND "AS-BUILT" DRAWINGS.
5. GUARANTEE THE ENTIRE SYSTEM AGAINST DEFECTS IN MATERIALS AND WORKMANSHIP FOR A PERIOD OF 1 YEAR FROM FINAL ACCEPTANCE OF THE PROJECT BY THE OWNER'S REPRESENTATIVE.
6. PROVIDE AND INSTALL ELECTRICAL AND IRRIGATION SLEEVES UNDER PAVEMENT TO ALL PLANTERS. ALL SLEEVES TO EXTEND A MINIMUM OF 6" FROM EDGE OF PAVEMENT. IRRIGATION FITTINGS SHALL BE INSTALLED A MINIMUM OF 12" FROM END OF SLEEVES.
7. MAINLINE AND CONTROL WIRE SHALL BE INSTALLED AS DETAILED ON PLAN. SLEEVES UNDER PAVED AREAS SHALL BE INSTALLED 2' DEEP. BACKFILL SHALL BE CLEAN SOIL FREE OF ROCKS, FOREIGN MATTER AND DEBRIS. USE COMMON TRENCHES WHEREVER POSSIBLE.
8. ALL PIPING SHALL BE PVC WITH STANDARD WEIGHT PVC FITTINGS.
9. LOW VOLTAGE WIRE CONNECTORS SHALL BE SOCKET SEAL TYPE WITH WATERPROOF SEALER.
10. THE IRRIGATION PLAN IS SCHEMATIC. PIPING AND EQUIPMENT SHOWN RUNNING PARALLEL TO AND OUTSIDE OF PLANTING AREAS IS SHOWN FOR CLARITY ONLY. THE PIPING, VALVES, ETC., SHALL BE INSTALLED IN PLANTING AREAS.
11. LOCATE EMITTERS ON UPHILL SIDE OF PLANTS IN SLOPED PLANTING AREAS.
12. ALL PLANTS REQUIRING MORE THAN ONE DRIP EMITTER SHALL HAVE EMITTERS EVENLY DISTRIBUTED AROUND THE EDGE OF ROOTBALL. ALL DRIP TUBES TO PLANTS SHALL BE CUT 1" - 3" ABOVE GRADE.
13. ADJUST THE ENTIRE IRRIGATION SYSTEM FOR PROPER DISTRIBUTION AND FULL COVERAGE OF WATER TO ALL PLANT MATERIAL. FLUSH DRIP SYSTEM THROUGH FLUSH CAPS.
1. ALL PEA GRAVEL IN VALVE BOXES TO BE CLEAR & 6" FROM TOP OF VALVE SO THAT VALVE IS COMPLETELY VISIBLE. LID OF VALVE BOX IS ALSO TO BE FREE OF DEBRIS.
15. REMOVE ALL WASTE MATERIAL AND LEGALLY DISPOSE OF OFF-SITE.
16. INSTRUCT THE OWNER ON THE OPERATION AND MAINTENANCE OF THE IRRIGATION SYSTEM.

DEMOLITION KEYNOTES:

1. DOORWAY TO BE RESTORED.
2. EXISTING DISH DROP WINDOW TO BE FILLED.
3. EXISTING 560 SF KITCHEN FLOORING TO BE REPLACED.
4. REMOVE PARAPET OVER SERVICE LINE WALL OPENING ABOVE.
5. REMOVE CURB WHERE SHOWN.
6. REMOVE EXISTING STORAGE ROOMS.
7. REMOVE ROLL-UP DOOR & ASSOCIATED DOOR RAILS & CAN ABOVE.
8. REMOVE EXISTING WALK IN REFRIGERATOR.
9. REMOVE PORTION OF CMU WALL AS INDICATED ON BLDG. SECTIONS & STRUCTURAL PLANS.
10. REMOVE EXISTING COUNTER MILLWORK.
11. EXISTING MASONRY EXPANSION JOINT.
12. REMOVE FLOORING, PATCH & REPAIR TO MATCH EXISTING.
13. 4' RETAINING WALL TO BE REMOVED.
14. REMOVE EXISTING WALL FURRING.
15. REMOVE PORTION OF WALL FOR NEW DISH DROP WINDOW.
16. REMOVE EXISTING EQUIPMENT - SALVAGE & STORE ITEMS PER FOOD SERVICE DRAWINGS.
17. EXISTING FLOOR SINK TO BE REMOVED, PATCH & REPAIR - SEE PLUMBING FLOOR PLANS.
18. REMOVE PORTION OF SIDEWALK.
19. REMOVE, PATCH & REPAIR SIDEWALK AS REQ. FOR SEWER LINE.
20. EXISTING GREASE TRAP TO BE REMOVED AND FILLED - PATCH & REPAIR FLOOR.
21. REMOVE & FILL IN EXISTING VENT IN CMU.
22. SALVAGE HANDRAIL FOR RE-USE.

WALL LEGEND:

WALLS TO BE REMOVED

EXISTING WALLS TO REMAIN

KITCHEN EQUIPMENT:

1. SEE FOOD SERVICE DRAWINGS FOR ITEMS TO BE SALVAGED & RE-USED.

GENERAL NOTE:

1. ALL ITEMS INDICATED FOR DEMOLITION SHALL BE REMOVED FROM SITE & DISPOSED OF PROPERLY.
2. REFERENCE BUILDING SECTIONS AND STRUCTURAL DRAWINGS FOR CMU WALL REMOVAL AND SHORING DIRECTION.
3. CONTRACTOR TO PROVIDE CMU WALL STRUCTURAL SHORING DESIGN FOR REVIEW & APPROVAL BY STRUCTURAL ENGINEER.

NOTES

1 ALL CONNECTIONS SHOWN IN THE SCHEDULE ARE SIZED AS THEY ACTUALLY OCCUR ON THE EQUIPMENT
2 CONNECTIONS SHOWN ARE FOR ONE UNIT. TO DETERMINE TOTAL REQUIREMENTS, MULTIPLY BY NUMBER IN QUANTITY COLUMN
3 WHEN EQUIPMENT IS NOTED AS EXISTING, UTILITY REQUIREMENTS SHOULD MATCH EXISTING AS INDICATED ON THE MANUFACTURERS DATA PLATE
4 WHERE INDICATED TO CONNECT IN OR THROUGH A VAIVE COMPARTMENT, CONTRACTOR SHALL STUB UP INTO VALVE COMPARTMENT AT HEIGHT INDICATED ON ROUGH-IN PLAN, CAP HIS WORK AND MAKE FINAL CONNECTIONS AFTER EQUIPMENT IS IN PLACE
5 THE INTENT OF THE DRAWINGS AND SPECIFICATIONS REGARDING ELECTRICAL PREWIRING AND PLUMBING PREPIPING IS TO HAVE THE KEC EXTEND TO AND TERMINATE ALL CONNECTIONS FOR THE EQUIPMENT IN THE LOCATIONS INDICATED IN THE EQUIPMENT SCHEDULE AND SPOT PLANS
6 ALL ITEMS SHOWN W/ THP1 CONNECTIONS PLUG INTO RECEPTACLES FURNISHED BY THE KEC AS PART OF THE EQUIPMENT
7 ELECTRICAL, PLUMBING AND MECHANICAL CONTRACTORS TO PROVIDE ALL ROUGH-IN BUILDING SERVICES AND FINAL CONNECTION TO ALL FOOD SERVICE EQUIPMENT

HEALTH DEPARTMENT NOTES

1) FLOORS AND BASE IN KITCHEN AREA TO BE LIGHT COLORED
2) WALLS AND CEILINGS IN KITCHEN AREAS SHALL BE LIGHT IN COLOR, NONABSORBENT, SMOOTH AND EASY TO CLEAN
3) ALL KITCHEN EQUIPMENT AND INSTALLATION SHALL MEET OR EXCEED (NSF) NATIONAL SANITATION FOUNDATION STANDARDS OR EQUIVALENT

CONTRACT CODE

E - EXISTING	GC - GENERAL CONTRACTOR FURNISHED	P - PURCHASE
F - FABRICATE	O - OWNER FURNISHED	V - VENDOR FURNISHED

NOTE

1 ALL S/S CUSTOM FABRICATION TO BE MANUFACTURED TO NSF STANDARDS BY APPROVED FABRICATOR.
2 CUSTOM REFRIGERATION TO BE FABRICATED TO NSF STANDARDS BY CERTIFIED NSF FABRICATOR

ELECTRICAL NOTES

A. ALL ELECTRICAL OUTLETS SHOWN ON THIS PLAN ARE TO BE FURNISHED BY THE E. TOWN EQUIPMENT CONTRACTOR UNLESS OTHERWISE NOTED. ELECTRICAL WORK IS TO BE PERFORMED BY A LICENSED ELECTRICIAN.

B. ALL COMPRESSOR UNITS ARE TO BE MOUNTED OVER AISLES OR IN REMOTE WALLS. ELEVATIONS ON PLAN SHOW EXACT LOCATION. REFER TO LAYOUT PLAN FOR EXACT LOCATIONS. ALL CONDENSING UNITS ARE TO BE INSTALLED AT LEAST 6" AWAY FROM ANY COMBUSTIBLE MATERIAL.

C. ELECTRICAL EQUIPMENT, TABLE TOP TYPE EQUIPMENT AND ITEMS MARKED TO BE FURNISHED BY THE E. TOWN EQUIPMENT CONTRACTOR SHALL BE SET IN PLACE BY THE ELECTRICAL CONTRACTOR. ALL ELECTRICAL OUTLETS AND CONNECTIONS FOR THIS EQUIPMENT SHALL BE PROVIDED BY THE ELECTRICIAN. ALL CONNECTIONS TO EQUIPMENT SHALL BE MADE BY THE ELECTRICIAN, AS WELL AS THE ELECTRICAL WORK INCIDENTAL THERETO. REFER TO ELECTRICAL PLAN FOR LOCATION OF OUTLETS. REFER TO E. TOWN EQUIPMENT CONTRACTOR'S DRAWINGS FOR EXACT LOCATIONS OF EQUIPMENT REQUIRING ELECTRICAL CONNECTIONS. ALL ELECTRICAL EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.

D. ALL WORK TO BE PERFORMED BY ALL SUBCONTRACTORS SHALL BE COORDINATED TO AVOID INTERFERENCE AND TO INSURE THE COMPLETION OF THE ENTIRE PROJECT IN THE SHORTEST POSSIBLE TIME. THE ELECTRICIAN SHALL CONSULT WITH THE OTHER TRADES AND BE RESPONSIBLE FOR THE COORDINATION OF HIS WORK WITH THE WORK OF THE OTHER TRADES.

E. EQUIPMENT TO BE PURCHASED BY E. TOWN SHALL BE DELIVERED TO THE SITE AND INSTALLED BY THE E. TOWN EQUIPMENT CONTRACTOR. THE ELECTRICIAN SHALL COORDINATE WITH THE E. TOWN EQUIPMENT CONTRACTOR TO ENSURE THAT ALL ELECTRICAL WORK IS COMPLETED IN TIME TO MEET THE PROJECT SCHEDULE.

F. ALL CIRCUITS SHALL BE INSTALLED IN CONDUIT AND SHALL BE COPPER. ALL CIRCUITS SHALL BE SIZED TO MEET THE REQUIREMENTS OF THE NATIONAL ELECTRICAL CODE AND LOCAL CODES. ALL CIRCUITS SHALL BE IDENTIFIED AT THE PANEL BOARD AS TO THEIR USE AND LOCATION. ALL CIRCUITS SHALL BE BALANCED AS EVENLY AS POSSIBLE ON THE THREE PHASES OF THE PANEL BOARD.

G. ELECTRICAL WORK TO BE PERFORMED IN ACCORDANCE WITH ALL APPLICABLE CODES AND REGULATIONS. ALL WORK SHALL BE INSTALLED IN A NEAT AND WORKMANLIKE MANNER. ALL EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.

H. ALL ELECTRICAL EQUIPMENT SHALL BE LISTED BY U.L. AND SHALL BEAR THE U.L. LABEL.

I. ALL CONDUIT SHALL BE CONCEALED IN FINISHED AREAS. CONDUIT SHALL BE RUN EXPOSED IN UNFINISHED AREAS AND SHALL BE NEATLY SUPPORTED FROM THE BUILDING STRUCTURE. CONDUIT SHALL NOT BE RUN ON THE TOP OF ANY EQUIPMENT.

J. ALL SURFACE MOUNTED RACEWAYS SHALL BE INSTALLED IN A NEAT AND WORKMANLIKE MANNER. RACEWAYS SHALL BE INSTALLED PARALLEL TO THE BUILDING WALLS AND SHALL BE SUPPORTED AT INTERVALS NOT EXCEEDING 4'-0".

K. ALL ELECTRICAL EQUIPMENT AND WIRING SHALL BE INSTALLED IN ACCORDANCE WITH THE NATIONAL ELECTRICAL CODE.

CLARIFICATIONS

1. ROUGH-IN ELECTRICAL PERFORMED BY THE ELECTRICAL CONTRACTOR SHALL INCLUDE ALL MATERIAL, WIRE, SWITCHES, JUNCTION BOXES, CONVENIENCE OUTLETS, DISCONNECTS, HEAT TAPE, STARTERS, CONTACTORS, SHUNT BREAKERS, MICROW TCHES, RECEPTACLES AND PULL BOXES (NOT BUILT INTO THE HOOD SERVICE EQUIPMENT
2. HVAC CONNECTIONS USUALLY PERFORMED BY THE ELECTRICAL CONTRACTOR SHALL INCLUDE ALL MATERIALS, MOUNTING ALL SW TCHES OR CONTROL PANELS, COOLER/FREEZER LIGHTS AND INTERCONNECTING WIRING BETWEEN SW TCHES, PANELS, LIGHTS, SOLENOID VALVES, COMPRESSORS, CONDENSERS, EVAPORATORS, DOOR HEATERS, HEATED VENTS, DEFROST HEATERS, HEAT TAPE AND DISCONNECTS AS REQUIRED.
3. SEE HOOD DRAWINGS FOR ELECTRICAL SPECIFICATIONS REQUIRED FOR EXHAUST HOODS, FAN PACKAGE AND FIRE SUPPRESSION SYSTEM.
4. ALL ELECTRICAL RECEPTACLES IN HOOD SERVICE AREA TO BE MOUNTED HORIZONTALLY.

MECHANICAL SYSTEM NOTES:

1. EXHAUST HOOD REQUIREMENTS AND DUCT COLLAR SIZES SHALL BE COORDINATED WITH FINAL SHOP DRAWINGS PRIOR TO FABRICATION.
2. ALL FINAL DUCT WELDING AND CONNECTIONS TO BE INCLUDED IN THE GC CONTRACT.
3. DUCTWORK, EXHAUST AND MUA FANS TO BE PROVIDED AND INSTALLED BY THE GC & MECHANICAL CONTRACTOR.
4. PROVIDE DISCONNECT ON ROOF FOR EXHAUST AND M.U.A. FANS.
5. ELECTRICAL EQUIPMENT UNDER EXHAUST HOOD MUST HAVE SHUNT TRIP BREAKERS AT ELECTRICAL PANEL CONNECTED TO MICROSWITCHES IN THE FIRE SYSTEM.
6. K.E.C. IS TO PROVIDE CLOSURE TRIM PANELS FROM TOP OF HOOD TO CEILING & S/S WALL PANELS.

NOTE:
REFER TO ENGINEERING HOOD DATA SHEETS FOR COMPLETE CFM REQUIREMENTS.

NOTE:
1. REFRIGERATION LINES ARE FOR SCHEMATIC PURPOSES ONLY.
2. K.E.C. AND G.C. TO VERIFY EXACT LOCATION OF REFRIGERATION UNITS ON ROOF WITH ARCHITECT PRIOR TO INSTALLATION.

SPECIFICATION: CAPTRATE GREASE-STOP SOLO FILTER

THE CAPTRATE GREASE-STOP SOLO FILTER IS A SINGLE-STAGE FILTER FEATURING A UNIQUE S-BAFFLE DESIGN IN CONJUNCTION WITH A SLOTTED REAR BAFFLE DESIGN, TO DELIVER EXCEPTIONAL FILTRATION EFFICIENCY.

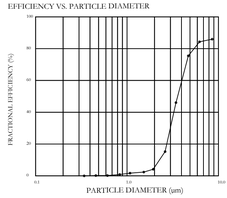
FILTER IS STAINLESS STEEL CONSTRUCTION, AND SIZED TO FIT INTO STANDARD 2-INCH DEEP HOOD CHANNEL(S).

UNITS SHALL INCLUDE STAINLESS STEEL HANDLES AND A FASTENING DEVICE TO SECURE THE TWO COMPONENTS WHEN ASSEMBLED.

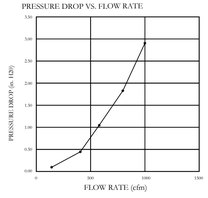
GREASE EXTRACTION EFFICIENCY PERFORMANCE SHALL REMOVE AT LEAST 75% OF GREASE PARTICLES FIVE MICRONS IN SIZE, AND 85% GREASE PARTICLES SEVEN MICRONS IN SIZE AND LARGER, WITH A CORRESPONDING PRESSURE DROP NOT TO EXCEED 1.0 INCHES OF WATER GAUGE.

THE CAPTRATE GREASE-STOP SOLO WAS TESTED TO ASTM STANDARD ASTM F2519-05.

EFFICIENCY VS. PARTICLE DIAMETER

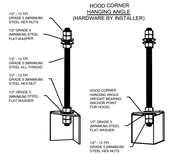


PRESSURE DROP VS. FLOW RATE



CAPTRATE FILTERS ARE BUILT IN COMPLIANCE WITH:.
NFPA #96
NSF STANDARD #2
UL STANDARD #1046
INT. MECH. CODE (IMC)
ULC-S649

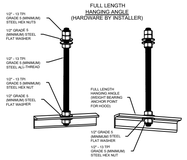
HOOD CORNER HANGING ANGLE (HARDWARE BY INSTALLER)



ASSEMBLY INSTRUCTIONS

HANGING ANGLE MUST BE SUPPORTED WITH 1/2" - 13 TPI GRADE 5 (MINIMUM) ALL-THREAD. SANDWICH HANGING ANGLES AND CEILING ANCHOR POINTS WITH 1/2" GRADE 5 (MINIMUM) STEEL FLAT WASHERS AND 1/2" - 13 TPI GRADE 5 (MINIMUM) HEX NUTS AS SHOWN. MUST USE DOUBLED HEX NUT CONFIGURATION BENEATH HOOD HANGING ANGLES AND ABOVE CEILING ANCHORS. MAINTAIN 1/4" OF EXPOSED THREADS BENEATH BOTTOM HEX NUT. TORQUE ALL HEX NUTS TO 57 FT-LBS.

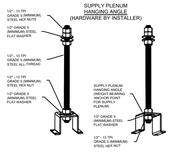
FULL LENGTH HANGING ANGLE (HARDWARE BY INSTALLER)



ASSEMBLY INSTRUCTIONS

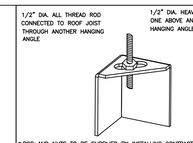
HANGING ANGLE MUST BE SUPPORTED WITH 1/2" - 13 TPI GRADE 5 (MINIMUM) ALL-THREAD. SANDWICH HANGING ANGLES AND CEILING ANCHOR POINTS WITH 1/2" GRADE 5 (MINIMUM) STEEL FLAT WASHERS AND 1/2" - 13 TPI GRADE 5 (MINIMUM) HEX NUTS AS SHOWN. MUST USE DOUBLED HEX NUT CONFIGURATION ABOVE CEILING ANCHORS. SINGLE HEX NUT BENEATH HANGING ANGLE IS ACCEPTABLE FOR FULL LENGTH HANGING ANGLES. MAINTAIN 1/4" OF EXPOSED THREADS BENEATH BOTTOM HEX NUT. TORQUE ALL HEX NUTS TO 57 FT-LBS.

SUPPLY PLENUM HANGING ANGLE (HARDWARE BY INSTALLER)



ASSEMBLY INSTRUCTIONS

HANGING ANGLE MUST BE SUPPORTED WITH 1/2" - 13 TPI GRADE 5 (MINIMUM) ALL-THREAD. SANDWICH HANGING ANGLES AND CEILING ANCHOR POINTS WITH 1/2" GRADE 5 (MINIMUM) STEEL FLAT WASHERS AND 1/2" - 13 TPI GRADE 5 (MINIMUM) HEX NUTS AS SHOWN. MUST USE DOUBLED HEX NUT CONFIGURATION ABOVE CEILING ANCHORS. SINGLE HEX NUT BENEATH HANGING ANGLE IS ACCEPTABLE FOR PSP HANGING ANGLES. MAINTAIN 1/4" OF EXPOSED THREADS BENEATH BOTTOM HEX NUT. TORQUE ALL HEX NUTS TO 57 FT-LBS.



* ROD AND NUTS TO BE SUPPLIED BY INSTALLING CONTRACTOR HANGING ANGLE IS PRE-PUNCHED AT FACTORY

HANGING ANGLE LOCATIONS

EXHAUST CFM=LENGTH OF HOOD X CFM/LIN.FT. (LOAD)

SUPPLY CFM=EXHAUST CFM X PERCENTAGE REQUIRED

TOTAL DUCT AREA=144 X $\frac{\text{CFM}}{\text{FPM(*)}}$

DUCT LENGTH= $\frac{\text{TOTAL DUCT AREA}}{\text{DUCT DEPTH}}$

*CAPTIVE-AIRE VENTILATOR DUCT SIZES ARE CALCULATED USING AN EXHAUST VELOCITY OF 1500-1800 FPM AND A SUPPLY VELOCITY OF 1000 FPM.

CALCULATIONS UTILIZED

CAPTIVE-AIRE HOODS ARE BUILT IN COMPLIANCE WITH:

ETL LISTED ▲ 3054804-001 ▲ 3054804-002 | UL STANDARD 710 | intertek | BUILT IN ACCORDANCE WITH NFPA No. 96

Listed under ETL File number 3054804-001/002

BUILDING CODES

CAPTIVE-AIRE HOODS HAVE OPTIONAL CLEARANCE REDUCTION SYSTEMS AVAILABLE AS FOLLOWS:

MATERIAL	CLEARANCE REDUCTION SYSTEM
NON-COMBUSTIBLE	NONE REQUIRED
LIMITED-COMBUSTIBLE	3" UNINSULATED STANDOFF
COMBUSTIBLE	1" INSULATED STANDOFF

CLEARANCE TO COMBUSTIBLES

INSTALLATION

1. ALL ELECTRICAL "FIELD" CONNECTIONS AND RELATED INTERCONNECTIONS BY ELECTRICAL CONTRACTORS.
2. ALL PLUMBING "FIELD" CONNECTIONS AND RELATED INTERCONNECTIONS BY PLUMBING CONTRACTORS.
3. HANGING BRACKETS LOCATED AND WELDED AS SHOWN ON PLANS. ALL OTHER HANGER MATERIALS PROVIDED BY INSTALLING CONTRACTORS.
4. ALL CONNECTIONS FROM CAPTIVE-AIRE DUCT PER MECHANICAL CONTRACTOR'S PLANS.
5. COOKING EQUIPMENT TO SHUTOFF IN EVENT OF FIRE.
6. EXHAUST FANS TO TURN ON IN EVENT OF FIRE.
7. ALL LIGHTS FIXTURE SHOWN INSTALLED BY CAPTIVE-AIRE ARE FACTORY PREWIRED. INTERCONNECTIONS BETWEEN HOODS AND TO SWITCHES BY ELECTRICAL CONTRACTORS.
8. LAMPS FOR LIGHT FIXTURES BY INSTALLING CONTRACTORS.
9. SEISMIC RESTRAINTS ARE RESPONSIBILITY OF INSTALLING CONTRACTOR.
10. INSTALLING CONTRACTORS ASSUME ALL RELATED REPONSIBILITY FOR VERIFICATION OF DIMENSIONAL DATA CONTAINED ON THESE DOCUMENTS FOR ACCURACY, INTEGRATION, AND ADMINISTRATION OF CODE REQUIREMENTS IN EFFECT PRIOR TO ANY RELEASE FOR PRODUCTION OF EQUIPMENT SHOWN.

BALANCE

11. KITCHEN HOODS MUST BE BALANCED WITH KITCHEN.
12. KITCHEN SHALL BE NEGATIVE WITH RESPECT TO DINING AREA.
13. RESTAURANT SHALL BE POSITIVE WITH RESPECT TO AMBIENT PRESSURE.

ADDITIONAL

14. WRITTEN HOOD DIMENSIONS HAVE PRECEDENCE OVER SCALE.
15. SIGNED AND "APPROVED" COPIES OF THIS DOCUMENT MUST BE RECEIVED BY THE FACTORY PRIOR TO COMMENCEMENT OF FABRICATION.

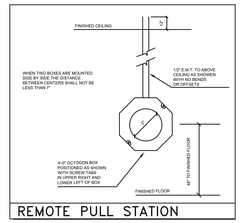
TYPICAL ANSUL R-102 SYSTEM LAYOUT

ACTUAL FIRE SYSTEM PIPING SCHEMATIC TO BE PROVIDED BY CONTRACTED FIRE SYSTEM DISTRIBUTOR AT TIME OF PERMITTING



REMOTE PULL STATION

SECTION VIEW – MODEL 6030ND-2-PSP-F
HOOD – #2 (40)

DUCT TEMPERATURE SENSOR

Provides exhaust air temperature for proper hood control operation. For all installations excluding a single hood with factory risers and a hood mounted panel, duct mounted temperature sensors will need to be field wired. 2-wire 18 AWG plenum rated thermistor cable must be used.

ROOM TEMPERATURE SENSOR

Provides room override based on temperature differential between the room and duct. Installed by electrician on a wall, 5'-6' off the finished floor, in the space but not directly under the hood or close to an appliance (including the electrical control box) so the reading is accurate for space.

HOOD CONTROL INTERFACE

The LCD interface provides user control and hood status. The faceplate is connected to the hood control panel through CAT-5 cable. A faceplate has 2 RJ-45 connectors. One connects to port J4 or J5 in the hood control panel and the other will typically be occupied by a RJ-45 end-of-line terminator.

Fire System Information – Job#4124057

FIRE SYSTEM NO.	Tag	TYPE	SIZE	FLOW POINTS	INSTALLATION	
					SYSTEM	LOCATION ON HOOD
1	41	Ansul R102	3.0/3.0	4	Fire Cabinet Right	Right

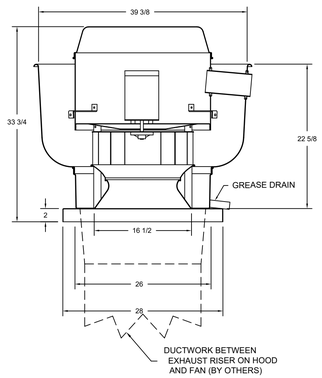
FANS #1 (KEF-1), #2 (KEF-2) - DU180HFA EXHAUST FAN



FEATURES:

- DIRECT DRIVE CONSTRUCTION (NO BELTS/PULLEYS)
- ROOF MOUNTED FANS
- RESTAURANT MODEL
- UL705 AND UL762 AND ULC-S645
- VARIABLE SPEED CONTROL
- INTERNAL WIRING
- WEATHERPROOF DISCONNECT
- THERMAL OVERLOAD PROTECTION (SINGLE PHASE)
- HIGH HEAT OPERATION 300°F (149°C)
- GREASE CLASSIFICATION TESTING

NORMAL TEMPERATURE TEST
EXHAUST FAN MUST OPERATE CONTINUOUSLY WHILE EXHAUSTING AIR AT 300°F (149°C) UNTIL ALL FAN PARTS HAVE REACHED THERMAL EQUILIBRIUM, AND WITHOUT ANY DETERIORATING EFFECTS TO THE FAN WHICH WOULD CAUSE UNSAFE OPERATION.

ABNORMAL FLARE-UP TEST
EXHAUST FAN MUST OPERATE CONTINUOUSLY WHILE EXHAUSTING BURNING GREASE VAPORS AT 600°F (316°C) FOR A PERIOD OF 15 MINUTES WITHOUT THE FAN BECOMING DAMAGED TO ANY EXTENT THAT COULD CAUSE AN UNSAFE CONDITION.

OPTIONS

GREASE BOX.
FAN BASE CERAMIC SEAL - INSTALLED AT PLANT - FOR GREASE DUCTS.

VERIFY PITCH CURB

FAN #4 A2-20D - SUPPLY FAN (MUA-1)
1. UNTEMPERED SUPPLY UNIT WITH 20" DIRECT DRIVE FAN IN SIZE #2 HOUSING
2. EVAP COOLER (LPD CELDEK) – W/INTAKE HOOD W/EZ FILTERS
3. DOWN DISCHARGE - AIR FLOW RIGHT -> LEFT
4. 120V WIRING CONNECTION TO ENERGIZE EVAPORATIVE COOLERS FROM UNTEMPERED SUPPLY FANS.
5. SEPARATE 120VAC WIRING PACKAGE FOR MAKE-UP AIR UNITS. OPTION MUST BE SELECTED WHEN MOUNTING VFD IN PREWIRE PANEL OR WITH DCV PACKAGE. PROVIDES SEPARATE 120VAC INPUT TO SUPPLY FAN. THIS 120V SIGNAL MUST BE RUN BY ELECTRICIAN FROM DCV TO MUA SWITCH.

*NOTE: SUPPLY DUCT MUST BE INSTALLED TO MEET SMACNA STANDARDS. A MINIMUM STRAIGHT DUCT LENGTH MUST BE MAINTAINED DOWNSTREAM OF UNIT DISCHARGE AS OUTLINED IN AMCA PUBLICATION 201. DO NOT RELY ON UNIT TO SUPPORT DUCT IN ANY WAY. FAILURE TO PROPERLY SIZE DUCTWORK MAY CAUSE SYSTEM EFFECTS AND REDUCE PERFORMANCE OF THE EQUIPMENT.
SUGGESTED STRAIGHT DUCT SIZE IS 20" x 20"

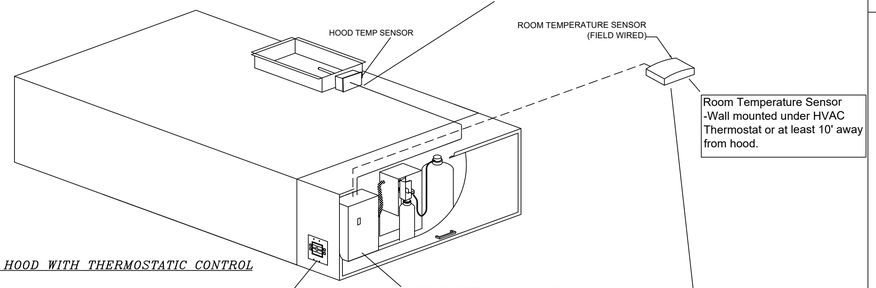
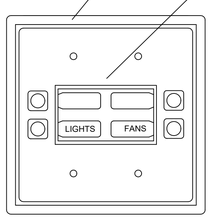
TEMPERATURE SENSOR INTERLOCK

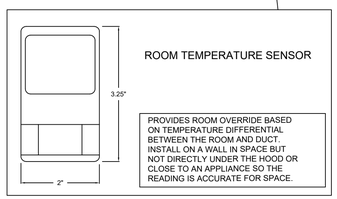
THE TEMPERATURE SENSOR INTERLOCK OPTION COMPLIES WITH IMC 507.2.1.1 AND NFPA 96 11.1.1 BY INTERLOCKING WITH COOKING APPLIANCES THROUGH MEANS OF A HEAT SENSOR TO AUTOMATICALLY ACTIVATE EXHAUST FANS DURING COOKING OPERATIONS.

IF EXHAUST RISER IS FIELD CUT OR MULTIPLE HOODS ARE INSTALLED, THE DUCT STAT/STATS WILL BE WIRED IN THE FIELD BY CONTRACTOR



TYPICAL HOOD WITH THERMOSTATIC CONTROL





Demand Control Ventilation Hood Control Panel Specifications:

- Controls shall be listed by ETL (UL 508A) and shall comply with demand ventilation system turndown requirements outlined in IECC 403.2.8 (2015).
- The control enclosure shall be NEMA 1 rated and listed for installation inside of the exhaust hood utility cabinet. The control enclosure may be constructed of stainless steel or painted steel.
- Temperature probe(s) located in the exhaust duct riser(s) shall be constructed of stainless steel.
- A digital controller shall be provided to activate the hood exhaust fans dynamically based on a fixed differential between the ambient and duct temperatures sensors. This function shall meet the requirements of IMC 507.1.1.
- A digital controller shall provide adjustable hysteresis settings to prevent cycling of the fans after the cooking appliances have been turned off and/or the heat in the exhaust system is reduced.
- A digital controller shall provide an adjustable minimum fan run-time setting to prevent fan cycling.
- Variable Frequency Drives (VFDs) shall be provided for fans as required. The digital controller shall modulate the VFDs between a minimum setpoint and a maximum setpoint on demand. The duct temperature sensor input(s) to the digital controller shall be used to calculate the speed reference signal.
- The VFD speed range of operation shall be from 0% to 100% for the system, with the actual minimum speed set as required to meet minimum ventilation requirements.
- An internal algorithm to the digital controller shall modulate supply fan VFD speed proportional to all exhaust fans that are located in the same fan group as the supply fan.
- The system shall operate in PREP MODE during light cooking load or COOL DOWN MODE when sufficient heat remains underneath the hood system after cooking operations have completed. Operation during either of these periods will disable the supply fans and provide an exhaust fan speed that is equal to the minimum ventilation requirement.
- A digital controller shall disable the supply fan(s), activate the exhaust fan(s), activate the appliance shunt trip, and disable an electric gas valve automatically when fire condition is detected on a covered hood.
- A digital controller shall allow for external BMS fan control via Dry Contact (external control shall not override fan operation logic as required by code).
- An LCD interface shall be provided with the following features:
  a. On/Off push button fan & light switch activation
  b. Integrated gas valve reset for electronic gas valves (no reset relay required)
  c. VFD Fault display with audible & visual alarm notification
  d. Duct temperature sensor failure detection with audible & visual alarm notification
  e. Mis-wired duct temperature sensor detection with audible & visual alarm notification
  f. A single low voltage Cat-5 RJ45 wiring connection
  g. An energy savings indicator that utilizes measured kWh from the VFDs

Sequence of Operations:

The hood control panel is capable of operating in one or more of the following states at any given time:

- Automatic: The system operates based on the differential between room temperature and the temperature at the hood cavity or exhaust duct collar. Fans activate at a configurable temperature differential threshold. Depending on the job configuration each fan zone can be configured as static or dynamic. These terms refer to whether a variable motor (such as EC Motors or VFD driven motors) modulate with temperature. If the panel is equipped with variable speed fans and the zone is defined as "dynamic", these will modulate within a user-defined range based on the temperature differential. Panels equipped with variable speed fans and a fan zone defined as "static", fans will run at a set speed calculated for the drive. Demand control ventilation systems are capable of modulating exhaust and make up air fan speeds per the requirements outlined in IECC 403.2.8.
- Manual: The system operates based on human input from an HMI.
- Schedule: A weekly schedule can be set to run fans for a specified period throughout the day. There are three occupied times per day to allow for the user to set up a time that is suitable to their needs. Any time that is within the defined occupied time, the system will run at modulation mode and follow the fan procedure algorithm based on temperature during this time. During unoccupied time, the system will have an extra offset to prevent unintended activation of the system during a time where the system is not being occupied.
- Other: The system operates based on the input from an external source (DDC, BMS or hard-wired interlock)

FACTORY BUILT DOUBLE WALL DUCT
TESTED/LISTED TO UL 1978 STANDARD

Duct run shown is for example purposes only.
See mechanical plans for additional information.

Additional information including installation manual available at www.captiveaire.com.

FACTORY BUILT DOUBLE WALL GREASE DUCT MODEL DW-2R SPECIFICATION:

FURNISH DOUBLE WALL, FACTORY BUILT GREASE DUCT FOR USE WITH TYPE I KITCHEN HOODS, WHICH CONFORMS TO THE REQUIREMENTS OF NFPA-96. PRODUCTS SHALL BE ETL LISTED TO UL-1978 AND UL-2221 FOR VENTING AIR AND GREASE VAPORS FROM COMMERCIAL COOKING OPERATION. TESTING HAS BEEN EXTENDED TO RECOGNIZE ASTM E2336 AND AC101 DUE TO SIMILAR TESTING CRITERIA. MODELS DW-2R, 3R AND 3Z ARE USED FOR CONSTRUCTION OF GREASE DUCTS AS REQUIRED BY NFPA-96 AND IMC. REFER TO NFPA-96, 91 STANDARD FOR VENTILATION CONTROL AND FIRE PROTECTION OF COMMERCIAL COOKING OPERATIONS. DOUBLE WALL GREASE DUCTS ARE LISTED FOR A CONTINUOUS INTERNAL TEMPERATURE OF 500 DEGREES F AND INTERMITTENT TEMPERATURES OF 2000 DEGREES F.
THE DUCT SECTIONS SHALL BE CONSTRUCTED OF AN INNER DUCT WALL AND AN OUTER WALL WITH INSULATION IN BETWEEN. THE INNER DUCT WALL SHALL BE CONSTRUCTED OF .036 INCH THINK, 430 TYPE STAINLESS STEEL AND BE AVAILABLE IN DIAMETERS 8" THROUGH 24". THE OUTER WALL SHALL BE CONSTRUCTED OF STAINLESS STEEL AT A MINIMUM OF .024 INCH THICKNESS. THE DUCT, BASED ON MODEL NUMBER, SHALL INCLUDE LAYERS OF SUPER WOOL 607 PLUS INSULATION BETWEEN THE INNER AND OUTER WALL. GREASE DUCT JOINTS SHALL BE HELD TOGETHER BY MEANS OF FORMED V CLAMPS AND SEALED WITH 3M FIRE BARRIER 2000+. THE DUCT WALL ASSEMBLY SHALL BE TESTED AT 3/4" OR ZERO INCH CLEARANCE, ACCORDING TO CLASSIFICATIONS.

CLASSIFICATIONS AND CLEARANCES
UL 2221: STANDARD FOR FIRE RESISTIVE GREASE DUCT ENCLOSURE ASSEMBLIES. CHAPTER 7 OF THIS STANDARD REFERENCES A TEST LABELED INTERNAL FIRE TEST. SECTION 7.1.1 REFERENCES TWO INSTALLATION CONDITIONS, CONDITION A AND CONDITION B. CONDITION A REPRESENTS ALL INSTALLATION CONDITION EXCEPT FOR INSTALLATION WITHIN NON-VENTILATEDCOMBUSTIBLE ENCLOSURES. CONDITION B REPRESENTS INSTALLATION WITHIN A NON-VENTILATED COMBUSTIBLE ENCLOSURE.

MODEL DW-2R IS CLASSIFIED UNDER UL2221 AS AN ALTERNATE TO 2-HR FIRE RESISTIVE SHAFT ENCLOSURES WITH A REDUCED CLEARANCE TO COMBUSTIBLES (SIZES 8" TO 16" DIAMETER). MODEL 2R IS LISTED IN ACCORDANCE WITH THE REQUIREMENTS FOR DUCT ENCLOSURE CONDITION B.

MODEL DW-2R: 3/4" CLEARANCE TO COMBUSTIBLES FROM THE SURFACE OF THE DUCT OUTER SHELL; ZERO INCH CLEARANCE FROM COMBUSTIBLES FROM THE TIP OF THE OUTER V BAND.

DOUBLE WALL GREASE DUCT SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S "INSTALLATION, OPERATION AND MAINTENANCE MANUAL." ETL LISTING, STATE AND LOCAL CODES. FANS SHALL BE SUPPORTED INDEPENDENTLY FROM THE GREASE DUCT SECTIONS. PROTECT GREASE DUCT FROM TWISTING OR MOVEMENT CAUSED BY FAN TORQUE OR VIBRATION.

CERTIFICATIONS:
THE DW-2R SERIES HAS BEEN CERTIFIED BY ITS. THIS CERTIFICATION MARK INDICATES THAT THE PRODUCT HAS BEEN TESTED TO AND HAS MET THE MINIUM REQUIREMENTS OF A WIDELY RECOGNIZED (CONSENSUS) U.S. AND CANADIAN PRODUCTS SAFETY STANDARD. THAT THE MANUFACTURING SITE HAS BEEN AUDITED, AND THAT THE APPLICANT HAS AGGREED TO A PROGRAM OF PERIODIC FACTORY FOLLOW-UP INSPECTIONS TO VERIFY CONTINUED PERFORMANCE.

1) Please verify that door swing and location are correct.

2) If this walk-in is to be installed in a depression, or quarry tile is to be applied to the interior, depression depths or tile thickness must be specified to insure proper door height.

3) All site preparation, floor or slab construction, plumbing, electrical connections (including control wiring) by others.

4) ⊕ Electrical: 115–60–1 required above latch side of each door, through ceiling, to operate frame heater and light.

5) Special note to General Contractor and his Sub Contractor for quarry tile or concrete wearing floors: the sheet metal panel facings may be susceptible to staining due to excessive moisture created by hydration of concrete type materials. Therefore, it is absolutely necessary that each room be properly ventilated. Also note that special precautions must be taken when using muriatic acid due to effects hydrochloric acid fumes have on aluminum and stainless steel.

6) This drawing and information contained herein are the exclusive property of American Panel Corporation. It shall be returned to American Panel Corporation upon demand and shall not be reproduced in whole or part, disclosed to anyone else, or used without the written consent of American Panel Corporation.

FOODSERVICE EQUIPMENT ELEVATIONS

FS-7.0

GENERAL CONTRACTOR NOTES:

1. General Contractor to cut and provide holes through ceiling,roofs, walls and floors for ducts, refrig. lines etc. in accordance with local fire and building codes and in accordance with duct sizes specified. General Contractor to provide the resealing of all holes (including the "moping–in" of fan curbs and roof jacks.) General Contractor to provide all duct fire separation enclosures, wrappings, etc. as may be required by local building and fire codes.

2. Where noise or vibration producing equipment (dish machine, disposer, etc. is located adjacent to dining areas and/or any public areas. Provisions should be made by the General Contractor to "double stud" and sound proof common walls.

3. All roof curb and roof jacks to be provided, located and installed by G.C. including resealing of roof and roof penetrations.

4. "FS" Drawings are provided for the sole purpose of indicating outlet locations and equipment requirements only and do not relieve the General Contractor or subcontractor of the responsibility of complying with all applicable codes. Please see architect's drawings for all other requirements and codes.

5. It is the responsibility of the Owner, Architect and/or General Contractor to inform the K.E.C. in writing, any and all changes and all addendums to plans which are made prior to and during construction. K.E.C. assumes no responsibility for equipment deviations of size and/or utilities from lack of this information. The Owner will be responsible for all cost incurred by failure to give K.E.C. notice of changes.

6. Last dated revisions void all previous plans.

7. General Contractor to provide floor recesses (flat and level). Vapor Barriers and built in insulated floors (as shown on plans). If applicable.

8. Floor finish, cove base and interior cove in walk–in boxes to be provided by General Contractor unless otherwise specified by K.E.C.

9. Sleeves & Conduits to be provided by General Contractor in walls, floors & ceiling for lines (drains, refrigeration, etc.) to pass through and G.C.to reseal after lines are run.
   All conduit to be round metal, transite, P.V.C. or equal diameter as indicated on plan, minimum bending radius to be 24", factory "L's" will not be permitted. Conduit to meet local codes.

10. General Contractor to provide access to hoods at area above hoods for mounting of hood supports. If access is not provided, General Contractor to provide hood supports.
    All roof curb & jacks to be provided, located & installed by G.C., including resealing of roof & roof penetrations.

11. General Contractor to provide sprinkler heads in walk–in boxes and adequately protected against freezing.

12. Removal of window glass, window frames, doors, door frames and center post for entry of equipment shall be the responsibility of the General Contractor and at no expense to K.E.C. if necessary.

13. General Contractor to provide all wall backing per location and specification by K.E.C.

14. All dimensions shown are measured from finished walls, floors, ceilings and/or column to center lines of stubs or outlets. Allowances shall be made for miscellaneous obstructions, structures, venting, electrical, plumbing and thickness of finishes when framing and/or roughing–in as required.

15. When equipment is noted as existing or by vendor, utility requirements should match as indicated on the manufacturer's data plate. If existing equipment is not relocated, reconnect as required by code.

16. Where indicated to connect in or through valve compartment, contractor shall stub–up into valve compartment at height indicated on rough–in plan, cap their work and make final connections after equipment is in place.

17. General Contractor to provide all duct chases from hood thru roof, sized & constructed, conforming to codes.

18. General Contractor to provide waste container at job site for K.E.C.

19. Slope floors to floor drains.

20. Provide door wall openings and or passages to assure access for all kitchen equipment and front end items. Coordinate sizes with K.E.C.

21. Provide walk–in refrigerator/freezer depressions, to detail.

22. G.C. to provide enclosures from top of walk–in to ceiling (if required).

23 G.C. to provide enclosures from top of exhaust hood to ceiling (if required).

24. Provide coved base–molding or coved integral floor materials as required at all vertical surfaces for kitchen floors.

VENTILATION NOTES

1. Mechanical Contractor to provide fans, duct work, (all welding of hood and duct required) controls, duct collar, final connection, hanging of hoods, permits and make–up air equipment. The above furnished by H.V.A.C. contractor unless noted on drawing or contracted with K.E.C.

2. Mechanical contractor (H.V.A.C.) to balance exhaust system.

3. All duct collars, cutouts and penetrations in hoods to be located and provided by Mechanical Contractor in field.

REFRIGERATION CONTRACTORS NOTES

1. Refrigeration line to be installed and protected from damage.
   Refrigeration lines for walk–in refrigerators & freezers, to run overhead and drop down from compressors to evaporators.

2. All built–in walk–in refrigeration boxes shall be complete with insulation with proper vapor barrier and interior lights and switches outside. Electrical connection and mounting by E.C.

3. Do Not Scale. Use written dimensions shown on "K" plans.

FIRE PROTECTION SYSTEM NOTES

1. Where indicated on drawings a dry or liquid chemical system shall be provided to protect all cooking exhaust hoods, ducts, and cooking appliances against fire and re–flash by a fire control system. The size and number of systems shall be in conformance with N.F.P.A Pamphlet 96, and local and state codes. The system shall be installed by authorized installers.

2. The system shall be of the cartridge operated type, automatic actuated or be manually operable at the nozzle release and a remote manual pull operator shall be located as shown on the drawing. Actuation of the system shall provide automatic gas and/or electric fuel line cut–off.

3. Electrically controlled or manually controlled gas solenoid valve shall be installed by the plumbing contractor. The electrical contractor shall furnish and install line voltage wiring and conduit from cut–off relay to solenoid valve and connect cut–off relay and solenoid valve as required.

4. Electrical cooking equipment shall be shutoff at the electrical panel by means of shunt trips. Electrical contractor shall furnish and install shunt trips, line voltage wiring and conduit from fir protection micro–switch, or equivalent, to panels, to meet all local codes.

5. All hand held fire extinguishers to be provided by General Contractor.

MASONRY CONTRACTORS NOTES

1. All curbs & or recessed mat area dimensions are finished dimensions. Verify face and top finishes (where curb is exposed) with Architect, General Contractor or Owner.

2. All curb heights to be taken from finished floor to top of finished curb.

3. All curb dimensions are taken from finished wall to face of finished curb, or from finished face of curb to finished face of curb.

4. Provide a 3" – 4" radius cove where finished face of curb intersects the finished floor.

5. See Plumbing plan(s) for exact location of floor sinks and floor drains. Verify with P.C.

6. Do Not Scale, Use written dimensions shown on "K" plans.

7. Provide masonry curbs with trowel–smooth and level finish as required.

PLUMBING CONTRACTOR NOTES

1. All rough–ins related to foodservice equipment only. Please see architectural/engineering plans for additional plumbing requirements and codes.

2. Final connections to all equipment to be by plumbing contractor, ALL required materials, such as stops, valves, filters, check valves, pressure reducing valves, gate valves, solenoid valves, syphon breakers, piping, tubing, misc. fittings, traps, etc. shall be supplied by the Plumbing Contractor unless otherwise specified.

3. Water quality requirement. The recommended minimum water quality standards whether untreated or pre–treated, based upon 10 hours of use per day, and a daily blow–down, are as follows:

   A. Total dissolved solids less than 300 parts per million
   B. Total alkalinity less than 85 parts per million
   C. Silica less than 13 parts per million
   D. pH Factor greater than 7.5

4. Verify all plumbing rough–ins and location with owner, vendor or G.C. on existing equipment or other equipment not provided by K.E.C.

5. Plumbing Contractor to Furnish and Install the following as per code:

   A. All water, waste, gas, and steam service to point of rough–in as shown on plan. Rough–in outlets to stub 4" out of walls at height indicated from finished floor to center line of outlet.
   B. Pressure reducing and/or regulating valves for dishwashers, booster heaters, and as otherwise noted, in kitchen areas.
   C. All floor sinks, complete with top grates, and removable sediment buckets set flush with finished floor, unless noted or as per local code.
   D. All waste lines, direct or indirect, except as noted, shall be pitched downward. All waste lines shall have adequate clean–out provisions.
   E. Indirect waste lines for walk–in refrigerators/freezers, pitched 4"/12" (minimum) and with a "P" trap at end over floor sink as required by local code.
   F. Heater tape, with 35 watts per lineal foot of drain line, and insulation of all drain lines inside freezer compart–ments.
   G. Install in an accessible location the fire control gas shutoff valve as supplied by Fire Protection System Supplier. (If gas cooking equipment is used).
   H. Vacuum breakers as required.
   I. Insulation of all steam, hot water and condensate lines in kitchen.
   J. Clean–out valves for steam condensate, and air lines.
   K. All piping condensate & drain lines, to and from equipment must be kept a minimum of (6") above finished floor to allow for cleaning, & or prevailing local code.
   L. In line water filters are recommended for the following equipment: (Water filter by P.C. unless otherwise noted)

      Water Heaters
      Booster Heaters
      Sink Heaters
      Dish Washers
      Glass Washers
      Soda Systems
      Ice Machines
      Steam Equipment

6. Plumbing Contractor to interconnect dish machine with booster heater and water–type ventilators with control panels as per manufacturer's instruction, when applicable and noted.

7. All lines routed through equipment shall not interfere with intended use of, or servicing of equipment.

8. All vent pipes are to be concealed in walls or column chases.

9. Interconnection between steam equipment and steam generator.

10. Grease trap to be specified and located by mechanical engineer and provided and installed by mechanical or plumbing contractor.

11. Where equipment is noted as existing, utility requirements should be verified and match as indicated on manufacturer's date plate. If equipment is not relocated, reconnect as required by code. Plumbing Contractor to verify existing utilities and equipment requirements and re–use if possible.

12. All plumbing locations are shown at optimum spots. Utilize all existing services where applicable.

13. All plumbing to be concealed within walls where possible.

14. Hot water heater to provide a minimum of 140 degree water to all kitchen equipment.

15. All dimensions shown are measured from finished walls, floors ceilings and/or column to center lines of stubs or outlets. The plumbing contractor shall make allowances for miscellaneous obstructions such as piping mains, electrical components, structures, venting and thickness of finishes when roughing–in as required.

16. All faucets and/or disposers located on Food Service Plan shall be provided by K.E.C. and installed by Plumbing Contractor, unless otherwise noted.

17. Hand sinks are to be mounted and installed by Plumbing Contractor.

ELECTRICAL CONTRACTOR NOTES

1. The electrical specifications and connections shown on these plans are for food service equipment requirements only. It is the responsibility of the ELECTRICAL CONTRACTOR to consult the architect's, mechanical engineers and/or general contractor's plans and the owner for further building electrical requirements.

2. Access areas and cut–ins on custom and buyout equipment and fixtures shall be provided by the ck.E.C. required for proper installation of electrical outlets, junction boxes, home runs, etc. The electrical contractor shall provide and install shields and extension boxes as required.

3. The Electrical Contractor shall connect all compressors and provide fused disconnects, magnetic starters and thermo overload protection as required.

4. Vapor proof light fixtures for exhaust hoods shall be furnished by the HOOD SUPPLIER. The Electrical Contractor shall supply and install pull boxes,conduit, wire, bulbs, etc. Provide and connect to a wall mounted switch (with pilot light) located per plans.

5. Vapor proof light fixtures for walk–in coolers and freezers shall be furnished with an exterior pilot light switch by the Walk–in Supplier. It shall be the responsibility of the Electrical Contractor to interconnect and install these items as required. Electrical Contractor shall connect door heaters, relief ports. E.C. to supply install, & connect all drain line heater tape.

6. Electrical Contractor to interconnect the Remote Refrige–rations' Compressor, Evaporator, T–stat, Solenoid and Defrost Timer (All Controls) where required.

7. All electrical materials including wiring, flex, conduit, switches, disconnects, magnetic starters, thermo–overload protectors, transformers, electrical panels, cords, plugs, receptacles, bulbs, etc. shall be supplied by the electrical contractor unless specified in these plans or in writing by the Food Service Equipment Contractor.

8. It shall be the responsibility of the Electrical Contractor to provide water proof power outlet(s) on the roof for exhaust system fan(s) make–up air fan(s) and refrigeration system(s) as required. Low voltage (or common voltage) wiring shall also be supplied and installed by the electr–ical contractor when necessary to control and interconnect the above systems.

9. The electrical contractor shall furnish and install any and all electrical contractors as required by applicable codes and ordinances.

10. All dimensions shown on these plans are measured from finished walls, floors, ceilings and/or column center lines or grid lines to enter lines of outlets and pull boxes. The Electrical Contractor shall make allowances for finishes when roughing–in as required.

11. The Electrical Contractor shall provide and install element contractor (relay) shutoffs (shunt trip) and/or solenoid shutoff valve and interconnect with the fire suppression system for the cooking equipment, to shut off all equipment automatically in case of fire. Verify with local codes for shutdown of exhaust fan(s) and or make–up air fan(s) requirements.

12. All 115 volt convenience outlets not designated with spec–ific loads are to be rated 20.0 amps. Electrical Contractor is to provide any additional outlets as called for by architect, owner and/or general contractor.

13. Electrical Contractor to provide caps and cords for all equipment where caps and cords are not standard with manufa–cture. Electrician to also shorten any cords supplied with equipment if requested to do so by owner or Food Service Equipment Contractors' representative.

14. Electrical Contractor to provide all rough–in building services and make final connections to all food service equipment provided by K.E.C. This shall include the instal–lation mounting of the Air Curtain(s),/Microswitch(s).

15. Electrical Contractor to provide temporary power to Food Service Equipment Contractors' installers, as required.

16. All rough–ins are shown in optimum spots, utilize all existing services when applicable.

17. All receptacles and junction boxes to be flushed mounted in walls with stainless steel cover plate.

18. Verify all electrical rough–ins and locations with owner, vendor, or General Contractor on existing equipment or other equipment not provided by K.E.C.

19. Where applicable, Electrical Contractor to provide conduit wiring, install electrical components, and interwire, between the following:
   A. Control panels to ventilators and exhaust/supply fans per manufacture's instructions.
   B. Kitchen exhaust hood/ventilators to fire control system and hood controls.
   C. Call lights and waitress control systems.
   D. Light fixture, chandeliers, etc. Lamps for any light fixtures are to be provided and installed by the Electrical Contractor unless indicated on the lighting schedules or drawings.
   E. Module counters and components or equipment mounted on counters.
   F. Heat Lamps are to be connected thru remote controls, pilot lights, etc.

20. Electrical Contractor to provide and install all light bulbs for fixtures, where applicable.

21. All item's shown with P.I. connections, plug into receptacles furnished by the K.E.C. as part of the equipment.

22. Where connection is shown as J.B., Electrical Contractor shall connect to J.B. furnished as part of the equipment.

23. All horizontal dimensions are from face of finished wall to center–line of outlet or from center–line of outlet to center–line of outlet unless otherwise noted.

24. All symbols for outlet on walls are indicated at a specific height. Height of outlet is given from finished floor TO CENTERLINE OF OUTLET.

FOODSERVICE GENERAL NOTES

FS-8.0

GENERAL STRUCTURAL NOTES:

CODE:

INTERNATIONAL BUILDING CODE, 2018 EDITION.

LOADS:

ROOF DEAD LOAD: VARIES-PSF.ROOF LIVE LOAD: 20-PSF.

MECHANICAL AND SPRINKLER: SEE CORRESPONDING PLANS.
WIND:
V(3s) = 115-MPH, EXPOSURE C
BUILDING CATGORY II
COMPONENT & CLADDING PRESSURE = 22-PSF (ASD)

SEISMIC:
DESIGN CATIGORY "B", RISK CAT. II, SITE CLASS D, Ie = 1.0
Ss=.188, S1=.061
ANALYSIS: EQUIV. LAT. FORCE DESIGN, SDS=.200, SD1=.097
BASIC SEISMIC FORCE RESISTING SYSTEM: BEARING WALLS WITH INTERM. REINF. MASONRY SHEAR WALLS.
SEISMIC RESPONCE COEFF. Cs=.057 USD
RESPONCE MOD. FACTOR R=3.5
DESIGN BASE SHEAR = VARIES

FOUNDATIONS:

SEE SOILS REPORT BY: NONE
DESIGN SOIL BEARING PRESSURE: 1,000 PSF.
FOOTINGS SHALL BEAR ON FIRM NATURAL SOIL. BOTT. OF FOOTING 1'-6" MINIMUM BELOW FINISH GRADE. FINISH GRADE IS TOP OF SLAB FOR INTERIOR FOOTINGS AND LOWEST ADJACENT FINISH GRADE WITHIN 5 FEET FOR PERIMETER FOOTINGS.

CONCRETE:

MINIMUM 28 DAY STRENGTH TO BE 2500-PSI. & 3000-PSI
ALL FOOTING CONCRETE TO BE MIN. 2500-PSI
ALL SLAB CONCRETE MIN. 3000-PSI WITH MAX. W/C RAIO OF .58
MAXIMUM SLUMP: 5 IN. CEMENT: TYPE 2-5
MEET ACI MANUAL OF CONCRETE PRACTICE LATEST EDITION.
SUBMIT ADMIXTURES FOR APPROVAL.
MECHANICALLY VIBRATE ALL CONCRETE WHEN PLACED. SLABS ON GRADE NEED ONLY BE VIBRATED AROUND EMBEDDED ITEMS.
UNLESS APPROVED OTHERWISE ALL SLABS ON GRADE SHALL BE BOUND BY CONTROL JOINTS (SAW CUT OR KEYED) AS SHOWN ON FOUNDATION PLAN. ENCLOSED AREA NOT TO EXCEED 180 SQ. FT. CURE SLABS PER ACI (HOT WEATHER) RECOMMENDATIONS.

REINFORCING:

ASTM A-615 GRADE 60 (Fy=60 KSI) EXCEPT AS FOLLOWS:
VERTICAL REINFORCING #5 OR LARGER: GRADE 60 (Fy=60 KSI)
BARS TO BE WELDED: . . . . . ASTM A-706
WIRE MESH: . . . . . ASTM A-185
ACI CODE AND DETAILING MANUAL APPLY.
CLEAR CONCRETE COVERAGE AS FOLLOWS:
CAST AGAINST EARTH . . . . . .3 IN.
EXPOSED TO EARTH OR WEATHER
#5 AND SMALLER . . . . . 1 1/2 IN
#6 AND LARGER . . . . . 2 IN.
LAP SPLICES IN CONCRETE:
LAP SPLICES IN CONCRETE U.N.O. SHALL BE 24" MIN.
STAGGER SPLICES A MINIMUM OF ONE LAP LENGTH. SPLICE LOCATIONS ARE SUBJECT TO APPROVAL OF STRUCTURAL ENGINEER. PLACE BARS PER CRSI HANDBOOK.
PROVIDE BENT CORNER BARS TO LAP AND MATCH HORIZONTAL BARS AT ALL CORNERS AND INTERSECTIONS. UNLESS NOTED OTHERWISE DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH STANDARD 90 DEGREE HOOKS. DOWELS TO LAP TYP. VERTICAL BARS AND MATCH SIZE AND SPACING.

MASONRY:

HOLLOW CONCRETE MASONRY UNITS SHALL CONFORM TO ASTM C90, GRADE N, TYPE 1, RUNNING BOND, MEDIUM WEIGHT.
F'm = 1500 PSI; MORTAR TYPE S 1800 PSI; GROUT 2000 PSI.
MECHANICALLY VIBRATE GROUT IN VERTICAL CELLS IMMEDIATELY AFTER POURING. MAXIMUM GROUT LIFT = 5'-0". SEE PLAN FOR
EXPANSION OR CONTROL JOINTS. UNLESS NOTED OTHERWISE LOCATE MASONRY CONTROL JOINTS AT 24 FT. O.C. MAXIMUM, BUT NOT LESS THAN 2'-0" FROM A JAMB OR BEARING PLATE, NOR ABOVE OPENINGS.

VERTICAL REINFORCING:

AS SHOWN ON PLAN. UNLESS NOTED OTHERWISE PLACE (1) #5 AT CENTER OF WALL IN GROUTED CELL AT O.C. PER PLAN FULL HEIGHT OF WALL. (1) #5 REQUIRED AT ALL CORNERS, INTERSECTIONS, WALL ENDS, JAMBS AND EACH SIDE OF EXPANSION OR CONTROL JOINTS.
SEE PLAN AND DETAILS FOR SPECIAL CONDITIONS.
UNLESS NOTED OTHERWISE DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH STANDARD 90 DEGREE HOOKS. DOWELS TO LAP TYP. VERTICAL BARS AND MATCH SIZE AND SPACING. USE BAR POSITIONERS @ 4'-8" O.C. MAX OR AT EA. GROUT POUR.

HORIZONTAL REINFORCING:

MIN. (1) #5 IN MIN. 8" DEEP GROUTED CONTINUOUS BOND BEAM AT ROOF LINE. (1) #5 IN 8" MIN. DEEP GROUTED CONTINUOUS BOND BEAM AT TOP OF ALL PARAPETS, SILLS, AND FREESTANDING WALLS. PLACE CONTINUOUS THRU CONTROL JOINTS PER TYPICAL DETAILS. WRAP BARS IN MASTIC TAPE FOR 1'-6" EACH SIDE CONTROL JOINTS. PROVIDE BENT CORNER BARS TO LAP AND MATCH HORIZONTAL BARS AT ALL CORNERS AND INTERSECTIONS TO MAINTAIN BOND BEAM CONTINUITY. USE STANDARD 9-GAGE LADDER TYPE JOINT REINFORCING (DUR-O-WALL) OR EQUIVALENT AT 16" O.C. MAX.
LAPS VERT & HORIZ: 32" (STAGGER LAPS MIN. 1-LAP LENGTH)

JOINT REINF . . . . . 8 INCHES

SHOP DRAWINGS:

SHOP DRAWINGS SHALL BE SUBMITTED FOR ALL STRUCTURAL ITEMS IN ADDITION TO THOSE REQUIRED BY ARCHITECTURAL SPECIFICATIONS.

ANY CHANGES OR SUBSTITUTIONS FROM THE CONTRACT DOCUMENTS SHALL BE CLOUDED ON SUBMITTALS FOR APPROVAL. CHANGES NOT CLOUDED ON SUBMITTALS ARE NOT CONSIDERED APPROVED UNLESS SPECIFICALLY NOTED ON ITEM.

SHOP DRAWINGS DO NOT REPLACE THE CONTRACT DOCUMENTS. ERRORS, OMISSIONS OR CHANGES NOT CLOUDED FOR SPECIFIC REVIEW DO NOT CONSTITUTE A CHANGE TO THE CONTRACT DOCUMENTS, REVIEW IS INTENDED ONLY AS AN AID TO THE CONTRACTOR AND DOES NOT RELIEVE THE CONTRACTORS OBLIGATION TO FOLLOW THE CONTRACT

STRUCTURAL STEEL:

W SHAPES U.N.O. . . . . .ASTM A992 (Fy = 50 KSI)
PLATE 1/2" OR GREATER U.N.O. . . . . .ASTM A572 (Fy = 50 KSI)
PLATE LESS THAN 1/2" U.N.O. . . . . .ASTM A36 (Fy = 36 KSI)
FABRICATED AND ROLLED SHAPES U.N.O. . . . . .ASTM A36 (Fy = 36 KSI)
PIPE . . . . .ASTM A501 (Fy = 36 KSI) OR A53 GRADE B; TUBE . . ASTM A500 (Fy = 46 KSI)
DETAILING, FABRICATION AND CONSTRUCTION PER LATEST AISC MANUAL.
UNLESS NOTED OTHERWISE ALL STEEL TO RECEIVE ONE COAT OF SHOP PRIMER.
OMIT PRIMER AT AREAS TO BE FIELD WELDED OR EMBEDDED.
BOLTS TO BE ASTM A307 U.N.O. HIGH STRENGTH BOLTS TO BE ASTM A325-N.
WELDED ANCHORS AND SHEAR CONNECTIONS SHALL BE ICC APPROVED.

HEADED STUD ANCHORS (HSA) TO BE "NELSON STUD" PER ICC NO. ER-2614 OR APPROVED EQUAL WITH ICC CODE APPROVAL.

WELDING:

PER LATEST AWS STANDARDS BY WELDERS CERTIFIED IN THE TYPE OF WELD REQUIRED. USE E70 LOW HYDROGEN RODS UNLESS NOTED OTHERWISE. ALL BUTT WELDED SPLICES GREATER THAN 5/16" SHALL BE TESTED BY AN INDEPENDENT TESTING LAB. TO ASSURE FULL MATERIAL STRENGTH. FAB SHOPS TO HAVE AWS APPROVED INSPECTION PROGRAM.

STEEL SHOT PINS BY HILTI:

U.N.O. PIN TO BE "X-U", .157"ø KNURLED PER ESR-2269 BY HILTI
U.N.O. IN DETAILS, PENETRATION INTO CONCRETE: 1". MIN. WITH 1 1/4" PIN.

WOOD:

SOLID SAWN LUMBER:

ALL FRAMING LUMBER SHALL BEAR THE STAMP OF A GRADING AGENCY APPROVED BY THE AMERICAN LUMBER STANDARDS COMMITTEE AND SHALL BE OF THE FOLLOWING MINIMUM GRADES UNLESS NOTED OTHERWISE ON PLANS:
2x & 3x STUDS & PLATE . . . . . HEM FIR NO. 2
JOIST AND 2x6 FRAMING . . . . . HEM FIR NO. 2
2x8 & LARGER FRAMING . . . . . DF-L NO. 2
6x BEAMS & POSTS . . . . . (85% FOHC). . . . . DF-L NO. 1
2X4 MISC. FRAMING . . . . . HF STD
ALL FRAMING LUMBER SHALL HAVE A MAX. MOISTURE CONTENT OF 19% AT TIME OF INSTALLATION.
ALL PLATE ON SLAB ON GRADE OR EXPOSED TO WEATHER SHALL BE PRESSURE TREATED

PLYWOOD:

ALL PLYWOOD OR PERFORMANCE RATED PANELS ARE TO COMPLY WITH LEGACY REPORT NO. NER-108. ALL PLYWOOD SHALL BE CDX STRUCTURAL 2 OR BETTER AND SHALL BEAR THE STAMP OF AN APPROVED GRADING AGENCY. FOR JOISTED SYSTEMS LAY UP PLYWOOD WITH FACE GRAIN PERPENDICULAR TO SUPPORTS. FOR PANELIZED SYSTEMS, WHERE PLYWOOD IS LAID UP WITH FACE GRAIN PARALLEL TO SUPPORTS, USE 5-PLY.
APA RATED ORIENTED STRAND BOARD MAY BE SUBSTITUTED FOR PLYWOOD WITH FULL APPROVAL OF THE OWNER AND ROOFING MANUFACTURER. ALTERNATE PANELS MUST MEET OR EXCEED ALL SPECIFICATIONS OF THE SPECIFIED PLYWOOD,
UNLESS NOTED OTHERWISE ON PLANS THE FOLLOWING MINIMUMS APPLY:

USE	THICKNESS	SPAN RATING	EDGE NAILING	INTERMEDIATE NAILING
ROOF	1/2"	32/16	8d (.131"ø) @ 6" O.C.	8d @ 12" O.C.

PREFABRICATED I-JOIST & MANUFACTURED MEMBERS:

BY TRUS-JOIST (iLEVEL) OR TO HAVE EQUIVALENT SIZE & STRUCTURAL PROPERTIES.
NO NOTCHING OR HOLES ARE ALLOWED EXCEPT AS APPROVED BY MANUFACTURER.
LSL = LAMINATED STRAND LUMBER AKA "TIMBERSTRAND".
LVL = LAMINATED VENEER LUMBER AKA "MICRO-LAM".
PSL = PARALLEL STRAND LUMBER AKA "PARALLAM".
SUBMIT KEY PLANS WITH MATERIAL AND HANGER LISTS FOR APPROVAL.

GENERAL:

APPLY UNLESS NOTED OTHERWISE ON PLANS OR DETAILS. DO NOT NOTCH OR DRILL BEAMS, JOIST OR STUDS WITHOUT WRITTEN APPROVAL OF THE ENGINEER THRU THE ARCHITECT.
PROVIDE 2" NOMINAL SOLID FULL DEPTH BLOCKING BETWEEN JOIST OVER SUPPORTS.
DOUBLE UP STUDS AT JAMBS AND UNDER DOUBLE JOIST, BEAMS OR HEADERS. ALTERNATE STUDS SHALL HAVE H2.5 TOP AND BOTTOM TO PLATE UNLESS PLYWOOD SHEATHING PROVIDES CONNECTION. PROVIDE 2X SOLID FIRE BLOCKING AT 8' O.C. MAX. AND AT CEILING LINES.
ALL CONNECTIONS NOT NOTED SHALL BE IN ACCORDANCE WITH IBC CONNECTOR TABLES.
WOOD CONNECTORS ARE SPECIFIED AS SIMPSON-STRONG-TIE. ALTERNATES MUST HAVE EQUIVALENT ICBO APPROVED VALUES.

GENERAL CONSTRUCTION NOTES:

IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO PROVIDE ALL TEMPORARY SHORING AS REQUIRED TO ACHIEVE THE COMPLETED STRUCTURE, INCLUDING ALL PROCEDURES, DESIGNS, MEANS AND SEQUENCES. JOB-SITE OBSERVATION OR SPECIAL INSPECTION BY THE ENGINEER OR ARCHITECT IS NOT INTENDED AS APPROVAL OF ANY CONSTRUCTION METHODS, SHORING SYSTEMS OR TEMPORARY BRACING SCHEMES.

COST OF ADDITIONAL FIELD OR OFFICE WORK REQUIRED BY THE ENGINEER OR ARCHITECT TO ACCOMMODATE ERRORS, OMISSIONS OR ALTERNATES REQUESTED BY THE CONTRACTOR SHALL BE BORNE BY THE CONTRACTOR. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO COORDINATE ALL DETAILS OF ANY ALTERNATES.

ANY ENGINEERING DESIGN PROVIDED BY OTHERS AND SUBMITTED FOR REVIEW SHALL BEAR THE SEAL OF A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF THIS PROJECT.

NOTES AND DETAILS ON DRAWINGS TAKE PRECEDENCE OVER GSN AND TYPICAL DETAILS. TYPICAL DETAILS MAY NOT NECESSARILY BE FLAGGED ON PLANS.

VERIFY ALL DIMENSIONS, OPENINGS, ARCHITECTURAL FEATURES AND NON-STRUCTURAL ITEMS WITH ARCHITECTURAL DRAWINGS. RESOLVE ALL DISCREPANCIES THRU THE ARCHITECT. STRUCTURAL PLANS MAY NOT SHOW ITEMS SUCH AS INTERIOR FRAMING, CEILINGS AND SOFFITS, SITE STRUCTURES AND FENCES, SIDEWALKS AND CURBS, ARCHITECTURAL AND NON-STRUCTURAL FEATURES, WORK DESIGNED AND SUBMITTED BY OTHERS AND WORK GENERALLY NOT CONSIDERED STRUCTURAL IN NATURE. SEE APPROPRIATE PLANS FOR ADDITIONAL INFORMATION.

SPECIAL INSPECTION:

PER IBC CHAPTER 17, SPECIAL INSPECTION IS REQUIRED FOR THE FOLLOWING AREAS OF WORK: THESE ARE IN ADDITION TO INSPECTIONS REQUIRED AND CONDUCTED BY THE DEPARTMENT OF BUILDING AND SAFETY AND DOES NOT RELIEVE THE CONTRACTOR FROM CALLING FOR INSPECTION PER IBC SECTION 109 AND LOCAL REQUIREMENTS.

EPOXY, ADHESIVE & EXPANSION ANCHORS

VERIFICATION AND INSPECTION TASK	CONTINUOUS DURING TASK LISTED	PERIODICALLY DURING TASK LISTED
1. INSPECTION OF HOLE DIAMETER AND DEPTH	–	X
2. INSPECTION OF HOLE CLEANING WITH COMPRESSED AIR AND WIRE BRUSH.	–	X
3. PLACEMENT OF EPOXY AND ANCHOR USING SPECIFIED PRODUCT AND MANUFACTURERS RECOMMENDED INSTALLATION PROCEDURES.	X	–
4. VERIFY PROPER TORQUE APPLIED TO EXPANSION ANSIONS.	X	–

LEVEL B SPECIAL INSPECTION OF MASONRY

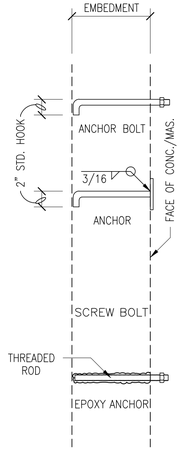
INSPECTION TASK	FREQUENCY OF INSPECTION: CONTINUOUS DURING TASK LISTED	FREQUENCY OF INSPECTION: PERIODICALLY DURING TASK LISTED	REFERENCE FOR CRITERIA: ACI 530/ASCE 5/TMS 402	REFERENCE FOR CRITERIA: ACI 530.1/ASCE 6/TMS 602
1. VERIFY COMPLIANCE WITH APPROVED SUBMITTALS:		X		ART. 1.5
2. AS MASONRY CONSTRUCTION BEGINS, THE FOLLOWING SHALL BE VERIFIED TO ENSURE COMPLIANCE:				
a. PROPORTIONS OF SITE-PREPARED MORTAR.		X	–	ART. 2.1& 2.6A
b. CONSTRUCTION OF MORTAR JOINTS.		X	–	ART. 3.3B
c. LOCATION OF REINFORCEMENT, CONNECTORS PRESTRESSING TENDONS AND ANCHORAGES.		X	–	ART. 3.4, 3.6A
3. PRIOR TO GROUTING, THE FOLLOWING SHALL BE VERIFIED TO ENSURE COMPLIANCE:				
a. GROUT SPACE IS CLEAN.		X	–	ART. 3.2D, 3.2F
b. GRADE, TYPE& SIZE OF REINFORCEMENT& ANCHOR BOLTS		X	SEC. 1.13	ART. 3.4
c. PLACEMENT OF REINFORCEMENT AND CONNECTORS AND PRESTRESSING TENDONS AND ANCHORAGES.		X	SEC. 1.13	ART. 3.4
d. PROPORTIONS OF SITE-PREPARED GROUT AND PRESTRESSING GROUT FOR BONDED TENDONS.		X	–	ART. 2.6B, 2.4G.1.b
e. CONSTRUCTION OF MORTAR JOINTS.		X	–	ART. 3.3B
4. VERIFY DURING CONSTRUCTION:				
a. SIZE AND LOCATION OF STRUCTURAL ELEMENTS.		X	–	ART. 3.3F
b. TYPE, SIZE AND LOCATION OF ANCHORS, INCLUDING OTHER DETAILS OF ANCHORAGE OF MASONRY TO STRUCTURAL MEMBERS, FRAMES OR OTHER CONSTRUCTION.		X	SEC. 1.16.4.3 1.17.1	–
c. WELDING OF REINFORCING BARS.	X	–	SEC. 2.1.7.7.2, 3.3.3.4(c)	–
d. PROTECTION OF MASONRY DURING COLD WEATHER (TEMPERATURE BELOW 40?) OR HOT WEATHER (TEMPERATURE ABOVE 90?).		X	–	ART. 1.8C, 1.8D
5. PREPARATION OF ANY REQUIRED GROUT SPECIMENS, MORTAR SPECIMENS AND/OR PRISMS SHALL BE OBSERVED.		X	–	ART. 1.4B

REQUIRED VERIFICATION AND INSPECTION OF STEEL CONSTRUCTION

VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD
1. MATERIAL VERIFICATION OF STRUCTURAL STEEL & COLD FORMED STEEL DECK:			
a. IDENTIFICATION MARKINGS TO CONFORM TO AISC 360 OR ASTM SPECIFIED IN THE APPROVED CONSTRUCTION DOCUMENTS.	–	X	AISC 360, M5.5 ASTM STD
b. MANUFACTURER'S CERTIFIED MILL TEST REPORTS.	–	X	–
2. MATERIAL VERIFICATION OF WELD FILLER MATERALS:			
a. IDENTIFICATION MARKINGS TO CONFORM TO AWS SPECIFICATION IN THE APPROVED CONSTRUCTION DOCUMENTS.	–	X	AISC 360, SECTION A3.5 AWS
b. MANUFACTURER'S CERTIFICATE OF COMPLIANCE REQUIRED.	–	X	–
3. INSPECTION OF WELDING:			
a. STRUCTURAL STEEL & COLD FORMED STEEL DECK:			
1) COMPLETE AND PARTIAL PENETRATION GROOVE WELDS.	X	–	AWS D1.1
2) MULTIPASS FILLET WELDS.	X	–	
3) SINGLE-PASS FILLET WELDS > 5/16".	X	–	
4) SINGLE-PASS FILLET WELDS ≤ 5/16".	–	X	
5) PLUG & SLOT WELDS.	X		
6) FLOOR AND ROOF DECK WELDS.	–	X	AWS D1.3
b. REINFORCING STEEL:	–	–	AWS D1.4 ACI 318: 3.5.2
1) VERIFICATION OF WELDABILITY OF REINFORCING STEEL OTHER THAN ASTM A 706.	–	X	

REQUIRED VERIFICATION AND INSPECTION OF SOILS BY GEOTECHNICAL OR EOR

VERIFICATION AND INSPECTION TASK	CONTINUOUS DURING TASK LISTED	PERIODICALLY DURING TASK LISTED
1. VERIFY MATERIALS BELOW FOOTINGS ARE ADEQUATE TO ACHIEVE THE DESIGN BEARING CAPACITY.	–	X
2. VERIFY EXCAVATIONS ARE EXTENDED TO PROPER DOPTH AND HAVE REACHED PROPER MATERIAL.	–	X
3. PERFORM CLASSIFICATION AND TESTING OF CONTROLLED FILL MATERIALS.	–	X
4. VERIFY USE OF PROPER MATERIALS, DENSITIES AND LIFT THICKNESS DURING PLACEMENT AND COMPACTION OF CONTROLLED FILL.	X	–
5. PRIOR TO PLACEMENT OF CONTROLLED FILL, OBSERVE SUBGRADE AND VERIFY THAT SITE HAS BEEN PREPARED PROPERLY.	–	X



BOLT SCHEDULE

BOLT DIAMETER	MINIMUM EMBEDMENT LENGTH: ANCHOR BOLT & EPOXY ANCHOR VERT.	ANCHOR BOLT & EPOXY ANCHOR HORIZ.	SCREW BOLT VERT.	SCREW BOLT HORIZ.
1/2"	6"	4"	6"	3"
5/8"	6"	4"	6"	3"
3/4"	7"	5"	7"	4 1/2"
7/8"	8"	6"	8"	–
1"	9"	7"	–	–

SCREW BOLTS OR EPOXY BOLTS MAY BE USED IN LIEU OF STANDARD ANCHOR BOLTS IN SHEAR TYPE NON VIBIRITORY CONNECTIONS. USE ANCHORS IN DETAILS AS SPEC'D.
USE ONLY EPOXY ANCHORS AS ALTERNATE IN TENSION TYPE OR VIBIRITORY CONNECTIONS AND SUBJECT TO APPROVAL.
USE ALL ANCHORS PER MANUFACTURES RECOMMENDATIONS.
EXP BOLTS NOT ALLOWED IN 6" STEM WALLS.

APPROVED EPOXY

TYPE	NAME	MFR.	IAPMO No.
(CONCRETE) EPOXY	SET-3G	SIMPSON STRONG-TIE	ESR-4057

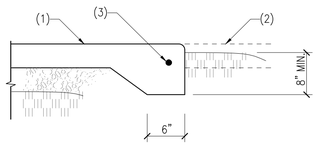
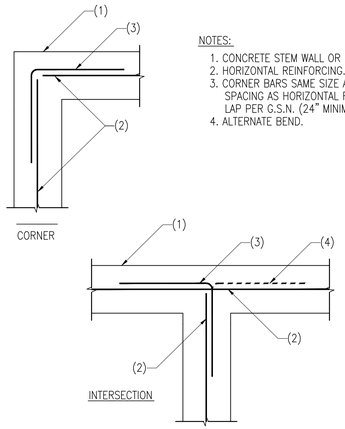
GEN STRUCT NOTES

S1

NOTES:
1. CONCRETE SLAB ON GRADE; TOOL EDGE.
2. FINISHED GRADE OR CONCRETE SLAB AS OCCURS.
3. (1) #4 CONTINUOUS.

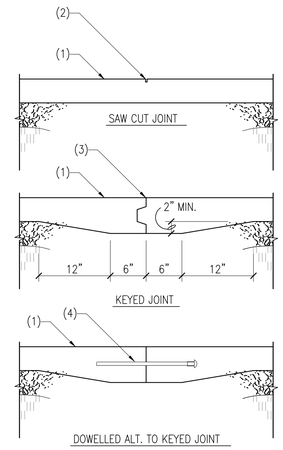


10 SLAB TURNDOWN
N.T.S.



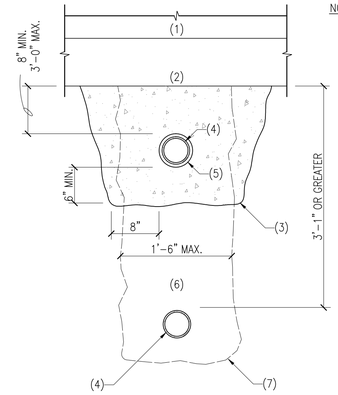
NOTES:
1. CONCRETE STEM WALL OR FOOTING.
2. HORIZONTAL REINFORCING.
3. CORNER BARS SAME SIZE AND SPACING AS HORIZONTAL REINFORCING. LAP PER G.S.N. (24" MINIMUM).
4. ALTERNATE BEND.

07 CORNER REINFORCING IN FOOTING, STEM OR WALL
N.T.S.



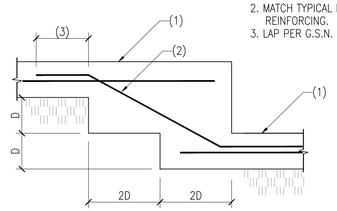
NOTES:
1. CONCRETE SLAB ON GRADE.
2. SAW CUT JOINT. 1/8" WIDE, 1" MIN. TO 1 1/2" MAX. DEEP. WORK MUST BE COMPLETED WITHIN 24-HOURS OF SLAB PLACEMENT, BUT NOT SO SOON AS TO CAUSE SPALLING.
3. CONTINUOUS KEYED JOINT CUT FROM 2X3. KEYED JOINTS NEED ONLY OCCUR AT EDGES LEFT EXPOSED DURING SLAB PLACEMENT.
4. 3/4" X 16" LONG SMOOTH DOWEL @ 18" O.C. CENTERED ON JOINT. GREASE OR MASTIC WRAP ONE END WITH MASTIC CAP.

04 CONTROL JOINTS IN CONCRETE SLAB ON GRADE
N.T.S.



NOTES:
1. STEM WALL.
2. CONCRETE FOOTING PER SCHEDULE.
3. CONCRETE FILL AROUND PIPE. PLACE PRIOR TO FOOTING FOR FULL SUPPORT OF FOOTING.
4. PIPE OR CONDUIT.
5. SLEEVE FULL LENGTH THRU CONCRETE FILL. PROVIDE 1/2" MINIMUM CLEAR AROUND PIPE.
6. BACK FILL AND COMPACT TRENCH PER SOILS REPORT.
7. BOTTOM OF TRENCH.

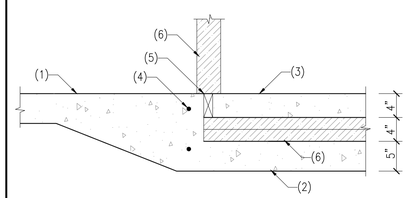
01 PIPE BELOW WALL FOOTING
N.T.S.



NOTES:
1. TOP OF WALL FOOTING.
2. MATCH TYPICAL HORIZONTAL REINFORCING.
3. LAP PER G.S.N. (24" MINIMUM).

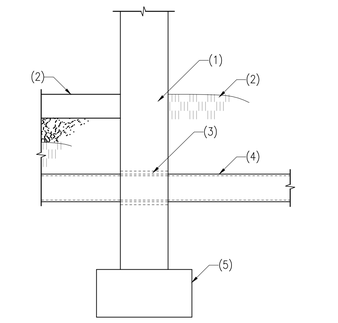
NOTE:
D=2'-0" MAXIMUM.

08 STEP IN CONCRETE FOOTING
N.T.S.



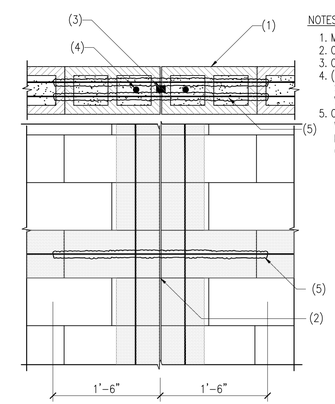
NOTES:
1. TYPICAL CONCRETE SLAB ON GRADE.
2. CONCRETE SUB-SLAB.
3. CONCRETE WEAR SLAB.
4. (2) #4 BARS AROUND PERIMETER.
5. 2x REDWOOD SLEEPER.
6. WALLS & INSULATION BY OTHERS.

05 INSULATED SLAB DETAIL
N.T.S.



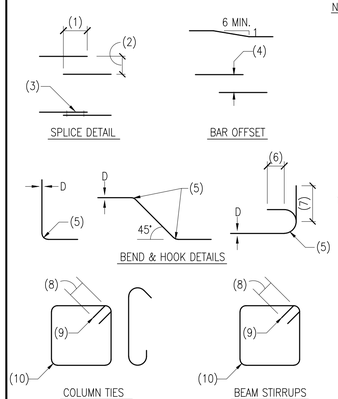
NOTES:
1. STEM WALL.
2. FINISHED GRADE OR CONCRETE SLAB AS OCCURS.
3. SLEEVE FULL LENGTH THRU STEM PROVIDE 1/2" MINIMUM CLEAR AROUND PIPE.
4. PIPE OR CONDUIT.
5. CONCRETE FOOTING PER SCHEDULE.

02 PIPE THRU STEM WALL
N.T.S.



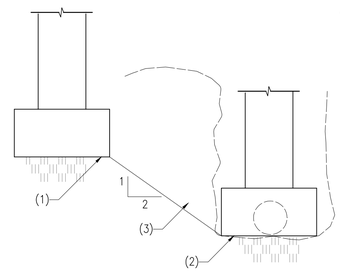
NOTES:
1. MASONRY WALL.
2. CONTROL JOINT.
3. CONTROL JOINT MATERIAL.
4. (1) VERTICAL BAR EA. SIDE IN SOLID GROUTED CELLS TO MATCH VERTICAL WALL REINFORCING PER G.S.N.
5. CONTINUOUS BOND BEAM BARS. WRAP BARS WITH MASTIC FOR BOND BREAK. DO NOT LAP WITHIN 3'-0" OF CONTROL JOINT.

09 CONTROL JOINT IN CMU WALL
N.T.S.



NOTES:
1. LAP-SEE G.S.N.
2. MAXIMUM 1/6 LAP BUT NOT MORE THAN 6".
3. WIRE TIES.
4. 1d (1" MINIMUM).
5. RADIUS=3d FOR BARS NOT OVER #8; 4d FOR #9, #10 AND #11 BARS; 5d FOR #14 AND #18 BARS. 5d FOR ALL GRADE 40 BARS WITH 180 DEGREE HOOK.
6. 4d (4" MINIMUM).
7. 12d (90 DEGREE HOOK).
8. 6d (4" MINIMUM).
9. 135 DEGREE BEND.
10. BEND AROUND 1 1/2" PIN FOR #3 BARS. BEND AROUND 2" PIN FOR #4 BARS. BEND AROUND 2 1/2" PIN FOR #5 BARS.

06 TYPICAL CONCRETE REINFORCING BAR DETAILS
N.T.S.



NOTES:
1. BOTTOM OF CONCRETE FOOTING.
2. BOTTOM OF ADJACENT FOOTING OR TRENCH.
3. MAXIMUM SLOPE 45° BETWEEN ADJACENT FOOTINGS OR EXCAVATION FOR TRENCH.
4. WHERE SOILS REPORT RECOMMENDS DIFFERENT, USE MOST CONSERVATIVE CRITERIA.

03 MAX. SLOPE BETWEEN ADJACENT FOOTING AND/OR TRENCH
N.T.S.

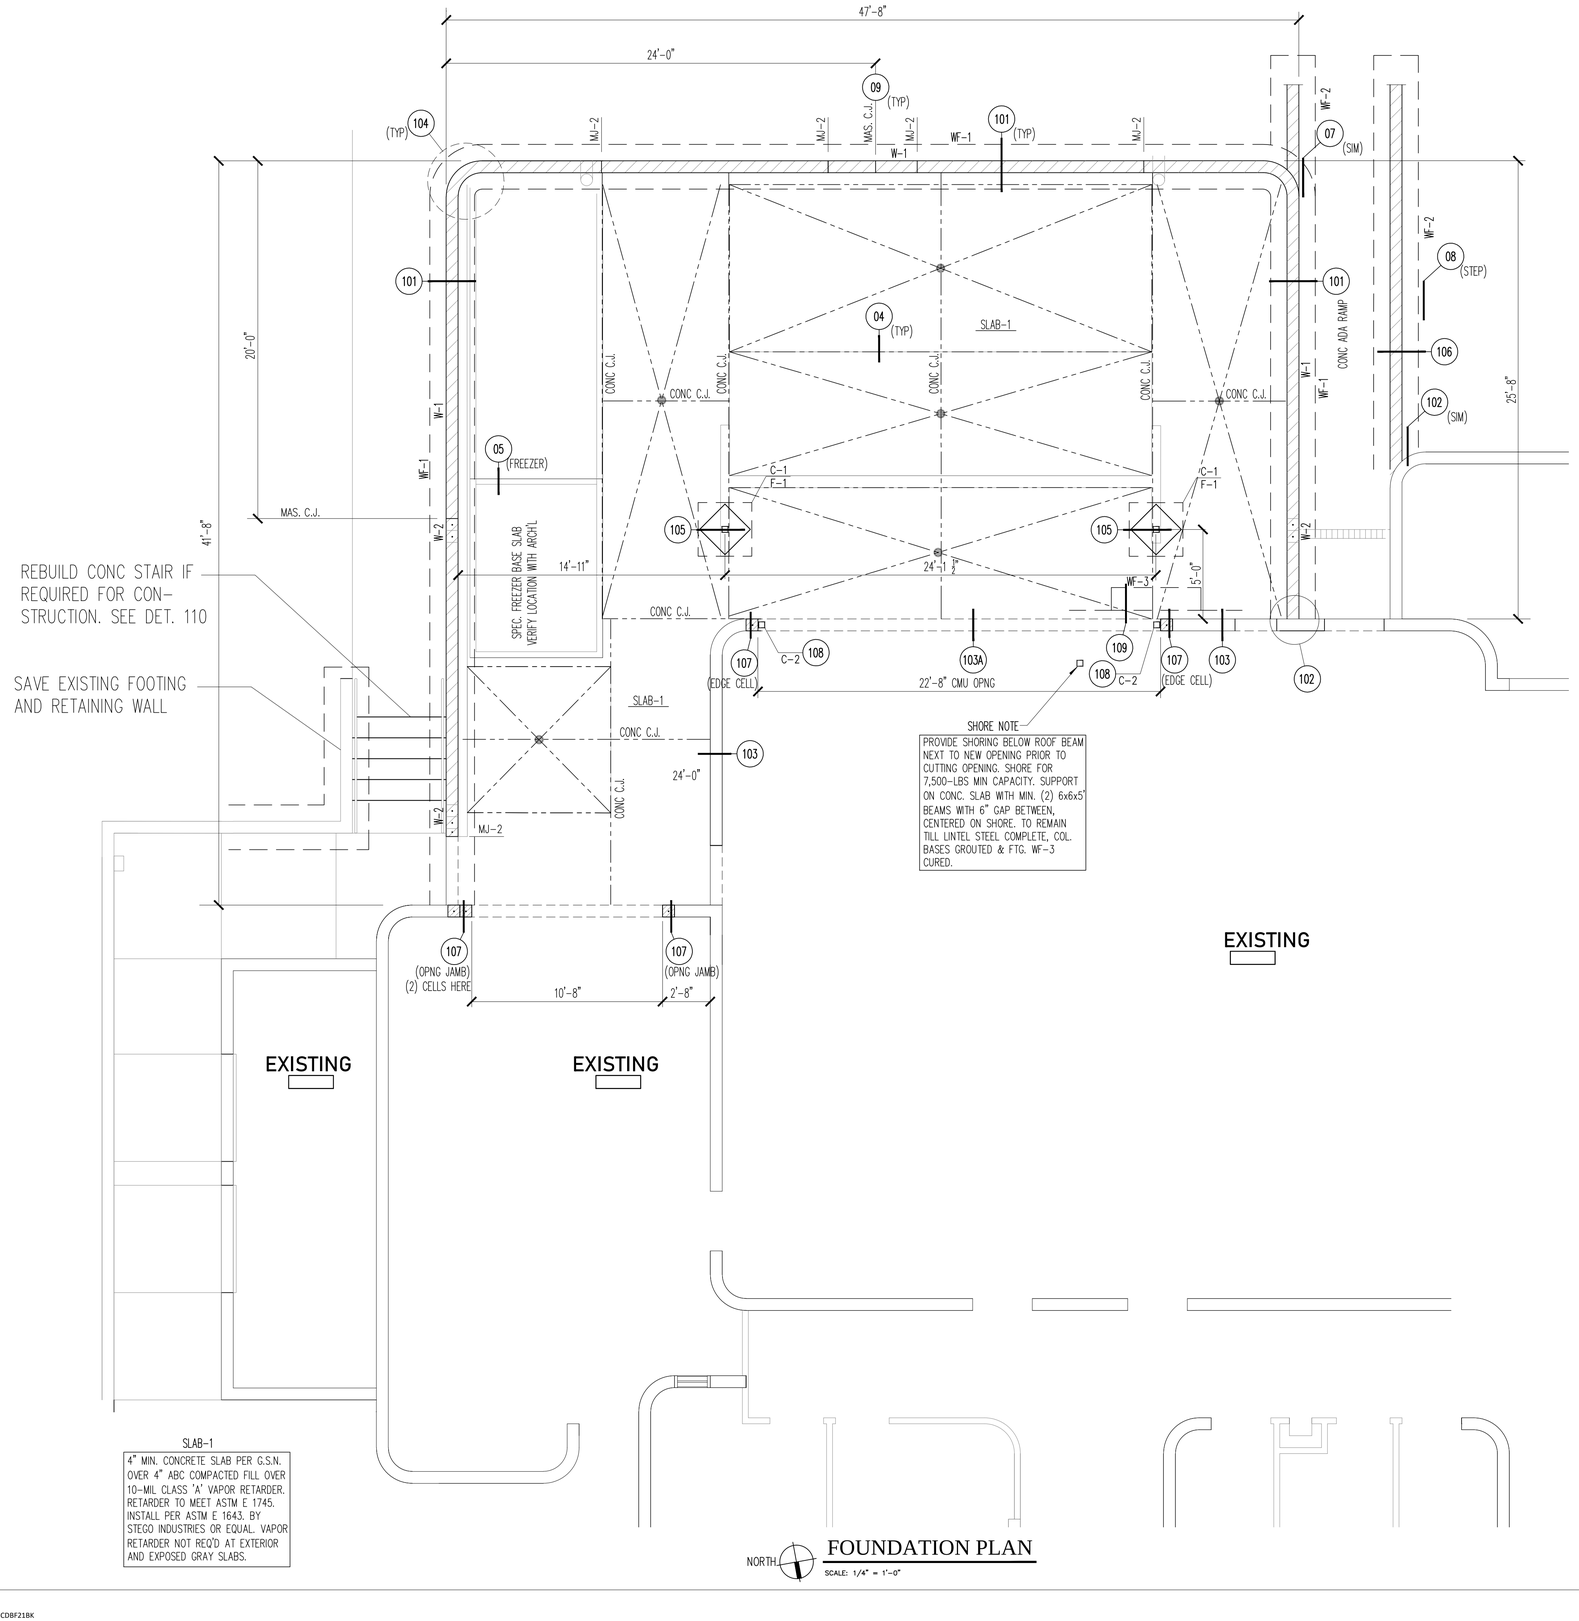
STD DETAILS

S2



FOUNDATION PLAN

SCALE: 1/4" = 1'-0"

FOUNDATION NOTES:

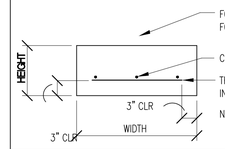
1. VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS.
2. SOME DETAILS ARE TYPICAL TO THE PROJECT AND MAY NOT NECESSARILY BE FOUND ON THIS PLAN.
3. WF1, WF2, ETC.–INDICATES CONTINUOUS WALL FOOTING PER SCHEDULE. F1, F2, ETC.–INDICATES ISOLATED FOOTING PER SCHEDULE. C1, C2, ETC.–AS SHOWN ON PLAN INDICATES STEEL COLUMN PER SCHEDULE.
4. PLACE CONCRETE CONTROL JOINTS IN ALL SLABS ON GRADE. SEE G.S.N. AND TYPICAL DETAILS FOR OPTIONS.
5. SEE ARCHITECTURAL DRAWINGS FOR SIZE AND LOCATION OF DEPRESSED AND/OR RAISED SLABS AND ALL SIDEWALK WORK.
6. VERIFY EXACT SIZE AND LOCATION OF OPENINGS IN WALLS WITH ARCHITECTURAL DRAWINGS.
7. BACK FILL PLUMBING EXCAVATIONS WITH EXCAVATABLE AIR ENTRAINED CONCRETE SLURRY MIX. SOIL BACKFILLING ONLY ALLOWED WHEN COMPACTION IS CERTIFIED BY A GEOTECHNICAL ENGINEER.

COLUMN (C) SCHEDULE

NOTE: FOR ANCHOR BOLT PATTERN, SEE COLUMN FOOTING DETAIL.

MARK	SIZE	BASE CONNECTION	REMARKS
C-1	HSS 4"x4"x1/4"	5/8"x10"x10" BASE PLATE W/ (4) 3/4"ø ANCHOR BOLTS	SEE DET. 105
C-2	HSS 4"x4"x1/4"	5/8"x7"x10" BASE PLATE W/ (2) 3/4"ø EPOXY ANCHORS	SEE DET. 108

CONTINUOUS FOOTING (WF) SCHEDULE



MARK	DIMENSIONS		FOOTING REINFORCING	REMARKS
	HEIGHT	WIDTH		
WF-1	12"	2'-6"	(3) #5 CONT.	–
WF-2	12"	2'-6"	(3) #5 CONT.	–

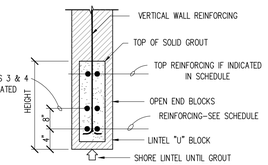
ROOF FRAMING PLAN

SCALE: 1/4" = 1'-0"

ROOF FRAMING NOTES:

1. VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS. ROOF ELEVATIONS, WHERE SHOWN, ARE TO BE VERIFIED BY THE ARCHITECT.
2. SOME DETAILS ARE TYPICAL TO THE PROJECT AND MAY NOT NECESSARILY BE FOUND ON THIS PLAN.
3. ML-1, ML-2, ETC.- INDICATES MASONRY LINTEL PER SCHEDULE
   L-1, L-2, ETC.- INDICATES WOOD LEDGER PER SCHEDULE.
4. FOR CLARITY, DETAILS MAY SHOW ONLY ONE SIDE OF FRAMING CONDITION.
5. FOR CLARITY, ALL ROOF OPENINGS MAY NOT BE SHOWN ON ROOF FRAMING PLAN. FOR EXACT SIZE, NUMBER AND LOCATION OF OPENINGS, SEE ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL DRAWINGS. FOR FRAMING AT OPENINGS, SEE TYPICAL DETAILS.
6. CU PLATFORM TO BEAR ON JOIST OR 2x6 BLOCKING WITH "HF26N" HGRS.
7. SIMPSON "MSTC66" STRAP TIE WITH .148"ø x3" NAILS.
8. ADD (1) EXTRA A.B. TO LEDGER SUPPORTING RTU.
9. ADD (1) EXTRA BOLT TO BM/LEDGER @ FIRST SUPPORT.
10. FIELD VERIFY EXISTING ROOF HT. TO MAKE SURE FLOW IS CONTINUOUS ACROSS EXISTING TO NEW ROOF TRANSITION CONSIDERING ROOFING APPLICATION. ADJUST ALL ELEVATIONS EQUALLY IF REQUIRED.
11. ATTACH KITCHEN HOOD RODS TO BEAM, JOIST OR 2x6 BLOCKING IN "U24" HANGERS. SEE KITCHEN PLANS FOR LOCATIONS.

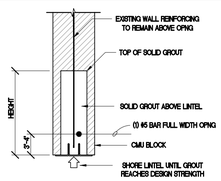
MASONRY LINTEL (ML) SCHEDULE



NOTE:
1. VERTICAL REINFORCING TO MATCH AND LAP WALL REINFORCING PER G.S.N.
2. EXTEND GROUT, OPEN END MASONRY UNITS AND REINFORCING 2'-0" PAST EACH JAMB. USE CORNER BARS WHERE 2'-0" CANNOT BE ACHIEVED.

MARK	HEIGHT	REINFORCING	REMARKS
ML-1	24"	(2) #5 TOP (2) #5 BOTTOM	-
ML-2	24"	(2) #5 TOP (2) #5 BOTTOM	CANTILEVER LINTEL WITH 4'-0" MIN. BACK SPAN

MASONRY STEEL LINTEL (MSL) SCHEDULE



MARK	HEIGHT	STEEL LINTEL	REMARKS
MSL-1	16"	PSB-16	BY POWERS

LEDGER (L) SCHEDULE

WOOD- 1. ALL LEDGERS SHALL HAVE MINIMUM OF (2) ANCHOR BOLTS PER LEDGER.

2. ANCHOR BOLTS SHALL BE LOCATED NOT LESS THAN 6" NOR MORE THAN 12" FROM END OF LEDGER OR • LEDGER SPLICE U.O.N. IN DETAILS.

MARK	SIZE	CONNECTION TO WALL
L1	3.5"x9.5" LSL	3/4"ø A.B. • 24" O.C. MAX. BTWN JOIST ADD BOLT EA. SIDE SPLICE
L2	3x8	3/4"ø A.B. • 32" O.C. MAX.

ROOF DETAILS

S6

MAKE–UP AIR UNIT (MUA) ON ROOF WITH FULL SIZE DUCT THROUGH ROOF.

NEW 4 TON RTU W/ FULL SIZE S&R DUCTS THROUGH ROOF

CONDENSING UNITS FOR WALK–IN COOLER/FREEZER BY OTHERS. SHOWN FOR REFERENCE ONLY.

1 1/2" COOLER/CONDNESATE DRAIN DOWN TO FLOOR SINK.

FOUR 24x24 LAY–IN RETURN AIR GRILLS IN CEILING.

NEW 4 TON RTU W/ FULL SIZE S&R DUCTS THROUGH ROOF

VENTILATION CALCULATION

IMC 403 –– ASHRAE 62.1

Vbz = Rp(403.3) x Pz + Ra(403.3) x Az

5.4 CFM = 5 x .32 OCC + .06 x 64 SF (OFFICE)

53.0 CFM = 5 x OCC + .12 x 444 SF (STORAGE)

58.4 CFM MIN. OSA INCREASED TO 500 CFM FOR MUA

967 CFM = 0.7 x 1382 SF (KITCHEN EXHAUST)

HVAC SYSTEM BALANCE

UNIT	+CFM	–CFM
2 TON	100	0
4 TON	200	0
4 TON	200	0
MUA–1	3270	0
EF1	0	60
KEF–1	0	1817
KEF–2	0	1817
KEF–3	0	1050
TOTAL	+3770*	–4684

+3770 TOTAL OSA/MUA
–4684 TOTAL EXHAUST
– 914 CFM NEGATIVE AT KITCHEN

*DINING A/C TO CONTRIBUTE 974 CFM TO KITCHEN FOR TOTAL BALANCE

PROVIDE T–STAT W/ LOCKING COVER @ 54" AFF. (TYPICAL)

NEW 2 TON RTU WITH S&R DUCTS THROUGH ROOF.

OFFICE & JAN ROOM DOORS SHALL BE UNDER–CUT 1"

3/4" CONDENSATE DRAIN SHALL DISCHARGE DOWNWARD INTO SS AT 1" ABOVE RIM.

MECHANICAL CONTRACTOR SHALL VERIFY ELECTRICAL REQUIREMENTS WITH THE ELECTRICAL DRAWINGS PRIOR TO ORDERING MECHANICAL EQUIPMENT.

MECHANICAL NOTES

GENERAL
1 THE MECHANICAL CONTRACTOR SHALL COORDINATE T–STAT (SENSOR) LOCATIONS WITH THE ARCHITECT & OWNER.
2 PROVIDE ALL NECESSARY MATERIALS, EQUIPMENT, FEES, PERMITS ETC. NEEDED FOR A COMPLETE INSTALLATION.
3 THIS CONTRACT SHALL BE COMPLETED IN ACCORDANCE WITH 2018 IMC AND ALL OTHER APPLICABLE CODES, ORDINANCES AND AMENDMENTS BY WHICH IT HAS BEEN PERMITTED.
4 COORDINATE ALL MECHANICAL WORK WITH ARCHITECT AND OTHER TRADES PRIOR TO ANY CONSTRUCTION.
5 TERMINATE EXHAUST DUCTS AND PLUMBING VENTS MINIMUM 10 FEET HORIZONTALLY FROM OR 3 FEET ABOVE ALL AIR INTAKES. COORDINATE WITH PLUMBING CONTRACTOR.
6 EQUIPMENT AND APPLIANCES SHALL BE INSTALLED AS REQUIRED BY THE TERMS OF THEIR APPROVAL, IN ACCORDANCE WITH THE CONDITIONS OF THE LISTING, THE MANUFACTURER'S INSTALLATION INSTRUCTION AND THE IMC. MANUFACTURER'S INSTALLATION INSTRUCTIONS SHALL BE AVAILABLE ON THE JOB SITE AT THE TIME OF INSPECTION.

EQUIPMENT
1 LOCATE ALL MECHANICAL EQUIPMENT IN COMPLIANCE WITH THE I.M.C.
2 ALL NEW HVAC EQUIPMENT SHALL BE U.L., E.T.L., AND /OR AGA LISTED.
3 PROVIDE FARR 30–30 DISPOSABLE FILTERS, FRAMES, HARDWARE AND ACCESSORIES FOR USE DURING CONSTRUCTION. PROVIDE NEW DISPOSABLE FILTERS PRIOR TO BALANCING THE SYSTEM.
4 MAG STARTERS ARE PROVIDED BY THE MECHANICAL CONTRACTOR AND INSTALLED BY THE ELECTRICAL CONTRACTOR AS REQUIRED.
5 MECHANICAL CONTRACTOR TO VERIFY AND COORDINATE AVAILABLE VOLTAGE WITH ELECTRICAL CONTRACTOR PRIOR TO ORDERING EQUIPMENT.
6 PROVIDE MINIMUM 30" CLEARANCE OR MANUFACTURER'S REQUIREMENT WHICHEVER IS GREATER ON THE SERVICE SIDE OF MECHANICAL EQUIPMENT.

DUCTWORK
1 THE MECHANICAL CONTRACTOR SHALL COORDINATE SPACE AVAILABILITY FOR MECHANICAL SYSTEMS WITH FRAMERS, TRUSS MANUFACTURERS, STRUCTURAL AND ELECTRICAL CONTRACTORS PRIOR TO ANY CONSTRUCTION TO AVOID RELOCATING DUCTWORK AT THE MECHANICAL CONTRACTOR'S EXPENSE.
2 PROVIDE MANUAL DAMPER AT EACH SUPPLY REGISTER AND CEILING DIFFUSER. PROVIDE MANUAL SPIN–IN DAMPER AT EACH BRANCH CONNECTION FOR DIFFUSERS IN LAY–IN CEILINGS AND OPPOSED BLADE DAMPER IN HARD LID MOUNTED DIFFUSERS.
3 BRANCH DUCTS SHALL BE RIGID ROUND. THE FINAL CONNECTION TO THE DIFFUSER MAY BE MADE WITH FLEX DUCT. FLEX DUCT LENGTH SHALL NOT EXCEED 8'0".
4 USE GALVANIZED SHEET METAL FOR ALL NEW DUCTWORK. CONSTRUCT AND INSTALL IN ACCORDANCE WITH ASHRAE GUIDELINES, CHAPTER 6 OF THE 2018 IMC AND THE LATEST SMACNA STANDARDS FOR LOW PRESSURE DESIGN.
5 USE THERMAFLEX TYPE KM OR APPROVED EQUAL FLEX DUCT CONFORMING TO UL 181, NFPA 90A AND 90B.
6 MECHANICAL CONTRACTOR TO VERIFY THAT ALL DUCTWORK WILL FIT AS DESIGNED.
7 DUCTS SHALL BE OF SIZES SHOWN ON THE DRAWINGS UNLESS LOCATION OF STRUCTURAL MEMBERS PROHIBIT. THE AREA OF THE DUCT SHALL BE MAINTAINED IF A CHANGE IS NEEDED. THE DUCT SIZES SHOWN ARE CLEAR INSIDE INCLUDING ANY DUCT LINERS.
8 SUPPORT ALL NEW & EXISTING DUCTS WITH HANGERS TO THE STRUCTURE. PLACE SUPPORTS NOT OVER 8 FEET APART ALONG THE LENGTH OF THE DUCT. SHEET METAL SHALL BE:
UP TO 12" WIDTH 26 GAUGE STEEL
13" TO 30" WIDTH 24 GAUGE STEEL
31" TO 60" WIDTH 22 GAUGE STEEL
FLEX DUCT SHALL BE SUPPORTED BY 1 1/2" 26 GAUGE STEEL STRAP NOT MORE THAN FOUR FEET APART.
9 EXHAUST DUCTS SHALL BE 26 GAUGE GALVANIZED STEEL.
10 USE CLASS "0" OR CLASS "1" FOR ALL "FACTORY MADE" DUCT.
11 INSTALL RADIUS ELBOWS, TURNING VANES, EXTRACTORS AND SPLITTER DAMPERS IN DUCTWORK WHERE APPLICABLE.
12 ALL JOINTS, LONGITUDINAL AND TRANSVERSE SEAMS AND CONNECTIONS IN DUCTWORK, SHALL BE SECURELY FASTENED AND SEALED WITH WELDS, GASKETS, MASTICS, MASTIC+EMBEDDED–FABRIC SYSTEMS OR TAPES. TAPES AND MASTICS USED TO SEAL DUCTWORK SHALL BE LISTED AND LABELED IN ACCORDANCE WITH UL 181A AND SHALL BE MARKED 181A–P FOR PRESSURE–SENSITIVE TAPE. TAPES AND MASTICS USED TO SEAL FLEXIBLE AIR DUCT AND FLEXIBLE CONNECTORS SHALL COMPLY WITH UL 181B AND SHALL BE MARKED 181B–FX FOR PRESSURE–SENSITIVE TAPE OR 181M FOR MASTIC. DUCT CONNECTIONS TO FLANGES OF AIR DISTRIBUTION SYSTEM EQUIPMENT SHALL BE SEALED AND MECHANICALLY FASTENED. UNLISTED DUCT TAPE IS NOT PERMITTED AS A SEALANT ON ANY METAL DUCTS.

OUTLETS
1 THE MECHANICAL CONTRACTOR SHALL COORDINATE EXACT LOCATIONS OF ALL AIR DISTRIBUTION DEVICES WITH ALL TRADES PRIOR TO ANY CONSTRUCTION.
2 SQUARE DIFFUSERS (CD) SHALL BE PRICE TYPE "SCD" OR APPROVED EQUAL, NECK SIZE AS INDICATED.
3 RETURN AIR GRILLES SHALL BE PRICE TYPE "60/70" OR APPROVED EQUAL.

CONTROLS
1 THERMOSTATS SHALL BE 7–DAY PROGRAMMABLE SET WITH FAN ON CONTINUOUSLY – HONEYWELL #8000 OR EQUAL. CONTRACTOR AND OWNER/TENANT TO COORDINATE T–STAT/SENSOR LOCATIONS. SYSTEM IS INTENDED TO OPERATE CONTINUOUSLY TO MAINTAIN VENTILATION REQUIREMENTS DURING OCCUPANCY.
2 THE MECHANICAL CONTRACTOR SHALL VERIFY IF AN ENERGY MANAGEMENT SYSTEM EXISTS AND PROVIDE THE NECESSARY DEVICES TO INTER–CONNECT ALL NEW MECHANICAL UNITS PRIOR TO INSTALLATION.

DRAINS
1 EXTEND SCHEDULE 40 PVC CONDENSATE DRAIN AS SHOWN. MIN 1% SLOPE.
USE TYPE 'M' COPPER IN EXTERIOR AREAS.

INSULATION
1 PROVIDE 1/2" ACCOUSTIC INTERNAL LINER IN SUPPLY AND RETURN DUCTWORK FROM THE DUCT CONNECTION TO THE UNIT AND LINE THE FIRST 10 FEET FROM THE A/C UNIT.
2 ALL INSULATION, MATERIAL, COVERINGS, ADHESIVES, VAPOR–BARRIERS AND TAPES SHALL CONFORM TO NFPA '90A, FLAME SPREAD CLASSIFICATION NOT TO EXCEED 25 AND SMOKE DEVELOPMENT NOT TO EXCEED 50.
3 ALL SUPPLY AND RETURN AIR DUCTS AND PLENUMS SHALL BE INSULATED WITH A MINIMUM OF R6 INSULATION WHERE LOCATED IN UNCONDITIONED SPACES AND A MINIMUM OF R8 INSULATION WHERE LOCATED OUSTISDE THE BUILDING. WHERE LOCATED WITHIN A BUILDING ENVELOPE ASSEMBLY, THE DUCT OR PLENUM SHALL BE SEPARATED FROM THE BUILDING EXTERIOR OR UNCONDITIONED OR EXEMPT SPACES BY A MINIMUM OF R8 INSULATION. IECC C403.2.7.

TESTING
1 TEST AND BALANCE SYSTEM TO APPROXIMATE CFM INDICATED ON MECHANICAL FLOOR PLAN. MARK ALL FINAL DAMPER SETTINGS WITH A PAINT DOT. THE BALANCE SHALL BE PERFORMED BY AN INDEPENDENT NEBB OR AABC CERTIFIED BALANCE CONTRACTOR. SUBMIT REPORT TO MechNovation, Inc. AND THE MECHANICAL INSPECTOR PRIOR TO CERTIFICATE OF OCCUPANCY.

KITCHEN
1 PROVIDE AN ELECTRICAL INTERLOCK FOR THE FOLLOWING EQUIPMENT: THREE KEF AND MUA.
2 ANSUL SYSTEM PROVIDED AND INSTALLED BY KITCHEN CONTRACTOR.
3 KITCHEN HOOD AND EXHAUST DUCTWORK TO CONFORM TO IMC CHAPTER 5.
4 SLOPE ALL HORIZONTAL EXHAUST DUCTS AT 1/4" PER FOOT TOWARDS HOOD INTAKE.
5 PROVIDE CLEAN–OUT ACCESS PANELS AS SHOWN HAVING A FIRE RESISTIVE RATING EQUAL TO SHAFT ENCLOSURE.
6 EXTERNAL WELD ALL JOINTS & SEAMS OF ALL KITCHEN EXH.DUCTS. PROVIDE NECESSARY EQUIPMENT TO PROVIDE LIGHT OR SMOKE TEST WITNESSED BY CITY INSPECTOR. IMC 506.3.2.1 & 506.3.2.2.
7 FOR TYPE 1 HOOD DUCT GA. #16 MFG. STD. GA. STEEL OR #18 MFG STD. GA. STAINLESS.
8 MECH. CONTR. TO COORDINATE EXACT KITCHEN HOOD OPENINGS W/KITCHEN CONTR. PRIOR TO ANY CONSTRUCTION.
9 TYPE I EXHAUST HOODS SHALL AUTOMATICALLY ACTIVATE WHEN COOKING OPERATIONS OCCUR –– INTERLOCK WITH COOKING APPLIANCES, HEAT SENSOR OR OTHER APPROVED MEANS. SEE HOOD MANUFACTURER'S INFORMATION SHEETS.
10 TYPE I HOODS SHALL BE INSTALLED WITH A CLEARANCE TO COMBUSTIBLES OF NOT LESS THEN 18 INCHES INCLUDING BUT NOT LIMITED TO STRUCTURAL COMPONENTS, CEILING FINISHES, AND MAKE–UP AIR DUCTS. GREASE DUCT SHALL HAVE A MINIMUM CLEARANCE OF 18" TO ANY COMBUSTIBLE CONSTRUCTION. CLEARANCE TO NON–COMBUSTIBLE CONSTRUCTION OR (2) LAYERS OF 5/8" TYPE X GYPSUM BOARD ATTACHED TO METAL STUDS SHALL BE MINIMUM THREE INCHES. IMC 506.3.6
11 EXHAUST HOOD PERFORMANCE TEST: A PERFORMANCE TEST SHALL BE CONDUCTED UPON COMPLETION AND BEFORE FINAL APPORVAL OF THE INSTALLATION OF VENTILATION SYSTEMS SERVING COMMERCIAL COOKING APPLIANCES. THE TEST SHALL VERIFY THE RATE OF EXHAUST AND MAKEUP AIR REQUIRED TO MEET THE U.L. LISTED VOLUMES AND PROPER OPERATION SPECIFIED BY THE HOOD MANUFACTURER. THE PERMIT HOLDER SHALL FURNISH THE NECESSARY TEST EQUIPMENT AND DEVICES REQUIRED TO PERFORM THE TESTS.
12 COMMERCIAL KITCHEN HOODS SHALL BE LISTED AND LABELED IN ACCORDANCE WTIH UP710.
13 EXHAUST FANS TO BE OF NON–SPARKING CONSTRUCTION AND SHALL HAVE UL 762 LISTING FOR RESTAURANT EXHAUST APPLICTATIONS. IMC 506.5.1
14 IF A BUILDING FIRE ALARM SYSTEM IS INSTALLED, THE HOOD FIRE–SUPPRESSION SYSTEM SHALL BE MONITORED BY THE FIRE ALARM SYSTEM.

Project Title:	
Location:	Buckeye, Arizona
Climate Zone:	2b
Project Type:	Alteration
Construction Site:	Owner/Agent: Designer/Contractor:

Mechanical Systems List

Quantity	System Type & Description
1	HVAC System 1 (Single Zone): Single Package Heat Pump, Heating Mode: Capacity = 15 kBtu/h, Proposed Efficiency = 8.00 HSPF, Required Efficiency = 8.00 HSPF, Cooling Mode: Capacity = 15 kBtu/h, Proposed Efficiency = 14.00 SEER, Required Efficiency: 14.00 SEER, Fan System: None
2	HVAC System 2 (Single Zone): Single Package Heat Pump, Heating Mode: Capacity = 35 kBtu/h, Proposed Efficiency = 8.00 HSPF, Required Efficiency = 8.00 HSPF, Cooling Mode: Capacity = 35 kBtu/h, Proposed Efficiency = 15.00 SEER, Required Efficiency: 14.00 SEER, Fan System: None

Mechanical Compliance Statement

Compliance Statement: The proposed mechanical alteration project represented in this document is consistent with the building plans, specifications, and other calculations submitted with this permit application. The proposed mechanical systems have been designed to meet the 2018 IECC requirements in COMcheck Version 4.1.1.0 and to comply with any applicable mandatory requirements listed in the Inspection Checklist.

(DISTANCE INCLUDES 25% FOR FITTINGS)

FRICTION PER 100' = 100 x 21.84 256 FEET = 8.5 PSI

PLUMBING CONTRACTOR TO VERIFY AND COORDINATE EXACT STREET PRESSURE AND NOTIFY ENGINEER OF ANY DISCREPANCIES.

PLUMBING CONTRACTOR TO PROVIDE A PRESSURE REDUCING VALVE (PRV) ON CUSTOMER SIDE OF WATER METER IF THE STREET PRESSURE EXCEEDS 80 PSI, PRV TO BE SET @ 80 PSI

THE PLUMBING CONTRACTOR TO VERIFY THAT A REDUCED PRESSURE BACKFLOW ASSEMBLY IS EXISTING. IF ONE IS NOT EXISTING, PLUMBING CONTRACTOR IS TO PROVIDE AND INSTALL A WATTS #909 OR EQUAL REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTER SAME SIZE AS REQUIRED BUILDING WATER SERVICE SIZE ON CUSTOMER SIDE OF METER AS CLOSE AS PRACTICAL TO THE METER. BACKFLOW PREVENTER SHALL BE READILY ACCESSIBLE FOR INSPECTION AND PROVIDED BY OWNER.

BEFORE THE LOCAL JURISDICTION WILL ACCEPT AN INSTALLED BACKFLOW DEVICE FOR APPROVAL, THE FOLLOWING MUST BE ACCOMPLISHED. THE DEVICE MUST BE TESTED BY A STATE CERTIFIED BACKFLOW TESTER AND TEST RESULTS FORWARDED TO THE LOCAL JURISDICTION BACKFLOW SPECIALIST. THE LOCAL JURISDICTION WILL PROVIDE AN UP-TO-DATE LIST OF CERTIFIED TESTERS FROM WHICH TO BE SELECTED. TESTER FEES WILL BE AT THE EXPENSE OF THE INSTALLER.

PLUMBING NOTES

GENERAL
1 PLUMBING CONTRACTOR TO VERIFY THAT THE FINISH FLOOR ELEVATION IS A MINIMUM OF 1" ABOVE THE RIM OF THE UPSTREAM MANHOLE PRIOR TO ANY CONSTRUCTION TO ENSURE THAT BACKWATER VALVES ARE NOT REQUIRED – NOTIFY ENGINEER IF REQUIRED.
2
SOV = SHUT OFF VALVE
POC = POINT OF CONNECTION
CO = WALL CLEANOUT
VTR = VENT THRU ROOF
INV = INVERT
FFE = FINISH FLOOR ELEVATION
2WCO = TWOWAYCLEAN OUT
SCO = SURFACE CLEAN OUT
BFP = BACKFLOW PREVENTER
PRV = PRESSURE REDUCING VALVE
BWV = BACKWATER VALVE
FCO = FLOOR CLEAN OUT
RD = ROOF DRAIN
RDL = ROOF DRAIN LEADER
3 EACH CLEAN OUT SHALL BE READILY ACCESSIBLE AND SO LOCATED AS TO SERVE ITS INTENDED PURPOSE.
4 ALL SURFACE CLEAN OUTS SHALL EXTEND TO GRADE.
5 ALL WORK TO COMPLY WITH THE 2018 INTERNATIONAL PLUMBING CODE, 2018 AND ALL ADOPTED CODES AND AMENDMENTS OF THE ADMINISTRATIVE AUTHORITY. IBC 107.2.
6 CONTRACTOR TO VERIFY SIZE, LOCATION AND INVERT OF EXISTING SEWER PRIOR TO ANY TRENCHING. SHOULD ANY DISCREPANCIES BE FOUND, CONTACT MechNovation, Inc. IMMEDIATELY. IBC107.2.
7 BUILDING SEWER PIPE SHALL CONFORM TO IPC TABLE 702.3. BUILDING DRAIN PIPE SHALL CONFORM TO IPC TABLE 702.2. PIPE FITTINGS SHALL CONFORM TO TABLE 702.4 TO POINT OF PUBLIC SEWER CONNECTION.
8 WATER SERVICE PIPE SHALL CONFORM TO NSF 61 AND SHALL CONFORM TO ONE OF LISTED STANDARDS IN IPC TABLE 605.3. WATER DISTRIBUTION PIPE SHALL CONFORM TO NSF 61 AND SHALL CONFORM TO ONE OF LISTED STANDARDS IN IPC TABLE 605.4. PIPE FITTINGS SHALL CONFORM TO NSF 61 AND SHALL CONFORM TO IPC TABLE 605.5.
9 FOR 6–INCH AND SMALLER WASTE PIPING, PROVIDE CLEANOUTS WITHIN EVERY 100 FEET OF STRAIGHT PIPE AND CHANGE IN DIRECTION. IPC 708.3.
10 TEST ALL SEWER AND WATER PIPING PRIOR TO BACKFILL AND COVER. CALL FOR INSPECTION AND WITNESS TESTING PRIOR TO CONCEALING SEWER AND WATER PIPING.
11 FLUSH ALL POTABLE WATER PIPING PRIOR TO OCCUPANCY. IPC 610.

FIXTURES
1 ALL FIXTURES APPLIANCES AND APPURTENANCES SHALL HAVE SHUT–OFF VALVES.
2 PLUMBING FIXTURES TO HAVE THE FOLLOWING MAXIMUM RATE OF FLOW:
SERVICE SK = 3.0 GPM
3 ALL HOSE BIBBS (HB) ARE 3/4" W/VACUUM BREAKER AND LOOSE KEY HANDLES.
4 TRAP PRIMER VALVES SHALL CONFORM TO ASSE 1018 or ASSE 1044, 2012 IPC 1002.4.

INSTALLATION
1 SLOPE ALL SEWER 4" & LARGER @ 1% (1/8" PER FOOT) UNLESS OTHERWISE NOTED. SLOPE ALL SEWER 3" & SMALLER @ 2% (1/4" PER FOOT)
2 COORDINATE WITH MECHANICAL CONTRACTOR TERMINATION OF ALL A/C CONDENSATE DRAINS.
3 PLUMBING CONTRACTOR TO SAW–CUT AND PATCH EXISTING CONCRETE FLOOR AS REQUIRED.
4 INSULATE ALL HOT WATER AND HOT WATER RETURN PIPING.
5 PROVIDE WATER HAMMER ARRESTORS AT EACH QUICK–CLOSING VALVE. (DISH WASHER, ICE MAKER ETC.).
6 THE OVERFLOW DRAIN SHALL BE PROVIDED WITH A STRAINER AND SHALL BE 2" ABOVE ADJACENT ROOF DRAIN.
7 THE OVERFLOW SYSTEM MAY NOT JOIN THE PRIMARY ROOF DRAIN SYSTEM.

MATERIALS
1 DRAIN WASTE & VENT: IAPMO APPROVED ABS OR PVC PIPE AND FITTINGS.
2 POTABLE WATER SHALL CONFORM TO NSF 61 AND BE LABELED ACCORDINGLY PER IPC SECTIONS 605.3 THROUGH 605.7. TYPE "L" HARD COPPER.
3 RAIN WATER: IAPMO APPROVED ABS OR PVC PIPE AND FITTINGS.
4 ROOF DRAIN ASSEMBLY SHALL BE CAST IRON.

GAS
1 COORDINATE GAS PIPE INSTALLATION WITH ALL OTHER TRADES AND GAS COMPANY PRIOR TO ANY WORK.
2 ALL FIXTURES APPLIANCES AND APPURTENANCES SHALL HAVE SHUT–OFF VALVES. USE STANDARD APPLIANCE GAS COCK.
3 APPLIANCE CONNECTORS SHALL NOT EXCEED 3' EXCEPT FOR RANGE CONNECTORS WHICH SHALL NOT EXCEED 6'.
4 APPLIANCE CONNECTORS SHALL NOT EXTEND THROUGH OR BE CONCEALED IN WALLS, FLOORS, PARTITIONS, CEILINGS OR APPLIANCE HOUSINGS.
5 ALL GAS PIPING SHALL BE INSTALLED AT LEAST 6" ABOVE GRADE.
6 JOINTS IN CONCEALED LOCATIONS SHALL BE BRAZED OR LISTED FOR CONCEALED LOCATIONS.
7 GAS PIPING: STANDARD WEIGHT STEEL WITH THREADED JOINTS ABOVE GRADE, BLACK PIPE INDOORS, GALVANIZED OUTDOORS.

KITCHEN NOTES
1 PLUMBING CONTRACTOR TO ROUGH–IN AND MAKE FINAL CONNECTIONS TO KITCHEN EQUIPMENT.
2 COORDINATE EXACT REQUIREMENTS WITH KITCHEN EQUIPMENT SUPPLIER PRIOR TO ANY CONSTRUCTION.
3 MINIMUM AIR GAP SHALL BE NOT LESS THAN TWICE THE EFFECTIVE OPENING OF THE INDIRECT WASTE PIPE.
4 COORDINATE THE TYPE OF GRATE REQUIRED FOR FLOOR SINKS WITH THE KITCHEN CONTRACTOR.
5 ALL DIRECT CONNECT APPLIANCES SHALL BE INDIVIDUALLY PROTECTED AGAINST BACKFLOW. "CARBONATOR" TYPE SODA DISPENSERS ARE CONSIDERED TO BE "HIGH HAZARD" APPLIANCES AND SHALL BE PROTECTED BY STAINLESS STEEL REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTERS. ALL OTHER APPLIANCES SUCH AS ICE MACHINES, COFFEE–MAKERS, YOGURT DISPENSERS, AND SIMILAR EQUIPMENT CONNECTIONS TO POTABLE WATER SHALL BE PROTECTED BY TWO INDEPENDENT CHECK VALVES WITH A VENT TO THE ATMOSPHERE CONFORMING TO ASSE 1002 OR BY AN AIR GAP. IPC 608.3, 608.16.1 & 608.16.10.
6 CARBONATOR PIPING SHALL CONFORM TO IPC Section 608.16.1 (I.E. NO COPPER OR COPPER ALLOY) IN THE PIPING FROM THE BACKFLOW PREVENTER TO THE CARBONATOR.

PLUMBING FIXTURE SCHEDULE

Circ Pump Circulating Pumps:
Taco#005B/ 1/35 HP/120V Single phase / all bronze.

GREASE INTERCEPTOR
2500 GALLON THREE COMPARTMENT INTERCEPTOR WITH CAST IRON MANHOLE LIDS AND TRAFFIC-RATED RISERS. JENSEN PRECAST #CL2500ECEG OR EQUAL.

SP Sump Pump:
BELL & GOSSET 3WDA15 sump pump with high and low float switches. 3" flanged discharge. 2" solids. Concrete pre-cast traffic rated basin with traffic rated cast iron grid.

GREASE INTERCEPTOR CALCULATION

(49 FU) x (3 GPM) x (17 minute) retention time = 2499 gallons capacity required

DESCRIPTION OF WORK

DESCRIPTION OF WORK:

THE WORK SHALL INCLUDE, BUT IS NOT LIMITED TO, FURNISHING AND INSTALLING THE FOLLOWING:

REMOVAL AND REPLACEMENT OF EXISTING UTILITY SERVICE AND SERVICE ENTRANCE SECTION.

INSTALLATION OF A COMPLETE FIRE ALARM SYSTEM.

INSTALLATION OF DISTRIBUTION EQUIPMENT, BRANCH WIRING, LIGHTING, EMERGENCY LIGHTING, EXTERIOR LIGHTING, LIGHTING CONTROLS, SPECIAL SYSTEM ROUGH-IN AND RACEWAYS.

ELECTRICAL DEMOLITION

UTILITY SERVICE CONDUIT, TRENCHING, EQUIPMENT.

GENERAL POWER DISTRIBUTION SYSTEM.

GROUND ELECTRODE SYSTEM.

GENERAL LIGHTING AND LIGHTING CONTROLS.

EMERGENCY LIGHTING.

ELECTRICAL EQUIPMENT INSTALLATION:

SPECIFIC EQUIPMENT INSTALLATIONS INCLUDE, BUT ARE NOT LIMITED TO, THE FOLLOWING:

SERVICE ENTRANCE SWITCHBOARD(S).
PANELBOARD(S).

ESTIMATED POINT(S) OF CONNECTION & METERING:

ELECTRIC UTILITY SERVICE, LOCATION AS DIRECTED BY UTILITY.

CODES & STANDARDS

CODES & STANDARDS:

ALL OF THE PRECEDING ARE HEREBY MADE A PART OF THESE SPECIFICATIONS. THEY SHALL BE SATISFIED BY THE CONTRACTOR AT NO ADDITIONAL EXPENSE TO THE OWNER.

GENERAL	EDITION
NATIONAL ELECTRICAL CODE (NFPA 70)	2017*

ENERGY CODE CALCULATIONS

INTERIOR ENERGY CALCULATIONS. SEE SHEET E0.3.

FIRE ALARM REQUIREMENTS:

FIRE ALARM SYSTEM (SEE BELOW).
NEW – INSTALL A COMPLETE FIRE ALARM SYSTEM.

THE FIRE ALARM DESIGN INCLUDED IN THIS PACKAGE IS:

CONCEPTUAL – INCLUDES SYSTEM CONFIGURATION, SPECIFICATIONS, AND GENERAL EQUIPMENT AND DEVICE LAYOUT. ENGINEERED PLANS SHALL BE SUBMITTED BY THE FIRE ALARM SYSTEM INSTALLER AS DEFERRED SUBMITTAL. FINAL DEVICE LOCATIONS AND QUANTITIES ARE SUBJECT TO AHJ REVIEW.

ELECTRICAL COVER SHEET

E0.0

WIRING DEVICES AND BOXES

JUNCTION BOXES, HANDHOLES, AND MANHOLES

EMH — ELECTRICAL MANHOLE OR HANDHOLE (EHH)

J J — JUNCTION BOX, SIZED PER NEC (U.N.O.)

WIRING DEVICES - POWER

CONNECTION POINT TO EQUIPMENT SPECIFIED, SUPPLIED AND INSTALLED UNDER OTHER DIVISIONS. RACEWAY, CONDUCTORS AND CONNECTIONS UNDER THIS DIVISION.

L5–30 — SPECIAL PURPOSE RECEPTACLE NEMA CONFIGURATION AND AMPERAGE AS INDICATED.

CONVENIENCE RECEPTACLE–SINGLE, DUPLEX, 4–PLEX, MTD @ 18" AFF, UNLESS NOTED OTHERWISE.
WP – WEATHERPROOF "EXTRA DUTY" IN–USE METALLIC, COOPER #WIUMV(H*)–1 [*HORIZONTAL AS NEEDED]
WPF – WEATHERPROOF, "EXTRA DUTY", FLUSH SERVICE, COOPER #WBR(VS/VM/HR/HB)C (STYLE TO SUIT)
GFCI – GROUND FAULT CIRCUIT INTERRUPTER
IG – ISOLATED GROUND

FLOOR BOX, ROUND, COMBINATION POWER/DATA OR POWER ONLY, NON–METALLIC, 6" DIA., T&B STEEL CITY #68P, RECESSED COVER, STEEL CITY #68–R–CST–(BLK OR BRN OR BGE) COVER PLATE.

FLOOR BOX, SQUARE, COMBINATION POWER/DATA OR POWER ONLY, NON–METALLIC, T&B #STEEL CITY 664–CI, RECESSED COVER STEEL CITY #664–CST–SW–ALM COVER PLATE.

FLOOR BOX, SQUARE, FOUR GANG, POWER & DATA, NON–METALLIC, T&B STEEL CITY #665–CST–SC, RECESSED COVER STEEL CITY #65–CST–SWR–(ALM OR BRS) COVER PLATE.

CLG — SAME AS ABOVE, CEILING MOUNTED

SAME AS ABOVE, MOUNTED ABOVE COUNTER

TMB — 3/4" THICK FIRE–TREATED PLYWOOD (8ft HIGH) FOR TELEPHONE MOUNTING BOARD WITH (1) DEDICATED FOURPLEX OUTLET AND #6 COPPER BOND TO BUILDING GROUND ELECTRODE SYSTEM. TELEPHONE CONDUIT PER UTILITY SPECIFICATIONS.

WIRING DEVICES - MISC

T — THERMOSTAT

PUSHBUTTON OR CONTROL DEVICE (SEE ABBREVIATION FOR TYPE).

$M — MOTOR RATED SWITCH OR MANUAL MOTOR STARTER WITH OVERLOADS (WHEN NOT INTERAL TO MOTOR)

$ML — SAME AS ABOVE, LOCKABLE

R — RELAY

WIRING DEVICES - SPECIAL SYSTEMS

TAG — TAG:
CR = CARD READER,
DC = DOOR CONTACTS,
KP = KEY PAD

DOOR CONTACTS

S — SPEAKER/HORN

TV — TELEVISION

CCTV — CAMERA

LIGHTING

FA 10 — FIXTURE TYPE. SEE SCHEDULE.
SOLID = EMERGENCY BACKUP (REQUIRES HOT LEG)

FA 9Lo — CIRCUIT NUMBER. SUCCEEDING LETTERS INDICATE CONTROLS.
L = VIA LIGHTING CONTROLLER
N = NIGHT LIGHT (UNSWITCHED) (REQUIRES HOT LEG)
a = LOCAL SWITCH (LOWER CASE LETTER)
ab = TANDEM SWITCHING. PROVIDE FIXTURE W/ (2) BALLASTS. (LOWER CASE LETTER)

POLE MOUNTED FIXTURE

H — SURFACE, PENDANT OR WALL MOUNTED LUMINAIRE

RECESSED DOWN LIGHT

LANDSCAPE OR SPECIALTY LIGHT FIXTURE

EXIT LIGHT–CEILING OR WALL MOUNTED, ARROW INDICATES DIRECTION. SHADING INDICATES FACE OF SIGN. TYPE AS SHOWN.

BATTERY OPERATED EMERGENCY LIGHT WITH EXIT SIGN WHEN INDICATED

SAME AS ABOVE, CEILING MOUNTED

BATT — REMOTE BATTERY

LIGHTING CONTROLS

$2 — WALL SWITCH, SUBSCRIPT INDICATES TYPE:
2=DOUBLE POLE, 3=THREE WAY, 4=FOUR WAY
D=DIMMER, K=KEY OPERATED, LV=LOW VOLTAGE
P=PILOT LIGHT, T=TIMED SWITCH, WP=WEATHERPROOF

$xy — TANDEM SWITCH (PROVIDE FIXTURE W/ 2 BALLASTS) OR ALTERNATE FIXTURE SWITCHING.

$M.O. — MANUAL OVERRIDE SWITCH. SEE LIGHTING CONTROLLER SPECIFICATIONS.

PC — PHOTOELECTRIC LIGHTING CONTROL, SENSOR AIMED NORTH UNLESS OTHERWISE NOTED.

TC — ASTRONOMICAL TIME CLOCK.

OCCUPANCY SENSORS

$OC — WALL MOUNTED. SEE LIGHTING DETAIL INDICATED.

OC — CEILING MOUNTED. SEE LIGHTING DETAIL INDICATED.

PRIMARY EQUIPMENT

1-LINE PLAN — UTILITY POWER POLE

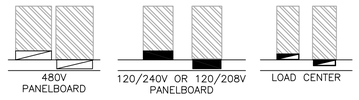
UTILITY PAD MOUNT TRANSFORMER

PLAN — MAJOR EQUIPMENT

MAJOR ELECTRICAL EQUIPMENT OR DEVICE, i.e., MOTOR CONTROL CENTER, SWITCHBOARD, ETC.

SWITCHBOARDS AND PANELBOARDS

PANELBOARD – SURFACE OR FLUSH MOUNTED AS INDICATED. 'HATCHED' AREA REPRESENTS NEC REQUIRED CLEARANCE. WIDTH MINIMUM OF 30". DEPTH AS REQUIRED BY NEC ART 110, HATCHED AREA NOT DRAWN TO SCALE.



1-LINE PLAN — T — TRANSFORMERS

POWER TRANSFORMER SUBSTATION OR DISTRIBUTION TYPE. KVA, IMPEDANCE, VOLTAGE, AND CONNECTIONS ARE AS NOTED.

1-LINE PLAN — TRIP FRAME CB 30 — CIRCUIT BREAKERS

CIRCUIT BREAKER, TRIP/FRAME RATING AS SHOWN. ENCLOSED WHEN SHOWN ON PLAN.

1-LINE PLAN — FUSE/SWITCH F 30 — DISCONNECTS & FUSES

DISCONNECT SWITCH, RATING AS SHOWN, NF = NON–FUSED. ENCLOSED WHEN SHOWN ON PLAN.

1-LINE PLAN — M M — MOTORS & MOTOR STARTERS

MOTOR CONNECTION. FOR HORSEPOWER, REFER TO ONE–LINE DIAGRAM OR EQUIPMENT SCHEDULE

1 — 1 — CONTACTOR, NEMA SIZE AS SHOWN. ENCLOSED WHEN SHOWN ON PLAN.

1 — 1 OL — STARTER, NEMA SIZE AS SHOWN. ENCLOSED WHEN SHOWN ON PLAN.

FUSE/SWITCH — 1 — 1 OL — COMBINATION STARTER, NEMA SIZE AS SHOWN CIRCUIT BREAKER OR FUSED DISCONNECT SWITCH TYPE. ENCLOSED WHEN SHOWN ON PLAN.

RACEWAYS, WIRE, & CABLE

BRANCH CIRCUIT(S) HOMERUN TO PANELBOARD, 3/4" CONDUIT UNLESS NOTED OTHERWISE. FIELD ROUTE. SUPPORT PER NEC.

7#12 AWG CONDUCTORS, (3) NEUTRALS, (3) HOT, 1 GROUND IN 3/4" CONDUIT.

7#10 AWG CONDUCTORS, (3) NEUTRALS, (3) HOT, 1 GROUND IN 3/4" CONDUIT.

NO MULTI–WIRE BRANCH CIRCUITS PERMITTED.

CONDUIT AND CONDUCTORS ABOVE GRADE

CONDUIT AND CONDUCTORS BELOW GRADE OR SLAB.

CONDUIT TURN DOWN/CONDUIT TURN UP

CONDUIT, STUBBED AND CAPPED

G — G=GROUND ELECTRODE CONDUCTOR

CONDUIT SEAL FITTING

POWER CONDUIT FILL EXAMPLE: (2) 4"C., 4 #500, 1 #1/0G.
- GROUND CONDUCTOR SIZE
- QUANTITY OF GROUND CONDUCTORS
- CONDUCTOR SIZE (AWG OR KCMIL)
- QUANTITY OF PHASE, NEUTRAL, OR CONTROL CONDUCTORS (NEUTRAL CONDUCTORS MAY BE SPECIFIED WITH AN 'N' SUFFIX)
- CONDUIT SIZE (SEE SPECIFICATION FOR TYPES)
- TOTAL QUANTITY OF IDENTICAL CONDUITS AS SPECIFIED (IF MULTIPLE)

EQUIPMENT SCHEDULE REFERENCE INDICATOR. REFER TO SHEET # INDICATED ON PLAN.

GROUNDING

GROUND ROD, GROUND WELL

COPPER GROUNDING BUS W/ STANDOFF INSULATORS, 1/4"x4"Hx24"W U.N.O.

EXOTHERMIC WELD, COMPRESSION CONNECTION

SURGE PROTECTION DEVICE (SPD)

WIRING DEVICES AND BOXES

WIRING DEVICES - COMMUNICATIONS

DATA/TELEPHONE/COMBINATION TEL./DATA OUTLET

TELEVISION OUTLET

1 EQUIPMENT SCHEDULE
NO SCALE

EQUIPMENT SCHEDULE KEYED NOTES (BY TYPE)

ELECTRICAL HARDWARE

A1. PROVIDE MANUAL MOTOR STARTER.
B1. PROVIDE & INSTALL VFD. SEE SPECIFICATIONS.
C1. PROVIDE & INSTALL COMBINATION MOTOR STARTER WITH CONTROL POWER TRANSFORMER, HAND–OFF–AUTO, & PILOT LIGHTS, NEMA 1 OR 3R AS APPLICABLE.
D1. PROVIDE BUCK–BOOST TRANSFORMER AT EQUIPMENT.
E1. EQUIPMENT IS PROVIDED WITH INTEGRAL DISCONNECTING MEANS.

EQUIPMENT RATINGS

A2. CONFIRM EQUIPMENT SCCR (SHORT CIRCUIT CURRENT RATING).

EQUIPMENT CONTROLS

A3. CONTINUOUS OPERATION.
B3. INTERLOCK WITH AREA OCCUPANCY SENSORS.

EQUIPMENT TYPE LEGEND

LCP – LOCAL CONTROL PANEL.
MTR – MOTOR
SKD – EQUIPMENT SKID
IMAC – INDUSTRIAL MACHINERY
APP – APPLIANCE

ELECTRICAL LEGEND AND EQUIPMENT SCHEDULE

E0.1

265100 INTERIOR AND EXTERIOR LIGHTING

PRODUCTS

1. PRODUCTS DESCRIBED IN THE LUMINARIES SCHEDULE AS SHOWN ON THE DRAWINGS SHALL REPRESENT MINIMUM ACCEPTABLE QUALITY STANDARDS.

2. UL/ETL LISTINGS

   A. ALL LUMINARIES AND COMPONENTS SHALL BE UL OR ETL TESTED, LISTED, AND LABELED.

   B. LUMINARIES INSTALLED UNDER CANOPIES, ROOFS, OR SIMILAR DAMP OR WET LOCATIONS SHALL BE UL OR ETL LISTED AND LABELED AS SUITABLE FOR DAMP OR WET LOCATIONS.

   C. RECESSED LUMINARIES INSTALLED IN FIRE RATED CEILINGS AND USING A FIRE RATED PROTECTIVE COVER SHALL BE THERMALLY PROTECTED FOR THIS APPLICATION AND SHALL BE APPROVED FOR THE INSTALLATION IN A FIRE–RATED CEILING.

3. INTERIOR AND EXTERIOR LUMINARIES AND ACCESSORIES

   A. AS SCHEDULED ON DRAWINGS.

   B. VERIFY ALL FINISHES WITH ARCHITECT.

INSTALLATION

A. VERIFY ALL CEILING TYPES AND COORDINATE WITH LUMINARIES AND ACCESSORIES.

B. FURNISH AND INSTALL LAMPS IN LUMINARIES AND LAMPHOLDERS.

C. RECESSED LUMINARIES TRIMS SHALL FIT SNUGLY TO THE MOUNTING SURFACE AND SHALL NOT EXHIBIT LIGHT LEAKS OR GAPS. PROVIDE HEAT RESISTANT RUBBER GASKETING WHERE NECESSARY. PROVIDE FEED–THROUGH JUNCTION BOXES OR PROVIDE SEPARATE JUNCTION BOXES. ALL COMPONENTS SHALL BE ACCESSIBLE THROUGH THE CEILING OPENING.

D. MARK STANDARD LUMINARIES EQUIPPED WITH EMERGENCY POWER WITH A RED ADHESIVE STICKER (NOT MORE THAN 3/8–INCH IN DIAMETER) MOUNTED ON METAL DOOR FRAME.

E. PROVIDE IN–LINE FUSING AT HANDHOLE FOR ALL POLE MOUNTED LUMINARIES.

F. LEAVE LUMINARIES CLEAN AND FREE OF ANY VISIBLE DUST, DEBRIS, OR FINGERPRINTS WITH ALL LAMPS OPERATIONAL AT TIME OF ACCEPTANCE OF WORK. RELAMP INOPERABLE LAMPS AT COMPLETION OF WORK.

G. COORDINATE WITH OTHER CRAFTS TO AVOID CONFLICTS BETWEEN LUMINAIRES, SUPPORTS, FITTINGS AND MECHANICAL EQUIPMENT.

H. RECESSED LIGHT FIXTURES:

- ALL RECESSED TROFFERS SHALL BE SUPPORTED FROM BUILDING STRUCTURE ABOVE CEILING WITH GALVANIZED STEEL WIRE AT NOT LESS THAN 4 POINTS NEAR CORNERS OF FIXTURE. SIZE OF WIRE SHALL BE CAPABLE OF SUPPORTING WEIGHT OF FIXTURES.
- RECESSED LUMINARIES: PROVIDE TRIM TYPE AND ACCESSORIES REQUIRED FOR INSTALLATION IN CEILING SYSTEM (INCLUDING SLOPED CEILINGS, FIRE RATED CEILINGS, ETC.) AS INDICATED PER LUMINAIRE SCHEDULE.

REFER TO SHEET E0.4 FOR 28 31 00 FIRE DETECTION AND ALARM SPECIFICATIONS

262726 WIRING DEVICES

A. PROVIDE WIRING DEVICES, IN TYPES, CHARACTERISTICS, AND ELECTRICAL RATINGS FOR APPLICATIONS INDICATED WHICH ARE UL LISTED AND WHICH COMPLY WITH APPLICABLE UL AND NEMA STANDARDS. ALL DEVICES AND WALL BOXES SHALL BE PROVIDED WITH A WALL PLATE DESIGNED TO MATCH THE DEVICE. THE COLOR OF ALL DEVICES SHALL BE APPROVED BY THE ARCHITECT PRIOR TO ORDER OF DEVICES. WHERE THE ARCHITECT HAS NO COLOR PREFERENCE PROVIDE WHITE COLOR DEVICES WITH WALL PLATES EXCEPT AS OTHERWISE INDICATED. PROVIDE HEAVY DUTY DEVICES UNLESS OTHERWISE INDICATED. MANUFACTURER'S CATALOG NUMBERS LISTED BELOW INDICATE QUALITY OF BASIS OF DESIGN.

B. MODULAR "PLUG–IN" WIRING SYSTEMS ARE NOT PERMITTED.

C. SIMPLEX, DUPLEX, OR GFCI RECEPTACLE: 125V, 20A, 5–20R CONFIGURATION. PROVIDE ONE OF THE FOLLOWING:

1. COOPER; 5351 (SINGLE), CR5362 (DUPLEX), VGF20 (GFCI)
2. HUBBELL; HBL5351 (SINGLE), HBL5352 (DUPLEX), GFR5352L (GFCI)
3. LEVITON; 5891 (SINGLE), 5352 (DUPLEX), 7590 (GFCI)
4. PASS & SEYMOUR; 5361 (SINGLE), 5362 (DUPLEX), 2095 (GFCI)

D. SINGLE POLE / DOUBLE POLE / 3–WAY / 4–WAY / LIGHTED OR KEY OPERATED SWITCH: 20A, 120–277V. PROVIDE ONE OF THE FOLLOWING:

1. COOPER; AH1221 / AH1222 / AH1223 / AH1224 / AH1221PL FOR 120 AND 277 V / AH1221L
2. HUBBELL; HBL1221 / HBL1222 / HBL1223 / HBL1224 / HBL1221PL FOR 120 AND 277 V / HBL1221L
3. LEVITON; 1221–2 / 1222–2 / 1223–2 / 1224–2 / 1221–LH1 / 1221–2L
4. PASS & SEYMOUR; CSB20AC1 / CSB20AC2 / CSB20AC3 / CSB20AC4 / PS20AC1RPL FOR 120 V, PS20AC1RPL7 FOR 277 V / PS20AC1–L

E. DECORATOR–STYLE DEVICES: (REQUIRES PRIOR APPROVAL)

1. CONVENIENCE RECEPTACLES: SQUARE FACE, 125 V, 15 A; 5–15R.
2. GFCI CONVENIENCE RECEPTACLES: SQUARE FACE, 125 V, 15 A; 5–15R.
3. TOGGLE SWITCHES, SQUARE FACE, 120/277 V, 15 A.
4. LIGHTED TOGGLE SWITCHES, SQUARE FACE, 120 V, 15 A WITH LIGHTED HANDLE, ILLUMINATED WHEN SWITCH IS "OFF."
   - MANUFACTURER; 1 / 2 / 3 / 4 (SEE ABOVE)
     a. COOPER; 6252 / VGF15 / 7621 (SINGLE POLE), 7623 (THREE WAY) / 7631 (SINGLE POLE), 7633 (THREE WAY)
     b. HUBBELL; DR15 / GF15LA / DS115 (SINGLE POLE), DS315 (THREE WAY) / DS120IL (SINGLE POLE), DS320 (THREE WAY)
     c. LEVITON; 16252 / 8599 / 56291–2 (SINGLE POLE), 5623–2 (THREE WAY) / 5631–2 (SINGLE POLE), 5633–2 (THREE WAY)
     d. PASS & SEYMOUR; 26252 / 1594 / 2621 (SINGLE POLE), 2623 (THREE WAY) / 2625 (SINGLE POLE), 2626 (THREE WAY)

F. WALL PLATES

1. SINGLE AND COMBINATION TYPES SHALL MATCH CORRESPONDING WIRING DEVICES.
   - MATERIAL FOR FINISHED SPACES: TYPE 302 STAINLESS STEEL.
   - MATERIAL FOR UNFINISHED SPACES: HIGH–IMPACT THERMOPLASTIC.
   - MATERIAL FOR DAMP LOCATIONS: CAST ALUMINUM WITH SPRING–LOADED LIFT COVER, AND LISTED AND LABELED FOR USE IN WET AND DAMP LOCATIONS.
2. WET–LOCATION, WEATHERPROOF COVER PLATES: NEMA 250, COMPLYING WITH TYPE 3R, WEATHER–RESISTANT, DIE–CAST ALUMINUM WITH LOCKABLE COVER.

G. FINISHES

1. DEVICE COLOR: AS SELECTED BY ARCHITECT, WHITE, UNLESS OTHERWISE INDICATED. EMERGENCY POWER SYSTEM: RED. TVSS DEVICES: BLUE.
2. WALL PLATE COLOR: FOR PLASTIC COVERS, MATCH DEVICE COLOR.

H. LOCATION OF OUTLETS AND EQUIPMENT AS INDICATED ON THE DRAWINGS ARE APPROXIMATELY CORRECT. HOWEVER, THE EXACT CENTER OF ALL OUTLETS SHALL BE PLACED IN COOPERATION WITH THE GENERAL CONTRACTOR TO CENTER OUTLETS WITH THE CEILING TILE, TRUSSES AND JOINTS, AND MASONRY UNITS.

I. COORDINATE LOCATIONS WITH ARCHITECTURAL PLANS AND ELEVATIONS IN ORDER TO AVOID INTERFERENCES WITH CASEWORK, FURNITURE, WINDOWS, EQUIPMENT, AND DOOR SWINGS.

J. INSTALLATION

1. PROTECT INSTALLED DEVICES AND THEIR BOXES. KEEP OUTLET BOXES FREE OF PLASTER, DRYWALL JOINT COMPOUND, MORTAR, CEMENT, CONCRETE, DUST, PAINT, AND OTHER MATERIAL. INSTALL WIRING DEVICES AFTER ALL WALL PREPARATION, INCLUDING PAINTING, IS COMPLETE.
2. CONDUCTORS:
   - STRIP INSULATION EVENLY AROUND THE CONDUCTOR USING TOOLS DESIGNED FOR THE PURPOSE. AVOID SCORING OR NICKING WIRE. THE LENGTH OF FREE CONDUCTORS AT OUTLETS FOR DEVICES SHALL BE 6 INCHES MINIMUM.
   - EXISTING CONDUCTORS: CUT BACK AND PIGTAIL, OR REPLACE ALL DAMAGED CONDUCTORS. PIGTAILING EXISTING CONDUCTORS IS PERMITTED, PROVIDED THE OUTLET BOX IS LARGE ENOUGH.
3. DEVICE INSTALLATION:
   - WHEN THERE IS A CHOICE, USE SIDE WIRING WITH BINDING–HEAD SCREW TERMINALS. WRAP SOLID CONDUCTOR TIGHTLY CLOCKWISE, TWO–THIRDS TO THREE–FOURTHS OF THE WAY AROUND TERMINAL SCREW. USE A TORQUE SCREWDRIVER WHEN A TORQUE IS RECOMMENDED OR REQUIRED BY MANUFACTURER.
   - WHEN CONDUCTORS LARGER THAN NO. 12 AWG ARE INSTALLED ON 15– OR 20–A CIRCUITS, SPLICE NO. 12 AWG PIGTAILS FOR DEVICE CONNECTIONS.
4. MOUNTING HEIGHTS, FINISHED FLOOR TO DEVICE CENTERLINE (U.N.O.):
   - SWITCH 42", OVER OBSTRUCTION 44"
   - RECEPTACLE, TELEPHONE/DATA OUTLET, 18"
   - FIRE ALARM PULL STATIONS 44"
   - FIRE ALARM A/V UNITS 80" (OR 6" BELOW CEILING, IF LOWER)
5. RECEPTACLE ORIENTATION:
   - INSTALL GROUND PIN OF VERTICALLY MOUNTED RECEPTACLES UP, AND ON HORIZONTALLY MOUNTED RECEPTACLES TO THE LEFT.

K. GFCI RECEPTACLES: INSTALL NON–FEED–THROUGH–TYPE GFCI RECEPTACLES WHERE PROTECTION OF DOWNSTREAM RECEPTACLES IS NOT REQUIRED.

260553 IDENTIFICATION FOR ELECTRICAL SYSTEMS

A. UNDERGROUND LINE MARKING TAPE: PERMANENT, BRIGHT–COLORED, CONTINUOUS–PRINTED, PLASTIC TAPE COMPOUNDED FOR DIRECT–BURIAL SERVICE NOT LESS THAN 6 INCHES WIDE BY 4 MILS THICK.

B. ENGRAVED, PLASTIC–LAMINATED LABELS AND SIGNS, ENGRAVING STOCK MELAMINE PLASTIC LAMINATE, 1/16–INCH MINIMUM THICK FOR SIGNS UP TO 20 SQUARE INCHES, OR 8 INCHES IN LENGTH; 1/8–INCH THICK FOR LARGER SIZES. ENGRAVED LEGEND IN WHITE LETTERS ON BLACK FACE AND PUNCHED FOR MECHANICAL FASTENERS.

C. FASTENERS FOR PLASTIC–LAMINATED AND METAL SIGNS: SELF–TAPPING STAINLESS STEEL SCREWS OR NUMBER 10/32 STAINLESS STEEL MACHINE SCREWS WITH NUTS AND FLAT LOCK WASHERS.

D. DURING TRENCH BACKFILLING, FOR EXTERIOR UNDERGROUND POWER, AND COMMUNICATIONS LINES, INSTALL CONTINUOUS UNDERGROUND PLASTIC LINE MARKER, LOCATED DIRECTLY ABOVE LINE AT 12" INCHES BELOW GRADE.

E. INSTALL BRASS TAG ON EACH UNDERGROUND CONDUIT, IDENTIFYING SOURCE AND SERVICE AT EACH END.

F. INSTALL WARNING OR CAUTION SIGNS WHERE REQUIRED BY NEC, WHERE INDICATED, OR WHERE REASONABLY REQUIRED TO ASSURE SAFE OPERATION AND MAINTENANCE OF ELECTRICAL SYSTEMS.

G. COLOR CODE SECONDARY SERVICE, FEEDER, & BRANCH CIRCUIT CONDUCTORS AS FOLLOWS:

208Y/120	PHASE	480Y/277V
RED	A	BROWN
BLACK	B	ORANGE
BLUE	C	YELLOW
WHITE	NEUTRAL	GRAY
GREEN	GROUND	GREEN
GRN/YL	ISO GND	GRN/YL

- USE CONDUCTORS WITH COLOR FACTORY–APPLIED THE ENTIRE LENGTH OF THE CONDUCTORS EXCEPT AS FOLLOWS. THE FOLLOWING FIELD–APPLIED COLOR–CODING METHODS MAY BE USED IN LIEU OF FACTORY–CODED WIRE NO. 10 AWG & LARGER.
  APPLY COLORED, PRESSURE–SENSITIVE PLASTIC TAPE IN HALF–LAPPED TURNS FOR A DISTANCE OF 6 INCHES FROM TERMINAL POINTS. IN LIEU OF PRESSURE–SENSITIVE TAPE, COLORED CABLE TIES MAY BE USED. APPLY THREE TIES OF SPECIFIED COLOR TO EACH WIRE AT EACH TERMINAL STARTING 3 INCHES FROM THE TERMINAL & SPACED 3 INCHES APART.

262300 INDOOR & OUTDOOR SERVICE ENTRANCE GEAR (480V & BELOW)

A. GENERAL: PROVIDE UTILITY METER SECTION PER UTILITY STANDARDS WHEN INDICATED ON THE PLANS.

- UTILITY METERING COMPARTMENT: THE UTILITY CURRENT TRANSFORMER COMPARTMENT SHALL COMPLY WITH THE LOCAL UTILITY CONSTRUCTION SPECIFICATIONS.
- SHORT CIRCUIT CURRENT RATING AS INDICATED ON ONE–LINE.
- FUTURE PROVISIONS: ALL UNUSED SPACES PROVIDED, UNLESS OTHERWISE SPECIFIED, SHALL BE FULLY EQUIPPED FOR FUTURE DEVICES, INCLUDING ALL APPROPRIATE CONNECTORS AND MOUNTING HARDWARE.
- ENCLOSURE: TYPE 1 OR TYPE 3R AS INDICATED ON THE PLANS.

B. THE SWITCHGEAR ENCLOSURE SHALL BE PAINTED MEDIUM GRAY, ANSI #49.

C. ALL FRONT COVERS SHALL BE SCREW REMOVABLE WITH A SINGLE TOOL AND ALL DOORS SHALL BE HINGED.

D. TOP AND BOTTOM CONDUIT AREAS SHALL BE CLEARLY INDICATED ON SHOP DRAWINGS.

- NAMEPLATES: PROVIDE 1 INCH HIGH X 3 INCHES ENGRAVED LAMINATED NAMEPLATES FOR EACH DEVICE. FURNISH BLACK LETTERS ON A WHITE BACKGROUND FOR ALL VOLTAGES.
- BUS COMPOSITION: SHALL BE PLATED COPPER OR ALUMINUM. FULL PROVISIONS FOR THE ADDITION OF FUTURE SECTIONS SHALL BE PROVIDED. BUSSING SHALL INCLUDE ALL NECESSARY HARDWARE TO ACCOMMODATE SPLICING FOR FUTURE ADDITIONS.
- GROUND BUS: SHALL EXTEND THE ENTIRE LENGTH OF THE SWITCHGEAR.
- ALL LUGS SHALL BE UL LISTED TO ACCEPT SOLID AND/OR STRANDED COPPER AND ALUMINUM CONDUCTORS.
- PROVIDE MECHANICAL TYPE LUGS TO ACCOMMODATE THE CONDUCTOR SHOWN ON THE ASSOCIATED DRAWINGS.

E. SWITCHGEAR SHALL BE COMPLETELY ASSEMBLED, WIRED, ADJUSTED, AND TESTED AT THE FACTORY.

F. CONTRACTOR SHALL INSTALL EQUIPMENT DESCRIBED IN THIS SPECIFICATION, PER MANUFACTURER'S RECOMMENDED PRACTICE, AS LOCATED ON DRAWINGS.

- CONTRACTOR SHALL COORDINATE INSTALLATION WITH MANUFACTURER FOR START–UP AND CERTIFICATION.
- CONTRACTOR SHALL PROVIDE CONCRETE PADS FOR EQUIPMENT.

G. MANUFACTURER SHALL PROVIDE THE SERVICES OF A COMPETENT FIELD SERVICE REPRESENTATIVE AS NEEDED TO RESOLVE ANY MALFUNCTIONS AND TO MAKE ANY INSPECTIONS, CHECKS, ETC. NEEDED TO PROVIDE MANUFACTURER'S CERTIFICATION. A MANUFACTURER'S CERTIFICATION SHALL BE PROVIDED PRIOR TO EQUIPMENT BEING ENERGIZED.

262413 SWITCHBOARDS AND PANELBOARDS

A. PROVIDE FACTORY–ASSEMBLED, DEAD–FRONT, METAL–ENCLOSED, SWITCHBOARDS AND PANELBOARDS, OF TYPES, SIZES, ELECTRICAL RATINGS AND CHARACTERISTICS INDICATED.
- INDOORS: NEMA TYPE 1
- OUTDOORS: NEMA TYPE 3R

B. BUSSING: COPPER OR ALUMINUM WITH AMPACITY RATING AND SHORT–CIRCUIT CURRENT RATING AS INDICATED ON ONE–LINE.

C. FUSIBLE SWITCHES: PROVIDE FUSIBLE SWITCH ASSEMBLIES, 3–POLE, QUICK–MAKE, QUICK–BREAK TYPES MOUNTED IN METAL ENCLOSURES WHICH ARE OPERATED BY EXTERNALLY LOCATED HANDLES WHICH CAN BE LOCKED IN ON OR OFF POSITIONS.

D. METERING: WHERE INDICATED PROVIDE METERING COMPARTMENTS FOR CT'S, PT'S AND INSTRUMENTS.

E. FASTEN ENCLOSURES FIRMLY TO WALLS AND STRUCTURAL SURFACES, ENSURING THEY ARE PERMANENTLY & MECHANICALLY ANCHORED.

F. FILL OUT PANELBOARD'S CIRCUIT DIRECTORY CARD UPON COMPLETION OF INSTALLATION WORK.

260529 HANGERS AND SUPPORTS FOR ELECTRICAL SYSTEMS

A. RACEWAY SUPPORTS: CLEVIS HANGERS, RISER CLAMPS, CONDUIT STRAPS, THREADED C–CLAMPS WITH RETAINERS, CEILING TRAPEZE HANGERS, WALL BRACKETS, & SPRING STEEL CLAMPS.

B. U–CHANNEL SYSTEMS: 16GAGE STEEL CHANNELS, WITH 9/16 INCH DIAMETER HOLES, AT A MINIMUM OF 8 INCHES ON CENTER. PROVIDE FITTINGS & ACCESSORIES THAT MATCH WITH U–CHANNEL.

C. INSTALL SUPPORTING DEVICES TO FASTEN ELECTRICAL COMPONENTS SECURELY & PERMANENTLY IN ACCORDANCE WITH NEC REQUIREMENTS.

D. COORDINATE INSTALLATION OF SUPPORTING DEVICES WITH STRUCTURAL SYSTEMS & OTHER ELECTRICAL INSTALLATIONS.

E. RACEWAY SUPPORTS: COMPLY WITH THE NEC & THE FOLLOWING:

- CONFORM TO MANUFACTURER'S RECOMMENDATIONS FOR SELECTION & INSTALLATION OF SUPPORTS.
- STRENGTH OF EACH SUPPORT SHALL BE ADEQUATE TO CARRY PRESENT & FUTURE LOAD MULTIPLIED BY A SAFETY FACTOR OF AT LEAST FOUR OR 200 LBS SAFETY ALLOWANCE MINIMUM.
- INSTALL INDIVIDUAL & MULTIPLE (TRAPEZE) RACEWAY HANGERS & RISER CLAMPS AS NECESSARY TO SUPPORT RACEWAYS. PROVIDE U–BOLTS, CLAMPS, ATTACHMENTS, & OTHER HARDWARE AS NECESSARY.
- SUPPORT PARALLEL RUNS OF HORIZONTAL RACEWAYS TOGETHER ON TRAPEZE–TYPE HANGERS.
- SUPPORT INDIVIDUAL HORIZONTAL RACEWAYS BY SEPARATE PIPE HANGERS. SPRING STEEL FASTENERS MAY BE USED IN LIEU OF HANGERS ONLY FOR 1–1/2 INCHES & SMALLER RACEWAYS SERVING LIGHTING & RECEPTACLE BRANCH CIRCUITS ABOVE SUSPENDED CEILINGS ONLY. FOR HANGER RODS WITH SPRING STEEL FASTENERS, USE 1/4 INCH DIAMETER OR LARGER THREADED STEEL. USE SPRING STEEL FASTENERS SPECIFICALLY DESIGNED FOR SUPPORTING SINGLE CONDUITS.
- SPACE SUPPORTS FOR RACEWAYS IN ACCORDANCE WITH NEC.
- SUPPORT EXPOSED & CONCEALED RACEWAY WITHIN 1 FOOT OF AN UNSUPPORTED BOX & ACCESS FITTINGS. IN HORIZONTAL RUNS, SUPPORT AT THE BOX & ACCESS FITTINGS MAY BE OMITTED WHERE BOX OR ACCESS FITTINGS ARE INDEPENDENTLY SUPPORTED & RACEWAY TERMINALS ARE NOT MADE WITH CHASE NIPPLES OR THREADLESS BOX CONNECTORS.
- IN VERTICAL RUNS, ARRANGE SUPPORT SO THE LOAD PRODUCED BY THE WEIGHT OF THE RACEWAY & THE ENCLOSED CONDUCTORS IS CARRIED ENTIRELY BY THE CONDUIT SUPPORTS WITH NO WEIGHT LOAD ON RACEWAY TERMINALS.

G. INSTALL VERTICAL CONDUCTOR SUPPORTS SIMULTANEOUSLY WITH INSTALLATION OF CONDUCTORS.

H. SUPPORT MISCELLANEOUS ELECTRICAL COMPONENTS AS REQUIRED TO PRODUCE THE SAME STRUCTURAL SAFETY FACTORS AS SPECIFIED FOR RACEWAY SUPPORTS. INSTALL METAL CHANNEL RACKS FOR MOUNTING CABINETS, PANELBOARDS, DISCONNECTS, CONTROL ENCLOSURES, PULL BOXES, JUNCTION BOXES, TRANSFORMERS, & OTHER DEVICES.

I. IN OPEN OVERHEAD SPACES, CAST BOXES THREADED TO RACEWAYS NEED NOT BE SUPPORTED SEPARATELY EXCEPT WHERE USED FOR FIXTURE SUPPORT; SUPPORT SHEET METAL BOXES DIRECTLY FROM THE BUILDING STRUCTURE OR BY BAR HANGERS.

260533 RACEWAYS & BOXES FOR ELECTRICAL SYSTEMS

A. COORDINATE WITH OTHER WORK, AS NECESSARY TO INTERFACE INSTALLATION OF ELECTRICAL RACEWAYS WITH OTHER DISCIPLINES. PROVIDE SUPPORTS PER NEC.

B. OUTDOORS: APPLY AS SPECIFIED BELOW (UNLESS NOTED OTHERWISE)

- EXPOSED CONDUIT (DAMP, DRY, OR CONCEALED LOCATIONS): ELECTRICAL METALLIC TUBING (EMT), COMPRESSION FITTINGS.
- EXPOSED CONDUIT (WET LOCATIONS): ELECTRICAL METALLIC TUBING (EMT), LISTED WEATHERPROOF COMPRESSION FITTINGS
- EXPOSED CONDUIT (WHERE SUBJECT TO PHYSICAL DAMAGE): GALVANIZED RIGID CONDUIT (GRC), INTERMEDIATE METAL CONDUIT (IMC).
- UNDERGROUND CONDUIT: RIGID NONMETALLIC CONDUIT, MINIMUM SCHEDULE 40.
- CONNECTION TO VIBRATING EQUIPMENT: LIQUID–TIGHT FLEX METAL CONDUIT 18" MAX.
- BOXES AND ENCLOSURES, ABOVE GROUND: NEMA 250, TYPE 3R.

C. INDOORS APPLY AS SPECIFIED BELOW (UNLESS NOTED OTHERWISE):

- EXPOSED: ELECTRICAL METALLIC TUBING (EMT).
- EXPOSED (WHERE SUBJECT TO PHYSICAL DAMAGE): GALVANIZED RIGID CONDUIT (GRC), INTERMEDIATE METAL CONDUIT (IMC).
- CONCEALED: ELECTRICAL METALLIC TUBING (EMT).
- CONCEALED, FROM JUNCTION BOX TO CONCEALED WIRING DEVICE BOX(ES): ELECTRICAL METALLIC TUBING (EMT).
- EMBEDDED IN SLAB: RIGID NONMETALLIC CONDUIT, SCHEDULE 40 MIN.
- WITHIN PLENUMS: NO LIQUID–TIGHT FLEXIBLE METAL CONDUIT.
- CONNECTION TO VIBRATING EQUIPMENT: LIQUID–TIGHT FLEXIBLE METAL CONDUIT 18" MAX.
- TYPE NM CABLE (ROMEX) IS NOT PERMITTED IN COMMERCIAL APPLICATIONS.
- BOXES AND ENCLOSURES: NEMA 250, TYPE 1, EXCEPT USE NEMA 250, TYPE 4 STAINLESS STEEL OR NONMETALLIC IN INSTITUTIONAL AND COMMERCIAL KITCHENS AND DAMP OR WET LOCATIONS. 4" SQUARE x 2–1/8" DEEP BOXES.
- EMT FITTINGS (INDOORS): COMPRESSION.

D. MINIMUM RACEWAY SIZE: 3/4–INCH (21–MM) TRADE SIZE. 1" MINIMUM, UNDERGROUND.

E. DO NOT INSTALL ALUMINUM CONDUITS, BOXES, OR FITTINGS IN CONTACT WITH CONCRETE OR EARTH.

F. CONCEAL CONDUIT AND EMT, UNLESS INDICATED OTHERWISE (EXCEPTION: ELECTRICAL AND MECHANICAL ROOMS), WITHIN FINISHED WALLS, CEILINGS, AND FLOORS. KEEP RACEWAYS AT LEAST 6 INCHES AWAY FROM FLUES, STEAM OR HOT WATER PIPES.

G. COMPLY WITH REQUIREMENTS IN SECTION 260529 "HANGERS AND SUPPORTS FOR ELECTRICAL SYSTEMS" FOR HANGERS AND SUPPORTS.

H. INSTALL NO MORE THAN THE EQUIVALENT OF THREE 90–DEGREE BENDS IN ANY CONDUIT RUN EXCEPT FOR CONTROL WIRING CONDUITS, FOR WHICH FEWER BENDS ARE ALLOWED. SUPPORT WITHIN 12 INCHES (300 MM) OF CHANGES IN DIRECTION.

I. SUPPORT CONDUIT WITHIN 12 INCHES (300 MM) OF ENCLOSURES TO WHICH ATTACHED.

J. RACEWAYS EMBEDDED IN SLABS:

- RUN CONDUIT LARGER THAN 1–INCH (27–MM) TRADE SIZE, PARALLEL OR AT RIGHT ANGLES TO MAIN REINFORCEMENT. WHERE AT RIGHT ANGLES TO REINFORCEMENT, PLACE CONDUIT CLOSE TO SLAB SUPPORT. SECURE RACEWAYS TO REINFORCEMENT AT MAXIMUM 10–FOOT (3–M) INTERVALS.
- ARRANGE RACEWAYS TO CROSS BUILDING EXPANSION JOINTS AT RIGHT ANGLES WITH EXPANSION FITTINGS.

K. STUB–UPS TO ABOVE RECESSED CEILINGS:

- USE EMT, IMC, OR RMC FOR RACEWAYS.
- USE A CONDUIT BUSHING OR INSULATED FITTING TO TERMINATE STUB–UPS NOT TERMINATED IN HUBS OR IN AN ENCLOSURE.

L. PROVIDE APPROVED FIRE SEALS AND SEALING MATERIAL WHEREVER CONDUIT PASSES THROUGH FIRE–RATED WALLS OR FLOORS. (SEE ARCHITECTURAL PLANS)

M. INSTALL PULL WIRES IN EMPTY RACEWAYS. USE NO. 14 AWG ZINC –COATED STEEL OR MONOFILAMENT PLASTIC LINE HAVING NOT LESS THAN 200 LBS TENSILE STRENGTH. LEAVE NOT LESS THAN 12 INCHES OF SLACK AT EACH END OF THE PULL WIRE.

260519 LOW VOLTAGE (600V AND BELOW) ELECTRICAL POWER CONDUCTORS AND CABLES

ALUMINUM AND COPPER CONDUCTORS: COMPLY WITH NEMA WC 70/ICEA S–95–658.

CONDUCTOR MATERIAL APPLICATIONS:

A. FEEDERS: COPPER FOR FEEDERS SMALLER THAN 100A RATING; COPPER OR ALUMINUM FOR FEEDERS 100A AND LARGER. SOLID FOR NO. 12 AWG AND SMALLER; STRANDED FOR NO. 10 AWG AND LARGER.

B. BRANCH CIRCUITS: COPPER. SOLID FOR NO. 12 AWG AND SMALLER; STRANDED FOR NO. 10 AWG AND LARGER.

CONDUCTOR INSULATION:

A. FEEDERS: TYPE XHHW–2, SINGLE CONDUCTORS IN RACEWAY.

B. BRANCH CIRCUITS, TYPE THHN/THWN–2, SINGLE CONDUCTORS IN RACEWAY.

C. CONCEAL CABLES IN FINISHED WALLS, CEILINGS, AND FLOORS UNLESS OTHERWISE INDICATED.

D. USE MANUFACTURER APPROVED PULLING COMPOUND OR LUBRICANT WHERE NECESSARY; COMPOUND USED MUST NOT DETERIORATE CONDUCTOR OR INSULATION. DO NOT EXCEED MANUFACTURER'S RECOMMENDED MAXIMUM PULLING TENSIONS AND SIDEWALL PRESSURE VALUES.

E. USE PULLING MEANS, INCLUDING FISH TAPE, CABLE, ROPE, AND BASKET–WEAVE WIRE/CABLE GRIPS, THAT WILL NOT DAMAGE CABLES OR RACEWAY.

F. TIGHTEN ELECTRICAL CONNECTORS AND TERMINALS ACCORDING TO MANUFACTURER'S PUBLISHED TORQUE–TIGHTENING VALUES. IF MANUFACTURER'S TORQUE VALUES ARE NOT INDICATED, USE THOSE SPECIFIED IN UL486A–486B.

G. MAKE SPLICES, TERMINATIONS, AND TAPS THAT ARE COMPATIBLE WITH CONDUCTOR MATERIAL. USE OXIDE INHIBITOR IN EACH SPLICE, TERMINATION, AND TAP FOR ALUMINUM CONDUCTORS.

H. WIRING AT OUTLETS: INSTALL CONDUCTOR AT EACH OUTLET, WITH AT LEAST 6 INCHES OF SLACK.

I. APPLY FIRESTOPPING TO ELECTRICAL PENETRATIONS OF FIRE–RATED FLOOR AND WALL ASSEMBLIES TO RESTORE ORIGINAL FIRE–RESISTANCE RATING OF ASSEMBLY.

J. AFTER INSTALLING CONDUCTORS AND CABLES AND BEFORE ELECTRICAL CIRCUITRY HAS BEEN ENERGIZED, TEST SERVICE ENTRANCE AND FEEDER CONDUCTORS. PERFORM EACH VISUAL AND MECHANICAL INSPECTION AND ELECTRICAL TEST STATED IN NETA ACCEPTANCE TESTING SPECIFICATION. CERTIFY COMPLIANCE WITH TEST PARAMETERS.

- PERFORM INSULATION RESISTANCE ON EACH CONDUCTOR WITH RESPECT TO GROUND AND ADJACENT CONDUCTORS. 1000 VOLTS DC FOR 600 VOLT RATED CABLE. TEST DURATION SHALL BE ON MINUTE.
- MINIMUM INSULATION RESISTANCE VALUES SHOULD NOT BE LESS THAN 50 MEGOHMS.

260526 GROUNDING

1. WIRE AND CABLE CONDUCTORS

   A. GENERAL: UNLESS OTHERWISE INDICATED, PROVIDE ELECTRICAL GROUNDING CONDUCTORS FOR EQUIPMENT, SYSTEM, AND SEPARATELY DERIVED SYSTEM GROUNDING CONNECTIONS THAT MATCH POWER SUPPLY WIRING MATERIALS AND ARE SIZED ACCORDING TO NEC.

   B. EQUIPMENT GROUNDING CONDUCTOR: GREEN INSULATED.

   C. GROUNDING ELECTRODE CONDUCTOR: STRANDED BARE CU.

2. CONNECTOR PRODUCTS

   A. GENERAL: LISTED AND LABELED AS GROUNDING CONNECTORS FOR THE MATERIALS USED.

3. GROUNDING ELECTRODES

   A. GROUND RODS: COPPER–CLAD STEEL 5/8" X 8'–0" (U.N.O)

   B. PLATE ELECTRODES: COPPER PLATES, MINIMUM 0.10 INCH THICK.

   C. GROUND WELLS: CONCRETE, 9" DIA. X 24" DEEP (U.N.O.), WITH COVER MARKED "GROUND".

4. APPLICATION

   A. EQUIPMENT GROUNDING CONDUCTOR APPLICATION: COMPLY WITH NEC ARTICLE 250 FOR SIZES AND QUANTITIES OF EQUIPMENT GROUNDING CONDUCTORS, EXCEPT WHERE LARGER SIZES OR MORE CONDUCTORS ARE INDICATED.
      - A SEPARATE GREEN GROUND WIRE SHALL BE PROVIDED BETWEEN THE LOAD AND DISTRIBUTION SOURCE FOR ALL BRANCH CIRCUITS AND FEEDERS (U.N.O)

   B. SIGNAL AND COMMUNICATIONS: FOR TELEPHONE, ALARM, AND COMMUNICATION SYSTEMS, PROVIDE A #4 AWG MINIMUM GREEN INSULATED COPPER CONDUCTOR IN RACEWAY FROM THE GROUNDING ELECTRODE SYSTEM TO EACH TERMINAL CABINET OR CENTRAL EQUIPMENT LOCATION.

   C. METAL POLES SUPPORTING OUTDOOR LIGHTING FIXTURES: GROUND POLE TO A GROUNDING ELECTRODE AS INDICATED IN ADDITION TO SEPARATE EQUIPMENT GROUNDING CONDUCTOR RUN WITH SUPPLY BRANCH CIRCUIT.

   D. CONNECTIONS TO LIGHTNING PROTECTION SYSTEM: (WHEN APPLICABLE) COORDINATE WITH LIGHTNING PROTECTION CONTRACTOR FOR ALL GROUND CONNECTIONS TO THE LIGHTNING PROTECTION SYSTEM PER NFPA 78 "LIGHTNING PROTECTION CODE." LIGHTNING PROTECTION CONTRACTOR SHALL INSTALL SYSTEM WITH 'MASTER LABEL'.

   E. GENERAL: GROUND ELECTRICAL SYSTEMS AND EQUIPMENT IN ACCORDANCE WITH NEC REQUIREMENTS EXCEPT WHERE THE DRAWINGS OR SPEC. EXCEED NEC REQUIREMENTS.
      - ALL EQUIPMENT, GROUND PADS, ENCLOSURES, DEVICES, ETC. SHALL BE BONDED TOGETHER.
      - GROUND ELECTRICAL SERVICE SYSTEM NEUTRAL AT SERVICE ENTRANCE EQUIPMENT TO GROUND ELECTRODE SYSTEM.
      - GROUND EACH SEPARATELY–DERIVED SYSTEM NEUTRAL TO GROUND ELECTRODE SYSTEM.

   F. TIGHTEN GROUNDING AND BONDING CONNECTORS AND TERMINALS, IN ACCORDANCE WITH MANUFACTURER'S PUBLISHED TORQUE TIGHTENING VALUES OR UL 486A.

5. FIELD QUALITY CONTROL

   A. TESTS: SUBJECT THE COMPLETED GROUNDING SYSTEM TO A MEGGER TEST (THIRD–PARTY).

   B. GROUND/RESISTANCE MAXIMUM VALUES SHALL BE AS FOLLOWS:
      - EQUIPMENT RATED 500 KV

LIGHTING SPECIFICATIONS

E0.3

283100 FIRE DETECTION AND ALARM

CONTINUED:

J. SPRINKLER SYSTEM MONITORING: PROVIDE INTERFACE MODULES AT EACH SPRINKLER SYSTEM FLOW AND TAMPER SWITCH. IF MORE THAN ONE TAMPER SWITCH IS LOCATED IN ONE AREA, ONLY ONE INTERFACE MODULE IS REQUIRED FOR THE TAMPER SWITCHES.

K. ELEVATOR RETURN CONTROL: PROVIDE CONTROLS REQUIRED FOR ELEVATOR RETURN, TO OPERATE AS FOLLOWS:

- ALARM AT ANY FLOOR OTHER THAN GRADE LEVEL, ELEVATOR SHAFT OR ELEVATOR CONTROL ROOM, ELEVATOR SHALL RETURN TO GRADE LEVEL.
- ALARM AT GRADE LEVEL: ELEVATOR SHALL RETURN TO ALTERNATE FLOOR AS DIRECTED BY THE AUTHORITY HAVING JURISDICTION.

L. BEAM DETECTORS: PROVIDE COMBINATION HEAT AND SMOKE DETECTION BEAM DETECTORS THAT OPERATE WITH TRANSMITTED INFRARED LIGHT TO A RECEIVER UNIT. THE UNIT SHALL BE CAPABLE OF DETECTING ABNORMAL HEAT OR SMOKE IN ITS FIELD OF VIEW AND CONNECT TO AN INTERFACE MODULE OF THE FIRE ALARM SYSTEM.

M. SPRINKLER FLOW SWITCHES: PROVIDE A VANE–TYPE WATER FLOW SWITCH (WHERE SHOWN ON DRAWINGS) DESIGNATED TO DETECT A SUSTAINED FLOW OF WATER EXCEEDING 10 GPM. THE SWITCH SHALL HAVE A BUILT–IN ADJUSTABLE PNEUMATIC RETARD DEVICE TO DELAY ACTUATION OF ELECTRICAL SWITCHES AND TWO SINGLE–POLE DOUBLE–THROW SNAP ACTION MICRO SWITCHES RATED AT 10 AMPS, 125 VAC, EACH. THE FLOW SWITCH SHALL BE RATED FOR A MINIMUM OF 450 PSI WORKING SERVICE PRESSURE.

N. SPRINKLER TAMPER SWITCHES: PROVIDE A SCREW AND YOKE–TYPE GATE VALVE TAMPER SWITCH (WHERE SHOWN ON DRAWINGS). THE TAMPER SWITCH SHALL HAVE ONE SINGLE–POLE DOUBLE–THROW MICRO SWITCH RATED AT 10 AMPS, 125 VAC.

O. KNOX BOXES: PROVIDE A KNOX BOX AT LOCATION AS DIRECTED BY THE OWNER. KNOX BOXES SHALL ONLY BE PURCHASED THROUGH THE LOCAL FIRE DEPARTMENT.

P. ELECTRIC DOOR HOLDERS: PROVIDE ELECTRIC WALL–MOUNTED DOOR HOLDERS THAT ARE POWERED AND CONTROLLED FROM THE FIRE ALARM SYSTEM.

Q. INTERFACE MODULES: PROVIDE INTERFACE MODULES FOR THE MONITORING AND CONTROL OF REMOTE FUNCTIONS SUCH AS SPRINKLER SYSTEM FLOW AND TAMPER SWITCHES, ELEVATOR RECALL, DOOR HOLDER OPERATION, SECURITY SYSTEM INTERFACE, KNOX BOX CONNECTION AND ANY OTHER AUXILIARY FUNCTIONS. THESE DEVICES SHALL BE CONNECTED TO THE INPUT DEVICE CIRCUIT FOR THE AREA IN WHICH THEY ARE INSTALLED, AND SUPERVISE THOSE INPUT DEVICE FIELD CONNECTIONS.

INSTALLATION OF BASIC WIRING SYSTEM MATERIALS

A. WIRING: WIRING OF FIRE ALARM AND DETECTION SYSTEM IS WORK OF THIS SECTION, BUT IS NOT SPECIFICALLY DETAILED ON DRAWINGS.

B. CONTRACTOR SHALL PROVIDE WIRING IN ACCORDANCE WITH MANUFACTURER'S REQUIREMENTS. COLOR CODE WIRING AND INSTALL PER MANUFACTURER'S POINT–TO–POINT WIRING DIAGRAM. DETERMINE EXACT NUMBER OF WIRES FOR EACH FIRE AREA ZONE FROM NUMBER AND TYPES OF DEVICES INSTALLED. CONNECT EACH DEVICE WITH SUFFICIENT WIRING TO COMPLETE ITS INTENDED OPERATION. POWER SHALL NOT BE APPLIED TO THE SYSTEM UNTIL THE REPRESENTATIVE OF THE MANUFACTURER AND THE FIRE MARSHALL HAS APPROVED THE CONNECTIONS TO THE CONTROL EQUIPMENT.

C. THE SYSTEM SHALL BE INSTALLED UTILIZING CONDUIT, APPROVED METAL RACEWAY OR UL–APPROVED FIRE CABLE FOR USE IN PLENUM SPACES.

D. WHERE THERE ARE A NUMBER OF DEVICES REQUIRING POWER SUCH AS SMOKE DETECTORS, FAN RELAYS, DOOR HOLDERS AND SMOKE DAMPER OPERATORS INSTALLED IN A CIRCUIT, GROUP IN NUMBERS SO POWER REQUIRED DOES NOT EXCEED 80% OF MANUFACTURER'S POWER SUPPLY RATING. PROVIDE EXTRA WIRING, OR EXTRA POWER SUPPLIES REQUIRED TO FULFILL THAT REQUIREMENT. IN ADDITION, PROVIDE EXTRA OR LARGER SIZE WIRING TO ALLEVIATE VOLTAGE DROPS WHICH MAKES DEVICE OPERATE BEYOND VOLTAGE LIMITS FOR WHICH IT WAS DESIGNED.

E. AFTER INSTALLATION OF SMOKE DETECTORS AND WIRING, CONTRACTOR SHALL PROVIDE A COVER OVER THE UNITS UNTIL THE TIME OF ACCEPTANCE TO KEEP CONTAMINANTS FROM ENTERING THE UNITS.

F. INSTALL WIRING, RACEWAYS, AND ELECTRICAL BOXES AND FITTINGS IN ACCORDANCE WITH DIVISION 16 SPECIFICATIONS. ANY CONDUCTORS, WIRE OR CABLE NOT INSTALLED IN CONDUIT SHALL BE U.L. APPROVED FIRE RATED PLENUM CABLE. THE SYSTEM CONDUIT AND WIRE SHALL BE SOLELY FOR THE PURPOSE OF THE FIRE ALARM SYSTEM.

G. INSTALL WIRES AND CABLES WITHOUT SPLICES. MAKE CONNECTIONS AT TERMINAL STRIPS IN CABINETS OR AT EQUIPMENT TERMINALS.

H. POWER FOR THE FIRE ALARM PANEL SHALL BE CONNECTED TO THE CIRCUIT BREAKER AS INDICATED ON THE DRAWINGS OR (IF NOT INDICATED) TO THE NEAREST AVAILABLE PANELBOARD ON A 20A,1P CIRCUIT BREAKER. PROVIDE A HANDLE LOCKING DEVICE FOR BREAKER INSTALLED IN THE "ON" POSITION.

4. FIELD QUALITY CONTROL

A. CONNECTION, DEMONSTRATION, AND SUPERVISION: MAKE CONNECTIONS TO PANEL UNDER MANUFACTURER'S SUPERVISION. RUN WIRING TO MAIN FIRE ALARM PANEL AND COMPLETE CONNECTIONS TO PANEL UTILIZING MANUFACTURER'S TECHNICIANS.

B. WHERE WORK CONSISTS OF ADDITIONS OR EXTENSIONS TO EXISTING SYSTEM, PRIOR TO STARTING WORK, ESTABLISH THAT SYSTEM IS IN PROPER WORKING ORDER. IF CONDITION EXISTS WHICH PREVENTS NORMAL OPERATION OF SPECIFIED ADDITIONS AND EXTENSIONS, BRING THIS FACT TO ENGINEER'S ATTENTION PRIOR TO DOING WORK AFFECTING EXISTING SYSTEM. WHERE WORK IS DONE WITHOUT SUCH NOTIFICATION, IT IS ASSUMED THAT CONNECTIONS HAVE BEEN MADE TO A WORKING SYSTEM, AND PERFORMANCE REQUIREMENTS AND GUARANTEE WILL APPLY TO ENTIRE SYSTEM.

C. DURING THE INSTALLATION PERIOD, THE EQUIPMENT SUPPLIER SHALL HAVE A REPRESENTATIVE VISIT THE JOB SITE TO REVIEW THE WIRING AND INSTALLATION WITH THE INSTALLING CONTRACTOR. AFTER THE SYSTEM IS COMPLETED, A REPRESENTATIVE OF THE SUPPLIER SHALL TEST THE ENTIRE SYSTEM FOR PROPER OPERATION. FURNISH DOCUMENTATION SHOWING TESTING WAS COMPLETED. A MEETING SHALL THEN BE ARRANGED BY THE ELECTRICAL CONTRACTOR FOR DEMONSTRATION ON THE OPERATION OF THE SYSTEM WITH THE OWNER'S REPRESENTATIVE AND LOCAL FIRE DEPARTMENT.

5. WARRANTY

A. THE ENTIRE INSTALLATION SHALL BE GUARANTEED FOR A PERIOD OF ONE YEAR FROM THE DATE OF FINAL ACCEPTANCE OF THE SYSTEM BY THE OWNER'S REPRESENTATIVE. THE GUARANTEE SHALL INCLUDE ALL PARTS, LABOR, TRAVEL AND ANY OTHER ITEMS REQUIRED TO KEEP THE SYSTEM IN A FIRST CLASS OPERATING CONDITION. THE OWNER SHALL BE OFFERED A FIRE ALARM SERVICE AGREEMENT TO COVER THE RECOMMENDED PERIODIC INSPECTION AND TESTING FREQUENCY.

B. SERVICE TECHNICIANS AND REPLACEMENT COMPONENTS FOR THE SYSTEM SPECIFIED SHALL BE AVAILABLE LOCALLY FROM AN AUTHORIZED SERVICE REPRESENTATIVE OF THE MANUFACTURER WHO IS ABLE TO PROVIDE EVIDENCE OF TECHNICAL TRAINING AND AUTHORIZATION BY THE MANUFACTURER.

283100 FIRE DETECTION AND ALARM

QUALITY ASSURANCE

A. MANUFACTURERS: FIRMS REGULARLY ENGAGED IN MANUFACTURE OF FIRE ALARM AND DETECTION SYSTEMS OF THE TYPE, OPERATION, AND CHARACTERISTICS REQUIRED WITH SYSTEMS THAT HAVE BEEN INSTALLED IN SIMILAR SERVICE FOR NOT LESS THAN 3 YEARS.

B. EQUIPMENT SUPPLIER: FIRMS THAT HAVE BEEN IN BUSINESS OF PROVIDING FIRE ALARM AND DETECTION SYSTEMS ON A CONTINUOUS BASIS FOR NOT LESS THAN 3 YEARS AND WHO CAN DEMONSTRATE THAT THEIR PRESENT BUSINESS HAS PROVIDED SATISFACTORY SALES AND SERVICE OF THE TYPE SYSTEM REQUIRED IN THESE SPECIFICATIONS. THE EQUIPMENT SUPPLIER SHALL BE REQUIRED TO DEMONSTRATE THAT IT MAINTAINS A FULLY STAFFED SERVICE DEPARTMENT, TRAINED ON EQUIPMENT SIMILAR TO THAT REQUIRED IN THESE SPECIFICATIONS, WITHIN A NORMAL 1–HOUR DRIVING DISTANCE OF THE PROJECT SITE.

C. INSTALLER: FIRMS QUALIFIED WITH AT LEAST 5 YEARS OF SUCCESSFUL INSTALLATION EXPERIENCE ON PROJECTS WITH FIRE ALARM AND DETECTION SYSTEM INSTALLATION WORK SIMILAR TO THIS PROJECT.

CODES AND STANDARDS:

A. COMPLY WITH THE FOLLOWING:

- NATIONAL ELECTRICAL CODE (NEC)
- NFPA STANDARDS: 72A, 72E, AND 71
- AMERICANS WITH DISABILITIES ACT (ADA)
- LATEST CODES AS ADOPTED BY THE LOCAL AUTHORITY. THE CONTRACTOR AND EQUIPMENT SUPPLIER SHALL ASSIST THE BUILDING CODE INSPECTORS IN THE FINAL TEST OF EQUIPMENT AND OPERATION OF THE SYSTEM.

B. UL COMPLIANCE AND LABELING: PROVIDE FIRE ALARM AND DETECTION SYSTEM COMPONENTS WHICH ARE UL–LISTED AND LABELED FOR THEIR INTENDED USE AND SERVICE.

SUBMITTALS

A. PRODUCT DATA: SUBMIT MANUFACTURER'S DATA ON FIRE ALARM SYSTEMS INCLUDING, BUT NOT LIMITED TO, WIRING DIAGRAMS, CONTROL PANEL LAYOUTS, DEVICE LOCATIONS, INSTRUCTIONS FOR INSTALLATION, AND OPERATION AND MAINTENANCE MANUALS.

B. SHOP DRAWINGS: PROVIDE SHOP DRAWINGS SHOWING EQUIPMENT/DEVICE LOCATIONS AND CONNECTING WIRING OF ENTIRE FIRE ALARM SYSTEM. INCLUDE WIRING AND RISER DIAGRAMS.

PRODUCTS

ACCEPTABLE MANUFACTURERS

A. NOTIFIER, EMHART INDUSTRIES INC, FIRE LITE, EST, RADIONICS, OR APPROVED EQUAL.

FIRE ALARM AND DETECTION SYSTEMS

A. GENERAL: PROVIDE COMPLETE FIRE ALARM AND DETECTION SYSTEM PRODUCTS OF TYPES, SIZES, AND CAPACITIES INDICATED, WHICH COMPLY WITH MANUFACTURER'S STANDARD DESIGN, MATERIALS, COMPONENTS; CONSTRUCTED IN ACCORDANCE WITH PUBLISHED PRODUCT INFORMATION, AND AS REQUIRED FOR COMPLETE AND OPERATING INSTALLATION.

B. NOTE: MANUFACTURER'S CATALOG NUMBERS (INDICATED IN SCHEDULE) ARE TO ESTABLISH A BASIS OF DESIGN QUALITY MINIMUM STANDARD ONLY AND IS NOT INTENDED TO ESTABLISH A DICTATORIAL OR PROPRIETARY MANUFACTURER.

C. OPERATION: THE SYSTEM SPECIFIED IS A ZONED TYPE SYSTEM THAT PROVIDES THE CAPABILITY OF MONITORING DEVICES, SUCH AS SMOKE DETECTORS, DUCT DETECTORS, HEAT DETECTORS, MANUAL PULL STATIONS, SPRINKLER ACTIVATING DEVICES, AND OTHER AUXILIARY FUNCTIONS FOR ALARM AND TROUBLE INDICATIONS. ALL ITEMS MONITORED SHALL BE CONNECTED TO A ZONE INDICATED ON THE DRAWINGS. THE ACTUATION OF AN ALARM INITIATION DEVICE SHALL CAUSE THE FOLLOWING OPERATION:

- ILLUMINATE THE APPROPRIATE ZONE INDICATOR LED ON THE ASSOCIATED FIRE ALARM CONTROL PANEL.
- OPERATE ALL SIGNALING DEVICES ON A CONTINUOUS BASIS UNTIL EITHER MANUALLY SILENCED OR AUTOMATICALLY AFTER 10 MINUTES.
- PROVIDE OUTPUTS FOR CONNECTION TO THE SITE SECURITY AND FIRE CONTROL CENTER.

D. BATTERY STANDBY: PROVIDE IN THE CONTROL UNIT CABINET, BATTERIES THAT WILL PROVIDE SUFFICIENT POWER TO ALLOW FULL SUPERVISORY CONDITIONS FOR ALL CONNECTED DEVICES AND OPERATE THE SIGNAL DEVICES FOR A MINIMUM OF FIVE MINUTES IF AN ALARM OCCURS AT THE END OF THE 24–HOUR PERIOD. THE BATTERIES SHALL BE THE SEALED TYPE AND AUTOMATICALLY RECHARGE AFTER NORMAL POWER IS RESTORED.

FIRE DOORS (AS APPLICABLE):

A. DOORS HELD OPEN BY ELECTRIC DOOR HOLDERS SHALL BE ALLOWED TO AUTOMATICALLY CLOSE DURING ANY FIRE ALARM CONDITION IN THE FACILITY. THESE DOORS SHALL NOT BE ABLE TO BE AUTOMATICALLY HELD OPEN UNTIL THE FIRE ALARM SYSTEM HAS BEEN RESET.

SECURITY SYSTEM DOORS (AS APPLICABLE):

A. DOORS THAT ARE LOCKED BY THE SECURITY SYSTEM THROUGH ELECTRIC DOOR STRIKES, SHALL BE AUTOMATICALLY UNLOCKED DURING FIRE ALARM CONDITION IN THE RESPECTIVE AREA IN WHICH THEY ARE INSTALLED. OUTPUT SHALL BE PROVIDED TO INTERFACE WITH EACH INDIVIDUALLY SECURED AREA IN THE SECURITY SYSTEM.

MATERIALS AND EQUIPMENT

A. WIRE AND CABLE FOR ALL FIRE ALARM SYSTEM AUXILIARY EQUIPMENT SHALL BE IN ACCORDANCE WITH MANUFACTURER'S REQUIREMENTS.

B. FIRE ALARM CONTROL PANELS: PROVIDE WALL–MOUNTED CABINETS THAT INCLUDE THE REQUIRED POWER SUPPLY, ZONE INDICATING DISPLAY UNIT WITH REQUIRED ZONES, BATTERY PACK, AND SILENCE AND RESET SWITCHES FOR THE OPERATION DESCRIBED ABOVE.

C. MANUAL FIRE ALARM PULL STATIONS: PROVIDE DOUBLE–ACTION MANUAL STATIONS WITH KEYED LOCK RESET AND MATCHING BACKBOXES FOR SURFACE LOCATIONS. MOUNT 42 INCHES ABOVE FINISHED FLOOR TO CENTER LINE OF PULL STATION.

D. AUTOMATIC FIRE DETECTORS: PROVIDE RATE COMPENSATED HEAT DETECTORS THAT OPERATE IN COMBINATION WITH 135–DEGREE FIXED TEMPERATURE ELEMENT. THE HEAT DETECTOR SHALL MOUNT IN A STANDARD DETECTOR BASE AND INCLUDE AN LED THAT ILLUMINATES DURING AN ALARM CONDITION OF THE UNIT. IN AREAS WHERE THERE IS HIGH AMBIENT TEMPERATURE, FIXED TEMPERATURE DETECTORS SHALL BE PROVIDED COMMENSURATE WITH THE AREA INSTALLED.

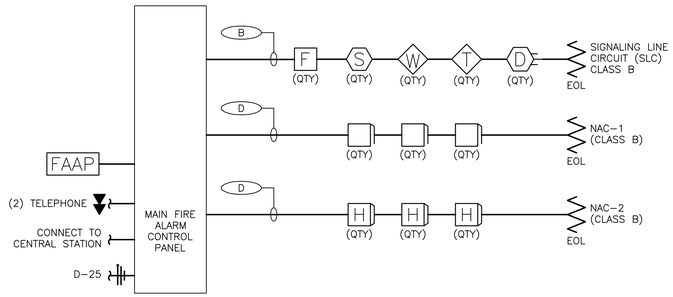
E. AUTOMATIC SMOKE DETECTORS: PROVIDE SMOKE DETECTORS THAT MOUNT ON STANDARD BASES COMMON TO ALL AUTOMATIC DETECTION DEVICES. THE DETECTORS SHALL BE EITHER THE PHOTOELECTRIC TYPE OR IONIZATION PRODUCTS OF COMBUSTION TYPE AS INDICATED ON THE DRAWINGS. EACH SMOKE DETECTOR SHALL CONTAIN AN LED THAT ILLUMINATES WHEN THE DEVICE IS IN ALARM CONDITION.

F. DUCT SMOKE DETECTORS: PROVIDE DUCT–MOUNTED IONIZATION TYPE SMOKE DETECTORS THAT UTILIZE SAMPLING TUBES LENGTH AS REQUIRED FOR SENSING SMOKE CONDITIONS IN DUCTS OF AIR HANDLING UNITS. EACH DUCT ASSEMBLY SHALL CONTAIN AN AUXILIARY RELAY THAT SHUTS DOWN ITS RESPECTIVE AIR HANDLING UNIT IF AN ALARM OCCURS ON THE DUCT DETECTOR.

G. AIR SAMPLING SMOKE DETECTION: PROVIDE HIGH–SENSITIVITY AIR–SAMPLING SMOKE DETECTION SYSTEMS WITHIN CLEANROOMS TO MEET THE REQUIREMENTS OF NFPA 318.

H. AUDIBLE/VISUAL UNITS: PROVIDE COMBINATION HORN/STROBE INDICATORS THAT MOUNT ON A STANDARD FOUR–INCH SQUARE OUTLET BOX. PROVIDE MATCHING RED BOXES FOR SURFACE MOUNTING OR ADAPTER PLATES IF HORN/STROBES MOUNT OVER EXISTING SINGLE GANG BOXES.

I. FIRE ALARM BELLS (EXTERIOR): PROVIDE VIBRATING TEN INCH D.C. ALARM BELLS THAT MOUNT ON A STANDARD FOUR INCH SQUARE WEATHERPROOF OUTLET BOX. PROVIDE MATCHING RED BOXES FOR SURFACE MOUNTING OR ADAPTER PLATES IF BELLS MOUNT OVER EXISTING SINGLE GANG BOXES. BELLS SHALL PRODUCE A SOUND LEVEL OF 90DB AT 10FT.



1 FIRE ALARM RISER DIAGRAM
NO SCALE

FIRE ALARM SYMBOLS

NOTE: NOT ALL SYMBOLS MAY APPLY TO THIS PROJECT

- FACP — FIRE ALARM CONTROL PANEL
- FAAP — FIRE ALARM ANNUNCIATOR
- H — HORN STROBE (SHOW CANDELA)
- H — HORN STROBE (SHOW CANDELA/ CEILING MOUNTED)
- S — SPEAKER STROBE (SHOW CANDELA)
- STROBE ONLY (SHOW CANDELA)
- F — MANUAL PULL STATION
- S — SMOKE DETECTOR (ADD TYPE)
- C — CARBON MONOXIDE DETECTOR
- H — HEAT DETECTOR (SHOW TEMP RATING)
- D — DUCT SMOKE DETECTOR
- MAGNETIC DOOR HOLDER
- FIRE SPRINKLER TAMPER / OSY / PIV VALVE SUPERVISORY SWITCH
- W — WATERFLOW DEVICE
- B — FIRE ALARM BELL
- RBPS — REMOTE BOOSTER POWER SUPPLY
- CR — ADDRESSABLE RELAY POINT / ZONE MODULE
- C H S — CHIME, HORN, SPEAKER ONLY
- F — FIRE FIGHTERS TELEPHONE JACK STATION
- F — FIRE FIGHTERS PERMANENT STATION
- D — DAMPER POSITION SWITCH
- E — ELEVATOR RECALL DESIGNATION
- K — INTERFACE TO KITCHEN HOOD
- S — ELEVATOR SHUNT TRIP
- ESRP — ELEVATOR SUPERVISORY RECALL PANEL

FIRE ALARM NOTES

1. INSTALL, FIRE ALARM CONTROL PANEL. PROVIDE A PLACARD ON THE FIRE ALARM CONTROL PANEL IDENTIFYING THE CENTRAL STATION BY NAME AND TELEPHONE NUMBER.

   TYPE OF SYSTEM
   - CENTRAL STATION
   - HARDWIRE ADDRESSABLE
   - CLASS B WIRING
   - TEMPORAL SOUNDERS
2. INDICATING DEVICES WILL BE LOCATED AS REQUIRED TO MEET CODE REQUIREMENTS.
3. INITIATING DEVICES WILL BE LOCATED AS REQUIRED TO MEET CODE REQUIREMENTS.
4. ALL FIRE ALARM WIRES WILL BE POWER LIMITED, FIRE RATED WIRE. IT WILL BE RUN IN CONDUIT WHERE REQUIRED BY CODE.
5. ALL CONDUCTORS FOR FIRE ALARM SYSTEM SHALL BE MIN. 18ga (CU).
6. ALL F/A DEVICES e.g. (HORNS, PULL STATIONS, DETECTORS, ETC.) SHALL BE RIGIDLY AND SECURE FASTENED TO WALLS OR CEILINGS.
7. NO SMOKE DETECTOR SHALL BE LOCATED CLOSER THAN 36" TO ANY AIR REGISTER OF DIFFUSER.
8. NO HEAT DETECTOR SHALL BE LOCATED CLOSER THAN 18" TO ANY AIR REGISTER OR DIFFUSER.
9. NO HEAT DETECTOR SHALL BE LOCATED CLOSER THAN 36" TO ANY PART OF ANY HEAT GENERATING DEVICE IN MECHANICAL ROOMS SUCH AS FLUES, BOILERS, WATER HEATERS, ETC.
10. NO HEAT DETECTOR SHALL BE LOCATED CLOSER THAN 12" TO ANY PART OF ANY LIGHT FIXTURE.
11. ALL FIRE ALARM DEVICES TO COMPLY FULLY WITH ALL A.D.A. REQUIREMENTS.
12. CALCULATION BOOKLETS ARE TO BE KEPT WITH AND MADE A PART OF THESE APPROVED PLANS. THEY ARE SUBJECT TO REVIEW BY THE FIRE INSPECTOR.
13. DEVICE MOUNTING HEIGHTS: PULL STATIONS @ 48" AFF. WALL MOUNTED NOTIFICATION DEVICE–MOUNT AREAS, AND 80" AFF. (6" BELOW CEILING MIN.)

SEQUENCE OF OPERATION

A. THE ACTIVATION OF MANUAL PULL STATIONS, AREA SMOKE DETECTORS, AND HEAT DETECTORS SHALL CAUSE FIRE ALARM OPERATION AS FOLLOWS:
   1. AUDIBLE APPLIANCES (HORNS) TO SOUND AT A TEMPORAL PATTERN THROUGHOUT THE FACILITY.
   2. VISUAL APPLIANCES (STROBE LIGHTS) TO ACTIVATE THROUGHOUT THE FACILITY.
   3. THE VISUAL INDICATION OF THE ALARM INITIATING AREA OF INCIDENCE BY DEVICE TYPE AND LOCATION AT THE FIRE ALARM CONTROL PANEL.
   4. ACTIVATION OF AN AUDIBLE SIGNAL AT THE FIRE ALARM CONTROL PANEL AND REMOTE ANNUNCIATION PANELS.
   5. DACT REPORTS FIRE ALARM TO CENTRAL STATION (CENTRAL STATION WILL DISPATCH TO FIRE DEPT.)

B. DISPLAY INITIATING DEVICE CIRCUIT TROUBLE CONDITIONS, SINGLE OPENS AND SINGLE GROUNDS, FOR EACH FIRE ALARM AND SUPERVISORY INITIATING CIRCUITS, AND PROVIDE A COMMON SYSTEM TROUBLE AT THE LOCAL FIRE ALARM CONTROL PANELS.

C. DISPLAY NOTIFICATION APPLIANCE CIRCUIT TROUBLE CONDITIONS, SINGLE OPENS, SHORTS, AND SINGLE GROUNDS, FOR EACH CIRCUIT, AND A COMMON SYSTEM TROUBLE AT THE FIRE ALARM CONTROL PANELS.

D. THE EFFECTIVE INTENSITY OF ALL NOTIFICATION STROBES SHALL BE A MINIMUM FOR 15 CANDELA PRODUCING AN EQUIVALENT ILLUMINANCE OF 0.03 LUMENS / SQ. FT. AT 50 FEET ON A HORIZONTAL AXIS.

E. SYSTEM OPERATION SHALL BE LOW VOLTAGE (24 VOLTS DC) INCLUDING ALL SUPERVISORY AND CONTROL FUNCTIONS.

F. UPON LOSS OF 120 VAC OPERATING POWER, THE ENTIRE SYSTEM SHALL OPERATE ON STANDBY BATTERY POWER FOR 24 HOURS IN SUPERVISORY MODE AND THEN BE CAPABLE OF ALARM OPERATION FOR 5 MINUTES.

G. THE TRANSFER TO STANDBY POWER SHALL NOT CAUSE A GENERAL ALARM TO BE GENERATED BUT SHALL BE INDICATED AT THE FIRE ALARM PANEL AND THE REMOTE ANNUNCIATION AS SYSTEM AND BATTERY TROUBLE.

H. AUDIBLE AND VISUAL EVACUATION SIGNALS SHALL MEET THE REQUIREMENTS AND RECOMMENDATIONS OF NFPA–72 AND THE AMERICANS WITH DISABILITIES ACT(ADA).

I. THE ACTIVATION OF DUCT SMOKE DETECTORS SHALL CAUSE THE FIRE ALARM OPERATION AS FOLLOWS:
   1. ACTIVATION OF AN AUDIBLE SUPERVISORY SIGNAL AT THE FIRE ALARM CONTROL PANEL AND THE REMOTE ANNUNCIATION PANEL.
   2. DUCT SMOKE DETECTORS SHALL BE ZONED ON A PER DEVICE BASIS AND BY LOCATION.
   3. DACT REPORTS FIRE ALARM TO CENTRAL STATION (CENTRAL STATION WILL DISPATCH TO FIRE DEPT.)

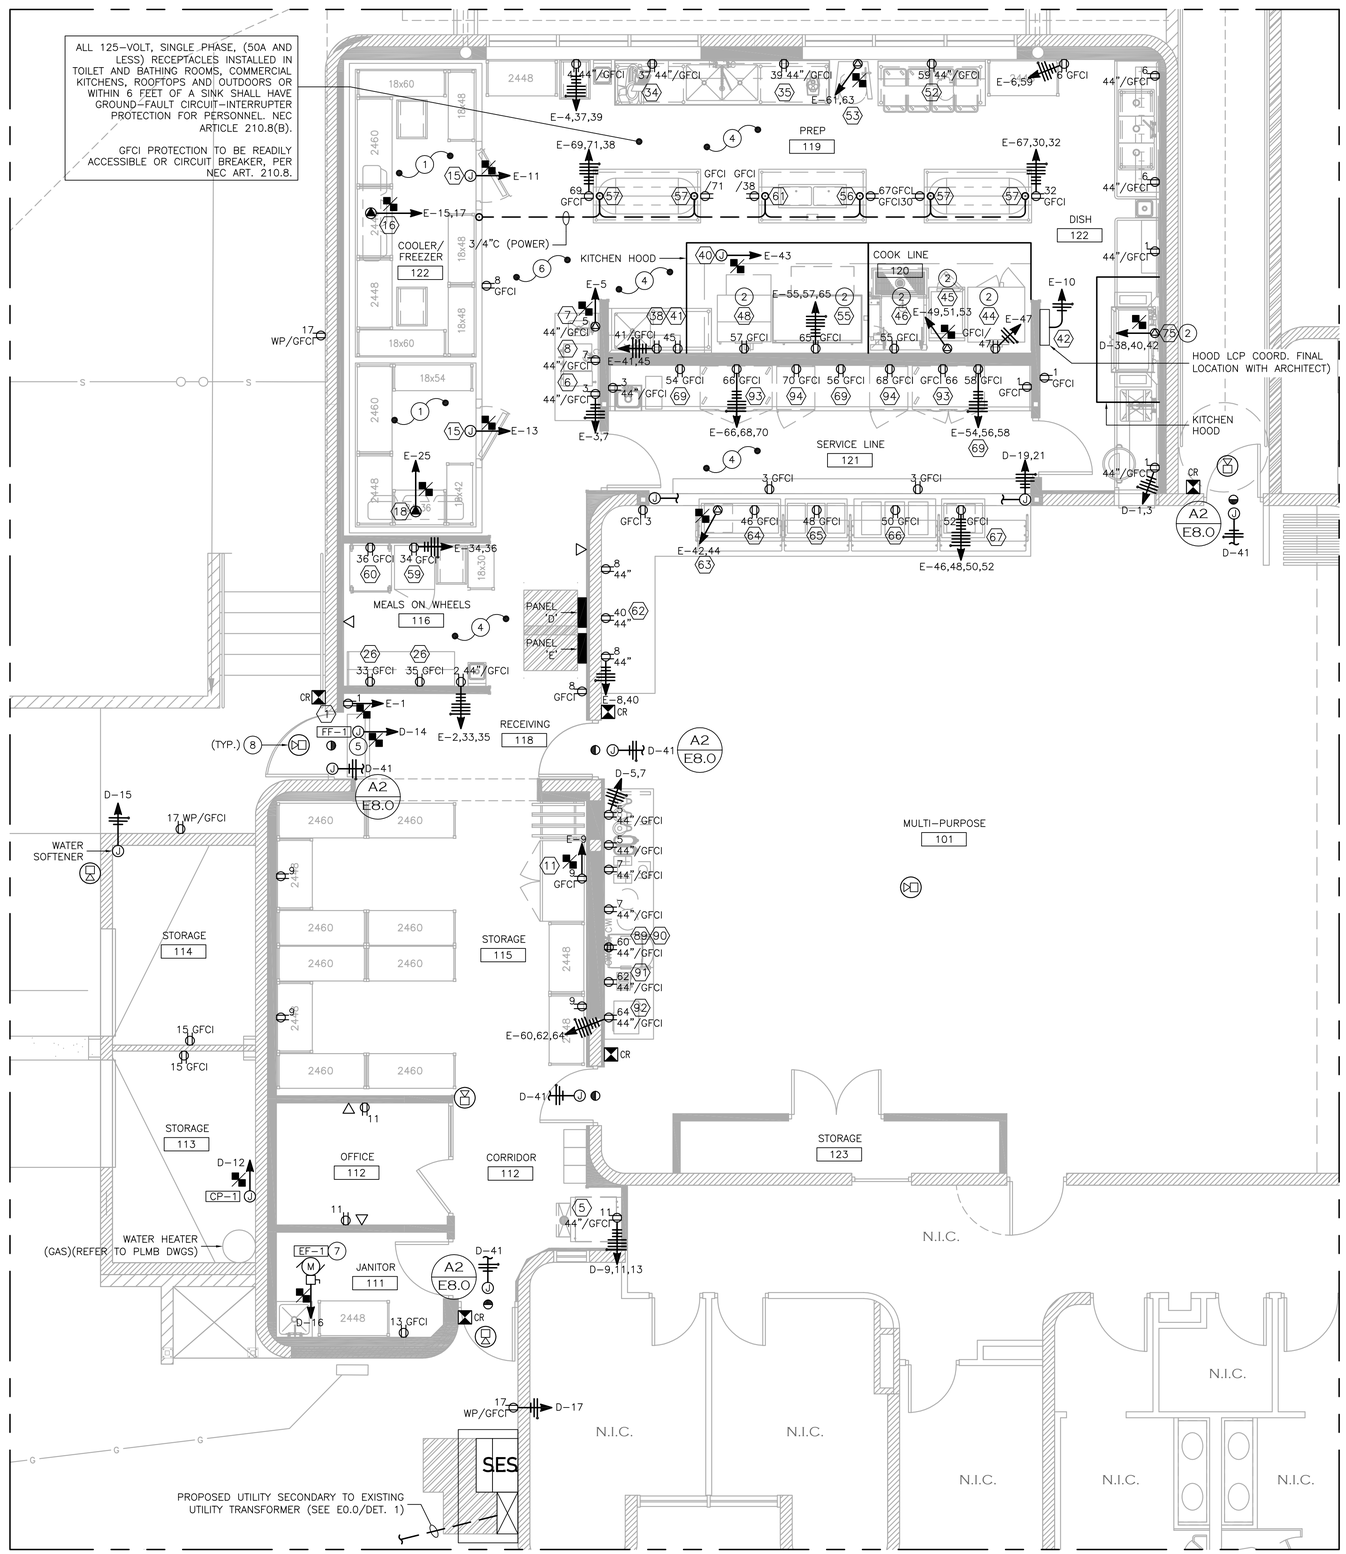
FIRE ALARM RISER DIAGRAM

E0.4



1 POWER PLAN
SCALE: 1/4"=1'-0"

KEYED NOTES

1. WHERE RACEWAYS ARE EXPOSED TO DIFFERENT TEMPERATURES SEAL CONDUITS PER NEC ART. 300.7.
2. ALL KITCHEN EQUIPMENT LOCATED UNDER HOOD AND MAKE UP UNIT SHALL BE SHUT DOWN VIA SHUNT TRIP IN HOOD LOCAL CONTROL PANEL INCLUDING GAS SOLENOID SHUTOFF. THE EXHAUST FANS SHALL RUN CONTINUOUSLY DURING THE SHUTDOWN SEQUENCE. COORDINATE HARDWARE REQUIREMENTS AND TERMINATIONS WITH KITCHEN EQUIPMENT SUPPLIER REFER TO HOOD CONTROL PANEL SHOP DRAWINGS FOR ADDITIONAL INFORMATION.
3. COORDINATE THE FINAL LOCATION OF ALL TV POWER & SIGNAL WIRING DEVICES IN THE FIELD.
4. COORDINATE DEVICE MOUNTING HEIGHTS, LOCATIONS, AND CONNECTION TYPES WITH FINAL KITCHEN EQUIPMENT SHOP DRAWINGS.
5. PROVIDE & INSTALL AIR CURTAIN CONNECTION AND CONTROL WIRING TO DOOR SWITCH. INSTALL TOGGLE DISCONNECT SWITCH HIGH ON INTERIOR WALL ABOVE CURTAIN, TYPICAL.
6. PROVIDE & INSTALL IOT SENSOR(S), CAT6, TYP. 4. COORDINATE FINAL LOCATIONS IN THE FIELD WITH OWNER'S IT REPRESENTATIVE.
7. CONFIRM CONTROLS WITH MECHANICAL PRIOR TO INSTALLATION.
8. INSTALL ROUGH-IN FOR CAMERAS TO BE PROVIDED BY OWNER OR OTHERS.

LEGEND

REFER TO EQUIPMENT SCHEDULE FOR CONNECTION TYPE AND RATING, CONDUIT FILL AND ADDITIONAL BRANCH CIRCUIT REQUIREMENTS.

GENERAL NOTES

A. COORDINATE ALL CONSTRUCTION WITH OTHER TRADES INCLUDING LOCATION OF MECHANICAL EQUIPMENT AND ROUTING OF PIPING, RACEWAYS, DUCTWORK, ETC.

B. SUPPORT ALL RACEWAYS PER NEC. INSTALL CONDUIT WITH 270 DEGREES IN BENDS MAXIMUM WITHOUT PULL POINT. INSTALL JUNCTION / PULL BOXES AS NECESSARY. WHEN SIZES ARE NOT SPECIFIED, SIZE BOXES BASED ON CONDUIT SIZES / FILL PER NEC.

C. MAINTAIN WORKING CLEARANCE ABOUT ELECTRICAL EQUIPMENT PER NEC ART. 110.

D. CONDUIT AND WIRE IS SHOWN DIAGRAMMATICALLY. ACTUAL ROUTING AND REQUIRED NUMBER OF SUPPORTS SHALL BE DETERMINED BY THE CONTRACTOR.

UNLESS CONDUIT ROUTING CLEARLY INDICATES AS SUCH, DO NOT ROUTE CONDUIT ON OR ABOVE ROOFTOPS WITHOUT CONSULTING ENGINEER TO DETERMINE ANY POTENTIAL IMPACT TO RACEWAY OR CONDUCTOR SIZE DUE TO ADDITIONAL AMBIENT DERATING FOR ROOFTOP INSTALLATION.

E. WHERE TELEPHONE, DATA, OR SECURITY DEVICES ARE SHOWN, INSTALL OUTLET BOX AND CONDUIT (3/4" UNLESS NOTED OTHERWISE) ABOVE THE CEILING.

F. VERIFY ALL EQUIPMENT LOCATIONS AND DIMENSIONS IN THE FIELD PRIOR TO INSTALLING RACEWAYS AND WIRING.

G. HVAC EQUIPMENT

DISCONNECTING MEANS: PROVIDE AND INSTALL HEAVY DUTY FUSED DISCONNECT (NEMA 3R OUTDOORS) AND SINGLE POINT POWER CONNECTION TO EQUIPMENT (UNLESS NOTED OTHERWISE). IF STARTERS ARE REQUIRED FOR MECHANICAL EQUIPMENT, ADDITIONAL REQUIREMENTS WILL BE INDICATED ON ONE-LINES, PLAN DRAWINGS, AND MECHANICAL PLANS.

CONTROLS: INSTALL 3/4" CONDUIT (UNLESS NOTED OTHERWISE) FROM HVAC CONTROLS (T-STAT OR OTHER*) TO UNIT. CONTROL WIRING WILL BE INSTALLED BY OTHERS. COORDINATE WITH MECHANICAL CONTRACTOR.
* THIS INCLUDES OTHER EQUIPMENT OR DEVICES WHICH ARE INTERLOCKED WITH THE MECHANICAL UNIT AND INDICATED ON THE MECHANICAL PLANS. COORDINATE RACEWAY REQUIREMENTS WITH MECHANICAL PLANS AND THE MECHANICAL CONTRACTOR.

SMOKE DETECTION: WHEN THE DUCT MOUNTED SMOKE DETECTORS ARE INDICATED, PROVIDE SHUTDOWN WIRING FROM DETECTOR (PROVIDED BY MECHANICAL UNLESS NOTED OTHERWISE) TO HVAC UNIT AND VISIBLE/AUDIBLE SIGNALS IN ACCORDANCE WITH IMC SECTION 606. WHEN A FIRE ALARM SYSTEM IS PRESENT, THE DETECTOR SHALL ALSO BE CONNECTED TO THE FIRE ALARM CONTROL PANEL. PROVIDE 120V BRANCH CIRCUIT FOR DETECTOR POWER (2#12, #12G) WHEN REQUIRED. A DEDICATED BRANCH CIRCUIT WITH "LOCK-ON" TAB WILL BE AVAILABLE IN PANEL SCHEDULE FOR THIS PURPOSE IF NECESSARY.

UNLESS EXISTING, PROVIDE AND INSTALL MAINTENANCE RECEPTACLES WITHIN 25FT OF MECHANICAL EQUIPMENT, PER NEC ART. 610.23.

H. VERIFY THE LOCATION OF FIRE RATED WALLS WITH ARCHITECTURAL DRAWINGS TO DETERMINE APPLICABLE CONDUIT PENETRATION DETAILS.

I. CONTRACTOR SHALL IDENTIFY EACH INDIVIDUAL BRANCH CIRCUIT WITHIN THE PROJECT AREA BY PERMANENT MEANS. ACCEPTABLE METHODS INCLUDE USING PERMANENT MARKER ON JUNCTION BOX COVER PLATES AND BACKSIDE OF DEVICE COVER PLATES OR IDENTIFYING BRANCH WIRING WITHIN JUNCTION BOXES. STICK ON LABELS ARE NOT ACCEPTABLE. [REFERENCE ART. 408.4]

J. CONCEAL CONDUITS IN ALL FINISHED AREAS INCLUDING CONCEALMENT WITHIN MASONRY WALLS WHEN PRESENT. (EXCEPTION: ELECTRICAL, MECHANICAL, AND JANITOR ROOMS).

WHEN OVERHEAD ELECTRICAL WORK IS EXPOSED: MOUNTING OF ALL ELECTRICAL WORK/CONDUIT SHALL RUN IN DECK FLUTES AND/OR TIGHT WITH DECK. CONTRACTOR MAY RUN CONDUIT UNDER FLOOR AS NECESSARY TO FACILITATE CONCEALMENT OF CONDUITS.

NEC ART. 300.4(E) CABLES, RACEWAYS, OR BOXES INSTALLED IN OR UNDER ROOF DECKING. A CABLE, RACEWAY, OR BOX, INSTALLED IN EXPOSED OR CONCEALED LOCATIONS UNDER METAL-CORRUGATED SHEET ROOF DECKING, SHALL BE INSTALLED AND SUPPORTED SO THERE IS NOT LESS THAN 38 MM (1½ IN.) MEASURED FROM THE LOWEST SURFACE OF THE ROOF DECKING TO THE TOP OF THE CABLE, RACEWAY, OR BOX. A CABLE, RACEWAY, OR BOX SHALL NOT BE INSTALLED IN CONCEALED LOCATIONS IN METAL-CORRUGATED, SHEET DECKING-TYPE ROOF.

EXCEPTION: RIGID METAL CONDUIT AND INTERMEDIATE METAL CONDUIT SHALL NOT BE REQUIRED TO COMPLY WITH THESE REQUIREMENTS.

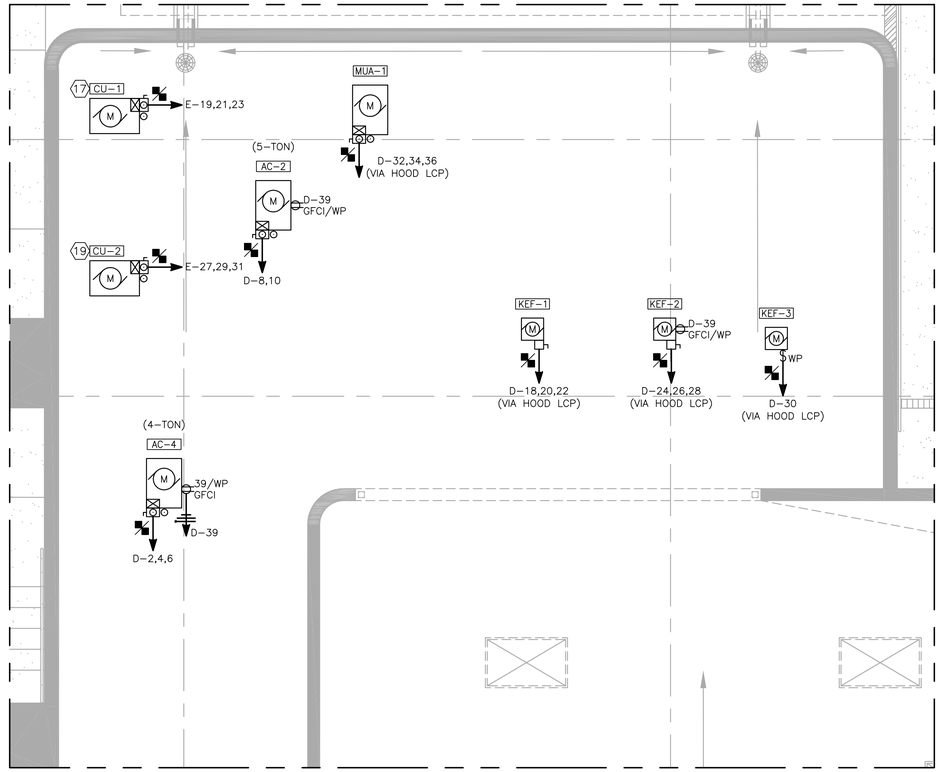
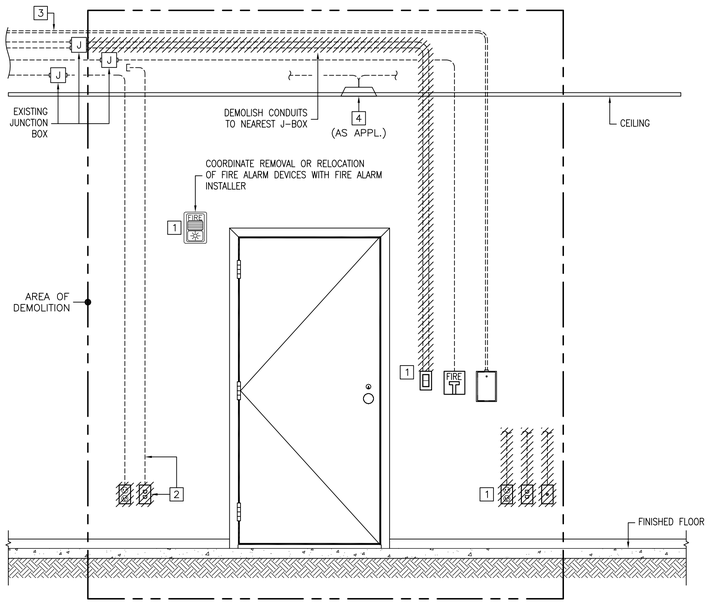
2 PARTIAL DEMOLITION PLAN
SCALE: 1/4"=1'-0"



1 PARTIAL ROOF POWER PLAN
SCALE: 1/4"=1'-0"



1 WALL, CEILING, FLOOR, OR AREA TO BE DEMOLISHED.
- a. REMOVE WIRING DEVICES.
- b. REMOVE BRANCH RACEWAYS & WIRING TO NEAREST JUNCTION BOX OUTSIDE OF DEMOLITION.
- c. REMOVE AND (IF NECESSARY) RELOCATE ANY FIRE ALARM DEVICES. COORDINATE ALL WORK WITH THE FIRE ALARM INSTALLER.
- d. REMOVE ANY UNUSED LOW VOLTAGE WIRING DEVICES.
- e. REMOVE LIGHT FIXTURES, CONTROLS, WIRING.

2 WHEN INDICATED REMOVE & REPLACE WIRING DEVICE(S) & COVER PLATE(S) ONLY (SEE WIRING DEVICE SPECIFICATIONS). EXISTING BRANCH WIRING & RACEWAYS TO THESE DEVICES ARE TO BE UTILIZED WHEN INSTALLED PER NEC AND IN GOOD CONDITION. IDENTIFY EXISTING BRANCH CIRCUITS AT WIRING DEVICES AND AT PANEL PER NEC 408.4.

3 EXISTING BRANCH RACEWAYS & WIRING BEYOND AREA OF DEMOLITION MAY BE RE-USED WHEN INSTALLED PER NEC, AND WHERE IN "LIKE NEW" CONDITION. ALL LIGHTING CONTROLS, RECEPTACLES, BRANCH WIRING AND OTHER WIRING DEVICES SHALL BE REPLACED WITHIN AREAS OF CONSTRUCTION.

4 EXISTING LIGHTING FIXTURES ARE TO REMAIN (E) OR SHALL BE RELOCATED (R) AND ARE TO BE CLEANED & RE-LAMPED WHEN INDICATED WITH THIS MODIFIER.

A3 DEMOLITION DETAIL
NO SCALE

LEGEND

REFER TO EQUIPMENT SCHEDULE FOR CONNECTION TYPE AND RATING, CONDUIT FILL AND ADDITIONAL BRANCH CIRCUIT REQUIREMENTS.

GENERAL NOTES

A. COORDINATE ALL CONSTRUCTION WITH OTHER TRADES INCLUDING LOCATION OF MECHANICAL EQUIPMENT AND ROUTING OF PIPING, RACEWAYS, DUCTWORK, ETC.

B. SUPPORT ALL RACEWAYS PER NEC. INSTALL CONDUIT WITH 360 DEGREES IN BENDS MAXIMUM WITHOUT PULL POINT. INSTALL JUNCTION / PULL BOXES AS NECESSARY. WHEN SIZES ARE NOT SPECIFIED, SIZE BOXES BASED ON CONDUIT SIZES / FILL PER NEC.

C. MAINTAIN WORKING CLEARANCE ABOUT ELECTRICAL EQUIPMENT PER NEC ART. 110, (30"W MINIMUM), DEPTH PER NEC, (36" MINIMUM).

D. CONDUIT AND WIRE IS SHOWN DIAGRAMMATICALLY. ACTUAL ROUTING AND REQUIRED NUMBER OF SUPPORTS SHALL BE DETERMINED BY THE CONTRACTOR.

UNLESS CONDUIT ROUTING CLEARLY INDICATES AS SUCH, DO NOT ROUTE CONDUIT ON OR ABOVE ROOFTOPS WITHOUT CONSULTING ENGINEER TO DETERMINE ANY POTENTIAL IMPACT TO RACEWAY OR CONDUCTOR SIZE DUE TO ADDITIONAL AMBIENT DERATING FOR ROOFTOP INSTALLATION.

E. EQUIPMENT LOCATIONS AND DIMENSIONS – VERIFY ALL EQUIPMENT LOCATIONS AND DIMENSIONS IN THE FIELD PRIOR TO INSTALLING RACEWAYS AND WIRING.

F. HVAC EQUIPMENT

DISCONNECTING MEANS: PROVIDE AND INSTALL HEAVY DUTY FUSED DISCONNECT (NEMA 3R OUTDOORS) AND SINGLE POINT POWER CONNECTION TO EQUIPMENT (UNLESS NOTED OTHERWISE). IF STARTERS ARE REQUIRED FOR MECHANICAL EQUIPMENT, ADDITIONAL REQUIREMENTS WILL BE INDICATED ON ONE-LINES, PLAN DRAWINGS, AND MECHANICAL PLANS.

CONTROLS: INSTALL 3/4" CONDUIT (UNLESS NOTED OTHERWISE) FROM HVAC CONTROLS (T-STAT OR OTHER*) TO UNIT. CONTROL WIRING WILL BE INSTALLED BY OTHERS. COORDINATE WITH MECHANICAL CONTRACTOR.
* THIS INCLUDES OTHER EQUIPMENT OR DEVICES WHICH ARE INTERLOCKED WITH THE MECHANICAL UNIT AND INDICATED ON THE MECHANICAL PLANS. COORDINATE RACEWAY REQUIREMENTS WITH MECHANICAL PLANS AND THE MECHANICAL CONTRACTOR.

SMOKE DETECTION: WHEN THE DUCT MOUNTED SMOKE DETECTORS ARE INDICATED, PROVIDE SHUTDOWN WIRING FROM DETECTOR (PROVIDED BY MECHANICAL UNLESS NOTED OTHERWISE) TO HVAC UNIT AND VISIBLE/AUDIBLE SIGNALS IN ACCORDANCE WITH IMC SECTION 606. WHEN A FIRE ALARM SYSTEM IS PRESENT, THE DETECTOR SHALL ALSO BE CONNECTED TO THE FIRE ALARM CONTROL PANEL. PROVIDE 120V BRANCH CIRCUIT FOR DETECTOR POWER (2#12, #12G) WHEN REQUIRED. A DEDICATED BRANCH CIRCUIT WITH "LOCK-ON" TAB WILL BE AVAILABLE IN PANEL SCHEDULE FOR THIS PURPOSE IF NECESSARY.

UNLESS EXISTING, PROVIDE AND INSTALL MAINTENANCE RECEPTACLES WITHIN 25FT OF MECHANICAL EQUIPMENT, PER NEC ART. 610.23.

G. CONTRACTOR SHALL IDENTIFY EACH INDIVIDUAL BRANCH CIRCUIT WITHIN THE PROJECT AREA BY PERMANENT MEANS. ACCEPTABLE METHODS INCLUDE USING PERMANENT MARKER ON JUNCTION BOX COVER PLATES AND BACKSIDE OF DEVICE COVER PLATES OR IDENTIFYING BRANCH WIRING WITHIN JUNCTION BOXES. STICK ON LABELS ARE NOT ACCEPTABLE. [REFERENCE ART. 408.4]

H. FEEDERS AND BRANCH CIRCUITS INDICATED ON ROOF PLANS ARE NOT INTENDED TO BE ROUTED ABOVE ROOFTOPS EXPOSED TO DIRECT SUNLIGHT UNLESS SO INDICATED. CONDUITS EXPOSED TO SUNLIGHT ON ROOFTOPS SHALL COMPLY WITH NEC ART. 310.15(B)(2)(C) FOR ADDITIONAL DERATING BASED ON DISTANCE ABOVE ROOF PER TABLE 310.15(B)(2)(C). CONSULT ENGINEER FOR POSSIBLE REQUIRED REVISIONS TO CONDUCTORS & CONDUIT SIZES.

I. NEC ART. 300.4(E) CABLES, RACEWAYS, OR BOXES INSTALLED IN OR UNDER ROOF DECKING. A CABLE, RACEWAY, OR BOX, INSTALLED IN EXPOSED OR CONCEALED LOCATIONS UNDER METAL-CORRUGATED SHEET ROOF DECKING, SHALL BE INSTALLED AND SUPPORTED SO THERE IS NOT LESS THAN 38 MM (1½ IN.) MEASURED FROM THE LOWEST SURFACE OF THE ROOF DECKING TO THE TOP OF THE CABLE, RACEWAY, OR BOX. A CABLE, RACEWAY, OR BOX SHALL NOT BE INSTALLED IN CONCEALED LOCATIONS IN METAL-CORRUGATED, SHEET DECKING-TYPE ROOF.

EXCEPTION: RIGID METAL CONDUIT AND INTERMEDIATE METAL CONDUIT SHALL NOT BE REQUIRED TO COMPLY WITH THESE REQUIREMENTS.

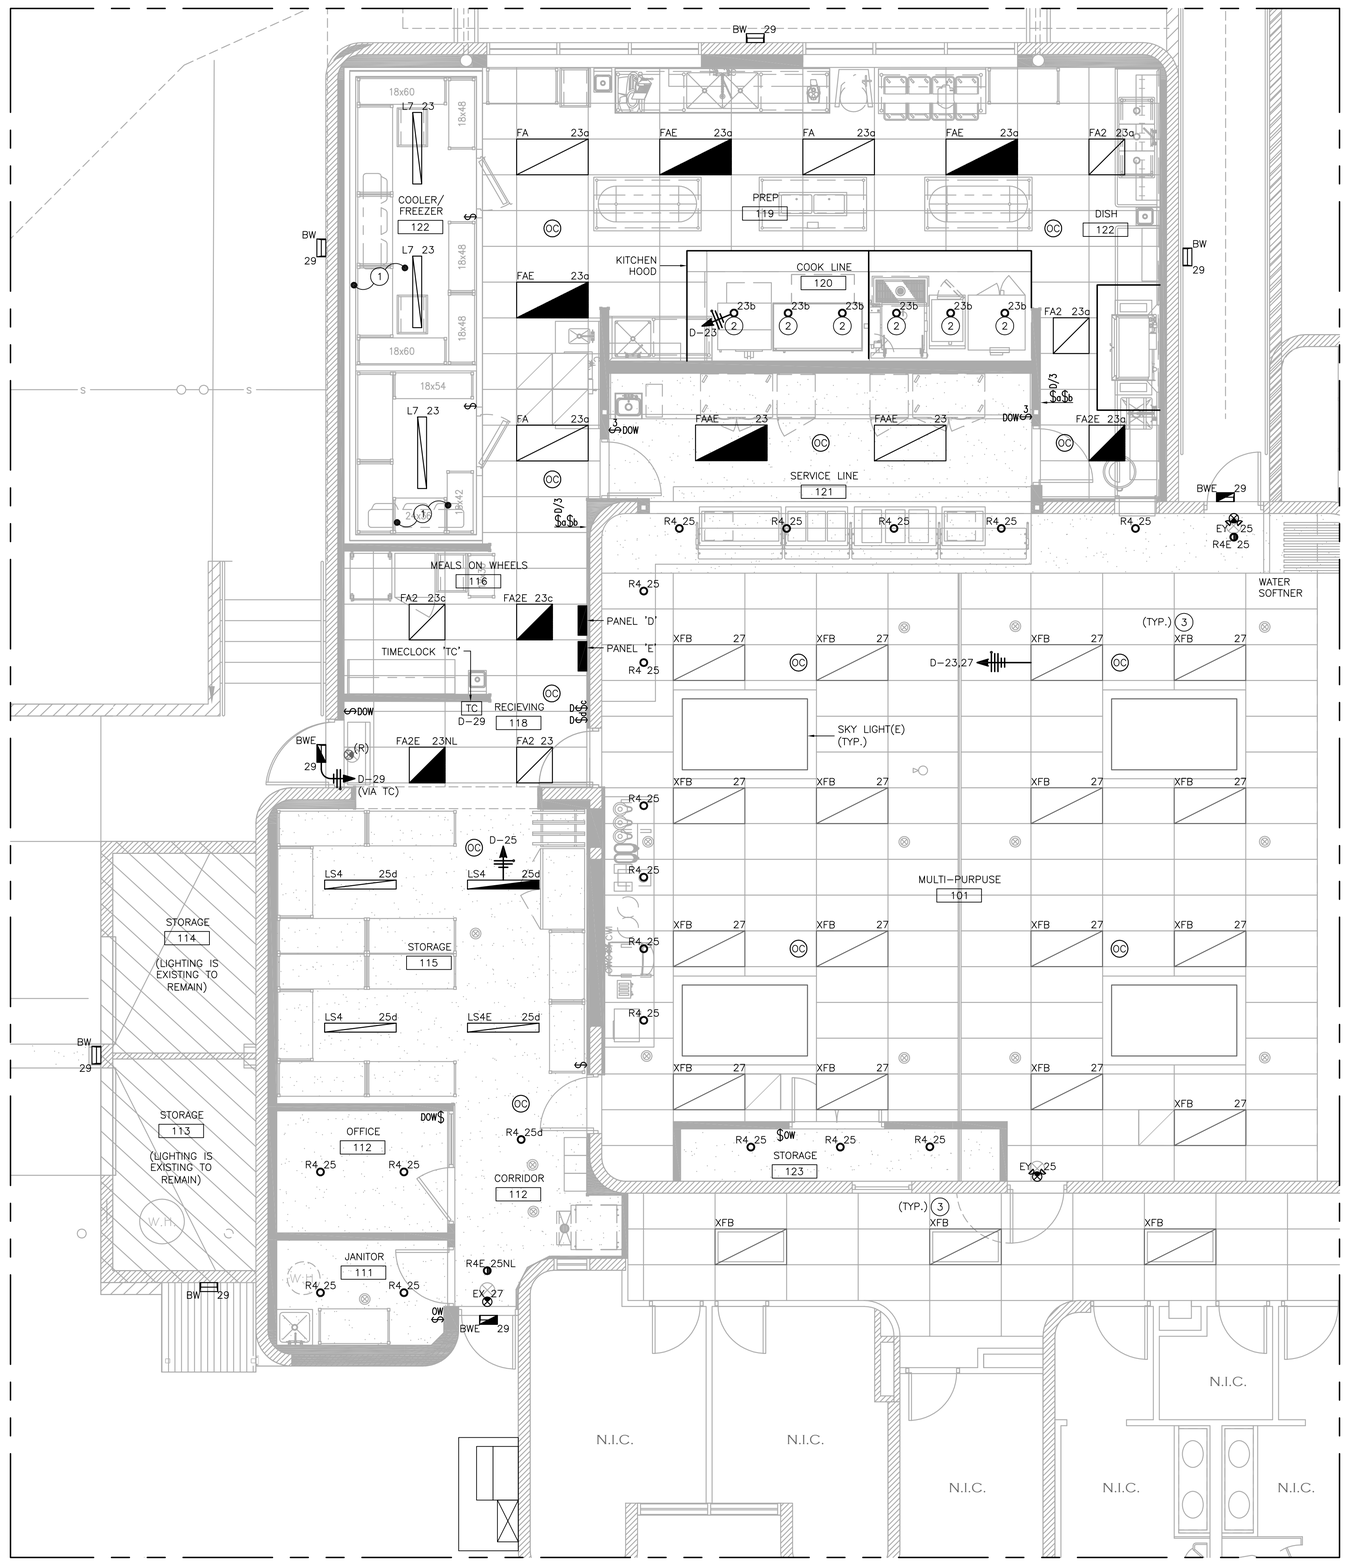
ROOF AND DEMOLITION PLANS
E2.1



1 LIGHTING PLAN
SCALE: 1/4"=1'-0"

GENERAL NOTES

A. EMERGENCY AND EXIT SIGNS SHALL BE CONNECTED TO A NON-SWITCHED LEG OF THE NEAREST BRANCH LIGHTING CIRCUIT, 2#12, 1#12G UNLESS NOTED OTHERWISE. REFER TO LEGEND FOR EMERGENCY LIGHT FIXTURE SYMBOLS.

B. FIXTURES DESIGNATED AS NIGHT LIGHTS SHALL BE SUPPLIED FROM A NON-SWITCHED LEG OF THE BRANCH LIGHTING CIRCUIT FOR ONE BALLAST OF EACH NIGHT LIGHT FIXTURE. IN MANY CASES, EMERGENCY FIXTURES WILL BE DESIGNATED AS NIGHT LIGHTS FOR CONVENIENCE.

C. IN GENERAL, NON-SWITCHED LEGS FOR NIGHT LIGHTS AND EMERGENCY LIGHTS AND TRAVELLER CONDUCTORS FOR 3-WAY SWITCHING ARE NOT SHOWN ON THE PLANS. INSTALL THESE CONDUCTORS AS REQUIRED FOR PROPER OPERATION OF THE LIGHT FIXTURES.

D. INSTALL FLEXIBLE CONDUIT CONNECTIONS TO FIXTURES (NOT TO EXCEED 6' IN LENGTH) WHEN NECESSARY.

E. WHEN LIGHTING CONTROL DEVICES ARE INDICATED ON PLANS AND DETAILS, THE CONTRACTOR SHALL INSTALL ANY ASSOCIATED CONTROL WIRING REQUIRED FOR A COMPLETE AND OPERATIONAL SYSTEM.

F. CONCEAL CONDUITS IN ALL FINISHED AREAS INCLUDING CONCEALMENT WITHIN MASONRY WALLS WHEN PRESENT. (EXCEPTION: ELECTRICAL, MECHANICAL, AND JANITOR ROOMS).

WHEN OVERHEAD ELECTRICAL WORK IS EXPOSED: MOUNTING OF ALL ELECTRICAL WORK/CONDUIT SHALL RUN IN DECK FLUTES AND/OR TIGHT WITH DECK IN A CLEAN AND WORKMAN LIKE MANNER. CONTRACTOR MAY RUN CONDUIT UNDER FLOOR AS NECESSARY TO FACILITATE CONCEALMENT OF CONDUITS.

NEC ART. 300.4(E) CABLES, RACEWAYS, OR BOXES INSTALLED IN OR UNDER ROOF DECKING. A CABLE, RACEWAY, OR BOX, INSTALLED IN EXPOSED OR CONCEALED LOCATIONS UNDER METAL-CORRUGATED SHEET ROOF DECKING, SHALL BE INSTALLED AND SUPPORTED SO THERE IS NOT LESS THAN 38 MM (1½ IN.) MEASURED FROM THE LOWEST SURFACE OF THE ROOF DECKING TO THE TOP OF THE CABLE, RACEWAY, OR BOX. A CABLE, RACEWAY, OR BOX SHALL NOT BE INSTALLED IN CONCEALED LOCATIONS IN METAL-CORRUGATED, SHEET DECKING-TYPE ROOF.

EXCEPTION: RIGID METAL CONDUIT AND INTERMEDIATE METAL CONDUIT SHALL NOT BE REQUIRED TO COMPLY WITH THESE REQUIREMENTS.

KEYED NOTES

1. WHERE RACEWAYS ARE EXPOSED TO DIFFERENT TEMPERATURES SEAL CONDUITS PER NEC ART. 300.7.
2. INTEGRAL HOOD LIGHTING PER HOOD MANUFACTURER. CONNECT HOOD LIGHTS TO VENTILATION CONTROL PANEL LOCAL CONTROLS AS APPLICABLE. COORDINATE SWITCH LOCATION IN THE FIELD.
3. TYPE XFB FIXTURES ARE EXISTING AND/OR RELOCATED. CLEAN & RE-LAMP WITH BALLAST READY T8 RETROFIT LED, COMPATIBLE WITH EXISTING FIXTURE. CONFIRM LAMP QUANTITY AND TEMPERATURE.

1. EXISTING 12 MONTH PEAK DEMAND PER APS, 58KW,72.5KVA @0.8PF.

2 LOAD CALCULATIONS
NO SCALE

GENERAL NOTES

A. ALL WORK SHALL COMPLY WITH NEC AND LOCAL CODES.

B. ALL EQUIPMENT IS NEW UNLESS OTHERWISE NOTED. ALL EQUIPMENT AND FIXTURES SHALL BE UL LISTED.

C. REFER TO PLANS FOR SES AND PANEL LOCATIONS.

D. MAINTAIN WORKING CLEARANCE ABOUT ELECTRICAL EQUIPMENT PER NEC ART. 110, (30"W MIN), DEPTH PER NEC, (36" MIN).

E. VERIFY MECHANICAL EQUIPMENT NAMEPLATE RATINGS PRIOR TO INSTALLATION. INSTALL FUSED DISCONNECTS AT EACH A/C UNIT. INSTALL MOTOR RATED SWITCH OR DISCONNECT AT EACH AIR HANDLER AS DISCONNECTING MEANS. INSTALL THERMAL OVERLOAD PROTECTION (MANUAL MOTOR STARTER) FOR ANY MOTORS NOT PROVIDED WITH INTEGRAL THERMAL PROTECTION.

F. GROUNDING – PROVIDE AND INSTALL GROUND ELECTRODES AND CONNECTIONS AS INDICATED AND ADDITIONAL AS REQUIRED PER NEC AND AHJ. UFER SHALL BE REQUIRED ON ALL NEW CONSTRUCTION. GROUND ALL TRANSFORMERS TO THE GROUND ELECTRODE SYSTEM.

G. UTILITY SERVICE – WHEN A UTILITY CONNECTION IS SHOWN ON THE ONE–LINE DIAGRAM (SEE SYMBOL LEGEND), COORDINATE ALL SERVICE REQUIREMENTS WITH UTILITY. PROVIDE AND INSTALL ALL NECESSARY PRIMARY / SECONDARY CONDUIT, TRANSFORMER PADS, ETC. AS REQUIRED BY THE UTILITY PER UTILITY SPECIFICATIONS. WITHIN (2) WEEKS OF PROJECT AWARD CONTRACTOR SHALL SUBMIT ELECTRICAL PLANS AND SERVICE ENTRANCE SHOP DRAWINGS TO THE UTILITY FOR REVIEW.

H. SES – WHEN INDICATED ON ONE–LINE, PROVIDE AND INSTALL SES, RATINGS AS INDICATED. VERIFY ALL DIMENSIONS. MAINTAIN WORKING CLEARANCE PER NEC AND UTILITY REQUIREMENTS. PROVIDE 4" HOUSE KEEPING PAD FOR GROUND MOUNTED SES. CONTRACTOR SHALL SUBMIT SES/METER SHOP DRAWINGS TO UTILITY METER SHOP FOR APPROVAL.

I. CABLE LENGTHS WHEN INDICATED ON ONE–LINE ARE APPROXIMATE AND ARE FOR REFERENCE ONLY FOR CALCULATIONS AND ARE NOT TO BE USED FOR MATERIAL TAKEOFFS.

KEYED NOTES

1. REMOVE AND REPLACE EXISTING SERVICE ENTRANCE AS COORDINATED WITH UTILITY.

FAULT CURRENT NOTES

1. UTILITY FAULT CURRENT VALUES ARE OBTAINED FROM PUBLISHED UTILITY DATA BASED ON SERVICE SIZE.

2. FAULT CURRENT CALCULATIONS ARE COMPLETED USING ETAP (ELECTRICAL TRANSIENT ANALYZER PROGRAM). STANDARD INPUT PARAMETERS ARE AS FOLLOWS:
   - PRE–FAULT VOLTAGE = 100%
   - CABLE IMPEDANCE PER NEC STANDARD LIBRARY.
   - TRANSFORMER IMPEDANCE AND X/R RATIOS ARE PER TYPICAL MANUFACTURERS DATA UNLESS NOTED OTHERWISE.
   - FAULT CURRENT VALUES SHOWN ARE 3 PHASE, 30 CYCLE, RMS SYMMETRICAL UNLESS NOTED OTHERWISE.
   - FOR SINGLE PHASE SYSTEMS, BUSSMANN CALCULATIONS ARE USED.

3. COMPLETE FAULT CURRENT REPORTS ARE AVAILABLE UPON REQUEST.

SERIES RATED SYSTEMS

1. "SERIES–RATED SYSTEMS" SHALL CONSIST OF EITHER A CIRCUIT BREAKER OR FUSE CONNECTED IN SERIES WITH A DOWNSTREAM CIRCUIT BREAKER, DESIGNED AND LISTED FOR USE AS A SINGLE INTEGRATED SYSTEM.

2. THESE NOTES SHALL APPLY WHEN PANELBOARDS OR PROTECTIVE DEVICES ARE IDENTIFIED AS 'SERIES RATED'. OTHERWISE, SYSTEMS SHALL BE FULLY RATED.

3. THE MINIMUM kAIC SHOWN FOR SERIES RATED EQUIPMENT REFERS TO THE 'SERIES CONNECTED SHORT CIRCUIT CURRENT RATING' (SCCR) OF EQUIPMENT.

4. ALL SERIES RATED DEVICE COMBINATIONS SHALL BE UL LISTED & LABELED. SUBSTITUTION OF COMPONENTS HAVING DIFFERENT SPECIFICATIONS OR INTERRUPTING RATING IS SPECIFICALLY PROHIBITED.

5. SYSTEMS ARE IDENTIFIED AS TWO–TIER OR THREE–TIER (EX. 22/10; 65/42/10). RATINGS SHOWN ARE AIC RATING OF INDIVIDUAL DEVICES.

6. WHEN SERIES–RATED SYSTEMS ARE SPECIFIED, MOTOR FLA HAS BEEN CALCULATED AT LESS THAN 1% OF THE DOWNSTREAM BREAKER AIC RATING.

7. CONTRACTOR SHALL INSTALL / VERIFY MARKING ON SERIES RATED EQUIPMENT PER NEC 110–22, EX. "CAUTION–SERIES RATED SYSTEM (ENTER TIER RATING ex. '22/10'). (ENTER VALUE FROM ONE–LINE 'XX')KA AVAILABLE. IDENTIFIED REPLACEMENT COMPONENT REQUIRED".

GENERAL NOTES

A. COMPLY WITH NEC ART. 408.4. IDENTIFY EACH BRANCH CIRCUIT AS TO ITS CLEAR, EVIDENT, AND SPECIFIC PURPOSE OR USE. THE IDENTIFICATION SHALL INCLUDE SUFFICIENT DETAIL TO ALLOW EACH CIRCUIT TO BE DISTINGUISHED FROM ALL OTHERS. COMPLETE THE PANEL SCHEDULE(S) BASED ON AS-BUILT CONDITIONS AND LOCATE IN PANELBOARD(S). IDENTIFY ALL SPARES ACCORDINGLY AND SET TO 'OFF' POSITION.

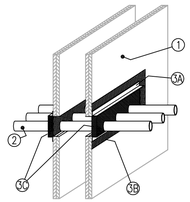
06.25.20



1. Wall Assembly – Constructed in the manner specified in the U300 or U400 series designs as shown in the UL Fire Resistance Directory. The annular space is 0 to 2 inches.
2. Metallic Pipes – Maximum 5 pipes, 2 inch nominal diameter Type L or heavier copper tubing or 1 inch nominal diameter Sch. 5 or heavier steel pipe, RMC, or EMT.

3A. Steel Frame – Constructed of 7/8" X 7/8", nominal 16 gauge, steel angle secured to the studs with self tapping screws and fender washers.

3B. Forming Material – Diamond shaped steel mesh, or metal fabric, is secured under the steel frame to provide backer support for the FSP Putty.

3C. Nelson FSP Putty – Install FSP to fill all remaining voids within the confines of the steel frame to a minimum 1 inch depth on both sides of the wall.

F Rating – 2 Hr.
T Rating – 0 Hr.
UL System W-L-1031
MEA # 196-84-M Vol. 3

The system described in this detail has tested successfully to ASTM E-814 and ANSI/UL 1479 and has achieved F and T ratings as shown in the illustration box.

All technical information and recommendations contained herein are based on tests we believe to be reliable, however, since the conditions of use and application are beyond our control, Nelson Firestop Products shall not be liable for any damage, direct or consequential, resulting from the use of this material or design. BID FORMS

SECTION 300
BID FORMS/BASE BID

City Project Name: **BUCKEYE COMMUNITY CENTER KITCHEN REMODEL AND ADDITION**

Date: 10/18/21

Bid from: GCON Inc.
(Name of Firm)

To: City of Buckeye

The following bid is made for construction services for the City of Buckeye, Arizona, in accordance with Construction Documents. The undersigned certifies that the Construction Documents, as well as the proposed construction site and conditions affecting the Work have been carefully examined; that the amount and nature of the Work to be done is thoroughly understood; and that at no time will misunderstanding of the drawings, specifications, or conditions to be overcome be pleaded.

The undersigned certifies that he or his firm is currently licensed under the provisions of ARS Sections 32-1151 and 32-1169. The undersigned further certifies that he or his firm has a privilege license pursuant to ARS Section 42-5005.

The undersigned has read "Instructions to Bidders", paragraph "Sales and Use Tax" and understands that all sales and use taxes applicable to this project are included in all bid prices. The undersigned has read the Construction Contract between the City of Buckeye and Contractor, and will execute said agreement if awarded the Contract. Any exceptions to the terms and conditions have been stated in writing and submitted on a separate sheet with this bid. The undersigned understands that any exceptions taken to the Construction Contract that are not accepted and/or approved by the City may be a basis for rejection of the Bid as nonresponsive.

RECEIPT BY THE UNDERSIGNED OF THE FOLLOWING ADDENDA IS HEREBY ACKNOWLEDGED:

ADDENDUM NUMBER:	1	DATED:	9/21/21
ADDENDUM NUMBER:	2	DATED:	9/28/21
ADDENDUM NUMBER:	3	DATED:	10/11/21
ADDENDUM NUMBER:	4	DATED:	10/12/21

Total calendar days for completion of work 152.

The undersigned proposes to complete all of the Work in accordance with said Construction Documents, plans, specification and all associated addenda for the sum of

One Million Seven Hundred Twenty Five Thousand and Forty Three Dollars ($1,725,043).

(Amount shall be shown in both words and figures. In case of discrepancy, the amount shown in Words shall govern.)

QUALIFICATION STATEMENT

THE CITY OF BUCKEYE ARIZONA

CONTRACTOR'S QUALIFICATION STATEMENT

Name of Firm: GCON Inc.
Address: 1606 W Whispering Wind Dr.
City, State, Zip Code: Phoenix, AZ 85085
Telephone No: 623-581-6300
DUNS or CAGE NO.: 189633568

The undersigned certifies under oath the truth and correctness of all statements and of all answers to questions made hereinafter.

1. How many years has your firm been in business as a general contractor?
   18 years - GCON was incorporated February 2003

1.1 How many years has your firm been in business as a general contractor in the State of Arizona?
   18 years - GCON was incorporated February 2003

2. How many years has your firm been in business under its present business name?
   18 years - GCON was incorporated February 2003

3. List states and categories in which your firm is legally qualified to do business.
   GCON has a General Contractor licenses in the following states: Georgia, Arizona, California, New Mexico, Oregon, Tennessee, Virginia, Washington, Colorado, Idaho, Minnesota, Nevada, North Carolina and, Texas

4. List the percentage of work normally accomplished with your own forces.
   GCON does not self perform work.

4.1 Will you need to expand your work force for this project?
   We will not need to expand our work force.

4.2 Present number of personnel employed.
   125

5. Have you ever failed to complete any project awarded to your firm? If so, explain circumstances.
   No

5.1 Within the past five (5) years, has any officer or partner of your firm ever been an officer or partner of another firm that failed to complete any project awarded to it?

No

6. Has the firm had experience with HUD/CDBG funded projects or other federally funded projects that included Davis Bacon, Section 3 and other applicable regulations. If so, provide the project name, Name of Jurisdiction, and contact name, phone, and email.

To date GCON has not completed a project that has Davis Bacon reporting requirements, however GCON's staff have previous experience with other firms in Davis Bacon projects, noting experience in subcontractor compliance and weekly salary reporting. Please see attached Kraig Hills resume as Senior PM for this project.

7. On a separate sheet, list the construction experience and provide resumes of key individuals of your firm.

Include the Project Manager, Superintendent, and Assistant Superintendent for this project; and identify their previous levels of responsibility for those projects listed in Paragraph 6.

See attached.

8. References: (Bank, Trade, and Professional) Provide name, address, and telephone number. List three.

SOLICITATION: IFB No. 2022012: BUCKEYE COMMUNITY CENTER KITCHEN REMODEL AND ADDITION – CDBG21BK

NOTICE TO CONTRACTORS:
This Addendum forms a part of the Contract and clarifies, corrects, or modifies the original Invitation for Bid documents prepared by the City of Buckeye.

Bid Due Date and Time: **October 14, 2021 no later than 10:00am local time**

Last Day for Questions: **October 4, 2021 at 5:00pm**

The following questions have been asked by Contractors:

Q1. Subs want to know estimated start date of this project. If you have a requested end date as well that would be great, but for labor/material purposes they need to know when this project might start if possible.
A1. November 29, 2021 is the anticipated start date for mobilization and the project is expected to take four to six months.

Q2. HVAC Units on this project are scheduled Fraser-Johnston, which is JCI/York... the 2 ton unit scheduled has a 39 week lead time, while the (2) 4 ton units have a lead-time of 23 weeks. This is a very long lead-time on ordering these items and might not work with your schedule. Let us know if we have the option to find alternate/comparable products with quicker lead times for you.
.A2. Please bid as stated in the schedule and the City will go through the submittal process after award and will entertain any comparable/alternate units if spec'd unit has long lead times.

The balance of the specifications and instructions remain the same. Offerors must acknowledge receipt and acceptance of this addendum by returning the entire addendum with the Bid.

PLEASE ACKNOWLEDGE YOUR RECEIPT OF THIS Addendum BY SIGNING THE ATTACHED SOLICITATION ADDENDUM ACKNOWLEDGEMENT.

ADDENDUM #3

NOTE: Attach to Original Invitation for Bid. However, if Bid has already been returned, complete this addendum and return for attachment to your Bid by 10:0am, October 14, 2021

City of Buckeye
530 East Monroe Avenue
Buckeye, Arizona 85326
Attn: Debby Fasano

SOLICITATION: IFB No. 2022012: BUCKEYE COMMUNITY CENTER KITCHEN REMODEL AND ADDITION – CDBG21BK

NOTICE TO CONTRACTORS:
This Addendum forms a part of the Contract and clarifies, corrects, or modifies the original Invitation for Bid documents prepared by the City of Buckeye.

Bid Due Date and Time: **October 18, 2021 no later than 10:00am local time**

Last Day for Questions: **October 4, 2021 at 5:00pm**

The following changes have been made:

1. The bid due date has been changed to October 18, 2021 no later than 10:00am local time.

2. Add Technical Specification, pursuant to Exhibit A.

3. Revise Drawing Sheets:
   a. A00.00 Dover Sheet – Fire Department Review Items, Clarification of Deferred Submittals by Contractor, separate Permits.
   b. A00.06 Enlarged Site Plan – Clarified relations of 2 existing wall mounted fire extinguishers, and addition of one new fire extinguisher in a semi-recessed fire extinguisher cabinet.
   c. A02.07 Finishes Schedule – Clarification of finishes matching Floor Plan & RCP. Added Mini-Blinds for sidelight at Office 112.

4. HVAC Units: equivalents based on better availability are acceptable, subject to review and approval by Mechanical Engineer & City Facilities Dept. The units are specified more for performance and a standard of quality than for a specific manufacturer. We do not expect the specifications to be proprietary and lock out other manufacturers. Lennox, Trane, York etc. all OK as long as the cooling capacities are equal or better.

The following questions have been asked by Contractors:

Q1. Can you provide the information for the Floor sinks and Floor drains? There is no schedule or spec. I did find the Zurn roof drain.
A1. Jay R. Smith #2005 series floor drain and #3411 floor sink or equivalents from Zurn, Wade, and Josam are a fair standard of quality.

Q2. Room finish says ac-1 for rooms 110, 111 and 115, which is in phase 2. Yet the plans and cross sections say these rooms to be drywall. Please advise.
A2. See Exhibit D.

Q3. Can we get the voltage and phase on the Bell & Gossett Sump Pump?
A3. See Exhibit C.

Q4. Can we get a model # for the sewer backwater valve?
A4. Please see cut sheet, pursuant to Exhibit B.

Q5. Can we get some details for the sewer backwater valve box?
A5. See Exhibit B.

Q6. What is the depth of the existing sewer?
A6. The depth needs to be field verified.

Q7. Does the grease interceptor require asphalt coating?
A7. FROM MANUFACTURER'S DATA SHEET: Watertightness - All Jensen Precast grease interceptors are designed and tested to be 100% watertight. Our manufacturing processes follow detailed & comprehensive quality control procedures consistent with the NPCA Plant Certification Program. Inlet and outlet pipe connections are all gasketed.

Q8. What size chambers are the Stormtech retention system? It seems highly unlikely the layout shown on the plans will cover the 2250cf of required storage.
A8. Stormtech design is to be separate design and submittal to Engineer.

Q9. How much stone is required below and above the chambers?
A9. Stormtech design is to be separate design and submittal to Engineer.

Q10. What is the circular structure labelled # 21, "TEE" by ADS? Is this supposed to be a drain basin?
A10. Stormtech design is to be separate design and submittal to Engineer.

Q11. Is an isolation row required on the retention system?
A11. Stormtech design is to be separate design and submittal to Engineer.

Q12. Can we get more information on the sump pump? HP, phase, control panel, explosion proof, pull-out system?
A12. Specification: See attached Data Sheet Exhibit C.
Power: Sump pump branch circuit:
- Provide and install 20A / 2P breaker in panel D.
- Install 3/4"C, 2#10, #10G from panel D to sump pump as located on plumbing plans.

- Install weatherproof junction box, disconnecting means, and connection to pump.
- Controls will be integral to pump. See pump cut sheet and plumbing plans.

Q13. What is the "bubbler box", # 17? Open bottom catch basin, drain basin with perforated bottom, vertical RGRCP with frame & grate?

A13. Stormtech design is to be separate design and submittal to Engineer.

The balance of the specifications and instructions remain the same. Offerors must acknowledge receipt and acceptance of this addendum by returning the entire addendum with the Bid.

PLEASE ACKNOWLEDGE YOUR RECEIPT OF THIS Addendum BY SIGNING THE ATTACHED SOLICITATION ADDENDUM ACKNOWLEDGEMENT.

CITY OF BUCKEYE
Regular Council Meeting
COUNCIL ACTION REPORT

MEETING DATE: 12/21/21	**AGENDA ITEM:** 6.M. Bulletproof Vest Partnership Grant
DATE PREPARED: 12/16/21	**DISTRICT NO.:** ALL
STAFF LIAISON: Larry Hall, Police Chief, lhall@buckeyeaz.gov, (623) 349-6438	
DEPARTMENT: Police	**AGENDA ITEM TYPE:** Consent Agenda Items / New Business

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on Resolution No. 95-21 accepting and approving a grant from the Department of Justice relating to the partial reimbursement for the purchase of bulletproof vests for Police Officers of the City of Buckeye.

RELEVANT GOALS:
GOAL 5: Responsive and Accountable Government and Effective Public Services

SUMMARY

PROJECT DESCRIPTION:

The Buckeye Police Department to purchase bulletproof vests for its officers, and the cost of the vests paid by the City are reimbursed (50/50) by the U.S. Department of Justice up to $12,500 total. Award notification and grant management are through the Bulletproof Vest Partnership website.

BENEFITS:
Fifty percent of the City's costs for the vests are reimbursed by the the U.S. Department of Justice. Due to the contributions by the City and the Department of Justice, Officers do not have to pay the full costs of a vest which is a crucial part of personal protective gear.

FUTURE ACTION:
If Council authorizes Resolution No. 95-21 the Police Department Grant Programs Administrator will manage the grant award according to the terms and conditions detailed on the Bulletproof Vest Partnership website. Hard copies of the award notification or documentation are not sent to the Police Department. It is conducted entirely online.

FINANCIAL IMPACT STATEMENT:

The U.S. Department of Justice Bulletproof Vest Partnership will provide reimbursement up to $12,500 for vests purchased for eligible Police Officers, reducing the City's cost from $25,000 to $12,500.

CURRENT FISCAL YEAR TOTAL COST:
$25,000.
Fifty percent of vests costs are reimbursed to the City of Buckeye once vest purchases has been verified by Department of Justice.

BUDGETED:

Yes

FISCAL YEAR:
2021-2023

FUND/DEPARTMENT:
35732121-523106

Items related to a project or facility location must include an attached vicinity map for Council Review.

RETURN

Federal Bulletproof Vest Grant Reimbursement Process

Bulletproof Vest Requirement

Pursuant to Policy 1024, all Buckeye Police Department ("BPD") Officers are required to wear body armor while in uniform, while involved in field activities, and in high-risk situations. For this reason all sworn officers, including reserve officers, are issued a full set of body armor (carrier and plate). A full set of body armor (carrier and plate) is also known as a "bulletproof vest."

Bulletproof Vest Issuance

The process officers follow to obtain a bulletproof vest is as follows:

Officers must go to FX Tactical and get fitted for a bulletproof vest including any additional accessories they prefer on the vest carrier. Once the vest is fitted and accessories are selected, officers purchase their vests on a City of Buckeye open purchase order with FX Tactical. Any dollar amount over $1,000 is the responsibility of the officer and must be paid out of pocket. Once paid the officer provides the receipt and the serial numbers from the vest panels to BPD. FX Tactical also provides a copy of the receipt and vest serial numbers for accuracy of purchases and tracking of PO amount remaining.

Partial Grant Reimbursement to Buckeye Police Department

BPD is eligible for partial reimbursement from the Department of Justice for its expenditure on bulletproof vests. This reimbursement has a matching requirement, which means the DOJ will reimburse 50% of BPD's expense. BPD spends up to $1000 per vest; therefore, it is eligible for reimbursement of up to $500 per vest.

Once the receipt for a bulletproof vest is received, the Grant Programs Administrator enters the vest serial number and cost for each vest into the DOJ vests database for vest serial number tracking and reimbursement of costs to the City of Buckeye. Funds for 50% of each vest purchased, up to $1,000 are sent to the City of Buckeye finance department to complete the grant reimbursement process.

For FY 2021, DOJ has awarded BPD up to $12,500, which represents 50% reimbursement for 25 bulletproof vests.

The DOJ grant comes with several conditions. Most importantly, the grant requires "uniquely fitted vests" and BPD complies with this requirement through the fitting process at FX Tactical. The grant also requires BPD to keep documentation supporting BVP vest application and payment requests for at least three years. The grant specifically prohibits BPD from applying other federal funds to meet the 50% match requirement.

RESOLUTION NO. 95-21

A RESOLUTION OF THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, ACCEPTING AND APPROVING A GRANT FROM THE DEPARTMENT OF JUSTICE RELATING TO PARTIAL REIMBURSEMENT FOR THE PURCHASE OF BULLETPROOF VESTS FOR POLICE OFFICERS OF THE CITY OF BUCKEYE.

WHEREAS, pursuant to Policy 1024, the Buckeye Police Department ("BPD") requires all officers to wear approved body armor when in uniform or involved in field activities or high-risk situations; and

WHEREAS, BPD requires all body armor to meet or exceed the National Institute of Justice Threat Level III Standards, and provides one full set of approved body armor to every sworn officer; and

WHEREAS, the Department of Justice offers partial reimbursement to police departments for the cost of body armor, through the Patrick Leahy Bulletproof Vest Partnership (the "Partnership"); and

WHEREAS, for Fiscal Year 2021, the Partnership has awarded BPD a total grant of $12,500, representing a $500 reimbursement for each of 25 approved body armor purchases.

BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. The recitals above are hereby incorporated as if fully set forth herein.

Section 2. The FY 2021 Patrick Leahy Bulletproof Vest Partnership award to the Buckeye Police Department is hereby accepted and approved.

Section 3. The Mayor, the City Manager, the City Attorney, and the Police Chief are hereby authorized and directed to take any and all steps necessary to comply with the conditions of the award accepted and approved in Section 2 and to carry out the purpose and intent of this Resolution.

PASSED AND ADOPTED by the Mayor and City Council of the City of Buckeye, Arizona, this 21st day of December, 2021.

ORDINANCE NO. 19-21

AN ORDINANCE BY THE MAYOR AND COUNCIL OF THE CITY OF BUCKEYE, DECLARING AS A PUBLIC RECORD THAT CERTAIN DOCUMENT ON FILE WITH THE CITY CLERK ENTITLED THE "CITY OF BUCKEYE COMMERCIAL VEHICLE AMENDMENTS, DECEMBER 2021"; ADOPTING THE "CITY OF BUCKEYE COMMERCIAL VEHICLE CODE AMENDMENTS, DECEMBER 2021" BY REFERENCE; AND AMENDING THE CITY OF BUCKEYE CODE, CHAPTER 12 TRAFFIC CODE, ARTICLE 12-2 TRAFFIC REGULATIONS, BY AMENDING SECTION 12-2-8 COMMERCIAL VEHICLE RESTRICTIONS; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY; PROVIDING FOR PENALTIES; AND DECLARING AN EMERGENCY.

WHEREAS, that certain document entitled the "City of Buckeye Commercial Vehicle Code Amendments, December 2021," of which at least three paper copies or one paper copy and one electronic copy are on file in the Office of the City Clerk and open for public inspection during normal business hours, is hereby declared to be a public record and said copies are ordered to remain on file with the City Clerk; and

WHEREAS, the Mayor and City Council of the City of Buckeye, Arizona, believe that it is in the best interest of the City to amend various sections of the City Code of the City of Buckeye related to commercial vehicle restrictions to promote the health, safety and welfare of the City's residents.

NOW, THEREFORE, BE IT ORDAINED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BUCKEYE, ARIZONA, as follows:

Section 1. The recitals set forth above are hereby incorporated as if fully set forth herein.

Section 2. That certain document entitled the "City of Buckeye Commercial Vehicle Code Amendments, December 2021," is hereby referred to, adopted and made a part hereof as if fully set out in this Ordinance.

Section 3. The City Code is hereby amended by amending the sections referenced in the "City of Buckeye Commercial Vehicle Code Amendments, December 2021," as provided therein in Chapter 12 Traffic Code, Article 12-2 Traffic Regulations, by amending Section 12-2-8 Commercial Vehicle Restrictions.

Section 4. All ordinances and parts of ordinances in conflict with the provisions of this Ordinance or any part of the City Code are hereby repealed.

Section 5. If any section, subsection, sentence, clause, phrase or portion of this Ordinance or any part of the City Code adopted herein by reference, is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions thereof.

Section 6. Violations of any provision of Chapter 12, Article 12-2, Section 12-2-8 of the "City of Buckeye Commercial Vehicle Code Amendments, December 2021," adopted herein shall be subject to the enforcement provisions below:

F. The axle loads and the gross weight and loads of any truck or truck and load driven upon city streets shall not exceed the loads and weights set forth in A.R.S. §§ 28-1099 and 28-1100, the provisions of which are hereby adopted by this reference as though fully set forth herein word for word.

G. Any person driving any truck upon any street under the jurisdiction of the city shall be liable for all damage to any street, light or sign of the city as a result of any illegal operation, driving or moving of the truck, or as a result of operating, driving or moving any truck weighing or measuring in excess of the maximum weight provided in this section.

When the driver is not the owner of the truck, but is so operating, driving or moving the same with the express or implied permission of the owner, then the owner and driver shall be jointly and severally liable for any damage.

Such damage may be recovered in a civil action brought by the city.

H. A person in violation of the provisions of this section shall be

1. Subject to a civil sanction unless the ordinance defining the offense provides for a different classification.

2. Notwithstanding the provisions of subsection (3) of this section, a conviction for a violation of this section in which the weight is two thousand five hundred one pounds or greater is a class 1 misdemeanor.

3. A person who violates any provision of this section which is declared to be a civil traffic violation is subject to the civil sanction set forth in the following table. A second violation of any such provision within six months of a preceding civil judgment is a class 1 misdemeanor. In addition to any other penalties which the court may impose, in all cases the court shall impose the fine or civil sanction in the amount set forth in the following table:

IF THE EXCESS WEIGHT IS:	THE MINIMUM FINE OR CIVIL SANCTION IS:	
	SANCTION	CLASS 1
1,001 to 1,250 pounds	$ 50.00	$ 100.00
1,251 to 1,500 pounds	100.00	200.00
1,501 to 2,000 pounds	150.00	300.00
2,001 to 2,500 pounds	200.00	400.00
2,501 to 3,000 pounds		500.00
3,001 to 3,500 pounds		600.00
3,501 to 4,000 pounds		700.00
4,001 to 4,500 pounds		800.00
4,501 to 4,750 pounds		900.00
4,751 to 10,000 pounds		1,000.00
10,001 to 15,000 pounds		1,250.00
15,001 to 20,000 pounds		1,500.00
20,001 pounds and over		1,800.00

I. If any officer finds that the person has violated only the axle weight limitation and not the total weight limitation, the officer shall request the driver to reload the vehicle to comply with the axle weight limitation, and if the driver so complies, he shall not be subject to arrest or fine. If the driver does not comply with the request of the officer to reload, the driver shall be subject to a civil sanction.

J. The monetary penalties (base fees) collected under the provisions of this section shall be placed in a special fund account to be used for the enforcement of the provisions of this chapter and the regulations promulgated thereunder.

K. The prohibitions of this section shall not apply to trucks operating pursuant to a special permit for the movement of over-dimensional vehicles as permitted by law.

L. Notwithstanding this section, a person who operates or who causes, permits or authorizes the operation on the city's streets of a vehicle singly or in a vehicle

combination with a gross weight in excess of the vehicle's or vehicle combination's declared gross weight is guilty of a class 1 misdemeanor.

Section 7. The Mayor, the City Manager, the City Clerk and the City Attorney are hereby authorized and directed to take all steps and to execute all documents necessary to carry out the purpose and intent of this Ordinance.

Section 8. The immediate operation of the provisions of this Ordinance is necessary for the preservation of the public peace, health and safety of the City of Buckeye and an emergency is hereby declared to exist. This Ordinance shall be in full force and effect from and after its passage, adoption and approval by the City Council of the City of Buckeye.

PASSED AND ADOPTED by the Mayor and City Council of the City of Buckeye, Arizona, this 21st day of December 2021.

CITY OF BUCKEYE COMMERCIAL VEHICLE CODE AMENDMENTS, DECEMBER 2021

Amending the City of Buckeye Code of Ordinances, Chapter 12 – TRAFFIC CODE, Article 12-2 – TRAFFIC REGULATIONS by amending Section 12-2-8 – Commercial Vehicle Restrictions, to read as follows:

Chapter 12 – TRAFFIC CODE

* * *

Article 12-2 – TRAFFIC REGULATIONS

* * *

Section 12-2-8 - Commercial Vehicle; Weight Restrictions

A. For purposes of this section, the following terms shall have the following meanings:

1. "Commercial vehicle" ~~means a truck tractor, trailer or semi-trailer, or any other truck or vehicle used for commercial purposes, whether or not in use, with a gross vehicle weight rating (GVWR) exceeding 26,000 pounds. City vehicles and governmental vehicles operating for governmental purposes are exempt from the restrictions in this section.~~ HAS THE SAME MEANING AS PRESCRIBED TO "COMMERCIAL MOTOR VEHICLE" IN A.R.S. § 28-5201, AS AMENDED.

2. "Declared gross weight" means the gross weight in pounds ascribed to a motor vehicle, trailer, semitrailer or vehicle combination by the applicant for registration.

3. "Gross weight" means the sum of the empty weight in pounds of a motor vehicle combination plus the weight in pounds of the maximum load to be carried on the motor vehicle combination at any one time, except that for tow trucks, gross weight means the sum of the empty weight in pounds of the tow truck plus the weight in pounds of operational supplies and equipment.

4. "Residential street" means any city street with residential structures on either side of the street. This definition does not include federal or state routes.

5. "~~Semi-trailer~~SEMITRAILER" means a vehicle that is with or without motive power that is designed for carrying persons or property and for being drawn by a motor vehicle and that is constructed so that some part of its weight and that of its load rests on or is carried by another vehicle.

6. "Street" means any alley, lane, court, boulevard, public way, public square, public place, public property, sidewalk or thoroughfare, including the entire width

between the boundary lines of every right-of-way, including improved or unimproved shoulder or berm.

7. "Trailer" means a vehicle that is with or without motive power that is designed for carrying persons or property and for being drawn by a motor vehicle and that is constructed so that no part of its weight rests on the towing vehicle. A semitrailer equipped with an auxiliary front axle commonly known as a dolly is deemed to be a trailer.

8. "Truck" means a motor vehicle designed or used primarily for the carrying of property other than the effects of the driver or passengers and includes a motor vehicle to which has been added a box, a platform or other equipment for such carrying.

9. "Truck tractor" means a motor vehicle that is designed and used primarily for drawing other vehicles and that is not constructed to carry a load other than a part of the weight of the vehicle and load drawn.

10. "Vehicle combination" means a motor vehicle and the trailers and semitrailer that it tows.

* * *

F. The axle loads and the gross weight and loads of any truck or truck and load driven upon city streets shall not exceed the loads and weights set forth in A.R.S. §§ 28-1099 and 28-1100, the provisions of which are hereby adopted by this reference as though fully set forth herein word for word.

G. Any person driving any truck upon any street under the jurisdiction of the city shall be liable for all damage to any street, light or sign of the city as a result of any illegal operation, driving or moving of the truck, or as a result of operating, driving or moving any truck weighing or measuring in excess of the maximum weight provided in this section.

When the driver is not the owner of the truck, but is so operating, driving or moving the same with the express or implied permission of the owner, then the owner and driver shall be jointly and severally liable for any damage.

Such damage may be recovered in a civil action brought by the city.

H. A person in violation of the provisions of this section shall be

1. Subject to a civil sanction unless the ordinance defining the offense provides for a different classification.

2. Notwithstanding the provisions of subsection (3) of this section, a conviction for a violation of this section in which the weight is two thousand five hundred one pounds or greater is a class 1 misdemeanor.

3. A person who violates any provision of this section which is declared to be a civil traffic violation is subject to the civil sanction set forth in the following table. A second violation of any such provision within six months of a preceding civil judgment is a class ~~2~~ 1 misdemeanor. ~~A second conviction for a criminal violation of said section within one year of the preceding conviction is a class 1 misdemeanor.~~ In addition to any other penalties which the court may impose, in all cases the court shall impose the fine or civil sanction in the amount set forth in the following table:

IF THE EXCESS WEIGHT IS:	THE MINIMUM FINE OR CIVIL SANCTION IS:		
	SANCTION	~~CLASS 2~~	CLASS 1
1,001 to 1,250 pounds	$ 50.00	~~$ 75.00~~	$ 100.00
1,251 to 1,500 pounds	100.00	~~150.00~~	200.00
1,501 to 2,000 pounds	150.00	~~225.00~~	300.00
2,001 to 2,500 pounds	200.00	~~300.00~~	400.00
2,501 to 3,000 pounds			500.00
3,001 to 3,500 pounds			600.00
3,501 to 4,000 pounds			700.00
4,001 to 4,500 pounds			800.00
4,501 to 4,750 pounds			900.00
4,751 ~~pounds and over~~ TO 10,000 POUNDS			1,000.00
10,001 TO 15,000 POUNDS			1,250.00
15,001 TO 20,000 POUNDS			1,500.00
20,001 POUNDS AND OVER			1,800.00

I. If any officer finds that the person has violated only the axle weight limitation and not the total weight limitation, the officer shall request the driver to reload the vehicle to comply

with the axle weight limitation, and if the driver so complies, he shall not be subject to arrest or fine. If the driver does not comply with the request of the officer to reload, the driver shall be subject to a civil sanction.

J. The monetary penalties (base fees) collected under the provisions of this section shall be placed in a special fund account to be used for the enforcement of the provisions of this chapter and the regulations promulgated thereunder.

K. The prohibitions of this section shall not apply to trucks operating pursuant to a special permit for the movement of over-dimensional vehicles as permitted by law.

L. Notwithstanding this section, a person who operates or who causes, permits or authorizes the operation on the city's streets of a vehicle singly or in a vehicle combination with a gross weight in excess of the vehicle's or vehicle combination's declared gross weight is guilty of a class ~~2~~ 1 misdemeanor ~~pursuant to A.R.S. § 28-5437~~.

ACTION/MOTION: (This language identifies the formal motion to be made by the Council)
Council to take action on a final plat of Verrado Victory District Phase 3C Unit 1, generally located on the northwest corner of Indian School Road and Exeter Boulevard within the Verrado Victory District.

RELEVANT GOALS:
GOAL 3: A Well-Planned Urban Community

SUMMARY

PROJECT DESCRIPTION:

The applicant has requested approval of a final plat of Verrado Victory District Phase 3C Unit 1, consisting of 87 single-family lots on approximately 15 acres generally located on the northwest corner of Indian School Road and Exeter Boulevard within the Verrado Victory District. The associated preliminary plat was approved by the Planning and Zoning Commission on March 23, 2021. Approval of the requested final plat would enable the applicant to develop additional single-family homes in the Verrado Victory District. This request is in general conformance with the approved preliminary plat and the approved Verrado Community Master Plan. Reviewing departments (Planning, Engineering and Fire) have approved the request and the applicant has submitted a Certificate of Assured Water Supply pursuant to ARS 9-463.01.I. Requested by David Nilsen of Verrado ARC LLC.

BENEFITS:

The approval of the requested final plat would enable the applicant to develop additional single-family housing in the Verrado Victory District.

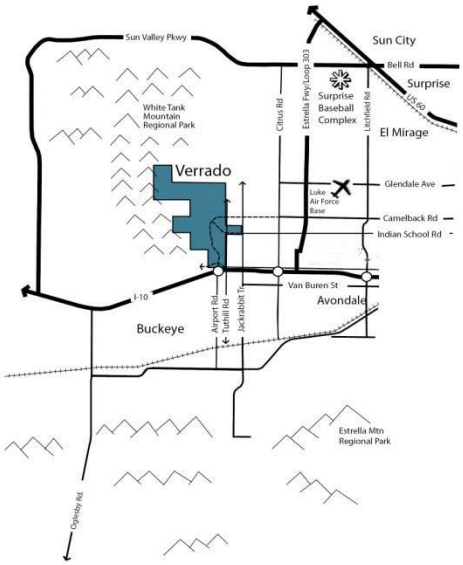
Verrado® Victory District

Final Plat – Phase 3C, Unit 1
Narrative
PLZV-20-00026
(March 31, 2021)

Background

Verrado is an 8,816 acre master planned community located north and south of I-10 and east and west of Verrado Way ("Verrado") as shown on ***Exhibit A***. In 1999, the City of Buckeye (the "City") approved the Pre-Annexation and Development Agreement (the "PADA") and the Community Master Plan ("CMP"), both of which provide the planning and zoning entitlement framework for Verrado.

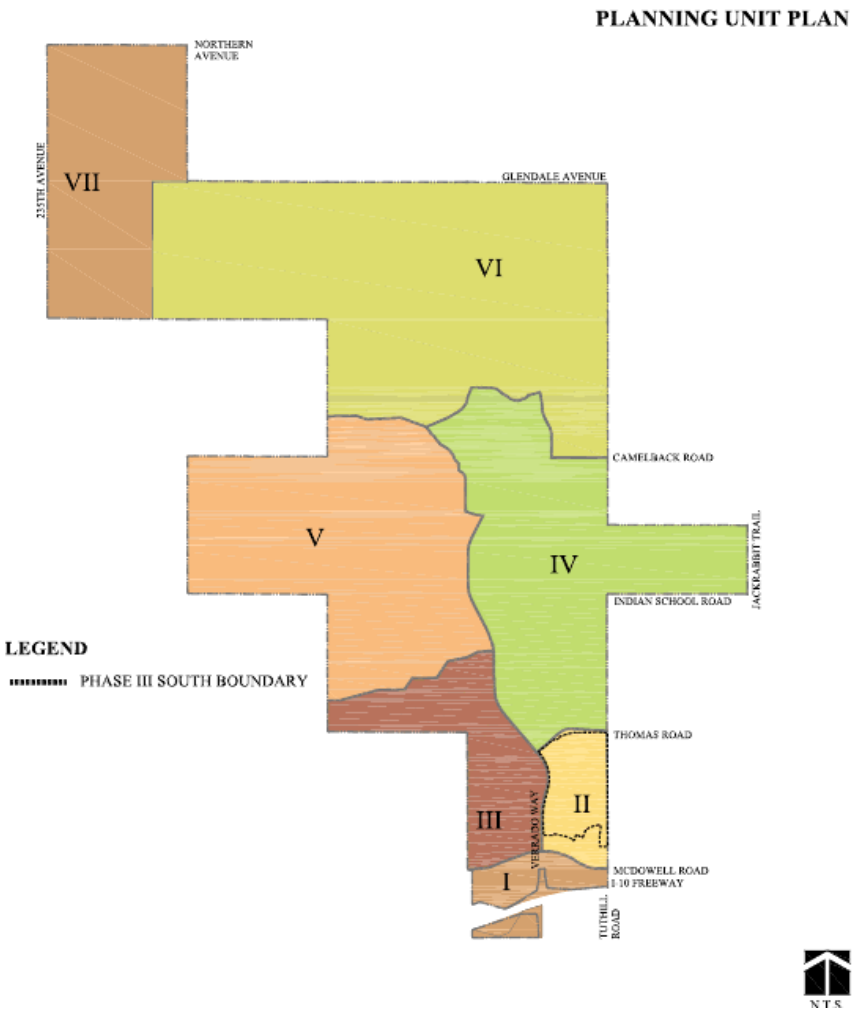
Exhibit A



In 2004, the City approved an amendment to the CMP that added an additional sixteen (16) acres to the entitlements. The CMP, as amended, allows for a maximum of 14,080 residential dwelling units, 4,234,550 square feet of commercial/mixed use and 1,000 resort rooms. A

Land Use Budget allocates these densities/intensities throughout the 8,816 acre property into seven (7) Planning Units as depicted in *Exhibit B*.

Exhibit B



Description of Request

The purpose of this submittal is to request the approval of the Final Plat for Phase 3C, Unit 1 of the Verrado Victory District ("Victory"). The proposed final plat consists of approximately fifteen (15) acres and is located at the northwest corner of Indian School Road and Exeter Boulevard (the "Property") as shown on *Exhibit C*. The parcel lies south of the platted Phase 3A and 3B parcels and abuts the Tuthill Channel along its easterly boundary.

The Final Plat will create eighty-seven (87) residential lots and multiple private tracts that will be utilized for neighborhood parks, trails and other such uses. The overall parcel will be final platted and developed in 3 separate phases called: Unit 1, 2 and 3. Each phase will be based on construction sequencing, maintaining two points of access and properly functioning utilities (wet and dry) from phase to phase.

Overall, Phase 3C has three (3) points of access: southerly access from Exeter Boulevard, and two northerly access points from the platted and constructed Phase 3A and 3B parcels. The final engineering design plans for Exeter Boulevard have been approved by the City of Buckeye and the Map of Dedication has been recorded. Construction of Exeter Boulevard to commence once the plans have been approved.

Streets in Phase 3C will be thirty-two (32) feet in width with a five foot attached sidewalk on one side only. A trail system will traverse through this subdivision and will connect with the existing trail system within the Tuthill Channel corridor.

Exhibit C

Background Victory District

The Victory District is in the area northern portions of Verrado located north of Indian School Road. Victory is an area in Verrado that is exclusively for active adults. This represents a unique opportunity to create a convergence of complementary lifestyles which will add to the diversity

and charm of Verrado. The Victory District has been planned with an emphasis on the following features:

1. Connectivity/Exclusivity in Balance
2. Emphasis on a safe and connected path and trail system within Victory which connects to Verrado and adjacent regional parks
3. Public play Golf Course
4. Age-Restricted Community Center which will be the hub of Victory and include uses such as a fitness center, pools, multi-purpose gathering spaces, kitchen, outdoor gathering spaces, tennis, pickleball and bocce courts and other such uses
5. Lifestyle programming

Consistent with planning for Verrado, DMB has conducted a significant amount of analysis and study on active adult communities with the goal of creating a place that will meet the needs of the active adult population, but also which will seamlessly blend into the community of Verrado. While Victory will have its own personality and qualities, separate and apart from the rest of Verrado, it will complement and blend so as to create the sense that you are still in the same place and that the community has developed organically over many years and phases. It will also be a place where all types of housing are available and individuals can live here from the first time homebuyer, to families to older adults.

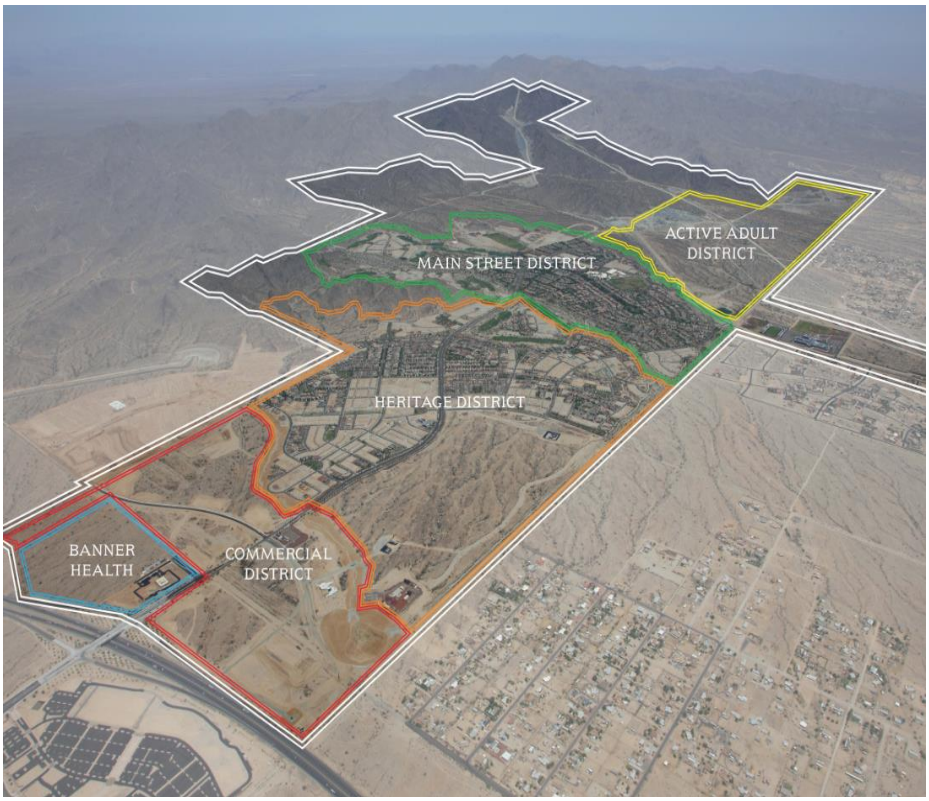
Current Site Conditions

The Property is currently undeveloped and consists of either undeveloped desert and/or areas of disturbed desert. Disturbed areas were utilized as part of the Caterpillar proving grounds operation which ceased operations approximately 30 years ago.

Current General Plan Designation

The entire 8,816 Verrado property is designated as *Master Planned Community* in the City of Buckeye General Plan (ratified by voters May 20, 2008) as shown in ***Exhibit E***. Additionally, portions of the Verrado property are show as Floodway Transition Areas. The updated Planning Unit Drainage Plan and Update to the Master Drainage Plan submittal addresses any drainage issues related to this land use designation.

Exhibit E



Current Zoning Designation

Verrado is zoned Planned Community District ("PC") with an approved CMP and PADA as noted above. The CMP identifies several Development Options which specify allowed uses and development criteria. In accordance with the CMP, Development Options are chosen at the time of preliminary plat approval. Development Options for the Phase 3C Preliminary Plat will be identified on the plat.

Planning Unit Plans

The CMP requires that a Planning Unit Environmental Design Plan ("PUEDP") be approved by the Planning Director. The purpose of the PUEDP is to provide more specificity in terms of generalized character of the area to be developed. The PUEDP addresses site conditions, paths and trails, public facilities, landscaping themes, signage, and lighting. Additionally, plans for drainage, water, sewer and transportation will be submitted concurrently with the final plats to ensure compliance with CMP requirements. A PUEDP for Victory has been approved.

The Victory District is located within two (2) planning units including Planning Units IV and VI.

Surrounding Vicinity Information

	North	South	East	West
Existing Use	Developed – Phase 3A & 3B	Undeveloped – Future Park	Tuthill Channel	Developed
Existing Zoning	PCD	PCD	PCD	PCD
Planning Unit Plan Designation	PU IV and VI	PU IV	PU IV	PU V
Verrado "Districts"	Victory	Main Street	Victory	Main Street

Water Management Plan

EPCOR Water[1] is the water service provider for Verrado. Zone 3 water systems will be extended from Exeter Boulevard to service the Property. Water storage will initially be provided by the Zone 3 South Reservoir. EPCOR Water will initiate the design and construction of the Zone 3 North Reservoir in the near future.

Wastewater Management Plan

EPCOR Water is also the wastewater service provider for Verrado. The wastewater distribution systems will be extended to service the Property from the proposed Tuthill sewer trunk line that directs the wastewater to the existing wastewater reclamation facility, located north of McDowell Road adjacent to the Tuthill Road alignment.

Fire & Police Protection

Fire, Police and emergency services are provided by the City. The Verrado Fire Station 703 is located approximately 2½ miles to the south of the Property at 2582 North Verrado Way. Station 703 is a joint fire/police station that was partially funded by Verrado through the donation of land as well as cash donation as specified in the PADA.

Impact on Local Schools

The Property is located within three (3) school districts including 1) the Litchfield Elementary School District, 2) the Agua Fria Union High School District, and 3) the Saddle Mountain Elementary School District. The proposed Preliminary Plat is in compliance with land use intensities allowed within the land use budget and further, will not impact the school districts by creating a need for additional schools because the project is age restricted. As part of the preliminary plat process, the districts will be notified of the proposed Preliminary Plat.

Transportation/Roadways

Exeter Boulevard, Hazelwood Avenue and 203rd Avenue provides access to Phase 3C. The residential streets have sidewalk on one side, five (5) feet in width. Local roadways will be

[1] EPCOR is a private utility provider service to Verrado and other areas in Maricopa County.

minimum width of thirty-two (32) feet back-of-curb, with parking allowed on both sides of the street.

Development Standards

The Final Plat illustrates 87 residential lots as well as several private "tracts" that will be used for several uses including neighborhood parks, trails and drainage. The residential lots will include different lot sizes resulting in use of several Development Options including Residential Medium and Residential High categories. Below is an abbreviated summary of the Development Options with proposed lot development standards:

Development Option	Lot Size (CMP)		Min. Width & Depth		Max. Lot Coverage	
	CMP	Prop.	CMP	Prop.	CMP	
Residential High	1,000	3,200 (40 x 80)	20'	40'	75%	
Residential Medium	3,500	3,600 (45 x 80)	50% of lots within subdivision shall be a min. of 40' and 50% a min. of 45'	40'	65%	
				45'	65%	

Verrado Design Guidelines

Design Guidelines for Victory have been developed to address the unique character that will be created in this portion of Verrado. The Victory design guidelines are similar to the existing Verrado Design Guidelines that are utilized to guide the unique architectural and land planning character that has made this community unique.

Summary
