APPENDIX C – ASSESSMENT ROLL

The assessment roll is a listing of the assessment for Fiscal Year 2026/27 apportioned to each lot or parcel, as shown on the last equalized roll of the Assessor of the County.

Based on County Assessor's secured roll data, current assessor's parcels, including corrected and/or new assessor's parcels, will be submitted and/or resubmitted to the County Auditor/Controller. The annual assessment amount to be levied and collected for the resubmitted parcel(s) shall be determined in accordance with the method of apportionment and assessment rate approved in this Annual Report. Therefore, if a single assessor's parcel has a status change in development, other land use change, or subdivides into multiple assessor's parcels, the assessment amounts applied to each of the new assessor's parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment amount.

The assessment roll for Fiscal Year 2026/27 is listed on the following pages.

APPENDIX A – FISCAL YEAR 2026/27 ANNUAL BUDGETS ..... A

APPENDIX B – ASSESSMENT DIAGRAMS ..... B

APPENDIX C – ASSESSMENT ROLL C

1. ASSESSMENT SUMMARY

In 2019, the City of Eastvale (the "City") purchased a portion of the streetlights located within the boundaries of the City. In January of 2022, the Lighting Maintenance Districts that were previously under the jurisdiction of the Jurupa Community Services District (the "Jurupa CSD") but within the City boundaries were transferred to the City as provided for under the Landscaping and Lighting Act of 1972 (the "1972 Act") and in accordance with the joint Resolution No. 3200 of the Jurupa CSD and the City Council of the City.

On March 25, 2026, the City Council of the City, under the 1972 Act adopted its Resolution No. 26-08, a Resolution Initiating Proceedings for the Annual Levy and Collection of Assessments and Ordering the Preparation of an Annual Report for the Lighting Maintenance Districts and the specified Zones within, (the "Districts") for Fiscal Year 2026/27. The following page includes a complete listing of the Districts.

The Resolution Initiating Proceedings directed NBS to prepare and file an Annual Report for Fiscal Year 2026/27 pursuant to the requirements of the 1972 Act. This Annual Report presents the plans and specifications describing the general nature, location, and extent of the improvements to be maintained, an estimate of the costs of the maintenance, operations, and servicing of the improvements for the Districts for the referenced fiscal year, diagrams for the Districts, showing the area and properties proposed to be assessed, and an assessment of the estimated costs of the maintenance, operations, and servicing the improvements, assessing the net amount upon all assessable lots and/or parcels in the Districts in proportion to the special benefit received.

2. INTRODUCTION

2.1 Reason for Assessment

Approval of the assessment covered by this Annual Report will generate the revenue necessary to provide for the maintenance, operation, and servicing of the improvements described in this Annual Report.

Maintenance may include, but is not limited to, the following: repair, acquisition, and replacement of streetlight poles and fixtures and of the energy charges, operation, maintenance, and administrative costs of the local and major streets street lighting within the Districts

Servicing means the furnishing of: electric current or energy, gas, or other illuminating agent for any lighting facilities or for the lighting or operation of any other improvements.

Incidental expenses includes all of the following: the costs of preparation of the report, including plans, specifications, estimates, diagram, and assessment; the costs of printing, advertising, and the giving of published, posted, and mailed notices; compensation payable to the County of Riverside (the "County") for collection of assessments; compensation of any engineer or attorney employed to render services in proceedings pursuant to the 1972 Act; any other expenses incidental to the operation, maintenance, and servicing of the improvements; costs associated with any proceedings held for the approval of a new or increased assessment. Incidental expenses also include costs related to project management as well as costs of the City related to the administration of the Districts including legal fees, accounting, finance, and insurance costs.

2.2 Process for Annual Assessment

The City cannot levy and collect annual assessments in the Districts without complying with the procedures specified in the 1972 Act. On an annual basis, a report must be prepared which contains plans and specifications for the improvements, an estimate of the costs of operation, maintenance, and servicing the improvements, a diagram for the assessment districts, the proposed assessments upon assessable lots and parcels of land within the Districts, and an assessment of the estimated costs of improvements.

The City Council must also adopt a Resolution of Intention which:

- Declares the intention of the City Council to levy and collect assessments within the assessment districts for the fiscal year stated therein.
- Generally describes the existing and proposed improvements and any substantial changes proposed to be made in existing improvements.
- Refers to the assessment district by its distinctive designation and indicates the general location of the district.
- Refers to the annual report, on file with the clerk, for a full and detailed description of the improvements, the boundaries of the assessment district and any zones therein, and the proposed assessments upon assessable lots and parcels of land within the districts.
- Gives notice of the time and place for public hearing by the City Council on the levy of the proposed assessments.
- States whether the assessments are proposed to increase from the previous year.

2.3 Same or Lesser Assessment

If the assessments are to be levied in the same or lesser amounts than the maximum assessment amount approved, the City Clerk shall give notice by causing the Resolution of Intention to be published. Any interested person may, prior to the conclusion of the public hearing, file a written protest which shall state all grounds of objection. The protest shall contain a description sufficient to identify the property owned by the property owner filing the protest. During the course or upon conclusion of the hearing, the City Council may order changes in any of the matters provided in the report, including changes in the improvements, any zones within the assessment districts, and the proposed diagram or the proposed assessments.

The City Council, upon conclusion of the public hearing, must then adopt a resolution confirming the diagrams and assessments, either as originally proposed or as changed by it. The adoption of the resolution shall constitute the levy of an assessment for the fiscal year referred to in the report.

2.4 Fiscal Year 2026/27 Assessment

The Fiscal Year 2026/27 assessments described in this Annual Report for the Districts are not proposed to exceed the previously approved maximum assessment range formula that was approved at the time the Districts were formed. No land is proposed to be annexed to the Districts. There are no proposed new improvements or any substantial changes in existing improvements.

The net amount to be assessed in the Districts upon the assessable lots or parcels, as shown on the latest equalized roll at the County Assessor's Office, is shown on the Assessment Roll in Appendix C of this report.

3. PLANS AND SPECIFICATIONS

Generally, the work to be performed consists of the maintenance, repair, acquisition, and replacement of streetlight poles and fixtures and of the energy charges, operation, maintenance, and administrative costs of the local and major streets streetlighting within the Districts. The Boundary Maps of the Districts are located in Appendix B of this report.

3.1 Description of Improvements

The Districts improvements consist of streetlights within each District and Zone thereof. The Streetlight Maps are on file with the City and are made part of this report to the same extent as if attached hereto.

3.2 Map of Improvements

The existing streetlight improvements as shown in the Streetlight Maps were purchased in March 2019 from Southern California Edison (SCE), except for a few streetlights that were not available for purchase. The Streetlight Maps are on file with the City and are made part of this report to the same extent as if attached hereto.

4. ESTIMATE OF COSTS

4.1 Annual Budget

The estimated costs of administration, maintenance, operations, and servicing of the improvements, as described in the Plans and Specifications for the Districts, are summarized in Appendix A. The City has paid in full for the acquisition of the City's streetlights and has therefore removed the cost of the scheduled annual payments previously assessed to the Districts.

4.2 Operating Reserve

It is the intent of the City to maintain an Operating Reserve which shall not exceed the estimated costs of maintenance and servicing of the improvements prior to December 10 of the fiscal year, or when the City expects to receive its apportionment of special assessments and tax collections from the County, whichever is later. The reserve balance information is provided in Appendix A.

4.3 Annual Assessment Increase

The maximum allowable assessment per Assessable Benefit Unit for each District listed in the annual budget, is the amount which was approved at the time of formation of the Districts, with the allowable annual increase over the maximum assessment for the previous year.

Each year, prior to the assessments being placed on the tax roll, the City will review the cost estimate and determine the amount needed to maintain the improvements for the upcoming fiscal year. The actual assessment per Assessable Benefit Unit for each District will be based on the estimated costs, available fund balance and maximum allowable assessment with the goal of maintaining the improvements in a satisfactory and operational condition. The actual assessment amount may be equal to or lower than the maximum allowable assessment; however, it may not exceed the maximum unless the increase is approved by the property owners in accordance with Proposition 218.

The following inflation formulas apply to maximum allowable assessments within the Districts.

4.3.1 ILLUMINATION DISTRICT NO. 2

The assessments for Illumination District No. 2 Subareas 35, 42, 46, 49, and 55 do not include an annual inflation formula.

4.3.2 LIGHTING MAINTENANCE DISTRICT NO. 98-2

Original Area, Annexation Area 1, and Annexation Area 3

The assessments for Lighting Maintenance District No. 98-2 will be levied on an annual basis for a duration of 30 years. Commencing with the 1999-2000 annual assessments, the maximum annual assessment per Assessable Benefit Unit will be adjusted by the cumulative percentage increase, if any, in the Consumer Price Index for All Urban Consumers (CPI-U) for the Los Angeles-Anaheim-Riverside Standard Metropolitan Statistical Area ("Index") published by the Bureau of Labor Statistics of the United States Department of Labor. The annual maximum assessment per Assessable Benefit Unit for each District shall be adjusted every year based upon the cumulative increase, if any, in the Index as it stands on December of each year

over the base Index of December 1997; provided, however, that the amount of assessment for each UOB in any fiscal year shall not be increased by more than four (4) percent from that of the previous fiscal year.

In January 2018, the Bureau of Labor Statistics (BLS) updated their geographic areas for computing CPI. Previously, the Los Angeles-Riverside-Orange County index was made up of Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. The BLS split this index into two areas; one that represents Los Angeles and Orange counties (Los Angeles-Long Beach-Anaheim) and another that represents Riverside and San Bernardino counties (Riverside-San Bernardino-Ontario). Beginning with the 2018/19 calculation, the City began using the Riverside-San Bernardino-Ontario CPI as of March for the purposes of computing annual changes in the assessment rates for the Districts.

Annexation Area 2, Annexation Area 4, and Annexation Area 6

Annexation Areas 2, 4, and 6 received favorable majority votes pursuant to Proposition 218 ballot proceedings conducted in July of 2001. The assessments will be levied on an annual basis for as long as the services are rendered and the amount of the assessment to be levied on each such parcel in each subsequent fiscal year shall be increased by the percentage increase, if any, in the cost of electric power which the Districts will pay to Southern California Edison Company, or any successor thereto, for the electric power for the operation and maintenance of the streetlights for each such fiscal year, so that the total amount of the assessments on all such lots and parcels will not be less than the District's costs, including the cost of electric power, for the operation and maintenance of streetlights in each such fiscal year. For Fiscal Year 2026/27, the annual increase in the Maximum Assessment Rate for each District was calculated based upon the average increase in LS-2 rates 22w LED lamps and 84w LED lamps over the prior Fiscal Year.

4.3.3 LIGHTING MAINTENANCE DISTRICT NOS. 2001-1, 2001-2, AND 2001-3

The assessments will be levied on an annual basis for as long as the services are rendered and the amount of the assessment to be levied on each such parcel in each subsequent fiscal year shall be increased by the percentage increase, if any, in the cost of electric power which the Districts will pay to Southern California Edison Company, or any successor thereto, for the electric power for the operation and maintenance of the streetlights for each such fiscal year, so that the total amount of the assessments on all such lots and parcels will not be less than the District's costs, including the cost of electric power, for the operation and maintenance of streetlights in each such fiscal year. For Fiscal Year 2026/27, the annual increase in the Maximum Assessment Rate for each District was calculated based upon the average increase in LS-2 rates 22w LED lamps and 84w LED lamps over the prior Fiscal Year.

5. METHOD OF ASSESSMENT

The total amount of maintenance, servicing, and incidental costs for maintaining and operating the Improvements is assessed to the individual parcels of real property in the Districts in proportion to the special benefit received by such parcels of real property. The proposed individual assessments are shown on the assessment roll in Appendix C of this report.

5.1 Legal Considerations

5.1.1 PROPOSITION 218

Proposition 218, the "Right to Vote on Taxes Act" was approved by California voters in 1996, which added Articles XIIIC and XIIID to the California State Constitution. The primary results of Proposition 218 were stricter definitions of assessments, special taxes, fees, and charges, and a general mandate for some type of voter approval for any new or increased tax, assessment, or property-related fee. The Proposition 218 Omnibus Implementation Act (the "Implementation Act") was approved July 1, 1997. The Implementation Act provided for procedures throughout the notice, protest and hearing process. It should be noted that this report has been prepared to be consistent with current practices and the California State Constitution.

Article XIII D, Section 4(a) of the California Constitution limits the amount of any assessment to the proportional special benefit conferred on the property. Article XIII D also provides that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

The net amount to be assessed may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels. Proposition 218 requires the Engineer to separate general benefit from special benefit, where only special benefit is assessed.

5.1.2 1972 ACT

Pursuant to the 1972 Act and Article XIII D, all parcels that have a special benefit conferred upon them as a result of the maintenance and operation of improvements and services shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire costs of the maintenance and operation of improvements. The 1972 Act, permits the establishment of assessment districts for the purpose of providing certain improvements which include the operation, maintenance and servicing of landscaping improvements.

Section 22573 of the 1972 Act requires that maintenance assessments must be levied according to benefit rather than according to assessed value. This Section states:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefit to be received by each such lot or parcel from the improvements."*
>
> *The determination of whether or not a lot or parcel will benefit from the improvements shall be made pursuant to the Improvement Act of 1911 (Division 7 (commencing with*

Section 5000) [of the Streets and Highways Code, State of California])."

The 1972 Act also permits the designation of zones of benefit within any individual assessment district if "by reasons or variations in the nature, location, and extent of the improvements, the various areas will receive different degrees of benefit from the improvement" (Sec. 22547).

5.2 Special Benefit

Pursuant to Article XIII D of the California Constitution, Section 2(i), “Special benefit means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute special benefit.”

All parcels that have special benefit conferred upon them as a result of the services and activities provided shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire cost of the services and activities.

In accordance with Article XIII D Section 4(a) “No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and an agency shall separate the general benefits from the special benefits conferred on a parcel.”

The maintenance and servicing of the Districts’ improvements (described in the Plans and Specifications Section of this report) are for the benefit of the properties in the Districts, and as such confer special benefit to parcels in the Districts, respectively. According to the formation or annexation reports prepared for the Districts, the special benefits that streetlight improvements provide are: increased property protection, personal safety, visibility, traffic safety, and directly enhances the appearance of those lots or parcels fronting illuminated streets. Additional special benefits provided by the higher intensity lights include both traffic and pedestrian safety and will discourage illegal activity at night compared to non-illuminated streets.

The above-mentioned items affect the assessed property in a way that is particular and distinct from their effect on other parcels and that real property in general and the public at large do not share. They contribute to a specific enhancement of the properties in the Districts. Since these improvements were installed and are maintained specifically for the properties in the Districts, only properties in the Districts receive a special benefit and are assessed for said maintenance.

5.3 Method of Assessment Spread

Each parcel in the Districts is deemed to receive special benefit from the improvements. Each parcel that has a special benefit conferred upon it as a result of the maintenance and operation of improvements are identified and the proportionate special benefit derived by each identified parcel is determined in relationship to the entire costs of the maintenance and operation of the improvements. Within each of the Districts, an Assessable Benefit Unit is given to each residential lot and 3.7 units per acre for each commercial parcel.

6. APPENDICES

The following Appendices contain Appendix A –Fiscal Year 2026/27 Annual Budgets, Appendix B – Assessment Diagrams, and Appendix C – Assessment Roll

APPENDIX C – ASSESSMENT ROLL

Assessor's parcel identification, for each lot or parcel within the Districts, shall be based on the County Assessor's secured roll data for the applicable year in which this Report is prepared and is incorporated herein by reference.

A listing of Assessor's parcels assessed within the Districts for Fiscal Year 2026/27, along with the assessment amounts, is on file in the office of the City Clerk and incorporated herein by reference. Based on County Assessor's secured roll data, current assessor's parcels, including corrected and/or new assessor's parcels, will be submitted and/or resubmitted to the County Auditor/Controller. The annual assessment amount to be levied and collected for the resubmitted parcel(s) shall be determined in accordance with the method of apportionment and assessment rate approved in this Report. Therefore, if a single assessor's parcel has a status change in development, other land use change, or subdivides into multiple assessor's parcels, the assessment amounts applied to each of the new assessor's parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment amount.

Non-assessable lots or parcels include areas of public streets and other roadways (typically not assigned an APN by the County), dedicated public easements, open space areas and rights-of-way including public greenbelts and parkways, utility rights-of-way, common areas, landlocked parcels, small parcels vacated by the County, bifurcated lots and any other property that cannot be developed or has specific development restrictions. These types of parcels are considered to receive little or no benefit from the improvements and are therefore, exempted from assessment.

APPENDIX B – ASSESSMENT ROLL ..... B

1. ASSESSMENT SUMMARY

On March 25, 2026, the City Council of the City of Eastvale (the "City"), under the Benefit Assessment Act of 1982 (the "1982 Act") adopted its Resolution No. 26-07, a Resolution Initiating Proceedings for the Annual Levy and Collection of Assessments and Ordering the Preparation of an Annual Report for Benefit Assessment District No. 2014-2 (the "District") (Tracts 32821 & 32821-1) for Fiscal Year 2026/27.

The Resolution Initiating Proceedings directed NBS to prepare and file an Annual Report for Fiscal Year 2026/27 pursuant to the requirements of the 1982 Act. The Annual Report presents the plans and specifications for the maintenance and operation of authorized services, an estimate of the costs of the maintenance and operation of the authorized services, an assessment diagram, and an assessment of the estimated costs of the maintenance and operation of the authorized services for the referenced fiscal year, assessing the net amount upon all assessable lots and/or parcels in the District in proportion to the special benefit received.

The following assessment is proposed to be authorized in order to pay the estimated costs of administration, maintenance, operation, and servicing of the improvements to be paid by the assessable real property in the District in proportion to the special benefit received. The following table summarizes the proposed assessment for the District.

Benefit Assessment District 2014-2

	Fiscal Year 2026/27
Maintenance, Operation, and Servicing Costs	$8,080.00
Incidental Expenses	3,988.70
Other Costs/Contributions	(6,566.70)
Total Net Amount to be Assessed	**$5,502.00**
Total Number of Benefit Points to be Assessed	1,750
Actual Assessment per Benefit Point (1)	**$3.14**
Maximum Allowable Assessment per Benefit	$3.57

(1) The unrounded assessment per benefit point is $3.14497.

2. INTRODUCTION

2.1 Reason for Assessment

Approval of the assessment covered by this Annual Report will generate the revenue necessary to provide for the maintenance and servicing of the improvements described in this Annual Report.

2.2 Process for Annual Assessment

On an annual basis, a report is prepared which contains a description of the services proposed to be financed, a description of each lot or parcel subject to the assessment, the amount of the proposed assessment for each parcel, and the basis and schedule of assessment.

2.3 Same or Lesser Assessment

If the assessments are to be levied in the same or lesser amounts than the maximum assessment amount approved, the City Clerk will give notice by causing the Resolution of Intention to be published. Any interested person may, prior to the conclusion of the public hearing, file a written protest which shall state all grounds of objection. The protest will contain a description sufficient to identify the property owned by the property owner filing the protest. During the course of, or upon conclusion of the hearing, the City Council may order changes in any of the matters provided in the report, including changes in the improvements, any zones within the District, and the proposed diagram for the proposed assessment.

2.4 Fiscal Year 2026/27 Assessment

The Fiscal Year 2026/27 assessments described in this Annual Report are not proposed to exceed the previously approved maximum assessment range formula that was approved at the time the District was formed. No land is proposed to be annexed to the District. There are no proposed new improvements or any substantial changes in existing improvements.

The net amount to be assessed in the District upon all assessable lots or parcels, as shown on the latest equalized roll at the County of Riverside (the "County") Assessor's Office, is shown on the Assessment Roll in Appendix B of this report.

3. PLANS AND SPECIFICATIONS

The District provides funding for the administration, maintenance, operation, and servicing of various improvements located in District.

3.1 Description of Improvements

The traffic signal to be operated and maintained is at the following location:

- Limonite Avenue & Scholar Way

The fossil filters to be managed and maintained are at the following locations:

- Seven along Scholar Way between Limonite Avenue and Primrose Road
- One on 58th Street west of Scholar Way

4. ESTIMATE OF COSTS

The estimated costs of administration, maintenance, operation, and servicing the improvements, as described in the Plans and Specifications for the District, are summarized below:

4.1 Benefit Assessment District 2014-2

4.1.1 ANNUAL BUDGET

The estimated costs associated with the District are shown below:

BAD 2014-2 Costs	Estimated 2026/27 Costs
Maintenance, Operation and Servicing Costs	
Traffic Signal	$6,080.00
Fossil Filters	2,000.00
Subtotal Maintenance, Operation and Servicing Costs	**$8,080.00**
Incidental Expenses	
Annual Administration (City)	$840.00
Annual Administration (Consultant)	2,935.47
County Collection Fees	213.23
Subtotal Incidental Expenses	**$3,988.70**
Total BAD 2014-2 Costs	**$12,068.70**
General Benefit Contribution	($6,565.00)
Operating Reserve Contribution	0.00
Operating Reserve Collection	0.00
Contribution From Other Sources	0.00
Rounding	(1.70)
Total Costs to be Assessed	**$5,502.00**
Total Net BAD 2014-2 Assessment [(1)]	**$5,502.00**
Total BAD 2014-2 Benefit Points to be Assessed	1,750
Actual Assessment per Benefit Point – Fiscal Year 2026/27 [(2)]	**$3.14**
Maximum Allowable Assessment per Benefit Point – Fiscal Year 2026/27	**$3.57**

(1) Actual assessments may be rounded to the nearest even cent in accordance with the requirements of the County for placement on the tax rolls.

(2) The unrounded assessment per benefit point is $3.14497.

4.1.2 OPERATING RESERVE

It is the intent of the City to maintain an Operating Reserve which shall not exceed the estimated costs of maintenance and servicing of the improvements prior to December 10 of the fiscal year, or when the City expects to receive its apportionment of special assessments and tax collections from the County, whichever is later. The reserve balance information for the District is as follows:

Estimated Fiscal Year Ending 6/30/25 Operating Reserve Cash	$21,992.44
Estimated Operating Expenses – Fiscal Year 2026/27	0.00
Estimated Operating Collection – Fiscal Year 2026/27	0.00
Estimated Fiscal Year Ending 6/30/26 Operating Reserve Cash	**$21,992.44**

The estimated Fiscal Year ending 6/30/26 Operating Reserve Cash balance is estimated based on the available cash balance, less actual expenses to date, and less estimated expenses through the end of the Fiscal Year.

4.1.3 ANNUAL ASSESSMENT INCREASE

The maximum allowable assessment per Benefit Point listed in the annual budget is the amount which was approved at the time of formation of the District, with the allowable annual increase over the maximum assessment for the previous year. The allowable annual increase is defined as: "the greater of two percent (2.0%) or the percentage increase, if any, in the Consumer Price Index for all Urban Consumers ("CPI-U") for the Los Angeles-Riverside-Orange County California Standard Metropolitan Statistical area ("Index") published by the Bureau of Labor Statistics of the United States Department of Labor. The annual CPI-U adjustment will be based on the increase, if any, in the Index as it stands on March of each year over the base Index for March of 2015." Previously, the Los Angeles-Riverside-Orange County index was made up of Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. The BLS split this index into two areas; one that represents Los Angeles and Orange counties (Los Angeles-Long Beach-Anaheim) and another that represents Riverside and San Bernardino counties (Riverside-San Bernardino-Ontario). Beginning with the 2018/19 calculation, the City began using the Riverside-San Bernardino-Ontario CPI as of March for the purposes of computing annual changes in the assessment rates for the District.

Each year, prior to the assessments being placed on the tax roll, the City will review the cost estimate and determine the amount needed to maintain the improvements for the upcoming fiscal year. The actual assessment per Benefit Point will be based on the estimated costs, available fund balance, and maximum allowable assessment with the goal of maintaining the improvements in a satisfactory and operational condition. The actual assessment amount may be equal to or lower than the maximum allowable assessment; however, it may not exceed the maximum unless the increase is approved by the property owners in accordance with Proposition 218.

4.2 Definition of Budget Items

The following definitions describe the costs and expenses included in the cost estimate for the District:

4.2.1 MAINTENANCE, OPERATION AND SERVICING COSTS

Energy Costs for Streetlights: This item includes the cost of energy provided by the electric utility provider.

Fossil Filters: This item includes the cost of cleaning and furnishing services and materials for the ordinary and usual maintenance, operation, and servicing of the fossil filters and appurtenances, including repair, replacement, removal of trimmings, rubbish, debris, and other solid waste.

Field Inspection/Management: This item includes the cost of inspecting fossil filters, reporting, and compliance with applicable regulations.

Repair/Replacement: This item includes the cost of furnishing services and materials for the ordinary and usual maintenance, operation, and servicing of the fossil filters and appurtenances, including repair and replacement.

Traffic Signals: This item includes the cost of furnishing services and materials for the ordinary and usual maintenance, operation, and servicing of traffic signals and appurtenances, including repair and replacement.

4.2.2 INCIDENTAL EXPENSES

Annual Administration (City): This item includes the cost to departments and staff of the City for providing the administration, coordination, and management of District services, operation, and expenses. This item also includes management of the annual process including reports, resolutions, and public inquiries.

Annual Administration (Consultant): This item includes the contract fees and allowable expenses for annual administration of the District, including preparation of the Annual Report, preparation of resolutions, submittal of the levy to the County, responding to public inquiries, attendance at various meetings, and delinquency management. The contract fee is subject to a cost-of-living increase annually.

County Collection Fees: This item includes the fees charged by the County to process the levy submittal and collect and distribute funds on behalf of the City.

4.2.3 OPERATING RESERVE AND OTHER SOURCES

Operating Reserve Contribution: This item includes the amount to be credited to the annual assessment. When the Operating Reserve balance is greater than approximately one half of the annual costs, an Operating Reserve Contribution may be credited to the total costs.

Operating Reserve Collection: This item includes the amount to be collected to maintain reserves to enable the City to pay for the maintenance and servicing of the improvements prior to December 10

of the fiscal year, or whenever the City expects to receive its apportionment of special assessments and tax collections from the County, whichever is later. The Operating Reserve collection may continue until such a time the Reserve Fund balance is approximately one half of the annual costs.

Contributions From Other Sources: This item includes any amount contributed to the District from any source of funds other than the annual assessments.

Rounding Adjustment: This item includes any amount necessary to round the actual assessment amount for each parcel to an even cent, as the County requires that the total levy amount submitted be even, so that the amount can be divided into two equal installments on the tax roll.

5. METHOD OF ASSESSMENT

5.1 Legal Considerations

5.1.1 PROPOSITION 218

Proposition 218, the "Right to Vote on Taxes Act" was approved by California voters in 1996, which added Articles XIIIC and XIIID to the California State Constitution. The primary results of Proposition 218 were stricter definitions of assessments, special taxes, fees, and charges, and a general mandate for some type of voter approval for any new or increased tax, assessment, or property-related fee. The Proposition 218 Omnibus Implementation Act (the "Implementation Act") was approved July 1, 1997.

The Implementation Act provided direction for procedures throughout the notice, protest, and hearing process. It should be noted that this report has been prepared to be consistent with current practices and the California State Constitution.

Article XIII D, Section 4(a) of the California Constitution limits the amount of any assessment to the proportional special benefit conferred on the property. Article XIII D also provides that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

The net amount to be assessed may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels. Proposition 218 requires the Engineer to separate general benefit from special benefit, where only special benefit is assessed.

5.1.2 1982 ACT

Pursuant to the 1982 Act and Article XIII D, all parcels that have a special benefit conferred upon them as a result of the maintenance and operation of improvements and services shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire costs of the maintenance and operation of improvements. The 1982 Act, permits the establishment of assessment districts for the purpose of providing certain public services which include the maintenance and operation costs of drainage, flood control street lighting, and streets.

Section 54711 of the 1982 Act requires that benefit assessments must be related to the benefit to the parcel. This Section states:

> *"The amount of the assessment imposed on any parcel of property shall be related to the benefit to the parcel which will be derived from the provision of the service."*
>
> *"The annual aggregate amount of the assessment shall not exceed the estimated annual cost of providing the service…"*
>
> *"The revenue derived from the assessment shall not be used to pay the cost of any service other than the service for which the assessment was levied."*

5.2 Special Benefit

Pursuant to Article XIII D of the California Constitution, Section 2(i) "Special benefit means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute special benefit."

All parcels that have special benefit conferred upon them as a result of the services and activities provided shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire cost of the services and activities.

In accordance with Article XIII D §4(a), "No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and an agency shall separate the general benefits from the special benefits conferred on a parcel."

The maintenance and servicing of the District improvements (which are described in the Plans and Specifications Section of this report) are for the benefit of the properties in the District, and as such confer a special and direct benefit to parcels in the District, respectively. A description of the special benefit conferred to property in the District has been excerpted from the formation Engineer's Report and provided below:

5.2.1 TRAFFIC SIGNAL OPERATION AND MAINTENANCE

Traffic signals allow for the orderly flow of traffic for all roadway users and provide for increased safety of vehicles, their passengers and pedestrians. Conversely, a lack of traffic signalization can lead to roadway congestion and decreased safety. When evaluating safety of an intersection, one must look holistically at all system users to evaluate the benefit conveyed. Further, the task of traveling on the roadway system, whether by vehicle, by foot or by bicycle, involves searching for, finding, understanding, and applying the information, as well as reacting to unanticipated information. Once found and understood, the relevance of this information must be evaluated, decisions made and actions taken in response. This activity is cyclical, often occurring many times per second in complex, demanding environments. Traffic signals are one of the many pieces of information that must be processed as a traveler approaches an intersection in the roadway system.

- **Increased Safety to Motorists:** Traffic signals provide for the orderly movement of vehicular and pedestrian traffic at roadway intersections. While traffic signals cannot eliminate collisions, their installation has been shown to reduce the frequency of right-angle vehicle collisions, left-turn collisions, pedestrian collisions, and head-on collisions. Heavy traffic is interrupted to allow other vehicular traffic to pass through in a safe manner.
- **Increased Safety to Pedestrians:** Traffic signals prioritize movement across and through an intersection. By allowing pedestrians the right-of-way to enter and cross the roadway, traffic signals increase the safety to pedestrians.
- **Increased Traffic Capacity and Efficiency:** Use of properly timed traffic signals that smooth the traffic flow allow for increased vehicle traffic and reduce congestion. Ingress and egress from developments is more timely and efficient when traffic signals are installed.

5.2.2 FOSSIL FILTER MANAGEMENT, INSPECTION, AND MAINTENANCE

Fossil filters are designed to remove petroleum hydrocarbons from stormwater runoff that enters catch basins. Petroleum hydrocarbons are a primary energy source, utilized as combustible fuel. Petroleum hydrocarbons are also found in their solid form in asphalt used in roadway construction. Petroleum hydrocarbons are pollutants which are required to be removed from stormwater and runoff before they can be released into the environment. Properly operating fossil filtration systems provide the following special benefits to property:

- **Pretreatment of Local Drainage Stormwater:** Fossil filters pretreat stormwater by removing pollutants as the water flows through the filter into the storm sewer system. Vehicles and asphalt are the primary source of pollutants that enter the storm sewer system. In particular, localized vehicular traffic produces the majority of the pollutants that enter each catch basin which are removed by the fossil filters. Since the localized vehicular traffic, associated with local property, produces most of the pollution, the local property receives special benefit from the fossil filtration system by having the pollutants it produces removed from the stormwater runoff near the source of pollution.
- **Cleaner Local Drainage Catch Basins:** By managing, maintaining, and servicing the fossil filters, the catch basins are cleared of debris that might cause localized flooding. Catch basins are designed to collect storm water runoff that results from the large amount of impervious area on developed land. Without clear, functioning catch basins, the stormwater runoff pools and floods local streets and property. Fossil filtration system maintenance confers a special benefit to property by ensuring they are clear of debris so that stormwater runoff can flow freely into the catch basin and not flood local property.

The above-mentioned items affect the assessed property in a way that is particular and distinct from their effect on other parcels and that real property in general and the public at large do not share. They contribute to a specific enhancement of the properties in the District. Since these improvements were installed and are maintained specifically for the properties in the District; only properties in the District receive a special benefit and are assessed for said maintenance.

5.3 General Benefit

Article XIII D of the California Constitution requires any local agency proposing to increase or impose a special assessment to "separate the general benefits from the special benefits conferred on a parcel." General benefits are defined as those services or improvements which provide a general increase in property values to all property or provide benefits to the health, safety or education of the public. The rationale for separating special and general benefits is to ensure that the property owners are not charged with an assessment that pays for general benefits. Thus, a local agency carrying out projects or services that provide both special and general benefits may levy an assessment to pay for the special benefits but must acquire separate funding to pay for those general benefits.

5.4 General and Special Benefits Separated

The amount of general benefit that is conferred from the improvements and activities cannot be funded via benefit assessments. In order to separate only that portion of the budget which is related to special benefits conferred by the improvements and activities, thereby excluding those costs which are associated

with general benefits related to the improvements and activities, pass through traffic data has been reviewed.

General benefit conferred from the improvements cannot be funded by assessments. In order to separate only that portion of the cost of operating, maintaining, and servicing the improvements which is related to special benefits conferred, thereby excluding those costs which are related to general benefits, pass through traffic data has been analyzed.

The City's General Plan, adopted on June 13, 2012, indicates that streets within the City generally consist of local roads, secondary and major collectors, arterials and urban arterials. There is a general benefit component associated with traffic signals and fossil filter management along arterial/collector streets roughly equal to the percentage of pass-through trips using those streets (typically 15-25% based on the amount of traffic volume placed on each type of roadway). The following table summarizes the special and general benefit for the various types of roadways based on general industry practice standards:

In order to assess the parcels within the District for the special benefits received from the improvements and activities described in Section 3.1, the general and special benefits must be separated. The general benefit conferred by the improvements and activities is 81.25%. Accordingly, 18.75% of the benefits from the improvements and activities are considered to provide special benefits to the properties within the District and thus could be subject to assessment therein.

Roadway Type	Special Benefit	General Benefit	Comments
Local	98%	2%	Nearly all traffic is generated by local properties; the exception would be school busses, delivery and service vans/trucks, meter readers, and turn around traffic which is generally less than 2%.
Collector	50%	50%	Some General Benefit related to thru traffic and overall traffic safety benefits from traffic signals.
Arterial	25%	75%	Some General Benefit related to thru traffic and overall traffic safety benefits from traffic signals.

5.4.1 TRAFFIC SIGNAL OPERATION AND MAINTENANCE

The one traffic signal to be operated, maintained, and serviced is located along Limonite Avenue which is an Arterial according to the City of Eastvale General Plan. The intersecting roadway, Scholar Way is also an Arterial. Generally, Arterials would see an estimated 75% of trips attributed to pass through traffic rather than local traffic. The District is located on the west side of Scholar Way north of Limonite Avenue. Local traffic originates from District property, as well as from surrounding property. The additional local traffic from surrounding property not in the District results in a total portion of pass through traffic not related to District property of 81.25%.

5.4.2 FOSSIL FILTER MANAGEMENT, INSPECTION AND MAINTENANCE

Seven of the fossil filters to be managed, inspected, and maintained are located along Scholar Way which is an Arterial according to the City's General Plan. There is also one fossil filter on 58th Street which is a Collector. Generally, Arterials would see an estimated 75% of trips attributed to pass through traffic rather than local traffic. The District is located on the west side of Scholar Way north of Limonite Avenue and south

of 58th Street. Local traffic originates from District property, as well as from surrounding property. The additional local traffic from surrounding property not in the District results in a total portion of pass-through traffic not related to District property of 81.25%.

5.4.3 GENERAL BENEFIT PORTION

The total general benefit conferred as a result of the improvements and activities is 81.25% which is based on the share of pass-through traffic related to traffic signal operation and maintenance and fossil filter management, inspection and maintenance.

5.5 Method of Assessment Spread

Each of the parcels in District are deemed to receive special benefit from the improvements. Each parcel that has a special benefit conferred upon it as a result of the maintenance and operation of improvements are identified and the proportionate special benefit derived by each identified parcel is determined in relationship to the entire costs of the maintenance and operation of the improvements.

As outlined above, each of the parcels within the District receives special benefit from the operation, maintenance, and services of the improvements. Each parcel that has a special benefit conferred upon it is identified and the proportionate special benefit derived by each identified parcel is determined in relationship to the entire costs of the operation, maintenance, and services of the improvements. In order to facilitate this analysis, Benefit Points will be assigned based on the following factors:

5.5.1 TRAFFIC SIGNAL OPERATION AND MAINTENANCE AND FOSSIL FILTER MANAGEMENT, INSPECTION AND MAINTENANCE

Special benefit points are proportionally assigned to all parcels within the District for each of the following special benefits conferred:

- Increased Safety to Motorists
- Increased Safety to Pedestrians
- Increased Traffic Capacity and Efficiency
- Pretreatment of Local Drainage Stormwater
- Cleaner Local Drainage Catch Basins

Each parcel with a residential county land use code is expected to generate traffic, which must pass through the signalized intersection and by the fossil filters, therefore, each parcel may be assigned one Benefit Point per dwelling unit per benefit. Likewise, each non-residential parcel is expected to generate traffic, which must pass through the signalized intersection and by the fossil filters, therefore each parcel may be assigned one Benefit Point per acre, or portion thereof, per benefit. (e.g. If the parcel acreage is 1.38, the parcel receives 1.38 Benefit Points per benefit.)

The maximum allowable assessment per parcel is the amount which was approved at the time of formation of the District, with the allowable annual increase also approved at the time of formation. A description of the allowable annual increase for the District has been excerpted from the formation Engineer's Report and provided below:

Benefit Assessment District 2014-2 – The annual assessment will be adjusted annually by the greater of 2% or the cumulative percentage increase in the CPI-U if any, as it stands as of March of each year over the base index for March of 2015.

The total amount of maintenance, servicing, and incidental costs for maintaining and operating the Improvements is assessed to the individual parcels of real property in the District in proportion to the special benefit received by such parcels of real property. The proposed individual assessments are shown on the Assessment Roll in this report.

6. APPENDICES

The following Appendices contain Appendix A – Assessment Diagram and Appendix B – Assessment Roll for the District.

APPENDIX A – ASSESSMENT DIAGRAM

The Assessment Diagram for the District is shown on the following pages. The lines and dimensions of each lot or parcel within the District are those lines and dimensions shown on the maps of the County Assessor of the County of Riverside, at the time this report was prepared, and are incorporated by reference herein and made part of this Annual Report.

APPENDIX B – ASSESSMENT ROLL

The assessment roll is a listing of the assessments for Fiscal Year 2026/27 apportioned to each lot or parcel, as shown on the last equalized roll of the Assessor of the County of Riverside.

Based on County Assessor's secured roll data, current assessor's parcels, including corrected and/or new assessor's parcels, will be submitted and/or resubmitted to the County Auditor/Controller. The annual assessment amount to be levied and collected for the resubmitted parcel(s) shall be determined in accordance with the method of apportionment and assessment rate approved in this Annual Report. Therefore, if a single assessor's parcel has a status change in development, other land use change, or subdivides into multiple assessor's parcels, the assessment amounts applied to each of the new assessor's parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment amount.

The assessment roll for Fiscal Year 2026/27 is listed on the following pages.

CITY OF EASTVALE

AGENDA STAFF REPORT

City Council Meeting
PUBLIC HEARINGS
Agenda Item No. 12.2
June 24, 2026

Adoption of the Five-Year Capital Improvement Plan (CIP) for Fiscal Years 2026/2027 through 2030/2031

Prepared By:

Jimmy Chung, Public Works Director/ City Engineer

Recommended Action(s)

Staff recommends that the City Council hold the public hearing and adopt a resolution approving the Five-Year Capital Improvement Plan (CIP) for Fiscal Years 2026/2027 through 2030/2031.

Summary

The City of Eastvale's Five-Year Capital Improvement Program (CIP) plan outlines a strategic framework for infrastructure development, including project cost overview, project descriptions, categories, project status, and project priority, all aimed at enhancing the community's quality of life and addressing its long-term needs. This comprehensive plan ensures transparency, accountability, and effective resource allocation, contributing to the successful execution of the city's capital projects over the specified planning period.

The CIP focuses on addressing critical, essential, and desirable projects across various project categories. These categories encompass a wide range of sectors, including transportation, parks and recreation, public safety, City maintenance, utilities, accessibility improvements and public facilities. Each project has been carefully evaluated and categorized based on its significance and impact on the community. Pursuant to the California Government Code, adoption of the Five-Year Capital Improvement Plan (CIP) requires the Planning Commission and City Council to hold public hearings to allow public input and pass a resolution to adopt the CIP. Staff has noticed for public hearing regarding this item pursuant to California Government Code Section 65090 and provided a resolution for consideration which adopts the Five-Year CIP pursuant to California Government Code Section 66002.

Background

Attached is the CIP for City Council consideration on projects proposed for fiscal years 2026/2027 through 2030/2031. Proposed is a list based on the priorities of the City Council of citywide projects including accessibility improvements, roadway safety/traffic improvements, street improvements, citywide maintenance: land, building, facilities, and equipment . Projects are then further categorized into three priorities: Critical, Essential, and Desirable, which was established at the May 27, 2026 City Council meeting.

Accessibility Improvement Projects

This program is dedicated to improving Americans with Disability Act (ADA) accessibility through various types of repairs to curbs, gutters, and sidewalks throughout the City. The program includes costs to prepare and implement a plan for ADA compliance.

Roadway Safety/Traffic Improvements

This program improves roadway safety and traffic through upgrades and improvements to existing and/or adding new high-visibility traffic signs, pavement markings, and other geometric improvements (i.e. site distance) or traffic circulation improvements.

Street Improvement

This program is dedicated to improving various streets. Improvements may include widening or capital pavement maintenance.

Citywide Maintenance

This program is dedicated to right-of-way maintenance and repair, including, but not limited to striping, stenciling, repairs to streets and culvert/drainage facilities, storm damage/flood control projects, widening/pavement maintenance of streets (slurry seals/crack seals/pot holes/deep patch), and various assets in the public right of way.

Land, Buildings, Facilities, & Equipment

This program aims to provide safe, clean, well-maintained and functional facilities in order to allow City departments to effectively provide services to the community. This program details construction and capital improvements of City-owned buildings and facilities and offsite improvements to include sidewalk, curb and gutter and pavement.

Environmental

Adoption of the CIP is an administrative activity and is exempt from the California Environmental Quality Act (CEQA) pursuant to Sections 15060(c)(2) and 15060(c)(3) of the State CEQA Guidelines because adoption of the CIP does not commit the City to construct any of the projects included in the CIP and therefore will not result in direct or indirect physical changes in the environment. Any California Environmental Quality Act (CEQA) requirements will be determined on a project-by-project basis prior to final approval and construction of each project.

Strategic Plan Action - Priority Level: 1 | Target #: E | Goal #: A

The adoption of the City's 5-Year CIP for the 2026-2027 budget cycle will support the development of a Civic Center and support financial planning efforts for newly proposed infrastructure projects.

Fiscal Impact

The City's infrastructure projects are financed through various funding sources, including SB 1, Gas Tax, SB 132 Road Maintenance and Rehabilitation Account, Measure A, Community Development Block Grant, federal grants, state grants, developer contribution, fire structural funds, County Flood Control funds, development impact fees, and General Fund.

The budgetary summary for the Five-Year Capital Improvement Plan is part of 2026-2027 Annual Operations and Capital Improvement Budget, which will be presented to Council for adoption at the June 24, 2026 City Council meeting.

Prior City Council/Commission Action

On June 22, 2026, the Planning Commission will meet to review the proposed Capital Improvement Plan and render findings of General Plan consistency.

On May 27, 2026, the City Council reviewed and approved a project priority list for the 2026-2027 budget cycle to be included in the City's Five-Year Capital Improvement Plan (CIP).

RESOLUTION NO. 26-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF EASTVALE, CALIFORNIA, ADOPTING THE FIVE-YEAR CAPITAL IMPROVEMENT PLAN (CIP) FOR FISCAL YEARS 2026/2027 THROUGH 2030/2031

WHEREAS, the City Council of the City of Eastvale desires to adopt the City's Five-Year Capital Improvement Plan for Fiscal Years 2026/2027 through 2030/2031 ("CIP"), as defined below;

WHEREAS, the City Council received a presentation on the proposed CIP at a public hearing held on June 24, 2026 where members of the public had the opportunity to comment on the proposed CIP;

WHEREAS, the proposed CIP is attached hereto as Exhibit "A";

WHEREAS, pursuant to Government Code, section 66002, the City duly gave public notice of the public hearing of the proposed CIP, a copy of which has been on file with the City Clerk at least 10 calendar days prior to the City Council's commencement of such public hearing; and

WHEREAS, the City Council desires to adopt the CIP as set forth herein;

NOW, THEREFORE BE IT RESOLVED BY THE EASEMENT CITY COUNCIL AS FOLLOWS:

SECTION 1. The City Council hereby approves and adopts the Capital Improvement Plan for fiscal years 2026/2027 through 2030/2031, a copy of which is attached hereto as exhibit "A" and made a part hereof by this reference.

SECTION 2. The Capital Improvement Plan may be updated by the City Council from time to time pursuant to California Government Code, section 66002, or as otherwise provided by law.

SECTION 3. This Resolution shall take effect immediately upon its passage and adoption.

PASSED, APPROVED AND ADOPTED this 24 day of June, 2026.

INTRODUCTION AND SUMMARY

The City of Eastvale's Five-year Capital Improvement Plan (CIP) serves as a strategic blueprint for infrastructure planning and investment. It includes detailed project descriptions, cost estimates, project status, prioritization, and categorization — all with the goal of improving quality of life and addressing the City's long-term infrastructure needs. This comprehensive planning tool ensures transparency, fiscal responsibility, and efficient allocation of resources, thereby supporting the successful delivery of capital projects throughout the five-year planning period.

The Capital Improvement Plan (CIP) is overseen by the Public Works Department and serves as a strategic framework for the planning, design, and construction of various infrastructure projects throughout the City. These include improvements in transportation, drainage, public facilities, and parks. Public Works staff are responsible for managing all phases of CIP projects—from initial planning and design to final construction and project closeout.

CIP addresses a broad range of project types, including critical, essential, and desirable improvements across categories such as transportation, parks and recreation, public safety, maintenance, utilities, accessibility enhancements, and public facilities. Each project is assessed and categorized based on its urgency and anticipated community benefit.

Five-Year Capital improvement Plan (CIP) Annual Update

Each year, as part of the City's budget process, the City Council reviews and adopts a Five-Year Capital Improvement Plan (CIP) in accordance with California Government Code Section 65403.

Pursuant to California Government Code Section 65090, the adoption of the Five-Year CIP requires public hearings by both the Planning Commission and City Council, providing opportunities for community input prior to formal adoption through resolution. At their meeting on June 17, 2026, the Planning Commission reviewed the Five-Year Capital Improvement Plan and determined that the plan conforms to the goals, objectives, and policies of the elements of the General Plan.

Annual Capital Improvement Budget Process

The Annual Capital Improvement Budget (Annual CIP) process usually starts in January or

February with the development of the overall City budget. This process identifies all priority operational needs, as well as capital improvement needs. Once the budget is completed, it is recommended for adoption by the City Council prior to the beginning of the fiscal year, which begins in July. City management and the City Council are updated monthly on the status of CIP projects through status reporting and meetings.

FY 2026/2027 Annual Operations and Capital Improvement Budget was adopted by the City Council on June 24, 2026. The budget document provides detailed insights into the financial aspects and funding sources allocated for each project within the Capital Improvement Program. It serves as a valuable resource, outlining the financial considerations and allocations for the specified planning period.

PROGRAM SUMMARY

This document presents the City of Eastvale Capital Improvement Plan (CIP) for Fiscal Years 2026/2027 through 2030/2031. The City of Eastvale's Five-Year Capital Improvement Plan (CIP) is comprised of thirty-eight (38) projects divided into five categories: Accessibility Improvements Program, Roadway Safety/Traffic Improvements, Street Improvements, Citywide Maintenance Program, and Land, Building, Facilities & Equipment. The projects are further categorized into three priorities based on the following order of precedence:

1. Safety Projects
2. Annual projects
3. Funding deadlines
4. Projects with significant progress (more than 50% in design)
5. New projects from Strategic Goal
6. All others

The three priorities are:

Critical Projects:

Critical projects are those that require immediate attention due to safety concerns, regulatory compliance, or their potential to adversely affect the City's infrastructure or services if left unaddressed. These projects are given the highest priority and are crucial for maintaining the integrity and functionality of City of Eastvale's public systems.

Essential Projects:

Essential projects are deemed necessary to meet the growing demands of the community and improve the overall quality of life for its residents. These projects aim to enhance existing infrastructure, expand services, and create a more sustainable environment. They play a vital role in ensuring City of Eastvale remains a vibrant and desirable place to live, work, and engage in recreational activities.

Desirable Projects:

Desirable projects, while not as critical or essential, are still significant in enhancing the community's well-being and supporting its long-term vision. These projects focus on various aspects such as aesthetic improvements, public safety improvements, infrastructure maintenance, and transportation advancements. They contribute to the unique identity and character of City of Eastvale, creating a more appealing and engaging environment for residents and visitors.

The Five-Year CIP is summarized as follows:

Priority Category	Total number of Projects
Critical	21
Essential	14
Desirable	3

A summary of proposed projects by category for the entire Five-Year Capital Improvement Plan is included in Table 1 through Table 3. A program summary by category that includes each project cost estimates is presented in Appendices A through C.

Table 1 -Critical Projects Category Summary

Project No.	Project Title	Project Category
95025	Civic Center Surface Parking Lot	Critical
95024	Civic Center Parking Structure	Critical
95023	Civic Center Site Improvement	Critical
95017	Public Works Yard Facility Project	Critical
95014	Police Station	Critical
95012	Library	Critical
95011	City Hall	Critical
94016	Parkway Landscape Infill and Enhancement Project	Critical
94015	Tree Management Plan and Installation Project	Critical
94014	Beautification Project at Sumner Ave and Bellegrave Ave	Critical
94010	Citywide Branding: Entryway and Median Improvements	Critical
94006	Citywide Traffic Signal Synchronization – Phase 1 Arterials	Critical
94005	Miscellaneous Traffic/Pedestrian Safety	Critical
94001	Pavement Slurry Seal and Resurfacing Project	Critical
93040	Hamner Utility Trench Repair	Critical
93039	Median Improvement Project at River Rd, Cantu Galleano Rd, and Archibald Ave	Critical
93037	Limonite Gap Pedestrian Bridge	Critical
93034	Hellman Avenue Street Widening	Critical
93018	Annual Overlay	Critical
92021	Traffic Signal Improvement at Sumner and 68th	Critical
92001	Traffic Sign Inventory and Replacement	Critical

Table 2 - Essential Projects Category Summary

Project No.	Project Title	Project Category
95022	Citrus Reimagined Project	Essential
95020	OCPW Land Use – Passive Park	Essential
95016	Fire Medic Squad Replacement	Essential
95015	Fire Aerial Ladder Truck Purchase	Essential
95013	Fire Station	Essential
94011	Smart City Masterplan	Essential
94007	Citywide Traffic Signal Synchronization – Phase 2 Collectors	Essential
94004	Street Maintenance: Pot Holes, Deep Patch, and Crack Seal	Essential
93036	Streetlight Installation Project	Essential
93027	Schleisman Road Mobility, Safety, and Connectivity Project	Essential
92020	Hamner Avenue Beautification Project	Essential
92013	Cantu Galleano Ranch Interchange Gateway Feature	Essential
92012	Improvement of Bike Network Connectivity	Essential
91010	Citywide Americans with Disabilities Act Improvement Project	Essential

Table 3– Desirable Project Category Summary

Project No.	Project Title	Project Category
92018	Orchard Park to American Heroes Park Trail	Desirable
92014	Roadway Vision	Desirable
92011	Traffic Signal Battery Backup Systems	Desirable

PROGRAM PROJECT DETAIL SHEETS

For each proposed project in the Five-Year Capital Improvement Plan (CIP), a Project Detail Sheet has been prepared that presents the various project details including:

- **Project Title and Location**
- **Project/CIP No. and Category**
- **Project Priority Category**
- **Project Justification**
- **City Council Goal & Objectives**
- **Description of Project**
- **Project Cost Overview**
- **Review and Comments**

Estimated Completion: TBD

CITY OF EASTVALE
CAPITAL IMPROVEMENT PROGRAM PROJECT DETAIL SHEET
FY 2026/2027 to FY 2030/2031

Project Title:	Civic Center Site Improvement
Project Number:	95023
Project Category:	☐ Accessibility Improvements Program ☐ Citywide Maintenance Program ☐ Roadway Safety/Traffic Improvements ☒ Land, Buildings, Facilities & Equipment ☐ Street Improvements
Location:	Southeast commerical quadrant of the Leal Master Plan
Description of Improvements:	An approximately 2.8 acre City Park with an amphitheater and a central hardscape Civic Plaza and associated site work around the three buildings: City Hall, library, and police station.
Justification or Significance of Improvement:	Phase I of the Downtown Eastvale Project includes a City Hall, a library, a police station, arts and cultural spaces, a park and an amphitheater, and an open plaza. The Civic Center will be a community serving and welcoming place, space and destination where people can connect and prosper.
Project Priority within CIP Category:	☒ Critical (Start within a year) ☐ Essential (Start within 1 to 3 years) ☐ Desirable (Start within 3 to 5 years)
Project Status:	☐ Feasibility Study ☐ In Progress ☐ Design – Conceptual ☒ Under Construction/Implementation ☐ Design – Engineering ☐ Annual Projects
Special Funding Milestones/ Deadlines:	N/A
City Council Goals & Objectives:	Priority 1, Target E, Goal A

Project Title:	Public Works Yard Facility Project			
Project Number:	95017			
Project Category:	☐	Accessibility Improvements Program	☐	Citywide Maintenance Program
	☐	Roadway Safety/Traffic Improvements	☒	Land, Buildings, Facilities & Equipment
	☐	Street Improvements		
Location: 14821 & 14835 Chandler St				
Description of Improvements: This project will utilize a design-build approach. The project scope includes the construction of maintenance yard buildings with vehicle/equipment storage area, office spaces, washing bays, and rest areas and the site work.				
Justification or Significance of Improvement : The City is lacking appropriate space for storage of equipment, supplies, fleet garage, workshop space, crew break room. The City also needs to be prepared for the increased demand for services once the Civic Center, Civic Park, and Civic Plaza construction begins.				
Project Priority within CIP Category:	☒	Critical (Start within a year)

Project Title:	Police Station			
Project Number:	95014			
Project Category:	☐ Accessibility Improvements Program		☐	Citywide Maintenance Program
	☐ Roadway Safety/Traffic Improvements		☒	Land, Buildings, Facilities & Equipment
	☐ Street Improvements			
Location: Southeast commerical quadrant of the Leal Master Plan				
Description of Improvements: A design-bid-build project to construct a new Police Station, approximately 22,021 SF in size, located in the southeast commerical quadrant of the Leal Master Plan. The Police Station a two-story building with one level below grade secured parking.				
Justification or Significance of Improvement : The new police station would serve as the City's law enforcement headquarters and will enhance the provision of law enforcement services for the City's current residents as well as or new development and population as the City continues to grow over future decades..The new police station would also house the City's Emergency Operations Center (EOC), which would serve as a central command-and-control facility for coordinating emergency response and recovery efforts during disasters and major emergencies.				
Project Priority within CIP Category:	☒ Critical (Start within a year)

Project Number:	95012			
Project Category:	☐	Accessibility Improvements Program	☐	Citywide Maintenance Program
	☐	Roadway Safety/Traffic Improvements	☒	Land, Buildings, Facilities & Equipment
	☐	Street Improvements		
Location: Southeast commerical quadrant of the Leal Master Plan.				
Description of Improvements: A design-bid-build project to construct an approximately 25,599 SF Library located in the southeast commercial quadrant of the Leal Master Plan. The Library is a two-story building featuring book collection areas for all ages, group study rooms, acitivity spaces, offices, and an occupiable terrace.				
Justification or Significance of Improvement : The City's existing library is operated by a facility that is shared with a high school. The new facility would be the first true library in the City, which is currently underserved by its existing library facilities. The construction of a new Library is vital to fostering education, equality, community cohesion, and personal development. The library would accommodate a range of public programs and offer expanded access to equipment to increase public access to literacy and digital programs.

Project Title:	City Hall
Project Number:	95011
Project Category:	☐ Accessibility Improvements Program ☐ Citywide Maintenance Program ☐ Roadway Safety/Traffic Improvements ☒ Land, Buildings, Facilities & Equipment ☐ Street Improvements
Location:	Southeast commerical quadrant of the Leal Master Plan
Description of Improvements:	A design-bid-build project to construct an approximately 52,340 SF City Hall located in the southeast commercial quadrant of the Leal Master Plan. The City Hall is a three-story building that includes public counter spaces, an outdoor amphitheater, a council chamber that could be converted into a stage for performances, conference rooms, and office spaces.
Justification or Significance of Improvement:	Eastvale was incorporated in 2010, making it a relatively new city. Before incorporation, there was no City Hall in Eastvale. The construction of a new City Hall is essential to support government operations, offer services to the public, encourage civic engagement, and serve as a symbol of local governance.

Project Number:	94016			
Project Category:	☐ Accessibility Improvements Program		☒ Citywide Maintenance Program	
	☐ Roadway Safety/Traffic Improvements		☐ Land, Buildings, Facilities & Equipment	
	☐ Street Improvements			
Location: Citywide				
Description of Improvements: This project will identify parkway areas where landscaping has been removed and not replaced, and infilling those areas with in-kind materials to restore and enhance aesthetics.				
Justification or Significance of Improvement : This project will address visible gaps in the parkway landscape that negatively impact the overall appearance and consistency of the area. By infilling these areas with in-kind materials, the project restores a cohesive and well-maintained streetscape that aligns with the original design intent. This not only enhances visual continuity and neighborhood character but also supports a more attractive and welcoming environment for residents and visitors.

Project Category:	☐ Accessibility Improvements Program		☒ Citywide Maintenance Program	
	☐ Roadway Safety/Traffic Improvements		☐ Land, Buildings, Facilities & Equipment	
	☐ Street Improvements			
Location: Citywide				
Description of Improvements: Citywide Branding efforts including entryway median improvement, monument installation at various locations within the City, and various street beautification projects.				
Justification or Significance of Improvement : Although this project has been categorized as Essential in previous Five-Year CIP's, staff has been actively seeking opportunities to implement it in coordination with other improvement efforts, such as the median project at Cantu and River Road. With the acceptance of the Right-of-Way dedication at the corner of Sumner Avenue and Bellegrave Avenue, we are now ready to move forward with the design and installation of the Entryway City Branding Monument, in conjunction with the Beautification Project (Project No. 94014).

CAPITAL IMPROVEMENT PROGRAM PROJECT DETAIL SHEET
FY 2026/2027 to FY 2030/2031

Project Title:	Citywide Traffic Signal Synchronization - Phase 1 Arterials			
Project Number:	94006			
Project Category:	☐	Accessibility Improvements Program	☒	Citywide Maintenance Program
	☐	Roadway Safety/Traffic Improvements	☐	Land, Buildings, Facilities & Equipment
	☐	Street Improvements		

Location: This project will implement traffic signal synchronization along major arterials including Hamner Ave, Archibald Ave, and Schleiman Ave.

Description of Improvements: Install traffic synchronization components and fiber optic line and/or wireless antenna to relay signal per the traffic signal synchronization master plan. Traffic signal synchronization of major corridors will be completed in two phases. Phase 1 includes Hamner Avenue, Archibald Avenue, Schleisman Road and Scholar Way. Phase 2 includes collectors streets including Harrision Ave, Sumner Ave, 65th St, and Citrus St (CIP 94007). This project is for Phase 1, and sycnrhonization on Schleisman Rd will be completed after the intersection of Schleisman Rd and Sumner is improved by a developer.

Justification or Significance of Improvement : Synchronizing major corridors throughout the City has remained a high priority. WRCOG's recent Nexus Study highlighted and included the ITS improvements along these key corridors. Implementing this initiative will significantly enhance traffic flow and reduce travel times, delivering clear benefits to the public.

CAPITAL IMPROVEMENT PROGRAM PROJECT DETAIL SHEET
FY 2026/2027 to FY 2030/2031

Project Title:	Hellman Avenue Street Widening and Walters Pedestrian Bridge			
Project Number:	93034			
Project Category:	☐	Accessibility Improvements Program	☐	Citywide Maintenance Program
	☐	Roadway Safety/Traffic Improvements	☐	Land, Buildings, Facilities & Equipment
	☒	Street Improvements		
Location: Hellman Ave between Chandler St. to Walters St.				
Description of Improvements: The project involves widening Hellman Avenue from Walters Street to River Road to eliminate bottlenecks and improve traffic flow. The scope includes conducting a feasibility study, preparing environmental documents, right-of-way easement documents, and PS&E. The project will be completed in two phases: 1) Widening of Hellman Avenue north of Chandler Avenue, including lot grading south of Rondo Elementary School and bridge widening. 2) Widening of Hellman Avenue from Shortham Street to River Road.The feasibility study will determine the most efficient approach for phasing the project.				
Justification or Significance of Improvement :

Project Title:	Traffic Signal Improvement at Sumner Ave and 68th St			
Project Number:	92021			
Project Category:	☐	Accessibility Improvements Program	☐	Citywide Maintenance Program
	☒	Roadway Safety/Traffic Improvements	☐	Land, Buildings, Facilities & Equipment
	☐	Street Improvements		
Location: At the intersection of Sumner Ave and 68th St				
Description of Improvements: Design and install traffic signals at the intersection of Sumner Ave and 68th Street				
Justification or Significance of Improvement: This project will improve vehicular and pedestrian safety and also allow for future opportunity to synchronize the Sumner Ave corridor. City Council directed the staff to commence the process for signalizing this intersection at April 10, 2024, meeting.				
Project Priority within CIP Category:	☒	Critical (Start within a year)

Project Title:	Traffic Sign Inventory and Replacement			
Project Number:	92001			
Project Category:	☐	Accessibility Improvements Program	☐	Citywide Maintenance Program
	☒	Roadway Safety/Traffic Improvements	☐	Land, Buildings, Facilities & Equipment
	☐	Street Improvements		

Location: Citywide

Description of Improvements: The City of Eastvale owns and maintains approximately 8,210 traffic signs throughout the city. Signs that are missing, weathered, faded, or non-compliant will be replaced. One key compliance measure is retroreflectivity, a standard established to enhance nighttime driving safety. Approximately 2,160 signs have been scanned, with 821 failing to meet retroreflectivity standards. The remaining signs will be scanned while the failed ones are replaced. Additionally, the typical lifecycle of traffic signs is 10 years. This is an ongoing project and will be reappropriated annually as needed.

Justification or Significance of Improvement : Traffic signs are vital sources of infomration that communicate traffic control rules, warnings, and provide the necessary guidance that roadway users need to safetly and efficiently navigate.

(appendix continues on next page)

CITY OF EASTVALE
CAPITAL IMPROVEMENT PROGRAM PROJECT DETAIL SHEET
FY 2026/2027 to FY 2030/2031

Project Title:	Citrus Reimagined Project			
Project Number:	95022			
Project Category:	☐ Accessibility Improvements Program		☐ Citywide Maintenance Program	
	☐ Roadway Safety/Traffic Improvements		☒ Land, Buildings, Facilities & Equipment	
	☐ Street Improvements			
Location: 13200 Citrus St., Eastvale CA				
Description of Improvements: In consistence with 2040 Eastvale General Plan, this project is envisioning to transform the 22-acre City owned lot into a community gathering hub that include a 15,000 sf indoor aquatic center, a 20,000 sf to 25,000 sf community center, an event center repurposed from an old residential property, an outdoor amphitheater, park spaces, pickleball courts, dog parks, a skate park, picnic areas, and a Sana Ana River education pond and pier.				
Justification or Significance of Improvement : This project is consistent with the adopted 2040 Eastvale General Plan. This project will directly benefit the health and wellbeing of the residents and its visitors.				
Project Priority within CIP Category:	☐ Critical (Start within a year)			
	☒ Essential (Start within 1 to 3 years)			
	☐ Desirable (Start within 3 to 5 years)			
Project Status:	☒ Feasibility Study		☐ In Progress

Project Title:	OCPW Land Use - Grand Park			
Project Number:	95020			
Project Category:	☐	Accessibility Improvements Program	☐	Citywide Maintenance Program
	☐	Roadway Safety/Traffic Improvements	☒	Land, Buildings, Facilities & Equipment
	☐	Street Improvements		
Location: Area near Hellman Avenue south of Walters St.				
Description of Improvements: OCPW owns a floodplain area near Hellman Avenue, south of Walters Street. The city is requesting land use approval from OCPW to develop a passive park on approximately 200-acre lot. The Grand Park will exhibit Conservation Areas, Picnic Areas, Recreation Areas, and a Visitor Center.				
Justification or Significance of Improvement : Encompassing a variety of restored ecosystems, community spaces and recreation opportunities Eastvale Grand Park will play a role in transforming quality of life for Eastvale residents.				
Project Priority within CIP Category:	☐	Critical (Start within a year)		
	☒	Essential (Start within 1 to 3 years)		
	☐	Desirable (Start within 3 to 5 years)

NOTICE OF PUBLIC HEARING

Notice is hereby given that the Eastvale City Council will hold a public hearing to consider an adoption of a Five-Year Capital Improvement Plan for Fiscal Years 2026/2027 through 2030/2031 in conformance with California Government Code Section 66002.

Project Description: The Capital Improvement Plan (CIP) is a planning document used by the City to identify capital improvement needs and to coordinate funding and timing of those needs based on City Council's direction and anticipated funding availability. The CIP includes projects that have been identified as funded, and partially funded for Fiscal Years (FYs) 2026/2027 through 2030/2031 as well as projects anticipated through the build-out of the City.

Hearing Date: **June 24, 2026, at 6:00 PM** (City Council Meeting)

Hearing Location: City Council Chamber
City of Eastvale
12363 Limonite Avenue, Suite 910
Eastvale, CA 91752

Environmental: Adoption of the resolution is an administrative activity and is exempt from the California Environmental Quality Act (CEQA) because it will not result in direct or indirect physical changes in the environment. Any California Environmental Quality Act (CEQA) requirements will be determined on a project-by-project basis prior to final approval and construction of each project.

Any person may submit written comments prior to the public hearing or may appear in person before the City Council to be heard. Written comments may be mailed to the City of Eastvale City Clerk at Eastvale City Hall, 12363 Limonite Avenue, Suite 910, Eastvale, CA 91752. **To be presented to the Council at the meeting, all comments made in writing or via e-mail prior to the public hearing must be submitted and received by the City of Eastvale City Clerk no later than Wednesday, June 24, 2026, at 4:00 p.m.** Oral and written comments may be submitted directly to the City Council at the public hearing. If you challenge the project in court, you may be limited to raising only those issues you raised at the public hearing as described in this notice or in written correspondence delivered to the Eastvale City Council prior to or at the public hearing.

PLN25-20102 – Density Bonus Agreement, Tentative Tract Map 39416, and Major Development Review for Regent Land Company, LLC Residential Development

Prepared By:

Jamie K. Cerda, AICP, Principal Planner

Recommended Action(s)

Staff recommends that the City Council take the following actions:

1. Find the project exempt from CEQA pursuant to CEQA Guidelines Section 15183 based on the findings and conclusions provided in the Exemption Determination Report, attached hereto and the conclusion that the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR (State Clearinghouse No. 20222080090);
2. Approve the Density Bonus Agreement between Regent Land Company LLC and the City of Eastvale, authorize the City Manager to execute the Agreement, and authorize the City Manager to made minor revisions to the Agreement as determined prudent with the concurrence of the City Attorney;
3. Adopt the Resolution approving Tentative Tract Map No. 39416 to subdivide four (4) existing residential lots totaling 3.57 gross acres into 35 residential lots, two (2) open space purposes and four (4) for street purposes, subject to conditions of approval, and approving the Major Development Review for the master building architecture and site planning of 35 single-family residential lots, landscaping, and parking areas, subject to conditions of approval.

Summary

The applicant, Regent Land Company is requesting approval of a density bonus agreement, Tentative Tract Map (TTM) No. 39416 to subdivide four (4) existing residential lots totaling 3.57 gross acres (Assessor Parcel Numbers: 144-070-016, 144-070-017, 144070-018, and 144-070-020) into 35 single-family residential lots, two (2) lettered lots for open space purposes, and four (4) lots for street purposes, as well as the master site planning and architecture of the 35 single-family residential homes with two (2) as affordable to very-low income.

As proposed, the project is eligible for a density bonus and waivers of development standards pursuant to California Government Code sections 65915 through 65918 (State Density Bonus Law) and Eastvale Municipal Code (EMC) Section 120.05.090. Additionally, the proposed project is subject to the provisions of Housing Accountability Act (HAA), which provides that the receipt of a density bonus or other benefits under the State Density Bonus Law is not a valid basis to find a proposed housing development project inconsistent with applicable objective development standards.

The project is requesting a 22.5 percent density bonus under the State Density Bonus Law to allow up to 9.8 dwelling units per acre (du/ac) where the General Plan allows for densities up to 8 du/ac. The project is eligible for this density bonus because the developer has committed to set aside two of the proposed units for very-low income households. The EMC provides that the City Council is the approval authority for density bonus requests, however, State Density Bonus Law does not give the City Council discretion to deny a density bonus if the project meets all eligibility criteria for the requested density bonus under the State Density Bonus Law. Staff is recommending approval of the applicant's requests due to the project satisfying the intent of the Eastvale General Plan 2040's Housing Element to promote the development of adequate housing to meet the City's fair share of the region's housing needs for all income segments of the population, and because the project meets all applicable objective development standards other than those waived or modified under the State Density Bonus Law.

Background

Location

The 3.57-acre project site is located on four (4) existing residential lots comprised of Assessor Parcel Numbers: 144-070-016, 144-070-017, 144-070-018, and 144-070-020 at the northeast corner of Hellman Avenue and Walters Street. The project site is bound by existing residential to the north, Walters Street and Philistine Rondo Elementary School of Discovery to the south, existing residential to the east and Hellman Avenue and the City of Chino to the west.

Housing Accountability Act (HAA)

The Housing Accountability Act (HAA) (Government Code Section 65589.5) applies to this project. The HAA established the state's overarching policy that a local government may not disapprove, reduce the density of, or make infeasible housing development projects, emergency shelters, or farmworker housing that are consistent with objective local development standards except under very limited conditions. For projects that are consistent with applicable objective standards in effect on the date the application was "deemed complete" (the date an SB 330 preliminary application was submitted or the date a complete project application was submitted if there is no SB 330 preliminary application), the city cannot disapprove the project or condition it to be developed at a lower density unless a written finding is made, supported by a preponderance of the evidence, that the project would have a specific, adverse impact upon the public health or safety and there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact. The HAA defines

what constitutes a "specific, adverse impact" very narrowly to mean "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions." Any negative impacts of the project that do not meet this stringent definition are not sufficient to justify disapproving the project or lowering its density.

Furthermore, the HAA provides that the receipt of a density bonus or other benefits under the State Density Bonus Law "shall not constitute a valid basis on which to find a proposed housing development project is inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision."

The HAA also provides that for project sites where the general plan land use designation and zoning are inconsistent, a project that is consistent with the general plan land use designation is not required to apply for and obtain a zone change. The City can require the project to comply with objective development standards applicable in a zone that is consistent with the general plan land use designation. The project site has a General Plan land use designation of "Chandler Policy Area" and is zoned A-2 Heavy Agriculture. City Staff has identified the R-1 One-Family Dwelling zoning designation as the most closely consistent zone with the existing General Plan land use designation for the purpose of establishing development standards for the project. An SB 330 preliminary application was submitted for this project on October 9, 2025, so the City must apply the applicable standards in effect on that date to this project.

State Density Bonus Law

The California Density Bonus law allows developers who meet the requirements of the state law to seek increases in base density in exchange for providing affordable units on site. To help make constructing on-site affordable units feasible, the law allows developers of density bonus projects to request certain numbers of incentives/concessions for their project, and entitles density bonus projects to an unlimited number of waivers or reductions of development standards that would "physically preclude" the development of the project at the increased density and with the concessions/incentives permitted under the State Density Bonus Law. This project does not include any incentive/concession requests, but does include development standard waiver requests. Those waivers are discussed below in the analysis section below under each of the applicable development standard subheadings, however, for reference a summary of the requested waivers is include in the following table.

Table 1: Requested Waivers

Item	R-1 Standard	Requested
Minimum Lot Size	7,200 square feet	2,600 square feet
Minimum Lot Width	60 feet	24 feet
Minimum Lot Depth	100 feet	80 feet
Front Setback	20 feet	18 feet
Side Interior Setback	5 feet	4 feet
Side Street Setback	10 feet	5 feet

Max Fence Height	6 feet	7.5' (1.5' retaining with 6' privacy fence) 8' (2' retaining with 6' privacy fence) 11' (5' retaining with 6' privacy fence)
Street Width	32 feet curb to curb 50-foot right-of-way	26 feet curb to curb 36-foot right-of-way (Modified County Standard 106, given private streets)
RDG-7	All projects of 10 or more residential lots should include at least one single-story floor plan	Two-story plan types (no single-story model)
RDG-8	Garages are encouraged to be placed at varying distance from the street	All garages to be plotted at 20' from right-of-way with the exception of two (2) plotted at 18' from right-of-way.

The first version of the Density Bonus Law was adopted in 1979 and has since been amended at various times. In early 2017, the law was amended to restrict the ability of local jurisdictions to require studies to "justify" the density bonus and requested incentives/concessions, and development standard waivers. The onus is on local jurisdictions to prove that the requested incentives/concessions or waivers are not justified. Pursuant to California Government Code Section 65915(d)(1) and 65915(e)(1), a local jurisdiction is limited in its ability to deny requested incentives/concessions and waivers, and State Density Bonus Law does not provide a local jurisdiction with any discretion to deny a density bonus.

State Density Bonus Law requires the local agency to ensure that an affordable for-sale unit that qualified the project for a density bonus is initially sold to an income qualified household at an affordable price, and that an equity sharing agreement is recorded to ensure that if the home is sold the agency recaptures the "initial subsidy" (market value minus the initial affordable sales price) plus a proportionate share of the appreciation.

Analysis

Tentative Tract Map No. 39416

The applicant has submitted an application for Tentative Tract Map (TTM 39416) to subdivide four (4) existing, previously developed residential lots totaling 3.57 gross acres into thirty-five (35) single family residential lots, two (2) lots for open space purposes and four (4) lots for street purposes within the Chandler Policy Area land use designation.

Municipal Code requirements pertaining to subdivisions (Tract Maps and/or Parcel Maps) are governed by the Subdivision Map Act (State of California Government Code § 66410-66499.58), and Title 130 (Subdivision) of the Eastvale Municipal Code. Furthermore, all subdivision maps must

comply with the provisions of the City General Plan, Zoning Code, and all other ordinances, statutes and laws pertaining to the use, sale, leasing or subdivision of land.

General Plan Consistency

The subject property is classified as Chandler Policy Area in the Eastvale General Plan 2040. This classification allows up to a maximum of eight (8) dwelling units per acre or a base density of 29 total dwelling units for the project site (8 du/ac x 3.57 ac ≈ 29 du). Pursuant to the California Density Bonus law, the density bonus is the number of units permitted to be built in addition to the "base density", or the number of units that would be permitted to be built under generally applicable local requirements without a density bonus. The amount of the density bonus is set on a sliding scale, based upon the percentage of affordable units at each income level.

With the applicant's utilization of State Density Bonus law providing an affordable unit percentage of six percent (6%) or two (2) affordable units for the very low-income category (30-50 percent area median income) the applicant is entitled to a density bonus of 22.5%, or an additional seven (7) units above the base density of what would be permitted to be built under the General Plan without a density bonus (29 total du of base density X 0.06 affordability rate ≈ 1.74, which gets rounded up to 2 affordable du) . The applicant is requesting a total of only 35 residential units rather than their entitled 36 residential units (29 base density units + 7 density bonus units) as part of this project.

Table 2: Density Bonus Calculation

Affordable Unit - 6% (2 units - Very Low Income)*	**Density Bonus Calculation**	**Units Allowed**
Base Density - Single Family Low	3.57 acres x 8 du/ac	28.56 Units, rounds up to 29
22.5 Percent State Density Bonus	(29 du base density x 0.225)	+ 6.526 units, rounds up to 7 units
Total Units		**36 Units Allowed** **35 Units Proposed**
*Affordable unit percentage is calculated excluding units added by a density bonus.		

Tentative Tract Map No. 39416 (**Attachment 1**) proposes a density of 9.8 du/ac (i.e., 35 residential lots ÷ 3.57 acres = 9.8 du/ac), exceeding the permitted density for the site per the General Plan (i.e., 8 du/ac); however, pursuant to State Density Bonus Law, units added by a density bonus (i.e., 7 additional units) are excluded from density calculation; therefore, the project has a proposed density of 8 du/ac (i.e., 28.56 base density units ÷ 3.57 acres = 8 du/ac); therefore consistent with the General Plan land use designation of the *Chandler Policy Area*.

Zoning Code Compliance

The property is zoned A-2 Heavy Agriculture. This designation is intended as an area for large lot single-family residential units with minimum lots sizes of 20,000 square feet.

As proposed, TTM 39416 does not conform to the development standards of the A-2 zone in that the 35 proposed residential parcels do not satisfy the minimum lot size of 20,000 square feet, lot width of 100 feet, and lot depth of 150 feet. The smallest lots comprising TTM 39416 have minimums of 2,698 square feet in size, 33 feet in width, and 80.5 feet in depth.

However, under the provisions of HAA, a housing development cannot be required to rezone the

property if it is consistent with the objective General Plan standards for the property because the A-2 zoning is inconsistent with the Chandler Policy Area land use designation. As stated above the proposed project complies with the standards of the Chandler Policy Area General Plan land use designation. The proposed development also needs to comply with the objective zoning code standards applicable to the property, but only to the extent they facilitate the development at the density allowed by the General Plan.

Since the development standards of the A-2 zone would preclude the development of the site at the density permitted by the General Plan, the applicant designed the community to reflect the development standards of the R-1 zone outlined in Table 3.2-2 of the Eastvale Zoning Code to the greatest extent feasible and is formally requesting waivers from the development standards the project cannot satisfy under the State Density Bonus Law.

While the minimum lot size, width, and depth of the proposed lots do not meet all the minimum standards outlined in Table 3.2-2 of the Eastvale Zoning Code for the R-1 zone, the R-1 zone is the only zone designated for single family detached residential units. The proposed development standards will be discussed in greater detail later in this report.

Access and Circulation

Access to the tract is proposed via a driveway along Walters Street (i.e., Street "A") and a driveway along Archibald Avenue (i.e., Street "B"). The entry road off Walters Street (i.e., Street "A") would extend into the site a distance approximately 330 feet where it intersects Street "B" providing vehicular access back out to Archibald Avenue approximately 260 feet away. The entry ways would include decorative paving treatment, and enhanced landscape nodes at either side to create an attractive "grand entry". All streets within the tract are proposed to be private and maintained by the Homeowners Association.

The streets are designed with a 26-foot paved section and 5- foot sidewalk on either side within a 36-foot-wide right-of-way, which does not meet minimum street standards for public streets; however, the streets are proposed to be private and are designed to meet Riverside County Modified County Standard 106 for Private Streets. The Riverside County Fire Department has reviewed the proposed street design and Fire Lane Striping Plan to ensure adequate circulation and is supportive of the proposed design. Lastly, the City Engineer has reviewed the proposed project access and on-site circulation and did not cite any concerns with the proposed design.

Grading and Drainage

Site elevation is relatively flat with a gently sloping terrain with surface drainage generally directed to the south. Regional water quality regulations require storage and treatment of stormwater on-site to the maximum extent feasible in order to reduce pollutant loads, prior to discharge downstream. Accordingly, the applicant's Hydrology Report proposes the project will direct onsite flows towards the southeast corner of the project site via a series of gutters throughout the development. Surface flows in these proposed gutters will direct runoff towards a modular wetland system before discharging into an existing storm drain system within Walters Street, which ultimately outfalls to Cucamonga Creek.

The Engineering Division has reviewed the proposed grading and drainage plan for the project and has not expressed any concerns regarding the proposed design. Standard conditions of approval have been suggested that require final grading and drainage plans and the final Water Quality

Management Plan (WQMP) to be reviewed and approved by the City Engineer prior to issuance of a grading permit.

Traffic

The proposed project is deemed consistent with the development density allowed on the project site by the General Plan. Furthermore, the proposed 35-unit residential project represents an increase of only 6 units of development on the site over what was analyzed in the General Plan EIR adopted and certified by the City Council on March 27, 2024. The project would not result in transportation impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

Noise

In general, construction activities on the project site would increase ambient noise levels in the vicinity on an intermittent but temporary basis. Noise levels during construction would fluctuate depending on the construction phase, equipment type and duration of use, distance between the noise source and receptors (i.e., neighboring residences and schools in the vicinity), and the presence or absence of barriers between the noise source and receptors. Staff notes that construction-related noise is exempt from the City's noise control ordinance, provided that construction noise occurs between 6:00 a.m. and 6:00 p.m. June through September and between 7:00 a.m. and 6:00 p.m. October through May. Staff has also included a condition of approval reiterating allowable construction hours and emphasizing the sensitivity of this issue to surrounding neighboring residents and the Philistine Rondo Elementary School of Discovery. It is anticipated that the primary source of noise impacts to the project site would be traffic noise from Archibald Avenue that is adjacent to the west side of the project site.

Public Infrastructure

Implementation of the proposed project will result in additional demand on existing public services, including demand for fire and police services. However, this increase in demand can be accommodated by existing service levels, and therefore would be less than a significant impact. Additionally, the increase in demand to the utilities, i.e., water, gas, power, and sewer, can be accommodated by existing service levels as there is sufficient capacity to serve the project site under present conditions. Jurupa Valley Community Services District (JCSD) has provided a will-serve letter for the proposed project confirming availability of sufficient water supply to serve the project.

In addition, Riverside County Fire Department has reviewed the proposed site plan for fire/emergency access and did not identify any significant issues of concern that would require further submittals to Riverside County Fire Department subsequent to any approval of the project granted by the City. Riverside County Fire Department suggest applicable standard conditions of approval, which staff has included in the attached conditions of approval.

Schools

The proposed project would not include significant or unplanned population growth as the proposed project is consistent with the General Plan. The project would be required to comply with SB 50 requirements, which allow school districts to collect impact fees from developers of new projects. According to Section 65997 of the California Government Code, payment of statutory fees is the exclusive method of mitigating environmental effects related to the adequacy of school facilities. Thus, upon payment of required fees by the applicant consistent with existing State requirements, impacts would be less than significant. Furthermore, Corona-Norco Unified School District has

provided the applicant a Will-Serve letter confirming their availability to accept student enrollment from the proposed development (**Attachment 13**).

Parks and Recreation

In an effort to develop and maintain a comprehensive system of parks, recreation and natural open space lands that meet the active and passive recreation and open space needs of all residents and visitors, the Eastvale General Plan, specifically Policy CO-2.4, requires new residential developments to dedicate land and/or payment of in lieu fees consistent with state law. As outlined in Section 130.20.020 of the Eastvale Municipal Code, applicants are required to provide three (3) acres of parkland per 1,000 residents within the subdivision. In the case of the subject project the applicant is required to provide a minimum of 0.31 acres of land for public parks and recreational purposes. This is calculated by the number of dwelling units in the subdivision (35 residential units) multiplied by the average number of persons per dwelling unit (2.98 persons per detached single family residential unit) multiplied by .003 (3 acres per 1,000 residents). As the proposed project will not offer any onsite public park and recreational facilities, the applicant will be required to remit necessary in lieu fees as a condition of approval. In lieu fees are calculated using the fair market value of the land divided by 3.57 (project site acreage) and multiplied by 0.31 (parks and recreation land dedication requirement). Prior to recording the Final TTM, the applicant will be required to pay the required fees ensuring Eastvale's goal of a comprehensive system of parks, recreation and natural open space lands are available to all residents and visitors.

Major Development Review

In order to safeguard and enhance the appearance and quality of development in the City of Eastvale, Section 120.02.010 of the Eastvale Zoning Code requires Major Development Review approval for any new single-family subdivision development. This scope of review is outlined in the aforementioned code section, and includes, but is not limited to, exterior design, materials, textures, colors, as well as ensuring the proposed structures will be property related to the site and to the surrounding site in order to prevent structures detrimental to the character of the buildings already established in the area. The proposed project has been reviewed for compliance with the applicable development standards and required findings for a Major Development Review as set forth in Section 120.02.010 (C)(5) of the Eastvale Zoning Code. The required findings are detailed in **Attachment 7 – Draft Resolution**.

Architecture and Treatments

As proposed, the thirty-five (35) single-family homes are designed with quality urban design, architecture and landscaping. Based on staff's review, the project is generally consistent with the Eastvale Design Guidelines except for the requested waivers discussed below.

The applicant is proposing three (3) different model home plans. The table below provides a summary description of the models proposed:

Table 3: Plan Summary

Plan	Square Footages	No. of Stories	No. of Bedrooms	No. of Bathrooms	Garage Parking	Percentage of Total Project
Plan 1	1,905 ft^2	2	3+ loft (4 bed option)	2.5	2/421 ft^2	31 %

Plan 2	2,075 ft^2	2	4+ loft (5 bed option)	2.5	2/423 ft^2	37%
Plan 3	2,150 ft^2	2	3+ loft + flex (5 bed option)	3	2/489 ft^2	31%

In addition to the three (3) different plan types, the following three (3) architectural styles are also proposed as part of the master architecture:

- Cottage (31 percent of units)
- Farmhouse (34 percent of units)
- Monterey (34 percent of units)

Included in the development plans (**Attachment 3**) the applicant proposes a total of nine (9) different color schemes, seven (7) different trim and siding colors, and five (5) different roofing materials for the above models. Additional architectural details include window shutters, wood siding, pronounced windowsills and ledges, and board and batten.

The variety of options available to all plans will ensure that a rich diversity of colors and materials will be apparent throughout the community. The illustrative color elevations contained within the project plan set provide further details regarding these proposed options.

The City of Eastvale's Design Standards and Guidelines (RDG-7) requires all projects with ten (10) or more residential lots to include at least one single-story floor plan. The proposed project consists of 35 residential units with no single-story floor plan but rather three (3) two-story models. To achieve the necessary density of eight (8) dwelling units an acre afforded by HAA and State Density Bonus Law the individual lot sizes of the project are forced to be smaller than most R-1 zoned properties in that they range from 2,698 to 4,096 square feet. The applicant's proposed two-story models range in size from 1,950 – 2,150 square feet. Given the small lot size of Tentative Tract Map 39416 and the fact that single-story floor plans have larger footprints than two-story floor plans it would not be feasible to construct a compatible or desirable single-story model in the proposed tract; therefore, staff is supportive of the requested waiver.

Site Planning

Staff reviewed the site plan for each of the lots under consideration as part of this Major Development Review. As noted above, the proposed development needs to comply with the objective zoning code standards applicable to the property, but only to the extent they facilitate the development at the density allowed by the General Plan.

To create consistency with the surrounding single-family residential neighborhoods and in compliance with HAA, the applicant designed the community to the R-1 One-Family Dwelling development standards, to the greatest extent feasible. Apart from the front and side yard setback standards, requested to be waived, all residential units are plotted in compliance with the standards applicable to the R-1 One-family Dwelling zone. As such, staff is supportive of the proposed plotting as it meets the intent of HAA as well as creates a compatible development within an existing developed portion of the city.

Table: 4 Compliance with R-1 Development Standards

Compliance with R-1 One-Family Dwelling Residential Development Standards

Standard	Required	Proposed	Meets Standard
Front Setback	20 feet	18 feet	No
Rear Setback	10 feet	10 feet	Yes
Side Yard Setback (Interior)	5 feet	4 feet	No
Side Yard Setback (Street Side)	10 feet	6 feet	No
Building Height	40 ft. maximum	26 feet	Yes
Off-Street Parking	2 covered spaces minimum	2 covered spaces and 2 driveway spaces	Yes

As stated previously, pursuant to Government Code Section 65915(e)(1), if a city development standard would physically preclude the project from being built at the permitted density, the developer may propose to have those standards waived or reduced. The applicant is requesting a two-foot reduction in the front yard setback from twenty feet to eighteen feet on Lot 9 and Lot 10. Staff has evaluated the request and found that the proposed front yard setback continues to meet the minimum off-street parking dimension of eighteen feet; therefore, allowing Lot 9 and Lot 10 to provide driveway spaces. Additionally, the location of these lots, located off an alley and not a main road, would not affect general circulation and for this reason staff is supportive of the requested wavier. A one-foot reduction or waiver of the interior side yard setback from five (5) feet to four (4) and a four (4) foot reduction or waiver of the street side yard setback from ten (10) feet to six (6) feet is also proposed. Staff has evaluated and determined the requests comply with California Building Code and does not pose a health and safety risk; that paired with the narrower lot width than typical R-1 zone property (33 feet versus 60 feet), staff supports the waiver request.

Parking

Each proposed dwelling unit would include two (2) garage spaces and two (2) driveway spaces, for a total of 140 spaces, with the project providing an additional six (6) guest parking stalls on Street "B." Pursuant to Section 120.05.060 of the Eastvale Zoning Code, the project would exceed the City's minimum parking requirement of 70 spaces (2 spaces per dwelling unit) by 6 parking spaces (70 driveway spaces + 6 guest parking stalls). In addition, the site is parked in compliance with California Government Code Section 65915(p)(1)(B)(C) in that California Density Bonus Law allows 2.5 parking spaces per four or more bedrooms, inclusive of handicapped and guest parking. It should be noted, given the width of the private streets, that vehicles are prohibited from parking on the street.

The Major Development Review includes provisions requiring the following parking management practices, to be incorporated into the final, recorded CC&Rs, and applicable throughout the life of the project:

- Requiring onsite parking permits (such as stickers or hangtags) for any parking in the surface guest parking spaces;
- Policies for maximum times vehicles may be parked in the surface guest spaces;
- Policies for towing unauthorized vehicles; vehicles parked in unauthorized locations, such as fire lanes; vehicles parked in surface guest parking without a sticker, hangtag, or other identifiers; and vehicles parked longer than any maximum guest parking timeframes allowed;
- Policies prohibiting the parking, storage, or driving of commercial vehicle, RV, boat, trailer,

ATV, golf cart, or similar vehicle on-site;
- Policies requiring all garages be used for the sole purpose of housing parked vehicles (i.e., not for storage purposes); and
- Policies authorizing routine garage inspections to ensure garages are available for vehicle parking.

Walls and Landscaping
Section 120.05.030 Table 5.3-1 of the Eastvale Zoning Code establishes the height and development standards for fences, walls and screens within residential zoning districts. Pursuant to Table 5.3-1 fencing is limited to a maximum of six feet (6') in height.

The proposed fencing along the project's boundaries, including Hellman Avenue and Walters Street would consist of a six-foot (6') tall split face block with a tan concrete masonry unit (CMU) cap, and decorative pilasters consistent with the Zoning Code. Internal to the project site, return walls and privacy walls between residential lots consist of a six-foot (6') high, tan vinyl fence and vinyl gate. The northern tract boundary or rear walls of Lots 1-5 range in height due to the proposed grade differences between the subject site and the properties to the north. The northern wall is a combination retaining/privacy screen wall with a total max height of eight (8) feet (2' retaining + 6' privacy/screen) as visible from the properties to the north. The applicant is requesting a waiver from the six-foot height limitation to construct the northern wall.

The eastern tract boundary or rear walls of Lots 9-21 range in height due to the proposed grade differences between the subject site and the properties to the east. The eastern wall is a combination retaining/privacy screen wall with a total max height of 7.5 feet (1.5' retaining + 6' privacy/screen) as visible from the properties to the east. The applicant is requesting a waiver from the six-foot heigh limitation to construct the eastern wall. Staff has added a condition of approval that the applicant make a good faith effort to obtain approval of each adjacent property owner to the east in order to remove the existing block wall and replace with one singular block wall. Should an existing owner not wish to enter into such an agreement with the applicant and have the desire to keep their existing 6' block wall then the applicant shall construct their proposed 7.5' wall adjacent to the existing 6' wall and incorporate a weed abatement that would prevent vegetation from growing between the two walls.

The western tract boundary or rear walls of Lots 22-28 range in height due to the proposed grade difference between the subject site and the property to the west (APNs: 144-070-021 and 144-070-019). The western wall is a combination retaining/privacy screen wall with a total max height of eight (8) feet (2' retaining + 6' privacy/screen) as visible from the property to the west. The applicant is requesting a waiver from the six-foot height limitation to construct the northern wall.

Lastly, the rear walls of lots 31-35 (facing south) range in height due to the proposed grade difference between the subject site and the property to the south (APN: 144-070-019). The southern facing wall is a combination retaining/privacy screen wall with a total max height of eleven (11) feet (5' retaining + 6' privacy/screen) as visible from the property to the south. The applicant is requesting a waiver from the six-foot height limitation to construct this wall.

As stated before, if a city development standard would physically prevent the project from being built at the permitted density, the developer may propose to have those standards waived or reduced according to Government Code Section 65915(e)(1). In the case of the applicant's Wall and

Fence Plan, staff has reviewed the proposal and finds that the waivers are necessary to develop the site to the density permitted by right under the General Plan and HAA. The existing site topography with developed single family residential property to the north, south and east, is necessary to retain and stabilize the site via retaining walls as well as provide future residents the expected level of privacy (i.e., 6' screen wall).

The applicant's Preliminary Landscape Plans (**Attachment 4**) offer enhanced landscaped frontages (i.e., Hellman Avenue and Walters Street) and entrances into the future residential community (i.e., Street "A" and Street "B"), creating a sense of arrival. The frontages will be planted with Coastal Live Oak and Silk Oak trees, shrubs consisting of Fortnight Lily, Spanish Lavender, Little John, Sweet Bay, Compact Texas Ranger, and many others. Additionally, where visible, tract perimeter walls will be conditioned to be clad in Ivy to soften the appearance of the block walls and provide additional greening to the community. Finally, per the City of Eastvale's Residential Design Standards and Guidelines, each lot is required to plant a minimum of one (1) yard tree. To meet the Residential Design Standard the applicant proposes the following trees for both accent and screening purposes: Bisbane Box, and Fern Pine trees.

Overall, staff believes that the proposed landscape and wall plans are satisfactory. They are generally consistent with other approved tract wall/landscape plans and will ensure aesthetic treatment of the tracts common areas and other perimeter (publicly visible) portions of the tract, and will support a high-quality community design, similar to other developments areas throughout the city. A final landscape plan will be reviewed during the building permit process to ensure that the details of the proposed landscape plan comply with the City landscape regulations.

Density Bonus Agreement

The Density Bonus Agreement for the project is provided as **Attachment 6**. The Agreement identifies the affordable units, and their household income limits, and other pertinent language such as the term of the agreement. The following summaries the salient sections within the Agreement.

Of the total units in the development, two (2) units are proposed to be affordable to very-low income households (earning 30-50 percent of the area median income, which is currently set at $110,000 adjusted for a four-person household size, or a household income less than $55,950), as published by the California Department of Housing and Community Development (HCD). The applicant proposes both of the affordable units to be Plan 1 which consists of a 1,905 square foot, three-bedroom, two and a half bath, two story unit with a two (2) car garage. The proposed units will be distributed within the 35-unit community and are required to be comparable to the market-rate units in their appearance, materials, and exterior and interior finishes, appliances, and fixtures.

Other terms and conditions of the Density Bonus Agreement include:

- Homebuyers will be required to execute a Resale Restriction Agreement in which each restricted unit must be occupied as the homebuyer's principal residence.
- Affordable units cannot be concentrated in one location within the project site but instead dispersed throughout the project.
- The City has the right to inspect the affordable units and documents.

Public Hearing Notification and Comment

The project requires a minimum 10-day public hearing notification period for property owners and

commercial tenants within a 600-foot radius of the project site. The public hearing notice was published in the Press Enterprise newspaper on June 14, 2026, for the Planning Commission meeting on June 24, 2026, and mailing notices were mailed on June 11, 2026. The Notice of Public Hearing and a map showing the properties that received notification are included as **Attachment 10** and **Attachment 11**. As of this writing, staff has received two letters of concern from residents on this project. Copies of these letters can be found in **Attachment 14.**

Environmental

Pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15183, because implementation of the proposed project would not result in impacts that are peculiar to the project site and the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR, no additional environmental review beyond a Section 15183 Exemption Report is required for the proposed project. A Section 15183 Exemption Report was prepared for the project and has been included as **Attachment 5** of this report.

Strategic Plan Action - Priority Level: N/A | Target #: B | Goal #: E

Diversify the housing stock with more options.

Fiscal Impact

Processing the proposed applications will have little to no fiscal impact on the City as the project is funded by the applicant.

Prior City Council/Commission Action

On May 20, 2026, the Planning Commission took public testimony of the requested items and by a 4-0 vote, recommended the Eastvale City Council deny the proposed residential development based on perceived health and safety concerns, particularly related to inadequate infrastructure and the project's proximity to Philistine Rondo School of Discovery. Planning Commissioners emphasized the need for further analysis of potential impacts, including traffic circulation, pedestrian safety, and school-related conflicts, and requested staff and the City Attorney to evaluate whether these issues could constitute significant adverse impacts warranting denial. While recognizing legal constraints under State housing laws, the Commission concluded that, absent clear resolution or feasible mitigation of these concerns, the project should not be approved.

Following the May 20, 2026, Planning Commission meeting, staff analyzed the above noted concerns raised by the Planning Commission. With the proposed project, both Walters Street and Hellman Avenue would be widened to their ultimate street right-of-way per the General Plan along their project frontages. While widening would not create greater roadway capacity it would create additional street improvements (i.e. curb/gutter and sidewalks) and be consistent with the already developed portions of both Walters Street and Hellman Avenue.

The lack of sidewalks across from Philistine Rondo School of Discovery was another issue raised. With the proposed project, sidewalks would be installed along the project frontages of Walters Street and Hellman Avenue, as well as within the project itself. While specific concerns were raised about the lack of sidewalks at the corner of Walters and Hellman, the parcel located at the northeast corner of Walters Street and Hellman Avenue is not within the project boundary or owned by the applicant; thus, sidewalks are not proposed to be installed along the corner, nor can the City

require the offsite improvements. However, the sidewalks proposed on both sides of the streets within the project site would provide students a safer means of walking north to Hellman Avenue rather than along the remaining unimproved portions of Hellman Avenue. As additional sidewalks are to be installed and street improvements are to be made per the General Plan, staff believes the applicant has designed their project to meet City standards and ensure public safety to the greatest extent feasible while being inopportunely located across from Philistine Rondo School of Discovery where existing traffic circulation issues have been known to be challenging for existing residents.

BASIS OF BEARING
THE CENTERLINE OF WALTERS STREET BEING NORTH 84°20'55" WEST PER TRACT MAP NO. 31476, FILED IN BOOK 404 OF MAPS, AT PAGES 31 THROUGH 37, INCLUSIVE, RECORDS OF RIVERSIDE COUNTY, WAS HELD AS THE BASIS OF BEARINGS FOR THIS MAP.

BENCHMARK
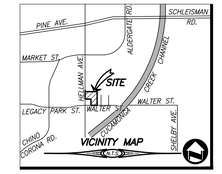
NGS PID DX4293
DESIGNATION: PINE

STAMPED PINE RM NO 2 1"16, IS 80.5 FEET WEST OF THE WEST EDGE OF CALIFORNIA HIGHWAY 83, 45.4 FEET NORTHEAST OF A METAL
WITNESS POST, 8.0 FEET NORTHEAST OF THE NORTHEAST CORNER OF THE CONCRETE IRRIGATION BOX, 2.2 FEET EAST OF A 6 FOOT HIGH CHAIN LINK FENCE, ABOUT 0.1 FOOT ABOVE STATION ELEVATION AND PROJECTS ABOUT 0.2 FOOT ABOVE THE GROUND.

ELEVATION: 564.60 NAVD 1988



LEGAL DESCRIPTION
REAL PROPERTY IN THE CITY OF EASTVALE, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

PARCELS 1 AND 2 OF PARCEL MAP NO. 10378 ON FILE IN BOOK 47 PAGE 19 OF PARCEL MAPS, OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, TOGETHER WITH THE EASTERLY 214.00 FEET OF PARCELS 3, 4 AND LOT E OF SAID PARCEL MAP NO. 10378.

APN: 144-070-016 (PARCEL 1); 144-070-017 (PARCEL 2); 144-070-018 (PORTION OF PARCEL 3) AND 144-070-020 (PORTION OF PARCEL 4 AND PORTION OF LOT E)

GENERAL PROJECT NOTES
1. THE PROJECT PROPERTY IS LOCATED WITHIN AN AREA DESIGNATED ZONE "X" AS SHOWN ON FLOOD INSURANCE RATE MAP NO. 06065C0618M, WITH AN EFFECTIVE DATE OF SEPTEMBER 12, 2024, FOR COMMUNITY NUMBER 060155, IN THE CITY EASTVALE, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, WHICH IS THE CURRENT FLOOD INSURANCE RATE MAP FOR THE COMMUNITY IN WHICH SAID PROPERTY IS SITUATED.
2. PUBLIC STREET IMPROVEMENTS PER CITY OF EASTVALE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION.
3. THOMAS BROS. MAP BOOK PAGE: 712, GRID H2, 2024 EDITION
4. NO SUBSURFACE SEPTIC DISPOSAL PROPOSED.
5. ALL EXISTING STRUCTURES ON SITE TO BE DEMOLISHED.
6. IN-TRACT STREETS ARE TO BE PRIVATE.
7. SINGLE FAMILY RESIDENTIAL DEVELOPMENT WILL NOT BE GATED.
8. ALL LOTS HAVE 1% MIN. GRADE TOWARDS THE STREET FOR DRAINAGE PURPOSES.
9. THERE ARE NO REMAINING PARCELS.
10. RUNOFF FROM THIS TRACT WILL BE ROUTED INTO THE AN EXISTING RIVERSIDE FLOOD CONTROL STORM DRAIN LINE THAT DISCHARGES INTO THE CUCAMONGA CREEK CHANNEL WHICH THEN FLOWS TO THE SANTA ANA RIVER.
11. PROJECT SITE IS WITHIN COMMUNITY SERVICES DISTRICT.
12. NO KNOWN WELLS ON SITE.
13. SITE IS NOT IN A FAULT ZONE.
14. SITE LIQUEFICATION POTENTIAL: VERY-HIGH.
15. ANY OPEN SPACE LOTS TO BE MAINTAINED BY HOME OWNERS ASSOCIATION.
16. PROJECT TO COMPLY WITH SCHEDULE A IMPROVEMENTS PER THE SUBDIVISION MAP ACT.
17. LOT DEPTH: 80.5'
    LOT WIDTH: 33'
    LOT SIZE: 2,848 SF
    SIDE YARD SETBACK - 4' MIN.
    SIDE YARD SETBACK (STREET ADJACENT) - 15' MIN.
    REAR YARD SETBACK - 10' MIN.
    GARAGE SETBACK - 18' MIN.
18. THIS PROJECT IS EXEMPT FROM HYDRAULIC CONDITIONS OF CONCERN (HCOC)
19. THE TENTATIVE TRACT MAP INCLUDES THE ENTIRE CONTIGUOUS OWNERSHIP OF THE LAND DIVIDER.
20. IMPERVIOUS SQUARE FOOTAGE:
    EXIST: 2,870 SF (0.06 AC)
    PROP: 86,900 SF (2.00 AC)

Irrigated w/ recycled water				1	0	0	0
Water features				1	0	0	0
				TOTALS	**0**	**0**	**0**
					ETWU Total (Gallons/year)		**618,466**
				Maximum Allowed Water Allowance (MAWA)[e] (Gallons/year)			**725,068**

MAWA

ETAF for residential areas is .55 or .45 for commercial areas

MAWA =	ETO *	Conv Factor *	((ETAF	*	LA)	+	(1-ETAF)	*	SLA))
	54.7	0.62	0.55		38,872		0.45		0
MAWA=	**725,068**								

ETAF Calculations

Regular Landscape Areas	
Total ETAF x Area	18,236
Total Area	38,872
Average ETAF	**0.47**

All Landscape Areas	
Total ETAF x Area	18,236
Total Area	38,872
Sitewide ETAF	**0.47**

A verage E T A F for R egular Landscape A reas must be 0.55 or b elo w for residential areas, and 0.45 or b elo w for non-residential areas.

LANDSCAPE CONCEPT NOTE:

THIS LANDSCAPE WILL CONSIST OF CALIFORNIA-FRIENDLY, LOW AND MEDIUM WATER USE PLANT MATERIAL. ALL PLANTS HAVE BEEN CHOSEN FROM THE LOW OR MEDIUM WATER USE CATEGORY ACCORDING TO WUCOLS. PLANTS HAVE BEEN CHOSEN TO CREATE A UNIFORM THEME ACROSS THE SITE CONSISTING OF MEDITERRANEAN AND CALIFORNIA FRIENDLY PLANT MATERIAL. MAINTENANCE AND LONGEVITY OF PLANT MATERIAL HAS BEEN TAKEN INTO CONSIDERATION. ROOT PANELS AND BARRIERS WILL BE UTILIZED ON ALL TREES NECESSARY, CONSISTENT WITH ALL STANDARDS AND SPECIFICATIONS. A 3" LAYER OF BARK MULCH WILL BE USED IN ALL LANDSCAPE AREAS. ALL LANDSCAPE AREAS WILL CONFORM TO ALL CURRENT LANDSCAPE GUIDELINES.

IRRIGATION CONCEPT NOTE:

THE IRRIGATION DESIGN WILL INCORPORATE THE LATEST IN SMART IRRIGATION TECHNOLOGIES. ALL NEW LANDSCAPE AREAS WILL INCLUDE HIGH EFFICIENCY, LOW WATER USE IRRIGATION EQUIPMENT AND METHODS. A SMART IRRIGATION CONTROLLER WITH A RAIN SHUT OFF DEVICE WILL ALSO BE INCORPORATED. BARK MULCH WILL BE USED TO RETAIN MOISTURE AND REDUCE EVAPORATION AND AN IRRIGATION SCHEDULE WILL BE PROVIDED TO PROGRAM THE CONTROLLER. TWO IRRIGATION SCHEDULES SHALL BE PREPARED, ONE FOR PLANT ESTABLISHMENT AND ONE FOR MAINTENANCE. ALL NEW IRRIGATION SYSTEMS WILL COMPLY WITH ALL CURRENT LANDSCAPE GUIDELINES.

INTERNATIONAL

1 INTRODUCTION

This Exemption Determination Report has been prepared pursuant to the requirements of the California Environmental Quality Act (CEQA) (California Public Resources Code, Sections 21000, et seq.) and the CEQA Guidelines (California Code of Regulations, Title 14, Sections 15000, et seq.).

CEQA Guidelines Section 15183, *Projects Consistent with a Community Plan or Zoning*, exempts from additional environmental review any project that is consistent with either the development density established by existing zoning, a community plan, or an existing general plan, for which an Environmental Impact Report (EIR) was previously certified, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site. This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies.

Pursuant to CEQA Guidelines Section 15183, a project cannot be exempt from CEQA if:

- project-specific impacts "peculiar" to the project or its site exist;
- there is a significant impact not evaluated in the prior EIR on the plan or zoning; and/or
- previously identified impacts are found to be more severe based on new information not known when the prior EIR was certified.

Further, Section 15183(c) of the CEQA Guidelines states, "If an impact is not peculiar to the parcel or to the project, has been addressed as a significant effect in the prior EIR, or can be substantially mitigated by the imposition of uniformly applied development policies or standards … then an additional EIR need not be prepared for the project solely on the basis of that impact."

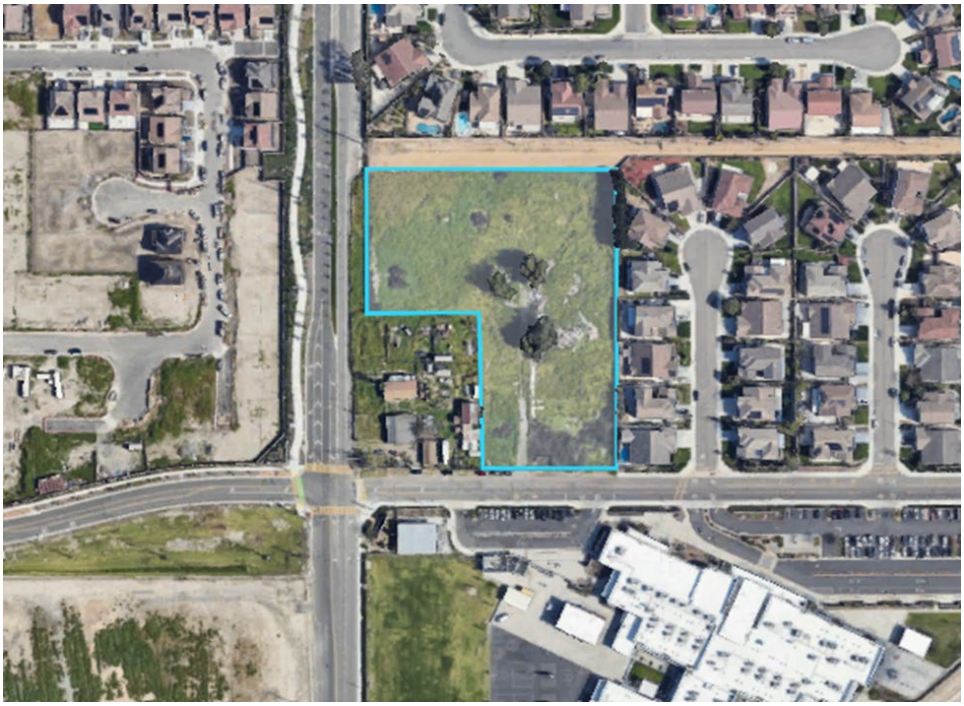
On March 27, 2024, the City of Eastvale (City) Council adopted the Eastvale General Plan 2040 (General Plan; City of Eastvale 2024a) and certified the Final EIR for the General Plan (State Clearinghouse No. 2022080090). The intent of this report is to document that: (1) implementation of the proposed PLN25-20102 project (project) would not result in impacts that are peculiar to the project site; and (2) there would be no new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger expanded environmental review, beyond this Section 15183 Exemption Report.

2 PROJECT DESCRIPTION

2.1 Project Location

The 3.57-acre project site is located at the northeast corner of Walters Street and Hellman Avenue, at 7500 Hellman Avenue (Assessor's Parcel Numbers [APNs] 144-070-016, 144-070-017, 144-070-018, and 144-070-020). The project site is currently vacant and is surrounded by single-family residential development to the north and east, with Walters Street and Rondo Elementary School of Discovery located to the south, and residential development and Hellman Avenue to the west; refer to Figure 1, *Project Site*.

FIGURE 1: PROJECT SITE



2.2 Project Characteristics

The project site is zoned as Heavy Agriculture (A-2) and is designated as Chandler Policy Area (CH-PA), which allows for a density of 5-8 dwelling units per acre (du/ac). The project proposes a 35-dwelling unit two-story detached single family residential development. The residences would include three to four bedrooms, two drive-in onsite parking spaces, and two driveway spaces for each unit. The project also proposes six shared parking spaces. Additional improvements include the development of underground detention facilities along the site's southern boundary, roads, and associated infrastructure (electrical, water, sewer, etc.). The project site provides two access points, one from Walters Street and one from Hellman Avenue. Refer to Appendix A, *Project Site Plan*, for the proposed layout of the project features.

Six percent (2 units) of the base density (29 units) would be designated as very low-income affordable units. Because of this provision of very low-income affordable units, the project is allowed a 22.5 percent density bonus per State Density Bonus Law (3.57 acres x 8 du/ac = 29 dwelling units [base density]; 29 dwelling units x 22.5 percent density bonus = 36 dwelling units). At the proposed 35 units, the project's density would be 9.8 du/ac, which exceeds the density allowed by the CH-PA (5-8 du/ac), however the additional units are permitted under State law regardless of the site's land use and zoning designation, along with any related concessions, incentives, and/or waivers needed to accommodate the bonus units.

3 ENVIRONMENTAL ANALYSIS

This section includes a discussion of the proposed project's consistency with the General Plan EIR, per CEQA Guidelines Section 15183. This analysis is based on a desktop review of the project site and project-specific technical studies. This section includes a brief discussion of environmental impacts that would be similar to those disclosed in the General Plan EIR, as well as a more detailed analysis of potential project impacts that could be site specific, including biological resources, cultural and tribal cultural resources, paleontological resources, geology and soils, and hazards and hazardous materials.

3.1 Environmental Topics Considered but Not Discussed Further

The following topics were considered but no peculiar impacts, and no new or more severe impacts beyond what was previously evaluated and disclosed by the General Plan EIR, were identified. As a result, there is no further discussion about these issues in this document.

- **Air Quality:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, neither construction nor operation of the proposed 35-unit residential project would result in air quality impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Energy and Greenhouse Gases:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, neither construction nor operation of the proposed 35-unit residential project would result in energy or greenhouse gas impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Hydrology and Water Quality:** The project contractor would be required to comply with federal, state, and local regulations to ensure the proposed project would not result in construction-related hydrology or water quality impacts that are peculiar or more severe than those disclosed in the General Plan EIR. Additionally, implementation of a project-specific stormwater management plan would ensure that project operation would not result in peculiar or more severe operational impacts than those disclosed in the General Plan EIR.

- **Land Use and Planning:** With approval of the project applicant's density bonus waivers, which are allowable due to the provision of very low-income residential units, the proposed project would be consistent with the development density allowed on the project site by the General Plan. Therefore, the proposed project would not result in land use and planning impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Noise:** The project contractor would be required to comply with the City's Noise Ordinance, which restricts the timing on construction activities. Additionally, because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, construction and operation of the proposed 35-unit residential project would not result in noise impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Population and Housing:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, the proposed 35-unit residential project would not result in population and housing impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Public Services and Recreation:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, the proposed 35-unit residential project would not result in public services or recreation impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Transportation:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, the proposed 35-unit residential project would not result in transportation impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Utilities and Service Systems:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, the proposed 35-unit residential project would not result in utilities and service systems impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Effects Found Not to Be Significant in the General Plan EIR:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan upon application of the State Density Bonus Law, the proposed 35-unit residential project would not result in aesthetics, agriculture and forestry resources, mineral resources, or wildfire impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

3.2 Biological Resources

Summary of Findings in the General Plan EIR: Impacts to biological resources were analyzed in Section 3.2, *Biological Resources*, of the General Plan EIR. Eastvale is generally a highly developed area with limited natural open space, although sensitive vegetation communities, jurisdictional waters and wetlands, and special-status plant and wildlife species occur (or have the potential to occur) within the City's boundaries. The most prominent natural resource within the City is the Santa Ana River and surrounding riparian and woodland habitat. The Santa Ana River forms the southern boundary of Eastvale and is an important local and regional open space resource. Portions of the City along the Santa Ana River, as well as the northernmost portion of the City, are included in the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP), of which the City is a signatory.

The General Plan EIR acknowledges that grading and construction activities associated with future development could impact sensitive biological resources. In accordance with MSHCP requirements, preparation of a project-specific General Biological Resource Assessment for development proposals located in areas with the potential to contain special-status species and/or sensitive habitat identified by the MSHCP would be required. Further, future development would be subject to compliance with relevant federal, state, and local requirements, including the federal and state Endangered Species Acts, Clean Water Act, Migratory Bird Treaty Act, California Fish and Code, and MSHCP policies.

The analysis in the General Plan EIR concluded that with implementation of the General Plan policies and the City's preapplication review process (which includes a project-specific General Biological Resource Assessment in areas with the potential to contain MSHCP-identified special-status species and/or sensitive habitat), as well as continued adherence to federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts to biological resources.

Impacts Associated with the Proposed Project: A Biological Resources Assessment, Jurisdictional Delineation, and MSHCP Consistency Analysis (JE 2026) dated February 2026 was prepared for the proposed project by Jennings Environmental LLC (JE) and is included as Appendix B of this report. No sensitive vegetation communities, potentially jurisdictional areas, special-status species (including MSHCP narrow endemic plants), or MSHCP riparian/riverine areas were observed on-site during biological reconnaissance-level survey and protocol surveys conducted on December 20, 2025.

Regarding special status species, the burrowing owl (BUOW) is a State candidate for endangered status and a state and federal Species of Special Concern (SSC). No evidence of BUOW including pellets, feathers, or whitewash was found within the project area or buffer. No suitably sized burrows or burrow surrogates were observed on the subject parcel and no-host burrowers were observed during the survey. Despite these negative findings, the project site does contain low quality habitat for this species. Because the project site retains low potential to support BUOW, to prevent any potential impacts to this species protocol surveys were conducted in compliance with the requirements of the MSHCP. Although BUOW was not detected, implementation of **SDC BIO-1** would ensure that protective measures remain in place for this species, consistent with the MSHCP.

According to the Biological Resources Assessment, portions of the project site and the immediate surrounding area provide suitable habitat for nesting birds. There are mature trees onsite and in the adjacent parcels, and site provides suitable habitat for other ground nesting species (i.e. killdeer [*Charadrius vociferus*]). Implementation of **SDC BIO-2** would ensure the protection of nesting birds. **SDC BIO-2** requires that a qualified avian biologist conduct pre-construction Nesting Bird Surveys (NBS) within three days prior to any ground-disturbing or construction activities. If no active nests are found, construction may proceed. If an active nest is detected, the biologist would establish no-work buffers based on nest sensitivity, nesting stage, and anticipated construction disturbance. Additionally, **SDC BIO-3** requires implementation of Best Management Practices (BMPs) from Appendix C of the MSHCP. These BMPs are intended to minimize indirect impacts during construction and ensure compliance with the MSHCP's general resource protection standards. Implementation includes keeping the site clean to avoid attracting predators of the species of concern and restricting all construction activities and equipment within fenced work areas. **SDC BIO-3** reduces the potential for unnecessary or incidental impacts during construction.

The following standardized Site Development Conditions (SDCs) will be required for the proposed project:

SDC BIO-1: **Preconstruction Burrowing Owl Survey.** In accordance with the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP) species-specific objective #6 for burrowing owl, a preconstruction survey for burrowing owl shall be conducted within 30 days prior to ground disturbance by a qualified biologist where suitable habitat is present

within the study area (project site and surrounding 500-foot buffer). If active burrowing owl burrows are detected during the breeding season (March 1 through August 31), all work within 300 feet of any active burrow will be halted until that nesting effort is finished as determined by a qualified biologist. Work can resume when no other active burrowing owl nesting efforts are observed. If active burrowing owl burrows are detected outside the breeding season (September 1 through February 28), then a Burrowing Owl Exclusion Plan shall be prepared by the project applicant and approved by the County of Riverside Environmental Programs Department in consultation with the California Department of Fish and Wildlife (CDFW). The Burrowing Owl Exclusion Plan shall be prepared in accordance with guidelines in the CDFW Staff Report on Burrowing Owl (2012) and the MSHCP, which allows for passive relocation (i.e., use of one-way doors and collapse of burrows). Burrowing owl burrows shall be excavated with hand tools by a qualified biologist when determined to be unoccupied and backfilled to prevent reentry.

SDC BIO-2: **Preconstruction Nesting Bird Survey.** Prior to ground disturbances that would impact potentially suitable nesting habitat for avian species, the project applicant shall adhere to the following:

1. To avoid impacts to nesting birds (common, migratory, and special status) regardless of the time of year during the nesting season, a qualified avian biologist retained by the project applicant will conduct pre-construction Nesting Bird Surveys within three (3) days prior to project-related disturbance within the entire project site and a 300-foot buffer around the project site at the appropriate time of day/night, during appropriate weather conditions to nestable vegetation to identify any active nests. Surveys shall encompass all suitable areas including trees, shrubs, bare ground, burrows and cavities. If no active nests are found, no further action will be required.

2. If a nest is suspected, but not confirmed, the qualified avian biologist shall establish a disturbance-free buffer until additional surveys can be completed prior to the commencement of ground disturbing project activities. If an active nest is found, the qualified avian biologist will set appropriate no-work buffers around the nest which will be based upon the nesting species, its sensitivity to disturbance, nesting stage, and expected types, intensity, and duration of the disturbance. If a nest is observed, but thought to be inactive, the qualified avian biologist shall monitor the nest for one hour (four hours for raptors) prior to approaching the nest to determine status. The qualified avian biologist shall not risk failure of the nest to determine the exact location or status and shall make every effort to limit the nest to potential predation as a result of the survey/monitoring efforts (e.g., limit number of surveyors, limit time spent at/near the nest, scan the site for potential nest predators before approaching, immediately depart nest area if indicators of stress or agitation are displayed). The buffer shall be of a distance to ensure avoidance of adverse effects to the nesting bird. The qualified avian biologist shall use their best professional

judgement regarding the monitoring period and whether approaching the nest is appropriate. The nests and buffer zones shall be field-checked daily weekly by a qualified biological monitor. The approved no-work buffer zone shall be clearly marked in the field, within which no disturbance activity shall commence until the qualified biologist has determined the young birds have successfully fledged and the nest is inactive.

SDC BIO-3: **Implement Standard Best Management Practices.** To ensure consistency with the goals and objectives of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP), the proposed project will adhere to MSHCP Appendix C, Standard Best Management Practices.

Conclusion: With implementation of **SDC BIO-1** through **SDC BIO-3** and compliance with the Western Riverside County MSHCP, the proposed project would not result in impacts to biological resources that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

3.3 Cultural and Tribal Cultural Resources

Summary of Findings in the General Plan EIR: Impacts to cultural resources and tribal cultural resources were analyzed in Section 3.3, *Cultural Resources*, and Section 3.12, *Tribal Cultural Resources*, of the General Plan EIR. No historic resources listed in the National Register of Historic Places or the California Register of Historical Resources occur within the City's boundaries, although the City contains one locally historic resource, the Desi House. In accordance with Senate Bill 18 and Assembly Bill (AB) 52, the City notified local tribes about the General Plan on August 2, 2022. The Gabrielieño Tongva Indians of California, the Agua Caliente Band of Cahuilla Indians, and the Rincon Band of Luiseño Indians responded in August 2022 and declined consultation. The Gabrieleño Band of Mission Indians-Kizh Nation also declined consultation for the General Plan but requested to be consulted for future ground-disturbing development projects within the City.

The General Plan EIR acknowledges that grading and construction activities associated with future development could unearth unknown historical or archaeological resources and/or disturb human remains during ground-disturbing activities. General Plan Policy CO-6.4 requires a Phase I Cultural Resources Assessment for new development proposals that occur on native soils. Additionally, future site-specific development proposals subject to CEQA would be required to undergo government-to-government consultation in accordance with AB 52 requirements, and would be required to implement any project-specific SDCs to reduce impacts to tribal cultural resources. Further, future development would be subject to compliance with relevant federal, state, and local requirements, including California Health and Safety Code Section 7050.5 and California Public Resources Code Section 5097.98, which pertain to the treatment of human remains.

The analysis in the General Plan EIR concluded that with implementation of the General Plan policies and the City's preapplication review process (which includes a project-specific Cultural Resources Assessment for projects that could impact native soils and, if required, project-specific AB 52 consultation), as well as

continued adherence to applicable federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts to cultural resources and tribal cultural resources.

Impacts Associated with the Proposed Project: A Historical/Archaeological Resources Survey Report dated March 23, 2026 (CRM 2026) was prepared for the proposed project by CRM Tech. This technical study is included as Appendix C of this report.

To evaluate the project's potential to support historic resources, a records search request was submitted to the South Central Information Center (SCIC) and the South Central Coastal Information Center (SCCIC). The search was conducted to identify previously recorded cultural resources and previously conducted cultural resources studies within a one-mile radius of the project site. In addition, a Sacred Lands File search was requested from the Native American Heritage Commission (NAHC). An intensive-level cultural resources field survey of the project site was conducted on December 17, 2025. The survey was conducted by walking parallel transects spaced approximately 15 meters apart. Digital photographs were taken at various points within the project boundaries and all soil exposures were carefully examined for evidence of cultural resources; refer to Appendix C.

The records search revealed that more than cultural resource studies were previously conducted within one-mile of the project site. One Study, conducted in 2018, overlapped the project site. The previous studies resulted in the recording of 31 historical/archaeological sites within the records search scope, including three (3) prehistoric (i.e., Native American) sites and 28 historic-period sites as listed in Table 1 of Appendix C. None of these resources were identified within the project boundaries, although three (3) were recorded on properties adjacent to the project site. In addition, the Sacred Lands File identified no Native American cultural resources in the project vicinity, and the field survey was negative for cultural and historic resources.

Nonetheless, given the low ground visibility on the project site and presence of adjacent resources, there is potential for the presence of buried cultural resources on-site.

The following standardized SDCs will be required for the proposed project:

SDC CUL-1: **Cultural Resources Monitoring Plan.** Prior to issuance of a grading permit, the project applicant shall provide written verification that a qualified archaeologist has been retained to develop and implement a Cultural Resources Monitoring Plan (CRMP). The CRMP shall address the details of all monitoring activities and procedures to be followed to reduce the impacts to cultural and historic resources to a less than significant level as well as addressing potential impacts to undiscovered buried archaeological resources associated with this project. The CRMP shall be reviewed by any consulting tribe(s) and reviewed and approved by the City.

SDC CUL-2: **Tribal Monitoring and Treatment Agreement.** The project applicant shall provide for Native American monitoring during grading. The Native American monitor(s) shall work in concert with the archaeological monitor to observe ground disturbances and search for cultural materials. The City shall coordinate with the consulting tribe(s) to facilitate communications with the project developer/applicant so that all parties can develop a

mutually acceptable Tribal Monitoring and Treatment Agreement, which will include the scope of monitoring, scheduling of monitors from individual consulting tribe(s), and the course of action for inadvertent discoveries.

SDC CUL-3: **Cultural Resources Worker Sensitivity Training.** The project archaeologist and the consulting tribes(s) shall attend the pre-grading meeting with the City, the construction manager, and any contractors, and will conduct a mandatory cultural resources worker sensitivity training. The training will include a brief review of the cultural sensitivity of the project site and the surrounding area; what resources could potentially be identified during earth-moving activities; the requirements of the monitoring program; the protocols that apply in the event that inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols.

SDC CUL-4: **Inadvertent Discovery.** The protocols and stipulations that the contractor, City, consulting tribe(s), and project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation, include the following.

1. During the original cutting of previously undisturbed deposits, the archaeological and tribal monitors (if applicable) shall be on-site, as determined by the consulting archaeologist, to monitor excavations. The frequency of inspections will depend upon the rate of excavation, the materials excavated, and the presence and abundance of artifacts and features. The consulting archaeologist shall have the authority to modify the monitoring program if the potential for cultural resources appears to be less than anticipated.

2. Isolates and clearly non-significant deposits will be minimally documented in the field so the monitored grading can proceed.

3. In the event that previously unidentified cultural resources are discovered, the archaeologist shall have the authority to divert or temporarily halt ground disturbance operation in the area of discovery to allow for the evaluation of potentially significant cultural resources. The archaeologist shall contact the City at the time of discovery. The archaeologist, in consultation with the City, shall determine the significance of the discovered resources. The City must concur with the evaluation before construction activities will be allowed to resume in the affected area. For significant cultural resources, a research design and data recovery program to mitigate impacts shall be implemented by the consulting archaeologist and approved by the City before being carried out using professional archaeological methods. If any human bones are discovered, the County coroner and City shall be contacted. In the event that the remains are determined to be of Native American origin, the Most Likely Descendant (as identified by the Native American Heritage Commission) shall

be contacted in order to determine proper treatment and disposition of the remains.

4. Before construction activities are allowed to resume in the affected area, the artifacts shall be recovered, and features recorded using professional archaeological methods. The project archaeologist in consultation with the consulting tribe(s) shall determine the amount of material to be recovered for an adequate artifact sample for analysis.

SDC CUL-5: **Treatment of an Inadvertent Discovery.** One or more of the following treatments, in order of preference, shall be used in the event of a cultural resources discovery:

1. Preservation-in-place. Avoidance, or preservation-in-place, involves leaving a resource where it was found with no development affecting its integrity. Pursuant to Public Resources Code Section 21083.2(b), avoidance is the preferred method of preservation for archaeological and cultural resources.

2. Reburial on the project site in an area not subject to future disturbance. Reburial of a resource shall include provisions to protect the selected reburial area from any future impacts in perpetuity. Reburial shall not occur until all required cataloging and basic recording have been completed, with the exception of sacred items, burial goods, and Native American human remains. Any reburial process shall be culturally appropriate. The listing of contents and the location of the reburial shall be included in a confidential Final Monitoring Report (refer to SDC CUL-6).

3. If preservation-in-place or reburial is not feasible, all cultural material collected during the grading monitoring program shall be processed and curated according to the current professional repository standards in a Riverside County curation facility that meets the Office of Historic Preservation *Guidelines for the Curation of Archaeological Resources* (California Office of Historic Preservation 1993). The collections and associated records shall be transferred, including title, and accompanied by payment of the fees necessary for permanent curation.

SDC CUL-6: **Final Monitoring Report.** A Final Monitoring Report, documenting the field and analysis results and interpreting the artifact and research data within the research context, shall be completed and submitted to the satisfaction of the City prior to the issuance of any building permits. The report will include the California Department of Parks and Recreation's Primary and Archaeological Site Forms. The Final Monitoring Report shall be filed with the City under a confidential cover and not subject to Public Records Request and a copy of the report shall be submitted to the consulting tribe(s).

Conclusion: With implementation of **SDC CUL-1** through **SDC CUL-6** and compliance with relevant federal, state, and local requirements, including California Health and Safety Code Section 7050.5 and California

Public Resources Code Section 5097.98, the proposed project would not result in impacts to cultural resources or tribal cultural resources that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

3.4 Geology and Soils

Summary of Findings in the General Plan EIR: Impacts to geology and soils were analyzed in Section 4.3, *Geology and Soils*, of the General Plan EIR. Earthquake risk is very high in western Riverside County (including Eastvale) due to the presence of two of California's most active faults: the San Andreas Fault and the San Jacinto Fault. In the City, earthquake-triggered geologic effects could include ground shaking, landslides, liquefaction, and subsidence. Future development would be required to comply with grading standards established in the City's Municipal Code, as well as the City's Building Code (Municipal Code Chapter 110.04) and the California Building Code. The General Plan includes several policies that would minimize risks to public health, safety, and welfare resulting from geologic and seismic hazards, including Policy S-2.3, which requires proposed developments in areas of known or suspected seismic or other geologic hazards to submit a project-specific geotechnical report and ensure appropriate SDCs are incorporated.

Impacts to paleontological resources were also analyzed in Section 4.3 of the General Plan EIR. Portions of the City are designated as areas of high sensitivity for paleontological resources as mapped by the County of Riverside (City of Eastvale 2024b). The General Plan EIR acknowledges that much of the future development would occur on already developed sites and would not be anticipated to unearth unknown paleontological resources.

The analysis in the General Plan EIR concluded that with implementation of the General Plan policies and the City's preapplication review process (which includes a project-specific geotechnical report in areas of known or suspected seismic or other geologic hazards), as well as continued adherence to federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts to geology and soils. The analysis in the General Plan EIR concluded that with implementation of the City's preapplication review process (which includes a project-specific paleontological resources study for projects, as determined necessary by the City Community Development Department), implementation of the General Plan would result in less than significant impacts to paleontological resources.

Impacts Associated with the Proposed Project: The project site is mapped by Riverside County as having very high liquefaction potential and being susceptible to subsidence.[1] Liquefaction is the process where saturated, loose soil temporarily loses strength and behaves like a liquid during earthquake shaking, causing severe structural damage. Subsidence is the general sinking or lowering of the ground surface, which can occur due to liquefaction, causing gradual or sudden settlement.

[1] Riverside County Geographic Information System (GIS), *Map My County Public Viewer,* https://gis1.countyofriverside.us/Html5Viewer/?viewer=MMC_Public, accessed March 26, 2026

In accordance with Eastvale 2040 General Plan Policy S-2.3, projects proposed in areas of known or suspected seismic or other geologic hazards, such as the Alquist-Priolo Fault Zones and liquefiable soils, require submittal of a geotechnical report which incorporates appropriate protection measures.

In conformance with Eastvale 2040 General Plan Policy S-2.3, a project-specific Geotechnical Investigation, was prepared by Alta California Geotechnical, Inc. (Alta) and is included as Appendix D of this report. Alta conducted a subsurface investigation of the project site on April 17, 2025, which consisted of five geotechnical exploratory borings and two infiltration test borings on the project site. Based on laboratory testing conducted on the borings, as well as review of published geologic maps, the project site was determined to be underlain by young alluvial fan deposits. Alta performed a liquefaction analysis utilizing blow count data from the subsurface investigation to determine the liquefaction potential of the younger alluvium. Based on the liquefaction analysis, design recommendations specific to the prevention of bearing failure and settlement in Sections 6.1.2 and 7.1 of the Geotechnical Investigation. With adherence to the design recommendations included in the Geotechnical Investigation, the project would not result in liquefaction or subsidence impacts greater than identified in the General Plan EIR.

Concerning paleontological resources, the project site is mapped by Riverside County as having High Paleontological Sensitivity.[2] As a result, a project-specific Paleontological Resources Assessment Report was prepared by CRM Tech and is included as Appendix E of this report. According to the Paleontological Resources Assessment Report, surface sediments within the project area are relatively young and have been substantially disturbed by past land uses, resulting in a low potential for containing significant nonrenewable paleontological resources at shallow depths. However, the geologic units underlying the project site consist of Pleistocene-aged alluvial deposits. Pleistocene alluvial units are highly paleontologically sensitive, and any unknown fossil materials at the project site would likely be scientifically significant. Although no vertebrate fossil localities are recorded directly within the project site, fossil remains have been recovered from similar alluvial deposits in the surrounding area. Based on these findings, to protect potential subsurface paleontological resources, **SDC PAL-1** and **SDC PAL-2** would require a Society of Vertebrate Paleontology (SVP)-qualified paleontologist to be retained prior to ground-disturbing construction activities to prepare a Paleontological Resources Impact Mitigation Program (PRIMP) to guide monitoring procedures and establish protocols to follow in the event of a fossil discovery in the event of inadvertent discovery of paleontological resources. With implementation of **SDC PAL-1** and **SDC PAL-2**, impacts would be less than significant.

The following standardized SDCs will be required for the proposed project:

SDC PAL-1: **Paleontological Resources Impact Mitigation Program.** Prior to the issuance of any grading permit, the project applicant shall provide written evidence to the City that the project applicant has retained a qualified paleontologist to develop and implement a Paleontological Resources Impact Mitigation Program (PRIMP) to guide monitoring procedures and establish protocols to follow in the event of a fossil discovery. The paleontologist shall be present at the pre-grading conference, shall describe procedures for paleontological resource surveillance, including monitoring of all earth-moving

[2] Riverside County Geographic Information System (GIS), *Map My County Public Viewer,* https://gis1.countyofriverside.us/Html5Viewer/?viewer=MMC_Public, accessed March 26, 2026

operations that extend beyond two feet below the existing ground surface, and shall establish in the PRIMP, in cooperation with the project applicant and City, procedures for temporarily halting or redirecting work to permit sampling, identification, and evaluation of the fossils. The monitor should be prepared to quickly salvage fossils as they are unearthed to avoid construction delays and should collect samples of sediments that are likely to contain fossil remains of small vertebrates or invertebrates. The monitor shall also have the authority to temporarily halt or divert grading equipment to allow for the removal of abundant or large specimens. Sediment samples collected during monitoring shall be processed to recover small fossil remains, and all recovered specimens shall be identified and curated in a repository that provides permanent, retrievable storage. If the paleontological resources are found to be significant, the paleontologist shall determine appropriate actions, in cooperation with the project applicant, which ensure proper exploration and/or salvage.

SDC PAL-2: **Post-completion Discovery.** If paleontological resources are uncovered and after completion of the project, the project applicant shall submit the paleontologist's follow-up report for approval by the City. The report shall include the period of inspection, a catalogue and analysis of the fossils found, and the present repository of the fossils. A report of findings shall be prepared that includes an itemized inventory of all recovered specimens. The report shall also provide a discussion of the scientific significance of the paleontological findings, if any. The project applicant shall prepare excavated material to the point of identification. The project applicant shall offer excavated finds for curatorial purposes to the City or its designee, on a first refusal basis. These actions, as well as final mitigation and disposition of the resources, shall be subject to approval by the City. The project applicant shall make a one-time payment of curatorial fees for the storage of these resources in perpetuity.

Conclusion: With adherence to the design recommendations in Appendix D, the City's grading standards and Building Code, the California Building Code, and other applicable Federal, State, and local regulations and requirements, the proposed project would not result in impacts to geology or soils that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR.

With implementation of **SDC PAL-1** and **SDC PAL-2**, the proposed project would not result in impacts to paleontological resources that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR.

Accordingly, the proposed project would not trigger additional environmental review.

3.5 Hazards and Hazardous Materials

Summary of Findings in the General Plan EIR: Impacts from hazards and hazardous materials were analyzed in Section 3.5, *Hazards and Hazardous Materials*, of the General Plan EIR. On June 20, 2023 (when the impact analysis for the General Plan EIR was conducted), there were 26 hazardous materials

sites in the City's boundaries, with the closest hazardous materials site located approximately 0.6 miles north of the project site. It is noted that all 26 sites have been cleaned up and require no further action.

The General Plan EIR acknowledges that future development could involve grading and excavation activities that could expose construction workers and the public to previously unknown hazardous substances present in the soil. To reduce impacts associated with unknown hazardous wastes, future development would be required to prepare a project-specific Phase I Environmental Site Assessment for any properties identified on any list of hazardous materials compiled pursuant to Government Code Section 65962.5. Additionally, if asbestos-containing materials (ACM) and/or lead-based paints (LBP) are identified during site-specific hazardous materials inspections, abatement activities would be required to occur prior to demolition. The analysis in the General Plan EIR concluded that with implementation of the General Plan policies, as well as continued adherence to federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts related to hazards and hazardous materials.

Impacts Associated with the Proposed Project: A Phase I Environmental Site Assessment (ESA), prepared by Stantec Consulting Services, Inc. and dated May 1, 2025, was prepared for the proposed project; refer to Appendix F. Based on review of historical sources including aerial photographs and City directory listings, the project site was formerly utilized for livestock holding and a storage area of the trucks and trailers used in the transportation of livestock. During the site reconnaissance conducted as part of the Phase I ESA, a former cattle pen was observed in the southern portion of the project site along Walters Avenue. No evidence of dairy operations or agricultural use was observed on the project site. There was no visible evidence of former or existing aboveground or underground storage tanks on the project site. Debris piles with various household debris, used tires, and building demolition waste were observed in the center of the project site. In addition, an irrigation well was identified in the northern portion of the project site.

The Phase I ESA acknowledges that, based on the age of existing debris piles onsite, there is potential for asbestos-containing materials (ACM) exposure during demolition activities. In accordance with State and Federal law, the project would be conditioned to require ACM surveys to be performed prior to demolition activities (**SDC HAZ-1**).

While the Phase I ESA indicated that the irrigation well in the northern portion of the project site does not represent an environmental concern in its current condition, an unused well can pose safety hazards or interfere with grading and construction activities. **SDC HAZ-2** would be applied to the project to properly decommission the existing irrigation well in conformance with applicable regulatory standards.

The Phase I ESA also indicated that the project site is located within Environmental Protection Agency (EPA) Radon Zone 2, indicating a moderate potential for radon. However, due to the absence of any proposed occupied subgrade areas, radon testing is not warranted; refer to Appendix F.

The following standardized SDCs will be required for the proposed project:

SDC HAZ-1: **ACM Survey.** Prior to any demolition, grading, or off-site disposal of debris, the project shall be conditioned to require that all discarded building materials be evaluated for the presence of asbestos-containing materials (ACMs) in accordance with applicable federal,

state, and local regulations. If ACMs are identified, they shall be handled, removed, and disposed of by a licensed asbestos abatement contractor following all regulatory requirements.

SDC HAZ-2: **Well Decommissioning.** If the existing irrigation well will not be used as part of the redevelopment, it shall be properly decommissioned prior to grading activities. Well abandonment shall be performed in accordance with all applicable state and local regulatory requirements.

Conclusion: With implementation of **SDC HAZ-1** and **SDC HAZ-2**, adherence to applicable Federal, State, and local laws and regulations related to ACM abatement and well decommissioning, the proposed project would not result in impacts related to hazards and hazardous materials that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

4 ENVIRONMENTAL REVIEW CONCLUSION

The analysis presented in Section 3 demonstrates that the proposed project meets the requirements of CEQA Guidelines Section 15183, and as such, no additional CEQA review, such as a Subsequent or Supplemental EIR, is required for the project. Specifically:

- Upon approval of the project applicant's density bonus waiver on minimum lot size, which is allowable due to the provision of very low-income residential units, the proposed project would be consistent with the development density allowed on the project site by the adopted General Plan (CEQA Guidelines Sections 15183[a] and 15183[d]);
- The proposed project would not result in environmental impacts that are peculiar to the project or project site (CEQA Guidelines Section 15183[b][1]);
- The proposed project would not result in new significant environmental effects beyond those disclosed in the General Plan EIR (CEQA Guidelines Section 15183[b][2]);
- The proposed project would not result in potentially significant off-site or cumulative impacts beyond those disclosed in the General Plan EIR (CEQA Guidelines Section 15183[b][3]);
- There is no substantial new information that was unknown at the time the General Plan EIR was certified, and as such, the proposed project would not result in more severe adverse impacts than those disclosed in the General Plan EIR (CEQA Guidelines Section 15183[b][4]);

Pursuant to CEQA Guidelines Section 15183, because implementation of the proposed project would not result in impacts that are peculiar to the project site and the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR, no additional environmental review beyond this Section 15183 Exemption Report is required for the proposed project.

SECTION 1.0 - INTRODUCTION

Jennings Environmental, LLC (Jennings) was retained by Warmington Residential, Inc. to conduct a literature review and site survey for the proposed Eastvale 3 Housing Development (Project), in the City of Eastvale, Riverside County, California. The survey identified vegetation communities, the potential for the occurrence of special status species, or habitats that could support special status wildlife species, and recorded all plants and animals observed or detected within the Project boundary. This biological resources assessment is designed to address the potential effects of the proposed project on designated critical habitats and/or any species currently listed or formally proposed for listing as endangered or threatened under the federal Endangered Species Act (ESA) and the California Endangered Species Act (CESA) or species designated as sensitive by the California Department of Fish and Wildlife (CDFW) or the California Native Plant Society (CNPS).

Information contained in this document is in accordance with accepted scientific and technical standards that are consistent with the requirements of the United States Fish and Wildlife Service (USFWS) and CDFW. Additionally, the site was surveyed for any drainage features that would meet the definition of the Waters of the US (WOUS), Waters of the State (WOS), or CDFW jurisdiction. Additionally, the project is located within the Western Riverside Multiple Species Habitat Conservation Plan (MSHCP). As such, this report also contains the results of the consistency analysis performed for the project.

1.1 PROJECT LOCATION

The project is generally located within Section 34, Township 2 South, Range 7 West, and is depicted on the *Corona North* U.S. Geological Survey's (USGS) 7.5-minute topographic maps. More specifically the project is located within APNs 144-070-016, -017, -018, and -020, within the city of Eastvale, Riverside County, California. The Project site is located just northeast of the intersection of Walters Street and Hellman Ave. The site is surrounded by mix of vacant parcels, developed residential parcels, and the Rondo Elementary School of Discovery (Figures 1 and 2 in Appendix A).

1.2 PROJECT DESCRIPTION

The proposed Project is to develop the site with approximately 35 single family homes. The Project proposes to sub-divide the parcels into 35 individual lots. Additional improvements include the development of a water quality basin, roads, and associated infrastructure (electrical, water, sewer, etc.).

2.0 – METHODOLOGY

2.1 LITERATURE REVIEW

Prior to performing the field survey, existing documentation relevant to the Project site was reviewed. The most recent records were reviewed for the following quadrangle containing and surrounding the Project site: *Corona North, Guasti, Ontario, and Prado Dam,* USGS 7.5-minute quadrangles. The *Guasti, Ontario, and Prado Dam* quads were included in this search due to the site's proximity to their boarders. These databases contain records of reported occurrences of federal- or state-listed endangered or

threatened species, California Species of Concern (SSC), or otherwise special status species or habitats that may occur within or in the immediate vicinity of the Project site. These sources include:

- California Natural Diversity Database (CNDDB) managed by CDFW (CDFW 2026)
- USFWS Critical Habitat Mapper (USFWS 2026)
- California Native Plant Society's Electronic Inventory (CNPSEI) of Rare and Endangered Vascular Plants of California (CNPS 2026), issuer of the California Rare Plant Rank.
- U.S. Fish and Wildlife (USFWS) threatened and endangered species occurrence GIS overlay;
- National Wetlands Inventory Maps (NWI) {USFWS, 2026}
- USDA Natural Resources Conservation Service (NRCS) Web Soil Survey;
- USGS National Map;
- Calwater Watershed Maps
- Environmental Protection Agency My Waters Maps
- USFWS Designated Critical Habitat Maps
- MSHCP Information Map, Version 2.0

2.2 SOILS

Before conducting the surveys, soil maps for Riverside County were referenced online to determine the types of soil found within the Project site. Soils were determined in accordance with categories set forth by the United States Department of Agriculture (USDA) Soil Conservation Service and by referencing the USDA Natural Resources Conservation Service (NRCS) Web Soil Survey (USDA 2026).

2.3 BIOLOGICAL RECONNAISSANCE-LEVEL SURVEY AND PROTOCOL SURVEYS

Jennings biologist, Gene Jennings, conducted the general reconnaissance survey within the Project site to identify the potential for the occurrence of special status species, vegetation communities, or habitats that could support special status wildlife species. The surveys were conducted on foot, throughout the Project site between 0800 and 0900 hours on December 20, 2025. Weather conditions during the survey included cloudy skies, temperatures ranging from 55-56, with winds ranging from 0-1 miles per hour. Photographs of the Project site were taken to document existing conditions (Appendix B).

Burrowing Owl Protocol Surveys

The Project site is located within the boundaries of the Western Riverside Multiple Species Habitat Conservation Plan (MSHCP) survey area for burrowing owl. As such, protocol surveys were conducted using the MSHCP survey protocol for this species.

> Surveys should be conducted during weather that is conducive to observing owls outside their burrows and detecting burrowing owl sign. Surveys will not be accepted if they are conducted during rain, high winds (> 20 mph), dense fog, or temperatures over 90 °F. Subsequent surveys should be conducted in the morning one hour before sunrise to two hours after sunrise or in the early evening two hours before sunset to one hour after sunset. Count and map all burrowing owl sightings, occupied burrows, and burrows with owl sign. Record the location of all owls including numbers of pairs and juveniles and any behavior such as courtship and mating. Map the extent of all suitable habitat. It should be noted that owl sign may not be detectable if surveys are

conducted within 5 days following rain. Absence of burrowing owl sign cannot be used to confirm absence of the species if the focused burrow survey is conducted within 5 days of rain.

2.4 JURISDICTIONAL FEATURES

The U.S. Fish and Wildlife Service National Wetland Inventory and Environmental Protection Agency (EPA) Water Program "My Waters" data layers were also reviewed to determine whether any hydrologic features and wetland areas had been documented within the vicinity of the site. Similarly, the Soil maps from the U.S. Department of Agriculture (USDA) - Natural Resources Conservation Service (NRCS) Web Soil Survey (USDA 2025) were reviewed to identify the soil series on-site and to check if they have been identified regionally as hydric soils. Upstream and downstream connectivity of waterways (if present) was reviewed in the field, on aerial imagery (NWI, 2026), and topographic maps to determine jurisdictional status.

A general assessment of jurisdictional waters regulated by the United States Army Corps of Engineers (USACE), Regional Water Quality Control Board (RWQCB), and CDFW was conducted for the proposed Project area. Pursuant to Section 404 of the Clean Water Act, USACE regulates the discharge of dredged and/or fill material into waters of the United States. The State of California (State) regulates the discharge of material into waters of the State pursuant to Section 401 of the Clean Water Act and the California Porter- Cologne Water Quality Control Act (California Water Code, Division 7, §13000 et seq.). Pursuant to Division 2, Chapter 6, Sections 1600-1602 of the California Fish and Game Code, CDFW regulates all substantial diversions, obstructions, or changes to the natural flow or bed, channel, or bank of any river, stream, or lake, which supports fish or wildlife. The initial assessment was conducted by a desktop survey through the USGS National Hydrography Dataset for hydrological connectivity. A discussion of the regulatory framework is provided in Appendix C.

2.5 WESTERN RIVERSIDE MULTIPLE SPECIES HABITAT CONSERVATION PLAN

The MSHCP is intended to balance the demands of the growth of western Riverside County with the need to preserve open space and protect species of plants and animals that are threatened with extinction. The MSHCP addresses incidental take of "covered" species. Of the 146 species addressed in the Western Riverside County MSHCP, 118 are adequately conserved simply by implementing the conservation program. Incidental take of these 118 species is permitted by the Western Riverside County MSHCP. The remaining 28 species are partially conserved. They would be adequately conserved when certain additional conservation requirements are implemented. The additional requirements are identified in the species-specific conservation objectives for those 28 species. The Riverside Conservation Authority (RCA) is the governing body that administers the MSHCP. Their database (MSHCP Mapper, 2026) was researched prior to conducting the filed visit.

2.6 VEGETATION

All plant species observed within the Project site were recorded. Vegetation communities within the Project site were identified and qualitatively described. Plant communities were determined in accordance with the *Manual of California Vegetation*, *Second Edition* (Sawyer et al. 2009). Plant

nomenclature follows that of *The Jepson Manual, Second Edition* (Baldwin et al. 2012). A comprehensive list of the plant species observed during the survey is provided in Appendix D.

2.7 WILDLIFE

All wildlife and wildlife signs observed and detected, including tracks, scat, carcasses, burrows, excavations, and vocalizations, were recorded. Additional survey time was spent in those habitats most likely to be utilized by wildlife (native vegetation, wildlife trails, etc.) or in habitats with the potential to support state- and/or federally listed or otherwise special status species. Notes were made on the general habitat types, species observed, and the conditions of the Project site. A comprehensive list of the wildlife species observed during the survey is provided in Table 1 in Appendix D.

SECTION 3.0 – RESULTS

3.1 LITERATURE REVIEW RESULTS

According to the CNDDB, CNPSEI, and other relevant literature and databases, 82 sensitive species including 20 listed species, and 5 sensitive habitats, have been documented in the *Corona North, Guasti, Ontario, and Prado Dam* quads. This list of sensitive species and habitats includes any State and/or federally-listed threatened or endangered species, candidate for endangered, CDFW-designated Species of Special Concern (SSC), and otherwise Special Animals. “Special Animals” is a general term that refers to all of the taxa the CNDDB is interested in tracking, regardless of their legal or protection status. This list is also referred to as the list of “species at risk” or “special status species.” The CDFW considers the taxa on this list to be those of greatest conservation need.

An analysis of the likelihood for the occurrence of all CNDDB-sensitive species documented in the *Corona North, Guasti, Ontario, and Prado Dam* quads is provided in Table 2, in Appendix D. This analysis takes into account species range as well as documentation within the vicinity of the project area and includes the habitat requirements for each species and the potential for their occurrence on the site, based on required habitat elements and range relative to the current site conditions. According to the databases, no USFWS-designated critical habitat occurs within or adjacent to the project site.

3.1.1 SOILS

After a review of the USDA Soil Conservation Service and by referencing the USDA NRCS Web Soil Survey (USDA 2026), it was determined that the Project site is located within the Western Riverside Area, California area CA679. The Project site contains one (1) soil type:

Chino silt loam (Cb). This soil is somewhat poorly drained with a moderately high capacity to transmit water. This soil consists of alluvium derived from mixed sources, typically ranges in elevation from 20 to 3,100 feet above mean sea level (amsl), and is considered prime farmland if irrigated.

Chino silt loam is classified as a hydric soil.

3.1.2 SPECIAL STATUS SPECIES BACKGROUND

Of the 82 species found within the *Corona North, Guasti, Ontario, and Prado Dam* quads, 20 have a special designation of either: federally listed or state listed. The discussion below provides the background information on those species that have the potential to occur within the Project site.

Burrowing Owl (Athene cunicularia) – State Candidate Endangered and Species of Special Concern

The burrowing owl (BUOW) is a state candidate for endangered status and a state and federal Species of Special Concern (SSC). This owl is a mottled, brownish, sand-colored, dove-sized raptor, with large, yellow eyes, a rounded head lacking ear tufts, white eyebrows, and long legs compared to other owl species. It is a ground-dwelling owl typically found in arid prairies, fields, and open areas where vegetation is sparse and low to the ground. The BUOW is heavily dependent upon the presence of mammal burrows, with ground squirrel burrows being a common choice, in its habitat to provide shelter from predators, and inclement weather, and to provide a nesting place. They are also known to make use of human-created structures, such as cement culverts and pipes, for burrows.

BUOW spends a great deal of time standing on dirt mounds at the entrance to a burrow or perched on a fence post or other low to the ground perch from which they hunt for prey. BUOW frequently hunt by hovering in place above the ground and dropping on their prey from above. They feed primarily on insects such as grasshoppers, June beetles, and moths, but will also take small rodents, birds, and reptiles. They are active during the day and night but are considered a crepuscular owl; generally observed in the early morning hours or at twilight. The breeding season for BUOW is February 1 through August 31. Up to 11, but typically 7 to 9, eggs are laid in a burrow, abandoned pipe, or other subterranean hollows where incubation is complete in 28-30 days. Young BUOW fledges in 44 days. The BUOW is considered a migratory species in portions of its range, which includes western North America from Canada to Mexico, and east to Texas and Louisiana. BUOW populations in California are considered to be sedentary or locally migratory.

Throughout its range, the BUOW is vulnerable to habitat loss, predation, vehicular collisions, and destruction of burrow sites and the poisoning of ground squirrels (Grinnell and Miller 1944, Zarn 1974, Remsen 1978). BUOW has disappeared from significant portions of their range in the last 15 years and, overall, nearly 60% of the breeding groups of owls known to have existed in California during the 1980s had disappeared by the early 1990s (Burrowing Owl Consortium 1993). The BUOW is a migratory bird protected by the international treaty under the Migratory Bird Treaty Act of 1918 and by State law under the California Fish and Game Code (CDFG Code #3513 & #3503.5).

3.1.3 DESIGNATED CRITICAL HABITAT

The site is not located within or adjacent to any USFWS-designated Critical Habitat. No further action is required.

3.1.4 JURISDICTIONAL WATERS

Aerial imagery of the site was examined and compared with the surrounding USGS 7.5-minute topographic quadrangle maps to identify drainage features within the survey area as indicated from

topographic changes, blue-line features, or visible drainage patterns. No obvious signs of jurisdictional features were observed during the literature review.

3.1.5 MSHCP

Prior to the field visit the Regional Conservation Authority's website and databases were searched. This includes the MSHCP plan itself and any relevant protocol survey requirements. The database also includes a mapping program that contains site-specific information related to criteria cell location, special survey areas for plants and animals, and vegetation mapping.

A summary of the MSHCP Conservation Goals and Policies as they relate to this Project is provided below in Table 1.

Table 1: MSHCP Conservation Goals for Project Area

Conservation Goals	Within /Adjacent	Not Within /Adjacent

Narrow Endemic Plant Survey Area		X
Urban/Wildlife Interface		X
Mammal Survey Area		X
Amphibian Survey Area		X
Burrowing Owl Survey Area	X	

3.1.6 WILDLIFE CORRIDORS

According to the California Essential Habitat Connectivity Project, the Project site is not mapped within an area for wildlife movement. Therefore, the proposed Project will not have an impact on any current wildlife corridors.

3.2 FIELD STUDY RESULTS

3.2.1 HABITAT

The habitat on-site consists of a mix of bare ground and non-native ruderal vegetation. The site is routinely disturbed by disking, mowing and weed abatement. Table 1 in Appendix D contains a list of all plants found on-site. Surrounding land uses include residential developments, vacant land, and commercial developments.

3.2.2 WILDLIFE

Species observed or otherwise detected on or in the vicinity of the project site during the surveys included; mourning dove (*Zenaida macroura*) and house finch (*Haemorhous mexicanus*). A complete list of all wildlife observed is included in Table 1 of Appendix D.

3.2.3 SPECIAL STATUS SPECIES

No State and/or federally listed threatened or endangered species or other sensitive species were observed on-site during surveys.

Burrowing Owl

The result of the survey was that no evidence of BUOW including pellets, feathers, or whitewash was found within the Project area or buffer. No suitably sized burrows or burrow surrogates were observed on the subject parcel and no-host burrowers were observed during the survey. However, given the fact that the site is laid fallow for portions of the year, the site does contain low quality habitat for this species.

As such, protocol surveys were conducted as required under the Western Riverside MSHCP. The findings of those surveys are discussed below in Section 3.3.4.

3.2.4 NESTING BIRDS

Portions of the Project site and the immediate surrounding area do provide suitable habitat for nesting birds. There are mature trees in the adjacent neighborhoods, and the open spaces provide suitable habitat for other ground nesting species (i.e. killdeer (*Charadrius vociferus*)). As such the Project site is subject to the following nesting bird regulations. Recommendations are included in Section 4.

Migratory Bird Treaty Act

The Migratory Bird Treaty Act of 1918. This Act implements four international conservation treaties that the U.S. entered into with Canada in 1916, Mexico in 1936, Japan in 1972, and Russia in 1976. It is intended to ensure the sustainability of populations of all protected migratory bird species. The Act has been amended with the signing of each treaty, as well as when any of the treaties were amended, such as with Mexico in 1976 and Canada in 1995. The Act prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service.

California Fish and Game Code

The Project site is also subject to Sections 3503 and 3503.5 of the Fish and Game Code. Section 3503 states, "It is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by this code or any regulation made pursuant thereto". And Section 3503.5 states, "It is unlawful to take, possess, or destroy any birds in the orders Falconiformes or Strigiformes (birds-of-prey) or to take, possess, or destroy the nest or eggs of any such bird except as otherwise provided by this code or any regulation adopted pursuant thereto".

3.2.5 JURISDICTIONAL WATERS

The Project site does not contain any drainages on-site. There is no evidence of water flows (bed and bank, ponding, sedimentation, soil cracks, cuts, scour, etc.). Therefore, there are no jurisdictional features on-site. However, the Project does propose a connection to an existing drainage course (Drainage 1) as part of the detention basin in the northwest corner of the Project site. This existing drainage course is jurisdictional to the Regional Water Quality Borad and the California Department of Fish and Wildlife. As such, any impact to the existing drainage course will require a permit from each agency.

Waters of the United States and Waters of the State

The USACE has the authority to permit the discharge of dredged or fill material in Waters of the U.S. under Section 404 CWA. While the Regional Water Quality Board has authority over the discharge of dredged or fill material in Waters of the State under Section 401 CWA as well as the Porter-Cologne Water Quality Control Act. The Project area was surveyed with 100 percent visual coverage, and no drainage features were present on site. As such, the subject parcel does not contain any wetlands, Waters of the U.S., or Waters of the State.

Fish and Game Code Section 1602 - State Lake and/or Streambed

The CDFW asserts jurisdiction over any drainage feature that contains a definable bed and bank or associated riparian vegetation. The Project area was surveyed with 100 percent visual coverage, and no definable bed or bank features exist on the project site. There is an outlet structure that deposits water onto the site from the surrounding parcels, however, it appears that the amount of water that is discharged does not stay within a defined location or channel. It is either absorbed into the soil or lost to sheet flow within the parcel. As such, the subject parcel does not contain any areas under CDFW jurisdiction.

3.2.6 WETLANDS

National Wetlands Inventory (NWI) maps did not identify portions within the Project site as a Riverine/Riparian system. The site does not contain hydric vegetation, or wetland hydrology. The site does contain Hydric Soils, however, in order to be classified as a wetland all three criteria must be present within the project site. As such, there are no wetlands currently present on site.

3.3 MSHCP CONSISTENCY ANALYSIS

The Project is located within The Eastvale Area Plan of the MSHCP. The target conservation acreage range for The Eastvale Area Plan is 1,040 – 1,185 acres; it is composed of approximately 895 acres of existing Public/Quasi-Public Lands and 145 – 290 acres of Additional Reserve Lands.

The MSHCP Conservation Area comprises a variety of existing and proposed Cores, Linkages, Constrained Linkages, and Noncontiguous Habitat Blocks (referred to herein generally as "Cores and Linkages"). The Cores and Linkages within the Eastvale Area Plan include:

- Contains a small portion of Existing Linkage Core A

3.3.1 PUBLIC QUASI-PUBLIC LANDS (PQP) AND COVERED ROADS

Pursuant to Sections 3.2.1 PQP Lands are a Subset of MSHCP Conservation Area lands totaling approximately 347,000 acres of lands known to be in public/private ownership and expected to be managed for open space value and/or in a manner that contributes to the Conservation of Covered Species (including lands contained in existing reserves), as generally depicted in Figure 3-1 of the MSHCP, Volume I. Section 7.2.1 Existing Roads within Existing PQP Lands are existing roadways within existing Public/Quasi-Public Lands, including interstates, freeways, State highways, city and county maintained roadways, as well as local roads, which are not city, or county maintained that provide property access. This latter category of other maintained roadways is generally maintained by the adjacent property owners, either individually or collectively. Table 7-1, of the MSHCP, provides an estimate summarizing the extent of these various types of existing roadways which are permitted to remain within Public/Quasi-Public Lands.

The Project site is not located within or adjacent to any PQP Lands and will not impact a covered road.

- *No further discussion on this subject is made in this analysis*

3.3.2 SUBUNIT AREA/CELL CRITERIA

Pursuant to Section 3.3.12, Subunits are areas within an area plan that contain target conservation acreages along with a description of the planning species, biological issues, and considerations. The Project site is not located within a subunit area or cell criteria.

- *No further discussion on this subject is made in this analysis*

3.3.3 NARROW ENDEMIC PLANT SPECIES

Pursuant to Section 6.1.3 of the MSHCP, focused surveys for narrow endemic plant species are required for properties within the mapped areas if the appropriate habitat is present. The survey area maps have been reviewed and assessed, and the proposed project is not located within a Narrow Endemic Plant Species Survey Area based on Figure 6-1 of the MSHCP.

- *No further discussion on this subject is made in this analysis*

3.3.4 ADDITIONAL SURVEY NEEDS AND PROCEDURES

Based on Section 6.3.2 and Figures 6-2 (Criteria Area Species Survey Areas), 6-3 (Amphibian Species Survey Areas), 6-4 (BUOW Survey Areas), and 6-5 (Mammal Species Survey Areas) of the MSHCP and the MSHCP Mapping Program, the site is located in an area where additional surveys are needed for BUOW. No limitations significantly affected the results and conclusions given herein. Surveys were conducted during the appropriate season to observe the target species, in good weather conditions, by a qualified biologist who followed all pertinent protocols. Table 1 below details the conditions during the surveys and the results of each survey.

Table 1 – Non-Breeding Season BUOW Survey Results

Date	Sunrise/Sunset	Survey Time	Weather	Temperature °F	Observations
Habitat Assessment, Part A, and 1 Survey of Part B					
December 22, 2025	6:53 AM / 4:45 PM	0730 – 0830	Cloudy, 0 – 1 MPH wind	55 – 56	No BUOW Observed
Part B Surveys 2-4					
January 29, 2026	6:49 AM / 5:16 PM	0700 – 0800	Clear, 0 – 2 MPH Wind	60 – 61	No BUOW Observed
January 31, 2026	6:48 AM / 5:18 PM	0730 – 0800	Clear, No Wind	62 – 63	No BUOW Observed
February 9, 2026	6:39 AM / 5:30 PM	0700 – 0730	Clear, Light Wind, 0 – 2 MPH	59 – 60	No BUOW Observed

Based on the results of this Protocol survey, BUOW are absent from the site and no impacts to BUOW are anticipated to occur. Prior to construction, pre-construction surveys are warranted or recommended.

- *No further discussion on this subject is made in this analysis*

3.3.5 RIPARIAN/RIVERINE AREAS AND VERNAL POOLS

The MSHCP describes the protection of Riparian/Riverine Areas and Vernal Pools within the MSHCP Plan Area as important to the conservation of certain amphibian, avian, fish, invertebrate and plant species.

The MSHCP describes guidelines to ensure that the biological functions and values for species inside the MSHCP Conservation Area are maintained, as outlined in Volume 1, Section 6.1.2.

Riparian/ Riverine

Pursuant to Section 6.1.2 of the MSHCP, Riparian/Riverine areas are lands which contain habitat dominated by trees, shrubs, persistent emergent vegetation, or emergent mosses and lichens, which occur close to or which depend upon soil moisture from nearby freshwater sources, or areas with freshwater flow during all or a portion of the year. Riverine habitat includes all wetlands and deepwater habitats contained in natural or artificial channels periodically or continuously containing flowing water or which forms a connecting link between the two bodies of standing water. Riverine habitat is bounded on the landward side by upland, by the channel bank (including natural and man-made levees), or by wetlands dominated by trees, shrubs, persistent emergents, mosses, or lichens. In braided streams, the system is bounded by the banks forming the outer limits of the depression within which the braiding occurs. Springs discharging into a channel are considered part of the riverine habitat. The term riparian is used to define the type of wildlife habitat found along the banks of a river, stream, lake, or other body of water. Riparian habitats are ecologically diverse and can be found in many types of environments including grasslands, wetlands, and forests.

The Project site does not contain any areas that meet the definition of Riparian/Riverine.

- *No further discussion on this subject is made in this analysis*

Vernal Pools

Pursuant to Section 6.1.2 of the MSHCP, Vernal Pools are seasonal wetlands that occur in depression areas that have wetlands indicators of all three parameters (soils, vegetation, and hydrology) during the wetter portion of the growing season but normally lack wetlands indicators of hydrology and/or vegetation during the drier portion of the growing season. Obligate hydrophytes and facultative wetlands plant species are normally dominant during the wetter portion of the growing season, while upland species (annuals) may be dominant during the drier portion of the growing season. The determination that an area exhibits vernal pool characteristics should consider (1) the length of time the area exhibits upland and wetland characteristics, and (2) the manner in which the area fits into the overall ecological system as a wetland. Evidence concerning the persistence of an area's wetness can be obtained from its history, vegetation, soils, and drainage characteristics, uses to which it has been subjected, and weather and hydrologic records.

The Project site does not contain the appropriate soils, vegetation, or hydrology to allow for vernal pools.

- *No further discussion on this subject is made in this analysis*

Fairy Shrimp

The MSHCP contains coverage for three species of fairy shrimp (Riverside, vernal pool, and Santa Rosa fairy shrimps). As mentioned in the Vernal Pool discussion, the site does not contain vernal pools. Vernal pools are a required constituent element for all three fairy shrimp species in the MSHCP. Nor does the site contain any area of ponded water or suitable soils. As such, they are considered absent from the Project site.

- *No further discussion on this subject is made in this analysis*

Riparian Birds

The MSCHP includes coverage for many riparian birds, including least Bell's vireo, southwestern willow flycatcher, and yellow-billed cuckoo. As mentioned above in the Riparian/Riverine section, the site does not contain any riparian or riverine habitats which are a required constituent element for the riparian bird species. As such, these species are considered absent from the Project site.

- *No further discussion on this subject is made in this analysis*

3.3.6 INFORMATION ON OTHER SPECIES

Delhi sands flower-loving fly

The Delhi Sands flower-loving fly is found at low numbers and is narrowly distributed within the Plan Area. This species is restricted by the distribution and availability of open Habitats within the fine, sandy Delhi series soils. USFWS has identified three main population areas are known to currently or to have at one time existed in the Plan Area. One is located in the northwestern corner of the Plan Area, a second is located in the Jurupa Hills, and the third is located in the Agua Mansa Industrial Center area. Because the Delhi Sands flower-loving fly requires a specific Habitat type, this species will require site-specific considerations, protection and enhancement of this limited Habitat type, and species-specific management to maintain the Habitat and populations.

The Project site does not contain the appropriate soils for this species and is not within or near known areas for this species.

- *No further discussion on this subject is made in this analysis*

Species Not Adequately Conserved

As described in Section 2.1.4, of the 146 Covered Species addressed in the MSHCP, 118 species are considered to be adequately conserved. The remaining 28 Covered Species will be considered to be adequately conserved when certain conservation requirements are met as identified in the species-specific conservation objectives for those species. For 16 of the 28 species, particular species-specific conservation objectives, which are identified in Table 9-3, must be satisfied to shift those particular species to the list of Covered Species Adequately Conserved. For the remaining 12 species, a Memorandum of Understanding must be executed with the Forest Service that addresses management for these species on Forest Service Land in order to shift these species to the list of Covered Species Adequately Conserved.

The Project site does not contain the appropriate habitats for any of these species. There is no occurrence potential for any of these species to occur within the Project site.

- *No further discussion on this subject is made in this analysis*

3.3.7 URBAN/ WILDLANDS INTERFACE

Section 6.1.4 of the MSHCP presents guidelines to minimize the indirect effects of projects in proximity to the MSCHP Conservation areas. This section provides mitigation measures for impacts associated with Drainage, Toxics, Lighting, Noise, Invasives, Barriers, and Grading/Land Development.

The site is in the vicinity of existing PQP Lands (0.77 miles south). As such the following discussion for Urban/Wildlands interface is provided.

Drainage

The Project's stormwater should be directed to a stormwater basin on the project site. The basin shall be designed in accordance with all federal, state, regional, and local standards and regulations concerning water quality. These measures will assure that the project stormwater discharges are no greater in volume and velocity than current undeveloped conditions and that the water leaving the site complies with all applicable water quality standards.

Toxics

According to the MSHCP, measures shall be incorporated to ensure that application of chemicals do not result in discharge to the MSHCP Conservation Area. During the construction of the project, construction activities have the potential to cause release of toxics that could impact the MSHCP Conservation Area. To address these potential short-term impacts, the project is required to stage construction operations as far away from PQP Lands to the maximum extent feasible. These mitigation measures will be imposed by the County of Riverside.

Lighting

The proposed Project is not anticipated to significantly increase lighting and glare. All light sources will be designed with internal baffles to direct the lighting towards the ground and the developed areas and have a zero-side angle cut off to the horizon. All lighting will be consistent with all required Light Ordinances and the MSHCP.

Noise

The proposed Project is not anticipated to have a significant increase in noise. All noise levels will be in compliance with County's Standards.

- *No further discussion on this subject is made in this analysis*

Invasives

The proposed Project will have landscaping around the site however, it will not plant invasive species in accordance with Section 6.1.4 of the MSHCP.

- *No further discussion on this subject is made in this analysis*

Barriers

The proposed Project site is already fenced. As such, the proposed Project can do nothing to further secure the desired area.

- *No further discussion on this subject is made in this analysis*

Grading/Land Development

The proposed Project site is already highly disturbed and will be graded as a result of the Project.. However, the proposed Project does not propose any grading or land development within PQP Lands.

- *No further discussion on this subject is made in this analysis*

3.3.7 BEST MANAGEMENT PRACTICES (VOLUME I, APPENDIX C)

Appendix C of the MSHCP details Best Management Practices (BMPs) is required for specific impacts to specific species. However, the project does not impact any of the covered species or habitats described in the MSHCP or any federally or state-listed species. As such, there are only two BMPs that could qualify as required for this project:

> 13. To avoid attracting predators of the species of concern, the project site shall be kept as clean of debris as possible. All food-related trash items shall be enclosed in sealed containers and regularly removed from the site(s).
>
> 14. Construction employees shall strictly limit their activities, vehicles, equipment, and construction materials to the proposed project footprint and designated staging areas and routes of travel. The construction area(s) shall be the minimal area necessary to complete the project and shall be specified in the construction plans. Construction limits will be fenced with an orange snow screen. Exclusion fencing should be maintained until the completion of all construction activities. Employees shall be instructed that their activities are restricted to the construction areas.

Additionally, in accordance with the MSHCP the Counties and Cities have agreed to following long-term obligations, which are required for all Projects.

> *A. Adopt and maintain ordinances or resolutions as necessary, and amend their General Plans as appropriate, to implement the requirements and to fulfill the purposes of the Permits, the MSHCP and the IA for private and public Development projects. Such requirements include:* ***(1)*** *the collection of Local Development Mitigation Fees and other relevant fees as set forth in Section 8.5 of this document;* ***(2)*** *compliance with the HANS process or equivalent process to ensure application of the Criteria and thus, satisfaction of the local acquisition obligation;* ***(3)*** *compliance with the policies for the Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools, set forth in Section 6.1.2 of this document;* ***(4)*** *compliance with the policies for the Protection of Narrow Endemic Plant Species set forth in Section 6.1.3 of this document;* ***(5)*** *compliance with survey requirements as set forth in Section 6.3.2 of this document;* ***(6)*** *require Urban/Wildlands Interface Guidelines compliance as set forth in Section 6.1.4 of this document; and* ***(7)*** *compliance with the Best Management Practices and the siting and design criteria as set forth in Section 7.0 and Appendix C of this document. The County and the Cities shall transmit to the RCA and the*

Wildlife Agencies relevant documents showing adoption and/or execution of the Implementation Mechanisms and any subsequent amendments thereto.

B. Transmit any collected Local Development Mitigation Fees, other appropriate fees and associated interest as described in Section 8.5 of this document to the RCA at least quarterly.

C. Contribute to Plan implementation and Reserve Assembly as determined appropriate by the affected Permittee for County and City public projects, including but not limited to any one or any combination of the following: 1) acquisition of replacement Habitat at a 1:1 ratio that is Biologically Equivalent or Superior to the property being disturbed; or 2) payment of the Local Development Mitigation Fees as established for commercial and industrial Development. Such contribution shall occur prior to impacts to Covered Species and their Habitats.

D. Participate as a member agency in the RCA as set forth in Section 6.6.2 of this document.

E. Notify the RCA, through the Joint Project/Acquisition Review Process set forth in Section 6.6.2 of this document, of proposed Discretionary Projects within the Criteria Area and participate in any further requirements imposed by that section.

F. Take all necessary and appropriate actions, following applicable land use permit enforcement procedures and practices, to enforce the terms of project approvals for public and private projects, including compliance with the MSHCP, the Permits and the IA.

G. Carry out all other applicable requirements of the MSHCP, the IA and the Permits. Notwithstanding the foregoing, nothing within the MSHCP or the IA shall be construed to require any local government to provide funding, or any other form of compensation, beyond the fees collection, dedicated lands required pursuant to the IA and the MSHCP or other mitigation agreed to by the appropriate Parties, consistent with the terms and conditions of the MSHCP.

H. Manage MSHCP Conservation Area property or conservation easements owned or leased by the County or respective City pursuant to Sections 5.0 and 8.0 of this document.

I. Participate as a member of the RMOC as set forth in Section 6.6.4 of this document.

As such, the Project will be required to implement these standard procedures.

SECTION 4.0 - CONCLUSIONS AND RECOMMENDATIONS

Based on the literature review and personal observations made in the project site and immediate vicinity, no State and/or federally listed threatened or endangered species are documented/or expected to occur within the Project site. Additionally, no plant species with the California Rare Plant Rank (CRPR) of 1 or 2 were observed on-site or documented/expected to occur on-site. No other sensitive species were observed within the project area or buffer area.

Jurisdictional Delineation

There are no streams, channels, washes, or swales that meet the definitions of Section 1600 of the State of California Fish and Game Code (FGC) under the jurisdiction of the CDFW, Section 401 ("Waters of the

State") of the Clean Water Act (CWA) under the jurisdiction of the Regional Water Quality Control Board (RWQCB), or "Waters of the United States" (WoUS) as defined by Section 404 of the CWA under the jurisdiction of the U.S. Army Corps of Engineers (Corps) within the subject parcel. Therefore, no permit from any regulatory agency will be required.

MSHCP Consistency

The site is not mapped within a criteria cell or subunit. The Project is also consistent with the MSHCP policies found in Section 6 which include Riparian/Riverine Areas/ Vernal Pools; Narrow Endemic Plant Species; Urban/Wildlands Interface; and Surveys for Special Status Species. The site is not located within an area mapped for Narrow Endemic, Criteria Area Species, Special Status Species, Riparian/Riverine/Vernal Pools, and Urban/Wildlife Interface. The site is within an area for burrowing owl surveys, the results of which were negative. Therefore, the Project is consistent with MSCHP policies and conditions.

Nesting Birds

Since there is some habitat within the immediate surrounding area that is suitable for nesting birds in general, the following mitigation measure should be implemented if any future construction is proposed:

> To avoid impacts to nesting birds (common, migratory, and special status) regardless of the time of year during the nesting season, a qualified Avian Biologist retained by the Project applicant will conduct pre-construction Nesting Bird Surveys (NBS) within 3 days prior to Project-related disturbance within the entire Project site and a 300-foot buffer around the Project site at the appropriate time of day/night, during appropriate weather conditions to nestable vegetation to identify any active nests. Surveys shall encompass all suitable areas including trees, shrubs, bare ground, burrows and cavities. If no active nests are found, no further action will be required. If a nest is suspected, but not confirmed, the qualified avian biologist shall establish a disturbance-free buffer until additional surveys can be completed prior to the commencement of ground disturbing Project activities. If an active nest is found, the qualified avian biologist will set appropriate no-work buffers around the nest which will be based upon the nesting species, its sensitivity to disturbance, nesting stage, and expected types, intensity, and duration of the disturbance. If a nest is observed, but thought to be inactive, the qualified avian biologist shall monitor the nest for one hour (four hours for raptors) prior to approaching the nest to determine status. The qualified avian biologist shall not risk failure of the nest to determine the exact location or status and shall make every effort to limit the nest to potential predation as a result of the survey/monitoring efforts (e.g., limit number of surveyors, limit time spent at/near the nest, scan the site for potential nest predators before approaching, immediately depart nest area if indicators of stress or agitation are displayed). The buffer shall be of a distance to ensure avoidance of adverse effects to the nesting bird. The qualified avian biologist shall use their best professional judgement regarding the monitoring period and whether approaching the nest is appropriate. The nests and buffer zones shall be field-checked daily weekly by a qualified biological monitor. The approved no-work buffer zone shall be clearly marked in the field, within which no disturbance activity shall commence until the qualified biologist has determined the young birds have successfully fledged and the nest is inactive.

Burrowing Owls

The Project site does contain low quality habitat for this species. As such protocol surveys were completed and were found to be negative. To prevent any potential impacts to this species, pre-construction surveys are required prior to any ground disturbance. The following mitigation measure should be implemented.

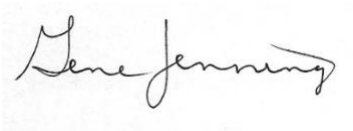
> A Pre-Construction Burrowing Owl Survey shall be conducted by a qualified biologist no more than 30-days prior to any ground disturbance activities. Surveys shall be completed following the recommendationsand guidelines provided within the Burrowing Owl Survey Instructions for the Western Riverside MSHCP (RCA, 2006). Surveys should be conducted during weather that is conducive to observing owls outside their burrows and detecting burrowing owl sign. Surveys will not be accepted if they are conducted during rain, high winds (> 20 mph), dense fog, or temperatures over 90 °F. Surveys should be conducted in the morning one hour before sunrise to two hours after sunrise or in the early evening two hours before sunset to one hour after sunset. Count and map all burrowing owl sightings, occupied burrows, and burrows with owl sign. Record the location of all owls including numbers of pairs and juveniles and any behavior such as courtship and mating. Map the extent of all suitable habitat. It should be noted that owl sign may not be detectable if surveys are conducted within 5 days following rain.

Certification

I hereby certify that the statements furnished herein, and in the attached exhibits present data and information required for this analysis to the best of my ability, and the facts, statements, and information presented are true and correct to the best of my knowledge and belief. This report was prepared in accordance with professional requirements and standards. Fieldwork conducted for this assessment was performed by me. I certify that I have not signed a non-disclosure or consultant confidentiality agreement with the project proponent and that I have no financial interest in the project.

Please do not hesitate to contact me at 909-534-4547 should you have any questions or require further information.

Sincerely,



Gene Jennings
Principal/Regulatory Specialist

Appendix C – Regulatory Framework

1.1 FEDERAL JURISDICTION

1.1.1 United States Army Corps of Engineers

Activities within inland streams, wetlands, and riparian areas in California are regulated by agencies at the federal, state, and regional levels. At the federal level, the U.S. Army Corps of Engineers (USACE) Regulatory Program regulates activities within wetlands and waters of the US pursuant to Section 404 of the Federal Clean Water Act (CWA).

At the state level, the California Department of Fish and Wildlife (CDFW) regulates activities within the bed, bank, and associated habitat of a stream under the Fish and Game Code §§ 1600–1616. The California State Water Resources Board (SWRB) delegates authority at the regional level to Regional Water Quality Control Boards (RWQCB) that are responsible for regulating discharge into waters of the US under Section 401 of the federal CWA and waters of the State under the California Porter-Cologne Water Quality Act.

The CWA was implemented to maintain and restore the chemical, physical, and biological integrity of the Waters of the United States (33 Code of Federal Regulations [CFR] Part 328 Section 328.3). "Waters of the US" are defined as follows:

> **§ 328.3 Definitions.**
> For the purpose of this regulation these terms are defined as follows:
> (a) *Waters of the United States* means:
> (1) Waters which are:
> (i) Currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;
> (ii) The territorial seas; or
> (iii) Interstate waters, including interstate wetlands;
> (2) Impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (a)(5) of this section;
> (3) Tributaries of waters identified in paragraph (a)(1) or (2) of this section:
> (i) That are relatively permanent, standing or continuously flowing bodies of water; or
> (ii) That either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section;
> (4) Wetlands adjacent to the following waters:
> (i) Waters identified in paragraph (a)(1) of this section; or
> (ii) Relatively permanent, standing or continuously flowing bodies of water identified in paragraph (a)(2) or (a)(3)(i) of this section and with a continuous surface connection to those waters; or

(iii) Waters identified in paragraph (a)(2) or (3) of this section when the wetlands either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section;

(5) Intrastate lakes and ponds, streams, or wetlands not identified in paragraphs (a)(1) through (4) of this section:

(i) That are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3)(i) of this section; or

(ii) That either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section.

(b) The following are not ''waters of the United States'' even where they otherwise meet the terms of paragraphs (a)(2) through (5) of this section:

(1) Waste treatment systems, including treatment ponds or lagoons, designed to meet the requirements of the Clean Water Act;

(2) Prior converted cropland designated by the Secretary of Agriculture The exclusion would cease upon a change of use, which means that the area is no longer available for the production of agricultural commodities. Notwithstanding the determination of an area's status as prior converted cropland by any other Federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA;

(3) Ditches (including roadside ditches) excavated wholly in and draining only dry land and that do not carry a relatively permanent flow of water;

(4) Artificially irrigated areas that would revert to dry land if the irrigation ceased;

(5) Artificial lakes or ponds created by excavating or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing;

(6) Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating or diking dry land to retain water for primarily aesthetic reasons;

(7) Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body of water meets the definition of waters of the United States; and

(8) Swales and erosional features (*e.g.,* gullies, small washes) characterized by low volume, infrequent, or short duration flow.

(c) In this section, the following definitions apply:

(1) *Wetlands* means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically
adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.
(2) *Adjacent* means bordering, contiguous, or neighboring. Wetlands separated from other waters of the United States by man-made dikes or barriers, natural river berms, beach dunes, and the like are ''adjacent wetlands.''
(3) *High tide line* means the line of intersection of the land with the water's surface at the maximum height reached by a rising tide. The high tide line may be determined, in the absence of actual data, by a line of oil or scum along shore objects, a more or less continuous deposit of fine shell or debris on the foreshore or berm, other physical markings or characteristics, vegetation lines, tidal gages, or other suitable means that delineate the general height reached by a rising tide. The line encompasses spring high tides and other high tides that occur with periodic frequency but does not include storm surges in which there is a departure from the normal or predicted reach of the tide due to the piling up of water against a coast by strong winds such at those accompanying a hurricane or other intense storm.
(4) *Ordinary high water mark* means that line on the shore established by the fluctuations of water and indicated by physical characteristics such as clear, natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas.
(5) *Tidal waters* means those waters that rise and fall in a predictable and measurable rhythm or cycle due to the gravitational pulls of the moon and sun. Tidal waters end where the rise and fall of the water surface can no longer be practically measured in a predictable rhythm due to masking by hydrologic, wind, or other effects.
(6) *Significantly affect* means a material influence on the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section. To determine whether waters, either alone or in combination with similarly situated waters in the region, have a material influence on the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section, the
functions identified in paragraph (c)(6)(i) of this section will be assessed and the factors identified in paragraph (c)(6)(ii) of this section will be considered:

(i) Functions to be assessed:

(A) Contribution of flow;
(B) Trapping, transformation, filtering, and transport of materials (including nutrients, sediment, and other pollutants);
(C) Retention and attenuation of floodwaters and runoff;
(D) Modulation of temperature in waters identified in paragraph (a)(1) of this section; or
(E) Provision of habitat and food resources for aquatic species located in waters identified in paragraph (a)(1) of this section;

(ii) Factors to be considered:
(A) The distance from a water identified in paragraph (a)(1) of this section;
(B) Hydrologic factors, such as the frequency, duration, magnitude, timing, and rate of hydrologic connections, including shallow subsurface flow;
(C) The size, density, or number of waters that have been determined to be similarly situated;
(D) Landscape position and geomorphology; an
(E) Climatological variables such as temperature, rainfall, and snowpack.

1.2 STATE JURISDICTION

The State of California (State) regulates discharge of material into waters of the State pursuant to Section 401 of the CWA as well as the California Porter-Cologne Water Quality Control Act (Porter-Cologne; California Water Code, Division 7, §13000 et seq.). Waters of the State are defined by Porter-Cologne as "any surface water or groundwater, including saline waters, within the boundaries of the state" (Water Code Section 13050(e)). Waters of the State broadly includes all waters within the State's boundaries (public or private), including waters in both natural and artificial channels.

1.2.1 Regional Water Quality Control Board

Under Porter-Cologne, the State Water Resources Control Board (SWRCB) and the local Regional Water Quality Control Boards (RWQCB) regulate the discharge of waste into waters of the State. Discharges of waste include "fill, any material resulting from human activity, or any other 'discharge' that may directly or indirectly impact 'waters of the state.'" Porter-Cologne reserves the right for the State to regulate activities that could affect the quantity and/or quality of surface and/or groundwaters, including isolated wetlands, within the State. Wetlands were defined as waters of the State if they demonstrated both wetland hydrology and hydric soils. Waters of the State determined to be jurisdictional for these purposes require, if impacted, waste discharge requirements (WDRs).

When an activity results in fill or discharge directly below the OHWM of jurisdictional waters of the United States (federal jurisdiction), including wetlands, a CWA Section 401 Water Quality Certification is required. If a proposed project is not subject to CWA Section 401 certification but involves activities that may result in a discharge to waters of the State, the project may still be regulated under Porter-Cologne and may be subject to waste discharge requirements. In cases where waters apply to both CWA and Porter-Cologne, RWQCB may consolidate permitting requirements to one permit.

1.2.2 California Department of Fish and Wildlife

Pursuant to Division 2, Chapter 6, Sections 1600-1602 of the California Fish and Game Code, the California Department of Fish and Wildlife (CDFW) regulates all diversions, obstructions, or changes to the natural flow or bed, channel, or bank of any river, stream, or lake, which supports fish or wildlife.

CDFW defines a "stream" (including creeks and rivers) as "a body of water that flows at least periodically or intermittently through a bed or channel having banks and supports fish or other aquatic life. This includes watercourses having surface or subsurface flow that supports or has supported riparian vegetation" (California Code of Regulations, Title 14, Section 1.72). The jurisdiction of CDFW may include areas in or near intermittent streams, ephemeral streams, rivers, creeks, dry washes, sloughs, blue-line streams that are indicated on USGS maps, watercourses that may contain subsurface flows, or within the flood plain of a water body. CDFW's definition of "lake" includes "natural lakes or man-made reservoirs." CDFW limits of jurisdiction typically include the maximum extents of the uppermost bank-to-bank distance and/or the outermost extent of riparian vegetation dripline, whichever measurement is greater.

In a CDFW guidance of stream processes and forms in dryland watersheds (Vyverberg 2010), streams are identified as having one or more channels that may all be active or receive water only during some high flow event. Subordinate features, such as low flow channels, active channels, banks associated with secondary channels, floodplains, and stream-associated vegetation, may occur within the bounds of a single, larger channel. The water course is defined by the topography or elevations of land that confine a stream to a definite course when its waters rise to their highest level. A watercourse is defined as a stream with boundaries defined by the maximal extent or expression on the landscape even though flow may otherwise be intermittent or ephemeral.

Artificial waterways such as ditches (including roadside ditches), canals, aqueducts, irrigation ditches, and other artificially created water conveyance systems also may be under the jurisdiction of CDFW. CDFW may claim jurisdiction over these features based on the presence of habitat characteristics suitable to support aquatic life, riparian vegetation, and/or stream-dependent terrestrial wildlife. As with natural waterways, the limit of CDFW jurisdiction of

artificial waterways includes the uppermost bank-to-bank distance and/or the outermost extent of riparian vegetation dripline, whichever measurement is greater.

CDFW does not have jurisdiction over wetlands but has jurisdiction to protect against a net loss of wetlands. CDFW supports the wetland criteria recognized by USFWS; one or more indicators of wetland conditions must exist for wetlands conditions to be considered present. The following is the USFWS accepted definition of a wetland:

> Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For purposes of this classification, wetlands must have one or more of the following three attributes: (1) at least periodically, the lands supports hydrophytes, (2) the substrate is predominantly undrained hydric soil; and (3) the substrate is nonsoil and is saturated withwater or covered by shallow water at some time during the growing season of each year (Cowardin et al. 1979).

In A Clarification of the U.S. Fish and Wildlife Service's Wetland Definition (Tiner 1989), the USFWS definition was further clarified "that in order for any area to be classified as wetland by the Service, the area must be periodically saturated or covered by shallow water, whether wetland vegetation and/or hydric soils are present or not; this hydrologic requirement is addressed in the first sentence of the definition." When considering whether an action would result in a net loss of wetlands, CDFW will extend jurisdiction to USFWS-defined wetland conditions where such conditions exist within the riparian vegetation that is associated with a stream or lake and does not depend on whether those features meet the three-parameter USACE methodology of wetland determination. If impacts to wetlands under the jurisdiction of CDFW are unavoidable, a mitigation plan will be implemented in coordination with CDFW to support the CDFW policy of "no net loss" of wetland habitat.

Appendix D – Tables

Table 1. Species Observed On-Site

Common Name	Scientific Name
Plants	
Cheeseweed	*Malva parviflora*
Alfalfa	*Medicago sativa*
Short-pod mustard	*Hirschfeldia incana*
Lambs quarters	*Chenopodium album*
Lemon gum	*Corymbia citriodora*
Tree tobacco	*Nicotiana glauca*
Tumbleweed	*Salsola tragus*
Telegraph weed	*Heterotheca grandiflora*
Jimson weed	*Datura stramonium*
Birds	
Common raven	*Corvus corax*
American kestrel	*Falco sparverius*
American robin	*Turdus migratorius*
House finch	*Haemorhous mexicanus*
House sparrow	*Passer domesticus*
Mourning dove	*Zenaida macroura*
Western meadowlark	*Sturnella neglecta*
Red-tailed hawk	*Buteo jamaicensis*
Black phoebe	*Sayornis nigricans*
Say's phoebe	*Sayornis saya*
American pipit	*Anthus rubescens*

Table 2 – CNDDB Potential to Occur for the *Corona North, Ontario, Guasti, and Prado Dam* Quadrangles

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
Abronia villosa var. aurita	chaparral sand-verbena	None, None	G5T2?, S2, 1B.1	Chaparral, coastal scrub, desert dunes. Sandy areas. -60-1570 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Actinemys pallida	southwestern pond turtle	Proposed Threatened, None	G2, SNR, CDFW-SSC	Slow-moving streams, rivers, lakes, ponds, and wetlands from sea level to 6,500 feet in Southern California and Baja California	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Agelaius tricolor	tricolored blackbird	None, Threatened	G3, S2, CDFW-SSC	Highly colonial species, most numerous in Central Valley and vicinity. Largely endemic to California. Requires open water, protected nesting substrate, and foraging area with insect prey within a few km of the colony.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Aimophila ruficeps canescens	southern California rufous-crowned sparrow	None, None	G5T3, S4, CDFW-WL	Resident in Southern California coastal sage scrub and sparse mixed chaparral. Frequents relatively steep, often rocky hillsides with grass and forb patches.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
Ammodramus savannarum	grasshopper sparrow	None, None	G5, S3, CDFW-SSC	Dense grasslands on rolling hills, lowland plains, in valleys and on hillsides on lower mountain slopes. Favors native grasslands with a mix of grasses, forbs and scattered shrubs. Loosely colonial when nesting.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Anniella stebbinsi	Southern California legless lizard	None, None	G3, S3, CDFW-SSC	Generally south of the Transverse Range, extending to northwestern Baja California. Occurs in sandy or loose loamy soils under sparse vegetation. Disjunct populations in the Tehachapi and Piute Mountains in Kern County. Variety of habitats; generally in moist, loose soil. They prefer soils with a high moisture content.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Antrozous pallidus	pallid bat	None, None	G4, S3, CDFW-SSC	Deserts, grasslands, shrublands, woodlands and forests. Most common in open, dry	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				habitats with rocky areas for roosting. Roosts must protect bats from high temperatures. Very sensitive to disturbance of roosting sites.	
Aquila chrysaetos	golden eagle	None, None	G5, S3, CDFW-FP	Rolling foothills, mountain areas, sage-juniper flats, and desert. Cliff-walled canyons provide nesting habitat in most parts of range; also, large trees in open areas.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Arizona elegans occidentalis	California glossy snake	None, None	G5T2, S2, CDFW-SSC	Patchily distributed from the eastern portion of San Francisco Bay, southern San Joaquin Valley, and the Coast, Transverse, and Peninsular ranges, south to Baja California. Generalist reported from a range of scrub and grassland habitats, often with loose or sandy soils.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Artemisiospiza belli belli	Bell's sparrow	None, None	G5T2T3, S3, CDFW-WL	Nests in chaparral dominated by fairly dense stands of chamise. Found in coastal sage scrub in south of range. Nest	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				located on the ground beneath a shrub or in a shrub 6-18 inches above ground. Territories about 50 yds apart.	
Asio otus	long-eared owl	None, None	G5, S3?, CDFW-SSC	Riparian bottomlands grown to tall willows and cottonwoods; also, belts of live oak paralleling stream courses. Require adjacent open land, productive of mice and the presence of old nests of crows, hawks, or magpies for breeding.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Aspidoscelis hyperythra	orange-throated whiptail	None, None	G5, S2S3, CDFW-WL	Inhabits low-elevation coastal scrub, chaparral, and valley-foothill hardwood habitats. Prefers washes and other sandy areas with patches of brush and rocks. Perennial plants necessary for its major food: termites.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Astragalus brauntonii	Braunton's milk-vetch	Endangered, None	G2, S2, 1B.1	Chaparral, coastal scrub, valley and foothill grassland. Recent burns or disturbed areas;	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				usually on sandstone with carbonate layers. Soil specialist; requires shallow soils to defeat pocket gophers and open areas, preferably on hilltops, saddles or bowls between hills. 3-640 m.	
Astur cooperii	Cooper's hawk	None, None	G5, S4, CDFW-WL	Woodland, chiefly of open, interrupted or marginal type. Nest sites mainly in riparian growths of deciduous trees, as in canyon bottoms on river flood-plains; also, live oaks.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Athene cunicularia	burrowing owl	None, Candidate Endangered	G4, S2, CDFW-SSC	Open, dry annual or perennial grasslands, deserts, and scrublands characterized by low-growing vegetation. Subterranean nester, dependent upon burrowing mammals, most notably, the California ground squirrel.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Atriplex coulteri	Coulter's saltbush	None, None	G3, S2, 1B.2	Coastal bluff scrub, coastal dunes, coastal	Suitable habitat for this species does not occur on site. As such,

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				scrub, valley and foothill grassland. Ocean bluffs, ridgetops, as well as alkaline low places. Alkaline or clay soils. 2-460 m.	this species is considered **absent** from the Project site.
Berberis nevinii	Nevin's barberry	Endangered, Endangered	G1, S1, 1B.1	Chaparral, cismontane woodland, coastal scrub, riparian scrub. On steep, N-facing slopes or in low grade sandy washes. 90-1590 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Bombus crotchii	Crotch's bumble bee	None, Candidate Endangered	G2, S2	Coastal California east to the Sierra-Cascade crest and south into Mexico. Food plant genera include Antirrhinum, Phacelia, Clarkia, Dendromecon, Eschscholzia, and Eriogonum.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Bombus pensylvanicus	American bumble bee	None, None	G3G4, S2	Long-tongued; forages on a wide variety of flowers including vetches (Vicia), clovers (Trifolium), thistles (Cirsium), sunflowers (Helianthus), etc. Nests above ground under long grass or underground. Queens	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				overwinter in rotten wood or underground.	
Buteo swainsoni	Swainson's hawk	None, Threatened	G5, S4	Breeds in grasslands with scattered trees, juniper-sage flats, riparian areas, savannahs, and agricultural or ranch lands with groves or lines of trees. Requires adjacent suitable foraging areas such as grasslands, or alfalfa or grain fields supporting rodent populations.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
California Walnut Woodland	California Walnut Woodland	None, None	G2, S2.1	Cismontane woodland	This habitat type is **absent** from the Project site.
Calochortus plummerae	Plummer's mariposa-lily	None, None	G4, S4, 4.2	Coastal scrub, chaparral, valley and foothill grassland, cismontane woodland, lower montane coniferous forest. Occurs on rocky and sandy sites, usually of granitic or alluvial material. Can be very common after fire. 60-2500 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Calochortus weedii var. intermedius	intermediate mariposa-lily	None, None	G3G4T3, S3, 1B.2	Coastal scrub, chaparral, valley and foothill grassland. Dry, rocky	Suitable habitat for this species does not occur on site. As such,

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				calcareous slopes and rock outcrops. 60-1575 m.	this species is considered **absent** from the Project site.
Calystegia felix	lucky morning-glory	None, None	G1, S1, 1B.1	Meadows and seeps, riparian scrub. Sometimes alkaline, alluvial. 9-205 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Camissoniopsis lewisii	Lewis' evening-primrose	None, None	G4, S4, 3	Cismontane woodland, Coastal bluff scrub, Coastal dunes, Coastal scrub, Valley and foothill grassland	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Campylorhynchus brunneicapillus sandiegensis	coastal cactus wren	None, None	G5T3Q, S2, CDFW-SSC	Southern California coastal sage scrub. Wrens require tall opuntia cactus for nesting and roosting.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Centromadia pungens ssp. laevis	smooth tarplant	None, None	G3G4T2, S2, 1B.1	Valley and foothill grassland, chenopod scrub, meadows and seeps, playas, riparian woodland. Alkali meadow, alkali scrub; also in disturbed places. 5-1170 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Chaetodipus fallax fallax	northwestern San Diego pocket mouse	None, None	G5T3T4, S3S4	Coastal scrub, chaparral, grasslands, sagebrush, etc. in western San Diego, Riverside, San	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				Bernardino, and Los Angeles Counties, inclusive of Orange County. Sandy, herbaceous areas, usually in association with rocks or coarse gravel.	
Chorizanthe parryi var. parryi	Parry's spineflower	None, None	G3T2, S2, 1B.1	Coastal scrub, chaparral, cismontane woodland, valley and foothill grassland. Dry slopes and flats; sometimes at interface of 2 vegetation types, such as chaparral and oak woodland. Dry, sandy soils. 90-1220 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Cladium californicum	California saw-grass	None, None	G4, S2, 2B.2	Meadows and seeps, marshes and swamps (alkaline or freshwater). Freshwater or alkaline moist habitats. -40-2150 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Coccyzus americanus occidentalis	western yellow-billed cuckoo	Threatened, Endangered	G5T2T3, S1	Riparian forest nester, along the broad, lower flood-bottoms of larger river systems. Nests in riparian jungles of willow, often mixed with	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				cottonwoods, with lower story of blackberry, nettles, or wild grape.	
Coleonyx variegatus abbotti	San Diego banded gecko	None, None	G5T5, S1S2, CDFW-SSC	Coastal and cismontane Southern California. Found in granite or rocky outcrops in coastal scrub and chaparral habitats.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Convolvulus simulans	small-flowered morning-glory	None, None	G4, S4, 4.2	Chaparral (openings), Coastal scrub, Valley and foothill grassland	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Coturnicops noveboracensis	yellow rail	None, None	G4, S2, CDFW-SSC	Summer resident in eastern Sierra Nevada in Mono County. Freshwater marshlands.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Crotalus ruber	red-diamond rattlesnake	None, None	G4, S3, CDFW-SSC	Chaparral, woodland, grassland, and desert areas from coastal San Diego County to the eastern slopes of the mountains. Occurs in rocky areas and dense vegetation. Needs rodent burrows, cracks in rocks or surface cover objects.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Deinandra paniculata	paniculate tarplant	None, None	G4, S4, 4.2	Coastal scrub, Valley and foothill grassland, Vernal pools	Suitable habitat for this species does not occur on site. As such,

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
					this species is considered **absent** from the Project site.
Diplectrona californica	California diplectronan caddisfly	None, None	G2, S1	Aquatic	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Dipodomys merriami parvus	San Bernardino kangaroo rat	Endangered, Endangered	G5T1, S1, CDFW-SSC	Alluvial scrub vegetation on sandy loam substrates characteristic of alluvial fans and flood plains. Needs early to intermediate seral stages.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Dipodomys stephensi	Stephens' kangaroo rat	Threatened, Threatened	G2, S3	Primarily annual and perennial grasslands, but also occurs in coastal scrub and sagebrush with sparse canopy cover. Prefers buckwheat, chamise, brome grass and filaree. Will burrow into firm soil.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Dodecahema leptoceras	slender-horned spineflower	Endangered, Endangered	G1, S1, 1B.1	Chaparral, cismontane woodland, coastal scrub (alluvial fan sage scrub). Flood deposited terraces and washes; associates include Encelia, Dalea, Lepidospartum, etc. Sandy soils. 200-765 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
Dudleya multicaulis	many-stemmed dudleya	None, None	G2, S2, 1B.2	Chaparral, coastal scrub, valley and foothill grassland. In heavy, often clayey soils or grassy slopes. 1-910 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Elanus leucurus	white-tailed kite	None, None	G5, S3S4, CDFW-FP	Rolling foothills and valley margins with scattered oaks and river bottomlands or marshes next to deciduous woodland. Open grasslands, meadows, or marshes for foraging close to isolated, dense-topped trees for nesting and perching.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Empidonax traillii extimus	southwestern willow flycatcher	Endangered, Endangered	G5T2, S3	Riparian woodlands in Southern California.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Eriastrum densifolium ssp. sanctorum	Santa Ana River woollystar	Endangered, Endangered	G4T1, S1, 1B.1	Coastal scrub, chaparral. In sandy soils on river floodplains or terraced fluvial deposits. 180-705 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Eumops perotis californicus	western mastiff bat	None, None	G4G5T4, S3S4, CDFW-SSC	Many open, semi-arid to arid habitats, including conifer and deciduous woodlands, coastal	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				scrub, grasslands, chaparral, etc. Roosts in crevices in cliff faces, high buildings, trees and tunnels.	
Gila orcuttii	arroyo chub	None, None	G1, S2, CDFW-SSC	Native to streams from Malibu Creek to San Luis Rey River basin. Introduced into streams in Santa Clara, Ventura, Santa Ynez, Mojave and San Diego river basins. Slow water stream sections with mud or sand bottoms. Feeds heavily on aquatic vegetation and associated invertebrates.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Gonidea angulata	western ridged mussel	None, None	G3, S2	Primarily creeks and rivers and less often lakes. Originally in most of state, now extirpated from Central and Southern California.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Horkelia cuneata var. puberula	mesa horkelia	None, None	G4T1, S1, 1B.1	Chaparral, cismontane woodland, coastal scrub. Sandy or gravelly sites. 15-1645 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
Icteria virens	yellow-breasted chat	None, None	G5, S4, CDFW-SSC	Summer resident; inhabits riparian thickets of willow and other brushy tangles near watercourses. Nests in low, dense riparian, consisting of willow, blackberry, wild grape; forages and nests within 10 ft of ground.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Juglans californica	Southern California black walnut	None, None	G4, S4, 4.2	Chaparral, Cismontane woodland, Coastal scrub, Riparian woodland	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Juncus acutus ssp. leopoldii	southwestern spiny rush	None, None	G5T5, S4, 4.2	Coastal dunes (mesic), Coastal scrub, Marshes and swamps (coastal salt), Meadows and seeps (alkaline seeps)	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Lasiurus xanthinus	western yellow bat	None, None	G4G5, S3, CDFW-SSC	Found in valley foothill riparian, desert riparian, desert wash, and palm oasis habitats. Roosts in trees, particularly palms. Forages over water and among trees.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Laterallus jamaicensis coturniculus	California black rail	None, Threatened	G3T1, S2, CDFW-FP	Inhabits freshwater marshes, wet meadows and shallow margins of	Suitable habitat for this species does not occur on site. As such,

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				saltwater marshes bordering larger bays. Needs water depths of about 1 inch that do not fluctuate during the year and dense vegetation for nesting habitat.	this species is considered **absent** from the Project site.
Lepidium virginicum var. robinsonii	Robinson's pepper-grass	None, None	G5T3, S3, 4.3	Chaparral, coastal scrub. Dry soils, shrubland. 4-1435 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Lilium humboldtii ssp. ocellatum	ocellated Humboldt lily	None, None	G4T4?, S4?, 4.2	Chaparral, Cismontane woodland, Coastal scrub, Lower montane coniferous forest, Riparian woodland	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Microseris douglasii ssp. platycarpha	small-flowered microseris	None, None	G4T4, S4, 4.2	Cismontane woodland, Coastal scrub, Valley and foothill grassland, Vernal pools	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Monardella australis ssp. jokerstii	Jokerst's monardella	None, None	G4T1?, S1?, 1B.1	Lower montane coniferous forest, chapparal. Steep scree or talus slopes between breccia. Secondary alluvial benches along drainages and washes. 210-1740 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
Muhlenbergia californica	California muhly	None, None	G4, S4, 4.3	Coastal scrub, chaparral, lower montane coniferous forest, meadows and seeps. Usually found near streams or seeps. 100-2000 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Muhlenbergia utilis	aparejo grass	None, None	G4, S2S3, 2B.2	Meadows and seeps, marshes and swamps, chaparral, coastal scrub, cismontane woodland. Sometimes alkaline, sometimes serpentinite. 25-2325 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Navarretia prostrata	prostrate vernal pool navarretia	None, None	G2, S2, 1B.2	Coastal scrub, valley and foothill grassland, vernal pools, meadows and seeps. Alkaline soils in grassland, or in vernal pools. Mesic, alkaline sites. 3-1235 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Neolarra alba	white cuckoo bee	None, None	GH, SH	Known only from localities in Southern California. Cleptoparasitic in the nests of perdita bees.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Neotoma lepida intermedia	San Diego desert woodrat	None, None	G5T3T4, S3S4, CDFW-SSC	Coastal scrub of Southern California from San Diego County to San Luis	Suitable habitat for this species does not occur on site. As such,

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				Obispo County. Moderate to dense canopies preferred. They are particularly abundant in rock outcrops, rocky cliffs, and slopes.	this species is considered **absent** from the Project site.
Nyctinomops femorosaccus	pocketed free-tailed bat	None, None	G5, S3, CDFW-SSC	Variety of arid areas in Southern California; pine-juniper woodlands, desert scrub, palm oasis, desert wash, desert riparian, etc. Rocky areas with high cliffs.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Nyctinomops macrotis	big free-tailed bat	None, None	G5, S3, CDFW-SSC	Low-lying arid areas in Southern California. Need high cliffs or rocky outcrops for roosting sites. Feeds principally on large moths.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Oncorhynchus mykiss irideus pop. 10	steelhead - southern California DPS	Endangered, Endangered	G5T1Q, S1	Federal listing refers to populations from Santa Maria River south to southern extent of range (San Mateo Creek in San Diego County). Southern steelhead likely have greater physiological tolerances to warmer	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				water and more variable conditions.	
Pantosteus santaanae	Santa Ana sucker	Threatened, None	G1, S1, CDFW-SSC	Endemic to Los Angeles Basin south coastal streams. Habitat generalists, but prefer sand-rubble-boulder bottoms, cool, clear water, and algae.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Perognathus longimembris brevinasus	Los Angeles pocket mouse	None, None	G5T2, S1S2, CDFW-SSC	Lower elevation grasslands and coastal sage communities in and around the Los Angeles Basin. Open ground with fine, sandy soils. May not dig extensive burrows, hiding under weeds and dead leaves instead.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Phacelia stellaris	Brand's star phacelia	None, None	G1, S1, 1B.1	Coastal scrub, coastal dunes. Open areas. 3-370 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Phrynosoma blainvillii	coast horned lizard	None, None	G4, S4, CDFW-SSC	Frequents a wide variety of habitats, most common in lowlands along sandy washes with scattered low bushes. Open areas for sunning, bushes for cover, patches	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				of loose soil for burial, and abundant supply of ants and other insects.	
Polioptila californica californica	coastal California gnatcatcher	Threatened, None	G4G5T3Q, S2, CDFW-SSC	Obligate, permanent resident of coastal sage scrub below 2500 ft in Southern California. Low, coastal sage scrub in arid washes, on mesas and slopes. Not all areas classified as coastal sage scrub are occupied.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Pseudognaphalium leucocephalum	white rabbit-tobacco	None, None	G4, S2, 2B.2	Riparian woodland, cismontane woodland, coastal scrub, chaparral. Sandy, gravelly sites. 35-515 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Rhaphiomidas terminatus abdominalis	Delhi Sands flower-loving fly	Endangered, None	G1T1, S1,	Found only in areas of the Delhi Sands formation in southwestern San Bernardino and northwestern Riverside counties. Requires fine, sandy soils, often with wholly or partly consolidated dunes and sparse vegetation. Oviposition req. shade.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
Riversidian Alluvial Fan Sage Scrub	Riversidian Alluvial Fan Sage Scrub	None, None	G1, S1.1	Coastal scrub	This habitat type is **absent** from the Project site.
Romneya coulteri	Coulter's matilija poppy	None, None	G4, S4, 4.2	Chaparral, Coastal scrub	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Setophaga petechia	yellow warbler	None, None	G5, S3, CDFW-SSC	Riparian plant associations in close proximity to water. Also nests in montane shrubbery in open conifer forests in Cascades and Sierra Nevada. Frequently found nesting and foraging in willow shrubs and thickets, and in other riparian plants including cottonwoods, sycamores, ash, and alders.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Sidalcea neomexicana	salt spring checkerbloom	None, None	G4, S2, 2B.2	Playas, chaparral, coastal scrub, lower montane coniferous forest, Mojavean desert scrub. Alkali springs and marshes. 3-2380 m.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Southern California Arroyo Chub/Santa Ana Sucker Stream	Southern California Arroyo	None, None	GNR, SNR	Inland Waters	This habitat type is **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
	Chub/Santa Ana Sucker Stream				
Southern Cottonwood Willow Riparian Forest	Southern Cottonwood Willow Riparian Forest	None, None	G3, S3.2	Riparian forest	This habitat type is **absent** from the Project site.
Southern Sycamore Alder Riparian Woodland	Southern Sycamore Alder Riparian Woodland	None, None	G4, S4,	Riparian woodland	This habitat type is **absent** from the Project site.
Southern Willow Scrub	Southern Willow Scrub	None, None	G3, S2.1	Riparian scrub	This habitat type is **absent** from the Project site.
Spea hammondii	western spadefoot	Proposed Threatened, None	G2G3, S3S4, CDFW-SSC	Occurs primarily in grassland habitats, but can be found in valley-foothill hardwood woodlands. Vernal pools are essential for breeding and egg-laying.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Symphyotrichum defoliatum	San Bernardino aster	None, None	G2, S2, 1B.2	Meadows and seeps, cismontane woodland, coastal scrub, lower montane coniferous forest, marshes and swamps, valley and foothill grassland. Vernally mesic grassland or near ditches, streams	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				and springs; disturbed areas. 3-2045 m.	
Thamnophis hammondii	two-striped gartersnake	None, None	G4, S3S4, CDFW-SSC	Coastal California from vicinity of Salinas to northwest Baja California. From sea to about 7,000 ft elevation. Highly aquatic, found in or near permanent fresh water. Often along streams with rocky beds and riparian growth.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Thamnophis sirtalis pop. 1	south coast gartersnake	None, None	G5T1T2, S1S2, CDFW-SSC	Southern California coastal plain from Ventura County to San Diego County, and from sea level to about 850 m. Marsh and upland habitats near permanent water with good strips of riparian vegetation.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Thysanocarpus rigidus	rigid fringepod	None, None	G2, S2, 1B.2	Pinyon and juniper woodland. Dry, rocky slopes and ridges of oak and pine woodland in arid mountain ranges. 425-2165.	Suitable habitat for this species does not occur on site. As such, this species is considered **absent** from the Project site.
Vireo bellii pusillus	least Bell's vireo	Endangered, Endangered	G5T2, S3	Summer resident of Southern California in low	Suitable habitat for this species does not occur on site. As such,

Scientific Name	Common Name	Federal/State Status	Other Status	Habitat	Potential to Occur
				riparian in vicinity of water or in dry river bottoms; below 2000 ft. Nests placed along margins of bushes or on twigs projecting into pathways, usually willow, Baccharis, mesquite.	this species is considered **absent** from the Project site.

Coding and Terms

E = Endangered T = Threatened C = Candidate FP = Fully Protected SSC = Species of Special Concern R = Rare

State Species of Special Concern: An administrative designation given to vertebrate species that appear to be vulnerable to extinction because of declining populations, limited acreages, and/or continuing threats. Raptor and owls are protected under section 3502.5 of the California Fish and Game code: "It is unlawful to take, possess or destroy any birds in the orders Falconiformes or Strigiformes or to take, possess or destroy the nest or eggs of any such bird."

State Fully Protected: The classification of Fully Protected was the State's initial effort in the 1960's to identify and provide additional protection to those animals that were rare or faced possible extinction. Lists were created for fish, mammals, amphibians and reptiles. Fully Protected species may not be taken or possessed at any time and no licenses or permits may be issued for their take except for collecting these species for necessary scientific research and relocation of the bird species for the protection of livestock.

Global Rankings (Species or Natural Community Level):

G1 = Critically Imperiled – At very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
G2 = Imperiled – At high risk of extinction due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.
G3 = Vulnerable – At moderate risk of extinction due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.
G4 = Apparently Secure – Uncommon but not rare; some cause for long-term concern due to declines or other factors.
G5 = Secure – Common; widespread and abundant.
? = Uncertainty in the exact status of an element (could move up or down one direction from current rank)

Subspecies Level: Taxa which are subspecies or varieties receive a taxon rank (T-rank**)** attached to their G-rank. Where the G-rank reflects the condition of the entire species, the T-rank reflects the global situation of just the subspecies. For example: the Point Reyes mountain beaver, *Aplodontia rufa* ssp. *phaea* is ranked G5T2. The G-rank refers to the whole species range i.e., *Aplodontia rufa.* The T-rank refers only to the global condition of ssp. *phaea*.

State Ranking:

S1 = Critically Imperiled – Critically imperiled in the State because of extreme rarity (often 5 or fewer populations) or because of factor(s) such as very steep declines making it especially vulnerable to extirpation from the State.
S2 = Imperiled – Imperiled in the State because of rarity due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors making it very vulnerable to extirpation from the State.
S3 = Vulnerable – Vulnerable in the State due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors making it vulnerable to extirpation from the State.
S4 = Apparently Secure – Uncommon but not rare in the State; some cause for long-term concern due to declines or other factors.
S5 = Secure – Common, widespread, and abundant in the State.

California Rare Plant Rankings (CNPS List):

1A = Plants presumed extirpated in California and either rare or extinct elsewhere.
1B = Plants rare, threatened, or endangered in California and elsewhere.
2A = Plants presumed extirpated in California, but common elsewhere.
2B = Plants rare, threatened, or endangered in California, but more common elsewhere.
3 = Plants about which more information is needed; a review list.
4 = Plants of limited distribution; a watch list.

Threat Ranks:

.1 = Seriously threatened in California (over 80% of occurrences threatened / high degree and immediacy of threat)
.2 = Moderately threatened in California (20-80% occurrences threatened / moderate degree and immediacy of threat)
.3 = Not very threatened in California (less than 20% of occurrences threatened / low degree and immediacy of threat or no current threats known)

Keywords: San Bernardino Valley region; Phase I cultural resources survey; *No Impact* on "historical resources" under CEQA

EXECUTIVE SUMMARY

Between November 2025 and February 2026, at the request of Warmington Residential, Southern California Division, CRM TECH performed a cultural resources study on 3.22 acres of vacant urban land in the City of Eastvale, Riverside County, California. The subject property of the study consists of Assessor's Parcel Numbers 144-070-016, -017, -018, and -020, located at 7500 Hellman Avenue, north of Walter Street, in a portion of the Rancho Jurupa land grant lying within what would be Section 34 of Township 2 South, Range 7 West, San Bernardino Baseline and Meridian, as depicted in the United States Geological Survey Corona North, California, 7.5' quadrangle.

The study is a part of the environmental review process for the proposed subdivision of the property for the development of 35 single-family homes. The City of Eastvale, as the lead agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA). The purpose of this study is to provide the City with the necessary information and analysis to determine whether the project would cause a substantial adverse change to any "historical resources," as defined by CEQA, that may exist in or around the project area. To identify such resources, CRM TECH conducted a historical/archaeological resources records search, initiated a Sacred Lands File search, pursued historical background research, and carried out an intensive-level field survey.

Throughout the course of these research procedures, the current study encountered no "historical resources" that may be affected by the proposed project. Therefore, CRM TECH recommends to the City of Eastvale a conclusion of *No Impact* regarding "historical resources." No further cultural resources investigation is recommended for the project unless development plans undergo such changes as to include areas not covered by this study. However, if buried cultural materials are discovered during earth-moving operations associated with the project, all work in that area should be halted or diverted until a qualified archaeologist can evaluate the nature and significance of the finds.

INTRODUCTION

Between November 2025 and February 2026, at the request of Warmington Residential, Southern California Division, CRM TECH performed a cultural resources study on 3.22 acres of vacant urban land in the City of Eastvale, Riverside County, California (Figure 1). The subject property of the study consists of Assessor's Parcel Numbers 144-070-016, -017, -018, and -020, located at 7500 Hellman Avenue, north of Walter Street, in a portion of the Rancho Jurupa land grant lying within what would be Section 34 of Township 2 South, Range 7 West, San Bernardino Baseline and Meridian, as depicted in the United States Geological Survey (USGS) Corona North, California, 7.5' quadrangle (Figures 2 , 3).

The study is a part of the environmental review process for the proposed subdivision of the property for the development of 35 single-family homes. The City of Eastvale, as the lead agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA; PRC §21000 et seq.). The purpose of this study is to provide the City with the necessary information and analysis to determine whether the project would cause a substantial adverse change to any "historical resources," as defined by CEQA, that may exist in or around the project area.

In order to identify such resources, CRM TECH conducted a historical/archaeological resources records search, initiated a Sacred Lands File search, pursued historical background research, and carried out an intensive-level field survey. The following report is a complete account of the methods, results, and conclusion of the study. Personnel who participated in the study are named in the appropriate sections below, and their qualifications are provided in Appendix 1.

Figure 3. Satellite image of the project area. Based on Google Earth imagery.

SETTING

CURRENT NATURAL SETTING

The City of Eastvale is located in the southern portion of the Transverse Ranges geomorphic province, where the natural landscape is characterized by an east-west trending series of steep mountain ranges and valleys (Jenkins 1980). The area lies near the southwestern rim of the San Bernardino Valley, on the gentle slope of an alluvial fan extending south from the foothills of the San Gabriel Mountains to the Santa Ana River, the main natural waterway in the valley. The Mediterranean climate of the region is typical of inland southern California lowlands, featuring hot, dry summers and mild, wet winters. The average annual rainfall in the region is approximately 12 inches, most of which typically occurs between November and March.

The L-shaped project area is situated on the western edge of the Eastvale city limits, wrapping around the northern and eastern sides of a formerly rural residential property at the northeastern corner of Hellman Avenue and Walters Street. It is surrounded by suburban residential neighborhoods on the west, north, and east, with the Rondo Elementary School of Discovery across Walters Street to the south. Elevations within the project boundaries range approximately from 573 feet to 582 feet above mean sea level, and the terrain is relatively level with a slight incline towards the north. Vegetation observed on the property includes grasses throughout, with large California pepper trees in the center of the project area. Also present on the property are several debris mounds with various types of modern trash (Figure 4).

Figure 4. Overview of the project area, view to the west. (Photograph taken on December 17, 2025)

CULTURAL SETTING

Prehistoric Context

The earliest evidence of human occupation in inland southern California was discovered below the surface of an alluvial fan in the northern portion of the Lakeview Mountains in Riverside County, overlooking the San Jacinto Valley, with radiocarbon dates clustering around 9,500 B.P. (Horne and McDougall 2008). Another site found near the shoreline of Lake Elsinore, close to the confluence of Temescal Wash and the San Jacinto River, yielded radiocarbon dates between 8,000 and 9,000 B.P. (Grenda 1997). Additional sites with isolated Archaic dart points, bifaces, and other associated lithic artifacts from the same age range have been found in the nearby Cajon Pass area, typically atop knolls with good viewsheds (Basgall and True 1985; Goodman and McDonald 2001; Goodman 2002; Milburn et al. 2008).

The cultural history of southern California has been summarized into numerous chronologies, including the works of Chartkoff and Chartkoff (1984), Warren (1984), and others. The prehistory of the inland region specifically has been addressed by O'Connell et al. (1974), McDonald, et al. (1987), Keller and McCarthy (1989), Grenda (1993), Goldberg (2001), and Horne and McDougall (2008). Although the beginning and ending dates of different cultural horizons vary in different parts of the region, the general framework of the prehistory of inland southern California can be divided into three primary periods:

- Paleoindian Period (ca. 18,000-9,000 B.P.): Native peoples of this period created fluted spearhead bases designed to be hafted to wooden shafts. The distinctive method of thinning bifaces and spearhead preforms by removing long, linear flakes leaves diagnostic Paleoindian markers at tool-making sites. Other artifacts associated with the Paleoindian toolkit include choppers, cutting tools, retouched flakes, and perforators. Sites from this period are very sparse across the landscape and most are deeply buried.
- Archaic Period (ca. 9,000-1,500 B.P.): Archaic sites are characterized by abundant lithic scatters of considerable size with many biface thinning flakes, bifacial preforms broken during manufacture, and well-made groundstone bowls and basin metates. As a consequence of making dart points, many biface thinning waste flakes were generated at individual production stations, which is a diagnostic feature of Archaic sites.
- Late Prehistoric Period (ca. 1,500 B.P.-contact): Sites from this period typically contain small lithic scatters from the manufacture of small arrow points, expedient groundstone tools such as tabular metates and unshaped manos, wooden mortars with stone pestles, acorn or mesquite bean granaries, ceramic vessels, shell beads suggestive of extensive trading networks, and steatite implements such as pipes and arrow shaft straighteners.

Ethnohistoric Context

The City of Eastvale is situated near the eastern edge of the traditional territory of the Gabrielino, a Takic-speaking people who were considered among the most populous and powerful ethnic group in aboriginal southern California (Bean and Smith 1978:538). The Gabrielino's territory spanned from San Clemente Island along the coast to the present-day San Bernardino-Riverside area and south into southern Orange County, and their influence spread as far as the San Joaquin Valley, the Colorado

River, and Baja California. The leading ethnographic sources on Gabrielino culture and history include Bean and Smith (1978), Miller (1991), and McCawley (1996). The following summary is based mainly on these sources.

Prior to European contact, native subsistence practices were defined by the varying surrounding landscape and primarily based on the cultivating and gathering of wild foods, hunting, and fishing, exploiting nearly all of the resources available in a highly developed seasonal mobility system. In inland areas, the predominant food sources included acorns, piñon nuts, other seeds, roots, wild fruits/berries, and wild onions. Medicinal and ceremonial plants such as yerba buena, elderberry, and sage were typically cultivated near villages. Common game animals included deer, antelope, rabbits, wood rats, fish, and waterfowl. Coastal Gabrielino utilized marine resources and had an advanced maritime navigation technology with an emphasis on the *ti'at*, the plank canoe used by only a handful of groups in North America (Gamble 2002).

Both inland and coastal Gabrielino populations had a variety of technological skills that they used to acquire subsistence, shelter, and medicine or to create ornaments and decorations. Common tools included manos and metates, mortars and pestles, hammerstones, fire drills, awls, arrow straighteners, and stone knives and scrapers. These lithic tools were made from locally sourced material as well as those procured through trade or travel. They also used wood, horn, and bone spoons and stirrers, as well as baskets for winnowing, leaching, grinding, transporting, parching, storing, and cooking. However, much of this material cultural, elaborately decorated, does not survive in the archaeological record. As usual, the main items found archaeologically relate to subsistence activities.

The intricacies of Gabrielino social organization are not well known, although evidence suggests the existence of a moiety system in which various clans belonged to one or the other of two main social/ cultural divisions. There also seems to have existed at least three hierarchically ordered social classes, topped with an elite consisting of the chiefs, their immediate families, and the very rich. Some individuals owned land, and property boundaries were marked by the owner's personalized symbol. Villages were politically autonomous, composed of nonlocalized lineages, each with its own leader. The dominant lineage's leader was usually the village chief, whose office was generally hereditary through the male line. Often several villages were allied under the leadership of a single chief. The villages did engage in warfare against one another, resulting in what some consider to be a state of enmity between coastal and inland Gabrielino groups.

As early as 1542, the Gabrielino were in contact with the Spanish during the historic expedition of Juan Rodríguez Cabrillo, but it was not until 1769 that the Spaniards took steps to colonize Gabrielino territory. Shortly afterwards, most of the Gabrielino people were incorporated into Mission San Gabriel and other missions in southern California. Due to forced labor, dietary deficiencies, introduced diseases, and forceful reduction, Gabrielino population dwindled rapidly. By 1900, they had almost ceased to exist as a culturally identifiable group (Bean and Smith 1978:540). In recent decades, however, there has been a renaissance of Native American activism and cultural revitalization among groups of Gabrielino descendants, including the reconstruction and utilization of *ti'at* and incorporating the ethnographic names *Kizh* and *Tongva* into official documentation (Stickel 2016).

Historic Context

The present-day northwestern Riverside County received its earliest European visitors during the early and mid-1770s, shortly after the beginning of Spanish colonization of Alta California in 1769 (Beck and Haase 1974:15). In the early 19th century, the area was known as Rancho Jurupa, one of Mission San Gabriel's principal land holdings (Gunther 1984:259). Despite these early contacts, no Europeans are known to have settled in the area until after the Mexican authorities, upon gaining independence from Spain, began to dismantle the mission system in Alta California in 1834. During the next 12 years, the former mission ranchos were surrendered to the Mexican government and subsequently divided and granted to various prominent citizens of the province. In 1838, Juan Bandini, then administrator of Mission San Gabriel, secured Rancho Jurupa for himself and became the first non-Indian to settle in the area when he built an adobe home on a bluff overlooking the Santa Ana River (*ibid.*).

In 1870, the Riverside Colony was founded on a portion of Rancho Jurupa and became the first major settlement in northwestern Riverside County. A few years later, the successful introduction of the navel orange in Riverside led to the rapid spread of citrus cultivation throughout southern California and propelled the budding town to the forefront of the thriving citrus industry. To the southwest of Riverside, the town of Corona, originally named South Riverside, was founded in 1886, during a land boom that swept through much of southern California. Closer to Eastvale, the town of Norco, whose name was coined from "North Corona," was founded in 1923, after the failure of a 1910-1911 subdivision scheme in the same area (Gunther 1984:354). Found to be unsuitable for citrus cultivation, Norco instead centered its growth on a country club, a golf course, and a 50-acre lake named Norconian that the promoters of the town built near a hot sulphur well (*ibid.*).

A late boomer in the region, Eastvale came into being as a community only in the early 2000s, in response to the ever-increasing demand for affordable housing in southern California. It was among several new communities emerging from two expansive agricultural preserves, Chino and Mira Loma, that were dominated by large dairy farms until the preserve designations were removed (County of Riverside 2003; *San Bernardino County Sentinel* 2013). Almost fully urbanized as a typical "bedroom community," Eastvale boasted a population of 53,668 in 2010, the year when the city was incorporated (USCB n.d.). The name of the city derives from the Eastvale School District, which has served the area since 1893 (Gunther 1984:170). The origin of the school district's name, however, "has not yet been revealed" (*ibid.*).

RESEARCH METHODS

RECORDS SEARCH

As the project location lies along the Riverside-San Bernardino county line, the records search for this study was conducted at the designated repositories for both counties, namely the South Central Information Center (SCIC) at San Diego State University for Riverside County and the South Central Coastal Information Center (SCCIC) at California State University, Fullerton, for San Bernardino County. The portion of the records search at the SCCIC was completed by CRM TECH archaeologist Eulices Lopez on December 18, 2025, and the portion at the SCIC was completed by CRM TECH archaeologist Dierdre Encarnación on January 13, 2026.

The records search entailed a systematic examination of the SCIC's and SCCIC's digital maps, records, and databases for previously identified cultural resources and existing cultural resources reports within a one-mile radius of the project area. Previously identified cultural resources include properties designated as California Historical Landmarks or Points of Historical Interest as well as those listed in the National Register of Historic Places, the California Register of Historical Resources, or the California Historical Resources Inventory.

SACRED LANDS FILE SEARCH

On December 2, 2025, CRM TECH submitted a written request to the State of California Native American Heritage Commission (NAHC) for a records search in the commission's Sacred Lands File. The response from the NAHC is summarized below and attached to this report in Appendix 2.

HISTORICAL BACKGROUND RESEARCH

Historical background research for this study was conducted by CRM TECH archaeologist Elizabeth Beckner. Sources consulted during the research included published literature in local history, historical maps of the Eastvale area, and aerial/satellite photographs of the project vicinity. Among the maps consulted for this study were U.S. General Land Office (GLO) land survey plat maps dated 1876-1881 and USGS topographic maps dated 1902-1981, which are available at the websites of the U.S. Bureau of Land Management and the USGS. The aerial and satellite photographs, taken in 1938-2025, are available at the Nationwide Environmental Title Research (NETR) Online website, through the Google Earth software, and from the Geospatial Collection of the University of California (Santa Barbara) Library.

FIELD SURVEY

On December 17, CRM TECH archaeologist Melissa Portilla carried out the field survey of the project area. The survey was completed at an intensive level by walking a series of parallel east-west transects spaced 15 meters (approximately 50 feet) apart and inspecting all exposed ground surfaces for any evidence of human activities dating to the prehistoric or historic period (i.e., 50 years or older). Visibility of the native soils was poor (0-5%) in most of the project area because the ground was obscured by dense vegetation. In the areas with some exposed soils, mainly underneath the trees, visibility was fair (5-10%), although much of the ground was covered in a layer of dead vegetation. Considering the history of past disturbances to the ground surface within the project area, the level of visibility was deemed to be acceptable for the purpose of this study.

RESULTS AND FINDINGS

RECORDS SEARCH

According to SCIC and SCCIC records, the project area was covered by a previous cultural resources study completed in 2018 (Brunzell and Orozco 2018; RI-10501 in Figure 5). That study was conducted on the same parcels as the current project area and included a records search and a pedestrian field survey that also utilized 15-meter transects (*ibid.*:4-5). No cultural resources were

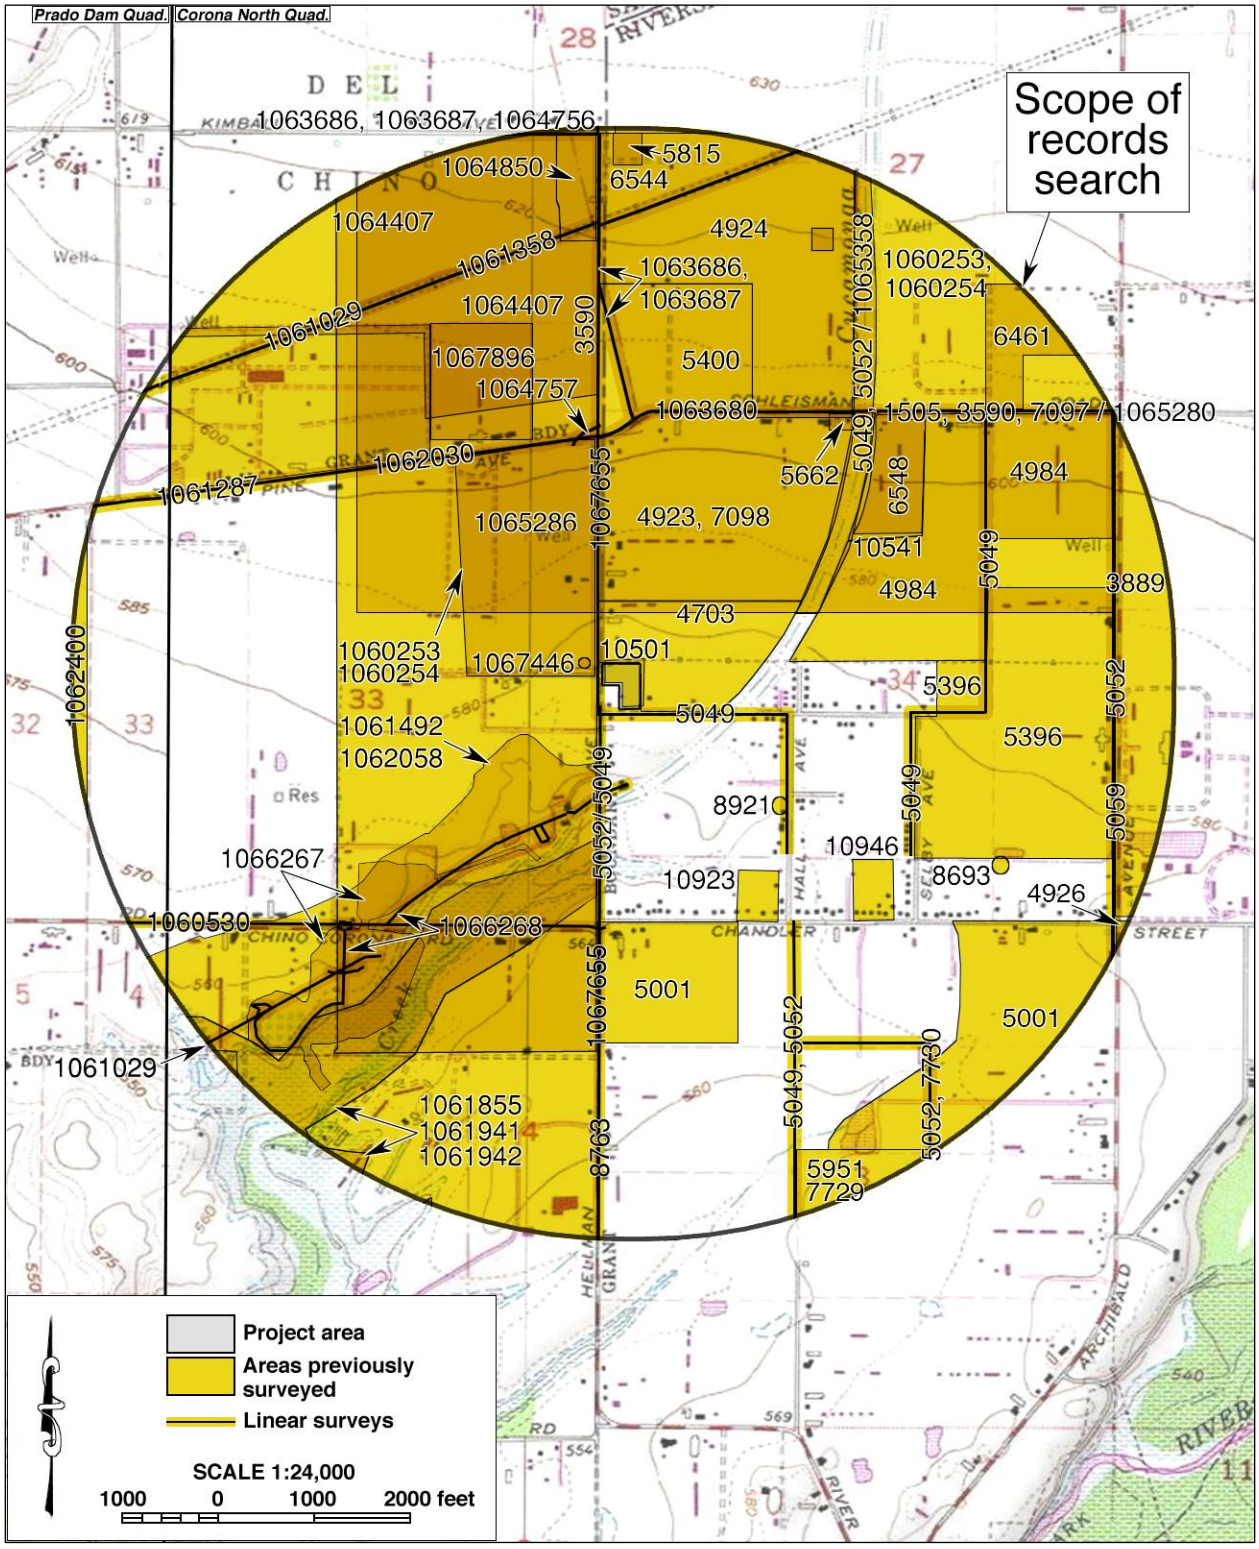

Figure 5. Previous cultural resources studies in the vicinity, listed by SCIC and SCCIC file numbers. Locations of historical/archaeological resources are not shown as a protective measure.

identified on the property during the 2018 study (*ibid.*:6). Since that study is now seven years old, it is considered out-of-date for statutory compliance purposes today.

Outside of project boundaries but within the one-mile scope of the records search, SCIC and SCCIC records indicate more than 50 additional studies carried out on various tracts of land and linear features between 1975 and 2020 (Figure 5; see Appendix 3 for further information). These and other similar studies nearby resulted in the identification of 31 historical/archaeological resources within the records search scope, including 3 prehistoric (i.e., Native American) archaeological sites and 28 historic-period resources, as listed in Table 1. None of these localities was found within the project boundaries, although three of them, 33-016681/36-013627, 33-020285, and 33-020286, were recorded on properties adjacent to the project area.

33-016681/36-013627 represents an early 20th century power transmission line known as the Southern Sierras Power Company "O" Line, which extended from the San Bernardino area into Orange County (Dice 2007). A segment of its right-of-way lies just outside the northern project boundary. When it was first recorded in 2007, this resource was determined not to be a significant resource because of the loss of historic integrity (*ibid.*:15). 33-020285 was recorded in 2011 as a 1950s dairy property with a residence and a milking parlor (Yates 2011a). Located across Walters Street from the project location, it has since been removed. 33-020286 consists of the residential property at the corner of Hellman Avenue and Walters Street, which contained four buildings when it was recorded in 2011, including the Minimal Traditional-style main residence built in 1953, a modern modular home, a tractor garage, and a rectangular building of unknown use (Yates 2011b). The existing record offers no indication whether it was evaluated for significance at the time.

None of the other 28 known cultural resources was found in the immediate vicinity of the project area, the nearest ones being several hundred feet away. The three prehistoric sites among them all consisted of groundstone and chipped-stone artifacts. One of them is known to have been removed by construction activities, and another was partially damaged. The historic-period resources consisted predominantly of residential buildings and dairy farms, some of which have been destroyed to make way for residential development projects. Other features recorded at the historic-period localities included irrigation works and structural remains.

SACRED LANDS FILE SEARCH

In response to CRM TECH's inquiry, the NAHC reports in a letter dated December 10, 2025, that the Sacred Lands File identified no Native American cultural resources in the project vicinity (see Appendix 2). Noting that the lack of specific information in the Sacred Lands File does not necessarily indicate the absence of such resources, however, the NAHC recommended that local Native American groups be consulted for further information and provided a referral list of 48 individuals associated with 24 local Native American groups. The NAHC's reply is attached in Appendix 2 for reference by the City of Eastvale in future government-to-government consultations with the pertinent tribal groups, if necessary.

HISTORICAL BACKGROUND RESEARCH

Historical maps and aerial photographs consulted during this study suggest that the project area is relatively low in sensitivity for potentially significant cultural resources from the historic period.

Table 1. Previously Recorded Cultural Resources within the Scope of the Records Search		
Resource Number	**Date Recorded**	**Description**
33-006669	1983	Residential building, ca. 1915
33-013346	2004	Residential building, 1940; no longer extant
33-013347	2004	Dairy complex, ca. 1958; no longer extant
33-013348	2004	Residential building, ca. 1958; no longer extant
33-013775	2004	Residential building, two sheds, and multiple dairy outbuildings, ca. 1911-1915; no longer extant
33-013776	2004	Residential building and milking house, early 1950s; no longer extant
33-013783	2004	Residential building, ca. early 1950s
33-016681/CA-RIV-013014H	2018, 2016, 2007	Power transmission line, late 1920s; also 36-013627/CA-SBR-012613H in San Bernardino County
33-020263	2011	Numerous buildings and pole barns, ca. 1955-1965; no longer extant
33-020264	2011	Dairy property: dairy parlor, two residential buildings with detached garages, and ancillary buildings, ca. 1950-1955; no longer extant
33-020265	2011	Residential & agricultural buildings, ca. 1961; no longer extant
33-020285	2011	Dairy property: residential building and milking parlor with cow stalls, ca. 1950; no longer extant
33-020286	2011	Property with residential building (ca. 1953), modern modular home, and ancillary buildings
33-020287	2011	Two residential buildings, ca. 1945; no longer extant
33-029412	2020	Three residential buildings on one parcel, 1932-1950
33-029413	2020	Residential building, 1966
33-029414	2020	Residential building, 1966
36-002845/CA-SBR-002845	2008, 1985, 1983, 1980, 1978	Prehistoric site with mano, lithic scatters, metate fragments, and chipped stone
36-005244/CA-SBR-005244	1983	Prehistoric site with manos and metates; site destroyed during leveling for construction of dairy
36-005274/CA-SBR-005274	1984	Prehistoric site: mortars, pestles, projectile points; site damaged by trenching during well construction
36-013408	2007	McClean Ranch/Arthur Farms, ca. 1942-1953
36-013410	2007	Historic-period structures, 1957
36-013412/CA-SBR-012573H	2007	Fuqua Ditch, ca. 1870-1880s
36-013627/CA-SBR-012613H	2019, 2017, 2012, 2011, 2007	Power transmission line, late 1920s; also 33-016681/CA-RIV-013014H in Riverside County
36-019872	2015, 2009	Clark Ranch, ca. 1940s
36-020641	2005	Residential building, ca. 1927
36-020642	2005	Residential building, ca. 1930s
36-020643	2005	Residential building, ca. 1930s
36-020644	2005	Residential building, ca. 1930s
36-020645	2005	Dairy barn, ca. 1950s
36-028586	2012	Two residential buildings, equestrian center, and composting facility, ca. 1936-1963
36-033117	2019	Concrete pads, ca. 1938-1959

Prior to 1900, no notable human-made features were known to be present within or adjacent to the project boundaries except roadways, including the forerunner of Hellman Avenue, which was in place by the late 1890s (Figures 6, 7). During the late 19th and early to mid-20th century, land use in the project vicinity was dominated by agriculture, with cultivated fields and orchards occupying most of the land and scattered buildings lining the grid of roads (Figures 8-10; NETR 1938-1959;

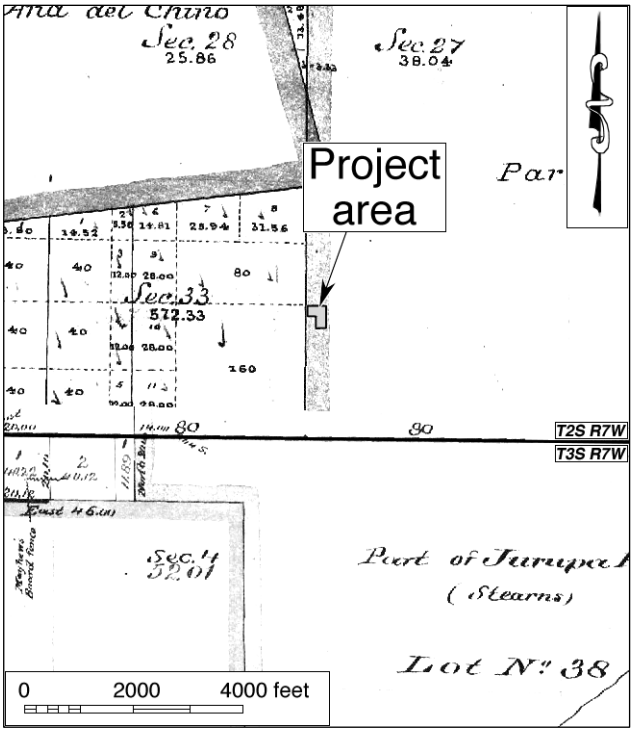

Figure 6. The project area and vicinity in 1853-1884. Source: GLO 1876; 1881.

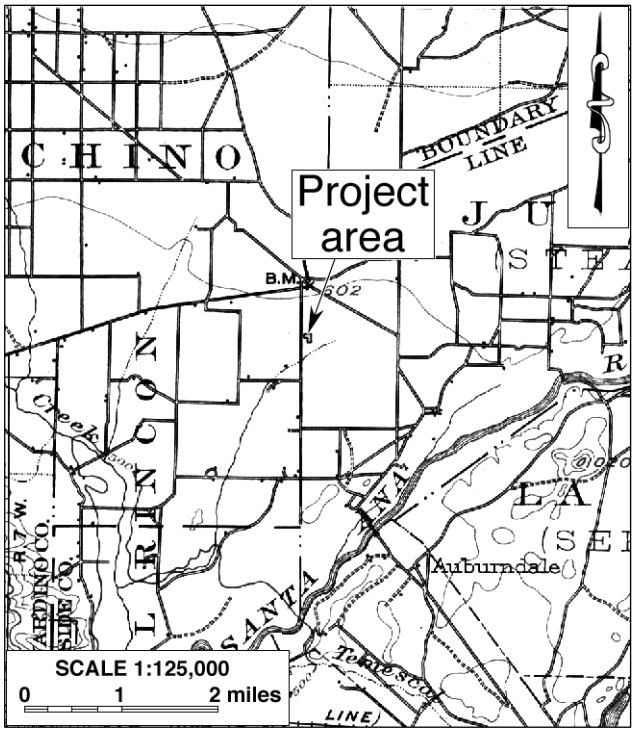

Figure 7. The project area and vicinity in 1894-1899. Source: USGS 1902.

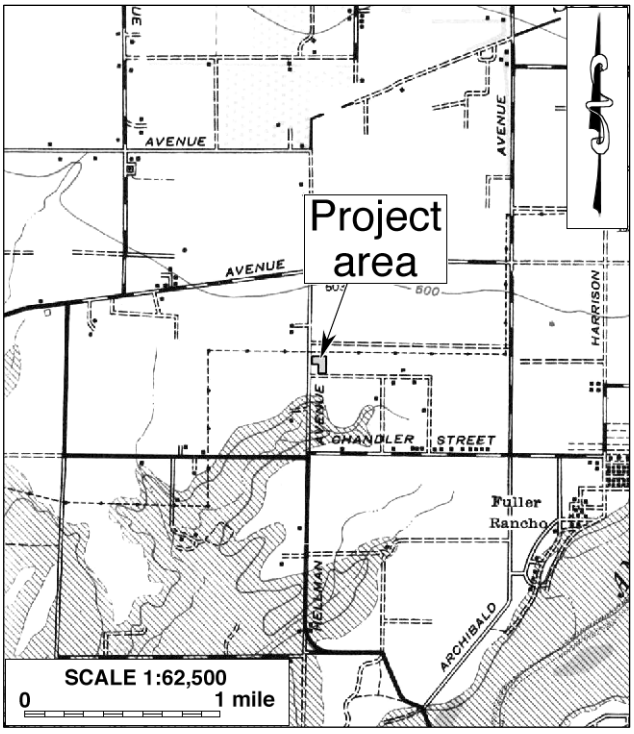

Figure 8. The project area and vicinity in 1939. Source: USGS 1942.

Pacific Air Industries 1953). By the late 1930s, two other linear features joined Hellman Avenue along the various boundaries of the project area: the transmission line previously recorded as Site 33-016681/36-013627 and the unpaved forerunner of Walters Street (Figure 8). During the post-WWII boom, rural development accelerated in the surrounding area (NETR 1948-1980; Pacific Air Industries 1953; Figures 9, 10). In particular, dairy farms proliferated to the north and northwest of the project location as dairy farmers displaced by suburban expansion in the Los Angeles Basin arrived in the Chino Basin in search of fresh pasture (*ibid.*).

Within the project boundaries, it was not until 1980 that the land began to be developed, with the southeastern portion being graded and a metal holding pen and ramp constructed along Walters Street (NETR 1980). By 1985, the majority of the project area had been graded (NETR 1985). In the 1990s, the eastern portion

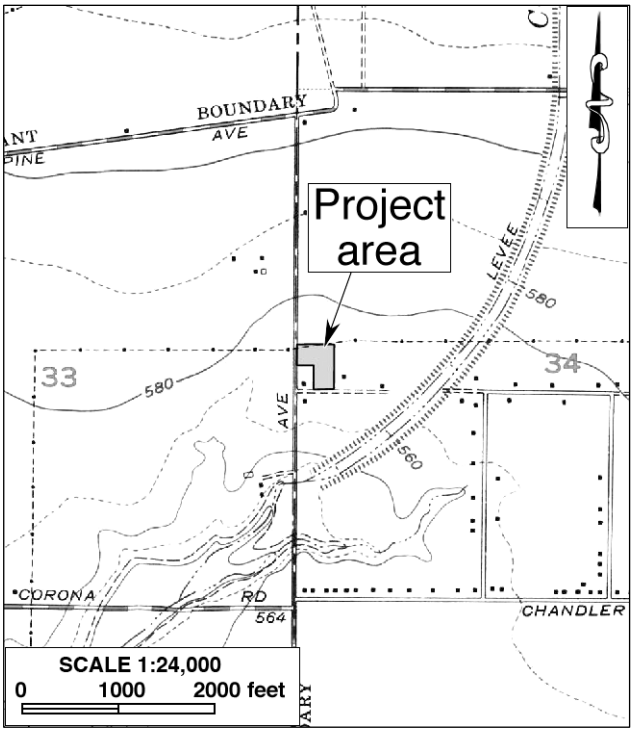

Figure 9. The project area and vicinity in 1952-1954. Source: USGS 1954.

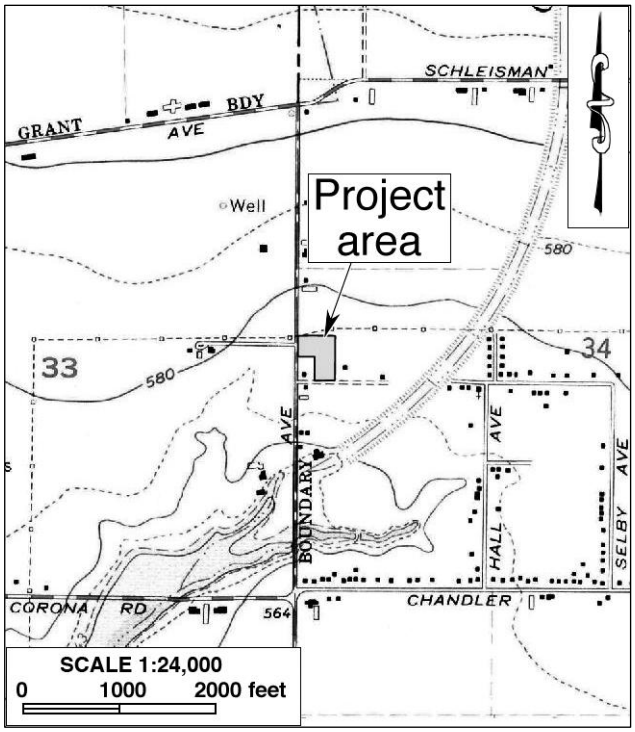

Figure 10. The project area and vicinity in 1966-1967. Source: USGS 1967.

of the property was used for the storage of large trucks and shipping containers, and a building was constructed in the center of that area by 1998 (NETR 1994; 1998). The dairy farms in the surrounding land flourished until the early to mid-2000s, when tracts of single-family homes began to dominate the landscape (NETR 1998-2005). Meanwhile, much of the project continued to be use as a storage area until 2021 (NETR 1994-2022; Google Earth 1994-2022).

By 2022, the property had been cleared of all the trucks and shipping containers, leaving an asphalt drive, a concrete walkway, the pen and ramp, the building, and some debris around the trees in the center of the project area (Google Earth 2022). The building was demolished shortly after that, and the rubble from the demolition remained on the property (Google Earth 2023-2025). Since then, while there has been an increased amount of refuse collected in piles near the center of the project area, little change has occurred elsewhere on the property (*ibid.*).

FIELD SURVEY

The field survey produced negative results for any potential "historical resources" from either the prehistoric or the historic period. During the survey, the holding pen and ramp, asphalt drive, concrete walkway, rubble from the building, and piles of refuse were found to remain extant on the property. The ramp and platform are made of rusting, aged metal and concrete, similar to those used for equestrian mounting. To the east of the ramp and platform is the holding pen made of rusting metal pipes, wire, and sheet metal. East of the holding pen is the asphalt drive and concrete walkway, which run north from the main access gate at Walters Street. Between the asphalt drive and walkway there is a low-lying concrete wall that is approximately two feet high. As discussed

above, all of these features and items are known to be modern in origin, and none of them is of any historical or archaeological interest.

DISCUSSION

STATUTORY AND REGULATORY GUIDELINES

CEQA establishes that "a project that may cause a substantial adverse change in the significance of a historical resource is a project that may have a significant effect on the environment" (PRC §21084.1). "Substantial adverse change," according to PRC §5020.1(q), "means demolition, destruction, relocation, or alteration such that the significance of a historical resource would be impaired." As defined by PRC §5020.1(j), "'historical resource' includes, but is not limited to, any object, building, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California."

More specifically, CEQA guidelines state that the term "historical resources" applies to any such resources listed in or determined to be eligible for listing in the California Register of Historical Resources, included in a local register of historical resources, or determined to be historically significant by the lead agency (Title 14 CCR §15064.5(a)(1)-(3)). Regarding the proper criteria for the evaluation of historical significance, CEQA guidelines mandate that "generally a resource shall be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing on the California Register of Historical Resources" (Title 14 CCR §15064.5(a)(3)). A resource may be listed in the California Register if it meets any of the following criteria:

(1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
(2) Is associated with the lives of persons important in our past.
(3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.
(4) Has yielded, or may be likely to yield, information important in prehistory or history. (PRC §5024.1(c))

SUMMARY OF FINDINGS

In summary of the research results outlined above, no potential "historical resources" were previously recorded within the project area, and none was found during the present survey. In addition, the Sacred Lands File identified no Native American cultural resources in the vicinity, and no notable cultural features were known to be present in the project area throughout the historic period. Furthermore, the extensively disturbed surface and near-surface soils in the project area do not appear to be particularly sensitive for buries archaeological deposits from the prehistoric or early historic period. Based on these findings, and in light of the criteria listed above, the present study concludes that no "historical resources" exist within the project area.

CONCLUSION AND RECOMMENDATIONS

Based on these findings, CRM TECH recommends to the City of Eastvale a conclusion of *No Impact* regarding "historical resources." No further cultural resources investigation is recommended for the project unless development plans undergo such changes as to include areas not covered by this study. Accordingly, the proposed project may be cleared to proceed in compliance with CEQA provisions on cultural resources under the following standard condition as formulated by the City of Eastvale:

> If cultural resources are encountered during ground-disturbing activities, work in the immediate area shall cease and an archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for Archaeology shall be contacted immediately to evaluate the find(s). If the discovery proves to be significant under the California Environment Quality Act, additional work such as data recovery excavation may be warranted and shall be reported to the City.

Cultural Resources Management Reports

Preliminary Analyses and Recommendations Regarding California's Cultural Resources Inventory System (with Special Reference to Condition 14 of NPS 1990 Program Review Report). California State Office of Historic Preservation working paper, Sacramento, September 1990.

Numerous cultural resources management reports with the Archaeological Research Unit, Greenwood and Associates, and CRM TECH, since October 1991.

PRINCIPAL INVESTIGATOR, ARCHAEOLOGY
Daniel Ballester, M.S., RPA (Registered Professional Archaeologist)

Education

2013	M.S., Geographic Information System (GIS), University of Redlands, California.
1998	B.A., Anthropology, California State University, San Bernardino.
1997	Archaeological Field School, University of Las Vegas and University of California, Riverside.
1994	University of Puerto Rico, Rio Piedras, Puerto Rico.
2021	An Introduction to Geoarchaeology: How Understanding Basic Soils, Sediments, and Landforms Can Make You a Better Archaeologist; Society for American Archaeology online seminar.
2007	Certificate in Geographic Information Systems (GIS), California State University, San Bernardino.
2002	Historic Archaeology Workshop; presented by Richard Norwood, Base Archaeologist, Edwards Air Force Base, at CRM TECH, Riverside, California.

Professional Experience

2025-	Principal Investigator, CRM TECH, Riverside/Colton, California.
2002-2025	Field Director/GIS Specialist, CRM TECH, Riverside/Colton, California.
2011-2012	GIS Specialist for Caltrans District 8 Project, Garcia and Associates, San Anselmo, California.
2009-2010	Field Crew Chief, Garcia and Associates, San Anselmo, California.
2009-2010	Field Crew, ECorp, Redlands.
1999-2002	Project Archaeologist, CRM TECH, Riverside, California.
1998-1999	Field Crew, K.E.A. Environmental, San Diego, California.
1998	Field Crew, A.S.M. Affiliates, Encinitas, California.
1998	Field Crew, Archaeological Research Unit, University of California, Riverside.

Cultural Resources Management Reports

Field Director, co-author, and contributor to numerous cultural management reports since 2002.

Memberships

Society for American Archaeology; Society for California Archaeology.

PROJECT ARCHAEOLOGIST/REPORT WRITER
Elizabeth L. Beckner, Ph.D.

Education

2024	Ph.D., Anthropology, University of California, Riverside.
2017	M.A., Anthropology, University of California, Riverside.
2016	B.A., Anthropology, University of California, Riverside.
2014	A.A., Anthropology, Chaffey College, Rancho Cucamonga, California.

Professional Experience

2025-	Project Archaeologist, CRM TECH, Colton, California.
2025	Lecturer, California State University, San Bernardino.
2019-	Adjunct Instructor, Chaffey College, Rancho Cucamonga, California.
2019	Archaeologist, Dudek, Pasadena, California
2017-2019	Teaching Assistant, University of California, Riverside.
2018	Archaeologist, Proyecto Sacbé Cobá-Yaxuna (Sacbé Cobá-Yaxuna Project), Cobá, Quintana Roo, Mexico.
2016-2017	Field Assistant, Proyecto de Interacción Política del Centro de Yucatán (Political Interaction Project of Central Yucatan), Yaxuna, Yucatan, Mexico.
2015-2017	Information Officer, Eastern Information Center, Riverside, California.

Publication

2023 T.W. Stanton, Traci Ardren, Nicolas C. Barth, Juan C. Fernandez Diaz, Steph J. Miller, Karl A. Taube, Patrick Rohrer, Elizabeth Beckner, and Aline Magnoni: Roads, Temples, and the Community Boundaries of Cobá, Quintana Roo. In T.H. Guderjan and J.P. Mathews (eds.): *Construction of Maya Space: Causeways, Walls, and Open Areas from Ancient to Modern Times*; pp. 71-98. University of Arizona Press, Tucson.

PROJECT ARCHAEOLOGIST
Melissa A. Portilla, B.A.

Education

2023	A.A. (*cum laude*), Anthropology, Fullerton College.
2019	B.A., Ancient History: Classics, University of Hawaii, Manoa.

Professional Experience

2023-	Project Archaeologist, CRM TECH, Colton, California.
2023-2024	Project Archaeologist, Psomas, Pasadena, California.
2020	Collections Assistant, Museum of Us, San Diego, California.

PROJECT ARCHAEOLOGIST
Deirdre Encarnación, M.A.

Education

2003	M.A., Anthropology, San Diego State University, California.
2000	B.A., Anthropology, minor in Biology, with honors; San Diego State University, California.
2021	Certificate of Specialization, Kumeyaay Studies, Cuyamaca College/KCC.
2001	Archaeological Field School, San Diego State University.
2000	Archaeological Field School, San Diego State University.

Professional Experience

2004-	Project Archaeologist/Report Writer, CRM TECH, Riverside/Colton, California.
2023-	Director of Education, Salaam USA, San Diego, California.
2016-	Archaeological/cultural consultant, Friends of Maha'ulepu, Koloa, Hawaii.
2001-2003	Part-time Lecturer, San Diego State University, California.
2001	Research Assistant for Dr. Lynn Gamble, San Diego State University.
2001	Archaeological Collection Catalog, SDSU Foundation.

PROJECT ARCHAEOLOGIST/NATIVE AMERICAN LIAISON
Eulices Lopez, B.S.

Education

2015	B.S., Anthropology, University of California, Riverside.
2013	A.A., Anthropology, East Los Angeles College, Monterey Park, California.

Professional Experience

2024-	Project Archaeologist/Native American Liaison, CRM TECH, Colton, California.
2017-2024	Deputy Coordinator, Eastern Information Center, University of California, Riverside.
2017-2024	Director Assistant, Archaeological Research Unit, University of California, Riverside.
2017-2024	Curator Facilitator, Archaeological Curation Unit, University of California, Riverside.
2014-2015	Information Officer, Eastern Information Center, University of California, Riverside.
2013	Lithic Analyst Assistant, Anthropology Department, East Los Angeles College, Monterey Park, California.
2012	Hominid Cast Fossils Cataloger, Anthropology Department, East Los Angeles College, Monterey Park, California.

Re: Proposed Eastvale 3 Project at 7500 Hellman Avenue Project, Riverside County

To Whom It May Concern:

As requested, a search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed based on information submitted for the above referenced project. The results were negative. Be aware that tribes do not always record their sacred sites in the SLF, nor are they required to do so. As such, an SLF search is not a substitute for consultation with all tribes that are traditionally and culturally affiliated with a project's geographic area.

Attached is a list of Native American tribes that are traditionally and culturally affiliated with the project's geographic area. Please contact all of the listed tribes as they may have information about sacred sites within the project area that is not listed with the NAHC.

If within two weeks of notification, a response has not been received, the Commission requests that you follow up with a telephone call or email to ensure that the project information was received.

If you receive notification of a change of address or phone number from a tribe, please inform the NAHC so that we can assure that our lists contain current information.

In addition to engaging in tribal consultation, you should consult the appropriate regional California Historical Research Information System (CHRIS) information center to determine whether it has information regarding the presence of recorded archaeological sites within the project area.

If you have any questions or need additional information, please contact me at Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

Andrew Green
Cultural Resources Analyst

Attention: Mr. Bret Ilich

Subject: **GEOTECHNICAL INVESTIGATION**
7500 Hellman Avenue,
City of Eastvale, County of Riverside, California

References: See Appendix A

Dear Mr. Ilich:

Alta California Geotechnical, Inc. (Alta) is pleased to present this Geotechnical Investigation for the vacant lot located at 7500 Hellman Avenue in the City of Eastvale, County of Riverside, California. This report is based on Alta's recent subsurface investigation, laboratory testing, engineering analyses, a review of the referenced reports, and Alta's staff's experience with similar projects in this vicinity.

Alta's review of the geotechnical data indicates that the proposed development is feasible, from a geotechnical perspective, provided that the recommendations presented in this report are incorporated into the grading and improvement plans and implemented during site development.

Included in this report are:

- Discussion of the site geotechnical conditions.
- Recommendations for remedial and site grading, including unsuitable soil removals.
- Geotechnical site construction recommendations.
- Foundation design parameters.

If you have any questions or should you require any additional information, please contact the undersigned at (951) 509-7090. Alta appreciates the opportunity to provide geotechnical consulting services for your project.

Sincerely,
Alta California Geotechnical, Inc.

1.0 INTRODUCTION

This report presents Alta's findings, conclusions, and geotechnical recommendations for the proposed development located at 7500 Hellman Avenue in the City of Eastvale, County of Riverside, California.

1.1 Purpose

The purpose of this report is to examine the existing onsite geotechnical conditions and assess the impacts that the geotechnical conditions may have on the proposed development. This report is suitable for use in developing grading plans and engineer's cost estimates.

1.2 Scope of Work

Alta's Scope of Work for this geotechnical investigation included the following:

- Reviewing the referenced reports and air photos (Appendix A).
- Site geologic mapping.
- Excavating, logging, and sampling five (5) hollow-stem auger borings to a maximum depth of 51.5-feet below the existing ground surface (Appendix B).
- Conducting laboratory testing on samples obtained during our investigation (Appendix C).
- Conducting two (2) infiltration tests in two (2) additional borings at depths of 10.0-feet below the ground surface.
- Evaluating engineering geologic and geotechnical engineering data, including laboratory data, to develop recommendations for site remedial grading including specialized grading techniques for unsuitable soil removals along the property boundary, import soil, foundations and utilities.
- Preparing this report and accompanying exhibits.

1.3 Report Limitations

The conclusions and recommendations presented in this report are based on the field and laboratory information generated during this investigation, and a review of the referenced reports. The information contained in this report is intended to be used for development of grading plans and preliminary construction cost estimates.

2.0 PROJECT DESCRIPTION

2.1 Site Location and Existing Conditions

The irregular-shaped, approximately ±3.1-acre site is bounded to the north and east by existing residential developments, to the west by Hellman Avenue, and to the south by Walters Street. The site is currently vacant.

Historic aerial images are available as far back as 1938 and indicate the site was occupied by heavy vegetation throughout. By 1959, the vegetation was removed. By 1994, multiple structures were constructed and trees planted in the northeastern portion of the site. By 2022, all structures were removed. The site has remained relatively unchanged since (Historic Aerials, 2025).

2.2 Proposed Development

It is our understanding that the site will be developed to support a residential project. We anticipate that conventional cut-and fill-grading techniques will be used to develop the site for the support of wood-frame and stucco construction with shallow foundations and reinforced concrete slabs-on-grade, and associated improvements.

3.0 SITE INVESTIGATION

3.1 Subsurface Investigation and Laboratory Testing

Alta conducted a subsurface investigation on April 17th, 2025, consisting of the excavation, logging, and select sampling of six (5) hollow-stem auger borings to a maximum depth of 51.5-feet below the existing ground surface. The locations of

the borings are shown on Plate 1 and the boring logs are presented in Appendix B.

Laboratory testing was performed on bulk and ring samples obtained during the field investigation. A brief description of the laboratory test procedures and the test results are presented in Appendix C.

3.2 Infiltration Testing

It is Alta's understanding that the site may utilize infiltration systems for storm water disposal. Details of the systems are not known at this time.

Infiltration testing was undertaken using ten (10) foot-deep borings (P-1 and P-2) as shown on Plate 1. The testing was performed on April 18th, 2025 in general conformance with the County of Riverside Technical Guidance Document Standards. The test wells were presoaked for 24 hours, and then water level readings were recorded every 10 minutes until the readings stabilized.

The data was then adjusted to provide an infiltration rate utilizing the Porchet Method. The resulting infiltration rate is presented in Table 3-1. The results do not include a Factor of Safety. Recommendations for infiltration BMP design are presented in Section 6.3.

Table 3-1
Summary of Infiltration Testing
(No Factor of Safety)

Test Designation	P-1	P-2
Approximate Depth of Test	10 ft	5 ft
Time Interval	10 minutes	10 minutes
Radius of Test Hole	4 inches	4 inches
Tested Infiltration Rate	1.7 (in/hr)	0.2 (in/hr)

4.0 GEOLOGIC CONDITIONS

4.1 Geologic and Geomorphic Setting

Regionally, the subject site is located in the Peninsular Ranges geomorphic province, which characterizes the southwest portion of southern California where major right lateral major active fault zones predominately trend northwest-southeast. The Peninsular Ranges province is composed of plutonic and metamorphic rock, with lesser amounts of Tertiary volcanic and sedimentary rock, Quaternary drainage in-fills and sedimentary veneers.

4.2 Stratigraphy

Based on a review of Morton, 2003, and our subsurface investigation, the site is underlain by young alluvial fan deposits. This geologic unit is briefly described below.

4.2.1 Young Alluvial Fan Deposits (Map symbol Qyf)

The young alluvial fan deposits consisting of grayish brown to brown silty and sandy clay in a dry to moist, stiff to very stiff condition. Also, light grayish brown to yellowish brown clayey sand and sand in a moist to wet, medium dense to very dense condition was encountered. The unit was logged to a depth of 51.5 feet below the ground surface.

4.3 Geologic Structure

4.3.1 Tectonic Framework

Jennings (1985) defined eight structural provinces within California that have been classified by predominant regional fault trends and similar fold structure. These provinces are in turn divided into blocks and sub-blocks that are defined by "major Quaternary faults." These blocks and sub-blocks exhibit similar structural features. Within this framework, the subject site is located within Structural Province I, which is controlled by the dominant northwest trend of the San Andreas Fault and is divided

into two blocks, the Coast Range Block and the Peninsular Range Block. The Peninsular Range Block, on which this site is located, is characterized by a series of parallel, northwest trending faults that exhibit right lateral strike-slip movement. These faults are terminated by the Transverse Range block to the north and extend southward into the Baja Peninsula. These northwest trending faults divide the Peninsular Range block into eight sub-blocks. The site is located in the northern portion of the Santa Ana Sub-block, one of the eight sub-blocks, which is bound on the east by the Elsinore fault zone and on the west by the Newport-Inglewood fault zone.

4.3.2 Regionally Mapped Active Faults

Several large, active fault systems including the Whittier- Elsinore, the Cucamonga, and the San Jacinto occur in the region surrounding the site. These fault systems have been studied extensively and in a large part control the geologic structure of southern California.

4.3.3 Geologic Structure

Based upon our site investigation and literature review, the onsite alluvial sediments are of Holocene age, and are not folded or faulted.

4.4 Groundwater

Our subsurface investigation encountered groundwater at a depth of 40.1 feet below the ground surface on B-1. Groundwater data available from the nearest well (State Well # 339534N1176112W001) located across Hellman Avenue, west of the property indicates that the groundwater depth has been approximately 38-feet below the ground surface, from 2024 (WDL, 2025).

4.5 Earthquake Hazards

The subject site is located in southern California, which is a tectonically active area. The type and magnitude of seismic hazards affecting a site are dependent on the distance to the causative fault and the intensity and magnitude of the seismic event. The seismic hazard may be primary, such as surface rupture and/or ground shaking, or secondary, such as liquefaction and/or ground lurching.

4.5.1 Local and Regional Faulting

The site is located on the northeastern portion of the Riverside sub-block. The closest known active faults and their distances to the site are presented on Table 4-1 below.

TABLE 4-1
Local and Regional Faulting

Fault Zone	Distance to Fault Zone
Chino	3.7 miles
Elsinore	7.2 miles
San Jose	11.5 miles
Cucamonga	13.6 miles
Sierra Madre	13.9 miles
San Jacinto	19.2 miles

4.5.2 Seismicity

Ground shaking hazards caused by earthquakes along other active regional faults exist. The 2022 California Building Code requires use-modified spectral accelerations and velocities for most structural designs. Seismic design parameters using soil profile types identified in the 2022 California Building Code are presented in Section 7.3.

4.5.3 Surface Rupture

Active faults are not known to exist within the project and a review of Special Publication 42 indicates the site is not within a California State designated earthquake fault zone. Accordingly, the potential for fault surface rupture on the subject site is very low.

4.5.4 Liquefaction

Seismic agitation of relatively loose saturated sands, silty sands, and some silts can result in a buildup of pore pressure. If the pore pressure exceeds the overburden stresses, a temporary quick condition known as liquefaction can occur. Liquefaction effects can manifest in several ways including: 1) loss of bearing; 2) lateral spread; 3) dynamic settlement; and 4) flow failure. Lateral spreading has typically been the most damaging mode of failure.

In general, the more recent that a sediment has been deposited, the more likely it will be susceptible to liquefaction. Other factors that must be considered are: groundwater, confining stresses, relative density, and the intensity and duration of seismically-induced ground shaking.

Alta performed a liquefaction analysis utilizing blow count data from our subsurface investigation to determine the liquefaction potential of the younger alluvium. A description of Alta's analysis and calculations are presented in Appendix D of this report. A groundwater level of 35 feet below existing ground surface was assumed. The results of our findings are discussed below under the headings of the specific types of liquefaction which can be manifested during seismic shaking. Conclusions regarding liquefaction are presented in Section 6.4.

- **Loss of Bearing:**

  Liquefaction can potentially cause bearing failure due to ground softening and near-failure in bearing. Upon the completion of removal and recompaction of the upper soils as recommended in Section 6.1.2, the potential for loss of bearing shall be minimal and within foundation tolerances.

- **Lateral Spreading:**

  The lateral displacement of surficial blocks of sediment can occur as a result of liquefaction in a subsurface layer. The most pervasive forms of lateral spreading typically involve sites located near a "free-face" (large slopes, channels, etc.), however, it has been noted that lateral spreading can occur on sites with gently sloping (1% or more) ground, such as the subject site.

  Determination of the potential for lateral spread is based on the presence of continuous potentially liquefiable soil layers underneath the structures, the presence of lateral confinement, and various analyses such as empirical modeling. Bartlett, Hansen and Youd (2002) states that surface manifestation of lateral spread is typically limited to sites with liquefiable soils within 10 meters (32 feet) of grade, and that sites underlain by soils with (N1)60 values 15 and greater do not experience significant displacements from earthquakes with magnitudes less than 8.

  Given the depth to groundwater/liquefiable soils, it is our opinion that the potential for lateral spread to occur onsite is considered nil.

- **Settlement:**

  Settlement due to seismic shaking can occur as a result of both liquefaction of saturated sediments or rearrangement of dry sand particles. Our liquefaction analysis was performed utilizing CPT data and laboratory test results to analyze the potential amount of settlement. A description of Alta's analysis and calculations are presented in Appendix D of this report. Dynamic settlement design recommendations are presented in Section 7.1.

- **Flow Failure:**

  Due to the relatively flat nature of the site, and the relatively horizontal deposition of the underlying deposits, the potential for flow failure onsite is considered minimal

4.5.5 Dry Sand Settlement

Dry sand settlement is the process of non-uniform settlement of the ground surface during a seismic event. A dry sand settlement analysis was performed utilizing blow count data obtained during our subsurface investigation. The results are presented in Appendix D. Based on our analysis and our removal/recompaction recommendations, the potential for dry sand settlement is anticipated to be low and within foundation design tolerances.

5.0 ENGINEERING PROPERTIES AND ANALYSIS

5.1 Materials Properties

Presented herein is a general discussion of the engineering properties of the onsite materials that will be encountered during construction of the proposed project. Descriptions of the soil (Unified Soil Classification System) are presented on the boring logs in Appendix B.

5.1.1 Excavation Characteristics

Based on the data provided from the subsurface investigation, it is our opinion that the onsite materials possess favorable excavation characteristics such that conventional earth moving equipment can be utilized.

5.1.2 Compressibility

The upper portions of young alluvial fan deposits onsite are considered compressible and unsuitable to support the proposed improvements. Recommended removal depths are presented in Section 6.1.2.

5.1.3 Moisture

The moisture content of the young alluvial fan deposits that will require removal and recompaction as discussed in Section 6.1.2 are typically under-optimum and will require moisture conditioning for compaction.

5.1.4 Hydro-Consolidation

Hydro-consolidation is the effect of introducing water into soil that is prone to collapse. Upon loading and initial wetting, the soil structure and apparent strength are altered resulting in almost immediate settlement. That settlement can have adverse impacts on engineered structures, particularly in areas where it is manifested differentially. Differential settlements are typically associated with differential wetting, irregularities in the subsurface soil conditions, or irregular loading patterns.

Based on our laboratory testing (Appendix C), the potential for hydro-collapse in the underlying young alluvial fan deposits is minimal and shall be within foundation tolerances upon the completion of the recommended unsuitable soil removals.

5.1.5 Expansion Potential

Expansion index testing was performed on samples taken during our subsurface investigation. Based on the results, it is anticipated that the majority of materials onsite are “very low” to “low” in expansion potential (0≤EI≤50, Appendix C) when tested per ASTM D: 4829.

5.1.6 Earthwork Adjustments

The values presented in Table 5-1 are deemed appropriate for estimating purposes and may be used in an effort to balance earthwork quantities. As is the case with every project, contingencies should be made to adjust the earthwork balance when grading is in-progress and actual conditions are better defined.

TABLE 5-1 Earthwork Adjustment Factors		
Geologic Unit	**Adjustment Factor Range**	**Average**
Young Alluvial Fan Deposits	Shrink 22% to 26%	24%

5.1.7 Chemical Analyses

Chemical testing was performed on samples of material underlying the proposed site. Soluble sulfate test results indicate that the soluble sulfate concentrations of the soils tested are classified as negligible (Category S0) per ACI 318-14.

Elevated chloride levels on the order of 775 ppm were detected in the upper soils in the vicinity of B-1. Based on the elevated chloride levels as presented in Appendix C, the onsite soils are classified as "corrosive" to buried metals and concrete (Caltrans, 2022). Additional discussions on corrosion are presented in Section 7.9. Corrosion tests results are presented in Appendix C.

5.2 Engineering Analysis

Presented below is a general discussion of the engineering analysis methods that were utilized to develop the conclusions and recommendations presented in this report.

5.2.1 Bearing Capacity and Lateral Earth Pressures

Ultimate bearing capacity values were obtained using the graphs and formula presented in NAVFAC DM-7.1. Allowable bearing was determined by applying a factor of safety of at least 3 to the ultimate bearing capacity. Static lateral earth pressures were calculated using Rankine methods for active and passive cases. If it is desired to use Coulomb forces, a separate analysis specific to the application can be conducted.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Based on Alta's findings during our subsurface investigation, the laboratory test results, and our staff's previous experience in the area, it is Alta's opinion that the development of the site is feasible from a geotechnical perspective. Presented below are Alta's recommendations that should be incorporated into site development and construction plans.

6.1 General Earthwork Recommendations

All grading shall be accomplished under the observation and testing of the project geotechnical consultant in accordance with the recommendations contained herein and the City of Eastvale criteria.

6.1.1 Site Preparation

Vegetation, construction debris, and other deleterious materials are unsuitable as structural fill material and should be disposed of offsite prior to commencing grading/construction. Any septic tanks, seepage pits or wells should be abandoned as per the County of San Bernardino Department of Health Services.

6.1.2 Unsuitable Soil Removals

The upper portions of the young alluvial fan deposits near the surface are compressible and as such, are not suitable to support the proposed structures. As such, it is anticipated that, on average, the upper three (3) to five (5) feet of existing soils will require removal and recompaction, extending at a minimum 5 feet horizontally outside the structures. This recommended removal combined with the foundation recommendations presented in Section 7.1 should provide suitable support for the proposed structures.

The Project Geotechnical Consultant should observe the removal bottom prior to placing fill. If unsuitable soils such as undocumented artificial fill

are exposed upon the completion of the removals recommended above, additional removals may be required.

For streets, in general, a minimum removal and recompaction of the upper two (2) feet of soil is recommended, although deeper removals may be required if undocumented fill is exposed at that depth.

Material removed as part of the unsuitable soil removals can be used as engineered fill, provided it is free of deleterious materials.

6.1.3 Over-excavation of Building Pads

Footings for structures should be underlain by a minimum of two (2) feet of compacted fill. As such, for building pads where unsuitable soil removals do not provide the minimum depth of compacted fill, or where design grades and/or remedial grading activities create cut/fill transitions, the cut and shallow fill portions of the building pads should be over-excavated to provide the required depth of fill below the footings.

6.2 General Earthwork Recommendations

6.2.1 Compaction Standards

All fill and processed natural ground shall be compacted to a minimum relative compaction of 90 percent, as determined by ASTM Test Method: D-1557. Fill material should be moisture conditioned to optimum moisture or above, and as generally discussed in Alta's Earthwork Specification Section presented in Appendix E. Compaction shall be achieved with the use of sheepsfoot rollers or similar kneading type equipment.

6.2.2 Groundwater/Seepage

It is anticipated that groundwater will not be encountered during construction. It is possible that perched water conditions could be encountered depending on the time of year construction occurs.

6.2.3 Documentation of Removals

All removal/over-excavation bottoms should be observed and approved by the project Geotechnical Consultant prior to fill placement. Consideration should be given to surveying the removal bottoms and undercuts after approval by the geotechnical consultant and prior to the placement of fill. Staking should be provided in order to verify undercut locations and depths.

6.2.4 Treatment of Removal Bottoms

At the completion of removals/over-excavation, the exposed removal bottom should be ripped to a minimum depth of eight (8) inches, moisture-conditioned to above optimum moisture content and compacted in-place to the project standards.

6.2.5 Fill Placement

After removals, scarification, and compaction of in-place materials are completed, additional fill may be placed. Fill should be placed in eight-inch bulk maximum lifts, moisture conditioned to optimum moisture content or above, compacted and tested as grading/construction progresses until final grades are attained.

6.2.6 Moisture Content

The moisture content of the upper in-situ soils is primarily below optimum, as shown on the boring logs in Appendix B. These soils will require moisture conditioning prior to placement as engineered fill.

6.2.7 Mixing

Mixing of materials may be necessary to prevent layering of different soil types and/or different moisture contents. Mixing should be accomplished prior to and as part of the compaction of each fill lift.

6.2.8 Import Soils

Import soils, if necessary, should consist of clean, low expansive, structural quality, compactable materials similar to the on-site soils and should be free of trash, debris or other objectionable materials. The project Geotechnical Consultant should be notified not less than 72 hours in advance of the locations of any soils proposed for import. Import sources should be sampled, tested, and approved by the project Geotechnical Consultant at the source prior to the importation of the soils to the site. The project Civil Engineer should include these requirements on plans and specifications for the project.

6.2.9 Utility Trenches

6.2.9.1 Excavation

Utility trenches should be supported, either by laying back excavations or shoring, in accordance with applicable OSHA standards. In general, existing site soils are classified as Soil Types "B" and “C” per OSHA standards. Upon completion of the recommended removals and re-compaction, the artificial fill will be classified as Soil Type "B". The Project Geotechnical Consulting should be consulted if geologic conditions vary from what is presented in this report.

6.2.9.2 Backfill

Trench backfill should be compacted to at least 90 percent of maximum dry density as determined by ASTM D-1557. Onsite soils will not be suitable for use as bedding material but will be suitable for use in backfill provided oversized materials are removed. No surcharge loads should be imposed above excavations. This includes spoil piles, lumber, concrete trucks, or other construction materials and equipment. Drainage above excavations should be directed away from the banks. Care should be taken to avoid saturation of the soils. Compaction should be accomplished by mechanical means. Jetting of native soils will not be acceptable.

Under-slab trenches should also be compacted to project specifications. If select granular backfill (SE > 30) is used, compaction by flooding will be acceptable.

6.2.10 Backcut Stability

Temporary backcuts, if required during unsuitable soil removals, should be made no steeper than 1:1 without review and approval of the geotechnical consultant. Flatter backcuts may be necessary where geologic conditions dictate and where minimum width dimensions are to be maintained.

Care should be taken during remedial grading operations in order to minimize risk of failure. Should failure occur, complete removal of the disturbed material will be required.

In consideration of the inherent instability created by temporary construction backcuts for removals, it is imperative that grading schedules are coordinated to minimize the unsupported exposure time of these excavations. Once started, these excavations and subsequent fill operations should be maintained to completion without intervening delays imposed by avoidable circumstances. In cases where five-day workweeks comprise a normal schedule, grading should be planned to avoid exposing at-grade or near-grade excavations through a non-work weekend. Where improvements may be affected by temporary instability, either on or offsite, further restrictions such as slot cutting, extending workdays, implementing weekend schedules, and/or other requirements considered critical to serving specific circumstances may be imposed.

6.3 Storm Water Infiltration Systems

From a geotechnical perspective, allowing storm water to infiltrate the onsite soil in concentrated areas increases the potential for settlement, liquefaction, and water-related damage to structures/improvements, such as wet slabs or pumping subgrade, and should be avoided where possible. If infiltration systems are required on this site, care should be taken in designing systems that control the storm water as much as possible.

Preliminary infiltration testing was conducted at the site as part of this investigation, and the methodology is discussed in 3.2. The resulting infiltration rates for P-1 and P-2 was calculated to be 1.7 and 0.2-inches per hour, respectively. The results do not include a factor of safety.

The Project Geotechnical Consultant should review the final WQMP design prior to construction.

6.4 Boundary Conditions

Construction of retaining/screen walls along site boundaries will require additional geotechnical recommendations concerning unsuitable soil removals and foundation design parameters. Boundary conditions for the project should be reviewed by the Project Geotechnical Consultant as the design progresses.

7.0 DESIGN CONSIDERATIONS

7.1 Structural Design

It is anticipated that multi-story, wood-frame residential structures with slab on-grade and shallow foundations will be constructed. Upon the completion of rough grading, finish grade samples should be collected and tested in order to provide specific recommendations as they relate to the individual building pads. These test results and corresponding design recommendations should be presented in a final rough grading report. Final slab and foundation design recommendations should be made based upon specific structure sitings, loading conditions, and as-graded soil conditions.

It is anticipated that the majority of onsite soils will possess “very low” to “low” expansion potential when tested in general accordance with ASTM Test Method D: 4829. For budgeting purposes, the following foundation design requirements for a range of potential expansion characteristics are presented.

Due to the corrosive levels of chloride detected in the upper soils (Appendix C), it is recommended to utilize post-tensioned foundation systems with encapsulated anchors. Additional discussion is presented in Section 7.9,

7.1.1 Foundations

Foundations may be preliminary designed based on the values presented in Table 7-1 below.

Table 7-1 Foundation Design Parameters*	
Allowable Bearing	2000 lbs/ft^2 assuming a minimum footing width and embedment of 12 inches.
Lateral Bearing	250 lbs/ft^2 at a depth of 12 inches plus 250 lbs/ft^2 for each additional 12 inches of embedment to a maximum of 2000 lbs/ft^2
Sliding Coefficient	0.35
Differential Settlement	Dynamic: 0.5-inches in 40 feet Static: 1.0-inch in 40 feet

*These values may be increased as allowed by Code to resist transient loads such as wind or seismic. Building code and structural design considerations may govern depth and reinforcement requirements and should be evaluated.

7.1.2 Post-Tensioned Slabs/Foundation Design Recommendations

Post-tensioned slabs for the project may be preliminarily designed utilizing the parameters presented in Tables 7-1 and 7-2. The parameters presented herein are based on methodology provided in the Design of Post-Tensioned Slabs-On-Ground, Third Edition, by the Post-Tensioning Institute, in accordance with the 2022 CBC.

TABLE 7-2

POST-TENSION SLAB DESIGN PARAMETERS

Category	Expansion Potential	Minimum Embedment	Edge Lift		Center Lift	
			Em (ft)	Ym (inch)	Em (ft)	Ym (inch)
I	Very Low to Low	12 inches*	5.4	0.61	9.0	0.26
Slab Subgrade Moisture						
Category I	Minimum 110% of optimum moisture to a depth of 12 inches prior to pouring concrete					
Embedment*						
The minimum outer footing embedment presented herein are based on expansion indexes. The structural engineer should verify the minimum embedment based on the number of floors supported by the footings, the structural loading, and the requirements of the latest California Building Code. If mat slabs are utilized, alternate embedment depths can be provided.						
Moisture Barrier						
A moisture barrier should be provided in accordance with the recommendations presented in Section 7.2						
The parameters presented herein are based on procedures presented in the Design of Post-Tensioned Slabs-On-Ground, Third Edition. No corrections for vertical barriers at the edge of the slab, or for adjacent vegetation have been assumed. The design parameters are based on a Constant Suction Value of 3.9 pF.						

7.2 Moisture Barrier

A moisture and vapor retarding system should be placed below the slabs-on-grade in portions of the structure considered to be moisture sensitive and should be capable of effectively preventing the migration of water and reducing the transmission of water vapor to acceptable levels. Historically, a 10-mil plastic membrane, such as Visqueen, placed between one to four inches of clean sand, has been used for this purpose. The use of this system or other systems can be considered, at the discretion of the designer, provided the system reduces the vapor transmission rates to acceptable levels.

7.3 Seismic Design

The site classes were determined based on the referenced reports and published geologic maps in the area in general conformance with Chapter 20 of ASCE 7-16. Based on the density of the underlying soils, a Site Class of D (shear wave velocity of 259 m/s) was selected. The seismic design parameters were calculated using a program based on the USGS website and ASCE 7-16 procedures. The resulting values are presented in Table 7-3. These values are applicable providing the exceptions presented in Supplements 2 and 3 of ASCE 7-16 are utilized in the design of the structure. If the design does not include the exception methodology, then a site-specific analysis shall be conducted.

TABLE 7-4 Seismic Ground Motion Values
2022 CBC and ASCE 7-16

Parameter	*Value*
Site Class	D
Site Latitude	33.9531
Site Longitude	-117.6099
Spectral Response Acceleration Parameter, S_S	1.714
Spectral Response Acceleration Parameter, S_1	0.600
Site Coefficient, F_a	1.0
Site Coefficient, F_v	1.7
MCE Spectral Response Acceleration Parameter, S_{MS}	1.714
MCE Spectral Response Acceleration Parameter, S_{M1}	1.020
Design Spectral Response Acceleration Parameter, S_{DS}	1.143
Design Spectral Response Acceleration Parameter, S_{D1}	0.680
Peak Ground Acceleration, PGA_M	0.768

7.4 Block Walls

Block walls, if used, should be embedded a minimum of 2 feet below the lowest adjacent grade. Construction joints (not more than 20 feet apart) should be included in the block wall construction. Side yard walls should be structurally separated from the rear yard wall.

7.5 Footing Excavations

Soils from the footing excavations should not be placed in slab-on-grade areas unless properly compacted and tested. The excavations should be cleaned of all loose/sloughed materials and be neatly trimmed at the time of concrete placement. The Project Geotechnical Consultant should observe the footing excavations prior to the placement of concrete to determine that the excavations are founded in suitably compacted material.

7.6 Retaining Walls

Retaining walls should be founded on engineered fill and should be backfilled with granular soils that allow for drainage behind the wall. Foundations may be designed in accordance with the recommendations presented in Table 7-1, above. Unrestrained walls, free to horizontally move 0.0005H (for dense cohesionless backfill), may be designed to resist lateral pressures imposed by a fluid with a unit weight determined in accordance with the Table 7-5 below. The table also presents design parameters for restrained (at-rest) retaining walls. These parameters may be used to design retaining walls that may be considered as restrained due to the method of construction or location (corner sections of unrestrained retaining walls).

TABLE 7-5
Equivalent Fluid Pressures for 90% Compacted Fill (Select Material)

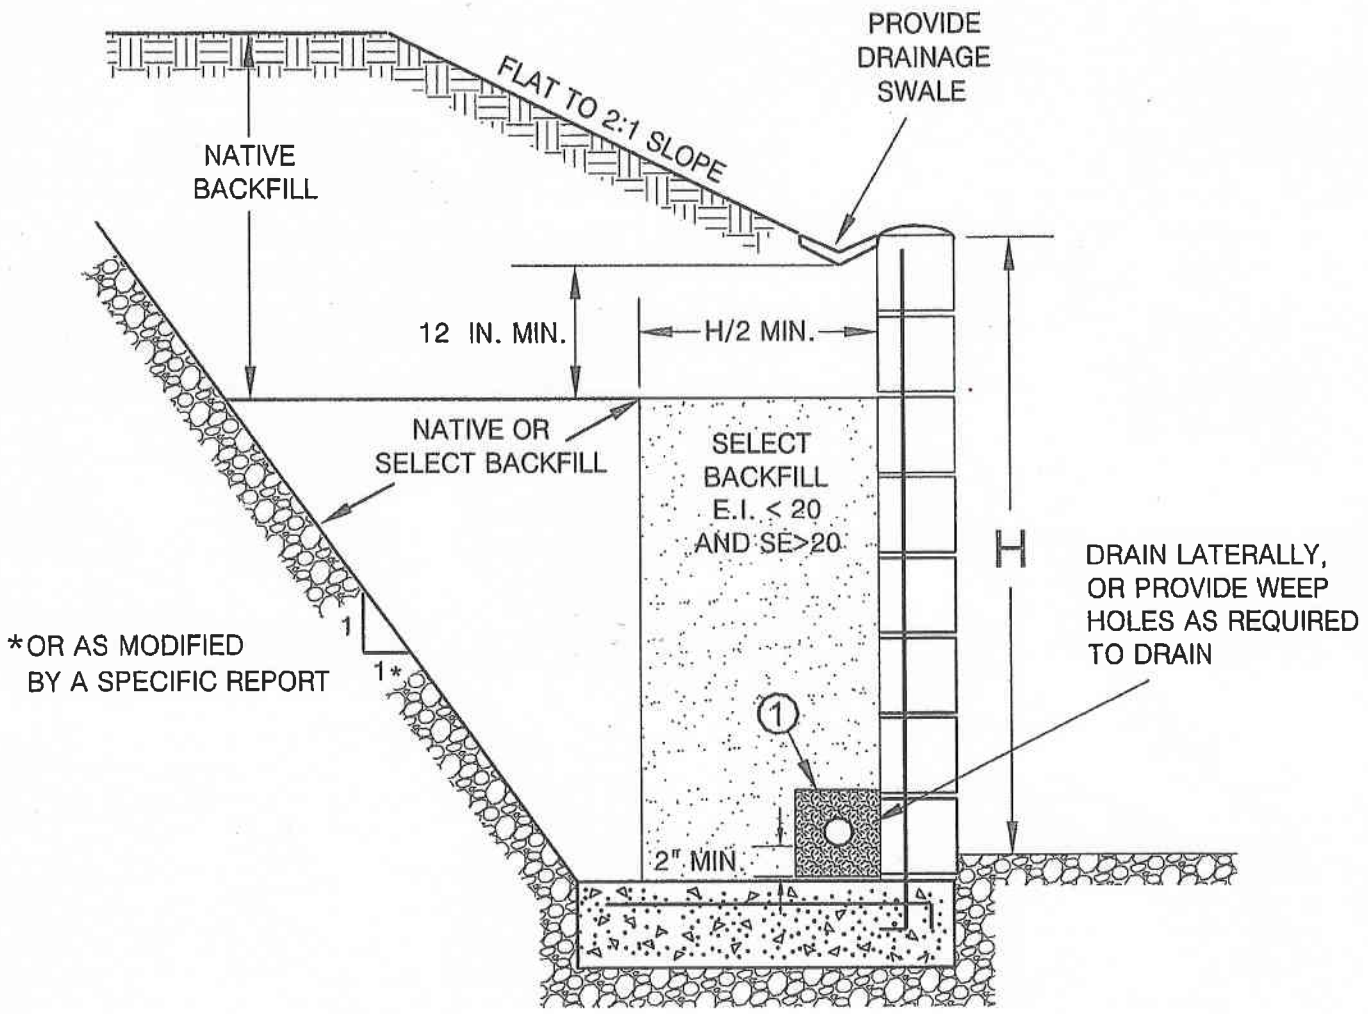
Backfill	Active Pressure (psf/ft)	At-Rest Pressure (psf/ft)
Level	35	55

Per the requirements of the 2022 CBC, the seismic force acting on the retaining walls with backfill exceeding 6-feet in height may be resolved utilizing the formula $15.5H^2$ lb/lineal ft (H=height of the wall). This force acts at approximately 0.6H above the base of the wall (inverted triangle). The seismic value can be converted as required by the retaining wall engineer. Retaining walls should be designed in general accordance with Section 1807A.2 of the 2022 CBC.

- Restrained retaining walls should be designed for "at-rest" conditions.
- The design loads presented in the above table are to be applied on the retaining wall in a horizontal fashion and as such friction between wall and retained soils should not be allowed in the retaining wall analyses.
- Additional allowances should be made in the retaining wall design to account for the influence of construction loads, temporary loads, and possible nearby structural footing loads.
- Select backfill should be granular, structural quality backfill with a Sand Equivalent of 20 or better and an ASCE Expansion Index of 20 or less. The backfill must encompass the full active wedge area. The upper one foot of backfill should be comprised of native on-site soils (see Plate A).
- The wall design should include waterproofing (where appropriate) and backdrains or weep holes for relieving possible hydrostatic pressures. The backdrain should be comprised of a 4-inch perforated PVC pipe in a 1 ft. by 1 ft., ¾-inch gravel matrix, wrapped with a geofabric. The backdrain should be installed with a minimum gradient of 2 percent and should be outletted to an appropriate location. For subterranean walls this may include drainage by sump pumps.
- No backfill should be placed against concrete until minimum design strengths are achieved.

It should be noted that the allowable bearing and lateral bearing values presented in Table 7-1 are based on level conditions at the toe. Modified design parameters can be presented for retaining walls with sloping condition at the toe. Other conditions should be evaluated on a case-by-case basis.

RETAINING WALL BACKFILL DETAIL



(1)

PIPE: 4-INCH PERFORATED PVC, SCHEDULE 40, SDR35 OR APPROVED ALTERNATE MINIMUM 8 PERFORATIONS (1/4-IN. DIA.) PER LINEAL FT. IN BOTTOM HALF OF PIPE

ROCK: MINIMUM VOLUME OF 1 CU. FT. OF 3/4-IN. MAX. ROCK PER. LINEAL FOOT OF PIPE, OR APPROVED ALTERNATE

FILTER FABRIC: MIRAFI 140 FILTER FABRIC OR APPROVED EQUIVALENT

7.7 Exterior Slabs and Walkways

Exterior concrete slabs and walkways should be designed and constructed in consideration of the following recommendations.

7.7.1 Subgrade Compaction

The subgrade below exterior concrete slabs should be compacted to a minimum of 90 percent relative compaction as determined by ASTM Test Method: D 1557.

7.7.2 Subgrade Moisture

The subgrade below concrete slabs should be moisture conditioned to a minimum of 110 percent of optimum moisture (low expansion) prior to concrete placement.

7.7.3 Concrete Slab Thickness

Concrete flatwork and driveways should be designed utilizing four-inch minimum thickness.

7.7.4 Concrete Slab Reinforcement

Utilization of reinforcement for flatwork and driveways is subject to a cost/benefit analysis. Reinforcement will decrease the amount of cracking that may occur in flatwork, however, planning for occasional repairs may be more cost effective. Utilizing closely spaced control joints is likely more cost-effective than utilizing reinforcement. The majority of the soils onsite are classified as very low in expansion potential. Consideration should be given to reinforcing flatwork with irregular (non-square/rectangular) shapes.

7.7.5 Control Joints

Weakened plane joints should be installed on walkways at intervals of approximately eight feet (maximum) or less. Exterior slabs should be designed to withstand shrinkage of the concrete.

7.8 Concrete Design

As stated in Section 5.1.7, negligible concentrations of sulfates were detected in the onsite soils. Therefore, the use of sulfate resistant concrete is not required per ACI 318-14 at this time. Post-grading conditions should be evaluated, and final recommendations made at that time.

7.9 Corrosion

Based on preliminary testing, the onsite soils are corrosive to buried metal objects. Consideration should be given to protecting buried metals from corrosion. Typical measures may include using non-corrosive backfill, protective coatings, wrapping, plastic pipes, or a combination of these methods. A corrosion engineer should be consulted if specific design recommendations are required by the improvement designer.

Per ACI 318-14, an exposure class of C1 would be applicable to metals encased in concrete (rebar in footings) due to being exposed to moisture from surrounding soils. Per Table 19.3.2.1 of ACI 318-14, the requirements for concrete with an exposure class of C1 are a minimum compressive strength of 2500 psi and a maximum water-soluble chloride ion content in concrete of 0.30 (percent by weight of cement).

7.10 Site Drainage

Positive drainage away from the proposed structures should be provided and maintained. Roof, pad and lot drainage should be collected and directed away from the structures toward approved disposal areas through drainage terraces, gutters, down drains, and other devices. Design fine grade elevations should be maintained through the life of the structure or if design fine grade elevations are altered, adequate area drains should be installed in order to provide rapid discharge of water, away from structures. Residents or Homeowner Associations should be made aware that they are responsible for maintenance and cleaning of

all drainage terraces, down drains, and other devices that have been installed to promote site and structure drainage.

7.11 Pavement Design

Pavement sections for the proposed streets shall be designed based on laboratory testing conducted on samples taken from the soil subgrade. Preliminarily, based on an assumed R-Value of 30, the pavement may be designed utilizing the sections presented in Table 7-6. These sections should be verified upon the completion of grading, based on R-Value testing.

Table 7-6
Preliminary Pavement Sections

Traffic Index	Pavement Section Options OR	
5.0	3-inch AC on 5.5-inch AB	4-inch AC on 4-inch AB
5.5	3-inch AC on 7-inch AB	4-inch AC on 5-inch AB
6.0	3.5-inch AC on 7.5-inch AB	4-inch AC on 6.5-inch AB
AC-Asphalt Concrete AB-Caltrans Class II Base		

The underlying subgrade soil should be suitably moisture conditioned, processed and compacted to a minimum 90 percent of the laboratory maximum density (ASTM: D 1557) to at least twelve (12) inches below subgrade. After subgrade compaction, the exposed grade should then be "proof"-rolled with heavy equipment to ensure the grade does not "pump" and is verified as non-yielding. Aggregate base should consist of Class 2 (Caltrans) aggregate base and should be compacted to at least 95 percent of the maximum laboratory dry density as determined in accordance with ASTM Test Method: D 1557.

Preparation for compaction operations and pavement construction operations should be accomplished in accordance with the current requirements of the City of Eastvale and under the observation and testing of the project geotechnical consultant.

8.0 LOT MAINTENANCE

Ongoing maintenance of the improvements is essential to the long-term performance of structures. As such, the owners must implement certain maintenance procedures. The attached " Maintenance and Improvement Considerations" presented in the Appendix E may be included as part of the sales packet to educate the owners in issues related to drainage, maintenance, backyard improvements, etc. The following recommendations should also be implemented.

8.1 Lot Drainage

Roof, pad and lot drainage should be collected and directed away from structures and slopes and toward approved disposal areas. Design fine grade elevations should be maintained through the life of the structure or if design fine grade elevations are altered, adequate area drains should be installed in order to provide rapid discharge of water, away from structures and slopes. Residents should be made aware that they are responsible for maintenance and cleaning of all drainage terraces, down drains, and other devices that have been installed to promote structure and slope stability.

8.2 Burrowing Animals

Residents or owners should undertake a program for the elimination of burrowing animals.

9.0 FUTURE PLAN REVIEWS

This report represents a geotechnical review of the site. As the project design for the project progresses, site specific geologic and geotechnical issues should be considered in the design and construction of the project. Consequently, future plan reviews may be necessary. These reviews may include reviews of:

- Grading Plans
- Foundation Plans
- Utility Plans

These plans should be forwarded to the project Geotechnical Consultant for review.

10.0 CLOSURE

10.1 Geotechnical Review

For the purposes of this report, multiple working hypotheses were established for the project, utilizing the available data and the most probable model is used for the analysis. Future information collected during the proposed grading operations is intended to evaluate the hypothesis and as such, some of the assumptions summarized in this report may need to be changed. Some modifications of the grading recommendations may become necessary, should the conditions encountered in the field differ from the conditions hypothesized in this report.

Plans and sections of the project specifications should be reviewed by Alta to evaluate conformance with the intent of the recommendations contained in this report. If the project description or final design varies from that described in herein, Alta must be consulted regarding the applicability of the recommendations contained herein and whether any changes are required. Alta accepts no liability for any use of its recommendations if the project description or final design varies and Alta is not consulted regarding the alterations.

10.2 Limitations

This report is based on the following: 1) the project as presented on the attached plan; 2) the information obtained from Alta's laboratory testing included herein; and 3) from the information presented in the referenced reports. The findings and recommendations are based on the results of the subsurface investigation, laboratory testing, and office analysis combined with an interpolation and extrapolation of conditions between and beyond the subsurface excavation locations. However, the materials adjacent to or beneath those observed may have different characteristics than those observed, and no precise

representations are made as to the quality or extent of the materials not observed. The results reflect an interpretation of the direct evidence obtained. Work performed by Alta has been conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the geotechnical profession currently practicing in the same locality under similar conditions. The methods used to develop the recommendations do not comprise an exact science and are not a guarantee that the interaction between the soils and proposed structures shall perform as planned. No other representation, either expressed or implied, and no warranty or guarantee is included or intended.

The recommendations presented in this report are based on the assumption that an appropriate level of field review will be provided by a geotechnical consultant who is familiar with the design and site geologic conditions. That field review shall be sufficient to confirm that geotechnical and geologic conditions exposed during grading are consistent with the geologic representations and corresponding recommendations presented in this report.

The conclusions and recommendations included in this report are applicable to the specific design of this project as discussed in this report. They have no applicability to any other project or to any other location and any and all subsequent users accept any and all liability resulting from any use or reuse of the data, opinions, and recommendations without the prior written consent of Alta.

Alta has no responsibility for construction means, methods, techniques, sequences, procedures, safety precautions, programs in connection with the construction, acts or omissions of the CONTRACTOR or any other person performing any of the construction, or for the failure of any of them to carry out the construction in accordance with the final design drawings and specifications.

APPENDIX B

Subsurface Investigation

APPENDIX B

Subsurface Investigation

Alta's subsurface investigation consisted of excavating, logging, and sampling five (5) hollow-stem auger borings. Details of the subsurface investigation are presented in Table B. The approximate location of the exploratory excavation is shown on the accompanying Plate 1 and the Geotechnical Logs are attached.

TABLE B
SURFACE INVESTIGATION DETAILS

Equipment	Range of Depths	Sampling Methods	Sample Locations
Hollow-stem auger	Up to 51.5 feet	1. Bulk 2. Ring Samples 3. SPT Samples	1. Bulk-Select Depth 2. Every 2.5 to 5-feet 3. At depths below 30 feet.

UNIFIED SOIL CLASSIFICATION SYSTEM

Major Divisions		grf	ltr	Description
Coarse Grained Soils: More than 50% retained on No. 200 sieve	Gravel and Gravelly Soils: More than 50% of coarse fraction retained on No. 4 sieve		GW	Well-graded gravels or gravel sand mixtures, little or no fines
			GP	Poorly-graded gravels or gravel sand mixture, little or no fines
			GM	Silty gravels, gravel-sand-silt mixtures
			GC	Clayey gravels, gravel-sand-clay mixtures
	Sand and Sandy Soils: More than 50% of coarse fraction passes on No. 4 sieve		SW	Well-graded sands or gravelly sands, little or no fines
			SP	Poorly-graded sands or gravelly sands, little or no fines
			SM	Silty sands, sand-silt mixtures
			SC	Clayey sands, and-clay mixtures

Major Divisions		grf	ltr	
Fine Grained Soils: More than 50% passes on No. 200 sieve	Silts And Clays LL,<50		ML	Inorganic silts and very fine sands, rock flour, silty or clayey fine sands or clayey silts with slight plasticity
			CL	Inorganic clays of low to medium plasticity, gravelly clays, sandy clays, silty clays, lean clays
			OL	Organic silts and organic silt-clays of low plasticity
	Silts And Clays LL,<50		MH	Inorganic silts, micaceous or diatomaceous fine or silty soils, elastic silts
			VH	Inorganic clays of high plasticity, fat clays
			OH	Organic clays of medium to high plasticity
Highly Organic Soils			PT	Peat and other highly organic soils

BOUNDARY CLASSIFICATION: Soils possessing characteristics of two groups are designated by combinations of group symbols.

SOIL MOISTURE

Increasing Visual Moisture Content

- Dry - Dry to touch
- Moist - Damp, but no visible free water
- wet - Visible free water

SIZE PROPORTIONS

Trace - <5%

Few - 5 to 10%

Some - 15 to 25%

Laboratory Testing

LABORATORY TESTING

The following laboratory tests were performed on a representative sample in accordance with the applicable latest standards or methods from the ASTM, California Building Code (CBC) and California Department of Transportation.

Classification

Soils were classified with respect to the Unified Soil Classification System (USCS) in accordance with ASTM D-2487 and D-2488.

Particle Size Analysis

Modified hydrometer testing was conducted to aid in classification of the soil. The results of the particle size analysis are presented in Table C.

Maximum Density/Optimum Moisture

The maximum dry density and optimum moisture content of one representative bulk sample was evaluated in accordance with ASTM D-1557. The results are summarized in Table C.

Expansion Index Tests

One (1) expansion index tests were performed to evaluate the expansion potential of typical on-site soil. Testing was carried out in general conformance with ASTM Test Method D-4829. The results are presented in Table C.

Chemical Analyses

Chemical testing was performed on one select samples by Alta. The results of these tests (sulfate content, resistivity, chloride content and pH) are presented on Table C.

PLATE C-1

APPENDIX D

Maintenance and Improvement Considerations

MAINTENANCE AND IMPROVEMENT CONSIDERATIONS

General

Owners purchasing property must assume a certain degree of responsibility for improvements and for maintaining conditions around their home. Of primary importance from a geotechnical standpoint are maintaining drainage patterns and minimizing the soil moisture variation below all improvements. Such design, construction and owner maintenance provisions may include:

- Employing contractors for improvements who design and build in recognition of local building codes and specific site soils conditions.
- Establishing and maintaining positive drainage away from all foundations, walkways, driveways, patios, and other improvements.
- Avoiding the construction of planters adjacent to structural improvements. Alternatively, planter sides/bottoms can be sealed with an impermeable membrane and drained away from the improvements via subdrains into approved disposal areas.
- Sealing and maintaining construction/control joints within concrete slabs and walkways to reduce the potential for moisture infiltration into the subgrade soils.
- Utilizing landscaping schemes with vegetation that requires minimal watering. Watering should be done in a uniform manner, as equally as possible on all sides of the foundation, keeping the soil "moist" but not allowing the soil to become saturated.
- Maintaining positive drainage away from structures and providing roof gutters on all structures with downspouts that are designed to carry roof runoff directly into area drains or discharged well away from the foundation areas.
- Avoiding the placement of trees closer to the proposed structures than a distance of one-half the mature height of the tree.
- Observation of the soil conditions around the perimeter of the structure during extremely hot/dry or unusually wet weather conditions so that modifications can be made in irrigation programs to maintain relatively uniform moisture conditions.

Sulfates

Owners should be cautioned against the import and use of certain inorganic fertilizers, soil amendments, and/or other soils from offsite sources in the absence of specific information relating to their chemical composition. Some fertilizers have been known to leach sulfate compounds into soils and increase the sulfate concentrations to potentially detrimental levels.

Site Drainage

- The owners should be made aware of the potential problems that may develop when drainage is altered through construction of hardscape improvements. Ponded water, drainage over the slope face, leaking irrigation systems, overwatering, or other conditions which could lead to ground saturation must be avoided.
- No water should be allowed to flow over the slopes. No alteration of pad gradients should be allowed that would prevent pad and roof runoff from being directed to approved disposal areas.
- Drainage patterns have been established at the time of the fine grading should be maintained throughout the life of the structure. No alterations to these drainage patterns should be made unless designed by qualified professionals in compliance with local code requirements and site-specific soils conditions.

Slope Drainage

- Residents should be made aware of the importance of maintaining and cleaning all interceptor ditches, drainage terraces, down drains, and any other drainage devices, which have been installed to promote slope stability.
- Subsurface drainage pipe outlets may protrude through slope surfaces and/or wall faces. These pipes, in conjunction with the graded features, are essential to slope and wall stability and must be protected in-place. They should not be altered or damaged in any way.

Planting and Irrigation of Slopes

- Seeding and planting of the slopes should be planned to achieve, as rapidly as possible, a well-established and deep-rooted vegetal cover requiring minimal watering.
- It is the responsibility of the landscape architect to provide such plants initially and of the residents to maintain such planting. Alteration of such a planting scheme is at the resident's risk.
- The resident is responsible for proper irrigation and for maintenance and repair of properly installed irrigation systems. Leaks should be fixed immediately.

- Sprinklers should be adjusted to provide maximum uniform coverage with a minimum of water usage and overlap. Overwatering with consequent wasteful runoff and serious ground saturation must be avoided.
- If automatic sprinkler systems are installed, their use must be adjusted to account for seasonal and natural rainfall conditions.

Burrowing Animals

- Residents must undertake a program to eliminate burrowing animals. This must be an ongoing program in order to promote slope stability.

Owner Improvement

Owner improvements (pools, spas, patio slabs, retaining walls, planters, etc.) should be designed to account for the terrain of the project, as well as expansive soil conditions and chemical characteristics. Design considerations on any given lot may need to include provisions for differential bearing materials, ascending/descending slope conditions, bedrock structure, perched (irrigation) water, special geologic surcharge loading conditions, expansive soil stresses, and long-term creep/settlement.

All owner improvements should be designed and constructed by qualified professionals utilizing appropriate design methodologies, which account for the on-site soils and geologic conditions. Each lot and proposed improvement should be evaluated on an individual basis.

Setback Zones

Manufactured slopes maybe subject to long-term settlement and creep that can manifest itself in the form of both horizontal and vertical movement. These movements typically are produced as a result of weathering, erosion, gravity forces, and other natural phenomenon. A setback adjacent to slopes is required by most building codes, including the California Building Code. This zone is intended to locate and support the residential structures away from these slopes and onto soils that are not subject to the potential adverse effects of these natural phenomena.

The owner may wish to construct patios, walls, walkways, planters, swimming pools, spas, etc. within this zone. Such facilities may be sensitive to settlement and creep and should not be

constructed within the setback zone unless properly engineered. It is suggested that plans for such improvements be designed by a professional engineer who is familiar with grading ordinances and design and construction requirements. In addition, we recommend that the designer and contractor familiarize themselves with the site specific geologic and geotechnical conditions on the specific lot.

APPENDIX E

Earthwork Specifications

ALTA CALIFORNIA GEOTECHNICAL, INC.
EARTHWORK SPECIFICATIONS

These specifications present the generally accepted standards and minimum earthwork requirements for the development of the project. These specifications shall be the project guidelines for earthwork except where specifically superseded in preliminary geology and soils reports, grading plan review reports or by the prevailing grading codes or ordinances of the controlling agency.

A. GENERAL

1. The Contractor shall be responsible for the satisfactory completion of all earthwork in accordance with the project plans and specifications.

2. The project Geotechnical Engineer and Engineering Geologist, or their representatives, shall provide observation and testing services, and Geotechnical consultation for the duration of the project.

3. All clearing, grubbing, stripping and site preparation for the project shall be accomplished by the Contractor to the satisfaction of the Geotechnical Engineer/Engineering Geologist.

4. It is the Contractor's responsibility to prepare the ground surface to receive fill to the satisfaction of the Geotechnical Engineer and to place, spread, mix, moisture condition, and compact the fill in accordance with the job specifications and as required by the Geotechnical Engineer. The Contractor shall also remove all material considered by the Geotechnical Engineer to be unsuitable for use in the construction of engineered fills.

5. The Contractor shall have suitable and sufficient equipment in operation to handle the amount of fill being placed. When necessary, equipment will be shut down temporarily in order to permit the proper preparation of fills.

B. PREPARATION OF FILL AREAS

1. Excessive vegetation and all deleterious material should be disposed of offsite as required by the Geotechnical Engineer.

   Existing fill, soil, alluvium or rock materials determined by the Geotechnical Engineer as being unsuitable for placement in compacted fills shall be removed and hauled from the site. Where applicable, the Contractor may obtain the

approval of the Soils Engineer and the controlling authorities for the project to dispose of the above described materials, or a portion thereof, in designated areas onsite.

After removal of the deleterious materials have been accomplished, earth materials deemed unsuitable in their natural, in-place condition, shall be removed as recommended by the Geotechnical Engineer/Engineering Geologist.

2. Upon achieving a suitable bottom for fill placement, the exposed removal bottom shall be disced or bladed by the Contractor to the satisfaction of the Geotechnical Engineer. The prepared ground surfaces shall then be brought to the specified moisture content mixed as required, and compacted and tested as specified. In localities where it is necessary to obtain the approval of the controlling agency prior to placing fill, it will be the Contractor's responsibility to contact the proper authorities to visit the site.

3. Any underground structure such as cesspools, cisterns, mining shafts, tunnels, septic tanks, wells, pipelines or other structures not located prior to grading are to be removed or treated in a manner prescribed by the Geotechnical Engineer and/or the controlling agency for the project.

C. ENGINEERED FILLS

1. Any material imported or excavated on the property may be utilized as fill, provided the material has been determined to be suitable by the Geotechnical Engineer. Deleterious materials shall be removed from the fill as directed by the Geotechnical Engineer.

2. Rock or rock fragments less than twelve inches in the largest dimension may be utilized in the fill, provided they are not placed in concentrated pockets and the distribution of the rocks is approved by the Geotechnical Engineer.

3. Rocks greater than twelve inches in the largest dimension shall be taken offsite, or placed in accordance with the recommendations of the Geotechnical Engineer in areas designated as suitable for rock disposal.

4. All materials to be used as fill, shall be tested in the laboratory by the Geotechnical Engineer. Proposed import materials shall be approved by the Geotechnical Engineer 48 hours prior to importation.

5. The fill materials shall be placed by the Contractor in lifts, that when compacted, shall not exceed six inches. Each lift shall be spread evenly and shall be

thoroughly mixed to achieve a near uniform moisture condition and a uniform blend of materials.

All compaction shall be achieved at or above the optimum moisture content, as determined by the applicable laboratory standard. The Contractor will be notified if the fill materials are too wet or too dry to achieve the required compaction standard.

6. When the moisture content of the fill material is below the limit specified by the Geotechnical Engineer, water shall be added and the materials shall be blended until a uniform moisture content, within specified limits, is achieved. When the moisture content of the fill material is above the limits specified by the Geotechnical Engineer, the fill materials shall be aerated by discing, blading, mixed with dryer fill materials, or other satisfactory methods until the moisture content is within the specified limits.

7. Each fill lift shall be compacted to the minimum project standards, in compliance with the testing methods specified by the controlling governmental agency, and in accordance with recommendations of the Geotechnical Engineer.

   In the absence of specific recommendations by the Geotechnical Engineer to the contrary, the compaction standard shall be the most recent version of ASTM:D 1557.

8. Where a slope receiving fill exceeds a ratio of five-horizontal to one-vertical, the fill shall be keyed and benched through all unsuitable materials into sound bedrock or firm material, in accordance with the recommendations and approval of the Geotechnical Engineer.

9. Side hill fills shall have a minimum key width of 15 feet into bedrock or firm materials, unless otherwise specified in the soil report and approved by the Geotechnical Engineer in the field.

10. Drainage terraces and subdrainage devices shall be constructed in compliance with the ordinances of the controlling governmental agency and/or with the recommendations of the Geotechnical Engineer and Engineering Geologist.

11. The Contractor shall be required to maintain the specified minimum relative compaction out to the finish slope face of fill slopes, buttresses, and stabilization fills as directed by the Geotechnical Engineer and/or the governing agency for the project. This may be achieved by either overbuilding the slope and cutting

back to the compacted core; by direct compaction of the slope face with suitable equipment; or by any other procedure which produces the required result.

12. The fill portion of fill-over-cut slopes shall be properly keyed into rock or firm material; and the fill area shall be stripped of all soil or unsuitable materials prior to placing fill.

    The design cut portion of the slope should be made first and evaluated for suitability by the Engineering Geologist prior to placement of fill in the keyway above the cut slope.

13. Pad areas in cut or natural ground shall be approved by the Geotechnical Engineer. Finished surfaces of these pads may require scarification and recompaction, or over excavation as determined by the Geotechnical Engineer.

D. CUT SLOPES

1. The Engineering Geologist shall observe all cut slopes and shall be notified by the Contractor when cut slopes are to be started.

2. If, during the course of grading, unforeseen adverse or potentially adverse geologic conditions are encountered, the Engineering Geologist and Soil Engineer shall investigate, analyze and make recommendations to remediate these problems.

3. Non-erodible interceptor swales shall be placed at the top of cut slopes that face the same direction as the superjacent, prevailing drainage.

4. Unless otherwise specified in specific geotechnical reports, no cut slopes shall be excavated higher or steeper than that allowed by the ordinances of controlling governmental agencies.

5. Drainage terraces shall be constructed in compliance with the ordinances of the controlling governmental agencies, and/or in accordance with the recommendations of the Geotechnical Engineer or Engineering Geologist.

E. GRADING CONTROL

1. Fill placement shall be observed and tested by the Geotechnical Engineer and/or his representative during grading.

   Field density tests shall be made by the Geotechnical Engineer and/or his representative to evaluate the compaction and moisture compliance of each fill lift. Density tests shall be conducted at intervals not to exceed two feet of fill

height. Where sheepsfoot rollers are used, the fill may be disturbed to a depth of several inches. Density determinations shall be taken in the compacted material below the disturbed surface at a depth determined by the Geotechnical Engineer or his representative.

2. Where tests indicate that the density of any layer of fill, or portion thereof, is below the required relative compaction, or improper moisture content is in evidence, that particular layer or portion thereof shall be reworked until the required density and/or moisture content has been attained. Additional fills shall not be placed over an area until the previous lift of fill has been tested and found to meet the density and moisture requirements for the project and the previous lift is approved by the Geotechnical Engineer.

3. When grading activities are interrupted by heavy rains, fill operations shall not be resumed until field observations and tests by the Geotechnical Engineer indicate the moisture content and density of the fill are within the specified limits.

4. During construction, the Contractor shall properly grade all surfaces to maintain good drainage and prevent the ponding of water. The Contractor shall take remedial action to control surface water and to prevent erosion of graded areas until such time as a permanent drainage and erosion devices have been installed.

5. Observation and testing by the Geotechnical Engineer and/or his representative shall be conducted during filling and compacting operations in order that he will be able to state in his opinion that all cut and filled areas are graded in accordance with the approved specifications.

6. Upon the completion of grading activities and after the Geotechnical Engineer and Engineering Geologist have finished their observations of the work, final reports shall be submitted. No further excavation or fill placement shall be undertaken without prior notification of the Geotechnical Engineer and/or Engineering Geologist.

F. **FINISHED SLOPES**

All finished cut and fill slopes shall be planted and irrigated and/or protected from erosion in accordance with the project specifications, governing agencies, and/or as recommended by a landscape architect.

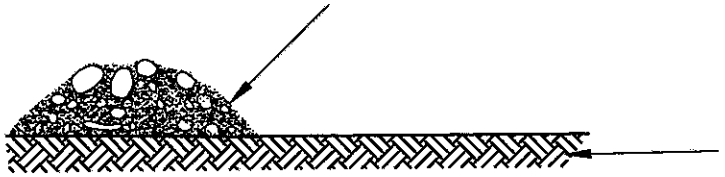
ROCK BLANKET DETAILS

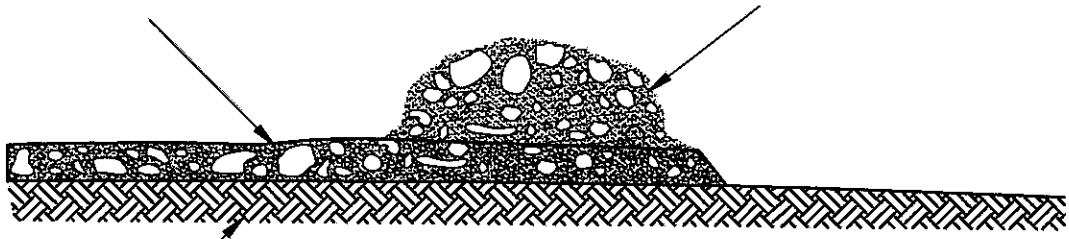
LOOSE PILE 1
LOOSE, DUMPED ROCK, GRAVEL AND SAND MIXTURE REMOVE FRAGMENTS LARGER THAT 2 FEET FOR ISOLATED BURIAL (PLATE G-15) OR WINDROW (PLATE G-10)



APPROVED BOTTOM, OR TOP OF PREVIOUSLY APPROVED BLANKET FILL

COMPACT PILE 1
SPREAD LOOSE PILE FORWARD WITH HEAVY TRACKED DOZER (D-8 OR LARGER). HEAVILY WATER, TRACK, AND APPLY ADDITIONAL SAND AND GRAVEL AS NECESSARY TO FILL VOIDS AND CREATE A DENSE MATRIX OF ROCK, COBBLES, GRAVEL AND SAND (2 FOOT MAXIMUM THICKNESS)

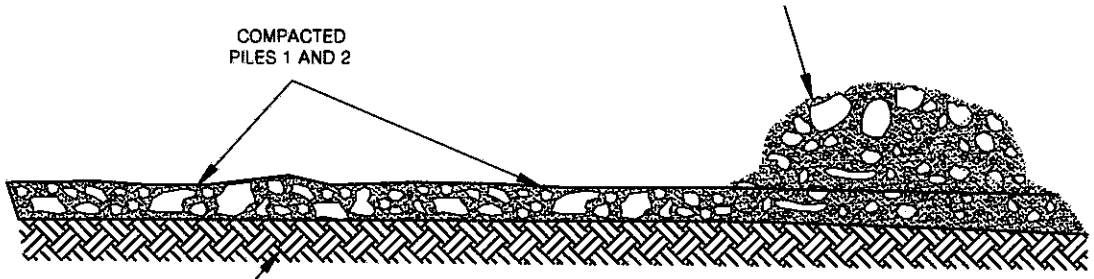
LOOSE PILE 2
DUMP SUCCESSIVE PILES OF LOOSE ROCK, GRAVEL AND SAND MIXTURE ON FORWARD EDGE OF PREVIOUSLY COMPACTED LIFT WITH TRUCKS AND/OR SCRAPERS. USE PREVIOUS LIFT TO ACCESS AND FURTHER COMPACT PILE 1.



APPROVED BOTTOM, OR TOP OF PREVIOUSLY APPROVED BLANKET FILL

LOOSE PILE 3
DUMP SUCCESSIVE PILES OF LOOSE ROCK, GRAVEL AND SAND MIXTURE ON FORWARD EDGE OF PREVIOUSLY COMPACTED LIFT WITH TRUCKS AND/OR SCRAPERS. USE PREVIOUS LIFT TO ACCESS AND FURTHER COMPACT EXISTING BLANKET.

COMPACTED PILES 1 AND 2

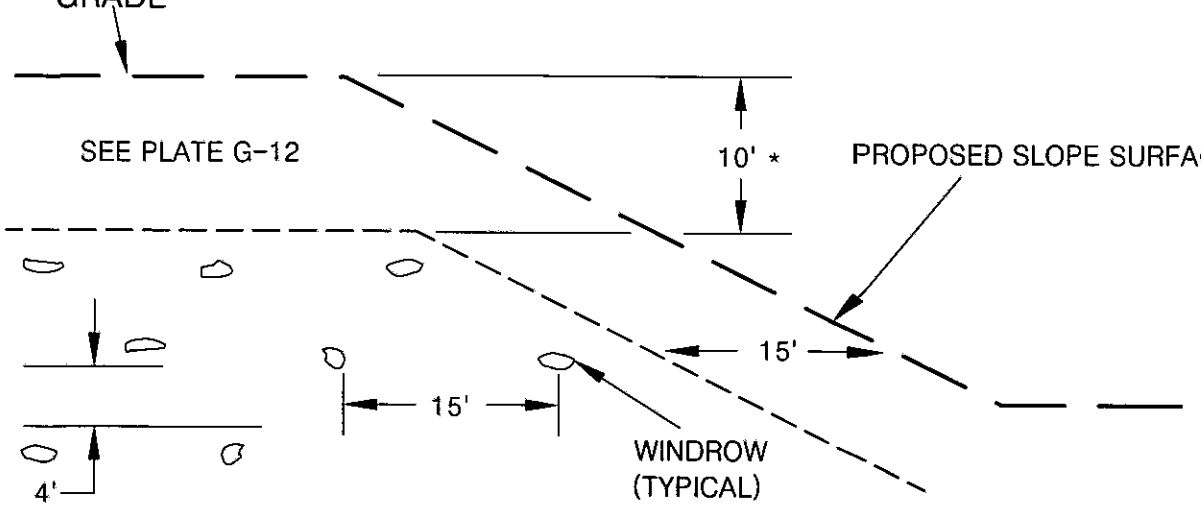


APPROVED BOTTOM, OR TOP OF PREVIOUSLY APPROVED BLANKET FILL

OBSERVATION TESTING AND APPROVAL PROCEDURES

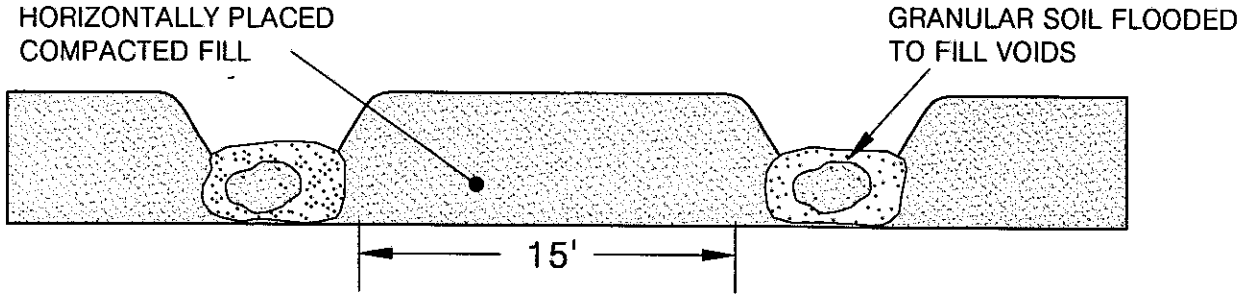
OBSERVE EQUIPMENT. SCRAPERS AND TRUCKS SHOULD BE FULLY SUPPORTED ON BLANKET WITHOUT SIGNIFICANT YIELDING. EXCAVATE TEST/OBSERVATION PITS TO CONFIRM EXISTENCE OF MIXTURE OF VARIOUS PARTICLE SIZES, WITHOUT SIGNIFICANT VOIDS, AND FORMING A DENSE, COMPACTED FILL MATRIX. TEST BY ASTM D1556, D2922 AND/OR D3017 WHEN APPROPRIATE. RECORD LIMITS AND ELEVATION OF BLANKET. ALL FILL AND COMPACTION OPERATIONS TO BE CONDUCTED UNDER THE OBSERVATION OF THE GEOTECHNICAL ENGINEER. SUBSEQUENT LIFTS TO BE APPLIED ONLY AFTER OBSERVATION AND CONFIRMATION OF SUITABILITY OF FILL AND RELEASE BY THE GEOTECHNICAL ENGINEER. BLANKETS TO BE CONSTRUCTED IN ACCORDANCE WITH PLATE G-12.

ROCK WINDROW DETAIL



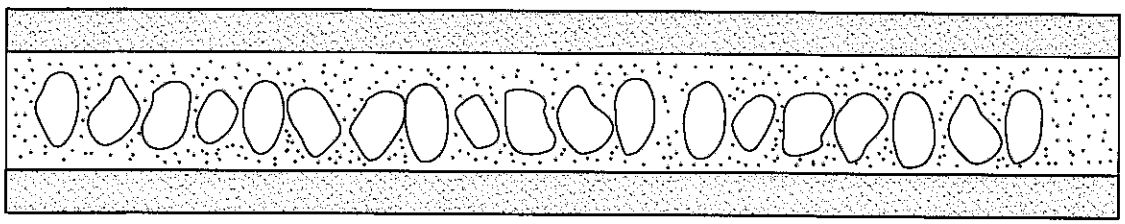
NOTE: OVERSIZED MATERIAL SHOULD BE REMOVED FROM THE 15' CLEAR ZONES WITH SPECIAL EQUIPMENT, SUCH AS A ROCK RAKE, PRIOR TO PLACING THE NEXT FILL LIFT.
*VARIANCES TO THE ABOVE ROCK HOLD DOWN MAY BE GRANTED SUBJECT TO APPROVAL BY THE OWNER, GEOTECHNICAL ENGINEER, AND GOVERNING AGENCY

TYPICAL WINDROW DETAIL (END VIEW)

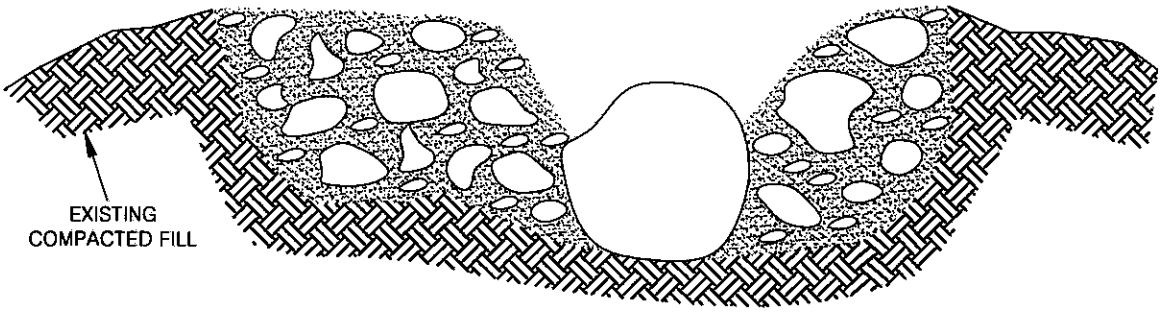


NOTE: COMPACTED FILL SHALL BE BROUGHT UP TO A HIGHER ELEVATION ALONG EACH WINDROW SO GRANULAR SOIL CAN BE FLOODED IN A "TRENCH CONDITION".

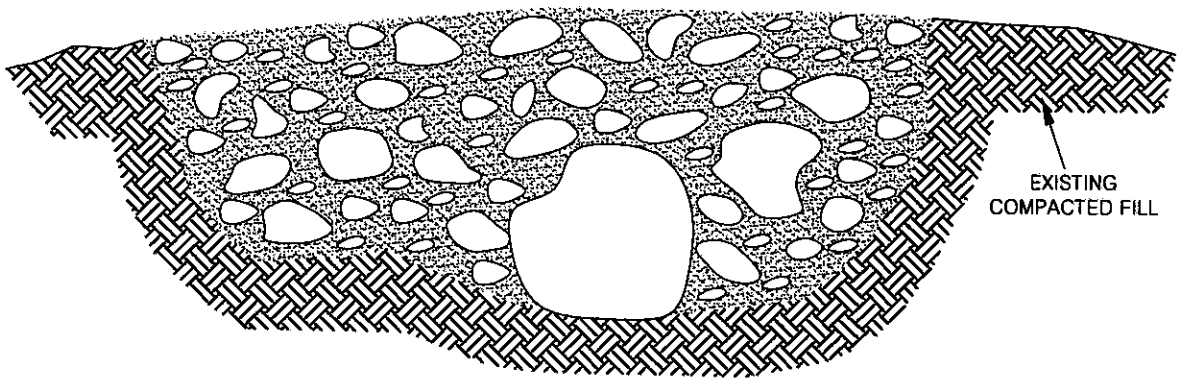
PROFILE VIEW



ISOLATED ROCK BURIAL DETAILS

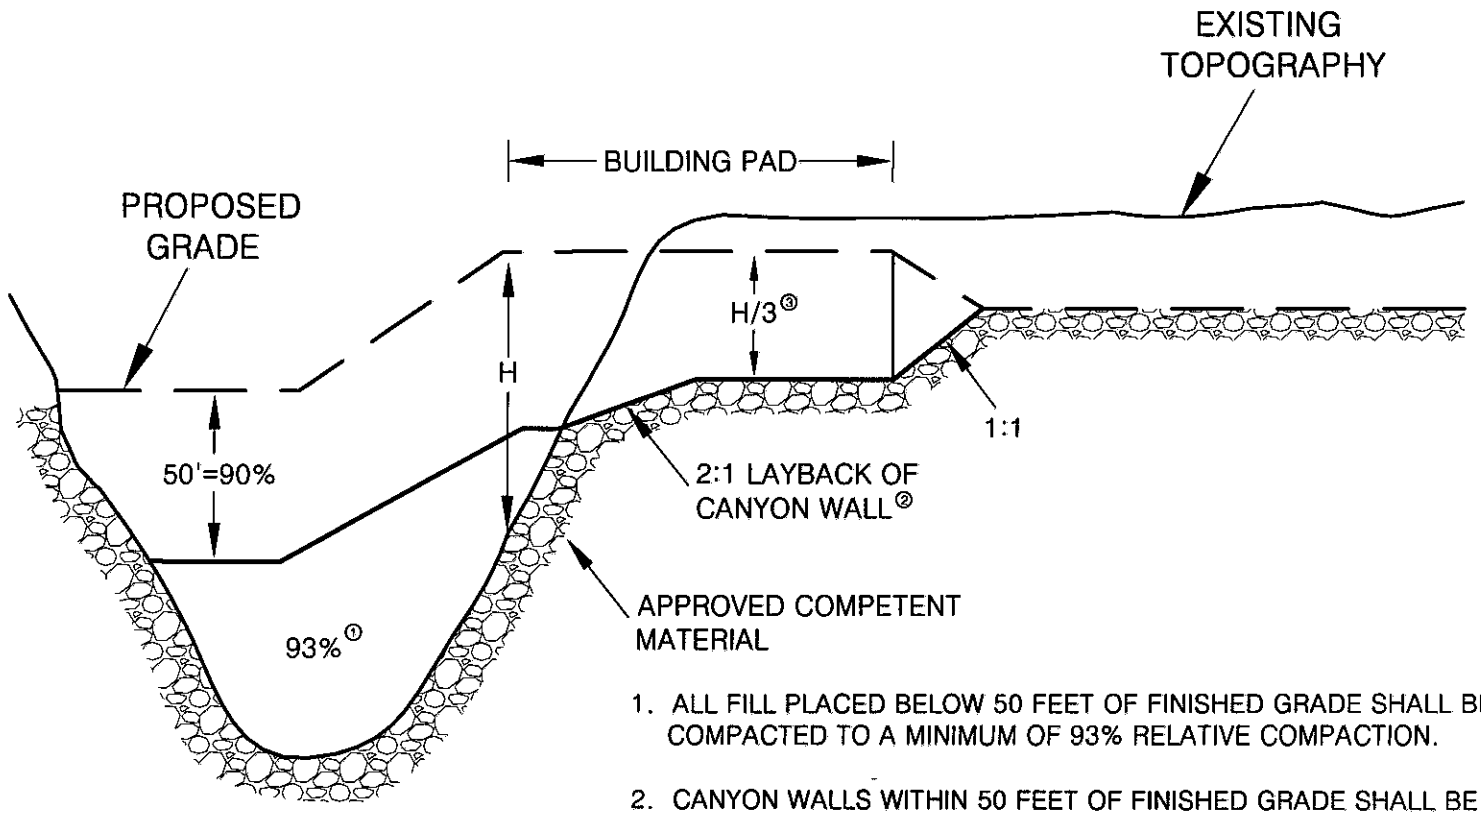


EXCAVATE HOLE INTO EXISTING FILL PRISM, PLACE BOULDER (< 8 feet in maximum dimension) INTO EXISTING COMPACTED FILL. SURROUND WITH SAND, GRAVEL, COBBLES AND WATER HEAVILY. TRACK WITH D8 OR LARGER EQUIPMENT UNTIL RESULTING FILL FULLY SUPPORTS EQUIPMENT. OBSERVE AND/OR TEST IN ACCORDANCE WITH ASTM D1556, D2922 OR D3017. ROCKS LARGER THAN 8 FEET SHALL BE FURTHER REDUCED IN SIZE BY SECONDARY BREAKING.



RELATIVE COMPACTION VS. DEPTH

CANYON WALL LAY BACK
DIFFERENTIAL FILL OVEREXCAVATION DETAILS



1. ALL FILL PLACED BELOW 50 FEET OF FINISHED GRADE SHALL BE COMPACTED TO A MINIMUM OF 93% RELATIVE COMPACTION.

2. CANYON WALLS WITHIN 50 FEET OF FINISHED GRADE SHALL BE LAID BACK TO A SLOPE RATIO OF 2:1 OR FLATTER.

3. ALL BUILDING PADS SHALL BE OVER EXCAVATED TO A MINIMUM OF 1/3 OF THE MAXIMUM DEPTH OF FILL BELOW THE BUILDING PAD TO A MAXIMUM OF 17 FEET.

4. IF THE 2:1 LAY BACK OF THE CANYON WALL IS IMPRACTICAL, THEN AS AN ALTERNATIVE THE INCREASED COMPACTION STANDARDS IN NOTE 1 SHOULD BE EXTENDED UP TO H/3 AND THE LAY BACK WILL NOT BE REQUIRED.

PALEONTOLOGICAL RESOURCES ASSESSMENT REPORT

PALEONTOLOGICAL RESOURCES ASSESSMENT REPORT

EASTVALE 3 PROJECT AT 7500 HELLMAN AVENUE

Assessor's Parcel Numbers 144-070-016,-017, -018, and -020
City of Eastvale, San Bernardino County, California

For Submittal to:

City of Eastvale
Community Development Department, Planning Division
12363 Limonite Avenue, Suite 910
Eastvale, CA 91752

Prepared for:

Warmington Residential, Southern California Division
3090 Pullman Street
Costa Mesa, CA 92626

Prepared by:

Ron Schmidtling, Principal Paleontologist
Elizabeth Beckner, Report Writer
CRM TECH
1016 East Cooley Drive, Suite A/B
Colton, CA 92324

March 10, 2026

Approximately 3.22 acres
USGS Corona North, Calif., 7.5' (1:24,000) quadrangle
T2S R7W, San Bernardino Baseline and Meridian (Rancho Jurupa land grant)
CRM TECH Contract No. 4355P

EXECUTIVE SUMMARY

Between November 2025 and March 2026, at the request of Warmington Residential, Southern California Division, CRM TECH performed a paleontological resource assessment on 3.22 acres of vacant urban land in the City of Eastvale, Riverside County, California. The subject property of the study consists of Assessor's Parcel Numbers 144-070-016, -017, -018, and -020, located at 7500 Hellman Avenue, north of Walter Street, in a portion of the Rancho Jurupa land grant lying within what would be Section 34 of Township 2 South, Range 7 West, San Bernardino Baseline and Meridian, as depicted in the United States Geological Survey Corona North, California, 7.5' quadrangle.

The study is a part of the environmental review process for the proposed subdivision of the property for the development of 35 single-family homes. The City of Eastvale, as the lead agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA). The purpose of the study is to provide the City with the necessary information and analysis to determine whether the proposed project would potentially disrupt or adversely affect any significant, nonrenewable paleontological resources, as mandated by CEQA.

In order to identify any paleontological resource localities that may exist in or near the project area and to assess the possibility for such resources to be encountered in future excavation and construction activities, CRM TECH requested records searches from the appropriate repositories, conducted a literature search, and carried out a systematic field survey in accordance with the guidelines of the Society of Vertebrate Paleontology. The results of these research procedures indicate that the extensively disturbed surface soils in the project area are low in paleontological sensitivity, but the subsurface sediments are considered to be high in paleontological sensitivity.

Based on these findings, CRM TECH recommends that a paleontological resource impact mitigation program be developed and implemented during the project to prevent project impact on significant, nonrenewable paleontological resources or reduce such impact to a level less than significant. As the primary component of the mitigation program, paleontological monitoring should be required during all earth-moving operations reaching beyond the depth of two feet. Under this condition, CRM TECH further recommends that the project may be cleared to proceed in compliance with CEQA provisions on paleontological resources.

INTRODUCTION

Between November 2025 and March 2026, at the request of Warmington Residential, Southern California Division, CRM TECH performed a paleontological resource assessment on 3.22 acres of vacant urban land in the City of Eastvale, Riverside County, California (Figure 1). The subject property of the study consists of Assessor's Parcel Numbers 144-070-016, -017, -018, and -020, located at 7500 Hellman Avenue, north of Walter Street, in a portion of the Rancho Jurupa land grant lying within what would be Section 34 of Township 2 South, Range 7 West, San Bernardino Baseline and Meridian, as depicted in the United States Geological Survey (USGS) Corona North, California, 7.5' quadrangle (Figures 2, 3).

The study is a part of the environmental review process for the proposed subdivision of the property for the development of 35 single-family homes. The City of Eastvale, as the lead agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA; PRC §21000 et seq.). The purpose of the study is to provide the City with the necessary information and analysis to determine whether the proposed project would potentially disrupt or adversely affect any significant, nonrenewable paleontological resources, as mandated by CEQA.

In order to identify any paleontological resource localities that may exist in or near the project area and to assess the possibility for such resources to be encountered in future excavation and construction activities, CRM TECH requested records searches from the appropriate repositories, conducted a literature search, and carried out a systematic field survey in accordance with the guidelines of the Society of Vertebrate Paleontology. The following report is a complete account of the methods, results, and final conclusion of the study. Personnel who participated in the study are named in the appropriate sections below, and their qualifications are provided in Appendix 1.

PALEONTOLOGICAL RESOURCES

The following section presents an overview of common paleontological resource types, along with criteria used in assessing resource significance and paleontological sensitivity.

DEFINITION

Paleontological resources represent the remains of prehistoric life, exclusive of any human remains, and include the localities where fossils were collected as well as the sedimentary rock formations in which they were found. The defining character of fossils or fossil deposits is their geologic age, typically older than recorded human history and/or older than the middle Holocene Epoch, which dates to circa 5,000 radiocarbon years (Society of Vertebrate Paleontology 2010:11).

Common fossil remains include marine and freshwater mollusk shells; the bones and teeth of fish, amphibians, reptiles, and mammals; leaf imprint assemblages; and petrified wood. Fossil traces, another type of paleontological resource, include internal and external molds (impressions) and casts created by these organisms. These items can serve as important guides to the age of the rocks and sediments in which they are contained and may prove useful in determining the temporal relationships between rock deposits from one area and those from another as well as the timing of geologic events. They can also provide information regarding evolutionary relationships, development trends, and environmental conditions.

Fossil resources generally occur only in areas of sedimentary rock (e.g., sandstone, siltstone, mudstone, claystone, or shale). Because of the infrequency of fossil preservation, fossils, particularly vertebrate fossils, are considered nonrenewable paleontological resources. Occasionally fossils may be exposed at the surface through the process of natural erosion or because of human disturbances; however, they generally lie buried beneath the surficial soils. Thus, the absence of fossils on the surface does not preclude the possibility of their being present within subsurface deposits, while the presence of fossils at the surface is often a good indication that more remains may be found in the subsurface.

SIGNIFICANCE CRITERIA

According to guidelines proposed by Eric Scott and Kathleen Springer (2003) of the San Bernardino County Museum, paleontological resources can be considered to be of significant scientific interest if they meet one or more of the following criteria:

1. The fossils provide information on the evolutionary relationships and developmental trends exhibited among organisms, living or extinct;
2. The fossils provide data useful in determining the age(s) of the rock unit or sedimentary stratum, including data important in determining the depositional history of the region and the timing of geologic events therein;
3. The fossils provide data regarding the development of biological communities or the interactions between paleobotanical and paleozoological biotas;
4. The fossils demonstrate unusual or spectacular circumstances in the history of life; and/or
5. The fossils are in short supply and/or in danger of being depleted or destroyed by the elements, vandalism, or commercial exploitation, and are not found in other geographic locations.

PALEONTOLOGICAL SENSITIVITY

The fossil record is unpredictable, and the preservation of organic remains is rare, requiring a particular sequence of events involving physical and biological factors. Skeletal tissue with a high percentage of mineral matter is the most readily preserved within the fossil record; soft tissues not intimately connected with the skeletal parts, however, are the least likely to be preserved (Raup and Stanley 1978). For this reason, the fossil record contains a biased selection not only of the types of organisms preserved but also of certain parts of the organisms themselves. As a consequence, paleontologists are unable to know with certainty, the quantity of fossils or the quality of their preservation that might be present within any given geologic unit.

Sedimentary units that are paleontologically sensitive are those geologic units (mappable rock formations) with a high potential to contain significant nonrenewable paleontological resources. More specifically, these are geologic units within which vertebrate fossils or significant invertebrate fossils have been determined by previous studies to be present or are likely to be present. These units include, but are not limited to, sedimentary formations that contain significant paleontological resources anywhere within their geographical extent as well as sedimentary rock units temporally or lithologically amenable to the preservation of fossils.

A geologic formation is defined as a stratigraphic unit identified by its lithic characteristics (e.g., grain size, texture, color, and mineral content) and stratigraphic position. There is a direct relationship between fossils and the geologic formations within which they are enclosed and, with sufficient knowledge of the geology and stratigraphy of a particular area, it is possible for paleontologists to reasonably determine the formation's potential to contain significant nonrenewable vertebrate, invertebrate, marine, or plant fossil remains.

The paleontological sensitivity for a geologic formation is determined by the potential for that formation to produce significant nonrenewable fossils. This determination is based on what fossil resources the particular geologic formation has produced in the past at other nearby locations. Determinations of paleontologic sensitivity must consider not only the potential for yielding vertebrate fossils but also the potential of yielding a few significant fossils that may provide new and significant taxonomic, phylogenetic, and/or stratigraphic data.

The Society of Vertebrate Paleontology issued a set of standard guidelines intended to assist paleontologists to assess and mitigate any adverse effects/impacts to nonrenewable paleontological resources. The guidelines defined four categories of paleontological sensitivity for geologic units that might be impacted by a proposed project, as listed below (Society of Vertebrate Paleontology 2010:1-2):

- **High Potential**: Rock units from which vertebrate or significant invertebrate, plant, or trace fossils have been recovered.
- **Undetermined Potential**: Rock units for which little information is available concerning their paleontological content, geologic age, and depositional environment.
- **Low Potential**: Rock units that are poorly represented by fossil specimens in institutional collections, or based on general scientific consensus only preserve fossils in rare circumstances.
- **No Potential**: Rock units that have no potential to contain significant paleontological resources, such as high-grade metamorphic rocks and plutonic igneous rocks.

SETTING

The proposed project is located in the northern portion of the Peninsular Ranges province, which is bounded on the north by the Transverse Ranges province, on the northeast by the Colorado Desert province, and on the west by the Pacific Ocean (Jenkins 1980:40-41; Harms 1996:150). More specifically, the project area lies within the Santa Ana River Valley portion of the Peninsular Ranges province, a structurally depressed trough filled with sediments of Miocene through Recent age (Clarke 1978-1979:15).

The Santa Ana River Valley is one of the many tectonically controlled valleys within the valley-and-ridge systems found in the Perris Block. Defined by English (1926) as a region between the San Jacinto and Elsinore-Chino fault zones, the Perris Block is bounded on the north by the Cucamonga (San Gabriel) Fault and on the south by a vaguely delineated boundary near the southern end of the Temecula Valley. This structural block is considered to have been active since Pliocene time (Woodford et al. 1971:3421). The Pliocene- and Pleistocene-age non-marine sedimentary rocks filling the valley areas have produced a few vertebrate fossils, as well as a few invertebrate fossil remains (Mann 1955:13).

The L-shaped project area is situated on the western edge of the Eastvale city limits, wrapping around the northern and eastern sides of a formerly rural residential property at the northeastern corner of Hellman Avenue and Walters Street. It is surrounded by suburban residential neighborhoods on the west, north, and east, with the Rondo Elementary School of Discovery across Walters Street to the south. Elevations within the project boundaries range approximately from 573 feet to 582 feet above mean sea level, and the terrain is relatively level with a slight incline towards the north. Vegetation observed on the property includes grasses throughout, with large California pepper trees in the center of the project area. Also present on the property are several debris mounds with various types of domestic refuse (Figure 4).

Figure 4. Overview of the project area, view to the north. (Photograph taken on December 17, 2025)

METHODS AND PROCEDURES

RECORDS SEARCH

On December 3, 2025, CRM TECH requested paleontological records searches on this property from the San Bernardino County Museum (SBCM) in Redlands and the Western Science Center (WSC) in Hemet. These institutions maintain files of regional paleontological localities as well as supporting maps and documents. The records search results are used to identify known previously performed paleontological resource assessments as well as known paleontological localities within a one-mile radius of the project area. The SBCM provided the records search results in a letter dated January 9, 2026, but the WSC was unable to process the records search request in time. A copy of the records search results from the SBCM is attached to this report in Appendix 2.

LITERATURE REVIEW

In conjunction with the records searches, CRM TECH report writer Elizabeth Beckner reviewed geological literature pertaining to the project vicinity under the direction of principal paleontologist Ron C. Schmidtling. Sources consulted during this part of the research include primarily topographic, geologic, and soil maps and historical aerial/satellite photographs of the surrounding region, published geologic literature pertaining to the project location, and other materials in the CRM TECH library, including unpublished reports produced during similar surveys on nearby properties.

FIELD SURVEY

On December 17, 2025, CRM TECH paleontological surveyor Melissa Portilla carried out the field survey of the project area under Ron Schmidtling's direction. The survey was completed by walking a series of parallel east-west transects spaced 15 meters (approximately 50 feet) apart. In this way, the ground surface in the entire project area was systematically and carefully examined to determine the soil types, to verify the geological formations, and to look for any indications of paleontological remains. Visibility of the native soils was poor (0-5%) in most of the project area because the ground was obscured by dense vegetation. In the areas with some exposed soils, mainly underneath the trees, visibility was fair (5-10%), although much of the ground was covered in a layer of dead vegetation. Considering the history of past disturbances to the ground surface within the project area, the level of visibility was deemed to be acceptable for the purpose of this study.

RESULTS AND FINDINGS

RECORDS SEARCH

The paleontological resources records search by the SBCM identified no known vertebrate paleontological localities within the project area. However, the SBCM reported four fossil localities that produced fossils of *Bison* sp. and Camelidae less than half a mile northeast of the project location (Kottkamp 2026; see Appendix 2). According to the SBCM, all four localities are assigned to *Qoa*, or "fluvial, mottled, brown-green silty clay or green-brown clayed sand," while the surface sediments within the majority of the project area consist of Qyf_a, or "young alluvial fan deposits of

early Holocene and late Pleistocene age (*ibid.*). Older alluvial deposits occur nearby and may underlie the Qyf_a surface sediments found within the project area (*ibid.*). The SBCM did not offer recommendations regarding the proposed project but noted that "Pleistocene age sediments commonly underlie surface deposits by 5 feet or less in northwestern Riverside County and are often fossiliferous" (*ibid.*).

LITERATURE REVIEW

Rogers (1965) maps the surface geology at the project location *Qal* (alluvium of Recent age). Knecht (1971:Map Sheet 22) maps the surface soil within the project area as *Ce* (Chino silt loam, drained). Morton and Gray (2002) map the surface geology as Qyf_a, described as young alluvial fan deposits from the Holocene and late Pleistocene that are "gray-hued sand and cobble- and gravel-sand deposits derived from lithic diverse sedimentary units" (Figure 5). Morton and Miller (2006) map the surface geology in the project area as Qyf_{3a}, young alluvial-fan deposits from Unit 3 that date to the middle Holocene and is defined as "slightly to moderately consolidated silt, sand, and coarse-grained sand to bouldery alluvial-fan deposits having slightly to moderately dissected surfaces."

Historical aerial and satellite photographs indicate that land use in the project vicinity was dominated by agriculture, with cultivated fields and orchards occupying most of the land, until the post-WWII era (NETR 1938-1980). The project area evidently remains undeveloped until 1980, when the southeastern portion of the property was graded and a metal holding pen was constructed along Walters Street (NETR 1980). By 1985, the majority of the project area had been graded (NETR 1985). A building was constructed on the property during the 1990s but was removed in recent years, while the rest of the land was used for the storage of large trucks and shipping containers (NETR 1994-2022; Google Earth 2023-2025).

FIELD SURVEY

The field survey yielded negative findings for potential paleontological resources, and no surficial indications of any fossil remains were observed within or adjacent to the project area. Field observations confirmed that the ground surface in the project area has been extensively disturbed by past development since the 1980s. Today, it is littered with piles of debris and refuse, with some remnants of the development still present, such as the holding pen, a ramp, an asphalt drive, and a concrete walkway.

CONCLUSION AND RECOMMENDATIONS

CEQA guidelines (Title 14 CCR App. G, Sec. V(c)) require that public agencies in the State of California determine whether a proposed project would "directly or indirectly destroy a unique paleontological resource" during the environmental review process. The present study, conducted in compliance with this provision, is designed to identify any significant, nonrenewable paleontological resources that may exist within or adjacent to the project area and to assess the possibility for such resources to be encountered in future excavation and construction activities.

In summary of the research results outlined above, the surface sediments in the project area are relatively recent in age and have been extensively disturbed over the past few decades. Therefore,

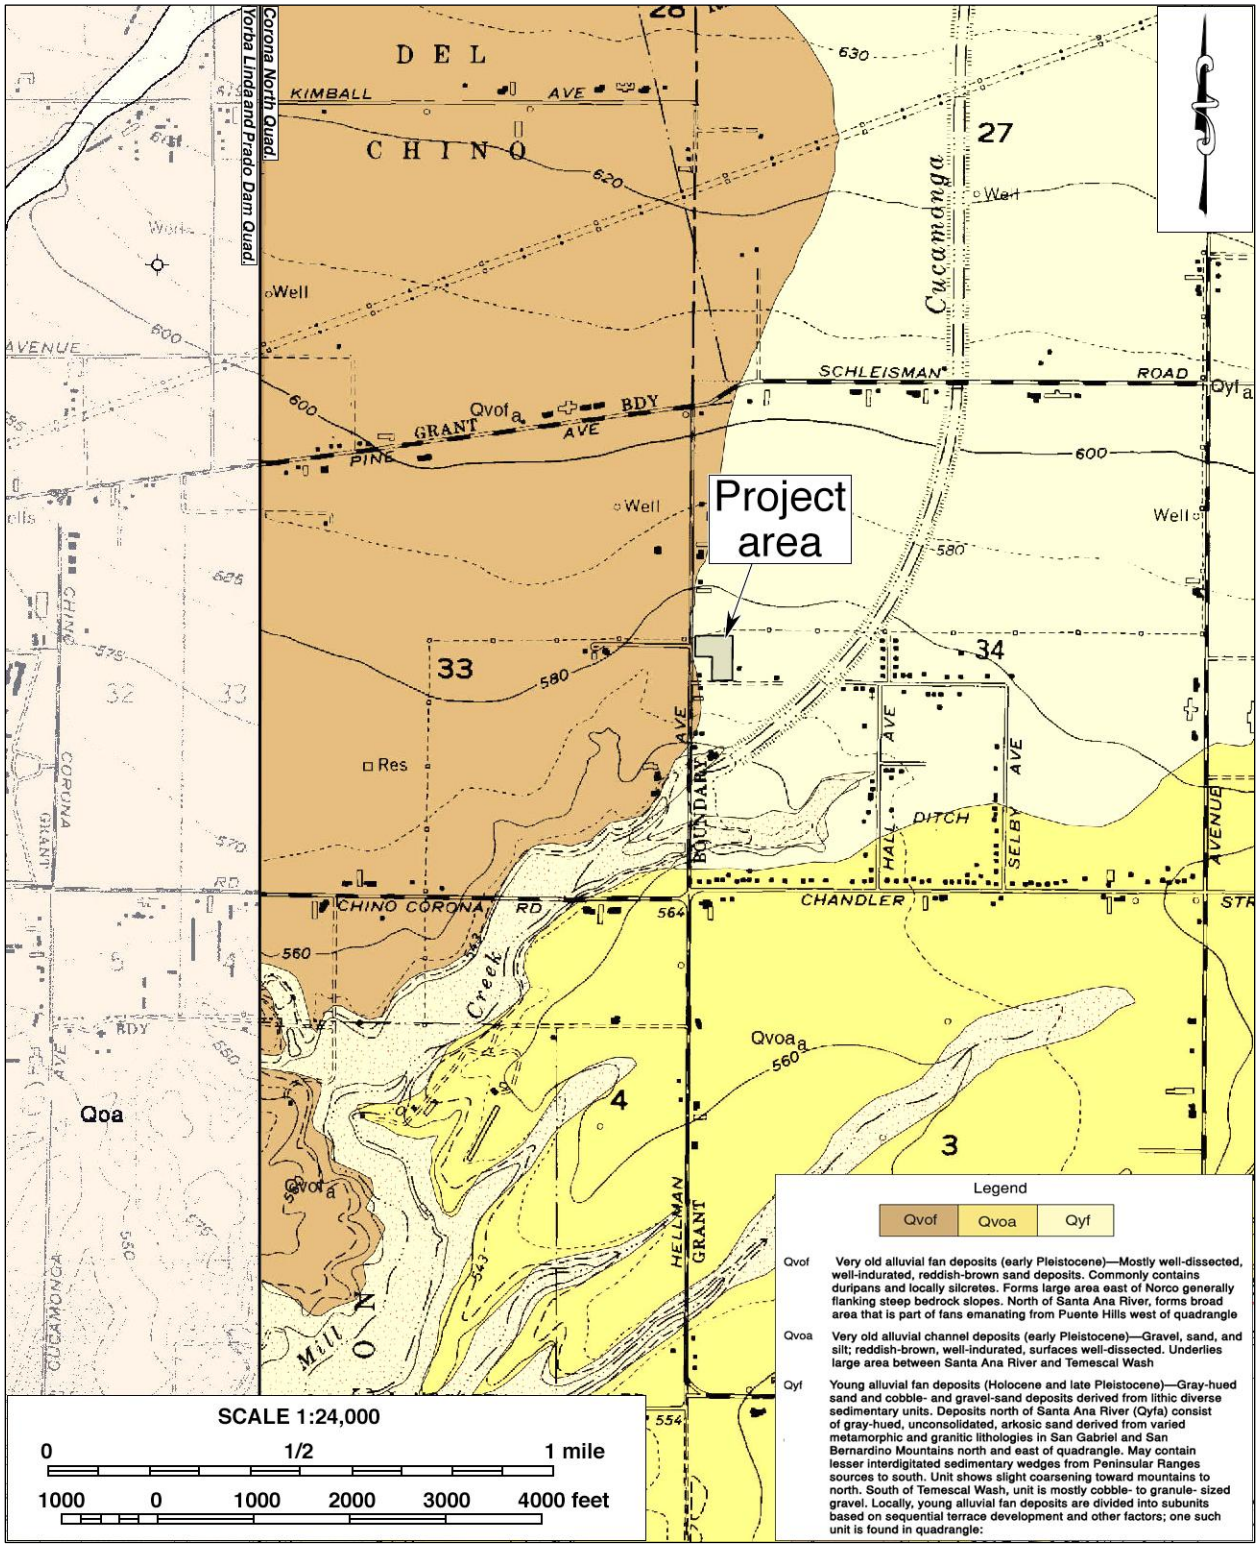

Figure 5. Geologic map of the project area. Based on Morton and Gray 2002 and Dibblee 2001.

they are considered to be low in potential for significant nonrenewable paleontological resources. However, the surface sediments likely overlie older alluvial deposits of Pleistocene age, which are high in paleontological sensitivity. While no vertebrate fossil localities have been identified in the immediate vicinity of the project area, fossil remains have been recovered nearby from the alluvium and rock sequences that also occur subsurface in and around the project area.

Based on these findings, CRM TECH recommends that a paleontological resource impact mitigation program be developed and implemented during the project to prevent project impact on significant, nonrenewable paleontological resources or reduce such impact to a level less than significant. As the primary component of the mitigation program, paleontological monitoring should be required during all earth-moving operations in sediments identified as likely to contain fossil remains. The mitigation program should be developed in accordance with the provisions of CEQA as well as the proposed guidelines of the Society of Vertebrate Paleontology (2010), and should include but not be limited to the following components:

- Earth-moving operations reaching beyond the depth of two feet should be monitored by a qualified paleontological monitor. The monitor should be prepared to quickly salvage fossils as they are unearthed to avoid construction delays and should collect samples of sediments that are likely to contain fossil remains of small vertebrates or in vertebrates. However, the monitor must have the power to temporarily halt or divert grading equipment to allow for the removal of abundant or large specimens.
- Collected samples of sediment should be processed to recover small fossils, and all recovered specimens should be identified and curated at a repository with permanent retrievable storage.
- A report of findings, including an itemized inventory of recovered specimens, should be prepared upon completion of the procedures outlined above. The report should include a discussion of the significance of the paleontological findings, if any. The report and the inventory, when submitted to the City of Eastvale, would signify completion of the program to mitigate potential impacts on paleontological resources.

PALEONTOLOGY RECORDS REVIEW for proposed site of proposed Eastvale 3 Project (CRM Tech no. 4355P), Riverside County, California

Dear Ms. Gallardo,

The Division of Earth Science of the San Bernardino County Museum (SBCM) has completed a record search for the above-named project in Riverside County, California. The proposed project site (Eastvale 3) is in the city of Eastvale, California as shown on the United States Geological Survey (USGS) 7.5-minute Corona North, California quadrangle.

Geologic mapping of that region done by Morton et al. (2002) indicates that most of the project area occurs atop young alluvial fan deposits of early Holocene and late Pleistocene age (Qyf_a). These deposits consist of gray-hued, unconsolidated, and arkosic sand, likely derived from the San Gabriel and San Bernardino Mountains given the project site is north of the Santa Ana River (Morton et al., 2002). Older alluvial units, such as Qof and Qvof, occur at the surface near the project area and may underlie Qyf_a. Pleistocene age sediments commonly underlie surface deposits by 5 feet or less in northwestern Riverside County and are often fossiliferous (Reynolds and Reynolds, 1991). Such older alluvial deposits have yielded the remains of †*Mammut*, †*Mammuthus*, †*Smilodon*, Camelidae, Equus, Bison, and ground sloths, as well as microfossils including rodents, lagomorphs, and mollusks (Reynolds and Reynolds, 1991).

For this review, I conducted a search of the Regional Paleontological Locality Inventory (RPLI) at the SBCM. The results of this search indicate that four SBCM paleontological localities

BOARD OF SUPERVISORS
Col. Paul Cook (Ret.) First District | Jesse Armendarez Second District | Dawn Rowe Chairman, Third District | Curt Hagman Fourth District | Joe Baca, Jr Vice Chair, Fifth District
Luther Snoke Chief Executive Officer

are present within a 1-mile radius of the project area's perimeter. All four, SBCM 5.5.55 – 58, are in a cluster 0.35 – 0.40 miles northeast of the project site. All four localities occur within fluvial, mottled, brown-green silty clay or green-brown clayey sand, assigned to Qoa. Fossils of *Bison* sp. and Camelidae were collected at these localities, along with sediment samples. These fossils are currently reposited at the Natural History Museum of Los Angeles County, not SBCM.

This records search covers only the paleontological records of the San Bernardino County Museum. It is not intended to be a thorough paleontological survey of the proposed project area covering other institutional records, a literature survey, or any potential on-site survey.

Please do not hesitate to contact us with any further questions that you may have.

Sincerely,

Scott Kottkamp

Phase I Environmental Site Assessment

May 1, 2025

Prepared for:

Warmington Residential
3090 Pullman Street
Costa Mesa, California 92626

Prepared by:

Stantec Consulting Services Inc.
735 East Carnegie Drive, Suite 280
San Bernardino, California 92408

Project No.: 185806936

Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment (Report) was prepared by Stantec Consulting Services Inc. (“Stantec”) for the account of Warmington Residential (the “Client”). The conclusions in the Report are Stantec’s professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient’s own risk.

Stantec has assumed all information received from the “Client” and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec’s contract with the Client. While the Report may be provided to applicable authorities having jurisdiction and others for whom the Client is responsible, Stantec does not warrant the services to any third party. The report may not be relied upon by any other party without the express written consent of Stantec, which may be withheld at Stantec’s discretion.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 EXECUTIVE SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property associated with Assessor's Parcel Numbers (APNs) 144-070-016; 144-070-017; 144-070-018; and 144-070-020, located at 7500 Hellman Avenue, northeast of the intersection of Hellman Avenue and Walters Street, Eastvale, Riverside County, California 92880 (the "Subject Property"), on behalf of Warmington Residential (the "Client"). The work was performed according to Stantec's proposal and terms and conditions dated April 7, 2025. Warmington Residential (the "User") has been designated as the User of this report. The intended use of this Phase I ESA is for due diligence in support of potential redevelopment.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1527-21, and All Appropriate Inquiries (AAI) as defined by the United States Environmental Protection Agency (EPA) in Title 40 of the Code of Federal Regulations, Part 312 (40 CFR 312), except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Subject Property consists of approximately 3.2 acres of land associated with APNs 144-070-016; 144-070-017; 144-070-018; and 144-070-020, located at 7500 Hellman Avenue, northeast of the intersection of Hellman Avenue and Walters Street, Eastvale, Riverside County, California 92880. The Subject Property is currently vacant land. Adjoining properties, as well as the nearby area, include a concrete drainage channel to the north followed by residential structures; residential structures to the east and west; and an elementary school to the south. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

Based on review of historical sources including aerial photographs and city directory listings, the Subject Property was formerly utilized for livestock holding and a storage area of the trucks and trailers used in the transportation of livestock. During the site reconnaissance, a former cattle pen was observed in the southern portion of the Subject Property along Walters Avenue. Based on the historic aerial photographs and public record the property does not appear to have been used as a dairy or for any holding of cows and no signs of significant quantities of animal waste was observed. However, debris piles with various household debris, used tires, and building demolition waste were also observed in the center of the Subject Property.

As discussed in the following text in section 4.2.2 Rondo Elementary School south-southwest of the subject Property was a former dairy. An assessment of that property did not identify methane related to the former dairy's operations. The Department of Toxic Substances Control (DTSC) oversaw the assessment of that property and determined that no issues exist to affect the development of the property into a school. There does not appear that any neighboring properties or the history of the subject Site would draw concern for the presence of methane that would affect the residential development of this Property.

Additionally, during the site reconnaissance, an irrigation well was observed in the northern portion of the Subject Property. The presence of an irrigation well is not considered an environmental concern to the

Subject Property, however, if the well is not going to be used in the future it should be decommissioned in accordance with applicable regulatory requirements before grading activities occur.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property. Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed no recognized environmental conditions (RECs), Controlled RECs (CRECs), or significant data gaps in connection with the Subject Property. No further investigation appears to be warranted at this time.

This assessment has revealed the following items of note in connection with the Subject Property:

- Debris piles with various household debris, used tires, and building demolition waste were also observed in the center of the Subject Property. The discarded building materials should be tested for the presence of asbestos-containing materials (ACMs) before off-site disposal in accordance with applicable federal and local regulations.

- Additionally, during the site reconnaissance, an irrigation well was observed in the northern portion of the Subject Property. The presence of an irrigation well is not considered an environmental concern to the Subject Property, however, if the well is not going to be used in the future it should be decommissioned in accordance with applicable regulatory requirements before grading activities occur.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform AAI into the past ownership and uses of the Subject Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," Designation E1527-21. "All Appropriate Inquiries" is the process for evaluating a property's environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions ("RECs") of the Subject Property.

The ASTM E1527-21 standard indicates that the goal of the Phase I ESA is to identify RECs, as well as historical recognized environmental conditions ("HRECs") and controlled recognized environmental conditions ("CRECs") that may exist at a property. The term "recognized environmental conditions" is defined as:

1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment;

2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or

3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

ASTM defines a "HREC" as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., activity and use limitations or other property use limitations). A HREC is not considered a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The release of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor releases that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER),

defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the Subject Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA was conducted in accordance with our proposal to Warmington Residential dated April 7, 2025. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-21 notes that the availability of record information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. “Reasonably ascertainable” means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property consists of approximately 3.2 acres of land associated with APNs 144-070-016; 144-070-017; 144-070-018; and 144-070-020, located at 7500 Hellman Avenue, northeast of the intersection of Hellman Avenue and Walters Street, Eastvale, Riverside County, California 92880. The Subject Property is currently vacant land. Adjoining properties, as well as the nearby area, include a concrete drainage channel to the north followed by residential structures; residential structures to the east and west; and an elementary school to the south. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

The Subject Property Owner is identified as Eastvale Ventures Inc.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Subject Property.

This report provides an evaluation of selected environmental conditions associated with the Subject Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Subject Property's environmental condition.

Stantec did not obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures, are not guaranteed. Before starting site work, the exact location of all such utilities and structures must be confirmed by the client and the party performing the work, and Stantec assumes no liability resulting from damage to such utilities and structures.

The conclusions are based on the conditions encountered at the Subject Property by Stantec at the time the work was conducted. Accordingly, additional studies and actions may be required.

As the purpose of this report is to identify Subject Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Subject Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Subject Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of Federal, state, provincial or local governmental agencies.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

3.0 USER-PROVIDED INFORMATION

ASTM E1527-21 describe responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Subject Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	The User Questionnaire was completed by Bret Ilich, Project Manager with Warmington Residential, on April 22, 2025. Mr. Ilich was not aware of any environmental concerns associated with the Subject Property.
Environmental Liens or Activity and Use Limitations (AUL)	N/A	No environmental liens and/or activity and use limitations were identified in the Preliminary Title Reports provided by First American Title Company dated February 28, 2025.
Previous Environmental Permits or Reports Provided by User	No	None provided.
Purpose of the Phase I ESA	Yes	The intended use of the Phase I ESA is for redevelopment.

User-provided documents are provided in Appendix C.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Subject Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Subject Property. During the review of historical records, Stantec attempted to identify uses of the Subject Property from the present to the first developed use of the Subject Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Subject Property is provided in the table below with additional details in the following subsections:

Topography:	According to the United States Geologic Survey (USGS) Corona North topographic map provided in the Environmental Data Resources Inc. (EDR) Physical Setting Source Addendum (Appendix D), the topographic gradient in the vicinity of the Subject Property is to the south-southeast and the Subject Property is located at approximately 576 feet above mean sea level (ft. amsl).
Soil/Bedrock Data:	The United States Department of Agriculture – Natural Resources Conservation Service (USDA-NRCS), Web Soil Survey identifies the soils beneath the Subject Property as: • Chino silt loam, with well-drained soil with moderately coarse textures. A typical soil profile is comprised of fine grained silty-clay (0-59 inches).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Site specific groundwater investigations were not conducted during this ESA; however, according to a 2012 groundwater monitoring report for a site located approximately two miles southeast of the Subject Property, groundwater in the vicinity is approximately 23-28 feet below ground surface (bgs) with a flow direction to the south southeast.
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Subject Property Topography and Surface Water Flow

The Subject Property is located at an elevation of approximately 576 ft amsl. Based on the topography and existing surface conditions, general surface water flow is to the south-southeast.

4.1.2 Regional and Subject Property Geology

The Subject Property is located with the Upper Santa Ana Valley Groundwater Basin, Chino Subbasin (8-002.01). The Chino Subbasin is bound by the Rialto-Colton Fault to the east; the Jurupa Mountains to the southeast; the Puente Hills and Chino Fault to the south; the San Jose Fault to the northwest; and the San Gabriel Mountains and Cucamonga Fault to the north. Surface water drains south via San Antonio Creek and Cucamonga Creek towards Santa Ana River. Several of the faults create groundwater barriers which in turn generate changes in ground water elevations throughout the subbasin. Water-bearing formations within the subbasin are Holocene and Upper Pleistocene alluvium. The total groundwater storage capacity in the subbasin is approximately 18,300,000 acre-feet (DWR, 2003).

According to California DOC Earthquake Zone Map (Department of Conservation Map Server (ca.gov)), the Subject Property is not located within an Alquist-Priolo (AP) Earthquake Fault Zone boundary. The nearest fault is located approximately four miles to the west of the Subject Property.

4.1.3 Regional and Subject Property Hydrogeology

The Subject Property is located with the Upper Santa Ana Valley Groundwater Basin, Chino Subbasin (8-002.01). Several faults that lie within the subbasin create groundwater barriers which in turn generate changes in ground water elevations throughout the subbasin. Water-bearing formations within the subbasin are Holocene and Upper Pleistocene alluvium. The total groundwater storage capacity in the subbasin is approximately 18,300,000 acre-feet (DWR, 2003).

Site specific groundwater investigations were not conducted during this ESA; however, according to a 2012 groundwater monitoring report for a site located approximately two miles southeast of the Subject Property, groundwater in the vicinity is approximately 23-28 feet below ground surface (bgs) with a flow direction to the south-southeast.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from EDR, a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Subject Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Subject Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be to the southeast. Observations about the Subject Property and adjoining properties made during the Subject Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Subject Property

The Subject Property is not listed in the EDR databases.

4.2.2 Listings for Adjoining and Nearby Sites with Potential to Impact Subject Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjoining and nearby sites to pose a REC, CREC, or HREC for the Subject Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Subject Property from an adjoining or nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]. ASTM E2600-22 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM, 2022) was used as the basis for a Tier I Vapor Encroachment Screen (VES) for the Subject Property. This included evaluation of release sites within 1/10 mile for Petroleum Hydrocarbon releases, and 1/3 mile for volatile and semi-volatile organic compound (VOC, SVOC), plus other potential vapor phase contaminants (such as mercury).

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Rondo Elementary School Southeast Corner of Hellman Avenue and Walters Street Eastvale, CA 92880	ENVIROSTOR; SCHO	Approximately 226 feet to the south-southwest	No
The site had been used as a dairy operation from approximately 1961 to 2004. The dairy included two residences, milking barn and workshop building, cattle enclosure pens and water troughs. The barn was also used for vehicle maintenance and repairs. A Preliminary Environmental Assessment (PEA) was submitted on April 12, 2017, to the California Department of Toxic Substances Control (DTSC). The PEA investigation activities included lead from lead□]based paints, heavy metals associated with stockpiles suspected to have been stored onsite, total petroleum hydrocarbons (TPH) associated with machinery and/or an underground storage tank (UST) that may have been used at the Site, volatile organic compounds (VOCs) associated with fuels and solvents or septic tanks, organochlorine pesticides (OCPs) associated with past farming and pest control activities, and methane from decay of dairy related organic waste that may pose a threat to human health and the environment. Based on review of the PEA, neither a release of hazardous material nor the presence of a naturally occurring hazardous material, which would pose a threat to public health or the environment under unrestricted land use, was indicated at the Site. Therefore, DTSC concurred with the conclusion of the PEA that further environmental investigation of the Site was not required and approved the PEA. Therefore, this site is not considered a REC to the Subject Property.			

The remaining listings in the database search report, including listings of Orphan Sites provided in Appendix D do not constitute a potential REC for the Subject Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Subject Property use and/or indications of RECs in connection with the Subject Property:

4.3.1 Environmental Health Department

Agency Name Contact Information	Finding
Custodian of Records Riverside County Department of Environmental Health Via online: rivcoeh.org Submitted on April 17, 2025	A written request subject to the Freedom of Information Act (FOIA) was submitted to the Riverside County Department of Environmental Health to review their files regarding the Subject Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Subject Property. On April 18, 2025, the agency responded that they have no records for the Subject Property.

4.3.2 Fire Department

Agency Name Contact Information	Findings
Custodian of Records Riverside County Fire Department Via online: rvcfire.org Date Submitted: April 17, 2025	A written request subject to the FOIA was submitted to the County Fire Department to review their files regarding the Subject Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Subject Property. On April 18, 2025,the agency responded that they have no records for the Subject Property .

4.3.3 City and County Department Records

Agency Name Contact Information	Findings
Custodian of Records City of Eastvale Date Submitted: April 17, 2025	A written request subject to the FOIA was submitted to the City to review their files regarding the Subject Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Subject Property.

Agency Name Contact Information	Findings
	As of the writing of this report, a complete response has not been received from the agency.

4.3.4 State Department Records

Agency Name Contact Information	Finding
Custodian of Records Santa Ana Regional Water Quality Control Board (SARWQCB) Via email: filereview8@waterboards.ca.gov Submitted and accessed on April 17, 2025	Stantec researched Geotracker, the California Regional Water Quality Control Board public database, to evaluate if there are any reported releases at the Subject Property or on adjoining properties. There were no release sites listed for the Subject Property or adjoining properties. Additionally, the SARWQCB responded on April 18, 2025, that they do not have current or historical records for the Subject Property.
Department of Toxic Substances Control (DTSC), Envirostor database Cypress Regional Office Online database: https://www.envirostor.dtsc.ca.gov/public/ Via email: cypressfileroom@dtsc.ca.gov Submitted and accessed on April 17, 2025	Stantec researched Envirostor, the DTSC public database, to evaluate if there are any reported releases at the Subject Property or on adjoining properties. There were no release sites listed for the Subject Property. Additionally, the DTSC responded on April 21, 2025, that they have no current or historical records for the Subject Property.
California Geologic Energy Management (CalGEM) Online database: https://maps.conservation.ca.gov/doggr/wellfinder Accessed: April 17, 2025	The California Department of Conservation Geologic Energy Management Division (CalGEM) database was searched to identify the potential existence of oil and gas production wells within the vicinity of the Subject Property. No oil or gas wells were located within the Subject Property boundaries. The closest well is located approximately ½ mile to the south and is listed as dry plugged hole (API 0406500131). No releases are reported for this well. This well is not expected to represent an environmental concern for the Subject Property.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

No environmental liens and/or activity and use limitations were identified in the Preliminary Title Reports provided by First American Title Company dated February 28, 2025. No other land title records, deeds, environmental liens, and activity and use limitation documentation were provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. Copies of the historical aerial photographs are provided in Appendix E.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1931 1938 1948	1"=500'	The Subject Property appears undeveloped roadways along the western and southern boundaries. Adjoining properties appear to be vacant and agriculturally developed.
1953	1"=500'	The Subject Property remains vacant land. Small structures appear to the southeast, south, and southwest. A river appears approximately 500 feet to the east-southeast.
1967 1975 1985	1"=500'	The Subject Property remains vacant land with a small structure along the southern boundary. This may be the existing cattle pen. A dairy appears to the south. Additional small structures appear to the east and west. Vacant and agricultural land appears to the north and west.
1989 1990 1994	1"=500'	The northern portion of the Subject Property remains vacant land. Small structures likely associated with cattle appear in the southern portion of the Subject Property. The surrounding area appears similar to the previous photographs.
2002	1"=500'	Small structures, storage containers, or trucks appear in the eastern and northern portions of the Subject Property. Additional small buildings appear adjacent to the east. The remaining surrounding area appears similar to the previous photographs.
2006 2009	1=500'	The Subject Property appears similar to the previous photographs. Grading for a large residential development appears to the east and north. The remaining surrounding area appears similar to the previous photograph.
2012 2016	1=500'	The Subject Property appears similar to the previous photographs. Dense residential development appears to the east and north. Grading activities have occurred to the west beyond the roadway.
2020	1=500'	The Subject Property appears similar to the previous photographs. A school appears to the south beyond the roadway. The remaining surrounding area appears similar to the previous photograph.

Aerial photographs source: The EDR Aerial Photo Decade Package

The historical agricultural use of the Subject Property constitutes a REC.

4.4.3 City Directories

Stantec retained a third party to research available city directories for the Subject Property and adjoining and nearby properties, in approximately five-year intervals. Copies of the city directory listings are provided in Appendix E. The Subject Property is listed in the city directory between 1992 and 2020 as Dean Visscher / Visscher Livestock Transportation / Cow Truck Inc. Adjoining properties and properties within the vicinity include primarily residential listings.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Subject Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Subject Property and adjoining and nearby property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Subject Property. The Sanborn® Map Search Report indicating “No Coverage” is presented in Appendix E.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute Topographic Maps of the Corona North and Corona and Vicinity, California Quadrangles (scales 1:24,000 and 1:31,680), the historical USGS 15-minute Topographic Maps of the Corona, California Quadrangles (scale 1:50,000), and the historical USGS 30-minute Topographic Maps of the Corona, California (scale 1:125,000) to help identify past Subject Property and adjoining and nearby property usage and areas of potential environmental concern. Copies of the historical maps are provided in Appendix E.

The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1902	1:125,000	The Subject Property and adjoining properties are not depicted.
1942 1947	1:31,680 1:50,000	The Subject Property and adjoining properties are undeveloped. The county line appears along the western Subject Property boundary. A dirt roadway appears adjacent to the south.
1950/1954 1967 1973	1:24,000 1:24,000 1:24,000	The Subject Property and adjoining properties are undeveloped. Small structures appear to the southeast and southwest. The levee for the Cucamonga Creek appears within ¼ mile to the east-southeast.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1975	1:24,000	
1981	1:24,000	
2012	1:24,000	No site details are depicted. Roadways appear in their current configuration.
2015	1:24,000	
2018	1:24,000	
2022	1:24,000	

Historical topographic maps source: The EDR Historical Topographic Map Report

No RECs were identified in the EDR Historical Topographic Map Report.

4.4.6 Other Historical Sources

No other historical sources were searched as a part of this assessment.

5.0 SITE RECONNAISSANCE

A visit to the Subject Property and its vicinity was conducted by Hiram Romero, Geologic Staff with Stantec, on April 28, 2025. Stantec was unaccompanied during the Subject Property visit. Figure 2 provides information about the Subject Property and adjoining sites and the location of potential areas of environmental concern. Detailed Subject Property features are shown on Figure 2. Photographs collected during the site reconnaissance are included in Appendix A.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Subject Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Subject Property boundary
- Traverse transects across the Subject Property

Weather conditions during the visit to the Subject Property were clear and sunny. There were no weather-related Subject Property access restrictions encountered during the reconnaissance visit. The interior of the residential structure was not accessible during the site reconnaissance.

5.2 GENERAL DESCRIPTION

Subject Property and Area Description:	The Subject Property is located s northeast of the intersection of Hellman Avenue and Walters Street, Eastvale, Riverside County, California 92880. The surrounding area consists of a concrete drainage channel, an elementary school, and residential structures.
Subject Property Operations:	Undeveloped land.
Structures, Roads, Other Improvements:	A locked chain linked fence surrounds the Subject Property.
Subject Property Size (acres):	3.2 acres
Estimated % of Subject Property Covered by Buildings and/or Pavement:	0%
Observed Current Subject Property Use/Operations:	Undeveloped land.

Observed Evidence of Past Subject Property Use(s):	Former cattle pens appear along the southern Subject Property boundary.
Sewage Disposal Method (and age):	Jurupa Community Services District
Potable Water Source:	Jurupa Community Services District
Electric and Natural Gas Utilities:	Southern California Edison and SoCal Gas.

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Subject Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14) with identified uses:	None observed.
Drums/Totes/Intermediate Bulk Containers (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
Polychlorinated biphenyl (PCB)-Containing Equipment:	None observed
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

No structures were present on the Subject Property.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Subject Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	A pool was observed in the southeastern portion of the Subject Property.

Observations	Description
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	Debris piles with various household debris, used tires, and building demolition waste were also observed in the center of the Subject Property
Solid Waste Disposal:	None observed.
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed on the Subject Property.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	Stormwater is expected to infiltrate the soil.
Wells:	An irrigation well appears in the northern portion of the Subject Property.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	A former cattle pen was observed in the southern portion of the Subject Property along Walters Avenue. .

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the presence of ASTs was discovered during this Phase I ESA.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining sites:

NORTH	Concrete drainage channel.
EAST	Residential.
SOUTH	Walters Avenue beyond which is an elementary school.
WEST	Hellman Avenue beyond which are residential structures.

Refer to Figure 2.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining sites providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds, or Lagoons on Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on adjoining sites:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Subject Property and Surrounding Area:	The Subject Property and surrounding area are relatively flat.

6.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

6.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and an inspection was evaluated to determine if RECs are present in connection with the Subject Property. Based on this information, Stantec made the following findings and developed the following opinions.

- Based on review of historical sources including aerial photographs and city directory listings, the Subject Property was formerly utilized for livestock holding and a storage area of the trucks and trailers used in the transportation of livestock. During the site reconnaissance, a former cattle pen was observed in the southern portion of the Subject Property along Walters Avenue. No evidence of dairy operations or agricultural use was observed on the Subject Property.

- An environmental records search was performed and identified sites within their respective ASTM E1527-21 search radii of the Subject Property that may represent RECs, CRECs, HRECs, or de minimis conditions.

  Based on one or more of the following reasons: distance from the Subject Property, position of sites with respect to assumed groundwater flow direction, the type of native soils, and regulatory status, none of the sites identified in the environmental records search report are expected to impact soil or groundwater quality at the Subject Property. The environmental records search identified no RECs, CRECs, HRECs or *de minimis* conditions at or near the Subject Property.

- During the site reconnaissance, an irrigation well was observed in the northern portion of the Subject Property. The presence of an irrigation well is not considered an environmental concern to the Subject Property; however, if the well is not going to be used in the future it should be decommissioned in accordance with applicable regulatory requirements before grading activities occur.

- Debris piles with various household debris, used tires, and building demolition waste were also observed in the center of the Subject Property. The discarded building materials should be tested for the presence of asbestos-containing materials (ACMs) before off-site disposal in accordance with applicable federal and local regulations.

6.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-21 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None.
Weather-Related Restrictions to Site Reconnaissance:	None.
Facility Access Restrictions to Site Reconnaissance:	None.
Other Site Reconnaissance Restrictions:	None.
Data Gaps from Environmental Records Review:	None.
Data Gaps from Historical Records Review:	None.
Data Gaps from Interviews:	Due to the sensitive nature of the transaction no on-site interview was conducted. Given the historical documents, the lack of an on-site interview is not considered to impact the findings of this report.
Other Data Gaps:	None.

6.3 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property. Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed no recognized environmental conditions (RECs), Controlled RECs (CRECs), or significant data gaps in connection with the Subject Property. No further investigation appears to be warranted at this time.

This assessment has revealed the following items of note in connection with the Subject Property:

- Debris piles with various household debris, used tires, and building demolition waste were also observed in the center of the Subject Property. The discarded building materials should be tested for the presence of asbestos-containing materials (ACMs) before off-site disposal in accordance with applicable federal and local regulations.

- Additionally, during the site reconnaissance, an irrigation well was observed in the northern portion of the Subject Property. The presence of an irrigation well is not considered an environmental concern to the Subject Property, however, if the well is not going to be used in the future it should be decommissioned in accordance with applicable regulatory requirements before grading activities occur.

7.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-13 non-scope services were performed as part of this Phase I ESA:

7.1 LEAD-BASED PAINT

Concern for LBP is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows:
  - Maximum risk is from paint applied before 1950.
  - There is severe risk from paint applied before 1960.
  - There is moderate risk from deteriorated paint applied before 1970.
  - There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

Given there are no structures present LBP is not considered an environmental concern.

7.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

The building material debris pile should be tested for asbestos before it is disposed of off-site.

7.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for

radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Property (http://www.epa.gov/radon/zonemap.html).

EPA Radon Zones (w/Average Measured Indoor Radon concentrations)		
Zone 1 – High (>4.0 pCi/L)	Zone 2 – Moderate (2 to 4 pCi/L)	Zone 3 – Low (<2 pCi/L)
	X	
Normally occupied sub grade areas present? (i.e., basement apartments, offices, stores, etc.)		
No subgrade areas currently present at the Property.		

The Subject Property is located in Zone 2 and is considered to have a moderate potential for radon. To determine Subject Property-specific radon levels, a radon survey would have to be conducted. However, because the Subject Property does not have any occupied subgrade areas and is planned for redevelopment, further investigation of indoor radon issues does not appear to be warranted.

7.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the eastern border (adjoining the Santa Ana River) of the Subject Property is located within a 0.2% Annual Chance Flood Hazard Zone.

APPENDIX B
STANTEC RESUMES

Alicia Jansen CAC, LRCIA

Senior Scientist
21 years of experience

Alicia is a Senior Scientist with over twenty years of experience in Phase I and II Environmental Assessments, with strong emphasis in water quality and environmental research. Alicia has managed the preparation of environmental documents, training programs, and environmental compliance during large scale environmental monitoring projects. Alicia's environmental consulting experience includes performing asbestos and lead-based paint surveys, oversight of contractors during asbestos abatement, hazardous materials surveys, and Phase I Environmental Site Assessments (ESAs) in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-21 and the Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16.

PROJECT EXPERIENCE

HEALTH, SAFETY & INDUSTRIAL HYGIENE

Cochise County, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Arizona | Field Lead and Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple vacant structures including schools, multi-tenant apartment buildings, and commercial structures. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Field Lead | Dates involved: 2020-2022

Confidential Health Care Company, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | Staff

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple occupied hospitals and office spaces. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Field Lead | Dates involved: 2013-2020

State of California General Services, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | 2009 | Technical Support

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple communication towers in remote areas. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Technical Support | Cost: Unknown | Dates involved: 10/2009-10/2009

Indoor Air Quality Assessments* | San Jose, California | 2002-2005 | Staff

Alicia performed site inspections, interviews, and collected air samples to be analyzed for various air pollutants and molds including formaldehyde, penicillium, aspergillus, cladosporium, and stachybotry. She prepared reports summarizing findings and made recommendations.

Veteran's Administration of Puget Sound, Asbestos and Lead-Based Paint Survey | Seattle, Washington | 2009 | Project Scientist

Alicia served as the Project Scientist responsible for hazardous building material assessments, specifically asbestos and lead-based paint. These services were required as part of the pre-design tasks for this project. Over 300 samples were collected over the span of four days culminating in a final hazardous building materials report to be incorporated into the facility design as well as demolition activities once the construction phase of the

** denotes projects completed with other firms*

project commences.

Interim Remedial Action, Indoor Air Sampling, and Sub-Slab Soil Gas Sampling | Sunnyvale, California | 2004–2014 | Task Manager and Field Support

Alicia conducted an indoor air sampling survey using air sampling pumps, dosimeter badges, and flame ionization detector (FID) during a sump excavation. She performs semi-annual sub-slab soil vapor sampling and indoor air quality surveys using summa canisters. She assists with the preparation and submittal of reports summarizing the findings and provides recommendations to the local regulatory agency. Role: Indoor Air Sampling Survey | Cost: Unknown | Dates involved: 09/2004-09/2014

Lead Dust Assessment and Abatement Oversight | Fremont, California | 2009 | Technical Support

Alicia assisted with the evaluation of lead dust in an industrial facility. A total of 307 dust wipe samples were collected in order to evaluate the potential presence of lead dust throughout the two-story, 500,000 square foot manufacturing building. Role: Technical Support | Cost: Unknown | Dates involved: 01/2009-03/2009

Former Tesoro Coke Facility, Asbestos, Lead-Based Paint Survey | Pittsburg, California | Technical Support

Alicia assisted with an asbestos and lead paint survey of 20 structures at the facility ultimately scheduled for demolition. More than 200 samples were collected over the span of two days. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Technical Support | Cost: Unknown | Dates involved: 04/2009-04/2009

State of California General Services, Asbestos and Lead-Based Paint Survey | Southern California | 2014-2019 | Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos and lead-based paint at multiple bridges, maintenance stations, and roadways throughout Southern California. The scope of work involved sample collection for asbestos and lead-based paint that would require special handling and disposal. She assisted with the review and approval of reports summarizing findings. Role: Certified Asbestos Consultant | Cost: Unknown | Dates involved: 9/2014-10/2019

Confidential Client, Asbestos and Lead-Based Paint Survey | Multiple Sites, California | Task Manager and Certified Asbestos Consultant

Alicia conducts pre-demolition asbestos and lead paint surveys of structures ultimately scheduled for demolition. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Task Manager and Certified Asbestos Consultant| Dates involved: 2006 - present

PERMITTING, COMPLIANCE, AUDITING

Tesoro Refinery, Initial Study* | Benicia, California | 2005 | Staff

Alicia assisted with the background research and preparation of applicant-prepared initial study for the upgrade of a refinery.

Transmission Line Upgrade* | San Mateo to San Francisco, California | 2005 | Environmental Research and Compliance Staff

Alicia supported the environmental compliance program for the construction of a 27-mile 230 kV underground and overhead transmission line. She assisted with the preparation and submittal of variance requests, extra work space requests, and daily and weekly reports for submittal to the California Public Utilities Commission. She also conducted research and assisted with training and report preparation.

REMEDIAL INVESTIGATIONS & ASSESSMENTS

California Department of Transportation Portfolio | Multiple Sites, Northern California and Southern California, California | 2008-2019 | Task Lead Manager

Alicia prepared quarterly groundwater monitoring reports, subsurface investigation reports, sensitive receptor surveys, and preferential pathway studies for various California Department of Transportation locations throughout Northern California. She assisted with the utility locating, work plan preparation, field coordination, archived data onto the State Water Resource Control Board's (RWQCB) Geotracker electronic filing system. Alicia currently conducts site inspections for asbestos, lead-based paint, and hazardous materials for bridges, salt barns, and maintenance buildings associated with California Department of Transportation locations throughout Southern California. The scope of work involves sample collection for asbestos and lead-based paint that would require special handling and disposal. She assists with the preparation of reports summarizing findings. Role: Task Lead Manager | Cost: Unknown | Dates involved: 06/2008-02/2019

Soil Gas Sampling and Human Health Risk Assessment | San Jose, California | 2014 | Project Lead

Alicia performed a soil vapor survey in conformance with the DTSC Advisory Active Soil Gas Investigations, using soil vapor sampling devices and a mobile laboratory for onsite chemical analysis. She also assisted with the report preparation summarizing the findings and providing recommendations for further assessment. Role: Task Lead Manager | Cost: Unknown | Dates involved: 2014

Confidential Clients, Phase I Environmental Site Assessments | Multiple Sites, California, Arizona, New Mexico, Texas, Virginia | Task Manager

Alicia performs Phase I Environmental Site Assessments for multiple confidential clients in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13; ASTM E 1527-21; and Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16 to achieve compliance with requirements of the "All Appropriate Inquiries" rule required to obtain protection from liability under the federal Comprehensive Environmental Response, Cleanup and Liability Act (CERCLA). Previous sites include large industrial warehouses, multi-tenant

commercial buildings, large lots of vacant land, and residential properties. She reviews topographic maps, Sanborn Fire Insurance Maps, and files at local regulatory agencies. She interviews present and former property owners and performed site and adjacent property reconnaissance. She prepares reports summarizing the findings and provides recommendations for further assessment if applicable. Role: Task Lead Manager | Cost: $3,000-8,000 per report. | Dates involved: 2006-present

Goodyear Portfolio | California and Hawaii | 2005–2020 | Project Lead

Alicia performed Phase I Environmental Site Assessments (ESA) and Phase II Site Assessments for various Goodyear Tire & Rubber Company locations throughout California and Hawaii. She assisted with the installation of monitoring wells and exploratory borings; underground storage tank removals; site restoration; product removal with passive recovery system; archived data onto the State Water Resource Control Board's Geotracker electronic filing system; and assisted with the preparation of quarterly groundwater monitoring reports, sensitive receptor surveys, site conceptual models, and subsurface investigation reports. Approximately 250 Sites • Cost: $8,000 per site.

Jenny Alvarado

Project Biologist
9 years of experience

A wildlife biologist who specializes in the avian and botanical fields, Jenny performs threatened and endangered species surveys, protocol nesting bird surveys, biological resource assessments, habitat characterization surveys, and restoration monitoring across Southern California. Jenny has prepared permit applications for CDFG Streambed Alteration Agreements (CDFG Section 1600), Regional Water Quality Control Board Water Quality Certifications (Clean Water Act Section 401), and U.S. Army Corps of Engineers Permits (Clean Water Act Section 404). Jenny is also experienced with California Environmental Quality Act and National Environmental Policy Act compliance. Although her background is mainly avian biology, she has experience identifying mammals, reptiles, and aquatic species. She performs compliance monitoring for a wide array of clients, including Southern California Gas Company, Plains All American Pipeline, and Caltrans. She assists in preparing Initial Studies, Mitigated Negative Declarations, Environmental Assessments, and Environmental Impact Reports for a variety of land uses. Additionally, she has experience assisting with asbestos and lead building surveys in California and Hawaii.

EDUCATION

Ecology, Zoology, Ornithology, Santa Barbra City College, Santa Barbara, California, 2011

BA, Physical Anthropology, University of California, Santa Barbra, Santa Barbara, California, 2008

AA, Liberal Arts, Ventura College, Ventura, California, 2005

CERTIFICATIONS & TRAINING

Asbestos Building Inspector Initial, Natec International, Inc., Thousand Oaks, California, 2016

Asbestos 40-Hr Contractor/Supervisor, Natec International, Inc., Thousand Oaks, California, 2016

CPR and First Aid Certification, American Red Cross, Port Hueneme, California, 2015

California Plant Family Identification Workshop, California Native Plant Society, Ojai, California, 2015

40-Hr HAZWOPER, OSHA, Temecula, California, 2015

Desert Tortoise Field Techniques Workshop, Desert Tortoise Council, Ridgecrest, California, 2014

Metrolink Contractor Safety Railroad Training, Metrolink, Pico Rivera, California, 2014

10-Hr Industrial Safety Training, OSHA, Ventura, California, 2014

REGISTRATIONS

Certified Erosion, Sediment and Storm Water Inspector #1586, Certified Inspector of Sediment and Erosion Control

Certified Erosion, Sediment and Storm Water Inspector #1586, CISEC, Inc., 6/30/2018

PROJECT EXPERIENCE

WILDLIFE BIOLOGY

Los Angeles County Beaches and Harbors Beach Berm Construction* | Los Angeles County, California | Snowy Plover Monitor

Jenny conducted snowy plover monitoring on five Los Angeles County beaches during berm construction and deconstruction. Daily monitoring reports were submitted to the County.

United Water District, Least Tern Surveys* | United Water Conservation District | Saticoy, California | Biologist

Jenny conducted weekly least tern surveys over two nesting seasons at the United Water facility. She drafted the final results report for the District.

McGrath State Beach Tidewater Goby and Water Quality Monitoring* | California Department of Fish and Wildlife | Ventura, California | Biologist

Jenny conducted daily tidewater goby sein netting surveys and relocation for an emergency construction project in the Santa Clara River estuary. She also performed daily water quality sampling and invasive species removal.

Ormond Beach Snowy Plover and Least Tern Surveys* | California Department of Fish and Wildlife | Ventura, California | Biologist

Jenny conducted protocol nesting bird surveys for the snowy plover and least tern within protected enclosures. Nesting behaviors, nest location, and young were tracked, documented and monitored throughout the nesting season.

California State University Channel Islands, Least Bell's Vireo Surveys* | California State University Channel Islands | Camarillo, California | Biologist

Jenny conducted least Bell's vireo surveys on the CSUCI campus for one nesting season, and assisted in preparation of final reporting.

** denotes projects completed with other firms*

Special-Status Species Surveys* | Recurrent Energy | Kern County, California | Biologist

Jenny conducted desert tortoise, burrowing owl and kit fox surveys for several solar projects across Kern County.

Stantec Architecture, FedEx Construction Site Burrowing Owl Survey | Bloomington, California | Biologist

Jenny performed a pre-construction special status species survey as well as burrowing owl presence/absence surveys in support of a proposed expansion project at a FedEx Ground facility. While conducting the survey, Jenny observed one burrowing owl within the proposed project area and helped coordinate additional protocol surveys in accordance with the project's mitigation requirements.

Luis Oasis Senior Center, Biological Constraints Analysis | Orcutt, California | Biologist

Jenny performed a field reconnaissance survey to document existing site conditions, the potential for sensitive biological resources, and took an inventory of protected native trees. Jenny also drafted the Biological Constraints Analysis Report for the project.

Town Building and Development, ISBA | Ventura County, California | Biologist

Jenny performed a field reconnaissance survey and prepared an ISBA to document existing habitat conditions and the potential for sensitive biological resources in accordance with County of Ventura ISBA requirements.

Algonquin Power, SKIC 10 Solar Project San Joaquin Kit Fox, Burrowing Owl, Nesting Bird and Wildlife Clearance Surveys | Bakersfield, California | Biologist

Jenny performed San Joaquin kit fox, burrowing owl, nesting bird, and wildlife clearance surveys prior to project construction.

Comstock Homes, Burrowing Owl Surveys | Camarillo, California | Biologist

Jenny prepared a proposal and conducted burrowing owl presence/absence surveys for a residential development project in Camarillo. She also concurrently performed a nesting bird survey of the project area and prepared a report of the results.

ENVIRONMENTAL MONITORING

Pipeline Safety Enhancement Plan* | Southern California Gas Company | Ventura and Los Angeles Counties, California | Lead Environmental Monitor

Jenny conducted environmental monitoring for several gas pipeline replacement projects. She monitored biological resources, storm water and air quality, hazardous waste control, and cultural and archaeological resources, as well as performing water and polychlorinated biphenyl sampling. She also conducted pre-construction surveys, prepared project reports, and compliance monitoring documents.

Caltrans Bridge Replacement Project* | Santa Barbara, California | Biologist

Jenny conducted the biological monitoring for two bridge replacements that required monitoring stream diversion installation and removal. She performed aquatic species surveys, nesting bird surveys, and water diversion as well as general construction compliance monitoring.

Biological Monitoring, Line 63 Pipeline Replacement Project | Plains All American Pipeline Company | Castaic, California | Biologist

Jenny conducted biological and restoration monitoring of a petroleum pipeline replacement within the Angeles National Forest. She conducted sensitive species clearance surveys prior to daily construction activities and monitored habitat restoration and Best Management Practices (BMP) installation.

Plains All American Pipeline Drilling Project | Posey Canyon, Angeles National Forest, California | Biologist

Jenny provided biological resource monitoring, and nesting bird and wildlife surveys for a drilling project in the Angeles National Forest.

Riparian Habitat Assessment, Line 63 Replacement Project | Plains All American Pipeline Company (PAALP) | Santa Clara River, Los Angeles County, California | Biologist

Jenny was approved by CDFW as a qualified biological monitor and conducted environmental compliance monitoring for installation of a pipeline through the Santa Clara River via Horizontal Directional Drilling (HDD). During monitoring of construction activities Jenny also surveyed for potential frac- out during HDD operations.

Carpinteria Sanitary District, Carpinteria Creek Aquatic Species Surveys and Horizontal Direction Drilling (HDD) Monitoring | Carpinteria, California | Biologist

Jenny conducted pre-construction aquatic surveys within Carpinteria Creek for red-legged frog, southwestern pond turtle, tidewater goby, and two-striped garter snake. She also provided biological construction monitoring during HDD construction activities within the creek. Jenny detected a frac-out and was able to prevent any frac-out material from entering Carpinteria Creek by promptly alerting project personnel.

Phillips 66 Pipeline Biological Monitoring Project | Phillip 66 Pipeline LLC | Arroyo Grande, California | Biologist

Jenny conducted environmental compliance monitoring for a 5.6 mile pipeline project that crossed the Arroyo Grande Creek and an additional tributary. The project entailed dewatering a 70- foot section of creek and replacing a portion of pipeline underneath. Jenny also conducted SWPPP inspections for the entire project.

** denotes projects completed with other firms*

STREAM/RIVER RESTORATION

California State University Channel Islands, Restoration Monitoring* | Camarillo, California | Biologist

Jenny conducted quarterly and annual qualitative and quantitative monitoring for a creek restoration site on CSUCI campus. She also prepared quarterly status memos and annual restoration monitoring reports in accordance with agency requirements.

Restoration Monitoring* | City of Santa Barbara | Santa Barbara, California | Biologist

Jenny performed quarterly and annual qualitative and quantitative monitoring for two bridge projects over Mission Creek. She prepared annual restoration monitoring reports in accordance with agency requirements.

BOTANICAL SURVEYS

California State University Channel Islands, Vegetation Mapping* | California State University Channel Islands | Camarillo, California | Biologist

Jenny conducted vegetation habitat mapping on CSUCI campus and prepared survey results reports.

Oak Tree Inventory and Vegetation Mapping* | Confidential | Castaic, California | Biologist

Jenny conducted oak tree inventories for several hundred trees and prepared vegetation habitat maps for three adjacent parcels.

High Speed Rail Special-Status Floral Surveys* | Tehachapi, California | Biologist

Jenny conducted focused, rare plant surveys for a portion of a high-speed rail project through Tehachapi.

NATURAL RESOURCE DAMAGE ASSESSMENT AND OIL SPILL RESPONSE

Habitat Restoration Monitoring, Refugio Oil Spill | Plains All American Pipeline Company | Goleta, California | Biologist

Jenny conducted restoration monitoring and assisted with habitat assessments at multiple sites along the California coast following spill cleanup response efforts.

ASBESTOS, LEAD BASED PAINT, AND HAZARDOUS MATERIAL (MERCURY, PCB) ASSESSMENTS

Asbestos and Lead Surveys | Hawaii | Environmental Scientist

Jenny assisted with asbestos and lead surveys for several multi-story buildings for a confidential client. The surveys included exterior and interior sampling, mapping, and reporting. Additionally, inventories of hazardous materials were taken, including potential mercury and PCB-containing materials.

Asbestos and Lead Surveys | Westlake and Thousand Oaks, California | Environmental Scientist

Jenny assisted with asbestos and lead surveys for several shopping centers for a confidential client. The surveys included exterior and interior sampling, mapping, and reporting. Additionally, inventories of hazardous materials were taken, including potential mercury and PCB-containing materials.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California Issued 1985, Expires 2011

Professional Geologist #4066, State of California Issued 1985, Expires 2011

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.
