12.13.1 A/E shall maintain an automobile liability policy as to ownership, maintenance and use, including loading and unloading, of all owned, non-owned, leased or hired vehicles with limits of not less than:

Bodily Injury, including Death & Property Damage and Liability:	$1,000,000.00 Combined Single Limit Each Accident Limit Each Accident

The insurance company shall waive its rights of subrogation against the Indemnitees.

12.14 Worker's Compensation and Employer's Liability Insurance

12.14.1 A/E shall maintain worker's compensation and employer's liability insurance coverage during the terms of this Agreement for all employees engaged in the services performed under this Agreement, in accordance with the laws of the State of Florida. The insurance company shall waive its rights of subrogation against the Indemnitees. The amount of such insurance shall not be less than:

Worker's Compensation:	Florida Statutory Requirements	
Employer's Liability:	$500,000.00	Limit Each Accident
	$500,000.00	Limit Disease Aggregate
	$500,000.00	Limit Disease Each Employee

12.15 Umbrella Liability Insurance or Excess Liability Insurance

12.15.1 A/E shall obtain an umbrella liability insurance or excess liability insurance policy for not less than $3,000,000.00 each occurrence and aggregate. Such coverage shall be excess of the Employers Liability, Commercial General Liability and Automobile Liability coverages required herein and shall include all coverages on a "following form" basis. Coverage shall drop down as primary on the exhaustion of any aggregate limit. The aggregate limits shall apply separately to this Project, and the specific Project aggregate limits shall be evidenced by the use of an endorsement approved by Owner. The insurance company shall waive its rights of subrogation against the Indemnitees.

ARTICLE 13
CLAIMS AND DISPUTES

13.1 Claims and Disputes

13.1.1 This Agreement shall be governed by the laws, rules, and regulations of the State of Florida, without regard to its choice of law provisions.

13.1.2 The term "**Claim**" as used herein shall mean any and all demands made by one party hereunder against the other party, whether such demand be for money, time or the assertion of any right or obligation that arises out of the Contract Documents.

13.1.3 A/E shall provide notice of any Claim in writing to Owner within seven (7) calendar days after the first day of the event giving rise to such Claim or else A/E shall be deemed to have waived the Claim. Written supporting data shall be submitted to Owner within thirty (30) calendar days after the occurrence of the event, unless Owner grants additional time in writing, or else A/E shall be deemed to have waived the Claim.

13.1.4 A/E shall proceed diligently with its performance of services as directed by Owner, regardless of any pending Claim, unless otherwise agreed to by Owner in writing. Owner shall continue to make payments of undisputed amounts due in accordance with this Agreement during the pendency of any Claim.

13.1.5 Prior to the initiation of any action or proceeding permitted by this Agreement to resolve disputes between the parties, the parties shall make a good faith effort to resolve any such disputes by negotiation between representatives with decision-making power. The negotiation shall be attended by representatives of A/E with full decision-making authority and by Owner representatives who would make the presentation of any settlement reached during negotiations to the School Board of Manatee County. Failing resolution, and prior to the commencement of any litigation between the parties with respect to the Project, the parties shall attempt to resolve the dispute through mediation before an agreed-upon Circuit Court Mediator certified by the State of Florida. The mediation shall be attended by representatives of A/E with full decision-making authority and by Owner representatives who would make the presentation of any settlement reached during mediation to the School Board of Manatee County. Should either party fail to submit to mediation as required hereunder, the other party may request a court of law to order mediation under Section 44.102, *Florida Statutes*.

13.2 Litigation

13.2.1 Any litigation between Owner A/E, whether arising out of any Claim, services provided by the A/E on the Project or arising out of the Agreement or any breach thereof, shall be

brought, maintained and pursued only in the appropriate State courts of the State of Florida; and Owner and A/E each hereby waive and renounce any and all rights and options which they, or either of them, have or might have to bring or maintain any such litigation or action in the Federal Court system of the United States or in any United States Federal District Court. The exclusive venue of any such litigation between Owner and A/E shall lie and be only in the appropriate State courts of the State of Florida's Twelfth Judicial Circuit in and for Manatee County, Florida. A/E consents and submits to the jurisdiction of any such court and agrees to accept service of process in any matter to be submitted to any such court.

13.2.2 In the event of any Claim or dispute arising out of the Agreement or the services provided by A/E on the Project, the prevailing party shall be entitled to recover from the non-prevailing party its costs, including reasonable attorneys' fees (including fees for determining the amount of fees due) at all levels, including at trial, on appeal, and in bankruptcy and post-judgment proceedings.

ARTICLE 14
INDEMNIFICATION

14.1 Indemnification

14.1.1 To the maximum extent permitted by applicable law, A/E shall defend, indemnify and hold harmless The School Board of Manatee County, its agents, employees, officers and Board Members ("**Indemnitees**") from and against any and all liabilities, damages, losses, expenses and costs, including reasonable attorneys' fees and costs, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of A/E or anyone employed or utilized by A/E in the performance of this Agreement including A/E's Consultants. This indemnification obligation shall not be construed to negate, abridge or reduce any other rights or remedies which otherwise may be available to an indemnified party or person described within this Agreement. A/E's indemnification obligations under this Agreement, including those specified herein, shall be deemed part of the Project Specifications and to fully comply with Section 725.08, *Florida Statutes*, including any amendments thereto, in all respects. If any word, clause or provision of any of the indemnification provisions of this Agreement is determined not to comply with Section 725.08, *Florida Statutes*, including any amendments thereto, it shall be stricken and the remaining words, clauses and provisions shall remain in full force and effect. It is the intent of the parties that A/E's indemnification obligations comply fully with Section 725.08, *Florida Statutes*, including any amendments, in all respects. A/E's indemnification obligations in this Agreement are in addition to and not in lieu of any common law indemnification to which any of the Indemnitees are entitled.

14.1.2 The duty of A/E to indemnify and hold harmless the Indemnitees includes the separate and independent duty to defend the Indemnitees, which duty arises immediately upon receipt by A/E of the tender of any indemnity claim from an Indemnitee which under the written content of the claimant's description of its claim reasonably appears to be within A/E's indemnification obligation. A/E's obligation to defend the Indemnitee(s) shall be at A/E's sole expense. A/E shall respond within fifteen (15) calendar days to the tender of any indemnity claim for defense and/or indemnity by an Indemnitee, unless the Indemnitee agrees in writing to an extension of this time. The defense provided to the Indemnitees by A/E shall be by well qualified, adequately insured and experienced legal counsel acceptable to Owner. By proceeding to defend an indemnity claim, A/E shall not be deemed to have

admitted to an obligation to provide indemnification and defense and A/E may provide a defense under a written reservation of rights.

ARTICLE 15
SPECIAL PROVISIONS

15.1 Successors and Assigns

15.1.1 The Owner and the A/E each binds itself, its partners, successors, assigns and legal representatives to the other party to this Agreement and to the partners, successors, assigns and legal representatives of such other party in respect of all covenants of the Agreement. Neither the Owner nor the A/E shall assign, sublet or transfer its interest in this Agreement without the written consent of the other. Any attempted assignment in violation of this prohibition is void.

15.2 Public Entity Crime Information Statement

15.2.1 By its execution of this Agreement, A/E acknowledges that it has been informed by Owner of the terms of Section 287.133(2)(a), *Florida Statutes*, which reads as follows:

A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in s. 287.017 for CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list.

A/E must notify Owner within thirty (30) days after a conviction of a public entity crime applicable to A/E or to an affiliate of A/E.

15.3 Truth-In-Negotiation

15.3.1 In compliance with the Consultants' Competitive Negotiation Action, Section 287.055, *Florida Statutes*, by signing this Agreement, the A/E certifies that wage rates and other factual unit costs supporting the compensation to be paid under this Agreement are accurate, complete and current as of the date of this Agreement. It is further agreed that the original contract price and any additions thereto shall be adjusted to exclude any significant sums by which it is determined the contract prices was increased due to inaccurate, incomplete or non-current wage rates and other factual unit costs. All such contract adjustments shall be made within one (1) year following the end of the Agreement.

15.4 Compliance with Jessica Lundsford Act

15.4.1 The School District of Manatee County and State of Florida, requires all A/Es, CMs, contractors and subcontractors to comply with the Jessica Lunsford Act (JLA) which consists of a level II background screening via fingerprinting. Vendors, individuals or entities under contract with the School Board of Manatee County required to go on school grounds when students are present, must comply with the requirements of the law and agree

to indemnify and hold harmless Owner for any claims made against Owner related to the failure to comply with Section 1012.465 and Section 1012.32, *Florida Statutes*. Information on JLA requirements and how to comply can be accessed at: https://www.manateeschools.net/Page/6689.

15.5 Sovereign Immunity

15.5.1 The parties acknowledge and agree that the School Board of Manatee County, Florida, as an agency of the State of Florida, is a sovereign entity that is by law immune from suit except to the extent specified in Section 768.28, *Florida Statutes*. No provision of the Agreement shall constitute, or be interpreted as, a waiver of sovereign immunity, and all defenses relative to sovereign immunity shall be preserved.

15.6 Public Records

15.6.1 Custodian of Public Records

IF THE A/E HAS QUESTIONS REGARDING THE APPLICABILITY OF CHAPTER 119, FLORIDA STATUTES, TO THE A/E'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS: PUBLIC RECORDS CUSTODIAN, 215 MANATEE AVENUE W., BRADENTON, FL 34205 (941) 708-8770, publicrecords@manateeschools.net.

15.6.2 The A/E must comply with public records law and specifically:

15.6.2.1 Keep and maintain public records required by Owner to perform the service.

15.6.2.2 Upon request from Owner's custodian of public records, provide Owner with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that complies with Chapter 119, *Florida Statutes*, or as otherwise provided by law.

15.6.2.3 Ensure that public records in the A/E's possession that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the Owner.

15.6.2.4 Upon completion of the Agreement, transfer, at no cost, to the Owner all public records in possession of the A/E or keep and maintain public records required by the Owner to perform the service. If the A/E transfers all public records to the Owner upon completion of the Agreement, A/E shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the A/E keeps and maintains public records upon completion of the Agreement, the A/E shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to

the Owner, upon request from the Owner's custodian of public records, in a format that is compatible with the information technology systems of the Owner.

15.7 Equal Employment Opportunity / Non-Discrimination

15.7.1 In performing all services to be provided hereunder, A/E shall not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. A/E shall take affirmative action to ensure that applicants for employment are employed, and that employees are treated during employment, without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: (1) employment, upgrading, demotion or transfer; (2) recruitment or recruitment advertising; (3) layoff or termination; (4) rates of pay or other forms of compensation; and (5) selection for training, including apprenticeship. A/E shall post in conspicuous places, available to all employees and applicants for employment notices setting forth the terms of this Equal Employment Opportunity/ Non-Discrimination Clause and stating that all qualified candidates will receive consideration for employment without regard to race, color, religion, sex, or national origin.

15.7.2 Consistent with Section 287.134, *Florida Statutes*, A/E or its affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to provide any goods or services to Owner; may not submit a bid, proposal, or reply on a contract with Owner for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to Owner; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with Owner; and may not transact business with Owner.

15.8 Prohibition Against Contingent Fees

15.8.1 The A/E warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for the A/E to solicit or secure this Agreement and that it has not paid or agreed to pay any person, company, corporation, individual or firm other than a bona fide employee working solely for the A/E any fee, commission, percentage, gift, or any other consideration contingent upon or resulting from the award or making of this Agreement. For the breach or violation of this provision, the Owner shall have the right to terminate this Agreement without liability and, at its discretion, to deduct from the Basic Services Compensation, or otherwise recover, the full amount of such fee, commission, percentage, gift, or consideration.

15.9 Conflict of Interest

15.9.1 A/E represents that it presently has no interest and shall acquire no interest, either direct or indirect, which would conflict in any manner with the performance of services required hereunder. A/E further represents that no persons having any such interest shall be employed to perform those services.

15.10 No Waiver

15.10.1 The failure of Owner to enforce at any time or for any period of time any one or more of the provisions of the Agreement shall not be construed to be and shall not be a waiver of any such provision or provisions or of its right thereafter to enforce each and every such provision. The failure of Owner to insist, in any one or more instances, upon the

performance of any of the terms, covenants or conditions of the Agreement, or to exercise any right herein, shall not be construed as a waiver or relinquishment of such term, covenant, condition or right as respects further performance. Waiver by Owner of a breach of any provision of the Agreement shall not be deemed to be a waiver of any other breach and shall not be construed to be a modification of the terms of the Agreement. No approval, consent or waiver by Owner shall be effective unless it is in writing and then only to the extent specifically stated.

15.11 Severability

15.11.1 Should any provision of the Agreement be determined to be unenforceable, such a determination shall not affect the validity or enforceability of any other section or part thereof.

15.12 Notices

15.12.1 All notices, consents, or approvals required or permitted to be given under the terms of the Agreement shall be in writing and shall be sent by: (1) FedEx or other nationally recognized overnight air courier service, postage prepaid, for next business day delivery, or (2) by email correspondence to the respective parties set forth below in this section, as applicable. Notice given in accordance with this Section shall be effective on the date of email transmission or upon the first business day after having been delivered to a nationally recognized overnight air courier service, such as FedEx, for "next business day" delivery in each case addressed to the respective party at the address for notice specified in this Section below.

15.12.2 Notices, consents or approvals required or permitted to be given to Owner shall be delivered to Owner at:

Project Director
Jeffery Medwetz
Department of Construction Services
1 Matzke Way, Bradenton, FL 34208
Attention: Jeff Medwetz
Email: MedwetzJ@manateeschools.net

15.12.3 Notices, consents or approvals required or permitted to be given to A/E shall be delivered to A/E at:

Todd Willsie
Wannemacher Jensen Architects
29 West Orange Street, Tarpon Springs, FL 34689
Attention: Todd Willsie
Email: todd@wjarc.com

15.12.4 Either party may change its above noted address by giving written notice to the other party in accordance with the requirements of this Section.

IN WITNESS WHEREOF, the parties have executed this Agreement on the date(s) indicated below.

- Add to Project Description

  The scope of work includes, but is not limited to:

  - New Building Construction
  - Replace Roof Systems
  - Replace mechanical systems and associated piping
  - Replace plumbing systems and associated piping
  - Building envelope improvements including window, door, and insulation systems
  - Improve Technology infrastructure
  - Improve Campus Safety/Security
  - Replace Life Safety Systems including fire alarm
  - Site improvements including storm water
  - Improve on-site traffic queuing

AGENDA ITEM NO. 8.32

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval of Blackburn Elementary School - Addition and Renovation - Agreement Between Owner and A.D. Morgan - Preconstruction Services, in the Amount of $850,000.00

Executive Summary
The purpose of the requested action is to approve the Agreement between Owner and A.D. Morgan. This agreement authorizes the pre-construction services at Blackburn Elementary School. The scope of work will include but is not limited to the replacement of Building 1 and the removal of Building 6. Complete renovations of the existing campus will include the replacement of roof, mechanical, and plumbing systems. Building envelope improvements include window, door, and insulation systems. Campus Safety/Security improvements include fire alarms, site improvements, and on-site traffic queuing.

Blackburn Elementary School Addition and Renovation Summary Sheet is attached for reference.

This project is included in the Educational Plant Survey.

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Financial Transparency & Capital Planning | Goal 2
Build and maintain district facilities to provide the best quality education and services to our students, staff and community.

Recommendation
The Superintendent recommends approval of Blackburn Elementary School - Addition and Renovation - Agreement between Owner and A.D. Morgan - Preconstruction Services, in the amount of $850,000.00.

Financial Impact
The construction management fee for preconstruction services is not to exceed $850,000.00. A Guaranteed Maximum Price Proposal will be completed after the construction documents are developed. **The project is funded by Capital Outlay funds.**

AGREEMENT BETWEEN OWNER AND CONSTRUCTION MANAGER

THIS AGREEMENT is made this 29th day of June in the year 2022 by and between the SCHOOL BOARD OF MANATEE COUNTY, FLORIDA ("**Owner**") and the A.D. Morgan, 716 N. Renellie Drive , Tampa, FL, 33609, **Federal Tax ID Number 59-2933439, General Contractor License Number GCG 044502** ("**Construction Manager**" or "**CM**"), for CM to perform all work in connection with the management and construction of **a partial building replacement and complete renovation of the existing campus** (the "**Work**"), located at **Blackburn Elementary School** (the **"Project"**), said Work being set forth in the plans and specifications prepared by **Wannemacher Jensen Architects,** the Architect and/or Engineer of Record ("**A/E**"), and all other Contract Documents hereafter specified. The Owner and the CM, for the consideration set forth herein, agree as set forth below:

ARTICLE 1
RELATIONSHIP OF PARTIES, EXTENT OF THE AGREEMENT AND DEFINITIONS

1.1 Relationship of Parties

1.1.1 The Construction Team

1.1.1.1 The CM, the Owner and the A/E comprise the Construction Team and shall work together throughout the entire Construction Management at Risk delivery process.

1.1.1.2 The A/E shall provide leadership to the Construction Team on all matters relating to design.

1.1.1.3 The CM shall provide leadership to the Construction Team on all matters relating to construction.

1.1.2 The CM

1.1.2.1 The CM accepts the relationship of trust and confidence established by this Agreement. CM agrees to cooperate with A/E; to utilize CM's best skill, efforts and judgment in furthering the interest of Owner; to furnish efficient business administration and supervision; to furnish at all times an adequate supply of workers and materials; and to perform the Work in the best way and the most expeditious and economical manner, consistent with the interests of Owner.

1.1.2.2 CM acknowledges that: (1) it has represented to Owner that it has specific expertise in the planning, management and construction of school facilities, and (2) that such representation is a material inducement to Owner to enter into the Agreement.

1.1.2.3 CM shall be acting as an independent contractor at all times during the performance of the Work and no provision in the Agreement shall create an employment or agent relationship between the parties.

1.1.2.4 CM represents and warrants that it is authorized to do business in Florida where the Project is located and is properly licensed by all necessary

governmental and public and quasi-public authorities having jurisdiction over it and over the Work and the Project and that it is familiar with the local and special conditions under which the Work is to be performed and has, or prior to the submission of the GMP Proposal will have, correlated onsite observations with the requirements of the Contract Documents.

1.1.2.5 Notwithstanding anything to the contrary in the Contract Documents, CM is fully responsible to Owner for all duties of CM under the Contract Documents, including the construction means, methods, techniques, sequences and procedures in performing the Work, for initiating, maintaining and supervising all safety precautions and programs in connection with the performance of the Agreement despite CM's delegation of the responsibility therefor to any of its subcontractors.

1.1.2.6 In no event shall Owner be deemed to have control over, charge of, or any responsibility for construction means, methods, techniques, sequences or procedures or for safety precautions and programs in connection with the Work, notwithstanding any of the rights and authority granted Owner in the Contract Documents.

1.2 Extent of Agreement

1.2.1 This Agreement is complementary to the drawings, specifications, conditions of the contract (General, Supplementary and other Conditions, if applicable), recordings of presentations and interviews, and, together with them, comprises the full and entire agreement between the Owner and the CM and supersedes all prior negotiations, representations or agreements.

1.2.2 No modification or amendment to the Agreement shall be valid or binding upon the Owner and the CM unless in writing and executed by the Owner and CM.

1.2.3 The headings contained within this Agreement are for the purpose of convenience only and shall not be deemed to expand, limit or change the provisions in such articles, sections, paragraphs, schedules, exhibits and/or attachments hereto.

1.2.4 The Owner and CM acknowledge they have carefully reviewed this Agreement and have been advised by counsel of their choosing with respect thereto, and that they understand its contents and agree that this Agreement shall not be construed more strongly against any party, regardless of who is responsible for its preparation. The remedies granted to Owner in the Agreement are cumulative and not in limitation of any other rights and remedies of Owner at law or in equity.

1.2.5 This Agreement may be simultaneously executed in several counterparts, each of which shall be an original and all of which shall constitute one and the same instrument.

1.2.6 All representations and covenants of the parties shall survive the expiration of the Agreement. All of the CM's representations, indemnifications, warranties, and guarantees made in or required by the Agreement, as well as all continuing obligations indicated in the Agreement, will survive final payment, completion, and acceptance of CM's Work or termination or completion of the Agreement or termination of the Work of CM.

1.2.7 This Agreement shall not be recorded.

1.2.8 Where necessary to the context hereof, the singular shall include the plural and the plural shall include the singular and any one gender may include any other gender.

1.3 Definitions

1.3.1 "**Owner**" means The School Board of Manatee County, Florida, as represented by the Department of Construction Services and its Project Director.

1.3.2 "**Project Director**" means the person designated by the Owner's Director of Construction Services to provide direct interface with the A/E and the CM regarding Owner's interests and responsibilities. The Project Director shall have authority to transmit instructions, receive information, and interpret and define Owner's policies and decisions with respect to the Work.

1.3.3 "**Subcontractor**" means any person or entity that is performing, furnishing, supplying or providing any portion of the Work pursuant to a contract with the CM. The CM shall be solely responsible for and have control over the Subcontractors. CM shall negotiate all Change Orders and Request for Proposals with all affected Subcontractors and shall review the costs of those proposals and advise Owner and A/E of their validity and reasonableness, acting in Owner's best interest, prior to requesting approval of each Change Order or Amendment from Owner.

1.3.4 "**Owner Construction Services Budget**" is comprised of Owner's funds that are budgeted, requested and available for the construction of the Project and is **$18,300,000.00**, including the CM Fee and Cost of Work as further identified below:

Construction Costs	$ TBD
General Conditions	$ TBD
Overhead and Profit (CM Fee)	$ TBD
Preconstruction	$ 850,000.00
Unforeseen Conditions	$ TBD
Bond	$ TBD
TOTAL	$ 850,000.00

1.3.5 "**Contract Amount**" shall mean the following amounts that Owner agrees to pay, or cause to be paid, to the CM for the full and faithful performance by CM of the covenants set forth in this Agreement in accordance with the terms of the Agreement:

1.3.5.1 Preconstruction Phase Services

(a) For all Preconstruction Phase Services provided in Stages I – III, as defined herein, CM shall receive the amount identified in Section 6.3.1.11 below ("**Preconstruction Costs**").

(b) The Preconstruction Costs will be invoiced monthly by CM in accordance with Section 6.3.1.11 below.

1.3.5.2 Construction Phase Services

(a) With respect to the Construction Phase Services to be provided by CM in Stage IV, as herein defined, Owner shall reimburse CM for the Cost of Work (as that term is defined hereafter), and pay CM a fixed Construction Management Fee of $TBD based on the Cost of Work, excluding stored materials, Reimbursable Costs, retainage, and costs for insurance and bonds, established at the time the GMP is set by the parties (the "**CM Fee**"). The CM Fee shall be the CM's total compensation for all overhead not reimbursable as the Cost of Work, as defined herein, as well as the CM's total profit for Construction Phase Services.

1.3.6 "**Contract Documents**" consist of this Agreement, the Exhibits described herein, and any executed and issued addenda, Change Orders, and amendments signed by Owner. The term "Contract Documents" shall also include all plans and specifications for the construction of the Project ("**Construction Documents**") prepared by the A/E including any revisions, but only after the Construction Documents have been completed by A/E and approved in writing by Owner. Upon Owner's acceptance of CM's GMP Proposal, the Contract Documents will also include the GMP Amendment.

1.3.6.1 Interpretations of conflicts will be based upon the following Contract Documents, which are set forth and ranked in order of precedence:

(a) Duly executed amendments and Change Orders with those of a later date having precedence over those of an earlier date;

(b) The Agreement, not including the Exhibits;

(c) Exhibits to the Agreement; and

(d) All other Contract Documents.

1.3.7 "**Substantial Completion**" means that: (1) the Project is sufficiently completed in accordance with the Contract Documents so that the Owner can occupy or utilize the Work or designated portions thereof for the use for which it is intended as expressed in the Contract Documents; (2) a Certificate of Substantial Completion has been executed and issued by the A/E and CM; and (3) a Certificate of Occupancy has been issued by the permitting authority.

1.3.8 "**Final Completion**" means that all of the following events have occurred: (1) a Certificate of Substantial Completion has been executed and issued by the A/E and CM; (2) within the time provided for in the Agreement, the CM has completed all of the punch list items and corrected all of the deficiencies, and the closeout items enumerated in **Exhibit C** have been completed; (3) a Certificate of Occupancy has been issued for the Project; and (4) the Owner has taken possession of the Project.

1.3.9 "**Contract Time**" shall be established through the GMP Amendment to the Agreement and is defined as the period of time beginning with the commencement of the Construction Work through the date required for Substantial Completion and Final Completion of the Work.

1.3.10 "**Total Project Budget**" means the total cost of the Project including design services, construction services, Owner services (including FF&E and Technology) and all fees and other costs necessary to design, develop and construct the Project.

ARTICLE 2
CM SERVICES

2.1 The CM agrees to provide construction management services while operating within a modified Construction Management at Risk delivery process for the Project as set forth within this Agreement. The modified Construction Management at Risk delivery process includes:

2.1.1 Stage I – District Project Planning

2.1.1.1 The CM agrees to the Project Description and Scope of Work, the Construction Services Budget, the Substantial Completion date and the Project Schedule as set forth herein. The CM further agrees that the site is appropriate and that the Construction Services Budget is adequate for performance of the Work. The CM agrees that the level of quality of the Project is defined through the School District of Manatee County Planning Manual for Schools & Ancillary Spaces (the "**Planning Manual**") and other requirements set forth in the Contract Documents.

2.1.2 Stage II – Project Budget Endorsement

2.1.2.1 The first ranked A/E and CM shall:

(a) Review the Owner's Project Scope, budget, schedule and quality; and

(b) Provide a Letter of Commitment and School Board presentation publicly, if requested, endorsing the Project Scope, budget, schedule and quality as adequate and appropriate.

2.1.2.2 Project Schedule

(a) The CM shall prepare and submit a preliminary Project Schedule for Owner and A/E review and acceptance, which indicates all relevant activities during Stages II, III and IV of the delivery process.

(b) The Project Schedule will serve as the framework for the development of all future detailed schedules and shall be produced and updated monthly throughout the Project.

(c) The Project Schedule shall indicate proposed activities, dependencies, durations, milestone dates for receipt and approval of pertinent information, submittal of a GMP Proposal, preparation and processing of shop drawings, use of samples, and delivery of materials or equipment requiring long-lead time procurement.

(d) The Project Schedule shall also coordinate the CM services, the A/E services and the Owner responsibilities.

(e) If preliminary Project dates provided in the Project Schedule, which have been previously approved, are later found to be inaccurate, the CM will make appropriate recommendations to Owner's Project Director and A/E.

2.1.2.3 CM shall familiarize itself thoroughly with the evolving plans and specifications and shall follow the development of design from Schematic Design through Construction Documents Phase. The CM is not responsible for ascertaining that the Drawings and Specifications are in accordance with applicable laws, statutes, ordinances, building codes, or other regulations. However, if CM discovers a conflict, error or discrepancy in the Contract Documents, including during performance of the Work, CM shall report same to A/E and Owner in writing within five (5) days of discovering same, and before proceeding with the Work affected, shall obtain a written interpretation or clarification from A/E.

2.1.2.4 Construction Cost Estimate

(a) CM shall prepare, for Owner and A/E review and approval, a detailed estimate of Construction Costs ("**Construction Cost Estimate**"), which shows the various elements of the Project and costs for construction of same.

(b) The CM shall update and issue the Construction Cost Estimate at the completion of each Phase of Stage III services, including the submission of the GMP Proposal, as follows:

(1) Phase I Schematic Design – more detail with supporting data

(2) Phase II Design Development – systems selected

(3) Phase III Construction Documents:

i. 50% Drawings – only final details missing and establishment of preliminary GMP

ii. 100% Drawings – issuance of final GMP Proposal

(c) CM acknowledges that an accurate Construction Cost Estimate is critical to Owner's ability to establish and verify its Total Project Budget and, therefore, CM shall work closely with A/E and use its best skill and judgment as a contractor familiar with the construction industry in the locality of the Project in preparing its Construction Cost Estimate.

(d) If Construction Costs and/or any estimate exceed previously approved estimates or the Owner's Construction Services Budget, the CM shall make appropriate recommendations to the Owner and A/E for corrective action and propose value engineering and/or alternates for Owner and A/E consideration.

(e) The Construction Cost Estimate shall be reviewed with the Owner's

Project Director and the A/E. Any recommendations and advice by the CM concerning design alternatives or value engineering shall be subject to the approval of the Owner's Project Director and the A/E.

2.1.2.5 Stage III – Project Design and Development

(a) At the completion of Stage III: Phase I – Schematic Design, the CM shall:

(1) Provide a second Letter of Commitment and School Board presentation publicly, if requested, stating that the Schematic Design is in conformance with the Project Scope of Work and that the Owner's:

i. Project Schedule continues to be appropriate;

ii. Project level of quality is being achieved; and

iii. Construction Services Budget is adequate.

(2) Or, have its services terminated in accordance with Article 13. If the Agreement is terminated, Phase I documents become the property of the Owner, which may be used or changed by the Owner, solely for the purpose of completing the Project.

(b) At the completion of Stage III: Phase II – Design Development, the CM shall:

(1) Provide a third Letter of Commitment and School Board presentation publicly stating that with professional assistance and appropriate use of value engineering, the Design Development is in conformance with the Project Scope of Work and that the:

i. Project Schedule continues to be appropriate;

ii. Project level of quality is being achieved; and

iii. Construction Services Budget is adequate.

(2) Or, provide evidence prohibiting the commitment.

(c) The CM shall seek to develop subcontractor interest in the Project and shall furnish to the Owner and A/E a list of possible subcontractors and suppliers that may furnish material or equipment for each principal portion of the Work. The Owner and A/E will reply in writing to the CM if there are any objections to a subcontractor or supplier.

(d) Advertising, Bidding and Awarding of Contracts shall be completed per State Requirements for Educational Facilities (SREF), Section 4.2(2).

(e) At 100% completion of Stage III: Phase III – Construction Documents, the CM shall either:

(1) Provide a detailed GMP less than or equal to the Construction Services Budget; and mobilize construction personnel and proceed with Stage IV – Project Construction; or

(2) Provide a detailed GMP greater than the Construction Services Budget after which the Owner shall grant the CM thirty (30) calendar days from 100% completion of Stage III to return with a GMP less than or equal to the Construction Services Budget.

(f) If the CM returns after thirty (30) calendar days with a GMP that exceeds the Construction Services Budget, at the recommendation of the Superintendent of the School District of Manatee County, the Owner may:

(1) Modify the Construction Services Budget thereby increasing the Total Project Budget without additional cost to the Owner including for A/E fees; or

(2) Terminate the CM Agreement allowing the next ranked construction management firm to provide a GMP within the Construction Services Budget and begin construction. If the CM Agreement is terminated under this section, CM's recovery against Owner shall be limited to that portion of the Contract Amount earned through the date of termination together with any retainage withheld and reasonable termination expenses incurred, but CM shall not be entitled to any other or further recovery against Owner, including damages or any anticipated profit on portions of the Work not performed.

2.1.2.6 Guaranteed Maximum Price (GMP) Proposal

(a) When the Owner determines that the drawings and specifications are 100% complete, the CM shall provide a GMP Proposal.

(b) The GMP Proposal shall include the CM Fee and represent the sum total of all costs associated with completing the Work. The GMP Proposal shall also include an itemized statement of CM's General Conditions expenses for the Project, which, once agreed to by Owner shall be specifically included within the GMP Amendment. The CM's General Conditions expenses are to be paid as the Work progresses with each Application for Payment based on percentage of completion of Work. The itemized statements shall be in form and substance and with such detail as may be required by Owner. General Conditions expenses shall each be line items in the Schedule of Values to be included within the GMP Amendment.

(c) The GMP Proposal shall also include a proposed Construction Schedule, as defined herein, which, once approved, shall be attached to the GMP Amendment.

(d) If the Owner determines the drawings and specifications are not 100% complete and a GMP is required to maintain the Project Schedule, the CM shall provide line items within the GMP Proposal for further development of drawings and specifications by the A/E, which shall not include changes in scope, systems, materials or equipment.

(e) The GMP Proposal shall include a written statement thoroughly explaining the foundation on which the GMP is based including, but not limited to the following:

(1) A complete list of all drawings and specifications used to prepare the GMP;

(2) All addenda and changes in conditions of the Agreement used to prepare the GMP;

(3) A complete list of Owner provided allowances and a statement explaining the CM's understanding of their use;

(4) The proposed date of an Owner-approved Substantial Completion; and

(5) A detailed list of assumptions, exclusions, allowances and clarifications that were made in preparing the GMP.

(f) The CM shall meet with the Project Director and A/E to review the contents of GMP Proposal. The Owner and A/E shall identify, in writing, all discrepancies in the GMP Proposal and provide same to CM. After receiving the list of discrepancies, the CM shall make the appropriate adjustments to the GMP Proposal for submission to the Owner and the A/E.

(g) The CM shall not incur any reimbursable Construction Costs, as outlined in Article 6, prior to the Owner's acceptance of the CM's GMP Proposal and issuance of a Notice to Proceed.

(h) Upon the Owner's acceptance of the GMP Proposal, the GMP will become an Amendment to the Agreement ("**GMP Amendment**") and establish the Agreement's GMP, Contract Time, and liquidated damages for incorporated phases of work.

(i) The GMP shall include only those taxes enacted at the time the GMP is established.

(j) If the GMP exceeds the Owner's Construction Services Budget, the terms of Sections 2.1.2.5(e)(2) and 2.1.2.5(f) shall apply.

2.1.2.7 Bonds

(a) Within ten (10) business days after the GMP is approved by Owner and CM and before any portion of the Construction Work to be covered by such bonds is commenced, CM shall provide Owner with a Performance Bond and a Payment Bond (together, the "**Bonds**"), in the form prescribed by AIA A312-2017 forms or those forms provided within Section 255.05, *Florida Statutes*, in the amount of one hundred percent (100%) of the total sum of the GMP, the costs of which are to be paid by CM. The Bonds must comply with the following provisions and must be otherwise acceptable to Owner:

(1) The Bonds must be underwritten by a surety company which has a currently valid Certificate of Authority issued by the State of Florida, Department of Insurance, authorizing it to write surety bonds in the State of Florida.

(2) The Bonds must be fully performable in Florida, with service and venue in Manatee County, Florida.

(b) In accordance with the requirements of Section 255.05(1)(a), *Florida Statutes*, CM shall record in the Public Records of Manatee County, Florida, a copy of the Bonds. CM shall deliver to Owner certified copies of the recorded Bonds within ten (10) days of recording of the Bonds but, in any event, before commencing the Work. The proper recording and delivery of such Bonds are conditions precedent to Owner's obligation to make any progress payments to CM hereunder.

2.1.3 Stage IV – Project Construction and Warranty

2.1.3.1 The construction phase shall commence on the earlier of the following:

(a) The Owner's acceptance of the CM GMP Proposal and issuance of the Notice to Proceed, or

(b) The Owner's authorization to the CM to:

(1) Award a subcontract;

(2) Undertake the Work with CM forces; or

(3) Issue a Purchase Order for materials or equipment required for the Work.

2.1.3.2 Construction Schedule

(a) Within thirty calendar (30) days after the receipt of the Notice to Proceed, the CM shall prepare a Construction Schedule and submit the schedule to the A/E and Project Director for approval. The Construction Schedule shall graphically depict the sequence and duration of all activities required to satisfactorily finish the Project. The Construction

Schedule shall represent an accurate assessment of the current status of the Project and of the Work remaining to be accomplished and it shall provide a sound basis for identifying variances and problems and for making management decisions.

(b) Following development and approval of the Construction Schedule, CM shall, at the end of each calendar month occurring thereafter during the period of time required to finally complete the Project, or at such earlier intervals as circumstances may require, update and/or revise the Construction Schedule which shall be submitted to Owner and A/E.

(c) The Project Schedule and the Construction Schedule shall be planned and recorded with a Critical Path Method ("**CPM**") schedule. If requested by Owner or A/E, CM shall furnish any information needed to justify the reasonableness of activity duration. Such information shall include estimated activity manpower, anticipated quantities, and production rates.

(d) If the Construction Schedule or any current updates fail to reflect the Work's actual plan or method of operation, or a contractual milestone date is more than fifteen (15) days behind, Owner may require the CM to submit information or documentation including an updated schedule to describe the CM's plan to complete the remaining Work by the required milestone date.

2.1.3.3 Bidding and Subcontracts

(a) Unless authorized by Owner, all work shall be performed under subcontracts held by the CM. The CM shall not bid any of the subcontractor work or perform such work with its own forces without prior written consent of the Project Director.

(b) The CM shall develop procedures that are acceptable to the Project Director and the A/E for pre-qualification of subcontractors and material suppliers, develop subcontractor interest in the Project and conduct pre-bid conferences with interested bidders to review the bid package documents and Project Schedule approved by the Construction Team.

(c) The CM shall obtain bids from subcontractors and open such bids in the presence of the Construction Team, specifically the Project Director and A/E. The Construction Team will then analyze the bids and deliver such bids to the Project Director and A/E.

(d) The Project Director will determine, with the advice of the CM and subject to the reasonable objection of the A/E, which bids will be accepted and indicate his or her acceptance by signing the bid tabulation form for each work scope.

(e) The CM shall not be required to contract with any firm with whom the Owner has a reasonable objection. The CM shall provide the Owner with the scope sheet(s) indicating the apparent responsive and responsible subcontractor bids.

(f) Equal Employment Opportunity / Non-Discrimination: In performing all services to be provided hereunder, CM shall not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. CM shall take affirmative action to ensure that applicants for employment are employed, and that employees are treated during employment, without regard to their race, color, religion, sex or national origin. Such actions shall include the following: (i) employment, upgrading, demotion or transfer; (ii) recruitment or recruitment advertising; (iii) layoff or termination; (iv) rates of pay or other forms of compensation; and (v) selection for training, including apprenticeship. CM shall post in conspicuous places, available to all employees and applicants for employment notices setting forth the terms of this Equal Employment Opportunity Non-Discrimination Clause and stating that all qualified candidates will receive consideration for employment without regard to race, color, religion, sex or national origin.

2.1.3.4 CM Construction Services

(a) Prior to the commencement of Work, CM may attend a preconstruction conference with Owner and A/E and others, as appropriate for the particular needs of the Project, to discuss the Project Schedule, procedures for handling shop drawings and other submittals, and for processing Applications for Payment, and to establish a working understanding among the parties as to the Work. During the prosecution of the Work, CM shall attend any and all meetings convened by Owner or A/E with respect to the Project, when directed to do so by Owner or A/E. CM shall have its subcontractors and suppliers attend all such meetings (including the preconstruction conference) as may be directed by Owner or A/E.

(b) The CM shall manage, schedule and coordinate the work, including the work of subcontractors and coordinate the work with the activities and responsibilities of the Project Director, A/E and CM in order to complete the Project in accordance with the Owner's objectives of scope, budget, schedule and quality.

(c) The CM shall provide for all job-site facilities necessary to enable the CM, the Project Director, Building Official and the A/E to perform their respective duties.

(d) Supervision and Contractor Representative

i. CM is responsible for supervising, coordinating and performing the Work with such care and skill as would be provided by a contractor with extensive and special expertise in the type of work required under the Contract Documents. CM is responsible for completing the Work so that it complies accurately and completely with the requirements of the Contract Documents.

ii. The CM shall maintain exclusively for this Project sufficient off-site support staff and competent full-time staff at the Project site authorized to act on behalf of CM to coordinate, inspect, provide general direction and direct the Work and progress of the subcontractors. The CM's on-site management and supervisory personnel shall be consistent with the interview presentation and shall not be removed or replaced without the Project Director's consent. The CM's Project Manager, as defined herein, shall have authority to act on behalf of CM. All communications given to the CM Project Manager shall be as binding as if given to CM. The Owner's Project Director shall have the right to direct the CM to remove any on-site personnel whose performance is unsatisfactory to the Owner. In such event, the CM shall promptly replace such personnel without additional compensation for that replacement.

iii. The CM, in conjunction with the Project Director, shall establish on-site organization and lines of authority to implement the overall plans of the Construction Team.

iv. CM shall establish and maintain lines of authority for its personnel, and shall provide this information to Owner and all other affected parties, such as the code inspectors of any permitting authority, the subcontractors, and A/E. Owner and A/E may attend meetings between CM and its subcontractors; however, such attendance is optional and shall not diminish either the authority or responsibility of CM to administer the subcontracts.

v. CM shall be responsible to Owner for the acts and omissions of its employees and agents and its subcontractors, their agents and employees, and all other persons performing any of the Work or supplying materials under a contract to CM.

vi. CM shall develop and maintain a program, acceptable to Owner and A/E, to assure quality control of the Work. CM shall supervise the Work of all subcontractors, providing instructions to each when their portion of the Work does not conform to the requirements of the Contract Documents and CM shall continue to exert its influence and control over each subcontractor to ensure that corrections are made in a timely manner so as to not affect the efficient progress of the Work.

vii. Should a disagreement occur between CM and A/E over the acceptability of the Work, Owner, in its sole discretion, shall have the right to determine the acceptability.

(e) CM shall provide the following job site administration functions during construction to assure proper documentation, including the following:

(1) Job Meetings: CM shall arrange and conduct regular Project status meetings with the Construction Team. CM shall prepare written minutes of job meetings described in this section and deliver copies

of such written minutes to Owner and the A/E within five (5) days of each meeting.

(2) PMIS Reports: The CM shall provide a Project Management Information Summary (PMIS) monthly report describing the current cost and payment status of the entire Project. These PMIS reports shall indicate all current encumbrances on and expenditures of the GMP budget. Components of the PMIS are set forth in **Exhibit E**.

(3) Daily Job Logs: The CM shall record the progress of the Work and prepare a daily job log containing a record of weather and CM employees and subcontractors on site including number of workers and work accomplished. The log shall be maintained at the Project site or electronically and made available to the A/E and the Project Director at all times.

(4) Logs for RFIs, Submittals/Shop Drawings, Etc.: The CM shall maintain a log of Requests for Information (RFIs), submittals and shop drawings, status of the Unforeseen Conditions Fund, potential cost items, and Architect's Supplemental Instructions (ASIs) to be reviewed at each Construction Team meeting who shall act on the disposition of these items. CM shall review and approve shop drawings and other submittals and implement procedures for transmittal to the A/E of such submittals for action, and closely monitor their review process.

(5) Submittals:

i. CM shall carefully examine the Contract Documents including the plans and specifications for the Project, as well as the Planning Manual to determine all requirements for approval of materials to be submitted such as shop drawings, data, test results, schedules and samples. If requested and/or required by the needs of the Project, CM shall prepare a submittal schedule and shall submit the schedule for Owner and A/E approval. The submittal schedule will be coordinated with CM's Construction Schedule and allow A/E reasonable time to review submittals.

ii. If the Project involves submittals and shop drawings, CM shall carefully review and certify for accuracy and completeness all shop drawings and other submittals and then forward the same to A/E for review and action. By submitting shop drawings and other submittals, CM represents to Owner and A/E that CM has: (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so, and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

(6) Subcontractor Progress: The CM may prepare periodic deficiency logs and punch list logs for subcontractors' work, as the particular needs of the Project requires, including unsatisfactory or incomplete items and schedules for their completion.

(7) Payments to Subcontractors: Develop and implement a procedure for the review, processing and payment of applications by subcontractors for progress and final payments.

(8) Substantial Completion: The CM shall ascertain when the Work or designated portions thereof are ready for the A/E Substantial Completion inspection after which the CM and A/E will execute and issue a Certificate of Substantial Completion, as required by Owner, including a list of punch list items to be completed or corrected. From the punch list of incomplete or unsatisfactory items prepared by CM and reviewed and supplemented by A/E, CM shall prepare a schedule for completion of the items indicating completion dates for Owner's review. Substantial Completion will also include the issuance of a Certificate of Occupancy by the permitting authority.

(9) Final Completion: The CM shall monitor the subcontractors' performance on the completion of the Work and provide notice to Owner and the A/E when the Work is ready for final inspection. CM shall secure, review and certify compliance with the Contract Documents and then transmit to Owner, through the A/E, and as an express condition precedent to final payment, all closeout items set forth in **Exhibit C** including required guarantees, warranties, affidavits, releases, consent of surety to final payment, bonds, waivers, manuals, as-built drawings, and maintenance books. Final Completion will also include issuance of a Certificate of Occupancy by the permitting authority and Owner taking possession of the Project.

(f) Safety

(1) CM is responsible for the safety and protection of all persons and property on or about the Project site during the progress of the Work. CM is responsible for protecting from damage or loss all material and equipment to be incorporated into the Work which may be stored off of the Project site.

(2) The CM shall be responsible for initiating, maintaining, implementing and supervising an effective safety program for the Work and requiring similar programs from the subcontractors. OSHA guidelines shall serve as the basis for the safety programs. Copies of the proposed programs shall be distributed to the Construction Team by the CM.

(3) CM shall employ all necessary measures to protect adjoining adjacent property and shall provide barricades, temporary fences and covered walkways required to protect the safety of passersby,

local building codes, ordinances or other laws and the Contract Documents.

(4) CM's duties and responsibilities for the safety and protection of the Work and the environment shall continue until such time as the Work is completed and final acceptance by Owner has occurred.

(5) Alcohol, drugs and all illegal substances are strictly prohibited on any Owner property.

(6) At all times CM shall adhere to Owner's safety and security regulations, and shall comply with all security requirements at Owner's facilities, including all safety and security regulations and requirements, as said regulations and requirements may be modified or changed by Owner from time to time.

2.1.3.5 The CM shall keep full and detailed accounts and exercise such controls as may be necessary for proper financial management, in order to substantiate all costs incurred under this Agreement. The accounting and control systems shall be satisfactory to the Owner. The Owner shall be afforded access to the CM's records, correspondence, instructions, drawings, receipts, subcontracts, purchase orders, vouchers, memoranda and all other data relating to the Project at any and all times during normal business hours upon request by Owner. The CM shall preserve all records and supporting documentation that relate to the Work for a period of three (3) years after final payment, or for longer period as may be required by law. CM shall likewise require all subcontractors to retain all Project records and supporting documentation. The Owner's right to audit, inspect and copy Project records and documentation of CM shall survive completion and/or termination of the Agreement. If at any time, Owner conducts such an audit of CM's records and documentation and finds that CM overcharged Owner, CM shall pay to Owner the Overcharged Amount which is defined as the total aggregate overcharged amount together with interest thereon (such interest to be established at the rate of twelve percent (12%) per annum). If the Overcharged Amount is equal to or greater than Ten Thousand and No/100 Dollars ($10,000.00), CM shall pay to Owner the Overcharged Amount and the Audit Amount, which is defined as the total aggregate of Owner's reasonable audit costs incurred as a result of its audit of CM. Owner may recover the Overcharged Amount and the Audit Amount, as applicable, from any amount due or owing CM with regard to the Project or under any other agreement between CM and Owner. If such amounts owed CM are insufficient to cover the Overcharged Amount and Audit Amount, as applicable, then CM hereby acknowledges and agrees that it shall pay such remaining amounts to Owner within seven (7) business days of its receipt of Owner's invoice for such remaining amounts. In no event shall the Overcharged Amount or the Audit Amount be deemed a reimbursable Cost of Work.

2.1.3.6 Hazardous Materials and Substances

(a) In the event hazardous materials such as asbestos or polychlorinated biphenyl (PCB) are encountered at the Project site that were not specifically noted in the Construction Documents, the CM shall immediately stop Work in the affected area and shall notify the Owner and the A/E in writing of the suspected material within forty-eight (48) hours of discovering same.

(b) Upon receipt of the CM's notice, the Owner shall obtain the services of a licensed laboratory to determine absence or presence of hazardous substance(s), and in the event such material or substance is found to be present, to remediate, abate, or otherwise remove the hazardous substances.

(c) The Owner shall not be responsible under this Section for hazardous materials or substances the CM brings to the site unless such materials or substances required by the Contract Documents, except to the extent of the CM's fault or negligence in the use and handling of such materials or substances.

(d) CM is responsible for compliance with any requirements included in the Contract Documents regarding hazardous materials. If any chemicals, materials, or products containing toxic substances, as defined by 29 C.F.R. 1910, Subpart Z, or any local, state or federal statutes or regulations, are contained in the products used on site or incorporated into the construction by CM or any of its subcontractors, CM shall maintain on site a Safety Data Sheet for each such product. CM shall indemnify and hold the Owner harmless against the cost and expense Owner incurs: (1) for remediation of a material or substance CM brings to the site and negligently handles, or (2) where CM fails to perform its obligations under this Section, except to the extent that the cost and expense are due to Owner's fault or negligence.

2.1.3.7 Emergencies

(a) CM shall take immediate action to prevent injury to any person and injury to any property (including the Work and any adjacent property) which otherwise might arise from an emergency event at the Project site. Property damage includes environmental impacts to the ground, air, and water.

CM shall give A/E and Owner written notice within forty-eight (48) hours after the occurrence of the emergency, if CM believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby. CM shall also deliver to Owner and A/E copies of any written notice of violations received by CM or subcontractors within forty-eight (48) hours following notification by the regulatory agency.

(b) If A/E determines that a change in the Contract Documents is required because of the action taken in response to an emergency, a Change Order or Amendment shall be issued to document the consequences of the changes or variations. If CM fails to provide the forty-eight (48) hour written notice noted above, CM shall be deemed to have waived any right it otherwise may have had to seek an adjustment to the Contract Amount or an extension to the Contract Time. CM is obligated to promptly report in writing to Owner all accidents relating to the Work that result in any personal injury or property damage. The notice procedures contained in this Section control over any conflicting notice periods herein.

2.1.3.8 Final Completion

(a) Warranties

(1) CM shall obtain and assign to Owner on a non-exclusive basis all warranties given to CM by any subcontractors or by any materialmen supplying materials, equipment or fixtures to be incorporated into the Project.

(2) The CM warrants to the Owner and A/E that materials and equipment furnished under the Contract Documents shall be of good quality and new unless the Contract Documents require or permit otherwise. The CM further warrants that the Work will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials or equipment not conforming to these requirements may be considered defective. The CM's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the CM, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage.

(3) Any warranty to be provided will be in such form as is acceptable to Owner and shall not include any exclusions, exceptions or modifications except to the extent approved by Owner in its sole discretion.

(4) In addition to all other rights and remedies available to Owner at law or in equity, including any implied warranties Owner may be entitled to as a matter of law, CM expressly warrants to Owner that it shall promptly correct, upon receipt of written notice from Owner, any portion of the Work which is found to be defective or otherwise not in conformance with the requirements of the Contract Documents. In the event that any defective or non-conforming work is deemed by Owner in its sole discretion to present an immediate threat to safety or security, Owner shall be entitled to correct and fix such defective or non-conforming portions of the Work, and CM shall reimburse Owner for all costs and expenses incurred by Owner in performing such Work. This obligation to correct defective or nonconforming Work shall run for a period of one (1) year (or such

longer period of time as may otherwise be specified in the Contract Documents including the Planning Manual) commencing from the date Substantial Completion is achieved. With respect to the correction of any defective or nonconforming Work, CM shall be liable for all damage to any part of the Work itself and to any adjacent property which is caused by such corrective work.

ARTICLE 3
OWNER'S RESPONSIBILITIES

3.1 The Owner shall provide full information, in a timely manner, regarding the requirements of the Project, including a program setting forth the Owner's objectives, constraints and criteria, including space requirements and relationships, flexibility and expandability requirements, special equipment and systems and site requirements.

3.1.1 The Owner shall establish a Total Project Budget that includes the cost of all Design, Construction and Owner Services. The Total Project Budget shall include contingencies for changes in the work conditions and other costs, which are the responsibility of the Owner.

3.1.2 The Owner shall furnish (unless other provisions are made) the following with reasonable promptness and at the Owner's expense, and the CM shall be entitled to rely on this information:

3.1.2.1 Reports, surveys, drawings and tests concerning the conditions of the site;

3.1.2.2 Surveys describing physical characteristics, legal limitations and utility locations for the project site; and

3.1.2.3 The services of geotechnical engineers when such services are required for site evaluation

3.2 The Owner shall designate a Project Director that will be fully acquainted with the Project and shall define the lines of Owner authority to approve construction budgets and changes in the Project within the Owner approved Scope of Work and Project Budget.

3.3 The Owner shall retain the A/E for design and to prepare Construction Documents for the Project. The duties and responsibilities of A/E are described in the Agreement Between the Owner and the A/E, a copy of which will be furnished to CM. The Agreement between the Owner and A/E shall not be modified without written notification to the CM.

3.4 The Owner's anticipated Sustainable Objectives for the Project are TBD. **Exhibit TBD ,** attached hereto and incorporated herein, defines the terms, conditions and services related to the Owner's Sustainable Objectives.

ARTICLE 4
PERMITS, LICENSES, INSPECTIONS AND TAXES

4.1 Code Compliance

4.1.1 A reviewing authority must approve the final Construction Documents for code compliance and issue the appropriate building permit(s) prior to beginning Work. All changes to the Construction Documents shall be reviewed and approved by the same authority.

4.2 Code Inspections

4.2.1 All components of the Project require detailed code compliance and Construction Document inspections during construction including, but not limited to structural, mechanical, electrical, plumbing and general building as well as threshold inspections where required.

4.2.2 The inspecting authority will provide inspection personnel. The Project Director will provide to the CM names, addresses, email addresses, and telephone numbers of the inspecting authorities. The CM shall notify the appropriate inspector(s) no less than 24 hours in advance of the required inspection.

4.2.3 All Work scheduled for inspection shall be ready for inspection and inspected prior to the work being concealed. Work not inspected and not approved prior to concealment shall be revealed for inspection when directed by the Owner of designated inspecting authority.

4.2.4 All costs associated with inspecting prematurely concealed work shall be borne by the CM.

4.3 Taxes

4.3.1 CM shall pay all sales, consumer, use and other similar taxes associated with the Work or portions thereof, which are applicable during the performance of the Work.

4.3.2 CM shall comply with and fully implement the sales tax savings program with respect to the Work.

4.3.3 Direct Purchasing – Notwithstanding anything herein to the contrary, because Owner is exempt from sales tax and wishes to generate sales tax savings for the Project, Owner reserves the right to make direct purchases of various construction materials and equipment included in the Work.

ARTICLE 5
SUBCONTRACTS

5.1 A subcontractor is a person or organization who has a direct contract with the CM to perform specific work at the jobsite. Nothing in the Contract Documents shall create any contractual relationship between the Owner, A/E or any other subcontractor.

5.2 By appropriate written agreement, the CM shall require each subcontractor, to the extent of the work to be performed by the subcontractor, to be bound to the CM by the terms of the Contract Documents, and to assume toward the CM all obligations and responsibilities which the CM by these documents, assumes to the Owner and the A/E. The CM shall provide the Owner copies of the subcontractor bonds or evidence that bonds have been acquired. All increases and decreases to the Project shall be documented in the bond. CM requested payments for work completed will be withheld until all documentation of bonds is received.

5.3 Requirements

5.3.1 On all subcontracts exceeding $100,000.00 the CM may require subcontractors to provide a 100% performance bond and a 100% payment bond from a surety company authorized to do business in the State of Florida by the Department of Insurance. If the CM wishes to award subcontracts to contractors unable to supply this bonding, CM shall request special authorization from the Owner.

5.3.2 The subcontractor must have successfully completed no less than two projects of similar size and complexity within the last five (5) years unless this requirement is waived by Owner, A/E and CM. Similar projects completed by the subcontractor will be indicated on the scope of work sheet by the CM.

5.3.3 Subcontractor is required to be licensed per Chapter 489 and shall provide proof of licensing prior to start of work. Proof of subcontractor licensure shall be provided electronically to the Owner.

5.3.4 All Subcontracts shall provide:

5.3.4.1 That the Owner will be an additional insured on all insurance policies required to be provided by the subcontractors except workman's compensation and professional liability, if applicable;

5.3.4.2 That all warranties will be assigned directly to Owner;

5.3.4.3 That the Work being performed pursuant to such subcontract be performed in accordance with the requirements and intent of the Contract Documents and provide for retainage as specified within this Agreement;

5.3.4.4 For submission of Applications for Payment in form acceptable to Owner, together with reasonable backup and supporting information and, if requested by Owner, Releases and Affidavits and Waivers of Right to Claim Against the Payment Bond, in the forms required by the Agreement, from all subcontractors or vendors who have filed Notice to Owner, filed Intent to Lien, or have indicated non-payment from CM.

5.3.4.5 That subcontractor agrees to comply, at its own expense, with all federal, state and local laws, codes, statutes, ordinances, rules, administrative orders, regulations and requirements applicable to the Project, including those dealing with safety (including the Trench Safety Act, Chapter 553, *Florida Statutes*).

5.3.4.6 That the subcontractor will resolve all disputes involving Owner in the same manner as provided in the Agreement;

5.3.4.7 That, upon Owner's request, subcontractor will provide proof of such insurance and additional insured endorsements to Owner;

5.3.4.8 Limitation of Remedy – No damages for delay – that subcontractors' exclusive remedy for delay in the performance of the Work required by the Agreement caused by events beyond its control, including delays claimed to be caused by or attributable to the Owner or A/E and claims based on breach of the Agreement or negligence, shall be an extension of Contract Time; and

5.3.4.9 That, in the event of a change in the Work that is performed by Subcontractors or sub-subcontractors, a maximum of fifteen percent (15%) markup shall be permitted for each of the Subcontractors for all overhead and profit on Subcontractor's direct labor and material costs and actual equipment costs as follows: (i) ten percent (10%) markup for that portion of the Work to be performed by a Subcontractor with its own forces; and (ii) ten percent (10%) markup for that portion of the Work to be performed by a sub-subcontractor with its own forces, or any lower tier of subcontractor, plus five percent (5%) for the Subcontractor. The total combined Change Order fee for Subcontractor and all sub-subcontractors shall not exceed fifteen percent (15%). A detailed breakdown, with necessary backup, shall be provided. Subcontractors, and sub-subcontractors, shall agree that the foregoing constitutes their sole and exclusive remedies for delays and changes in the work and thus eliminate any other remedies or claims for increases in the Contract Amount, damages, losses or additional compensation.

ARTICLE 6
COMPENSATION FOR CONSTRUCTION PHASE SERVICES

6.1 **Reimbursable Costs**

6.1.1 In consideration of the performance of the Agreement, the Owner will pay the CM for the following listed items, which shall all be considered as reimbursable costs of work for the Project ("**Reimbursable Costs**"). The CM shall prepare a complete listing of Reimbursable Costs items with appropriate pricing and the agreed upon total of these items shall be included within the GMP for the Project. These items will be billed monthly and will require back up acceptable to the Owner. Any items not listed are subject to approval by the Owner.

6.1.2 List of Reimbursable Costs:

- Wages or salaries of CM's supervisory JOBSITE personnel (excluding those costs identified within Section 6.3.1.6)
- Wages or salaries of CM's administrative JOBSITE personnel (excluding those costs identified within Section 6.3.1.6)
- Wages or salaries of JOBSITE construction workers directly employed by the CM to perform Work (excluding those costs identified within Section 6.3.1.6)
- Site engineering, including layout and grades
- Materials testing
- Security services
- Janitorial services
- Scheduling services
- Drawings and printing costs
- Software costs required for the Project
- Field office trailer, utilities and internet
- Field office supplies and equipment to be transferred to Owner upon Final Completion except for those items that are rented
- Telephones
- Site communications (radios)
- Miscellaneous permits and fees
- Project photos including those requested by Owner
- Postage
- Auto expenses to be determined between CM and Owner based upon the size, scope and duration of the Project
- Project signs, including plaques if applicable
- Personal protective equipment
- On-site and off-site storage containers necessary for Project (i.e. Pod containers, storage facility costs, etc.)
- Temporary fencing
- Temporary roads and walks
- Temporary barricades
- Temporary stairs and landings
- Temporary partitions
- Temporary toilets
- Temporary sanitary lines
- Temporary utilities including power, water, sewer, gas – prior to Substantial Completion
- Drinking water
- Costs for safety requirements
- Temporary water service – prior to Substantial Completion
- Temporary fire protection
- Dewatering and drainage
- Clean-up
- Final cleaning services
- Dumpsters
- Small tools (to be turned over to the Owner at Final Completion of Project except for those items that are rented)

- Equipment maintenance and repair subject to Owner's approval of costs
- Fuel, oil and grease for equipment (not auto expenses) related to the Project
- Freight
- Costs of administration of the direct material purchase ("**DMP**") program
- Rental charges of all necessary machinery and equipment including office equipment used at the site whether rented from the CM or others, including installation, minor repairs and replacements, dismantling, removal, transportation and delivery costs
- Cost of labor, material and equipment required for handling, storing, placing and affixing Owner-furnished material and equipment, not DMP items

Total "Not to Exceed" cost of Reimbursable Costs **$TBD**

6.1.3 Reimbursable Costs shall only be adjusted with prior written approval from the Owner and the CM.

6.2 CM Fee (Overhead and Profit)

6.2.1 The Owner shall pay to the CM the CM Fee as defined in Section 1.3.5.2(a) based on the Cost of Work, which is established at the time the GMP is set by the parties.

6.2.2 The total amount of the CM Fee as set forth in Section 1.3.5.2(a) shall be paid proportionally to the Cost of Work in place, excluding stored materials and less retainage.

6.3 Cost of Work

6.3.1 The Owner shall pay the CM for the following items, which comprise the "**Cost of Work**":

6.3.1.1 Reimbursable Costs per Article 6.1;

6.3.1.2 General Conditions expenses as defined in Section 2.1.2.6(b). Labor costs that are itemized as Reimbursable Costs may be included within General Conditions expenses, whether or not specifically noted as such, and are not to be billed separately as Reimbursable Costs. CM shall promptly report to Owner any occasion in which the labor/payroll rates paid to personnel is lower than the estimated price included within the GMP Amendment related to the General Conditions expenses. Owner reserves the right to audit CM's payroll and CM shall promptly make available to Owner all records necessary for such purpose;

6.3.1.3 Cost of all materials, supplies and equipment incorporated in the Work or stored on the Project site, including transportation and storage thereof. At the Owner's discretion, the Owner will make payments for materials, supplies or equipment stored off-site and bonded;

6.3.1.4 Costs of the subcontractors for their work completed in accordance with subcontracts with the CM;

6.3.1.5 Sales, use, gross receipt, and similar taxes related to the Work imposed by any governmental authority for which the CM is liable;

6.3.1.6 Cost of contributions, assessments or taxes incurred during the performance of the Work for such items as unemployment compensation and social security, insofar as such cost is based on wages, salaries or other remuneration paid to employees of CM, are included within the Cost of Work at the blended rate of 42**%** of wages and 42**%** of salaries. Unreasonable components of labor burden incurred for the Project (related to wages of CM personnel) as determined by the A/E and Owner including, but not limited to, excessive bonuses, excessive pension/profit sharing costs, excessive retirement costs, club dues, automobile expenses, training/seminars, uniforms and administrative support shall not be reimbursed. Reasonable components of labor burden include payroll taxes (FICA, SUTA, FUTA), insurance (health, life, dental, disability), retirement plan up to 4%, and workers compensation (reimbursement shall be based on the actual rate for each person charged to the Project and shall include modifiers and discounts);

6.3.1.7 Cost of premiums for all bonds and insurance, including Builder's Risk and General Liability insurance (bonds will be charged at the rate of 0.635% of the GMP amount or the invoice amount and General Liability insurance will be charged at the rate of 1.46**%** of the GMP amount or the invoice amount), which CM is required by the Contract Documents to purchase and maintain and/or CM requires, including cost of Performance and Payment Bonds for subcontractors and/or suppliers. To the extent permitted by applicable law, all premiums for any insurance and bonds required for the Project shall reflect the net actual costs to the CM after taking into consideration cost adjustments due to experience modifiers, premium discounts, policy dividends, retrospective rating plan premium adjustments, rebates, refunds, etc. The CM's actual cost for insurance and bonds directly attributable to this Agreement shall be considered to be included within the GMP, but shall not be included in the amount for purposes of calculating the CM Fee, and shall be charged at the actual rate paid by CM, provided that such rate shall not exceed the amount allocated to these expenses in the GMP. Prior to Final Payment, CM shall procure and/or provide to Owner any and all documentation requested evidencing net actual costs for insurance and bonds for the Project to the CM;

6.3.1.8 Permit fees, licenses, royalties, and deposits lost for causes other than CM's negligence;

6.3.1.9 Costs incurred due to an emergency related to the Project, which affects the safety of persons and property for causes other than CM's negligence;

6.3.1.10 Costs of correction of the Work that are not attributable to negligence or willful or wanton misconduct of CM or subcontractors shall be submitted to the Owner for review and consideration of reimbursement;

6.3.1.11 For all Preconstruction Phase Services as defined herein and including, but not limited to, attending meetings, programming, providing schematic and design development estimates, constructability reviews, pricing alternates and value engineering, prequalifying subcontractors, developing subcontractor bid packages and preparing the GMP, CM shall receive

Preconstruction Costs in the amount of 0.35% of the anticipated Construction Cost Estimate as the total compensation for Preconstruction Services. CM shall invoice Preconstruction Costs monthly and such costs shall be based upon the percent completion of the designated portion of the Preconstruction Services for each particular month as determined by Owner and an itemized statement of reimbursable expenses incurred for such month, respectively, and Owner's receipt of CM's written invoice for such payment. CM's invoices shall be in a form reasonably acceptable to Owner and be accompanied by such other information, documentation, and materials as Owner may reasonably require. The final invoice for Preconstruction Services shall not be submitted until either (i) the GMP Amendment is executed for the entire Work but prior to construction starting, or (ii) the parties fail to reach agreement on the GMP Amendment and Owner elects to terminate the Agreement as provided herein, whichever occurs first; and

6.3.1.12 Costs associated with the Investigative Report in the total amount of **$NA** will be invoiced monthly and will be paid for by the Owner at the time of GMP approval.

6.3.1.13 Costs not included in the Total "Not to Exceed" Reimbursable Costs listed in 6.1 above:

Safety Awards	(to be billed at 0.16**%** of the Contract Amount)
General Liability Insurance	(to be billed at 1.46**%** of the Contract Amount)
Performance and Payment Bond (CM)	(to be billed at 0.97**%** of the Contract Amount)
Builder's Risk Insurance	(to be billed at Invoice Amount)
Preconstruction Costs	(to be billed per 6.3.1.11)

6.4 **Costs Not to Be Reimbursed**

6.4.1 The Cost of Work shall not include:

6.4.1.1 Salaries and other compensation of the CM's personnel stationed at the CM's principal office or offices other than the JOBSITE office;

6.4.1.2 Expenses of the CM's principal office and offices other than the JOBSITE office;

6.4.1.3 Off-site overhead and general expenses;

6.4.1.4 The CM's capital expenses, including interest on the CM's capital employed for the Work; and

6.4.1.5 Special items outlined in **Exhibit F**.

ARTICLE 7
UNFORESEEN CONDITIONS FUND

7.1 The unforeseen condition fund within the GMP shall be 3-5% of the construction cost and shall be used at the discretion of the Owner. Notwithstanding anything to the contrary herein, the fund will be spent only for changes due to unforeseen conditions, Owner requests, alternatives, items initially value engineered that may be able to be added back to the scope of Project and other legitimate costs of the Project. The CM shall maintain a current listing of the unforeseen conditions transactions and it shall be available to the Construction Team at all times. To the extent the amount of Unforeseen Conditions Fund is insufficient to cover the costs of the additional work attributable to the Unforeseen Condition, the Owner may issue a Change Order or Amendment under Article 8 herein to cover any excess costs. Unspent unforeseen condition funds shall be returned to Owner if not used on the Project.

7.2 If a dispute arises in connection with CM's claim of unforeseen conditions, the dispute resolution procedure set forth in the Contract Documents shall be complied with by the parties.

ARTICLE 8
CHANGES IN THE PROJECT

8.1 Change Orders and Amendments

8.1.1 The Owner, without invalidating this Agreement, may order changes in the Project within the general scope of this Agreement consisting of additions, deletions or other revisions. All changes in the Project, which are not authorized expenses under the Unforeseen Conditions Fund under Article 7 herein shall be authorized by Change Order or Amendment and signed by the Owner before the change is implemented. The GMP and the construction completion date will be adjusted only in accordance with an approved Change Order or Amendment. Except in an emergency endangering life or property, no additions, deletions or other revisions shall be made except upon written order of Owner as described herein, and Owner shall not be liable to CM for any increased compensation or adjustment to the completion date without such written order. Accordingly, no course of conduct or dealings between the parties, nor express or implied acceptance of alterations or additions to the Work, and no claim that Owner has been unjustly enriched by any alteration of or addition to the Work, whether or not there is, in fact, any unjust enrichment to the Work, shall be a basis of any claim to an increase in any amounts due under the Contract Documents or a change in any time period provided in the Contract Documents. All Change Orders and Amendments shall be approved by the Owner. CM agrees to provide, and shall require all Subcontractors to provide, accurate and sufficient cost data to enable Owner to evaluate the appropriate value of all labor, materials and equipment associated with the Change Order including labor by hours and rate, materials, supplies, taxes and insurance and any other reasonable documentation requested by the Owner.

8.1.2 A Change Order or Amendment is a written order to the CM signed by the Owner issued after the execution of this Agreement, authorizing a change in the Project, CM's fee, or the construction completion date. Each adjustment in the GMP resulting from a Change Order or Amendment shall clearly identify the amount attributable to the addition, deletion or other revision.

8.1.3 In the event a requested change is approved by Owner that results in either an increase or decrease to the Contract Amount, a Change Order or Amendment shall be issued, which increases or decreases the GMP by the full amount of CM's actual direct and indirect costs including overhead and profit and general conditions that are to be paid to CM and Subcontractors or sub-subcontractors. Such Change Order or Amendment shall be supported by full documentation of all costs in an itemized cost estimate including labor by hours and rate, materials, supplies, taxes and insurance, and any other documentation required to allow Owner to properly evaluate the cost estimate. The costs of such Change Order or Amendment shall be determined in accordance with Section 5.3.4.9 above as it relates to mark-ups for Subcontractors and sub-subcontractors and/or in one or more of the following ways:

8.1.3.1 By mutual acceptance of a lump sum properly itemized and supported by sufficient data to permit evaluation by the A/E and Project Director;

8.1.3.2 By unit prices stated in the agreement or subsequently agreed upon;

8.1.3.3 By costs defined in Article 6 and a mutually acceptable fixed or percentage fee; and/or

8.1.3.4 By the method in Article 8.2.

8.2 If the above methods in 8.1.3.1 through 8.1.3.3 are not agreed upon, the CM, provided it receives a written order signed by the Owner, shall promptly proceed with the work involved. Work shall then be determined on the basis of the reasonable expenditures and savings of those performing the work attributed to the change. In the event a Change Order or Amendment is issued under these conditions, the A/E will establish an estimated cost of the work and the CM shall not perform any work whose cost exceeds that estimate without prior written approval of the Owner.

8.3 Claims for Additional Cost or Time

8.3.1 All claims for additional cost or time shall be made by a request for Change Order or Amendment within fourteen (14) days of the date, or within a time period otherwise agreed to by Owner in writing, the CM knew or reasonably should have known of the circumstance that may, in CM's opinion, be a change to the Project that justifies a Change Order or Amendment. Only delays that are determined to extend the critical path in the Construction Schedule will result in a time extension.

8.4 Minor Changes

8.4.1 The A/E will have authority to order minor changes in the Project not involving an adjustment to the GMP or any extension of the construction completion date and consistent with the intent of the Construction Documents. Such changes shall be effectuated by written approval of the Owner and CM. Documentation of the changes shall be determined by the Construction Team.

ARTICLE 9
DISCOUNTS AND PENALTIES

9.1 All discounts for prompt payment shall accrue to the Owner to the extent the cost of the Project is paid directly by the Owner or from a fund made available by the Owner to the CM. To the extent permitted by applicable law, all trade discounts, rebates and refunds including, but not limited to insurance premiums, and all returns from sale of surplus material and equipment shall belong to the Owner regardless of when issued and shall be credited to the cost of the Project. To the extent that any discounts, rebates and refunds occur or accrue subsequent to Final Completion of the Project, such funds shall be paid to Owner within fifteen (15) days of receipt by CM. All penalties incurred due to the fault of the CM for late payment of the cost of the Project, except, late payments by Owner, will be paid by the CM.

9.2 Savings will be computed as of the date of Final Completion and shall consist of the difference between (1) the GMP (as it may be adjusted in accordance with the terms of the Contract Documents) and (2) the total aggregate sum of the Cost of Work plus the CM Fee paid by Owner and shall accrue to the sole benefit of Owner. A deductive Change Order or Amendment shall be issued reducing the GMP by the amount of such savings. For the avoidance of doubt, any savings obtained may not be moved to the Unforeseen Conditions Fund or be used to offset cost overruns in other items within the GMP without prior written consent of the Owner.

ARTICLE 10
CONTRACT TIME, TIME EXTENSIONS AND LIQUIDATED DAMAGES

10.1 Contract Time and Extensions

10.1.1 CM shall diligently pursue the completion of the Work and coordinate the work being done on the Project by its subcontractors and materialmen, as well as coordinating its work with all work of others at the Project site, so that its work or the work of others shall not be delayed or impaired by any act or omission by CM or anyone for whom CM is responsible or liable.

10.1.2 Should CM actually be obstructed or delayed in the critical path of the prosecution of, or completion of, the Work as a result of unforeseeable causes: (a) beyond the control of CM, (b) not due to CM's fault or neglect, and (c) which could not be avoided by the exercise of reasonable diligence, including: (i) acts of God or of the public enemy, (ii) acts of government, (iii) fires, (iv) floods, (v) epidemics, (vi) quarantine regulation, (vii) strikes, (viii) lockouts, or (ix) weather conditions abnormal for the period of time (as defined below) which exceed the aggregate number of days allotted for adverse weather conditions in CM's schedule approved by Owner, CM shall notify Owner and A/E in writing within five (5) days after the commencement of such delay, unless otherwise agreed to between the parties in writing, which time period shall control over any conflicting time periods specified elsewhere herein, stating the cause or causes thereof, or be deemed to have waived any right which CM may have had to request a time extension therefor. "Abnormal for the period of time" for purposes of this Section means rain or bad weather (e.g. named tropical storms or hurricanes), only when such rain or bad weather is in excess of the ten (10) year average for that specific period of time (from its commencement to its conclusion, as compared with the historical data for that same period) as published by the National Oceanic and Atmospheric Administration for the area where the Project is located.

10.1.3 CM's Construction Schedule shall allow the number of days it deems necessary for rain and bad weather when CM prepares its schedule and not every day of adverse weather conditions abnormal for the period of time shall be grounds for an extension of time. CM and Owner acknowledge that any Project site rain gauge measurements will not be relied upon for determining rain fall amounts. CM shall use commercially reasonable efforts to mitigate the effects of any delays described in this Section so as to minimize any effect on the schedule for completion of the Work.

10.1.4 No Damages for Delay – CM's exclusive remedy for delay in the performance of the Work required by the Agreement caused by events beyond its control, including delays claimed to be caused by or attributable to the Owner or A/E and claims based on breach of the Agreement or negligence, shall be an extension of Contract Time. CM expressly acknowledges and agrees that it is not entitled to receive damages for delay. However, if final completion of the Work is materially delayed through no fault of the CM and CM suffers direct costs from such delay, CM may submit a proposed Change Order or Amendment to Owner for consideration.

10.2 Liquidated Damages

10.2.1 It is hereby understood and mutually agreed, by and between CM and Owner, that the Contract Time for completion of the Work indicated in the Contract Documents is a reasonable time period in which to complete the Work and achieve Substantial and Final Completion for the Project.

10.2.2 Time is of the essence in this Agreement. Owner and CM recognize that Owner will suffer financial loss if the Work associated with the Construction Phase is not substantially completed within the time specified in the GMP Amendment, as said time may be adjusted as provided for herein. In such event, the total amount of Owner's damages, will be difficult, if not impossible, to definitely ascertain and quantify, because this is a public construction project that will, when completed, benefit the public and enhance the delivery of valuable education to the public, in Manatee County, Florida.

10.2.3 It is hereby agreed that it is appropriate and fair that Owner receive liquidated damages from CM, if CM fails to achieve Substantial Completion of the Work within the required Contract Time. Should CM fail to achieve Substantial Completion of the work within the Contract Time or as otherwise required by the Contract Documents, the Owner shall be entitled to assess as liquidated damages, but not as a penalty, against CM and/or its Surety, the following per diem amounts commencing upon the first day following expiration of the Contract Time and continuing each calendar day until the actual date of Substantial Completion is achieved.

Contract Amount			**Liquidated Damages Per Calendar Day**
$1,000	to	$20,000	$100
20,001	to	75,000	200
75,001	to	150,000	500
150,001	to	350,000	750
350,001	to	750,000	800
750,001	to	1,000,000	1,000
1,000,001	to	2,000,000	1,200
2,000,001	to	3,000,000	1,500

3,000,001	to	4,000,000	1,600
4,000,001	to	5,000,000	1,700
5,000,001	to	6,000,000	1,800
6,000,001	to	7,000,000	1,900
7,000,001	to	8,000,000	2,000
8,000,001	to	9,000,000	2,100
9,000,001	to	10,000,000	2,200
10,000,001	to	11,000,000	2,300
11,000,001	to	12,000,000	2,400
12,000,001	and over		2,500

10.2.4 The Liquidated Damages amount per calendar day are fixed and agreed upon by and between the CM and the Owner because of the impracticality and difficulty of ascertaining actual damages the Owner will sustain. It is agreed that the liquidated damages amount per calendar day is adequate to cover damages, which the Owner will sustain by reason of inconvenience, loss of use, loss of monies, and additional costs of contract administration by the A/E and Owner.

10.2.5 Permitting the CM to continue to finish the Work or any part of the Work after time fixed for its completion or after date to which time for completion may have been extended shall in no way constitute a waiver on the part of the Owner of any rights under the Agreement.

10.2.6 Owner may deduct liquidated damages prescribed in this section from any unpaid amounts then or thereafter due CM under the Agreement and any liquidated damages not so deducted shall be payable to Owner by CM upon demand by Owner plus interest from the date of demand at the maximum legal rate of interest until paid.

10.2.7 It is further mutually understood and agreed that Owner's assessment of liquidated damages for delays is intended to compensate Owner solely for CM's failure to substantially complete the Work in the Contract Time and shall not release CM from liability from any other breach of Agreement requirements.

10.2.8 If the liquidated damages set forth herein are deemed unenforceable for any reason, Owner instead shall be entitled to recover those actual delay damages that it sustained as a result of CM's failure to achieve Substantial Completion of the Work.

10.2.9 Liquidated Damages shall be assigned to the CM if punch list items have not been completed within ninety (90) days after Substantial Completion. The value of punch list items shall be determined by the A/E and multiplied by two (2). This value shall be withheld until the item has been completed. In addition, the Owner may obtain the services of others to complete unfinished punch list items after ninety (90) days have expired. Costs for this work shall be deducted from the CM's final payment. Liquidated Damages for punch list items shall commence on the ninety-first (91st) day after Substantial Completion and accrue until the final Application for Payment has been approved by the A/E. The CM, and its Surety, shall pay to the Owner any sums hereinafter stipulated as fixed, agreed, and liquidated damages for each calendar day of delay until the punch list items are complete.

200% of Estimated Cost To Complete Punchlist			Liquidated Damages Per Day
$1,000	to	$25,000	$100
25,001	to	50,000	125
50,001	to	100,000	150
100,001	to	250,000	175
250,001	to	500,000	200
500,001	to	1,000,000	250
1,000,001	to	2,000,000	300
2,000,001	to	3,000,000	375
3,000,001	to	4,000,000	500
4,000,001	to	5,000,000	625
5,000,001	to	6,000,000	750
6,000,001	to	7,000,000	875
7,000,001	to	8,000,000	1,000
8,000,001	to	9,000,000	1,125
9,000,001	to	10,000,000	1,250
10,000,001	to	11,000,000	1,375
11,000,001	to	12,000,000	1,500
12,000,001	and over		$12.50 per $100,000

10.2.10 "Days" means consecutive calendar days unless a contrary intent is specifically indicated with regard to any reference to the word "days."

10.2.11 The term "business day" as used herein shall mean all days of the week excluding Saturdays, Sundays and all legal holidays observed by Owner.

ARTICLE 11
PAYMENTS TO THE CONSTRUCTION MANAGER

11.1 Progress Payments

11.1.1 At the time it submits its GMP Proposal to Owner, CM also shall submit to Owner and A/E, for their review, a GMP Budget Summary, which will become the Schedule of Values and is based upon the GMP Proposal listing the major elements of the Work and the dollar value for each element and, if required by Owner, broken down further into the major elements of the Work to be completed during the various phases of the Work. That revised Schedule of Values, as further revised to reflect the final negotiated GMP amount and as approved by Owner, will be attached to the GMP Amendment and shall be used as the basis for CM's monthly Applications for Payment thereafter. This revised Schedule of Values shall be updated for the current month Change Orders and Amendments and submitted each month to A/E along with a completed and notarized copy of the Construction Manager's Application and Certificate for Payment ("**Application for Payment**") form attached to the Agreement as **Exhibit A**.

11.1.2 Each month, the CM shall complete and submit to the Owner the sworn, notarized CM Application for Payment attached hereto as in **Exhibit A** together with an updated Schedule of Values and cost reports required under Article 2 and **Exhibit E**, which detail all costs spent, costs accumulated, or costs incurred in completing the Work during the previous period, plus the amount of the CM Fee that is due as provided in Article 6. Owner shall pay CM any undisputed amounts of CM's Application for Payment within

twenty-five (25) business days of Owner's receipt of same. General Conditions and/or General Requirements shall be paid based on the percentage of Work completed on site, with the exception of CM's initial Application for Payment which may include reimbursement for Bond costs. Owner shall have the right to verify and substantiate any amounts listed within the CM's Application for Payment. Five percent (5%) retainage, or the maximum allowed by applicable law, shall be held on all payments; however, when approved by the Owner, certain suppliers and subcontractors may be paid the entire amount due at the Owner's discretion. At the Owner's discretion, the Owner may pay CM the entire amount due without holding retainage for the CM's General Requirements, the CM's Fee, Insurance and Bond Costs. Owner reserves the right, at its sole discretion, to reduce or release any portion of such retainage prior to final payment; provided, however, nothing in this Section shall preclude or limit Owner's right to withhold payment as otherwise permitted by the terms of the Contract Documents or as permitted by law. Any reduction or release of retainage, or portion thereof shall not be a waiver of (i) any of Owner's rights to retainage in connection with other payments to CM, or (ii) any other right or remedy that Owner has under the Contract Documents, at law or in equity. Upon request, CM shall provide Releases and Affidavits and Waivers of Right to Claim Against the Payment Bond, in the form required by the Owner.

11.1.3 In addition to the CM certifications set forth in the Application for Payment form attached as **Exhibit A**, the CM's submission of each Application for Payment to Owner shall also constitute a representation by CM to Owner that: (1) there are no liens or claims outstanding or known to exist at the date of the Application for Payment; (2) duly executed waivers and releases have been obtained from all subcontractors and suppliers for work done and materials furnished through the date of payment; and (3) such Application for Payment has not been front-end-loaded either by CM or by any of its subcontractors or suppliers (including placing a value on a line item that is in excess of its cost, increasing unit prices on early completed items while decreasing unit prices on later completed ones, and/or inflating the percentage of completion on line items).

11.1.4 All Applications for Payment to the Owner must be submitted to the Project Director at the address identified herein. Payments to CM shall in no way imply approval or acceptance of CM's work.

11.2 Payments to Subcontractors

11.2.1 The CM shall promptly, within 10 days after receipt of payment from the Owner, pay all the amount due subcontractors less a retainage of five percent (5%), or the maximum retainage amount allowed by applicable law, based on the CM's evaluation of the subcontractor's acceptable performance. If there should remain items to be completed, the CM and A/E shall list those items required for completion and the CM shall require the retainage of a sum equal to two times the estimated cost of completing any unfinished items, provided that said unfinished items are listed separately and the estimated cost of completing any unfinished items likewise listed separately. Thereafter, the CM shall pay to the subcontractors, monthly, the amount retained for each incomplete item after each of said items is completed. Before issuance of final payment without any retainage, the subcontractor shall submit satisfactory evidence that all payrolls, material bills and other indebtedness connected with the Project have been paid or otherwise satisfied, warranty information is complete, as-builts have been submitted and instructions for the Owner's operating and maintenance personnel is complete.

11.2.2 To the extent a subcontractor has not completed the work in accordance with the Construction Documents (or CM disputes the subcontractor's invoice or pay request in good faith) and the CM notifies the party whose payment is disputed, in writing, of the amount in dispute and the actions required to cure the dispute, the CM may withhold the disputed portion of the payment. Should the CM withhold any payment to a subcontractor, the CM shall provide a weekly report to the Owner listing all outstanding payments to subcontractors. Upon request, the CM shall return the disputed payment to the Owner and CM shall provide a credit to the costs of the Project in the CM's next Application for Payment in the amount of any interest earned on any such disputed payment.

11.2.3 Final payment may be made to certain select subcontractors whose work is satisfactorily completed prior to the total completion of the Project but only upon approval by the Owner, CM and A/E.

11.3 Final Payment to CM

11.3.1 Final Payment constituting the unpaid balance of the Cost of the Project and the CM's fee, shall be due and payable after the Owner has accepted occupancy of the Project, provided that the Project be then finally completed, that the CM has verified by its signature that it has completed all items specified on the attached **Exhibit C**, and that this Agreement has been finally performed. However, if there should remain work to be completed, the CM and the A/E shall list those items prior to the CM receiving final payment. The Owner may retain a sum equal to two times the estimated cost of completing any unfinished work and a portion of the CM's retainage, provided that said unfinished items are likewise listed separately. Thereafter, Owner shall pay to the CM, monthly, the amount retained for each incomplete item after each of said items is completed.

11.4 Payment requests shall be processed and paid in accordance with Part VII, Chapter 218, *Florida Statutes*, known as the Florida Prompt Payment Act, and the terms of this Agreement.

11.4.1 The parties shall develop a single list of items (or if the Project relates to construction of more than one building or structure or is multi-phased, a list of items for each building, structure or Project phase) required to render complete, satisfactory, and acceptance of the construction services. The parties shall specify a process for developing the list, including the responsibilities of Owner and CM in developing and reviewing the list and a reasonable time for developing the list:

11.4.1.1 For construction projects having an estimate cost of less than $10 million, the list shall be developed within thirty (30) calendar days after reaching Substantial Completion; or

11.4.1.2 For construction projects having an estimated cost of $10 million or more, the list shall be developed within thirty (30) calendar days, or, if extended by agreement between the parties, up to sixty (60) calendar days after reaching Substantial Completion of the construction services.

11.4.2 The list of items shall be delivered within five (5) days after the list has been developed and reviewed in accordance with the sections listed above.

11.4.3 The Final Completion date shall be at least thirty (30) days after the delivery of the list of items. If the list is not provided to the CM by the agreed upon date for delivery of the list, the Contract Time for Final Completion must be extended by the number of days the Owner exceeded the delivery date. However, damages may not be assessed against the CM for failing to complete the Project within the time required by the Agreement unless the CM failed to complete the Project within the Contract Time as extended within this Section.

11.4.4 The failure to include any corrective work or pending items not yet completed on the list does not alter the responsibility of the CM to complete all of the construction services under the Agreement.

11.4.5 Upon completion of all items on the list, the CM may submit a payment request for all remaining retainage withheld by the Owner. If a good faith dispute exists as to whether one or more items identified on the list have been completed pursuant to the Agreement, the Owner may continue to withhold up to 150 percent (150%) of the total costs to complete such items.

11.4.6 All items that require correction under the Agreement and that are identified after preparation and delivery of the list remain the obligation of CM as defined within the Agreement.

11.4.7 Warranty items or items not included in the list of items may not affect the final payment of retainage as provided herein or as provided in the Agreement between the CM and subcontractors and suppliers.

11.4.8 Should the Owner fail to comply with its duties to develop the list required herein within the time limitations, the CM may submit a payment request for all remaining retainage withheld by the Owner and payment of any remaining undisputed Contract Amount, less any amount withheld pursuant to the Agreement for incomplete or uncorrected Work, must be paid within twenty (20) business days after receipt of a proper invoice or Application for Payment.

11.4.9 If Owner provides CM within written notice specifying the failure of CM to meet the contract requirements in the development of the list of items to be completed, the Owner is not required to pay or process any Application for Payment for retainage if the CM has, in whole or in part, failed to cooperate with Owner in the development of the list or to perform its duties under the Agreement with regard to the development of the list or if there are items requiring correction that are identified after the preparation and delivery of the list (that will remain the obligation of the CM).

11.5 Payments for Materials and Equipment

11.5.1 Payments will be made for material and equipment not incorporated in the work but delivered and suitably stored at the site or another location subject to prior approval and acceptance by the Owner on each occasion.

ARTICLE 12
INSURANCE, INDEMNITY AND WAIVER OF SUBROGATION

12.1 Indemnity

12.1.1 To cover to the fullest extent permitted by law, the CM shall indemnify, and hold harmless the Owner, the A/E, the A/E consultants, and agents and employees of any of them from and against all claims, damages, losses, expenses, penalties, demands, judgments, actions, proceedings, losses or costs, including reasonable attorneys' fees and paralegals' fees, whether resulting from any claimed breach of the Agreement by CM or arising out of or resulting from the performance of the Work, provided that any such claim, damage, loss, expense, direct or consequential damages, or economic loss is attributable to bodily injury, sickness, disease or death, or injury to or destruction of tangible property including the loss of use resulting therefrom, but only to the extent caused by the negligent acts or omissions, recklessness, or intentional wrongful misconduct of the CM, a Subcontractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, regardless of whether or not such claim, damage, loss, or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge or otherwise reduce any other right to obligation of indemnity which would otherwise exist as to any party or person described in this Section.

12.1.2 In any and all claims against the Owner, the A/E, the A/E consultants, and agents and employees of any of them by any employee of the CM, any Subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligations under this Section shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the CM or any Subcontractor under workers' compensation acts, disability benefit acts or other employee benefit acts.

12.1.3 CM's indemnification obligations including those specified within this Section, shall be deemed to fully comply with Section 725.06, *Florida Statutes*, including any amendments thereto, in all respects. If any word, clause or provision of any of the indemnification provisions of the Agreement is determined not to be in compliance with Section 725.06, *Florida Statutes*, including any amendments thereto, it shall be stricken and the remaining words, clauses and provisions shall remain in full force and effect. It is the intent of the parties that CM's indemnification obligations comply fully with Section 725.06, *Florida Statutes*, including any amendments, in all respects. CM's indemnification obligations in the Agreement are in addition to and not in lieu of any common law indemnification to which any of the indemnified parties are entitled.

12.1.4 The Owner shall cause any other CM who may have a contract with the Owner to perform construction installation work in the area where work will be performed under this Agreement, to agree to indemnify the Owner and the CM and hold them harmless from all claims for bodily injury and property damage (other than property insured under this Agreement) that may arise from the CM's operations. Such provisions shall be in a form satisfactory to the CM.

12.2 CM Insurance

12.2.1 During the term of the Agreement or for such longer period as specified in the Contract Documents or required by applicable law, CM shall provide, pay for, and maintain the types of insurance described herein by an insurance company duly licensed and authorized by the Department of Insurance of the State of Florida to transact the appropriate insurance business in the State of Florida. The CM shall not commence any construction Work in connection with this Agreement until it has obtained all of the following types of insurance and such insurance has been approved by the Owner, nor shall the CM allow any subcontractor to commence work on any subcontract until all similar insurance required of the subcontractor has been so obtained and approved. The procuring of required policies of insurance shall not be construed to limit CM's liability or to fulfill the indemnification provisions and requirements of the Agreement.

12.2.2 If any insurance provided pursuant to the Agreement expires prior to the completion of the Services required hereunder, renewal Certificates of Insurance and, if requested by Owner, copies of the renewal policies and applicable additional insured endorsements, shall be furnished to Owner fifteen (15) calendar days prior to the date of expiration. CM shall also notify Owner, in a like manner, within two (2) days after receipt, of any notices of expiration, cancellation, non-renewal or material change in coverages or limits received by CM from its insurer, and nothing contained herein shall relieve CM of this requirement to provide notice.

12.2.3 Owner shall retain the right to review, at any time, coverage, form, and amount of insurance. Should at any time CM not maintain the insurance coverages required in the Agreement, Owner may cancel the Agreement and any Amendments issued pursuant to the Agreement or at its sole discretion shall be authorized to purchase such coverages and charge CM for such coverages purchased. If CM fails to reimburse Owner for such costs within thirty (30) calendar days after demand, Owner has the right to offset these costs from any amount due CM under the Agreement. Owner shall be under no obligation to purchase such insurance, nor shall it be responsible for the coverages purchased or the insurance company/companies used. The decision of Owner to purchase such insurance coverages shall in no way be construed to be a waiver of its rights under the Agreement.

12.2.4 Certificates of Insurance

12.2.4.1 CM shall deliver to Owner properly executed Certificate of Insurance forms and required additional insured endorsements in form acceptable to Owner, evidencing the fact that CM has acquired and put in place the insurance coverages and limits required hereunder. These shall be completed and signed by the authorized Florida Resident Agent, and returned to the Department of Construction Services. The Certificate(s) shall be dated and show:

(a) The name of the insured CM, the specific job by name and number, the name of the insurer, the number of the policy, its effective date, and its termination date;

(b) Statement that the Insurer will mail notice to the Owner and a copy to the A/E at least fifteen (15) days prior to any material changes in provisions or cancellation of the policy;

(c) Certificates of Insurance shall be in the form as approved by Insurance Services Office (ISO) and such Certificate shall clearly state all the coverages required within this Agreement; and

(d) The Owner shall be named as additional insured on the CM's commercial general liability, excess or umbrella liability and builder's risk policy or policies.

12.2.5 The acceptance by Owner of any evidence of the insurance coverages and limits required by the Agreement, including any Certificate of Insurance, policy or additional insured endorsement, does not constitute approval or agreement by Owner that the insurance requirements have been met or that the insurance policies shown on the evidence of insurance comply with the requirements of the Agreement.

12.2.6 All insurance policies required by the Agreement shall include the following provisions and conditions by endorsement to the policies:

12.2.6.1 All insurance policies, other than the Professional Liability policy and the Workers Compensation policy, provided by CM to meet the requirements of the Agreement shall name The School Board of Manatee County, Florida, as that name is defined herein, as an additional insured as to the operations of CM under the Contract Documents. The Owner shall be listed as an additional insured for claims caused in whole or in part by the CM's negligent acts or omissions for which loss occurs during completed operations. The additional insured language shall be primary and non-contributory to any of the Owner's general liability insurance policies and shall apply to both ongoing and completed operations. The term "**The School Board of Manatee County**" shall include the Manatee County Public Schools, the Manatee County School Board, a body corporate, the School District of Manatee County and all Authorities, Boards, Bureaus, Commissions, Divisions, Departments and offices thereof and individual members, officers and employees thereof in their official capacity, and/or while acting on behalf of the Manatee County School Board.

12.2.6.2 All insurance coverages of CM shall be primary to any insurance or self-insurance program carried by Owner applicable to the Agreement, and the "Other Insurance" provisions of any policies obtained by CM shall not apply to any insurance or self-insurance program carried by Owner applicable to the Agreement.

12.2.6.3 Insurance requirements itemized in the Agreement and required of CM shall be provided on behalf of all subcontractors to cover their operations performed under the Agreement. CM shall be held responsible for any modifications, deviations, or omissions in these insurance requirements as they apply to subcontractors.

12.2.7 <u>Worker's Compensation Insurance</u>

12.2.7.1 During the life of this Agreement, the CM shall take out and maintain Worker's Compensation Insurance for all its employees connected with the work of this Project and, in case any work is sublet, the CM shall require the

subcontractor similarly to provide Worker's Compensation Insurance for all of the latter's employees unless such employees are covered by the protection afforded by the CM. Such insurance shall comply with the Florida Worker's Compensation Law and include the effects of all discounts, modifiers and rebates. In case any class of employees engaged in hazardous work under this Agreement at the Project site is not protected under the Worker's Compensation statute, the CM shall provide adequate insurance, satisfactory to the Owner, for the protection of employees not otherwise protected.

12.2.8 CM's General Liability and Property Damage Insurance

12.2.8.1 During the life of this Agreement, the CM shall take out and maintain Comprehensive General Liability Insurance as shall protect the CM from claims for damage for personal injury, including accidental death, as well as claims for property damages which may arise from operating under this Agreement whether such operations are by CM or by anyone directly or indirectly employed by CM.

12.2.8.2 The general liability insurance shall be written on an "occurrence" basis, shall be maintained by CM and shall provide coverage for claims including (1) damages because of bodily injury, sickness or disease, including occupational sickness or disease, and death of any person; (2) personal injury and advertising injury; (3) damages because of physical damage to, or destruction of, tangible property, including the loss of use of such property; (4) bodily injury or property damage arising out of completed operations; and (5) CM's indemnity obligations under the Agreement.

12.2.8.3 The general liability insurance shall provide "XCU" (explosion, collapse, underground damage) coverage for those classifications in which they are excluded, Broad Form Property Damage Coverage, Products and Completed Operations Coverages, and Contractual Liability Coverage designed to protect the CM for contractual liabilities assumed by the CM in the performance of this Agreement to the extent covered by a standard Insurance Standards Office (ISO) General Liability policy. Completed Operations coverage must be maintained by CM for not less than five (5) years following completion and acceptance by Owner of the Work performed by CM.

12.2.8.4 The general liability insurance shall not contain an exclusion or restriction of coverage for claims by one insured against another insured, if the exclusion or restriction is based solely on the fact that the claimant is an insured and there would otherwise be no coverage for the claim; claims for property damage to the CM's Work arising out of the products-completed operations hazard where the damaged Work or the Work out of which the damage arise was performed by a subcontractor; and claims related to roofing if the Work involves roofing. Coverage shall not eliminate the subcontractor exception to "damage to your work" exclusion.

12.2.8.5 The amount of such general liability insurance shall be minimum limits as follows:

CM Comprehensive General Liability Coverage, Bodily Injury and Property Damage	$1,000,000 each Occurrence Combined Single Limit

Insurance clauses for both BODILY INJURY AND PROPERTY DAMAGE shall be amended to provide coverage on an occurrence basis.

12.2.9 Automobile Liability Insurance

12.2.9.1 During the life of this Agreement, the CM shall take out and maintain automobile liability insurance as to ownership, maintenance, and use, including loading and unloading, of all owned, non-owned, leased or hired vehicles with limits of not less than:

Automobile Liability Coverages, Bodily Injury and Property Damage	$100,000 Each Occurrence Combined Single Limit

12.2.10 Subcontractor's General Liability and Property Damage Insurance

12.2.10.1 During the life of the subcontracts, the CM shall require each of its subcontractors to procure and maintain insurance of the type specified above or insure the activities of its subcontractors in the CM's policies in an amount that is appropriate for the work to be performed.

12.2.11 Owner's and Construction Manager's Protective Liability Insurance

12.2.11.1 The CM shall procure and furnish, as a cost of the Project, an Owner's and CM's Protective Liability Insurance Policy with the following minimum limits:

Bodily Injury Liability and Property Damage Liability	$1,000,000 each Occurrence Combined Single Limit

12.2.12 Umbrella Liability Insurance or Excess Liability Insurance

12.2.12.1 During the life of this Agreement, the CM shall take out and maintain umbrella liability or excess liability insurance. Coverage shall be excess of the Employers Liability, Commercial General Liability and Automobile Liability coverages required herein. The amount of such umbrella liability or excess liability insurance shall be minimum limits as follows:

Excess Liability, Umbrella Form	$3,000,000 each Occurrence Combined Single Limit

12.2.13 Builder's Risk Coverage

12.2.13.1 During the life of this Agreement, the CM shall take out and maintain a "Builder's Risk Policy" completed value form as a cost of the Project, issued to provide coverages on an "all risk" basis including theft and stored materials. This coverage shall not be lapsed or cancelled because of partial occupancy by the Owner prior to Substantial Completion of the Project. The policy shall have a deductible in an amount acceptable to the Owner and that meets the industry standards and any losses not covered by insurance shall be paid by the Owner out of unforeseen conditions and the Owner shall be listed as an additional insured. Builder's Risk coverage may be waived by the Owner on existing schools, sites or campuses.

12.3 Waiver of Subrogation

12.3.1 The Owner and the CM waive all rights against each other, for damages caused by perils covered by insurance provided under Article 12 to the extent covered by such insurance except such rights as they may have to the proceeds of such insurance held by the Owner and CM as trustees. The CM shall require similar waivers from all subcontractors and their subcontractors.

12.3.2 The Owner and CM waive all rights against each other for loss or damage to any equipment used in connection with the Project and covered by any property insurance. The CM shall require similar waivers from all subcontractors and their sub-subcontractors.

12.3.3 The Owner waives subrogation against the CM on all property and consequential loss policies carried by the Owner on adjacent properties and under property and consequential loss policies purchased for the Project after its completion.

12.3.4 If the policies of insurance referred to in this Article require an endorsement to provide for continued coverage where there is a waiver of subrogation, the Owner of such policies will cause them to be so endorsed, failure to obtain proper endorsement nullifies the waiver of subrogation.

ARTICLE 13
TERMINATION

13.1 Termination by the CM

13.1.1 If the Project is stopped for a period of thirty (30) days under an order of any court or other public authority having jurisdiction or as a result of an act of government other than the Owner, such as a declaration of a national emergency making materials unavailable, through no act or fault of the CM, upon seven (7) days written notice to the Owner, terminate this Agreement and request payment for all work executed, the CM Fee earned to date, and for any proven loss sustained upon any materials, equipment tools, construction equipment, and machinery, demobilization, restocking and cancellation expenses incurred by the CM associated with early termination of the Work.

13.2 Owner's Right to Perform CM's Obligations and Termination by Owner for Cause

13.2.1 If the CM fails to perform any of its obligations under this Agreement including any obligation it performs with its own forces, the Owner may, after seven (7) days without correction, produce a written notice to the CM allowing fourteen (14) days to cure the problem. If during the 14-day period, the CM fails to perform such obligations and make good such deficiencies, the CM's Fee shall be reduced by the cost required to cure the deficiencies.

13.2.2 If the CM is adjudged bankrupt, or if it makes a general assignment for the benefit of its creditors, or if a receiver is appointed on account of its insolvency, or if it persistently or repeatedly refuses or fails, except in case for which extension of time is provided, to supply enough properly skilled workmen or proper materials and fails to maintain an established schedule (failure to maintain schedule shall be defined as any activity on the critical path that falls forty-five (45) days or more behind schedule), which has been adopted by the Construction Team, or if it fails to make prompt payment to subcontractors for materials or labor, or persistently disregards laws, rules, ordinances, regulations, or orders of any public authority having jurisdiction, or otherwise materially breaches a provision of the Agreement or the Contract Documents, then the Owner may, without prejudice to any right or remedy and after giving the CM and its surety, if any, seven (7) days written notice, during which period CM fails to cure the violation, terminate CM's right to proceed under the Agreement in whole or in part and take possession of the site and of all materials, equipment, tools, construction equipment and machinery thereon owned by the CM, and may finish the Project by whatever method it may deem expedient. In such case, the CM shall not be entitled to receive any further payment until the Project is finished nor shall it be relieved from its obligations assumed under Article 16. Reasonable termination expenses incurred by the Owner may be deducted from any payments left owing the CM (excluding monies owed the CM for subcontract work).

13.2.3 If the CM refuses to allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, *Florida Statutes*, and made or received by the CM in conjunction with this Agreement, then the Owner may, without prejudice to any right or remedy and after giving the CM and its Surety, if any, seven (7) days written notice, during which period CM still fails to allow access, terminate the employment of the CM and take possession of the site and of all materials, equipment, tools, construction equipment and machinery thereon, owned by the CM, and may finish the Project by whatever method it may deem expedient. In such case, the CM shall not be entitled to receive any further payment until the Project is finished nor shall it be relieved from its obligations assumed under Article 7. Reasonable termination expenses incurred by the Owner may be deducted from any payments left owing the CM (excluding monies owed to the CM for subcontract work).

13.3 Termination by Owner Without Cause

13.3.1 If the Owner terminates this Agreement without cause, CM's recovery against Owner shall be limited to the unpaid portion of the Contract Amount earned through the date of termination, together with any withheld retainage. The Owner shall also pay the CM fair compensation, either by purchase or rental at the election of the Owner, for any equipment retained. In case of such termination of the Agreement, the Owner shall further assume and become liable for obligations, commitments and unsettled contractual

claims that the CM has previously undertaken or incurred in good faith in connection with said Project. The CM shall, as a condition of receiving the payments referred to in this Article, execute and deliver all such papers and take all such steps including the legal assignment of its contractual rights, as the Owner may require for the purpose of fully vesting in him the rights and benefits of the CM under such obligations or commitments. CM shall not be entitled to any other or further recovery against Owner, including damages or any anticipated profit on portions of the Work not performed.

13.3.2 After the establishment of the GMP or at the completion of Stage III or any time thereafter, if the final cost estimates or a change in funding makes the Project no longer feasible from the standpoint of the Owner, the Owner may terminate this Agreement and pay the CM its proportionate CM Fee due in accordance with Article 6 plus any costs incurred pursuant to Articles 7 and 8. CM shall not be entitled to any other or further recovery against Owner, including damages or any anticipated profit on portions of the Work not performed.

ARTICLE 14
ASSIGNMENT, GOVERNING LAW, CLAIMS AND DISPUTE RESOLUTION

14.1 Subject to other provisions hereof, the Agreement shall be binding upon and shall inure to the benefit of the successors and permitted assigns of the parties to the Agreement.

14.2 Neither the Owner nor the CM shall assign its interest in this Agreement without the written consent of the other except as to the assignment of proceeds.

14.3 This Agreement shall be interpreted under and its performance governed by the laws of the State of Florida, without regard to its choice of law provisions.

14.4 Claims and Disputes

14.4.1 The term "Claim" as used herein shall mean any and all demands made by one party hereunder against the other party, whether such demand be for money, time or the assertion of any right or obligation that arises out of the Contract Documents.

14.4.2 Initial notice of Claims by CM shall be made in writing to Owner and A/E within seven (7) calendar days after the first day of the event giving rise to such Claim or else CM shall be deemed to have waived the Claim. Written supporting data shall be submitted to Owner and A/E within thirty (30) calendar days after the occurrence of the event, unless Owner grants additional time in writing, or else CM shall be deemed to have waived the Claim.

14.4.3 CM shall proceed diligently with its performance as directed by Owner, regardless of any pending Claim, unless otherwise agreed to by Owner in writing. Owner shall continue to make payments of undisputed amounts due in accordance with the Contract Documents during the pendency of any Claim.

14.4.4 Prior to the initiation of any action or proceeding permitted by this Agreement to resolve disputes between the parties, the parties shall make a good faith effort to resolve any such disputes by negotiation between representatives with decision-making power. Failing resolution, and prior to the commencement of any litigation between the parties with respect to the Project, the parties shall attempt to resolve the dispute through mediation

before an agreed-upon Circuit Court Mediator certified by the State of Florida. Should either party fail to submit to mediation as required hereunder, the other party may request a court of law to order mediation under Section 44.102, *Florida Statutes*.

14.5 Litigation

14.5.1 Any litigation between Owner and CM (which term for the purposes of this Section shall include CM's surety), whether arising out of any Claim or arising out of the Agreement or any breach thereof, shall be brought, maintained and pursued only in the appropriate State courts of the State of Florida; and Owner and CM each hereby waive and renounce any and all rights and options which they, or either of them, have or might have to bring or maintain any such litigation or action in the Federal Court system of the United States or in any United States Federal District Court. The exclusive venue of any such litigation between Owner and CM shall lie and be only in the appropriate State courts of the State of Florida's Twelfth Judicial Circuit in and for Manatee County, Florida. CM consents and submits to the jurisdiction of any such court and agrees to accept service of process from the State of Florida in any matter to be submitted to any such court.

14.5.2 In the event of any Claim or dispute arising out of the Agreement, the prevailing party shall be entitled to recover from the non-prevailing party its costs, including reasonable attorneys' fees (including fees for determining the amount of fees due) at all levels, including at trial, on appeal, and in bankruptcy and post-judgment proceedings.

14.6 Waiver of Claims for Consequential Damages

14.6.1 The CM and Owner waive Claims against each other for consequential damages arising out of or relating to this Agreement. The mutual waiver includes: (1) damages incurred by Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons; and (2) damages incurred by the CM for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, and for loss of profit, except anticipated profit arising directly from the Work.

ARTICLE 15
FORCE MAJEURE, FIRE OR OTHER CASUALTY

15.1 Force Majeure

15.1.1 Delays in any performance by any party contemplated or required hereunder due to: fire, flood, earthquake or hurricane, acts of God, war, declaration of hostilities, revolt, civil strife, altercation or commotion, strike, labor dispute, or epidemic, or any law, order, proclamation, regulation or ordinance of any government or any subdivision thereof, or for any other similar cause to those enumerated, beyond the reasonable control and which with due diligence could not have been reasonably anticipated and without the fault or negligence of the party seeking excuse from performance, shall be deemed to be events of Force Majeure and any such delays shall be excused. In the event such party is delayed in the performance of any work or obligation pursuant to this Agreement for any of the events of Force Majeure and any such delays shall be excused. In the event such party is delayed in the performance of any work or obligation pursuant to this Agreement for any of the events of Force Majeure, the date for performance required or contemplated by

this Agreement shall be extended by the number of calendar days such party is actually delayed in such Substantial Completion.

15.1.2 The party seeking excuse for nonperformance on the basis of Force Majeure shall promptly give written notice to the Owner, if with respect to the CM, or to the CM, if with respect to the Owner, specifying its, actual or anticipated duration, and weekly thereafter, if such delay shall be continuing, written notice stating whether the condition continues and giving its actual or then anticipated duration. Each party seeking excuse from nonperformance on the basis for Force Majeure shall use its best efforts to rectify any condition causing a delay and will cooperate with the other party, except that neither party shall be obligated to incur any unreasonable additional costs and expenses, to overcome any loss of time that has resulted.

15.2 Casualty: Actions by Owner and CM

15.2.1 During the construction period, if the Project, or any part thereof, shall have been damaged or destroyed, in whole or in part, the CM shall promptly make proof of loss and Owner and CM shall proceed promptly to collect, or cause to be collected, all valid claims which may have arisen against insurers or others based upon such damage or destruction.

15.2.2 The CM shall diligently assess the damages or destruction and shall prepare an estimate of the cost, expenses and other changes, including normal and ordinary compensation to the CM, necessary for reconstruction of the Project substantially in accordance with the Project Plans and Specifications.

15.2.2.1 Within fifteen (15) days following satisfaction of the express conditions described in subsections (a), (b) and (c) below, CM covenants and agrees diligently to commence reconstruction and to complete the reconstruction or repair of any loss or damage by fire or other casualty to the Project to substantially the same size, floor area, cubic content and general appearance as prior to such loss or damage:

(a) Receipt by the Owner or the Trustee of the proceeds derived from collection of all valid claims against insurers or others based upon such damage or destruction; and receipt of other sums from any source such that the funds necessary to pay the Project Cost and any additions to the Project Cost necessitated for repair or reconstruction are available;

(b) Written agreement executed by the CM and the Owner, by amendment to this Agreement or otherwise, authorizing and approving the repair or reconstruction and any additions to the Project Amount necessitated thereby, including any required amendment to the GMP; and

(c) Final approval by the Owner of the Project plans and specifications for such repair or reconstruction and issuance of any required building permit.

15.3 Approval of Plans and Specifications

15.3.1 The Owner agrees to approve the plans and specifications for such reconstruction or repair if the reconstruction or repair contemplated by such plans and specifications is economically feasible, and will restore the Project, or the damaged portion thereof, to be substantially the same condition as prior to such loss or damage and such plans and specifications conform to the applicable laws, ordinance, codes and regulations. Owner agrees that all proceeds of any applicable insurance or other proceeds received by the Owner or the CM as a result of such loss or damage shall be used solely for payment of the costs, expenses, and other charges of the reconstruction or repair of the Project.

15.4 Notice of Loss or Damage.

15.4.1 CM shall promptly give Owner written notice of any significant damage or destruction to the Project, defined as loss or damage which it is contemplated by CM will increase the GMP or extend the date of Substantial Completion, then expectations of CM as to the effect of such damage or destruction on the use of the Project, and the then proposed schedule, if any, for repair or reconstruction of the Project. Loss or damage, which the CM determines, will not affect the GMP or date of Substantial Completion will be reported to the Owner and A/E within five (5) days and associated corrective actions will be undertaken without delay.

ARTICLE 16
SPECIAL PROVISIONS

16.1 Prohibition Against Contingent Fees

16.1.1 By signing this Agreement, the CM warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for this firm to solicit or secure this agreement and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bona fide employee working solely for this firm any fee, commission, percentage, gift or other consideration contingent upon or resulting from the award or making of this Agreement.

16.2 Truth-In-Negotiation

16.2.1 In compliance with the Consultants' Competitive Negotiation Action, Section 287.055, *Florida Statutes*, by signing this Agreement, the CM certifies that wage rates and other factual unit costs supporting the compensation to be paid under this Agreement are accurate, complete and current as of the date of this Agreement. It is further agreed that the original contract price and any additions thereto shall be adjusted to exclude any significant sums by which it is determined the contract prices was increased due to inaccurate, incomplete or non-current wage rates and other factual unit costs. All such contract adjustments shall be made within one (1) year following the end of the Agreement.

16.3 Compliance with Jessica Lundsford Act

16.3.1 The School District of Manatee County and the State of Florida requires all CMs and subcontractors to comply with the Jessica Lunsford Act (JLA) which consists of a level II background screening via fingerprinting. Vendors, individuals or entities under

contract with the School Board of Manatee County required to go on school grounds when students are present, must comply with the requirements of the law and agree to indemnify and hold harmless the School Board of Manatee County for any claims made against the School Board related to the failure to comply with Florida Statute Sections 1012.465 and 1012.32. Information on JLA requirements and how to comply can be accessed at: https://www.manateeschools.net/Page/6689.

16.4 Sovereign Immunity

16.4.1 The parties acknowledge and agree that the School Board of Manatee County, Florida, as an agency of the State of Florida, is a sovereign entity that is by law immune from suit except to the extent specified in Section 768.28, *Florida Statutes*. No provision of the Agreement shall constitute, or be interpreted as, a waiver of sovereign immunity, and all defenses relative to sovereign immunity shall be preserved.

16.5 Custodian of Public Record

IF THE CM HAS QUESTIONS REGARDING THE APPLICABILITY OF CHAPTER 119, FLORIDA STATUTES, TO THE CM'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS: Public Records Custodian, 215 MANATEE AVENUE W., BRADENTON, FL 34205 (941) 708-8770, publicrecords@manateeschools.net.

16.5.1 The CM must comply with public records law and specifically:

16.5.1.1 Keep and maintain public records required by Owner to perform the service.

16.5.1.2 Upon request from Owner's custodian of public records, provide Owner with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that complies with Chapter 119, *Florida Statutes*, or as otherwise provided by law.

16.5.1.3 Ensure that public records in the CM's possession that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the Agreement if the CM does not transfer the records to the Owner.

16.5.1.4 Upon completion of the Agreement, transfer, at no cost, to the Owner all public records in possession of the CM, as the term "public records" is defined within Chapter 119, *Florida Statutes*, or keep and maintain public records required by the Owner to perform the service. If the CM transfers all public records to the Owner upon completion of the Agreement, CM shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the CM keeps and maintains public records upon completion of the Agreement, the CM shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the Owner, upon request from the Owner's custodian of public records, in a format that is compatible with the information technology systems of the Owner.

16.6 Public Entity Crime Information Statement

16.6.1 A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a CM, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, *Florida Statutes*, for CATEGORY TWO for a period of thirty-six (36) months from the date of being placed on the convicted vendor list. Any contract in violation of this section shall be voidable by the Owner.

16.7 Compliance with Laws

16.7.1 CM agrees to comply, at its own expense, with all federal, state and local laws, codes, statutes, ordinances, rules, administrative orders, regulations and requirements applicable to the Project, including those dealing with safety (including the Trench Safety Act, Chapter 553, *Florida Statutes*). If CM observes that the Contract Documents are at variance therewith, it shall promptly notify Owner and A/E in writing.

16.8 No Waiver

16.8.1 The failure of Owner to enforce at any time or for any period of time any one or more of the provisions of the Agreement shall not be construed to be and shall not be a waiver of any such provision or provisions or of its right thereafter to enforce each and every such provision. The failure of Owner to insist, in any one or more instances, upon the performance of any of the terms, covenants or conditions of the Agreement, or to exercise any right herein, shall not be construed as a waiver or relinquishment of such term, covenant, condition or right as respects further performance. Waiver by Owner of a breach of any provision of the Agreement shall not be deemed to be a waiver of any other breach and shall not be construed to be a modification of the terms of the Agreement. No approval, consent or waiver by Owner shall be effective unless it is in writing and then only to the extent specifically stated.

16.9 Severability

16.9.1 Should any provision of the Agreement be determined to be unenforceable, such a determination shall not affect the validity or enforceability of any other section or part thereof.

16.10 Notices

16.10.1 All notices, consents, or approvals required or permitted to be given under the terms of the Agreement shall be in writing and shall be sent by: (1) FedEx or other nationally recognized overnight air courier service, postage prepaid, for next business day delivery, and (2) by email correspondence to the respective parties set forth below in this section, as applicable. Notice given in accordance with this Section shall be effective on the first business day after having been delivered to a nationally recognized overnight air courier service, such as FedEx, for "next business day" delivery in each case addressed to the respective party at the address for notice specified in this Section below.

16.10.2 Notices, consents or approvals required or permitted to be given to Owner shall be delivered to Owner at:

Project Director
Jeffery Medwetz
Department of Construction Services
1 Matzke Way, Bradenton, FL 34208
Attention: Jeff Medwetz
Email: medwetzj@manateeschools.net

16.10.3 Notices, consents or approvals required or permitted to be given to CM shall be delivered to CM at:

A.D. Morgan
716 N. Renellie Drive
Tampa, FL 33609
Attention: Matt D'Amaddio
Email:mdamaddio@admorgan.com

16.10.4 Either party may change its above noted address by giving written notice to the other party in accordance with the requirements of this Section.

IN WITNESS WHEREOF, the parties have executed this Agreement on the date(s) indicated below.

EXHIBIT F

A. Project Description:

- Pre-Construction Scope shall include those tasks identified in Section 2 for Stages I-III and the following tasks to facilitate the construction project:
- Portable Connections to include utilities and minor facility improvements
- Modifications to Buildings 2 and 5
- Select site security upgrades
- Select finish upgrades
- Scope as outlined in Executive Summary dated June 20, 2022 from A.D. Morgan.

The scope of work includes, but is not limited to:

- Partial Building Replacement
- Replace Roof Systems
- Replace mechanical systems and associated piping
- Replace plumbing systems and associated piping
- Building envelope improvements including window, door, and insulation systems
- Improve Technology infrastructure
- Improve Campus Safety/Security
- Replace Life Safety Systems including fire alarm
- Site improvements including storm water
- Improve on-site traffic queuing

AGENDA ITEM NO. 8.33

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval of the Use of the State of Florida Department of Education and Sourcewell bid on School Buses Types A, C and D and Optional Equipment, SDMC No. 23-0056-MR, Estimated in the Amount of $1,000,000.00 - *added June 23, 2022*

Executive Summary
The State of Florida Department of Education (DOE) Bid No. 2022-01 and Sourcewell bid No. 063020 awarded bids for school buses and is available for Florida school districts to use for purchasing school buses following DOE specifications.

The Department of Education issued a new bid 2022-01 for the purchase of School Buses that needs to be utilized to purchase the electric school buses. The old bid expired.

The requested contract is for the period through December 31, 2023, for the State of Florida contract and through August 15, 2024, for the Sourcewell Contract. Option renewals may be available per The State of Florida Department of Education/Sourcewell bid.

The vendors agree to extend their pricing to the School District of Manatee County under the same terms and conditions as the State of Florida Department of Education and Sourcewell bid for school buses. Copies of the contract specifications and pricing are on file in the Purchasing Department.

Rules of the State Board of Education, Chapter 6A-3.006 and Section 229.79 Florida Statutes authorizes and is directed to coordinate volume purchasing of transportation equipment as provided by section 1006.27 F.S. Florida Statutes, Chapter 287.042(2) and the Rules of the State Board of Education, Chapter 6A-1.012(4) (6) exempt from competitive bid requirements those purchases made, under the provision of the State of Florida Department of Management Services contracts.

Approval of this bid does not indicate immediate or complete expenditure of approved funds. Approved funds will only be expended on an as needed basis throughout the contract period.

The State of Florida awarded their agreement to:
Florida Transportation Systems, Tampa, Florida, Florida Document No. P00688
Matthews Bus Alliance, Inc. dba Matthews Buses Florida, Orlando, FL, Florida Document No. P16000094666
Sun State International Trucks, LLC, Tampa, Florida, Florida Document No. L01000018245

Sourcewell awarded their agreement to:
Blue Bird, The Villages, Florida, Florida Document No. M13000003648
IC Bus LLC, Tallahassee, Florida, Florida Document No. M08000000167
Lion Electric Bus, Plantation, Florida, Florida Document No. F19000004728

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Energy Management | Goal 1
Develop low-cost best practice solutions to implement across the school district to reduce energy consumption to move the district towards being Energy Star/LEED certified.

Financial Transparency & Capital Planning | Goal 1

Maximize all district resources to enhance the learning environment and ensure financial sustainability.

Recommendation

The Superintendent recommends approval of the use of the State of Florida Department of Education/Sourcewell bid on school buses Types A, C and D and Optional Equipment, SDMC No. 23-0056, estimated in the amount of $1,000,000.00.

Financial Impact

The funding source for this expenditure is capital project fund/grant and is included in the Transportation Department approved budget for 2021-2022 and proposed budget for 2022-2023.

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

CONTRACT 2022-01 ATTACHMENT '6'

THIS CONTRACT FOR TYPE A, TYPE C AND TYPE D SCHOOL BUSES AND OPTIONAL EQUIPMENT, BID NO: ITB 2022-01, by and between the department, 325 West Gaines, Suite 834, Tallahassee, Florida 32399-0400, and

Florida Transportation Systems, Inc., the contractor, a for-profit corporation registered in Florida, each referred to herein as "Party," and collectively referred to as the "Parties,"

WITNESSETH:

WHEREAS, the Department desires to provide eligible users, defined herein, with various Type A, Type C and Type D School Buses and Optional Equipment (defined herein as "Vehicles"), through the use of a state term contract pursuant to rule 60A-1.001, F.A.C.; and section 1006.27, F.S., and

WHEREAS, the Department solicited responses to an Invitation to Bid No: ITB 2022-01(ITB) to prospective contractors of said Vehicles; and

WHEREAS, the contractor responded to the ITB and desires to provide said Vehicles; and, unto each other;

NOW THEREFORE, in consideration of the premises, terms and conditions set forth herein, the Parties execute this contract so same becomes binding and enforceable by and through the Parties and their assigns, and agree heretofore:

SCOPE OF WORK

The intent of these specifications is to set forth and convey to prospective bidders the general type, character, performance and quality of the Vehicles desired by the Department and school districts. The contractor is authorized to provide Vehicles to any and all eligible users in the State of Florida. The Parties agree that the laws and rules that apply to this contract shall be for those applicable to contracts in excess of Category Two, or $35,000, as defined in chapter 287.017, F.S.

Pursuant to Section 7.10 of Bid No: ITB 2022-01, the following documents are hereby incorporated by reference:

- Department contract
- Any addenda to Bid No: ITB 2022-01
- ITB No: 2022-01
- Award Letter
- Contractor's response

IN WITNESS WHEREOF, the Parties hereto have caused this contract For Type A, Type C and Type D School Buses and Optional Equipment, Bid No: ITB 2022-01, to be executed on the dates shown below their respective signatures.

ANSWER: NO

From: Euclid Infotech

7) Any Addendum or Pre Bid meeting Minutes?

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Chris Rustman
Florida Transportation Systems, Inc.

8) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 3 addresses engines and their warranty coverage requirements. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.

9) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 5 addresses frame rails, cross members, fuel tanks, front axle I-beams and rear axle housing warranty coverage for 120 months. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.

10) Page I-4 of Florida Specifications, Effective January 2020, section "Transmission" requires an Allison 1000 or 2000 or approved equal on a Type A chassis of 30p and larger. FTS requests that the Chevrolet heavy duty 6-speed Hydra-Matic transmission be accepted as an approved equal.

ANSWER: Approved

From: Chris Rustman
Florida Transportation Systems, Inc.

11) Page III-2 of Florida Specifications, Effective January 2020, section 'Battery Disconnect Switch", states that there must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within 3 feet of the battery box if no A/C box is available. Ford does not currently permit this on their chassis and FTS requests that this item NOT apply to Type A buses.

ANSWER: Denied. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

From: Chris Rustman
Florida Transportation Systems, Inc.

12) Page III-16 of Florida Specifications, Effective January 2020, section 'Structural Design and Testing", states that each manufacturer of Type A, C and D bodies must certify that their configurations comply with the testing and requirements of both the Colorado Racking Load Test and the Kentucky Pole Test. Do bidders for ITB 2022-01 need to provide verification of compliance with their bid submission?

ANSWER: See 7.19 Representations. The requested letter meeting specifications is an attestation that each configuration meets all Florida School Bus Specifications including Structural Design Testing

From: Mike McCullough
Sun State International

13) Given the volatility of industry shortages and long lead times of materials and supplies, will the Department adjust or waive the requirement for delivery 240 days from receipt of PO in documented instances?

ANSWER: No

From: Mike McCullough
Sun State International

14) Due to current and likely ongoing volatility of market pricing of raw materials and components for manufacturing and regulatory impacts on finished product pricing, will the Department provide a mechanism for periodic adjustment of pricing?

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.

15) 4.26 Extension
Will the Department consider the same bid language for a "proportional price increase" in the event of unsuspected circumstances like the ones we are dealing with now regarding parts shortages and price Increases for components required to build the base bus, chassis, and options (e.g., steel, plywood, plastic, wiring, etc.) impacting the overall cost to manufacturer the bus? (e.g., over 3%?)

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) A. 7.5 and 7.25
Are "Alternative Fuel Options" included in the "Incentive to Buy" clause by offering incentives to districts to purchase alternative fuels either directly or indirectly; (e.g., propane companies offering districts incentives like rebates, cash, or free buses) to buy propane powered units, thereby impacting who the district buys buses from?

ANSWER: The question is speculative. Section 7.5 of the ITB explicitly addresses sales incentives and that section applies to all bidders.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) B. Also please reconfirm that Gasoline is NOT to be considered an Alternate Fuel.

ANSWER: United states Department of Energy lists Ethanol, Electricity, Bio-Diesel, CNG, Propane and Hydrogen as alternative fuels. Gasoline is not an alternative fuel.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
Clarification on vendor pricing sheets – Attachment 1 (applies to question 17 only)
17) A. In the case that an "electric" power train is submitted in the Base Configuration (e.g., Standard Engine, HP/LB·FT, Bus Base Price) In this solicitation for a particular configuration, will this be considered the base configuration for the solicitation and subject to the AWARD requirement to be within 10% of the lowest acceptable bid price for that configuration?

ANSWER: If the vendor submits an electric powertrain in the base configuration as its standard engine. Its offering will be compared to the same electric configuration of other bidders whether offered as a base or optional engine.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
17) B. Furthermore, is "electric" to be considered an "Alternative Fuel Engine Option" only for this solicitation?

ANSWER: Yes, per the United States Department of Energy.

From: Lion Electric Co. USA Inc.
18) At point 4.2 **Questions** it states, "the bidder may request, in writing, to the State that specifications be changed". Can the State please confirm which specifications are being referred to with this point.

ANSWER: The questions referred to in 4.2 are the questions in this addendum.

From: Lion Electric Co. USA Inc.

19) At point 7.19 **Representations,** bidders are expected to include a letter with their bid response confirming that "each unit sold by the bidder's company or representative for school buses will meet Attachment 11 - *Florida School Bus Specifications, Effective January 2020".* To note: many of the specifications in this document are tailored to school buses with an internal combustion engine and therefore do not apply to school buses with an all-electric motor. How must all-electric school bus OEM's address this letter if the bus does not include all specifications on the bus, and therefore does not "meet" the specifications? Can all-electric OEM bidders send their recommended specifications changes to the Department of Education before submitting the bid response? Or should the specification changes be included with the bid response?

ANSWER: Florida school Bus Specifications Page II-2 Engine Equipment note: Electric Powered configurations are exempt from the engine requirements listed below.

From: Lion Electric Co. USA Inc.

20) At point 4.34 **Alternates** it states, "Alternate Brands or products will not be considered for this bid response". Can the State please confirm what brands this applies to? Does this refer to OEM school bus brands? Bus brand parts?

ANSWER: See Florida School Bus Specifications, Effective January 2020.

From: Lion Electric Co. USA Inc.

21) At point 6.1 **Deliverables** it states that a sample status report must be included in the bid submission. However, this form is intended for award winners only. Can the State please explain how bidders are expected to complete this form for their bid submission?

ANSWER: 6.1 The successful bidder must provide a status report on a monthly basis.

From: Lion Electric Co. USA Inc.

22) At point 7.2 **Bid Response Format Instructions** a two-page limit is identified for the Transmittal Letter in Section 1. Can you please confirm if there is a page limit for Section 2?

ANSWER: There is no page limit per section 2

From: Lion Electric Co. USA Inc.

23) At point 7.12 **MYFLORIDAMARKETPLACE**, there is a fee for school buses purchased under this contract. Can the State please share what the fee amount is?

ANSWER: 1% of the payment amount.

From: Lion Electric Co. USA Inc.

24a) At point 7.3 **General Bid Requirements** it states, "each bidder shall bid all or none of each bus configuration". Please note that all-electric buses are not built the same as those with an internal combustion engine. That said, as an all-electric OEM, Lion Electric would like to respectfully ask that we can submit our all-electric specifications and configurations?

ANSWER: Each school bus configuration submitted must meet Florida School Bus Specifications, Effective January, 2020.

From: Lion Electric Co. USA Inc.
24b) If an OEM does not offer all configuration types and only submits pricing for the configurations that are possible will the OEM be disqualified?

ANSWER: No.

From: Lion Electric Co. USA Inc.
25) At point 7.9 **Pre-Delivery Inspections (PDI)** it states that a completed PDI form must accompany each unit delivered. This is another form that is intended for award winners only. Can the State please explain how bidders are expected to complete this form for the bid submission?

ANSWER: For Award Winners Only.

From: Lion Electric Co. USA Inc.
26) A. At the **Vendor Bid Sheets** point, there is a specification sheet for each bus configuration. Can OEM's list STD ("standard") beside the specifications that are considered standard on the bus?

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) B. In addition, if the OEM considers one of the specifications to be optional, must the OEM list a price

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) C. Would the word "optional cost" suffice?

ANSWER: No. If an OEM bids STD in any option, they are including the option with the base bus price at no additional cost. If the item already has STD in the corresponding cell, it must be included with the base bus price. Any remaining cells should be priced or reflect NA (Not Applicable), NB (No Bid), or NC (No Charge) pursuant to definitions (3.2)

From: Lion Electric Co. USA Inc.
27) At point 7.2 **Bid Response Format Instructions, Section 1 – Transmittal Letter**, bidders must include a statement that they have "read, understands and agrees to all provisions of this ITB. By submitting a bid, the bidder agrees to the terms and conditions of the ITB, notwithstanding any statement in the bid to the contrary". We would like to please ask the State if it would allow bidders to propose modifications to the Terms and Conditions with their bid response?

ANSWER: No.

From Glenn Matthews
Matthews Bus Alliance, Inc.

28) This letter is to inform you that the worldwide shortages have affected Thomas Built Buses, and now Matthews Bus Alliance, Inc. The shortage is with the required LED lights to meet state specifications and will affect the 3 LED lights above the front and rear School Bus sign. To be able to continue manufacturing buses, TBB will be substituting the LED bulbs with incandescent lights. We anticipate this will impact about 55 of our buses. Once the LED lights become available, with your permission we will send out technicians to change them out in order to not impact timely delivery.

ANSWER: Approved, subject to agreement with the eligible user.

Potential proposers have 72 hours from posting of addenda to protest the requirements of each addendum. Failure to file a protest within the time prescribed in Section 120.57(3), or failure to post the bond or other security required by law within the time allowed for filing a bond shall constitute a waiver of proceedings under Chapter 120, Florida Statutes.

YOUR BID WILL NOT BE COMPLETE WITHOUT THIS DOCUMENT SIGNED AND INCLUDED!

Re: Bid Number ITB 2022-01
Type A, Type C and Type D School Buses and Optional Equipment

Dear Ms. Wimberly:

Please find enclosed the proposal submitted by Florida Transportation Systems, Inc., Federal Employer Identification Number 36-3285618, in response to Bid Number ITB 2022-01. Our DUNS number is 122633282.

I certify that I am a duly authorized representative of Florida Transportation Systems, Inc., and as such, have the authority to execute and submit this proposal and to legally bind the company in all matters relating to and contained in this proposal. I further certify that I have read Bid Number ITB 2022-01, that I fully understand its contents, and that I agree to all of its provisions. I finally certify that Florida Transportation Systems, Inc. is authorized to conduct business in the State of Florida and that the company is registered as a vendor on the MyFloridaMarketPlace website. Florida Transportation Systems, Inc. has also electronically registered a valid W-9 with the Department of Financial Services (DFS).

Florida Transportation Systems, Inc. hereby designates the following Contract Manager to represent the company in all matters related to any contract that may result from this proposal:

Name:	Chris Rustman
Mailing Address:	7703 Industrial Lane Tampa, Florida 33637
E-Mail Address:	crustman@fts4buses.com
Office Telephone:	(813) 980-0174 (Ext. 280)
Toll Free Office Telephone:	(800) 282-8617 (Ext. 280)
Fax:	(813) 347-9822

Florida Transportation Systems, Inc. is not owned by minorities, women, or service-disabled veterans, and therefore, represents itself to be neither a Certified Minority Business Enterprise (CMBE) nor a Service-Disabled Veteran Business Enterprise (CSDVBE). However, our company supports the State of Florida's initiative to include CMBE and CSDVBE entities in the procurement

process. With specific regard to ITB 2022-01, Florida Transportation Systems, Inc. intends to employ sub-contract vendors for the supply of equipment and installation of air conditioning systems and for drive-away delivery services. In preparing this proposal, we have conducted an exhaustive search of the Certified Vendor Directory maintained by the Florida Department of Management Services, Office of Supplier Diversity, for qualified CMBE or CSDVBE sub-contract vendors offering such products and services. Having found no such vendors, Florida Transportation Systems, Inc. does not intend to utilize any CMBE or CSDVBE sub-contractors in the fulfillment of any contract resulting from ITB 2022-01. In the future, Florida Transportation Systems, Inc. pledges its continuing support of the State of Florida's diversity initiative and will be pleased to offer qualified CMBE or CSDVBE entities the opportunity to participate in subsequent procurement contracts.

Thank you for the opportunity to submit this proposal. We will look forward to your favorable consideration and to the prompt execution of a contract.

Sincerely,

FLORIDA TRANSPORTATION SYSTEMS, INC.

Chris Rustman
President

ATTACHMENT '3'

DRUG-FREE WORKPLACE

(will be considered in case of identical tie Bids)

Preference shall be given to businesses with drug-free workplace programs. Whenever two or more Bid Responses which are equal with respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a Bid Response received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie Bid Responses will be followed if none of the tied vendors have a drug-free workplace program. To have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3) Give each employee engaged in providing the commodities or contractual services underbid a copy of the statement specified in subsection (1).

4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are underbid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5) Impose a sanction on, or require satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community by any employee who is so convicted.

6) Make a good faith effort to maintain a drug-free workplace through implementation of this section.

As the person authorized to sign the statement, I certify that this firm complies fully with the above requirements.

STATE OF FLORIDA DEPARTMENT OF EDUCATION

MINORITY SUBCONTRACTORS UTILIZATION SUMMARY

The Department's Supplier Diversity initiative strives to ensure the promise of Florida's future is shared by all of its residents, regardless of race, ethnicity, disability, neighborhood, or background. To that end, the Department is dedicated to support, track and increase its small, minority-, women-, and service-disabled veteran business enterprise spending with prime contractors and subcontractors. This form was developed to assist in these efforts.

The Prime Contractor shall report all small, minority-, women-, and service-disabled veteran business enterprise Subcontractors, identifying the Name, Address, Type of Certification, and Dollar Amount on the form below. The Prime Contractor shall submit this form with each invoice submitted for payment, whether or not funds have been spent with a small, minority-, women-, and service-disabled veteran business enterprise Subcontractor for the period covered by the invoice. The Office of Supplier Diversity, Florida Department of Management Services will assist in furnishing names of qualified minorities. The Office of Supplier Diversity can be reached at (850/487-0915); the Internet Web address is http://dms.myflorida.com/other_programs/office_of_supplier_diversity_osd .

VENDOR CERTIFICATION REGARDING

SCRUTINIZED COMPANIES LISTS

Respondent Vendor Name: Florida Transportation Systems, Inc.

Vendor FEIN: _____

Vendor's Authorized Representative Name and Title: Chris Rustman, President

Address: 7703 Industrial Lane

City: Tampa State: FL Zip: 33637

Phone Number: 800-282-8617

Email Address: chris.rustman@fts4buses.com

Section 287.135, Florida Statutes, prohibits agencies from contracting with companies for goods or services over $1,000,000 on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Both lists are created pursuant to section 215.473, Florida Statutes.

As the person authorized to sign on behalf of Respondent, I hereby certify that the company identified above in the section entitled "Respondent Vendor Name" is not listed on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. I understand that pursuant to section 287.135, Florida Statutes, submitting a false certification may subject a company to civil penalties, attorney's fees, and costs.

Certified By: Chris Rustman,

Who is authorized to sign on behalf of the above referenced company.

Authorized Signature Print Name and Title: Chris Rustman, President

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

CONTRACT 2022-01 ATTACHMENT '6'

THIS CONTRACT FOR TYPE A, TYPE C AND TYPE D SCHOOL BUSES AND OPTIONAL EQUIPMENT, BID NO: ITB 2022-01, by and between the department, 325 West Gaines, Suite 834, Tallahassee, Florida 32399-0400, and

Florida Transportation Systems, Inc., the contractor, a for-profit corporation registered in Florida, each referred to herein as "Party," and collectively referred to as the "Parties,"

WITNESSETH:

WHEREAS, the Department desires to provide eligible users, defined herein, with various Type A, Type C and Type D School Buses and Optional Equipment (defined herein as "Vehicles"), through the use of a state term contract pursuant to rule 60A-1.001, F.A.C.; and section 1006.27, F.S., and

WHEREAS, the Department solicited responses to an Invitation to Bid No: ITB 2022-01(ITB) to prospective contractors of said Vehicles; and

WHEREAS, the contractor responded to the ITB and desires to provide said Vehicles; and, unto each other;

NOW THEREFORE, in consideration of the premises, terms and conditions set forth herein, the Parties execute this contract so same becomes binding and enforceable by and through the Parties and their assigns, and agree heretofore:

SCOPE OF WORK

The intent of these specifications is to set forth and convey to prospective bidders the general type, character, performance and quality of the Vehicles desired by the Department and school districts. The contractor is authorized to provide Vehicles to any and all eligible users in the State of Florida. The Parties agree that the laws and rules that apply to this contract shall be for those applicable to contracts in excess of Category Two, or $35,000, as defined in chapter 287.017, F.S.

Pursuant to Section 7.10 of Bid No: ITB 2022-01, the following documents are hereby incorporated by reference:

- Department contract
- Any addenda to Bid No: ITB 2022-01
- ITB No: 2022-01
- Award Letter
- Contractor's response

IN WITNESS WHEREOF, the Parties hereto have caused this contract For Type A, Type C and Type D School Buses and Optional Equipment, Bid No: ITB 2022-01, to be executed on the dates shown below their respective signatures.

DEPARTMENT	**CONTRACTOR**
_____	Chris Rustman

STATUS CODES: √ = OK X = Malfunction (but Meets Specs) O = Does Not Meet Specs N/A = Not Applicable

Status Code	INSPECTION ITEMS	COMMENTS (Note Specific Deficiencies)	Tech. Initials
A. INSIDE BUS			
	1. **Emergency Equipment** - Fire Ext. (pressure/tag/mount), First Aid Kit, Body Fluid Cleanup Kit and Reflectors		
	2. **Registration and Insurance Card**		
	3. **Neutral Safety Switch, Shifter and Noise Abatement Switch**		
	4. **Engine Controls** - Key Switch, Accelerator and Engine Shutdown		
	5. **Gauges, Indicators, Dash and Switch Panel Lights, Engine Warning Lights/ Buzzers and ABS Warning Light**		
	6. **Air Brake System** - Gauge(s), Build-Up, Governor, Park Brake, Adjustment, Air Leaks, Low Air Warning, PP-1 Pop-Off and Pedal		
	7. **Hydraulic Brakes** - Warning Light, Gauge, Pedal Travel and Fade, Power Assist and Park Brake		
	8. **Windshield Wipers and Washers** - Operation, Park and Blades		
	9. **Heaters, Defrosters, Auxiliary Dash or Header Fan(s)**		
	10. **Dome and Step Well Lights**		
	11. **Service Door** - Operation, Control and Overhead Pad		
	12. **Horns**		
	13. **Mirror Adjustment and Condition** - Rear vision, Cross-view, Side-view and Interior		
	14. **Driver's Seat and Seat Belt**		
	15. **Passenger Seats** - Frames, Mounting, Pads, Cuts, Bottoms, Modesty Panels, Stanchions, Passenger Securement Devices and Webbing Cutter		
	16. **Emergency Doors, Windows, Hatches and Passenger Check System** Operation, Buzzers, Labeling and Overhead Pad		
	17. **Windshield, Side and Rear Windows** - Cracks, Fogging, Latches and Visor		
	18. **Wheelchair Lift, Door and Securement System** - (if equipped)		
	19. **Two-Way Radio Operation** - (if equipped)		
	20. **Interior Wiring, Cab Hoses and Fire Wall Seals**		

	21. **General Condition of Bus Interior** - Floor, Step well, Grab Rail(s), Paneling, Broom Mounting, Loose Objects Secured and Engine Cover		
B. OUTSIDE BUS			
	1. **Headlights, Turn Signals, Hazard, Brake, Tail, Backup Lights, Backup Alarm and Park Lights**		
	2. **Clearance, Side Marker, ID Lights, Reflectors and Strobe Light**		
	3. **Pupil Warning Lights**		
	4. **Stop Arm(s) and Student Crossing Arm** - Wiring, Air or Vacuum Leak and Decal		
	5. **General Condition of Bus Exterior** - Mirrors, Bumpers, Body Damage, Paint, Reflective Marking, Lettering, Emergency Door, Engine Hood and Cleanliness		
C. ENGINE COMPARTMENT			
	1. **Steering** - Play, Column, Steering Gear Box Mounting, Pitman Arm, Drag Link, Steering Arm, Tie Rod & Ends and Idler Arm		
	2. **Batteries** - Hold Down, Terminals, Cables, Cleanliness, Slide Tray and Load Test. Check battery voltage after 15 seconds load at ½ CCA. Bat1_____ Bat2_____ Bat 3_____		
	3. **Fluid Levels and Condition** - Brake, Power Steering, Oil, Transmission, Windshield Washer, Coolant (Antifreeze _____°F) and DEF		
	4. **Belts and All Hoses** - Tightness, Condition, Routing and Belt Alignment		
	5. **Accessory Mounting and Condition** – Power Steering Pump, Air Compressor and Filter, Water Pump, Fan, Alternator and Air Cleaner (Restriction) _____(H_2O)

Re: Bid Number ITB 2022-01
Type A Chassis Delivery

Dear Mr. Corcoran:

Micro Bird, Inc. will be ordering Type A school bus chassis directly from the Ford Motor Company and General Motors Corporation (GM) for the units produced in fulfillment of Bid Number ITB 2022-01. The ordering window for new model chassis is schedule to open in early September, and actual production is anticipated to begin the late fall of 2021. Once production begins, the normal production lead time of ninety (90) days will be in effect. Additionally, Florida Transportation Systems will be ordering an initial stock order of chassis to expedite any potential orders. Based on current production commitments from the chassis manufacturers, we are confident in our ability to meet the required delivery timelines. Micro Bird, Inc. will not be responsible for any delays or changes from Ford Motor Company or General Motors Corporation.

Re: Bid Number ITB 2022-01
Pre-Delivery Inspection Program

Dear Ms. Wimberly:

Florida Transportation Systems, Inc. (FTS) will assume full responsibility for conducting the required Pre-Delivery Inspection in accordance with Section 7.9, Bid Number ITB 2022-01, on all units provided in fulfillment of any contract that may result from said ITB. Depending on the volume of units ordered, the customers' selection of delivery options, and the ultimate delivery destinations, each inspection will be completed in one of the following manners:

* By FTS Employee Personnel at its Facility in Either Tampa or Pompano Beach, Florida
* By FTS Employee Personnel at the Blue Bird Assembly Plant, Ft. Valley, Georgia

FTS currently employs a Certified School Bus Inspector Trainer at its Tampa headquarters facility responsible for the supervision, development and training of other technicians who will ultimately be tested by Department personnel for certification. FTS employs additional Certified School Bus Inspectors located at its Tampa facility and an additional Certified School Bus Inspector located at its satellite facility in Pompano Beach. In the event inspections should be required at the Blue Bird assembly plant, all Certified School Bus Inspectors employed by FTS are fully capable and willing to accept such temporary remote duty assignments. Finally, should circumstances so dictate, FTS is fully prepared to train and submit for certification testing as many additional employees and/or sub-contract personnel as may be required to meet its contractual obligations.

With a pending move to a new Tampa facility, FTS will also be asking the customers to join for bus pre-delivery review. In all cases, the inspections will be conducted only by Certified School Bus Inspectors employed by and under the control and direction of FTS. Although no responsibility for the inspection process is delegated to factory personnel, we work closely with the Blue Bird Quality and Production Departments to ensure that deficiencies discovered during inspection are corrected at the source and not repeated in subsequent production. Management, administration, and execution of our PDI program will be the responsibility of Douglas Revelle, Manager of the FTS Customer Support Group.

Sincerely,

FLORIDA TRANSPORTATION SYSTEMS, INC.

ADDENDUM #1

BID NO.: ITB 2022-01

JUNE 21, 2021

This addendum is being issued to provide the Answers to Questions submitted timely by vendors during the Question and Answers period.

Please be advised all questions are keyed as submitted.

From: Euclid Infotech

1) List of Items, Schedule of Requirements, Scope of Work, Terms of Reference, Bill of Materials required.

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech

2) Soft Copy of the Tender Document through email.

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech

3) Names of countries that will be eligible to participate in this tender.

ANSWER: Bid No: ITB 2022-01, is open to any vendor that can supply buses as specified in the ITB

From: Euclid Infotech

4) Information about the Tendering Procedure and Guidelines

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech

5) Estimated Budget for this Purchase

ANSWER: Purchases are to be determined by the eligible users. See ITB 2022-01 for historic purchase information.

From: Euclid Infotech

6) Any Extension of Bidding Deadline?

ANSWER: NO

From: Euclid Infotech

7) Any Addendum or Pre Bid meeting Minutes?

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Chris Rustman
Florida Transportation Systems, Inc.

8) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 3 addresses engines and their warranty coverage requirements. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.

9) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 5 addresses frame rails, cross members, fuel tanks, front axle I-beams and rear axle housing warranty coverage for 120 months. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.

10) Page I-4 of Florida Specifications, Effective January 2020, section "Transmission" requires an Allison 1000 or 2000 or approved equal on a Type A chassis of 30p and larger. FTS requests that the Chevrolet heavy duty 6-speed Hydra-Matic transmission be accepted as an approved equal.

ANSWER: Approved

From: Chris Rustman
Florida Transportation Systems, Inc.
11) Page III-2 of Florida Specifications, Effective January 2020, section 'Battery Disconnect Switch", states that there must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within 3 feet of the battery box if no A/C box is available. Ford does not currently permit this on their chassis and FTS requests that this item NOT apply to Type A buses.

ANSWER: Denied. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

From: Chris Rustman
Florida Transportation Systems, Inc.
12) Page III-16 of Florida Specifications, Effective January 2020, section 'Structural Design and Testing", states that each manufacturer of Type A, C and D bodies must certify that their configurations comply with the testing and requirements of both the Colorado Racking Load Test and the Kentucky Pole Test. Do bidders for ITB 2022-01 need to provide verification of compliance with their bid submission?

ANSWER: See 7.19 Representations. The requested letter meeting specifications is an attestation that each configuration meets all Florida School Bus Specifications including Structural Design Testing

From: Mike McCullough
Sun State International
13) Given the volatility of industry shortages and long lead times of materials and supplies, will the Department adjust or waive the requirement for delivery 240 days from receipt of PO in documented instances?

ANSWER: No

From: Mike McCullough
Sun State International
14) Due to current and likely ongoing volatility of market pricing of raw materials and components for manufacturing and regulatory impacts on finished product pricing, will the Department provide a mechanism for periodic adjustment of pricing?

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
15) 4.26 Extension
Will the Department consider the same bid language for a "proportional price increase" in the event of unsuspected circumstances like the ones we are dealing with now regarding parts shortages and price Increases for components required to build the base bus, chassis, and options (e.g., steel, plywood, plastic, wiring, etc.) impacting the overall cost to manufacturer the bus? (e.g., over 3%?)

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) A. 7.5 and 7.25
Are "Alternative Fuel Options" included in the "Incentive to Buy" clause by offering incentives to districts to purchase alternative fuels either directly or indirectly; (e.g., propane companies offering districts incentives like rebates, cash, or free buses) to buy propane powered units, thereby impacting who the district buys buses from?

ANSWER: The question is speculative. Section 7.5 of the ITB explicitly addresses sales incentives and that section applies to all bidders.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) B. Also please reconfirm that Gasoline is NOT to be considered an Alternate Fuel.

ANSWER: United states Department of Energy lists Ethanol, Electricity, Bio-Diesel, CNG, Propane and Hydrogen as alternative fuels. Gasoline is not an alternative fuel.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
Clarification on vendor pricing sheets – Attachment 1 (applies to question 17 only)
17) A. In the case that an "electric" power train is submitted in the Base Configuration (e.g., Standard Engine, HP/LB·FT, Bus Base Price) In this solicitation for a particular configuration, will this be considered the base configuration for the solicitation and subject to the AWARD requirement to be within 10% of the lowest acceptable bid price for that configuration?

ANSWER: If the vendor submits an electric powertrain in the base configuration as its standard engine. Its offering will be compared to the same electric configuration of other bidders whether offered as a base or optional engine.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
17) B. Furthermore, is "electric" to be considered an "Alternative Fuel Engine Option" only for this solicitation?

ANSWER: Yes, per the United States Department of Energy.

From: Lion Electric Co. USA Inc.
18) At point 4.2 **Questions** it states, "the bidder may request, in writing, to the State that specifications be changed". Can the State please confirm which specifications are being referred to with this point.

ANSWER: The questions referred to in 4.2 are the questions in this addendum.

From: Lion Electric Co. USA Inc.

19) At point 7.19 **Representations,** bidders are expected to include a letter with their bid response confirming that "each unit sold by the bidder's company or representative for school buses will meet Attachment 11 - *Florida School Bus Specifications, Effective January 2020".* To note: many of the specifications in this document are tailored to school buses with an internal combustion engine and therefore do not apply to school buses with an all-electric motor. How must all-electric school bus OEM's address this letter if the bus does not include all specifications on the bus, and therefore does not "meet" the specifications? Can all-electric OEM bidders send their recommended specifications changes to the Department of Education before submitting the bid response? Or should the specification changes be included with the bid response?

ANSWER: Florida school Bus Specifications Page II-2 Engine Equipment note: Electric Powered configurations are exempt from the engine requirements listed below.

From: Lion Electric Co. USA Inc.

20) At point 4.34 **Alternates** it states, "Alternate Brands or products will not be considered for this bid response". Can the State please confirm what brands this applies to? Does this refer to OEM school bus brands? Bus brand parts?

ANSWER: See Florida School Bus Specifications, Effective January 2020.

From: Lion Electric Co. USA Inc.

21) At point 6.1 **Deliverables** it states that a sample status report must be included in the bid submission. However, this form is intended for award winners only. Can the State please explain how bidders are expected to complete this form for their bid submission?

ANSWER: 6.1 The successful bidder must provide a status report on a monthly basis.

From: Lion Electric Co. USA Inc.

22) At point 7.2 **Bid Response Format Instructions** a two-page limit is identified for the Transmittal Letter in Section 1. Can you please confirm if there is a page limit for Section 2?

ANSWER: There is no page limit per section 2

From: Lion Electric Co. USA Inc.

23) At point 7.12 **MYFLORIDAMARKETPLACE**, there is a fee for school buses purchased under this contract. Can the State please share what the fee amount is?

ANSWER: 1% of the payment amount.

From: Lion Electric Co. USA Inc.

24a) At point 7.3 **General Bid Requirements** it states, "each bidder shall bid all or none of each bus configuration". Please note that all-electric buses are not built the same as those with an internal combustion engine. That said, as an all-electric OEM, Lion Electric would like to respectfully ask that we can submit our all-electric specifications and configurations?

ANSWER: Each school bus configuration submitted must meet Florida School Bus Specifications, Effective January, 2020.

From: Lion Electric Co. USA Inc.
24b) If an OEM does not offer all configuration types and only submits pricing for the configurations that are possible will the OEM be disqualified?

ANSWER: No.

From: Lion Electric Co. USA Inc.
25) At point 7.9 **Pre-Delivery Inspections (PDI)** it states that a completed PDI form must accompany each unit delivered. This is another form that is intended for award winners only. Can the State please explain how bidders are expected to complete this form for the bid submission?

ANSWER: For Award Winners Only.

From: Lion Electric Co. USA Inc.
26) A. At the **Vendor Bid Sheets** point, there is a specification sheet for each bus configuration. Can OEM's list STD ("standard") beside the specifications that are considered standard on the bus?

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) B. In addition, if the OEM considers one of the specifications to be optional, must the OEM list a price

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) C. Would the word "optional cost" suffice?

ANSWER: No. If an OEM bids STD in any option, they are including the option with the base bus price at no additional cost. If the item already has STD in the corresponding cell, it must be included with the base bus price. Any remaining cells should be priced or reflect NA (Not Applicable), NB (No Bid), or NC (No Charge) pursuant to definitions (3.2)

From: Lion Electric Co. USA Inc.
27) At point 7.2 **Bid Response Format Instructions, Section 1 – Transmittal Letter**, bidders must include a statement that they have "read, understands and agrees to all provisions of this ITB. By submitting a bid, the bidder agrees to the terms and conditions of the ITB, notwithstanding any statement in the bid to the contrary". We would like to please ask the State if it would allow bidders to propose modifications to the Terms and Conditions with their bid response?

ANSWER: No.

From Glenn Matthews
Matthews Bus Alliance, Inc.

28) This letter is to inform you that the worldwide shortages have affected Thomas Built Buses, and now Matthews Bus Alliance, Inc. The shortage is with the required LED lights to meet state specifications and will affect the 3 LED lights above the front and rear School Bus sign. To be able to continue manufacturing buses, TBB will be substituting the LED bulbs with incandescent lights. We anticipate this will impact about 55 of our buses. Once the LED lights become available, with your permission we will send out technicians to change them out in order to not impact timely delivery.

ANSWER: Approved, subject to agreement with the eligible user.

Potential proposers have 72 hours from posting of addenda to protest the requirements of each addendum. Failure to file a protest within the time prescribed in Section 120.57(3), or failure to post the bond or other security required by law within the time allowed for filing a bond shall constitute a waiver of proceedings under Chapter 120, Florida Statutes.

YOUR BID WILL NOT BE COMPLETE WITHOUT THIS DOCUMENT SIGNED AND INCLUDED!

BIDDER QUALIFICATIONS

Florida Transportation Systems, Inc.

Company Profile

Florida Transportation Systems, Inc. (FTS) was formed in November 1983 and has continuously represented Blue Bird Corporation in the State of Florida for the past 38 years. With the original ownership families remaining intact and active in the daily operation of the business, FTS offers a depth of experience in Florida's school transportation industry that is simply unparalleled. The company's four (4) key personnel represent over 75 collective years of Blue Bird representation. Over the years, FTS has been continually recognized by Blue Bird for outstanding representation in the market, earning performance awards too numerous to detail.

Since 1988, FTS has operated from its full service headquarters facility in suburban Tampa, located at 7703 Industrial Lane, Tampa, Florida 33637. In 2010, the company opened a second full service facility in Fort Lauderdale, and subsequently in 2013, relocated the Broward County facility to 1290 N.W. 15th Street, Pompano Beach, Florida 33069. Currently, FTS offers Sales Representation, Parts Distribution, Drive-in Service Support, and Mobile Service Support from both facilities. The Tampa headquarters will be moving in the fall of 2021 to a larger, new facility in Tampa and looks forward to offering customers additional services and capabilities.

During 1999, FTS assumed full responsibility for preparation, presentation, administration and fulfillment of the Florida State School Bus Contract. Beginning with Bid Number ITB 2000-21, FTS has successfully administered subsequent school bus procurement contracts with the Department of Education and has delivered nearly 6,000 quality Blue Bird vehicles to school districts throughout the State. By far the most tenured school bus distribution organization currently operating in Florida, FTS legitimately claims superior knowledge and experience with regard to the scope of work associated with ITB 2022-01 and Florida pupil transportation.

Key Personnel

BLUE BIRD

Limited Warranty: Gold 5/10 - Buses with Option 31300-24

If acquired, this warranty is in lieu of the standard limited warranty. This warranty is applicable to Blue Bird bus products T3FE, T3RE and BBCV built on or after August 29, 2016 specifically for and operated in the United States of America, Canada, Puerto Rico, U.S. Virgin Islands, Guam, and American Samoa.

Blue Bird Body Company (Blue Bird) warrants each bus to be free from defects in material and workmanship under normal use and service within the specified limits below. The warranty period begins either on the Delivery Date of the bus to the original user or on the Manufacture Date of the bus. Blue Bird's obligation is limited to the repair or replacement of such parts as shall, under normal use and service, appear to be defective in workmanship or material.

1. For ten years from Delivery Date:

• Front steer axle, including kingpin assembly, steering arm assembly, and upper and lower steering knuckle assembly, excluding kingpin bushings, kingpin wear, thrust bearings, tie rods and tie rod ends, brakes and axle end components.

2. For five years from Manufacture Date:

• Paint gloss. During first three years, gloss reading shall not drop below 60 on 60^0 meter (70% of initial gloss). For five years, gloss reading shall not drop below 30 on 60^0 meter.

• Paint color retention. During first three years, color coat shall not shift colors more than 4ΔE from the centroid of the national standard. For five years, color coat shall not shift colors more than 8ΔE from the centroid of the national standard.

3. For five years from Delivery Date:

• All other components not specified above, excluding engines, propane fuel systems, automatic transmissions, wheelchair lifts, non-Blue Bird air conditioners, and batteries. The warranties of the excluded components are the responsibility of the respective manufacturers, and are not a part of Blue Bird's limited warranty.

Your Blue Bird Dealer will register the bus with Blue Bird and can assist with registering components that are warranted by the component manufacturers. During the warranty period, this warranty is transferable to subsequent Owners-Operator in the U.S.A. or Canada.

THIS LIMITED WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED AND ALL OTHER OBLIGATIONS OR LIABILITIES. NO PERSON, INCLUDING SALESPERSONS, DEALERS, OR FACTORY REPRESENTATIVES OF BLUE BIRD, IS AUTHORIZED TO MAKE ANY REPRESENTATION OR WARRANTY CONCERNING BLUE BIRD PRODUCTS EXCEPT TO REFER PURCHASERS TO THIS LIMITED WARRANTY. BLUE BIRD MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. BLUE BIRD SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Obtaining Warranty Service

Contact your Blue Bird Dealer immediately upon discovery of a defect and within the warranty period. Your Blue Bird Dealer will help arrange for repairs by the Dealer or another qualified repair facility. Defects must be repaired immediately upon discovery and within the warranty period. It is the responsibility of the Owner-Operator to return the bus to the Blue Bird Dealer, or a qualified repair facility authorized by the Blue Bird Dealer. The Owner-Operator is responsible for operating and maintaining the bus as described in the Driver Handbook and Service Manual. The Owner-Operator shall retain all maintenance records, and present them to the Blue Bird Dealer or the component manufacturer, if requested.

If the defective component is warranted by Blue Bird and the repair is performed by the Blue Bird Dealer, the Blue Bird Dealer will prepare and submit a warranty claim to Blue Bird.

If the defective component is warranted by Blue Bird and the repair is performed by the Owner-Operator or another qualified repair facility, detailed labor and parts invoices must be sent to the Blue Bird Dealer not later than 30 days after the repair date. The Blue Bird Dealer will prepare and submit a warranty claim to Blue Bird.

If the defective component is warranted by the component manufacturer and the repair is performed by the component manufacturer's authorized repair facility, the repair facility will prepare and submit a warranty claim to the component manufacturer.

Limitations and Exclusions

In addition to the limitations described on the previous pages, items specifically not covered include, but are not limited to:

• Engines, automatic transmissions, wheelchair lifts, air conditioners (other than Blue Bird Air™ system), tires, and batteries. The limited warranties for these components are provided solely by and are the responsibility of the component manufacturers and are not a part of Blue Bird's limited warranty.

• Loss of use and incidental consequential expenses, including but not limited to commercial loss, loss of commercial fares, driver time or pay, lease or rental of substitute vehicle, storage, lodging, meals, telephone calls, and other travel costs.

• Any parts or components which must be repaired, replaced, or adjusted during the warranty period due to wear, wear-out, or consumption, including but not limited to brake pads and linings, drums and rotors, wiper blades, light bulbs, filters, lubricants, fluids, belts, bearings other than those specifically covered by the limited warranty, suspension pins and bushings, batteries, worn seat covers, worn steptreads and floor covering, worn door and window seals, discharged fire extinguishers, damaged (scratched, cracked) gauge and light lenses, and tires. Wear not only includes friction-type wear but can also include environmental deterioration including but not limited to surface corrosion on exhaust pipes or clamps and brake drums or rotors, as well as fading, cracking, or discoloration of seat covers caused by U.V.

• Maintenance including but not limited to tightening loose fasteners, axle and wheel alignments, wheel-balancing, tightening body tie-downs, door adjustments, tightening hose clamps, and sealing or caulking windows, doors, roof hatches, and lights.

• Any parts or components which must be repaired, replaced or adjusted during the warranty period as a result of accident damage, abnormal operation, misuse, or abuse, including but not limited to excessive operation on unpaved or unmaintained roads, operation on cross-country trails or off-road conditions, collision, fire, vandalism, explosion, objects striking the vehicle, theft, freezing, riot, or flood.

• Paint adhesion, gloss, or color failures resulting from accidents or abrasions, road chemicals, caustic detergents or cleaners, or improper maintenance. Paint adhesion failures, whether warrantable defects or non-warrantable events, which are not repaired immediately upon discovery of the failure, may deteriorate the finish or panels underneath. Surface corrosion or other progressive deterioration resulting from failure to paint adhesion failures immediately is not covered by this warranty. Contact your Blue Bird Dealer before making any repairs to the paint finish.

• Paint gloss and color failures without evidence of proper care and maintenance, as recommended in the Driver Handbook, or repairs to correct paint gloss or color failures without preapproval by Blue Bird. Contact your Blue Bird Dealer before making any repairs to the paint finish.

• Vehicle modifications or equipment installations performed without the written approval of Blue Bird. To the extent the modifications or equipment installations adversely affect other vehicle components or performance, Blue Bird shall not accept any product liability or claims under the terms of the limited warranty. These claims become the sole responsibility of the company performing the modifications or installations.

• Transportation expenses to deliver the bus to a Blue Bird Dealer or nearest qualified repair facility, including but not limited to, fuel, driver time or pay, mileage and towing.

• Repairs to parts or components which have been previously replaced with parts not obtained from Blue Bird or failures caused by non-Blue Bird parts or components. Rework of repairs not performed by or approved by a Blue Bird Dealer.

• Excessive labor hours, premium labor costs, overtime labor costs, or local taxes. This limited warranty covers reasonable labor to perform replacement or repair.

• Defects not reported to a Blue Bird Dealer and repaired during the warranty period. Repairs are to be made immediately upon discovery of the defect.

• Damage caused by using improper or contaminated fluids, including but not limited to fuels, lubricants, and coolants. Damage caused by using fluids which do not meet Blue Bird's or the Manufacturers' minimum recommendations. Damage caused by the lack of fluids or improper fluid maintenance.

• Using non-Blue Bird service parts. Usage of non-Blue Bird parts will affect future warranty coverage.

• Overloading beyond the normal seated and standee capacity voids all warranties.

Blue Bird reserves the right to make changes in design and changes or improvements upon its products without imposing any obligations upon itself to install the same upon products theretofore manufactured. Any suit alleging a breach of this limited warranty or of any other alleged warranty, including any claim for rescission or revocation of acceptance, must be filed within one year of breach.

Controlling Law and Severability

This limited warranty shall be governed by and construed in accordance with the laws of the State of Georgia, U.S.A. The Owner-Operator agrees and consents to the exclusive jurisdiction of the courts of the State of Georgia for all purposes regarding this limited warranty and further agrees and consents that venue of any action involving this limited warranty or any other alleged warranty, including any claim for rescission or revocation of acceptance, shall be exclusively in Peach County, Georgia. Owner-Operator hereby submits to personal jurisdiction in Peach County, Georgia and waives any objection or argument related to venue, personal jurisdiction, forum non-convenience, or transfer. If any portion hereof is found to be void or unenforceable, the remaining provisions of the limited warranty shall remain in full force and effect.

BLUE BIRD

Limited Warranty

Buses with Option 31300-75

This warranty is a supplement to the Standard or Premium Limited Warranty. Blue Bird warrants the Ford engine and transmission, after expiration of Ford's warranty but not to exceed 7 years/unlimited odometer, against defects in material and workmanship. For specific coverage by Ford, refer to Ford's limited warranty, or contact your Blue Bird Dealer. The Ford components covered by the Blue Bird extended coverage are the same components described in Ford's standard limited warranty. Claims for repairs to the engine and transmission after expiration of the Ford's limited warranty but prior to expiration of this extended limited warranty, may be submitted to Blue Bird. Blue Bird's obligation covered in this limited warranty is limited to the repair or replacement of such parts as shall appear to have been defective in workmanship or material. The owner is responsible for providing proof that all maintenance recommended by Ford and Blue Bird has been performed. This warranty does not cover wear/wear-out or maintenance of covered components.

This warranty is applicable to Blue Bird chassis with Option 31300-75 that are registered and operated in U.S.A. or Canada. The warranty period begins on the date the bus is delivered to the original user. During the warranty period, this warranty is transferable to subsequent Owners/Operators. All other Terms, Limitations & Exclusions of Blue Bird's and Ford's Standard or Premium Limited Warranties are applicable.

THIS LIMITED WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED AND ALL OTHER OBLIGATIONS OR LIABILITIES. NO PERSON, INCLUDING SALESPERSONS, DEALERS, OR FACTORY REPRESENTATIVES OF BLUE BIRD, IS AUTHORIZED TO MAKE ANY REPRESENTATION OR WARRANTY CONCERNING BLUE BIRD PRODUCTS EXCEPT TO REFER PURCHASERS TO THIS LIMITED WARRANTY. BLUE BIRD MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. BLUE BIRD SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Defects must be reported to a Blue Bird Dealer immediately upon discovery of the defect and within the warranty period as stated herein. It is the responsibility of the Owner/Operator to contact their Blue Bird Dealer so service can be arranged with an authorized service dealer. Defects shall be repaired promptly after discovery of the defect and within the warranty period as stated herein. All claims for warranty adjustments must be received by Blue Bird not later than 30 days after the repair date.

Blue Bird reserves the right to make changes in design and changes or improvements upon its products without imposing any obligations upon itself to install the same upon products theretofore manufactured. Any suit alleging a breach of this limited warranty or of any other alleged warranty must be filed within one year of breach.

Controlling Law and Severability

This Limited Warranty shall be governed by and construed in accordance with the laws of the State of Georgia, U.S.A. The owner/operator agrees and consents to the exclusive jurisdiction of the courts of the State of Georgia for all purposes regarding this Limited Warranty and further agrees and consents that venue of any action brought hereunder shall be exclusively in Peach County, Georgia. Owner/Operator hereby submits to personal jurisdiction in Peach County, Georgia and waives any objection or argument related to venue, personal jurisdiction, forum non convenience, and/or transfer. If any portion hereof is found to be void or unenforceable, the remaining provisions of the Limited Warranty shall remain in full force and effect.

Bulletin Number: **5676405**

US and Canada School Bus Applications- Battery Electric Systems

US and Canada School Bus Applications- Battery Electric Systems

Coverage

Product Warranted

This Limited Warranty is subject to the separate coverages and the exclusions and limitations described below. This Limited Warranty applies to new Battery Electric Systems sold by Cummins and delivered to the first owner on or after February 1, 2021 that are used in school bus* categories within the US and Canada**.

The Base Warranty covers any failures of the Battery Electric System (Powertrain and Battery Pack) which result, under normal use and service, from a defect in material or factory workmanship (Warrantable Failure) during the terms set forth below.

Powertrain Warranty

The Powertrain Warranty covers Warrantable Failures of the Powertrain, including Propulsion Motor, Inverter, High Voltage Junction Box, System Controller and Battery Management Controller.

This coverage begins with the sale of the Battery Electric System by Cummins and ends 5 years or 100,000 miles whichever occurs first, after the date of delivery of the Battery Electric System to the first user.

Battery Pack Warranty

The Battery Pack Warranty covers Warrantable Failures of Battery Pack (covered part).

This coverage begins with the sale of the Battery Electric System and ends 8 years or 125,000 miles, or 80MWhrs of gross discharge per pack, whichever occurs first, after the date of delivery of the Battery Electric System to the first user.

Battery state of health deterioration below 80% within the terms listed above is a warrantable failure of the Battery Electric System.

The procedure for determining state of health can be found in the service manual.

These Warranties are made to all Owners in the chain of distribution and coverage continues to all subsequent Owners until the end of the periods of coverage.

Cummins Responsibilities

During The Product Warranty

Cummins will pay for all parts and labor needed to repair the damage to the Battery Electric System resulting from a Warrantable Failure.

Cummins will pay for antifreeze and other maintenance items that are not reusable due to a Warrantable Failure.

Cummins will pay for reasonable labor costs for Battery Electric System removal and reinstallation when necessary to repair a Warrantable Failure.

Cummins will pay reasonable costs for towing a disabled vehicle to the nearest authorized repair location when caused by a Warrantable Failure. In lieu of towing expenses due to a Warrantable Failure, Cummins will pay reasonable costs for mechanics to travel to and from the location of the vehicle, including meals, mileage and lodging, when the repair is performed at the site of the failure.

Owner Responsibilities

During The Product Warranty

Owner is responsible for the cost of antifreeze, filter elements and other maintenance items replaced during Warranty repairs unless such items are not reusable due to the Warrantable Failure.

Owner is responsible for the operation and maintenance of the Battery Electric System as specified in the applicable Cummins Operation and Maintenance Manuals. Owner is also responsible for providing proof that all recommended maintenance has been performed.

Before the expiration of the applicable Warranty, Owner must notify a Cummins distributor, authorized dealer or other repair location approved by Cummins of any Warrantable Failure and make the Battery Electric System available for repair by such facility. Except for Battery Electric Systems disabled by a Warrantable Failure during the Base Warranty such that repairs are performed at the site of the failure, the Owner must also deliver the Battery Electric System to the repair facility.

Service locations are listed on the Cummins Worldwide Service Locator at cummins.com.

Owner is responsible for communication expenses, meals, lodging and similar costs incurred as a result of a Warrantable Failure.

Owner is responsible for non-Battery Electric System repairs and for "downtime" expenses, fines, cargo damage, all applicable taxes, all business costs and other losses resulting from a Warrantable Failure.

Limitations

Cummins is not responsible for failures or damage resulting from what Cummins determines to be abuse or neglect, including, but not limited to: operation without adequate coolants; lack of maintenance of cooling systems; improper storage, starting, or shutdown practices; unauthorized modifications of the Battery Electric System; or use of the Battery Electric Systems or Battery Packs as a stationary power source (without the express written consent of Cummins).

Any unauthorized modifications to the Battery Electric System will void the Warranty.

Cummins is also not responsible for failures caused by incorrect coolant.

Cummins is not responsible for any Battery Pack damage resulting from attempting, either by physical means, programming, or other methods, to extend (other than as specified in Cummins Operation and Maintenance Manuals) or reduce the life of the Battery.

Cummins is not responsible for failures/damages resulting from a defect/failure within a vehicle charger or use of a charger that does not meet Cummins specifications. Cummins is solely responsible for determining if a charger meets Cummins specifications.

Parts used to repair a Warrantable Failure may be new Cummins parts or Cummins approved rebuilt, repaired or refurbished parts. Cummins is not responsible for failures resulting from the use of parts not approved by Cummins.

A new Cummins or Cummins approved rebuilt, repaired or refurbished parts used to repair a Warrantable Failure assumes the identity of the part it replaced and is entitled to the remaining Coverage hereunder.

For warranty claims specific to Battery Pack capacity, the replacement Battery Pack will be in a condition appropriate to the age and mileage of the school bus sufficient to achieve or exceed the minimum Battery Pack capacity for the remainder of the warranty period of the original Battery Pack. Note that school bus range estimates are an imperfect measure of Battery Pack capacity because they are affected by additional factors separate from Battery Pack capacity. The measurement method used to determine Battery Pack capacity, and the decision of whether to replace or provide rebuilt, repaired or refurbished reconditioned or remanufactured parts, and the condition of any such rebuilt, repaired or refurbished parts, are at the sole discretion of Cummins.

The Battery Pack, like all lithium-ion batteries, will experience gradual energy or power loss with time and use. Loss of Battery Pack energy or power over time or due to, or resulting from, Battery Pack usage is NOT covered under this Battery Pack and Powertrain Limited Warranty, unless it has degraded below the state of health specified in the terms of this coverage. Low voltage batteries are NOT covered under this Battery Pack and Powertrain Limited Warranty.

Cummins Inc. reserves the right to interrogate System Control Module (SCM) data for purposes of failure analysis.

CUMMINS DOES NOT COVER WEAR OR WEAROUT OF COVERED PARTS.

THESE WARRANTIES SET FORTH HEREINAFTER ARE THE SOLE WARRANTIES MADE BY CUMMINS IN REGARD TO EACH BATTERY ELECTRIC SYSTEM AND THE COMPONENTS THEREOF. CUMMINS MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OR OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

CUMMINS SHALL NOT BE LIABLE FOR LOST REVENUES OR PROFITS, BUSINESS INTERRUPTION, DAMAGE TO GOODWILL, ENHANCED DAMAGES OR FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES RESULTING FROM OR CAUSED BY THE USE, OPERATION, FAILURE OR DEFECT OF ANY PRODUCTS.

This Warranty shall be enforced to the maximum extent permitted by applicable law. This Warranty gives you specific legal rights, and you may also have other rights which vary from state to state or country to country.

* A vehicle used to transport students to and from school. Vehicle must be painted yellow, should have warning lights and the words 'SCHOOL BUS' written on the front and rear roof caps. The requirements pertaining to paint color, warning lights and 'SCHOOL BUS' inscription would not apply if the vehicle is exclusively used to transport students for school related activities and it is owned by a school district.

** United States includes American Samoa, the Commonwealth of Northern Mariana Islands, Guam, Puerto Rico and the U.S. Virgin Islands.

Last Modified: 01-Jun-2021

Limited 5, 7 and 10 Year Warranty Stateme

ROUSH CleanTech Products on Blue Bird Vision School Bus

Published Date

January 26, 2021

Basic Description of Coverage

On the Blue Bird Vision Propane, Gasoline, and CNG powered buses with both the 7.3L V8 and 6.8L V10, ROUSH CleanTech offers an optional limited warranty on certain fuel system components for 5 years / unlimited miles, as defined below and covered in detail in the Owners Guide for these products, as well as in the ROUSH CleanTech Warranty and Policy Manual. These components include engine Front End Accessory Drive (FEAD) components, Gateway Modules, and certain Ford Components.

Note: Blue Bird Propane-Powered Vision Buses manufactured with the ROUSH CleanTech Liquid Propane Fuel System prior to September 01, 2014 come with a limited warranty coverage for a term of 5 years / 100,000 miles, whichever comes first.

Please contact your Blue Bird Dealer to obtain service for your Blue Bird bus. In some situations, optional 7 year and 10 year Optional Extended Warranty coverage is available. Your Blue Bird Dealer will help arrange for repairs by the Blue Bird Dealer or another qualified repair facility.

Limited Warranty Overview

Assumptions:

- ROUSH CleanTech is providing limited warranty coverage for 5 years / unlimited miles (warranty expires by time) based on the vehicle in-service date and the eligibility of optional warranty coverage as reported by Blue Bird.
- Emissions components will additionally be covered for durations specified by the EPA or CARB emissions performance and defect warranties. Components covered under emissions warranties are the responsibility of the same party as for the base warranty.
- Content to be covered by ROUSH CleanTech under this limited warranty includes ROUSH CleanTech-supplied components, specified Ford components and related FEAD components except those mentioned in "exclusions" below or identified as FORD or BLUE BIRD Warranty Responsibility in the 'COMPONENT COVERAGE' section below.
- ROUSH CleanTech will administer the warranty in accordance with the Warranty Process described in the Warranty and Policy Manual as published on the ROUSH Clean Tech Service Portal. To access this manual, please go to https://rctws.force.com/rct/s/, then search for **Warranty and Policy Manual**.

- All ROUSH CleanTech warrantable parts will ship to authorized Blue Bird service centers directly from ROUSH CleanTech.

- If the necessity to tow was driven by a ROUSH CleanTech component failure as determined by ROUSH CleanTech support, then towing is covered for the first 12 months of operation from the warranty start date, up to $400.00

- Transportation costs, such as towing, require pre-approval and must be entered into the ROUSH CleanTech warranty claim system for consideration at the time the case/claim is opened.

- All warranty repairs must be completed at authorized Blue Bird / ROUSH CleanTech service centers.

Exclusions:

Components not covered by the ROUSH CleanTech limited warranty include:

- Specified components such as the starter motor, water pump, power steering pump, air conditioning compressors, and air pump, listed in the section below with coverage by FORD or BLUE BIRD.

- Components that have failed due to physical damage caused by abuse and/or improper operation.

- Components that have failed due to vehicle modification or alteration.

- Cosmetic appearance of the ROUSH CleanTech components that results from use and/or exposure to the elements including, but not limited to, rain, snow, excessive heat or cold, lightning, hail, windstorm, earthquake, road salt, water or flood; surface corrosion, tank rust, chips, dents, scratches, customer neglect or normal wear and tear. For proper maintenance of propane tanks to prevent rust, please see the ROUSH CleanTech Fuel Tank Refinishing Guide and related Fuel Tank Corrosion FAQ

- Other exclusions as detailed in the Owners Guide for the Product, specifically including the following:

    - Use of fuel or additive other than Gasoline, LPG or CNG (depending on product type).

    - Road hazards, misuse, abuse, neglect, accidents, collision, fire, theft, freezing, vandalism, riot, explosion, or objects striking the vehicle.

    - Exposure of the ROUSH CleanTech parts to excess moisture, water, or any motor vehicle fluids.

- Normal wear and tear, including noise, vibration, cosmetic conditions and other deterioration caused by normal wear and tear.

- Incidental or consequential damages arising from a vehicle failure or defects in the ROUSH CleanTech system including, without limitation, inconvenience, cost of transportation including rental vehicles, telephone calls, meals, accommodations, loss of personal or commercial property, loss of pay, income, profits, or business opportunities.

- Ford vehicle recalls or service campaign warranty claims.

- Appearance items that results from use and/or exposure to the elements including, but not limited to, rain, snow, excessive heat or cold, lightning, hail, windstorm, earthquake, road salt, water or flood; surface corrosion, chips, dents, scratches, customer neglect or normal wear and tear.

Component Coverage by Manufacturer

The following pages lists powertrain component coverage responsibility and whether the component is covered under the 5-Year Base Warranty or optional 7-Year Optional Extended Warranty or 10-Year Optional Extended Warranty for these Blue Bird Vision products:

Gen 5 7.3L V8 Propane Vision
Gen 5 7.3L V8 Gasoline Vision
Gen 4 6.8L V10 Propane Vision
Gen 4 6.8L V10 Gasoline Vision
Gen 4 6.8L V10 CNG Vision

FOREWORD

Florida School Bus Specifications are adopted as authorized under section 1006.25, Florida Statutes (F.S.), and rule 6A-3.003, Florida Administrative Code (F.A.C.). This effective date of this edition of the Florida School Bus Specifications is January 1, 2020.

GENERAL INFORMATION AND WARRANTY PROVISIONS

All public school buses (bodies and chassis) owned, operated, rented, leased and contracted for by any public school board or charter school in Florida, used to transport children to and from school or school-related events, and purchased after the effective date of this document, as specified in rule 6A-3.003, F.A.C., must:

1. Meet or exceed the minimum requirements of these specifications;
2. Meet all applicable Federal Motor Vehicle Safety Standards (FMVSS); and
3. Meet or exceed the 2015 National School Transportation Specifications and Procedures (also referred to herein as the 2015 National Specifications), except when in conflict with the requirements herein. In such cases, the requirements specified in this document shall prevail.

The requirements specified herein are the **minimum** requirements for school buses in Florida. The date used to determine the applicability of these specifications is defined as the date the vendor receives the purchase order or signs a valid sales contract with the purchaser.

All school bus chassis and body manufacturers must certify to the Commissioner of Education, Florida Department of Education (department), by letter that all school buses offered for sale to or use by the public school systems, including charter schools, in Florida meet or exceed all standards, specifications and requirements specified herein.

Used school buses purchased or operated by a public school board or charter school in Florida must meet or exceed all federal and state requirements for public school buses that were in effect on the date the vehicle was manufactured.

Under the authority of s. 316.615, F.S., certain capacity school buses owned, operated or leased by nonpublic schools in Florida are required to meet the specifications prescribed herein.

DEFINITIONS:

1. **School Bus (State Definition):** Section 1006.25, F.S., defines a "school bus" as "a motor vehicle regularly used for the transportation of prekindergarten disability program and kindergarten through grade 12 students of the public schools to and from school or to and from school activities, and is owned, operated, rented, contracted or leased by any district school board..."
2. **School Bus (Federal Definition):** Title 49 CFR Part 571.3 defines: "school bus" as "a bus that is sold or introduced in interstate commerce for purposes that include carrying students to and from school or related events."
3. **Multi-Function School Activity Bus (MFSAB):** is defined by Florida school bus specifications as a school bus constructed to FMVSS and Florida school bus specifications to be used for school-related activities. MFSABs may not be used to transport students to and from school or between schools for the purpose of attendance.
4. **MFSAB (Federal Definition):** Title 49 CFR Part 571.3 defines "MFSAB" as a school bus NOT used to transport students to and from home or school bus stops.

SCHOOL BUS TYPES:

1. **Type A:** A school bus that is constructed using a cutaway front-section vehicle with a left side driver's door. This definition includes two classifications: Type A-1, with a Gross Vehicle Weight Rating (GVWR) of 14,500 pounds or less, and Type A-2, with a GVWR greater than 14,500 pounds and less than or equal to 21,500 pounds.
2. **Type C:** A school bus that is constructed using a chassis with a hood and front fender assembly. The entrance door is behind the front wheels. This type also includes the cutaway truck chassis or truck chassis with cab, with or without a left side door, and with a GVWR greater than 21,500 pounds. Also known as a conventional school bus.
3. **Type D:** A school bus that is constructed using a stripped chassis. The entrance door is ahead of the front wheels. This type bus is also known as a rear engine or front engine transit-style school bus.

MFSAB:

Can be a Type A, C or D school bus as described above, with the following exceptions:

Identification: The bus body shall bear the words **"ACTIVITY BUS"** in a contrasting color at least 8 inches high in the area where "school bus" is normally positioned. Lettering and numbering shall conform to FMVSS and Florida School Bus Specifications and shall meet reflectivity standards. The numbering on this bus may be of a contrasting color. The name of the school system shall be displayed in at least 6-inch letters on both sides of the bus in the beltline area. School or team lettering no larger than 6 inches high and logos no larger than 12 inches high may be placed below the beltline**. NO additional SIGNS OR LOGOS** shall be applied to any area of the bus, including the bumpers and the windows.

Color: The local school board must determine and approve the color of the activity bus. The color scheme may utilize any combination of up to **three** colors. This combination may be in addition to an optional white roof. The color National School Bus Yellow shall not be used as a part of the color scheme. The bus wheels shall **not** be painted black or yellow; however, they may be painted one of the three colors selected for the bus body or may be unpainted aluminum-finished polished wheels.

Seating: Type 2 lap/shoulder seat belts are required for all seating positions, including the driver's seat.

Lighting and Warning Devices: All activity buses shall meet state and federal standards for home-to-school bus lighting and warning device requirements, with the following exceptions:

1. MFSAB's shall not be equipped with alternately flashing amber and red student warning signal lamps used for loading and unloading students.
2. MFSABs shall not be equipped with stop arm signals or crossing control arms.

WARRANTIES AND PARTS AVAILABILITY FOR NEW VEHICLES:

All warranties listed herein must apply to all school buses manufactured after the effective date of these specifications and sold through the state school bus bid purchase program. Body and chassis manufacturers' warranty policies must allow revision of warranty start date for each vehicle to the actual in-service date by the school district. Appropriate forms to update chassis warranties must be included in the owner-operator's packet supplied with the chassis and must be conveyed along with the body warranty by the body builder to the district upon delivery of the completed unit. Above requirements must apply to the basic warranties, all component warranties and any extended warranties offered or required. There must be no hours-of-use limitation on any warranty required in these specifications or the associated state bid for school buses.

Manufacturers offering school bus chassis or bodies for sale in the state of Florida must make available replacement parts for said buses for a period of no less than 120 months.

The minimum labor rate for all warranty related repairs must be **$75.00** per hour.

CHASSIS WARRANTIES:

1. The minimum chassis warranty shall be **12,000 miles or 12 months**.
2. The standard chassis warranty for Florida school bus bids shall be **100,000 miles or 60 months**.
3. Engines (including flywheel, flex plate and harmonic balancer) on types A, C and D chassis must be included with both minimum chassis warranty and standard chassis warranty as described above.
4. Pricing requests will be added to the bid for the following extended engine warranty options:
    a. pricing for 60 months/150,000 miles;
    b. pricing for 60 months/200,000 miles; and
    c. pricing for 60 months/unlimited mileage.
5. Chassis frame rails, cross members, fuel tanks, front axle I-beams and rear axle housings must be warranted for a period of 120 months, from the updated in-service date of the vehicle, 100 percent parts and labor.
6. Paint finish coats to chassis, hood, fenders, and cowl shall be warranted for 60 months/100,000 miles, 100 percent parts and labor, for adhesion, color retention and gloss retention.
7. Color Retention: During the first 36 months from the in-service date, the color coat must not shift colors more than 4 ΔE from the centroid, as specified in School Bus Manufacturers Technical Council (SBMTC) publication SBMTC-008. During the 60-month warranty period, the color coat must not shift color more than 8 ΔE from the centroid, as specified in SBMTC-008.

8. Gloss: During the first 36 months from the in-service date, the gloss reading must not fall below 60 at 60°. During the 60-month warranty period, the gloss reading must not drop below 30 at 60°.
    a. All measurements must be the average of 12 readings taken at various points on the bus, but no reading must be more than three points under the stated minimum. All readings must be taken after the bus is thoroughly washed to remove road film and dust.

BODY WARRANTIES:

1. The minimum body warranty shall be 12 months.
2. The standard body warranty for Florida school bus bids shall be for 60 months/100,000 miles, 100 percent parts and labor and shall include, but not be limited to, the following items:
    a. The total air conditioner system on any bus so equipped, including parts and labor and excluding air filters used in normal preventive maintenance. Chassis engine-driven air conditioner compressor applications must be approved in writing by the engine manufacturer, who must state that the installation will not void or reduce the engine manufacturer's warranty or extended service liabilities in any way.
    b. All mirror assemblies and mounting bracketry must be warranted against rust and corrosion and any reduction in clarity of view due to discoloration or other deterioration of the lens.
    c. All bus body electrical wiring and switches, including, but not limited to, damage resulting from wiring or connectors becoming abraded, pierced by fasteners, shorted or otherwise damaged during manufacture or use.
    d. Paint finish coats to body, hood and cowl for adhesion, color retention and gloss retention. Acceptable lower limits during the warranty period are as follows:
        i. Adhesion: During the 60-month warranty period, paint and priming compounds must not fail to adhere to the bus with normal use and care.
        ii. Color Retention: During the first 36 months of service, the color coat must not shift colors more than 4 ΔE from the centroid, as specified in SBMTC-008. During the 60-month warranty period, the color coat must not shift color more than 8 ΔE from the centroid, as specified in SBMTC-008.
        iii. Gloss: During the first 36 months of service, the gloss reading must not fall below 60 at 60°. During the 60-month warranty period, the gloss reading must not drop below 30 at 60°.
        iv. All measurements must be the average of 12 readings taken at various points on the bus, but no reading must be more than three points under the stated minimum. All readings must be taken after the bus is thoroughly washed to remove road film and dust.
    e. All emergency exit roof hatches, including defects in material and workmanship and against leakage.
    f. All passenger seat back cushions and seat frames, excluding vandalism of any exposed foam.
    g. All powered entrance doors and operating and control systems.
3. Power lift warranty minimums are listed below, and are **not included** with the standard body warranty.

POWER LIFT WARRANTY:

A statement of warranty must be provided with each lift assuring the quality of materials and workmanship of the product for at least 36 months from the updated in-service date of the vehicle. The minimum warranty must provide 100 percent parts coverage for 36 months and 100 percent labor coverage for 12 months.

MINIMUM WARRANTY OPTIONS:

Each manufacturer or dealer may include as part of its bid package credit option allowances for districts that wish to forego the aforementioned standard and extended warranty plans and purchase the minimum/base warranty option package.

TECHNOLOGY AND EQUIPMENT, NEW:

The intent of these specifications is to accommodate new technologies and equipment that will better facilitate student transportation. New technology and equipment are acceptable for use in all vehicles if:

1. Items do not compromise the effectiveness or integrity of any major safety system. (Examples of safety systems include, but are not limited to, compartmentalization, the eight-lamp warning system, emergency exits and the approved color scheme.)

2. Items do not diminish the safety of the bus interior.
3. Items do not create additional risk to students who are boarding or exiting the bus or are in or near the school bus loading zone.
4. Items do not require undue additional activity and/or responsibility for the driver.
5. Items generally increase efficiency and/or safety of the bus, generally provide for a safer or more pleasant experience for the occupants and pedestrians in the vicinity of the bus and/or generally assist the driver and makes his/her many tasks easier to perform.

CHANGES OR CLARIFICATION OF SPECIFICATIONS:

Florida School Bus Specifications may be amended pursuant to the provisions of rule 6A-3.003, F.A.C.
The School Transportation Management Section, with the concurrence of the Florida Association for Pupil Transportation (FAPT), School Bus Specifications Committee, and consistent with Florida purchasing laws and the bus bid contract, may at its discretion grant variances or exemptions and may from time to time issue clarifications of these specifications, as necessary, to provide safe, efficient and cost-effective equipment to Florida school districts and charter schools and to provide for advances in technology.

Should a clarification or interpretation of these Florida School Bus Specifications be requested, inquiries should be directed to Director, School Transportation Management Section, Florida Department of Education, 325 West Gaines Street, Suite 834, Tallahassee, Florida 32399-0400.

SECTION I

TYPE A SCHOOL BUS
MINIMUM CHASSIS SPECIFICATIONS

ALTERNATOR:
Type A buses shall have a minimum 130-amp alternator. Buses equipped with an electrically powered wheelchair lift and/or air conditioning shall be equipped with the highest rated capacity available from the chassis Original Equipment Manufacturer (OEM).

BATTERIES:
The storage battery, or batteries, shall have a minimum cold cranking capacity rating (cold cranking amps) equal to the cranking current required for 30 seconds at 0 degrees Fahrenheit and a minimum reserve capacity rating of 120 minutes at 25 amps. Higher capacities may be required, depending upon optional equipment and local environmental conditions.

BRAKE, PARKING:
On Type A chassis, the manufacturer's standard parking brake is acceptable. On Type A chassis with hydraulic brakes, the parking brake control must be mounted for easy access by the driver. On air brake models, the control valve to set the parking brakes on the rear wheels must be dash-mounted.

BRAKES, SERVICE:
Hydraulic or air brakes are permissible.

BUMPER, FRONT:
Type A buses may be equipped with an OEM-supplied front bumper.

ENGINE EQUIPMENT:
1. A dry type air cleaner is required on all engines.
2. The engine must be equipped with full-flow, spin-on or cartridge-type oil filter(s), with the filter header(s) mounted directly to engine.
3. An engine coolant recovery or deaeration system is required on all chassis. Type A diesel engines must include a means to visually check the coolant level without removing the deaeration tank cap or releasing pressure from the cooling system.
4. A warning system consisting of a light and a buzzer is required on diesel-powered Type A chassis to notify the driver of low engine oil pressure and/or coolant overheating.
5. A fuel filtration and water separator system is required on all Type A diesel engines and must remove contaminants from the fuel prior to entry into the engine. The system must have a clear sight bowl or be equipped with a water-in-fuel light to notify technicians of the presence of water, must provide a valve for draining trapped water from the system and must include an electric or manual priming pump.
6. An engine oil pressure gauge is required. It must provide accurate, easily discernible readings across the entire operating range, from hot idle to full oil pressure. The gauge on engines with idle oil pressure that under normal conditions is low must provide a clear distinction between no oil pressure and engine idle oil pressure. The gauge must be directly visible to the driver in the normal seated position and must not be mounted near the center of the dash where the service door control or its associated hardware could block visibility of the gauge.
7. Radiator and other engine coolant hoses supplied by the chassis manufacturer (not including heater hoses) must be constructed of silicone rubber or must be constructed with ethylene propylene diene monomer (EPDM) covering and aramid fiber reinforcement meeting or exceeding Society of American Engineers (SAE) standard J20R EC Class D-1. Silicone hose, if used, must include stainless steel shoe-type hose clamps or constant-torque clamps. Hoses must have markings, coloring or other visible means of distinguishing them from the standard hoses.

ENGINE PERFORMANCE REQUIREMENTS FOR TYPE A BUSES:

Each bus must be furnished with a power train that meets or exceeds the following minimum criteria when tested at the gross vehicle weight rating (GVWR) required for a given bus capacity, and with all accessories (including air conditioner compressor(s), if equipped) on and operating:

1. Startability of 20 percent;
2. Gradeability of 5 percent at 25 miles per hour;
3. Gradeability of 1.5 percent at 50 miles per hour; and
4. Top speed of 70 miles per hour minimum.

Performance must be measured with the actual completed vehicle (i.e., with the body installed, unloaded except for the driver and one passenger). The vehicle must be in drive, with the engine at idle, the service brakes applied, the emergency brakes released, and all accessories on and operating. Measurement of acceleration time must begin at the moment the throttle is applied (the throttle is to be immediately and rapidly depressed to full throttle).

NOTE: The chassis manufacturer should use the heaviest chassis/body combination meeting these specifications for the specific bus size to determine required power train components. This test is an on-road test and will be performed using the heaviest available chassis/body, depending on body(ies) supplied. At the discretion of the department, unanticipated factors or variations in test conditions affecting performance test results that are beyond the control of the chassis manufacturer may be taken into account. A Pro Link, a diagnostic computer, or a speed wheel are also acceptable tools for this test.

Maximum acceleration time (from zero mph), under the conditions specified above, must be as follows (measured in seconds):

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.4	6.2	12.0	20.0	32.2

Manufacturers may offer additional engine configurations and horsepower ratings that exceed these requirements as optional equipment.

EXHAUST SYSTEM:

The exhaust system on Type A buses must have a corrosion-resistant muffler and tailpipe. The tailpipe must exit to the left of left frame rail and behind the rear wheels. The chassis manufacturer must ensure that the exhaust design allows the exit location left of the left frame rail to be maintained after any modifications to frame length by the chassis or body manufacturer. Manufacturers must ensure that exhaust temperature exiting the tailpipe with the engine running during any normal loading or unloading activity will not produce first, second or third-degree burns on students or other individuals present. The bus must not automatically regenerate the diesel particulate filter while the bus is stationary.

FRAME SIDE MEMBERS:

Frame side members must be of one-piece construction between the front and rear spring hangers. Frame rails of Type A chassis must have a minimum tensile strength of 50,000 pounds per square inch (psi).

FRONT AXLE WHEEL SEALS:

All Type A buses greater than 14,500 GVWR must have oil-lubricated front axles and seals.

FUEL TANK:

The fuel tank filler spout must be located in an easily serviceable location.

HEADLIGHTS:
Headlights must meet FMVSS and SAE standards. All buses must be equipped with Full-Time Lights (FTL) meeting the following requirements:

1. With the ignition switch off, the headlights will operate normally and the FTL system will not operate.
2. With the ignition switch on or in the "accessory" position, and with the engine not running, the FTL must not operate.
3. With the ignition switch on and the engine running with the headlight switch off, the FTL system must operate, providing low-beam headlights and tail, clearance and identification (ID) lights.
4. In all cases, the headlight switch must override the FTL system when in the "on" position.
5. This system must include a buzzer that activates if the headlight system is on with the key switch in the "off" position.

IGNITION SYSTEM:
All buses of like chassis manufacturer must have one key, regardless of the type of key supplied to Florida purchasers.

INSULATION:
Type A chassis must include heat and noise insulation inside the bus covering the dash panel (fire wall) area to as great an extent as possible. Insulation must extend at least down to the point where the body floor connects to the fire wall, including the engine cover (doghouse), which may be insulated on the interior or exterior.

LINE-SET TICKET:
The manufacturer must include with delivery of the vehicle a line-set ticket to accurately reflect all chassis components, the Gross Axle Weight Rating (GAWR) of both front and rear axles, and the gross vehicle weight rating (GVWR).

PAINT AND FINISH:
School bus yellow paint must meet SBMTC-008 for color and must have a finished gloss rating of at least 85 at 60°F and a distinctness of image rating of an average of at least 50, measured using the same method specified for gloss under **GENERAL INFORMATION AND WARRANTY PROVISIONS**. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. Trim, lettering and the bumper must be black, except that the bumper must be striped with reflective material in accordance with National School Transportation Specifications and Procedures, Revised 2015. Rims for all buses with hub-piloted wheels must be National School Bus Yellow and powder-coated by the rim manufacturer. Lug nuts must not be painted. All stud-piloted rims must be painted black.

STEERING:
A factory-installed tilt steering wheel/column is required.

TIRES AND RIMS:
Chassis must be equipped with radial tubeless tires and must have dual rear wheels. Type A buses greater than 14,500 GVWR must use hub-piloted disc wheels. Tires and rims must conform to current standards of the Tire and Rim Association.

TRANSMISSION, AUTOMATIC:
An automatic transmission is required on all chassis. It shall be heavy-duty, with a minimum of four forward speeds, on all units. On Type A chassis, 30 capacity and larger, the transmission must be an Allison 1000 or 2000 or approved equal. An external filter in the transmission oil cooler return line is required on Allison 1000 and 2000 equipped units. All Allison transmissions require OEM-approved synthetic transmission fluid and OEM filters.

Automatic transmissions incorporating a parking pawl must have a transmission shifter interlock controlled by the application of the service brake to prohibit accidental engagement of the transmission. All non-park pawl

transmissions must incorporate a park brake interlock that requires the service brake to be applied to allow release of the parking brake.

Any requests for transmission substitutions must be approved in writing by the purchasing district and the department's School Transportation Management Section.

VOLTAGE CONTROL:
The voltage regulator must be solid state (transistorized) and readily accessible for service. A voltmeter is required with a graduated scale.

WARRANTIES:
See required warranties under **GENERAL INFORMATION AND WARRANTY PROVISIONS**.

WIRING HARNESS:
The wiring must be rated for 100 amps load and include complete wiring for the tail and stop lights. It must be designed with color coding for circuits. The fuse box door, if equipped, must have a positive latch.

TYPE A SCHOOL BUS
OPTIONAL CHASSIS EQUIPMENT

AIR-SPRUNG REAR SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung rear suspension system, when available. Rear shock absorbers are also required with this option, as on standard suspension systems.

COLLISION MITIGATION:
There shall be an option for passive and/or active electronic collision mitigation system(s), if available.

LOW-PROFILE RADIAL TIRES:
There shall be an option for all-wheel-position, highway-ribbed, low-profile, tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs.

SPARE DISC WHEEL:
There shall be an option for a spare disc wheel, which must be same size and type as the original rims.

STABILITY CONTROL:
There shall be an option for electronic stability control meeting the minimum requirements of FMVSS No. 136, if available.

STRAIGHT FLOOR CHASSIS:
There shall be an option for Type A chassis to accept straight floor bodies (i.e., bodies with no wheel wells). This type chassis must have a combination of axles, suspension, tires, wheels and axle stops that ensures that the maximum upward travel of the rear suspension in normal straight-ahead driving does not protrude above the top of the frame rails.

TOW HOOKS OR TOW EYES:
There must be two subcategories for this option: (1) two heavy-duty front tow hooks or tow eyes (each hook or eye must be installed by the chassis manufacturer in an approved manner to each frame rail); (2) two heavy-duty rear tow hooks or tow eyes (each hook or eye must be installed by the chassis manufacturer in an approved manner to each frame rail).

AUTOMATIC TRANSMISSION WARRANTY:
There shall be an option for extension of the transmission warranty to five years, unlimited mileage, 100 percent parts and labor. Also see GENERAL INFORMATION AND WARRANTY PROVISIONS.

SECTION II

TYPE C AND TYPE D SCHOOL BUS
MINIMUM CHASSIS SPECIFICATIONS

ALTERNATOR:
Types C and D chassis with internal combustion engines shall be equipped with a heavy-duty alternator having a minimum output rating of 200 amps or higher, and should produce a minimum current output of 50 percent of the rating at engine idle speed.

Buses equipped with an electrically powered wheelchair lift and/or air conditioning shall have a minimum alternator output of 240 amps and may be equipped with a device that increases the engine idle speed when the voltage drops to, or below, a pre-set level.

BATTERIES:
The storage batteries shall have minimum cold cranking capacity rating (cold cranking amps) equal to the cranking current required for 30 seconds at 0 degrees Fahrenheit and a minimum reserve capacity rating of 120 minutes at 25 amps. Higher capacities may be required, depending upon optional equipment and local environmental conditions.

BRAKE, PARKING:
On hydraulic brake models, a parking brake is required, with the control mounted for easy access by the driver. On air brake models, a dash-mounted control valve to spring-set the parking brake on the rear wheels is required.

BRAKES, SERVICE:
Hydraulic brakes are acceptable on 29-35 capacity Type C buses. Air brakes are required on all Type C buses larger than 41 capacity, and all Type D front and rear engine buses.

BUMPER, FRONT:
Types C and D buses must have a front bumper that is black, of full width channel type, and a minimum of 8 inches wide (vertically). The bumper must have sufficient structural and mounting strength to ensure that the front of the vehicle can be lifted by means of an air bumper-type jack, without permanent deformation of the bumper, brackets, or chassis frame rail(s).

ENGINE EQUIPMENT:
1. Diesel engines must be available in at least one of the following two configurations:
    a. Parent bore type block; in-line 6 cylinder design; minimum 6.4 liters displacement.
    b. Wet sleeve type block; in-line 6 cylinder design; minimum 6.4 liters displacement.

    NOTE: Additional engines of other configurations or displacements, including gasoline, propane and CNG (not in lieu of the above), meeting all other requirements listed herein may be offered, subject to approval by the department. Electric-powered configurations may be offered and are exempt from the engine requirements listed below.

2. A dry type air cleaner is required. An air filter restriction indicator is required on diesel engines. The restriction indicator must incorporate a system that does not allow unfiltered air into the engine if the indicator cracks or breaks.
3. The engine must be equipped with a full-flow, spin-on or cartridge-type oil filter(s), with the filter header(s) mounted directly to engine.
4. An engine coolant recovery or deaeration system is required on all chassis. Diesel engines must include a means for visually checking the coolant level without removing the deaeration tank cap or releasing pressure from the cooling system.

5. A warning system consisting of a light and a buzzer is required on gasoline, propane, CNG and diesel-powered chassis to notify the driver of low engine oil pressure and/or coolant overheating.
6. A fuel filtration system with a water separator is required on diesel engines and must remove contaminants from the fuel prior to entry into the engine. The system must have a clear sight bowl or be equipped with a water-in-fuel light to notify technicians of the presence of water, must provide a valve for draining trapped water from the system, and must include an electric or a manual priming pump.
7. An engine oil pressure gauge and a coolant temperature gauge are required. The oil pressure gauge must provide accurate, easily discernible readings across the entire operating range, from hot idle to full oil pressure. Gauges on engines with idle oil pressure, which under normal conditions is low, must provide a clear distinction between no oil pressure and engine idle oil pressure. Gauges must be directly visible to the driver in the normal seated position and must not be mounted near the center of the dash where the service door control or associated hardware could block visibility of the gauges.
8. Radiator and other engine coolant hoses supplied by the chassis manufacturer (not including heater hoses) must be constructed of silicone rubber or ethylene propylene diene monomer (EPDM) covering and aramid fiber reinforcement meeting or exceeding SAEJ20R EC Class D-1. Silicone hose, if used, must include stainless steel shoe-type hose clamps or constant-torque clamps. Hoses must have markings, coloring or other visible means of distinguishing them from standard hoses.
9. Manufacturers must use the largest capacity oil pan available for each engine configuration in order to achieve the longest duration oil change interval.

ENGINE PERFORMANCE REQUIREMENTS:

Each bus must be furnished with a power train that meets or exceeds the following minimum criteria when tested at the GVWR required for a given bus capacity, and with all accessories (including air conditioning compressor(s), if equipped) on and operating:

1. Startability of 20 percent;
2. Gradeability of 5 percent at 25 miles per hour;
3. Gradeability of 1.5 percent at 50 miles per hour; and
4. Minimum top speed of 60 miles per hour.

NOTE: The chassis manufacturer should use the heaviest chassis/body combination meeting these specifications for the specific bus size to determine required power train components. This test is an on-road test and will be performed using the heaviest available chassis/body, depending on body or bodies supplied. At the discretion of the department, unanticipated factors or variations in test conditions affecting performance test results that are beyond the control of the chassis manufacturer may be taken into account. A Pro Link, a diagnostic computer or a speed wheel are also acceptable tools for this test.

Maximum acceleration time (from zero mph), must be as follows (measured in seconds): Performance must be measured with the actual completed vehicle (i.e., with body installed, unloaded except for the driver and one passenger). The vehicle must be in drive, with the engine at idle, the service brakes applied, the emergency brakes released, and all accessories on and operating. Measurement of acceleration time must begin at the moment the throttle is applied (the throttle is to be immediately and rapidly depressed to full throttle).

29-77 Capacity Types C and D:

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.4	6.2	12.0	20.0	32.2

78-90 Capacity Type D:

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.7	7.1	12.0	20.0	32.2

Manufacturers may offer additional engine configurations and horsepower ratings that exceed these requirements as optional equipment.

EXHAUST SYSTEM:
The exhaust system must have a corrosion-resistant muffler and tailpipe. The tailpipe must exit to the left of left frame rail and behind the rear wheels. Manufacturers must ensure that exhaust temperature exiting the tailpipe with the engine running during any normal loading or unloading activity will not produce first, second or third-degree burns on students or other individuals present. The bus must not automatically regenerate the diesel particulate filter while the bus is stationary. Also see Section III, Electrical Equipment and Wiring.

FRAME SIDE MEMBERS:
Frame side members must be of one-piece construction between the front and rear spring hangers. Frame rails must have a minimum tensile strength of 50,000 pounds per square inch (psi).

FRONT AXLE LUBRICATION:
All buses must have oil-lubricated front axle hubs, providing an externally visible means of checking the lubricant level.

HEADLIGHTS:
Headlights must meet FMVSS and SAE standards. All buses must be equipped with Full-Time Lights (FTL) meeting the following requirements:

1. With the ignition switch off, the headlights will operate normally and the FTL system will not operate.
2. With the ignition switch on or in the "accessory" position, and with the engine not running, the FTL must not operate.
3. With the ignition switch on and the engine running with the headlight switch off, the FTL system must operate, providing low-beam headlights and tail, clearance and identification (ID) lights.
4. In all cases, the headlight switch must override the FTL system when in the "on" position.
5. This system must include a buzzer that activates if the headlight system is on with the key switch in the "off" position.

HOOD:
Engine hood on Type C buses must not require more than 20 pounds of force to open or close.

IGNITION SYSTEM:
All ignition switches must be keyed alike. All buses of like chassis manufacturer and type must have one key.

INSULATION:
Type C chassis must include full width and height heat and noise insulation on the inside or outside of the bus covering the dash panel (firewall) area to as great an extent as possible and at least up to the top of the firewall and down to the point that the body floor connects to the firewall, including the engine cover (doghouse). Type D Front Engine buses must include complete heat and noise insulation of the doghouse area.

LINE-SET TICKET:
Manufacturer must include with delivery of vehicle a line-set ticket to accurately reflect all chassis components, GAWR of both front and rear axles, and GVWR.

PAINT AND FINISH, TYPES C and D CHASSIS:
School bus yellow paint must meet SBMTC-008 for color and must have a finished gloss rating of at least 85 at 60° and a distinctness of image rating of an average of at least 50 measured using the same method specified for gloss under GENERAL INFORMATION AND WARRANTY PROVISIONS. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. Trim, lettering and bumper must be black, except that bumper must be striped with reflective material in accordance with National School Transportation Specifications and

Procedures, Revised 2015 and Procedures or these specifications. Rims must be powder-coated, National School Bus Yellow, by the wheel manufacturer. Lug nuts must not be painted.

NOTE: MFSAB is excluded from the school bus yellow color requirement of this section, however, all other paint rating requirements shall apply. See MFSAB requirements under **GENERAL INFORMATION AND WARRANTY PROVISIONS** beginning on page 1.

RADIATOR FILLER TUBE:
The radiator filler must be located for ease of service from the engine compartment on Type C and Type D rear engine buses. It must be located for ease of service from outside the bus on Type D front engine buses.

STABILITY CONTROL:
Electronic stability control meeting the minimum requirements of FMVSS No. 136 is required.

STEERING:
A tilt steering wheel/column is required.

TIRES AND RIMS:
Chassis must be equipped with radial tubeless tires mounted on hub-piloted disc wheels. All wheels of 8.25 inches or greater width must be two hand-hold wheels. Tires and rims must conform to current standards of the Tire and Rim Association (see Chassis Specifications Charts for sizes). See PAINT AND FINISH for wheel color information.

TRANSMISSION, AUTOMATIC:
An automatic transmission is required on all chassis as specified:

1. Type C 29-47 capacity, Allison PTS 2100, 5 speed or Ford 6R140, 5 speed or approved equal.
2. Type C 65-78 capacity, Allison PTS 2500, 5 speed or Ford 6R140, 5 speed or approved equal.
3. Type D 71 capacity front engine, Allison PTS 2500, 5 speed or approved equal.
4. Type D 78-89 capacity front engine, Allison PTS 2500, 5 speed or approved equal.
5. Type D 72 capacity rear engine, Allison PTS 2500, 5 speed or approved equal.
6. Type D 78-89 capacity rear engine, Allison PTS 3000, 6 speed or approved equal.

All requests for transmission substitutions must be approved in writing by the purchasing district and by the department's School Transportation Management Section.

Allison PTS 2000 series transmissions must include an external spin-on type, vertically mounted transmission fluid filter. The shifter must be dash- or console-mounted and must be either a T-handle or push-button design.

Allison PTS 3000 series transmissions must have at least five speeds enabled for front engine Type D and six speeds for rear engine Type D.

All transmissions require synthetic or OEM approved equal transmission fluid and must use OEM filters.

Automatic transmissions incorporating a parking pawl must have a transmission shifter interlock controlled by the application of the service brake to prohibit accidental engagement of the transmission. All non-park pawl transmissions must incorporate a park brake interlock that requires the service brake to be applied to allow release of the parking brake.

WIRING HARNESS:
All chassis electrical wiring must conform to current standards of the Society of Automotive Engineers, be coded by color, insulated and completely encased in convoluted loom or equivalent protective wrapping. In locations that prevent such looming, wires must be properly held in place by appropriate fasteners at intervals necessary to prevent possible damage to wire insulation. The fuse box door, if equipped, must have a positive latch. All chassis electrical

circuits must be fused per the requirements of FMVSS. Buses using multiplexed electrical systems may meet the intent of these specifications without the use of specified equipment, subject to approval by the department.

TYPE C CHASSIS:

Maximum Design (Passenger) Capacity	29LT	29	47	65	71	77
Front Axle Weight Rating (pounds)	5,000	6,000	7,000	9,000	10,000	10,000
Rear Axle Weight Rating (pounds)	10,000	13,000	15,000	19,000	19,000	20,000
Cowl to axle, minimum (inches)	123	123	162	229	250	250
Minimum tire size-Load Range; tubeless-radial ply*	225R-19.5F	10R-22.5-F	11R-22.5-G	11R-22.5-G	11R-22.5-G	11R-22.5-G
Disc wheels -- minimum rim width (inches)	6.75	7.5	8.25	8.25	8.25	8.25
Hub-piloted disc wheels for tubeless radial tires	6 stud, 5 hand hold	6 stud, 5 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold
Fuel tank minimum size (gallons)	30	30	60	60	60	60
Allison transmission series (# of forward gears) ** Must include park pawl.	PTS 1000 or 2200 (5)**	PTS 2100 (5)	PTS 2100 (5)	PTS 2500 (5)	PTS 2500 (5)	PTS 2500 (5)

TYPE D FORWARD CONTROL FRONT ENGINE:

Maximum Design (Passenger) Capacity	71	77	83	89
Front Axle Weight Rating (pounds)	10,800	12,000	12,000	12,000
Rear Axle Weight Rating (pounds)	17,000	19,000	21,000	23,000
Tires – minimum size, Load Range acceptable*	11R-22.5G	11R-22.5G	11R-22.5-G	11R-22.5-G
Hub-piloted disc wheels-10 stud, minimum rim width (inches)	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold
Minimum size fuel tank (gallons)	60	60	60	60
Allison transmission series (# of forward gears)	PTS 2500 (5)	PTS 3000 (5)	PTS 3000 (5)	PTS 3000 (5)

An automatic transmission is required on all chassis. See **TRANSMISSION, AUTOMATIC** for required specifications.

Maximum overall length of the bus must not exceed 45 feet, bumper to bumper.

*Low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs may be approved in lieu of standard conventional tubeless radial tires.

TYPE D REAR ENGINE CHASSIS SPECIFICATIONS CHART:

Maximum Design (Passenger) Capacity	72	78	84	90
Front Axle Weight Rating (pounds)	11,000	12,000	12,000	12,000
Rear Axle Weight Rating (pounds)	19,000	21,000	23,000	23,000
Tires – minimum size, Load Range acceptable *	11R-22.5-G	11R-22.5-G	11R-22.5-G	11R-22.5-G
Hub-piloted disc wheels-10 stud, minimum rim width (inches)	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold
Minimum size fuel tank (gallons)	60 gal.	60 gal.	60 gal.	60 gal.
Allison transmission series (# of forward gears)	PTS 2500 (5)	PTS 3000 (6)	PTS 3000 (6)	PTS 3000 (6)

Maximum length of vehicle must not exceed 45 feet, bumper to bumper.

*Must meet Tire and Rim Association Standards. Low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs may be approved in lieu of standard conventional tubeless radial tires.

TYPE C AND TYPE D SCHOOL BUS
OPTIONAL CHASSIS EQUIPMENT SPECIFICATIONS

AIR-SPRUNG FRONT SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung front suspension system, when available. Front shock absorbers are also required with this option, as on standard suspension systems.

AIR-SPRUNG REAR SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung rear suspension system, when available. Rear shock absorbers are also required with this option, as on standard suspension systems.

COLLISION MITIGATION:
There shall be an option for passive and/or active electronic collision mitigation system(s), if available.

ALTERNATOR, HIGHER OUTPUT:
There shall be an option for alternators having a minimum of 270 amps hot-rated output.

HIGH CAPACITY FUEL TANK:
There shall be an option for a fuel tank of higher capacity than the standard fuel tank, mounted on the right side or between the frame rails, when available.

LOW-PROFILE RADIAL TIRES:
There shall be an option for all-wheel-position, highway-ribbed, low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs.

SPARE DISC WHEEL:
There shall be an option for a spare disc wheel, which must be same size, type and color as the original rims.

TOW HOOKS OR TOW EYES:
There shall be an option for two heavy-duty tow hooks or tow eyes, installed by manufacturer on each frame rail at the front of the bus in an approved manner. The manufacturer may also offer rear-mounted tow hooks or tow eyes meeting these requirements.

STRAIGHT FLOOR CHASSIS:
There shall be an option for a chassis designed to accept straight floor bodies (i.e., bodies with no wheel wells). This type of chassis must have a combination of axles, suspension, tires, wheels and axle stops that ensures that the maximum upward travel of the rear suspension in normal straight-ahead driving does not protrude above the top of the frame rails.

TIRES:
There shall be an option for alternate brand, size and tread designs of tires when available. Optional tires must meet GAWR requirements and Tire and Rim Association Standards.

SECTION III

MINIMUM SCHOOL BUS BODY SPECIFICATIONS

The specifications set forth in this section apply to types A, C and D school buses. Special exceptions for Type D bodies are listed at the end of this section. The completed school bus must meet all Federal Motor Vehicle Safety Standards, requirements of the State of Florida and requirements of the National School Transportation Specifications and Procedures, Revised 2015 (state specifications supersede national specifications). References to bus capacity within these specifications are for Maximum Design Capacity, as defined below under **BODY DATA PLATE**.

BATTERY DISCONNECT SWITCH:

There must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within three feet of the battery box if no A/C box is available. This switch must be accessible and operable from the exterior of the bus. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

BODY DATA PLATE:

A durable data plate must be mounted inside the body in a clearly visible location. The body data plate information must include a listing of the "Maximum Design Capacity" and the "Equipped Capacity" of the body. Maximum Design Capacity must be the maximum number of passengers the bus (body shell size) can carry, based on 12.8 inches minimum seat width per passenger, with the minimum knee room (seat spacing) permitted by FMVSS No. 222. Equipped Capacity must be the actual passenger capacity of the finished body, as equipped by the manufacturer, based on:

1. The number of total passengers the installed bench seats are designed to carry; and
2. The number of wheelchair positions installed (based on wheelchair space dimensions contained in Section IV of these specifications).
3. An example of the format to be used for Equipped Capacity is "28 + 3 WC," meaning 28 regular passenger seating positions plus three wheelchair positions.

BODY FLUID CLEANUP KIT:

Each bus must be equipped with a disposable, sealed body fluid cleanup kit mounted by a method that will retain it under a load equivalent to 20 times the weight of the kit and must be removable without the use of tools. The kit must be accessible to the driver. The kit container must be sealed with a breakable, nonreusable seal, with the following items:

1. A U.S. Environmental Protection Agency (EPA) registered liquid germicide (tuberculicidal) disinfectant;
2. A fully disposable wiping cloth;
3. A water-resistant spatula;
4. Step-by-step directions;
5. Absorbent material with odor counteractant;
6. Two pairs of gloves (Nitrile);
7. One package towelettes; and
8. A discard bag (non-labeled paper bag with plastic liner and a twist tie). This bag must be approximately 4 x 6 x 14 inches and of a non-safety color (i.e., not red, orange or yellow).

BUMPER, REAR:

The rear bumper must be of pressed steel channel at least 3/16 inch thick, 8 inches wide (vertically), and flanged 2 inches at the top and bottom, or otherwise designed to furnish equal flexural strength. It must be of wraparound design and securely fastened to each chassis rail and braced from each end of bumper to chassis rail with heavy braces. The bumper must have the structure and strength necessary to allow the unloaded vehicle to be lifted with a bumper jack without deformation or damage. The contour of the bumper must fit the contour of the body in a manner to prevent

hitching to or riding on the bumper. An appropriate seal must be applied between the bumper and the body panel, unless the gap between the bumper and the body panel is 1/8 inch or less.

DRIVER'S DOCUMENT COMPARTMENT:

On Types C and D buses, a pouch on the front side of the driver's side crash barrier with minimum dimensions of 17 x 12 x 4 inches is required. This pouch must be located to the left side of the barrier for types B and C, and to the right side of the barrier for Type D, accessible to the driver from the seated position. It must be made of the same material as the covering on the barrier and have a lid or cover with a latching device such as Velcro™ or snaps.

DRIVER'S SEAT:

All school buses must have a driver's seat equipped with a one-piece high back designed to minimize the potential for head and neck injuries in rear impacts, providing minimum obstruction to the driver's view of passengers, and meeting applicable requirements of FMVSS No. 222. The height of the seat back must be sufficient to provide the specified protection for up to a 95th percentile adult male, as defined in FMVSS No. 208. The driver contact area of the cushion and seat back must be made of soil and wear-resistant cloth material, nylon, or equivalent. The remainder of the seat may be of a different material. The seat must be centered behind the steering wheel with the backrest a minimum distance of 11 inches behind the steering wheel. The seat must be securely mounted to ensure minimal flexing of the seat and the floor panel(s).

All school buses equipped with air brakes must also be equipped with an air suspension driver's seat meeting the following additional requirements:

1. The air control for the height adjustment must be within easy reach of the driver in the seated position.
2. The seat cushion must be a minimum of 19 1/2 inches wide, must be fully contoured for maximum comfort, and have a minimum of two adjustment positions to allow adjustment of seat bottom angle.
3. The backrest must include adjustable lumbar support.
4. The seat must have a minimum of 7 inches fore and aft travel, adjustable with the driver in the seated position. This requirement applies to the seat mechanism.
5. The seat must have a minimum 4 inches up and down travel.
6. The seat back must include adjustability of tilt angle.
7. All adjustments must be by fingertip controls not requiring the use of tools.
8. Air suspension seats must be dampened by dual shock absorbers, acting independently.
9. The seat must comply with all applicable Federal Motor Vehicle Safety Standards.
10. All other buses must have a driver's seat equipped with a hydraulic and/or spring suspension base, and a minimum seat cushion width of 19 inches, and must meet the other requirements listed herein for air suspension seats.

The chassis manufacturer's standard driver's seat is acceptable for Type A buses. Also, see **GENERAL INFORMATION AND WARRANTY PROVISIONS.**

DRIVER'S SEAT BELT:

Buses must be equipped with a Type 2 lap belt/shoulder harness seat belt assembly for the driver. The design must incorporate a fixed female push-button latch on the right side at seat level, and a male locking bar tongue on the left, retracting side. The assembly must be equipped with a single, dual sensitive Emergency Locking Retractor (ELR) for the lap and shoulder belt. This system must be designed to minimize cinching down on suspension type seats. The lap portion of the belt must be anchored or guided at the seat frame by a metal loop or other means at the right side of the seat to prevent the driver from sliding sideways out of the seat. There must be a minimum of 7 inches of adjustment of the "D" loop of the driver's shoulder harness, designed to provide adequate adjustment for all sizes of drivers within the range of a 5th percentile female to a 95th percentile adult male, as defined in FMVSS No. 208. Shoulder belt tension must be no greater than is necessary to provide reliable retraction of the belt and removal of excess slack. The seat belt assembly and anchorage must meet applicable FMVSS. Seat belt material must be bright orange in color, in order to provide maximum contrast with the driver's clothing.

NOTE: The driver's seat belt assembly for Type A buses must be the manufacturer's standard Type 2 driver seat belt, meeting applicable FMVSS for school buses of 10,000 pounds GVWR and less.

ELECTRICAL EQUIPMENT AND WIRING:

All wiring must conform to current SAE standards, be coded by color and be insulated. All joints must be soldered or joined by equally effective fasteners. All wires connected directly to the battery must have the end terminals protected with heat-shrink tubing. Body wiring and connectors, including any battery cables routed by the body manufacturer, must be routed so as to eliminate the possibility of wiring and connectors becoming abraded, pierced by fasteners, shorted or otherwise damaged during manufacture and use. All chassis and body electrical wiring must be completely encased in convoluted loom or equivalent protective wrapping. In locations that prevent such looming, wires must be properly held in place by appropriate fasteners at intervals necessary to prevent possible damage to wire insulation. A complete body wiring diagram showing the location of wires and the code of circuits for buses meeting Florida Specifications must be installed in each body. Additionally, for all school bus body optional electronic components installed in the bus, the body manufacturer must provide each district with at least one comprehensive parts and repair manual. Buses using multiplexed electrical systems may meet the intent of these specifications without the use of specified equipment subject to approval by the department. All requirements listed herein for Light Emitting Diode (LED) type lights must be for the latest generation LEDs available at the time of manufacture. Electrical components specified below must be provided, and wiring must be in circuits, as follows:

ACCESS PANEL, ELECTRICAL:

All Type C and D buses must be equipped with an electrical access panel to provide access to body electrical components and circuits.

BACKUP LIGHTS; BACKUP ALARM and DECAL:

There must be two backup lights of 4 inches in diameter, or 12.5 square inches, on the rear of all bodies meeting the following requirements:

1. They must be sealed LED lights;
2. They must use a plug connector; and
3. They must be set into the bus body (flush-mounted).

The body manufacturer must provide a backup alarm on each bus to provide audible warning that the bus is in reverse gear. The alarm must meet the requirements of SAE J994 and have a variable volume feature that allows the alarm to vary from 87 dBA to 112 dBA sound level, staying at least 5 dBA above the ambient noise level.

All buses must have a decal in full view of the driver indicating that the bus is equipped with a backup alarm.

BRAKE/TAIL LAMPS, LARGE:

Buses must be equipped with two combination LED type brake/tail lamps of a minimum of 7 inches in diameter or 38 square inches, mounted as high and spaced as far apart laterally as practical, below the window line, but not less than three feet measured from the center of the lamps. Also, they must use a plug type connector meeting FMVSS and SAE standards.

BRAKE/TAIL LAMPS, SMALL:

Buses must be equipped with two combination brake/tail lamps of 4 inches in diameter or 12.5 square inches, meeting FMVSS. Light intensity must at least equal Class A turn signal units. These lights must be LED lights with smooth exterior lens surfaces. They must use a plug connector and be set into the bus body.

CIRCUIT BREAKERS:

All body electrical circuits must be fused per the requirements of FMVSS. The main body electrical circuit must be protected by a manually resettable circuit breaker or fusible link.

CLEARANCE AND IDENTIFICATION LIGHTS:

All clearance and identification lights must meet current SAE requirements and FMVSS and must:

1. Be sealed LED lights.
2. Be surface-mounted with Lexan™, polycarbonate, or other non-corrosive material guard to prevent breakage. Lights set into the body do not require guards.
3. Use a plug connector.
4. Be activated by the headlight circuit.

CONTROL PANEL LIGHTING:

The control panel or switches supplied by the body manufacturer must be illuminated and have a control for varying the illumination to the control panel or switches.

EMERGENCY EXIT BUZZER:

Emergency door and emergency window buzzers must be connected to the accessory side of the ignition switch.

HEATER/DEFROSTER:

There must be a heater mounted in the front of the bus. A supplemental heater may be installed in any bus. All heaters must provide evenly distributed heat throughout the bus body, provide defrosting for the windshield and entrance door and meet the following performance standards:

1. Heaters must have capabilities of providing evenly distributed heat and creating a temperature rise to 50° F inside the body shell when soaked in an ambient temperature of 0° F for 15 hours. Heater performance must be measured as follows:
    a. Temperature measurement must be taken 39 inches inward from side walls, 39 inches inward from windshield and rear door, and 36 inches above floor. Heat must be evenly distributed through the aisle area.
    b. Temperature must rise to 50° F inside (when soaked in ambient temperature of 0° F for 15 hours) in 20 minutes when 170° F hot water is applied at the rate of 3 gallons per minute at a maximum of 6 psi pressure.
2. Defrosters – Must meet the following criteria:
    a. Must be able to defrost the total windshield area in a reasonable period of time under all normal driving conditions.
    b. Must be directional to provide the driver capability of defrosting in the drive view area first.
    c. Defroster system must have the capability of mixing a minimum of 50 percent outside fresh air with the defrosting air.
    d. Defroster system must meet the SAE Standard J381 performance requirement.

All heater hoses must meet or exceed SAEJ20R EC Class D-1 standards. If silicone hoses are used, shoe design hose clamps must be used. Heater lines on the interior of the bus must be fully shielded to prevent scalding of the driver or passengers in the event of a hose or connection failure. The modesty panels must not obstruct heat flow from the driver's area to the passenger area of the bus; this may be accomplished by ducting or other means that retains, to the extent practical, the required full width aluminized steel panel extending down to the floor. Also see **SEATING AND MODESTY PANELS.**

A 1/4 turn ballcock coolant flow regulating valve for the heater must be installed so that its control is accessible to the driver, but in such a location as to discourage tampering by students. This valve may be remotely located if a suitable remote control system is used. Also required are 1/4 turn ballcock coolant flow regulating shut-off valves, installed in the pressure and return lines as close to the engine as possible.

The windshield defroster and defogging system must provide defogging of the entire windshield, driver's side window and entrance door glasses by using hot air taken from the heater core. Bodies that do not have defrosters providing forced heated air by means of ducting across entire base of windshield must be equipped

with an additional right-side mounted defroster fan that uses hot air from the heater. One electrical switch must be provided to simultaneously turn on or off any fan(s) providing hot air for defogging of the windshield, driver's side window and entrance door glass.

NOTE: Type A buses must have a fresh air type heater and defroster system as installed by the chassis manufacturer.

INTERIOR LIGHTS:

There must be at least four recessed flush-mounted interior lights in the passenger compartment of the bus, operated by one switch mounted on the control panel. If more than six lights are used, then an additional switch may be added to control these lights. There must also be two recessed flush-mounted interior lights mounted in the driver's area of the bus (to the left and right of the centerline of the bus), operated by a separate switch mounted on the control panel. Lenses for all interior lights must be Lexan™ or other polycarbonate material. All interior lights must be LED lights.

LICENSE PLATE LAMP:

Must be LED and may be combined with one of the required combination brake/tail lamps.

MASTER SWITCH FOR BODY ELECTRICAL CIRCUITS AND OTHER SWITCHES:

All bodies must be equipped with an electrical circuit master switch that will turn body circuits ON and OFF by means of a solenoid (relay) controlled by the ignition switch. There must also be a manual noise abatement switch installed in the control panel, labeled and alternately colored, and wired into the activation circuit for the master body circuit solenoid. This must be an on/off switch that deactivates all body equipment that produces noise, including, at least, the AM/FM radio, heaters, air conditioners, fans, and defrosters. This switch must not deactivate safety systems such as windshield wipers or lighting systems. On types C and D buses there must also be a switch mounted in a location inaccessible to the driver to manually start the diesel particulate filter regeneration process. This switch must be appropriately labeled.

POST-TRIP PASSENGER CHECK SYSTEM:

System Requirements:

1. The bus must be equipped with a system to require the driver to walk to the rearmost interior of the bus after each trip to deactivate the system via a push button and to ensure that no passengers are left on the bus. The system must interconnect with the entrance door (and the driver's door on Type A buses) and immediately activate if the door is opened when the system is armed.
2. The system must have an indicator light in view of the driver that is illuminated when the system is armed. The system must be armed any time the bus is in service transporting students. This may be accomplished through the use of any reasonable method, such as recording a speed above 20 MPH or exceeding 10 minutes of operation with the door closed. In all cases, the system must arm itself after 10 minutes of operation, and/or any time the red student warning lights are activated.
3. The system may not be disarmed until the vehicle ignition switch has been switched to the "off" position. The system must not be activated if the ignition switch is placed in the accessory position or if the bus is restarted.
4. The system must turn on the interior lights when the ignition switch is turned to the "off" position. The lights must remain on for 60 seconds after system deactivation.
5. The system must not have a bypass.
6. The system must sound the vehicle horn and flash the headlights if the driver fails to deactivate the system within 60 seconds of turning the ignition off. Type A buses may activate the red student warning lights in lieu of the headlights.
7. The system must be disarmed by the use of a push button switch placed on the left rear bulkhead or above the left rear passenger window for types A, C, and D front engine (FE) buses. The push button must be placed above the left rear passenger window for Type D rear engine (RE) buses. This button must be clearly marked.

System Definitions:

1. Armed = The system is functioning and is ready to alarm.
2. Disarmed = The system is off and inactive.
3. Activated = The horn is blowing and the lights are flashing.
4. Deactivated = The disarm switch at the rear of the bus has been operated by the driver.

System Functionality:

1. The system must be fully automatic in function and must not provide for manual bypass or override capability under any circumstances.
2. From the bus sitting still with ignition key in the "off" position:
    a. With the ignition key switched to the "accessory" position, the system remains disarmed.
    b. With the ignition key switched to the "on" position (engine remaining off), the system remains disarmed.
    c. With the ignition key switched to the "on" position (engine running) and the bus operated under 20 MPH, the system remains disarmed.
    d. With the ignition key switched to the "on" position (engine running) and the bus operated over 20 MPH or for more than 10 minutes of continuous operation (or other reasonable operational trigger mechanism), the system is armed.
3. From bus having been operated over 10 minutes, no longer moving, with the entrance door (and driver's door, if equipped) closed, the ignition key in the "on" position (engine running) and the system armed:
    a. With the ignition key switched to "off" position (engine off), the interior dome lights are immediately illuminated.
    b. With the ignition key switched to the "off" position (engine off) and the ignition key switched back to the "on" position (engine off or restarted) within 60 seconds, the interior dome lights are extinguished and the system remains armed, but flashing lights and horn alarms are not activated.
    c. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated and entrance door (or driver's door, if equipped) opened, flashing light and horn alarms are activated.
    d. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated and the driver taking no action for 60 seconds, the flashing lights and horn alarms are activated.
    e. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated, and driver walking to the rear of the bus and disarming the system within 60 seconds, the system is disarmed and no flashing lights and horn alarms are activated.
4. Once the flashing lights and horn alarms are activated, they can be deactivated only by disarming the system at the rear of the bus.
5. The interior dome lights are extinguished 60 seconds after the system is disarmed.

STUDENT WARNING LIGHTS, STOP ARMS, STUDENT CROSSING ARM, AND SYSTEM CONTROLS AND OPERATION:

Student Warning Lights:

Must be dual-mounted side by side on all corners of bus roof caps. Mounting must be as high as practical on the top and as near the outer edge of the bus, as curvature permits. The lamps must be securely mounted. There must be a black background that is at least 1¼ inches wide. The lamps installed in the outboard locations must be red; the lamps installed in the inboard locations must be amber. The lamps must be clearly visible in bright sunlight for a minimum of 500 feet. Additionally, student warning lights must:

1. Have light assemblies of a flat back design. Cutouts in roof caps must be no larger than necessary to accommodate the student warning lights wires. A flush-mounted design is acceptable.
2. Use strobing LED bulbs.

3. Be 7 inches in diameter or 38 square inches minimum.

System Controls:

Must be equipped with the following driver-actuated controls:

1. Master switch – provides means for deactivating the entire system, as would be required when opening the door at a railroad grade crossing.
2. Control switch – three positions: OFF, AMBER and RED. The switch may be a rocker, pull-type, or other switch providing three positions. This switch must be separated from the master switch by at least one inch and colored red.
3. Switch actuated by the service door.
4. Controls must provide for the combinations of switch positions and conditions of student warning lights, stop arm(s), stop arm lights and audible alarm, as indicated on the chart below.

NOTE: The system must not be designed in such a way that the operator is required to actuate the controls in a particular sequence to achieve the desired combination of conditions. For example, if the driver places the three-position switch in the AMBER position, with the master switch ON, it must not be required that the three-position switch be moved to RED or that the service door be opened in order to deactivate the AMBER lights. In this example, the driver must be able to deactivate the AMBER lights by going directly from the AMBER to the OFF position.

With Master Switch, Control Switch, and Service Door In The Following Positions:					**Condition of Stop Arm(s), Stop Arm Lights, Amber and Red Student Warning Lights and Audible Alarm Must Be:**			
	MASTER SWITCH POSITION (ON or OFF)	**CONTROL SWITCH POSITION (three positions: off, amber or red)**	**SERVICE DOOR POSITION**		**STOP ARMS, STOP ARM LIGHTS**	**AMBER STUDENT WARNING and PILOT LIGHTS**	**RED STUDENT WARNING and PILOT LIGHTS**	**AUDIBLE ALARM**
1	**ON**	**OFF**	**CLOSED**	**1**	**RETRACTED, OFF**	**OFF**	**OFF**	**OFF**
2	**ON**	**OFF**	**OPEN**	**2**	**RETRACTED, OFF**	**OFF**	**ON**	**ON**
3	**ON**	**AMBER**	**CLOSED**	**3**	**RETRACTED, OFF**	**ON**	**OFF**	**OFF**
4	**ON**	**AMBER**	**OPEN**	**4**	**RETRACTED, OFF**	**OFF**	**ON**	**ON**
5	**ON**	**RED**	**CLOSED**	**5**	**EXTENDED, ON**	**OFF**	**ON**	**OFF**
6	**ON**	**RED**	**OPEN**	**6**	**EXTENDED, ON**	**OFF**	**ON**	**OFF**
7	**OFF**	**ANY POSITION**	**ANY POSITION**	**7**	**RETRACTED, OFF**	**OFF**	**OFF**	**OFF**

Student Crossing Arm:
Is required and must be:

1. Air-operated on all air brake-equipped buses.
2. Electrically operated on all hydraulic brake buses.
3. Mounted to the far right side of the front bumper and open to an angle perpendicular to the bus.
4. Designed so that all components and connections are weatherproofed.
5. Removable with hand tools for towing of the bus.
6. Designed to meet or exceed SAE Standard J1133.
7. Constructed of noncorrosive or nonferrous material or treated in accordance with the body sheet metal standard.
8. Designed so that it has no sharp edges or projections that could cause hazard or injury to students.
9. Designed and equipped with a four-point mounting to the front bumper.
10. Designed so that the arm extends approximately 72 inches from the front bumper when in the extended position. The arm must be constructed of a yellow polycarbonate material or noncorrosive tubing painted yellow. Approximate dimensions of the arm must be 65 x 3 x 1 inches.
11. Designed and installed to extend simultaneously with the stop arms by means of the stop arm control and retract within eight seconds of deactivation.
12. Equipped with a magnetic device or other assembly attached to the bumper at the end of the arm to provide a positive latch for the arm when not in use; this device must also reduce the tendency of the arm to rattle and vibrate when not in use.

Stop Arm Signals:
For all 47 capacity and larger buses, there must be installed on the left outside of the body two approved octagonal stop-signal arms, each equipped with two double-faced alternately flashing LED strobe lights for signaling a student stop. All buses of less than 47 capacity must be equipped with one stop arm. Bodies to be mounted on chassis with hydraulic brakes must be equipped with electrically actuated stop arm(s). Air-powered stop arms must be provided as standard equipment on all buses equipped with air brakes. The rear stop arm location on buses equipped with dual stop arms must be the left side of the bus, as close as practical to the left rear corner of the body. The light lenses of all stop arms must be RED. Air lines must not be readily accessible to students inside or outside the bus and must be made of copper, steel or nonmetallic materials meeting SAE Standard J848d. Fittings must be brass. Stop signal arms must meet the applicable requirements of SAE J1133. For controls, see the requirements above under System Controls. Stop arms must retract within six seconds of deactivation. For color, see **LETTERING AND TRIM**.

STEP WELL LIGHT:
A step well light must illuminate the bus entrance and be adequately protected. The step well light must be activated automatically when the service door is opened and the clearance lights are on. The step well light must be LED. See **SERVICE DOOR** for further operational requirements.

STROBE LIGHT:
A required white flashing LED strobe lamp must be installed on the roof of a school bus at a location centered (laterally) and approximately 48 inches (longitudinally) from the rear edge of the rear roof cap. If the bus is equipped with a roof hatch or other roof-mounted equipment falling within the above mentioned measurements, the strobe lamp may be located directly behind that equipment. The lamp shall have a single clear lens emitting light 360 degrees around its vertical axis, meeting the requirements of SAE J845. It may not extend above the roof more than the maximum legal vehicle height, as described in s. 316.515(2), F.S. A manual switch and a pilot lamp shall be included to indicate when the lamp is in operation.

TURN SIGNAL LAMPS:

Front turn signal lights must be amber LED lights (if available); side turn signal lights must be amber LED lights on each side of the bus, mounted rearward of the service door on the right side and rearward of the front stop arm on the left side. All buses over 30 feet in length must have two amber LED turn signal lights mounted on each side of the bus. The rearmost side turn signals on buses over 30 feet long must be mounted at or rearward of the centerline of the rear axle. Rear turn signal lights must be plug-in LED lights that meet current SAE requirements and comply with FMVSS.

TWO-WAY RADIO:

Use of a two-way radio communications system approved by the school district is acceptable.

VIDEO CAMERA MONITORING SYSTEMS:

Districts may install video cameras in buses provided the installed system:

1. Is mounted securely in the bus;
2. Is outside the federal head impact zone (FMVSS No. 222);
3. Is located in an area not likely to cause student injury; and
4. Has no sharp edges or projections.

NOTE: This is the end of the **ELECTRICAL EQUIPMENT AND WIRING** section.

EMERGENCY EXITS:

1. The emergency door on all types A, C and front engine Type D buses must be located at the center of the rear of the bus and have a minimum horizontal opening of 24 inches and vertical opening of 48 inches.
2. The emergency door must be hinged on the right-hand side using hinge(s) with a brass or rust-resistant rod.
3. The outside control must consist of a nondetachable opening device designed to prevent "hitching to."
4. The emergency door must be equipped with a slide bar, cam-operated latching device having a minimum stroke of one inch.
5. The switch for the warning system must be enclosed in a metal case or durable case of other material, with rounded, protected edges. Wires leading from the switch must be concealed in the bus body. The switch must be installed so that the plunger contacts the farthest edge of the slide bar in such a manner that any movement of slide bar will immediately close the switch circuit and activate the buzzer.
6. The door latch must be equipped with an interior handle that extends approximately to the center of the emergency door. It must lift up to release.
7. There must also be attached to the door, in such a way that it is visible inside and outside the bus, labeling as follows: "This door is equipped with a hold-open device. To release, open the door to its fully opened position." This sticker must be red on a white background, and the lettering must be a minimum height of 1/2 inch.

Each non-lift bus must also be equipped with push-out type emergency exit side windows of similar design to the standard side windows, except for the following:

1. The emergency window assemblies must be hinged on the forward side.
2. No emergency window may be placed next to any child safety seat.
3. Emergency windows must be installed in the following quantity on non-lift buses:
    a. 0 to 40 capacity 1 window per side
    b. 41 to 72 capacity 2 windows per side
    c. 73 to 90 capacity 3 windows per side

Buses 35 capacity and smaller must be equipped with one roof hatch emergency exit/ventilator. Buses over 35 capacity must be equipped with two roof hatch emergency exit/ventilators. Specifications for roof hatches must be as follows (also see **GENERAL INFORMATION AND WARRANTY PROVISIONS**):

1. Hinge(s) must be located on forward and rearward side of hatch.

2. The design must provide a "partially open" position along the full width of the hatch, adequate to allow air to enter or exit and, thereby, ventilate the bus by opening either the front or rear of the hatch. The hatch must allow for partial opening on any of its four sides and on all four sides simultaneously.

Buses equipped with a lift are not required to be equipped with push-out emergency exit windows unless mandated by FMVSS No. 217. Lift buses may be equipped with push-out type emergency exit windows based on the capacity of a comparably sized non-lift bus.

EMERGENCY ROADSIDE REFLECTORS:

There must be three reflector warning devices, meeting the requirements of FMVSS No. 125, mounted in a location accessible to driver in the front section of the bus, and stored in a container. The container must be sealed with a breakable, nonreusable seal.

FIRE EXTINGUISHER:

A dry-chemical fire extinguisher with a gauge and designed to restrain tampering must be mounted in a place accessible to the driver, preferably near the service door.

The fire extinguisher must bear the label of Underwriters Laboratories, Inc., showing a rating of no less than 2A-10BC.

FIRST-AID KIT:

The bus must carry a Grade A, moisture- and dust-proof first-aid kit, mounted in such a manner that it can be easily detached and made portable and in an accessible place in the driver's compartment. The container must be sealed with a breakable, nonreusable seal and the contents must be as follows:

1 inch bandage compress (e.g., Band-Aids)	two packages
40 inch triangular bandage with two safety pins	one package
4 x 4 inch sterile gauze pads	two packages of six each
Rolled curlex bandage each in length	two inches x six yards
1 inch roll adhesive tape in length	one roll 2 1/2 yards
Eye dressing packet	two packages

FLOOR AND FLOOR COVERING:

1. The floor must be level from front to back and from side to side except for the wheel housings, the toe board and the driver's seat platform.
2. All sills must be permanently attached to the floor.
3. The driver's compartment plate on conventional bodies must be removable, installed level with the bus floor. All components requiring servicing must be readily accessible. Openings in the bus floor to meet this requirement must be reinforced to maintain the full strength of the unpunctured floor.

   NOTE: Items 1-3 above, do not apply to Type A Buses less than 14,500 GVWR. For Type A buses less than 14,500 GVWR, the floor must provide adequate and firm support for seat legs and must have a minimum 1/2 inch marine grade or pressure-treated plywood, securely mounted to the floor. Basic floor construction of Type A buses must be the manufacturer's standard, meeting applicable FMVSS.

4. The floor covering must be resistant to ultraviolet light, ozone and moisture and have a minimum tensile strength of 1,200 pounds per square inch (psi) and a minimum elongation of 100 percent. Floor covering must be abrasion-resistant and slip-resistant and have a minimum coefficient of friction of 0.85 as measured under ASTM D1894 or 0.65 as measured under ASTM D2047.
5. The floor covering from the top step landing area to the emergency door (or rear seat on Type D rear engine buses) must be ribbed aisle, non-skid and wear-resistant, fire-resistant elastomer. Elastomer floor covering must meet Federal Specification ZZ-M-71d.

6. The landing area at the top of the steps must be ribbed elastomer, which must extend to the ribbed aisle floor cover. The leading horizontal edge, or nosing, must be white or yellow ribbed elastomer or other contrasting color and must have an integral 90 degree turn-down with a square leading edge matching the step treads.
7. All joints or seams in the floor covering must be covered with non-ferrous metal, minimum 1 inch wide, and the driver's compartment, except at the cowl, must have a special, approved molding. Alternate materials may be used if they provide equivalent durability. The molding must be securely attached to prevent a tripping hazard.
8. Manufacturers may use seamless one-piece floor rubber with an integral ribbed aisle meeting the requirements in 4 and 5. Aisle molding is not required when the bus is equipped with one-piece floor rubber.
9. All holes in the chassis firewall and around the transmission cover and engine housing must be adequately sealed.
10. A commercially available truck bed liner material meeting the requirements in 4 and 5 may be substituted for the required flooring material.

FUEL FILLER OPENING:
An opening of adequate size and design must be provided over fuel filler. Also see **LETTERING AND TRIM**.

GRAB HANDLE AT ENTRANCE:
A suitable grab handle or rail must be provided at the front entrance, securely mounted inside of the body. Grab handles must be made of round stainless steel, 1 inch outside diameter (OD). The grab handle and mounting must be designed to minimize the possibility of students' clothing or personal items becoming lodged or caught upon exiting the bus, in order to reduce the risk of injury or fatality to passengers from being dragged outside the bus.

INSULATION AND SEALING OF JOINTS:
The overlap of the edge of the exterior roof and side panels, and also the top edge of rub rails, must be sealed to prevent moisture, dust and other contaminants from entering the joints and the bus.

LETTERING AND TRIM:
Trim on the three rub rails below the beltline and all lettering must be black (except for stop signs). Entrance door frames, pilaster panels and other trim panels may be painted black if approved by the department. The letters of the words "SCHOOL BUS" on the top front and rear section of the bus body must be 8 inches high and correspond to the Series B, Standard Alphabet (see the National School Transportation Specifications and Procedures, Revised 2015). "(Name of District) DISTRICT SCHOOLS," on each side of the bus body at the beltline must be in 6 inch minimum letters. Private and charter schools may alternately affix the name of the school in the aforementioned format and location. Bus numbers must be in 6 inch minimum height and on each side and on the front bumper and rear of the bus body. "**EMERGENCY DOOR**" must be in 2 inch letters at the top or directly above the door, visible inside and outside of bus. Lettering to indicate the fuel type must be located on the body adjacent to the fuel filler opening using minimum 1 inch letters. The words "**STOP WHEN RED LIGHTS FLASH**" must be displayed on the back of all buses in 6 inch black letters. Also, see the lettering requirements for emergency exits, including roof hatches and push-out windows, under **EMERGENCY EXITS**. Districts may add an **American flag decal** to the exterior of the bus. If used, it must be no more than 6 x 10 inches and be located in front of the district name on the beltline of the bus. Also see United States Public Law 4USC7.

The front stop signal arm (both sides of arm) and rear stop arm (rear side only) must have a red background with a reflectorized white border; the letters "**STOP**" must be in 6 inch white reflectorized letters. Both sides of the front stop arm and the rear side of the rear stop arm must have reflectorized red sheeting of high-intensity material. The front side of the rear stop arm must be painted red.

NOTE: Buses must include the lettering and trim specified above, and are limited to lettering, trim, symbols, markings, and coloration specified in the National School Transportation Specifications and Procedures, Revised 2015.

LICENSE HOLDER:
A license holder must be included on the left rear outside of the body, with a suitable method for mounting the license tag.

LOCKUP DEVICES:
Any emergency door equipped with a locking device must have an ignition interlock that prevents starting the engine when the door is locked, meeting requirements of FMVSS No. 217. Emergency exit windows must not be operable (under normal conditions) from outside the bus and must not be equipped with any locking device.

MIRROR SYSTEM:

1. **Interior Mirror:** Must provide adequate viewing of the entire length and width of the interior of the bus and be at least 6 x 30 inches. The mirror must meet the following requirements:
    a. Meet or exceed American National Standards Institutes (ANSI) Z97.1 requirements for safety glazing in mobile environments and be bonded to the mirror housing.
    b. Include a heavy-duty, single-piece mounting bracket that ensures stability.
    c. Housing must be low-gloss black.
    d. Incorporate a single knob (thumbwheel) adjustment to allow the driver to reposition the mirror without the use of tools.
    e. Have a soft gasket type frame that is bonded to the housing.

    NOTE: Interior mirror on Type A buses must be a minimum of 50 square inches and meet the above requirements.

2. **Exterior Mirrors:**
    Each school bus must be equipped with a system of exterior mirrors complying with FMVSS No. 111 and meeting the following requirements:
    a. **Cross/Side-View Mirror System:** This mirror system must incorporate the following features and requirements:
        i. Only one mirror is to be installed at each front corner of the bus.
        ii. Mirrors must not reflect excessive glare from the bus headlights or the sun into the driver's eyes. Mirrors must be a 1/4 sphere or shaded 1/2 sphere design.
        iii. Stainless steel or non-corrosive fasteners must be used in the construction of the mirror assembly and to hold the brackets to the body.
        iv. Mirror stabilizer brackets on all Type C composite hoods must use through-the-fender rubber or nylon mounts with stainless steel caps to reduce mirror vibration and erosion of the hood material.
        v. All exterior mirror fasteners, mounts and bracketry must be of non-corrosive material.
    b. **Rear Vision Mirror System:** A rear vision mirror system must be provided that incorporates the following features and requirements:
        i. The system must consist of one flat and one convex mirror lens per side. Each mirror set must be mounted on a breakaway arm with a positive detent or lock.
        ii. Each of the four required mirrors in the rear vision mirror system must be electrically operated and remotely controlled from the driver's location.
        iii. All exterior mirror fasteners, mounts and bracketry must be stainless steel. Stainless steel or non-corrosive fasteners must be used in the construction of the mirror assembly and to hold the brackets to the body.
    c. **Overall exterior mirror system:** (cross/side-view and rear vision mirrors) must be isolated from vibration and be compliant with FMVSS No. 111.

NOISE REDUCTION PACKAGE:
A noise reduction package is required and must include full insulation of the ceiling, walls, and front and rear of the bus, including body bows and engine compartment, plus minimum 1/2-inch marine grade or pressure-treated plywood

or equivalent composite material securely mounted to the floor. Insulation material must be fire-resistant and of a type that will not harbor dampness.

PAINT AND FINISH:
All National School Bus Yellow paint must meet the National School Transportation Specifications and Procedures, Revised 2015 for color and have a finished gloss rating of at least 85 at 60°F and a distinctness of image (DOI) rating of an average of at least 50, measured using the same method specified for gloss under **GENERAL INFORMATION AND WARRANTY PROVISIONS**. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. School bus roofs must be painted white in color, and must meet the gloss and DOI ratings. White paint may extend to the leading and trailing edge of the roof caps, and may extend down to the drip rails. Trim, lettering and bumpers must be black except that bumpers must be striped in accordance with National School Transportation Specifications and Procedures, Revised 2015 or these specifications. Also see GENERAL **INFORMATION AND WARRANTY PROVISIONS** for warranty requirements, **LETTERING AND TRIM** and **REFLECTIVE MARKINGS**.

PANELING, INTERIOR:
Interior panel fastenings must minimize vibrations and rumble. A cove molding, which may be an extension of the body panels, must be installed covering the wall-to-floor joint beginning at the windshield post on the left side of the bus and extending along the walls around the corners to the service door on the right side. Molding must be securely fastened so that dirt will not readily work under it. The interior paneled area immediately below the window line must be aluminum-coated steel.

REFLECTIVE MARKING PACKAGE:
There must be installed a reflective marking package as specified in the National School Transportation Specifications and Procedures, Revised 2015. Striping must be installed longitudinally the length of the body at the vertical location immediately below the seat level rub rails but high enough so as to clear wheel wells, whenever possible. Short breaks in the striping at rivet locations are acceptable. Reflective markings are also required for all emergency exits, as specified in FMVSS No. 217.

RUB RAILS:
1. There must be a rub rail on each side of the bus approximately at seat level, which must extend from the entrance door post around the bus body (except for emergency door) to the point of curvature near the cowl on the left side.
2. There must be rub rails located approximately at the floor line and the bottom of the outer skirt, which must cover the same longitudinal area as the upper rub rail, except at wheel housings, but extend only to the right and left corners.
3. Rub rails must be applied outside of body panels. Pressed-in or snap-in rub rails do not satisfy this requirement.

SEATING, MODESTY PANELS (RESTRAINING BARRIERS), LAP BELTS, AND WEBBING CUTTERS:
1. Passenger seats must be mounted facing forward and provide a minimum of 12.8 inches of seat width per passenger seating position. The aisle must be 12 inches wide at a minimum. This plan of body seating must be used to determine seating capacity (see **BODY DATA PLATE**).
2. Seat spacing must meet the requirements of FMVSS No. 222. The first seat on each side of all types A, C and D buses must be equipped with FMVSS No. 225-compliant child safety seat anchorage points. All 39 inch FMVSS No. 225-compliant passenger seats must be equipped with two sets of anchorage points per bench seat. All passenger seats compliant with FMVSS No. 225 with a seat width of less than 36 inches must be equipped with one set of anchorage points per bench seat.
3. All passenger seats compliant with FMVSS No. 225 must be spaced to provide the maximum knee room (seat spacing) permitted by FMVSS No. 222. The rest of the passenger seats must provide for a minimum of 24 inches of knee room.
4. Seat padding must be secured to the frame so that it will not snag. Screws and bolts used in seat back construction must not be exposed.
5. Restraining barriers and passenger seats, including the seat back and the entire bottom cushion (including underside), must be covered with vinyl-coated material. All passenger seat assemblies and barriers must meet the requirements of the National School Transportation Specifications and Procedures, Revised 2015,

School Bus Seat Upholstery Fire Block Test. Upholstery material for all passenger seats and barriers must meet the following color standard +/- four delta E:

	III/ob	X	Y	Z	x	y
1	D65 Daylight	7.21	7.92	12.52	2606	2963
2	2	7.51	7.30	4.07	3978	3865
3	Rom Light	7.33	7.37	8.15	3207	3226

6. Buses must have an FMVSS-compliant padded restraining barrier in front of the forward-most passenger seat on each side of the bus. Also see Section V for restraining barrier requirements for buses equipped with wheelchair lifts. Restraining barriers at the entrance side and the driver's side must have a full-width, aluminized steel panel below the padded section extending down to the floor, except as specified under heater/defroster specifications (see **ELECTRICAL EQUIPMENT AND WIRING**).
7. All Type A school buses sold through the State of Florida school bus bid must be equipped with Type II, three-point seat belts in all passenger seating positions. These belt systems must meet the requirements of National School Transportation Specifications and Procedures, Revised 2015.
8. All types C and D buses must be equipped with lap belts in all passenger seating positions, meeting the following requirements:
    a. All belts and anchorages must comply with FMVSS Nos. 209 and 210.
    b. Belts must be manufacturer's standard style lap belts. The nonadjustable buckle end of each belt must be the aisle-side connection point on each passenger seat.
    c. Each two-part belt must be separately color-coded to aid in proper connection.
    d. Any belt system with parts that can be manually disassembled without the use of tools and any system that is subject to easy vandalism shall not be approved for use in Florida school buses.
    e. Retractable seat belts are permissible at the purchaser's option. If this system is specified, the retractors must be emergency locking type, and the retractors must be mounted below the seat bight. Seat bight is defined as the area close to and including the intersection of the surfaces of the vehicle seat cushion and the seat back.
    f. All federal requirements supersede any of these requirements.
    g. School districts may install restraining systems that differ from these requirements as necessary to accommodate pre-school age children and children with special needs. Such systems must comply with FMVSS Nos. 209, 210 and 213, as applicable, and must be approved by the body manufacturer.
9. All buses must also be equipped with a durable webbing cutter having a full width handgrip and a protected, replaceable blade. The required belt cutter must be mounted in a location accessible to the driver in the seated position and be easily detachable.

SERVICE DOOR:

1. The service door must be a split or jackknife type located at the right front of the bus. Doors must be securely hinged with approved heavy-duty hinges with a brass or rust-resistant rod adequately fastened to the adjoined member. Doors must have a 1 1/2 inch minimum safety gap sealed with a safety flap of approved quality. The door must extend to the bottom step and be fitted with suitable weather strip to keep water from entering the step well.
2. An air-operated entrance door must be provided on all buses equipped with air brakes. This system must have a manually operated override to enable the driver to manually open the door in the event of loss of power. Air-powered entrance doors must operate in accordance with the following table:

Ignition Switch Position	Door Switch Position	Emergency Dump Switch Position	Door Position / Status	Step Well Light Condition
Off	Any	On	Neutral	Off
Off	Any	Off	Neutral	Off
On	Closed	Off	Closed/Active	Off
On	Opened	Off	Open/Active	On
On	Closed	On	Neutral	Off
On	Opened	On	Neutral	On

3. When the key switch is in the "off" position, the air door system must not create a battery draw. All air-powered door systems must provide a rebuildable air cylinder and must operate reliably in all weather and temperature conditions. All air-powered door systems must include a method of manually adjusting the opening and closing speed and force of the doors.
4. Hydraulic brake buses must have an electrically controlled entrance door.
5. The service door must have a minimum horizontal opening of 24 inches and a minimum vertical opening of 68 inches. Immediately above the door opening there must be secured to the body panel a high-density foam rubber pad, a minimum of 3 inches in width, or an approved equal safety cushion.
6. Doors must be designed and weather strips mounted so that there is no binding or tendency for stripping to dislodge during door operation. One or two glassed-in openings must be provided in each door half with glass of same grade as specified for side windows and mounted in rubber. The bottom of the lower glass panel must not be more than 30 inches from the ground when the bus is unloaded. The top of the upper glass panel must not be more than 6 inches from the top of the door.

SIZES OF BODIES:

The height of types C and D bus bodies, from the top of the finished floor to the underside of the ceiling, at the center of the body, must be a minimum of 76 inches.

STEP WELL:

A step well of at least three steps must be built in the right front assembly, enclosed with doors extending to the bottom step. Each step must be covered with abrasion-resistant "Pebble-Top" elastomer, the base of which must be at least 3/16 inches thick, with an overall thickness of 5/16 inch bonded to a durable polymer base and otherwise constructed to provide substantial support, including the leading horizontal edge, which must be "Pebble-Top" type, and white or a color that contrasts with the step tread by at least 70 percent. The polymer backing must have an integral 90-degree turn down with a square leading edge for slip resistance. The lower (first) step height must be between 10 and 16 inches above the ground for all types A, C and D buses. Each step must be the full width of the step well at the point where the step is located. Half steps or partial steps are not acceptable.

NOTE: Two steps are acceptable on Type A buses.

STRUCTURAL DESIGN and TESTING:

1. All types A, C and D bodies must meet the requirements of FMVSS No. 221 and the requirements of the National School Transportation Specifications and Procedures, Revised 2015 Side Intrusion Test.
2. Each manufacturer of types A, C or D bodies must certify that representative configurations of its buses produced to meet these specifications comply with the testing and requirements of the Colorado Racking Load Test. See **Colorado Racking Load Test** in Appendix B.
3. Each manufacturer of types A, C or D bodies must certify that representative configurations of its buses produced to meet these specifications comply with the testing and requirements of the Kentucky Pole Test. See **Kentucky Pole Test** in Appendix C.
4. All bus bodies must be constructed to be in square and level. There must be no more than 1 inch of difference from side to side at the front and rear of the bus body (not counting any chassis lean or twist). All bodies must be mounted such that all designed body contact points are in contact with the chassis frame. All bodies must be centered on the chassis within plus or minus 1/2 inch.

SUN SHIELD:

A dual sun shield system must be provided, consisting of two independently mounted sun shields. One must be mounted above the windshield and the other above the driver's window. Each visor must have a tinted Plexiglas sun shield, minimum 6 x 24 inches, and have rounded bull-nosed perimeter edges.

NOTE: The manufacturer's standard sun visor is acceptable on Type A buses.

VANDAL BOX, SIDE MOUNTED

There must be installed on all types C and D buses an equipment compartment on the ceiling above the driver's side window, measuring approximately 1,600 cubic inches. The compartment must have a door with a positive latch and a keyed-alike lock. No safety equipment shall be mounted inside this compartment.

WINDOWS:

1. All types A, C and D buses must have tinted glass that provides the maximum tinting allowed by federal and American National Standards Institute (ANSI) standards for the windshield, the driver's side window(s) and the service door glass. Tinted glass in all windows rear of the driver's compartment must have a light transmission of approximately 28 percent.
2. An adjustable split sash window with safety glass must be mounted in the side of the bus body between each framing post. Permanent marks showing the grade of glass must be visible.
3. Movable windows must be controlled by an approved lock having a finger-touch opener, providing for ease of operation and with no sharp projections. Window latches must be replaceable or rebuildable without disassembling the complete window frame or removing the window from the body. In addition, individual window latches or repair parts must be available and part numbers included in the required body parts catalog. Window seals and visors or drip molding must be installed and provide ample protection from leakage.
4. For ventilation, the driver's window must be adjustable and equipped with a positive latch that can be secured from the inside of bus.
5. There must be installed in the rear door two windows, one upper and one lower, installed in a waterproof manner.
6. Rear side windows located at each side of the emergency door must be installed in a waterproof manner. Glass area must be large enough to provide desirable vision to the rear and must be of the same quality and grade as side windows.

WINDSHIELD:

The front body section in the area of the windshield must provide for corner vision. Glass must be laminated safety polished plate with dark tint at top, installed in a waterproof manner and slanted to reduce glare. Glass must meet current SAE specifications and FMVSS. Light tint may be used in all Type D buses in lieu of dark tint at the top.

WINDSHIELD STEPS AND HANDLES:

A step and appropriate grab handle must be installed on each front corner of the body to facilitate cleaning the windshield. The handle must be stainless steel, chrome plated or non-ferrous metal, or may be made of non-metallic material of sufficient structural and mounting strength and resistant to weathering and deterioration, and must provide for secure mounting and adequate hand hold.

NOTE: Steps and handles are not required on Type A buses under 21,500 GVWR.

WINDSHIELD WIPERS AND WASHERS:

1. Electric windshield wipers must be standard on all buses. All wipers by design and installation must provide desirable vision for drivers. Blades and arms must be of sufficient length to clear the windshield glass in the driver's direct view. One switch must control both wipers, and the switch must be located within easy reach from driver's seat, preferably on the turn signal stalk. The system must incorporate a variable delay wipe feature to allow drivers to adjust the speed and frequency of the wipers. The wiper system must be designed to move the blades away from the driver's direct view when in the parked position.
2. Windshield washers must be electrically operated. The washer reservoir must be made of hard plastic or other approved material and have a capacity of at least 1/2 gallon. Flexible plastic bags are not acceptable.

   NOTE: The manufacturer's standard windshield wipers are acceptable on Type A buses.

SCHOOL BUS BODY EXCEPTIONS

TYPE D FRONT ENGINE BODY EXCEPTIONS:

1. The distance between the restraining barrier at the rear of the entrance step well and the engine cover must be a minimum of 13 inches.
2. A step, in lieu of stirrup steps, is permitted in or on the front bumper on both sides.
3. The engine cover must provide an adequate seal to the bus floor area to keep engine fumes from entering the passenger compartment and must be insulated to retard transfer of heat and engine noise. The engine cover must be hinged and equipped with a prop rod or other device so that it can be held securely in the fully open position to allow access to the engine.

TYPE D REAR ENGINE BODY EXCEPTIONS:

1. The engine compartment must be constructed to permit servicing of the engine, having one or two doors opening at the rear and louvered, with removable panels on each side of engine compartment. The engine compartment must be sealed at top and front to retard heat transfer and prevent engine fumes from entering the passenger compartment. Provisions must be made for easy removal of the engine through the rear compartment.
2. Mud flaps must be installed at the rear of the dual wheels.
3. A step, in lieu of stirrup steps, is permitted in or on the front bumper on both sides.
4. Type D Rear Engine buses are exempted from the requirement for an additional electrical compartment for air conditioner circuitry, provided the air conditioner control boards are installed in the rear package shelf area in a covered box.
5. There must be an engine access panel underneath the rear seat of all rear engine buses designed to provide access to the engine.

OPTIONAL BODY
EQUIPMENT SPECIFICATIONS

AUTOMATIC VEHICLE LOCATION AND STUDENT TRACKING SYSTEM:
There shall be an approved option for a system that uses the Global Positioning System (GPS) to determine and wirelessly report the location of the bus in approximately real time. The system may also include an additional feature that will identify individual students as they board or disembark from the bus and report the locations and times.

AUXILIARY DRIVER FAN:
There shall be an approved option for a 6 inch or header-mounted squirrel cage fan to be installed and mounted to the left side of the windshield, when possible, in a location approved by the department.

BAGGAGE COMPARTMENTS:
There shall be an approved option for baggage compartments on all bodies when available. This body option must include a lock and be keyed alike with any other body option requiring use of a key.

BATTERY DISCONNECT SWITCH LABELING:
There shall be an approved option for a label to be placed on the exterior of the bus on the cover of the compartment housing the battery disconnect switch. The label background must be white with red one-inch letters with the wording "**MAIN BATTERY DISCONNECT**."

BUS LOCKUP SYSTEM:
There shall be an approved option whereby a bus can be locked at the emergency door as well as the entrance door. An ignition interlock is required for the emergency door to prevent starting the bus if the emergency door or rear window (on RE units) is locked. This body option must be keyed alike with any other body option requiring use of a key.

CEILING PANELS:
There shall be an option for full width perforated interior ceiling panels extending from the rear header panel forward to at least the front of the engine compartment.

DRIVER'S SEAT WITH INTEGRATED SEAT BELT:
There shall be an approved option for a driver's seat with a seat belt integrated into the seat back, meeting the requirements of DRIVER'S SEAT AND SEAT BELT in this section.

EXTERIOR LIGHT MONITOR:
A system of monitoring exterior lights on the front and rear of the bus from the driver's seated position is approved as an option. Such systems must include:

1. Student Warning Lamps, both RED and AMBER, front and rear
2. Tail Lamps
3. Backup Lamps
4. Rear Turn Signal Lamps
5. Stop Lamps

A system that monitors only electrical circuits and does not indicate whether the bulb is operational is not acceptable.

FUEL SUPPLY LOCK:
A lock with two keys may be installed in the fuel supply service door of the body skirt. This body option must be keyed alike with any other body option requiring use of a key.

INFANT SEATING:
There shall be an approved option for passenger seating designed to safely transport newborns, infants or toddlers, meeting all applicable FMVSS. Such seats may include, C.E. White Child Restraint Seats and other systems as approved by the department.

INTERIOR OVERHEAD STORAGE COMPARTMENTS (MFSAB ONLY):
There shall be an approved option for interior overhead storage compartments that meet the following criteria:

1. Head protection requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection, where applicable;
2. Be completely enclosed and equipped with latching door (both door and latch sufficient to withstand a pushing force of 50 pounds applied at the inside center of the door);
3. Have all corners and edges rounded, with a minimum radius of one inch, or be padded equivalent to door header padding;
4. Be attached to the bus sufficiently to withstand a force equal to 20 times the maximum rated capacity of the compartment; and
5. Have no protrusions greater than 1/4 inch.

The driver's area forward of the foremost padded barriers will permit the mounting of required safety equipment and vehicle operation equipment.

POWDER-COATED WINDOW FRAMES:
There shall be an approved option for electrostatically powder-coated black window frames on all types of buses to reduce friction and improve ease of operation of passenger side windows.

PUBLIC ADDRESS SYSTEM (P.A.), RADIO:
There shall be an approved option for a public address system/AM/FM stereo radio with four speakers inside the bus and one heavy-duty weatherproof P.A. speaker outside the bus. This option must have controls to permit the driver to select inside or outside speakers, mounted in the driver's compartment so that all controls are readily accessible to the driver from the normal seated position. Interior speakers must be flush-mounted. Outside speaker must be mounted under the hood or in another protected location at the front of the bus. An AM/FM stereo radio with four speakers may be offered separately. No internal speakers other than those used for the driver's communication system may be installed within four feet of the back of the driver's seat when the seat is in its rearmost upright position.

REAR HEATER:
There shall be an approved option for an additional heater mounted to provide heat in the rear of the body. This option must be installed under a passenger seat or must otherwise be protected to eliminate damage to the unit and injury to the students.

RED LIGHT ABOVE EMERGENCY DOOR:
There shall be an approved option for a small red light to be mounted above the emergency door on the interior of the bus that is activated when the clearance lights are on.

THREE-POINT SEAT BELTS AND THREE-POINT SEAT BELT SEATS:
There shall be an approved option for three-point seat belts in two and three passenger three-point seat belt seats, as approved by the department.

SECTION IV

POWER LIFT EQUIPPED SCHOOL BUS
MINIMUM SPECIFICATIONS

INTRODUCTION AND GENERAL REQUIREMENTS FOR EXCEPTIONAL CHILD BUSES:
Exceptional child bus body structure and equipment must conform to the regular bus body specifications in Section III and must meet the additional requirements of this section. All school buses equipped with wheelchair lifts must meet or exceed the requirements of FMVSS Nos. 403 and 404, the National School Transportation Specifications and Procedures, Revised 2015 and all requirements listed herein, which prevail in the event of a conflict.

DEFINITION:
An exceptional child bus is any school bus that is designed, equipped and/or modified to accommodate students with special transportation needs requiring a power lift.

GENERAL REQUIREMENTS:
Exceptional Child specially equipped school buses shall comply with the National School Transportation Specifications and Procedures, Revised 2015 and with the FMVSS applicable to their GVWR category.

Any school bus to be used for the transportation of children who use a wheelchair or other mobile positioning device, or who require life-support equipment that prohibits use of the regular service entrance, shall be equipped with a power lift.

AISLES:
All school buses equipped with a power lift shall provide a minimum 30-inch pathway leading from any wheelchair position to at least one 30-inch wide emergency exit door. A wheelchair securement position shall never be located directly in front of (blocking) a power lift door location.

GLAZING:
Tinted glazing may be installed in all doors, windows and windshields consistent with federal, state and local regulations.

IDENTIFICATION:
Exceptional child specially equipped school buses shall display the International Symbol of Accessibility below the window line pursuant to appendix A-1 and A-2. Such emblems shall be white on blue background, shall not exceed 12 inches square in size and shall be of a high-intensity retroreflective material.

PASSENGER CAPACITY RATING:
In determining the capacity of a school bus for purposes other than actual passenger load (e.g., vehicle classification or various billing/reimbursement models), any location in a school bus intended for securement of a wheelchair during vehicle operation shall be regarded as four designated seating positions, and each lift area shall count as four designated seating positions.

POWER LIFTS:
1. The power lift shall be located on the right side of the bus body only.
2. Vehicle lifts and installations shall comply with the requirements set forth in:
    a. FMVSS No. 403, Platform Lift Systems for Motor Vehicles; and
    b. FMVSS No. 404, Platform Lift Installations in Motor Vehicles.
3. Design loads: The design load of the lift shall be at least 800 pounds. Working parts, such as cables, pulleys and shafts, which can be expected to wear, and upon which the lift depends for support of the load, shall have a safety factor of at least six, based on the ultimate strength of the material. Non-working parts, such as

platform, frame and attachment hardware that would not be expected to wear, shall have a safety factor of at least three, based on the ultimate strength of the material.

4. Lift capacity: The lifting mechanism and platform shall be capable of operating effectively with a wheelchair and occupant mass of at least 800 pounds.
5. Documentation: The following information shall be provided with each vehicle equipped with a lift:
6. A phone number where information can be obtained about installation, repair and parts. (Detailed written instructions and a parts list shall be available upon request.)
7. Detailed instructions regarding use of the lift shall be readily visible when the lift door is open, including a diagram showing the proper placement and positioning of wheelchair/mobility aids on the lift.
8. Training materials: The lift manufacturer shall make training materials available to ensure the proper use and maintenance of the lift. These may include instructional videos, classroom curriculum, system test results or other related materials.
9. Identification and certification: Each lift shall be permanently and legibly marked or shall incorporate a non-removable label or tag that states it conforms to all applicable requirements of the current National School Transportation Specifications and Procedures. In addition, and upon request of the original titled purchaser, the lift manufacturer or an authorized representative shall provide a notarized Certificate of Conformance, either original or photocopied, which states that the lift system meets all the applicable requirements of the current National School Transportation Specifications and Procedures.

REGULAR SERVICE ENTRANCE:

1. On power lift-equipped vehicles, steps shall be the full width of the step well, excluding the thickness of the doors in the open position.
2. In addition to the handrail required in section III, an additional handrail is required on all specially equipped school buses. This handrail shall be located on the opposite side of the entrance door from the handrail required in section III and shall meet the same requirements for handrails.

RESTRAINING DEVICES:

1. On power lift-equipped school buses with a GVWR of 10,000 pounds or more, seat frames may be equipped with attachment points to which belt assemblies can be attached for use with child safety restraint systems (CSRSs) that comply with FMVSS No. 213, Child Restraint Systems.
2. Any belt assembly anchorage shall comply with FMVSS No. 210, Seat Belt Assembly Anchorages.
3. Alternatively, a child restraint anchorage system that complies with FMVSS No. 225, Child Restraint Anchorage Systems, may be installed.
4. Seat belt assemblies shall conform to FMVSS No. 209, Seat Belt Assemblies.
5. Child safety restraint systems, which are used to facilitate the transportation of children who in other modes of transportation would be required to use a child, infant or booster seat, shall conform to FMVSS No. 213.

SEATING ARRANGEMENTS:

1. Flexibility in seat spacing to accommodate special devices shall be permitted to meet passenger requirements.
2. All seating shall meet the requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection.

SECUREMENT AND RESTRAINT SYSTEM FOR WHEELCHAIRS AND WHEELCHAIR-SEATED OCCUPANTS:

1. For purposes of understanding the various aspects and components of this section, the terms securement, tie down, securement system, and tie down system are used exclusively in reference to the devices that anchor the wheelchair to the vehicle.
2. The terms restraint and restraint system are used exclusively in reference to the equipment that is intended to limit the movement of the wheelchair occupant in a crash or sudden maneuver.
3. The term wheelchair tie down and occupant restraint system (WTORS) is used to refer to the total system that secures the wheelchair and restrains the wheelchair occupant.

WHEELCHAIR TIE DOWNS OCCUPANT RESTRAINT SYSTEMS (WTORS)
GENERAL REQUIREMENTS:

1. A WTORS installed in specially equipped school buses shall be designed, installed and operated for use with forward-facing wheelchair-seated passengers and shall comply with all applicable requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection, and SAE J2249, WTORS for Use in Motor Vehicles.
2. The WTORS, including the anchorage track, floor plates, pockets or other anchorages, shall be provided by the same manufacturer or shall be certified to be compatible by manufacturers of all equipment/systems used.
3. Wheelchair securement positions shall be located such that wheelchairs and their occupants do not block access to the lift door.
4. A device for storage of the WTORS shall be provided. When the system is not in use, the storage device shall allow for clean storage of the system, shall keep the system securely contained within the passenger compartment, shall provide reasonable protection from vandalism and shall enable the system to be readily accessed for use.
5. The WTORS, including the storage device, shall meet the flammability standards established in FMVSS No. 302, Flammability of Interior Materials.
6. The following information shall be provided with each vehicle equipped with a securement and restraint system:
    a. A phone number where information can be obtained about installation, repair and parts. (Detailed written instructions and a parts list shall be available upon request.)
    b. Detailed instructions regarding use, including a diagram showing the proper placement of the wheelchair/mobility aids and positioning of securement devices and occupant restraints, including correct belt angles.
7. The WTORS manufacturer shall make training materials available to ensure the proper use and maintenance of the WTORS. These may include instructional videos, classroom curriculum, system test results or other related materials.

WHEELCHAIR SECUREMENT/TIE DOWN:

1. Each wheelchair position in an exceptional child bus shall have a minimum clear floor area of 30 inches laterally by 48 inches longitudinally pursuant to FMVSS No. 222, S5.4.1 and S5.4.2.
2. Additional floor area may be required for some wheelchairs. Consultation between the user and the manufacturer is recommended to ensure that adequate area is provided.

OCCUPANT RESTRAINT SYSTEM:

If the upper torso belt anchorage is higher than 44 inches measured from the vehicle floor, an adjustment device, as part of the occupant restraint system, shall be supplied (See FMVSS No. 222, S5.4.3 and S5.4.4.).

SPECIAL LIGHT:

Doorways in which lifts are installed shall be equipped with an LED light that provides a minimum of 20 lumens of illumination on the floor of the bus immediately adjacent to the lift during lift operation.

SPECIAL SERVICE ENTRANCE:

1. Power lift-equipped bodies shall have a special service entrance to accommodate the power lift.
2. The special service entrance and door shall be located on the right side of the bus and shall be designed so as not to obstruct the regular service entrance.
3. The opening may extend below the floor through the bottom of the body skirt.
4. If such an opening is used, reinforcements shall be installed at the front and rear of the floor opening to support the floor and give the same strength as other floor openings. A drip molding shall be installed above the special service entrance to effectively divert water from the entrance.
5. Door posts and headers at the special service entrance shall be reinforced sufficiently to provide support and strength equivalent to the areas of the side of the bus not used for the special service entrance.

SPECIAL SERVICE ENTRANCE DOORS:

1. A single door or double doors may be used for the special service entrance.
2. A single door shall be hinged to the forward side of the entrance unless this would obstruct the regular service entrance. If the door is hinged to the rearward side of the doorway, the door shall use a safety mechanism that will prevent it from swinging open should the primary door latch fail. If double doors are used, the system shall be designed to prevent the door(s) from being blown open by the aerodynamic forces created by the forward motion of the bus, and/or shall incorporate a safety mechanism to provide secondary protection should the primary latching mechanism(s) fail.
3. All doors shall have positive fastening devices to hold them in the "open" position when the special service entrance is in use.
4. All doors shall be weather-sealed.
5. When manually operated dual doors are provided, the rear door shall have at least a one-point fastening device to the header. The forward-mounted door shall have at least three one-point fastening devices. One shall be to the header, one to the floor line of the body, and the other shall be into the rear door. The door and hinge mechanism shall have strength that is greater than, or equivalent to, the strength of the emergency exit door.
6. Door materials, panels and structural components shall have strength equivalent to the conventional service and emergency doors. Color, rub rail extensions, lettering and other exterior features shall match adjacent sections of the body.
7. Each door shall have windows set in a waterproof manner that are visually similar in size and location to adjacent non-door windows. Glazing shall be of the same type and tinting (if applicable) as standard fixed glass in other body locations.
8. Door(s) shall be equipped with a device that will actuate an audible or visible signal located in the driver's compartment when the door(s) is not securely closed and the ignition is in the "on" position.
9. A switch shall be installed so that the lift mechanism will not operate when the lift platform door(s) is closed.
10. Special service entrance doors shall be equipped with padding at the top edge of the door opening. The padding shall be at least three inches wide and one inch thick and shall extend the full width of the door opening.
11. Power lift LED landing light is required on the exterior of the bus to provide illumination for lift operation.

SUPPORT EQUIPMENT AND ACCESSORIES:

1. In addition to the webbing cutter required in section III, each power lift equipped bus that is set up to accommodate wheelchairs with webbing attached shall contain an additional webbing cutter properly secured in a location to be determined by the purchaser. The webbing cutter shall meet the requirements listed in section III.
2. Special equipment or supplies that are used in the bus for mobility assistance, health support or safety shall meet local, federal and engineering standards that may apply, including requirements for proper identification. Equipment that may be used for these purposes includes, but is not limited to:
    a. Wheelchairs and other mobile seating devices. (See subsection on Securement and Restraint System for Wheelchairs and Wheelchair-seated Occupants.)
    b. Crutches, walkers, canes and other ambulating devices to assist ambulation.
    c. Medical support equipment. This may include respiratory devices, such as oxygen bottles (which should be no larger than 38 cubic feet for compressed gas) or ventilators. Tanks and valves should be located and positioned to protect them from direct sunlight, bus heater vents or other heat sources. Other equipment may include intravenous and fluid drainage apparatus.
3. Each exceptional child bus that is set up to accommodate wheelchairs or other assistive restraint devices should be equipped with an emergency evacuation device that is certified and tested to withstand at least a 300-pound load when used as an emergency stretcher or drag. This evacuation device shall be properly secured to the bus in a location to be determined by the purchaser.
4. If transporting oxygen, refer to AMD Standard 003 available online at http://www.safeambulances.org/wp-content/uploads/2018/04/2014-AMD-Standards-001-027.pdf for oxygen tank retention requirements.

RESTRAINING BARRIERS WITH MODESTY PANELS:

1. There must be a padded restraining barrier with a modesty panel located immediately rearward of the lift if there are wheelchair spaces or regular seating located rearward of the lift and on the same side of the bus.
2. There must be a padded restraining barrier with a modesty panel meeting FMVSS spacing requirements located forward of all passenger seats that do not have another seat properly spaced in front of them.
3. There must be a padded restraining barrier or seat in front of any wheelchair position unless it is contiguous with and behind another wheelchair position.
4. The forwardmost restraining barrier on both sides of the bus must have a full width aluminized modesty panel extending to the floor. If the right front of the passenger area immediately behind the stepwell is not equipped with a restraining barrier due to placement of the wheelchair lift in that location, it must be equipped with a padded stanchion from floor to ceiling with an aluminized modesty panel.

POWER LIFT EQUIPPED SCHOOL BUS
OPTIONAL EQUIPMENT SPECIFICATIONS

STRAIGHT FLOOR / FLAT FLOOR:

1. There shall be an approved option on any size bus, when available, for an unobstructed straight floor design (i.e., no wheel wells and no step-up at the rear of the driver's compartment). Minimum headroom of types C and D buses equipped with this option must remain 76 inches as per standard body specifications.
2. There shall be an approved option on any size bus, when available, for an unobstructed flat floor design in the passenger compartment. If this option uses a raised floor that is stepped up behind the driver's area, the forward edge of the aisle must have a white stripe and be labeled "Step Up" as viewed upon entering the aisle, and a "Step Down" label must be visible upon exiting the aisle.
3. Minimum headroom of types C and D buses equipped with this option must remain 76 inches as per standard body specifications.
4. The bus must be equipped with 39-inch seats except for locations where lift bus specifications require a 30-inch aisle.

TRACK SEATING:

1. There shall be an approved option for a track-mounted seating system using button track (L track) and a wheelchair securement system meeting Florida Specifications that mounts into the track-seating track.
2. The overhead track for the shoulder harness attachment must be present at every possible wheelchair position.
3. The bus must be equipped with 39-inch seats, except when lift bus specifications require a 30-inch aisle.
4. All floor tracking must be anodized aluminum or other material of equal strength that will resist corrosion in Florida's environment.
5. This option must include additional options, as follows:
    a. Purchase of individual track seating seats;
    b. Delete a seat, add a wheelchair position with wheelchair tie-downs; and
    c. Delete a wheelchair position (tie-downs), and add a standard seat.

SECTION V

AIR CONDITIONER SPECIFICATIONS

PERFORMANCE SPECIFICATIONS:
The installed air conditioner system must meet the high performance standards as described in National School Transportation Specifications and Procedures, Revised 2015. Performance test reports shall be made available upon request by the purchasing district or the department.

SYSTEM REQUIREMENTS FOR ALL BUSES:

Evaporators and Ducting:

1. Air intake for any evaporator assembly (ies), except for the front evaporator of Type A buses, must be equipped with replaceable air filter(s) accessible without disassembly of evaporator case.
2. No portion of the air conditioner system may block the driver's view through any window except that vertical covering in the rear corners of the bus interior for hoses and/or wiring may intrude on the rear quarter window by no more than two inches.

Controls, Wiring, Hoses, and Miscellaneous Hardware:
All system operating controls, including on-off switches, blower switches and thermostat controls must be accessible to the driver in a seated position.

Body:

1. All Type C and Type D front-engine buses equipped with air conditioners must also be equipped with a compartment mounted next to the battery box with external access for mounting circuit breakers and control circuitry for the air conditioner.

2. Type D rear-engine buses are exempted from the requirement for an additional electrical compartment for air conditioner circuitry provided the air conditioner control boards are installed in the rear package shelf area in a covered box.

NOTE: Control boards may optionally be mounted inside the bus within the evaporator case or behind the dash on all Type C and Type D buses. Any control boards mounted inside the bus must be easily accessible.

Warranty and Serviceability:
Warranty - Air conditioner compressor applications must be approved in writing by the chassis engine manufacturer, stating that the installation will not void or reduce the engine manufacturer's warranty or extended service coverage liabilities in any way. Also see **GENERAL INFORMATION AND WARRANTY PROVISIONS**.

Serviceability:
All components requiring periodic servicing must be readily accessible for servicing including, but not limited to, the following:

1. Refrigerant service ports;
2. Sight glasses, which must be directly visible;
3. Any manually resettable circuit breakers;
4. Evaporator air filters – removable and serviceable; and
5. All major component serial numbers must be readily visible.

Parts and Service Manuals:
A comprehensive operator's, maintenance and parts manual(s) must be provided for the entire system, or available via Internet access from the manufacturer's website for each A/C system purchased. Parts manuals must be designed so that all replaceable parts are illustrated by line drawings and such parts are numbered on the illustration, with a part description on a separate list under the corresponding part number. Part descriptions should be annotated appropriately with the part number, a proper description (part name) and the quantity required for the application listed in the drawings. The service manual or manufacturer's website must also include an overall A/C system diagram with component plumbing, locations and identities indicated for diagnostic purposes.

Parts and Tools Availability:

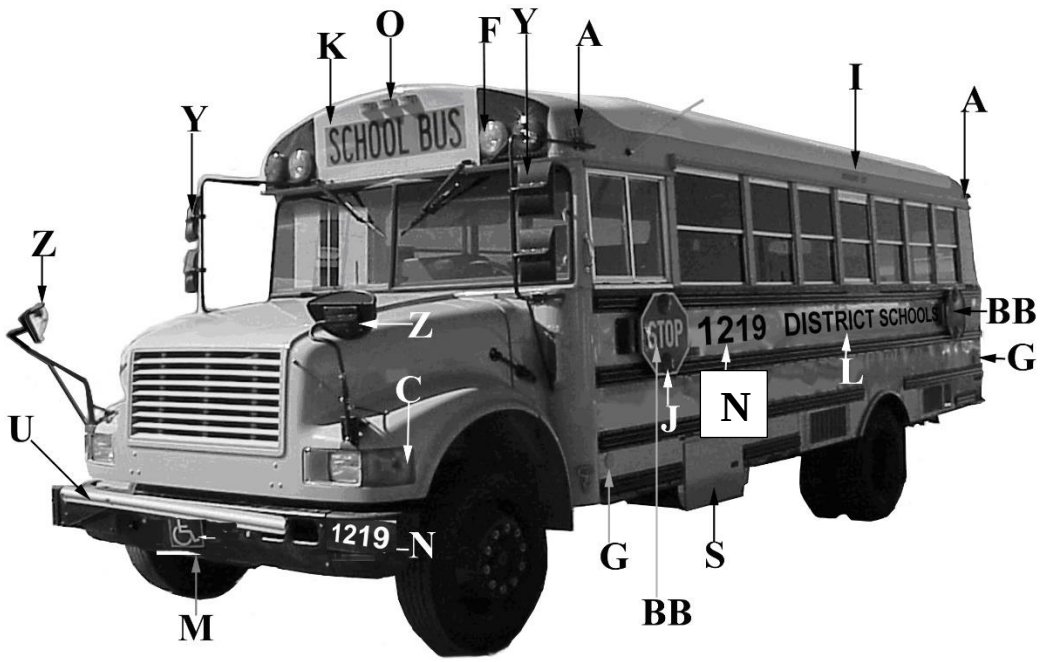
1. All system parts and required special service tools must be readily available, and a list of suppliers must be provided to each school district shop purchasing that brand of air conditioner.

2. Suspension Capacity and Ground Clearance - Ground clearance at the lowest point of the air-conditioning system must be no less than the ground clearance of the bus at the step well.

3. Air conditioner system manufacturer must provide information and data, as needed, to assist in establishing chassis engine performance requirements and in determining chassis electrical components or specifications that may be needed to accommodate the additional electrical demands imposed by the air-conditioning system.

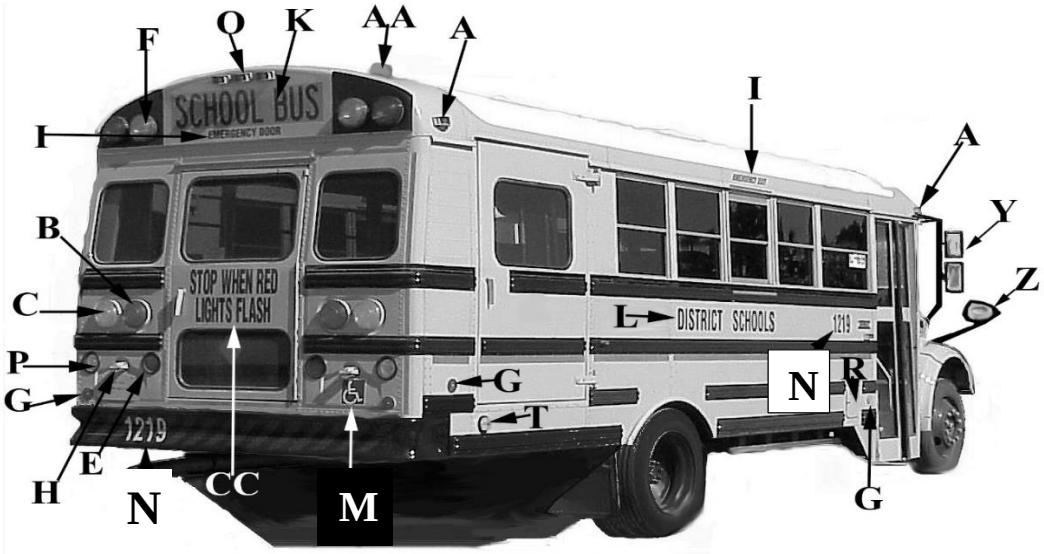
APPENDIX A

MINIMUM LETTERING AND LIGHTING REQUIREMENTS



MINIMUM LETTERING AND LIGHTING REQUIREMENTS:

A	LED Clearance Lights	L	(Name of District) District Schools, Each Side, Belt Line. 6 inch lettering
BB	Octagonal Stop Arm	M	Universal Handicapped Symbol, Wheelchair Lift Equipped Buses, Can be placed anywhere on the front bumper. 6 inches by 6 inches minimum
C	LED Front Turn Signals, (amber lenses)	N	Bus Numbers, 6 inch lettering
F	LED Pupil Warning Lights, Side By Side Amber and Red, Flat Back Design	O	LED Identification Lamps
G	Reflectors	S	Battery Disconnect Switch Decal (optional)
I	Emergency Exit, 2 inch lettering	U	Pupil Crossing Arm
J	Double-Faced Flashing Red LED Lights	Y	Rear View Mirror System
K	SCHOOL BUS, Front And Rear, 8 inch lettering on retro-reflective yellow background	Z	Cross/Side View Mirror System



MINIMUM LETTERING AND LIGHTING REQUIREMENTS:

A	LED Clearance Lights	N	Bus Numbers, 6 inch lettering
B	Seven-inch LED Brake/Tail Lights	M	Universal Handicapped Symbol, Wheelchair Lift Equipped Buses, minimum 6 inches by 6 inches
C	Seven-inch LED Turn Signals (amber lenses)	O	LED Identification Lamps
E	Four-inch LED Stop / Tail Lights	P	LED Back-up Lights
F	LED Pupil Warning Lights, Side By Side Amber and Red, Flat Back Design	R	Fuel Door, 1 inch letters
G	Reflectors	T	Wheelchair Lift LED Landing Light
H	LED License Plate Lamp	Y	Rear View Mirror System
I	Emergency Exit Signs, 2 inch lettering	Z	Cross/Side View Mirror System
K	SCHOOL BUS, Front and Rear, 8 inch lettering on retro-reflective yellow background	AA	Roof-mounted White Flashing LED Strobe Light
L	(Name of District) District Schools (each side, belt line) 6 inch letters	CC	Rear Door Lettering, 6 inch lettering

APPENDIX B

COLORADO RACKING LOAD TEST

COLORADO RACKING LOAD TEST

The Colorado Racking Test shall be required on or before the acceptance date of the first bus of the respective configuration.

TEST PROCEDURE:
In addition to complying with the test procedures described in FMVSS No. 220, the body manufacturers shall record and report the downward vertical movement of the force at 0, 25, 50, 75 and 100 percent of the maximum force (both loading and unloading). The expected force deflection curve is illustrated schematically in Figure 1a. Low load nonlinearities may indicate joint deformation; high load nonlinearities may indicate yielding in structural members.

A second load cycle shall be performed following the procedure given in the first paragraph. The expected force-deflection curve is illustrated schematically in Figure 1b. Any hysteresis following the initial shakedown will be revealed by this second cycle.

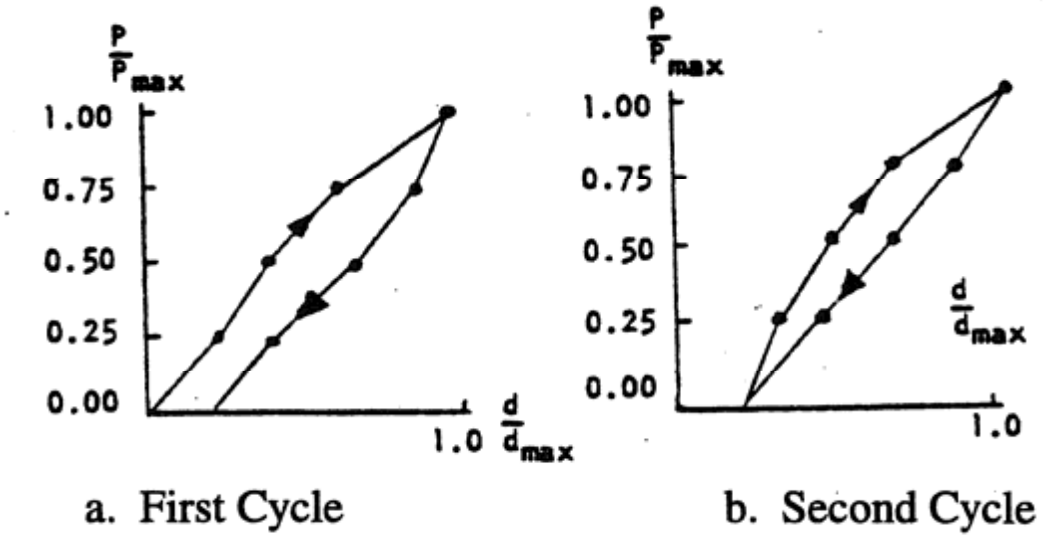


Figure 1. Static Load Test Load-Deflection Curves

A diagonal (racking) load test must be performed on types A, B, C and D school buses to assure adequate shear stiffness and strength of the bus body. Details of the test are provided below:

A two-cycle loading sequence shall be conducted following the described procedure.

(a) Requirements: When a force equal to 1 1/2 times the gross vehicle weight (GVW) is applied to the edge of the roof of the vehicle's body structure through a force application plate, as specified in Test Procedures (b):

1. The diagonal movement of the force at any point on the application plate shall not exceed 5 1/8 inches; and

2. Each emergency exit of the vehicle provided in accordance with FMVSS No. 217 shall be capable of operation as specified in that standard during the full application of the force and after release of the force.

(b) Test Procedures: Each vehicle shall be capable of meeting the requirements of (1) and (2) when tested in accordance with the procedures set forth below.

1. The vehicle shall be supported on a rigid surface along the lower edge of the frame or along the body sills in the absence of a frame.

2. The load shall be applied through a force application plate that is flat and rigid. The dimensions of the plate shall be chosen to assure that the plate edges never make contact with the vehicle skin during testing. A typical width is 18 inches, and a typical length is 20 inches less that the length of the vehicle's roof measured along its longitudinal centerline.

3. Place the force application plate in contact with the edge of the vehicle roof. Orient the plate so that its flat, rigid surface is perpendicular to a diagonal line connecting the most distant points on an interior cross-section of the vehicle. The rear edge of the plate shall be positioned approximately 20 inches from the rear edge of the vehicle roof. A temporary stand may be used to support the plate until a force is applied.

4. Apply an evenly distributed force in a diagonally downward direction through the force application plate at any rate not more than 0.5 inch per second, until a force of 500 pounds has been applied.

5. Apply additional force in a diagonally downward direction through the force application plate at a rate of not more than 0.5 inch per second until the force specified in (a) has been applied, and maintain this application of force.

6. Measure the diagonal movement of any point on the force application plate that occurred during the application of force in accordance with (b)(5), and open the emergency exits as specified in (a)(2).

7. Release all diagonal force applied through the force application plate, and operate the emergency exits as specified in (a)(2).

(c) Test Conditions: The following conditions apply to the requirements specified in (3).

1. Temperature: The ambient temperature is between 32 degrees F and 90 degrees F.

2. Windows and Doors: Vehicle windows, doors, and emergency exits are in the fully-closed position, and latched but not locked.

(d) An alternative method of testing for the racking load test shall be as follows:

The racking load shall be applied along a line connecting the most distant points on a transverse cross-section of the bus interior. It produces a shear distortion of the cross-section, as shown in figure 2.

A representative method of loading that employs a hydraulic jack to load a two-frame test assembly is illustrated in figure 2.

The maximum jack load for the two-frame assembly is determined by the following formula:

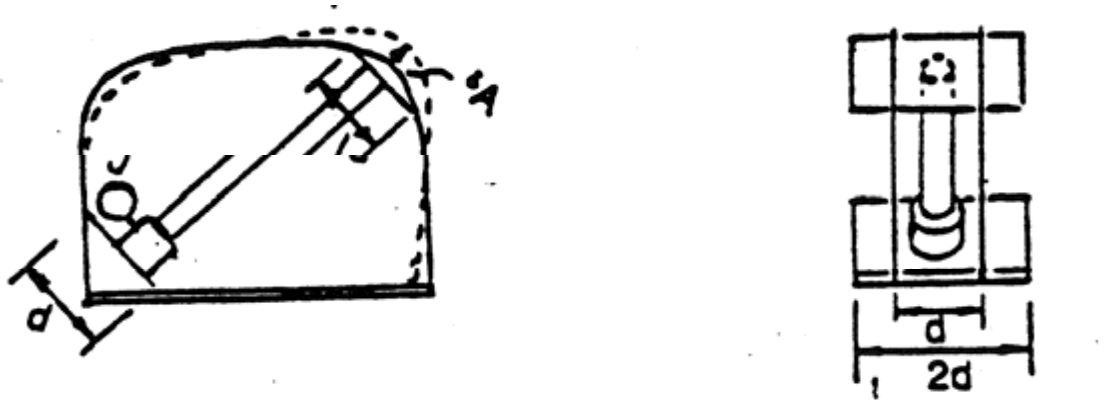
J = 2P J - maximum jack load for two-frame test assembly
P = load/frame

where P = Dynamic Vehicle Weight (DVW) divided by N
DVW - dynamic vehicle weight
N - total number of bus body frames

and DVW = DF x GVW
DF - dynamic factor, not less than 1.5
GVW - gross vehicle weight

Thus, for a DF = 1.5, a GVW = 22,000 pounds-force (lbf) and N= 11, the dynamic vehicle weight is DVW = 33,000 lbf, the load/frame is P = 3000 lbf and the maximum jack load is J = 6000 lbf.

When a complete bus body is rack-loaded, the total load DVW must be distributed uniformly along the bus body. This may be accomplished by mounting a series of hydraulic jacks along the length of the bus interior. Seats may be removed to facilitate jack mounting. The rack load will be considered to be uniformly distributed when the variation in the hydraulic jack readings is less than 10 percent. A maximum load is the sum of all jack readings and shall equal DVW.



Transverse Cross Section Side View

Figure 2. Arrangement of Hydraulic Jack for Rack-Loading of Two-Frame Assembly

The test may be performed on a complete bus body or on a representative section composed of at least two complete frames (body posts plus roof bows) and floor. Standard seats may be installed in the test section in a manner identical to that of the full bus body. Fabrication procedures for the test assembly shall be identical to those used in normal bus body production.

A two-cycle loading sequence shall be conducted, with intermediate and final load and deflection readings recorded, according to the procedure described.

The maximum deflection in line with the jack (A, maximum) shall not exceed 4 inches.

Manufacturer shall specify which testing method was used and submit appropriate certification information.

APPENDIX C

KENTUCKY POLE TEST PROCEDURES

KENTUCKY POLE TEST

The Kentucky Pole Test shall be required on or before the acceptance date of the first bus of the respective configuration.

TEST PROCEDURE:

The body shall be impacted at any point along the roof line on the outside surface, using an 8 inch diameter cylinder, 48 inches long, at a 30 to 45 degree angle, 1 to 3 inches above the top window line. The cylinder shall impact the roofline with the 48 inches dimension in a vertical plane with a force not to exceed 10 inches maximum to 8 inches minimum penetration of the body panels into the passenger compartment after impact.

The manufacturer shall submit appropriate certification information.

Mr. Chris Rustman, President
Florida Transportation Systems, Inc.
7703 Industrial Lane
Tampa, Florida 33637

Dear Mr. Rustman:

Based on your September 1, 2021, response to Invitation to Bid (ITB) No. 2022-01, the Florida Department of Education (FDOE) would like to offer your company a contract to furnish Types A, C and D complete school buses, Multi-function School Activity Buses and optional equipment. Attached is a list of the units and prices for each awarded bus configuration.

Please send a performance bond or cashier's check in the amount of $750,000, made out to "Florida Department of Education and Purchasing School Districts," guaranteeing performance for units of all types manufactured under this contract to: Office of the Comptroller, Matt Kirkland, 325 West Gaines Street, Suite 914, Tallahassee, Florida 32399-0400.

In addition, please respond in writing accepting this bid and sign and return the original contract form included in the ITB. Assuming receipt of your performance bond and acceptance of this contract, FDOE will process purchase orders received from eligible users of the contract from January 1, 2022, through December 31, 2023.

Should you have any questions, please contact Director of School Transportation, Robert Manspeaker at Robert.Manspeaker@fldoe.org or 850-245-9795.

Sincerely,

Suzanne Pridgeon

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

CONTRACT 2022-01 ATTACHMENT '6'

THIS CONTRACT FOR TYPE A, TYPE C AND TYPE D SCHOOL BUSES AND OPTIONAL EQUIPMENT, BID NO: ITB 2022-01, by and between the department, 325 West Gaines, Suite 834, Tallahassee, Florida 32399-0400, and

Florida Transportation Systems, Inc., the contractor, a for-profit corporation registered in Florida, each referred to herein as "Party," and collectively referred to as the "Parties,"

WITNESSETH:

WHEREAS, the Department desires to provide eligible users, defined herein, with various Type A, Type C and Type D School Buses and Optional Equipment (defined herein as "Vehicles"), through the use of a state term contract pursuant to rule 60A-1.001, F.A.C.; and section 1006.27, F.S., and

WHEREAS, the Department solicited responses to an Invitation to Bid No: ITB 2022-01(ITB) to prospective contractors of said Vehicles; and

WHEREAS, the contractor responded to the ITB and desires to provide said Vehicles; and, unto each other;

NOW THEREFORE, in consideration of the premises, terms and conditions set forth herein, the Parties execute this contract so same becomes binding and enforceable by and through the Parties and their assigns, and agree heretofore:

SCOPE OF WORK

The intent of these specifications is to set forth and convey to prospective bidders the general type, character, performance and quality of the Vehicles desired by the Department and school districts. The contractor is authorized to provide Vehicles to any and all eligible users in the State of Florida. The Parties agree that the laws and rules that apply to this contract shall be for those applicable to contracts in excess of Category Two, or $35,000, as defined in chapter 287.017, F.S.

Pursuant to Section 7.10 of Bid No: ITB 2022-01, the following documents are hereby incorporated by reference:

- Department contract
- Any addenda to Bid No: ITB 2022-01
- ITB No: 2022-01
- Award Letter
- Contractor's response

IN WITNESS WHEREOF, the Parties hereto have caused this contract For Type A, Type C and Type D School Buses and Optional Equipment, Bid No: ITB 2022-01, to be executed on the dates shown below their respective signatures.

SUPPLY CONTRACT BOND

Bond No. LSM1032767

KNOW ALL MEN BY THESE PRESENTS,

That Florida Transportation Systems, Inc

(hereinafter called the "Principal"), as Principal, and **RLI Insurance Company**, a Corporation organized and existing under the State of Illinois with its principal office in the City of Peoria, Illinois (hereinafter called the Surety), are held and firmly bound unto

Florida Dept. of Education and Purchasing School Districts (hereinafter called the Obligee), in the just and full sum

of Seven Hundred Fifty Thousand Dollars and 00/100 Dollars ($750,000.00),

to the payment of which sum, well and truly to be made, the said Principal and Surety bind themselves, and their respective heirs,

administrators, executors, and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal has entered into a certain written contract with the Obligee dated November 18, 2021, to furnish

the following briefly described supplies: Type A, Type C and Type D School Buses & Optional Equipment (defined as "vehicles")

which contract is hereby referred to and made a part hereof as fully and to the same extent as if copied at length herein.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, that if the said Principal shall fully indemnify and reimburse the Obligee for any loss that he/she (they,it) may suffer through the failure of the Principal to furnish said supplies in accordance with the terms of said contract, and the time(s), and in the manner therein specified, then its obligation shall be void; otherwise it shall remain in full force and effect.

PROVIDED HOWEVER, it shall be a condition precedent to any right of recovery hereunder, that in event of any default on the part of the Principal, a written statement of the particular facts showing the date and nature of such default shall be immediately delivered to the Surety by certified mail at its Office in the City of Peoria, Illinois.

AND PROVIDED FURTHER that no action, suit or proceeding shall be had or maintained against the Surety on this instrument unless the same be brought or instituted and process served upon the Surety within six months after all the supplies that are to be furnished by the terms of said contract have been furnished; nor, in any event, shall any action, suit or proceeding be had or maintained against the Surety on this instrument, unless the same be brought or instituted and process served upon the Surety prior to the expiration of one year from the date fixed in said contract for the completion thereof.

IN WITNESS WHEREOF, the said principal and Surety have signed and sealed this instrument this 8th day of December, 2021.

Amendments to Bond #: LSM1032767

The bond covers for all aspects of compliance with the contract including, but not limited to, liquidated damages for delayed delivery, specifications compliance, warranty compliance and reprocurement procedures, in the event of contract non-compliance or default.

The last paragraph of the preceeding page is amended to read:

AND PROVIDED FURTHER that no action, suit or proceeding shall be had or maintained against the Surety on this instrument unless the same be brought or instituted and process served upon the Surety within one year after all the supplies that are to be furnished by the terms of said contract have been furnished; nor, in any event, shall any action, suit or proceeding be had or maintained against the Surety on this instrument, unless the same be brought or instituted and process served upon the Surety prior to the expiration of one year from the date fixed in said contract for the completion thereof.

POWER OF ATTORNEY

Contractors Bonding and Insurance Company

9025 N. Lindbergh Dr. Peoria, IL 61615
Phone: 800-645-2402

Bond No. LSM1032767

Know All Men by These Presents:

That this Power of Attorney is not valid or in effect unless attached to the bond which it authorizes executed, but may be detached by the approving officer if desired.

That the **Contractors Bonding and Insurance Company**, a corporation organized and existing under the laws of the State of Illinois, and authorized and licensed to do business in all states and the District of Columbia does hereby make, constitute and appoint: Michelle D. Liwosz in the City of Leesburg, State of Florida, as it's true and lawful Agent and Attorney In Fact, with full power and authority hereby conferred upon him/her to sign, execute, acknowledge and deliver for and on its behalf as Surety, specifically for the following described bond.

Principal: **Florida Transportation Systems, Inc.**
Obligee: **Florida Dept of Education and Purchasing School Districts**
Bond Amount: **$ 750,000.00**

The acknowledgement and execution of such bond by the said Attorney in Fact shall be as binding upon the Company as if such bond had been executed and acknowledged by the regularly elected officers of the Company.

The **Contractors Bonding and Insurance Company** further certifies that the following is a true and exact copy of a Resolution adopted by the Board of Directors of **Contractors Bonding and Insurance Company**, and now in force to-wit:

"All bonds, policies, undertakings, Powers of Attorney or other obligations of the corporation shall be executed in the corporate name of the Company by the President, Secretary, any Assistant Secretary, Treasurer, or any Vice President, or by such other officers as the Board of Directors may authorize. The President, any Vice President, Secretary, any Assistant Secretary, or the Treasurer may appoint Attorneys in Fact or Agents who shall have authority to issue bonds, policies or undertakings in the name of the Company. The corporate seal is not necessary for the validity of any bonds, policies, undertakings, Powers of Attorney or other obligations of the corporation. The signature of any such officer and the corporate seal may be printed by facsimile."

IN WITNESS WHEREOF, the **Contractors Bonding and Insurance Company** has caused these presents to be executed by its Vice President with its corporate seal affixed this 8th day of December, 2021.

ADDENDUM #1

BID NO.: ITB 2022-01

JUNE 21, 2021

This addendum is being issued to provide the Answers to Questions submitted timely by vendors during the Question and Answers period.

Please be advised all questions are keyed as submitted.

From: Euclid Infotech

1) List of Items, Schedule of Requirements, Scope of Work, Terms of Reference, Bill of Materials required.

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech

2) Soft Copy of the Tender Document through email.

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech

3) Names of countries that will be eligible to participate in this tender.

ANSWER: Bid No: ITB 2022-01, is open to any vendor that can supply buses as specified in the ITB

From: Euclid Infotech

4) Information about the Tendering Procedure and Guidelines

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

INITIAL: _____

8-27-2021

From: Euclid Infotech
5) Estimated Budget for this Purchase

ANSWER: Purchases are to be determined by the eligible users. See ITB 2022-01 for historic purchase information.

From: Euclid Infotech
6) Any Extension of Bidding Deadline?

ANSWER: NO

From: Euclid Infotech
7) Any Addendum or Pre Bid meeting Minutes?

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Chris Rustman
Florida Transportation Systems, Inc.
8) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 3 addresses engines and their warranty coverage requirements. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.
9) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 5 addresses frame rails, cross members, fuel tanks, front axle I-beams and rear axle housing warranty coverage for 120 months. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.
10) Page I-4 of Florida Specifications, Effective January 2020, section "Transmission" requires an Allison 1000 or 2000 or approved equal on a Type A chassis of 30p and larger. FTS requests that the Chevrolet heavy duty 6-speed Hydra-Matic transmission be accepted as an approved equal.

ANSWER: Approved

From: Chris Rustman
Florida Transportation Systems, Inc.
11) Page III-2 of Florida Specifications, Effective January 2020, section 'Battery Disconnect Switch", states that there must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within 3 feet of the battery box if no A/C box is available. Ford does not currently permit this on their chassis and FTS requests that this item NOT apply to Type A buses.

ANSWER: Denied. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

From: Chris Rustman
Florida Transportation Systems, Inc.
12) Page III-16 of Florida Specifications, Effective January 2020, section 'Structural Design and Testing", states that each manufacturer of Type A, C and D bodies must certify that their configurations comply with the testing and requirements of both the Colorado Racking Load Test and the Kentucky Pole Test. Do bidders for ITB 2022-01 need to provide verification of compliance with their bid submission?

ANSWER: See 7.19 Representations. The requested letter meeting specifications is an attestation that each configuration meets all Florida School Bus Specifications including Structural Design Testing

From: Mike McCullough
Sun State International
13) Given the volatility of industry shortages and long lead times of materials and supplies, will the Department adjust or waive the requirement for delivery 240 days from receipt of PO in documented instances?

ANSWER: No

From: Mike McCullough
Sun State International
14) Due to current and likely ongoing volatility of market pricing of raw materials and components for manufacturing and regulatory impacts on finished product pricing, will the Department provide a mechanism for periodic adjustment of pricing?

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
15) 4.26 Extension
Will the Department consider the same bid language for a "proportional price increase" in the event of unsuspected circumstances like the ones we are dealing with now regarding parts shortages and price Increases for components required to build the base bus, chassis, and options (e.g., steel, plywood, plastic, wiring, etc.) impacting the overall cost to manufacturer the bus? (e.g., over 3%?)

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) A. 7.5 and 7.25
Are "Alternative Fuel Options" included in the "Incentive to Buy" clause by offering incentives to districts to purchase alternative fuels either directly or indirectly; (e.g., propane companies offering districts incentives like rebates, cash, or free buses) to buy propane powered units, thereby impacting who the district buys buses from?

ANSWER: The question is speculative. Section 7.5 of the ITB explicitly addresses sales incentives and that section applies to all bidders.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) B. Also please reconfirm that Gasoline is NOT to be considered an Alternate Fuel.

ANSWER: United states Department of Energy lists Ethanol, Electricity, Bio-Diesel, CNG, Propane and Hydrogen as alternative fuels. Gasoline is not an alternative fuel.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
Clarification on vendor pricing sheets – Attachment 1 (applies to question 17 only)
17) A. In the case that an "electric" power train is submitted in the Base Configuration (e.g., Standard Engine, HP/LB·FT, Bus Base Price) In this solicitation for a particular configuration, will this be considered the base configuration for the solicitation and subject to the AWARD requirement to be within 10% of the lowest acceptable bid price for that configuration?

ANSWER: If the vendor submits an electric powertrain in the base configuration as its standard engine. Its offering will be compared to the same electric configuration of other bidders whether offered as a base or optional engine.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
17) B. Furthermore, is "electric" to be considered an "Alternative Fuel Engine Option" only for this solicitation?

ANSWER: Yes, per the United States Department of Energy.

From: Lion Electric Co. USA Inc.
18) At point 4.2 **Questions** it states, "the bidder may request, in writing, to the State that specifications be changed". Can the State please confirm which specifications are being referred to with this point.

ANSWER: The questions referred to in 4.2 are the questions in this addendum.

From: Lion Electric Co. USA Inc.

19) At point 7.19 **Representations,** bidders are expected to include a letter with their bid response confirming that "each unit sold by the bidder's company or representative for school buses will meet Attachment 11 - *Florida School Bus Specifications, Effective January 2020*". To note: many of the specifications in this document are tailored to school buses with an internal combustion engine and therefore do not apply to school buses with an all-electric motor. How must all-electric school bus OEM's address this letter if the bus does not include all specifications on the bus, and therefore does not "meet" the specifications? Can all-electric OEM bidders send their recommended specifications changes to the Department of Education before submitting the bid response? Or should the specification changes be included with the bid response?

ANSWER: Florida school Bus Specifications Page II-2 Engine Equipment note: Electric Powered configurations are exempt from the engine requirements listed below.

From: Lion Electric Co. USA Inc.

20) At point 4.34 **Alternates** it states, "Alternate Brands or products will not be considered for this bid response". Can the State please confirm what brands this applies to? Does this refer to OEM school bus brands? Bus brand parts?

ANSWER: See Florida School Bus Specifications, Effective January 2020.

From: Lion Electric Co. USA Inc.

21) At point 6.1 **Deliverables** it states that a sample status report must be included in the bid submission. However, this form is intended for award winners only. Can the State please explain how bidders are expected to complete this form for their bid submission?

ANSWER: 6.1 The successful bidder must provide a status report on a monthly basis.

From: Lion Electric Co. USA Inc.

22) At point 7.2 **Bid Response Format Instructions** a two-page limit is identified for the Transmittal Letter in Section 1. Can you please confirm if there is a page limit for Section 2?

ANSWER: There is no page limit per section 2

From: Lion Electric Co. USA Inc.

23) At point 7.12 **MYFLORIDAMARKETPLACE**, there is a fee for school buses purchased under this contract. Can the State please share what the fee amount is?

ANSWER: 1% of the payment amount.

From: Lion Electric Co. USA Inc.

24a) At point 7.3 **General Bid Requirements** it states, "each bidder shall bid all or none of each bus configuration". Please note that all-electric buses are not built the same as those with an internal combustion engine. That said, as an all-electric OEM, Lion Electric would like to respectfully ask that we can submit our all-electric specifications and configurations?

ANSWER: Each school bus configuration submitted must meet Florida School Bus Specifications, Effective January, 2020.

From: Lion Electric Co. USA Inc.
24b) If an OEM does not offer all configuration types and only submits pricing for the configurations that are possible will the OEM be disqualified?

ANSWER: No.

From: Lion Electric Co. USA Inc.
25) At point 7.9 **Pre-Delivery Inspections (PDI)** it states that a completed PDI form must accompany each unit delivered. This is another form that is intended for award winners only. Can the State please explain how bidders are expected to complete this form for the bid submission?

ANSWER: For Award Winners Only.

From: Lion Electric Co. USA Inc.
26) A. At the **Vendor Bid Sheets** point, there is a specification sheet for each bus configuration. Can OEM's list STD ("standard") beside the specifications that are considered standard on the bus?

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) B. In addition, if the OEM considers one of the specifications to be optional, must the OEM list a price

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) C. Would the word "optional cost" suffice?

ANSWER: No. If an OEM bids STD in any option, they are including the option with the base bus price at no additional cost. If the item already has STD in the corresponding cell, it must be included with the base bus price. Any remaining cells should be priced or reflect NA (Not Applicable), NB (No Bid), or NC (No Charge) pursuant to definitions (3.2)

From: Lion Electric Co. USA Inc.
27) At point 7.2 **Bid Response Format Instructions, Section 1 – Transmittal Letter**, bidders must include a statement that they have "read, understands and agrees to all provisions of this ITB. By submitting a bid, the bidder agrees to the terms and conditions of the ITB, notwithstanding any statement in the bid to the contrary". We would like to please ask the State if it would allow bidders to propose modifications to the Terms and Conditions with their bid response?

ANSWER: No.

From Glenn Matthews
Matthews Bus Alliance, Inc.

28) This letter is to inform you that the worldwide shortages have affected Thomas Built Buses, and now Matthews Bus Alliance, Inc. The shortage is with the required LED lights to meet state specifications and will affect the 3 LED lights above the front and rear School Bus sign. To be able to continue manufacturing buses, TBB will be substituting the LED bulbs with incandescent lights. We anticipate this will impact about 55 of our buses. Once the LED lights become available, with your permission we will send out technicians to change them out in order to not impact timely delivery.

ANSWER: Approved, subject to agreement with the eligible user.

Potential proposers have 72 hours from posting of addenda to protest the requirements of each addendum. Failure to file a protest within the time prescribed in Section 120.57(3), or failure to post the bond or other security required by law within the time allowed for filing a bond shall constitute a waiver of proceedings under Chapter 120, Florida Statutes.

YOUR BID WILL NOT BE COMPLETE WITHOUT THIS DOCUMENT SIGNED AND INCLUDED!

RE: ITB #2022-01, Cover Letter/Transmittal Letter

Dear Ms. Wimberly:

This letter is to certify that Glenn Matthews is authorized to represent the bidder and bind the bidder relative to all matters contained in the attached proposal.

Matthews Bus Alliance, Inc., (FEID #81-4572887 & DUNS #080643261) is acting as the bidder pursuant to ITB 2022-01. We hereby certify that we have read, understood and agree to all provisions as stated in the ITB and its addendums.

This letter is to certify that all Type C and D school bus bodies and/or chassis sold or delivered to Florida school districts by Matthews Bus Alliance, Inc., complies with all provisions of ITB 2022-01 and its addendums. Additionally, all products offered pursuant to ITB 2022-01 will meet the Florida School Bus Specifications; Revised 2020, will meet the National School Transportation Specifications and Procedures, Revised 2015, and will meet all Federal Motor Vehicle Safety Standards applicable at the time the vehicle is manufactured.

This letter is to certify that Matthews Bus Alliance, Inc., acting as the bidder pursuant to ITB 2022-01, is authorized to conduct business in the State of Florida and is registered on the MyFloridaMarketPlace website with an active status. There is also a valid electronic copy of our W-9 on file with the Department of Financial Services (DFS).

Matthews Bus Alliance, Inc., while having an OSD Classification of a Non-Minority on the MyFloridaMarketPlace website, fully supports diversity in the workplace and within our own workforce.

Respectfully submitted,

Glenn Matthews

SEON - CJ-MP6A30	CJ mounting post, 6 inch, 30 degree angle		$70
PREDICITVE STOP ARM SOULTION			
SEON - PSA2S	Predictive Stop Arm, 2 Radars, 2 Horns - Install Included		$2,849
1080P HD EXTERRIOR 360 SYSTEM			
SEON - inView360HD-Connectable w/HDM-7IN	inView360HD System Kit + Connection Kit w/ 7 Inch HD Monitor Included with inView360HD-Connectable Kit - Install Included		$2,326
SEON - ARMF	Optional RCA to Microfit Adaptor for video feed into DVR		$35
SEON - inView360HD-Cal-Kit	inView 360HD Calibration Kit - USB + 4 mats + software + videos + documentation		$250
ANALOG EXTERRIOR 360 SYSTEM			
SEON - SAV-INV360	Analog inview360 Exterior System Complete - Install Included		$1,870
SEON - SAV-200R	Rear camera, spare, no housing, inView 360		$276
SEON - SAV-PAD	InView360,Calibration Pad Set, c/w 4 Folded Pads		$203
SEON - SAV-DOC-USB	inView 360 manuals on a USB stick (not including calibration)		$40
vMAX COMMANDER WIRELESS VIDEO DOWNLOAD			
SEON - VMC5B	vMax Commander 5.0: web-based wireless and automatic video management software to monitor video system health, automatically download video alarms, search video by time and location, and display historical GPS tracks of the vehicles in the fleet. Includes 100 user licenses. Activation included.		$4,350
SEON - PRS-WEBTRN	Webinar, remote training, 1 Day - COORDINATED THRU SEON		$765
SEON - PRS-TRAIN	vMax Live Commander On Site Training Per Day - COORDINATED THRU SEON		$1,500
SEON - PRS-REMOTE	Remote Engineering Service Per Day - COORDINATED THRU SEON		$750
SEON - PRS-TRVL	Engineering Services Travel Days To/From Site - COORDINATED THRU SEON		$1,000
SEON - PRS-REMOTE-HRLY	Remote Engineering Service Per Hour - COORDINATED THRU SEON		$150
SEON - PRS-ENGSITE	On Site Engineering Service Per Day - COORDINATED THRU SEON		$1,000
WIRELESS COMPONENTS			
SEON - SRLAC00	Smart Reach Lite,2.4/5GHz,No ANT		$442
SEON - SRLAC07	SmartReach Lite,2.4/5GHz,ANT		$530
SEON - SRLAC07NP	SmartReach Lite,2.4/5GHz,ANT,No POE		$449
SEON - SRLAC00NP	Smart-Reach Lite for TH4, TH4C, TH6, TH8 and TL-HD only, 5.8GHz, no antenna, no PoE adapter		$359
SEON - SRLN07	SmartReach Lite,2.4/5GHz,ANT,-N		$495
SEON - SRLN07NP	SmartReach Lite,2.4/5GHz,ANT,No POE,-N		$407
SEON - SRLBAA09-SV	Smart-Reach Lite, 5G, Supervisor Vehicle		$1,067
SEON - PRS-REMOTE	1x Remote Engineering Service Required for Supervisor Kit Set Up (SEON Must Implement)		$750
SEON - SRBLAC10	SmartReach Base, Lite AC, 2.4G/5G,6dBi,WP,Omni ANT (SEON must Install) - INSTALL COST NOT INCLUDED		$325
SEON - SRBLAC04	SmartReach Base, Lite AC, 2.4G/5G/22dBi WP, Grid ANT (SEON must Install) - INSTALL COST NOT INCLUDED		$390
SEON - SRBLAC09	SmartReach Base, Lite AC, 2.4G/5G,WP,Mini Panel ANT (SEON must Install) - INSTALL COST NOT INCLUDED		$365
SEON - SRB1AC101010	Smart-Reach Base AP, 1 radio, no antenna, outdoor (SEON must Install - Seon Install Cost Included)		$4,175

SEON - SRB1AC090909	Smart-Reach Base AP, 1 radio, 3 omni directional 2.4GHz antenna, outdoor (SEON must Install - Seon Install Cost Included)		$4,296
SEON - SRB2AC121212	SmartReach AP,2RD, 2.4Ghz 3xSdBi Omni Antenna, 5Ghz 3x7dBi Omni Antenna (SEON must Install - Seon Install Cost Included)		$4,607
SEON - SRB3AC141010	SmartReach AP,2RD,2.4Ghz w/Grid Antenna for 5Ghz Back Hau l(SEON must Install - Seon Install Cost Included)		$4,358
vMAX COMPASS - ROUTING SOFTWARE - ALL THESE OPTIONS MUST BE IMPLIMETED OR INSTALLED BY SEON			
SEON - ROUTE-COMPASS	Routing, Route Builder, Tiering, Parent Portal, 1Yr, Per Vehicle		$288
SEON - CMPS-TRAIN3	vMaxCompass Routing Software Training - 3 days of comprehensive onsite software training for smaller School Districts. Includes 2 x 1hr webinars to be used within 1 month of the original training. (SEON must provide training)		$6,000
SEON - CMPS-TRAIN5	vMaxCompass Routing Software Training - 5 days of comprehensive onsite software training for larger School Districts. Includes 4 x 1hr webinars to be used within 1 month of the original training. (SEON must provide training)		$10,000
SEON - CMPS-LOGST-2-VCL	Compass Logistics for fleets of 1 or 2 vehicles, yearly charge (SEON must Install)		$510
SEON - CMPS-LOGST-5-VCL	Compass Logistics for fleets of 3 to 5 vehicles, yearly charge (SEON must Install)		$1,020
SEON - CMPS-LOGST-10-VCL	Compass Logistics for fleets of 6 to 10 vehicles, yearly charge (SEON must Install)		$2,040
SEON - CMPS-LOGST-20-VCL	Compass Logistics for fleets of 11 to 20 vehicles, yearly charge (SEON must Install)		$3,570
SEON - CMPS-LOGST-50-VCL	Compass Logistics for fleets of 21 to 50 vehicles, yearly charge (SEON must Install)		$5,100
SEON - CMPS-DISPATCH	Compass Dispatch Software (SEON must Install)		$5,000
SEON - CMPS-FLEET	Compass Fleet Software (SEON must Install)		$5,000
SEON - CMPS-TRIP	Compass Field Trip Software (SEON must Install)		$5,000
ROUTE PATH & STUDENT CONTACT TRACING BUNDLES			
SEON - ROUTE PATH	Automated route stop and student tracking software, includes 1st year of service, per vehicle		$125
SEON - ROUTE PATH TRAIN	Training on Seon Path (SEON must train)		$250
SEON - STUDENT-CONTACT-TRACING	STUDENT-CONTACT-TRACING Includes equipment & all-in-one software for: Live GPS Student Tracking & Reporting Routh Path Parent Notification App & Service All-in-One Web-Based Software Interface		$820
SEON - CONTACT-TRACING-W/MDT	CONTACT-TRACING-W/MDT Includes cellular data, equipment & all-in-one software for: Live GPS (Tablet Hardware) Student Tracking & Reporting (Tablet & RFID hardware) Routh Path Parent Notification App & Service All-in-One Web-Based Software Interface		$1,720
SCHOOL BUS HUB - PARENT NOTIFICATION APP			
SEON - ROUTE-SBHUB	Routing, SBH, Parent Notification Portal,1Year,Per Vehicle		$75
vMAX LIVE PLUS - LIVE GPS - MDT MOBILE DATA TERMINAL & LMU'S			
SEON - VLP-LMUV1Y1	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Verizon Data, Health Check (Includes activation)		$698
SEON - VLP-LMUC1Y1	LMU, for Live plus tracking PWR/SIG DVR HRNS, GPS, Plus/T-Mobile-Curiosity,10MB (Includes activation)		$690

MANUF, MODEL	DESCRIPTION	Notes	Price
SEON CONTINUED			
SEON - VLP-MULTI-STR1UY1	Trac, Student Tracking, Multi-card RFID Reader, operates via USB, 1 year		$580
SEON - VLP-LMUV1 (No Data)	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Health Check		$606
SEON - VLP-LMUS1 (No Data)	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Health Check		$657
SEON - VLP-TRAIN	Training on vMax Live+ (Seon provides training)		$250
SMART REACH CELLULAR - LIVE STREAM & ROLLING WIFI HOTSPOT			
SEON - LVST-FLEET	Live Streaming VPN and fleet setup, 100 users including 1 admin (no existing Commander fleet) (SEON must Install)		$3,009
SEON - LVST-FLEET-ADDON	Live Streaming extension for existing Commander fleet - (SEON MUST IMPLIMENT)		$885
SEON - LVST-USER	Live Streaming configuration of up to 10 additional users - (SEON MUST IMPLIMENT)		$1,220
SEON - LVST-USERST	Live Streaming only. Video Server Installation and Setup for User of fleet. Provides lower priority access to streaming video from buses (Max 9 Users) (SEON MUST INSTALL)		$1,800
SEON - LVST-ACT	Live Video Streaming Service, Activation, per vehicle, no data (includes service up to 1 year - until anniversary date) (SEON MUST IMPLIMENT)		$36
SEON - SRC-ROUTER-S-1	WIFI+GPS+Cellular for WIFI Download, GPS tracking, and Live Video Stream. Includes Harness, 6-in-one Dome Antenna - LTE T-Mobile Curiosity Data Plan		$1,297
SEON - SRC-ROUTER-1	All-in-one Smart Reach Router, - NO DATA PLAN - WIFI+GPS+Cellular for WIFI Download/Hotspot, GPS tracking, and Live Video Stream. Includes Harness, 6-in-one Dome Antenna - North America LTE - Customer DATA PLAN – No Hotspot technical support provided		$1,297
SEON - SRC-MODEM-S-1	RV50-X - T-Mobile - SmartReach Cellular, Modem, RV50-X - LTE with Diversity antenna (GPS+Cellular) for GPS tracking and Live Video Stream connectivity - T-Mobile		$1,150
SEON - SRC-MODEM-1	RV50-X - LTE - SmartReach Cellular, Modem - LTE with Diversity antenna (GPS+Cellular) for GPS tracking and Live Video Stream connectivity - North America		$1,150
SEON - SRC-WIFIPANT-1	Smart Reach WIFI Paddle Antenna for SRC-ROUTERs 2.4/5.0GHz Omni-directional		$240
SEON - SRH-R1T60G-Y1	Smart Reach HotSpot - Router, Content Filtering, Captive Portal, 60GB, T-Mobile, GPS Live Tracking, 1 year (SEON WILL IMPLIMENT		$888

BIDDERS NOTES

B7b: IMMI Child Safety Seat

IMMI ICS Seating options will reduce the seating cap. in some configurations due to seat spacing and ISO latch spacing requirements

B18: Underseat Heater Options

Heater's location and size (40,000 BTU rear wall mount) may be the only possible location for the rear heater

B21: Drivers Seat with Integrated Seatbelt

This may reduce the passenger capacity due to spacing requirements

C4: 100 Gallon Fuel Tank

May require options C10 (Air Ride Suspension) on some Type C configurations. 100 gallon tank may affect availability of pass thru luggage on some rear engine models. Please consult dealer. Only Available on 65-77 passenger units

Cummins EXC Warranty includes complete engine coverage including EGR components and turbo injectors.

ISO - first 3 rows are standard. Additional ISO latch seats may reduce the capacity. Please consult dealer.

RIFLED AIR CONDITIONING SYSTEM INFO

The following systems come with a 5 year limited warranty w/unlimited mileage and 270 amp alternator. Not available on Propane or Electric.

RAC-BH1141	System A
RAC-BH1122	System B

The following systems come with a 6 year limited warranty w/unlimited mileage and 270 amp alternator. Not available on Propane or Electric.

RAC-BH2241	System A
RAC-BH2233	System B

For a tie in dash AC System on C2 29-77 passenger, there is no deduct in price and has a 5 year STD warranty. BTU Rating 120,000

TM43 compressor may not be available on Detroit DD5, DD8 or CNG. Contact MBA Sales Coordinator for availability. Not available on propane engines.

The following systems come with a 5 year warranty from Transarctic. Not available on CNG, Detroit or Propane Engines.

Transarctic C240	System A - Dual QP25 Compressors

PSI 8.8L LPG 270HP 565LB/FT, Propane Engine comes with a 270 Amp Alternator and MCC Air Conditioning on Type C buses.

S.T.A.R.S. Information

Price is per position. Please consult with dealer on configurations.

DD5 Engine HP and Torque Info Per Configuration:

29 - 47 Passenger Units have 200HP/620 lb ft
65 - 71 Passenger Units have 220HP/660 lb ft
77 Passenger Units have 240HP/660 lb ft

Cummins B6.7N HP and Torque Info per Configuration

65 Passenger Units have 220HP/520 lb ft
71 Passenger units have 220HP/520 lb ft
77 Passenger Units have 240HP/560 lb ft

DRUG-FREE WORKPLACE

(will be considered in case of identical tie Bids)

Preference shall be given to businesses with drug-free workplace programs. Whenever two or more Bid Responses which are equal with respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a Bid Response received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie Bid Responses will be followed if none of the tied vendors have a drug-free workplace program. To have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3) Give each employee engaged in providing the commodities or contractual services underbid a copy of the statement specified in subsection (1).

4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are underbid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5) Impose a sanction on, or require satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community by any employee who is so convicted.

6) Make a good faith effort to maintain a drug-free workplace through implementation of this section.

As the person authorized to sign the statement, I certify that this firm complies fully with the above requirements.

STATE OF FLORIDA DEPARTMENT OF EDUCATION

MINORITY SUBCONTRACTORS UTILIZATION SUMMARY

The Department's Supplier Diversity initiative strives to ensure the promise of Florida's future is shared by all of its residents, regardless of race, ethnicity, disability, neighborhood, or background. To that end, the Department is dedicated to support, track and increase its small, minority-, women-, and service-disabled veteran business enterprise spending with prime contractors and subcontractors. This form was developed to assist in these efforts.

The Prime Contractor shall report all small, minority-, women-, and service-disabled veteran business enterprise Subcontractors, identifying the Name, Address, Type of Certification, and Dollar Amount on the form below. The Prime Contractor shall submit this form with each invoice submitted for payment, whether or not funds have been spent with a small, minority-, women-, and service-disabled veteran business enterprise Subcontractor for the period covered by the invoice. The Office of Supplier Diversity, Florida Department of Management Services will assist in furnishing names of qualified minorities. The Office of Supplier Diversity can be reached at (850/487-0915); the Internet Web address is http://dms.myflorida.com/other_programs/office_of_supplier_diversity_osd .

CONTRACT 2022-01 ATTACHMENT '6'

THIS CONTRACT FOR TYPE A, TYPE C AND TYPE D SCHOOL BUSES AND OPTIONAL EQUIPMENT, BID NO: ITB 2022-01, by and between the department, 325 West Gaines, Suite 834, Tallahassee, Florida 32399-0400, and

MATTHEWS BUS ALLIANCE, INC., the contractor, a for-profit corporation registered in Florida, each referred to herein as "Party," and collectively referred to as the "Parties,"

WITNESSETH:

WHEREAS, the Department desires to provide eligible users, defined herein, with various Type A, Type C and Type D School Buses and Optional Equipment (defined herein as "Vehicles"), through the use of a state term contract pursuant to rule 60A-1.001, F.A.C.; and section 1006.27, F.S., and

WHEREAS, the Department solicited responses to an Invitation to Bid No: ITB 2022-01(ITB) to prospective contractors of said Vehicles; and

WHEREAS, the contractor responded to the ITB and desires to provide said Vehicles; and, unto each other;

NOW THEREFORE, in consideration of the premises, terms and conditions set forth herein, the Parties execute this contract so same becomes binding and enforceable by and through the Parties and their assigns, and agree heretofore:

SCOPE OF WORK

The intent of these specifications is to set forth and convey to prospective bidders the general type, character, performance and quality of the Vehicles desired by the Department and school districts. The contractor is authorized to provide Vehicles to any and all eligible users in the State of Florida. The Parties agree that the laws and rules that apply to this contract shall be for those applicable to contracts in excess of Category Two, or $35,000, as defined in chapter 287.017, F.S.

Pursuant to Section 7.10 of Bid No: ITB 2022-01, the following documents are hereby incorporated by reference:

- Department contract
- Any addenda to Bid No: ITB 2022-01
- ITB No: 2022-01
- Award Letter
- Contractor's response

IN WITNESS WHEREOF, the Parties hereto have caused this contract For Type A, Type C and Type D School Buses and Optional Equipment, Bid No: ITB 2022-01, to be executed on the dates shown below their respective signatures.

RE: ITB #2022-01, Chassis Delivery Schedule

Dear Ms. Wimberly:

Thomas Built Buses and Freightliner Custom Chassis Corporation, Ford Motor Corporation and General Motors Corporation have adequate facilities and production capacity to provide Type A, C and D chassis within designated timelines set forth in ITB 2022-01. Delivery of completed units purchased from ITB 2022-01 will be delivered within 240 days from Matthews Bus Alliance, Inc., receipt of Purchase Order as specified in Section 7.17 of the ITB 2022-01. Purchase Orders will be accepted beginning immediately after contract execution through December 31, 2023 or as noted in Section 4.26 extension

Type A chassis purchased will be produced by Ford Motor Corporation/General Motors Corporation. These chassis will be released for transport to Thomas Built Buses approximately two weeks prior to the body production start date.

Type C school bus chassis purchased will be produced by Freightliner Custom Chassis. These chassis will be released for transport to Thomas Built Buses approximately two weeks prior to the body production start date.

Type D chassis are produced by Thomas Built Buses and will be delivered for body production approximately one day prior to the body start date. All chassis will be scheduled so as to accommodate body production within ITB timelines for Type D school buses detailed above.

RE: ITB #2022-01, Liquidated Damages (Section 6.2)

Dear Ms. Wimberly:

This letter is to certify that Matthews Bus Alliance, Inc. acknowledges all procedures and financial penalties for Liquated Damages in Section 6.2 of the ITB 2022-01.

Buses not ready for pickup or delivered to the purchasing school district by the dates specified (by purchaser) in Section 6.2 of ITB 2022-01 will be assessed for Liquidates Damages of:

-$25 per bus, per calendar day that delivery is late for Non-Lift Units
-$50 per bus, per calendar day that delivery is late for Wheelchair Lift Units

Liquidated Damages are permitted to be deducted from the payment of the bus after notifying the bidder, in writing, at least 30 days in advance of their intent to deduct liquidated damages by the purchasing school districts and the FSDB per section 6.2.

Respectfully submitted,

Glenn Matthews
President
Matthews Bus Alliance, Inc.

ATTACHMENT 20 – STATE OF FLORIDA, DEPARTMENT OF EDUCATION ATTACHMENT C STANDARD TERMS AND CONDITIONS

Pursuant to S. 287.058(1), Florida Statutes ("F.S."):

A. Bills for fees or other compensation for services or expenses shall be submitted in detail sufficient for a proper preaudit and postaudit thereof.

B. Travel expenses will be reimbursed only if expressly authorized by the terms of the Contract. Bills for any travel expenses shall be submitted in accordance with s. 112.061, F.S.

C. The Department may unilaterally cancel this Contract if the Contractor refuses to allow access by members of the public to all documents, papers, letters and materials made or received in conjunction with the Contract that are subject to Chapter 119, F.S., and are not exempt from public inspection by s 119.071, F.S., or by other provisions of general or special law.

D. The Deliverables specified in the Contract must be received and accepted in writing by the Department's Contract Manager before Contractor is entitled to payment.

E. To complete this Contract, all services must be performed and/or goods received on or before the date(s) specified in the Contract.

F. If this Contract is expressly renewable, it may be renewed for a period that may not exceed three years or the term of the original contract, whichever is longer. The renewal price for the contracted service is set forth in the bid, proposal, reply. Cost for renewal shall not be changed. Renewals shall be contingent on satisfactory performance evaluations by the Department and subject to the availability of funds. Exceptional purchase contracts pursuant to s. 287.057(3)(a) and (c), F.S., may not be renewed.

II. In fulfilling its obligations under this Contract and Chapter 119, F.S., Contractor must comply with the requirements outlined in s. 119.0701, F.S. If Contractor fails to comply with a public records request pursuant to Chapter 119, F.S., the Department may take any action under this Contract necessary to ensure compliance with Florida's public records laws, including, but not limited to, demanding compliance with a public records request, seeking indemnification from Contractor regarding an action brought to enforce a public records request sent to Contractor, or terminating the Contract. Pursuant to s. 119.0701, F.S., Contractor must:

A. Keep and maintain public records required by the Department to perform the service;

B. Upon request from the Department's custodian of public records, provide the Department with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in chapter 119, F.S., or as otherwise provided by law;

C. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Contract term and following completion of the Contract if the Contractor does not transfer the records to the Department; and

D. Upon completion of the Contract, transfer, at no cost, to the Department all public records in possession of the Contractor or keep and maintain public records required by the Department to perform the service. If the Contractor transfers all public records to the Department upon completion of the Contract, the Contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the Contractor keeps and maintains public records upon completion of the Contract, the Contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the Department, upon request from the Department's custodian of public records, in a format that is compatible with the information technology systems of the Department.

IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 850-245-0735 & contractcustodian@fldoe.org, Florida Department of Education, Attn: Contract Custodian 325 W. Gaines Street, Suite 344, Tallahassee, FL 32399-0400.

III. The Contractor shall prepare an invoice for the amount due and mail it to the Department of Education Comptroller after having delivered the products and services required under this Contract to the Contract Manager. The invoice shall set forth details sufficient for a proper pre-audit and post-audit including, where applicable, the products and services delivered and completion dates. Upon receipt of the invoice, the Department of Education Comptroller will request confirmation from the Contract Manager that the delivered products and services are satisfactory and payment is due. If for any reason they are not satisfactory, payment will be withheld until the unsatisfactory condition or conditions are corrected. Upon receipt of the Contract Manager's approval, the Department of Education Comptroller shall process each invoice in accordance with the provisions of s. 215.422, F.S.

INITIAL: _____

8-27-2021

A. Contractor agrees to submit invoice within thirty (30) days of the Department's acceptance of deliverables. It is understood that should Contractor fail to submit invoice within thirty (30) days following the Department's acceptance of the deliverables, the Department shall not be responsible for payment thereof under this contract or quantum meruit.

IV. Section 215.422, F.S., provides that agencies have five (5) working days to inspect and approve goods and services, unless bid specifications or the Contract specifies otherwise. With the exception of payments to health care providers for hospital, medical, or other health care services, if payment is not available within forty (40) days, measured from the latter of the date the invoice is received or the goods or services are received, inspected and approved, a separate interest penalty set by the Comptroller pursuant to s. 55.03, F.S., will be due and payable in addition to the invoice amount. To obtain the applicable interest rate, please contact the Department's Fiscal s. at 850/245-0401 or Purchasing Office at 850/245-0483. Payments to health care providers for hospitals, medical, or other health care services, shall be made not more than thirty-five (35) days from the date of eligibility for payment is determined, and the daily interest rate is .02740 percent. Invoices returned to a vendor due to preparation errors will result in a payment delay. Invoice payment requirements do not start until a properly completed invoice is provided to the agency. A Vendor Ombudsman, whose duties include acting as an advocate for vendors who may be experiencing problems in obtaining timely payment(s) from a State Agency, may be contacted at 866/352-3776 or by calling the Chief Financial Officer's Hotline, 800/342-2762.

V. As used in this Contract, the term "Deliverable" refers to tangible "commodities", as defined in s. 287.012(5), F.S., which the Contractor provides pursuant to the Contract and to reports or other tangible or documentary evidence which demonstrate that the Contractor has performed the services required by the Contract. The following provisions govern Deliverables, as applicable:

A. Each Deliverable must be physically delivered to the Department's Contract Manager, or to a person designated by the Contact Manager. If delivery is made to a designee, the Contractor shall give written notice to the Contract Manager of the delivery. A Deliverable is not received until the Contract Manager has physical control of deliveries or has written notice that the designee has physical control.

B. In each case in which the approval of a Deliverable is dependent upon tests being conducted by the Department or Contractor, independently or jointly, the Department's inspection and approval of the Deliverable shall not be subject to the five (5) day provision in s. 215.422, F.S., but shall be governed by the terms and conditions of the acceptance testing plan as stated in Attachment A, until approved in accordance with the plan.

C. In each case of a Deliverable of information technology, as defined at s. 287.012(14), F.S., unless specified otherwise in Attachment A, the acceptance testing plan is deemed to include as a minimum the reliable performance of the information technology in accordance with its design specifications in:

1. a test environment that simulates the production environment as much as is reasonably possible; and
2. the production environment for which it is intended for a period of time sufficient for the information technology to have experienced the major foreseeable exigencies of the production functions.

D. The Department's inspection, including testing when applicable, shall determine whether or not the Deliverables appear to be in compliance with the Contract. The Contractor shall be notified in writing of any apparent deficiency. The written notice shall detail the specific action required by the Contractor to correct the deficiency. The Contractor shall timely correct such deficiency and resubmit the deliverable for acceptance.

VI. The Contractor represents and agrees that information submitted in support of its requests for payment is the basis of payment and is true and accurate to the best of knowledge of the responsible signatory. A violation of this provision shall subject the violator to the provisions of s. 68.082, F.S., pertaining to false claims against the State, and/or s. 837.06, F.S., pertaining to false official statements.

VII. This paragraph applies if this Contract expires in a fiscal year subsequent to the fiscal year in which the Contract is entered. The State of Florida's fiscal year comprises July 1 through June 30. The Department's and State of Florida's performance and obligation to pay under this Contract is contingent upon an annual appropriation by the Legislature.

VIII. Notwithstanding anything to the contrary contained in a State Term Contract, Contractor warrants that all commodities, as defined in s. 287.012, F.S., shall meet the specifications of the Contract and shall be merchantable and fit for the particular purposes intended by the Contract.

IX. The Contractor further warrants that as to each Deliverable produced pursuant to this Contract, Contractor's production of the Deliverable, and the Department's use of the Deliverable, will not infringe on the copyrights of any third party. This provision applies to each work of authorship in which copyrights subsist pursuant to 17 U.S.C. Sections 102-105 and to each exclusive right established in 17 U.S.C. Section 106. In furtherance of this provision the Contractor additionally warrants that:

A. As to each work of software or other "information technology", as defined in s. 287.012(15), F.S., in which copyrights subsist, the Contractor has acquired the rights by conveyance or license to any third party software or other information technology, which was used to produce the Deliverable;

B. As to each image and sound recording incorporated into a Deliverable, the Contractor has acquired the necessary rights, releases, and waivers from the person whose image or sound is included, or from the holder of the copyrights subsisting in the literary, musical, dramatic, pantomime, choreographic, pictorial, graphic, sculptural, motion pictures, audiovisual work or sound recording from which the included image or sound recording was taken.

X. The Contractor further warrants that the Contractor shall not disclose to any third party, without the express, prior, written approval of the Department, any personally identifiable information about any student. This applies to information which came from any record or report of a Florida public education institution or from any education record which is subject to the Family Educational Rights and Privacy Act, 20 U.S.C. Section 1232g. The terms "record a report" and "student" shall have the meanings prescribed in s. 1002.22(2)(c) and (d), F.S. The term "educational record" shall have the meaning prescribed in 20 U.S.C. Section 1232g(a)(4).

8-27-2021

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

XI. In the event that the Governor and Cabinet are required to impose a mandatory reserve on appropriations, the Department shall amend this Contract to place in reserve the amount determined by the Department of Education to be necessary because of the mandatory reserve. Such amendments may provide for adjustments in the Deliverable products and services as may be necessary.

XII. Intellectual property is subject to following additional provisions:

A. Anything by whatsoever designation it may be known, that is produced by, or developed in connection with, this Contract shall become the exclusive property of the of the State of Florida and may be copyrighted, patented, or otherwise restricted as provided by Florida or federal law. Neither the Contractor nor any individual employed under this Contract shall have any proprietary interest in the product.

B. With respect to each Deliverable that constitutes a work of authorship within the subject matter and scope of U.S. Copyright Law, 17 U.S.C. Sections 102-105, such work shall be a "work for hire" as defined in 17 U.S.C. Section 101 and all copyrights subsisting in such work for hire shall be owned exclusively by the Department pursuant to s. 1006.39, F.S., on behalf the State of Florida.

C. In the event it is determined as a matter of law that any such work is not a "work for hire", Contractor shall immediately assign to the Department all copyrights subsisting therein for the consideration set forth in the Contract and with no additional compensation.

D. The foregoing shall not apply to any preexisting software, or other work of authorship used by Contractor, to create a Deliverable but which exists as a work independently of the Deliverable, unless the preexisting software or work was developed by Contractor pursuant to a previous Contract with the Department or a purchase by the Department under a State Term Contract.

E. The Department shall have full and complete ownership of all software developed pursuant to the Contract including without limitation:

1. The written source code;
2. The source code files;
3. The executable code;
4. The executable code files;
5. The data dictionary;
6. The data flow diagram;
7. The work flow diagram;
8. The entity relationship diagram; and
9. All other documentation needed to enable the Department to support, recreate, revise, repair, or otherwise make use of the software.

XIII. The Department reserves the right, at its option, to issue a change order to delete work tasks reducing the total Contract amount by up to 10%. An addition of work tasks within the scope of the Contract, an increase in the total Contract amount, or a decrease of more than 10% of the total Contract amount, shall be implemented only by a Contract amendment signed by both the Department and the Contractor.

XIV. Pursuant to s. 216.347, F.S., no funds awarded under this Contract may be used for the purpose of lobbying the Legislature, the judicial branch, or a State agency.

XV. The Contractor understands that s. 20.055, F.S., requires every contractor and subcontractor to cooperate with the Department's Inspector General in any investigation, audit, inspection, review, or hearing; and the Contractor shall comply with this requirement. The Contractor shall grant access to all records pertaining to the Contract to the Department's Inspector General, General Counsel and other agency representatives, the State Auditor General, the Office of Program Policy and Government Accountability, and the Chief Financial Officer.

XVI. The Contractor agrees to permit onsite visits by designated Department employees or agents to conduct audits to ensure compliance with Section 20.055, Florida Statutes. These audits may require Department access to records and data, computers and communications devices, and other materials whether owned or operated by the Contractor. Access may include, but is not limited to, user level and/or system level access to any computing or communications device; access to information (electronic, hardcopy, etc) that may be produced, transmitted or stored on the Contractor's equipment or premises; access to work areas; and access to interactively monitor and log traffic on the Contractor's networks.

XVII. The Contractor must carry general liability insurance, which shall include errors and omissions coverage. The amount of coverage shall be a minimum of $1,000,000 or the aggregate total of all contractual agreements between the Contractor and the agencies and political subdivisions of the State of Florida, whichever is greater. The Contractor shall add the Department as an additional insured on the general liability coverage. The insurance shall cover all of the Contractor's operations under this Contract and shall be effective throughout the Term of this Contract, as well as any renewals or extensions thereto. It is not the intent of this Contract to limit the types of insurance otherwise required by this Contract or that the Contractor may desire to obtain or be required to obtain by law. The Contractor must submit a Certificate of Insurance indicating coverage for general liability purposes and additional insured coverage, and shall maintain and pay for same throughout the Term of this Contract. A Certificate of Insurance indicating adequate coverage shall be submitted to the Department prior to the time the Contract is entered. Any and all insurance policies shall be through insurers qualified to do business in Florida.

XVIII. The Contractor agrees to provide the Department upon execution of this Contract with a performance bond or other security deposited with the Department in the total amount of the Contract or another amount if specified in the procurement specifications or Attachment A, guaranteeing that the Contractor will perform all work according to this Contract, within the time and price specified in the Contract. A performance bond shall be issued from a surety company, qualified to do business in Florida.

8-27-2021

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

XIX. The Contractor may not assign or subcontract all or any portion of this Contract without the advance written consent of the Department.

XX. In all cases in which the Contractor, with the advance written consent of the Department, assigns or subcontracts, all or any portion of the Contract:

A. The Contractor shall monitor the subcontractor or assignee and establish controls to avoid or mitigate risks identified by the Department or the Contractor; and

B. The Contractor shall allow the Department to monitor subcontractor or assignee activity and compliance, and the Contractor shall require the subcontractor or assignee to promptly submit to the Department, at the Department's request, complete and accurate documentation pertaining to the subcontract or the Contract.

XXI. The Contractor shall coordinate with and assist the Department's Contract Manager in the performance of the latter's responsibilities, which include without limitation:

A. Monitoring the activities of the Contractor;

B. Receiving and reviewing the reports of the Contractor to determine whether the objectives of the Contract are being accomplished;

C. Receiving and reviewing the invoices for payment of funds to assure that the requirements of the Contract have been met and that payment is appropriate;

D. Evaluating the process used by the Contractor to monitor the activities of any subcontractor or assignee; and

E. Accessing, directly, the subcontractors and assignees, as the Contract Manager deems necessary.

XXII. This Contract may not be modified unless in writing signed by the Department and the Contractor.

XXIII. The Department and the Contractor waive application of the principle of contract construction that ambiguities are to be construed against a contract's drafter, and agree that this Contract is their joint product.

XXIV. The Department and the Contractor acknowledge that they have had their respective attorneys review and approve this Contract or that they have had the opportunity to do so.

XXV. This Contract shall be governed by the laws of the State of Florida, and venue for purposes of any action brought to enforce or construe the Contract shall lie in Leon County, Florida.

XXVI. Failure of the Department to declare any default immediately upon the occurrence or knowledge thereof, or delay in taking any action in connection therewith, does not waive such default. The Department shall have the right to declare any such default at any time and take such action as might be lawful or authorized under the Contract, at law, or in equity. No Department waiver of any term, provision, condition or covenant of the Contract shall be deemed to imply or constitute a further Department waiver of any other term, provision, condition or covenant of the Contract, and no payment by the Department shall be deemed a waiver of any default under the Contract.

XXVII. Time is of the essence with regard to each and every obligation of the Contractor contained in the Contract. Each such obligation is deemed material, and a breach of any such obligation (including a breach resulting from the untimely performance thereof) shall constitute a material breach.

XXVIII. The Contractor shall indemnify and hold harmless the Department, its attorneys, agents and employees, from and against any and all third party claims, suits, debts, damages, and causes of action, whatsoever, whether arising in law or in equity, arising out of or relating to Contractor performance or failure to perform under this Contract. The indemnification shall include reasonable attorney fees and costs incurred by the Department, its attorneys, agents and employees, in the defense of any such claim, suits or causes of action, as aforesaid.

XXIX. This Contract may be cancelled by written agreement of the Department and the Contractor specifically referencing this Contract. Such agreement shall specify the remaining measures necessary to be taken by each party.

XXX. The Department reserves the right to cancel this contract without cause by giving the Contractor thirty (30) days written notice.

XXXI. Should Contractor fail to perform to Contract terms and conditions, Contractor shall be notified in writing, stating the nature of the failure to perform and providing a time certain (which shall be not less than ten (10) days following receipt of such notice) for correcting the failure. Such failure to perform shall otherwise be dealt within accordance with Rule 60A-1.006, F.A.C.

XXXII. A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in s. 287.017, F.S., for CATEGORY TWO for a period of thirty-six (36) months from the date of being placed on the convicted vendor list.

XXXIII. The employment of unauthorized aliens by any contractor is considered a violation of Section 274A(e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation shall be cause for unilateral cancellation of the contract. In addition, pursuant to State of Florida Executive Order No. 11-116, Contractor shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment of all new employees hired by the Contractor during the contract term. Also, Contractor shall include in related subcontracts a requirement that subcontractors performing work or providing services pursuant to the Contract utilize the E-Verify system to verify employment of all new employees hired by the subcontractor during the contract term.

XXXIV. Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion – Lower Tier Covered Transactions

A. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

8-27-2021

B. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal. The Department may cancel this contract if an attached explanation is not acceptable to the Department or the Federal government.

XXXV. MyFloridaMarketPlace

A. MyFloridaMarketplace Vendor Registration

Each Vendor doing business with the State of Florida for the sale of commodities or contractual services as defined in section 287.012, Florida Statutes, shall register in MyFloridaMarketPlace, in compliance with Rule 60A-1.031, Florida Administrative Code, unless exempt under Rule 60A-1.031(3) Florida Administrative Code.

B. MyFloridaMarketplace Transaction Fee

The State of Florida, through the Department of Management Services, has instituted MyFloridaMarketPlace, a statewide eProcurement system. Pursuant to section 287.057(22), Florida Statutes , all payments for commodities and/or contractual services as defined in Section 287.012, Florida Statutes, shall be assessed a Transaction Fee which the Vendor shall pay to the State, unless exempt under Rule 60A-1.031, Florida Administrative Code. Notwithstanding the provisions of Rule 60A-1.031, et seq., the assessment of a transaction fee shall be contingent upon Federal approval of the transaction fee assessment program and continued payment of applicable federal matching funds.

For payments within the State accounting system (FLAIR or its successor), the Transaction Fee shall, when possible, be automatically deducted from payments to the Vendor. If automatic deduction is not possible, the Vendor shall pay the Transaction Fee pursuant to Rule 60A-1.031(2), Florida Administrative Code. By submission of these reports and corresponding payments, Vendor certifies their correctness. All such reports and payments shall be subject to audit by the State or its designee. The Vendor shall receive a credit for any Transaction Fee paid by the Vendor for the purchase of any item(s) if such item(s) are returned to the Vendor through no fault, act, or omission of the Vendor. Notwithstanding the foregoing, a Transaction Fee is non-refundable when an item is rejected or returned, or declined, due to the Vendor's failure to perform or comply with specifications or requirements of the agreement.

Failure to comply with these requirements shall constitute grounds for declaring the Vendor in default and recovering reprocurement costs from the Vendor in addition to all outstanding fees. VENDORS DELINQUENT IN PAYING TRANSACTION FEES MAY BE EXCLUDED FROM CONDUCTING FUTURE BUSINESS WITH THE STATE.

XXXVI. The Contractor shall comply with all applicable Federal, State and County laws, ordinances, rules, and regulations applicable to the Contractor and applicable to its performance under this Contract.

XXXVII. Contractors, providers, and partners employed by the Department or acting on behalf of the Department shall comply with Florida Administrative Code (F.A.C.), and fully comply with all information technology security policies. Contractors, providers, and partners employed by the Department or acting on behalf of the Department shall also fully comply with 60GG-2 Information Technology Standards.

XXXVIII. If this Contract is for goods or services over $1,000,000, this Contract may be terminated at the option of the Department if the Contractor is found to have submitted a false certification as provided under subsection 287.135(5), F.S., been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or been engaged in business operations in Cuba or Syria.

XXXIX. This Contract may be executed in multiple counterparts, each of which shall be deemed to be an original and all of which shall constitute one contract, notwithstanding that all parties are not signatories to the original or the same counterpart, or that signature pages from different counterparts are combined, and the signature of any party to any counterpart shall be deemed to be a signature too and may be appended to any other counterpart.

XXXX. In accordance with Executive Order 20-44, each contractor meeting the following criteria: 1) all entities named in statute with which the agency must form a sole source, public private agreement and 2) all entities that, through contract or other agreement with the State, annually receive 50% or more of their budget from the State or from a combination of State and Federal funds shall provide to the department an annual report in the format required by the department. This report shall detail the total compensation for the entities' executive leadership teams. Total compensation shall include salary, bonuses, cashed in leave, cash equivalents, severance pay, retirement benefits, deferred compensation, real-property gifts, and any other payout. In addition, the grantee shall submit with the annual report the most recent Return of Organization Exempt From Income Tax, Form 990, if applicable, or shall indicate that the contractor is not required to file such Form 990. Contracted entities must inform the Department of any changes in total executive compensation between the annual reports. All compensation reports must indicate what percent of compensation comes directly from the State or Federal allocations to the contracted entity. This report shall be submitted by March 1 of each year. Executive Order 20-44 may be obtained via this link, https://www.flgov.com/wp-content/uploads/orders/2020/EO_20-44.pdf

1. **Definitions.** The definitions contained in s. 60A-1.001, F.A.C. shall apply to this agreement. The following additional terms are also defined:

   (a) "Contract" means the legally enforceable agreement that results from a successful solicitation. The parties to the Contract will be the Customer and Contractor.

   (b) "Customer" means the State agency or other entity identified in a contract as the party to receive commodities or contractual services pursuant to a contract or that orders commodities or contractual services via purchase order or other contractual instrument from the Contractor under the Contract. The "Customer" may also be the "Buyer" as defined in the PUR 1001 if it meets the definition of both terms.

   (c) "Product" means any deliverable under the Contract, which may include commodities, services, technology or software.

   (d) "Purchase order" means the form or format a Customer uses to make a purchase under the Contract (e.g., a formal written purchase order, electronic purchase order, procurement card, contract or other authorized means).

2. **Purchase Orders.** In contracts where commodities or services are ordered by the Customer via purchase order, Contractor shall not deliver or furnish products until a Customer transmits a purchase order. All purchase orders shall bear the Contract or solicitation number, shall be placed by the Customer directly with the Contractor, and shall be deemed to incorporate by reference the Contract and solicitation terms and conditions. Any discrepancy between the Contract terms and the terms stated on the Contractor's order form, confirmation, or acknowledgement shall be resolved in favor of terms most favorable to the Customer. A purchase order for services within the ambit of section 287.058(1) of the Florida Statutes shall be deemed to incorporate by reference the requirements of subparagraphs (a) through (f) thereof. Customers shall designate a contract manager and a contract administrator as required by subsections 287.057(15) and (16) of the Florida Statutes.

3. **Product Version.** Purchase orders shall be deemed to reference a manufacturer's most recently release model or version of the product at the time of the order, unless the Customer specifically requests in writing an earlier model or version and the contractor is willing to provide such model or version.

8-27-2021

4. **Price Changes Applicable only to Term Contracts.** If this is a term contract for commodities or services, the following provisions apply.

   (a) Quantity Discounts. Contractors are urged to offer additional discounts for one time delivery of large single orders. Customers should seek to negotiate additional price concessions on quantity purchases of any products offered under the Contract. State Customers shall document their files accordingly.

   (b) Best Pricing Offer. During the Contract term, if the Customer becomes aware of better pricing offered by the Contractor for substantially the same or a smaller quantity of a product outside the Contract, but upon the same or similar terms of the Contract, then at the discretion of the Customer the price under the Contract shall be immediately reduced to the lower price.

   (c) Sales Promotions. In addition to decreasing prices for the balance of the Contract term due to a change in market conditions, a Contractor may conduct sales promotions involving price reductions for a specified lesser period. A Contractor shall submit to the Contract Specialist documentation identifying the proposed (1) starting and ending dates of the promotion, (2) products involved, and (3) promotional prices compared to then-authorized prices. Promotional prices shall be available to all Customers. Upon approval, the Contractor shall provide conspicuous notice of the promotion.

   (d) Trade-In. Customers may trade-in equipment when making purchases from the Contract. A trade-in shall be negotiated between the Customer and the Contractor. Customers are obligated to actively seek current fair market value when trading equipment, and to keep accurate records of the process. For State agencies, it may be necessary to provide documentation to the Department of Financial Services and to the agency property custodian pursuant to Chapter 273, F.S.

   (e) Equitable Adjustment. The Customer may, in its sole discretion, make an equitable adjustment in the Contract terms or pricing if pricing or availability of supply is affected by extreme and unforeseen volatility in the marketplace, that is, by circumstances that satisfy all the following criteria: (1) the volatility is due to causes wholly beyond the Contractor's control, (2) the volatility affects the marketplace or industry, not just the particular Contract source of supply, (3) the effect on pricing or availability of supply is substantial, and (4) the volatility so affects the Contractor that continued performance of the Contract would result in a substantial loss.

5. **Additional Quantities.** For a period not exceeding ninety (90) days from the date of solicitation award, the Customer reserves the right to acquire additional quantities up to the amount shown on the solicitation but not to exceed the threshold for Category Two at the prices submitted in the response to the solicitation.

6. **Packaging.** Tangible product shall be securely and properly packed for shipment, storage, and stocking in appropriate, clearly labeled, shipping containers and according to accepted commercial practice, without extra charge for packing materials, cases, or other types of containers. All containers and packaging shall become and remain Customer's property.

8-27-202

7. **Inspection at Contractor's Site.** The Customer reserves the right to inspect, at any reasonable time with prior notice, the equipment or product or plant or other facilities of a Contractor to assess conformity with Contract requirements and to determine whether they are adequate and suitable for proper and effective Contract performance.

8. **Safety Standards.** All manufactured items and fabricated assemblies subject to operation under pressure, operation by connection to an electric source, or operation involving connection to a manufactured, natural, or LP gas source shall be constructed and approved in a manner acceptable to the appropriate State inspector. Acceptability customarily requires, at a minimum, identification marking of the appropriate safety standard organization, where such approvals of listings have been established for the type of device offered and furnished, for example: the American Society of Mechanical Engineers for pressure vessels; the Underwriters Laboratories and/or National Electrical Manufacturers' Association for electrically operated assemblies; and the American Gas Association for gas-operated assemblies. In addition, all items furnished shall meet all applicable requirements of the Occupational Safety and Health Act and state and federal requirements relating to clean air and water pollution.

9. **Americans with Disabilities Act.** Contractors should identify any products that may be used or adapted for use by visually, hearing, or other physically impaired individuals.

10. **Literature.** Upon request, the Contractor shall furnish literature reasonably related to the product offered, for example, user manuals, price schedules, catalogs, descriptive brochures, etc.

11. **Transportation and Delivery.** Prices shall include all charges for packing, handling, freight, distribution, and inside delivery. Transportation of goods shall be FOB Destination to any point within thirty (30) days after the Customer places an Order. A Contractor, within five (5) days after receiving a purchase order, shall notify the Customer of any potential delivery delays. Evidence of inability or intentional delays shall be cause for Contract cancellation and Contractor suspension.

12. **Installation.** Where installation is required, Contractor shall be responsible for placing and installing the product in the required locations at no additional charge, unless otherwise designated on the Contract or purchase order. Contractor's authorized product and price list shall clearly and separately identify any additional installation charges. All materials used in the installation shall be of good quality and shall be free of defects that would diminish the appearance of the product or render it structurally or operationally unsound. Installation includes the furnishing of any equipment, rigging, and materials required to install or replace the product in the proper location. Contractor shall protect the site from damage and shall repair damages or injury caused during installation by Contractor or its employees or agents. If any alteration, dismantling, excavation, etc., is required to achieve installation, the Contractor shall promptly restore the structure or site to its original condition. Contractor shall perform installation work so as to cause the least inconvenience and interference with Customers and with proper consideration of others on site. Upon completion of the installation, the location and surrounding area of work shall be left clean and in a neat and unobstructed condition, with everything in satisfactory repair and order.

13. **Risk of Loss.** Matters of inspection and acceptance are addressed in s. 215.422, F.S. Until acceptance, risk of loss or damage shall remain with the Contractor. The Contractor shall be responsible for filing, processing, and collecting all damage claims. To assist the Contractor with damage claims, the Customer shall: record any evidence of visible damage on all copies of the delivering carrier's Bill of Lading; report damages to the carrier and the Contractor; and provide the Contractor with a copy of the

8-27-202

carrier's Bill of Lading and damage inspection report. When a Customer rejects a product, Contractor shall remove it from the premises within ten days after notification or rejection. Upon rejection notification, the risk of loss of rejected or non-conforming product shall remain with the Contractor. Rejected product not removed by the Contractor within ten days shall be deemed abandoned by the Contractor, and the Customer shall have the right to dispose of it as its own property. Contractor shall reimburse the Customer for costs and expenses incurred in storing or effecting removal or disposition of rejected product.

14. **Transaction Fee.** The State of Florida has instituted MyFloridaMarketPlace, a statewide eProcurement System ("System"). Pursuant to section 287.057(23), Florida Statutes (2002), all payments shall be assessed a Transaction Fee of one percent (1.0%), which the Contractor shall pay to the State, unless exempt pursuant to 60A-1.032, F.A.C.

    For payments within the State accounting system (FLAIR or its successor), the Transaction Fee shall, when possible, be automatically deducted from payments to the Contractor. If automatic deduction is not possible, the Contractor shall pay the Transaction Fee pursuant to Rule 60A-1.031(2), F.A.C. By submission of these reports and corresponding payments, Contractor certifies their correctness. All such reports and payments shall be subject to audit by the State or its designee.

    Contractor shall receive a credit for any Transaction Fee paid by the Contractor for the purchase of any item(s) if such item(s) are returned to the Contractor through no fault, act, or omission of the Contractor. Notwithstanding the foregoing, a Transaction Fee is non-refundable when an item is rejected or returned, or declined, due to the Contractor's failure to perform or comply with specifications or requirements of the agreement.

    Failure to comply with these requirements shall constitute grounds for declaring the Contractor in default and recovering reprocurement costs from the Contractor in addition to all outstanding fees. **CONTRACTORS DELINQUENT IN PAYING TRANSACTION FEES MAY BE SUBJECT TO BEING REMOVED FROM THE DEPARTMENT OF MANAGEMENT SERVICES' VENDOR LIST AS PROVIDED IN RULE 60A-1.006, F.A.C.**

15. **Invoicing and Payment.** Invoices shall contain the Contract number, purchase order number if applicable, and the appropriate vendor identification number. The State may require any other information from the Contractor that the State deems necessary to verify any purchase order placed under the Contract.

    At the State's option, Contractors may be required to invoice electronically pursuant to guidelines of the Department of Management Services. Current guidelines require that Contractor supply electronic invoices in lieu of paper-based invoices for those transactions processed through the system. Electronic invoices shall be submitted to the Customer through the Ariba Supplier Network (ASN) in one of the following mechanisms – EDI 810, cXML, or web-based invoice entry within the ASN.

    Payment shall be made in accordance with sections 215.422 and 287.0585 of the Florida Statutes, which govern time limits for payment of invoices. Invoices that must be returned to a Contractor due to preparation errors will result in a delay in payment. Contractors may call (850) 413-7269 Monday through Friday to inquire about the status of payments by State Agencies. The Customer is responsible for all payments under the Contract. A Customer's failure to pay, or delay in payment, shall not constitute a

8-27-202

breach of the Contract and shall not relieve the Contractor of its obligations to the Department or to other Customers.

16. **Taxes.** The State does not pay Federal excise or sales taxes on direct purchases of tangible personal property. The State will not pay for any personal property taxes levied on the Contractor or for any taxes levied on employees' wages. Any exceptions to this paragraph shall be explicitly noted by the Customer in the special contract conditions section of the solicitation or in the Contract or purchase order.

17. **Governmental Restrictions.** If the Contractor believes that any governmental restrictions have been imposed that require alteration of the material, quality, workmanship or performance of the products offered under the Contract, the Contractor shall immediately notify the Customer in writing, indicating the specific restriction. The Customer reserves the right and the complete discretion to accept any such alteration or to cancel the Contract at no further expense to the Customer.

18. **Lobbying and Integrity.** Customers shall ensure compliance with Section 11.062, FS and Section 216.347, FS.The Contractor shall not, in connection with this or any other agreement with the State, directly or indirectly (1) offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for any State officer or employee's decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty, or (2) offer, give, or agree to give to anyone any gratuity for the benefit of, or at the direction or request of, any State officer or employee. For purposes of clause (2), "gratuity" means any payment of more than nominal monetary value in the form of cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, services, employment, or contracts of any kind. Upon request of the Customer's Inspector General, or other authorized State official, the Contractor shall provide any type of information the Inspector General deems relevant to the Contractor's integrity or responsibility. Such information may include, but shall not be limited to, the Contractor's business or financial records, documents, or files of any type or form that refer to or relate to the Contract. The Contractor shall retain such records for the longer of (1) three years after the expiration of the Contract or (2) the period required by the General Records Schedules maintained by the Florida Department of State (available at: http://dos.myflorida.com/library-archives/records-management/general-records-schedules/). The Contractor agrees to reimburse the State for the reasonable costs of investigation incurred by the Inspector General or other authorized State official for investigations of the Contractor's compliance with the terms of this or any other agreement between the Contractor and the State which results in the suspension or debarment of the Contractor. Such costs shall include, but shall not be limited to: salaries of investigators, including overtime; travel and lodging expenses; and expert witness and documentary fees. The Contractor shall not be responsible for any costs of investigations that do not result in the Contractor's suspension or debarment.

19. **Indemnification.** The Contractor shall be fully liable for the actions of its agents, employees, partners, or subcontractors and shall fully indemnify, defend, and hold harmless the State and Customers, and their officers, agents, and employees, from suits, actions, damages, and costs of every name and description, including attorneys' fees, arising from or relating to personal injury and damage to real or personal tangible property alleged to be caused in whole or in part by Contractor, its agents, employees, partners, or subcontractors, provided, however, that the Contractor shall not indemnify for that portion of any loss or damages proximately caused by the negligent act or omission of the State or a Customer.

8-27-202

Further, the Contractor shall fully indemnify, defend, and hold harmless the State and Customers from any suits, actions, damages, and costs of every name and description, including attorneys' fees, arising from or relating to violation or infringement of a trademark, copyright, patent, trade secret or intellectual property right, provided, however, that the foregoing obligation shall not apply to a Customer's misuse or modification of Contractor's products or a Customer's operation or use of Contractor's products in a manner not contemplated by the Contract or the purchase order. If any product is the subject of an infringement suit, or in the Contractor's opinion is likely to become the subject of such a suit, the Contractor may at its sole expense procure for the Customer the right to continue using the product or to modify it to become non-infringing. If the Contractor is not reasonably able to modify or otherwise secure the Customer the right to continue using the product, the Contractor shall remove the product and refund the Customer the amounts paid in excess of a reasonable rental for past use. The customer shall not be liable for any royalties.

The Contractor's obligations under the preceding two paragraphs with respect to any legal action are contingent upon the State or Customer giving the Contractor (1) written notice of any action or threatened action, (2) the opportunity to take over and settle or defend any such action at Contractor's sole expense, and (3) assistance in defending the action at Contractor's sole expense. The Contractor shall not be liable for any cost, expense, or compromise incurred or made by the State or Customer in any legal action without the Contractor's prior written consent, which shall not be unreasonably withheld.

20. **Limitation of Liability.** For all claims against the Contractor under any contract or purchase order, and regardless of the basis on which the claim is made, the Contractor's liability under a contract or purchase order for direct damages shall be limited to the greater of $100,000, the dollar amount of the contract or purchase order, or two times the charges rendered by the Contractor under the purchase order. This limitation shall not apply to claims arising under the Indemnity paragraph contain in this agreement.

    Unless otherwise specifically enumerated in the Contract or in the purchase order, no party shall be liable to another for special, indirect, punitive, or consequential damages, including lost data or records (unless the contract or purchase order requires the Contractor to back-up data or records), even if the party has been advised that such damages are possible. No party shall be liable for lost profits, lost revenue, or lost institutional operating savings. The State and Customer may, in addition to other remedies available to them at law or equity and upon notice to the Contractor, retain such monies from amounts due Contractor as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted by or against them. The State may set off any liability or other obligation of the Contractor or its affiliates to the State against any payments due the Contractor under any contract with the State.

21. **Suspension of Work.** The Customer may in its sole discretion suspend any or all activities under the Contract or purchase order, at any time, when in the best interests of the State to do so. The Customer shall provide the Contractor written notice outlining the particulars of suspension. Examples of the reason for suspension include, but are not limited to, budgetary constraints, declaration of emergency, or other such circumstances. After receiving a suspension notice, the Contractor shall comply with the notice and shall not accept any purchase orders. Within ninety days, or any longer period agreed to by the Contractor, the Customer shall either (1) issue a notice authorizing resumption of work, at which time activity shall resume, or (2) terminate the Contract or purchase order. Suspension of work shall not entitle the Contractor to any additional compensation.

8-27-24

22. **Termination for Convenience.** The Customer, by written notice to the Contractor, may terminate the Contract in whole or in part when the Customer determines in its sole discretion that it is in the State's interest to do so. The Contractor shall not furnish any product after it receives the notice of termination, except as necessary to complete the continued portion of the Contract, if any. The Contractor shall not be entitled to recover any cancellation charges or lost profits.

23. **Termination for Cause.** The Customer may terminate the Contract if the Contractor fails to (1) deliver the product within the time specified in the Contract or any extension, (2) maintain adequate progress, thus endangering performance of the Contract, (3) honor any term of the Contract, or (4) abide by any statutory, regulatory, or licensing requirement. Rule 60A-1.006(3), F.A.C., governs the procedure and consequences of default. The Contractor shall continue work on any work not terminated. Except for defaults of subcontractors at any tier, the Contractor shall not be liable for any excess costs if the failure to perform the Contract arises from events completely beyond the control, and without the fault or negligence, of the Contractor. If the failure to perform is caused by the default of a subcontractor at any tier, and if the cause of the default is completely beyond the control of both the Contractor and the subcontractor, and without the fault or negligence of either, the Contractor shall not be liable for any excess costs for failure to perform, unless the subcontracted products were obtainable from other sources in sufficient time for the Contractor to meet the required delivery schedule. If, after termination, it is determined that the Contractor was not in default, or that the default was excusable, the rights and obligations of the parties shall be the same as if the termination had been issued for the convenience of the Customer. The rights and remedies of the Customer in this clause are in addition to any other rights and remedies provided by law or under the Contract.

24. **Force Majeure, Notice of Delay, and No Damages for Delay.** The Contractor shall not be responsible for delay resulting from its failure to perform if neither the fault nor the negligence of the Contractor or its employees or agents contributed to the delay and the delay is due directly to acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond the Contractor's control, or for any of the foregoing that affect subcontractors or suppliers if no alternate source of supply is available to the Contractor. In case of any delay the Contractor believes is excusable, the Contractor shall notify the Customer in writing of the delay or potential delay and describe the cause of the delay either (1) within ten (10) days after the cause that creates or will create the delay first arose, if the Contractor could reasonably foresee that a delay could occur as a result, or (2) if delay is not reasonably foreseeable, within five (5) days after the date the Contractor first had reason to believe that a delay could result. **THE FOREGOING SHALL CONSTITUTE THE CONTRACTOR'S SOLE REMEDY OR EXCUSE WITH RESPECT TO DELAY.** Providing notice in strict accordance with this paragraph is a condition precedent to such remedy. No claim for damages, other than for an extension of time, shall be asserted against the Customer. The Contractor shall not be entitled to an increase in the Contract price or payment of any kind from the Customer for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency, arising because of delay, disruption, interference, or hindrance from any cause whatsoever. If performance is suspended or delayed, in whole or in part, due to any of the causes described in this paragraph, after the causes have ceased to exist the Contractor shall perform at no increased cost, unless the Customer determines, in its sole discretion, that the delay will significantly impair the value of the Contract to the State or to Customers, in which case the Customer may (1) accept allocated performance or deliveries from the Contractor, provided that the Contractor grants preferential treatment to Customers with respect to products subjected to allocation, or (2) purchase from other sources (without recourse to and by the Contractor for the related costs and expenses) to replace all or part of the products that are the subject

8-27-2021

of the delay, which purchases may be deducted from the Contract quantity, or (3) terminate the Contract in whole or in part.

25. **Changes.** The Customer may unilaterally require, by written order, changes altering, adding to, or deducting from the Contract specifications, provided that such changes are within the general scope of the Contract. The Customer may make an equitable adjustment in the Contract price or delivery date if the change affects the cost or time of performance. Such equitable adjustments require the written consent of the Contractor, which shall not be unreasonably withheld. If unusual quantity requirements arise, the Customer may solicit separate bids to satisfy them.

26. **Renewal.** Upon mutual agreement, the Customer and the Contractor may renew the Contract, in whole or in part, for a period that may not exceed 3 years or the term of the contract, whichever period is longer. Any renewal shall specify the renewal price, as set forth in the solicitation response. The renewal must be in writing and signed by both parties, and is contingent upon satisfactory performance evaluations and subject to availability of funds.

27. **Purchase Order Duration.** Purchase orders issued pursuant to a state term or agency contract must be received by the Contractor no later than close of business on the last day of the contract's term to be considered timely. The Contractor is obliged to fill those orders in accordance with the contract's terms and conditions. Purchase orders received by the contractor after close of business on the last day of the state term or agency contract's term shall be considered void.

    Purchase orders for a one-time delivery of commodities or performance of contractual services shall be valid through the performance by the Contractor, and all terms and conditions of the state term or agency contract shall apply to the single delivery/performance, and shall survive the termination of the Contract.

    Contractors are required to accept purchase orders specifying delivery schedules exceeding the contracted schedule even when such extended delivery will occur after expiration of the state term or agency contract. For example, if a state term contract calls for delivery 30 days after receipt of order (ARO), and an order specifies delivery will occur both in excess of 30 days ARO and after expiration of the state term contract, the Contractor will accept the order. However, if the Contractor expressly and in writing notifies the ordering office within ten (10) calendar days of receipt of the purchase order that Contractor will not accept the extended delivery terms beyond the expiration of the state term contract, then the purchase order will either be amended in writing by the ordering entity within ten (10) calendar days of receipt of the contractor's notice to reflect the state term contract delivery schedule, or it shall be considered withdrawn.

    The duration of purchase orders for recurring deliveries of commodities or performance of services shall not exceed the expiration of the state term or agency contract by more than twelve months. However, if an extended pricing plan offered in the state term or agency contract is selected by the ordering entity, the contract terms on pricing plans and renewals shall govern the maximum duration of purchase orders reflecting such pricing plans and renewals.

    Timely purchase orders shall be valid through their specified term and performance by the Contractor, and all terms and conditions of the state term or agency contract shall apply to the recurring delivery/performance as provided herein, and shall survive the termination of the Contract.

8-27-2

Ordering offices shall not renew a purchase order issued pursuant to a state term or agency contract if the underlying contract expires prior to the effective date of the renewal.

28. **Advertising.** Subject to Chapter 119, Florida Statutes, the Contractor shall not publicly disseminate any information concerning the Contract without prior written approval from the Customer, including, but not limited to mentioning the Contract in a press release or other promotional material, identifying the Customer or the State as a reference, or otherwise linking the Contractor's name and either a description of the Contract or the name of the State or the Customer in any material published, either in print or electronically, to any entity that is not a party to Contract, except potential or actual authorized distributors, dealers, resellers, or service representative.

29. **Assignment.** The Contractor shall not sell, assign or transfer any of its rights, duties or obligations under the Contract, or under any purchase order issued pursuant to the Contract, without the prior written consent of the Customer. In the event of any assignment, the Contractor remains secondarily liable for performance of the contract, unless the Customer expressly waives such secondary liability. The Customer may assign the Contract with prior written notice to Contractor of its intent to do so.

30. **Antitrust Assignment.** The Contractor and the State of Florida recognize that in actual economic practice, overcharges resulting from antitrust violations are in fact usually borne by the State of Florida. Therefore, the contractor hereby assigns to the State of Florida any and all claims for such overcharges as to goods, materials or services purchased in connection with the Contract.

31. **Dispute Resolution.** Any dispute concerning performance of the Contract shall be decided by the Customer's designated contract manager, who shall reduce the decision to writing and serve a copy on the Contractor. The decision shall be final and conclusive unless within twenty one (21) days from the date of receipt, the Contractor files with the Customer a petition for administrative hearing. The Customer's decision on the petition shall be final, subject to the Contractor's right to review pursuant to Chapter 120 of the Florida Statutes. Exhaustion of administrative remedies is an absolute condition precedent to the Contractor's ability to pursue any other form of dispute resolution; provided, however, that the parties may employ the alternative dispute resolution procedures outlined in Chapter 120.

    Without limiting the foregoing, the exclusive venue of any legal or equitable action that arises out of or relates to the Contract shall be the appropriate state court in Leon County, Florida; in any such action, Florida law shall apply and the parties waive any right to jury trial.

32. **Employees, Subcontractors, and Agents.** All Contractor employees, subcontractors, or agents performing work under the Contract shall be properly trained technicians who meet or exceed any specified training qualifications. Upon request, Contractor shall furnish a copy of technical certification or other proof of qualification. All employees, subcontractors, or agents performing work under the Contract must comply with all security and administrative requirements of the Customer and shall comply with all controlling laws and regulations relevant to the services they are providing under the Contract. The State may conduct, and the Contractor shall cooperate in, a security background check or otherwise assess any employee, subcontractor, or agent furnished by the Contractor. The State may refuse access to, or require replacement of, any personnel for cause, including, but not limited to, technical or training qualifications, quality of work, change in security status, or non-compliance with a Customer's security or other requirements. Such approval shall not relieve the Contractor of its obligation to perform all work

8-27-202

in compliance with the Contract. The State may reject and bar from any facility for cause any of the Contractor's employees, subcontractors, or agents.

33. **Security and Confidentiality.** The Contractor shall comply fully with all security procedures of the United States, State of Florida and Customer in performance of the Contract. The Contractor shall not divulge to third parties any confidential information obtained by the Contractor or its agents, distributors, resellers, subcontractors, officers or employees in the course of performing Contract work, including, but not limited to, security procedures, business operations information, or commercial proprietary information in the possession of the State or Customer. The Contractor shall not be required to keep confidential information or material that is publicly available through no fault of the Contractor, material that the Contractor developed independently without relying on the State's or Customer's confidential information, or material that is otherwise obtainable under State law as a public record. To insure confidentiality, the Contractor shall take appropriate steps as to its personnel, agents, and subcontractors. The warranties of this paragraph shall survive the Contract.

34. **Contractor Employees, Subcontractors, and Other Agents.** The Customer and the State shall take all actions necessary to ensure that Contractor's employees, subcontractors and other agents are not employees of the State of Florida. Such actions include, but are not limited to, ensuring that Contractor's employees, subcontractors, and other agents receive benefits and necessary insurance (health, workers' compensations, and unemployment) from an employer other than the State of Florida.

35. **Insurance Requirements.** During the Contract term, the Contractor at its sole expense shall provide commercial insurance of such a type and with such terms and limits as may be reasonably associated with the Contract. Providing and maintaining adequate insurance coverage is a material obligation of the Contractor. Upon request, the Contractor shall provide certificate of insurance. The limits of coverage under each policy maintained by the Contractor shall not be interpreted as limiting the Contractor's liability and obligations under the Contract. All insurance policies shall be through insurers authorized or eligible to write policies in Florida.

36. **Warranty of Authority.** Each person signing the Contract warrants that he or she is duly authorized to do so and to bind the respective party to the Contract.

37. **Warranty of Ability to Perform.** The Contractor warrants that, to the best of its knowledge, there is no pending or threatened action, proceeding, or investigation, or any other legal or financial condition, that would in any way prohibit, restrain, or diminish the Contractor's ability to satisfy its Contract obligations. The Contractor warrants that neither it nor any affiliate is currently on the convicted vendor list maintained pursuant to section 287.133 of the Florida Statutes, or on any similar list maintained by any other state or the federal government. The Contractor shall immediately notify the Customer in writing if its ability to perform is compromised in any manner during the term of the Contract.

38. **Notices.** All notices required under the Contract shall be delivered by certified mail, return receipt requested, by reputable air courier service, or by personal delivery to the agency designee identified in the original solicitation, or as otherwise identified by the Customer. Notices to the Contractor shall be delivered to the person who signs the Contract. Either designated recipient may notify the other, in writing, if someone else is designated to receive notice.

8-27-20

39. **Leases and Installment Purchases.** Prior approval of the Chief Financial Officer (as defined in Section 17.001, F.S.) is required for State agencies to enter into or to extend any lease or installment-purchase agreement in excess of the Category Two amount established by section 287.017 of the Florida Statutes.

40. **Prison Rehabilitative Industries and Diversified Enterprises, Inc. (PRIDE).** Section 946.515(2), F.S. requires the following statement to be included in the solicitation: "It is expressly understood and agreed that any articles which are the subject of, or required to carry out, the Contract shall be purchased from the corporation identified under Chapter 946 of the Florida Statutes (PRIDE) in the same manner and under the same procedures set forth in section 946.515(2) and (4) of the Florida Statutes; and for purposes of the Contract the person, firm, or other business entity carrying out the provisions of the Contract shall be deemed to be substituted for the agency insofar as dealings with such corporation are concerned." Additional information about PRIDE and the products it offers is available at http://www.pridefl.com.

41. **Products Available from the Blind or Other Handicapped.** Section 413.036(3), F.S. requires the following statement to be included in the solicitation: "It is expressly understood and agreed that any articles that are the subject of, or required to carry out, this contract shall be purchased from a nonprofit agency for the Blind or for the Severely Handicapped that is qualified pursuant to Chapter 413, Florida Statutes, in the same manner and under the same procedures set forth in section 413.036(1) and (2), Florida Statutes; and for purposes of this contract the person, firm, or other business entity carrying out the provisions of this contract shall be deemed to be substituted for the State agency insofar as dealings with such qualified nonprofit agency are concerned." Additional information about the designated nonprofit agency and the products it offers is available at http://www.respectofflorida.org.

42. **Modification of Terms.** The Contract contains all the terms and conditions agreed upon by the parties, which terms and conditions shall govern all transactions between the Customer and the Contractor. The Contract may only be modified or amended upon mutual written agreement of the Customer and the Contractor. No oral agreements or representations shall be valid or binding upon the Customer or the Contractor. No alteration or modification of the Contract terms, including substitution of product, shall be valid or binding against the Customer. The Contractor may not unilaterally modify the terms of the Contract by affixing additional terms to product upon delivery (e.g., attachment or inclusion of standard preprinted forms, product literature, "shrink wrap" terms accompanying or affixed to a product, whether written or electronic) or by incorporating such terms onto the Contractor's order or fiscal forms or other documents forwarded by the Contractor for payment. The Customer's acceptance of product or processing of documentation on forms furnished by the Contractor for approval or payment shall not constitute acceptance of the proposed modification to terms and conditions.

43. **Cooperative Purchasing.** Pursuant to their own governing laws, and subject to the agreement of the Contractor, other entities may be permitted to make purchases at the terms and conditions contained herein. Non-Customer purchases are independent of the agreement between Customer and Contractor, and Customer shall not be a party to any transaction between the Contractor and any other purchaser.

    State agencies wishing to make purchases from this agreement are required to follow the provisions of s. 287.042(16)(a), F.S. This statute requires the Department of Management Services to determine that the requestor's use of the contract is cost-effective and in the best interest of the State.

8-27-202

44. **Waiver.** The delay or failure by the Customer to exercise or enforce any of its rights under this Contract shall not constitute or be deemed a waiver of the Customer's right thereafter to enforce those rights, nor shall any single or partial exercise of any such right preclude any other or further exercise thereof or the exercise of any other right.

45. **Annual Appropriations.** The State's performance and obligation to pay under this contract are contingent upon an annual appropriation by the Legislature.

46. **Execution in Counterparts.** The Contract may be executed in counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

Severability. If a court deems any provision of the Contract void or unenforceable, that provision shall be enforced only to the extent that it is not in violation of law or is not otherwise unenforceable and all other provisions shall remain in full force and effect.

State of Florida
PUR 1001
General Instructions to Respondents

Contents

1. Definitions.
2. General Instructions.
3. Electronic Submission of Responses.
4. Terms and Conditions.
5. Questions.
6. Conflict of Interest.
7. Convicted Vendors.
8. Discriminatory Vendors.
9. Respondent's Representation and Authorization.
10. Manufacturer's Name and Approved Equivalents.
11. Performance Qualifications.
12. Public Opening.
13. Electronic Posting of Notice of Intended Award.
14. Firm Response.
15. Clarifications/Revisions.
16. Minor Irregularities/Right to Reject.
17. Contract Formation.
18. Contract Overlap.
19. Public Records.
20. Protests.
21. Limitation on Vendor Contact with Agency During Solicitation Period

1. **Definitions.** The definitions found in s. 60A-1.001, F.A.C. shall apply to this agreement. The following additional terms are also defined:

(a) "Buyer" means the entity that has released the solicitation. The "Buyer" may also be the "Customer" as defined in the PUR 1000 if that entity meets the definition of both terms.

(b) "Procurement Officer" means the Buyer's contracting personnel, as identified in the Introductory Materials.

(c) "Respondent" means the entity that submits materials to the Buyer in accordance with these Instructions.

(d) "Response" means the material submitted by the respondent in answering the solicitation.

INITIAL: _____

8-27-2021

(e) "Timeline" means the list of critical dates and actions included in the Introductory Materials.

2. **General Instructions.** Potential respondents to the solicitation are encouraged to carefully review all the materials contained herein and prepare responses accordingly.

3. **Electronic Submission of Responses.** Respondents are required to submit responses electronically. For this purpose, all references herein to signatures, signing requirements, or other required acknowledgments hereby include electronic signature by means of clicking the "Submit Response" button (or other similar symbol or process) attached to or logically associated with the response created by the respondent within MyFloridaMarketPlace. The respondent agrees that the action of electronically submitting its response constitutes:

   - an electronic signature on the response, generally,
   - an electronic signature on any form or section specifically calling for a signature, and
   - an affirmative agreement to any statement contained in the solicitation that requires a definite confirmation or acknowledgement.

4. **Terms and Conditions.** All responses are subject to the terms of the following sections of this solicitation, which, in case of conflict, shall have the order of precedence listed:

   - Technical Specifications,
   - Special Conditions and Instructions,
   - Instructions to Respondents (PUR 1001),
   - General Conditions (PUR 1000), and
   - Introductory Materials.

   The Buyer objects to and shall not consider any additional terms or conditions submitted by a respondent, including any appearing in documents attached as part of a respondent's response. In submitting its response, a respondent agrees that any additional terms or conditions, whether submitted intentionally or inadvertently, shall have no force or effect. Failure to comply with terms and conditions, including those specifying information that must be submitted with a response, shall be grounds for rejecting a response.

5. **Questions.** Respondents shall address all questions regarding this solicitation to the Procurement Officer. Questions must be submitted via the Q&A Board within MyFloridaMarketPlace and must be RECEIVED NO LATER THAN the time and date reflected on the Timeline. Questions shall be answered in accordance with the Timeline. All questions submitted shall be published and answered in a manner that all respondents will be able to view. Respondents shall not contact any other employee of the Buyer or the State for information with respect to this solicitation. Each respondent is responsible for monitoring

8-27-2021

the MyFloridaMarketPlace site for new or changing information. The Buyer shall not be bound by any verbal information or by any written information that is not contained within the solicitation documents or formally noticed and issued by the Buyer's contracting personnel. Questions to the Procurement Officer or to any Buyer personnel shall not constitute formal protest of the specifications or of the solicitation, a process addressed in paragraph 19 of these Instructions.

6. **Conflict of Interest.** This solicitation is subject to chapter 112 of the Florida Statutes. Respondents shall disclose with their response the name of any officer, director, employee or other agent who is also an employee of the State. Respondents shall also disclose the name of any State employee who owns, directly or indirectly, an interest of five percent (5%) or more in the respondent or its affiliates.

7. **Convicted Vendors.** A person or affiliate placed on the convicted vendor list following a conviction for a public entity crime is prohibited from doing any of the following for a period of 36 months from the date of being placed on the convicted vendor list:

   - submitting a bid on a contract to provide any goods or services to a public entity;
   - submitting a bid on a contract with a public entity for the construction or repair of a public building or public work;
   - submitting bids on leases of real property to a public entity;
   - being awarded or performing work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and
   - transacting business with any public entity in excess of the Category Two threshold amount ($25,000) provided in section 287.017 of the Florida Statutes.

8. **Discriminatory Vendors.** An entity or affiliate placed on the discriminatory vendor list pursuant to section 287.134 of the Florida Statutes may not:

   - submit a bid on a contract to provide any goods or services to a public entity;
   - submit a bid on a contract with a public entity for the construction or repair of a public building or public work;
   - submit bids on leases of real property to a public entity;
   - be awarded or perform work as a contractor, supplier, sub-contractor, or consultant under a contract with any public entity; or
   - transact business with any public entity.

9. **Respondent's Representation and Authorization.** In submitting a response, each respondent understands, represents, and acknowledges the following (if the respondent cannot so certify to any of following, the respondent shall submit with its response a written explanation of why it cannot do so).

8-27-2021

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

- The respondent is not currently under suspension or debarment by the State or any other governmental authority.

- To the best of the knowledge of the person signing the response, the respondent, its affiliates, subsidiaries, directors, officers, and employees are not currently under investigation by any governmental authority and have not in the last ten (10) years been convicted or found liable for any act prohibited by law in any jurisdiction, involving conspiracy or collusion with respect to bidding on any public contract.

- Respondent currently has no delinquent obligations to the State, including a claim by the State for liquidated damages under any other contract.

- The submission is made in good faith and not pursuant to any agreement or discussion with, or inducement from, any firm or person to submit a complementary or other noncompetitive response.

- The prices and amounts have been arrived at independently and without consultation, communication, or agreement with any other respondent or potential respondent; neither the prices nor amounts, actual or approximate, have been disclosed to any respondent or potential respondent, and they will not be disclosed before the solicitation opening.

- The respondent has fully informed the Buyer in writing of all convictions of the firm, its affiliates (as defined in section 287.133(1)(a) of the Florida Statutes), and all directors, officers, and employees of the firm and its affiliates for violation of state or federal antitrust laws with respect to a public contract for violation of any state or federal law involving fraud, bribery, collusion, conspiracy or material misrepresentation with respect to a public contract. This includes disclosure of the names of current employees who were convicted of contract crimes while in the employ of another company.

- Neither the respondent nor any person associated with it in the capacity of owner, partner, director, officer, principal, investigator, project director, manager, auditor, or position involving the administration of federal funds:

    - Has within the preceding three years been convicted of or had a civil judgment rendered against them or is presently indicted for or otherwise criminally or civilly charged for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a federal, state, or local government transaction or public contract; violation of federal or state antitrust statutes; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property; or

    - Has within a three-year period preceding this certification had one or more federal, state, or local government contracts terminated for cause or default.

- The product offered by the respondent will conform to the specifications without exception.

- The respondent has read and understands the Contract terms and conditions, and the submission is made in conformance with those terms and conditions.

8-27-2021

- If an award is made to the respondent, the respondent agrees that it intends to be legally bound to the Contract that is formed with the State.

- The respondent has made a diligent inquiry of its employees and agents responsible for preparing, approving, or submitting the response, and has been advised by each of them that he or she has not participated in any communication, consultation, discussion, agreement, collusion, act or other conduct inconsistent with any of the statements and representations made in the response.

- The respondent shall indemnify, defend, and hold harmless the Buyer and its employees against any cost, damage, or expense which may be incurred or be caused by any error in the respondent's preparation of its bid.

- All information provided by, and representations made by, the respondent are material and important and will be relied upon by the Buyer in awarding the Contract. Any misstatement shall be treated as fraudulent concealment from the Buyer of the true facts relating to submission of the bid. A misrepresentation shall be punishable under law, including, but not limited to, Chapter 817 of the Florida Statutes.

10. **Manufacturer's Name and Approved Equivalents.** Unless otherwise specified, any manufacturers' names, trade names, brand names, information or catalog numbers listed in a specification are descriptive, not restrictive. With the Buyer's prior approval, the Contractor may provide any product that meets or exceeds the applicable specifications. The Contractor shall demonstrate comparability, including appropriate catalog materials, literature, specifications, test data, etc. The Buyer shall determine in its sole discretion whether a product is acceptable as an equivalent.

11. **Performance Qualifications.** The Buyer reserves the right to investigate or inspect at any time whether the product, qualifications, or facilities offered by Respondent meet the Contract requirements. Respondent shall at all times during the Contract term remain responsive and responsible. In determining Respondent's responsibility as a vendor, the agency shall consider all information or evidence which is gathered or comes to the attention of the agency which demonstrates the Respondent's capability to fully satisfy the requirements of the solicitation and the contract.

    Respondent must be prepared, if requested by the Buyer, to present evidence of experience, ability, and financial standing, as well as a statement as to plant, machinery, and capacity of the respondent for the production, distribution, and servicing of the product bid. If the Buyer determines that the conditions of the solicitation documents are not complied with, or that the product proposed to be furnished does not meet the specified requirements, or that the qualifications, financial standing, or facilities are not satisfactory, or that performance is untimely, the Buyer may reject the response or terminate the Contract. Respondent may be disqualified from receiving awards if respondent, or anyone in respondent's employment, has previously failed to perform satisfactorily in connection with public bidding or contracts. This paragraph shall not mean or imply that it is obligatory upon the Buyer to make an investigation either before or after award of the Contract, but should the Buyer elect to do so, respondent is not relieved from fulfilling all Contract requirements.

8-27-2021

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

12. **Public Opening.** Responses shall be opened on the date and at the location indicated on the Timeline. Respondents may, but are not required to, attend. The Buyer may choose not to announce prices or release other materials pursuant to s. 119.071(1)(b), Florida Statutes. Any person requiring a special accommodation because of a disability should contact the Procurement Officer at least five (5) workdays prior to the solicitation opening. If you are hearing or speech impaired, please contact the Buyer by using the Florida Relay Service at (800) 955-8771 (TDD).

13. **Electronic Posting of Notice of Intended Award.** Based on the evaluation, on the date indicated on the Timeline the Buyer shall electronically post a notice of intended award at http://www.myflorida.com/apps/vbs/vbs_www.main_menu. If the notice of award is delayed, in lieu of posting the notice of intended award the Buyer shall post a notice of the delay and a revised date for posting the notice of intended award. Any person who is adversely affected by the decision shall file with the Buyer a notice of protest within 72 hours after the electronic posting. The Buyer shall not provide tabulations or notices of award by telephone.

14. **Firm Response.** The Buyer may make an award within sixty (60) days after the date of the opening, during which period responses shall remain firm and shall not be withdrawn. If award is not made within sixty (60) days, the response shall remain firm until either the Buyer awards the Contract or the Buyer receives from the respondent written notice that the response is withdrawn. Any response that expresses a shorter duration may, in the Buyer's sole discretion, be accepted or rejected.

15. **Clarifications/Revisions.** Before award, the Buyer reserves the right to seek clarifications or request any information deemed necessary for proper evaluation of submissions from all respondents deemed eligible for Contract award. Failure to provide requested information may result in rejection of the response.

16. **Minor Irregularities/Right to Reject.** The Buyer reserves the right to accept or reject any and all bids, or separable portions thereof, and to waive any minor irregularity, technicality, or omission if the Buyer determines that doing so will serve the State's best interests. The Buyer may reject any response not submitted in the manner specified by the solicitation documents.

17. **Contract Formation.** The Buyer shall issue a notice of award, if any, to successful respondent(s), however, no contract shall be formed between respondent and the Buyer until the Buyer signs the Contract. The Buyer shall not be liable for any costs incurred by a respondent in preparing or producing its response or for any work performed before the Contract is effective.

18. **Contract Overlap.** Respondents shall identify any products covered by this solicitation that they are currently authorized to furnish under any state term contract. By entering into the Contract, a Contractor authorizes the Buyer to eliminate duplication between agreements in the manner the Buyer deems to be in its best interest.

19. **Public Records.** Article 1, section 24, Florida Constitution, guarantees every person access to all public records, and Section 119.011, Florida Statutes, provides a broad definition of public record. As such, all responses to a competitive solicitation are public records unless exempt by law. Any respondent claiming that its response contains information that is exempt from the public records law shall clearly segregate and mark that information and provide the specific statutory citation for such exemption.

8-27-202

20. **Protests.** Any protest concerning this solicitation shall be made in accordance with sections 120.57(3) and 287.042(2) of the Florida Statutes and chapter 28-110 of the Florida Administrative Code. Questions to the Procurement Officer shall not constitute formal notice of a protest. It is the Buyer's intent to ensure that specifications are written to obtain the best value for the State and that specifications are written to ensure competitiveness, fairness, necessity and reasonableness in the solicitation process.

    Section 120.57(3)(b), F.S. and Section 28-110.003, Fla. Admin. Code require that a notice of protest of the solicitation documents shall be made within seventy-two hours after the posting of the solicitation.

    Section 120.57(3)(a), F.S. requires the following statement to be included in the solicitation: "Failure to file a protest within the time prescribed in section 120.57(3), Florida Statutes, shall constitute a waiver of proceedings under Chapter 120, Florida Statutes."

    Section 28-110.005, Fla. Admin. Code requires the following statement to be included in the solicitation: "Failure to file a protest within the time prescribed in Section 120.57(3), Florida Statutes, or failure to post the bond or other security required by law within the time allowed for filing a bond shall constitute a waiver of proceedings under Chapter 120, Florida Statutes."

21. **Limitation on Vendor Contact with Agency During Solicitation Period**. Respondents to this solicitation or persons acting on their behalf may not contact, between the release of the solicitation and the end of the 72-hour period following the agency posting the notice of intended award, excluding Saturdays, Sundays, and state holidays, any employee or officer of the executive or legislative branch concerning any aspect of this solicitation, except in writing to the procurement officer or as provided in the solicitation documents. Violation of this provision may be grounds for rejecting a response.

RE: ITB #2022-01, PUR-1001 & PUR-1000

Dear Ms. Wimberly:

In the event of any conflict between Form PUR 1001 and other instructions provided in the ITB 2022-01 document, the additional instructions in that document shall take precedence over the Form PUR 1001 unless the conflicting term is required by any section of the Florida Statutes, in which case the statutory requirements shall take precedence.

In the event of any conflict between Form PUR 1000 and any other Special Conditions, the Special Conditions shall take precedence over Form PUR 1000 unless the conflicting term in the PUR form is required by any section of the Florida Statutes, in which case the term contained in Form PUR 1000 shall take precedence.

Matthews Bus Alliance, Inc. acknowledges both PUR-1001 and PUR-1000.

Respectfully submitted,

Glenn Matthews
President

RE: ITB #2022-01, MBA Footnotes

Dear Ms. Wimberly:

MBA Footnotes 2022-01

1. Straight Floor option requires Air Ride Rear Suspension and low profile tires (C10). *Note: Does not include track seating or floor track.*
2. 100 gallon tanks in some Type C configurations may require option C10 air ride suspension due to option content. 100 Gallon tank may affect availability of thru luggage compartments. Please consult dealer to confirm compatibility of these options prior to issuing Purchase Order(s).
3. When ordering under-seat rear heaters for lift configurations customer should consult dealer. Heater's location and size (40,000 BTU rear wall mount) may be only possible location for the rear heater.
4. Propane Engine option is only available on 65, 71 and 77 passenger buses with or without wheelchair lifts. *Example wheel base: 219", 238", 259" & 279"*
5. To order the track seating option you must order the flat floor option.
6. S.T.A.R.S. mounting replaces the standard w/c tie down positions and adds 2 seats per position. S.T.A.R.S. without seats leaves the w/c positions empty (phantom seats). Additional tie downs can be purchased thru the parts department.
7. For a tie in dash AC system on C2 29-77 passenger, no price change and 5 year standard warranty.
8. Propane buses have A/C system included with 270 amp alternator.
9. Jouley electric has an A/C system of AC-121133T 126k BTU-Free Blow system.
10. ISO – first 3 rows are standard. Additional ISO latch seats may reduce the capacity. Please consult.

RE: ITB #2022-01, Conflict of Interest and Disclosure

Dear Ms. Wimberly:

Matthews Bus Alliance, Inc., certifies that no officer, director, employee or agent is also an employee of any State of Florida agency. In addition, it has been determined that, to the best of our knowledge, no Florida State employee owns, directly or indirectly, an interest of five percent (5%) or more in Matthews Bus Alliance, Inc., or any of its branches or affiliates.

Matthews Bus Alliance, Inc. does not retain the services of any state employee, agent, lobbyist, previous employees of the Department, or any other person who has received or will receive compensation of any kind, or who has registered or is required to register under 112.3215 Florida Statutes, in seeking to influence the actions of the Department in connection with ITB #2022-01.

Respectfully submitted,

Glenn Matthews

RE: ITB #2022-01, Diagnostic Software

Dear Ms. Wimberly:

Matthews Bus Alliance, Inc. is offering diagnostic software tools (for communication between bus and computer) as optional equipment. However, please note that Thomas Bus body and chassis software (except Allison Transmission and Engine Specific Software) will be provided online for each district purchasing a Thomas Built Bus. This is available with a simple online registration for each user and administered by your Thomas Dealer and will include site registration only and not a diagnostic reader or communication tool.

Detroit Diesel and Cummins engines also include a 5 year subscription to their virtual technician platform.

Please feel free to contact me with any questions regarding this matter.

Respectfully submitted,

Glenn Matthews
President

RE: ITB #2022-01, Bus Warranty

Dear Ms. Wimberly:

This letter is to specify that all buses supplied via Florida ITB 2022-01 will be provided with a limited 5 year bumper-to-bumper chassis & body warranty. This limited warranty covers all components with exception to normal wear and tear consumable items which include but are not limited to: tires, batteries, belts, hoses, brake lining material, seals and items covered by specified extended warranties as stated in the Florida 2022-01 specifications, Revised 2020.

Note: Limited Rifled Air Conditioning (RAC) A/C Systems as listed on the Additional Optional Air-Conditioning Pricing Pages include a 6 year warranty with the exception of the two compressor tie in system which carries a standard 5 year warranty. The 6 year warranty applies to RAC manufactured and installed components only.

Respectfully submitted,

Glenn Matthews
President
Matthews Bus Alliance, Inc.

4802 WEST COLONIAL DRIVE • ORLANDO, FL 32808 • (800) 330-1175

The Air Conditioning Maintenance form is a guideline to keep system performance at a maximum level. By following the check list, you will ensure that there is sufficient heat transfer and proper air flow. A properly maintained system will ensure maximum cooling, durability, and performance. NOTE: In order to maintain standard and extended RAC warranties for ITB: FL-DOE 2022-01 these guidelines must be followed and noted on the required RAC Air Conditioning Maintenance Form:

- **Compressor Belt(s):** Properly tension-ed belts ensure maximum compressor performance and belt life.
- **Condenser Coil (s):** Properly maintain and clean condenser coils to ensure maximum heat transfer and system performance.
- **Condenser Fan (s):** Inspect and ensure proper air flow across condenser coils which allows efficient heat transfer and ensure all fans are working when compressor is engaged.
- **Drain Lines:** Inspect and ensure that properly routed drain lines keep water from collecting in the evaporator drain pan.
- **Evaporator Coil (s) and Filter:** Properly maintain and clean evaporator coil and filters to ensure maximum heat transfer and peak system performance.
- **Evaporator Blower (s):** Inspect and ensure proper air flow across evaporator coils, which allows efficient heat transfer.
- **Refrigerant Hoses:** Inspect and ensure proper hose routing and support to prevent the possibility of refrigerant leaks.
- **Refrigerant Sight glass:** A properly maintained system will ensure the absence of moisture. Inspect sight glasses. Deep Green or Purple = Absence of Moisture, Yellow or Pink = Moisture is present.

RIFLED AIR CONDITIONING SYSTEMS

Industry Leader in Product Innovation

LIMITED WARRANTY
and WARRANTY DISCLAIMER
for the Rifled Tube Coil Air Conditioning System Product

1. LIMITED WARRANTY.
RIFLED AIR CONDITIONING SYSTEMS (RAC) hereby warrants its unique high efficiency, high performance Rifled Coil Vehicle Air Conditioning System ("Product") to the original purchaser ("Purchaser") when installed in a Motor Coach vehicle application in either the U.S. or Canada. WARRANTY OFFERED HEREIN APPLIES ONLY TO DEFECTS IN MATERIALS AND WORKMANSHIP, with the decision to repair or replace parts covered herein to be at the sole discretion of RAC.

2. WARRANTY PERIOD.
Beginning the day the RAC product purchased is installed on and in a Commercial Coach, Recreational Vehicle or School Bus, including the Refrigerant Compressor, is warranted for a minimum period of 60 months (5 Years). All Rifled Coils used in both the Evaporator(s) and Condenser(s) are warranted for 60 months (5 Years). This warranty offering is without limitation to either vehicle distance traveled or operating hours accrued.

3. WARRANTY COVERAGE.
This warranty specifically covers all major components of the Product either manufactured by, or under the direction of, RAC, such as, but not limited to, the Freon Refrigerant Compressor(s), Evaporator(s) and Condenser(s). The cost of replacing refrigerant is covered ONLY if the Freon loss was due to a defective part covered under warranty. Any item repaired or replaced under warranty will remain under warranty until the end of the original warranty period as described in item 2 above, or for 90 days from the date of repair or replacement, whichever is longer.

4. ITEMS NOT COVERED BY WARRANTY.
Excluded from warranty are RAC Products improperly installed, modified in any way without prior written approval from RAC, disassembled or tampered with by anyone other than RAC, and products damaged by negligence, misuse, abuse, accident, chemical corrosion, fire, water, explosion or vandalism. Products damaged by the original purchaser or any other third party, including a vehicle dealer or service facility while performing work, are not warranted by RAC. Service items requiring either replacement or adjustment such as, but not limited to, filters, belts, lubricants, etc. are not covered under warranty. This warranty does not apply to any RAC Air Conditioning system not properly serviced ac cording to manufacturer recommendation and/or specification. **(See any AC Addendum's provided with any state bids i.e.,FL DOE)** Any cost incurred by the Purchaser including damage to or loss of vehicle, or any part thereof, for transporting the vehicle to a RAC dealer or service center, loss of time or operating revenue or cost of using an alternate replacement vehicle is not covered. Product failures as the result of an Act of God, such as, but not limited to, lightning, earthquake, windstorm, tornado, hurricane or flood are not covered. RAC has a formal company policy to continually improve the design and reliability of all its pro ducts. Should the design of the product purchased be changed at some future date, RAC has no obligation to the Purchaser to "upgrade" the product purchased to a new specification standard.

5. OBTAINING WARRANTY SERVICE.
To obtain warranty service for the RAC product covered herein, the product purchased must be returned to any authorized RAC dealer or service center. All warranty claims shall be within the stated warranty period. Person applying for warranty service shall provide proper documentation that he (or she) is both the original owner and date warranty commenced.

6. COMPLETE WARRANTY.
THE WARRANTY OFFERED AND DESCRIBED HEREIN IS THE COMPLETE WARRANTY FOR THE PRODUCT AND IS IN LIEU OF ALL OTHER WARRANTIES, EITHER EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITA TION ANY IMPLIED WARRANTY OF MERCHANTABILITY OF FITNESS OR ABILITY TO SUCCESSFULLY PERFORM A SPECIFIC PURPOSE OR JOB APPLICATION ; AND RAC HEREBY DISCLAIMS AND BUYER (whether OEM, Dealer or End User Purchaser) HEREBY WAIVES ANY OBLIGATION, LIABILITY, RIGHT, CLAIM, OR DEMAND IN CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, PATENT INFRINGEMENT, OR OTHERWISE WITH RESPECT TO THE RAC PRODUCT FURNISHED.

7. AUTHORITY TO CHANGE OR MODIFY.
The warranty described and defined herein can only be changed or modified by RAC personnel. This includes all terms, conditions, limitations, rights or obligations. Should RAC offer a different warranty in the future, it shall apply ONLY to products sold when it is effect, and the terms, conditions and limitations of this warranty will not be transferable or subject to upgrading.

SafeGuard

We've Got Your Back

SafeGuard offers the most extensive and versatile product line to meet your seating needs. When you're ready to move safety forward with lap-shoulder belts or integrated child seating, we give you more choices than ever before. SafeGuard FlexPlus® offers:

SmartFrame Plus® – Protecting the belted and unbelted
SafeGuard TattleTale® Technology – Visual identification when you need to replace your seat back
Easy Upgradeable Backs to Lap-Shoulder Belts and ICS
CAPE® Tested
IMMI Quality Assurance

The SafeGuard FlexPlus meets or exceeds all FMVSS and CMVSS requirements and standards. Made exclusively for Thomas Built Buses.

SafeGuard

SafeGuard S3C

The SafeGuard S3C are designed for flexibility and convenience. Available in a wide variety widths, the S3C can accommodate up to three passengers and can be configured for wall, floor or track mounting.

The S3C meets all FMVSS and CMVSS requirements and can be easily converted into different seating solutions, such as the integrated child seat or the restraint seat. The S3C can be retrofit to any school bus body style and all Thomas buses.

Easy to Maintain

- The zip-on back cover for rear panel can be quickly replaced without removing the seat belts.
- The self-latching seat cushion can be removed in seconds.
- A service parts catalog and maintenance diagrams are available online.

SafeGuard S3B Base School Bus Seat

Restraint Ready

The S3B seating system is a light weight economical school bus seating system. Designed for applications where upgrading to a l-s belt or ICS configuration is not anticipated, the S3B has the same footprint as the S3C and can be mixed and matched with the S3C seats in the same bus.

SafeGuard ICS® NO MORE EXCUSES®

Integrated Child Seat - Helping to protect your smallest riders.

No more lugging child seats across the bus yard every day. SafeGuard's versatile Integrated Child Seat eliminates the need for add-on restraints or child seats for younger children. Available for school buses, the SafeGuard ICS® offers the security of a built-in child restraint system with a five-point harness for children 22 to 85 lbs.

- Thin seat design allows for no loss of seat rows.
- Sliding shoulder height adjusters enable ICS to accommodate children of a wider range of heights than can be restrained in other integrated child seats.
- Designed to avoid touch-related issues.
- Maintains full compartmentalization.
- Booster seat cushion with replaceable pad folds under itself for added comfort, elevation, and cleanliness.
- Easy access and service to restraint systems and upholstery.
- Contains SafeGuard's SmartFrame® technology.
- CAPE® tested to meet or exceed all federal and state safety standards.

SafeGuard

"The goal: A 3-point belt on Every bus for Every child." *Mark Rosekind, NHTSA*

The time has come for lap-shoulder belts on school buses, but where do school districts start? Field trips, school activities, and sporting events take school buses from quiet neighborhood streets to busy highways and interstates with speeds of 55 mph or more. With more risks should come more protection.

That's why your district's travel buses are the best place to begin with lap-shoulder belts.

click tug & snug
SEAT BELT EDUCATION

IMMI reminds you to always buckle up.

Special Protection for Special Needs.

SafeGuard STAR Special Needs

STAR Special Needs offers the same protection as the standard STAR, with the extra support accessories to accommodate children with a wide range of special health care needs .The restraint easily adjust to provide support for children 25 to 105 pounds with torso heights up to 20 inches tall (torso height = seating position base to shoulder).

- Extra support features include an abductor, recline wedge, torso supports, height adjusters and adjustable headrests.
- Wraps around most any size school bus seat.
- Meets or exceeds all applicable federal and Head Start safety standards.

INTRODUCING

S.T.A.R.S.

MOUNTING SYSTEM

Saf-T-Anchor Removable Seat Mounting System

No Seat and No Slide 'N Click

Seat and Pockets

Seat and Slide 'N Click

Allows seats to be removed completely from inside the vehicles

Uses standard wall mount seat frames

Seats can only be re-installed from where they were removed

More cost-effective configurations

- No longer have to buy continuous track
- No upcharge for track-mounted seat frame
- Allows the use of pockets, Slide 'N Click or track segments for wheelchair positions

Quicker and easier for customers to reconfigure their buses to meet their ever-changing route needs

- No guess work as to where seats must be reinstalled to meet FMVSS and CMVSS
- Fewer fasteners

Available with "S.T.A.R.S. compliant" options for wheelchair tie downs

- Slide 'N Click
- Track Segments
- Continuous 4-piece track

Available for SynTec S3C, S3B & IMMI seats

- 30", 36", 39" and 45" width

Meets all Federal (US & Canada) and State Regulations

Come to Booth #311 to see a seat demonstration

2018 Product Application Guide • 3-7-18

NL2 MILLENNIUM SERIES™

NL2 Millennium Series™ Features

- Fully automatic NHTSA compliant lift, operated by an attendant
- Loading position - either direction
- Interfaces with OEM interlocks
- Lift mounted lights - platform illuminated as it deploys
- Hand control with illuminated functions
- Locking mechanical Inboard Barrier (IB), powder coated yellow for safety and high visibility, prevents movement if occupied
- Pump design prevents platform folding when occupied, quiet operation and low current draw
- Durable redesigned baseplate reduces lift weight and allows for quicker and easier service of hose/wiring
- Easily installed, step-by-step installation instructions, no peripheral hardware required
- Visual and audible warning provides notification of unsafe conditions
- Hydraulic outer barrier that will be in the fully up position before the platform leaves the ground, has durable rubber nose guard and is powder coated yellow for safety and high visibility
- Parallel arms lift with hydraulic cylinders
- Side or rear door application
- Two platform widths available
- Dual handrails for security and convenience
- Bridging feature permits the wheelchair user to board the lift from sidewalks or inclines
- Floor to ground travel is 48"
- Lifting capacity is 800 lbs
- Integrated back-up pump
- Equipped with an adjustable anti-rattle feature to avoid unpleasant noise in the vehicle during transit
- Durable high-gloss powder coated finish
- Lift-Tite system stows the lift platform securely while the vehicle is in transit
- Pump module with removable cover offers easy access to all components

NL2 Millennium Series™ Models

NL916IB-2 & NL916FIB-2
NHTSA Compliant **Usable Platform: 30" x 51"**

NL917IB-2 & NL917FIB-2

NHTSA Compliant **Usable Platform: 37" x 51"**

General Function: Electrohydraulic, power up/gravity down operation
Operation: Hydraulic pump with two lifting cylinders
Control: hand-held control box
Hydraulic: Pressure Max. 2,495 psi, Fluid is Univis HVI 26, oil reservoir is .33 gal
Construction: Steel structure with powder coat finish
Operating Temperature: 0ºF to 140ºF
Power Supply: 12VDC
Current Consumption: Max. 70A (12V)

F = Front Pump IB = Inboard Barrier For a front-mounted pump assembly, add "F" to the model number when ordering (example: NL917FIB-2).

NL2 Millennium Series™ Specifications

COMMERCIAL WHEELCHAIR LIFT SPECIFICATIONS - IN COMPLIANCE WITH United States Department of Transportation Rules and Regulations 49CFR, Part 38. FROM THE AMERICANS WITH DISABILITIES ACT OF 1990 and NHTSA Rule 403 (2004) "Provided to make your spec writing easier."

The wheelchair lift is compliant with Federal Motor Vehicle Safety Standard 403 for platform lift systems for motor vehicles. The lift shall have been tested to a minimum static load of 2400#. The lift shall have 800# rated lifting capacity. The base plate shall be a corrugated designed member to provide rigidity to minimize lift deflection when placed under load.

The power supply shall be a 12 volt electro-hydraulic system operating two single-acting cylinders. The hydraulic power pack system shall be of modular design allowing for easy removal and field replacement, if needed. The operation of the unit shall provide a smooth, jerk-free ride in both up and down directions. The power operation of the hydraulic cylinders shall be of a pull-type design for smooth lifting operation and improved synchronous arm movement. The pivot pins in the trunnion (knuckle) of the pivot arms shall be of stationary design. The hydraulic system shall be regulated by two separate relief valves, one of which is designed to prevent accidental stowing when occupied.

The hand control for lift operation shall be of a one-hand operation design made of durable plastic. The hand control will provide user with illuminated functions. The hand control cable shall be coiled with quick-change connections for ease of maintenance or field change.

A manual back-up system shall be provided to ensure operation of the lift in case of electrical failure. The backup system shall provide a reliable means of manually raising and lowering the lift while occupied. The back-up system shall fold and unfold the platform. The back-up pump shall be integrated with the hydraulic power pack system such that no hydraulic lines or fittings are required.

The platform shall be of steel construction and the surface shall be of see-through grating allowing for improved visibility and safer use in inclement weather. The platform shall have a minimum usable wheelchair passageway width of 33 inches and a minimum usable length of 51 inches requiring a 57 inch vertical clear door opening. The sides of the platform shall be a minimum of 2.5 inches high.

The platform shall be automatically folded and unfolded and fully automatic in operation. The platform shall allow both inboard and outboard facing of wheelchair and mobility aid users. The platform entrance ramp shall be extruded aluminum for weight savings, have a rubber leading edge and raised ribs for traction. The outer barrier shall be hydraulically activated, and must be in the vertical (deployed) position prior to platform movement. The outer barrier must not raise if occupied with 25 lbs. The outer barrier shall be the sole outboard wheelchair retention device and shall be interlocked and comply with the FMVSS 403 requirements. Dual handrails shall be provided to add security and convenience. These handrails shall be 1.25 inch minimum diameter, minimum 30 inches in height, minimum of 8 inches in length, and withstand a 100# force in any direction (including vertical) without permanent deformation. The lift must have a fail safe system to prevent stowing if solenoid welds. The platform shall have "built in" lighting to meet 404 platform lighting requirements with no auxiliary lighting.

All lift components shall be finished with a baked-on powder coating, which will meet a salt spray test of 1000 hours, to provide corrosion resistance and a long service life. BraunAbility Millennium Series to include but not limited to the following model numbers:

- NL917IB-2, NL917FIB-2, NL919IB-2, NL919FIB-2, NL917IB3751-2, NL917FIB3751-2

MINOTOUR®

BODY SPECIFICATIONS

Passenger Capacity
- Up to 30

Wheelbase
- Ford® Chassis: 138" or 158"
- GM® Chassis: 139" or 159"

GVWR
- SRW 9,900 and 10,100 lbs
- DRW 11,500 - 14,500 lbs

Engine Options
- GM Gas 4.3L V6, 6.6L V8
- Ford Gas 7.3L V8

Telematics
- Zonar® V4™ advanced telematics system

Serious strength in a smaller package

Don't let the smaller size of the Minotour® fool you. With safety cage body construction, one-piece skirt-to-skirt roof bows and internal roof rails for rollover protection, the Minotour is just as strong, safe and roadworthy as larger members of the Thomas Built family.

Designed for both function and flexibility, the Minotour offers reliable, durable transportation in an incredibly adaptable bus. The spacious interior seats up to 30 people, and the Minotour can be easily configured to accommodate a wheelchair lift, multiple seating styles and flexible S.T.A.R.S. and track-mounted seating.

Above all, the Minotour conforms to the same high safety standards that characterize all Thomas Built buses. And unlike most passenger vans, the Minotour meets and exceeds all FMVSS and CMVSS for school buses, making it the perfect choice for schools, childcare centers, churches, and youth organizations.

MINOTOUR®

THOMASBUILTBUSES.COM/MINOTOUR

SAFETY

- Meets or exceeds FMVSS/CMVSS
- Built like a full-size school bus
- Safety cage body construction with one-piece skirt-to-skirt roof bows
- Two internal roof crash rails for rollover protection
- Daytime running lights
- Four-wheel anti-lock brakes
- 42" x 47" glass-paneled rear emergency door

DRIVABILITY

- 73" interior headroom
- Interior dome lights
- Driver-friendly ergonomic instrument panel
- 6" x 16" interior rearview mirror with padded edges
- Thermal poly fiber insulation
- Driver control panel placed overhead
- Manually operated front entrance door
- 306 square-inch Saf-T-Vue window
- Dash and rear A/C

TECHNOLOGY OPTIONS

- Zonar® Fleet Management Solutions

SERVICEABILITY

- Electronics mounted in interior service compartment with light
- Main circuit breaker located inside entrance door as master power to body, A/C and lift
- Access to lights from inside the bus

OPTIONS

- Wheelchair lift with 44" wide door
- Remote control/heated mirrors
- Driver's step
- Electrically operated front entrance door with auto reverse
- Various seating options:
  - bench seat without belts, with lap belts, with 3-point belts
  - latch
  - integrated child seat
  - coach-style seating
- Roof hatch
- Third center LED brake light
- Child reminder system
- Crossing arms
- Acoustical headlining
- Manual reset electrical circuit breakers
- White roof
- Reading lights
- Overhead book racks

Our ergonomic driver cockpit is designed to accommodate all drivers with an operator-friendly interior and instrument panel.

The Minotour supports a variety of rugged wheelchair lifts and features a 44" wide lift door.

The Saf-T-Vue Window offers 306 inches of glass next to the entrance door, providing an enhanced view of passengers entering and leaving the bus.

The S.T.A.R.S. Mounting System makes installing and removing seats easier and more cost-effective than ever.

Minotour®

From after-school youth groups to senior center outings, a safe, comfortable mode of transportation is non-negotiable. That's why we equipped the compact Minotour with all the peace-of-mind features that come standard in our larger buses, like the one-piece skirt-to-skirt roof bows and the wrap-around bumper. And while safety comes standard in every Minotour, an impressive list of features can be customized to best serve your passengers. Since 1936, Thomas Built has been building safe buses to meet the needs of passengers, drivers and the community. And with one of the most extensive dealer networks in the industry, there's always support nearby when you need it.

- Remote control/heated mirrors
- Driver's step
- Electrically-operated front entrance door
- Dash and rear A/C
- Various seat options available: bench seat without belts, with lap belts, with 3-point belts; latch; integrated child seat; or coach-style seating
- Roof hatch
- Third center LED brake light
- Child reminder system
- Acoustical headlining
- Manual reset electrical circuit breakers
- Reading lights
- Overhead book racks
- Exterior graphics

Integrated child seat with seatbelt is one of many seating options.

Center aisle with optional book racks and coach-style seating.

The Saf-T-Vue window offers 306 square inches of glass for optimal exterior visibility.

Driver switches located overhead for easy access and enhanced loading visibility.

C2

BODY SPECIFICATIONS

Passenger Capacity
- Up to 81

Wheelbase
- 158", 179", 199", 219", 238", 259", 279"

GVWR
- Up to 33,000 lbs

Engine
- Detroit™ DD5™ engine (available late 2018)
  - 200 hp/560 lb-ft (2k or 3k transmission)
  - 220 hp/560 lb-ft (2k or 3k transmission)
  - 240 hp/660 lb-ft (2k or 3k transmission)
- Cummins® B6.7 200-260 hp
- Cummins® B6.7N with up to 240 hp
- DriveForce 8.0L LPG 339 hp

Telematics
- Zonar® V3™ advanced telematics system
- Detroit™ Connect™ available on DD5 engine (available late 2018)

Drive the future

The ultra-efficient Detroit™ DD5™ engine. Zonar® remote fleet management. The largest visibility footprint in the Type C category. State-of-the-art BusWise™ Technologies. These are just a few of the innovations that characterize the Saf-T-Liner® C2, the bus that revolutionized the school bus industry.

Why do we constantly challenge ourselves to develop the most advanced and intelligent school bus innovations on the market? We do it for the drivers who operate our buses, for the technicians who maintain them, for the school districts who invest in them, and for the schoolchildren who ride our buses every day. When we watch a C2 leave our factory, we love knowing that we're providing our customers the utmost in safety, efficiency and total cost of ownership. That's who we are at Thomas Built Buses.

C2 Drive the future

THOMASBUILTBUSES.COM/C2

SAFETY

- Outstanding visibility and safety
- One piece bonded windshield with panoramic view
- Low sloping hood and low instrument panel
- A-pillar windows
- Largest visibility footprint in type C category
- Saf-T-Net construction
  - Side skirt reinforcement
  - Rafter system
  - Extended roof bows
- Double-bolted body mounting clips
- Fuel tank mounted between frame rails
- Saf-T-Bond adhesive joints
- 33.3" high windows
- Meets or exceeds FMVSS/CMVSS

SERVICEABILITY

- Numbered fault code system for diagnostics
- Automated light checking system
- Mechanically fastened warning lights
- Easy "walk-in access" to engine compartment
- Passenger windows removable with only four screws
- Comprehensive DiagnosticLink® software
- Cummins® Stay Warm Feature to reduce DPF maintenance issues

DRIVABILITY

- Up to 55-degree wheel cut*
- Tapered leaf suspension
- Obstruction-free open driver's area
- Large overhead driver storage compartments
- Side storage for clipboards and personal items
- Customizable driver smart switch placement
- Non-reflective instrument panel
- Automotive-style heating and ventilation controls
- 78" full-height headroom
- Saf-T-Vue passenger loading window
- Low profile aerodynamic hood
- Instrument panel visibility through steering wheel

*depending on vehicle specifications

TECHNOLOGY OPTIONS

- BusWise Technologies platform
  - Zonar telematics system
  - PV360® camera
  - Collision avoidance systems
  - WiFi
  - Tire pressure monitoring system
  - Electronic Stability Control (ESC)
- Detroit™ Connect Virtual Technician℠ remote diagnostics service (available with DD5 engine only)

OPTIONS

- Tilt and telescoping steering wheel
- Adjustable pedals
- Air suspension driver's seat with available heating
- Air ride suspension
- Air disc brakes
- Variety of AM/FM radio options with PA, Bluetooth, Weatherband, and speed sensing volume controls
- Remote control/heated mirrors
- In dash HVAC
- Variety of seating options:
  - Bench seat without belts, with lap belts or with three-point belts
  - Latch seat
  - Integrated child seat
  - Coach-style seat
- LED light packages
- Engine exhaust brake
- Acoustical ceiling
- Luggage compartments
- Overhead book racks
- Reading lights
- Tinted windows
- Severe duty wiring harness
- Soft open/close hood
- Automatic headlights
- Trash can
- Cup holders
- FleetShield™ corrosion protection

New LED light option increases efficiency, brightness and longevity reducing your TCO.

The PV360 multi-camera provides a 360° view of virtually everything surrounding the C2.

Optional tilt and telescoping steering wheel and optional adjustable pedals give drivers of all sizes the comfort they deserve.

25% improved visibility versus the typical Type C bus

C2 CNG

The Thomas Built Buses Saf-T-Liner® C2 CNG, equipped with the Cummins ISB 6.7 G engine, is the industry's first Type C bus fueled by compressed natural gas (CNG). The C2 CNG bus offers excellent driver ergonomics and maneuverability along with the best visibility in its class. And, Thomas Built construction standards ensure outstanding safety and long-term durability. Plus, CNG creates up to 13% less greenhouse emissions than diesel. So, if you're looking for a greener version of your favorite yellow bus, talk to your Thomas Built dealer. They'll help you make the best alternative fuel decision for your fleet and even advise you on how to set up alternative fuel infrastructure.

SAFETY

- Saf-T-Net construction
  - Side skirt reinforcement
  - Extended roof bows
  - Welded header and rafter system
- Double bolted body mounting clips
- Fuel tank mounted between frame rails
- One-piece bonded windshield
- Saf-T-Bond adhesive joints
- Meets or exceeds FMVSS

DRIVABILITY/COMFORT

- Up to 55-degree wheel cut
- Additional leg room
- Large overhead driver's storage compartments
- Side storage for clipboards and personal objects
- Interchangeable driver smart switch placement
- LED backlit gauges
- Automotive-style heating and ventilation controls
- Automatic entrance door
- Full height 78" headroom

DRIVER VISIBILITY

- 25% improved visibility over typical Type C bus
- Saf-T-Vue passenger loading window
- Low profile aerodynamic hood
- Overlapping windshield wipers

SERVICEABILITY

- Numbered fault code system for diagnostics
- Easy "walk-in-access" to engine compartment
- Easy access to the windshield wiper motor and linkage

OPTIONS

- Wheelchair lift
- Tilt and telescoping steering wheel
- Adjustable pedals
- Air suspension driver's seat
- Air ride suspension
- AM/FM radio/CD/PA
- Remote control/heated mirrors
- Duct-vented dash A/C
- Various seat options available: bench seat without belts, with lap belts, with 3-point belts, latch; integrated child seat; or coach-style seating
- Child reminder system
- LED light packages
- Engine exhaust brake
- Acoustical ceiling
- Luggage compartments
- Overhead book racks

CNG BENEFITS

- Cleanest-burning alternative fuel
- Greenhouse gas emissions reduction up to 13% less than diesel
- Four fuel tanks (60 diesel gallon equivalent)
- Maintenance-free three-way catalyst aftertreatment
- Domestic fuel source reduces dependency on foreign oil

Our largest-in-class windshield increases loading zone visibility to keep your passengers safe

The cockpit features increased overhead storage space and improved interior rearview mirror placement

Optional tilt and telescoping steering wheel and optional adjustable pedals give drivers of all sizes the comfort they deserve

The four-tank system offers a 60 diesel gallon equivalent

Transmission	Allison 2500 or 2550 PTS Series
Emissions Certification	US EPA and CARB HD-SI
Dry Weight	1100 lbs

Introducing the New DriveForce 8.8L Propane Autogas Engine.

A new propane-fueled engine is now available for the Thomas Built Buses Saf-T-Liner® C2. Delivering exceptional power and performance, the DriveForce 8.8L has a durable block, increasing torque for enhanced hill-climbing power. Plus, setting up the propane infrastructure is easy and cost-effective, making the switch to this engine even easier. How's that for a powerful alternative.

FEATURES

- Smooth and quiet power
- Forged, induction-hardened crankshaft
- Forged rods and pistons
- Oil bath lubrication for piston cooling
- Common controls, harness, exhaust, cooling and mounts
- Low-speed design for unique torque and power curves
- Modernized, heavy-duty, high-flow cylinder heads create fast burn to improve efficiency and reduce emissions
- Forged and induction-hardened steel crankshaft creates durable block capable of 1000+ lb-ft of torque
- Tuned long-runner intake manifold provides higher torque and special air gap design keeps engine air cooler for improved efficiency

DON'T JUST DRIVE THE FUTURE. POWER IT.

INTRODUCING THE SAF-T-LINER® C2 JOULEY® ELECTRIC BUS.

All of the attributes you would expect from the legendary C2, but with no vehicle emissions, no noise pollution and even greater savings on maintenance and fuel costs.

The Saf-T-Liner C2 Jouley electric bus, which is ideal for in-town routes, is the latest chapter in our 100-year legacy of moving the industry—and our customers—forward with proven, sustainable options.

THE SAF-T-LINER C2 JOULEY OFFERS

- → Up to 138-mile operating range
- → 226 kWh battery storage capacity
- → Nominal charge in 2-3 hours at a DC charging station*

Thomas BUILT BUSES

*To achieve advertised charging time, chargers must have an output of at least 75 amps

What makes the Saf-T-Liner C2 Jouley amazing?

ULTRA-SAFE DESIGN

- Safety-first construction
- Specialized battery packaging for increased safety
- Zero emissions reduce exposure to harmful emissions
- Quiet operations eliminate driver distractions and increase awareness of what's going on inside the bus

VEHICLE PERFORMANCE

- Full OEM vehicle performance
- Top speed of 65 mph
- No change to driver behavior required with automated driver cycles
- Regenerative braking
- 226 kWh battery storage capacity

INNOVATIVE SOFTWARE TECHNOLOGIES

- Telematics system provides real-time fleet tracking, management and vehicle diagnostics
- Electronic control software interfaces with critical vehicle systems
- Includes fault detection and related management features
- Optimize battery economy while maintaining performance

SERVICE

- Comprehensive vehicle monitoring via telematics
- Predictive and real-time vehicle diagnostics for fleet managers
- Sales and service team support
- Less maintenance/service procedures required

REDUCED TOTAL COST OF OWNERSHIP

- Electric buses pay for themselves over a lifetime
- Reduced cost of fuel. Electricity is the lowest and most stable operating cost of any fuel
- Less mechanical failure vs. traditional vehicles due to simpler design
- Lower vehicle maintenance costs, including less frequent brake replacement, no oil changes and other savings

ELECTRIC SYSTEM

DC POWER

- 295 peak horsepower
- 0-60 mph acceleration in 49 seconds depending on final drive rear axle ratio
- Standard SAE J1772 charging protocol
- Over-the-air battery management software updates
- Power-Save/Economy mode to extend range when required
- Bilateral vehicle-to-grid capability
- 2-speed transmission
- Liquid cooled battery pack

SAF-T-LINER® C2 JOULEY ELECTRIC SCHOOL BUS

POWERED BY PROTERRA® TECHNOLOGY

	Description	Value
VEHICLE SPECIFICATIONS		
Total energy	kWh	220
Operating efficiency*	kWh/mile	1.474
	MPGe	24.6
Range*	Nominal range in miles: total energy/ efficiency	Up to 149
	Operating range in miles: usable energy**/ efficiency	Up to 134
Top speed	mph	65
Acceleration	0-60 mph at GVW, seconds	49
Horsepower		295 peak, 170 continuous
Regen braking power		220 peak, 107 continuous
Motor		Proterra® ProDrive drivetrain; single 220kW permanent magnet drive motor
Transmission gearbox		Proterra 2-speed auto shift EV gearbox
Battery thermal management system		Liquid cooled
Battery pack enclosure		Ruggedized 10mm thick aluminum
Braking System		Regenerative braking, air disk brakes
Startability	grade	19%
CHARGING SPECIFICATIONS		
Type		Plug-in, DC fast charging
Standard		J1772 CCS Type-1
Charge power		up to 60 kW
Charging time (empty to full)		- 3 hours with 60kW charger
WARRANTY		
Battery capacity		8 years / 175,000 miles / 200,000 kWh of gross discharge throughput per pack
Battery materials & workmanship		8 years / unlimited miles
Drivetrain		5 years / 100,000 miles
Extended warranty for battery & drivetrain available		up to 10 years

* will vary with route conditions, weather, vehicle configuration and driver behavior.
**all vehicle batteries must be limited to useable capacity, to decrease degredation and optimize longevity

C2

Finding the right bus to transport your group is a lot of responsibility. You need something safe, reliable and versatile. Our Saf-T-Liner® C2 can be customized to meet your specific needs with unique features like coach-style seating, overhead roof racks, video systems and tinted windows. The C2 continues to redefine industry standards, featuring outstanding maneuverability, state-of-the-art driver ergonomics and the most visibility among all Type C buses. And with one of the most extensive dealer networks in the industry, there's always support nearby when you need it. Innovation leads to great things at Thomas Built Buses. Namely, a better bus for everyone.

SPECIFICATIONS

Passenger capacity
Up to 81

Wheelbase
158", 179", 199", 219", 238", 259", 279"

GVWR
Up to 33,000 lbs.

Engine options
Detroit® DD5™ engine 200-240 HP
Cummins® B6.7 200-260 HP

Propane options
DriveForce 8.0L V-8 LPG 339 HP
DriveForce 8.8L LPG 270 HP

CNG option
Cummins® B6.7N with up to 240 HP

C2

SAFETY

- Saf-T-Net construction
  - Side skirt reinforcement
  - Extended roof bows
  - Welded header and rafter system
- Double bolted body mounting clips
- Fuel tank mounted between frame rails
- One-piece bonded windshield
- Saf-T-Bond adhesive joints
- Meets or exceeds FMVSS

DRIVABILITY/COMFORT

- Up to 55-degree wheel cut
- Tapered leaf suspension
- Open driver's area without obstructions
- Additional leg room
- Large overhead driver's storage compartments
- Side storage for clipboards and personal objects
- Adjustable seat belt
- Interchangeable driver Smart Switch placement
- Non-reflective instrument panel
- LED backlit gauges
- Automotive-style heating and ventilation controls
- Automatic entrance door
- Full height 78" headroom
- 33.3" high windows

DRIVER VISIBILITY

- 25% improved visibility over typical Type C bus
- Saf-T-Vue passenger loading window
- Low profile aerodynamic hood
- Low instrument panel
- Overlapping windshield wipers

SERVICEABILITY

- Complete multiplex system, numbered fault code system
- Automated light checking system
- Easy "walk-in access" to engine compartment
- Easy access to the windshield wiper motor and linkage

OPTIONS

- Wheelchair lift
- Tilt and telescoping steering wheel
- Adjustable pedals
- Air suspension driver's seat
- Air ride suspension
- Heated driver's seat
- Cupholder
- AM/FM radio/CD/PA
- Remote control/heated mirrors
- Duct vented dash A/C
- Various seat options available: bench seat without belts, with lap belts, with 3-point belts; latch; integrated child seat; or coach-style seating
- Child reminder system
- LED light packages
- Engine exhaust brake
- Acoustical ceiling
- Luggage compartments
- Overhead book racks
- Reading lights*
- Tinted windows
- Staggered passenger seating
- Customizable paint designs*
- Video systems*

* *Some options only available through dealerships*

Our largest-in-class windshield increases loading zone visibility to keep your passengers safe.

The cockpit features increased overhead storage space and improved interior rearview mirror placement.

Optional tilt and telescoping steering wheel and optional adjustable pedals give drivers of all sizes the comfort they deserve.

Coach-style seating provides passenger comfort for every type of trip.

DETROIT DD5™

TECHNICAL SPECIFICATIONS

THE DETROIT DD5 ENGINE AVAILABLE IN THE SAF-T-LINER® C2 SCHOOL BUS
THE MOST ADVANCED ENGINE TECHNOLOGIES ENGINEERED TODAY

This next-generation medium-duty engine delivers unsurpassed efficiency with exceptional endurance. All while achieving the longest maintenance intervals in the industry for maximum uptime.

PERFORMANCE

- Meet your deadline every time
  - Components such as rear gear train and cast iron block are designed to minimize noise vibration harshness (NVH), resulting in a quieter engine that enhances driver and passenger safety
  - Simple fixed-geometry dual-stage turbo provides performance, efficiency, and reliability
  - Robust design provides B10 life of 400,000 miles
  - Integrated engine brake option provides superior braking horsepower and extended service brake life

POWER

- Usable power and torque reached at lower engine speeds, ideal for the demands of today's school bus

ECONOMY

- Smart, fuel-efficient design makes the most of every gallon
  - Advanced common rail fuel system optimizes each injection event to minimize fuel consumption
  - Piston and cylinder design reduces friction and provides optimal combustion control resulting in better fuel economy and reduced emissions
  - Variable exhaust cam phasing technology allows additional heat to the exhaust stream to promote efficient operation of the aftertreatment system in low speed stop-and-go operation reducing the need for active regen
  - A state-of-the-art cooling system and variable-speed fan reduce fan-on times and help maintain engine power and fuel efficiency
  - A 4-cylinder design, which provides just as much torque as a 6-cylinder, but with better fuel efficiency

COMPLIANCE

- The DD5 is certified to Greenhouse Gas (GHG17) standards, effective through 2020
- 2016 On-Board Diagnostics certified

SERVICEABILITY

- Best-in-class maintenance intervals of up to 45,000† miles help reduce downtime to keep you up and running
- Oil and fuel filters are positioned above the frame rails for easier, faster and cleaner filter changes
- Maintenance-free crankcase breather
- Detroit® Connect Virtual Technician™ helps you make informed service decisions within minutes of a fault event and provides actionable data that can improve passenger safety

- Detroit™ Connect™ available on DD8 engine (available late 2018)

Outperform on every level

Start with an ergonomic driver environment and durable, safe construction. Add room for up to 90 passengers and all their equipment. Mix in outstanding long-route performance and comfort. And you have the Saf-T-Liner® HDX, a bus tough enough and versatile enough to handle it all.

Whether it's a snowy interstate or challenging city streets, the HDX was designed to navigate any situation with power, safety and style. Optional add-ons like front and rear bulkhead air conditioning, coach-style seating and pass-through underbody storage keep everyone on board comfortable over long distances and for the long haul.

HDX

Outperform on every level

THOMASBUILTBUSES.COM/HDX

SAFETY

- Meets or exceeds FMVSS/CMVSS
- Roof bows that extend to bottom of side panels
- Double rear bumper with exterior contoured steel bumper
- Double-bolted body mounting clips
- Fuel tank mounted between frame rails

DRIVABILITY

- Ergonomic driver's dash and switch panel
- Easy-to-read offset gauge cluster
- Tilt and telescoping steering wheel
- Suspended brake and accelerator pedals
- Footrest
- Up to 50-degree wheel cut
- Sound isolator over engine
- 78" of headroom
- Large two-piece curved bonded windshield
- Exterior mirror cluster with flat and convex rear-view mirrors and front crossover mirrors

SERVICEABILITY

- Exterior electrical access door
- Streamlined electrical center for easy identification and access
- Accessory module for customer aftermarket component hookup
- Fuse relay centers for circuit protection and easy diagnostics
- Front access service panel
- "S" shape drop-frame design at engine location
- Engine compartment accessible via three doors and interior access panel
- Easy access to engine fluids
- In-dash fault code display
- Lights equipped with plug-in connectors

TECHNOLOGY OPTIONS

- Zonar® telematics system
- Detroit™ Connect Virtual Technician™ remote diagnostics service (available with DD8™ engine only)

OPTIONS

- Wheelchair lift
- Adjustable pedals
- Air suspension driver's seat
- Air ride suspension
- Heated driver's seat
- Front and rear bulkhead air conditioning
- AM/FM radio, CD player and PA system
- Remote controlled heated mirrors
- Reading lights
- Variety of seating options:
  - bench seat without belts, with lap belts, with 3-point belts
  - integrated child seat
  - coach-style seat
- Child reminder system
- Interior LED lighting packages
- Acoustical ceiling
- Underbody pass-through storage area
- Overhead book racks
- White roof
- Tinted windows
- Staggered passenger seating
- LED headlights

Large two-piece curved bonded windshield gives drivers the most expansive view possible.

New LED light option increases efficiency, brightness and longevity reducing your total cost of ownership.

Front and rear bulkhead air conditioning options are available.

Optional underbody pass-through storage adds capacity of up to 129 cubic feet.

A maintenance shelf allows for quick and **easy fluid checks and routine maintenance.** The shelf can be easily removed to provide full engine access.

HDX CNG

You're not simply responsible for transporting passengers from point A to school, and back. You're setting an example for them. Which is why we launched the HDX with Compressed Natural Gas (CNG) more than 10 years ago, offering our customers a green, customizable transportation solution. The HDX CNG puts out up to 13% lower greenhouse gas emissions than diesel engines, while offering a range of options to meet the needs of drivers and passengers. Since 1936, Thomas Built has been building safe buses to meet the needs of passengers, drivers and the community. And with one of the most extensive dealer networks in the industry, there's always support nearby when you need it.

HDX CNG

SAFETY

- Meets or exceeds FMVSS
- Roof bows extend to bottom of side panels
- Double rear bumper with exterior contoured steel bumper
- Double bolted body mounting clips
- CNG tanks protected in steel cage

DRIVABILITY/COMFORT

- Ergonomic driver's dash and switch panel
- Easy-to-read offset gauge cluster
- Tilt and telescoping steering wheel
- Ergonomically sound brake and accelerator pedal configuration
- Foot rest
- 45-degree steering angle
- Sound isolator over engine
- 78" headroom

SERVICEABILITY

- Exterior electrical access door
- Streamlined electrical center for easy identification and access
- Customer accessory module for aftermarket component hookup
- Fuse relay centers for circuit protection and easy diagnostics
- Front access panel
- Drop-frame design at engine location
- Engine compartment accessible via three doors
- Easy access to fluids
- Display of fault codes in dash
- Lights equipped with plug-in connectors
- Easy access to CNG tanks

DRIVER VISIBILITY

- Large two-piece curved, bonded windshield
- Specially-developed integrated mirror system

OPTIONS

- Wheelchair lift
- Adjustable pedals
- Air suspension driver's seat
- Air ride suspension
- AM/FM radio/CD/PA
- Remote control/heated mirrors
- Reading lights
- Various seat options available: bench seat without belts, with lap belts, with 3-point belts; integrated child seats; or coach-style seating
- Child reminder system
- Crossing arms
- LED light packages
- Acoustical ceiling
- Underbody pass-through storage area
- Overhead book racks
- White roof
- Tinted windows
- Staggered passenger seating

CNG BENEFITS

- Greenhouse gas emissions reduction up to 13% lower than diesel
- Reliable and durable
- Maintenance-free three way catalyst aftertreatment
- Domestic fuel source reduces dependency on foreign oil
- Four fuel tanks (60 diesel gallon equivalent)

Four CNG tanks (60 diesel gallon equivalent)

Easy-to-read gauges and an adjustable seat make driving easier

Full-width front access panel allows for easy access

Flat and convex integrated mirrors improve rear-view visibility

HDX

Pack up the local ski team, youth group or brass band. The Saf-T-Liner® HDX from Thomas Built Buses was designed to make even the longest bus excursion feel like a quick jaunt. Heavy-duty shock absorbers take on any terrain, from mountain roads to narrow city streets, while the rear engine design keeps the ride nice and quiet for the driver. Options like coach-style seating, pass-through underbody storage, overhead book racks and air conditioning add comfort for up to 90 passengers. Yet, for all the attention we pay to comfort, nothing is more important than our unwavering commitment to safety, demonstrated by our drive to meet or often exceed FMVSS. And with one of the most extensive dealer networks in the industry, there's always support nearby when you need it.

DETROIT DD8™

TECHNICAL SPECIFICATIONS

THE DETROIT DD8 ENGINE AVAILABLE IN THE SAF-T-LINER® HDX SCHOOL BUS
THE MOST ADVANCED ENGINE TECHNOLOGIES ENGINEERED TODAY

PERFORMANCE

- Simple fixed-geometry turbo design provides performance, efficiency, and reliability
- Robust design for an impressive B10 life of 400,000 miles
- Integrated engine brake option provides superior braking horsepower to extend service brake life
- Components such as rear gear train and cast iron block are designed to minimize noise vibration harshness (NVH), resulting in a quieter engine that enhances driver and passenger safety

POWER

- Usable power and torque reached at lower engine speeds, ideal for the demands of today's school bus

COMPLIANCE

- The DD8 is certified to Greenhouse Gas (GHG17) standards, effective through 2020
- 2016 On-Board Diagnostics (OBD) certified

ECONOMY

- Smart, fuel-efficient design makes the most of every gallon
  - Advanced common rail fuel system optimizes each injection event to minimize fuel consumption
  - Piston and cylinder design reduces friction and provides optimal combustion control resulting in better fuel economy and reduced emissions
  - Variable exhaust cam phasing technology allows additional heat to the exhaust stream to promote efficient operation of the aftertreatment system in low speed stop-and-go operation, reducing the need for active regen
  - A state-of-the-art cooling system and variable-speed fan reduce fan-on times and help maintain engine power and fuel efficiency

SERVICEABILITY

- Best-in-class maintenance intervals of up to 55,000* miles help reduce downtime to keep you up and running
- Oil and fuel filters are positioned above the frame rails for easier, faster and cleaner filter changes
- Maintenance-free crankcase breather
- Detroit® Connect Virtual Technician™ helps you make informed service decisions within minutes of a fault event and provides actionable data that can improve passenger safety

EFX

When it comes to our schools, every efficiency counts. That's why we've built so many into our updated Saf-T-Liner® EFX. Seating for up to 90 passengers and a wider loading aisle make this bus ready for whatever the school year brings. The cockpit is designed for driver comfort and safety with ample legroom and optimized access to controls. Plus, our engine cover allows for quick, easy and tool-free access to the engine, fluids and belts, keeping routine maintenance time to a minimum. At Thomas Built we listen to our drivers, mechanics and customers to help us develop the best buses on the road. And with one of the most extensive dealer networks in the industry, there's always support nearby when you need it.

SAFETY

- Meets or exceeds FMVSS
- Roof bows extend to bottom of side panels
- 12-gauge steel rear corner posts
- Double bolted body mounting clips
- Fuel tank mounted between frame rails

DRIVABILITY/COMFORT

- Redesigned driver cockpit with ergonomic switch placement and spacious seating area
- 45-degree wheel cut
- Electronic heater control module
- Passenger loading functions grouped together
- High capacity air cleaner
- 78" headroom
- Low-profile engine cover with 12.5% aisle width improvement
- Heavily insulated engine cover
- Extra storage for personal items or emergency equipment

SERVICEABILITY

- Access door for CDL belt check
- Convenient fluid-check hatch
- Industry-first engine access hood requires no tools to remove
- Streamlined electrical center for easy identification and access
- Fuse relay centers provide circuit protection and easy diagnostics
- Exterior electrical access door
- Front access to wipers, heater core and filter
- Lights equipped with plug-in connectors
- Display of fault codes in dash
- Customer accessory module for aftermarket component hookup
- Interactive dash information center with fuel mileage, tachometer reading, etc.
- Chassis electrical easily accessible in separate compartment

DRIVER VISIBILITY

- Maximum visibility windshield of 3,812 square inches

FOREWORD

Florida School Bus Specifications are adopted as authorized under section 1006.25, Florida Statutes (F.S.), and rule 6A-3.003, Florida Administrative Code (F.A.C.). This effective date of this edition of the Florida School Bus Specifications is January 1, 2020.

GENERAL INFORMATION AND WARRANTY PROVISIONS

All public school buses (bodies and chassis) owned, operated, rented, leased and contracted for by any public school board or charter school in Florida, used to transport children to and from school or school-related events, and purchased after the effective date of this document, as specified in rule 6A-3.003, F.A.C., must:

1. Meet or exceed the minimum requirements of these specifications;
2. Meet all applicable Federal Motor Vehicle Safety Standards (FMVSS); and
3. Meet or exceed the 2015 National School Transportation Specifications and Procedures (also referred to herein as the 2015 National Specifications), except when in conflict with the requirements herein. In such cases, the requirements specified in this document shall prevail.

The requirements specified herein are the **minimum** requirements for school buses in Florida. The date used to determine the applicability of these specifications is defined as the date the vendor receives the purchase order or signs a valid sales contract with the purchaser.

All school bus chassis and body manufacturers must certify to the Commissioner of Education, Florida Department of Education (department), by letter that all school buses offered for sale to or use by the public school systems, including charter schools, in Florida meet or exceed all standards, specifications and requirements specified herein.

Used school buses purchased or operated by a public school board or charter school in Florida must meet or exceed all federal and state requirements for public school buses that were in effect on the date the vehicle was manufactured.

Under the authority of s. 316.615, F.S., certain capacity school buses owned, operated or leased by nonpublic schools in Florida are required to meet the specifications prescribed herein.

DEFINITIONS:

1. **School Bus (State Definition):** Section 1006.25, F.S., defines a "school bus" as "a motor vehicle regularly used for the transportation of prekindergarten disability program and kindergarten through grade 12 students of the public schools to and from school or to and from school activities, and is owned, operated, rented, contracted or leased by any district school board..."
2. **School Bus (Federal Definition):** Title 49 CFR Part 571.3 defines: "school bus" as "a bus that is sold or introduced in interstate commerce for purposes that include carrying students to and from school or related events."
3. **Multi-Function School Activity Bus (MFSAB):** is defined by Florida school bus specifications as a school bus constructed to FMVSS and Florida school bus specifications to be used for school-related activities. MFSABs may not be used to transport students to and from school or between schools for the purpose of attendance.
4. **MFSAB (Federal Definition):** Title 49 CFR Part 571.3 defines "MFSAB" as a school bus NOT used to transport students to and from home or school bus stops.

SCHOOL BUS TYPES:

1. **Type A:** A school bus that is constructed using a cutaway front-section vehicle with a left side driver's door. This definition includes two classifications: Type A-1, with a Gross Vehicle Weight Rating (GVWR) of 14,500 pounds or less, and Type A-2, with a GVWR greater than 14,500 pounds and less than or equal to 21,500 pounds.
2. **Type C:** A school bus that is constructed using a chassis with a hood and front fender assembly. The entrance door is behind the front wheels. This type also includes the cutaway truck chassis or truck chassis with cab, with or without a left side door, and with a GVWR greater than 21,500 pounds. Also known as a conventional school bus.
3. **Type D:** A school bus that is constructed using a stripped chassis. The entrance door is ahead of the front wheels. This type bus is also known as a rear engine or front engine transit-style school bus.

MFSAB:

Can be a Type A, C or D school bus as described above, with the following exceptions:

Identification: The bus body shall bear the words **"ACTIVITY BUS"** in a contrasting color at least 8 inches high in the area where "school bus" is normally positioned. Lettering and numbering shall conform to FMVSS and Florida School Bus Specifications and shall meet reflectivity standards. The numbering on this bus may be of a contrasting color. The name of the school system shall be displayed in at least 6-inch letters on both sides of the bus in the beltline area. School or team lettering no larger than 6 inches high and logos no larger than 12 inches high may be placed below the beltline. **NO additional SIGNS OR LOGOS** shall be applied to any area of the bus, including the bumpers and the windows.

Color: The local school board must determine and approve the color of the activity bus. The color scheme may utilize any combination of up to **three** colors. This combination may be in addition to an optional white roof. The color National School Bus Yellow shall not be used as a part of the color scheme. The bus wheels shall **not** be painted black or yellow; however, they may be painted one of the three colors selected for the bus body or may be unpainted aluminum-finished polished wheels.

Seating: Type 2 lap/shoulder seat belts are required for all seating positions, including the driver's seat.

Lighting and Warning Devices: All activity buses shall meet state and federal standards for home-to-school bus lighting and warning device requirements, with the following exceptions:

1. MFSAB's shall not be equipped with alternately flashing amber and red student warning signal lamps used for loading and unloading students.
2. MFSABs shall not be equipped with stop arm signals or crossing control arms.

WARRANTIES AND PARTS AVAILABILITY FOR NEW VEHICLES:

All warranties listed herein must apply to all school buses manufactured after the effective date of these specifications and sold through the state school bus bid purchase program. Body and chassis manufacturers' warranty policies must allow revision of warranty start date for each vehicle to the actual in-service date by the school district. Appropriate forms to update chassis warranties must be included in the owner-operator's packet supplied with the chassis and must be conveyed along with the body warranty by the body builder to the district upon delivery of the completed unit. Above requirements must apply to the basic warranties, all component warranties and any extended warranties offered or required. There must be no hours-of-use limitation on any warranty required in these specifications or the associated state bid for school buses.

Manufacturers offering school bus chassis or bodies for sale in the state of Florida must make available replacement parts for said buses for a period of no less than 120 months.

The minimum labor rate for all warranty related repairs must be **$75.00** per hour.

CHASSIS WARRANTIES:

1. The minimum chassis warranty shall be **12,000 miles or 12 months**.
2. The standard chassis warranty for Florida school bus bids shall be **100,000 miles or 60 months**.
3. Engines (including flywheel, flex plate and harmonic balancer) on types A, C and D chassis must be included with both minimum chassis warranty and standard chassis warranty as described above.
4. Pricing requests will be added to the bid for the following extended engine warranty options:
   a. pricing for 60 months/150,000 miles;
   b. pricing for 60 months/200,000 miles; and
   c. pricing for 60 months/unlimited mileage.
5. Chassis frame rails, cross members, fuel tanks, front axle I-beams and rear axle housings must be warranted for a period of 120 months, from the updated in-service date of the vehicle, 100 percent parts and labor.
6. Paint finish coats to chassis, hood, fenders, and cowl shall be warranted for 60 months/100,000 miles, 100 percent parts and labor, for adhesion, color retention and gloss retention.
7. Color Retention: During the first 36 months from the in-service date, the color coat must not shift colors more than 4 ΔE from the centroid, as specified in School Bus Manufacturers Technical Council (SBMTC) publication SBMTC-008. During the 60-month warranty period, the color coat must not shift color more than 8 ΔE from the centroid, as specified in SBMTC-008.

8. Gloss: During the first 36 months from the in-service date, the gloss reading must not fall below 60 at 60°. During the 60-month warranty period, the gloss reading must not drop below 30 at 60°.
    a. All measurements must be the average of 12 readings taken at various points on the bus, but no reading must be more than three points under the stated minimum. All readings must be taken after the bus is thoroughly washed to remove road film and dust.

BODY WARRANTIES:

1. The minimum body warranty shall be 12 months.
2. The standard body warranty for Florida school bus bids shall be for 60 months/100,000 miles, 100 percent parts and labor and shall include, but not be limited to, the following items:
    a. The total air conditioner system on any bus so equipped, including parts and labor and excluding air filters used in normal preventive maintenance. Chassis engine-driven air conditioner compressor applications must be approved in writing by the engine manufacturer, who must state that the installation will not void or reduce the engine manufacturer's warranty or extended service liabilities in any way.
    b. All mirror assemblies and mounting bracketry must be warranted against rust and corrosion and any reduction in clarity of view due to discoloration or other deterioration of the lens.
    c. All bus body electrical wiring and switches, including, but not limited to, damage resulting from wiring or connectors becoming abraded, pierced by fasteners, shorted or otherwise damaged during manufacture or use.
    d. Paint finish coats to body, hood and cowl for adhesion, color retention and gloss retention. Acceptable lower limits during the warranty period are as follows:
        i. Adhesion: During the 60-month warranty period, paint and priming compounds must not fail to adhere to the bus with normal use and care.
        ii. Color Retention: During the first 36 months of service, the color coat must not shift colors more than 4 ΔE from the centroid, as specified in SBMTC-008. During the 60-month warranty period, the color coat must not shift color more than 8 ΔE from the centroid, as specified in SBMTC-008.
        iii. Gloss: During the first 36 months of service, the gloss reading must not fall below 60 at 60°. During the 60-month warranty period, the gloss reading must not drop below 30 at 60°.
        iv. All measurements must be the average of 12 readings taken at various points on the bus, but no reading must be more than three points under the stated minimum. All readings must be taken after the bus is thoroughly washed to remove road film and dust.
    e. All emergency exit roof hatches, including defects in material and workmanship and against leakage.
    f. All passenger seat back cushions and seat frames, excluding vandalism of any exposed foam.
    g. All powered entrance doors and operating and control systems.
3. Power lift warranty minimums are listed below, and are **not included** with the standard body warranty.

POWER LIFT WARRANTY:

A statement of warranty must be provided with each lift assuring the quality of materials and workmanship of the product for at least 36 months from the updated in-service date of the vehicle. The minimum warranty must provide 100 percent parts coverage for 36 months and 100 percent labor coverage for 12 months.

MINIMUM WARRANTY OPTIONS:

Each manufacturer or dealer may include as part of its bid package credit option allowances for districts that wish to forego the aforementioned standard and extended warranty plans and purchase the minimum/base warranty option package.

TECHNOLOGY AND EQUIPMENT, NEW:

The intent of these specifications is to accommodate new technologies and equipment that will better facilitate student transportation. New technology and equipment are acceptable for use in all vehicles if:

1. Items do not compromise the effectiveness or integrity of any major safety system. (Examples of safety systems include, but are not limited to, compartmentalization, the eight-lamp warning system, emergency exits and the approved color scheme.)

2. Items do not diminish the safety of the bus interior.
3. Items do not create additional risk to students who are boarding or exiting the bus or are in or near the school bus loading zone.
4. Items do not require undue additional activity and/or responsibility for the driver.
5. Items generally increase efficiency and/or safety of the bus, generally provide for a safer or more pleasant experience for the occupants and pedestrians in the vicinity of the bus and/or generally assist the driver and makes his/her many tasks easier to perform.

CHANGES OR CLARIFICATION OF SPECIFICATIONS:

Florida School Bus Specifications may be amended pursuant to the provisions of rule 6A-3.003, F.A.C.
The School Transportation Management Section, with the concurrence of the Florida Association for Pupil Transportation (FAPT), School Bus Specifications Committee, and consistent with Florida purchasing laws and the bus bid contract, may at its discretion grant variances or exemptions and may from time to time issue clarifications of these specifications, as necessary, to provide safe, efficient and cost-effective equipment to Florida school districts and charter schools and to provide for advances in technology.

Should a clarification or interpretation of these Florida School Bus Specifications be requested, inquiries should be directed to Director, School Transportation Management Section, Florida Department of Education, 325 West Gaines Street, Suite 834, Tallahassee, Florida 32399-0400.

SECTION I

TYPE A SCHOOL BUS
MINIMUM CHASSIS SPECIFICATIONS

ALTERNATOR:
Type A buses shall have a minimum 130-amp alternator. Buses equipped with an electrically powered wheelchair lift and/or air conditioning shall be equipped with the highest rated capacity available from the chassis Original Equipment Manufacturer (OEM).

BATTERIES:
The storage battery, or batteries, shall have a minimum cold cranking capacity rating (cold cranking amps) equal to the cranking current required for 30 seconds at 0 degrees Fahrenheit and a minimum reserve capacity rating of 120 minutes at 25 amps. Higher capacities may be required, depending upon optional equipment and local environmental conditions.

BRAKE, PARKING:
On Type A chassis, the manufacturer's standard parking brake is acceptable. On Type A chassis with hydraulic brakes, the parking brake control must be mounted for easy access by the driver. On air brake models, the control valve to set the parking brakes on the rear wheels must be dash-mounted.

BRAKES, SERVICE:
Hydraulic or air brakes are permissible.

BUMPER, FRONT:
Type A buses may be equipped with an OEM-supplied front bumper.

ENGINE EQUIPMENT:
1. A dry type air cleaner is required on all engines.
2. The engine must be equipped with full-flow, spin-on or cartridge-type oil filter(s), with the filter header(s) mounted directly to engine.
3. An engine coolant recovery or deaeration system is required on all chassis. Type A diesel engines must include a means to visually check the coolant level without removing the deaeration tank cap or releasing pressure from the cooling system.
4. A warning system consisting of a light and a buzzer is required on diesel-powered Type A chassis to notify the driver of low engine oil pressure and/or coolant overheating.
5. A fuel filtration and water separator system is required on all Type A diesel engines and must remove contaminants from the fuel prior to entry into the engine. The system must have a clear sight bowl or be equipped with a water-in-fuel light to notify technicians of the presence of water, must provide a valve for draining trapped water from the system and must include an electric or manual priming pump.
6. An engine oil pressure gauge is required. It must provide accurate, easily discernible readings across the entire operating range, from hot idle to full oil pressure. The gauge on engines with idle oil pressure that under normal conditions is low must provide a clear distinction between no oil pressure and engine idle oil pressure. The gauge must be directly visible to the driver in the normal seated position and must not be mounted near the center of the dash where the service door control or its associated hardware could block visibility of the gauge.
7. Radiator and other engine coolant hoses supplied by the chassis manufacturer (not including heater hoses) must be constructed of silicone rubber or must be constructed with ethylene propylene diene monomer (EPDM) covering and aramid fiber reinforcement meeting or exceeding Society of American Engineers (SAE) standard J20R EC Class D-1. Silicone hose, if used, must include stainless steel shoe-type hose clamps or constant-torque clamps. Hoses must have markings, coloring or other visible means of distinguishing them from the standard hoses.

ENGINE PERFORMANCE REQUIREMENTS FOR TYPE A BUSES:

Each bus must be furnished with a power train that meets or exceeds the following minimum criteria when tested at the gross vehicle weight rating (GVWR) required for a given bus capacity, and with all accessories (including air conditioner compressor(s), if equipped) on and operating:

1. Startability of 20 percent;
2. Gradeability of 5 percent at 25 miles per hour;
3. Gradeability of 1.5 percent at 50 miles per hour; and
4. Top speed of 70 miles per hour minimum.

Performance must be measured with the actual completed vehicle (i.e., with the body installed, unloaded except for the driver and one passenger). The vehicle must be in drive, with the engine at idle, the service brakes applied, the emergency brakes released, and all accessories on and operating. Measurement of acceleration time must begin at the moment the throttle is applied (the throttle is to be immediately and rapidly depressed to full throttle).

NOTE: The chassis manufacturer should use the heaviest chassis/body combination meeting these specifications for the specific bus size to determine required power train components. This test is an on-road test and will be performed using the heaviest available chassis/body, depending on body(ies) supplied. At the discretion of the department, unanticipated factors or variations in test conditions affecting performance test results that are beyond the control of the chassis manufacturer may be taken into account. A Pro Link, a diagnostic computer, or a speed wheel are also acceptable tools for this test.

Maximum acceleration time (from zero mph), under the conditions specified above, must be as follows (measured in seconds):

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.4	6.2	12.0	20.0	32.2

Manufacturers may offer additional engine configurations and horsepower ratings that exceed these requirements as optional equipment.

EXHAUST SYSTEM:

The exhaust system on Type A buses must have a corrosion-resistant muffler and tailpipe. The tailpipe must exit to the left of left frame rail and behind the rear wheels. The chassis manufacturer must ensure that the exhaust design allows the exit location left of the left frame rail to be maintained after any modifications to frame length by the chassis or body manufacturer. Manufacturers must ensure that exhaust temperature exiting the tailpipe with the engine running during any normal loading or unloading activity will not produce first, second or third-degree burns on students or other individuals present. The bus must not automatically regenerate the diesel particulate filter while the bus is stationary.

FRAME SIDE MEMBERS:

Frame side members must be of one-piece construction between the front and rear spring hangers. Frame rails of Type A chassis must have a minimum tensile strength of 50,000 pounds per square inch (psi).

FRONT AXLE WHEEL SEALS:

All Type A buses greater than 14,500 GVWR must have oil-lubricated front axles and seals.

FUEL TANK:

The fuel tank filler spout must be located in an easily serviceable location.

HEADLIGHTS:
Headlights must meet FMVSS and SAE standards. All buses must be equipped with Full-Time Lights (FTL) meeting the following requirements:

1. With the ignition switch off, the headlights will operate normally and the FTL system will not operate.
2. With the ignition switch on or in the "accessory" position, and with the engine not running, the FTL must not operate.
3. With the ignition switch on and the engine running with the headlight switch off, the FTL system must operate, providing low-beam headlights and tail, clearance and identification (ID) lights.
4. In all cases, the headlight switch must override the FTL system when in the "on" position.
5. This system must include a buzzer that activates if the headlight system is on with the key switch in the "off" position.

IGNITION SYSTEM:
All buses of like chassis manufacturer must have one key, regardless of the type of key supplied to Florida purchasers.

INSULATION:
Type A chassis must include heat and noise insulation inside the bus covering the dash panel (fire wall) area to as great an extent as possible. Insulation must extend at least down to the point where the body floor connects to the fire wall, including the engine cover (doghouse), which may be insulated on the interior or exterior.

LINE-SET TICKET:
The manufacturer must include with delivery of the vehicle a line-set ticket to accurately reflect all chassis components, the Gross Axle Weight Rating (GAWR) of both front and rear axles, and the gross vehicle weight rating (GVWR).

PAINT AND FINISH:
School bus yellow paint must meet SBMTC-008 for color and must have a finished gloss rating of at least 85 at 60°F and a distinctness of image rating of an average of at least 50, measured using the same method specified for gloss under **GENERAL INFORMATION AND WARRANTY PROVISIONS**. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. Trim, lettering and the bumper must be black, except that the bumper must be striped with reflective material in accordance with National School Transportation Specifications and Procedures, Revised 2015. Rims for all buses with hub-piloted wheels must be National School Bus Yellow and powder-coated by the rim manufacturer. Lug nuts must not be painted. All stud-piloted rims must be painted black.

STEERING:
A factory-installed tilt steering wheel/column is required.

TIRES AND RIMS:
Chassis must be equipped with radial tubeless tires and must have dual rear wheels. Type A buses greater than 14,500 GVWR must use hub-piloted disc wheels. Tires and rims must conform to current standards of the Tire and Rim Association.

TRANSMISSION, AUTOMATIC:
An automatic transmission is required on all chassis. It shall be heavy-duty, with a minimum of four forward speeds, on all units. On Type A chassis, 30 capacity and larger, the transmission must be an Allison 1000 or 2000 or approved equal. An external filter in the transmission oil cooler return line is required on Allison 1000 and 2000 equipped units. All Allison transmissions require OEM-approved synthetic transmission fluid and OEM filters.

Automatic transmissions incorporating a parking pawl must have a transmission shifter interlock controlled by the application of the service brake to prohibit accidental engagement of the transmission. All non-park pawl

transmissions must incorporate a park brake interlock that requires the service brake to be applied to allow release of the parking brake.

Any requests for transmission substitutions must be approved in writing by the purchasing district and the department's School Transportation Management Section.

VOLTAGE CONTROL:
The voltage regulator must be solid state (transistorized) and readily accessible for service. A voltmeter is required with a graduated scale.

WARRANTIES:
See required warranties under **GENERAL INFORMATION AND WARRANTY PROVISIONS**.

WIRING HARNESS:
The wiring must be rated for 100 amps load and include complete wiring for the tail and stop lights. It must be designed with color coding for circuits. The fuse box door, if equipped, must have a positive latch.

TYPE A SCHOOL BUS
OPTIONAL CHASSIS EQUIPMENT

AIR-SPRUNG REAR SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung rear suspension system, when available. Rear shock absorbers are also required with this option, as on standard suspension systems.

COLLISION MITIGATION:
There shall be an option for passive and/or active electronic collision mitigation system(s), if available.

LOW-PROFILE RADIAL TIRES:
There shall be an option for all-wheel-position, highway-ribbed, low-profile, tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs.

SPARE DISC WHEEL:
There shall be an option for a spare disc wheel, which must be same size and type as the original rims.

STABILITY CONTROL:
There shall be an option for electronic stability control meeting the minimum requirements of FMVSS No. 136, if available.

STRAIGHT FLOOR CHASSIS:
There shall be an option for Type A chassis to accept straight floor bodies (i.e., bodies with no wheel wells). This type chassis must have a combination of axles, suspension, tires, wheels and axle stops that ensures that the maximum upward travel of the rear suspension in normal straight-ahead driving does not protrude above the top of the frame rails.

TOW HOOKS OR TOW EYES:
There must be two subcategories for this option: (1) two heavy-duty front tow hooks or tow eyes (each hook or eye must be installed by the chassis manufacturer in an approved manner to each frame rail); (2) two heavy-duty rear tow hooks or tow eyes (each hook or eye must be installed by the chassis manufacturer in an approved manner to each frame rail).

AUTOMATIC TRANSMISSION WARRANTY:
There shall be an option for extension of the transmission warranty to five years, unlimited mileage, 100 percent parts and labor. Also see GENERAL INFORMATION AND WARRANTY PROVISIONS.

SECTION II

TYPE C AND TYPE D SCHOOL BUS MINIMUM CHASSIS SPECIFICATIONS

ALTERNATOR:
Types C and D chassis with internal combustion engines shall be equipped with a heavy-duty alternator having a minimum output rating of 200 amps or higher, and should produce a minimum current output of 50 percent of the rating at engine idle speed.

Buses equipped with an electrically powered wheelchair lift and/or air conditioning shall have a minimum alternator output of 240 amps and may be equipped with a device that increases the engine idle speed when the voltage drops to, or below, a pre-set level.

BATTERIES:
The storage batteries shall have minimum cold cranking capacity rating (cold cranking amps) equal to the cranking current required for 30 seconds at 0 degrees Fahrenheit and a minimum reserve capacity rating of 120 minutes at 25 amps. Higher capacities may be required, depending upon optional equipment and local environmental conditions.

BRAKE, PARKING:
On hydraulic brake models, a parking brake is required, with the control mounted for easy access by the driver. On air brake models, a dash-mounted control valve to spring-set the parking brake on the rear wheels is required.

BRAKES, SERVICE:
Hydraulic brakes are acceptable on 29-35 capacity Type C buses. Air brakes are required on all Type C buses larger than 41 capacity, and all Type D front and rear engine buses.

BUMPER, FRONT:
Types C and D buses must have a front bumper that is black, of full width channel type, and a minimum of 8 inches wide (vertically). The bumper must have sufficient structural and mounting strength to ensure that the front of the vehicle can be lifted by means of an air bumper-type jack, without permanent deformation of the bumper, brackets, or chassis frame rail(s).

ENGINE EQUIPMENT:
1. Diesel engines must be available in at least one of the following two configurations:
    a. Parent bore type block; in-line 6 cylinder design; minimum 6.4 liters displacement.
    b. Wet sleeve type block; in-line 6 cylinder design; minimum 6.4 liters displacement.

    NOTE: Additional engines of other configurations or displacements, including gasoline, propane and CNG (not in lieu of the above), meeting all other requirements listed herein may be offered, subject to approval by the department. Electric-powered configurations may be offered and are exempt from the engine requirements listed below.

2. A dry type air cleaner is required. An air filter restriction indicator is required on diesel engines. The restriction indicator must incorporate a system that does not allow unfiltered air into the engine if the indicator cracks or breaks.
3. The engine must be equipped with a full-flow, spin-on or cartridge-type oil filter(s), with the filter header(s) mounted directly to engine.
4. An engine coolant recovery or deaeration system is required on all chassis. Diesel engines must include a means for visually checking the coolant level without removing the deaeration tank cap or releasing pressure from the cooling system.

5. A warning system consisting of a light and a buzzer is required on gasoline, propane, CNG and diesel-powered chassis to notify the driver of low engine oil pressure and/or coolant overheating.
6. A fuel filtration system with a water separator is required on diesel engines and must remove contaminants from the fuel prior to entry into the engine. The system must have a clear sight bowl or be equipped with a water-in-fuel light to notify technicians of the presence of water, must provide a valve for draining trapped water from the system, and must include an electric or a manual priming pump.
7. An engine oil pressure gauge and a coolant temperature gauge are required. The oil pressure gauge must provide accurate, easily discernible readings across the entire operating range, from hot idle to full oil pressure. Gauges on engines with idle oil pressure, which under normal conditions is low, must provide a clear distinction between no oil pressure and engine idle oil pressure. Gauges must be directly visible to the driver in the normal seated position and must not be mounted near the center of the dash where the service door control or associated hardware could block visibility of the gauges.
8. Radiator and other engine coolant hoses supplied by the chassis manufacturer (not including heater hoses) must be constructed of silicone rubber or ethylene propylene diene monomer (EPDM) covering and aramid fiber reinforcement meeting or exceeding SAEJ20R EC Class D-1. Silicone hose, if used, must include stainless steel shoe-type hose clamps or constant-torque clamps. Hoses must have markings, coloring or other visible means of distinguishing them from standard hoses.
9. Manufacturers must use the largest capacity oil pan available for each engine configuration in order to achieve the longest duration oil change interval.

ENGINE PERFORMANCE REQUIREMENTS:

Each bus must be furnished with a power train that meets or exceeds the following minimum criteria when tested at the GVWR required for a given bus capacity, and with all accessories (including air conditioning compressor(s), if equipped) on and operating:

1. Startability of 20 percent;
2. Gradeability of 5 percent at 25 miles per hour;
3. Gradeability of 1.5 percent at 50 miles per hour; and
4. Minimum top speed of 60 miles per hour.

NOTE: The chassis manufacturer should use the heaviest chassis/body combination meeting these specifications for the specific bus size to determine required power train components. This test is an on-road test and will be performed using the heaviest available chassis/body, depending on body or bodies supplied. At the discretion of the department, unanticipated factors or variations in test conditions affecting performance test results that are beyond the control of the chassis manufacturer may be taken into account. A Pro Link, a diagnostic computer or a speed wheel are also acceptable tools for this test.

Maximum acceleration time (from zero mph), must be as follows (measured in seconds): Performance must be measured with the actual completed vehicle (i.e., with body installed, unloaded except for the driver and one passenger). The vehicle must be in drive, with the engine at idle, the service brakes applied, the emergency brakes released, and all accessories on and operating. Measurement of acceleration time must begin at the moment the throttle is applied (the throttle is to be immediately and rapidly depressed to full throttle).

29-77 Capacity Types C and D:

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.4	6.2	12.0	20.0	32.2

78-90 Capacity Type D:

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.7	7.1	12.0	20.0	32.2

Manufacturers may offer additional engine configurations and horsepower ratings that exceed these requirements as optional equipment.

EXHAUST SYSTEM:
The exhaust system must have a corrosion-resistant muffler and tailpipe. The tailpipe must exit to the left of left frame rail and behind the rear wheels. Manufacturers must ensure that exhaust temperature exiting the tailpipe with the engine running during any normal loading or unloading activity will not produce first, second or third-degree burns on students or other individuals present. The bus must not automatically regenerate the diesel particulate filter while the bus is stationary. Also see Section III, Electrical Equipment and Wiring.

FRAME SIDE MEMBERS:
Frame side members must be of one-piece construction between the front and rear spring hangers. Frame rails must have a minimum tensile strength of 50,000 pounds per square inch (psi).

FRONT AXLE LUBRICATION:
All buses must have oil-lubricated front axle hubs, providing an externally visible means of checking the lubricant level.

HEADLIGHTS:
Headlights must meet FMVSS and SAE standards. All buses must be equipped with Full-Time Lights (FTL) meeting the following requirements:

1. With the ignition switch off, the headlights will operate normally and the FTL system will not operate.
2. With the ignition switch on or in the "accessory" position, and with the engine not running, the FTL must not operate.
3. With the ignition switch on and the engine running with the headlight switch off, the FTL system must operate, providing low-beam headlights and tail, clearance and identification (ID) lights.
4. In all cases, the headlight switch must override the FTL system when in the "on" position.
5. This system must include a buzzer that activates if the headlight system is on with the key switch in the "off" position.

HOOD:
Engine hood on Type C buses must not require more than 20 pounds of force to open or close.

IGNITION SYSTEM:
All ignition switches must be keyed alike. All buses of like chassis manufacturer and type must have one key.

INSULATION:
Type C chassis must include full width and height heat and noise insulation on the inside or outside of the bus covering the dash panel (firewall) area to as great an extent as possible and at least up to the top of the firewall and down to the point that the body floor connects to the firewall, including the engine cover (doghouse). Type D Front Engine buses must include complete heat and noise insulation of the doghouse area.

LINE-SET TICKET:
Manufacturer must include with delivery of vehicle a line-set ticket to accurately reflect all chassis components, GAWR of both front and rear axles, and GVWR.

PAINT AND FINISH, TYPES C and D CHASSIS:
School bus yellow paint must meet SBMTC-008 for color and must have a finished gloss rating of at least 85 at 60° and a distinctness of image rating of an average of at least 50 measured using the same method specified for gloss under GENERAL INFORMATION AND WARRANTY PROVISIONS. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. Trim, lettering and bumper must be black, except that bumper must be striped with reflective material in accordance with National School Transportation Specifications and

Procedures, Revised 2015 and Procedures or these specifications. Rims must be powder-coated, National School Bus Yellow, by the wheel manufacturer. Lug nuts must not be painted.

NOTE: MFSAB is excluded from the school bus yellow color requirement of this section, however, all other paint rating requirements shall apply. See MFSAB requirements under **GENERAL INFORMATION AND WARRANTY PROVISIONS** beginning on page 1.

RADIATOR FILLER TUBE:
The radiator filler must be located for ease of service from the engine compartment on Type C and Type D rear engine buses. It must be located for ease of service from outside the bus on Type D front engine buses.

STABILITY CONTROL:
Electronic stability control meeting the minimum requirements of FMVSS No. 136 is required.

STEERING:
A tilt steering wheel/column is required.

TIRES AND RIMS:
Chassis must be equipped with radial tubeless tires mounted on hub-piloted disc wheels. All wheels of 8.25 inches or greater width must be two hand-hold wheels. Tires and rims must conform to current standards of the Tire and Rim Association (see Chassis Specifications Charts for sizes). See PAINT AND FINISH for wheel color information.

TRANSMISSION, AUTOMATIC:
An automatic transmission is required on all chassis as specified:

1. Type C 29-47 capacity, Allison PTS 2100, 5 speed or Ford 6R140, 5 speed or approved equal.
2. Type C 65-78 capacity, Allison PTS 2500, 5 speed or Ford 6R140, 5 speed or approved equal.
3. Type D 71 capacity front engine, Allison PTS 2500, 5 speed or approved equal.
4. Type D 78-89 capacity front engine, Allison PTS 2500, 5 speed or approved equal.
5. Type D 72 capacity rear engine, Allison PTS 2500, 5 speed or approved equal.
6. Type D 78-89 capacity rear engine, Allison PTS 3000, 6 speed or approved equal.

All requests for transmission substitutions must be approved in writing by the purchasing district and by the department's School Transportation Management Section.

Allison PTS 2000 series transmissions must include an external spin-on type, vertically mounted transmission fluid filter. The shifter must be dash- or console-mounted and must be either a T-handle or push-button design.

Allison PTS 3000 series transmissions must have at least five speeds enabled for front engine Type D and six speeds for rear engine Type D.

All transmissions require synthetic or OEM approved equal transmission fluid and must use OEM filters.

Automatic transmissions incorporating a parking pawl must have a transmission shifter interlock controlled by the application of the service brake to prohibit accidental engagement of the transmission. All non-park pawl transmissions must incorporate a park brake interlock that requires the service brake to be applied to allow release of the parking brake.

WIRING HARNESS:
All chassis electrical wiring must conform to current standards of the Society of Automotive Engineers, be coded by color, insulated and completely encased in convoluted loom or equivalent protective wrapping. In locations that prevent such looming, wires must be properly held in place by appropriate fasteners at intervals necessary to prevent possible damage to wire insulation. The fuse box door, if equipped, must have a positive latch. All chassis electrical

circuits must be fused per the requirements of FMVSS. Buses using multiplexed electrical systems may meet the intent of these specifications without the use of specified equipment, subject to approval by the department.

TYPE C CHASSIS:

Maximum Design (Passenger) Capacity	29LT	29	47	65	71	77
Front Axle Weight Rating (pounds)	5,000	6,000	7,000	9,000	10,000	10,000
Rear Axle Weight Rating (pounds)	10,000	13,000	15,000	19,000	19,000	20,000
Cowl to axle, minimum (inches)	123	123	162	229	250	250
Minimum tire size-Load Range; tubeless-radial ply*	225R-19.5F	10R-22.5-F	11R-22.5-G	11R-22.5-G	11R-22.5-G	11R-22.5-G
Disc wheels -- minimum rim width (inches)	6.75	7.5	8.25	8.25	8.25	8.25
Hub-piloted disc wheels for tubeless radial tires	6 stud, 5 hand hold	6 stud, 5 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold
Fuel tank minimum size (gallons)	30	30	60	60	60	60
Allison transmission series (# of forward gears) ** Must include park pawl.	PTS 1000 or 2200 (5)**	PTS 2100 (5)	PTS 2100 (5)	PTS 2500 (5)	PTS 2500 (5)	PTS 2500 (5)

TYPE D FORWARD CONTROL FRONT ENGINE:

Maximum Design (Passenger) Capacity	71	77	83	89
Front Axle Weight Rating (pounds)	10,800	12,000	12,000	12,000
Rear Axle Weight Rating (pounds)	17,000	19,000	21,000	23,000
Tires – minimum size, Load Range acceptable*	11R-22.5G	11R-22.5G	11R-22.5-G	11R-22.5-G
Hub-piloted disc wheels-10 stud, minimum rim width (inches)	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold
Minimum size fuel tank (gallons)	60	60	60	60
Allison transmission series (# of forward gears)	PTS 2500 (5)	PTS 3000 (5)	PTS 3000 (5)	PTS 3000 (5)

An automatic transmission is required on all chassis. See **TRANSMISSION, AUTOMATIC** for required specifications.
Maximum overall length of the bus must not exceed 45 feet, bumper to bumper.
*Low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs may be approved in lieu of standard conventional tubeless radial tires.

TYPE D REAR ENGINE CHASSIS SPECIFICATIONS CHART:

Maximum Design (Passenger) Capacity	72	78	84	90
Front Axle Weight Rating (pounds)	11,000	12,000	12,000	12,000
Rear Axle Weight Rating (pounds)	19,000	21,000	23,000	23,000
Tires – minimum size, Load Range acceptable *	11R-22.5-G	11R-22.5-G	11R-22.5-G	11R-22.5-G
Hub-piloted disc wheels-10 stud, minimum rim width (inches)	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold
Minimum size fuel tank (gallons)	60 gal.	60 gal.	60 gal.	60 gal.
Allison transmission series (# of forward gears)	PTS 2500 (5)	PTS 3000 (6)	PTS 3000 (6)	PTS 3000 (6)

Maximum length of vehicle must not exceed 45 feet, bumper to bumper.

*Must meet Tire and Rim Association Standards. Low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs may be approved in lieu of standard conventional tubeless radial tires.

TYPE C AND TYPE D SCHOOL BUS
OPTIONAL CHASSIS EQUIPMENT SPECIFICATIONS

AIR-SPRUNG FRONT SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung front suspension system, when available. Front shock absorbers are also required with this option, as on standard suspension systems.

AIR-SPRUNG REAR SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung rear suspension system, when available. Rear shock absorbers are also required with this option, as on standard suspension systems.

COLLISION MITIGATION:
There shall be an option for passive and/or active electronic collision mitigation system(s), if available.

ALTERNATOR, HIGHER OUTPUT:
There shall be an option for alternators having a minimum of 270 amps hot-rated output.

HIGH CAPACITY FUEL TANK:
There shall be an option for a fuel tank of higher capacity than the standard fuel tank, mounted on the right side or between the frame rails, when available.

LOW-PROFILE RADIAL TIRES:
There shall be an option for all-wheel-position, highway-ribbed, low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs.

SPARE DISC WHEEL:
There shall be an option for a spare disc wheel, which must be same size, type and color as the original rims.

TOW HOOKS OR TOW EYES:
There shall be an option for two heavy-duty tow hooks or tow eyes, installed by manufacturer on each frame rail at the front of the bus in an approved manner. The manufacturer may also offer rear-mounted tow hooks or tow eyes meeting these requirements.

STRAIGHT FLOOR CHASSIS:
There shall be an option for a chassis designed to accept straight floor bodies (i.e., bodies with no wheel wells). This type of chassis must have a combination of axles, suspension, tires, wheels and axle stops that ensures that the maximum upward travel of the rear suspension in normal straight-ahead driving does not protrude above the top of the frame rails.

TIRES:
There shall be an option for alternate brand, size and tread designs of tires when available. Optional tires must meet GAWR requirements and Tire and Rim Association Standards.

[Page Intentionally Blank]

SECTION III

MINIMUM SCHOOL BUS BODY SPECIFICATIONS

The specifications set forth in this section apply to types A, C and D school buses. Special exceptions for Type D bodies are listed at the end of this section. The completed school bus must meet all Federal Motor Vehicle Safety Standards, requirements of the State of Florida and requirements of the National School Transportation Specifications and Procedures, Revised 2015 (state specifications supersede national specifications). References to bus capacity within these specifications are for Maximum Design Capacity, as defined below under **BODY DATA PLATE**.

BATTERY DISCONNECT SWITCH:

There must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within three feet of the battery box if no A/C box is available. This switch must be accessible and operable from the exterior of the bus. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

BODY DATA PLATE:

A durable data plate must be mounted inside the body in a clearly visible location. The body data plate information must include a listing of the "Maximum Design Capacity" and the "Equipped Capacity" of the body. Maximum Design Capacity must be the maximum number of passengers the bus (body shell size) can carry, based on 12.8 inches minimum seat width per passenger, with the minimum knee room (seat spacing) permitted by FMVSS No. 222. Equipped Capacity must be the actual passenger capacity of the finished body, as equipped by the manufacturer, based on:

1. The number of total passengers the installed bench seats are designed to carry; and
2. The number of wheelchair positions installed (based on wheelchair space dimensions contained in Section IV of these specifications).
3. An example of the format to be used for Equipped Capacity is "28 + 3 WC," meaning 28 regular passenger seating positions plus three wheelchair positions.

BODY FLUID CLEANUP KIT:

Each bus must be equipped with a disposable, sealed body fluid cleanup kit mounted by a method that will retain it under a load equivalent to 20 times the weight of the kit and must be removable without the use of tools. The kit must be accessible to the driver. The kit container must be sealed with a breakable, nonreusable seal, with the following items:

1. A U.S. Environmental Protection Agency (EPA) registered liquid germicide (tuberculicidal) disinfectant;
2. A fully disposable wiping cloth;
3. A water-resistant spatula;
4. Step-by-step directions;
5. Absorbent material with odor counteractant;
6. Two pairs of gloves (Nitrile);
7. One package towelettes; and
8. A discard bag (non-labeled paper bag with plastic liner and a twist tie). This bag must be approximately 4 x 6 x 14 inches and of a non-safety color (i.e., not red, orange or yellow).

BUMPER, REAR:

The rear bumper must be of pressed steel channel at least 3/16 inch thick, 8 inches wide (vertically), and flanged 2 inches at the top and bottom, or otherwise designed to furnish equal flexural strength. It must be of wraparound design and securely fastened to each chassis rail and braced from each end of bumper to chassis rail with heavy braces. The bumper must have the structure and strength necessary to allow the unloaded vehicle to be lifted with a bumper jack without deformation or damage. The contour of the bumper must fit the contour of the body in a manner to prevent

hitching to or riding on the bumper. An appropriate seal must be applied between the bumper and the body panel, unless the gap between the bumper and the body panel is 1/8 inch or less.

DRIVER'S DOCUMENT COMPARTMENT:

On Types C and D buses, a pouch on the front side of the driver's side crash barrier with minimum dimensions of 17 x 12 x 4 inches is required. This pouch must be located to the left side of the barrier for types B and C, and to the right side of the barrier for Type D, accessible to the driver from the seated position. It must be made of the same material as the covering on the barrier and have a lid or cover with a latching device such as Velcro™ or snaps.

DRIVER'S SEAT:

All school buses must have a driver's seat equipped with a one-piece high back designed to minimize the potential for head and neck injuries in rear impacts, providing minimum obstruction to the driver's view of passengers, and meeting applicable requirements of FMVSS No. 222. The height of the seat back must be sufficient to provide the specified protection for up to a 95th percentile adult male, as defined in FMVSS No. 208. The driver contact area of the cushion and seat back must be made of soil and wear-resistant cloth material, nylon, or equivalent. The remainder of the seat may be of a different material. The seat must be centered behind the steering wheel with the backrest a minimum distance of 11 inches behind the steering wheel. The seat must be securely mounted to ensure minimal flexing of the seat and the floor panel(s).

All school buses equipped with air brakes must also be equipped with an air suspension driver's seat meeting the following additional requirements:

1. The air control for the height adjustment must be within easy reach of the driver in the seated position.
2. The seat cushion must be a minimum of 19 1/2 inches wide, must be fully contoured for maximum comfort, and have a minimum of two adjustment positions to allow adjustment of seat bottom angle.
3. The backrest must include adjustable lumbar support.
4. The seat must have a minimum of 7 inches fore and aft travel, adjustable with the driver in the seated position. This requirement applies to the seat mechanism.
5. The seat must have a minimum 4 inches up and down travel.
6. The seat back must include adjustability of tilt angle.
7. All adjustments must be by fingertip controls not requiring the use of tools.
8. Air suspension seats must be dampened by dual shock absorbers, acting independently.
9. The seat must comply with all applicable Federal Motor Vehicle Safety Standards.
10. All other buses must have a driver's seat equipped with a hydraulic and/or spring suspension base, and a minimum seat cushion width of 19 inches, and must meet the other requirements listed herein for air suspension seats.

The chassis manufacturer's standard driver's seat is acceptable for Type A buses. Also, see **GENERAL INFORMATION AND WARRANTY PROVISIONS.**

DRIVER'S SEAT BELT:

Buses must be equipped with a Type 2 lap belt/shoulder harness seat belt assembly for the driver. The design must incorporate a fixed female push-button latch on the right side at seat level, and a male locking bar tongue on the left, retracting side. The assembly must be equipped with a single, dual sensitive Emergency Locking Retractor (ELR) for the lap and shoulder belt. This system must be designed to minimize cinching down on suspension type seats. The lap portion of the belt must be anchored or guided at the seat frame by a metal loop or other means at the right side of the seat to prevent the driver from sliding sideways out of the seat. There must be a minimum of 7 inches of adjustment of the "D" loop of the driver's shoulder harness, designed to provide adequate adjustment for all sizes of drivers within the range of a 5th percentile female to a 95th percentile adult male, as defined in FMVSS No. 208. Shoulder belt tension must be no greater than is necessary to provide reliable retraction of the belt and removal of excess slack. The seat belt assembly and anchorage must meet applicable FMVSS. Seat belt material must be bright orange in color, in order to provide maximum contrast with the driver's clothing.

NOTE: The driver's seat belt assembly for Type A buses must be the manufacturer's standard Type 2 driver seat belt, meeting applicable FMVSS for school buses of 10,000 pounds GVWR and less.

ELECTRICAL EQUIPMENT AND WIRING:

All wiring must conform to current SAE standards, be coded by color and be insulated. All joints must be soldered or joined by equally effective fasteners. All wires connected directly to the battery must have the end terminals protected with heat-shrink tubing. Body wiring and connectors, including any battery cables routed by the body manufacturer, must be routed so as to eliminate the possibility of wiring and connectors becoming abraded, pierced by fasteners, shorted or otherwise damaged during manufacture and use. All chassis and body electrical wiring must be completely encased in convoluted loom or equivalent protective wrapping. In locations that prevent such looming, wires must be properly held in place by appropriate fasteners at intervals necessary to prevent possible damage to wire insulation. A complete body wiring diagram showing the location of wires and the code of circuits for buses meeting Florida Specifications must be installed in each body. Additionally, for all school bus body optional electronic components installed in the bus, the body manufacturer must provide each district with at least one comprehensive parts and repair manual. Buses using multiplexed electrical systems may meet the intent of these specifications without the use of specified equipment subject to approval by the department. All requirements listed herein for Light Emitting Diode (LED) type lights must be for the latest generation LEDs available at the time of manufacture. Electrical components specified below must be provided, and wiring must be in circuits, as follows:

ACCESS PANEL, ELECTRICAL:

All Type C and D buses must be equipped with an electrical access panel to provide access to body electrical components and circuits.

BACKUP LIGHTS; BACKUP ALARM and DECAL:

There must be two backup lights of 4 inches in diameter, or 12.5 square inches, on the rear of all bodies meeting the following requirements:

1. They must be sealed LED lights;
2. They must use a plug connector; and
3. They must be set into the bus body (flush-mounted).

The body manufacturer must provide a backup alarm on each bus to provide audible warning that the bus is in reverse gear. The alarm must meet the requirements of SAE J994 and have a variable volume feature that allows the alarm to vary from 87 dBA to 112 dBA sound level, staying at least 5 dBA above the ambient noise level.

All buses must have a decal in full view of the driver indicating that the bus is equipped with a backup alarm.

BRAKE/TAIL LAMPS, LARGE:

Buses must be equipped with two combination LED type brake/tail lamps of a minimum of 7 inches in diameter or 38 square inches, mounted as high and spaced as far apart laterally as practical, below the window line, but not less than three feet measured from the center of the lamps. Also, they must use a plug type connector meeting FMVSS and SAE standards.

BRAKE/TAIL LAMPS, SMALL:

Buses must be equipped with two combination brake/tail lamps of 4 inches in diameter or 12.5 square inches, meeting FMVSS. Light intensity must at least equal Class A turn signal units. These lights must be LED lights with smooth exterior lens surfaces. They must use a plug connector and be set into the bus body.

CIRCUIT BREAKERS:

All body electrical circuits must be fused per the requirements of FMVSS. The main body electrical circuit must be protected by a manually resettable circuit breaker or fusible link.

CLEARANCE AND IDENTIFICATION LIGHTS:

All clearance and identification lights must meet current SAE requirements and FMVSS and must:

1. Be sealed LED lights.
2. Be surface-mounted with Lexan™, polycarbonate, or other non-corrosive material guard to prevent breakage. Lights set into the body do not require guards.
3. Use a plug connector.
4. Be activated by the headlight circuit.

CONTROL PANEL LIGHTING:

The control panel or switches supplied by the body manufacturer must be illuminated and have a control for varying the illumination to the control panel or switches.

EMERGENCY EXIT BUZZER:

Emergency door and emergency window buzzers must be connected to the accessory side of the ignition switch.

HEATER/DEFROSTER:

There must be a heater mounted in the front of the bus. A supplemental heater may be installed in any bus. All heaters must provide evenly distributed heat throughout the bus body, provide defrosting for the windshield and entrance door and meet the following performance standards:

1. Heaters must have capabilities of providing evenly distributed heat and creating a temperature rise to 50° F inside the body shell when soaked in an ambient temperature of 0° F for 15 hours. Heater performance must be measured as follows:
    a. Temperature measurement must be taken 39 inches inward from side walls, 39 inches inward from windshield and rear door, and 36 inches above floor. Heat must be evenly distributed through the aisle area.
    b. Temperature must rise to 50° F inside (when soaked in ambient temperature of 0° F for 15 hours) in 20 minutes when 170° F hot water is applied at the rate of 3 gallons per minute at a maximum of 6 psi pressure.
2. Defrosters – Must meet the following criteria:
    a. Must be able to defrost the total windshield area in a reasonable period of time under all normal driving conditions.
    b. Must be directional to provide the driver capability of defrosting in the drive view area first.
    c. Defroster system must have the capability of mixing a minimum of 50 percent outside fresh air with the defrosting air.
    d. Defroster system must meet the SAE Standard J381 performance requirement.

All heater hoses must meet or exceed SAEJ20R EC Class D-1 standards. If silicone hoses are used, shoe design hose clamps must be used. Heater lines on the interior of the bus must be fully shielded to prevent scalding of the driver or passengers in the event of a hose or connection failure. The modesty panels must not obstruct heat flow from the driver's area to the passenger area of the bus; this may be accomplished by ducting or other means that retains, to the extent practical, the required full width aluminized steel panel extending down to the floor. Also see **SEATING AND MODESTY PANELS.**

A 1/4 turn ballcock coolant flow regulating valve for the heater must be installed so that its control is accessible to the driver, but in such a location as to discourage tampering by students. This valve may be remotely located if a suitable remote control system is used. Also required are 1/4 turn ballcock coolant flow regulating shut-off valves, installed in the pressure and return lines as close to the engine as possible.

The windshield defroster and defogging system must provide defogging of the entire windshield, driver's side window and entrance door glasses by using hot air taken from the heater core. Bodies that do not have defrosters providing forced heated air by means of ducting across entire base of windshield must be equipped

with an additional right-side mounted defroster fan that uses hot air from the heater. One electrical switch must be provided to simultaneously turn on or off any fan(s) providing hot air for defogging of the windshield, driver's side window and entrance door glass.

NOTE: Type A buses must have a fresh air type heater and defroster system as installed by the chassis manufacturer.

INTERIOR LIGHTS:
There must be at least four recessed flush-mounted interior lights in the passenger compartment of the bus, operated by one switch mounted on the control panel. If more than six lights are used, then an additional switch may be added to control these lights. There must also be two recessed flush-mounted interior lights mounted in the driver's area of the bus (to the left and right of the centerline of the bus), operated by a separate switch mounted on the control panel. Lenses for all interior lights must be Lexan™ or other polycarbonate material. All interior lights must be LED lights.

LICENSE PLATE LAMP:
Must be LED and may be combined with one of the required combination brake/tail lamps.

MASTER SWITCH FOR BODY ELECTRICAL CIRCUITS AND OTHER SWITCHES:
All bodies must be equipped with an electrical circuit master switch that will turn body circuits ON and OFF by means of a solenoid (relay) controlled by the ignition switch. There must also be a manual noise abatement switch installed in the control panel, labeled and alternately colored, and wired into the activation circuit for the master body circuit solenoid. This must be an on/off switch that deactivates all body equipment that produces noise, including, at least, the AM/FM radio, heaters, air conditioners, fans, and defrosters. This switch must not deactivate safety systems such as windshield wipers or lighting systems. On types C and D buses there must also be a switch mounted in a location inaccessible to the driver to manually start the diesel particulate filter regeneration process. This switch must be appropriately labeled.

POST-TRIP PASSENGER CHECK SYSTEM:

System Requirements:

1. The bus must be equipped with a system to require the driver to walk to the rearmost interior of the bus after each trip to deactivate the system via a push button and to ensure that no passengers are left on the bus. The system must interconnect with the entrance door (and the driver's door on Type A buses) and immediately activate if the door is opened when the system is armed.
2. The system must have an indicator light in view of the driver that is illuminated when the system is armed. The system must be armed any time the bus is in service transporting students. This may be accomplished through the use of any reasonable method, such as recording a speed above 20 MPH or exceeding 10 minutes of operation with the door closed. In all cases, the system must arm itself after 10 minutes of operation, and/or any time the red student warning lights are activated.
3. The system may not be disarmed until the vehicle ignition switch has been switched to the "off" position. The system must not be activated if the ignition switch is placed in the accessory position or if the bus is restarted.
4. The system must turn on the interior lights when the ignition switch is turned to the "off" position. The lights must remain on for 60 seconds after system deactivation.
5. The system must not have a bypass.
6. The system must sound the vehicle horn and flash the headlights if the driver fails to deactivate the system within 60 seconds of turning the ignition off. Type A buses may activate the red student warning lights in lieu of the headlights.
7. The system must be disarmed by the use of a push button switch placed on the left rear bulkhead or above the left rear passenger window for types A, C, and D front engine (FE) buses. The push button must be placed above the left rear passenger window for Type D rear engine (RE) buses. This button must be clearly marked.

System Definitions:

1. Armed = The system is functioning and is ready to alarm.
2. Disarmed = The system is off and inactive.
3. Activated = The horn is blowing and the lights are flashing.
4. Deactivated = The disarm switch at the rear of the bus has been operated by the driver.

System Functionality:

1. The system must be fully automatic in function and must not provide for manual bypass or override capability under any circumstances.
2. From the bus sitting still with ignition key in the "off" position:
    a. With the ignition key switched to the "accessory" position, the system remains disarmed.
    b. With the ignition key switched to the "on" position (engine remaining off), the system remains disarmed.
    c. With the ignition key switched to the "on" position (engine running) and the bus operated under 20 MPH, the system remains disarmed.
    d. With the ignition key switched to the "on" position (engine running) and the bus operated over 20 MPH or for more than 10 minutes of continuous operation (or other reasonable operational trigger mechanism), the system is armed.
3. From bus having been operated over 10 minutes, no longer moving, with the entrance door (and driver's door, if equipped) closed, the ignition key in the "on" position (engine running) and the system armed:
    a. With the ignition key switched to "off" position (engine off), the interior dome lights are immediately illuminated.
    b. With the ignition key switched to the "off" position (engine off) and the ignition key switched back to the "on" position (engine off or restarted) within 60 seconds, the interior dome lights are extinguished and the system remains armed, but flashing lights and horn alarms are not activated.
    c. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated and entrance door (or driver's door, if equipped) opened, flashing light and horn alarms are activated.
    d. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated and the driver taking no action for 60 seconds, the flashing lights and horn alarms are activated.
    e. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated, and driver walking to the rear of the bus and disarming the system within 60 seconds, the system is disarmed and no flashing lights and horn alarms are activated.
4. Once the flashing lights and horn alarms are activated, they can be deactivated only by disarming the system at the rear of the bus.
5. The interior dome lights are extinguished 60 seconds after the system is disarmed.

STUDENT WARNING LIGHTS, STOP ARMS, STUDENT CROSSING ARM, AND SYSTEM CONTROLS AND OPERATION:

Student Warning Lights:

Must be dual-mounted side by side on all corners of bus roof caps. Mounting must be as high as practical on the top and as near the outer edge of the bus, as curvature permits. The lamps must be securely mounted. There must be a black background that is at least 1¼ inches wide. The lamps installed in the outboard locations must be red; the lamps installed in the inboard locations must be amber. The lamps must be clearly visible in bright sunlight for a minimum of 500 feet. Additionally, student warning lights must:

1. Have light assemblies of a flat back design. Cutouts in roof caps must be no larger than necessary to accommodate the student warning lights wires. A flush-mounted design is acceptable.
2. Use strobing LED bulbs.

3. Be 7 inches in diameter or 38 square inches minimum.

System Controls:

Must be equipped with the following driver-actuated controls:

1. Master switch – provides means for deactivating the entire system, as would be required when opening the door at a railroad grade crossing.
2. Control switch – three positions: OFF, AMBER and RED. The switch may be a rocker, pull-type, or other switch providing three positions. This switch must be separated from the master switch by at least one inch and colored red.
3. Switch actuated by the service door.
4. Controls must provide for the combinations of switch positions and conditions of student warning lights, stop arm(s), stop arm lights and audible alarm, as indicated on the chart below.

NOTE: The system must not be designed in such a way that the operator is required to actuate the controls in a particular sequence to achieve the desired combination of conditions. For example, if the driver places the three-position switch in the AMBER position, with the master switch ON, it must not be required that the three-position switch be moved to RED or that the service door be opened in order to deactivate the AMBER lights. In this example, the driver must be able to deactivate the AMBER lights by going directly from the AMBER to the OFF position.

With Master Switch, Control Switch, and Service Door In The Following Positions:					Condition of Stop Arm(s), Stop Arm Lights, Amber and Red Student Warning Lights and Audible Alarm Must Be:			
	MASTER SWITCH POSITION (ON or OFF)	CONTROL SWITCH POSITION (three positions: off, amber or red)	SERVICE DOOR POSITION		STOP ARMS, STOP ARM LIGHTS	AMBER STUDENT WARNING and PILOT LIGHTS	RED STUDENT WARNING and PILOT LIGHTS	AUDIBLE ALARM
1	ON	OFF	CLOSED	1	RETRACTED, OFF	OFF	OFF	OFF
2	ON	OFF	OPEN	2	RETRACTED, OFF	OFF	ON	ON
3	ON	AMBER	CLOSED	3	RETRACTED, OFF	ON	OFF	OFF
4	ON	AMBER	OPEN	4	RETRACTED, OFF	OFF	ON	ON
5	ON	RED	CLOSED	5	EXTENDED, ON	OFF	ON	OFF
6	ON	RED	OPEN	6	EXTENDED, ON	OFF	ON	OFF
7	OFF	ANY POSITION	ANY POSITION	7	RETRACTED, OFF	OFF	OFF	OFF

Student Crossing Arm:
Is required and must be:

1. Air-operated on all air brake-equipped buses.
2. Electrically operated on all hydraulic brake buses.
3. Mounted to the far right side of the front bumper and open to an angle perpendicular to the bus.
4. Designed so that all components and connections are weatherproofed.
5. Removable with hand tools for towing of the bus.
6. Designed to meet or exceed SAE Standard J1133.
7. Constructed of noncorrosive or nonferrous material or treated in accordance with the body sheet metal standard.
8. Designed so that it has no sharp edges or projections that could cause hazard or injury to students.
9. Designed and equipped with a four-point mounting to the front bumper.
10. Designed so that the arm extends approximately 72 inches from the front bumper when in the extended position. The arm must be constructed of a yellow polycarbonate material or noncorrosive tubing painted yellow. Approximate dimensions of the arm must be 65 x 3 x 1 inches.
11. Designed and installed to extend simultaneously with the stop arms by means of the stop arm control and retract within eight seconds of deactivation.
12. Equipped with a magnetic device or other assembly attached to the bumper at the end of the arm to provide a positive latch for the arm when not in use; this device must also reduce the tendency of the arm to rattle and vibrate when not in use.

Stop Arm Signals:
For all 47 capacity and larger buses, there must be installed on the left outside of the body two approved octagonal stop-signal arms, each equipped with two double-faced alternately flashing LED strobe lights for signaling a student stop. All buses of less than 47 capacity must be equipped with one stop arm. Bodies to be mounted on chassis with hydraulic brakes must be equipped with electrically actuated stop arm(s). Air-powered stop arms must be provided as standard equipment on all buses equipped with air brakes. The rear stop arm location on buses equipped with dual stop arms must be the left side of the bus, as close as practical to the left rear corner of the body. The light lenses of all stop arms must be RED. Air lines must not be readily accessible to students inside or outside the bus and must be made of copper, steel or nonmetallic materials meeting SAE Standard J848d. Fittings must be brass. Stop signal arms must meet the applicable requirements of SAE J1133. For controls, see the requirements above under System Controls. Stop arms must retract within six seconds of deactivation. For color, see **LETTERING AND TRIM**.

STEP WELL LIGHT:
A step well light must illuminate the bus entrance and be adequately protected. The step well light must be activated automatically when the service door is opened and the clearance lights are on. The step well light must be LED. See **SERVICE DOOR** for further operational requirements.

STROBE LIGHT:
A required white flashing LED strobe lamp must be installed on the roof of a school bus at a location centered (laterally) and approximately 48 inches (longitudinally) from the rear edge of the rear roof cap. If the bus is equipped with a roof hatch or other roof-mounted equipment falling within the above mentioned measurements, the strobe lamp may be located directly behind that equipment. The lamp shall have a single clear lens emitting light 360 degrees around its vertical axis, meeting the requirements of SAE J845. It may not extend above the roof more than the maximum legal vehicle height, as described in s. 316.515(2), F.S. A manual switch and a pilot lamp shall be included to indicate when the lamp is in operation.

TURN SIGNAL LAMPS:
Front turn signal lights must be amber LED lights (if available); side turn signal lights must be amber LED lights on each side of the bus, mounted rearward of the service door on the right side and rearward of the front stop arm on the left side. All buses over 30 feet in length must have two amber LED turn signal lights mounted on each side of the bus. The rearmost side turn signals on buses over 30 feet long must be mounted at or rearward of the centerline of the rear axle. Rear turn signal lights must be plug-in LED lights that meet current SAE requirements and comply with FMVSS.

TWO-WAY RADIO:
Use of a two-way radio communications system approved by the school district is acceptable.

VIDEO CAMERA MONITORING SYSTEMS:
Districts may install video cameras in buses provided the installed system:

1. Is mounted securely in the bus;
2. Is outside the federal head impact zone (FMVSS No. 222);
3. Is located in an area not likely to cause student injury; and
4. Has no sharp edges or projections.

NOTE: This is the end of the **ELECTRICAL EQUIPMENT AND WIRING** section.

EMERGENCY EXITS:

1. The emergency door on all types A, C and front engine Type D buses must be located at the center of the rear of the bus and have a minimum horizontal opening of 24 inches and vertical opening of 48 inches.
2. The emergency door must be hinged on the right-hand side using hinge(s) with a brass or rust-resistant rod.
3. The outside control must consist of a nondetachable opening device designed to prevent "hitching to."
4. The emergency door must be equipped with a slide bar, cam-operated latching device having a minimum stroke of one inch.
5. The switch for the warning system must be enclosed in a metal case or durable case of other material, with rounded, protected edges. Wires leading from the switch must be concealed in the bus body. The switch must be installed so that the plunger contacts the farthest edge of the slide bar in such a manner that any movement of slide bar will immediately close the switch circuit and activate the buzzer.
6. The door latch must be equipped with an interior handle that extends approximately to the center of the emergency door. It must lift up to release.
7. There must also be attached to the door, in such a way that it is visible inside and outside the bus, labeling as follows: "This door is equipped with a hold-open device. To release, open the door to its fully opened position." This sticker must be red on a white background, and the lettering must be a minimum height of 1/2 inch.

Each non-lift bus must also be equipped with push-out type emergency exit side windows of similar design to the standard side windows, except for the following:

1. The emergency window assemblies must be hinged on the forward side.
2. No emergency window may be placed next to any child safety seat.
3. Emergency windows must be installed in the following quantity on non-lift buses:
   a. 0 to 40 capacity — 1 window per side
   b. 41 to 72 capacity — 2 windows per side
   c. 73 to 90 capacity — 3 windows per side

Buses 35 capacity and smaller must be equipped with one roof hatch emergency exit/ventilator. Buses over 35 capacity must be equipped with two roof hatch emergency exit/ventilators. Specifications for roof hatches must be as follows (also see **GENERAL INFORMATION AND WARRANTY PROVISIONS**):

1. Hinge(s) must be located on forward and rearward side of hatch.

2. The design must provide a "partially open" position along the full width of the hatch, adequate to allow air to enter or exit and, thereby, ventilate the bus by opening either the front or rear of the hatch. The hatch must allow for partial opening on any of its four sides and on all four sides simultaneously.

Buses equipped with a lift are not required to be equipped with push-out emergency exit windows unless mandated by FMVSS No. 217. Lift buses may be equipped with push-out type emergency exit windows based on the capacity of a comparably sized non-lift bus.

EMERGENCY ROADSIDE REFLECTORS:

There must be three reflector warning devices, meeting the requirements of FMVSS No. 125, mounted in a location accessible to driver in the front section of the bus, and stored in a container. The container must be sealed with a breakable, nonreusable seal.

FIRE EXTINGUISHER:

A dry-chemical fire extinguisher with a gauge and designed to restrain tampering must be mounted in a place accessible to the driver, preferably near the service door.

The fire extinguisher must bear the label of Underwriters Laboratories, Inc., showing a rating of no less than 2A-10BC.

FIRST-AID KIT:

The bus must carry a Grade A, moisture- and dust-proof first-aid kit, mounted in such a manner that it can be easily detached and made portable and in an accessible place in the driver's compartment. The container must be sealed with a breakable, nonreusable seal and the contents must be as follows:

1 inch bandage compress (e.g., Band-Aids)	two packages
40 inch triangular bandage with two safety pins	one package
4 x 4 inch sterile gauze pads	two packages of six each
Rolled curlex bandage each in length	two inches x six yards
1 inch roll adhesive tape in length	one roll 2 1/2 yards
Eye dressing packet	two packages

FLOOR AND FLOOR COVERING:

1. The floor must be level from front to back and from side to side except for the wheel housings, the toe board and the driver's seat platform.
2. All sills must be permanently attached to the floor.
3. The driver's compartment plate on conventional bodies must be removable, installed level with the bus floor. All components requiring servicing must be readily accessible. Openings in the bus floor to meet this requirement must be reinforced to maintain the full strength of the unpunctured floor.

   NOTE: Items 1-3 above, do not apply to Type A Buses less than 14,500 GVWR. For Type A buses less than 14,500 GVWR, the floor must provide adequate and firm support for seat legs and must have a minimum 1/2 inch marine grade or pressure-treated plywood, securely mounted to the floor. Basic floor construction of Type A buses must be the manufacturer's standard, meeting applicable FMVSS.

4. The floor covering must be resistant to ultraviolet light, ozone and moisture and have a minimum tensile strength of 1,200 pounds per square inch (psi) and a minimum elongation of 100 percent. Floor covering must be abrasion-resistant and slip-resistant and have a minimum coefficient of friction of 0.85 as measured under ASTM D1894 or 0.65 as measured under ASTM D2047.
5. The floor covering from the top step landing area to the emergency door (or rear seat on Type D rear engine buses) must be ribbed aisle, non-skid and wear-resistant, fire-resistant elastomer. Elastomer floor covering must meet Federal Specification ZZ-M-71d.

6. The landing area at the top of the steps must be ribbed elastomer, which must extend to the ribbed aisle floor cover. The leading horizontal edge, or nosing, must be white or yellow ribbed elastomer or other contrasting color and must have an integral 90 degree turn-down with a square leading edge matching the step treads.
7. All joints or seams in the floor covering must be covered with non-ferrous metal, minimum 1 inch wide, and the driver's compartment, except at the cowl, must have a special, approved molding. Alternate materials may be used if they provide equivalent durability. The molding must be securely attached to prevent a tripping hazard.
8. Manufacturers may use seamless one-piece floor rubber with an integral ribbed aisle meeting the requirements in 4 and 5. Aisle molding is not required when the bus is equipped with one-piece floor rubber.
9. All holes in the chassis firewall and around the transmission cover and engine housing must be adequately sealed.
10. A commercially available truck bed liner material meeting the requirements in 4 and 5 may be substituted for the required flooring material.

FUEL FILLER OPENING:
An opening of adequate size and design must be provided over fuel filler. Also see **LETTERING AND TRIM**.

GRAB HANDLE AT ENTRANCE:
A suitable grab handle or rail must be provided at the front entrance, securely mounted inside of the body. Grab handles must be made of round stainless steel, 1 inch outside diameter (OD). The grab handle and mounting must be designed to minimize the possibility of students' clothing or personal items becoming lodged or caught upon exiting the bus, in order to reduce the risk of injury or fatality to passengers from being dragged outside the bus.

INSULATION AND SEALING OF JOINTS:
The overlap of the edge of the exterior roof and side panels, and also the top edge of rub rails, must be sealed to prevent moisture, dust and other contaminants from entering the joints and the bus.

LETTERING AND TRIM:
Trim on the three rub rails below the beltline and all lettering must be black (except for stop signs). Entrance door frames, pilaster panels and other trim panels may be painted black if approved by the department. The letters of the words "SCHOOL BUS" on the top front and rear section of the bus body must be 8 inches high and correspond to the Series B, Standard Alphabet (see the National School Transportation Specifications and Procedures, Revised 2015). "(Name of District) DISTRICT SCHOOLS," on each side of the bus body at the beltline must be in 6 inch minimum letters. Private and charter schools may alternately affix the name of the school in the aforementioned format and location. Bus numbers must be in 6 inch minimum height and on each side and on the front bumper and rear of the bus body. "**EMERGENCY DOOR**" must be in 2 inch letters at the top or directly above the door, visible inside and outside of bus. Lettering to indicate the fuel type must be located on the body adjacent to the fuel filler opening using minimum 1 inch letters. The words "**STOP WHEN RED LIGHTS FLASH**" must be displayed on the back of all buses in 6 inch black letters. Also, see the lettering requirements for emergency exits, including roof hatches and push-out windows, under **EMERGENCY EXITS**. Districts may add an **American flag decal** to the exterior of the bus. If used, it must be no more than 6 x 10 inches and be located in front of the district name on the beltline of the bus. Also see United States Public Law 4USC7.

The front stop signal arm (both sides of arm) and rear stop arm (rear side only) must have a red background with a reflectorized white border; the letters "**STOP**" must be in 6 inch white reflectorized letters. Both sides of the front stop arm and the rear side of the rear stop arm must have reflectorized red sheeting of high-intensity material. The front side of the rear stop arm must be painted red.

NOTE: Buses must include the lettering and trim specified above, and are limited to lettering, trim, symbols, markings, and coloration specified in the National School Transportation Specifications and Procedures, Revised 2015.

LICENSE HOLDER:
A license holder must be included on the left rear outside of the body, with a suitable method for mounting the license tag.

LOCKUP DEVICES:
Any emergency door equipped with a locking device must have an ignition interlock that prevents starting the engine when the door is locked, meeting requirements of FMVSS No. 217. Emergency exit windows must not be operable (under normal conditions) from outside the bus and must not be equipped with any locking device.

MIRROR SYSTEM:

1. **Interior Mirror:** Must provide adequate viewing of the entire length and width of the interior of the bus and be at least 6 x 30 inches. The mirror must meet the following requirements:
    a. Meet or exceed American National Standards Institutes (ANSI) Z97.1 requirements for safety glazing in mobile environments and be bonded to the mirror housing.
    b. Include a heavy-duty, single-piece mounting bracket that ensures stability.
    c. Housing must be low-gloss black.
    d. Incorporate a single knob (thumbwheel) adjustment to allow the driver to reposition the mirror without the use of tools.
    e. Have a soft gasket type frame that is bonded to the housing.

    NOTE: Interior mirror on Type A buses must be a minimum of 50 square inches and meet the above requirements.

2. **Exterior Mirrors:**
    Each school bus must be equipped with a system of exterior mirrors complying with FMVSS No. 111 and meeting the following requirements:
    a. **Cross/Side-View Mirror System:** This mirror system must incorporate the following features and requirements:
        i. Only one mirror is to be installed at each front corner of the bus.
        ii. Mirrors must not reflect excessive glare from the bus headlights or the sun into the driver's eyes. Mirrors must be a 1/4 sphere or shaded 1/2 sphere design.
        iii. Stainless steel or non-corrosive fasteners must be used in the construction of the mirror assembly and to hold the brackets to the body.
        iv. Mirror stabilizer brackets on all Type C composite hoods must use through-the-fender rubber or nylon mounts with stainless steel caps to reduce mirror vibration and erosion of the hood material.
        v. All exterior mirror fasteners, mounts and bracketry must be of non-corrosive material.
    b. **Rear Vision Mirror System:** A rear vision mirror system must be provided that incorporates the following features and requirements:
        i. The system must consist of one flat and one convex mirror lens per side. Each mirror set must be mounted on a breakaway arm with a positive detent or lock.
        ii. Each of the four required mirrors in the rear vision mirror system must be electrically operated and remotely controlled from the driver's location.
        iii. All exterior mirror fasteners, mounts and bracketry must be stainless steel. Stainless steel or non-corrosive fasteners must be used in the construction of the mirror assembly and to hold the brackets to the body.
    c. **Overall exterior mirror system:** (cross/side-view and rear vision mirrors) must be isolated from vibration and be compliant with FMVSS No. 111.

NOISE REDUCTION PACKAGE:
A noise reduction package is required and must include full insulation of the ceiling, walls, and front and rear of the bus, including body bows and engine compartment, plus minimum 1/2-inch marine grade or pressure-treated plywood

or equivalent composite material securely mounted to the floor. Insulation material must be fire-resistant and of a type that will not harbor dampness.

PAINT AND FINISH:
All National School Bus Yellow paint must meet the National School Transportation Specifications and Procedures, Revised 2015 for color and have a finished gloss rating of at least 85 at 60°F and a distinctness of image (DOI) rating of an average of at least 50, measured using the same method specified for gloss under **GENERAL INFORMATION AND WARRANTY PROVISIONS**. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. School bus roofs must be painted white in color, and must meet the gloss and DOI ratings. White paint may extend to the leading and trailing edge of the roof caps, and may extend down to the drip rails. Trim, lettering and bumpers must be black except that bumpers must be striped in accordance with National School Transportation Specifications and Procedures, Revised 2015 or these specifications. Also see GENERAL **INFORMATION AND WARRANTY PROVISIONS** for warranty requirements, **LETTERING AND TRIM** and **REFLECTIVE MARKINGS**.

PANELING, INTERIOR:
Interior panel fastenings must minimize vibrations and rumble. A cove molding, which may be an extension of the body panels, must be installed covering the wall-to-floor joint beginning at the windshield post on the left side of the bus and extending along the walls around the corners to the service door on the right side. Molding must be securely fastened so that dirt will not readily work under it. The interior paneled area immediately below the window line must be aluminum-coated steel.

REFLECTIVE MARKING PACKAGE:
There must be installed a reflective marking package as specified in the National School Transportation Specifications and Procedures, Revised 2015. Striping must be installed longitudinally the length of the body at the vertical location immediately below the seat level rub rails but high enough so as to clear wheel wells, whenever possible. Short breaks in the striping at rivet locations are acceptable. Reflective markings are also required for all emergency exits, as specified in FMVSS No. 217.

RUB RAILS:
1. There must be a rub rail on each side of the bus approximately at seat level, which must extend from the entrance door post around the bus body (except for emergency door) to the point of curvature near the cowl on the left side.
2. There must be rub rails located approximately at the floor line and the bottom of the outer skirt, which must cover the same longitudinal area as the upper rub rail, except at wheel housings, but extend only to the right and left corners.
3. Rub rails must be applied outside of body panels. Pressed-in or snap-in rub rails do not satisfy this requirement.

SEATING, MODESTY PANELS (RESTRAINING BARRIERS), LAP BELTS, AND WEBBING CUTTERS:
1. Passenger seats must be mounted facing forward and provide a minimum of 12.8 inches of seat width per passenger seating position. The aisle must be 12 inches wide at a minimum. This plan of body seating must be used to determine seating capacity (see **BODY DATA PLATE**).
2. Seat spacing must meet the requirements of FMVSS No. 222. The first seat on each side of all types A, C and D buses must be equipped with FMVSS No. 225-compliant child safety seat anchorage points. All 39 inch FMVSS No. 225-compliant passenger seats must be equipped with two sets of anchorage points per bench seat. All passenger seats compliant with FMVSS No. 225 with a seat width of less than 36 inches must be equipped with one set of anchorage points per bench seat.
3. All passenger seats compliant with FMVSS No. 225 must be spaced to provide the maximum knee room (seat spacing) permitted by FMVSS No. 222. The rest of the passenger seats must provide for a minimum of 24 inches of knee room.
4. Seat padding must be secured to the frame so that it will not snag. Screws and bolts used in seat back construction must not be exposed.
5. Restraining barriers and passenger seats, including the seat back and the entire bottom cushion (including underside), must be covered with vinyl-coated material. All passenger seat assemblies and barriers must meet the requirements of the National School Transportation Specifications and Procedures, Revised 2015,

School Bus Seat Upholstery Fire Block Test. Upholstery material for all passenger seats and barriers must meet the following color standard +/- four delta E:

	III/ob	X	Y	Z	x	y
1	D65 Daylight	7.21	7.92	12.52	2606	2963
2	2	7.51	7.30	4.07	3978	3865
3	Rom Light	7.33	7.37	8.15	3207	3226

6. Buses must have an FMVSS-compliant padded restraining barrier in front of the forward-most passenger seat on each side of the bus. Also see Section V for restraining barrier requirements for buses equipped with wheelchair lifts. Restraining barriers at the entrance side and the driver's side must have a full-width, aluminized steel panel below the padded section extending down to the floor, except as specified under heater/defroster specifications (see **ELECTRICAL EQUIPMENT AND WIRING**).
7. All Type A school buses sold through the State of Florida school bus bid must be equipped with Type II, three-point seat belts in all passenger seating positions. These belt systems must meet the requirements of National School Transportation Specifications and Procedures, Revised 2015.
8. All types C and D buses must be equipped with lap belts in all passenger seating positions, meeting the following requirements:
   a. All belts and anchorages must comply with FMVSS Nos. 209 and 210.
   b. Belts must be manufacturer's standard style lap belts. The nonadjustable buckle end of each belt must be the aisle-side connection point on each passenger seat.
   c. Each two-part belt must be separately color-coded to aid in proper connection.
   d. Any belt system with parts that can be manually disassembled without the use of tools and any system that is subject to easy vandalism shall not be approved for use in Florida school buses.
   e. Retractable seat belts are permissible at the purchaser's option. If this system is specified, the retractors must be emergency locking type, and the retractors must be mounted below the seat bight. Seat bight is defined as the area close to and including the intersection of the surfaces of the vehicle seat cushion and the seat back.
   f. All federal requirements supersede any of these requirements.
   g. School districts may install restraining systems that differ from these requirements as necessary to accommodate pre-school age children and children with special needs. Such systems must comply with FMVSS Nos. 209, 210 and 213, as applicable, and must be approved by the body manufacturer.
9. All buses must also be equipped with a durable webbing cutter having a full width handgrip and a protected, replaceable blade. The required belt cutter must be mounted in a location accessible to the driver in the seated position and be easily detachable.

SERVICE DOOR:

1. The service door must be a split or jackknife type located at the right front of the bus. Doors must be securely hinged with approved heavy-duty hinges with a brass or rust-resistant rod adequately fastened to the adjoined member. Doors must have a 1 1/2 inch minimum safety gap sealed with a safety flap of approved quality. The door must extend to the bottom step and be fitted with suitable weather strip to keep water from entering the step well.
2. An air-operated entrance door must be provided on all buses equipped with air brakes. This system must have a manually operated override to enable the driver to manually open the door in the event of loss of power. Air-powered entrance doors must operate in accordance with the following table:

Ignition Switch Position	Door Switch Position	Emergency Dump Switch Position	Door Position / Status	Step Well Light Condition
Off	Any	On	Neutral	Off
Off	Any	Off	Neutral	Off
On	Closed	Off	Closed/Active	Off
On	Opened	Off	Open/Active	On
On	Closed	On	Neutral	Off
On	Opened	On	Neutral	On

3. When the key switch is in the "off" position, the air door system must not create a battery draw. All air-powered door systems must provide a rebuildable air cylinder and must operate reliably in all weather and temperature conditions. All air-powered door systems must include a method of manually adjusting the opening and closing speed and force of the doors.
4. Hydraulic brake buses must have an electrically controlled entrance door.
5. The service door must have a minimum horizontal opening of 24 inches and a minimum vertical opening of 68 inches. Immediately above the door opening there must be secured to the body panel a high-density foam rubber pad, a minimum of 3 inches in width, or an approved equal safety cushion.
6. Doors must be designed and weather strips mounted so that there is no binding or tendency for stripping to dislodge during door operation. One or two glassed-in openings must be provided in each door half with glass of same grade as specified for side windows and mounted in rubber. The bottom of the lower glass panel must not be more than 30 inches from the ground when the bus is unloaded. The top of the upper glass panel must not be more than 6 inches from the top of the door.

SIZES OF BODIES:

The height of types C and D bus bodies, from the top of the finished floor to the underside of the ceiling, at the center of the body, must be a minimum of 76 inches.

STEP WELL:

A step well of at least three steps must be built in the right front assembly, enclosed with doors extending to the bottom step. Each step must be covered with abrasion-resistant "Pebble-Top" elastomer, the base of which must be at least 3/16 inches thick, with an overall thickness of 5/16 inch bonded to a durable polymer base and otherwise constructed to provide substantial support, including the leading horizontal edge, which must be "Pebble-Top" type, and white or a color that contrasts with the step tread by at least 70 percent. The polymer backing must have an integral 90-degree turn down with a square leading edge for slip resistance. The lower (first) step height must be between 10 and 16 inches above the ground for all types A, C and D buses. Each step must be the full width of the step well at the point where the step is located. Half steps or partial steps are not acceptable.

NOTE: Two steps are acceptable on Type A buses.

STRUCTURAL DESIGN and TESTING:

1. All types A, C and D bodies must meet the requirements of FMVSS No. 221 and the requirements of the National School Transportation Specifications and Procedures, Revised 2015 Side Intrusion Test.
2. Each manufacturer of types A, C or D bodies must certify that representative configurations of its buses produced to meet these specifications comply with the testing and requirements of the Colorado Racking Load Test. See **Colorado Racking Load Test** in Appendix B.
3. Each manufacturer of types A, C or D bodies must certify that representative configurations of its buses produced to meet these specifications comply with the testing and requirements of the Kentucky Pole Test. See **Kentucky Pole Test** in Appendix C.
4. All bus bodies must be constructed to be in square and level. There must be no more than 1 inch of difference from side to side at the front and rear of the bus body (not counting any chassis lean or twist). All bodies must be mounted such that all designed body contact points are in contact with the chassis frame. All bodies must be centered on the chassis within plus or minus 1/2 inch.

SUN SHIELD:

A dual sun shield system must be provided, consisting of two independently mounted sun shields. One must be mounted above the windshield and the other above the driver's window. Each visor must have a tinted Plexiglas sun shield, minimum 6 x 24 inches, and have rounded bull-nosed perimeter edges.

NOTE: The manufacturer's standard sun visor is acceptable on Type A buses.

VANDAL BOX, SIDE MOUNTED

There must be installed on all types C and D buses an equipment compartment on the ceiling above the driver's side window, measuring approximately 1,600 cubic inches. The compartment must have a door with a positive latch and a keyed-alike lock. No safety equipment shall be mounted inside this compartment.

WINDOWS:

1. All types A, C and D buses must have tinted glass that provides the maximum tinting allowed by federal and American National Standards Institute (ANSI) standards for the windshield, the driver's side window(s) and the service door glass. Tinted glass in all windows rear of the driver's compartment must have a light transmission of approximately 28 percent.
2. An adjustable split sash window with safety glass must be mounted in the side of the bus body between each framing post. Permanent marks showing the grade of glass must be visible.
3. Movable windows must be controlled by an approved lock having a finger-touch opener, providing for ease of operation and with no sharp projections. Window latches must be replaceable or rebuildable without disassembling the complete window frame or removing the window from the body. In addition, individual window latches or repair parts must be available and part numbers included in the required body parts catalog. Window seals and visors or drip molding must be installed and provide ample protection from leakage.
4. For ventilation, the driver's window must be adjustable and equipped with a positive latch that can be secured from the inside of bus.
5. There must be installed in the rear door two windows, one upper and one lower, installed in a waterproof manner.
6. Rear side windows located at each side of the emergency door must be installed in a waterproof manner. Glass area must be large enough to provide desirable vision to the rear and must be of the same quality and grade as side windows.

WINDSHIELD:

The front body section in the area of the windshield must provide for corner vision. Glass must be laminated safety polished plate with dark tint at top, installed in a waterproof manner and slanted to reduce glare. Glass must meet current SAE specifications and FMVSS. Light tint may be used in all Type D buses in lieu of dark tint at the top.

WINDSHIELD STEPS AND HANDLES:

A step and appropriate grab handle must be installed on each front corner of the body to facilitate cleaning the windshield. The handle must be stainless steel, chrome plated or non-ferrous metal, or may be made of non-metallic material of sufficient structural and mounting strength and resistant to weathering and deterioration, and must provide for secure mounting and adequate hand hold.

NOTE: Steps and handles are not required on Type A buses under 21,500 GVWR.

WINDSHIELD WIPERS AND WASHERS:

1. Electric windshield wipers must be standard on all buses. All wipers by design and installation must provide desirable vision for drivers. Blades and arms must be of sufficient length to clear the windshield glass in the driver's direct view. One switch must control both wipers, and the switch must be located within easy reach from driver's seat, preferably on the turn signal stalk. The system must incorporate a variable delay wipe feature to allow drivers to adjust the speed and frequency of the wipers. The wiper system must be designed to move the blades away from the driver's direct view when in the parked position.
2. Windshield washers must be electrically operated. The washer reservoir must be made of hard plastic or other approved material and have a capacity of at least 1/2 gallon. Flexible plastic bags are not acceptable.

NOTE: The manufacturer's standard windshield wipers are acceptable on Type A buses.

SCHOOL BUS BODY EXCEPTIONS

TYPE D FRONT ENGINE BODY EXCEPTIONS:

1. The distance between the restraining barrier at the rear of the entrance step well and the engine cover must be a minimum of 13 inches.
2. A step, in lieu of stirrup steps, is permitted in or on the front bumper on both sides.
3. The engine cover must provide an adequate seal to the bus floor area to keep engine fumes from entering the passenger compartment and must be insulated to retard transfer of heat and engine noise. The engine cover must be hinged and equipped with a prop rod or other device so that it can be held securely in the fully open position to allow access to the engine.

TYPE D REAR ENGINE BODY EXCEPTIONS:

1. The engine compartment must be constructed to permit servicing of the engine, having one or two doors opening at the rear and louvered, with removable panels on each side of engine compartment. The engine compartment must be sealed at top and front to retard heat transfer and prevent engine fumes from entering the passenger compartment. Provisions must be made for easy removal of the engine through the rear compartment.
2. Mud flaps must be installed at the rear of the dual wheels.
3. A step, in lieu of stirrup steps, is permitted in or on the front bumper on both sides.
4. Type D Rear Engine buses are exempted from the requirement for an additional electrical compartment for air conditioner circuitry, provided the air conditioner control boards are installed in the rear package shelf area in a covered box.
5. There must be an engine access panel underneath the rear seat of all rear engine buses designed to provide access to the engine.

OPTIONAL BODY EQUIPMENT SPECIFICATIONS

AUTOMATIC VEHICLE LOCATION AND STUDENT TRACKING SYSTEM:
There shall be an approved option for a system that uses the Global Positioning System (GPS) to determine and wirelessly report the location of the bus in approximately real time. The system may also include an additional feature that will identify individual students as they board or disembark from the bus and report the locations and times.

AUXILIARY DRIVER FAN:
There shall be an approved option for a 6 inch or header-mounted squirrel cage fan to be installed and mounted to the left side of the windshield, when possible, in a location approved by the department.

BAGGAGE COMPARTMENTS:
There shall be an approved option for baggage compartments on all bodies when available. This body option must include a lock and be keyed alike with any other body option requiring use of a key.

BATTERY DISCONNECT SWITCH LABELING:
There shall be an approved option for a label to be placed on the exterior of the bus on the cover of the compartment housing the battery disconnect switch. The label background must be white with red one-inch letters with the wording **"MAIN BATTERY DISCONNECT."**

BUS LOCKUP SYSTEM:
There shall be an approved option whereby a bus can be locked at the emergency door as well as the entrance door. An ignition interlock is required for the emergency door to prevent starting the bus if the emergency door or rear window (on RE units) is locked. This body option must be keyed alike with any other body option requiring use of a key.

CEILING PANELS:
There shall be an option for full width perforated interior ceiling panels extending from the rear header panel forward to at least the front of the engine compartment.

DRIVER'S SEAT WITH INTEGRATED SEAT BELT:
There shall be an approved option for a driver's seat with a seat belt integrated into the seat back, meeting the requirements of DRIVER'S SEAT AND SEAT BELT in this section.

EXTERIOR LIGHT MONITOR:
A system of monitoring exterior lights on the front and rear of the bus from the driver's seated position is approved as an option. Such systems must include:

1. Student Warning Lamps, both RED and AMBER, front and rear
2. Tail Lamps
3. Backup Lamps
4. Rear Turn Signal Lamps
5. Stop Lamps

A system that monitors only electrical circuits and does not indicate whether the bulb is operational is not acceptable.

FUEL SUPPLY LOCK:
A lock with two keys may be installed in the fuel supply service door of the body skirt. This body option must be keyed alike with any other body option requiring use of a key.

INFANT SEATING:
There shall be an approved option for passenger seating designed to safely transport newborns, infants or toddlers, meeting all applicable FMVSS. Such seats may include, C.E. White Child Restraint Seats and other systems as approved by the department.

INTERIOR OVERHEAD STORAGE COMPARTMENTS (MFSAB ONLY):
There shall be an approved option for interior overhead storage compartments that meet the following criteria:

1. Head protection requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection, where applicable;
2. Be completely enclosed and equipped with latching door (both door and latch sufficient to withstand a pushing force of 50 pounds applied at the inside center of the door);
3. Have all corners and edges rounded, with a minimum radius of one inch, or be padded equivalent to door header padding;
4. Be attached to the bus sufficiently to withstand a force equal to 20 times the maximum rated capacity of the compartment; and
5. Have no protrusions greater than 1/4 inch.

The driver's area forward of the foremost padded barriers will permit the mounting of required safety equipment and vehicle operation equipment.

POWDER-COATED WINDOW FRAMES:
There shall be an approved option for electrostatically powder-coated black window frames on all types of buses to reduce friction and improve ease of operation of passenger side windows.

PUBLIC ADDRESS SYSTEM (P.A.), RADIO:
There shall be an approved option for a public address system/AM/FM stereo radio with four speakers inside the bus and one heavy-duty weatherproof P.A. speaker outside the bus. This option must have controls to permit the driver to select inside or outside speakers, mounted in the driver's compartment so that all controls are readily accessible to the driver from the normal seated position. Interior speakers must be flush-mounted. Outside speaker must be mounted under the hood or in another protected location at the front of the bus. An AM/FM stereo radio with four speakers may be offered separately. No internal speakers other than those used for the driver's communication system may be installed within four feet of the back of the driver's seat when the seat is in its rearmost upright position.

REAR HEATER:
There shall be an approved option for an additional heater mounted to provide heat in the rear of the body. This option must be installed under a passenger seat or must otherwise be protected to eliminate damage to the unit and injury to the students.

RED LIGHT ABOVE EMERGENCY DOOR:
There shall be an approved option for a small red light to be mounted above the emergency door on the interior of the bus that is activated when the clearance lights are on.

THREE-POINT SEAT BELTS AND THREE-POINT SEAT BELT SEATS:
There shall be an approved option for three-point seat belts in two and three passenger three-point seat belt seats, as approved by the department.

SECTION IV

POWER LIFT EQUIPPED SCHOOL BUS MINIMUM SPECIFICATIONS

INTRODUCTION AND GENERAL REQUIREMENTS FOR EXCEPTIONAL CHILD BUSES:
Exceptional child bus body structure and equipment must conform to the regular bus body specifications in Section III and must meet the additional requirements of this section. All school buses equipped with wheelchair lifts must meet or exceed the requirements of FMVSS Nos. 403 and 404, the National School Transportation Specifications and Procedures, Revised 2015 and all requirements listed herein, which prevail in the event of a conflict.

DEFINITION:
An exceptional child bus is any school bus that is designed, equipped and/or modified to accommodate students with special transportation needs requiring a power lift.

GENERAL REQUIREMENTS:
Exceptional Child specially equipped school buses shall comply with the National School Transportation Specifications and Procedures, Revised 2015 and with the FMVSS applicable to their GVWR category.

Any school bus to be used for the transportation of children who use a wheelchair or other mobile positioning device, or who require life-support equipment that prohibits use of the regular service entrance, shall be equipped with a power lift.

AISLES:
All school buses equipped with a power lift shall provide a minimum 30-inch pathway leading from any wheelchair position to at least one 30-inch wide emergency exit door. A wheelchair securement position shall never be located directly in front of (blocking) a power lift door location.

GLAZING:
Tinted glazing may be installed in all doors, windows and windshields consistent with federal, state and local regulations.

IDENTIFICATION:
Exceptional child specially equipped school buses shall display the International Symbol of Accessibility below the window line pursuant to appendix A-1 and A-2. Such emblems shall be white on blue background, shall not exceed 12 inches square in size and shall be of a high-intensity retroreflective material.

PASSENGER CAPACITY RATING:
In determining the capacity of a school bus for purposes other than actual passenger load (e.g., vehicle classification or various billing/reimbursement models), any location in a school bus intended for securement of a wheelchair during vehicle operation shall be regarded as four designated seating positions, and each lift area shall count as four designated seating positions.

POWER LIFTS:
1. The power lift shall be located on the right side of the bus body only.
2. Vehicle lifts and installations shall comply with the requirements set forth in:
    a. FMVSS No. 403, Platform Lift Systems for Motor Vehicles; and
    b. FMVSS No. 404, Platform Lift Installations in Motor Vehicles.
3. Design loads: The design load of the lift shall be at least 800 pounds. Working parts, such as cables, pulleys and shafts, which can be expected to wear, and upon which the lift depends for support of the load, shall have a safety factor of at least six, based on the ultimate strength of the material. Non-working parts, such as

platform, frame and attachment hardware that would not be expected to wear, shall have a safety factor of at least three, based on the ultimate strength of the material.

4. Lift capacity: The lifting mechanism and platform shall be capable of operating effectively with a wheelchair and occupant mass of at least 800 pounds.
5. Documentation: The following information shall be provided with each vehicle equipped with a lift:
6. A phone number where information can be obtained about installation, repair and parts. (Detailed written instructions and a parts list shall be available upon request.)
7. Detailed instructions regarding use of the lift shall be readily visible when the lift door is open, including a diagram showing the proper placement and positioning of wheelchair/mobility aids on the lift.
8. Training materials: The lift manufacturer shall make training materials available to ensure the proper use and maintenance of the lift. These may include instructional videos, classroom curriculum, system test results or other related materials.
9. Identification and certification: Each lift shall be permanently and legibly marked or shall incorporate a non-removable label or tag that states it conforms to all applicable requirements of the current National School Transportation Specifications and Procedures. In addition, and upon request of the original titled purchaser, the lift manufacturer or an authorized representative shall provide a notarized Certificate of Conformance, either original or photocopied, which states that the lift system meets all the applicable requirements of the current National School Transportation Specifications and Procedures.

REGULAR SERVICE ENTRANCE:

1. On power lift-equipped vehicles, steps shall be the full width of the step well, excluding the thickness of the doors in the open position.
2. In addition to the handrail required in section III, an additional handrail is required on all specially equipped school buses. This handrail shall be located on the opposite side of the entrance door from the handrail required in section III and shall meet the same requirements for handrails.

RESTRAINING DEVICES:

1. On power lift-equipped school buses with a GVWR of 10,000 pounds or more, seat frames may be equipped with attachment points to which belt assemblies can be attached for use with child safety restraint systems (CSRSs) that comply with FMVSS No. 213, Child Restraint Systems.
2. Any belt assembly anchorage shall comply with FMVSS No. 210, Seat Belt Assembly Anchorages.
3. Alternatively, a child restraint anchorage system that complies with FMVSS No. 225, Child Restraint Anchorage Systems, may be installed.
4. Seat belt assemblies shall conform to FMVSS No. 209, Seat Belt Assemblies.
5. Child safety restraint systems, which are used to facilitate the transportation of children who in other modes of transportation would be required to use a child, infant or booster seat, shall conform to FMVSS No. 213.

SEATING ARRANGEMENTS:

1. Flexibility in seat spacing to accommodate special devices shall be permitted to meet passenger requirements.
2. All seating shall meet the requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection.

SECUREMENT AND RESTRAINT SYSTEM FOR WHEELCHAIRS AND WHEELCHAIR-SEATED OCCUPANTS:

1. For purposes of understanding the various aspects and components of this section, the terms securement, tie down, securement system, and tie down system are used exclusively in reference to the devices that anchor the wheelchair to the vehicle.
2. The terms restraint and restraint system are used exclusively in reference to the equipment that is intended to limit the movement of the wheelchair occupant in a crash or sudden maneuver.
3. The term wheelchair tie down and occupant restraint system (WTORS) is used to refer to the total system that secures the wheelchair and restrains the wheelchair occupant.

WHEELCHAIR TIE DOWNS OCCUPANT RESTRAINT SYSTEMS (WTORS)

GENERAL REQUIREMENTS:

1. A WTORS installed in specially equipped school buses shall be designed, installed and operated for use with forward-facing wheelchair-seated passengers and shall comply with all applicable requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection, and SAE J2249, WTORS for Use in Motor Vehicles.
2. The WTORS, including the anchorage track, floor plates, pockets or other anchorages, shall be provided by the same manufacturer or shall be certified to be compatible by manufacturers of all equipment/systems used.
3. Wheelchair securement positions shall be located such that wheelchairs and their occupants do not block access to the lift door.
4. A device for storage of the WTORS shall be provided. When the system is not in use, the storage device shall allow for clean storage of the system, shall keep the system securely contained within the passenger compartment, shall provide reasonable protection from vandalism and shall enable the system to be readily accessed for use.
5. The WTORS, including the storage device, shall meet the flammability standards established in FMVSS No. 302, Flammability of Interior Materials.
6. The following information shall be provided with each vehicle equipped with a securement and restraint system:
    a. A phone number where information can be obtained about installation, repair and parts. (Detailed written instructions and a parts list shall be available upon request.)
    b. Detailed instructions regarding use, including a diagram showing the proper placement of the wheelchair/mobility aids and positioning of securement devices and occupant restraints, including correct belt angles.
7. The WTORS manufacturer shall make training materials available to ensure the proper use and maintenance of the WTORS. These may include instructional videos, classroom curriculum, system test results or other related materials.

WHEELCHAIR SECUREMENT/TIE DOWN:

1. Each wheelchair position in an exceptional child bus shall have a minimum clear floor area of 30 inches laterally by 48 inches longitudinally pursuant to FMVSS No. 222, S5.4.1 and S5.4.2.
2. Additional floor area may be required for some wheelchairs. Consultation between the user and the manufacturer is recommended to ensure that adequate area is provided.

OCCUPANT RESTRAINT SYSTEM:

If the upper torso belt anchorage is higher than 44 inches measured from the vehicle floor, an adjustment device, as part of the occupant restraint system, shall be supplied (See FMVSS No. 222, S5.4.3 and S5.4.4.).

SPECIAL LIGHT:

Doorways in which lifts are installed shall be equipped with an LED light that provides a minimum of 20 lumens of illumination on the floor of the bus immediately adjacent to the lift during lift operation.

SPECIAL SERVICE ENTRANCE:

1. Power lift-equipped bodies shall have a special service entrance to accommodate the power lift.
2. The special service entrance and door shall be located on the right side of the bus and shall be designed so as not to obstruct the regular service entrance.
3. The opening may extend below the floor through the bottom of the body skirt.
4. If such an opening is used, reinforcements shall be installed at the front and rear of the floor opening to support the floor and give the same strength as other floor openings. A drip molding shall be installed above the special service entrance to effectively divert water from the entrance.
5. Door posts and headers at the special service entrance shall be reinforced sufficiently to provide support and strength equivalent to the areas of the side of the bus not used for the special service entrance.

SPECIAL SERVICE ENTRANCE DOORS:

1. A single door or double doors may be used for the special service entrance.
2. A single door shall be hinged to the forward side of the entrance unless this would obstruct the regular service entrance. If the door is hinged to the rearward side of the doorway, the door shall use a safety mechanism that will prevent it from swinging open should the primary door latch fail. If double doors are used, the system shall be designed to prevent the door(s) from being blown open by the aerodynamic forces created by the forward motion of the bus, and/or shall incorporate a safety mechanism to provide secondary protection should the primary latching mechanism(s) fail.
3. All doors shall have positive fastening devices to hold them in the "open" position when the special service entrance is in use.
4. All doors shall be weather-sealed.
5. When manually operated dual doors are provided, the rear door shall have at least a one-point fastening device to the header. The forward-mounted door shall have at least three one-point fastening devices. One shall be to the header, one to the floor line of the body, and the other shall be into the rear door. The door and hinge mechanism shall have strength that is greater than, or equivalent to, the strength of the emergency exit door.
6. Door materials, panels and structural components shall have strength equivalent to the conventional service and emergency doors. Color, rub rail extensions, lettering and other exterior features shall match adjacent sections of the body.
7. Each door shall have windows set in a waterproof manner that are visually similar in size and location to adjacent non-door windows. Glazing shall be of the same type and tinting (if applicable) as standard fixed glass in other body locations.
8. Door(s) shall be equipped with a device that will actuate an audible or visible signal located in the driver's compartment when the door(s) is not securely closed and the ignition is in the "on" position.
9. A switch shall be installed so that the lift mechanism will not operate when the lift platform door(s) is closed.
10. Special service entrance doors shall be equipped with padding at the top edge of the door opening. The padding shall be at least three inches wide and one inch thick and shall extend the full width of the door opening.
11. Power lift LED landing light is required on the exterior of the bus to provide illumination for lift operation.

SUPPORT EQUIPMENT AND ACCESSORIES:

1. In addition to the webbing cutter required in section III, each power lift equipped bus that is set up to accommodate wheelchairs with webbing attached shall contain an additional webbing cutter properly secured in a location to be determined by the purchaser. The webbing cutter shall meet the requirements listed in section III.
2. Special equipment or supplies that are used in the bus for mobility assistance, health support or safety shall meet local, federal and engineering standards that may apply, including requirements for proper identification. Equipment that may be used for these purposes includes, but is not limited to:
    a. Wheelchairs and other mobile seating devices. (See subsection on Securement and Restraint System for Wheelchairs and Wheelchair-seated Occupants.)
    b. Crutches, walkers, canes and other ambulating devices to assist ambulation.
    c. Medical support equipment. This may include respiratory devices, such as oxygen bottles (which should be no larger than 38 cubic feet for compressed gas) or ventilators. Tanks and valves should be located and positioned to protect them from direct sunlight, bus heater vents or other heat sources. Other equipment may include intravenous and fluid drainage apparatus.
3. Each exceptional child bus that is set up to accommodate wheelchairs or other assistive restraint devices should be equipped with an emergency evacuation device that is certified and tested to withstand at least a 300-pound load when used as an emergency stretcher or drag. This evacuation device shall be properly secured to the bus in a location to be determined by the purchaser.
4. If transporting oxygen, refer to AMD Standard 003 available online at http://www.safeambulances.org/wp-content/uploads/2018/04/2014-AMD-Standards-001-027.pdf for oxygen tank retention requirements.

RESTRAINING BARRIERS WITH MODESTY PANELS:

1. There must be a padded restraining barrier with a modesty panel located immediately rearward of the lift if there are wheelchair spaces or regular seating located rearward of the lift and on the same side of the bus.
2. There must be a padded restraining barrier with a modesty panel meeting FMVSS spacing requirements located forward of all passenger seats that do not have another seat properly spaced in front of them.
3. There must be a padded restraining barrier or seat in front of any wheelchair position unless it is contiguous with and behind another wheelchair position.
4. The forwardmost restraining barrier on both sides of the bus must have a full width aluminized modesty panel extending to the floor. If the right front of the passenger area immediately behind the stepwell is not equipped with a restraining barrier due to placement of the wheelchair lift in that location, it must be equipped with a padded stanchion from floor to ceiling with an aluminized modesty panel.

POWER LIFT EQUIPPED SCHOOL BUS
OPTIONAL EQUIPMENT SPECIFICATIONS

STRAIGHT FLOOR / FLAT FLOOR:

1. There shall be an approved option on any size bus, when available, for an unobstructed straight floor design (i.e., no wheel wells and no step-up at the rear of the driver's compartment). Minimum headroom of types C and D buses equipped with this option must remain 76 inches as per standard body specifications.
2. There shall be an approved option on any size bus, when available, for an unobstructed flat floor design in the passenger compartment. If this option uses a raised floor that is stepped up behind the driver's area, the forward edge of the aisle must have a white stripe and be labeled "Step Up" as viewed upon entering the aisle, and a "Step Down" label must be visible upon exiting the aisle.
3. Minimum headroom of types C and D buses equipped with this option must remain 76 inches as per standard body specifications.
4. The bus must be equipped with 39-inch seats except for locations where lift bus specifications require a 30-inch aisle.

TRACK SEATING:

1. There shall be an approved option for a track-mounted seating system using button track (L track) and a wheelchair securement system meeting Florida Specifications that mounts into the track-seating track.
2. The overhead track for the shoulder harness attachment must be present at every possible wheelchair position.
3. The bus must be equipped with 39-inch seats, except when lift bus specifications require a 30-inch aisle.
4. All floor tracking must be anodized aluminum or other material of equal strength that will resist corrosion in Florida's environment.
5. This option must include additional options, as follows:
    a. Purchase of individual track seating seats;
    b. Delete a seat, add a wheelchair position with wheelchair tie-downs; and
    c. Delete a wheelchair position (tie-downs), and add a standard seat.

[Page Intentionally Blank]

SECTION V

AIR CONDITIONER SPECIFICATIONS

PERFORMANCE SPECIFICATIONS:
The installed air conditioner system must meet the high performance standards as described in National School Transportation Specifications and Procedures, Revised 2015. Performance test reports shall be made available upon request by the purchasing district or the department.

SYSTEM REQUIREMENTS FOR ALL BUSES:

Evaporators and Ducting:

1. Air intake for any evaporator assembly (ies), except for the front evaporator of Type A buses, must be equipped with replaceable air filter(s) accessible without disassembly of evaporator case.
2. No portion of the air conditioner system may block the driver's view through any window except that vertical covering in the rear corners of the bus interior for hoses and/or wiring may intrude on the rear quarter window by no more than two inches.

Controls, Wiring, Hoses, and Miscellaneous Hardware:
All system operating controls, including on-off switches, blower switches and thermostat controls must be accessible to the driver in a seated position.

Body:

1. All Type C and Type D front-engine buses equipped with air conditioners must also be equipped with a compartment mounted next to the battery box with external access for mounting circuit breakers and control circuitry for the air conditioner.

2. Type D rear-engine buses are exempted from the requirement for an additional electrical compartment for air conditioner circuitry provided the air conditioner control boards are installed in the rear package shelf area in a covered box.

NOTE: Control boards may optionally be mounted inside the bus within the evaporator case or behind the dash on all Type C and Type D buses. Any control boards mounted inside the bus must be easily accessible.

Warranty and Serviceability:
Warranty - Air conditioner compressor applications must be approved in writing by the chassis engine manufacturer, stating that the installation will not void or reduce the engine manufacturer's warranty or extended service coverage liabilities in any way. Also see **GENERAL INFORMATION AND WARRANTY PROVISIONS**.

Serviceability:
All components requiring periodic servicing must be readily accessible for servicing including, but not limited to, the following:

1. Refrigerant service ports;
2. Sight glasses, which must be directly visible;
3. Any manually resettable circuit breakers;
4. Evaporator air filters – removable and serviceable; and
5. All major component serial numbers must be readily visible.

Parts and Service Manuals:

A comprehensive operator's, maintenance and parts manual(s) must be provided for the entire system, or available via Internet access from the manufacturer's website for each A/C system purchased. Parts manuals must be designed so that all replaceable parts are illustrated by line drawings and such parts are numbered on the illustration, with a part description on a separate list under the corresponding part number. Part descriptions should be annotated appropriately with the part number, a proper description (part name) and the quantity required for the application listed in the drawings. The service manual or manufacturer's website must also include an overall A/C system diagram with component plumbing, locations and identities indicated for diagnostic purposes.

Parts and Tools Availability:

1. All system parts and required special service tools must be readily available, and a list of suppliers must be provided to each school district shop purchasing that brand of air conditioner.

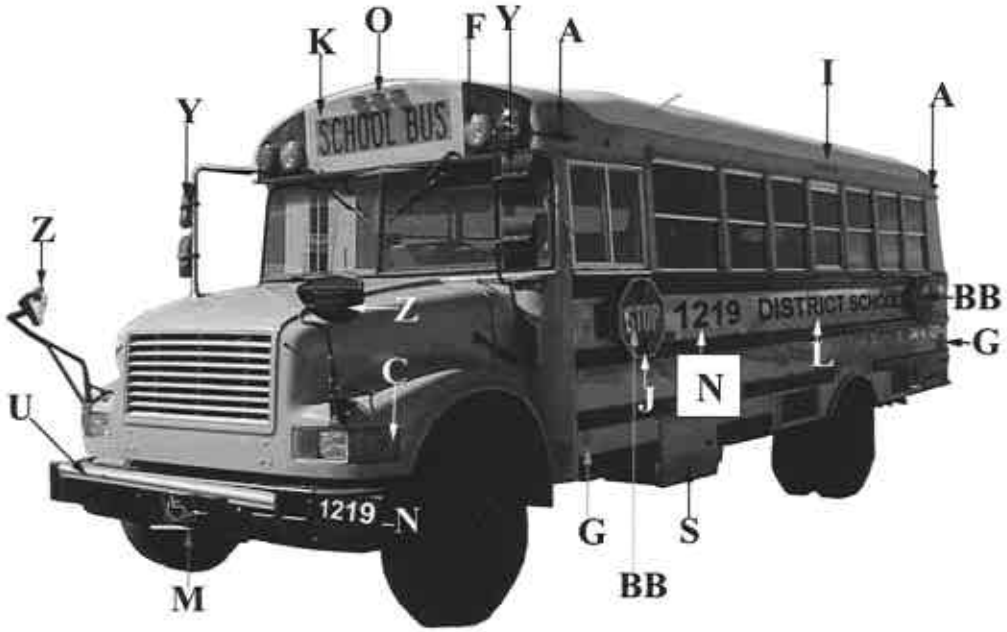
2. Suspension Capacity and Ground Clearance - Ground clearance at the lowest point of the air-conditioning system must be no less than the ground clearance of the bus at the step well.

3. Air conditioner system manufacturer must provide information and data, as needed, to assist in establishing chassis engine performance requirements and in determining chassis electrical components or specifications that may be needed to accommodate the additional electrical demands imposed by the air-conditioning system.

[Page Intentionally Blank]

APPENDIX A

MINIMUM LETTERING AND LIGHTING REQUIREMENTS



MINIMUM LETTERING AND LIGHTING REQUIREMENTS:

A	LED Clearance Lights	L	(Name of District) District Schools, Each Side, Belt Line. 6 inch lettering
BB	Octagonal Stop Arm	M	Universal Handicapped Symbol, Wheelchair Lift Equipped Buses, Can be placed anywhere on the front bumper. 6 inches by 6 inches minimum
C	LED Front Turn Signals, (amber lenses)	N	Bus Numbers, 6 inch lettering
F	LED Pupil Warning Lights, Side By Side Amber and Red, Flat Back Design	O	LED Identification Lamps
G	Reflectors	S	Battery Disconnect Switch Decal (optional)
I	Emergency Exit, 2 inch lettering	U	Pupil Crossing Arm
J	Double-Faced Flashing Red LED Lights	Y	Rear View Mirror System
K	SCHOOL BUS, Front And Rear, 8 inch lettering on retro-reflective yellow background	Z	Cross/Side View Mirror System

MINIMUM LETTERING AND LIGHTING REQUIREMENTS:

A	LED Clearance Lights	N	Bus Numbers, 6 inch lettering
B	Seven-inch LED Brake/Tail Lights	M	Universal Handicapped Symbol, Wheelchair Lift Equipped Buses, minimum 6 inches by 6 inches
C	Seven-inch LED Turn Signals (amber lenses)	O	LED Identification Lamps
E	Four-inch LED Stop / Tail Lights	P	LED Back-up Lights
F	LED Pupil Warning Lights, Side By Side Amber and Red, Flat Back Design	R	Fuel Door, 1 inch letters
G	Reflectors	T	Wheelchair Lift LED Landing Light
H	LED License Plate Lamp	Y	Rear View Mirror System
I	Emergency Exit Signs, 2 inch lettering	Z	Cross/Side View Mirror System
K	SCHOOL BUS, Front and Rear, 8 inch lettering on retro-reflective yellow background	AA	Roof-mounted White Flashing LED Strobe Light
L	(Name of District) District Schools (each side, belt line) 6 inch letters	CC	Rear Door Lettering, 6 inch lettering

[Page Intentionally Blank]

APPENDIX B

COLORADO RACKING LOAD TEST

COLORADO RACKING LOAD TEST

The Colorado Racking Test shall be required on or before the acceptance date of the first bus of the respective configuration.

TEST PROCEDURE:
In addition to complying with the test procedures described in FMVSS No. 220, the body manufacturers shall record and report the downward vertical movement of the force at 0, 25, 50, 75 and 100 percent of the maximum force (both loading and unloading). The expected force deflection curve is illustrated schematically in Figure 1a. Low load nonlinearities may indicate joint deformation; high load nonlinearities may indicate yielding in structural members.

A second load cycle shall be performed following the procedure given in the first paragraph. The expected force-deflection curve is illustrated schematically in Figure 1b. Any hysteresis following the initial shakedown will be revealed by this second cycle.

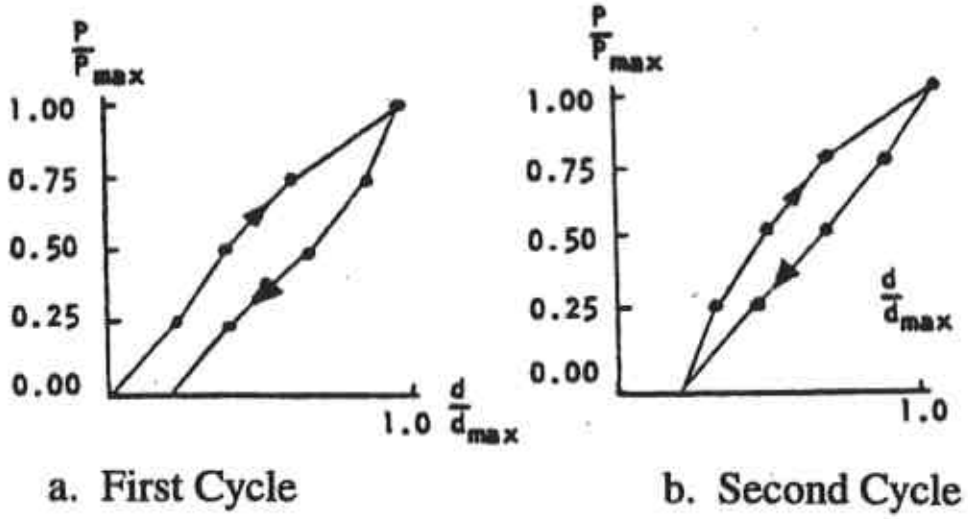


Figure 1. Static Load Test Load-Deflection Curves

A diagonal (racking) load test must be performed on types A, B, C and D school buses to assure adequate shear stiffness and strength of the bus body. Details of the test are provided below:

A two-cycle loading sequence shall be conducted following the described procedure.

(a) Requirements: When a force equal to 1 1/2 times the gross vehicle weight (GVW) is applied to the edge of the roof of the vehicle's body structure through a force application plate, as specified in Test Procedures (b):

1. The diagonal movement of the force at any point on the application plate shall not exceed 5 1/8 inches; and

2. Each emergency exit of the vehicle provided in accordance with FMVSS No. 217 shall be capable of operation as specified in that standard during the full application of the force and after release of the force.

(b) Test Procedures: Each vehicle shall be capable of meeting the requirements of (1) and (2) when tested in accordance with the procedures set forth below.

1. The vehicle shall be supported on a rigid surface along the lower edge of the frame or along the body sills in the absence of a frame.

2. The load shall be applied through a force application plate that is flat and rigid. The dimensions of the plate shall be chosen to assure that the plate edges never make contact with the vehicle skin during testing. A typical width is 18 inches, and a typical length is 20 inches less that the length of the vehicle's roof measured along its longitudinal centerline.

3. Place the force application plate in contact with the edge of the vehicle roof. Orient the plate so that its flat, rigid surface is perpendicular to a diagonal line connecting the most distant points on an interior cross-section of the vehicle. The rear edge of the plate shall be positioned approximately 20 inches from the rear edge of the vehicle roof. A temporary stand may be used to support the plate until a force is applied.

4. Apply an evenly distributed force in a diagonally downward direction through the force application plate at any rate not more than 0.5 inch per second, until a force of 500 pounds has been applied.

5. Apply additional force in a diagonally downward direction through the force application plate at a rate of not more than 0.5 inch per second until the force specified in (a) has been applied, and maintain this application of force.

6. Measure the diagonal movement of any point on the force application plate that occurred during the application of force in accordance with (b)(5), and open the emergency exits as specified in (a)(2).

7. Release all diagonal force applied through the force application plate, and operate the emergency exits as specified in (a)(2).

(c) Test Conditions: The following conditions apply to the requirements specified in (3).

1. Temperature: The ambient temperature is between 32 degrees F and 90 degrees F.

2. Windows and Doors: Vehicle windows, doors, and emergency exits are in the fully-closed position, and latched but not locked.

(d) An alternative method of testing for the racking load test shall be as follows:

The racking load shall be applied along a line connecting the most distant points on a transverse cross-section of the bus interior. It produces a shear distortion of the cross-section, as shown in figure 2.

A representative method of loading that employs a hydraulic jack to load a two-frame test assembly is illustrated in figure 2.

The maximum jack load for the two-frame assembly is determined by the following formula:

J = 2P J - maximum jack load for two-frame test assembly
P = load/frame

where P = Dynamic Vehicle Weight (DVW) divided by N
DVW - dynamic vehicle weight
N - total number of bus body frames

and DVW = DF x GVW
DF - dynamic factor, not less than 1.5
GVW - gross vehicle weight

Thus, for a DF = 1.5, a GVW = 22,000 pounds-force (lbf) and N= 11, the dynamic vehicle weight is DVW = 33,000 lbf, the load/frame is P = 3000 lbf and the maximum jack load is J = 6000 lbf.

When a complete bus body is rack-loaded, the total load DVW must be distributed uniformly along the bus body. This may be accomplished by mounting a series of hydraulic jacks along the length of the bus interior. Seats may be removed to facilitate jack mounting. The rack load will be considered to be uniformly distributed when the variation in the hydraulic jack readings is less than 10 percent. A maximum load is the sum of all jack readings and shall equal DVW.

Transverse Cross Section Side View

Figure 2. Arrangement of Hydraulic Jack for Rack-Loading of Two-Frame Assembly

The test may be performed on a complete bus body or on a representative section composed of at least two complete frames (body posts plus roof bows) and floor. Standard seats may be installed in the test section in a manner identical to that of the full bus body. Fabrication procedures for the test assembly shall be identical to those used in normal bus body production.

A two-cycle loading sequence shall be conducted, with intermediate and final load and deflection readings recorded, according to the procedure described.

The maximum deflection in line with the jack (A, maximum) shall not exceed 4 inches.

Manufacturer shall specify which testing method was used and submit appropriate certification information.

APPENDIX C

KENTUCKY POLE TEST PROCEDURES

KENTUCKY POLE TEST

The Kentucky Pole Test shall be required on or before the acceptance date of the first bus of the respective configuration.

TEST PROCEDURE:

The body shall be impacted at any point along the roof line on the outside surface, using an 8 inch diameter cylinder, 48 inches long, at a 30 to 45 degree angle, 1 to 3 inches above the top window line. The cylinder shall impact the roofline with the 48 inches dimension in a vertical plane with a force not to exceed 10 inches maximum to 8 inches minimum penetration of the body panels into the passenger compartment after impact.

The manufacturer shall submit appropriate certification information.

Orlando, Florida 32808

Dear Mr. Matthews:

Based on your September 1, 2021, response to Invitation to Bid (ITB) No. 2022-01, the Florida Department of Education (FDOE) would like to offer your company a contract to furnish Types A, C and D complete school buses, Multi-function School Activity Buses and optional equipment. Attached is a list of the units and prices for each awarded bus configuration.

Please send a performance bond or cashier's check in the amount of $750,000, made out to "Florida Department of Education and Purchasing School Districts," guaranteeing performance for units of all types manufactured under this contract to: Office of the Comptroller, Matt Kirkland, 325 West Gaines Street, Suite 914, Tallahassee, Florida 32399-0400.

In addition, please respond in writing accepting this bid and sign and return the original contract form included in the ITB. Assuming receipt of your performance bond and acceptance of this contract, FDOE will process purchase orders received from eligible users of the contract from January 1, 2022, through December 31, 2023.

Should you have any questions, please contact Director of School Transportation, Robert Manspeaker at Robert.Manspeaker@fldoe.org or 850-245-9795.

Sincerely,

Suzanne Pridgeon

RE: ITB #2022-01, Acceptance of Bid Award

Dear Ms. Pridgeon,

This letter is to acknowledge that we have accepted the bid award for ITB 2022-01 by FLDOE.

The Contract for Type A, Type C and Type D School Buses and Optional Equipment (Attachment 6) has been acknowledged and signed from the original bid contract.

Respectfully submitted,

Glenn Matthews
President
Matthews Bus Alliance, Inc.

Liberty Mutual. SURETY

Bond No. **285067332**

Performance Bond

KNOW ALL MEN BY THESE PRESENTS,

That we Thomas Built Buses, Inc. , as Principal,

(hereinafter called Principal) and Liberty Mutual Insurance Company , with principal offices in Boston , Massachusetts , as Surety, (hereinafter called Surety) are held and firmly bound unto Florida Department of Education and Purchasing School Districts as Obligee, (hereinafter called Obligee), in the amount of Eight Hundred Fifty Thousand Dollars And Zero Cents Dollars $850,000.00 for payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns firmly by these presents.

WHEREAS, the Principal did on January 1st, 2022 enter into a contract with said Obligee for School Bus Bid ITB 2022-01- Sell School Buses

which contract is by reference made a part hereof and is hereinafter referred to as the contract.
NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION, is such that if the Principal shall indemnify the Obligee against any loss or damage directly arising by reason of the failure of the Principal to faithfully perform said contract, then this obligation shall be null and void; otherwise to remain in full force and effect.

This bond is executed and accepted subject to the following conditions:
(1) That the Obligee shall faithfully and punctually perform all the terms and conditions of said contract to be performed by the Obligee.

(2) That the Obligee shall notify the Surety by registered letter, addressed and mailed to it at its home office, 175 Berkeley Street, Boston, Massachusetts 02116 , of any breach of said contract within a reasonable time after such breach shall have come to the knowledge of the Obligee.

(3) No suit at law or proceedings in equity to recover on this bond shall be instituted after one (1) year from the date of acceptance of the project.

SIGNED, SEALED AND DATED : August 4, 2021

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes David M. Carey, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 4th day of August, 2021.

ITB #2022-01
Bid Submission and Pricing Pages

FLORIDA SCHOOL BUS SPECIFICATIONS, EFFECTIVE JANUARY 2020

BID AWARD LETTER

CONTRACTOR'S BID RESPONSE

COPY OF PERFORMANCE BOND

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

CONTRACT 2022-01 ATTACHMENT '6'

THIS CONTRACT FOR TYPE A, TYPE C AND TYPE D SCHOOL BUSES AND OPTIONAL EQUIPMENT, BID NO: ITB 2022-01, by and between the department, 325 West Gaines, Suite 834, Tallahassee, Florida 32399-0400, and

Sun State International Trucks, LLC, the contractor, a for-profit corporation registered in Florida, each referred to herein as "Party," and collectively referred to as the "Parties,"

WITNESSETH:

WHEREAS, the Department desires to provide eligible users, defined herein, with various Type A, Type C and Type D School Buses and Optional Equipment (defined herein as "Vehicles"), through the use of a state term contract pursuant to rule 60A-1.001, F.A.C.; and section 1006.27, F.S., and

WHEREAS, the Department solicited responses to an Invitation to Bid No: ITB 2022-01(ITB) to prospective contractors of said Vehicles; and

WHEREAS, the contractor responded to the ITB and desires to provide said Vehicles; and, unto each other;

NOW THEREFORE, in consideration of the premises, terms and conditions set forth herein, the Parties execute this contract so same becomes binding and enforceable by and through the Parties and their assigns, and agree heretofore:

SCOPE OF WORK

The intent of these specifications is to set forth and convey to prospective bidders the general type, character, performance and quality of the Vehicles desired by the Department and school districts. The contractor is authorized to provide Vehicles to any and all eligible users in the State of Florida. The Parties agree that the laws and rules that apply to this contract shall be for those applicable to contracts in excess of Category Two, or $35,000, as defined in chapter 287.017, F.S.

Pursuant to Section 7.10 of Bid No: ITB 2022-01, the following documents are hereby incorporated by reference:

- Department contract
- Any addenda to Bid No: ITB 2022-01
- ITB No: 2022-01
- Award Letter
- Contractor's response

IN WITNESS WHEREOF, the Parties hereto have caused this contract For Type A, Type C and Type D School Buses and Optional Equipment, Bid No: ITB 2022-01, to be executed on the dates shown below their respective signatures.

Addendum #1

BID NO.: ITB 2022-01

This addendum is being issued to provide the Answers to Questions submitted timely by vendors during the Question and Answers period.

Please be advised all questions are keyed as submitted.

From: Euclid Infotech
1) List of Items, Schedule of Requirements, Scope of Work, Terms of Reference, Bill of Materials required**.**

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech
2) Soft Copy of the Tender Document through email.

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech
3) Names of countries that will be eligible to participate in this tender.

ANSWER: Bid No: ITB 2022-01, is open to any vendor that can supply buses as specified in the ITB

From: Euclid Infotech
4) Information about the Tendering Procedure and Guidelines

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Euclid Infotech
5) Estimated Budget for this Purchase

ANSWER: Purchases are to be determined by the eligible users. See ITB 2022-01 for historic purchase information.

From: Euclid Infotech
6) Any Extension of Bidding Deadline?

ANSWER: NO

From: Euclid Infotech
7) Any Addendum or Pre Bid meeting Minutes?

ANSWER: Bid requirements and instructions to respond can be found in the Bid document located on the Vendor Bid System website under this Bid Number.

From: Chris Rustman
Florida Transportation Systems, Inc.
8) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 3 addresses engines and their warranty coverage requirements. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.
9) Page 2 of Florida Specifications, Effective January 2020, details warranties for Type A, C and D new vehicles. Under "Chassis Warranties", item 5 addresses frame rails, cross members, fuel tanks, front axle I-beams and rear axle housing warranty coverage for 120 months. FTS respectfully requests that this item NOT apply to Type A chassis.

ANSWER: Denied

From: Chris Rustman
Florida Transportation Systems, Inc.
10) Page I-4 of Florida Specifications, Effective January 2020, section "Transmission" requires an Allison 1000 or 2000 or approved equal on a Type A chassis of 30p and larger. FTS requests that the Chevrolet heavy duty 6-speed Hydra-Matic transmission be accepted as an approved equal.

ANSWER: Approved

From: Chris Rustman
Florida Transportation Systems, Inc.
11) Page III-2 of Florida Specifications, Effective January 2020, section 'Battery Disconnect Switch", states that there must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within 3 feet of the battery box if no A/C box is available. Ford does not currently permit this on their chassis and FTS requests that this item NOT apply to Type A buses.

ANSWER: Denied. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

From: Chris Rustman
Florida Transportation Systems, Inc.
12) Page III-16 of Florida Specifications, Effective January 2020, section 'Structural Design and Testing", states that each manufacturer of Type A, C and D bodies must certify that their configurations comply with the testing and requirements of both the Colorado Racking Load Test and the Kentucky Pole Test. Do bidders for ITB 2022-01 need to provide verification of compliance with their bid submission?

ANSWER: See 7.19 Representations. The requested letter meeting specifications is an attestation that each configuration meets all Florida School Bus Specifications including Structural Design Testing

From: Mike McCullough
Sun State International
13) Given the volatility of industry shortages and long lead times of materials and supplies, will the Department adjust or waive the requirement for delivery 240 days from receipt of PO in documented instances?

ANSWER: No

From: Mike McCullough
Sun State International
14) Due to current and likely ongoing volatility of market pricing of raw materials and components for manufacturing and regulatory impacts on finished product pricing, will the Department provide a mechanism for periodic adjustment of pricing?

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
15) 4.26 Extension
Will the Department consider the same bid language for a "proportional price increase" in the event of unsuspected circumstances like the ones we are dealing with now regarding parts shortages and price Increases for components required to build the base bus, chassis, and options (e.g., steel, plywood, plastic, wiring, etc.) impacting the overall cost to manufacturer the bus? (e.g., over 3%?)

ANSWER: No

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) A. 7.5 and 7.25
Are "Alternative Fuel Options" included in the "Incentive to Buy" clause by offering incentives to districts to purchase alternative fuels either directly or indirectly; (e.g., propane companies offering districts incentives like rebates, cash, or free buses) to buy propane powered units, thereby impacting who the district buys buses from?

ANSWER: The question is speculative. Section 7.5 of the ITB explicitly addresses sales incentives and that section applies to all bidders.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
16) B. Also please reconfirm that Gasoline is NOT to be considered an Alternate Fuel.

ANSWER: United states Department of Energy lists Ethanol, Electricity, Bio-Diesel, CNG, Propane and Hydrogen as alternative fuels. Gasoline is not an alternative fuel.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
Clarification on vendor pricing sheets – Attachment 1 (applies to question 17 only)
17) A. In the case that an "electric" power train is submitted in the Base Configuration (e.g., Standard Engine, HP/LB·FT, Bus Base Price) In this solicitation for a particular configuration, will this be considered the base configuration for the solicitation and subject to the AWARD requirement to be within 10% of the lowest acceptable bid price for that configuration?

ANSWER: If the vendor submits an electric powertrain in the base configuration as its standard engine. Its offering will be compared to the same electric configuration of other bidders whether offered as a base or optional engine.

From: Glenn Matthews
Matthews Bus Alliance, Inc.
17) B. Furthermore, is "electric" to be considered an "Alternative Fuel Engine Option" only for this solicitation?

ANSWER: Yes, per the United States Department of Energy.

From: Lion Electric Co. USA Inc.
18) At point 4.2 **Questions** it states, “the bidder may request, in writing, to the State that specifications be changed”. Can the State please confirm which specifications are being referred to with this point.

ANSWER: The questions referred to in 4.2 are the questions in this addendum.

From: Lion Electric Co. USA Inc.

19) At point 7.19 **Representations,** bidders are expected to include a letter with their bid response confirming that "each unit sold by the bidder's company or representative for school buses will meet Attachment 11 - *Florida School Bus Specifications, Effective January 2020".* To note: many of the specifications in this document are tailored to school buses with an internal combustion engine and therefore do not apply to school buses with an all-electric motor. How must all-electric school bus OEM's address this letter if the bus does not include all specifications on the bus, and therefore does not "meet" the specifications? Can all-electric OEM bidders send their recommended specifications changes to the Department of Education before submitting the bid response? Or should the specification changes be included with the bid response?

ANSWER: Florida school Bus Specifications Page II-2 Engine Equipment note: Electric Powered configurations are exempt from the engine requirements listed below.

From: Lion Electric Co. USA Inc.

20) At point 4.34 **Alternates** it states, "Alternate Brands or products will not be considered for this bid response". Can the State please confirm what brands this applies to? Does this refer to OEM school bus brands? Bus brand parts?

ANSWER: See *Florida School Bus Specifications, Effective January 2020.*

From: Lion Electric Co. USA Inc.

21) At point 6.1 **Deliverables** it states that a sample status report must be included in the bid submission. However, this form is intended for award winners only. Can the State please explain how bidders are expected to complete this form for their bid submission?

ANSWER: 6.1 The successful bidder must provide a status report on a monthly basis.

From: Lion Electric Co. USA Inc.

22) At point 7.2 **Bid Response Format Instructions** a two-page limit is identified for the Transmittal Letter in Section 1. Can you please confirm if there is a page limit for Section 2?

ANSWER: There is no page limit per section 2

From: Lion Electric Co. USA Inc.

23) At point 7.12 **MYFLORIDAMARKETPLACE**, there is a fee for school buses purchased under this contract. Can the State please share what the fee amount is?

ANSWER: 1% of the payment amount.

From: Lion Electric Co. USA Inc.

24a) At point 7.3 **General Bid Requirements** it states, “each bidder shall bid all or none of each bus configuration”. Please note that all-electric buses are not built the same as those with an internal combustion engine. That said, as an all-electric OEM, Lion Electric would like to respectfully ask that we can submit our all-electric specifications and configurations?

ANSWER: Each school bus configuration submitted must meet Florida School Bus Specifications, Effective January, 2020.

From: Lion Electric Co. USA Inc.
24b) If an OEM does not offer all configuration types and only submits pricing for the configurations that are possible will the OEM be disqualified?

ANSWER: No.

From: Lion Electric Co. USA Inc.
25) At point 7.9 **Pre-Delivery Inspections (PDI)** it states that a completed PDI form must accompany each unit delivered. This is another form that is intended for award winners only. Can the State please explain how bidders are expected to complete this form for the bid submission?

ANSWER: For Award Winners Only.

From: Lion Electric Co. USA Inc.
26) A. At the **Vendor Bid Sheets** point, there is a specification sheet for each bus configuration. Can OEM’s list STD (“standard”) beside the specifications that are considered standard on the bus?

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) B. In addition, if the OEM considers one of the specifications to be optional, must the OEM list a price

ANSWER: Yes.

From: Lion Electric Co. USA Inc.
26) C. Would the word “optional cost” suffice?

ANSWER: No. If an OEM bids STD in any option, they are including the option with the base bus price at no additional cost. If the item already has STD in the corresponding cell, it must be included with the base bus price. Any remaining cells should be priced or reflect NA (Not Applicable), NB (No Bid), or NC (No Charge) pursuant to definitions (3.2)

From: Lion Electric Co. USA Inc.

27) At point 7.2 **Bid Response Format Instructions, Section 1 – Transmittal Letter**, bidders must include a statement that they have "read, understands and agrees to all provisions of this ITB. By submitting a bid, the bidder agrees to the terms and conditions of the ITB, notwithstanding any statement in the bid to the contrary". We would like to please ask the State if it would allow bidders to propose modifications to the Terms and Conditions with their bid response?

ANSWER: No.

From Glenn Matthews
Matthews Bus Alliance, Inc.

28) This letter is to inform you that the worldwide shortages have affected Thomas Built Buses, and now Matthews Bus Alliance, Inc. The shortage is with the required LED lights to meet state specifications and will affect the 3 LED lights above the front and rear School Bus sign. To be able to continue manufacturing buses, TBB will be substituting the LED bulbs with incandescent lights. We anticipate this will impact about 55 of our buses. Once the LED lights become available, with your permission we will send out technicians to change them out in order to not impact timely delivery.

ANSWER: Approved, subject to agreement with the eligible user.

Potential proposers have 72 hours from posting of addenda to protest the requirements of each addendum. Failure to file a protest within the time prescribed in Section 120.57(3), or failure to post the bond or other security required by law within the time allowed for filing a bond shall constitute a waiver of proceedings under Chapter 120, Florida Statutes.

YOUR BID WILL NOT BE COMPLETE WITHOUT THIS DOCUMENT SIGNED AND INCLUDED!

