C. The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

D. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

E. The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

F. The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

G. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

H. The contractor will include the portion of the sentence immediately preceding paragraph (A) and the provisions of paragraphs (A) through (H) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: Provided, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

# DRUG-FREE WORKPLACE

*Fill in Form*

**STATEMENT UNDER SECTION 287.087**
**FLORIDA STATUES**

**TO BE RETURNED WITH BIDDER**

Preference must be given to BIDDER submitting certification with their bid or proposal, certifying they have a drug-free workplace in accordance with the Florida Statutes, Section 287.087. This requirement affects all public entities of the State and became effective January 1, 1991.

Preference shall be given to businesses with drug-free workplace programs. Whenever two or more bids, proposals, or replies that are equal with respect to price, quality and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid, proposal, or reply received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing the bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the action that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).

4. **QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

The CONTRACTOR and Surety are bound to the CITY in the amount set forth above, for the payment of which the CONTRACTOR and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. Now, therefore, if the CITY shall accept the Bid of the CONTRACTOR and the CONTRACTOR shall enter into a Contract with the CITY in accordance with the terms of such Bid, and give such Public Construction, Performance and Payment Bond or Bonds as may be specified in the Bid or Contract Documents with good and sufficient surety acceptable to the CITY, and furnish insurance coverages to CITY as required by the Contract Documents then this obligation shall be null and void, otherwise Surety shall pay over to the CITY immediately the full penal sum of this Bid Bond upon demand. The Surety, for the value received, hereby stipulates and agrees that the obligations of said Surety shall not be impaired or affected in any way by any extensions of the time within which the CITY may accept the Bid of the CONTRACTOR and said Surety does hereby waive notice of any such extension.

Any changes in or under the contract documents, compliance or non-compliance with any formalities connected with the contract or the changes does not affect the surety's obligation under this bond. While the CONTRACTOR's allegation that its entering into the contract was prevented or frustrated by the CITY, does not affect the surety's continuing obligation to perform, a finding to such effect by a Trier of fact would affect the surety's continuing obligation.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – There's no color specify for the apparatus bay doors. The standard colors are gray and white. Do those doors need to be black as well?

**Response No. 1** – The doors should be white color.

**Question No. 2** – During the per bid meeting, it was mentioned that the base of design will not be rollup door for station 4. It would remain sectional Doors. Do you have a timeline on when an addendum will be issued to confirm this?"

**Response No. 2** – The company bidding can submit the panel doors that they have available for review.

**TO ALL PROSPECTIVE BIDDERS:**

The following items are issued to, add to, delete from, modify and clarify the Bid Documents. These items are hereby incorporated into the above referenced bid and shall have full force and effect as the Bid Documents. Bids submitted on the specified due date shall conform to the additions and revisions listed. Text in ~~strikethrough~~ have been deleted from the bid documents and text in underline has been added.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

G. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: Provided, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 – Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

## QUESTIONS AND ANSWERS

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1** – **Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6.**

**Question No. 2** - Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3 –** The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1** – **Station #4** is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on **Station #6**.

**Question No. 2 -** Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**Question No. 1** – There's no color specify for the apparatus bay doors. The standard colors are gray and white. Do those doors need to be black as well?

**Response No. 1** – The doors should be white color.

**Question No. 2** – During the per bid meeting, it was mentioned that the base of design will not be rollup door for station 4. It would remain sectional Doors. Do you have a timeline on when an addendum will be issued to confirm this?"

Bids submitted on the specified due date shall conform to the additions and revisions listed. Text in ~~strikethrough~~ have been deleted from the bid documents and text in underline has been added.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 –** Station #4 is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on Station #6.

**Question No. 2 -** Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

**TO BE RETURNED WITH BIDDER**

Preference must be given to BIDDER submitting certification with their bid or proposal, certifying they have a drug-free workplace in accordance with the Florida Statutes, Section 287.087. This requirement affects all public entities of the State and became effective January 1, 1991.

Preference shall be given to businesses with drug-free workplace programs. Whenever two or more bids, proposals, or replies that are equal with respect to price, quality and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid, proposal, or reply received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. 3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).

4. In the statement specified in subsection (1), notify the employees that as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any convictions of, or plea of guilty or nolo contendere to, any violations of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace, no later than five (5) days after such conviction.

5. Impose a sanction on, or require the satisfactory participation in, a drug abuse assistance or rehabilitation program if such is available in the employee's community, by an employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of the above measures.

# DRUG-FREE WORKPLACE

*Fill in Form*

**STATEMENT UNDER SECTION 287.087**
**FLORIDA STATUES**

**TO BE RETURNED WITH BIDDER**

Preference must be given to BIDDER submitting certification with their bid or proposal, certifying they have a drug-free workplace in accordance with the Florida Statutes, Section 287.087. This requirement affects all public entities of the State and became effective January 1, 1991.

Preference shall be given to businesses with drug-free workplace programs. Whenever two or more bids, proposals, or replies that are equal with respect to price, quality and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid, proposal, or reply received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing the bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the action that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).

4. In the statement specified in subsection (1), notify the employees that as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any convictions of, or plea of guilty or nolo contendere to, any violations of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace, no later than five (5) days after such conviction.

5. Impose a sanction on, or require the satisfactory participation in, a drug abuse assistance or rehabilitation program if such is available in the employee's community, by an employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of the above measures.

As the person authorized to sign this statement, I certify that this company complies with the above requirements.

**QUESTIONS AND ANSWERS**

**Question No. 1** – After Friday visit to **Station #4 and Station #6**, our Overhead door installer has some valid question. Please confirm if Stations have 3 phase power or not?"

Per specs > The motors require 208 single phase min.
But are typically 480 3 phase.

**Response No. 1 –** Station #4 is 600amp 120/240 single phase. This information is per the 40 years certification from the Electrical Engineer and drawings from the 2007 remodel. We will have to check on Station #6.

**Question No. 2 -** Please verify if the jambs are constructed out of "brick" or "concrete". The new Level E impact doors have a min psi/steel jamb requirement. Steel jambs may need to be added to meet a min jamb requirement for the new code doors. Should we add into total Proposal a cost for engineering and steel needs what to be added to meet the min requirements?

Then that also poses the issue of leaving the station open overnight if we cannot remove the door, get the steel work done and reinstall the door in the same day. This would make Fire Trucks to be parked on the outside of the station, while each jamb is being installed.

**Response No. 2** – Contractor should include in their proposal any and all work needed to complete the install to meet the current Essential Code requirements. The contractor should by all means necessary try to complete a door install by the end of business day. Should that not be possible, the contractor will be responsible for securing the Fire Station until the install is complete. The Apparatus parked outside the station is not a problem.

Plantation
the grass is greener

**Question No. 3** – The only Level E Impact doors are bifold or rolling steel. The rolling steel will need approx. 18" of headroom, where you have only 14" currently. Thus, the doors will hang in the opening approx 4-5". The doors won't clear the 12ft opening with the current headroom. They will sit about 4-5" in the opening."

**Response No. 3** – The Station has drop ceilings and the space above the ceilings should be utilized as we can't have the units dropping into the opening. The Contractor is also responsible for bringing the station back to the state in which it was found. This means any and all repairs directly related to the installation must be addressed before the final is given.

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☑ S corporation ☐ Partnership ☐ Trust/estate

**Note:** Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

**Note:** If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. **Future developments.** For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

## What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

**Before you begin.** For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Roof Painting By Hartzell dba Hartzell Painting

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☑ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . . .

**Note:** Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

*(Applies to accounts maintained outside the United States.)*

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

## Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

**Note:** If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

## Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

## General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

**Future developments.** For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

## What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

## Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

## Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and

4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. **Future developments.** For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

## What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

## Purpose of Form

## Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

**Note:** If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

## Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

**Future developments.** For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

## What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

## Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

G. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

H. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: Provided, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings
