This is a business meeting of the School Board and the public expects that we conduct it in an orderly, efficient, effective and dignified manner. We request that speakers keep this in mind when making your comments. We also request that the audience keep that in mind and not demonstrate approval or disapproval of what a speaker has said by clapping or booing. The Board appreciates the public's input and will listen attentively, consider each comment, and usually will not respond, enter into debate, or answer questions during comments on agenda items or during the public comments section.

Legislative Update:

SDMC Discussion of Implementation

May 10, 2022

2021 HB 241 *Previous* Parental Bill of Rights

Florida House Bill 241, creates the Parents' Bill of Rights in Chapter 1014, *Florida Statutes*, under the Florida K-20 Education Code. The bill prohibits the state, its political subdivision, any other governmental entity or any other institution from infringing upon the fundamental right of a parent to direct the upbringing, education, healthcare and mental health of his or her minor child. The bill enumerates similar rights of students and parents found in Section 1002.20 – Students and Parental Rights. Specifically, the bill establishes parental consent requirements for, among other things, the collection of certain identifying information for a minor child. Also, the bill requires parental notification when a state actor suspects a child is the victim of a criminal offense but provides exceptions, including when a suspected offense has been reported to law enforcement or the Florida Department of Children and Families (DCF).

With regard to healthcare, unless otherwise permitted by law, a healthcare practitioner or his or her employees must obtain parental consent before performing healthcare services on a minor child, including prescribing medicinal drugs. Further, healthcare practitioners and facilities may be subject to disciplinary action for violation of these parental consent requirements in certain instances. Therefore, unless the law permits a practitioner or facility to provide care to the individual without parental consent – for example, when the minor may legally consent to receive the healthcare services or in the case of certain emergencies – the bill requires parental consent to be obtained prior to medical services being rendered to the minor.