Mobile WiFi Options			
BR-1 Mini with Antenna	Mobile WiFi system with 4 in 1 antenna		$1,507
Fail Over License	Supports WiFi WAN capability, Installed and supported by Gatekeeper		$237
Max BR-1 MK2 w/ Antenna	Mobile WiFi system with 5 in 1 antenna		$2,144
BR-1 Mini Essential Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$120
BR-MK2 Essential Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$246
IC2 License	Additional year IC2 license, Can be purchased for up to 3 additional years		$66
FusionHub Essential Software	Supports 5 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$1,175
FusionHub Essential Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$210
FusionHub Pro Software	Supports 20 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$4,707
FusionHub Pro Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$798
FusionHub 100 Software	Supports 100 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$7,061
FusionHub 100 Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$1,200
FusionHub 500 Software	Supports 500 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$14,123
FusionHub 500 Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$2,400
Software Platforms			
Standard Health Check	Customer self managed, Annual fee/ bus, Software application only		$58
Standard HC Version add'l years	Add additional year of service/bus, Software application only		$58
Advanced Health Check	Gatekeeper Managed, Software application only		$116
Advanced HC Version add'l years	Add additional year of service/bus, Software application only		$116
Dispatch Tablet	Tablet		$1,662
Wall Mount	Mount for Tablet		$56
In Yard Wireless			
Access Point Kit A	Access point with antenna, Installed and supported by Gatekeeper		$900
Access Point Kit B	Access point with antenna, Installed and supported by Gatekeeper		$960
Access Point Kit C	Access point with antenna, Installed and supported by Gatekeeper		$1,020
Mast Equipment 1	Mast equipment, Installed and supported by Gatekeeper		$600
Mast Equipment 2	Mast equipment, Installed and supported by Gatekeeper		$900
Commissioning 1	Wireless commissioning, Installed and supported by Gatekeeper		$1,200
Commissioning 2	Wireless commissioning, Installed and supported by Gatekeeper		$6,000

Commissioning 3	Wireless commissioning, Installed and supported by Gatekeeper		$12,000
Server	Server for wireless, Installed and supported by Gatekeeper		$5,880
G4E Hosted Services	GSI Hosted Server Annual Fee/Bus, Installed and supported by Gatekeeper		$360
Temperature Sensing			
ITSS Panel	Temperature sensing panel, includes power cables/supply, Installation not included		$1,824
ITSS Floor mount	For Mobile applications, Installation not included		$120
ITSS Console mount	For Mobile applications, Installation not included		$58
ITSS Fixed floor mount	Fixed site pole mount kit, Installation not included		$382
ITSS Panel Mounts	Fixed site desktop mount, Installation not included		$75
Pro-Vision

Seon, DH4H500	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB HDD		$1,589
Seon, DH4P	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, No Harness, No Storage, Spare Part		$1,542
Seon, DH4S1T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB SSD		$2,206
Seon, DH4S2T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB SSD		$2,842
Seon, DH4S500	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 500GB SSD		$2,064
Seon, TH4H1T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB hard drive.		$1,158

Seon, TH4H2T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 2TB hard drive.		$1,403
Seon, TH4H500	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB hard drive.		$1,036
Seon, TH4P	DVR,TH4 with Mounting Hardware		$987
Seon, TH4S1T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB SSD. Lead time is 4 weeks.		$1,838
Seon, TH4S500	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB SSD. Lead time is 4 weeks.		$1,646
Seon, TH6H1T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB hard drive.		$1,605
Seon, TH6H2T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 2TB hard drive.		$1,850
Seon, TH6H500	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB hard drive.		$1,482
Seon, TH6P	TH6 DVR, 6 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, No Harness, No Storage, Spare Part		$1,286
Seon, TH6S1T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB SSD. Lead time is 4 weeks.		$2,016
Seon, TH6S500	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB SSD. Lead time is 4 weeks.		$1,824
Seon, TH8H1T0	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB Single HDD		$2,141
Seon, TH8H2T0	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB Single HDD		$2,272
Seon, TH8H2T0-2HDD	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB (2X1TB) Dual HDD		$2,280
Seon, TH8H4T0-2HDD	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 4TB (2X2TB) Dual HDD		$2,370
Seon, TH8S1T0	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 1TB Single SSD		$2,141
Seon, TH8S2T0	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 2TB Single SSD		$2,272
Seon, TH8S2T0-2SSD	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 2TB (2X1TB) Dual SSD		$2,994
Seon, TH8S4T0-2SSD	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 4TB (2X2TB) Dual SSD		$4,302
Seon, NH16H4T0-2HDD	NH NVR Hybrid, 16 Channels, 8CH Analog HD Built-In, 16 Port POE Switch, Audio, Security Front Cover with Lock Set, Mounting Plates, Power Harnesses, 4TB (2X2TB) Dual HDD		$4,346
Standard Wiring Bundles			

Seon, WT1D20S20G0	Standard wiring bundle with adapter harness, diagnostic indicator/alarm button cable 20 ft., five signal input 20 ft. (GPS not included).		$141
Seon, WT1D20S20G4	Standard wiring bundle with adapter harness, diagnostic indicator/alarm button cable 20 ft., five signal input 20 ft., GPS4 receiver magnetic mount 20 ft.		$224
Seon, WT1R30S20G0	Explorer TX8 & Trooper TH wiring bundle with adapter harness, RGY indicator w/ 30 ft. harness, alarm button cable 20 ft., five signal input 20 ft. (GPS not included).		$404
Seon, WT1R30S20G4	Explorer TX8 & Trooper TH wiring bundle with adapter harness, RGY indicator w/ 30 ft. harness, alarm button cable 20 ft., five signal input 20 ft., GPS4 receiver magnetic mount 20 ft.		$487
Seon, WSA2	Alarm button with 20 ft harness		$75
Cameras			
Seon, HD1QxxAI	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, no harness - to use with DH4C, TH-Series, and NH-Series DVRs		$283
Seon, HD1QxxAI20	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, 20' harness - to use with DH4C, TH-Series, and NH-Series DVRs		$295
Seon, HD1QxxAI50	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, 50' harness - to use with DH4C, TH-Series, and NH-Series DVRs		$324
Seon, HD1QxxAI75	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, 75' harness - to use with DH4C, TH-Series, and NH-Series DVRs		$350
Seon, HD1SxxEI	HD Camera, Wedge, Stop Arm, 6mm or 16mm, external, IR TDN - for use with TH-Series DVRs		$423
Seon, HD1SxxEI20	HD Camera, Wedge, Stop Arm, 6.0 mmor 16mm, external, IR TDN, 20' harness - for use with TH-Series DVRs		$447
Seon, HD1SxxEI50	HD Camera, Wedge, Stop Arm, 6.0 mm or 16mm, external, IR TDN, 50' harness - for use with TH-Series DVRs		$477
Seon, HD1SxxEI75	HD Camera, Wedge, Stop Arm, 6.0 mm or 16mm, external, IR TDN, 75' harness - for use with TH-Series DVRs		$507
Seon, HD1WxxEI	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs		$398
Seon, HD1WxxEI20	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs, 20' Harness		$417
Seon, HD1WxxEI50	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs, 50' Harness		$438
Seon, HD1WxxEI75	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs, 75' Harness		$457
Seon, HD2QxxAI	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, no harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$291
Seon, HD2QxxAI20	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, 20’ harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$315
Seon, HD2QxxAI50	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, 50’ harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$347
Seon, HD2QxxAI75	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, 75’ harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$377

Seon, HD2D0x0xAI	Windshield Dual Lens Cam, 1080p, 2.1mm dual or 3.6mm dual lens forward/inward, mic		$416
Seon, HD3QxxA	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, no harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$314
Seon, HD3QxxA20	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, 20' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$327
Seon, HD3QxxA50	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, 50' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$357
Seon, HD3QxxA75	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, 75' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$387
Seon, HD3U01AN	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, no harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$351
Seon, HD3U01AN20	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, 20' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$369
Seon, HD3U01AN50	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, 50' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$401
Seon, HD3U01AN75	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, 75' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$431
Seon, HD3SxxEI	HD Camera, Wedge,Stop Arm,6.0mm or 16mm,external,IR TDN,no harness,to use with TH6 & TH8 DVRs		$429
Seon, HD3SxxEI20	HD Camera, Wedge,Stop Arm,6.0mm or 16mm, external,IR TDN, 20' harness,to use with TH6 & TH8 DVRs		$453
Seon, HD3SxxEI50	HD Camera, Wedge,Stop Arm,6.0mm or 16mm, external,IR TDN, 50' harness,to use with TH6 & TH8 DVRs		$483
Seon, HD3SxxEI75	HD Camera, Wedge,Stop Arm,6.0mm or 16mm,external,IR TDN, 75' harness,to use with TH6 & TH8 DVRs		$513
Seon, HD3WxxEI	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, no harness, to use with TH6 and TH8 DVRs.		$404
Seon, HD3WxxEI20	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, 20' harness, to use with TH6 and TH8 DVRs.		$423
Seon, HD3WxxEI50	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, 50' harness, to use with TH6 and TH8 DVRs.		$444
Seon, HD3WxxEI75	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, 75' harness, to use with TH6 and TH8 DVRs.		$462
Seon, C3Q9PD03A20	IP Camera, PoE, dome, white, 3MP progressive scan, 2.8 mm lens size, interior, IR Day/Night, audio, 20 ft. harness - to use with TH8 or NH16		$491
Seon, C3Q9PD03A50	IP Camera, PoE, dome, white, 3MP progressive scan, 2.8 mm lens size, interior, IR Day/Night, audio, 50 ft. harness - to use with TH8 or NH16		$539
Seon, C3W9PD04E20	IP Camera, PoE, wedge, 3MP progressive scan, 4.0 mm lens size, exterior (no audio), IR Day/Night, 20 ft. harness - to use with TH8 or NH16		$595

Seon, C3W9PD04E50	IP Camera, PoE, wedge, 3MP progressive scan, 4.0 mm lens size, exterior (no audio), IR Day/Night, 50 ft. harness - to use with TH8 or NH16		$645
Seon, TH8POEKIT48	ASSY,POE Kit,48V, 1 Kit Required Per IP Camera		$253
Seon, CA10xxEI	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, No Harness		$365
Seon, CA10xxEI20	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, 20 ft. harness		$1,117
Seon, CA10xxEI50	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, 50 ft. harness		$747
Seon, CA10xxEI75	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, 75 ft. harness		$451
Seon, CHQ8PDxxA	HD Camera, dome, 1080P progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio (HX16 & NX16 DVR's ONLY)		$459
Seon, CHQ8PDxxA20	HD Camera, dome, 1080p progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio, and 20 ft. harness — (HX16 & NX16 DVR's ONLY)		$489
Seon, CHQ8PDxxA50	HD Camera, dome, 1080p progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio, and 50 ft. harness — (HX16 & NX16 DVR's ONLY)		$501
Seon, CHQ8PDxxA75	HD Camera, dome, 1080p progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio, and 75 ft. harness — (HX16 & NX16 DVR's ONLY)		$527
Seon, CHW8PDxxE20	HD Camera 720P/1080P/3MP, IP POE, 3.6 mm, 6mm or 8mm lens size, exterior (no audio), and 20 ft. harness — (HX16 & NX16 DVR's ONLY)		$537
Seon, CHW8PDxxE50	HD Camera 720P/1080P/3MP, IP POE, 3.6 mm, 6mm or 8mm lens size, exterior (no audio), and 50 ft. harness — (HX16 & NX16 DVR's ONLY)		$569
Seon, CHW8PDxxE75	HD Camera 720P/1080P/3MP, IP POE, 3.6 mm, 6mm or 8mm lens size, exterior (no audio), and 75 ft. harness — (HX16 & NX16 DVR's ONLY)		$599
Seon, CJ9xxA	Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm or 6mm lens (no infrared)		$242
Seon, CJ9xxA20	Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm or 6mm lens, 20 ft. harness (no infrared)		$267
Seon, CJ9xxA50	Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm or 6mm lens, 50 ft. harness (no infrared)		$297
Seon, CJ902A	Dome Day/Night 600TVL camera, audio, 2.5mm lens (no infrared)		$267
Seon, CJ902A20	Dome Day/Night 600TVL camera, audio, 2.5mm lens, 20 ft. harness (no infrared)		$291
Seon, CJ902A50	Dome Day/Night 600TVL camera, audio, 2.5mm lens, 50 ft. harness (no infrared)		$323
Seon, CJ902A75	Dome Day/Night 600TVL camera, audio, 2.5mm lens, 75 ft. harness (no infrared)		$353
Seon, CQ9xxA	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens		$242
Seon, CQ9xxA20	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens, 20 ft. harness		$267
Seon, CQ9xxA50	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens, 50 ft. harness		$297
Seon, CQ9xxA75	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens, 75 ft. harness		$329

Seon, CQ902A	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens		$267
Seon, CQ902A20	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens, 20 ft. harness		$291
Seon, CQ902A50	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens, 50 ft. harness		$323
Seon, CQ902A75	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens, 75 ft. harness		$353
Seon, RVC400	Rear Vision Outdoor Camera with M12 connector and bracket, includes M12 to Micro-Fit Adapter		$223
Seon, RVC400E75	RVC400 with a 75 ft. M12 to Micro-Fit harness		$288
7in Display Monitors			
Seon, RVM2	Rear Vision 7 Inch LCD Monitor and cables, for standalone use with an SD analog Camera, DVR/NVR with Expansion Port, or InView 360/Fusion. Expansion Cables included for TH4/TH6/TH8/HX/NX/TL-HD.		$372
Seon, RVM2-SP	Rear Vision 7 Inch LCD Monitor, cables, and video splitter, for use with all DVR's, no < 60 sec delay due to DVR/NVR boot up		$439
Camera Mounting and Post Options			$0
Seon, CHQHD3-MA30	Angle mount shim kit, 30 degree angle, works with CHQ8PD and HD3Q cameras		$98
Seon, CHQ-MP6A30	CHQ mounting post, 6 inch, 30 degree angle for HD3Q Camera		$98
Seon, CHQ-MP4A30	CHQ mounting post, 4 inch, 30 degree angle for HD3Q Camera		$98
Seon, HD1Q-MP6A30	HD1Q mounting post, 6 inch, 30 degree angle		$98
Seon, HD1Q-MP4A30	HD1Q mounting post, 4 inch, 30 degree angle		$98
Seon, CQ-MP4	CJ/CQ/SQ/ mounting post, 4 inch		$98
Seon, CQ-MP6	CJ/CQ/SQ mounting post, 6 inch		$98
Seon, CA-MP4	CA/CHW/HD1W/HD3W mounting post, 6 inch		$98
Seon, CA-MP6	CA/CHW/HD1W/HD3W mounting post, 4 inch		$98
Seon, CJ-MP6A30	CJ mounting post, 6 inch, 30 degree angle		$98
Predictive Stop Arm Solutions			
Seon, PSA2S	Predictive Stop Arm, 2 Radars, 2 Horns		$3,249
1080P HD Exterior 360 System			$0
Seon, inView360HD-Connectable	inView360HD System Kit + Connection Kit, Includes 7" HD Monitor HDM-7IN		$2,452
Seon, ARMF	Optional RCA to Microfit Adaptor for video feed into DVR		$33
Seon, inView360HD-Cal-Kit	inView 360HD Calibration Kit - USB + 4 mats + software + videos + documentation		$180
Analog Exterior 360 System			
Seon, SAV-INV360	Analog inview360 Exterior System Complete		$1,904
Seon, SAV-200R	Rear camera, spare, no housing, inView 360		$212
Seon, SAV-PAD	InView360,Calibration Pad Set,c/w 4 Folded Pads		$136
Seon, SAV-DOC-USB	inView 360 manuals on a USB stick (not including calibration)		$36
vMax Commander Wireless Download			
Seon, VMC5B	vMax Commander 5.0: web-based wireless and automatic video management software to monitor video system health, automatically download video alarms, search video by time and location, and display historical GPS tracks of the vehicles in the fleet. Includes 100 user licenses.		$4,800
Seon, VMC5V	vMax Commander 5.0: Vehicle One Time Activation (per vehicle)		$240
Seon, PRS-WEBTRN	Webinar, remote training, 1 Day		$918
Seon, PRS-TRAIN	vMax Live Commander On Site Training Per Da		$1,800

Seon, PRS-REMOTE	Remote Engineering Service Per Day		$900
Seon, PRS-TRVL	Engineering Services Travel Days To/From Site		$1,200
Seon, PRS-REMOTE-HRLY	Remote Engineering Service Per Hour		$180
Seon, PRS-ENGSITE	On Site Engineering Service Per Day		$1,200
Wireless Components			
Seon, SRLAC00	Smart Reach Lite,2.4/5GHz,No ANT		$406
Seon, SRLAC07	SmartReach Lite,2.4/5GHz,ANT		$511
Seon, SRLAC07NP	SmartReach Lite,2.4/5GHz,ANT,No POE		$414
Seon, SRLAC00NP	Smart-Reach Lite for TH4, TH4C, TH6, TH8 and TL-HD only, 5.8GHz, no antenna, no PoE adapter		$306
Seon, SRLN07	SmartReach Lite,2.4/5GHz,ANT,-N		$469
Seon, SRLN07NP	SmartReach Lite,2.4/5GHz,ANT,No POE,-N		$364
Seon, SRLBAA09-SV	Smart-Reach Lite, 5G, Supervisor Vehicle		$1,101
Seon, PRS-REMOTE	1x Remote Engineering Service Required for Supervisor Kit Set Up		$900
Seon, SRBLAC10	SmartReach Base,Lite AC, 2.4G/5G,6dBi,WP,Omni ANT		$390
Seon, SRBLAC04	SmartReach Base,Lite AC, 2.4G/5G/22dBi WP,Grid ANT		$468
Seon, SRBLAC09	SmartReach Base,Lite AC, 2.4G/5G,WP,Mini Panel ANT		$438
Seon, SRB1AC101010	Smart-Reach Base AP, 1 radio, no antenna, outdoor		$2,010
Seon, SRB1AC707070	Smart-Reach Base AP, 1 radio, 1 omni directional 2.4GHz antenna, outdoor		$2,198
Seon, SRB1AC020202	Smart-Reach Base AP, 1 radio, 2 omni directional 2.4GHz antenna, outdoor		$2,010
Seon, SRB1AC090909	Smart-Reach Base AP, 1 radio, 3 omni directional 2.4GHz antenna, outdoor		$2,156
Seon, SRB2AC121212	SmartReach AP,2RD, 2.4Ghz 3x5dBi Omni Antenna, 5Ghz 3x7dBi Omni Antenna		$2,529
Seon, SRB3AC141010	SmartReach AP,2RD,2.4Ghz w/Grid Antenna for 5Ghz Back Haul		$2,230
Seon, INST-WRLS	Installation Smart Reach Wireless Access Point, Seon install		$3,000
vMax Compass-Routing Software			
Seon, ROUTE-COMPASS	Routing,Route Builder,Tiering,Parent Portal, 1Yr, Per Vehicle		$346
Seon, ROUTE-COMPASS-RENEWAL	Year 2 and Thereafter Annual Renewal, 1yr, Per Vehicle		$116
Seon, CMPS-TRAIN3	vMaxCompass Routing Software Training - 3 days of comprehensive onsite software training for smaller School Districts. Includes 2 x 1hr webinars to be used within 1 month of the original training.		$7,200
Seon, CMPS-TRAIN5	vMaxCompass Routing Software Training - 5 days of comprehensive onsite software training for larger School Districts. Includes 4 x 1hr webinars to be used within 1 month of the original training.		$12,000
Seon, CMPS-LOGST-2-VCL	Compass Logistics for fleets of 1 or 2 vehicles, yearly charge		$612
Seon, CMPS-LOGST-5-VCL	Compass Logistics for fleets of 3 to 5 vehicles, yearly charge		$1,224
Seon, CMPS-LOGST-10-VCL	Compass Logistics for fleets of 6 to 10 vehicles, yearly charg		$2,448
Seon, CMPS-LOGST-20-VCL	Compass Logistics for fleets of 11 to 20 vehicles, yearly charge		$4,284
Seon, CMPS-LOGST-50-VCL	Compass Logistics for fleets of 21 to 50 vehicles, yearly charge		$6,120
Seon, CMPA-CUSTOM SOFTWARE	Compass customer software development by hour. Seon developer		$306
Seon, CMPS-PRO-MAPCUSTOM1	Custom map layers for Compass Route Builder and/or Info Locator, 8 hours charged per Qty.		$1,469
Seon, CMPS-DISPATCH	Compass Dispatch Software		$6,000
Seon, CMPS-FLEET	Compass Fleet Software		$6,000

Seon, CMPS-TRIP	Compass Field Trip Software		$6,000
Seon, CMPS-TRAIN-HRLY	vMax Compass training, per hour. Seon Trainer		$148
Route Path &Student Tracking Bundles			
Seon, ROUTE PATH	Automated route stop and student tracking software, includes 1st year of service, per vehicle		$116
Seon, ROUTE PATH TRAIN	Training on Seon Path		$300
Seon, ROUTE PATH-RY1	1 year renewal / continuance of ROUTE-PATH Automated route stop and student tracking, per vehicle		$116
Seon, STUDENT-CONTACT-TRACING	STUDENT-CONTACT-TRACING Includes equipment & all-in-one software for: • Live GPS • Student Tracking & Reporting • Routh Path • Parent Notification App & Service • All-in-One Web-Based Software Interface		$432

Seon, INSPECTION-LICENSE-RY3	FLEET,SF Vehicle Inspection License,3 yr Renewal Renewal,Per Vehicle		$735
Seon, INSPECTION-LICENSE-RY4	FLEET,SF Vehicle Inspection License,4 yr Renewal Renewal,Per Veh		$864
Seon, MDT-MOUNTED-1-DATA	Android Tablet, Docking Station, GPS, built-in Cameras, SD Card, LTE Modem, and MDT-DATA-Y1		$958
Seon, MDT-HANDHELD-1-NODATA	Android Tablet, GPS, built-in Cameras, SD Card, LTE Modem, and MDM-Y1 - NO DATA		$824
Seon, VLP-ACT	VLP-ACTV		$50
Preventavie Maintenance Program			
Seon, PMP-ANNL-A	Preventative Maintenance Program - Annual Fleet Inspection - Per Vehicle - Paid Annually		$303
Seon, PMP-SEMA-A	Preventative Maintenance Program - Semi Annual Fleet Inspection - Per Vehicle - Paid Annually		$605
Seon, PMP-QTR-A	Preventative Maintenance Program - Quarterly Fleet Inspecion - Per Vehicle - Paid Annually		$1,210
vMax Plus System Health Status			
Seon, VMP-DOCPAC	vMax Pulse Document Package (includes installation, setup and user guides)		$30
Seon, VMP1YR	vMax Pulse Single vehicle Software License, 1 year (includes Sender hardware)		$132
Seon, VMP2YR	vMax Pulse Single vehicle Software License, 2 year (includes Sender hardware)		$202
Seon, VMP3YR	vMax Pulse Single vehicle Software License, 3 year (includes Sender hardware)		$238
Seon, VMPACTV	vMax Pulse Receiver activation (includes Receiver hardware)		$660
Seon, INST-VMP-C	vMax Pulse Receiver indoor installation (per receiver)		$300
Seon, INST-VMP-S	vMax Pulse Sender installation (per vehicle)		$120
Seon, VMPCBLKT	vMax Pulse, spare cabling for Sender		$36
Seon, VMPCPS	vMax Pulse, spare power supply for Receiver		$30
Seon, VMPCTL	vMax Pulse, spare Receiver and adapter power supply		$594
Seon, VMPSNSR	vMax Pulse, spare Sender and cabling		$132
Seon, INST-VMP-C	vMax Pulse Receiver indoor installation (per receiver)		$300
Seon, INST-VMP-S	vMax Pulse Sender installation (per vehicle)		$120
Spare Hard Drives-SSD Drives & SD Cards			
Seon, TH-HK500G	H Series Storage Cartridge for compatible recorders, includes 500GB HDD and Protective Carry Case		$192
Seon, TH-HK1T0	TH Series Storage Cartridge for compatible recorders, includes 1TB HDD and Protective Carry Case		$312
Seon, TH-HK2T0	H Series Storage Cartridge for compatible recorders, includes 2TB HDD and Protective Carry Case		$432
Seon, TH8-HK1T0	H Series Double-Wide Storage Cartridge for compatible recorders, includes Single 1TB HDD and Protective Carry Case		$332
Seon, TH8-HK2T0	H Series Double-Wide Storage Cartridge for compatible recorders, includes Single 2TB HDD and Protective Carry Case		$460
Seon, TH8-HK2T0-2HDD	H Series Double-Wide Storage Cartridge for compatible recorders, includes Dual 1TB HDD (2TB Total) and Protective Carry Case		$446
Seon, TH8-HK4T0-2HDD	H Series Double-Wide Storage Cartridge for compatible recorders, includes Dual 2TB HDD (4TB Total) and Protective Carry Case		$578

Seon, TH-SK1T0	Trooper TH4 and TH6 media cartridge kit, with 1TB SSD 2.5 in		$716
Seon, TH-SK500G	Trooper TH4 and TH6 media cartridge kit, with 500GB SSD 2.5 in		$527
Seon, TH-SK2T0	Trooper TH4 and TH6 nedia cartridge kit, with 2TB SSD 2.5 in		$1,356
Seon, TH8-SK1T0	TH8 Media Cartridge Kit, 1TB Single SSD		$785
Seon, TH8-SK2T0	TH8 Media Cartridge Kit, 2TB Single SSD		$1,689
Seon, TH8-SK2T0-2SSD	TH8 Media Cartridge Kit, 2TB (2x1TB) Dual SSD		$1,632
Seon, TH8-SK4T0-2SSD	TH8 Media Cartridge Kit, 4TB (2x2TB) Dual SSD		$2,915
Seon, SDCARD32	32GB SD Card for use with compatible recorders		$60
Seon, SDCARD64	64GB SD Card for use with compatible recorders		$72
Seon, SDCARD128	128GB SD Card for use with compatible recorders		$108
Seon, SDCARD256	256GB SD Card for use with compatible recorders		$332
Seon, SDCARD512	512GB SD Card for use with compatible recorders		$653
Seon, SDCARD1T	1TB SD Card for use with compatible recorders		$794
Misc & Spare Harnesses, Hardware & Parts			
Seon, PH1X3UM20	Power harness 14 AWG 20 ft., 20A and 1A fuses, fuse holders, butt splices, mounting hardware - for HX, NX and TH8 DVRs		$75
Seon, PH2X2MFJR	Power harness 16 AWG 20 ft., 10A and 1A fuses, fuse holders, butt splices, mounting hardware - for MX, TL, TL-HD, TH4, TH4C and TH6 DVRs		$62
Seon, HDIA20	Diagnostic indicator/alarm button 5 ft. with 20 ft. extension (for Plus Systems for use with Smart-Link module or TL) - for MX, TL, Rogue, EX4 - replaces 020-0065		$58
Seon, WT1	Adapter harness for TL and TH (signals, diagnostic indicator/ alarm button, speed) - replaces 060-0565		$52
Seon, HEHD10	ASSY, CBL, HD, 2X3Micro-Fit M-M, 10ft		$29
Seon, HEHD15	ASSY, CBL, HD, 2X3Micro-Fit M-M, 4.57mt (15ft)		$29
Seon, HEHD20	ASSY, CBL, HD, 2X3Micro-Fit M-M, 20ft for AHD Wedge and Dome Cameras		$24
Seon, HEHD50	ASSY, CBL, HD, 2X3Micro-Fit M-M, 50ft for AHD Wedge and Dome Cameras		$54
Seon, KS	DVR key set: lock box key, media cartridge/ hard drive lock key		$12
Seon, SSL-ENGL	LBL, Seon Safety Label, SSL, ENGL - replaces 690-0130		$2
Seon, SSL-ENSP	LBL, Seon Safety Label, SSL, ENSP, Bilingual English Spanish Lbl		$2
Seon, 085-0046	A/V cable (RCA to BNC) for 5.6" LMK LCD monitor		$6
Seon, 085-0050	Power with switch cable for LMK LCD monitor		$6
Seon, 085-0051	Power supply for 5.6" LMK LCD monitor		$21
Seon, LMK	LCD monitor, 5.6 inch, AC charger, battery pack - replaces 020-0073		$300
Seon, BP	Bench-test power adapter to power MX, TL, TL-HD, TH4, TH4C and TH6 DVRs.		$144
Seon, TH-LBF	TH4/TH6 front lock cover		$60
Seon, TH-LBR	TH4/TH6 rear cable shroud		$48
Seon, TH8-MPV	TH8 Series Double-Wide Vibration Mounting Plate, for compatible hardware (Item included in TH-LBFRV)		$99
Seon, TH8-LBF	TH8 Series Double-Wide Front Door, Locking, Key, for compatible hardware (Item included in TH-LBFRV)		$77

Seon, TH8-LBR	TH8 Series Double-Wide Rear Connector Shroud, Metal, for compatible hardware (Item included in TH-LBFRV)		$69
HDD Docks & Viewing Software			
Seon, HDD-DOCK3	HDD USB docking station. Works with TH4/TH6/TH8/TL/MX/TX/DX/HX/NX		$234
Seon, HDD3-STB	Software kit Includes: vMax View Software, Handheld mouse, HDD-DOCK3 USB Docking Station, Note: Only one required per fleet		$338
Seon, HDD3USBKIT	Software kit includes: vMax View software and HDD-DOCK3 USB Docking Station. Only one required per fleet.		$215
Seon, HDD3-STB-LMK	Software kit Includes: vMax View Software, Handheld mouse, 5.6 inch monitor, HDD-DOCK3 USB Docking Station, BNC F-RCA adapter		$632
Seon, VMAX-VIEW	vMax View Software to easily view and archive video: search for video by alarm, date/time, or GPS location. Includes the ability to zoom into the video and the SmartBlur feature to blur faces when making video archives.		$150
Seon, EMRED-RY1	Annual Service Fee for Evidence Manager Redaction license		$834
Synovia			
Synovia, FLSTC GPS	Synovia Core GPS Hardware Kit for ATT/Verizon		$803
Synovia, FLSTC ENGD	JPOD		$323
Synovia, FLSTC OP	Operator Panel and Kit		$386
Synovia, FLSTC CT	Color Tablet and Kit (Tethered 7 P)		$843
Synovia, FLSTC BCR	Barcode Reader Kit (laser scan)		$536
Synovia, FLSTC SLSGPS	Synovia Silverlining GPS Fleet Management Software - Annual License		$270
Synovia, FLSTC SLSEGS	Synovia Silverlining Engine Diagnostics Software - Annual License		$54
Service agreements and communications subscriptions for Synovia equipment sold seperately.			
Zonar			
Zonar, V4201-H	V4 TCU Kit, Includes Wiring and brackets		$391
Zonar, C-MOB001-H	Connect Tablet Kit, Includes tablet, cable and mount		$862
Zonar, E-MOB003-H	Samsung Galaxy Tab Active2 Kit, Includes tablet, cables and mount		$862
Zonar,ZPASS001-H	Z pass Kit, RFID reader for student cards- Zpass service required		$240
Zonar, 20123	Zonar Coach Camera		$211
Zonar, EVIR002-H	2010 EVIR Handheld device for Electornic Vehicle Inspection		$290
Zonar, 20007	Driver/Operator RFID card, per card		$81
Zonar, 30034	Student RFID card, per card		$5
Service agreements and communications subscriptions for Zonar equipment sold seperately.			
IC Bus			
OCC Telematics	OCC Telematics hard wired , Includes user application, activation, and 2 yr service,		$639
OCC Telematics	OCC Telematics Plug in installation , Includes Telematics device Y cable, user application, activation, and 2 yr service,		$703
USB Charge Ports	2 USB charge ports under seat rail at each passenge seat, price per row LH & RH, min 2 rows		$690

Kajeet SmartBus WiFi 12 month	Kajeet Onboard WiFi Solution, includes router, ext antenna, activation and 12 months service		$2,307
Kajeet SmartBus WiFi 24 month	Kajeet Onboard WiFi Solution, includes router, ext antenna, activation and 24 months service		$2,853
Kajeet SmartBus WiFi 60 month	Kajeet Onboard WiFi Solution, includes router, ext antenna, activation and 60 months service		$4,520
270 Camera Mirror Monitor	Rosco Safe-T-Scope 270 degree Mor-Vision w-7in Mirror monitor, lever-lock		$2,345
270 Camera SA Monitor	Rosco Safe-T-Scope 270 degree Mor-Vision w-7in stand alone monitor		$2,001
Backup Cam Mirror Monitor	Rosco backup camera w-7in mirror monitor in 6x30 mirror		$1,174
Backup Cam SA Monitor	Rosco backup camera w-7in standalone monitor		$741

DRUG-FREE WORKPLACE

(will be considered in case of identical tie Bids)

Preference shall be given to businesses with drug-free workplace programs. Whenever two or more Bid Responses which are equal with respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a Bid Response received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie Bid Responses will be followed if none of the tied vendors have a drug-free workplace program. To have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3) Give each employee engaged in providing the commodities or contractual services underbid a copy of the statement specified in subsection (1).

4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are underbid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5) Impose a sanction on, or require satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community by any employee who is so convicted.

6) Make a good faith effort to maintain a drug-free workplace through implementation of this section.

As the person authorized to sign the statement, I certify that this firm complies fully with the above requirements.

STATE OF FLORIDA DEPARTMENT OF EDUCATION

MINORITY SUBCONTRACTORS UTILIZATION SUMMARY

The Department's Supplier Diversity initiative strives to ensure the promise of Florida's future is shared by all of its residents, regardless of race, ethnicity, disability, neighborhood, or background. To that end, the Department is dedicated to support, track and increase its small, minority-, women-, and service-disabled veteran business enterprise spending with prime contractors and subcontractors. This form was developed to assist in these efforts.

The Prime Contractor shall report all small, minority-, women-, and service-disabled veteran business enterprise Subcontractors, identifying the Name, Address, Type of Certification, and Dollar Amount on the form below. The Prime Contractor shall submit this form with each invoice submitted for payment, whether or not funds have been spent with a small, minority-, women-, and service-disabled veteran business enterprise Subcontractor for the period covered by the invoice. The Office of Supplier Diversity, Florida Department of Management Services will assist in furnishing names of qualified minorities. The Office of Supplier Diversity can be reached at (850/487-0915); the Internet Web address is http://dms.myflorida.com/other_programs/office_of_supplier_diversity_osd .

Sun State International Trucks, LLC, the contractor, a for-profit corporation registered in Florida, each referred to herein as "Party," and collectively referred to as the "Parties,"

WITNESSETH:

WHEREAS, the Department desires to provide eligible users, defined herein, with various Type A, Type C and Type D School Buses and Optional Equipment (defined herein as "Vehicles"), through the use of a state term contract pursuant to rule 60A-1.001, F.A.C.; and section 1006.27, F.S., and

WHEREAS, the Department solicited responses to an Invitation to Bid No: ITB 2022-01(ITB) to prospective contractors of said Vehicles; and

WHEREAS, the contractor responded to the ITB and desires to provide said Vehicles; and, unto each other;

NOW THEREFORE, in consideration of the premises, terms and conditions set forth herein, the Parties execute this contract so same becomes binding and enforceable by and through the Parties and their assigns, and agree heretofore:

SCOPE OF WORK

The intent of these specifications is to set forth and convey to prospective bidders the general type, character, performance and quality of the Vehicles desired by the Department and school districts. The contractor is authorized to provide Vehicles to any and all eligible users in the State of Florida. The Parties agree that the laws and rules that apply to this contract shall be for those applicable to contracts in excess of Category Two, or $35,000, as defined in chapter 287.017, F.S.

Pursuant to Section 7.10 of Bid No: ITB 2022-01, the following documents are hereby incorporated by reference:

- Department contract
- Any addenda to Bid No: ITB 2022-01
- ITB No: 2022-01
- Award Letter
- Contractor's response

IN WITNESS WHEREOF, the Parties hereto have caused this contract For Type A, Type C and Type D School Buses and Optional Equipment, Bid No: ITB 2022-01, to be executed on the dates shown below their respective signatures.

BID NO: ITB 2022-01
TYPES A, C AND D SCHOOL BUSES AND OPTIONAL EQUIPMENT

ATTACHMENT 7 - BIDDER REPRESENTATION

TO: Commissioner Richard Corcoran
Florida Department of Education
Tallahassee, Florida 32399-0400

I, the bidder, hereby represent that the specifications of school bus equipment furnished under terms of this bid will comply with the *National School Transportation and Procedures, Revised 2015*, and the *Florida School Bus Specifications, Effective January 2020*, as represented by the manufacturer to the Commissioner of the Florida Department of Education, State of Florida.

NOTES:

1. Do not include excise tax in price schedule. A tax exemption certification or number will be furnished by the purchasing agency.
2. All prices must be quoted in **even dollar amounts**.
3. Twenty-nine capacity Type C buses shall be offered with both front-mounted and rear-mounted lift availability.
4. All standard and optional tires bid shall be all-wheel position highway rib radials.

Re: Pre-delivery Inspection Process Outline

Buses offered by Sun State International via the Florida Department of Education's ITB 2022-01 will be pre-delivery inspected at a Sun State International facility and/or facility of an IC Bus Support Dealer in Florida.

Inspections will be performed and documented on the form provided as Attachment 10 of the ITB and per the requirements of the Florida School Bus Inspection Manual.

Sun State International and Florida IC support dealers are committed to participating in the FAPT/Department of Education's Inspector training and certification program.

Respectfully,

Mike McCullough
Executive Operations Manager

FOREWORD

Florida School Bus Specifications are adopted as authorized under section 1006.25, Florida Statutes (F.S.), and rule 6A-3.003, Florida Administrative Code (F.A.C.). This effective date of this edition of the Florida School Bus Specifications is January 1, 2020.

GENERAL INFORMATION AND WARRANTY PROVISIONS

All public school buses (bodies and chassis) owned, operated, rented, leased and contracted for by any public school board or charter school in Florida, used to transport children to and from school or school-related events, and purchased after the effective date of this document, as specified in rule 6A-3.003, F.A.C., must:

1. Meet or exceed the minimum requirements of these specifications;
2. Meet all applicable Federal Motor Vehicle Safety Standards (FMVSS); and
3. Meet or exceed the 2015 National School Transportation Specifications and Procedures (also referred to herein as the 2015 National Specifications), except when in conflict with the requirements herein. In such cases, the requirements specified in this document shall prevail.

The requirements specified herein are the **minimum** requirements for school buses in Florida. The date used to determine the applicability of these specifications is defined as the date the vendor receives the purchase order or signs a valid sales contract with the purchaser.

All school bus chassis and body manufacturers must certify to the Commissioner of Education, Florida Department of Education (department), by letter that all school buses offered for sale to or use by the public school systems, including charter schools, in Florida meet or exceed all standards, specifications and requirements specified herein.

Used school buses purchased or operated by a public school board or charter school in Florida must meet or exceed all federal and state requirements for public school buses that were in effect on the date the vehicle was manufactured.

Under the authority of s. 316.615, F.S., certain capacity school buses owned, operated or leased by nonpublic schools in Florida are required to meet the specifications prescribed herein.

DEFINITIONS:

1. **School Bus (State Definition):** Section 1006.25, F.S., defines a "school bus" as "a motor vehicle regularly used for the transportation of prekindergarten disability program and kindergarten through grade 12 students of the public schools to and from school or to and from school activities, and is owned, operated, rented, contracted or leased by any district school board..."
2. **School Bus (Federal Definition):** Title 49 CFR Part 571.3 defines: "school bus" as "a bus that is sold or introduced in interstate commerce for purposes that include carrying students to and from school or related events."
3. **Multi-Function School Activity Bus (MFSAB):** is defined by Florida school bus specifications as a school bus constructed to FMVSS and Florida school bus specifications to be used for school-related activities. MFSABs may not be used to transport students to and from school or between schools for the purpose of attendance.
4. **MFSAB (Federal Definition):** Title 49 CFR Part 571.3 defines "MFSAB" as a school bus NOT used to transport students to and from home or school bus stops.

SCHOOL BUS TYPES:

1. **Type A:** A school bus that is constructed using a cutaway front-section vehicle with a left side driver's door. This definition includes two classifications: Type A-1, with a Gross Vehicle Weight Rating (GVWR) of 14,500 pounds or less, and Type A-2, with a GVWR greater than 14,500 pounds and less than or equal to 21,500 pounds.
2. **Type C:** A school bus that is constructed using a chassis with a hood and front fender assembly. The entrance door is behind the front wheels. This type also includes the cutaway truck chassis or truck chassis with cab, with or without a left side door, and with a GVWR greater than 21,500 pounds. Also known as a conventional school bus.
3. **Type D:** A school bus that is constructed using a stripped chassis. The entrance door is ahead of the front wheels. This type bus is also known as a rear engine or front engine transit-style school bus.

MFSAB:

Can be a Type A, C or D school bus as described above, with the following exceptions:

Identification: The bus body shall bear the words **"ACTIVITY BUS"** in a contrasting color at least 8 inches high in the area where "school bus" is normally positioned. Lettering and numbering shall conform to FMVSS and Florida School Bus Specifications and shall meet reflectivity standards. The numbering on this bus may be of a contrasting color. The name of the school system shall be displayed in at least 6-inch letters on both sides of the bus in the beltline area. School or team lettering no larger than 6 inches high and logos no larger than 12 inches high may be placed below the beltline**. NO additional SIGNS OR LOGOS** shall be applied to any area of the bus, including the bumpers and the windows.

Color: The local school board must determine and approve the color of the activity bus. The color scheme may utilize any combination of up to **three** colors. This combination may be in addition to an optional white roof. The color National School Bus Yellow shall not be used as a part of the color scheme. The bus wheels shall **not** be painted black or yellow; however, they may be painted one of the three colors selected for the bus body or may be unpainted aluminum-finished polished wheels.

Seating: Type 2 lap/shoulder seat belts are required for all seating positions, including the driver's seat.

Lighting and Warning Devices: All activity buses shall meet state and federal standards for home-to-school bus lighting and warning device requirements, with the following exceptions:

1. MFSAB's shall not be equipped with alternately flashing amber and red student warning signal lamps used for loading and unloading students.
2. MFSABs shall not be equipped with stop arm signals or crossing control arms.

WARRANTIES AND PARTS AVAILABILITY FOR NEW VEHICLES:

All warranties listed herein must apply to all school buses manufactured after the effective date of these specifications and sold through the state school bus bid purchase program. Body and chassis manufacturers' warranty policies must allow revision of warranty start date for each vehicle to the actual in-service date by the school district. Appropriate forms to update chassis warranties must be included in the owner-operator's packet supplied with the chassis and must be conveyed along with the body warranty by the body builder to the district upon delivery of the completed unit. Above requirements must apply to the basic warranties, all component warranties and any extended warranties offered or required. There must be no hours-of-use limitation on any warranty required in these specifications or the associated state bid for school buses.

Manufacturers offering school bus chassis or bodies for sale in the state of Florida must make available replacement parts for said buses for a period of no less than 120 months.

The minimum labor rate for all warranty related repairs must be **$75.00** per hour.

CHASSIS WARRANTIES:

1. The minimum chassis warranty shall be **12,000 miles or 12 months**.
2. The standard chassis warranty for Florida school bus bids shall be **100,000 miles or 60 months**.
3. Engines (including flywheel, flex plate and harmonic balancer) on types A, C and D chassis must be included with both minimum chassis warranty and standard chassis warranty as described above.
4. Pricing requests will be added to the bid for the following extended engine warranty options:
    a. pricing for 60 months/150,000 miles;
    b. pricing for 60 months/200,000 miles; and
    c. pricing for 60 months/unlimited mileage.
5. Chassis frame rails, cross members, fuel tanks, front axle I-beams and rear axle housings must be warranted for a period of 120 months, from the updated in-service date of the vehicle, 100 percent parts and labor.
6. Paint finish coats to chassis, hood, fenders, and cowl shall be warranted for 60 months/100,000 miles, 100 percent parts and labor, for adhesion, color retention and gloss retention.
7. Color Retention: During the first 36 months from the in-service date, the color coat must not shift colors more than 4 ΔE from the centroid, as specified in School Bus Manufacturers Technical Council (SBMTC) publication SBMTC-008. During the 60-month warranty period, the color coat must not shift color more than 8 ΔE from the centroid, as specified in SBMTC-008.

8. Gloss: During the first 36 months from the in-service date, the gloss reading must not fall below 60 at 60°. During the 60-month warranty period, the gloss reading must not drop below 30 at 60°.
    a. All measurements must be the average of 12 readings taken at various points on the bus, but no reading must be more than three points under the stated minimum. All readings must be taken after the bus is thoroughly washed to remove road film and dust.

BODY WARRANTIES:

1. The minimum body warranty shall be 12 months.
2. The standard body warranty for Florida school bus bids shall be for 60 months/100,000 miles, 100 percent parts and labor and shall include, but not be limited to, the following items:
    a. The total air conditioner system on any bus so equipped, including parts and labor and excluding air filters used in normal preventive maintenance. Chassis engine-driven air conditioner compressor applications must be approved in writing by the engine manufacturer, who must state that the installation will not void or reduce the engine manufacturer's warranty or extended service liabilities in any way.
    b. All mirror assemblies and mounting bracketry must be warranted against rust and corrosion and any reduction in clarity of view due to discoloration or other deterioration of the lens.
    c. All bus body electrical wiring and switches, including, but not limited to, damage resulting from wiring or connectors becoming abraded, pierced by fasteners, shorted or otherwise damaged during manufacture or use.
    d. Paint finish coats to body, hood and cowl for adhesion, color retention and gloss retention. Acceptable lower limits during the warranty period are as follows:
        i. Adhesion: During the 60-month warranty period, paint and priming compounds must not fail to adhere to the bus with normal use and care.
        ii. Color Retention: During the first 36 months of service, the color coat must not shift colors more than 4 ΔE from the centroid, as specified in SBMTC-008. During the 60-month warranty period, the color coat must not shift color more than 8 ΔE from the centroid, as specified in SBMTC-008.
        iii. Gloss: During the first 36 months of service, the gloss reading must not fall below 60 at 60°. During the 60-month warranty period, the gloss reading must not drop below 30 at 60°.
        iv. All measurements must be the average of 12 readings taken at various points on the bus, but no reading must be more than three points under the stated minimum. All readings must be taken after the bus is thoroughly washed to remove road film and dust.
    e. All emergency exit roof hatches, including defects in material and workmanship and against leakage.
    f. All passenger seat back cushions and seat frames, excluding vandalism of any exposed foam.
    g. All powered entrance doors and operating and control systems.
3. Power lift warranty minimums are listed below, and are **not included** with the standard body warranty.

POWER LIFT WARRANTY:

A statement of warranty must be provided with each lift assuring the quality of materials and workmanship of the product for at least 36 months from the updated in-service date of the vehicle. The minimum warranty must provide 100 percent parts coverage for 36 months and 100 percent labor coverage for 12 months.

MINIMUM WARRANTY OPTIONS:

Each manufacturer or dealer may include as part of its bid package credit option allowances for districts that wish to forego the aforementioned standard and extended warranty plans and purchase the minimum/base warranty option package.

TECHNOLOGY AND EQUIPMENT, NEW:

The intent of these specifications is to accommodate new technologies and equipment that will better facilitate student transportation. New technology and equipment are acceptable for use in all vehicles if:

1. Items do not compromise the effectiveness or integrity of any major safety system. (Examples of safety systems include, but are not limited to, compartmentalization, the eight-lamp warning system, emergency exits and the approved color scheme.)

2. Items do not diminish the safety of the bus interior.
3. Items do not create additional risk to students who are boarding or exiting the bus or are in or near the school bus loading zone.
4. Items do not require undue additional activity and/or responsibility for the driver.
5. Items generally increase efficiency and/or safety of the bus, generally provide for a safer or more pleasant experience for the occupants and pedestrians in the vicinity of the bus and/or generally assist the driver and makes his/her many tasks easier to perform.

CHANGES OR CLARIFICATION OF SPECIFICATIONS:

Florida School Bus Specifications may be amended pursuant to the provisions of rule 6A-3.003, F.A.C.
The School Transportation Management Section, with the concurrence of the Florida Association for Pupil Transportation (FAPT), School Bus Specifications Committee, and consistent with Florida purchasing laws and the bus bid contract, may at its discretion grant variances or exemptions and may from time to time issue clarifications of these specifications, as necessary, to provide safe, efficient and cost-effective equipment to Florida school districts and charter schools and to provide for advances in technology.

Should a clarification or interpretation of these Florida School Bus Specifications be requested, inquiries should be directed to Director, School Transportation Management Section, Florida Department of Education, 325 West Gaines Street, Suite 834, Tallahassee, Florida 32399-0400.

SECTION I

TYPE A SCHOOL BUS
MINIMUM CHASSIS SPECIFICATIONS

ALTERNATOR:
Type A buses shall have a minimum 130-amp alternator. Buses equipped with an electrically powered wheelchair lift and/or air conditioning shall be equipped with the highest rated capacity available from the chassis Original Equipment Manufacturer (OEM).

BATTERIES:
The storage battery, or batteries, shall have a minimum cold cranking capacity rating (cold cranking amps) equal to the cranking current required for 30 seconds at 0 degrees Fahrenheit and a minimum reserve capacity rating of 120 minutes at 25 amps. Higher capacities may be required, depending upon optional equipment and local environmental conditions.

BRAKE, PARKING:
On Type A chassis, the manufacturer's standard parking brake is acceptable. On Type A chassis with hydraulic brakes, the parking brake control must be mounted for easy access by the driver. On air brake models, the control valve to set the parking brakes on the rear wheels must be dash-mounted.

BRAKES, SERVICE:
Hydraulic or air brakes are permissible.

BUMPER, FRONT:
Type A buses may be equipped with an OEM-supplied front bumper.

ENGINE EQUIPMENT:
1. A dry type air cleaner is required on all engines.
2. The engine must be equipped with full-flow, spin-on or cartridge-type oil filter(s), with the filter header(s) mounted directly to engine.
3. An engine coolant recovery or deaeration system is required on all chassis. Type A diesel engines must include a means to visually check the coolant level without removing the deaeration tank cap or releasing pressure from the cooling system.
4. A warning system consisting of a light and a buzzer is required on diesel-powered Type A chassis to notify the driver of low engine oil pressure and/or coolant overheating.
5. A fuel filtration and water separator system is required on all Type A diesel engines and must remove contaminants from the fuel prior to entry into the engine. The system must have a clear sight bowl or be equipped with a water-in-fuel light to notify technicians of the presence of water, must provide a valve for draining trapped water from the system and must include an electric or manual priming pump.
6. An engine oil pressure gauge is required. It must provide accurate, easily discernible readings across the entire operating range, from hot idle to full oil pressure. The gauge on engines with idle oil pressure that under normal conditions is low must provide a clear distinction between no oil pressure and engine idle oil pressure. The gauge must be directly visible to the driver in the normal seated position and must not be mounted near the center of the dash where the service door control or its associated hardware could block visibility of the gauge.
7. Radiator and other engine coolant hoses supplied by the chassis manufacturer (not including heater hoses) must be constructed of silicone rubber or must be constructed with ethylene propylene diene monomer (EPDM) covering and aramid fiber reinforcement meeting or exceeding Society of American Engineers (SAE) standard J20R EC Class D-1. Silicone hose, if used, must include stainless steel shoe-type hose clamps or constant-torque clamps. Hoses must have markings, coloring or other visible means of distinguishing them from the standard hoses.

ENGINE PERFORMANCE REQUIREMENTS FOR TYPE A BUSES:

Each bus must be furnished with a power train that meets or exceeds the following minimum criteria when tested at the gross vehicle weight rating (GVWR) required for a given bus capacity, and with all accessories (including air conditioner compressor(s), if equipped) on and operating:

1. Startability of 20 percent;
2. Gradeability of 5 percent at 25 miles per hour;
3. Gradeability of 1.5 percent at 50 miles per hour; and
4. Top speed of 70 miles per hour minimum.

Performance must be measured with the actual completed vehicle (i.e., with the body installed, unloaded except for the driver and one passenger). The vehicle must be in drive, with the engine at idle, the service brakes applied, the emergency brakes released, and all accessories on and operating. Measurement of acceleration time must begin at the moment the throttle is applied (the throttle is to be immediately and rapidly depressed to full throttle).

NOTE: The chassis manufacturer should use the heaviest chassis/body combination meeting these specifications for the specific bus size to determine required power train components. This test is an on-road test and will be performed using the heaviest available chassis/body, depending on body(ies) supplied. At the discretion of the department, unanticipated factors or variations in test conditions affecting performance test results that are beyond the control of the chassis manufacturer may be taken into account. A Pro Link, a diagnostic computer, or a speed wheel are also acceptable tools for this test.

Maximum acceleration time (from zero mph), under the conditions specified above, must be as follows (measured in seconds):

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.4	6.2	12.0	20.0	32.2

Manufacturers may offer additional engine configurations and horsepower ratings that exceed these requirements as optional equipment.

EXHAUST SYSTEM:

The exhaust system on Type A buses must have a corrosion-resistant muffler and tailpipe. The tailpipe must exit to the left of left frame rail and behind the rear wheels. The chassis manufacturer must ensure that the exhaust design allows the exit location left of the left frame rail to be maintained after any modifications to frame length by the chassis or body manufacturer. Manufacturers must ensure that exhaust temperature exiting the tailpipe with the engine running during any normal loading or unloading activity will not produce first, second or third-degree burns on students or other individuals present. The bus must not automatically regenerate the diesel particulate filter while the bus is stationary.

FRAME SIDE MEMBERS:

Frame side members must be of one-piece construction between the front and rear spring hangers. Frame rails of Type A chassis must have a minimum tensile strength of 50,000 pounds per square inch (psi).

FRONT AXLE WHEEL SEALS:

All Type A buses greater than 14,500 GVWR must have oil-lubricated front axles and seals.

FUEL TANK:

The fuel tank filler spout must be located in an easily serviceable location.

HEADLIGHTS:
Headlights must meet FMVSS and SAE standards. All buses must be equipped with Full-Time Lights (FTL) meeting the following requirements:

1. With the ignition switch off, the headlights will operate normally and the FTL system will not operate.
2. With the ignition switch on or in the "accessory" position, and with the engine not running, the FTL must not operate.
3. With the ignition switch on and the engine running with the headlight switch off, the FTL system must operate, providing low-beam headlights and tail, clearance and identification (ID) lights.
4. In all cases, the headlight switch must override the FTL system when in the "on" position.
5. This system must include a buzzer that activates if the headlight system is on with the key switch in the "off" position.

IGNITION SYSTEM:
All buses of like chassis manufacturer must have one key, regardless of the type of key supplied to Florida purchasers.

INSULATION:
Type A chassis must include heat and noise insulation inside the bus covering the dash panel (fire wall) area to as great an extent as possible. Insulation must extend at least down to the point where the body floor connects to the fire wall, including the engine cover (doghouse), which may be insulated on the interior or exterior.

LINE-SET TICKET:
The manufacturer must include with delivery of the vehicle a line-set ticket to accurately reflect all chassis components, the Gross Axle Weight Rating (GAWR) of both front and rear axles, and the gross vehicle weight rating (GVWR).

PAINT AND FINISH:
School bus yellow paint must meet SBMTC-008 for color and must have a finished gloss rating of at least 85 at 60°F and a distinctness of image rating of an average of at least 50, measured using the same method specified for gloss under **GENERAL INFORMATION AND WARRANTY PROVISIONS**. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. Trim, lettering and the bumper must be black, except that the bumper must be striped with reflective material in accordance with National School Transportation Specifications and Procedures, Revised 2015. Rims for all buses with hub-piloted wheels must be National School Bus Yellow and powder-coated by the rim manufacturer. Lug nuts must not be painted. All stud-piloted rims must be painted black.

STEERING:
A factory-installed tilt steering wheel/column is required.

TIRES AND RIMS:
Chassis must be equipped with radial tubeless tires and must have dual rear wheels. Type A buses greater than 14,500 GVWR must use hub-piloted disc wheels. Tires and rims must conform to current standards of the Tire and Rim Association.

TRANSMISSION, AUTOMATIC:
An automatic transmission is required on all chassis. It shall be heavy-duty, with a minimum of four forward speeds, on all units. On Type A chassis, 30 capacity and larger, the transmission must be an Allison 1000 or 2000 or approved equal. An external filter in the transmission oil cooler return line is required on Allison 1000 and 2000 equipped units. All Allison transmissions require OEM-approved synthetic transmission fluid and OEM filters.

Automatic transmissions incorporating a parking pawl must have a transmission shifter interlock controlled by the application of the service brake to prohibit accidental engagement of the transmission. All non-park pawl

transmissions must incorporate a park brake interlock that requires the service brake to be applied to allow release of the parking brake.

Any requests for transmission substitutions must be approved in writing by the purchasing district and the department's School Transportation Management Section.

VOLTAGE CONTROL:
The voltage regulator must be solid state (transistorized) and readily accessible for service. A voltmeter is required with a graduated scale.

WARRANTIES:
See required warranties under **GENERAL INFORMATION AND WARRANTY PROVISIONS**.

WIRING HARNESS:
The wiring must be rated for 100 amps load and include complete wiring for the tail and stop lights. It must be designed with color coding for circuits. The fuse box door, if equipped, must have a positive latch.

TYPE A SCHOOL BUS
OPTIONAL CHASSIS EQUIPMENT

AIR-SPRUNG REAR SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung rear suspension system, when available. Rear shock absorbers are also required with this option, as on standard suspension systems.

COLLISION MITIGATION:
There shall be an option for passive and/or active electronic collision mitigation system(s), if available.

LOW-PROFILE RADIAL TIRES:
There shall be an option for all-wheel-position, highway-ribbed, low-profile, tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs.

SPARE DISC WHEEL:
There shall be an option for a spare disc wheel, which must be same size and type as the original rims.

STABILITY CONTROL:
There shall be an option for electronic stability control meeting the minimum requirements of FMVSS No. 136, if available.

STRAIGHT FLOOR CHASSIS:
There shall be an option for Type A chassis to accept straight floor bodies (i.e., bodies with no wheel wells). This type chassis must have a combination of axles, suspension, tires, wheels and axle stops that ensures that the maximum upward travel of the rear suspension in normal straight-ahead driving does not protrude above the top of the frame rails.

TOW HOOKS OR TOW EYES:
There must be two subcategories for this option: (1) two heavy-duty front tow hooks or tow eyes (each hook or eye must be installed by the chassis manufacturer in an approved manner to each frame rail); (2) two heavy-duty rear tow hooks or tow eyes (each hook or eye must be installed by the chassis manufacturer in an approved manner to each frame rail).

AUTOMATIC TRANSMISSION WARRANTY:
There shall be an option for extension of the transmission warranty to five years, unlimited mileage, 100 percent parts and labor. Also see GENERAL INFORMATION AND WARRANTY PROVISIONS.

SECTION II

TYPE C AND TYPE D SCHOOL BUS
MINIMUM CHASSIS SPECIFICATIONS

ALTERNATOR:
Types C and D chassis with internal combustion engines shall be equipped with a heavy-duty alternator having a minimum output rating of 200 amps or higher, and should produce a minimum current output of 50 percent of the rating at engine idle speed.

Buses equipped with an electrically powered wheelchair lift and/or air conditioning shall have a minimum alternator output of 240 amps and may be equipped with a device that increases the engine idle speed when the voltage drops to, or below, a pre-set level.

BATTERIES:
The storage batteries shall have minimum cold cranking capacity rating (cold cranking amps) equal to the cranking current required for 30 seconds at 0 degrees Fahrenheit and a minimum reserve capacity rating of 120 minutes at 25 amps. Higher capacities may be required, depending upon optional equipment and local environmental conditions.

BRAKE, PARKING:
On hydraulic brake models, a parking brake is required, with the control mounted for easy access by the driver. On air brake models, a dash-mounted control valve to spring-set the parking brake on the rear wheels is required.

BRAKES, SERVICE:
Hydraulic brakes are acceptable on 29-35 capacity Type C buses. Air brakes are required on all Type C buses larger than 41 capacity, and all Type D front and rear engine buses.

BUMPER, FRONT:
Types C and D buses must have a front bumper that is black, of full width channel type, and a minimum of 8 inches wide (vertically). The bumper must have sufficient structural and mounting strength to ensure that the front of the vehicle can be lifted by means of an air bumper-type jack, without permanent deformation of the bumper, brackets, or chassis frame rail(s).

ENGINE EQUIPMENT:
1. Diesel engines must be available in at least one of the following two configurations:
    a. Parent bore type block; in-line 6 cylinder design; minimum 6.4 liters displacement.
    b. Wet sleeve type block; in-line 6 cylinder design; minimum 6.4 liters displacement.

    NOTE: Additional engines of other configurations or displacements, including gasoline, propane and CNG (not in lieu of the above), meeting all other requirements listed herein may be offered, subject to approval by the department. Electric-powered configurations may be offered and are exempt from the engine requirements listed below.

2. A dry type air cleaner is required. An air filter restriction indicator is required on diesel engines. The restriction indicator must incorporate a system that does not allow unfiltered air into the engine if the indicator cracks or breaks.
3. The engine must be equipped with a full-flow, spin-on or cartridge-type oil filter(s), with the filter header(s) mounted directly to engine.
4. An engine coolant recovery or deaeration system is required on all chassis. Diesel engines must include a means for visually checking the coolant level without removing the deaeration tank cap or releasing pressure from the cooling system.

5. A warning system consisting of a light and a buzzer is required on gasoline, propane, CNG and diesel-powered chassis to notify the driver of low engine oil pressure and/or coolant overheating.
6. A fuel filtration system with a water separator is required on diesel engines and must remove contaminants from the fuel prior to entry into the engine. The system must have a clear sight bowl or be equipped with a water-in-fuel light to notify technicians of the presence of water, must provide a valve for draining trapped water from the system, and must include an electric or a manual priming pump.
7. An engine oil pressure gauge and a coolant temperature gauge are required. The oil pressure gauge must provide accurate, easily discernible readings across the entire operating range, from hot idle to full oil pressure. Gauges on engines with idle oil pressure, which under normal conditions is low, must provide a clear distinction between no oil pressure and engine idle oil pressure. Gauges must be directly visible to the driver in the normal seated position and must not be mounted near the center of the dash where the service door control or associated hardware could block visibility of the gauges.
8. Radiator and other engine coolant hoses supplied by the chassis manufacturer (not including heater hoses) must be constructed of silicone rubber or ethylene propylene diene monomer (EPDM) covering and aramid fiber reinforcement meeting or exceeding SAEJ20R EC Class D-1. Silicone hose, if used, must include stainless steel shoe-type hose clamps or constant-torque clamps. Hoses must have markings, coloring or other visible means of distinguishing them from standard hoses.
9. Manufacturers must use the largest capacity oil pan available for each engine configuration in order to achieve the longest duration oil change interval.

ENGINE PERFORMANCE REQUIREMENTS:

Each bus must be furnished with a power train that meets or exceeds the following minimum criteria when tested at the GVWR required for a given bus capacity, and with all accessories (including air conditioning compressor(s), if equipped) on and operating:

1. Startability of 20 percent;
2. Gradeability of 5 percent at 25 miles per hour;
3. Gradeability of 1.5 percent at 50 miles per hour; and
4. Minimum top speed of 60 miles per hour.

NOTE: The chassis manufacturer should use the heaviest chassis/body combination meeting these specifications for the specific bus size to determine required power train components. This test is an on-road test and will be performed using the heaviest available chassis/body, depending on body or bodies supplied. At the discretion of the department, unanticipated factors or variations in test conditions affecting performance test results that are beyond the control of the chassis manufacturer may be taken into account. A Pro Link, a diagnostic computer or a speed wheel are also acceptable tools for this test.

Maximum acceleration time (from zero mph), must be as follows (measured in seconds): Performance must be measured with the actual completed vehicle (i.e., with body installed, unloaded except for the driver and one passenger). The vehicle must be in drive, with the engine at idle, the service brakes applied, the emergency brakes released, and all accessories on and operating. Measurement of acceleration time must begin at the moment the throttle is applied (the throttle is to be immediately and rapidly depressed to full throttle).

29-77 Capacity Types C and D:

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.4	6.2	12.0	20.0	32.2

78-90 Capacity Type D:

TEST METHOD	0-10 MPH	0-20 MPH	0-30 MPH	0-40 MPH	0-50 MPH
ACTUAL	3.7	7.1	12.0	20.0	32.2

Manufacturers may offer additional engine configurations and horsepower ratings that exceed these requirements as optional equipment.

EXHAUST SYSTEM:
The exhaust system must have a corrosion-resistant muffler and tailpipe. The tailpipe must exit to the left of left frame rail and behind the rear wheels. Manufacturers must ensure that exhaust temperature exiting the tailpipe with the engine running during any normal loading or unloading activity will not produce first, second or third-degree burns on students or other individuals present. The bus must not automatically regenerate the diesel particulate filter while the bus is stationary. Also see Section III, Electrical Equipment and Wiring.

FRAME SIDE MEMBERS:
Frame side members must be of one-piece construction between the front and rear spring hangers. Frame rails must have a minimum tensile strength of 50,000 pounds per square inch (psi).

FRONT AXLE LUBRICATION:
All buses must have oil-lubricated front axle hubs, providing an externally visible means of checking the lubricant level.

HEADLIGHTS:
Headlights must meet FMVSS and SAE standards. All buses must be equipped with Full-Time Lights (FTL) meeting the following requirements:

1. With the ignition switch off, the headlights will operate normally and the FTL system will not operate.
2. With the ignition switch on or in the "accessory" position, and with the engine not running, the FTL must not operate.
3. With the ignition switch on and the engine running with the headlight switch off, the FTL system must operate, providing low-beam headlights and tail, clearance and identification (ID) lights.
4. In all cases, the headlight switch must override the FTL system when in the "on" position.
5. This system must include a buzzer that activates if the headlight system is on with the key switch in the "off" position.

HOOD:
Engine hood on Type C buses must not require more than 20 pounds of force to open or close.

IGNITION SYSTEM:
All ignition switches must be keyed alike. All buses of like chassis manufacturer and type must have one key.

INSULATION:
Type C chassis must include full width and height heat and noise insulation on the inside or outside of the bus covering the dash panel (firewall) area to as great an extent as possible and at least up to the top of the firewall and down to the point that the body floor connects to the firewall, including the engine cover (doghouse). Type D Front Engine buses must include complete heat and noise insulation of the doghouse area.

LINE-SET TICKET:
Manufacturer must include with delivery of vehicle a line-set ticket to accurately reflect all chassis components, GAWR of both front and rear axles, and GVWR.

PAINT AND FINISH, TYPES C and D CHASSIS:
School bus yellow paint must meet SBMTC-008 for color and must have a finished gloss rating of at least 85 at 60° and a distinctness of image rating of an average of at least 50 measured using the same method specified for gloss under GENERAL INFORMATION AND WARRANTY PROVISIONS. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. Trim, lettering and bumper must be black, except that bumper must be striped with reflective material in accordance with National School Transportation Specifications and

Procedures, Revised 2015 and Procedures or these specifications. Rims must be powder-coated, National School Bus Yellow, by the wheel manufacturer. Lug nuts must not be painted.

NOTE: MFSAB is excluded from the school bus yellow color requirement of this section, however, all other paint rating requirements shall apply. See MFSAB requirements under **GENERAL INFORMATION AND WARRANTY PROVISIONS** beginning on page 1.

RADIATOR FILLER TUBE:
The radiator filler must be located for ease of service from the engine compartment on Type C and Type D rear engine buses. It must be located for ease of service from outside the bus on Type D front engine buses.

STABILITY CONTROL:
Electronic stability control meeting the minimum requirements of FMVSS No. 136 is required.

STEERING:
A tilt steering wheel/column is required.

TIRES AND RIMS:
Chassis must be equipped with radial tubeless tires mounted on hub-piloted disc wheels. All wheels of 8.25 inches or greater width must be two hand-hold wheels. Tires and rims must conform to current standards of the Tire and Rim Association (see Chassis Specifications Charts for sizes). See PAINT AND FINISH for wheel color information.

TRANSMISSION, AUTOMATIC:
An automatic transmission is required on all chassis as specified:

1. Type C 29-47 capacity, Allison PTS 2100, 5 speed or Ford 6R140, 5 speed or approved equal.
2. Type C 65-78 capacity, Allison PTS 2500, 5 speed or Ford 6R140, 5 speed or approved equal.
3. Type D 71 capacity front engine, Allison PTS 2500, 5 speed or approved equal.
4. Type D 78-89 capacity front engine, Allison PTS 2500, 5 speed or approved equal.
5. Type D 72 capacity rear engine, Allison PTS 2500, 5 speed or approved equal.
6. Type D 78-89 capacity rear engine, Allison PTS 3000, 6 speed or approved equal.

All requests for transmission substitutions must be approved in writing by the purchasing district and by the department's School Transportation Management Section.

Allison PTS 2000 series transmissions must include an external spin-on type, vertically mounted transmission fluid filter. The shifter must be dash- or console-mounted and must be either a T-handle or push-button design.

Allison PTS 3000 series transmissions must have at least five speeds enabled for front engine Type D and six speeds for rear engine Type D.

All transmissions require synthetic or OEM approved equal transmission fluid and must use OEM filters.

Automatic transmissions incorporating a parking pawl must have a transmission shifter interlock controlled by the application of the service brake to prohibit accidental engagement of the transmission. All non-park pawl transmissions must incorporate a park brake interlock that requires the service brake to be applied to allow release of the parking brake.

WIRING HARNESS:
All chassis electrical wiring must conform to current standards of the Society of Automotive Engineers, be coded by color, insulated and completely encased in convoluted loom or equivalent protective wrapping. In locations that prevent such looming, wires must be properly held in place by appropriate fasteners at intervals necessary to prevent possible damage to wire insulation. The fuse box door, if equipped, must have a positive latch. All chassis electrical

circuits must be fused per the requirements of FMVSS. Buses using multiplexed electrical systems may meet the intent of these specifications without the use of specified equipment, subject to approval by the department.

TYPE C CHASSIS:

Maximum Design (Passenger) Capacity	29LT	29	47	65	71	77
Front Axle Weight Rating (pounds)	5,000	6,000	7,000	9,000	10,000	10,000
Rear Axle Weight Rating (pounds)	10,000	13,000	15,000	19,000	19,000	20,000
Cowl to axle, minimum (inches)	123	123	162	229	250	250
Minimum tire size-Load Range; tubeless-radial ply*	225R-19.5F	10R-22.5-F	11R-22.5-G	11R-22.5-G	11R-22.5-G	11R-22.5-G
Disc wheels -- minimum rim width (inches)	6.75	7.5	8.25	8.25	8.25	8.25
Hub-piloted disc wheels for tubeless radial tires	6 stud, 5 hand hold	6 stud, 5 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold	10 stud, 2 hand hold
Fuel tank minimum size (gallons)	30	30	60	60	60	60
Allison transmission series (# of forward gears) ** Must include park pawl.	PTS 1000 or 2200 (5)**	PTS 2100 (5)	PTS 2100 (5)	PTS 2500 (5)	PTS 2500 (5)	PTS 2500 (5)

TYPE D FORWARD CONTROL FRONT ENGINE:

Maximum Design (Passenger) Capacity	71	77	83	89
Front Axle Weight Rating (pounds)	10,800	12,000	12,000	12,000
Rear Axle Weight Rating (pounds)	17,000	19,000	21,000	23,000
Tires – minimum size, Load Range acceptable*	11R-22.5G	11R-22.5G	11R-22.5-G	11R-22.5-G
Hub-piloted disc wheels-10 stud, minimum rim width (inches)	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold
Minimum size fuel tank (gallons)	60	60	60	60
Allison transmission series (# of forward gears)	PTS 2500 (5)	PTS 3000 (5)	PTS 3000 (5)	PTS 3000 (5)

An automatic transmission is required on all chassis. See **TRANSMISSION, AUTOMATIC** for required specifications.

Maximum overall length of the bus must not exceed 45 feet, bumper to bumper.

*Low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs may be approved in lieu of standard conventional tubeless radial tires.

TYPE D REAR ENGINE CHASSIS SPECIFICATIONS CHART:

Maximum Design (Passenger) Capacity	72	78	84	90
Front Axle Weight Rating (pounds)	11,000	12,000	12,000	12,000
Rear Axle Weight Rating (pounds)	19,000	21,000	23,000	23,000
Tires – minimum size, Load Range acceptable *	11R-22.5-G	11R-22.5-G	11R-22.5-G	11R-22.5-G
Hub-piloted disc wheels-10 stud, minimum rim width (inches)	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold	8.25, 2 hand hold
Minimum size fuel tank (gallons)	60 gal.	60 gal.	60 gal.	60 gal.
Allison transmission series (# of forward gears)	PTS 2500 (5)	PTS 3000 (6)	PTS 3000 (6)	PTS 3000 (6)

Maximum length of vehicle must not exceed 45 feet, bumper to bumper.

*Must meet Tire and Rim Association Standards. Low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs may be approved in lieu of standard conventional tubeless radial tires.

TYPE C AND TYPE D SCHOOL BUS
OPTIONAL CHASSIS EQUIPMENT SPECIFICATIONS

AIR-SPRUNG FRONT SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung front suspension system, when available. Front shock absorbers are also required with this option, as on standard suspension systems.

AIR-SPRUNG REAR SUSPENSION SYSTEM:
There shall be an option for an air-ride or approved equivalent air-sprung rear suspension system, when available. Rear shock absorbers are also required with this option, as on standard suspension systems.

COLLISION MITIGATION:
There shall be an option for passive and/or active electronic collision mitigation system(s), if available.

ALTERNATOR, HIGHER OUTPUT:
There shall be an option for alternators having a minimum of 270 amps hot-rated output.

HIGH CAPACITY FUEL TANK:
There shall be an option for a fuel tank of higher capacity than the standard fuel tank, mounted on the right side or between the frame rails, when available.

LOW-PROFILE RADIAL TIRES:
There shall be an option for all-wheel-position, highway-ribbed, low-profile tubeless radial tires of size and load range meeting Tire and Rim Association Standards for the required GAWRs.

SPARE DISC WHEEL:
There shall be an option for a spare disc wheel, which must be same size, type and color as the original rims.

TOW HOOKS OR TOW EYES:
There shall be an option for two heavy-duty tow hooks or tow eyes, installed by manufacturer on each frame rail at the front of the bus in an approved manner. The manufacturer may also offer rear-mounted tow hooks or tow eyes meeting these requirements.

STRAIGHT FLOOR CHASSIS:
There shall be an option for a chassis designed to accept straight floor bodies (i.e., bodies with no wheel wells). This type of chassis must have a combination of axles, suspension, tires, wheels and axle stops that ensures that the maximum upward travel of the rear suspension in normal straight-ahead driving does not protrude above the top of the frame rails.

TIRES:
There shall be an option for alternate brand, size and tread designs of tires when available. Optional tires must meet GAWR requirements and Tire and Rim Association Standards.

[Page Intentionally Blank]

SECTION III

MINIMUM SCHOOL BUS BODY SPECIFICATIONS

The specifications set forth in this section apply to types A, C and D school buses. Special exceptions for Type D bodies are listed at the end of this section. The completed school bus must meet all Federal Motor Vehicle Safety Standards, requirements of the State of Florida and requirements of the National School Transportation Specifications and Procedures, Revised 2015 (state specifications supersede national specifications). References to bus capacity within these specifications are for Maximum Design Capacity, as defined below under **BODY DATA PLATE**.

BATTERY DISCONNECT SWITCH:

There must be a battery disconnect switch in the air conditioning (A/C) or battery compartment or within three feet of the battery box if no A/C box is available. This switch must be accessible and operable from the exterior of the bus. Electronic control modules may be connected to battery power per the manufacturer's discretion; however, any circuit that does not become an open circuit with the actuation of the battery disconnect switch must be fused appropriately at the power source and labeled so each circuit is easily identifiable.

BODY DATA PLATE:

A durable data plate must be mounted inside the body in a clearly visible location. The body data plate information must include a listing of the "Maximum Design Capacity" and the "Equipped Capacity" of the body. Maximum Design Capacity must be the maximum number of passengers the bus (body shell size) can carry, based on 12.8 inches minimum seat width per passenger, with the minimum knee room (seat spacing) permitted by FMVSS No. 222. Equipped Capacity must be the actual passenger capacity of the finished body, as equipped by the manufacturer, based on:

1. The number of total passengers the installed bench seats are designed to carry; and
2. The number of wheelchair positions installed (based on wheelchair space dimensions contained in Section IV of these specifications).
3. An example of the format to be used for Equipped Capacity is "28 + 3 WC," meaning 28 regular passenger seating positions plus three wheelchair positions.

BODY FLUID CLEANUP KIT:

Each bus must be equipped with a disposable, sealed body fluid cleanup kit mounted by a method that will retain it under a load equivalent to 20 times the weight of the kit and must be removable without the use of tools. The kit must be accessible to the driver. The kit container must be sealed with a breakable, nonreusable seal, with the following items:

1. A U.S. Environmental Protection Agency (EPA) registered liquid germicide (tuberculicidal) disinfectant;
2. A fully disposable wiping cloth;
3. A water-resistant spatula;
4. Step-by-step directions;
5. Absorbent material with odor counteractant;
6. Two pairs of gloves (Nitrile);
7. One package towelettes; and
8. A discard bag (non-labeled paper bag with plastic liner and a twist tie). This bag must be approximately 4 x 6 x 14 inches and of a non-safety color (i.e., not red, orange or yellow).

BUMPER, REAR:

The rear bumper must be of pressed steel channel at least 3/16 inch thick, 8 inches wide (vertically), and flanged 2 inches at the top and bottom, or otherwise designed to furnish equal flexural strength. It must be of wraparound design and securely fastened to each chassis rail and braced from each end of bumper to chassis rail with heavy braces. The bumper must have the structure and strength necessary to allow the unloaded vehicle to be lifted with a bumper jack without deformation or damage. The contour of the bumper must fit the contour of the body in a manner to prevent

hitching to or riding on the bumper. An appropriate seal must be applied between the bumper and the body panel, unless the gap between the bumper and the body panel is 1/8 inch or less.

DRIVER'S DOCUMENT COMPARTMENT:

On Types C and D buses, a pouch on the front side of the driver's side crash barrier with minimum dimensions of 17 x 12 x 4 inches is required. This pouch must be located to the left side of the barrier for types B and C, and to the right side of the barrier for Type D, accessible to the driver from the seated position. It must be made of the same material as the covering on the barrier and have a lid or cover with a latching device such as Velcro™ or snaps.

DRIVER'S SEAT:

All school buses must have a driver's seat equipped with a one-piece high back designed to minimize the potential for head and neck injuries in rear impacts, providing minimum obstruction to the driver's view of passengers, and meeting applicable requirements of FMVSS No. 222. The height of the seat back must be sufficient to provide the specified protection for up to a 95th percentile adult male, as defined in FMVSS No. 208. The driver contact area of the cushion and seat back must be made of soil and wear-resistant cloth material, nylon, or equivalent. The remainder of the seat may be of a different material. The seat must be centered behind the steering wheel with the backrest a minimum distance of 11 inches behind the steering wheel. The seat must be securely mounted to ensure minimal flexing of the seat and the floor panel(s).

All school buses equipped with air brakes must also be equipped with an air suspension driver's seat meeting the following additional requirements:

1. The air control for the height adjustment must be within easy reach of the driver in the seated position.
2. The seat cushion must be a minimum of 19 1/2 inches wide, must be fully contoured for maximum comfort, and have a minimum of two adjustment positions to allow adjustment of seat bottom angle.
3. The backrest must include adjustable lumbar support.
4. The seat must have a minimum of 7 inches fore and aft travel, adjustable with the driver in the seated position. This requirement applies to the seat mechanism.
5. The seat must have a minimum 4 inches up and down travel.
6. The seat back must include adjustability of tilt angle.
7. All adjustments must be by fingertip controls not requiring the use of tools.
8. Air suspension seats must be dampened by dual shock absorbers, acting independently.
9. The seat must comply with all applicable Federal Motor Vehicle Safety Standards.
10. All other buses must have a driver's seat equipped with a hydraulic and/or spring suspension base, and a minimum seat cushion width of 19 inches, and must meet the other requirements listed herein for air suspension seats.

The chassis manufacturer's standard driver's seat is acceptable for Type A buses. Also, see **GENERAL INFORMATION AND WARRANTY PROVISIONS.**

DRIVER'S SEAT BELT:

Buses must be equipped with a Type 2 lap belt/shoulder harness seat belt assembly for the driver. The design must incorporate a fixed female push-button latch on the right side at seat level, and a male locking bar tongue on the left, retracting side. The assembly must be equipped with a single, dual sensitive Emergency Locking Retractor (ELR) for the lap and shoulder belt. This system must be designed to minimize cinching down on suspension type seats. The lap portion of the belt must be anchored or guided at the seat frame by a metal loop or other means at the right side of the seat to prevent the driver from sliding sideways out of the seat. There must be a minimum of 7 inches of adjustment of the "D" loop of the driver's shoulder harness, designed to provide adequate adjustment for all sizes of drivers within the range of a 5th percentile female to a 95th percentile adult male, as defined in FMVSS No. 208. Shoulder belt tension must be no greater than is necessary to provide reliable retraction of the belt and removal of excess slack. The seat belt assembly and anchorage must meet applicable FMVSS. Seat belt material must be bright orange in color, in order to provide maximum contrast with the driver's clothing.

NOTE: The driver's seat belt assembly for Type A buses must be the manufacturer's standard Type 2 driver seat belt, meeting applicable FMVSS for school buses of 10,000 pounds GVWR and less.

ELECTRICAL EQUIPMENT AND WIRING:

All wiring must conform to current SAE standards, be coded by color and be insulated. All joints must be soldered or joined by equally effective fasteners. All wires connected directly to the battery must have the end terminals protected with heat-shrink tubing. Body wiring and connectors, including any battery cables routed by the body manufacturer, must be routed so as to eliminate the possibility of wiring and connectors becoming abraded, pierced by fasteners, shorted or otherwise damaged during manufacture and use. All chassis and body electrical wiring must be completely encased in convoluted loom or equivalent protective wrapping. In locations that prevent such looming, wires must be properly held in place by appropriate fasteners at intervals necessary to prevent possible damage to wire insulation. A complete body wiring diagram showing the location of wires and the code of circuits for buses meeting Florida Specifications must be installed in each body. Additionally, for all school bus body optional electronic components installed in the bus, the body manufacturer must provide each district with at least one comprehensive parts and repair manual. Buses using multiplexed electrical systems may meet the intent of these specifications without the use of specified equipment subject to approval by the department. All requirements listed herein for Light Emitting Diode (LED) type lights must be for the latest generation LEDs available at the time of manufacture. Electrical components specified below must be provided, and wiring must be in circuits, as follows:

ACCESS PANEL, ELECTRICAL:

All Type C and D buses must be equipped with an electrical access panel to provide access to body electrical components and circuits.

BACKUP LIGHTS; BACKUP ALARM and DECAL:

There must be two backup lights of 4 inches in diameter, or 12.5 square inches, on the rear of all bodies meeting the following requirements:

1. They must be sealed LED lights;
2. They must use a plug connector; and
3. They must be set into the bus body (flush-mounted).

The body manufacturer must provide a backup alarm on each bus to provide audible warning that the bus is in reverse gear. The alarm must meet the requirements of SAE J994 and have a variable volume feature that allows the alarm to vary from 87 dBA to 112 dBA sound level, staying at least 5 dBA above the ambient noise level.

All buses must have a decal in full view of the driver indicating that the bus is equipped with a backup alarm.

BRAKE/TAIL LAMPS, LARGE:

Buses must be equipped with two combination LED type brake/tail lamps of a minimum of 7 inches in diameter or 38 square inches, mounted as high and spaced as far apart laterally as practical, below the window line, but not less than three feet measured from the center of the lamps. Also, they must use a plug type connector meeting FMVSS and SAE standards.

BRAKE/TAIL LAMPS, SMALL:

Buses must be equipped with two combination brake/tail lamps of 4 inches in diameter or 12.5 square inches, meeting FMVSS. Light intensity must at least equal Class A turn signal units. These lights must be LED lights with smooth exterior lens surfaces. They must use a plug connector and be set into the bus body.

CIRCUIT BREAKERS:

All body electrical circuits must be fused per the requirements of FMVSS. The main body electrical circuit must be protected by a manually resettable circuit breaker or fusible link.

CLEARANCE AND IDENTIFICATION LIGHTS:

All clearance and identification lights must meet current SAE requirements and FMVSS and must:

1. Be sealed LED lights.
2. Be surface-mounted with Lexan™, polycarbonate, or other non-corrosive material guard to prevent breakage. Lights set into the body do not require guards.
3. Use a plug connector.
4. Be activated by the headlight circuit.

CONTROL PANEL LIGHTING:

The control panel or switches supplied by the body manufacturer must be illuminated and have a control for varying the illumination to the control panel or switches.

EMERGENCY EXIT BUZZER:

Emergency door and emergency window buzzers must be connected to the accessory side of the ignition switch.

HEATER/DEFROSTER:

There must be a heater mounted in the front of the bus. A supplemental heater may be installed in any bus. All heaters must provide evenly distributed heat throughout the bus body, provide defrosting for the windshield and entrance door and meet the following performance standards:

1. Heaters must have capabilities of providing evenly distributed heat and creating a temperature rise to 50° F inside the body shell when soaked in an ambient temperature of 0° F for 15 hours. Heater performance must be measured as follows:
    a. Temperature measurement must be taken 39 inches inward from side walls, 39 inches inward from windshield and rear door, and 36 inches above floor. Heat must be evenly distributed through the aisle area.
    b. Temperature must rise to 50° F inside (when soaked in ambient temperature of 0° F for 15 hours) in 20 minutes when 170° F hot water is applied at the rate of 3 gallons per minute at a maximum of 6 psi pressure.
2. Defrosters – Must meet the following criteria:
    a. Must be able to defrost the total windshield area in a reasonable period of time under all normal driving conditions.
    b. Must be directional to provide the driver capability of defrosting in the drive view area first.
    c. Defroster system must have the capability of mixing a minimum of 50 percent outside fresh air with the defrosting air.
    d. Defroster system must meet the SAE Standard J381 performance requirement.

All heater hoses must meet or exceed SAEJ20R EC Class D-1 standards. If silicone hoses are used, shoe design hose clamps must be used. Heater lines on the interior of the bus must be fully shielded to prevent scalding of the driver or passengers in the event of a hose or connection failure. The modesty panels must not obstruct heat flow from the driver's area to the passenger area of the bus; this may be accomplished by ducting or other means that retains, to the extent practical, the required full width aluminized steel panel extending down to the floor. Also see **SEATING AND MODESTY PANELS.**

A 1/4 turn ballcock coolant flow regulating valve for the heater must be installed so that its control is accessible to the driver, but in such a location as to discourage tampering by students. This valve may be remotely located if a suitable remote control system is used. Also required are 1/4 turn ballcock coolant flow regulating shut-off valves, installed in the pressure and return lines as close to the engine as possible.

The windshield defroster and defogging system must provide defogging of the entire windshield, driver's side window and entrance door glasses by using hot air taken from the heater core. Bodies that do not have defrosters providing forced heated air by means of ducting across entire base of windshield must be equipped

with an additional right-side mounted defroster fan that uses hot air from the heater. One electrical switch must be provided to simultaneously turn on or off any fan(s) providing hot air for defogging of the windshield, driver's side window and entrance door glass.

NOTE: Type A buses must have a fresh air type heater and defroster system as installed by the chassis manufacturer.

INTERIOR LIGHTS:

There must be at least four recessed flush-mounted interior lights in the passenger compartment of the bus, operated by one switch mounted on the control panel. If more than six lights are used, then an additional switch may be added to control these lights. There must also be two recessed flush-mounted interior lights mounted in the driver's area of the bus (to the left and right of the centerline of the bus), operated by a separate switch mounted on the control panel. Lenses for all interior lights must be Lexan™ or other polycarbonate material. All interior lights must be LED lights.

LICENSE PLATE LAMP:

Must be LED and may be combined with one of the required combination brake/tail lamps.

MASTER SWITCH FOR BODY ELECTRICAL CIRCUITS AND OTHER SWITCHES:

All bodies must be equipped with an electrical circuit master switch that will turn body circuits ON and OFF by means of a solenoid (relay) controlled by the ignition switch. There must also be a manual noise abatement switch installed in the control panel, labeled and alternately colored, and wired into the activation circuit for the master body circuit solenoid. This must be an on/off switch that deactivates all body equipment that produces noise, including, at least, the AM/FM radio, heaters, air conditioners, fans, and defrosters. This switch must not deactivate safety systems such as windshield wipers or lighting systems. On types C and D buses there must also be a switch mounted in a location inaccessible to the driver to manually start the diesel particulate filter regeneration process. This switch must be appropriately labeled.

POST-TRIP PASSENGER CHECK SYSTEM:

System Requirements:

1. The bus must be equipped with a system to require the driver to walk to the rearmost interior of the bus after each trip to deactivate the system via a push button and to ensure that no passengers are left on the bus. The system must interconnect with the entrance door (and the driver's door on Type A buses) and immediately activate if the door is opened when the system is armed.
2. The system must have an indicator light in view of the driver that is illuminated when the system is armed. The system must be armed any time the bus is in service transporting students. This may be accomplished through the use of any reasonable method, such as recording a speed above 20 MPH or exceeding 10 minutes of operation with the door closed. In all cases, the system must arm itself after 10 minutes of operation, and/or any time the red student warning lights are activated.
3. The system may not be disarmed until the vehicle ignition switch has been switched to the "off" position. The system must not be activated if the ignition switch is placed in the accessory position or if the bus is restarted.
4. The system must turn on the interior lights when the ignition switch is turned to the "off" position. The lights must remain on for 60 seconds after system deactivation.
5. The system must not have a bypass.
6. The system must sound the vehicle horn and flash the headlights if the driver fails to deactivate the system within 60 seconds of turning the ignition off. Type A buses may activate the red student warning lights in lieu of the headlights.
7. The system must be disarmed by the use of a push button switch placed on the left rear bulkhead or above the left rear passenger window for types A, C, and D front engine (FE) buses. The push button must be placed above the left rear passenger window for Type D rear engine (RE) buses. This button must be clearly marked.

System Definitions:

1. Armed = The system is functioning and is ready to alarm.
2. Disarmed = The system is off and inactive.
3. Activated = The horn is blowing and the lights are flashing.
4. Deactivated = The disarm switch at the rear of the bus has been operated by the driver.

System Functionality:

1. The system must be fully automatic in function and must not provide for manual bypass or override capability under any circumstances.
2. From the bus sitting still with ignition key in the "off" position:
    a. With the ignition key switched to the "accessory" position, the system remains disarmed.
    b. With the ignition key switched to the "on" position (engine remaining off), the system remains disarmed.
    c. With the ignition key switched to the "on" position (engine running) and the bus operated under 20 MPH, the system remains disarmed.
    d. With the ignition key switched to the "on" position (engine running) and the bus operated over 20 MPH or for more than 10 minutes of continuous operation (or other reasonable operational trigger mechanism), the system is armed.
3. From bus having been operated over 10 minutes, no longer moving, with the entrance door (and driver's door, if equipped) closed, the ignition key in the "on" position (engine running) and the system armed:
    a. With the ignition key switched to "off" position (engine off), the interior dome lights are immediately illuminated.
    b. With the ignition key switched to the "off" position (engine off) and the ignition key switched back to the "on" position (engine off or restarted) within 60 seconds, the interior dome lights are extinguished and the system remains armed, but flashing lights and horn alarms are not activated.
    c. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated and entrance door (or driver's door, if equipped) opened, flashing light and horn alarms are activated.
    d. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated and the driver taking no action for 60 seconds, the flashing lights and horn alarms are activated.
    e. With the ignition key switched to the "off" position (engine off), interior dome lights illuminated, and driver walking to the rear of the bus and disarming the system within 60 seconds, the system is disarmed and no flashing lights and horn alarms are activated.
4. Once the flashing lights and horn alarms are activated, they can be deactivated only by disarming the system at the rear of the bus.
5. The interior dome lights are extinguished 60 seconds after the system is disarmed.

STUDENT WARNING LIGHTS, STOP ARMS, STUDENT CROSSING ARM, AND SYSTEM CONTROLS AND OPERATION:

Student Warning Lights:

Must be dual-mounted side by side on all corners of bus roof caps. Mounting must be as high as practical on the top and as near the outer edge of the bus, as curvature permits. The lamps must be securely mounted. There must be a black background that is at least 1¼ inches wide. The lamps installed in the outboard locations must be red; the lamps installed in the inboard locations must be amber. The lamps must be clearly visible in bright sunlight for a minimum of 500 feet. Additionally, student warning lights must:

1. Have light assemblies of a flat back design. Cutouts in roof caps must be no larger than necessary to accommodate the student warning lights wires. A flush-mounted design is acceptable.
2. Use strobing LED bulbs.

3. Be 7 inches in diameter or 38 square inches minimum.

System Controls:

Must be equipped with the following driver-actuated controls:

1. Master switch – provides means for deactivating the entire system, as would be required when opening the door at a railroad grade crossing.
2. Control switch – three positions: OFF, AMBER and RED. The switch may be a rocker, pull-type, or other switch providing three positions. This switch must be separated from the master switch by at least one inch and colored red.
3. Switch actuated by the service door.
4. Controls must provide for the combinations of switch positions and conditions of student warning lights, stop arm(s), stop arm lights and audible alarm, as indicated on the chart below.

NOTE: The system must not be designed in such a way that the operator is required to actuate the controls in a particular sequence to achieve the desired combination of conditions. For example, if the driver places the three-position switch in the AMBER position, with the master switch ON, it must not be required that the three-position switch be moved to RED or that the service door be opened in order to deactivate the AMBER lights. In this example, the driver must be able to deactivate the AMBER lights by going directly from the AMBER to the OFF position.

With Master Switch, Control Switch, and Service Door In The Following Positions:					**Condition of Stop Arm(s), Stop Arm Lights, Amber and Red Student Warning Lights and Audible Alarm Must Be:**			
	MASTER SWITCH POSITION (ON or OFF)	**CONTROL SWITCH POSITION (three positions: off, amber or red)**	**SERVICE DOOR POSITION**		**STOP ARMS, STOP ARM LIGHTS**	**AMBER STUDENT WARNING and PILOT LIGHTS**	**RED STUDENT WARNING and PILOT LIGHTS**	**AUDIBLE ALARM**
1	**ON**	**OFF**	**CLOSED**	**1**	**RETRACTED, OFF**	**OFF**	**OFF**	**OFF**
2	**ON**	**OFF**	**OPEN**	**2**	**RETRACTED, OFF**	**OFF**	**ON**	**ON**
3	**ON**	**AMBER**	**CLOSED**	**3**	**RETRACTED, OFF**	**ON**	**OFF**	**OFF**
4	**ON**	**AMBER**	**OPEN**	**4**	**RETRACTED, OFF**	**OFF**	**ON**	**ON**
5	**ON**	**RED**	**CLOSED**	**5**	**EXTENDED, ON**	**OFF**	**ON**	**OFF**
6	**ON**	**RED**	**OPEN**	**6**	**EXTENDED, ON**	**OFF**	**ON**	**OFF**
7	**OFF**	**ANY POSITION**	**ANY POSITION**	**7**	**RETRACTED, OFF**	**OFF**	**OFF**	**OFF**

Student Crossing Arm:
Is required and must be:

1. Air-operated on all air brake-equipped buses.
2. Electrically operated on all hydraulic brake buses.
3. Mounted to the far right side of the front bumper and open to an angle perpendicular to the bus.
4. Designed so that all components and connections are weatherproofed.
5. Removable with hand tools for towing of the bus.
6. Designed to meet or exceed SAE Standard J1133.
7. Constructed of noncorrosive or nonferrous material or treated in accordance with the body sheet metal standard.
8. Designed so that it has no sharp edges or projections that could cause hazard or injury to students.
9. Designed and equipped with a four-point mounting to the front bumper.
10. Designed so that the arm extends approximately 72 inches from the front bumper when in the extended position. The arm must be constructed of a yellow polycarbonate material or noncorrosive tubing painted yellow. Approximate dimensions of the arm must be 65 x 3 x 1 inches.
11. Designed and installed to extend simultaneously with the stop arms by means of the stop arm control and retract within eight seconds of deactivation.
12. Equipped with a magnetic device or other assembly attached to the bumper at the end of the arm to provide a positive latch for the arm when not in use; this device must also reduce the tendency of the arm to rattle and vibrate when not in use.

Stop Arm Signals:
For all 47 capacity and larger buses, there must be installed on the left outside of the body two approved octagonal stop-signal arms, each equipped with two double-faced alternately flashing LED strobe lights for signaling a student stop. All buses of less than 47 capacity must be equipped with one stop arm. Bodies to be mounted on chassis with hydraulic brakes must be equipped with electrically actuated stop arm(s). Air-powered stop arms must be provided as standard equipment on all buses equipped with air brakes. The rear stop arm location on buses equipped with dual stop arms must be the left side of the bus, as close as practical to the left rear corner of the body. The light lenses of all stop arms must be RED. Air lines must not be readily accessible to students inside or outside the bus and must be made of copper, steel or nonmetallic materials meeting SAE Standard J848d. Fittings must be brass. Stop signal arms must meet the applicable requirements of SAE J1133. For controls, see the requirements above under System Controls. Stop arms must retract within six seconds of deactivation. For color, see **LETTERING AND TRIM**.

STEP WELL LIGHT:
A step well light must illuminate the bus entrance and be adequately protected. The step well light must be activated automatically when the service door is opened and the clearance lights are on. The step well light must be LED. See **SERVICE DOOR** for further operational requirements.

STROBE LIGHT:
A required white flashing LED strobe lamp must be installed on the roof of a school bus at a location centered (laterally) and approximately 48 inches (longitudinally) from the rear edge of the rear roof cap. If the bus is equipped with a roof hatch or other roof-mounted equipment falling within the above mentioned measurements, the strobe lamp may be located directly behind that equipment. The lamp shall have a single clear lens emitting light 360 degrees around its vertical axis, meeting the requirements of SAE J845. It may not extend above the roof more than the maximum legal vehicle height, as described in s. 316.515(2), F.S. A manual switch and a pilot lamp shall be included to indicate when the lamp is in operation.

TURN SIGNAL LAMPS:

Front turn signal lights must be amber LED lights (if available); side turn signal lights must be amber LED lights on each side of the bus, mounted rearward of the service door on the right side and rearward of the front stop arm on the left side. All buses over 30 feet in length must have two amber LED turn signal lights mounted on each side of the bus. The rearmost side turn signals on buses over 30 feet long must be mounted at or rearward of the centerline of the rear axle. Rear turn signal lights must be plug-in LED lights that meet current SAE requirements and comply with FMVSS.

TWO-WAY RADIO:

Use of a two-way radio communications system approved by the school district is acceptable.

VIDEO CAMERA MONITORING SYSTEMS:

Districts may install video cameras in buses provided the installed system:

1. Is mounted securely in the bus;
2. Is outside the federal head impact zone (FMVSS No. 222);
3. Is located in an area not likely to cause student injury; and
4. Has no sharp edges or projections.

NOTE: This is the end of the **ELECTRICAL EQUIPMENT AND WIRING** section.

EMERGENCY EXITS:

1. The emergency door on all types A, C and front engine Type D buses must be located at the center of the rear of the bus and have a minimum horizontal opening of 24 inches and vertical opening of 48 inches.
2. The emergency door must be hinged on the right-hand side using hinge(s) with a brass or rust-resistant rod.
3. The outside control must consist of a nondetachable opening device designed to prevent "hitching to."
4. The emergency door must be equipped with a slide bar, cam-operated latching device having a minimum stroke of one inch.
5. The switch for the warning system must be enclosed in a metal case or durable case of other material, with rounded, protected edges. Wires leading from the switch must be concealed in the bus body. The switch must be installed so that the plunger contacts the farthest edge of the slide bar in such a manner that any movement of slide bar will immediately close the switch circuit and activate the buzzer.
6. The door latch must be equipped with an interior handle that extends approximately to the center of the emergency door. It must lift up to release.
7. There must also be attached to the door, in such a way that it is visible inside and outside the bus, labeling as follows: "This door is equipped with a hold-open device. To release, open the door to its fully opened position." This sticker must be red on a white background, and the lettering must be a minimum height of 1/2 inch.

Each non-lift bus must also be equipped with push-out type emergency exit side windows of similar design to the standard side windows, except for the following:

1. The emergency window assemblies must be hinged on the forward side.
2. No emergency window may be placed next to any child safety seat.
3. Emergency windows must be installed in the following quantity on non-lift buses:
    a. 0 to 40 capacity 1 window per side
    b. 41 to 72 capacity 2 windows per side
    c. 73 to 90 capacity 3 windows per side

Buses 35 capacity and smaller must be equipped with one roof hatch emergency exit/ventilator. Buses over 35 capacity must be equipped with two roof hatch emergency exit/ventilators. Specifications for roof hatches must be as follows (also see **GENERAL INFORMATION AND WARRANTY PROVISIONS**):

1. Hinge(s) must be located on forward and rearward side of hatch.

2. The design must provide a "partially open" position along the full width of the hatch, adequate to allow air to enter or exit and, thereby, ventilate the bus by opening either the front or rear of the hatch. The hatch must allow for partial opening on any of its four sides and on all four sides simultaneously.

Buses equipped with a lift are not required to be equipped with push-out emergency exit windows unless mandated by FMVSS No. 217. Lift buses may be equipped with push-out type emergency exit windows based on the capacity of a comparably sized non-lift bus.

EMERGENCY ROADSIDE REFLECTORS:

There must be three reflector warning devices, meeting the requirements of FMVSS No. 125, mounted in a location accessible to driver in the front section of the bus, and stored in a container. The container must be sealed with a breakable, nonreusable seal.

FIRE EXTINGUISHER:

A dry-chemical fire extinguisher with a gauge and designed to restrain tampering must be mounted in a place accessible to the driver, preferably near the service door.

The fire extinguisher must bear the label of Underwriters Laboratories, Inc., showing a rating of no less than 2A-10BC.

FIRST-AID KIT:

The bus must carry a Grade A, moisture- and dust-proof first-aid kit, mounted in such a manner that it can be easily detached and made portable and in an accessible place in the driver's compartment. The container must be sealed with a breakable, nonreusable seal and the contents must be as follows:

1 inch bandage compress (e.g., Band-Aids)	two packages
40 inch triangular bandage with two safety pins	one package
4 x 4 inch sterile gauze pads	two packages of six each
Rolled curlex bandage each in length	two inches x six yards
1 inch roll adhesive tape in length	one roll 2 1/2 yards
Eye dressing packet	two packages

FLOOR AND FLOOR COVERING:

1. The floor must be level from front to back and from side to side except for the wheel housings, the toe board and the driver's seat platform.
2. All sills must be permanently attached to the floor.
3. The driver's compartment plate on conventional bodies must be removable, installed level with the bus floor. All components requiring servicing must be readily accessible. Openings in the bus floor to meet this requirement must be reinforced to maintain the full strength of the unpunctured floor.

   NOTE: Items 1-3 above, do not apply to Type A Buses less than 14,500 GVWR. For Type A buses less than 14,500 GVWR, the floor must provide adequate and firm support for seat legs and must have a minimum 1/2 inch marine grade or pressure-treated plywood, securely mounted to the floor. Basic floor construction of Type A buses must be the manufacturer's standard, meeting applicable FMVSS.

4. The floor covering must be resistant to ultraviolet light, ozone and moisture and have a minimum tensile strength of 1,200 pounds per square inch (psi) and a minimum elongation of 100 percent. Floor covering must be abrasion-resistant and slip-resistant and have a minimum coefficient of friction of 0.85 as measured under ASTM D1894 or 0.65 as measured under ASTM D2047.
5. The floor covering from the top step landing area to the emergency door (or rear seat on Type D rear engine buses) must be ribbed aisle, non-skid and wear-resistant, fire-resistant elastomer. Elastomer floor covering must meet Federal Specification ZZ-M-71d.

6. The landing area at the top of the steps must be ribbed elastomer, which must extend to the ribbed aisle floor cover. The leading horizontal edge, or nosing, must be white or yellow ribbed elastomer or other contrasting color and must have an integral 90 degree turn-down with a square leading edge matching the step treads.
7. All joints or seams in the floor covering must be covered with non-ferrous metal, minimum 1 inch wide, and the driver's compartment, except at the cowl, must have a special, approved molding. Alternate materials may be used if they provide equivalent durability. The molding must be securely attached to prevent a tripping hazard.
8. Manufacturers may use seamless one-piece floor rubber with an integral ribbed aisle meeting the requirements in 4 and 5. Aisle molding is not required when the bus is equipped with one-piece floor rubber.
9. All holes in the chassis firewall and around the transmission cover and engine housing must be adequately sealed.
10. A commercially available truck bed liner material meeting the requirements in 4 and 5 may be substituted for the required flooring material.

FUEL FILLER OPENING:
An opening of adequate size and design must be provided over fuel filler. Also see **LETTERING AND TRIM**.

GRAB HANDLE AT ENTRANCE:
A suitable grab handle or rail must be provided at the front entrance, securely mounted inside of the body. Grab handles must be made of round stainless steel, 1 inch outside diameter (OD). The grab handle and mounting must be designed to minimize the possibility of students' clothing or personal items becoming lodged or caught upon exiting the bus, in order to reduce the risk of injury or fatality to passengers from being dragged outside the bus.

INSULATION AND SEALING OF JOINTS:
The overlap of the edge of the exterior roof and side panels, and also the top edge of rub rails, must be sealed to prevent moisture, dust and other contaminants from entering the joints and the bus.

LETTERING AND TRIM:
Trim on the three rub rails below the beltline and all lettering must be black (except for stop signs). Entrance door frames, pilaster panels and other trim panels may be painted black if approved by the department. The letters of the words "SCHOOL BUS" on the top front and rear section of the bus body must be 8 inches high and correspond to the Series B, Standard Alphabet (see the National School Transportation Specifications and Procedures, Revised 2015). "(Name of District) DISTRICT SCHOOLS," on each side of the bus body at the beltline must be in 6 inch minimum letters. Private and charter schools may alternately affix the name of the school in the aforementioned format and location. Bus numbers must be in 6 inch minimum height and on each side and on the front bumper and rear of the bus body. "**EMERGENCY DOOR**" must be in 2 inch letters at the top or directly above the door, visible inside and outside of bus. Lettering to indicate the fuel type must be located on the body adjacent to the fuel filler opening using minimum 1 inch letters. The words "**STOP WHEN RED LIGHTS FLASH**" must be displayed on the back of all buses in 6 inch black letters. Also, see the lettering requirements for emergency exits, including roof hatches and push-out windows, under **EMERGENCY EXITS**. Districts may add an **American flag decal** to the exterior of the bus. If used, it must be no more than 6 x 10 inches and be located in front of the district name on the beltline of the bus. Also see United States Public Law 4USC7.

The front stop signal arm (both sides of arm) and rear stop arm (rear side only) must have a red background with a reflectorized white border; the letters "**STOP**" must be in 6 inch white reflectorized letters. Both sides of the front stop arm and the rear side of the rear stop arm must have reflectorized red sheeting of high-intensity material. The front side of the rear stop arm must be painted red.

NOTE: Buses must include the lettering and trim specified above, and are limited to lettering, trim, symbols, markings, and coloration specified in the National School Transportation Specifications and Procedures, Revised 2015.

LICENSE HOLDER:
A license holder must be included on the left rear outside of the body, with a suitable method for mounting the license tag.

LOCKUP DEVICES:
Any emergency door equipped with a locking device must have an ignition interlock that prevents starting the engine when the door is locked, meeting requirements of FMVSS No. 217. Emergency exit windows must not be operable (under normal conditions) from outside the bus and must not be equipped with any locking device.

MIRROR SYSTEM:

1. **Interior Mirror:** Must provide adequate viewing of the entire length and width of the interior of the bus and be at least 6 x 30 inches. The mirror must meet the following requirements:
    a. Meet or exceed American National Standards Institutes (ANSI) Z97.1 requirements for safety glazing in mobile environments and be bonded to the mirror housing.
    b. Include a heavy-duty, single-piece mounting bracket that ensures stability.
    c. Housing must be low-gloss black.
    d. Incorporate a single knob (thumbwheel) adjustment to allow the driver to reposition the mirror without the use of tools.
    e. Have a soft gasket type frame that is bonded to the housing.

    NOTE: Interior mirror on Type A buses must be a minimum of 50 square inches and meet the above requirements.

2. **Exterior Mirrors:**
    Each school bus must be equipped with a system of exterior mirrors complying with FMVSS No. 111 and meeting the following requirements:
    a. **Cross/Side-View Mirror System:** This mirror system must incorporate the following features and requirements:
        i. Only one mirror is to be installed at each front corner of the bus.
        ii. Mirrors must not reflect excessive glare from the bus headlights or the sun into the driver's eyes. Mirrors must be a 1/4 sphere or shaded 1/2 sphere design.
        iii. Stainless steel or non-corrosive fasteners must be used in the construction of the mirror assembly and to hold the brackets to the body.
        iv. Mirror stabilizer brackets on all Type C composite hoods must use through-the-fender rubber or nylon mounts with stainless steel caps to reduce mirror vibration and erosion of the hood material.
        v. All exterior mirror fasteners, mounts and bracketry must be of non-corrosive material.
    b. **Rear Vision Mirror System:** A rear vision mirror system must be provided that incorporates the following features and requirements:
        i. The system must consist of one flat and one convex mirror lens per side. Each mirror set must be mounted on a breakaway arm with a positive detent or lock.
        ii. Each of the four required mirrors in the rear vision mirror system must be electrically operated and remotely controlled from the driver's location.
        iii. All exterior mirror fasteners, mounts and bracketry must be stainless steel. Stainless steel or non-corrosive fasteners must be used in the construction of the mirror assembly and to hold the brackets to the body.
    c. **Overall exterior mirror system:** (cross/side-view and rear vision mirrors) must be isolated from vibration and be compliant with FMVSS No. 111.

NOISE REDUCTION PACKAGE:
A noise reduction package is required and must include full insulation of the ceiling, walls, and front and rear of the bus, including body bows and engine compartment, plus minimum 1/2-inch marine grade or pressure-treated plywood

or equivalent composite material securely mounted to the floor. Insulation material must be fire-resistant and of a type that will not harbor dampness.

PAINT AND FINISH:
All National School Bus Yellow paint must meet the National School Transportation Specifications and Procedures, Revised 2015 for color and have a finished gloss rating of at least 85 at 60°F and a distinctness of image (DOI) rating of an average of at least 50, measured using the same method specified for gloss under **GENERAL INFORMATION AND WARRANTY PROVISIONS**. Paint must be applied for a total dry thickness of at least 1.8 mils over all painted surfaces. School bus roofs must be painted white in color, and must meet the gloss and DOI ratings. White paint may extend to the leading and trailing edge of the roof caps, and may extend down to the drip rails. Trim, lettering and bumpers must be black except that bumpers must be striped in accordance with National School Transportation Specifications and Procedures, Revised 2015 or these specifications. Also see GENERAL **INFORMATION AND WARRANTY PROVISIONS** for warranty requirements, **LETTERING AND TRIM** and **REFLECTIVE MARKINGS**.

PANELING, INTERIOR:
Interior panel fastenings must minimize vibrations and rumble. A cove molding, which may be an extension of the body panels, must be installed covering the wall-to-floor joint beginning at the windshield post on the left side of the bus and extending along the walls around the corners to the service door on the right side. Molding must be securely fastened so that dirt will not readily work under it. The interior paneled area immediately below the window line must be aluminum-coated steel.

REFLECTIVE MARKING PACKAGE:
There must be installed a reflective marking package as specified in the National School Transportation Specifications and Procedures, Revised 2015. Striping must be installed longitudinally the length of the body at the vertical location immediately below the seat level rub rails but high enough so as to clear wheel wells, whenever possible. Short breaks in the striping at rivet locations are acceptable. Reflective markings are also required for all emergency exits, as specified in FMVSS No. 217.

RUB RAILS:
1. There must be a rub rail on each side of the bus approximately at seat level, which must extend from the entrance door post around the bus body (except for emergency door) to the point of curvature near the cowl on the left side.
2. There must be rub rails located approximately at the floor line and the bottom of the outer skirt, which must cover the same longitudinal area as the upper rub rail, except at wheel housings, but extend only to the right and left corners.
3. Rub rails must be applied outside of body panels. Pressed-in or snap-in rub rails do not satisfy this requirement.

SEATING, MODESTY PANELS (RESTRAINING BARRIERS), LAP BELTS, AND WEBBING CUTTERS:
1. Passenger seats must be mounted facing forward and provide a minimum of 12.8 inches of seat width per passenger seating position. The aisle must be 12 inches wide at a minimum. This plan of body seating must be used to determine seating capacity (see **BODY DATA PLATE**).
2. Seat spacing must meet the requirements of FMVSS No. 222. The first seat on each side of all types A, C and D buses must be equipped with FMVSS No. 225-compliant child safety seat anchorage points. All 39 inch FMVSS No. 225-compliant passenger seats must be equipped with two sets of anchorage points per bench seat. All passenger seats compliant with FMVSS No. 225 with a seat width of less than 36 inches must be equipped with one set of anchorage points per bench seat.
3. All passenger seats compliant with FMVSS No. 225 must be spaced to provide the maximum knee room (seat spacing) permitted by FMVSS No. 222. The rest of the passenger seats must provide for a minimum of 24 inches of knee room.
4. Seat padding must be secured to the frame so that it will not snag. Screws and bolts used in seat back construction must not be exposed.
5. Restraining barriers and passenger seats, including the seat back and the entire bottom cushion (including underside), must be covered with vinyl-coated material. All passenger seat assemblies and barriers must meet the requirements of the National School Transportation Specifications and Procedures, Revised 2015,

School Bus Seat Upholstery Fire Block Test. Upholstery material for all passenger seats and barriers must meet the following color standard +/- four delta E:

	III/ob	X	Y	Z	x	y
1	D65 Daylight	7.21	7.92	12.52	2606	2963
2	2	7.51	7.30	4.07	3978	3865
3	Rom Light	7.33	7.37	8.15	3207	3226

6. Buses must have an FMVSS-compliant padded restraining barrier in front of the forward-most passenger seat on each side of the bus. Also see Section V for restraining barrier requirements for buses equipped with wheelchair lifts. Restraining barriers at the entrance side and the driver's side must have a full-width, aluminized steel panel below the padded section extending down to the floor, except as specified under heater/defroster specifications (see **ELECTRICAL EQUIPMENT AND WIRING**).
7. All Type A school buses sold through the State of Florida school bus bid must be equipped with Type II, three-point seat belts in all passenger seating positions. These belt systems must meet the requirements of National School Transportation Specifications and Procedures, Revised 2015.
8. All types C and D buses must be equipped with lap belts in all passenger seating positions, meeting the following requirements:
    a. All belts and anchorages must comply with FMVSS Nos. 209 and 210.
    b. Belts must be manufacturer's standard style lap belts. The nonadjustable buckle end of each belt must be the aisle-side connection point on each passenger seat.
    c. Each two-part belt must be separately color-coded to aid in proper connection.
    d. Any belt system with parts that can be manually disassembled without the use of tools and any system that is subject to easy vandalism shall not be approved for use in Florida school buses.
    e. Retractable seat belts are permissible at the purchaser's option. If this system is specified, the retractors must be emergency locking type, and the retractors must be mounted below the seat bight. Seat bight is defined as the area close to and including the intersection of the surfaces of the vehicle seat cushion and the seat back.
    f. All federal requirements supersede any of these requirements.
    g. School districts may install restraining systems that differ from these requirements as necessary to accommodate pre-school age children and children with special needs. Such systems must comply with FMVSS Nos. 209, 210 and 213, as applicable, and must be approved by the body manufacturer.
9. All buses must also be equipped with a durable webbing cutter having a full width handgrip and a protected, replaceable blade. The required belt cutter must be mounted in a location accessible to the driver in the seated position and be easily detachable.

SERVICE DOOR:

1. The service door must be a split or jackknife type located at the right front of the bus. Doors must be securely hinged with approved heavy-duty hinges with a brass or rust-resistant rod adequately fastened to the adjoined member. Doors must have a 1 1/2 inch minimum safety gap sealed with a safety flap of approved quality. The door must extend to the bottom step and be fitted with suitable weather strip to keep water from entering the step well.
2. An air-operated entrance door must be provided on all buses equipped with air brakes. This system must have a manually operated override to enable the driver to manually open the door in the event of loss of power. Air-powered entrance doors must operate in accordance with the following table:

Ignition Switch Position	Door Switch Position	Emergency Dump Switch Position	Door Position / Status	Step Well Light Condition
Off	Any	On	Neutral	Off
Off	Any	Off	Neutral	Off
On	Closed	Off	Closed/Active	Off
On	Opened	Off	Open/Active	On
On	Closed	On	Neutral	Off
On	Opened	On	Neutral	On

3. When the key switch is in the "off" position, the air door system must not create a battery draw. All air-powered door systems must provide a rebuildable air cylinder and must operate reliably in all weather and temperature conditions. All air-powered door systems must include a method of manually adjusting the opening and closing speed and force of the doors.
4. Hydraulic brake buses must have an electrically controlled entrance door.
5. The service door must have a minimum horizontal opening of 24 inches and a minimum vertical opening of 68 inches. Immediately above the door opening there must be secured to the body panel a high-density foam rubber pad, a minimum of 3 inches in width, or an approved equal safety cushion.
6. Doors must be designed and weather strips mounted so that there is no binding or tendency for stripping to dislodge during door operation. One or two glassed-in openings must be provided in each door half with glass of same grade as specified for side windows and mounted in rubber. The bottom of the lower glass panel must not be more than 30 inches from the ground when the bus is unloaded. The top of the upper glass panel must not be more than 6 inches from the top of the door.

SIZES OF BODIES:

The height of types C and D bus bodies, from the top of the finished floor to the underside of the ceiling, at the center of the body, must be a minimum of 76 inches.

STEP WELL:

A step well of at least three steps must be built in the right front assembly, enclosed with doors extending to the bottom step. Each step must be covered with abrasion-resistant "Pebble-Top" elastomer, the base of which must be at least 3/16 inches thick, with an overall thickness of 5/16 inch bonded to a durable polymer base and otherwise constructed to provide substantial support, including the leading horizontal edge, which must be "Pebble-Top" type, and white or a color that contrasts with the step tread by at least 70 percent. The polymer backing must have an integral 90-degree turn down with a square leading edge for slip resistance. The lower (first) step height must be between 10 and 16 inches above the ground for all types A, C and D buses. Each step must be the full width of the step well at the point where the step is located. Half steps or partial steps are not acceptable.

NOTE: Two steps are acceptable on Type A buses.

STRUCTURAL DESIGN and TESTING:

1. All types A, C and D bodies must meet the requirements of FMVSS No. 221 and the requirements of the National School Transportation Specifications and Procedures, Revised 2015 Side Intrusion Test.
2. Each manufacturer of types A, C or D bodies must certify that representative configurations of its buses produced to meet these specifications comply with the testing and requirements of the Colorado Racking Load Test. See **Colorado Racking Load Test** in Appendix B.
3. Each manufacturer of types A, C or D bodies must certify that representative configurations of its buses produced to meet these specifications comply with the testing and requirements of the Kentucky Pole Test. See **Kentucky Pole Test** in Appendix C.
4. All bus bodies must be constructed to be in square and level. There must be no more than 1 inch of difference from side to side at the front and rear of the bus body (not counting any chassis lean or twist). All bodies must be mounted such that all designed body contact points are in contact with the chassis frame. All bodies must be centered on the chassis within plus or minus 1/2 inch.

SUN SHIELD:

A dual sun shield system must be provided, consisting of two independently mounted sun shields. One must be mounted above the windshield and the other above the driver's window. Each visor must have a tinted Plexiglas sun shield, minimum 6 x 24 inches, and have rounded bull-nosed perimeter edges.

NOTE: The manufacturer's standard sun visor is acceptable on Type A buses.

VANDAL BOX, SIDE MOUNTED

There must be installed on all types C and D buses an equipment compartment on the ceiling above the driver's side window, measuring approximately 1,600 cubic inches. The compartment must have a door with a positive latch and a keyed-alike lock. No safety equipment shall be mounted inside this compartment.

WINDOWS:

1. All types A, C and D buses must have tinted glass that provides the maximum tinting allowed by federal and American National Standards Institute (ANSI) standards for the windshield, the driver's side window(s) and the service door glass. Tinted glass in all windows rear of the driver's compartment must have a light transmission of approximately 28 percent.
2. An adjustable split sash window with safety glass must be mounted in the side of the bus body between each framing post. Permanent marks showing the grade of glass must be visible.
3. Movable windows must be controlled by an approved lock having a finger-touch opener, providing for ease of operation and with no sharp projections. Window latches must be replaceable or rebuildable without disassembling the complete window frame or removing the window from the body. In addition, individual window latches or repair parts must be available and part numbers included in the required body parts catalog. Window seals and visors or drip molding must be installed and provide ample protection from leakage.
4. For ventilation, the driver's window must be adjustable and equipped with a positive latch that can be secured from the inside of bus.
5. There must be installed in the rear door two windows, one upper and one lower, installed in a waterproof manner.
6. Rear side windows located at each side of the emergency door must be installed in a waterproof manner. Glass area must be large enough to provide desirable vision to the rear and must be of the same quality and grade as side windows.

WINDSHIELD:

The front body section in the area of the windshield must provide for corner vision. Glass must be laminated safety polished plate with dark tint at top, installed in a waterproof manner and slanted to reduce glare. Glass must meet current SAE specifications and FMVSS. Light tint may be used in all Type D buses in lieu of dark tint at the top.

WINDSHIELD STEPS AND HANDLES:

A step and appropriate grab handle must be installed on each front corner of the body to facilitate cleaning the windshield. The handle must be stainless steel, chrome plated or non-ferrous metal, or may be made of non-metallic material of sufficient structural and mounting strength and resistant to weathering and deterioration, and must provide for secure mounting and adequate hand hold.

NOTE: Steps and handles are not required on Type A buses under 21,500 GVWR.

WINDSHIELD WIPERS AND WASHERS:

1. Electric windshield wipers must be standard on all buses. All wipers by design and installation must provide desirable vision for drivers. Blades and arms must be of sufficient length to clear the windshield glass in the driver's direct view. One switch must control both wipers, and the switch must be located within easy reach from driver's seat, preferably on the turn signal stalk. The system must incorporate a variable delay wipe feature to allow drivers to adjust the speed and frequency of the wipers. The wiper system must be designed to move the blades away from the driver's direct view when in the parked position.
2. Windshield washers must be electrically operated. The washer reservoir must be made of hard plastic or other approved material and have a capacity of at least 1/2 gallon. Flexible plastic bags are not acceptable.

   NOTE: The manufacturer's standard windshield wipers are acceptable on Type A buses.

SCHOOL BUS BODY EXCEPTIONS

TYPE D FRONT ENGINE BODY EXCEPTIONS:

1. The distance between the restraining barrier at the rear of the entrance step well and the engine cover must be a minimum of 13 inches.
2. A step, in lieu of stirrup steps, is permitted in or on the front bumper on both sides.
3. The engine cover must provide an adequate seal to the bus floor area to keep engine fumes from entering the passenger compartment and must be insulated to retard transfer of heat and engine noise. The engine cover must be hinged and equipped with a prop rod or other device so that it can be held securely in the fully open position to allow access to the engine.

TYPE D REAR ENGINE BODY EXCEPTIONS:

1. The engine compartment must be constructed to permit servicing of the engine, having one or two doors opening at the rear and louvered, with removable panels on each side of engine compartment. The engine compartment must be sealed at top and front to retard heat transfer and prevent engine fumes from entering the passenger compartment. Provisions must be made for easy removal of the engine through the rear compartment.
2. Mud flaps must be installed at the rear of the dual wheels.
3. A step, in lieu of stirrup steps, is permitted in or on the front bumper on both sides.
4. Type D Rear Engine buses are exempted from the requirement for an additional electrical compartment for air conditioner circuitry, provided the air conditioner control boards are installed in the rear package shelf area in a covered box.
5. There must be an engine access panel underneath the rear seat of all rear engine buses designed to provide access to the engine.

OPTIONAL BODY EQUIPMENT SPECIFICATIONS

AUTOMATIC VEHICLE LOCATION AND STUDENT TRACKING SYSTEM:
There shall be an approved option for a system that uses the Global Positioning System (GPS) to determine and wirelessly report the location of the bus in approximately real time. The system may also include an additional feature that will identify individual students as they board or disembark from the bus and report the locations and times.

AUXILIARY DRIVER FAN:
There shall be an approved option for a 6 inch or header-mounted squirrel cage fan to be installed and mounted to the left side of the windshield, when possible, in a location approved by the department.

BAGGAGE COMPARTMENTS:
There shall be an approved option for baggage compartments on all bodies when available. This body option must include a lock and be keyed alike with any other body option requiring use of a key.

BATTERY DISCONNECT SWITCH LABELING:
There shall be an approved option for a label to be placed on the exterior of the bus on the cover of the compartment housing the battery disconnect switch. The label background must be white with red one-inch letters with the wording "**MAIN BATTERY DISCONNECT**."

BUS LOCKUP SYSTEM:
There shall be an approved option whereby a bus can be locked at the emergency door as well as the entrance door. An ignition interlock is required for the emergency door to prevent starting the bus if the emergency door or rear window (on RE units) is locked. This body option must be keyed alike with any other body option requiring use of a key.

CEILING PANELS:
There shall be an option for full width perforated interior ceiling panels extending from the rear header panel forward to at least the front of the engine compartment.

DRIVER'S SEAT WITH INTEGRATED SEAT BELT:
There shall be an approved option for a driver's seat with a seat belt integrated into the seat back, meeting the requirements of DRIVER'S SEAT AND SEAT BELT in this section.

EXTERIOR LIGHT MONITOR:
A system of monitoring exterior lights on the front and rear of the bus from the driver's seated position is approved as an option. Such systems must include:

1. Student Warning Lamps, both RED and AMBER, front and rear
2. Tail Lamps
3. Backup Lamps
4. Rear Turn Signal Lamps
5. Stop Lamps

A system that monitors only electrical circuits and does not indicate whether the bulb is operational is not acceptable.

FUEL SUPPLY LOCK:
A lock with two keys may be installed in the fuel supply service door of the body skirt. This body option must be keyed alike with any other body option requiring use of a key.

INFANT SEATING:
There shall be an approved option for passenger seating designed to safely transport newborns, infants or toddlers, meeting all applicable FMVSS. Such seats may include, C.E. White Child Restraint Seats and other systems as approved by the department.

INTERIOR OVERHEAD STORAGE COMPARTMENTS (MFSAB ONLY):
There shall be an approved option for interior overhead storage compartments that meet the following criteria:

1. Head protection requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection, where applicable;
2. Be completely enclosed and equipped with latching door (both door and latch sufficient to withstand a pushing force of 50 pounds applied at the inside center of the door);
3. Have all corners and edges rounded, with a minimum radius of one inch, or be padded equivalent to door header padding;
4. Be attached to the bus sufficiently to withstand a force equal to 20 times the maximum rated capacity of the compartment; and
5. Have no protrusions greater than 1/4 inch.

The driver's area forward of the foremost padded barriers will permit the mounting of required safety equipment and vehicle operation equipment.

POWDER-COATED WINDOW FRAMES:
There shall be an approved option for electrostatically powder-coated black window frames on all types of buses to reduce friction and improve ease of operation of passenger side windows.

PUBLIC ADDRESS SYSTEM (P.A.), RADIO:
There shall be an approved option for a public address system/AM/FM stereo radio with four speakers inside the bus and one heavy-duty weatherproof P.A. speaker outside the bus. This option must have controls to permit the driver to select inside or outside speakers, mounted in the driver's compartment so that all controls are readily accessible to the driver from the normal seated position. Interior speakers must be flush-mounted. Outside speaker must be mounted under the hood or in another protected location at the front of the bus. An AM/FM stereo radio with four speakers may be offered separately. No internal speakers other than those used for the driver's communication system may be installed within four feet of the back of the driver's seat when the seat is in its rearmost upright position.

REAR HEATER:
There shall be an approved option for an additional heater mounted to provide heat in the rear of the body. This option must be installed under a passenger seat or must otherwise be protected to eliminate damage to the unit and injury to the students.

RED LIGHT ABOVE EMERGENCY DOOR:
There shall be an approved option for a small red light to be mounted above the emergency door on the interior of the bus that is activated when the clearance lights are on.

THREE-POINT SEAT BELTS AND THREE-POINT SEAT BELT SEATS:
There shall be an approved option for three-point seat belts in two and three passenger three-point seat belt seats, as approved by the department.

SECTION IV

POWER LIFT EQUIPPED SCHOOL BUS
MINIMUM SPECIFICATIONS

INTRODUCTION AND GENERAL REQUIREMENTS FOR EXCEPTIONAL CHILD BUSES:
Exceptional child bus body structure and equipment must conform to the regular bus body specifications in Section III and must meet the additional requirements of this section. All school buses equipped with wheelchair lifts must meet or exceed the requirements of FMVSS Nos. 403 and 404, the National School Transportation Specifications and Procedures, Revised 2015 and all requirements listed herein, which prevail in the event of a conflict.

DEFINITION:
An exceptional child bus is any school bus that is designed, equipped and/or modified to accommodate students with special transportation needs requiring a power lift.

GENERAL REQUIREMENTS:
Exceptional Child specially equipped school buses shall comply with the National School Transportation Specifications and Procedures, Revised 2015 and with the FMVSS applicable to their GVWR category.

Any school bus to be used for the transportation of children who use a wheelchair or other mobile positioning device, or who require life-support equipment that prohibits use of the regular service entrance, shall be equipped with a power lift.

AISLES:
All school buses equipped with a power lift shall provide a minimum 30-inch pathway leading from any wheelchair position to at least one 30-inch wide emergency exit door. A wheelchair securement position shall never be located directly in front of (blocking) a power lift door location.

GLAZING:
Tinted glazing may be installed in all doors, windows and windshields consistent with federal, state and local regulations.

IDENTIFICATION:
Exceptional child specially equipped school buses shall display the International Symbol of Accessibility below the window line pursuant to appendix A-1 and A-2. Such emblems shall be white on blue background, shall not exceed 12 inches square in size and shall be of a high-intensity retroreflective material.

PASSENGER CAPACITY RATING:
In determining the capacity of a school bus for purposes other than actual passenger load (e.g., vehicle classification or various billing/reimbursement models), any location in a school bus intended for securement of a wheelchair during vehicle operation shall be regarded as four designated seating positions, and each lift area shall count as four designated seating positions.

POWER LIFTS:
1. The power lift shall be located on the right side of the bus body only.
2. Vehicle lifts and installations shall comply with the requirements set forth in:
    a. FMVSS No. 403, Platform Lift Systems for Motor Vehicles; and
    b. FMVSS No. 404, Platform Lift Installations in Motor Vehicles.
3. Design loads: The design load of the lift shall be at least 800 pounds. Working parts, such as cables, pulleys and shafts, which can be expected to wear, and upon which the lift depends for support of the load, shall have a safety factor of at least six, based on the ultimate strength of the material. Non-working parts, such as

platform, frame and attachment hardware that would not be expected to wear, shall have a safety factor of at least three, based on the ultimate strength of the material.

4. Lift capacity: The lifting mechanism and platform shall be capable of operating effectively with a wheelchair and occupant mass of at least 800 pounds.
5. Documentation: The following information shall be provided with each vehicle equipped with a lift:
6. A phone number where information can be obtained about installation, repair and parts. (Detailed written instructions and a parts list shall be available upon request.)
7. Detailed instructions regarding use of the lift shall be readily visible when the lift door is open, including a diagram showing the proper placement and positioning of wheelchair/mobility aids on the lift.
8. Training materials: The lift manufacturer shall make training materials available to ensure the proper use and maintenance of the lift. These may include instructional videos, classroom curriculum, system test results or other related materials.
9. Identification and certification: Each lift shall be permanently and legibly marked or shall incorporate a non-removable label or tag that states it conforms to all applicable requirements of the current National School Transportation Specifications and Procedures. In addition, and upon request of the original titled purchaser, the lift manufacturer or an authorized representative shall provide a notarized Certificate of Conformance, either original or photocopied, which states that the lift system meets all the applicable requirements of the current National School Transportation Specifications and Procedures.

REGULAR SERVICE ENTRANCE:

1. On power lift-equipped vehicles, steps shall be the full width of the step well, excluding the thickness of the doors in the open position.
2. In addition to the handrail required in section III, an additional handrail is required on all specially equipped school buses. This handrail shall be located on the opposite side of the entrance door from the handrail required in section III and shall meet the same requirements for handrails.

RESTRAINING DEVICES:

1. On power lift-equipped school buses with a GVWR of 10,000 pounds or more, seat frames may be equipped with attachment points to which belt assemblies can be attached for use with child safety restraint systems (CSRSs) that comply with FMVSS No. 213, Child Restraint Systems.
2. Any belt assembly anchorage shall comply with FMVSS No. 210, Seat Belt Assembly Anchorages.
3. Alternatively, a child restraint anchorage system that complies with FMVSS No. 225, Child Restraint Anchorage Systems, may be installed.
4. Seat belt assemblies shall conform to FMVSS No. 209, Seat Belt Assemblies.
5. Child safety restraint systems, which are used to facilitate the transportation of children who in other modes of transportation would be required to use a child, infant or booster seat, shall conform to FMVSS No. 213.

SEATING ARRANGEMENTS:

1. Flexibility in seat spacing to accommodate special devices shall be permitted to meet passenger requirements.
2. All seating shall meet the requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection.

SECUREMENT AND RESTRAINT SYSTEM FOR WHEELCHAIRS AND WHEELCHAIR-SEATED OCCUPANTS:

1. For purposes of understanding the various aspects and components of this section, the terms securement, tie down, securement system, and tie down system are used exclusively in reference to the devices that anchor the wheelchair to the vehicle.
2. The terms restraint and restraint system are used exclusively in reference to the equipment that is intended to limit the movement of the wheelchair occupant in a crash or sudden maneuver.
3. The term wheelchair tie down and occupant restraint system (WTORS) is used to refer to the total system that secures the wheelchair and restrains the wheelchair occupant.

WHEELCHAIR TIE DOWNS OCCUPANT RESTRAINT SYSTEMS (WTORS)
GENERAL REQUIREMENTS:

1. A WTORS installed in specially equipped school buses shall be designed, installed and operated for use with forward-facing wheelchair-seated passengers and shall comply with all applicable requirements of FMVSS No. 222, School Bus Passenger Seating and Crash Protection, and SAE J2249, WTORS for Use in Motor Vehicles.
2. The WTORS, including the anchorage track, floor plates, pockets or other anchorages, shall be provided by the same manufacturer or shall be certified to be compatible by manufacturers of all equipment/systems used.
3. Wheelchair securement positions shall be located such that wheelchairs and their occupants do not block access to the lift door.
4. A device for storage of the WTORS shall be provided. When the system is not in use, the storage device shall allow for clean storage of the system, shall keep the system securely contained within the passenger compartment, shall provide reasonable protection from vandalism and shall enable the system to be readily accessed for use.
5. The WTORS, including the storage device, shall meet the flammability standards established in FMVSS No. 302, Flammability of Interior Materials.
6. The following information shall be provided with each vehicle equipped with a securement and restraint system:
    a. A phone number where information can be obtained about installation, repair and parts. (Detailed written instructions and a parts list shall be available upon request.)
    b. Detailed instructions regarding use, including a diagram showing the proper placement of the wheelchair/mobility aids and positioning of securement devices and occupant restraints, including correct belt angles.
7. The WTORS manufacturer shall make training materials available to ensure the proper use and maintenance of the WTORS. These may include instructional videos, classroom curriculum, system test results or other related materials.

WHEELCHAIR SECUREMENT/TIE DOWN:

1. Each wheelchair position in an exceptional child bus shall have a minimum clear floor area of 30 inches laterally by 48 inches longitudinally pursuant to FMVSS No. 222, S5.4.1 and S5.4.2.
2. Additional floor area may be required for some wheelchairs. Consultation between the user and the manufacturer is recommended to ensure that adequate area is provided.

OCCUPANT RESTRAINT SYSTEM:

If the upper torso belt anchorage is higher than 44 inches measured from the vehicle floor, an adjustment device, as part of the occupant restraint system, shall be supplied (See FMVSS No. 222, S5.4.3 and S5.4.4.).

SPECIAL LIGHT:

Doorways in which lifts are installed shall be equipped with an LED light that provides a minimum of 20 lumens of illumination on the floor of the bus immediately adjacent to the lift during lift operation.

SPECIAL SERVICE ENTRANCE:

1. Power lift-equipped bodies shall have a special service entrance to accommodate the power lift.
2. The special service entrance and door shall be located on the right side of the bus and shall be designed so as not to obstruct the regular service entrance.
3. The opening may extend below the floor through the bottom of the body skirt.
4. If such an opening is used, reinforcements shall be installed at the front and rear of the floor opening to support the floor and give the same strength as other floor openings. A drip molding shall be installed above the special service entrance to effectively divert water from the entrance.
5. Door posts and headers at the special service entrance shall be reinforced sufficiently to provide support and strength equivalent to the areas of the side of the bus not used for the special service entrance.

SPECIAL SERVICE ENTRANCE DOORS:

1. A single door or double doors may be used for the special service entrance.
2. A single door shall be hinged to the forward side of the entrance unless this would obstruct the regular service entrance. If the door is hinged to the rearward side of the doorway, the door shall use a safety mechanism that will prevent it from swinging open should the primary door latch fail. If double doors are used, the system shall be designed to prevent the door(s) from being blown open by the aerodynamic forces created by the forward motion of the bus, and/or shall incorporate a safety mechanism to provide secondary protection should the primary latching mechanism(s) fail.
3. All doors shall have positive fastening devices to hold them in the "open" position when the special service entrance is in use.
4. All doors shall be weather-sealed.
5. When manually operated dual doors are provided, the rear door shall have at least a one-point fastening device to the header. The forward-mounted door shall have at least three one-point fastening devices. One shall be to the header, one to the floor line of the body, and the other shall be into the rear door. The door and hinge mechanism shall have strength that is greater than, or equivalent to, the strength of the emergency exit door.
6. Door materials, panels and structural components shall have strength equivalent to the conventional service and emergency doors. Color, rub rail extensions, lettering and other exterior features shall match adjacent sections of the body.
7. Each door shall have windows set in a waterproof manner that are visually similar in size and location to adjacent non-door windows. Glazing shall be of the same type and tinting (if applicable) as standard fixed glass in other body locations.
8. Door(s) shall be equipped with a device that will actuate an audible or visible signal located in the driver's compartment when the door(s) is not securely closed and the ignition is in the "on" position.
9. A switch shall be installed so that the lift mechanism will not operate when the lift platform door(s) is closed.
10. Special service entrance doors shall be equipped with padding at the top edge of the door opening. The padding shall be at least three inches wide and one inch thick and shall extend the full width of the door opening.
11. Power lift LED landing light is required on the exterior of the bus to provide illumination for lift operation.

SUPPORT EQUIPMENT AND ACCESSORIES:

1. In addition to the webbing cutter required in section III, each power lift equipped bus that is set up to accommodate wheelchairs with webbing attached shall contain an additional webbing cutter properly secured in a location to be determined by the purchaser. The webbing cutter shall meet the requirements listed in section III.
2. Special equipment or supplies that are used in the bus for mobility assistance, health support or safety shall meet local, federal and engineering standards that may apply, including requirements for proper identification. Equipment that may be used for these purposes includes, but is not limited to:
    a. Wheelchairs and other mobile seating devices. (See subsection on Securement and Restraint System for Wheelchairs and Wheelchair-seated Occupants.)
    b. Crutches, walkers, canes and other ambulating devices to assist ambulation.
    c. Medical support equipment. This may include respiratory devices, such as oxygen bottles (which should be no larger than 38 cubic feet for compressed gas) or ventilators. Tanks and valves should be located and positioned to protect them from direct sunlight, bus heater vents or other heat sources. Other equipment may include intravenous and fluid drainage apparatus.
3. Each exceptional child bus that is set up to accommodate wheelchairs or other assistive restraint devices should be equipped with an emergency evacuation device that is certified and tested to withstand at least a 300-pound load when used as an emergency stretcher or drag. This evacuation device shall be properly secured to the bus in a location to be determined by the purchaser.
4. If transporting oxygen, refer to AMD Standard 003 available online at http://www.safeambulances.org/wp-content/uploads/2018/04/2014-AMD-Standards-001-027.pdf for oxygen tank retention requirements.

RESTRAINING BARRIERS WITH MODESTY PANELS:

1. There must be a padded restraining barrier with a modesty panel located immediately rearward of the lift if there are wheelchair spaces or regular seating located rearward of the lift and on the same side of the bus.
2. There must be a padded restraining barrier with a modesty panel meeting FMVSS spacing requirements located forward of all passenger seats that do not have another seat properly spaced in front of them.
3. There must be a padded restraining barrier or seat in front of any wheelchair position unless it is contiguous with and behind another wheelchair position.
4. The forwardmost restraining barrier on both sides of the bus must have a full width aluminized modesty panel extending to the floor. If the right front of the passenger area immediately behind the stepwell is not equipped with a restraining barrier due to placement of the wheelchair lift in that location, it must be equipped with a padded stanchion from floor to ceiling with an aluminized modesty panel.

POWER LIFT EQUIPPED SCHOOL BUS
OPTIONAL EQUIPMENT SPECIFICATIONS

STRAIGHT FLOOR / FLAT FLOOR:

1. There shall be an approved option on any size bus, when available, for an unobstructed straight floor design (i.e., no wheel wells and no step-up at the rear of the driver's compartment). Minimum headroom of types C and D buses equipped with this option must remain 76 inches as per standard body specifications.
2. There shall be an approved option on any size bus, when available, for an unobstructed flat floor design in the passenger compartment. If this option uses a raised floor that is stepped up behind the driver's area, the forward edge of the aisle must have a white stripe and be labeled "Step Up" as viewed upon entering the aisle, and a "Step Down" label must be visible upon exiting the aisle.
3. Minimum headroom of types C and D buses equipped with this option must remain 76 inches as per standard body specifications.
4. The bus must be equipped with 39-inch seats except for locations where lift bus specifications require a 30-inch aisle.

TRACK SEATING:

1. There shall be an approved option for a track-mounted seating system using button track (L track) and a wheelchair securement system meeting Florida Specifications that mounts into the track-seating track.
2. The overhead track for the shoulder harness attachment must be present at every possible wheelchair position.
3. The bus must be equipped with 39-inch seats, except when lift bus specifications require a 30-inch aisle.
4. All floor tracking must be anodized aluminum or other material of equal strength that will resist corrosion in Florida's environment.
5. This option must include additional options, as follows:
    a. Purchase of individual track seating seats;
    b. Delete a seat, add a wheelchair position with wheelchair tie-downs; and
    c. Delete a wheelchair position (tie-downs), and add a standard seat.

[Page Intentionally Blank]

SECTION V

AIR CONDITIONER SPECIFICATIONS

PERFORMANCE SPECIFICATIONS:
The installed air conditioner system must meet the high performance standards as described in National School Transportation Specifications and Procedures, Revised 2015. Performance test reports shall be made available upon request by the purchasing district or the department.

SYSTEM REQUIREMENTS FOR ALL BUSES:

Evaporators and Ducting:

1. Air intake for any evaporator assembly (ies), except for the front evaporator of Type A buses, must be equipped with replaceable air filter(s) accessible without disassembly of evaporator case.
2. No portion of the air conditioner system may block the driver's view through any window except that vertical covering in the rear corners of the bus interior for hoses and/or wiring may intrude on the rear quarter window by no more than two inches.

Controls, Wiring, Hoses, and Miscellaneous Hardware:
All system operating controls, including on-off switches, blower switches and thermostat controls must be accessible to the driver in a seated position.

Body:

1. All Type C and Type D front-engine buses equipped with air conditioners must also be equipped with a compartment mounted next to the battery box with external access for mounting circuit breakers and control circuitry for the air conditioner.

2. Type D rear-engine buses are exempted from the requirement for an additional electrical compartment for air conditioner circuitry provided the air conditioner control boards are installed in the rear package shelf area in a covered box.

NOTE: Control boards may optionally be mounted inside the bus within the evaporator case or behind the dash on all Type C and Type D buses. Any control boards mounted inside the bus must be easily accessible.

Warranty and Serviceability:
Warranty - Air conditioner compressor applications must be approved in writing by the chassis engine manufacturer, stating that the installation will not void or reduce the engine manufacturer's warranty or extended service coverage liabilities in any way. Also see **GENERAL INFORMATION AND WARRANTY PROVISIONS**.

Serviceability:
All components requiring periodic servicing must be readily accessible for servicing including, but not limited to, the following:

1. Refrigerant service ports;
2. Sight glasses, which must be directly visible;
3. Any manually resettable circuit breakers;
4. Evaporator air filters – removable and serviceable; and
5. All major component serial numbers must be readily visible.

Parts and Service Manuals:
A comprehensive operator's, maintenance and parts manual(s) must be provided for the entire system, or available via Internet access from the manufacturer's website for each A/C system purchased. Parts manuals must be designed so that all replaceable parts are illustrated by line drawings and such parts are numbered on the illustration, with a part description on a separate list under the corresponding part number. Part descriptions should be annotated appropriately with the part number, a proper description (part name) and the quantity required for the application listed in the drawings. The service manual or manufacturer's website must also include an overall A/C system diagram with component plumbing, locations and identities indicated for diagnostic purposes.

Parts and Tools Availability:

1. All system parts and required special service tools must be readily available, and a list of suppliers must be provided to each school district shop purchasing that brand of air conditioner.

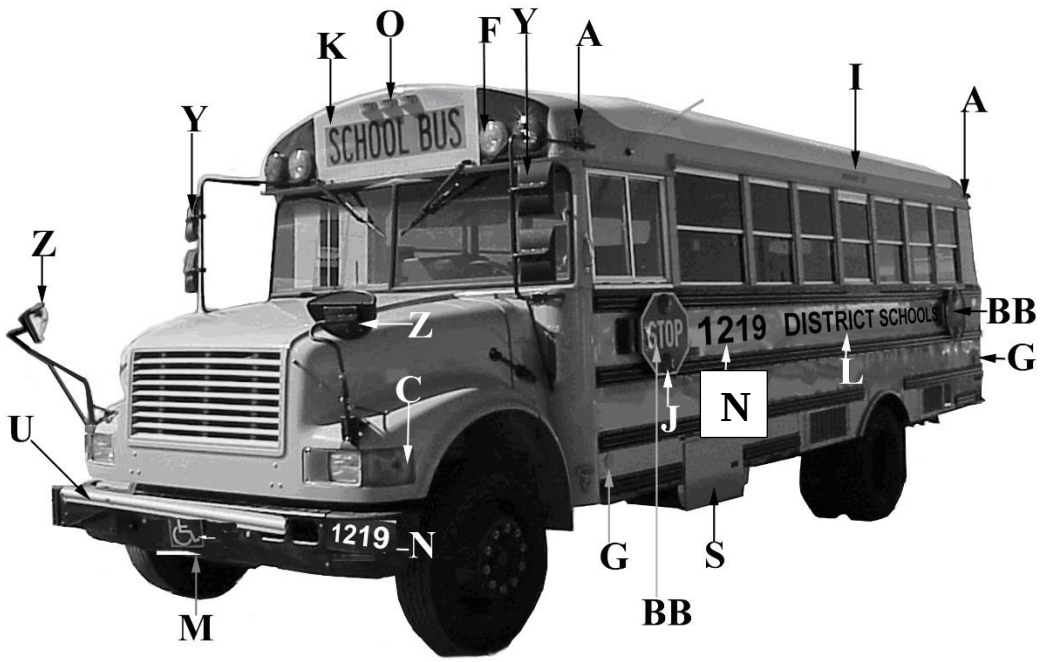
2. Suspension Capacity and Ground Clearance - Ground clearance at the lowest point of the air-conditioning system must be no less than the ground clearance of the bus at the step well.

3. Air conditioner system manufacturer must provide information and data, as needed, to assist in establishing chassis engine performance requirements and in determining chassis electrical components or specifications that may be needed to accommodate the additional electrical demands imposed by the air-conditioning system.

[Page Intentionally Blank]

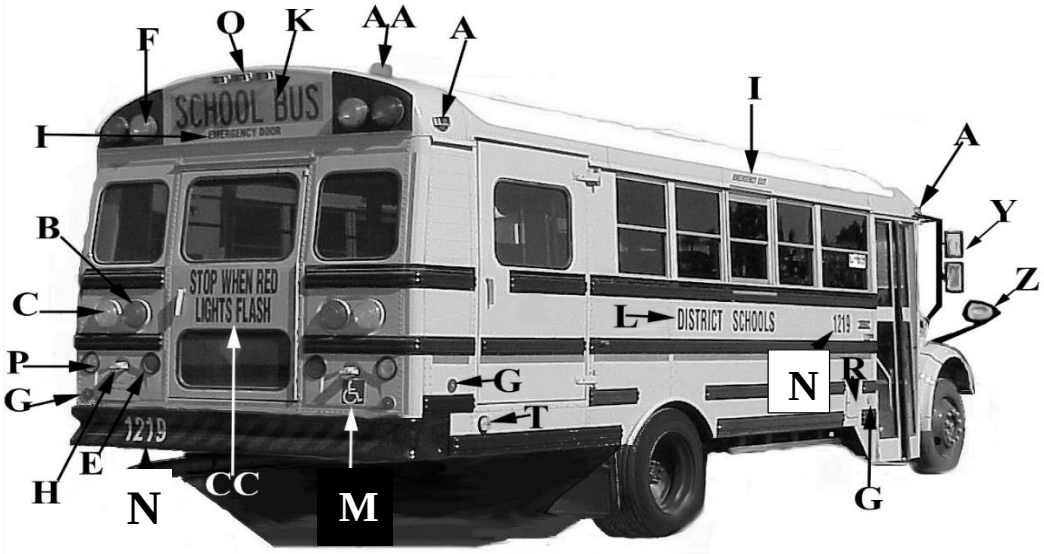
APPENDIX A

MINIMUM LETTERING AND LIGHTING REQUIREMENTS



MINIMUM LETTERING AND LIGHTING REQUIREMENTS:

A	LED Clearance Lights	L	(Name of District) District Schools, Each Side, Belt Line. 6 inch lettering
BB	Octagonal Stop Arm	M	Universal Handicapped Symbol, Wheelchair Lift Equipped Buses, Can be placed anywhere on the front bumper. 6 inches by 6 inches minimum
C	LED Front Turn Signals, (amber lenses)	N	Bus Numbers, 6 inch lettering
F	LED Pupil Warning Lights, Side By Side Amber and Red, Flat Back Design	O	LED Identification Lamps
G	Reflectors	S	Battery Disconnect Switch Decal (optional)
I	Emergency Exit, 2 inch lettering	U	Pupil Crossing Arm
J	Double-Faced Flashing Red LED Lights	Y	Rear View Mirror System
K	SCHOOL BUS, Front And Rear, 8 inch lettering on retro-reflective yellow background	Z	Cross/Side View Mirror System



MINIMUM LETTERING AND LIGHTING REQUIREMENTS:

A	LED Clearance Lights	N	Bus Numbers, 6 inch lettering
B	Seven-inch LED Brake/Tail Lights	M	Universal Handicapped Symbol, Wheelchair Lift Equipped Buses, minimum 6 inches by 6 inches
C	Seven-inch LED Turn Signals (amber lenses)	O	LED Identification Lamps
E	Four-inch LED Stop / Tail Lights	P	LED Back-up Lights
F	LED Pupil Warning Lights, Side By Side Amber and Red, Flat Back Design	R	Fuel Door, 1 inch letters
G	Reflectors	T	Wheelchair Lift LED Landing Light
H	LED License Plate Lamp	Y	Rear View Mirror System
I	Emergency Exit Signs, 2 inch lettering	Z	Cross/Side View Mirror System
K	SCHOOL BUS, Front and Rear, 8 inch lettering on retro-reflective yellow background	AA	Roof-mounted White Flashing LED Strobe Light
L	(Name of District) District Schools (each side, belt line) 6 inch letters	CC	Rear Door Lettering, 6 inch lettering

[Page Intentionally Blank]

APPENDIX B

COLORADO RACKING LOAD TEST

COLORADO RACKING LOAD TEST

The Colorado Racking Test shall be required on or before the acceptance date of the first bus of the respective configuration.

TEST PROCEDURE:
In addition to complying with the test procedures described in FMVSS No. 220, the body manufacturers shall record and report the downward vertical movement of the force at 0, 25, 50, 75 and 100 percent of the maximum force (both loading and unloading). The expected force deflection curve is illustrated schematically in Figure 1a. Low load nonlinearities may indicate joint deformation; high load nonlinearities may indicate yielding in structural members.

A second load cycle shall be performed following the procedure given in the first paragraph. The expected force-deflection curve is illustrated schematically in Figure 1b. Any hysteresis following the initial shakedown will be revealed by this second cycle.

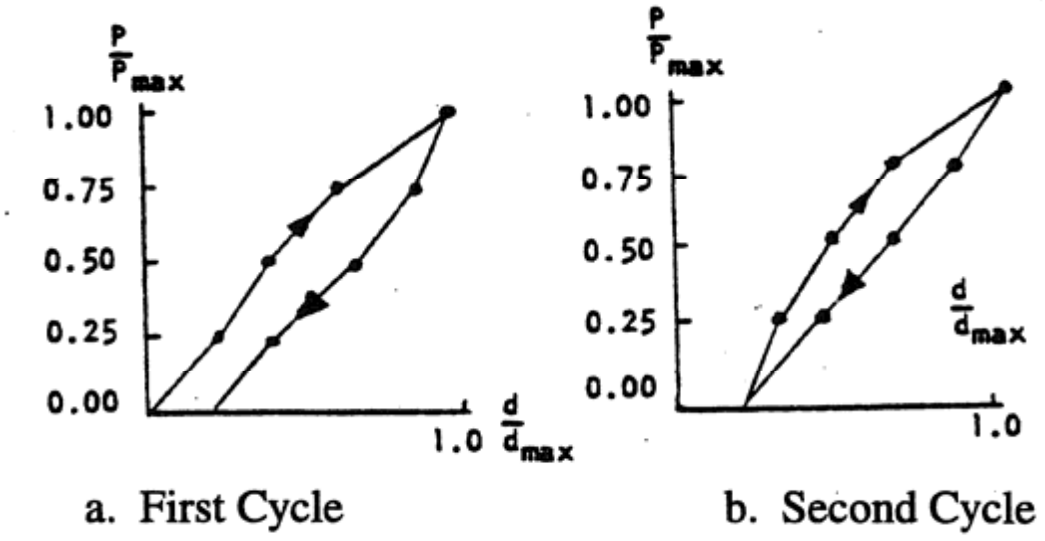


Figure 1. Static Load Test Load-Deflection Curves

A diagonal (racking) load test must be performed on types A, B, C and D school buses to assure adequate shear stiffness and strength of the bus body. Details of the test are provided below:

A two-cycle loading sequence shall be conducted following the described procedure.

(a) Requirements: When a force equal to 1 1/2 times the gross vehicle weight (GVW) is applied to the edge of the roof of the vehicle's body structure through a force application plate, as specified in Test Procedures (b):

1. The diagonal movement of the force at any point on the application plate shall not exceed 5 1/8 inches; and

2. Each emergency exit of the vehicle provided in accordance with FMVSS No. 217 shall be capable of operation as specified in that standard during the full application of the force and after release of the force.

(b) Test Procedures: Each vehicle shall be capable of meeting the requirements of (1) and (2) when tested in accordance with the procedures set forth below.

1. The vehicle shall be supported on a rigid surface along the lower edge of the frame or along the body sills in the absence of a frame.

2. The load shall be applied through a force application plate that is flat and rigid. The dimensions of the plate shall be chosen to assure that the plate edges never make contact with the vehicle skin during testing. A typical width is 18 inches, and a typical length is 20 inches less that the length of the vehicle's roof measured along its longitudinal centerline.

3. Place the force application plate in contact with the edge of the vehicle roof. Orient the plate so that its flat, rigid surface is perpendicular to a diagonal line connecting the most distant points on an interior cross-section of the vehicle. The rear edge of the plate shall be positioned approximately 20 inches from the rear edge of the vehicle roof. A temporary stand may be used to support the plate until a force is applied.

4. Apply an evenly distributed force in a diagonally downward direction through the force application plate at any rate not more than 0.5 inch per second, until a force of 500 pounds has been applied.

5. Apply additional force in a diagonally downward direction through the force application plate at a rate of not more than 0.5 inch per second until the force specified in (a) has been applied, and maintain this application of force.

6. Measure the diagonal movement of any point on the force application plate that occurred during the application of force in accordance with (b)(5), and open the emergency exits as specified in (a)(2).

7. Release all diagonal force applied through the force application plate, and operate the emergency exits as specified in (a)(2).

(c) Test Conditions: The following conditions apply to the requirements specified in (3).

1. Temperature: The ambient temperature is between 32 degrees F and 90 degrees F.

2. Windows and Doors: Vehicle windows, doors, and emergency exits are in the fully-closed position, and latched but not locked.

(d) An alternative method of testing for the racking load test shall be as follows:

The racking load shall be applied along a line connecting the most distant points on a transverse cross-section of the bus interior. It produces a shear distortion of the cross-section, as shown in figure 2.

A representative method of loading that employs a hydraulic jack to load a two-frame test assembly is illustrated in figure 2.

The maximum jack load for the two-frame assembly is determined by the following formula:

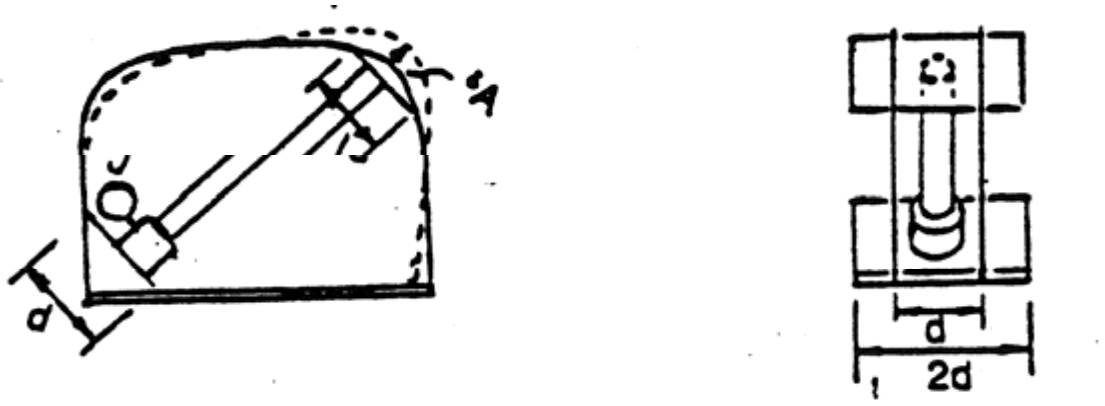
J = 2P J - maximum jack load for two-frame test assembly
P = load/frame

where P = Dynamic Vehicle Weight (DVW) divided by N
DVW - dynamic vehicle weight
N - total number of bus body frames

and DVW = DF x GVW
DF - dynamic factor, not less than 1.5
GVW - gross vehicle weight

Thus, for a DF = 1.5, a GVW = 22,000 pounds-force (lbf) and N= 11, the dynamic vehicle weight is DVW = 33,000 lbf, the load/frame is P = 3000 lbf and the maximum jack load is J = 6000 lbf.

When a complete bus body is rack-loaded, the total load DVW must be distributed uniformly along the bus body. This may be accomplished by mounting a series of hydraulic jacks along the length of the bus interior. Seats may be removed to facilitate jack mounting. The rack load will be considered to be uniformly distributed when the variation in the hydraulic jack readings is less than 10 percent. A maximum load is the sum of all jack readings and shall equal DVW.



Transverse Cross Section Side View

Figure 2. Arrangement of Hydraulic Jack for Rack-Loading of Two-Frame Assembly

The test may be performed on a complete bus body or on a representative section composed of at least two complete frames (body posts plus roof bows) and floor. Standard seats may be installed in the test section in a manner identical to that of the full bus body. Fabrication procedures for the test assembly shall be identical to those used in normal bus body production.

A two-cycle loading sequence shall be conducted, with intermediate and final load and deflection readings recorded, according to the procedure described.

The maximum deflection in line with the jack (A, maximum) shall not exceed 4 inches.

Manufacturer shall specify which testing method was used and submit appropriate certification information.

APPENDIX C

KENTUCKY POLE TEST PROCEDURES

KENTUCKY POLE TEST

The Kentucky Pole Test shall be required on or before the acceptance date of the first bus of the respective configuration.

TEST PROCEDURE:

The body shall be impacted at any point along the roof line on the outside surface, using an 8 inch diameter cylinder, 48 inches long, at a 30 to 45 degree angle, 1 to 3 inches above the top window line. The cylinder shall impact the roofline with the 48 inches dimension in a vertical plane with a force not to exceed 10 inches maximum to 8 inches minimum penetration of the body panels into the passenger compartment after impact.

The manufacturer shall submit appropriate certification information.

Mr. Mike McCullough
Executive Operations Manager
Sun State International
6020 Adamo Drive
Tampa, Florida 33619

Dear Mr. McCullough:

Based on your September 1, 2021, response to Invitation to Bid (ITB) No. 2022-01, the Florida Department of Education (FDOE) would like to offer your company a contract to furnish Types A, C and D complete school buses, Multi-function School Activity Buses and optional equipment. Attached is a list of the units and prices for each awarded bus configuration.

Please send a performance bond or cashier's check in the amount of $750,000, made out to "Florida Department of Education and Purchasing School Districts," guaranteeing performance for units of all types manufactured under this contract to: Office of the Comptroller, Matt Kirkland, 325 West Gaines Street, Suite 914, Tallahassee, Florida 32399-0400.

In addition, please respond in writing accepting this bid and sign and return the original contract form included in the ITB. Assuming receipt of your performance bond and acceptance of this contract, FDOE will process purchase orders received from eligible users of the contract from January 1, 2022, through December 31, 2023.

Should you have any questions, please contact Director of School Transportation, Robert Manspeaker at Robert.Manspeaker@fldoe.org or 850-245-9795.

Sincerely,

Suzanne Pridgeon

ANNUAL RENEWABLE PERFORMANCE BOND

Bond Number: 014221929

KNOW ALL MEN BY THESE PRESENTS, That we, Sun State International Trucks, LLC , (hereinafter called the Principal), as Principal, and The Ohio Casualty Insurance Company , duly organized under the laws of the State of New Hampshire , (hereinafter called the Surety), as Surety, are held and firmly bound unto Florida Department of Education (FDOE) and Purchasing School Districts , (hereinafter called the Obligee), in the sum of Seven Hundred Fifty- Thousand Dollars And Zero Cents ($750,000.00) Dollars, for the payment of which sum well and truly to be made, we, the said Principal and the said Surety, bind ourselves, our heirs, executors, administrators, successors and assigns.

WHEREAS, said Principal has entered into a written Contract with said Obligee, dated January 1, 2022 , for Furnish Type A,Type C and Type D school buses and optional equipment , in accordance with the terms and conditions of said Contract, which is hereby referred to and made a part hereof as if fully set forth herein:

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH, That if the above bounden Principal shall well and truly keep, do and perform each and every, all and singular, the matters and things in said contract set forth and specified to be by said Principal kept, done and performed, at the times and in the manner in said contract specified, or shall pay over, make good and reimburse to the above named Obligee, all loss and damage which said Obligee may sustain by reason of failure or default on the part of said Principal so to do, then this obligation shall be null and void; otherwise shall remain in full force and effect.

FURTHERMORE, Notwithstanding the provisions of the Contract, the term of this bond shall apply from January 1 , 2022 , until December 31 , 2023 , and may be extended by the Surety by Continuation Certificate. However, neither non-renewal by the Surety, nor the failure or inability of the Principal to file a replacement bond in the event of non-renewal, shall itself constitute a loss to the obligee recoverable under this bond or any renewal or continuation thereof. The liability of the Surety under this bond and all continuation certificates issued in connection therewith shall not be cumulative and shall in no event exceed the amount as set forth in this bond or in any additions, riders, or endorsements properly issued by the Surety as supplements thereto. In no event shall Surety's aggregate liability exceed the penal sum of this bond.

NO SUIT, ACTION OR PROCEEDING by the Obligee to recover on this bond shall be sustained unless the same be commenced within one (1) year following the date on which Principal ceased work on said Contract.

Please send claims to: Liberty Mutual Surety Claims
P.O. Box 34526 Seattle, WA 98124

Signed and sealed this 23rd day of November , 2021

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes David M. Carey, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 23rd day of November, 2021.

DVR's			
SEON - DH4C128	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, 128GB SD Card		$938
SEON - DH4C256	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, 256GB SD Card		$1,060
SEON - DH4C512	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, 512GB SD Card		$1,247
SEON - DH4C0	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, No Storage		$828
SEON - DH4CP	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, No Harness, No Storage, Spare Part		$790
SEON - DH4H1T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 500GB HDD		$1,607
SEON - DH4H2T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB HDD		$1,807
SEON - DH4H500	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB HDD		$1,501
SEON - DH4P	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, No Harness, No Storage, Spare Part		$1,462
SEON - DH4S1T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB SSD		$2,015
SEON - DH4S2T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB SSD		$2,545
SEON - DH4S500	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 500GB SSD		$1,897
SEON - TH4H1T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB hard drive.		$1,142
SEON - TH4H2T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 2TB hard drive.		$1,346
SEON - TH4H500	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB hard drive.		$1,040
SEON - TH4P	DVR,TH4 with Mounting Hardware		$999
SEON - TH4S1T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB SSD. Lead time is 4 weeks.		$1,708
SEON - TH4S500	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB SSD. Lead time is 4 weeks.		$1,548
SEON - TH6H1T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB hard drive.		$1,514
SEON - TH6H2T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 2TB hard drive.		$1,718
SEON - TH6H500	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB hard drive.		$1,412
SEON - TH6P	TH6 DVR, 6 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, No Harness, No Storage, Spare Part		$1,248
SEON - TH6S1T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB SSD. Lead time is 4 weeks.		$1,857
SEON - TH6S500	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB SSD. Lead time is 4 weeks.		$1,697
SEON - TH8H1T0	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB Single HDD		$1,961
SEON - TH8H2T0	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB Single HDD		$2,070
SEON - TH8H2T0-2HDD	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB (2X1TB) Dual HDD		$2,077
SEON - TH8H4T0-2HDD	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 4TB (2X2TB) Dual HDD		$2,152
SEON - TH8S1T0	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 1TB Single SSD		$1,961
SEON - TH8S2T0	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 2TB Single SSD		$2,070
SEON - TH8S2T0-2SSD	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 2TB (2X1TB) Dual SSD		$2,672
SEON - TH8S4T0-2SSD	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 4TB (2X2TB) Dual SSD		$3,762
SEON - NH16H4T0-2HDD	NH NVR Hybrid, 16 Channels, 8CH Analog HD Built-In, 16 Port POE Switch, Audio, Security Front Cover with Lock Set, Mounting Plates, Power Harnesses, 4TB (2X2TB) Dual HDD		$3,798
STANDARD WIRING BUNDLES			
SEON - WT1D20S20G0	Standard wiring bundle with adapter harness, diagnostic indicator/alarm button cable 20 ft., five signal input 20 ft. (GPS not included).		$157
SEON - WT1D20S20G4	Standard wiring bundle with adapter harness, diagnostic indicator/alarm button cable 20 ft., five signal input 20 ft., GPS4 receiver magnetic mount 20 ft.		$226
SEON - WT1R30S20G0	Explorer TX8 & Trooper TH wiring bundle with adapter harness, RGY indicator w/ 30 ft. harness, alarm button cable 20 ft., five signal input 20 ft. (GPS not included).		$376
SEON - WT1R30S20G4	Explorer TX8 & Trooper TH wiring bundle with adapter harness, RGY indicator w/ 30 ft. harness, alarm button cable 20 ft., five signal input 20 ft., GPS4 receiver magnetic mount 20 ft.		$445

SEON - PRS-ENGSITE	On Site Engineering Service Per Day - COORDINATED THRU SEON		$1,000
WIRELESS COMPONENTS			
SEON - SRLAC00	Smart Reach Lite,2.4/5GHz,No ANT		$442
SEON - SRLAC07	SmartReach Lite,2.4/5GHz,ANT		$530
SEON - SRLAC07NP	SmartReach Lite,2.4/5GHz,ANT,No POE		$449
SEON - SRLAC00NP	Smart-Reach Lite for TH4, TH4C, TH6, TH8 and TL-HD only, 5.8GHz, no antenna, no PoE adapter		$359
SEON - SRLN07	SmartReach Lite,2.4/5GHz,ANT,-N		$495
SEON - SRLN07NP	SmartReach Lite,2.4/5GHz,ANT,No POE,-N		$407
SEON - SRLBAA09-SV	Smart-Reach Lite, 5G, Supervisor Vehicle		$1,067
SEON - PRS-REMOTE	1x Remote Engineering Service Required for Supervisor Kit Set Up (SEON Must Implement)		$750
SEON - SRBLAC10	SmartReach Base, Lite AC, 2.4G/5G,6dBi,WP,Omni ANT (SEON must Install) - INSTALL COST NOT INCLUDED		$325
SEON - SRBLAC04	SmartReach Base, Lite AC, 2.4G/5G/22dBi WP, Grid ANT (SEON must Install) - INSTALL COST NOT INCLUDED		$390
SEON - SRBLAC09	SmartReach Base, Lite AC, 2.4G/5G,WP,Mini Panel ANT (SEON must Install) - INSTALL COST NOT INCLUDED		$365
SEON - SRB1AC101010	Smart-Reach Base AP, 1 radio, no antenna, outdoor (SEON must Install - Seon Install Cost Included)		$4,175
SEON - SRB1AC707070	Smart-Reach Base AP, 1 radio, 1 omni directional 2.4GHz antenna, outdoor (SEON must Install - Seon Install Cost Included)		$4,331
SEON - SRB1AC020202	Smart-Reach Base AP, 1 radio, 2 omni directional 2.4GHz antenna, outdoor (SEON must Install - Seon Install Cost Included)		$4,175
SEON - SRB1AC090909	Smart-Reach Base AP, 1 radio, 3 omni directional 2.4GHz antenna, outdoor (SEON must Install - Seon Install Cost Included)		$4,296
SEON - SRB2AC121212	SmartReach AP,2RD, 2.4Ghz 3x5dBi Omni Antenna, 5Ghz 3x7dBi Omni Antenna (SEON must Install - Seon Install Cost Included)		$4,607
SEON - SRB3AC141010	SmartReach AP,2RD,2.4Ghz w/Grid Antenna for 5Ghz Back Hau l(SEON must Install - Seon Install Cost Included)		$4,358
vMAX COMPASS - ROUTING SOFTWARE - ALL THESE OPTIONS MUST BE IMPLIMETED OR INSTALLED BY SEON			
SEON - ROUTE-COMPASS	Routing, Route Builder, Tiering, Parent Portal, 1Yr, Per Vehicle		$288
SEON - CMPS-TRAIN3	vMaxCompass Routing Software Training - 3 days of comprehensive onsite software training for smaller School Districts. Includes 2 x 1hr webinars to be used within 1 month of the original training. (SEON must provide training)		$6,000
SEON - CMPS-TRAIN5	vMaxCompass Routing Software Training - 5 days of comprehensive onsite software training for larger School Districts. Includes 4 x 1hr webinars to be used within 1 month of the original training. (SEON must provide training)		$10,000
SEON - CMPS-LOGST-2-VCL	Compass Logistics for fleets of 1 or 2 vehicles, yearly charge (SEON must Install)		$510
SEON - CMPS-LOGST-5-VCL	Compass Logistics for fleets of 3 to 5 vehicles, yearly charge (SEON must Install)		$1,020
SEON - CMPS-LOGST-10-VCL	Compass Logistics for fleets of 6 to 10 vehicles, yearly charge (SEON must Install)		$2,040
SEON - CMPS-LOGST-20-VCL	Compass Logistics for fleets of 11 to 20 vehicles, yearly charge (SEON must Install)		$3,570
SEON - CMPS-LOGST-50-VCL	Compass Logistics for fleets of 21 to 50 vehicles, yearly charge (SEON must Install)		$5,100
SEON - CMPS-DISPATCH	Compass Dispatch Software (SEON must Install)		$5,000
SEON - CMPS-FLEET	Compass Fleet Software (SEON must Install)		$5,000
SEON - CMPS-TRIP	Compass Field Trip Software (SEON must Install)		$5,000

MANUF, MODEL	DESCRIPTION	Notes	Price

ROUTE PATH & STUDENT CONTACT TRACING BUNDLES			
SEON - ROUTE PATH	Automated route stop and student tracking software, includes 1st year of service, per vehicle		$125
SEON - ROUTE PATH TRAIN	Training on Seon Path (SEON must train)		$250
SEON - STUDENT-CONTACT-TRACING	STUDENT-CONTACT-TRACING Includes equipment & all-in-one software for: Live GPS Student Tracking & Reporting Routh Path Parent Notification App & Service All-in-One Web-Based Software Interface		$820
SEON - CONTACT-TRACING-W/MDT	CONTACT-TRACING-W/MDT Includes cellular data, equipment & all-in-one software for: Live GPS (Tablet Hardware) Student Tracking & Reporting (Tablet & RFID hardware) Routh Path Parent Notification App & Service All-in-One Web-Based Software Interface		$1,720
SCHOOL BUS HUB - PARENT NOTIFICATION APP			
SEON - ROUTE-SBHUB	Routing, SBH, Parent Notification Portal,1Year,Per Vehicle		$75
vMAX LIVE PLUS - LIVE GPS - MDT MOBILE DATA TERMINAL & LMU'S			
SEON - VLP-LMUV1Y1	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Verizon Data, Health Check (Includes activation)		$698
SEON - VLP-LMUC1Y1	LMU, for Live plus tracking PWR/SIG DVR HRNS, GPS, Plus/T-Mobile-Curiosity,10MB (Includes activation)		$690
SEON - VLP-MULTI-STR1UY1	Trac, Student Tracking, Multi-card RFID Reader, operates via USB, 1 year		$580
SEON - VLP-LMUV1 (No Data)	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Health Check		$606
SEON - VLP-LMUS1 (No Data)	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Health Check		$657
SEON - VLP-TRAIN	Training on vMax Live+ (Seon provides training)		$250
SMART REACH CELLULAR - LIVE STREAM & ROLLING WIFI HOTSPOT			
SEON - LVST-FLEET	Live Streaming VPN and fleet setup, 100 users including 1 admin (no existing Commander fleet) (SEON must Install)		$3,009
SEON - LVST-FLEET-ADDON	Live Streaming extension for existing Commander fleet - (SEON MUST IMPLIMENT)		$885
SEON - LVST-USER	Live Streaming configuration of up to 10 additional users - (SEON MUST IMPLIMENT)		$1,220
SEON - LVST-USERST	Live Streaming only. Video Server Installation and Setup for User of fleet. Provides lower priority access to streaming video from buses (Max 9 Users) (SEON MUST INSTALL)		$1,800
SEON - LVST-ACT	Live Video Streaming Service, Activation, per vehicle, no data (includes service up to 1 year - until anniversary date) (SEON MUST IMPLIMENT)		$36
SEON - SRC-ROUTER-S-1	WIFI+GPS+Cellular for WIFI Download, GPS tracking, and Live Video Stream. Includes Harness, 6-in-one Dome Antenna - LTE T-Mobile Curiosity Data Plan		$1,297
SEON - SRC-ROUTER-1	All-in-one Smart Reach Router, - NO DATA PLAN - WIFI+GPS+Cellular for WIFI Download/Hotspot, GPS tracking, and Live Video Stream. Includes Harness, 6-in-one Dome Antenna - North America LTE - Customer DATA PLAN – No Hotspot technical support provided		$1,297
SEON - SRC-MODEM-S-1	RV50-X - T-Mobile - SmartReach Cellular, Modem, RV50-X - LTE with Diversity antenna (GPS+Cellular) for GPS tracking and Live Video Stream connectivity - T-Mobile		$1,150
SEON - SRC-MODEM-1	RV50-X - LTE - SmartReach Cellular, Modem - LTE with Diversity antenna (GPS+Cellular) for GPS tracking and Live Video Stream connectivity - North America		$1,150
SEON - SRC-WIFIPANT-1	Smart Reach WIFI Paddle Antenna for SRC-ROUTERs 2.4/5.0GHz Omni-directional		$240
SEON - SRH-R1T60G-Y1	Smart Reach HotSpot - Router, Content Filtering, Captive Portal, 60GB, T-Mobile, GPS Live Tracking, 1 year (SEON WILL IMPLIMENT		$888
SEON - SRH-R0T60G-Y1	Smart Reach HotSpot - Content Filtering, Captive Portal, GPS Live tracking, 60GB, T-Mobile, GPS Live Tracking, 1 year - No router (SEON WILL IMPLIMENT)		$543
SEON - DATA-10G-TY1	Cellular Data,10GB Per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet (SEON will implement)		$180
SEON - DATA-25G-TY1	Cellular Data,60GB Per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet (SEON will implement)		$300
SEON - DATA-60G-TY1	Cellular Data,60GB Per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet (SEON will implement)		$660
SEON - DATA-100G-TY1	Cellular Data,100GB per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet (SEON will implement)		$1,092
SEON - INST-SRC	Smart Reach Cellular Series hardware installation. For the SRC-ROUTERS and SRC-MODEMS and their subsequent series 1,2,3… (SEON MUST INSTALL)		$150
SAFE FLEET CLOUD BASED VEHICLE INSPECTIONS (ANDRIOD TABLET NOT INCLUDED)			
SEON - SETUP-OF-INSPECTION	FLEET,SF Vehicle Inspection Setup, Server Setup - (Seon must install)		$4,000
SEON - SETUP-OF-FORM	FLEET, Forms, Setup - (Seon must install)		$1,500
SEON - INSPECTION-LICENSE	FLEET,SF Vehicle Inspection License, Yearly, Per Vehicle - (Seon must install)		$216
SEON - FORM-LICENSE	FLEET, Forms ,License, Yearly, Per Vehicle - (Seon must install)		$48
SEON - MDT-MOUNTED-1-DATA	Android Tablet docking Station, GPS, built-in Cameras, SD Card, LTE Modem, and MDT-DATA-Y1		$1,133
SEON - MDT-HANDHELD-1-NODATA	Android Tablet docking StationGPS, built-in Cameras, SD Card, LTE Modem, and MDM-Y1 - NO DATA		$1,021
SEON - VLP-ACT	VLP-ACTV		$45

PREVENTATIVE MAINTENACE PROGRAM - HANDLED VIA SEON. RENAWALS ARE CUSTOMER'S RESPONSIBILITY			
SEON - PMP-ANNL-A	Preventative Maintenance Program - Annual Fleet Inspection - Per Vehicle - Paid Annually (Renewal customer responsibility)		$252
SEON - PMP-SEMA-A	Preventative Maintenance Program - Semi Annual Fleet Inspection - Per Vehicle - Paid Annually (Renewal customer responsibility)		$504
SEON - PMP-QTR-A	Preventative Maintenance Program - Quarterly Fleet Inspection - Per Vehicle - Paid Annually (Renewal customer responsibility)		$1,008
vMAX PULSE SYSTEM HEALTH STATUS - HARDWARE MUST BE INSTALLED BY SEON. SOFTWARE RENEWALS ARE CUSTOMER RESPONSIBILITY.			
SEON - VMP1YR	vMax Pulse Single vehicle Software License, 1 year (includes Sender hardware)		$335
SEON - VMP2YR	vMax Pulse Single vehicle Software License, 2 year (includes Sender hardware)		$393
SEON - VMP3YR	vMax Pulse Single vehicle Software License, 3 year (includes Sender hardware)		$423
SEON - VMPACTV	vMax Pulse Receiver activation (includes Receiver hardware) One time install - one per location - Seon Install only		$550
SEON - INST-VMP-C	vMax Pulse Receiver indoor installation (per receiver) One time install - one per location - Seon Install only		$250
SEON - INST-VMP-S	vMax Pulse Sender installation (per vehicle) One time install - one per location - Seon Install only		$100
SPARE HARD DRIVES - SSD DRIVES & SD CARDS			
SEON - TH-HK500G	H Series Storage Cartridge for compatible recorders, includes 500GB HDD and Protective Carry Case		$285
SEON - TH-HK1T0	TH Series Storage Cartridge for compatible recorders, includes 1TB HDD and Protective Carry Case		$385
SEON - TH-HK2T0	H Series Storage Cartridge for compatible recorders, includes 2TB HDD and Protective Carry Case		$485
SEON - TH8-HK1T0	H Series Double-Wide Storage Cartridge for compatible recorders, includes Single 1TB HDD and Protective Carry Case		$401
SEON - TH8-HK2T0	H Series Double-Wide Storage Cartridge for compatible recorders, includes Single 2TB HDD and Protective Carry Case		$508
SEON - TH8-HK2T0-2HDD	H Series Double-Wide Storage Cartridge for compatible recorders, includes Dual 1TB HDD (2TB Total) and Protective Carry Case		$496
SEON - TH8-HK4T0-2HDD	H Series Double-Wide Storage Cartridge for compatible recorders, includes Dual 2TB HDD (4TB Total) and Protective Carry Case		$606
SEON - TH-SK1T0	Trooper TH4 and TH6 media cartridge kit, with 1TB SSD 2.5 in		$721
SEON - TH-SK500G	Trooper TH4 and TH6 media cartridge kit, with 500GB SSD 2.5 in		$564
SEON - TH-SK2T0	Trooper TH4 and TH6 media cartridge kit, with 2TB SSD 2.5 in		$1,255
SEON - TH8-SK1T0	TH8 Media Cartridge Kit, 1TB Single SSD		$779
SEON - TH8-SK2T0	TH8 Media Cartridge Kit, 2TB Single SSD		$1,532
SEON - TH8-SK2T0-2SSD	TH8 Media Cartridge Kit, 2TB (2x1TB) Dual SSD		$1,485
SEON - TH8-SK4T0-2SSD	TH8 Media Cartridge Kit, 4TB (2x2TB) Dual SSD		$2,554
SEON - SDCARD32	32GB SD Card for use with compatible recorders		$150
SEON - SDCARD64	64GB SD Card for use with compatible recorders		$160
SEON - SDCARD128	128GB SD Card for use with compatible recorders		$190
SEON - SDCARD256	256GB SD Card for use with compatible recorders		$376
SEON - SDCARD512	512GB SD Card for use with compatible recorders		$666
SEON - SDCARD1T	1TB SD Card for use with compatible recorders		$786
MISC & SPARE HARNESSES			
SEON - PH1X3UM20	Power harness 14 AWG 20 ft., 20A and 1A fuses, fuse holders, butt splices, mounting hardware - for HX, NX and TH8 DVRs		$75
SEON - PH2X2MFJR	Power harness 16 AWG 20 ft., 10A and 1A fuses, fuse holders, butt splices, mounting hardware - for MX, TL, TL-HD, TH4, TH4C and TH6 DVRs		$61
SEON - HDIA20	Diagnostic indicator/alarm button 5 ft. with 20 ft. extension (for Plus Systems for use with Smart-Link module or TL) - for MX, TL, Rogue, EX4 - replaces 020-0065		$58
SEON - WT1	Adapter harness for TL and TH (signals, diagnostic indicator/ alarm button, speed) - replaces 060-0565		$52
SEON - HEHD10	ASSY, CBL, HD, 2X3Micro-Fit M-M, 10ft		$29
SEON - HEHD15	ASSY, CBL, HD, 2X3Micro-Fit M-M, 4.57mt (15ft)		$29
SEON - HEHD20	ASSY, CBL, HD, 2X3Micro-Fit M-M, 20ft for AHD Wedge and Dome Cameras		$25
SEON - HEHD50	ASSY, CBL, HD, 2X3Micro-Fit M-M, 50ft for AHD Wedge and Dome Cameras		$54

MISC SPARE HARDWARE & PARTS			
SEON - KS	DVR key set: lock box key, media cartridge/ hard drive lock key		$12
SEON - SSL-ENGL	LBL, Seon Safety Label, SSL, ENGL - replaces 690-0130		$2
SEON - SSL-ENSP	LBL, Seon Safety Label, SSL, ENSP, Bilingual English Spanish Lbl		$2
SEON - 085-0046	A/V cable (RCA to BNC) for 5.6" LMK LCD monitor		$6
SEON - 085-0050	Power with switch cable for LMK LCD monitor		$6
SEON - 085-0051	Power supply for 5.6" LMK LCD monitor		$21
SEON - LMK	LCD monitor, 5.6 inch, AC charger, battery pack - replaces 020-0073		$300
SEON - BP	Bench-test power adapter to power MX, TL, TL-HD, TH4, TH4C and TH6 DVRs.		$144
SEON - TH-LBF	TH4/TH6 front lock cover		$60
SEON - TH-LBR	TH4/TH6 rear cable shroud		$48
SEON - TH8-MPV	TH8 Series Double-Wide Vibration Mounting Plate, for compatible hardware (Item included in TH-LBFRV)		$98
SEON - TH8-LBF	TH8 Series Double-Wide Front Door, Locking, Key, for compatible hardware (Item included in TH-LBFRV)		$77
SEON - TH8-LBR	TH8 Series Double-Wide Rear Connector Shroud, Metal, for compatible hardware (Item included in TH-LBFRV)		$68
SEON - HDD-DOCK3	HDD USB docking station. Works with TH4/TH6/TH8/TL/MX/TX/DX/HX/NX		$234
SEON - HDD3-STB	Software kit Includes: vMax View Software, Handheld mouse, HDD-DOCK3 USB Docking Station, Note: Only one required per fleet		$337
SEON - HDD3USBKIT	Software kit includes: vMax View software and HDD-DOCK3 USB Docking Station. Only one required per fleet.		$215
SEON - HDD3-STB-LMK	Software kit Includes: vMax View Software, Handheld mouse, 5.6 inch monitor, HDD-DOCK3 USB Docking Station, BNC F-RCA adapter		$631
SEON - EMRED-RY1	Annual Service Fee for Evidence Manager Redaction license		$834

G4-Upgrade 500GB-2TB SSD	G4-Upgrade 500GB-2TB SSD		$591
G4-Upgrade 500GB- 4TB SSD	G4-Upgrade 500GB-4TB SSD		$1,436
1 TB Drive	Spare hard drive		$284
2 TB Drive	Spare hard drive		$314
4 TB Drive	Spare hard drive		$320
512SSD Drive	Spare hard drive		$362
1 TB SSD Drive	Spare hard drive		$485
2 T SSD Drive	Spare hard drive		$874
4 TB SSD Drive	Spare hard drive		$1,718
System Add-ons			
PaC30 Primary Mount	Passenger Counting Camera, includes cable		$788
Gatekeeper, BSD System	Blind Spot detection system, detects people in proximity, audio warning		$2,159
SV-12, 360° System	360° Exterior camera, includes cables		$1,484
Video Display Mirror, 6"x30"	1080p, with Lever-Lok		$1,367
Video Display Mirror, 6"x16"	1080p, with Lever-Lok		$1,278
Gatekeeper, Mobile monitor	Monitor for 360° camera system		$334
Gatekeeper, ADKIT Plus	ADKIT kit with Advanced Driver Assistance System with driver status monitoring		$1,764
Gatekeeper, ADKIT Basic	ADKIT kit with Driver Status monitoring only		$1,501
Gatekeeper, AI Box	Artificial Intelligence Box, processes video analytics		$1,390
Gatekeeper, Adv BSD	Advanced blind spot detection add on. Detects motion under the bus.		$1,037
Gatekeeper, 360° Camera	Interior 360° camera		$2,238
Gatekeeper, XPAD	Xpad interface tablet		$1,514
Gatekeeper, XPAD kit	Xpad cables and mount		$363
Gatekeeper SV System	Side view system, front camera, vertical monitor, to see curb side		$1,248
Camera Wedge	Camera mounting wedge		$323
Foot switch	Foot switch		$137
G4-DVR-4PSWITCH	4 port switch, includes CAB000367 cable		$154
G4-DVR-8PSWITCH	8 port switch, includes CAB000367 cable		$355

DVR Cover	Security Cover for DVR		$51
MWM Cell	Cellular Modem and Antenna		$1,232
Download Kits			
Y35-DLK	Viewer Software Download Kit		$168
Y58-DLK	Viewer Software Download Kit		$160
DL Kit	Viewer Software Download Kit		$213
G4-Connect-WiFiDongle	WIFI Dongle		$70
Tablet	Android Tablet		$957
G4 Viewer Plus	G4 Viewer Plus Software		$0
360° Set up kit	Calibration kit, 1 per install team		$62
Mobile WiFi Options			
BR-1 Mini with Antenna	Mobile WiFi system with 4 in 1 antenna		$1,507
Fail Over License	Supports WiFi WAN capability, Installed and supported by Gatekeeper		$237
Max BR-1 MK2 w/ Antenna	Mobile WiFi system with 5 in 1 antenna		$2,144
BR-1 Mini Essential Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$120
BR-MK2 Essential Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$246
IC2 License	Additional year IC2 license, Can be purchased for up to 3 additional years		$66
FusionHub Essential Software	Supports 5 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$1,175
FusionHub Essential Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$210
FusionHub Pro Software	Supports 20 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$4,707
FusionHub Pro Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$798
FusionHub 100 Software	Supports 100 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$7,061
FusionHub 100 Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$1,200
FusionHub 500 Software	Supports 500 Mobile WiFi Gateways, Installed and supported by Gatekeeper		$14,123
FusionHub 500 Care	Additional 1 year warranty and IC2 subscription, Can be purchased for up to 3 additional years		$2,400
Software Platforms			
Standard Health Check	Customer self managed, Annual fee/ bus, Software application only		$58
Standard HC Version add'l years	Add additional year of service/bus, Software application only		$58
Advanced Health Check	Gatekeeper Managed, Software application only		$116
Advanced HC Version add'l years	Add additional year of service/bus, Software application only		$116
Dispatch Tablet	Tablet		$1,662
Wall Mount	Mount for Tablet		$56
In Yard Wireless			
Access Point Kit A	Access point with antenna, Installed and supported by Gatekeeper		$900
Access Point Kit B	Access point with antenna, Installed and supported by Gatekeeper		$960
Access Point Kit C	Access point with antenna, Installed and supported by Gatekeeper		$1,020
Mast Equipment 1	Mast equipment, Installed and supported by Gatekeeper		$600
Mast Equipment 2	Mast equipment, Installed and supported by Gatekeeper		$900
Commissioning 1	Wireless commissioning, Installed and supported by Gatekeeper		$1,200
Commissioning 2	Wireless commissioning, Installed and supported by Gatekeeper		$6,000
Commissioning 3	Wireless commissioning, Installed and supported by Gatekeeper		$12,000
Server	Server for wireless, Installed and supported by Gatekeeper		$5,880

G4E Hosted Services	GSI Hosted Server Annual Fee/Bus, Installed and supported by Gatekeeper		$360
Temperature Sensing			
ITSS Panel	Temperature sensing panel, includes power cables/supply, Installation not included		$1,824
ITSS Floor mount	For Mobile applications, Installation not included		$120
ITSS Console mount	For Mobile applications, Installation not included		$58
ITSS Fixed floor mount	Fixed site pole mount kit, Installation not included		$382
ITSS Panel Mounts	Fixed site desktop mount, Installation not included		$75
Pro-Vision			
DR-200-128	2-Camera Drive Recorder,1080p HD Video, optional third camera input; includes 128GB SDXC card, power harness, windshield mounting adhesive, software & guides.		$925
DR-200-256	2-Camera Drive Recorder,1080p HD Video, optional third camera input; includes 256GB SDXC card, power harness, windshield mounting adhesive, software & guides.		$1,141
DR-200-4G-128	2-Camera Drive Recorder,1080p HD Video, 4G, optional third camera input; includes 128GB SDXC card, power harness, windshield mounting adhesive, software & guides.		$1,222
DR-200-4G-256	2-Camera Drive Recorder,1080p HD Video, 4G, optional third camera input; includes 256GB SDXC card, power harness, windshield mounting adhesive, software & guides.		$1,439
DVR-710	Enhanced Event Marker Button		$58
DVR-718	64gb SDXC Card, Compatible with Pro-Vision System		$47
DVR-728	128gb SDXC Card, Compatible with Pro-Vision System		$71
DVR-738	256gb SDXC Card, Compatible with Pro-Vision System		$144
DVR-750	GPS Module		$114
DVR-808SA	Pro-Vision Stop Arm Camera Package. 1080P HD DVR, Dual Stop-Arm Camera, Wireless File Transfer		$1,829
DVR-808M-64	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD night vision mini dome camera, 64GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,473
DVR-808-128	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD night vision dome camera, 128GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,550
DVR-808S-128	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD wide-angle interior camera, 128GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,550
DVR-808M-128	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD night vision mini dome camera, 128GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,626
DVR-808-256	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD night vision dome camera, 256GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,833
DVR-808S-256	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD night vision wide angle camera, 256GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,833
DVR-808S-4G-128	Solid-State DVR, 4G, 1080p HD video,16 camera inputs; includes HD night vision wide angle camera, 128GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,838
DVR-808M-256	Solid-State DVR, 1080p HD video,16 camera inputs; includes HD night vision mini dome camera, 256GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,914

DVR-808M-4G-128	Solid-State DVR, 4G, 1080p HD video,16 camera inputs; includes HD night vision mini dome camera, 128GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$1,924
DVR-808S-4G-256	Solid-State DVR, 4G, 1080p HD video,16 camera inputs; includes HD night vision wide angle camera, 256GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$2,126
DVR-808M-4G-256	Solid-State DVR, 4G, 1080p HD video,16 camera inputs; includes HD night vision mini dome camera, 256GB SDXC card, lockable cage, GPS antenna, Event Marker Button, cables, software & guides.		$2,207

Safety Vision, FL-SB-TVMTOTAL	School Bus Total View System (Mirror Monitor &Totalview Camera Kit)		$2,469
Safety Vision, FL-SV-WIFICELL5-KT	Wi-Fi 1 - On Board Wi-Fi Hardware - shareable Wi-Fi, Wireless Offloading hardware +1 Available Cellular line		$1,534
Safety Vision, FL-SV-WIFICELL2-KT	Wi-Fi 1 - On Board Wi-Fi Hardware - shareable Wi-Fi, Wireless Offloading hardware +2 Available Cellular line		$2,014
Safety Vision, FL-OBWIFI-24GB	On Board Wi-Fi Bundle - Includes: Data, Content Filtering, Usage Analytics, CIPA Compliant - 24GB/Year/Bus		$1,194
Safety Vision, FL-OBWIFI-36GB	On Board Wi-Fi Bundle - Includes: Data, Content Filtering, Usage Analytics, CIPA Compliant - 36GB/Year/Bus		$1,554
Safety Vision, FL-OBWIFI-60GB	On Board Wi-Fi Bundle - Includes: Data, Content Filtering, Usage Analytics, CIPA Compliant - 60GB/Year/Bus		$1,914
Safety Vision, FL-SV-4112-2TB-4CAM	Observer 4112-12 Channel HVR (8HD, 4IP) 2TB HD, 4-Cam 1080p		$2,312
Safety Vision, FL-SV-4112-2TB-5CAM	Observer 4112-12 Channel HVR (8HD, 4IP) 2TB HD, 5-Cam 1080p		$2,518
Safety Vision, FL-SV-4112-2TB-6CAM	Observer 4112-12 Channel HVR (8HD, 4IP) 2TB HD, 6-Cam 1080p		$2,697
Safety Vision, FL-SV-4112-2TB-7CAM	Observer 4112-12 Channel HVR (8HD, 4IP) 2TB HD, 7-Cam 1080p		$3,161
Safety Vision, FL-SV-4112-2TB-8CAM	Observer 4112-12 Channel HVR (8HD, 4IP) 2TB HD, 8-Cam 1080p		$3,364
Safety Vision, FL-41-ANT-FEMALE	Wi-Fi Antenna when utilizing built in Wi-Fi Fleets <15 units per AP		$149
Safety Vision, FL-SV-WIFI-MOXKIT-B	Standard Moxa Wi-Fi Kit (For Large Fleets over 15 units per AP)		$749
Safety Vision, FL-SV-WIFICELL5-KT	Wi-Fi / Cell Modem- Pepwave		$996
Safety Vision, FL-SB-TVMREAR-HD	School Bus Mirror Monitor&Reverse Camera		$1,230
Safety Vision, FL-SB-TVMTOTAL	School Bus Total View System (Mirror Monitor &Totalview Camera Kit)		$2,469
Safety Vision, FL-SV-Synovia-Kit	Synovia Integration Hardware Kit		$108
Safety Vision, FL-412-2TB-HDD	2TB-HDD		$345
Safety Vision, FL-SV-WIFICELL5-KT	Wi-Fi 1 - On Board Wi-Fi Hardware - shareable Wi-Fi, Wireless Offloading hardware +1 Available Cellular line		$1,534
Safety Vision, FL-SV-WIFICELL2-KT	Wi-Fi 1 - On Board Wi-Fi Hardware - shareable Wi-Fi, Wireless Offloading hardware +2 Available Cellular line		$2,014
Safety Vision, FL-OBWIFI-24GB	On Board Wi-Fi Bundle - Includes: Data, Content Filtering, Usage Analytics, CIPA Compliant - 24GB/Year/Bus		$1,194
Safety Vision, FL-OBWIFI-36GB	On Board Wi-Fi Bundle - Includes: Data, Content Filtering, Usage Analytics, CIPA Compliant - 36GB/Year/Bus		$1,554
Safety Vision, FL-OBWIFI-60GB	On Board Wi-Fi Bundle - Includes: Data, Content Filtering, Usage Analytics, CIPA Compliant - 60GB/Year/Bus		$1,914

Seon			
DVRs			
Seon, DH4C128	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, 128GB SD Card		$914
Seon, DH4C256	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, 256GB SD Card		$1,060
Seon, DH4C512	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, 512GB SD Card		$1,284
Seon, DH4C0	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, Power Harness, No Storage		$782
Seon, DH4CP	DH4C Solid State DVR, 4 HD Channels, Audio, GPS, WiFi (AC,AN,BGN), Mounting Plate, No Harness, No Storage, Spare Part		$736
Seon, DH4H1T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 500GB HDD		$1,716
Seon, DH4H2T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB HDD		$1,956
Seon, DH4H500	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB HDD		$1,589
Seon, DH4P	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, No Harness, No Storage, Spare Part		$1,542
Seon, DH4S1T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB SSD		$2,206
Seon, DH4S2T0	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB SSD		$2,842
Seon, DH4S500	DH4 DVR, 4 HD Channels, Audio, GPS, WiFi (AC, AN, BGN), Security Front Cover with Lock Set, Mounting Plate, Power Harness, 500GB SSD		$2,064
Seon, TH4H1T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB hard drive.		$1,158
Seon, TH4H2T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 2TB hard drive.		$1,403
Seon, TH4H500	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB hard drive.		$1,036
Seon, TH4P	DVR,TH4 with Mounting Hardware		$987
Seon, TH4S1T0	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB SSD. Lead time is 4 weeks.		$1,838
Seon, TH4S500	TH4 DVR 4 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB SSD. Lead time is 4 weeks.		$1,646
Seon, TH6H1T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB hard drive.		$1,605
Seon, TH6H2T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 2TB hard drive.		$1,850

Seon, TH6H500	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB hard drive.		$1,482
Seon, TH6P	TH6 DVR, 6 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, No Harness, No Storage, Spare Part		$1,286
Seon, TH6S1T0	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 1TB SSD. Lead time is 4 weeks.		$2,016
Seon, TH6S500	TH DVR 6 HD channels, audio, security front cover with lock set, mounting bracket, power harness, 500GB SSD. Lead time is 4 weeks.		$1,824
Seon, TH8H1T0	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 1TB Single HDD		$2,141
Seon, TH8H2T0	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB Single HDD		$2,272
Seon, TH8H2T0-2HDD	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 2TB (2X1TB) Dual HDD		$2,280
Seon, TH8H4T0-2HDD	TH8 DVR, 8 HD Channels, 2 IP Channels, Audio, Security Front Cover with Lock Set, Mounting Plate, Power Harness, 4TB (2X2TB) Dual HDD		$2,370
Seon, TH8S1T0	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 1TB Single SSD		$2,141
Seon, TH8S2T0	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 2TB Single SSD		$2,272
Seon, TH8S2T0-2SSD	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 2TB (2X1TB) Dual SSD		$2,994
Seon, TH8S4T0-2SSD	TH8 DVR, 8 HD Channels, Audio, Security Front Cover with Lock Set, Mounting Bracket, Power Harness, 4TB (2X2TB) Dual SSD		$4,302
Seon, NH16H4T0-2HDD	NH NVR Hybrid, 16 Channels, 8CH Analog HD Built-In, 16 Port POE Switch, Audio, Security Front Cover with Lock Set, Mounting Plates, Power Harnesses, 4TB (2X2TB) Dual HDD		$4,346
Standard Wiring Bundles			
Seon, WT1D20S20G0	Standard wiring bundle with adapter harness, diagnostic indicator/alarm button cable 20 ft., five signal input 20 ft. (GPS not included).		$141
Seon, WT1D20S20G4	Standard wiring bundle with adapter harness, diagnostic indicator/alarm button cable 20 ft., five signal input 20 ft., GPS4 receiver magnetic mount 20 ft.		$224
Seon, WT1R30S20G0	Explorer TX8 & Trooper TH wiring bundle with adapter harness, RGY indicator w/ 30 ft. harness, alarm button cable 20 ft., five signal input 20 ft. (GPS not included).		$404
Seon, WT1R30S20G4	Explorer TX8 & Trooper TH wiring bundle with adapter harness, RGY indicator w/ 30 ft. harness, alarm button cable 20 ft., five signal input 20 ft., GPS4 receiver magnetic mount 20 ft.		$487
Seon, WSA2	Alarm button with 20 ft harness		$75
Cameras			
Seon, HD1QxxAI	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, no harness - to use with DH4C, TH-Series, and NH-Series DVRs		$283
Seon, HD1QxxAI20	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, 20' harness - to use with DH4C, TH-Series, and NH-Series DVRs		$295

Seon, HD1QxxAI50	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, 50' harness - to use with DH4C, TH-Series, and NH-Series DVRs		$324
Seon, HD1QxxAI75	HD 720P Camera, Dome, 2.6mm or 3.6mm, internal, audio, IR TDN, 75' harness - to use with DH4C, TH-Series, and NH-Series DVRs		$350
Seon, HD1SxxEI	HD Camera, Wedge, Stop Arm, 6mm or 16mm, external, IR TDN - for use with TH-Series DVRs		$423
Seon, HD1SxxEI20	HD Camera, Wedge, Stop Arm, 6.0 mmor 16mm, external, IR TDN, 20' harness - for use with TH-Series DVRs		$447
Seon, HD1SxxEI50	HD Camera, Wedge, Stop Arm, 6.0 mm or 16mm, external, IR TDN, 50' harness - for use with TH-Series DVRs		$477
Seon, HD1SxxEI75	HD Camera, Wedge, Stop Arm, 6.0 mm or 16mm, external, IR TDN, 75' harness - for use with TH-Series DVRs		$507
Seon, HD1WxxEI	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs		$398
Seon, HD1WxxEI20	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs, 20' Harness		$417
Seon, HD1WxxEI50	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs, 50' Harness		$438
Seon, HD1WxxEI75	HD Camera, Wedge, external, 2.8mm, 3.6mm or 6mm IR TDN - for use with TH-Series DVRs, 75' Harness		$457
Seon, HD2QxxAI	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, no harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$291
Seon, HD2QxxAI20	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, 20’ harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$315
Seon, HD2QxxAI50	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, 50’ harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$347
Seon, HD2QxxAI75	HD 1080P Camera, Dome, 2.5mm or 3.6mm, internal, audio, IR, TDN, 75’ harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$377
Seon, HD2D0x0xAI	Windshield Dual Lens Cam, 1080p, 2.1mm dual or 3.6mm dual lens forward/inward, mic		$416
Seon, HD3QxxA	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, no harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$314
Seon, HD3QxxA20	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, 20' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$327
Seon, HD3QxxA50	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, 50' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$357
Seon, HD3QxxA75	HD 1080P Camera, Dome, 2.8mm or 3.6mm, internal, audio, IR TDN, 75' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$387
Seon, HD3U01AN	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, no harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$351
Seon, HD3U01AN20	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, 20' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$369
Seon, HD3U01AN50	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, 50' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$401

Seon, HD3U01AN75	HD Camera, Ultra Wide, 1.72mm, internal, audio, IR, TDN, 75' harness — to use with DH4C, TH6, TH8, and NH16 DVRs		$431
Seon, HD3SxxEI	HD Camera, Wedge,Stop Arm,6.0mm or 16mm,external,IR TDN,no harness,to use with TH6 & TH8 DVRs		$429
Seon, HD3SxxEI20	HD Camera, Wedge,Stop Arm,6.0mm or 16mm, external,IR TDN, 20' harness,to use with TH6 & TH8 DVRs		$453
Seon, HD3SxxEI50	HD Camera, Wedge,Stop Arm,6.0mm or 16mm, external,IR TDN, 50' harness,to use with TH6 & TH8 DVRs		$483
Seon, HD3SxxEI75	HD Camera, Wedge,Stop Arm,6.0mm or 16mm,external,IR TDN, 75' harness,to use with TH6 & TH8 DVRs		$513
Seon, HD3WxxEI	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, no harness, to use with TH6 and TH8 DVRs.		$404
Seon, HD3WxxEI20	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, 20' harness, to use with TH6 and TH8 DVRs.		$423
Seon, HD3WxxEI50	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, 50' harness, to use with TH6 and TH8 DVRs.		$444
Seon, HD3WxxEI75	HD Camera, Wedge, 2.8mm, 3.6mm, 6mm, 16mm or 25mm,external, IR TDN, 75' harness, to use with TH6 and TH8 DVRs.		$462
Seon, C3Q9PD03A20	IP Camera, PoE, dome, white, 3MP progressive scan, 2.8 mm lens size, interior, IR Day/Night, audio, 20 ft. harness - to use with TH8 or NH16		$491
Seon, C3Q9PD03A50	IP Camera, PoE, dome, white, 3MP progressive scan, 2.8 mm lens size, interior, IR Day/Night, audio, 50 ft. harness - to use with TH8 or NH16		$539
Seon, C3W9PD04E20	IP Camera, PoE, wedge, 3MP progressive scan, 4.0 mm lens size, exterior (no audio), IR Day/Night, 20 ft. harness - to use with TH8 or NH16		$595
Seon, C3W9PD04E50	IP Camera, PoE, wedge, 3MP progressive scan, 4.0 mm lens size, exterior (no audio), IR Day/Night, 50 ft. harness - to use with TH8 or NH16		$645
Seon, TH8POEKIT48	ASSY,POE Kit,48V, 1 Kit Required Per IP Camera		$253
Seon, CA10xxEI	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, No Harness		$365
Seon, CA10xxEI20	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, 20 ft. harness		$1,117
Seon, CA10xxEI50	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, 50 ft. harness		$747
Seon, CA10xxEI75	Day/Night 700 TVL camera, exterior (w infrared, no audio), 2.9mm, 36.mm, 6mm, 16mm or 25mm lens, 75 ft. harness		$451
Seon, CHQ8PDxxA	HD Camera, dome, 1080P progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio (HX16 & NX16 DVR's ONLY)		$459
Seon, CHQ8PDxxA20	HD Camera, dome, 1080p progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio, and 20 ft. harness — (HX16 & NX16 DVR's ONLY)		$489
Seon, CHQ8PDxxA50	HD Camera, dome, 1080p progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio, and 50 ft. harness — (HX16 & NX16 DVR's ONLY)		$501

Seon, CHQ8PDxxA75	HD Camera, dome, 1080p progressive scan, 2.8 mm, 3.6mm or 6mm lens size, interior, IR Day/Night, audio, and 75 ft. harness — (HX16 & NX16 DVR's ONLY)		$527
Seon, CHW8PDxxE20	HD Camera 720P/1080P/3MP, IP POE, 3.6 mm, 6mm or 8mm lens size, exterior (no audio), and 20 ft. harness — (HX16 & NX16 DVR's ONLY)		$537
Seon, CHW8PDxxE50	HD Camera 720P/1080P/3MP, IP POE, 3.6 mm, 6mm or 8mm lens size, exterior (no audio), and 50 ft. harness — (HX16 & NX16 DVR's ONLY)		$569
Seon, CHW8PDxxE75	HD Camera 720P/1080P/3MP, IP POE, 3.6 mm, 6mm or 8mm lens size, exterior (no audio), and 75 ft. harness — (HX16 & NX16 DVR's ONLY)		$599
Seon, CJ9xxA	Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm or 6mm lens (no infrared)		$242
Seon, CJ9xxA20	Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm or 6mm lens, 20 ft. harness (no infrared)		$267
Seon, CJ9xxA50	Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm or 6mm lens, 50 ft. harness (no infrared)		$297
Seon, CJ902A	Dome Day/Night 600TVL camera, audio, 2.5mm lens (no infrared)		$267
Seon, CJ902A20	Dome Day/Night 600TVL camera, audio, 2.5mm lens, 20 ft. harness (no infrared)		$291
Seon, CJ902A50	Dome Day/Night 600TVL camera, audio, 2.5mm lens, 50 ft. harness (no infrared)		$323
Seon, CJ902A75	Dome Day/Night 600TVL camera, audio, 2.5mm lens, 75 ft. harness (no infrared)		$353
Seon, CQ9xxA	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens		$242
Seon, CQ9xxA20	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens, 20 ft. harness		$267
Seon, CQ9xxA50	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens, 50 ft. harness		$297
Seon, CQ9xxA75	Integrated IR Dome Day/Night 600TVL camera, audio, 2.9mm, 3.6mm, 6mm, 8mm, 12mm or 16mm lens, 75 ft. harness		$329
Seon, CQ902A	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens		$267
Seon, CQ902A20	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens, 20 ft. harness		$291
Seon, CQ902A50	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens, 50 ft. harness		$323
Seon, CQ902A75	Integrated IR Dome Day/Night 600TVL camera, audio, 2.5mm lens, 75 ft. harness		$353
Seon, RVC400	Rear Vision Outdoor Camera with M12 connector and bracket, includes M12 to Micro-Fit Adapter		$223
Seon, RVC400E75	RVC400 with a 75 ft. M12 to Micro-Fit harness		$288
7in Display Monitors			
Seon, RVM2	Rear Vision 7 Inch LCD Monitor and cables, for standalone use with an SD analog Camera, DVR/NVR with Expansion Port, or InView 360/Fusion. Expansion Cables included for TH4/TH6/TH8/HX/NX/TL-HD.		$372
Seon, RVM2-SP	Rear Vision 7 Inch LCD Monitor, cables, and video splitter, for use with all DVR's, no < 60 sec delay due to DVR/NVR boot up		$439
Camera Mounting and Post Options			$0
Seon, CHQHD3-MA30	Angle mount shim kit, 30 degree angle, works with CHQ8PD and HD3Q cameras		$98
Seon, CHQ-MP6A30	CHQ mounting post, 6 inch, 30 degree angle for HD3Q Camera		$98
Seon, CHQ-MP4A30	CHQ mounting post, 4 inch, 30 degree angle for HD3Q Camera		$98
Seon, HD1Q-MP6A30	HD1Q mounting post, 6 inch, 30 degree angle		$98
Seon, HD1Q-MP4A30	HD1Q mounting post, 4 inch, 30 degree angle		$98
Seon, CQ-MP4	CJ/CQ/SQ/ mounting post, 4 inch		$98

Seon, CQ-MP6	CJ/CQ/SQ mounting post, 6 inch		$98
Seon, CA-MP4	CA/CHW/HD1W/HD3W mounting post, 6 inch		$98
Seon, CA-MP6	CA/CHW/HD1W/HD3W mounting post, 4 inch		$98
Seon, CJ-MP6A30	CJ mounting post, 6 inch, 30 degree angle		$98
Predictive Stop Arm Solutions			
Seon, PSA2S	Predictive Stop Arm, 2 Radars, 2 Horns		$3,249
1080P HD Exterior 360 System			$0
Seon, inView360HD-Connectable	inView360HD System Kit + Connection Kit, Includes 7" HD Monitor HDM-7IN		$2,452
Seon, ARMF	Optional RCA to Microfit Adaptor for video feed into DVR		$33
Seon, inView360HD-Cal-Kit	inView 360HD Calibration Kit - USB + 4 mats + software + videos + documentation		$180
Analog Exterior 360 System			
Seon, SAV-INV360	Analog inview360 Exterior System Complete		$1,904
Seon, SAV-200R	Rear camera, spare, no housing, inView 360		$212
Seon, SAV-PAD	InView360,Calibration Pad Set,c/w 4 Folded Pads		$136
Seon, SAV-DOC-USB	inView 360 manuals on a USB stick (not including calibration)		$36
vMax Commander Wireless Download			
Seon, VMC5B	vMax Commander 5.0: web-based wireless and automatic video management software to monitor video system health, automatically download video alarms, search video by time and location, and display historical GPS tracks of the vehicles in the fleet. Includes 100 user licenses.		$4,800
Seon, VMC5V	vMax Commander 5.0: Vehicle One Time Activation (per vehicle)		$240
Seon, PRS-WEBTRN	Webinar, remote training, 1 Day		$918
Seon, PRS-TRAIN	vMax Live Commander On Site Training Per Da		$1,800
Seon, PRS-REMOTE	Remote Engineering Service Per Day		$900
Seon, PRS-TRVL	Engineering Services Travel Days To/From Site		$1,200
Seon, PRS-REMOTE-HRLY	Remote Engineering Service Per Hour		$180
Seon, PRS-ENGSITE	On Site Engineering Service Per Day		$1,200
Wireless Components			
Seon, SRLAC00	Smart Reach Lite,2.4/5GHz,No ANT		$406
Seon, SRLAC07	SmartReach Lite,2.4/5GHz,ANT		$511
Seon, SRLAC07NP	SmartReach Lite,2.4/5GHz,ANT,No POE		$414
Seon, SRLAC00NP	Smart-Reach Lite for TH4, TH4C, TH6, TH8 and TL-HD only, 5.8GHz, no antenna, no PoE adapter		$306
Seon, SRLN07	SmartReach Lite,2.4/5GHz,ANT,-N		$469
Seon, SRLN07NP	SmartReach Lite,2.4/5GHz,ANT,No POE,-N		$364
Seon, SRLBAA09-SV	Smart-Reach Lite, 5G, Supervisor Vehicle		$1,101
Seon, PRS-REMOTE	1x Remote Engineering Service Required for Supervisor Kit Set Up		$900
Seon, SRBLAC10	SmartReach Base,Lite AC, 2.4G/5G,6dBi,WP,Omni ANT		$390
Seon, SRBLAC04	SmartReach Base,Lite AC, 2.4G/5G/22dBi WP,Grid ANT		$468
Seon, SRBLAC09	SmartReach Base,Lite AC, 2.4G/5G,WP,Mini Panel ANT		$438
Seon, SRB1AC101010	Smart-Reach Base AP, 1 radio, no antenna, outdoor		$2,010
Seon, SRB1AC707070	Smart-Reach Base AP, 1 radio, 1 omni directional 2.4GHz antenna, outdoor		$2,198
Seon, SRB1AC020202	Smart-Reach Base AP, 1 radio, 2 omni directional 2.4GHz antenna, outdoor		$2,010
Seon, SRB1AC090909	Smart-Reach Base AP, 1 radio, 3 omni directional 2.4GHz antenna, outdoor		$2,156

Seon, SRB2AC121212	SmartReach AP,2RD, 2.4Ghz 3x5dBi Omni Antenna, 5Ghz 3x7dBi Omni Antenna		$2,529
Seon, SRB3AC141010	SmartReach AP,2RD,2.4Ghz w/Grid Antenna for 5Ghz Back Haul		$2,230
Seon, INST-WRLS	Installation Smart Reach Wireless Access Point, Seon install		$3,000
vMax Compass-Routing Software			
Seon, ROUTE-COMPASS	Routing,Route Builder,Tiering,Parent Portal, 1Yr, Per Vehicle		$346
Seon, ROUTE-COMPASS-RENEWAL	Year 2 and Thereafter Annual Renewal, 1yr, Per Vehicle		$116
Seon, CMPS-TRAIN3	vMaxCompass Routing Software Training - 3 days of comprehensive onsite software training for smaller School Districts. Includes 2 x 1hr webinars to be used within 1 month of the original training.		$7,200
Seon, CMPS-TRAIN5	vMaxCompass Routing Software Training - 5 days of comprehensive onsite software training for larger School Districts. Includes 4 x 1hr webinars to be used within 1 month of the original training.		$12,000
Seon, CMPS-LOGST-2-VCL	Compass Logistics for fleets of 1 or 2 vehicles, yearly charge		$612
Seon, CMPS-LOGST-5-VCL	Compass Logistics for fleets of 3 to 5 vehicles, yearly charge		$1,224
Seon, CMPS-LOGST-10-VCL	Compass Logistics for fleets of 6 to 10 vehicles, yearly charg		$2,448
Seon, CMPS-LOGST-20-VCL	Compass Logistics for fleets of 11 to 20 vehicles, yearly charge		$4,284
Seon, CMPS-LOGST-50-VCL	Compass Logistics for fleets of 21 to 50 vehicles, yearly charge		$6,120
Seon, CMPA-CUSTOM SOFTWARE	Compass customer software development by hour. Seon developer		$306
Seon, CMPS-PRO-MAPCUSTOM1	Custom map layers for Compass Route Builder and/or Info Locator, 8 hours charged per Qty.		$1,469
Seon, CMPS-DISPATCH	Compass Dispatch Software		$6,000
Seon, CMPS-FLEET	Compass Fleet Software		$6,000
Seon, CMPS-TRIP	Compass Field Trip Software		$6,000
Seon, CMPS-TRAIN-HRLY	vMax Compass training, per hour. Seon Trainer		$148
Route Path &Student Tracking Bundles			
Seon, ROUTE PATH	Automated route stop and student tracking software, includes 1st year of service, per vehicle		$116
Seon, ROUTE PATH TRAIN	Training on Seon Path		$300
Seon, ROUTE PATH-RY1	1 year renewal / continuance of ROUTE-PATH Automated route stop and student tracking, per vehicle		$116
Seon, STUDENT-CONTACT-TRACING	STUDENT-CONTACT-TRACING Includes equipment & all-in-one software for: • Live GPS • Student Tracking & Reporting • Routh Path • Parent Notification App & Service • All-in-One Web-Based Software Interface		$432
Seon, STDNT-CONTACT-TRACING-RY1	1 year renewal for STUDENT-CONTACT-TRACING Includes cellular data, equipment & all-in-one software for: • Live GPS (GPS hardware) • Student Tracking & Reporting (RFID hardware) • Routh Path • Parent Notification App & Service • All-in-One Web-Base		$432
Seon, CONTACT-TRACING-W/MDT	CONTACT-TRACING-W/MDT Includes cellular data, equipment & all-in-one software for: • Live GPS (Tablet Hardware) • Student Tracking & Reporting (Tablet & RFID hardware) • Routh Path • Parent Notification App & Service • All-in-One Web-Based Software Interface		$1,512
Seon, CONTACT-TRACING-MDT-RY1	1 year renewal of CONTACT-TRACING-W/MDT Includes cellular data, equipment & all-in-one software for: • Live GPS (Tablet Hardware) • Student Tracking & Reporting (Tablet & RFID hardware) • Routh Path • Parent Notification App & Service • All-in-One Web-Base		$533
Seon, INST-MDT	FEE,Installation,MDT Hardware		$221
Seon, 12. School Bus Hub - Parent Notification App			$0

Seon, ROUTE-SBHUB	Routing,SBH,Parent Notification Portal,1Year,Per Vehicle		$58
Seon, ROUTE-SBHUB-RY1	Routing,SBH,Parent Notification Portal,Renewal,Per Vehicle		$58
vMax Live Plus-Live GPS-MDT Mobile Data Terminal			$0
Seon, VLP-LMUV1Y1	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Verizon Data, Health Check		$809
Seon, VLP-LMUC1Y1	LMU, for Live plus tracking PWR/SIG DVR HRNS,GPS,Plus/T-Mobile-Curiosity,10MB		$799
Seon, VLP-ACTV	MDT AVL Activation Fee (1Year, Per Vehicle)		$50
Seon, VLP-MULTI-STR1UY1	Trac, Student Tracking, Multi-card RFID Reader, operates via USB, 1 year		$426
Seon, VLP-LMUV1 (No Data)	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Health Check		$748
Seon, VLP-LMUS1 (No Data)	vMax Live+, LMU, PWR Harness, Signal Cable, GPS, Antenna, Activation Fee, Health Check		$809
Seon, VLP-Y1	vMax Live Plus Service (1 year)		$118
Seon, VLP-TRAIN	Training on vMax Live+, Seon Trainer		$300
Seon, MDT-MOUNTED-1-DATA	Android Tablet, Docking Station, GPS, built-in Cameras, SD Card, LTE Modem, and MDT-DATA-Y1		$1,351
Seon, MDT-HANDHELD-1-NODATA	Android Tablet, GPS, built-in Cameras, SD Card, LTE Modem, and MDM-Y1 - NO DATA		$1,216
Seon, MDT-DATA-Y1	250 MB/month Curiosity Cellular Data and MDM license, First year		$202
Seon, VNAV-VSBY1	"Safe Fleet Navigator software service per MDT tablet (per vehicle), 1st year of hosting, licensing and technical support - Driver Navigation * Receive assigned Routes & Runs * Map view * Visual and audible directions * Turn-by-turn driver directions *		$236
Seon, 020-1069	RAM Metal Mounting Arm Kit for MDT, includes screws to attach mount to vehicle and docking station.		$64
Seon, 060-1175	Accessory GPIO cable harness to connect MDT to accessories like Stop Arm or Lift sensors.		$66
Seon, INST-MDT	FEE,Installation,MDT Hardware		$221
Smart Reach Cellular-Live Stream & WiFi hotspot			
Seon, LVST-FLEET	Live Streaming VPN and fleet setup, 100 users including 1 admin (no existing Commander fleet)		$3,611
Seon, LVST-FLEET-ADDON	Live Streaming extension for existing Commander fleet		$1,062
Seon, LVST-USER	Live Streaming configuration of up to 10 additional users		$1,464
Seon, LVST-USERST	Live Streaming only. Video Server Installation and Setup for User of fleet. Provides lower priority access to streaming video from buses (Max 9 Users)		$2,160
Seon, LVST-ACT	Live Video Streaming Service, Activation, per vehicle, no data (includes service up to 1 year - until anniversary date)		$44
Seon, SRC-ROUTER-S-1	WIFI+GPS+Cellular for WIFI Download, GPS tracking, and Live Video Stream. Includes Harness, 6-in-one Dome Antenna - LTE T-Mobile Curiosity Data Plan		$1,507
Seon, SRC-ROUTER-1	All-in-one Smart Reach Router, - NO DATA PLAN - WIFI+GPS+Cellular for WIFI Download/Hotspot, GPS tracking, and Live Video Stream. Includes Harness, 6-in-one Dome Antenna - North America LTE - Customer DATA PLAN – No Hotspot technical support provided		$1,507
Seon, SRC-MODEM-S-1	RV50-X - Tmobile - SmartReach Cellular, Modem, RV50-X - LTE with Diversity antenna (GPS+Cellular) for GPS tracking and Live Video Stream connectivity - T-Mobile		$1,330
Seon, SRC-MODEM-1	RV50-X - LTE - SmartReach Cellular, Modem - LTE with Diversity antenna (GPS+Cellular) for GPS tracking and Live Video Stream connectivity - North America		$1,330
Seon, SRC-WIFIPANT-1	Smart Reach WIFI Padle Antenna for SRC-ROUTERs 2.4/5.0GHz Omni-directional		$18
Seon, SRC-ACADPT-3	AC Adaptor - 12 VDC - 10' - for SRC-ROUTER-2/SRC-ROUTER-3		$105
Seon, SRC-MTBRKT-3	Smart Reach Mount Bracket for SRC-ROUTER-2 and SRC-ROUTER-3		$105

Seon, SRH-R1T60G-Y1	Smart Reach HotSpot - Router, Content Filtering,Captive Portal, 60GB, T-Mobile, GPS Live Tracking, 1 year		$1,066
Seon, SRH-R0T60G-Y1	Smart Reach HotSpot - Content Filtering,Captive Portal, GPS Live tracking, 60GB, T-Mobile, GPS Live Tracking, 1 year - No router		$652
Seon, SRH-R1T60G-RY1	Smart Reach HotSpot - Router, Content Filtering,Captive Portal, 60GB, T-Mobile, Verizon-bkp, GPS Live Tracking Renew 1 year		$1,066
Seon, SRH-R1T60G-Y1	Smart Reach HotSpot - Router, Content Filtering,Captive Portal, 60GB, T-Mobile, Verizon-bkp, GPS Live Tracking Renew 1 year		$1,066
Seon, DATA-10G-TY1	Cellular Data,10GB Per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet		$216
Seon, DATA-25G-TY1	Cellular Data,60GB Per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet		$360
Seon, DATA-60G-TY1	Cellular Data,60GB Per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet		$792
Seon, DATA-100G-TY1	Cellular Data,100GB per Year,USA,CAN,1Year Per Vehicle / Can Be Pooled Over Fleet		$1,311
Safe Fleet Cloud Based Vehicle Inspections			$0
Seon, SETUP-OF-INSPECTION	FLEET,SF Vehicle Inspection Setup,Server Setup		$4,800
Seon, SETUP-OF-FORM	FLEET,Forms,Setup		$1,800
Seon, INSPECTION-LICENSE	FLEET,SF Vehicle Inspection License,Yearly,Per Vehicle		$260
Seon, FORM-LICENSE	FLEET,Forms,License,Yearly,Per Vehicle		$58
Seon, FORM-LICENSE-RY1	FLEET,Forms,License,Annual Renewal,Per Vehicle		$58
Seon, INSPECTION-LICENSE-RY1	FLEET,SF Vehicle Inspection License,Annual Renewal,Per Vehicle		$260
Seon, INSPECTION-LICENSE-RY2	FLEET,SF Vehicle Inspection License,2 yr Renewal Renewal,Per Vehicle		$504
Seon, INSPECTION-LICENSE-RY3	FLEET,SF Vehicle Inspection License,3 yr Renewal Renewal,Per Vehicle		$735
Seon, INSPECTION-LICENSE-RY4	FLEET,SF Vehicle Inspection License,4 yr Renewal Renewal,Per Veh		$864
Seon, MDT-MOUNTED-1-DATA	Android Tablet, Docking Station, GPS, built-in Cameras, SD Card, LTE Modem, and MDT-DATA-Y1		$958
Seon, MDT-HANDHELD-1-NODATA	Android Tablet, GPS, built-in Cameras, SD Card, LTE Modem, and MDM-Y1 - NO DATA		$824
Seon, VLP-ACT	VLP-ACTV		$50
Preventavie Maintenance Program			
Seon, PMP-ANNL-A	Preventative Maintenance Program - Annual Fleet Inspection - Per Vehicle - Paid Annually		$303
Seon, PMP-SEMA-A	Preventative Maintenance Program - Semi Annual Fleet Inspection - Per Vehicle - Paid Annually		$605
Seon, PMP-QTR-A	Preventative Maintenance Program - Quarterly Fleet Inspecion - Per Vehicle - Paid Annually		$1,210
vMax Plus System Health Status			
Seon, VMP-DOCPAC	vMax Pulse Document Package (includes installation, setup and user guides)		$30
Seon, VMP1YR	vMax Pulse Single vehicle Software License, 1 year (includes Sender hardware)		$132
Seon, VMP2YR	vMax Pulse Single vehicle Software License, 2 year (includes Sender hardware)		$202
Seon, VMP3YR	vMax Pulse Single vehicle Software License, 3 year (includes Sender hardware)		$238
Seon, VMPACTV	vMax Pulse Receiver activation (includes Receiver hardware)		$660
Seon, INST-VMP-C	vMax Pulse Receiver indoor installation (per receiver)		$300
Seon, INST-VMP-S	vMax Pulse Sender installation (per vehicle)		$120
Seon, VMPCBLKT	vMax Pulse, spare cabling for Sender		$36
Seon, VMPCPS	vMax Pulse, spare power supply for Receiver		$30
Seon, VMPCTL	vMax Pulse, spare Receiver and adapter power supply		$594
Seon, VMPSNSR	vMax Pulse, spare Sender and cabling		$132
Seon, INST-VMP-C	vMax Pulse Receiver indoor installation (per receiver)		$300

Seon, INST-VMP-S	vMax Pulse Sender installation (per vehicle)		$120
Spare Hard Drives-SSD Drives & SD Cards			
Seon, TH-HK500G	H Series Storage Cartridge for compatible recorders, includes 500GB HDD and Protective Carry Case		$192
Seon, TH-HK1T0	TH Series Storage Cartridge for compatible recorders, includes 1TB HDD and Protective Carry Case		$312
Seon, TH-HK2T0	H Series Storage Cartridge for compatible recorders, includes 2TB HDD and Protective Carry Case		$432
Seon, TH8-HK1T0	H Series Double-Wide Storage Cartridge for compatible recorders, includes Single 1TB HDD and Protective Carry Case		$332
Seon, TH8-HK2T0	H Series Double-Wide Storage Cartridge for compatible recorders, includes Single 2TB HDD and Protective Carry Case		$460
Seon, TH8-HK2T0-2HDD	H Series Double-Wide Storage Cartridge for compatible recorders, includes Dual 1TB HDD (2TB Total) and Protective Carry Case		$446
Seon, TH8-HK4T0-2HDD	H Series Double-Wide Storage Cartridge for compatible recorders, includes Dual 2TB HDD (4TB Total) and Protective Carry Case		$578
Seon, TH-SK1T0	Trooper TH4 and TH6 media cartridge kit, with 1TB SSD 2.5 in		$716
Seon, TH-SK500G	Trooper TH4 and TH6 media cartridge kit, with 500GB SSD 2.5 in		$527
Seon, TH-SK2T0	Trooper TH4 and TH6 nedia cartridge kit, with 2TB SSD 2.5 in		$1,356
Seon, TH8-SK1T0	TH8 Media Cartridge Kit, 1TB Single SSD		$785
Seon, TH8-SK2T0	TH8 Media Cartridge Kit, 2TB Single SSD		$1,689
Seon, TH8-SK2T0-2SSD	TH8 Media Cartridge Kit, 2TB (2x1TB) Dual SSD		$1,632
Seon, TH8-SK4T0-2SSD	TH8 Media Cartridge Kit, 4TB (2x2TB) Dual SSD		$2,915
Seon, SDCARD32	32GB SD Card for use with compatible recorders		$60
Seon, SDCARD64	64GB SD Card for use with compatible recorders		$72
Seon, SDCARD128	128GB SD Card for use with compatible recorders		$108
Seon, SDCARD256	256GB SD Card for use with compatible recorders		$332
Seon, SDCARD512	512GB SD Card for use with compatible recorders		$653
Seon, SDCARD1T	1TB SD Card for use with compatible recorders		$794
Misc & Spare Harnesses, Hardware & Parts			
Seon, PH1X3UM20	Power harness 14 AWG 20 ft., 20A and 1A fuses, fuse holders, butt splices, mounting hardware - for HX, NX and TH8 DVRs		$75
Seon, PH2X2MFJR	Power harness 16 AWG 20 ft., 10A and 1A fuses, fuse holders, butt splices, mounting hardware - for MX, TL, TL-HD, TH4, TH4C and TH6 DVRs		$62
Seon, HDIA20	Diagnostic indicator/alarm button 5 ft. with 20 ft. extension (for Plus Systems for use with Smart-Link module or TL) - for MX, TL, Rogue, EX4 - replaces 020-0065		$58
Seon, WT1	Adapter harness for TL and TH (signals, diagnostic indicator/ alarm button, speed) - replaces 060-0565		$52
Seon, HEHD10	ASSY, CBL, HD, 2X3Micro-Fit M-M, 10ft		$29
Seon, HEHD15	ASSY, CBL, HD, 2X3Micro-Fit M-M, 4.57mt (15ft)		$29
Seon, HEHD20	ASSY, CBL, HD, 2X3Micro-Fit M-M, 20ft for AHD Wedge and Dome Cameras		$24
Seon, HEHD50	ASSY, CBL, HD, 2X3Micro-Fit M-M, 50ft for AHD Wedge and Dome Cameras		$54
Seon, KS	DVR key set: lock box key, media cartridge/ hard drive lock key		$12
Seon, SSL-ENGL	LBL, Seon Safety Label, SSL, ENGL - replaces 690-0130		$2
Seon, SSL-ENSP	LBL, Seon Safety Label, SSL, ENSP, Bilingual English Spanish Lbl		$2

Seon, 085-0046	A/V cable (RCA to BNC) for 5.6" LMK LCD monitor		$6
Seon, 085-0050	Power with switch cable for LMK LCD monitor		$6
Seon, 085-0051	Power supply for 5.6" LMK LCD monitor		$21
Seon, LMK	LCD monitor, 5.6 inch, AC charger, battery pack - replaces 020-0073		$300
Seon, BP	Bench-test power adapter to power MX, TL, TL-HD, TH4, TH4C and TH6 DVRs.		$144
Seon, TH-LBF	TH4/TH6 front lock cover		$60
Seon, TH-LBR	TH4/TH6 rear cable shroud		$48
Seon, TH8-MPV	TH8 Series Double-Wide Vibration Mounting Plate, for compatible hardware (Item included in TH-LBFRV)		$99
Seon, TH8-LBF	TH8 Series Double-Wide Front Door, Locking, Key, for compatible hardware (Item included in TH-LBFRV)		$77
Seon, TH8-LBR	TH8 Series Double-Wide Rear Connector Shroud, Metal, for compatible hardware (Item included in TH-LBFRV)		$69
HDD Docks & Viewing Software			
Seon, HDD-DOCK3	HDD USB docking station. Works with TH4/TH6/TH8/TL/MX/TX/DX/HX/NX		$234
Seon, HDD3-STB	Software kit Includes: vMax View Software, Handheld mouse, HDD-DOCK3 USB Docking Station, Note: Only one required per fleet		$338
Seon, HDD3USBKIT	Software kit includes: vMax View software and HDD-DOCK3 USB Docking Station. Only one required per fleet.		$215
Seon, HDD3-STB-LMK	Software kit Includes: vMax View Software, Handheld mouse, 5.6 inch monitor, HDD-DOCK3 USB Docking Station, BNC F-RCA adapter		$632
Seon, VMAX-VIEW	vMax View Software to easily view and archive video: search for video by alarm, date/time, or GPS location. Includes the ability to zoom into the video and the SmartBlur feature to blur faces when making video archives.		$150
Seon, EMRED-RY1	Annual Service Fee for Evidence Manager Redaction license		$834
Synovia			
Synovia, FLSTC GPS	Synovia Core GPS Hardware Kit for ATT/Verizon		$803
Synovia, FLSTC ENGD	JPOD		$323
Synovia, FLSTC OP	Operator Panel and Kit		$386
Synovia, FLSTC CT	Color Tablet and Kit (Tethered 7 P)		$843
Synovia, FLSTC BCR	Barcode Reader Kit (laser scan)		$536
Synovia, FLSTC SLSGPS	Synovia Silverlining GPS Fleet Management Software - Annual License		$270
Synovia, FLSTC SLSEGS	Synovia Silverlining Engine Diagnostics Software - Annual License		$54
Service agreements and communications subscriptions for Synovia equipment sold seperately.			
Zonar			
Zonar, V4201-H	V4 TCU Kit, Includes Wiring and brackets		$391
Zonar, C-MOB001-H	Connect Tablet Kit, Includes tablet, cable and mount		$862
Zonar, E-MOB003-H	Samsung Galaxy Tab Active2 Kit, Includes tablet, cables and mount		$862
Zonar,ZPASS001-H	Z pass Kit, RFID reader for student cards- Zpass service required		$240
Zonar, 20123	Zonar Coach Camera		$211

Zonar, EVIR002-H	2010 EVIR Handheld device for Electornic Vehicle Inspection		$290
Zonar, 20007	Driver/Operator RFID card, per card		$81
Zonar, 30034	Student RFID card, per card		$5
Service agreements and communications subscriptions for Zonar equipment sold seperately.			
IC Bus			
OCC Telematics	OCC Telematics hard wired , Includes user application, activation, and 2 yr service,		$639
OCC Telematics	OCC Telematics Plug in installation , Includes Telematics device Y cable, user application, activation, and 2 yr service,		$703
USB Charge Ports	2 USB charge ports under seat rail at each passenge seat, price per row LH & RH, min 2 rows		$690
Kajeet SmartBus WiFi 12 month	Kajeet Onboard WiFi Solution, includes router, ext antenna, activation and 12 months service		$2,307
Kajeet SmartBus WiFi 24 month	Kajeet Onboard WiFi Solution, includes router, ext antenna, activation and 24 months service		$2,853
Kajeet SmartBus WiFi 60 month	Kajeet Onboard WiFi Solution, includes router, ext antenna, activation and 60 months service		$4,520
270 Camera Mirror Monitor	Rosco Safe-T-Scope 270 degree Mor-Vision w-7in Mirror monitor, lever-lock		$2,345
270 Camera SA Monitor	Rosco Safe-T-Scope 270 degree Mor-Vision w-7in stand alone monitor		$2,001
Backup Cam Mirror Monitor	Rosco backup camera w-7in mirror monitor in 6x30 mirror		$1,174
Backup Cam SA Monitor	Rosco backup camera w-7in standalone monitor		$741

BIDDERS NOTES	
Warranty Credit Option	This credit removes the specification required extended warranties and provides a
	base warranty. 7 Year Unlimited Mileage Transmission Warranty (2500PTS), Cummins
	5 YR/100,000 Mile engine warranty, 5 YR paint warranty (adhesion), 5 YR/100,000 Mile
	chassis frame, body shell, school bus seat/barrier frame defects in structural integrity,
	4 YR/50,000 Miles coverage on front and rear axle assemblies. 2 YR coverage on
	school bus passenger and driver windows. 2 YR coverage on paint gloss and color
	retention. 2 YR/24,000 Miles coverage on suspension and driveshaft. All other items
	not listed subject to 12 Months/12,000 Miles coverage. Ford Gas/LPG engines/trans-
	missions provide a 5 YR/Unlimited Mileage warranty as STD.
Blue Bird EV bus details:	Cummins PowerDrive 7000, TM4 SUMO
	155 kWh Li-ION NMC/G Cell batteries
	Standard CCS1 connector with AC and DC fast charging capabilities.
	-Level 2 charging in approximately 8 hours
	-DCFC in approximately 3 hours.
	Up to 120 miles per charge.
	Technical specifications subject to change, please consult with FTS
	for EVSE options and feature compatibility.
Micro Bird EV bus details:	TM4 Electric Motor 214/207
	88 kWh Lithium Ion (NMC) batteries.
	Standard CCS1 Connector with AC and DC fast charging capabilities.
	-Level 2 charging in approximately 6.5 hours
	-DCFC in approximately 3 hours
	Up to 100 miles per charge
	Technical specifications subject to change, please consult with FTS
	for EVSE options and feature compatibility.

BIDDERS NOTES

B7b: IMMI Child Safety Seat

IMMI ICS Seating options will reduce the seating cap. in some configurations due to seat spacing and ISO latch spacing requirements

B18: Underseat Heater Options

Heater's location and size (40,000 BTU rear wall mount) may be the only possible location for the rear heater

B21: Drivers Seat with Integrated Seatbelt

This may reduce the passenger capacity due to spacing requirements

C4: 100 Gallon Fuel Tank

May require options C10 (Air Ride Suspension) on some Type C configurations. 100 gallon tank may affect availability of pass thru luggage on some rear engine models. Please consult dealer. Only Available on 65-77 passenger units

Cummins EXC Warranty includes complete engine coverage including EGR components and turbo injectors.

ISO - first 3 rows are standard. Additional ISO latch seats may reduce the capacity. Please consult dealer.

RIFLED AIR CONDITIONING SYSTEM INFO

The following systems come with a 5 year limited warranty w/unlimited mileage and 270 amp alternator. Not available on Propane or Electric.

RAC-BH1141	System A
RAC-BH1122	System B

The following systems come with a 6 year limited warranty w/unlimited mileage and 270 amp alternator. Not available on Propane or Electric.

RAC-BH2241	System A
RAC-BH2233	System B

For a tie in dash AC System on C2 29-77 passenger, there is no deduct in price and has a 5 year STD warranty. BTU Rating 120,000

TM43 compressor may not be available on Detroit DD5, DD8 or CNG. Contact MBA Sales Coordinator for availability. Not available on propane engines.

The following systems come with a 5 year warranty from Transarctic. Not available on CNG, Detroit or Propane Engines.

Transarctic C240	System A - Dual QP25 Compressors

PSI 8.8L LPG 270HP 565LB/FT, Propane Engine comes with a 270 Amp Alternator and MCC Air Conditioning on Type C buses.

S.T.A.R.S. Information

Price is per position. Please consult with dealer on configurations.

DD5 Engine HP and Torque Info Per Configuration:	**Cummins B6.7N HP and Torque Info per Configuration**
65 - 71 Passenger Units have 220HP/660 lb ft	71 Passenger units have 220HP/520 lb ft
77 Passenger Units have 240HP/660 lb ft	77 Passenger Units have 240HP/560 lb ft

BIDDERS NOTES				
Detroit Diesel Extended Warranty Information:				
EW1	Air Inlet Manifold	Cylinder Liner	Main Bearing Bolts	Valves (exhaust, intake)
	Air Intake Throttle Valve	EGR System	Main Bearings	Valve Springs, Guides, Inserts

Sourcewell

Solicitation Number: RFP #063020

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and Blue Bird Body Company, 3920 Arkwright Road Suite 200, Macon, GA 31210 (Vendor).

Sourcewell is a State of Minnesota local government agency and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada.

Vendor desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities). Participating Entities will purchase Vendor's equipment, products, or services through an authorized independent dealer of Vendor's products ("Participating Dealer") who will sell to Participating Entities in accordance with this Contract and such additional terms and conditions as may be negotiated between the Participating Entities and the Participating Dealers (such terms and conditions may not be less favorable to the Participating Entity than this Contract and Vendor's Proposal).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires August 15, 2024, unless it is cancelled sooner pursuant to Article 24. This Contract may be extended up to one additional one-year period upon request of Sourcewell and with written agreement by Vendor.

C. SURVIVAL OF TERMS. Articles 11 through 16 survive the expiration or cancellation of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Vendor's products and services will only be sold to Participating Entities by and through Participating Dealers. Participating Dealers will provide

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above. Vendor's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new/current model. Participating Dealers may offer close-out or refurbished Equipment or Products if they are clearly indicated in Participating Dealer's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site by the Participating Dealer.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Vendor warrants its products to be free from defects in material and workmanship under normal use and service within the limits described in the Standard Warranty statement provided in the Request for Proposal ("RFP"). Participating Dealers must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer of the product or component. Any manufacturer's warranty that is effective past the expiration of the Vendor's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution, Vendor will make available to Sourcewell a means to validate or authenticate Vendor's authorized dealers, distributors, and/or resellers relative to the Equipment, Products, and Services related to this Contract. This list may be updated from time-to-time and is incorporated into this Contract by reference. It is the Vendor's responsibility to ensure Sourcewell receives the most current version of this list and it is understood that Products and Services under this Contract may be purchased only from and through Participating Dealers, and that Participating Entities will submit orders under this contract only to Participating Dealers.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced as stated in Vendor's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location. Shipping costs and sales tax will be determined between Participating Entities and Participating Dealers and will be included in any pricing quote provided by a Participating Dealer.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. DELIVERY AND INSPECTION. Participating Entities and Participating Dealers will determine the time, mode, and location for delivery and inspection of purchased Equipment and Products. The handling of any damage or defects noted by the Participating Entity either during or after the vehicle is delivered to the Participating Entity is the responsibility of the Participating Dealer. Any policy as it relates to returns and return shipping will be determined between the Participating Entity and the Participating Dealer. Regardless of any other agreement, the Vendor does not accept any returns of school buses.

The Participating Dealer has the responsibility to ensure that all Equipment, Products and Services sold under this Contract meet the Participating Entities specifications and/or specifications set by state and local governing bodies, or that exceptions to these specifications have been agreed upon in writing between the Participating Entity and the Participating Dealer. Sourcewell may declare the Vendor in breach of this Contract if the Vendor intentionally delivers substandard or inferior Equipment or Products to its Participating Dealers, who in turn provide the substandard or inferior Equipment or Products to Participating Entities in the same condition provided to it by Vendor.

B. SALES TAX. Each Participating Entity is responsible for supplying the Participating Dealer with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity. Pricing provided in Vendor's Proposal does not include sales tax.

C. HOT LIST PRICING. At any time during this Contract, Participating Dealers may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When a Participating Dealer determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell by Vendor in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities. Discounts greater than those listed in the Contract may be available for quantity buys, off-peak season buys, or quotes that exceed base option content listed in the contract pricing. Any such discount will be offered by Participating Dealers on a case-by-case basis.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

4. PRODUCT AND PRICING CHANGE REQUESTS

Vendor may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Contract Administrator. This form is available from the assigned Sourcewell Contract Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

A fully executed Sourcewell Price and Product Request Form will become an amendment to this Contract and be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract through Participating Dealers. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Vendor understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Vendor is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES.Participating Dealer's employees may be required to perform work at government-owned facilities, including schools.Participating Dealer's employees and agents

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to the Participating Dealer that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell, Vendor and Participating Dealers. Typically, a Participating Entity will issue an order directly to the Participating Dealer. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration of this Contract; however, Vendor or Participating Dealer performance, Participating Entity payment, and any applicable warranty periods or other Vendor, Participating Dealer, or Participating Entity obligations may extend beyond the term of this Contract.

Acceptable forms of payment will be determined between Participating Dealer and Participating Entity. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order may be negotiated between a Participating Entity, Participating Dealer and Vendor, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entitles may require the use of a Participating Addendum; the terms of which will be worked out directly between the Participating Entity, Participating Dealer and the Vendor. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. PERFORMANCE BOND. If requested by a Participating Entity, Participating Dealer will provide a performance bond that meets the requirements set forth in the Participating Entity's order. Vendor bears no liability for the Participating Dealer's performance bond and/or its decision to provide a performance bond.

D. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements) not addressed in this Contract, the Participating Entity and the Participating Dealer may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, Vendor, including their agents and employees, will not be made a party to a claim for breach of such agreement.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

E. TERMINATION OF ORDERS. Participating Entities and Participating Dealers may enter into a mutual agreement regarding the circumstances under which an order may be terminated.

F. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Vendor will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

B. BUSINESS REVIEWS. Vendor must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities by Participating Dealers, pricing and contract terms, administrative fees, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Vendor must provide a contract sales activity report (Report) to the Sourcewell Contract Administrator assigned to this Contract. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Vendor must submit a report indicating no sales were made).

The Report must contain the following fields:

- Customer Name (e.g., City of Staples Highway Department);
- Customer Physical Street Address;
- Customer City;
- Customer State/Province;
- Customer Zip Code;
- Customer Contact Name;
- Customer Contact Email Address;
- Customer Contact Telephone Number;
- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Vendor.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Vendor will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities by Participating Dealers. The Administrative Fee must be included in, and not added to, the pricing. Vendor or Participating Dealers may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Vendor will submit a check payable to Sourcewell for the administrative fee stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Sourcewell-assigned contract number in the memo and must be mailed to the address above "Attn: Accounts Receivable." Payments must be received no later than 45 calendar days after the end of each calendar quarter.

Vendor agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Vendor is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Vendor in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Vendor's Authorized Representative is the person named in the Vendor's Proposal. If Vendor's Authorized Representative changes at any time during this Contract, Vendor must promptly notify Sourcewell in writing.

10. ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. ASSIGNMENT. Neither the Vendor nor Sourcewell may assign or transfer any rights or obligations under this Contract without the prior consent of the other and a fully executed assignment agreement. Such consent will not be unreasonably withheld.

B. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been fully executed by Sourcewell and Vendor.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

C. WAIVER. If either Sourcewell or Vendor fails to enforce any provision of this Contract, that failure does not waive the provision or the right to enforce it.

D. CONTRACT COMPLETE. This Contract (including all attachments and amendments) contains all negotiations and agreements between Sourcewell and Vendor. No other understanding regarding this Contract, whether written or oral, may be used to bind either party.

E. RELATIONSHIP OF THE PARTIES. The relationship of Sourcewell and Vendor is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. LIABILITY

Vendor must indemnify, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees, arising out of any manufacturing or design defect that existed when the Product leftVendor's possession; this indemnification includes injury or death to person(s) or property alleged to have been caused by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications and to the extent the manufacturing or design defect existed when the Equipment or Product left Vendor's possession.

12. AUDITS

Sourcewell reserves the right to review the books, records, documents, and accounting procedures and practices of the Vendor relevant to this Contract for a minimum of 6 years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

13. GOVERNMENT DATA PRACTICES

Vendor and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell under this Contract and as it applies to all data created, collected, received, stored, used, maintained, or disseminated by the Vendor under this Contract.

If the Vendor receives a request to release the data referred to in this article, the Vendor must immediately notify Sourcewell and Sourcewell will assist with how the Vendor should respond to the request.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

14. INDEMNIFICATION

As applicable, Vendor agrees to indemnify and hold harmless Sourcewell and its Participating Entities against any and all suits, claims, judgments, and costs instituted or recovered against Sourcewell or Participating Entities by any person on account of the use of any Equipment or Products by Sourcewell or its Participating Entities supplied by Vendor in violation of applicable patent or copyright laws.

15. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:

   a. Sourcewell grants to Vendor a royalty-free, worldwide, non-exclusive right and license to use theTrademark(s) provided to Vendor by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Vendor.

   b. Vendor grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Vendor's Trademarks in advertising and promotional materials for the purpose of marketing Vendor's relationship with Sourcewell.

2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to its and their respective distributors, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and promotional materials for the purpose of marketing Sourcewell and Vendor's relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.

3. *Use; Quality Control.*

   a. Sourcewell must not alter Vendor's Trademarks from the form provided by Vendor and must comply with Vendor's removal requests as to specific uses of its trademarks or logos.

   b. Vendor must not alter Sourcewell's Trademarks from the form provided by Sourcewell and must comply with Sourcewell's removal requests as to specific uses of its trademarks or logos.

   c. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's Trademarks only in good faith and in a dignified manner consistent with such party's use of the Trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

   d. Any use of Sourcewell's Intellectual Property by Participating Dealers as described herein must be negotiated between the Participating Dealer and Sourcewell. Vendor bears no responsibility for the act or failure to act of Participating Dealers with respect to Sourcewell's Intellectual Property.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

4. *Termination*. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of vendors which may be used until the next printing). Vendor must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Vendor individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Materials should be sent to the Sourcewell Contract Administrator assigned to this Contract.

D. ENDORSEMENT. The Vendor must not claim that Sourcewell endorses its Equipment, Products, or Services.

16. GOVERNING LAW, JURISDICTION, AND VENUE

Minnesota law governs this Contract. Venue for all legal proceedings out of this Contract, or its breach, must be in the appropriate state court in Todd County or federal court in Fergus Falls, Minnesota.

17. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

18. SEVERABILITY

If any provision of this Contract is found to be illegal, unenforceable, or void then both Sourcewell and Vendor will be relieved of all obligations arising under such provisions. If the remainder of this Contract is capable of performance, it will not be affected by such declaration or finding and must be fully performed.

19. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, Sourcewell and Vendor will monitor performance and address unresolved contract issues as follows:

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

1. *Notification.* Sourcewell and Vendor must promptly notify each other of any known dispute with the terms or performance of this Contract and work in good faith to resolve such dispute between Sourcewell and Vendor within a reasonable period of time. If necessary, Sourcewell and the Vendor will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If Sourcewell and Vendor are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Vendor may escalate the resolution of the issue to a higher level of management. The Vendor will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Vendor must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Vendor fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed will be borne by the Vendor.
4. *Participating* Dealer. The provisions of this section apply only to Sourcewell and Vendor. Any dispute between any Participating Entity and any Participating Dealer must be resolved between the Participating Entity and the Participating Dealer. Vendor shall not be held liable for a Participating Dealer's failure to perform in accordance with a Purchase Order or other directive from a Participating Entity.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

Written notice of default and a reasonable opportunity to cure must be issued by the party claiming default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

20. INSURANCE

A. REQUIREMENTS. At its own expense, Vendor must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

1. *Workers' Compensation and Employer's Liability.*

Workers' Compensation: As required by any applicable law or regulation.

Employer's Liability Insurance: must be provided in amounts not less than listed below:

Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Vendor will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.

Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for Products-Completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Vendor will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.

Minimum Limits:
$1,000,000 each accident, combined single limit

4. *Umbrella Insurance*. During the term of this Contract, Vendor will maintain umbrella coverage over Workers' Compensation, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

Failure of Vendor to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Vendor must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Contract Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf.

Failure to request certificates of insurance by Sourcewell, or failure of Vendor to provide certificates of insurance, in no way limits or relieves Vendor of its duties and responsibilities in this Contract.

C. Intentionally Omitted.

D. Intentionally Omitted.

E. UMBRELLA/EXCESS LIABILITY. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies), or self-insured retention.

21. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Vendor must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Vendor conducts with Sourcewell and Participating Entities.

22. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Vendor certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Vendor declares bankruptcy, Vendor must immediately notify Sourcewell in writing.

Vendor certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Vendor further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

23. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Participating Entities that use United States federal grant or FEMA funds to purchase goods or services from this Contract may be subject to additional requirements including the procurement standards of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 C.F.R. § 200. Participating Entities may also require additional requirements of Participating Dealers based on specific funding specifications. Participating Entities will work with Participating Dealers if additional specific funding specifications are required. Within this Article, all references to "federal" should be interpreted to mean the United States federal government. The following list only applies when a Participating Entity accesses Vendor's Equipment, Products, or Services sold through and by Participating Dealers with United States federal funds. Participating Entities will ensure that Participating Dealers are in compliance with the following provisions, when applicable, and it is not Vendor's responsibility to ensure that Participating Dealers are in compliance with any such provision.

A. EQUAL EMPLOYMENT OPPORTUNITY. Except as otherwise provided under 41 C.F.R. § 60, all contracts that meet the definition of "federally assisted construction contract" in 41 C.F.R. § 60-1.3 must include the equal opportunity clause provided under 41 C.F.R. §60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 C.F.R. §, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 C.F.R. § 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor." The equal opportunity clause is incorporated herein by reference.

B. DAVIS-BACON ACT, AS AMENDED (40 U.S.C. § 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. § 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 C.F.R. § 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 C.F.R. § 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency. Vendor must be in compliance with all applicable Davis-Bacon Act provisions.

C. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. § 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations (29 C.F.R. § 5). Under 40 U.S.C. § 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence. This provision is hereby incorporated by reference into this Contract. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

D. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT. If the federal award meets the definition of “funding agreement” under 37 C.F.R. § 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that “funding agreement,” the recipient or subrecipient must comply with the requirements of 37 C.F.R. § 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements,” and any implementing regulations issued by the awarding agency. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

E. CLEAN AIR ACT (42 U.S.C. § 7401-7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. § 1251-1387). Contracts and subgrants of amounts in excess of $150,000 require the non-federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. § 7401- 7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. § 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Vendor certifies that during the term of this Contract will comply with applicable requirements as referenced above.

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

F. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689). A contract award (see 2 C.F.R. § 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 C.F.R. §180 that implement Executive Orders 12549 (3 C.F.R. § 1986 Comp., p. 189) and 12689 (3 C.F.R. § 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. Vendor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency.

G. BYRD ANTI-LOBBYING AMENDMENT, AS AMENDED (31 U.S.C. § 1352). Vendors must file any required certifications. Vendors must not have used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Vendors must disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the non-federal award. Vendors must file all certifications and disclosures required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352).

H. RECORD RETENTION REQUIREMENTS. To the extent applicable, Vendor must comply with the record retention requirements detailed in 2 C.F.R. § 200.333. The Vendor further certifies that it will retain all records as required by 2 C.F.R. § 200.333 for a period of 3 years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

I. ENERGY POLICY AND CONSERVATION ACT COMPLIANCE. To the extent applicable, Vendor must comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

J. BUY AMERICAN PROVISIONS COMPLIANCE. To the extent applicable, Vendor must comply with all applicable provisions of the Buy American Act. Purchases made in accordance with the Buy American Act must follow the applicable procurement rules calling for free and open competition.

K. ACCESS TO RECORDS (2 C.F.R. § 200.336). Vendor agrees that duly authorized representatives of a federal agency must have access to any books, documents, papers and records of Vendor that are directly pertinent to Vendor's discharge of its obligations under this Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right

DocuSign Envelope ID: 93D712A2-F53B-4A0A-8357-193CC7E9C0BE

also includes timely and reasonable access to Vendor's personnel for the purpose of interview and discussion relating to such documents.

L. PROCUREMENT OF RECOVERED MATERIALS (2 C.F.R. § 200.322). A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. § 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

24. CANCELLATION

Sourcewell or Vendor may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Vendor's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	

7	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	Blue Bird Corporation has been servicing the school and activity bus industry since 1927. The company was founded by George Luce and his goal for the first bus designed and built was to "build a better bus" and we hold that focus still today. The Luce family managed and operated the business until the early 90's. Since that time, Blue Bird has gone through three ownership changes that were either private equity or a combination of private equity and public ownership as a division of Henly's Group and traded on the London Exchange. In February of 2015, Blue Bird filed an initial public offering on NASDAQ and is publicly traded under the symbol BLBD. We come to work every day with one common goal, to design, build, sell and service the world's finest school bus. That's what we do - no distractions, no competing priorities. We are heirs to a rich legacy, one of listening to our customers, embracing their needs, and delivering innovations that lead the market. We commit ourselves to four driving priorities - safety, quality, durability, and serviceability. We embody the interests of every child that rides us, every driver that drives us, every service technician that services us and every district that buys us. More than a business, this work is our heritage, and we have been at it since 1927 - that's purpose driven. We are singularly focused on building and selling school buses that customers want and value. The safety of schoolchildren is at the center of all that we do and we will strive every day, just as we have since our beginning in 1927, to provide an unparalleled and affordable product in terms of safety, quality, durability, and serviceability. We will be easy to do business with, responsive to our customers' wants and needs, and provide prompt after-sale support in parts and service through a professional, high-qualified distribution network. Customer satisfaction is our top priority.	*
8	What are your company's expectations in the event of an award?	To make bus purchases easier for school districts Nationwide and bring value from this RFP to participating entities. We will promote this contract as described in our marketing plan and will strive to increase awareness of the Sourcewell contract, grow dealer participation, and increase sales through the use of the contract.	*
9	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	Our 2019 Annual Report has been provided in the document upload section to support the below financial summary. We ended the decade with our best financial performance in more than ten years and are positioned well for future growth. Our fiscal 2019 adjusted EBITDA of $82 million was 17% above last year and our net sales revenue exceeded $1 billion for the second consecutive year, setting an all-time record for Blue Bird. We sold more than 11,000 buses for the second year in a row and we grew our alternative-fuel bus sales by more than 20% in a strong, but flat industry.	*
10	What is your US market share for the solutions that you are proposing?	Our 2019 fiscal year end US market share for school and activity buses is 33.1%	*
11	What is your Canadian market share for the solutions that you are proposing?	Our 2019 fiscal year end Canadian market share for school and activity buses is 15.8%	*
12	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	In January 2006, Blue Bird filed for Chapter 11 bankruptcy. This was a pre-packaged court filing to strengthen our balance sheet through a debt-for-equity conversion plan. The restructuring of our debt provided for a full recovery to the company's general unsecured creditors.	*

13	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	b) Blue Bird is a manufacturer of school buses. In fiscal 2019, we sold approximately 90% of our vehicles through our United States and Canadian dealer network, currently consisting of 47 dealers that, in their territories, are exclusive to us with Type C and D school buses. School buses sold in the United States and Canada through our dealer network are purchased by school districts and private schools, as well as small and medium size contractors that provide services to school districts on a fee basis. Dealers develop collaborative relationships with school districts, district transportation directors, and key officials in their states. * Blue Bird has a long history of going to market with the best dealer network in the industry. Although Blue Bird is involved with the customer experience included but not limited to sales, service, and support, the dealers have the day to day responsibility and relationship. The dealer network is a third party and independent businesses with a contractual obligation to Blue Bird and vice versa.

14	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	Our products must satisfy various legal, environmental, health and safety requirements at federal, state and municipal levels. At the federal level, “FMVSS,” or Federal Motor Vehicle Safety Standards, govern the safety of all motor vehicles sold for use in the United States. More than half of the FMVSS regulations apply to school buses. For example, federal regulations require school buses to be painted “school bus yellow” and to be equipped with specific warning and safety devices. School buses are also built with the body on top of chassis frame rails. This so-called “high floor” construction moves the passenger compartment above the typical automotive “crash zone” and therefore provides an added measure of safety should a collision occur. Steel rollover cages and heavy duty bumpers are designed to provide incremental protection, in contrast with standard transit buses with “low floor” construction that offer lower curb height access with limited or no steel reinforcement. All completed vehicles manufactured by Blue Bird Body Company for use in the United States are manufactured in full compliance with all applicable U. S. Federal Motor Vehicle Safety Standards (FMVSS) in effect at the time of manufacture completion. Per U.S. Code of Federal Regulations Title 49, Subtitle B, Chapter V, Part 567 Certification, the U. S. National Highway Traffic Safety Administration (NHTSA) requires that each vehicle manufacturer self-certify their vehicles to be in full compliance with all applicable FMVSS as evidenced by the presence of the compliance label which must comply with their (NHTSA) content requirements. An FMVSS compliance letter is provided in the document upload section. After a school bus is sold, regulation of the operation of the school bus becomes the responsibility of the state in which it operates. Today, each state has its own rules and regulations pertaining to the manufacture, design, operation and safety of the school buses operated in their jurisdictions. As a result, we cannot manufacture to a single set of specifications, but rather must assure that each manufactured bus conforms to the specifications of the particular jurisdiction in which it will be operated. Blue Bird is licensed in each state we operate as required by state law and each dealer holds the normal business licenses and motor vehicle dealer license from their respective State(s) as required. Many of our dealers are also licensed service and warranty repair locations for major suppliers such as Caterpillar, Cummins, Allison, and Ford. These businesses are bonded and insured. We must also consider the rules and regulations of foreign jurisdictions. In Canada, where our Micro Bird joint venture operates, school buses are governed by the Canadian Motor Vehicle Safety Regulations. These regulations are patterned after the FMVSS regulations, although differences do exist between the two regulatory systems.	*
15	Provide all “Suspension or Debarment” information that has applied to your organization during the past ten years.	This has not applied to our company	*

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *	

16	Describe any relevant industry awards or recognition that your company has received in the past five years	Blue Bird has a reputation for safety, product quality/reliability/durability, and drivability: Our longevity and reputation in the school bus industry have made us an iconic American brand. We are the only principal manufacturer with chassis and body production specifically designed for school bus applications and the only school bus company to offer compliance with industry recognized safety tests-Altoona Testing, Colorado Rack Test and the Kentucky Pole Test-as a standard specification across our entire product line. Alternative fuel leadership: We are the market leader in propane, gasoline, and CNG fuel powered-buses, having sold approximately eight times more alternative fuel school buses than all of our competitors combined from fiscal 2010 through fiscal 2019. In fiscal 2019 we sold 5,343 propane, gasoline, CNG, and electric powered buses, an increase of 20.7% versus the prior year. Innovative product leadership: We have consistently led the school bus industry with innovative product leadership through several industry firsts, including the first Type D CNG school bus, the first unique school bus chassis, and the first OEM-manufactured propane bus. In fiscal 2016, years ahead of our competition, we launched the industry's first gasoline powered Type C bus (utilizing an exclusive Ford and Roush CleanTech powertrain), and we were first-to-market with Electronic Stability Control. Also in 2016, we launched a new CNG product using a Ford engine and transmission and a Roush Clean Tech fuel delivery system to provide CNG in a Type C bus. In fiscal 2018, we sold our first Type D electric vehicles and in fiscal 2019 we introduced our Type C electric vehicle. Strong distribution model. We have built an extensive, experienced network of 47 dealers to distribute our buses across the United States and Canada, and during recent years have significantly enhanced our relationships with large fleet operators. Our dealers have an average tenure of more than 29 years with us and do not sell competing Type C or Type D school bus products in the areas assigned to them by us. Highly-skilled and committed workforce: We benefit from a highly-skilled, committed hourly workforce of approximately 1,853 that support our customized assembly operations at our 900,000 square foot integrated chassis manufacturing and body assembly facility and 340,000 square foot component fabrication facility. Our employees are trained to maximize production efficiency by following customized processes developed by us. Excellence in marketing and promotion of our products: Our recent ad campaign in School Transportation News was the #1, top-rated advertisement in the magazine: https://www.dropbox.com/s/q4ypgb2rwn6clpq/Blue_Bird_Award_STN_March_2020.pdf?dl=0	*
17	What percentage of your sales are to the governmental sector in the past three years	Approximately 2%	*
18	What percentage of your sales are to the education sector in the past three years	96% which consists of sales to school districts and bus contractors that service school districts	*
19	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	With the exception of the current Sourcewell contract, we do not hold any state, provincial, or cooperative purchasing contracts directly. Throughout the U.S. and Canada, our dealer network holds in total over 20 contracts. Our sales utilizing the Sourcewell contract was approximately 365 units from 2017-2019.	*

20	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	GSA contract # GS-30F-DA017. We sell buses through our United States General Services Administration ("GSA") contract, an expedited procurement procedure designed to meet the needs of bus customers authorized to purchase through the GSA contracting offices, including the U.S. Air Force, U.S. Army, Homeland Security and the U.S. Department of Agriculture. Volume over last 3 years was approximately 850 units.	*

Table 4: References/Testimonials

Line Item 21. Supply reference information from three customers who are eligible to be Sourcewell participating entities.

Entity Name *	Contact Name *	Phone Number *	
Mobile County Public Schools (AL)	Pat Mitchell	(251) 221-5260	*
Independence School District (MO)	Daryl Huddleston	(816) 525-5335	*
BRANDON VALLEY SCHOOL DISTRICT 49-2 (SD)	Wayne Hampton	(605) 582-3514	*
BROOKINGS SCHOOL DISRICT (SD)	Bill Heldt	605-696-4750	

Table 5: Top Five Government or Education Customers

Line Item 22. Provide a list of your top five government, education, or non-profit customers (entity name is optional), including entity type, the state or province the entity is located in, scope of the project(s), size of transaction(s), and dollar volumes from the past three years.

Entity Name	Entity Type *	State / Province *	Scope of Work *	Size of Transactions *	Dollar Volume Past Three Years *	
GSA	Government	Georgia - GA	GSA contract # GS-30F-DA017	850 units	$90M	*
Northwest Independent School District	Education	Texas - TX	RFP	205 units	$16.7M	*
Clark County School District	Education	Nevada - NV	RFP	300 units	$28M	*
Fulton County School District	Education	Georgia - GA	RFP	164 units	$13.4M	*
Pflugerville Independent School District	Education	Texas - TX	RFP	154 units	$12.3M	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	
23	Sales force.	Blue Bird sells and services product through a network of dealers. Blue Bird supports that network with Regional Sales, Service, and Parts Managers that live in the territory they represent. Our dealer network in total has approximately 160 sales representatives that are responsible for school bus sales in their respective territories.	*

24	Dealer network or other distribution methods.	We have built an extensive, experienced network of 47 dealers to distribute our buses across the United States and Canada. Our dealers have an average tenure of more than 29 years with us and do not sell competing Type C or Type D school bus products in the areas assigned to them by us. In addition, our dealers have approximately 100 parts and service locations across the U.S. and Canada, as well as relationships with approximately 250 additional 3rd party service provider partners to provide extensive warranty service coverage in all markets.
25	Service force.	Through our dealer's service network, there are over 600 qualified technicians to meet the warranty and retail service needs of our customers.
26	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	Our 47 dealers have approximately 100 parts and service locations across the U.S. and Canada, as well as relationships with approximately 250 additional 3rd party service provider partners to provide extensive warranty service coverage in all markets. In addition, many of these service locations have mobile service capabilities to improve the response time and added convenience for our customers. Blue Bird field service engineers provide technical support to our dealer network. At the end of fiscal 2019, service engineers had an average of over 25 years of experience with our Company and are strategically placed throughout the United States and Canada to better serve both dealers and end-customers. The network leverages our parts inventory, technical training, and online warranty network to address customer service needs. We maintain a parts distribution center in Delaware, Ohio that fills demand for our Company specific and all-makes parts. Additional demand for parts is fulfilled by drop ship and direct sales. To fulfill demand for parts that are not maintained at the distribution center, we are linked to approximately 40 suppliers that ship directly to dealers and independent service centers. This level of support positions us as the school bus industry experts which furthers our ability to be responsive to our customers parts and service needs. We contract with a 3rd party survey company, The Daniels Group, to monitor our customers' satisfaction with the quality of our products and satisfaction with the performance of our dealer network. We monitor customer responses weekly to ensure we are managing and targeting improvements to our products and dealer network.
27	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	Our goal is to provide our products to all participating entities by encouraging our U.S. dealer network to participate and actively pursue sales through the Sourcewell contract. With this bid submission, we'll have dealers participating in 37 states. Our goal is to continue to work with the remaining dealers to offer our products to all participating entities in all markets where the contract is allowed.
28	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	Our goal is to provide our products to all participating entities by encouraging our dealer network in Canada to participate and actively pursue sales through the Sourcewell contract. With this bid submission, we'll have one dealer participating in 2 provinces and 2 territories. Our goal is to continue to work with the remaining dealers to offer our products to all participating entities in all markets where the contract is allowed.

29	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	We currently do not have participation from our dealer network in the below states/provinces. If awarded the contract, we will continue to work with our dealers to encourage participation so we can offer our products to all participating entities where the Sourcewell contract is allowed. Currently not participating in the following Canadian Provinces: Manitoba, New Brunswick, Newfoundland & Labrador, Nova Scotia, Ontario, Prince Edward Island, Quebec, Saskatchewan Currently not participating in the following U.S. states: Maine, Alaska, Wyoming, Iowa, California, Hawaii, Arizona, North Carolina, Mississippi, New York, Arkansas, West Virginia, and Kentucky	*
30	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	Our existing GSA contract will take precedent as the means for the government to purchase our products.	*
31	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	As of this bid submission, we do not have dealer representation in Alaska. When a new dealer is signed, it is our intent to offer our products to participating entities. Currently, our dealer who covers the state of Hawaii is not participating. We will continue to work with our dealer to encourage them to participate.	*

Table 7: Marketing Plan

Line Item	Question	Response *	
32	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	In addition to communicating to all dealers through our formal dealer communication process, we plan to announce the contract award through our website and social media platforms. Also, we will encourage all participating dealers to promote their participation through their various communication channels and at local trade shows. In conjunction with Sourcewell, we will provide training to our Regional Sales Managers as well as dealer sales personnel on how to effectively promote the benefits of the Sourcewell contract to their customers. In addition, we will seek out opportunities to partner with other Sourcewell-approved vendors to further improve the value-proposition offered to the Participating Entities. For example, we recently partnered with NCL Government Capital (Sourcewell vendor) to offer a 12-month deferred payment program for our customers. We've included a jointly-developed marketing flyer in the document upload section. Examples of other marketing materials have been provided in the document upload section as well.	*
33	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	Our social media presence is, by far, the most popular in our industry. With nearly 50,000 “likes”, we have 5 times more followers than our top competitors. Plus, we have a presence on Twitter and LinkedIn. We utilize these digital platforms to bring customers back to our website, www.blue-bird.com, and use our Request a Quote form as a measure of success for sales through digital means. We also regularly present digital advertising “whitepapers” through School Bus Fleet magazine’s website and School Transportation News’ website.	*
34	In your view, what is Sourcewell’s role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	We would recommend the use of Sourcewell's website for marketing our partnership. We would request that Sourcewell provide sales training to our Regional Sales Managers and participating dealer sales teams to understand how promote the benefits of this contract to participating entities.	*
35	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	Our products are sold through our dealer network. The availability of e-procurement ordering process can be discussed between a Participating Entity and the Participating Dealer.	*

Table 8: Value-Added Attributes

Line Item	Question	Response *	

36	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	In addition to any training available through our dealer network or training coordinated through many of our supplier partners, our Blue Bird Academy also offers web-based, video tutorials, and factory-based training for our customers. Technician Training -Blue Bird Academy offers three types of technician training: 1. We recently launched our online Blue Bird Technician Certification program and this is open to all technicians: dealer and customer. - Associate Level: 100% web-based - $650/person - Advanced Level: Live training sessions in Fort Valley, GA or regionally, followed up by online courses for real world application of the knowledge and skills learned in the previous level and workshop – Price TBD - Master Level: Hands-on Factory-based proficiency observation of skills learned through online and live training sessions – Price TBD 2. We also offer factory-based and regional training throughout the year which are typically 4-days in length. When held at the factory location in Fort Valley, a plant tour is included. The cost for this varies depending on location. 3. We also will provide on-site service training at a customer's location, by request. The cost for that is based on travel expenses for our trainer.

37	Describe any technological advances that your proposed products or services offer.	Our performance in recent years has been driven by the implementation of repeatable processes focused on product initiatives, continuous improvement of both competitiveness and manufacturing flexibility, as described below: 1. Alternative Fuel Initiatives — Blue Bird is the clear leader in alternative fuel school buses (defined as buses that do not operate on diesel fuel) and we continue to introduce new products to support growing consumer demand for these products. • Propane — In 2012, we entered into our exclusive relationship with Ford Motor Company and Roush Clean Tech to offer propane-powered Type C school buses. We have continued to lead the industry with this offering. • We launched the industry's first .05g/bhp-hr NOx propane engine in 2017. This engine operates four times cleaner than the current emission standard and is significantly better for the environment than competitors' published offerings. • We launched the industry's first .02g/bhp-hr NOx propane engine in August 2018. This engine complies with Ultra Low NOx classification and has an emissions level at 10% of the current standard and competitive offerings. • CNG — Blue Bird was the first OEM to introduce a CNG powertrain for the Rear Engine Type D bus using Cummins Westport technology. In 2016, we launched a new CNG product using a Ford engine and transmission and a Roush Clean Tech fuel delivery system to provide CNG in a Type C bus. • Electric — Blue Bird is the first major school bus manufacturer to market, and presently the only manufacturer among major OEMs, to have delivered electric school buses. We developed our electric bus with our partner, EDI. EDI was recently acquired by Cummins, one of our long-standing engine suppliers. We offer electric solutions in both our Type C and Type D buses and commenced delivery to customers in 2018. • Gasoline — In 2016, we re-introduced gasoline engines in school buses, again using a Ford engine and transmission and a Roush Clean Tech fuel delivery. This product has been an immediate success and continues to grow the Blue Bird customer base. 2. Diesel — Blue Bird works closely with Cummins on diesel engines which continue to be the power source for the majority of school buses sold. 3. Product Initiatives — We continue to update and improve our products. • Blue Bird introduced the first Electronic Stability Control system on school buses as an optional offering in fiscal 2017, and made it a standard feature in fiscal 2019. We also made rear-view cameras standard in fiscal 2019. 4. Manufacturing and Process Initiatives — We have commenced a number of initiatives to continue to build customer loyalty, reduce costs, and enhance competitiveness. • We launched our all-new, state-of-the-art paint facility in July 2019. This facility will drive greater reliability, quality, and capacity at a lower cost. • We contracted with industry leaders to revise our production techniques in our plant.

38	Describe any “green” initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	All emission levels mentioned below are certified by CARB (California Air Resources Board) and/or EPA (Environmental Protection Agency). As mentioned above in Line Item 37: Alternative Fuel Initiatives — Blue Bird is the clear leader in alternative fuel school buses (defined as buses that do not operate on diesel fuel) and we continue to introduce new products to support growing consumer demand for these products. • Propane — In 2012, we entered into our exclusive relationship with Ford Motor Company and Roush Clean Tech to offer propane-powered Type C school buses. We have continued to lead the industry with this offering. • We launched the industry’s first .05g/bhp-hr NOx propane engine in 2017. This engine operates four times cleaner than the current emission standard and is significantly better for the environment than competitors' published offerings. • We launched the industry’s first .02g/bhp-hr NOx propane engine in August 2018. This engine complies with Ultra Low NOx classification and has an emissions level at 10% of the current standard and competitive offerings. • CNG — Blue Bird was the first OEM to introduce a CNG powertrain for the Rear Engine Type D bus using Cummins Westport technology. In 2016, we launched a new CNG product using a Ford engine and transmission and a Roush Clean Tech fuel delivery system to provide CNG in a Type C bus. • Electric — Blue Bird is the first major school bus manufacturer to market, and presently the only manufacturer among major OEMs, to have delivered electric school buses. We developed our electric bus with our partner, EDI. EDI was recently acquired by Cummins, one of our long-standing engine suppliers. We offer electric solutions in both our Type C and Type D buses and commenced delivery to customers in 2018.
39	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	Zero Emission Vehicle - Blue Bird is the first major school bus manufacturer to market, and presently the only manufacturer among major OEMs, to have delivered electric school buses. We developed our electric bus with our partner, EDI. EDI was recently acquired by Cummins, one of our long-standing engine suppliers. We offer electric solutions in both our Type C and Type D buses and commenced delivery to customers in 2018. Ultra Low NOx certification - We launched the industry’s first .02g/bhp-hr NOx propane engine in August 2018. This engine complies with Ultra Low NOx classification and has an emissions level at 10% of the current standard and competitive offerings.
40	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	TVM DBE Goal Concurrence/Certification Letter (Fiscal Year 2020) has been provided in document upload section

41	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	We are the only principal manufacturer with chassis and body production specifically designed for school bus applications and the only school bus company to offer compliance with industry recognized safety tests-Altoona Testing, Colorado Rack Test and the Kentucky Pole Test-as a standard specification across our entire product line. Colorado Rack and Kentucky Pole Tests were not invented by or exclusive to Blue Bird. Some will downplay the importance of these critical structural benefits and will fall back on compliance to Motor Vehicle Safety Standards. When transporting our most precious cargo, our children, Blue Bird does not settle for minimum construction standards. Both Colorado Rack and Kentucky Pole Tests were developed because minimum FMVSS standard testing, according to Blue Bird, should be taken a step further. Colorado Rack Test: The Colorado Rack test verifies structural integrity and crash-worthiness of school bus designs. The test simulates a rollover crash by applying a constant load along the full length of the bus body. This insures that all pushout windows and emergency exits will be fully functional after an accident occurs. Blue Bird feels it is essential that our buses are constructed to meet the Colorado Rack test standards, insuring safe exit in the event of a rollover crash. All Blue Bird buses are Kentucky Pole tested and designed to keep all passengers safe by providing structural integrity to minimize outside intrusion. Kentucky Pole Test: The Kentucky Pole test is designed to verify that the interior panels above the window will not separate and expose sharp edges in the event of a crash. The test involves a rollover simulation, in which the bus strikes a pole-like object, which forces the roof to bend into the passenger compartment. Standards require that separation of body panels must not occur when the roof bends between 8-10 inches. All Blue Bird buses are Kentucky Pole tested and designed to keep all passengers safe by providing structural integrity to minimize outside intrusion. As previously mentioned, we have the widest range of products and fuel types to best meet the needs of customer throughout the industry.	*

Table 9: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
42	Do your warranties cover all products, parts, and labor?	Our warranties cover all our products and include parts and labor, however, there are some components covered by the component manufacturer. Some examples of this are Cummins diesel engines and Allison transmissions which are covered by these companies. A copy of our standard warranty is provided in the document upload section.	*
43	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	Our warranty has limitations and exclusions that are detailed on our standard warranty statement which is provided in the document upload section.	*
44	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	Our Blue Bird standard warranties do no cover travel time and mileage, however, many of our dealers cover this expense within certain limits.	*
45	Are there any geographic regions of the United States (and Canada, if applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	Certified technicians are available in all geographic regions of the United States and Canada.	*
46	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	For those components that are not included in our standard warranty, our Blue Bird dealers can either perform warranty service for those components or can arrange for work to be performed at an authorized warranty repair center.	*
47	What are your proposed exchange and return programs and policies?	Blue Bird does not offer any exchange or return programs on buses. Any returns or exchanges will be negotiated directly between our dealers and the participating entity.	*
48	Describe any service contract options for the items included in your proposal.	We offer several service contract options to extend the standard warranty. These include contracts that extend our standard one-year warranty to two, three, five, or six years. We offer tow warranties to provide towing for up to 5 years. We also offer warranties on Roush gas, LPG, and CNG components that extend those warranties up to 10 years. A chart detailing extensions to our standard warranty is provided in the document upload section. Additional service contracts and pricing are provided in our options list.	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
49	What are your payment terms (e.g., net 10, net 30)?	The payment terms will be provided directly by the participating dealer when a quote is provided to a participating entity. Our dealers' payment terms range from COD to 60 days.	*
50	Do you provide leasing or financing options, especially those options that schools and governmental entities may need to use in order to make certain acquisitions?	Blue Bird has a partnership with TCF Capital Solutions to offer leasing and financing options through our dealer network. Our dealers also offer additional options for leasing and financing through 3rd party lending institutions. In addition, we recently developed a joint program with NCL Government Capital (a Sourcewell vendor) to offer a special 12-month deferred payment program to customers.	*
51	Briefly describe your proposed order process. Include enough detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template. For example, indicate whether your dealer network is included in your response and whether each dealer (or some other entity) will process the Sourcewell participating entities' purchase orders.	Our dealer network will work directly with participating entities to finalize bus specifications and all other details relating to their bus order. Our dealers will process the participating entities purchase orders and place the bus orders through Blue Bird's online order entry system. We will develop a special option feature to designate the order as a Sourcewell order. We will develop a quarterly report to identify Sourcewell orders by dealer and customer to supply Sourcewell on a quarterly basis.	*
52	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	This would be a matter to be discussed between the Participating Entity and the Participating Dealer.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as desribed in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	

53	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	With this bid proposal, we are providing base content, state-spec products for each market where we've identified a participating dealer. This pricing does not include shipping costs or sales tax (if applicable). Each state/province has its own unique specifications and therefore unique pricing structure. Discounts vary depending on product type, market, and specifications. In addition to these base configurations, we are providing our full list of Blue Bird installed options to allow customers to purchase any option combination that can be validated for their market as well as any fuel type including gasoline, diesel, propane, CNG, and electric (for those products where these options are available). Our option list consists of a list price and a Sourcewell price which is a discount off of list. Additional discounts are available and are generally considered for quantity buys, off-peak season buys, and higher option content buses. These additional discounts generally apply to the base configurations as well as options listed in the Blue Bird option list. To provide the Participating Entity the benefit of these available discounts, we direct our Participating Dealers to submit requests to Blue Bird for additional discount consideration. We will evaluate each quote independently and will return an approved discount and price point to the dealer for submission to the customer. In every case, this price will be as good as or better than the ceiling price provided in this bid. In addition to our available Blue Bird options, Participating Dealers may also offer dealer-installed or vendor-installed options. Those have been included in the pricing file. Those options may also carry an additional discount off of the installed price and, if so, will be detailed in the quote to the Participating Entity. If an option is requested which is not listed, the dealer will provide a quote for this option to the customer.	*
54	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	The pricing discount off the base bus configuration ranges from 10%-15%. The pricing discount off the available Blue Bird options ranges from 0%-40%.	*
55	Describe any upcharge and/or discount structure that applies on a State-by-State or Province-by-Province basis for Sourcewell Participating Entities in the US or Canada. Upload relevant pricing materials (if applicable) in the document upload section of your response.	Base bus configurations provided are state/province specific and are noted as such in the pricing file. Each market has unique discounts and pricing which is primarily due to individual market conditions and option content levels.	*
56	Describe any quantity or volume discounts or rebate programs that you offer.	We offer additional discounts over what's provided in the base bid for quantity buys, off-peak season buys, or higher option content buses.	*
57	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	Customers, from time to time, request options or brands that are not available as a Blue Bird factory-installed option. In that case, dealers have the ability to offer these options as dealer-installed or vendor-installed options. Many of these available options with installed pricing has been provided in the pricing file. For any requested option not listed, the dealer can provide a quote upon request.	*
58	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	The costs that are not included in the bid response include shipping cost (both from the factory to the dealer location and from the dealer location to the customer location), and any applicable sales tax. The shipping costs can vary by product type and location. The sales tax (if applicable) will vary by the transaction amount.	*

59	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Blue Bird contracts with a 3rd party delivery company for bus deliveries from the factory to the dealer. Before providing a final quote to the customer, the dealer requests a delivery estimate from Blue Bird to add to the price of the quote. This can vary by fuel type of the product and total distance traveled. In addition, the dealer will also incur a cost to transport the product from their location to the customer location. This can also vary by fuel type and total distance traveled.	*
60	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	At the time of this bid submission, we are not providing bid prices for Hawaii and Alaska. If these markets are supported during the term of the contract, a price for shipping will be provided to the customer when the bus(s) are quoted. Unlike other U.S. markets, these will include cost to transport over water and will typically be much higher than typical shipping costs. Shipping to Canada is handled in the same manner as described in Line Item 59.	*
61	Describe any unique distribution and/or delivery methods or options offered in your proposal.	In addition to the unique shipping method for AK and HI mentioned above, there is also a unique method for electric-powered and CNG-powered buses. Because EV charging stations are not available throughout all areas of U.S. and Canada, these products are shipped on a flatbed truck and will have higher shipping costs which will be included in the final quote to the customer. CNG buses, due to similar fueling infrastructure limitations, may be shipped via flatbed for some portion of the delivery and may incur higher shipping costs which will be included in the final quote to the customer.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments
62	d. other than what the Proposer typically offers (please describe).	There are some markets where our dealers are listed on existing cooperative contracts. Typically, but not always, there is language prohibiting dealers selling below the contract price. For this reason, in some cases, our pricing will be the same or similar to pricing already established on those contracts. In other markets, pricing will be better or typical to what's offered today in that market.

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
63	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell.	All pricing requests submitted to Blue Bird by a Participating Dealer for a Participating Entity will require us to review the discounts and final proposed price. We will set up a process to identify these requests as a Sourcewell quote. We will insure that all Sourcewell quotes are priced at or below the contract price. We will track these quotes so we can identify any that become a customer order. We will then verify with dealers on a monthly basis all orders we've identified as Sourcwell orders. This will allow us to verify the correct pricing and reserve the Sourcewell fee for the quarterly payment, as well as collect all the customer detail as required in the reporting process.	*
64	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	We are proposing a per-unit fee of $800 for all products sold under this contract.	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *	
65	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	In this bid proposal, we are including all bus types including Type A Micro Bird, Type C Vision, and Type D (Rear Engine and Front Engine). The Type A Micro Bird includes the G5 model on a Chevrolet 6.0l gas chassis. In the Type C and Type D, we are providing all bus lengths, passenger capacities, and fuel types. The fuel type options are as follows: Type C gas Type C diesel Type C propane Type C electric Type D-FE diesel Type D-RE diesel Type D-RE CNG Type D-RE electric	*
66	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	The subcategories would be considered our various bus types and fuel types as described above.	*

Table 14B: Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed school bus type is offered within your proposal and, for each available bus type, the engine or power alternatives that you offer within the type. Provide additional comments in the text box provided, as necessary.

Line Item	Bus Type	Offered *	Engine - Gas & Diesel *	Engine - CNG or Propane *	Engine - Hybrid or Alt Fuel *	Electric Powered *	Comments
67	Type A School Bus	(•) Yes ( ) No	( ) Yes (•) No	( ) Yes (•) No	( ) Yes (•) No	( ) Yes (•) No	Type A is being offered in a gas model. We will add additional Type A fuel types during the term of the contract. *
68	Type C School Bus	(•) Yes ( ) No	(•) Yes ( ) No	(•) Yes ( ) No	( ) Yes (•) No	(•) Yes ( ) No	In this proposal, are base Type C configurations are in gas or diesel, depending on the market, and we include the options to configure our Type C in any of the following fuel types: gas, diesel, propane, or electric. *
69	Type D School Bus	(•) Yes ( ) No	(•) Yes ( ) No	(•) Yes ( ) No	( ) Yes (•) No	(•) Yes ( ) No	In this proposal, we offer a Type D-Rear Engine in diesel with options to upgrade to CNG or Electric. We are also offering a Type D-Front Engine in a diesel. *
70	School Activity Bus	(•) Yes ( ) No	(•) Yes ( ) No	(•) Yes ( ) No	( ) Yes (•) No	(•) Yes ( ) No	Activity buses are offered in both Type C, Type D-Rear Engine, and Type D-Front Engine in the fuel types mentioned in the individual product categories in line items 68 & 69. *

Table 15: Industry Specific Questions

Line Item	Question	Response *
71	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Some of the metrics that will be tracked: - Number of dealers selling products on the Sourcewell contract vs. a year ago. - Total number of units sold on the Sourcewell contract vs. a year ago. - Number of repeat customers who utilized this contract vs. a year ago - Number of new customers who utilized this contract vs. a year ago
72	Describe the safety features and innovations incorporated in the manufacturing of your buses that impact student safety.	First, we pride ourselves on having the safest bus on the road today. We build our buses to the highest standard of safety, exceeding the Federal Motor Vehicle Safety Standard. In our mind, safety is not an option; it is the most important and fundamental attribute of a school bus. Every Blue Bird bus is certified to meet the rigorous testing requirements of Colorado Rack and Kentucky Pole certification. These tests are designed to recreate impact scenarios that are only faced in the worst accident situations, such as rollovers and massive impacts, and ensure the maximum protection for the onboard passengers. Children's safety is our business, that's why we build additional strengthening into every Blue Bird bus - standard practice for us, but optional equipment for our competitors. Second, we don't build a chassis for use in both truck and school bus applications, as we believe that could be a compromised solution. Others do that, but we don't. We provide a purpose-built school bus from the ground up, with safety and reliability top of mind. As such, our bus is full of unique features - from the steep rake of our hood that ensures best-in-class forward vision for the driver, to the extensive use of special fasteners that never need torquing throughout the life of the bus. That's safety built-in! Third, we care about the environment and the future of our planet and will continue to invest in innovation that provides a cleaner world for our children. Our leadership in alternative fuels is a testament to this - with our top 10 dealers alone, the propane buses they sold in 2019 reduced NOx emissions by over 1.2 million pounds! What's more, our exclusive propane buses are certified to NOx levels at one tenth of the EPA's and our competitors' standard. With over 40% growth in our propane bus sales last year, our message is being heard - with Blue Bird propane, you can have the safest, cleanest and lowest-cost-of-ownership of any bus in the market. But that's not all. In 2019, we launched the most extensive range of zero-emission, electric-powered school buses in North America covering all body styles, and have secured over 200 orders to date. We believe in providing innovative products that are both affordable and safe.
73	Identify any bus types, models, configurations, or engine/power alternatives that are not yet available in your bus offerings but that are scheduled to be released during the anticipated term of the Sourcewell contract.	Blue Bird offers the widest range of bus types and fuel types of any school bus manufacturer. We are the only manufacturer to offer electric power in Type A, Type C, and Type D. At this time, we are not announcing any new planned product offerings for the near future but are continuously researching new products and features that meets the emerging demands of our school bus customers.
74	Describe any options, accessories, supplies, parts, and services that you are proposing that are not described in any other section of your response. Upload relevant pricing materials (as applicable) in the document upload section of your response.	Not applicable

Exceptions to Terms, Conditions, or Specifications Form

Only those Proposer Exceptions to Terms, Conditions, or Specifications that have been accepted by Sourcewell have been incorporated into the contract text.

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as "Marketing Plan."

Proposer's Affidavit

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor’s objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:

    a. Included on the “Specially Designated Nationals and Blocked Persons” list maintained by the Office of Foreign

Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

b. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://www.sam.gov/portal/3; or

c. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Albert Burleigh, Regional Executive Director, Blue Bird Body Company

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

Sourcewell

Solicitation Number: RFP #063020

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and IC Bus LLC, 2701 Navistar Dr., Lisle, IL 60532 (Vendor).

Sourcewell is a State of Minnesota local government agency and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada.

Vendor desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires August 15, 2024, unless it is cancelled sooner pursuant to Article 24. This Contract may be extended up to one additional one-year period upon request of Sourcewell and with written agreement by Vendor.

C. SURVIVAL OF TERMS. Articles 11 through 16 survive the expiration or cancellation of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Vendor will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above. Vendor's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new/current model. Vendor may offer close-out or refurbished Equipment or Products if they are clearly indicated in

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

Vendor's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Vendor warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Vendor warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Vendor's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that is effective past the expiration of the Vendor's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution, Vendor will make available to Sourcewell a means to validate or authenticate Vendor's authorized dealers, distributors, and/or resellers relative to the Equipment, Products, and Services related to this Contract. This list may be updated from time-to-time and is incorporated into this Contract by reference. It is the Vendor's responsibility to ensure Sourcewell receives the most current version of this list.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced as stated in Vendor's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Vendor must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

Vendor must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Vendor in breach of this Contract if the Vendor intentionally delivers substandard or inferior Equipment or Products. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Vendor as soon as possible and the Vendor will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

B. SALES TAX. Each Participating Entity is responsible for supplying the Vendor with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Vendor may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Vendor determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Vendor may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Contract Administrator. This form is available from the assigned Sourcewell Contract Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

A fully executed Sourcewell Price and Product Request Form will be become an amendment to this Contract and be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Vendor understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Vendor is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential members to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Vendor's employees may be required to perform work at government-owned facilities, including schools. Vendor's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Vendor that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Vendor. Typically, a Participating Entity will issue an order directly to Vendor. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration of this Contract; however, Vendor performance, Participating Entity payment, and any applicable warranty periods or other Vendor or Participating Entity obligations may extend beyond the term of this Contract.

Vendor's acceptable forms of payment are included in Attachment A. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order may be negotiated between a Participating Entity and Vendor, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entitles may require the use of a Participating Addendum; the terms of which will be worked out directly between the Participating Entity and the Vendor. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. PERFORMANCE BOND. If requested by a Participating Entity, Vendor will provide a performance bond that meets the requirements set forth in the Participating Entity's order.

D. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements) not addressed in this Contract, the Participating Entity and the Vendor may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

E. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Vendor in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the goods to be purchased;
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements; or
3. Vendor commits any material breach of this Contract or the additional terms agreed to between the Vendor and a Participating Entity.

F. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Vendor will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

B. BUSINESS REVIEWS. Vendor must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Vendor must provide a contract sales activity report (Report) to the Sourcewell Contract Administrator assigned to this Contract. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Vendor must submit a report indicating no sales were made).

The Report must contain the following fields:

- Customer Name (e.g., City of Staples Highway Department);
- Customer Physical Street Address;
- Customer City;
- Customer State/Province;
- Customer Zip Code;
- Customer Contact Name;
- Customer Contact Email Address;
- Customer Contact Telephone Number;
- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Vendor.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Vendor will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Vendor may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Vendor will submit a check payable to Sourcewell for the per unit amount or administrative fee percentage stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Sourcewell-assigned contract number in the memo and must be mailed to the address above “Attn: Accounts Receivable.” Payments must be received no later than 45 calendar days after the end of each calendar quarter.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

Vendor agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Vendor is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Vendor in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Vendor's Authorized Representative is the person named in the Vendor's Proposal. If Vendor's Authorized Representative changes at any time during this Contract, Vendor must promptly notify Sourcewell in writing.

10. ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. ASSIGNMENT. Neither the Vendor nor Sourcewell may assign or transfer any rights or obligations under this Contract without the prior consent of the parties and a fully executed assignment agreement. Such consent will not be unreasonably withheld.

B. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been fully executed by the parties.

C. WAIVER. If either party fails to enforce any provision of this Contract, that failure does not waive the provision or the right to enforce it.

D. CONTRACT COMPLETE. This Contract contains all negotiations and agreements between Sourcewell and Vendor. No other understanding regarding this Contract, whether written or oral, may be used to bind either party.

E. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. LIABILITY

Vendor must indemnify, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees, arising out of the performance of this Contract by the Vendor or its agents or employees; this indemnification includes injury or death to person(s) or property alleged to have been caused

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications.

12. AUDITS

Sourcewell reserves the right to review the books, records, documents, and accounting procedures and practices of the Vendor relevant to this Contract for a minimum of 6 years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

13. GOVERNMENT DATA PRACTICES

Vendor and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell under this Contract and as it applies to all data created, collected, received, stored, used, maintained, or disseminated by the Vendor under this Contract.

If the Vendor receives a request to release the data referred to in this article, the Vendor must immediately notify Sourcewell and Sourcewell will assist with how the Vendor should respond to the request.

14. INDEMNIFICATION

As applicable, Vendor agrees to indemnify and hold harmless Sourcewell and its Participating Entities against any and all suits, claims, judgments, and costs instituted or recovered against Sourcewell or Participating Entities by any person on account of the use of any Equipment or Products by Sourcewell or its Participating Entities supplied by Vendor in violation of applicable patent or copyright laws.

15. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:
    a. Sourcewell grants to Vendor a royalty-free, worldwide, non-exclusive right and license to use theTrademark(s) provided to Vendor by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Vendor.
    b. Vendor grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Vendor's Trademarks in advertising and promotional materials for the purpose of marketing Vendor's relationship with Sourcewell.
2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to its and their respective distributors, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

promotional materials for the purpose of marketing the Parties' relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.

3. *Use; Quality Control.*

a. Sourcewell must not alter Vendor's Trademarks from the form provided by Vendor and must comply with Vendor's removal requests as to specific uses of its trademarks or logos.

b. Vendor must not alter Sourcewell's Trademarks from the form provided by Sourcewell and must comply with Sourcewell's removal requests as to specific uses of its trademarks or logos.

c. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's Trademarks only in good faith and in a dignified manner consistent with such party's use of the Trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

4. *Termination*. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of vendors which may be used until the next printing). Vendor must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Vendor individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Materials should be sent to the Sourcewell Contract Administrator assigned to this Contract.

D. ENDORSEMENT. The Vendor must not claim that Sourcewell endorses its Equipment, Products, or Services.

16. GOVERNING LAW, JURISDICTION, AND VENUE

Minnesota law governs this Contract. Venue for all legal proceedings out of this Contract, or its breach, must be in the appropriate state court in Todd County or federal court in Fergus Falls, Minnesota.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

17. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

18. SEVERABILITY

If any provision of this Contract is found to be illegal, unenforceable, or void then both Sourcewell and Vendor will be relieved of all obligations arising under such provisions. If the remainder of this Contract is capable of performance, it will not be affected by such declaration or finding and must be fully performed.

19. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Vendor will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Vendor may escalate the resolution of the issue to a higher level of management. The Vendor will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Vendor must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Vendor fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed will be borne by the Vendor.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

Written notice of default and a reasonable opportunity to cure must be issued by the party claiming default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

20. INSURANCE

A. REQUIREMENTS. At its own expense, Vendor must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*
Workers' Compensation: As required by any applicable law or regulation.
Employer's Liability Insurance: must be provided in amounts not less than listed below:
Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Vendor will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.
Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for Products-Completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Vendor will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.
Minimum Limits:
$1,000,000 each accident, combined single limit

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

4. *Umbrella Insurance*. During the term of this Contract, Vendor will maintain umbrella coverage over Workers' Compensation, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

Failure of Vendor to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Vendor must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Contract Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf. All policies must include there will be no cancellation, suspension, non-renewal, or reduction of coverage without 30 days' prior written notice to the Vendor.

Upon request, Vendor must provide to Sourcewell copies of applicable policies and endorsements, within 10 days of a request. Failure to request certificates of insurance by Sourcewell, or failure of Vendor to provide certificates of insurance, in no way limits or relieves Vendor of its duties and responsibilities in this Contract.

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Vendor agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Vendor's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Vendor, and products and completed operations of Vendor. The policy provision(s) or endorsement(s) must further provide that coverage is primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds.

D. WAIVER OF SUBROGATION. Vendor waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other insurance applicable to the Vendor or its subcontractors. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Vendor or its subcontractors. Where permitted by law, Vendor must require similar written express waivers of subrogation and insurance clauses from each of its subcontractors.

E. UMBRELLA/EXCESS LIABILITY. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies).

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

F. SELF-INSURED RETENTIONS. Any self-insured retention in excess of $10,000 is subject to Sourcewell's approval.

21. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Vendor must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Vendor conducts with Sourcewell and Participating Entities.

22. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Vendor certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Vendor declares bankruptcy, Vendor must immediately notify Sourcewell in writing.

Vendor certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Vendor further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

23. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Participating Entities that use United States federal grant or FEMA funds to purchase goods or services from this Contract may be subject to additional requirements including the procurement standards of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 C.F.R. § 200. Participating Entities may also require additional requirements based on specific funding specifications. Within this Article, all references to "federal" should be interpreted to mean the United States federal government. The following list only applies when a Participating Entity accesses Vendor's Equipment, Products, or Services with United States federal funds.

A. EQUAL EMPLOYMENT OPPORTUNITY. Except as otherwise provided under 41 C.F.R. § 60, all contracts that meet the definition of "federally assisted construction contract" in 41 C.F.R. § 60-

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

1.3 must include the equal opportunity clause provided under 41 C.F.R. §60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 C.F.R. §, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 C.F.R. § 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor." The equal opportunity clause is incorporated herein by reference.

B. DAVIS-BACON ACT, AS AMENDED (40 U.S.C. § 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. § 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 C.F.R. § 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 C.F.R. § 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency. Vendor must be in compliance with all applicable Davis-Bacon Act provisions.

C. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. § 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations (29 C.F.R. § 5). Under 40 U.S.C. § 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence. This provision is

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

hereby incorporated by reference into this Contract. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

D. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT. If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 C.F.R. § 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

E. CLEAN AIR ACT (42 U.S.C. § 7401-7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. § 1251-1387). Contracts and subgrants of amounts in excess of $150,000 require the non-federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. § 7401- 7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. § 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Vendor certifies that during the term of this Contract will comply with applicable requirements as referenced above.

F. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689). A contract award (see 2 C.F.R. § 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 C.F.R. §180 that implement Executive Orders 12549 (3 C.F.R. § 1986 Comp., p. 189) and 12689 (3 C.F.R. § 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. Vendor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency.

G. BYRD ANTI-LOBBYING AMENDMENT, AS AMENDED (31 U.S.C. § 1352). Vendors must file any required certifications. Vendors must not have used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Vendors must disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the non-federal award. Vendors must file all certifications and disclosures

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352).

H. RECORD RETENTION REQUIREMENTS. To the extent applicable, Vendor must comply with the record retention requirements detailed in 2 C.F.R. § 200.333. The Vendor further certifies that it will retain all records as required by 2 C.F.R. § 200.333 for a period of 3 years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

I. ENERGY POLICY AND CONSERVATION ACT COMPLIANCE. To the extent applicable, Vendor must comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

J. BUY AMERICAN PROVISIONS COMPLIANCE. To the extent applicable, Vendor must comply with all applicable provisions of the Buy American Act. Purchases made in accordance with the Buy American Act must follow the applicable procurement rules calling for free and open competition.

K. ACCESS TO RECORDS (2 C.F.R. § 200.336). Vendor agrees that duly authorized representatives of a federal agency must have access to any books, documents, papers and records of Vendor that are directly pertinent to Vendor's discharge of its obligations under this Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right also includes timely and reasonable access to Vendor's personnel for the purpose of interview and discussion relating to such documents.

L. PROCUREMENT OF RECOVERED MATERIALS (2 C.F.R. § 200.322). A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. § 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

24. CANCELLATION

Sourcewell or Vendor may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Vendor's Proposal.

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	

7	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	IC Bus, LLC is a wholly owned subsidiary of Navistar, Inc. and is the school bus arm of Navistar. For purposes of this document, the terms, IC Bus LLC, IC Bus, or simply IC may be used interchangeably. Navistar and under its previous corporate name, International Harvester Company, had produced school buses beginning in the early 1900's. Navistar itself traces its roots back to Cyrus McCormick and the invention of the mechanical reaping machine in 1831. This key piece of agricultural equipment allowed expansion into more pieces of farm equipment and industrial growth throughout the 1800's. As the 20th Century dawned McCormick merged with other farm equipment manufacturers to form the International Harvester Company headquartered in Chicago, IL. Quickly they saw the need for further expansion and market need developing the International branded truck, including school buses. In more modern history, the farm equipment business was sold and Navistar was chosen for the new Corporate name which focused on trucks, buses, and engines. Today the company builds IC Bus products and International branded trucks. Navistar also owns MWM of Brazil and holds 35% of Navistar Defense. Both IC Bus and International trucks have the largest dealer network in the U.S. and Canada. Navistar has also recently partnered with Love's Truck Stops to further assist in providing service. A new Parts Distribution Center has been opened in Memphis, TN adding to our support capabilities bringing our total PDC count to 8 in the States and Canada. To be a leader International has brought to market a proprietary wireless service, On Command Connection (OCC) that takes signals from the vehicle puts them into an app allowing users to see and monitor their fleet via Health Reports detailing potential service and maintenance issues. IC Bus will be introducing a full electric school bus as well as International trucks with an electric medium duty truck. Navistar has a corporate relationship with TRATON, the truck and bus division of Volkswagen AG, which provides access to EV and other advanced technologies on a global scale The Navistar Investor Relations team has additional history and guidance at: https://www.navistar.com/navistar/	*
8	What are your company's expectations in the event of an award?	IC Bus expectations are to become the preferred supplier for school buses and parts to the Sourcewell membership.	*
9	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	Key points of our financial strength are, but not limited to, the below and attached: * $1.5B in cash reserves at the end of our 2nd Qtr., April 2020. * 7 consecutive years of improving Adjusted EBITDA ending Fiscal Year 2019 at $882M. * End of year 2019 revenue $11.3B. Attached you will find our 2019 Annual Report, and 2nd Qtr. 2020 10-K filing. Navistar Investor Relations can be found at: https://ir.navistar.com/investor-home/default.aspx	*
10	What is your US market share for the solutions that you are proposing?	U.S. Market Share for School Bus as of Second Quarter 2020 stood at 35%.	*
11	What is your Canadian market share for the solutions that you are proposing?	Canadian Share for School Bus is 42%	*

12	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No.	*
13	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	IC Bus and its parent company Navistar is a Truck and Bus manufacturer. We sell to our dealer channel who would be the Member selling point. IC Bus dealers are independently owned and operated. They operate with a Sales and Service agreement administered by Navistar. The agreement sets forth standards and conditions that they agree to operate within. Sales Representatives of the dealerships are employees of the dealership and hold all necessary licenses required by local authorities. IC Bus employs Regional Sales Managers to work with the dealers in a state of continuous improvement to augment the dealer capability.	*
14	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	State and Local Governments regulate our dealer businesses and their legal ability to go to market. Navistar requires the IC Bus dealer to meet these requirements in order to sell buses within their defined territory. All IC Bus dealerships hold the required licenses and requirements to conduct business.	*
15	Provide all “Suspension or Debarment” information that has applied to your organization during the past ten years.	Navistar and IC Bus has not been subject to "Suspension and Debarment" in the past 10 years.	*

Table 3: Industry Recognition & Marketplace Success

Ministry of Education	Education	BC - British Columbia	School Buses	161 units	Confidential	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	
23	Sales force.	IC Bus, LLC is a subsidiary of Navistar, as such it has its own dedicated assembly plant in Tulsa, OK, engineering resources, sales, and management team. IC Bus employs 10 within its Sales Force including the Vice President of Sales to manage the dealers, their local actions, and are available to work with the Sourcewell Members.	*
24	Dealer network or other distribution methods.	44 IC dealer groups with 163 physical locations cover the U.S. and Canada. This comprises 148 sales people, 1,943 service technicians and 2,165 available service bays. This capability is augmented by the International dealer network with 978 service locations. This forms the largest capability in the industry today.	*
25	Service force.	IC Bus has 7 unique Service Representatives that are within the larger Service Organization of 59 field service personnel responsible for dealer performance, customer satisfaction and product fitness. The team has an esclation path to Navistar engineering to address any unresolved product issues in a timely manner. The IC Dealer network has 1,943 service technicians and 2,165 available service bays across its 39 dealerships.	*

26	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	Dealer Service utilize an in-house monitoring known as Diamond Edge to measure performance and key operations that impact a Dealerships overall evaluation/performance score. a. In our ongoing effort to drive uptime and unmatched service to our customers, IC Bus dealers, the International Truck dealers and our Service organization worked together to introduce Diamond Edge Certification. When servicing a vehicle at an IC Bus or International Truck Diamond Edge Certified Dealership, customers experience faster service, immediate parts availability and a higher level of servicing expertise. b. Technician Education and Certification c. Vehicle write up within 15-minutes d. Vehicle diagnosed and communicated back to the customer within 2hrs e. Predictive parts stocking logic to ensure Part on the Shelf for unplanned service events f. Velocity metrics to ensure for repairs to be completed within 24/48 hrs of arrival at a dealership.	*
27	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	IC Bus school buses are readily available and supported in the United States.	*
28	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	IC Bus school buses are readily available and supported in Canada.	*
29	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	We will not be including Puerto Rico, the Pacific U.S. Territories, nor the U.S. Virgin Islands.	*
30	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	IC Bus will serve all Sourcewell Members within the 48 contiguous United States, plus the U.S. States of Hawaii and Alaska, and the Canadian Provinces and Territories.	*
31	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	No restrictions for Hawaii and Alaska. IC Bus does not have representation in Puerto Rico or the U.S. Territories and would preclude any Members in those areas.	*

Table 7: Marketing Plan

Line Item	Question	Response *	
32	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	IC Bus is active on Social Media, traditional media, Dealer and Customer Communications. 1.) Awarding of contract will garner a Press Release immediately upon notification. 2.) Launch Webinar for our dealer network. 3.) Will be added onto our Sales App which is utilized by both IC personnel and all dealer sales personnel. 4.) Sourcewell Banners and Materials at Trade Shows and Regional events. 5.) Provide all dealers with Sourcewell membership list. 6.) Inclusion of Sourcewell (Andy Campbell) at all Sales Training events. 7.) Expand Sourcewell exposure through Parts Program. 8.) Participate with Sourcewell in their events. 9.) Announce via all dealer communication letter (B-Letter) and process details.	*
33	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	IC Bus will create a landing page for Sourcewell information within the IC Bus website. Announcement and inclusion in our weekly e-newsletter with reminders that goes to all dealers. Integration with CRM system.	*
34	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	Sourcewell will need to inform us of new members. We ask that Sourcewell include us in their marketing and inform us of events for potential participation. We look forward to working with Mr. Campbell in our planning, meetings, and events. Usage of the Parts Program will expand our marketing and communication scope.	*
35	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	There is a Parts e-procurement system, wholegoods (buses) are not available via e-procurement. Members should work with their local selling dealer, their capability and flexibility in electronically doing business has been evidenced during the current COVID-19 pandemic.	*

Table 8: Value-Added Attributes

Line Item	Question	Response *	

36	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Service Training is not standard or included with the product. It is IC Bus intent that any warranty repairs could and should be done through the dealer to minimize customer impact. Training is available, some is fee-based, some may be available from the dealer. In person training via Navistar Training is fee based. The primary customer focused technician training is IC University, a week long training conducted at our Plant and related facilities. IC University has multiple sessions throughout the summer to accommodate the customer demand. * IC Bus does have tools available that inform the user of the vehicle health and can inform users on existing Fault Codes and their severity. The system will also lead users to Fault Code Action Plans, providing a list of questions and/or steps to take in a service situation. These tools are offered through the On Command Connection group at Navistar. IC also offers IC 360 a newly developed communication tool. It provides revolutionary service communications and fleet tools that puts all service information together in one site.
37	Describe any technological advances that your proposed products or services offer.	Safety – FMVSS Children are our most precious cargo, and their protection during their ride to and from school are a top priority to IC Bus. Every bus we build meets or exceeds the Federal Motor Vehicle Safety Standards (FMVSS) defined for school buses, our dealers will work with the Sourcewell Member to meet local standards defined in each state. Our bus body is designed with Threaded Bow Construction providing outstanding crash protection using one piece full length roof stringers and drip rails that interlock with the roof bows. The roof bows terminate at the floor line so that collision damage to the side skirts does not require a full roof bow replacement. The CE Bus windshield features one-piece glass that is low cost, easy to replace and eliminates the center post from the driver's field of view. The passenger windows were updated to a new design in 2017. The chassis system includes a very robust caged fuel tank mounted between the frame rails behind the axle. For more information visit: https://www.icbus.com/ https://www.icbus.com/why-icbus/superior-products ESC/CM IC Bus has been a leader in safety technology making Electronic Stability Control (ESC) and the Bendix Wingman Advanced Collision Mitigation (CM) system standard features on IC Buses in July 2018. These systems support the driver with added information and sensors, providing the driver better control of the vehicle in potentially dangerous situations. Customers may also choose Bendix Fusion Collision Mitigation which combine a camera and radar to further mitigate risk of forward vehicle collisions. The system will provide following distance warnings as well as apply the brakes when the sensors determine a collision could be imminent. The Meritor WABCO SmartTrac Stability Control system was also introduced in 2019 for the hydraulic brake system. For more information visit: https://www.icbus.com/blog/esc-and-cm-how-it-works Powertrain Choice School buses operate in a wide variety of terrain and applications, and customers have requirements to use a variety of fuel types. IC Bus offers several options to meet these customer needs. The CE Bus is available with the

Cummins B6.7 diesel engine paired with the 2500 PTS or 3000 PTS Allison transmission. The CE bus is also available with the PSI 8.8L Gasoline or Propane engine both paired with the 2500 PTS Allison transmission for trusted and familiar operation. The RE Bus is powered by the Cummins L9 wet sleeve diesel engine paired with the 3000 PTS Allison transmission.
For more information visit:

https://www.cummins.com/engines/school-bus
https://psiengines.com/products/8-8-liter/
https://www.allisontransmission.com/transmissions/models/pupil-transport-shuttle-series

Seats Belts – BTI
IC Bus provides many options for student seating and has been a leader in upgradeable seating technology which allows for future upgrades to seating without removing the factory installed seat attachment bolts. The standard production seats can be upgraded with lap belts, 3 point belts, and child restraints. This allows a bus fleet to easily adapt to future legislation for student safety. IC offers BTI 3 point seats including the Safeguard SmartFrame Plus technology which is an industry leading enhancement to compartmentalization protecting not only the belted passengers but also the un-belted passengers.
For more information visit:
https://www.imminet.com/products/safeguard/bti/

Driver First
Finding and maintaining good bus drivers can be difficult. At IC Bus, we have a Driver First philosophy which focuses on making the driver's work easier and more comfortable so that they can be focused on the precious load they are carrying.
The CE Bus driver's controls were designed based on a thorough study of real school bus driver anthropometric data, not truck driver data. This means that the common driver controls are within easy reach for the widest variety of driver shapes and sizes. We offer a variety of driver's seats, mirrors, tilt/telescoping steering column, and adjustable pedals to accommodate all drivers. Our entrance door and full width steps are the industry's widest allowing for easy ingress and egress.
For more information visit:
https://www.icbus.com/why-icbus/driverfirst

Corrosion Prevention
For school buses that operate in cold climates with chemically treated roads, IC Bus offers some options to help prevent corrosion. Optional Chem Guard floor coating is applied to the sheet metal used to form the floor panels. The metal is coated on the top and bottom including the floor sills. The standard Naviflex stepwell provides steps with the pebble tread stamped in the sheet metal and sprayed with the Naviflex coating. A white pebble tread nosing is applied to the front edge of the step. This offers the industry's best coating on the inside and outside of the stepwell. Another great option is the front bumper coated with Naviflex. All exterior lighting can also be ordered with stainless steel fasteners.

Factory A/C
IC Bus offers many variations of body A/C using 13 cubic inch displacement compressors to cool all body configurations. Dash A/C is also available with or without body A/C.

Prewire
Fused wiring access can be provided to simplify some aftermarket installation for GPS routing systems,

		internal/external cameras, 2-way radios,	
38	Describe any “green” initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	The Tulsa Bus Plant, plus our Truck Manufacturing facilities are ISO 14001 Certified. Awarded Dept. of Energy 'Better Plants Program" for reducing energy intensity by 25% over 10 years. Navistar achieved that goal 2 years early. 56% of all waste is recycled. Tulsa Bus Plant even bought their own auger to turn pallets to mulch. Odd size or remnants are often not accepted at formal facilities so they elected to do their own! • Plant is ISO 14001 Certified since 2003 • Energy team to utilize and control all footprints of electrical usage • Green Recycling- Eco wood- pallets are recycled for playground mulch -https://www.ecowoodsolutions.com/ • Auger recycle pallets • Recycle scrap metal • Recycle Cardboard bales Plants have achieved 50% Greenhouse Gas Reduction since 2008 baseline year. Springfield Assy. invested in its own waste water treatment plant. Navistar has reduced its water withdrawal by 65% across all manufacturing operations since 2012. https://www.navistar.com/StaticFiles/navistar/whoweare/Navistar_Sustainability_Report_2018.pdf	*
39	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	Navistar does not have any third party eco-labels beyond USEPA compliance on all vehicles and engines manufactured.	*
40	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	We are committed to diversity both internally within our workforce and externally with our supply base. We have a Supplier Diversity Program to bring awareness and emphasis to our business practices. We continue to grow our commitment and purchases from our diversity business partners. We embrace diversity as a way of business. Our Supplier Diversity Program is designed to develop and foster strategic supplier relationships with companies owned by minorities, women, veterans, and small business enterprises. Navistar Diversity Spend: $927,000,000 - 2019 $277,000,000 - through 3/31/20 WHO QUALIFIES FOR NAVISTAR’S SUPPLIER DIVERSITY PROGRAM Small Business A small business refers to a U.S. for-profit business that meets the U.S. Small Business Administration’s established numerical definitions of small business or size standards.For more information visit: //www.sba.gov/content/am-i-small-business-concern.Minority-Owned Business A minority-owned business refers to a business that is at least 51 percent owned, controlled, and operated on a daily basis by a minority group. Minority group members are United States citizens who are Asian, Black, Hispanic, or Native American.Woman-Owned Business A woman-owned business refers to a business that is at least 51 percent owned, controlled, and operated on a daily basis by a woman.Veteran-Owned Business A veteran-owned business refers to a business that is at least 51 percent owned, controlled, and operated on a daily basis by veterans. A veteran is a person who served on active duty with the U.S. Army, Air Force, Navy, Marine	

DocuSign Envelope ID: 1A072C1F-9A34-4074-82EF-0650CEB8DB71

Corps or Coast Guard, who was discharged or released under conditions other than dishonorable. Reservists or members of the National Guard called to federal active duty or disabled from a disease or injury incurred or aggravated in the line of duty or while in training status also qualify as a veteran.Service-Disabled Veteran Owned Business
A service-disabled veteran-owned business refers to a business that is at least 51 percent owned, controlled, and operated on a daily basis by service-disabled veterans; or in the case of a veteran with a permanent and severe disability, a spouse or permanent caregiver of such veteran; and some businesses may be owned and operated by an eligible surviving spouse. A service-disabled veteran is a veteran who possesses either a disability rating letter issued by the Department of Veterans Affairs, establishing a service-connected rating between 0 and 100 percent, or a disability determination from the Department of Defense. Reservists or members of the National Guard disabled from a disease or injury incurred or aggravated in the line of duty or while in training status also qualify.8(a) Certified Business
An 8(a) certified business refers to a business that participates in the 8(a) business development program, which is a program that offers a broad scope of assistance to socially and economically disadvantaged firms.For more information visit: //www.sba.gov/content/8a-business-development-0.Small Disadvantaged Business
A small disadvantaged business refers to a small business that is at least 51 percent owned, controlled, and operated on a daily basis by one or more disadvantaged persons. A disadvantaged person includes Black, Hispanic, Native, Asian Pacific, and Subcontinent Asian Americans.For more information visit: //www.sba.gov/content/disadvantaged-businesses.HUBZone Certified Business
A HUBZone certified business refers to a small business that is located in HUBZone (Historically Underutilized Business Zone), is owned and controlled by one or more United States Citizens, and at least 35% of its employees reside in a HUBZone.For more information visit: //www.sba.gov/content/understanding-hubzone-program.AbilityOne Qualified Nonprofit Agency
An AbilityOne qualified nonprofit agency refers to a nonprofit agency that participates in the AbilityOne Program. To participate in the AbilityOne Program, nonprofit agencies must associate with either NIB (National Industries for the Blind) or NISH. The AbilityOne Program is a federal initiative to help people who are blind or have other significant disabilities find employment.For more information visit: //www.abilityone.gov.

Navistar's prime suppliers are expected to support us by making every effort to provide contract opportunities to diverse suppliers.As a result of our strong support of diverse and small business development, we have implemented a Second Tier Reporting System, which requires all prime suppliers with the contracts of $650,000 or more to report their diversity spend quarterly directly into our database. This is considered our Second Tier Spend.	
41	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	The largest school bus dealer network in the U.S. and Canada to sell and service the products enumerated within this rfp. We are dedicated to the school bus business with both CE and RE products. IC Bus strives to meet FTA Buy America regulations set forth in 49 CFR § 661.11 and will provide a Buy America Certification document (see attached sample for the RE series model) that provides the detailed percentage of domestic (U.S.) origin components for a particular model year vehicle. and if required, would conform to Buy America standards. An award winning Parts Distribution system designed to minimize downtime and have the right parts available at the right time, for our dealers and thus the Member customers. Environmentally favorable products that encompass both Clean Diesel, alternative fueled propane products, and re-manufactured goods.	*

Table 9: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
42	Do your warranties cover all products, parts, and labor?	IC Bus Base Warranty does cover all products, parts, and labor, less maintenance parts and or abuse for the first 12 months of service. Many components, especially key components such as Engines, Transmissions, Frame Rails, Axles, and Seat Frames and Foams, have significantly longer warranty periods.	*

43	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	The IC Warranty Document (attached) will clarify. 1. The warranty coverage document also covers restrictions of coverage, competitive with rest of industry restrictions/limitations. 2. External influence, damage, modifications, etc. 3. Failure due to improper use, misapplication or abuse could be denied. 4. Failure due to improper maintenance, storage deterioration, etc. 5. Supplier Direct warranty requirements i.e. Cummins/Allison etc.	*
44	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	1. On-road vehicles that are still under towing coverage, have a unit disabling failure, and covered by towing coverage can be repaired at failure site. When this is more cost effective and can be properly repaired without towing the unit back to a dealer, we will reimburse for the road call in lieu of the tow expense. 2. This is not covered under the standard warranty period.	*
45	Are there any geographic regions of the United States (and Canada, if applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	All 50 U.S. States, and the Canadian Provinces and Territories are included for coverage.	*
46	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	Navistar does cover many supplier- based components through the standard warranty period. However, as indicated above there are a few Suppliers such as Cummins/Allison that require their concerns to return to their distributors for repair and warranty. Additionally, supplier direct warranties may be available from the supplier subsequent to the 12 month IC Bus warranty. Equipment installed at the dealer, or an aftermarket modification center are not covered by the IC Bus warranty. These items would be warranted by the selling dealer and/or the aftermarket modification center itself.	*
47	What are your proposed exchange and return programs and policies?	1. Our vehicles will be delivered as ordered and warranted free of defects and workmanship. If a vehicle is not performing to the level expected, we will engage the appropriate Field Service Personnel including our Technical Field Service Manager to expedite a repair plan. Our expectation is to not only resolve your concern fully, but also in a timely manner.	*
48	Describe any service contract options for the items included in your proposal.	IC Bus offers a multitude of Extended Service Contracts Extended Service Contracts Towing @ $275 per incident Towing @ $550 per incident Towing @ $1,100 per incident Extended Vehicle Coverage Including Body Extended Vehicle Coverage Excluding Body PrePackaged Component Systems - Starter and Alternator PrePackaged Component Systems - Electrical PSI Comprehensive Propane Engine PSI Comprehensive Gasoline Engine Cummins Full Engine Cummins Full Engine Minus Maintenance Cummins Major Components Cummins Full Engine, Minus Injectors Cummins Full Engine + Aftertreatment	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
49	What are your payment terms (e.g., net 10, net 30)?	Payment terms are as specified by the selling dealer, the school bus industry is characterized typically by payment upon delivery.	*
50	Do you provide leasing or financing options, especially those options that schools and governmental entities may need to use in order to make certain acquisitions?	There are many finance lease options available within the industry, your selling dealer will be the local subject matter expert.	*
51	Briefly describe your proposed order process. Include enough detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template. For example, indicate whether your dealer network is included in your response and whether each dealer (or some other entity) will process the Sourcewell participating entities' purchase orders.	The IC Bus Dealer will verify the requesting entity is a Sourcewell Member. If the requesting entity is not a Sourcewell Member the dealer will assist them in becoming a Member. Once the Member has determined the specifications of the bus, the IC Bus Dealer will price the bus using the Sourcewell IC Bus workbook developed for this contract. It assures the Member obtains the bus priced properly at the prescribed in the contract and provides an easy to read template laying out prices and discounts. The IC Bus dealer will submit the information to our Finance Team (CSA) who provides them an authorization number. Upon receipt of the Member P.O., the selling dealer sends the workbook and the P.O. and orders upon the factory. The selling dealer will shortly receive a job number and VIN. The unit will be identified by a special Feature Code so they can be easily tracked in the system. If purchased from Stock, the authorization number will be utilized for tracking purposes. Order to build timing will vary based on seasonality and is generally in the 120-150 day timeframe.	*
52	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	P-Card usage and terms would be specified by the selling dealer. Generally, school bus purchase is outside the scope of P-Card usage. Any fees imposed by the process would be above the discount and selling structure described herein.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as desribed in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	

53	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	IC Bus will utilize a pricing program for the IC Bus dealers that defines a percentage of discount off the list price of all the vehicles. Inclusive of base chassis and options. Total Chassis and Options List, less percentage discount equals the selling price of the chassis. Spreadsheet in Appendix along with a sample proposal for each model and key configuration. Sourcewell Members can modify the specifications to their needs and local requirements and are not limited to the specifications submitted. IC Bus pricing for the 2020 Sourcewell RFP for School Buses with Related Accessories (RFP #63020) is based on the U.S. dollar. For units purchased by Sourcewell Members in Canada an exchange rate will be added to the pricing on the Sourcewell Member's proposal. IC Bus utilizes this same process for pricing with its dealers and Education customers in Canada. IC Bus will provide the selling dealer with the appropriate exchange rate when the unit is quoted and that exchange rate will be honored for 60 days. IC Bus has a dedicated school bus representative in Canada to serve the Canadian dealers and Canadian Sourcewell members.
54	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	There are unique discount percents for the CE with Diesel engine, CE with Propane engine, CE with Gasoline engine and RE with Diesel engine. Model MSRP Discount Transaction CE w/Diesel $185,368 54.5% $84,342.44 CE w/Propane $197,561 52.5% $93,841.48 CE w/Gasoline $186,471 55.3% $83,352.54 RE w/Diesel $253,781 55.2% $113,693.89 Pricing will be locked into the Summer Price Pages for a year at a time. Federally Mandated Surcharges and Emissions will be added as required.
55	Describe any upcharge and/or discount structure that applies on a State-by-State or Province-by-Province basis for Sourcewell Participating Entities in the US or Canada. Upload relevant pricing materials (if applicable) in the document upload section of your response.	There is no geographical differentiation. End unit pricing will of course vary based upon specification chosen. Each unit will of course comply with the discount structure detailed in 53, 54, and 56.
56	Describe any quantity or volume discounts or rebate programs that you offer.	Orders of 5 or more will receive an additional $1500 discount per unit. Orders of 20 or more will receive an additional $1500 discount per unit. Volume pricing can mix/match CE and RE models and option content. (example; $3000 per unit therefore on a 22 unit order of 17 CE and 5 RE)
57	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	The IC Dealers have access to the IC Bus Custom Bus Center where additional non-stock goods can be added. These goods would be quote-based from the IC dealer to the Sourcewell Member. CBC added goods carries a 12 month warranty. Goods purchased outside of the bus assembly process, including the CBC can be added to the Member's proposal with a handling fee not to exceed 5% of these Goods and Modifications.

58	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	IC Bus charges the dealers a storage fund fee of $140 and as such would be added below the vehicle price line and be included within the Total Cost quoted to the Member.	*
59	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	IC Bus dealers contract their own freight and as such would be added below the vehicle price line and be included within the Total Cost quoted to the Member.	*
60	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	IC Bus dealers contract freight independent of IC Bus, as such freight charges will be added into the Total Cost and be below the vehicle price line.	*
61	Describe any unique distribution and/or delivery methods or options offered in your proposal.	IC Bus dealers can arrange delivery options with the Sourcewell Member that may be more suitable for local conditions or needs. These unique delivery options would be a matter for the Sourcewell Member and the IC Dealer.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments	
62	a. the same as the Proposer typically offers to an individual municipality, university, or school district.	IC Bus has offered additional incentives for larger awards.	

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
63	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell.	We will establish a required Feature Code similar to how our Vocational Truck Group monitors the units. Also within our pricing methodology the dealer pricing will need to be submitted for verification. This will ensure member pricing as well as provide a secondary audit trail.	*
64	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	IC Bus is pleased to provide Sourcewell with following administrative fee. CE School Bus - $1500 RE School Bus - $1500 These rebates are not in the dealers' proposal and will be paid quarterly along with the detailed summary sheet. Parts purchased on Sourcewell Fleet Charge Program, Sourcewell will receive .5% (.005) of the total sales to Sourcewell Members using Fleet Charge	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *	

65	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	IC Bus produces Type C school buses for regular route, Special Needs and MFSAB, the same is true for the RE product. The CE has the option of the B6.7 Cummins diesel engine, the PSI 8.8L Propane or Gasoline engine all with the Allison 2500 PTS as standard. The RE is offered with the L9 Cummins wet sleeve diesel engine and the Allison 3000 PTS as standard. The school bus industry has a myriad of needs resulting in option availability beyond the scope of this document. Our dealers stand well positioned to assist with any Member in the spec'ing of their unit for the needs and local specifications required. We also offer our Custom Bus Center to assist any Member in adding equipment and making changes to the unit beyond what is factory offered. General: Frame rails are a high strength low alloy steel painted prior to mounting of the body. The rails are also laser aligned, machine punched, and powder coated prior to assembly and all assembly uses Grade 8 bolts. The frame is reinforced with an inverted “L” in the front shock mount area. All units are equipped with a yellow crossing gate, electrically actuated on the front contoured heavy- duty bumper. Front springs are parabolic taper leaf. Air brakes are standard with color and size coded nylon air lines. Automatic slack adjusters are standard as is ABS and ATC. This is in addition to the aforementioned ESC and Advanced Collision Mitigation system. Power steering with tilt steering and steering wheel mounted switches are standard. These switches can be deployed elsewhere or mounted in a redundant fashion also. Daytime Running Lights are standard, as is the one-piece tilt hood with integral air pre-cleaner to enhance air filter life and prevent water intrusion. An air cleaner mounted air restriction gauge is included. All IC bodies utilize a 78” headroom ceiling, and an industry leading 36” wide entrance door. The rear emergency door has hidden hinges to prevent corrosion. The body side sheets are 16-gauge smooth steel as are the side skirts. Insulation for roof and sides is included. IC Bus Leave No Student Behind push button post trip inspection system is standard. 18” electric, metal blade Stop Arm with incandescent lights is standard. This highlights some of the key features to be found on the IC Bus. Custom Bus Center (CBC): The CBC is an offline installation center for the Tulsa Bus Plant. The CBC can provide quotes to install items commonly installed in the aftermarket. Some examples include internal/external camera systems, WiFi router, USB outlets, etc. Check out the IC Bus YouTube channel for more great information. https://www.youtube.com/user/NavistarICBus/featured?disable_polymer=1

66	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	IC Bus is here to serve the Sourcewell Membership, in the event a member needs a special feature or chassis configuration that may not be readily apparent do not hesitate to ask your local IC Bus dealer you are working with, or you can reach out to the contacts listed Randall Ray, or Katie Stok.	*

Table 14B: Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed school bus type is offered within your proposal and, for each available bus type, the engine or power alternatives that you offer within the type. Provide additional comments in the text box provided, as necessary.

Line Item	Bus Type	Offered *	Engine - Gas & Diesel *	Engine - CNG or Propane *	Engine - Hybrid or Alt Fuel *	Electric Powered *	Comments

Table 15: Industry Specific Questions

Line Item	Question	Response *	
71	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Member satisfaction survey. Number of proposals generated. Number of units ordered. Communication of goals and results within the IC Bus team. Campaigns to reach Members. Training and presentations for the IC Bus network.	*
72	Describe the safety features and innovations incorporated in the manufacturing of your buses that impact student safety.	IC Bus is proud to be the first to introduce Active Collision Mitigation. Active Collision Mitigation goes beyond warnings to the driver, the ACM system will brake the vehicle as needed when following too close to the preceding vehicle. The Fusion upgrade available will brake the vehicle when a stationary vehicle is detected in the roadway in addition to following too close. Fusion also adds Lane Departure Warning and Overspeed Notification. IC Bus utilizes the IMMI passenger seats which have a unique frame within a frame design. Doing so allows both belted and unbelted passengers the maximum protection available. Construction of the base bus utilizes 16 gauge side sheets as standard, the thickest available as a side sheet, and a fuel tank cage that is both, inside of the frame rails and is a cage unto itself. Essentially creating a double layer of protection. Remote Diagnostics as offered through the On Command Connection system comprise a unique safety system by reducing the risk of an on-highway breakdown.	*
73	Identify any bus types, models, configurations, or engine/power alternatives that are not yet available in your bus offerings but that are scheduled to be released during the anticipated term of the Sourcewell contract.	The primary new model to debut within this contract will be the launch of a full Electric School Bus, or EV. The EV is currently being prototyped and readied for limited delivery beyond this closing date. It will come to full production during this contract period. IC Bus will continue to enhance and upgrade its models in powertrain, body, and electrical, to maintain and/or exceed competitive needs within the industry.	*
74	Describe any options, accessories, supplies, parts, and services that you are proposing that are not described in any other section of your response. Upload relevant pricing materials (as applicable) in the document upload section of your response.	See attached Parts Program.	*

Table 16: Exceptions to Terms, Conditions, or Specifications Form

Line Item 75. **NOTICE**: To identify any exception, or to request any modification, to the Sourcewell template Contract terms, conditions, or specifications, a Proposer must submit the exception or requested modification on the **Exceptions to Terms, Conditions, or Specifications Form** immediately below. The contract section, the specific text addressed by the exception or requested modification, and the proposed modification must be identified in detail. Proposer's exceptions and proposed modifications are subject to review and approval of Sourcewell and will not automatically be included in the contract.

Contract Section	Term, Condition, or Specification	Exception or Proposed Modification

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as “Marketing Plan.”

Proposer's Affidavit

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor’s objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:

    a. Included on the “Specially Designated Nationals and Blocked Persons” list maintained by the Office of Foreign

Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

b. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://www.sam.gov/portal/3; or

c. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Randall Ray, Sales Education and Training Director, IC Bus, LLC

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

IC Bus #063020-ICB

Pricing for contract #063020-ICB offers Sourcewell participating agencies the following discounts:

- Diesel, propane, and gas units: 52.5% to 55.3% discount off list price
- Electric units: 4.5% to 5.5% discount off list price
- Volume discounts apply as follows:
    - 5 or more vehicles purchased in one transaction will get an additional $1,500 per vehicle discount
    - 20 or more vehicles purchased in one transaction will get an additional $1,500 per vehicle discount (totaling $3,000 per vehicle discount)

**IC Bus is implementing a new price page schedule on all new orders.

**IC Bus is implementing a surcharge of $2,000/bus on all new orders.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

Solicitation Number: RFP #063020

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and The Lion Electric Co., 921 Chemin de la Rivière du N Saint-Jérôme QC J7Y 5G2 (Vendor).

Sourcewell is a State of Minnesota local government agency and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada.

Vendor desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires August 15, 2024, unless it is cancelled sooner pursuant to Article 24. This Contract may be extended up to one additional one-year period upon request of Sourcewell and with written agreement by Vendor.

C. SURVIVAL OF TERMS. Articles 11 through 16 survive the expiration or cancellation of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Vendor will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above. Vendor's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new/current model. Vendor may offer close-out or refurbished Equipment or Products if they are clearly indicated in

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

Vendor's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Vendor warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Vendor warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Vendor's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that is effective past the expiration of the Vendor's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution, Vendor will make available to Sourcewell a means to validate or authenticate Vendor's authorized dealers, distributors, and/or resellers relative to the Equipment, Products, and Services related to this Contract. This list may be updated from time-to-time and is incorporated into this Contract by reference. It is the Vendor's responsibility to ensure Sourcewell receives the most current version of this list.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced as stated in Vendor's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Vendor must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

Vendor must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Vendor in breach of this Contract if the Vendor intentionally delivers substandard or inferior Equipment or Products. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Vendor as soon as possible and the Vendor will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

B. SALES TAX. Each Participating Entity is responsible for supplying the Vendor with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Vendor may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Vendor determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Vendor may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Contract Administrator. This form is available from the assigned Sourcewell Contract Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

A fully executed Sourcewell Price and Product Request Form will be become an amendment to this Contract and be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Vendor understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Vendor is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential members to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Vendor's employees may be required to perform work at government-owned facilities, including schools. Vendor's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Vendor that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Vendor. Typically, a Participating Entity will issue an order directly to Vendor. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration of this Contract; however, Vendor performance, Participating Entity payment, and any applicable warranty periods or other Vendor or Participating Entity obligations may extend beyond the term of this Contract.

Vendor's acceptable forms of payment are included in Attachment A. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order may be negotiated between a Participating Entity and Vendor, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entitles may require the use of a Participating Addendum; the terms of which will be worked out directly between the Participating Entity and the Vendor. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. PERFORMANCE BOND. If requested by a Participating Entity, Vendor will provide a performance bond that meets the requirements set forth in the Participating Entity's order.

D. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements) not addressed in this Contract, the Participating Entity and the Vendor may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

E. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, upon reasonable notice to Vendor in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the goods to be purchased;
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements; or
3. Vendor commits any material breach of this Contract or the additional terms agreed to between the Vendor and a Participating Entity.

F. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Vendor will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

B. BUSINESS REVIEWS. Vendor must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Vendor must provide a contract sales activity report (Report) to the Sourcewell Contract Administrator assigned to this Contract. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Vendor must submit a report indicating no sales were made).

The Report must contain the following fields:

- Customer Name (e.g., City of Staples Highway Department);
- Customer Physical Street Address;
- Customer City;
- Customer State/Province;
- Customer Zip Code;
- Customer Contact Name;
- Customer Contact Email Address;
- Customer Contact Telephone Number;
- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Vendor.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Vendor will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Vendor may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Vendor will submit a check payable to Sourcewell for the percentage of administrative fee stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Sourcewell-assigned contract number in the memo and must be mailed to the address above “Attn: Accounts Receivable.” Payments must be received no later than 45 calendar days after the end of each calendar quarter.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

Vendor agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Vendor is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Vendor in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Vendor's Authorized Representative is the person named in the Vendor's Proposal. If Vendor's Authorized Representative changes at any time during this Contract, Vendor must promptly notify Sourcewell in writing.

10. ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. ASSIGNMENT. Neither the Vendor nor Sourcewell may assign or transfer any rights or obligations under this Contract without the prior consent of the parties and a fully executed assignment agreement. Such consent will not be unreasonably withheld.

B. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been fully executed by the parties.

C. WAIVER. If either party fails to enforce any provision of this Contract, that failure does not waive the provision or the right to enforce it.

D. CONTRACT COMPLETE. This Contract contains all negotiations and agreements between Sourcewell and Vendor. No other understanding regarding this Contract, whether written or oral, may be used to bind either party.

E. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. LIABILITY

Vendor must indemnify, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees, arising out of the performance of this Contract by the Vendor or its agents or employees; this indemnification includes injury or death to person(s) or property alleged to have been caused

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications.

12. AUDITS

Sourcewell reserves the right to review the books, records, documents, and accounting procedures and practices of the Vendor relevant to this Contract for a minimum of 6 years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

13. GOVERNMENT DATA PRACTICES

Vendor and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell under this Contract and as it applies to all data created, collected, received, stored, used, maintained, or disseminated by the Vendor under this Contract.

If the Vendor receives a request to release the data referred to in this article, the Vendor must immediately notify Sourcewell and Sourcewell will assist with how the Vendor should respond to the request.

14. INDEMNIFICATION

As applicable, Vendor agrees to indemnify and hold harmless Sourcewell and its Participating Entities against any and all suits, claims, judgments, and costs instituted or recovered against Sourcewell or Participating Entities by any person on account of the use of any Equipment or Products by Sourcewell or its Participating Entities supplied by Vendor in violation of applicable patent or copyright laws.

15. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:
    a. Sourcewell grants to Vendor a royalty-free, worldwide, non-exclusive right and license to use theTrademark(s) provided to Vendor by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Vendor.
    b. Vendor grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Vendor's Trademarks in advertising and promotional materials for the purpose of marketing Vendor's relationship with Sourcewell.
2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to its and their respective distributors, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

promotional materials for the purpose of marketing the Parties' relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.

3. *Use; Quality Control.*

a. Sourcewell must not alter Vendor's Trademarks from the form provided by Vendor and must comply with Vendor's removal requests as to specific uses of its trademarks or logos.

b. Vendor must not alter Sourcewell's Trademarks from the form provided by Sourcewell and must comply with Sourcewell's removal requests as to specific uses of its trademarks or logos.

c. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's Trademarks only in good faith and in a dignified manner consistent with such party's use of the Trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

4. *Termination*. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of vendors which may be used until the next printing). Vendor must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Vendor individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Materials should be sent to the Sourcewell Contract Administrator assigned to this Contract.

D. ENDORSEMENT. The Vendor must not claim that Sourcewell endorses its Equipment, Products, or Services.

16. GOVERNING LAW, JURISDICTION, AND VENUE

Minnesota law governs this Contract. Venue for all legal proceedings out of this Contract, or its breach, must be in the appropriate state court in Todd County or federal court in Fergus Falls, Minnesota.

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

17. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

18. SEVERABILITY

If any provision of this Contract is found to be illegal, unenforceable, or void then both Sourcewell and Vendor will be relieved of all obligations arising under such provisions. If the remainder of this Contract is capable of performance, it will not be affected by such declaration or finding and must be fully performed.

19. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Vendor will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Vendor may escalate the resolution of the issue to a higher level of management. The Vendor will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, both parties must continue without delay to carry out all of their responsibilities under the Contract that are not affected by the dispute. If a Party fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, any additional costs incurred as a result of such failure to proceed will be borne by the Party in fault.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

Written notice of default and a reasonable opportunity to cure must be issued by the party claiming default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

20. INSURANCE

A. REQUIREMENTS. At its own expense, Vendor must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*
Workers' Compensation: As required by any applicable law or regulation.
Employer's Liability Insurance: must be provided in amounts not less than listed below:
Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Vendor will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.
Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for Products-Completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Vendor will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.
Minimum Limits:
$1,000,000 each accident, combined single limit

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

4. *Umbrella Insurance*. During the term of this Contract, Vendor will maintain umbrella coverage over Workers' Compensation, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

Failure of Vendor to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Vendor must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Contract Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf. All policies must include there will be no cancellation, suspension, non-renewal, or reduction of coverage without 30 days' prior written notice to the Vendor.

Upon request, Vendor must provide to Sourcewell copies of applicable policies and endorsements, within 10 days of a request. Failure to request certificates of insurance by Sourcewell, or failure of Vendor to provide certificates of insurance, in no way limits or relieves Vendor of its duties and responsibilities in this Contract.

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Vendor agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Vendor's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Vendor, and products and completed operations of Vendor. The policy provision(s) or endorsement(s) must further provide that coverage is primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds.

D. WAIVER OF SUBROGATION. Vendor waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other insurance applicable to the Vendor or its subcontractors. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Vendor or its subcontractors. Where permitted by law, Vendor must require similar written express waivers of subrogation and insurance clauses from each of its subcontractors.

E. UMBRELLA/EXCESS LIABILITY. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies).

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

F. SELF-INSURED RETENTIONS. Any self-insured retention in excess of $10,000 is subject to Sourcewell's approval.

21. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Vendor must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Vendor conducts with Sourcewell and Participating Entities.

22. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Vendor certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Vendor declares bankruptcy, Vendor must immediately notify Sourcewell in writing.

Vendor certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Vendor further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

23. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Participating Entities that use United States federal grant or FEMA funds to purchase goods or services from this Contract may be subject to additional requirements including the procurement standards of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 C.F.R. § 200. Participating Entities may also require additional requirements based on specific funding specifications. Within this Article, all references to "federal" should be interpreted to mean the United States federal government. The following list only applies when a Participating Entity accesses Vendor's Equipment, Products, or Services with United States federal funds.

A. EQUAL EMPLOYMENT OPPORTUNITY. Except as otherwise provided under 41 C.F.R. § 60, all contracts that meet the definition of "federally assisted construction contract" in 41 C.F.R. § 60-

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

1.3 must include the equal opportunity clause provided under 41 C.F.R. §60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 C.F.R. §, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 C.F.R. § 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor." The equal opportunity clause is incorporated herein by reference.

B. DAVIS-BACON ACT, AS AMENDED (40 U.S.C. § 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. § 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 C.F.R. § 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 C.F.R. § 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency. Vendor must be in compliance with all applicable Davis-Bacon Act provisions.

C. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. § 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations (29 C.F.R. § 5). Under 40 U.S.C. § 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence. This provision is

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

hereby incorporated by reference into this Contract. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

D. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT. If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 C.F.R. § 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

E. CLEAN AIR ACT (42 U.S.C. § 7401-7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. § 1251-1387). Contracts and subgrants of amounts in excess of $150,000 require the non-federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. § 7401- 7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. § 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Vendor certifies that during the term of this Contract will comply with applicable requirements as referenced above.

F. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689). A contract award (see 2 C.F.R. § 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 C.F.R. §180 that implement Executive Orders 12549 (3 C.F.R. § 1986 Comp., p. 189) and 12689 (3 C.F.R. § 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. Vendor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency.

G. BYRD ANTI-LOBBYING AMENDMENT, AS AMENDED (31 U.S.C. § 1352). Vendors must file any required certifications. Vendors must not have used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Vendors must disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the non-federal award. Vendors must file all certifications and disclosures

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352).

H. RECORD RETENTION REQUIREMENTS. To the extent applicable, Vendor must comply with the record retention requirements detailed in 2 C.F.R. § 200.333. The Vendor further certifies that it will retain all records as required by 2 C.F.R. § 200.333 for a period of 3 years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

I. ENERGY POLICY AND CONSERVATION ACT COMPLIANCE. To the extent applicable, Vendor must comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

J. BUY AMERICAN PROVISIONS COMPLIANCE. To the extent applicable, Vendor must comply with all applicable provisions of the Buy American Act. Purchases made in accordance with the Buy American Act must follow the applicable procurement rules calling for free and open competition.

K. ACCESS TO RECORDS (2 C.F.R. § 200.336). Vendor agrees that duly authorized representatives of a federal agency must have access to any books, documents, papers and records of Vendor that are directly pertinent to Vendor's discharge of its obligations under this Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right also includes timely and reasonable access to Vendor's personnel for the purpose of interview and discussion relating to such documents.

L. PROCUREMENT OF RECOVERED MATERIALS (2 C.F.R. § 200.322). A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. § 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

24. CANCELLATION

Sourcewell and Vendor may cancel this contract at any time by mutual written agreement. Sourcewell or Vendor may also cancel this Contract, with or without cause, upon 60 days' written notice to the other party. Among other causes, Sourcewell may cancel this Contract

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

immediately upon discovery of a material defect in any certification made in Vendor's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Specifications

Table 1: Proposer Identity & Authorized Representatives

General Instructions (applies to all Tables) Sourcewell prefers a brief but thorough response to each question. Please do not merely attach additional documents to your response without also providing a substantive response. Do not leave answers blank; mark "NA" if the question does not apply to you (preferably with an explanation).

Line Item	Question	Response *	
1	Proposer Legal Name (and applicable d/b/a, if any):	The Lion Electric Co.	*
2	Proposer Address:	921 Chemin de la Rivière du N, Saint-Jérôme, QC J7Y 5G2 Please refer to our Parts and distribution section of our Sales, Service, Distribution Centers pamphlet for all our additional addresses and places of business.	*
3	Proposer website address:	www.thelionelectric.com	*
4	Proposer's Authorized Representative (name, title, address, email address & phone) (The representative must have authority to sign the "Proposer's Assurance of Compliance" on behalf of the Proposer and, in the event of award, will be expected to execute the resulting contract):	Name: Marc-Andre Page Title: Vice President of Commercial Operations Address: 921 Chemin de la Rivière du N, Saint-Jérôme, QC J7Y 5G2 Phone number: 450-512-5065 Email address: Marcandre.page@thelionelectric.com	*
5	Proposer's primary contact for this proposal (name, title, address, email address & phone):	Name: Marie Bedard Title: Director of Commercial Operations Address: 921 Chemin de la Rivière du N, Saint-Jérôme, QC J7Y 5G2 Phone number: 514-717-3703 Email address: Marie.bedard@thelionelectric.com	*
6	Proposer's other contacts for this proposal, if any (name, title, address, email address & phone):	Name: Nate Baguio Title: Vice President, Sales Address: 4522 Parker Ave, Suite 350, McClellan Park, CA 95652 Phone number: 310-266-1972 Email address: nate.baguio@thelionelectric.com	

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	
7	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	EXECUTIVE SUMMARY The Lion Electric Co. (Lion) is the leading purpose-built, zero-emission school bus manufacturer. Our technology is proven, with over 300 electric school buses on the road throughout North America, able to travel up to 155 miles (250 km) on a single charge and satisfying the majority of school bus route ranges. THE LEADER IN THE BATTERY ELECTRIC ARENA WITH THE MOST EXPERIENCE IN THE MARKET Because our vehicles are deployed throughout the continent, we're one of the only school bus manufacturers that can confidently say that we haven't experienced battery failure in any extreme climate conditions: frigid or hot. The objectives of this proposal are to successfully deploy electric school buses tailored to your requirements and the unique needs of Sourcewell participating entities.	

Our team specializes in zero-emission school bus applications and is one of the few manufacturers in North America to dedicate its production to zero-emission, fully integrated vehicles only. Our electric buses are celebrated, and Lion's accomplishments are quantifiable as one of the few OEMs with electric buses on the road today.

Lion developed its all-electric buses based on direct end-user feedback, including optimization of visibility and unparalleled tight turning radius, thus ensuring rapid adoption from drivers. Our technology has been tested and proven in real-life settings; we have gathered battery data from all our deployed vehicles and developed an expertise with battery electric vehicles that cannot be equaled. Additionally, Lion is one of only a few OEMs that does not offer a "retrofit" solution on a diesel bus. Our school buses are purpose-built to be electric.

Lion vehicle components require very little maintenance, thus reducing costs, as there are no fluids and fewer moving parts on our vehicles than on internal combustion vehicles. Our vehicles also have regenerative braking that reduces the number of times the brakes need to be replaced, which further reduces the total cost of ownership and also extends the vehicle range. We represent the best return on investment for Sourcewell members. You can find out more about how our technology reduces overall costs in the RETURN ON INVESTMENT pamphlet of our RFP response.

In addition to operational and economic benefits, our zero-emission buses eliminate criteria pollutant and greenhouse gas emissions in North American communities, and create a safer, cleaner, and healthier environment for children and the drivers who operate the buses every day. Further, Lion continues to influence policies on electrification and fight against transportation technologies that cause criteria pollutant and greenhouse gas emissions.
Benefits for the end users have always been at the forefront of our manufacturing policies, but when it comes to ensuring children's health, Lion has decided to take the lead regarding educating legislators, associations, school districts and operators along with the public and all transportation professionals. Here are a few examples of Lion's leadership in the school bus industry:

Lion joined discussions with Sierra Club (a national and grassroots non-profit organization committed to protecting the environment) to find ways to best leverage electric vehicles; throughout legislators' proposed decrees and agendas, their plans for the reduction of pollutant gas emissions in their communities and the funding opportunities.

To raise awareness for the endurance of the electric vehicle, Lion's fully electric school bus is the first of its kind to compete in RODEO and almost won. It was a great example of Lion electric school buses power and agility.

Lion partnered with Mothers Out Front Association by organizing joint webinars and educating operators about the benefits in replacing pollutant diesels buses with electric school buses in their respective school districts.

To drive the need for legislature and funding for children's health and community health while reducing substantial gas emissions on their routes, Lion presented their school bus equipment to the California Energy Commission and won 5 out of the 6 categories of the proposed request for proposal for Bulk Purchase. This award could lead to hundreds of additional Lion electric school buses on the road in the very near future, with already more than 15 of the awarded buses on the road today.

Due to Lion's constant leadership on issues involving

gas emission reduction and electrification of children's transportation, CTE has even featured key members of the Lion team in an article regarding women in electrification space.

Lion is extremely well-positioned today to significantly grow its market share in the US in the short- and long-term.

Lion also has the fastest delivery timeline in the industry. Over the past decade, we have built a team that specializes in zero-emission bus deployments and has unparalleled skills and knowledge in the all-electric school bus industry. This team is poised to work with Sourcewell members to deploy zero-emission buses across North America. Each team member has relevant experience in school bus electrification and brings extensive knowledge in their respective field of expertise.

Electrifying bus fleets is a critical part of reducing our carbon footprint. By purchasing Lion buses, Sourcewell members will accelerate the development of this technology, successfully contribute to safeguarding the environment for future generations, and improve air quality for the children in their communities by integrating Lion's all-electric buses into their everyday routes.

In summary:

Global Leader in Deploying Electric Vehicles // Lion has already deployed electric school buses with more than 6 million miles/10 million kilometers of service and recorded data. We are in a unique position to have operating data and a history of advancing our technology towards a zero-emission future. Lion is the most experienced in this field, from infrastructure support, to service, to on-time delivery.

Lion is a Vehicle-to-Grid (V2G) Solution Provider, Today // Lion is the only manufacturer to offer a V2G solution that has been put forward and tested for continuous improvement.

Born to be Electric // Our buses are not retrofitted diesel vehicles. They are born to be electric.

2,500 Vehicle-Per-Year Manufacturing Capacity // As interest and demand has increased for our vehicles, we have scaled our manufacturing capacity over the last three years to respond to this demand in a timely manner. Our facilities do not need to be re-tooled or re-configured to accommodate the production of our electric vehicles.

Committed 2020-2021 Deliveries // Lion has the fastest delivery timeline of zero-emission school buses in the industry.

Lion would like to thank you for the opportunity to submit our proposal. We look forward to working closely with Sourcewell administrators and members to deliver on-time, quality, zero-emission buses, while providing robust service and training all over North America. We believe Lion's core values align with Sourcewell's primarily because we both desire to provide end-users with the market's most innovative and complete turnkey solutions, poised to provide answers to all their requirements while offering them a sustainable option for their fleets.

8	What are your company's expectations in the event of an award?	Lion believes in building lasting relationships with our customers. We hope to become partners on their path to electrification, offering our extensive experience to assist them throughout the lifetime of their electric school buses. We strive to provide the highest-quality buses on the market, infrastructure assistance, trainings, parts, and more while greatly contributing to the overall greenhouse gas emissions reductions in North America. Further, if awarded, Lion expects to work closely with Sourcewell staff to generate sales all throughout the US and Canada. Our expectations are to respect the agreement with Sourcewell and honor our contract with Sourcewell while meeting the needs of all school district members with our turnkey solution.	*
9	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	As a privately held company, Lion would prefer to keep its customer revenues, operating revenues, and assets private. Lion's largest shareholder is Power Corporation, a diversified international management and holding company with a market capitalization in excess of $20 billion. Additionally, Lion has access to sufficient liquidity from existing credit lines in place to support its operations and its growth plans. Lion would be happy to share additional information about our financial wherewithal upon request, as necessary. As such, please see our CFO'S Lion Viability letter uploaded as supporting documentation with this RFP response.	*
10	What is your US market share for the solutions that you are proposing?	The school bus industry is strengthening its transition to electric. Multiple states have begun to incentivize the electrification of school bus fleets, with programs such as the Volkswagen Environmental Mitigation Settlement, and multiple other states are currently working on their electrification plans. Incentives to offset the upfront capital cost of electric school buses have helped Lion gain substantial momentum in states like California, New York and Quebec with many more emerging markets shaping their plans. Our existing customer base includes public school districts, state contracts, and private fleets. Lion strives to expand on that existing client base and continues to innovate with new products. Because EV is a relatively new industry, Lion has a fraction of the overall potential school bus market share in the US, with expected significant growth in the next few months/years. Lion currently has 0.01% of the overall school bus market share. Lion thus has an enormous potential to grow its market share in the US, just as the electric school bus market share has massive potential to increase relative to the overall school bus market share. *Source: School Bus Fleet - 2019	*

11	What is your Canadian market share for the solutions that you are proposing?	The school bus industry is strengthening its transition to electric in Canada as well. Multiple provinces have begun to incentivize the electrification of school bus fleets, with programs such as the Volkswagen Environmental Mitigation Settlement, and multiple other states are currently working on their electrification plans. Incentives to offset the upfront capital cost of electric school buses have helped Lion gain substantial momentum in states like California, New York and Quebec with many more emerging markets shaping their plans. Our existing customer base includes public school districts, state contracts, and private fleets. Lion strives to expand on that existing client base and continues to innovate with new products. Because EV is a relatively new industry, Because EV is a relatively new industry, Lion has a fraction of the overall potential school bus market share in the US, with expected significant growth in the next few months/years. Lion currently has 0.04% of the overall school bus market share. Lion thus has an enormous potential to grow its market share in Canada, just as the electric school bus market share has massive potential to increase relative to the overall school bus market share. *Source: School Bus Fleet - 2019
12	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No
13	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	b) Lion is best described as a manufacturer but is additionally a dealer and service provider. As an all-electric OEM, Lion has chosen to sell direct where possible and legally allowable. This decision comes from the fact that the dealership model is based on a fuel legacy business and does not meet the requirements and needs of the EV business. Tesla, for example, has decided to follow this model as well. The reasoning is that traditional dealerships lack properly trained technicians, do not carry the required tools and parts to suitably service electric buses. Operating an EV dealership requires specific training and skillsets that traditional dealerships don't typically have access to. Lion follows a defined and organized procedure to maximize sales, reduce downtime for customers, and meet local laws: 1. Salesforce Lion's salesforce is solely focused on selling all-electric buses. We have dedicated team members that are trained and specialized on Lion EV. Nate Baguio, Benoit Morin, Richard Lee, Dave Anderson, Malinda Sandhu, Kevin King and Peter Tuckerman just to name a few, all have over 15 years of experience and have worked in the school bus market for many years. They now specialize in EV sales/deployments and are supported by multiple Lion Teams that are currently deploying electric vehicles all over North America. We have over 80 engineers that have been working in the transportation market for decades and have joined Lion to create, manufacture, and deploy high quality, clean zero-emission buses. With close to 300 industry specialists, our experience cannot be matched. Please refer to our IMPORTANT CONTACTS – TEAM QUALIFICATIONS AND BIO at pages 1 and 2 of the Sales, Service, Distribution Centers pamphlet attached, which lists all key resources for our potential clients. 2. Experience Centers Lion currently owns and operates five Experience Centers across North America (Los Angeles, Sacramento, Albany NY, Seattle, and Quebec). Our Experience Centers serve as dedicated spaces to learn about electric buses and as EV

training centers where individuals in the EV industry can gather for educational purposes. Parts and inventory are also held at our Experience Centers to rapidly cater to clients' needs. Lion will typically deploy an Experience Center where there is a significant volume (15+) of Lion vehicles to ensure a smooth transition to electric, provide ongoing training and support, and to be able to perform any service requests. We plan on opening five more Experience Centers in 2020 with a potential of fifteen within the next twelve months. As part of our Experience Centers, Lion has also created the Lion Academy.

Lion may also leverage its Experience Centers to become its dealer in specific states. For example, Lion currently has a dealership license in California and Washington State. Lion constantly works on expanding its Experience Centers, Dealerships, and/or third-party dealers (see below) to expand its market share across North America. Please also note that Lion can sell from a Lion Dealership everywhere in the United States and in Canada.

3. The Lion Academy

Based on its experience delivering and servicing electric buses, Lion has developed a training program, the Lion Academy, that provides a full schedule of free classes to customers. The classes are offered to wide ranges of industry stakeholders such as drivers, mechanics, technicians, air districts, business officials, and transportation professionals. Lion's customized trainings are built to share different levels of electric vehicle knowledge based on different criteria. The Lion Academy's main goal is to provide an overview of how EVs work at different levels based on the person or group's knowledge. In most cases, electric buses represent novelties for customers and training becomes necessary to help bridge the knowledge gap from diesel to electric. We have found that when multiple people attend EV trainings, they find themselves more receptive to the new technology and eager to learn more about the possibility to operate, drive, and maintain these clean vehicles.

The Lion Academy is not limited to our Experience Centers. We also provide training at customer sites across North America to ensure that our knowledge and expertise is transferred to all interested stakeholders rapidly and efficiently.

Our training curriculum stands extremely detailed. An in-depth training can last up to 6 hours to ensure that all parties are comfortable working on the electric bus once it is delivered. Lion provides easy access to electric components, charging station plug-ins, and specialized EV tools to facilitate the transition to electric vehicles and the comprehension of how the electric components work. Our interactive classes cover various topics, such as safety, troubleshooting, electric chargers, EV components, maintenance, repairs, warranty work, driver tips, accessories, etc.

4. Infrastructure

As part of the Lion Academy, Lion also offers assistance with infrastructure project management.

Based on our extensive experience, Lion assists customers with preparing vehicle sites for infrastructure, including pairing buses with appropriate charging technology, determining the need for utility upgrades, and timing bus delivery with infrastructure installation. Lion has a project management team focused on infrastructure and key partnerships with stakeholders such as utilities and local electrician-approved networks and EVSE-approved vendors. We recognize that it is important to initiate the infrastructure discussion with the utility, electrician, manufacturer, and customer early in the

DocuSign Envelope ID: A6B46408-8985-4074-B9F1-63016FA67F24

process. We will work closely with electricians to initiate the process. We will also reach out to the different utility providers across all jurisdictions to identify any potential upgrades or additional work needed. This project management is to ensure that Lion times the bus delivery with the infrastructure installation to guarantee the highest level of customer service and consumer acceptance and adoption.

5. Grant Assistance
As part of the Lion Academy, Lion also offers assistance with grant applications and project management to apply for subsidies.

It comes as no surprise that electric vehicles are currently subsidized to cover the incremental cost of the electric bus. Although the total cost regarding ownership of a Lion bus is lower than an equivalent diesel bus, the upfront capital cost can represent a burden for some fleets. Lion has a Grant Team dedicated to assisting customers in identifying and applying to grant funding opportunities across the United States and Canada. Lion still holds the distinctions of being the first manufacturer to receive modern Type 1 zero-emission battery electric vehicle funding in the nation. To help our customers deploy zero-emission vehicles, we identify, leverage, and secure funding opportunities. We feature the strongest ability to leverage funding and the most relevant battery electric experience in the industry. We have secured funding across North America, totaling over $50 million in grant funds.

6. Service
Lion has a Mobile Technical Support Team that travels to customer sites to assist with service needs. The Mobile Teams situated at the various Lion Experience Centers are equipped to provide remote technical assistance to all customers, regardless of their location. Lion's electric buses are outfitted with remote access and on-board components that allow easily accessible troubleshooting alongside free software update capabilities. If Lion does not have an Experience Center nearby, Lion will work with local third-party service providers to reduce downtime. In fact, Lion works with local air conditioning repair shops or body shops when needed. Please see the SERVICE AND MAINTENANCE at pages 5 and 6 of the Sales, Service, Distribution Centers pamphlet for additional details.

7. Parts
Lion has long-term relationships with critical electrical and non-electrical components suppliers and has been using industry-standard components to make maintenance easier for mechanics and technicians, as they are already familiar with these components. Please refer to our Parts and Distribution Centers at pages 7 and 8 of the Sales, Service, Distribution Centers pamphlet for additional details.

8. Third Party Dealers
When selling direct and servicing directly is not available to Lion in particular areas, we have taken the approach to partner with local dealers to meet state laws. For example, Lion works with a local dealership in New Jersey and New York that represents Lion in the market and sell its vehicles. Lion also has a legal team evaluating each market to ensure that we conform with state laws and requirements. Lion can assure Sourcewell that it will meet state requirements when deploying electric buses in multiple markets if awarded through this solicitation.

14	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	Lion's client list extends all over North America, in different states and provinces. We are acutely aware of the varied certifications, specifications, compliances, and licenses required by different jurisdictions and school districts and take all actions necessary to satisfy them. Lion has in-house counsel that ensures that we satisfy all license and certification requirements. In fact, Lion engages in a thorough legal review of all states where we have deployed or plan on deploying our products. We have listed below the various licenses we currently hold in different states: USA • California: Lion Dealer License, manufacturer License, Seller's permit • Washington: Lion Dealer License, manufacturer License • New Jersey: Third-party Dealer • New York: Third-Party Dealer Canada • Manufacturer License All other states either accept direct sales from Lion (Massachusetts and Minnesota for example), are under review for next steps, or sales can be processed by a Lion Dealer in those other states.	*
15	Provide all "Suspension or Debarment" information that has applied to your organization during the past ten years.	None	*

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *	
16	Describe any relevant industry awards or recognition that your company has received in the past five years	1. NOVAE Prize – Impact project of the year 2. ZANITH GALA Prize – Enterprise that has distinguished itself internationally 3. Québec Employment Creators – Grand Prize & Québec Prosperity Creator 4. MERCADOR Prize – Innovative Exporter 5. Quebec Employment Creator Prize – Champion Creator 6. California Energy Commission – Lion was selected as the preferred manufacturer by the Energy Commission to supply over 200 electric school buses in a short timeframe to accelerate the deployment of electric school buses throughout the state of California.	*
17	What percentage of your sales are to the governmental sector in the past three years	Because of our ability to comply with different state or provinces' laws and regulations, 98% of our sales have been to government agencies across Canada and the United States. As our electric bus business continues to grow in North America, we expect this number to change as more private fleets will also look to begin their transition to electric. However, as funding continues to target the public sector, we expect a continued growth of sales within the governmental sector for the next few years as well.	*
18	What percentage of your sales are to the education sector in the past three years	98% of our sales are to the education sector, such as school districts.	*
19	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	Lion is currently listed on the following state contracts: 1. Lion has received multiple awards and has been awarded by school districts as part of specific piggyback bid. Further, Lion has been awarded by the Energy Commission as part of the Bulk Purchase electric school bus bid to deliver the bulk of the awarded electric school buses. 2. Lion is listed on the following piggyback bids, specifically built for electric school buses: a. Twin Rivers Unified School District b. Zeeland Public Schools	*
20	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	Lion is not currently listed on any GSA contract or SOSA.	*

Table 4: References/Testimonials

Line Item 21. Supply reference information from three customers who are eligible to be Sourcewell participating entities.

Entity Name *	Contact Name *	Phone Number *	
Keolis Canada	Steven Bradley	450-585-1210 ext. 1253	*
Rescue Union School District	Claudia Spillers	530-672-4312	*
Twin Rivers Unified School District	Timothy Shannon	916-566-1600 ext. 37000	*

Table 5: Top Five Government or Education Customers

Line Item 22. Provide a list of your top five government, education, or non-profit customers (entity name is optional), including entity type, the state or province the entity is located in, scope of the project(s), size of transaction(s), and dollar volumes from the past three years.

Entity Name	Entity Type *	State / Province *	Scope of Work *	Size of Transactions *	Dollar Volume Past Three Years *	
Twin Rivers Unified School District	Education	California - CA	Type C electric school bus (LionC)	17 all-electric buses	$6,800,000	*
Keolis Canada	Education	California - CA	Type C electric school bus (LionC)	25 all-electric buses	$10,000,000	*
Elk Grove Unified School District	Education	California - CA	Type C electric school bus (LionC)	8 all-electric buses	$3,200,000	*
Cajon Valley Unified School District	Education	California - CA	Type C electric school bus (LionC)	5 all-electric buses	$2,000,000	*
Washington Unified School District	Education	California - CA	Type C electric school bus (LionC)	4all-electric buses	$1,600,000	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	

23	Sales force.	As mentioned at line 13 of this RFP response, Lion has an in-house sales force. Selling an electric school bus is completely different than selling a diesel school bus, and our sales team must be trained on the particularities of our Lion vehicles. We have developed return on investment and total cost of ownership tools specific to our vehicles based on actual data – our sales team leverages this to highlight the benefits of EV. The upfront capital cost of an electric vehicle is about three times more than a diesel vehicle. However, its operational and maintenance costs can be reduced by 80% and 60% compared to its diesel equivalent. Mastering data, understanding charging infrastructure, and having the capacity to leverage subsidies are all aspects of a sale that do not exist in the traditional fuel world. This is just a snapshot of the intricacies of electric bus sales. Should you have any questions about our vehicles, the Lion Sales Team has the technical expertise and experience to successfully answer any questions. They consist of key Lion members that have successfully worked to deploy and service Lion vehicles across North America for the past several years. In fact, all have over 15 years of experience and have worked in the school bus industry for many years. Lion has multiple different departments that grow each week. Our engineering team has over 80 full-time employees, our production team has over 100 full-time employees, our finance department has 10 full-time employees, our service team has 25 full-time employees, our sales team has over 20 full-time employees, our grant team has 5 full-time employees, our commercial operations team has 5 full-time employees, and our quality control team has over 10 full-time employees. We have listed the most influential and largest departments. Please refer to our IMPORTANT CONTACTS – TEAM QUALIFICATIONS AND BIOS at page 1of the Sales, Service, Distribution Center pamphlet attached.
24	Dealer network or other distribution methods.	Throughout the United States and Canada, Lion combines direct sales, service providers, and third-party dealers to create a robust, results-driven sales network. There are multiple states where Lion has opened Parts Distribution Centers and/or Experience Centers along with applying and receiving our Dealership License. Further, as mentioned, Lion has also partnered with local dealers, for example with HK in New York and New Jersey, combining our mutual expertise to ensure that end-users have all the local support they need. Additionally, Lion sales can be processed by a Lion Dealer in any state. Please refer to our PARTS DISTRIBUTION CENTER at pages 7 and 8 of the Sales, Service, Distribution Centers pamphlet for additional information.

25	Service force.	We have well over the required amount of resources and experience needed to service a contract of this scale. As described in our PARTS DISTRIBUTIONS CENTER at page 7 and 8 of the Sales, Service, Distribution Centers pamphlet, our network is already well established and mature for the electric vehicle industry. Our service team is just as well established and is made up of individuals who are experts in their fields, and who are available in a variety of locations throughout our geographically diverse network. They have been working on electric school buses for years and have an experience that is rare to find in an industry that is relatively young. Our technicians are well trained in all aspects of servicing and maintaining our vehicles, and their training is continuous throughout their employment. The longer a technician is with Lion, the more they learn about our vehicles and about all electric vehicles in general, and they have many chances to progress within Lion. We are proud to say that we are helping create the next generation of electric school bus experts. We are currently looking to add more technicians to our service team and plan to greatly expand our network of service experts in the coming years. Please refer to our IMPORTANT CONTACTS – TEAM QUALIFICATIONS AND BIOS at page 3 of the Sales, Service, Distribution Centers pamphlet (attached) to get better acquainted with some of our qualified technicians and their experience. Lion's support teams are available for remote and onsite support for all buses even after the warranty has expired. Lion is committed to providing impeccable after-market service while making sure that those operations are sustainable for our customers. We constantly seek to improve our service to reduce our clients' total cost of ownership, reduce their energy consumption and maintenance costs, and provide tips and ongoing training to continue to implement our recommended best practices for servicing and maintaining their electric vehicles. Lion offers clear service agreements to fleets to perform maintenance and/or repairs on their electric buses. Each customer receives Lion's assistance on their vehicles to continue their fleet maintenance over the school buses' lifespan, even if the warranty has expired.

26	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	Each one of Lion's locations (Experience Centers, third-party suppliers, dealerships) have the necessary staff and parts to service any customers who may procure buses as a result of this contract, regardless of their location. Many repairs and service events can be performed remotely with electric vehicles, so in-person visits or parts shipping may not always be necessary. However, our service teams are available to travel to customer sites to assist with more complex repairs or warranty work. Lion has a Mobile Technical Support Team that travels to our clients to assist with such service needs. The technical support team is equipped with the tools and experience to provide remote technical assistance to all customers, regardless of their location, significantly reducing downtime for the school buses. Lion's electric vehicles are equipped with remote access and on-board components that allow easily accessible troubleshooting as well as free software update capabilities. Lion provides thorough training to every customer so that they can perform warranty and non-warranty work on their buses in the most effective way possible. Each one of our Experience Centers is outfitted with the necessary tools to help our service team perform repairs and warranty work, even for more complicated technical help. In the event that a tool is needed and not available, a Center elsewhere will either ship the needed tool, or the tool will be added to the inventory of the Experience Center to ensure that our technicians always have access to what they need to get their jobs done. We pride ourselves in having a response time under a few hours and a resolved problem within 48 hours 94% of the time. No matter where a customer is located, we can guarantee them great customer service. A detailed document is provided to all customers upon delivery in which the warranty claim procedures, parts ordering forms, and technical assistance procedures are included. Lion also trains customers' technicians on procedures to follow when servicing their electric school buses. Each service procedure is followed by a customer satisfaction survey that evaluates the work of our technicians, our responsiveness, and the quality of our work. It is crucial for us to provide the best customer experience possible and learn from our customers' experiences. The feedback we have received has allowed us to improve the quality of our vehicles and even to consider offering different options to school districts. Documentation and virtual training videos online are also provided to customers that can remind them how to maintain their vehicles and perform specific repairs. If the technician is unsure, he/she can call our customer support line and Lion's specialists will guide them through the required process to perform the maintenance item. Each Sourcewell member that will invest in electrifying their fleet with a Lion school bus can perform repairs that are covered under warranty and will be reimbursed for the labor involved in the repair. If parts are needed, Sourcewell members can order directly from Lion by calling toll free 1-855-546-6706, Monday through Friday, from 8:00 a.m. to 5:00 p.m. Eastern Time, and they will be reimbursed for parts covered under warranty. Please refer to our PARTS DISTRIBUTIONS CENTERS at pages 7 an 8 of the Sales, Service, Distribution Centers pamphlet for more information. It is our philosophy to make sure that not only does the customer have superior equipment, but that the quality of our customer service is equally outstanding.

27	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	We look forward to accelerating and supporting different entities in the United States towards their electrification goals. Lion has the ability and willingness to provide our products and services to Sourcewell participating entities throughout the United States. As mentioned throughout our solicitation responses, we have already invested early and deeply to successfully deploy electric buses across North America. We strongly believe in our capacity to produce high quality zero-emission vehicles with on-time deliveries and continued support.	*
28	Identify your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	We look forward to accelerating and supporting different entities in Canada towards their electrification goals. Lion has the ability and willingness to provide our products and services to Sourcewell participating entities in Canada. As mentioned throughout our solicitation responses, we have already invested early and deeply to successfully deploy electric school buses across North America. We strongly believe in our capacity to produce high quality zero-emission vehicles with on-time deliveries and continuous customer support.	*
29	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	There is no geographic area where we anticipate not being able to service through the proposed contract.	*
30	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	There is no entity or sector that Lion will not fully service.	*
31	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	Based on the remoteness of some participating entities located in Hawaii, Alaska, and in the US Territories, we might require additional delivery time to be taken into consideration, based on different shipping delays or restrictions, if needed. We do not anticipate any contract requirements or restrictions.	*

Table 7: Marketing Plan

Line Item	Question	Response *	

32	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	In order to provide a clear understanding of our marketing strategy, we have uploaded numerous documents along with our RFP response including: • BROCHURES with entire technical specifications for each one of the school buses proposed; • BIOGRAPHIES in the Sales, Service, Distribution Centers pamphlet that give additional details regarding our entire team, including key members of our Lion team; • CHARGING INFRASTRUCTURE quick reference guides at page 1 of the Infrastructure, Quality Control and Safety pamphlet explaining different charging options; • PARTS DISTRIBUTION CENTERS at pages 7 and 8 of the Sales, Service, Distribution Centers pamphlet detailing our infrastructure and locations throughout North America; • QUALITY CONTROL at pages 2 and 3 of the Infrastructure, Quality Control and Safety pamphlet providing in depth information regarding our internal quality control processes; • RETURN ON INVESTMENT pamphlet detailing comprehensive information regarding investing in clean transportation; • SAFETY LOCKOUT/TAGOUT quick reference guide at pages 5 and 6 of the Infrastructure, Quality Control and Safety pamphlet for our customers; • SERVICE AND MAINTENANCE at pages 5 and 6 of the Sales, Service, Distribution Centers pamphlet providing a robust explanation of Lion Academy training and maintenance program; • APPENDIX A – LIMITTED WARRANTY, APPENDIX B - Lion Warranty HV Battery System in the Lion Warranty pamphlet providing details regarding our warranties These will provide additional insights into Lion's ideology, mandate, and goals. Our marketing strategy can best be described as a partnership towards electrification and economic benefits. We have a singular goal in mind: to help reduce greenhouse gas emissions along all transportation corridors, for our children and our communities!
33	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	Our Marketing Team uses all social media platforms. The Lion Marketing Team mostly leverages Facebook, LinkedIn, Instagram, and Twitter to advertise our brand. The Marketing Team also uses targeted Mailchimp campaigns in specific regions. Our Lion website is also a helpful tool for early conversations with customers. Further, Lion has promoted its products in specific markets through webinars, which have been very successful during this difficult time, to address general and detailed EV questions related to Lion products, charging infrastructure assistance, the Lion Academy, etc. As the leader in electric school bus market in North America, Lion's mission is to educate and promote EV while continuing to develop platforms that are of the highest quality.

34	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	Lion wholeheartedly agrees that Cooperative contracts like Sourcewell are Lion's best marketplace position right now. Sourcewell facilitates the procurement process for entities that do not want to go through an RFP process by drastically saving time to both OEMs and customers as well as streamlining the RFP process that can be difficult on both sides. Sourcewell is in itself a competitive RFP process, with its core mandate to ensure that no due process is omitted; therefore, the cooperative purchasing satisfies all legal requirements. As far as integrating a Sourcewell awarded contract, our manufacturing capacity will certainly accommodate an influx of new customers. As mentioned before, our manufacturing capacity is quite able to adjust to large orders, with dedicated assembly lines, Quality Control procedures, and dedicated qualified personnel. Sourcewell generated leads will be integrated into our standard operating procedures, which include building the relationship with the customer, having industry leaders available for their questions, from engineering to sales, and tailoring the vehicle to their individual needs. A Sourcewell award would greatly expedite and facilitate the purchasing process from the customer side, relieving the customer from going through a purchasing process that can be expensive and extremely time consuming. Lion will make sure to promote the Sourcewell award to its customers if awarded across North America and recommend that customers utilize the Sourcewell contract to purchase from a fair and competitive solicitation process that will meet their jurisdiction's legal requirements. *
35	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	E-procurement is not available at this time. We process purchase orders through email and through our Lion dealerships. However, we do offer a pre-order form online on our website. Because Lion has so many configurations possible for its buses, we prefer to provide a custom and personal approach tailored to each customer and ensure the best customer service possible. *

Table 8: Value-Added Attributes

Line Item	Question	Response *
36	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Based on its experience delivering and servicing electric school buses, Lion has developed a training program: The Lion Academy, that provides a full schedule of free Classes. Lion's customized trainings are built to share different levels of electric vehicle knowledge based on different criteria. Since electric vehicles are new for many customers, training is necessary to help bridge the knowledge gap from diesel to electric. We can also customize our training based on the customer's feedback. We offer an in-person training along with video trainings to as many groups and users as necessary: operators, drivers, mechanics, and more. For example, our regenerative braking technique allows for additional power to be transferred to the batteries, which is very convenient for those times when our customers find themselves in parking spots that would otherwise be inconvenient for an electric vehicle. Please refer to our SERVICE AND MAINTENANCE at pages 5 and 6 of the Sales, Service, Distribution Centers pamphlet for additional information about our training programs. *
37	Describe any technological advances that your proposed products or services offer.	We believe each Lion vehicle represents a technological advancement. In our RETURN ON INVESTMENT pamphlet, we mention a few of our innovations such as our engine, transmission and regenerative breaking. Actively seeking new technologies, Lion electric school buses have unique features that are specifically adapted to its users and their everyday needs. Transitioning to all-electric school bus will lead to major improvements in our society, environment, and quality

of life for our children and operators. This enables Lion to constant improvement of its components and building its battery packs to maximize range, efficiency, and to adapt to routes. Lion uses the Dana Incorporated/TM4 electric powertrain and motor.

Additionally, each Lion vehicle is outfitted with Lion proprietary onboard Telematics equipment supplying the operator with personalized reports on charge, discharge, automated alerts on faults or anomalies, and so on. The electronic modules are recording in real-time information about various driving and vehicle conditions, including braking, acceleration, trip, and other related information regarding the vehicle. These modules will also be recording information about the school bus's features such as charging events and status, the enabling/disabling of various systems, diagnostic trouble codes, VIN, speed, direction, and location. Please call toll-free 1-855-546-6706, Monday through Friday, from 8:00 a.m. to 5:00 p.m. Eastern Time for any pricing inquiries on the different telematics packages as prices vary depending on your reporting requirements.

Furthermore, our vehicles are outfitted with an onboard smart charging option, not requiring the installation and purchase of a more expensive smart charger. The battery packs are climate-controlled to ensure that battery temperature always remains on average at 70 F: the optimal temperature range for the batteries. Additionally, Lion's battery packs are managed and protected, adjusting lower and higher energy demands of each module to provide maximum lifespan, minimal battery degradation, and longest range in the industry. To respond adequately to the demands of the vehicle, the Lion school buses have a 400 - 800-Volt lithium batteries pack that can be up to 155 kWh. Charging time to 100% battery will vary between 5h to 16h, depending on the percentage that the battery is returned to the charging station and the charging infrastructure used (level 2 or level 3).

Unique or advanced features of the all-electric school bus technology// As a manufacturer solely focused on designing and manufacturing purpose-built zero-emission vehicles, Lion's mission is to provide the most advanced and safest zero-emission school buses. The entire Lion team strives to serve children and their school districts in North America and beyond by helping reduce harmful gas emissions that they are exposed to daily. Lion's components go through due diligence in which Lion considers their impact on range and how to best preserve and increase that range. This is how Lion identified that when a hydraulic or air braking system and electric motor regen are combined, they provide proven safety without compromising range.

State of Charge// Lion has added state of charge indicators to facilitate charging and quickly determine whether a bus is charging, and its optimal level is reached. Furthermore, the marker lights serve as indicators. For example, if the first light stays solid and the second is blinking, this means that the state of charge is between 33% and 66%. Once all lights remain solid, the school bus is at 100%. Lion's port can accept both Level 2 (J1772) and Level 3 (SAE-Combo, CCS) connectors. Also, we have innovated the charge port indicators to ensure drivers will refrain from leaving their bus if it is not properly connecting. Thus, Lion decided to add a 3-mode light by the charging port; off, lit (ON), and flashing. When the light turns off, this means that the school bus is not charging. When the charge port light remains solid, this means that the vehicle is powered, and the charge is now activated. When the light is flashing, it means that the vehicle is powered on, but the charge is not activated. The driver should not leave until the light becomes solid.

Sound Generator// Lion has added a sound generator outside the electric school bus to ensure that technicians, operators, and drivers hear the school bus when it is driving. The bus is so quiet that it might be ON without anyone knowing, which would be dangerous in operator yards. The sound generator prevents accidents from happening.

User interface // Lion has the leading user interface in the school bus industry that enables operators to monitor and track driver's energy consumption and efficiency, as well as perform 90% of all troubleshooting work. The driver has a page where they can see the state of charge, speed, time, heater temperature, live energy consumption, average consumption, regen state, gears, outside temperature,12-volt meter, and actual range (as well as optimal vs worse range based on driving abilities). A technician can then unlock the screen with a password to have access to multiple other pages. For example, the charging page includes the state of charge, actual mileage left with current state of charge, time remaining to a complete charge, charging speed, DC current, charging amps, and charging station amps. There is a complete page dedicated to pre-heating and cooling the bus with a 7-day schedule with 4 different daily periods that can be updated for efficient pre-heat and pre-cool settings. Maintenance and diagnosis pages include information on all electrical components, required updates, preventive maintenance, battery details, charger details, and powertrain details. The system can be adjusted on an ongoing basis based on various preferences and technicians and operators do not need additional software or specific computers to have access to the screen, they can perform their diagnostics directly on the screen without outside assistance. Many manufacturers charge districts upwards of $10,000 for software upgrades and additional licenses and can require formal classroom / hands-on training, incurring additional costs to the district. Lion's process is easy and cost effective; we can even remotely access the screen through Wi-Fi to perform any additional diagnoses or required updates.

Convenient Thought about Power Electronics Position// Lion has positioned major power electronics easily accessible for technicians while being water- and dust-free to improve the longevity of the components.

Safety// The Lion team design and built school buses that are reliable, durable, and tested for all safety purposes. All Lion's products comply and exceed all Federal Motor Vehicle Safety Standards (FMVSS). Lion includes two safety switches on each bus (one on the outside and one by the driver's foot) that instantly cuts off the high-voltage power. These switches can be used in case of an emergency or when performing maintenance on the high-voltage components of the vehicle. Furthermore, Lion provides training to first responders to educate them on electric vehicles and how to react in case of an emergency. First responders have found our vehicles safer to operate and respond in a potential emergency due to their fewer components and lack of flammable fuel.

Vehicle-to-grid// Lion's school buses are vehicle-to-grid ready and Lion will continue to develop this technology as additional information is made available on the market. Lion is working on developing a turnkey solution by working with a bi-directional EVSE charger.

Efficiencies in Supply Chain Management// Lion uses efficient manufacturing processes by leveraging several pre-

		assembled components and opted for a just-in-time factory. Lion has partnered with over 400 suppliers in the United States and Canada and stands capable of building over 1,000 all-electric school buses per year with its current manufacturing facility. Lion can achieve this by eliminating high inventory levels and by building customized orders to accelerate deliveries while meeting client requirements. Our production lines are dedicated to electric and our internal workforce specializes in EV assembly. Lion has over 200 employees that are responsible for the complete design and assembly process along with managing the distribution model, pre-delivery inspections, and quality review. Lion subcontracts manufacturing expertise for certain materials and has created over 1000 indirect jobs in North America as part of this process. Ability to provide temporary charging to customers//Lion can help provide temporary charging infrastructure to customers and has done so in the past. This way, future customers can test a school bus on their routes before purchasing it. The customer will need an inlet NEMA 6-50 and can plug in a 30-amp charger. This represents a temporary charging solution, as the recommended amperage is higher for a permanent solution needed to charge the school bus faster. Continuously seeking new technologies, Lion vehicles have unique features that are specifically adapted to its users and their everyday needs. We believe transitioning to all-electric vehicles will lead to major improvements in our society, environment, and quality of life for the children subject to diesel pollutants and the operators.	

38	Describe any “green” initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	Sustainability is our priority. Lion is committed to providing sustainable products and adhering to sustainable practices. Our school buses are emission-free and represent a great asset to meet climate change goals in the next few years. Lion has outlined a few of the steps it is currently taking to help meet climate goals: Battery Repurposing and Recycling Lion’s plan for battery disposal and reuse has been underway for multiple years now. Assuming our vehicles’ batteries will eventually need to be replaced, the batteries will have the ability to provide energy for various second-life applications. Lion is currently working with utility providers and customers on possible secondary uses of batteries, such as solar power storage, emergency response energy storage, and backup generator storage for communications or school site operations during power outages. Additional applications are also being tested, such as using our vehicle’s batteries to power cell phone towers, medical sites, and school sites. Lastly, once the battery cannot be used at all and its entire energy retention has been expended, the battery pack components can still be recycled. There are several mechanisms to effectively recycle the materials contained in our batteries. For example, the battery pack is made of steel that can be recycled. The copper wires and battery components (lithium, cobalt, magnesium, and nickel) are all materials that are recyclable and can be reused for multiple other purposes. * Planting Trees Other than providing zero-emission electric school buses and developing second-, third-, and fourth-life applications for our battery packs, Lion has also committed to planting 100 trees when delivering a vehicle in 2020 within the area where the school bus was delivered. Lion vehicles contribute to reaching carbon neutrality in multiple markets and represent the key to fleets and customers to reduce their greenhouse gas emissions to meet their state’s or province’s climate goals. Our Commitment Our commitment is to neutralize any remaining emissions with additional, quantifiable, real, permanent, and socially beneficial offsets to achieve net zero annual carbon emissions by 2040. Our actions to reduce our carbon footprint Solely committed to manufacturing zero-emission vehicles Not manufacturing fossil fuel vehicles Using 100% hydroelectricity to build and power our vehicles Favor local suppliers that are committed to our mission to go carbon neutral

39	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	Lion works with multiple partners to promote electrification of transportation across North America. In fact, Lion has been advocating with the following partners in Canada and the United States and have been endorsed by the below as a sustainable company: • Equiterre • Fondation David Suzuki • Clean Energy Canada • Mobilité électrique Canada • American Lung Association With the above partners, Lion has participated in sustainable events and leverages their sustainable practices.	*
40	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	Lion has a clear nondiscriminatory hiring policy thoroughly implemented within our company, clearly stated and shared in our employee packages. Lion believes in hiring the best person for the job, regardless of ethnic background, gender, disability, or other characteristics.	*

41	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	As the leader in zero-emission vehicles with more than 300 electric buses on the road and a manufacturing capacity to build 1,000 electric vehicles annually today, Lion is poised to immediately support Sourcewell entities' electrification requirement throughout North America. Over the past decade, we have built a team that specializes in all-electric school bus deployments, with unparalleled experience. Our company values safety, reliability, and the health of the children in the communities we serve. We have invested early and deeply to develop a zero-emission technology that benefits the school districts we serve and live. GLOBAL LEADER IN DEPLOYING ELECTRIC SCHOOL BUSES // Lion has already deployed electric school buses with more than six million miles or ten million kilometers of service. We are in a unique position to have operating data and a history of advancing our technology, while other manufacturers are just beginning their zero-emission journey. ABILITY TO MEET DEADLINES // Lion is the leader in deployment of electric school buses in North America. We have delivered over 300 electric school buses with a proven track record to meet deadlines and exceed milestones. We have demonstrated, for over 4 years now, our ability to successfully deploy zero-emission school buses and meet deadlines. BORN TO BE ELECTRIC // Lion vehicles are purpose-built and committed to zero emissions. We build our own chassis, battery packs, and design our own proprietary operating software. Our buses are not retrofitted diesel vehicles; they are born to be electric. 2,250 VEHICLES PER YEAR MANUFACTURING CAPACITY// As demand has increased for our vehicles, we have scaled our manufacturing capacity over the last four years to meet this demand. As a committed battery electric manufacturer, our facilities do not need to be re-tooled or re-configured to accommodate the production of our school buses. We can begin to fulfill orders under this RFP today. COMMITTED // We would like to reiterate that our shared goals of improving air quality and the health of children and operators in our communities is what best aligns Sourcewell entities and Lion. Our company is solely focused on zero-emission vehicles. This focus makes us the ideal partner in the electrification process of Sourcewell's participating agencies. We represent the best return on investment. Please refer to Lion technological advancements or innovations responses at line 37 for specific solutions unique to our industry. The Lion Team remains available to answer any questions and extends an open invitation to visit our world-class manufacturing facility and drive any of our electric school buses. We will distinguish ourselves through our transparency towards the Sourcewell administrators and Sourcewell entities, our willingness to innovate and tailor our turnkey solutions for the Sourcewell platform, as well as our ability to comply to all parts of the Sourcewell contract. We thank you for giving Lion the opportunity to respond to this Request for Proposal and for the professionalism of the Sourcewell staff managing this process. We look forward to working with Sourcewell entities to provide a healthy breathing environment to workers, children, and the communities you serve.	*

Table 9: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
42	Do your warranties cover all products, parts, and labor?	With our limited warranty, our battery packs are guaranteed for up to 8 years (refer to battery warranty for more information). Lion also offers an extended warranty of up to 12 years if a customer would like to extend their battery warranty. Based on our experience, we fully expect our batteries to have the same lifespan as your vehicles. Each school bus is equipped with electronic modules that monitor and record data from various systems, including the motor, batteries, braking, and electrical systems. We have included, for a better understanding of our warranty policies, APPENDIX A – LIMITED WARRANTY, APPENDIX B - Lion Warranty HV Battery System in the Lion Warranty pamphlet. The documents detail what coverage you would be entitled to with each option.	*
43	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	Lion has created a warranty for its battery packs to maximize the use of the batteries without impacting their performance while reducing battery degradation. Thus, Lion has created a warranty coverage of 20,000 kWh per pack throughput per year, which is meant to protect the batteries while allowing plenty of charge and discharge cycles. This warranty is mostly meant to protect the batteries when performing vehicle to grid (V2G).	*
44	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	Yes, please refer to the warranty documents for more information.	*
45	Are there any geographic regions of the United States (and Canada, if applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	As mentioned in our SERVICE AND MAINTENANCE at pages 5 and 6 of the Sales, Service, Distribution Centers pamphlet, Lion has a Mobile Team that performs repairs at the customer location. Our response time continues to improve as we develop our Experience Center network across North America. If a customer does not have access to a Mobile Service Team and repairs cannot be performed remotely, Lion will work with a third-party service provider to offer the quickest response. Lion works with a variety of national service providers.	*
46	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	Please refer to our response at Line 42.	*
47	What are your proposed exchange and return programs and policies?	Not applicable	*

48	Describe any service contract options for the items included in your proposal.	Lion offers clear service agreements to customers to perform maintenance and/or repairs on their electric buses. Each customer can receive Lion's assistance on their vehicles to continue their maintenance over its lifespan, even if the warranty has expired. To begin with, a detailed warranty package is provided to all customers upon delivery of each bus in which the warranty claim procedures, parts ordering forms, and technical assistance procedures are included. Lion also trains customers' technicians on the warranty procedures to follow in order to complete an entire warranty claim procedure. Each service event is followed by a customer satisfaction survey that asks the customer for feedback on the work of our technicians, our responsiveness, and the quality of our work. It is crucial for us to provide the best customer experience possible and learn from our customers' experiences. The feedback we have received has allowed us to improve the quality of our vehicles and our warranty program. Lion's commitment to service doesn't end when the warranty expires. Lion's support teams are available for remote and onsite support for all buses, even after the warranty has expired. Lion is committed to providing impeccable after-market service while making sure that those operations are sustainable for our customers. Lion offers clear service agreements to customers to perform maintenance and/or repairs on their electric buses. Each customer can receive Lion's assistance on their vehicles to continue their fleet maintenance over the vehicle's lifespan, even if the warranty has expired. Our goal is to ensure that the customer experience throughout the entire lifetime of their electric bus is positive, productive, and enriching. Our customers can perform their own warranty work if they wish. However, our service team is equipped to perform all warranty work our customers may need. Most warranty work can be performed remotely, but in cases where on-site support is needed, a travel cost policy has already been established and is shared with customers to inform them of the billable amounts in any case. The costs are reasonable and help keep expenses low for customers to ensure a positive customer experience.	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
49	What are your payment terms (e.g., net 10, net 30)?	Payment upon delivery, net 10 or net 30 days (will vary based on customer's needs).	*
50	Do you provide leasing or financing options, especially those options that schools and governmental entities may need to use in order to make certain acquisitions?	Lion does not offer leasing or financing options today. However, we are in the process of developing those options and will update Sourcewell once this is available to customers.	*
51	Briefly describe your proposed order process. Include enough detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template. For example, indicate whether your dealer network is included in your response and whether each dealer (or some other entity) will process the Sourcewell participating entities' purchase orders.	Lion has already verified with the accounting department, and Lion's Chief Financial Officer has confirmed, that the below steps are already implemented and can be leveraged with Sourcewell specifically. Lion looks forward to closely and transparently collaborating with our dedicated contract administrator. Firstly, all clients selecting Lion as their provider will need to mention that they have made their choice via Sourcewell to benefit from the tailored price specific to this platform. Also, our salesforce will identify opportunities, build trust with prospective clients, and direct them when possible to the Sourcewell platform in order to save time and money by not going through a traditional RFP process. Lion strongly believes that cooperative contracts are the logical, most cost-effective next steps in the market right now. Secondly, from the moment a quote is issued, based on the client provided specifications, the Sourcewell contract ID will be indicated on the customer quote. Once the quote is accepted and a Purchase Order is issued with the help of our contract administrator, the Sourcewell contract ID will also be noted. At the time of the invoice creation, the Sourcewell Contract ID number will be automatically added to the invoice, in a dedicated field, allowing for easy trimestral reporting and administrative percentage calculation. Lion keeps the ownership of all Sourcewell process and procedures, and Lion or Lion Dealerships will provide final invoices to customers. The Lion accounting department will then issue a check for the administrative fees incurred as part of the sale and send it to Sourcewell with all supportive documentation.	*
52	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	Lion accepts payments in the form of checks, direct deposits, and credit card payments when required.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as desribed in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	

53	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	Please refer to our PRODUCT AND PRICE LIST pamphlet. Lion would like to point out that due to the number of multiple floor plan options, passenger number options and battery ranges, we have listed the base price for one range (minimum range) per school bus. Lion provides turnkey solutions for Sourcewell generated contracts. Therefore, it's important for customers to contact, Nate Baguio, Benoit Morin, Richard Lee, Dave Anderson, Malinda Sandhu, Kevin King and Peter Tuckerman to review what would best suit their needs. Customers should mention the fact that they have selected our company from the Sourcewell RFP contract to be able to access to the tailored prices for this contract. Lion understands the importance to provide a turnkey solution to Sourcewell customers and will achieve this by understanding the required specifications for each customer, and offering a tailored turnkey solution based on their needs, requirements, routes, range needed, etc. Indeed, electric buses require more upfront planning because of ranges available for each platform. Thus, Lion has made it a priority to meet as many different spec requirements from customers as possible. Electrification of transportation must continue to meet customer needs across North America. Our vehicle SKU includes Lion's vehicle models and major components such as equipment, kWh, and other major options required for a turnkey solution listed separately at the end of the Product and Price list pamphlet.	*
54	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Lion has decided to extend a fixed 5% discount per bus for the first 50 buses (50 in Canada and 50 in the USA) from any of the 3 categories purchased via the Sourcewell platform. This will incite our customers to purchase from the Sourcewell contract and Lion to sell off the Sourcewell contract. Please refer to the PRODUCT AND PRICE LIST pamphlet to review the pricing discount proposed.	*
55	Describe any upcharge and/or discount structure that applies on a State-by-State or Province-by-Province basis for Sourcewell Participating Entities in the US or Canada. Upload relevant pricing materials (if applicable) in the document upload section of your response.	Lion does offer volume pricing on a case-by-case basis to Sourcewell Participating Entities to drive the emission pollutant down and decrease our production costs. Volume discounts will be offered on a case-by-case above and beyond the 5% discount already offered for the first 50 units in each country (total 100).	*
56	Describe any quantity or volume discounts or rebate programs that you offer.	Lion is open to offering volume and quantity discounts on a case-by-case basis. We have already tailored our prices for the Sourcewell platform. We recommend contacting any member of our salesforce at the direct numbers provided in our IMPORTANT CONTACTS at pages 1 and 2 of the Sales, Service, Distribution Centers pamphlet to discuss quantity and volume discounts.	*
57	Propose a method of facilitating "sourced" products or related services, which may be referred to as "open market" items or "nonstandard options". For example, you may supply such items "at cost" or "at cost plus a percentage," or you may supply a quote for each such request.	Because there are multiple vehicle options and multiple battery ranges, we have tailored quotes for each state, or Canadian province, to ensure that requirements, specifications, and/or taxes are applied. We strongly recommend customers contact any member of our salesforce to target and identify what equipment is best suited for their organization. They will then send back a quote that is tailored for each customer. As for nonstandard options, customers should also contact one of our team members for pricing (either at cost or at cost plus a percentage, depending on the request). Customers that are tax exempt should mention it at the time Lion begins the quoting process.	*

58	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	Lion offers a list of items that are included in the base price of the vehicle. For example, Lion offers free training classes before and at the time of delivery, charging infrastructure project management, pre-delivery inspection, driver training, technician training, EV101 training, subsidy assistance, and installation of options chosen by customers such as cameras, electronic logbook, smartdrive, etc. Thus, there are no additional charges not identified in our pricing sheet, taxes, and shipping.	*
59	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Shipping is an additional cost to the Sourcewell participating entity and this cost is not identified in our base pricing supplied to Sourcewell because it varies between countries, regions, products, and jurisdictions. Shipping price is included on all Lion quotes and reflects the cost of shipping.	*
60	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	As mentioned at point 58, Lion delivers everywhere including Alaska, Hawaii, throughout Canada, and the entire United States. Due to the different options, distances, and methods to deliver our vehicles and equipment, the cost of freight and shipping that will be incurred due to remote locations will be clearly stated on the Sourcewell originated quote that we will send back to customers and Sourcewell for approval, based on Sourcewell requirements.	*
61	Describe any unique distribution and/or delivery methods or options offered in your proposal.	Lion is an innovative company. For example, the COVID-19 restrictions allowed us to challenge ourselves and the restrictions in place by offering virtual deliveries and trainings for customers, complete with video walkthroughs, while the school bus stays stationary for the desired timeframe to avoid any cross-contamination. Our deliveries are typically accompanied with a 4-hour training and charging infrastructure review, thoroughly reviewing the safety aspects of the vehicle, which is at the forefront of everything we do. Lion delivers a turnkey solution school bus; options are installed and have been tested, and the inspection has been completed.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments	
62	c. better than the Proposer typically offers to GPOs, cooperative procurement organizations, or state purchasing departments.	Please refer to our price list	

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
63	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell.	We have already prepared for this. For each quote that will be produced for Sourcewell participating entities, the Sourcewell contract number will be integrated in our documentation to flag that particular document for our financial department. Our tailored quotes will have an additional internal sheet that will automatically calculate the administrative fee to Sourcewell and any proposed discounts at the time of quote. The same principle will be applied to the Purchase Order that will ensue, signaling our account payables to proceed and adding the fee to the Sourcewell quarterly report. At the end of the quarter, a check will be sent to Sourcewell along with the report and all supporting documents (copy of Quote, PO, invoice, delivery documents, and anything else Sourcewell may require for its quarterly reports.)	*
64	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	Lion is aware that polluting vehicles contributing to the overall greenhouse gas emissions throughout North America may contribute larger percentages as administrative fees. However, there is an incidence on the price of new and innovative technologies like ours. The capital cost of our school buses that systematically reduce greenhouse gases is higher; therefore, we propose to extend a 1% administrative fee to Sourcewell. Here are a few reasons why we believe a 1% administrative fee is fair and well-priced: 1. A typical diesel or gasoline bus will have a capital upfront cost of about one third of its Lion electric equivalent. Thus, if a diesel bus OEM offers 3% to Sourcewell and its base price is $100,000, the total amount to Sourcewell would be less than Lion offering 1% of its bus that costs, on average, $350,000 for a total of $3,500 to Sourcewell in administrative fees. 2. Lion continues to innovate with new product offerings, equipment integration, and technology advancements. We currently have over 80 engineers that work relentlessly on constantly ameliorating the electric buses we have developed. Being a fairly new company (11 years in EV is considered a mature company, but compared to industry standards, it is still in its early stage), Lion invests significantly in deployments, education, training, new technology, and innovations. A traditional OEM will not have to incur the same expenses for methods and products it has been producing for decades. We hope that this proposed administrative fee meets and exceeds your requirements and expectations. We remain at your disposal to discuss any potential adjustments you wish to discuss for this proposed pricing structure.	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *
65	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	Lion is proposing the following school buses for this solicitation: 1. Lion A all-electric Mini school bus 2. Lion C all-electric school bus 3. Lion D all-electric school bus 4. School activity bus (LionA, LionC, with a white finish) All our vehicles can be delivered on time, anywhere in North America. Please refer to each individual brochure uploaded as a supporting document. For easy reference, they will be named identically as the above list. Our salesforce and management teams remain available to answer any questions you may have about our product offering.
66	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	This section does not apply to Lion. Not applicable.

Table 14B: Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed school bus type is offered within your proposal and, for each available bus type, the engine or power alternatives that you offer within the type. Provide additional comments in the text box provided, as necessary.

Line Item	Bus Type	Offered *	Engine - Gas & Diesel *	Engine - CNG or Propane *	Engine - Hybrid or Alt Fuel *	Electric Powered *	Comments

Table 15: Industry Specific Questions

Line Item	Question	Response *
71	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Lion would use internal metrics to track its success with this contract. Each contract Lion has been awarded thus far has been part of our goal to deploy quality zero-emission vehicles while reducing greenhouse gas emissions. Lion will closely monitor the number of interested customers through the Sourcewell contract that generate a quote and then a purchase order. Because Lion is new to Sourcewell, it is difficult to anticipate the level of demand Lion will experience with a potential award. However, we will set anticipated targets of sales with the help of Sourcewell staff to ensure that there is a clear marketing plan that is being followed with our dedicated salesforce to Sourcewell customers.

72	Describe the safety features and innovations incorporated in the manufacturing of your buses that impact student safety.	Firstly, we will like to point out Lion's ability to follow all state and province regulations regarding children's safety belts, wheelchair accessibility, distance between rows, etc. Not carrying a flammable fuel tank is reassuring to parents of the students benefiting from riding an all-electric school bus daily. Ensuring the driver's safety ultimately guarantees the students' safety. As such, Lion offers multiple options to reinforce the driver's and passengers' security: • Regenerative braking to enhance the driver's experience and safety • 102 inches wide aisle compared to traditional 96 inch wide aisle offered by competitors • Detailed cluster with live data on current state of charge and necessary information to best use the vehicle Lion prioritizes safety and is at the center of our everyday focus. We ensure that our manufacturing facilities, employees, products, and customers are always safe, and that strict procedures are followed to respect all processes that have been put in place. As such, we can deliver one of the safest school buses on the road today and have been doing so since 2008. Lion's inception is due to the original idea: how can we guarantee students' health on our vehicles? That is how our all-electric school buses were purpose-built; to reinforce that reducing students' lungs exposure to harmful gas emissions caused by a traditional diesel bus should be fully eliminated. Lion is thus ensuring the students' continued health and safety by providing the alternative: our zero-emission all-electric school buses.	*
73	Identify any bus types, models, configurations, or engine/power alternatives that are not yet available in your bus offerings but that are scheduled to be released during the anticipated term of the Sourcewell contract.	The LionD will be commercialized during the Sourcewell contract and is currently under certification review. All other vehicles mentioned above are available now.	*
74	Describe any options, accessories, supplies, parts, and services that you are proposing that are not described in any other section of your response. Upload relevant pricing materials (as applicable) in the document upload section of your response.	Lion would like to point out that due to the staggering number of options or state and province regulations regarding school bus types, we have listed some options that you could use to customize your school bus. Lion provides turnkey solutions for Sourcewell generated contracts. Therefore, it's important for customers to contact our dedicated Salesforce to review what would best suit their needs. Lion understands the importance to provide a turnkey solution to Sourcewell customers. Lion will achieve this by understanding the required specifications for each customer, and offering a tailored solution based on their needs, routes, range needed, operations, and most importantly State or province requirements. Indeed, all -electric school buses require more upfront planning because of ranges available for each platform. Lion has made it a priority to meet as many different specification requirements from customers as possible. Electrification of transportation must continue to meet customer needs across North America.	*

Exceptions to Terms, Conditions, or Specifications Form

Only those Proposer Exceptions to Terms, Conditions, or Specifications that have been accepted by Sourcewell have been incorporated into the contract text.

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as "Marketing Plan."

Proposer's Affidavit

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor’s objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:

    a. Included on the “Specially Designated Nationals and Blocked Persons” list maintained by the Office of Foreign

Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

b. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://www.sam.gov/portal/3; or

c. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Marie Bedard, Director of Strategy and Commercial Operations, The Lion Electric Co

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

Title
Approval of the Revisions for the Payroll Administrator Job Description - *added June 23, 2022*

Executive Summary
Revisions were made to the qualification requirements for Payroll Administrator.

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Equitable Recruitment & Retention | Goal 1
Recruit the most qualified, diverse and motivated staff.

Recommendation
The Superintendent recommends approval of the revisions for the Payroll Administrator job description.

Financial Impact
There is no financial impact.

75021 Supervisor Payroll Administrator Payroll FIS046 - Redlined

THE SCHOOL BOARD OF MANATEE COUNTY
Local Title: ADMINISTRATOR, PAYROLL
State Title: SUPERVISOR/COORDINATOR, PAYROLL
JOB DESCRIPTION

JOB GOAL:
To motivate, encourage, and lead team to professionally calculate, process and maintain payroll records.

QUALIFICATIONS:
1. Bachelor's degree from an accredited college or university in finance or accounting preferred.
2. Seven (7) years of Payroll experience required.
3. Five (5) years of supervisory experience required.
4. CPA and/or auditing experience preferred.
5. Experience working with People Soft software preferred.
6. Comparable amount of education, training, and/or similar experience is acceptable and may be substituted for the minimum qualifications.

KNOWLEDGE, SKILLS AND ABILITIES:
Extensive experience presenting to Boards and/or executive-level teams. Background in Payroll vision and strategy creation. History of documenting Payroll policies and procedures and ensuring compliance. Knowledge of federal, state, and district rules, regulations, and policies as they relate to job functions. Knowledge of School Board policies that relate to the job function.

REPORTS TO:
Chief Financial Officer (CFO)

SUPERVISES:
Coordinators, Payroll
Specialists, Senior Payroll
Specialists, Payroll

PERFORMANCE RESPONSIBILITIES:
1. Define the Payroll Department vision and critical milestones.
2. Drive the overarching Payroll Department strategy and associated tactics.
3. Provide leadership by motivating, managing and supervising the department to ensure effective teamwork in all payroll operations.
4. Formulate or modify policies and procedures to solve complex payroll problems based upon new tax laws, legislation and collective bargaining agreements.
5. Formulate payroll system enhancements, which minimize error and maximize Payroll and Personnel Department efficiencies.
6. Communicate integration and conversion related issues of the PeopleSoft system to ERP team to expedite resolutions.
7. Provide recommendations for payroll process improvements for the ERP system.
8. Ensure compliance with Board policies and federal, state, and local regulations.
9. Ensure that all Payroll policies and procedures are well-documented. Drive change as appropriate.
10. Perform periodic Payroll audits.
11. Maintain an archive of historical pay enhancements. Provide appropriate data in support of union negotiations.
12. Serve as a liaison between Payroll and the District's departments, ensuring clear, concise, and honest communication. Set moderate, realistic timelines for error correction.
13. Ensure IRS, Social Security Administration, Fair Labor Standards Act (FLSA), and Florida Retirements System (FRS) compliance.
14. Serve as liaison between various departments within the District for payroll processing. Maintain open communication with schools and departments within the District.

15. Interpret and enforce laws and proration rules for IRS Levies, Student Loans, Child Supports, Bankruptcies, and Creditor Garnishments.
16. Implement process and procedures changes to provide efficient operations.
17. Test and approve enhancements to the payroll system.
18. Process on and off cycle pay runs.
19. Manage payroll uploads.
20. Serve as a District time and labor forced approver.
21. Prepare bank file and communicate with bank regarding any issues, calendar changes, or processing issues.
22. Submit taxes after on and off cycle pay runs.
23. Research, calculate, reconcile and communicate pay data for escalated issues.
24. Manage departmental overpayment collection. Handle escalations as appropriate.
25. Make repayment arrangements and execute agreements.
26. Execute and monitor repayment agreements in PeopleSoft.
27. Meet with employees to help them understand the overpayment, calculation, and repayment options when a large group is affected.
28. Serve as a Project Manager for payment of special items, including, but not limited to: supplements, non-contracted-hours, summer pay, and raises.
29. Communicate and collaborate with Human Resources, Benefits, Accounting/Finance and Budget teams.
30. Create District payroll calendars.
31. Establish parameters for semi-monthly and monthly payroll processing.
32. Provide instruction to new payroll preparers and disseminate updates to payroll processes and procedures.
33. Process the initial set-up of new payroll deductions for vendor payments.
34. Update monthly and semi-monthly payroll period dates in the HR/Payroll system for processing payrolls.
35. Process and balance stop-payments, voids/reissues and manual checks for payroll.
36. Review final retirement and DROP calculations before processing payouts.
37. Prepare quarterly reports (941 and SUI).
38. Process W2's, coordinate with the Data department with submission of files and W2 reporting.
39. Supervise assigned personnel, conduct performance appraisals and make recommendations for appropriate employment action.
40. Keep supervisor informed of potential problems or unusual events.
41. Represent the Payroll Department in audit events.
42. Conduct department meetings.

PHYSICAL REQUIREMENTS:
Light Work: Exerting up to 20 pounds of force occasionally, and/or up to 10 pounds of force as frequently as needed to move objects.

TERMS OF EMPLOYMENT:
Salary and benefits shall be paid consistent with the District's approved compensation plan. Length of the work year and hours of employment shall be those established by the District.

EVALUATION:
Performance of this job will be evaluated in accordance with provisions of the Board's policy on evaluation of personnel.

AGENDA ITEM NO. 11.1

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval of the Charter School Application from HOLA! Elementary @ Manatee School of the Arts (MSA)

Executive Summary
Florida Statute 1002.33(6)(b) requires that Manatee County School District School Board shall receive and review all applications for a charter school. Every effort is made to ensure that the review process is fair and transparent. HOLA! Elementary @ Manatee School of the Arts (MSA) submitted an application for a charter school to serve the Pre-K-5th grade population with a projected enrollment of 481 students in the 2023-2024 school year with a maximum enrollment of 641 students by year 5. The 2022-2023 school year will serve as a planning year.

The initial panel of reviewers included a diverse group of district administrators with expertise in a variety of areas related to the effective operation of schools. The initial panel of reviewers presented the findings from the review to the Charter Review panel. The charter school applicants were also interviewed. The interviews offered the applicant an opportunity to demonstrate the organizing group's capacity to implement the ideas as presented in the application as well as an opportunity to respond to clarifying questions from the Charter Review Panel. The Charter Review Panel has reviewed the application and discussed the findings from the initial panel of reviewers. The HOLA! Elementary @ MSA application meets the state requirements as set forth in Florida Statute 1002.33.

The approval of the charter school application from HOLA! Elementary @ MSA will ensure that all children will have an opportunity for a quality learning experience.

The application is too large to attach but can be viewed by contacting the District Support Services Office. A copy of the evaluation instrument is attached.

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Curriculum & Instruction | Goal 3
Establish professional learning systems to advance continuous academic improvements, promote collective responsibility for student achievement, and support alignment of educator goals, school improvement goals, and school district goals by August 2022.

Recommendation
The Superintendent recommends approval of the Charter School application from HOLA! Elementary @ Manatee School of the Arts (MSA).

Financial Impact
HOLA! Elementary @ MSA will receive ninety-five percent (95%) of the Full-Time Equivalent (FTE) and other appropriate funds based on actual enrollment as reported in FTE survey reports.

HOLA! APPLICATION Evaluation Instrument_MASTER Rev. 5.20.22

Florida Charter School Application Evaluation Instrument

Each section presents criteria for a response that meets the standard, and these criteria should guide the overall rating for the section. The Strengths and Weaknesses boxes provide space to identify data and other evidence that supports the rating. The rationale for each rating is important, especially if some of the data or evidence does not fit neatly into the criteria provided.

Capacity Interview:
Applicants may have the opportunity to present their plan and demonstrate the team's capacity to open and maintain a high-quality charter school as well as to answer questions about their proposal. Any information or evidence from the capacity interview that is used by the sponsor as a basis for denial of the application must be properly documented by means of a recording or transcript.

The following definitions should guide the ratings:

Meets the Standard:	The response reflects a thorough understanding of key issues and demonstrates capacity to open and operate a quality charter school. It addresses the topic with specific and accurate information that shows thorough preparation and presents a clear, realistic picture of how the school expects to operate.
Partially Meets the Standard:	The response addresses most of the criteria, but the responses lack meaningful detail and require important additional information.
Does Not Meet the Standard:	The response lacks meaningful detail, demonstrates lack of preparation, or otherwise raises substantial concerns about the applicant's understanding of the issue in concept or ability to meet the requirement in practice.

Authorizers are encouraged to align their application review process with the Florida Principles and Standards for Quality Authorizing.

OVERALL ASSESSMENT – COMPLETE THIS SECTION LAST

Would you recommend approval of this application for a public charter school? Explain your recommendation in the Summary Comments section, below.

DENY	APPROVE
☐	☒

Name of Person Completing Assessment: **Dr. Valerie Moore Hyer** **Date: 5.20.2022**

Title: Specialist, District Support Charter Schools Office

Signature: *Dr. Valerie Moore Hyer*

Rule 6A-6.0786
Form IEPC-M2
Effective December 2019

I. Educational Plan

The education plan should define what students will achieve, how they will achieve it, and how the school will evaluate performance. It should provide a clear picture of what a student who attends the school will experience in terms of educational climate, structure, assessment and outcomes.

1. Mission, Guiding Principles and Purpose

The Mission, Guiding Principles and Purpose section should indicate what the school intends to do, for whom and to what degree.

Statutory References:
s. 1002.33(2)

Evaluation Criteria:
A response that meets the standard will present:

- A clear and compelling mission and vision statement that defines the guiding principles and values of the school.
- Adequate references to evidence that the application fulfills the statutory guiding principles and purposes for charter schools. (Note: the substance of each addressed principle and purpose will be evaluated within appropriate application sections.)

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths

The application supplies adequate information detailing the mission and purpose of the school.

"The mission of Renaissance Arts and Education, Inc. is to provide an education environment that will allow students to succeed and grow academically by acknowledging and accommodating different learning styles." (pg. 4 & 6)

"We believe that is best achieved by an educational program that infuses and integrates the visual and performing arts into the core academic curriculum and offers a broad range of visual and performing arts electives (Middle School Mission, 2021). (pg. 4)

"Goal is to establish a separate PreK through Grade 5 Arts-infused Dual Language Two-Way Developmental Bilingual Education (TWBE) Program (FLDOE, 2014) to be named HOLA! Elementary @MSA." (pg. 4)

"Equally powerful is the arts-infused educational model meant to connect all learner with its universal language of rhythm images, symbols, and movement." (pg. 4)

"The vision of Hola! Elementary @ MSA is to create bilingual, biliterate, and sociocultural competent learners within an Arts-infused Ducal Language Program." (pg. 6)

"We embrace the three main goals set forth by the Guiding Principles for Dual Language Education, 3rd Edition (Howard et al., 2018) from the Center of Applied Linguistics (CAL) for all dual language schools." (pg. 6)

Well written and the benefits of Dual Language are thoroughly explained.

Clear mission and vision that sets the purpose for the school and what they hope to achieve.

References to research as the foundation for this plan were up-to-date. References were all appropriate.

Strong base – addresses planned items with references throughout application.

Concerns and Additional Questions

Indicates that students will graduate MSA Elementary achieving bilingualism and biliteracy. How will this be measured?

How will the arts schedule be built to support both schools?

2. Target Population and Student Body

The Target Population and Student Body section should describe the anticipated target population of the school and explain how the school will be organized by grade structure, class size and total student enrollment over the term of the school's charter.

Statutory Reference(s):

s. 1002.33(10)

Evaluation Criteria:

A response that meets the standard will present:

- A clear description of the students the charter school intends to serve including any target populations in accordance with Florida law.
- Alignment of the targeted student body with the overall mission of the school.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Main focus identified throughout (bilingual) plan equal English and Spanish Dominate students The target population and student body were met in this section. Provided details of where growth – new development, location of school strong Spanish speaking population. Student projected demographics are based on area census data and other schools in the area. HOLA! Elementary's anticipated student body will include a growing Hispanic population and historically low-performing English Language Learners from the surrounding traditional schools." (pg. 8) "Therefore, we will seek a "racial/ethnic range of other public schools in the same school district" (see Figure 2. Palmetto Educational Heatmap)." (pg. 8) "A balance of English dominant students who seek to enrich their academic lives and Spanish dominant students who wish to retain and broaden their Heritage language will be sought to fulfill our enrollment projections." (pg. 8) "Within the balance of both groups, we anticipate an array of ability levels, diverse backgrounds, and linguistic abilities, to include some gifted students." (pg. 8) Target students who are interested in visual, performing, and digital arts…a critical need. Identified population was targeted based on surrounding area and uses current data of demographics and achievement within those demographics.

Concerns and Additional Questions
MSA refers to ELL students, Pre-K – 5, and although they indicate that they are aware that Pre-K students are not labeled as ELL, continue to use that terminology. (Page 8-9) There is mention of a balance of these two groups. How will this be attained? (page 8) The demographics taken into consideration for the projected enrollment are derived from the Palmetto area, but as a charter school, students come from all around the district to attend this school. The analysis of demographics ought to be more comprehensive and the scope widened to reflect this. (page 10) What happens if Hola! @ MSA does not attract the targeted population to build enough blended bilingual classes?

3. Educational Program Design

The Educational Program Design section should describe the educational foundation of the school and the teaching and learning strategies that will be employed.

Statutory Reference(s):

s. 1002.33(7)(a)2.

Evaluation Criteria:

A response that meets the standard will present an educational program design that:

- An educational program design that:
  - Is clear and coherent;
  - Is based on effective, experience or research-based educational practices and teaching methods, and high standards for student learning;
  - Aligns with the school's mission and responds to the needs of the school's target population, and
  - Is likely lead to improved student performance for the school's target population.
- A proposed daily school schedule and annual calendar that complies with statutory requirements for annual number of instructional minutes/days and aligns with priorities and practices described in the educational program design.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Teachers will be screened to be considered "bilterate". Dual language instruction (ELA block and SLA block) combined with arts integration is a strength. The schedule and annual calendar are in alignment statutory requirements for instructional minutes/days. The calendar also aligns with the school mission, vision and plans as described in this section. "Dual language educational models have consistently shown the ability to "close the achievement gap" (Collier & Thomas 2004) for English Language Learners (Dworin, 2003)." (pg. 13) Hola! @ MSA presents a clear and sensible education plan. The education program is research-based and the teaching methods incorporate high standards for student learning and closing the achievement gap. The school's mission and education program are aligned, and the goals aim to reach the needs of the school's target population. The research supports improved student performance for the school's target population, so we anticipate that practice will do likewise.

"This model accelerates those English Language Learners who are still acquiring literacy in English and provides metacognitive for the emergent bilinguals who are English-dominant, adhering to the academic achievement goals of our school's mission." (pg. 14)

"Furthermore, the Benchmarks for Excellent Student Thinking (B.E.S.T.) standards will form the foundation for grade-level curriculum maps and permeate instructional venues to ensure content mastery." (pg. 14)

"As part of the Manatee County Schools family of charter schools, HOLA! Elementary will align with the Manatee County Schools' academic calendar, thus providing an equal number of school days and hours of instructional time." (pg. 23)

"We have also included a specific block of time dedicated to providing differentiated instruction to all students." (pg. 23)

Thorough research cited to support the educational program design for both the arts and the bilingual approach.

Concerns and Additional Questions

What happens for students that transfer in that need the 90/10 scaffolding and missed those years at the school?

Indicates that Science and Social Studies will be infused into the ELA block for K-3 grade. Instruction time for those two content areas will be limited due to inclusion in the ELA block. To include all the components they listed, there would need to be a substantial block of time (page 15).

Indicates that teachers will undergo a rigorous screening process to determine their biliteracy but does not mention recruitment. How will these teachers be found? How will you find biliterate teachers who are experts in all the content taught in Elementary? (page 17)

No mention of math instruction in this section.

4. Curriculum Plan

The Curriculum Plan section should explain not only *what* the school will teach but also *how* and *why*.

Statutory Reference(s):

s. 1002.33(6)(a)2.; s. 1002.33(6)(a)4.; s. 1002.33(7)(a)2.; s.1002.33(7)(a)4.

A response that meets the standard will present a curriculum plan that:

- Provides a clear and coherent framework for teaching and learning;
- Is research-based;
- Is well-aligned with the school's mission and educational philosophy;
- Provides an emphasis on reading;
- Will enable students to attain Florida standards and receive a year's worth of learning for each year enrolled; and
- Will be appropriate for students below, at, and above grade level.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths

There is a plan for MTSS.

The curriculum for teaching and learning provides a clear and coherent framework.

The school's mission and educational philosophy are evident in the curriculum design.

"Our MTSS process will follow state and district guidelines when addressing the needs of our at-risk students or those who are not making academic progress." (pg. 30)

Hola! @ MSA's reading emphasis will be appropriate for students below, at, and above grade level, as required by Florida Statute.

"In order to reach toward our mission of bilingual and biliteracy, HOLA! Elementary will teach Reading by embracing the pedagogy of Biliteracy." (pg. 35)

"The teaching of reading will include the primary focus on phonemic awareness and phonics but also include logographic and orthographic methodologies, all important when teaching reading toward biliteracy." (pg. 37)

The Dual Language curriculum will enable students to attain Florida standards and narrow the achievement gap for emergent bilinguals.

With the curriculum as presented, all students should have the ability to attain a year's worth of learning each year.

Curriculum plan is thoroughly explained and directly links to the school's mission and goals.

Maps are still under development but the explanation of plan is thorough and aligned with the full implementation of BEST standards.

The Hola! @ MSA curricular plan provides an emphasis on reading for all students.

Is research-based and is one of six programs identified by the FDOE identified as consistent with closing the achievement gap.

Concerns and Additional Questions

Science instruction is not explicit (Embedded into ELA along with social studies) until 4th grade.

Social studies will not have any explicit instruction in grades k-5! An additional concern is "Big ideas in Math" which is currently under review.

How will the Science and Social Studies topics required K-5 be fully taught if infused into ELA and SLA? (page 25)

What is the Life Skills curriculum? How does it dovetail into the Dual Language, arts infused model? How is it layered into the classroom? P.42

What are the key components of a bilingual mindset you are looking for in hiring teachers? How is this different from biliterate skills? How do you anticipate the relationship building to happen between staff? Students? Parents? The school culture?

5. Student Performance, Assessment and Evaluation

The Student Performance, Assessment and Evaluation section should define what students attending the school should know and be able to do and reflect how the academic progress of individual students, cohorts over time, and the school as a whole will be measured.

Statutory Reference(s):
s. 1002.33(6)(a)3.; s.1002.33(7)(a)3.; s.1002.33(7)(a)4.; s.1002.33(7)(a)5.

Evaluation Criteria:
A response that meets the standard will present:

- An understanding of academic accountability provisions and goals mandated by the state.
- An indication that the applicant will hold high expectations for student academic performance.
- Measurable goals for student academic growth and improvement.
- Promotion standards that are based on high expectations and provide clear criteria for promotion from one level to the next, and for graduation (if applicable).
- Evidence that a range of valid and reliable assessments will be used to measure student performance.
- A proposed assessment plan that is sufficient to determine whether students are making adequate progress.
- Evidence of a comprehensive and effective plan to use student achievement data to inform decisions about and adjustments to the educational program.
- Plans for sharing student performance information that will keep students and parents well informed of academic progress.
- Acknowledgement of and general plan to meet FERPA requirements.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Plan for progress monitoring and data review is well outlined. FOCUS parent portal is able to keep parents informed of academic progress. "Students with and without data will participate in beginning-of-the-year school-based assessments to establish initial baseline data for all content areas, including ELA, Math and Science." (pg. 44) "Furthermore, the success of the revised goals and our educational program will be monitored and evaluated by our SLT throughout the year using formative/summative assessments, progress monitors, school-based assessments, and state-mandated tests (see Attachment F)." (pg. 45) "HOLA! will provide promotion results for all K-5 students at the end of every school year by means of a formal end of year report card." (pg. 48) "All staff will review FERPA (Federal Education Rights and Privacy Act), and its guidelines will be included in the staff handbook to be reviewed on a yearly basis." (pg. 53)

Concerns and Additional Questions
How will language proficiency be measured for incoming students, especially those in Pre-K who have not had formal schooling prior to this? (page 44) How will a student transferring in with no Spanish foundation catch up?. (page 47) How will literacy in Spanish be measured? Since there is no state assessment, will the school develop its own? (page 49-50) How will you implement Acaletics in Spanish?

6. Exceptional Students

The Exceptional Students section should demonstrate an understanding of the requirements of the school to serve all students and provide a concrete plan for meeting the broad spectrum of educational needs and providing all students with a quality education.

Statutory Reference(s):

s. 1002.33(16)(a)3.

Evaluation Criteria:

A response that meets the standard will present:

- A clear description of the programs, strategies and supports the school will provide to students with disabilities that will ensure appropriate access for students with disabilities and that the school will not discriminate based on disability.
- A clear description of how the school will ensure students with disabilities will have an equal opportunity of being selected for enrollment.
- A comprehensive and compelling plan for appropriate identification of students with special needs to ensure they are served in the least restrictive environment possible, have appropriate access to the general education curriculum and schoolwide educational, extra-curricular, and culture-building activities in the same manner as non-disabled students, receive required and appropriate support services as outlined in their Individual Education Plans and 504 plans, and participate in standardized testing.
- An understanding and commitment to collaborating with the sponsor to ensure that placement decisions for students with disabilities will be made based on each student's unique needs through the IEP process.
- An appropriate plan for evaluating the school's effectiveness in serving exceptional students, including gifted.
- A realistic enrollment projection (SWD) and a staffing plan that aligns with the projections.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
"Based on this review and our current partner middle/high school ESE student population, we project that approximately 8% percent of our student population will be students with disabilities served through Individual Education Plans (IEP)." (pg. 54) "Requests for cumulative folders and IEP data will not be reviewed in PEER until after the child has been fully enrolled and admitted." (pg. 54) "The goal of the MTSS structure is to support struggling students with research-based interventions to help secure academic and behavioral success." (pg. 55) "During the initial six-week implementation of the intervention, fidelity will be monitored by our PST Team." (pg. 56) "ESE services will be provided by teachers and staff who are appropriately certified by the State of Florida." (pg. 57)

Adequate process for identification of students in need of further supports.

Concerns and Additional Questions
Projection for needs of ESE teachers seems low. 1 total teacher in the first year and 2 in the subsequent years. Page 59 – They are projecting 8% of students to be SWD. This needs to be revisited based on the new information and district averages. Will interventions be done in both languages, English and Spanish? Caution to using set time limits (i.e. 6 weeks, 12 weeks) as a rule instead of as a guide.

7. English Language Learners

The English Language Learners section should demonstrate an understanding of the requirements of the school to serve English Language Learner students and provide a concrete plan for meeting the broad spectrum of educational needs and providing all students with a quality education.

Statutory Reference(s):

s. 1002.33(10)(f)

Evaluation Criteria:

A response that meets the standard will present:

- Demonstrated understanding of legal obligations regarding the education of English Language Learners.
- A comprehensive and compelling plan for educating English Language Learner students that reflect the full range of programs and services required to provide all students with a high-quality education.
- A clear plan for monitoring and evaluating the progress of ELL students, including exiting students from ELL services.
- Demonstrated capacity to meet the school's obligations under state and federal law regarding the education of English Language Learners.
- A realistic enrollment projection (ELL) and a staffing plan that aligns with the projections.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Home language survey, progress monitoring, will fulfill the staff requirement of having a bilingual staff member who speaks a specific language when at least 15 students who speak said language are enrolled. HOLA! Elementary will meet all state and federal requirements to ensure that all English Language Learners (ELL) have equitable access to our educational programs." (pg. 62) "As mentioned in Section 2A, our partner school MSA can account for over 20 languages in its current population of 1800 students." (pg. 62) "All strategies and intervention will be documented in the teachers' lesson plans and ELL success will be monitored by the ELL Committee using student data and anecdotal information." (pg. 64)

Concerns and Additional Questions
ESOL para for arts department only as funding permits. What about ELL students who do not speak Spanish? For ELLs who have a different native language, they would seemingly be learning two new languages (English and Spanish) at the same time.

8. School Culture and Discipline

The School Climate and Discipline section should describe the learning environment of the school and provide evidence that the school will ensure a safe environment conducive to learning.

Statutory Reference(s):
s. 1002.33(7)(a)7.; s. 1002.33(7)(a)11.

Evaluation Criteria:
A response that meets the standard will present:

- A planned school culture that is consistent with the school's mission and congruent with the student discipline policy.
- An approach to classroom management and student discipline that is consistent with the overall school culture and philosophy.
- Recognition of legal obligations and children's rights related to enforcing student discipline, suspension, and recommended expulsion, including the school's code of conduct, if available.
- Consideration of how the code of conduct will apply to students with special needs.
- Appropriate and clear roles of school administrators, teachers, staff, and the governing board regarding discipline policy implementation.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
PBIS system. "The power of student-partnership will reside in the communication between student-to-student and teacher-to-student interactions." (pg. 67) "The school's PBIS school-wide system will identify these characteristics, define the school expectations, and develop a PBIS plan which could recognition systems, quarterly events, and school-wide discipline procedures." (pg. 68) Description of building culture was clear.

Concerns and Additional Questions
What are the plans to have staff trained in PBIS? How will this manifest school-wide with common expectations and incentives? (page 69) What are the intentional structures and procedures that support the development of academic content and language across school campuses? How do they impact school culture and discipline? P67 PBIS doesn't address how expectations will be taught, data monitored and reviewed, interventions put in place for behavior.

9. Supplemental Programming

The Supplemental Programming section should describe extra and co-curricular activities offered by the school. This section is optional.

Statutory Reference(s):
NA

Evaluation Criteria:
A response that meets the standard will present:

- A clear description of extra- and co-curricular activities that support, and do not detract from, the educational program.
- Evidence of an adequate funding source for extra- and co-curricular activities.
- Lack of supplemental programming may not be a basis for denial.

Strengths
"Moreover, as the school grows into its identity, extracurricular activities may include Future Educators of America, National Elementary Honor Society (NEHS), Odyssey of the Mind, and engaging the arts community throughout the region." (pg. 72)

Concerns and Additional Questions
No funding earmarked for supplemental programming.

II. Organizational Plan

The Organizational Plan should provide an understanding of how the school will be governed and managed. It should present a clear picture of the school's governance and management priorities, what responsibilities various groups and people will have, and how those groups will relate to one another.

10. Governance

The Governance section should describe how the policy-making and oversight function of the school will be structured and operate.

Statutory Reference(s):
s. 1002.33(7)(a)15.; s. 1002.33(9)

Evaluation Criteria:
A response that meets the standard will present:

- A governing board that is legally structured, or has a plan to organize in conformity with the laws of Florida.
- A clear description of the governing board's roles, powers, and duties that are consistent with overseeing the academic, organizational, and financial success of the school.
- Appropriate delineation between governance and school management roles.
- At least the core of the Governing Board is identified that has a wide range of knowledge and skills needed to oversee a charter school.
- A board structure (e.g. bylaws and policies concerning member selection, committees, meeting frequency) that supports sustainable and effective school governance.
- Evidence that applicant understands and intends to implement open meeting and records laws.
- Clear policy and plan for dealing with conflicts of interest.
- Appropriate and clear role for any advisory bodies or councils if included.
- An outline of a grievance process (or policy) that will simultaneously address parent or student concerns and preserve appropriate governance and management roles.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
"Renaissance Arts and Education, Inc. is a non-profit corporation organized under the laws of the State of Florida with its own federal tax-exempt identification number." (pg. 73) "The Board of Directors will also meet all state requirements for board training." (pg. 73) "The Principal will also be responsible for parent/community involvement, marketing, ad enrollment efforts." (pg. 74) "As indicated above, each Board member undergoes Florida Charter School Governance Training provided by Kathleen W. Schoenberg, PA., approved by the FLDOE." (pg. 76)
Concerns and Additional Questions
None

11. Management and Staffing

The Management and Staffing section should describe how the day-to-day administration of the school's operations will be structured and fulfilled.

Statutory Reference(s):
s. 1002.33(7)(a)9.; s. 1002.33(7)(a)14.

Evaluation Criteria:
A response that meets the standard will present:

- An organizational chart or charts that clearly and appropriately delineate lines of authority and reporting.
- A management structure that includes clear delineation of roles and responsibilities for administering the day-to-day activities of the school.
- Identification of a highly-qualified school leader or a sound plan for the recruitment and selection of the school leader.
- A viable and adequate staffing plan.
- A sound plan for recruiting and retaining highly-qualified and appropriately-certified instructional staff.

Meet the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Structure, design, implementation plan. "Documents can be found as respective Attachments M1, M2, and M3 and M4." (pg. 78) "The instructional leader will be selected and on board by January 2023 in order to prepare for open enrollment and the hiring of instructional personnel." (pg. 78) The applicant has addressed all evaluation criteria in sufficient detail to warrant a successful management and staffing operation of the school. Structure, design, implementation plan.

Concerns and Additional Questions
Roles and responsibilities for the admin team are not well outlined. May be difficult to find highly qualified, biliterate educators.

12. Human Resources and Employment

The Human Resources and Employment section should define the policies and procedures that frame the school's relationship with its staff.

Statutory Reference(s):
s. 1002.33(7)(a)14.; s. 1002.33(12)

Evaluation Criteria:
A response that meets the standard will present:

- A clear explanation of the relationship between employees and the school.
- Description of the school leader and teacher evaluation plans, or outline of such plans, which align with the Student Success Act as defined by state law.
- A compensation and benefits plan or outline of such a plan that is aligned with Florida's Student Success Act, and will attract and retain quality staff.
- Procedures that are likely to result in the hiring of highly-effective personnel.
- Policies and procedures that hold staff to high professional standards or a plan to develop such policies and procedures.
- An effective plan to address any leadership or staff turnover.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
"The Principal will be evaluated annually by the corporation President or a member of the Board of Directors, each being trained to implement the appropriate evaluation instrument". (pg. 84) The applicant has addressed all evaluation criteria in detail. Subsection Compensation only states that the compensation structure of MSA will be applied. Personnel policies and procedures are in the process of being developed to have them available for the opening week, so technically this evaluation criteria is met.

Concerns and Additional Questions

13. Professional Development

The Professional Development section should clearly describe the proposed expectations and opportunities for administrators, teachers, and other relevant personnel.

Statutory Reference(s):
NA

Evaluation Criteria:
A response that meets the standard will present:

- Professional development activities for administrators and instructional staff that align with the educational program and support continual professional growth as well as growth in responsibilities related to specific job descriptions.

Strengths
"We will, however, utilize the Professional Growth System, My PGS, currently employed by the School Board of Manatee County, to log all professional development documentation and, at times utilize their open PD resources as well." (pg. 87) PD topics and support align with the various goals of the school. Support for new and veteran teachers was identified.

Concerns and Additional Questions
No additional time for professional development in calendar. Will PD be used to build content capacity or pedagogical capacity? (page 87) Who will be providing the PD? Will it be internal or provided by experts outside of the school? (page 88)

14. Student Recruitment and Enrollment

The Student Recruitment and Enrollment section should describe how the school will attract and enroll its student body.

Statutory Reference(s):

s. 1002.33(7)(a)7.; s. 1002.33.(7)(a)8.; s. 1002.33(10)

Evaluation Criteria:

A response that meets the standard will present:

- A student recruitment plan that will enable the school to attract its targeted population.
- An enrollment and admissions process that is open, fair, and in accordance with applicable law.
- A plan and process that will likely result in the school meeting its enrollment projections.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Aiming to have 50% dominant (white) and 50% minority (Hispanic) Diverse methods for reaching the targeted population, including outreach into the community. Enrollment process is clear and, as written, will result in fair enrollment practices.

Concerns and Additional Questions
What if the enrollment ends up being majority White or majority Hispanic? How will this affect their instructional model/mission/plans? How will a balance of ELL and no-ELL students be met? A lottery is mentioned, but how will that ensure that the student body consists of Spanish speaking students and non-Spanish speaking students?

15. Parent and Community Involvement

The Parent and Community Involvement section should provide a broad overview of the school's plans to encourage and support parental and community involvement.

Statutory Reference(s):
NA

Evaluation Criteria:
A response that meets the standard will present:

- A general conception of how parents will be involved with the school that aligns with the school's mission and provisions of the educational program. A detailed plan may be developed following approval.

Strengths
Existing relationships with parents and community via MSA.

Concerns and Additional Questions
Will there be a School Advisory Council? Parent Teacher Association? Does MSA have community partnerships established that would also support this school?

III. Business Plan

The Business Plan should provide an understanding of how the charter operators intend to manage the school's finances. It should present a clear picture of the school's financial viability including the soundness of revenue projections; expenditure requirements; and how well the school's budget aligns with and supports effective implementation of the educational program.

16. Facilities

The Facilities section should provide an understanding of the school's anticipated facilities needs and how the school plans to meet those needs.

Statutory Reference(s):
s. 1002.33(7)(a)13.; s. 1002.33(18)

Evaluation Criteria:
If a facility is acquired, reviewers will look for:

- Evidence that the proposed facility complies with all applicable laws, regulations, and policies and can be ready for the school's opening OR a timeline to ensure the facility will be in compliance and ready by school's opening.
- A facility that is appropriate and adequate for the school's program and targeted population.
- Evidence that the school has the necessary resources to fund the facilities plan.
- A reasonable back-up plan should the proposed facility plan fall through.

If a facility is not yet acquired, reviewers will look for:

- A realistic sense of facility needs.
- A plan and timeline for securing a facility that is appropriate and adequate for the school's program and targeted population.
- Reasonable projections of facility requirements.
- Evidence that the school has the necessary resources to fund the facilities plan.
- Adequate facilities budget based on demonstrated understanding of fair market costs.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths

Concerns and Additional Questions
Is there a 'plan B' in the event there are construction delays?

17. <u>Transportation</u>
The Transportation section should describe how the school will address these services for its student body.

Statutory Reference(s):
s. 1002.33(20)

Evaluation Criteria:
A response that meets the standard will present:

- An outline of a reasonable transportation plan that serves all eligible students and will not be a barrier to access for students residing within a reasonable distance of the school.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
The Transportation plan for HOLA! Elementary @ MSA is, for the most part, sound and covers what would be expected of a Transportation program.

Concerns and Additional Questions
The school identifies that they will be using MSA's current school bus fleet, with an additional "four new specially designed school buses for the younger students as primary vehicles." Can you define in greater detail? The school also identifies that they are planning to use electric school buses for the elementary students. Are these electric buses the four "specially designed" school buses? The FDOE sets compliance issues for school transportation in Florida, not FDOT.

18. <u>Food Service</u>
The Food Service section should describe how the school will address these services for its student body.
Statutory Reference(s):
s. 1002.33(20)(a)1.

Evaluation Criteria:
A response that meets the standard will present:

- A food service plan that will serve all students and makes particular provisions for those students who may qualify for free or reduced price lunch.
- A food service plan that places an emphasis on quality, healthy foods.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
MSA will be utilizing their current vendor to provide their National Lunch Program

Concerns and Additional Questions

19. School Safety and Security

The School Safety and Security section should provide a description of the school's plan to ensure the safety and security of its students and faculty.

Statutory Reference(s):

s. 1002.33(7)(a)11; s. 1002.33(16)(b)8, 12, and 14

Evaluation Criteria:

A response that meets the standard will present:

- A plan that reasonably ensures the safety of students and staff and the protection of the school facility and property. Note that a fully-developed plan will be completed after approval of the application.
- A description of how the school plans to comply with the requirement that at least one safe-school officer is present while school is in session.
- Procedures that clearly demonstrate a plan to respond to active assailant incidents.
- A description of how the school plans to train school staff to respond to active assailant incidents.
- A description of how the school will establish a team to assess and intervene with individuals whose behavior may post a threat to the safety of staff or students.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths

Concerns and Additional Questions
Threat Assessment Teams are to meet monthly. The application states regularly, but once per month is required.

20. Budget

The Budget section should provide financial projections for the school over the term of its charter.

Statutory Reference(s):
s. 1002.33(6)(a)5.; s. 1002.33(6)(b)2.

Evaluation Criteria:
A response that meets the standard will present:

- Budgetary projections that are consistent with and support all key aspects of the application, including the school's mission, educational program, staffing plan, and facility.
- A realistic assessment of projected sources of revenue and expenses that ensure the financial viability of the school.
- A sound plan to adjust the budget should revenues not materialize as planned.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Reasonable detail budgeted expenses. Provided explanation on increases. Projections in the budget are reliable and aligned with all significant facets of the application. The budget looks to be on par to support the school's mission, the educational program cited in the application narrative, the staffing plan as explained in the application, and the education facility. Projected sources of revenue and expenses are realistically presented. All revenue sources show that the school will be monetarily stable. Hola! @ MSA has included a sensible plan to adjust the budget in the event revenues do not materialize as planned. Budget for staffing plans appears to track correctly also the expense budget appears to cover all the essential requirements.

Concerns and Additional Questions
Salaries might be a little low if hiring veteran teachers.

21. Financial Management and Oversight

The Financial Management and Oversight section should describe how the school's finances will be managed and who will be responsible for the protection of student and financial records.

Statutory Reference(s):
s. 1002.33(6)(a)5.; s. 1002.33(7)(a)9.; s. 1002.33(7)(a)11.

Evaluation Criteria:
A response that meets the standard will present:

- A clear description of how the school's finances will be managed, including who (or what contracted entity) will manage the finances. Such plan should contain strong internal controls to ensure appropriate fiscal management and ability to comply with all financial reporting requirements.
- A plan for the governing board to regularly exercise oversight over and take accountability for all financial operations of the school.
- Provisions for an annual financial audit.
- Appropriate public transparency of school financial health.
- Appropriate plan to securely store financial records.
- A plan to obtain appropriate and reasonable insurance coverage.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Structure for reviewing of financials. Hola! @ MSA has provided a clear description of how the school's finances will be managed. Their current CFO has been involved in the development of this application and will continue to manage finances for the new schools. Hola! @ MSA's plan provides sound internal controls to ensure appropriate financial supervision. Hola! @MSA has demonstrated the ability to fulfill financial reporting requirements. Financial back up are kept in an off-site location and additional onsite location. There is a plan for the governing board to oversee over all financial operations of the school. Provisions are in place for Hola! @ MSA to conduct an annual financial audit via an external auditor as required by Florida Statute. Utilize annual audit for various objectives. The school demonstrates proper public transparency of the school's finances. It is apparent that Hola! @ MSA has suitable means to securely store all financial reports and

records.

Contingency plan for reduced budget.

There is a plan in place to ensure that Hola! @ MSA provides the applicable and practical insurance coverage as required by law.

Concerns and Additional Questions

22. Start-Up Plan

The Start-Up Plan should provide a clear roadmap of the steps and strategies that will be employed to prepare the school to be ready to serve its students well on the first day of operation.

Statutory Reference(s):
s. 1002.33(7)(a)16.

Evaluation Criteria:
A response that meets the standard will present an action plan that:

- Provides a thoughtful and realistic implementation plan that covers major operational items and provides flexibility for addressing unanticipated events.

Meets the Standard	Partially Meets the Standard	Does Not Meet the Standard
☒	☐	☐

Strengths
Key activities identified in plan that includes timelines and objectives.

Concerns and Additional Questions
Construction completion date is 6-13-23, leaves a small window for construction delays in the event there are product delays or shortages.

Addendum

Applicant History Worksheets (Form IEPC-M1A)

The Applicant History Worksheets should provide information regarding the track record of the applicant, the applicant's governing board, and if applicable, the applicant's ESP with regard to the operation of other charter schools. The sponsor should review the entire portfolio of charter schools of the foregoing entities when evaluating performance. The academic and financial performance of the portfolio should be considered in the decision to approve or deny the application.

Statutory Reference(s):
s. 1002.33(6)(a)

Evaluation Criteria:
A sponsor should review the portfolio of schools operated by the applicant group, governing board, or ESP to determine if the academic and financial performance demonstrates the capacity to operate a high-quality charter school.

Strengths
MSA is a long-standing charter school operating in Manatee County for the past 25 years, with a stellar reputation and stable history. There are no doubts iHola! Elementary @ MSA has a strong ally and sister school to help get it off the ground.

Concerns and Additional Questions
None

AGENDA ITEM NO. 11.2

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval of Substitute Teaching Employment Services for the 2022-2023 School Year, 21-0046-RG, Continued Procurement with Vendor, Estimated in the Amount of $3,600,000.00 - Revision 2 - *added June 23, 2022*

Executive Summary
On June 23, 2020, the School Board approved the use of the School District of Duval County bid to provide Substitute Teaching Employment Services, SDMC No. 21-0046-RG. On June 22, 2021, the participating agreement was amended to further clarify the role of ESS as it pertains to long-term substitutes.

ESS Southeast LLC is requesting an addendum to increase the rates effective August 1, 2022.

Currently, the District utilizes over 1,100 active ESS substitutes. To remain competitive with surrounding districts, increasing the daily rate for all substitutes, including long-term substitutes and substitutes for paraprofessionals, is necessary. Increasing the daily pay rates should allow The School District of Manatee County to attract and retain quality substitutes for our schools. This pay rate increase is also more aligned with neighboring districts' pay rates and the District's mission to improve retention rates. It will better allow The School District of Manatee County to compete for substitute employees while emphasizing our Title I Schools. Note: Last year (2021-2022), ESS filled almost 28,000 substitute requests which was a ten percent increase compared to the previous school year (2020-2021).

Daily rate for High School/GED/Associates moving from $89.00 to $110.00.

Daily rate for Bachelor's degree or higher at non-title 1 schools moving from $100.00 to $110.00.

Daily rate for Bachelor's degree or higher at title 1 schools moving from $110.00 to $120.00.

Hourly rate for Paraprofessionals moving from $10.00 to $15.00.

Expenditures for school year 2020-2021 were $3,067,352.70 and $2,458,108.64 for school year 2021-2022.

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Equitable Recruitment & Retention | Goal 1
Recruit the most qualified, diverse and motivated staff.

Equitable Recruitment & Retention | Goal 2
Improve teacher and other employee retention rates.

Recommendation
The Superintendent recommends approval of Substitute Teaching Employment Services for the 2022-2023 School Year, 21-0046-RG, continued procurement with vendor, estimated in the amount of $3,600,000.00 - revision 2.

Financial Impact
The cost to implement this agenda item is estimated to be $3,600,000.00 for the 2022-2023 school year. The funding source for this annual expenditure is the General Fund or Grant Fund, based on Teacher's Fund, and

is included in the funds proposed budget for 2022-2023.

AGREEMENT BETWEEN
THE SCHOOL BOARD OF DUVAL COUNTY, FLORIDA,
AND ESS SOUTHEAST, LLC

This Agreement is made and entered into effective June 6, 2019 (the "Effective Date"), and is by and between The School Board of Duval County, Florida, operating a district school system in the State of Florida (the "District") and ESS Southeast, LLC, a Tennessee limited liability company authorized to transact business in Florida (the "Contractor").

W I T N E S S E T H:

Whereas, the District issued RFP 01-19/TW Substitute Teaching Employment Services (with attachments) dated on or about February 1, 2019, together with Addendum No. 1 dated February 19, 2019, Addendum No. 2 dated February 22, 2019, Addendum No. 3 dated February 26, 2019, and Addendum No. 4 dated February 28, 2019 (collectively, the "RFP"), a copy of which RFP is attached hereto and incorporated herein by this reference as Exhibit A;

Whereas, after free and open competition, Contractor submitted a proposal (attached hereto and incorporated herein by this reference as Exhibit B), and was selected as the best responsive and responsible Contractor by the District (the "Proposal");

Whereas, the Contractor is interested in and capable of performing the desired substitute teaching employment services (hereafter further defined as the "Services") for the District and the District desires to have the Contractor perform the Services; and

Whereas, the parties have reached an agreement on the Services to be performed and the payment for the same, and therefore wish to set forth this understanding in writing in this Agreement.

NOW, THEREFORE, in consideration of the mutual covenants and conditions contained herein, the parties agree as follows:

ARTICLE I
SCOPE OF SERVICES

1.1 The recitals set forth above are true and correct and are incorporated into this Agreement by this reference. Unless otherwise assigned a different meaning in this Agreement, defined terms in this Agreement shall have the same meaning as the defined terms in the RFP.

1.2 The parties agree that the purpose of this Agreement is that the Contractor shall fully, timely, and continuously provide the District the Services in a manner in accordance with the District's objectives set forth in the RFP and this Agreement. The contract documents consist of this Agreement, the RFP, and the Proposal. In the event of any conflict or ambiguity among these documents, the priority set forth in section 13.7.16 of the RFP is assigned.

ARTICLE II
COMMENCEMENT AND RENEWAL

2.1 See Section 2.3 of the RFP. Except for those actions preceding the date of this Agreement, the Services shall commence according to the schedule set forth in the RFP, unless the District notifies the Contractor otherwise in writing.

ARTICLE III
COMPENSATION

3.1 The maximum obligated amount under this Agreement shall be as set forth in Attachment B of the Proposal, subject to the provisions of the contract documents regarding any renewal term; in no event shall the District be responsible to the Contractor for compensation in excess of the maximum obligated amounts stated

in this Agreement except as increased by formal approved and executed supplemental agreement(s). For convenient reference, Attachment B of the Proposal is attached hereto as Exhibit C.

ARTICLE IV
TERMINATION

4.1 See Article 11 of the RFP.

ARTICLE V
MEETINGS; REPORTS; NOTICES

5.1 The parties agree that all communications relating to the day-to-day activities shall be exchanged between the respective representatives of the District and the Contractor, which representatives shall be designated by the parties, in writing, promptly upon commencement of the Services.

5.2 The Contractor shall provide records and information and fully cooperate (notwithstanding any Contractor claims of trade secrets, proprietary or confidential information) with the District as to all matters pertaining to any and all legal, audit, administration, and compliance requirements relating to the Services and the contract documents.

5.3 All formal notices and communications in writing required or permitted hereunder may be delivered via overnight delivery, or pre-paid certified mail, return receipt requested, to the representatives of the District as set forth in section 13.7.14 of the RFP, and to the Contractor as set forth below. Until changed by notice in writing, all such notices and communications shall be addressed as follows:

If to the Contractor:
ESS Southeast, LLC
Attn: Manager
800 Kings Highway North, Suite 405
Cherry Hill, New Jersey 08034

ARTICLE VI
MISCELLANEOUS

6.1 Contractor's exceptions to the RFP set forth in its Proposal, if any, are stricken in their entirety and void except as may be specifically addressed in this Agreement.

6.2 This Agreement may be executed via facsimile and in one or more counterparts, each of which will be deemed an original, but all such facsimiles and counterparts will together constitute but one and the same instrument.

6.3 Timely Payment Discount Pricing Requirements: Contractor will provide a biweekly invoice via e-mail to the District's contract administrator. To qualify for the 0.5% "Timely Payment Discount," the District must satisfy the invoice by an electronic transfer of funds to Contractor within twenty (20) calendar days of receipt of a proper invoice.

June 4, 2019, Regular Board Meeting

Title

50. CONTRACT WITH ESS SOUTHEAST, LLC FOR SUBSTITUTE TEACHING EMPLOYMENT SERVICES

Recommendation

That the Duval County School Board approve the contract with ESS Southeast, LLC for Substitute Teaching Employment Services for an initial term of July 1, 2019 through June 30, 2024, subject to annually appropriated funds.

That the Chairman or Vice-Chairman and the Superintendent be authorized to execute the contract upon approval as to form and sufficiency by the Office of General Counsel.

That authority be delegated to the Superintendent, or designee, to renew the contract for subsequent years provided terms and conditions are favorable to the district and subject to availability of funds. There are three (3) potential one year renewals.

Description

Duval County Public Schools released the Request for Proposal (RFP) for substitute teaching services on February 1, 2019. The district received six proposals that were reviewed and evaluated by an assigned committee. Of the proposals, ESS Southeast, LLC received the highest point total during the committee's evaluation process. Therefore, the substitute teaching contract was offered to ESS Southeast, LLC.

ESS Southeast does not currently have a local office in Duval County. However, ESS Southeast, LLC proposes to transition as the new substitute teaching provider with a flawless opening. The company plans to recruit qualified personnel by connecting with the community, and providing educator led training that is mentorship driven.

Gap Analysis

Adoption of the contract with ESS Southeast, LLC will enable the district to continue staffing instructional vacancies without a break in service, as the current substitute contract will expire June 30, 2019.

Previous Outcomes

Since the 2005-2006 school year, Duval County Public Schools had previously contracted with Kelly Services. Kelly Services provided substitutes for daily teacher and paraprofessional absences.

School Year	Total Cost
2015-2016	$13,606,988
2016-2017	$15,653,379
2017-2018	$16,684,635

BOARD APPROVED
JUN 04 2019

Expected Outcomes

ESS Southeast, LLC is expected to provide daily comprehensive substitute staffing services for Duval County Public Schools. The company is expected to fill substitute positions for teachers and paraprofessionals, and adhere to all terms of the approved contract.

Strategic Plan Goal

Intentional Focus on Student Achievement and Well-Being
Ensure Effective, Equitable and Efficient Use of Resources Aligned to Improved Student Outcomes

Financial Impact

The financial impact for the district is estimated to be $16,000,000 per contract year.

Fund Center	Fund	Function Area	Commitment Item
All Schools	10000	5100, 5200, 5300, 5500, 6400	313

Purpose: **To answer questions received in accordance with this RFP.**

RCM Health Care Services Questions

1. **Question:** Do you accept DocuSign as a form of Original Signature?

   Answer: Duval County Public Schools currently does not accept DocuSign as an original signature. All parties must physically sign contracts.

2. **Question:** What are the current rates for substitute staffing services?

   Answer: Teachers: Less than a Bachelor's degree -- $66.50/day
   Bachelor's degree or higher -- $84/day

   Paraprofessionals: Less than a Bachelor's degree -- $9.50/hr
   Bachelor's degree or higher -- $11.45/hr

3. **Question:** a) Are you satisfied with your current provider of services?

   Answer: Not applicable

b) What would like to see with the awarded vendor and our approach to the requested services?

Answer: Firm's Capabilities and Approach to Services is an evaluation criteria outlined within this RFP in Section 8.0: Proposal Format and Evaluation Criteria.

4. **Question:** What is the annual spend that is projected for the contract? How will it be divided per year?

Answer: The projected annual spend for a substitute vendor contract is $15.9 million. Invoices are remitted bi-weekly. Vendor will receive 22 regular payments, two summer school payments, and one final adjustment each year.

5. **Question:** Will this be a single or multi-award?

Answer: The award is single.

6. **Question:** What is the annual spend that is projected for the contract? How will it be divided per year?

Answer: The projected annual spend for a substitute vendor contract is $15.9 million. Invoices are remitted bi-weekly. Vendor will receive 22 regular payments, two summer school payments, and one final adjustment each year.

7. **Question:** Who are the incumbents for this contract?

Answer: Kelly Educational Staffing

8. **Question:** Approximately how many positions go unfilled each day?

Answer: Approximately 55 vacancies/absences are unfilled each day.

9. **Question:** Can the agency invoice for any mandatory trainings requested by the school district?

Answer: The method of agency invoicing is included in the initial contract. Should additional mandatory trainings or costs arise during the life of the contract, they can be addressed through an addendum.

10. **Question:** What have been the biggest challenges to date?

Answer: Not applicable

11. Question: Of the 800 daily openings, how many of those are classified as “hard to fill”?

Answer: Approximately 170 absences/vacancies are in hard to fill teacher or paraprofessional positions daily.

12. Question: Approximately how many sub teachers are placed each day?

Answer: Approximately 690 substitutes are placed in teacher positions daily.

13. Question: Approximately how many Paraprofessionals are placed each day?

Answer: Approximately 99 substitutes are placed in paraprofessional positions daily.

14. Question: How many hours are in a regular school day?

Answer: Substitutes work seven (7) hours in a regular school day.

15. Question: Page 7 of the RFP – How is the current data tracked? Is it tracked by the district or an internal system by the current agencies?

Answer: Current substitute data is tracked by the contracted vendor. Substitute data is tracked on a daily basis with various reporting options.

16. Question: What system is currently utilized by the school district and / or the current agencies?

Answer: The current software program used to track substitute data is Frontline Education – Absence Management.

Spur Questions

17. Question: The RFP mentions that the district currently utilizes an average of 800 substitutes on a daily basis. How is that split between teachers and paraprofessionals?

Answer: Approximately 690 substitutes are placed in teacher absences daily. Approximately 99 substitutes are placed in paraprofessional positions daily. The remaining number covers position vacancies.

18. Question: If you are currently outsourcing your substitute services, how much do you spend on outsourcing these positions each year?

Answer: The current budget for substitute services is approximately $15.9 million annually.

19. Question: In the RFP's Comprehensive Services, it is noted that "Provider and district perform a daily transfer of teacher profiles". Can you elaborate on what is meant by this?

Answer: The district's central data base operates through SAP. District employees may transfer or become active and inactive for different causes. Changes to employee profiles must be updated immediately by the substitute provider, as not all positions are eligible for substitute services. District vacancies are filled on a daily basis. New teacher or new paraprofessional names must replace the vacancies in a timely manner. The substitute provider must have the capability of receiving extract files from SAP on a daily basis in order to make changes to teacher, paraprofessional, and vacancy statuses.

20. Question: In describing the comparative reports to be provided by the vendor, the RFP identifies "Absentee Rate for Top 25 Hard to Staff Schools to include Turn-Around, ESE Centers, and TOP". Can you provide more information about this report requirement?

Answer: The reporting requirements include, but are not limited to, school names with absence volume, reasons for absences, fill rate, unfilled rate, and comparative numbers to overall district rates.

ESS Questions

Would you please provide the following information:

21. Question: The annual spend for these services with your current provider

Answer: The current budget for substitute services is approximately $15.9 million annually.

22. Question: The current vendor's markup percentage rate, by position if different

Answer: The current vendor markup is 1.39%.

23. Question: The number of teacher absences requiring a substitute and the actual figure that were filled for past school year (SY17-18)

Answer: Approximately 132,000 teacher absences for school year 2017/2018; Approximately 124,000 teacher absences were filled with a substitute.

24. Question: The number of paraprofessional absences requiring a substitute and the actual figure that were filled for past school year (SY17-18)

Answer: Approximately 20,000 paraprofessional absences for school year 2017/2018; Approximately 18,000 paraprofessional absences were filled with a substitute.

25. Question: The absences requiring a substitute and amount filled (fill rate percentage) by school for past school year (SY17-18)

Answer: Requested information not available

26. Question: A copy of the monthly fill rate reports for last 12 months

Answer: To be answered in Addendum 2

27. Question: The most recent principal/administrator survey results

Answer: Requested information not available

28. Question: The current vendor's annual review from last school year (SY17-18)

Answer: Requested information not available

29. Question: Clarification regarding EESS training:

- Does district perform training?

Answer: Duval County Public Schools collaborates with substitute provider to conduct training for paraprofessionals of students with disabilities.

- If so, is cost of training billed to awarded vendor?

Answer: The cost of the training is invoiced to the school district once the substitute completes a substitute job in said district.

30. Question: Clarification regarding DCPS' process for investigating and managing concerns emerging from allegations of misconduct, performance issues, and incidents; is a written copy of this process available?

Answer: Duval County Public Schools' Professional Standards Department processes investigations and management of allegations of misconduct / incidents in conjunction with the substitute provider, if an event has occurred on school property.

31. Question: The name of your current vendor's timekeeping system

Answer: Frontline

DUVAL COUNTY PUBLIC SCHOOLS

RFP: SUBSTITUTE TEACHING EMPLOYMENT SERVICES

RFP No. 01-19TW

1.0 INTRODUCTION:

1.1 **Purpose :**

The purpose and intent of this Request for Proposals ("RFP") is to seek proposals from interested, available, and qualified firms to provide substitute teaching employment services. An agreement will then be entered for the selected firm ("Contractor") to provide the described services for Duval County Public Schools ("DCPS" or the "District").

1.2 **General Information about District Schools:**

The District and its governing board were created pursuant to Section 4, Article IX of the Constitution of the State of Florida. The District is an independent taxing and reporting entity managed, controlled, operated, administered, and supervised by the District's school officials. The Board consists of seven elected officials responsible for the adoption of policies, which govern the operation of the District. The Superintendent of Schools is responsible for the administration and management of the schools within the applicable parameters of state and federal laws and regulations, State Board of Education Rules, and School Board policies. The Superintendent is also specifically delegated the responsibility of maintaining a uniform system of records and accounts in the District.

The District is coterminous with Duval County, which covers 850 square miles and operates 171 facilities, including administrative areas, elementary schools, middle schools, high schools and specialized schools.

The District serves approximately 128,000 students (the student population changes annually). It is the second largest employer in Jacksonville with approximately 11,800 full time staff (approximately 8,300 teachers) at 99 elementary schools, 3 grades K-6 schools, 2 grades K-8 schools, 24 middle schools, 2 grades 6-12 schools, 19 high schools, 6 exceptional student centers, 1 virtual school, 7 alternative schools, 33 charter schools, and additional administrative facilities.

Charter schools are not a part of this contract.

Duval County Public Schools (DCPS) is seeking a firm to recruit, train and employ substitute teachers for absent teachers and some selected parprofessionals. DCPS currently utilizes an average of 800 substititutes on a daily basis. Our vision is to outsource these services which shall include recruiting, training, fingerprinting for FDLE/FBI Level 2 security clearance in accordance with Florida Statutes and district policy employment.

The administration of this Contract is a function of the District's Human Resource Services Department. All post-award communications shall be directed to Director, Employee Support. For more information about the District, please visit www.duvalschools.org on the internet.

2.0 DISTRICT OBJECTIVES/SCOPE OF SERVICES:

2.1 Objective:

Duval County Public Schools (DCPS) is seeking a firm to recruit, train and employ substitute teachers for absent teachers and some selected parprofessionals. DCPS currently utilizes an average of 800 substititutes on a daily basis. Our vision is to outsource these services which shall include recruiting, training, fingerprinting for FDLE/FBI Level 2 security clearance in accordance with Florida Statutes and district policy employment.

2.2 Scope of Services:

The selected firm will recruit, train, and fingerprint for FDLE/FBI Level 2 security clearance in accordance with Florida Statutes and district policy, badge applicants; utilize a web-based system for absence entering and tracking, electronic submission and approval of substitute time/payroll, electronic invoicing, adhering to an invoice submission schedule and acceptance of district's E-payable program or other invoice discount options; employ reporting capabilities including custom and ad hoc reports and adhere to a Service Level Agreement with regards to fill rates and substitute pay rates.

A. Comprehensive Services

The Selected Business Solution Will Deliver the Following Services:

- Provider maintains the data of all substitutes.
- Provider is responsible for the fingerprinting its substitutes. Fingerprints must be submitted specifically for Duval County Public Schools and obtained clearance by the district prior to begin substituting.
- Provider and district perform a daily transfer of teacher profiles.
- Provider maintains data analytics of all substitutes' current pay rate. Provider utilizes an automated scheduling system to manage the substitute scheduling for coverage and payroll purposes.
- Provider will implement an automated timekeeping system in which substitutes enter their time worked.
- Provider pays substitutes weekly in accordance to the substitute = pay rate;in addition to conforming to all federal and state requirements for the compensation of employees.
- Provider generates invoice based on approved time worked by the substitutes. Payment of invoices is linked to the existence of certificate of absences or approved vacancies.
- Provider is responsible for Worker's Compensation of its employees/reporting to the district as necessary.
- Provider maintains data of substitutes who have been removed from specific schools and substitutes who have been made ineligible for substituting with DCPS.
- Provider follows the DCPS process for investigating and managing concerns emerging from allegations of substitute misconduct, performance issues, and incidents.
- DCPS may require that a substitute not be assigned to DCPS as a result of an

investigation or performance issue.

- Provider follows a process to manage and comply with security identification procedure for substitutes arriving to an DCPS campus.
- Provider is responsible for four hour training for substitute teachers prior to assignment to include, but is not limited to Core Values, Responsiblities, working with Others, Guidelines for Implementing Lessons, Classroom Management and Discipline, Exceptional Student Education, Teaching Techniques for Exceptional Students, and Emergency Protocols, bombs, fire, kidnapping, de-escalation techniques, etc.
- Provider is responsible for the process to inform substitutes of EESS training by the District and to coordinate access with District representatives. EESS Training includes, but is not limited to lifting techniques, toileting and diapering, basic sign language for non-verbal students, and professional ethics in the exceptional education classroom.
- Provider implements, with approval of DCPS, a process to periodically assess DCPS satisfaction with the substitutes with the Provider, as well as DCPS administrators' satisfaction with the substitute services provided to our district.

B. DCPS Will Follow These Procedures:

- DCPS follows a reconciliation process to review the invoicing with the provider to ensure payment is appropriate.
- DCPS has established a method to identify budget allocations of funds for payment of invoices.
- DCPS teachers input their own absences into the automated scheduling system.
- School secretaries will input daily all certificates of absences into SAP.
- School secretaries or designated school employees approve every Monday (via an electronic process) time- worked by substitutes.
- DCPS follows a process to ensure applicants who have been made ineligible for assignment with the district are not offered employment in a DCPS setting.

C. Selected Provider Will Provide the Following Comparative Reports:

Annual and Mid-Year reports containing key measures and results such as:

- Active Substitute Teachers
- Total Filled Absences/Vacancies
- Fill Rates%
- Customized Weekly and Monthly Fill Rate Reports
- Customized Weekly and Monthly Unfilled Rate Reports
- Customized Weekly No Sub Needed Reports
- Customized Year over Year Training and Workshop Analysis for Filled Absences by schools
- Customized Year over Year Filled and Unfilled Rate by school type
- Historical Absentee Analysis Year over Year

- Absentee Rate for Top 25 Hard to Staff Schools to include “Turn-Around”, “ESE Centers”, and “TOP”.
- Ability to produce customized analysis of absence history based on day of the week by schools or districts
- Ability to produce customized absence reason data reports and percentages by schools, learning communities, or vacancies upon request
- Number of Active Substitutes With an Associate's Degree or Higher
- Absences Filled With a BA/BS Degreed Substitute
- Number of Substitute Teachers hired full-time to DCPS
- Incident Reporting Rating
- Principal/Administrator Survey Results (very satisfied, satisfied, neutral, dissatisfied, very dissatisfied)
- Substitute Coverage Usage by Schools, Learning Communities, Approved Extended Coverage Requests, Coverage of Vacancies
- Cost Comparison Analysis Year Over Year

Additionally, the selected firm must produce the following deliverables within the stipulated timeframes:

A. Pool of Substitute Teachers
- Minimum Criteria: 60 college credit hours from an accredited college/university recognized by the U.S. Department of Education
- An ability to pass a level II background and fingerprint check
- Ongoing through the life of the contract (July 1, 2019 through June 30, 2024)

B. Pool of Substitute Paraprofessionals
- Minimum Criteria: 60 college credit hours from an accredited college/university recognized by the U.S. Department of Education.
- An ability to pass a level II background and fingerprint check
- Ongoing through the life of the contract (July 1, 2019 through June 30, 2024)

C. Invoices
- Electronic Invoicing with acceptance of the District’s E-payables program and other invoice discount options
- Bi-weekly

D. Record of Time Worked
- Electronic submission and approval of substitute time/payroll
- Weekly

E. Automated Scheduling
- Web-based system for automated scheduling and absence reporting which the District shall have unlimited access. Among other things, produce reports of regular teacher absences and substitute coverage.
- Ongoing through the life of the contract (July 1, 2019 through June 30, 2024)

F. Partnership Review
- Measures and results of fill rates, absences, absence reasons, school analyses, employee position analyses, Servicing Statistics, etc.
- Quarterly

G. Substitute Pay Rates
- Pricing indebtedness
- Ongoing through the life of the contract (July 1, 2019 through June 30, 2024)

H. Training Rates
- Four hour training (to be paid by contracted provider)
- ESE Training - Charged upon first trained para assignment

2.3 **Contract Term:**

The District shall select a Contractor to provide Substitute Teaching Employment Services as herein described for the District commencing from July 1, 2019 through June 30, 2024 (subject, however, to availability of lawfully appropriated funds for each District fiscal year). The Contract may thereafter be renewed for three (3) additional one (1) year periods, upon the consent and agreement of both parties.

2.4 **Escalation Provision:**

At each renewal of the contract, DCPS will consider an increase due to inflation provided the proposed price increase does not exceed the lesser of 3% or the rate of inflation as determined by the Consumer Price Index (CPI) for urban wage earners and clerical workers, U.S. city average, all items (1982-84=100), published by the U.S. Bureau of Labor Statistics, or any successor or substitute index appropriately adjusted for the prior 12 month period using the first-published CPI for the month immediately preceding the month of the Consumer Price Index (CPI) request. The contractor must request the increase in writing prior to the renewal of the contract.

2.5 **Related Services:**

When DCPS requires related substitute teaching employment services or positions that are not a part of the Scope of Services herein, DCPS may, at its sole discretion, elect to negotiate with the contractor to procure those services from the contractor in accordance with this contract **or** may elect to procure elsewhere. If DCPS elects to procure the service(s) from the contractor, a separate purchase order or contract will be issued.

3.0 EX PARTE COMMUNICATION:

Ex parte communication, whether verbal or written, by any potential Respondent or representative of any potential Respondent to this RFP with District personnel involved with or related to the RFP, other than as designated in this document, is strictly prohibited. Violation of this restriction may result in the rejection/disqualification of the Respondents' proposal.

Ex parte communication, whether verbal or written, by any potential Respondent or representative of any potential Respondent to this RFP with Board members is also prohibited and will result in the disqualification of the Respondent.

Notwithstanding the foregoing, communications are permissible by this Section when such communications with a prospective Respondent are necessary for, and solely related to, the ordinary course of business concerning the District's existing contract(s) for the materials or services addressed in this RFP (but in no event shall any existing vendor intending to submit a proposal initiate communications to any member(s) of the School Board of Duval County, Florida; it being understood such communication initiated by a vendor under these circumstances would not be in the ordinary course of business).

4.0 PREPARATION AND SUBMISSION REQUIREMENTS:

4.1 Proposals not conforming to the instructions provided herein will be subject to disqualification at the sole option of the District.

4.2 **All proposals must be received no later than 2:00 p.m. (EDT), on February 28, 2019.** Official time for the purpose of RFP opening will be calibrated using http://www.timeanddate.com/worldclock/results.html?query=jacksonville. If a proposal is transmitted by US Mail or other delivery medium, the Proposers(s) will be responsible for its timely delivery **to Purchasing Services, 1701 Prudential Drive, Jacksonville FL 32207.** Any proposal received after the stated time and date or at other location will not be considered.

4.3 **One manually signed original, two (2) photocopies of original, and nine (9) copies on USB Flash Drive. (9 USB Flash Drives to be submitted)** of the complete proposal must be sealed and clearly labeled **"REQUEST FOR PROPOSAL: Substitute Teaching Employment Services"** on the outside of the package. The legal name, address, Proposers' contact person, and telephone number must also be clearly annotated on the outside of the package.

The manually signed original shall be marked as "ORIGINAL". Once accepted, all original proposals and any copies of proposals become the sole property of the District and may be retained by the District or disposed of in any manner the District deems appropriate.

All proposals must be signed by an officer or employee having authority to legally bind the Proposers(s).

Any corrections of unit prices must be by line-outs of the original prices with correct amounts typed or written in and initialed by the originator. Corrections made using correction fluid (white out) or any other method of correction are **unacceptable**.

NOTE: It is the sole responsibility of each respondent to assure all proposal copies are EXACT duplicates of the original proposal. USB Flash Drives will be utilized by the Evaluation Committee for the purpose of evaluation of proposals.

Any information contained in the original proposal which has not been transferred to the USB Flash Drive or photocopies will NOT be considered. The original document will be used **solely** for official record keeping purposes.

4.4 Potential Proposers shall not contact, by written or verbal communication, any District employee for information regarding this RFP other than as expressly permitted by this RFP.

Additions, deletions or modifications to information contained in the RFP document will be presented to all potential Proposers by means of a written addendum, if necessary.

No verbal or written information which is obtained other than by information in this document or by addendum to this RFP will be binding on the District. Any questions or requests for clarification regarding this RFP shall be submitted to Terrence Wright, Purchasing Services in writing via e-mail at wrightt@duvalschools.org. The deadline for such questions or requests will be 4:00 p.m., EDT on Friday, February 15th, **unless otherwise extended in writing by the District.** Questions or requests for clarification received after the deadline will NOT be addressed. Note that Proposers are requested to submit questions regarding this RFP for the District's clarification via issued Addenda, instead of Proposer's taking exceptions to any terms or conditions of this RFP within the submitted proposal.

4.5 Any proposal may be withdrawn prior to the date and time the proposals are due. Any proposal not withdrawn will constitute an irrevocable offer, for a period of one hundred twenty (120) days, to provide the District ample time to award the Contract for the services specified in the proposal and this RFP. Concurrent with the delivery of the Proposer's proposal, the Proposer shall also irrevocably deliver a completed and properly signed **Attachment A**. Upon completion of the award process and within three (3) business days of the School Board's completion of the award process at its duly called meeting the required insurance certificate must be delivered. (see Section 16.0 of this RFP).

5.0 FAMILIARITY WITH DISTRICT AND ADDITIONAL INFORMATION:

Proposers should become familiar with any local conditions which may, in any manner, affect the services required. The Proposers(s) is/are required to carefully examine the RFP terms and to become thoroughly familiar with any and all conditions and requirements that may in any manner affect the work to be performed under the Contract. No additional allowance will be made due to lack of knowledge of these conditions.

Submission of a proposal shall constitute acknowledgement by the Proposers that it is familiar with all conditions. The failure to familiarize itself with the sites shall in no way relieve him or her from any obligations with respect to the proposal.

6.0 TIME SCHEDULE:

The District will attempt to adhere to the following time schedule:
Friday, February 1, 2019, RFP Release
Friday, February 15, 2019, at 4:00 p.m. (EDT) Deadline for Questions
Thursday, February 28, 2019, at 2:00 p.m. (EDT) Proposal Opening
Thursday, March 7, 2019, Committee Evaluation
Tuesday, March 19, 2019, Presentations (if deemed necessary)
May, 2019 Board Award

Inquiries regarding the status of a proposal must not be made prior to the posting of award recommendation.

The District reserves the right to schedule Mandatory pre-proposal conference(s) as necessary to encourage competition and serve to advance the best interests of the District.

7.0 DISTRICT'S RIGHTS AND RESERVATIONS:

A. The District reserves the right to accept or reject any or all proposals.

B. The District reserves the right to waive any irregularities and technicalities and may at its sole discretion request clarification or other information to evaluate any or all proposals.

C. The District reserves the right, before awarding the Contract, to require Proposers(s) to submit additional evidence of qualifications or any other information the District may deem necessary.

D. The District reserves the right, prior to its Board approval, to cancel the RFP or portions thereof, without liability to any Proposers or the District.

E. The District reserves the right to: (1) accept the proposals of any or all of the items it deems, at its sole discretion, to be in the best interest of the District; and (2) the District reserves the right to reject any and/or all items proposed.

F. The District reserves the right to further negotiate any proposal, including price, with the highest rated Proposer. If an agreement cannot be reached with the highest rated Proposer, the District reserves the right to discontinue negotiations and to negotiate and recommend award to the next highest ranked Proposer or subsequent Proposer(s) until an agreement is reached.

G. The District reserves the right to require presentations/interviews with the highest ranked respondents. If presentations/interviews are deemed necessary, the District will notify the affected respondents by email not later than seven business days prior to their respective scheduled presentation/interview.

8.0 PROPOSAL FORMAT AND EVALUATION CRITERIA:

In order to maintain comparability and enhance the review process, it is required that proposals be organized in the manner specified below. Include all information in your proposal**. Proposers are encouraged to provide tab separations for each item. Proposals received which do not address ALL items and sub-items listed in this section may be considered nonresponsive.**

A. Form Of Proposal (Attachment A) Submit with all required information completed and all signatures as specified. No points are assigned to this required item.

B. EXPERIENCE AND REFERENCES: (30 points) Provide the following general information about your firm:

1. List a minimum of three (3) educational/institutional contracts providing similar services during the past five (5) years. Include names, titles, phone numbers and valid email addresses. Provide a brief outline of each contract with information regarding services performed and any other information deemed relevant.

   List any contracts which have been terminated early or upon renewal within the past five (5) years. Explain the reason for early termination or non-renewal and include contact

names, titles, phone numbers and email addresses.

2. Provide a brief description of all lawsuits that are pending and/or filed against the proposer over the last five (5) years and any disciplinary action taken against the proposer.

3. Provide information on any legal or regulatory violations, pending, current or previous investigations by any regulatory agencies the firm has been involved with in the last five (5) years.

C. ORGANIZATION AND KEY PERSONNEL: (10 points) Identify the management and office support team that will be responsible for providing the required services. Detailed resumes' are required for the primary account manager and other key personnel who will be assigned to the District account. General information is required for management/administrative personnel at the regional and corporate levels (if applicable). Indicate the specific individual who would serve as the day-to-day contact and be responsible for the operation of the overall program. Describe any potential conflicts of interest your firm may have in the management of this account.

Provide an organizational chart and a plan for the replacement of management staff.

D. FIRM'S CAPABILITIES AND APPROACH TO SERVICES: (30 points) Provide a narrative which profiles the background, experience, business philosophy and qualifications of the responding firm. Discuss the approach to be used in providing all of the services as described in Section 2.0. Include **1)** a description of your recruiting and hiring process; **2)** a detailed description of your training and support program; provide a menu of related training options; and demonstrate your knowledge, experience and capacity to train users at various levels; **3)** identification and description of your web-based automated scheduling and absence reporting; **4)** a description of your reports and reporting capabilities; **5)** describe your methodology to be used in assessing, procuring and implementing the infrastructure of the requested services, including the time required for each phase of the implementation beginning with the completion of the contract negotiations; and; **6)** the role of your management team in communicating/coordinating effectively with DCPS staff and others involved with this contract.

E. PROGRAM COST: (30 points) Complete and submit the Cost Proposal Form (**Attachment B**).

F. OEO COMPLIANCE STATEMENT (Attachment C): Submit with all signatures as specified. **This is a required submittal.** No points are assigned to this required item.

Interviews:

Interviews: Only those Proposers selected by the Committee to provide presentations/interviews will be eligible for points in this category, and the points awarded by the Committee will be in addition to points assigned in all other Evaluation Criteria. Once the Committee prepares a subtotal of the scores for the Evaluation Criteria in subsection 8.0 above, the Committee will determine if presentations/interviews are necessary with the top ranked firms. The Committee will decide, in its

sole and absolute discretion, the number of top ranked firms to interview. The Proposers selected for the interviews under this section shall be notified in writing, and shall be prepared to make its presentation to the Committee according to the schedule in section 6.0 above. The Committee will determine a uniform set of parameters and information to be presented by the Proposer's that are selected. The Committee will also determine the number of points to be established for this category.

9.0 PROPOSAL EVALUATION PROCESS:

Proposals are received and publicly opened. Only names of Proposers are read at this time.

An Evaluation Committee will convene, review and evaluate all proposals submitted based on the factors set forth in the RFP. The Proposer's complete response will be reviewed and evaluated by the Evaluation Committee.

The Evaluation Committee reserves the right to interview any or all Proposers and to require a formal presentation with the key people who will administer and be assigned to work on the contract before recommendation of award.

All proposals will be evaluated in accordance with the evaluation criteria specified in this document. Information derived by investigation and overall due diligence of District staff will be considered. Based on the proposals received, the District may elect to proceed based on any of the following options, but will not necessarily be limited only to these options: (1) Award to the best initial proposal without any further discussion or negotiation; (2) Negotiate with the highest ranked Proposer; or, (3) Allow the top ranked Proposers make oral presentations.

Proposers are advised to provide their respective best offer with the initial proposal because the District reserves the right to award a Contract based on initial proposals without further discussion or negotiation.

The proposal most advantageous to the District in its sole discretion will be selected. The District reserves the right to negotiate revisions to or removal of unacceptable clauses or restrictions incorporated within an otherwise acceptable proposal. In the event that a mutually acceptable contract between the District and the selected Proposers cannot be successfully negotiated and executed, then the District reserves the right to discontinue negotiations with such Proposers and to negotiate and execute a Contract with the next-ranked Proposers. Note section 4.4 above, where Proposers are requested to submit questions during the addendum process instead of taking exceptions within the proposal to the terms and conditions in this RFP.

The District reserves all rights, in its sole discretion, not to issue an award to any Proposers, to cancel this RFP at any time, to reissue this RFP for any reason, or a combination of any or all of the above. The District will not be liable to any Proposer for any costs incurred in connection with this RFP as a result of any of the above stated actions taken by the District.

A recommendation agenda item will be submitted to the Superintendent of Schools, Duval County, Florida. The Superintendent will then recommend to the School Board the award or rejection of any and/or all proposal(s). The School Board will then award or reject any or all proposal(s).

10.0 REPLACEMENT OF CONTACTOR STAFF:

Replacement personnel must have, at a minimum, credentials equivalent to the individuals whom they replace. Resumes of replacement management personnel may be required to be submitted to the District for review.

11.0 CANCELLATION OF AWARD/TERMINATION:

11.1 Cause:

In the event the Contractor, either willfully or unintentionally violates any of the provisions of the Contract, the Superintendent or designee shall give written notice stating the deficiencies.

The Contractor shall provide to the District its action plan within two (2) business days after the District's notification, and the Contractor shall have ten (10) business days after the District's initial notice to complete the cure set forth in its action plan.

11.2 Convenience:

The District, reserves the right to terminate any contract resulting from this RFP, at any time and for any reason, upon giving no less than sixty (60) calendar days prior written notice.

If said Contract should be terminated for convenience as provided herein, the District shall be relieved of all obligations under said Contract. Access to any and all work papers will be provided to the District after the termination of the Contract.

The parties understand and agree that the Contractor shall in no event have the reciprocal right to terminate the Contract; it being understood that the District's payments to the Contractor forms the consideration for the District's termination for convenience not being available to Contractor. In the event of the District's termination of the Contract, the District (in its sole election) may also require the Contractor to provide the transition assistance as set forth in Section 11.6 of this RFP.

11.3 Breach of contract resulting in termination of the Contractor for cause may result in the Contractor being debarred from future solicitations pursuant to School Board Policy 7.70.

11.4 FORCE MAJEURE: Whenever the Contractor's place of business, mode of delivery or source of supply has been disrupted by acts of government, God, civic commotion, or war, it shall be the responsibility of the Contractor to promptly send written notice to the District's Director of Purchasing Services, as to the extent of this disruption and its probable effect upon this Contract. If, in the opinion of the District, the disruption presented is commensurate with the conditions established herein, the District may elect to modify delivery/service timelines, renegotiate the Contract in whole or in part, or cancel all or any portion of the Contract. The Contractor will be given written notification of all decisions made. The decision of the District shall be final, and the District's objective will be a solution that is mutually beneficial.

11.5 Notwithstanding anything to the contrary herein, each payment obligation of the District created by the Contract is conditioned upon the availability of funds that are appropriated or allocated for the payment of services. If such funds are not allocated and available, the Contract may be terminated by the

District at the end of the period for which funds are available. The District shall notify the Contractor at the earliest possible time before such termination. No penalty shall accrue to the District in the event this provision is exercised, and the District shall not be obligated or liable for any future payments due or for any damages as a result of termination under this section.

11.6 In order to provide transition assistance to the District in the event that the Contract is terminated or expires, the Contractor agrees that the District may provide written notice to the Contractor retaining the Contractor for a mutually agreed upon period of time (at a minimum of one calendar month, plus five (5) additional calendar months on a month-by-month basis at the District's sole and unilateral election) on the same terms and conditions set forth in the Contract (the "Transition Assistance"). The provisions of this section will not apply if the Contract is terminated by the Contractor based on an uncured event of default by the District.

12.0 DEFAULT:

In the event that the Contractor breaches the Contract, the District reserves the right to seek any and all remedies in law and/or in equity.

13.0 LEGAL REQUIREMENTS:

13.1 It shall be the responsibility of the Contractor to be knowledgeable of and adhere to the requirements of any Federal, State, County and local laws and ordinances, rules and regulations that in any manner affect the items covered herein which may apply. Lack of knowledge by the Contractor shall in no way be a cause for relief from responsibility. Upon award, Contractor shall execute and deliver to the District, concurrent with its signature of the Agreement, the following, all of which shall be incorporated into the Agreement by this reference, and which are attached as composite **Exhibit 2: (a) Federal Regulatory Compliance Statement; (b) Certification Regarding Drug-Free Workplace Requirements; (c) Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion; and (d) Non-Collusion Affidavit.**

13.2 The District is committed to a policy of providing equal job opportunities on public contracts and prohibiting discrimination against any employee, applicant or Subcontractor. Accordingly, Contractor represents and warrants to the District that Contractor does not and will not engage in discriminatory practices and that there shall be no discrimination in connection with Contractor's performance under the Contract on account of a person's actual or perceived identity with regard to race, color, religion, gender or gender identity, age, marital status, disability, sexual orientation, political or religious beliefs, national or ethnic origin, veteran status, any other protected status under applicable law, or any other distinguishing physical or personality characteristics. Contractor further covenants that no otherwise qualified individual shall, solely by reason of his/her actual or perceived identity with regard to race, color, religion, gender or gender identity, age, marital status, disability, sexual orientation, political or religious beliefs, national or ethnic origin, veteran status, any other protected status under applicable law, or any other distinguishing physical or personality characteristics, be denied the benefits of, or be subjected to discrimination, or be denied access and services, under any provision of the Contract.

13.3 Respondents affirm by submitting their proposals that they are equal opportunity and affirmative action employers and shall comply with all applicable federal, state and local laws and regulations including, but not limited to: Executive Order 11246 as amended by 11375 and 12086; 12138; 11625; 11758;

12073; the Rehabilitation Act of 1973, as amended; the Vietnam Era Veterans Readjustment Assistance Act of 1975; Civil Rights Act of 1964; Equal Pay Act of 1963; Age Discrimination Act of 1967; Immigration Reform and Control Act of 1986; Public Law 95-507; the Americans with Disabilities Act; 41 CFR Part 60 and any additions or amendments thereto.

13.4 JESSICA LUNSFORD ACT**:**

The Contractor shall comply with and be responsible for all costs associated with the Jessica Lunsford Act, which became effective on September 1, 2005 (if applicable). The Act states that contractual personnel who are permitted access to school grounds when students are present or who have direct contact with students must meet Level 2 requirements as described in Sections 1012.32, 1012.465 and 1012.467 Florida Statutes and any other applicable Section(s).

In 2013, the Florida Legislature amended Section 1012.467 F.S. to create a requirement for a uniform, statewide identification badge to be worn at all times by non-instructional Contractors when on school grounds. The cost of the badge may not exceed ten dollars ($10.00) per badge, per employee. After the implementation of the initial badge, Contractors shall replace the badges concurrently with the re-fingerprinting of employees. The associated cost of the uniform, statewide badge shall be the responsibility of the Contractor. The Contractor shall report any arrest for a disqualifying offense within forty-eight (48) hours of the arrest. Failure of the Contractor / Contractor's employee to report an arrest for any disqualifying offense within 48 hours is a felony of the third degree punishable as provided in Section 775.082 or Section 775.083 F.S

13.5 Other Legal Requirements. All the personnel assigned by the Contractor and any subcontractor shall be authorized under state and local laws to perform such Services, whether by appropriate license, registration, certification or other authorization.

13.6 Representations and Warranties.

13.6.1 The Contractor warrants that it is a duly formed business entity duly organized and existing in good standing under the laws of the State of its formation and is entitled and shall remain licensed to carry on its business as required for its performance pursuant to the Contract in the State of Florida. The Contractor agrees that it will comply with all rules and regulations of governmental bodies governing its performance under this RFP and the resulting Contract whether or not such specified in the Contract and Exhibits. The Contractor further warrants that the execution and delivery of the Contract and the terms and conditions herein have been duly authorized by proper corporate and/or partnership action (as the case may be).

13.6.2 The Contractor shall comply with all applicable federal, State and local laws, ordinances, rules, and regulations pertaining to the performance of the Services and all matters pertaining to the Contract, as the same exist and as they may be amended from time to time.

13.6.3 Each Party agrees to continue performing its obligations under the Contract while any dispute is being resolved (except to the extent the issue in dispute precludes performance); provided, however, that any dispute over payment shall not be deemed to preclude performance

13.6.4 Each Party agrees that, in its respective dealings with the other Party under or in connection with the Contract, it shall act in good faith.

13.6.5 Neither Party shall use the name or marks of the other without its express written permission, which may be withdrawn at any time.

13.7 Miscellaneous. The Contract to be awarded pursuant to this RFP shall be further governed by the following:

13.7.1 This RFP and any Contract resulting therefrom shall be interpreted and enforced in accordance with the laws of Florida and it shall be binding upon and inure to the benefit of the parties hereto and their respective legal representatives, successors and assigns. Venue for any action arising out of the Contract shall lie exclusively in the jurisdictional courts in and for Duval County, Florida.

13.7.2 The Contract shall not be construed more strongly against any party regardless of who was more responsible for its preparation.

13.7.3 Except for the provisions requiring Contractor to pay the District's reasonable attorneys' fees and costs for any matter arising under Section 17 of the RFP (which shall control), in the event of any other conflict arising from the Contract, each party shall pay its own attorneys' fees and costs.

13.7.4 In the event any provision specified herein is held or determined by a court of competent jurisdiction to be illegal, void or in contravention of any applicable law, the remainder of the Contract shall remain in full force and effect.

13.7.5 Nothing herein shall be deemed that the District alters, limits, waives, or expands the provisions and limitations of section 768.28, Florida Statutes. Except as otherwise provided by Florida Law, neither the execution of the Contract by the District nor any other conduct, action or inaction of any District representative relating to the Contract is a waiver of sovereign immunity by the District.

13.7.6 The Contract may not be amended or supplemented in any way except in writing, dated and signed by authorized representatives of both parties.

13.7.7 The Article and Section headings and the table of contents used herein are for reference and convenience only and shall not enter into the interpretation hereof.

13.7.8 The Contractor is, and shall at all times be, an independent contractor under the Contract and not an agent of the District. Nothing in the Contract nor any actions taken by or arrangements entered into between the Parties in accordance with the provisions of the Contract shall be construed as or deemed to create as to the Parties any partnership or joint venture. Neither Party shall have any authority to bind or commit the other Party contractually or otherwise to any obligations whatsoever to third parties.

13.7.9 The Contract is entered into solely between, and may be enforced only by, the District and the Contractor, and the Contract shall not be deemed to create any rights in third parties, including suppliers and customers of a Party, or employees of either Party, or to create any obligations of a Party to any such third parties.

13.7.10 Except where expressly provided as being in the discretion of a Party, where agreement, approval, acceptance, consent, or similar action by either Party is required under the Contract, such action shall not be unreasonably delayed or withheld. An approval or consent given by a Party under the Contract

shall not relieve the other Party from responsibility for complying with the requirements of the Contract, nor shall it be construed as a waiver of any rights under the Contract, except as and to the extent otherwise expressly provided in such approval or consent.

13.7.11 The provisions in this RFP and all contract documents, which by their nature are intended to survive the expiration, cancellation or termination of the Contract, including, by way of example only, the Indemnification, Insurance, and Confidentiality provisions, shall survive the expiration, cancellation or termination of the Contract.

13.7.12 All media releases, public announcements, and public disclosures by either Party relating to the Contract or the subject matter of the Contract, including promotional or marketing material, shall be coordinated with and approved by the other Party prior to release. Contractor shall not host or stage events at District locations without receiving prior approval by the District contract administrator.

13.7.13 Time shall be of the essence as to all provisions of the Contract. If any date of significance hereunder falls upon a Saturday, Sunday, or legal holiday, such date shall be deemed moved forward to the next day which is not a Saturday, Sunday or legal holiday. Saturdays, Sundays and legal holidays shall not be considered business or working days.

13.7.14 Every notice, approval, consent or other communication authorized or required by the Contract awarded pursuant to this RFP shall not be effective unless same shall be in writing and sent via hand delivery or overnight delivery (with a receipt), directed to the other party at its address provided below, or directed to the Contractor as established promptly after the award of the Contract pursuant to this RFP. Either party may change the address by written notice to the other party from time to time in accordance herewith

<u>If to District</u>:	<u>With copy to</u>:

Attn: Superintendent	Phone: (904) 390-2111

Notwithstanding the foregoing, the parties agree that all communications relating to the day-to-day activities shall be exchanged between the respective representatives of the District and the Contractor. Once so designated, each party's representative shall coordinate communications and processes as needed for the purposes of conducting the services set forth in the Contract, as well as the process for routine or administrative communications. The parties shall also reasonably cooperate as to the development (including content and format) of the invoicing and any reports to be provided by Contractor as part of the services.

13.7.15 <u>Gratuities and Kickbacks.</u> Any employee or any official of the District, elective or appointive, who shall take, receive, or offer to take or receive, either directly or indirectly, any rebate, percentage of contract, money or other things of value, as an inducement or intended inducement, in the procurement of business, or the giving of business, for, or to, or from, any person, partnership, firm or corporation, offering, proposing for, or in the open market seeking to make sales to the District, shall be deemed guilty of a felony and upon conviction such persons shall be punished to the full extent of the law.

Every person, firm, or corporation offering to make, or pay, or give, any rebate, percentage of contract, money, or other things of value, as an inducement or intended inducement, in the procurement of business, or the giving of business, to any employee or official of the District, elective or appointive, in his efforts to proposal for, offer for sale, or to seek in the open market to make sales to the District, shall be deemed guilty of a felony and upon conviction such persons shall be punished to the full extent of the law.

It is the policy of the District to not accept gifts, gratuities, or favors of any kind or of any value whatsoever from vendors, members of the staff, or families. Contractor warrants that it has not employed or retained any company or person, other than a bona fide employee working solely for the Contractor, to solicit or secure the Contract, and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bona fide employee working solely for the Contractor, any fee, commission, percentage, gift, or any other consideration, contingent upon or resulting from the award or making of the Contract. Contractor further warrants that it, nor any of its directors, employees, officers or agents, nor any of Contractor's respective subsidiaries or affiliates, has taken, is currently taking or will take any action in furtherance of an offer, payment, promise, gifts or anything else of value, directly or indirectly, to anyone to improperly influence or otherwise secure any improper advantage in procuring business in relation to the Contract. For the breach or violation of these provisions, the District shall have the right to terminate the Contract without liability and/or, at its discretion, to deduct from the price, or otherwise recover, the full amount of such fee, commission, percentage, gift or consideration.

13.7.16 In the event of any conflict among the documents, the order of priority of the contract documents shall be as follows:

First, to any executed Contract resulting from the award of this RFP;
Second, Addenda (if any) released for this RFP, with the latest Addendum taking precedence;
Third, the RFP, and
Last, the awardee's Proposal.

13.7.17 The District shall issue payment in accordance with Sections 218.70. et sq. Florida Statutes, Local Government Prompt Payment Act, after receipt of an acceptable invoice, inspection and acceptance of goods and/or services provided in accordance with the terms and conditions of the agreement. Any Penalty for delay in payment shall be in accordance with applicable law. No payment shall be made for travel.

Each payment obligation of the District created by the agreement is conditioned upon the availability of funds that are appropriated or allocated for the payment of services or products. If such funds are not allocated and available, the agreement may be terminated by the District at the end of the period for which funds are available. The District shall notify the Contractor at the earliest possible time before such termination. No penalty shall accrue to the District in the event this provision is exercised, and the District shall not be obligated or liable for any future payments due or for any damages as a result of termination under this section.

14.0 <u>FEDERAL AND STATE TAX</u>:

Employment taxes: The Contractor shall comply with all matters relating to the timely payment of all

taxes (Federal, State and local) and payroll taxes, unemployment taxes or contributions or other Federal or State employment taxes. The Contractor shall indemnify, defend, and hold District harmless from any liability for any required tax responsibilities.

Tangible taxes: The District is exempt from Federal and State taxes for tangible personal property. The Contractor's doing business with the District shall not exempt Contractor from paying sales tax to its suppliers for materials to fulfill contractual obligations with the District, nor shall Contractor be authorized to use the District's Tax Exemption Number in securing such materials.

15.0 CONFLICT OF INTEREST:

15.1 Pursuant to the District's Policy, all proposers and Contractors are required to disclose the names of any of their officers, directors, agents, or employees who serve as agents or principals for the proposer or contractor in any capacity related to procurement of services under this RFP, and who within the last two (2) years, have been or are employees of the District. And all proposers and contractors are required to disclose the name of any District employee who owns, directly or indirectly, any interest in the Contractor's business. Such disclosures will be in accordance with current District policies, but will include, at a minimum, the name of the former District's employee, a list of the positions the employee held in the last two (2) years of his or her employment with the District, and the dates they held those positions. By its signature of the Agreement, the Contractor shall certify to the District that there are no names to disclose to the District pursuant to this section, unless Contractor provided the names when Contractor Submitted its response to the RFP.

15.2 Non-Collusion Statement / Public Domain

I, the Proposer, attests that I have not divulged, discussed, or compared this proposal with any other Proposers and have not colluded with any other Proposers in the preparation of this proposal in order to gain an unfair advantage in the award of this proposal.

All information contained herein is part of the public domain as defined in the Public Records Act, Chapter 119, Florida Statutes.

16.0 INSURANCE REQUIREMENTS:

A. Without limiting any of the other obligations or liabilities of the vendor/contractor, the vendor/contractor shall, at its sole expense, procure, maintain and keep in force the amounts and types of insurance conforming to the minimum requirements set forth herein. Except as may be otherwise expressly specified in this Exhibit, the insurance shall commence at or prior to the execution of this Agreement by the District and shall be maintained in force throughout the term of this Agreement.

1. **Workers' Compensation/Employers Liability**: The Workers' Compensation and Employers' Liability insurance provided by the vendor/contractor shall conform to the requirements set forth herein.

a. The vendor/contractor insurance, or self-insurance, shall cover the vendor/contractor (and to the extent its Subcontractors and Sub-subcontractors are not otherwise insured, its Subcontractors and Sub-subcontractors) for those sources of liability which would be covered by the

latest edition of the standard Workers' Compensation policy, as filed for use in the State of Florida by the National Council on Compensation Insurance (NCCI), without any restrictive endorsements other than the Florida Employers Liability Coverage Endorsement (NCCI Form WC 09 03), those which are required by the State of Florida, or any restrictive NCCI endorsements which, under an NCCI filing, must be attached to the policy (i.e., mandatory endorsements). In addition to coverage for the Florida Workers' Compensation Act, where appropriate, coverage shall be included for the Federal Employers' Liability Act and any other applicable federal or state law.

b. The policy must be endorsed to waive, or for self-insurance the Contractor hereby agrees to waive, the insurer's right to subrogate against the District, and its members, officials, officers and employees in the manner which would result from the attachment of the NCCI Waiver of Our Right to Recover from Others Endorsement (Advisory Form WC 00 03 13) with the District, and its members, officials, officers and employees scheduled thereon.

c. Subject to the restrictions of coverage found in the standard Workers' Compensation policy, there shall be no maximum limit on the amount of coverage for liability imposed by the Florida Workers' Compensation Act or any other coverage customarily insured under Part One of the standard Workers' Compensation policy. The minimum amount of coverage for those coverage's customarily insured under Part Two of the standard Workers' Compensation policy (inclusive of any amounts provided by an umbrella or excess policy) shall not be less than:

$1,000,000	Each Accident
$1,000,000	Disease - Each Employee
$1,000,000	Disease - Policy Limit

d. The vendor/contractor may be relived of providing Workers' Compensation coverage provided an exemption form is submitted from the State of Florida Division of Workers Compensation stating the vendor/contractor is exempt from the insurance requirement under F.S. 440.

2. **Commercial General Liability**. The Commercial General Liability insurance provided by the vendor/contractor shall conform to the requirements hereinafter set forth:

a. The vendor/contractor's insurance shall cover those sources of liability which would be covered by the latest occurrence form edition of the standard Commercial General Liability Coverage Form (ISO Form CG 00 01) as filed for use in the State of Florida by the Insurance Services Office (ISO) without any restrictive endorsements other than those which are required by the State of Florida, or those which, under an ISO filing, must be attached to the policy (i.e., mandatory endorsements) and those

described below which would apply to the Services contemplated under this Agreement.

1) The coverage **may not** include restrictive endorsements which exclude coverage for liability arising out of: Sexual molestation, Sexual abuse or Sexual misconduct.
2) The coverage may include restrictive endorsements which exclude coverage for liability arising out of: Mold, fungus, or bacteria Terrorism Silica, asbestos or lead.

b. The minimum limits to be maintained by the vendor/contractor (inclusive of any amounts provided by an umbrella or excess policy) shall not be less than:

$1,000,000	General Aggregate
$1,000,000	Products/Completed Operations Aggregate
$1,000,000	Personal and Advertising Injury
$1,000,000	Each Occurrence

c. The vendor/contractor shall include the School Board of Duval County, Florida, and its members, officials, officers and employees as "additional insured's" on the Commercial General Liability coverage. The coverage afforded such additional insured's shall be no more restrictive than that which would be afforded by adding the School Board of Duval County, Florida, and its members, officials, officers and employees as additional insured's on the latest edition of the Additional Insured – Owner's, Lessees or Contractors - Scheduled Person or Organization endorsement (ISO Form CG 20 10) filed for use in the State of Florida by the Insurance Services Office.

d. The vendor/contractor shall pay on behalf of the School Board of Duval County, Florida, or its member, official, officer or employee any such deductible or self-insured retention applicable to a claim against the School Board of Duval County, Florida, or its member, official, officer or employee for which the School Board of Duval County, Florida or its member, official, officer or employee is insured as an additional insured.

3. **Business Auto Liability.** The automobile liability insurance provided by the vendor/contractor shall conform to the requirements hereinafter set forth:

a. The vendor/contractor's insurance shall cover the vendor/contractor for those sources of liability which would be covered by Section II of the latest occurrence edition of the standard Business Auto Coverage Form (ISO Form CA 00 01) as filed for use in the State of Florida by ISO without any restrictive endorsements other than those which are required by the State of Florida, or those which, under an ISO filing, must be attached to the policy (i.e., mandatory endorsements). Coverage shall include all owned, non-owned and hired autos used in connection with this Agreement.

b. The School Board of Duval County, Florida, and its members, officials, officers and employees shall be included as "additional insured's" in a manner no more restrictive than that which would be afforded by designating the School Board of Duval County, Florida, and its members, officials, officers and employees as additional insured's on the latest edition of the ISO Designated Insured (ISO Form CA 20 48) endorsement.

c. The minimum limits to be maintained by the vendor/contractor (inclusive of any amounts provided by an umbrella or excess policy) shall not be less than:

$1,000,000 Each Occurrence - Bodily Injury and Property Damage Combined

B. **EVIDENCE OF INSURANCE.** Except as may be otherwise expressly specified in this Exhibit, the insurance shall commence at or prior to the execution of this Agreement by the District and shall be maintained in force throughout the term of this Agreement. The vendor/contractor shall provide evidence of such insurance in the following manner:

1. As evidence of compliance with the required Workers' Compensation and Employer's Liability, Commercial General Liability, Business Auto Liability, and Professional Liability, the vendor/contractor shall furnish the District with a fully completed satisfactory Certificate of Insurance such as a standard ACORD Certificate of Liability Insurance (ACORD Form 25) or other evidence satisfactory to the District, signed by an authorized representative of the insurer(s) providing the coverage. The Certificate of Insurance, or other evidence, shall verify that Workers' Compensation/Employer's Liability contains a waiver of subrogation in favor of the School Board of Duval County, Florida, identify this Agreement, and provide that the underwriter shall endeavor that the District shall be given no less than thirty (30) days' written notice prior to cancellation.

2. As evidence of the required Additional Insured status for the District on the Commercial General Liability insurance, the vendor/contractor shall furnish the District with:

   a. A fully completed satisfactory Certificate of Insurance, and a copy of the actual additional insured endorsement as issued on the policy, signed by an authorized representative of the insurer(s) verifying inclusion of the School Board of Duval County, Florida and its members, officials, officers and employees as Additional Insured's in the Commercial General Liability coverage.

   b. An original copy of the policy (or policies) upon reasonable request by the District.

3. Until such time as the insurance is no longer required to be maintained by the vendor/contractor as set forth in this Agreement, the vendor/contractor shall provide

the District with renewal or replacement evidence of the insurance in the manner heretofore described no less than thirty (30) days before the expiration or termination of the insurance for which previous evidence of insurance has been provided.

4. Notwithstanding the prior submission of a Certificate of Insurance, copy of endorsement, or other evidence initially acceptable to the District, if requested by District, the vendor/contractor shall, within thirty (30) days after receipt of a written request from the District, provide the District with a certified copy or certified copies of the policy or policies providing the coverage required by this Section. The vendor/contractor may redact or omit those provisions of the policy or policies which are not relevant to the insurance required under this Agreement.

C. **INSURERS QUALIFICATIONS/REQUIREMENTS:**

1. Insurers providing the insurance required by this Agreement for the vendor/contractor must either be:

   a. Authorized by a subsisting certificate of authority issued by the State of Florida to transact insurance in the State of Florida, or

   b. An eligible surplus lines insurer under Florida Statutes. (Except with respect to coverage for the liability imposed by the Florida Workers' Compensation Act).

2. In addition, each such insurer shall have and maintain throughout the period for which coverage is required, a Best's Rating of "A-" or better and a Financial Size Category of "VII" or better according to A. M. Best Company.

3. If, during the period when an insurer is providing the insurance required by this Agreement, an insurer shall fail to comply with the foregoing minimum requirements, as soon as the vendor/contractor has knowledge of any such failure; the vendor/contractor shall immediately notify the District and immediately replace the insurance provided by the insurer with an insurer meeting these requirements. Until the vendor/contractor has replaced the unacceptable insurer with an insurer acceptable to the District, the vendor/contractor shall be in default of this Agreement.

4. **Primary and Non-Contributory**. The insurance provided by the vendor/contractor pursuant to this Agreement shall apply on a primary basis to, and shall not require contribution from, any other insurance or self-insurance maintained by the School Board of Duval County, Florida, and its member, official, officer or employee.

5. **Additional Remedy**. Compliance with the insurance requirements of this Agreement shall not limit the liability of the, vendor/contractor or its Subcontractors or Sub-subcontractors, employees or agents to the District or others. Any remedy provided to the School Board of Duval County, Florida, or its members, officials, officers or employees by the insurance shall be in addition to and not in lieu of any

other remedy available under this Agreement or otherwise.

D. **District Approval**: Neither approval by the District nor failure to disapprove the insurance furnished by the vendor/contractor shall relieve the vendor/contractor of the vendor/contractor's full responsibility to provide the insurance as required by this agreement.

17.0 INDEMNIFICATION / HOLD HARMLESS AGREEMENT:

17.1 The Contractor shall, in addition to any other obligation to indemnify the School Board of Duval County, Florida, and to the fullest extent permitted by law, protect, defend, indemnify and hold harmless the District, its agents, officers, elected officials, employees and volunteers from and against all claims, actions, liabilities, losses (including economic losses), and costs arising out of any actual or alleged bodily injury, sickness, disease or death, or injury to or destruction of tangible property including the loss of use resulting from, or any other damage or loss arising out of, or claimed to have resulted in whole or in part from any actual or alleged act or omission of the Contractor, subcontractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable in the performance of the work; or violation of law, statute, ordinance, governmental administration order, rule or regulation by the Contractor in the performance of the work; or liens, claims or actions made by the Contractor or any subcontractor or other party performing the work.

17.2 Contractor represents that it has all intellectual property rights necessary to enter into and perform its obligations in the Agreement. Contractor will indemnify and hold harmless the District from liability of any nature or kind, including costs and expenses for or on account of any copyrighted, service marked, trademarked, patented or unpatented invention, process, article or work manufactured or used in the performance of the Agreement, including its use by the District. If contractor uses any design, device, materials or works covered by letters, service mark, trademark, patent, copyright or any other intellectual property right, it is mutually agreed and understood without exception that the proposal prices will include all royalties or costs arising from the use of such design, device or materials in any way involved in the work. Contractor shall defend, indemnify and hold the District and its successors and assigns harmless from and against all third-party claims, suits and proceedings and any and all damages, liabilities, costs and expenses (including reasonable attorneys' fees and court costs) incurred as a result of (i) infringement by Contractor of any third-party patent, copyright or trademark of (ii) misappropriation by Contractor of any third-party trade secret in connection with any of the foregoing.

17.3 The indemnification obligations hereunder shall not be limited to any extent on the amount, type of damages, compensation or benefits payable by or for the Contractor or any subcontractor under workers' compensation acts, disability benefit acts, other employee benefit acts or any statutory bar.

17.4 Except as may otherwise be expressly set forth herein, each party shall be responsible to pay its own attorney's fees (including paralegal and any other fees) and all costs arising from disputes under the contract.

17.5 The Contractor recognizes the broad nature of this indemnification and hold harmless article, and voluntarily makes this covenant and expressly acknowledges the receipt of TEN DOLLARS ($10.00) payable upon receipt of first invoice and other good and valuable consideration provided by the District in support of this indemnification in accordance with the laws of the State of Florida.

17.6 This article will survive the termination of the Contract.

18.0 PUBLIC RECORDS LAW:

Pursuant to Florida Statutes Chapter 119, responses received as a result of this RFP shall not become public record until thirty (30) days after the date of opening or until posting of a recommendation for award, whichever occurs first. Thereafter, all documents or other materials submitted by all Respondents in response to this offering shall be open for inspection by any person and in accordance with Chapter 119, Florida Statutes, unless otherwise exempt under Florida law.

It shall be the sole responsibility of the awarded Contractor to comply with all requirements of Chapter 119 regarding public records (whether documents, notes, letters, emails, or other records) received or generated in relationship to the Agreement awarded by the District.

The Agreement shall be subject to Florida's Public Records Laws, Chapter 119, Florida Statutes. Contractor understands the broad nature of these laws and agrees to comply with Florida's public records laws and laws relating to records retention. In compliance with section 119.0701, Florida Statutes, Contractor agrees to:

A. Keep and maintain public records required by the District in order to perform the service.

B. Upon request from the District's custodian of public records, provide the District with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in the Chapter 119, Florida Statues or as otherwise provided by law.

C. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Agreement term and following completion of the Agreement if the Contractor does not transfer the records to the District.

D. Upon completion of the Agreement, transfer, at no cost, to the District all public records in possession of Contractor or keep and maintain public records required by the District to perform the service. If Contractor transfers all public records to the District upon completion of the Agreement, Contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If Contractor keeps and maintains public records upon completion of the Agreement, Contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the District, upon request of the District's custodian of public records, in a format that is compatible with the information technology systems of the District.

IF CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THE AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS (THE DISTRICT'S CONTRACT

ADMINISTRATOR) AT THE ADDRESS AND PHONE NUMBER TO BE PROVIDED PURSUANT TO SECTION 13.7.14 ABOVE.

To the extent a proposer asserts any portion of its proposal is exempt or confidential from disclosure under Florida's public records, the burden shall be on the proposer to obtain a protective order from a jurisdictional court protecting such information from disclosure under Florida's public records laws and also timely provide a certified copy of such protective order to the District prior to the District's release of such information into the public domain. It is not contemplated that any portion of a Proposal will be exempt or confidential from disclosure pursuant to Chapter 119, Florida Statutes.

19.0 PERMITS AND LICENSES:

The Contractor shall be responsible for obtaining any necessary permits and licenses and shall comply with laws, rules, and regulations whether State or Federal and with all local codes and ordinances without additional cost to the District. Some examples may include –but are not limited to: Florida incorporation requirements; business licensing at the State level as well as the City of Jacksonville (Duval County); EPA hazardous material management certification requirements for facilities; vehicle registration and licensing.

20.0 PUBLIC ENTITY CRIMES:

20.1 A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid/proposal on a contract to provide any goods or services to a public entity, may not submit a bid/proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids/Proposals on leases of real property to a public entity, may not be awarded or perform work as a Contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statutes, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

20.2 The Proposer certifies by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency. The Contractor will execute and deliver to the District the appropriate federal debarment certification form within three (3) business days of the award of the Contract.

21.0 ASSIGNMENT OF CONTRACT AND/OR PAYMENT:

21.1 The Contract or agreement is personal to the parties herein and may not be assigned, in whole, or by merger or reorganization by the Contractor without prior written consent of the District in its sole discretion which shall not be unreasonably withheld. The Contractor agrees and represents that all of the Services required hereunder shall be performed by the Contractor as identified in the Proposal, or its subsidiaries, affiliates, or designees.

Notwithstanding the above, should the Contractor desire to delete, add, or amend any subcontractors or engage additional companies as subcontractors then the Contractor shall ensure that each subcontractor complies with all provisions of the agreement, and notwithstanding anything to the contrary, the Contractor shall remain liable for the acts and omission of such subcontractor(s)

and the proper performance and delivery of the Services.

21.2 The Contractor herein shall not assign payments under the Contract or agreement without the prior written consent of the District.

22.0 AGREEMENT:

A contract, which shall include the terms and conditions set forth in this RFP, may be released, after award, for any work to be performed as a result of this RFP. This document, the proposal, negotiated terms, agreement if applicable, and any other relevant documents will constitute the complete agreement between the Contractor and the District.

23.0 DISPUTE:

A. Any Proposer who is aggrieved in connection with the solicitation or award of a contract may file a protest and shall deliver its written notice of protest to the Chief Officer, Operations Support (formerly known as Associate Superintendent of Business Services), or designee (hereinafter "Hearing Officer") immediately, but no later than two (2) working days after RFP opening or after recommendation of award [or as set forth in paragraph 9 infra, which will initiate the 48-hour notice requirement.

The written protest with documentation shall be delivered to the Hearing Officer no later than 2 p.m. (EDT) on the fourth (4th) calendar day immediately following the RFP opening or receipt of notice of intent to award recommendation as is appropriate.

If that day is a School Board non-workday, the protest shall be delivered no later than 9 a.m. (EDT) on the next District work day. Protests shall be presented with specificity, and every issue shall be fully documented.

B. The legal basis for any relief sought must be clearly identified and explained in the written notice of protest.

C. The Hearing Officer shall call a meeting and hear all protests and receive all evidence within a reasonable time. This does not preclude the Hearing Officer from calling a special meeting or granting a continuance under extraordinary circumstances.

D. All Proposers shall receive notice of any protest hearing and a copy of the protest document. Attachments shall be available upon request.

E. The Florida Rules of Civil Procedure may be relaxed at the sole discretion of the Hearing Officer presiding at any protest hearing.

F. The Hearing Officer shall issue his/her decision on or before five (5) working days of the completion of the protest hearing.

G. The Hearing Officer's decision shall result in a final order which may include findings and conclusions. The decision of the Hearing Officer shall be final.

H. The District does not encourage the use of faxes to accomplish delivery of the notice of protest and the protest itself. Any Proposers utilizing delivery by fax shall assume the risk associated with incomplete delivery or non-receipt.

I. Any protest specification objection shall be generally treated as set forth in paragraph 1 supra. The operative date for the notice requirement shall be the date the specifications were obtained by the proposer but no later than 10 days prior to the date of bid opening or proposal due date.

24.0 DISCLAIMER:

Except as expressly set forth in this RFP, all figures presented herein (i.e. square footage, times, rates, and quantities) are for evaluative purposes only and are not deemed to be a direction to Proposers, nor a representation/warranty by the District.

25.0 OFFICE OF ECONOMIC OPPORTUNITY (OEO) ENCOURAGEMENT:

The District encourages a maximum participation of SBEs and M/WBEs in its contract awards, based upon availability. The District ensures that private companies doing business with the District are not discriminated against in the award of contracts for construction projects, procurement of goods and services, and professional services on the basis of race, color, sex or national origin.

The awarded Contractor shall submit to the Office of Economic Opportunity a *Quarterly OEO Utilization Report* stating the quarterly activity with certified SBEs and MBEs*.* The report shall include the name of the company(s), the product(s) or service(s) purchased and the amount. If there is no activity to report for the quarter, the Company shall submit a Good Faith Efforts Statement.

ATTACHMENT B

Cost of Services

Current Substitute Teacher Pay Rate			
Education Level / Setting	**Pay Rate Per Day**	**% Mark-Up**	**Extended Pay Rate**
Less than bachelor's degree (60 college credit hours from an accredited college/university recognized by the U. S. Department of Education).	$66.50		
Bachelor's Degree or higher	$84.00		
Hard to Staff - Long-Term Supplement (Employee will receive a one-time increase of $26.00 per day after 20 days in the same critical shortage assignment as defined by DCPS. *No employee shall receive more than one daily supplement to their regular daily pay rate.)	$26.00		
Long-Term Supplement (Employee will receive a one-time increase of $1.00 per hour after 36 whole-day assignments. *No employee shall receive more than one daily supplement to their regular daily pay rate.)	$7.00		

Paraprofessional Hourly Pay Rates			
Education Level / Setting	**Pay Rate Per Hour**	**% Mark-Up**	**Extended Pay Rate**
Less Than BA/BS Degree (60 college credit hours from an accredited college/university recognized by the U. S. Department of Education).	$9.50		
BA/BS Degree or Higher	$11.45		

Extended Pay Rate is the Pay Rate Per Day times the % Mark Up.

***The district in its sole determination shall identify which schools and content areas, if any, are considered Hard to Staff.**

Please submit a separate, itemized list of any other fees that will be charged during implementation and administration of contract.

Please include the frequency in which these fees will be charged.

ATTACHMENT C

OFFICE OF ECONOMIC OPPORTUNITY PROPOSED SCHEDULE OF PARTICIPATION

NOTICE OF NONDISCRIMINATION

The Duval County Public Schools (DCPS) encourages a maximum participation of Small and Minority/Women Business Enterprises in its contract awards, based upon availability. The Board ensures that Duval County Public Schools and private companies doing business with the DCPS do not discriminate in the awarding of DCPS contracts for construction, procurement of goods and services and professional services on the basis of race, color, sex, or national origin.

SMALL BUSINESS ENTERPRISE PROGRAM AND THE MINORITY/WOMEN BUSINESS PROGRAM

It is the policy of the Duval County Public Schools, as defined in subchapter 7.72 of the Duval County School Board policy, to ensure the equitable participation of Small Business Enterprises (SBEs) and Minority/Women Business Enterprises (M/WBEs), in providing services to the Board under this contract.

This contract will be administered under the **ENCOURAGEMENT METHOD**; in this regard, the proposer shall take all necessary and reasonable steps to ensure that certified SBEs and M/WBEs have an equitable opportunity to compete and perform on this contract. Only firms certified by DCPS's Office of Economic Opportunity (OEO) may be counted towards the proposer's goal achievement. For a listing of certified SBEs and M/WBEs, proposers may contact:

- Duval County Public Schools, Office of Economic Opportunity at (904) 858-4860 or visit www.duvalschools.org/oeo

Please be advised that the awarded contractor will be responsible for submitting a quarterly OEO utilization report or a quarterly "Good Faith Efforts" statement to the Office of Economic Opportunity.

I declare that I have read the forgoing conditions, and instructions as revealed in the OEO requirements, and will comply herein.

FEDERAL REGULATORY COMPLIANCE STATEMENT

The purpose of this document is to assure compliance by the Contractor (*defined as any individual or company who agrees to provide materials or services at a specified price*) to those certain clauses, provisions and requirements as described by applicable Federal Regulations, which apply to any resulting agreement between The School Board of Duval County, Florida (the "District") and the Contractor. By signature, the individual executing this statement attests that he/she possesses authority to obligate the contracting firm and agrees to comply with all clauses, provisions and requirements as described below throughout the term of the agreement.

---

1. The Contractor agrees to allow reasonable access by the District, the Federal granting agency, the Comptroller General of the United States or any of their duly authorized representatives to the Contractor's books, documents, papers and records which are directly pertinent to the contract for the purpose of making audit, examination, excerpts and transcriptions.
2. The Contractor agrees to maintain all records related to this agreement for a period of three years after the final payment for the agreement and after all other matters are closed.
3. The Contractor affirms that it is equal opportunity and affirmative action employer and shall comply with all applicable federal, state and local laws and regulations including, but not limited to: Executive Order 11246 as amended by 11375 and 12086; 12138; 11625; 11758; 12073; the Rehabilitation Act of 1973, as amended; the Vietnam Era Veterans Readjustment Assistance Act of 1975; Civil Rights Act of 1964; Equal Pay Act of 1963; Age Discrimination Act of 1967; Immigration Reform and Control Act of 1986; Public Law 95-507; the Americans with Disabilities Act; 41 CFR Part 60 and any additions or amendments thereto.
4. The Contractor agrees to a provision for non-appropriations, whereby the contract will terminate if sufficient funds are not appropriated in any given fiscal year to allow the District to sustain the cost (if applicable).
5. The Contractor agrees to properly complete and submit to the District a federal debarment certification form for each renewal year of the Contract, if renewals apply.
6. The Contractor agrees to properly complete and submit to the District a non-collusion affidavit
7. The Contractor agrees to properly complete and submit to the District a federal drug free workplace certification form.
8. The Contractor agrees the District may terminate the contract at any time for any reason. If terminated for cause, the Contractor agrees the District may seek remedies for damages, if applicable.
9. The Contractor agrees to comply with all applicable environmental standards, orders or requirements.

DRUG FREE WORKPLACE CERTIFICATION

I hereby swear or affirm that this company has established a drug-free workplace program by completing the following requirements:

1) Published a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2) Informed employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation and employee assistance programs and the penalties that may be imposed upon employees for drug abuse violations.

3) Given each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).

4) In the statement specified in subsection (1), notified the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction

5) Imposed a sanction on, or required the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.

6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

As the person authorized to sign the statement, I certify that this firm complies fully with the above requirements. I understand that false certification of a drug-free workplace is a violation of Florida Statutes 287.087.

CERTIFICATION REGARDING DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 13 CFR Part 145.

1. The Contractor (or subcontractor) certifies to the best of its knowledge and belief that it and its principals:

   A. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any Federal Department or Agency from doing business with the Federal Government.

   B. Have not within a three-year period preceding this contract have been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property.

   C. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph 1.B. above of this certification.

   D. Have not within a three-year period preceding this contract had one or more public transactions (Federal, State or local) terminated for cause or default.

2. Where the Contractor is unable to certify to any of the statements above in this certification, such Contractor shall attach an explanation to this Certification.

INSTRUCTIONS FOR COMPLETION OF NON-COLLUSION AFFIDAVIT

1. This Non-Collusion Affidavit is material to any contract awarded utilizing federal funds.

2. This Non-Collusion Affidavit shall be executed by the member, officer, or employee of the offering firm who makes the final decision on prices and the amount(s) quoted in the proposal.

3. Proposal rigging and other efforts to restrain competition and the making of false sworn statements in connection with the submission of offers are unlawful and may be subject to criminal prosecution. The person who signs the Affidavit shall examine it carefully before signing and assure himself or herself that each statement is true and accurate, making diligent inquiry, as necessary, of all other persons employed by or associated with the respondent with responsibilities for the preparation, approval or submission of the offer.

4. In the case of an offer submitted by a joint venture, each party to the venture must be identified in the proposal documents, and an Affidavit must be submitted separately on behalf of each party.

5. The term “complementary offer” as used in the Affidavit has the meaning commonly associated with that term in the solicitation process, and includes the knowing submission of offers higher than the offer of another firm, an intentionally high or noncompetitive offer, and any other form of an offer submitted for the purpose of giving a false appearance of competition.

6. Failure to file a completed Affidavit in compliance with these instructions will result in disqualification of the offer.

COMPOSITE FEDERAL FORMS

NON-COLLUSION AFFIDAVIT

State of FLORIDA

County of DUVAL

I state that I am the _____ of _____ , a _____ , and I am authorized to execute this affidavit on behalf of my firm, its owners, directors, and officers. I am the person responsible in my firm for the price(s), guarantees and the total financial commitment represented in the firm's offer.

I hereby attest that:

(1) The price(s) and amount(s) in the offer have been arrived at independently and without consultation, communication or agreement with any other contractor, respondent, or potential respondent.

(2) Neither the price(s) nor the amount(s) of the offer, and neither the approximate price(s) nor approximate amount(s) of the offer, have been disclosed to any other firm or person who is a respondent or potential respondent, nor were they disclosed prior to opening of offers.

(3) The offer from my firm is made in good faith and no attempt has been made to induce any firm or person to refrain from submitting an offer, or to submit an offer higher than our offer, or to submit any intentionally high or noncompetitive offer or other form of complementary offer.

(4) _____, its affiliates, subsidiaries, officers, directors, employees are not currently under investigation by any governmental agency and have not in the last three years been convicted or found liable for any act prohibited by State or Federal law in any jurisdiction, involving conspiracy or collusion with respect to bidding, proposing or offering on any public contract, except as follows:

_____

_____

_____

I attest that _____, understands and acknowledges that the above representations are material and important, and will be relied on by The School Board of Duval County, Florida, in awarding the contract for which this offer is submitted. I understand and my firm understands that any misstatement in this affidavit is and shall be treated as fraudulent concealment from The School Board of Duval County, Florida, of the true facts relating to submission of offers for this contract.

Bradenton, Florida 34205
Direct Line (941) 708-8770 FAX Line (941) 708-8485

PARTICIPATING AGREEMENT, SDMC No 21-0046-RG

This Participating Agreement is made and entered into as of the last date signed below by and between The School District of Manatee County (District) and [ESS Southeast, LLC](Contractor).

1. AUTHORITY

1.1. The District is authorized by rule 6A-1.012 Florida Administrative Code "to purchase under the current contracts as may be established for any of the public agencies as set forth above at or below the unit price stated therein, if such purchase is to the economic advantage of the district school board, subject to conformance of the items of purchase to the standards and specifications prescribed by the superintendent for said district."

1.2. [The School Board of Du] competitively procured and awarded [RFP 01-19/TW] and is hereto as Exhibit A, ("Solicitation"). A contract was executed [June 4, 2019] between the parties and is hereto as Exhibit A, ("Authorized Contract").

1.3. Therefore, the District would enter into a Participating Agreement with Contractor.

2. PURPOSE AND SCOPE

2.1. The purpose of the Participating Agreement is to [obtain Substitute Teaching Employmen] pursuant to the terms and conditions of the Authorized Contract as modified and supplemented herein.

3. TERM AND RENEWAL

3.1. Term: This Participating Agreement shall become effective on [7/1/2020] or the date on which the agreement has been signed by both parties, whichever is later and shall have a term that is coterminous with the Authorized Contract, unless terminated earlier by [The School Board of Duval County].

3.2. Renewal: Upon agreement of the parties, this Participating Agreement may be renewed for a term that does not exceed the initial or renewal term of the Authorized Contract. Renewal must be in writing and is subject to the same terms and conditions set forth in the Authorized Contract, and any amendments, and this Participating Agreement, and any amendments.

4. AUTHORIZED CONTRACT TERMS AND EXHIBITS INCORPORATED INTO THE AGREEMENT

4.1. The attached Exhibit A (Solicitation) is hereby incorporated into the Participating Agreement.

5. TERMS SUPPLEMENTAL TO THE AUTHORIZED CONTRACT

5.1. COMPLIANCE WITH JESSICA LUNSFORD ACT: The School District of Manatee County and State of Florida, requires all contractors/subcontracts to comply with the Jessica Lunsford Act (JLA) which consists of a level II background screening via fingerprinting. Vendors, individuals or entities under contract with the School Board

of Manatee County required to go on school grounds when students are present, must comply with the requirements of the law and agree to indemnify and hold harmless the School Board of Manatee County for any claims made against the School Board related to the failure to comply with Florida Statute Section 1012.465 and Section 1012.32 Florida Statutes. Information on JLA requirements and how to comply can be accessed at: www.manateeschools.net.

The contractor information sheet, addendum A, must be completed and returned with the signed contract where the contractor is performing services on any District property.

5.2. ASSIGNMENT: Neither party may assign any of its rights or obligations hereunder, whether by operation of law or otherwise, without the prior written consent of the other party (not to be unreasonably withheld.) If this matter pertains to a school that becomes a Charter School, this contract may be cancelled by The School Board of Manatee County upon thirty days written notice and The School Board of Manatee County will be released of any and all obligations under this contract.

5.3. THIRD PARTY BENEFICIARIES: This agreement constitutes the entire agreement between the parties and supersedes any and all prior agreements, proposals or representations, written or oral, concerning its subject matter. No modification, amendment or waiver of any provision of this agreement will be effective unless in writing and signed by both parties.

5.4. GOVERNING LAW: This agreement will be governed by the internal laws of the State of Florida, without regard to its conflicts of laws rules. Each party agrees to comply with all applicable laws in the performance of this agreement. All disputes are to be resolved in Manatee County, Florida by binding Arbitration before the American Arbitration Association or other mutually agreed and similar forum. The costs of such dispute will be borne by the individual party.

5.5. RELATIONSHIP OF PARTIES: The parties are independent contractors. This agreement does not create a partnership, franchise, joint venture, agency or employment relationship between the parties. It is expressly acknowledged that the School Board of Manatee County does not direct or control the work or services to be performed, or how to perform such work or services under this agreement.

5.6. INVOICE REQUIREMENTS: The selected Proposer shall submit an invoice to the District, each month, after the services have been performed and have been received and accepted by the District. The amount charged shall not be in excess of the rates and fees in the Agreement.

The date of the invoices shall not exceed ten (10) working days from the performance of the work. Under no circumstances shall the invoice be submitted to the District in advance of the performance of the work.

The invoice shall contain the following basic information: the awarded Bidder's name and address, invoice number, date of invoice, description of the service performed, the contract number, purchase order number, and any discounts. The invoice shall be in detail sufficient for a proper pre-audit and post audit thereof. Each bill or invoice must properly identify the services, portion of services, and expenses for which compensation is sought.

5.7. INDEMNIFICATION: To the extent permitted by law, the Contractor agrees to defend indemnify and hold harmless The School Board of Manatee County, their agents, employees, officers and Board Members against any and all third-party claims, loses, damages, expenses, or liabilities arising from any action or failure to act with respect to this agreement. When pertaining to a services contract, the contracting party with the Manatee County School Board, will obtain at its own cost and expense general liability insurance with minimum coverage amounts of at least one million dollars per occurrence and three million dollars in excess coverage and such insurance will name The School Board of Manatee County, their Board Members and School District Employees as an additional insured. A certificate of insurance will be furnished within ten business days from the execution of this agreement. Failure to provide such insurance allows the School Board of Manatee County, the election to immediately terminate this agreement.

5.8. CONFIDENTIALITY: Confidentiality is pursuant to Florida Public Records Act and all Federal, State and Local Statutes, including but not limited to Trademark Protection, Copyright protection, Family Educational Rights and Privacy Act of 1996, Health Insurance Portability and Accountability Act of 1996, Family Medical Leave Act of 1993, Americans with Disabilities Act of 1990, and Genetic Information Non Discrimination Act of 2008.

5.9. SOVEREIGN IMMUNITY: The parties acknowledge and agree that the School Board of Manatee County, Florida, as an agency of the State of Florida, is a sovereign entity that is by law immune from suit except to the extent specified in 768.28 of Florida Statutes. No provision of the agreement shall constitute, or be interpreted as, a waiver of sovereign immunity, and all defenses relative to sovereign immunity shall be preserved.

5.10. COMPLIANCE REQUIREMENTS: The School Board of Manatee County, acknowledge and understand that the projects contemplated by this contract are being constructed on public property owned by the School Board of Manatee County, which property may at various times during construction be occupied by students, teachers, parents and school administrators. Accordingly, in order to secure the property, protect students and staff, and otherwise comply with applicable law, the vendor/proposer agrees to all provisions and instructions contained in this proposal document and agrees that the failure of vendor/proposer to comply with any of these provisions and instructions may result in the termination of this contract by the School District of Manatee County.

5.11. CONTACT WITH STUDENTS: Unless otherwise specified, the contracting party with The School Board of Manatee County, will have no employees or independent contractors, material men, supplier or anyone involved in any manner with projects resulting from this proposal shall have direct or indirect contact with students at project sites. A violation of this provision shall result in immediate termination of the offender and issuance of a trespass notice from the School District. Vendor/Proposer shall be responsible for insuring compliance by all employees, independent contractors and sub-contractors or other persons involved in any manner with projects resulting from this proposal.

5.12. STANDARDS OF CONDUCT: The contracting party with The School Board of Manatee County will be held to the same standards of conduct as employees of the School District of Manatee County while conducting business with the District. These standards, as defined in School Board Policies, will apply not only to employees of the vendor, but also to the employees of its sub-contractors

5.13. SEVERABILITY AND WAIVER: If any provision of this agreement is held to be contrary to law, the provision will be subjected to modification and interpreted so as best to accomplish the objectives of the original provision to the fullest extent permitted by law, and the remaining provisions of this agreement will remain in effect. No failure or delay by either party to exercise a right under this agreement will be a waiver of that right.

5.14. FORCE MAJEURE: The term "FORCE MAJEURE" means circumstances beyond the reasonable control of a party, (such as acts of God, government restrictions, wars, insurrections, labor disputes, financial insolvency, economic hardship, strife, failure of suppliers, communications or data systems) which delay or prevent the party from performing under the terms of this agreement. Affected performance obligations will be suspended during the duration of the Force Majeure. In the event that the Force Majeure persists more than 90 days, the party may elect to terminate this agreement upon written notice.

5.15. EQUAL EMPLOYMENT OPPORTUNITY: Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60–1.3 must include the equal opportunity clause provided under 41 CFR 60–1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964– 1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

5.16. ANTI-DISCRIMINATION: a. the bidder certifies that they are in compliance with the non-discrimination clause contained in Section 202, Executive Order 11246, as amended by Executive Order 11375 relative to equal employment opportunity for all persons without regard to race, color, religion, sex or national origin. The provisions of the ADA Act of 1990 pertaining to employment shall also be applicable. b. the bidder shall not discriminate on the basis of race, gender, gender identity or expression, religion, national origin, ethnicity, sexual orientation, age or disability in the solicitation, selection, hiring, or treatment of sub-contractors, vendors, suppliers, or commercial customers. Bidder shall provide equal opportunity for sub-contractors to participate in all of its public sector and private sector sub-contracting opportunities, provided that nothing contained in this clause shall prohibit or limit otherwise lawful efforts to remedy the effects of marketplace discrimination that has occurred or is occurring in the marketplace. Bidder understands and agrees that violation of this clause is a material breach of the contract and may result in contract determination, debarment, or other sanctions

5.17. MINORITY, SMALL, AND WOMEN OWNED BUSINESS: School District of Manatee County encourages the use of Minority Owned Businesses, Small Businesses, and Women Owned Businesses. Contractor agrees to ensure small businesses, minority owned businesses and women's business enterprises are used whenever possible, such as when participation as partners, joint-venture's, prime contractor, sub-contractors, and in contracting opportunities.

5.18. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689): A contract award (see 2 CFR 180.220) must not be made to parties listed on the government wide Excluded Parties List System in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR Part 1986 Comp., p. 189) and 12689 (3 CFR Part 1989 Comp., p. 235), "Debarment and Suspension." The Excluded Parties List System in SAM contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

5.19. TERMINATION FOR CAUSE AND CONVENIENCE: Termination for Cause—The School Board of Manatee County reserves the right to terminate this contract in whole or in part at any time before the date of completion, in the event it is determined that the provider has failed to comply with the conditions of the agreement. The School Board shall promptly notify the Provider in writing of the determination and the reasons for the termination, together with the effective date of the termination. Payments made to Providers or recoveries by the School Board under contracts terminated for cause shall be in accordance with the legal rights and liabilities of the parties under the laws of the State of Florida. Termination for Convenience—Termination of this contract in whole or in part may be made by School District Manatee County when the district determines that the continuation of the contract would not produce beneficial results commensurate with the further expenditure of funds or in furtherance of the goals and directives of the School District Manatee County. Termination may be initiated within 30 days' notice when Board approval is not required and subject to Board approval when required.

5.20. COMPLIANCE WITH THE SUNSHINE LAW: The Florida Sunshine Law is a series of laws designed to guarantee that the public has access to the public records of governmental bodies in Florida, Fla. Stat. sec. 286.011 et. seq. and Fla. Stat. sec. 119.01 et. seq. The contracting party with The School Board of Manatee County hereby acknowledges and agrees to comply with The Florida "Sunshine" Law, including but, not limited to keeping and maintaining all records that relate and/or pertain to the terms of this agreement available for inspection and copying, public records requests, internal audits and for any other informational purpose.

5.21. SCHOOL DISTRICT POLICY: In accordance with School Board of Manatee County Policy and Procedures, no contract for providing supplies, equipment or services shall be effected with any individual or business entity in which any member of the School Board of Manatee County or the Superintendent has any financial interest. No contract for goods or services may be made with any business entity in which the Superintendent, Board Member or their spouse or child has an employment relationship or a material interest. No School Board employee may directly or indirectly purchase or recommend for purchase of goods or services from any business organization in which his/her spouse or child has a material interest as defined in F.S. 112.

5.22. COMPLIANCE WITH REGULATIONS: Federal, state, county, and local laws, ordinances, rules, and regulations that in any manner affect the items covered herein apply. Lack of knowledge by the proposer will in no way be a cause for relief from responsibility. The proposer shall have in their possession and must provide all applicable insurance, permits, licenses, etc., which may be required by federal, state, or county law to furnish services under the scope of this contract. The successful proposer(s) must not be in violation of any zoning or other ordinances in the performance of this contract.

5.23. SAFETY STANDARDS: All equipment must meet the applicable requirements of the Occupational Safety and Health Act (OSHA) and any standards there under.

5.24. TAX EXEMPTIONS: When purchasing directly from a supplier the School District of Manatee County, Florida is exempt from Federal Excise, State Sales and Use Taxes. Tax exemption certificates and numbers will be furnished on request.

5.25. DAVIS-BACON ACT, as amended (40 U.S.C. 3141-3148): When required by Federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141–3144, and 3146–3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-Federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency. The contracts must also include a provision for compliance with the Copeland "AntiKickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations.

5.26. BYRD ANTI-LOBBYING AMENDMENT (31 U.S.C. 1352): Contractors that apply or bid for an award of $100,000 or more must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

5.27. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. 3701-3708): Where applicable, all contracts awarded by the nonFederal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions, which are unsanitary, hazardous, or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

5.28. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT: If the Federal award meets the definition of "funding agreement" under 37 CFR §401.2 (a) and the recipient or sub recipient wishes to enter into a

contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or sub recipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

5.29. CLEAN AIR ACT (42 U.S.C. 7401–7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. 1251–1387), AS AMENDED: Contracts and sub grants of amounts in excess of $150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401–7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251–1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (42 U.S.C. 6201).

5.30. SECTION 6002 OF THE SOLID WASTE DISPOSAL ACT: The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines. (78 FR 78608, Dec. 26, 2013, as amended at 79 FR 75885, Dec. 19, 2014).

5.31. RECORD RETENTION REQUIREMENTS FOR CONTRACTS PAID FOR WITH FEDERAL FUNDS 2 CFR §200.333: When federal funds are expended by SDMC for any contract resulting from this procurement process, the vendor certifies that it will comply with the record retention requirements detailed in 2 CFR §200.333. The vendor further certifies that vendor will retain all records as required by 2 CFR §200.333 for a period of three years after grantees or sub-grantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

5.32. OTHER PROVISIONS:

5.32.1. POSSESSION OF FIREARMS: Possession of firearms will not be tolerated on the project or any School District of Manatee County property. No person who has a firearm in their vehicle may park their vehicle on School District property. Furthermore, no person may possess or bring a firearm on School District property. If any employee or independent contractor of the vendor/proposer, or any of its sub-contractors, is found to have brought a firearm on School District property, said employee or independent contractor shall be immediately removed and terminated from the project by the vendor/proposer. If a sub-contractor fails to terminate said employee or independent contractor, the vendor/proposer shall terminate its agreement with the sub-contractor. If the vendor/proposer fails to terminate said employee or independent contractor or fails to terminate the agreement with the sub-contractor who fails to terminate said employee or independent contractor, this agreement may be terminated by the School District of Manatee County. "Firearm" means any weapon (including a starter gun or antique firearm) which will, is designed to, or may readily be converted to expel a projectile by the action of an explosive, the frame or receiver of any such weapon, any destructive devise, or any machine gun. Powder actuated construction nailers and fasteners are excluded from this definition.

5.32.2. CRIMINAL ACTS: Employment on the project by the Vendor/Proposer, or any of its subcontractors, of any employee, or independent contractor, with any prior convictions of any crimes against

children, crimes of violence or crimes of moral turpitude will not be tolerated. If it is determined that any person with such criminal history is on the project site, the Vendor/Proposer agrees to take all steps necessary to remove such person from the project and the property. The School District of Manatee County shall have the right to terminate this agreement if the Vendor/Proposer does not comply with this provision.

5.32.3. POSSESSION/USE/UNDER THE INFLUENCE OF MIND ALTERING SUBSTANCES: Possession/use and/or being under the influence of any illegal mind altering substances, such as, but not limited to alcohol and/or substances delineated in Chapter 893, Florida Statutes, by Vendor/Proposer's employees or independent contractors or its sub-contractors employees or independent contractors will not be tolerated on School District property. If any employee or independent contractor is found to have brought and/or used or is under the influence of any illegal mind altering substances as described above on School District property, said employee or independent contractor shall be removed and terminated from the project by the Vendor/Proposer. If a sub-contractor fails to terminate said employee or independent contractor, the Vendor/Proposer shall terminate its agreement with the sub-contractor. If the Vendor/Proposer fails to terminate said employee or independent contractor or fails to terminate the agreement with the sub-contractor who fails to terminate said employee or independent contractor, this agreement may be terminated by the School District of Manatee County.

5.33. ENTIRE AGREEMENT: This agreement constitutes the entire agreement between the parties and supersedes all prior agreements, proposals or representations, whether written or oral, concerning its subject matter. This agreement may be executed in one or more counterparts, each of which will be deemed an original and all of which will constitute one and the same instrument. The terms of this agreement will supersede any conflicting terms in any counterpart, exhibit or attachment. No modification, amendment, or waiver of any provision of this agreement will be effective unless in writing and signed by both parties. Notice is by writing sent certified mail.

6. EXHIBITS TO THE PARTICIPATING AGREEMENT

6.1. All terms and conditions contained in Exhibits A though E are incorporated as if fully set forth herein and shall remain in full force and effect throughout the term of the Participating Agreement, unless modified in writing by the parties. The Exhibits are:

6.1.1. Exhibit A: [original Solicitation and contractors Reply]

6.1.2. Exhibit B: The Authorized Contract, including exhibits and amendments as modified by Section 5 of this document. [if contractor has a separate contract]

6.1.3. Exhibit C: Manatee County Public Schools - Cost Proposal.

6.1.4. Exhibit D: Manatee County Public Schools – Statement of Work

6.1.5. Exhibit E: Manatee County Public Schools – District Contracts

AGENDA ITEM NO. 12.3

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval of the Edmonds Scholarship Trust (Fund) Third Party Administration

Executive Summary
On June 14th, 2022, the School Board accepted termination of the Edmonds Scholarship Trust which was formed in 1984 and administered by Wells Fargo.[attached hereto]

As per the Board's acceptance of the termination of the trust, the Board had agreed that the trust should now be administered by a third party.

The District has reached out to both the Manatee Education Foundation and the Manatee Community Foundation to further administer the trust on behalf of the School Board as per Board approval.

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Financial Transparency & Capital Planning | Goal 1
Maximize all district resources to enhance the learning environment and ensure financial sustainability.

Recommendation
Motion and approval of the Edmonds Scholarship Trust (Fund) third party administration.

Financial Impact
There is no financial impact.

Edmonds Trust Executed by Wells Fargo

TRUST TERMINATION AND DISTRIBUTION AGREEMENT PURSUANT TO § 736.0111, Fla. Stat. (2021)

Edmonds Scholarship Trust
Account No: *******3744

This Trust Termination and Distribution Agreement ("Agreement") is by, between and among **Wells Fargo Bank, N.A.** ("Wells Fargo" or "Trustee"), as trustee of the Edmonds Scholarship Trust ("Edmonds Scholarship Trust") created under the Last Will and Testament of George Walter Edmonds, deceased ("Settlor"); and the School District of Manatee County, Florida ("District"). The foregoing are signatories to this Agreement and are referred to collectively as the "Parties."

Recitals and Trustee's Disclosures

On February 17, 1984, the Settlor died whereupon his Last Will and Testament ("LWT") was admitted to probate and the Edmonds Scholarship Trust was created pursuant to Item III. A true and correct copy of the Last Will and Testament is attached as **Exhibit A**.

Wells Fargo is sole trustee of the Edmonds Scholarship Trust.

Recipients of scholarships from the Edmonds Scholarship Trust are chosen by the Selection Committee pursuant to Item III.C. of the LWT. The Selection Committee is currently comprised of the Principal and Wells Fargo employees.

The Selection Committee received notice of this Agreement and approved of the termination and distribution of the Edmonds Scholarship Trust in the manner set forth in this Agreement.

The Edmonds Scholarship Trust was judicially modified by Final Order entered on March 24, 2008, a true and correct copy of which is attached as **Exhibit B**.

Item III, subsection I, paragraph 8 of the Trust as modified provides that "[t]he trust shall continue in perpetuity unless the trustee determines in its sole discretion that the continued administration of the trust would be unlawful, impractical or wasteful because its administrative expenses or other burdens are unreasonably out of proportion to its charitable benefits, at which time the trustee may terminate the trust after notice to the Selection Committee."

Wells Fargo has determined in the good faith exercise of its discretion that the continued administration of the Edmonds Scholarship Trust would be impracticable. Due to the small remaining value of the assets in trust, the annual distributions from the Edmonds Scholarship Trust are not of a sufficient size to be meaningful to the student recipients. In accordance with the 2008 Order, Wells Fargo has notified the Selection Committee of its intention to terminate the Trust.

The Parties desire to avoid the costs of judicial involvement in the termination and distribution of the Edmonds Scholarship Trust and intend for this Agreement to resolve any and all issues or uncertainties over the early termination and distribution of the Edmonds Scholarship Trust on the terms and conditions of this Agreement.

NOW, THEREFORE, in consideration of the premises, the covenants, and agreements herein, together with such other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties individually and collectively hereby acknowledge, agree, stipulate and consent as follows:

Agreement

1. Recitals and Trustee's Disclosures. The Recitals and Trustee's Disclosures above are true and correct.

2. Florida Attorney General Review. Wells Fargo submitted this Agreement to the Florida Attorney General for review pursuant to § 736.0110(3). In response, the Florida Attorney General issued a "no objection" letter, a true and correct copy of which is attached as **Exhibit C**. Any procedural irregularities have been corrected, including but not limited to a proper signatory by School Board Approval, Accounting provided to the School District and Administration of the Trust by selecting recipients for the 2021-2022 school year.

3. Termination and Distribution. Upon execution of this Agreement by all Parties and delivery of a fully executed copy to the Trustee, Wells Fargo will exercise its discretion to terminate the Edmonds Scholarship Trust and shall thereupon initiate the process of trust termination and delivery of all undistributed income and remaining principal of the Edmonds Scholarship Trust to the District subject to the Trustee's right to maintain a reasonable reserve pursuant § 736.0817, Fla. Stat. (2022) for payment of the remaining expenses of trust administration, including reasonable Trustee's fees and the Trustee's legal fees. The District

hereby acknowledges and agrees that the funds distributed to the District from the Edmond Scholarship Trust shall be used in a manner consistent with the terms of the Edmonds Scholarship Trust and that the funds shall not be used in a manner inconsistent with the purposes described in Internal Revenue Code Section 501(c)(3). A summary of the Trustee's final fees and expenses and the estimated balance to be distributed to the District once this Agreement is fully executed is set forth in **Exhibit D**.

4. Nonjudicial Settlement Agreement. This Agreement is a binding contract and nonjudicial settlement agreement among the Parties pursuant to § 736.0111, Fla. Stat. (2022). For purposes of this Agreement and § 736.0111(1), Fla. Stat. (2022), the Parties stipulate and agree that all "interested persons" are parties to this Agreement or are represented by the Parties pursuant to Part III of Chapter 736, Fla. Stat. (2022) and § 736.0110(3). This Agreement is neither intended nor designed to produce a result not authorized by the Florida Trust Code.

5. Representation of Contingent, Minor and Unascertained Beneficiaries. For purposes of this Agreement, any unknown or unascertained beneficiaries who do or may claim an interest in the Edmonds Scholarship Trust are adequately represented by one or more of the Parties pursuant to the representation provisions in Part III of the Florida Trust Code and § 736.0110(3).

6. Binding Effect. This Agreement is binding upon and inures to the benefit of the Parties, their successors, respective legal representatives, heirs, and assigns.

7. Governing Law and Venue. This Agreement is governed by the laws of the State of Florida. Venue for any dispute arising from this Agreement or the subject matter of this Agreement shall lie exclusively in the state courts in and for Manatee County, Florida.

8. Legal Counsel. All Parties to this Agreement have been advised that legal counsel for Wells Fargo only represents Wells Fargo and that Wells Fargo's legal counsel is paid by Wells Fargo out of the assets of the Edmonds Scholarship Trust. All Parties to this Agreement have been advised to obtain their own independent legal advice.

9. Reimbursement. The District acknowledges and agrees that pursuant to § 736.1018 of the Florida Trust Code it may be required to refund to the Trustee a distribution received if it is later determined that such a distribution was improperly paid. In addition, the District

acknowledges and agrees that it may be obligated to return the income from such a distribution or interest on such a distribution from the date of distribution.

10. Accountings and Material Information. The District acknowledges and agrees that it has been provided and reviewed or had the opportunity to review material information about the Edmonds Scholarship Trust, including copies of the trust documents and account statements, before entering into this Agreement. The District acknowledges that it reviewed or had the opportunity to review a three-year accounting of the Trustee's administration of the Edmonds Scholarship Trust and waive further accounting. The District acknowledges and agrees that it received all information they requested from Wells Fargo before entering into this Agreement.

11. Severability. If any provision of this Agreement or the application thereof to any person, entity, or circumstance is invalid, illegal or unenforceable to any extent, the remainder of this Agreement and the application thereof shall not be affected and shall be enforceable to the fullest extent permitted by law.

12. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

13. Effective Date. The effective date of this Agreement shall be the later of the date that this Agreement is executed by all of the parties as set forth below, and the date that the Florida Attorney General provides a "no objection" letter after reviewing this Agreement.

14. Trustee's Notice pursuant to § 90.5021 (2021). The Parties are hereby notified that the fiduciary lawyer-client privilege in § 90.5021 applies with respect to the Trustee and any attorney employed by the Trustee including the Trustee's attorneys who prepared this Agreement.

15. Limitation Notice Pursuant to § 736.1008, Fla. Stat. (2021). An action for breach of trust based on matters disclosed in a trust accounting or other written report of the Trustee, including the information disclosed in this Agreement and accountings provided to Beneficiaries prior to and in connection with this Agreement, may be subject to a six-month statute of limitations from the receipt of the trust accounting or other written report, including this Agreement. If you have questions, please consult your attorney. This Agreement constitutes a Trust Disclosure Document, as that term is defined in § 736.1008(4)(a), Fla. Stat. (2021).

IN WITNESS WHEREOF, the Parties have executed and acknowledged this instrument effective as of the date last set forth below.

Last Will and Testament

OF

GEORGE WALTER EDMONDS

I, GEORGE WALTER EDMONDS, of Manatee County, Florida, being of sound and disposing mind and memory, do hereby make, publish and declare this to be my Last Will and Testament, hereby revoking any and all former Wills and Codicils or other testamentary dispositions heretofore made by me,

ITEM I

I direct that all of my just debts funeral and administration expenses, and any estate or inheritance taxes payable by reason of my death, be paid as soon after my decease as is practicable from the residue of my estate.

ITEM II

I hereby make the following specific bequests:

A. I devise the sum of Three Thousand Dollars ($3,000.00) to the HOLY CROSS ROMAN CATHOLIC CHURCH, Palmetto, Florida.

B. I devise the sum of Three Thousand Dollars ($3,000.00) to HAPPINESS HOUSE, INC., a corporation not for profit, Bradenton, Florida.

C. I devise the sum of One Thousand Dollars ($1,000.00) to the Trustees of the MASONIC HALL AND ASYLUM FUND, a New York corporation for the home endowment fund created by agreement dated the 21st day of April, 1937.

D. I devise the sum of One Thousand Dollars ($1,000.00) to JOANNA HECKER, Box 543, Hermosa Beach, California 90254.

E. I devise all of my personal and household goods and furniture in equal shares to MR. and MRS. RAY HARRIS, 1003 Estrelmadura Drive, Bradenton, Florida and MR. and MRS. CLARK WOODS, 508 Northwest Drive, Silver Springs, Maryland, any portion they may desire, the balance to be disposed of as part of my estate.

This is Page One of my Will:

GWE

EXHIBIT A

F. I devise my two (2) Scott Specialty Stamp Albums, Scott International Album I and my Schaubek Albums of Germany, Italy and France to the GEORGE WALTER EDMONDS and VIOLET C. EDMONDS SCHOLARSHIP TRUST, herein.

G. I devise the balance of my stamp collection, not otherwise specifically devised herein to the MANATEE COUNTY STAMP CLUB, Bradenton, Florida.

H. I devise the sum of One Thousand Dollars ($1,000.00) to HAZEL CLARK WOOD, 500 Northwest Drive, Silver Springs, Maryland.

I. I devise the sum of One Thousand Dollars ($1,000.00) to RUTH GODFREY, S-3956 Baker Road, Orchard Park, New York 14127.

J. I devise the sum of One Thousand Dollars ($1,000.00) to IRIS LEE McKINLEY, 55 Dapplegray Road, Rolling Hills Estates, California 90274.

K. I devise the sum of One Thousand Dollars ($1,000.00) to JACKSON M. SPANKS, 4716 North 34 Place, Phoenix, Arizona 85018.

ITEM III

I devise the rest, residue and remainder of this my estate, whether real, personal or mixed and wheresoever situate to SOUTHEAST NATIONAL BANK OF BRADENTON, Bradenton, Florida, as Trustee, to hold, administer, and distribute for the following uses and purposes and in the following manner:

A. This Trust shall be known as the GEORGE WALTER EDMONDS and VIOLET C. EDMONDS SCHOLARSHIP TRUST.

B. This Trust shall exist perpetually.

C. The net income therefrom shall be paid each year to some deserving student or students of Palmetto High School, or its successor school, which student shall be selected by a selection committee consisting of the principal of said school together with two members selected by the Board of Directors of the Southeast National Bank of Bradenton, Bradenton, Florida.

D. Said student or students may be either enrolled in said school or a graduate thereof.

E. In the event a student enrolled in said school applies for a grant

This is Page Two of my Will:

GWE

under the terms hereof, financial need shall be the primary consideration of the selection committee and any grant made to such a student may be either directly to the student or to his parents or guardians, as the selection committee, in its sole discretion shall so designate.

F. All monies advanced to students who have graduated from said school shall be in the form of interest free loans payable five years from the date upon which the recipient completes his formal education.

G. Any and all funds returned or repaid to this trust by recipients of awards made by the selection committee shall be divided into two equal portions, one of which shall be added to the corpus hereof and the other of which shall be added to income available for distribution by the selection committee.

H. Any portion of net income not awarded one year shall be carried forward, as such, to the next year, or years and shall therefore be available for distribution by the committee.

ITEM IV

I hereby nominate, constitute and appoint SOUTHEAST NATIONAL BANK OF BRADENTON, Bradenton, Florida, personal representative, without bond, of my estate.

ITEM V

I hereby grant unto my personal representative and my Trustee named herein the following powers, in addition to those specifically granted under the Florida Statutes:

A. To lease, exchange, mortgage, pledge, buy or sell both real and personal property at public or private sale for cash or upon any terms, and to grant for such terms, as in the option of my Trustee or personal representative may be advantageous to the estate, even though said lease may extend beyond the period of the termination of this Trust.

This is Page Three of my Will:

OR 3DF 3021 4B

B. To retain, sell, invest and reinvest trust assets, investments not being limited to those authorized by the present or any future laws of the State of Florida; to retain any of the stock owned by me at my death which shall not have been disposed of by my personal representative; to hold investments in the name of a nominee or of a Trustee without disclosing the fiduciary office; to vote stock and give proxies; and to exercise all other rights arising out of any trust investments.

C. To enter into agreements modifying the terms or extending the time of any obligations due or owed by the aforesaid trust estate; to borrow or lend money.

D. To sue, defend, or compromise in behalf of aforesaid trust estate, to employ counsel and other assistance in connection therewith; and to make all other advisable expenditures for the protection of said estate.

E. To determine conclusively, but not in such manner as to invalidate any of the provisions of this instrument, what receipts and expenditures, including dividends of every character, shall be credited or charged to principal and what to income; to determine what, if any, sums of income to apply to depreciation, waste, obsolescence and amortization.

F. To make distribution of income and principal under the terms hereof in kind or in money.

G. To be charged with the duty of good faith and reasonable care in the management of this estate, but not to be responsible for losses, if any, resulting from honest mistakes of judgment.

ITEM VI

I hereby specifically exempt the Trust created hereunder from compliance with Chapter 737, Florida Statutes (Trust Accounting Law), including, but not limited to the requirements for qualification of the Trustee before the Circuit Court.

EXHIBIT B

IN THE CIRCUIT COURT, FOURTH JUDICIAL CIRCUIT, IN AND FOR DUVAL COUNTY, FLORIDA

CASE NO.: 16-2008-CP-0207
DIVISION: PR-A

In re: THE GEORGE WALTER EDMONDS AND VIOLET C. EDMONDS SCHOLARSHIP TRUST.

FINAL ORDER REFORMING AND MODIFYING TRUST

THIS CAUSE came before the Court March 24, 2008, upon the Amended Petition for Reformation of Trust filed by Wachovia Bank, N.A., as trustee (hereinafter "Trustee") of the George Walter Edmonds and Violet C. Edmonds Scholarship Trust (the "Edmonds Scholarship Trust"), established under the Last Will and Testament of George Walter Edmonds, dated October 22, 1976. The Court has reviewed the Amended Petition, the terms of the Edmonds Scholarship Trust, and the Answer and Consent of both the State Attorney and the Principal of Palmetto High School, and has considered the arguments of counsel. Being otherwise fully advised in the premises, the Court finds the clear and convincing evidence that:

1. Jurisdiction and venue are proper and the Court has the equitable and statutory authority to enter this Order.

2. Reformation and modification of the Edmonds Scholarship Trust in the manner set forth hereinbelow are in the best interests of the intended beneficiaries of the Edmonds Scholarship Trust.

3. The settlor's intent that the Edmonds Scholarship Trust assets be used solely for charitable purposes is evident from the language the settlor employed in the Edmonds Scholarship

Trust instrument. If the Edmonds Scholarship Trust is not reformed or modified, the settlor's intent may be frustrated.

4. Section 736.0415 authorizes reformation on the grounds set forth. In addition, § 736.0416 authorizes judicial modification to achieve the settlor's tax objectives.

5. The Court finds that both the accomplishment of the settlor's intent and the terms of the trust were affected by a mistake of fact or law. See § 736.0415 The Court also finds the Edmonds Scholarship Trust should be modified retroactively to achieve the settlor's tax objectives. See § 736.0416

6. It was reasonably necessary and appropriate for the Trustee to engage counsel to bring this action in order to protect the charitable status of the Edmonds Scholarship Trust.

IT IS THEREUPON ORDERED AND ADJUDGED:

Effective retroactively to the date of the establishment of the Edmonds Scholarship Trust, the Edmonds Scholarship Trust instrument is hereby reformed and modified to add subsection I. at the end of Item III, which will provide as follows:

> *I. This trust is organized and operated exclusively for religious, charitable, scientific, literary or educational purposes as defined in section 501(c)(3) of the Internal Revenue Code of 1986 and the regulations thereunder, or the corresponding section of any future federal tax code (the "Code"). Notwithstanding any other provision of this document, the trust shall not carry on any other activities not permitted to be carried on (a) by an organization exempt from federal income tax under Code Section 501(a) and described in Code Section 501(c)(3), or (b) by an organization contributions to which are deductible under Code Section 170 (c)(2).*
>
> *2. No part of the net earnings of the trust shall inure to the benefit of, or be distributable to its trustees or any private persons, except that the trust shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purposes set forth in the purpose clause hereof. No substantial part of the activities of the trust shall be the carrying on of propaganda, or otherwise attempting to influence legislation, and the trust shall not*

participate in, or intervene in (including the publishing or distribution of statements) any political campaign on behalf of any candidate for public office.

3. Upon the dissolution of the trust, all assets of the trust shall be distributed for one or more exempt purposes within the meaning of Code Section 501(c)(3) or shall be distributed to the federal government, or to a state or local government, for a public purpose. Any such assets not disposed of shall be disposed of by the state court of general jurisdiction in the county in which the principal place of administration of the trust is then located, exclusively for such purposes or to such organization or organizations, as said court shall determine, which are organized and operated exclusively for such purposes.

4. The purposes of trust are exclusively charitable and are to support charitable and educational activities by providing scholarships to certain graduates of Palmetto High School, or its successor, in accordance with the preceding paragraphs of this Item III of this instrument and as limited by Code Section 4945(g) (the "Charitable Purposes"). The trustee will distribute each scholarship payment directly to the educational institution the scholarship recipient attends or will attend for the exclusive benefit of such selected recipient.

5. Notwithstanding any other provision of this governing instrument, if the trust is subject to or ever becomes subject to the private foundation rules of the Code, then the following shall apply:

(i) The trustee shall make distributions from this trust at such time and in such manner so as not to subject the trust to the tax on undistributed income under Section 4942 of the Internal Revenue Code.

(ii) The trustee shall not engage in any act of self-dealing as defined by Code Section 4941(d).

(iii) The trustee shall not retain any excess business holdings as defined in Code Section 4943(c).

(iv) The trustee shall not make any investments in such a manner as to subject the trust to the tax under Section 4944 of the Internal Revenue Code.

(v) The trustee shall not make any taxable expenditures as defined in Code Section 4945(d).

6. No provision herein shall be construed as restricting the trustee from investing and reinvesting the assets of the trust in a manner which could result in the annual realization of a reasonable amount of income or gain from the sale or disposition of assets of the trust.

7. Future laws may make it impossible or impracticable to give full effect to the Charitable Purposes for which the trust was created. Therefore, the trustee, without necessity of prior court approval, shall have the right to amend the trust's governing instrument to make it possible to continue the trust in accordance with the provisions of such laws and the Charitable Purposes of the trust. The Trustee shall deliver a copy of any such amendment to the Edmonds Scholarship Trust Selection Committee, as described in Item III, subparagraph C, of the trust instrument ("Selection Committee"). If the trustee desires to seek the advice and instruction of the court or courts before taking such action under this paragraph, the trustee shall be entitled (but not required) to do so.

8. The trust shall continue in perpetuity unless the trustee determines in its sole discretion that the continued administration of the trust would be unlawful, impracticable, or wasteful because its administrative expenses or other burdens are unreasonably out of proportion to its charitable benefits, at which time the trustee may terminate the trust after notice to the Selection Committee, and distribute the remaining income and principal in an manner consistent with the trust's Charitable Purposes as determined by the trustee in the trustee's sole discretion. Notwithstanding any provision herein to the contrary, upon the trust's termination, no principal or income may be distributed in a manner inconsistent with the purposes described in Code Section 501(c)(3).

In furtherance of the foregoing reformation and modification for tax purposes, and due to the complexity, cost and impracticability of carrying out subsections F. and G. of Item III of the Edmonds Scholarship Trust (related to repayment of grants), subsections F. and G. of Item III of the Edmonds Scholarship Trust are hereby deleted.

DONE AND ORDERED this ___ day of _____, 2008 in Chambers at Jacksonville, Duval County, Florida.

Re: Edmonds Scholarship Trust (Account No. *******3744)
Trust Termination and Distribution Agreement

Dear Mr. Cole:

I am in receipt of your email correspondence, dated October 13, 2020, to Blaine Winship of this office regarding the Edmonds Scholarship Trust. As previously indicated, I have taken over from Mr. Winship responsibility for charitable trust matters on behalf of the Florida Office of the Attorney General. In that capacity, I have reviewed the proposed Trust Termination and Distribution Agreement attached to the October 13 email, as well as Mr. Edmonds' Will and the March 24, 2008 Final Order Reforming and Modifying Trust.

Based upon my review of these materials, please be advised that the Attorney General does not object to the execution of the Trust Termination and Distribution Agreement. You may file this letter as an exhibit to the Agreement. If you have any questions or wish to discuss further, please do not hesitate to contact me.

Very truly yours,

s/ William H. Stafford III

EXHIBIT D

IN THE MATTER OF THE EDMONDS SCHOLARSHIP TRUST
Account No: *******3744

Distribution Schedule

BALANCE AS OF 05/19/2022

Total Market Value	**$ 214,916.87**
Less Distribution for 2021-22 scholarship(s)	$ 10,000.00
*Less: Reserve for Fiduciary Fee	$ 1,700.00
*Less: Reserve for Final Expenses	$ 3,260.00
**Less: Reserve for Attorney's Fees	$ 500.00
Total Available for Distribution @ 5/19/22	**$ 199,456.87**

Distribution Recipient:

100% to School District of Manatee County, Florida	**$ 199,456.87*** **

*** Final fiduciary fees, tax preparation fees, administrative expenses, and taxes are estimates and may be more or less depending on the actions required and time it takes to conclude the matter.**

Fiduciary Fees are charged on or around the 20th of each calendar month. Amount stated above estimates fees of approximately $340 per month for 5 additional months.

Final Expenses stated above includes $1,030 tax preparation fee for fiscal year ending 9/30/2022, estimated taxes of $230 and a reserve of $2,000 for miscellaneous expenses.

**** Attorney Fees and Costs have been paid current as of 05/19/2022. Amount stated is an estimate if the matter proceeds informally, without the need for a Court application.**

***** This is the value of the trust assets as of the close of business May 19, 2022. The majority of the assets are invested. As a result, the value of the assets will change daily until finally distributed.**

AGENDA ITEM NO. 12.4

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval to Renew the Professional Services Contract with Carr, Riggs & Ingram LLC to Provide Internal Audit Services for Fiscal Year 2022-2023, SDMC No. 19-0079-RG, Estimated in the Amount of $397,220.00

Executive Summary
The Board approved the contract of award with Carr, Riggs & Ingram, LLC on June 25, 2019. The awarded contract period is from July 1, 2019-June 30, 2021, with two options years to be exercised at the discretion of the School Board and as agreed to by the selected firm. The Audit Committee recommends exercising the second one year renewal option.

The internal audit direct service estimated fees are $328,440.00, internal audit indirect service estimated fees are $30,380.00 and internal accounts estimated fees are $38,400.00 for a total of $397,220.00 for fiscal year 2022-2023.

This item aligns with the District's Strategic Plan Goal(s) which state(s):

Financial Transparency & Capital Planning | Goal 1
Maximize all district resources to enhance the learning environment and ensure financial sustainability.

Recommendation
Motion and approval to renew the professional services contract with Carr, Riggs & Ingram LLC to provide internal audit services for Fiscal Year 2022-2023, SDMC No. 19-0079-RG, estimated in the amount of $397,220.00.

Financial Impact
The cost to implement this agenda item will not exceed $397,220.00. The funding source for this expenditure is School Board Professional and Technical Services, and is included in the School Board proposed budget for 2022-2023.

School Board of Manatee County, Florida
Bradenton, Florida

Dear Board:

We are pleased to provide certain internal audit services to the School Board of Manatee County, Florida (Board). The purpose of this letter is to confirm the terms of the Carr, Riggs & Ingram LLC engagement to provide the requested internal audit services to the School District of Manatee County (District). The internal audit services described below cover the period for July 1, 2022 to June 30, 2023.

Scope of Services

The Audit Committee is responsible for advisory oversight of our services. The nature of the internal audit services we are to perform for the School Board is as follows:

Direct Services – Exhibit A

Direct services include the following:

Internal Audit Areas Defined in the Risk Assessment

The schedule of Direct Services included in Exhibit A identifies internal audit areas that you have requested us to perform after evaluation of the five-year risk assessment process updated annually with the Audit Committee.

- We will design an internal audit plan for each area listed. Each plan will generally describe the procedures to be performed by Carr, Riggs & Ingram LLC. The Audit Committee is responsible for recommending and the School Board approving the selection of internal audit areas, and may alter the selection to cover other higher risk areas. The Audit Committee will recommend and School Board will approve the Internal Audit work plan for the 2023 fiscal year.

  CRI will coordinate with the Board Staff Internal Auditor (BSIA) for planning, conducting, and reporting internal audits such as:
  - Developing an audit plan that identifies the specific audit responsibilities for the BSIA and CRI for the FYE 2023.
  - Identifying and providing needed support and advice for audits conducted by the BSIA.
  - Identifying data/documents needed by CRI for planned audits so that the BSIA may support CRI in obtaining those data/documents.
  - Updating the risk assessment for the FYE 2024 and developing a draft audit plan for the FYE 2024.

DRAFT

- Upon completion of the internal audit area, a draft report will be provided to the Audit Committee Chair and Management for review before finalization and presentation to the Audit Committee and/or School Board. A final report will be issued upon resolution and acceptance of Management responses. The final report will include the following:

    1. Overview of Internal Audit area including executive summary.

    2. Internal Audit procedures performed including scope, methodology, and conclusion.

    3. Summary of Internal Audit results which includes:

        a. **Internal Audit Rating –** Applicable Internal Audits will receive an overall rating based on the underlying Internal Audit Findings. The assigned Rating communicates the overall adequacy and effectiveness of controls within the area audited. The following ratings will be assigned:

            Strong **-** Internal control systems are appropriately designed and in place for the size and complexity of the function/department. Risks are effectively managed. Monetary risk associated with potential control failures is not material. A few exceptions to established policies and procedures may have been identified.

            Satisfactory - While there may be some minor risk management weaknesses, these issues have been recognized and are being addressed by management. Risks are effectively managed. Internal control systems may display minor weaknesses or deficiencies, however they are easily corrected in the normal course of business.

            Needs Improvement - Risk management practices are lacking in important ways and are a cause for more than supervisory attention. Risks may not be effectively managed. Weaknesses may include control exceptions or failures that could have adverse effects on the organization if corrective actions are not taken.

            Unsatisfactory - Due to the absence of effective risk management practices, management is unable to identify, monitor or control significant risk exposure. Internal control systems may be sufficiently weak to jeopardize the continued viability of the operation under audit. Risks are not effectively managed. Deficiencies in risk management procedures and internal controls require immediate and close supervisory attention.

        b. **Internal Audit Findings** – audit results noting violations of state or local statutes, administration rules, or client's own policy or procedure, lack of written procedures, or other lack of adequate controls. Within each Finding, there will be an explanation of the current condition, specific criteria not met, noted cause, and impact on the District along with a recommendation clearly documented. Management responses to findings are required documentation for the report. Findings will be categorized by severity using the following ratings:

DRAFT

Low - Formal process and controls exist and are partially effective at managing risks. However, the underlying assets affected (finances, reputation, property, etc.) are minimal (i.e. dollar amount, number of employees/students impacted, potential fines and/or loss of funds, extent of media exposure etc.). Such an issue does not warrant immediate attention but requires corrective action by Management, and should be completed within 120 days of final Internal Audit Report date.

Medium - Formal or informal processes and controls may exist, however, they are only partially effective at managing risks. For example, prevention or detection of unwanted outcomes may occur, but, the prevention does sufficiently cover the population at risk or the detection is not timely. Finally, the underlying assets affected (finances, reputation, property, etc.) are moderately significant (i.e. dollar amount, number of employees/students impacted, potential fines and/or loss of funds, extent of media exposure etc.). Such an issue would be expected to receive corrective action from Management, and should be completed within 90 days of final Internal Audit Report date.

High - Formal or informal processes and controls may exist, however, they are only partially effective at managing risks. For example, the current processes do not sufficiently prevent or detect asset misappropriation, noncompliance with regulations, transactional errors, etc. Finally, the underlying assets affected (finances, reputation, property, etc.) are considered significant (i.e. dollar amount, number of students/employees impacted, potential fines and/or loss of funds, extent of media exposure, etc.) but is not substantial enough to be considered critical. Such an issue would be expected to receive urgent corrective action by Management, and should be completed within 60 days of final Internal Audit Report date.

Critical – Processes and controls are either nonexistent or fail to effectively manage risks. For example, the current processes do not sufficiently prevent or detect asset misappropriation, noncompliance with regulations, transactional errors, etc. Finally, the underlying assets affected (finances, reputation, property, etc.) are considered significant (i.e. dollar amount, number of employees/students impacted, potential fines and/or loss of funds, extent of media exposure etc.). Such an issue would be expected to receive immediate attention from Management, but should not exceed 30 days to remedy from the final Internal Audit Report date.

c. **Best Practice Recommendations for Improvements** – internal audit results noting an area where procedures, polices, controls, or processes could be enhanced in order for client operations to be more efficient and effective; be more cost effective, or generate additional income sources. These could include system enhancements, procedural improvements, or operational efficiencies. These recommendations are made to Management during the course of the internal audit and summarized in the report. Management Response is required.

DRAFT

d. **Management Response** – an appropriate District employee takes responsibility for the internal audit finding, an overall description of the corrective action plan is provided, a date by which a detailed corrective action plan will be provided, and a target date for implementation of the corrective action plan based on the internal audit finding rating.

Post Internal Audit Reviews

We have issued Internal Audit reports in previous years which still require follow up to ensure the action plans have been put in place. The outstanding action plans are as follows and will be included in procedures performed as considered appropriate as listed in Schedule A or will be considered autonomously as considered appropriate:

- Personnel
- Construction
- Position Control
- Benefits
- Safety and Security
- AG Operational Audit

Additional Services

We will communicate with you regarding the scope of additional services and the estimated fees and we will issue an addendum to this engagement letter covering any additional services that we are requested to provide. Additional services might include but are not limited to:

- After approval by the Board, conduct any special internal audit projects requested by the Audit Committee, Management or the Board (outside of audit plan for fiscal year)
- Expand testing requests resulting from internal audit findings
- Assist in resolving internal audit findings

Our engagement will be conducted under the consulting standards established by the American Institute of Certified Public Accountants and will not include a detailed examination of all transactions originated by the District. Therefore, it cannot be relied upon to take the place of management's efforts to discover errors, omissions, negligence, irregularities, non-compliance, or illegal acts, including fraud or defalcations, which may exist.

Indirect Services – Exhibit A

Our services will also include indirect services such as those listed in Exhibit A, including inquiries from the external auditors and attendance at Board, Board Workshop, Management and Audit Committee meetings. We will not bill for more than one person's attendance at a Board or Audit Committee meeting without specific written approval from the Board Chair or the Audit Committee Chair.

DRAFT

Limitations

Carr, Riggs & Ingram LLC will not perform any management functions, make management decisions or perform in a capacity equivalent to that of an employee of the District. The procedures to be performed will not constitute an audit, a review or a compilation of the District's financial statements or any part thereof, nor an examination of Management's assertions concerning the effectiveness of the District's internal control systems or an examination of compliance with laws, regulations or other matters. Accordingly, our performance of the procedures will result in neither the expression of an opinion or any other form of assurance on the District's financial statements or any part thereof, nor an opinion or any other form of assurance on the District's internal control systems or its compliance with laws, regulations or other matters.

Management's Responsibilities

The School Board and District is, and will continue to be, solely responsible for establishing and maintaining an effective internal control system, including, without limitation, systems designed to assure compliance with policies, procedures and applicable laws and regulations. The Board and the Audit Committee will be responsible for determining the nature, scope and extent of the internal audit services to be performed by Carr, Riggs & Ingram LLC, providing overall direction and oversight for the internal audit services and reviewing and distributing (or approving the distribution of) internal audit reports. The School Board, primarily through the audit committee, is responsible for overseeing CRI's internal audits and evaluating the adequacy and results of the internal audits.

Prompt and sufficient response to internal audit results is an important component of an effective internal audit program. Accordingly, District responses to report findings and issues must be provided in a timely manner and in the format described in the previous section. Insufficient and/or untimely provision of management responses may result in the delay of the delivery of the report.

Fees

Our fees for services as outlined in the attached Exhibit A, are planned hours only and can be adjusted by direction of the Audit Committee. Exhibit A details direct services and indirect services showing estimated hours for each. Our internal audit direct service estimated fees are $328,440 based on an average hourly rate of $184 per hour. Our internal audit indirect service estimated fees are $30,380, which is based on an average hourly rate of $217 per hour. Our audits of internal accounts is estimated separate from above as it is based on an estimate of 20 hours per audit and an average rate of $160. Audits of internal accounts will be based on schools with turnover of principles and or bookkeepers, currently estimated at 12. Our estimated fee for auditing internal accounts base on 12 schools is $38,400. This is a not to exceed contract of $358,820 (rounded based on hourly rates), for the direct and indirect services, unless amended in writing by both parties. The fees for auditing internal accounts will be based on the assumption of 20 hours per audit with an average rate of $160.

These hours and fees are presented for budget purposes only. Any unused hours of Indirect Services can be reallocated to Direct Services as directed by the Audit Committee and/or School Board.

DRAFT

Fees for services will be invoiced monthly based on the actual time expended using the following rates:

Partner/Principal	$225
Manager	$190
Supervisor	$173
Senior	$147
Paraprofessional	$ 74

Our fees are based on the amount of time required to complete an assignment and the level of personnel assigned. Fees and expenses for this engagement will be billed monthly as the work progresses and are payable upon receipt of invoice.

In accordance with our firm policies, work may be suspended if the account becomes thirty (30) days or more overdue and may not be resumed until your account is paid in full. If we elect to terminate our services for nonpayment, our engagement will be deemed to have been completed even if we have not completed our report.

You will be obligated to compensate us for all time expended and to reimburse us for all out-of-pocket expenditures through the date of termination.

The documentation for this engagement will be retained for a minimum of five years after the report release or for any additional period requested by the Manatee County School Board.

Invoices

Carr, Riggs & Ingram, LLC agrees that bills and invoices for fees or other compensation services or expenses shall cite the purchase order number, detail time and date of services by project per the approved internal audit work plan. The invoice shall be submitted to the Accounts Payable department within ten (10) working days after month end. The invoice shall provide the individual who worked on said project with hours and hourly rate sufficient for a proper pre-audit and post audit thereof. Each bill or invoice must properly identify and enumerate the services provided, and expenses for which compensation is sought. In addition, a copy of all applicable materials, rental or subcontractor invoices must be included with the invoicing to the Board. Payment of all approved invoices shall be made within thirty (30) days by the District.

Dispute Resolution

In the event of a dispute between the parties which arises out of or relates to this contract or engagement letter, the breach thereof or the services provided or to be provided hereunder, if the dispute cannot be settled through negotiation, the parties agree that before initiating arbitration, litigation or other dispute resolution procedure, they will first try, in good faith, to resolve the dispute through non-binding mediation. All parties agree that an alternative form of dispute resolution shall not be undertaken by either party until the expiration of fifteen (15) calendar days following notice being provided to the other party indicating that the dispute cannot be settled through mediation. The mediation will be administered by the American Arbitration Association under its *Dispute Resolution Rules for Professional Accounting*

DRAFT

and Related Services Disputes. The costs of any mediation proceedings shall be shared equally by all parties.

LIMITATION OF LIABILITY

EXCEPT AS PROVIDED IN THIS AGREEMENT, CRI SHALL NOT BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, EXEMPLARY, SPECIAL, PUNITIVE OR ANCILLARY DAMAGES OF ANY KIND ALLEGED AS A RESULT OF ANY CAUSE OF ACTION FROM THIS AGREEMENT, WHETHER ARISING OUT OF BREACH OF CONTRACT, TORT OR OTHERWISE. UNLESS OTHERWISE STATED IN THIS AGREEMENT, BOTH CRI AND YOU AGREE THAT THE TOTAL CUMULATIVE LIABILITY OF CRI (INCLUDING ITS EMPLOYEES, DIRECTORS, OFFICERS OR AGENTS), SHALL NOT EXCEED THE AMOUNT OF FEES EARNED BY CRI RELATED TO THIS ENGAGEMENT DURING THE TWELVE MONTHS PRECEDING THE EVENT GIVING RISE TO THE CLAIM, AS SUCH AMOUNT SHALL SERVE AS A REASONABLE PROSPECTIVE ESTIMATE OF ANY DAMAGES WHICH YOU MAY SUFFER THROUGH ANY BREACH BY CRI OF THE TERMS OF THIS AGREEMENT, AS SUCH DAMAGES MAY BE SPECULATIVE OR IMPOSSIBLE TO CALCULATE. IF THERE ARE UNPAID FEES OWED TO CRI, THIS CUMULATIVE LIABILITY WILL BE REDUCED BY THE VALUE OF THE UNPAID FEES WITH NO ADDITIONAL INTEREST OR CHARGES, AS CRI RETAINS THE RIGHT TO OFFSET ANY SUMS CLAIMED AS DUE AND OWED BY YOU, BY ANY SUMS TO WHICH IT IS LEGALLY ENTITLED. THIS LIMITATION SHALL APPLY WHETHER OR NOT FURTHER DAMAGES ARE FORESEEABLE, OR WHETHER EITHER PARTY (OR ITS EMPLOYEES, AGENTS, OFFICERS OR DIRECTORS) HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Governing Law; Venue

This agreement and performance hereunder shall be governed by the laws of the State of Florida, without reference to any conflict of laws rules or principles. Any action or proceeding arising from or relating to this agreement must be brought in a state or federal court having jurisdiction in Manatee County, Florida, and each party irrevocably submits to the jurisdiction and venue of any such court in any such action or proceeding and agrees to waive any defenses to venue and jurisdiction including *forum non conveniens*.

Statute of Limitations

The parties agree that there shall be a one-year statute of limitation (from the delivery of the service or termination of the contract) for the filing of any requests for arbitration, lawsuit, or proceeding related to this agreement. If such a claim is filed more than one year, or the minimum durational period having been determined as permissible by applicable statutory law or by a court of competent jurisdiction, subsequent to the delivery of the service or termination of the contract, whichever occurs first in time, then it shall be precluded by this provision, regardless of whether or not the claim has accrued at that time.

Disclosure

We may, from time to time and depending on the circumstances, use third-party service providers in serving your account including service providers located outside of the United States. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your

DRAFT

information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. Furthermore, we will remain responsible for the work provided by any such third-party service providers. By signing this letter, you consent to allow us to disclose your financial information, if applicable, or other information to our service providers located abroad. If you want to limit the amount of information that may be disclosed to any third-party service provider, please notify us in writing as an attachment to this letter.

Electronic Data Communication and Storage and Use of Third Party Service Provider

In the interest of facilitating our services to your company, we may send data over the Internet, securely store electronic data via computer software applications hosted remotely on the Internet, or allow access to data through third-party vendors' secured portals or clouds. Electronic data that is confidential to your company may be transmitted or stored using these methods. We may use third-party service providers to store or transmit this data, such as, but not limited to, providers of tax return preparation software. In using these data communication and storage methods, our firm employs measures designed to maintain data security. We use reasonable efforts to keep such communications and data access secure in accordance with our obligations under applicable laws and professional standards. We also require our third-party vendors to do the same.

You recognize and accept that we have no control over, and shall not be responsible for, the unauthorized interception or breach of any communications or data once it has been sent or has been subject to unauthorized access, notwithstanding all reasonable security measures employed by us or our third-party vendors. You consent to our use of these electronic devices and applications and submission of confidential client information to third-party service providers during this engagement.

To enhance our services to you, we will use a combination of remote access, secure file transfer, virtual private network or other collaborative, virtual workspace or other online tools or environments. Access through any combination of these tools allows for on-demand and/or real-time collaboration across geographic boundaries and time zones and allows CRI and you to share data, engagement information, knowledge, and deliverables in a protected environment. In order to use certain of these tools and in addition to execution of this acknowledgement and engagement letter, you may be required to execute a separate client acknowledgement or agreement and agree to be bound by the terms, conditions and limitations of such agreement. You agree that CRI has no responsibility for the activities of its third-party vendors supplying these tools and agree to indemnify and hold CRI harmless with respect to any and all claims arising from or related to the operation of these tools. While we may back up your files to facilitate our services, you are solely responsible for the backup of your files and records; therefore, we recommend that you also maintain your own backup files of these records. In the event you suffer a loss of any files or records due to accident, inadvertent mistake, or Act of God, copies of which you have provided to us pursuant to this agreement, we shall not be responsible or obligated to provide you a copy of any such file or record which we may retain in our possession.

<u>Termination and Other Terms</u>

You agree that any claim arising out of this engagement letter shall be made within one year of the conclusion of our services, regardless of any longer period of time for commencing such claim as may be

DRAFT

set by law. Claim is understood to be a demand for money or services, the service of a suit, or the institution of arbitration proceedings against Carr, Riggs & Ingram LLC.

We reserve the right to withdraw from the engagement without completing our services for any reason, including, but not limited to, your failure to comply with the terms of this engagement letter or as we determine professional standards require.

Other Information

Lorri Kidder is the engagement partner and is responsible for supervising the engagement and signing the reports or authorizing another individual to sign them.

We understand that our reports are public information once issued and will be posted to your website - http://www.manateeschools.net/pages/SDMC. You must notify us before distributing a copy of our deliverable(s) directly to anyone other than a member of internal management, Audit Committee, or the School Board if the intended recipient will rely on deliverable(s) for regulatory, statutory or other contractual obligations of the District or Board. In addition, the deliverable(s) should be distributed in its complete form. If you distribute a copy of our deliverable to any person or entity other than internal management, Audit Committee, or the School Board directly without having first notified us of the distribution and purpose of the distribution; or distribute the deliverable(s) in less than its complete form, you hereby agree to indemnify and hold us harmless from and against any and all claims or causes of action for damages or loss against us by such person or entity as a result of said person's alleged reliance on said deliverable(s). Your obligation to indemnify includes, without limitation, the obligation to indemnify us for, and pay, all of the attorneys' fees and costs reasonably incurred by us in defending against such claims.

At the completion of our engagement, the original source documents will be returned to you. Work papers and other documents created by us are our property. Upon request by the District, such original work papers will be forwarded to you. Copies are not to be distributed without our prior written consent.

You may request that we perform additional services not contemplated by this engagement letter. If this occurs, we will communicate with you regarding the scope and estimated cost of these additional services. Engagements for additional services may necessitate that we amend this letter or issue a separate engagement letter or addendum to this engagement letter to reflect the obligations of both parties. In the absence of any other written communications from us documenting additional services, our services will be limited to and governed by the terms of this engagement letter.

If any portion of this engagement letter is deemed invalid or unenforceable, such a finding shall not invalidate the remainder of the terms set forth in this engagement letter.

DRAFT

Acceptance

We appreciate the opportunity to provide the internal audit services for the Board and believe this engagement letter accurately summarizes the significant terms of the engagement.

If you have any questions, please let us know.

If you decide to accept our engagement letter, please indicate your acceptance by signing in the space provided below and returning this engagement letter to us.

Very truly,

Carr, Riggs & Ingram, L.L.C.

AGENDA ITEM NO. 12.5

School Board of Manatee County
June 28, 2022 - Regular Board Meeting
Action Item

Title
Approval to Purchase Security and Vulnerability Testing Services from Sylint Group, Inc., SDMC No. 23-0055-RG, Not to Exceed $45,000.00 - *added June 23, 2022*

Executive Summary
The IT network enterprise environment is dynamic and evolves to meet the demands of operations. To ensure cyber security and risk tolerance are maintained at an acceptable level, the network should be periodically checked to align effort and risk, ensure processes and procedures are applicable and being followed, that architecture and updates keep pace with threat actors, and that additional vulnerabilities have not been incorporated into the enterprise network.

State Board Rule 6A-1.012(14) states, “A district school board, when acquiring, whether by purchase, lease, lease with option to purchase, rental or otherwise, information technology resources, as defined in Section 282.0041(11), Florida Statutes, may make any acquisition through the bid process as described herein or by direct negotiation and contract with a vendor or supplier, as best fits the needs of the school district as determined by the school board.”

Florida Statutes Section 1010.04(4) states, “Alternative procedures for purchasing – The State Board of Education may, by regulation, provide for alternative procedures for bidding or purchasing in cases in which the character of the item requested renders competitive bidding impractical.”

Subsection 6A-1.012(11) F.A.C. states, “The requirement for requesting competitive solicitations for commodities or contractual services from three or more sources is hereby waived as authorized by Section 1010.04(4)(a), F.S., for: (a) The purchase by district school boards of professional services which shall include, without limitation, artistic services; academic program reviews; lectures by individuals; auditing services not subject to Section 218.391, F.S.; legal services, including attorney, paralegal, expert witness, court reporting, appraisal or mediator services; and health services involving examination, diagnosis, treatment, prevention, medical consultation or administration; and, (b) The purchase by district school boards of educational services and any type of copyrighted materials including, without limitation, educational tests, textbooks, printed instructional materials, computer software, films, filmstrips, videotapes, dvds, disc or tape recordings, digital recordings, or similar audio-visual materials, and for library and reference books, and printed library cards where such materials are purchased directly from the producer or publisher, the owner of the copyright, an exclusive agent within the state, a governmental agency or a recognized educational institution;”

This item aligns with the District’s Strategic Plan Goal(s) which state(s):

Inclusive Culture & Engagement | Goal 1
Create a cultural commitment for improving service at all levels of the school district for internal and external customers.

Recommendation
Motion and approval to purchase security and vulnerability testing services from Sylint Group, Inc., SDMC No. 23-0055-RG, in an amount not to exceed $45,000.

Financial Impact
The funding source for this work is the General Fund and is included in the School Board's proposed budget for 2022-2023.

School Board of Manatee County

Statement of Work

The following Statement of Work (SoW) is proposed for services supporting School Board of Manatee County's (SBMC) ongoing security maturity and posture review and testing as it relates to the School District of Manatee County for the period of July 1, 2022 through June 30, 2023. Estimated costs, plus expenses, are provided and are thresholds for the work, based on information provided and expected time necessary. In the event additional requirements arise, based on information uncovered during any phase of this SoW proposal, the parties will be updated before performing additional work.

NIST Cybersecurity Framework Correlation and Testing

The IT network enterprise environment is dynamic and evolves to meet the demands of an organization's operations. To ensure cyber security and risk tolerance is maintained at an acceptable level, the network should be periodically checked to align effort and risk, ensure processes and procedures are applicable and being followed, that architecture and updates keep pace with threat actors, and that additional vulnerabilities have not been incorporated into the enterprise network.

Building on prior engagements, and in conjunction with ongoing audit functions conducted by CRI (internal audit), Sylint will conduct a set of tests based on the National Institute of Standards & Technology Cybersecurity Framework (NIST CSF) to review SDMC's security maturity, posture and ongoing alignment to known and projected threats. Tests and analyses incorporate ongoing work that SDMC engages in, including external and internal vulnerability scans, network and firewall analysis, identity and access management (IAM) audits and data backup verifications. Sylint expects to support further refinement of SDMC's internal process of tracking implementation and efficacy of system and device mitigation actions.

From this data, along with the results of the IT internal audit findings, issues and recommendations, Sylint will

- Build on the dialogue-based analysis from 2021-2022 and provide an updated Risk Analysis for NIST CSF Milestones 1, 2, 3, 4 & 5 incorporating SDMC improvements and threat landscape changes;
- Provide or update mitigation or remediation recommendations based on evolving threats and identified Risks;
- Update the associated validation mechanisms/tests to assist in measuring progress toward mitigation goals.
- Report to the School Board and/or Audit Committee on request in agreed formats

This work is expected to include:

- Conduct enterprise wide password audit to validate policy adherence and identify credentials requiring mitigation actions

- Conduct review of external and internal vulnerability scans to identify systems/devices that require mitigation actions
- Conduct testing & assess perimeter control devices (IDS/DLP) effectiveness
- Conduct testing & assess existing endpoint control effectiveness
- Assign measurable milestones for each milestone or recommendation
- Assign timelines for specific mitigation levels and testing methodology to validate adherence progress

Depending on the identified risks and status of various ongoing projects, Sylint work may also include:

- Attack simulation and response correlation to test Protection and Defense capabilities
- Risk-aligned Tactical and Strategic Tabletop exercises to test Response and Recovery capabilities

Estimated Time: 225 hours

Estimated Duration: 52 weeks

Estimated Cost: $45,000

The above is hereby accepted and agreed to by:
