Housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Please decline to recommend certification of the Final Environmental Impact Report or approval of the project as proposed. Urge the developer to include housing and ask staff to revise the environmental analysis, meaningfully evaluate a hotel and housing alternative, and recirculate the revised analysis for public review.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion at 2500 N Hollywood Way (Planning Commission Agenda 10/12/26, Item #1, Project No. 16-0003953)**

Burbank needs more housing near jobs and transit. That is why I encourage significant changes to the proposed Marriott Airport Hotel expansion at 2500 N Hollywood Way before approval.

The proposed expansion would add a 420-room dual-brand hotel with no additional housing. The proposed Planned Development zoning allows multifamily residential development, including housing combined with nonresidential uses. The current project represents a missed opportunity to develop a project that includes both housing and hotel uses.

Housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Subject: **Do Not Miss an Opportunity to Include Housing in the Marriott Expansion (Planning Commission Agenda 10/12/26, Item #1, Project No. 16-0003953)**

The proposed Marriott expansion at 2500 North Hollywood Way should include housing. We should not miss the opportunity presented by this site to provide homes near jobs and transit.

The proposal would add 420 hotel rooms to the site of the existing 488-room Burbank Airport Marriott, but no residential units. The proposed Planned Development zoning allows multifamily housing, including housing combined with nonresidential uses. A hotel and housing development deserves serious consideration.

The combination of hotel and residential uses is not unusual for Burbank. The Front Street project, for example, was approved with 573 apartment units and 307 hotel rooms, among other uses. The City should meaningfully evaluate a similar combination of uses at this site.
The Final Environmental Impact Report rejects a hotel and housing alternative WITHOUT any specific analysis that doing so is infeasible on this site.

The City analysis must not rule out an alternative that could provide needed homes and reduce environmental impacts.

Please decline to recommend approval of the project as proposed. Ask staff and the developer to return with a meaningful hotel and housing alternative and revised environmental analysis for public review.

Subject: **Require Stronger Transit Benefits Before Recommending the Marriott Expansion (Planning Commission Agenda 10/12/26, Item #1, Project No. 16-0003953)**

Before recommending approval of the proposed 420-room Marriott expansion at 2500 North Hollywood Way, please require stronger, ongoing transit benefits for hotel employees and meaningful measures to reduce hotel guests' vehicle trips.

The proposed conditions would provide a subsidy covering only 75 percent of a monthly transit pass, available upon request and capped at 20 percent of hotel employees. Based on the environmental analysis's estimate of 85 employees, that would cover no more than 17 workers. Employees who need help getting to work without driving should not be excluded by this cap.

The proposed conditions also allow the developer to stop providing the transit subsidy and a transportation coordinator if a one-week employee survey shows that the hotel has achieved its 38 percent peak-hour commute trip reduction target. A short survey should not allow the hotel to end benefits that workers may depend on and that help sustain reduced driving.

Please require fully subsidized transit passes for every hotel employee who wants one, with ongoing monitoring and corrective action if trip-reduction targets are missed.
Vehicle trips account for approximately 87 percent of the project's estimated greenhouse gas emissions. Employee transit benefits should therefore be accompanied by measures addressing hotel guests, such as transit passes and rail incentives offered when guests book their rooms.

Please decline to recommend approval of the project as proposed until the transportation requirements provide lasting, enforceable benefits for workers and meaningful reductions in vehicle trips and greenhouse gas emissions.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way) (Planning Commission Agenda 10/12/26, Item #1, Project No. 16-0003953)**

The proposed expansion at the Marriott Burbank Airport Hotel should be made more sustainable by incorporating housing. The developer is seeking a new Planned Development zone and a ten-year Development Agreement for a 420-room hotel at 2500 North Hollywood Way. Before recommending these approvals, the City should not miss an opportunity to build housing near transit and employment.

The City's Housing Element describes a nearly three-to-one jobs-to-housing imbalance, exacerbated by rapid employment growth and limited new housing production. Providing homes close to jobs can help shorten commutes and reduce associated greenhouse gas emissions. Yet the current proposal would add jobs without adding any residential units.

A ten-year Development Agreement should secure lasting benefits for Burbank. Please decline to recommend approval of the project as proposed and ask the developer to incorporate housing, along with enforceable measures to reduce greenhouse gas emissions and vehicle trips.

A ten-year Development Agreement should secure lasting benefits for Burbank. Please decline to recommend approval of the project as proposed and ask the developer to incorporate housing, along with enforceable measures to reduce greenhouse gas emissions and vehicle trips.

Single residence housing is preferred over more apartments that add more cars to the road. However, small unit apartments are better than hotels. Out family is 3rd generation in Burbank and there are more and more strangers, unhoused individuals, and increased crime.

Burbank is losing is small hometown feel that made it Burbank.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Lynn Harrill

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

I have lived in Burbank, as a homeowner, for 16 years and am raising two children here. I vote in every election, have voted for many of you, and have met a few of you around town from time to time. I appreciate all that you do and your commitment to this city, and I want to urge you to prioritize housing over new hotels.

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

Housing first.
I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **The Marriott Expansion at 2500 N Hollywood Way should be saved for affordable housing**

I learned three things about Burbank's hotels by patrolling their parking lots each morning looking for ICE:

1. They sometimes collaborate with ICE! Not cool. Marriott in particular has been confirmed to have hosted ICE agents several times across the country, and I feel that it would go against the morals of many proud members of our community to reward a company that has been so hospitable towards this country's secret police

2. None of Burbank's hotels are unionized. I find this to be especially damming in Marriott's case because of their union-busting practices, their reliance on undocumented workers and their aforementioned willingness to work with deportation agents. Any jobs that this expansion would create would be non-union and possibly rely on exploiting people for their immigration status

3. Burbank's hotels have room to spare. By visiting numerous hotels and documenting their parking lots early in the mornings (the time of day hotel parking lots are most full, I assume) I can reasonably guess that Burbank has slack hotel room capacity. By my own estimation, our community is not in need of more hotel capacity at all.

By now I hope I've made a compelling case against the Marriott expansion, and I'm sure that you are well aware of the urgent need for more affordable housing in this community, so I will not belabor those points.
Please rule against the expansion, thank you for your time.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

Simple, hotel rooms do not qualify as housing. 400 more hotel rooms will only increase traffic, noise and pollution. The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress), which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress),which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress), which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

Hello,

Burbank has fallen short in creating affordable housing. Many are upset by the expensive properties that landed on the old ice rink at Riverside Drive. This was not an affordable solution for Burbank.

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Strong Support: Proposed Marriott Expansion (2500 N Hollywood Way)**

As a homeowner in Burbank, I support the expansion of the Marriott.

We DO NOT need more housing in Burbank. We need to support the economy/revenue in our city by providing great revenue generation like hotels to support visitors to come and stay when flying into Burbank. We don’t want them to stay at a hotel outside of the city. When they stay at the hotel, they shop at our shops, and eat at our restaurants. This supports economic growth and revenue generation in Burbank without putting increased housing burden on our infrastructure.

Please do not let special interest groups disrupt the right economic expansion in our city.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Furthermore, finding the right balance is important. There has to be some commercial developments, but at the same time to me it's important to preserve homes, that maybe aren't the most modern constructions, but that doesn't mean they don't carry value. I don't want to think of the future, where there is only super modern designs and nothing else. It's good to preserve homes that once belonged to our ancestors.

The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress), which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress), which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project at 2500 N Hollywood Way should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress), which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion (2500 N Hollywood Way)**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion at 2500 N Hollywood Way. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion (2500 N Hollywood Way))**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion at 2500 N Hollywood Way. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion (2500 N Hollywood Way)**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel at 2500 N Hollywood Way is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. This is much lower than the 0.5 jobs per room estimated for hotels in the City of Los Angeles, or the roughly 0.80 jobs per room ratio assigned for the La Terra mixed-use development located at 777 N. Front Street, which anticipated 244 employees for a 307-room hotel.

Please require that the developer add a housing component to the project.

Subject: **Do Not Miss a Golden Opportunity- the Marriott Expansion Should Include Housing**

The proposed Marriott Expansion project should include housing. We cannot miss the golden opportunity presented by this site. The Draft EIR states the Site's zoning (i.e., PD Zone) allows for unique development opportunities, including the combination of residential and other uses. Additionally, the Site is outside of the Burbank Airport noise contours (suggesting noise compatibility) and is designated Regional Commercial under the City's General Plan that allows high-density, mixed-use housing. Also, the project site is within the "mixed use TOD" area of the Golden State Specific Plan (in progress), which would allow housing at a density of 58-120 dwelling units per acre. Furthermore, the combination of hotel and residential uses within a development site is not uncommon for Burbank (e.g., the Front Street project with 573 apartment units and 307 hotel rooms, among other uses) or other areas near convention centers like downtown Los Angeles.

Do not miss this golden opportunity. Please do not support the project unless it is changed to incorporate a housing component.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Add a Housing Component to the Burbank Marriott Expansion**

Burbank is currently rezoning wide swathes of the City in order to produce more housing and meet state targets for housing production, including in the area by the Burbank Airport as part of the proposed Golden State Specific Plan which would allow housing and mixed-use projects near the airport.

That is why I encourage significant changes to the proposed Mariott Airport Hotel expansion. The proposed expansion would add two new hotels to the Marriott and a total of 420 rooms with no additional housing. However, the Draft EIR states that the site's zoning allows for unique development opportunities, outside of the airport noise contours, and designated Regional Commercial under the City's General Plan, which allows the combination of residential and other uses. Additionally, the conceptual map proposed for the Golden State Specific Plan would allow housing at a density of 58-120 dwelling units per acre on this site, and specifically includes this site in a graphic identifying "mixed use TOD." The current project proposal represents a missed opportunity to develop a project that includes both housing and hotel uses.

Indeed, housing uses can have fewer impacts than hotels on traffic and associated greenhouse gas emissions (GHGs). For example, as compared to a residential apartment dwelling unit, hotels tend to have higher trip generation per hotel room, which means more vehicle trips, vehicle miles traveled (VMTs) and associated mobile emissions on a unit for unit basis.

Additionally, because the average hotel room (e.g., 300 square feet) is about half the size of the average apartment unit (e.g., 600 square feet), roughly two hotel rooms can fit within a single dwelling unit size, which can mean even more VMTs and mobile emissions on a square footage basis too.

Please urge the developer to include a housing option.

Subject: **Please Consider the Environment and Good Planning Practices, Add a Housing Component to the Proposed Marriott Expansion**

The current proposal to build a new hotel expansion to the current site of the Marriott Burbank Airport Hotel is flawed and should be made more sustainable, which could easily be accomplished by adding a housing component. The developer is seeking an amendment to the development agreement to allow for the proposed expansion of the hotel. The City should ensure we do not miss an excellent opportunity to build more housing near transit. Providing housing close to jobs and reducing the housing-jobs imbalance in Burbank can help shorten commute times and reduce associated greenhouse gas emissions.

Additionally, adding housing would improve the City's jobs-housing balance. The City's Housing Element notes that the City has a nearly 3:1 jobs-to-housing imbalance that has been exacerbated in recent years by rapid employment growth and limited new housing production. The project site is located within the proposed Golden State Specific Plan (in progress) that would rezone this area of the city to allow additional housing, which would serve the goal of addressing the City's jobs-housing imbalance. Additionally, applicable land use plans identify the goal of improving jobs/housing balance and reducing commutes. Here, however, the current proposal would add no residential units and only jobs, which could worsen the jobs-housing balance.

Furthermore, the project likely underestimates the number of employees by suggesting the addition of 420 rooms will only add an additional 85 full-time employees, roughly 0.2 jobs per room. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

Subject: **Please Consider More Environmental Mitigations, Including the Addition of a Housing Component, in the Proposed Marriott Expansion**

I encourage the addition of a housing component and additional environmental measures prior to approval of the proposed 420-room Marriott Expansion. The City's greenhouse gas (GHG) efficiency standard is 3.12 metric tons of carbon dioxide equivalent per year (MTCO2e/yr) per service population (sp). The project admittedly does not conform to these environmental standards with an estimated efficiency level of 6.94 MTCO2e/yr/sp (i.e., more than double the City's threshold). However, the impact may be greater than estimated because the developer includes hotel guests and patrons as part of its service population even though the City's Greenhouse Gas Reduction Plan only allow the consideration of residents and employees. Taking out the hotel guests would balloon the efficiency level to 54.9 MTCO2e/yr/sp (i.e., more than 17x the City's threshold). While residents and employees typically live or work at locations on a semi-permanent basis, hotel guests do not and are considered transient. Even extended stays are transient in nature (i.e., 217 of the 420 rooms), which may be offered at discount rates for stays longer than five days, and do not preclude stays of a single night (akin to a traditional hotel stay). Additionally, the Draft EIR's estimated service population assumes 100% occupancy year-round, which is unrealistic. At more realistic occupancy levels and assuming the guests of the 217 extend-stay rooms are akin to residents (which they are not), the project's efficiency level would be roughly 14.9 MTCO2e/yr/sp (i.e., more than 4x the City's threshold).

By including housing, the service population would increase and thus improve the project's GHG efficiency level. Please do not approve the project without a housing component.

RE: City of Burbank's Marriott Hotel Expansion Project

Dear Daniel Villa:

On behalf of the Western States Regional Council of Carpenters ("**Western Carpenters**" or "**WSRCC**"), my Office is submitting these comments for the City of Burbank's November 17, 2026, City Council meeting addressing the Marriott Hotel Expansion Project located at 2500 North Hollywood Way ("**Project**").

WSRCC would like to express its support for this Project. After further reviewing this Project, WSRCC believes that the Project will benefit the environment and the local economy by practicing protocols that will protect worker health and safety and will incorporate adequate environmental mitigation.

Should the City have any questions or concerns, the City should feel free to contact my office.

Sincerely,

Jeremy Herwitt

Valet parking is an environmental hazard. The environmental documentation for this project should, at a minimum, describe and quantify that hazard. You, the city council, must make sure that it does so.
A large parking garage shown in the documentation for this project is labeled “VALET ONLY.”
Please, for the good of the public, customers, workers, and the environment, make sure that no “valet only” restriction is an enforceable or permitted condition of the project. Or, more simply, ensure that all mentions of valet parking are removed from the project’s documents.
AESTHETIC HAZARD:
Valet parking during the operation of the project as proposed is likely to result in the aesthetic problem of many cars parked askew when, for instance, there are too few valets, or when drivers are not present and ready to get in their cars and drive away. Self-driving cars dropping off or picking up passengers and their luggage at a valet location could only add to this stress-inducing appearance of confusion.
AIR QUALITY HAZARD:
Valet parking increases idling time and thus exposure of people to toxic vehicle emissions. The environmental documentation for this project should consider this problem and include it in air quality modeling and a health effects assessment.
TRAFFIC HAZARD:
Valet parking operations often disrupt traffic patterns and block drivers who do not want to use valet parking. Insufficient space or available valets can cause traffic to back up into the street. The environmental documentation for this project must address this.
PUBLIC SAFETY and ENVIRONMENTAL JUSTICE:
People often do not want to use valet parking because they are afraid of valets stealing from their vehicles, or getting into accidents or otherwise damaging their vehicles. Poorer people, or people in groups disproportionally victimized by crime, may fear valet parking more than others, or may simply not want to, or be in a position to, pay

for it. So failure to provide adequately for self-parkers could alter the demographics of visitors to, or patrons of, the hotel.
In the case of accidents caused by valets, people and property may be hurt. Because valet operations often work as independent contractors, it can be exceedingly difficult to recover damages caused by valets or valet parking. The environmental documentation here should address valet parking's externalities.
MITIGATION
If valet parking is part of the project, you should consider mitigation of its problems. That should include requiring that a minimum number of certified and bonded valets be on duty at all times, dedicating a substantial part or majority of the garage to self-parking, directing drivers to that self-parking whenever a valet area is near capacity or full enough to block through traffic, and forbidding valets from leaving vehicles parked in front of the hotels or retrieving vehicles for patrons when their drivers are not present to drive away.

Thank you for considering these comments.

Burbank City Council,

I have serious concerns about the process that brought the IKE Smart City proposal to Burbank.

IKE was initially invited by a single Councilmember and given the opportunity to pitch its product to the City, with more time to pitch its product than actual Burbank residents typically receive during public comment.

The Council then amended its municipal code to accommodate this particular company. No other kiosk providers were considered. We effectively created a special carve-out for one private vendor without a competitive process.

I urge Council to slow down and address the following:

Pause the agreement. Answer outstanding questions about finances, public safety, advertising, placement, and long-term impacts before signing.
Explain the process. Why was IKE selected? What alternatives were considered? Why was our municipal code changed to accommodate one company?
Protect the public. Establish enforceable standards for placement, brightness, nighttime operation, advertising, and pedestrian safety.
Make Phase 2 optional. Require a separate Council vote after evaluating the first 15 kiosks.
Protect the City's right to walk away. Require an unconditional termination-for-convenience clause allowing Burbank to terminate at any time, for any reason, without penalties or future payment obligations beyond amounts properly accrued before termination.
That last point is non-negotiable. No private company should have a 10- or 20-year lock on our public sidewalks. Future Councils must retain the ability to change course in the public's interest.

There is no reason to rush this agreement. Please continue negotiations and put Burbank residents first.

Thank you.

Dear Mayor and Members of the City Council,

I live here in Burbank, and I'm writing to share my thoughts on Reports to Council Item #2 regarding the proposed agreement with IKE Smart City. While I can see the value in having kiosks for emergency alerts and local directions, the current contract commits our city to up to 30 kiosks, which means 60 commercial ad screens, for potentially more than 20 years with very little room to adjust if things don't work out.

Please only approve this agreement if you include these changes:

-Require a separate vote for Phase 2. Don't let the second group of 15 kiosks move forward automatically under Section 3.1. Just as staff recommends in Consideration 1, the Council should evaluate how Phase 1 goes and hold a separate vote before expanding.

-Fix the timeline and renewal rules. Renewals should require a mutual written agreement, and we should remove the unilateral catch-up payment option in Exhibit A. The initial term also needs to start on the Effective Date so the contract can't stretch beyond 20 calendar years.

-Keep prediction market ads off our sidewalks. Follow staff's advice in Consideration 4 and cut the prediction market exception in Section 13.

-Set clear screen limits in the contract. Simply asking for "appropriate" brightness in Section 10.1 isn't enough when these screens can reach 4,000 nits. Put a hard numeric cap on nighttime brightness, require static images with no audio, and shut commercial ads off completely overnight.
-Protect all neighborhoods and parks. Expand the 150-foot buffers in Section 4.1 to cover every residential zone and public park, not just schools and single-family homes. Any exception that shrinks a buffer to 100 feet should require a Council vote, and the public notice process for new sites should be spelled out in the contract now instead of being negotiated later.

There is no hard deadline to sign this deal, and newly elected Councilmembers take office on December 14. Please go with Option 2c: have staff negotiate these updates and bring the contract back after the new Council is seated, so the members who will actually oversee this program get a vote on it.

Starting smaller with real checkpoints lets Burbank get the safety and revenue benefits without permanently handing our sidewalks over to two decades of advertising.

Thank you for your time and consideration.

Dear Mayor and Members of the City Council,

I ask you to vote against the proposed agreement with IKE Smart City, LLC to install what are essentially digital advertising kiosks on Burbank's sidewalks, forgoing a 26 year ban on billboards.

Large, bright screens with adversitments will distract drivers, especially at night, making our city less safe.

Smart kiosks also often use digital tracking to collect data. People should be able to walk down a public street without a private company tracking their movements or phone data or being advertised to, especially in town that currently has a billboard ban.

Burbank belongs to its citizens, not to advertising companies. Please reject this agreement and protect the character, privacy, and walkability of our neighborhoods. There is no reason to clutter Burbank's sidewalks for two decades with thirty digital screens that will require constant upkeep.

Thank you for your consideration.

Patricia Padilla

Our city does not need any more digital clutter on our sidewalks. Finding directions to where one needs to go is not difficult for anyone with a smartphone phone, which is nearly everyone. We are already digitally-tracked enough in the country. We do not need to invite more of that into our friendly neighborhood of Burbank.

Mayor and Members of the City Council,

I am writing to express my strong opposition to the proposed agreement with IKE Smart City, LLC for the installation and operation of interactive digital wayfinding kiosks throughout Burbank.

While modernizing civic communication is a worthwhile goal, bringing large, ad-supported digital kiosks onto our public sidewalks creates significant drawbacks for our neighborhoods, local businesses, and residents:

Sidewalk Clutter and Visual Pollution: Burbank’s walkable districts, such as Downtown Burbank and Magnolia Park, thrive because of their welcoming, small-town, pedestrian-friendly character. Placing large, brightly lit digital screens on our sidewalks introduces visual clutter, obstructs pedestrian flow, and detracts from the charm that makes these areas attractive to residents and visitors alike.

Privacy and Surveillance Concerns: Interactive smart city kiosks frequently rely on sensors, cameras, and Wi-Fi or Bluetooth tracking to measure foot traffic, gather demographic analytics, and serve targeted advertisements. Residents and visitors should be able to walk down a public street without their movements or device data being passively monitored or monetized by a private third-party vendor.

Redundancy in the Smartphone Era: Nearly every visitor already carries a GPS-enabled smartphone with real-time maps, transit schedules, and local business reviews in their pocket. Investing public space and administrative oversight into physical wayfinding hardware that duplicates existing technology is unnecessary, especially when the primary revenue model relies on turning our public right-of-way into commercial billboard space.

Light Pollution and Accessibility Impacts: Illuminated, animated digital displays create glare and light pollution, particularly in the evening hours, and can be distracting for drivers and disorienting for pedestrians with visual or sensory sensitivities.

Burbank’s public sidewalks belong to the community, not to third-party advertising networks. I urge the City Council to reject this agreement and preserve the character, privacy, and walkability of our streets.

Thank you for your time and consideration.

Re: Public Hearing Item 1, City Council Meeting of November 17, 2026: 2500 North Hollywood Way Dual Brand Hotel Project, Project No. 16-0003953; Final Environmental Impact Report (SCH No. 2019110032)

Dear Honorable Mayor and Members of the City Council:

This Firm represents UNITE HERE Local 11 ("Local 11"), a labor union that represents more than 25,000 workers employed in hotels, restaurants, airports, sports arenas, and convention centers throughout Southern California and Phoenix, Arizona, including many who live and work in Burbank, and has standing to raise these comments.[1] Local 11 submits these comments under the California Environmental Quality Act ("CEQA") on the proposed certification of the Final Environmental Impact Report ("FEIR") and approval of the 420-room dual brand hotel at 2500 North Hollywood Way (the "Project"). This letter supplements Local 11's comments on the Draft Environmental Impact Report ("DEIR") dated January 29, 2025, and this Firm's letter to the Planning Commission dated October 12, 2026, both of which are incorporated by reference.[2]

---

[1] *Bakersfield Citizens for Local Control v. City of Bakersfield* (2004) 124 Cal.App.4th 1184, 1198.

[2] For purposes of Pub. Res. Code §21167.6(e)(7), the court in *Consolidated Irrig. Dist. v. Superior Court* (2012) 205 Cal.App.4th 697, 723, held that such evidence has been submitted to the agency "when the commenter has made the document readily available for use or study by

Local 11 commissioned an expert report from Steve Rogers of Steve Rogers Acoustics, LLC to assess the Project's noise impacts (Exhibit A), and an expert report from Ray Kapahi of Environmental Permitting Specialists to assess the Project's impacts on air quality and public health (Exhibit B). Both experts reviewed the City's November 2026 revised FEIR. Although CEQA allows objections to be raised orally or in writing at any time before the close of the public hearing on the Project (Pub. Resources Code § 21177(a)), Local 11 is submitting these comments ahead of the upcoming hearing so that Staff and the City's consultants have the opportunity to review and respond to them.

Briefly, the FEIR should not be certified, and the CEQA findings and Statement of Overriding Considerations should not be adopted, because the EIR understates the Project's impacts and the City has not considered feasible mitigation that would substantially lessen them. Local 11 respectfully requests that the City Council decline to certify the FEIR, direct Staff to revise and recirculate the EIR pursuant to CEQA Guidelines § 15088.5, and decline to approve the Planned Development, Development Agreement, and Development Review at this time.

First, the EIR never analyzes construction noise at the homes closest to the Project's offsite electrical work, approximately 60 feet away, where noise would reach approximately 85 dBA, more than 20 dBA above the EIR's own threshold. The only construction noise mitigation measure, NOI-1, provides no measurable reduction, and feasible measures such as noise barriers, enforceable noise limits, limits on work duration, and temporary relocation were never evaluated. The EIR also understates nighttime noise from the hotel's mechanical equipment and outdoor gathering areas. (Section I.)

Second, the EIR's localized air quality analysis relies on screening tables that place the nearest homes 360 feet away, even though construction would occur within about 45 to 60 feet of homes. Dispersion modeling shows that construction emissions would exceed the federal 1-hour nitrogen dioxide ("NO2") standard at offsite locations, including in the residential neighborhood along the Wyoming Avenue sewer alignment. The EIR contains no construction health risk assessment, in a census tract among the most pollution-burdened in California, and it requires no measure to reduce construction emissions. (Section II.)

Third, the air quality appendix posted on the State's CEQAnet database is a different document from the one posted on the City's website, and the DEIR describes one version while reporting the numbers of the other. The public could not meaningfully review the technical basis for the DEIR's air quality conclusions. (Section III.)

Fourth, the November 2026 errata confirms that Mitigation Measure GHG-1 provides no quantified reduction, contrary to the City's own Greenhouse Gas Reduction Plan ("GGRP"), and

---

lead agency personnel." The court concluded that citing the URL of a specific webpage amounts to submission of the document found on that page to the agency. (*Id.* at pp. 724-725.) Accordingly, the documents cited in this letter by URL have been submitted to the City, and Local 11 requests that they be included in the administrative record and made available to the decisionmakers.

the GGRP shows that counting 588 hotel guests in the Project's service population counts visitors twice. (Section IV.)

Fifth, the proposed findings reject the environmentally superior alternative without finding it infeasible, and the Statement of Overriding Considerations rests on benefits the record does not quantify. (Section V.) The new and more severe impacts, and the feasible mitigation, identified in this letter are significant new information that requires the EIR to be revised and recirculated before certification. (Section VI.)

I. THE EIR UNDERSTATES NOISE IMPACTS AND IGNORES FEASIBLE MITIGATION

A. The Homes Closest to the Offsite Electrical Work Were Never Analyzed

The DEIR acknowledges that the Project's electrical connection at Thornton Avenue and Ontario Street would occur approximately 60 feet from multi-family residences on Ontario Street, but it provides no analysis of construction noise at those homes. Instead, it relies on Table 5.9-5, which models onsite construction at receivers 360 and 640 feet away. (DEIR, pp. 5.9-13 to 5.9-14; Exhibit A, § 4(a).) The November 2026 errata revised this paragraph, but only to delete an incomplete sentence. As revised, the paragraph acknowledges multi-family residences approximately 60 feet from the electrical connection work at Thornton Avenue and Ontario Street, then states that the closest residences to the other offsite improvements along Thornton Avenue and North Avon Street are approximately 1,000 feet away, and treats the onsite modeling at 360 and 640 feet as a "conservative" representation of all of the offsite work, as shown in the screenshot below (FEIR, pp. 3-3 to 3-4):

> Thornton Avenue and Ontario Street intersection. The closest residential uses are multi-family residential units located on Ontario Street, approximately 60 feet south of the Thornton Avenue and Ontario Street intersection. These off-site improvements would occur nearer to the Project site boundary and would be in areas where residences are not located nearby. Specifically, the closest residences to the proposed off-site improvements along Thornton Avenue and North Avon Street are approximately 1,000 feet to the east. As such, construction noise from off-site improvements would be less than noise levels from sewer main improvements due to the farther distance from sensitive receptors. While the off-site improvements are located 1,000 feet from sensitive receptors, as a conservative analysis, construction noise levels as shown in Table 5.9-5 would be representative of off-site improvements within the vicinity of the Project site. Additionally, off-site improvements would occur concurrently with the construction of the proposed Project. ~~As such, off-site improvements along Thornton Avenue and North Avon Street.~~ Thus, noise impacts from off-site improvements would also be significant.

Neither distance is conservative for a home 60 feet away.

Mr. Rogers extrapolated the DEIR's own model of the comparable sewer work and estimates construction noise of approximately 84.9 dBA at the Ontario Street homes, more than 20 dBA above the EIR's 63.7 dBA significance threshold. (Exhibit A, § 4(a), Table 1.) An EIR must disclose the severity of a significant impact, not merely label it significant. (*Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 514; *Berkeley Keep Jets Over the Bay Com. v. Board of*

Port Cmrs. (2001) 91 Cal.App.4th 1344, 1371.) The EIR does not do so for the residents most exposed to the Project's construction.

B. The Noise Baseline Is Unreliable

The EIR's baseline rests on two short daytime readings. The DEIR's Table 5.9-1 and the detailed data in Appendix H report the two readings at opposite locations, so it is unclear which threshold applies where. (Exhibit A, § 2(a).) No measurement was taken anywhere on the Wyoming Avenue sewer alignment; the EIR borrows the reading at Lundigan Park instead. Mr. Rogers measured ambient noise on the alignment itself and found a lower level, which supports a threshold of approximately 62.1 dBA for those homes rather than 63.7 dBA. (*Id.*, § 2(b).) No nighttime or 24-hour data were collected at all, even though the EIR's operational thresholds depend on them: the City's stationary source limits include separate nighttime limits, and the federal criteria the DEIR cites compare 24-hour Community Noise Equivalent Levels, which cannot be calculated from daytime readings alone. (*Id.*, § 2(d).) An EIR must describe the existing physical conditions against which impacts are measured. (CEQA Guidelines § 15125(a).)

C. Mitigation Measure NOI-1 Provides No Measurable Reduction

NOI-1, which the errata left substantively unchanged (FEIR, p. 3-2), is a list of practices any responsible contractor would follow: mufflers, signs, a complaint coordinator, and barriers "where feasible." The DEIR suggests that mufflers can reduce noise by 15 to 25 dBA. But construction equipment is already equipped with factory mufflers, and the Federal Highway Administration's Roadway Construction Noise Model that the EIR uses is based on measurements of equipment that already has factory mufflers, so the muffler requirement adds no reduction at all. (Exhibit A, § 4(c).) The EIR quantifies no reduction from any part of NOI-1.

D. Feasible Measures Would Substantially Reduce Construction Noise

An EIR "shall describe feasible measures which could minimize significant adverse impacts." (CEQA Guidelines § 15126.4(a)(1).) Even where a project's benefits outweigh its unmitigated effects, the agency must still adopt all feasible mitigation measures unless they are truly infeasible. (*City of Marina v. Board of Trustees of California State University* (2006) 39 Cal.4th 341, 368-369; *City of San Diego v. Board of Trustees of California State University* (2015) 61 Cal.4th 945; Pub. Resources Code § 21002.) Mr. Rogers identifies six more stringent measures that the EIR did not evaluate. NOI-1 mentions temporary acoustic barriers only "where feasible," with no design, performance standard, or quantified reduction, and the EIR does not evaluate barriers of the kind Mr. Rogers recommends or any of the other measures. (Exhibit A, §§ 4(c), 4(d).)

Measure	What it would do
RNMM-1: Perimeter construction noise barriers	Reduce onsite construction noise at Ontario Street homes by an estimated 8 to 10 dBA, bringing every onsite phase below the EIR's threshold (Exhibit A, Table 2)

Measure	What it would do
RNMM-2: Barriers along the sewer and electrical alignments	Reduce noise at the closest homes and the number of homes significantly affected at any time
RNMM-3: Enforceable noise limit with monitoring	Give NOI-1 a measurable performance standard
RNMM-4: Limit on days of work in front of each home	Reduce the number of days each home is exposed, which the FEIR itself identifies as a way to lessen construction noise exposure (FEIR, p. 2-67)
RNMM-5: Quieter equipment and methods	Reduce source noise
RNMM-6: Temporary relocation above set exposure levels	Avoid the most severe exposures; hotel rooms are available on the Project site

The EIR's significant and unavoidable utilities impact is itself the construction noise from the Project's onsite and offsite infrastructure work. (FEIR, p. 2-35; PC Hearing.)[3] Because the offsite construction noise drives both the noise impact and the utilities impact, these measures would lessen two of the EIR's three significant and unavoidable impacts. The City cannot find these impacts unavoidable without explaining why each measure is infeasible. (Pub. Resources Code § 21081(a)(3); CEQA Guidelines § 15091(a)-(b).)

E. The EIR Understates Nighttime Operational Noise

The DEIR models the hotel's heating, ventilation, and air conditioning ("HVAC") noise as a single small residential air conditioner and concludes that it would reach only about 33 dBA at the Ontario Street homes. (DEIR, p. 5.9-17.) A 420-room hotel will likely require many large rooftop units. Mr. Rogers estimates that HVAC noise at those homes would be 55 dBA or more, which would exceed the 50 dBA nighttime limit for mechanical equipment at residential property (a 45 dBA nighttime base level plus 5 dBA). (Burbank Mun. Code § 9-3-208; Exhibit A, §§ 3, 5.) The DEIR's analysis of the outdoor event terrace and patio likewise assumes the sound of a single person talking; a crowd of 100 or more would produce approximately 50 dBA at the same homes, with no limit on evening or nighttime use. (*Id.*, § 6.) In Mr. Rogers's opinion, these are potentially significant impacts that the DEIR does not identify. Limits on the hours of the outdoor areas and on amplified sound would be feasible measures. (*Ibid.*)

[3] Citations to "PC Hearing" refer to the Planning Commission's October 12, 2026 public hearing on the Project (Item 1).

II. THE EIR UNDERSTATES THE AIR POLLUTION NEARBY RESIDENTS WOULD BREATHE

A. Construction Emissions Would Exceed the Federal 1-Hour NO2 Standard

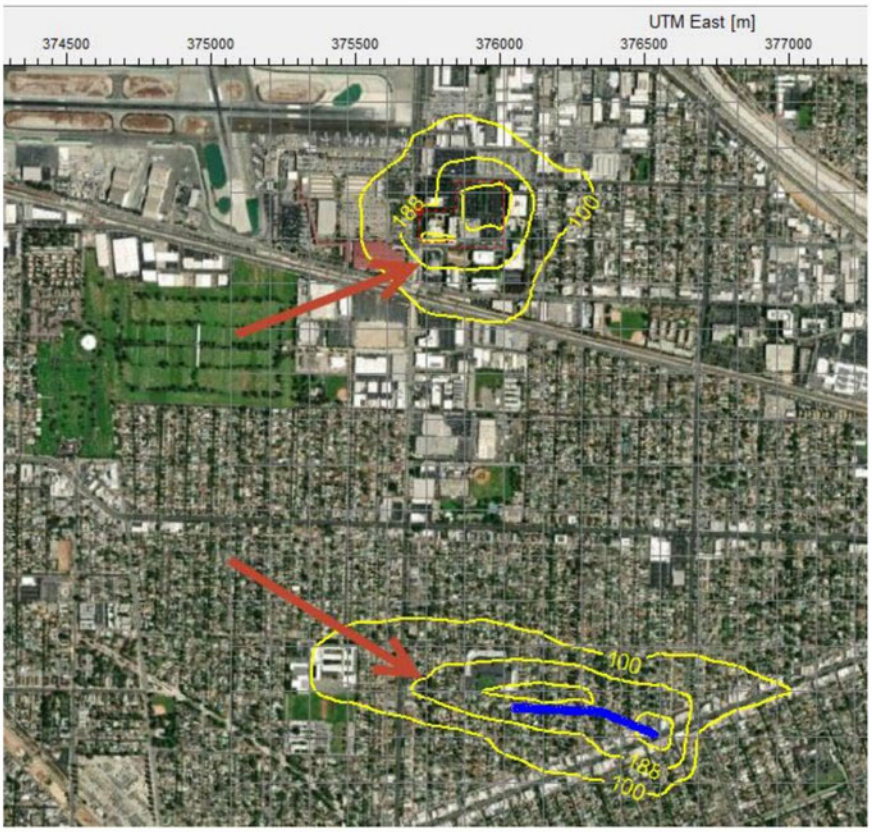
The DEIR finds localized air quality impacts less than significant by comparing onsite construction emissions to the South Coast Air Quality Management District's ("SCAQMD") Localized Significance Threshold ("LST") screening tables. (DEIR, pp. 5.1-26 to 5.1-27, Table 5.1-6.) Those tables are not a substitute for analyzing the concentrations residents would actually breathe. The DEIR applied the LST values for receptors 100 meters away, based on homes approximately 360 feet from the site boundary (*ibid.*), even though Table 5.1-6 itself includes the sewer main work, which would occur as close as about 45 feet from homes on Wyoming Avenue, and the offsite electrical work occurs about 60 feet from homes on Ontario Street. In addition, SCAQMD's localized thresholds are based on the state 1-hour NO2 standard of 0.18 parts per million (339 micrograms per cubic meter). (Exhibit B, Attachment 1.) They do not address the federal 1-hour NO2 standard of 100 parts per billion (188 micrograms per cubic meter), which is about 45 percent lower and, like the state standard, is set to protect public health. (*Id.*, Attachment 2.) The question under CEQA is whether the Project would expose sensitive receptors to substantial pollutant concentrations (DEIR, p. 5.1-25 [Impact AQ-3]), and the DEIR offers no reason for not evaluating the Project's construction emissions against the federal standard. SCAQMD itself recommended that the City perform a localized analysis using either its localized significance thresholds or dispersion modeling, and asked the City to provide all air quality modeling files. (SCAQMD NOP Comments, Dec. 3, 2019.)[4] An EIR must make a reasonable effort to connect a project's emissions to their likely health consequences. (*Sierra Club v. County of Fresno*, *supra*, 6 Cal.5th 502.)

Mr. Kapahi performed dispersion modeling. Using the DEIR's own construction emissions, he found that 1-hour NO2 concentrations would exceed the federal ambient air quality standard of 100 parts per billion (188 micrograms per cubic meter) at offsite locations, both around the Project site and along the Wyoming Avenue sewer alignment, where the area exceeding the standard extends into the residential neighborhood on either side of the work, as shown in Mr. Kapahi's Figure 1 below. (Exhibit B, AQ-3 discussion and Figure 1.)

[4] SCAQMD, Comments on the Notice of Preparation for the 2500 N. Hollywood Way Project (Dec. 3, 2019), https://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2019/december/LAC191106-03.pdf; also reproduced in DEIR Appendix B.

Figure 1

Spatial Distribution of 1-hour NOx Concentration
In Micrograms per cubic meter



Note: Area enclosed by the contour labeled 188 would exceed the 1-hour NOx ambient air quality standard. The red arrow points to this contour

The South Coast Air Basin is in attainment for NO2, and SCAQMD treats a project as significant if it causes or contributes to an exceedance of an ambient standard. (*Id.*, Attachment 1.) A project that would cause new exceedances also conflicts with the region's Air Quality Management Plan. (*Id.*, AQ-1 discussion.) Neither impact is disclosed in the EIR.

B. The EIR Contains No Health Risk Assessment for Construction Diesel Emissions

Construction would involve diesel equipment operating over the more than 400 working days of building construction modeled in the DEIR, including the sewer work as close as about 45 feet from homes on Wyoming Avenue. Yet the EIR contains no assessment of cancer or non-cancer risk from diesel particulate matter. (Exhibit B, toxic air contaminants discussion.) SCAQMD recommended a health risk assessment of the Project's mobile sources and an analysis of toxic air contaminants from equipment. (SCAQMD NOP Comments, Dec. 3, 2019.) The omission matters here in particular. According to the DEIR's own modeling output, the

Project's census tract has a CalEnviroScreen 4.0 score of 92 out of 100, is designated a disadvantaged community under Senate Bill 535 and a low-income community under Assembly Bill 1550, and ranks at the 89th percentile statewide for diesel particulate matter exposure. (DEIR Appendix C, CalEEMod Health and Equity Details.) The DEIR's own output states:

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	92.0
Healthy Places Index Score for Project Location (b)	29.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	Yes
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

The relevant question is not the relative size of the Project's contribution, but whether any additional amount should be considered significant in light of the existing conditions. (*Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692, 718; *Los Angeles Unified School Dist. v. City of Los Angeles* (1997) 58 Cal.App.4th 1019, 1025.)

C. The EIR Requires No Measure to Reduce Construction Emissions

The DEIR's construction modeling assumes that all equipment would have "Average" engine tiers, and its mitigated and unmitigated construction emissions of nitrogen oxides ("NOx") are identical. (DEIR Appendix C, § 2.1.) The unmitigated equipment list is excerpted below; the mitigated list in Appendix C assigns the same "Average" tier to every piece of equipment. (*Id.*, §§ 5.2.1, 5.2.2.)

5.2. Off-Road Equipment

5.2.1. Unmitigated

Phase Name	Equipment Type	Fuel Type	Engine Tier	Number per Day	Hours Per Day	Horsepower	Load Factor
Demolition	Rubber Tired Dozers	Diesel	Average	2.00	8.00	367	0.40
Demolition	Excavators	Diesel	Average	3.00	8.00	36.0	0.38
Demolition	Concrete/Industrial Saws	Diesel	Average	1.00	8.00	33.0	0.73
Grading	Graders	Diesel	Average	1.00	8.00	148	0.41
Grading	Excavators	Diesel	Average	2.00	8.00	36.0	0.38
Grading	Tractors/Loaders/Backhoes	Diesel	Average	2.00	8.00	84.0	0.37
Grading	Scrapers	Diesel	Average	2.00	8.00	423	0.48
Grading	Rubber Tired Dozers	Diesel	Average	1.00	8.00	367	0.40
Building Construction	Forklifts	Diesel	Average	3.00	8.00	82.0	0.20
Building Construction	Generator Sets	Diesel	Average	1.00	8.00	14.0	0.74
Building Construction	Cranes	Diesel	Average	1.00	7.00	367	0.29
Building Construction	Welders	Diesel	Average	1.00	8.00	46.0	0.45

No measure to reduce construction NOx or diesel particulate emissions was assumed or required. Mr. Kapahi identifies feasible measures commonly used in the South Coast Air Basin: Tier 4 Final off-road equipment; zero-emission and renewable-diesel equipment; phasing to avoid overlap of the most intensive phases and keeping equipment away from homes, including on Wyoming Avenue; and idling and haul truck controls. (Exhibit B, mitigation discussion.) The

City must consider these measures before it can approve the Project. (Pub. Resources Code § 21002.)

III. THE AIR QUALITY APPENDIX THE PUBLIC REVIEWED ON CEQANET IS A DIFFERENT DOCUMENT FROM THE ONE ON THE CITY'S WEBSITE

A. The Two Versions of Appendix C Do Not Match

The City posted the DEIR and its appendices on its project webpage, and the State Clearinghouse posted them on CEQAnet, the State's CEQA database, through which state agencies and the public review environmental documents.[5] The two versions of Appendix C describe the same Project, a 420-room, 262,338-square-foot hotel at 2500 North Hollywood Way with 673 garage spaces and 250 surface spaces, but they are different documents containing different modeling:

	City website version	**CEQAnet version**
Title	Air Quality, Energy, and Greenhouse Gas Emissions Data	Air Quality/Health Risk Assessment, Energy, and Greenhouse Gas Emissions Data
Length	172 pages	344 pages
CalEEMod model run	Two runs dated September 23, 2024, with and without project design features	One run dated March 7, 2024
Operational year modeled	2030	2027
Hotel electricity use	2,988 megawatt-hours per year	3,357 megawatt-hours per year
Daily vehicle trips (energy calculations)	4,315	4,099
Dispersion modeling and health risk	None	2021 AERMOD modeling and HARP health risk calculations for airport aircraft emissions

[5] Compare DEIR Appendix C as posted on the City's project webpage (https://www.burbankca.gov/web/community-development/2500NHW, archived at https://web.archive.org/web/20261112200044/https://www.burbankca.gov/web/community-development/2500NHW) with DEIR Appendix C as posted on CEQAnet (https://ceqanet.lci.ca.gov/2019110032/4, archived at https://web.archive.org/web/20261112200202/https://ceqanet.lci.ca.gov/2019110032/4).

Neither version contains the other's model runs. The differences are visible on the face of the documents, as shown in the screenshots below:

B. The DEIR Describes One Version but Reports the Numbers of the Other

The DEIR states that its air quality section is based on the "Hollywood Way Detailed Report prepared by Denovo Planning Group dated March 7th, 2024 included as Appendix C," as shown below (DEIR, p. 5.1-1):

5.1 AIR QUALITY

The purpose of this section is to describe the existing air quality characteristics and to identify the air pollutant emissions generated by the construction and operation of the proposed Project and address their potential impacts to air quality, including toxic air contaminants. This section is based in part upon *South Coast Air Quality Management District 2022 Air Quality Management Plan* (SCAQMD 2022 AQMP) adopted December 2, 2022 and *Hollywood Way Detailed Report* prepared by Denovo Planning Group dated March 7th, 2024 included as Appendix C, Air Quality, Energy, and Greenhouse Gas Emissions Data.

That March 7, 2024 report is the one posted on CEQAnet. It does not appear in the City's version. Yet the construction emissions the DEIR reports, including 45.0 pounds per day of NOx in 2026 (DEIR, p. 5.1-21, Table 5.1-3), match the September 23, 2024 model run in the City's version, not the March 7, 2024 run, which reports a maximum of 45.3 pounds per day. The CEQAnet version is also titled as containing a "Health Risk Assessment," but its only health risk calculations concern airport aircraft emissions at a worker receptor, and the DEIR's analysis of sensitive receptor exposure does not mention any health risk assessment at all. (DEIR, pp. 5.1-25 to 5.1-29.)

C. The Public Could Not Meaningfully Review the Air Quality Analysis

An EIR's technical data must be available to the public and reviewing agencies so that they can evaluate its conclusions. (CEQA Guidelines §§ 15087, 15147.) Here, anyone who reviewed Appendix C on CEQAnet, including any state agency, reviewed modeling that does not produce the emissions reported in the DEIR. Anyone who reviewed Appendix C on the City's website could not find the March 7, 2024 report on which the DEIR says it is based. Either way, the public was not given the technical basis for the DEIR's air quality conclusions. The City should identify which document is the DEIR's Appendix C, explain the discrepancy, and recirculate the correct appendix with the revised air quality analysis. (CEQA Guidelines § 15088.5(a)(4).)

IV. THE GREENHOUSE GAS ANALYSIS REMAINS UNSUPPORTED

A. The Errata Confirms That GHG-1 Provides No Quantified Reduction

Local 11's October 12 letter pointed out that the DEIR and the draft findings described GHG-1 as requiring CALGreen Tier 2 and carbon offsets, while the measure itself required neither. The City has now resolved that inconsistency by deleting the descriptions, not by adding the requirements. The November 2026 errata strikes the DEIR's statement that GHG-1 "would require the incorporation of Tier 2 requirements of the 2022 CALGreen Code," and strikes "purchasing carbon offsets" from the DEIR's description of GHG-1, because neither is part of GHG-1 or was included in the emission calculations. (FEIR, p. 3-3 [revising DEIR pp. 5.5-16, 5.5-23].) The revised text concedes that GHG-1's remaining features "are not quantifiable in CalEEMod." (*Ibid.*) Staff describes the errata as "non-substantive." (City Council Staff Report, p. 6, fn. 1.) Removing the only building efficiency and offset requirements the DEIR attributed to GHG-1 is not a non-substantive change. The errata reads as follows:

Section 5.5, Greenhouse Gas Emissions

Draft EIR Page 5.5-16 has been revised to remove references to CalGreen Code Tier 2 requirements as they are not identified in Mitigation Measure GHG-1 (Draft EIR page 5.5-24) and were not included within the GHG emission calculations. The Draft EIR text will be revised in the Final EIR , as follows:

> As the proposed Project would exceed the GGRP efficiency threshold of 3.12 $MTCO_2e$ per service population even with incorporation of Project design features, the Project would be required to implement Mitigation Measure GHG-1; refer to Table 5.5-3. ~~Mitigation Measure GHG-1 would require the incorporation of Tier 2 requirements of the 2022 CALGreen Code. Per the CALGreen Code, Tier 2 requirements are typically voluntary tiers that add additional requirements beyond the mandatory measures.~~ Mitigation Measure GHG-1 includes the following features: preparation of a Transportation Management Plan, joining the Burbank Transportation Management Organization, owning a clean-fuel vehicle fleet, and no wood-burning or gas-powered fireplaces. However, it should be noted that these features are not quantifiable in CalEEMod.

Draft EIR Page 5.5-23 inadvertently references purchasing carbon offsets as being included within Mitigation Measure GHG-1. Carbon offsets are not included in Mitigation Measure GHG-1 (Draft EIR page 5.5-24) and were not considered in potential reductions to GHG emissions. The Draft EIR text will be revised in the Final EIR, as follows:

> Based on Table 5.5-4, the Project would incorporate a majority of the GHG reduction measures as a part of the Project's description. However, the Project would be required to implement Mitigation Measure GHG-1, which requires the Project applicant to implement additional features in the Project that would reduce GHG emissions, including preparing a Transportation Management Plan, which includes voluntary and mandatory trip reduction measures, such as discouraging single-occupancy vehicle trips and encouraging alternative modes of transportation, including, but not limited to, carpooling, taking transit, walking, and biking, and implementing employee parking cash-outs ~~and purchasing carbon offsets~~, thereby reducing VMT and GHG emissions to the maximum extent feasible.

The EIR therefore credits GHG-1 with no quantified reduction at all. The only quantified reductions come from project design features, which lower annual emissions by about 80 metric tons of carbon dioxide equivalent ("MTCO2e"), from 4,751.66 to 4,671.49 MTCO2e. Mobile sources account for 4,044 MTCO2e per year and are not reduced by any quantified measure. (DEIR Appendix C; City Council Staff Report, Att. 1, p. 40.) This does not comply with the City's own GGRP, which provides that when a project exceeds the threshold, "mitigation measures must be identified and respective GHG emissions reduction calculations included" to reduce emissions to or below the threshold. (GGRP, CEQA GHG Emissions Thresholds and Guidance, § 5.2 [GGRP PDF p. 407].)[6] The errata also confirms that the City considered offsets and excluded them without explaining why they are infeasible, although the CEQA Guidelines expressly recognize them as mitigation. (CEQA Guidelines § 15126.4(c)(3); see Exhibit B, GHG discussion.) The errata corrected the DEIR, but the CEQA findings are a separate document, and the draft findings now before the Council were not corrected. The staff report states that the

[6] City of Burbank, Greenhouse Gas Reduction Plan Update (adopted May 3, 2022), with appendices, https://www.burbankca.gov/documents/173607/0/GGRP+Update+Final_w.App.pdf/5c876fb6-fed4-49e5-d7b6-dbcf058491a1. Page citations to "GGRP PDF" refer to the page of that PDF file.

findings "were also updated to reflect these clarifications" (City Council Staff Report, p. 6), but they were not. They still state that "Mitigation Measure GHG-1 would require the incorporation of Tier 2 requirements of the 2022 CALGreen Code," and still describe GHG-1 as including "purchasing carbon offsets." (City Council Staff Report, Att. 1, pp. 38, 41.) The findings therefore contradict the EIR the Council is asked to certify, and they must be corrected before the Council can adopt them.

B. The GGRP Threshold Already Counts Visitor Trips

At the Planning Commission's October 12, 2026 hearing, Staff confirmed that the GGRP defines service population as residents and employees, and explained that the City added hotel guests as a matter of "city policy" because guests generate emissions that are counted in the Project's numerator. (PC Hearing.) The Applicant's counsel made the same "balanced equation" argument. (*Ibid.*; see FEIR, p. 2-57.) The GGRP itself shows why that reasoning fails.

The 3.12 MTCO2e threshold is 767,692 MTCO2e divided by 245,961 people, consisting of 109,686 residents and 136,275 employees. (GGRP, Tables 6-7 [GGRP PDF pp. 407-408].) The transportation emissions in that numerator come from a citywide vehicle miles traveled inventory that counts every trip produced by or attracted to Burbank in the regional travel model, allocating 50 percent of each trip with one end in the City. (GGRP, Iteris VMT Memorandum, Sept. 3, 2020 [GGRP PDF pp. 173-175].) Trips by visitors, including hotel guests and airport travelers, are therefore already in the threshold's numerator, and they are not in its denominator. Adding 588 guests to the Project's denominator compares the Project to the threshold on different terms than the threshold was built on. (*Center for Biological Diversity v. Department of Fish & Wildlife* (2015) 62 Cal.4th 204, 225-227.)

The GGRP also specifies how a hotel is measured. It classifies hotels as non-residential uses and explains that non-residential thresholds were derived by dividing emissions by employees. (GGRP PDF pp. 407, 410.) On those terms, the Project's efficiency ratio is about 55 MTCO2e per employee (4,671.49 divided by 85), roughly 17 times the threshold, not 6.94 per service person.

C. The Service Population Assumes a Hotel That Is Full Every Night

The Applicant's counsel described the EIR's guest estimate as "very conservative." (PC Hearing.) It is not. The 588 guests equal 1.4 guests per room in all 420 rooms every night of the year. For an efficiency ratio, a larger denominator produces a smaller result, so assuming 100 percent occupancy makes the Project look better, not worse. The record shows actual occupancy well below that level: the Applicant's representative testified that the existing Marriott runs at approximately 81 percent, and Staff reported citywide hotel occupancy of 74.3 percent. (*Ibid.*) Even on the EIR's own method, using 81 percent occupancy would raise the Project's ratio from 6.94 to approximately 8.3 MTCO2e per service person.

D. The Guest-Based Ratio Still Drives the Rejection of the Environmentally Superior Alternative

The Reduced Intensity Alternative would cut emissions by 1,172.77 MTCO2e per year, yet the DEIR rates its GHG impact as greater than the Project's because its per-person ratio is 0.07 higher. (DEIR, p. 7-12.) That result exists only because guests are counted in the denominator. An alternative that removes more than 1,100 tons of emissions a year is not the worse alternative for greenhouse gases.

V. THE FINDINGS AND STATEMENT OF OVERRIDING CONSIDERATIONS ARE NOT SUPPORTED

The proposed findings identify the Reduced Intensity Alternative as environmentally superior and as meeting all Project objectives, but reject it without finding it infeasible. (City Council Staff Report, Att. 1, pp. 77-78.) Nothing in the record shows that a 315-room hotel is impractical. At the hearing, the Applicant's representative stated that lenders would not finance a hotel with a residential component and that a preliminary analysis had been done. (PC Hearing.) No such analysis is in the record, and unsupported statements are not substantial evidence of infeasibility. (CEQA Guidelines § 15384(a); *Preservation Action Council v. City of San Jose* (2006) 141 Cal.App.4th 1336, 1352, 1356-1357.) One Commissioner noted that he would have liked to see an alternative "demonstrating that it's infeasible." (PC Hearing.)

The Statement of Overriding Considerations relies on transient occupancy tax and other fiscal benefits. The Council staff report now estimates $2 million to $2.5 million in transient occupancy tax annually (City Council Staff Report, p. 7), and the Applicant's representative cited $2.6 million in the first year and $123 million over 30 years (PC Hearing). But no fiscal analysis supporting any of these figures is in the record, and none accounts for the 217 extended-stay Residence Inn rooms, whose longer stays may not be subject to the tax.[7] A Statement of Overriding Considerations must be supported by substantial evidence in the record. (Pub. Resources Code § 21081(b); CEQA Guidelines § 15093(b).) Local 11 incorporates by reference Sections III and IV of its October 12 letter, which explain why the findings, the Statement of Overriding Considerations, and the Planned Development and Development Agreement findings are not supported.

[7] Burbank Municipal Code § 2-4-602 provides that "transient" does not include a natural person who, by advance monthly payment, occupies a hotel accommodation for a calendar month or 30 consecutive calendar days, or who, having occupied it for that period and paid the tax, continues to occupy it. (See https://www.burbankca.gov/documents/107269/1482865/20201210.TOTArticle6Ordinance.pdf/5a3ca7da-83ac-418a-8723-32fd1524ec22.) Staff described the 217 Residence Inn rooms as serving extended-stay guests (PC Hearing), and the record contains no analysis of how much of their occupancy would fall outside the tax.

VI. THE EIR MUST BE REVISED AND RECIRCULATED

An EIR must be recirculated when significant new information is added after public review, including a new significant environmental impact, a substantial increase in the severity of an impact, or a feasible mitigation measure or alternative that would clearly lessen significant impacts but that the project proponent declines to adopt. (CEQA Guidelines § 15088.5(a)(1)-(3); *Laurel Heights Improvement Assn. v. Regents of University of California* (1993) 6 Cal.4th 1112, 1129-1130.) The record now contains substantial evidence of each:

- New significant impacts: construction NO2 concentrations exceeding the federal ambient standard, and nighttime operational noise exceeding the City's limit (Exhibit A, §§ 5-6; Exhibit B);
- A substantial increase in severity: construction noise of approximately 85 dBA at homes 60 feet from the electrical work, which the EIR never analyzed (Exhibit A, § 4(a)); and
- Feasible mitigation that would clearly lessen significant impacts: the noise and air quality measures described above, and quantified, enforceable GHG measures.

Certifying the FEIR in its current form would not comply with CEQA.

VII. CONCLUSION

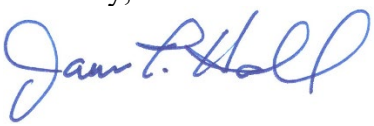
For these reasons, Local 11 respectfully requests that the Council decline to certify the FEIR and decline to approve the Planned Development, Development Agreement, and Development Review at this time, and instead direct Staff to:

1. Analyze construction noise at the homes nearest the offsite electrical and sewer work, correct the noise baseline, and analyze nighttime HVAC and outdoor gathering noise;
2. Analyze localized pollutant concentrations and construction health risk, and recirculate the version of Appendix C on which the DEIR relies;
3. Evaluate and adopt the noise and air quality measures described above, or explain with substantial evidence why each is infeasible;
4. Revise GHG-1 to include quantified, enforceable measures with a performance standard that brings the Project to the GGRP threshold, including measures directed at guest trips and carbon offsets, and recalculate the Project's efficiency on the GGRP's own terms;
5. Fully analyze a hotel and residential mixed-use alternative and either adopt the Reduced Intensity Alternative or support a finding of infeasibility with evidence; and
6. Recirculate the revised EIR for public review.

Local 11 adopts and incorporates by reference all Project comments and objections raised by all others during the environmental review and land use entitlement processes for the Project. Pursuant to Public Resources Code section 21167.6(e) and *Consolidated Irrig. Dist. v. Superior Court* (2012) 205 Cal.App.4th 697, please include all of the hyperlinked references cited in each of the comment letters submitted during the administrative process in the administrative record. Local 11 reserves the right to supplement these comments at future hearings on the Project. Please add my firm to the official notice list for the Project, including notice of any Notice of Determination. (Pub. Resources Code §§ 21092.2, 21167(f); Gov. Code § 65092.)

Thank you for your consideration of this matter. I may be contacted at jamie.hall@channellawgroup.com if you have any questions, comments or concerns.

Sincerely,



Jamie T. Hall

Subject: **2500 N. Hollywood Way – Dual Brand Hotel**
Review of Noise Impact Analysis in the Draft & Final EIR

Dear Jamie:

We have reviewed the noise impact analysis presented in Section 5.9 and Appendix H of the Public Review Draft Environmental Impact Report for the Dual Brand Hotel project (the Project) proposed for the site at 2500 N. Hollywood Way in Burbank, as well as the Final Environmental Impact Report (Revised November 2026), including the responses to comments and Section 3.0, Errata to the Draft EIR and have the following comments:

1. BACKGROUND

   The Project is a new, 262,338 ft^2, seven-story hotel and a separate four-story parking garage providing 766 parking spaces with an additional 285 parking spaces at grade. The Project would be constructed on the same parcel as an existing Marriott Hotel, which would remain in operation during construction of the project and upon project completion.

   Offsite construction would include various improvements along Thornton Avenue, to the north of the Project site and extending approximately 300-feet east to the intersection of Thornton Avenue and Ontario Street – where an electrical service connection would be made to existing BWP facilities. Additional offsite construction would come in the form of 1,580-foot-long sewer main infrastructure improvements along Wyoming Avenue to the south of the Project site.

   The noise impact analysis in the DEIR was prepared on behalf of the Applicant by Michael Baker International (MBI). This work is presented in Section 5.9 of the DEIR, which establishes thresholds of significance, presents an evaluation of temporary noise impacts from the construction phase, and addresses potential permanent (operational) noise impacts once the Project is complete. Further detail (ambient noise measurements and construction noise impact calculations) are provided in Appendix H of the DEIR. The Final EIR does not revise he noise analysis, except for minor errata changes to Mitigation Measure NOI-1 and to the discussion of offsite construction noise, which are addressed below.

2. BASELINE CONDITIONS

   The analysis in Section 5.9 of the DEIR relies on daytime ambient noise level measurements made at two locations near the project site: at 2298 N. Ontario Street; on the edge of Robert E. Lundigan Park, at the northwestern corner of Thornton Avenue and Naomi Street. We find use of these two ambient noise level readings to establish baseline noise conditions for the project to be problematic, for the following reasons:

   a) <u>There is an Inconsistency in the Reported Ambient Noise Levels</u>

      Table 5.9-1 of the DEIR presents daytime ambient noise levels of 58.7 and 61.2 (dBA, Leq) at

Robert E. Lundigan Park and on Ontario Street, respectively. However, the more detailed reporting in Appendix H, has these values reversed – 61.2 dBA Leq at Robert E. Lundigan Park and 58.7 dBA Leq on Ontario Street.

b) No Noise Baseline Measured for Wyoming Avenue

MBI's ambient noise survey did not include any measurements on Wyoming Avenue. Instead, the analysis of noise impact from offsite sewer improvement work along Wyoming Avenue is based on noise levels measured on the edge of Robert E. Lundigan Park, at the northwestern corner of Thornton Avenue and Naomi Street.

MBI argues that the noise data from Robert E. Lundigan Park is applicable because Wyoming Avenue, Thornton Avenue and Naomi Street are all classified as "local streets" in the Mobility Element of the Burbank General Plan. In other words, the analysis in the DEIR assumes that noise levels on all local streets are the same. We disagree with this approach because of the dissimilarity of the streets in question (particularly Wyoming and Thornton Avenues) and the influence of noise from sources other than street traffic, such as aircraft movements.

We also believe that the use of baseline data measured at one location as a stand-in for the baseline at a second, distant location (Lundigan Park and Wyoming Avenue are more than a mile apart) falls short of the standard required by CEQA.

For a more realistic baseline, we measured ambient noise in front of 2911 Wyoming Avenue (the approximate mid-point of the proposed sewer alignment – as shown in Figure 1) between 2:42 and 2:52 PM on November 2, 2026. The measurement was made with a Bruel and Kjaer Type 2250 sound level meter. The calibration of the instrument was checked immediately prior to the reading using a Bruel and Kjaer Type 4231 acoustical calibrator.

The result was a 10-minute Leq of 57.1 dBA – i.e.: 1.6 dBA lower than the ambient noise level at Lundigan Park, as reported in the DEIR Table 5.9-1. Applying the DEIR's own approach (ambient plus 5 dBA), this measurement indicates a construction noise significance threshold of 62.1 dBA for the residences on Wyoming Avenue, which is lower than the 63.7 dBA threshold applied in the DEIR. This holds true regardless of which if the two conflicting DEIR ambient noise values for Lundigan Park is correct. This discrepancy shows that the DIER slightly understates the magnitude of the temporary noise impact of the Project on Wyoming Avenue during sewer improvement work. While our measurement is a single short-term sample, it was taken on the sewer alignment itself, whereas the DEIR's baseline for this alignment was measured at different location. The DEIR's approach is therefore less representative of conditions at the affected residences than our own measurement.

d) No Nighttime or CNEL Baseline Data is Provided

Table 5.9-4 in the DEIR includes noise limits for stationary sources taken from the Noise Element of the City of Burbank General Plan. These limits include maximum daytime (7AM – 10PM) and nighttime (10PM – 7AM) noise limits.

In addition, the discussion about significance thresholds for operational noise impacts on page 5.9-10 of the DEIR cites criteria established by the Federal Interagency Committee on Noise (FICON), which compare existing and future Community Noise Equivalent Level (CNEL) values to predict the annoyance caused by a new noise source (the Project in this case). Determination of CNEL requires measurement and/or prediction of noise levels over a 24-hour period and cannot be reliably calculated from daytime noise levels alone. However, the baseline data provided in the DEIR does not include 24-hour or nighttime noise levels.

Figure 1: Noise Measurement Location on Wyoming Avenue

3. SIGNIFICANCE CRITERIA & THRESHOLDS

a) Interpretation of BMC Noise Limits for Project HVAC Sources is Faulty

In its analysis of operational noise impacts, the DEIR cites the provisions in the City of Burbank Municipal Code, which read as follows:

§ 9-3-208. Machinery, Equipment, Fans and Air Conditioning.

A. Decibel Limit: No person shall operate any machinery, equipment, pump, fan, air conditioning apparatus, or similar mechanical device in such a manner as to cause the ambient noise level to be exceeded by more than five (5) decibels. In the case of leaf blowers, as defined by Section 9-3-214 of this article, the ambient noise level may not be exceeded by more than twenty (20) decibels.

B. Ambient Noise Base Level: For the purposes of this section only, all ambient noise measurements shall commence at the following ambient noise base levels in the zones and during the times shown:

Base Levels	***Time***	***Zone***
45 dBA	*Nighttime*	*Residential*
55 dBA	*Daytime*	*Residential*
65 dBA	*Anytime*	*Commercial*
70 dBA	*Anytime*	*All other zones*

Accordingly, and by way of illustration, the ambient noise level in commercial zones shall be deemed to be sixty five (65) dBA notwithstanding a lower reading; provided, however, that when the ambient noise base level for the property on which the machinery, equipment, pump, fan, air conditioning apparatus or similar mechanical device is located is higher than the ambient noise base level for adjacent property,

the ambient noise base level for the adjacent property shall apply. Properties separated by a street shall be deemed to be adjacent to one another.

As the Project is located in a commercial zone, and its immediate neighbors are also commercial properties, the DEIR argues that the BMC noise limit for operational HVAC noise should be 70 dBA (65 + 5 = 70). This in spite of the fact that the base noise levels for the nearby residential properties on Ontario Street are as much as 20 dBA lower than the commercial property base level.

We believe that the DEIR interpretation of BMC 9-3-208 is faulty because the word "adjacent" does not necessarily mean *immediately* adjacent (i.e.: sharing a common property line, or being located directly across the street). According to Merriam-Webster, "adjacent" means close or neighboring, and may or may not imply contact. The word "adjoining", on the other hand, definitely implies contact between two uses or properties, and is used elsewhere in the noise ordinance (BMC 9-3-213 B. and BMC 9-3-214 E.) to denote residential units or properties that share a common boundary.

Use of "adjacent" instead of "adjoining" in BMC 9-3-208 therefore appears to be deliberate, intended to include sensitive properties that are in the vicinity of, but not necessarily adjoining, the source property in the determination of appropriate noise limits. In other words, the correct HVAC noise limit for receivers on Ontario Street should be the baseline (measured or minimum value in the BMC) at those receivers plus 5 dBA, as follows:

Time of Day	Baseline	BMC Noise Limit
DAYTIME	58.7 or 61.2 dBA *Depending on which of the two ambient noise levels reported in the DEIR for Ontario Street is correct.*	63.7 or 66.2 dBA
NIGHTTIME	45 dBA	50 dBA

These HVAC noise limits are significantly more stringent than the blanket 70 dBA value quoted in the DEIR, which is applied day and night.

4. CONSTRUCTION NOISE IMPACTS & MITIGATION MEASURES

a) <u>Noise of Offsite Construction on Thornton Avenue Not Properly Addressed</u>

At the top of page 5.9-14, the DEIR notes that proposed offsite improvements along Thornton Avenue (specifically the electrical connections to existing BWP facilities) will occur approximately 60 feet from the nearest residential use on Ontario Street. However, no analysis is provided to show the noise impact of this scenario.

Instead, the paragraph at the top of page 5.9-14 of the DEIR refers to the impact of noise from onsite construction work (per Table 5.9-5) which relates to construction noise predictions for receivers at 360 or 640 feet from the construction equipment.

The Final EIR revises this paragraph through its errata (Final EIR, Revised November 2026, pp. 3-3 to 3-4), but only to remove an incomplete sentence. As revised, the paragraph still acknowledges that the nearest residences are approximately 60 feet from the electrical connection work, then states two sentences later that the offsite improvements are approximately 1,000 feet from sensitive receptors, and relies on Table 5.9-5 (onsite construction at 360 and 640 feet) as a "conservative" representation. Neither distance is

conservative for a receiver at 60 feet and the Final EIR still provides no analysis of that receiver.

We expect that the construction activity for the electrical connection along Thornton Avenue will be very similar to that for the sewer line improvements on Wyoming Avenue, because the work will include similar steps – saw-cutting, excavation and shoring, backfilling/compaction and pavement restoration – and equipment. And we can model the likely impact of the construction on Thornton Avenue by extrapolating the output of the DEIR noise model for the Wyoming Avenue offsite construction, as shown in Table 1.

Table 1: Offsite Construction Noise Level Predictions (dBA, Leq)		
DEIR Model of Wyoming Avenue Construction noise for receiver at a distance of 45-feet	Additional distance loss to 60-feet	Model of Thornton Avenue Construction noise for receiver at a distance of 60-feet
87.4	2.5	84.9

As Table 1 shows, our model of Thornton Avenue offsite construction noise levels received at the residential uses on Ontario Street exceeds the DEIR significance threshold (63.7 dBA) by more than 20 dBA.

b) Construction Noise Impact on Wyoming Avenue is Slightly Understated

Construction noise analysis in the DEIR is based on the Federal Highway Administration Roadway Construction Noise Model (FHWA RCNM), which is standard practice for CEQA studies and we take no exception to this approach. However, the construction noise impacts for Wyoming Avenue are slightly understated, because they are based on a baseline noise level measured in a different (and slightly noisier) location over a mile away

Correcting this anomaly would not affect the overarching finding of significant impact during onsite and offsite construction but it would better convey the scale of the noise impact of the sewer alignment work along Wyoming Avenue.

c) NOI-1 is a BMP List Rather than an Effective Noise Mitigation Measure

Mitigation measure NOI-1 in the DEIR is a list of best management practices (BMPs), summarized as follows:

- Equipping all construction equipment with mufflers.
- Signs posted with schedule dates and contact information registering complaints.
- Making available a “Noise Disturbance Coordinator”.
- Use of construction noise reduction methods to be used “where feasible”, including maximizing distances between noisy equipment and residential uses and use of temporary “acoustic barriers”.
- Haul routes designed to avoid noise sensitive uses “to the extent feasible”.
- Orientation of equipment to direct noise away from sensitive noise receivers.

While these common-sense BMPs are welcome, they are nothing more than we would expect to see implemented on any responsibly-run construction site with sensitive uses nearby. NOI-1 offers no reliable, measurable reduction in construction noise exposure at the nearby residences and the DEIR appears to acknowledge this by providing no quantitative analysis of attenuation attributable to this measure.

For example, the first item – the requirement for mufflers – is not an actual mitigation at all. This is because any piece of construction equipment powered by a combustion engine leaves the factory with a muffler installed. Therefore, the source noise levels for construction equipment in the FHWA RCNM (which are based on real-world measurements on active construction sites) already include the benefits of typical factory-furnished mufflers. The requirement for mufflers in NOI-1 does not provide any additional attenuation beyond what is already baked into the FHWA RCNM model.

Nonetheless, on page 5.9-14, the DEIR claims that mufflers "can reduce noise by up to 15 to 25 dBA", citing information published by Donaldson Filtration Solutions (a manufacturer of engine mufflers). While there are caveats in the language of this part of the DEIR, the implication is that the muffler requirement in NOI-1 will reduce construction noise below the levels predicted using the FHWA RCNM model and therefore reduce the severity of the impact. This is not true. According to Donaldson's literature, the attenuation performance claimed for their muffler products is the difference between the noise levels of "an engine without a muffler and the same engine with a muffler". In other words, replacing the factory muffler (FHWA RCNM scenario) with a Donaldson muffler does not result in any net reduction in noise level.

Another example: Temporary noise barriers, which are mentioned as a BMP item in NOI-1, can be an effective means of construction noise control – provided that the barriers are properly designed and installed. However, the reference to noise barriers in NOI-1 is so vague and unenforceable that no net reduction in construction noise can be expected from this item.

NOI-1 is unchanged in the Final EIR, apart from corrections to the names of the City divisions responsible for review (Final EIR, Revised November 2026, pp. 3-1 to 3-2).

d) <u>DEIR Overlooks Effective, Enforceable Mitigation Measures</u>

NOI-1 is the only construction noise mitigation measure put forward by the DEIR, even though it offers no real reduction in noise exposure at sensitive uses and the DEIR provides no alternative or additional measures that *would* provide meaningful mitigation. In this way, the DEIR does not adequately support the finding that construction noise impacts are "unavoidable".

This matters for two impacts, not one: the Final EIR errata (p. 3-1) corrects the Utilities and Service Systems impact (UTIL-1) to significant and unavoidable, and the Final EIR responses to comments (p. 2-35) explain that this impact is the construction noise from the onsite and offsite infrastructure work. The offsite construction noise discussed in this letter therefore drives both the noise and utilities impacts.

CEQA Guidelines Section 15126.4(a)(1) provides that an EIR "shall describe feasible measures which could minimize significant adverse impacts." The DEIR does not quantitatively show that NOI-1 would reduce construction noise at the affected residences. In our opinion, additional noise control measures are available that would substantially reduce construction noise at these residences, even where they would not reduce it below the significance threshold. The DEIR analysis for this Project should therefore be supplemented by a much more robust evaluation of mitigation options – complete with a quantitative analysis to show the noise reduction and net received noise level at sensitive receivers for each one.

We recommend that the following measures be evaluated and adopted. Each is commonly used on urban construction projects near residences. For ease of reference, we refer to them as Recommended Noise Mitigation Measures (RNMM-1 through RNMM-6).

RNMM-1 – Perimeter Construction Noise Barriers

This measure would consist of a continuous noise barrier along the east and south sides of the Project perimeter, which would remain in-place for the duration of construction. This type of measure is a common feature of urban construction sites and is often proposed as mitigation in CEQA environmental noise studies. A construction noise barrier typically comprises overlapping, acoustically-rated sound-blocking "blankets" attached to a chain link fence of sufficient height to block sightlines and achieve effective reduction in noise levels received at nearby sensitive uses.

For the phases of the Project that are projected to be the noisiest – demolition and grading – as well as the paving phase, a perimeter noise barrier has great potential because the noise sources are close to the ground. As the hotel building and parking structure rise, the perimeter barrier would still be beneficial in reducing noise from construction vehicles and staging, but would need to be supplemented by barriers supported off the new structures to mitigate noise from elevated sources.

We would expect a system of properly designed and deployed noise barriers to attenuate construction noise levels received on Ontario Street by between 8 and 10 dBA, which would be enough take noise levels predicted during construction of the Project down below the 63.7 dBA significance threshold, as illustrated in Table 2.

Table 2: Projected Effect of Noise Barriers on Onsite Construction Noise Impacts

Onsite Construction Phase	Predicted Construction Noise Level with NOI-1 Only (dBA, Leq) [1]	Attenuation of Noise Barriers in Place for Duration of Construction (dBA)	Net Noise Level Received at Residential Uses on Ontario Street	Net Noise Level Below 63.7 dBA Significance Threshold?
Demolition	69.3	8 – 10	59.3 – 61.3	YES
Grading	71.1	8 – 10	61.1 – 63.1	YES
Building Constr.	69.1	8 – 10	59.1 – 61.1	YES
Paving	64.1	8 – 10	54.1 – 56.1	YES
Arch. Coating	56.5	8 – 10	46.5 – 48.5	YES

1. Worst-case construction noise level predictions for receivers on Ontario Street, DEIR Table 5.9-5

RNMM-2 – Noise Barriers Along the Offsite Construction Alignments

Carefully-designed noise barriers deployed along the routes of the offsite construction on Thornton Avenue (electrical connection) and Wyoming Avenue (sewer improvement) could reduce noise exposures at the nearby residential uses considerably. In these cases, all noise sources are low to the ground (or even below ground level) and would be close to the noise barriers – which makes for very favorable barrier geometry and a good chance of achieving a 10 dBA reduction.

Because of the very short distances involved, a 10 dBA noise barrier would not be enough to

reduce offsite construction noise levels at the closest homes to below the significance threshold. However, a 10 dBA reduction would bring some much-needed relief to the most impacted homes and would reduce the number of homes experiencing significant noise impact at any given time.

RNMM-3 – Construction Noise Limit and Monitoring at the Nearest Residences

Establish an enforceable construction noise limit (dBA, Leq 1-hour) at the nearest residences to the onsite work and the offsite alignments, verified by noise monitoring during construction, with work modified or paused when the limit is exceeded. A numeric limit with monitoring gives NOI-1's general practices a measurable performance standard.

RNMM-4 – Limit on the Duration of Offsite Work at Each Residence

Limit the number of working days during which noisy sewer and electrical construction may occur in front of any one residence, supported by a disclosed construction schedule for each segment of the alignment.

We note that the DEIR does not disclose how long sewer or electrical construction would last at any given residence. The Final EIR acknowledges that the number of days receptors are exposed is relevant to the severity of the construction noise impact (Final EIR responses to comments, citing DEIR p. 7-13), yet provides no such information for the offsite work.

RNMM-5 – Quieter Equipment and Construction Methods

Require low-noise equipment models and quieter construction methods where available, such as electrically or hydraulically powered equipment in place of diesel or pneumatic equipment, and acoustic enclosures for stationary equipment such as generators and compressors.

RNMM-6 – Temporary Relocation

Offer temporary relocation to residents of homes exposed to construction noise above a specified level for more than a specified number of days. The availability of hotel rooms on the Project site makes this measure particularly practical.

5. OPERATIONAL NOISE IMPACT – HVAC SYSTEMS

HVAC noise from the completed Project is addressed on page 5.9-17 of the DEIR. The basis of the noise projections is an assumption that:

"mechanical equipment (i.e., HVAC) would generate noise that is 55 dBA at 50-feet from the source."

Additional distance losses are then applied to calculate the noise level at 380-feet, which is reported as approximately 33 dBA. As 33 dBA is below the (daytime) ambient noise level on Ontario Street, the discussion in the DEIR concludes that the impact of HVAC equipment on the roof of the future hotel is less than significant.

This analysis has various errors in it. A trivial one – likely a typo – is that the quoted distance of 380-feet between the hotel and the residential uses on Ontario Street is misstated. The actual distance is around 600-feet, which matches the 22 dBA distance loss between the hotel and Ontario Street implied by the DEIR.

Other errors and omissions are more problematic, because they serve to greatly underestimate the potential noise impact of the HVAC systems that will be required for the hotel portion of the project, as follows:

a) DEIR Analysis Assumes that the Entire Hotel will be Served by a Single, Small HVAC Unit

55 dBA at a distance of 50-feet is a reasonable assumption for the noise produced by a single, small (4-ton), household air-conditioning unit of the type typically be used to condition smaller single-family homes.

However, the Project is a large hotel with hundreds of guestrooms and thousands of square feet of additional common space – support, food and beverage service, offices, etc. – that will require either a commercial grade central air conditioning system or (more likely) a combination of central air conditioning and VRF fan-coil units. In either scenario, a rule-of-thumb estimate of the total cooling demand from the hotel would be around 600-tons, or 150 times the cooling capacity of the single small air-conditioning unit that has been assumed in the DEIR calculations.

Toilets, bathrooms and kitchens will require additional exhaust air, provided by a number of fans on the roof.

While the Project description in the DEIR provides very little detail about the anticipated HVAC systems, the conceptual rooftop plan shows four large packaged AC units on the roof, together with what appear to be makeup air handling units and exhaust fans. Of course, this roof layout is illustrative, but it does reinforce the point that a hotel project of this size will require many pieces of HVAC equipment – some very large – as opposed to a single, small AC unit.

An estimate (likely conservative) of the total noise impact of the HVAC systems for the project, based on the assumption that total sound power would scale with cooling capacity/demand, would be 33 + 22 = 55 dBA on Ontario Street, where 33 dBA is the prediction in the DEIR and 22 dBA comes from $10*\log_{10}(150)$, where 150 is the ratio of the estimated cooling demand of the hotel to the cooling demand of a small single-family home.

b) Nighttime HVAC Operation is Not Considered

Large, busy hotels operate 24/7 and, while cooling demand in the middle of the night will naturally be much lower than during the hottest part of the day, there will be times when there is significant load after 10 PM or before 7 AM – i.e.: during nighttime hours, when ambient noise levels on Ontario Street will be lower than those reported in the DEIR for the daytime and the City's nighttime noise limit (of 50 dBA) would apply. Nighttime HVAC operation is not studied in the DEIR and no nighttime ambient noise measurements have been made on Ontario Street. However, a 55 dBA estimate of HVAC noise received at the residences on Ontario Street (see previous paragraph) exceeds the BMC nighttime noise limit.

6. OPERATIONAL NOISE IMPACT – OUTDOOR GATHERINGS

The hotel portion of the Project has three outdoor areas on the ground floor where crowds might gather: an event terrace at the southeast corner, a covered patio off the restaurant at the northeast corner and an event space patio at the southwest corner. The potential noise impact of these outdoor gathering areas is addressed on page 5.9-19 of the DEIR, but this analysis is flawed and underestimates the potential noise impact, as follows:

a) DEIR Analysis Incorrectly Assumes Only One Person Talking

The DEIR analysis is based on an assumed crowd noise level of 62 dBA at a distance of one meter (3.28 feet), citing a 2006 research paper by M. J. Hayne et al. However, according to the methodology in the 2006 Hayne paper, 62 dBA at a distance of one meter would be the sound level for a single talker – in other words, a crowd of one. It follows that the DEIR prediction of 21 dBA for the crowd noise level received at the homes on Ontario Street greatly

underestimates the true likely noise level produced by an outdoor gathering at the hotel.

A more realistic analysis would assume that the outdoor gathering spaces will accommodate dozens of people. In fact, the event terrace appears to be sized for a crowd of over 100 people, in which case we would expect a noise level at a distance of 600-feet (the distance between the event terrace and the residential uses on Ontario Street) to be approximately 50 dBA, based on the sound power level data provided in a follow-up paper by M. J. Hayne et al ("Prediction of Noise from Small to Medium Sized Crowds", 2011).

b) Nighttime Use of the Outdoor Gathering Spaces is Not Considered

We are not aware of any provision in the DEIR that would limit the hours of operation of the outdoor gathering spaces. It is therefore quite possible that guests, patrons or event attendees will make use of the outdoor gathering areas into the evening (when ambient noise levels on Ontario Street will be lower than the daytime baseline that is established in the DEIR) or even into the night (after 10PM).

So, while an outdoor gathering noise level of 50 dBA on Ontario Street may not exceed the existing daytime ambient noise level by 3 dBA, it could exceed the threshold in the context of much lower ambient noise levels late in the evening or into the night. For reference, the BMC ambient base noise level for residential streets between the hours of 10PM and 7AM is 45 dBA. Limiting use of the outdoor gathering areas to hours before 10 PM, and prohibiting amplified sound in those areas, would be feasible measures to address this potential impact.

7. CONCLUSION

In summary, based on our review of the Draft and Final EIR, it is our opinion that:

- The DEIR understates construction noise impacts on the residences along Wyoming Avenue. Neither the Draft nor the Final EIR analyzes the residences approximately 60 feet from the offsite electrical work, where we estimate construction noise of approximately 85 dBA, more than 20 dBA above the DEIR's significance threshold.
- Mitigation Measure NOI-1 would not measurably reduce construction noise at the nearby residences.
- Nighttime HVAC noise and noise from the outdoor gathering areas could exceed the applicable nighttime limits at the Ontario Street residences. These would be potentially significant impacts that the DEIR does not identify.
- Feasible measures (RNMM-1 through RNMM-6) are available that would substantially reduce construction noise at the affected residences.

The noise analysis should be revised to address these issues, and the recommended measures should be evaluated, with the noise reduction each would achieve, before the City acts on the Final EIR.

Yours sincerely,

Curriculum Vitae

Experience

Steve Rogers Acoustics, LLC
Los Angeles, California 2005 – Present
Principal

SRA was formed to offer attorneys, developers, environmental consultants and planners a source of high-quality acoustical consulting and expert services. Current and recent projects include:

- Acoustical Expert Services for various noise nuisance cases throughout California, including in: Carlsbad, Cathedral City, Encinitas, Hermosa Beach, La Jolla, Laguna Niguel, Los Angeles, Pasadena, Oakland, San Diego, Temecula and Westlake Village.
- CEQA Appeal noise evaluations for various proposed developments in California, including: Heliotrope/Berendo Apartments (Los Angeles), Oakdale Estates (Tarzana), Riverside Alive (Riverside), Starbucks (West Hills), Harvard-Westlake and 1000 Seward Street (Los Angeles), Cabrillo Town Center (Santa Ana) and Victoria Boulevard Apartments (Dana Point).
- Environmental Impact Reports for the Hermosa Beach Oil Project, Baldwin Hills Oilfield CSD, Port of Long Beach Middle Harbor Redevelopment and Indiana Street Redevelopment (San Francisco).

Veneklasen Associates, Inc.
Santa Monica, California 1995 – 2005
Associate Principal

Over the course of a decade with the acoustics group at VA, Steve served as project manager and main point of client contact for the firm's largest and highest-profile projects, including the Getty Center in Los Angeles, the Aquarium of the Pacific in Long Beach, Lloyd D. George Federal Courthouse in Las Vegas and numerous landmark office headquarters buildings.

Hann Tucker Associates
Woking, Surrey, UK 1988 – 1995
Senior Consultant

During his seven years with HTA (at the time, Europe's largest independent acoustical consulting firm) Steve gained broad experience in all aspects of acoustical consulting and exposure to a wide range of project types.

Subject: Review of Draft and Final Environmental Impact Reports
2500 N. Hollywood Way – Dual Brand Hotel Project, Burbank, CA

INTRODUCTION AND SUMMARY

I have completed my review of the Draft Environmental Impact Report (DEIR)[1] and Final Environmental Impact Report (FEIR)[2] for the 2500 N. Hollywood Way – Dual Brand Hotel Project to be located in Burbank, CA. My review focused on impacts to air quality, public health, and greenhouse gas (GHG) emissions.

The DEIR identified and quantified various criteria air pollutants and their impacts to public health. The analysis compared daily emission rates with thresholds of significance set forth by South Coast Air Quality Management District (SCAQMD)[3] . Based on this comparison, the DEIR concluded that since project emissions were below the thresholds of significance, impacts to air quality and public health were less than significant.

[1] 2500 N. Hollywood Way – Dual Brand Hotel Project. "Public Review Draft Environmental Impact Report" December 16, 2024. Available at: https://ceqanet.lci.ca.gov/2019110032/4

[2] Final Environmental Impact Report October 2026, as revised November 2026. Available at: https://www.burbankca.gov/web/community-development/2500nhw

[3] SCAQMD (2023): "South Coast AQMD Air Quality Significance Thresholds", Available at: https://www.aqmd.gov/docs/default-source/ceqa/handbook/south-coast-aqmd-air-quality-significance-thresholds.pdf?sfvrsn=25

The logic of inferring air quality impacts based solely on daily emission rates is flawed because impacts to air quality and public health depend on exposure to the concentration of a pollutant.

Pollutant concentration (e.g., in parts per million or micrograms per cubic meter) is related not only to emission rate but also to other factors, such as proximity to receptors, source geometry, local weather conditions, etc. Neither the DEIR nor the FEIR translated the emission rates (e.g., in pounds per hour or pounds per day) of a pollutant into its site-specific concentration. Instead, the documents rely on generic lookup tables based on Localized Significance Thresholds (LST)[4].

The DEIR incorrectly asserts that the project would not cause any violation of air quality standards. Analysis that appears later in this Memorandum demonstrates that NOx emissions during the construction phase, including the sewer main improvements, would violate the 1-hour federal NO2 standard by a wide margin. NOx emissions were converted to NO2 as described below.

The FEIR, including the November 2026 revision, provided no additional air quality impact analysis or analysis of impacts to public health.

The November 2026 revised FEIR errata (FEIR Section 3.0) likewise makes no changes to the air quality analysis. Its only revisions relevant to this Memorandum concern greenhouse gas emissions: the errata removes the DEIR's references to CALGreen Tier 2 requirements and to the purchase of carbon offsets, because neither is part of Mitigation Measure GHG-1 or was included in the GHG emission calculations (FEIR p. 3-3).

DETAILED COMMENTS

Air Quality Impact Analysis is Incomplete

The DEIR correctly identified the thresholds of significance listed in the checklist in Appendix G of the CEQA Guidelines. These specifically reference:

- Would the project expose sensitive receptors to substantial pollutant concentrations?

- Would the project conflict with or obstruct implementation of the applicable air quality plan?

- Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

[4] SCAQMD (2005): Localized Significance Thresholds. Feb 2005. Available at: https://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook/localized-significance-thresholds

The DEIR concluded that impacts are less than significant for all of the above criteria because daily emissions of various criteria air pollutants are below the SCAQMD thresholds of significance. A copy of the SCAQMD thresholds is attached (Attachment 1).

No analysis of the actual site-specific pollutant concentrations is provided. Instead, the DEIR relies on the above criteria and on LSTs, which by their nature are generic. A site-specific analysis should have been completed to quantify expected impacts. This includes translating emissions (in terms of lbs/day) into pollutant concentrations (in terms of either parts per million or micrograms per cubic meter). These concentrations should be compared to the ambient air quality standards.

The DEIR's LST analysis (DEIR pp. 5.1-26 to 5.1-27, Table 5.1-6) uses the SCAQMD screening values for receptors 100 meters away, based on residences approximately 360 feet from the site boundary. However, Table 5.1-6 itself includes the sewer main improvements, which would occur as close as approximately 45 feet from homes on Wyoming Avenue, and the offsite electrical work would occur approximately 60 feet from homes on Ontario Street. In addition, the SCAQMD thresholds (Attachment 1) identify only the state 1-hour NO2 standard (0.18 ppm, or 339 µg/m³) as the applicable 1-hour NO2 threshold, so the LST screening does not address the more stringent federal 1-hour standard of 100 ppb (188 µg/m³). The federal standard is a health-based national ambient air quality standard that applies in the South Coast Air Basin (Attachment 2), and the question under Impact AQ-3 is whether the Project would expose sensitive receptors to substantial pollutant concentrations. The DEIR offers no reason for not evaluating the Project's construction emissions against the federal standard.

In its December 3, 2019 comments on the Notice of Preparation (DEIR Appendix B), SCAQMD recommended that the City perform a localized analysis using either the LSTs or dispersion modeling, and asked the City to provide all air quality modeling files.

Violation of 1-Hour Federal Ambient Air Quality Standard for NO2 (AQ-3)

The DEIR asserts that no ambient air quality standard would be violated as the daily emissions were below the SCAQMD thresholds. A copy of the ambient air quality standards is attached (Attachment 2).

I reviewed the daily emissions of NOx during the construction phase and used an air dispersion model (AERMOD)[5] to translate these emissions into 1-hour NO2 concentrations. This analysis is based on the maximum daily on-site NOx emissions that appear in Appendix C CalEEMod Reports dated 9/23/2024 for the following sources:

- Grading and building construction (27.2 + 9.85 = 37.05 lbs/day or 4.63 lbs/hr over an 8-hour day)

[5] EPA (2026): AERMOD is the preferred model recommended by the EPA for conducting air dispersion analyses. Additional information available at: https://www.epa.gov/scram/air-quality-dispersion-modeling-preferred-and-recommended-models

- Sewer main improvements (19.2 lbs/day or 2.4 lbs/hr over an 8-hour day)

The DEIR states that its air quality analysis is based on a CalEEMod report dated March 7, 2024 (DEIR p. 5.1-1). That report appears only in the version of Appendix C posted on the State's CEQAnet database. The construction emissions reported in the DEIR match the September 23, 2024 CalEEMod runs in the version of Appendix C posted on the City's website, which I used for this analysis. The model was run using five years of meteorological data. Electronic copies of the modeling files are available upon request.

To account for the conversion from nitric oxide (NO) to nitrogen dioxide (NO2), a conversion factor of 0.9 was used. This corresponds to the maximum ratio under the U.S. EPA Tier 2 Ambient Ratio Method (ARM2)[6]. My analysis shows that the 1-hour NO2 concentration from the construction phase would violate the federal 1-hour standard of 188 micrograms per cubic meter ($\mu g/m^3$). See Figure 1. The 1-hour standard applies at all off-site locations beyond the property line of the project site.

The form of the federal 1-hour NO2 standard (the three-year average of the 98th percentile of daily maximum 1-hour concentrations) is used to determine whether a region attains the standard. For an individual project, U.S. EPA guidance is to compare the project's modeled impact to the significant impact level of 4 ppb (7.5 $\mu g/m^3$). If the project's impact exceeds that level, a cumulative analysis is performed by adding the background concentration, and a violation is predicted if the total exceeds 100 ppb (188 $\mu g/m^3$). Here, the Project's construction impacts alone exceed 100 ppb before any background concentration is added. Adding background concentrations would only increase the predicted totals.

The DEIR went to great lengths to identify the harm to the public from exposure to high concentrations of NOx (Section 5.1.1) but failed to translate the daily NOx emissions into concentrations. This is a critical oversight as NOx is not only harmful to individuals living or working near the project site, but is also a key precursor to smog (ozone).

Southern California has some of the worst air quality in the country. NOx emissions, especially violations of the NO2 standard, set back the region's effort to comply with the ozone standard. The region is classified as extreme non-attainment for the 8-hour ozone standard.

NOx Emissions Would Conflict with Implementation of Applicable Air Quality Plan (AQ-1)

Contrary to the conclusion in the DEIR, the proposed project will create new violations of the 1-hour NO2 ambient standard and therefore would conflict with the implementation of the applicable air quality plan. The applicable plan is the 2022 Air Quality Management Plan (AQMP)[7].

[6] U.S. EPA, Guideline on Air Quality Models, 40 C.F.R. Part 51, Appendix W, § 4.2.3.4 (Tier 2 Ambient Ratio Method).

[7] SCAQMD (2022): 2022 Air Quality Management Plan. December 2, 2022. Available at: https://www.aqmd.gov/home/air-quality/air-quality-management-plans/air-quality-mgt-plan

The Two Versions of DEIR Appendix C Do Not Match

The version of DEIR Appendix C posted on the City's website (172 pages, titled "Air Quality, Energy, and Greenhouse Gas Emissions Data") contains two CalEEMod runs dated September 23, 2024, with and without project design features, followed by energy calculations. The version posted on the State Clearinghouse's CEQAnet database is a different document. It is 344 pages, is titled "Air Quality/Health Risk Assessment, Energy, and Greenhouse Gas Emissions Data," and contains a single earlier CalEEMod run dated March 7, 2024, energy calculations with different inputs (for example, 3,357 rather than 2,988 megawatt-hours per year of hotel electricity use, and 4,099 rather than 4,315 daily vehicle trips), and 2021 AERMOD dispersion modeling and HARP health risk calculations for airport aircraft emissions at a worker receptor. Neither version contains the other's model runs. The CEQAnet version also models an operational year of 2027, while the City's version models 2030.

The DEIR states that its air quality section is based on the March 7, 2024 report (DEIR p. 5.1-1), which appears only in the CEQAnet version, while the construction emissions the DEIR reports, including 45.0 pounds per day of NOx in 2026 (DEIR Table 5.1-3), match the September 23, 2024 runs in the City's version. Reviewers who relied on either version could not reconcile the DEIR's air quality analysis with its technical appendix.

Public Health Risks from Exposure to Toxic Air Contaminants (TACs) not Quantified or Disclosed

The presence of TACs is acknowledged in Section 5.1.1 of the DEIR, however, there is no analysis of the cancer and non-cancer health risks to nearby residences or workers. The SCAQMD thresholds of significance specifically establish thresholds of significance for cancer and non-cancer health risks. The DEIR failed to disclose how project related health risks compare to the SCAQMD thresholds.

The DEIR also does not consider the existing health burden of the community around the Project site. According to the DEIR's own CalEEMod output (DEIR Appendix C, Health and Equity Details), the Project's census tract has a CalEnviroScreen 4.0 score of 92 out of 100, is a designated disadvantaged community under Senate Bill 535 and a low-income community under Assembly Bill 1550, and ranks at the 89th percentile statewide for exposure to diesel particulate matter. Residents of this community are therefore particularly vulnerable to the added construction emissions described in this Memorandum.

Construction would involve diesel equipment operating over the more than 400 working days of building construction modeled in the DEIR (DEIR Appendix C), including the sewer main improvements as close as approximately 45 feet from homes on Wyoming Avenue. Yet the DEIR's analysis of sensitive receptor exposure (Impact AQ-3, DEIR pp. 5.1-25 to 5.1-29) addresses only the LST screening and carbon monoxide hotspots, and does not include or refer to any health risk assessment of construction diesel emissions. SCAQMD's December 3, 2019 comments on the Notice of Preparation recommended a health risk assessment of the Project's mobile sources and

an analysis of toxic air contaminant impacts from construction equipment, and its March 20, 2024 comments on the recirculated Notice of Preparation repeated the request for the health risk assessment files (DEIR Appendix B).

Feasible Mitigation Measures to Reduce Construction NOx and Diesel Emissions Were Not Considered

The DEIR's construction emissions modeling assumes that all construction equipment would have "Average" engine tiers, and the mitigated and unmitigated construction NOx emissions are identical (DEIR Appendix C, §§ 5.2.1, 5.2.2, and 2.1). In other words, no measure to reduce construction NOx or diesel particulate emissions was assumed or required. In my opinion, the following measures are feasible, are commonly used for construction projects in the South Coast Air Basin, and would substantially reduce construction NOx and diesel particulate emissions at the nearby residences. For ease of reference, I refer to them as Recommended Air Quality Mitigation Measures (RAQMM-1 through RAQMM-4).

- **RAQMM-1 – Tier 4 Final Equipment:** Require all off-road diesel construction equipment of 50 horsepower or more to meet U.S. EPA Tier 4 Final emission standards.
- **RAQMM-2 – Zero-Emission and Alternative-Fuel Equipment:** Require electric or other zero-emission equipment where commercially available (for example, forklifts, welders, generator sets, air compressors and concrete saws), and renewable diesel fuel for the remaining diesel equipment.
- **RAQMM-3 – Phasing and Equipment Location:** Schedule construction to avoid overlap of the most intensive phases, such as grading and building construction, and locate staging areas and stationary equipment as far as practicable from residences, including during the sewer main improvements along Wyoming Avenue.
- **RAQMM-4 – Idling and Truck Controls:** Limit idling of on-road and off-road equipment to two minutes, and require haul and vendor trucks to meet 2010 or newer engine model year emission standards.

Each of these measures should be evaluated quantitatively, including whether, with these measures in place, the Project's 1-hour NO2 concentrations at nearby residences would fall below the applicable ambient air quality standard.

Greenhouse Gas Analysis Relies on Unquantified Mitigation

The DEIR concludes that the Project would exceed the City's Greenhouse Gas Reduction Plan (GGRP) efficiency threshold of 3.12 metric tons of carbon dioxide equivalent (MTCO2e) per service population, even with project design features, and requires Mitigation Measure GHG-1. The November 2026 FEIR errata removes the DEIR's statements that GHG-1 requires CALGreen Tier 2 measures and the purchase of carbon offsets, because neither is part of GHG-1 or was included in the GHG emission calculations (FEIR p. 3-3). The revised text acknowledges that GHG-1's remaining features are not quantifiable in CalEEMod (ibid.). As a result, the DEIR credits GHG-1 with no quantified reduction.

The only quantified reductions come from project design features, which lower the Project's annual emissions by about 80 MTCO2e, from 4,751.66 to 4,671.49 MTCO2e. Mobile sources account for 4,044 MTCO2e per year and are not reduced by any quantified measure (DEIR Appendix C). The GGRP itself provides that when a project exceeds the threshold, mitigation measures must be identified and the corresponding GHG reductions calculated to bring the project to or below the threshold (GGRP, CEQA GHG Emissions Thresholds and Guidance, § 5.2, PDF p. 407). The DEIR does not do so.

Service Population Calculation Is Inconsistent with the GGRP

The GGRP threshold of 3.12 MTCO2e is 767,692 MTCO2e divided by a service population of 245,961, consisting of 109,686 residents and 136,275 employees (GGRP Tables 6 and 7, PDF pp. 407 to 408). The transportation emissions in that total come from a citywide vehicle miles traveled inventory that counts trips produced by or attracted to Burbank, allocating 50 percent of each trip with one end in the City (GGRP, Iteris VMT Memorandum, September 3, 2020, PDF pp. 173 to 175). Trips by visitors, including hotel guests and airport travelers, are therefore already included in the threshold's emissions but not in its service population. Adding 588 hotel guests to the Project's service population compares the Project to the threshold on a different basis than the threshold was developed on.

The GGRP classifies hotels as non-residential uses and explains that non-residential thresholds were derived by dividing emissions by employees (GGRP PDF pp. 407, 410). On that basis, the Project's emissions are approximately 55 MTCO2e per employee (4,671.49 divided by 85 employees), roughly 17 times the 3.12 threshold. In addition, the 588 guests represent 1.4 guests in every one of the 420 rooms every night of the year. Hotels do not operate at full occupancy year-round; at 80 percent occupancy, the DEIR's own method would yield approximately 8.4 MTCO2e per service population rather than 6.94.

The same approach affects the comparison of alternatives. The Reduced Intensity Alternative would reduce emissions by 1,172.77 MTCO2e per year, yet the DEIR rates its GHG impact as greater than the Project's because its per-person ratio is 0.07 MTCO2e higher (DEIR p. 7-12). That result follows from counting guests in the service population; an alternative that removes more than 1,100 metric tons of emissions per year does not have greater GHG impacts.

Feasible measures are available to reduce the Project's mobile source emissions, which account for most of its GHG emissions, and each should be quantified and evaluated:

- **Guest Trip Reduction:** Guest-oriented transportation demand management, including transit and rail incentives tied to reservations and guest parking pricing.
- **Employee Commute Trip Reduction:** A mandatory employee commute trip reduction program with monitoring and remedies if targets are not met, including parking cash-out.
- **Shuttle Fleet Electrification:** Electrification of the shared hotel shuttle fleet, including the existing vehicles.
- **Carbon Offsets:** Verified carbon offsets for any remaining emissions above the GGRP threshold.

With quantified measures and a performance standard, GHG-1 could be designed to bring the Project to the GGRP threshold, as the GGRP requires.

CONCLUSIONS

The DEIR erroneously concludes that the Project's impact to air quality and public health would be less than significant based solely on comparing the daily emissions with SCAQMD thresholds of significance.

The SCAQMD thresholds are not the only thresholds that apply to the project. Other thresholds are the ambient air quality standards that are part of the federal Clean Air Act (CAA)[8]. The standards are designed to protect public health. If project emissions were translated into pollutant concentration, then it would have demonstrated that the project would violate the 1-hour NO2 standard by a wide margin.

The violation of the 1-hour standard also negates the DEIR assertion that the project would not obstruct the applicable air quality plan, since the project would create new violations of the federal 1-hour NO2 standard.

Overall, the conclusion that project impacts are less than significant is not supported by the facts.

In summary, it is my opinion that:

- The DEIR does not analyze the site-specific pollutant concentrations to which nearby residents would be exposed during construction;

- Construction NOx emissions would cause 1-hour NO2 concentrations exceeding the federal ambient air quality standard at off-site locations, a potentially significant impact that the DEIR does not identify;

- The DEIR does not quantify cancer and non-cancer health risks from construction diesel emissions in a community already burdened by high pollution levels; and feasible measures (RAQMM-1 through RAQMM-4) are available to reduce these emissions.

The air quality analysis should be revised to address these issues, and the recommended measures should be evaluated, before the City acts on the Final EIR. In addition, the DEIR credits Mitigation Measure GHG-1 with no quantified GHG reduction, and its service population calculation is inconsistent with the GGRP threshold it applies.

---

Ambient Air Quality Standards

Ambient Air Quality Standards

Pollutant	Averaging Time	California Standards [1]		National Standards [2]		
		Concentration [3]	Method [4]	Primary [3,5]	Secondary [3,6]	Method [7]
Ozone (O_3)[8]	1 Hour	0.09 ppm (180 µg/m^3)	Ultraviolet Photometry	—	Same as Primary Standard	Ultraviolet Photometry
	8 Hour	0.070 ppm (137 µg/m^3)		0.070 ppm (137 µg/m^3)		
Respirable Particulate Matter (PM10)[9]	24 Hour	50 µg/m^3	Gravimetric or Beta Attenuation	150 µg/m^3	Same as Primary Standard	Inertial Separation and Gravimetric Analysis
	Annual Arithmetic Mean	20 µg/m^3		—		
Fine Particulate Matter (PM2.5)[9]	24 Hour	—	—	35 µg/m^3	Same as Primary Standard	Inertial Separation and Gravimetric Analysis
	Annual Arithmetic Mean	12 µg/m^3	Gravimetric or Beta Attenuation	12.0 µg/m^3	15 µg/m^3	
Carbon Monoxide (CO)	1 Hour	20 ppm (23 mg/m^3)	Non-Dispersive Infrared Photometry (NDIR)	35 ppm (40 mg/m^3)	—	Non-Dispersive Infrared Photometry (NDIR)
	8 Hour	9.0 ppm (10 mg/m^3)		9 ppm (10 mg/m^3)	—	
	8 Hour (Lake Tahoe)	6 ppm (7 mg/m^3)		—	—	
Nitrogen Dioxide (NO_2)[10]	1 Hour	0.18 ppm (339 µg/m^3)	Gas Phase Chemiluminescence	100 ppb (188 µg/m^3)	—	Gas Phase Chemiluminescence
	Annual Arithmetic Mean	0.030 ppm (57 µg/m^3)		0.053 ppm (100 µg/m^3)	Same as Primary Standard	
Sulfur Dioxide (SO_2)[11]	1 Hour	0.25 ppm (655 µg/m^3)	Ultraviolet Fluorescence	75 ppb (196 µg/m^3)	—	Ultraviolet Flourescence; Spectrophotometry (Pararosaniline Method)
	3 Hour	—		—	0.5 ppm (1300 µg/m^3)	
	24 Hour	0.04 ppm (105 µg/m^3)		0.14 ppm (for certain areas)[11]	—	
	Annual Arithmetic Mean	—		0.030 ppm (for certain areas)[11]	—	
Lead[12,13]	30 Day Average	1.5 µg/m^3	Atomic Absorption	—	—	High Volume Sampler and Atomic Absorption
	Calendar Quarter	—		1.5 µg/m^3 (for certain areas)[12]	Same as Primary Standard	
	Rolling 3-Month Average	—		0.15 µg/m^3		
Visibility Reducing Particles[14]	8 Hour	See footnote 14	Beta Attenuation and Transmittance through Filter Tape	**No National Standards**		
Sulfates	24 Hour	25 µg/m^3	Ion Chromatography			
Hydrogen Sulfide	1 Hour	0.03 ppm (42 µg/m^3)	Ultraviolet Fluorescence			
Vinyl Chloride[12]	24 Hour	0.01 ppm (26 µg/m^3)	Gas Chromatography			

See footnotes on next page …

1. California standards for ozone, carbon monoxide (except 8-hour Lake Tahoe), sulfur dioxide (1 and 24 hour), nitrogen dioxide, and particulate matter (PM10, PM2.5, and visibility reducing particles), are values that are not to be exceeded. All others are not to be equaled or exceeded. California ambient air quality standards are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.

2. National standards (other than ozone, particulate matter, and those based on annual arithmetic mean) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest 8-hour concentration measured at each site in a year, averaged over three years, is equal to or less than the standard. For PM10, the 24 hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 $\mu g/m^3$ is equal to or less than one. For PM2.5, the 24 hour standard is attained when 98 percent of the daily concentrations, averaged over three years, are equal to or less than the standard. Contact the U.S. EPA for further clarification and current national policies.

3. Concentration expressed first in units in which it was promulgated. Equivalent units given in parentheses are based upon a reference temperature of 25°C and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of 25°C and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas.

4. Any equivalent measurement method which can be shown to the satisfaction of the ARB to give equivalent results at or near the level of the air quality standard may be used.

5. National Primary Standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.

6. National Secondary Standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.

7. Reference method as described by the U.S. EPA. An “equivalent method” of measurement may be used but must have a “consistent relationship to the reference method” and must be approved by the U.S. EPA.

8. On October 1, 2015, the national 8-hour ozone primary and secondary standards were lowered from 0.075 to 0.070 ppm.

9. On December 14, 2012, the national annual PM2.5 primary standard was lowered from 15 $\mu g/m^3$ to 12.0 $\mu g/m^3$. The existing national 24-hour PM2.5 standards (primary and secondary) were retained at 35 $\mu g/m^3$, as was the annual secondary standard of 15 $\mu g/m^3$. The existing 24-hour PM10 standards (primary and secondary) of 150 $\mu g/m^3$ also were retained. The form of the annual primary and secondary standards is the annual mean, averaged over 3 years.

10. To attain the 1-hour national standard, the 3-year average of the annual 98th percentile of the 1-hour daily maximum concentrations at each site must not exceed 100 ppb. Note that the national 1-hour standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the national 1-hour standard to the California standards the units can be converted from ppb to ppm. In this case, the national standard of 100 ppb is identical to 0.100 ppm.

11. On June 2, 2010, a new 1-hour SO_2 standard was established and the existing 24-hour and annual primary standards were revoked. To attain the 1-hour national standard, the 3-year average of the annual 99th percentile of the 1-hour daily maximum concentrations at each site must not exceed 75 ppb. The 1971 SO_2 national standards (24-hour and annual) remain in effect until one year after an area is designated for the 2010 standard, except that in areas designated nonattainment for the 1971 standards, the 1971 standards remain in effect until implementation plans to attain or maintain the 2010 standards are approved.

    Note that the 1-hour national standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the 1-hour national standard to the California standard the units can be converted to ppm. In this case, the national standard of 75 ppb is identical to 0.075 ppm.

12. The ARB has identified lead and vinyl chloride as 'toxic air contaminants' with no threshold level of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.

13. The national standard for lead was revised on October 15, 2008 to a rolling 3-month average. The 1978 lead standard (1.5 $\mu g/m^3$ as a quarterly average) remains in effect until one year after an area is designated for the 2008 standard, except that in areas designated nonattainment for the 1978 standard, the 1978 standard remains in effect until implementation plans to attain or maintain the 2008 standard are approved.

14. In 1989, the ARB converted both the general statewide 10-mile visibility standard and the Lake Tahoe 30-mile visibility standard to instrumental equivalents, which are "extinction of 0.23 per kilometer" and "extinction of 0.07 per kilometer" for the statewide and Lake Tahoe Air Basin standards, respectively.

EXPERIENCE

Over 30 years of experience in analyzing air quality and odor impacts, permitting of stationary sources, and preparation of environmental impact documents, and testifying as an exprt witness in air quality matters. Mr. Kapahi assists a broad range of clients and assists them to identify and meet their regulatory obligations.

The scope of his experience includes siting of new landfills, waste to energy plants, obtaining conditional use permits from City and County Governments for new projects or expansion of existing projects. Specific experience and skills include preparation of emission inventories, analysis and measurements of odors, dispersion modeling, oversight of air quality monitoring, analysis of impacts to public health, accidental release of chemicals and working with law firms as an expert on air quality, and appearing before City and County Planning Boards and Commissions as an expert witness on behalf of clients.

Following approvals for new facilities or expansion of existing facilities, Mr. Kapahi continues to work with clients to ensure on-going compliance.

REPRESENTATIVE PROJECTS

Air Quality Permitting

- **Permitting of a Powdered Milk Plant (Turlock, CA)**

Evaluate emissions of various air pollutants from the proposed 30 million gallons per year mild processing/drying facility. Demonstrate compliance with local and state air quality regulations, including regulation of toxic air pollutants.

- **Permit Revisions for an Existing Fruit Dehydration Facility (Yuba City, CA)**

Assisted a major food processor in revising their operating permits to allow for additional steam production. Worked cooperatively with the local air district to ensure timely issuance of the revised permits.

- **Permitting of a Waste to Energy Plant (Fort Irwin, CA)**

Quantify emissions from a proposed 34 tons per day solid waste to energy project. Analyze emissions associated with pyrolysis and subsequent utilization of synthetic gas to generate 1.5 MW of electric power. Prepare the necessary permit applications and supporting documentation.

- **Permitting of a CBD Oil Extraction Facility (Mendota, CA)**

Quantify emissions from a proposed solvent extraction process. Assist in design of an RTO VOC control system. The facility was permitting in 2019 and is currently operating.

Member Technical Advisory Committee (TAC) for the California Energy Commission

Air Quality Impact Analysis and Monitoring

- **Environmental Impacts from Warehouse Development (Oceanside, CA)**

EPS is working with local residents and their attorney in identifying impacts to air quality and public health from the development of a major warehouse development. At issue are violations of air quality standards from NOx, PM10 and PM2.5.

- **Modeling Accidental Release of Chlorine (Sacramento, CA).**

EPS modeled the accidental release of chlorine from a water treatment plant. The analysis provided guidance to first responders on potential evacuation areas. The SLAB model along with detailed mass transfer calculations were performed to quantify the extent of the hazardous plume.

- **Analysis and Control of Fugitive Dust and Odors from a Soil Blending Facility (Stockton, CA)**

Advanced computational fluid mechanics (CFD) models were used to predict the air flow and movement of fugitive dust at a soil blending facility. With this information, the client was able to install appropriate mitigation services to mitigate off-site migration of fugitive dust.

- **Review of Odor Control Systems for Cannabis Cultivation and Distribution Facilities (Palm Springs, CA)**

EPS evaluated the *odor* control system for over 15 different odor cultivation and distribution facilities in Palm Springs. The effectiveness of the proposed system was evaluated and recommendations were made to the City to Palm Springs on the issuance or denial of the operating permits.

Analysis of Public Health Risks

- **Analysis of Public Health Risks Associated with Composting Operations (Napa County, CA)**

Estimate the types and amounts of toxic air contaminants (TAC) released from green waste and food waste composting. An air dispersion model was used with local wind data to determine the concentration of each TAC. The concentration estimates were supplemented with toxicity data to quantify public health risks from exposure to the various toxic pollutants.

- **Analysis of Public Health Risks from Proposed Asphalt Plant (Kern County, California)**

Analyze emissions of any toxic air pollutants from a proposed 250 tons per day asphalt plant. Emissions from aggregate drying, propane combustion and asphalt oil were quantified. Acute and chronic public health risks from exposure to various toxic pollutants were calculated.

Honorable Mayor and Members of the City Council,

I'm a Burbank resident writing about Reports to Council Item #2, the proposed agreement with IKE Smart City, LLC. I have read the staff report and Attachment 1.

I am wholeheartedly opposed to these kiosks, but I understand the enabling ordinance is in place, and so I'd like to request stringent guardrails. As drafted, the agreement commits Burbank to up to 30 kiosks (60 screens) of commercial advertising for potentially more than 20 years, with limited ability to adjust course. I ask the Council to approve the agreement only with these changes:

1. Make Phase 2 a separate Council decision. Section 3.1 currently requires IKE to pursue a second phase of 15 kiosks once the first 15 are operational, and staff can only reject individual sites on the grounds listed in Section 4.1. Phase 2 should require an evaluation of Phase 1 and Council approval, as staff prefers (Consideration 1).

2. Require mutual written agreement for renewal and remove IKE's unilateral catch-up payment (Exhibit A, Sections 1.6 and 2; Considerations 2 and 3). The initial term should also run from the Effective Date rather than the Term Commencement Date, because the current structure can stretch the commitment beyond 20 calendar years.

3. Strike the prediction-market carve-out in Section 13, consistent with staff's recommendation (Consideration 4).

4. Set display standards in the agreement itself. Section 10.1 refers only to "appropriate levels of brightness," while the specified hardware reaches 4,000 nits (Exhibit C). The agreement should set a numeric nighttime brightness limit, require static content with no audio, and require advertising to shut off overnight.

5. Strengthen siting protections. The 150-foot buffers in Sections 4.1.9 and 4.1.10 and Exhibit E cover only low-density residential areas, single-family homes, and K-12 schools. They should cover all residential zones and public parks, any reduction to 100 feet should require Council approval, and the public notice process for each site should be written into the agreement rather than left to later negotiation (Section 4.1).

Newly elected members take office on December 14, and the staff report identifies no deadline for this agreement. Because it commits the City to a decade or more of advertising on public sidewalks, I ask that the Council direct staff to continue negotiating the terms above (option 2c) and return the agreement after the new Council is seated, so the members in office as it takes effect can weigh in.

A smaller initial deployment with real checkpoints keeps the emergency-communication and wayfinding benefits and the City's revenue, without locking in two decades of advertising on our sidewalks.

Thank you for your consideration.

Chris Chandler

Proposed Project Rendering

Proposed Parking Garage

Gateway Entrance

Proposed Hotel

Thornton Avenue – view looking South

2039

Proposed Dual-Brand Hotel

- **420 Guestroom Breakdown:**
  - Aloft Hotel provides 203 rooms (regular-stay)
  - Residence Inn provides 217 rooms (extended stay)
- **Height:** Seven stories; approximately 84 Ft.
- **Architectural Style:** Contemporary style buildings

** Front elevation*

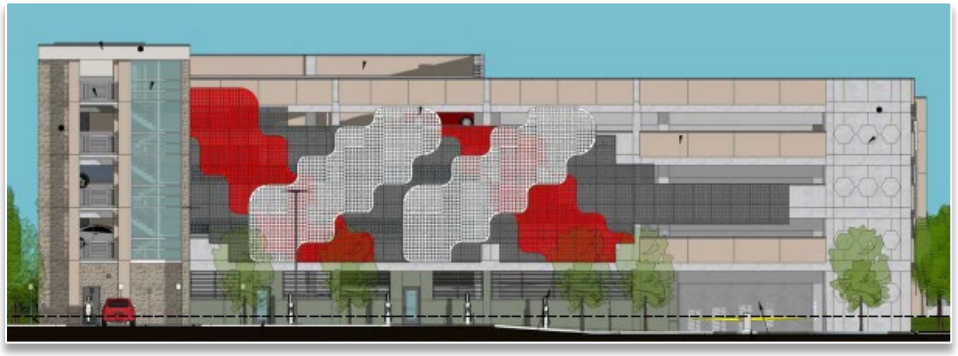
Proposed Amenities

- A central courtyard:
  - Guest swimming pool
  - Lounging deck
- Guest dining, bar, workspace, and social areas.
- Leasable commercial tenant space with an outdoor patio.
- Guest laundry and fitness facilities.

** Central Courtyard*

Proposed Parking

- **Total Parking:** 1,051 spaces
- **Garage Structure:** 766 Spaces
  - Valet Parking
  - Standard Operation: 673 parking spaces
  - Large Events: + 93 parking spaces
- **Surface Parking:** 285 Spaces (Self Parking)



** Garage Structure – Front elevation*

** Rendering of front elevation and valet pick up and drop off*

Proposed On/Off Site Improvements

New sidewalks, ADA, and utility improvements

Lighted pedestrian Paseo

New bicycle lane

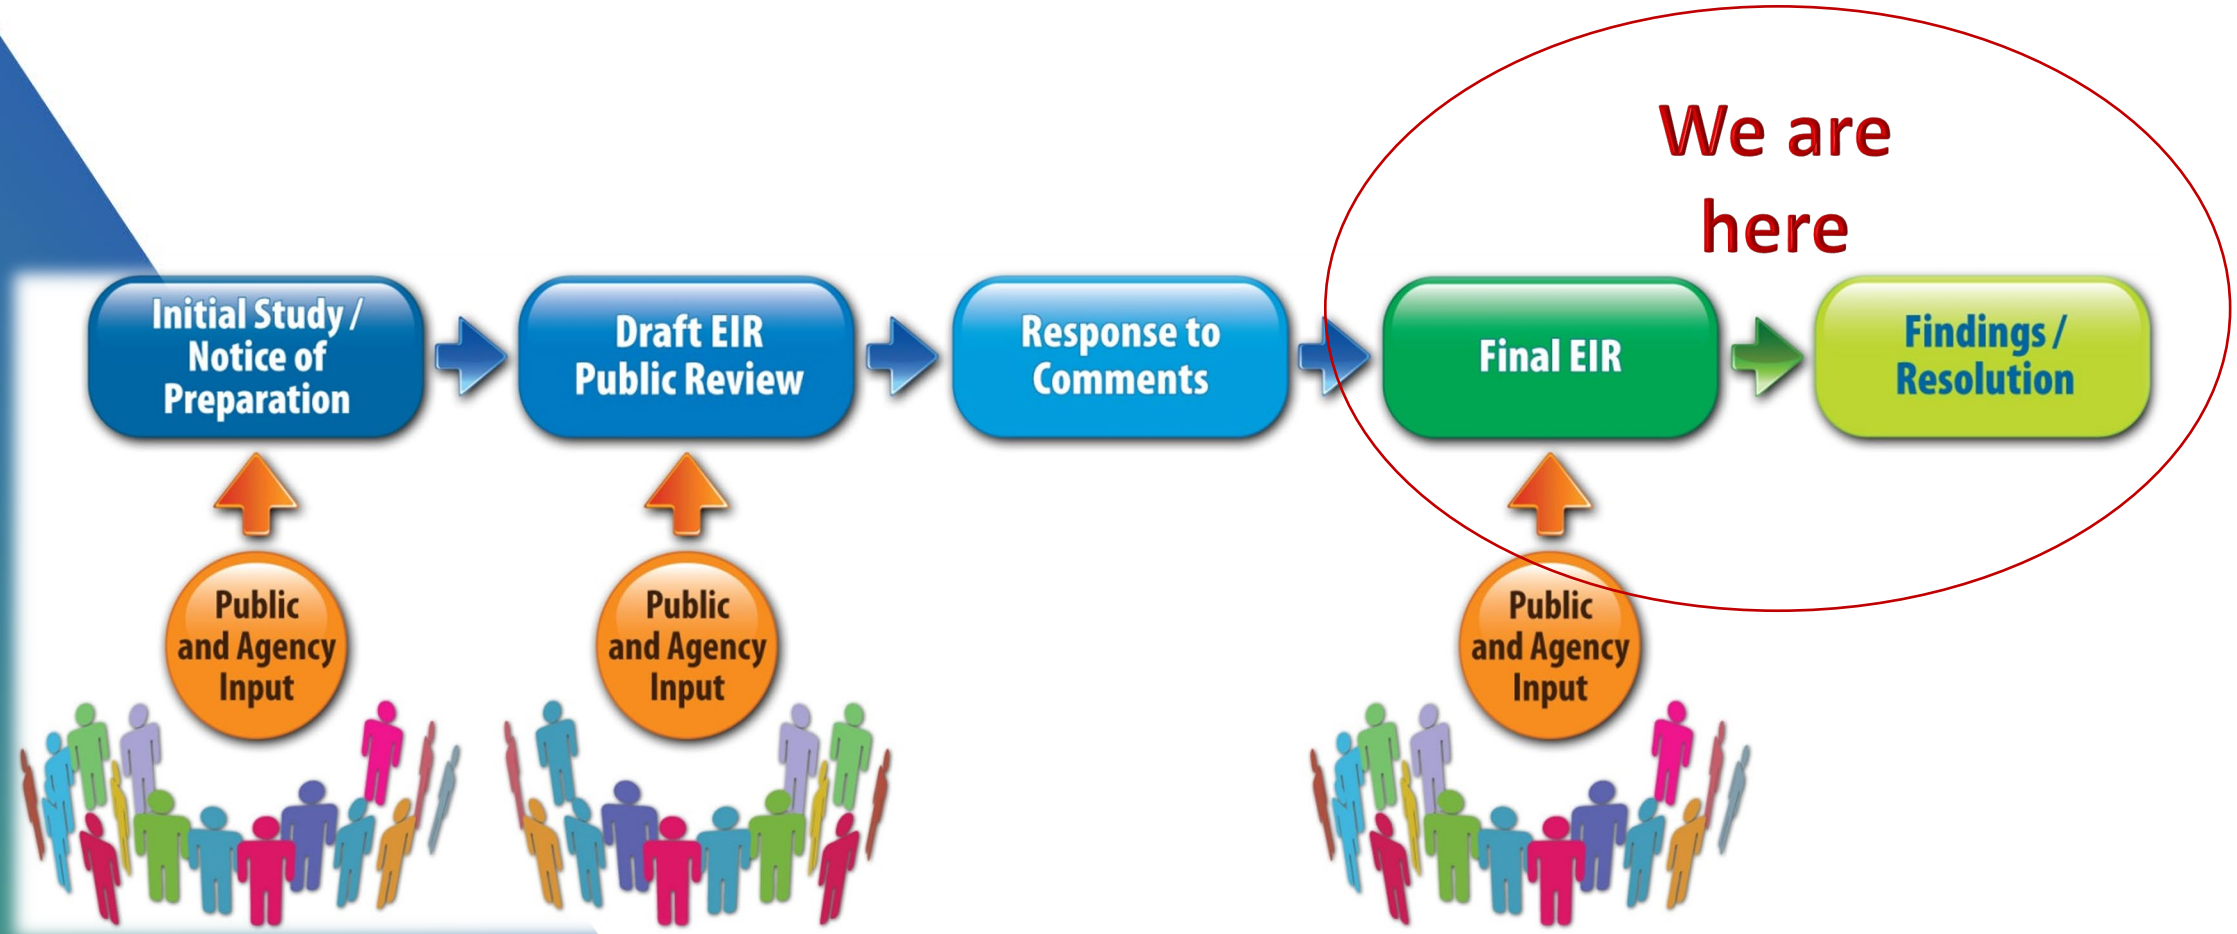
Site and Pedestrian Connectivity

2043

Project Benefits and Contributions

- **Public safety:**
  - **$30,000**, replacement of fire department equipment.
  - **$30,000**, replacement of police department equipment.
- **Transportation & Infrastructure:**
  - **$250,000** for Neighborhood Protection Plan.
  - **$80,000** for BurbankBus service.
  - **$20,000** for Metrolink station maintenance.
  - Off-site sidewalk and bicycle lane improvements.
  - TDM and TMO Measures (employee transit pass subsidies, patron shuttle services).

CEQA: Environmental Impact Report



Environmental Topical Areas Evaluated

- Aesthetics
- Agriculture and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- **Greenhouse Gas Emissions**
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- **Noise**
- Population and Housing
- Public Services
- Recreation
- Transportation
- Tribal Cultural Resources
- **Utilities and Service Systems**
- Wildfire

**Significant and unavoidable environmental impact would occur.*

Statement of Overriding Considerations

CEQA Requirements (Section 15093):

When significant environmental impacts cannot be avoided or reduced to a less-than-significant level, **a Statement of Overriding Considerations (SOC) is required for project approval.**

Required Finding to Adopt SOC:

The **project's specific benefits outweigh its significant and unavoidable environmental impacts**, justifying approval of the project despite those impacts.

Planning Commission Recommendation

On October 12, 2026, the Planning Commission voted unanimously (5-0) to recommend City Council approval of the Project.

Recommended Amendments: Revise Conditions of Approval Nos. 16 and 24(c), and allow editorial revisions by the City Attorney's Office.

Updates to Conditions of Approval and FEIR

Conditions of Approval (Attachment 11):

- Incorporated Planning Commission amendments.
- Corrected editorial and typographical errors.
- Refined Burbank Water and Power's photovoltaic system requirements.
- Expanded employee % eligible for transit subsidies.

Final Environmental Impact Report (FEIR):

- Updated with DEIR errata **on November 5, 2026**.

Findings and Consistencies

Planning Commission found the Project:

- **Meets all required BMC findings** applicable to the PD, DA, and DR applications.
- **Consistent with all other applicable City regulations.**
- **Consistent with** applicable goals and policies of the *Burbank2035* **General Plan**;
- **Meets Findings for Adoption of SOC** (CEQA).

Fiscal Considerations

The Project is not anticipated to result in a significant adverse impact to the City's General Fund.

Applicant Funded Improvements & Contributions

Development Impact Fess, Project Specific Utility Improvements, Permitting Fees

Ongoing Fiscal & Economic Benefits

Transient Occupancy Tax (TOT), Property Tax, Construction and Permanent Jobs, Visitor Spending

Community Benefits and Public Improvements

Anticipated Value of $1.1 Million

Public Noticing

Public Hearing Notice: Provided in accordance with the Burbank Municipal Code (BMC) and applicable State law.

Final EIR Distribution: Distributed to Draft EIR commenters in advance of the public hearing, consistent with State law.

Recommendation

1. **Adopt a Resolution** certifying the FEIR for the Project, Adopting a MMRP with a SOC and adopting Findings of Fact Pursuant CEQA;

2. **Adopt an Ordinance** approving a Planned Development, Development Agreement, and Development Review for the Project.

STAFF REPORT

WATER AND POWER

DATE: November 17, 2026

TO: Justin Hess, City Manager

FROM: Mandip Samra, General Manager, Burbank Water and Power Riad Sleiman for MS
VIA: Joseph Lillio, Chief Financial Officer Joseph Lillio
BY: Stela Kalomian, Financial Planning & Risk Manager Stela Kalomian

SUBJECT: Adoption of a Resolution to Issue Water Revenue Bonds Not to Exceed $43,000,000 for Water System Capital Investments

RECOMMENDATION

Adopt A RESOLUTION OF THE COUNCIL OF THE CITY OF BURBANK AUTHORIZING THE ISSUANCE OF NOT TO EXCEED $43,000,000 PRINCIPAL AMOUNT OF ITS BURBANK WATER AND POWER WATER REVENUE BONDS, SERIES OF 2026; APPROVING THE IMPROVEMENTS TO BE FINANCED THEREBY; APPROVING THE ENGAGEMENT OF PROFESSIONAL SERVICES IN CONNECTION THEREWITH; APPROVING AND AUTHORIZING THE EXECUTION OF A FIFTH SUPPLEMENTAL BOND INDENTURE; APPROVING THE FORM AND AUTHORIZING THE DISTRIBUTION OF AN OFFICIAL STATEMENT FOR USE IN CONNECTION WITH THE SALE OF SUCH BONDS; APPROVING THE FORMS OF AND AUTHORIZING CERTAIN DOCUMENTS IN CONNECTION THEREWITH; AND AUTHORIZING CERTAIN OTHER ACTIONS RELATING TO THE FOREGOING (Attachment 1).

BACKGROUND

Burbank Water and Power (BWP) operates the City of Burbank's (City) municipal water system, which provides reliable water service to the community and requires ongoing investment in infrastructure, facilities, and system improvements.

BWP has historically utilized long-term revenue bond financing to fund significant capital improvements to the City's water system, allowing BWP to maintain financial flexibility while appropriately aligning the costs of major investments with the customers who benefit from them over time.

The City's water system's assets have been diligently maintained and, in many cases, have remained in service well beyond their original useful lives, including critical infrastructure dating back to the 1920s. The City's water system is now at a point where several generational investments are necessary to replace aging infrastructure and ensure the continued reliability, resiliency, and sustainability of the system. These projects are recommended to be funded through a combination of long-term revenue bond proceeds and Water Fund reserves, providing the necessary resources to address significant infrastructure needs while spreading the cost of these investments over their useful lives. Collectively, these improvements will provide long-term benefits to current ratepayers and future generations of Water System customers.

Currently, there are two outstanding water-related debt issuances: Water Revenue Bonds, Series of 2021 (2021 Bonds), with $22,000,000 of outstanding principal, and Water Revenue Refunding Bonds, Series of 2024 (2024 Bonds), with $21,540,000 of outstanding principal. Both issuances are secured by a pledge of Water Net Revenues pursuant to the BWP Water Revenue Bond Indenture (Indenture) dated November 1, 2010 (Attachment 2).

DISCUSSION

The estimated capital spending of the Water Fund over the next three years, starting Fiscal Year (FY) 2026-27, is over $86,621,000. Of this amount, up to $41,939,900 of one-time large capital expenditures are recommended to be funded by bond proceeds.

BWP proposes to issue, on a tax-exempt basis, up to $43,000,000 principal amount of the 2026 Bonds. The bond proceeds will fund a comprehensive program of critical Water System infrastructure improvements, focusing on replacing aging assets, improving system reliability and resiliency, maintaining water quality, and addressing operational and safety needs. The projects include the replacement of the 95-year-old Reservoir 2; replacement of aging pipelines, some of which are more than 100 years old; improvements to critical booster stations and backup power capabilities; and modernization of disinfection systems to enhance water quality and reduce operational risks. Collectively, these investments will extend the useful life and reliability of the Water System, improve its ability to withstand emergencies and power outages, and ensure the continued delivery of safe and reliable water to customers. Financing these capital improvements through long-term revenue bonds allows BWP to spread the costs of the improvements over their useful lives and over the period during which current and future water customers will benefit from the infrastructure.

The issuance of the 2026 Bonds is in accordance with the City's Debt Management Policy. The proposed 2026 Bonds with maturities up to 30 years are to be issued pursuant to the Fifth Supplemental BWP Revenue Bond Indenture (Attachment 3), which supplements the BWP Water Revenue Indenture dated November 1, 2010.

The 2026 Bonds will constitute special, limited obligations of the City payable solely from Water Net Revenues under the Indenture. The City's General Fund and Electric Utility Fund will have no liability for repayment of the bonds.

The 2026 Bonds will be issued on a parity basis with the outstanding 2021 Bonds and 2024 Bonds, consistent with the provisions of the Indenture that permit BWP to issue additional obligations secured by Water Net Revenues. The water fund maintains an AA+ credit rating from Standard & Poor's Ratings; therefore, no debt service reserve fund will be established in connection with the 2026 Bonds. The bonds are expected to receive a credit rating from Standard & Poor's and Moody's Ratings, with the final rating to be included in the final offering documents.

The bonds are expected to be issued as fixed-rate obligations, with interest payable semiannually on June 1 and December 1, commencing June 1, 2027. The final terms of the 2026 Bonds, including principal amount, maturity dates, interest rates, redemption provisions, and other financing terms, will be established in accordance with the authorizing resolution and based on market conditions at the time of pricing, and reflected in the Bond Purchase Agreement to be signed by the City and the underwriters of the bonds at the time of pricing. A draft of the Bond Purchase Agreement is attached as Attachment 5.

BWP has engaged KNN Public Finance, LLC as Municipal Advisor and Norton Rose Fulbright US LLP as Bond Counsel and Disclosure Counsel. U.S. Bank Trust Company, National Association, will serve as Trustee. These professionals will assist BWP with structuring, marketing, legal documentation, disclosure, and administration of the financing.

A draft Preliminary Official Statement (POS) for the bonds is attached as Attachment 6. The POS is the primary disclosure document for investors in the 2026 Bonds. A POS will be circulated to potential investors prior to the pricing of the bonds. After the bonds have been priced, a final Official Statement will be circulated to investors. The POS is prepared by Norton Rose Fulbright US LLP, with the assistance of the financing team, which includes BWP staff.

The POS has been reviewed and approved for transmittal to the Council by the financing team. The distribution of the POS by the City is subject to federal securities laws, including the Securities Act of 1933 and the Securities Exchange Act of 1934. These laws require the POS to include all facts that would be material to an investor in the bonds. Material information is information that there is a substantial likelihood that would have actual significance in the deliberations of a reasonable investor when deciding whether to buy or sell the bonds. In the proposed resolution, Council may approve the POS and authorize

staff, on behalf of the City, to certify that the POS is as of its date "deemed final" for purposes of federal securities law (i.e., that the POS includes all facts that would be material to an investor except for certain pricing-related information, such as final principal amounts and interest rates) that will be added in the final Official Statement.

The Securities and Exchange Commission (the SEC), the agency charged with enforcing the City's compliance with the federal securities laws, has issued guidance as to the duties of the City Council with respect to its approval of the POS. In its "Report of Investigation in the Matter of County of Orange, California as it Relates to the Conduct of the Members of the Board of Supervisors" (Release No. 36761 / January 24, 1996) (Release), the SEC stated that if a member of the City Council has knowledge of any facts or circumstances that an investor would want to know about prior to investing in the 2026 Bonds, whether relating to their repayment, tax-exempt status, undisclosed conflicts of interest with interested parties, or otherwise, he or she should endeavor to discover whether such facts are adequately disclosed in the POS. In the Release, the SEC stated that the steps that a member of the City Council could take include becoming familiar with the POS and questioning staff and consultants about the disclosure of such facts.

The key sections of the POS are summarized below:

- "INTRODUCTION": This section provides a brief overview of the contents of the POS. In particular, the subsection titled "The City, BWP and the Water System" is a relevant portion for review.
- "DESCRIPTION OF THE 2026 BONDS": This section summarizes the key terms of the bonds, including payment dates and redemption provisions.
- "SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS": This section summarizes key security terms, including the pledge of Water Net Revenues, which is the sole source of funds to pay debt service on the bonds.
- "BURBANK WATER AND POWER": This section provides a brief description of BWP.
- "THE WATER SYSTEM": This section summarizes information about the Water System and Water Net Revenues, including water supply, costs of operating/maintaining the Water System, Water System rates and charges, the Water System capital improvement plan, and historical and projected debt service coverage.
- "TAX MATTERS": This section describes the tax-exempt nature of interest on the bonds.

After issuance of the bonds, BWP will have certain ongoing disclosure obligations to investors and potential investors that are set forth in a Continuing Disclosure Agreement. A draft of the Continuing Disclosure Agreement is attached as Attachment 4.

The following table gives a brief description of each attachment that is included with this report.

Attachments	Document Name	Document Description
Attachment 1	Resolution	Document authorizing the issuance of the bonds; outlines the terms and conditions
Attachment 2	Water Revenue Bond Indenture	Document specifying the responsibilities of the issuer, trustee, and bondholders; establishes the credit pledge of the water fund
Attachment 3	Fifth Supplemental Bond Indenture	Document specifying the responsibilities of the issuer, trustee, and bondholders; establishes the credit pledge of the water fund for the 2026 water bonds
Attachment 4	Continuing Disclosure Agreement	Agreement in which the issuer commits to provide ongoing disclosure about the financial condition and operations of the water fund
Attachment 5	Bond Purchase Agreement	Agreement between the issuer and the underwriter outlining the terms of the sale of the water bonds
Attachment 6	Preliminary Official Statement	Document providing detailed information about the new water bonds being issued, including financial statements, legal descriptions, and risks associated with the bonds

ENVIRONMENTAL REVIEW

This activity has no potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and as such, is not a “project” subject to the requirements of the California Environmental Quality Act (CEQA) 14 Cal. Code Regs § 15378.

FISCAL IMPACT

The proposed issuance of the 2026 Bonds will provide BWP with a cost-effective, tax-exempt financing source to fund the aforementioned projects and related financing costs. The bonds will be secured solely by Water Net Revenues and will be issued on a parity basis with the outstanding 2021 and 2024 Bonds.

The final principal amount, interest rates, annual debt service, and total debt service will depend on market conditions at the time of issuance. Costs associated with the financing, including underwriting, legal, municipal advisory, trustee, rating, and other issuance

expenses, will be funded from bond proceeds and/or other available Water Net Revenues, as applicable.

The issuance of additional parity debt will increase BWP's outstanding water system debt and associated annual debt service obligations. However, the proposed financing is structured within the requirements of the existing Indenture and will be incorporated in BWP's long-term financial planning, water rate projections, projected Water Net Revenues, and applicable debt service coverage requirements.

In October 2026, the all-in interest rate for these bonds is 5.00%. The estimated annual principal and interest payment for the new financing is $2.76 million, representing an estimated 6.2% impact on water rates. This impact was incorporated into the 14% rate increase approved for January 1, 2027.

CONCLUSION

Staff recommends that the City Council approve the necessary resolution and authorize the issuance and sale of the 2026 Bonds in an aggregate principal amount not to exceed $43,000,000, subject to the final terms and conditions set forth in the authorizing documents and the requirements of applicable law.

ATTACHMENT 1

RESOLUTION NO. _____

A RESOLUTION OF THE COUNCIL OF THE CITY OF BURBANK AUTHORIZING THE ISSUANCE OF NOT TO EXCEED $43,000,000 PRINCIPAL AMOUNT OF ITS BURBANK WATER AND POWER WATER REVENUE BONDS, SERIES OF 2026; APPROVING THE IMPROVEMENTS TO BE FINANCED THEREBY; APPROVING THE ENGAGEMENT OF PROFESSIONAL SERVICES IN CONNECTION THEREWITH; APPROVING AND AUTHORIZING THE EXECUTION OF A FIFTH SUPPLEMENTAL BOND INDENTURE; APPROVING THE FORM AND AUTHORIZING THE DISTRIBUTION OF AN OFFICIAL STATEMENT FOR USE IN CONNECTION WITH THE SALE OF SUCH BONDS; APPROVING THE FORMS OF AND AUTHORIZING CERTAIN DOCUMENTS IN CONNECTION THEREWITH; AND AUTHORIZING CERTAIN OTHER ACTIONS RELATING TO THE FOREGOING

THE COUNCIL OF THE CITY OF BURBANK FINDS:

A. The City of Burbank (the “City”) has heretofore issued four series of its City of Burbank, California Burbank Water and Power Water Revenue Bonds (the “Water Revenue Bonds”), of which two series remain outstanding, pursuant to a Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the “Master Water Revenue Bond Indenture” and as supplemented and amended from time to time, the “Water Revenue Bond Indenture”), by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the “Trustee”); and

B. The City has determined to issue a fifth series of water revenue bonds under a Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture (the “Fifth Supplemental Water Revenue Bond Indenture”), by and between the City and the Trustee, such series of bonds to be known as the City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026 (the “2026 Water Bonds”), in one or more series or subseries; and

C. The proceeds of the 2026 Water Bonds are expected to be used to (i) finance the costs (including by reimbursing the City for certain previously incurred expenditures made in connection therewith) of certain improvements to the City's water system, including but not limited to distribution system pipeline replacements, booster station improvements and upgrades, reservoir replacement and improvements, treatment improvements, and other upgrades to the water system, or such other and additional facilities for the water system as the City hereafter determines to substitute therefor (the "2026 Water Project") and (ii) pay costs of issuance of the 2026 Water Bonds; and

D. California Government Code Section 5852.1 requires that the governing body of a public body obtain from an underwriter, municipal advisor or private lender and disclose, prior to authorizing the issuance of bonds with a term of greater than 13 months, good faith estimates of the following information in a meeting open to the public: (a) the true interest cost of the bonds, (b) the sum of all fees and charges paid to third parties with respect to the bonds, (c) the amount of proceeds of the bonds expected to be received net of the fees and charges paid to third parties and any reserves or capitalized interest paid or funded with proceeds of the bonds, and (d) the sum total of all debt service payments on the bonds calculated to the final maturity of the bonds plus the fees and charges paid to third parties not paid with the proceeds of the bonds; and

E. The City Council of the City of Burbank (the "Council") wishes at this time to authorize the execution of certain documents and the performance of such acts as may be necessary or desirable to effect the issuance and sale of the 2026 Water Bonds as herein provided;

THE COUNCIL OF THE CITY OF BURBANK RESOLVES:

1. Determination to Carry Out Projects. The Council hereby determines to carry out the issuance and sale of the 2026 Water Bonds and the financing of the 2026 Water Project.

2. Engagement of Professional Services. The Council hereby approves the engagement of Norton Rose Fulbright US LLP ("Bond Counsel") for Bond Counsel and Disclosure Counsel services in connection with the issuance, sale and delivery of the 2026 Water Bonds. The Council hereby approves the engagement of KNN Public Finance, LLC (the "Municipal Advisor") for municipal advisory services in connection with the issuance, sale and delivery of the 2026 Water Bonds. The Council hereby approves the engagement of J.P. Morgan Securities LLC as senior managing underwriter (the "Representative") and Stern Brothers & Co. as co-managing underwriter (together with the Representative, the "Underwriters") in connection with the negotiated sale of the 2026 Water Bonds.

3. Issuance of 2026 Water Bonds. The Council hereby authorizes and approves the issuance of the 2026 Water Bonds, in one or more series or subseries, under and pursuant to the Master Water Revenue Bond Indenture, as heretofore supplemented and amended, and as further supplemented by the Fifth Supplemental Water Revenue Bond Indenture. Any of the Mayor, the Vice Mayor, the City Manager, the City Treasurer and the Financial Services Director is hereby authorized and directed, for and in the name of the City, to execute the 2026 Water Bonds by his or her manual or facsimile signature and the City Clerk or Assistant City Clerk is hereby authorized and directed to attest said signature by manual or facsimile signature and to affix the seal of the City thereon, all in accordance with the provisions of the Water Revenue Bond Indenture.

4. Fifth Supplemental Water Revenue Bond Indenture. The Fifth Supplemental Water Revenue Bond Indenture, in substantially the form on file with the City Clerk and made a part hereof as though set forth in full herein, is hereby approved by the Council. The City Manager, a Deputy City Manager, the City Treasurer, the Financial Services Director, the General Manager of Burbank Water and Power or the Chief Financial Officer of Burbank Water and Power and their respective designees (each an "Authorized Representative") are each hereby authorized and directed, for and in the name of the City, to execute and deliver the Fifth Supplemental Water Revenue Bond Indenture in substantially such form, together with such changes, insertions and omissions as may be approved by the City Attorney, Bond Counsel and the officer executing the Fifth Supplemental Water Revenue Bond Indenture, such execution to be conclusive evidence of such approval, and the City Clerk or the Assistant City Clerk is hereby authorized and directed to attest said signature. The Council hereby authorizes the delivery and performance of the Fifth Supplemental Water Revenue Bond Indenture.

5. Determination of Additional 2026 Water Bond Terms. Any Authorized Representative is hereby authorized to determine the following matters with respect to the 2026 Water Bonds: (a) the aggregate principal amount of the 2026 Water Bonds to be issued and sold under the Master Water Revenue Bond Indenture, as supplemented by the Fifth Supplemental Water Revenue Bond Indenture and pursuant hereto, but not to exceed the principal amount of $43,000,000; (b) the respective dated date, redemption terms, maturity date and principal amount of the 2026 Water Bonds of each maturity, provided that the final maturity of any of the 2026 Water Bonds shall not be later than June 1, 2057; (c) the sinking fund installments, if any, with respect to any term 2026 Water Bonds; (d) the interest rates of the 2026 Water Bonds; provided, that the aggregate true interest cost of the 2026 Water Bonds shall not exceed 6.00% per annum; and (e) the Underwriters' discount at which the 2026 Water Bonds may be sold, but not to exceed 0.50% of the par amount thereof (exclusive of any original issue discount). The 2026 Water Bonds shall be issued in the form, and otherwise on the terms and conditions, set forth in the Master Water Revenue Bond Indenture, the Fifth Supplemental Water Revenue Bond Indenture and in accordance with this Resolution.

6. Continuing Disclosure Agreement. The Continuing Disclosure Agreement relating to the 2026 Water Bonds, by and between the City and the Trustee (the "Continuing Disclosure Agreement"), in substantially the form on file with the City Clerk and made a part hereof as though set forth in full herein, is hereby approved by the Council. Any Authorized Representative is hereby authorized and directed, for and in the name of the City, to execute and deliver the Continuing Disclosure Agreement in such form, together with such changes, insertions and omissions as may be approved by the City Attorney, Bond Counsel and the officer executing the Continuing Disclosure Agreement, such execution to be conclusive evidence of such approval. The Council hereby authorizes the delivery and performance of the Continuing Disclosure Agreement.

7. Bond Purchase Agreement. The Bond Purchase Agreement relating to the 2026 Water Bonds (the "Bond Purchase Agreement"), by and between the City and the Representative, in substantially the form on file with the City Clerk and made a part hereof

as though set forth in full herein, is hereby approved by the Council. Subject to the limitations with respect to the terms of the 2026 Water Bonds contained in Section 5 of this Resolution, any Authorized Representative is hereby authorized and directed, for and in the name of the City to execute and deliver the Bond Purchase Agreement in such form, together with such changes, insertions and omissions as may be approved by the City Attorney, Bond Counsel and the officer executing the Bond Purchase Agreement, such execution to be conclusive evidence of such approval. The Council hereby authorizes the delivery and performance of the Bond Purchase Agreement.

8. Official Statement. The preliminary official statement of the City relating to the 2026 Water Bonds, in substantially the form on file with the City Clerk and made a part hereof as though set forth in full herein, together with any changes therein or additions thereto deemed advisable by any Authorized Representative, is hereby approved by the Council. The Council authorizes and directs that any Authorized Representative is, on behalf of the City, to certify that the preliminary official statement is as of its date "deemed final" for purposes of Rule 15c2-12 of the Securities and Exchange Commission. Any Authorized Representative is hereby authorized to cause to be prepared and to execute for and on behalf of the City a final official statement in substantially the form of the preliminary official statement with such changes therein and additions thereto approved by such Authorized Representative, such approval to be evidenced by the execution and delivery thereof. The preliminary and final official statements are hereby approved for distribution (by posting electronically and/or in printed form) in connection with the offering and sale of the 2026 Water Bonds.

9. Investments. Any Authorized Representative is hereby authorized, on behalf of the City, to enter into or to instruct the Trustee to enter into one or more investment agreements providing for the investment of moneys in any of the funds and accounts under the Water Revenue Bond Indenture, on such terms as such Authorized Representative shall deem appropriate.

10. Good Faith Estimates. In accordance with California Government Code Section 5852.1, good faith estimates of the following are set forth on Exhibit A attached hereto: (a) the true interest cost of the 2026 Water Bonds, (b) the sum of all fees and charges paid to third parties with respect to the 2026 Water Bonds, (c) the amount of proceeds of the 2026 Water Bonds expected to be received net of the fees and charges paid to third parties and any reserves or capitalized interest paid or funded with proceeds of the 2026 Water Bonds, and (d) the sum total of all debt service payments on the 2026 Water Bonds calculated to the final maturity of the 2026 Water Bonds plus the fees and charges paid to third parties not paid with the proceeds of the 2026 Water Bonds.

11. Other Actions. The Authorized Representatives and such other officers of the City be and they hereby are authorized, individually and collectively, to take all actions and execute any and all documents necessary: to arrange for the funding of any required deposit to a reserve fund under the Water Revenue Bond Indenture with a letter of credit, surety bond or insurance policy pursuant to the terms of the Water Revenue Bond Indenture if, upon the advice of the Municipal Advisor and the Representative, the funding

of any such deposit to a reserve fund with a letter of credit, surety bond or insurance policy will be beneficial to the City; to arrange for the insuring of all or any portion of the 2026 Water Bonds through one or more municipal bond insurance companies, if, upon the advice of the Municipal Advisor and the Representative, such insurance will result in a lower true interest cost to the City; to effect the sale and delivery of the 2026 Water Bonds pursuant to the Water Revenue Bond Indenture; to select and retain any state banking corporation, national banking association or other qualified financial institution as successor trustee, from time to time, under the Water Revenue Bond Indenture, if deemed in the best interest of the City; to execute and deliver any and all documents in connection with the selection or appointment of a successor trustee under the Water Revenue Bond Indenture; and to do any and all things and to execute and deliver any and all documents, including the execution of any investment agreement or direction of investment with respect to 2026 Water Bond funds, which investment may include investment agreements as authorized under Section 9 of this Resolution that have a term up to the final term of the 2026 Water Bonds, which they may deem necessary or advisable to consummate the sale, execution and delivery of the 2026 Water Bonds and otherwise to carry out, give effect to and comply with the terms and intent of this Resolution, the 2026 Water Bonds, the Water Revenue Bond Indenture, the Continuing Disclosure Agreement, the Bond Purchase Agreement, the preliminary official statement and the final official statement. Such actions heretofore taken by such officers or their designees are hereby ratified, confirmed and approved.

PASSED and ADOPTED this _____ day of November 2026.

I, Kimberley Clark, City Clerk of the City of Burbank, do hereby certify that the foregoing resolution was duly and regularly passed and adopted by the Council of the City of Burbank at its regular meeting held on the ____ day of November 2026, by the following vote:

AYES:

NOES:

ABSENT:

_____
Kimberley Clark, City Clerk

EXHIBIT A

The following information was obtained from KNN Public Finance, LLC, as municipal advisor (the "Municipal Advisor") with respect to the 2026 Water Bonds approved in the Resolution, and is provided in compliance with California Government Code Section 5852.1 with respect to the 2026 Water Bonds:

1. *True Interest Cost of the 2026 Water Bonds.* Assuming an aggregate principal amount of $41,305,000 of the 2026 Water Bonds are sold and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the true interest cost of the 2026 Water Bonds, which means the rate necessary to discount the amounts payable on the respective principal and interest payment dates to the purchase price received for the 2026 Water Bonds, is 5.00%.

2. *Finance Charge of the 2026 Water Bonds.* Assuming an aggregate principal amount of $41,305,000 of the 2026 Water Bonds are sold and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the finance charge of the 2026 Water Bonds, which means the sum of all fees and charges paid to third parties (or costs associated with the 2026 Water Bonds), is $507,000.

3. *Amount of Proceeds to be Received.* Assuming an aggregate principal amount of $41,305,000 of the 2026 Water Bonds are sold and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the amount of proceeds expected to be received by the City for sale of the 2026 Water Bonds less the finance charge of the 2026 Water Bonds described in 2 above and any reserves or capitalized interest paid or funded with proceeds of the 2026 Water Bonds, is $41,939,900.

4. *Total Payment Amount.* Assuming an aggregate principal amount of $41,305,000 of the 2026 Water Bonds are sold and based on market interest rates prevailing at the time of preparation of this information, a good faith estimate of the total payment amount, which means the sum total of all payments the City will make to pay debt service on the 2026 Water Bonds plus the finance charge of the 2026 Water Bonds described in paragraph 2 above not paid with the proceeds of the 2026 Water Bonds, calculated to the final maturity of the 2026 Water Bonds, is $81,210,000.

Attention is directed to the fact that the foregoing information constitutes good faith estimates only. The actual interest cost, finance charges, amount of proceeds and total payment amount may vary from the estimates above due to variations from these estimates in the timing of 2026 Water Bonds sales, the amount of 2026 Water Bonds sold, the amortization of the 2026 Water Bonds sold and market conditions at the time of each sale. The date of sale and the amount of 2026 Water Bonds sold will be determined by the City based on the need for project funds and other factors. The actual interest rates at which the 2026 Water Bonds will be sold will depend on the bond market at the time of each sale. The actual amortization of the 2026 Water Bonds will also depend, in part, on market interest rates at the time of sale. Market conditions, including interest rates, are

affected by economic and other factors beyond the City's, the Underwriters' and Municipal Advisor's control.

BURBANK WATER AND POWER
WATER REVENUE BOND INDENTURE

This BURBANK WATER AND POWER WATER REVENUE BOND INDENTURE, dated as of November 1, 2010 (the "Indenture"), by and between the CITY OF BURBANK, CALIFORNIA (the "City"), a municipal corporation and chartered city duly organized and existing under the Constitution and laws of the State of California, and WELLS FARGO BANK, NATIONAL ASSOCIATION, as trustee (the "Trustee");

W I T N E S S E T H:

WHEREAS, the City is a duly constituted chartered city of the State of California duly authorized to exercise the powers granted by the City Charter of the City (the "Charter"); and

WHEREAS, Article 12 of Chapter 4 of Title 2 (formerly Article 12 of Chapter 14) of the City Code provides as follows:

> Section 2-4-1201. POWER: The Council, exercising the powers reserved to the City under Sections 3 and 5 (formerly Sections 6 and 8) of Article XI of the Constitution of the State of California and Section 1010 of the Charter of the City, may, when the public interest and necessity require, by resolution or resolutions issue revenue bonds for the following purposes: (a) additions, betterments and extensions to and improvement of the electric energy system of the City, including capacity rights in electrical generation and transmission facilities, and related facilities, and incidental costs and expenses thereto, (b) additions, betterments and extensions to and improvement of the water system of the City and related facilities and incidental costs and expenses related thereto, (c) the acquisition, construction, extension, betterment, or improvement of any other revenue producing system or facility of the City, and (d) to refund obligations issued for any of the foregoing purposes.
>
> Section 2-4-1202. PROCEDURE: The procedure for the issuance of revenue bonds shall be the procedure set forth in the State Revenue Bond Law of 1941 (commencing with Government Code Section 54300), and by this reference, with the exceptions hereafter stated, the provisions of said Law are incorporated herein; provided, however, that no election to authorize the issuance of said bonds shall be held, and the restrictions of Government Code 54310 shall not apply, and to those ends Sections 54380 through 54388 and Section 54310 of said Government Code are not incorporated herein and shall not be applicable to the issuance of said revenue bonds; provided, further, that the resolution authorizing the issuance of said revenue bonds may provide that such bonds shall be payable from the revenues of the Enterprise (as specifically defined in such resolution), which may include combined revenues from electric and water services, from interest earnings on unspent bond proceeds and from such other funds as may be legally available for such purpose; provided, further, that before selling the revenue bonds, or any part thereof, the Council may either negotiate the private sale of the revenue bonds with a responsible purchaser or purchasers, who may be purchasing for their own account or for purposes of resale, or give notice inviting sealed bids pursuant to Government Code Section 54388; and provided, further that the interest rate limitation

and the limit on discount contained in Section 54402(b) and 54418, respectively, of the Government Code shall likewise not be applicable; and

WHEREAS, the City has determined to enter into this Indenture to provide for the authentication and delivery of water system revenue bonds, to establish and declare the terms and conditions upon which the Bonds shall be issued and secured and to secure the payment of the principal thereof and premium (if any) and interest thereon;

WHEREAS, the execution and delivery of this Indenture has in all respects been duly and validly authorized by resolutions duly passed and approved by the City; and

WHEREAS, all acts, conditions and things required by law to exist, to have happened and to have been performed precedent to and in connection with the execution and the entering into of this Indenture do exist, have happened and have been performed in due time, form and manner as required by law, and the parties hereto are now duly authorized to execute and enter into this Indenture;

NOW, THEREFORE, THIS INDENTURE WITNESSETH, that to secure the payment of the principal of, premium, if any, and the interest on all Bonds at any time issued, authenticated and delivered hereunder and to provide the terms and conditions under which all property, rights and interests hereby assigned and pledged are to be dealt with and disposed of, and to secure the performance and observance of the terms, conditions, stipulations, covenants, agreements, trusts, uses and purposes hereinafter expressed, and in consideration of the premises and of the material covenants herein contained and of the purchase and acceptance of the Bonds by the Owners thereof, and for other valuable consideration, the receipt of which is hereby acknowledged, the City does hereby agree and covenant with the Trustee for the benefit of the respective Owners, from time to time, of the Bonds, as follows:

ARTICLE I

EQUALITY OF SECURITY; DEFINITIONS; CONTENT OF CERTIFICATES AND OPINIONS

SECTION 1.01. Equality of Security. In consideration of the acceptance of the Bonds by the Owners thereof from time to time, this Indenture shall be deemed to be and shall constitute a contract between the City, the Trustee and the Owners from time to time of the Bonds and the covenants and agreements herein set forth to be performed by or on behalf of the City or the Trustee shall be for the equal and proportionate benefit, security and protection of all Owners of the Bonds, without preference, priority or distinction as to security or otherwise of any of the Bonds over any of the others by reasons of the series, time of issue, sale or negotiation thereof or for any cause whatsoever, except as expressly provided therein or herein. Nothing herein shall prevent additional security being provided to particular Bonds or the creation of a bond reserve fund therefor under any Supplemental Indenture.

SECTION 1.02. Definitions. The terms defined in this Section shall, for all purposes of this Indenture and of any Supplemental Indenture and of any certificate, opinion or other document herein mentioned, have the meanings herein specified, to be equally applicable to both the singular and plural forms of any of the terms herein defined.

Accreted Value

"Accreted Value" means, with respect to any Capital Appreciation Indebtedness, the principal amount thereof plus the interest accrued thereon, compounded at the interest rate thereon on each date as specified therein.

Accrued Aggregate Debt Service

"Accrued Aggregate Debt Service" means, as of any date of calculation, an amount equal to the sum of the amounts of accrued Debt Service with respect to all Series of Bonds, calculating the accrued Debt Service with respect to each Series at an amount equal to the sum of (i) interest on the Outstanding Bonds of such Series accrued and unpaid and to accrue to the end of the then current calendar month, and (ii) principal due and unpaid and that portion of the principal for such Series next due which would have accrued if deemed to accrue to the end of such calendar month if such principal were deemed to accrue daily in equal amounts from the next preceding principal payment date for such Series (or, if there shall be no such preceding principal payment date, from a date one (1) year preceding the due date of such principal installment or from the date of issuance of the Bonds of such Series, whichever period is shorter).

Annual Debt Service

"Annual Debt Service" means, for any Fiscal Year, the aggregate amount of principal and interest on all Bonds and Parity Debt becoming due and payable during such Fiscal Year calculated using the principles and assumptions set forth under the definition of Debt Service.

Assumed Debt Service

"Assumed Debt Service" means for any Fiscal Year the aggregate amount of principal and interest which would be payable on all Bonds and Parity Debt if each Excluded Principal Payment, amortized for a period specified by the City (but no longer than thirty (30) years from the date of the issuance of the Bonds or Parity Debt to which such Excluded Principal Payment relates) on a substantially level debt service basis or other amortization basis provided by the City, calculated based on a fixed interest rate equal to the rate at which the City could borrow for such period, as set forth in a certificate of a consultant delivered to the Trustee, who may rely conclusively on such certificate, within thirty (30) days of the date of calculation.

Bond Obligation

"Bond Obligation" means, as of any given date of calculation, (1) with respect to any Outstanding Bond which is Current Interest Indebtedness, the principal amount thereof, and (2) with respect to any Outstanding Bond which is Capital Appreciation Indebtedness, the Accreted Value thereof.

Bonds; Serial Bonds; Term Bonds

"Bonds" means the Burbank Water and Power Water Revenue Bonds authorized by, and at any time Outstanding pursuant to, this Indenture.

"Serial Bonds" means Bonds, maturing in specified years, for which no mandatory sinking fund payments are provided.

"Term Bonds" means Bonds payable at or before their specified maturity date or dates from mandatory sinking fund payments established for that purpose and calculated to retire such Bonds on or before their specified maturity date or dates.

Business Day

"Business Day" means any day other than (1) a Saturday, Sunday, or a day on which banking institutions in the State or the State of New York are authorized or obligated by law or executive order to be closed, and (2) for purposes of payments and other actions relating to Bonds secured by a letter of credit, a day upon which commercial banks in the city in which is located the office of the issuing bank at which demands for payment under the letter of credit are to be presented are authorized or obligated by law or executive order to be closed.

Capital Appreciation Indebtedness

"Capital Appreciation Indebtedness" means Bonds and Parity Debt on which interest is compounded and paid less frequently than annually.

Certificate, Statement, Request, Written Request, Requisition or Order of the City

"Certificate," "Statement," "Request," "Written Request," "Requisition" or "Order" of the City mean, respectively, a written certificate, statement, request, requisition or order signed in the name of the City by its City Manager or any other person authorized by the City Manager to execute such instruments. Any such instrument and supporting opinions or representations, if any, may, but need not, be combined in a single instrument with any other instrument, opinion or representation, and the two or more so combined shall be read and construed as a single instrument. If and to the extent required by Section 1.03 hereof, certificates and opinions shall include the statements provided for in Section 1.03 hereof.

Charter

"Charter" means the City Charter of the City, as amended from time to time.

City

"City" means the City of Burbank, California.

City Code

"City Code" means the Municipal Code of the City, as amended from time to time.

Code

"Code" means the Internal Revenue Code of 1986, and the regulations applicable thereto or issued thereunder.

Continuing Disclosure Agreement

"Continuing Disclosure Agreement" means any Continuing Disclosure Agreement executed and delivered by the City relating to any Series of Bonds.

Corporate Trust Office

"Corporate Trust Office" or "corporate trust office" means the corporate trust office of the Trustee at 707 Wilshire Blvd. 17th Floor, Los Angeles, California 90017 Attention: Corporate Trust Department, or such other office designated by the Trustee.

Costs of Issuance

"Costs of Issuance" means all items of expense directly or indirectly payable by or reimbursable to the City and related to the authorization, execution, sale and delivery of the Bonds, including but not limited to advertising and printing costs, costs of preparation and reproduction of documents, filing and recording fees, travel expenses and costs relating to rating agency meetings and other meetings concerning the Bonds, initial fees and charges of the Trustee, legal fees and charges, fees and disbursements of consultants and professionals, financial advisor fees and expenses, rating agency fees, fees and charges for preparation, execution, transportation and safekeeping of Bonds, surety, insurance and credit enhancement costs, and any other cost, charge or fee in connection with the delivery of Bonds.

Council

"Council" means the City Council of the City.

Counterparty

"Counterparty" means an entity which has entered into an Interest Rate Swap Agreement with the City.

Current Interest Indebtedness

"Current Interest Indebtedness" means the Bonds and Parity Debt on which interest is paid at least annually.

Debt Service

"Debt Service" means the amount of principal and interest becoming due and payable on all Bonds and Parity Debt; provided, however, that for the purposes of computing Debt Service:

(a) Excluded Principal Payments (and the interest related thereto, provided such interest is being paid from the same source as the Excluded Principal Payments)

shall be excluded from such calculation and Assumed Debt Service shall be included in such calculation;

(b) if the Bonds or Parity Debt are Variable Rate Indebtedness, the interest rate thereon for which an Interest Rate Swap Agreement is not in-place and the interest on which is excluded or expected to be excluded from gross income for federal income tax purposes for periods when the actual interest rate cannot yet be determined shall be assumed to be equal to the average of the SIFMA Swap Index for the five years preceding such date of calculation;

(c) if the Bonds or Parity Debt are Variable Rate Indebtedness, the interest rate thereon for which an Interest Rate Swap Agreement is not in-place and the interest on which is included or expected to be included in gross income for federal income tax purposes for periods when the actual interest rate cannot yet be determined shall be calculated at an interest rate equal to 100% of the average One Month USD LIBOR Rate during the five years preceding such date of calculation or such higher rate as shall be specified in a Certificate of the City;

(d) principal and interest payments on Bonds and Parity Debt shall be excluded to the extent such payments are to be paid from amounts on deposit with the Trustee or another fiduciary in escrow specifically therefor and to the extent that such interest payments are to be paid from the proceeds of Bonds or Parity Debt held by the Trustee or another fiduciary as capitalized interest;

(e) in determining the principal amount, payment shall (unless a different subsection of this definition applies for purposes of determining principal maturities or amortization) be assumed to be made in accordance with any amortization schedule established for such debt, including any mandatory sinking fund payments or any scheduled redemption or payment of Bonds or Parity Debt on the basis of Accreted Value, and for such purpose, the redemption payment or payment of Accreted Value shall be deemed a principal payment and interest that is compounded and paid as Accreted Value shall be deemed due on the scheduled redemption or payment date of such Capital Appreciation Indebtedness;

(f) with respect to any Bonds or Parity Debt that are Variable Rate Indebtedness for which an Interest Rate Swap Agreement is in-place providing for a fixed rate of interest to maturity or for a specific term with respect to such Bonds or Parity Debt, the interest rate on such Bonds or Parity Debt shall be assumed to be the synthetic fixed interest rate specified in such Interest Rate Swap Agreement for such term; provided, that if, pursuant to a Certificate of the City filed with the Trustee in connection with the issuance of an additional Series of Bonds or Parity Debt or any calculation of the Reserve Requirement, the sum of (i) interest payable on such Bonds or Parity Debt, plus (ii) amounts payable by the City under such Interest Rate Swap Agreement, less (iii) amounts receivable by the City under such Interest Rate Swap Agreement, is expected to be greater than the interest payable on the Bonds or Parity Debt to which such Interest Rate Swap Agreement relates (i.e., if such Interest Rate Swap Agreement is an "off-market" Interest Rate Swap Agreement), then, in such instance, such excess amounts

expected to be payable by the City under such Interest Rate Swap Agreement or in connection with such Bonds or Parity Debt shall be included in the calculation of Debt Service;

(g) with respect to any Bonds or Parity Debt bearing interest, or expected to bear interest, at a fixed interest rate for which an Interest Rate Swap Agreement is in-place providing for a net variable interest rate with respect to such Bonds or Parity Debt for a specific term, the interest rate on such Bonds or Parity Debt shall be assumed to be equal for such term to the sum of (i) the fixed interest rate or rates to be paid on the Bonds or Parity Debt, minus (ii) the fixed interest rate receivable by the City under such Interest Rate Swap Agreement, plus (iii) the average interest rate of the index on which the Interest Rate Swap Agreement is based, as identified in a Certificate of the City, or, if not based on an identifiable index, then the SIFMA Swap Index, in each case, over the five years preceding the date of calculation or such higher rate as shall be specified in a Certificate of the City in connection with the issuance of an additional Series of Bonds or Parity Debt or any calculation of the Reserve Requirement;

(h) if any Bonds or Parity Debt include an option or an obligation to tender all or a portion of such Bonds or Parity Debt to the City, the Trustee or another fiduciary or agent and require that such Bonds or Parity Debt or portion thereof be purchased if properly presented, then for purposes of determining the amounts of principal and interest due, the options or obligations to tender shall be treated as a principal maturity occurring on the first date on which holders or owners thereof may or are required to tender, except that any such option or obligation to tender shall be ignored and not treated as a principal maturity, if (1) such Bonds or Parity Debt are rated in one of the two highest long-term Rating Categories by Moody's, Fitch or Standard & Poor's or such Bonds or Parity Debt are rated in the highest short-term note or commercial paper Rating Categories by Moody's, Fitch or Standard & Poor's and (2) funds for the purchase price are to be provided by a letter of credit or standby bond purchase agreement and the obligation of the City with respect to the provider of such letter of credit or standby bond purchase agreement, other than its obligations on such Bonds or Parity Debt, shall be subordinated to the obligation of the City on the Bonds and Parity Debt; and

(i) if interest on any Bonds or Parity Debt is reasonably anticipated to be reimbursed to the City by a Subsidy Payment, then at the election of the City to exclude such Subsidy Payment from Water Revenues, interest payments with respect to such Bonds or Parity Debt may be reduced by the amount of interest reasonably anticipated to be paid or reimbursed by the United States of America; provided, however, that if the City elects to include such Subsidy Payment in the definition of Water Revenues then interest payments with respect to such Bonds or Parity Debt shall not be reduced by the amount of interest reasonably anticipated to be paid or reimbursed by the United States of America.

Debt Service Fund

"Debt Service Fund" means the fund by that name established pursuant to Section 5.03 hereof.

Defeasance Securities

"Defeasance Securities" means any of the following:

(i) any bonds or other obligations which as to principal and interest constitute direct obligations of, or are unconditionally guaranteed by, the United States of America, including obligations of the Federal National Mortgage Association, the Government National Mortgage Association, Federal Home Loan Banks and Federal Home Loan Mortgage Corporation to the extent unconditionally guaranteed by the United States of America;

(ii) any certificates, receipts, securities or other obligations evidencing ownership of, or the right to receive, a specified portion of one or more interest payments or principal payments, or any combination thereof, to be made on any bond, note, or other obligation described above in clause (i) including, but not limited to, REFCORP interest strips; or

(iii) any bonds or other obligations of any state of the United States of America or any political subdivision thereof (a) which are not callable prior to maturity or as to which irrevocable instructions have been given to the trustee of such bonds or other obligations by the obligor to give due notice of redemption and to call such bonds for redemption on the date or dates specified in such instructions, (b) which are secured as to principal and interest and redemption premium, if any, by a fund consisting only of cash or bonds or other obligations of the character described above in clause (i) or (ii) which fund may be applied only to the payment of such principal of and interest and redemption premium, if any, on such bonds or other obligations on the interest payment dates and the maturity date or dates thereof or the specified redemption date or dates pursuant to such irrevocable instructions, as appropriate, (c) as to which the principal of and interest on the bonds and obligations of the character described above in clause (i) or (ii) which have been deposited in such fund along with any cash on deposit in such fund are sufficient to pay the principal of and interest and redemption premium, if any, on the bonds or other obligations described in this clause (iii) on the interest payment dates and the maturity date or dates thereof or on the redemption date or dates specified in the irrevocable instructions referred to in subclause (a) of this clause (iii), as appropriate, and (d) which have been rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds).

EMMA

"EMMA" means the Electronic Municipal Market Access System, a facility of the Municipal Securities Rulemaking Board, or its successor.

Event of Default

"Event of Default" means any of the events specified in Section 7.01 hereof.

Excluded Principal Payments

"Excluded Principal Payments" means each payment of principal (or the principal component of lease or installment purchase payments) of Bonds or Parity Debt which the City determines on a date not later than the date of issuance thereof that the City intends to pay with moneys that are not Water Revenues or Water Net Revenues, but from the proceeds of future debt obligations of the City and the Trustee may rely conclusively on such determination of the City.

Fiscal Year

"Fiscal Year" means the period beginning on July 1 of each year and ending on the next succeeding June 30, or any other twelve-month period hereafter selected and designated as the official fiscal year period of the City which designation shall be provided to the Trustee in a Certificate of the City.

Fitch

"Fitch" means Fitch, Inc., and its successors and assigns, except that if such corporation shall be dissolved or liquidated or shall no longer perform the functions of a securities rating agency, then the term "Fitch" shall be deemed to refer to any other nationally recognized securities rating agency selected by the City.

Generally Accepted Accounting Principles Applicable to Governments

"Generally Accepted Accounting Principles Applicable to Governments" means generally accepted accounting principles applicable to governments as promulgated by the Governmental Accounting Standards Board or its successor.

Indenture

"Indenture" means this Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010, by and between the City and the Trustee, as originally executed and as it may from time to time be supplemented or amended by any Supplemental Indenture delivered pursuant to the provisions hereof.

Interest Rate Swap Agreement

"Interest Rate Swap Agreement" means an interest rate swap, cap, collar, option, floor, forward, derivative, or other hedging agreement, arrangement or security, however denominated, entered into between the City and a Counterparty, in connection with or incidental to, the issuance or carrying of Bonds, including, without limitation, an interest rate swap, cap, collar, option, floor, forward, derivative, or other hedging agreement, arrangement or security entered

into in advance of the issuance of Bonds and designated by the City in a certificate or Supplemental Indenture as a Parity Debt.

Investment Securities

"Investment Securities" means the following:

(i) any bonds or other obligations which as to principal and interest constitute direct obligations of, or are unconditionally guaranteed by, the United States of America, including obligations of any of the federal agencies and federally sponsored entities set forth in clause (iii) below to the extent unconditionally guaranteed by the United States of America;

(ii) any certificates, receipts, securities or other obligations evidencing ownership of, or the right to receive, a specified portion of one or more interest payments or principal payments, or any combination thereof, to be made on any bond, note, or other obligation described above in clause (i);

(iii) obligations of the Federal National Mortgage Association, the Government National Mortgage Association, Federal Home Loan Banks, and Federal Home Loan Mortgage Corporation;

(iv) obligations of any state, territory or commonwealth of the United States of America or any political subdivision thereof or any agency or department of the foregoing; provided that at the time of their purchase such obligations are rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(v) any bonds or other obligations of any state of the United States of America or any political subdivision thereof (a) which are not callable prior to maturity or as to which irrevocable instructions have been given to the trustee of such bonds or other obligations by the obligor to give due notice of redemption and to call such bonds for redemption on the date or dates specified in such instructions, (b) which are secured as to principal and interest and redemption premium, if any, by a fund consisting only of cash or bonds or other obligations of the character described above in clause (i), (ii) or (iii) which fund may be applied only to the payment of such principal of and interest and redemption premium, if any, on such bonds or other obligations on the interest payment dates and the maturity date or dates thereof or the specified redemption date or dates pursuant to such irrevocable instructions, as appropriate, (c) as to which the principal of and interest on the bonds and obligations of the character described above in clause (i), (ii) or (iii) which have been deposited in such fund along with any cash on deposit in such fund are sufficient to pay the principal of and interest and redemption premium, if any, on the bonds or other obligations described in this clause (v) on the interest payment dates and the maturity date or dates thereof or on the redemption date or dates specified in the irrevocable instructions referred to in subclause (a) of this clause (v), as appropriate, and (d) which have been rated not lower than their respective ratings on the

Bonds by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(vi) bonds, notes, debentures or other evidences of indebtedness issued or guaranteed by any corporation which are, at the time of purchase, rated by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds) in their respective highest short-term Rating Categories, or, if the term of such indebtedness is longer than three (3) years, rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(vii) demand or time deposits or certificates of deposit, whether negotiable or nonnegotiable, issued by any bank or trust company organized under the laws of any state of the United States of America or any national banking association (including the Trustee), provided that such certificates of deposit shall be purchased directly from such a bank, trust company or national banking association and shall be either (1) continuously and fully insured by the Federal Deposit Insurance Corporation, or (2) continuously and fully secured by such securities and obligations as are described above in clauses (i) through (iv), inclusive, which shall have a market value (exclusive of accrued interest) at all times at least equal to the principal amount of such certificates of deposit and shall be lodged with the Trustee, as custodian, by the bank, trust company or national banking association issuing such certificates of deposit, and the bank, trust company or national banking association issuing each such certificate of deposit required to be so secured shall furnish the Trustee with an undertaking satisfactory to it that the aggregate market value of all such obligations securing each such certificate of deposit will at all times be an amount equal to the principal amount of each such certificate of deposit and the Trustee shall be entitled to rely on each such undertaking;

(viii) taxable commercial paper or tax-exempt commercial paper, rated in their respective highest Rating Categories by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(ix) variable rate obligations required to be redeemed or purchased by the obligor or its agent or designee upon demand of the holder thereof secured as to such redemption or purchase requirement by a liquidity agreement with a corporation and as to the payment of interest and principal either upon maturity or redemption (other than upon demand by the holder thereof) thereof by an unconditional credit facility of a corporation provided that the variable rate obligations themselves are rated in their respective highest Rating Categories for its short-term rating, if any, and not lower than their respective ratings on the Bonds for its long-term rating, if any, by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds), and that the corporations providing the liquidity agreement and credit facility have, at the date of acquisition of the variable rate obligation by the Trustee, an outstanding issue of unsecured, uninsured and unguaranteed debt obligations rated not lower than their respective ratings on the Bonds by Moody's (if

Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(x) any repurchase agreement with any bank or trust company organized under the laws of any state of the United States or any national banking association (including the Trustee) having a minimum permanent capital of one hundred million dollars ($100,000,000) and with short-term debt rated by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds) in their respective four highest short-term rating categories or with government bond dealer reporting to, trading with, and recognized as a primary dealer by the Federal Reserve Bank of New York, which agreement is secured by any one or more of the securities and obligations described in clauses (i), (ii) or (iii) above, which shall have a market value (exclusive of accrued interest and valued at least monthly) at least equal to the principal amount of such investment and shall be lodged with the Trustee or other fiduciary, as custodian for the Trustee, by the bank, trust company, national banking association or bond dealer executing such repurchase agreement, and the entity executing each such repurchase agreement required to be so secured shall furnish the Trustee with an undertaking satisfactory to it that the aggregate market value of all such obligations securing each such repurchase agreement (as valued at least monthly) will be an amount equal to the principal amount of each such repurchase agreement and the Trustee shall be entitled to rely on each such undertaking;

(xi) any cash sweep or similar account arrangement of or available to the Trustee, the investments of which are limited to investments described in clauses (i), (ii), (iii), (iv) and (x) of this definition of Investment Securities and any money market fund, the entire investments of which are limited to investments described in clauses (i), (ii), (iii), (iv) and (x) of this definition of Investment Securities and which money market fund is rated in their respective highest Rating Categories by Moody's (if Moody's is then rating the Bonds), Fitch (if Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds); provided that as used in this clause (xi) and clause (xii) investments will be deemed to satisfy the requirements of clause (x) if they meet the requirements set forth in clause (x) ending with the words "clauses (i), (ii) or (iii) above" and without regard to the remainder of such clause (x);

(xii) investment agreements with a domestic or foreign bank or corporation (other than a life or property casualty insurance company) the long-term debt of which, or, in the case of a guaranteed corporation the long-term debt, or, in the case of a monoline financial guaranty insurance company, claims paying ability, of the guarantor is rated at least "AA" by Standard & Poor's and "AA" by Fitch; provided, that the terms of the investment agreement shall be approved in writing by each insurer of the Bonds, if any;

(xiii) shares of beneficial interest in diversified management companies investing exclusively in securities and obligations described in clauses (i) through (xii) of this definition of Investment Securities and which companies are rated in their respective highest Rating Categories by Moody's (if Moody's is then rating the Bonds), Fitch (if

Fitch is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds) or have an investment advisor registered with the Securities and Exchange Commission with not less than five years experience investing in such securities and obligations and with assets under management in excess of $500,000,000;

(xiv) the Local Agency Investment Fund; and

(xv) any investment approved by the Council.

Maximum Annual Debt Service

"Maximum Annual Debt Service" means the greatest amount of principal and interest becoming due and payable on all Bonds and Parity Debt in the Fiscal Year in which the calculation is made or any subsequent Fiscal Year using the principles and assumptions set forth under the definition of Debt Service.

Moody's

"Moody's" means Moody's Investors Service, a corporation duly organized and existing under and by virtue of the laws of the State of Delaware, and its successors and assigns, except that if such corporation shall be dissolved or liquidated or shall no longer perform the functions of a securities rating agency, then the term "Moody's" shall be deemed to refer to any other nationally recognized securities rating agency selected by the City.

One Month USD LIBOR Rate

"One Month USD LIBOR Rate" means the rate for deposits in U.S. dollars for a one-month maturity that appears on Reuters Screen LIBOR01 Page (or such other page as may replace that page on that service, or such other service as may be nominated by the British Bankers Association, for the purpose of displaying London interbank offered rates for U.S. dollar deposits) as of 11:00 a.m., London time, on the date of determination of such rate, except that, if such rate does not appear on such page on such date, the One Month USD LIBOR Rate means a rate determined on the basis of the rates at which deposits in U.S. dollars for a one-month maturity and in a principal amount of at least U.S. $1,000,000 are offered at approximately 11:00 a.m., London time, on such date, to prime banks in the London interbank market by three major banks in the London interbank market (herein referred to as the "Reference Banks") selected by the Trustee (provided, however, that the Trustee may appoint an agent to identify such Reference Banks). The Trustee or its agent is to request the principal London office of each of such Reference Banks to provide a quotation of its rate. If at least two such quotations are provided, the One Month LIBOR Rate will be the arithmetic mean of such quotations. If fewer than two quotations are provided, the One Month LIBOR Rate will be the arithmetic mean of the rates quoted by three (if three quotations are not provided, two or one, as applicable) major banks in New York City, selected by the Trustee or its agent, at approximately 11:00 a.m., New York City time, on such date for loans in U.S. dollars to leading European banks in a principal amount of at least U.S. $1,000,000 having a one-month maturity. If none of the banks in New York City selected by the Trustee or its agent is then quoting rates for such loans, then the One Month LIBOR Rate for the ensuing interest period will mean the One Month LIBOR Rate most recently in effect.

Opinion of Bond Counsel

"Opinion of Bond Counsel" means a written opinion of a law firm of national standing in the field of public finance selected by the City.

Outstanding

"Outstanding," when used as of any particular time with reference to Bonds, means (subject to the provisions of Section 11.09) all Bonds theretofore, or thereupon being, authenticated and delivered by the Trustee under this Indenture except (1) Bonds theretofore cancelled by the Trustee or surrendered to the Trustee for cancellation; (2) Bonds with respect to which all liability of the City shall have been discharged in accordance with Section 10.02, including Bonds (or portions of Bonds) referred to in Section 11.10; and (3) Bonds for the transfer or exchange of or in lieu of or in substitution for which other Bonds shall have been authenticated and delivered by the Trustee pursuant to this Indenture.

Owner

"Owner" whenever used herein with respect to a Bond, means the person in whose name such Bond is registered.

Parity Debt

"Parity Debt" means SRF Obligations and any other indebtedness, installment sale obligation, lease obligation or other obligation of the City for borrowed money or Interest Rate Swap Agreement having an equal lien and charge upon the Water Net Revenues, therefore payable on a parity with the Bonds (whether or not any Bonds are Outstanding).

Parity Reserve Fund

"Parity Reserve Fund" means the reserve fund created for Participating Bonds pursuant to Section 5.04 hereof.

Participating Bonds

"Participating Bonds" means all Bonds Outstanding other than Bonds which are designated by the City as Bonds that will not constitute Participating Bonds in accordance with the provisions of Section 3.02 hereof.

Person

"Person" means an association, corporation, firm, partnership, trust, or other legal entity or group of entities, including a governmental entity or any agency or political subdivision thereof.

Rating Category

"Rating Category" means (i) with respect to any long-term rating category, all ratings designated by a particular letter or combination of letters, without regard to any numerical modifier, plus or minus sign or other modifier and (ii) with respect to any short-term or commercial paper rating category, all ratings designated by a particular letter or combination of letters and taking into account any numerical modifier, but not any plus or minus sign or other modifier.

Rebate Fund

"Rebate Fund" means that fund established under Section 6.07 hereof.

Rebate Requirement

"Rebate Requirement" means the Rebate Requirement defined in a Tax Certificate.

Redemption Price

"Redemption Price" means, with respect to any Bond (or portion thereof) the Bond Obligation of such Bond (or portion thereof) plus the applicable premium, if any, payable upon redemption thereof pursuant to the provisions of such Bond and this Indenture.

Reserve Fund Requirement

"Reserve Fund Requirement" means, as of any date of calculation, (i) with respect to the Parity Reserve Fund, an amount equal to one-half of the greatest amount of principal and interest becoming due and payable on all Outstanding Participating Bonds in the then current or any future Fiscal Year, net of any expected Subsidy Payment, and (ii) with respect to any Series Reserve Fund for a Series of Bonds that do not constitute Participating Bonds, the reserve fund requirement (which reserve fund requirement may be zero ($0)), specified for such Series of Bonds in a Supplemental Indenture setting forth the terms of such Bonds, all as computed and determined by the City and specified in writing to the Trustee.

Securities Depository

"Securities Depository" shall have the meaning assigned to such term in Section 2.10(A) hereof or, in accordance with then-current guidelines of the Securities and Exchange Commission, to such other addresses and/or such other securities depository or depositories, or no such depositories, as the City may designate in a Request of the City delivered to the Trustee.

Series

"Series," whenever used herein with respect to Bonds, means all of the Bonds designated as being of the same series, authenticated and delivered in a simultaneous transaction, regardless of variations in maturity, interest rate, redemption and other provisions, and any Bonds thereafter authenticated and delivered upon transfer or exchange or in lieu of or in substitution for (but not to refund) such Bonds as herein provided.

Series Reserve Fund

"Series Reserve Fund" means a reserve fund created for a Series of Bonds that do not constitute Participating Bonds as specified in a Supplemental Indenture setting forth the terms of such Series of Bonds.

SIFMA Swap Index

"SIFMA Swap Index" means, on any date, a rate determined on the basis of the seven-day high grade market index of tax-exempt variable rate demand obligations, as produced by Municipal Market Data and published or made available by the Securities Industry and Financial Markets Association (formerly the Bond Market Association) ("SIFMA") or by any Person acting in cooperation with or under the sponsorship of SIFMA and acceptable to the Trustee and effective from such date.

SRF Obligations

"SRF Obligations" means the loan contract, dated April 1, 1994, between the California State Water Resources Control Board and the City and any similar loan made to the City from the California State Water Resources Control Board payable from Water Net Revenues on a parity with any Bonds and Parity Debt.

Standard & Poor's

"Standard & Poor's" means Standard & Poor's, Rating Services, a division of the McGraw-Hill Companies, Inc., and its successors and assigns, except that if such corporation shall be dissolved or liquidated or shall no longer perform the functions of a securities rating agency, then the term "Standard & Poor's" shall be deemed to refer to any other nationally recognized securities rating agency selected by the City.

State

"State" means the State of California.

Subsidy Payment

"Subsidy Payment" means the payment from the United States Treasury to the City (or its designee) that is authorized by the Code and is calculated by reference to the interest due on a Series of Bonds (or portion thereof) on or about each interest payment date therefor based upon the qualification of such Series of Bonds (or portion thereof) as a "qualified bond" under applicable Code requirements, and the City's irrevocable election to treat such Series of Bonds (or portion thereof) as such at the time of their issuance.

Supplemental Indenture

"Supplemental Indenture" means any indenture hereafter duly executed and delivered, supplementing, modifying or amending this Indenture, but only if and to the extent that such Supplemental Indenture is specifically authorized hereunder.

Tax Certificate

"Tax Certificate" means a Tax Certificate delivered by the City at the time of the issuance and delivery of any Series of Bonds, as the same may be amended or supplemented in accordance with its terms.

Treasurer

"Treasurer" means the Treasurer of the City.

Trustee

"Trustee" means Wells Fargo Bank, National Association, acting as trustee hereunder, or any successor thereto, as provided in Section 8.01.

Variable Rate Indebtedness

"Variable Rate Indebtedness" means any indebtedness the interest rate on which is not fixed at the time of incurrence of such indebtedness, and has not at some subsequent date been fixed at a single numerical rate for the entire term of the indebtedness.

Water Net Revenues

"Water Net Revenues" means the amount of Water Revenues of the Water System remaining after payment therefrom of the Water Operating Expenses.

Water Operating Expenses

"Water Operating Expenses" means the amount required to pay the expenses of management, repair and other costs necessary to operate, maintain and preserve the Water System in good repair and working order, including but not limited to, the expenses of conducting the Water System, but excluding depreciation.

Water Revenue Fund

"Water Revenue Fund" means the Water Revenue Fund established pursuant to Section 5.01 hereof.

Water Revenues

"Water Revenues" means all the revenues from rates, fees and charges for providing water service to persons and real property and all other fees, rents and charges and other revenues derived by the City from the ownership, operation, use or service of the Water System, including contributions in aid of construction; provided, that the City may by election in a Supplemental Indenture relating to a Series of Bonds or Parity Debt exclude from Water Revenues any Subsidy Payment.

Water System

"Water System" means the entire system and facilities of the City for the distribution of water as said system now exists and including all additions, extensions and improvements thereto later constructed or acquired.

SECTION 1.03. Content of Certificates and Opinions. Every certificate or opinion provided for in this Indenture with respect to compliance with any provision hereof shall include (1) a statement that the person making or giving such certificate or opinion has read such provision and the definitions herein relating thereto; (2) a brief statement as to the nature and scope of the examination or investigation upon which the certificate or opinion is based; (3) a statement that, in the opinion of such person, such person has made or caused to be made such examination or investigation as is necessary to enable such person to express an informed opinion with respect to the subject matter referred to in the instrument to which such person's signature is affixed; and (4) a statement as to whether, in the opinion of such person, such provision has been complied with.

Any such certificate or opinion made or given by an officer of the City may be based, insofar as it relates to legal or accounting matters, upon a certificate or opinion of or representation by counsel, an accountant, a financial advisor, an investment banker or an independent consultant, unless such officer knows, or in the exercise of reasonable care should have known, that the certificate, opinion or representation with respect to the matters upon which such certificate or statement may be based, as aforesaid, is erroneous. Any such certificate or opinion made or given by counsel, an accountant or an independent consultant may be based, insofar as it relates to factual matters (with respect to which information is in the possession of the City) upon a certificate or opinion of or representation by an officer of the City, unless such counsel, accountant or independent consultant knows, or in the exercise of reasonable care should have known, that the certificate or opinion or representation with respect to the matters upon which such person's certificate or opinion or representation may be based, as aforesaid, is erroneous. The same officer of the City, or the same counsel or accountant or independent consultant, as the case may be, need not certify to all of the matters required to be certified under any provision of this Indenture, but different officers, counsel, accountants or independent consultants may certify to different matters, respectively.

ARTICLE II

THE BONDS

SECTION 2.01. Authorization of Bonds. Bonds may be issued hereunder, in book-entry form or otherwise, from time to time as the issuance thereof is approved by the City. The maximum principal amount of Bonds which may be issued hereunder is not limited; subject, however, to the right of the City, which is hereby reserved, to limit the aggregate principal amount of Bonds which may be issued or Outstanding hereunder. The Bonds are designated generally as "City of Burbank, California Burbank Water and Power Water Revenue Bonds"; each Series thereof to bear such additional designation as may be necessary or appropriate to distinguish such Series from every other Series of Bonds. The Bonds may be issued in such

Series as from time to time shall be established and authorized by the City, subject to the covenants, provisions and conditions herein contained.

SECTION 2.02. Terms of the Bonds. The Bonds of each Series shall bear interest, if any, at such rate or rates or determined in such manner and payable at such intervals as may be determined by the City at the time of issuance thereof pursuant to the Supplemental Indenture under which such Bonds are issued, not to exceed the maximum rate of interest permitted by law and shall mature and become payable on such date or dates and in such year or years as the City may determine by the Supplemental Indenture creating such Series. Principal of, premium, if any, and interest on such Bonds shall be payable in such manner as may be specified in the Supplemental Indenture creating such Series.

The Bonds of any Series may be issued in such denominations as may be authorized by the Supplemental Indenture creating such Series in fully registered form without coupons or in fully registered book-entry form or, for a Series maturing in one year or less, bearer form.

SECTION 2.03. Form of Bonds. The Bonds of any Series shall be in such form or forms as may be specified in the Supplemental Indenture creating such Series.

SECTION 2.04. Execution of Bonds. The Bonds shall be executed in the name and on behalf of the City with the facsimile or manual signature of any of the Mayor, Vice Mayor, the City Manager, the Assistant City Manager, the City Treasurer or the Financial Services Director, under seal attested by the facsimile or manual signature of the City Clerk. Such seal may be in the form of a facsimile of the City's seal and may be reproduced, imprinted or impressed on the Bonds. Unless otherwise provided in any Supplemental Indenture, the Bonds shall then be delivered to the Trustee for authentication by it. In case any of the officers who shall have signed or attested any of the Bonds shall cease to be such officer or officers of the City before the Bonds so signed or attested shall have been authenticated or delivered by the Trustee or issued by the City, such Bonds may nevertheless be authenticated, delivered and issued and, upon such authentication, delivery and issue, shall be as binding upon the City as though those who signed and attested the same had continued to be such officers of the City, and also any Bond may be signed and attested on behalf of the City by such persons as at the actual date of execution of such Bond shall be the proper officers of the City although at the nominal date of such Bond any such person shall not have been such officer of the City.

Except as may be provided in any Supplemental Indenture, only such of the Bonds as shall bear thereon a certificate of authentication substantially in the form recited in the Supplemental Indenture creating such Series, manually executed by the Trustee, shall be valid or obligatory for any purpose or entitled to the benefits of this Indenture, and such certificate of authentication when manually executed by the Trustee shall be conclusive evidence that the Bonds so authenticated have been duly executed, authenticated and delivered hereunder and are entitled to the benefits of this Indenture.

SECTION 2.05. Transfer of Bonds. Any Bond may, in accordance with its terms, be transferred, upon the register required to be kept pursuant to the provisions of Section 2.07 hereof, by the person in whose name it is registered, in person or by his or her duly authorized

attorney, upon surrender of such Bond for cancellation, accompanied by delivery of a written instrument of transfer, duly executed in a form acceptable to the Trustee.

Whenever any Bond or Bonds shall be surrendered for transfer, the City shall execute and the Trustee shall authenticate and deliver a new Bond or Bonds, of the same Series, tenor, maturity and interest rate and for a like aggregate principal amount; provided that no registration or transfer may occur during the period established by the Trustee for selection of Bonds for redemption, or of any Bond or portion of a Bond so selected for redemption. The Trustee shall require the Owner requesting such transfer to pay any tax or other governmental charge required to be paid with respect to such transfer.

SECTION 2.06. Exchange of Bonds. Bonds may be exchanged at the Corporate Trust Office of the Trustee for a like aggregate principal amount of Bonds of other authorized denominations of the same Series, tenor, maturity and interest rate by the person in whose name it is registered, in person or by his or her duly authorized attorney, upon surrender of such Bond for cancellation; provided that, unless otherwise provided in any Supplemental Indenture, no exchange may occur during the period established by the Trustee for selection of Bonds for redemption, or of any Bond or portion of a Bond so selected for redemption. The Trustee shall require the Owner requesting such exchange to pay any tax or other governmental charge required to be paid with respect to such exchange.

SECTION 2.07. Bond Register. The Trustee will keep or cause to be kept, at its Corporate Trust Office sufficient books for the registration and transfer of the Bonds, which shall at all times be open to inspection during normal business hours by the City upon reasonable prior notice; and, upon presentation for such purpose, the Trustee shall, under such reasonable regulations as it may prescribe, register or transfer or cause to be registered or transferred, on such books, Bonds as hereinbefore provided.

SECTION 2.08. Temporary Bonds. The Bonds may be issued in temporary form exchangeable for definitive Bonds. Any temporary Bond may be printed, lithographed or typewritten, shall be of such denomination as may be determined by the City, shall be in registered form and may contain such reference to any of the provisions of this Indenture as may be appropriate. A temporary Bond may be in the form of a single Bond payable in installments, each on the date, in the amount and at the rate of interest established for the Bonds maturing on such date. Every temporary Bond shall be executed by the City and authenticated by the Trustee upon the same conditions and in substantially the same manner as the definitive Bonds. If the City issues temporary Bonds it will execute and deliver definitive Bonds after being requested to do so, and thereupon the temporary Bonds may be surrendered, for cancellation, in exchange therefor at the Corporate Trust Office of the Trustee and the Trustee shall authenticate and deliver in exchange for such temporary Bonds an equal aggregate principal amount of definitive Bonds of authorized denominations of the same Series, tenor and maturity or maturities. Until so exchanged, the temporary Bonds shall be entitled to the same benefits under this Indenture as definitive Bonds authenticated and delivered hereunder.

SECTION 2.09. Bonds Mutilated, Lost, Destroyed or Stolen. If any Bond shall become mutilated, the City, at the expense of the Owner of said Bond, shall execute, and the Trustee shall thereupon authenticate and deliver, a new Bond of like tenor in exchange and

substitution for the Bond so mutilated, but only upon surrender to the Trustee of the Bond so mutilated. Every mutilated Bond so surrendered to the Trustee shall be cancelled by it and delivered to, or upon the Order of, the City. If any Bond shall be lost, destroyed or stolen, evidence of such loss, destruction or theft may be submitted to the City and the Trustee and, if such evidence be satisfactory to both and indemnity satisfactory to them shall be given, the City, at the expense of the Owner, shall execute, and the Trustee shall thereupon authenticate and deliver, a new Bond of like tenor in lieu of and in substitution for the Bond so lost, destroyed or stolen (or if any such Bond shall have matured or shall have been called for redemption, instead of issuing a substitute Bond, the Trustee may pay the same without surrender thereof upon receipt of the aforementioned indemnity). The City may require payment of a sum not exceeding the actual cost of preparing each new Bond issued under this Section and of the expenses which may be incurred by the City and the Trustee in the premises. Any Bond issued under the provisions of this Section in lieu of any Bond alleged to be lost, destroyed or stolen shall constitute an original additional contractual obligation on the part of the City whether or not the Bond so alleged to be lost, destroyed or stolen be at any time enforceable by anyone, and shall be entitled to the benefits of this Indenture with all other Bonds secured by this Indenture. Neither the City nor the Trustee shall be required to treat both the original Bond and any replacement Bond as being Outstanding for the purpose of determining the principal amount of Bonds which may be issued hereunder or for the purpose of determining any percentage of Bonds Outstanding hereunder, but both the original and replacement Bond shall be treated as one and the same.

SECTION 2.10. Use of Depository.

(A) The Bonds shall be issued in fully registered form, in authorized denominations and shall be initially registered in the name of "Cede & Co.", as nominee of The Depository Trust Company (the "Securities Depository"), and shall be evidenced by one bond maturing on each of the maturity dates as set forth in the applicable Supplemental Indenture in a denomination corresponding to the total principal amount of the Bonds of such maturity. Each Bond may be assigned by the Trustee a distinctive number or letter or letter and number, and a record of the same shall be maintained by the Trustee.

Registered ownership of the Bonds, or any portions thereof, may not thereafter be transferred except:

(1) To any successor of The Depository Trust Company or its nominee, or to any substitute depository designated pursuant to clause (ii) of this subsection (A) (a "Substitute Depository"); provided that any successor of The Depository Trust Company or Substitute Depository shall be qualified under any applicable laws to provide the services proposed to be provided by it;

(2) To any Substitute Depository not objected to by the Trustee, upon (1) the resignation of The Depository Trust Company or its successor (or any Substitute Depository or its successor) from its functions as depository, or (2) a determination by the City that The Depository Trust Company or its successor (or any Substitute Depository or its successor) is no longer able to carry out its functions as depository; provided that any such Substitute Depository shall be

qualified under any applicable laws to provide the services proposed to be provided by it; or

(3) To any person as provided below, upon (1) the resignation of The Depository Trust Company or its successor (or Substitute Depository or its successor) from its functions as depository; provided, that no Substitute Depository which is not objected to by the Trustee can be obtained, or (2) a determination by the City that it is in the best interests of the City to remove The Depository Trust Company or its successor (or any Substitute Depository or its successor) from its function as depository.

(B) In the case of any transfer pursuant to clause (1) or clause (2) of subsection 2.10(A), upon receipt of all Outstanding Bonds by the Trustee, together with a Certificate of the City to the Trustee, a single new bond for each maturity shall be executed and delivered, registered in the name of such successor or such Substitute Depository, or their nominees, as the case may be, all as specified in such Certificate of the City. In the case of any transfer pursuant to clause (3) of subsection 2.10(A) hereof, upon receipt of all Outstanding Bonds by the Trustee together with a Certificate of the City to the Trustee, new bonds shall be executed and delivered in such denominations and registered in the names of such persons as are requested in such a Certificate of the City, subject to the limitations of Section 2.10 hereof; provided, the Trustee shall not be required to deliver such new bonds within a period less than 60 days from the date of receipt of such a Certificate of the City.

(C) In the case of partial redemption, cancellation or an advance refunding of any Bonds evidencing all or a portion of the principal maturing in a particular year, The Depository Trust Company shall make an appropriate notation on the Bonds indicating the date and amounts of such reduction in principal, in form acceptable to the Trustee.

(D) The City and the Trustee shall be entitled to treat the person in whose name any Bond is registered as the Owner thereof for all purposes hereof and any applicable laws, notwithstanding any notice to the contrary received by the Trustee or the City; and the City and the Trustee shall have no responsibility for transmitting payments to, communication with, notifying, or otherwise dealing with any beneficial owners of the Bonds. Neither the City nor the Trustee will have any responsibility or obligations, legal or otherwise, to the beneficial owners or to any other party including The Depository Trust Company or its successor (or Substitute Depository or its successor), except to the Owner of any Bond.

(E) So long as all Outstanding Bonds are registered in the name of "Cede & Co." or its registered assign, the City and the Trustee shall cooperate with "Cede & Co.," as sole registered Owner, and its registered assigns in effecting payment of the principal of and redemption premium, if any, and interest on the Bonds by arranging for payment in such manner that funds for such payments are properly identified and are made immediately available on the date they are due.

ARTICLE III

ISSUANCE OF BONDS

SECTION 3.01. Issuance of Bonds. The City may by Supplemental Indenture establish one or more Series of Bonds payable from Water Net Revenues and secured by the pledge made under this Indenture equally and ratably with Bonds previously issued, and the City may issue, and the Trustee may authenticate and deliver to the purchasers thereof, Bonds of any Series so established, in such principal amount as shall be determined by the City, but only, with respect to each Series of Bonds, upon compliance by the City with the provisions of Section 3.02 hereof (except the first Series of Bonds may be issued upon compliance by the City with the requirements of Section 3.02(a) and without further condition) and any additional requirements set forth in said Supplemental Indenture and subject to the following specific conditions, which are hereby made conditions precedent to the issuance of any such additional Series of Bonds:

(a) no Event of Default shall have occurred and then be continuing;

(b) the aggregate principal amount of Bonds issued hereunder shall not exceed any limitation imposed by law or otherwise;

(c) with respect to any additional Series of Bonds that are Participating Bonds, there shall be deposited in the Parity Reserve Fund, an amount of money so as to increase the amount on deposit therein to the Reserve Fund Requirement, and, with respect to any additional Series of Bonds which do not constitute Participating Bonds, there shall be deposited in the Series Reserve Fund, if any, for such Series of Bonds, an amount of money equal to the Reserve Fund Requirement for such Series of Bonds; and

(d) the City shall have placed on file with the Trustee a Certificate of the City certifying that the sum of: (1) the Water Net Revenues, plus (2) 90 percent (90%) of the amount by which the City projects Water Net Revenues for any period of twelve (12) consecutive months during the eighteen (18) months immediately preceding the date on which any additional Bonds or Parity Debt will become Outstanding would have been increased had increases in rates, fees and charges during such period of twelve (12) months been in effect throughout such period of twelve (12) months; plus (3) 75 percent (75%) of the amount by which the City projects Water Net Revenues will increase during the period of twelve (12) months commencing on the date of issuance of such additional Bonds or Parity Debt due to improvements to the Water System under construction (financed from any source) or to be financed with the proceeds of such additional Series of Bonds or Parity Debt, shall (4) have been at least equal to 1.20 times the amount of Debt Service due within the next consecutive twelve (12) month period on all Bonds and Parity Debt then outstanding and the additional Bonds or Parity Debt then proposed to be issued.

If additional assets or revenues are included within the definition of "Water Net Revenues" by a Supplemental Indenture, such additional assets or revenues shall be included in the calculations in subsection (d) above, as appropriate, as if such additional assets or revenues had always been included in Water Net Revenues.

SECTION 3.02. Proceedings for Issuance of Additional Series of Bonds. Whenever the City shall determine to issue a Series of Bonds pursuant to Section 3.01, the City shall authorize the execution of a Supplemental Indenture specifying the principal amount, and prescribing the form or forms of Bonds of such additional Series and providing the terms, conditions, distinctive designation, denominations, date, maturity date or dates, interest rate or rates (or the manner of determining the same), redemption provisions and place or places of payment of principal or Redemption Price, if any, of and interest on such Bonds, and any other provisions respecting the Bonds of such Series not inconsistent with the terms of this Indenture.

Each additional Series of Bonds shall constitute Participating Bonds unless the Supplemental Indenture authorizing such Series of Bonds provides that such Series of Bonds shall not be Participating Bonds and, if such Series of Bonds shall not be Participating Bonds, provides for the establishment of a Series Reserve Fund for such Series of Bonds, provides for the pledge of amounts on deposit in such Series Reserve Fund to the payment of such Series of Bonds secured thereby, and establishes the Reserve Fund Requirement for such Series Reserve Fund.

Before such additional Series of Bonds shall be issued and delivered, the City shall file the following documents with the Trustee (upon which documents the Trustee may conclusively rely in determining whether the conditions precedent to the issuance of such Series of Bonds have been satisfied):

(a) an executed copy of the Supplemental Indenture authorizing such Series;

(b) a Certificate of the City stating that no Event of Default has occurred and is then continuing;

(c) an Opinion of Bond Counsel to the effect that the execution of the Supplemental Indenture has been duly authorized by the City in accordance with this Indenture and that such Series, when duly executed by the City and authenticated and delivered by the Trustee, will be valid and binding limited obligations of the City; and

(d) the Certificate of the City required by Section 3.01(d).

SECTION 3.03. Issuance of Refunding Bonds. Notwithstanding any provisions herein, there shall be no limitation on the ability of the City to issue any Bonds at any time to refund any outstanding Bonds or Parity Debt issued pursuant hereto.

SECTION 3.04. Application of Proceeds. Proceeds of each Series of Bonds shall be applied as specified in the Supplemental Indenture pursuant to which such Series of Bonds is created.

SECTION 3.05. Limitations on the Issuance of Obligations. The City will not, so long as any of the Bonds are Outstanding, issue any obligations or securities, howsoever denominated, payable in whole or in part from Water Net Revenues, except the following:

(a) Bonds of any Series authorized pursuant to Sections 3.01 and 3.02;

(b) refunding Bonds authorized pursuant to Section 3.03;

(c) Parity Debt payable on a parity with the Bonds and which will have, when issued, an equal lien and charge upon the Water Net Revenues, provided that the following conditions to the issuance of such Parity Debt are satisfied:

(1) such Parity Debt has been duly and legally authorized for any lawful purpose;

(2) no Event of Default shall have occurred and then be continuing, as evidenced in a Certificate of the City filed with the Trustee;

(3) unless such Parity Debt is for the refunding purposes specified in Section 3.03, the City shall have obtained and placed on file with the Trustee a Certificate of the City that (on the basis of calculations as of the date of delivery of such Parity Debt) the requirements of Section 3.01(d) with respect to additional Bonds have been met with respect to such Parity Debt;

(4) the City shall have filed with the Trustee an opinion of counsel to the effect that such Parity Debt has been duly authorized in accordance with law and constitutes a valid and binding obligation of the City payable from Water Net Revenues on a parity with the Bonds; and

(5) the Trustee shall be designated as paying agent or trustee for such Parity Debt and the City shall deliver to the Trustee a transcript of the proceedings providing for the issuance of such Parity Debt (but the Trustee shall not be responsible for the validity or sufficiency of such proceedings or such Parity Debt); or

(d) Obligations which are junior and subordinate to the payment of the principal, premium, interest and reserve fund requirements for the Bonds and all Parity Debt and which subordinated obligations are payable as to principal, premium, interest and reserve fund requirements, if any, only out of Water Net Revenues, after the prior payment of all amounts then required to be paid hereunder from Water Net Revenues, for principal, premium, interest and reserve fund requirements for the Bonds and all Parity Debt, as the same become due and payable and at the times and in the manner as required in this Indenture.

ARTICLE IV

REDEMPTION OF BONDS

SECTION 4.01. Terms of Redemption. Each Series of Bonds may be made subject to redemption or mandatory or optional tender and purchase prior to their respective stated maturities, as a whole or in part, at such time or times, upon such terms and conditions and upon such notice and with such effect as may be provided in the Supplemental Indenture creating such Series of Bonds.

Unless otherwise specified in a Supplemental Indenture, each notice of redemption shall be mailed by the Trustee, not less than thirty (30) nor more than sixty (60) days prior to the redemption date, to each Owner and the Securities Depository. Notice of redemption to the Securities Depository shall be given by certified, registered or overnight mail or by such other method as may be requested by the Securities Depository. Each notice of redemption shall state the date of such notice, the date of issue of the Bonds to which such notice relates, the redemption date, the Redemption Price, the place or places of redemption (including the name and appropriate address or addresses of the Trustee), the CUSIP number (if any) of the maturity or maturities, and, if less than all of any such maturity, the distinctive certificate numbers of the Bonds of such maturity to be redeemed and, in the case of Bonds to be redeemed in part only, the respective portions of the principal amount thereof to be redeemed. Each such notice shall also state that on said date there will become due and payable on each of said Bonds the Redemption Price thereof or of said specified portion of the principal amount thereof in the case of a Bond to be redeemed in part only, together with interest accrued thereon to the date fixed for redemption, and that from and after such redemption date interest thereon shall cease to accrue, and shall require that such Bonds be then surrendered at the address or addresses of the Trustee specified in the redemption notice. Neither the City nor the Trustee shall have any responsibility for any defect in the CUSIP number that appears on any Bond or in any redemption notice with respect thereto, and any such redemption notice may contain a statement to the effect that CUSIP numbers have been assigned by an independent service for convenience of reference and that neither the City nor the Trustee shall be liable for any inaccuracy in such numbers. Failure by the Trustee to give notice to any Securities Depository or failure of any Owner to receive notice or any defect in any such notice shall not affect the sufficiency of the proceedings for redemption.

Unless otherwise specified in a Supplemental Indenture, the City shall have the right to rescind any notice of redemption by written notice to the Trustee on or prior to the dated fixed for such redemption. Any notice of optional redemption shall be cancelled and annulled if for any reason funds will not be or are not available on the date fixed for redemption for the payment in full of the applicable Bonds then called for redemption, and such cancellation will not constitute an Event of Default. The City and the Trustee shall have no liability to the Owners or any other party related to or arising from such rescission of notice of redemption. The Trustee shall provide notice of rescission of redemption in the same manner as the original notice of redemption was provided.

ARTICLE V

WATER NET REVENUES

SECTION 5.01. Pledge of Water Net Revenues; Water Revenue Fund.

(A) The Bonds are revenue obligations of the City and are payable as to both principal and interest, and any premium upon redemption thereof, exclusively from Water Net Revenues and from the other funds pledged hereunder. All Water Net Revenues are hereby pledged to secure the payment of the principal of and redemption premium, if any, and interest on the Bonds and any Parity Debt in accordance with their terms, subject only to the provisions of this Indenture permitting the application thereof for the purposes and on the terms and conditions set forth herein. There are hereby pledged to secure the payment of the principal of

and redemption premium, if any, and interest on the Bonds in accordance with their terms all amounts (including proceeds of the Bonds) held by the Trustee hereunder (except for amounts held in the Rebate Fund), subject only to the provisions of this Indenture permitting the application thereof for the purposes and on the terms and conditions set forth herein. Such pledge shall constitute a first lien on the Water Net Revenues and amounts in such funds and shall be valid and binding from and after delivery by the Trustee of the Bonds or Parity Debt, without any physical delivery thereof or further act.

The Water Net Revenues are hereby pledged to the payment of Bonds and Parity Debt without priority or distinction of one over the other and the Water Net Revenues constitute a trust fund for the security and payment of the Bonds and Parity Debt; but nevertheless out of Water Net Revenues, certain amounts may be applied for other purposes as provided herein.

Out of Water Net Revenues, there shall be applied as hereinafter set forth all sums required for the payment of the principal of (including any premium thereon) and interest on the Bonds and all Parity Debt, together with any mandatory sinking fund payments of Bonds and Parity Debt and reserve fund requirements with respect thereto. All remaining Water Net Revenues, after making the foregoing allocation, shall be available to the City for all lawful City purposes. The pledge of Water Net Revenues herein made shall be irrevocable until all of the Bonds and all Parity Debt are no longer outstanding.

(B) As long as any Bonds are Outstanding or any Parity Debt remains unpaid, the City shall forthwith deposit in a fund, designated as the "Water Revenue Fund," which fund the City shall establish and maintain, all Water Net Revenues when and as received by the City. Unless otherwise provided herein or in any Supplemental Indenture, investment income on amounts held by the City hereunder (other than amounts held in the Rebate Fund or for which particular instructions are provided in a Supplemental Indenture) shall also be deposited in the Water Revenue Fund. All moneys at any time held in the Water Revenue Fund shall be held in trust for the benefit of the Owners of the Bonds and Parity Debt and shall be disbursed, allocated and applied solely for the uses and purposes set forth herein.

SECTION 5.02. Payments Into Other Funds.

As soon as practicable in each month after the deposit of Water Net Revenues into the Water Revenue Fund, but in any case no later than the last Business Day of such month, the City shall withdraw from the Water Revenue Fund and pay to the Trustee for deposit in the following funds and accounts, in the following order, the amounts set forth below:

(a) in the Debt Service Fund established pursuant to Section 5.03 hereof, the amount, if any, required so that the balance in said fund, including any subaccounts therein, to the extent moneys in such subaccounts are available to pay Accrued Aggregate Debt Service as of the last day of the then current month, shall equal the Accrued Aggregate Debt Service as of the last day of the then current month; provided, that for purposes of this paragraph (a), the calculation of Debt Service with respect to the definition of Accrued Aggregate Debt Service shall be made without regard to an election by the City to include any Subsidy Payment in Water Revenues or to exclude any

Subsidy Payment from Water Revenues and without regard to paragraph (i) of the definition of Debt Service; and

(b) in the Parity Reserve Fund established pursuant to Section 5.04 hereof and in each Series Reserve Fund established pursuant to a Supplemental Indenture the amount, if any, required so that the amount credited to such Parity Reserve Fund and each such Series Reserve Fund shall, except as otherwise provided in Section 5.04(A), be at least equal to the respective Reserve Fund Requirement as of the last day of the then current month; provided, that the deposits to the Parity Reserve Fund and each Series Reserve Fund shall be made without preference or priority between such deposits and in the event of any deficiency in Water Net Revenues to make the deposits required by this paragraph (b), such Water Net Revenues shall be deposited into the Parity Reserve Fund and each Series Reserve Fund ratably based on the amount required to be deposited in each such fund, without discrimination or preference;

provided, that on a parity with such deposits, the City shall set aside or transfer amounts to the appropriate accounts with respect to outstanding Parity Debt as provided in the proceedings for such Parity Debt (which shall be proportionate in the event such amounts are insufficient to provide for all deposits required as of any date to be made with respect to the Bonds and such Parity Debt).

SECTION 5.03. Debt Service Fund.

(A) The Trustee shall establish and maintain and hold in trust so long as any Bonds remain Outstanding, a special fund designated as the "Debt Service Fund." The Trustee shall pay out of the Debt Service Fund: (i) on or before each interest payment date for any Outstanding Bonds, the amount required for the interest payable on such date; (ii) on or before each principal payment date or redemption date, the amount required for the Bond Obligation payable on such due date (including any mandatory sinking fund payment to be paid on such date); and (iii) on or before any redemption date for Outstanding Bonds, the amount required for the payment of interest on such Bonds then to be redeemed. Such amounts shall be applied for such purposes by the Trustee on the due date thereof. The Trustee shall also pay out of the Debt Service Fund the accrued interest included in the purchase price of any Bonds, the Debt Service of which may be paid from the moneys in such fund, purchased for retirement, without regard to an election by the City to include any Subsidy Payment in Water Revenues or to exclude any Subsidy Payment from Water Revenues.

(B) On or prior to the forty-fifth (45th) day preceding the due date of each mandatory sinking fund payment, any amounts then on deposit in the Debt Service Fund with respect to any mandatory sinking fund payment (exclusive of amounts, if any, set aside in said fund which were deposited therein from the proceeds of Bonds, but inclusive of amounts accumulated therein with respect to interest on the Bonds for which such mandatory sinking fund payment is to be paid) may, and if so directed by the City shall, be applied by the Trustee to the purchase of Bonds of the Series and maturity for which such mandatory sinking fund payment was established in an amount not exceeding that necessary to complete the retirement of the unsatisfied balance of such mandatory sinking fund payment. All purchases of any Bonds pursuant to this subsection (B) shall be made at prices not exceeding the applicable

sinking fund Redemption Price of such Bonds plus accrued interest, and such purchases shall be made by the Trustee as directed by the City. If directed by the City, on or prior to the forty-fifth (45th) day next preceding a mandatory sinking fund payment due date, there shall be applied as a credit against such mandatory sinking fund payment, and there shall be deemed to constitute part of the Debt Service Fund until such mandatory sinking fund payment due date, for the purpose of calculating the amount on deposit in such fund, the applicable sinking fund Redemption Price (or principal amount of maturing Bonds) of any Bonds of the Series and maturity for which such mandatory sinking fund payment was established, that were cancelled or delivered to the Trustee for cancellation on or prior to the forty-fifth (45th) day next preceding such mandatory sinking fund payment due date and that was not previously applied as a credit against a mandatory sinking fund payment, including any Bonds purchased pursuant to this subsection (B) and as to which the City has properly claimed a credit against the next mandatory sinking fund payment. As soon as practicable after the forty-fifth (45th) day preceding the due date of any such mandatory sinking fund payment, the Trustee shall proceed to call for redemption on such date, Bonds of the Series and maturity for which such mandatory sinking fund payment was established (except in the case of Bonds maturing on a mandatory sinking fund payment due date). The Trustee shall pay out of the Debt Service Fund, on or before such redemption date (or maturity date), the amount required for the redemption of the Bonds so called for redemption (or for the payment of such Bonds then maturing), and such amounts shall be applied to such redemption (or payment).

(C) The amount, if any, deposited in the Debt Service Fund, including any subaccount, from the proceeds of each Series of Bonds shall be set aside in such fund and applied to the payment of interest on Bonds as provided in the Supplemental Indenture relating to the issuance of such Series of Bonds and shall be deemed available to pay Accrued Aggregate Debt Service only to the extent so provided without regard to an election by the City to include any Subsidy Payment in Water Revenues or to exclude any Subsidy Payment from Water Revenues.

(D) If one or more Bonds are refunded, the Trustee may, upon the direction of the City, with the advice of Bond Counsel, withdraw from the Debt Service Fund amounts accumulated therein with respect to Debt Service (without regard to an election by the City to include any Subsidy Payment in Water Revenues or to exclude any Subsidy Payment from Water Revenues) on the Bonds being refunded and deposit such amounts as directed by the City, to be held for the payment of the principal or Redemption Price, if applicable, or interest on the Bonds being refunded; provided that such withdrawal shall not be made unless (a) immediately thereafter the Bonds being refunded shall be deemed to have been paid pursuant to Article X hereof, and (b) the amount remaining in the Debt Service Fund after such withdrawal shall not be less than the requirement of such fund pursuant to Section 5.02 hereof.

(E) Any provisions of this Indenture to the contrary notwithstanding, so long as there shall be held in the Debt Service Fund an amount sufficient to pay in full all Outstanding Bonds in accordance with their terms (including principal or Redemption Price, if applicable, and interest thereon), no deposits shall be required to be made into the Debt Service Fund.

SECTION 5.04. Parity Reserve Fund; Series Reserve Funds.

(A) The Trustee shall establish and maintain and hold in trust so long as Participating Bonds remain Outstanding, a special fund designated as the "Parity Reserve Fund." Amounts on deposit in the Parity Reserve Fund are hereby pledged to the payment of the Participating Bonds and shall be applied only for such purposes as hereinafter permitted. In accordance with Section 3.02 and as provided in any Supplemental Indenture for a Series of Bonds which are not Participating Bonds, the Trustee shall establish and maintain and hold in trust so long as such Series of Bonds which are not Participating Bonds remains outstanding, a Series Reserve Fund for such Series of Bonds that are not Participating Bonds. In accordance with Section 3.02 and pursuant to the Supplemental Indenture for any Series of Bonds which are not Participating Bonds, amounts on deposit (if any) in each such Series Reserve Fund shall be pledged to the payment of the applicable Series of Bonds which are not Participating Bonds to be secured thereby and shall be applied only for such purposes as hereinafter permitted. The Trustee shall deposit in the Parity Reserve Fund and in each Series Reserve Fund, the amounts required to be deposited therein pursuant to Section 3.01(c) and such other amounts transferred to the Trustee by the City for deposit therein pursuant to Section 5.02(b). No deposit need be made in the Parity Reserve Fund or any Series Reserve Fund so long as there shall be on deposit therein a sum equal to the respective Reserve Fund Requirement. Whenever the amount on deposit in the Parity Reserve Fund or any Series Reserve Fund is less than the applicable Reserve Fund Requirement, such amount shall be increased to the applicable Reserve Fund Requirement as provided for in this clause (A) not later than twelve months thereafter.

(B) If on the last Business Day of any month, the amount on deposit in the Debt Service Fund shall be less than the amount required to be in such Debt Service Fund pursuant to Section 5.02(a) with respect to Participating Bonds, the Trustee shall apply amounts from the Parity Reserve Fund to the extent necessary to make good the deficiency with respect to the Participating Bonds; and if on the last Business Day of any month, the amount on deposit in the Debt Service Fund shall be less than the amount required to be in such Debt Service Fund pursuant to Section 5.02(a) with respect to any Series of Bonds for which a Series Reserve Fund has been established, the Trustee shall apply amounts (if any) from the applicable Series Reserve Fund to the extent necessary to make good the deficiency with respect to the Series of Bonds secured by such Series Reserve Fund.

(C) Whenever the amount in the Parity Reserve Fund, together with the amount in the Debt Service Fund available for such purpose, is sufficient to pay in full all Outstanding Participating Bonds in accordance with their terms (including principal or applicable mandatory sinking fund payments and interest thereon), the funds on deposit in the Parity Reserve Fund shall be transferred to the Debt Service Fund and applied ratably to the payment or redemption of the Participating Bonds. Whenever the amount in the Series Reserve Fund, together with the amount in the Debt Service Fund available for such purpose, is sufficient to pay in full all of the Outstanding future Series of Bonds secured by such Series Reserve Fund in accordance with their terms (including principal or applicable mandatory sinking fund payments and interest thereon), the funds on deposit in the applicable Series Reserve Fund shall be transferred to the Debt Service Fund and applied to the payment or redemption of the Series of Bonds secured by such Series Reserve Fund.

(D) If any Participating Bonds are refunded, the Trustee may, upon the direction of the City with the advice of Bond Counsel, withdraw from the Parity Reserve Fund any amounts on deposit therein and deposit such amounts as directed by the City, to be held for the payment of the principal or Redemption Price, if applicable, or interest on the Participating Bonds being refunded; provided, that such withdrawal shall not be made unless (a) immediately thereafter any Participating Bonds being refunded shall be deemed to have been paid pursuant to Article X hereof, and (b) the amount remaining in the Parity Reserve Fund after such withdrawal, taking into account any deposits to be made in the Parity Reserve Fund in connection with such refunding, shall not be less than the Reserve Fund Requirement with respect to the Parity Reserve Fund. If all or any portion of any Series of Bonds secured by a Series Reserve Fund are refunded, the Trustee may, upon the direction of the City with the advice of Bond Counsel, withdraw from such Series Reserve Fund any amounts on deposit therein and deposit such amounts as directed by the City, to be held for the payment of the principal or Redemption Price, if applicable, or interest on such Series of Bonds secured by such Series Reserve Fund or portion thereof being refunded; provided, that such withdrawal shall not be made unless (a) immediately thereafter such Series of Bonds or portion thereof being refunded shall be deemed to have been paid pursuant to Article X hereof, and (b) the amount remaining in the Series Reserve Fund after such withdrawal shall not be less than the Reserve Fund Requirement with respect to such Series Reserve Fund.

(E) Except as otherwise provided in a Supplemental Indenture, amounts on deposit in the Parity Reserve Fund or any Series Reserve Fund in excess of the respective Reserve Fund Requirement shall, at the Written Request of the City, be withdrawn from the Parity Reserve Fund or Series Reserve Fund, as applicable, and transferred to the City and applied as permitted by Bond Counsel.

(F) The City may provide for all or any part of the Reserve Fund Requirement for the Parity Reserve Fund or any Series Reserve Fund by delivering to the Trustee an irrevocable letter of credit issued by a financial institution having unsecured debt obligations rated in one of the two highest Rating Categories of Moody's, Fitch or Standard & Poor's at the time such letter of credit is issued, securing an amount, together with moneys, Investment Securities or surety bonds or insurance policies (as described in paragraph (G) below) on deposit in the Parity Reserve Fund or such Series Reserve Fund, equal to the applicable Reserve Fund Requirement. Such letter of credit shall have an original term of no less than three (3) years or, if less, the final maturity of the Participating Bonds or the Series of Bonds secured thereby, as applicable, and such letter of credit shall provide by its terms that it may be drawn upon as provided herein. At least one year prior to the stated expiration of such letter of credit, the City shall either (i) deliver a replacement letter of credit, (ii) deliver an extension of the letter of credit for at least an additional year or, if less, the maturity of the Participating Bonds or the Series of Bonds secured thereby, as applicable, or (iii) deliver to the Trustee a surety bond or an insurance policy satisfying the requirements of paragraph (G) below. Upon delivery of such replacement letter of credit, extended letter of credit, or surety bond or insurance policy, the Trustee shall deliver the then-effective letter of credit to or upon the order of the City. If the City shall fail to deposit a replacement letter of credit, extended letter of credit, surety bond or insurance policy with the Trustee, the City shall immediately commence to make monthly deposits with the Trustee so that an amount equal to the Reserve Fund Requirement will be on deposit in the Parity Reserve Fund or Series Reserve Fund, as applicable, no later than the

stated expiration date of the letter of credit. If an amount equal to the Reserve Fund Requirement, as of the date following the expiration of the letter of credit, is not on deposit in the Parity Reserve Fund or Series Reserve Fund, as applicable, at the earlier of one week prior to the stated expiration date of the letter of credit or the debt service payment date (excluding from such determination the letter of credit), the Trustee shall draw on the letter of credit to fund the amount of any such deficiency in the Parity Reserve Fund or Series Reserve Fund, as applicable.

(G) The City may also provide for all or any part of the Parity Reserve Fund or any Series Reserve Fund by delivering to the Trustee a surety bond or an insurance policy securing an amount, together with moneys, Investment Securities or letters of credit on deposit in the Parity Reserve Fund or such Series Reserve Fund, as applicable, equal to the applicable Reserve Fund Requirement. Such surety bond or insurance policy shall be issued by an insurance company whose unsecured debt obligations (or obligations secured by such insurance company's insurance policies) are rated in one of the two highest Rating Categories of Moody's, Fitch or Standard & Poor's at the time such surety bond or insurance policy is issued. Such surety bond or insurance policy shall have a term of no less than the final maturity of the Participating Bonds or the Series of Bonds secured thereby, as applicable. If such surety bond or insurance policy for any reason lapses or expires, the City shall immediately implement (i) or (iii) of paragraph (F) above or make the required deposits to the Parity Reserve Fund or Series Reserve Fund, as applicable.

(H) The Trustee shall ascertain the necessity for a draw or claim upon any letter of credit, surety bond or insurance policy provided hereby and shall take such action as is necessary in accordance with the terms thereof to received payments with respect thereto (including the giving of notice as required thereunder) on any date on which moneys will be required to be withdrawn from the Parity Reserve Fund or a Series Reserve Fund, as applicable, and applied to the payment of the principal of or interest on any Participating Bonds or Series of Bonds secured by such Parity Reserve Fund or Series Reserve Fund and such withdrawal cannot be met by amounts on deposit in the Parity Reserve Fund or Series Reserve Fund, as applicable. If a disbursement is made pursuant to letter of credit, surety bond or insurance policy credited to the Parity Reserve Fund or any Series Reserve Fund, the City shall be obligated either (i) to reinstate the full amount of such letter of credit, surety bond or insurance policy or (ii) to deposit into the Parity Reserve Fund or Series Reserve Fund, as applicable, funds in the amount of such disbursement or a combination of such alternatives, as shall provide that the amount in the Parity Reserve Fund or such Series Reserve Fund, as applicable, is at least equal to the applicable Reserve Fund Requirement. So long as a letter of credit, surety bond or insurance policy shall be in full force and effect for purposes of funding all or any part of the Parity Reserve Fund or any Series Reserve Fund, as applicable, any deposits required to be made in the Parity Reserve Fund or a Series Reserve Fund pursuant to Section 5.02(b) shall include any amounts due to the provider of the letter of credit, surety bond or insurance policy resulting from a draw or claim upon such letter of credit, surety bond or insurance policy (which amounts shall constitute a deficiency in the Reserve Fund Requirement for purposes of said Section 5.02(b)). Any such amounts shall be paid to the provider of such letter of credit, surety bond or insurance policy as provided therein or in any related agreement.

SECTION 5.05. Investment of Moneys in Funds and Accounts. All moneys in any of the funds, accounts and subaccounts held by the Trustee and established pursuant to this Indenture shall be invested, as directed by the City, solely in Investment Securities. All Investment Securities shall, as directed by the City in writing or by telephone, promptly confirmed in writing, be acquired subject to the limitations as to maturities hereinafter in this Section set forth and such additional limitations or requirements consistent with the foregoing as may be established by Request of the City. The Trustee may conclusively rely upon any investment direction from the City as a certification to the Trustee that such investment constitutes an Investment Security. If and to the extent the Trustee does not receive investment instructions from the City with respect to the moneys in the funds and accounts held by the Trustee pursuant to this Indenture, such moneys shall be invested in Investment Securities described in clause (xi) of the definition thereof and the Trustee shall thereupon request investment instructions from the City for such moneys.

Unless otherwise provided herein or in a Supplemental Indenture, all interest, profits and other income received from the investment of moneys in any fund or account, other than the Rebate Fund, shall be transferred to the Water Revenue Fund when received. All interest, profits and other income received from the investment of moneys in the Rebate Fund shall be deposited in the Rebate Fund, except as provided in Section 6.07 and any applicable Supplemental Indenture. Notwithstanding anything to the contrary contained herein, an amount of interest received with respect to any Investment Security equal to the amount of accrued interest, if any, paid as part of the purchase price of such Investment Security shall be credited to the fund or account from which such accrued interest was paid.

The Trustee may commingle any of the funds or accounts established pursuant to this Indenture into a separate fund or funds for investment purposes only, provided that all funds or accounts held by the Trustee hereunder shall be accounted for separately as required by this Indenture. The Trustee may act as principal or agent in the making or disposing of any investment and, with the prior written consent of the City, may impose its customary charge therefor. The Trustee may sell or present for redemption, any Investment Securities so purchased whenever it shall be necessary to provide moneys to meet any required payment, transfer, withdrawal or disbursement from the fund or account to which such Investment Security is credited, and the Trustee shall not be liable or responsible for any loss resulting from such investment.

The City may and the Trustee shall, upon the Request of the City, and provided that the Trustee is supplied with an Opinion of Bond Counsel to the effect that such action is permitted under the laws of the State of California, enter into an interest rate swap agreement corresponding to the interest rate or rates payable on a Series of Bonds or any portion thereof and the amounts received by the City or the Trustee, if any, pursuant to such a swap agreement may be applied to the deposits required hereunder; in which case, the entity with which the City or the Trustee may contract for an interest rate swap is limited to entities the debt securities of which are rated in their respective highest short-term debt Rating Categories by Moody's, Fitch or Standard & Poor's. If the City so designates, amounts payable under the interest rate swap agreement (other than termination payments due thereunder which shall be made expressly subordinate to the payment of the Bonds) shall be secured by Water Net Revenues on a parity basis with the Bonds and any Parity Debt and, in such event, the City shall pay to the Trustee for

deposit in the Debt Service Fund, at the times and in the manner provided by Section 5.02, the amounts to be paid under such interest rate swap agreement, as if such amounts were additional interest due on the Bonds to which such interest rate swap agreement relates, and the Trustee shall pay to the other party to the interest rate swap agreement, to the extent required thereunder, amounts deposited in the Debt Service Fund for the payment of interest on the Bonds with respect to which such agreement was entered.

The Trustee and the City shall each keep proper books of record and accounts containing complete and correct entries of all transactions made by it relating to the receipt, investment, disbursement, allocation and application of the moneys related to the Bonds, including moneys derived from, pledged to, or to be used to make payments on the Bonds. Such records shall specify the account or fund to which each investment (or portion thereof) is to be allocated and shall set forth, in the case of each investment security, (a) its purchase price, (b) identifying information, including par amount, coupon rate, and payment dates, (c) the amount received at maturity or its sale price, as the case may be, including accrued interest, (d) the amounts and dates of any payments made with respect thereto, and (e) the dates of acquisition and disposition or maturity.

ARTICLE VI

COVENANTS

SECTION 6.01. Punctual Payment. The City will punctually pay or cause to be paid the principal or Redemption Price of and interest on all the Bonds, in strict conformity with the terms of the Bonds and of this Indenture, according to the true intent and meaning thereof, and shall punctually pay or cause to be paid all mandatory sinking fund payments, but in each case only out of Water Net Revenues, as provided in this Indenture.

SECTION 6.02. Extension of Payment of Bonds. The City will not directly or indirectly extend or assent to the extension of the maturity of any of the Bonds or the time of payment of any Bonds or claims for interest of such Bonds or claims for interest and in case the maturity of any of the Bonds or the time of payment of any such claims for interest shall be extended, such Bonds or claims for interest shall not be entitled, in case of any default hereunder, to the benefits of this Indenture, except subject to the prior payment in full of the principal of all of the Bonds then Outstanding and of all claims for interest thereon which shall not have been so extended. Nothing in this Section shall be deemed to limit the right of the City to issue Bonds for the purpose of refunding any Outstanding Bonds, and such issuance shall not be deemed to constitute an extension of maturity of Bonds.

SECTION 6.03. Waiver of Laws. The City will not at any time insist upon or plead in any manner whatsoever, or claim or take the benefit or advantage of, any stay or extension law now or at any time hereafter in force that may affect the covenants and agreements contained in this Indenture or in the Bonds, and all benefit or advantage of any such law or laws is hereby expressly waived by the City to the extent permitted by law.

SECTION 6.04. Further Assurances. The City will make, execute and deliver any and all such instruments and assurances as may be reasonably necessary or proper to carry out

the intention or to facilitate the performance of this Indenture and for the better assuring and confirming unto the Owners of the Bonds of the rights and benefits provided in this Indenture.

SECTION 6.05. Against Encumbrances. The City will not create any pledge, lien or charge upon any of the Water Net Revenues, having priority over the lien of the Bonds. The City will pay or cause to be paid when due all sums of money that may become due or purporting to be due for any labor, services, materials, supplies or equipment furnished, or alleged to have been furnished, to or for the City in, upon, about or relating to the Water System and will keep the Water System free of any and all liens against any portion of the Water System. If any such lien attaches to or is filed against any portion of the Water System, the City will cause each such lien to be fully discharged and released at the time the performance of any obligation secured by any such lien matures or becomes due, except that if the City desires to contest any such lien it may do so if contesting such lien will not materially impair operation of the Water System. If any such lien shall be reduced to final judgment and such judgment or any process as may be issued for the enforcement thereof is not promptly stayed, or if so stayed and such stay thereafter expires, the City will forthwith pay or cause to be paid and discharged such judgment.

SECTION 6.06. Accounting Records and Financial Statements.

(A) The City will at all times keep, or cause to be kept, proper books of record and account, prepared in accordance with Generally Accepted Accounting Principles Applicable to Governments, in which complete and accurate entries shall be made of all calculations relating to Water Net Revenues. Such books of record and account shall be available for inspection by the Trustee (who shall have no duty to inspect) or the Owners at reasonable hours and under reasonable circumstances.

(B) The City will furnish the Trustee, within one hundred and eighty (180) days after the end of each Fiscal Year, the financial statements of the City's Water and Electric Utility Enterprise Funds for such Fiscal Year, together with the report and opinion of an independent certified public accountant stating that the financial statements have been prepared in accordance with Generally Accepted Accounting Principles Applicable to Governments and that such accountant's examination of the financial statements was performed in accordance with generally accepted auditing standards and a Certificate of the Treasurer of the City stating that no event which constitutes an Event of Default or which with the giving of notice or the passage of time or both would constitute an Event of Default has occurred and is continuing as of the end of such Fiscal Year, or specifying the nature of such event and the actions taken and proposed to be taken by the City to cure such default. Thereafter, a copy of such financial statements will be furnished to any Owner of Bonds upon written request to the City. The Trustee shall have no duty to review such financial statements.

(C) The City shall furnish to the Trustee within thirty (30) days after approval thereof, the annual budget of the City for the Water System.

SECTION 6.07. Rebate Fund. The Trustee shall establish and maintain, so long as any Bonds remain Outstanding, a fund separate from any other fund established and maintained hereunder designated as the "Rebate Fund" (the "Rebate Fund"). All amounts at any time on

deposit in the Rebate Fund shall be held by the Trustee to the extent required to satisfy the requirement to make rebate payments to the United States (the "Rebate Requirement") pursuant to Section 148 of the Code and the Treasury Regulations promulgated thereunder (the "Treasury Regulations"). Such amounts shall be free and clear of any lien under this Indenture and shall be governed by this Section and Section 6.08 of this Indenture, any applicable Supplemental Indenture and by the Tax Certificate for the applicable Series of Bonds, if any. The provisions relating to the Rebate Fund for a Series of Bonds shall be set forth in the related Supplemental Indenture.

SECTION 6.08. Tax Covenants. The City covenants that it will not take any action, or fail to take any action, if any such action or failure to take action would adversely affect the exclusion from gross income of the interest on the Bonds under Section 103 of the Code; provided that, prior to the issuance of any Series of Bonds, the City may exclude the application of the covenants contained in this Section 6.08 to such Series of Bonds.

SECTION 6.09. Rates and Charges. The City hereby covenants that it shall prescribe, revise and collect such charges for the services, facilities and water furnished by the Water System which, after making allowances for contingencies and error in the estimates, shall provide Water Net Revenues at least sufficient to pay the following amounts in the order set forth:

(a) The interest on, and principal and Redemption Price of, the outstanding Bonds and any Parity Debt as the same shall become due and payable;

(b) All payments required for compliance with this Indenture, including payments required to be made into any bond reserve fund; and

(c) All payments required to meet any other obligations of the City which are charges, liens, encumbrances upon or payable from the Water Net Revenues;

and the charges shall be fixed so that in each Fiscal Year the Water Net Revenues shall be at least equal to 1.20 times the amount of the Annual Debt Service.

SECTION 6.10. Maintenance and Operation of System; Insurance. The City will maintain and preserve the Water System in good repair and working order at all times, and will operate the Water System in an efficient and economical manner. Subject in each case to the condition that insurance is obtainable at rates deemed reasonable by the City and upon terms and conditions deemed reasonable by the City, the City will procure and maintain at all times: (a) insurance on the Water System against such risks as and in such amounts as the City deems prudent taking into account insurance coverage for similar utilities, and (b) public liability insurance, including self-insurance, as appropriate, in such amounts as the City deems prudent taking into account insurance coverage for similar utilities.

SECTION 6.11. Sale of Water System. The Water System shall not be sold or leased or otherwise disposed of as a whole, or substantially as a whole, unless such sale, lease or other disposition be so arranged as to provide for a continuance of timely payments sufficient in amount to permit payment therefrom of the principal of and interest on, and premiums, if any, due upon the redemption of, all Bonds and Parity Debt payable out of Water Net Revenues, or to

provide for such payments into some other fund charged with such payments. None of the works, plant, properties, facilities or other part of the Water System or any real or personal property comprising a part of the Water System will be sold, leased or otherwise disposed of if such sale, lease or disposition would cause the City to be unable to satisfy the requirements of Section 6.09 hereof.

SECTION 6.12. Continuing Disclosure Agreement. The City will comply with and carry out all of its obligations under any Continuing Disclosure Agreement executed in connection with a Series of Bonds. Upon the failure of the City to comply with the Continuing Disclosure Agreement relating to any Series of Bonds, the Trustee (at the written request of any Participating Underwriter (as defined in the Continuing Disclosure Agreement) or the Owners of at least 25% in aggregate Bond Obligation of the related Series of Bonds, shall, but only to the extent indemnified to its satisfaction from any liability or expense, including, without limitation, fees and expenses of its attorneys) or any Owner or Beneficial Owner may take such actions as may be necessary and appropriate, including seeking mandate or specific performance by court order, to cause the City, to comply with its obligations under this section. For purposes of this section, "Beneficial Owner" shall have the meaning prescribed thereto in the respective Continuing Disclosure Agreement relating to such Series of Bonds.

ARTICLE VII

EVENTS OF DEFAULT AND REMEDIES OF OWNERS

SECTION 7.01. Events of Default. The following events shall be Events of Default:

(a) default in the due and punctual payment of the principal or Redemption Price of any Bond when and as the same shall become due and payable, whether at maturity as therein expressed, by proceedings for redemption, by declaration or otherwise in the amounts and at the times provided therefor;

(b) default in the due and punctual payment of any installment of interest on any Bond when and as such interest installment shall become due and payable;

(c) failure by the City to observe or perform any covenant, condition, agreement or provision in this Indenture on its part to be observed or performed, other than as referred to in subsection (a) or (b) of this Section, for a period of thirty (30) days after written notice, specifying such failure and requesting that it be remedied, has been given to the City by the Trustee; except that, if such failure can be remedied but not within such thirty (30) day period and if the City has taken all action reasonably possible to remedy such failure within such thirty (30) day period, such failure shall not become an Event of Default for so long as the City shall diligently proceed to remedy the same in accordance with and subject to any directions or limitations of time established by the Trustee;

(d) default by the City under any agreement governing any Parity Debt and the continuance of such default beyond the therein stated grace period, if any, with respect to such default;

(e) the filing by the City of a petition in voluntary bankruptcy for the composition of its affairs or for its corporate reorganization under any state or federal bankruptcy or insolvency law, or an assignment by the City for the benefit of creditors, or the admission by the City in writing to its insolvency or inability to pay debts as they mature, or the consent by the City in writing to the appointment of a trustee or receiver for itself;

(f) the entering by a court of competent jurisdiction of an order, judgment or decree declaring the City insolvent, or adjudging it bankrupt, or appointing a trustee or receiver of the City, or approving a petition filed against the City seeking reorganization of the City under any applicable law or statute of the United States of America or any state thereof, and such order, judgment or decree shall not be vacated or set aside or stayed within sixty (60) days from the date of the entry thereof; or

(g) the assumption, under the provisions of any other law for the relief or aid of debtors, by any court of competent jurisdiction of custody or control of the City or of the Water Net Revenues and such custody or control shall not be terminated within sixty (60) days from the date of assumption of such custody or control.

SECTION 7.02. Application of Water Net Revenues and Other Funds After Default; Acceleration. If an Event of Default shall occur and be continuing, the City shall immediately transfer to the Trustee all Water Net Revenues held by it and received thereafter and the Trustee shall apply all Water Net Revenues and any other funds then held or thereafter received by the Trustee under any of the provisions of this Indenture (except as otherwise provided in this Indenture) as follows and in the following order:

(1) To the payment of any expenses necessary in the opinion of the Trustee to protect the interests of the Owners of the Bonds and Parity Debt, including the costs and expenses of the Trustee and the Owners in declaring such Event of Default, and payment of reasonable fees and expenses of the Trustee (including reasonable fees and disbursements of its counsel and other agents) incurred in and about the performance of its powers and duties under this Indenture; and

(2) To the payment of the whole amount of Bond Obligation then due on the Bonds and Parity Debt (upon presentation of the Bonds and Parity Debt to be paid, and stamping thereon of the payment if only partially paid, or surrender thereof if fully paid) subject to the provisions of this Indenture, with interest on such Bond Obligation at the rate or rates of interest borne by the respective Bonds and Parity Debt, to the payment to the persons entitled thereto of all installments of interest then due and the unpaid principal or Redemption Price of any Bonds and Parity Debt which shall have become due, whether at maturity or by call for redemption, in the order of their due dates, with interest on the overdue Bond Obligation and Parity Debt at the rate borne by the respective Bonds and Parity Debt, and, if the amount available shall not be sufficient to pay in full all the Bonds and Parity Debt due on any date, together with such interest, then to the payment thereof ratably, according to the amounts of principal or interest or Accreted Value (plus accrued interest) due on such date to the persons entitled thereto, without any discrimination or preference.

In each and every such case during the continuance of such Event of Default, the Owners of not less than a majority in aggregate amount of Bond Obligation of the Bonds at the time Outstanding shall be entitled, upon notice in writing to the City, to declare the principal of all of the Bonds then Outstanding, and the interest accrued thereon, to be due and payable immediately, and upon any such declaration the same shall become and shall be immediately due and payable, anything in this Indenture or in the Bonds contained to the contrary notwithstanding.

This provision, however, is subject to the condition that if, at any time after the principal of the Bonds shall have been so declared due and payable, the City shall pay to or shall deposit with the Trustee a sum sufficient to pay all principal on such Bonds matured prior to such declaration and all matured installments of interest (if any) upon all the Bonds, and the reasonable fees and expenses of the Trustee, and any and all other defaults known to the Trustee (other than in the payment of principal of and interest on the Bonds due and payable solely by reason of such declaration) shall have been made good or cured to the satisfaction of the Trustee, or provision deemed by the Trustee to be adequate shall have been made therefor, then, and in every such case, the Owners of not less than a majority in aggregate amount of Bond Obligation of the Bonds at the time Outstanding, by written notice to the City and to the Trustee, may, on behalf of the Owners of all the Bonds, rescind and annul such declaration and its consequences; but no such rescission and annulment shall extend to or shall affect any subsequent default, or shall impair or exhaust any right or power consequent thereon.

SECTION 7.03. Trustee to Represent Owners. The Trustee is hereby irrevocably appointed (and the successive respective Owners of the Bonds, by taking and holding the same, shall be conclusively deemed to have so appointed the Trustee) as trustee and true and lawful attorney-in-fact of the Owners of the Bonds for the purpose of exercising and prosecuting on their behalf such rights and remedies as may be available to such Owners under the provisions of the Bonds, this Indenture and applicable provisions of any other law. Upon the occurrence and continuance of an Event of Default or other occasion giving rise to a right in the Trustee to represent the Owners, the Trustee in its discretion may, and upon the written request of the Owners of not less than twenty-five percent (25%) in aggregate amount of Bond Obligation of the Bonds then Outstanding, and upon being indemnified to its satisfaction therefor, shall, proceed to protect or enforce its rights or the rights of such Owners by such appropriate action, suit, mandamus or other proceedings as it shall deem most effectual to protect and enforce any such right, at law or in equity, either for the specific performance of any covenant or agreement contained herein, or in aid of the execution of any power herein granted, or for the enforcement of any other appropriate legal or equitable right or remedy vested in the Trustee or in such Owners under this Indenture or any other law; and upon instituting such proceeding, the Trustee shall be entitled, as a matter of right, to the appointment of a receiver of the Water Net Revenues, and other assets pledged under this Indenture, pending such proceedings. All rights of action under this Indenture or the Bonds or otherwise may be prosecuted and enforced by the Trustee without the possession of any of the Bonds or the production thereof in any proceeding relating thereto, and any such suit, action or proceeding instituted by the Trustee shall be brought in the name of the Trustee for the benefit and protection of all the Owners of such Bonds, subject to the provisions of this Indenture (including Section 7.05).

SECTION 7.04. Owners' Direction of Proceedings. Anything in this Indenture to the contrary notwithstanding, the Owners of a majority in aggregate amount of Bond Obligation of the Bonds then Outstanding shall have the right, by an instrument or concurrent instruments in writing executed and delivered to the Trustee and upon furnishing the Trustee with indemnification satisfactory to it, to direct the method of conducting all remedial proceedings taken by the Trustee hereunder, provided that such direction shall not be otherwise than in accordance with law and the provisions of this Indenture, that the Trustee may take any other action deemed proper by the Trustee which is not inconsistent with such direction, and that the Trustee shall have the right to decline to follow any such direction which in the opinion of the Trustee would be unjustly prejudicial to Owners or holders of Parity Debt not parties to such direction.

SECTION 7.05. Limitation on Owners' Right to Sue. No Owner of any Bond shall have the right to institute any suit, action or proceeding at law or in equity, for the protection or enforcement of any right or remedy under this Indenture or any other applicable law with respect to such Bond, unless (1) such Owner shall have given to the Trustee written notice of the occurrence of an Event of Default; (2) the Owners of not less than twenty-five percent (25%) in aggregate amount of Bond Obligation of the Bonds then Outstanding shall have made written request upon the Trustee to exercise the powers hereinbefore granted or to institute such suit, action or proceeding in its own name; (3) such Owner or said Owners shall have tendered to the Trustee reasonable indemnity against the costs, expenses and liabilities to be incurred in compliance with such request; (4) the Trustee shall have refused or omitted to comply with such request for a period of sixty (60) days after such written request shall have been received by, and said tender of indemnity shall have been made to, the Trustee; and (5) the Trustee shall not have received contrary directions from the Owners of a majority in aggregate amount of Bond Obligation of the Bonds then Outstanding.

Such notification, request, tender of indemnity and refusal or omission are hereby declared, in every case, to be conditions precedent to the exercise by any Owner of Bonds of any remedy hereunder or under law; it being understood and intended that no one or more Owners of Bonds shall have any right in any manner whatever by his, her or their action to affect, disturb or prejudice the security of this Indenture or the rights of any other Owners of Bonds, or to enforce any right under this Indenture or other applicable law with respect to the Bonds, except in the manner herein provided, and that all proceedings at law or in equity to enforce any such right shall be instituted, had and maintained in the manner herein provided and for the benefit and protection of all Owners of the Outstanding Bonds, subject to the provisions of this Indenture.

SECTION 7.06. Absolute Obligation of the City. Nothing in any other provision of this Indenture or in the Bonds contained shall affect or impair the obligation of the City, which is absolute and unconditional, to pay the principal or Redemption Price of and interest on the Bonds to the respective Owners of the Bonds at their respective due dates therefor or upon call for redemption, as herein provided, but only out of the Water Net Revenues and other assets herein pledged therefor, or affect or impair the right of such Owners, which is also absolute and unconditional, to enforce such payment by virtue of the contract embodied in the Bonds.

SECTION 7.07. Termination of Proceedings. In case any proceedings taken by the Trustee or any one or more Owners on account of any Event of Default shall have been

discontinued or abandoned for any reason or shall have been determined adversely to the Trustee or the Owners, then in every such case the City, the Trustee and the Owners, subject to any determination in such proceedings, shall be restored to their former positions and rights hereunder, severally and respectively, and all rights, remedies, powers and duties of the City, the Trustee and the Owners shall continue as though no such proceedings had been taken.

SECTION 7.08. Remedies Not Exclusive. No remedy herein conferred upon or reserved to the Trustee or to the Owners of the Bonds is intended to be exclusive of any other remedy or remedies, and each and every such remedy, to the extent permitted by law, shall be cumulative and in addition to any other remedy given hereunder or now or hereafter existing at law or in equity or otherwise.

SECTION 7.09. No Waiver of Default. No delay or omission of the Trustee or of any Owner of the Bonds to exercise any right or power arising upon the occurrence of any default shall impair any such right or power or shall be construed to be a waiver of any such default or an acquiescence therein; and every power and remedy given by this Indenture to the Trustee or to the Owners of the Bonds may be exercised from time to time and as often as may be deemed expedient.

ARTICLE VIII

THE TRUSTEE

SECTION 8.01. Appointment; Duties, Immunities and Liabilities of Trustee.

(A) Wells Fargo Bank, National Association is hereby appointed as Trustee under this Indenture and hereby accepts the trust imposed upon it as Trustee hereunder and to perform all the functions and duties of the Trustee hereunder, subject to the terms and conditions set forth in this Indenture. The Trustee shall, prior to an Event of Default, and after the curing or waiver of all Events of Default which may have occurred, perform such duties and only such duties as are specifically set forth in this Indenture and no implied covenants shall be read into this Indenture against the Trustee. The Trustee shall, during the existence of any Event of Default (which has not been cured or waived), exercise such of the rights and powers vested in it by this Indenture and use the same degree of care and skill in their exercise as a prudent person would exercise or use under the circumstances in the conduct of his or her own affairs.

(B) The City may remove the Trustee at any time unless an Event of Default shall have occurred and then be continuing, and shall remove the Trustee if at any time requested to do so by an instrument or concurrent instruments in writing signed by the Owners of not less than a majority in aggregate amount of Bond Obligation of the Bonds then Outstanding (or their attorneys duly authorized in writing) or if at any time the Trustee shall cease to be eligible in accordance with subsection (E) of this Section, or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or a receiver of the Trustee or its property shall be appointed, or any public officer shall take control or charge of the Trustee or of its property or affairs for the purpose of rehabilitation, conservation or liquidation, in each case by giving

written notice of such removal to the Trustee, and thereupon shall appoint a successor Trustee by an instrument in writing.

(C) The Trustee may at any time resign by giving written notice of such resignation to the City and by giving the Owners notice of such resignation by mail at the addresses shown on the registration books maintained by the Trustee. Upon receiving such notice of resignation, the City shall promptly appoint a successor Trustee by an instrument in writing.

(D) Any removal or resignation of the Trustee and appointment of a successor Trustee shall become effective upon acceptance of appointment by the successor Trustee. If no successor Trustee shall have been appointed and have accepted appointment within forty-five (45) days of giving notice of removal or notice of resignation as aforesaid, the resigning Trustee or any Owner (on behalf of himself or herself and all other Owners) may petition any court of competent jurisdiction for the appointment of a successor Trustee, and such court may thereupon, after such notice (if any) as it may deem proper, appoint such successor Trustee. Any successor Trustee appointed under this Indenture, shall signify its acceptance of such appointment by executing and delivering to the City and to its predecessor Trustee a written acceptance thereof, and thereupon such successor Trustee, without any further act, deed or conveyance, shall become vested with all the moneys, estates, properties, rights, powers, trusts, duties and obligations of such predecessor Trustee, with like effect as if originally named Trustee herein; but, nevertheless at the Request of the City or the request of the successor Trustee, such predecessor Trustee shall execute and deliver any and all instruments of conveyance or further assurance and do such other things as may reasonably be required for more fully and certainly vesting in and confirming to such successor Trustee all the right, title and interest of such predecessor Trustee in and to any property held by it under this Indenture and shall pay over, transfer, assign and deliver to the successor Trustee any money or other property subject to the trusts and conditions herein set forth. Upon request of the successor Trustee, the City shall execute and deliver any and all instruments as may be reasonably required for more fully and certainly vesting in and confirming to such successor Trustee all such moneys, estates, properties, rights, powers, trusts, duties and obligations. Upon acceptance of appointment by a successor Trustee as provided in this subsection, the City shall give notice of the succession of such Trustee to the trusts hereunder by mail to the Owners at the addresses shown on the registration books maintained by the Trustee. If the City fails to mail such notice within fifteen (15) days after acceptance of appointment by the successor Trustee, the successor Trustee shall cause such notice to be mailed at the expense of the City.

(E) Any Trustee appointed under the provisions of this Section in succession to the Trustee shall be a trust company or bank having the powers of a trust company having a corporate trust office in the State, having a combined capital and surplus of at least seventy-five million dollars ($75,000,000) and subject to supervision or examination by federal or state authority. If such bank or trust company publishes a report of condition at least annually, pursuant to law or to the requirements of any supervising or examining authority above referred to, then for the purpose of this subsection the combined capital and surplus of such bank or trust company shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. In case at any time the Trustee shall cease to be eligible in accordance with the provisions of this subsection (E), the Trustee shall resign immediately in the manner and with the effect specified in this Section.

If, by reason of the judgment of any court, the Trustee or any successor Trustee is rendered unable to perform its duties hereunder, and if no successor Trustee be then appointed, all such duties and all of the rights and powers of the Trustee hereunder shall be assumed by and vest in the City in trust for the benefit of the Owners.

SECTION 8.02. Merger or Consolidation. Any company into which the Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which the Trustee may sell or transfer all or substantially all of its corporate trust business, provided such company shall be eligible under subsection (E) of Section 8.01, shall be the successor to such Trustee without the execution or filing of any paper or any further act, anything herein to the contrary notwithstanding.

SECTION 8.03. Liability of Trustee.

(A) The recitals of facts herein and in the Bonds contained shall be taken as statements of the City, and the Trustee assumes no responsibility for the correctness of the same (other than the certificate of authentication of the Trustee on each Bond), and makes no representations as to the validity or sufficiency of this Indenture or of the Bonds or of any Investment Security, as to the sufficiency of the Water Net Revenues, or the priority of the lien of this Indenture thereon, or as to the financial or technical feasibility of the Water System and shall not incur any responsibility in respect of any such matter, other than in connection with the duties or obligations expressly herein or in the Bonds assigned to or imposed upon it. The Trustee shall, however, be responsible for its representations contained in its certificate of authentication on the Bonds. The Trustee shall not be liable in connection with the performance of its duties hereunder, except for its own negligence, willful misconduct or breach of the express terms and conditions hereof. The Trustee and its directors, officers, employees or agents may in good faith buy, sell, own, hold and deal in any of the Bonds and may join in any action which any Owner of a Bond may be entitled to take, with like effect as if the Trustee was not the Trustee under this Indenture. The Trustee may in good faith hold any other form of indebtedness of the City, own, accept or negotiate any drafts, bills of exchange, acceptances or obligations of the City and make disbursements for the City and enter into any commercial or business arrangement therewith, without limitation.

(B) The Trustee shall not be liable for any error of judgment made in good faith by a responsible officer unless it shall be proved that the Trustee was negligent in ascertaining the pertinent facts. The Trustee may execute any of the trusts or powers hereof and perform the duties required of it hereunder by or through attorneys, agents, or receivers, and shall be entitled to advice of counsel concerning all matters of trust and its duty hereunder, but the Trustee shall be answerable for the negligence or misconduct of any such attorney, agent, or receiver selected by it; provided, however, that the Trustee shall not be answerable for the negligence or misconduct of any attorney or certified public accountant selected by it with due care.

(C) The Trustee shall not be liable with respect to any action taken or omitted to be taken by it in good faith in accordance with the direction of the Owners of not less than twenty-five percent (25%) in aggregate amount of Bond Obligation of the Bonds at the time

Outstanding relating to the time, method and place of conducting any proceeding for any remedy available to the Trustee or exercising any trust or power conferred upon the Trustee under this Indenture.

(D) The Trustee shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request, order or direction of any of the Owners pursuant to the provisions of this Indenture, including, without limitation, the provisions of Article VII hereof, unless such Owners shall have offered to the Trustee security or indemnity satisfactory to it against the costs, expenses and liabilities which may be incurred therein or thereby.

(E) No provision of this Indenture shall require the Trustee to expend or risk its own funds or otherwise incur any financial liability in the performance or exercise of any of its duties hereunder.

(F) The Trustee shall not be deemed to have knowledge of and shall not be required to take any action with respect to, any Event of Default (other than an Event of Default described in subsections (a) or (b) of Section 7.01) or event which would, with the giving of notice, the passage of time or both, constitute an Event of Default, unless the Trustee shall have actual knowledge of such event or shall have been notified of such event by the City or the Owners of twenty-five percent (25%) in aggregate amount of Bond Obligation of the Bonds at the time Outstanding. Without limiting the generality of the foregoing, the Trustee shall not be required to ascertain, monitor or inquire as to the performance or observance by the City of the terms, conditions, covenants or agreements set forth in Article VI hereof (including, without limitation, the covenants of the City set forth in Section 6.08 hereof), other than the covenants of the City to make payments with respect to the Bonds when due as set forth in Section 6.01 and to file with the Trustee when due, such reports and certifications as the City is required to file with the Trustee hereunder.

(G) No permissive power, right or remedy conferred upon the Trustee hereunder shall be construed to impose a duty to exercise such power, right or remedy.

(H) The Trustee shall not be bound to make any investigation into the facts or matters stated in any resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, bond, debenture, coupon or other paper or document but the Trustee, in its discretion, may make such further inquiry or investigation into such facts or matters as it may see fit, and, if the Trustee shall determine to make such further inquiry or investigation, it shall be entitled to examine the books, records and premises of the City, personally or by agent or attorney.

(I) The Trustee shall not be responsible for:

(1) the application or handling by the City of any Water Net Revenues or other moneys transferred to or pursuant to any Requisition or Request of the City in accordance with the terms and conditions hereof;

(2) the application and handling by the City of any other fund or account designated to be held by the City hereunder;

(3) any error or omission by the City in making any computation or giving any instruction with respect to the Rebate Fund and may rely conclusively on any computations or instructions furnished to it by the City with respect to the Rebate Fund and the Tax Certificate; or

(4) the construction, operation or maintenance of the Water System by the City.

(J) Whether or not therein expressly so provided, every provision of this Indenture relating to the conduct or affecting the liability of or affording protection to the Trustee shall be subject to the provisions of this Article VIII.

(K) The Trustee shall have no responsibility with respect to any information, statement or recital in any official statement, offering memorandum or any other disclosure material prepared or distributed with respect to the Bonds.

SECTION 8.04. Right of Trustee to Rely on Documents. The Trustee shall be protected in acting upon any notice, resolution, request, consent, order, certificate, report, opinion, note or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, including, without limitation, counsel of or to the City, with regard to legal questions, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it hereunder in good faith and in accordance herewith unless it shall be proved that the Trustee was negligent in ascertaining the pertinent facts.

Whenever in the administration of the trusts imposed upon it by this Indenture the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action hereunder, such matter (unless other evidence in respect thereof be herein specifically prescribed) may be deemed to be conclusively proved and established by a Certificate of the City, and such Certificate shall be full warrant to the Trustee for any action taken or suffered in good faith under the provisions of this Indenture in reliance upon such Certificate, but in its discretion the Trustee may, in lieu thereof, accept other evidence of such matter or may require such additional evidence as to it may seem reasonable. The Trustee may also rely conclusively on any report or certification of any certified public accountant, investment banker, financial consultant, or other expert selected by the City or selected by the Trustee with due care in connection with matters required to be proven or ascertained in connection with its administration of the trusts created hereby.

SECTION 8.05. Compensation and Indemnification of Trustee. The City shall cause to be paid to the Trustee from time to time reasonable compensation for all service rendered under this Indenture, and also all reasonable expenses, charges, counsel fees and other disbursements, including those of its attorneys, agents, and employees, incurred in and about the performance of their powers and duties under this Indenture, subject to the provisions of Section 11.10 hereof. The City further agrees to indemnify and save the Trustee, its officers, directors and employees harmless from and against any costs, claims, expenses or liabilities, including fees and expenses of its attorneys, which it may incur in the exercise and performance

of its powers and duties hereunder, and which are not due to its negligence, misconduct or default.

ARTICLE IX

MODIFICATION OR AMENDMENT OF THIS INDENTURE

SECTION 9.01. Amendments Permitted.

(A) (1) This Indenture and the rights and obligations of the City, the Owners of the Bonds and the Trustee may be modified or amended from time to time and at any time by a Supplemental Indenture, which the City and the Trustee may enter into with the written consent of the Owners of a majority in aggregate amount of Bond Obligation of the Bonds (or, if such Supplemental Indenture is only applicable to a Series of Bonds, such Series of Bonds) then Outstanding or, in case less than all of the Series of Bonds then Outstanding are affected by the modification or amendment, of the Owners of at least a majority in aggregate principal amount of the Bonds so affected and Outstanding at the time such consent is given, shall have been filed with the Trustee; provided, that if such modification or amendment will, by its terms, not take effect so long as any Bonds of any particular maturity remain Outstanding, the consent of the Owners of such Bonds shall not be required and such Bonds shall not be deemed to be Outstanding for the purpose of any calculation of Bonds Outstanding under this Section.

(2) In lieu of satisfying the requirements of Section 9.01(A)(1) hereof, this Indenture and the rights and obligations of the City and of the Owners of the Bonds and of the Trustee may also be modified or amended at any time by a Supplemental Indenture entered into by the City and the Trustee which shall become binding when the written consents of each provider of a letter of credit or a policy of bond insurance for the Bonds shall have been filed with the Trustee; provided, that at such time the payment of all the principal of and interest on all Outstanding Bonds shall be insured by a policy or policies of municipal bond insurance or payable under a letter of credit the provider of which shall be a financial institution or association having unsecured debt obligations rated, or insuring or securing other debt obligations rated on the basis of such insurance or letters of credit, in one of the two highest Rating Categories of Moody's, Fitch or Standard & Poor's. A copy of each such Supplemental Indenture when executed and delivered shall be sent by the City to Moody's, Fitch and Standard & Poor's to extent such rating agency is then rating the Bonds.

(3) No such modification or amendment shall (a) extend the fixed maturity of any Bond, or reduce the amount of principal thereof, or extend the time of payment or reduce the amount of any mandatory sinking fund payment provided for the payment of any Bond, or reduce the rate of interest thereon, or extend the time of payment of interest thereon, or reduce any premium payable upon the redemption thereof exclusively, without the consent of the Owner of each Bond so affected, or (b) reduce the aforesaid percentage of Bond Obligation the consent of the Owners of which is required to effect any such modification or amendment, or permit the creation of any lien on the Water Net Revenues and other assets pledged under this Indenture prior to or on a parity with the lien created by this Indenture, or deprive the Owners of the Bonds of the lien created by

this Indenture on such Water Net Revenues and other assets (in each case, except as expressly provided in this Indenture), without the consent of the Owners of all of the Bonds then Outstanding. It shall not be necessary for the consent of the Owners to approve the particular form of any Supplemental Indenture, but it shall be sufficient if such consent shall approve the substance thereof.

(B) This Indenture and the rights and obligations of the City, of the Trustee and of the Owners of the Bonds may also be modified or amended from time to time and at any time by a Supplemental Indenture, which the City may adopt without the consent of any Owners but only to the extent permitted by law and only for any one or more of the following purposes:

(1) to add to the covenants and agreements of the City in this Indenture contained other covenants and agreements thereafter to be observed, to pledge or assign additional security for the Bonds (or any portion thereof), or to surrender any right or power herein reserved to or conferred upon the City;

(2) to make such provisions for the purpose of curing any ambiguity, inconsistency or omission, or of curing or correcting any defective provision, contained in this Indenture, or in regard to matters or questions arising under this Indenture, as the City may deem necessary or desirable, and which shall not materially and adversely affect the interests of the Owners of the Bonds;

(3) to modify, amend or supplement this Indenture in such manner as to permit the qualification hereof under the Trust Indenture Act of 1939, as amended, or any similar federal statute hereafter in effect, and to add such other terms, conditions and provisions as may be permitted by said Act or similar federal statute, and which shall not materially and adversely affect the interests of the Owners of the Bonds;

(4) to make modifications or adjustments necessary, appropriate or desirable to provide for the issuance of Variable Rate Indebtedness, Capital Appreciation Indebtedness or Parity Debt with such interest rate, payment, maturity and other terms as the City may deem desirable; subject to the provisions of Section 3.01, 3.03 and 3.05;

(5) to provide for the issuance of Bonds in book-entry form or bearer form, provided that no such provision shall materially and adversely affect the interests of the Owners of the Bonds;

(6) if the City agrees in a Supplemental Indenture to maintain the exclusion of interest on a Series of Bonds from gross income for purposes of federal income taxation, to make such provisions as are necessary or appropriate to ensure such exclusion;

(7) to provide for the issuance of an additional Series of Bonds pursuant to provisions of Section 3.02 or Section 3.03; and

(8) for any other purpose that does not materially and adversely affect the interests of the Owners of the Bonds.

SECTION 9.02. Effect of Supplemental Indenture. From and after the time any Supplemental Indenture becomes effective pursuant to this Article, this Indenture shall be deemed to be supplemented, modified and/or amended in accordance therewith, and the respective rights, duties and obligations under this Indenture of the City, the Trustee and all Owners of Bonds Outstanding shall thereafter be determined, exercised and enforced hereunder subject in all respects to such supplement, modification and/or amendment, and all the terms and conditions of any such Supplemental Indenture shall be deemed to be part of the terms and conditions of this Indenture for any and all purposes.

SECTION 9.03. Endorsement of Bonds; Preparation of New Bonds. Bonds delivered after any Supplemental Indenture becomes effective pursuant to this Article may, and if the Trustee so determines shall, bear a notation by endorsement or otherwise in form approved by the City and the Trustee as to any modification or amendment provided for in such Supplemental Indenture, and, in that case, upon demand of the Owner of any Bond Outstanding at the time of such execution and presentation of his or her Bond for such purpose at the Corporate Trust Office or at such additional offices as the Trustee may select and designate for that purpose, a suitable notation shall be made on such Bond. If the Supplemental Indenture shall so provide, new Bonds so modified as to conform, in the opinion of the City and the Trustee, to any modification or amendment contained in such Supplemental Indenture, shall be prepared and executed by the City and authenticated by the Trustee, and upon demand of the Owners of any Bonds then Outstanding shall be exchanged at the Principal Corporate Trust Office, without cost to any Owner, for Bonds then Outstanding, upon surrender for cancellation of such Bonds, in equal aggregate principal amounts of the same Series, tenor and maturity.

SECTION 9.04. Amendment of Particular Bonds. The provisions of this Article shall not prevent any Owner from accepting any amendment as to the particular Bonds held by him or her, provided that due notation thereof is made on such Bonds.

ARTICLE X

DEFEASANCE

SECTION 10.01. Discharge of Indenture. Bonds of any Series or a portion thereof may be paid by the City in any of the following ways:

(a) by paying or causing to be paid the Bond Obligation of and interest on such Outstanding Bonds, as and when the same become due and payable;

(b) by depositing with the Trustee, an escrow agent or other fiduciary, in trust, at or before maturity, money or securities in the necessary amount (as provided in Section 10.03) to pay or redeem such Outstanding Bonds; or

(c) by delivering to the Trustee, for cancellation by it, such Outstanding Bonds.

If the City shall pay all Series for which any Bonds are Outstanding and also pay or cause to be paid all other sums payable hereunder by the City, then and in that case, at the election of the City (evidenced by a Certificate of the City filed with the Trustee signifying the intention of the

City to discharge all such indebtedness and this Indenture), and notwithstanding that any Bonds shall not have been surrendered for payment, this Indenture and the pledge of Water Net Revenues and other assets made under this Indenture and all covenants, agreements and other obligations of the City under this Indenture shall cease, terminate, become void and be completely discharged and satisfied. In such event, upon Request of the City, the Trustee shall cause an accounting for such period or periods as may be requested by the City to be prepared and filed with the City and shall execute and deliver to the City all such instruments as may be necessary or desirable to evidence such discharge and satisfaction, and the Trustee shall pay over, transfer, assign or deliver to the City all moneys or securities or other property held by it pursuant to this Indenture which, as evidenced by a verification report, upon which the Trustee may conclusively rely, from a firm of certified public accountants, are not required for the payment or redemption of Bonds not theretofore surrendered for such payment or redemption.

SECTION 10.02. Discharge of Liability on Bonds. Upon the deposit with the Trustee, escrow agent or other fiduciary, in trust, at or before maturity, of money or securities in the necessary amount (as provided in Section 10.03) to pay or redeem any Outstanding Bond (whether upon or prior to its maturity or the redemption date of such Bond), provided that, if such Bond is to be redeemed prior to maturity, notice of such redemption shall have been given as in Article IV provided or provision satisfactory to the Trustee shall have been made for the giving of such notice, then all liability of the City in respect of such Bond shall cease, terminate and be completely discharged, provided that the Owner thereof shall thereafter be entitled to the payment of the principal of and premium, if any, and interest on the Bonds, and the City shall remain liable for such payment, but only out of such money or securities deposited with the Trustee as aforesaid for their payment, subject, however, to the provisions of Section 10.04 and the continuing duties of the Trustee hereunder.

The City may at any time surrender to the Trustee for cancellation by it any Bonds previously issued and delivered, which the City may have acquired in any manner whatsoever, and such Bonds, upon such surrender and cancellation, shall be deemed to be paid and retired.

SECTION 10.03. Deposit of Money or Securities with Trustee. Whenever in this Indenture it is provided or permitted that there be deposited with or held in trust by the Trustee money or securities in the necessary amount to pay or redeem any Bonds, the money or securities so to be deposited or held may include money or securities held by the Trustee in the funds and accounts established pursuant to this Indenture and shall be:

(a) lawful money of the United States of America in an amount equal to the principal amount of such Bonds and all unpaid interest thereon to maturity, except that, in the case of Bonds which are to be redeemed prior to maturity and in respect of which notice of such redemption shall have been given as in Article IV provided or provision satisfactory to the Trustee shall have been made for the giving of such notice, the amount to be deposited or held shall be the principal amount or Redemption Price of such Bonds and all unpaid interest thereon to the redemption date; or

(b) Defeasance Securities, the principal of and interest on which when due will, in the opinion of an independent certified public accountant or, as determined by the City using due diligence, another firm of verification agents, delivered to the Trustee

(upon which opinion the Trustee may conclusively rely), provide money sufficient to pay the principal or Redemption Price of and all unpaid interest to maturity, or to the redemption date, as the case may be, on the Bonds to be paid or redeemed, as such principal or Redemption Price and interest become due, provided that, in the case of Bonds which are to be redeemed prior to the maturity thereof, notice of such redemption shall have been given as in Article IV provided or provision satisfactory to the Trustee shall have been made for the giving of such notice;

provided, in each case, that the Trustee shall have been irrevocably instructed (by the terms of this Indenture or by Request of the City) to apply such money to the payment of such principal or Redemption Price and interest with respect to such Bonds.

SECTION 10.04. Payment of Bonds After Discharge of Indenture. Any moneys held by the Trustee in trust for the payment of the principal or Redemption Price of, or interest on, any Bonds and remaining unclaimed for two years after the principal of all of the Bonds has become due and payable (whether at maturity or upon call for redemption as provided in this Indenture), if such moneys were so held at such date, or two (2) years after the date of deposit of such moneys if deposited after said date when all of the Bonds became due and payable, shall be repaid to the City free from the trust created by this Indenture, and all liability of the Trustee with respect to such moneys shall thereupon cease; provided, however, that before the repayment of such moneys to the City as aforesaid, the Trustee may (at the cost of the City) first mail to the Owners of any Bonds remaining unpaid at the addresses shown on the registration books maintained by the Trustee a notice, in such form as may be deemed appropriate by the Trustee, with respect to the Bonds so payable and not presented and with respect to the provisions relating to the repayment to the City of the moneys held for the payment thereof. All moneys held by or on behalf of the Trustee for the payment of principal or Accreted Value of or interest or premium on Bonds, whether at redemption or maturity, shall be held in trust for the account of the Owners thereof and the Trustee shall not be required to pay Owners any interest on, or be liable to the Owners or any other person (other than the City) for any interest earned on, moneys so held. Any interest earned thereon shall belong to the City and shall be deposited monthly by the Trustee into the Water Revenue Fund.

ARTICLE XI

MISCELLANEOUS

SECTION 11.01. Liability of City Limited to Water Net Revenues. Notwithstanding anything in this Indenture or in the Bonds contained, the City shall not be required to advance any moneys derived from any source other than the Water Net Revenues and other assets pledged hereunder for any of the purposes in this Indenture mentioned, whether for the payment of the principal or Redemption Price of or interest on the Bonds or for any other purpose of this Indenture.

The Bonds are special, limited obligations of the City. The Bonds shall not be deemed to constitute a debt or liability of the City, the State of California or of any political subdivision thereof within the meaning of any constitutional or statutory provision, or a pledge of the faith and credit of the City, the State of California or of any political subdivision thereof, but shall be

payable, except to the extent of certain amounts held hereunder pledged therefor, solely from Water Net Revenues. Neither the faith and credit nor the taxing power of the City, the State of California or of any political subdivision thereof is pledged to the payment of the principal of, premium, if any, or the interest on the Bonds. The issuance of the Bonds shall not directly or indirectly or contingently obligate the City, the State of California or any political subdivision thereof to levy or to pledge any form of taxation whatsoever therefor or to make any appropriation for their payment.

SECTION 11.02. Successor is Deemed Included in All References to Predecessor. Whenever in this Indenture either the City or the Trustee is named or referred to, such reference shall be deemed to include the successors or assigns thereof, and all the covenants and agreements in this Indenture contained by or on behalf of the City or the Trustee shall bind and inure to the benefit of the respective successors and assigns thereof whether so expressed or not.

SECTION 11.03. Limitation of Rights to City, Trustee and Owners. Nothing in this Indenture or in the Bonds expressed or implied is intended or shall be construed to give to any person other than the City, the Trustee and the Owners of the Bonds and any Parity Debt, any legal or equitable right, remedy or claim under or in respect of this Indenture or any covenant, condition or provision therein or herein contained; and all such covenants, conditions and provisions are and shall be held to be for the sole and exclusive benefit of the City, the Trustee and the Owners of the Bonds and any Parity Debt.

SECTION 11.04. Waiver of Notice. Whenever in this Indenture the giving of notice by mail or otherwise is required, the giving of such notice may be waived in writing by the person entitled to receive such notice and in any such case the giving or receipt of such notice shall not be a condition precedent to the validity of any action taken in reliance upon such waiver.

SECTION 11.05. Destruction or Delivery of Cancelled Bonds. Whenever in this Indenture provision is made for the cancellation by the Trustee and the delivery to the City of any Bonds, the Trustee may, in its sole discretion, in lieu of such cancellation and delivery, destroy such Bonds, and deliver a certificate of such destruction to the City.

SECTION 11.06. Severability of Invalid Provisions. If any one or more of the provisions contained in this Indenture or in the Bonds shall for any reason be held to be invalid, illegal or unenforceable in any respect, then such provision or provisions shall be deemed severable from the remaining provisions contained in this Indenture and such invalidity, illegality or unenforceability shall not affect any other provision of this Indenture, and this Indenture shall be construed as if such invalid or illegal or unenforceable provision had never been contained herein. The City hereby declares that it would have executed and delivered this Indenture and each and every other Section, paragraph, sentence, clause or phrase hereof and authorized the issuance of the Bonds pursuant thereto irrespective of the fact that any one or more Sections, paragraphs, sentences, clauses or phrases of this Indenture may be held illegal, invalid or unenforceable.

SECTION 11.07. Notice to City and Trustee. Any notice to or demand upon the Trustee may be served or presented, and such demand may be made, at the Corporate Trust Office of the Trustee. Any notice to or demand upon the City, shall be deemed to have been sufficiently given or served for all purposes by being deposited, first-class mail postage prepaid, in a post office letter box, addressed to the City at 275 East Olive Avenue, Burbank, California 91502, Attention: City Manager (or such other address as may have been filed in writing by the City with the Trustee).

SECTION 11.08. Evidence of Rights of Owners. Any request, consent or other instrument required or permitted by this Indenture to be signed and executed by Owners may be in any number of concurrent instruments of substantially similar tenor and shall be signed or executed by such Owners in person or by an agent or agents duly appointed in writing. Proof of the execution of any such request, consent or other instrument or of a writing appointing any such agent, or of the holding by any person of Bonds transferable by delivery, shall be sufficient for any purpose of this Indenture and shall be conclusive in favor of the Trustee and of the City if made in the manner provided in this Section.

The fact and date of the execution by any person of any such request, consent or other instrument or writing may be proved by the certificate of any notary public or other officer of any jurisdiction, authorized by the laws thereof to take acknowledgments of deeds, certifying that the person signing such request, consent or other instrument acknowledged to him or her the execution thereof, or by an affidavit of a witness of such execution duly sworn to before such notary public or other officer.

The ownership of Bonds shall be proved by the bond registration books held by the Trustee. The Trustee may establish a record date as of which to measure consent of the Owners to determine whether the requisite consents are received.

Any request, consent, or other instrument or writing of the Owner of any Bond shall bind every future Owner of the same Bond and the Owner of every Bond issued in exchange therefor or in lieu thereof, in respect of anything done or suffered to be done by the Trustee or the City in accordance therewith or reliance thereon.

SECTION 11.09. Disqualified Bonds. In determining whether the Owners of the requisite aggregate amount of Bond Obligation have concurred in any demand, request, direction, consent or waiver under this Indenture, Bonds which are owned or held by or for the account of the City, or by any other obligor on the Bonds, or by any person directly or indirectly controlling or controlled by, or under direct or indirect common control with, the City or any other obligor on the Bonds, shall be disregarded and deemed not to be Outstanding for the purpose of any such determination. Bonds so owned which have been pledged in good faith may be regarded as Outstanding for the purposes of this Section if the pledgee shall establish to the satisfaction of the Trustee the pledgee's right to vote such Bonds and that the pledgee is not a person directly or indirectly controlling or controlled by, or under direct or indirect common control with, the City or any other obligor on the Bonds. In case of a dispute as to such right, any decision by the Trustee taken upon the advice of counsel shall be full protection to the Trustee.

SECTION 11.10. Money Held for Particular Bonds. The money held by the Trustee for the payment of the interest, principal or Redemption Price due on any date with respect to particular Bonds (or portions of Bonds in the case of registered Bonds redeemed in part only) shall, on and after such date and pending such payment, be set aside on its books and held in trust by it for the Owners of the Bonds entitled thereto, subject, however, to the provisions of Section 10.04.

SECTION 11.11. Funds and Accounts; Valuation. Any fund required by this Indenture to be established and maintained by the Trustee may be established and maintained in the accounting records of the Trustee, either as a fund or an account, and may, for the purposes of such records, any audits thereof and any reports or statements with respect thereto, be treated either as a fund or as an account; but all such records with respect to all such funds shall at all times be maintained in accordance with customary standards of the industry, to the extent practicable, and with due regard for the protection of the security of the Bonds and the rights of every holder thereof. Notwithstanding anything to the contrary herein, for the purposes of determining the amount in any fund or account held by the Trustee, all Investment Securities credited to such fund or account shall be valued at the lesser of cost or market value (plus, prior to the first payment of interest following purchase, the amount of any accrued interest paid as part of the purchase price).

SECTION 11.12. Article and Section Headings and References. The headings or titles of the several Articles and Sections hereof, and any table of contents appended to copies hereof, shall be solely for convenience of reference and shall not affect the meaning, construction or effect of this Indenture.

All references herein to "Articles," "Sections" and other subdivisions are to the corresponding Articles, Sections or subdivisions of this Indenture; the words "herein," "hereof," "hereby," "hereunder" and other words of similar import refer to this Indenture as a whole and not to any particular Article, Section or subdivision hereof; and words of the masculine gender shall mean and include words of the feminine and neuter genders.

SECTION 11.13. Waiver of Personal Liability. No Council member, officer, agent or employee of the City or the Trustee shall be individually or personally liable for the payment of the principal or Redemption Price of or interest on the Bonds or be subject to any personal liability or accountability by reason of the issuance thereof; but nothing herein contained shall relieve any such Council member, officer, agent or employee of the City or the Trustee from the performance of any official duty provided by law or by this Indenture.

SECTION 11.14. Governing Law. This Indenture shall be construed and governed in accordance with the laws of the State of California.

SECTION 11.15. Business Day. Except as specifically set forth in a Supplemental Indenture, any payments or transfers which would otherwise become due on any day which is not a Business Day shall become due or shall be made on the next succeeding Business Day with the same effect as if made on such preceding non-Business Day.

SECTION 11.16. Effectiveness. This Indenture shall take effect upon its execution and delivery.

SECTION 11.17. Execution in Counterparts. This Indenture may be executed in several counterparts, each of which shall be deemed an original, and all of which shall constitute but one and the same instrument.

IN WITNESS WHEREOF, the parties hereto have executed this Indenture by their officers thereunto duly authorized as of the day and year first written above.

Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture
(Supplemental to the Burbank Water and Power Water
Revenue Bond Indenture dated
as of November 1, 2010)
Authorizing the Issuance of
$[PAR AMOUNT] Aggregate Principal Amount of
City of Burbank, California
Burbank Water and Power Water Revenue Bonds,
Series of 2026

This FIFTH SUPPLEMENTAL BURBANK WATER AND POWER WATER REVENUE BOND INDENTURE, dated as of [_____ 1], 2026 (the "Fifth Supplement"), by and between the CITY OF BURBANK, CALIFORNIA (the "City"), a municipal corporation and chartered city duly organized and existing under the Constitution and laws of the State of California, and U.S. BANK TRUST COMPANY, NATIONAL ASSOCIATION, as successor trustee (the "Trustee"),

W I T N E S S E T H :

WHEREAS, this Fifth Supplement is supplemental to the Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Master Water Revenue Bond Indenture"), by and between the City and the Trustee, providing for the issuance of City of Burbank, California Burbank Water and Power Water Revenue Bonds (the "Bonds"); and

WHEREAS, the Master Water Revenue Bond Indenture provides that the City may issue Bonds from time to time as authorized by a supplemental indenture thereto; and

WHEREAS, the City has heretofore issued four Series of revenue bonds under the Master Water Revenue Bond Indenture, two of which Series are currently outstanding as described below; and

WHEREAS, the City has heretofore issued its City of Burbank, California Burbank Water and Power Water Revenue/Refunding Bonds, Series of 2021 (the "2021 Bonds"), which 2021 Bonds are currently outstanding in the principal amount of $22,000,000, pursuant to the Master Water Revenue Bond Indenture, as supplemented and amended, including by a Third Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2021; and

WHEREAS, the City has heretofore issued on a parity with the 2021 Bonds, its City of Burbank, California Burbank Water and Power Water Revenue Refunding Bonds, Series of 2024 (the "2024 Bonds"), which 2024 Bonds are currently outstanding in the principal amount of $21,540,000, pursuant to the Master Water Revenue Bond Indenture, as supplemented and

amended, including by a Fourth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of June 1, 2024; and

WHEREAS, Article 12 of Chapter 4 of Title 2 of the Burbank Municipal Code authorizes the City to issue revenue bonds for the purpose of financing additions, betterments and extensions to and improvements of the water system of the City and related facilities and to refund obligations issued for such purpose; and

WHEREAS, the City Council has determined to issue a series of Bonds to be known as the City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "Series 2026 Bonds") to, together with other funds, (i) finance the costs (including by reimbursing the City for certain previously incurred expenditures made in connection therewith) of certain improvements to the City's water system, including but not limited to distribution system pipeline replacements, booster station improvements and upgrades, reservoir replacement and improvements, treatment improvements, and other upgrades to the water system, or such other and additional facilities for the water system as the City hereafter determines to substitute therefor (the "2026 Water Project") and (ii) pay Costs of Issuance of the Series 2026 Bonds; and

WHEREAS, the City Council has determined that it is necessary and required that the City enter into this Fifth Supplement to establish and declare, in conjunction with the Master Water Revenue Bond Indenture, the terms and conditions upon which the Series 2026 Bonds shall be issued and secured and to secure the payment of the principal thereof and premium (if any) and interest thereon; and

WHEREAS, the City Council has determined that all acts, conditions and things required by law to exist, to have happened and to have been performed precedent to and in connection with the execution and delivery of this Fifth Supplement do exist, have happened and have been performed in regular and due time, form and manner as required by law, and the parties hereto are now duly authorized to execute and enter into this Fifth Supplement;

NOW, THEREFORE, the parties hereto agree, as follows:

ARTICLE XVI

THE SERIES 2026 BONDS

SECTION 16.01. Definitions. The terms defined in this Section shall, for all purposes of this Fifth Supplement and of any certificate, opinion or other document herein mentioned, have the meanings herein specified, to be equally applicable to both the singular and plural forms of any of the terms herein defined. Terms defined in the Master Water Revenue Bond Indenture not otherwise defined herein shall have the meanings specified therein.

"Authorized Denomination" means, with respect to the Series 2026 Bonds, $5,000 or any integral multiple thereof.

"Certificate," "Statement," "Request," "Requisition" or "Order" of the City mean, respectively, a written certificate, statement, request, requisition or order signed in the name of the City by the City Manager, a Deputy City Manager, the City Treasurer, the Financial Services

Director, the General Manager of Burbank Water and Power or the Chief Financial Officer of Burbank Water and Power, or any other person authorized by any of the foregoing to execute such instruments. Any such instrument and supporting opinions or representations, if any, may, but need not, be combined in a single instrument with any other instrument, opinion or representation, and the two or more so combined shall be read and construed as a single instrument. If and to the extent required by Section 1.03 of the Master Water Revenue Bond Indenture, certificates and opinions shall include the statements provided for in said Section 1.03.

"Series 2026 Bonds" means the City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026.

"Series 2026 Costs of Issuance Fund" means the Series 2026 Costs of Issuance Fund established in Section 16.11.

"Series 2026 Water System Fund" means the Series 2026 Water System Fund established in Section 16.11.

"2026 Water Project" means improvements to the Water System, including but not limited to distribution system pipeline replacements, booster station improvements and upgrades, reservoir replacement and improvements, treatment improvements, and other upgrades to the Water System, or such other and additional facilities for the water system as the City hereafter determines to substitute therefor.

SECTION 16.02. Authorization; Terms of the Series 2026 Bonds.

(A) A fifth Series of Bonds to be issued under the Master Water Revenue Bond Indenture is hereby created. Such Series shall be known as the "City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026" (herein referred to as the "Series 2026 Bonds"). The Series 2026 Bonds shall be issued in the aggregate initial principal amount of $[PAR AMOUNT] in accordance with the law and the Master Water Revenue Bond Indenture to (i) finance the costs of the 2026 Water Project (including by reimbursing the City for certain previously incurred expenditures made in connection therewith) and (ii) pay Costs of Issuance of the Series 2026 Bonds.

(B) The Series 2026 Bonds shall be issued in fully registered form and shall be initially registered in the name of "Cede & Co.," as nominee of The Depository Trust Company. The Series 2026 Bonds shall be evidenced by one Series 2026 Bond maturing on each of the maturity dates as set forth in Section 16.02(C) in a denomination corresponding to the total principal amount of the Series 2026 Bonds of such maturity. Each Series 2026 Bond may be assigned by the Trustee a distinctive number or letter and number, and a record of the same shall be maintained by the Trustee. Registered ownership of the Series 2026 Bonds, or any portion thereof, may not thereafter be transferred except as set forth in Section 2.10 of the Master Water Revenue Bond Indenture.

(C) The Series 2026 Bonds shall be dated the date of delivery thereof, shall be issued in Authorized Denominations, and shall bear interest from the date thereof at the following rates per annum and shall mature on June 1 in the following years in the following amounts:

Maturity Date (June 1)	Principal Amount	Interest Rate
[___]	$[___]	[___]%

Interest on the Series 2026 Bonds shall be payable semiannually on June 1 and December 1 of each year, commencing on June 1, 2027, in lawful money of the United States of America by check mailed by first-class mail on each interest payment date to the Owner thereof as of the close of business on the fifteenth (15th) day (whether or not a Business Day) of the calendar month immediately preceding such interest payment date (each a "Record Date"); provided, that upon the written request of an Owner of one million dollars ($1,000,000) or more in aggregate principal amount of Series 2026 Bonds received by the Trustee prior to the applicable Record Date (which such request shall remain in effect until rescinded in writing by such Owner), interest shall be paid by wire transfer in immediately available funds.

Interest with respect to any Series 2026 Bond shall be payable from the interest payment date next preceding the date of authentication thereof unless such date of authentication is on or before an interest payment date and after the close of business on the preceding Record Date, in which case interest with respect thereto shall bear interest from such interest payment date, or unless such date of authentication is on or before the first Record Date, in which case interest with respect thereto shall be payable from the date of delivery of such Series 2026 Bond, or unless any Series 2026 Bond is in default as of the date of authentication thereof, in which case interest with respect thereto shall be payable from the date to which interest has been paid in full, payable on each interest payment date.

Interest on the Series 2026 Bonds shall be computed on the basis of a 360-day year of twelve 30-day months. The principal of and premium, if any, on the Series 2026 Bonds are payable

when due upon presentation thereof at the Corporate Trust Office of the Trustee, in lawful money of the United States of America.

So long as the Series 2026 Bonds are maintained in book-entry form, payments of principal, premium, if any, and interest shall be made by the Trustee to the Securities Depository by wire transfer.

The Trustee shall provide to Owners CUSIP number identification, with appropriate dollar amounts for each CUSIP number, on all redemption payments and interest payments, whether by check or by wire transfer.

SECTION 16.03. Redemption of Series 2026 Bonds.

(A) The Series 2026 Bonds maturing on or before June 1, 20[__] are not subject to optional redemption prior to maturity. The Series 2026 Bonds maturing on or after June 1, 20[__] are subject to redemption prior to their respective stated maturities, at the option of the City, from any source of available funds, as a whole or in part on any date (by such maturities as may be specified by the City and by lot within a maturity), on or after [June 1], 20[__], at a Redemption Price equal to 100% of the principal amount of the Series 2026 Bonds to be redeemed, plus accrued interest to the date fixed for redemption, without premium.

(B) The Series 2026 Bonds maturing on June 1, 20[__] shall also be subject to redemption prior to their stated maturity, in part, from mandatory sinking fund payments as specified below, commencing on June 1, 20[__], at a Redemption Price equal to the principal amount thereof, plus accrued interest thereon to the date fixed for redemption, without premium.

Term Series 2026 Bonds Due June 1, 20[__]

Mandatory Sinking Fund Payment Dates (June 1)	Mandatory Sinking Fund Payments $

Mandatory Sinking Fund Payment Dates (June 1)	Mandatory Sinking Fund Payments $
†	

† Final Maturity.

SECTION 16.04. Selection of Series 2026 Bonds for Redemption. If less than all of the Series 2026 Bonds are to be redeemed, the maturities of the Series 2026 Bonds to be redeemed shall be selected by the City. Whenever provision is made in this Fifth Supplement for the redemption of less than all of the Series 2026 Bonds of any maturity, the Trustee shall select the Series 2026 Bonds to be redeemed, from all Series 2026 Bonds of the respective maturity not previously called for redemption, in Authorized Denominations, by lot in any manner which the Trustee in its sole discretion shall deem appropriate. The Trustee shall promptly notify the City in writing of the Series 2026 Bonds so selected for redemption.

SECTION 16.05. Notice of Redemption of Series 2026 Bonds. The City shall notify the Trustee at least forty-five (45) days prior to the redemption date for Series 2026 Bonds pursuant to Section 16.03 (or such shorter time as may be agreed to by the Trustee). Notice of redemption shall be mailed by the Trustee, not less than twenty (20) nor more than sixty (60) days prior to the redemption date, (i) to the respective Owners of any Series 2026 Bonds designated for redemption at their addresses appearing on the bond registration books of the Trustee by first-class mail, (ii) to the Securities Depository by facsimile or other electronic means of communications and by first-class mail, and (iii) to EMMA at www.emma.msrb.org, by electronic means of communication, or to such other securities depositories or information services as the City may designate in a Request of the City delivered to the Trustee. Notice of redemption shall be given in the form and otherwise in accordance with the terms of the Master Water Revenue Bond Indenture and this Fifth Supplement.

The City has the right to rescind any notice of the optional redemption of Series 2026 Bonds by Request to the Trustee on or prior to the dated fixed for such redemption. Any notice of optional redemption shall be cancelled and annulled if for any reason funds will not be or are not available on the date fixed for redemption for the payment in full of the Series 2026 Bonds then called for redemption, and such cancellation will not constitute an Event of Default. The City and the Trustee shall have no liability to the Owners or any other party related to or arising from such rescission of notice of redemption. The Trustee shall provide notice of rescission of redemption in the same manner as the original notice of redemption was provided.

SECTION 16.06. Partial Redemption of Series 2026 Bonds. Upon surrender of any Series 2026 Bond redeemed in part only, the City shall execute and the Trustee shall authenticate and deliver to the Owner thereof, at the expense of the City, a new Series 2026 Bond of Authorized Denominations, and of the same maturity and interest rate, equal in aggregate principal amount to the unredeemed portion of the Series 2026 Bond surrendered.

SECTION 16.07. Effect of Redemption of Series 2026 Bonds. Notice of redemption having been duly given as aforesaid, and moneys for payment of the Redemption Price of, together with interest accrued to the redemption date on, the Series 2026 Bonds (or portions thereof) so called for redemption being held by the Trustee, on the redemption date designated in such notice, the Series 2026 Bonds (or portions thereof) so called for redemption shall become due and payable at the Redemption Price specified in such notice, together with interest accrued thereon to the date fixed for redemption, interest on the Series 2026 Bonds so called for redemption shall cease to accrue, said Series 2026 Bonds (or portions thereof) shall cease to be entitled to any benefit or security under the Master Water Revenue Bond Indenture, and the Owners of such Series 2026 Bonds shall have no rights in respect thereof except to receive payment of such Redemption Price and accrued interest.

All Series 2026 Bonds redeemed pursuant to the provisions of this Article shall be cancelled upon surrender thereof and destroyed.

SECTION 16.08. Form of Series 2026 Bonds. The Series 2026 Bonds and the certificate of authentication and registration to be executed thereon shall be in substantially the form set forth as Exhibit A hereto. The Series 2026 Bond designation letters and numbers, maturity dates, principal amounts, and interest rates shall be inserted therein in conformity with Section 16.02.

SECTION 16.09. Issuance of Series 2026 Bonds. At any time after the execution and delivery of this Fifth Supplement, the City may execute and the Trustee shall authenticate and deliver the Series 2026 Bonds in the aggregate principal amount of $[PAR AMOUNT] upon the Order of the City.

SECTION 16.10. Application of Proceeds of Series 2026 Bonds.

(A) The proceeds of the sale of the Series 2026 Bonds in the amount of $[____] (computed as $[PAR AMOUNT].00 aggregate principal amount of the Series 2026 Bonds, plus $[____] [net] original issue premium, and less $[____] Underwriter's discount), shall be received by the Trustee on behalf of the City and, together with certain other available amounts as described below, held in trust and set aside as follows:

(i) The Trustee shall transfer to the City for deposit in the Series 2026 Water System Fund from proceeds of the Series 2026 Bonds the amount of $[____], to be applied in accordance with Section 16.11 hereof; and

(ii) The Trustee shall deposit in the Series 2026 Costs of Issuance Fund from proceeds of the Series 2026 Bonds the amount of $[____], to be applied in accordance with Section 16.11 hereof.

SECTION 16.11. Establishment and Application of Series 2026 Water System Fund and Series 2026 Costs of Issuance Fund. The City shall establish, maintain and hold in trust a separate fund designated as the "Series 2026 Water System Fund." The moneys in the Series 2026 Water System Fund shall be used and withdrawn by the City to pay the costs (or reimburse the City for previously incurred costs) of the 2026 Water Project. Moneys on deposit in the Series 2026 Water System Fund may be invested by the Trustee in Investment Securities or the Local Agency Investment Fund pursuant to Requests of the City delivered to the Trustee. All interest, profit and other income received from the investment of moneys in the Series 2026 Water System Fund shall be credited to such Fund. The Trustee shall establish and maintain and hold in trust a special fund designated as the "Series 2026 Costs of Issuance Fund." The moneys in the Series 2026 Costs of Issuance Fund shall be used and withdrawn by the Trustee to pay the Costs of Issuance of the Series 2026 Bonds in accordance with directions of the City expressed in one or more Requisitions of the City delivered to the Trustee, in the form set forth as Exhibit B. Moneys on deposit in the Series 2026 Costs of Issuance Fund may be invested by the Trustee in Investment Securities or the Local Agency Investment Fund pursuant to Requests of the City delivered to the Trustee. All interest, profit and other income received from the investment of moneys in the Series 2026 Costs of Issuance Fund shall be credited to such Fund. If any sum shall remain unexpended in the Series 2026 Costs of Issuance Fund on March 1, 2027 it shall, at the direction of the City, be applied for any lawful purpose with respect to the Water System upon such terms and conditions as shall not, in the opinion of Bond Counsel, adversely affect the exclusion from gross income for federal income tax purposes of interest on the Series 2026 Bonds. Designation of Series 2026 Bonds as Non-Participating Bonds; No Reserve Fund. The Series 2026 Bonds shall not constitute Participating Bonds in accordance with the provisions of Section 3.02 of the Master Water Revenue Bond Indenture. The Reserve Fund Requirement for the Series 2026 Bonds shall be zero ($0).

SECTION 16.13. Tax Covenants. In furtherance of the covenants set forth in Sections 6.07 and 6.08 of the Indenture, in connection with the Series 2026 Bonds, the City hereby covenants as follows:

(A) *Special Definitions*. When used in this Section, the following terms have the following meanings:

"Code" means the Internal Revenue Code of 1986.

"Computation Date" has the meaning set forth in section 1.148-1(b) of the Treasury Regulations.

"Gross Proceeds," with respect to an issue, means any proceeds of that issue as defined in section 1.148-1(b) of the Treasury Regulations (referring to sale, investment and transferred proceeds), and any replacement proceeds of that issue as defined in section 1.148-1(c) of the Treasury Regulations.

"Investment" means (i) any security (within the meaning of section 165(g)(2)(A) or (B) of the Code), (ii) any obligation (notwithstanding that such obligation may be a tax-exempt bond), (iii) any annuity contract, (iv) when allocated to a bond other than a private activity bond, any residential rental property for family units that is not located within the jurisdiction of the

issuer and that is not acquired to implement a court ordered or approved housing desegregation plan, or (v) any investment-type property (as defined in section 1.148-1(e) of the Treasury Regulations).

"Nongovernmental Person" refers to any person or entity (including the United States or any agency, department and instrumentality thereof) other than a state or local government, or an agency or instrumentality acting solely on behalf thereof.

"Nonpurpose Investment," with respect to an issue, means any investment other than a tax-exempt bond that is not a specified private activity bond (within the meaning of section 57(a)(5)(C) of the Code), in which Gross Proceeds of that issue are invested and that is not acquired to carry out the governmental purposes of that issue.

"*Proceeds*," with respect to an issue of governmental obligations, has the meaning set forth in section 1.148-1(b) of the Treasury Regulations (referring to sale, investment and transferred proceeds, but not replacement proceeds, of that issue).

"Rebate Amount" has the meaning set forth in section 1.148-1(b) of the Treasury Regulations.

"Treasury Regulations" means the United States Treasury Regulations promulgated pursuant to sections 103 and 141 through 150 of the Code.

"Yield" shall have:

(1) with respect to any Investment or class of Investments, that meaning which is set forth in section 1.148-5 of the Treasury Regulations; and

(2) with respect to any issue, that meaning which is set forth in section 1.148-4 of the Treasury Regulations.

(B) *Not to Cause Interest to Become Taxable*. The City will take all actions necessary to establish and maintain the exclusion pursuant to section 103(a) of the Code of interest on the Series 2026 Bonds from the gross income of the owners thereof for federal income tax purposes, and will not use, permit the use of, or omit to use Gross Proceeds of the Series 2026 Bonds or any other amounts (or any property the acquisition, construction or improvement of which is to be financed directly or indirectly with such Gross Proceeds) in a manner that if made or omitted, respectively, would cause the interest on any of the Series 2026 Bonds to fail to be excluded pursuant to section 103(a) of the Code from the gross income of the owners thereof for federal income tax purposes. Without limiting the generality of the foregoing, unless and until the City receives a written Opinion of Bond Counsel to the effect that failure to comply with such covenant will not adversely affect the exclusion pursuant to section 103(a) of the Code of interest on any Series 2026 Bond from the gross income of the owner thereof, the City shall comply with this covenant and each of the specific covenants in this Section 16.13.

(C) *No Private Use or Private Payments*. Except as would not cause any Series 2026 Bond to become a "private activity bond" within the meaning of section 141 of the Code and

the Treasury Regulations and rulings thereunder, the City shall at all times prior to the final cancellation of the last of the Series 2026 Bonds to be retired:

(1) exclusively own, operate and possess all property the acquisition, construction or improvement of which is to be financed or refinanced directly or indirectly with proceeds of the Series 2026 Bonds and not use or permit the use of such proceeds (including through contractual arrangements with terms different than those applicable to the general public) or any property acquired, constructed or improved with such proceeds in any activity carried on by Nongovernmental Person that would create private business use described in section 141(b) of the Code; and

(2) not directly or indirectly impose or accept any charge or other payment by any person or entity in respect of the use by any Nongovernmental Person of proceeds of the Series 2026 Bonds or of any property the acquisition, construction or improvement of which is to be financed or refinanced directly or indirectly with such proceeds that would constitute a payment described in section 141(b)(2)(B) of the Code.

Without limiting the foregoing, except as would not cause any Series 2026 Bond to become a "private activity bond" within the meaning of section 141 of the Code and the Tax Regulations and rulings thereunder, the City will not: (i) permit any Nongovernmental Person to hold any ownership, proprietary or possessory interest in the financed property; (ii) contract with any Nongovernmental Person for the provision of operating or other services with respect to any function of the financed property (unless either (A) such arrangement requires no payment of fees to such Nongovernmental Person other than as direct reimbursement of third party costs or reasonable administrative overhead, or (B) such arrangement conforms to administrative guidance of the Internal Revenue Service in order to assure that such arrangement does not create a private business use relationship of the Nongovernmental Person to the financed property); or (iii) contract with any Nongovernmental Person for the sale of output or capacity of the financed property unless such contract does not result in private business use under section 1.141-7 of the Treasury Regulations.

(D) *No Private Loan*. Except as would not cause any Series 2026 Bond to become a "private activity bond" within the meaning of section 141 of the Code and the Treasury Regulations and rulings thereunder, the City shall not use proceeds of any Series 2026 Bond to make or finance any loan to any person or entity other than a state or local government. For purposes of the foregoing covenant, such proceeds are considered to be "loaned" to a person or entity not only if such proceeds are provided to such a person or entity under circumstances that create an indebtedness of that person or entity under local law or for federal income tax purposes, but also if: (a) property acquired, constructed or improved with such proceeds is sold or leased to such person or entity in a transaction that creates a debt for federal income tax purposes; (b) capacity in or service from such property is committed to such person or entity under a take-or-pay, output or similar contract or arrangement that has the effect of transferring a substantial proprietary interest in such property; or (c) indirect benefits of such proceeds, or burdens and benefits of ownership of any property acquired, constructed or improved with such proceeds, are otherwise transferred in a transaction that is the economic equivalent of a loan.

(E) *Not to Invest at Higher Yield*. Except as would not cause the Series 2026 Bonds to become "arbitrage bonds" within the meaning of section 148 of the Code and the Treasury Regulations and rulings thereunder, the City shall not, at any time prior to the final cancellation of the last Series 2026 Bond to be retired, directly or indirectly invest Gross Proceeds in any Investment, if as a result of such investment the Yield of any Investment or class of Investments acquired with Gross Proceeds, whether then held or previously disposed of, would materially exceed the Yield of the Series 2026 Bonds, all as determined in accordance with the provisions of said section 148 and Treasury Regulations and rulings.

(F) *Not Federally Guaranteed*. Except to the extent permitted by section 149(b) of the Code and the Treasury Regulations and rulings thereunder, the City shall not take or omit to take any action that would cause any Series 2026 Bond to be "federally guaranteed" within the meaning of section 149(b) of the Code and the Treasury Regulations and rulings thereunder. Without limitation of the foregoing, the City will not permit any portion of the debt service on the Series 2026 Bonds to be guaranteed (in whole or in part) by the United States, or more than 5% of the proceeds of the Series 2026 Bonds to be loaned to any person under which the obligation of that person to repay such loan is guaranteed (in whole or in part) by the United States, or more than 5% of the proceeds of the Series 2026 Bonds to be invested (directly or indirectly) in federally insured deposits or accounts. For this purpose, a guarantee or insurance by an agency or instrumentality of the United States will be treated as though made or provided by the United States.

(G) *Information Report*. The City shall timely file any information required by section 149(e) of the Code with respect to the Series 2026 Bonds with the Secretary of the Treasury on Form 8038-G or such other forms and in such place as the Secretary may prescribe.

(H) *Rebate of Arbitrage Profits*. Except to the extent otherwise provided in section 148(f) of the Code and the Treasury Regulations, in order to assure that no Series 2026 Bond is treated as an arbitrage bond:

(1) the City shall account for all Gross Proceeds of the Series 2026 Bonds (including all receipts, expenditures and investments thereof) on its books of account separately and apart from all other funds (and receipts, expenditures and investments thereof) and shall retain all records of accounting for at least six years after the day on which the last Series 2026 Bond is discharged. However, to the extent permitted by law, the City may commingle Gross Proceeds of Series 2026 Bonds with its other monies, provided that it separately accounts for each receipt and expenditure of Gross Proceeds and the obligations acquired therewith;

(2) not less frequently than each Computation Date, the City shall retain the services of a qualified rebate analyst to calculate the Rebate Amount in accordance with rules set forth in section 148(f) of the Code and the Treasury Regulations and rulings thereunder. The City promptly shall report to the Trustee the results of such calculation, including the basis therefor, in sufficient detail and on a timely basis in order that the City shall be able to comply with its covenants herein. The Trustee shall maintain a copy of the calculation with its official transcript of proceedings relating to the issuance of the Series 2026 Bonds until six years after the final Computation Date;

(3) to assure the excludability of the interest on Series 2026 Bonds from the gross income of the owners thereof for federal income tax purposes, the City shall pay to the Trustee for deposit into the Rebate Fund established herein an amount sufficient to permit the City timely to pay to the United States the amount that when added to the future value of previous rebate payments made for the Series 2026 Bonds equals (i) in the case of a Final Computation Date as defined in section 1.148-3(e)(2) of the Treasury Regulations, one hundred percent (100%) of the Rebate Amount on such date; and (ii) in the case of any other Computation Date, ninety percent (90%) of the Rebate Amount on such date. In all cases, such rebate payments shall be made by the City at the times and in the amounts as are or may be required by section 148(f) of the Code and the Treasury Regulations and rulings thereunder, and shall be accompanied by Form 8038-T or such other forms and information as is or may be required by section 148(f) of the Code and the Treasury Regulations and rulings thereunder for execution and filing by the City; and

(4) the City shall exercise reasonable diligence to assure that no errors are made in the calculations and payments required by paragraphs (2) and (3), and if an error is made, to discover and promptly correct such error within a reasonable amount of time thereafter (and in all events within one hundred eighty (180) days after discovery of the error), including by payment to the United States of any additional Rebate Amount owed to it, interest thereon, and any penalty imposed under section 1.148-3(h) or other provision of the Code or Treasury Regulations.

(I) *Not to Divert Arbitrage Profits*. Except to the extent permitted by section 148 of the Code and the Treasury Regulations and rulings thereunder, the City shall not, at any time prior to the final cancellation of the last of the Series 2026 Bonds to be retired, enter into any transaction that reduces the amount required to be paid to the United States pursuant to paragraph (H) of this Section because such transaction results in a smaller profit or a larger loss than would have resulted if the transaction had been at arm's length and had the Yield on the Series 2026 Bonds not been relevant to either party.

(J) *Series 2026 Bonds Not Hedge Bonds*. The City represents and covenants that none of the Series 2026 Bonds is or will become a "hedge bond" within the meaning of section 149(g) of the Code. Without limitation of the foregoing, (A) the City will not deliver the Series 2026 Bonds unless on the date of the issuance of the Series 2026 Bonds it reasonably expects that within the three-year period commencing on such date of issuance at least 85% of the spendable proceeds of the Series 2026 Bonds will be expended for the governmental purposes thereof and (B) the City covenants that at no time will more than 50% of such spendable proceeds of the Series 2026 Bonds be invested in Nonpurpose Investments having a substantially guaranteed yield for a period of four years or more.

(K) *Use of Proceeds; Weighted Average Maturity*. The City hereby represents and covenants that it will apply the proceeds of the Series 2026 Bonds in a manner so that the weighted average maturity of the Series 2026 Bonds does not exceed 120% of the average reasonably expected economic life of the facilities financed or refinanced therewith (all determined in accordance with the provisions of section 147(b) of the Code).

(L) *Elections*. The City hereby directs and authorizes each of the Mayor, the Vice Mayor, the City Manager, a Deputy City Manager, the City Treasurer, the Financial Services Director, the General Manager of Burbank Water and Power and the Chief Financial Officer of

Burbank Water and Power to make elections permitted or required pursuant to the provisions of the Code or the Treasury Regulations, as such authorized City representative (after consultation with Bond Counsel) deems necessary or appropriate in connection with the Series 2026 Bonds in the Tax Certificate or similar or other appropriate certificate, form or document.

(M) *Closing Certificate*. The City agrees to execute and deliver in connection with the issuance of Series 2026 Bonds a Tax Certificate as to Arbitrage and the Provisions of Sections 103 and 141-150 of the Code, or similar document containing additional representations and covenants pertaining to the excludability of interest on the Series 2026 Bonds from the gross income of the Owners for federal income tax purposes, which representations and covenants are incorporated as though expressly set forth herein.

SECTION 16.14. Terms of Series 2026 Bonds Subject to the Master Water Revenue Bond Indenture. Except as in this Fifth Supplement expressly provided, every term and condition contained in the Master Water Revenue Bond Indenture shall apply to the Fifth Supplement and to the Series 2026 Bonds with the same force and effect as if the same were herein set forth at length, with such omissions, variations and modifications thereof as may be appropriate to make the same conform to the Fifth Supplement.

The Fifth Supplement and all the terms and provisions herein contained shall form part of the Master Water Revenue Bond Indenture as fully and with the same effect as if all such terms and provisions had been set forth in the Master Water Revenue Bond Indenture. The Master Water Revenue Bond Indenture is hereby ratified and confirmed and shall continue in full force and effect in accordance with the terms and provisions thereof, as supplemented hereby.

SECTION 16.15. Effective Date of Fifth Supplement. The Fifth Supplement shall take effect upon its execution and delivery.

SECTION 16.16. Execution in Counterparts. The Fifth Supplement may be executed in several counterparts, each of which shall be deemed an original, and all of which shall constitute but one and the same instrument.

IN WITNESS WHEREOF, the parties hereto have executed the Fifth Supplement by their officers thereunto duly authorized as of the day and year first written above.

(FORM OF SERIES 2026 BOND)

No. ___ $_____

UNLESS THIS SERIES 2026 BOND IS PRESENTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY TO THE REGISTRAR FOR REGISTRATION OF TRANSFER, EXCHANGE, OR PAYMENT, AND ANY SERIES 2026 BOND ISSUED IS REGISTERED IN THE NAME OF CEDE & CO. OR IN SUCH OTHER NAME AS IS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY (AND ANY PAYMENT IS MADE TO CEDE & CO. OR TO SUCH OTHER ENTITY AS IS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY), ANY TRANSFER, PLEDGE, OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO ANY PERSON IS WRONGFUL INASMUCH AS THE REGISTERED OWNER HEREOF, CEDE & CO., HAS AN INTEREST HEREIN.

CITY OF BURBANK, CALIFORNIA
BURBANK WATER AND POWER WATER REVENUE BOND,
SERIES OF 2026

Maturity Date	Interest Rate	Dated Date	CUSIP
June 1, 20__	___%	____, 2026	12082U___

REGISTERED OWNER: CEDE & CO.

PRINCIPAL AMOUNT:

The CITY OF BURBANK, CALIFORNIA a municipal corporation and chartered city duly organized and existing under the Constitution and the laws of the State of California (the "City"), for value received, hereby promises to pay (but only out of the Water Net Revenues and funds hereinafter referred to) to the registered owner named above or registered assigns, on the maturity date specified above (subject to any right of prior redemption or payment as provided in the hereinafter mentioned Indenture), the principal sum specified above together with interest thereon from the dated date specified above until the principal hereof shall have been paid, at the interest rate per annum specified above, payable semiannually on June 1 and December 1 in each year, commencing on June 1, 2027. Interest hereon is payable in lawful money of the United States of America by (except as otherwise provided in the hereinafter mentioned Indenture) check mailed by first-class mail on each interest payment date to the registered owner as of the close of business on the 15th day of the calendar month immediately preceding such interest payment date. The

principal hereof and premium, if any, hereon are payable when due upon presentation hereof at the Corporate Trust Office (as defined in the Indenture) of U.S. Bank Trust Company, National Association, as successor trustee (together with any successor as trustee under said Indenture, the "Trustee"), in lawful money of the United States of America.

This bond is one of a duly authorized issue of City of Burbank, California, Burbank Water and Power Water Revenue Bonds (the "Bonds") of the series and designation indicated on the face hereof. Such authorized issue of Bonds is not limited in aggregate principal amount, except as otherwise provided in the hereinafter mentioned Indenture, and consists or may consist of one or more series of varying denominations, dates, maturities, interest rates and other provisions, as in said Indenture provided, all issued and to be issued pursuant to the provisions of Article 12 of Chapter 4 of Title 2 of the City Code. This Bond is issued pursuant to a Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010, by and between the City and the Trustee and a Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of [_____ 1], 2026 (the "Fifth Supplement"), by and between the City and the Trustee, authorizing the issuance of a Series of Bonds of which this Bond is one (such indenture as amended and supplemented, including as supplemented by the Fifth Supplement, collectively, the "Indenture"). Reference is hereby made to the Indenture for a description of the terms under which the Bonds are issued and to be issued, the provisions with regard to the nature and extent of the Water Net Revenues (as that term is defined in the Indenture), and the rights of the registered owners of the Bonds; and all the terms of the Indenture are hereby incorporated herein and constitute a contract between the City and the registered owner from time to time of this Bond, and to all the provisions thereof the registered owner of this Bond, by its acceptance hereof, consents and agrees. Additional Bonds may be issued, and indebtedness may be incurred, on a parity with the Bonds of this authorized issue, but only subject to the conditions and limitations contained in the Indenture.

The Bonds and the Parity Debt (as defined in the Indenture) hereafter issued by the City are payable from, and are secured by a pledge of and lien on, the Water Net Revenues and all amounts held by the Trustee under the Indenture (except for amounts held in the Rebate Fund), subject only to the provisions of the Indenture permitting the application thereof for the purposes and on the terms and conditions provided in the Indenture.

The Bonds are revenue obligations of the City and are payable as to both principal and interest, and any premium upon redemption thereof, exclusively from Water Net Revenues and certain other funds pledged under the Indenture. The Bonds are special, limited obligations of the City. The Bonds shall not be deemed to constitute a debt or liability of the City, the State of California or of any political subdivision thereof within the meaning of any constitutional or statutory provision, or a pledge of the faith and credit of the City, the State of California or of any political subdivision thereof, but shall be payable, except to the extent of certain amounts held under the Indenture pledged therefor, solely from Water Net Revenues. Neither the faith and credit nor the taxing power of the City, the State of California or of any political subdivision thereof is pledged to the payment of the principal of, premium, if any, or the interest on the Bonds. The issuance of the Bonds shall not directly or indirectly or contingently obligate the City, the State of California or any political subdivision thereof to levy or to pledge any form of taxation whatsoever therefor or to make any appropriation for their payment.

The Bonds are subject to redemption as provided in the Fifth Supplement and as otherwise provided in the Indenture.

This Bond is transferable or exchangeable for other Authorized Denominations by the registered owner hereof, in person or by its duly authorized attorney, at the Corporate Trust Office of the Trustee, but only in the manner, subject to the limitations and upon payment of the charges provided in the Indenture, and upon surrender and cancellation of this Bond. Upon such transfer or exchange a new fully registered Bond or Bonds, of Authorized Denomination or Denominations, of the same series, tenor, maturity and interest rate for the same aggregate principal amount will be issued to the registered owner in exchange therefor.

The City, the Trustee and any paying agent may deem and treat the registered owner hereof as the absolute owner hereof for all purposes, and the City, the Trustee and any paying agent shall not be affected by any notice to the contrary.

The rights and obligations of the City and of the registered owners of the Bonds may be modified or amended at any time in the manner, to the extent, and upon the terms provided in the Indenture, which provide, in certain circumstances, for modifications and amendments without the consent of or notice to the registered owners of the Bonds.

It is hereby certified and recited that any and all acts, conditions and things required to exist, to happen and to be performed, precedent to and in the incurring of the indebtedness evidenced by this Bond, and in the issuing of this Bond, do exist, have happened and have been performed in due time, form and manner, as required by the Constitution and statutes of the State of California, and that this Bond, together with all other indebtedness of the City pertaining to the Water Net Revenues, is within every debt and other limit prescribed by the Constitution and the statutes of the State of California, and is not in excess of the amount of Bonds permitted to be issued under the Indenture or otherwise.

This Bond shall not be entitled to any benefit under the Indenture, or become valid or obligatory for any purpose, until the certificate of authentication hereon endorsed shall have been manually signed by the Trustee.

Capitalized terms used but not defined herein shall have the meanings assigned to them in the Indenture.

IN WITNESS WHEREOF, THE CITY OF BURBANK, CALIFORNIA has caused this Bond to be executed in its name and on its behalf by the Financial Services Director of the City and countersigned by the City Clerk or Assistant City Clerk by their facsimile or manual signatures and the seal of the City to be reproduced hereon.

CONTINUING DISCLOSURE AGREEMENT

$_____
CITY OF BURBANK, CALIFORNIA
Burbank Water and Power Water Revenue Bonds, Series of 2026

This Continuing Disclosure Agreement (this "Disclosure Agreement"), dated as of _____, 2026, is by and between the City of Burbank, a municipal corporation and chartered city duly organized and existing under the Constitution and the laws of the State of California (the "City"), and U.S. Bank Trust Company, National Association, as dissemination agent (the "Dissemination Agent").

RECITALS

WHEREAS, this Disclosure Agreement is being executed and delivered by the City and the Dissemination Agent in connection with the issuance by the City of the $_____ City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "2026 Bonds").

WHEREAS, the 2026 Bonds are being issued pursuant to a Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture dated as of [_____ 1], 2026, which supplements and amends the Burbank Water and Power Water Revenue Bond Indenture dated as of November 1, 2010 (as supplemented, the "Indenture"), by and between the City and U.S. Bank Trust Company, National Association, as successor trustee for the 2026 Bonds (the "Trustee").

NOW, THEREFORE, for and in consideration of the mutual premises and covenants herein contained, the parties hereto agree as follows:

Section 1. Purpose of the Disclosure Agreement. This Disclosure Agreement is being executed and delivered by the City and the Dissemination Agent for the benefit of the holders and beneficial owners of the 2026 Bonds and in order to assist the Participating Underwriters in complying with S.E.C. Rule 15c2-12.

Section 2. Definitions. In addition to the definitions set forth above and in the Indenture, which apply to any capitalized term used in this Disclosure Agreement unless otherwise defined in this Section, the following capitalized terms shall have the following meanings:

"*Annual Report*" means any Annual Report provided by the City pursuant to, and as described in, Sections 3 and 4 of this Disclosure Agreement.

"*Annual Report Date*" means the date that is nine months after the end of the City's fiscal year (currently March 31 based on the City's fiscal year end of June 30).

"*Dissemination Agent*" shall mean U.S. Bank Trust Company, National Association, or any Dissemination Agent designated in writing by the City and which has filed with the City a written acceptance of such designation.

"*EMMA System*" shall mean the MSRB's Electronic Municipal Market Access system, or such other electronic system designated by the MSRB.

"*Listed Events*" means any of the events listed in Section 5(a) of this Disclosure Agreement.

"*MSRB*" means the Municipal Securities Rulemaking Board, which has been designated by the Securities and Exchange Commission as the sole repository of disclosure information for purposes of the Rule.

"*Official Statement*" means the final official statement dated _____, 2026, executed by the City in connection with the issuance of the 2026 Bonds.

"Participating Underwriters" means J.P. Morgan Securities LLC and Stern Brothers & Co., the original underwriters of the 2026 Bonds required to comply with the Rule in connection with offering of the 2026 Bonds.

"*Rule*" *means* Rule 15c2-12 adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934, as it may be amended from time to time.

Section 3. Provision of Annual Reports.

(a) The City shall, or shall cause the Dissemination Agent to, not later than the Annual Report Date, commencing March 31, [2027], with the report for the [2025-26] fiscal year, provide to the MSRB, in an electronic format as prescribed by the MSRB, an Annual Report that is consistent with the requirements of Section 4 of this Disclosure Agreement. Not later than 15 Business Days prior to the Annual Report Date, the City shall provide the Annual Report to the Dissemination Agent (if other than the City). If by the Annual Report Date the Dissemination Agent (if other than the City) has not received a copy of the Annual Report, the Dissemination Agent shall contact the City to determine if the City is in compliance with the previous sentence. The Annual Report may be submitted as a single document or as separate documents comprising a package, and may include by reference other information as provided in Section 4 of this Disclosure Agreement; provided that the audited financial statements of the City's Water Utility Enterprise Fund may be submitted separately from the balance of the Annual Report, and later than the Annual Report Date, if not available by that date. If the City's fiscal year changes, it shall give notice of such change in the same manner as for a Listed Event under Section 5(b).

(b) If the City does not provide, or cause the Dissemination Agent to provide, an Annual Report by the Annual Report Date as required in subsection (a) above, the Dissemination Agent shall provide a notice to the MSRB, in a timely manner, in an electronic format as prescribed by the MSRB.

(c) With respect to each Annual Report, the Dissemination Agent shall:

(i) determine each year prior to the Annual Report Date the then-applicable rules and electronic format prescribed by the MSRB for the filing of annual continuing disclosure reports; and

(ii) if the Dissemination Agent is other than the City, file a report with the City and the Participating Underwriters certifying that the Annual Report has been provided pursuant to this Disclosure Agreement, and stating the date it was provided.

Section 4. Content of Annual Reports. The City's Annual Report shall contain or incorporate by reference the following documents and information:

(a) The audited financial statements for the City's Water Utility Enterprise Fund for the most recently completed fiscal year, prepared in accordance with Generally Accepted Accounting Principles as promulgated to apply to governmental entities from time to time by the Governmental Accounting Standards Board. If the audited financial statements for the City's Water Utility Enterprise

Fund are not available by the Annual Report Date, the Annual Report shall contain unaudited financial statements in a format similar to the financial statements contained in the Official Statement, and the audited financial statements shall be filed in the same manner as the Annual Report when they become available.

(b) Unless otherwise provided in the audited financial statements filed on or before the Annual Report Date, financial information and operating data with respect to the City for the preceding fiscal year, substantially similar to that provided in the corresponding tables in the Official Statement:

(i) Principal amount of 2026 Bonds outstanding as of the end of such fiscal year.

(ii) Updated information comparable to the information in the table titled "BURBANK WATER AND POWER - Customers, Water Sales, Water Revenues and Maximum Day Demand" as it appears in the Official Statement.

(iii) Updated information comparable to the information in the table titled "BURBANK WATER AND POWER - WEIGHTED AVERAGE BILLING PRICE" as it appears in the Official Statement.

(iv) Updated information comparable to the information in the table titled "BURBANK WATER AND POWER - HISTORICAL NET REVENUES AND DEBT SERVICE COVERAGE - WATER SYSTEM" as it appears in the Official Statement.

(c) In addition to any of the information expressly required to be provided under paragraph (b) above, the City shall provide such further material information, if any, as may be necessary to make the specifically required statements, in the light of the circumstances under which they are made, not misleading.

(d) Any or all of the items listed above may be included by specific reference to other documents, including official statements of debt issues of the City or related public entities, which are available to the public on the MSRB's Internet web site or filed with the Securities and Exchange Commission. The City shall clearly identify each such other document so included by reference.

Section 5. Reporting of Listed Events.

(a) The City shall give, or cause to be given, notice of the occurrence of any of the following Listed Events with respect to the 2026 Bonds:

(1) Principal and interest payment delinquencies.

(2) Non-payment related defaults, if material.

(3) Unscheduled draws on debt service reserves reflecting financial difficulties.

(4) Unscheduled draws on credit enhancements reflecting financial difficulties.

(5) Substitution of credit or liquidity providers, or their failure to perform.

(6) Adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue

(IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the 2026 Bonds, or other material events affecting the tax status of the 2026 Bonds.

(7) Modifications to rights of security holders, if material.

(8) Bond calls, if material, and tender offers.

(9) Defeasances.

(10) Release, substitution, or sale of property securing repayment of the securities, if material.

(11) Rating changes.

(12) Bankruptcy, insolvency, receivership or similar event of the City.

(13) The consummation of a merger, consolidation, or acquisition involving the City, or the sale of all or substantially all of the assets of the City (other than in the ordinary course of business), the entry into a definitive agreement to undertake such an action, or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material.

(14) Appointment of a successor or additional Trustee or the change of name of the Trustee, if material.

(15) Incurrence of a financial obligation of the obligated person, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a financial obligation of the obligated person, any of which affect security holders, if material.

(16) (Default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a financial obligation of the obligated person, any of which reflect financial difficulties.

(b) Upon the occurrence of a Listed Event, the City shall, or shall cause the Dissemination Agent (if not the City) to, file a notice of such occurrence with the MSRB, in an electronic format as prescribed by the MSRB, in a timely manner not in excess of 10 Business Days after the occurrence of the Listed Event. Notwithstanding the foregoing, notice of Listed Events described in subsection (a)(8) above need not be given under this subsection any earlier than the notice (if any) of the underlying event is given to holders of affected Bonds under the Indenture.

(c) The City acknowledges that the events described in subparagraphs (a)(2), (a)(7), (a)(8) (if the event is a bond call), (a)(10), (a)(13), (a)(14), and (a)(15) of this Section 5 contain the qualifier "if material" and that subparagraph (a)(6) also contains the qualifier "material" with respect to certain notices, determinations or other events affecting the tax status of the 2026 Bonds. The City shall cause a notice to be filed as set forth in paragraph (b) above with respect to any such event only to the extent that it determines the event's occurrence is material for purposes of U.S. federal securities law. Upon occurrence of any of these Listed Events, the City will as soon as possible determine if such event would be material

under applicable federal securities law. If such event is determined to be material, the City will cause a notice to be filed as set forth in paragraph (b) above.

(d) For purposes of this Disclosure Agreement, any event described in paragraph (a)(12) above is considered to occur when any of the following occur: the appointment of a receiver, trustee, or similar officer for the City in a proceeding under the United States Bankruptcy Code or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the City, or if such jurisdiction has been assumed by leaving the existing governing body and officials or officers in possession but subject to the supervision and orders of a court or governmental authority, or the entry of an order confirming a plan of reorganization, arrangement, or liquidation by a court or governmental authority having supervision or jurisdiction over substantially all of the assets or business of the City.

(e) For purposes of Section 5(a)(15) and (16), "financial obligation" means a (i) debt obligation; (ii) derivative instrument entered into in connection with, or pledged as security or a source of payment for, an existing or planned debt obligation; or (iii) guarantee of (i) or (ii). The term financial obligation shall not include municipal securities as to which a final official statement has been provided to the Municipal Securities Rulemaking Board consistent with the Rule.

Section 6. Identifying Information for Filings with the MSRB. All documents provided to the MSRB under the Disclosure Agreement shall be accompanied by identifying information as prescribed by the MSRB.

Section 7. Termination of Reporting Obligation. The City's obligations under this Disclosure Agreement shall terminate upon the legal defeasance, prior redemption or payment in full of all of the 2026 Bonds. If such termination occurs prior to the final maturity of the 2026 Bonds, the City shall give notice of such termination in the same manner as for a Listed Event under Section 5(b).

Section 8. Dissemination Agent. The City may, from time to time, appoint or engage a Dissemination Agent to assist it in carrying out its obligations under this Disclosure Agreement, and may discharge any such Agent, with or without appointing a successor Dissemination Agent. The Dissemination Agent may resign by providing 30 days' written notice to the City.

Section 9. Amendment; Waiver. Notwithstanding any other provision of this Disclosure Agreement, the City and the Dissemination Agent may amend this Disclosure Agreement (and the Trustee shall agree to any amendment so requested by the City; provided, however, that the Dissemination Agent shall not be obligated to enter into any amendment increasing or affecting its duties or obligations), and any provision of this Disclosure Agreement may be waived, provided that the following conditions are satisfied:

(a) if the amendment or waiver relates to the provisions of Sections 3(a), 4 or 5(a), it may only be made in connection with a change in circumstances that arises from a change in legal requirements, change in law, or change in the identity, nature, or status of an obligated person with respect to the 2026 Bonds, or type of business conducted;

(b) the undertakings herein, as proposed to be amended or waived, would, in the opinion of nationally recognized bond counsel, have complied with the requirements of the Rule at the time of the primary offering of the 2026 Bonds, after taking into account any amendments or interpretations of the Rule, as well as any change in circumstances; and

(c) the proposed amendment or waiver either (i) is approved by holders of the 2026 Bonds in the manner provided in the Indenture for amendments to the Indenture with the consent of holders, or (ii) does not, in the opinion of the Trustee or nationally recognized bond counsel, materially impair the interests of the holders or beneficial owners of the 2026 Bonds.

If the annual financial information or operating data to be provided in the Annual Report is amended pursuant to the provisions hereof, the first annual financial information filed pursuant hereto containing the amended operating data or financial information shall explain, in narrative form, the reasons for the amendment and the impact of the change in the type of operating data or financial information being provided.

If an amendment is made to the undertaking specifying the accounting principles to be followed in preparing financial statements, the annual financial information for the year in which the change is made shall present a comparison between the financial statements or information prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles. The comparison shall include a qualitative discussion of the differences in the accounting principles and the impact of the change in the accounting principles on the presentation of the financial information, in order to provide information to investors to enable them to evaluate the ability of the City to meet its obligations. To the extent reasonably feasible, the comparison shall be quantitative. A notice of the change in the accounting principles shall be filed in the same manner as for a Listed Event under Section 5(b).

Section 10. Additional Information. Nothing in this Disclosure Agreement shall be deemed to prevent the City from disseminating any other information, using the means of dissemination set forth in this Disclosure Agreement or any other means of communication, or including any other information in any Annual Report or notice of occurrence of a Listed Event, in addition to that which is required by this Disclosure Agreement. If the City chooses to include any information in any Annual Report or notice of occurrence of a Listed Event in addition to that which is specifically required by this Disclosure Agreement, the City shall have no obligation under this Disclosure Agreement to update such information or include it in any future Annual Report or notice of occurrence of a Listed Event.

Section 11. Default. In the event of a failure of the City to comply with any provision of this Disclosure Agreement, the Dissemination Agent may (and, at the written direction of any Participating Underwriter or any holder or beneficial owner of the 2026 Bonds shall, upon receipt of indemnification reasonably satisfactory to the Dissemination Agent) take such actions as may be necessary and appropriate, including seeking mandate or specific performance by court order, to cause the City to comply with its obligations under this Disclosure Agreement. A default under this Disclosure Agreement shall not be deemed an Event of Default under the Indenture, and the sole remedy under this Disclosure Agreement in the event of any failure of the City to comply with this Disclosure Agreement shall be an action to compel performance.

Section 12. Duties, Immunities and Liabilities of Dissemination Agent. The Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement, and the City agrees to indemnify and save the Dissemination Agent, its officers, directors, employees and agents, harmless against any loss, expense and liabilities which it may incur arising out of or in the exercise or performance of its powers and duties hereunder, including the costs and expenses (including attorneys' fees) of defending against any claim of liability, but excluding liabilities due to the Dissemination Agent's negligence or willful misconduct. The Dissemination Agent shall have no duty or obligation to review any information provided to it hereunder and shall not be deemed to be acting in any fiduciary capacity for the City, the Trustee, the 2026 Bond owners or any other party. The obligations of the City under this Section shall survive resignation or removal of the Dissemination Agent and payment of the 2026 Bonds.

Section 13. Beneficiaries. This Disclosure Agreement shall inure solely to the benefit of the City, the Trustee, the Dissemination Agent, the Participating Underwriters and holders and beneficial owners from time to time of the 2026 Bonds, and shall create no rights in any other person or entity.

Section 14. Counterparts. This Disclosure Agreement may be executed in several counterparts, each of which shall be regarded as an original, and all of which shall constitute one and the same instrument.

[Remainder of page intentionally left blank]

IN WITNESS WHEREOF, the parties hereto have executed this Disclosure Agreement as of the date first above written.

CITY OF BURBANK, CALIFORNIA
Burbank Water and Power
Water Revenue Bonds, Series of 2026

BOND PURCHASE AGREEMENT

_____ __, 2026

City of Burbank
275 East Olive Avenue
Burbank, California 91502

Ladies and Gentlemen:

The undersigned, J.P. Morgan Securities LLC, as representative (the "Representative") of itself and Stern Brothers & Co. (each, an "Underwriter" and collectively, the "Underwriters"), hereby offers to enter into this Bond Purchase Agreement (the "Purchase Agreement") with the City of Burbank, California (the "City"), which, upon the acceptance of this offer by the City, will be binding upon the City and the Underwriters. This offer is made subject to written acceptance by the City prior to 11:59 P.M., California time, on the date hereof. If this offer is not so accepted, this offer will be subject to withdrawal by the Underwriters upon notice delivered to the City at any time prior to acceptance by the City. All capitalized terms used herein and not otherwise defined herein shall have the respective meanings ascribed thereto in the Official Statement (as hereinafter defined). The Representative represents and warrants to the City that it has been duly authorized to execute this Purchase Agreement and to take any action hereunder on behalf of the Underwriters.

1. Purchase, Sale and Delivery of the Bonds.

(a) Subject to the terms and conditions, and in reliance upon the representations, warranties and agreements set forth herein, the Underwriters hereby agree, jointly and severally, to purchase from the City, and the City agrees to sell and deliver to the Underwriters, all (but not less than all) of the $_____ aggregate principal amount of the City's Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "Bonds"). The purchase price for the Bonds shall be $_____ (representing the $_____ aggregate principal amount of the Bonds, plus $_____ of original issue premium, less $_____ of Underwriters' discount).

(b) The Bonds are authorized and being issued pursuant to Article 12 of Chapter 4 of Title 2 of the Burbank Municipal Code, as amended (the "City Code"), and a resolution adopted by the City Council of the City on _____ __, 2026 (the "Bond Resolution"). The Bonds will also be issued pursuant to the Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Master Water Revenue Bond Indenture"), by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee"), as supplemented and amended, including as supplemented and amended by the [Fifth] Supplemental Burbank Water

and Power Water Revenue Bond Indenture, dated as of _____ 1, 2026 (the "Fifth Supplemental Indenture"), by and between the City and the Trustee, relating to the Bonds. The Master Water Revenue Bond Indenture, as previously supplemented and amended, and as supplemented and amended by the Fifth Supplemental Indenture, is referred to herein as the "Indenture."

The Bonds shall be dated the date of delivery thereof and shall mature on such dates, bear interest at such rates and be subject to redemption, all as set forth in Schedule I attached hereto. Interest on the Bonds shall be payable semiannually on June 1 and December 1 of each year, commencing June 1, 2027. The Bonds shall be substantially in the form described in, and shall be issued and secured under the provisions of, the Indenture. The Bonds are secured by a pledge of the Water Net Revenues (as defined in the Indenture) and other funds pledged therefor under the Indenture and will otherwise have such terms as are described in the Official Statement. The Bonds are being issued to (i) finance a portion of the costs of the 2026 Water Project (as defined in the Official Statement), and (ii) pay costs of issuance of the Bonds.

The City will undertake, pursuant to a Continuing Disclosure Agreement relating to the Bonds (the "Continuing Disclosure Agreement"), to provide certain annual financial information and operating data relating to the Water System and notices of the occurrence of certain events. A description of this undertaking and the proposed form of Continuing Disclosure Agreement are set forth in the Preliminary Official Statement (as defined herein) and will be set forth in the Official Statement (as defined herein).

(c) At 8:00 A.M., California time, on _____ __, 2026 or at such other time or on such other date as mutually agreed upon by the City and the Representative (such time and date herein referred to as the "Closing Date"), the City will, subject to the terms and conditions hereof, sell and deliver, or cause to be delivered, the Bonds to the Underwriters, in definitive form, duly executed and authenticated, together with the other documents mentioned herein, and subject to the terms and conditions hereof, the Underwriters will accept such delivery and pay the purchase price of the Bonds as set forth in paragraph (a) above, in immediately available funds (such delivery and payment being herein referred to as the "Closing") to the order of the Trustee. Sale, delivery and payment as aforesaid shall be made at the offices of Norton Rose Fulbright US LLP ("Bond Counsel"), 555 South Flower Street, 41st Floor, Los Angeles, California, or such other place (or via such electronic means) as shall have been mutually agreed upon by the City and the Representative, except that the Bonds shall be delivered through the Trustee via the Fast Automated Securities Transfer (FAST) book-entry system of The Depository Trust Company ("DTC") in New York, New York, in fully registered book-entry eligible form (which may be typewritten) and registered in the name of Cede & Co. as nominee of DTC.

2. Establishment of Issue Price of the Bonds.

(a) The Representative, on behalf of the Underwriters, agrees to assist the City in establishing the issue price of the Bonds and shall execute and deliver to the City at or before the Closing Date an "issue price" or similar certificate, together with the supporting pricing wires or equivalent communications, substantially in the form attached hereto as Exhibit D, with such modifications as may be appropriate or necessary, in the reasonable judgment of the Representative, the City and Bond Counsel (as hereinafter defined), to accurately reflect, as applicable, the sales price or prices or the initial offering price or prices to the public of the Bonds.

(b) With respect to Bonds of those maturities as to which at least 10% of the Bonds of the maturity has been sold to the public (as defined in paragraph (f) below) at a single price (the "10% test" or "General Rule"), based on reporting by the Underwriters to the City on the date hereof and prior to the execution of this Purchase Agreement, which maturities are indicated in Schedule I attached hereto as having satisfied the General Rule (the "General Rule Maturities"), the City will treat the first price at which 10% of each such maturity of the Bonds was sold to the public as the issue price of that maturity. With respect to Bonds of those maturities as to which the General Rule has not been satisfied, based on reporting by the Underwriters to the City on the date hereof and prior to the execution of this Purchase Agreement, which maturities are indicated in Schedule I attached hereto as being subject to the "hold-the-offering-price rule," defined below (the "Hold-the-Offering-Price Maturities"), if any, the Underwriters and the City agree that the rules in paragraph (c) below shall apply. For purposes of this section, for Bonds maturing on the same date but having different interest rates, each separate group of Bonds having a different interest rate is subject to the General Rule or paragraph (c) below, as the case may be, as if such separate group of Bonds were a separate maturity.

(c) The Underwriters agree to make a bona fide offering of the Bonds to the public on or before the date of this Purchase Agreement at the offering price or prices (the "initial offering price"), or the corresponding yields, set forth in the final Official Statement and on Schedule I attached hereto. Schedule I also sets forth, identified under the column "Hold-the-Offering Price Rule Used," as of the date of this Purchase Agreement, the maturities, if any, of the Bonds for which the 10% test has not been satisfied and for which the City and the Underwriters agree that the restrictions set forth in the next sentence shall apply, which will allow the City to treat the initial offering price to the public of each such maturity as of the sale date as the issue price of that maturity (the "hold-the-offering-price rule"). So long as the hold-the-offering-price rule remains applicable to any maturity of the Bonds, the Underwriters will neither offer nor sell unsold Bonds of that maturity, if any, to any person at a price that is higher than the initial offering price to the public during the period starting on the sale date and ending on the earlier of the following:

(1) the close of the fifth (5th) business day after the sale date; or

(2) the date on which the Underwriters have sold at least 10% of that maturity of the Bonds to the public at a price that is no higher than the initial offering price to the public.

The Representative will advise the City promptly after the close of the fifth (5th) business day after the sale date whether it has sold, within such five-business-day period, at least 10% of each such maturity of the Bonds, if any, to the public at a price that is no higher than the initial offering price to the public.

(d) The Representative confirms that:

(i) any agreement among underwriters, any selling group agreement, and each third-party distribution agreement to which the Representative is a party, relating to the initial sale of the Bonds to the public, if applicable, together with the related pricing wires, contains or will contain language obligating each underwriter, each dealer who is a member of the selling group and each broker-dealer that is a party to such retail or other third-party distribution agreement, as applicable, to (A) comply with the hold-the-offering-price rule, if applicable, if and for so long as directed by the Representative; (B) promptly notify the

Representative of any sales of Bonds that, to its knowledge, are made to a purchaser who is a related party to an underwriter participating in the initial sale of the Bonds to the public (each such term being used as defined below), and (C) acknowledge that, unless otherwise advised by such underwriter, dealer or broker-dealer, the Representative shall assume that each order submitted by such underwriter, dealer or broker-dealer is a sale to the public; and

(ii) any agreement among underwriters or selling group agreement relating to the initial sale of the Bonds to the public, if applicable, together with the related pricing wires, contains or will contain language obligating each underwriter or dealer that is a party to a third-party distribution agreement to be employed in connection with the initial sale of the Bonds to the public to require each broker-dealer that is a party to such third-party distribution agreement to comply with the hold-the-offering-price rule, if applicable, in each case if and for so long as directed by the Representative, the underwriter or the dealer and as set forth in the related pricing wires.

(e) The City acknowledges that, in making the representations set forth in this Section, the Representative will rely on (i) the agreement of each Underwriter to comply with the requirements for establishing the issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds, as set forth in an agreement among underwriters and the related pricing wires (ii) in the event a selling group has been created in connection with the initial sale of the Bonds to the public, the agreement of each dealer who is a member of the selling group to comply with the requirements for establishing issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds, as set forth in a selling group agreement and the related pricing wires, (iii) in the event an Underwriter or a dealer who is a member of the selling group is a party to a third-party distribution agreement that was employed in connection with the initial sale of the Bonds to the public, the agreement of each broker-dealer that is a party to such agreement to comply with the requirements for establishing issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds, as set forth in the third-party distribution agreement and the related pricing wires. The City further acknowledges that each Underwriter shall be solely liable for its failure to comply with its agreement regarding the requirements for establishing the issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds, and that no Underwriter shall be liable for the failure of any other Underwriter, or of any dealer who is a member of a selling group, or of any broker-dealer that is a party to a third-party distribution agreement, to comply with the requirements for establishing issue price of the Bonds, including, but not limited to, its corresponding agreement regarding the requirements regarding the establishment of the issue price of the Bonds, including, but not limited to, its agreement to comply with the hold-the-offering-price rule, if applicable to the Bonds.

(f) The Underwriters acknowledge that sales of any Bonds to any person that is a related party to an underwriter participating in the initial sale of the Bonds to the public shall not constitute sales to the public for purposes of this section. Further, for purposes of this section:

(1) "public" means any person other than an underwriter or a related party,

(2) "underwriter" (when used with a lower case "u") means (A) any person that agrees pursuant to a written contract with the City (or with the lead underwriter to form an underwriting syndicate) to participate in the initial sale of the Bonds to the public and (B) any

person that agrees pursuant to a written contract directly or indirectly with a person described in clause (A) to participate in the initial sale of the Bonds to the public (including a member of a selling group or a party to a third-party distribution agreement participating in the initial sale of Bonds to the public),

(3) a purchaser of any of Bonds is a "related party" to an underwriter if the underwriter and the purchaser are subject, directly or indirectly, to (A) more than 50% common ownership of the voting power or the total value of their stock, if both entities are corporations (including direct ownership by one corporation of another), (B) more than 50% common ownership of their capital interests or profits interests, if both entities are partnerships (including direct ownership by one partnership of another), or (C) more than 50% common ownership of the value of the outstanding stock of the corporation or the capital interests or profit interests of the partnership, as applicable, if one entity is a corporation and the other entity is a partnership (including direct ownership of the applicable stock or interests by one entity of the other), and

(4) "sale date" means the date of execution of this Purchase Agreement by all parties.

3. Use and Preparation of Official Statement. The City hereby ratifies, confirms and approves of the use and distribution by the Underwriters prior to the date hereof of an official statement in preliminary form dated _____ __, 2026 relating to the Bonds (which, together with all appendices thereto, is referred to herein as the "Preliminary Official Statement"). The City has deemed final the Preliminary Official Statement as of its date for purposes of Rule 15c2-12 promulgated under the Securities Exchange Act of 1934 ("Rule 15c2-12"), except for information permitted to be omitted therefrom by Rule 15c2-12. The City hereby acknowledges that the Preliminary Official Statement has been made available to investors in electronic form. The City hereby agrees to deliver or cause to be delivered to the Underwriters, within seven (7) business days of the date hereof and at least in sufficient time to accompany any orders or confirmations that request payment from any customer, copies of the final official statement, dated the date hereof (which, together with all information previously permitted to have been omitted by Rule 15c2-12 and any amendments or supplements to such official statement as have been approved by the City and the Underwriters is referred to herein as the "Official Statement") in sufficient quantity to enable the Underwriters to comply with the rules of the Securities and Exchange Commission and the Municipal Securities Rulemaking Board. The City hereby approves of the use and distribution by the Underwriters of the Official Statement in connection with the offer and sale of the Bonds and acknowledges that the Official Statement may be made available to investors in electronic form. At the time of or prior to the Closing Date, the Representative shall file a copy of the Official Statement in electronic form with, and as permitted by, the Municipal Securities Rulemaking Board through its Electronic Municipal Market Access System. The Representative shall advise the City of the date of such filing.

4. Representations and Warranties of the City. The City hereby represents and warrants to the Underwriters that, as of the date hereof and the Closing Date:

(a) The City is a municipal corporation and a charter city duly organized and existing under and pursuant to the Constitution and laws of the State of California and the Charter of the City.

(b) The City has full legal right, power and authority to issue the Bonds, to sell the Bonds to the Underwriters as provided in this Purchase Agreement, to execute and deliver the Indenture, the Continuing Disclosure Agreement, the Official Statement and this Purchase Agreement.

(c) The Bond Resolution has been duly and validly adopted by the City and is in full force and effect, and this Purchase Agreement has been duly authorized, executed and delivered by the City and, assuming due authorization and execution thereof by the Representative, constitutes a legal, valid and binding agreement of the City enforceable in accordance with its terms, subject to laws relating to bankruptcy, insolvency or other laws affecting the enforcement of creditors' rights generally and the application of equitable principles if equitable remedies are sought.

(d) The execution and delivery of the Bonds, the Indenture and the Continuing Disclosure Agreement have been duly authorized by the City; and, on or prior to the Closing Date, the Bonds, the Indenture and the Continuing Disclosure Agreement will be executed and delivered by the City and, assuming due authorization and execution thereof by the other respective parties thereto, if any, the Bonds, the Indenture, and the Continuing Disclosure Agreement will constitute legal, valid and binding agreements of the City enforceable in accordance with their terms, subject to laws relating to bankruptcy, insolvency or other laws affecting the enforcement of creditors' rights generally and the application of equitable principles if equitable remedies are sought.

(e) The City has complied with all provisions of the Bond Resolution and the Indenture required to be complied with as of the date hereof, and will at the Closing Date be in compliance, in all respects, with the Bond Resolution, the Indenture, the Continuing Disclosure Agreement and this Purchase Agreement.

(f) The City has duly authorized and approved the execution and delivery of the Bonds, including their issuance and sale to the Underwriters pursuant to this Purchase Agreement, the Indenture, the Continuing Disclosure Agreement, this Purchase Agreement and the Official Statement, and has duly authorized and approved the performance by the City of its obligations contained in, and the taking of any and all action as may be necessary to carry out, give effect to and consummate the transactions contemplated by, each of those documents.

(g) The City is not, and as of the Closing Date will not be, in breach of or in default under any applicable law or administrative rule or regulation of the State of California, the United States, or any department, division, agency or instrumentality of either thereof, or any applicable court or administrative decree or order or any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the City is a party or is otherwise subject or bound which in any way, directly or indirectly, affects the issuance of the Bonds or the validity thereof and no event has occurred and is continuing which, with the passage of time or the giving of notice, or both, would constitute such an event of default under any such instrument; and the adoption of the Bond Resolution, the execution and delivery of the Bonds, the Indenture, the Continuing Disclosure Agreement, this Purchase Agreement and the other instruments contemplated by any of such documents to which the City is a party, and compliance with the provisions of each thereof, do not and will not conflict with or constitute a breach of or default under any applicable law or administrative rule or regulation of the State of California, the United States, or any department, division, agency or instrumentality of either thereof, or any applicable court or administrative decree or order or any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the City is a party or is otherwise subject or bound, nor will any such execution, delivery,

adoption or compliance result in the creation or imposition of any lien, charge or other security interest or encumbrance of any nature whatsoever upon Water Net Revenues or any of the other property or assets of the City, except as provided in the Indenture.

(h) All approvals, licenses, consents, authorizations, elections and orders of, or filings or registrations with, any governmental authority, legislative body, board, agency or City having jurisdiction which would constitute a condition precedent to, or the absence of which would materially adversely affect, the performance by the City of its obligations hereunder or under the Indenture, the Bonds or the Continuing Disclosure Agreement have been obtained and are in full force and effect.

(i) Except as disclosed in the Preliminary Official Statement and the Official Statement, there is no action, suit, proceeding, inquiry or investigation, at law or in equity, before or by any court, government agency, public board or body, pending or, to the best knowledge of the City after reasonable investigation, threatened against the City, (i) in any way questioning the existence of the City or the titles of the officers of the City to their respective offices; (ii) seeking to restrain or enjoin the issuance, sale or delivery of any or all of the Bonds, or the collection of Water Net Revenues to pay any or all of the Bonds; (iii) in any way contesting or affecting the validity of the Indenture, the Continuing Disclosure Agreement, the Bonds or their tax-exempt status, this Purchase Agreement or the collection of such revenues or the pledge thereof, or contesting the powers of the City or any official of the City in connection with the adoption of the Bond Resolution, the issuance, sale or delivery of the Bonds, or the execution and delivery of the Indenture, the Continuing Disclosure Agreement or this Purchase Agreement or the performance of its obligations contained therein or herein; (iv) which reasonably may be expected to result in any material adverse change in the business, properties, assets or financial condition of the Water System or which reasonably may be expected to have a material adverse effect on the ability of the City to meet its obligations under the Indenture, the Continuing Disclosure Agreement, the Bonds or this Purchase Agreement; or (v) asserting that the Preliminary Official Statement or the Official Statement contained or contains any untrue statement of material fact or omitted or omits to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

(j) The Indenture, the Continuing Disclosure Agreement, the Bonds and the other documents described in the Preliminary Official Statement and the Official Statement conform in all material respects to the descriptions thereof contained in the Preliminary Official Statement and the Official Statement.

(k) The City will furnish such information, execute such instruments and take such other action in cooperation with the Underwriters as the Representative may reasonably request (i) to qualify the Bonds for offer and sale under the "blue sky" or other securities laws and regulations of such states and other jurisdictions of the United States as the Representative may designate, provided that in connection therewith the City will not be required to file a general consent to service of process in any jurisdiction; and (ii) to determine the eligibility of the Bonds for investment under the laws of such states and other jurisdictions, and will use its best efforts to continue such qualifications in effect so long as required for the distribution of the Bonds. In particular, the City will comply with all securities laws, rules and regulations relating to Rule 15c2-12 applicable to the Bonds.

(l) Any certificates signed by the Mayor, the Vice Mayor, the City Manager, the Assistant City Manager, the General Manager, any Assistant General Manager, the Chief Financial Officer of Burbank Water and Power, the Financial Services Director or other authorized officer of the City will be deemed a representation and warranty by the City to the Underwriters as to the statements made therein.

(m) The City will apply the proceeds of the Bonds in accordance with the Indenture and as contemplated by the Official Statement.

(n) The City has not, and as of the Closing Date will not have, failed to pay principal and interest, when due, on any of its outstanding bonds or notes.

(o) Between the date of this Purchase Agreement and the Closing Date, the City will not, without prior written notice to the Representative, issue, any bonds, notes or other obligations for borrowed money payable from Water Net Revenues, and subsequent to the respective dates as of which information is given in the Preliminary Official Statement and the Official Statement up to and including the Closing Date, the City has not incurred and will not incur any material liabilities, direct or contingent, in any case, other than in the ordinary course of business or as discussed in the Preliminary Official Statement and the Official Statement.

(p) As of its date and the date hereof, the Preliminary Official Statement (excluding information concerning DTC and the book-entry system as to which no representation is made) did not, except as to the information permitted to be omitted by Rule 15c2-12, contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

(q) As of the date hereof and at all times subsequent hereto to and including the date which is 25 days following the End of the Underwriting Period (as defined herein) for the Bonds, the Official Statement (excluding information concerning DTC and the book-entry system and the information provided by the Underwriters under the caption "UNDERWRITING" (collectively, the "Excluded Information") as to which no representation is made) did not and will not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

(r) If between the date hereof and the date which is 25 days after the End of the Underwriting Period for the Bonds, an event occurs which might or would cause the information contained in the Official Statement, as then supplemented or amended, to contain an untrue statement of a material fact or to omit to state a material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading, the City will notify the Underwriters, and, if in the opinion of the City, the Underwriters or their respective counsel, such event requires the preparation and publication of a supplement or amendment to the Official Statement, the City will forthwith prepare and furnish to the Underwriters (at the expense of the City) a reasonable number of copies of an amendment of or supplement to the Official Statement (in form and substance satisfactory to the Underwriters) which will amend or supplement the Official Statement so that it will not contain an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances existing at the time the Official Statement is delivered to prospective purchasers, not misleading. For the purposes of this paragraph (r), between the date hereof and the date which is 25 days after the End of the

Underwriting Period for the Bonds, the City will furnish such information with respect to itself as the Underwriters may from time to time reasonably request.

(s) If the information contained in the Official Statement is amended or supplemented pursuant to paragraph (r) of this Section 4, at the time of each supplement or amendment thereto and (unless subsequently again supplemented or amended pursuant to such paragraph) at all times subsequent thereto up to and including the date which is 25 days after the End of the Underwriting Period for the Bonds, the Official Statement (other than the Excluded Information as to which no representation is being made) so supplemented or amended (including any financial and statistical data contained therein) will not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

(t) As used herein and for the purposes of the foregoing, the term "End of the Underwriting Period" for the Bonds shall mean the earlier of (i) the Closing Date unless the City shall have been notified in writing to the contrary by the Representative on or prior to the Closing Date, or (ii) the date on which the End of the Underwriting Period for the Bonds has occurred under Rule 15c2-12; provided, however, that the City may treat as the End of the Underwriting Period for the Bonds the date specified as such in a notice from the Representative stating the date which is the End of the Underwriting Period.

(u) The financial statements included in the appendices to the Preliminary Official Statement and the Official Statement present fairly the financial position of the Water System as of June 30, 2026 and the results of operations for the fiscal years then ended, in conformity with generally accepted accounting principles applied on a basis consistent with the preceding periods. As of the Closing Date, there will not be any material adverse change in the financial position, results of operations or condition, financial or otherwise, of the Water System from that described in the Preliminary Official Statement and the Official Statement.

(v) Except as disclosed in the Preliminary Official Statement and the Official Statement, the City has not failed to comply in all material respects with the terms of any continuing disclosure obligation under Rule 15c2-12 within the past five years.

5. Conditions to the Obligations of the Underwriters. The Underwriters have entered into this Purchase Agreement in reliance upon the City's representations and warranties herein and the representations and warranties of the City to be contained in the documents and instruments to be delivered on or prior to the Closing Date and upon the performance by the City of its obligations both on and as of the date hereof and as of the Closing Date. Accordingly, the Underwriters' obligations under this Purchase Agreement are and will be subject to the following additional conditions:

(a) The Underwriters shall receive, within seven (7) business days of the date hereof and at least in sufficient time to accompany any orders or confirmations that request payment from any customer, copies of the Official Statement (including all information previously permitted to have been omitted by Rule 15c2-12 and any amendments or supplements as have been approved by the Underwriters), in such quantity as the Underwriters shall have requested pursuant to Section 3 hereof;

(b) The representations and warranties of the City contained herein are true and correct in all material respects at the date hereof and will be true and correct on the Closing Date, and

the statements of the officers and other officials of the City made in any certificate or other document furnished pursuant to the provisions hereof are accurate at the date hereof and will be true and correct on the Closing Date.

(c) At the Closing Date, the Bond Resolution will have been duly adopted and the Official Statement will have been duly authorized, executed and delivered by the City; the Indenture, the Continuing Disclosure Agreement and this Purchase Agreement will be in full force and effect as valid and binding agreements between the various parties thereto; the Bond Resolution, the Indenture, the Continuing Disclosure Agreement and the Official Statement shall not have been amended, modified or supplemented (except as may be agreed to in writing by the Underwriters); the ratings for the Bonds included in the Official Statement will be in effect; and the City will have performed its obligations required under or specified in this Purchase Agreement, the Official Statement and the Indenture to be performed at or prior to the Closing.

(d) At or prior to the Closing Date, the Underwriters shall have received the following documents, in each case satisfactory in form and substance to the Underwriters:

(1) the approving opinion of Norton Rose Fulbright US LLP, Bond Counsel to the City, dated the Closing Date, substantially in the form attached to the Official Statement as Appendix E;

(2) a certificate, dated the Closing Date, of the City executed by its City Manager or other appropriate official acceptable to the Underwriters, to the effect that (A) (i) on the date of the Preliminary Official Statement and as of the date of this Purchase Agreement, the Preliminary Official Statement (except as to any information permitted to be omitted therefrom by Rule 15c2-12), did not and does not contain any untrue statement of material fact or omit any statement or information which is necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that no representation need be made as to The Depositary Trust Company ("DTC") or DTC's book-entry only system; and (ii) on the date of the Official Statement and on the Closing Date, the Official Statement did not and does not contain any untrue statement of material fact or omit any statement or information which is necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that no representation need be made as to The Depositary Trust Company ("DTC") or DTC's book-entry only system; (B) the representations and warranties of the City in this Purchase Agreement are true and correct on and as of the Closing Date as if made on and as of the Closing Date, and the City has complied in all material respects with and performed all of its covenants and agreements in this Purchase Agreement to be complied with and performed at or prior to the Closing; (C) the City has complied with all the agreements and satisfied all the conditions on its part to be performed or satisfied at or prior to the Closing Date pursuant to this Purchase Agreement with respect to the execution and delivery of the Bonds; and (D) between the date of this Purchase Agreement and the Closing Date, the City has not offered or issued any bonds, notes or other obligations for borrowed money payable from Water Net Revenues, or incurred any material liabilities with respect to Burbank Water and Power, direct or contingent, other than with the written consent of the Underwriters, nor has there been any adverse change of a material nature in the financial position, results of operations or condition, financial or otherwise, of Burbank Water and Power or the Water System;

(3) a certificate, dated the Closing Date, by the City Manager or other appropriate official of the City acceptable to the Underwriters, and by the City Attorney, to the effect

that other than as described in the Preliminary Official Statement and the Official Statement, to the best of their knowledge, no action, suit, proceeding, inquiry or investigation, at law or in equity, before or by any court, government agency, public board or body is pending or, to their knowledge after reasonable investigation, threatened (i) in any way questioning the corporate existence of the City or the titles of the officers of the City to their respective offices; (ii) seeking to restrain or enjoin the issuance, sale or delivery of any of the Bonds, or the collection of Water Net Revenues pledged or to be pledged to pay any of the Bonds; (iii) in any way contesting or affecting the validity of the Indenture, the Continuing Disclosure Agreement, the Bonds or their tax-exempt status, this Purchase Agreement or the collection of said revenues or the pledge thereof, or contesting the powers of the City or any official of the City in connection with the adoption of the Bond Resolution, the issuance, sale or the delivery of the Bonds or the execution and delivery of the Indenture, the Continuing Disclosure Agreement or this Purchase Agreement and the performance of its obligations contained therein or herein; (iv) which reasonably may be expected to result in any material adverse change in the business, properties, assets or the financial condition of Burbank Water and Power or the Water System or which reasonably may be expected to have a material adverse effect on the ability of the City to meet its obligations under the Indenture, the Continuing Disclosure Agreement, the Bonds or this Purchase Agreement; or (v) asserting that the Preliminary Official Statement or the Official Statement contained any untrue statement of a material fact or omitted to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading, which certificate shall be in form and substance acceptable to the Underwriters (but in lieu of such certificate, the Underwriters may, in their sole discretion, accept an opinion of Bond Counsel or counsel to the City, acceptable to the Underwriters in form and substance, that in their opinion the issues raised in any such pending or threatened litigation are without substance or that the contentions of any plaintiffs therein are without merit);

(4) executed or certified, as appropriate, copies of the documents referred to in Section 5(c), with related certificates and opinions satisfactory to Bond Counsel, the City Attorney and Counsel to the Underwriters;

(5) a supplemental opinion of Norton Rose Fulbright US LLP, Bond Counsel to the City, dated the Closing Date and addressed to the Underwriters, in substantially the form attached hereto as Exhibit A;

(6) an opinion of Norton Rose Fulbright US LLP, as Disclosure Counsel to the City, dated the Closing Date and addressed to the Underwriters, in substantially the form attached hereto as Exhibit B.

(7) an opinion of the City Attorney, dated the Closing Date and addressed to the Underwriters, in substantially the form attached hereto as Exhibit C;

(8) The opinion of Stradling Yocca Carlson & Rauth LLP ("Underwriters' Counsel"), dated the Closing Date and addressed to the Underwriters, to the effect that (i) the Bonds are not subject to the registration requirements of the Securities Act of 1933, as amended, and the Indenture is exempt from qualification pursuant to the Trust Indenture Act of 1939, as amended, (ii) assuming the due authorization, execution and delivery of the Continuing Disclosure Agreement by the parties thereto and the enforceability thereof, the Continuing Disclosure Agreement satisfies (b)(5)(i) of Rule 15c2-12 of the Securities Exchange Act; and (iii) without passing upon and without assuming any responsibility for the accuracy, completeness or fairness of any of the statements contained in the Preliminary Official Statement and the Official Statement and

making no representation that they have independently verified the accuracy, completeness or fairness of any such statements; in their capacity as counsel to the Underwriters during the course of the preparation of the Preliminary Official Statement and the Official Statement, they participated in conferences with representatives of the City, the City Attorney, Norton Rose Fulbright US LLP as Bond Counsel and Disclosure Counsel, KNN Public Finance, LLC as municipal advisor, and the Underwriters, during which the contents of the Preliminary Official Statement and the Official Statement and related matters were discussed and based on their participation in such conferences, and in reliance thereon and on the certificates, opinions and other documents they have reviewed, no information has come to the attention of the lawyers of such firm rendering professional legal services in connection with such representation that has caused them to believe that the Preliminary Official Statement, as of its date and as of the date of the Purchase Agreement, and the Official Statement as of its date and as of the Closing Date (excluding therefrom any financial statements or other financial, accounting, statistical, economic, engineering or demographic data; any charts, tables, graphs, forecasts, estimates, projections, assumptions or expressions of opinion; the information set forth in the Appendices to the Preliminary Official Statement and the Official Statement; any CUSIP numbers or information relating thereto; or any information about tax-exemption, DTC and its book-entry system, ratings or rating agencies, as to all of which they express no view) contained or contains any untrue statement of a material fact or omits to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

(9) A Tax Certificate executed by the City relating to the Bonds in form and substance acceptable to Bond Counsel;

(10) evidence from Moody's Ratings of the "[___]" rating assigned to the Bonds by such rating service and that, as of the Closing Date, such rating has not been withdrawn or downgraded;

(11) a certificate of the Trustee, dated the Closing Date, to the effect that:

(i) the Trustee is a national banking association duly organized and existing under the laws of the United States of America;

(ii) the Trustee has full corporate trust powers and authority to serve as Trustee under the Indenture; and

(iii) the Trustee acknowledges and accepts its obligations under the Indenture and that such acceptance is in full compliance with, and does not conflict with, any applicable law or governmental regulation currently in effect, and does not conflict with or violate any contract to which the Trustee is a party or any administrative or judicial decision by which the Trustee is bound;

(12) an opinion of counsel to the Trustee, dated the date of Closing and addressed to the City and the Underwriters, to the effect that, the Trustee's obligations under the Indenture constitute legal, valid and binding obligations of the Trustee, enforceable in accordance with their respective terms under California law except that the enforceability thereof may be limited by applicable bankruptcy, insolvency, reorganization, moratorium and other laws in effect from time to time affecting the rights of creditors generally and except to the extent that the enforceability thereof may be limited by the application of general principles of equity;

(13) A copy of any Blue Sky Memorandum with respect to the Bonds, if any, prepared by Underwriters' Counsel;

(14) Evidence that a federal tax information form 8038-G has been prepared for filing with respect to the Bonds;

(15) A copy of the Notice of Final Sale required to be delivered to the California Debt and Investment Advisory Commission pursuant to Section 8855 of the California Government Code;

(16) Confirmation from the City in a form satisfactory to the Underwriters that consent of LSL, LLP, independent accountants, is not required for the inclusion of the audited financial statements of Burbank Water and Power, for the fiscal year ended June 30, 2026 included in Appendix B to the Preliminary Official Statement and the Official Statement; and

(17) Such additional legal opinions, certificates, proceedings, instruments and other documents as the Underwriters may reasonably request necessary to evidence the truth and accuracy, as of the Closing Date of the representations of the City contained in this Purchase Agreement and the due performance or satisfaction by the City at or prior to the Closing Date of all agreements then to be performed and all conditions then to be satisfied by the City pursuant to this Purchase Agreement.

6. Termination. The Underwriters may terminate their obligations under this Purchase Agreement, if between the date hereof and the Closing Date, in the reasonable judgment of the Underwriters (evidenced by notification to the City terminating the obligation of the Underwriters to accept delivery of and make any payment for the Bonds), any of the following events or circumstances shall have occurred:

(a) an amendment to the Constitution of the United States or the State of California shall have been passed or legislation shall have been introduced in or enacted by the Congress of the United States or the legislature of any state having jurisdiction of the subject matter or legislation pending in the Congress of the United States shall have been amended or legislation shall have been recommended to the Congress of the United States or to any state having jurisdiction of the subject matter or otherwise endorsed for passage (by press release, other form of notice or otherwise) by the President of the United States, the Treasury Department of the United States, the Internal Revenue Service or the Chairman or ranking minority member of the Committee on Finance of the United States Senate or the Committee on Ways and Means of the United States House of Representatives, or legislation shall have been proposed for consideration by either such Committee by any member thereof or presented as an option for consideration by either such Committee by the staff of such Committee or by the staff of the Joint Committee on Taxation of the Congress of the United States, or legislation shall have been favorably reported for passage to either House of the Congress of the United States by a Committee of such House to which such legislation has been referred for consideration, or a decision shall have been rendered by a court of the United States or of the State of California or the Tax Court of the United States, or a ruling shall have been made or a regulation or temporary regulation shall have been proposed or made or any other release or announcement shall have been made by the Treasury Department of the United States, the Internal Revenue Service or other federal or State of California authority, with respect to federal or State of California taxation upon revenues or other income of the general character to be derived by the City or upon interest received on obligations of the general character of the Bonds which may have the

purpose or effect, directly or indirectly, of affecting the tax status of the City, its property or income, its securities (including the Bonds) or the interest thereon, or any tax exemption granted or authorized by State of California legislation or materially and adversely affecting the market price or marketability of the Bonds or the market price generally of obligations of the general character of the Bonds or the ability of the Underwriters to enforce contracts for the sale, at the contemplated offering prices (or yields), of the Bonds;

(b) legislation enacted, introduced in the Congress or recommended for passage by the President of the United States, or a decision rendered by a court established under Article III of the Constitution of the United States or by the Tax Court of the United States, or an order, ruling, regulation (final, temporary or proposed) or official statement issued or made by or on behalf of the Securities and Exchange Commission, or any other governmental agency having jurisdiction of the subject matter shall have been made or issued to the effect that obligations of the general character of the Bonds, or the Bonds, including any or all underlying arrangements, are not exempt from registration under the Securities Act of 1933, as amended, or that the Indenture is not exempt from qualification under the Trust Indenture Act of 1939, as amended;

(c) the declaration of a general banking moratorium by federal, New York or California authorities, or the general suspension of trading on any national securities exchange, or a major financial crisis or a material disruption in commercial banking or securities settlement or clearances services;

(d) the minimum or maximum prices for securities similar to the Bonds shall have been fixed and be in force, or maximum ranges for prices for securities, similar to the Bonds, shall have been required and be in force on the New York Stock Exchange or other national securities exchange, whether by virtue of determination by that exchange or by order of the U.S. Securities and Exchange Commission or any other governmental authority having jurisdiction;

(e) the imposition by the New York Stock Exchange or other national securities exchange, or any governmental authority, of any material restrictions not now in force with respect to the Bonds or obligations of the general character of the Bonds or securities generally, or the material increase of any such restrictions now in force, including those relating to the extension of credit by, or the charge to the net capital requirements of, the Underwriters;

(f) an order, decree or injunction of any court of competent jurisdiction, or order, ruling, regulation or official statement by the Securities and Exchange Commission, or any other governmental agency having jurisdiction of the subject matter, issued or made to the effect that the issuance, offering or sale of obligations of the general character of the Bonds, or the issuance, offering or sale of the Bonds, including any or all underlying obligations, as contemplated hereby or by the Official Statement, is or would be in violation of the federal securities laws or the Trust Indenture Act of 1939, as amended and then in effect;

(g) the withdrawal or downgrading of any rating of the Bonds or any other outstanding debt of the City's Water System by Moody's Ratings or the rating on the Bonds shall have been placed on "negative outlook," "credit watch" or similar categorization by Moody's Ratings;

(h) an event or circumstance shall occur or be discovered which makes untrue or incorrect in any material respect any statement or information contained in the Official Statement or

which is not reflected in the Official Statement but should be reflected therein in order to make the statements contained therein not misleading in any material respect and requires an amendment of or supplement to the Official Statement and, in either such event, (a) the City refuses to permit the Official Statement to be supplemented to supply such statement or information or (b) the effect of the Official Statement as so supplemented is, in the reasonable judgment of the Underwriters, to materially adversely affect the marketability or the market price of the Bonds or the ability of the Underwriters to enforce contracts for the sale, at the contemplated offering prices (or yields), of the Bonds; or

(i) an outbreak or escalation in military hostilities or an act of terrorism involving the United States or the declaration by the United States of war or any outbreak or escalation of a national or international emergency or calamity, or any other calamity or crisis in the financial markets of the United States or elsewhere, which, in the judgment of the Underwriters, materially adversely affects the market price or marketability of the Bonds or the ability of the Underwriters to enforce contracts for the sale, at the contemplated offering prices (or yields), of the Bonds; or

(j) at the time of the Closing, any material adverse change or development involving a prospective change, in the condition, financial or otherwise, or in the earnings or operations of the Water System (including the financial projections), from that set forth in the Official Statement which, in the judgment of the Underwriters, materially adversely affects the marketability or the market price of the Bonds or the ability of the Underwriters to enforce contracts for the sale, at the contemplated offering prices (or yields), of the Bonds.

7. Expenses.

(a) The Underwriters shall be under no obligation to pay, and the City shall pay, any expenses incident to the performance of the City's obligations hereunder including, but not limited to: (i) the cost of preparation, printing and distribution of the Indenture, the Continuing Disclosure Agreement, the Preliminary Official Statement, the Official Statement and any supplements or amendments thereto, including a reasonable number of certified or conformed copies thereof; (ii) the cost of preparation and printing of the Bonds; (iii) the fees and disbursements of Bond Counsel and Disclosure Counsel; (iv) the fees and disbursements of any engineers, accountants and other experts, consultants or advisors retained by the City; (v) fees for bond ratings (which include fees of rating agencies and travel expenses of the City); (vi) the fees for a third-party continuing disclosure undertaking compliance review; and (vii) the Underwriters' out-of-pocket expenses incurred with respect to the financing, including (a) air travel and hotel costs in connection with the pricing of the Bonds, any investor meetings, any rating agency trips and the Closing, (b) meals and transportation for the City, the Underwriters and other working group personnel during such trips, (c) expenses related to attending working group meetings, such as parking, meals and transportation, and (d) any other miscellaneous costs related to the Closing. The City acknowledges that it has had an opportunity, in consultation with such advisors as it may deem appropriate, if any, to evaluate and consider the fees and expenses being incurred as part of the issuance of the Bonds.

(b) The Underwriters shall pay: (i) the cost of preparation and printing of this Purchase Agreement and the Preliminary Blue Sky Memorandum; (ii) all advertising expenses and Blue Sky filing fees in connection with the public offering of the Bonds; (iii) fees, if any, payable to the California Debt and Investment Advisory Commission, the Municipal Securities Rulemaking Board and the fees associated with obtaining CUSIP numbers for the Bonds; and (iv) all other

expenses incurred by them in connection with the public offering of the Bonds not outlined in (a) above, including the fees and disbursements of Underwriters' Counsel and any fees and expenses for a continuing disclosure undertaking compliance review. Such expenses of the Underwriters will be paid or reimbursed through the expense component of the Underwriters' discount. The City acknowledges that fees payable to the California Debt and Investment Advisory Commission are the legal obligation of the Underwriters and not the City and the City consents to reimburse the Underwriters for such fees.

The City and the Underwriters agree that in the event the aggregate estimated expenses exceed the aggregate actual expenses incurred by the Underwriters in an amount equal to or greater than $1,000 (the "Reimbursement Threshold"), the Underwriters shall reimburse to the City the amount that the aggregate estimated expenses exceed the aggregate actual expenses. For the avoidance of doubt, the City acknowledges and agrees that in the event the aggregate estimated expenses exceed the aggregate actual expenses incurred by the Underwriters in an amount less than the Reimbursement Threshold, no reimbursement will be made by the Underwriters.

8. Notices. Any notice or other communication to be given (i) to the City under this Purchase Agreement may be given by delivering the same in writing to the City: City of Burbank, 301 East Olive Avenue, Burbank, California 91502, Attention: Financial Services Director, with a copy of same to Burbank Water and Power's Chief Financial Officer, 164 West Magnolia Boulevard, P.O. Box 631, Burbank, California 91503-0631; and (ii) to the Underwriters under this Purchase Agreement may be given by delivering the same in writing to the Representative: J.P. Morgan Securities LLC, 2029 Century Park E, Floor 41, Los Angeles, CA 90067, Attention: Tyler Old.

9. Survival of Representations and Warranties. The City's representations, warranties and agreements contained in this Purchase Agreement or made in any certificate delivered hereunder shall remain operative and in full force and effect, regardless of: (i) any investigations or statements made by or on behalf of the Underwriters; and (ii) delivery of and payment for the Bonds pursuant to this Purchase Agreement.

10. Parties in Interest. This Purchase Agreement is made solely for the benefit of the City and the Underwriters (including the successors or assigns of the Underwriters) and no other person shall acquire or have any right hereunder or by virtue hereof.

11. No Fiduciary. The City acknowledges and agrees that (i) the Underwriters are not acting as municipal advisors within the meaning of Section 15B of the Securities Exchange Act, as amended, (ii) the purchase and sale of the Bonds pursuant to this Purchase Agreement is an arm's-length commercial transaction between the City and the Underwriters, and that the Underwriters have financial and other interests that differ from those of the City, (iii) in connection therewith and with the discussions, undertakings and procedures leading up to the consummation of such transaction, each of the Underwriters is and has been acting solely as a principal and is not acting as the agent or fiduciary of the City, (iv) the Underwriters (individually or collectively) have not assumed an advisory or fiduciary responsibility in favor of the City with respect to the offering contemplated hereby or the discussions, undertakings and procedures leading thereto (irrespective of whether an Underwriter has provided other services or is currently providing other services to the City on other matters) and the Underwriters have no obligation to the City with respect to the offering contemplated hereby except the obligations expressly set forth in this Purchase Agreement and (v) the City has consulted their own legal, financial and/or municipal and other advisors to the extent they have deemed appropriate.

12. Headings. The headings of the sections of this Purchase Agreement are inserted for convenience only and shall not be deemed to be a part hereof.

13. Effectiveness and Counterpart Signatures. This Purchase Agreement shall become effective and binding upon the respective parties hereto upon the execution of the acceptance hereof by duly authorized officers of the City and shall be valid and enforceable as of the time of such acceptance. This Purchase Agreement may be executed by the parties hereto in separate counterparts, each of which when so executed and delivered shall be an original, but all such counterparts shall together constitute but one and the same instrument.

[Remainder of page intentionally left blank.]

14. Governing Law. This Purchase Agreement shall be construed in accordance with the laws of the State of California.

FORM OF SUPPLEMENTAL OPINION OF BOND COUNSEL

[Closing Date]

J.P. Morgan Securities LLC
Los Angeles, California

Stern Brothers & Co.
Sacramento, California

Re: $_____ City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026

Ladies and Gentlemen:

We have acted as bond counsel to the City of Burbank, California (the "City") in connection with the issuance by the City of its Burbank Water and Power Water Revenue Bonds, Series of 2026 in the aggregate principal amount of $_____ (the "Bonds"). The Bonds are being issued pursuant to Article 12 of Chapter 4 of Title 2 (formerly Article 12 of Chapter 14) of the Burbank Municipal Code, as amended (the "Bond Law"). The Bonds are also being issued pursuant to a Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Master Indenture"), by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee"), as amended and supplemented, including by the Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of _____ 1, 2026 (the "Fifth Supplemental Indenture" and collectively with the Master Indenture as previously amended and supplemented, the "Indenture"), by and between the City and the Trustee.

The Bonds are being sold on the date hereof by the City to you, as underwriters, pursuant to a Bond Purchase Agreement, dated _____ __, 2026 (the "Bond Purchase Agreement"), between J.P. Morgan Securities LLC, as your Representative, and the City. All capitalized terms used herein and not otherwise defined shall have the meaning ascribed to such terms in the Bond Purchase Agreement.

In addition to the opinions set forth in our final legal opinion (the "Bond Opinion") concerning the validity of the Bonds and certain other matters, dated the date hereof and addressed to the City (but which may be relied upon by you to the same extent as if such opinion were addressed to you), and based on and subject to the matters referred to in such Bond Opinion (which are hereby incorporated herein by reference), and in reliance thereon, as of the date hereof, we are of the following opinions or conclusions:

1. The statements contained in the Official Statement under the captions "DESCRIPTION OF THE 2026 BONDS," "SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS," "PLAN OF FINANCE," "TAX MATTERS," "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE," and "APPENDIX E – FORM OF OPINION OF BOND COUNSEL" insofar as such statements expressly summarize certain provisions of the Bonds, the Indenture and the Bond Opinion concerning certain tax matters relating to the Bonds, are

accurate in all material respects and present a fair and accurate summary of such provisions for the purpose of use in the Official Statement.

2. The Official Statement and the execution and delivery thereof have been duly approved by the City and the Bond Purchase Agreement and the Continuing Disclosure Agreement have been duly authorized, executed and delivered by the City and (assuming due authorization, execution and delivery by and validity against the other parties thereto) are valid and binding agreements of the City enforceable in accordance with their respective terms. We call attention to the fact that the rights and obligations under the Bond Purchase Agreement and the Continuing Disclosure Agreement and the enforceability thereof are subject to and may be limited by bankruptcy, insolvency, reorganization, arrangement, moratorium and other similar laws affecting creditors' rights, to the application of equitable principles, to the possible unavailability of specific performance or injunctive relief, to the exercise of judicial discretion in appropriate cases and to the limitations on legal remedies against public agencies in the State of California. We express no opinion with respect to any indemnification, contribution, penalty, choice of law, choice of forum or waiver (including, without limitation, waiver of jury trial or consent to nonjury trial) provisions contained in the foregoing documents.

3. The Bonds are not subject to the registration requirements of the Securities Act of 1933, as amended, and the Indenture is exempt from qualification pursuant to the Trust Indenture Act of 1939, as amended.

This letter is furnished by us as bond counsel to the City. No attorney-client relationship has existed or exists between our firm and you in connection with the Bonds or by virtue of this letter. We disclaim any obligation to update this letter. This letter is delivered to you as Underwriters of the Bonds, is solely for your benefit as such Underwriters in connection with the original issuance of the Bonds on the date hereof, and is not to be used, circulated, quoted or otherwise referred to or relied upon for any other purpose or by any other person. This letter is not intended to, and may not, be relied upon by owners of Bonds or by any other party to whom it is not specifically addressed.

Respectfully submitted,

Re: $_____ City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026

Ladies and Gentlemen:

We have acted as Disclosure Counsel to the City of Burbank, California (the "City") in connection with the issuance by the City of its Burbank Water and Power Water Revenue Bonds, Series of 2026 in the aggregate principal amount of $_____ (the "Bonds"). The Bonds are being issued pursuant to Article 12 of Chapter 4 of Title 2 (formerly Article 12 of Chapter 14) of the Burbank Municipal Code, as amended (the "Bond Law"). The Bonds are also being issued pursuant to a Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Master Indenture"), by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee"), as amended and supplemented, including by the Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of _____ 1, 2026 (the "Fifth Supplemental Indenture" and collectively with the Master Indenture as previously amended and supplemented, the "Indenture"), by and between the City and the Trustee. The Bonds are more fully described in the Official Statement of the City, dated _____ __, 2026 (the "Official Statement").

Capitalized terms used and not otherwise defined herein shall have the meanings ascribed thereto in the Official Statement.

In delivering this letter, we have reviewed such records, documents, certificates and opinions, and made such other investigations of law and fact as we have deemed necessary or appropriate. This letter is limited to matters governed by the federal securities law of the United States, and we assume no responsibility with respect to the applicability or effect of the laws of any other jurisdiction.

In our capacity as Disclosure Counsel to the City, we have rendered certain assistance in connection with the preparation of the Preliminary Official Statement, dated _____ __, 2026 (the "Preliminary Official Statement"), and the Official Statement. Rendering such assistance involved, among other things, discussions and inquiries concerning various legal matters, review of certain records, documents and proceedings, and participation in meetings and telephone conferences with, among others, representatives of the City, the City Attorney, KNN Public Finance, LLC, municipal

advisor to the City, the Underwriters and their counsel, at which meetings and conferences the contents of the Preliminary Official Statement and the Official Statement and related matters were discussed. On the basis of the information made available to us in the course of the foregoing (but without having undertaken to determine or verify independently, or assuming any responsibility for the accuracy, completeness or fairness of any of the statements contained in the Preliminary Official Statement or in the Official Statement), no facts have come to the attention of the personnel in our firm directly involved in rendering legal advice and assistance in connection with the preparation of the Preliminary Official Statement and the Official Statement which cause us to believe that (a) the Preliminary Official Statement as of its date and as of the date of the Bond Purchase Agreement, dated _____ __, 2026, by and between the City and J.P. Morgan Securities LLC, as Representative, contained any untrue statement of a material fact or omitted to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading (excluding therefrom financial and statistical data; forecasts, projections, estimates, assumptions and expressions of opinions; statements relating to The Depository Trust Company, Cede & Co. and the book-entry system; information under the caption "UNDERWRITING" and statements contained in APPENDIX B – "AUDITED FINANCIAL STATEMENTS OF THE CITY OF BURBANK WATER AND ELECTRIC UTILITY ENTERPRISE FUNDS FOR THE FISCAL YEAR ENDED JUNE 30, 2026" and APPENDIX F – "DTC AND THE BOOK-ENTRY ONLY SYSTEM," as to all of which we express no view, and except for such information as is permitted to be excluded from the Preliminary Official Statement pursuant to Rule 15c2-12 of the Securities Exchange Act of 1934, as amended, including but not limited to information as to pricing, yield, interest rate, maturity, amortization, redemption provisions, underwriters' compensation and CUSIP numbers), or (b) the Official Statement as of its date and as of the date hereof contained or contains any untrue statement of a material fact or omitted or omits to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading (excluding therefrom financial and statistical data; forecasts, projections, estimates, assumptions and expressions of opinions; statement relating to The Depository Trust Company, Cede & Co. and the book-entry system; information under the caption "UNDERWRITING" and statements contained in APPENDIX B – "AUDITED FINANCIAL STATEMENTS OF THE CITY OF BURBANK WATER AND ELECTRIC UTILITY ENTERPRISE FUNDS FOR THE FISCAL YEAR ENDED JUNE 30, 2026" and in APPENDIX F – "DTC AND THE BOOK-ENTRY ONLY SYSTEM," as to all of which we express no view).

During the period from the date of the Official Statement to the date of this letter, except for our review of the certificates and opinions regarding the Preliminary Official Statement and the Official Statement delivered on the date hereof, we have not undertaken any procedures or taken any actions that were intended or likely to elicit information concerning the accuracy, completeness or fairness of any of the statements contained in the Preliminary Official Statement or the Official Statement.

We are furnishing this letter to you, solely for your benefit. This letter is rendered in connection with the transaction described herein, and may not be relied upon by you for any other purpose. This letter shall not extend to, and may not be used, circulated, quoted, referred to, or relied upon by, any other person, firm, corporation or other entity without our prior written consent. The delivery of this letter shall not create any attorney-client relationship between our firm and the addressees hereof, other than the City. Our engagement with respect to this matter terminates upon the delivery of this letter to you at the time of the closing relating to the Bonds, and we have no obligation to update this letter.

Respectfully submitted,

EXHIBIT C

FORM OF OPINION OF CITY ATTORNEY

J.P. Morgan Securities LLC
Los Angeles, California

Stern Brothers & Co.
Sacramento, California

$_____
City of Burbank, California
Burbank Water and Power
Water Revenue Bonds, Series of 2026

Ladies and Gentlemen:

As Senior Assistant City Attorney for the City of Burbank, California (the "City") in connection with the issuance, delivery and sale of $_____ aggregate principal amount of City of Burbank, California Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "Series 2026 Bonds"), I have examined: (i) the Burbank City Charter, including Article 12 of Chapter 4 of Title 2 (formerly Article 12 of Chapter 14) of the Burbank Municipal Code, as amended, Resolution No. _____ adopted by the City Council of the City on _____ __, 2026 (the "Bond Resolution"); (ii) the Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010, by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee"), as supplemented and amended, including as supplemented and amended by a Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of _____ __, 2026 (the "Fifth Supplemental Indenture"), relating to the Series 2026 Bonds (collectively, the "Indenture"); (iii) the Bond Purchase Agreement, dated _____ __, 2026, between J.P. Morgan Securities LLC, as Representative of the Underwriters named therein, and the City (the "Bond Purchase Agreement"); (iv) the Continuing Disclosure Agreement, dated _____ __, 2026 (the "Continuing Disclosure Agreement"), executed and delivered by the City and the Trustee; and (v) the Preliminary Official Statement, dated _____ __, 2026, and the Official Statement, dated _____ __, 2026 (the "Official Statement"), relating to the Series 2026 Bonds, and I have made such other investigations of law and facts as I have deemed necessary to render this opinion. Except as otherwise indicated, capitalized terms used herein and not otherwise defined herein shall have the meanings ascribed thereto in the Bond Purchase Agreement.

On the basis of the foregoing examination and my consideration of such questions of law as I have deemed relevant in the circumstances, I am of the opinion that:

1. The City is a charter city duly organized and existing under the Constitution and laws of the State of California and the Charter.

2. The Bond Resolution has been duly adopted at a meeting of the City Council of the City which was called and held pursuant to law and with all public notice required by law and at which a quorum was present and acting throughout.

3. The Series 2026 Bonds, the Indenture, the Continuing Disclosure Agreement and the Bond Purchase Agreement have each been duly authorized, executed and delivered by the City and assuming due authorization, execution and delivery by the other parties thereto where applicable, are valid and binding obligations of the City, enforceable in accordance with their respective terms, subject to laws relating to bankruptcy, insolvency, reorganization, moratorium and other similar laws affecting creditors' rights, to the application of equitable principles if equitable remedies are sought, and to limitations on legal remedies against municipal corporations in the State of California.

4. The adoption of the Bond Resolution and the execution and delivery of the Series 2026 Bonds, the Indenture, the Continuing Disclosure Agreement and the Bond Purchase Agreement and the other instruments contemplated by any of such documents to which the City is a party, and compliance with the provisions thereof, under the circumstances contemplated thereby, do not and will not in any material respect conflict with or constitute a breach of or default under any applicable law or administrative rule or regulation of the State of California, the United States, or any department, division, agency or instrumentality of either thereof, or any applicable court or administrative decree or order or any loan agreement, note, resolution, indenture, contract, agreement or other instrument to which the City is a party or is otherwise subject or bound, nor will any such execution, delivery, adoption or compliance result in the creation or imposition of any lien, charge or other security interest or encumbrance of any nature whatsoever upon any of the property or assets of the City or under the terms of any such constitutional provision, law, rule, decree, order, regulation or instrument, except as expressly provided in the Indenture.

5. Except as described in the Preliminary Official Statement and the Official Statement, there is no action, suit, proceeding or investigation at law or in equity before or by any court, government agency, public board or body pending or, to my current knowledge, threatened against or affecting the City to restrain or enjoin the issuance or delivery of any of the Series 2026 Bonds, the collection of Water Net Revenues pledged under the Indenture, in any way contesting or affecting any of the Series 2026 Bonds, the Indenture, the Continuing Disclosure Agreement or the Bond Purchase Agreement or the completeness or accuracy of the Preliminary Official Statement or the Official Statement or in any way contesting the existence or powers of the City with respect to the issuance of the Series 2026 Bonds or the security therefor wherein an unfavorable decision, ruling or finding would adversely affect any of the transactions contemplated by the Official Statement, the Indenture, the Continuing Disclosure Agreement or the Bond Purchase Agreement or the validity or enforceability of the Series 2026 Bonds.

6. No approval, consent or order of any governmental authority, legislative body, board, agency or City within the State of California having jurisdiction over the City or Burbank Water and Power or of any such entity having federal jurisdiction over the City or Burbank Water and Power which has not been obtained is required for the valid authorization, execution, delivery or performance by the City of its obligations under the Indenture, the Continuing Disclosure Agreement, the Series 2026 Bonds or the Bond Purchase Agreement, except that no opinion is expressed with respect to the qualification of the Series 2026 Bonds or any of the foregoing instruments under the Blue Sky or securities laws of any state.

7. The statements with respect to the City, Burbank Water and Power and the Water System contained in the Preliminary Official Statement and in the Official Statement do not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

8. Without having undertaken to determine independently or assuming any responsibility for the accuracy, completeness or fairness of the statements contained in the Preliminary Official Statement or the Official Statement (except as set forth in paragraph 7 above), nothing has come to my attention that would lead me to believe that the Preliminary Official Statement, as of its date and as of _____ __, 2026 (excluding therefrom the financial information and the statistical data and the information relating to DTC and the book-entry system included therein as to which no opinion is expressed and except as to the information permitted to be omitted by Rule 15c2-12) or in the Official Statement, as of its date and as of the date hereof (excluding therefrom the financial information and the statistical data and the information relating to DTC and the book-entry system included therein as to which no opinion is expressed) contained or contains any untrue statement of a material fact or omitted or omits to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

I express no opinion as to any matters other than as expressly set forth above. Without limiting the generality of the foregoing, except as expressly set forth above, I specifically express no opinion as to the status of the Series 2026 Bonds or the interest thereon under any federal securities laws or any state securities or Blue Sky law or any federal, state or local tax law. Further, I express no opinion on the laws of any jurisdictions other than the State of California and the United States of America.

This opinion is delivered to you as Underwriters and is solely for your benefit and is not to be used by any other person or for any other purpose.

Very truly yours,

Senior Assistant City Attorney

EXHIBIT D

FORM OF ISSUE PRICE CERTIFICATE

$_____
CITY OF BURBANK, CALIFORNIA
Burbank Water and Power
Water Revenue Bonds, Series of 2026

The undersigned, on behalf of J.P. Morgan Securities LLC ("J.P. Morgan"), as representative (the "Representative") of itself and Stern Brothers & Co. (collectively, the "Underwriting Group"), hereby certifies as set forth below with respect to the sale and issuance of the above-captioned bonds (the "Bonds") of the City of Burbank, California (the "Issuer").

1. [***Sale of the Bonds***. As of the date of this certificate, the first price at which at least 10% of each Maturity of the Bonds was sold to the public is the respective price listed in Schedule I.] [***Sale of the General Rule Maturities***. As of the date of this certificate, for each Maturity of the General Rule Maturities, the first price at which at least 10% of such Maturity was sold to the Public is the respective price listed in Schedule I.

2. [***Initial Offering Price of the Hold-the-Offering-Price Maturities***.

(a) The Underwriting Group offered the Hold-the-Offering-Price Maturities to the Public for purchase at the respective initial offering prices listed in Schedule I (each an "Initial Offering Price") on or before the Sale Date. A copy of the pricing wire or equivalent communication for the Bonds is attached to this certificate as Schedule II.

(b) As set forth in the Bond Purchase Agreement dated [BPA DATE], 2026, between J.P. Morgan and the Issuer, the members of the Underwriting Group have agreed in writing on or prior to the Sale Date that, (i) for each Maturity of the Hold-the-Offering-Price Maturities, they would neither offer nor sell any of the Bonds of such Maturity to any person at a price that is higher than the Initial Offering Price for such Maturity during the Holding Period for such Maturity (the "hold-the-offering-price rule"), and (ii) any selling group agreement shall contain the agreement of each dealer who is a member of the selling group, and any third-party distribution agreement shall contain the agreement of each broker-dealer who is a party to the retail or other third-party distribution agreement, to comply with the hold-the-offering-price rule. Neither J.P. Morgan nor any broker-dealer who is party to a third-party distribution agreement with J.P. Morgan has offered or sold any Maturity of the Hold-the-Offering Price Maturities at a price that is higher than the respective Initial Offering Price for that Maturity of the Bonds during the Holding Period. With respect to the other member of the Underwriting Group, each member of the Underwriting Group that has offered for sale one or more Hold-the-Offering-Price Maturities, on behalf of itself and any broker-dealer who is a party to a third-party distribution agreement with such member of the Underwriting Group, has represented in Schedule III to this certificate, that it has neither offered nor sold any Maturity of the Hold-the-Offering-Price Maturities at a price that is higher than the respective Initial Offering Price for that Maturity of the Bonds during the Holding Period for such Maturity.]

[2.][3.] ***Defined Terms***.

(a) *General Rule Maturities* means those Maturities of the Bonds listed in Schedule I hereto as the "General Rule Maturities."

(b) [*Hold-the-Offering-Price Maturities* means those Maturities of the Bonds listed in Schedule I hereto as the "Hold-the-Offering-Price Maturities."

(c) *Holding Period* means, with respect to a Hold-the-Offering-Price Maturity, the period starting on the Sale Date and ending on the earlier of (i) the close of the fifth business day after the Sale Date, or (ii) the date on which the Underwriters sold at least 10% of such Hold-the-Offering-Price Maturity to the Public at prices that are no higher than the Initial Offering Price for such Hold-the-Offering-Price Maturity.]

(d) *Maturity* means Bonds with the same credit and payment terms. Bonds with different maturity dates, or Bonds with the same maturity date but different stated interest rates, are treated as separate maturities.

(e) *Public* means any person (including an individual, trust, estate, partnership, association, company, or corporation) other than an Underwriter or a related party to an Underwriter. The term "related party" for purposes of this certificate generally means any two or more persons who have greater than 50 percent common ownership, directly or indirectly.

(f) *Sale Date* means the first day on which there is a binding contract in writing for the sale of a Maturity of the Bonds. The Sale Date of the Bonds is [BPA DATE], 2026.

(g) *Underwriter* means (i) any person that agrees pursuant to a written contract with the Issuer (or with the lead underwriter to form an underwriting syndicate) to participate in the initial sale of the Bonds to the Public, and (ii) any person that agrees pursuant to a written contract directly or indirectly with a person described in clause (i) of this paragraph to participate in the initial sale of the Bonds to the Public (including a member of a selling group or a party to a retail or other third-party distribution agreement participating in the initial sale of the Bonds to the Public).

The representations set forth in this certificate are limited to factual matters only. Nothing in this certificate represents the undersigned's interpretation of any laws, including specifically Sections 103 and 148 of the Internal Revenue Code of 1986, as amended, and the Treasury Regulations thereunder. The undersigned understands that the foregoing information will be relied upon by the Issuer with respect to certain of the representations set forth in the Tax Certificate with respect to the Bonds and with respect to compliance with the federal income tax rules affecting the Bonds, and by Norton Rose Fulbright US LLP in connection with rendering its opinion that the interest on the Bonds is excluded from gross income for federal income tax purposes, the preparation of the Internal Revenue Service Form 8038-G, and other federal income tax advice that it may give to the Issuer from time to time relating to the Bonds. The certifications contained herein are not necessarily based on personal knowledge, but may instead be based on either inquiry deemed adequate by the undersigned or institutional knowledge (or both) regarding the matters set forth herein. Although certain information furnished in this certificate has been derived from other purchasers and brokers and cannot be independently verified by J.P. Morgan, J.P. Morgan has no reason to believe it to be untrue in any material respect.

GROUP MEMBER CERTIFICATE AS TO COMPLIANCE WITH HOLD-THE-OFFERING PRICE RULE

The undersigned, Stern Brothers & Co. (the "Group Member"), which has acted as an underwriter pursuant to the Bond Purchase Agreement dated [BPA DATE], 2026, between J.P. Morgan Securities LLC, as representative (the "Representative") of itself and of the Group Member, as underwriters of the above-captioned obligations (the "Bonds") and the City of Burbank, California (the "Issuer"), hereby certifies as set forth below with respect to the sale and issuance of the Bonds.

1. *Initial Offering Price of the Hold-the-Offering-Price Maturities*. The Group Member and any broker-dealer that is participating in the initial sale of the Bonds as a party to a third-party distribution agreement with the Group Member (if any) offered certain Hold-the-Offering-Price Maturities (specifically, the *[List any Hold-the-Offering Price Maturities for which this Group Member has an allocation*] Maturities) to the Public for purchase at the respective initial offering prices listed in Schedule I (each an "Initial Offering Price") to the Issue Price Certificate of the Representative, to which this certificate is attached as Schedule III, on or before the Sale Date. Neither the Group Member nor any broker-dealer that is participating in the initial sale of the Bonds as a party to a third-party distribution agreement with the Group Member (if any) has offered or sold any unsold Bonds of any Maturity of the Hold-the-Offering Price Maturities allocated to the Group Member at a price that is higher than the respective Initial Offering Price for that Maturity of the Bonds during the Holding Period. The Group Member has not entered into a third-party distribution agreement, directly or indirectly, to participate in the initial sale of any of the Bonds to the public [other than] *{Name any firm which the Group Member has third-party distribution agreement}*.

2. *Defined Terms*.

(a) *Hold-the-Offering-Price Maturities* means those Maturities of the Bonds where issue price was established under Section § 1.148-1(f)(2)(ii) of the Treasury Regulations, as which Maturities are set forth in Section 1 above.

(b) *Holding Period* means, with respect to a Hold-the-Offering-Price Maturity, the period starting on the Sale Date and ending on the earlier of (i) the close of the fifth business day after the Sale Date, or (ii) the date on which the Underwriters have sold at least 10% of such Hold-the-Offering-Price Maturity to the Public at prices that are no higher than the Initial Offering Price for such Hold-the-Offering-Price Maturity.

(c) *Maturity* means Bonds with the same credit and payment terms. Bonds with different maturity dates, or Bonds with the same maturity date but different stated interest rates or CUSIP identification numbers, are treated as separate maturities.

(d) *Public* means any person (including an individual, trust, estate, partnership, association, company, or corporation) other than an Underwriter or a related party to an Underwriter. The term "related party" for purposes of this certificate generally means any two or more persons who have greater than 50 percent common ownership, directly or indirectly.

(e) *Sale Date* means the first day on which there is a binding contract in writing for the sale of a Maturity of the Bonds. The Sale Date of the Bonds is [BPA DATE], 2026.

(f) *Underwriter* means (i) any person that agrees pursuant to a written contract with the Issuer (or with the Representative or lead underwriter to form an underwriting syndicate) to participate in the initial sale of the Bonds to the Public, and (ii) any person that agrees pursuant to a written contract directly or indirectly with a person described in clause (i) of this paragraph to participate in the initial sale of the Bonds to the Public (including a member of a selling group or a party to a retail or other third-party distribution agreement participating in the initial sale of the Bonds to the Public).

The representations set forth in this certificate are limited to factual matters only. Nothing in this certificate represents the undersigned's interpretation of any laws, including specifically Sections 103 and 148 of the Internal Revenue Code of 1986, as amended, and the Treasury Regulations thereunder. The undersigned understands that the foregoing information will be relied upon by the Issuer with respect to certain of the representations set forth in the Tax Certificate with respect to the Bonds and with respect to compliance with the federal income tax rules affecting the Bonds, and by Norton Rose Fulbright US LLP in connection with rendering its opinion that the interest on the Bonds is excluded from gross income for federal income tax purposes, the preparation of the Internal Revenue Service Form 8038-G, and other federal income tax advice that it may give to the Issuer from time to time relating to the Bonds.

NEW ISSUE – FULL BOOK-ENTRY ONLY

Rating: Moody's: "[___]"
(See "RATING" herein)

In the opinion of Bond Counsel, under existing law, interest on the 2026 Bonds is exempt from personal income taxes of the State of California and, assuming compliance with the tax covenants described herein, interest on the 2026 Bonds will be excludable from the gross income of the owners thereof for federal income tax purposes and will not be treated as an item of tax preference for purposes of the federal alternative minimum tax on individuals. See "TAX MATTERS."

$[PAR]*
City of Burbank, California
Burbank Water and Power
Water Revenue Bonds, Series of 2026

Dated: Date of Delivery **Due: June 1, as shown on the inside cover**

The Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "2026 Bonds") are being issued by the City of Burbank, California (the "City") pursuant to a resolution adopted by the City Council of the City on [_____], 2026, and the Burbank Water and Power Water Revenue Bond Indenture dated as of November 1, 2010 (as supplemented and amended, the "Indenture"), between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee").

The 2026 Bonds are being issued to (i) finance a portion of the costs of the 2026 Water Project (as defined herein), and (ii) pay costs of issuance of the 2026 Bonds. See "PLAN OF FINANCE" and "ESTIMATED SOURCES AND USES OF FUNDS" herein.

Under the Indenture, the 2026 Bonds will be payable from and secured by Water Net Revenues (as defined herein) and by certain other funds pledged therefor under the Indenture. The general fund and the Electric Utility Fund of the City are not liable for, and neither the faith and credit nor the taxing power of the City is pledged to, the payment of the 2026 Bonds.

The 2026 Bonds are secured by a pledge of Water Net Revenues on parity with the City of Burbank, California Burbank Water and Power Water Revenue/Refunding Bonds, Series of 2021 (the "2021 Bonds"), which are outstanding in the aggregate principal amount of $22,000,000, and the City of Burbank, California Burbank Water and Power Water Revenue Refunding Bonds, Series of 2024 (the "2024 Bonds"), which are outstanding in the principal amount of $21,540,000. The City is authorized under the Indenture to incur additional obligations payable from and secured by the Water Net Revenues on parity with the 2026 Bonds. See "SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS" and "THE WATER SYSTEM."

No debt service reserve fund is being established in connection with the issuance of the 2026 Bonds.

The 2026 Bonds will bear interest at the rates shown on the inside cover page, payable semiannually on June 1 and December 1 of each year, commencing on June 1, 2027, and will be issued in fully-registered form without coupons in integral multiples of $5,000. The 2026 Bonds will be issued in book-entry only form, initially registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York ("DTC"). Purchasers of the 2026 Bonds will not receive certificates representing their interests in the 2026 Bonds. Payments of the principal of, premium, if any, and interest on the 2026 Bonds will be made to DTC, which is obligated in turn to remit such principal, premium, if any, and interest to its DTC Participants for subsequent disbursement to the beneficial owners of the 2026 Bonds. See "DESCRIPTION OF THE 2026 BONDS – Book-Entry Only System."

The 2026 Bonds are subject to redemption prior to maturity as described herein. See "DESCRIPTION OF THE 2026 BONDS – Redemption."

THE 2026 BONDS ARE SPECIAL, LIMITED OBLIGATIONS OF THE CITY PAYABLE FROM WATER NET REVENUES. THE 2026 BONDS SHALL NOT BE DEEMED TO CONSTITUTE A DEBT OR LIABILITY OF THE CITY, THE STATE OF CALIFORNIA (THE "STATE") OR OF ANY POLITICAL SUBDIVISION THEREOF WITHIN THE MEANING OF ANY CONSTITUTIONAL OR STATUTORY LIMITATION, OR A PLEDGE OF THE FAITH AND CREDIT OF THE CITY, THE STATE OR OF ANY POLITICAL SUBDIVISION THEREOF, BUT SHALL BE PAYABLE, EXCEPT TO THE EXTENT OF CERTAIN AVAILABLE MONEYS PLEDGED THEREFOR, SOLELY FROM WATER NET REVENUES. NEITHER THE FAITH AND CREDIT NOR THE TAXING POWER OF THE CITY, THE STATE OR OF ANY POLITICAL SUBDIVISION THEREOF IS PLEDGED TO THE PAYMENT OF THE PRINCIPAL OF, PREMIUM, IF ANY, OR THE INTEREST ON THE

* Preliminary, subject to change.

This Preliminary Official Statement and the information contained herein are subject to completion or amendment. These securities may not be sold, nor may offers to buy them be accepted, prior to the time the Official Statement is delivered in final form. Under no circumstances shall this Preliminary Official Statement constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of, these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful.

2026 BONDS. THE ISSUANCE OF THE 2026 BONDS SHALL NOT DIRECTLY OR INDIRECTLY OR CONTINGENTLY OBLIGATE THE CITY, THE STATE, OR ANY POLITICAL SUBDIVISION THEREOF TO LEVY OR TO PLEDGE ANY FORM OF TAXATION WHATSOEVER THEREFOR OR TO MAKE ANY APPROPRIATION FOR THEIR PAYMENT.

THIS COVER PAGE CONTAINS CERTAIN INFORMATION FOR GENERAL REFERENCE ONLY. IT IS NOT A SUMMARY OF THIS ISSUE OF 2026 BONDS. INVESTORS MUST READ THE ENTIRE OFFICIAL STATEMENT TO OBTAIN INFORMATION ESSENTIAL TO MAKING AN INFORMED INVESTMENT DECISION WITH RESPECT TO THE PURCHASE OF THE 2026 BONDS.

The 2026 Bonds are offered when, as and if issued and received by the Underwriters and subject to the approval as to their legality by Norton Rose Fulbright US LLP, Los Angeles, California, Bond Counsel. Certain legal matters will be passed upon for the City by the City Attorney and Norton Rose Fulbright US LLP, Los Angeles, California, Disclosure Counsel to the City, and for the Underwriters by Stradling Yocca Carlson & Rauth LLP, Newport Beach, California. It is anticipated that the 2026 Bonds will be delivered in book-entry form through the facilities of DTC on or about _____, 2026.

No dealer, broker, salesperson or other person has been authorized by the City or the Underwriters to give any information or to make any representations, other than as contained in this Official Statement, and if given or made, such other information or representations must not be relied upon as having been authorized by any of the foregoing. This Official Statement does not constitute an offer to sell or a solicitation of an offer to buy, nor shall there be any sale of the 2026 Bonds by any person in any jurisdiction in which it is unlawful for such person to make such offer, solicitation or sale.

This Official Statement is not to be construed as a contract with the purchasers of the 2026 Bonds. Statements contained in this Official Statement which involve estimates, forecasts or matters of opinion, whether or not expressly so described herein, are intended solely as such and are not to be construed as representations of fact.

The information set forth herein has been furnished by the City and other sources that are believed to be reliable. This Official Statement speaks only as of its date, and the information and expressions of opinion contained herein are subject to change without notice, and neither the delivery of this Official Statement nor any sale made hereunder shall, under any circumstances, create any implication that there has been no change in the affairs of the City or in the City's Water System (as defined herein) since the date hereof.

The Underwriters have provided the following sentence for inclusion in this Official Statement: The Underwriters have reviewed the information in this Official Statement in accordance with, and as part of, their responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

Certain statements included or incorporated by reference in this Official Statement constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are generally identifiable by the terminology used such as "plan," "project," "expect," "anticipate," "intend," "believe," "estimate," "budget" or other similar words. The achievement of certain results or other expectations contained in such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements described to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Except as specifically set forth herein, the City does not plan to issue any updates or revisions to those forward-looking statements if or when its expectations or events, conditions or circumstances on which such statements are based occur.

The City maintains websites and certain social media accounts. However, the information presented therein is not part of this Official Statement and should not be relied upon in making investment decisions with respect to the 2026 Bonds.

The issuance and sale of the 2026 Bonds have not been registered under the Securities Act of 1933 in reliance upon the exemption provided under Section 3(a)(2) for the issuance and sale of municipal securities.

OFFICIAL STATEMENT

Relating to

$[PAR]*
City of Burbank, California
Burbank Water and Power
Water Revenue Bonds, Series of 2026

INTRODUCTION

This Introduction is not a summary of this Official Statement, and is qualified by more complete and detailed information contained in the entire Official Statement. A full review should be made of the entire Official Statement, including the cover page and attached appendices. The offering of 2026 Bonds to potential investors is made only by means of the entire Official Statement. Capitalized terms used but not defined in this Introduction shall have the meanings given such terms elsewhere in this Official Statement. Certain definitions of capitalized terms used and not otherwise defined in this Official Statement are set forth in "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE."

General

This Official Statement, including the Appendices hereto, is provided to furnish information in connection with the issuance and sale by the City of Burbank, California (the "City") of $[PAR]* Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "2026 Bonds"). The 2026 Bonds are authorized and issued pursuant to Article 12 of Chapter 4 of Title 2 (formerly Article 12 of Chapter 14) of the Burbank Municipal Code, as amended, and a resolution adopted by the City Council of the City (the "City Council") on [____], 2026. The 2026 Bonds are issued pursuant to the Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Master Water Revenue Bond Indenture"), as supplemented and amended, including as supplemented and amended by the Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of [_____ 1], 2026 (the "Fifth Supplemental Indenture"), by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee"). The Master Water Revenue Bond Indenture, as previously amended and supplemented, and as amended and supplemented by the Fifth Supplemental Indenture, is referred to herein as the "Indenture."

The 2026 Bonds are being issued to (i) finance a portion of the costs of the 2026 Water Project (as defined herein) and (ii) pay costs of issuance of the 2026 Bonds. See "PLAN OF FINANCE" and "ESTIMATED SOURCES AND USES OF FUNDS."

The 2026 Bonds will be issued in fully registered form, registered in the name of The Depository Trust Company, New York, New York ("DTC"), or its nominee, which will act as securities depository for the 2026 Bonds. Purchasers of the 2026 Bonds will not receive certificates representing the 2026 Bonds that are purchased. See "DESCRIPTION OF THE 2026 BONDS – Book-Entry Only System" and "APPENDIX F – DTC AND THE BOOK-ENTRY ONLY SYSTEM."

The City, BWP and the Water System

The City is located in the greater metropolitan Los Angeles area approximately 12 miles northeast of the Los Angeles Civic Center complex. See "APPENDIX A – GENERAL INFORMATION ABOUT

* Preliminary, subject to change.

THE CITY OF BURBANK AND LOS ANGELES COUNTY." The City was incorporated as a general law city in 1911 and adopted its City Charter in 1927 (as amended, the "City Charter"). The City's population as of January 1, 2026 was approximately 106,229. The City provides its residents and businesses with electric, water, sewer and trash services and operates its own police and fire departments. The City owns and operates a potable and recycled water system which includes a water transmission and distribution system and a water treatment system (the "Water System"). The Water System provides service to all water customers within the City and is managed by Burbank Water and Power ("BWP"), a department of the City. See "BURBANK WATER AND POWER" and "THE WATER SYSTEM."

Security and Sources of Payment for the 2026 Bonds

The 2026 Bonds are payable from and secured by a pledge of Water Net Revenues (as defined herein) and by certain other funds pledged therefor under the Indenture.

The 2026 Bonds are secured by a pledge of Water Net Revenues on parity with the outstanding 2021 Bonds and 2024 Bonds (each as defined below). Additionally, under the Indenture, the City may issue additional obligations on a parity with the 2026 Bonds. See "– Outstanding Bonds and Parity Debt; Additional Bonds and Parity Debt" below.

THE 2026 BONDS ARE SPECIAL, LIMITED OBLIGATIONS OF THE CITY PAYABLE FROM WATER NET REVENUES. THE 2026 BONDS SHALL NOT BE DEEMED TO CONSTITUTE A DEBT OR LIABILITY OF THE CITY, THE STATE OF CALIFORNIA (THE "STATE") OR OF ANY POLITICAL SUBDIVISION THEREOF WITHIN THE MEANING OF ANY CONSTITUTIONAL OR STATUTORY LIMITATION, OR A PLEDGE OF THE FAITH AND CREDIT OF THE CITY, THE STATE OR OF ANY POLITICAL SUBDIVISION THEREOF, BUT SHALL BE PAYABLE, EXCEPT TO THE EXTENT OF CERTAIN AVAILABLE MONEYS PLEDGED THEREFOR, SOLELY FROM WATER NET REVENUES. NEITHER THE FAITH AND CREDIT NOR THE TAXING POWER OF THE CITY, THE STATE OR OF ANY POLITICAL SUBDIVISION THEREOF IS PLEDGED TO THE PAYMENT OF THE PRINCIPAL OF, PREMIUM, IF ANY, OR THE INTEREST ON THE 2026 BONDS. THE ISSUANCE OF THE 2026 BONDS SHALL NOT DIRECTLY OR INDIRECTLY OR CONTINGENTLY OBLIGATE THE CITY, THE STATE, OR ANY POLITICAL SUBDIVISION THEREOF TO LEVY OR TO PLEDGE ANY FORM OF TAXATION WHATSOEVER THEREFOR OR TO MAKE ANY APPROPRIATION FOR THEIR PAYMENT.

See "SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS."

Outstanding Bonds and Parity Debt; Additional Bonds and Parity Debt

The City previously issued the City of Burbank, California Burbank Water and Power Water Revenue/Refunding Bonds, Series of 2021 (the "2021 Bonds") under the Indenture, which are currently outstanding in the aggregate principal amount of $22,000,000, and the City of Burbank, California Burbank Water and Power Water Revenue Refunding Bonds, Series of 2024 (the "2024 Bonds") under the Indenture, which are outstanding in the principal amount of $21,540,000. The 2021 Bonds were issued primarily to finance the costs of certain improvements to the Water System. The 2024 Bonds were issued primarily to refund all of the outstanding Burbank Water and Power Water Revenue Bonds, Series of 2010B (Build America Bonds) (the "2010B Build America Bonds") issued under the Indenture. The 2021 Bonds and the 2024 Bonds are payable from and secured by the Water Net Revenues on parity with the 2026 Bonds.

The City may incur additional obligations payable from and secured by the Water Net Revenues on parity with the 2026 Bonds subject to the terms and conditions set forth in the Indenture. See

"SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS – Additional Bonds and Parity Debt."

The 2026 Bonds, the 2021 Bonds and the 2024 Bonds, together with all additional water revenue bonds hereafter issued under the Indenture on a parity with the 2026 Bonds, the 2021 Bonds and the 2024 Bonds, are collectively referred to herein as the "Bonds."

No Reserve Fund

No debt service reserve fund will be established under the Indenture for the 2026 Bonds.

Rate Covenant

The City covenants in the Indenture that it shall prescribe, revise and collect such charges for the services, facilities and water furnished by the Water System which, after making allowances for contingencies and error in the estimates, shall provide Water Net Revenues at least sufficient to pay the following amounts in the order set forth:

(1) The interest on, and principal and Redemption Price of, the outstanding Bonds and any Parity Debt as the same shall become due and payable;

(2) All payments required for compliance with the Indenture, including payments required to be made into any bond reserve fund; and

(3) All payments required to meet any other obligations of the City which are charges, liens, encumbrances upon or payable from the Water Net Revenues;

and the charges shall be fixed so that in each Fiscal Year the Water Net Revenues shall be at least equal to 1.20 times the amount of the Annual Debt Service. See "SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS – Rate Covenant."

Continuing Disclosure

In connection with the issuance of the 2026 Bonds, the City will covenant for the benefit of owners of the 2026 Bonds to provide certain financial information and operating data relating to the Water System and to provide notices of the occurrence of certain specified events. See "CONTINUING DISCLOSURE" and "APPENDIX D – FORM OF CONTINUING DISCLOSURE AGREEMENT."

Forward-Looking Statements

The statements contained in this Official Statement, including the Appendices hereto, and in any other information provided by BWP or the City, that are not purely historical, are forward-looking statements, including statements regarding BWP or the City's expectations, hopes, intentions or strategies regarding the future. Prospective investors should not place undue reliance on forward-looking statements. All forward-looking statements included in this Official Statement are based on information available to BWP and the City on the date hereof, and BWP and the City assume no obligation to update any such forward-looking statements. It is important to note that BWP's actual results could differ materially from those in such forward-looking statements.

The forward-looking statements herein are necessarily based on various assumptions and estimates and are inherently subject to various risks and uncertainties, including risks and uncertainties relating to the

possible invalidity of the underlying assumptions and estimates and possible changes or developments in social, economic, business, industry, market, legal and regulatory circumstances and conditions and actions taken or omitted to be taken by third parties, including customers, suppliers and competitors, and legislative, judicial and other governmental authorities and officials. Assumptions related to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond the control of BWP and the City. Any of such assumptions could be inaccurate and, therefore, there can be no assurance that the forward-looking statements included in this Official Statement would prove to be accurate.

Other Matters

Brief descriptions or summaries of the 2026 Bonds, the security and sources of payment therefor, the Water System, the Indenture and certain other documents are included in this Official Statement. Such descriptions and summaries do not purport to be comprehensive or definitive. All references herein to the 2026 Bonds, the Bonds, the Indenture, the Continuing Disclosure Agreement and any other documents are qualified in their entirety by reference to the terms of such bonds or such documents, copies of which are available for inspection at the office of the City Clerk located at 275 East Olive Avenue, Burbank, California 91502, telephone: (818) 238-5851. All references to contracts, indentures and other agreements are qualified in their entirety by reference to applicable bankruptcy, insolvency, reorganization, moratorium and other similar laws affecting creditors' rights and possible exercise of judicial discretion in exercising such rights. Financial and statistical information set forth herein, except for the audited financial statements included in APPENDIX B, is unaudited. The source of all such information is from the City unless otherwise stated. Terms not defined herein have the meanings as set forth in the respective documents.

PLAN OF FINANCE

The 2026 Bonds are being issued to provide funds to (i) finance (including by reimbursing the City for certain previously incurred expenditures) a portion of the costs of certain improvements to the Water System, including but not limited to distribution system pipeline replacements, booster station improvements and upgrades, reservoir replacement and improvements, treatment improvements, and other upgrades to the Water System or such other and additional facilities as the City determines to substitute therefor (the "2026 Water Project") and (ii) pay the costs of issuing the 2026 Bonds.

ESTIMATED SOURCES AND USES OF FUNDS

The estimated sources and uses of funds relating to the 2026 Bonds are shown below:

Sources:	
Principal Amount	$
[Net] Original Issue Premium	
Total Sources	$
Uses:	
Deposit to 2026 Water System Fund	$
Costs of Issuance[(1)]	
Total Uses	$

(1) Includes legal fees, Municipal Advisor fees, Underwriters' discount, Trustee fees, printing costs, rating agency fees and other costs incurred or to be incurred in connection with the issuance of the 2026 Bonds.

DESCRIPTION OF THE 2026 BONDS

General

The 2026 Bonds will be dated their date of delivery, and will bear interest from their date at the rates per annum set forth on the inside cover page of this Official Statement. The 2026 Bonds will mature on June 1 in the years and in the principal amounts set forth on the inside cover page of this Official Statement. Ownership interests in the 2026 Bonds will be issued in denominations of $5,000 principal amount or any integral multiple thereof ("Authorized Denominations").

Interest on the 2026 Bonds will be payable semiannually on June 1 and December 1 of each year, commencing on June 1, 2027 (each an "Interest Payment Date") of each year in lawful money of the United States of America by check mailed by first class mail on each Interest Payment Date to the Owner thereof as of the close of business on the 15th day (whether or not a Business Day) of the calendar month immediately preceding such Interest Payment Date (each a "Record Date"); provided, that upon the written request of an Owner of one million dollars ($1,000,000) or more in aggregate principal amount of the 2026 Bonds received by the Trustee prior to the applicable Record Date (which such request shall remain in effect until rescinded in writing by such Owner), interest shall be paid by wire transfer in immediately available funds.

Interest on the 2026 Bonds is payable from the Interest Payment Date next preceding the date of authentication thereof unless: a 2026 Bond is authenticated on or before an Interest Payment Date and after the close of business on the preceding Record Date, in which event it will bear interest from such Interest Payment Date; a 2026 Bond is authenticated on or before the first Record Date, in which event interest thereon will be payable from the Closing Date; or interest on any 2026 Bond is in default as of the date of authentication thereof, in which event interest thereon will be payable from the date to which interest has been paid in full, payable on each Interest Payment Date. Interest with respect to the 2026 Bonds will be computed on the basis of a 360-day year composed of twelve 30-day months. Principal of and premium, if any, on the 2026 Bonds are payable when due upon presentation at the Corporate Trust Office of the Trustee, in lawful money of the United States of America.

While the 2026 Bonds are subject to the book-entry system, payments of principal, premium, if any, and interest will be paid by the Trustee to DTC for subsequent disbursement to beneficial owners of the 2026 Bonds. See "– Book-Entry Only System" and "APPENDIX F – DTC AND THE BOOK-ENTRY ONLY SYSTEM."

See "APPENDIX C – Summary of Certain Provisions of the Indenture" for a description of the provisions of the Indenture relating to the transfer, registration and exchange of the 2026 Bonds.

Redemption

Optional Redemption. The 2026 Bonds maturing on or before June 1, 20__ are not subject to optional redemption prior to maturity. The 2026 Bonds maturing on or after June 1, 20__ are subject to redemption prior to their respective stated maturities, at the option of the City, from any source of available funds, as a whole or in part on any date (by such maturities as may be specified by the City and by lot within a maturity), on or after June 1, 20__, at a Redemption Price equal to 100% of the principal amount of the 2026 Bonds to be redeemed, plus accrued interest to the date fixed for redemption, without premium.

Mandatory Sinking Fund Redemption. The Series 2026 Bonds maturing on June 1, 20__ shall also be subject to redemption prior to their stated maturity, in part, from mandatory sinking fund payments as specified below, commencing on June 1, 20__, at a Redemption Price equal to the principal amount thereof, plus accrued interest thereon to the date fixed for redemption, without premium.

Term Series 2026 Bonds Due June 1, 20__

Mandatory Sinking Fund Payment Dates (June 1)	Mandatory Sinking Fund Payments $
†	

_____
† Final Maturity.

The Series 2026 Bonds maturing on June 1, 20__ shall also be subject to redemption prior to their stated maturity, in part, from mandatory sinking fund payments as specified below, commencing on June 1, 20__, at a Redemption Price equal to the principal amount thereof, plus accrued interest thereon to the date fixed for redemption, without premium.

Term Series 2026 Bonds Due June 1, 20__

Mandatory Sinking Fund Payment Dates (June 1)	Mandatory Sinking Fund Payments $
†	

_____
† Final Maturity.

Selection of 2026 Bonds for Redemption. If less than all of the 2026 Bonds are to be redeemed, the maturities of 2026 Bonds to be redeemed shall be selected by the City. If less than all of the 2026 Bonds of a maturity are to be redeemed, the Trustee shall select the 2026 Bonds of such maturity to be redeemed, from all 2026 Bonds of the respective maturity not previously called for redemption, in authorized denominations, by lot in any manner which the Trustee in its sole discretion shall deem appropriate. The Trustee will promptly notify the City in writing of the 2026 Bonds so selected for redemption.

Notice of Redemption

Notice of redemption shall be mailed by the Trustee, not less than twenty (20) nor more than sixty (60) days prior to the redemption date, (i) to the respective Owners of any 2026 Bonds designated for redemption at their addresses appearing on the bond registration books of the Trustee by first-class mail, (ii) to the Securities Depository by facsimile or other electronic means of communications and by first-class mail, and (iii) to EMMA at www.emma.msrb.org, by electronic means of communication, or to such other securities depositories or information services as the City may designate in a Request of the City delivered to the Trustee. Notice of redemption shall be given in the form and otherwise in accordance with the terms of the Indenture.

The City has the right to rescind any notice of the optional redemption of any 2026 Bonds by written notice to the Trustee on or prior to the dated fixed for such redemption. Any notice of optional redemption shall be cancelled and annulled if for any reason funds will not be or are not available on the date fixed for redemption for the payment in full of the 2026 Bonds then called for redemption, and such cancellation will not constitute an Event of Default under the Indenture. The City and the Trustee will have no liability to the Owners or any other party related to or arising from such rescission of notice of redemption. The Trustee will provide notice of rescission of redemption in the same manner as the original notice of redemption was provided.

Effect of Redemption

Notice of redemption having been given as provided in the Indenture, and moneys for payment of the Redemption Price of, together with interest accrued to the redemption date on, the 2026 Bonds (or portions thereof) so called for redemption being held by the Trustee, on the redemption date designated in such notice, the 2026 Bonds (or portions thereof) so called for redemption will become due and payable at the Redemption Price specified in such notice, together with interest accrued thereon to the date fixed for redemption, interest on the 2026 Bonds so called for redemption will cease to accrue, such 2026 Bonds (or portions thereof) will cease to be entitled to any benefit or security under the Indenture, and the Owners of such 2026 Bonds will have no rights in respect thereof except to receive payment of such Redemption Price and accrued interest.

Book-Entry Only System

The 2026 Bonds will be issued as fully registered bonds in book-entry only form, registered in the name of Cede & Co. as nominee of DTC, and will be available to ultimate purchasers in Authorized Denominations, under the book-entry system maintained by DTC. While the 2026 Bonds are subject to the book-entry system, the principal, interest and any redemption premium with respect to a 2026 Bond will be paid by the Trustee to DTC, which in turn is obligated to remit such payment to its DTC Participants for subsequent disbursement to Beneficial Owners of the 2026 Bonds. Purchasers of the 2026 Bonds will not receive certificates representing their interests therein, which will be held at DTC.

At any time that the 2026 Bonds are not subject to the book-entry system, the principal and premium, if any, with respect to each 2026 Bond is payable upon surrender of such 2026 Bond at the Office of the Trustee in Los Angeles, California, upon maturity or the earlier redemption thereof.

See "APPENDIX F – DTC AND THE BOOK-ENTRY ONLY SYSTEM" for further information regarding DTC and the book-entry system.

DEBT SERVICE SCHEDULE

The table below shows annual debt service payments on the 2026 Bonds and the outstanding 2021 Bonds and 2024 Bonds, assuming no optional redemption.

		2026 Bonds Debt Service		
Year Ending June 1	2021 Bonds and 2024 Bonds Debt Service[(1)]	Principal[(1)]	Interest[(1)]	Total Debt Service[(1)]
2027	$ 3,657,450	$	$	$
2028	3,674,450

SECURITY AND SOURCES OF PAYMENT FOR THE 2026 BONDS

The following discussion describes the security and sources of payment of the 2026 Bonds. For a summary of the terms of the Indenture, see "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE."

The principal of and interest on the 2026 Bonds are not a debt of the City (except to the limited extent described in this Official Statement), nor a legal or equitable pledge, charge, lien or encumbrance, upon any of their respective property, or upon any of its income, receipts, or revenues except the Water Net Revenues and other amounts pledged under the Indenture.

Pledge of Water Net Revenues

Pursuant to the Indenture, the City has irrevocably pledged Water Net Revenues to secure the payment of the principal or Redemption Price of and interest on the Bonds, including the 2026 Bonds, and all Parity Debt. The City has also pledged to the Bonds (including the 2026 Bonds) all amounts held by the Trustee under the Indenture (except for amounts held in the Rebate Fund) subject only to the provisions of the Indenture permitting the application thereof for the purposes and on the terms and conditions set forth therein. The pledge under the Indenture constitutes a first lien on the Water Net Revenues and the pledged amounts held by the Trustee under the Indenture.

"Parity Debt" of the Water System means any indebtedness, installment sale obligation, lease obligation or other obligation of the City for borrowed money or interest rate swap agreement having an equal lien and charge upon the Water Net Revenues, therefore payable on a parity with the Bonds (whether or not any Bonds are outstanding).

"Water Net Revenues" means the amount of Water Revenues of the Water System remaining after the payment therefrom of the Water Operating Expenses.

"Water Revenues" means all the revenues from rates, fees and charges for providing water service to persons and real property and all other fees, rents and charges and other revenues derived by the City from the ownership, operation, use or service of the Water System, including contributions in aid of construction; provided, that the City may by election in a Supplemental Indenture relating to a Series of Bonds or Parity Debt exclude from Water Revenues any Subsidy Payment.

"Water Operating Expenses" means the amount required to pay the expenses of management, repair and other costs necessary to operate, maintain and preserve the Water System in good repair and working order, including but not limited to, the expenses of conducting the Water System, but excluding depreciation.

The Bonds (including the 2026 Bonds) are <u>not</u> payable from or secured by the revenues of the City's electric enterprise (the "Electric System"), which is also owned by the City and managed by the City.

Limited Obligations

The Bonds (including the 2026 Bonds) are special, limited obligations of the City payable from Water Net Revenues. The 2026 Bonds shall not be deemed to constitute a debt or liability of the City, the State or of any political subdivision thereof within the meaning of any constitutional or statutory limitation, or a pledge of the faith and credit of the City, the State or of any political subdivision thereof, but shall be payable, except to the extent of certain moneys pledged under the Indenture, solely from Water Net Revenues. Neither the faith and credit nor the taxing power of the

City, the State or of any political subdivision thereof is pledged to the payment of the principal of, premium, if any, or the interest on the 2026 Bonds. The issuance of the 2026 Bonds shall not directly or indirectly or contingently obligate the City, the State or any political subdivision thereof to levy or to pledge any form of taxation whatsoever therefor or to make any appropriation for their payment.

Rate Covenant

The City covenants in the Indenture that it shall prescribe, revise and collect such charges for the services, facilities and water furnished by the Water System which, after making allowances for contingencies and error in the estimates, shall provide Water Net Revenues at least sufficient to pay the following amounts in the order set forth:

(1) The interest on, and principal and Redemption Price of, the outstanding Bonds and any Parity Debt as the same shall become due and payable;

(2) All payments required for compliance with the Indenture, including payments required to be made into any bond reserve fund; and

(3) All payments required to meet any other obligations of the City which are charges, liens, encumbrances upon or payable from the Water Net Revenues;

and the charges shall be fixed so that in each Fiscal Year the Water Net Revenues shall be at least equal to 1.20 times the amount of the Annual Debt Service. See "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE –Covenants – *Rates and Charges*."

No Reserve Fund

No debt service reserve fund will be established under the Indenture for the 2026 Bonds.

Allocation of Water Net Revenues Under the Indenture

Pursuant to the Indenture, as long as any Bonds are outstanding or any Parity Debt remains unpaid, the City will deposit in a trust fund, designated as the "Water Revenue Fund," which fund the City shall establish and maintain, all Water Net Revenues, when and as received by the City. For further information regarding the allocation of revenues with respect to the Bonds, see "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Pledge of Water Net Revenues; Water Revenue Fund."

Additional Bonds and Parity Debt

Pursuant to the Indenture, the City is precluded from issuing any obligations or securities payable in whole or in part from Water Net Revenues, except in accordance with and subject to the terms and conditions provided in the Indenture.

The Indenture permits the issuance of additional Bonds or Parity Debt upon the satisfaction of certain conditions precedent to the issuance of such additional Bonds or Parity Debt, including the delivery to the Trustee of a Certificate of the City certifying that the sum of: (1) the Water Net Revenues; plus (2) 90% of the amount by which the City projects Water Net Revenues for any period of 12 consecutive months during the 18 months immediately preceding the date on which any additional Bonds or Parity Debt will become outstanding would have been increased had increases in rates, fees and charges during such period of 12 months been in effect throughout such period of 12 months; plus (3) 75% of the amount by which the City projects Water Net Revenues will increase during the period of 12 months commencing on the date of

issuance of such additional Bonds or Parity Debt due to improvements to the Water System under construction (financed from any source) or to be financed with the proceeds of such additional Bonds or Parity Debt, shall have been at least equal to 1.20 times the amount of Debt Service due within the next consecutive 12 month period on all Bonds and Parity Debt then outstanding and the additional Bonds or Parity Debt then proposed to be issued. "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE."

Notwithstanding the foregoing, the Indenture provides that the City may issue Bonds at any time to refund any outstanding Bonds or Parity Debt issued pursuant to the Indenture without compliance with the provisions described above.

The City may also issue or incur obligations which are payable from Water Net Revenues on a basis that is junior and subordinate to the payment of the principal, premium, interest and reserve fund requirements for the Bonds and all Parity Debt without meeting the tests set forth above. See "APPENDIX C – SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Issuance of Bonds – Limitations on the Issuance of Obligations."

BURBANK WATER AND POWER

General

The City is a charter city, originally incorporated in 1911, and is administered by a Council-Manager form of government. The City's estimated population as of January 1, 2026 was 106,229, according to the California Department of Finance. The City is located in the greater metropolitan Los Angeles area, approximately 12 miles northeast of the Los Angeles Civic Center complex. See "APPENDIX A – GENERAL INFORMATION ABOUT THE CITY OF BURBANK AND LOS ANGELES COUNTY" for additional information relating to the City.

The City's Public Service Department was established in 1913 under the laws of the State of California to supervise the purchase, distribution and sale of water and the generation, purchase, distribution and sale of electricity. In 2000, the name of the Public Service Department was changed to Burbank Water and Power. BWP provides service to all water and electric customers within the City and is a department provided for under the City Charter. The City owns and operates the Water System.

The funds and accounts of the Water System and the Electric System are held separately, and the funds and accounts of one system are not pledged to the other system's obligations.

Senior Management of Burbank Water and Power

BWP is under the direct management of the BWP General Manager (or Acting General Manager), subject to the policy and direction of the City Council and the Burbank Water and Power Board (the "BWP Board") and the broad administrative direction of the City Manager. The BWP Board consists of seven members appointed by the City Council. The BWP General Manager (or Acting General Manager) is responsible for policy and planning relating to the operation of both the Water System and Electric System. Legal services are provided by the City Attorney's office, and various administrative services are also provided by the City. Senior Management of the Water System includes:

Mandip Samra, General Manager (on leave), holds a Bachelor of Arts in Economics from University of California, Los Angeles, a Master of Public Administration from The Maxwell School of Citizenship and Public Affairs at Syracuse University, and a Master of Urban Planning from the University of Southern California. Ms. Samra joined BWP in March 2021 and was promoted to General Manager in

May 2024. She started her career as a Graduate Management Intern in the Customer Relations Division of Pasadena Water and Power in 2004. Prior to joining BWP, she worked in various management positions at Anaheim Public Utilities, Southern California Edison, and Pasadena Water and Power. Her experience in power supply ranges from regulatory compliance, managing the integrated resources plan, negotiating power resource contracts, representing the utility on various resource and transmission committees, and leading stakeholder engagement efforts as it relates to power supply.

Riad Sleiman, P.E., PMP, Chief Assistant General Manager and Acting General Manager, holds a Bachelor of Science in Electrical Engineering from Loyola Marymount University and a Master of Business Administration from Woodbury University. Mr. Sleiman originally joined BWP in 2005 as an Electrical Engineering Assistant working on street lighting, major development reviews, project management, system planning, development agreements and contract negotiations, advanced metering infrastructure deployment, and advanced grid analytics. He then worked on utility-scale battery storage, electric vehicle infrastructure planning, and deployment, implementing small cell policy and agreements, and introducing analytics and applications through the GIS and records group while at the City of Santa Clara electric utility (dba Silicon Valley Power). Mr. Sleiman rejoined BWP in 2021 as the Assistant General Manager/Electric Services. He is a licensed Electrical Engineer in the State of California and is a certified Project Management Professional.

Richard H. Wilson, P.E., Assistant General Manager/Water, holds a Bachelor of Science degree in Mechanical Engineering from Worcester Polytechnic Institute in Worcester, Massachusetts. He has over 30 years of design and construction experience in several industries including shipbuilding, oil, mining, and public utilities, including the East Bay Municipal Utility District and the City of Vallejo. He holds licenses in both civil and mechanical engineering in the State of California. Mr. Wilson joined Burbank Water and Power in November 2018.

Joseph Lillio, Chief Financial Officer ("CFO"), holds a Bachelor of Science in Business Administration with an option in accounting from California State University, Los Angeles and a Master of Public Administration with an option in public sector management and leadership from California State University, Northridge. Mr. Lillio joined BWP in May 2023. Mr. Lillio came to Burbank from the City of El Segundo where he served as the CFO for over seven years. Prior to that, he served in various leadership roles at the City of Oxnard, Las Virgenes Municipal Water District, City of San Fernando, and City of Santa Clarita. He has over 20 years of experience in municipal finance which includes water, wastewater, solid waste, and electric utilities. He also has seven years of private sector finance experience working in the corporate finance office for Princess Cruises.

Burbank Water and Power Board

The BWP Board consists of seven members appointed by the City Council. The BWP Board is responsible for reviewing and making recommendations for any water rate increases to the City Council. Water rate increases, if any, are customarily presented by BWP for City Council approval.

As set forth in the Burbank Municipal Code, the BWP Board has the following powers and duties:

(1) To review and make recommendations on all capital improvements which require City Council approval;

(2) To review and make recommendations on power purchase agreements with terms of more than five years;

(3) To review and make recommendations regarding BWP's budget;

(4) To review and make recommendations regarding electric and water rates;

(5) To approve all contract awards for goods, services and public work construction projects which are provided for in BWP's budget; and

(6) To perform such advisory functions as delegated to it by the provisions of the Burbank Municipal Code or other action of the City Council or the General Manager (or Acting General Manager) of BWP.

The present members of the BWP Board and their terms of appointment are as follows:

Name	Position	Term Expires July 31,
Brian Smith	Chairperson	2028
Ari Altman	Vice-Chairperson	2028
Timothy Cherry	Member	2030
Philippe Eskandar	Member	2028
William (Bill) Lundy	Member	2030
Christopher Malotte	Member	2030
Robert Nielsen	Member	2028

Employee Relations

As of June 30, 2026, 52 full-time equivalent Burbank employees were assigned to the Water System. Certain functions supporting the Water System's operations, including but not limited to, meter reading, customer billing and collection, finance, administration, and operations technology are performed by BWP staff.

All BWP employees fall into one of four categories:

(1) Those represented by Local No. 18 of the International Brotherhood of Electrical Workers ("IBEW");

(2) Those represented by the Burbank City Employees' Association ("BCEA"), which is affiliated with the American Federation of State, County and Municipal Employees as Local No. 3143;

(3) Those represented by the Burbank Management Association ("BMA"); and

(4) Those that are unrepresented.

The BCEA, BMA and IBEW labor contracts are current. The BCEA labor contract will expire on June 30, 2027, the BMA labor contract will expire on June 30, 2028, and the IBEW labor contract will expire on June 30, 2027. Work will continue under the terms of the existing labor contract during negotiations pursuant to each labor contract until a new contract is in place.

There have been no strikes or other material work stoppages by City employees within the last fifteen years.

Pension Plan and Other Post-Employment Employee Benefits for Employees of the Water System

Pension Plan. The City's defined benefit pension plan, the Public Employees Retirement System ("PERS"), provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and their beneficiaries. PERS is part of the Public Agency portion of the California Public Employees Retirement System ("CalPERS"), an agent multiple-employer plan administered by CalPERS, which acts as a common investment and administrative agent for participating public employers within the State of California. A menu of benefit provisions, as well as other requirements, is established by state statutes within the Public Employees' Retirement Law. The City selects optional benefit provisions from the benefit menu by contract with CalPERS and adopts those benefits through local ordinance. CalPERS issues publicly available reports that include a full description of the pension plans regarding benefit provisions, assumptions and membership information that can be found on the CalPERS website at www.calpers.ca.gov. *The foregoing internet address is included for reference only, and the information on the internet site is not incorporated by reference herein.*

Employees of the Water System participate in the City's CalPERS Miscellaneous Plan. City active plan members in the CalPERS Miscellaneous Plan hired prior to January 1, 2013 have been required to contribute 8.00%-9.14% of their annual covered salary since July 1, 2008. Miscellaneous Plan members hired on or after January 1, 2013, and who have no prior membership in any California public retirement system are required to contribute 7.50% of their annual covered salary; the entire 7.50% is paid by such employees. All Public Employees' Pension Reform Act members pay their full employee contribution. The City no longer pays for any employee contributions for any bargaining group.

The City is required to contribute the actuarially determined remaining amounts necessary to fund the benefits for its members. The actuarial methods and assumptions used are those adopted by the CalPERS Board of Administration. The City is required to contribute at an actuarially determined rate for the normal cost and a flat dollar amount for the required unfunded liability contribution. In Fiscal Year 2024-25, The City contributed 30.19% of annual covered payroll for the Miscellaneous Plan. The contribution requirements of plan members are established by state statute and the employer contribution rate is established and may be amended by CalPERS. The Water System is allocated its portion of the required contributions. Approximately 5.33% of the City's PERS obligations are allocated to the Water System. The City contributed 100% of the portion of the employer's actuarially required contribution allocable to the Water System from the Water Utility Fund for the Fiscal Years ending June 30, 2024, June 30, 2025 and June 30, 2026, in the amounts of $1,042,062, $1,042,027 and $[___], respectively. [In addition to the required contribution, in Fiscal Year ended June 30, 2026, the Water Utility also made an additional voluntary lump sum Miscellaneous Plan payment of $[____] to CalPERS to reduce the City's unfunded actuarial liability.]

In Fiscal Year 2014-15, The City implemented Governmental Accounting Standards Board (GASB) Statement No. 68, "Accounting and Financial Reporting for Pensions, an Amendment of GASB Statement No. 27" and GASB Statement No. 71, "Pension Transition for Contributions Made Subsequent to the Measurement Date, an Amendment of GASB Statement No. 68." These GASB Statements establish standards for measuring and recognizing liabilities, deferred outflows of resources, deferred inflows of resources, and expenses. For defined benefit pension plans, these GASB Statements identify the methods and assumptions that should be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service. As of June 30, 2025, the proportionate share of the City's net pension liabilities allocable to the Water System was reported to be $11,152,943 (measured as of June 30, 2024, using an annual actuarial valuation as of June 30, 2023, rolled forward to June 30, 2024, using standard update procedures), a decrease of $1,278,597 over the prior fiscal year. The Water System's proportionate share of the Net Pension Liabilities was 5.33% of the Net Pension Liabilities for the City's Miscellaneous Plan as a whole in for Fiscal Year 2024-25. Reported

deferred outflows of resources as of June 30, 2025 (to be recognized as a reduction of net pension liability in future periods) were $2,747,512, with reported deferred inflows of resources (to be recognized as pension expense in future periods) of $11,492. For the Fiscal Year ended June 30, 2025, the City's Miscellaneous Plan Net Pension Liability as a percentage of covered-employee payroll was 229.48%. The Miscellaneous Plan Net Pension fiduciary net position as a percentage of the Total Pension Liability for the City's Miscellaneous Plan was 81.27% for such Fiscal Year.

See "APPENDIX B – Audited Financial Statements of the City of Burbank Water and Electric Utility Enterprise Funds for the Fiscal Year Ended June 30, 2026."

Post-Retirement Health Care Plans. The City also administers certain post-employment health care benefits under Burbank Employees Retiree Medical Trust ("BERMT"), Utility Retiree Medical Trust ("URMT") and the CalPERS Public Employees' Medical and Hospital Care Act ("PEMHCA") plan. The Water System also makes contributions for OPEB. The Water System assumes its share of OPEB costs based upon the results of actuarial studies. The City has pre-funded the PEMHCA and URMT plans through CalPERS OPEB Trust ("CERBT") and has a policy of contributing 100% of the City's actuarially determined contribution each year.

BERMT is a single employer, defined benefit plan which was established in April 2003 by the City's employee associations to provide post-retirement medical benefits to all non-safety employees, including elected and appointed officials. The trust is controlled by seven voting members from the various employee associations appointed to three-year terms. The City appoints an eighth member to the board, but that member is non-voting. Represented plan members are required to contribute $50 per biweekly pay period, which the City matches. Plan provisions and contribution requirements are established by and may be amended by the BERMT board. Investments are determined by the BERMT plan trustees and are governed by ERISA provisions. Eligibility for benefits requires that members are retired and have reached age 58 with a minimum of five years of contributions into the plan. The benefit provided ranges from $150 to $630 in reimbursements per month for eligible medical expenses. The Water System has allocated its portion of the required contributions. For the Fiscal Year ended June 30, 2025, the allocable portion of the City contributions to BERMT paid from the Water Utility Fund totaled $61,800.

The PEMHCA Plan was established with CalPERS as a single employer plan. The City pays the required PEMHCA minimum contribution for all miscellaneous and safety employees retiring directly from the City. The 2025 PEMHCA minimum contribution was $158 per month. In addition, the City paid $100 per month for 13 management retirees and paid $188 per month for nine IBEW retirees. For these management/IBEW retirees, the PEMHCA minimum required contribution of $158 is paid in addition to the retiree health contribution amounts. The PEMHCA benefit provisions are established and amended through negotiations between the City and its employee associations. The Water System is allocated its portion of the required contributions. For the Fiscal Year ended June 30, 2025, the allocable portion of the City employer's contributions to the PEMHCA plan paid from the Water Utility Fund totaled $171,362. As of June 30, 2024 (the most recent actuarial valuation date), the PEMHCA plan had a funded ratio of 84.66%.

The City also entered into an agreement to provide certain OPEB to the IBEW employees on July 22, 2008, through the URMT, a single employer plan. The agreement is to supplement benefit payments from BERMT and PEMHCA for IBEW members and 12 management employees. The total target benefit is $1,200/month for individuals age 50 to age 64 and $750/month for those age 65 and above, with the exception that for qualifying employees who retire after December 16, 2015 and who have not contributed to Medicare while employed at the City and who are also not otherwise eligible for premium-free Medicare Part A at age 65 and older, the maximum amount at age 65 and older shall be $975/month, including payments from BERMT, PEMHCA minimum and URMT. For the Fiscal Year ended June 30, 2025, the City contributed $5,860,000. For the Fiscal Year ended June 30, 2026, the City's annual required

contribution for URMT was $[____], which was payable from the City's Electric Utility Fund. As of June 30, 2024 (the most recent actuarial valuation date), the URMT had a funded ratio of 129.0%.

In Fiscal Year 2017-18, the City implemented GASB Statement No. 75, "Accounting and Financial Reporting for Postemployment Benefit Other Than Pension Plans." This Statement replaces the requirements of Statements No. 45, "Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions", as amended, and No. 57, "OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans", for OPEB. This Statement establishes standards for recognizing and measuring liabilities, deferred outflows of resources, deferred inflows of resources, and expenses. For defined benefit OPEB, this Statement identifies the methods and assumptions that are required to be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service. Note disclosure and required supplementary information requirements about defined benefit OPEB are also addressed. As of June 30, 2025, the proportionate share of the City's net OPEB liabilities allocable to the Water System was $330,000.

Additional information on the City's pension and OPEB plans is provided in the notes and required supplementary information in the audited financial statements in APPENDIX B to this Official Statement and in the City's Annual Comprehensive Financial Report.

Insurance

The City is self-insured and self-administered for certain exposures through Risk Management, a division of the Management Services Department of the City. The City is self-insured for individual claims up to $2,000,000 for worker's compensation, and $1,000,000 for general liability. Losses in excess of these amounts are covered through commercial insurance policies, up to statutory limits, for individual claims. Since July 1, 2004, the City has been a member in Authority for California Cities Excess Liability (ACCEL), which is a risk sharing pool for municipal excess liability. Each individual member self-insures all general liability losses for the first $1,000,000 and the members of the pool share losses between $1,000,000 and $10,000,000. The members jointly purchase additional layers of coverage beyond the pooled layer, with the City purchasing an additional $60,000,000 of excess coverage, for total coverage of $70,000,000. The layers of coverage above $10,000,000 are not pooled, but rather jointly purchased. The City charges the Water Fund based upon the proportional payroll cost, job classification, and claim history. There have been no significant settlements or reductions in insurance coverage for the past three years. The City maintains a $10,000,000 flood insurance policy. The City does not currently maintain insurance coverage for the Water System for earthquake or wildfire risks.

THE WATER SYSTEM

General

The City owns and operates the Water System, which provides both potable water and recycled water for non-drinking uses such as landscaping irrigation. The Water System provides service to all water customers within the City. For the Fiscal Year ended June 30, 2026, the number of customers of the Water System was approximately 26,665 and the total water consumption (potable and recycled) was approximately 16,566 acre-feet ("AF") or approximately 5.4 billion gallons. An AF is the amount of water that will cover one acre to a depth of one foot and equals 325,851 gallons.

Overall Description of the Water System

Potable Water. The potable water system is an integrated water system consisting of groundwater extraction and production (pumping and blending), transmission and distribution facilities. The City's

potable water requirements are met with treated local groundwater and water purchased from the Metropolitan Water District of Southern California ("MWD"). Supplies of other purchased water are expected beginning in 2026 under a recent agreement (the "SDCWA Exchange Agreement") with the San Diego County Water Authority ("SDCWA").

The potable water system has eleven pressure zones and is divided into three primary pressure zones and eight hillside pressure zones. There are approximately 276 miles of pipe, ranging in size from 3 inches to 30 inches in diameter, approximately 1,869 fire hydrants, connected for general fire protection service, and 13 booster stations with 27 booster pumps for the distribution of water to the various zones. Potable water storage consists of eight concrete reservoirs, one concrete forebay, and fourteen steel water tanks with a capacity of approximately 169.5 AF.

The average potable daily use for the five Fiscal Years ended June 30, 2026 was approximately 42.05 AF, and the maximum demand was about 51.7 AF per day. The annual average potable water sales for the five Fiscal Years ended June 30, 2026 were approximately 13,929 AF/year.

Recycled Water. Wastewater generated within the City is treated at the Burbank Water Reclamation Plant. This water is treated to "tertiary" levels meaning it can be used for non-potable uses. BWP delivers recycled water for landscape irrigation, power plant use, commercial uses, golf course irrigation, and water truck filling. The City's recycled water system consists of transmission and distribution facilities divided into eight pressure zones. The recycled water distribution system has seven pumping stations with 23 booster pumps. Recycled water storage consists of six storage tanks with a capacity of approximately 5.4 AF. The recycled water distribution system has approximately 35 miles of pipeline in service, including approximately 5% repurposed old potable mains, ranging from 4 to 16 inches in diameter. Average recycled daily water used in Fiscal Year 2025-26 was 8.1 AF. Average recycled water sales in the five Fiscal Years ended June 30, 2026 were approximately 2,958 AF/year.

Water Supply

General. The primary water supply for the City is imported water supplied by MWD. The purchase of water from MWD is one of the largest operating expenses of the Water Enterprise Fund. The City does not have ownership rights to the groundwater underneath the City. However, as described below, the City has certain rights to access groundwater, primarily based on the City's contributions of purchased water to recharge the groundwater basin. The City's groundwater supply is blended with purchased treated water as described below before distribution. The City expects access to water supply under the SDCWA Exchange Agreement beginning in 2026.

MWD Water. MWD obtains its water supply from multiple sources, primarily from the Colorado River, through the Colorado River Aqueduct, and the California State Water Project ("SWP"), which is a state water management project that collects water from rivers in the northern part of the State and through a network of aqueducts and pumping stations redistributes it to the southern part of the State.

The City may purchase treated or untreated water from MWD. The treated water is ready for distribution to potable water customers. The untreated MWD water is initially put in the Lopez and/or Pacoima Spreading Grounds, which are water conservation facilities managed by the Los Angeles County Flood Control District that provide groundwater recharge for the San Fernando Valley groundwater basin (the "San Fernando Basin"). The San Fernando Basin lies below much of the San Fernando Valley and portions of the City.

In addition to untreated water purchased from MWD, the City also puts seasonal replenishment water from MWD when available (see "– Other BWP Groundwater Rights – Seasonal Replenishment

Water" below) and cyclic storage water received from MWD (see "– Other BWP Groundwater Rights – Cyclic Storage Program" below) in the Lopez and Pacoima Spreading Grounds.

MWD is obligated to supply all of the City's water needs if requested by the City unless MWD does not have sufficient water available to satisfy all of the water demands of its members, in which case restrictions are imposed upon the amount of water that MWD's members, including the City, may receive.

Five MWD potable water service connections can supply over 100% of the City's maximum daily water demand, with a rated capacity in excess of 200 AF per day. Water purchased from MWD is delivered on demand and is metered at the point of delivery.

For the Fiscal Year 2025-26, approximately 30.1% of BWP's water requirement (full-service treated water) was purchased from MWD and distributed by BWP to its customers. During the five Fiscal Years ended June 30, 2026, on average approximately 21.9% of BWP's annual water requirement (full-service treated water) was purchased from MWD and distributed by BWP to its customers.

[MWD rate discussion to be further developed.] On November 14, 2023, MWD staff presented to the Board the status of the 2014 Purchase Order, which expired on December 31, 2024. The adopted Fiscal Year 2024-25 and Fiscal Year 2025-26 Biennial Budget does not assume that the purchase order contracts will be renewed. As a result, the Tier 2 rate is not included in the rates and charges for calendar years 2025 and 2026; there is only a single supply rate. Metropolitan will revisit the purchase order commitments and similar structures as needed during the business model review through the Climate Adaptation Master Plan for Water (CAMP4W) process.

SDCWA Exchange Agreement Water. Beginning in 2026, the City has contractual rights to purchase treated or untreated water under the SDCWA Exchange Agreement. The treated water is expected to be ready for distribution to potable water customers. The untreated SDCWA Exchange Agreement water will be put in the Lopez and/or Pacoima Spreading Grounds, like untreated water purchased from MWD.

The SDCWA Exchange Agreement follows a settlement agreement between MWD and SDCWA (the "MWD-SDCWA Settlement Agreement") that provides an exchange mechanism for the SDCWA to partner with other MWD member agencies, including the City, to transfer water. Under the SDCWA Exchange Agreement, up to 5,000 AF per year of water may be purchased and delivered, or deferred and later delivered, through calendar year 2047. The SDCWA Exchange Agreement requires minimum delivery amounts starting at 850 AF in 2026 and increasing incrementally in each year to 5,000 AF in 2036 and each year thereafter through 2047. The City expects water under the SDCWA Exchange Agreement will cost less overall than MWD water purchases over the term of the SDCWA Exchange Agreement. The City expects water under the SDCWA Exchange Agreement will displace water purchases from MWD or supply additional water demand in the City (including through groundwater recharge and access described herein). Price is based on defined pricing schedules and not subject to a future rate-setting process. The 2026 supply price is $979 per AF and will escalate based on Consumer Price Index (CPI) inflators, which historically have been less volatile than utility water rates. An additional charge payable by the City to SDCWA will apply to account for the cost of exchange with MWD, at $671 per acre foot in 2026, increasing incrementally to $930 per AF in 2034 and further increasing thereafter based on the Consumer Price Index for All Urban Consumers ("CPI-U") for water and sewerage, as published by the U.S. Bureau of Labor Statistics. Such supply price and additional charge for exchange costs together total $1,650 per AF in 2026. Under the SDCWA Exchange Agreement, treated water will cost more than untreated water (based on a treatment surcharge rate established by MWD from time to time) and an additional charge will apply for deferred, stored water ($150 per AF in 2026, escalating annually based on CPI-U). Water deliveries under the SDCWA Exchange Agreement will not require upfront additional City capital facilities. MWD facilities will deliver such water in accordance with the MWD-SDCWA Settlement Agreement. The City expects

such deliveries to be reliable, based on historical supplies available to SDCWA (which include rights to Colorado River water and desalination facility supply). The water under the SDCWA Exchange Agreement is classified as local supply of the City and is not subject to allocation by MWD (such a reductions in drought periods). However, under the SDCWA Exchange Agreement, SDCWA could become subject to regulatory curtailment and operational constraints, and the City bears all risk of loss after water is directed for delivery from SDCWA to the MWD delivery point(s) to the City.

Groundwater Access. Groundwater from the San Fernando Basin is available to the City as described below based on the recharge of the San Fernando Basin deposits in the Lopez and Pacoima Spreading Grounds from untreated water purchased from MWD, seasonal replenishment water from MWD, cyclic storage water received from MWD and expected untreated water under the SDCWA Exchange Agreement.

The City has additional groundwater rights under a court judgment described below (see "– Groundwater Supply Rights") and under a recycled water exchange arrangement (see "– Other BWP Groundwater Rights – Exchange Agreement with City of Los Angeles").

The City pumps and then treats and blends such groundwater at the Burbank Operable Unit ("BOU"), a groundwater treatment facility owned by the City, before distribution to customers. See also "– *Water Treatment* – Burbank Operable Unit." The treated groundwater at the BOU is blended with treated water from MWD. If treated water is requested by the City under the SDCWA Exchange Agreement, such treated water would be similarly blended with treated groundwater at the BOU.

The table below describes the City's historical potable water production.

Burbank Water and Power
Historical Potable Water Production

Fiscal Year	Burbank Operable Unit Local Production[(1)]	Imported Treated Water[(5)]
2017	65%	35%
2018	63	37
2019	63	37
2020	58	42
2021	73	27
2022[(2)]	78	22
2023[(3)]	81	19
2024[(3)]	83	17
2025[(4)]	78	22
2026	70	30

[(1)] Approximately 60-70% of the BOU's annual local water production is from untreated water from MWD and the balance is from the Import Return Credit (see "– Groundwater Supply Rights").
[(2)] BOU availability was impacted due to a fire at an electrical substation that supplies electricity to the BOU.
[(3)] Relative increases in BOU local production starting in Fiscal Year 2020-21 are due to technological and operational changes, although the ability to operate at this higher level of production is subject to a variety of factors, including review and approval by the United States Environmental Protection Agency and the California Division of Drinking Water.

(4) BOU availability was impacted due to multiple bed changeouts that were required due to contaminant detection at 75% port. Based on system demands, MWD Treated Import water provided the supplemental supply needed to maintain the water system.
(5) Imported treated water for the periods displayed was supplied by MWD. Water supply under the SDCWA Exchange Agreement is expected beginning in Fiscal Year 2026-27.
Source: BWP

Groundwater Supply Rights. The San Fernando Basin and the Upper Los Angeles River Area ("ULARA") are adjudicated according to the 1979 final judgment in a state court case entitled City of Los Angeles vs. City of San Fernando, et al., Los Angeles County Superior Court Case No. 650079 (the "Judgment"), which established the ULARA Watermaster to oversee the San Fernando Basin and report on an ongoing basis to the Superior Court. The Judgment established that the City of Los Angeles owns all naturally occurring water in the San Fernando Basin but recognized that a portion of the water imported into the San Fernando Basin percolates into the groundwater table. Under the Judgment, the City has a right to pump from the San Fernando Basin 20% of all water it delivers to customers (at no cost) and is known as an import return credit ("Import Return Credit"). The 20% entitlement is calculated based on the total of MWD treated water, BOU-produced and treated groundwater, and recycled water sold. Unused Import Return Credits in any year can be accumulated and banked for future use. Under the Judgment, the City has an additional right to purchase credits from the City of Los Angeles to pump up to 4,200 AF of groundwater per year (the "Physical Solution") at the City of Los Angeles's prior year average cost of water. The Physical Solution is exercised when the price of MWD untreated water is higher than the Physical Solution from the City of Los Angeles or when MWD water is unavailable. The City did not purchase Physical Solution in over a decade prior to the last five Fiscal Years (Fiscal Years 2020-21, 2021-22, 2022-2023, 2023-2024, and 2024-2025).

Other BWP Groundwater Rights.

Seasonal Replenishment Water. When conditions allow, the City has the ability to purchase seasonally discounted replenishment water from MWD to count toward stored groundwater credits in the San Fernando Basin. This class of water, however, has not been available since May 2007 (except in Fiscal Year 2011-12 when the reservoirs were full from the heavy precipitation in the winter of 2011), due to issues associated with litigation involving the San Francisco Bay/Sacramento-San Joaquin River Delta. When replenishment water is not available, as has been the case for the past decade, the City can purchase full service untreated water from MWD or Physical Solution water from the City of Los Angeles.

Cyclic Storage Program. In 2017, MWD created a Cyclic Storage Program to store water supply that was in excess of MWD's demand and storage capacity. The program allows MWD to deliver water in advance of demand to member agencies for storage in the San Fernando Basin. Member agencies participating in the program are charged MWD's rate for full service untreated water in effect at the time the stored water is withdrawn and the water taken without affecting the capacity charge that would otherwise be in place. In December 2018, the City made an advance payment for 5,719 AF at a cost of $3.97 million of Cyclic Storage Water ("CSW") under this program, funded by primarily a loan of $3.95 million from the City's Electric Fund. During Fiscal Year 2019-20, BWP made another advance payment for 5,609 AF at a cost of $4.1 million, partially funded by a loan of $2.5 million from the City's Electric Fund. By June 30, 2021, the City accumulated a total of 11,318 AF in CSW. City water ratepayers benefited from these advance purchases of CSW water by avoiding MWD's rate increases [that would have otherwise applied to such water]. [Have the pre-paid supplies been withdrawn in full yet? If not, how much remains?]

As of July 31, 2022, the full outstanding balance of these loans from the City's Electric Fund were paid off in full.

With the heavy precipitation in Fiscal Year 2022-23, MWD offered water under the Cyclic Storage Program. The City entered into an agreement to take 3,298 AF at a cost of $2.8 million. [Was this prepaid? If so, was it prepaid with a loan, and is the loan still outstanding? Has this supply been withdrawn in full yet? If not, how much remains?]

Exchange Agreement with City of Los Angeles. The City entered into an exchange agreement with the City of Los Angeles in January 2011, under which the City exchanges its recycled water for groundwater credits on a one-to-one ratio. Because the right to pump groundwater from local wells is limited by stored groundwater credits, this exchange reduces the number of groundwater credits that the City must otherwise purchase or obtain. The exchange began operation in October 2019.

Fiscal Year	Exchange Volume (AF)
2021	50
2022	47
2023	39
2024	23
2025	19
2026	21

Groundwater Credits. The following table shows the stored groundwater credits as of June 30 in each of the five Fiscal Years shown. The table reflects all sources of groundwater credits except credits received under the exchange agreement with the City of Los Angeles described above.

Burbank Water and Power
Historical Stored Groundwater Credits[(1)]

Fiscal Year	Total Acre-Feet
2022	25,323
2023	24,510
2024	21,485
2025	18,460
2026	14,820

[(1)] Excludes groundwater credit received under the exchange agreement with the City of Los Angeles described above. 2022 through 2026 data are based on water year (October 1 through September 30) end balances of total groundwater storage credits as of October 1.
Source: BWP

As of July 1, 2026, the City has 17,631 AF of total groundwater inventory (including credits under the exchange agreement with the City of Los Angeles and other groundwater credits).

Sustainable Groundwater Management Act. The State's Sustainable Groundwater Management Act requires qualifying local agencies to create a Groundwater Sustainability Agency and adopt a Groundwater Sustainability Plan. The San Fernando Basin is classified as a very low-priority basin and is currently not required to form a Groundwater Sustainability Agency.

Developments Affecting Water Supply.

Aridification. California and the west are experiencing longer and more frequent drier weather conditions that scientists believe are a long-term trend referred to as aridification. State government responses to recent drought periods have included declarations of emergency, executive orders and other actions curtailing water usage across the State.

The SWP, which is one source of water for MWD, is a state water management project that collects water from rivers in the northern part of the State and through a network of aqueducts and pumping stations and redistributes it to the southern part of the State. Water allocation from the SWP varies according to factors including reservoir storage, weather projections, and projected runoff into streams, reservoirs, and aquifers. These factors are impacted by precipitation that usually occurs from December through April, when California historically receives more than 90% of its snow and rain. For water year 2026, the SWP allocation announced in January 2026 was 30%. In May 2026, an increase to 45% was announced.

The Colorado River Basin is also a critical water supply for Southern California. In July 2026, the federal government released its near-term management plan for the Colorado River system. The plan imposes tighter limits on water drawn from Lake Mead, which is at a historically low level. Nevada, Arizona and California will be required to cut their use of Colorado River water by about 20% over the next two years, with deeper reductions still possible. As noted above, MWD and SDCWA obtain water supply from multiple sources, including substantial supplies from the Colorado River. [To be revisited upon posting of expected MWD official statement.]

[To date, MWD has not announced supply cutbacks based on the SWP allocation for water year 2026 or otherwise, although there can be no assurance that it will not do so later.]

Ongoing efforts to improve water conservation, increase the use of recycled water, and manage groundwater sustainably will be crucial to maintaining a stable water supply for the growing population amid the challenges of climate change.

BWP has adopted a Water Shortage Contingency Plan ("WSCP") that lays out various methods for mitigating the effects of water shortages of increasing intensity in six stages. The WSCP includes voluntary and mandatory water use restrictions designed to reduce flexible water use depending on the cause, severity, and anticipated duration of the supply shortage. The WSCP details the protocols and procedures that BWP will implement at each stage of a declared water shortage to help water users comply with the shortage response actions.

The City Council recently updated its sustainable water use ordinance, which imposes residential water restrictions such as outdoor irrigation time limits, water runoff prevention rules and prompt leak repair requirements.

A long drought could interfere with the City's ability to add to its groundwater credits. However, the City currently plans to keep a reserve of 10,000 AF in groundwater credits. This would allow normal extractions to continue for approximately three years without replenishment, assuming the purchase of 4,200 AF per year of Physical Solution water annually from the City of Los Angeles (see " – Groundwater Supply Rights" above). After that, assuming the groundwater basin still holds enough water, the City would have to negotiate the purchase of additional groundwater from the City of Los Angeles.

Beginning in 2022, BWP began preparing and submitting an annual water supply and demand assessment ("Annual Assessment") to the California Department of Water Resources ("DWR") by July 1 of every year to evaluate actual forecasted near-term water supply conditions (for the next 12 months),

followed by a dry year, and determine if a water shortage is imminent. If the Annual Assessment anticipates that demands will exceed available supply, the City Council will vote to determine the appropriate water shortage level and associated actions necessary to reduce demand to ensure adequate supply.

Risk Assessment. On October 23, 2018, America's Water Infrastructure Act ("AWIA") was signed into U.S. law. AWIA Section 2013 requires community drinking water systems serving more than 3,300 people to develop or update risk assessments and emergency response plans ("ERPs"). The law specifies the components that the risk assessments and ERPs must address (including risks of failure, such as security, water quality and seismic protection, and consequences of failure) and establishes deadlines by which water systems must certify to the U.S. Environmental Protection Agency (the "EPA") completion of the risk assessment and ERP. BWP's risk assessment was certified as complete on March 31, 2025. The findings of the risk assessment were incorporated into the City's updated emergency response plan, which was also certified as complete on September 29, 2025. The certifications were completed ahead of their respective deadlines. BWP is currently in compliance with all requirements of AWIA. AWIA requires community drinking water systems to perform risk assessments and update their ERPs every five years, with BWP's next certification due in 2030.

Per- and Polyfluoroalkyl Substances ("PFAS"). PFAS are a group of synthetic chemicals used in commercial and industrial processes and products since the 1940s. These chemicals are resistant to break down or break down very slowly and are known as "forever chemicals." While there are thousands of PFAS, some of the widely used and studied PFAS include perfluorooctanoic acid ("PFOA") and perfluorooctane sulfonate ("PFOS"). Research has linked PFAS to potential environmental and human health impacts.

In April 2024, the EPA published a final rule establishing a national drinking water limit of six PFAS. Public water systems have three years to begin monitoring these PFAS and two additional years to comply with the limits set by the EPA. The SWRCB has also established detection and reporting limits for PFAS in its water quality report. Specifically, SWRCB has set a notification level and a response level for four PFAS compounds: PFOA, PFOS, perfluorobutane sulfonate and perfluorohexanesulfonic acid ("PFHxS"). Notification level refers to a lower concentration at which water agencies must notify the public about PFAS presence and response level indicates a concentration level where agencies must take action to remove or provide treatment for the contaminated water source.

For the past two decades, BWP has been removing trace amounts of PFAS from its groundwater wells using a granular activated carbon removal process as water passes through the BOU. The Water Utility conducted a pilot study for PFAS treatment at the BOU that was approved by the SWRCB - Division of Drinking Water that focused on the single liquid phase granular activated carbon process. During the study, water quality samples were conducted, and the results were compiled as required and outlined in the pilot study plan. The BOU processed up to 230 million gallons of water to obtain the required water quality data for analysis. The results of the pilot study were approved and on July 17, 2025, the State Water Resources Control Board Division of Drinking Water issued Permit Amendment No. 1910179PA-005 that recognizes that the BOU treats elevated levels of PFOA, PFOS and PFHxS to below the respective individual levels that trigger state-mandated consumer confidence reporting requirements.

Water Treatment

Burbank Operable Unit. The BOU is an EPA-led project to clean up groundwater impacted by historical industrial releases, primarily by Lockheed-Martin. Lockheed-Martin pays capital costs and normal operating costs of the BOU. See "THE WATER SYSTEM – Environmental Issues."

The BOU commenced operation in January 1996 to treat, blend, disinfect, and pump up to 6,000 gallons per minute ("gpm") of groundwater from eight groundwater wells into the City's distribution system. In 1998, the BOU treatment capacity was expanded from 6,000 gpm to 9,000 gpm. The treated groundwater is blended with MWD treated water to reduce and control the level of nitrate concentrations. In the Fiscal Year 2025-26, a total of 11,025 AF of groundwater was treated at the BOU at a capacity of approximately 70.6% and an average flow rate of 6,238 gpm.

BWP has overseen many improvements to assure the reliability of the BOU. Both the vapor phase granulated activated carbon ("VPGAC") and the liquid phase granulated activated carbon ("LPGAC") units were modified in 2004. The internal piping configuration of the LPGAC was reconfigured, and a complete redesign of the internal screens and piping of the VPGAC and the airflow patterns that were completed in 2008. The boiler upgrades for onsite regeneration of the VPGAC carbon were completed in 2013. Supervisory Control and Data Acquisition upgrade and primary controller replacement were completed in 2014.

Current planned improvements at the BOU include energy efficiency improvements, at least two new LPGAC vessels for liquid phase treatment, two replacement wells in North Hollywood, and a pipeline to bring the water from the wells to the BOU, the costs of which will be paid by Lockheed-Martin. Along with nitrate, other constituents of concern in the groundwater may increase and negatively impact production at the BOU. It may eventually be necessary to build additional treatment processes with funding expected to come from parties found to be responsible for the contamination.

The City's drinking water permit mandates blending of the BOU water with imported MWD water to meet acceptable nitrate levels. If the MWD supply were interrupted, production of groundwater might also be impacted, although the City believes that lower nitrate levels at the BOU wells have reduced this risk.

Interconnection with LADWP. During Fiscal Year 2019-20, the construction of a "temporary interconnection" ("LAIX") was completed under an agreement between BWP and the Los Angeles Department of Water and Power ("LADWP"). This temporary interconnection uses excess capacity at the BOU when BWP demand is lower than BOU capacity. The transfer agreement stipulates that LADWP will directly pay MWD for the treated surface water used to blend with the treated groundwater and reimburse BWP for its volumetric portion of the costs to operate, maintain, distribute, and pump the water. The LAIX began normal operation in October 2019 [and is expected to be superseded by a permanent intertie in the future] [Update on permanent intertie?]. The table below sets forth the volume of water delivered to LADWP through LAIX by fiscal years:

Fiscal Year ended June 30	**LAIX Volume (AF)**
2022	581
2023	0
2024	787
2025	839
2026	744

Information About the Metropolitan Water District of Southern California

In December 2025, MWD issues water revenue refunding bonds (the "2025 MWD Bonds"). In connection with the marketing of the 2025 MWD Bonds, MWD prepared an official statement dated December 10, 2025 (the "MWD Official Statement"). The MWD Official Statement includes a discussion of MWD's water sources in Appendix A to the MWD Official Statement, which is entitled "The Metropolitan Water District of Southern California." ***Although the City believes MWD is the best source of information about MWD's water sources and operational plans, and, therefore, encourages potential investors to review the MWD Official Statement, the City can provide no assurances as to the accuracy, completeness or timeliness of the MWD Official Statement***. The MWD Official Statement is available on the Municipal Securities Rulemaking Board's Electronic Municipal Market Access system. [To be revisited upon expected posting of MWD official statement.]

Capital Improvement Plan

The critical objectives for the Water System are reliability, public safety, water quality, and business management. Reliability addresses supply, storage and distribution. Public safety addresses fire flow and fire hydrants. Water quality focuses on maintaining water supply, treatment facilities and distribution systems to meet all applicable regulatory and legal requirements and to maintain the public's trust in the water delivered by BWP. Business management is the replacement and repair of the meters and management of water supply cost.

Capital improvement programs are designed to upgrade, replace, and expand the water system infrastructure, ensure reliability, and provide safe drinking water and services at competitive rates. BWP maintains active capital improvement programs such as main and service, and meter replacement initiative, which are specifically designed to modernize, rehabilitate, and expand infrastructure. These programs aim to enhance system reliability, ensure safe water delivery, and ensure accurate measurement of customer consumption.

To sustain and further improve system integrity, BWP leverages advanced predictive technologies. Acoustic, non-destructive condition assessments are layered with satellite imagery to assess pipeline risk, detect early signs of deterioration, and prioritize capital expenditures under an asset management framework. This integrated, risk-based approach ensures that investments are both cost-effective and targeted toward highest-impact interventions.

[The 2025 ACFR mentions a study for a pure water project and potential participation in a regional desalination proposal. What is the status? Are there other similar proposals under consideration?]

The estimated capital spending on the Water System over the five Fiscal Years shown in the table below is approximately $104 million. The City expects to apply approximately [$42 million] of 2026 Bonds proceeds to such capital spending. The remainder is currently expected to be funded from sources other than Bond proceeds. The City believes that its planned capital spending will be sufficient to maintain the Water System in efficient operating condition.

The following table is a summary of BWP's Five-Year Capital Improvement Program. The costs in the table do not include costs for BOU improvements described in "THE WATER SYSTEM – Water Treatment," because those costs are paid by Lockheed-Martin.

BURBANK WATER AND POWER

Largest Water Customers

BWP's five largest water customers (excluding other City departments) accounted for approximately 7.46% of the City's water sales for the Fiscal Year 2025-26. During the same period, the City's ten largest water customers (excluding other City departments) accounted for approximately 9.74% of the City's water sales and the City's 25 largest water customers (excluding other City departments) accounted for approximately 12.31% of the City's water sales.

Water Rates and Charges

Subject to the requirements of Proposition 218, the City has the power to establish rates and charges as needed to operate the Water System. Pursuant to the Burbank Municipal Code, the utility must remain self-supporting from a financial standpoint and must maintain rates sufficient to maintain its financial health. Because costs can change suddenly and materially, a regular review and report on rates is necessary. BWP regularly evaluates such information needed to maintain adequate rates and uses such information in its assessment of its rates. Water rates are established by the City Council and are not subject to regulation by the California Public Utilities Commission (the "CPUC") or by any other state agency.

The City's potable water rates consist of three components: a fixed monthly water availability charge based on meter size, a tiered quantity charge based on usage, and an additional water cost adjustment charge (the "WCAC") based on usage. Under current rate schedules, the fixed monthly water availability charge components reflect approximately [23%] of aggregate potable water rates.

Recycled water rates consist of two components: a fixed monthly water availability charge based on meter size and a quantity charge based on usage.

Current water rates, including the WCAC, were established by the BWP Board, and approved by the City Council as part of the annual budget process. In May 2025, the City Council approved a systemwide average increase of 14%, effective January 1, 2026, and January 1, 2027.

The City currently expects to prepare a new cost of service study in Spring 2027 to inform expected rate setting proceedings for rates to be effective beginning in January 1, 2028.

The Water System's base rates have changed 12 times over the last 11 years. The City provides no free water services. The following table sets forth the percentage change in overall system rates since July 1, 2015.

Burbank Water and Power
Percentage Change in Water Rates[(1)]

Effective Date	Overall System
07/01/15	3.40%
07/01/16	3.40
07/01/17	3.40
07/01/18	4.90
07/01/19	4.90
10/01/21	1.96
01/01/22	1.96
04/01/22	1.96
07/01/22	6.00
07/01/23	9.00
07/01/24	9.00
01/01/26	14.00
01/01/27	14.00

[(1)] Percentage change is based upon the immediately preceding rate.

The following table sets forth the weighted average billing price, factoring in fixed and usage-based charges, per hundred cubic feet of BWP's various customer classes for the five Fiscal Years shown.

BURBANK WATER AND POWER
WEIGHTED AVERAGE BILLING PRICE
($ per CCF[1])
Fiscal Year Ended June 30,

	2022	2023	2024	2025	2026
Residential[2]	$4.33	$5.04	$5.46	$5.84	$6.30
Commercial[3]	4.25	4.85	5.12	5.41	5.75
Weighted Average Potable Water Rate	4.31	5.00	5.39	5.75	6.18
Weighted Average Recycled Water Rate	3.08	3.50	3.64	3.78	4.13

(1) CCF equals one hundred cubic feet; one AF is equal to approximately 435.6 CCF. Average monthly residential usage per household is 16 CCF.
(2) Residential includes multi-family dwellings.
(3) Commercial includes Large Commercial.
Source: BWP.

Billing and Collection. Water service charges are billed monthly by BWP. Electric, refuse, water and sewer service charges are issued jointly in a general utility bill. The general utility bill is due within 21 days from the date the bill is delivered or mailed. All services may be disconnected if payment is 21 days delinquent. Delinquent fees and charges may be made a lien against the property, placed on the tax roll of the county and collected in the same manner as ad valorem taxes.

The following table reflects delinquency rates for collection of payment for electric, refuse, water and sewer services of the City (expressed as a percentage of annual total revenues received by the City for the use of such utility systems) for the five Fiscal Years shown below.

BURBANK WATER AND POWER
DELINQUENCY RATE AS OF JUNE 30, 2022-2026

As of June 30,	Delinquency Rate
2022[1][2]	3.80%
2023[1]	1.70
2024	[___]
2025	[___]
2026	[___]

(1) Collections activity was suspended due to COVID-19 from March 2020 to April 2023 for residential customers. Disconnection for nonpayment resumed on April 3, 2023.
(2) The State Water Board also created the California Water and Wastewater Arrearage Payment Program ("CWWAPP") to provide relief to community water and wastewater systems for unpaid bills related to the pandemic. The CWWAPP funding covered water debt from residential and commercial customers accrued between March 4, 2020 and December 31, 2022. The Water Fund received $384,722 from the program in fiscal year 2021-22, applied $328,935 as defined under the program and returned $55,788 back to the State. The Water Fund received $566,478 in fiscal year 2023-24[, and has not yet applied payment. Payments are expected to be applied in June 2024 and any unused portion will be returned to the State] [update].

Projected Water Net Revenues and Debt Service Coverage

The following table sets forth a five-year projection of Water Net Revenues, together with debt service coverage ratios. The projections reflect the approved rate increases for Fiscal Years 2025-26 and 2026-27 and forecasted rate increases for Fiscal Years 2027-28 through 2029-30 shown in the table. The forecasted rate increases shown represent anticipated proposed increases and have not been approved by the City Council. Actual rate adjustments may differ materially from those presented and will be determined based on the results and recommendations of the cost-of-service study. Assumed inflationary increases range between 2.3% and 2.5% for Fiscal Years 2026-27 through 2029-30.

In the preparation of the projections in the table below, BWP has made certain assumptions with respect to conditions that may occur in the future. While BWP believes these assumptions are reasonable for the purpose of the projections, such assumptions are dependent on future events. Some assumptions may not materialize and unanticipated events and circumstances may occur. To the extent actual future factors differ from those assumed by BWP in the preparation of such projections, or unanticipated events or circumstances occur, the actual results will vary from such projections, and such variations may be material. The projected information has not been compiled, reviewed or examined by the City's independent accountants.

Water Net Revenues					
Net Debt Service					
Rate Covenant Coverage					
Revenues Available After Debt Service					

(1) Rate increases for Fiscal Years 2026 and 2027 were approved by the City Council in May 2025. Rate increases are effective January 1. The forecasted rate increases shown represent anticipated proposed increases and have not been approved by the City Council. Actual rate adjustments may differ materially from those presented and will be determined based on the results and recommendations of the cost-of-service study.

(2) Other operating revenues include connection fees, recycled water credits, and other miscellaneous revenues. Other operating revenues do not include aid-in-construction.

(3) BWP has fully expensed the cost of the purchased untreated water and is currently using 20% Import Return Credits (IRCs) in lieu of purchasing additional untreated water from MWD.

(4) Total operating expenses include costs of imported water, costs of treating water, wages and salaries, and cost allocation from the Electric Utility Fund and the City for shared services. Operating expenses do not include depreciation, and interest expense.

Source: BWP.

Financial Reserves

BWP management initially developed a financial reserve policy to maintain its long-term rate stability in May 2003 and last updated it in 2023. Financial reserves were established for general operating expenses, debt repayment and capital funding, and replenishment reserves for storage when water prices are low. Under the updated financial reserve policy, BWP's financial reserve is based on available cash to fund normal operation per day or days cash on hand. Days cash on hand is calculated by taking the unrestricted cash and investments less depreciation and dividing by the annual operating expenses for one day. The financial reserve policy includes a minimum reserve and a recommended reserve. The approved minimum financial reserve is 120 days cash on hand and the recommended reserve ranges between 200 – 300 days cash on hand. The City had 320 days cash on hand on June 30, 2026.

Customer Relations

As a community owned utility, BWP's relationship with its customers and community stakeholders continues to be an important focus. As the utility moves forward with sustainability and drought, BWP will educate, engage, and work with customers will become increasingly important.

In late 2020, BWP's marketing group began pursuing an omni-channel marketing strategy with an emphasis on digital and social media channels to broaden its reach. This has resulted in greater opportunities for engagement with both residential and commercial customers about key issues such as COVID relief, water conservation, and new EV rebate programs. 78% of customers in the latest residential survey rating outbound communications as highly satisfactory, and BWP won two national awards from the American Public Power Association (the "APPA") [in 2025] and one from the Northwest Public Power Association in [20__]. The APPA recognized BWP in print/digital and web/social media categories with Awards of Excellence.

BWP's water meets or exceeds all State and Federal drinking water standards. The water is monitored and tested on a daily basis with over 3,200 water samples analyzed per year. The results are recorded by the CDPH's database and distributed to the customers annually.

Litigation

BWP is presently involved in certain matters of litigation that have arisen in the normal course of conducting water operations. Management believes, based on consultation with the City Attorney, that these cases in the aggregate are not expected to result in a material adverse financial impact on the Water Fund.

RISK FACTORS

The following factors, which represent certain risk factors, should be considered along with all other information in this Official Statement by potential investors in evaluating the 2026 Bonds. The following is not intended to be an exhaustive list and there can be no assurance made that other risk factors do not currently exist or will not become evident at any future time.

Revenues of the Water System; Rate Covenant Not a Guarantee

The ability of the City to pay the principal of and interest on the 2026 Bonds depends on the ability of the City to generate Water Net Revenues in the levels required by the Indenture. Although, as more particularly described herein, the City expects that sufficient revenues will be generated through the imposition and collection of service charges, impact fees, and other Water Revenues described herein, there is no assurance that such imposition of service charges, impact fees, or other Water Revenues will result in

the generation of Water Net Revenues in the amounts required by the Indenture. As a result, the City's covenant does not constitute a guarantee that sufficient Water Net Revenues will be available to pay the principal of and interest on the 2026 Bonds when due.

Water Supply

The City's water supply is dependent on the reliability of imported water from MWD and, beginning in 2026, from SDCWA. The City does not have ownership rights to the naturally occurring groundwater underneath the City. Instead, the primary potable water supply for the City is imported water. See "THE WATER SYSTEM – Water Supply." The City cannot guarantee that it would be able to meet its rate covenant if the supply of imported water were to be reduced or unavailable.

Demand and Usage

There can be no assurance that the local demand for services provided by the Water System will continue according to historical levels. In addition, drought conditions and voluntary or mandatory conservation measures could decrease usage of the services of the Water System. See "–Drought Conditions." Although a decline in demand would result in certain reduced commodity expenses, such reductions would not be expected to be sufficient to fully offset the decline in revenues. Reduction in revenues resulting from a decline in demand could require an increase in rates or charges in order to produce Water Net Revenues sufficient to comply with the City's rate covenant. See "THE WATER SYSTEM – Water Rates and Charges." Rate increases could increase the likelihood of nonpayment.

Water System Expenses

There can be no assurance that the City's future expenses for the Water System will be consistent with the projections in this Official Statement. Changes in technology, changes in quality standards, or decreased development, increases in the cost of operation, increased regulation or other expenses could require increases in rates or charges in order to comply with the City's rate covenant in the Indenture. In addition, the Water System's biggest expense – the cost of purchasing of water – is dependent upon the rates and charges established by MWD.

Statutory and Regulatory Impact

The kind and degree of water treatment is regulated, to a large extent, by the federal government and the State of California. Treatment standards set forth in federal and state law control the operations of the Water System and mandate its use of technology. If the federal government, acting through the EPA, or the State of California, or additional federal or state legislation, should impose stricter water quality standards upon the Water System, the Water System's expenses could increase accordingly and rates and charges would have to be increased to offset those expenses.

It is not possible to predict the direction which federal or state regulation will take with respect to drinking water quality standards, although it is likely that both will impose more stringent standards with attendant higher costs.

Although the City has covenanted in the Indenture to prescribe, revise and collect such charges for the services, facilities and water furnished by the Water System during each fiscal year at specified levels, no assurance can be given that the cost of compliance with such laws and regulations will not materially adversely affect the ability of the City to generate Water Net Revenues in the amounts required by the Indenture and to pay the 2026 Bonds. Certain potential increasing regulatory standards could materially increase the cost to the City of providing water services.

Environmental Issues

Utilities such as the Water System are subject to continuing environmental regulation. Federal, state and local standards and procedures which regulate the environmental impact of utilities are subject to change. These changes may arise from continuing legislative, regulatory and judicial action regarding such standards and procedures. Consequently, there is no assurance that the Water System or any City facility or project will remain subject to the regulations currently in effect, will always be in compliance with future regulations or will always be able to obtain all required operating permits. An inability to comply with environmental standards could result in additional capital expenditures, reduced operating levels or the shutdown of individual units not in compliance. In addition, increased environmental regulations have, and may in the future, create certain barriers to new facility development and require modification of existing facilities and may result in additional costs for affected resources. The City cannot predict at this time whether any additional legislation or rules will be enacted which will affect the City's operations, including the Water System managed by BWP, and if such laws or rules are enacted, what the costs to the City might be in the future because of such action. See "RISK FACTORS" below.

Litigation

At any given time, there are certain claims and disputes, including those currently in litigation, that arise in the normal course of the City's Water System enterprise activities. In the view of BWP management, there is no litigation, present or pending, which will, individually or in the aggregate, materially impair the City's ability to service its Water System indebtedness or which will have a material adverse effect on the business operations of the Water System. See "LITIGATION."

Global Health Emergencies; COVID-19 Pandemic

A pandemic, epidemic or outbreak of an infectious disease can have significant adverse health and financial impacts on global and local economies. Beginning in 2020, the COVID-19 pandemic negatively affected economic activity throughout the world, including the United States and the State. The COVID-19 pandemic, and actions by local and national governments to mitigate the effects of the pandemic, impacted travel, commerce, asset values and financial markets globally, and negatively affected economic output worldwide and within the State and the City. The City implemented certain temporary measures intended to mitigate the impact of the COVID-19 pandemic and to assist the City's customers, including waiving late fees and suspending service shut-offs due to nonpayment. The City was subjected to periodic orders from the State government that regulate service shut-offs.

Total water sales were minimally impacted by the COVID-19 pandemic. The decrease in commercial sales was offset by an increase in residential demand primarily driven by the "stay-at-home" order.

Future pandemics and other widespread public health emergencies may arise from time to time. No assurance can be given that the operations or finances of the Electric System will not be negatively affected in the event of a resurgence of the COVID-19 pandemic, or if another national or localized outbreak of highly contagious or epidemic disease occurs in the future.

Earthquake, Flood, Wildfire or Other Natural Disasters

General. The occurrence of an earthquake, flood, fire, or other natural disaster which results in the temporary or permanent closure of major components of the Water System or results in significantly increased costs could materially adversely affect the ability of the City to operate the Water System or to generate Water Net Revenues at the levels required by the Indenture.

Seismic. The City is located in a region of seismic activity. Damage from seismic activity could occur through surface fault rupture, ground shaking, liquefaction, and landslides. Surface fault rupture is an actual cracking or breaking of the ground along a fault during an earthquake. The City contains one active fault–the Verdugo Fault, located south of the Verdugo Mountains–but no Alquist-Priolo Earthquake Fault Zone has been designated in the City. In addition to the Verdugo Fault, several other active faults in the region have the potential to cause ground shaking that would affect the City. These faults are the San Fernando Fault (northwest of the City), Sierra Madre Fault (at the base of the San Gabriel Mountains east of the City), Hollywood Fault (south of the City), Newport-Inglewood Fault (12.5 miles southwest of the City), and the Raymond Fault (6 miles southeast of the City). The San Andreas Fault, a large fault that runs nearly the entire length of California, is located approximately 27 miles to the northwest of the City. Much of the City is located atop soils susceptible to liquefaction, particularly in areas west of Interstate 5. Liquefaction risk is higher in areas where the groundwater table lies within 50 feet of the surface. Most groundwater underlying the City is deeper than 100 feet below the surface. As long as groundwater continues to be extracted in the upper Los Angeles River area and annual rainfall remains at normal levels, the City expects that groundwater levels in the City will remain deeper than 50 feet, resulting in a low risk of liquefaction for most of the City. In the City, hazards from landslides and mudslides are limited to properties at the base of undeveloped or unimproved slopes in the Verdugo Mountains. Significant earthquakes that have occurred in recent years in the Los Angeles and Burbank area, including the Northridge earthquake in 1994, that resulted in only temporary electrical outages in the Water System and, after inspection to determine the scope of any damage, only minor damage to the Water System. It is impossible to accurately predict the cost or effect of an earthquake on the Water System or on BWP's ability to provide uninterrupted service to all parts of its service area. In the event of a severe earthquake, however, the amount of moneys available to pay debt service on the 2026 Bonds could be reduced significantly.

Flood. Based on flood risk evaluations prepared by the Federal Emergency Management Agency ("FEMA") for the City, effective September 26, 2008, most of the City is located in Zone X, which describes lands subject to the 0.2% annual (500-year) flood zone or that lie within the 100-year flood zone, but with flooding depths less than one foot. Areas of the City that are within the FEMA-mapped 100-year floodplain include: (i) a narrow area along the Lockheed Drain Channel in the vicinity of Empire Avenue and W. Vanowen Street from near the Burbank Airport eastwards towards Interstate 5, then southward in the vicinity of Victory Boulevard, (ii) a narrow area west of Victory Boulevard in the vicinity of South Main Street, and (iii) several small areas south of Highway 134 near the City's southern boundary. In addition, there is a large area in the northeastern portion of the City mapped as Zone D, which describes areas in which flood hazards are undetermined, but possible.

Wildfire. In recent years, wildfires have caused extensive damage throughout the State. Certain of these fires have burned thousands of acres and destroyed hundreds and in some cases thousands of homes. In some instances, entire neighborhoods have been destroyed. Two portions of the City have been categorized by the California Department of Forestry and Fire Protection ("CALFIRE") as Very High Fire Hazard Severity Zones. These areas are a large area in the northeastern portion of the City, in and bordering the Verdugo Mountains, and a smaller portion at the southern end of the City that includes Warner Brothers Studios. Wildland and wildland/urban interface fires are relatively common in the Verdugo Mountains in the northeastern portion of the City and surrounding areas. In 2005, the Harvard Fire burned approximately 1,000 acres of brush within City limits before being contained, with no structures burned. In 2017, the La Tuna Fire burned in the Verdugo Mountains, including portions of the City, ultimately claiming approximately 7,200 acres and destroying 10 structures. Steep wildland and wildland/urban interface areas that have previously experienced fire damage are at higher risk of damage from mudslides. [Are any operationally significant portions of the Water System in these high fire risk areas?]

Southern California suffered from major fires in the month of January 2025. The greater Los Angeles area suffered from the Eaton Fire and Palisades Fire, among others. These two fires alone burned

over 37,000 acres of land. An evacuation warning, for the City, was imminent due to dangers of the fires spread and the poor air quality reaching critical levels. In the end, the City did not suffer any structural damage from the fires and no evacuation warning was given but the surrounding fires caused enormous damages to neighboring communities.

Climate change could lead to even more frequent and damaging wildfires in the future. While the City and the Water System have not suffered direct effects of wildfire, there can be no assurance that wildfires will not affect the City and the Water System in the future, or the effects of any such wildfire, which could be material.

Drought Conditions

California is subject to periodic droughts, including in the years 1976-77, 1987-1992, 2008-09, 2012-16 and 2020-22 (although drought conditions have varied and may vary significantly throughout different parts of the State). Periodic drought conditions can be expected to be occur in the future. Sustained drought conditions or low water levels could adversely affect water supply and may necessitate water conservation measures, which may reduce Water System revenues and necessitate increases in water rates and charges. The City cannot predict the extent of effects that drought conditions may have on revenues of the Water System, or whether or to what extent future water reduction requirements or voluntary guidance may affect the Water System.

Potential Impact of Climate Change

The issue of climate change has become an important factor in water resources planning. There is evidence that increasing concentrations of greenhouse gases have caused and will continue to cause a rise in temperatures around the world, which will result in a wide range of changes in climate patterns. Moreover, there is evidence that a warming trend occurred during the latter part of the 20th century and will likely continue through the 21st century. These changes will have a direct effect on water resources in the State, and numerous studies on climate and water in the State have been conducted to determine the potential impacts. Based on these studies, global climate change could result in the following types of water resources impacts in the State, including impacts on the Water System:

- Changes in the timing, intensity, and variability of precipitation, and an increased amount of precipitation falling as rain instead of as snow,
- Long-term changes in watershed vegetation and increased incidence of wildfires that could affect water quality,
- Increased water temperatures with accompanying adverse effects on some fisheries,
- Increases in evaporation and concomitant increased irrigation need,
- Changes in urban and agricultural water demand,
- Rising sea levels resulting in potential pumping cutbacks on the State Water Project, and
- Effects on the groundwater basin.

However, other than the general trends listed above, there is no clear scientific consensus on exactly how climate change will quantitatively affect water supplies available to the Water System. The City is acting to mitigate and prepare for climate threats and hazards. The City Council adopted the Greenhouse

Gas Reduction Plan ("GGRP") in 2022. The GGRP sets a path to reduce greenhouse gas emission goals within the City. The GGRP identifies a variety of potential impacts due to climate change, including an increase in average temperature and changes in precipitation. The GGRP notes that it is imperative that the City act to mitigate and prepare for these climate threats and hazards.

The Burbank2035 General Plan discusses water supply challenges based on climate change, including decreases in the Sierra Nevada snowpack (which supplies much of the SWP's water) as more precipitation falls as rain and less as snow and declining water supplies as saltwater intrusion due to rising sea levels degrades California's estuaries, coastal aquifers, wetlands, and groundwater aquifers and threaten the quality and reliability of the Sacramento–San Joaquin Delta's water transfer system, one of the major water supply sources for Southern California.

A changing climate could result in changing environmental conditions including extreme weather events, changes in temperature and rainfall that decreased water supply. The City cannot predict the impact of climate change on the Water System, including impacts on demand, water supply, and expenses.

Cybersecurity

The City, including the Water System, like many other public and private entities, relies on computer and other digital networks and systems to conduct its operations. As a recipient and provider of personal, private or other sensitive electronic information, the City is potentially subject to multiple cyber threats, including without limitation hacking, viruses, ransomware, malware and other attacks. United States government agencies have in the past issued warnings indicating that critical infrastructure sectors such as water systems may be specific targets of cybersecurity threats.

The City has implemented industry best practices, engineering and procedures and has made the necessary investment to protect against and mitigate the adverse effects of cyberattacks, including steps to harden its cybersecurity and provide training for employees in cyber awareness and the use of the City's digital networks and systems. No assurance can be given that the City's efforts to manage cyber threats and attacks will be successful in all cases, or that any such attack will not materially impact the operations or finances of the City or disrupt the operation of the Water System. There have been no detected cyberattacks that have affected the Water System.

Limited Obligations

The Bonds (including the 2026 Bonds) are special, limited obligations of the City payable from Water Net Revenues. The 2026 Bonds shall not be deemed to constitute a debt or liability of the City, the State, or of any political subdivision thereof within the meaning of any constitutional or statutory limitation, or a pledge of the faith and credit of the City, the State, or of any political subdivision thereof, but shall be payable, except to the extent of certain moneys pledged therefor under the Indenture, solely from Water Net Revenues. Neither the faith and credit nor the taxing power of the City, the State, or of any political subdivision thereof is pledged to the payment of the principal of, premium, if any, or the interest on the 2026 Bonds. The issuance of the 2026 Bonds shall not directly or indirectly or contingently obligate the City, the State, or any political subdivision thereof to levy or to pledge any form of taxation whatsoever therefor or to make any appropriation for their payment.

No Reserve Fund

No debt service reserve fund has been or will be established to secure the 2026 Bonds.

Additional Bonds or Parity Debt

Upon the issuance of the 2026 Bonds, the 2021 Bonds and the 2024 Bonds will be the only other outstanding obligations payable from Water Net Revenues on a parity with the 2026 Bonds. In addition, the City is permitted under the Indenture, subject to satisfaction of certain conditions, to incur future Parity Debt and additional Bonds. In the event Water Net Revenues were insufficient to pay all of the City's obligations with respect to the Bonds (including the 2026 Bonds) and any Parity Debt when due, the City would be obligated to make payments on the Parity Debt and the Bonds (including the 2026 Bonds) on a pro rata basis.

Effect of Bankruptcy

In addition to the limitations on remedies contained in the Indenture, the rights and obligations under the 2026 Bonds and the Indenture may be subject to the following: the United States Bankruptcy Code and applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws relating to or affecting the enforcement of creditors' rights generally, now or hereafter in effect; usual equity principles which may limit the specific enforcement under State law of certain remedies; the exercise by the United States of America of the powers delegated to it by the Federal Constitution; and the reasonable and necessary exercise, in certain exceptional situations, of the police power inherent in the sovereignty of the State of California and its governmental bodies in the interest of serving a significant and legitimate public purpose.

Bankruptcy proceedings, or the exercise of powers by the federal or state government, if initiated, could subject the Owners of the 2026 Bonds to judicial discretion and interpretation of their rights in bankruptcy or otherwise, and consequently may entail risks of delay, limitation or modification of their rights and may otherwise have material adverse consequences. The opinion of Bond Counsel notes that the rights of the owners of the 2026 Bonds and the enforceability of the 2026 Bonds and the Indenture are limited by bankruptcy, insolvency, reorganization, moratorium and other similar laws affecting creditors' rights generally, and by equitable principles, whether considered at law or in equity.

Loss of Tax Exemption

The City has covenanted in the Indenture and the Tax Certificate that it will not take any action, or fail to take any action, if any such action or failure to take action would adversely affect the exclusion from gross income of interest on the 2026 Bonds under section 103 of the Internal Revenue Code of 1986. In the event the City fails to comply with the foregoing tax covenant, interest on the 2026 Bonds may be includable in the gross income of the Owners thereof for federal tax purposes retroactive to the date of issuance of the 2026 Bonds. See "TAX MATTERS."

Secondary Market

There can be no guarantee that there will be a secondary market for the 2026 Bonds or, if a secondary market exists, that any 2026 Bonds can be sold for any particular price. Prices of bond issues for which a market is being made will depend upon then-prevailing circumstances. Such prices could be substantially different from the original purchase price. No assurance can be given that the market price for the 2026 Bonds will not be affected by the introduction or enactment of any future legislation (including without limitation amendments to the Internal Revenue Code), or changes in interpretation of the Internal Revenue Code, or any action of the Internal Revenue Service, including but not limited to the publication of proposed or final regulations, the issuance of rulings, the selection of the 2026 Bonds for audit or

examination, or the course or result of any Internal Revenue Service audit or examination of the 2026 Bonds or obligations that present similar tax issues as the 2026 Bonds.

Limitations on Remedies

In addition to the limitations on remedies contained in the Indenture, the rights of the Owners are subject to the limitations on legal remedies against cities and other public agencies in the State. Additionally, enforceability of the rights and remedies of the Owners, and the obligations incurred by the City, may become subject to the following: the federal Bankruptcy Code and applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws relating to or affecting the enforcement of creditor's rights generally, now or hereafter in effect; equity principles which may limit the specific enforcement under State law of certain remedies; the exercise by the United States of America of the powers delegated to it by the United States Constitution; and the reasonable and necessary exercise, in certain exceptional situations, of the police powers inherent in the sovereignty of the State and its governmental bodies in the interest of serving a significant and legitimate public purpose. The opinion to be delivered by Norton Rose Fulbright US LLP, Bond Counsel, concurrently with the issuance of the 2026 Bonds, that the 2026 Bonds constitute valid and binding limited obligations of the City payable from and secured by a pledge of Water Net Revenues as and to the extent provided in the Indenture, will be subject to the limitations described above and the various other legal opinions to be delivered concurrently with the issuance of the 2026 Bonds will be similarly qualified. If the City fails to comply with its covenants under the Indenture or to pay principal of or interest on the 2026 Bonds, there can be no assurance that remedies will be available to fully protect the interests of the Owners. Bankruptcy proceedings, or the exercise of powers by the federal or State government, if initiated, could subject the Owners to judicial discretion and interpretation of their rights in bankruptcy or otherwise, and consequently may entail risks of delay, limitation, or modification of their rights.

CONSTITUTIONAL LIMITATIONS ON GOVERNMENTAL SPENDING

Articles XIIIC and XIIID of the State Constitution

General. On November 5, 1996, California voters approved Proposition 218, the so-called "Right to Vote on Taxes Act." Proposition 218 added Articles XIIIC and XIIID to the State Constitution, which affect the ability of local governments to levy and collect both existing and future taxes, assessments, and property-related fees and charges. Proposition 218, which generally became effective on November 6, 1996, changed, among other things, the procedure for the imposition of any new or increased property-related "fee" or "charge," which is defined as "any levy other than an ad valorem tax, a special tax or an assessment, imposed by a [local government] upon a parcel or upon a person as an incident of property ownership, including user fees or charges for a property related service" (and referred to in this section as a "property-related fee or charge").

On November 2, 2010, California voters approved Proposition 26, the so-called "Supermajority Vote to Pass New Taxes and Fees Act." Section 1 of Proposition 26 declares that Proposition 26 is intended to limit the ability of the State Legislature and local government to circumvent existing restrictions on increasing taxes by defining the new or expanded taxes as "fees." Proposition 26 amended Articles XIIIA and XIIIC of the State Constitution. The amendments to Article XIIIA limit the ability of the State Legislature to impose higher taxes (as defined in Proposition 26) without a two-thirds vote of the Legislature. Proposition 26's amendments to Article XIIIC broadly define "tax," but specifically exclude, among other things:

(1) A charge imposed for a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of conferring the benefit or granting the privilege.

(2) A charge imposed for a specific government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of providing the service or product.

(3) A charge imposed as a condition of property development.

(4) Assessments and property-related fees imposed in accordance with the provisions of Article XIII D.

Property-Related Fees and Charges. Under Article XIIID, before a municipality may impose or increase any property-related fee or charge, the entity must give written notice to the record owner of each parcel of land affected by that fee or charge. The municipality must then hold a hearing upon the proposed imposition or increase at least 45 days after the written notice is mailed, and, if a majority of the property owners of the identified parcels present written protests against the proposal, the municipality may not impose or increase the property-related fee or charge.

Further, under Article XIIID, revenues derived from a property-related fee or charge may not exceed the funds required to provide the "property-related service" and the entity may not use such fee or charge for any purpose other than that for which it imposed the fee or charge. The amount of a property-related fee or charge may not exceed the proportional cost of the service attributable to the parcel, and no property-related fee or charge may be imposed for a service unless that service is actually used by, or is immediately available to, the owner of the property in question.

Initiative Power. In addition, Article XIIIC states that "the initiative power shall not be prohibited or otherwise limited in matters of reducing or repealing any local tax, assessment, fee or charge. The power of initiative to affect local taxes, assessments, fees and charges shall be applicable to all local governments and neither the Legislature nor any local government charter shall impose a signature requirement higher than that applicable to statewide statutory initiatives."

Judicial Interpretation of Articles XIIIC and XIIID. After Proposition 218 was enacted in 1996, appellate court cases and an Attorney General's opinion initially indicated that fees and charges levied for water and wastewater services would not be considered property-related fees and charges, and thus not subject to the requirements of Article XIIID regarding notice, hearing and protests in connection with any increase in the fees and charges being imposed. However, three subsequent court cases have held that water and wastewater charges could be subject to the requirements of Article XIIID under certain circumstances.

In *Richmond v. Shasta Community Services District* (2004) 32 Cal.4th 409, the California Supreme Court addressed the applicability of the notice, hearing and protest provisions of Article XIIID to certain charges related to water service. In *Richmond*, the Court held that capacity charges are not subject to Proposition 218. The Court also indicated in dictum that a fee for ongoing water service through an existing connection could, under certain circumstances, constitute a property-related fee and charge, with the result that a local government imposing such a fee and charge must comply with the notice, hearing and protest requirements of Article XIIID.

In *Howard Jarvis Taxpayers Association v. City of Fresno* (2005) 127 Cal.App.4th 914, the California Court of Appeal, Fifth District, concluded that water, sewer and trash fees are property-related fees subject to Proposition 218 and a municipality must comply with Article XIIID before imposing or

increasing such fees. The California Supreme Court denied the City of Fresno's petition for review of the Court of Appeal's decision on June 15, 2005.

In July 2006 the California Supreme Court, in *Bighorn-Desert View Water Agency v. Verjil* (2006) 39 Cal.4th 205, addressed the validity of a local voter initiative measure that would have (a) reduced a water agency's rates for water consumption (and other water charges), and (b) required the water agency to obtain voter approval before increasing any existing water rate, fee, or charge, or imposing any new water rate, fee, or charge. The court adopted the position indicated by its statement in *Richmond* that a public water agency's charges for ongoing water delivery are "fees and charges" within the meaning of Article XIIID, and went on to hold that charges for ongoing water delivery are also "fees" within the meaning of Article XIIIC's mandate that the initiative power of the electorate cannot be prohibited or limited in matters of reducing or repealing any local tax, assessment, fee or charge. Therefore, the court held, Article XIIIC authorizes local voters to adopt an initiative measure that would reduce or repeal a public agency's water rates and other water delivery charges. (However, the court ultimately ruled in favor of the water agency and held that the entire initiative measure was invalid on the grounds that the second part of the initiative measure, which would have subjected future water rate increases to prior voter approval, was not supported by Article XIIIC and was therefore invalid.)

The court in *Bighorn* specifically noted that it was not holding that the initiative power is free of all limitations; the court stated that it was *not* determining whether the electorate's initiative power is subject to the statutory provision requiring that water service charges be set at a level that will pay for operating expenses, provide for repairs and depreciation of assets, provide a reasonable surplus for improvements, extensions, and enlargements, pay the interest on any bonded debt, and provide a sinking or other fund for the payment of the principal of such debt as it may become due.

In August 2013, an Orange County Superior Court judge ruled that the tiered pricing model of the City of San Juan Capistrano, which charges higher rates to customers who use more water, violates Proposition 218. The City of San Juan Capistrano appealed the decision, to the 4th District Court of Appeal, which published its decision on April 20, 2015. The court's decision found that the City of San Juan Capistrano's tiered rates were not sufficiently cost-justified, but that the Constitution does allow for tiered rates. In July 2015, the California Supreme Court denied a request to depublish the case.

The City believes that its rate structure is distinguishable from the structure deemed unconstitutional in the San Juan Capistrano case and consistent with Proposition 218 and the Constitution because the City's tiered rates correlate with the actual costs for the various tiers.

120-Day Statute of Limitations for New or Increased Water and Sewer Rates. Senate Bill 323 ("SB 323"), signed by the Governor in September of 2021, restricts challenges to new or increased water or sewer rates to 120 days after the receipt of notice of the rate increase. SB 323 applies to rates for both retail and wholesale water and sewer fees adopted or increased after January 1, 2022. Prior to the adoption of SB 323 a plaintiff seeking to challenge water or sewer rates could generally bring an action for a refund for amounts paid within the preceding year, or could seek to invalidate the rates within 3 years of payment.

Articles XIIIC and XIIID and the City's Water Rates and Charges. The City's current water rates (see "THE WATER SYSTEM – Water Rates and Charges") were adopted by resolution of the City Council in June 2023, following notice to property owners and a public hearing held at least 45 days after the notice had been mailed, in compliance with Articles XIIIC and XIIID.

Further, the City believes its water rates and charges do not constitute "taxes" under Article XIIIC as revised by Proposition 26 because, as described in subsection 1(e)(7) of Article XIIIC, they are "property-related fees imposed in accordance with the provisions of Article XIIID" (and are also charges for a

"property-related service" as defined in subsection 2(g) of Article XIIID) and because, as described in subsection 1(e)(2) of Article XIIIC, they are charged for water service, "a specific government service or product provided directly to the payor that is not provided to those not charged."

Conclusion. It is not possible to predict how courts will further interpret Article XIIIC and Article XIIID in future judicial decisions, and what, if any, further implementing legislation will be enacted.

Under the *Bighorn* case, local voters could adopt an initiative measure that reduces or repeals the City's rates and charges, though it is not clear whether (and California courts have not decided whether) any such reduction or repeal by initiative would be enforceable in a situation in which such rates and charges are pledged to the repayment of bonds or other indebtedness, as is the case with respect to the 2026 Bonds.

A voter initiative entitled "The Taxpayer Protection and Government Accountability Act" ("Initiative 1935") has been determined to be eligible for the November 2024 Statewide general election and, unless withdrawn by its proponent prior to June 27, 2024, or removed pursuant to the emergency petition for writ of mandate filed by the Governor of California with the California Supreme Court seeking such removal, will be certified as qualified for the ballot in such election. Were it to be adopted by the voters in the Statewide general election, Initiative 1935 would amend the California Constitution to, among other things, provide that charges for services or products provided directly to the payor (such as charges for water) are "taxes" subject to voter approval unless the local government can prove by clear and convincing evidence that the charge is reasonable and does not exceed the "actual cost" of providing the service or product, defined as "(i) the minimum amount necessary to reimburse the government for the cost of providing the service or the product to the payor, and (ii) where the amount charged is not used by the government for any purpose other than reimbursing that cost." If adopted, Initiative 1935 would be subject to judicial interpretation. BWP is unable to predict whether and how Initiative 1935, if adopted, would be interpreted by the courts, and there can be no assurance that any such interpretation or application would not have an adverse impact on BWP, the Water System or the revenues of the Water System.

There can be no assurance that the courts will not further interpret, or the voters will not amend, Article XIIIC and Article XIIID to limit the ability of local agencies to impose, levy, charge and collect increased fees and charges for water services, or to call into question previously adopted water services rate increases.

TAX MATTERS

The Internal Revenue Code of 1986 (the "Code") imposes certain requirements that must be met subsequent to the issuance and delivery of the 2026 Bonds for interest thereon to be and remain excluded pursuant to section 103(a) of the Code from the gross income of the owners thereof for federal income tax purposes. Noncompliance with such requirements could cause the interest on the 2026 Bonds to be included in the gross income of the owners thereof for federal income tax purposes retroactive to the date of issue of the 2026 Bonds. The City has covenanted in the Indenture not to take any action or omit to take any action which, if taken or omitted, respectively, would adversely affect the exclusion of the interest on the 2026 Bonds from the gross income of the owners thereof for federal income tax purposes.

In the opinion of Norton Rose Fulbright US LLP, Bond Counsel, under existing law interest on the 2026 Bonds is exempt from personal income taxes of the State of California and, assuming compliance with the aforementioned covenants, interest on the 2026 Bonds is excluded pursuant to section 103(a) of the Code from the gross income of the owners thereof for federal income tax purposes. Bond Counsel is of the further opinion that interest on the 2026 Bonds is not an item of tax preference for purposes of the federal alternative minimum tax on individuals. The Code contains other provisions that could result in tax consequences, upon which no opinion will be rendered by Bond Counsel, as a result of ownership of the

2026 Bonds or the inclusion in certain computations of interest that is excluded from gross income. In rendering the foregoing opinions, Bond Counsel will rely upon representations and certifications of the City made in the Tax Certificate, dated the date of delivery of the 2026 Bonds, pertaining to the use, expenditure, and investment of the proceeds of the 2026 Bonds.

The Code imposes a minimum tax of 15 percent on the adjusted financial statement income of certain large corporations, generally consisting of corporations (other than S corporations, regulated investment companies and real estate investment trusts) with more than $1 billion in average annual adjusted financial statement income, determined over a three-year period. For this purpose, adjusted financial statement income generally consists of the net income or loss of the taxpayer set forth on the taxpayer's applicable financial statement for the taxable year, subject to various adjustments, but is not reduced for interest earned on tax-exempt obligations, such as the 2026 Bonds. Prospective purchasers that could be subject to this minimum tax should consult with their own tax advisors regarding the potential consequences of owning the 2026 Bonds.

The initial public offering price of certain of the 2026 Bonds (the "Discount Bonds") may be less than the amount payable on such 2026 Bonds at maturity. An amount equal to the difference between the initial public offering price of a Discount Bond (assuming that a substantial amount of the Discount Bonds of that maturity are sold to the public at such price) and the amount payable at maturity constitutes original issue discount to the initial purchaser of such Discount Bond. A portion of such original issue discount allocable to the holding period of such Discount Bond by the initial purchaser will, upon the disposition of such Discount Bond (including by reason of its payment at maturity), be treated as interest excludable from gross income, rather than as taxable gain, for federal income tax purposes, on the same terms and conditions as those for other interest on the 2026 Bonds described above. Such interest is considered to be accrued actuarially in accordance with the constant interest method over the life of a Discount Bond, taking into account the semiannual compounding of accrued interest, at the yield to maturity on such Discount Bond and generally will be allocated to an initial purchaser in a different amount from the amount of the payment denominated as interest actually received by the initial purchaser during the tax year.

However, such interest may be required to be taken into account in determining the amount of the branch profits tax applicable to certain foreign corporations doing business in the United States, even though there will not be a corresponding cash payment. In addition, the accrual of such interest may result in certain other collateral federal income tax consequences to, among others, financial institutions, life insurance companies, property and casualty insurance companies, S corporations with subchapter C earnings and profits, individual recipients of Social Security or Railroad Retirement benefits, individuals otherwise qualifying for the earned income tax credit, owners of an interest in a financial asset securitization investment trust, corporations subject to the alternative minimum tax on adjusted financial statement income, and taxpayers who may be deemed to have incurred or continued indebtedness to purchase or carry, or who have paid or incurred certain expenses allocable to, tax-exempt obligations. Moreover, in the event of the redemption, sale or other taxable disposition of a Discount Bond by the initial owner prior to maturity, the amount realized by such owner in excess of the basis of such Discount Bond in the hands of such owner (adjusted upward by the portion of the original issue discount allocable to the period for which such Discount Bond was held) is includable in gross income. Owners of Discount Bonds should consult with their own tax advisors with respect to the determination of accrued original issue discount on Discount Bonds for federal income tax purposes and with respect to the state and local tax consequences of owning and disposing of Discount Bonds.

The purchase price of certain 2026 Bonds (the "Premium Bonds") paid by an owner may be greater than the amount payable on such 2026 Bonds at maturity. An amount equal to the excess of a purchaser's tax basis in a Premium Bond over the amount payable at maturity constitutes premium to such purchaser. The basis for federal income tax purposes of a Premium Bond in the hands of such purchaser must be

reduced each year by the amortizable bond premium, although no federal income tax deduction is allowed as a result of such reduction in basis for amortizable bond premium. Such reduction in basis will increase the amount of any gain (or decrease the amount of any loss) to be recognized for federal income tax purposes upon a sale or other taxable disposition of a Premium Bond. The amount of premium that is amortizable each year by a purchaser is determined by using such purchaser's yield to maturity (or, in some cases with respect to a callable bond, the yield based on a call date that results in the lowest yield on the bond). Purchasers of the Premium Bonds should consult with their own tax advisors with respect to the determination of amortizable bond premium on Premium Bonds for federal income tax purposes and with respect to the state and local tax consequences of owning and disposing of Premium Bonds.

Bond Counsel has not undertaken to advise in the future whether any events after the date of issuance of the 2026 Bonds may affect the tax status of interest on the 2026 Bonds or the tax consequences of the ownership of the 2026 Bonds. No assurance can be given that pending or future legislation, or amendments to the Code, if enacted into law, or any proposed legislation or amendments to the Code, will not contain provisions that could directly or indirectly reduce the benefit of the exemption of interest on the 2026 Bonds from personal income taxation by the State of California or of the exclusion of the interest on the 2026 Bonds from the gross income of the owners thereof for federal income tax purposes. Furthermore, Bond Counsel will express no opinion as to the effect on the exclusion from gross income of interest on the 2026 Bonds of any action taken or not taken after the date of such opinion without the approval of Bond Counsel.

Except as described above, Bond Counsel will express no opinion with respect to any federal, state or local tax consequences under present law, or proposed legislation, resulting from the receipt or accrual of interest on, or the acquisition or disposition of, the 2026 Bonds. Prospective purchasers of the 2026 Bonds should be aware that the ownership of tax-exempt obligations such as the 2026 Bonds may result in collateral federal tax consequences to, among others, financial institutions, life insurance companies, property and casualty insurance companies, certain foreign corporations doing business in the United States, S corporations with subchapter C earnings and profits, individual recipients of Social Security or Railroad Retirement benefits, individuals otherwise qualifying for the earned income tax credit, owners of an interest in a financial asset securitization investment trust, corporations subject to the alternative minimum tax on adjusted financial statement income, and taxpayers who may be deemed to have incurred or continued indebtedness to purchase or carry, or who have paid or incurred certain expenses allocable to, tax-exempt obligations. Prospective purchasers should consult their own tax advisors as to the applicability of these consequences to their particular circumstances.

Bond Counsel's opinion is not a guarantee of a result, but represents its legal judgment based upon its review of existing statutes, regulations, published rulings and court decisions and the covenants of the City described above. No ruling has been sought from the Internal Revenue Service (the "Service") with respect to the matters addressed in the opinion of Bond Counsel, and Bond Counsel's opinion is not binding on the Service. The Service has an ongoing program of auditing the tax-exempt status of the interest on municipal obligations. If an audit of the 2026 Bonds is commenced, under current procedures the Service is likely to treat the City as the "taxpayer," and the owners would have no right to participate in the audit process. In responding to or defending an audit of the tax-exempt status of the interest on the 2026 Bonds, the City may have different or conflicting interests from the owners of the 2026 Bonds. Public awareness of any future audit of the 2026 Bonds could adversely affect the value and liquidity of the 2026 Bonds during the pendency of the audit, regardless of the ultimate outcome.

Existing law may change so as to reduce or eliminate the benefit to holders of the 2026 Bonds of the exclusion of interest thereon from gross income for federal income tax purposes. Proposed legislative or administrative action, whether or not taken, could also affect the value and marketability of the

2026 Bonds. Prospective purchasers of the 2026 Bonds should consult with their own tax advisors with respect to any proposed changes in tax law.

A copy of the form of opinion of Bond Counsel relating to the 2026 Bonds is included in APPENDIX E hereto.

LITIGATION

To the knowledge of the City, there is no controversy or litigation of any nature now pending or threatened restraining or enjoining the issuance of the 2026 Bonds or the execution and delivery of the Indenture or in any way contesting or affecting the validity of the 2026 Bonds or any proceedings of the City taken with respect to the execution and delivery thereof.

CERTAIN LEGAL MATTERS

The issuance of the 2026 Bonds is subject to the approving opinion of Norton Rose Fulbright US LLP, Los Angeles, California, Bond Counsel to the City. A complete copy of the proposed form of Bond Counsel opinion is contained in APPENDIX E. Bond Counsel and counsel to the Underwriters will receive compensation from the City contingent upon the sale and delivery of the 2026 Bonds. Certain legal matters will be passed on for the City by the City Attorney and by Norton Rose Fulbright LLP, Los Angeles, California, Disclosure Counsel. Certain legal matters will be passed upon for the Underwriters by their counsel, Stradling Yocca Carlson & Rauth LLP, Newport Beach, California.

FINANCIAL STATEMENTS

LSL, LLP (the "Auditor"), audited the financial statements of the City's Water and Electric Utility Enterprise Funds for the Fiscal Year ended June 30, 2026. The Auditor's examination was made in accordance with generally accepted auditing standards and Governmental Auditing Standards, issued by the Comptroller General of the United States. See "APPENDIX B – Audited Financial Statements of the City of Burbank Water and Electric Utility Enterprise Funds for the Fiscal Year Ended June 30, 2026."

The City has not requested nor did the City obtain permission from the Auditor to include the audited financial statements as an appendix to this Official Statement. Accordingly, the Auditor has not performed any post-audit review of the financial condition or operations of the City and has not participated in the preparation of, or reviewed, this Official Statement.

RATING

Moody's Ratings ("Moody's") has assigned the 2026 Bonds the long-term rating of "[___]."

This rating reflects only the views of Moody's, and any explanation of the significance of such rating may be obtained only from Moody's. There is no assurance that the rating will remain in effect for any given period of time or that it will not be revised downward or withdrawn entirely by Moody's, if, in its judgment, circumstances so warrant. The City undertakes no responsibility to oppose any such revision or withdrawal. Any downward revision or withdrawal of the rating may have an adverse effect on the market price of the 2026 Bonds.

CONTINUING DISCLOSURE

The City will covenant for the benefit of owners of the 2026 Bonds to provide certain financial information and operating data relating to the City by not later than 9 months after the end of each fiscal year of the City (currently June 30th), commencing with the report for the 2025-26 Fiscal Year (the "Annual

Report"), and to provide notices of the occurrence of certain enumerated events. Such reports are required to be filed with the Municipal Securities Rulemaking Board through its Electronic Municipal Market Access system ("EMMA"). The specific nature of the information to be contained in the Annual Report or the notices of enumerated events is described in "APPENDIX D – Form of Continuing Disclosure Agreement," attached to this Official Statement. These covenants have been made in order to assist the Underwriters of the 2026 Bonds in complying with Securities and Exchange Commission Rule 15c2-12.

The City has entered into a number of continuing disclosure undertakings in connection with City obligations, including obligations payable from the City's General Fund, as well as obligations payable from the revenues relating to the Water System and the Electric System, and the City has prepared continuing disclosure reports pursuant to these undertakings.

[Within the past five years, the City and certain of its related entities have failed to comply in certain respects with continuing disclosure obligations related to outstanding indebtedness, by (i) failing to provide timely notice of a rating upgrade relating to a series of the City's wastewater revenue bonds, which notice was provided approximately seven months after such rating upgrade, and (ii) with respect to certain of the City's then-outstanding water revenue and electric revenue bonds, failing to timely file audited financial statements for Fiscal Years 2021-22 and 2022-23 and failing to timely file required notices of such failures (the audited financial statements for Fiscal Years 2012-22 and 2022-23 were filed 58 and 84 days late, respectively, and notices of such failures were subsequently filed in June 2024).] [To be updated, if needed.]

The City has adopted a disclosure policy intended to assure future compliance with the City's continuing disclosure requirements.

MUNICIPAL ADVISOR

KNN Public Finance, LLC (the "Municipal Advisor") has assisted the City with various matters relating to the planning, structuring and delivery of the 2026 Bonds. The Municipal Advisor is a financial advisory firm and is not engaged in the business of underwriting or distributing municipal securities or other public securities. The Municipal Advisor assumes no responsibility for the accuracy, completeness or fairness of this Official Statement. The Municipal Advisor will receive compensation from the City contingent upon the sale and delivery of the 2026 Bonds.

UNDERWRITING

The 2026 Bonds will be purchased for reoffering by the Underwriters set forth on the cover of this Official Statement (the "Underwriters"), for whom J.P. Morgan Securities LLC is acting as senior managing underwriter, at an aggregate purchase price of $_____, representing the principal amount of the 2026 Bonds of $_____, less an Underwriters' discount of $_____ and plus a [net] original issue premium of $_____. The Underwriters will be obligated to purchase all of the 2026 Bonds if any of the 2026 Bonds are purchased.

J.P. Morgan Securities LLC ("JPMS"), one of the Underwriters of the 2026 Bonds, has entered into negotiated dealer agreements (each, a "Dealer Agreement") with each of Charles Schwab & Co., Inc. ("CS&Co.") and LPL Financial LLC ("LPL") for the retail distribution of certain securities offerings at the original issue prices. Pursuant to each Dealer Agreement (if applicable to this transaction), each of CS&Co. and LPL will purchase 2026 Bonds from JPMS at the original issue price less a negotiated portion of the selling concession applicable to any 2026 Bonds that such firm sells.

The Underwriters may offer and sell the 2026 Bonds to certain dealers (including dealers depositing 2026 Bonds into investment trusts) and others at prices lower than the public offering prices stated on the

inside cover page of this Official Statement. The offering prices may be changed from time to time by the Underwriters.

The Underwriters and their respective affiliates are full-service financial institutions engaged in various activities that may include securities trading, commercial and investment banking, municipal advisory, brokerage, and asset management. In the ordinary course of business, the Underwriters and their respective affiliates may actively trade debt and, if applicable, equity securities (or related derivative securities) and provide financial instruments (which may include bank loans, credit support, or interest rate swaps). The Underwriters and their respective affiliates may engage in transactions for their own accounts involving the securities and instruments made the subject of this securities offering or other offering of the City. The Underwriters and their respective affiliates may make a market in credit default swaps with respect to municipal securities in the future. The Underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and publish independent research views in respect of this securities offering or other offerings of the City.

MISCELLANEOUS

The execution and delivery of this Official Statement has been authorized by the City.

BWP Acting General Manager

APPENDIX A

GENERAL INFORMATION ABOUT THE CITY OF BURBANK AND LOS ANGELES COUNTY

The following information concerning the City of Burbank (the "City") and Los Angeles County (the "County") are included only for the purpose of supplying general information regarding the community. The 2026 Bonds are not a debt of the City, the County, the State of California (the "State") or any of its political subdivisions, and neither the City, the County, the State nor any of its political subdivisions is liable therefor, except the City to the limited extent set forth in the Indenture.

General Information

The County. Located along the southern coast of California, Los Angeles County covers about 4,080 square miles. It measures approximately 75 miles from north to south and 70 miles from east to west. The county includes Santa Catalina and San Clemente Islands and is bordered by the Pacific Ocean and Ventura, San Bernardino and Orange Counties.

Almost half of the county is mountainous and some 14% is a coastal plain known as the Los Angeles Basin. The low Santa Monica mountains and Hollywood Hills run east and west and form the northern boundary of the Basin and the southern boundary of the San Fernando Valley. The San Fernando Valley terminates at the base of the San Gabriel Mountains whose highest peak is over 10,000 feet. Beyond this mountain range the rest of the county is a semi-dry plateau, the beginning of the vast Mojave Desert.

According to the Los Angeles County Regional Planning Commission, the 86 incorporated cities in the county covered about 1,344 square miles or 27% of the total county. Approximately 16% of the land in the county was devoted to residential use and over two thirds of the land was open space and vacant.

The City. On July 8, 1911, the City was incorporated as a city. Today, the City ranks as the thirteenth-largest city in Los Angeles County, with a population of over 106,000 residents. Currently, the City maintains its long-standing relationship with Warner Bros. and Disney and is now home to hundreds of media and related support companies such as ABC, Nickelodeon Animation, Yahoo!, and other post production, film processing, special effects, equipment rental and related businesses. As such, the City is happily referred to as the "Media Capital of the World."

Population

The following table shows population estimates for the City, the County and the State of California as of January 1 of each year for the five years shown below.

CITY OF BURBANK, LOS ANGELES COUNTY, STATE OF CALIFORNIA
Population Estimates[(1)]

Area	2022	2023	2024	2025	2026
City of Burbank	105,385	105,520	105,623	105,713	106,229
Los Angeles County	9,861,671	9,864,220	9,882,296	9,900,914	9,837,286
State of California	39,159,480	39,167,274	39,446,835	39,646,907	39,592,978

[(1)] Data as of May 1, 2026.
Source: State of California, Department of Finance.

Employment and Industry

The City is included in the Los Angeles-Long Beach-Glendale Metropolitan Division ("MD"), which includes all of the County. The seasonally adjusted unemployment rate in the County decreased over the month at 5.4% in June 2026, from 5.5% in May 2026, and was below the rate of 5.7% one year ago. Civilian employment decreased by 18,100 to 4,778,900 in June 2026 over the month, and unemployment decreased by 4,400 to 275,200. The civilian labor force declined by 22,500 over the month to 5,054,100 in June 2026. (All of the above figures are seasonally adjusted.) The unadjusted unemployment rate for the County was 5.3% in June 2026. (All of the above 2026 figures are preliminary.)

The California seasonally adjusted unemployment rate was 5.3% in May 2026, 5.2% in June 2026, and 5.5% a year ago in June 2025. The comparable estimates for the nation were 4.3% in May 2026, 4.2% in June 2026, and 4.1% a year ago.

The table below lists employment by industry group for the County for the most recent five years for which data is available. These figures are county-wide statistics and may not necessarily accurately reflect employment trends in the City.

Effective Buying Income

"Effective Buying Income" is defined as personal income less personal tax and non-tax payments, a number often referred to as "disposable" or "after-tax" income. Personal income is the aggregate of wages and salaries, other labor-related income (such as employer contributions to private pension funds), proprietor's income, rental income (which includes imputed rental income of owner-occupants of non-farm dwellings), dividends paid by corporations, interest income from all sources, and transfer payments (such as pensions and welfare assistance). Deducted from this total are personal taxes (federal, state and local), non-tax payments (fines, fees, penalties, etc.) and personal contributions to social insurance. According to U.S. government definitions, the resultant figure is commonly known as "disposable personal income."

[Remainder of page intentionally left blank.]

The following table summarizes the total effective buying income for the City, the County, the State and the United States for the period 2022 through 2026.

Effective Buying Income
2022 through 2026

Year	Area	Total Effective Buying Income (000's Omitted)	Median Household Effective Buying Income
2022	City of Burbank	$4,439,867	$76,510

Re: $_____ City of Burbank, California, Burbank Water and Power Water Revenue Bonds, Series of 2026

Ladies and Gentlemen:

We have acted as bond counsel in connection with the issuance by the City of Burbank, California (the "City") of its $_____ Burbank Water and Power Water Revenue Bonds, Series of 2026 (the "Bonds"). The Bonds are authorized and issued pursuant to Article 12 of Chapter 4 of Title 2 (formerly Article 12 of Chapter 14) of the Burbank Municipal Code, as amended (the "Bond Law"), and a resolution adopted by the City Council of the City on [____], 2026. The Bonds are also issued pursuant to the Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Master Water Revenue Bond Indenture"), as supplemented by the First Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "First Supplemental Indenture"), the Second Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2010 (the "Second Supplemental Indenture"), the Third Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of November 1, 2021 (the "Third Supplemental Indenture"), the Fourth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of June 1, 2024 (the "Fourth Supplemental Indenture"), and the Fifth Supplemental Burbank Water and Power Water Revenue Bond Indenture, dated as of [_____ 1], 2026 (the "Fifth Supplemental Indenture"), relating to the Bonds, each by and between the City and U.S. Bank Trust Company, National Association, as successor trustee (the "Trustee"). The Master Water Revenue Bond Indenture, as supplemented by the First Supplemental Indenture, the Second Supplemental Indenture, the Third Supplemental Indenture, the Fourth Supplemental Indenture and the Fifth Supplemental Indenture, is referred to herein as the "Indenture."

As bond counsel, we have reviewed the Bond Law, the Indenture, certifications of the City, the Trustee and others, opinions of counsel to the City and the Trustee, and such other documents, opinions and instruments as we deemed necessary to render the opinions set forth herein. Capitalized terms not otherwise defined herein shall have the meanings ascribed thereto in the Indenture.

We have assumed the genuineness of all documents and signatures presented to us. We have not undertaken to verify independently, and have assumed, the accuracy of the factual matters represented, warranted or certified in the documents. Furthermore, we have assumed compliance with all covenants and agreements contained in the Indenture, including (without limitation) covenants and agreements compliance with which is necessary to assure that future actions, omissions or events will not cause interest on the Bonds to be included in gross income for federal income tax purposes.

Based on and subject to the foregoing, and in reliance thereon, as of the date hereof, we are of the following opinions:

1. The Bonds constitute valid and binding special, limited obligations of the City and are payable exclusively from and are secured by a pledge of the Water Net Revenues and certain amounts held under the Indenture, as provided in the Indenture, and are entitled to the benefits of the Indenture.

2. The Indenture has been duly and validly authorized, executed and delivered by the City and, assuming the enforceability thereof against the Trustee, constitutes the legally valid and binding obligation of the City, enforceable against the City in accordance with its terms. The Indenture creates a valid pledge, to secure the payment of principal of and interest on the Bonds, of the Water Net Revenues and certain other amounts held by the Trustee in certain funds and accounts established pursuant to the Indenture, subject to the provisions of the Indenture permitting the application thereof and on the terms and conditions set forth therein.

3. Under existing statutes, regulations, rulings and judicial decisions, assuming continuing compliance by the City with certain covenants in the Indenture and other documents pertaining to the Bonds and requirements of the Internal Revenue Code of 1986 (the "Code") regarding the use, expenditure and investment of proceeds of the Bonds and the timely payment of certain investment earnings to the United States, interest on the Bonds is not includable in the gross income of the owners of the Bonds for purposes of federal income taxation.

4. Interest on the Bonds is not an item of tax preference for purposes of the federal alternative minimum tax on individuals. The Code contains other provisions that could result in tax consequences, upon which we render no opinion, as a result of ownership of the Bonds or the inclusion in certain computations (including, without limitation, those related to the alternative minimum tax on the adjusted financial statement income of certain corporations) of interest that is excluded from gross income.

5. Under existing law, interest on the Bonds is exempt from personal income taxes of the State of California.

Our opinion in paragraph 3 above is rendered in reliance on representations and certifications of the City made in a Tax Certificate dated the date hereof pertaining to the use, expenditure, and investment of the proceeds of the Bonds. Except as stated in paragraphs 3, 4 and 5 above, we express no opinion as to any federal or state tax consequences of the ownership or disposition of, or the receipt or accrual of interest on, the Bonds. Further, certain requirements and procedures contained or referred to in the Indenture or in other documents pertaining to the Bonds may be changed, and certain actions may be taken, under the circumstances and subject to the terms and conditions set forth in such documents, upon the advice or with the approving opinion of counsel nationally recognized in the area of tax-exempt obligations. We express no opinion as to the effect of any change to any document pertaining to the Bonds or of any action taken or not taken where such change is made or action is taken or not taken without our approval or in reliance upon the advice of counsel other than ourselves with respect to the exclusion from gross income of the interest on the Bonds for federal income tax purposes.

The opinions expressed and the statements made herein are based on an analysis of existing laws, regulations, rulings and judicial decisions. Such opinions and statements may be adversely affected by actions taken or events occurring, including a change in law, regulation or ruling (or in the application or official interpretation of any law, regulation or ruling) after the date hereof. We have not undertaken to determine, or to inform any person, whether such actions are taken or such events occur, and we have no obligation to update this letter in light of such actions or events or for any other reason. Moreover, our opinions are not a guarantee of result and represent our legal judgment based upon our review of existing law that we deem relevant to such opinions and in reliance upon the representations and covenants referenced above.

No opinion is expressed herein on the accuracy, completeness or sufficiency of the Official Statement or other offering material relating to the Bonds.

The opinions expressed in paragraphs 1 and 2 above are qualified to the extent that the enforceability of the Bonds and the Indenture may be limited by applicable bankruptcy, insolvency, debt adjustment, reorganization, moratorium or similar laws or equitable principles relating to or limiting creditors' rights generally or as to the availability of any particular remedy. The enforceability of the Bonds and the Indenture is subject to the effect of general principles of equity, including, without limitation, concepts of materiality, reasonableness, good faith and fair dealing, to the possible unavailability of specific performance or injunctive relief, regardless of whether considered in a proceeding in equity or at law, and to the limitations on legal remedies against governmental entities in California (including, but not limited to, rights of indemnification).

These opinions are limited to the laws of the State of California and the federal laws of the United States.

Respectfully submitted,

APPENDIX F

DTC AND THE BOOK-ENTRY ONLY SYSTEM

The information in this Appendix F regarding DTC and its book-entry system has been obtained from DTC's website, for use in securities offering documents, and the City takes no responsibility for the accuracy or completeness thereof or for the absence of material changes in such information after the date hereof.

The Depository Trust Company ("DTC"), New York, New York, will act as securities depository for the 2026 Bonds. The 2026 Bonds will be issued as fully–registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully-registered bond certificate will be issued for each maturity of the 2026 Bonds, each in the aggregate principal amount of such maturity, and will be deposited with DTC.

DTC, the world's largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). DTC has a Standard & Poor's rating of AA+. The DTC Rules applicable to Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com.

Purchases of the 2026 Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the 2026 Bonds on DTC's records. The ownership interest of each actual purchaser of each 2026 Bond ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the 2026 Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the 2026 Bonds, except in the event that use of the book-entry system for the 2026 Bonds is discontinued.

To facilitate subsequent transfers, all 2026 Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested by an authorized representative of DTC. The deposit of 2026 Bonds with DTC and their registration in the

name of Cede & Co. or such other DTC nominee do not affect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the 2026 Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such 2026 Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Beneficial Owners of 2026 Bonds may wish to take certain steps to augment the transmission to them of notices of significant events with respect to the 2026 Bonds, such as redemptions, tenders, defaults and proposed amendments to the 2026 Bond documents. For example, Beneficial Owners of 2026 Bonds may wish to ascertain that the nominee holding the 2026 Bonds for their benefit has agreed to obtain and transmit notices to Beneficial Owners. In the alternative, Beneficial Owners may wish to provide their names and addresses to the registrar and request that copies of the notices be provided directly to them.

While the 2026 Bonds are in the book-entry-only system, redemption notices will be sent to DTC. If less than all of the 2026 Bonds of a maturity are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the 2026 Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the City as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the 2026 Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal and interest payments on the 2026 Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the City or the Trustee on the payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, the Trustee or the City, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the City or the Trustee, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as depository with respect to the 2026 Bonds at any time by giving reasonable notice to the City or the Trustee. Under such circumstances, in the event that a successor depository is not obtained, certificates representing the 2026 Bonds are required to be printed and delivered.

The City may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository). In that event, certificates representing the 2026 Bonds will be printed and delivered to DTC.

2026 Water Revenue Bond Financing

City Council
November 17, 2026

WATER AND POWER

Purpose of Bond Issuance

- Issue tax-exempt water revenue bonds in amount not to exceed $43,000,000
- Finance:
  - $41,939,990 of 2026 water project costs
  - Costs of issuance of the 2026 Bonds

Financial Impact

- 2026 Bonds average annual debt service: $2,758,000 *
- The issuance of the 2026 water revenue bonds was included in the 14% rate increase approved for January 1, 2027

*Preliminary, Subject to Change

2026 Water Project

Bond Financed Project Costs	Costs
Reservoir #2 Replacement	$23,805,000
VPP Chlorine Gas Replacement System	8,000,000
Chloramine Booster Systems	5,000,000
MWD B-1 Booster Station Improvements	3,250,000
Design-Build Pipeline Project	784,900
Booster Station Upgrade Program (Backup Power)	600,000
Reservoir #5 Inlet/Outlet Pipe Replacement	500,000
Total	**$41,939,900**

Reservoir 2 Replacement

- Reservoir has reached its end of life
- Improvements are required to address operational deficiencies
- Complete demolition and replacement of Reservoir 2
- Replacement also recommended as part of a recently completed Risk and Resiliency Assessment

Valley Pumping Plant Chlorine Gas Replacement System

- Replace existing chlorine gas disinfection system with onsite sodium hypochlorite generation system
- Will improve safety, reduce operational risk, and eliminate need to store and handle chlorine gas
- Replacement was recommended as part of a recently completed Risk and Resiliency Assessment

Chloramine Booster Systems

- Design of a chlorine booster station to address chlorine residual issues in the Zone 1 reservoirs
- Maintaining water quality is critical to health of distribution system
- Improper maintenance of chlorine levels in water system can promote biological growth

Metropolitan Water District B-1 Booster Station Improvements

- Evaluate the Metropolitan Water District B-1 Booster Station
- Make recommendations to increase reliability
- Bring the station up to current codes and efficiencies
- Construction to follow detailed design

Design-Build Pipeline Project

- BWP must replace aged valves and pipes throughout the City at faster pace than possible
- Pipes aging faster than crews are able to replace
- Four separate projects packaged together into one contract to be managed as partnership between the City, designer, and contractor
- Approach has stakeholders involved to review general conditions and project constraints from beginning and as design progresses

Booster Station Upgrade Program (Backup Power)

- Provide backup power to maintain water system operations during electrical outages
- Several booster stations currently lack emergency power
- Will install portable and/or permanent generator solutions
- Ensure continued movement of water throughout distribution system during emergency conditions

Reservoir #5 Inlet/Outlet Pipe Replacement

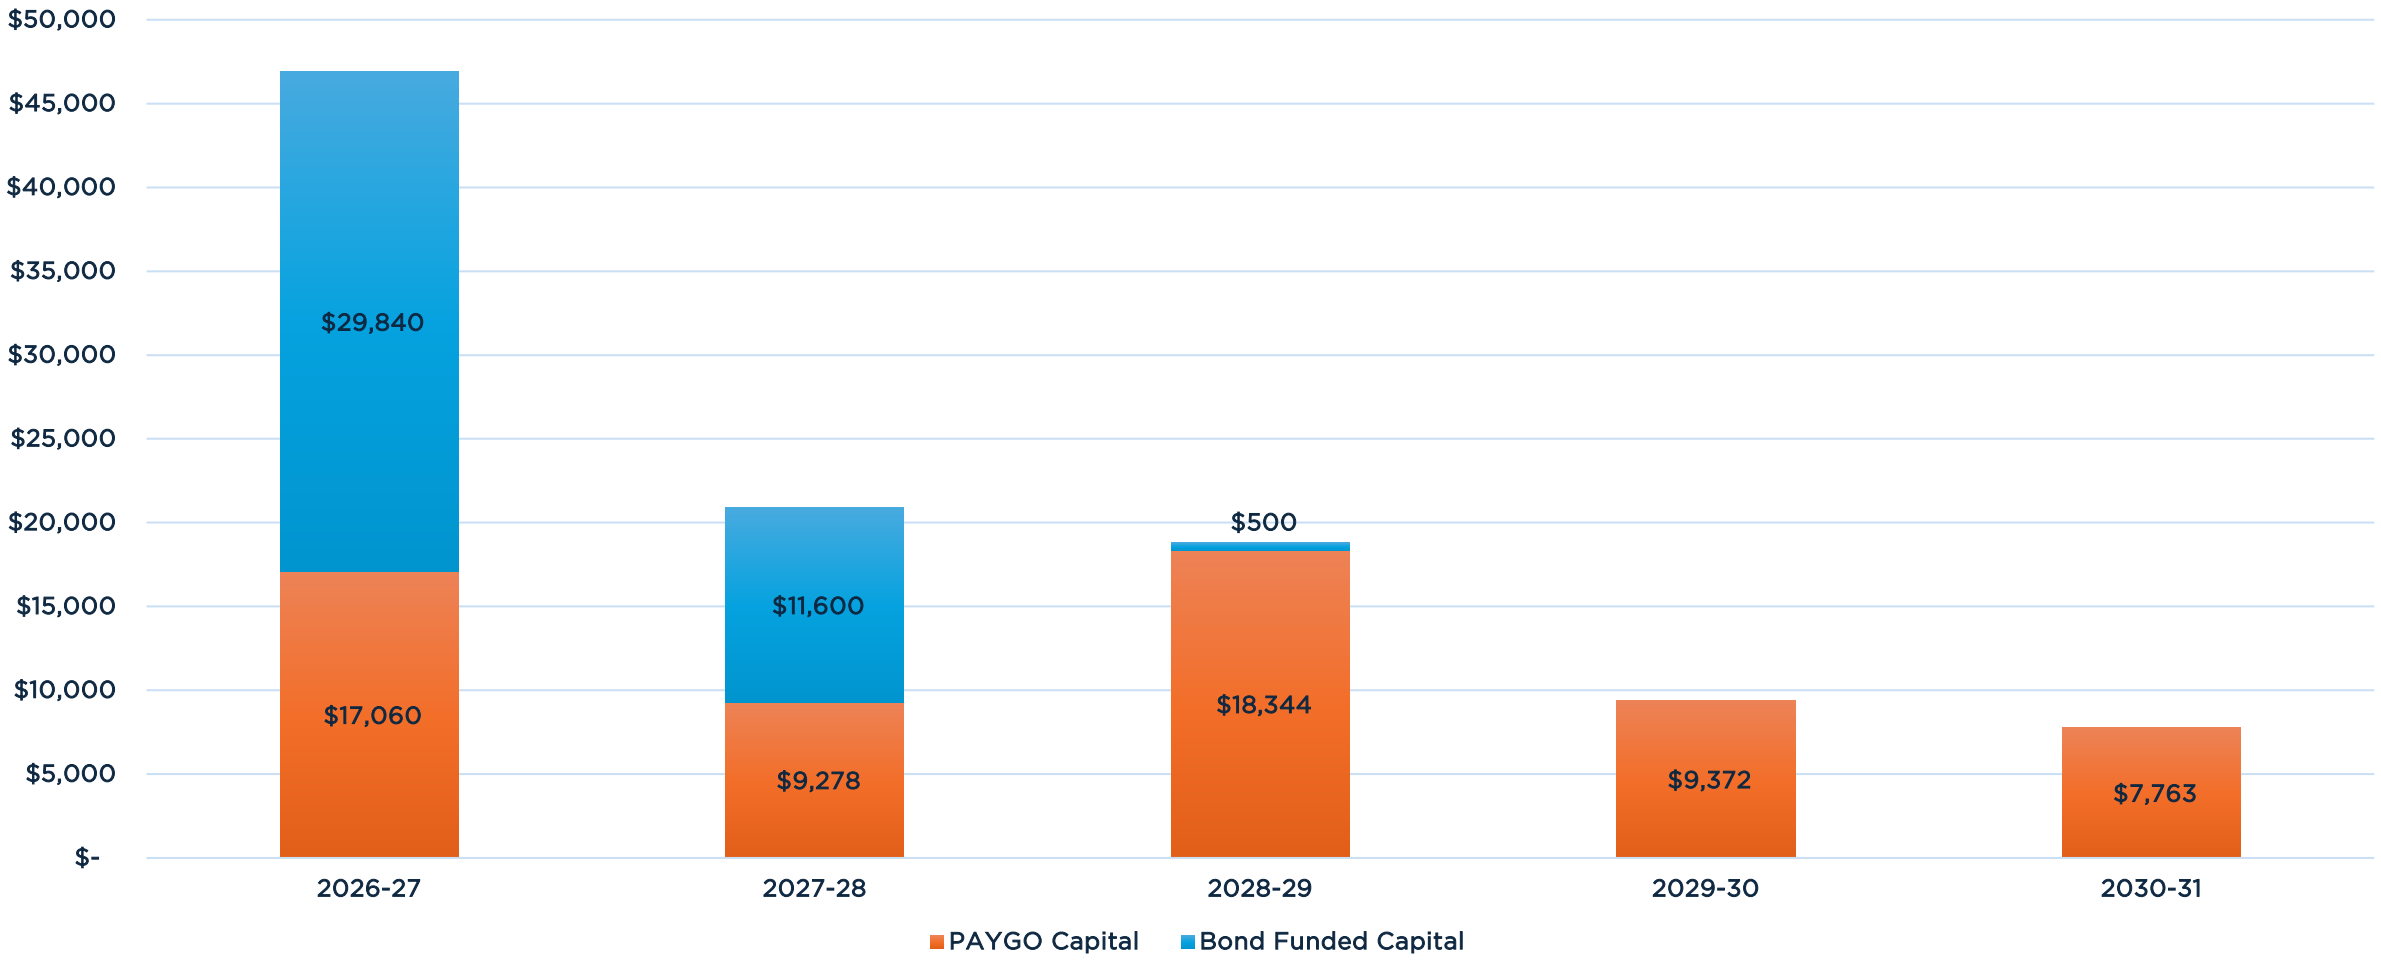
- Replace approximately 160 linear feet of 30-inch steel inlet/outlet piping at Reservoir 5
- Aging pipe has been source of increased maintenance due to corrosion
- Replacement also recommended as part of recently completed Risk and Resiliency Assessment

Reasons for Financing

- Generational capital investment
  - Aligns repayment with the ratepayers who benefit from the financed assets.
- Increased capital expenditures over next three years
- Consistent with citywide financial policies

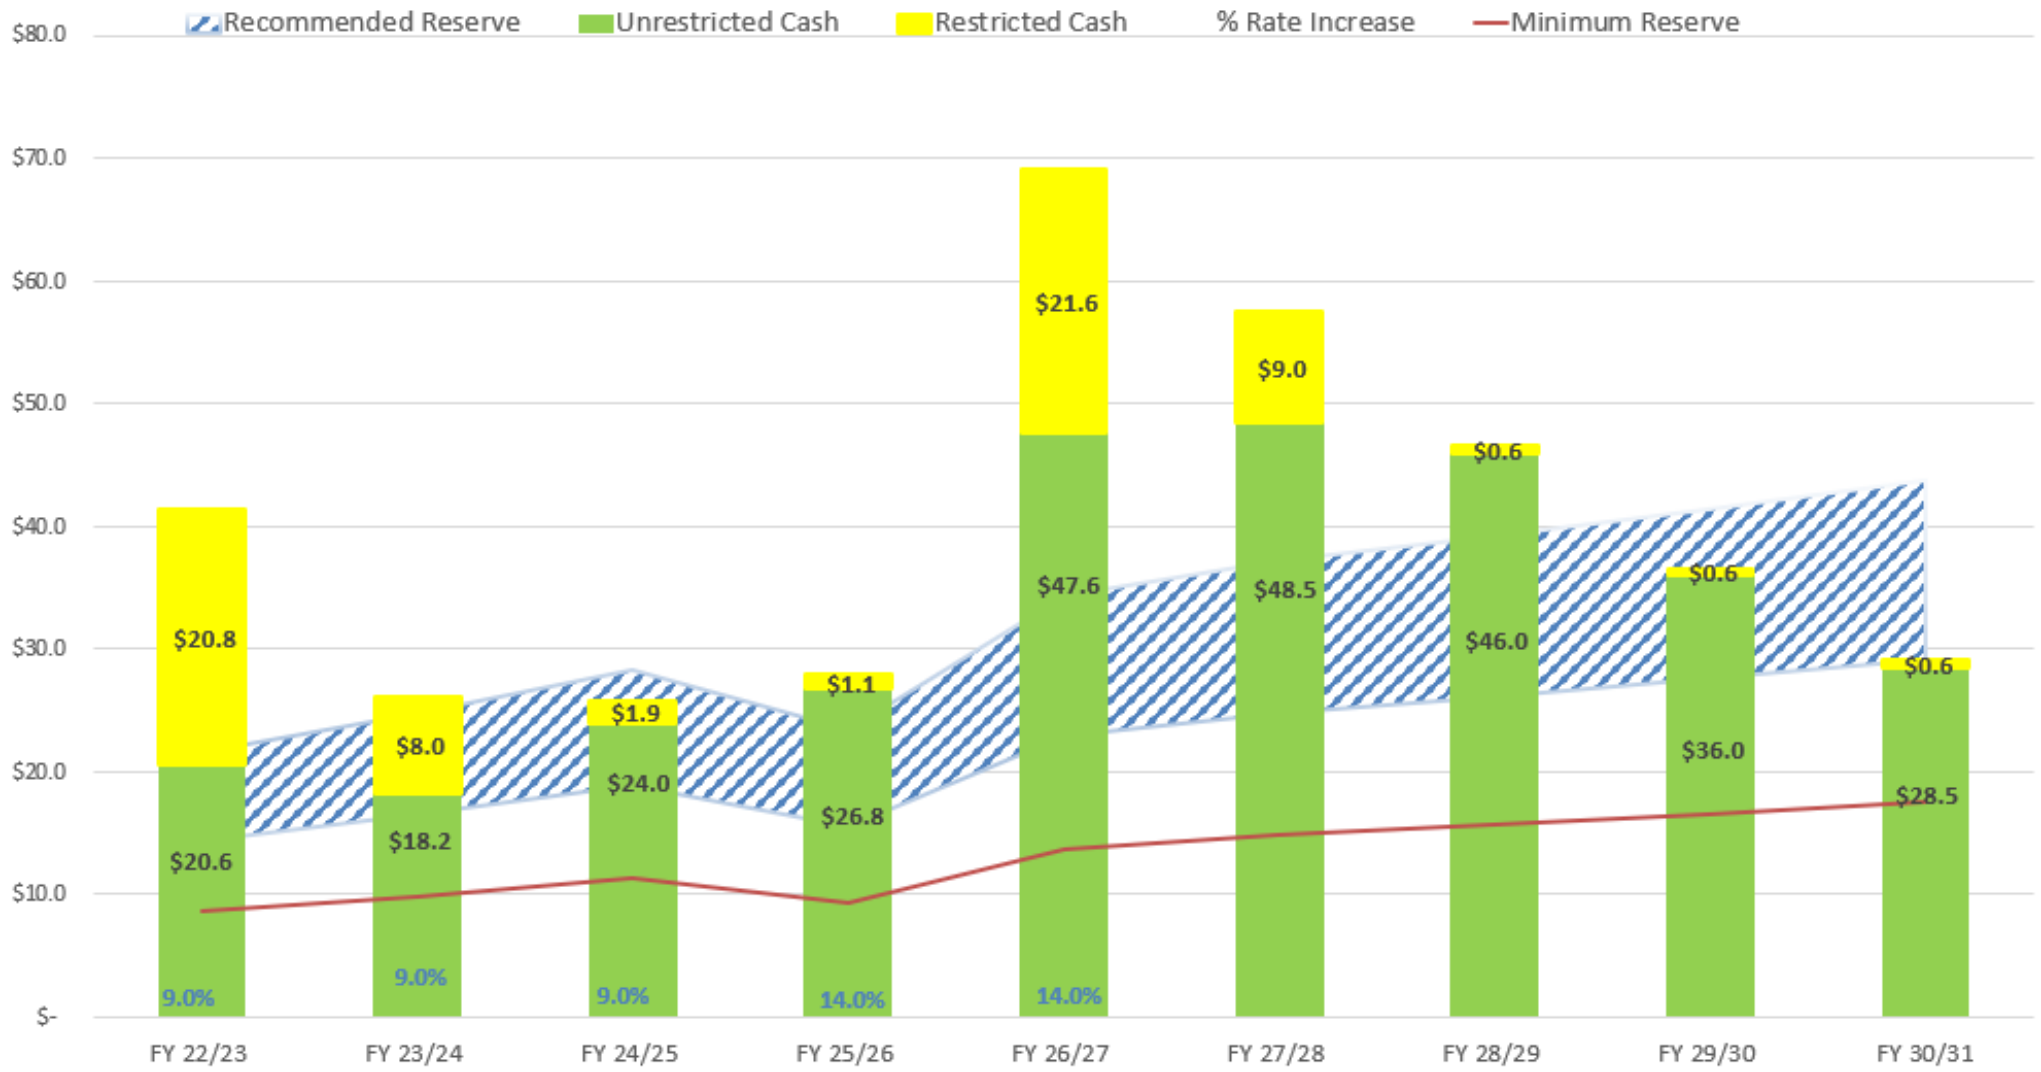
Projected Capital Spending

($ in thousands)



Water Fund Cash Balance

($ in millions)



2026 Water Revenue Bonds

- Limited obligations
- Payable from Net Revenues and on parity with BWP's outstanding 2021 Bonds and 2024 Bonds

Sources and Uses *	
Par Amount	$41,305,000
Premium	1,141,741
Total Sources	**$42,446,741**
Project Fund	$41,939,900
Cost of Issuance	300,000
Underwriter's Discount	206,525
Rounding Proceeds	316
Total Uses	**$42,446,741**

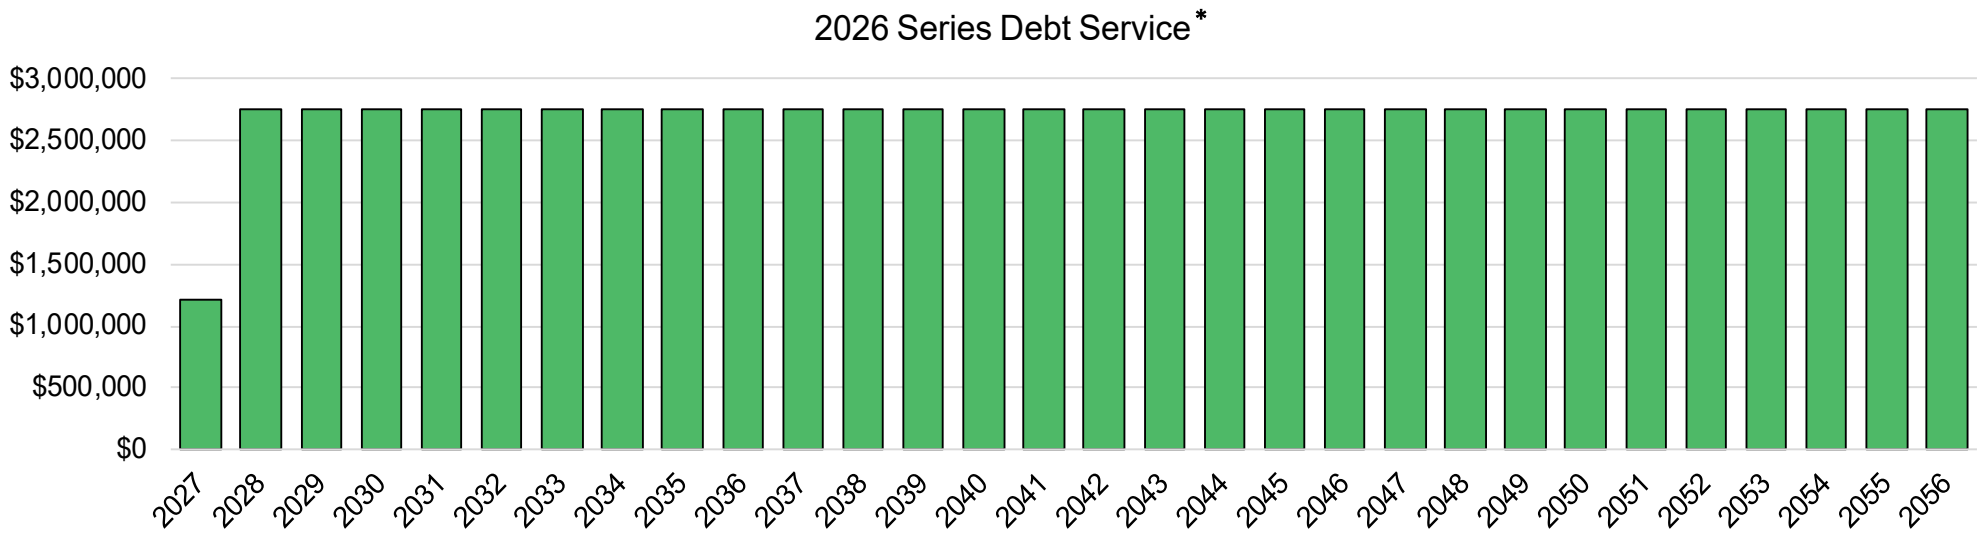
Dated	Series	Outstanding Principal	Outstanding Post-Issuance	Final Maturity	Optional Call
11/17/2021	2021 Water Revenue Bonds	$22,000,000	$22,000,000	6/1/2051	6/1/2031
7/11/2024	2024 Water Revenue Bonds	21,540,000	21,540,000	6/1/2040	6/1/2034
12/22/2026	2026 Water Revenue Bonds	--	41,305,000 *	6/1/2056	6/1/2036
	Total	**$43,540,000**	**$84,845,000**		

*Preliminary, Subject to Change

Repayment Structure

- June 1 and December 1 semi-annual interest; June 1 annual principal
- Approximately 30-year term; 2056 final maturity
- Level annual debt service
- 10-year optional call provision

Preliminary Financing Results *	
True Interest Cost	5.00%
Annual Avg. Debt Service	$2,758,000
Total Debt Service	$81,210,000



*Preliminary, Subject to Change

Projected Debt Metrics Remain Strong

Debt Metrics ($000's) Fiscal Year	2026-2027	2027-2028	2028-2029	2029-2030	2030-2031
Water Net Revenues	$25,046	$14,937	$15,758	$16,609	$16,559
Existing Debt Service	$3,657	$3,674	$3,701	$3,728	$3,748

Cynthia Alba, Senior Administrative Analyst – Business and Development Concierge
Ray Johal, Senior Assistant City Attorney
Fred Ramirez, Assistant Community Development Director

SUBJECT: Consideration to Approve the Terms and Conditions of a Proposed Agreement Between the City of Burbank and IKE Smart City, LLC, for the Installation, Operation, and Maintenance of Interactive Digital Wayfinding Kiosks

RECOMMENDATION

1. Review and consider terms and conditions of a proposed agreement with IKE Smart City, LLC, including the five policy and business terms identified for Council consideration outlined in this report.
2. Take one of the following actions:
   a. Approve the proposed agreement as presented; or
   b. Approve the proposed agreement with modifications to the terms and conditions as agreed upon during the Council meeting; or
   c. Direct staff to further negotiate specified terms and return to Council with a revised agreement for consideration.

If Council selects option 2a or 2b, staff further recommends that Council:

3. Authorize the City Manager, or designee, on behalf of the City, to execute the final agreement and any subsequent amendments thereto, and authorize the Financial Services Director, or designee, to take any necessary action to appropriate funds received pursuant to the Agreement including in future fiscal years.

BACKGROUND

At the July 15, 2025, City Council meeting, Council received a first-step report, requested by Vice Mayor Mullins, on the potential implementation of a wayfinding kiosk program throughout the City. Wayfinding kiosks are interactive digital displays installed in the public right-of-way that provide residents and visitors with access to information on City services, community events, emergency notifications, public transportation, maps and directions, 311 services, and other community resources.

Kiosks can also promote local businesses and community organizations through informational content and controlled commercial advertising. Similar programs have been implemented in several California cities, including Berkeley, Culver City, San Diego, and Santa Monica, and other municipalities nationwide. The proposed program is intended to improve public access to information, support local businesses, and enhance the pedestrian experience in pedestrian-oriented areas throughout the city.

At the July 15, 2025, meeting, Council directed staff to evaluate the feasibility of a pilot program, necessary Burbank Municipal Code (BMC) amendments, procurement options, and proposed community engagement. On December 9, 2025, staff presented a study-session update outlining the proposed program, including kiosk features, advertising and operational standards, public safety and accessibility, privacy protections, proposed BMC amendments, siting process, and a vendor-funded revenue-sharing financial model. Staff also presented a potential direct-negotiation procurement approach with IKE Smart City, LLC, (IKE), community outreach plans, implementation, and future program evaluation.

Council expressed support for advancing the program as presented, and during the regularly scheduled Council Meeting that evening, introduced the enabling ordinance by a 5-0 vote. The ordinance was subsequently adopted on December 16, 2025 (Ordinance No. 25-4,035), and became effective January 16, 2026, establishing regulatory standards for kiosk operations. Following the study session and adoption of the ordinance, staff entered negotiations with IKE to develop the terms for a proposed agreement.

DISCUSSION

Negotiation Process

Staff received IKE's initial draft agreement in mid-January 2026. Since that time, staff from the City Attorney's Office, City Manager's Office, Community Development Department, Financial Services Department, Public Information Office, Public Works Department, and Burbank Water and Power have participated in an extensive negotiation

process with IKE, including approximately 15 negotiation meetings. Staff also conducted numerous internal meetings and reviews to thoroughly evaluate the agreement's legal, operational, planning, technology, accessibility, advertising, community, and financial provisions.

Throughout the negotiation process, staff sought terms that would maximize public benefit, preserve City discretion, manage operational risk, and secure favorable financial terms for the City. While not every staff-preferred position was ultimately incorporated into the proposed agreement, negotiations involved compromise by both parties and resulted in substantial changes from IKE's original proposal.

Key Agreement Terms (Non-Financial)

Staff and IKE have reached agreement on the substantial majority of operational terms of the proposed wayfinding kiosk program, establishing City oversight, protecting public interests, and providing direct community benefit. Key non-financial terms include:

- **Fully Vendor-Funded Program:** IKE would be responsible for all program costs, including permitting, installation, utilities, operations, maintenance, repairs, and replacement of kiosks.
- **Implementation Requirements and City Protections:** IKE would be required to install the first kiosk within two years of the agreement's effective date, subject to force majeure and City-caused delays. The City would have the right to terminate the agreement if this requirement is not met.
- **City Control over Kiosk Locations:** The City would retain final approval authority over each kiosk location prior to installation. Specific kiosk locations would be identified collaboratively by the City and IKE and evaluated based on factors including pedestrian activity, proximity to commercial destinations, geographic distribution, accessibility, public safety, applicable City standards, and technical feasibility, including access to power.
- **$150,000 in Annual Advertising for Local Businesses and Nonprofit Organizations:** IKE would provide $150,000 annually in complimentary advertising opportunities for eligible Burbank businesses and nonprofit organizations, creating a direct community benefit in addition to the City's financial compensation under the agreement.
- **Dedicated City Communication Space:** The City would receive a minimum of one of every eight passive-mode display spots (approximately 12.5 percent of advertising display time) for City messaging, as well as access to unsold display time. This would provide an additional platform to promote City programs, services, events, and community information.
- **Oversight of Advertising Content:** Advertising would be subject to content standards established in the agreement, which prohibits categories including tobacco

and vaping products, firearms and ammunition, political advertising, online gambling, and obscene material. The City would retain the authority to review advertising for compliance with these standards and require removal of content that violates them.

- **Emergency Communications Capabilities:** The kiosks would provide an additional platform for public safety messaging and emergency notifications, including the capability to integrate with the federal Integrated Public Alert and Warning System (IPAWS).
- **User Privacy Protections:** The agreement incorporates multiple privacy safeguards, including limitations on the collection and retention of personally identifiable information, user consent requirements for certain optional features, and restrictions requiring usage data to be aggregated and anonymized. The City would also retain oversight of future kiosk features through approval requirements, and the agreement establishes contractual privacy protections that govern the program.
- **Accessibility and City Risk Protections:** The agreement would require compliance with applicable Americans with Disabilities Act (ADA) standards, Web Content Accessibility Guidelines, and prevailing-wage requirements. It also includes insurance, indemnification, cybersecurity, and performance bond provisions, as well as requirements for kiosk removal and restoration of the public right-of-way.
- **Ongoing Maintenance and Performance Requirements:** IKE would be responsible for all maintenance, monitoring, repairs, replacements, and technology upgrades at no cost to the City. The agreement establishes performance standards for routine maintenance, seven-day a week monitoring, regular software updates, and periodic equipment upgrades, ensuring that kiosks remain reliable, functional and well-maintained.

These terms establish a fully vendor-funded program that expands opportunities for City communications, emergency notifications, and promotion of local businesses and nonprofit organizations, while maintaining City oversight of kiosk placement, advertising standards, and operational requirements. The agreement also includes provisions intended to protect public safety, accessibility, privacy, and the long-term condition and maintenance of kiosks located in the public right-of-way.

Financial Terms

The proposed agreement provides three forms of compensation to the City: Minimum Annual Guarantees (MAG), advertising revenue sharing, and milestone-based installation payments.

For each term year of the agreement, the City would receive the greater of the total MAG for all operational kiosks or the calculated advertising revenue share (not both). This structure ensures a guaranteed minimum level of compensation while allowing the City to benefit from higher advertising revenues. Milestone-based installment payments would

be provided separately and would not offset the City's MAG and advertising revenue share.

- **Minimum Annual Guarantee (MAG):**
  The MAG is the minimum amount IKE would pay the City for each operational kiosk. Payments would commence once a kiosk becomes operational with the guaranteed amount increasing over the term of the agreement as follows:

Term Year	Minimum Annual Guarantee per Kiosk
Year 1	$1,388.92 per month (prorated for partial months)
Year 2	$18,333 per year
Year 3	$20,000 per year
Year 4	$21,666 per year
Years 5-10	$25,000 per year
Years 11-15	$27,500 per year
Years 16-20	$30,250 per year

  The City's total guaranteed revenue would increase as additional kiosks become operational and as the applicable MAG amounts increase over the agreement term. Payments would be prorated for partial periods and would apply only to kiosks that have reached their operational date.

- **Revenue Sharing:**
  The City would receive a share of the gross advertising revenue generated by operational kiosks based on the following tier structure:
  - 25% of annual gross advertising revenue up to the applicable revenue threshold.
  - 35% of annual gross advertising revenue exceeding the applicable revenue threshold.

  The annual revenue thresholds increase over the term of the agreement as follows:

Term Years	Annual Revenue Threshold
Years 1-5	$4,000,000
Years 6-10	$4,400,000
Years 11-15	$4,840,000
Years 16-20	$5,324,000

- **Installation Payments:**
  In addition to MAG or advertising revenue share, IKE would provide the City the following one-time payments upon reaching specified kiosk installation milestones:
  - $200,000 upon operational date of the first kiosk,
  - $200,000 upon operational date of the sixteenth kiosk, and

- $250,000 upon operational date of the thirty-first kiosk, contingent upon City approval of additional kiosks beyond the proposed 30-kiosk deployment in the agreement.

Attachment 2 (Compensation Scenarios) provides examples illustrating how the City's compensation may vary depending on the number of operational kiosks and advertising performance. These scenarios are intended to provide an understanding of the financial structure of the agreement and are not projections of future advertising revenue.

The proposed financial terms provide the City with a revenue source through guaranteed minimum payments or revenue sharing and installation milestone payments, while requiring no direct City investment in the installation, operation, or maintenance of the kiosks. Considering the potential 20-year term, MAG payments are estimated to total approximately $14.5 million[1], assuming phased deployment of 30 kiosks. Based on projections by IKE, total City compensation, including advertising revenue sharing and additional negotiated payments, is estimated at approximately $23 million over the 20-year period. IKE's projection is not guaranteed, as actual compensation will depend on kiosk deployment and advertising performance.

Overall Program Benefits

The proposed agreement provides a program with numerous benefits to the City and the community, including:

- Enhanced access to City information, services, emergency notifications, and transportation resources.
- Improved wayfinding and navigation for residents and visitors.
- Additional visibility and promotional opportunities for Burbank businesses and nonprofit organizations.
- A fully funded technology investment requiring no direct City capital or operating expenditures.
- New revenue opportunities through guaranteed payments, revenue sharing, and installation milestone payments.
- The ability to modernize public information infrastructure while retaining City authority over kiosk locations, content standards, and community messaging.

Agreement Terms for Council's Consideration

As a result of the negotiations, staff and IKE reached agreement on the majority of terms necessary to support the program. However, five terms as proposed by IKE differ from

[1] Estimate assumes five kiosks will become operational in Term Year 1, followed by 10 additional kiosks annually until full deployment of 30 kiosks in Term Year 4. For calculation purposes, newly installed kiosks are assumed to become operational midway through their respective installation years, with MAG payments prorated accordingly. Actual payments will vary based on the operational dates of individual kiosks.

staff's preferred positions and are presented below to ensure Council is fully aware of their policy, operational, or financial implications.

In evaluating these terms, staff reviewed IKE's terms with several other cities, including Culver City, to understand how similar terms have been addressed in other jurisdictions. IKE has indicated that it considers the proposed terms competitive with market conditions and more favorable to Burbank than those in many of its agreements with other jurisdictions, while also necessary to support the financial and operational viability of the program.

While staff would prefer alternative terms in these areas, the proposed agreement offers substantial community and financial benefits to the City should Council determine that the proposed terms are acceptable. Alternatively, Council may direct staff to pursue specific modifications or additional negotiations if it wishes to consider changes to any of the five terms before approving the agreement.

These five considerations are highlighted to ensure Council understands the differences between the proposed terms and staff's preferred approach, while recognizing that the proposed agreement as presented remains a viable option for moving forward with the program.

- ***Consideration 1 – Minimum Number of Required Kiosks (ATT 1 - Section 3.1)***
  IKE Proposed Term: Requires a minimum deployment of 30 kiosks throughout the City. The agreement specifies two phases of 15 kiosks each, but it does not set a year-by-year schedule for implementation.

  Staff Preference: An initial deployment of 15 kiosks (Phase 1), with the option to deploy an additional 15 kiosks (Phase 2) following an evaluation of the initial deployment and subject to City approval.

  Implications of Proposed Term: Under the proposed agreement, the City would commit to a full 30-kiosk deployment. Staff's preferred approach would preserve the City's discretion to determine whether to proceed with the second phase following evaluation of the initial deployment and its effectiveness in achieving anticipated objectives and benefits. For comparison, IKE's agreement with Culver City provides for an initial deployment of 15 kiosks, with the option to add up to 15 additional kiosks subject to City approval, rather than requiring an automatic second phase of deployment.

- ***Consideration 2 – Automatic Renewal (ATT 1 – Exhibit A Section 1.6)***
  IKE Proposed Term: Provides for an initial 10-year agreement term with an automatic 10-year renewal if specified performance criteria are satisfied, effectively establishing a 20-year commitment for the City. The criteria include achievement of at least $1 million in annual compensation to the City during the final year of the initial term, compliance with specified operating and reporting requirements, and the absence of significant unresolved violations of the agreement. IKE would retain the express right to decline renewal.

  Staff Preference: Any extension beyond the initial 10-year term would require mutual written agreement between the City and IKE, rather than occurring automatically upon satisfaction of the performance criteria.

  Implications of Proposed Term: Under the proposed agreement, the City would be effectively committing to a 20-year agreement, provided that performance criteria are satisfied and IKE does not decline the extension. Staff's preferred approach would require both parties to affirmatively agree to the extension preserving the City's discretion to evaluate the program's performance and determine whether extending the agreement for an additional 10 years remains in the City's best interest.

- ***Consideration 3 – Catch-Up Payment (ATT 1 - Exhibit A Section 1.6)***
  IKE Proposed Term: One renewal criterion is that total compensation payable to the City during the final year of the initial term reaches at least $1 million (renewal threshold). If compensation falls short, IKE may elect to make a supplemental payment to satisfy the $1 million threshold without requiring City approval.

  Staff Preference: Any catch-up payment used to satisfy the renewal threshold would be subject to City approval, preserving the City’s discretion to determine whether renewal is appropriate.

  Implications of Proposed Term: When considered together with the automatic renewal provision, the catch-up payment would allow IKE to satisfy the financial condition for renewal without achieving the corresponding level of actual program performance, provided all other renewal conditions are met.

- ***Consideration 4 – Prediction Market Advertising (ATT 1 - Section 13)***
  IKE Proposed Term: Allows advertising for lawful prediction-market platforms, such as Kalshi, while prohibiting online gambling advertising. Prediction markets allow users to trade contracts based on the outcomes of future events, including sports, elections, and economic developments.

Staff Preference: Exclude prediction-market advertising, consistent with the agreement's restriction on online gambling advertising, as this type of advertising may raise community concerns given its similarities to certain forms of gambling.

Implications of Proposed Term: The proposed agreement would allow lawful prediction-market advertising as a permitted category under the City's advertising standards.

- ***Consideration 5 – Compensation and Revenue Sharing (ATT 1 - Section 12.5 and Exhibit A Sections 1.5, 1.7, 1.9, 1.13, 3.1, 3.2, 3.3, 3.4)***

  IKE Proposed Terms: The proposed agreement includes MAGs, advertising revenue sharing, milestone installation payments, and advertising benefits for local businesses and nonprofit organizations. Through negotiations, staff secured substantial improvements to these financial provisions, resulting in a compensation structure that compares favorably with terms in several of IKE's other municipal agreements.

  Staff Preference: Staff sought higher guaranteed payments, increased revenue-sharing, and additional financial benefits for the City. During negotiations, staff used IKE's agreement with Culver City as a benchmark for evaluating compensation terms. The comparison to Culver City is highlighted because of its proximity and relevance as a neighboring market.

  Burbank's proposed agreement includes multiple financial benefits to the City, although its guaranteed compensation and community advertising benefits are lower than those in the Culver City agreement. It is noted that the agreements differ in their revenue-sharing methodologies (share of gross revenue for Burbank vs net revenue for Culver City), making direct comparisons dependent on actual advertising performance and applicable deductions.

  The differences between the proposed Burbank and Culver City terms are summarized in the following table and provided for reference and context for Council's consideration.

Table 1 – Comparison of Proposed Burbank and Culver City Financial Terms

Term	Burbank	Culver City	Considerations
Minimum Annual Guarantee (MAG)	$16,667-$30,250 annually per kiosk, depending on term year	$50,000-$66,550 annually per kiosk, depending on term year	Higher MAGs provide greater guaranteed revenue to the City, regardless of advertising performance

Table 1 (continued) – Comparison of Proposed Burbank and Culver City Financial Terms			
Term	**Burbank**	**Culver City**	**Considerations**
Revenue Share	25% of gross revenue up to $4 million; 35% of gross revenue above $4 million threshold	50% of net revenue	Staff successfully negotiated gross rather than net revenue sharing, but a higher % of gross will maximize the City's return
Installation Payments	$200,000 1st kiosk; $200,000 16th kiosk; $250,000 31st kiosk	$500,000 1st kiosk installment; $500,000 15th kiosk installment	Higher upfront payments provide more immediate financial benefits to the City; and Agreement authorizes 30 kiosks; in order to receive the $250,000 additional kiosks would have to be added
Local Business & Nonprofit Program	$150,000 annually	$500,000 annually	Greater funding would expand opportunities to support local businesses and nonprofit organizations

Implications of Proposed Term: Negotiations resulted in substantial improvements to IKE's original financial proposal, including increased guaranteed compensation, revenue- sharing opportunities, installment payments, and community advertising benefits. While the City's terms compare favorably with several other municipal agreements, Burbank would receive lower guaranteed compensation and community advertising benefits than those provided to Culver City. Actual revenue will depend on kiosk deployment and advertising performance, making direct comparisons with larger jurisdictions difficult, even where Burbank has negotiated more favorable terms.

The five considerations outlined above identify areas where the proposed agreement differs from staff's preferred terms. These differences are presented to ensure Council is fully informed of their implications and has an opportunity to provide direction if desired. While staff prefer alternative terms in these areas, the proposed agreement provides a

viable framework for implementing the program and delivering public and financial benefits as described in this report.

Council may approve the agreement as presented or provide direction regarding specific modifications. If proposed modifications can be mutually agreed upon by the City and IKE during the Council meeting, they may be incorporated into the final agreement consistent with Council's approval. If additional negotiations are necessary, staff would return to Council with the resulting agreement for further consideration, recognizing that additional negotiations may not produce the requested changes.

Program Administration and Oversight

The City Manager's Office, through its Business and Development Concierge, would serve as the primary point of contact for administration of the program. Responsibilities would include monitoring compliance with the agreement, coordinating with IKE and applicable City departments on kiosk locations, implementation, maintenance, advertising, and other operational matters, and facilitating resolution of issues as they arise. The Business and Development Concierge would also coordinate ongoing program evaluation and provide updates to City management and Council as appropriate.

COMMUNITY OUTREACH

On March 3, 2026, in collaboration with the City, IKE facilitated a community meeting at the Los Angeles Marriott Burbank Airport Convention Center from 6:00 p.m. to 7:30 p.m. The meeting was announced at a City Council meeting and promoted through the City's event calendar and social media platforms.

The meeting provided community members with an opportunity to interact with a demonstration kiosk and learn about the proposed program, including wayfinding features, access to City information and local business and nonprofit resources, emergency messaging capabilities, security features, and privacy protections. Attendees were also able to ask questions, express concerns, and provide feedback directly to IKE representatives.

Continued Public Education

Should Council approve the agreement, staff will proceed with public education and engagement efforts as the program moves forward. These efforts will focus on informing

the community about the purpose and features of the kiosks, available City services and resources, and privacy and accessibility considerations.

Engagement may include but is not limited to updates through City communication channels, stakeholder briefings, and collaboration with local business organizations and neighborhood groups. Staff will also work with IKE to develop instructional materials to help residents and visitors understand the kiosk features and access to City resources.

ENVIRONMENTAL REVIEW

The approved Ordinance, which established new regulations that allow for the implementation of wayfinding kiosks within the public right-of-way pursuant to an operating agreement with the City, was determined to be a project under the California Environmental Quality Act (CEQA) Guidelines. Staff worked with its environmental consultant (Dudek) to identify all CEQA categorical exemptions applicable to the project and Council has previously determined the project to be categorically exempt pursuant to the CEQA Guidelines (California Code of Regulations Title 14) Sections 15301(c): Class 1, 15303: Class 3, 15304: Class 4, and 15305: (Class 5).

FISCAL IMPACT

The proposed program would be fully funded by IKE, which would be responsible for all costs associated with permitting, installation, utilities, operation, maintenance, repairs, replacements, and removal of the kiosks throughout the agreement term. The program would not require direct City expenditures for kiosk installation, utilities, operations, maintenance, repairs, or replacement. City oversight and contract administration would be performed by existing staff resources.

The agreement would provide financial compensation to the City through minimum annual guarantees (MAGs), gross advertising revenue sharing, and milestone-based installation payments. For each agreement year, the City would receive the greater of the total MAG for operational kiosks or its calculated share of gross advertising revenue, along with separate payments upon reaching specified installation milestones. Actual revenue would depend on the number of operational kiosks and advertising performance.

Over the potential 20-year term, MAGs are estimated to total approximately $14.5 million, assuming phased deployment of 30 kiosks. Actual MAG payments will depend on when individual kiosks become operational and applicable prorated amounts. IKE projects total City compensation of approximately $23 million over the 20-year period, including revenue sharing and additional negotiated payments. This projection was provided by IKE and is not guaranteed, as actual compensation will depend on kiosk deployment and advertising performance.

Additionally, the program would provide $150,000 annually in complimentary advertising opportunities for eligible Burbank businesses and nonprofit organizations.

Attachment 2 (Compensation Scenarios) provides examples illustrating the potential City compensation under various kiosk deployment and advertising revenue scenarios. These examples are for illustrative purposes only and do not represent projections or anticipated fiscal outcomes.

Future Bus Shelter Program

The City is also proceeding with a separate digital advertising program for bus shelters. This program is independent of the wayfinding kiosk agreement, and any associated revenues or financial benefits from this future program are not included in the compensation scenarios presented in Attachment 2.

CONCLUSION

The proposed wayfinding kiosk program would provide Burbank with a modern, new public information resource designed to improve access to City services, enhance pedestrian navigation, support local businesses and nonprofit organizations, and create additional opportunities for City communications and emergency notifications. The program would be funded, installed, operated, and maintained by IKE, while providing the City with guaranteed compensation and opportunities for additional advertising revenue.

Following extensive negotiations, staff and IKE have developed an agreement that establishes the framework for implementing the program, including terms addressing City oversight, operations, maintenance, accessibility, advertising standards, risk protections, and community benefits. Although five of the proposed terms differ from staff's preferred positions, staff considers that the agreement provides benefits to the City and community and is prepared to proceed should Council approve the agreement as presented. These differences have been highlighted to ensure Council is fully informed of their implications.

The proposed agreement provides an opportunity to introduce a contemporary public information resource that supports local businesses, enhances community connectivity, and advances the City's efforts to improve access to information in public spaces. Staff seeks Council's consideration of the proposed agreement and direction on any terms Council wishes to modify before moving forward with implementation. Council may approve the proposed agreement as presented, approve modifications mutually agreed upon by the parties, or direct staff to pursue further negotiations on specified terms.

OPERATING AND FRANCHISE AGREEMENT BETWEEN THE CITY OF BURBANK AND IKE SMART CITY, LLC FOR THE INSTALLATION, OPERATION, AND MAINTENANCE OF INTERACTIVE DIGITAL WAYFINDING KIOSKS

THIS OPERATING AND FRANCHISE AGREEMENT BETWEEN THE CITY OF BURBANK AND IKE SMART CITY, LLC FOR THE INSTALLATION, OPERATION, AND MAINTENANCE OF INTERACTIVE DIGITAL WAYFINDING KIOSKS (this "Agreement") is made this ___ day of _____, 2026 (the "Effective Date"), by and between THE CITY OF BURBANK, CALIFORNIA, a California municipal corporation (the "City"), and IKE SMART CITY, LLC, a Delaware limited liability company (the "Company").

RECITALS

A. The Company is engaged in the development, installation, operation and maintenance of interactive digital wayfinding kiosks branded as IKE Kiosks (as defined in Section 2.7 below).

B. Burbank Municipal Code authorizes the use of digital wayfinding kiosks within the public right of way, pursuant to an approved operating agreement with the City. These requirements are outlined in Burbank Municipal Code Title 7 and Ordinance No. 25-4,035. These regulations are subject to amendment as approved by City Council and any then-existing digital wayfinding kiosk program shall comply with any such future amendments.

C. The City desires to improve the pedestrian experience and community engagement for its residents and visitors through the implementation of a digital wayfinding kiosk program, and on December 9, 2025, the Burbank City Council provided direction to pursue direct negotiation of this Agreement with the Company.

D. The Company and the City have agreed to implement the wayfinding kiosk program within the City based upon the mutually agreed terms and conditions set forth in this Agreement.

AGREEMENT

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the City and the Company hereby agree as follows:

1. Incorporation of Recitals. The foregoing Recitals are hereby incorporated into and made a part of this Agreement.

2. Definitions.

2.1 "Advertisements" means any public service, commercial, industrial, promotional, and/or other off-premises advertisements displayed on an IKE Kiosk pursuant to this Agreement. Advertisements are each referred to individually as an "Advertisement".

2.2 "Block" means the property abutting one side of a street between intersecting or intercepting streets, or in the case of a dead-end street the property between the end thereof and the first intersecting or intercepting street.

2.3 "Business Day" means a day other than a Saturday, Sunday, or a holiday federally recognized by the United States government on which federally chartered United States banks are required to be closed.

2.4 "City Directed Content" means all content created, supplied, and/or approved by the City advertising or promoting the City's events, initiatives, missions, programs, services, civic content, public service announcements, or other official City related communications, which is provided to the Company by the City for display on the IKE Kiosks in accordance with Section 12 below.

2.5 "Freedom of Information Law" or "FOI Law" means all applicable state and federal statues, laws, ordinances, rules, regulations, requirements and codes, related to any public request for information, requiring certain information and/or proceedings of government agencies to be open or available to the public, or otherwise known as a "Sunshine Law".

2.6 "Governmental Authorities" means all governmental and quasi-governmental agencies, authorities, and other entities having jurisdiction over the Locations, including the City. Governmental Authorities are each referred to herein individually as a "Governmental Authority".

2.7 "IKE Kiosks" means the interactive digital devices installed and operated by the Company in the public right of way having a primary purpose of providing wayfinding services, public information or other messaging selected by the City for community benefit in accordance with Section 12 below, and which may include commercial advertising. In addition, these devices may provide, with limitation, those services and applications as set forth on Exhibit B, and have the specifications set forth on Exhibit C, and may provide certain other services and applications subject to prior City written approval. The IKE Kiosks are each referred to individually as an "IKE Kiosk".

2.8 "Installation Work" means all work necessary, including but not limited to labor, materials, equipment, and services, to be performed by the Company to install an IKE Kiosk at a Location in accordance with all City Required Approvals and cause such IKE Kiosk to be capable of displaying Advertisements, including without limitation, all work necessary for the provision and connection of electrical and data service to such Location.

2.9 "Intellectual Property Rights" or "IPR" means the Company's patents, registered designs and trademarks, together with applications therefor and copyrights of any kind.

2.10 "Interactive Mode" means the condition of an IKE Kiosk during any period in which a user is actively engaging the IKE Kiosk.

2.11 "Kiosk Compensation" is defined in Exhibit A.

2.12 "Locations" means specific City owned or City controlled property or within the City's Public Right Of Way, approved by the City as a site upon which IKE Kiosks may be installed by the Company, subject to the terms and conditions set forth in this Agreement. The Locations are referred to each individually as a "Location".

2.13 "MAG" is defined in Exhibit A.

2.14 "Operational Date" means the date on which an IKE Kiosk has been installed at a Location in accordance with all Required Approvals and is capable of displaying Advertisements and performing the functions and services set forth in this Agreement. The IKE Kiosks for which the Operational Date has occurred are referred to herein collectively as "Operational Kiosks", and each individually as an "Operational Kiosk".

2.15 "Passive Mode" means the condition of an IKE Kiosk during any period in which no users are actively engaging with the IKE Kiosk.

2.16 "Public Right Of Way" or "PROW" means the improved or unimproved surface of and the space above and below a City easement for a public utility purpose, such as a street, sidewalk, or similar public way of any nature, dedicated, or improved for vehicular, bicycle, and/or pedestrian-related purpose, maintained and operated by the City, used now or hereafter held by City, however required.

2.17 "Required Approvals" means all governmental approvals, permits, or entitlements required to be obtained from the applicable Governmental Authorities to install and operate an IKE Kiosk at a Location in accordance with this Agreement and applicable local, state or federal law.

2.18 "Revenue Share" is defined in Exhibit A.

2.19 "Software" means all software used in the operation of the IKE Kiosks.

2.20 "Spot" means a discrete unit of time during Passive Mode when content may be displayed on IKE Kiosk screens.

2.21 "Term" means the period in which the Company may install and operate the IKE Kiosks, as set forth in Exhibit A.

2.22 "Utility Assistance" means working with local power providers and other local entities to: (i) where feasible as determined by and at the sole discretion of the City, facilitate connection to existing City owned power infrastructure, such as festival lights, traffic lights, streetlights, vehicle charging stations, kiosks, circuits, wires, or conduits; (ii) where feasible, minimize the need for new trenching, long power runs and street closures; (iii) assist with identifying and obtaining all relevant permits; and (iv) assign a Public Works and Water and Power representative who is knowledgeable on recent previous rights-of-way projects with electrical infrastructure and who will provide insight, subject to then existing cost calculated by hourly wage rates, on previous projects involving power acquisition and coordinate street and sidewalk work as needed and provide support to construction personnel.

3. Grant of Rights.

3.1 General Rights. Subject to the terms and conditions set forth in this Agreement, the City hereby grants to the Company the right to construct, install, operate, maintain, repair, replace, upgrade and remove up to thirty (30) IKE Kiosks in and on the Locations during the Term of this Agreement. Upon the mutual written agreement of the City and the Company, additional IKE Kiosks beyond thirty (30) may be added to this Agreement. Additionally, the City hereby grants the Company a non-exclusive right of ingress and egress over and across the PROW and any and all City-owned property as reasonably necessary to access the Locations for the purposes set forth in this Agreement, subject to the Required Approvals from the City. The thirty (30) IKE Kiosks shall be deployed in two (2) separate phases of fifteen (15) IKE Kiosks each. Following the

Effective Date, the Company shall use commercially reasonable efforts to diligently pursue the City's approval of the Locations for the initial fifteen (15) IKE Kiosks, obtain the Required Approvals for the initial fifteen (15) IKE Kiosks, and install the initial fifteen (15) IKE Kiosks in accordance with the terms and conditions set forth herein. Following the date on which the Operational Date for the fifteenth (15th) Operational Kiosk in the City has occurred, the Company shall deliver written notice to the City and pursue the City's approval of the Locations for the second phase of fifteen (15) additional IKE Kiosks, obtain the Required Approvals for such second phase of fifteen (15) additional IKE Kiosks, and install the second phase of fifteen (15) additional IKE Kiosks in accordance with the terms and conditions set forth herein.

3.2 Exclusive Rights. City covenants and agrees that the rights granted in this Agreement to the Company are exclusive to the Company, and City shall not contract with any person or entity other than the Company to install and operate kiosks that host Advertisements (the "Exclusivity Covenant"). Notwithstanding the foregoing, this grant of exclusivity shall not apply to and does not limit the City's ability to authorize the installation of bus shelters and benches or other street furniture hosting Advertisements so long as such bus shelters and bus benches are located at least two hundred feet (200 ft) from the Location of any IKE Kiosk, and any such other street furniture is located at least one hundred and fifty feet (150 ft) from the Location of any IKE Kiosk. The foregoing grant of exclusivity shall also not prevent bike share stations, including bikes, that have sponsorship branding.

4. Siting Plan and Required Approvals.

4.1 Potential Location Site Plan. The Company shall conduct an analysis to identify potential Locations for IKE Kiosks. The analysis shall assess the feasibility and accessibility of the potential Location, and during such assessment the Company shall conduct site visits and photograph and investigate potential Locations for the IKE Kiosks. During the process of such analysis, the Company and the City will work together to mutually agree on and develop a public outreach and stakeholder engagement process, which may include notification to property owners directly adjacent to a potential Location, and following the parties' mutual agreement on such process, the Company shall comply with such process before pursuing the City's approval of a potential Location. If the Company desires to pursue the City's approval of a potential Location, the Company shall prepare, and present to the City staff for review and approval, a site plan which demonstrates that the measurements of the potential Location are in compliance with required setbacks and that such Location possesses an adequate proposed source for power (each, a "Potential Location Site Plan"). The City's staff may deny a Potential Location Site Plan if it notifies Company of such denial within thirty (30) days of its receipt of such Potential Location Site Plan and specifies any of the grounds set forth in Section 4.1.1 – 4.1.11 below for denial. The City may extend such thirty (30) day review and approval/denial period for up to one (1) additional thirty (30) day period upon written notice to the Company.

The City may deny a potential Location submitted by the Company to the City for the following reasons:

4.1.1 a specific health, safety, or aesthetic impact caused by the proposed Location;

4.1.2 the proposed Location will conflict with existing improvements, property interests, agreements, or other rights;

4.1.3 the proposed Location will conflict with a planned public or private improvement;

4.1.4 the proposed Location will conflict with applicable laws or regulations;

4.1.5 the City lacks the authority to approve IKE Kiosk installation at that proposed Location;

4.1.6 the information provided in the Potential Location Site Plan regarding the proposed Location is not detailed enough for the City to make a determination regarding approval;

4.1.7 the proposed Location is an area where there is a reasonable possibility that the IKE Kiosk will have a significant effect on the environment due to unusual circumstances, such as in an environmentally sensitive area that is designated, precisely mapped and officially adopted pursuant to applicable law;

4.1.8 the proposed Location is not located along City roadways identified in the General Plan as Major Arterial, Secondary Arterial, or Downtown Collector, or within commercial, mixed-use, or industrial zoning;

4.1.9 the proposed Location is within one hundred and fifty feet (150 ft) of any Low-Density Residential neighborhoods and is visible from such Low-Density Residential Neighborhoods;

4.1.10 the proposed Location is viewable from and directly in front of single-family residences or K–12 schools; or

4.1.11 the proposed Location does not comply with Exhibit E attached to this Agreement.

4.2 Required Approvals. Following approval of the City for a Potential Location Site Plan, the Company shall prepare and submit all items required to obtain the Required Approvals for such Location, including, if applicable, engineered plans, construction permit documentation, and such other permitting applications as the City may require to show satisfaction of the installation parameters described in Exhibit F attached to this Agreement (the "**City Installation Criteria**"). The City agrees to assist the Company as reasonably necessary during the process of the Company's pursuit of the Required Approvals and that it shall use commercially reasonable and diligent efforts to promptly review and approve or deny all applications or other submissions for the Required Approvals following receipt of such applications or other submissions from the Company. City staff may deny issuance of the Required Approvals for a potential Location if it notifies Company, in writing, of an inconsistency with the City Installation Criteria.

5. Timeline. Following the Effective Date, the Company shall provide to the City a general outline of the Company's expected timeline for the installation of the IKE Kiosks following receipt of the Required Approvals (the "Installation Timeline"). Subject to extension for delays beyond the Company's control (e.g., permitting delays due to no fault of the Company, force majeure events, etc.) (a) the Company shall use good faith efforts to adhere to the Installation Timeline, and shall promptly notify the City in writing of any anticipated delay and the reasons for such delay, and (b) if the first (1st) IKE Kiosk has not been installed on or prior to the date that is two (2) years following the Effective Date, subject to day-for-day automatic extension for any delay arising from Force Majeure pursuant to Section 22 below and any

delays caused by City (e.g., delay in approving the Locations, issuing the Required Approvals, etc.) (the "Outside Date"), the City shall have the right to terminate this Agreement at any time thereafter by delivering written notice to the Company (an "Outside Date Termination Notice"), and in such an event, upon the Company's receipt of such Outside Date Termination Notice, this Agreement shall terminate and the parties shall have no further rights or obligations under this Agreement except for the rights and obligations that are expressly stated to survive termination or expiration of this Agreement; provided that if the Company fails to install the first (1st) IKE Kiosk within the City on or prior to the Outside Date, but the Company subsequently installs the first (1st) IKE Kiosk prior to the City delivering an Outside Date Termination Notice to the Company, then the City's right to deliver an Outside Date Termination Notice to the Company pursuant to this Section 5 shall be deemed null and void.

6. Term. The Term of this Agreement, and the rights and obligations of the parties set forth herein, shall begin on the Effective Date and continue for the period set forth on the attached Exhibit A.

7. Kiosk Compensation. Subject to the terms and conditions set forth in this Agreement, from and after the Operational Date for each IKE Kiosk and through the end of the Term, the Company shall pay to the City the Kiosk Compensation for such IKE Kiosk in accordance with the terms and conditions set forth in Exhibit A attached to this Agreement. All payments of Kiosk Compensation shall be made to the City at its address as set forth in this Agreement, or at such other address or by such other method as the City may designate by written notice to the Company.

8. Installation Work.

8.1 Installation Work. Upon receipt of all Required Approvals for the installation and operation of an IKE Kiosk at a particular Location, the Company shall commence commercially reasonable and diligent efforts to complete the Installation Work for such IKE Kiosk in accordance with the Required Approvals. All Installation Work shall be at the Company's sole cost and expense. The Company shall notify the City's Public Works Director, or such person's designee, no less than forty-eight (48) hours prior to commencing Installation Work at a particular Location. During the performance of the Installation Work, the City hereby grants the Company the right to occupy and use such Location and any portions of City owned or controlled property immediately adjacent to the Locations as reasonably necessary to perform the Installation Work. The Company shall perform the Installation Work in a good and workmanlike manner and in compliance with all applicable laws, regulations, rules, and Required Approvals.

8.2 Approval of Installation Work. The Company shall notify the City's Public Works Director, or such person's designee, upon completion of the Installation Work at a particular Location, and the City's Public Works Director, or such person's designee, shall thereafter have the right to inspect and approve or reject such Installation Work within ten (10) Business Days following receipt of such notice from the Company, provided that such person may only reject approval of such Installation Work if such Installation Work was not completed in accordance with applicable law or the Required Approvals for such Location. If the City's Public Works Director, or such person's designee, timely inspects and rejects any Installation Work for a permitted reason, such person shall deliver written notice to the Company, and the Company shall be responsible for completing all work required in order to bring such IKE Kiosk and Location into compliance with applicable law and the Required Approvals for such Location.

8.3 Post-Installation. Following the Operational Date for an IKE Kiosk, the Company shall thereafter operate and maintain such IKE Kiosk in accordance with this Agreement. Following installation, the terms and conditions set forth on Exhibit A shall govern any temporary removals and/or relocations of the IKE Kiosks.

9. Utility Services. During the process of evaluating potential Locations pursuant to Section 4 above, the Company shall work with Burbank Water and Power and Public Works to evaluate each potential Location and the feasibility of accessing utility services at such potential Location. At no cost to the City, the City shall provide the Utility Assistance and cooperate with the Company in good faith to bring electrical service to each Location. The Company shall (a) comply with the latest rules, regulations, and specifications as provided by the utility provider for any utility services contracted for by the Company, as the same may be modified or amended from time to time, and (b) pay all costs associated with obtaining and using utility services for each Location. Subject to the City's obligation to provide the Utility Assistance, (i) the processing of any utility requests shall otherwise be treated as a standard commercial service, with charges due the City per the latest rules and fee schedule, and (ii) any fees associated with these services may be amended annually pursuant to the City's adopted fee schedule. If the Company determines that it requires additional utility services at any Location, the City shall work together with the Company in good faith as reasonably necessary to obtain such additional utility services to the extent feasible at no cost to the City. If any utility services to the IKE Kiosks are interrupted due to no fault of the Company, the City shall cooperate with the Company in good faith to ensure that such utility services are restored as soon as reasonably practicable at no cost to the City.

10. Covenants of the Company.

10.1 Repair and Maintenance. The Company shall, at its sole cost and expense, maintain the Operational Kiosks and their Locations in good and operable condition free from any damage, graffiti, vandalism, or any other aesthetic defect, subject to reasonable wear and tear. The Company shall promptly and adequately repair all damage to the Operational Kiosks as reasonably necessary to ensure that such Operational Kiosks are capable of operating for its intended purposes. If the Company, in its sole discretion or following receipt of a request for replacement from the City, determines in its reasonable judgment that any Operational Kiosk requires complete replacement during the Term, the Company shall promptly and adequately replace such Operational Kiosk at its sole cost and expense. The Company shall employ standard operating procedures with respect to the IKE Kiosks that includes (i) one (1) visit to each IKE Kiosk per weekday, and visits on weekend days as needed, to ensure the IKE Kiosks are maintained in a clean manner and to remove any vandalism thereon, (ii) electronic monitoring seven days per week, (iii) responding within twenty-four (24) hours to any notices received by the Company regarding damage or disfunction of the IKE Kiosks, and (iv) update the Software monthly and upgrade the internal computing and networking components of the IKE Kiosks at least one time every 5 Term Years (as defined in Exhibit A). The Company shall deploy updates to the operating software used to operate the IKE Kiosks from time to time during the term of this Agreement to ensure that such software remains reasonably up to date and functional for its purposes. Additionally, the IKE Kiosks shall be equipped by automatic ambient light sensors and other equipment to enable lighting to be controlled remotely, and the Company shall monitor the brightness of the IKE Kiosks remotely to ensure appropriate levels of brightness are maintained at the IKE Kiosks in coordination with City staff and consistent with current and future City lighting standards.

10.2 Compliance with Laws.

10.2.1 Generally; ADA and WCAG. The Company shall comply with all applicable federal, state and municipal laws, orders, rules and regulations applicable to its activities pursuant to this Agreement, including without limitation any applicable provisions of (a) the Americans with Disabilities Act of 1990 ("ADA"), and (b) the Web Content Accessibility Guidelines ("WCAG") 2.1, Level AA technical standards related to

digital content usable by people with a range of disabilities, in each case as the same may be amended, supplemented, or superseded from time to time.

10.2.2 Prevailing Wage. To the extent that the Company performs any work described in California Labor Code Section 1720(a)(1), Company agrees that it shall comply with all applicable laws and regulations arising therefrom, including, if applicable, but without limitation: (a) the Company, and any subcontractor or subcompany performing such work on behalf of the Company, being required to pay not less than the established prevailing rates of wages to all workers employed in the execution of this Agreement, and (b) compliance with all other requirements applicable to Public Works Construction as specified in the California Labor Code and/or the Davis Bacon Act (if federal money is funding any part of this Agreement). Furthermore, Company must register as a public works contractor with the California Department of Industrial Relations if the compensation under this Agreement is greater than Twenty-Five Thousand and No/100 Dollars ($25,000.00) and applicable law requires the Company to so register as a result.

10.3 Liens. The Company shall be responsible for the satisfaction or payment of any liens for any provider of work, labor, material or services claiming by, through or under the Company in connection with this Agreement, and shall cause any such lien to be discharged within thirty (30) days after receiving notice, whether by bonding, payment or otherwise, provided that the Company may contest, in good faith and by appropriate proceedings, any such liens.

10.4 Faithful Performance and Payment Bonds. As security for the performance of the Company's obligation to remove the IKE Kiosks and repair each Location following expiration or termination of this Agreement pursuant to Section 20 below, prior to the installation of the first (1st) IKE Kiosk under this Agreement, the Company shall provide a valid and binding corporate surety Faithful Performance bond (the "Performance Bond") and Payment Bond (the "Payment Bond") collectively, the Bonds, in favor of City. The Bonds shall: (i) cover the estimated costs to be incurred by the Company in connection with the removal of all Kiosks and repair of all Locations following expiration or termination of this Agreement pursuant to Section 20 below, as mutually and reasonably agreed by the City and the Company, including the Company's payment of all contractors and subcontractors in connection with its performance of such obligations; and (ii) contain terms mutually and reasonably acceptable to the City and the Company. Such mutual agreements shall not be unreasonably withheld, conditioned, or delayed. The insurance company issuing the Bonds shall be subject to the City's prior written approval, and shall be a reputable insurance company that (a) is authorized to do business in the state of California; and (b) possesses all permits, licenses, or other approvals required pursuant to applicable law to issue such Bonds in the state of California.

10.5 Operating and Reporting Covenants. During the Initial Term (as defined in Section 2 of Exhibit A below), following the Operational Date for the first (1st) Operational Kiosk in the City, the Company will generally comply with the following operating and reporting covenants (collectively, the "Operating and Reporting Covenants") in all material respects in connection with its operation of the Operational Kiosks under this Agreement: (a) the Company shall deploy monthly software updates (including security screening, bug fixes, and user experience improvements) to the operating Software of the Operational Kiosks; (b) the Company shall comply with all maintenance, repair, and replacement obligations set forth in this Agreement, including any required maintenance request response times; (c) the Company shall electronically monitor the Operational Kiosks at all times to the extent reasonably necessary to ensure that all operating Software is operable and that malfunctions to the operating Software are repaired within a reasonably practicable time period following the Company's discovery and/or receipt of written

notice thereof; (d) the Company shall refresh the internal networking components of the Operational Kiosks at least one (1) time; (e) the Company shall provide Operational Kiosk usage statistics and analytics to the City on a quarterly basis; (f) the Company has complied with its Kiosk Compensation obligations set forth in Exhibit A below; and (g) within sixty (60) days following the expiration of each Term Year (as defined in Section 1.12 of Exhibit A below) during the Initial Term, the Company shall provide to the City an annual report including all data and evidence reasonably necessary for the City to assess the Company's compliance with the foregoing subclauses (a) through (f) during the immediately preceding Term Year. In the event that the City reasonably believes that the Company has materially violated of any of the Operating and Reporting Covenants, the City shall deliver written notice to the Company, and the Company shall have a period of thirty (30) days thereafter to cure such violation (or, if such violation is of a nature that cannot reasonably be cured within such thirty (30) day period, then the Company shall have a period of time as is reasonably necessary in which to cure such violation). If the Company fails to cure such violation within the applicable cure period, then such event shall be an "Operating and Reporting Covenant Default" subject to Section 1.6 and Section 2 of Exhibit A below. For clarity, the Operating and Reporting Covenants are included in this Agreement solely for the purposes described in Section 1.6 and Section 2 of Exhibit A below, and in no event shall the Company's violation of this Section 10.5 be deemed an Event of Default or give the City any right to terminate this Agreement or exercise any other remedies as a result thereof.

11. Covenants of City.

11.1 Maintenance. City agrees to cooperate with the Company to ensure that the Locations and the property adjacent to the Locations are maintained in a good and clean condition and otherwise in a manner so as to not impede or limit access to, or viewability or use of, the IKE Kiosks.

11.2 Kiosk Actions. The City covenants and agrees that it shall not take any action in connection with the IKE Kiosks without the Company's prior written consent unless expressly authorized to do so by other provisions of this Agreement (including Section 4.3 of Exhibit A below) (the "Kiosk Actions Covenant").

11.3 Kiosk Impairment Covenant. The City covenants and agrees that, during the Term, following the parties' mutual agreement on a Location pursuant to Section 4 above, the City shall not install or operate (or permit the installation or operation of) any improvements on any City owned or controlled property, including within the Public Right of Way, which could reasonably be expected to materially and adversely impact the viewability, visibility, or use of such IKE Kiosk at such Location (such covenant, the "Kiosk Impairment Covenant"). The City and the Company shall work together in good faith and with due diligence to remedy any impairments to the visibility, viewability, and/or use of the IKE Kiosks.

12. City Content; Local Business Advertising Time. The City shall have the right, at no cost to the City, to display City Directed Content on the Operational Kiosks as follows:

12.1 City Allocated Time. During periods of time when an Operational Kiosk is in Passive Mode, City Directed Content shall occupy at least one (1) Spot out of every eight (8) consecutive Spots on such Operational Kiosk (equating to approximately twelve- and one-half percent (12.5%) of the total annual Passive Mode display time).

12.2 Unsold Time. Additionally, if the Company fails to sell Advertisements during any available time on the Operational Kiosks that is not dedicated to the City pursuant to Section 12.1

above (referred to as "Unsold Time"), then in lieu of Advertisements, the Company agrees to arrange for the City Directed Content to be displayed on such Operational Kiosks during such periods of Unsold Time.

12.3 Coordination of Directed Content. Following the first Operational Date to occur, the Company shall designate by written notice to the City a "Content Project Leader" that shall serve as the City's point of contact with the Company with respect to the development and display of City Directed Content, and thereafter, the Content Project Leader shall coordinate quarterly meetings with the City (a) to discuss the development and display of City Directed Content on the Operational Kiosks, and (b) to provide the City with an overview of Passive Mode screen time containing City Directed Content that was displayed on the Operational Kiosks during the immediately preceding quarter. The City shall provide the Company with all City Directed Content that the City desires to run on the Operational Kiosks, in a format compatible with the operating systems utilized by the Company for the Operational Kiosks, at least ten (10) business days prior to the date on which the City wishes to display such content on the Operational Kiosks. City shall promptly and thoroughly provide information requested by, and answer any and all questions from, the Company regarding the development of any City Directed Content. City shall promptly respond to any requests for approval of City Directed Content and shall communicate any objections to such content clearly and in writing.

12.4 Restrictions. The City shall not be permitted to sell any of its time on the Operational Kiosks or display any content during such time other than City Directed Content, or use such time to advertise or promote any party other than the City. Notwithstanding the foregoing, if the City utilizes such time to display City Directed Content advertising or promoting any City programming, exhibitions, events, or similar, in connection with which the City partnered with, or received a material benefit from, a third-party non-profit entity (a "**Non-Profit Partner**"), then the City may include the identification and/or display of the logo or branding of such Non-Profit Partner on City Directed Content displayed on the Operational Kiosks advertising or promoting such City programming, exhibition, event, or similar, so long as the display of such logo or branding is merely incidental to the City Directed Content being displayed and such City Directed Content does not otherwise promote such Non-Profit Partner's products or services. By way of example, if the City desires to promote a "Concert in the Park" event held by the City, and the City partnered with or received a material benefit from "The MusiCares Foundation, a non-profit corporation" for such event, then the City Directed Content displayed on the Operational Kiosks advertising or promoting such "Concert in the Park" event may include the phrase "Concert at the Commons, in partnership with The MusiCares Foundation", "Brought to you by The MusiCares Foundation", or a substantially similar phrase, and/or the logo or branding of The MusiCares Foundation, but shall not include any additional content promoting or otherwise advertising The MusiCares Foundation.

12.5 Local Business Advertising Time. The Company shall donate One Hundred and Fifty Thousand Dollars ($150,000.00) worth of free advertising time on the IKE Kiosks on an annual basis to promote local businesses and non-profit corporations that are headquartered in the City (the "Local Content Program"). The Local Content Program shall be administered by the Company in accordance with selection criteria and program parameters to be established by the mutual agreement of the City and the Company working together in good faith. At the same time as the Company submits its annual Reconciliation Statements (as defined in Exhibit A), the Company shall also provide a report of all content displayed on the IKE Kiosks under the Local Content Program in the preceding Term Year (as defined in Exhibit A below). All local business and non-profit content for display on the IKE Kiosks must be acceptable to the Company, in its reasonable discretion, and must be in a format compatible with the standards mandated by the Company for display on the IKE Kiosks.

13. **Advertising Content**. City shall retain control over the nature and content of the Advertisements displayed on the IKE Kiosks pursuant to the terms and conditions set forth in this Section 13. The Company shall not display Advertisements or any other content on the IKE Kiosks with any content that: (a) is contrary to any law, ordinance, rule or regulation of any applicable Governmental Authority; (b) promotes or advertises adult-related products and services, firearms, tobacco, cannabis, on-line gambling (which, for clarity, does not include any restriction on Advertisements for on-line prediction markets such as Kalshi, which are permitted to the extent allowed under applicable law), smoking, and smoking materials, including electronic smoking or "vaping"; (c) promotes or advertises political campaign speech, political Advertisements or Advertisements or displays designed to promote views of political groups, including promotion or opposition of ballot measures; (d) contains sexual or excretory subject matter; (e) is false, misleading, or deceptive; (f) violates copyrights or trademarks; (g) contains profanity or depictions of violence; (h) condones discrimination based upon race, religion, creed, ethnicity, national origin, age, socio-economic status, disability, gender or sexual orientation; (i) is harmful or disruptive to the public use of public sidewalks; (j) promotes unsafe behavior; (k) is demeaning or disparaging; (l) contains images, content, or copy related to religion or religious ideas or viewpoints; or (m) has images, copy, or concepts that inaccurately state or directly imply the City's endorsement of the subject of the Advertisement. Moreover, the Company shall not display any alcohol Advertisements on any IKE Kiosks located within two hundred and fifty (250) feet of a school, church, or public park. The City does not screen Advertisements submitted to the Company prior to posting on the IKE Kiosks unless specifically requested to do so by Company. However, if the City believes that any content displayed on an IKE Kiosk violates the terms of this Section 13, then the City may deliver written notice thereof to the Company (a "Content Violation Notice"). In such an event, the Company shall remove such content from the IKE Kiosk(s) within twenty-four (24) hours after receipt of the Content Violation Notice. If the Company reasonably and in good faith disputes that the content objected to by the City violates this Section 13, the parties shall promptly work together in good faith to resolve such dispute following the Company's removal of such content from the IKE Kiosk(s). For clarity, the City may not deliver a Content Violation Notice to the Company with respect to any content which has been pre-approved by the City upon request of the Company in accordance with this Section 13.

14. **Data & Privacy.**

14.1 The IKE Kiosks shall not collect or retain the personally identifiable information of its users, except that IKE Kiosks' public WiFi and PhotoBoth features may temporarily collect personally identifiable information from users provided that such users have consented to use of such features.

14.2 The Company shall seek the City's written consent prior to adding any new features to the IKE Kiosks, excluding ordinary course updates or changes to software applications that are consistent with the applications and features set forth on Exhibit B. In the event Company does not comply with this Section 14.2 and fails to remedy such non-compliance in accordance with the notice and cure provisions set forth in Section 19 below, the City may, by written notice to the Company:

14.2.1 Require immediate removal, commenced within forty-eight (48) hours of written notice by the City to the Company, of the violating IKE Kiosk by the Company, at the Company's sole expense, and if the Company fails to timely commence removal and diligently pursue removal to completion, the City shall be entitled to remove the violating IKE Kiosk, and the Company shall

be liable to the City for all reasonable expenses actually incurred by the City in the removal of the violating IKE Kiosk; or

14.2.2 Require immediate shut down of the violating IKE Kiosk if and until such violation is remedied to the City's reasonable satisfaction, in which event, if the Company does not commence to remedy such violation within thirty (30) days and diligently pursue such remedy to completion, the City may request that the violating IKE Kiosk may be removed pursuant to Section 14.2.1 above.

14.3 Subject to Section 14.1 above, the IKE Kiosks may collect and generate usage data, which data is aggregated and anonymized and not capable of being used to personally identify individual users of the IKE Kiosks. The Company may share such aggregated and anonymized data as needed to ensure the efficient operation of the IKE Kiosks, such as in connection with developing new features for the IKE Kiosks or enhancing existing features of the IKE Kiosks.

14.4 A copy of the Company's general Privacy Policy as of the date hereof is attached hereto as Exhibit D. In the event of any conflict between the terms of the Privacy Policy and the terms of this Agreement, the terms of this Agreement shall govern and control as between the City and the Company.

14.5 Use of full functionality of IKE Kiosks, with the exception of any features using QR Code mobile handoff tools, shall not require a personal cellular device.

15. Property Ownership.

15.1 Generally. The City acknowledges that the IKE Kiosks and Software installed by the Company (including any enhancements such IKE Kiosks or Software, regardless of which party generated the enhancements), the IPR, and any other intellectual property rights in and to the IKE Kiosks, their Software, and any of the content created by the Company and displayed on the IKE Kiosks (including City Directed Content), shall belong to the Company and no part thereof shall become or be deemed the property of the City. Each party shall do all such acts and things as the other party may reasonably require for the purpose of preserving or perfecting the foregoing. City shall promptly notify the Company of any infringement or unauthorized use of the IKE Kiosks, the Software, any IPR or any content created for the IKE Kiosks, including City Directed Content, of which it becomes aware and will cooperate fully to take all actions necessary to terminate such infringing or unauthorized use at no cost to the City, provided that in the event that such infringing or unauthorized use is the direct result of the gross negligence or willful misconduct of the City or its agents, the City shall be responsible for the costs necessary to terminate such infringing or unauthorized use. Additionally, the Company acknowledges that all logos, trademarks and other marks of City belong to City and no part thereof shall become or be deemed to be the property of the Company, regardless of whether the same are incorporated into City Directed Content. Company shall promptly notify City of any infringement or unauthorized use of City logos, trademarks and other marks of the City, of which it becomes aware and will cooperate fully to take all actions necessary to terminate such infringing or unauthorized use at no cost to the Company, provided that in the event that such infringing or unauthorized use is the direct result of the gross negligence or willful misconduct of the Company or its agents, the Company shall be responsible for the costs necessary to terminate such infringing or unauthorized use.

15.2 Grant of License. Notwithstanding the foregoing, each party hereby grants to the other party a limited and non-transferable license for the other party to use the logos and trademarks of such party on the other party's owned and controlled social media accounts for the sole purpose

of promoting the IKE Kiosk program in the City. The license granted hereby shall expire simultaneously with the expiration or earlier termination of this Agreement, unless earlier revoked by the granting party. Each party acknowledges and agrees that all logos and trademarks of the other party belong to the other party, and no part thereof shall become or be deemed to be the property of the such party. Each party further agrees that it shall not use the other party's logos or trademarks in a disparaging manner or in any manner which the other party believes, in its reasonable judgment, would reflect negatively on the other party.

16. Insurance.

16.1 Required Insurance. The Company shall obtain and keep in full force and effect, at its sole cost and expense the following:

16.1.1 Commercial General Liability: Insurance Services Office Form CG 00 01 covering commercial general liability insurance ("CGL") on an "occurrence" basis, including products and completed operations, property damage, bodily injury and personal & advertising injury with limits no less than $2,000,000 per occurrence. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location or the general aggregate limit shall be at least $4,000,000.

16.1.2 Automobile Liability: ISO Form Number CA 00 01 covering any auto (Code 1), or if Company has no owned autos, hired, (Code 8) and non-owned autos (Code 9), with limit no less than $1,000,000 per accident for bodily injury and property damage.

16.1.3 Workers' Compensation: as required by the State of California, with statutory limits, and employer's liability insurance with limit of no less than $1,000,000 per accident for bodily injury or disease.

16.1.4 Professional Liability or Errors and Omissions: Errors and Omissions insurance appropriate to the Company's profession ("E&O Insurance"), with limit no less than $1,000,000 per occurrence or claim, $2,000,000 aggregate.

16.1.5 Cyber Liability Insurance - Technology Professional Liability (Errors and Omissions): Insurance appropriate to the Company's profession, with limits not less than $2,000,000 per occurrence or claim, $2,000,000 aggregate. Coverage shall be sufficiently broad to respond to the duties and obligations as is undertaken by Company in this agreement and shall include, but not be limited to, claims involving infringement of intellectual property, including but not limited to infringement of copyright, trademark, trade dress, invasion of privacy violations, information theft, damage to or destruction of electronic information, release of private information, alteration of electronic information, extortion and network security. The policy shall provide coverage for breach response costs as well as regulatory fines and penalties as well as credit monitoring expenses with limits sufficient to respond to these obligations.

16.2 Insurance Endorsement. The insurance policies are to contain, or be endorsed to contain, the following provisions:

16.2.1 Additional Insured Status. The City, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the the Company including materials, parts or equipment furnished in connection with such work or operations. General liability coverage

can be provided in the form of an endorsement to the Company's insurance (at least as broad as ISO Form CG 20 10 11 85 or both CG 20 10 and CG 20 37 forms if later revisions used).

16.2.2 Primary Coverage. For any claims related to this Agreement, the Company's insurance coverage shall be primary insurance as respects the City, its officers, officials, employees, agents, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, agents, or volunteers shall be excess of the Company's insurance and shall not contribute with it.

16.2.3 Notice of Cancellation. Each insurance policy required above shall provide an endorsement that they are not subject to cancellation without thirty (30) days' prior written notice to the City or ten (10) days' prior written notice for non-payment of premium.

16.2.5 Waiver of Subrogation. The Company and the City each hereby release all claims against the other, and shall cause their insurers to waive all rights of subrogation against the other, its officers, directors, employees and agents, from any and all loss, damages or liability covered or required to be covered under any policy of insurance required to be maintained by this Agreement, including deductibles and retentions, notwithstanding that such loss, damages or liability may have arisen from the negligence, tortious act or omission of the released party, or anyone for whom such party may be responsible.

16.2.6 Deductibles and Self-Insured Retentions. Any deductibles or self-insured retentions must be declared to and approved by the City. The City may require the Company to purchase coverage with a lower deductible or retention or provide proof of ability to pay losses and related investigations, claim administration, and defense expenses within the retention.

16.3 Acceptability of Insurers. Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII, unless otherwise acceptable to the City. Such insurers shall be licensed to provide insurance under California state law.

16.4 Claims Made Policies. For the E&O Insurance Policy and any other insurance providing claims-made coverage (e.g., pollution liability insurance, if applicable): (a) the "Retroactive Date" must be shown, and must be before the Effective Date; (b) insurance must be maintained and evidence of insurance must be provided for at least three (3) years after completion of the work required under the Agreement; and (c) if coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a Retroactive Date prior to the Agreement Effective Date, the Company must purchase "extended reporting" coverage for a minimum of three (3) years after completion of work.

16.5 Evidence of Insurance. The Company shall deliver certificates of insurance, and such other evidence of continued insurance coverage in accordance with this Section 16 prior to commencing any Installation Work. Upon request, the Company shall promptly deliver copies of such insurance policies, or certificates of insurance evidencing that the Company is maintaining the insurance coverages required by this Agreement.

17. Indemnification. The Company agrees to indemnify, defend, and render and save City harmless of and from any and all claims, expenses, fines, suits, proceedings, demands, liabilities, losses, damages and causes of action (including copyright and intellectual property infringement claims pertaining to the Advertisements displayed on the IKE Kiosks and third party challenges to the approval of this Agreement (including any related environmental determination under the California Environmental Quality Act)), accidents, injuries or damages to any person or property arising from the installation, operation,

maintenance, removal and occupancy or use of the Locations by the Company, and by any of its agents, servants, employees or contractors, or arising out of the failure of the Company to perform its obligations as set forth in this Agreement in compliance with applicable law, specifically including those set forth in Section 10.2 above. This indemnity shall include, without limitation, indemnity against all expenses and liabilities incurred in connection with any such claim or proceeding brought thereon which shall include all reasonable attorney's fees of City provided that such counsel shall be commensurate in size and expense with respect to the matter at hand.

18. Representations and Warranties of the City. The City represents and warrants to the Company the following:

18.1 Requisite Authority. The City has the requisite power and authority to enter into this Agreement, to perform its obligations under this Agreement and to consummate the transactions contemplated hereby; and no further action on the part of the City is necessary to authorize the execution and delivery by it, and the performance of its obligations under this Agreement. The City is not aware of any action, waiver or consent from any Governmental Authority that is necessary to make this Agreement a valid instrument binding upon the City in accordance with its terms.

18.2 Execution and Delivery. The City has duly executed and delivered this Agreement and this Agreement constitutes the legal, valid and binding obligation of the City, enforceable in accordance with its terms.

18.3 No Violation; Absence of Defaults. Neither the execution and delivery by the City of this Agreement, nor the consummation of the transactions contemplated herein, will violate: (a) any agreement or other instrument to which the City is a party, or result in a breach of, or constitute (with due notice or lapse of time or both) a default under any such agreement or other instrument, or (b) any law, administrative regulation or rule or court order, judgment or decree applicable to the City or by which the City is bound.

19. Default and Remedies.

19.1 Default. It shall be an "Event of Default" under this Agreement if a party fails to comply with any term of this Agreement and such failure is not cured (i) within thirty (30) days after receipt of written notice from the non-breaching party, or (ii) if such failure is of a nature that cannot reasonably be cured within such thirty (30) day period, within such time as is reasonably necessary in which to cure such failure.

19.2 Remedies. If any breach of this Agreement is not cured within the time period set forth in Section 19.1 above, resulting in an Event of Default, then during the continuation of such Event of Default, the non-breaching party shall have the right to terminate this Agreement and/or seek such other rights and remedies as may be available at law or in equity.

20. Surrender. Upon the expiration or earlier termination of this Agreement, the Company shall (a) remove the IKE Kiosks installed by the Company and restore the applicable Location(s) as close as reasonably practical to its original condition, excepting reasonable wear and tear, damage caused by the City, and damage that would have occurred to such Location regardless of the presence of an IKE Kiosk upon such Location, and provided that damage caused by casualty events shall be subject to Section 23 below, and (b) do such work as is reasonably necessary to cap off the utilities serving its Location. This Section 20 shall survive termination or expiration of this Agreement.

21. Confidentiality and Sunshine Laws.

21.1 Agreement. The City and the Company hereby agree not to release or cause or permit to be released to the public in any manner whatsoever, the terms, conditions or substance of this Agreement or the transactions contemplated in this Agreement, without first obtaining the consent of the other party to this Agreement, which may be granted or withheld in the sole discretion of the other party.

21.2 Permitted Disclosures; Exhibit Information and FOI Laws. It is understood that the foregoing shall not preclude any party from discussing the substance or any relevant details of the transactions contemplated in this Agreement on a confidential basis with any of its attorneys, accountants, professional consultants, financial advisors, rating agencies, or potential lenders, as the case may be, or prevent any party to this Agreement from complying with applicable laws, including, without limitation, governmental regulatory, disclosure, tax and reporting requirements. The Company asserts that the information contained in the Exhibits to this Agreement are excepted from disclosure pursuant to any FOI Law. The City shall determine, in its sole discretion, any applicable disclosure exemption, on a case by case basis.

21.3 Relief. In addition to any other remedies available to the City and the Company, the City and the Company shall each have the right to seek equitable relief, including, without limitation, injunctive relief or specific performance, against the other party or its representatives to enforce the provisions of this Section 21.

21.4 CPRA. The parties understand that the City is a governmental entity required to comply with the California Public Records Act (the "Act") when responding to records requests made under the Act. If the City receives a request for information in connection with this Agreement which the Company has marked or identified as, or which this Agreement designates as, being confidential, a trade secret, or proprietary information (including financial information of the Company and financial terms of this Agreement), the City will notify the Company of its receipt of the request and redact any information which the Company has marked or identified as being confidential, a trade secret, or proprietary information (including financial information that the Company and financial terms of this Agreement) prior to disclosing pursuant to the request. Nothing in this agreement shall require the City to institute or participate in any litigation relating to an open records request for information that the Company considers to be confidential. For the avoidance of doubt, nothing in this Agreement shall prevent the City from complying with its obligations under any applicable local, state, or federal public records and disclosure laws, subject to any applicable exemptions or exceptions available under such laws.

21.5 Survival. This Section 21 shall survive the termination or expiration of this Agreement.

22. Force Majeure. Neither party shall be liable to the other for any loss, damage, claim, delay or default arising during suspension of performance due to acts of God (including storm, fire, flood and earthquake), labor disturbances (including strikes, boycotts, lockouts, etc.) war, acts of terrorism, civil commotion, imposition of any future governmental law, ordinance, rule or regulation, any strike or work stoppage, or other cause beyond the control of such party; provided, however, that either party shall only be entitled to rely on this Section 22 to the extent it uses its best efforts to resume performance under this Agreement as soon as reasonably practicable after such occurrence.

23. Casualty. If during the Term all or a material part of any IKE Kiosk is damaged by a casualty event of damage or destruction, the Company shall have the option to terminate this Agreement

with respect to such IKE Kiosk by written notice given to the City promptly after the occurrence of the casualty. All insurance proceeds or other compensation for any such casualty shall belong to the Company.

24. **Notice**. All notices, demands, requests or other communications given under this Agreement shall be in writing and be given by (a) personal delivery, (b) certified mail, return receipt requested, or (c) nationally recognized overnight courier service to the address set forth below or as otherwise designated in writing by the parties. All notices delivered pursuant to the terms of this Section 24 shall be deemed delivered on receipt or refusal of receipt. Either party may change their notice address by delivering written notice to the other party in accordance with this Section 24.

250 East Town Street, Suite 200
Columbus, OH 43215
Attn: Brian T. Kooperman, Esq.

25. **Assignment**. Except as otherwise provided herein, neither this Agreement nor any rights or obligations hereunder may be assigned by either party without the prior consent of the other party, which consent shall not be unreasonably withheld or delayed. Notwithstanding the foregoing, in the event (a) that substantially all operations of the Company are being transferred to (i) another entity by way of merger, consolidation or sale of substantially all of the stock therein or assets thereof, or (ii) any person or entity which, directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with the Company, (b) there is a transfer of outstanding capital stock or other listed equity interests in and to the Company through the "over-the-counter" market or any recognized national or international securities exchange, or (c) this Agreement is assigned in connection with a financing or a securitization transaction to an entity that is an affiliate of the Company, the consent of City shall not be required, provided the acquiring entity, if applicable, shall agree to assume and perform all of the duties, and obligations of the Company hereunder. Moreover, notwithstanding anything contained in this Agreement to the contrary, the consent of City shall not be required for (i) a collateral or conditional assignment of this Agreement to a lender of the Company, or any equipment financing or equipment leasing with respect to, or the granting of a security interest in and to, the IKE Kiosks, (ii) the Company's sale of time on the IKE Kiosks for the display of Advertisements on the IKE Kiosks, or (iii) the Company's delegation of any of its obligations under this Agreement to any subcontractor of the Company in accordance with the terms and conditions set forth in this Agreement.

26. **Binding Effect**. The provisions of this Agreement are binding upon and inure to the benefit of the City and the Company and their heirs, executors, administrators, successors, and assigns.

27. **Entire Agreement**. This Agreement, including all exhibits and addendums, contains the entire agreement between the parties, and no promise, representation, warranty, covenant, agreement, or other undertaking not specifically contained in this Agreement is binding upon or inures to the benefit of the City or the Company.

28. **Construction**. The title headings of this Agreement are intended for convenience purposes only and are not to be used to construe or interpret this Agreement. This Agreement has been negotiated between the parties and, for construction purposes, shall not be deemed the drafting of any one party. When the context in which words are used in this Agreement indicates that such is the intent, words in the singular number shall include the plural and vice versa. All pronouns and any variations thereof shall be deemed to refer to all genders.

29. **No Modifications**. This Agreement shall not be altered, changed, amended or otherwise modified except by a written instrument signed by both the City and the Company.

30. **No Waiver**. The failure of either party to insist, in any one or more instances, upon a strict performance of any provision contained in this Agreement to be performed by any other party to this Agreement shall not be construed or deemed to be a waiver, at such time or for the future, of any such provision, but, instead, any such provision shall continue to remain in full force and effect. No waiver by either party to this Agreement of any provision as contained in this Agreement shall be deemed to have been made unless specifically expressed in writing and signed by the party against whom such waiver is claimed or sought to be enforced.

31. **Authority**. Each party represents and warrants to the other that the individual executing this Agreement on behalf of such party has full authority to execute this Agreement on behalf of such party and to bind such party to this Agreement.

32. **Severability**. If any term, covenant, condition or provision of this Agreement shall to any extent be held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms, covenants, conditions or provisions of this Agreement shall remain in full force and effect.

33. **Survival**. The provisions of this Agreement which are stated to survive termination of this Agreement shall survive termination. If this Agreement is terminated or expires by its terms, such expiration or termination shall not affect any liability or other obligation which shall have accrued prior to such termination.

34. **Applicable Law**. This Agreement, and the rights and obligations of the parties to this Agreement, shall be construed and enforced in accordance with the laws of the state of California.

35. **Counterparts**. This Agreement may be executed in multiple counterparts, which, when taken together, shall constitute a fully-executed agreement. Facsimile, electronically scanned, or other electronically transmitted signatures hereon shall be deemed binding on the parties.

36. **Attorneys' Fees and Costs**. In the event of any claim, controversy or dispute regarding this Agreement, its interpretation or the performance or enforcement of the parties' rights, duties, remedies and obligations under this Agreement, the prevailing party in such claim, controversy or dispute shall be awarded its reasonable attorneys' fees and costs, including its attorneys' fees and costs of any associated appeal.

37. **No Joint Venture, Partnership, Agency**. This Agreement will not be construed as in any way establishing a partnership, joint venture, express or implied agency, or employer employee relationship between the City and the Company.

38. **Employee Related Claims of Company**. In no event shall the City be held liable for any employee-related claims made against the Company by any of its officers, agents, representatives, employees, contractors or subcontractors, and in the event that such a claim is made naming the City as a party, Company shall defend and hold harmless the City, and pay any fees incurred by the City to defend the claim, including, but not limited to, all reasonable attorneys' fees actually incurred by the City.

EXHIBIT A

DEAL TERMS

1. Definitions. As used in this Agreement, the following terms shall have the following meanings:

1.1 "Compensation Commencement Date" means the Operational Date of the first (1st) Operational Kiosk installed in accordance with this Agreement.

1.2 "First Installment Bonus" means Two Hundred Thousand and No/100 Dollars ($200,000.00), subject to increase by three percent (3%) upon each successive anniversary of the Effective Date.

1.3 "Gross Revenue" means the total revenue earned by the Company in connection with the sale of Advertisements on the Operational Kiosks.

1.4 "Kiosk Compensation" means the annual amount due and payable from the Company to the City for each Term Year during the Term, being the greater of: (a) the MAG due and payable from the Company to the City for such Term Year; or (b) the Revenue Share earned by the Company during such Term Year.

1.5 "MAG" means a minimum annual guaranteed payment from the Company to the City for each Operational Kiosk following its Operational Date, which is equal to:

1.5.1 For Term Years One (1), the amount set forth in Section 3.3.1 below per Operational Kiosk (which, for clarity, is a monthly amount instead of an annual amount, as more fully described in Section 3.2 below);

1.5.2 For Term Years Two (2), Eighteen Thousand Three Hundred Thirty-Three and No/100 Dollars ($18,333.00) per Operational Kiosk;

1.5.3 For Term Years Three (3), Twenty Thousand and No/100 Dollars ($20,000.00) per Operational Kiosk;

1.5.4 For Term Years Four (4), Twenty-One Thousand Six Hundred Sixty Six and No/100 Dollars ($21,666.00) per Operational Kiosk;

1.5.5 For each of Term Years Five (5) through Ten (10), Twenty-Five Thousand and No/100 Dollars ($25,000.00) per Operational Kiosk;

1.5.6 For each of Term Years Eleven (11) through Fifteen (15) (if applicable), Twenty-Seven Thousand Five Hundred and No/100 Dollars ($27,500.00) per Operational Kiosk; and

1.5.7 For each of Term Years Sixteen (16) through Twenty (20) (if applicable), Thirty Thousand Two Hundred and Fifty and No/100 Dollars ($30,250.00) per Operational Kiosk.

1.6 "Renewal Criteria" means that, as of the expiration of the Initial Term: (a) no more than three (3) Operating and Reporting Covenant Defaults have occurred pursuant to Section 10.5

above during the Initial Term; (b) no Company Event of Default is then existing and continuing beyond any applicable notice and cure period; and (c) the total Kiosk Compensation due and payable from the Company to the City for the final Term Year of the Initial Term is (or will be, upon the Company's payment of the Revenue Share portion of the Kiosk Compensation to the City following the expiration of such Term Year pursuant to Section 3.4.2 below (if any)) equal to or greater than One Million and No/100 Dollars ($1,000,000.00) (the "Renewal Threshold"), provided that if the Company anticipates that it will not satisfy the Renewal Threshold, then the Company shall have the right, but not the obligation, to elect upon written notice (a "Catch-Up Notice") to the City, no later than thirty (30) days prior to the expiration of the Initial Term, to make a payment to the City in an amount equal to the difference between the Renewal Threshold and the Kiosk Compensation actually due and payable to the City for the final Term Year of the Initial Term (a "Catch-Up Payment"), and in such an event, the Renewal Threshold and this subclause (c) shall be deemed satisfied, and the Company shall pay such Catch-Up Payment to the City alongside its payment of the Revenue Share to the City following the expiration of the final Term Year of the Initial Term pursuant to Section 3.4.2 below;

1.7 "Revenue Share" means: (a) twenty five percent (25%) of the Gross Revenue collected by the Company during the applicable Term Year between Zero and No/100 Dollars ($0.00) and the Revenue Share Threshold for such Term Year, *plus* (b) thirty five percent (35%) of the Gross Revenue collected by the Company during such Term Year above the Revenue Share Threshold for such Term Year.

1.8 "Revenue Share Threshold" means: (a) during each of Term Years One (1) through Five (5), Four Million and No/100 Dollars ($4,000,000.00); (b) during each of Term Years Six (6) through Ten (10), Four Million Four Hundred Thousand and No/100 Dollars ($4,400,000.00); (c) during each of Term Years Eleven (11) through Fifteen (15) (if applicable), Four Million Eight Hundred Forty Thousand and No/100 Dollars ($4,840,000.00); and (d) during each of Term Years Sixteen (16) through Twenty (20) (if applicable), Five Million Three Hundred Twenty Four Thousand and No/100 Dollars ($5,324,000.00).

1.9 "Second Installment Bonus" means Two Hundred Thousand and No/100 Dollars ($200,000.00), subject to increase by three percent (3%) upon each successive anniversary of the Effective Date.

1.10 "Term" means, collectively, the Initial Term and the Renewal Term (if applicable), each as defined in Section 2 below.

1.11 "Term Commencement Date" means the date that is the earlier of: (a) the Operational Date of the fifteenth (15th) Operational Kiosk installed in accordance with this Agreement, or (b) the two (2) year anniversary of the Effective Date of this Agreement.

1.12 "Term Year" means: (a) with respect to the first (1st) Term Year, the time period commencing on the Compensation Commencement Date and expiring on the last day of the twelfth (12th) consecutive full calendar month immediately following the Term Commencement Date, which the parties acknowledge may result in such Term Year being more than twelve (12) calendar months as further addressed in Section 3.2 below; and (b) with respect to each Term Year following the first (1st) Term Year, each successive twelve (12) month period during the Term immediately following the expiration of the first Term Year.

1.13 "Third Installment Bonus" means Two Hundred Fifty Thousand and No/100 Dollars ($250,000.00), subject to increase by three percent (3%) upon each successive anniversary of the Effective Date.

2. Term. All terms, conditions, and requirements of this Agreement, except for the Company's obligation to pay the Kiosk Compensation to the City, shall commence as of the Effective Date, and continue in full force for the remainder of the Term as defined below. The initial term of this Agreement (the "Initial Term") shall be for a period commencing upon the Effective Date and expiring on the last day of the tenth (10th) Term Year. Provided that the Renewal Criteria are satisfied in all material respects as of the expiration of the Initial Term, this Agreement shall automatically renew following the Initial Term on the same terms and conditions set forth in this Agreement for one (1) additional period of ten (10) Term Years (the "Renewal Term") unless the Company delivers written notice to the City at least ninety (90) days prior to the expiration of the Initial Term that the Company does not desire to exercise the Renewal Term, in which case this Agreement shall terminate upon expiration of the Initial Term.

3. Installment Bonuses and Kiosk Compensation.

3.1 Installment Bonuses. Within thirty (30) days following the occurrence of: (a) the Operational Date for the first (1st) Operational Kiosk in the City, the Company shall pay to the City the First Installment Bonus; (b) the Operational Date for the sixteenth (16th) Operational Kiosk in the City, the Company shall pay to the City the Second Installment Bonus; and (c) the Operational Date for the thirty-first (31st) Operational Kiosk in the City (if the parties mutually agree to expand the number of IKE Kiosks permitted to be installed and operated by the Company under this Agreement to more than thirty (30)), the Company shall pay to the City the Third Installment Bonus.

3.2 Kiosk Compensation; Acknowledgement. During each Term Year, the Company shall pay the Kiosk Compensation to the City in accordance with this Section 3 below. The parties acknowledge and agree that as the result of the Company's timeline for obtaining the Required Approvals, the first Term Year may contain more than twelve (12) full calendar months. Accordingly, the terms and conditions set forth in Section 3.3 below shall govern the Company's obligation to pay the Kiosk Compensation to the City during the first Term Year, and the terms and conditions set forth in Section 3.4 below shall govern the Company's obligation to pay the Kiosk Compensation to the City for each Term Year following the first Term Year.

3.3 Kiosk Compensation - First Term Year.

3.3.1 First Term Year MAG. Subject to the terms and conditions set forth in this Agreement, commencing separately for each Operational Kiosk upon its Operational Date, and continuing separately for each such Operational Kiosk on the first day of each month during the first Term Year following such Operational Kiosk's Operational Date, the Company shall pay the MAG to the City for such Operational Kiosk in monthly installments equal to One Thousand Three Hundred Eighty Eight and 92/100 Dollars ($1,388.92) per month, in advance, without demand. In the event that an IKE Kiosk becomes an Operational Kiosk during the first Term Year on any day other than the first day of a particular month, the monthly installment of the MAG due and payable to the City for such Operational Kiosk for such month shall be pro-rated on a per diem basis based on the number of days within such month that such IKE Kiosk was an Operational Kiosk.

3.3.2 First Term Year Revenue Share and Reconciliations. Commencing on the date which is fifteen (15) days after the last day of the third calendar month following the month in which the Compensation Commencement Date occurs, and continuing on the same day following the expiration of each successive three (3) month period thereafter during the first Term Year, the Company shall submit to the City a statement of the Company's Gross Revenue for the immediately preceding three (3) month period (each, a "Y1 Quarterly Reconciliation Statement"). If such statement shows that the Revenue Share earned by the Company during such period exceeds the MAG due and payable to the City for such period, the Company shall pay such excess to the City alongside such statement. The final Y1 Quarterly Reconciliation Statement delivered to the City (a) may pertain to a time period of less than three (3) full months (depending on the expiration date of the first Term Year), and (b) shall include a statement of the total Gross Revenue earned by the Company during the entire first Term Year and the Company's calculation of the total Kiosk Compensation due and payable to the City for the entire first Term Year. Such final Y1 Quarterly Reconciliation Statement, and any corresponding payment of Kiosk Compensation due to the City alongside such statement, shall be due to the City within sixty (60) days of the expiration of the first Term Year.

3.4 Kiosk Compensation – Generally (Following First Term Year).

3.4.1 MAG Generally. Subject to the terms and conditions set forth in this Agreement, commencing on the first day of the second Term Year and continuing on the first day of each month during the Term thereafter, the Company shall pay the MAG for each Operational Kiosk to the City in equal monthly installments, in advance, without demand. In the event that an IKE Kiosk becomes an Operational Kiosk following the expiration of the first Term Year on any day other than the first day of a particular month, the monthly installment of the MAG due and payable to the City for such Operational Kiosk for such month shall be pro-rated on a per diem basis based on the number of days within such month that such IKE Kiosk was an Operational Kiosk, and the MAG due and payable for such Operational Kiosk shall be interpreted accordingly.

3.4.2 Revenue Share and Reconciliations Generally. Commencing on the date which is fifteen (15) days after the last day of the third calendar month of the second Term Year, and continuing on the same day following the expiration of each successive three (3) month period thereafter during the Term, the Company shall submit to the City a statement of the Company's Gross Revenue for the immediately preceding three (3) month period (each, a "Quarterly Reconciliation Statement"). If such statement shows that the Revenue Share earned by the Company during such period exceeds the MAG due and payable to the City for such period, the Company shall pay such excess to the City alongside such statement. The final Quarterly Reconciliation Statement delivered to the City for each Term Year shall include a statement of the total Gross Revenue earned by the Company during the entirety of such Term Year and the Company's calculation of the total Kiosk Compensation due and payable to the City for the entirety of such Term Year, and shall, alongside any corresponding payment of Kiosk Compensation due to the City alongside such statement, be due to the City within sixty (60) days after the expiration of such Term Year.

3.5 Impairment of Use and Abatement. The MAG due and payable for an Operational Kiosk shall be automatically abated on a day for day basis commencing twenty-four (24) hours following the occurrence of any of the following events and continuing until the date on which such event has been remedied to the reasonable satisfaction of the Company: (a) the visibility of such

IKE Kiosk, or the Company's use thereof or utility services thereto, are materially and adversely impaired for any reason other than the Company's gross negligence or willful misconduct, including without limitation as the result of any Temporary Removal Event or Relocation Event (each as defined in Section 4 below); (b) an event of damage or destruction to such IKE Kiosk or its Location that is not the result of the Company's gross negligence or willful misconduct; (c) any portion of the Location upon which such IKE Kiosk is located is taken by eminent domain as the result of the action of any Governmental Authority other than the City; (d) the Required Approvals for an IKE Kiosk are revoked, or reapplications for or renewals of such Required Approvals are not approved, in each case for any reason other than the Company's gross negligence or willful misconduct, and the Company is no longer permitted to display Advertisements on such IKE Kiosk as a result; or (e) the City's breach of the Exclusivity Covenant, the Kiosk Impairment Covenant, or the Kiosk Actions Covenant. For clarity, any abatement pursuant to this Section 3.5: (i) shall not apply unless and until the applicable abatement event extends for twenty-four (24) consecutive hours or more; (ii) shall apply only to the MAG for the Operational Kiosk(s) impacted by such abatement event, resulting in prorated reduction of such MAG for such Operational Kiosk(s) on a day for day basis during the continuation of such abatement event; and (iii) shall not abrogate the Company's obligation to pay the Kiosk Compensation for any Operational Kiosks not impacted by such abatement event, or the Company's obligation to pay the Revenue Share for the Operational Kiosk(s) impacted by such abatement event in accordance with Sections 3.3. and 3.4 above (as applicable) to the extent that the Company continues receiving Gross Revenue from such impacted Operational Kiosk(s) during such abatement event.

3.6 Audit Rights.

3.6.1 Generally. Subject to the terms and conditions set forth in this Section 3.6, the City may, at City's cost, request an audit (an "Audit") of any Company books and records reasonably related to the IKE Kiosks deployed on Locations within the City (the "Records") for the sole purpose of evaluating the Company's compliance with the terms and conditions of the Agreement. The Company agrees to keep and to make available to the City or its auditor, within thirty (30) days of receipt of a written request from the City, full, true, and accurate Records supporting the calculation of the Kiosk Compensation for a particular Term Year, in the same format maintained by the Company in the ordinary course of its business, so long as the City requests such Records for such Term Year within the thirty-six (36) month period immediately following the expiration of such Term Year. Any Audit performed under this Section 3.6 shall be performed by a third-party certified public accountant licensed in the state of California (an "Auditor") of the City's selection, provided that such Auditor shall not be compensated on a contingency fee basis. The City may not Audit a Term Year more than one time. The parties shall reasonably cooperate with one another in connection with any Audit performed under this Section 3.6.

3.6.2 Overpayment. If an Audit determines that the Kiosk Compensation actually paid to the City during a given period was less than the Kiosk Compensation actually due and payable to the City for such period, the Company shall pay such shortfall to the City within thirty (30) days after the City's delivery of written notice to the Company, which shall include reasonable supporting documentation, and if such shortfall is an amount equal to five percent (5%) or more of the total Kiosk Compensation actually due and payable to the City for such period, the Company shall pay the cost of such Audit alongside such shortfall payment.

3.6.3 Underpayment. Alternatively, if an Audit determines that the Kiosk Compensation actually paid to the City during a given period was greater than the Kiosk

Compensation actually due and payable to the City for such period, the Company shall receive a credit against the next payments of the MAG due and owing until the Company has been reimbursed in full for such overpayment, provided that if the same occurs during the final Term Year then the City shall refund the amount of such overpayment to the Company within thirty (30) days after the date the City receives the results of such Audit in lieu of providing the foregoing credit against the MAG.

3.6.4 Disputes. If, following the completion of any Audit, the City or the Company reasonably and in good faith disputes the results of such Audit by written notice to the other party within thirty (30) days of the date that the City notifies the Company of the results of such Audit, then the parties shall thereafter work together in good faith to resolve such dispute as soon as reasonably practical in accordance with the terms and conditions set forth in this Agreement, and if such resolution results in the parties' mutual agreement that an overpayment or underpayment was discovered by such Audit, then the parties shall promptly reconcile pursuant to Section 3.6.2 or Section 3.6.3 above, as applicable. If the parties are unable to resolve the dispute, then subject to Section 19 of this Agreement, either party may exercise any rights applicable under local, state, or federal laws. Either party's attempt to resolve a dispute shall not constitute a waiver of the full disputed amount.

3.6.5 Confidentiality. Any information disclosed to the City as the result of such an Audit shall be held in confidence by the City and shall not be disseminated further except (i) on an as needed basis to the City's employees, accountants, advisors, auditors, attorneys, and other parties with a reasonable need to know such information, provided that such party is advised of the confidentiality restrictions applicable to such information and agree to abide by the same, or (ii) in compliance with a subpoena or other legal process, provided that in such an event the City shall notify the Company prior to making such disclosure and work together with the Company in good faith to limit or redact such disclosure to the extent permitted by applicable law.

4. Temporary Removal and/or Relocation. At any time following the Operational Date for an Operational Kiosk, the City may, subject to the terms and conditions set forth in this Section 4 below, require the Company to (a) temporarily remove such Operational Kiosk from its Location and reinstall such Operational Kiosk at such Location at a later date (a "Temporary Removal Event") as the result of: (i) an emergency or a public safety issue, or (ii) the City requiring use of such Operational Kiosk's Location and/or the immediately adjacent areas to carry out core functions of the City such as streetscape improvements, infrastructure improvements, or similar, or (b) permanently remove such Operational Kiosk from its location and thereafter reinstall such Operational Kiosk at a new mutually agreed Location (a "Relocation Event") as the result of (i) an emergency or a public safety issue, or (ii) the City requiring use of such Operational Kiosk's Location and/or the immediately adjacent areas to carry out core functions of the City such as streetscape improvements, infrastructure improvements, or similar; provided that the City may only require up to two (2) Temporary Removal Events under subclause (a)(ii), and up to two (2) Relocation Events under subclause (b)(ii), per twelve (12) month period,

4.1 Temporary Removal Events. With respect to Temporary Removal Events, promptly following the date on which the City becomes aware of the existence or anticipated existence of a Temporary Removal Event, the City shall deliver written notice to the Company (a "Temporary Removal Notice"), which shall describe in reasonable detail when the Company may reinstall the impacted Operational Kiosk at its original location following the Temporary Removal Event. Thereafter, the City shall deliver written notice to the Company at least forty-five (45) days prior to the date on which the City anticipates that the work associated with such Temporary

Removal Event will be completed. Upon completion of the Temporary Removal Event, the City shall again deliver written notice to the Company, and following its receipt of such notice, the Company shall commence commercially reasonable efforts to reinstall such IKE Kiosk at its original Location and thereafter diligently pursue the same to completion.

4.2 Relocation Events. With respect to Relocation Events, promptly following the date on which the City determines that a Relocation Event is necessary, the City shall deliver written notice (a "Relocation Notice") to the Company, which shall include a reasonably detailed description of the nature of the Relocation Event. Following the Company's receipt of a Relocation Notice, the City and the Company shall use commercially reasonable efforts to work together in good faith to mutually agree upon a new alternative Location for the impacted IKE Kiosk to be reinstalled by the Company (a "New Location") following the removal of such IKE Kiosk from its original Location, and the City shall not (i) unreasonably withhold, condition, or delay its consent to any such location proposed by the Company, nor (ii) be permitted to deny its consent to any Location previously approved by the City in accordance with Section 4 of the body of this Agreement above. Upon the parties' mutual agreement on a New Location, the Company shall commence commercially reasonable efforts to remove the impacted IKE Kiosk and restore its original Location in accordance with Section 20 of this Agreement, and shall thereafter diligently pursue such removal and restoration to completion. Upon the Company's receipt of any additional Required Approvals necessary to complete the reinstallation of, and for the continued operation of, the impacted IKE Kiosk at the New Location, if any, the Company shall commence commercially reasonable efforts to reinstall such IKE Kiosk at the New Location and shall thereafter diligently pursue such reinstallation to completion.

4.3 City Covenant. The City agrees that it shall not permit any person or entity other than the Company to repair, alter, remove, or replace any Operational Kiosk, except that the City or its designee may temporarily remove an Operational Kiosk from its Location in the event that (i) the Company fails to comply with its obligations pursuant to Section 4.1 or Section 4.2 of this Exhibit A above, or (ii) a Bona Fide Emergency (as defined below) occurs. As used in this Agreement, "Bona Fide Emergency" means situations where (1) the immediate removal of an Operational Kiosk is reasonably required by the City as the result of (x) an imminent danger to the public, (y) a major casualty event (e.g., an electrical fire) caused by reasons beyond the control of either party to this Agreement, or (z) the occurrence of an act of God (e.g., a flood, lightning strike, etc.); and (2) it would be impractical for the City to provide the Company with notice of the need for such removal and the opportunity to complete such removal without creating or exacerbating an imminent danger to the public. Upon the occurrence of a Bona Fide Emergency, the City may remove the impacted Operational Kiosk and take any actions deemed reasonably necessary by the City to remedy such Bona Fide Emergency. In such an event, the City shall not be liable to the Company for any damage to the impacted Operational Kiosk or its Location, except to the extent caused by the City's gross negligence or willful misconduct. Following the conclusion of the Bona Fide Emergency, the City shall work together in good faith with the Company to either permit the Company to reinstall the impacted IKE Kiosk at its original Location, or mutually agree upon a reasonably suitable alternative location for such IKE Kiosk to be re-installed by the Company in accordance with the terms of Section 4.2 of this Exhibit A.

EXHIBIT B

IKE KIOSK SERVICES AND APPLICATIONS

The IKE Kiosks may display the following applications:

(i) *Wayfinding*, including multimodal mapping to destinations, businesses and other points of interest (sorted into freestanding apps such as *Eat, Play, Shop, Stay*);

(ii) *Getting Around,* including real-time arrival and departure information for public transit, bike share and car share services all accessed from an interactive map;

(iii) *Question of the Week,* allowing for the City to survey the public on its opinions and ideas;

(iv) *Events,* including a comprehensive event and activity listing for the City;

(v) *Jobs*, including career and internship postings within the City, arranged geographically to encourage workforce development;

(vi) *Photobooth,* including customized City-themed background postcards and social media integration*;*

(vii) *Emergency Communication,* including a protocol for real-time posting of essential City communication such as storm warnings, amber alerts and road closures;

(viii) *Pedestrian Counting,* including RFID-based measurement of pedestrians within range of the IKE unit, and a web-based dashboard containing analytics for City's use;

(ix) *Air Quality Monitoring,* including relaying data to the City on a regular basis; and

(x) *Arcade,* including video games employing the unique touch-screen capabilities of the IKE Kiosks.

PRIVACY POLICY

INTRODUCTION

IKE SMART CITY, LLC ("IKE", "We", "Us", "Our") respects your privacy and is committed to protecting it through our compliance with this policy.

This policy describes the types of information we may collect from you or that you may provide when you visit an IKE Kiosk ("Kiosk") and our practices for collecting, using, maintaining, protecting, and disclosing that information.

Please read this policy carefully to understand our policies and practices regarding your information, how we will treat it, and your rights pertaining to your information. If you do not agree with our policies and practices, your choice is not to use the Kiosks. By accessing or using a Kiosk, you agree to this privacy policy. This policy may change from time to time. Your continued use of a Kiosk after we make changes is deemed to be acceptance of those changes, so please check the policy periodically for updates.

USER INFORMATION COLLECTED BY A KIOSK

General

Many of the features, services and information available on a Kiosk can be accessed by you anonymously and without requiring that you provide any information about yourself. The Kiosk will collect information on Kiosk usage, such as which features, services and information are most often used and how they are used, so we can improve the Kiosk platform and your experience with the Kiosks. We may share this information without restriction with the city where the Kiosk is located and its agencies and our technology partners.

Interactive Features

Certain applications offered by a Kiosk are interactive and equipped to allow information to be transmitted from the Kiosk to your personal device. This transmission can be accomplished through two different mechanisms, one of which involves a third party partner ("Third Party Partner") to effect the transmission of the information. If you would like information transmitted to your personal device from the Kiosk, the Kiosk will prompt you to either (1) scan a QR code with your mobile device or (2) provide a mobile telephone number. If you select the QR Code option, the QR code will anonymously link your mobile device to the selected information without obtaining any personal information from you. If you elect to provide your mobile telephone number, your mobile telephone number will be shared with the Third Party Partner for the purpose of delivering the information to your mobile device via MMS messaging. We retain your mobile telephone number for only so long as is necessary to complete the transfer of information to the Third Party Partner, and we do not sell or otherwise share or disclose this information to any other parties. Additionally, our Third Party Partner for this functionality—Twilio—does not retain or sell your phone number.

Several IKE applications incorporate the application programming interfaces ("APIs") of Third Party Partners for the following described features on the Kiosks: (a) Google is the Third Party Partner for the place search and directions features of the Kiosks, and (b) Transit is the Third Party Partner for the trip planner feature of the Kiosks. In no event do these applications request or collect personally

identifiable information from you, other than if you request to have the information transmitted to your mobile device by using our mobile hand-off feature as described above.

We do not exercise control over our Third Party Partners, and you will be subject to their policies and terms and conditions when you engage with any feature operated by a Third-Party Partner. For this reason, we recommend that you review their policies and terms and conditions prior to engaging with any feature operated by a Third Party Partner.

OTHER SERVICES

WIFI Service

Each Kiosk may be equipped to provide Wi-Fi service to personal devices able to receive a wireless Wi-Fi signal that are located within close proximity to the Kiosk. We currently engage T-Mobile as the internet service provider for the Kiosks, which enables us to provide the Wi-Fi service to you. If you use the free Wi-Fi, your personal device may share your device ID with our internet service provider for the sole purpose of establishing the connection to the Wi-Fi signal. This is no different from how publicly available Wi-Fi signals operate in other contexts. The device ID may also be available to us through our router hardware for a limited period of time before being removed from the hardware in the ordinary course. We do not store your browser history or track the websites you visit.

DISCLOSURE OF INFORMATION

In addition to the disclosures we have identified elsewhere in this policy, we may also disclose any and all information collected by us or that you provide to us via a Kiosk as described in this policy to our parents, subsidiaries and affiliates, and/or any entity who acquires, by any means, some or all of the assets or ownership interests of IKE Smart City, LLC.

DATA SECURITY

We have implemented measures designed to secure any information you provide to us via a Kiosk from accidental loss and from unauthorized access, use, alteration and disclosure. Although we do our best to protect your information, we cannot guarantee the security of the information you provide to us via a Kiosk.

CHILDREN

The Kiosks are not intended to be used by children under the age of 13 nor do we knowingly or intentionally collect personal information from children under the age of 13. If you are under the age of 13, you are not permitted to submit any personally identifiable information to us. We adhere to the Children's Online Privacy Protection Act in our operation of the Kiosks.

PRIVACY POLICY CHANGES

We may update this Privacy Policy from time to time to reflect changes in applicable law. Because any personal information you provide to us is not stored or maintained in databases owned or created by us, we will be unable to notify you as and when this Privacy Policy is updated. Therefore, we encourage you to visit this Privacy Policy page periodically to view any updates.

EXHIBIT E

SITING CRITERIA FOR IKE KIOSKS AND DIGITAL BUS SHELTERS (BUFFER ZONES)

1. Definitions
    a. Priority Sites: locations with existing or planned BRT stops, active bus shelters, high ridership stops without shelters, or another IKE Kiosk.
    b. Secondary Site: locations with non-high ridership stops or inactive bus shelters.
    c. Downstream: direction relative to the direction of traffic flow for the adjacent lane.
    d. Corner: the intersection of the corresponding sidewalks of two separate block faces.
    e. Digital bus shelter: Bus shelters with digital ad panels that are integrated to a bus shelter structure.
2. General Rules

The parties acknowledge and agree that independent of this Agreement, the City retains the right to install and operate bus shelters that will display digital Advertisements within the Public Right of Way (PROW) (each, a "Digital Bus Shelter", and collectively, the "Digital Bus Shelters"). Notwithstanding Section 3.X above, and pursuant to Section 4 below, both parties agree that:

    a. IKE Kiosks shall only be permitted and installed on Arterials, Secondary Arterials, Downtown Collectors per Burbank2035 General Plan.
    b. IKE Kiosks shall be located 150' away from low density residential areas or schools where kiosks are in direct line of sight between these uses and IKE Kiosk(s). Distance may decrease to no less than 100' upon agreement between both parties.
    c. Distances shall be measured from the nearest edge of the IKE Kiosk panel to the nearest parcel boundary or bus stop asset (i.e., bus shelter roof for stops with bus shelters or bus stop flagpole for all bus stops without bus shelters).
    d. These general rules and siting conditions shall not apply to electronic ink displays installed at any bus stop Citywide and that are not used to display commercial content.
    e. A Secondary Site shall remain as such during the Term of this Agreement unless the following siting conditions are met, in which case, it shall be considered a Primary Site.

2. Siting Condition
    a. Priority Sites
        i. Not on the same block face, except when:
        ii. Proposed IKE Kiosk is 175' from priority site,
        iii. Downstream from priority site, and
        iv. Demonstrated line of sight is not an issue
    a. Not directly around the Corner from another priority site-
    b. Distance may decrease to no less than 100' upon mutual agreement
    c. The requirement that an IKE Kiosk be located downstream of a transit asset may be waived solely upon mutual written agreement of the Parties, provided that any such waiver receives prior written approval from the City following a site-specific safety and line-of-sight review.
    e. Secondary Site
        i. Not on the same block face, except when:
            1. 150' from secondary site
            2. Demonstrated line of sight is not an issue
    f. Distance may decrease to no less than 100' upon mutual agreement]

EXHIBIT F

CITY INSTALLATION CRITERIA

1. IKE Kiosks shall be located a minimum of five (5) feet from trees, light poles, traffic signal poles, manholes, junction boxes, electrical boxes, driveway aprons, and similar existing City infrastructure; provided, that IKE Kiosks may be located with three (3) feet clearance from traffic signal poles, manholes, junction boxes and electrical boxes to the extent Company can demonstrate that such proximity will not encroach upon or impact such City infrastructure and will maintain Americans with Disabilities Act access to the interactive features of the Kiosk.

2. IKE Kiosks shall have a minimum of eighteen (18) inches of clearance from curb faces and forty-eight (48) inches of clearance on the sidewalk for pedestrian access to comply with the Americans with Disabilities Act.

3. IKE Kiosks shall not obstruct line of sight for drivers on City roads.

4. IKE Kiosks shall not be placed over curb catch basins.

5. IKE Kiosks shall not conflict with underground utilities.

6. IKE Kiosks will not create conditions which are materially distracting to drivers (e.g., will not display content confusingly similar to traffic control signals).

COMPENSATION SCENARIOS

These scenarios illustrate how the proposed MAG and advertising revenue-sharing terms would determine the City's compensation under different levels advertising revenue. Under the proposed agreement, the City receives the greater of the total annual MAG for operational kiosks or its calculated share of gross advertising revenue, plus any applicable installation milestone payments.

Scenario 1: ***Term Year 2 – 5 Operational Kiosks***

- **Annual MAG per Kiosk: $18,833 (Total Annual MAG: $91,665)**
- **Revenue Sharing Threshold: $4,000,000 (25% up to $4 million; 35% above $4 million)**

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$91,665 (MAG)
$100,000	$25,000 (25%)	$91,665 (MAG)
$500,000	$125,000 (25%)	$125,000 (Revenue Share)
$1,000,000	$250,000 (25%)	$250,000 (Revenue Share)
$2,000,000	$500,000 (25%)	$500,000 (Revenue Share)
$4,000,000 (Threshold)	$1,000,000 (25%)	$1,000,000 (Revenue Share)
$5,000,000	$1,350,000 (25% on first $4m; 35% above $4m)	$1,350,000 (Revenue Share)

Note: The City would also receive a $200,000 one-time milestone payment upon the installation of the 1st kiosk.

Scenario 2: ***Term Year 3 – 10 Operational Kiosks***

- **Annual MAG per Kiosk: $20,000 (Total Annual MAG: $200,000)**
- **Revenue Sharing Threshold: $4,000,000 (25% up to $4 million; 35% above $4 million)**

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$200,000 (MAG)
$100,000	$25,000 (25%)	$200,000 (MAG)
$500,000	$125,000 (25%)	$200,000 (MAG)
$1,000,000	$250,000 (25%)	$250,000 (Revenue Share)

$2,000,000	$500,000 (25%)	$500,000 (Revenue Share)
$4,000,000 (Threshold)	$1,000,000 (25%)	$1,000,000 (Revenue Share)
$5,000,000	$1,350,000 (25% on first $4m; 35% above $4m)	$1,350,000 (Revenue Share)

Scenario 3: ***Term Year 10 – 20 Operational Kiosks***

- **Annual MAG per Kiosk: $25,000 (Total Annual MAG: $500,000)**
- **Revenue Sharing Threshold: $4,400,000 (25% up to $4.4 million; 35% above $4.4 million**

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$500,000 (MAG)
$100,000	$25,000 (25%)	$500,000 (MAG)
$500,000	$125,000 (25%)	$500,000 (MAG)
$1,000,000	$250,000 (25%)	$500,000 (MAG)
$2,000,000	$500,000 (25%)	$500,000 (MAG/Revenue Share Equal)
$4,400,000 (Threshold)	$1,100,000 (25%)	$1,100,000 (Revenue Share)
$5,000,000	$1,310,000 (25% on first $4.4m; 35% above $4.4)	$1,310,000 (Revenue Share)

Note: The City would also receive a $200,000 one-time milestone payment upon the installation of the 16th kiosk.

Scenario 4: ***Term Year 15 – 30 Operational Kiosks***

- **Annual MAG per Kiosk: $27,500 (Total Annual MAG: $825,000)**
- **Revenue Sharing Threshold: $4,840,000 (25% up to $4.84 million; 35% above $4.84 million**

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$825,000 (MAG)
$100,000	$25,000 (25%)	$825,000 (MAG)
$500,000	$125,000 (25%)	$825,000 (MAG)
$1,000,000	$250,000 (25%)	$825,000 (MAG)
$2,000,000	$500,000 (25%)	$825,000 (MAG)

$3,300,000	$825,000 (25%)	$825,000 (MAG/Revenue Share Equal)
$4,840,000 (Threshold)	$1,210,000 (25%)	$1,210,000 (Revenue Share)
$5,000,000	$1,266,000 (25% on first $4.84m; 35% above $4.84)	$1,266,000 (Revenue Share)

The City's annual compensation depends on both the number of operational kiosks and advertising performance. First, the MAG establishes a guaranteed minimum level of annual compensation that increases as additional kiosks become operational and as the agreement progresses over time. Second, the City participates in advertising revenue-sharing compensation when the revenue sharing exceeds the applicable total MAG. As the number of operational kiosks increases, higher advertising revenue is required before the revenue sharing payments exceed the MAG compensation.

Scenario Assumptions: All kiosks shown are operational for a full 12-month period. No MAG proration is applied. All advertising revenue amounts are hypothetical and do not represent forecasts or anticipated performance.

Interactive Wayfinding Kiosk Agreement

CITY MANAGER'S OFFICE

November 17, 2026

City Council Meeting

Timeline: Council Direction to Proposed Agreement

July 15, 2025 — 1

First-step report; Council requested pilot feasibility, code amendments, procurement options and outreach

2 — **December 9, 2025**

Study session; Council supported moving forward; enabling ordinance introduced, 5–0

December 16, 2025 — 3

Ordinance No. 25-4035 adopted; became effective January 16, 2026

4 — **January – Present**

Approximately 15 negotiation meetings and internal review

March 3, 2026 — 5

Community meeting with live kiosk demonstration

6 — **November 17, 2026**

Agreement terms presented for Council consideration

CITY OF BURBANK
CITY MANAGER'S OFFICE

Community Engagement

- **Community meeting:** Held March 3, 2026, with the City's collaboration at the Los Angeles Marriott Burbank Airport Convention Center, from 6:00–7:30 p.m.
- **Community outreach:** Announced at a City Council meeting and promoted through the City's event calendar and social media.
- **Kiosk demonstration:** Attendees explored wayfinding and information about local businesses and nonprofit organizations.
- **Program features:** IKE shared emergency messaging capabilities, security features, and privacy protections.
- **Community input:** Attendees asked IKE representatives questions, raised concerns, and provided feedback on the proposed program.

CITY OF BURBANK
CITY MANAGER'S OFFICE

Program Features

Mobility

TRANSIT

Identifies real-time public transit routes and times

DIRECTIONS

Point-to-point directions for city wayfinding

Discovery

EAT + DRINK

Plenty of options to satisfy different culinary cravings

EVENTS

The what, when, and where of city happenings

SHOP

Entices shoppers to spend at local retail/ businesses

ACTIVITIES

Highlights things to do across a range of interests

ARTS + CULTURE

Cultural/creative activities, venues, and destinations

PARKS + BEACHES

Places to enjoy fresh air, the outdoors, and green spaces

STAY

A wide variety of overnight accommodations

MINDFULNESS

Directs to nearby spas, gyms, and places for wellness

CONCERTS + MUSIC

Hub of information for local concerts and live music

Social Equity

SOCIAL SERVICES

Access to support services/resources for residents in need

SAFE SHELTER

Homeless shelters and facilities with beds and services

JOB BOARD

Easy access to local job listings and opportunities

CIVIC RESOURCES

List of city services and resources

SURVEY SAYS

Gather input from residents and visitors

Entertainment

PHOTOBOOTH

Take selfies, add filters, and send to a mobile device

ARCADE

Fun and easy-to-use video games to engage pedestrians

CITY OF BURBANK

CITY MANAGER'S OFFICE

Customizable City Content

CITY POSTER APPS

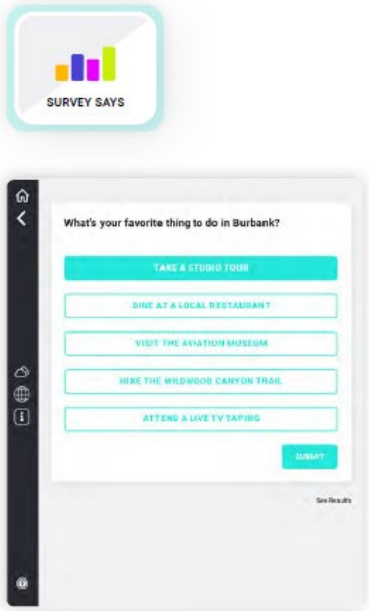
Cities are given dedicated and highly visible Poster apps to display custom messaging on IKE's home screen.

CITY EVENTS

The Events app integrates with any calendar of a city's choosing to promote local events.

CUSTOMIZABLE QUESTIONS

Survey Says allows a city to solicit feedback from the public. Results are available in a secure online dashboard.



CITY-BRANDED SELFIES

City partners are given exclusive rights to branded frames in filter options of the Photo Booth app.

CITY OF BURBANK
CITY MANAGER'S OFFICE

Vendor Funded Program

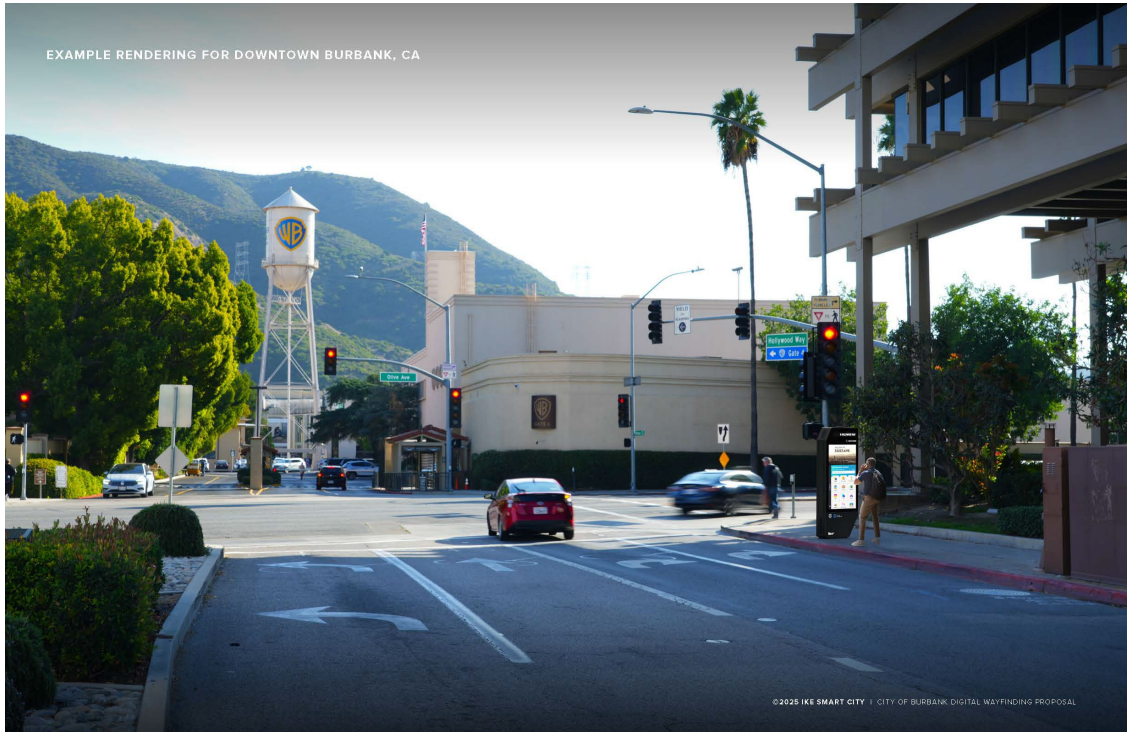
Vendor would be responsible for all costs associated with the program including:

Permits	Maintenance
Installation	Repairs
Utilities	Replacement
Operations	

CITY OF BURBANK
CITY MANAGER'S OFFICE

Program Oversight

Program oversight, including implementation, cross-departmental coordination, and serving as the primary liaison to IKE, businesses, and the community, will be managed through the City Manager's Office via the Business Development Concierge position.



CITY OF BURBANK
CITY MANAGER'S OFFICE

Core Agreement: Community Benefits and Safeguards

Community Advertising

$150,000/year in no-cost advertising for eligible Burbank businesses and nonprofits

City Messaging

At least **1 of every 8** passive-mode display spots, plus available unsold display time

Oversight of Advertising Content

Advertising subject to City standards; City may issue content-violation notices requiring removal within 24 hours.

Emergency Management

Emergency messaging and IPAWS integration support

Maintenance

Weekday visits; electronic monitoring 7 days/week; response within 24 hours to damage/malfunction notices

Protections and Privacy

Prohibits the collection or retention of personally identifiable information, except for temporary, user-consented features.

City Control Over Kiosk Locations

Aimed at protecting residential sightlines and preventing excessive advertising through placement restrictions and minimum spacing requirements.

Accessibility

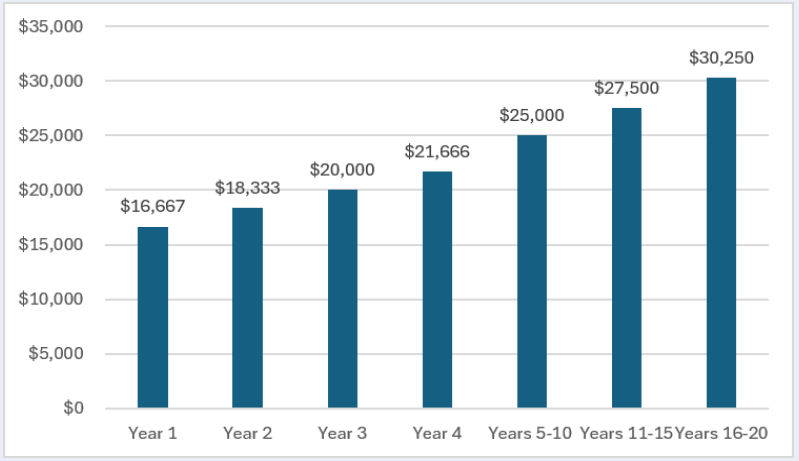
ADA and web-accessibility requirements

Annual City Compensation

Annual operating compensation = Greater of MAG or Revenue Share; milestone payments are additional.

Greater of MAG or Revenue Share

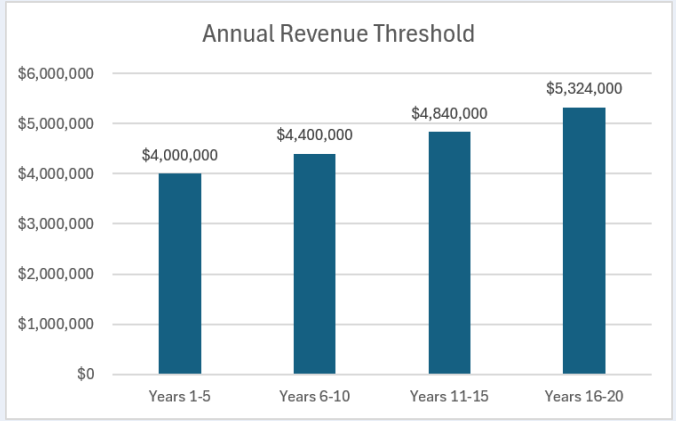
Minimum Annual Guarantee (MAG) per Kiosk



Revenue Share

25% of gross advertising revenue up to $4M annual threshold

35% of gross revenue above threshold



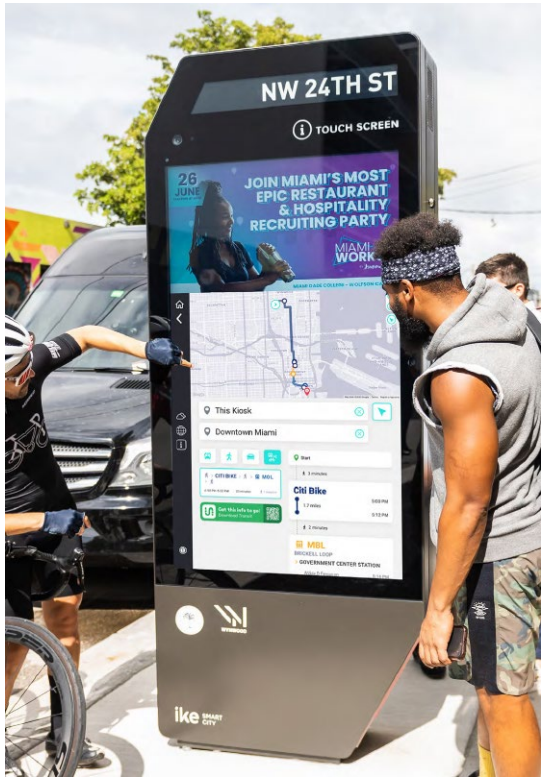
Threshold increases in subsequent five-year periods

Milestone Payments

- **$200,000** — 1st operational kiosk
- **$200,000** — 16th kiosk
- **$250,000** — 31st kiosk (requires City approval to expand beyond 30)

Agreement Terms for Council's Consideration

Section	Summary
Minimum # of Required Kiosks	30-kiosk commitment vs. 15 w/ City-option for expansion
Automatic Agreement Renewal	Auto-renew if criteria met vs. mutual written agreement
Catch-Up Payment	IKE option vs. City approval required
Prediction-Market Ads	Permit vs. Prohibit
Overall Compensation Package	While more favorable to many other municipalities, less favorable than regional benchmark city's agreement



Consideration 1: Minimum # of Required Kiosks

Ref: Attachment 1, Section 3.1

	Position
IKE	Requires 30-kiosk deployment, in two phases of 15.
Staff Preference	Initial commitment of 15; additional 15 upon further City approval.

Consideration 2: Automatic Agreement Renewal

Ref: Attachment 1, Exhibit A

	Position
IKE	Automatic 10-year renewal after initial 10-year term if performance criteria met; IKE has express opt-out right (not City).
Staff Preference	Mutual written agreement required for renewal after the initial 10-year term.

Consideration 3:
Catch-Up Payment and Automatic Renewal

Ref: Attachment 1, Exhibit A

	Position
IKE	Allows IKE the option to make a supplemental payment to satisfy the $1 million final term year compensation threshold (other renewal criteria still apply).
Staff Preference	Supplemental payment option requires City approval.

Consideration 4: Prediction Market Advertising

Ref: Attachment 1, Section 13

	Position
IKE	Lawful prediction-market advertising permitted, although online gambling is not.
Staff Preference	Prohibit prediction-market advertising

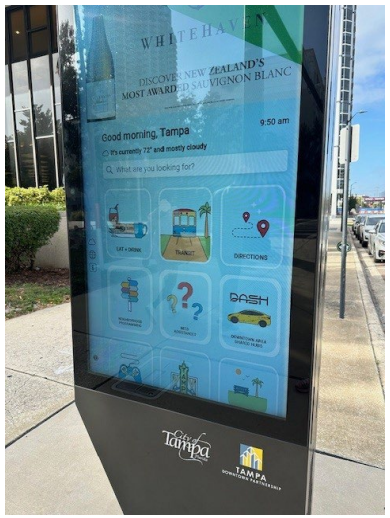
Consideration 5: Overall Financial Compensation Terms

Ref: Attachment 1, Exhibit A

	Position
IKE	Terms offered compare favorably with many of its other municipal agreements.
Staff Preference	Higher compensation (MAG, revenue sharing %, installation payments, and community benefits) in alignment with regional benchmark city's agreement.

Overall Potential Fiscal Impact

- **No direct costs to the City for kiosk installation, utilities, operation, maintenance, repairs, or replacement.**
- **Minimum guaranteed payments or advertising revenue sharing, whichever is greater.**
- **Estimate (floor) $14.5 million over the potential 20-year term period.**
- **IKE projects $23 million in total City compensation over the potential 20-year tern period.**
- **$150,000 annually in complimentary advertising for eligible local businesses and nonprofits.**



CITY OF BURBANK
CITY MANAGER'S OFFICE

Requested Council Action and Next Steps

City Council Considerations

1 Approve

Approve the proposed agreement as presented

2 Approve with Modifications

Approve with modifications agreed upon at this meeting

3 Continue Negotiations

Direct further negotiation and return for later consideration

If Approved

- Authorize City Manager/designee to execute final agreement and subsequent amendments
- Authorize Financial Services Director/designee to appropriate agreement revenues, including future fiscal years

Following Approval

- Collaborative site review and City approval
- Public education and engagement
- Implementation

Questions

Appendix

<u>Scenario 1:</u> Term Year 2 – 5 Operational Kiosks
Annual MAG per Kiosk: $18,833 (Total Annual MAG: $91,665)
Revenue Sharing Threshold: $4,000,000 (25% up to $4 million; 35% above $4 million)
Note: The City would also receive a $200,000 one-time milestone payment upon the installation of the 1st kiosk.

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$91,665 (MAG)
$100,000	$25,000 (25%)	$91,665 (MAG)
$500,000	$125,000 (25%)	$125,000 (Revenue Share)
$1,000,000	$250,000 (25%)	$250,000 (Revenue Share)
$2,000,000	$500,000 (25%)	$500,000 (Revenue Share)
$4,000,000 (Threshold)	$1,000,000 (25%)	$1,000,000 (Revenue Share)
$5,000,000	$1,350,000 (25% on first $4m; 35% above $4m)	$1,350,000 (Revenue Share)

<u>Scenario 2:</u> ***Term Year 3 – 10 Operational Kiosks***
Annual MAG per Kiosk: $20,000 (Total Annual MAG: $200,000)
Revenue Sharing Threshold: $4,000,000 (25% up to $4 million; 35% above $4 million)

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$200,000 (MAG)
$100,000	$25,000 (25%)	$200,000 (MAG)
$500,000	$125,000 (25%)	$200,000 (MAG)
$1,000,000	$250,000 (25%)	$250,000 (Revenue Share)
$2,000,000	$500,000 (25%)	$500,000 (Revenue Share)
$4,000,000 (Threshold)	$1,000,000 (25%)	$1,000,000 (Revenue Share)
$5,000,000	$1,350,000 (25% on first $4m; 35% above $4m)	$1,350,000 (Revenue Share)

<u>Scenario 3:</u> Term Year 10 – 20 Operational Kiosks
Annual MAG per Kiosk: $25,000 (Total Annual MAG: $500,000)
Revenue Sharing Threshold: $4,400,000 (25% up to $4.4 million; 35% above $4.4 million
Note: The City would also receive a $200,000 one-time milestone payment upon the installation of the 16th kiosk.

Gross Advertising Revenue	Calculated Revenue Share	Total Paid to City
$0	$0 (25%)	$500,000 (MAG)
$100,000	$25,000 (25%)	$500,000 (MAG)
$500,000	$125,000 (25%)	$500,000 (MAG)
$1,000,000	$250,000 (25%)	$500,000 (MAG)
$2,000,000	$500,000 (25%)	$500,000 (MAG/Revenue Share Equal)
$4,400,000 (Threshold)	$1,100,000 (25%)	$1,100,000 (Revenue Share)
$5,000,000	$1,310,000 (25% on first $4.4m; 35% above $4.4)	$1,310,000 (Revenue Share)

Table 1 – Comparison of Proposed Burbank and Culver City Financial Terms			
Term	**Burbank**	**Culver City**	**Considerations**
Minimum Annual Guarantee (MAG)	$16,667-$30,250 annually per kiosk, depending on term year	$50,000-$66,550 annually per kiosk, depending on term year	Higher MAGs provide greater guaranteed revenue to the City, regardless of advertising performance
Revenue Share	25% of gross revenue up to $4 million; 35% of gross revenue above $4 million threshold	50% of net revenue	Staff successfully negotiated gross rather than net revenue sharing, but a higher % of gross will maximize the City's return
Installation Payments	$200,000 1st kiosk; $200,000 16th kiosk; $250,000 31st kiosk	$500,000 1st kiosk installment; $500,000 15th kiosk installment	Higher upfront payments provide more immediate financial benefits to the City; and Agreement authorizes 30 kiosks; in order to receive the $250,000 additional kiosks would have to be added
Local Business & Nonprofit Program	$150,000 annually	$500,000 annually	Greater funding would expand opportunities to support local businesses and nonprofit organizations
