AGENDA

CITY COUNCIL - REGULAR MEETING OF THE BANNING CITY COUNCIL
CITY OF BANNING, CALIFORNIA

July 9, 2024
5:00 p.m.
In Chambers

Council Chambers
99 E. Ramsey Street
Banning, CA 92220

The following information comprises the agenda for the regular meeting of the Banning City Council, a joint meeting of the City Council and Banning Utility Authority, and the Banning City Council sitting in its capacity as the Banning Successor Agency Board.

Per City Council Resolution 2016-44, matters taken up by the Council before 10 p.m. may be concluded, but no new matters shall be taken up except upon a unanimous vote of the council members present and voting. Such an extension shall only be valid for one hour and each hour thereafter shall require a renewed action for the meeting to continue.

6. CONSENT ITEMS

The following items have been recommended for approval and will be acted upon simultaneously, unless a member of the City Council/Banning Utility Authority/Successor Agency Board wishes to remove an item for separate consideration.

6.1 Approval of the Meeting Minutes for the June 25, 2024 City Council Meetings
Recommendation: Approve the minutes of the June 25, 2024 City Council Meetings.

6.2 Consideration of Resolution 2024-113, a Resolution of the City Council of the City of Banning, California, Setting Aside and Vacating its Previous Approval of Tentative Parcel Map No. 38164, Approval of Design Review 21-7008 and Denial of the Appeal of the Planning Commission's Approval of Design Review 21-7008, and Adoption of an Addendum, All in Connection with the Banning Point Project, Doing so in Compliance with the Peremptory Writ of Mandate that Requires the City Council to Set Aside and Vacate those Decisions, and Rescinding City Council Resolution 2022-14
Recommendation: Adopt Resolution 2024-113.

6.3 Consideration of Resolution 2024-115, Awarding a Citywide Professional Services Agreement for As Needed Public Relations and Community Outreach Consulting Services in the amount of $295,000 for Three (3) Year Agreement with DeGrave Communications Inc.
Recommendation: Adopt Resolution 2024-115.

6.4 Consideration of Resolution 2024-116, Approving the Award of Contract for Roadway and Storm Drain Asset Collection and Analysis with Roadway Asset Services of Austin, Texas for Fiscal Year 2024/2025 in the Amount of $302,082
Recommendation: Adopt Resolution 2024-116.

6.5 Consideration of Resolution 2024-117, Approving an Exclusive Negotiating Agreement with Investel Development LLC for City-Owned Real Property Located at 150 E. Ramsey Street, Banning (APNs 541-181-032, 541-181-033, 541-181-034, AND 541-181-035)
Recommendation: Adopt Resolution 2024-117.

6.6 Consider Resolution 2024-118, Rescinding its Adoption of Resolution 2024-66, and Approving an Office Lease with Riverside County on Behalf of the Emergency Management Department for Office Space within the Armory Located at 2041 W. Nicolet St. to be used by the Radio Amateur Emergency Service (RACES)
Recommendation: Adopt Resolution 2024-118.

6.7 Consideration of Resolution 2024-119, Awarding a Professional Services Agreement for the Design of Traffic Signal Hardware Upgrade at 17 Intersections to STC Traffic, Inc. in the amount of $74,760 and Approving a 10% Contingency for a Total Project Budget of "Not-to-Exceed" $82,236
Recommendation: Adopt Resolution 2024-119.

6.8 Consideration of Resolution 2024-120, Approving and Authorizing Submittal of California Emergency Management Agency Form to California Office of Emergency Services Form 130 Designating Personnel to Act As the Agent for the City When Seeking Financial Assistance After a Disaster
Recommendation: Adopt Resolution 2024-120.

6.9 Consideration of Resolution 2024-121, Approving a Deposit/Reimbursement Agreement with NP Banning Industrial, LLC
Recommendation: Approve Resolution 2024-121.

6.10 Consideration of Resolution 2024-122, Adopting Administrative Policy, Risk Management (RM) #6 - A Workplace Violence Prevention Plan
Recommendation: Adopt Resolution 2024-122.

6.11 Consideration of Resolution 2024-123, Approving the Line Extension Reimbursement Agreement Between the City of Banning and Robertson's Ready Mix, LTD
Recommendation: Adopt Resolution 2024-123.

6.12 Consideration of Resolution 2024-124, Awarding a Contract with Pinnacle Petroleum Inc. for Unleaded and Diesel Bulk Fuel Services in the Amount of $500,000
Recommendation: Adopt Resolution 2024-124.

6.13 Consideration of Resolution 2024-125, Approving A Successor Memorandum of Understandings with the Teamsters Local 1932, Representing the Association of Mid-Management and Professional Employees, Effective July 1, 2022, through June 30, 2024, and Authorizing the City Manager to Finalize and Execute a Successor Agreement
Recommendation: Adopt Resolution. 2024-125.

6.14 Consideration of Resolution 2024-06 UA, Adopting the City of Banning's Sanitary Sewer Management Plan
Recommendation: Adopt Resolution 2024-06 UA.

6.15 Second Reading and Adoption of Ordinance 1605, Amending Table 17.08.020 of Section 17.08.020 of Article I of Chapter 17.08 of Division II of Title 17 of the City of Banning Municipal Code to Clarify that Affordable Housing Uses are Permitted by Right and are not Subject to Discretionary Action in Specified Zoning Districts as Required by State Law; and Making a Determination of Exemption from the California Environmental Quality Act
Recommendation: Conduct second reading and adopt Ordinance 1605.

6.16 Accept as Complete Various Improvements Related to the Atwell Specific Plan Development and Authorize the 90% Bond Exoneration
Recommendation: City Council accept as complete various improvements related to the Atwell Specific Plan Development and authorize the 90% bond exoneration.

6.17 Butterfield Specific Plan Project ("Atwell") Annual Development Agreement Review for 2024
Recommendation: Receive and file the annual review of the Development Agreement for the Butterfield Specific Plan Project being developed by Tri Pointe Homes as the Atwell Master Planned Community, ensuring that the developer is proceeding in good faith and in accordance with Section 12.1 of the Development Agreement and Government Code Section 65865.1.

6.18 City Attorney Annual Consumer Price Index (CPI) Adjustment
Recommendation: A motion approving annual rate increase in excess of 3% for Legal Services Agreement with Richards, Watson & Gershon.

6.19 Consideration of Resolution 2024-126, Declaring the Intent of the City to be Reimbursed for

Certain Capital Expenditures from the Proceeds of Indebtedness
Recommendation: Approve Resolution 2024-126.

6.20 Consideration of Resolution 2024-127, Approving the purchase of a 2024 Chevrolet Silverado and All Needed Up Fitting Using PACT Funds in an Amount Not to Exceed $97,250.00
Recommendation: Adopt Resolution 2024-127.

7. PUBLIC HEARINGS

7.1 Consideration of Resolution 2024-114, (1) Approving Tentative Parcel Map No. 38164, Allowing the Subdivision of Approximately 47 Gross Acres of Vacant Land Into Three Parcels; (2) Affirming the Planning Commission's Approval of Design Review No. 21-7008 and Denying an Appeal of that Decision and Permitting the Construction of a Proposed 619,959 Square Foot Industrial Warehouse Building, including 10,000 Square Feet of Office Space and a Combined 34,000 Square Feet of Retail/Commercial Buildings, on Real Property Located within the Boundaries of the Sun Lakes Village North Specific Plan Area (APN: 419-140-057); and (3) Adopting an Addendum under the California Environmental Quality Act (CEQA) and Making Findings in Support Thereof, Including Findings of Consistency with the Certified Environmental Impact Report Prepared for Amendment No. 5 to the Sun Lakes Village North Specific Plan (SCH # 2020029074)
Recommendation: Adopt Resolution 2024-114.

8. REPORTS OF OFFICERS

9. DISCUSSION ITEMS

10. ITEMS FOR FUTURE AGENDAS

10.1 NEW ITEMS
10.2 EXISTING ITEMS

1. Grow Banning (Sanchez)

Next Regular Meeting – August 27, 2024

AFFIDAVIT • DECLARACIÓN JURADA

IT IS HEREBY CERTIFIED under the laws of the State of California that the above agenda was posted on the City's website (www.banningca.gov) as well as the Bulletin Board at Banning City Hall, located at 99 E Ramsey Street, Banning, CA 92220, at least 72 hours in advance of the meeting.

Caroline Patton, Administrative City Clerk

PUBLIC NOTICE • NOTICIA PÚBLICA

Meeting Agendas and Notices

Interested in receiving email and/or text notifications of upcoming City Council meetings? Sign up for meeting notifications through the City's website. Pursuant to amended Government Code §54957.5(b), staff reports and other public records related to open session agenda items are available on the City's website (www.banningca.gov/).

Public Comment

Agenda Items

Any member of the public may address this meeting of the City Council on any item appearing on the agenda. A five-minute limitation shall apply to each member of the public and no member of the public shall be permitted to share their time with any other person.

Non-Agenda Items

Any member of the public may address this meeting of the City Council on any item which does not appear on the regular meeting agenda but is of interest to the general public and is an item upon which the City Council may act. A three-minute limitation shall apply to each member of the public and no member shall be permitted to share their time with any other person. No action shall be taken, nor discussion held by the City Council, on any item which does not appear on the agenda, unless the action is otherwise authorized in accordance with the provisions of subdivision (b) of §54954.2 of the Government Code.

Special Assistance/Accessibility Requests

In compliance with the Americans with Disabilities Act, any member of the public may request that the agenda and agenda packet be mailed to them. If you need special assistance to participate in this meeting (such as translation services), please contact the City Clerk's Office. Advanced notification of at least 48 hours prior to the meeting will allow the city to make arrangements to ensure your accessibility.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Ralph Wright, Parks and Recreation Director**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Proclamation - Parks and Recreation Month**

RECOMMENDATION:
Proclaim July 2024 as Parks and Recreation Month

BACKGROUND:
Proclaim July 2024 as Parks and Recreation Month

JUSTIFICATION:
N/A

FISCAL IMPACT:
None

ALTERNATIVES:
N/A

ATTACHMENTS:
1. Proclamation - Parks and Rec Month.docx

CITY OF BANNING
OFFICE OF THE MAYOR

Proclamation

WHEREAS *parks and recreation programs are an integral part of communities throughout this country, including the City of Banning; and*

WHEREAS *parks and recreation services are vitally important to establishing and maintaining the quality of life in our communities, ensuring the health of all citizens, and contributing to the economic and environmental well-being of a community and region; and*

WHEREAS *parks and recreation programs build healthy, active communities that aid in the prevention of chronic disease, provide therapeutic recreation services for those who are mentally or physically disabled, and also improve the mental and emotional health of all citizens; and*

WHEREAS *parks and recreation programs increase a community's economic prosperity through increased property values, expansion of the local tax base, increased tourism, the attraction and retention of businesses, and crime reduction; and*

WHEREAS *parks and recreation areas are fundamental to the environmental well-being of our community and the City of Banning offers a variety of parks and recreation opportunities designed for all ages and interests, including popular special events, recreation, athletic programs, and Senior Services; and*

WHEREAS *the City of Banning Parks and Recreation has planned activities in July such as a July 4th Celebration, Day Camps, Learn to Swim programs, Dive in Movies, a Youth Soccer Clinic, Classes and much more; and*

WHEREAS *the U.S. House of Representatives has designated July as Parks and Recreation Month; and*

WHEREAS *the City of Banning recognizes the benefits derived from parks and recreation resources.*

NOW THEREFORE*, the City of Banning City Council do hereby proclaim:*

Parks and Recreation Month
July 2024

in the City of Banning and encourage the citizens of our community to join us in this special observance.

BE IT PROCLAIMED *this 9th day of July 2024.*

Alberto Sanchez, Mayor

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Caroline Patton, Administrative City Clerk** **Doug Schulze, City Manager**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Designation of Voting Delegate and Alternate for the 2024 League of California Cities (Cal Cities) Annual Conference**

RECOMMENDATION:

Staff respectfully recommend City Council appoint a single voting delegate and alternate for the 2024 League of California Cities ("Cal Cities") Annual Conference.

BACKGROUND:

This year's LOCC annual conference and expo is scheduled for October 16-18, 2024 in Long Beach, CA. At the conference, league members participate in an Annual Business Meeting where they consider and act on matters that establish LOCC policy. In order for the City to vote at the meeting, the City Council must designate a voting delegate and an alternate who are authorized to cast a vote for the City of Banning.

JUSTIFICATION:

The voting delegate and alternate chosen must be registered to attend the conference on Friday, October 18th. To cast their vote, the delegate must be present (in person) and in possession of the voting delegate card. If for some reason the delegate and alternate are unable to attend, the voting card cannot be transferred, and the City will not be able to vote.

FISCAL IMPACT:

The only fiscal impact of these appointments is the associated cost of travel to the Conference.

ALTERNATIVES:

Do not appoint a voting delegate, resulting in the City losing its vote at the Annual Conference.

Annual Conference and Expo

October 16-18, 2024

Long Beach Convention Center

300 E Ocean Blvd, Long Beach, CA

Register (https://my.calcities.org/Events/Calendar-Of-Events/Meeting-Home-Page?meetingid=%7BE886DAA3-7AB5-EE11-A569-000D3A19AAEA%7D)

The League of California Cities is excited to announce that registration is now open for the **2024 Annual Conference and Expo** at the Long Beach Convention Center, Oct. 16-18!

The conference will feature speakers and timely presentations on key topics for local leaders, plus numerous opportunities for peer-to-peer sharing with other California city officials.

Our popular Expo Hall, filled with new and familiar faces, will be brimming with opportunities to engage with organizations that provide services to cities. For

questions about this year's Expo, including how to reserve a booth space, please visit the **Expo webpage (/expos)** .

Importantly, Cal Cities convenes a member-driven **General Assembly and Resolutions process (/advocacy/resolutions-and-the-general-assembly)** every year at the conference. This is a unique opportunity to engage all members on a range of significant policy issues to protect local control.

For questions about conference registration, please contact our conference registrar, **Megan Dunn (mailto:mdunn@calcities.org)** . For all other questions, please contact Senior Manager, Education and Events **Christina George (mailto:cgeorge@calcities.org)** .

Become an Exhibitor (https://www.cacities.org/2024ACExpo)

Become a Sponsor (https://my.calcities.org/Events/Sponsorships/Product-Details?productid=%7B43851511-FBF8-EE11-A1FD-7C1E521C55FC%7D)

Please review our event and meeting policies. (/education-and-events/event-and-meeting-policies-26201#0)

2024 Conference Information

Registration →

Full registration includes

- Admission to general and concurrent sessions and the expo
- Wednesday host city reception
- Admission to CitiPAC and diversity caucus receptions
- Electronic access to all program materials

Pre-registration deadline
Online registration ends Friday, Oct. 4. After this date, please register on-site if space allows.

Registration Process:

Complete registration directly through your MyCalCities account. If you have not yet used your MyCalCities account, please review **details about the portal (/about-MyCalCities)** and contact us with questions.

If you are registering someone other than yourself, first sign in as yourself and then choose the option to register someone else.

Note: Registrations through MyCalCities are available for credit card payments only. If you need to pay with a check, create your account and then reach out to Conference Registrar **Megan Dunn (mailto:mdunn@calcities.org)** to request a mail-in registration form. Full payment is due at the time of registration. We do not invoice for registrations.

Conference registration is required for all conference activities, including department, division, and caucus meetings as well as the General Assembly. Sharing of registration is prohibited.

To request an accommodation or for inquiries about accessibility, please contact conference registrar **Megan Dunn (mailto:mdunn@calcities.org)** . Every effort will be made to honor requests submitted.

Full Conference Registration Fees

*Save $50 on the published full conference registration fees if you register by Thursday, July 18.

Member-City Official	$700
Non-Member City Official	$1,700
Other Public Official	$775
All Others	$875

One-Day Registration Fees

Member-City Official	$350
Non-Member City Official	$1,350
Other Public Official	$400
All Others	$450

Add-On Registration Fees

Guest Reception Pass $125

NOTE: The guest/spouse fee is restricted to persons who are not city or public officials, are not a Cal Cities Partner or exhibitor, and would have no professional reason to attend the conference. It includes access to Wednesday's host city reception, the Expo Floor, and CitiPAC Reception. Meals are NOT included. There is no refund for the cancellation of a guest/spouse registration. It is not advisable to use city funds to register a guest/spouse.

City Clerks Workshop Registration Fees

(The City Clerks Workshop is not included in Full Conference or One-Day Registration. Lunch is included.)

Member-City Official	$175
Non-Member City Official	$350

Refund Policy

Advance registrants unable to attend will receive a refund of the rate paid, minus a $75 processing charge, only when a written request is submitted to **Megan Dunn (mailto:mdunn@calcities.org)** , and received on or before Oct. 4. Refunds will not be available after this date. If you are unable to attend, you may substitute a colleague for your entire registration.

Hotel and Travel →

A limited number of hotel rooms are available at reduced rates for registered attendees and exhibitors at the 2024 Annual Conference and Expo. **The deadline to reserve your discounted hotel room is Friday, Sept. 20,** or until the hotel block is sold out – whichever happens first.

STEP ONE: Register for the conference

Registration can be completed through your **MyCalCities account (https://my.calcities.org/Security/Sign-In?returnurl=%2fmy-account%2fmy-profile)** .

*Instructions on how to access your account can be found at **this link** (/about-MyCalCities) .*

STEP TWO: Book a hotel room

Once you've registered, you will receive a confirmation email with a link to the hotel reservations page where you can access discounted hotel room rates and manage your reservations, including modifications and cancellations. Hotels are quickly selling out; we recommend checking the portal often for openings or booking with your favorite hotel brand at the market rate.

You must be registered for the conference prior to booking a hotel room in the Cal Cities block. Rooms not associated with registered conference attendees, exhibitors, speakers or sponsors will be canceled.

Do not make a hotel reservation unless you are sure it is needed. Your city/company will be financially responsible for all cancellation/attrition fees.

Scam Notice: Scammers may contact you claiming to be the housing bureau/service for the conference. Cal Cities has contracted with LiveCon as the official housing bureau/service for the 2024 Annual Conference and Expo. Official emails regarding the conference will come from addresses ending in @calcities.org or @live-con.com, or the actual hotel. Neither party will call you directly without prior communication.

Parking and Transportation

In addition to the main parking lot along Shoreline Drive, the convention center has three parking garages: Terrace Theater, Arena, and Promenade. Convention center garages can be accessed from Linden Avenue. Please visit **Long Beach Convention Center (https://www.longbeachcc.com/directions-parking/)** for additional information. Parking prices are subject to change without notice.

Public transportation is easily accessible and includes the **Metro Blue Line (https://www.metro.net/riding/schedules/?line=801)** , Los Angeles County's light rail system, and **Long Beach Transit (https://ridelbt.com/)** , the city's public transportation services available both on land and water.

Nearby airports:

Long Beach Airport (LGB): 10 miles
Los Angeles International Airport (LAX): 22 miles
John Wayne Airport (SNA): 30 miles

The following information comprises the minutes for a regular meeting of the City Council, a joint meeting of the Banning City Council and Banning Utility Authority and a joint meeting of the Banning City Council and the Banning City Council sitting in its capacity as the Successor Agency Board.

MINUTES **6/25/2024**
CITY COUNCIL **REGULAR MEETING**

COUNCIL MEMBERS PRESENT: Council Member Sheri Flynn
Council Member David Happe
Mayor Pro Tem Minjares
Mayor Alberto Sanchez
Council Member Colleen Wallace

COUNCIL MEMBERS ABSENT: None

OTHERS PRESENT: Doug Schulze, City Manager
Laurie Sampson, Assistant City Manager/Acting City Clerk
Serita Young, City Attorney
Art Vela, Director of Public Works
Lincoln Bogard, Administrative Services Director
Nate Smith, Deputy Director of Public Works
Ralph Wright, Parks and Recreation Director
Emery Papp, Senior Planner

1. CALL TO ORDER

Mayor Sanchez called the regular meeting to order at 5:46 p.m.

1.1. Invocation – Reverend Preston Norman of Praise Tabernacle Church led the invocation.

1.2. Pledge of Allegiance

1.3. Roll Call

COUNCIL MEMBER	PRESENT	ABSENT
Flynn, Sheri	✕	
Happe, David	✕	
Minjares, Rick	✕	
Sanchez, Alberto	✕	
Wallace, Colleen	✕	

2. AGENDA APPROVAL

2.1. Approve Agenda

Motion to approve the agenda.

Motion by Council Member Wallace

Seconded by Council Member Flynn

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

3. PRESENTATIONS

None

4. REPORT ON CLOSED SESSION

Serita Young, City Attorney reported that there was discussion and direction provided to staff, with no final nor reportable action.

5. PUBLIC COMMENTS, CORRESPONDENCE, APPOINTMENTS, CITY COUNCIL COMMITTEE REPORTS, CITY MANAGER REPORT, AND CITY ATTORNEY REPORT

5.1. PUBLIC COMMENTS

The following individuals addressed City Council during Public Comment:

- Inge Schuler
- Lynnea Hagen
- Bill Hobbs
- Jack Gunderson
- Frances Rodriguez
- Stuart MacKenzie
- Cindy Barrington

5.2. CORRESPONDENCE

None

5.3. APPOINTMENTS

None

5.4. CITY COUNCIL COMMITTEE REPORTS

Council Member Wallace reported on a California League of Cities (CalCities) Transportation, Communication, and Public Works Committee meeting related to broadband. She also shared about a recent Juneteenth event she attended.

Mayor Pro Tem Minjares reported on a Cannabis Ad Hoc Committee meeting as well as the Animal Services Ad Hoc Committee.

Council Member Flynn reported on a Western Riverside Council of Governments (WRCOG) General Assembly address and meeting she attended at Pechanga Resort Casino.

Council Member Happe reported on a Riverside County Transportation Commission (RCTC) meeting he attended.

Mayor Sanchez reported on a meeting of the Cannabis Ad Hoc Committee.

5.5. CITY MANAGER REPORT
City Manager Schulze reported on the City's upcoming Fourth of July event. He also updated the City Council on the sale of the 33 S. San Gorgonio Avenue property as well as the status of the Exclusive Negotiating Agreement (ENA) with Investel Development LLC related to the property at 150 E. Ramsey Street.

5.6. CITY ATTORNEY REPORT
City Attorney Young had no report.

5.7. CITY TREASURER REPORT
See below.

6. CONSENT AGENDA

6.1 Approval of the Meeting Minutes for the June 11, 2024 City Council Meetings
6.2 Receive and File Accounts Payable and Payroll Warrants Issued in the Month of May 2024
6.3 Receive and File Cash and Investments Report for the Month of May 2024
6.4 Receipts, Disbursements, & Fund Balances Reporting for Fiscal Year 2023-24, Period 11, May 2024
6.5 Receive and File Police Department Statistics for the Month of May 2024
6.6 Receive and File Fire Protection Services Statistics for the Month of May 2024
6.7 Public Works Capital Improvement Project Tracking List
6.8 Receive and File Code Enforcement Update and Statistics for the Months of April & May 2024
6.9 Receive and File Contracts Approved Under the City Manager's Signature Authority and Inventory Reports
6.10 City Council Travel and Conference Expense Report Year to Date May 31, 2024
6.11 Consideration of Resolution 2024-95, Consolidated Approval of Software-as-a-Service Projects Utilized Citywide
6.12 Consideration of Resolution 2024-96, Approving Towing Services Agreements Used for the Police Department and Code Enforcement Services
6.13 Consideration of Resolution 2024-97, Adopting the Local Hazard Mitigation Plan (LHMP) as required by the Federal Disaster Mitigation and Cost Reduction Act of 2000
6.14 Consideration of Resolution 2024-98, Adopting Regulations for Candidates for Elective Office Pertaining to the Electorate and the Costs Thereof for the General Municipal Election to be Held in the City on Tuesday, November 5, 2024
6.15 Consideration of Resolution 2024-99, Approving Amendment No. 1 to the Services Agreement with Yunex, LLC., in the Amount of $25,000 for FY 2024/2025 Citywide Traffic Signal Maintenance Services
6.16 Consideration of Resolution 2024-100, Awarding a Professional Services Agreement for Supervisory Control and Data Acquisition System Maintenance and Advisory Services to Tetra Tech, Inc. in the amount of $205,000

6.17 Consideration of Resolution 2024-101, Approving the Use of the Public Utility Exceptions for Informal Procurements Under Article 2, Section 3-105, Note 7 of the City's Purchasing Policy No. B-30, for Fiscal Year 2024- 25 for the Purchase of Certain Supplies, Materials and Equipment for the City's Public Utility Departments

6.18 Consideration of Resolution 2024-102, Approving a Cooperative Agreement Between the City of Banning, the City of Beaumont, and the County of Riverside to Share the Cost of a Fire Engine Company

6.19 Consideration of Resolution 2024-103, Awarding a Professional Services Agreement to Engineering Solutions Services, Inc. for Grants Services

6.20 Consideration of Resolution 2024- 104, Amendment No. 4 to a Professional Services Agreement (C00608) with Willdan Engineering, Inc. for Building and Safety Plan Check and Plans Examination Services; Landscape Design Plan Check and Plans Examination Services; and Building Permit and Landscape Installation Inspection Services

6.21 Consideration of Resolution 2024-111, Adopting the Banning Active Transportation Plan (ATP)

Public Comment
None

Motion to adopt consent agenda items 6.1 to 6.10, 6.12 to 6.13, 6.15 to 6.16, and 6.21.

Motion by Council Member Wallace
Seconded by Council Member Happe

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

6.11 Consideration of Resolution 2024-95, Consolidated Approval of Software-as-a-Service Projects Utilized Citywide

Lincoln Bogard, Administrative Services Director, answered questions from City Council related to the staff report.

Public Comment
None

Motion to adopt Resolution 2024-95.

Motion by Council Member Wallace
Seconded by Mayor Pro Tem Minjares

Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

6.19 Consideration of Resolution 2024-103, Awarding a Professional Services Agreement to Engineering Solutions Services, Inc. for Grants Services

Doug Schulze, City Manager, answered questions from City Council related to the staff report.

Public Comment
None

Motion to adopt Resolution 2024-103.

Motion by Mayor Pro Tem Minjares
Seconded by Council Member Flynn

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

6.20 Consideration of Resolution 2024-104, Amendment No. 4 to a Professional Services Agreement (C00608) with Willdan Engineering, Inc. for Building and Safety Plan Check and Plans Examination Services; Landscape Design Plan Check and Plans Examination Services; and Building Permit and Landscape Installation Inspection Services

Emery Papp, Senior Planner, answered questions from City Council related to the staff report.

Public Comment
None

Motion to adopt Resolution 2024-104.

Motion by Mayor Pro Tem Minjares
Seconded by Council Member Wallace

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

7. PUBLIC HEARING(S)

7.1 Public Hearing and Consideration of Resolution 2024-105, Approving a Report in Connection with the Proposed Collection on the 2024/2025 Riverside County Property Tax Roll of Delinquent Solid Waste Service Charges for Single-Family and Multi-Family Dwelling Accounts and Making a Determination of Exemption under CEQA

Art Vela, Director of Public Works, presented the staff report.

Public Comments
- Cindy Barrington
- Harry Sullivan
- Richard Royce
- Frank Connolly

Motion to adopt Resolution 2024-105.

Motion by Mayor Pro Tem Minjares
Seconded by Mayor Sanchez

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David		✕			
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 4-1.

Mayor Sanchez announced a recess at 7:18 p.m. The meeting was reconvened at 7:38 p.m.

5.7. CITY TREASURER REPORT
Treasurer Geronimo reported on the recent Budget and Finance Committee meeting. He said the Committee would not meet in July or August and the meetings would resume in September.

7.2 Public Hearing and Consideration of Resolution 2024-106, Adopting the City of Banning Electric Utility 2024 Wildfire Mitigation Plan

Brandon Robinson, Electrical Engineering Supervisor, presented the staff report.

Public Comments
- Kevin Walton (not in support or opposition)

Motion to adopt Resolution 2024-106.

Motion by Council Member Wallace
Seconded by Council Member Happe

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

7.3 Consideration of Zoning Text Amendment (ZTA 24-0050) and First Reading of Ordinance 1605, Amending Table 17.08.020 of Section 17.08.020 of Article I of Chapter 17.08 of Division II of Title 17 of the City of Banning Municipal Code to Clarify that Affordable Housing Uses are Permitted by Right and are not Subject to Discretionary Action in Specified Zoning Districts as Required by State Law; and Making a Determination of Exemption from the California Environmental Quality Act

Emery Papp, Senior Planner, presented the staff report.

Public Comments

- Richard Royce spoke in opposition.

Motion to introduce and waive further reading of Ordinance 1605.

Motion by Mayor Sanchez
Seconded by Council Member Happe

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri		✕			
Happe, David	✕				
Minjares, Rick		✕			
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 3-2.

7.4 Consideration of Resolution 2024-112, Making a Determination Under State CEQA Guidelines Sections 15070 Through 15074 That the Project Is Not Exempt From Review Under CEQA and an Initial Study and Mitigated Negative Declaration (EA 23-1506) for the Project Has Been Prepared in Consideration of a General Plan Amendment (GPA 23-2502), Changing the Existing Land Use Designation of Parcel Number 540-180-022 From General Commercial (GC) to Industrial (I); Zone Change (ZC 23-3502), Amending the Zoning District Classification of Parcel Number 540-180- 022 From General Commercial (GC) to Industrial (I); Tentative Parcel Map (TPM 38659) to Consolidate Three Parcels Into One; And Design Review (DR 23-7008), a Proposal to Allow for the New Construction and Operation of a Steel Distribution Facility With a 42,510 Square-foot Warehouse Building of Which 3,434 Square Feet Is Designated for Office Space on 14.92 Gross Acres of Land Located on the North Side of West Lincoln Street Between South 8th Street and South 16th Street (APN Nos. 540-180-020, 540-180-022 and 540-180-026)

Emery Papp, Senior Planner, presented the staff report.

Kelly Ribuffo appeared on behalf of the applicant.

Public Comments

- Frank Connolly spoke in support.

Kelly Ribuffo again spoke on behalf of the applicant.

Motion to adopt Resolution 2024-112 with: (1) modification to COA No. 6 as presented by staff, (2) adding a COA requiring box tree sizes along the project frontage subject to approval by City's landscape consultant, (3) modification to COA No. 126 to require City inspections of BMPs at developer's cost every 3 years, and (4) adding a COA requiring developer to work with staff to

determine whether undulation can be added to frontage wall along Lincoln every 50'.

Motion by Council Member Wallace
Seconded by Mayor Sanchez

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri		✕			
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 4-1.

8. REPORTS OF OFFICERS

8.1 Consider Pledging $50,000 per Year to Blue Zones Activate Banning Beginning 7/1/2025 for a Period of Three (3) Years

Doug Schulze, City Manager, presented the staff report.

Public Comments
None

Motion to pledge $50,000 per year to Blue Zones Activate Banning beginning 7/1/2025 for a period of three (3) years.

Motion by Council Member Wallace
Seconded by Council Member Happe

Motion to continue the meeting past 10:00 p.m. for one hour.

Motion by Mayor Pro Tem Minjares
Motion withdrawn.

Motion to continue the meeting past 10:00 p.m. to hear Agenda Item 8.4 only and table Agenda Item 9.1 to the next regular meeting.

Motion by Council Member Flynn
Motion withdrawn.

Motion to continue the meeting past 10:00 p.m. for one hour.

Motion by Mayor Sanchez
Seconded by Mayor Pro Tem Minjares

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

8.4 Consideration of Resolutions 2024-109, 2024-110, 2024-04 SA, and 2024-05 UA, Approving the Citywide Biennial Fiscal Year 2024- 25 and Fiscal Year 2025-26 Budgets

Lincoln Bogard, Administrative Services Director, presented the staff report.

Public Comments
None

Motion to adopt Resolutions 2024-109, 2024-110, 2024-04 SA, and 2024-05 UA.

Motion by Mayor Sanchez
Seconded by Mayor Pro Tem Minjares

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT
Flynn, Sheri	✕				
Happe, David	✕				
Minjares, Rick	✕				
Sanchez, Alberto	✕				
Wallace, Colleen	✕				

Motion approved by a vote of 5-0.

9. DISCUSSION ITEM(S)

9.1 Discussion Regarding the Lowering of the Banning Financing Authority's Outstanding Electric System Revenue Bond Rating and Consideration of an Interim Electric Rate Adjustment

Art Vela, Director of Public Works, presented the staff report.

Public Comments
None

10. ITEMS FOR FUTURE AGENDAS

10.1. New Items

1. Plot Map for Warehouses in the City - Current and Planned Locations (Flynn)

10.2. Pending Items:

1. Grow Banning (Sanchez)
2. Neighborhood Groups/Identities (Minjares)
3. Update on Community Garden (Flynn)
4. Zencity Contract (Flynn)
5. Zoom Options for Public Meetings (Flynn)
6. ~~Update on 150 E Ramsey Street Exclusive Negotiation Agreement (Flynn)~~
7. ~~Update on 33 S San Gorgonio Ave Purchase and Sale Agreement (Flynn)~~
8. Developer Presentation on Sunset Crossroads Project (Flynn)
9. City Manager Evaluation (Flynn)
10. Closed Session: Information Given to the Council on Lawsuit against the City (Flynn)
11. All Active Lawsuits against the City (Flynn)

JUNE 25, 2024

BANNING ANIMAL SHELTER

Blast from Joan Marie Patsky, Beaumont, CA – all rights whatsoever strictly reserved.

This is a pleading on behalf of the Banning Animal Shelter, California serving the San Gorgonio Pass (SGPA) area that the shelter remain open to the public after June 30, 2024. The shelter's No-Kill policy of sheltering abandoned and surrendered cats and dogs until the animals are adopted is a massive step forward in both humane animal care for any shelter nationwide as well as raising the national conscience to respect life!

Of course there are exceptions to the policy due to pet health deterioration. Circumstances of irreversible aggressive animal behavior from cruel abuse are addressed by the proper legal authority.

After learning of the shelter closure possibility, I had a lengthy onsite visit and discussion with Amber Schlieder of the shelter's No-Kill, A.R.E. Rescue & Adoption Service – her eyes shine with love for the animals under her care. Amber's contact info is: www.arerescue.org

Can you imagine what the animals want the public to know? Let's listen in at how the imaginary kennel boss disciplines the pet kennel population.

"Hear ye, Hear ye, ears up and listening carefully. We know that our shelter is in a flood zone but there does not appear to be imminent danger of flooding unless we learn the city council has approved construction of a pet ark. Nevertheless, keep hoping for a generous grant to fund a state of the art safe No-Kill pet shelter to serve the local community.

Remember, we must put our best paws forward and quickly prepare for adoptive pet parents. All cats are hereby ordered to visit a litterbox of their choice – be sure to clean your paws as the shelter volunteers have just cleaned the floors. For you canines – so sorry there are no doggy litter boxes, but you canines have to do the best you can with the supplies generously contributed by the kind people who care for our welfare.

Any constipated felines or canines, please raise your paw – we will try our best to assist you with a leash and collar walking exercise by some kind volunteer high school student who may be registered in an academic credit community volunteer program or some other nice volunteer - maybe from a community rehab program.

Please do not lose faith in people, my friends - some of you canines or felines may witness a pre-election candidate forum where you can woof or meow approval of any political candidate you deem to be fit for office, but be cautioned as some of the candidates may be tall tale story tellers – so watch carefully for candidate noses that grow longer the longer the candidate talks and be especially alert for any judicial candidates – they can exercise judicial power that can uphold or twist the respected laws of the United States Constitution. You cats and dogs with artistic paws – be sure to draw pitchforks or broomsticks on any candidates pretending to love America.

Many veterans and military families made deep sacrifices to preserve a government of the people, by the people and for the people – just look at the Veterans of Foreign Wars calendar respecting significant historical June commemorations - Post-9/11 GI Bill signed into Law (2008); Juneteenth (Federal Holiday approved 2021); Flag Day (1949 Congress); Pledge of Allegiance (Congress 1942); D-Day honoring Normandy Allied superhero bravery - a victory for God and Mankind (1944) and worthy of deep perpetual respect on any American calendar.

It's important to respect the Military, law and order, and preserve America as one nation under God, – we don't want the Creator mad enough to tilt the earth's axis – that would be a terrible waste of dog biscuits, scholarships and bible studies with a bible in one hand and a reputable bible dictionary in the other – we want to keep that Christian convert who repented from crack drug addict to legitimate businessperson here on planet earth - some scoffers scoff the convert as believing in Christian fairy tales – can you believe such ignorance! Not I, and that's my prayer as a Saint Bernard begging people to understand that we want to live in a home of love and kindness."

Attend the Banning City Council Special Meeting at City Hall on behalf of the Banning Animal Shelter – Tuesday, June 25, 4pm if you can.

If you can - Adopt with Care! Adopt with Love! Adopt for Life!

It's very good to live in a land where you have a choice to pin this political beatitude on Jesus believed to have baptized the message with holy water!

Exhibit B

City of Banning Electric Utility Wildfire Mitigation Plan

2024 Update

CPUC Fire Threat Map

- 2016: SB 1028 signed, requiring POU's to identify and mitigate wildfires where OH lines pose a significant risk
- 2018: Statewide Fire Threat Map created (pictured)
  - Tier 1: Low or No Risk – 95%
  - Tier 2: Elevated Risk – 3%
  - Tier 3: Extreme Risk – 2%

Requirements of WMP

SB 1028

1) Accounting of Responsibilities
2) Objectives of the Plan
3) Description of preventive strategies and programs adopted
4) Description of metrics to evaluate performance
5) Discussion on application of previous metrics
6) Monitoring, audit, identification of deficiencies, inspections
7) Other info for Wildfire Safety Advisory Board (WSAB)

Requirements of WMP

AB 1054

- "Construct , maintain, and operate in a manner to reduce wildfire risk"
- Develop means to mitigate impacts and potential damage

California Wildfire Safety Advisory Board (WSAB)

WSAB Role 2020-2024

- Assume an independent advisory (not regulatory) role
- Advise CPUC of safety and mitigation performance
- Assess safety culture of POU
- Objective: Evaluate WMP and provide an advisory opinion for future plan

WSAB Role 2025 and beyond

- Collaborative approach to improve POU reporting
- POU and Joint Association (CMUA, SCPPA, etc) participation in workshops

BEU WMP Objectives

- Protect public safety while continuing to provide reliable and sustainable power
- Reduction of BEU infrastructure risk potential
- Harden system against wildfires
- Coordination with emergency management personnel
- Reduce wildfire impacts on customers
- Communicate how to prevent, prepare and mitigate
- Evaluation and monitoring year-round due to dry conditions

Safety Risks – Cause of Outages

1. Equipment deterioration or failure
2. Vegetation
3. Vehicle damage
4. Weather
5. Vandalism
6. Animal contact
7. Mylar balloons

Wildfires caused by BEU power lines: 0

Current Mitigation Efforts

Mitigation efforts completed/started during this plan period:

- Vegetation management (clearing) around 164 utility poles
- Completed UG conversion on Westward Ave in East Banning
- Completed design for line hardening in two Tier 2 areas
- Continued annual inspection in HFTZ
- Began design for Sun Lakes Blvd line hardening

Action Plan for Tier 3 Areas

Location	Fire Threat Tier	Electric Assets	Risk Description	Targeted Action/s	Timeframe
Banning Canyon	3	12.47kv OH distribution - 3 miles	Single-circuit overhead line feeds 8 water distribution wells needed for fresh water and fire protection	Joint project with SCE to harden the line which will include covered conductor, avian protection, fire-retardant wrap at base of poles, and 12.47kV recloser near base of the canyon.	Construction schedule is currently unknown. Coordination with SCE on shared cost will be required. Due to budget constraints, construction activity will fall into BEU's 10-yr Capital Improvement Plan to be completed during FY 24/25. Additional information will be provided in a future WMP update.
Mias Canyon	3	BEU provides OH 12.47kv and 7.2kv through Mias Canyon to 14 SCE customers	No disconnect device (recloser) exists to disconnect power to SCE customers in case of fire emergency. Operating procedures with SCE have not been established. Coordination prior to construction will be required.	Install temporary in-line stick operated disconnects. Develop engineering estimate for line upgrade and reclosers Increase monitoring and limit fuels	Design is currently complete. Application for grant funding thru FEMA is complete and awaiting decision on award. Grant funding thru Prepare CA match has been approved as of November 2022. Construction to begin after award of FEMA grant funds, tentatively scheduled to begin FY 24/25.

Action Plan for Tier 2 Areas

Location	Fire Threat Tier	Electric Assets	Risk Description	Targeted Action/s	Timeframe
South of the I-10 Freeway between Sunset Avenue and South Highland Home Road	2	BEU provides OH 34.5kV for sub-transmission voltage to Midway Substation, 12.47kv and 7.2kv for supplemental service to a housing tract and municipal water facilities	Water wells and pump stations within this Tier 2 area are directly affected by loss of power along this pole line	Joint project with City of Banning Public Works and current developer to harden/underground the facilities as part of the new Sun Lakes Blvd extension between Sunset Avenue and Highland Home Road	Development agreement is being pursued thru the City for funding of this project. This project will be incorporated within BEU upcoming 10-year Capital Improvement Program.
East Banning, North of I-10 Freeway	2	BEU provides OH 12.47kv and 7.2kv along the boundary of North Hathaway Street	Service to large industrial facilities is affected by loss of power along this pole line.	Joint project with an aggregate processing industrial user to harden a pole line due to a required relocation and joint projects with several large warehouse developments to and underground facilities along Hathaway Steet, Nicolet Street and Wilson Street.	Design for the pole hardening project is currently complete. Coordination with the industrial user has commenced and is scheduled to be completed during FY 24/25. Undergrounding of overhead utilities will be coordinated in phases with the large industrial developers. The effort is expected to last several years and is tentatively scheduled to begin FY 25/26.

BANNING CALIFORNIA

Public Safety Power Shutoff (PSPS)

Justifications for de-energization

- CAL Fire or request by safety officers
- De-energization due to an imminent fire threat

Typical Weather-related Red Flag Warnings

- Wind gusts exceeding 25 mph: public advisory
- Wind gusts exceeding 50 mph: potential PSPS event

BANNING CALIFORNIA

Future Updates

- Grid hardening and other engineering practices
- Update vegetation management program
- Weather monitoring
- PSPS protocols
- Collaboration on a simplified template

Action and Next Steps

- Approve 2024 WMP and submit to WSAB
- Coordinate with safety personnel on best practices
- Apply for new grants
- Evaluate of de-energization and reclosing policy in Tier 3 areas
- Improve performance metrics

CITY COUNCIL
PUBLIC HEARING ITEM NO. 7.3
JUNE 25, 2024

A Zoning Text Amendment (ZTA 24-0050) Amending Table 17.08.020 of Section 17.08.020 of Article I of Chapter 17.08 of Division II of Title 17 of the City of Banning Municipal Code to Clarify that Affordable Housing Uses are Permitted by Right and Are Not Subject to Discretionary Action in Specified Zoning Districts as Required by State Law; and Making a Determination of Exemption from the California Environmental Quality Act.

BACKGROUND:

The City Council readopted the revised 6th Cycle Housing Element on January 9, 2024.

The Housing Element was transmitted to HCD for Certification review on February 1, 2024.

On March 14, 2024, Ordinance 1600 was transmitted to HCD prior to the conclusion of Certification Review.

On March 29, 2024, HCD sent a letter to City staff indicating that the Housing Element complied with State Housing Element Law, but Ordinance 1600 did not fully comply with housing law.

Specifically, HCD took exception to footnote number 7, in Table 17.08.020 of Ordinance 1600.

Staff worked directly with HCD staff to craft language that can be endorsed by HCD to garner Certification.

The Planning Commission recommended approval of the ZTA when it adopted PC Reso 2024-11 on May 29, 2024.

Justification:

The Housing Element is one of the seven State-mandated elements of the General Plan and must be updated every 8 years, unless otherwise mandated by California Government Code Section 65581. The purpose of the Housing Element is to develop comprehensive strategies for providing safe, decent, and affordable housing within the community across all income levels.

The 6th Cycle Housing Element Update was readopted by the City Council on January 9, 2024, but was not certified by HCD. To be considered for Certification, the proposed Zoning Text Amendments contained in Draft Ordinance 16xx are integral to implementing state housing law and to achieve Certification.

Until the 6th Cycle Housing Element is Certified by HCD, the City is not eligible to compete for federal, state, or local grant money. If deemed by HCD to have a noncompliant Housing Element, the City can lose the ability to receive Community Development Block Grants and other other negative incentives/sanctions can be imposed on the City.

Proposed Zoning Text Amendments:

1. Amended Table 17.08.020, relocating "Affordable Housing" to below "Multi-Family Residential Dwelling"

"Table 17.08.020
Permitted, Conditional and Prohibited Residential Uses

Zone	R/A	R/A/H	RR	RR/H	VLDR	LDR	MDR	HDR*	MHP	VHDR
Residential Uses										
Accessory Dwelling Unit	P	P	P	P	P	P	P	P	P	P
~~Affordable Housing (min. 20% lower income, nonvacant site)[7]~~	~~X~~	~~X~~	~~X~~	~~X~~	~~X~~	~~C~~	~~P~~	~~P~~	~~P~~	~~P~~
Cannabis Commercial Indoor Cultivation	X	X	X	X	X	X	X	X	X	X

Multi-Family Residential Dwelling	X	X	X	X	X	C	P	P	X	P
Multiple-Family Affordable Housing (min. 20% lower income, by non-discretionary action)[7]	X	X	X	X	X	C	P	P	P	P
Planned Unit Development	X	X	X	P	P	P	P	P	X	P

Proposed Zoning Text Amendments (Cont.):

2. Amended footnote number 7 for Table 17.08.020, rewording, adding key phrase "or discretionary action," and adding in the density range for the Very High Density Residential zoning district at the request of HCD, to read as follows:

[6] Cannabis Personal Cultivation must comply with the provisions of Chapter 5.34.

~~[7] Housing developments in the VHDR district are permitted at a minimum density of twenty-four dwelling units to 30 dwelling units per acre, without a Public Hearing required, Applies only to affordable housing projects pursuant to CGC 65583.~~

[7] Affordable housing developments pursuant to Government Code Section 65583.2 and located within the multi-family housing zoning districts are permitted by right without a public hearing or discretionary action and, in the VHDR district, are permitted at a minimum density of 24 dwelling units to 30 dwelling units per acre.

Public Communication

Public Notice was Published in the Record Gazette on May 17, 2024 for the May 29, 2024 Planning Commission Meeting; and again on June 11, 2024 for this public hearing.

No comments were received opposed to or for the project.

NOTICE OF PUBLIC HEARING AND NOTICE OF EXEMPTION FOR CONSIDERATION OF ZONING TEXT AMENDMENT (ZTA) 24-0050 AMENDING TABLE 17.08.020 OF SECTION 17.08.020 OF ARTICLE I OF CHAPTER 17.08 OF DIVISION II OF TITLE 17 OF THE CITY OF BANNING MUNICIPAL CODE TO CLARIFY THAT MULTI-FAMILY HOUSING USES HAVING A MINIMUM OF 20 PERCENT OF THE TOTAL NUMBER OF UNITS UNDER AFFORDABLE COVENANT ARE PERMITTED BY RIGHT PURSUANT TO STATE LAW AND ARE NOT SUBJECT TO DISCRETIONARY ACTION IN SPECIFIED MULTI-FAMILY ZONING DISTRICTS; AND MAKING A DETERMINATION OF EXEMPTION FROM THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA).

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning City Council, to be held Tuesday, June 25, at 5.00 p.m. in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California, to consider a Zoning Text Amendment amending Table 17.08.020of Article I of Chapter 17.08 of Division II of Title 17 of the City of Banning Municipal Code to clarify that multi-family housing uses having a minimum of 20 percent of the total number of units under affordable covenant are permitted by right pursuant to state law and are not subject to discretionary action in specified multi-family zoning districts; and making a determination of exemption from the California Environmental Quality Act (CEQA). The Community Development Department has determined that the project is exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15061(b)(3) of the CEQA Guidelines applying only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

PLANNING COMMISSION ACTION: At a duly noticed public hearing held on May 29, 2024, the Planning Commission of the City of Banning adopted Resolution 2024-11, recommending that the City Council approve the Ordinance.

To observe the live meeting through your personal computer or smart phone enter the following link: https://banninglive.viebit.com or view on the Banning Government Channel on Cable Television.

Information regarding the Notice of Exemption or Zoning Text Amendment can be obtained by contacting the City's Community Development Department, Planning Division at (951) 922-3125, or by going to the City of Banning Community Development – Planning Department website at: https://banningca.gov/Archive.aspx?AMID=60&Type=&ADID=

All parties interested in speaking either in support of or in opposition to this item are invited to attend the public hearing or by sending their written comments by email to the Administrative City Clerk at cityclerks@banningca.gov or by mail to the City Clerk at City of Banning at PO Box 998, Banning, CA 92220.

If you challenge any decision regarding the above proposal in court, you may be limited to raising only those issues you or someone else raised in written correspondence delivered to the Administrative City Clerk prior to, at, or during the time the City Council makes its recommendation on the proposal; or, you or someone else raised at the public hearing or in written correspondence delivered to the hearing body at, or prior to, the hearing (California Government Code, Section 65009).

BY ORDER OF THE COMMUNITY DEVELOPMENT DIRECTOR OF THE CITY OF BANNING, CALIFORNIA

/s/ Emery J. Papp, Senior Planner

Dated: June 11, 2024
Publish: June 14, 2024

Environmental Determination

Pursuant to the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, the Project is exempt from the California Environmental Quality Act (CEQA) subject to Section 15061(b)(3), because it can be seen with certainty there is no possibility these amendments may have a significant effect on the environment. Subject to Section 15061(b)(3) (Review For Exemptions) of the CEQA Guidelines, no further analysis is required and a Notice of Exemption has been prepared for the Project.

Recommendation

Make a Determination of Exemption from the California Environmental Quality Act (CEQA) per Section 15061(b)(3) of the CEQA Guidelines; and

Adopt Ordinance 1605, Amending Title 17 (Zoning) of the Banning Municipal Code, amending Chapter 17.08 (Residential Districts) of Division II (Land Use Districts) of Title 17 (Zoning) of the BMC to implement State mandated legislation regarding affordable housing opportunities related to multi-family, high-and very high density residential development.

Exhibit D

CITY COUNCIL
PUBLIC HEARING ITEM NO. 7.4
JUNE 25, 2024

CONSIDERATION of Resolution 2024-112, Making a determination under state CEQA Guidelines Sections 15070 through 15074 that the Project is not exempt from review under CEQA and an initial study and Mitigated Negative Declaration (EA 23-1506) for the project has been prepared in consideration of a General Plan Amendment (GPA 23-2502), changing the existing Land Use designation of parcel number 540-180-022 from General Commercial (GC) to Industrial (I); Zone Change (ZC 23-3502), amending the zoning district classification of parcel number 540-180-022 from General Commercial (GC) to Industrial (I); Tentative Parcel Map (TPM 38659) to consolidate three parcels into one; and Design Review (DR 23-7008), a proposal to allow for the new construction and operation of a steel distribution facility with a 42,510 square-foot warehouse building of which 3,434 square feet is designated for office space on 14.92 gross acres of land located on the north side of West Lincoln Street between South 8th Street and South 16th Street (APN Nos. 540-180-020, 540-180-022 and 540-180-026).

Background

Brown Strauss is a structural steel distributor with 10 locations in the Western United States. This project will be a move from an existing facility in Fontana, CA to Banning, and will require the approval of the following:

EA 23-1506 – Mitigated Negative Declaration

GPA 23-2502 – Change Land Use on one Parcel from GC to I

ZC 23-3502 - Change Zoning Designation on one parcel from GC to I

TPM 38659 – To consolidate three parcels into one parcel

DR 23-7008 – To construct and operate a new industrial building

Parking Reduction

AMENDED CONDITION of APPROVAL:

At the Planning Commission hearing held May 29, 2024, the Applicant requested a modification of COA No. 6. The Planning Commission granted the amended Condition, but the amendment is not reflected in the COA provided as an attachment to the staff report. As a result, staff recommends the City Council amend COA No. 6 to read as follows:

"6. Prior to ~~*any*~~ ***issuance of a certificate of*** occupancy/use of the ~~*Project site*~~ ***building***, or business activity being commenced ~~*thereon*~~ ***therein***, the applicant shall complete these conditions of approval to the satisfaction of the Community Development Director. ***Prior to occupancy, the Applicant may use areas identified on the Site Plan for outdoor storage of non-combustible material (e.g. steel) subject to completion of all screening walls and subject to issuance of a Temporary Use Permit."***

BANNING CALIFORNIA

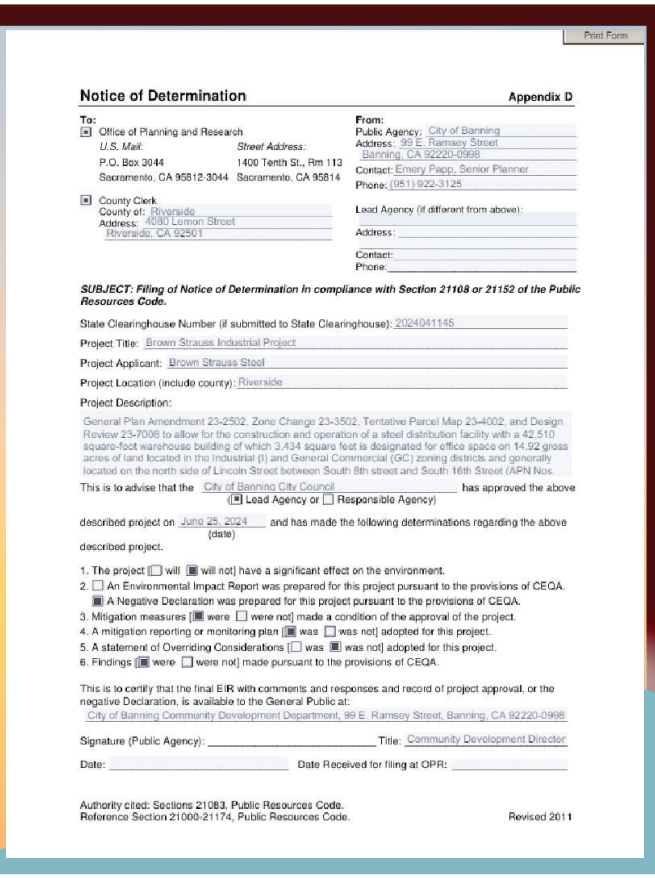
INITIAL STUDY/MITIGATED NEGATIVE DECLARATION:

Planning Division staff has determined that this Project is not exempt from the requirements of the California Environmental Quality Act ("CEQA") and an Initial Study/Mitigated Negative was prepared for the Project. The IS requires an evaluation of 21 Categories of potential impacts to the environment. The results of this IS determined that without Mitigation Measures, 4 of these generalized categories could be impacted resulting from the construction and long-term operation of this project. These generalized categories include:

- Biological Resources (also included as COA 7 and 8)
- Cultural Resources (also included as COA 9 and 10)
- Geology and Soils (also included as COA 11 and 12)
- Tribal Cultural Resources (also included as COA 13 and 14)

BANNING CALIFORNIA

INITIAL STUDY/MITIGATED NEGATIVE DECLARATION (Cont.):



The Mitigation Measures proposed in these categories are intended to reduce the potential for impacts caused or created by the Project to be "Less Than Significant" with mitigation. A Mitigation Monitoring and Reporting Program (MMRP) is included with the IS/MND, and identifies measurable mitigations and the parties responsible for ensuring that each mitigation measure is properly and completely implemented.

The project, with mitigation is not expected to create any impacts to the surrounding built environment.

BANNING CALIFORNIA

ENVIRONMENTAL DETERMINATION:

Planning Division staff has determined that this Project is not exempt from the requirements of the California Environmental Quality Act ("CEQA") and an Initial Study/Mitigated Negative has been prepared for the Project. A Notice of Determination has been prepared.

Public Communication:

Planning Commission: The proposed Project was advertised for a 30-Day public review and comment period in the Record Gazette newspaper, from April 26, 2024, through May 27, 2024, and notices were mailed to the owners of parcels within a 300-foot radius from the Project site.

City Council: The proposed Project was advertised for a 10-Day public review and comment period in the Record Gazette newspaper, on June 14, 2024, and notices were mailed to the owners of parcels within a 300-foot radius from the Project site.

As of the date of this report, staff has received one written comment. A response to this comment letter has been provided to the City Council for consideration.

City of Banning
Community Development Department

NOTICE OF PUBLIC HEARING AND NOTICE OF INTENT (NOI) TO ADOPT A MITIGATED NEGATIVE DECLARATION (MND)(EA 23-1506) FOR CONSIDERATION OF GENERAL PLAN AMENDMENT 23-2502, ZONE CHANGE 23-3502, TENTATIVE PARCEL MAP 23-4002, AND DESIGN REVIEW 23-7008, A PROPOSAL TO ALLOW FOR THE NEW CONSTRUCTION AND OPERATION OF A STEEL DISTRIBUTION FACILITY WITH A 42,510 SQUARE-FOOT WAREHOUSE BUILDING OF WHICH 3,434 SQUARE FEET IS DESIGNATED FOR OFFICE SPACE ON 14.92 GROSS ACRES OF LAND LOCATED ON THE NORTH SIDE OF WEST LINCOLN STREET BETWEEN SOUTH 8TH STREET AND SOUTH 16TH STREET (APN Nos. 540-180-020, 540-180-022 and 540-180-026).

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning City Council, to be held on Tuesday, June 25, 2024, at 5:00 p.m. in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California, to consider an Initial Study/Mitigated Negative Declaration for General Plan Amendment 23-2502, Zone Change 23-3502, Tentative Parcel Map 23-4002, and Design Review 23-7008 to allow for the construction and operation of a steel distribution facility with a 42,510 square-foot warehouse building of which 3,434 square feet is designated for office space on 14.92 gross acres of land located on the north side of Lincoln Street between South 8th street and South 16th Street (APN Nos. 540-180-020, 540-180-022 and 540-180-026). The Community Development Department has determined, on the basis of the Initial Study, that the project will not have a significant effect on the environment with implementation of recommended mitigation measures. In accordance with the disclosure requirements of CEQA Guidelines Section 15072(g)(5), the Project site is not listed as a hazardous property as designated under Section 65962.5 of the Government Code.

An Initial Study/Mitigated Negative Declaration (IS/MND) prepared for the project was made available for public review and comment for a 30-day public review and comment period prior to the public hearing beginning FRIDAY, APRIL 26, 2024, and concluding MONDAY, MAY 27, 2024.

PLANNING COMMISSION ACTION: At a duly noticed public hearing held on May 29, 2024, the Planning Commission of the City of Banning adopted Resolution 2024-13, recommending that the City Council approve the Mitigated Negative Declaration, General Plan Amendment, Zone Change, Tentative Parcel Map, Design Review and parking reduction for the proposed Project.

Information regarding the Initial Study/Mitigated Negative Declaration can be obtained by contacting the City's Community Development Department at (951) 922-3125, or by visiting the following link:

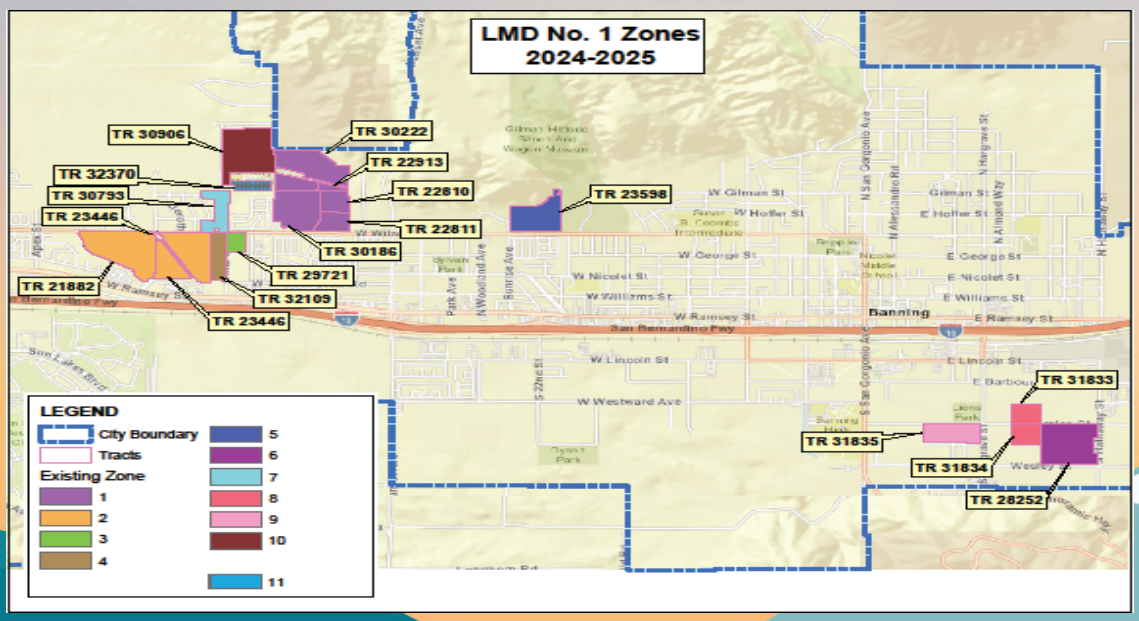
City of Banning Landscape Maintenance District No. 1

Award of Contract and Budget Updates

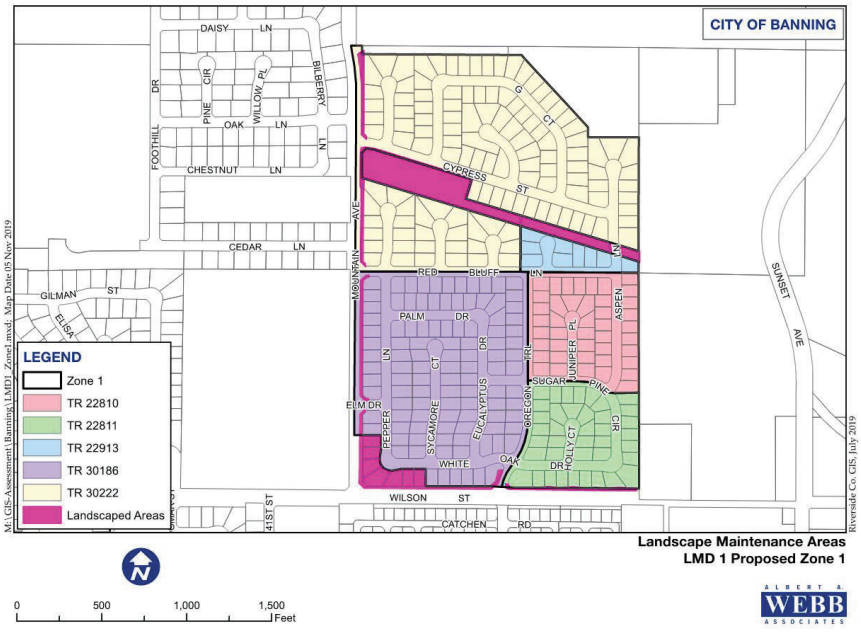
Regulatory Environment

- LMD is a Special District (Article 4, Chapter 1, Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of the State of California)
  - Benefits are pre-defined regions/homeowners/neighborhoods, not City as a whole,
  - This District, by special benefit assessments, provides funding for the servicing and maintenance of certain landscaped areas within the City of Banning, many of which are located in public right-of-ways in the City of Banning
- Subject to Prop 218
- Statutory requirements to maintain Water Quality Devices (MS4 Permit No. R7-2013-0011)



Landscape Maintenance District Number 1

- Currently has 11 distinct zones
- Initially created in 1990, with Tract 22913 annexed in 1992, within Zones 1-5, with a base fee and NO annual inflation adjustment
- Expanded to 11 zones in later years with base fee AND annual inflation adjustment up to 5% per year for zones 6-11
- Some zones contain fund surpluses, while others run a structural deficit.



New Landscape Contractor, higher costs

- RFP 24-061 for Operation and Maintenance Services was released on April 5, 2024 with 2 proposals received.
- Lowest responsible bidder, Mariposa Landscapes, Inc. was more than 2.5X the cost of the previous contractor for FY 23/24, amounting to $115,142.88/year.
- PW staff met with Mariposa to reduce the Scope of Work and Services within Zones: 1, 4, 5, and 9 to meet the current budget. The revised annual contract cost is: $78,211.26/year.
- A significant reduction in mowing, shrub, ground cover and plant maintenance, trash pickup and irrigation repairs must occur in Zones 1, including Richard Sanchez Park, 4, 5, and 9 to meet the negotiated Mariposa landscape costs.

LMD No. 1 Map (11 Zones)

LMD No. 1 – Zone 1

Zone 1 includes the following areas:

- Richard Sanchez Park and trail
- Stormwater Basin
- Mountain Ave Roadway Frontages
- Wilson Street Roadway Frontages

BANNING CALIFORNIA

LMD No. 1

Previous Graph of Revenues/Deficits

LMD No. 1

Revised Graph of Revenues/Deficits

Potential Remedies

- Reduction of Services
  - What are mandatory vs. prudent
- Prop 218 Increases
  - Last effort in December of 2020 was rejected by majority protest, not implemented
- De-annexation of Richard Sanchez Park and/or other Zones
- General Fund Transfers
  - May be considered 'Gift of Public Funds' and not permitted

BANNING CALIFORNIA

Service Reductions

- Reductions were already in place in many zones, leading to landscape care not meeting community expectations.
- Additional reductions were put in place with this contract in zones that are in deficit.
- Stormwater basins are regulatory obligation to maintain, and can only be reduced to a certain point (Zone 1)
- Reverse frontages behind block walls are difficult to have the adjacent private homeowner maintain (Zones 4, 5, 9)
- Remaining reductions would be to essentially stop maintenance on certain sections.

BANNING CALIFORNIA

Service Reductions

- Reductions in scope can be seen in Attachment 5 (Original Request) and Attachment 6 (Revised Scope)
- Reduce staff and administrative costs to oversee and manage the LMD zones and contract.
- Reduce water and electric usage to lower utility costs.

Prop 218 Vote Held on December 8, 2020

PROP 218 12/8/2020 RESULTS					
ZONE	NO. OF AUs	YES	NO	TOTAL	% VOTED
1	319	3	95	98	31%
2	272	10	72	82	30%
3	21	1	8	9	43%
4	38	3	12	15	39%
5	97	6	17	23	24%
6	70	0	21	21	30%
7	43	3	14	17	40%
8	35	0	22	22	63%
9	33	0	15	15	45%
10	87	2	3	5	6%

De-annexation

- The same process used to annex a property into the LMD would need to be followed.
- Each property owner within the Zone would need to be mailed a Ballot to vote on the De-annexation.
- A Public Hearing would be held, Ballots tallied, and a majority of Ballots received voting “YES” would be required.
- A HOA for the Zone would need to be formed to maintain the areas and an Agreement with the City would be required and executed. Additionally, an Encroachment Permit is needed for the HOA to access and maintain public property for maintenance.
- If a zone, or part of a zone is de-annexed, it may incur additional General Fund expense to maintain.

Recommendation

- Approve Resolution 2024-108 with Mariposa Landscapes for annual maintenance of Landscape Maintenance District No. 1.
- Provide direction to staff on preferred actions to address structural deficits in several zones, and the exhausted reserve accounts in Zone 1 in the next fiscal year.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Emery Papp, Senior Planner**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-113, a Resolution of the City Council of the City of Banning, California, Setting Aside and Vacating its Previous Approval of Tentative Parcel Map No. 38164, Approval of Design Review 21-7008 and Denial of the Appeal of the Planning Commission's Approval of Design Review 21-7008, and Adoption of an Addendum, All in Connection with the Banning Point Project, Doing so in Compliance with the Peremptory Writ of Mandate that Requires the City Council to Set Aside and Vacate those Decisions, and Rescinding City Council Resolution 2022-14**

RECOMMENDATION:

Adopt Resolution 2024-113.

BACKGROUND:

The City Council adopted Resolution 2022-14 on February 17, 2022, which (1) approved Tentative Parcel Map No. 38164, allowing the subdivision of approximately 47 gross acres of vacant land into three parcels; (2) affirmed the Planning Commission's approval of Design Review 21-7008 and denied an appeal of that decision and permitted the construction of a proposed industrial warehouse building of 619,959 square feet (the "Banning Point Project"), including 10,000 square feet of office space, and six retail/commercial buildings totaling 34,000 square feet, on real property located within the boundaries of the Sun Lakes Village North Specific Plan area (APN: 419-140-057); and (3) adopted an addendum under the California Environmental Quality Act ("CEQA") and made findings in support thereof, including finding of consistency with the certified Environmental Impact Report prepared for Amendment No. 5 to the Sun Lakes Village North Specific Plan (SCH # 2020029074).

On April 18, 2022, a lawsuit (Petition for Writ of Mandate and Complaint for Injunctive Relief) ("Writ Petition") entitled Pass Action Group v. City of Banning, *et al.* (Riverside County Superior Court Case No. CVRI2201482) was filed, challenging the City Council's approval of the Banning Point Project by adoption of Resolution 2022-14 and generally asserting the following four claims:

1. The City violated Pass Action Group's right to a fair hearing because of bias on the part of former Councilmember Hamlin and Councilmembers Sanchez and Wallace;
2. The City violated CEQA by failing to consider whether the Project's cumulative environmental impacts necessitated further environmental review;
3. The City's findings in support of the project's approval were contrary to law and unsupported by substantial evidence; and
4. The Banning Point Project conflicts with the City's General Plan.

On March 15, 2024, the Court issued a Ruling Peremptory Writ of Mandate ("Writ") granting the Writ Petition, in part, only due to Councilmember Hamlin's bias, and denying the Writ Petition on all other grounds summarized in bullet points 1-4 above.

On April 3, 2024, the Court entered Judgment ordering, in relevant part, that a Writ shall issue (1) ordering the City to set aside and vacate all approvals of the Banning Point Project in which Councilmember Hamlin participated, including Resolution 2022-14, Tentative Parcel Map No. 38164, Design Review 21-7008, and the Addendum and related CEQA findings for the Banning Point Project within 90 days, and (2) instructing the City that any future hearing reconsidering approval of the Banning Point Project must be conducted without the participation of former Councilmember Hamlin. The Writ issued and was served on the City on May 7, 2024.

The City has reviewed the proposed activity for compliance with the California Environmental Quality Act ("CEQA") and has determined that a resolution adopted to comply with a court order is not a "project" as defined under Section 15378 of the State CEQA Guidelines. Therefore, pursuant to Section 15060(c)(3) of the State CEQA Guidelines, the activity is not subject to CEQA and no environmental review is necessary.

JUSTIFICATION:

Resolution 2024-113 demonstrates the City's compliance with the Writ by formally setting aside and vacating the City Council's previous approval of Tentative Tract Map No. 38164, approval of Design Review 21-7008 and denial of the appeal of the Planning Commission's approval of Design Review 21-7008, and adoption of an addendum, all in connection with the Banning Point Project, and rescinding City Council Resolution 2022-14, as directed by the Court.

FISCAL IMPACT:

There is no fiscal impact related to the City Council's adoption of Resolution 2024-113.

ALTERNATIVES:

1. Adopt Resolution 2024-113.
2. Do not adopt Resolution 2024-113 and do not comply with the Judgment and Writ.

ATTACHMENTS:

1. Resolution 2024-113

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, SETTING ASIDE AND VACATING ITS PREVIOUS APPROVAL OF TENTATIVE PARCEL MAP NO. 38164, APPROVAL OF DESIGN REVIEW 21-7008 AND DENIAL OF THE APPEAL OF THE PLANNING COMMISSION'S APPROVAL OF DESIGN REVIEW 21-7008, AND ADOPTION OF AN ADDENDUM, ALL IN CONNECTION WITH THE BANNING POINT PROJECT, DOING SO IN COMPLIANCE WITH THE PEREMPTORY WRIT OF MANDATE THAT REQUIRES THE CITY COUNCIL TO SET ASIDE AND VACATE THOSE DECISIONS, AND RESCINDING CITY COUNCIL RESOLUTION 2022-14

WHEREAS, the City Council adopted Resolution 2022-14, which (1) approved Tentative Parcel Map No. 38164, allowing the subdivision of approximately 47 gross acres of vacant land into three parcels; (2) affirmed the Planning Commission's approval of Design Review 21-7008 and denied an appeal of that decision and permitted the construction of a proposed industrial warehouse building of 619,959 square feet (the "Banning Point Project"), including 10,000 square feet of office space, and six retail/commercial buildings totaling 34,000 square feet, on real property located within the boundaries of the Sun Lakes Village North Specific Plan Amendment No. 5 (APN: 419-140-057); and (3) adopted an addendum under the California Environmental Quality Act (CEQA) and made findings in support thereof, including finding of consistency with the certified Environmental Impact Report prepared for Amendment No. 5 to the Sun Lakes Village North Specific Plan (SCH # 2020029074); and

WHEREAS, on April 18, 2022, a lawsuit (Petition for Writ of Mandate and Complaint for Injunctive Relief) ("Writ Petition") entitled Pass Action Group v. City of Banning, *et al.* (Riverside County Superior Court Case No. CVRI2201482) was filed, challenging the City Council's approval of the Banning Point Project by adoption of Resolution 2022-14 and generally asserting the following four claims: (1) the City violated Pass Action Group's right to a fair hearing because of bias on the part of former Councilmember Hamlin and Councilmembers Sanchez and Wallace; (2) the City violated CEQA by failing to consider whether the Project's cumulative environmental impacts necessitated further environmental review; (3) the City's findings in support of the project's approval were contrary to law and unsupported by substantial evidence; and (4) the Banning Point Project conflicts with the City's General Plan; and

WHEREAS, on March 15, 2024, the Court issued a Ruling granting the Writ Petition, in part, only due to Councilmember Hamlin's bias, and denying the Writ Petition on all other grounds; and

WHEREAS, on April 3, 2024, the Court entered Judgment ordering, in relevant part, that a Writ shall issue (1) ordering the City to set aside and vacate all approvals of the Banning Point Project in which Councilmember Hamlin participated, including Resolution 2022-14, Tentative Parcel Map No. 38164, Design Review 21-7008, and the Addendum and related CEQA findings for the Banning Point Project within 90 days, and (2) instructing the City that any future hearing reconsidering approval of the Banning Point Project must be conducted without the participation of former Councilmember Hamlin; and

WHEREAS, the Writ issued and was served on the City on May 7, 2024; and

WHEREAS, it is the purpose of this Resolution to demonstrate the City's compliance with the Writ by formally setting aside and vacating the approvals of the Banning Point Project as

directed by the Court in Paragraph 2.a. of the Judgment and Paragraph 1 of the Writ by rescinding Resolution No. 2022-14.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council hereby sets aside and vacates its previous approval of Tentative Parcel Map 38164, approval of Design Review 21-7008 and denial of the appeal of the Planning Commission's approval of Design Review 21-7008, and adoption of an addendum, all in connection with the Banning Point Project, and rescinds City Council Resolution 2022-14.

SECTION 2. The City Council directs the City Attorney to file with the Court a Return to Writ which shall include a copy of this Resolution.

SECTION 3. The City Clerk shall certify to the adoption of this Resolution and shall cause a certified Resolution to be filed in the book of original resolutions.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Holly Stuart, Public Works Program Manager** **Arturo Vela, Director of Public Works**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-115, Awarding a Citywide Professional Services Agreement for As Needed Public Relations and Community Outreach Consulting Services in the amount of $295,000 for Three (3) Year Agreement with DeGrave Communications Inc.**

RECOMMENDATION:

Adopt Resolution 2024-115.

BACKGROUND:

On March 29, 2024, through OpenGov bid platform and advertisement in the local newspaper, City staff released a solicitation for proposals from qualified firms for public relations and community outreach consulting services. The opportunity identified that the City is working to establish a contract with a professional consulting firm(s) that would be responsible for assisting the City with achieving public outreach goals, as well as, have experience and proven successes with projects such as creating unique brand identities, memorable messaging, communication through multimedia formats, crisis communications and Proposition 218 informational campaigns.

The Request for Proposals (RFP) identified that qualified firms would provide, but not be limited to, the following:

- General Written Outreach Material for Public Release
- Strategic and Tactical Messaging and Branding
- Graphic Design and Layout Services
- Design Color Theory and Typography
- Support, Coordination, Promotion & Presentations for Meetings, Workshops, Hotline, etc.
- Emergency Event Support
- Social Media Post & Marketing Including Short Videos
- Conduct Keyword Research and Employ Search Engine Optimization (SEO) Best Practices
- Analyze Web Traffic
- Digital Marketing
- Surveys
- Project Websites
- Advertising & Marketing
- Graphic Design/Infographics/Logos
- Digital Reformatting of Files (Image Retouching/Adjustment of Photos & Videos)
- Stock Footage or Custom Photography
- Video Shooting

- Videography
- Animated Videos
- Other services as needed and to be determined.

The opportunity closed on May 10, 2024 and in response to these efforts a total of 7 proposals were received and validated by Purchasing staff. Subsequently, a committee of three (3) members was assembled to evaluate the proposals based on qualifications, pricing, experience, professional references, approach and methodology. As a result, staff recommends the award of a Professional Services Agreement for Public Relations and Community Outreach Consulting Services to DeGrave Communications, Inc. for a five (5) year period beginning Fiscal Year 2024/2025 through Fiscal Year 2026/2027 with the option to renew two (2) additional years.

JUSTIFICATION:

The City does not have the required staff needed to address all public relations and community outreach needs; therefore, it is necessary to retain a firm that provides these services. Following the City's purchasing policy, DeGrave Communications, Inc., is the firm identified as the highest ranked and most qualified firm to provide Citywide services.

FISCAL IMPACT:

There is no fiscal impact related to this resolution. The funding of this professional service agreement will be determined on a case-by-case bases at the time service needs are identified.

ALTERNATIVES:

Do not approve Resolution 2024-115 and provide alternative direction to staff.

RESOLUTION 2024-115

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, AWARDING A PROFESSIONAL SERVICES AGREEMENT FOR AS NEEDED PUBLIC RELATIONS AND COMMUNITY OUTREACH CONSULTING SERIVCES IN THE NOT TO EXCEED AMOUNT OF $295,000 TO DEGRAVE COMMUNICATIONS INC.

WHEREAS, a Request for Proposals (RFP) was released through OpenGov on March 29, 2024, as well as, published in the local newspaper; and

WHEREAS, the opportunity identified that the City is working to establish a pre-qualified vendor list of professional consulting firms that would be responsible for assisting the City with achieving public outreach goals, as well as, have experience and proven successes with projects such as creating unique brand identities, memorable messaging, communication through multimedia formats, crisis communications and Proposition 218 informational campaigns; and

WHEREAS, the RFP closed May 10, 2024 with 7 proposals received; and

WHEREAS, proposals were evaluated by a committee based on qualifications, pricing, experience, professional references, approach and methodology resulting in an award recommendation to Degrave Communications Inc., for a three (3) year period beginning Fiscal Year 2024/2025 through Fiscal Year 2026/2027 in the not to exceed amount of $295,000.00 with the option to renew two (2) additional years.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council adopts Resolution 2024-XX awarding a citywide Professional Services Agreement with DeGrave Communications Inc. for as needed public relations and community outreach consulting services for a three (3) year period beginning Fiscal Year 2024/2025 through Fiscal Year 2026/2027 in the not to exceed amount of $295,000.00 with the option to renew two (2) additional years.

SECTION 2. The Council authorizes the City Manager, or designee, to make necessary budget adjustments, appropriations, and transfers related to this resolution.

SECTION 3. City Council authorizes the City Manager to make necessary non-substantive changes and to the Professional Services Agreement.

SECTION 4. The City Clerk shall certify the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9h day of July 2024.

EXHIBIT A

Citywide Professional Services Agreement For As Needed Public Relations And Community Outreach Consulting Services

AGREEMENT FOR PROFESSIONAL SERVICES (C01050) FOR ON-CALL PUBLIC RELATION SERVICES BY AND BETWEEN CITY OF BANNING AND DEGRAVE COMMUNICATIONS INC.

THIS AGREEMENT FOR PROFESSIONAL SERVICES (herein "Agreement") is made and entered into this day: _____, ("Effective Date") by and between the **CITY OF BANNING,** a California municipal corporation ("City") and DEGRAVE COMMUNICATIONS INC., a California Corporation ("Consultant"). City and Consultant are sometimes hereinafter individually referred to as "Party" and hereinafter collectively referred to as the "Parties."

RECITALS

A. City has sought by issuance a request for a proposal (RFP 24-065) for the performance for the On-Call Public Relation Services and as further defined and described particularly in Article 1 of this Agreement.

B. Consultant, following submission of a proposal for the performance of the services defined and described particularly in Article 1 of this Agreement, was selected by City to perform those services.

C. The Parties desire to formalize the selection of Consultant for performance of those services defined and described particularly in Article 1 of this Agreement and desire that the terms of that performance be as particularly defined and described herein.

D. Pursuant to the City of Banning's Municipal Code, City has authority to enter into this Agreement.

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained herein and other consideration, the value and adequacy of which are hereby acknowledged, the Parties agree as follows:

ARTICLE 1. SERVICES OF CONSULTANT

1.1 Scope of Services.

In compliance with all terms and conditions of this Agreement, Consultant shall provide those services specified in the "Scope of Services" attached hereto as **Exhibit A** and incorporated herein by this reference, which services may be referred to herein as the "Services" hereunder. As a material inducement to City entering into this Agreement, Consultant represents and warrants that it has the qualifications, experience, and facilities necessary to properly perform the Services required under this Agreement in a thorough, competent, and professional manner, and is experienced in performing the Services contemplated herein. Consultant shall at all times faithfully, competently and to the best of its ability, experience and talent, perform all Services described herein. Consultant covenants that it shall follow the highest professional standards in performing the Services required hereunder and that all materials will be of good quality, and fit for the purpose intended. For purposes of this Agreement, the phrase "highest professional

standards" shall mean those standards of practice recognized by one or more first-class firms performing similar work under similar circumstances.

1.2 Contract Documents and Exhibits.

This Agreement includes the Request for Proposal and Consultant's accepted proposal ("Contract Documents"), both of which are on file with the City and incorporated herein by this general reference as though fully set forth herein. **Exhibit A** (Scope of Services), **Exhibit B** (Special Requirements), **Exhibit C** (Schedule of Compensation), and **Exhibit D** (Schedule of Performance) also constitute a part of this Agreement and are incorporated into this Agreement by this reference. Except as set forth in Section 1.10 regarding **Exhibit B**, this Agreement controls over the Contract Documents and the provisions in **Exhibits A, B** and **C**.

1.3 Compliance with Law.

Consultant shall keep itself informed concerning all ordinances, resolutions, statutes, rules, and regulations of City and any Federal, State or local governmental entity having jurisdiction in effect at the time service is rendered, and shall render all Services hereunder in accordance therewith.

1.4 Licenses, Permits, Fees and Assessments.

Consultant shall obtain and maintain during the term of this Agreement, at its sole cost and expense, all necessary licenses, permits, certificates and approvals required by law for the performance of Services under this Agreement, including a City business license. Consultant shall have the sole obligation to pay for all fees, assessments and taxes, plus applicable penalties and interest, which may be imposed by law and which arise from or are necessary for Consultant's performance of the Services required by this Agreement. Consultant shall indemnify, defend and hold harmless City, its officers, employees or agents, against all such fees, assessments, taxes, penalties or interest levied, assessed or imposed against City hereunder.

1.5 Familiarity with Services.

By executing this Agreement, Consultant warrants that Consultant: (i) has thoroughly investigated and considered the Scope of Services to be performed, (ii) has carefully considered how the Services should be performed, and (iii) fully understands the facilities and any difficulties and restrictions attending performance of the Services under this Agreement. If the Services involve work upon any site, Consultant warrants that Consultant has or will investigate the site and is or will be fully acquainted with the conditions existing therein, prior to commencement of Services hereunder. Should Consultant discover any latent or unknown conditions, which will materially affect the performance of the Services hereunder, Consultant shall immediately inform City of such fact and shall not proceed except at Consultant's risk until written instructions are received from the Contract Officer (defined in Section 1.12. A).

1.6 Prevention of Loss and Damages.

Consultant shall adopt reasonable methods during the Term (defined in Section 3.4) to furnish continuous protection to the work product, and the equipment, materials, papers,

documents, plans, studies and/or other components thereof to prevent losses or damages, and shall be responsible for all such damages, to persons or property, until acceptance of the Services by City, except such losses or damages as may be caused by City's own negligence.

1.7 Further Responsibilities of Parties.

Both Parties agree to use reasonable care and diligence to perform their respective obligations under this Agreement. Both Parties agree to act in good faith to execute all instruments, prepare all documents and take all actions as may be reasonable necessary to carry out the purposes of this Agreement. Unless hereafter specified, neither Party shall be responsible to perform the Services of the other.

1.8 Additional Services.

City shall have the right at any time during the performance of the Services, without invalidating this Agreement, to order extra services beyond that specified in the Scope of Services or to make changes by altering, adding to or deducting from the Services. No such extra services may be undertaken unless a written order is first given by the Contract Officer to Consultant, which written order incorporates therein an adjustment in (i) the Contract Sum (as defined in Section 2.1), and/or (ii) the Schedule of Performance, (as defined in Section 3.2), and which written order is approved in writing by Consultant. Any increase in compensation of up to ten percent (10%) of the Contract Sum, or $25,000, whichever is less; or in the Schedule of Performance of up to one hundred eighty (180) days may be approved by the Contract Officer. Any greater increases, taken either separately or cumulatively, must be approved by City Council. It is expressly understood by Consultant that the provisions of this Section shall not apply to Services which are specifically set forth in the Scope of Services or which are reasonably contemplated therein. Consultant hereby acknowledges that it accepts the risk that the Services to be provided pursuant to the Scope of Services may be more costly or time consuming than Consultant anticipates and that Consultant shall not be entitled to additional compensation therefor.

1.9 Facilities and Equipment.

Except as otherwise provided, Consultant shall, at its own cost and expense, provide all facilities and equipment necessary to perform the Services required by this Agreement. City shall make available to Consultant only physical facilities such as desks, filing cabinets, and conference space ("City Facilities"), as City deems, in its sole discretion, to be reasonably necessary for Consultant's use while consulting with City employees and reviewing records and the information in possession of City. The location, quality, and time of furnishing City Facilities shall be in the sole discretion of City. In no event shall City be required to furnish any facilities that may involve incurring any direct expense, including but not limited to a computer, long distance telephone, network data, internet or other communication charges, vehicles and reproduction facilities.

1.10 Special Requirements.

Additional terms and conditions of this Agreement, if any, which are made a part hereof are set forth in the "Special Requirements" attached hereto as **Exhibit B** and incorporated herein by this reference. In the event of a conflict between the provisions of **Exhibit B** and any other provisions of this Agreement, the provisions of **Exhibit B** shall govern.

1.11 Corrections.

In addition to the indemnification obligations set forth in Article 4, and Sections 1.4, 1.13, 5.3, 5.4, and 6.3, Consultant shall correct, at its expense, all errors in the Services which may be disclosed during City's review of Consultant's report or plans. Should Consultant fail to make such correction(s) in a reasonably timely manner, such correction(s) may be made by City, and the cost thereof shall be charged to Consultant. In addition to all other available remedies, City may deduct the cost of such correction(s) from any retention amount held by City, or may withhold payment otherwise owed Consultant under this Agreement up to the amount of the cost of correction(s), as provided in Section 6.3.

1.12 Party Representatives.

A. Contract Officer: For the purposes of this Agreement, the Contract Officer shall be the City Manager, or such other person designated in writing by the City Manager ("Contract Officer"). Unless otherwise specified herein, any approval of City required hereunder shall mean the approval of the Contract Officer. The Contract Officer shall have authority, if specified in writing by the City Manager, to sign all documents on behalf of City required hereunder to carry out the terms of this Agreement.

B. Principals and Personnel of Consultant.

1) Consultant Representative: The following principal of Consultant is hereby designated as being the Consultant Representative authorized to act on Consultant's behalf regarding the Services specified herein and make all decisions in connection therewith:

Name	Title
Liselle DeGrave	Principal in Charge

It is expressly understood that the experience, knowledge, capability and reputation of the foregoing Consultant Representative were a substantial inducement for City to enter into this Agreement. Therefore, the foregoing Consultant Representative shall be responsible during the term of this Agreement for directing all activities of Consultant and devoting sufficient time to personally supervise the Services hereunder. All personnel of Consultant, and any authorized agents, shall at all times be under the exclusive direction and control of the Consultant Representative. For purposes of this Agreement, the foregoing Consultant Representative may not be replaced nor may their responsibilities be substantially reduced or reassigned by Consultant without the express written approval of City. It shall be Consultant's responsibility to assure that the Contract Officer is kept informed of the progress of the performance of the Services, and Consultant shall refer any decisions which must be made by City to the Contract Officer.

2) Consultant's Personnel: Consultant has, or will secure at its own expense, all personnel required to perform the Services required under this Agreement. All of the Services required under this Agreement shall be performed by Consultant or under its supervision, and all personnel engaged in the Services shall be qualified to perform such Services. Consultant shall make every reasonable effort to maintain the stability and continuity of Consultant's staff and sub-contractors, if any, assigned to perform the Services required under this Agreement.

Consultant shall notify City of all changes in Consultant's staff and sub-contractors, if any, assigned to perform the Services required under this Agreement, prior to and during any such performance. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires to reassign any staff or sub-contractor of Consultant, City shall give notice as set forth in Section 8.1. Consultant shall, immediately upon the receipt of the notice to re-assign staff from City, reassign such person or persons.

1.13 Independent Contractor.

A. Consultant is an independent contractor and not an employee of City. Consultant shall have no power to incur any debt, obligation, or liability on behalf of City. All Services provided pursuant to this Agreement shall be performed by Consultant or under its supervision. Consultant will determine the means, methods, and details of performing the Services. Any additional personnel performing Services under this Agreement on behalf of Consultant shall also not be employees of City and shall at all times be under Consultant's exclusive direction and control. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

B. Consultant shall indemnify and hold harmless City and its elected officials, officers, employees, servants, designated volunteers, and agents serving as independent contractors in the role of City officials, from any and all liability, damages, claims, costs and expenses of any nature to the extent arising from Consultant's personnel practices. City shall have the right to offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this Section.

1.14 Prohibition Against Subcontracting or Assignment.

The experience, knowledge, capability and reputation of Consultant, the Consultant Representative and employees were a substantial inducement for City to enter into this Agreement. Therefore, Consultant shall not contract with any other entity to perform in whole or in part the Services required hereunder without the express written approval of City. In addition, neither this Agreement nor any interest herein may be transferred, assigned, conveyed, hypothecated or encumbered voluntarily or by operation of law, whether for the benefit of creditors or otherwise, without the prior written approval of City. Transfers restricted hereunder shall include the transfer to any person or group of persons acting in concert of more than twenty-five percent (25%) of the present ownership and/or control of Consultant, taking all transfers into account on a cumulative basis. In the event of any such unapproved transfer, including any bankruptcy proceeding, this

Agreement shall be void. No approved transfer shall release Consultant or any surety of Consultant of any liability hereunder without the express consent of City.

ARTICLE 2. COMPENSATION AND METHOD OF PAYMENT.

2.1 Contract Sum.

Subject to any limitations set forth in this Agreement, as full compensation for Services satisfactorily rendered, City shall pay Consultant at the hourly rates set forth in the "Schedule of Compensation" attached hereto as **Exhibit C** and incorporated herein by this reference. In no event shall Consultant be paid more than Two Hundred Ninety-Five Thousand Dollars ($295,000.00) (the "Contract Sum"). The Contract Sum shall include the attendance of Consultant at all project meetings reasonably deemed necessary by City. Coordination of the performance of the Services with City is a critical component of the Services. If Consultant is required to attend additional meetings to facilitate such coordination, Consultant shall not be entitled to any additional compensation for attending those meetings.

2.2 Method of Compensation.

The method of compensation may include: (i) a lump sum payment upon completion of the Services, (ii) payment in accordance with specified tasks or the percentage of completion of the Services, (iii) payment for time and materials based upon Consultant's rates as specified in the Schedule of Compensation, provided that time estimates are provided for the performance of sub tasks, but not exceeding the Contract Sum or (iv) such other methods as may be specified in the Schedule of Compensation.

2.3 Reimbursable Expenses.

City shall only reimburse Consultant for those actual and necessary expenses expressly set forth in **Exhibit C**. Reimbursable expenses may include reimbursement for actual and necessary expenditures for reproduction costs, telephone expenses, and travel expenses approved by the Contract Officer in advance, or actual sub-contractor expenses of an approved sub-contractor pursuant to Section 1.14, and only if specified in the Schedule of Compensation.

2.4 Unauthorized Services and Expenses.

City will not pay for any Services or reimburse for any expenses incurred which are not specified in the Scope of Services, unless authorized in writing as set forth in Section 1.8 of this Agreement. City shall make payment for such authorized additional Services and expenses in accordance with Article 2 of this Agreement.

2.5 Invoices.

Each month Consultant shall furnish to City an original invoice for all Services performed and expenses incurred during the preceding month. Each such invoice shall contain all of the information set forth in Section III of **Exhibit C** to this Agreement. By submitting an invoice for payment under this Agreement, Consultant is certifying compliance with all provisions of the

Agreement. Consultant shall not invoice City for any duplicate Services performed by more than one person.

City shall independently review each invoice submitted by Consultant to determine whether the Services performed and expenses incurred are in compliance with the provisions of this Agreement. City will use its best efforts to cause Consultant to be paid within thirty (30) days of receipt of Consultant's correct and undisputed invoice, except as to any charges for Services performed or expenses incurred by Consultant which are disputed by City, or as provided in Section 6.3. In the event any charges or expenses are disputed by City, the original invoice shall be returned by City to Consultant for correction and resubmission. Review and payment by City of any invoice provided by Consultant shall not constitute waiver of any rights or remedies provided herein or any applicable law.

2.6 Waiver.

Payment to Consultant for Services performed pursuant to this Agreement shall not be deemed to waive any defects in Services performed by Consultant.

ARTICLE 3. PERFORMANCE SCHEDULE

3.1 Time of Essence.

Time is of the essence in the performance of this Agreement; provided, however, that the foregoing shall not be construed to limit or deprive a Party of the benefits of any grace or use period allowed in this Agreement.

3.2 Schedule of Performance.

Consultant shall commence the Services pursuant to this Agreement upon receipt of a written notice to proceed and shall perform all Services within the time period(s) established in the "Schedule of Performance" attached hereto as **Exhibit D** and incorporated herein by this reference.

3.3 Force Majeure.

The time period(s) specified in the Schedule of Performance for performance of the Services rendered pursuant to this Agreement may be extended because of any delays due to unforeseeable causes beyond the control and without the fault or negligence of Consultant. Such unforeseeable consequences include, but are not restricted to, acts of God or public enemy, unusually severe weather, fires, earthquakes, floods, epidemics, quarantine restrictions, riots, strikes, freight embargoes, wars, litigation, and/or acts of any governmental agency, including City, if Consultant shall within ten (10) days of the commencement of such delay notify the Contract Officer in writing of the causes of the delay. The Contract Officer shall ascertain the facts and the extent of delay, and extend the time for performing the Services for the period of the enforced delay when and if in the judgment of the Contract Officer such delay is justified, subject to the provisions of Section 1.8. The Contract Officer's determination (or the City Council's determination, in the event the period of enforced delay exceeds the period specified in Section 1.8) shall be final and conclusive upon the Parties to this Agreement. In no event shall Consultant

be entitled to recover damages against City for any delay in the performance of this Agreement, however caused; Consultant's sole remedy shall be the extension of the Agreement pursuant to this Section.

3.4 Term.

The Term of this Agreement shall be from the Effective Date through June 30, 2027 with an option to renew for two one-year terms, unless sooner terminated as provided in Article 6 of this Agreement or extended as provided in Sections 1.8 and 3.3 of this Agreement. Maximum term and any subsequent amendment or modification shall not exceed five (5) years.

ARTICLE 4. INSURANCE AND INDEMNIFICATION

4.1 Minimum Scope and Limits of Insurance.

Consultant shall procure and at all times during the term of this Agreement carry, maintain, and keep in full force and effect, insurance as follows:

A. Commercial General Liability Insurance with a minimum limit of $1,000,000.00 per occurrence for bodily injury, personal injury and property damage and a general aggregate limit of $2,000,000.00 per project or location. If Consultant is a limited liability company, the commercial general liability coverage shall be amended so that Consultant and its managers, members, affiliates, employees, agents and other persons necessary or incidental to its operation are insureds.

B. Automobile Liability Insurance for any owned, non-owned or hired vehicle used in connection with the performance of this Agreement with a combined single limit of $1,000,000.00 per accident for bodily injury and property damage. If Consultant does not use any owned, non-owned or hired vehicles in the performance of Services under this Agreement, Consultant shall obtain a non-owned auto endorsement to the Commercial General Liability policy.

C. Workers' Compensation Insurance as required by the State of California and Employer's Liability Insurance with a minimum limit of $1,000,000.00 per accident for bodily injury or disease. If Consultant has no employees while performing Services under this Agreement, workers' compensation policy is not required; however, Consultant shall execute a declaration that it has no employees.

D. Professional Liability/Errors and Omissions Insurance with minimum limits of $1,000,000.00 per claim and in the aggregate.

4.2 Acceptability of Insurers.

The insurance policies required under this Article shall be issued by an insurer admitted to write insurance in the State of California with a rating of A:VII or better in the latest

edition of the A.M. Best Insurance Rating Guide. Self-insurance shall not be considered to comply with the insurance requirements under this Article.

4.3 Additional Insured.

The commercial general and automobile liability policies shall contain an endorsement naming City, its officers, employees, agents and volunteers as additional insureds.

4.4 Primary and Non-Contributing.

The insurance policies required under this Article shall apply on a primary non-contributing basis in relation to any other insurance or self-insurance available to City. Any insurance or self-insurance maintained by City, its officers, employees, agents or volunteers, shall be in excess of Consultant's insurance and shall not contribute with it.

4.5 Consultant's Waiver of Subrogation.

The insurance policies required under this Article shall not prohibit Consultant and Consultant's employees, agents or sub-contractors from waiving the right of subrogation prior to a loss. Consultant hereby waives all rights of subrogation against City.

4.6 Deductibles and Self-Insured Retentions.

Any deductibles or self-insured retentions must be declared to and approved by City. At City's option, Consultant shall either reduce or eliminate the deductibles or self-insured retentions with respect to City; or Consultant shall procure a bond guaranteeing payment of losses and expenses.

4.7 Cancellations or Modifications to Coverage.

Consultant shall not cancel, reduce or otherwise modify the insurance policies required by this Article during the term of this Agreement. The commercial general and automobile liability policies required under this Agreement shall be endorsed to state that should the issuing insurer cancel the policy before the expiration date, the issuing insurer will endeavor to mail 30 days' prior written notice to City. If any insurance policy required under this Article is canceled or reduced in coverage or limits, Consultant shall, within two (2) Business Days (as defined in Section 8.12) of notice from the insurer, phone, fax or notify City via certified mail, return receipt requested, of the cancellation of or changes to the policy.

4.8 City Remedy for Noncompliance.

If Consultant does not maintain the policies of insurance required under this Article in full force and effect during the term of this Agreement, or in the event any of Consultant's policies do not comply with the requirements under this Article, City may either immediately terminate this Agreement or, if insurance is available at a reasonable cost, City may, but has no duty to, take out the necessary insurance and pay, at Consultant's expense, the premium thereon. Consultant shall promptly reimburse City for any premium paid by City, or City may withhold amounts sufficient to pay the premiums from payments due to Consultant.

4.9 Evidence of Insurance.

Prior to the performance of Services under this Agreement, Consultant shall furnish the City Clerk with a certificate or certificates of insurance and all original endorsements evidencing and effecting the coverages required under this Article. The endorsements are subject to City's approval. Consultant may provide complete, certified copies of all required insurance policies to City. Consultant shall maintain current endorsements on file with the City Clerk. Consultant shall provide proof to the City Clerk that insurance policies expiring during the term of this Agreement have been renewed or replaced with other policies providing at least the same coverage. Consultant shall furnish such proof at least two (2) weeks prior to the expiration of the coverages.

4.10 Indemnity Requirements not Limiting.

Procurement of insurance by Consultant shall not be construed as a limitation of Consultant's liability or as full performance of Consultant's duty to indemnify City under this Agreement.

4.11 Sub-contractor Insurance Requirements.

Consultant shall require each of its sub-contractors that perform Services under this Agreement to maintain insurance coverage that meets all of the requirements of this Article.

4.12 Indemnification, Hold Harmless, and Duty to Defend.

A. Indemnification of City.

1) To the fullest extent permitted by law, Consultant shall, at its sole cost and expense, defend, hold harmless and indemnify City and its elected officials, officers, attorneys, agents, employees, designated volunteers, successors, assigns and those City agents serving as independent contractors in the role of City officials (collectively "Indemnitees"), from and against any and all damages, costs, expenses, liabilities, claims, demands, causes of action, proceedings, expenses, judgments, penalties, liens, and losses of any nature whatsoever, including fees of accountants, attorneys, or other professionals and all costs associated therewith and the payment of all consequential damages (collectively "Liabilities"), at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Consultant, its officers, agents, servants, employees, sub-contractors, materialmen, consultants or their officers, agents, servants or employees (or any entity or individual that Consultant shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties. Consultant shall defend the Indemnitees in any action or actions filed in connection with any Liabilities with counsel of the Indemnitees' choice, and shall pay all costs and expenses, including all attorneys' fees and experts' costs actually incurred in connection with such defense. Consultant shall reimburse the Indemnitees for any and all legal expenses and costs incurred by Indemnitees in connection therewith.

2) Consultant shall pay all required taxes on amounts paid to Consultant under this Agreement, and indemnify and hold City harmless from any and all taxes, assessments, penalties, and interest asserted against City by reason of the independent contractor relationship created by this Agreement. Consultant shall fully comply with the workers' compensation law regarding Consultant and Consultant's employees. Consultant shall indemnify and hold City harmless from any failure of Consultant to comply with applicable workers' compensation laws. City may offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this subparagraph A.2.

3) Consultant shall obtain executed indemnity agreements with provisions identical to those in this Article from each and every sub-contractor or any other person or entity involved by, for, with or on behalf of Consultant in the performance of this Agreement. If Consultant fails to obtain such indemnity obligations, Consultant shall be fully responsible and indemnify, hold harmless and defend the Indemnitees from and against any and all Liabilities at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Consultant's sub-contractor, its officers, agents, servants, employees, sub-contractors, materialmen, consultants or their officers, agents, servants or employees (or any entity or individual that Consultant's sub-contractor shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties.

B. Workers' Compensation Acts not Limiting. Consultant's indemnifications and obligations under this Article, or any other provision of this Agreement, shall not be limited by the provisions of any workers' compensation act or similar act. Consultant expressly waives its statutory immunity under such statutes or laws as to City, its officers, agents, employees and volunteers.

C. Insurance Requirements not Limiting. City does not, and shall not, waive any rights that it may possess against Consultant because of the acceptance by City, or the deposit with City, of any insurance policy or certificate required pursuant to this Agreement. The indemnities in this Article shall apply regardless of whether or not any insurance policies are determined to be applicable to the Liabilities, tax, assessment, penalty or interest asserted against City.

D. Survival of Terms. Consultant's indemnifications and obligations under this Article shall survive the expiration or termination of this Agreement.

ARTICLE 5. RECORDS, REPORTS, AND RELEASE OF INFORMATION

5.1 Service Records.

Consultant shall keep, and require sub-contractors to keep, such ledgers, books of accounts, invoices, vouchers, canceled checks, reports, studies or other documents relating to the disbursements charged to City and Services performed hereunder (the "Service Records"), as shall be necessary to perform the Services required by this Agreement and enable the Contract Officer

to evaluate the performance of such Services. Any and all such Service Records shall be maintained in accordance with generally accepted accounting principles and shall be complete and detailed. The Contract Officer shall have full and free access to such Service Records at all times during normal business hours of City, including the right to inspect, copy, audit and make copies and transcripts from such Service Records. Such Service Records shall be maintained for a period of three (3) years following completion of the Services hereunder, and City shall have access to such Service Records in the event any audit is required. In the event of dissolution of Consultant's business, custody of the Service Records may be given to City, and access shall be provided by Consultant's successor in interest ("Consultant's Successor"). If custody of the Service Records is given to Consultant's Successor, Consultant shall give written notice to City of the transfer of the Service Records to Consultant's Successor. The notice shall include contact information (address and telephone number) for Consultant's Successor, and access shall be provided to City by Consultant's Successor.

5.2 Reports.

Consultant shall periodically prepare and submit to the Contract Officer such reports concerning the performance of the Services required by this Agreement as the Contract Officer shall require. Consultant hereby acknowledges that City is greatly concerned about the cost of Services to be performed pursuant to this Agreement. For this reason, Consultant agrees that if Consultant becomes aware of any facts, circumstances, techniques, or events that may or will materially increase or decrease the cost of the Services contemplated herein, Consultant shall promptly notify the Contract Officer of that fact, circumstance, technique or event and the estimated increased or decreased cost related thereto.

5.3 Ownership of Documents.

All drawings, specifications, maps, designs, photographs, studies, surveys, data, notes, computer files, reports, records, documents and other materials (the "Consultant Documents") prepared by Consultant, its employees, sub-contractors and agents in the performance of this Agreement shall be the property of City and shall be delivered to City upon request of the Contract Officer or upon the termination of this Agreement. Consultant shall have no claim for further employment or additional compensation as a result of the exercise by City of its full rights of ownership use, reuse, or assignment of the Consultant Documents hereunder. Any use, reuse or assignment of such completed Consultant Documents for other projects and/or use of uncompleted Consultant Documents without specific written authorization by Consultant will be at City's sole risk and without liability to Consultant, and Consultant's guarantee and warranties shall not extend to such use or assignment. Consultant may retain copies of such Consultant Documents for its own use. Consultant shall have an unrestricted right to use the concepts embodied therein. All sub-contractors shall provide for assignment to City of all Consultant Documents prepared by them; and in the event Consultant fails to secure such assignment, Consultant shall indemnify City for all damages resulting therefrom.

5.4 Confidentiality and Release of Information.

A. All information gained or work product produced by Consultant in performance of this Agreement shall be considered confidential, unless such information is in the

public domain or already known to Consultant. Consultant shall not release or disclose any such information or work product to persons or entities other than City without prior written authorization from the Contract Officer.

B. Consultant, its officers, employees, agents or sub-contractors, shall not, without prior written authorization from the Contract Officer or unless requested by the City Attorney, voluntarily provide documents, declarations, letters of support, testimony at depositions, response to interrogatories or other information concerning the Services performed under this Agreement. Response to a subpoena or court order shall not be considered "voluntary" provided Consultant gives City notice of such court order or subpoena.

C. If Consultant, or any officer, employee, agent or sub-contractor of Consultant, provides any information or work product in violation of this Agreement, then City shall have the right to reimbursement and indemnity from Consultant for any damages, costs and fees, including attorneys' fees, caused by or incurred as a result of Consultant's conduct.

D. Consultant shall promptly notify City should Consultant, its officers, employees, agents or sub-contractors be served with any summons, complaint, subpoena, notice of deposition, request for documents, interrogatories, request for admissions or other discovery request, court order or subpoena from any Party regarding this Agreement and the Services performed thereunder. City retains the right, but has no obligation, to represent Consultant or be present at any deposition, hearing or similar proceeding. Consultant agrees to cooperate fully with City and to provide City with the opportunity to review any response to discovery requests provided by Consultant. However, this right to review any such response does not imply or mean the right by City to control, direct, or rewrite the response.

ARTICLE 6. ENFORCEMENT OF AGREEMENT AND TERMINATION

6.1 California Law.

This Agreement, and any dispute arising from the relationship between the Parties to this Agreement, shall be interpreted, construed and governed both as to validity and to performance of the Parties in accordance with the laws of the State of California. Legal actions concerning any dispute, claim or matter arising out of or in relation to this Agreement shall be instituted in the Superior Court of the County of Riverside, State of California, or any other appropriate court in such county, and Consultant covenants and agrees to submit to the personal jurisdiction of such court in the event of such action. In the event of litigation in a U.S. District Court, venue shall lie exclusively in the Central District of California, in Riverside.

6.2 Disputes; Default.

A. In the event that City determines Consultant is in default under the terms of this Agreement, City shall have no obligation or duty to continue compensating Consultant for any Services performed after the date of default. In addition to the provisions of Section 4.8, and the right to terminate pursuant to Section 6.7, if the City Manager determines that Consultant is in default in the performance of any of the terms or conditions of this Agreement, City may serve Consultant with written notice of the default. Consultant shall have ten (10) calendar days after service upon it of the notice in which to cure the default by rendering a satisfactory performance.

In the event that Consultant fails to cure its default within such period of time, City may, notwithstanding any other provision of this Agreement, terminate this Agreement without further notice and without prejudice to any other remedy to which it may be entitled at law, in equity or under this Agreement.

B. In the event of termination pursuant to this Section, City may take over the Services and prosecute the same to completion by contract or otherwise, and Consultant shall be liable to the extent that the total cost for completion of the Services required hereunder exceeds the compensation herein stipulated (provided that City shall use reasonable efforts to mitigate such damages), and City may withhold any payments to Consultant for the purpose of set-off or partial payment of the amounts owed City as provided in Section 6.3.

6.3 Retention of Funds.

Consultant hereby authorizes City to deduct from any amount payable to Consultant (whether or not arising out of this Agreement): (i) any payment amount of which may be in dispute hereunder or which is necessary to compensate City for any losses, costs, liabilities, or damages suffered by City, (ii) all amounts retained pursuant to the provisions of Section 4.8, (iii) all amounts for which City may be liable to third parties, by reason of Consultant's acts or omissions in performing or failing to perform Consultant's obligation under this Agreement, and (iv) all payments due or that become due to Consultant during the period that Consultant or any of its sub-contractors fail to maintain any required insurance in full force and effect, until notice is received by City that the required insurance has been restored to full force and effect and that the premiums therefore have been paid for a period satisfactory to City, as provided in Section 4.9, above. In the event that any claim is made by a third party, the amount or validity of which is disputed by Consultant, or any indebtedness shall exist which shall appear to be the basis for a claim of lien, City may withhold from any payment due, without liability for interest because of such withholding, an amount sufficient to cover such claim. The failure of City to exercise such right to deduct or to withhold shall not, however, affect the obligations of Consultant to insure, indemnify, and protect City as elsewhere provided herein.

6.4 Waiver.

Waiver by any Party to this Agreement of any term, condition, or covenant of this Agreement shall not constitute a waiver of any other term, condition, or covenant. Waiver by any Party of any breach of the provisions of this Agreement shall not constitute a waiver of any other provision or a waiver of any subsequent breach or violation of any provision of this Agreement. Acceptance by City of any Services by Consultant shall not constitute a waiver of any of the provisions of this Agreement. No delay or omission in the exercise of any right or remedy by a non-defaulting Party on any default shall impair such right or remedy or be construed as a waiver. Any waiver by either Party of any default must be in writing, and shall not be a waiver of any other default concerning the same or any other provision of this Agreement.

6.5 Rights and Remedies are Cumulative.

Except with respect to rights and remedies expressly declared to be exclusive in this Agreement, the rights and remedies of the Parties are cumulative and the exercise by either Party

of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same default or any other default by the other Party.

6.6 Legal Action.

In addition to any other rights or remedies, either Party may take legal action, in law or in equity, to cure, correct or remedy any default, to recover damages for any default, to compel specific performance of this Agreement, to obtain declaratory or injunctive relief, or to obtain any other remedy consistent with the purposes of this Agreement. Notwithstanding any contrary provision herein, Consultant must file a statutory claim pursuant to Government Code Sections 905 et seq. and 910 et seq., in order to pursue a legal action against City under this Agreement.

6.7 Termination Prior to Expiration of Term.

This Article 6 shall govern any termination of this Agreement except as specifically provided in Section 6.2 for termination for default of Consultant. City reserves the right to terminate this Agreement at any time, with or without cause, upon thirty (30) days' written notice to Consultant, except that where termination is due to the fault of Consultant, the period of notice may be a shorter time as may be determined by the Contract Officer. In addition, Consultant reserves the right to terminate this Agreement at any time, with or without cause, upon sixty (60) days' written notice to City, except that where termination is due to the fault of City, the period of notice may be a shorter time as Consultant may determine. Upon receipt of any notice of termination, Consultant shall immediately cease all Services hereunder except such as may be specifically approved by the Contract Officer. Except where Consultant has initiated termination, Consultant shall be entitled to compensation for all Services rendered prior to the effective date of the notice of termination and for any Services authorized by the Contract Officer thereafter in accordance with the Schedule of Compensation or such as may be approved by the Contract Officer, except as provided in Section 6.3. In the event Consultant has initiated termination, Consultant shall be entitled to compensation only for the reasonable value of the work product actually produced hereunder. In the event of termination without cause pursuant to this Section, the terminating Party need not provide the non-terminating Party with the opportunity to cure pursuant to Section 6.2.

6.8 Attorneys' Fees.

In any litigation or other proceeding by which a Party seeks to enforce its rights under this Agreement (whether in contract, tort or both) or seeks a declaration of any rights or obligations under this Agreement, the prevailing Party in such action or proceeding, in addition to any other relief which may be granted, whether legal or equitable, shall be entitled to reasonable attorneys' fees. Attorneys' fees shall include attorney's fees on any appeal, and in addition the Party entitled to attorneys' fees shall be entitled to all other reasonable costs for investigating such action, taking depositions and discovery and all other necessary costs the court allows which are incurred in such litigation. All such fees shall be deemed to have accrued on commencement of such action and shall be enforceable whether or not such action is prosecuted to judgment.

ARTICLE 7. CITY OFFICERS AND EMPLOYEES: NON-DISCRIMINATION

7.1 Non-liability of City Officers and Employees.

No officer or employee of City shall be personally liable to Consultant, or Consultant's Successor, in the event of any default or breach by City or for any amount which may become due to Consultant or Consultant's Successor, or for breach of any obligation of the terms of this Agreement.

7.2 Conflict of Interest.

Consultant covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, which would conflict in any manner with the interests of City or which would in any way hinder Consultant's performance of Services under this Agreement. Consultant further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or sub-contractor without the express written consent of the Contract Officer. Consultant agrees to at all times avoid conflicts of interest or the appearance of any conflicts of interest with the interests of City in the performance of this Agreement.

No officer or employee of City shall have any direct or indirect financial interest in this Agreement within the scope of Government Code section 1090, nor shall any such officer or employee make, participate in making, or use his or her official position to influence, any City decision relating to the Agreement which has a material financial effect on his or her financial interests or the financial interests of any corporation, partnership or association in which he or she is, directly or indirectly, interested, in violation of any State statute or regulation. Consultant warrants that it has not paid or given, and will not pay or give any third party any money or other consideration for obtaining this Agreement.

Consultant and its officers, employees, associates and sub-contractors, if any, shall comply with all conflict of interest statutes of the State of California applicable to Consultant's Services under this Agreement, including the Political Reform Act (Gov. Code § 81000, et seq.) and Government Code Section 1090. During the term of this Agreement, Consultant may perform similar services for other clients; but Consultant and its officers, employees, associates and sub-contractors shall not, without the Contract Officer's prior written approval, perform services for another person or entity for whom Consultant is not currently performing services that would require Consultant or one of its officers, employees, associates or sub-contractors to abstain from a decision under this Agreement pursuant to a conflict of interest statute. Consultant shall incorporate a clause substantially similar to this Section into any subcontract that Consultant executes in connection with the performance of this Agreement.

7.3 Covenant Against Discrimination.

Consultant covenants that, by and for itself, its heirs, executors, assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, gender, sexual orientation, marital status, national origin, or ancestry in the performance of this Agreement. Consultant shall take affirmative action to insure that applicants are employed, and that employees

are treated during employment, without regard to their race, color, creed, religion, sex, marital status, national origin, or ancestry, or other protected class.

7.4 Unauthorized Aliens.

Consultant hereby promises and agrees to comply with all of the provisions of the Federal Immigration and Nationality Act, 8 U.S.C.A. §§ 1101, et seq., as amended, and in connection therewith, shall not employ unauthorized aliens as defined therein. Should Consultant so employ such unauthorized aliens for the performance of Services covered by this Agreement, and should the any liability or sanctions be imposed against City for such use of unauthorized aliens, Consultant hereby agrees to and shall reimburse City for the cost of all such liabilities or sanctions imposed, together with any and all costs, including attorneys' fees, incurred by City.

ARTICLE 8. MISCELLANEOUS PROVISIONS

8.1 Notices.

Any notice, demand, request, document, consent, approval, bill, invoice, report or other communication required or permitted under this Agreement shall be in writing and conclusively deemed effective: (a) on confirmed delivery by courier service or overnight delivery service during Consultant's and City's regular business hours; or (b) three (3) Business Days after deposit in the United States mail, by certified or registered mail, and addressed to the Party to be notified as set forth below:

If to City	Attn: Anthony Riley City's Public Information Officer City of Banning 99 East Ramsey Street Banning, California 92220 Email: ariley@banningca.gov
With a courtesy copy to:	Serita R. Young, City Attorney Richards, Watson & Gershon 350 South Grand Avenue, 37th Floor Los Angeles, California 90071 Email: SYoung@rwglaw.com
If to Consultant:	Attn: Liselle DeGrave Principal in Charge DeGrave Communications Inc. 40575 Cal Oaks Road D2-137 Murrieta, CA 92562 Email: liselle@degravepr.com

8.2 Interpretation.

The terms of this Agreement shall be construed in accordance with the meaning of the language used and shall not be construed for or against either Party by reason of the authorship of this Agreement or any other rule of construction which might otherwise apply.

8.3 Counterparts.

This Agreement may be executed in counterparts, each of which shall be deemed to be an original, and such counterparts shall constitute one and the same instrument.

8.4 Integration; Amendment.

This Agreement, and all exhibits referred to in this Agreement, constitute the final, complete and exclusive statement of the terms of the agreement between the Parties pertaining to the subject matter of this Agreement and supersede all other and cancels any and all previous negotiations, arrangements, agreements and understandings, if any, between the Parties, and none shall be used to interpret this Agreement. No Party has been induced to enter into this Agreement by, nor is any Party relying on, any representation or warranty except those expressly set forth in this Agreement. No amendment to or modification of this Agreement, nor any provision or breach hereof waived, shall be valid unless made in writing and approved by Consultant and by City Council. The Parties agree that this requirement for written modifications cannot be waived and that any attempted waiver shall be void.

8.5 Severability.

In the event that any one or more of the phrases, sentences, clauses, paragraphs, or sections contained in this Agreement shall be declared invalid or unenforceable by a valid judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining phrases, sentences, clauses, paragraphs, or sections of this Agreement which are hereby declared as severable and shall be interpreted to carry out the intent of the Parties hereunder unless the invalid provision is so material that its invalidity deprives either Party of the basic benefit of their bargain or renders this Agreement meaningless.

8.6 Mutual Cooperation.

A. City's Cooperation. City shall provide Consultant with all pertinent data, documents and other requested information as is reasonably available for Consultant's proper performance of the Services required under this Agreement.

B. Consultant's Cooperation. In the event any claim or action is brought against City relating to Consultant's performance of Services rendered under this Agreement, Consultant shall render any reasonable assistance that City requires.

8.7 No Third Party Beneficiaries Intended.

This Agreement is made solely for the benefit of the Parties to this Agreement and their respective successors and assigns, and no other person or entity may have or acquire a right by virtue of this Agreement.

8.8 Final Payment Acceptance Constitutes Release.

The acceptance by Consultant of the final payment made under this Agreement shall operate as and be a release of City from all claims and liabilities for compensation to Consultant for anything done, furnished or relating to Consultant's Services. Acceptance of payment shall be any negotiation of City's check or the failure to make a written extra compensation claim within ten (10) calendar days of the receipt of that check. However, approval or payment by City shall not constitute, nor be deemed, a release of the responsibility and liability of Consultant, its employees, sub-contractors and agents for the accuracy and competency of the information provided and/or Services performed; nor shall such approval or payment be deemed to be an assumption of such responsibility or liability by City for any defect or error in the Services prepared by Consultant, its employees, sub-contractors and agents.

8.9 Non-Appropriation of Funds.

Payments to be made to Consultant by City for Services performed within the current fiscal year which are within the current fiscal budget and within an available, unexhausted fund. In the event that City does not appropriate sufficient funds for payment of Consultant's Services beyond the current fiscal year, this Agreement shall cover payment for Consultant's Services only to the conclusion of the last fiscal year in which City appropriates sufficient funds and shall automatically terminate at the conclusion of such fiscal year.

8.10 Headings.

The headings in this Agreement are included solely for convenience of reference and shall not affect the interpretation of any provision of this Agreement or any of the rights or obligations of the Parties to this Agreement.

8.11 Word Usage.

Unless the context clearly requires otherwise, (a) the words "shall," "will" and "agrees" are mandatory and "may" is permissive; (b) "or" is not exclusive; and (c) "includes" or "including" are not limiting.

8.12 Business Days.

"Business Days" refers to days that the Banning City Hall is open for business.

8.13 Corporate Authority.

The persons executing this Agreement on behalf of the Parties hereto warrant that (i): such Party is duly organized and existing, (ii) they are duly authorized to execute and deliver

this Agreement on behalf of that Party, (iii) by so executing this Agreement, such Party is formally bound to the provisions of this Agreement, and (iv) the entering into this Agreement does not violate any provision of any other Agreement to which that Party is bound. This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the Parties.

8.14 Electronic Signatures.

Each Party may adopt as its signature an electronic identification consisting of a symbol or code that is affixed to or contained in each document transmitted by such Party ("electronic signature"). The Parties hereto herby agree that electronic signatures are acceptable, shall have the same force and effect under the law as original wet signatures, and shall be sufficient to verify that the Parties have executed this Agreement and such other documents transmitted by the Parties.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF the Parties hereto have executed this Agreement the day and year first hereinabove written.

SCOPE OF SERVICES

I. Consultant will perform the following Services in connection with providing On-Call Public Relation Services prepared in connection therewith:

II. As part of the Services, Consultant will prepare and deliver the following tangible work products and services to City:

Statement of Understanding and Approach

DeGrave Communications Understands You, City of Banning.

City of Banning is looking for qualified firms to help tell its story through providing and implementing innovative, effective, well-planned and meaningful media and public relations services for the City's public outreach projects.

Having seen significant growth and development over the past 5 years, the City is ready to partner to with a local PR firm to serve as an extension of the internal team. The selected firm will be utilized to enhance the City's image, build relationships with the City and effectively communicate key messages to target audiences.

As such, it's crucial for the City to tell its story through engaging, dynamic communications with key audiences. The City, therefore, has an opportunity to proactively position itself in the as a visionary leader that cares about the community and visitors; fosters goodwill amongst stakeholders and builds trust and satisfaction with the community through using impactful communications and outreach strategies.

DeGrave Communications is here to help City of Banning strategically develop effective public relations and education strategies that encompass the County's mission, values and culture as well as help residents and community members identify and connect with City programs and resources.

Our proven methodology:

Collaboration

Strategy

Results

Statement of Understanding and Approach

OUR PROMISE TO THE CITY OF BANNING

Providing the City of Banning exceptional customer service start to finish on every project is DeGrave Communications' goal. Our leadership team is based in Southern California and can be readily available when needed. DeGrave Communications uses the following tools and best practices to support consistent and transparent communications throughout the project.

We are committed to flexibility and changes to your scope and schedule and ensuring all projects are finished on time and on budget while following the City's brand guidelines.

Client Check-In

These regular meetings will allow the City of Banning and DeGrave Communications to share progress updates and next steps to ensure all team members are aligned and that projects continue to move forward and meet all deadlines. Meetings can be held in person or will be held via Zoom calls.

Weekly DeGrave Strategy Meetings

These meetings allow the internal DeGrave Communications team to touch base on project deliverables and timelines.

Smartsheets

Our team uses Smartsheets for day-to-day project management, timelines, approvals and follow-ups. We will give the City of Banning's team access to the project management sheets upon project kick-off.

Dropbox

Dropbox is used for all digital assets, such as logos, marketing materials and documents throughout the process. DeGrave Communications will set up a stand-alone Dropbox folder and provide the City's team access.

Statement of Understanding and Approach

DeGrave Communications employs a strategic, multi-pronged approach to our communications, marketing and outreach efforts to ensure maximum results

Effective communications and outreach strategies are made – not copied.

We know public-sector, agencies and communications:
Working with DeGrave Communications, our clients benefit from the large agency expertise, in-depth capabilities and top-notch advisory services while receiving an unmatched personal, hands-on experience.

We understand the unique challenges facing government agencies while also providing results-driven cutting edge strategies and tactics that resonate with our clients and the communities they serve.

Our top team members have more than 100 years combined experience working in cities and special districts throughout California. In addition, our firm is headed up by award-winning public relations professionals who hold the elite Accreditation in Public Relations to ensure our clients receive the highest level of service focused on multifaceted, precise and measurable communications strategies. The rest of our carefully curated team for this project has worked with dozens of public sector clients in California, nationally and internationally producing exceptional results.

When it comes to crafting impactful communications, education and marketing strategies, we rely on using our four-pronged approach of research, planning, implementation and evaluation.

Phase 1: Research

Effective Communications and Outreach Strategies are Created – Not Copied. Research is the foundation for effective, impactful communication and marketing projects and programs – regardless of the project's size. Upon engagement with

DeGrave Communications, our firm will embark upon a research and discovery process for every project. Our team will move forward with using information gathered in the research phase to develop objectives, strategies, tactics, timelines and measure results for each project.

Depending on the on-call project, some of the research methodologies we may recommend to accomplish this phase include:

KICKOFF MEETING

We will commence with a kick-off meeting to include key City of Banning staff and the DeGrave Communications team. City of Banning will provide an overview of key projects, identify key milestones, identify roles and responsibilities for both DeGrave and City of Banning team members and agree on contract deliverables.

COMMUNICATIONS AND MEDIA AUDIT

A communication and material audit will lend to understanding how the City of Banning is currently communicating with its stakeholders and what existing tactics are being used as well as what communications opportunities and challenges exist. DeGrave Communications will review current materials and earned media coverage to assess how the City's brand is being conveyed. City of Banning is to provide our team with files of current materials.

Statement of Understanding and Approach

AUDIENCE IDENTIFICATIONS

City of Banning serves dozens of internal and external audiences and must continue to evolve its outreach efforts to meet the changing needs of each audience and effectively engage with the audiences they serve. DeGrave Communications is based out of Murrieta, just 53 miles from Banning, and has experience working with numerous public-sector clients throughout the region and can leverage inside knowledge of key audiences to refine these groups during the identification process. This information will be used to develop strategies and tactics for key communications programs and projects.

Phase 2: Planning

Using the data and insights uncovered in Phase 1, we will begin to develop the overall communications and outreach strategies for the City when working on projects.

COMMUNICATIONS STRATEGY PRESENTATION

Prior to moving to Phase 3: Implementation for each project, we will present our strategies to the City of Banning team to provide an opportunity for feedback and ensure a mutually agreed upon direction. Given the nature of the project, this may be as simple as an email or phone call or may require a virtual or in-person meeting.

Phase 3: Implementation

As City of Banning is looking for a firm to provide various on-call Professional Services for Public Relations and Community Outreach Consulting for many programs, project and initiatives from Public Works, DeGrave Communications has provided a comprehensive list of services our firm offers relating to the City's key areas noted in the scope of work:

- Strategic messaging and branding support for Public Works Divisions, including Engineering, Water, Wastewater, Streets, Refuse, Transit, Building Maintenance, Fleet, Stormwater, Airport, and Service Requests.
- Graphic design services for brochures, handouts, and website content, including infographics and targeted visuals.
- Provision of stock footage or custom photography for projects, events, and publications, both online and in print.
- Image retouching and adjustments for video and photo formats.
- Assistance with design color theory and typography.
- Preparation of digital files for formatting needs.
- Support and coordination for public outreach meetings and hotlines related to Public Works Department initiatives.
- Arrangement of videography services.
- Support during emergency events, including message development for media and the public.
- Creation of social media posts and outreach material.
- Keyword research and SEO optimization for content, with analysis of web traffic.
- Development of animated videos on relevant topics.
- Digital marketing across various channels such as search engines, websites, social media, email, and mobile apps.
- Preparation of project logos, surveys, and websites.
- Advertising and promotion of public workshops and community meetings.
- Additional services as needed.

Statement of Understanding and Approach

For Other City Departments:

- Purchasing and placement of advertising across web, radio, and print.
- Social media support, including creating and publishing posts and short social videos.
- Graphic design and infographics for social media, websites, or printed materials.
- Photography and video shooting and editing for events and promotions.
- Assistance with newsletters or other public documentation, including content gathering and formatting.
- Press and media release support.
- Attendance at City Council meetings if required.

OUTREACH MATERIALS DESIGN AND MESSAGING

Need a newsletter, collateral materials, flyer or postcard? No problem! Our team of experts have decades of experience working with public agencies and understand how to simplify complex water topics for key audiences. Our award-winning collateral blends compelling messages along with engaging graphics. From annual reports to monthly e-newsletters, from financial reports to water quality reports, our team's experience is vast. We are here to support the City with design of collateral materials, as well as copywriting and messaging. Our team has experience creating dynamic collateral for public agencies that resonate with the community. We incorporate engaging storytelling and impactful graphics into our award- winning materials.

QUARTERLY NEWSLETTER CONTENT

From e-newsletters to hard copy newsletters, our team has experience creating dynamic newsletters for public agencies that resonate with the community. We incorporate engaging storytelling and impactful graphics into our award- winning newsletters.

GRAPHIC DESIGN

Graphic elements help bring stories to life. Whether it's digital or print, our seasoned designers have decades of experience in developing graphics for visual identities, ads, web-based user interface, publications, motion graphics/animation, illustration and more.

TRANSLATION

City of Banning is home to a diverse population and materials often require translation into Spanish. We do not rely on Google Translate, which often provides incorrect translations that can have embarrassing or costly consequences. Rather, our talented team of human translators can quickly turn around quality translations that take into account the nuance of a language. Our team has translated numerous documents over the years from technical reports to Prop. 218 notices.

EBLASTS

Direct emails from an organization are one of the best ways to reach an audience. Our team is experienced in working with various email marketing software systems and can help City of Banning create effective email marketing campaigns to meet the City's goals and convey important, timely information to residents and stakeholders. Services provided for email marketing include content development and branding.

Statement of Understanding and Approach

MEDIA RELATIONS

A well-executed media relations strategy ensures your agency is communicating its newsworthy information to the everchanging media market encompassing print, radio, tv and web. Our team has years of experience and relationships with key regional and national media outlets. We provide our clients with the following services: developing news releases and media alerts; media pitching; media monitoring (Critical Mention); speaking points; interview preparation; and news conference coordination (in person and digital).

COMMUNICATIONS SUPPORT FOR UNFORESEEN ISSUES/ CRISIS COMMUNICATIONS

Our team has decades of direct experience handling issues/crisis communications response strategies for numerous agencies, including City of South Pasadena, SCV Water, Western Municipal Water District, and Elsinore Valley Municipal Water District, to name a few.

In addition, our team is trained in working in an emergency operations center and joint information center and key members hold the highest communications credentials for both crisis training and communications, including the following: CalOES - Basic and Advanced Crisis Communications Certificates; FEMA - NIMS IS-700a and ICS 100; Accreditation in Public Relations – Universal Accreditation Board; and Certificate in Communications – California Association of Public Information Officials. With our hands-on knowledge, we can serve as an extension of your team during a crisis.

Our crisis services also include development of crisis communications plans (including roles, responsibilities and checklists, audience identification, etc.), crisis templates (news releases, speaking points, holding statements and notices), crisis trainings and more.

STAKEHOLDER AND NEIGHBORHOOD MEETINGS

Conducting stakeholder and neighborhood meetings is an essential part of Banning's community outreach to key groups. Our team has decades of experience in public participation and outreach and can assist with meeting coordination from start to finish. We offer meeting coordination, facilitation, on-site assistance, messaging and speaking point development, audience identification, development of reports with attendee contact info, areas of concern and more.

STRATEGIC COMMUNICATIONS PLANS

Successful communications with your community requires a strong foundation of strategic communications planning. Our team develops a strategy for each project to ensure the project's success. We have decades of experience crafting agency-wide strategic communications and marketing plans to project-specific plans. Each of our plans incorporates research, planning, implementation and evaluation.

VIDEO

Research has shown that using video is one of the most impactful ways to communicate with key audiences, and we couldn't agree more. Our team provides a comprehensive offering of video services from pre- to post-production. Our services include video strategy; content planning; storytelling/script development; animation; illustration; live action; aerial videography; stock video; livestreaming; and more.

Statement of Understanding and Approach

PHOTOGRAPHY

Photography captures the legacy of your agency through your events, projects and programs. Our team will help your agency visually communicate important information and memories. We specialize in photography for portraits, products, architecture, advertising/lifestyle, aerial/drones and stock.

SOCIAL MEDIA

Social media is an important communications tool to drive your agency's brand awareness with your key audiences and provide important, timely information to your community. Our team is up-to- date on popular social platforms and can help your agency craft compelling content specifically developed for each platform; create editorial calendars; provide social media monitoring and responses; purchase ads; and grow Banning's audience following.

BRANDING

Whether it's an agency-wide rebrand or branding a new project, program or campaign, our team can effectively help your agency tell its story through research, persona development, logos, typography, brand platforms, brand standards, deployment of the brand and more. We have led successful branding efforts for our public-clients across the state.

SPECIAL EVENT COORDINATION AND MANAGEMENT

We have decades of expertise designing popular community and stakeholder events for our clients, including State-of-the-City videos and in-person events; community tours; Earth Day events; symposiums and conferences; and workshops. We've currently transitioned many of our client's beloved events into video or web formats that allow for community involvement during the pandemic.

WEBSITE DEVELOPMENT

Our clients have turned to our firm to develop websites and microsites for their agencies. We can not only assist with user experience and user interface website design, but also can develop content that meets ADA requirements and adheres to the Federal Plain Language Guidelines to ensure accessibility for all users.

PUBLIC OPINION SURVEYING

From time to time, agencies require public opinion surveying to understand community and stakeholder needs. These surveys can range from short surveys on a particular topic to longer customer satisfaction surveys. We have helped numerous agencies design, develop, administer and interpret survey results. Our team of knowledgeable communications and research strategists have decades of experience and use an innovative community and stakeholder engagement platform, along with traditional data gathering tactics, to gather key information. Our approach gives us the ability to provide our clients with brand personalization, multiple languages, response deduplication, complex logic and more. Data is dynamically displayed in real-time and interactive dashboards to help our clients make data driven decisions.

III. In addition to the requirements of Parts I and II of this Scope of Services, during the performance of the Services, Consultant will keep City appraised through periodic status reports regarding the performance of the Services under this Agreement as set forth below and in Section 5.2, by the following means:

a. In-person meetings and/or teleconferences.

b. Email updates/questions to applicant team and City while reviews are underway.

c. Conference calls.

IV. All work product is subject to review and acceptance by City. If the City determines that any work product is unacceptable, for any reason, it must be revised by Consultant without additional charge to City until found satisfactory and accepted by City.

EXHIBIT "B"
SPECIAL REQUIREMENTS

None

EXHIBIT "C"
SCHEDULE OF COMPENSATION

I. Consultant's billing rates for all personnel are attached as Exhibit C-1.

II. Within the budgeted amounts for each Task, and with the approval of the Contract Officer, funds may be shifted from one Task sub-budget to another so long as the Contract Sum is not exceeded per Section 2.1, unless Additional Services are approved per Section 1.8.

III. City will compensate Consultant for the Services performed upon submission of a valid invoice. Each invoice is to include:

A. Line items for all personnel describing the Services performed, the number of hours worked, and the hourly rate.

B. Line items for all materials and equipment properly charged to the Services.

C. Line items for all other approved reimbursable expenses claimed, with supporting documentation.

D. Line items for all approved sub-contractor labor, supplies, equipment, materials, and travel properly charged to the Services.

EXHIBIT "C-1"
CONSULTANT'S BILLING RATE AND TASK SCHEDULE

Price Proposal and Hourly Rate Sheet

Working with DeGrave Communications, you get the large agency expertise, in-depth capabilities and top-notch advisory services while benefiting from an unmatched level of hands-on personal service. As a result, our team can work quickly and efficiently, reducing start-up time and creating cost savings.

Our lean structure means that veteran, award-winning communicators, who hold the elite Accreditation in Public Relations credential, handle the bulk of project work and client interaction from start to finish while still maintaining a competitive price point and never compromising on quality. We look forward to engaging with the City of Banning's team to identify project priorities and adjust resources and budgets for this project as needed. As the City looks for a firm for On Call Professional Services for Public Relations and Community Outreach Consulting Services, we look forward to identifying the specific scope of work to best serve you. Our outreach strategies will be adapted to meet your needs following our initial kick-off meeting.

Project Budgets

Rates are based on time and materials calculated using the following hourly rates by staff classification and estimating staff hours required to complete tasks. We carefully manage our project budget to ensure we stay on budget.

Principal in Charge, Comm Manager	$195 hour (blended rate)
Strategic Visual Designer	$150 hour
Account Executive	$150 hour
Specialists	$195 hour
Video, Photography	$185 hour
Photographer	$175 hour

Billing

Fees will then be invoiced monthly according to work performed in the month prior.

Reimbursable Expenses

Mileage expenses are billed at the current IRS rate. The client will reimburse lodging and meals. A standard 20 percent markup will be added to out-of-pocket costs (such as advertising buyouts, printing, and stock photography purchases). A 3% fee is incurred for invoices not paid within 60 days of invoice date.

Price Proposal and Hourly Rate Sheet

Budget

The final contract budget will be determined based on the final agreement.

Fee Proposal

SCHEDULE OF PERFORMANCE

I. Consultant shall perform all Services timely, and deliver the specified tangible work products to City in accordance with the schedules mutually agreed upon with the City per project basis.

II. The Contract Officer may approve extensions for performance of the Services in accordance with Sections 1.8 and 3.3.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Nate Smith, Deputy Director of Public Works/City Engineer** **Art Vela, Director of Public Works**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-116, Approving the Award of Contract for Roadway and Storm Drain Asset Collection and Analysis with Roadway Asset Services of Austin, Texas for Fiscal Year 2024/2025 in the Amount of $302,082**

RECOMMENDATION:

Adopt Resolution 2024-116.

BACKGROUND:

Starting in early 2022, the Public Works Department began the investigation of asset management software services, as well as vendors and services to collect asset data related to roadways, drainage, and facilities, with a goal of either more fully utilizing the existing platform (Cartegraph) or make a change to a software solution that would be more fully integrated with City services. The efforts of that research have been partially implemented with previous City Council action to expand the Cartegraph Asset Management software from holding data on roadway pavement only to include for broader Roadway Assets, Walkability Assets, Stormwater Assets, Facility Assets, and Scenario Builder for capital planning. That implementation effort is ongoing and expected to 'go live' in very late 2024 or early 2025.

Regulations regarding storm water asset management, cost reporting, and capital expenses are pending with the updated MS4 permit that covers the City of Banning. This data collection effort will confirm data that we currently have in the Nobel mapping system, and expand upon data that is required for future reporting, including presence of trash capture devices, debris removal, outfall monitoring and status, as well as identify stormwater basins on private property where annual reporting is required. The data will be confirmed against the limited data currently in Nobel related to stormwater assets, and Cartegraph will be the software of record for these facilities.

The next step in this process is to collect relevant data to include with the expanded software capabilities. Over a 2 year period, the Public Works team met with various service providers using a wide range of technological solutions to capture asset data, as well as attending training and conferences on how best to have data collected, stored, and utilized within the expanded software capabilities. An RFP (RFP-23-046, closed 3/28/24) was prepared soliciting specific services and asset information to be collected, analyzed, and input seamlessly with Cartegraph, where City staff would have a 'turn key' system that is fully loaded and ready to use.

A mandatory pre-bid meeting was held for the RFP on 2/26/24, where representatives from two firms attended. At the close of bid, only Roadway Asset Services opted to submit a bid. The proposal was reviewed by the review committee to ensure that the proposal met the intent of the requested scope of

work, which it did. While only a single bid was submitted, Roadway Asset Services met the scope of work, has a demonstrated success pattern with other jurisdictions for the requested scope of work, has a great deal of familiarity with the Catregraph Asset Management software, and has a cost that is in line with Public Works Department expectations prior to the release of the RFP.

JUSTIFICATION:

The roadway, walkability, and stormwater assets collected will allow for better asset management, cost reporting, and capital planning over the limited data currently available to the Public Works Department. The asset conditions collected related to curb ramps, sidewalks, pavement condition, and signage will allow a work plan to be developed with better cost estimates for planning and budgeting in future budget cycles, and to prioritize investments to maximize the asset life expectancy and reduce risk to the City where assets require repair or replacement.

FISCAL IMPACT:

The cost for this services was budgeted and anticipated to be funded with the City's annual Measure A funding received, and was reflected on the project list adopted by Council with Resolution 2024-55. Minor adjustments to the funding allocation within that document will be processed with the Riverside County Transportation Commission to cover the full cost of the project in FY24/25. Measure A allows for this expense within the program and allows for modifications to the funding program for eligible expenses.

ALTERNATIVES:

Do not approve Resolution 2024-116 and provide alternative direction to staff.

RESOLUTION 2024-116

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING THE AWARD OF CONTRACT FOR ROADWAY AND STORM DRAIN ASSET COLLECTION AND ANALYSIS WITH ROADWAY ASSET SERVICES OF AUSTIN, TEXAS FOR FISCAL YEAR 2024/2025 IN THE AMOUNT OF $302,082

WHEREAS, the Public Works Department has responsibility for maintenance and operations of the roadway and storm drainage network that requires current conditions and locations of roadway, walkability, and storm drain facilities; and

WHEREAS, the Public Works Department has planned for annual Measure A funding to conduct an asset collection and condition assessment for roadway, walkability, and storm drain facilities; and

WHEREAS, the Public Works Department solicited a formal bid (RFP-23-046) through the City's bid procurement service, conducted a mandatory pre-bid meeting, established an evaluation committee to review the submitted proposal, and determined that the proposal met the scope of work and can be funded through Measure A;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves a contract with Roadway Asset Services for fiscal year 2024/2025 in the amount of $302,082 and authorizes the City Manager to sign said agreement.

SECTION 2. The City Council authorizes the City Manager, or designee, to make necessary budget adjustments, appropriations, and transfers related to this resolution.

SECTION 3. The City Council authorizes the City Manager to make necessary non-substantive changes and execute a contract with Roadway Asset Services for Fiscal Year 24/25.

SECTION 4. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

Alberto Sanchez, Mayor
City of Banning

ATTEST:

Caroline Patton, Administrative City Clerk

City of Banning, California

EXHIBIT A
Agreement

AGREEMENT FOR PROFESSIONAL SERVICES (C001034) FOR FIXED ASSET INSPECTION SERVICES BY AND BETWEEN CITY OF BANNING AND ROADWAY ASSET SERVICES, LLC

THIS AGREEMENT FOR PROFESSIONAL SERVICES (herein "Agreement") is made and entered into this day: _____, ("Effective Date") by and between the **CITY OF BANNING,** a California municipal corporation ("City") and **ROADWAY ASSET SERVICES, LLC**, a Texas Corporation ("Consultant"). City and Consultant are sometimes hereinafter individually referred to as "Party" and hereinafter collectively referred to as the "Parties."

RECITALS

A. City has sought by issuance a Request for Proposal (RFP #23-046) for the performance of the services for the professional services for Fixed Asset Inspections and as further defined and described particularly in Article 1 of this Agreement.

B. Consultant, following submission of a proposal for the performance of the services defined and described particularly in Article 1 of this Agreement, was selected by City to perform those services.

C. The Parties desire to formalize the selection of Consultant for performance of those services defined and described particularly in Article 1 of this Agreement and desire that the terms of that performance be as particularly defined and described herein.

D. Pursuant to the City of Banning's Municipal Code, City has authority to enter into this Agreement.

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained herein and other consideration, the value and adequacy of which are hereby acknowledged, the Parties agree as follows:

ARTICLE 1. SERVICES OF CONSULTANT

1.1 Scope of Services.

In compliance with all terms and conditions of this Agreement, Consultant shall provide those services specified in the "Scope of Services" attached hereto as **Exhibit A** and incorporated herein by this reference, which services may be referred to herein as the "Services" hereunder. As a material inducement to City entering into this Agreement, Consultant represents and warrants that it has the qualifications, experience, and facilities necessary to properly perform the Services required under this Agreement in a thorough, competent, and professional manner, and is experienced in performing the Services contemplated herein. Consultant shall at all times faithfully, competently and to the best of its ability, experience and talent, perform all Services described herein. Consultant covenants that it shall follow the highest professional standards in performing the Services required hereunder and that all materials will be of good quality, and fit for the purpose intended. For purposes of this Agreement, the phrase "highest professional

standards" shall mean those standards of practice recognized by one or more first-class firms performing similar work under similar circumstances.

1.2 Contract Documents and Exhibits.

This Agreement includes the Request for Proposal and Consultant's accepted proposal ("Contract Documents"), both of which are on file with the City and incorporated herein by this general reference as though fully set forth herein. **Exhibit A** (Scope of Services), **Exhibit B** (Special Requirements), **Exhibit C** (Schedule of Compensation), and **Exhibit D** (Schedule of Performance) also constitute a part of this Agreement and are incorporated into this Agreement by this reference. Except as set forth in Section 1.10 regarding **Exhibit B**, this Agreement controls over the Contract Documents and the provisions in **Exhibits A, B** and **C**.

1.3 Compliance with Law.

Consultant shall keep itself informed concerning all ordinances, resolutions, statutes, rules, and regulations of City and any Federal, State or local governmental entity having jurisdiction in effect at the time service is rendered, and shall render all Services hereunder in accordance therewith.

1.4 Licenses, Permits, Fees and Assessments.

Consultant shall obtain and maintain during the term of this Agreement, at its sole cost and expense, all necessary licenses, permits, certificates and approvals required by law for the performance of Services under this Agreement, including a City business license. Consultant shall have the sole obligation to pay for all fees, assessments and taxes, plus applicable penalties and interest, which may be imposed by law and which arise from or are necessary for Consultant's performance of the Services required by this Agreement. Consultant shall indemnify, defend and hold harmless City, its officers, employees or agents, against all such fees, assessments, taxes, penalties or interest levied, assessed or imposed against City hereunder.

1.5 Familiarity with Services.

By executing this Agreement, Consultant warrants that Consultant: (i) has thoroughly investigated and considered the Scope of Services to be performed, (ii) has carefully considered how the Services should be performed, and (iii) fully understands the facilities and any difficulties and restrictions attending performance of the Services under this Agreement. If the Services involve work upon any site, Consultant warrants that Consultant has or will investigate the site and is or will be fully acquainted with the conditions existing therein, prior to commencement of Services hereunder. Should Consultant discover any latent or unknown conditions, which will materially affect the performance of the Services hereunder, Consultant shall immediately inform City of such fact and shall not proceed except at Consultant's risk until written instructions are received from the Contract Officer (defined in Section 1.12. A).

1.6 Prevention of Loss and Damages.

Consultant shall adopt reasonable methods during the Term (defined in Section 3.4) to furnish continuous protection to the work product, and the equipment, materials, papers,

documents, plans, studies and/or other components thereof to prevent losses or damages, and shall be responsible for all such damages, to persons or property, until acceptance of the Services by City, except such losses or damages as may be caused by City's own negligence.

1.7 Further Responsibilities of Parties.

Both Parties agree to use reasonable care and diligence to perform their respective obligations under this Agreement. Both Parties agree to act in good faith to execute all instruments, prepare all documents and take all actions as may be reasonable necessary to carry out the purposes of this Agreement. Unless hereafter specified, neither Party shall be responsible to perform the Services of the other.

1.8 Additional Services.

City shall have the right at any time during the performance of the Services, without invalidating this Agreement, to order extra services beyond that specified in the Scope of Services or to make changes by altering, adding to or deducting from the Services. No such extra services may be undertaken unless a written order is first given by the Contract Officer to Consultant, which written order incorporates therein an adjustment in (i) the Contract Sum (as defined in Section 2.1), and/or (ii) the Schedule of Performance, (as defined in Section 3.2), and which written order is approved in writing by Consultant. Any increase in compensation of up to ten percent (10%) of the Contract Sum, or $25,000, whichever is less; or in the Schedule of Performance of up to one hundred eighty (180) days may be approved by the Contract Officer. Any greater increases, taken either separately or cumulatively, must be approved by City Council. It is expressly understood by Consultant that the provisions of this Section shall not apply to Services which are specifically set forth in the Scope of Services or which are reasonably contemplated therein. Consultant hereby acknowledges that it accepts the risk that the Services to be provided pursuant to the Scope of Services may be more costly or time consuming than Consultant anticipates and that Consultant shall not be entitled to additional compensation therefor.

1.9 Facilities and Equipment.

Except as otherwise provided, Consultant shall, at its own cost and expense, provide all facilities and equipment necessary to perform the Services required by this Agreement. City shall make available to Consultant only physical facilities such as desks, filing cabinets, and conference space ("City Facilities"), as City deems, in its sole discretion, to be reasonably necessary for Consultant's use while consulting with City employees and reviewing records and the information in possession of City. The location, quality, and time of furnishing City Facilities shall be in the sole discretion of City. In no event shall City be required to furnish any facilities that may involve incurring any direct expense, including but not limited to a computer, long distance telephone, network data, internet or other communication charges, vehicles and reproduction facilities.

1.10 Special Requirements.

Additional terms and conditions of this Agreement, if any, which are made a part hereof are set forth in the "Special Requirements" attached hereto as **Exhibit B** and incorporated herein by this reference. In the event of a conflict between the provisions of **Exhibit B** and any other provisions of this Agreement, the provisions of **Exhibit B** shall govern.

1.11 Corrections.

In addition to the indemnification obligations set forth in Article 4, and Sections 1.4, 1.13, 5.3, 5.4, and 6.3, Consultant shall correct, at its expense, all errors in the Services which may be disclosed during City's review of Consultant's report or plans. Should Consultant fail to make such correction(s) in a reasonably timely manner, such correction(s) may be made by City, and the cost thereof shall be charged to Consultant. In addition to all other available remedies, City may deduct the cost of such correction(s) from any retention amount held by City, or may withhold payment otherwise owed Consultant under this Agreement up to the amount of the cost of correction(s), as provided in Section 6.3.

1.12 Party Representatives.

A. Contract Officer: For the purposes of this Agreement, the Contract Officer shall be the City Manager, or such other person designated in writing by the City Manager ("Contract Officer"). Unless otherwise specified herein, any approval of City required hereunder shall mean the approval of the Contract Officer. The Contract Officer shall have authority, if specified in writing by the City Manager, to sign all documents on behalf of City required hereunder to carry out the terms of this Agreement.

B. Principals and Personnel of Consultant.

1) Consultant Representative: The following principal of Consultant is hereby designated as being the Consultant Representative authorized to act on Consultant's behalf regarding the Services specified herein and make all decisions in connection therewith:

Name	Title
Bart Williamson	CEO

It is expressly understood that the experience, knowledge, capability and reputation of the foregoing Consultant Representative were a substantial inducement for City to enter into this Agreement. Therefore, the foregoing Consultant Representative shall be responsible during the term of this Agreement for directing all activities of Consultant and devoting sufficient time to personally supervise the Services hereunder. All personnel of Consultant, and any authorized agents, shall at all times be under the exclusive direction and control of the Consultant Representative. For purposes of this Agreement, the foregoing Consultant Representative may not be replaced nor may their responsibilities be substantially reduced or reassigned by Consultant without the express written approval of City. It shall be Consultant's responsibility to assure that the Contract Officer is kept informed of the progress of the performance of the Services, and Consultant shall refer any decisions which must be made by City to the Contract Officer.

2) Consultant's Personnel: Consultant has, or will secure at its own expense, all personnel required to perform the Services required under this Agreement. All of the Services required under this Agreement shall be performed by Consultant or under its supervision, and all personnel engaged in the Services shall be qualified to perform such Services. Consultant shall make every reasonable effort to maintain the stability and continuity of Consultant's staff and sub-contractors, if any, assigned to perform the Services required under this Agreement.

Consultant shall notify City of all changes in Consultant's staff and sub-contractors, if any, assigned to perform the Services required under this Agreement, prior to and during any such performance. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires to reassign any staff or sub-contractor of Consultant, City shall give notice as set forth in Section 8.1. Consultant shall, immediately upon the receipt of the notice to re-assign staff from City, reassign such person or persons.

1.13 Independent Contractor.

A. Consultant is an independent contractor and not an employee of City. Consultant shall have no power to incur any debt, obligation, or liability on behalf of City. All Services provided pursuant to this Agreement shall be performed by Consultant or under its supervision. Consultant will determine the means, methods, and details of performing the Services. Any additional personnel performing Services under this Agreement on behalf of Consultant shall also not be employees of City and shall at all times be under Consultant's exclusive direction and control. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

B. Consultant shall indemnify and hold harmless City and its elected officials, officers, employees, servants, designated volunteers, and agents serving as independent contractors in the role of City officials, from any and all liability, damages, claims, costs and expenses of any nature to the extent arising from Consultant's personnel practices. City shall have the right to offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this Section.

1.14 Prohibition Against Subcontracting or Assignment.

The experience, knowledge, capability and reputation of Consultant, the Consultant Representative and employees were a substantial inducement for City to enter into this Agreement. Therefore, Consultant shall not contract with any other entity to perform in whole or in part the Services required hereunder without the express written approval of City. In addition, neither this Agreement nor any interest herein may be transferred, assigned, conveyed, hypothecated or encumbered voluntarily or by operation of law, whether for the benefit of creditors or otherwise, without the prior written approval of City. Transfers restricted hereunder shall include the transfer to any person or group of persons acting in concert of more than twenty-five percent (25%) of the present ownership and/or control of Consultant, taking all transfers into account on a cumulative basis. In the event of any such unapproved transfer, including any bankruptcy proceeding, this

Agreement shall be void. No approved transfer shall release Consultant or any surety of Consultant of any liability hereunder without the express consent of City.

ARTICLE 2. COMPENSATION AND METHOD OF PAYMENT.

2.1 Contract Sum.

Subject to any limitations set forth in this Agreement, as full compensation for Services satisfactorily rendered, City shall pay Consultant at the hourly rates set forth in the "Schedule of Compensation" attached hereto as **Exhibit C** and incorporated herein by this reference. In no event shall Consultant be paid more than Three Hundred Two Thousand Eight-Two Dollars ($302,082.00) (the "Contract Sum"). The Contract Sum shall include the attendance of Consultant at all project meetings reasonably deemed necessary by City. Coordination of the performance of the Services with City is a critical component of the Services. If Consultant is required to attend additional meetings to facilitate such coordination, Consultant shall not be entitled to any additional compensation for attending those meetings.

2.2 Method of Compensation.

The method of compensation may include: (i) a lump sum payment upon completion of the Services, (ii) payment in accordance with specified tasks or the percentage of completion of the Services, (iii) payment for time and materials based upon Consultant's rates as specified in the Schedule of Compensation, provided that time estimates are provided for the performance of sub tasks, but not exceeding the Contract Sum or (iv) such other methods as may be specified in the Schedule of Compensation.

2.3 Reimbursable Expenses.

City shall only reimburse Consultant for those actual and necessary expenses expressly set forth in **Exhibit C**. Reimbursable expenses may include reimbursement for actual and necessary expenditures for reproduction costs, telephone expenses, and travel expenses approved by the Contract Officer in advance, or actual sub-contractor expenses of an approved sub-contractor pursuant to Section 1.14, and only if specified in the Schedule of Compensation.

2.4 Unauthorized Services and Expenses.

City will not pay for any Services or reimburse for any expenses incurred which are not specified in the Scope of Services, unless authorized in writing as set forth in Section 1.8 of this Agreement. City shall make payment for such authorized additional Services and expenses in accordance with Article 2 of this Agreement.

2.5 Invoices.

Each month Consultant shall furnish to City an original invoice for all Services performed and expenses incurred during the preceding month. Each such invoice shall contain all of the information set forth in Section III of **Exhibit C** to this Agreement. By submitting an invoice for payment under this Agreement, Consultant is certifying compliance with all provisions of the

Agreement. Consultant shall not invoice City for any duplicate Services performed by more than one person.

City shall independently review each invoice submitted by Consultant to determine whether the Services performed and expenses incurred are in compliance with the provisions of this Agreement. City will use its best efforts to cause Consultant to be paid within thirty (30) days of receipt of Consultant's correct and undisputed invoice, except as to any charges for Services performed or expenses incurred by Consultant which are disputed by City, or as provided in Section 6.3. In the event any charges or expenses are disputed by City, the original invoice shall be returned by City to Consultant for correction and resubmission. Review and payment by City of any invoice provided by Consultant shall not constitute waiver of any rights or remedies provided herein or any applicable law.

2.6 Waiver.

Payment to Consultant for Services performed pursuant to this Agreement shall not be deemed to waive any defects in Services performed by Consultant.

ARTICLE 3. PERFORMANCE SCHEDULE

3.1 Time of Essence.

Time is of the essence in the performance of this Agreement; provided, however, that the foregoing shall not be construed to limit or deprive a Party of the benefits of any grace or use period allowed in this Agreement.

3.2 Schedule of Performance.

Consultant shall commence the Services pursuant to this Agreement upon receipt of a written notice to proceed and shall perform all Services within the time period(s) established in the "Schedule of Performance" attached hereto as **Exhibit D** and incorporated herein by this reference.

3.3 Force Majeure.

The time period(s) specified in the Schedule of Performance for performance of the Services rendered pursuant to this Agreement may be extended because of any delays due to unforeseeable causes beyond the control and without the fault or negligence of Consultant. Such unforeseeable consequences include, but are not restricted to, acts of God or public enemy, unusually severe weather, fires, earthquakes, floods, epidemics, quarantine restrictions, riots, strikes, freight embargoes, wars, litigation, and/or acts of any governmental agency, including City, if Consultant shall within ten (10) days of the commencement of such delay notify the Contract Officer in writing of the causes of the delay. The Contract Officer shall ascertain the facts and the extent of delay, and extend the time for performing the Services for the period of the enforced delay when and if in the judgment of the Contract Officer such delay is justified, subject to the provisions of Section 1.8. The Contract Officer's determination (or the City Council's determination, in the event the period of enforced delay exceeds the period specified in Section 1.8) shall be final and conclusive upon the Parties to this Agreement. In no event shall Consultant

be entitled to recover damages against City for any delay in the performance of this Agreement, however caused; Consultant's sole remedy shall be the extension of the Agreement pursuant to this Section.

3.4 Term.

The Term of this Agreement shall be from the Effective Date through June 30, 2025, unless sooner terminated as provided in Article 6 of this Agreement or extended as provided in Sections 1.8 and 3.3 of this Agreement. Maximum term and any subsequent amendment or modification shall not exceed five (5) years.

ARTICLE 4. INSURANCE AND INDEMNIFICATION

4.1 Minimum Scope and Limits of Insurance.

Consultant shall procure and at all times during the term of this Agreement carry, maintain, and keep in full force and effect, insurance as follows:

A. Commercial General Liability Insurance with a minimum limit of $1,000,000.00 per occurrence for bodily injury, personal injury and property damage and a general aggregate limit of $2,000,000.00 per project or location. If Consultant is a limited liability company, the commercial general liability coverage shall be amended so that Consultant and its managers, members, affiliates, employees, agents and other persons necessary or incidental to its operation are insureds.

B. Automobile Liability Insurance for any owned, non-owned or hired vehicle used in connection with the performance of this Agreement with a combined single limit of $1,000,000.00 per accident for bodily injury and property damage. If Consultant does not use any owned, non-owned or hired vehicles in the performance of Services under this Agreement, Consultant shall obtain a non-owned auto endorsement to the Commercial General Liability policy.

C. Workers' Compensation Insurance as required by the State of California and Employer's Liability Insurance with a minimum limit of $1,000,000.00 per accident for bodily injury or disease. If Consultant has no employees while performing Services under this Agreement, workers' compensation policy is not required; however, Consultant shall execute a declaration that it has no employees.

D. Professional Liability/Errors and Omissions Insurance with minimum limits of $1,000,000.00 per claim and in the aggregate.

4.2 Acceptability of Insurers.

The insurance policies required under this Article shall be issued by an insurer admitted to write insurance in the State of California with a rating of A:VII or better in the latest

edition of the A.M. Best Insurance Rating Guide. Self-insurance shall not be considered to comply with the insurance requirements under this Article.

4.3 Additional Insured.

The commercial general and automobile liability policies shall contain an endorsement naming City, its officers, employees, agents and volunteers as additional insureds.

4.4 Primary and Non-Contributing.

The insurance policies required under this Article shall apply on a primary non-contributing basis in relation to any other insurance or self-insurance available to City. Any insurance or self-insurance maintained by City, its officers, employees, agents or volunteers, shall be in excess of Consultant's insurance and shall not contribute with it.

4.5 Consultant's Waiver of Subrogation.

The insurance policies required under this Article shall not prohibit Consultant and Consultant's employees, agents or sub-contractors from waiving the right of subrogation prior to a loss. Consultant hereby waives all rights of subrogation against City.

4.6 Deductibles and Self-Insured Retentions.

Any deductibles or self-insured retentions must be declared to and approved by City. At City's option, Consultant shall either reduce or eliminate the deductibles or self-insured retentions with respect to City; or Consultant shall procure a bond guaranteeing payment of losses and expenses.

4.7 Cancellations or Modifications to Coverage.

Consultant shall not cancel, reduce or otherwise modify the insurance policies required by this Article during the term of this Agreement. The commercial general and automobile liability policies required under this Agreement shall be endorsed to state that should the issuing insurer cancel the policy before the expiration date, the issuing insurer will endeavor to mail 30 days' prior written notice to City. If any insurance policy required under this Article is canceled or reduced in coverage or limits, Consultant shall, within two (2) Business Days (as defined in Section 8.12) of notice from the insurer, phone, fax or notify City via certified mail, return receipt requested, of the cancellation of or changes to the policy.

4.8 City Remedy for Noncompliance.

If Consultant does not maintain the policies of insurance required under this Article in full force and effect during the term of this Agreement, or in the event any of Consultant's policies do not comply with the requirements under this Article, City may either immediately terminate this Agreement or, if insurance is available at a reasonable cost, City may, but has no duty to, take out the necessary insurance and pay, at Consultant's expense, the premium thereon. Consultant shall promptly reimburse City for any premium paid by City, or City may withhold amounts sufficient to pay the premiums from payments due to Consultant.

4.9 Evidence of Insurance.

Prior to the performance of Services under this Agreement, Consultant shall furnish the City Clerk with a certificate or certificates of insurance and all original endorsements evidencing and effecting the coverages required under this Article. The endorsements are subject to City's approval. Consultant may provide complete, certified copies of all required insurance policies to City. Consultant shall maintain current endorsements on file with the City Clerk. Consultant shall provide proof to the City Clerk that insurance policies expiring during the term of this Agreement have been renewed or replaced with other policies providing at least the same coverage. Consultant shall furnish such proof at least two (2) weeks prior to the expiration of the coverages.

4.10 Indemnity Requirements not Limiting.

Procurement of insurance by Consultant shall not be construed as a limitation of Consultant's liability or as full performance of Consultant's duty to indemnify City under this Agreement.

4.11 Sub-contractor Insurance Requirements.

Consultant shall require each of its sub-contractors that perform Services under this Agreement to maintain insurance coverage that meets all of the requirements of this Article.

4.12 Indemnification, Hold Harmless, and Duty to Defend.

A. Indemnification of City.

1) To the fullest extent permitted by law, Consultant shall, at its sole cost and expense, defend, hold harmless and indemnify City and its elected officials, officers, attorneys, agents, employees, designated volunteers, successors, assigns and those City agents serving as independent contractors in the role of City officials (collectively "Indemnitees"), from and against any and all damages, costs, expenses, liabilities, claims, demands, causes of action, proceedings, expenses, judgments, penalties, liens, and losses of any nature whatsoever, including fees of accountants, attorneys, or other professionals and all costs associated therewith and the payment of all consequential damages (collectively "Liabilities"), at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Consultant, its officers, agents, servants, employees, sub-contractors, materialmen, consultants or their officers, agents, servants or employees (or any entity or individual that Consultant shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties. Consultant shall defend the Indemnitees in any action or actions filed in connection with any Liabilities with counsel of the Indemnitees' choice, and shall pay all costs and expenses, including all attorneys' fees and experts' costs actually incurred in connection with such defense. Consultant shall reimburse the Indemnitees for any and all legal expenses and costs incurred by Indemnitees in connection therewith.

2) Consultant shall pay all required taxes on amounts paid to Consultant under this Agreement, and indemnify and hold City harmless from any and all taxes, assessments, penalties, and interest asserted against City by reason of the independent contractor relationship created by this Agreement. Consultant shall fully comply with the workers' compensation law regarding Consultant and Consultant's employees. Consultant shall indemnify and hold City harmless from any failure of Consultant to comply with applicable workers' compensation laws. City may offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this subparagraph A.2.

3) Consultant shall obtain executed indemnity agreements with provisions identical to those in this Article from each and every sub-contractor or any other person or entity involved by, for, with or on behalf of Consultant in the performance of this Agreement. If Consultant fails to obtain such indemnity obligations, Consultant shall be fully responsible and indemnify, hold harmless and defend the Indemnitees from and against any and all Liabilities at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Consultant's sub-contractor, its officers, agents, servants, employees, sub-contractors, materialmen, consultants or their officers, agents, servants or employees (or any entity or individual that Consultant's sub-contractor shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties.

B. Workers' Compensation Acts not Limiting. Consultant's indemnifications and obligations under this Article, or any other provision of this Agreement, shall not be limited by the provisions of any workers' compensation act or similar act. Consultant expressly waives its statutory immunity under such statutes or laws as to City, its officers, agents, employees and volunteers.

C. Insurance Requirements not Limiting. City does not, and shall not, waive any rights that it may possess against Consultant because of the acceptance by City, or the deposit with City, of any insurance policy or certificate required pursuant to this Agreement. The indemnities in this Article shall apply regardless of whether or not any insurance policies are determined to be applicable to the Liabilities, tax, assessment, penalty or interest asserted against City.

D. Survival of Terms. Consultant's indemnifications and obligations under this Article shall survive the expiration or termination of this Agreement.

ARTICLE 5. RECORDS, REPORTS, AND RELEASE OF INFORMATION

5.1 Service Records.

Consultant shall keep, and require sub-contractors to keep, such ledgers, books of accounts, invoices, vouchers, canceled checks, reports, studies or other documents relating to the disbursements charged to City and Services performed hereunder (the "Service Records"), as shall be necessary to perform the Services required by this Agreement and enable the Contract Officer

to evaluate the performance of such Services. Any and all such Service Records shall be maintained in accordance with generally accepted accounting principles and shall be complete and detailed. The Contract Officer shall have full and free access to such Service Records at all times during normal business hours of City, including the right to inspect, copy, audit and make copies and transcripts from such Service Records. Such Service Records shall be maintained for a period of three (3) years following completion of the Services hereunder, and City shall have access to such Service Records in the event any audit is required. In the event of dissolution of Consultant's business, custody of the Service Records may be given to City, and access shall be provided by Consultant's successor in interest ("Consultant's Successor"). If custody of the Service Records is given to Consultant's Successor, Consultant shall give written notice to City of the transfer of the Service Records to Consultant's Successor. The notice shall include contact information (address and telephone number) for Consultant's Successor, and access shall be provided to City by Consultant's Successor.

5.2 Reports.

Consultant shall periodically prepare and submit to the Contract Officer such reports concerning the performance of the Services required by this Agreement as the Contract Officer shall require. Consultant hereby acknowledges that City is greatly concerned about the cost of Services to be performed pursuant to this Agreement. For this reason, Consultant agrees that if Consultant becomes aware of any facts, circumstances, techniques, or events that may or will materially increase or decrease the cost of the Services contemplated herein, Consultant shall promptly notify the Contract Officer of that fact, circumstance, technique or event and the estimated increased or decreased cost related thereto.

5.3 Ownership of Documents.

All drawings, specifications, maps, designs, photographs, studies, surveys, data, notes, computer files, reports, records, documents and other materials (the "Consultant Documents") prepared by Consultant, its employees, sub-contractors and agents in the performance of this Agreement shall be the property of City and shall be delivered to City upon request of the Contract Officer or upon the termination of this Agreement. Consultant shall have no claim for further employment or additional compensation as a result of the exercise by City of its full rights of ownership use, reuse, or assignment of the Consultant Documents hereunder. Any use, reuse or assignment of such completed Consultant Documents for other projects and/or use of uncompleted Consultant Documents without specific written authorization by Consultant will be at City's sole risk and without liability to Consultant, and Consultant's guarantee and warranties shall not extend to such use or assignment. Consultant may retain copies of such Consultant Documents for its own use. Consultant shall have an unrestricted right to use the concepts embodied therein. All sub-contractors shall provide for assignment to City of all Consultant Documents prepared by them; and in the event Consultant fails to secure such assignment, Consultant shall indemnify City for all damages resulting therefrom.

5.4 Confidentiality and Release of Information.

A. All information gained or work product produced by Consultant in performance of this Agreement shall be considered confidential, unless such information is in the

public domain or already known to Consultant. Consultant shall not release or disclose any such information or work product to persons or entities other than City without prior written authorization from the Contract Officer.

B. Consultant, its officers, employees, agents or sub-contractors, shall not, without prior written authorization from the Contract Officer or unless requested by the City Attorney, voluntarily provide documents, declarations, letters of support, testimony at depositions, response to interrogatories or other information concerning the Services performed under this Agreement. Response to a subpoena or court order shall not be considered "voluntary" provided Consultant gives City notice of such court order or subpoena.

C. If Consultant, or any officer, employee, agent or sub-contractor of Consultant, provides any information or work product in violation of this Agreement, then City shall have the right to reimbursement and indemnity from Consultant for any damages, costs and fees, including attorneys' fees, caused by or incurred as a result of Consultant's conduct.

D. Consultant shall promptly notify City should Consultant, its officers, employees, agents or sub-contractors be served with any summons, complaint, subpoena, notice of deposition, request for documents, interrogatories, request for admissions or other discovery request, court order or subpoena from any Party regarding this Agreement and the Services performed thereunder. City retains the right, but has no obligation, to represent Consultant or be present at any deposition, hearing or similar proceeding. Consultant agrees to cooperate fully with City and to provide City with the opportunity to review any response to discovery requests provided by Consultant. However, this right to review any such response does not imply or mean the right by City to control, direct, or rewrite the response.

ARTICLE 6. ENFORCEMENT OF AGREEMENT AND TERMINATION

6.1 California Law.

This Agreement, and any dispute arising from the relationship between the Parties to this Agreement, shall be interpreted, construed and governed both as to validity and to performance of the Parties in accordance with the laws of the State of California. Legal actions concerning any dispute, claim or matter arising out of or in relation to this Agreement shall be instituted in the Superior Court of the County of Riverside, State of California, or any other appropriate court in such county, and Consultant covenants and agrees to submit to the personal jurisdiction of such court in the event of such action. In the event of litigation in a U.S. District Court, venue shall lie exclusively in the Central District of California, in Riverside.

6.2 Disputes; Default.

A. In the event that City determines Consultant is in default under the terms of this Agreement, City shall have no obligation or duty to continue compensating Consultant for any Services performed after the date of default. In addition to the provisions of Section 4.8, and the right to terminate pursuant to Section 6.7, if the City Manager determines that Consultant is in default in the performance of any of the terms or conditions of this Agreement, City may serve Consultant with written notice of the default. Consultant shall have ten (10) calendar days after service upon it of the notice in which to cure the default by rendering a satisfactory performance.

In the event that Consultant fails to cure its default within such period of time, City may, notwithstanding any other provision of this Agreement, terminate this Agreement without further notice and without prejudice to any other remedy to which it may be entitled at law, in equity or under this Agreement.

B. In the event of termination pursuant to this Section, City may take over the Services and prosecute the same to completion by contract or otherwise, and Consultant shall be liable to the extent that the total cost for completion of the Services required hereunder exceeds the compensation herein stipulated (provided that City shall use reasonable efforts to mitigate such damages), and City may withhold any payments to Consultant for the purpose of set-off or partial payment of the amounts owed City as provided in Section 6.3.

6.3 Retention of Funds.

Consultant hereby authorizes City to deduct from any amount payable to Consultant (whether or not arising out of this Agreement): (i) any payment amount of which may be in dispute hereunder or which is necessary to compensate City for any losses, costs, liabilities, or damages suffered by City, (ii) all amounts retained pursuant to the provisions of Section 4.8, (iii) all amounts for which City may be liable to third parties, by reason of Consultant's acts or omissions in performing or failing to perform Consultant's obligation under this Agreement, and (iv) all payments due or that become due to Consultant during the period that Consultant or any of its sub-contractors fail to maintain any required insurance in full force and effect, until notice is received by City that the required insurance has been restored to full force and effect and that the premiums therefore have been paid for a period satisfactory to City, as provided in Section 4.9, above. In the event that any claim is made by a third party, the amount or validity of which is disputed by Consultant, or any indebtedness shall exist which shall appear to be the basis for a claim of lien, City may withhold from any payment due, without liability for interest because of such withholding, an amount sufficient to cover such claim. The failure of City to exercise such right to deduct or to withhold shall not, however, affect the obligations of Consultant to insure, indemnify, and protect City as elsewhere provided herein.

6.4 Waiver.

Waiver by any Party to this Agreement of any term, condition, or covenant of this Agreement shall not constitute a waiver of any other term, condition, or covenant. Waiver by any Party of any breach of the provisions of this Agreement shall not constitute a waiver of any other provision or a waiver of any subsequent breach or violation of any provision of this Agreement. Acceptance by City of any Services by Consultant shall not constitute a waiver of any of the provisions of this Agreement. No delay or omission in the exercise of any right or remedy by a non-defaulting Party on any default shall impair such right or remedy or be construed as a waiver. Any waiver by either Party of any default must be in writing, and shall not be a waiver of any other default concerning the same or any other provision of this Agreement.

6.5 Rights and Remedies are Cumulative.

Except with respect to rights and remedies expressly declared to be exclusive in this Agreement, the rights and remedies of the Parties are cumulative and the exercise by either Party

of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same default or any other default by the other Party.

6.6 Legal Action.

In addition to any other rights or remedies, either Party may take legal action, in law or in equity, to cure, correct or remedy any default, to recover damages for any default, to compel specific performance of this Agreement, to obtain declaratory or injunctive relief, or to obtain any other remedy consistent with the purposes of this Agreement. Notwithstanding any contrary provision herein, Consultant must file a statutory claim pursuant to Government Code Sections 905 et seq. and 910 et seq., in order to pursue a legal action against City under this Agreement.

6.7 Termination Prior to Expiration of Term.

This Article 6 shall govern any termination of this Agreement except as specifically provided in Section 6.2 for termination for default of Consultant. City reserves the right to terminate this Agreement at any time, with or without cause, upon thirty (30) days' written notice to Consultant, except that where termination is due to the fault of Consultant, the period of notice may be a shorter time as may be determined by the Contract Officer. In addition, Consultant reserves the right to terminate this Agreement at any time, with or without cause, upon sixty (60) days' written notice to City, except that where termination is due to the fault of City, the period of notice may be a shorter time as Consultant may determine. Upon receipt of any notice of termination, Consultant shall immediately cease all Services hereunder except such as may be specifically approved by the Contract Officer. Except where Consultant has initiated termination, Consultant shall be entitled to compensation for all Services rendered prior to the effective date of the notice of termination and for any Services authorized by the Contract Officer thereafter in accordance with the Schedule of Compensation or such as may be approved by the Contract Officer, except as provided in Section 6.3. In the event Consultant has initiated termination, Consultant shall be entitled to compensation only for the reasonable value of the work product actually produced hereunder. In the event of termination without cause pursuant to this Section, the terminating Party need not provide the non-terminating Party with the opportunity to cure pursuant to Section 6.2.

6.8 Attorneys' Fees.

In any litigation or other proceeding by which a Party seeks to enforce its rights under this Agreement (whether in contract, tort or both) or seeks a declaration of any rights or obligations under this Agreement, the prevailing Party in such action or proceeding, in addition to any other relief which may be granted, whether legal or equitable, shall be entitled to reasonable attorneys' fees. Attorneys' fees shall include attorney's fees on any appeal, and in addition the Party entitled to attorneys' fees shall be entitled to all other reasonable costs for investigating such action, taking depositions and discovery and all other necessary costs the court allows which are incurred in such litigation. All such fees shall be deemed to have accrued on commencement of such action and shall be enforceable whether or not such action is prosecuted to judgment.

ARTICLE 7. CITY OFFICERS AND EMPLOYEES: NON-DISCRIMINATION

7.1 Non-liability of City Officers and Employees.

No officer or employee of City shall be personally liable to Consultant, or Consultant's Successor, in the event of any default or breach by City or for any amount which may become due to Consultant or Consultant's Successor, or for breach of any obligation of the terms of this Agreement.

7.2 Conflict of Interest.

Consultant covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, which would conflict in any manner with the interests of City or which would in any way hinder Consultant's performance of Services under this Agreement. Consultant further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or sub-contractor without the express written consent of the Contract Officer. Consultant agrees to at all times avoid conflicts of interest or the appearance of any conflicts of interest with the interests of City in the performance of this Agreement.

No officer or employee of City shall have any direct or indirect financial interest in this Agreement within the scope of Government Code section 1090, nor shall any such officer or employee make, participate in making, or use his or her official position to influence, any City decision relating to the Agreement which has a material financial effect on his or her financial interests or the financial interests of any corporation, partnership or association in which he or she is, directly or indirectly, interested, in violation of any State statute or regulation. Consultant warrants that it has not paid or given, and will not pay or give any third party any money or other consideration for obtaining this Agreement.

Consultant and its officers, employees, associates and sub-contractors, if any, shall comply with all conflict of interest statutes of the State of California applicable to Consultant's Services under this Agreement, including the Political Reform Act (Gov. Code § 81000, et seq.) and Government Code Section 1090. During the term of this Agreement, Consultant may perform similar services for other clients; but Consultant and its officers, employees, associates and sub-contractors shall not, without the Contract Officer's prior written approval, perform services for another person or entity for whom Consultant is not currently performing services that would require Consultant or one of its officers, employees, associates or sub-contractors to abstain from a decision under this Agreement pursuant to a conflict of interest statute. Consultant shall incorporate a clause substantially similar to this Section into any subcontract that Consultant executes in connection with the performance of this Agreement.

7.3 Covenant Against Discrimination.

Consultant covenants that, by and for itself, its heirs, executors, assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, gender, sexual orientation, marital status, national origin, or ancestry in the performance of this Agreement. Consultant shall take affirmative action to insure that applicants are employed, and that employees

are treated during employment, without regard to their race, color, creed, religion, sex, marital status, national origin, or ancestry, or other protected class.

7.4 Unauthorized Aliens.

Consultant hereby promises and agrees to comply with all of the provisions of the Federal Immigration and Nationality Act, 8 U.S.C.A. §§ 1101, et seq., as amended, and in connection therewith, shall not employ unauthorized aliens as defined therein. Should Consultant so employ such unauthorized aliens for the performance of Services covered by this Agreement, and should the any liability or sanctions be imposed against City for such use of unauthorized aliens, Consultant hereby agrees to and shall reimburse City for the cost of all such liabilities or sanctions imposed, together with any and all costs, including attorneys' fees, incurred by City.

ARTICLE 8. MISCELLANEOUS PROVISIONS

8.1 Notices.

Any notice, demand, request, document, consent, approval, bill, invoice, report or other communication required or permitted under this Agreement shall be in writing and conclusively deemed effective: (a) on confirmed delivery by courier service or overnight delivery service during Consultant's and City's regular business hours; or (b) three (3) Business Days after deposit in the United States mail, by certified or registered mail, and addressed to the Party to be notified as set forth below:

If to City	Attn: Nathan Smith Deputy Director of Public Works City of Banning 99 East Ramsey Street Banning, California 92220 Email: nsmith@banningca.gov
With a courtesy copy to:	Serita R. Young, City Attorney Richards, Watson & Gershon 350 South Grand Avenue, 37th Floor Los Angeles, California 90071 Email: SYoung@rwglaw.com
If to Consultant:	Attn: Bart Williamson CEO Roadway Asset Services LLC 1545 E. Commerce Drive St. George, UT 84790 Email: bwilliamson@roadwaysassetservices.com

8.2 Interpretation.

The terms of this Agreement shall be construed in accordance with the meaning of the language used and shall not be construed for or against either Party by reason of the authorship of this Agreement or any other rule of construction which might otherwise apply.

8.3 Counterparts.

This Agreement may be executed in counterparts, each of which shall be deemed to be an original, and such counterparts shall constitute one and the same instrument.

8.4 Integration; Amendment.

This Agreement, and all exhibits referred to in this Agreement, constitute the final, complete and exclusive statement of the terms of the agreement between the Parties pertaining to the subject matter of this Agreement and supersede all other and cancels any and all previous negotiations, arrangements, agreements and understandings, if any, between the Parties, and none shall be used to interpret this Agreement. No Party has been induced to enter into this Agreement by, nor is any Party relying on, any representation or warranty except those expressly set forth in this Agreement. No amendment to or modification of this Agreement, nor any provision or breach hereof waived, shall be valid unless made in writing and approved by Consultant and by City Council. The Parties agree that this requirement for written modifications cannot be waived and that any attempted waiver shall be void.

8.5 Severability.

In the event that any one or more of the phrases, sentences, clauses, paragraphs, or sections contained in this Agreement shall be declared invalid or unenforceable by a valid judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining phrases, sentences, clauses, paragraphs, or sections of this Agreement which are hereby declared as severable and shall be interpreted to carry out the intent of the Parties hereunder unless the invalid provision is so material that its invalidity deprives either Party of the basic benefit of their bargain or renders this Agreement meaningless.

8.6 Mutual Cooperation.

A. City's Cooperation. City shall provide Consultant with all pertinent data, documents and other requested information as is reasonably available for Consultant's proper performance of the Services required under this Agreement.

B. Consultant's Cooperation. In the event any claim or action is brought against City relating to Consultant's performance of Services rendered under this Agreement, Consultant shall render any reasonable assistance that City requires.

8.7 No Third Party Beneficiaries Intended.

This Agreement is made solely for the benefit of the Parties to this Agreement and their respective successors and assigns, and no other person or entity may have or acquire a right by virtue of this Agreement.

8.8 Final Payment Acceptance Constitutes Release.

The acceptance by Consultant of the final payment made under this Agreement shall operate as and be a release of City from all claims and liabilities for compensation to Consultant for anything done, furnished or relating to Consultant's Services. Acceptance of payment shall be any negotiation of City's check or the failure to make a written extra compensation claim within ten (10) calendar days of the receipt of that check. However, approval or payment by City shall not constitute, nor be deemed, a release of the responsibility and liability of Consultant, its employees, sub-contractors and agents for the accuracy and competency of the information provided and/or Services performed; nor shall such approval or payment be deemed to be an assumption of such responsibility or liability by City for any defect or error in the Services prepared by Consultant, its employees, sub-contractors and agents.

8.9 Non-Appropriation of Funds.

Payments to be made to Consultant by City for Services performed within the current fiscal year which are within the current fiscal budget and within an available, unexhausted fund. In the event that City does not appropriate sufficient funds for payment of Consultant's Services beyond the current fiscal year, this Agreement shall cover payment for Consultant's Services only to the conclusion of the last fiscal year in which City appropriates sufficient funds and shall automatically terminate at the conclusion of such fiscal year.

8.10 Headings.

The headings in this Agreement are included solely for convenience of reference and shall not affect the interpretation of any provision of this Agreement or any of the rights or obligations of the Parties to this Agreement.

8.11 Word Usage.

Unless the context clearly requires otherwise, (a) the words "shall," "will" and "agrees" are mandatory and "may" is permissive; (b) "or" is not exclusive; and (c) "includes" or "including" are not limiting.

8.12 Business Days.

"Business Days" refers to days that the Banning City Hall is open for business.

8.13 Corporate Authority.

The persons executing this Agreement on behalf of the Parties hereto warrant that (i): such Party is duly organized and existing, (ii) they are duly authorized to execute and deliver

this Agreement on behalf of that Party, (iii) by so executing this Agreement, such Party is formally bound to the provisions of this Agreement, and (iv) the entering into this Agreement does not violate any provision of any other Agreement to which that Party is bound. This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the Parties.

8.14 Electronic Signatures.

Each Party may adopt as its signature an electronic identification consisting of a symbol or code that is affixed to or contained in each document transmitted by such Party ("electronic signature"). The Parties hereto herby agree that electronic signatures are acceptable, shall have the same force and effect under the law as original wet signatures, and shall be sufficient to verify that the Parties have executed this Agreement and such other documents transmitted by the Parties.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF the Parties hereto have executed this Agreement the day and year first hereinabove written.

EXHIBIT "A"
SCOPE OF SERVICES

I. Consultant will perform the following Services in connection with providing professional services for Fixed Asset Inspection prepared in connection therewith:

II. As part of the Services, Consultant will prepare and deliver the following tangible work products and services to City:

A. Statement of Understanding and Approach

A.1 Understanding of the City's Requirements

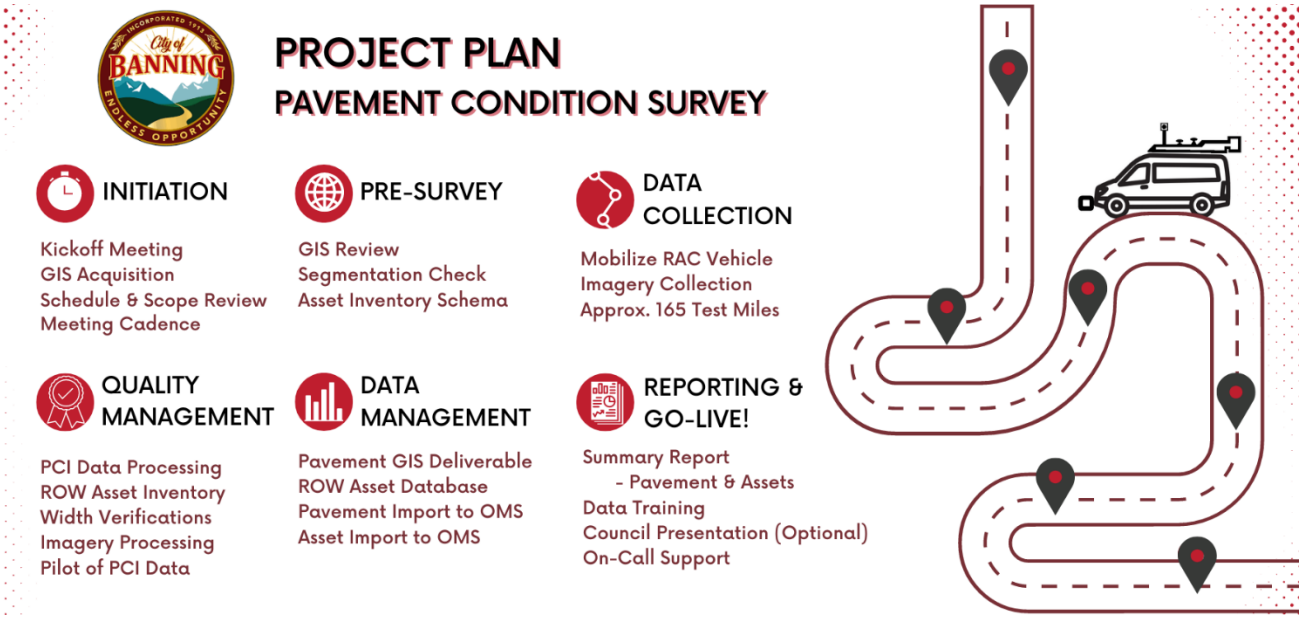
The RAS team understands that the City's Fixed Asset Inspection and Inventory Assessment includes the collection of approximately **150 centerline miles** of paved roadways, signs, markings, supports, light fixtures, guardrails, ADA ramps, sidewalks, trees, inlets, outlets, catch basins, retention basins, culverts, manholes, outfalls, trash capture devices. RAS will utilize an automated Roadway Asset Collection (RAC) vehicle to collect imagery of the roadway and assets, geolocate the assets, perform an object pavement condition assessment, format pavement and asset data for import to Cartegraph OMS, and deliver a final summary report for the pavement and ROW assets.

The **RAS fleet of four (4) Roadway Asset Collection (RAC)** vehicles are equipped with a Laser Crack Measurement System (LCMS-2) for automated pavement data acquisition and a **certified laser profiler** which includes line lasers for capturing full lane rutting and roughness data in conformance with the AASHTO R 57. The raw sensor data will be collected, processed, and aggregated to the segment level contained in the City's Cartegraph OMS Software. The data will be collected and delivered in accordance with the most current version of the U.S. Army Corps of Engineers data protocols, commonly referred to as ASTM D6433. The RAC vehicles meet or exceed all of the requirements for pavement surface imaging as defined by the City.

As a **Strategic Business Partner of Cartegraph** and routine implementer of the pavement module, RAS will upload the new pavement inspection data into Cartegraph as "Inspected OCI" to assist the City in updating the enterprise software for budgetary modeling development (performed by City). **RAS is a preferred business partner with Cartegraph and will ensure seamless access to the OMS environment through a review of the test environment before moving into production.** In addition, RAS has a tried and tested method to complete the data import and we have the staff expertise in-house to support the City's software implementation tasks not included in the "Orange Advantage" package.

RAS understands that the City's utilized the Nobel GIS suite of tools for spatial data management. Nobel utilizes the ESRI ArcGIS Engine and ArcSDE software that is utilized for data management for GIS-centric projects. RAS is an ESRI Silver partner and we have the solutions to meet the City's GIS integration needs.

At the close of the project, RAS will prepare and deliver a Letter of Certification with a narrative Summary Report certifying the asset count, methodology, documenting missing assets, assets in unserviceable condition and state of disrepair, and provide recommendations for developing a comprehensive replacement schedule with projected cost estimates.



A.2 Project Approach

RAS' project approach includes the management of tasks by seasoned asset and pavement management professionals who bring over a **combined 150 years of experience**. The benefit of RAS on this assignment is that the team is dedicated to asset and pavement management on a daily basis. This is their core focus as transportation professionals. The RAS team utilizes the Project Management Body of Knowledge (7th edition) to define and adhere to the principles of planning. The planning processes include organizing, scheduling, controlling, and coordinating.

Implementation Plan

RAS has experience in gaining stakeholder engagement through the facilitation of educational workshops and council meetings. RAS understands a crucial aspect to the successful implementation of data driven analysis results is getting approval from City officials and stakeholders. Our team utilizes the **Account Ability AA1000ES Assurance Framework for Stakeholder Engagement** that defines the management of multi-stakeholder bodies through a Materiality, Completeness, and Responsiveness lens. Project initiation will begin by coordinating with the City to identify various stakeholders and involved parties. After stakeholders have been identified, RAS will conduct workshops to discuss mutual goals with the data collection project and priorities for improvements in the City's street network. RAS will eliminate bias based on our methodology for rating pavement distresses that follow the ASTM D6433-20 standards. City confidence in the data enables solutions to be made based on the represented rating of the network and reduces biases in decision-making.

Task 1: Kickoff and Project Management

Kickoff Meeting

At the outset of the project, RAS will work in conjunction with City Staff to develop the initial scope of work and identify what tasks are critical to the City's pavement management program. RAS will review the City's existing GIS centerline files and Cartegraph database for use in this project. After an initial review, RAS will conduct the Kickoff Meeting to discuss the GIS files, requirements/considerations, deliverable formats, and additional data needed by RAS for preparation and project administration. During the kickoff meeting, RAS will present a project schedule and fees, identify tasks and milestones, review the methodology utilized, provide a detailed quality assurance/quality control (QA/QC) plan, suggest a schedule for biweekly progress meetings, and discuss goals for the project. In addition, team members will also determine a pilot area of approximately 10 miles for collection and review of all deliverables by City Staff. We will also obtain a collection letter for field crew use and determine areas that are of greatest priority or that require special timing for collection due to festivals.

Project Milestone/Monthly Meetings

RAS understands that communication between the RAS team and the City of Banning is central to having a successfully managed contract. To ensure project requirements are met, RAS will host biweekly meetings to review the percentage of the network collected and rated. RAS will meet and exceed the minimum of 5 meetings and will present progress reports, meeting agendas, and minutes.

Capacity to Perform the Work

RAS has internal processes and partnerships that ensure the negotiated budget and timeline are maintained. One way RAS optimizes its field data capture is by collecting pavement condition data 7 days a week, which allows our team to remain ahead of schedule when events such as storms or other weather-related events do occur. In addition, RAS' strength lies in our ability to mobilize additional equipment if the collection vehicles go down for maintenance. RAS operates a fleet of four data collection vehicles that are less than four years old and has a partnership with our equipment manufacturer/assembler who will provide replacement equipment or technical support within 48 hours. This level of service results in minimal downtime.

Project Schedule

RAS has presented the following schedule to demonstrate its efficiency in data collection, processing, quality assurance, and delivery of a final report. This schedule represents a realistic timeline to complete the work associated with the requested scope of work.

Task	Description / Milestone	Days	Month: Starting Upon Receipt of NTP 1	2	3	4	5
1	Project Initiation, Kick-Off, & Centerline Identification	14					
2	Field Mapping Development, Segmentation Review, & Routing Setup	5					
3a	Roadway Asset Collection (RAC) Vehicle Mobilization/Calibration	2					
3b	RAC Pavement Distress & Imagery Collection	50					
4a	Pavement Evaluation, ASTM D6433 Data Processing, & QC	105					
4b	Pilot Data Review with City Staff	2					
4c	Independent ASTM D6433 Field Review and Ground-Truthing	5					
4d	HD Digital Image Processing & Delivery	60					
5a	ROW Asset Inventory & Attribution	9					
5b	PCI Data Import to StreetSaver®	10					
6a	RAS & City Review of Final Data	20					
6b	Delivery of Report and Final Data	10					
PM	Schedule Project Status Meetings	10					

CRITICAL PATH COMPONENTS

Prep/GIS Database Work
Field Work
Extraction/Evaluation/QC Work
Final Deliverable

Assumptions

- Centerline file to be provided as a geodatabase.
- OWNER to provide access to NOBEL GIS data and the “Pavement Layer” for data linking.
- Arterials and Collectors are two pass collection and Locals and Residentials are one pass collection.
- Surveys to be completed when pavements are dry and free of standing water.
- City to participate in project activities in a timely manner to ensure schedule integrity.

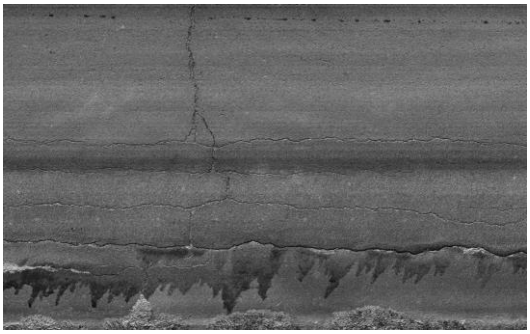
Task 2: Pre-Survey GIS Mapping and Network Centerline Identification

RAS will review the City's existing GIS centerline and perform an audit of the data to ensure that all roads requiring data collection are surveyed. This will include a review of functional classes and coverage checks for major/divided roads (Wilson St, Highland Springs Ave, Sunset Ave, Ramsey St, Sun Lakes Blvd, Hathaway St.) that require two-directional testing. The result will be a clean GIS centerline, ready for consumption of additional layers and attribution related to the pavement condition surveys and asset inventories.

To ensure adequate coverage and exceed requirements, the RAC vehicle will survey arterial and collector roads in two directions, while single pass testing the residential roads. This approach ensures the highest level of detail and representative pavement conditions. At the completion of the project, the roadway and right of way images (provided at no cost) and condition database for the network will be formatted for upload into Cartegraph OMS, the City's GIS environment, and the optional RAS web-hosted videologger.

Task 3: Perform Physical Inspection and Inventory

Roadway Asset Collection (RAC) Vehicles



The pavement data will be processed per road segment for the entire roadway network using the continuous and detailed 20-foot linear samples acquired by the RAC Laser Crack Measurement System (LCMS-2) vehicle. RAS will adopt the City's existing GIS linked OMS centerlines and the detailed 20-foot LCMS samples will be processed into 2,500 sqft samples following the ASTM D6433 logic. These 2,500 sqft samples can then be loaded as sample inspections for every City segment, thus creating multiple inspections for each segment. Alternatively, RAS can also aggregate the 2,500 sqft samples to match the City's existing segmentation, thus creating one inspection record for every segment. The RAS approach is comprehensive and nimble enough to evolve with City expectations. The City will receive the condition and analysis results in several formats such as Excel Spreadsheets and geodatabases prior to the final Cartegraph production load.

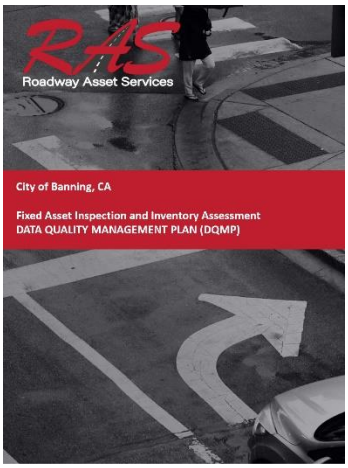
All RAC vehicles operate within the appropriate ASTM and AASHTO standards and have been independently certified by Texas A&M Transportation Institute to ensure accuracy with the data collection. An enhancement and cost savings initiative that differentiates RAS from other pavement condition survey approaches is that the advanced technology equipped on the RAC vehicles **does NOT require two passes on local/residential roads.** This will save the City time and money as the total **number of test miles driven is substantially reduced** compared to all-lane surveys.

RAS will calculate an ASTM D6433 PCI score using the detailed extent and severity distress data captured in the field for every segment, for all street functional classifications and the overall network. In addition, IRI values will be provided for all street functional classifications in accordance with the AASHTO R 57. The combined PCI and IRI data will be imported to Cartegraph to calculate the Overall Condition Index (OCI).

To complete the automated pavement condition survey, the RAS team will utilize RAC vehicles from the fleet of four (4), equipped with:

- The LCMS-2 camera is a downward-facing laser array providing images used to evaluate data that conforms with ASTM D6433 protocols, which uses **two 1-millimeter-pixel** resolution line scan cameras to **provide a customized digital condition rating system to collect user defined severity/extent-based pavement distresses and rutting.**
- The pavement distress type, density, severity, and extent are collected with the LCMS-2 and are used to calculate a Pavement Condition Index (PCI) score, between 0-100, that represents the condition of 100% of the driven lanes.
- Point Gray Ladybug 5+ 32MP **360-degree High-Definition camera** (**utilized for accurate ROW asset capture, extraction, and pavement QA/QC**) is far superior to multiple independently mounted HD cameras. These images will be supplied to the City at no additional cost as the RAS team feels they are critical for City review and acceptance.
- **Linear distance measuring to within +/-0.5%**.
- A class 1 inertial profiler for simultaneously capturing dual-wheel path (left and right) International Roughness Index (IRI) measurements to the hundredth inch, in accordance with AASHTO R48. The profiler has gone through **ASTM E-950** certification and **was independently certified by Texas A&M Transportation Institute (TTI) in March 2024.** The inertial profiler meets the requirements and will be operated in accordance with **AASHTO Standards M 328, R 57-10, R 56-10, and R43M/R43-7**.
- Applanix POS/LV with DGPS (**Provides accurate internal GPS navigation for geo-locating pavement and right of way asset information**).

The RAS team will conduct pavement survey work on dry pavement and in lighting conditions that ensure accurate crack detection. We will collect imagery during daylight hours only, with no rain, fog, or snow visibility obstructions. Any road segment(s) that exhibits low image quality due to lighting will be recollected at a later time. The industry is currently migrating toward automated intelligence (AI) rating for 100% linear assessment of the roads, in accordance with guidelines within the **ASTM D6433, ASTM E1656, and ASTM E3303**. This methodology removes the subjectivity of rating small sample areas of the road segment where the sample may not represent the condition of the entire roadway segment.



Ladybug 360^{o} Imagery

All collected pavement and ROW imagery will be provided in appropriate state plane coordinates while being collected in one continuous pass at posted roadway speeds for residential roads and two pass-testing arterial and collectors. The high-definition panoramic Ladybug camera will be used to inventory and capture right-of-way (ROW) assets for extraction. The images will be collected as a 360^{o} right-of-way panorama, including forward, rearward, and downward pavement viewing images. Each image will be electronically tagged with location information for plotting within a spatial environment.

Example Ladybug ROW Imagery & Pavement LCMS-2 Imagery Deliverables

Task 4: Detailed Quality Assurance & Quality Control Work Plan

RAS has also developed a detailed 30-page **Data Quality Management Plan (DQMP)** to provide our clients with a systemized method for assuring data is representative of the conditions present. Included in the DQMP is a description of condition survey procedures, data collection vehicle calibration, range of accuracy, data checks, safety procedures, verification by trained engineers, roadway segment review/verification, and integration into Cartegraph. A unique feature of our quality managmenet plans is a 10-mile field verification pilot reviewed by RAS, Bucknam Infrastructure Group, & City Staff that will illustrate the completeness and accuracy of the RAS data stream. We can supply the City of Banning with our published 30-page DQMP at the request of City Staff. The document's length and technical nature didn't make it suitable for inclusion with this proposal submission.

Quality Assurance Step #1– Network Database Review (Completeness / Gap Analysis)

While a simple routine in every project, the cornerstone to project initiation is conducting a complete diagnostic of the roadway network, including a full and thorough assessment of the City's GIS centerline and Cartegraph inventory database. This will include a review of the City's data requirements (i.e., what information is needed/desired) and subsequent data gap analysis (what is missing).

RAS will include the following in this initial review:

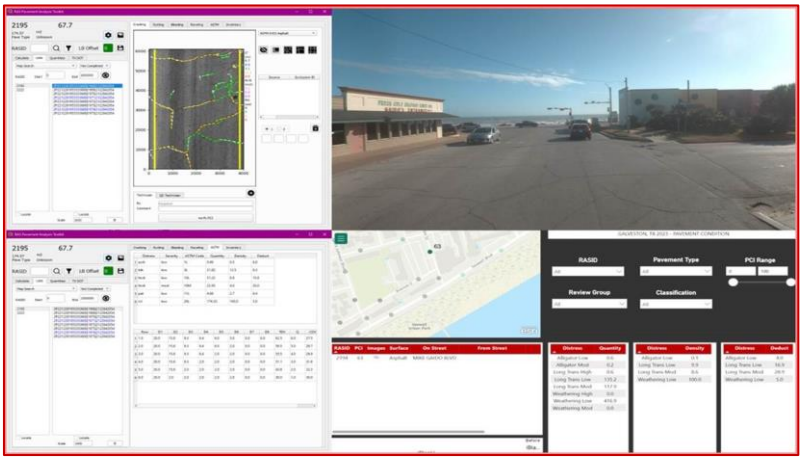
a. Base inventory information, (i.e., Functional Class, lengths, areas, surface type, etc.)
b. Historical condition information
c. Status of survey history
d. Construction and maintenance history
e. Review of maintenance and rehabilitation treatments and unit costs
f. Review of existing pavement deterioration curves
g. Review of Scenario Builder routines to ensure City is maximizing latest updates (optional task)

Quality Assurance Step #2 – Mobilization/Calibration/Pilot/Kickoff

> *"The pilot data field validation was crucial to our acceptance and buy-in on our pavement quality assessment. Mr. Gordon explained each condition, the methods of measurement of the distresses, and how the PCI score calculations could help us understand the meaning and relationship of the values to our perceptions of pavement performance. This personalized process allowed us to make maintenance decisions from the data provided with confidence." Zayne Huff, City of Southlake*

The importance of the **field pilot** cannot be understated as it has become a routine milestone for the RAS Team on all pavement condition projects. The pilot allows RAS to collect, process, and review condition data with City Staff to ensure accuracy with the data collection and interpretation protocols. In addition to the City's eventual review of the 10-mile pilot data, **RAS subconsultant Bucknam Infrastructure Group (a local pavement management consultant), will conduct an independent 3rd party review of the 10-mile pilot to assist in the quality review process. The review of the RAS condition data and Bucknam QC will be hosted by Senior Pavement Engineer, Scot Gordon, PE, IAM in the field, where he will review site conditions with City Staff**. Scot uses a field tablet that contains the segment PCI scores along with the deduct points assigned to each distress such that everyone understands the PCI impacts of distresses that are present. The importance of this step is to make necessary corrections to the processing routines that result from local standard construction practices/soil conditions and to ensure accuracy with the approach. As certified ASTM D6433 inspectors, Bucknam will conduct a walking survey on the 10 miles of roadway through the selection of representative samples for each segment, covering a minimum of 20% of the total section area and samples will be 2,500 square feet (+/- 1,000 sqft) in size.

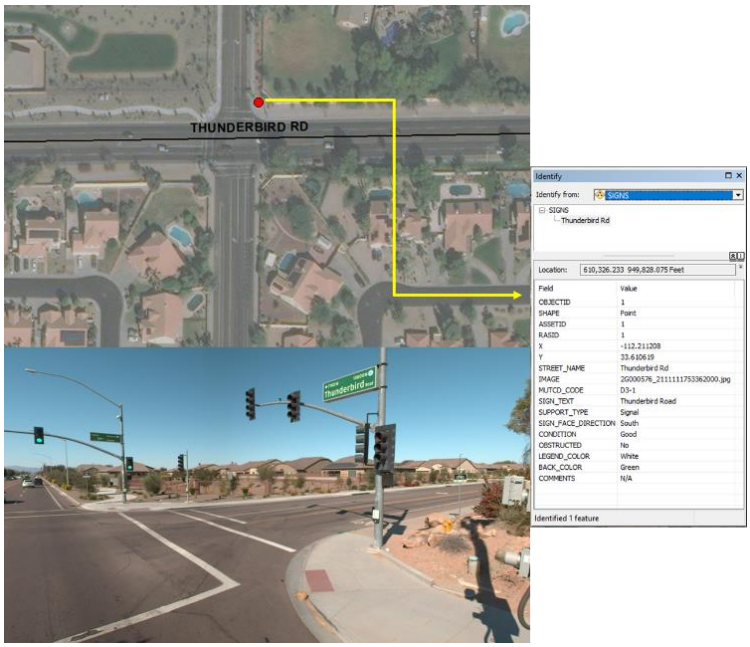
As a cornerstone to the development of quality data deliverables, Scot Gordon, PE has performed a pilot data field validation with agency staff on hundreds of pavement condition surveys. Throughout his career, Scot has worked with various agencies on the **field pilot data validation** including but not limited to:



- Houston, TX
- Durham, NC
- Virginia Beach, VA
- Indianapolis, IN
- Fort Worth, TX
- Salt Lake City, UT
- Denver, CO
- Albuquerque, NM
- Charlotte, NC

Quality Assurance Step #3 – Subsystem Monitoring in The Field

During the survey, the RAS collection software monitors the GPS subsystems and alerts the operator if the GPS feed drops out or if GPS quality is compromised. The IMU will provide acceleration-based corrections during this time to ensure that GPS accuracy is maintained as much as possible. The RAS team will also review a randomized sample of images to ensure that it complies with the requirements of the specifications throughout the course of the network matching and event QC. Upon completion of the network matching, an image report shall be generated with the total image count compared with that expected for each road. Daily Progress Reports are produced by uploading sensor, GPS, and event data and matching against the road network definition. Progress reports include the following, road sections collected, length discrepancies, and remaining sections to be completed.



Quality Assurance Step #4 – Automated Crack Analysis & Engineer Review

After data is collected in the field and uploaded to the office environment, it is imported using the RAS AI enhanced pavement rating tool **RoadTRIP™ (Technical Rating Intelligence Program)**. The import process creates mappings to the data so that users do not need to keep track of where the data is stored on central data server(s). At this stage, the major data processing tasks also occur, such as generation of right-of-way and pavement image streams; calculation of profile, roughness, rutting, detection of cracks, lane-markings, man-made objects, and other distresses. The **RoadTRIP™** application was designed around the ASTM D6433 data collection protocols and contains a **PCI calculator** that uses distress deduct curves and Q-correction. This PCI is used for Quality Assurance before importing detailed extent/severity distress data into Cartegraph. **RoadTRIP™** was programmed with sophisticated algorithms that use sound geometry and distress density to properly classify and quantify pavement distresses.

An experienced pavement inspector will perform QC to confirm the distresses and severity of the pavement condition data collected by the automated technology. This manual quality review is performed, in accordance with the principles of the ASTM D6433 standard, using the LCMS pavement images gathered during collection with the distresses superimposed and color coded.

Task 5a: ROW Asset Inventory

RAS has a proven methodology to perform asset inventory and inspection services for **Transportation, Walkability, and Stormwater** infrastructure. At a minimum, each requested asset will receive a photograph and geolocation for plotting within a spatial environment **(with signs, markings/striping, ADA ramps, and sidewalks receiving a condition assessment)**. Eash asset class will be provided to the City as a file geodatabase, with imagery links, and formatted for import to Cartegraph OMS.

The following **Data Dictionary** will be taken to develop the right-of-way asset inventory and condition assessment for the City's requested infrastructure assets.

ROW Asset Data Dictionary

RAS can post-process the Ladybug panoramic imagery using RAS software to collect attributes for each asset type captured. Note that each of these ROW assets will include geolocation and a hyperlinked photo. Each of the attributes *highlighted in light blue* will be included as a **no-cost, value-add to the inventory**.

			City of Banning ROW Asset Data Dictionary					
Selected Asset	**Code**	**Geometry**	**Field 1 Attribute**	**Field 1 Data**	**Field 2 Attribute**	**Field 2 Data**	**Field 3 Attribute**	**Field 3 Data**
Signs	SIGN	Point	SIGN_ID or Client Schema	Unique identifier for each sign e.g. 100000 or Client Schema	SIGN_Condition	An identification of the condition of the sign. Populated as 1-Good 2-Fair 3-Poor	SIGN_MUTCD	Numerical MUTCD Code for the Sign
Supports	SS	Point	SS_ID or Client Schema	Unique identifier for each sign support e.g. 200000 or Client Schema	SS_Type	An identification of the material type of support structure (wood, utility pole, bridge, etc.)	N/A	N/A
Pavement Markings	PM	Point	PM_ID or Client Schema	Unique identifier for each pavement marking e.g. 300000 or Client Schema	PM_Condition	An identification of the condition of the pavement marking. Populated as 1-Good 2-Fair 3-Poor	PM_Type	The type of marking taken from a picklist of custom MUTCD codes (bike symbol, railroad crossing, double arrow LT, etc.)
Pavement Striping	PS	Linear	PS_ID or Client Schema	Unique identifier for each painted/inlaid striping e.g. 400000 or Client Schema	PS_Condition	An identification of the condition of the striping. Populated as 1-Good 2-Fair 3-Poor	PS_Type	The type of striping taken from a picklist of custom codes (solid, dashed, double, etc.)
Light Fixtures	LF	Point	LF_ID or Client Schema	Unique identifier for each light fixture e.g. 500000 or Client Schema	LF_Condition	An identification of the condition of the light structure. Populated as 1-Good 2-Fair 3-Poor	LF_Support Type	The construction style of the support e.g. wood mast, round metal, ornamental, etc.
Guardrails	GR	Linear	GR_ID or Client Schema	Unique identifier for each guardrail e.g. 600000 or Client Schema	GR_Condition	An identification of the condition of the guardrail. Populated as 1-Good 2-Fair 3-Poor	GR_Type	The primary construction material of guardrail e.g. cable, concrete, bike/ped, etc.
Pedestrian Curb Ramps	RAMP	Point	RAMP_ID or Client Schema	Unique identifier for each curb ramp e.g. 700000 or Client Schema	RAMP_Condition	An identification of the condition of the curb ramps. Populated as 1-Good 2-Fair 3-Poor	RAMP_VIF	Identifies the presence of truncated domes or other visual impairment facilities
Sidewalks	SW	Linear	SW_ID or Client Schema	Unique identifier for each sidewalk structure e.g. 800000 or Client Schema	SW_Condition	An identification of the condition of the sidewalk. Populated as 1-Good 2-Fair 3-Poor	SW_Type	A description of the primary method or style of construction (stand-alone, boulevard, etc.)
Trees	TREE	Point or Linear	TREE_ID or City Schema	Unique identifier for each tree withing the adjacent right-of-way e.g. 900000 or City Schema	Note: Trees that are bunched together will be drawn in as a linear asset.	N/A	N/A	N/A
Inlets	INLT	Point	INLT_ID or Client Schema	Unique identifier for each storm inlet e.g. 1000000 or Client Schema	INLT_TYPE	Type of inlet contruction (open, covered, grate, etc.)	N/A	N/A
Outlets	OUT	Point	OUT_ID or Client Schema	Unique identifier for each outlet e.g. 1100000 or Client Schema	OUT_TYPE	Type of outlet constuction (open, covered, grate, etc.)	N/A	N/A
Catch Basins	CABA	Point	CABA_ID or Client Schema	Unique identifier for each catch basin e.g. 1200000 or Client Schema	CABA_TYPE	Type of catch basin construction (open, covered, grate, etc.)	N/A	N/A
Retention Basins	REBA	Point	REBA_ID or Client Schema	Unique identifier for each retention basin e.g. 1300000 or Client Schema	REBA_TYPE	Type of retention basin construction (open, covered, grate, etc.)	N/A	N/A
Culverts	CUL	Point	CUL_ID or Client Schema	Unique identifier for each culvert e.g. 1400000 or Client Schema	CUL_TYPE	Type of culvert construction (open, covered, grate, etc.)	N/A	N/A

			City of Banning ROW Asset Data Dictionary					
Selected Asset	**Code**	**Geometry**	**Field 1 Attribute**	**Field 1 Data**	**Field 2 Attribute**	**Field 2 Data**	**Field 3 Attribute**	**Field 3 Data**
Manholes	MAN	Point	MAN_ID or Client Schema	Unique identifier for each manhole e.g. 1500000 or Client Schema	MAN_TYPE	Style of manhole (circular, rectangular, etc.)	N/A	N/A
Outfalls	OF	Point	OF_ID or Client Schema	Unique identifier for each outfall e.g. 1600000 or Client Schema	OF_TYPE	Type of outfall construction (open, covered, grate, etc.)	N/A	N/A
Trash Capture Devices	TCD	Point	TCD_ID or Client Schema	Unique identifier for each trash capture device e.g. 1700000 or Client Schema	N/A	N/A	N/A	N/A

Sign Retroreflectivity Assessment

RAS is aware that traffic fatality rates are 3 times higher during nighttime than daytime with reduced nighttime roadway visibility as a common factor. RAS also recognizes the importance of nighttime visibility of traffic control devices as our population ages. In general, older individuals have declining vision and slower reaction times. Signs that are easier to see and read at night can help older drivers retain their freedom of mobility and remain independent. RAS can provide the City with a Federal Highway Administration (FHWA) Visual Nighttime Inspection Method and would record in the database whether the sign meets the minimum guidelines in the MUTCD.

Visual Nighttime Inspection Method

The Visual Inspection Method involves an inspector (over age 60) that will assess the visibility and retroreflectivity of the traffic signs as the signs are approached. Signs need to be replaced if they do not meet the comparison defined in one of the three approved procedures: Calibration Signs Procedure, Consistent Parameters Procedure, and the Comparison Panels Procedure. For this project, we will be utilizing a combination of the Calibration Signs Procedure and the Comparison Panels Procedure. The description of these procedures is provided as contained in the FHWA document:

Calibration Signs Procedure **-** Calibration signs are viewed prior to conducting the nighttime inspection. The calibration signs have retroreflectivity levels at or above the minimum levels. These signs are set up where the inspectors can view the calibration signs in a manner similar to how they will conduct the nighttime inspection. The inspector uses the visual appearance of the calibration sign to establish the evaluation threshold for that night's inspection activities.

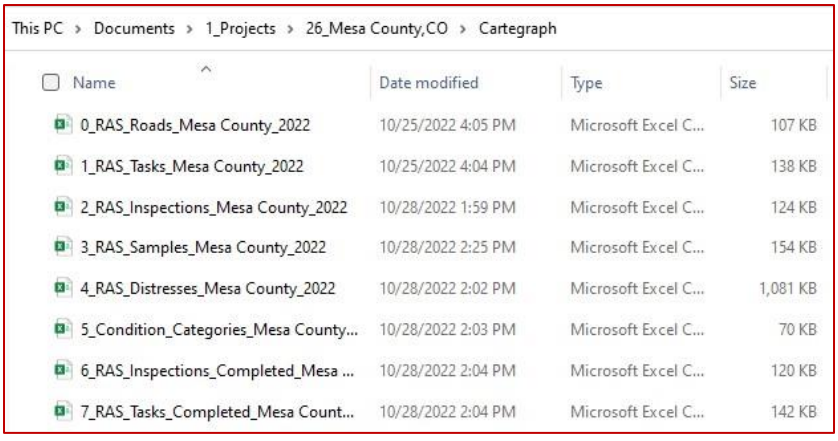
Calibration signs are needed for each color of sign for which there are minimum levels. The calibration signs are viewed at typical viewing distances and from the same vehicle that will be used for conducting the inspections. The calibration signs need to be safely stored between inspections so that the retroreflectivity of the calibration signs does not deteriorate over time. Calibration signs are checked at periodic intervals to ensure that the calibration panels have the appropriate retroreflectivity levels.

Comparison Panels Procedure **-** Small comparison panels are used to assess the retroreflectivity of questionable signs. The comparison panels are fabricated at retroreflectivity levels that are at or above the minimum levels. When the retroreflectivity of a sign is considered to be questionable, a comparison panel is attached to the sign and the sign/panel combination is viewed by the inspector.

If the comparison panel appears brighter than the sign, the sign needs to be replaced. Utilizing both of these methods will help the inspector in situations where the retroreflectivity is questionable. The inspector will use the Calibration Signs Procedure, and if the inspector encounters a situation where the inspector is not sure, the inspector can then use the Comparison Panels Procedure.

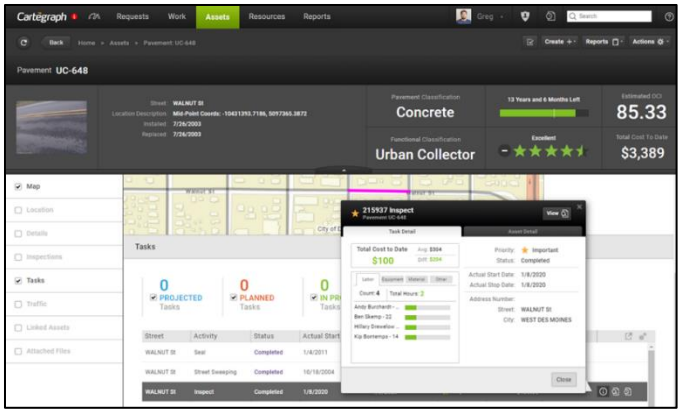
Sign Reflectivity Attribute Model

- **Non Compliant** – Extremely low or no visibility when viewed at distances over 500 feet (greater than 10 skips or at a distance when the sign first comes into view) and/ or not legible at 250 feet or less (i.e. Less than 5 skips).
- **Compliant** – Clearly visible when viewed at distances over 500 feet (greater than 10 skips or at a distance when the sign first comes into view) and good legibility at 250 feet or less (i.e. Less than 5 skips).



We will utilize the two-person data collection method, where one person drives the vehicle and the second person (over age 60) assesses the retroreflectivity of each sign. The reflectivity assessment will be entered into the project delivery sign geodatabase.

Task 5b: Import to Cartegraph OMS Asset Management System



As a strategic business partner of Cartegraph, the RAS team is commonly tasked with importing new pavement inspection data into an agency's production Cartegraph environment. RAS has assigned **Cartegraph's former Senior Vice President of Services, Jeff Booth, MBA,** to manage Cartegraph import and data configuration. RAS Director of Deliverables, Jeff Booth, brings over **10 years of experience intimately working with Cartegraph and 7 years of municipal experience serving as an IT Project Manager**. A typical Cartegraph import happens in two phases as follows:

Phase I: Test Environment – most agencies operating an enterprise system such as Cartegraph OMS have a test environment specifically set up for vendors to test a data load or parameter configuration prior to moving into production. During this stage, the RAS team formats the 2,500 sq.ft. inspection samples or segment level distress data for import into the Cartegraph OMS software. The data is loaded as a new inspection such that it DOES NOT overwrite any legacy data within the software. Old inspections are retained and simply no longer utilized for budgetary modeling purposes.

Data loading for Cartegraph users includes the development of a series of 7 specific import sheets (see image to right) that are formatted for use with the Cartegraph import/export utility. The import sheets cover updates to core segment attribution, tasks, inspections, samples, distress data, and condition categories. The RAS approach to data import is approved and recommended by Cartegraph. While RAS routinely imports data to Cartegraph, we find it imperative to begin with a test environment to fully ensure data integrity.

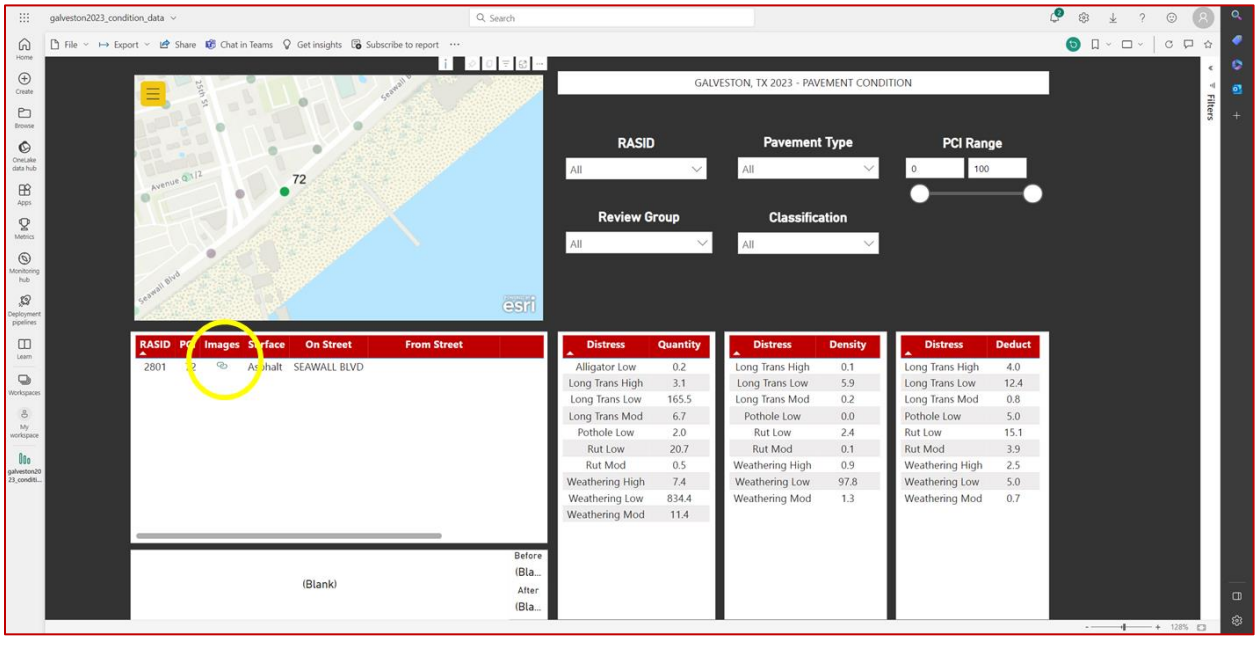
Phase II: Production Environment – Upon completion of the import to the test environment, the RAS Team has our Cartegraph support team review the loaded data to ensure there are no gaps in the data structure or format. Upon acceptance of Cartegraph, the RAS team moves the database into the City's production environment, generally in off-hours to ensure minimal downtime for City Staff and Services. RAS has the team, resources, and expertise to conduct a seamless production load to Cartegraph.

Task 6a: Final Deliverables and Preparation of Summary Report

Hosted RAS Data Validation Portal

While RAS is passionately dedicated to quality data before it is delivered to our clients, we also firmly believe that every client should have the ability to review that data set without having to be software or database experts. So, while most consultants deliver an Excel spreadsheet or a File Geodatabase that the City has to review internally, RAS takes it one step further by setting up a Microsoft PowerBI dashboard that was specifically designed to assist the City in their review of the RAS data.

Below is an image of the **RAS Data Validation Tool** that resides within PowerBI. As can be seen, City staff will have easy access to a map that displays the **pavement condition data** on a segment-by-segment basis. The user has the ability to filter by unique ID or even a PCI range, pavement type, or functional classification depending on what they would like to visualize. Upon clicking on the desired segment for inspection, the distress deducts are then displayed in the lower right-hand side of the screen, indicating that this particular segment with a PCI of 72 is largely impacted by low severity longitudinal and transverse cracking in addition to low severity rutting. The user can then click on an image link (circled in yellow below) to verify the displayed distress deducts by virtually driving down the segment.



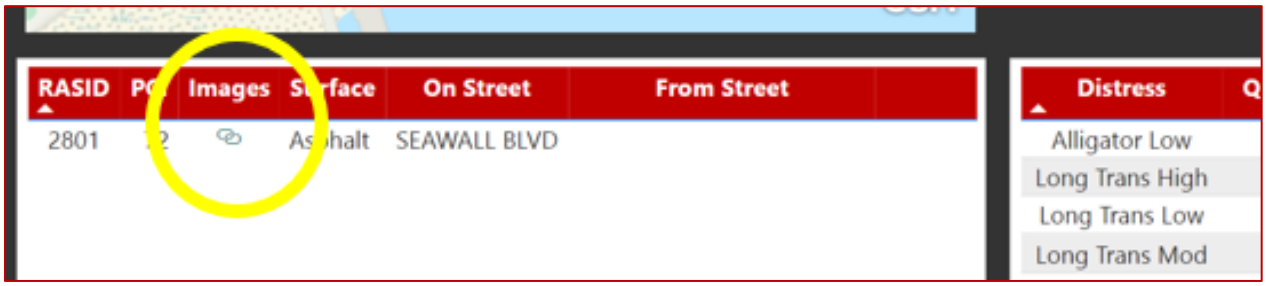


Image Link Zoomed In:

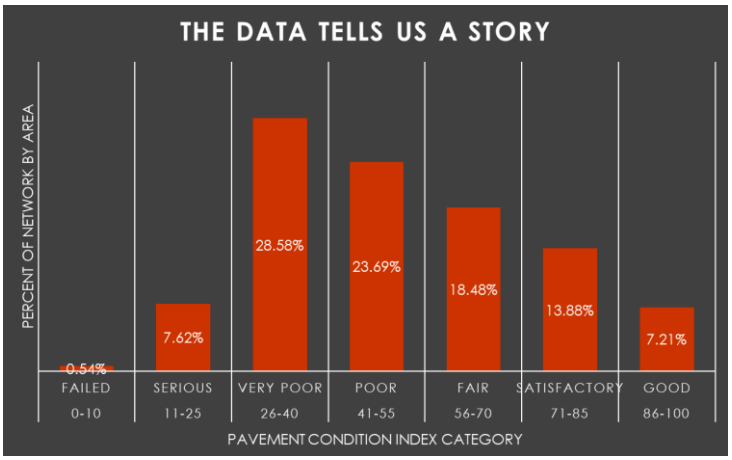
Segment Level Images Every 20-Feet

After clicking the image link for that pavement segment, the high-resolution Ladybug images are then populated such that the user can virtually drive the segment in question to visually verify the average PCI or even the detailed distress deducts. The purpose of this application is to assist the City in their review of the RAS inspection data and create a highly visualized space in which to do so.



Final Summary Report/Executive Summary

RAS will provide the City a final report/executive summary including study objectives, and description of the methodology utilized. A Letter of Certification will be provided with the report to verify the fixed asset count, methodology, assets inventoried, assets in unserviceable condition, missing assets, assets in a state of disrepair, and recommendations for developing a comprehensive replacement schedule.

In addition to the fixed asset report, RAS will provide a final pavement report including an inventory of all roads, current pavement conditions for each street function classification, and network OCI, PCI, and IRI. The City will receive statistical charts, graphs, and area maps illustrating all PCI results, street segment lengths, widths, area, lane count, pavement type, the overall City's road quality, and findings from the pavement evaluation.

A draft of the Final Summary Report will be presented at approximately 75% completion and will require working sessions and feedback from the City to develop the most accurate report for execution. The report will be provided for review by City staff and modified based on comments to produce a final report which will be delivered as a bound report and in Microsoft Word (.doc and .docx) and Adobe (.pdf) format.

All collected pavement data will be in a format for use with NOBEL GIS software and the Cartegraph OMS software. **RAS is both a preferred Cartegraph Business Partner.** RAS has recently completed imports into Cartegraph for Salt Lake City, UT; Denver, CO; Mesa County, CO; Anderson County, SC; Kingsport, TN; Corpus Christi, TX; New Braunfels, TX; Sarasota, FL; Virginia Beach, VA; Okaloosa County FL; Kansas City, MO; ; San Antonio, TX; South Salt Lake, UT; and Collier County, FL.

Task 6b: City Staff Responsibilities

To complete the City's contract, RAS requires the City's assistance in giving access to NOBEL GIS and existing pavement database, attending the field pilot to review PCI scores and pavement distress interpretations, attending the kickoff meeting and biweekly progress meetings, and reviewing the draft report.

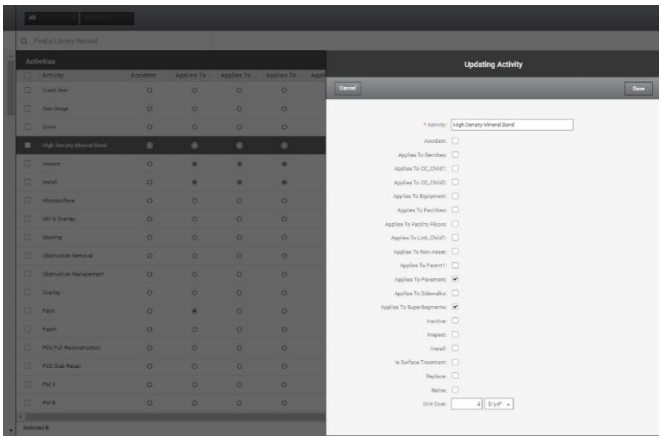
RAS will not lease, purchase, or rent any City owned facilities or properties.

Value Added Services

Optional Services: Council Presentation (Included with Base Scope of Work)

The RAS team can provide a Client Presentation that includes data, charts, and all final summary report data to showcase the results of the pavement condition survey. Our Leadership Team has extensive experience preparing and presenting results of pavement and asset condition assessments, as well as pavement budget scenarios and maintenance plans to elected officials and constituents.

The Client Presentations are a standard scope that we provide to all our asset management clients. Our team has worked with City Councils with several agencies including San Antonio, TX; Corpus Christi, TX; Durham, NC; Pitkin County, CO; Indianapolis, IN; Rowlett, TX; and Laredo, TX to name a few.

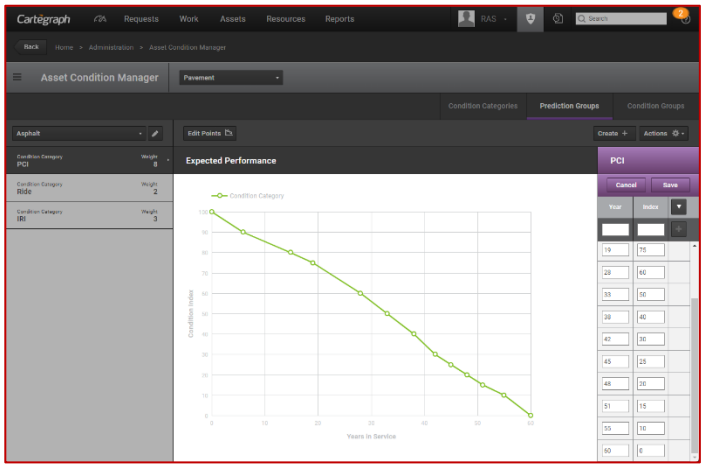


Optional Service: Cartegraph OMS Configuration & Pavement Analysis (Additional Fee)

Scenario Builder Configuration and Optimization for Pavement Management

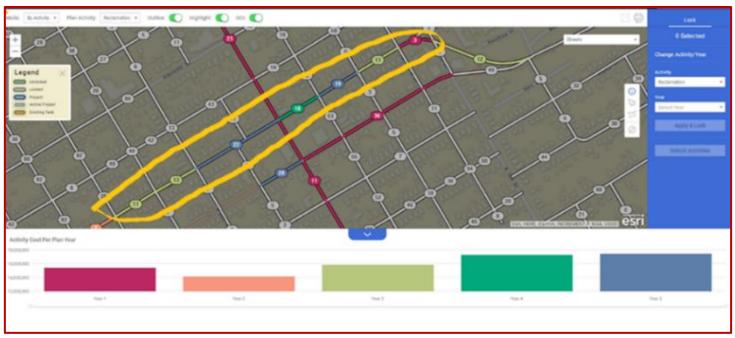
While running the Scenario Builder models themselves might seem straight-forward, the RAS approach to such an analysis involves the following sequences and client engagements during the process in an effort to configure the parameters that serve as the intelligence within Scenario Builder:

- **Current database review** – most issues can be resolved at the initiation of a project by completing a brief review of the City's existing GIS and Cartegraph OMS setup. All RAS projects begin with a review by our Project Manager. Any recommended changes to the segmentation or budgetary model configuration will be discussed during this stage. The benefit of the RAS team in this stage is in their intimate knowledge of Cartegraph OMS configuration, including areas of recommended improvement.



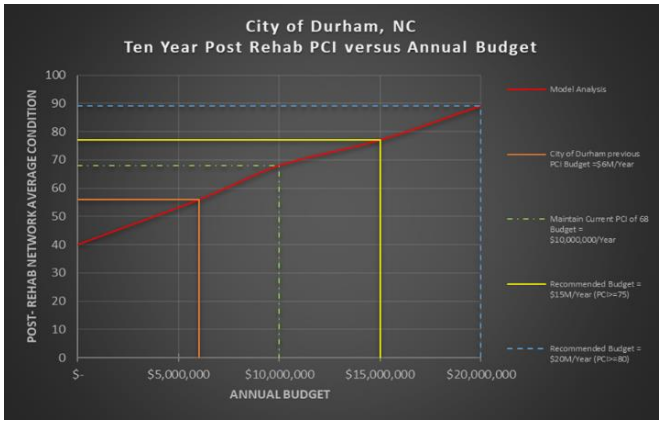
- **Maintenance & Rehabilitation Setup** – to ensure the results of the budget model runs meet the City's expectations, Scot Gordon will discuss the City's current Maintenance and Rehabilitation setup within the Cartegraph OMS system under the "**Protocol Library**". As a Professional Engineer with extensive pavement experience, Scot is well versed with the application of pavement rehabilitation techniques, trigger points, real-world impact to OCI, and life cycles. As a part of this process, RAS will work with the City to determine the right treatment (prescription) at the right time. As completed with many agencies across the Country, RAS will work with City staff to review the existing pavement rehabilitation model parameters that are currently setup within the Scenario

Builder Protocol Library. These parameters will be updated based on actual City expenditures for each activity and real world life cycle estimates that relate to OCI impact. This includes reviewing Min/Max PCI, Breakpoint PCI, decision trees for treatments (using the advanced filter text in the Protocol Library), costs, and OCI impact values.



RAS can also discuss other treatments that the City may or may not be using, their benefits, their return on investment, and their adoption across the Country. The results of the scenarios would include investment benefit information indicating the cost per square foot of benefit for each maintenance strategy based on maintenance rehabilitation costs. This can be reported in a number of ways, but commonly as the cost per sqft to increase the PCI by increments of 1 point.

- **Deterioration Curves** – forecasting pavement conditions within Cartegraph requires a detailed set of pavement deterioration curves for each roadway traffic classification, pavement material type, etc. as designated by the City. Scot will review the existing OMS "**Prediction Groups**" to ensure there is enough granularity within the functional classes, pavement types, and that the deterioration curves assigned to each Prediction Group reflects realistic degradation rates in the City. If alterations to the curves are necessary, Scot will lead the update with the City and RAS team. Scenario Builder will pull the data configurations used in the Prediction Groups and Protocol Library to create clear, accurate predictions on everything from OCI gains to budget impacts over time. Scot Gordon and the RAS team have developed hundreds of deterioration curves based on collected data. Scot will work with the historical data, along with the collected data from this project, to develop updated and further refined deterioration curves for each combination of street classification and pavement surface type, representative of the climate.



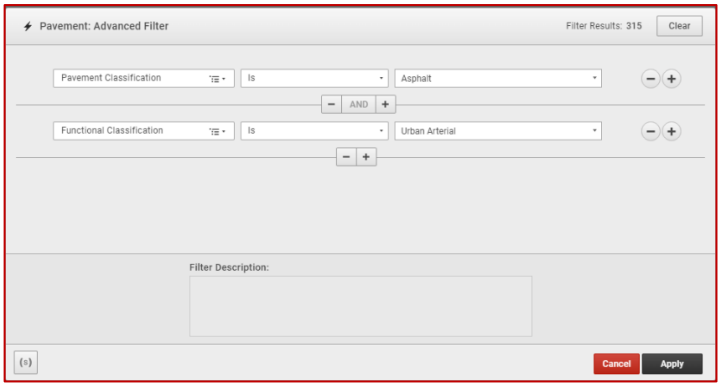
RAS has protocols in place that preserve historical collection data and use past surveys to assist in modeling through documenting the change in conditions between past surveys and the current collected data. RAS will make the comparisons between the surveys easily viewable for City staff to determine if outliers exist.

- **Supersegment Development** – the Cartegraph Scenario Builder module runs models on the layers loaded into the system. While older versions of Cartegraph could only house a single layer, Cartegraph now gives users the ability to house a

Supersegment layer, which is simply multiple segments stitched together to form a logical project or management section. The benefit of utilizing a Supersegment layer for use in Scenario Builder is that it runs the budgetary scenario at the project level, producing real-world rehabilitation plans that are ready for City review, modification, or acceptance. Our team will also provide recommendations to City staff for best practices in developing practically sized Supersegments to yield model results that can be acted upon. RAS also utilizes Cartegraph's "**Automation Manager**" when developing or updating an agencies budgetary models using the Supersegment approach.

Budget Model Development

The RAS Team separates itself from our competition through our devotion to the most critical aspect of the project, which is collaborating with the City on how to take the objective condition data and utilize it to make meaningful decisions involving the City's infrastructure.

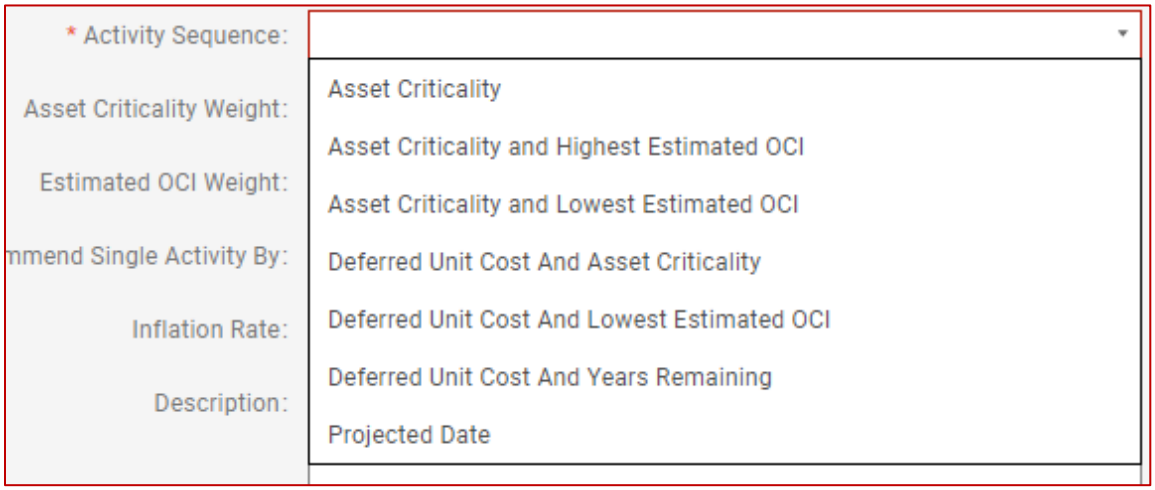


RAS follows the "AASHTO Transportation Asset Management Guide – A Focus on Implementation" which provides a framework for organizations to utilize and update the management of their assets to improve decision-making, monitor performance, and support integrated decisions in programming projects. The observed distresses and calculated OCI values will be used within Cartegraph to rank projects using distress types indicating load, non-load, and environmental related causes of each distress.

Running budgetary models within a pavement management system requires a deep understanding of the database structure behind the application. The RAS approach to budgetary modeling will involve up to 10 pavement management scenarios using different philosophies, budget levels, and distributions. While **RAS will define the scenarios to be run with City staff, at a minimum the following questions should be answered with the scenarios:**

- How much funding will be required to maintain an OCI of 70 over the next 5 years?
- How much funding is required annually to maintain my existing pavement conditions?
- What will the estimated network OCI be over the next 5 years if current funding levels are maintained?
- What budget is required to control the growth in backlog?
- What are the recommended pavement strategies?

RAS will also consult with City staff to develop models utilizing different types of rehabilitation strategies (worst first, best first, most economic, need year, etc.). RAS understands that getting buy-in from City Administrators and Elected Officials means developing a long-range rehabilitation plan that considers local priorities. The RAS team will ensure that already approved rehabilitation work is programmed into the budgetary models for selection during the run. In addition, RAS will consult with City staff to identity the total cost (mill, overlay, traffic control, striping, etc.) of each rehabilitation method.



Infusing Optimization into the Cartegraph OMS Analysis

Optimization is a broad-based term that has many different definitions. For most pavement management systems, optimization is the ability to prioritize a multi-year rehabilitation plan using several different factors that are important to the City and based on sound engineering constraints. For example, RAS commonly configures the Scenario Builder models using "Asset Filters" that allows our team to include a different set of maintenance and rehabilitation activities for roadways of different pavement types, traffic, and strength.

With the Asset Filters setup, our team can then assign "Criticality" factors to each functional classification, pavement type, and pavement strength rating that assist in prioritizing the multi-year plan and the development of an optimized rehabilitation plan. **However, this is only the beginning of an RAS Optimized Multi-Year Plan.**

The RAS team also includes a true **Financial Optimization Framework (FOF)** as a part of the Cartegraph OMS analysis. While the user could run a multi-year plan using the assigned "Asset Criticality" only, RAS prefers to infuse financial optimization through the use of the "Deferred Unit Cost" sequence logic.

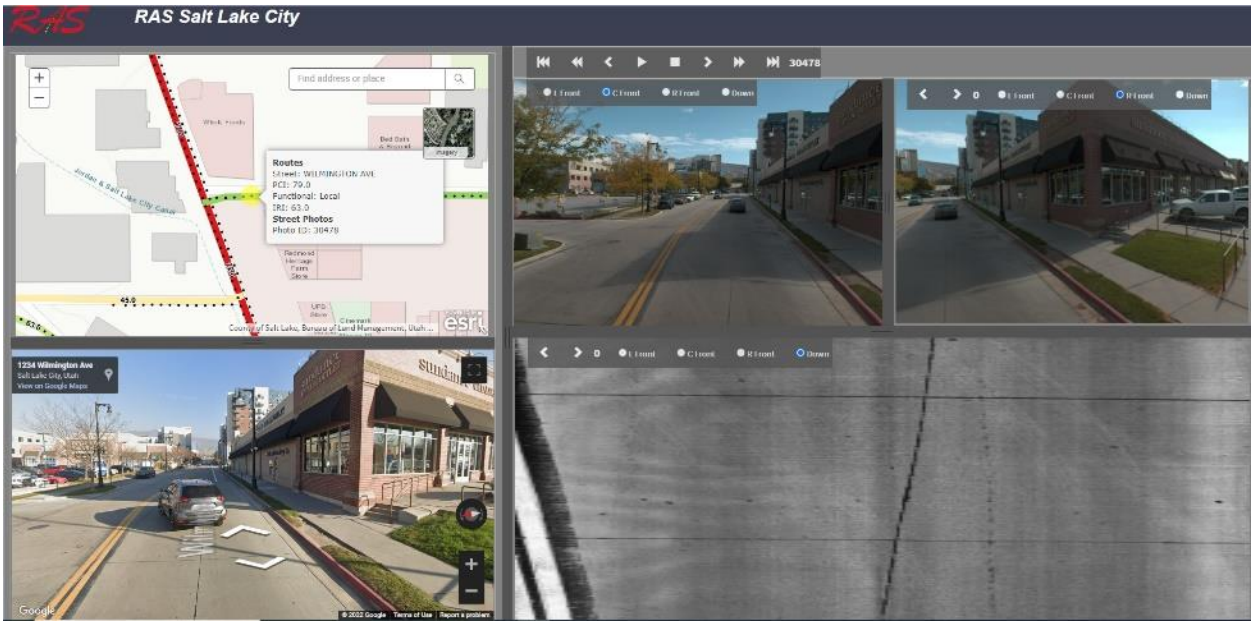
This sequence option allows the analysis to consider the future costs of deferring segments and allowing them to fall into the next more expensive rehab category. By calculating the cost of deferral, the sequence also identifies the "Need Year" of each segment and prioritizes the highest cost of deferrals while focusing on selecting critical roads that are within a few points of dropping into the next category. The "Deferred Unit Cost" sequencing is traditionally combined with the customized criticality assignments in an effort to generate a truly financially optimized pavement management program.

Mark Kramer, QA/QC Manager, and Zac Thomason, Assistant Project Manager, participated in the initial development of this financial optimization logic in the Cartegraph OMS Scenario Builder through multiple conversations and demonstrations with the Cartegraph software development team.

To further enhance upon optimization, Project Manager and Senior Pavement Engineer, Scot Gordon looks forward to visiting with City staff on other **innovative considerations** to pavement management such as **including OCI of curb and gutter in selecting roads for maintenance; whether or not to deduct for potholes if the City has a pothole repair crew; how to get all council districts above a specific PCI threshold; and focused analysis on top traveled corridors where you are improving the level of service on the roads receiving the greatest traffic while also analyzing the impacts to the remainder of the network.**

For example, Scot performed additional analysis scenarios for the City of San Antonio to identify variable funding needs to achieve and maintain the set goals for each Council District (minimum PCI of 70), based on pavement condition performance. To accomplish this, Mr. Gordon worked with the City to determine the proper mix between preservation and reconstruction within each of the 10 Council Districts to achieve the minimum baseline number of a PCI of 70 per district.

For example, in the City of Fort Worth, Scot worked with City Staff to incorporate curb and gutter as a factor in street selection for maintenance. In addition, the previous evaluation deducted for potholes in their PCI score, while the most recent survey reversed this decision as their crews were repairing these distresses daily and a preference to not have potholes influence the PCI value were expressed.



For the City of Durham, NC we used the most recent census data and the City's Federal Information Processing Series (FIPS) codes to review social-economic factors such as median household income and racial diversity to further factor optimization to ensure equal street maintenance across the City.

Each of the examples above were combined with sound financial optimization that allowed for a truly customized multi-year plan that met the needs of local constituents, elected officials, and City staff.

Optional Services: RAS Data Viewer & Videologger (Additional Fee)

If the City desires web-hosted condition photos, as an optional service RAS can provide the City with the RAS Videologger which is a web hosted full-service image viewer that allows our clients to select a section of roadway from the GIS-based map to visually display the inventory elements and the results of their survey. The viewer is hosted on a reliable web platform such as Amazon Web Services (AWS). The RAS Videologger allows the City to load pavement and ROW imagery for a specific location within the City and sequentially travel down the roadway. If needed within the Videologger, the City can load high-resolution images to provide more detailed site investigation while displaying OCI, PCI, and IRI data for the selected section. In addition, the Videologger **houses the Ladybug Panoramic ROW imagery, LCMS downward pavement imagery**, PCI scores, and right of way inventories.

Following the Pavement Condition Assessment, all **LCMS-2 camera imagery** will be loaded to the videologger with each image resulting in 1 mm-pixel resolution and horizontal resolution of 4,000 pixels. The benefit of having the LCMS imagery on the same platform as the Ladybug imagery is the ability to use the forward-facing camera to see what a typical driver would see from a windshield while comparing it against the downward LCMS laser array that focuses only on the pavement surface itself.

Optional Services: Detailed Sidewalk and Ramp Condition Assessment (Additional Fee)

RAS can provide the City with a detailed and comprehensive sidewalk condition assessment. The expanded scope would include utilizing one or more e-bikes (PROWagon™) to drive every sidewalk for assessment and digital image capture. The data collection would happen independently of the street assessment as the PROWagon™ was designed specifically for sidewalk condition assessments. The PROWagon™ is equipped to accurately capture individual distresses for a 0-100 sidewalk condition index (SCI).

Upon completion of the sidewalk network HD video capture, the imagery is processed using a custom rating application that begins the process by linking the corresponding imagery to its appropriate sidewalk segment. From here, the rating software is utilized by each RAS Sidewalk Inspector to individually map all moderate/severe distresses (distress type following Banning's distresses, distress severity, & XY coordinate), allowing RAS to develop heat maps for each distress type with XY locations. Each distress encountered is tagged to the corresponding sidewalk image and assigned the image XY for mapping purposes.

The individual distress data is then processed to calculate a distress density per sidewalk segment and calculate a Sidewalk Condition Index (SCI) using the distress data collected in the field such as **surface deterioration or spalling, missing pavement, vertical displacements, holes or cracks, missing or damaged castings, and root intrusion.**

III. In addition to the requirements of Parts I and II of this Scope of Services, during the performance of the Services, Consultant will keep City appraised through periodic status reports regarding the performance of the Services under this Agreement as set forth below and in Section 5.2, by the following means:

a. In-person meetings and/or teleconferences.

b. Email updates/questions to applicant team and City while reviews are underway.

c. Conference calls.

IV. All work product is subject to review and acceptance by City. If the City determines that any work product is unacceptable, for any reason, it must be revised by Consultant without additional charge to City until found satisfactory and accepted by City.

EXHIBIT "B"
SPECIAL REQUIREMENTS

None

EXHIBIT "C"
SCHEDULE OF COMPENSATION

I. Consultant shall perform the following tasks ("Tasks") at the rates set forth in Exhibit "C-1:

II. Within the budgeted amounts for each Task, and with the approval of the Contract Officer, funds may be shifted from one Task sub-budget to another so long as the Contract Sum is not exceeded per Section 2.1, unless Additional Services are approved per Section 1.8.

III. City will compensate Consultant for the Services performed upon submission of a valid invoice. Each invoice is to include:

A. Line items for all personnel describing the Services performed, the number of hours worked, and the hourly rate.

B. Line items for all materials and equipment properly charged to the Services.

C. Line items for all other approved reimbursable expenses claimed, with supporting documentation.

D. Line items for all approved sub-contractor labor, supplies, equipment, materials, and travel properly charged to the Services.

Roadway Asset Services

I. Notice

REQUEST FOR PROPOSALS (RFP)

Fixed Asset Inspection and Inventory Assessment

Dear Proposers:

The City of Banning (hereinafter referred to as the "City") is requesting proposals from a qualified public entity or private firm, to establish a contract for the scope of services outlined in this request for proposals.

NOTICE IS HEREBY GIVEN that online price and document submittals must be uploaded to the online bidding system in accordance with the instructions included herein, on or before the time and date set forth in the schedule of events. It shall be the responsibility of the proposer to upload their proposal before the announced time. However, responses may be submitted at any time prior to the deadline. (Submitted proposals may be withdrawn and resubmitted at any time prior to the deadline, and cannot be viewed by City staff until the close date and time.)

SOLICITATION DOCUMENTS: To obtain a copy of the solicitation documents, please visit https://procurement.opengov.com/portal/banning-ca. If you are not currently registered with the City of Banning through OpenGov, please create an account and subscribe to this project for notifications. Proposals may only be submitted by companies who are listed as a prospective bidder on the electronic bidding website for each project that they wish to submit a response to. Firms must also check the web site periodically for addenda information as failure to download and acknowledge any and all addenda in the submittal will result in proposer disqualification.

RESPONSIVE PROPOSALS: Once listed on the prospective bidders list, companies may submit their proposals on the electronic bidding system. The City will not accept proposals submitted by companies who are not on the prospective bidders list, or from companies who have submitted a proposal via facsimile, email, mail, or any other format not permitted by this solicitation. Further instructions for submitting proposals are explained in this solicitation. Companies are to adhere to all of the submittal instructions and requirements outlined in this solicitation in order to be considered responsive to this request for proposals.

The City reserves the right to reject any and all proposals and to waive information and minor irregularities in any proposal received.

II. Introduction

II.A Summary

The City of Banning ("City")is seeking a qualified consulting firm to prepare a fixed asset inspection and inventory assessment of its street, sidewalk and storm drain networks and appurtenance and entering this information into the Cartegraph Asset Management Software. Staff will be in contact with the firms responding to the RFP once the proposals are received and a determination is made on interviews, if any, that will be held and when. The City anticipates entering into a Professional Services contract after negotiations with the selected firm, based on the selection committee's ranking of the firms.

The City is soliciting a Request for Proposal (RFP) from qualified consultant firms that have experience in fixed asset inspections, inventory and assessment of street, pavement, sidewalk and storm drain conditions and inputting the resulting information in the Cartegraph Asset Management software. Experience in these types of inspections, assessments and the Cartegraph Asset Management system is an essential criterion for selection. The inventory will be used as the City continues to develop budgeting and Master Plan forecasting abilities.

Title VI Solicitation Notice: The City of Banning, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 USC §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders or offerors that it will affirmatively ensure that any contract entered into pursuant to this Request for will be afforded full and fair opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award.

II.B Background

The City of Banning is strategically located astride Interstate 10 between the Inland Empire and the Coachella Valley in the San Gorgonio Pass. The City, incorporated in 1913, has a rich and colorful history.

Initially Banning served as a stagecoach and railroad stop between the Arizona territories and Los Angeles. This history has contributed to the present-day spirit of pioneer resourcefulness and "can do" attitude that is so prevalent in the community.

The City of Banning (City) is a rapidly growing community located in the San Gorgonio Pass along Interstate 10 between Los Angeles and Palm Springs. The corporation limits of Banning cover approximately 23.2 square miles serving over 30,000 residents. Banning is a full service general law city, providing typical municipal services, as well as a City owned electric utility, water utility, wastewater utility, transit agency, and airport. The City's facilities were constructed as far back as the 1920's. Most of the City's fixed asset records are currently maintained on an Excel spreadsheet or in a GIS based system, Nobel. These records do not provide sufficient detailed information to properly control, maintain and monitor fixed assets, determine Level of Service (LOS), remaining useful life, replacement costs, etc.

These inventory and physical inspection services are required so the information can be entered into the City's Asset Management system, Cartegraph.

The classification of work includes:

- Transportation: Pavement, Signs, Markings, Supports, Light Fixtures, Guardrails
- Walkability: ADA Ramps, Sidewalks, Trees, Signs, Light Fixtures
- Stormwater: Pipes, Inlets, Outlets, Catch Basins, Retention Basins, Channels, Culverts, Manholes, Outfalls, Trash Capture Devices

The City will contract with the selected Consultant to develop a fixed asset inventory, a master maintenance plan, and associated cost analysis for the street and sidewalk networks, storm drain system, and appurtenances. The inventory collection includes geo-locating (GPS data) all the assets on site, condition/age of the assets, creation of a preventative and long-term maintenance schedule/monitoring/recommendations, collection of warranty information if available, including suggested frequencies of maintenance, and an assessment of the condition of the asset. The physical inventory is needed to collect the asset information and then the information will be loaded into the Cartegraph software.

The selected firm will receive any asset information the City may have for the street and sidewalk facilities and storm drain plans. Some information is available on the City's GIS system, Nobel which will be made available to the consultant and some information is not available at all.

II.C Contact Information

Purchasing Division

II.D Timeline

This request for proposal will be governed by the following tentative schedule. All dates are subject to change at the discretion of the City.

Release Project Date	February 3, 2024

Pre-Proposal Meeting (Mandatory)	February 26, 2024, 9:00am Microsoft Teams Meeting: https://teams.microsoft.com/l/meetup-join/19%3ameeting_Yzc0ZTU1NGUtM2Q5YS00OWNiLWEwM2QtMzE4MGJkMDAwOTI5%40thread.v2/0?context=%7b%22Tid%22%3a%2228cb6a6f-78fe-445d-acfd-cf07066168f7%22%2c%22Oid%22%3a%22f9c1cfd3-52ec-497e-81d5-e375c8c28269%22%7d Meeting ID: 296 437 816 967 Passcode: NWDpys
Question Submission Deadline	March 4, 2024, 11:59pm
Proposal Submission Deadline	March 28, 2024, 11:59pm
Anticipated Contractor Selection Date	April 10, 2024

III. Prerequisites

Proposals will only be considered from Companies that meet the following prerequisites:

III.A Years of experience

Have at least **five (5)** years' of experience, within the past **eight (8)**years under a legally registered business name, in providing services of a similar type and scope as described in the Scope of Services. Have not filed for bankruptcy under any business name over the past five (5) years.

III.B OpenGov Registration

Have created an account on OpenGov. Companies can register at: https://procurement.opengov.com/portal/banning-ca.

Once registered, Companies must download this solicitation in order to appear on the Bidder's List as a "Prospective Bidder." Companies that fail to specifically download this solicitation will not appear on the Bidders' List and will be unable to participate or be considered for this RFP.

III.C Mandatory Pre-Proposal Meeting

All prospective Companies must attend the mandatory pre-proposal meeting on Monday, February 26, 2024 at 9:00 am to be held at:

Microsoft Teams Meeting: https://teams.microsoft.com/l/meetup-join/19%3ameeting_Yzc0ZTU1NGUtM2Q5YS00OWNiLWEwM2QtMzE4MGJkMDAwOTI5%40thread.v2/0?context=%7b%22Tid%22%3a%2228cb6a6f-78fe-445d-acfd-cf07066168f7%22%2c%22Oid%22%3a%22f9c1cfd3-52ec-497e-81d5-e375c8c28269%22%7d
Meeting ID: 296 437 816 967 Passcode: NWDpys

Attendance is mandatory at the pre-proposal meeting. The meeting will begin promptly at the time listed in the schedule. No admittance will be allowed once the meeting has begun. Proposals from prospective Proposers not in attendance at this mandatory meeting will not be considered.

III.D Licenses

If applicable, Company and/or its key personnel, shall hold an appropriate license for the Company's discipline and the Services on the date the Proposal is submitted.

III.E Department of Industrial Relations Registration

If applicable, Company shall have registered with the Department of Industrial Relations and any other required organizations.

IV. Scope of Work

IV.A Scope requirements

The following Scope of Work tasks must be listed and addressed on the proposal submitted to the City:

Suggested Task Breakdown, consultant is encouraged to add more, this is a guideline:

- Task 1. Project Management and Research
- Task 2. Physical Inspection, Inventory and Data Collection
- Task 3. Preparation of Summary Report
- Task 4. Additional Services

IV.B Preliminary Scope of Work

The Preliminary Scope of work is identified below. Upon selection of a qualified firm, the City of Banning and Consultant will negotiate the Scope below and associated Fee. If an agreeable Scope and Fee are not agreed upon, the City of Banning reserves the right to open negotiations with the next most qualified firm.

IV.C Project Management and Research

Project Schedule – Provide a tentative project schedule for the Scope of Work from start to completion. Assume a start date of April 1, 2024 and end date of August 2024.

Kick-off Meeting

Upon receipt of a written Notice to Proceed from the City of Banning, consultant shall conduct a kick-off meeting with the City to review the scope of the project, develop a project schedule timeline and confirm deliverables. The project schedule shall include each task and subtasks, deliverables, milestones, critical path designation and a schedule for progress meetings.

Project Milestone/Monthly Meetings

Consultant shall prepare a project execution schedule with major milestones to the City of Banning for approval. Consultant shall prepare regular progress reports, meeting Agendas and Minutes for the City of Banning staff. Assume that a minimum of 5 meetings (kick-off meeting, 3 progress meetings, final submittal meeting) will occur during the project and include this in the Schedule. Assume all meetings will be done by phone/remotely.

IV.D 1. Perform Physical Inspection and Inventory

Consultant will coordinate the inspection of assets that require traffic control or access to City assets with the Public Works Dept. The inventory collection includes photographs and/or digital

mapping of all assets, geolocating all assets, and providing other data as detailed below. These are the minimum expected data for each asset category. If through proprietary processes, AI, or standard practice, additional data is provided, please detail in the scope of work.

Consultant will provide a physical inspection and inventory of City fixed assets and will prepare accounting records for the following fixed asset categories:

1.

i. Transportation and Traffic:

I. Pavement (Photograph and/or digital mapping, geolocation, condition assessment)

II. Pavement Condition shall be collected and input into the Cartegraph Asset Management System with the following properties; Pavement Surface Type, Functional Class, Number of Lanes, Street Name, Length and Width. Additionally, the pavement assessment shall identify pavement distresses consistent with MTC-published "Pavement Condition Index Distress Identification Manual for Flexible Pavements" and "Pavement Condition Index Distress Identification Manual for Rigid Pavements" and identified with the following distresses; Alligator Cracking, Block Cracking, Distortions, Longitudinal and Transverse Cracking, Patch and Utility Cut Patch, Rutting & Depression, Raveling, Weathering

III. Signs (Photograph, geolocation, condition assessment, MUTCD Identifier)

IV. Markings (Photograph and/or digital mapping, geolocation, condition)

V. Supports (Photograph, geolocation)

VI. Light Fixtures (Photograph, geolocation)

VII. Guardrails (Photograph, geolocation)

ii. Walkability:

I. ADA Ramps (Photograph, geolocation, condition)

II. Sidewalks (Photograph, geolocation, condition)

III. Trees (Photograph, geolocation)

IV. Signs – Covered with above scope

V. Light Fixtures - Covered with above scope

i. Stormwater: Please note that the City of Banning will provide current GIS layers for these elements as reference material and to eliminate the need to search City streets to locate.

I. Pipes (not in scope, will be added through separate City means)

II. Inlets (Photograph, geolocation)

III. Outlets (Photograph, geolocation)

IV. Catch Basins (Photograph, geolocation)

V. Retention Basins (above ground basins only, photograph, geolocation)

VI. Channels (not is scope, will be added through separate City means)

VII. Culverts (Photograph, geolocation)

VIII. Manholes (Photograph and/or digital mapping, geolocation)

IX. Outfalls (Photograph, geolocation)

X. Trash Capture Devices (Geolocation)

Property accounting records should include the following information for each fixed asset:

- ID number/Asset Identifier
- Location (geo coordinates for GIS system)
- Photos
- Asset Category
- Asset Description
- Condition Assessment (As applicable)

IV.E PREPARATION OF SUMMARY REPORT

Prepare a Letter of Certification with a narrative Report certifying the fixed asset count and documenting the procedures used. A final summary Report shall include: assets found and content; assets not currently being used or in an unserviceable condition; missing assets and steps taken to locate them; assets in a state of disrepair/disuse and recommendations for developing a comprehensive replacement schedule with projected cost estimates.

A Draft Report will be submitted to the City for review and comment and presented at one of the progress meetings. Final comments will be incorporated and a Final Draft Report will be submitted for final review and then finalized.

IV.F ADD DATA TO CARTEGRAPH ASSET MANAGEMENT SYSTEM

The Consultant will be responsible for uploading all information into the City's Asset Management Software (Cartegraph) within 30 days after collection of data. Consultant shall work with City Staff and Cartegraph implementor to add data and compatible information to pre-determined layers with appropriate asset details.

The City, in coordination with Cartegraph, will provide data details for each asset category.

IV.G OPTIONAL TASK

ADDITIONAL SERVICES

Consultant is encouraged and expected to identify any additional work/tasks and further define task details that are not specified in this Preliminary Scope of Work that would be, in its' opinion, necessary to complete the project as defined herein. Consultant may propose additional services that in its' opinion will improve the efficiency and quality of the project.

V. Vendor Questionnaire

Proposals should be prepared in such a way as to provide a straightforward, concise delineation of capabilities to satisfy the requirements of this RFP. Responses should emphasize the Company's demonstrated capability to perform work of this type. Emphasis should be concentrated on completeness and clarity of content. Proposals shall adhere to the following format for organization and content. Proposals must be typed and arranged/divided in the following sequence to facilitate evaluation.

V.A Cover Letter*

The cover letter shall include a brief general statement of intent to perform the services and confirm that all elements of the RFP have been reviewed and understood. The letter shall include a brief summary of Company's qualifications and Company's willingness to enter into a contract under the terms and conditions prescribed by this RFP and in the Sample Agreement. The letter must identify a single person for contact during the RFP review process.

*Response required

V.B Proposal*

A. Statement of Understanding and Approach

- This section must demonstrate an understanding of the Services. It should describe the general approach, organization and staffing required for the Services requested. If necessary, preliminary investigations, due diligence, and research shall be discussed in this section.
- This section should include the following:
  - An implementation plan that describes in detail (i) the methods, including controls by which your firm or entity manages projects of the type sought by this RFP; (ii) methodology for soliciting and documenting views of internal and external stakeholders; (iii) and any other project management or implementation strategies or techniques that the respondent intends to employ in carrying out the work.
  - Detailed description of efforts your firm or entity will undertake to achieve client satisfaction and to satisfy the requirements of the "Scope of Work" section.
  - Detailed project schedule, identifying all tasks and deliverables to be performed, durations for each task, and overall time of completion, including a complete transition plan. Include your plan to deal with fluctuation in service needs and any associated price adjustments.
  - Detailed description of specific tasks you will require from City staff. Explain what the respective roles of City staff and your staff would be to complete the tasks specified in the Scope of Work.

- Proposers are encouraged to provide additional innovative and/or creative approaches for providing the service that will maximize efficient, cost-effective operations or increased performance capabilities. In addition, the City will consider proposals that offer alternative service delivery means and methods for the services desired.
- Proposers are also requested to identify any City owned facilities or property which Proposer would propose to use or lease, purchase, or rent from the City in connection with the services to be performed, including information about the terms of any proposed lease, purchase or use of such equipment and facilities, and how this proposed structure affects the overall cost proposal to the City, if applicable.

B. Company Information

- This section shall include contact person information, address and telephone number of the company main office and branch offices. Each Company shall identify itself as to the type of organizational entity (corporation, sole proprietorship, partnership, joint venture, etc.). Any supplemental information that Company believes may be pertinent to the selection process may be provided.
- The proposer should provide an affirmative statement that it is independent of the City as defined by generally accepted auditing standards in the U.S. General Accounting Office's Government Auditing Standards (1994).
- The Proposal shall identify any litigation, mediation, or arbitration, regarding the performance of any services similar to the Services, in which the Company has been involved in the past five (5) years. If the Services require a license or certification, the Proposal shall include any claims or disciplinary action taken against Company or any of Company's key personnel within the past five years.

C. Company Personnel

- This section shall contain names, contact numbers and description of experience, including licenses and/or certifications, of all key personnel who would be assigned to perform the Services. Members of the Company's professional team (managers, contact person, etc.) should be identified by name, title, phone number, and description of the portion of work they will be assigned to perform under this Agreement. Also include major subcontractors (if any) and their degree of involvement in this program. If the Company is including any subcontractors, the Company shall identify how long the Company has worked with the subcontractor.
- An affirmative statement should be included that the proposer and all assigned key professional staff are properly licensed to practice in California.

D. Disclosure

- Please disclose any and all past or current business and personal relationships with any current Banning elected official, appointed official, City employee, or family

member of any current Banning elected official, appointed official, or City employee. Any past or current business relationship may not disqualify the firm from consideration.

E. Experience and References

- The Proposal must demonstrate that the Company, or its key personnel, meets the minimum experience requirement in the Prerequisites with a legally registered business name, that provides services of a similar type and scope as described in the Scope of Services. A Company shall not have filed for bankruptcy under any business name over the past five (5) years.
- Company shall provide at least 3 references, within the past 5 years, of clients for whom services have been performed that are comparable in quality and scope to that specified in this RFP. The references shall include client names, addresses, telephone numbers and e-mail addresses of the clients for whom prior work was performed and include an explanation of the services provided along with project start and end dates. Each reference shall contain:
  - Client name and contact information (position, entity name, telephone number, fax number and email address).
  - Project description and size.
  - Role of key project team members.
  - Construction Value (if applicable).
  - Dollar value of the fee
  - Description of services
  - Was the project completed within budget and schedule
  - Staffing
- Only references of the prime consultant shall be considered, or references from project teams that have completed at least 3 projects together. The Consultant shall also list projects completed for other agencies. References will be contacted as part of the selection process.

*Response required

V.C Price Proposal*

All proposals submitted shall have a stated dollar bid amount for providing the services outlined in the Scope of Services. The total shall be an all-inclusive maximum price and to contain all direct and indirect costs including all out-of-pocket expenses with a full and complete breakdown of all said costs, and proposed fees including but not limited to hourly rates, reimbursable expenses and/or rates, mileage and/or travel cost, miscellaneous fees, etc., for the first year's audit engagement.

In addition, a statement must be included in this section that if the proposer is charging travel costs, the proposer's charges invoiced to the City for travel, lodging and subsistence shall not exceed the current IRS rates.

*Response required

V.D Value Added Services

Please describe any value-added services your company offers that may be of use to the City

V.E Evidence of Insurance*

In addition, the Company shall provide evidence of possession of insurance in the coverage and amounts listed in the Sample Agreement.

City requires that licensees, lessees, and vendors have an approved Certificate of Insurance (not a declaration or policy) or proof of legal self-insurance on file with the City for the issuance of a permit or contract. Within ten (10) consecutive calendar days of award of contract, successful Proposer must furnish the City with the Certificates of Insurance proving coverage as specified in contract sample.

*Response required

V.F Vendor Forms

Please download the below documents, complete, and upload.

- New_Vendor_Packet.pdf

V.G Type of Business*

☐ C Corporation
☐ S Corporation
☐ Limited Liability C Corporation
☐ Partnership
☐ Limited Liability Partnership
☐ Sole Proprietor/Individual
☐ Other
*Response required

V.H Type your Legal Company Name Here*

State your Company's Name Here. This will be verified against the California Secretary of State's Website.

*Response required

V.I EX PARTE COMMUNICATIONS CERTIFICATION*

I certify that Bidder and Bidder's representatives have not had any communication with a City Councilmember concerning this RFP at any time after the date and time that this RFP was publicly advertised.

☐ Yes
☐ No
*Response required

V.J EX PARTE COMMUNICATIONS CERTIFICATION CONTINUED*

If stated "Yes" above, please explain the circumstances in the following space, or state "None."

*Response required

V.K DISQUALIFICATIONS QUESTIONNAIRE*

Has the Company, any officer of the Company, or any employee of the Company who has proprietary interest in the Company, ever been disqualified, removed, or otherwise prevented from bidding on, or completing a federal, state, or local government project because of a violation of law or safety regulation?

☐ Yes
☐ No
*Response required

V.L DISQUALIFICATIONS QUESTIONNAIRE CONTINUED*

If stated "Yes" above, please explain the circumstances in the following space, or state "None."

*Response required

V.M DISCLOSURE OF GOVERNMENT POSITIONS*

Each Bidder shall disclose below whether any owner or employee of the firm currently hold positions as elected or appointed officials, directors, officers, or employees of a governmental entity or held such positions in the past twelve months. List below or state "None."

*Response required

V.N CERTIFICATION COMPLIANCE*

Please download the below documents, complete, and upload.

- Certification-Compliance_wi...

*Response required

V.O Acceptance of Terms and Conditions – Submission of a proposal pursuant to this RFP shall constitute acknowledgment and acceptance of all terms and conditions hereinafter set forth in this RFP and Sample PSA.*

☐ Please confirm

*Response required

VI. Submission Instructions And Inquiries

VI.A Inquiries

If prior to the date fixed for submission of Proposals, a prospective Company discovers any ambiguity, conflict, discrepancy, omission or other errors in this RFP or any of its appendices, exhibits or attachments, the Company shall immediately notify the City of such error in writing and request modification or clarification of the document. Modifications shall be made by written Addenda to the RFP.

If a Company fails to notify the City, prior to the date fixed for submissions of Proposals, of an error in the RFP known to the Company, or an error that reasonably should have been known to the Company, the Company shall submit its Proposal at its own risk, and if the Company is awarded a Contract, it shall not be entitled to additional compensation or time by reason of the error or its later correction.

All communications regarding technical, scope, and/or project related questions and requests for clarifications, changes, exceptions, and deviations to the terms and conditions set forth in this RFP **shall be submitted via "Q&A"** through the City's Electronic Bidding System, ProcureNow, before the deadline and according to these specifications herein. Any and all other bidding communications shall only be with **Barbara Mason, Purchasing Manager**, at (951) 922-3121.

The Final day for receipt of questions from the Proposer shall be on or before the due date indicated in the schedule of events section. To ensure fairness and avoid misunderstandings, **all communications must be in written format**and submitted only in the format set forth above. Any verbal communications will not be considered or responded to. All questions received by the due date will be logged and reviewed and if required, a response will be provided via an addendum to the RFP that will be posted on the City's website. **Any communications, whether written or verbal, with any City Councilmember, City staff, or RFP evaluation panel member other than the individual indicated above, prior to award of a contract by City Council, is strictly prohibited and the Proposer shall be disqualified from consideration.**

VI.B Completion Of Proposal

Proposals shall be completed in all respects as required by this RFP. A proposal may be rejected if conditional or incomplete, or if it contains any alterations or other irregularities of any kind, and will be rejected if any such defect or irregularity can materially affect the quality of the proposal. Proposals which contain false or misleading statements may be rejected. If, in the opinion of the City's Selection Committee, such information was intended to mislead the City in its evaluation of the proposal, and the attribute, condition, or capability is a requirement of this RFP, the proposal will be rejected. Statements made by a Company shall also be without ambiguity, and with adequate elaboration, where necessary, for clear understanding.

Unauthorized conditions, exemptions, limitations, qualifications, or provisions attached to a Proposal will render it non-responsive and will cause its rejection.

The Company, in responding to this RFP, must submit Proposals in the format identified in this RFP. The Proposal must address all requirements of the RFP even if a "no response" is appropriate.

Costs for developing Proposals are entirely the responsibility of the Company and shall not be chargeable to the City. The City shall not be liable for any costs incurred in response to this RFP, including but not limited to, costs for any interviews, presentations, or other follow-up information necessary as part of the selection process. All costs shall be borne by the Company responding to this RFP. The Company responding to this RFP shall hold the City harmless from any liability, claim, and expense whatsoever incurred by or on behalf of the Company.

VI.C Delivery / Submission Of Proposals

The Final day for submission of proposals shall be on or before the due date indicated in the schedule of events section.

Companies shall register on the City's Electronic Bidding System, https://www.banningca.gov/bids. Once registered, Companies must download the RFP while logged in under their own name and identification number to appear on the Current Prospective Bidders List as a "Prospective Bidder." Companies that fail to download the RFP will not appear on the Current Prospective Bidders List and their proposals will be considered non-responsive. If a Company is unable to register or download the RFP from the bidding website, a representative may contact ProcureNow.

All proposal documents and supplementary documents must be uploaded using the City's bidding website prior to event date and time as instructed in this solicitation. Once file(s) have been uploaded and the Submission Status shows as "Submitted" the submission is complete. At that point respondents will receive an email confirmation from the bidding website.

The City reserves the right to reject any and all proposals and to waive information and minor irregularities in any proposal received.

Acceptance of Terms and Conditions - Submission of a proposal pursuant to this RFP shall constitute acknowledgment and acceptance of all terms and conditions hereinafter set forth in this RFP.

The time and date are fixed, and extensions will not be granted unless specifically stated by the City in an addendum to this RFP. Proposals not received before the bid event time will not be accepted.

VI.D Alternative Proposals

Only one proposal is to be submitted by each Company for this RFP. Multiple simultaneous proposals will result in rejection of all Proposals submitted by Company. A Company may, prior to the proposal due date and time, withdraw a proposal and submit a new proposal, so long as the new proposal is submitted before the proposal due date and time.

VI.E Examination Of RFP And Sites Of Work

The Company shall carefully examine the RFP and all sites, if applicable, of the work contemplated. The submission of a Proposal shall be conclusive evidence that the Company has investigated and is satisfied as to the conditions to be encountered, as to the character, quality, and quantities of work to be performed and materials to be furnished, the difficulties to be encountered, and to the requirements of the Proposal, RFP, and other Contract Documents.

By submitting a Proposal, the Company hereby certifies that it has: examined the local conditions, read each and every clause of this RFP, included all costs necessary to complete the specified work in its proposed prices, and agrees that if it is awarded the Contract it will make no claim against the City based upon ignorance of local conditions or misunderstanding of any provision of the Contract. Should the conditions turn out otherwise than anticipated by it, the Company agrees to assume all risks incident thereto.

VI.F Addenda

Unless otherwise specified, any addenda issued during the time of bidding must be acknowledged electronically via the City's Bidding Website, which will be made part of the proposal. Addenda notifications will be provided to those listed on the Electronic Prospective Bidder's List via email.

VI.G Withdraw Of Proposals

All proposals shall be firm offers and may not be withdrawn for a period of one hundred twenty (120) days following the deadline date for submission of proposals noted herein. Submitted Proposals may be withdrawn at any time prior to the submission deadline.

VI.H Pre-Proposal Meeting

There will be a mandatory pre-proposal meeting on Monday, February 26, 2024 at 9:00 am. The meeting will be located at Microsoft Teams Meeting: https://teams.microsoft.com/l/meetup-join/19%3ameeting_Yzc0ZTU1NGUtM2Q5YS00OWNiLWEwM2QtMzE4MGJkMDAwOTI5%40thread.v2/0?context=%7b%22Tid%22%3a%2228cb6a6f-78fe-445d-acfd-cf07066168f7%22%2c%22Oid%22%3a%22f9c1cfd3-52ec-497e-81d5-e375c8c28269%22%7d Meeting ID: 296 437 816 967 Passcode: NWDpys. Attendance is required in order to submit a proposal.

VII. Evaluation Criteria

The City reserves the right to amend, withdraw, and cancel this RFP. The City also reserves the right to reject all responses to this RFP at any time prior to agreement execution. Furthermore, the City reserves the right to request additional information about any and all Proposals, that in City's opinion, is necessary to assure that the Company's competence, number of qualified employees, business organization, experience, and financial resources are adequate to perform the Services.

All Proposals shall be reviewed to verify that the Company has met the minimum requirements as stated in this RFP. Proposals that have not followed the rules, do not meet minimum content and quality standards, and/or do not provide references will be rejected as non-responsive.

Responsive proposals will be evaluated on the basis of the criteria below. **If needed, interviews will be scheduled during or after the week indicated in the "Schedule of Events" section.** If needed, interviews will be conducted by the same members on the proposal evaluation panel. Dates, times, and a location will be coordinated at that time if interviews are deemed necessary after the evaluation of responsive proposals. If interviews are deemed necessary, candidates who have submitted the highest scoring proposals within a competitive range as determined by the City will be invited to participate in the interview process.

The selected Company shall then enter into exclusive negotiations with the City to formalize the Scope of Service and Compensation. Recommendation for award is contingent upon the successful negotiation of final contract terms. Negotiations shall be confidential and not subject to disclosure to competing Proposers unless an agreement is reached. If the City is unable to obtain a fair and reasonable price or cannot reach agreement regarding the terms for the Scope of Services, then the City will end negotiations with that Company and begin negotiations with the next Company which best meets the needs of the City, and so on until a City and the Company reach agreement.
The City intends to select the Company that offers the best value to the City based on the criteria outlined above.

No.	Evaluation Criteria	Scoring Method	Weight (Points)
1.	**Qualifications** Includes: Consultant team's overall experience and qualifications, and qualifications (licenses, education) of the project manager, sub consultants and key consultant staff assigned to the project to demonstrate competence to perform these services. This shall include individual staff's prior experience completing similar fixed asset inspections, inventories, assessments and related projects. Include depth of knowledge of Cartegraph Asset Management system requirements, fixed asset policies and procedures.	Points Based	25 *(25% of Total)*

2.	**Pricing**	Points Based	10 *(10% of Total)*
3.	**Experience (Projects of similar size and scope)/Capabilities** Includes: Recent experience with completing similar fixed asset inspections, inventories, assessments, and related projects and the Cartegraph Asset Management system, and performing similar work for other agencies. Include knowledge of State regulations, policies, and procedures and any experience with projects in Banning. List similar projects, agencies and project contract amount and final project costs (if over/under budget)	Points Based	25 *(25% of Total)*
4.	**Professional References** Includes: References from other clients, was project completed on time and within budget.	Points Based	10 *(10% of Total)*
5.	**Understanding of the Project / Approach and Methodology** Includes: Project approach (implementation plan), methodology and how tasks would be accomplished specifically for the City of Banning, addressing all the Scope of Work Tasks (Task breakdown) listed below, QA/QC, schedule, deliverables, and overall responsiveness to the RFP. Provide a detailed description of the approach and methodology to be used to accomplish the Scope of Work of this RFP.	Points Based	30 *(30% of Total)*

VIII. Terms And Conditions

VIII.A Contract Terms And Conditions

The successful company will be required to execute the City's standard agreement ("Agreement"). A sample is attached herein. The successful company must meet all insurance requirements in the Agreement. All terms and conditions of the Agreement are non-negotiable. Companies must possess valid City of Banning Business License throughout the term on the contract. Failure to execute the Agreement and furnish the required insurance within the required time period shall be just cause for the rescission of the award. If any of the successful Companies refuse or fail to execute the Agreement, the City may award the Agreement to the next most qualified Company.

VIII.B Public Records

All Proposals submitted in response to this RFP become the property of the City and pursuant to the Public Records Act (Gov. Code, § 6250 et seq.) are public records, and as such may be subject to public review at least 10 days before selection.

The Company must notify the City in advance of any proprietary or confidential materials contained in the Proposal and provide justification for not making such material public. The City shall have sole discretion to disclose or not disclose such material subject to any protective order that the Company may obtain. Note that under California law, price proposal to a public agency is not a trade secret.

Submission of a proposal shall indicate that, if Proposer requests that the City withhold from disclosure information identified as confidential, and the City complies with the Proposer's request, Proposer shall assume all responsibility for any challenges resulting from the non-disclosure, indemnify and hold harmless the City from and against all damages (including but not limited to attorney's fees that may be awarded to the party requesting the Proposer information), and pay any and all costs and expenses related to the withholding of Proposer information. Proposer shall not make a claim, sue, or maintain any legal action against the City or its directors, officers, employees, or agents concerning the disclosure, or withholding from disclosure, of any Proposer information. If Proposer does not request that the City withhold from disclosure information identified as confidential, the City shall have no obligation to withhold the information from disclosure and may release the information sought without any liability to the City.

The City reserves the right to make use of any information or idea contained in the Proposal. All materials, ideas and formats submitted in response to this RFP will become the property of the City upon receipt.

VIII.C Conflict Of Interest

The Proposer warrants and represents that it presently has no interest and agrees that it will not acquire any interest which would present a conflict of interest under California Government Code sections 1090 et seq., or sections 87100 et seq., during the performance of services under any Agreement awarded. The Proposer further covenants that it will not knowingly employ any person having such an interest in the performance of any Agreement awarded. Violation of this provision may result in any Agreement awarded being deemed void and unenforceable.

VIII.D Rejection Of Proposals

The City may reject any/or all Proposals and may waive any immaterial deviation in a Proposal. The City's waiver of an immaterial defect shall in no way modify this RFP or excuse the Company from full compliance with this RFP and/or the Contract Documents if awarded the Contract. Proposals that include terms and conditions other than City's terms and conditions may be rejected as being non-responsive. The City may make investigations as deemed necessary to determine the ability of the Company to perform the work, and the Company shall furnish to the City all such information and data for this purpose as requested by the City. The City reserves the right to reject any proposal if the evidence submitted by, or investigation of, such Company fails to satisfy the City that such Company is properly qualified to carry out the obligations of the Agreement and to complete the work described herein.

VIII.E Protest Procedures

Failure to comply with the rules set forth herein may result in rejection of the protest. Protests based upon restrictive specifications or alleged improprieties in the proposal procedure which are apparent or reasonably should have been discovered prior to receipt of proposals shall be filed in writing with the RFP Facilitator at least 10 calendar days prior to the deadline for receipt of proposals. The protest must clearly specify in writing the grounds and evidence on which the protest is based.

Protests based upon alleged improprieties that are not apparent or which could not reasonably have been discovered prior to submission date of the proposals, such as disputes over the staff recommendation for contract award, shall be submitted in writing to the RFP Facilitator, within forty-eight hours from receipt of the notice from the City advising of staff's recommendation for award of contract. The protest must clearly specify in writing the grounds and evidence on which the protest is based. The RFP Facilitator will respond to the protest in writing at least three days prior to the meeting at which staff's recommendation to the City Council will be considered. Should Proposer decide to appeal the response of the RFP Facilitator, and pursue its protest at the Council meeting, it will notify the RFP Facilitator of its intention at least two days prior to the scheduled meeting.

VIII.F Cancellation

The City retains the right to cancel this RFP at any time, should it be deemed to be in the best interest of the City. No obligation either expressed or implied exists on the part of the City to make an award based on the submission of any proposals.

IN WITNESS WHEREOF the Parties hereto have executed this Agreement the day and year first hereinabove written.

March 28, 2024

Barbara Mason, Purchasing Manager
Purchasing Division
99 E. Ramsey Street
Banning, CA 92220

Dear Barbara Mason and Selection Committee Members:

Roadway Asset Services, LLC (RAS) is pleased to submit this proposal for the City's Fixed Asset Inspection and Inventory Assessment (RFP 23-046). The RAS management team is composed of industry experts who bring over a combined 150 years of experience and have managed **100,000 miles of pavement condition and asset inventory data** in the last 5 years. Specifically, our team will provide the following:

- **Unrivaled Municipal Experience in the Southwest**– Our engineering firm is comprised of industry experts assisting municipalities in the field of pavement and asset management. Throughout their careers, the RAS leadership team has **managed pavement data and ROW asset collection for 10 of the 20 largest U.S. Cities**. RAS has managed the following pavement and asset condition assignments: Rancho Palos Verdes, CA; Salt Lake City, UT; Albuquerque, NM; Las Cruces, NM; Farmington NM; West Jordan, UT; Denver, CO; Gilbert, AZ; Pima County, AZ; Coconino County, AZ; and Sedona, AZ. We understand asset management is a commitment to long-term goals that must be flexible enough to evolve with the priorities of the City.

The RAS Team Advantages

- ***Expert Consulting:*** ***A dedicated executive team, with each member having at least 17 years of pavement management experience.***
- ***Data Collection Procedures:*** ***Leverage state-of-the art data collection technology and in-house developed AI tools for confidence in the data.***
- ***Cartegraph Implementations:*** ***Work with a team that will ask the right questions and provide the right information to manage your assets.***
- ***Communication and Partnership:*** ***Expect a detailed and organized team approach that truly is focused on the goals of the City.***

- **Automated Data Collection Technology** – The RAS team owns and operates a fleet of **four advanced automated data collection vehicles** for use in the development of PCI, IRI, and OCI results. Our team uses the latest technology **(LCMS-2 and Ladybug 360 cameras) to collect ASTM D6433 distresses** along with other right-of-way asset attributes. The RAS approach to right of way asset inventory development can harness the power of photogrammetry for attribution assignment.

- **Unmatched Cartegraph OMS Experience and Exclusive Partnership**– **As a preferred 3rd party business partner,** our team can provide full-service implementations including install, distress data import, Scenario Builder configuration, training sessions with City staff on Cartegraph's operation, and budgetary modeling to improve OCI results for various districts or the entire network. The RAS team routinely develops the data import sheets following the Cartegraph schema requirements and using the Cartegraph import/export user interface. While not currently included in the scope of services, the RAS team is well versed with Scenario Builder and commonly assists municipal agencies with the assignment of rehabilitation activity triggers, development of Supersegments through the use of Automation Manager and financial optimization using "Cost of Deferral" sequencing as a part of the prioritization logic. To ensure the highest degree of familiarity

with the Cartegraph interface, RAS has assigned our Director of Deliverables, Jeff Booth, MBA, to review the import sheets. **Mr. Booth previously served as Cartegraph's Senior Vice President of Services for over 10 years.**

- **Unrivaled offering of ROW data sets** - RAS will conduct a ROW asset needs assessment to examine the City's existing data sets and gaps in desired attributes. For the pricing of this propsal, RAS has selected a traditional methodology of photogrametry collected by the Ladybug 360 degree camera to capture location and imagery. Additional attribution for selected assets will be discussed as an optional service with City Staff.
- **Local Knowledge and Understanding**– While RAS is an industry expert in the use of automated technologies and Cartegraph integrations, we have also teamed with **Bucknam Infrastructure Group, Inc.** to conduct an independent field QC of the 10-mile pilot distress data that is delivered to the City for review. As a local pavement management consultant, Bucknam will provide in-field ASTM D6433 verification of the RAS automated pavement condition data. RAS and Bucknam Infrastructure Group represent a powerhouse of pavement management expertise when combined as a unified team and have previously worked together on Pavement Condition Assessments for Rancho Palos Verdes and Pomona. **Bucknam Infrastructure Group has assisted more than 70 Southern California local agencies in Pavement Management Programs**

We look forward to building a long-term relationship with the City of Banning. RAS intends to perform all the requested services and has reviewed/understood all elements of the RFP including Addendum 1, Addendum 2, and Questions & Answers in OpenGov. RAS is willing to enter into a contract under the terms and conditions prescribed by this RFP and in the Sample Agreement. RAS' main point of contact and authorized negotiator for contract terms and binding decisions is Bart Williamson, FCLS. He can be contacted at (210) 837-5249 and bwilliamson@roadwayassetservices.com.

Sincerely,

Bart Williamson, CEO
Roadway Asset Services, LLC.

Statement of Understanding & Approach

A. Statement of Understanding and Approach

A.1 Understanding of the City's Requirements

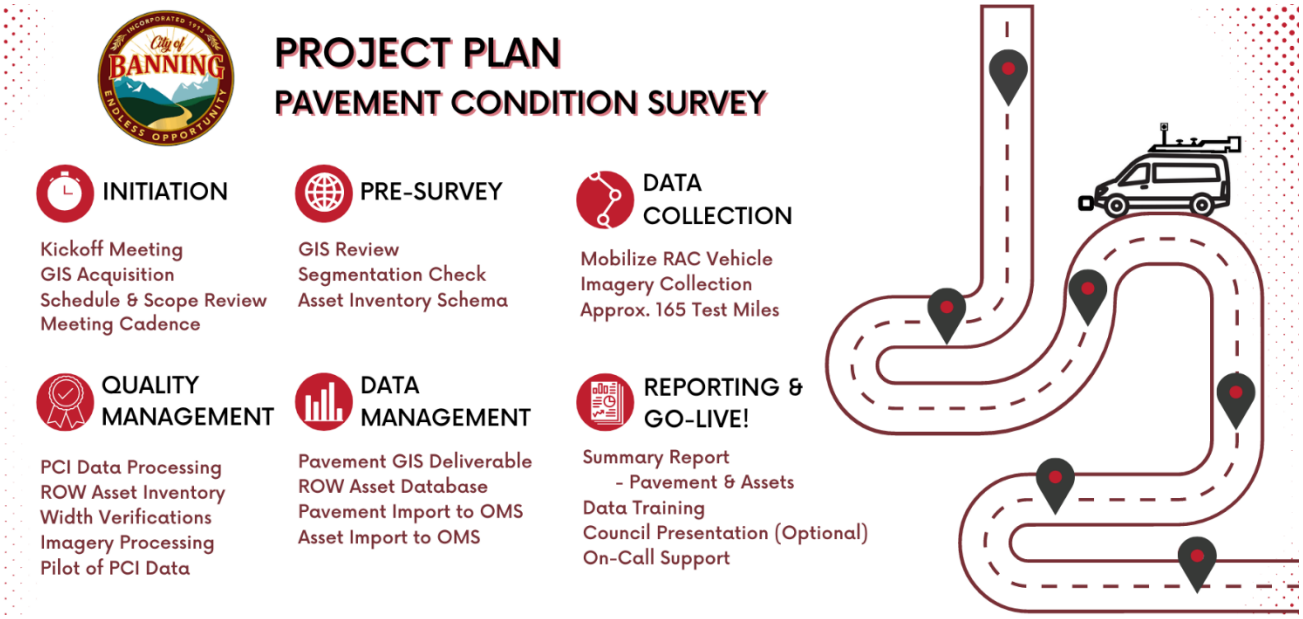
The RAS team understands that the City's Fixed Asset Inspection and Inventory Assessment includes the collection of approximately **150 centerline miles** of paved roadways, signs, markings, supports, light fixtures, guardrails, ADA ramps, sidewalks, trees, inlets, outlets, catch basins, retention basins, culverts, manholes, outfalls, trash capture devices. RAS will utilize an automated Roadway Asset Collection (RAC) vehicle to collect imagery of the roadway and assets, geolocate the assets, perform an object pavement condition assessment, format pavement and asset data for import to Cartegraph OMS, and deliver a final summary report for the pavement and ROW assets.

The **RAS fleet of four (4) Roadway Asset Collection (RAC)** vehicles are equipped with a Laser Crack Measurement System (LCMS-2) for automated pavement data acquisition and a **certified laser profiler** which includes line lasers for capturing full lane rutting and roughness data in conformance with the AASHTO R 57. The raw sensor data will be collected, processed, and aggregated to the segment level contained in the City's Cartegraph OMS Software. The data will be collected and delivered in accordance with the most current version of the U.S. Army Corps of Engineers data protocols, commonly referred to as ASTM D6433. The RAC vehicles meet or exceed all of the requirements for pavement surface imaging as defined by the City.

As a **Strategic Business Partner of Cartegraph** and routine implementer of the pavement module, RAS will upload the new pavement inspection data into Cartegraph as "Inspected OCI" to assist the City in updating the enterprise software for budgetary modeling development (performed by City). **RAS is a preferred business partner with Cartegraph and will ensure seamless access to the OMS environment through a review of the test environment before moving into production.** In addition, RAS has a tried and tested method to complete the data import and we have the staff expertise in-house to support the City's software implementation tasks not included in the "Orange Advantage" package.

RAS understands that the City's utilized the Nobel GIS suite of tools for spatial data management. Nobel utilizes the ESRI ArcGIS Engine and ArcSDE software that is utilized for data management for GIS-centric projects. RAS is an ESRI Silver partner and we have the solutions to meet the City's GIS integration needs.

At the close of the project, RAS will prepare and deliver a Letter of Certification with a narrative Summary Report certifying the asset count, methodology, documenting missing assets, assets in unserviceable condition and state of disrepair, and provide recommendations for developing a comprehensive replacement schedule with projected cost estimates.



A.2 Project Approach

RAS' project approach includes the management of tasks by seasoned asset and pavement management professionals who bring over a **combined 150 years of experience**. The benefit of RAS on this assignment is that the team is dedicated to asset and pavement management on a daily basis. This is their core focus as transportation professionals. The RAS team utilizes the Project Management Body of Knowledge (7th edition) to define and adhere to the principles of planning. The planning processes include organizing, scheduling, controlling, and coordinating.

Implementation Plan

RAS has experience in gaining stakeholder engagement through the facilitation of educational workshops and council meetings. RAS understands a crucial aspect to the successful implementation of data driven analysis results is getting approval from City officials and stakeholders. Our team utilizes the **Account Ability AA1000ES Assurance Framework for Stakeholder Engagement** that defines the management of multi-stakeholder bodies through a Materiality, Completeness, and Responsiveness lens. Project initiation will begin by coordinating with the City to identify various stakeholders and involved parties. After stakeholders have been identified, RAS will conduct workshops to discuss mutual goals with the data collection project and priorities for improvements in the City's street network. RAS will eliminate bias based on our methodology for rating pavement distresses that follow the ASTM D6433-20 standards. City confidence in the data enables solutions to be made based on the represented rating of the network and reduces biases in decision-making.

Task 1: Kickoff and Project Management

Kickoff Meeting

At the outset of the project, RAS will work in conjunction with City Staff to develop the initial scope of work and identify what tasks are critical to the City's pavement management program. RAS will review the City's existing GIS centerline files and Cartegraph database for use in this project. After an initial review, RAS will conduct the Kickoff Meeting to discuss the GIS files, requirements/considerations, deliverable formats, and additional data needed by RAS for preparation and project administration. During the kickoff meeting, RAS will present a project schedule and fees, identify tasks and milestones, review the methodology utilized, provide a detailed quality assurance/quality control (QA/QC) plan, suggest a schedule for biweekly progress meetings, and discuss goals for the project. In addition, team members will also determine a pilot area of approximately 10 miles for collection and review of all deliverables by City Staff. We will also obtain a collection letter for field crew use and determine areas that are of greatest priority or that require special timing for collection due to festivals.

Project Milestone/Monthly Meetings

RAS understands that communication between the RAS team and the City of Banning is central to having a successfully managed contract. To ensure project requirements are met, RAS will host biweekly meetings to review the percentage of the network collected and rated. RAS will meet and exceed the minimum of 5 meetings and will present progress reports, meeting agendas, and minutes.

Capacity to Perform the Work

RAS has internal processes and partnerships that ensure the negotiated budget and timeline are maintained. One way RAS optimizes its field data capture is by collecting pavement condition data 7 days a week, which allows our team to remain ahead of schedule when events such as storms or other weather-related events do occur. In addition, RAS' strength lies in our ability to mobilize additional equipment if the collection vehicles go down for maintenance. RAS operates a fleet of four data collection vehicles that are less than four years old and has a partnership with our equipment manufacturer/assembler who will provide replacement equipment or technical support within 48 hours. This level of service results in minimal downtime.

Project Schedule

RAS has presented the following schedule to demonstrate its efficiency in data collection, processing, quality assurance, and delivery of a final report. This schedule represents a realistic timeline to complete the work associated with the requested scope of work.

Task	Description / Milestone	Days	Month: Starting Upon Receipt of NTP 1	2	3	4	5
1	Project Initiation, Kick-Off, & Centerline Identification	14					
2	Field Mapping Development, Segmentation Review, & Routing Setup	5					
3a	Roadway Asset Collection (RAC) Vehicle Mobilization/Calibration	2					
3b	RAC Pavement Distress & Imagery Collection	50					
4a	Pavement Evaluation, ASTM D6433 Data Processing, & QC	105					
4b	Pilot Data Review with City Staff	2					
4c	Independent ASTM D6433 Field Review and Ground-Truthing	5					
4d	HD Digital Image Processing & Delivery	60					
5a	ROW Asset Inventory & Attribution	9					
5b	PCI Data Import to StreetSaver®	10					
6a	RAS & City Review of Final Data	20					
6b	Delivery of Report and Final Data	10					
PM	Schedule Project Status Meetings	10					

CRITICAL PATH COMPONENTS

Prep/GIS Database Work
Field Work
Extraction/Evaluation/QC Work
Final Deliverable

Assumptions

- Centerline file to be provided as a geodatabase.
- OWNER to provide access to NOBEL GIS data and the “Pavement Layer” for data linking.
- Arterials and Collectors are two pass collection and Locals and Residentials are one pass collection.
- Surveys to be completed when pavements are dry and free of standing water.
- City to participate in project activities in a timely manner to ensure schedule integrity.

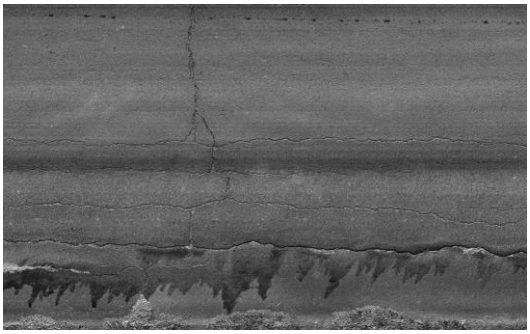
Task 2: Pre-Survey GIS Mapping and Network Centerline Identification

RAS will review the City's existing GIS centerline and perform an audit of the data to ensure that all roads requiring data collection are surveyed. This will include a review of functional classes and coverage checks for major/divided roads (Wilson St, Highland Springs Ave, Sunset Ave, Ramsey St, Sun Lakes Blvd, Hathaway St.) that require two-directional testing. The result will be a clean GIS centerline, ready for consumption of additional layers and attribution related to the pavement condition surveys and asset inventories.

To ensure adequate coverage and exceed requirements, the RAC vehicle will survey arterial and collector roads in two directions, while single pass testing the residential roads. This approach ensures the highest level of detail and representative pavement conditions. At the completion of the project, the roadway and right of way images (provided at no cost) and condition database for the network will be formatted for upload into Cartegraph OMS, the City's GIS environment, and the optional RAS web-hosted videologger.

Task 3: Perform Physical Inspection and Inventory

Roadway Asset Collection (RAC) Vehicles



The pavement data will be processed per road segment for the entire roadway network using the continuous and detailed 20-foot linear samples acquired by the RAC Laser Crack Measurement System (LCMS-2) vehicle. RAS will adopt the City's existing GIS linked OMS centerlines and the detailed 20-foot LCMS samples will be processed into 2,500 sqft samples following the ASTM D6433 logic. These 2,500 sqft samples can then be loaded as sample inspections for every City segment, thus creating multiple inspections for each segment. Alternatively, RAS can also aggregate the 2,500 sqft samples to match the City's existing segmentation, thus creating one inspection record for every segment. The RAS approach is comprehensive and nimble enough to evolve with City expectations. The City will receive the condition and analysis results in several formats such as Excel Spreadsheets and geodatabases prior to the final Cartegraph production load.

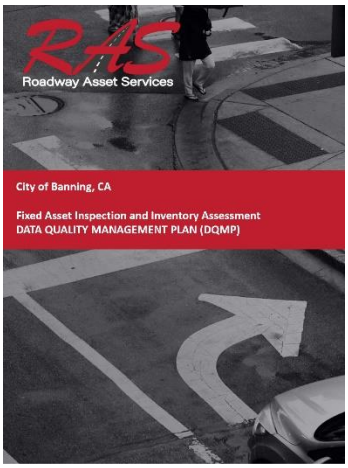
All RAC vehicles operate within the appropriate ASTM and AASHTO standards and have been independently certified by Texas A&M Transportation Institute to ensure accuracy with the data collection. An enhancement and cost savings initiative that differentiates RAS from other pavement condition survey approaches is that the advanced technology equipped on the RAC vehicles **does NOT require two passes on local/residential roads.** This will save the City time and money as the total **number of test miles driven is substantially reduced** compared to all-lane surveys.

RAS will calculate an ASTM D6433 PCI score using the detailed extent and severity distress data captured in the field for every segment, for all street functional classifications and the overall network. In addition, IRI values will be provided for all street functional classifications in accordance with the AASHTO R 57. The combined PCI and IRI data will be imported to Cartegraph to calculate the Overall Condition Index (OCI).

To complete the automated pavement condition survey, the RAS team will utilize RAC vehicles from the fleet of four (4), equipped with:

- The LCMS-2 camera is a downward-facing laser array providing images used to evaluate data that conforms with ASTM D6433 protocols, which uses **two 1-millimeter-pixel** resolution line scan cameras to **provide a customized digital condition rating system to collect user defined severity/extent-based pavement distresses and rutting.**
- The pavement distress type, density, severity, and extent are collected with the LCMS-2 and are used to calculate a Pavement Condition Index (PCI) score, between 0-100, that represents the condition of 100% of the driven lanes.
- Point Gray Ladybug 5+ 32MP **360-degree High-Definition camera** (**utilized for accurate ROW asset capture, extraction, and pavement QA/QC**) is far superior to multiple independently mounted HD cameras. These images will be supplied to the City at no additional cost as the RAS team feels they are critical for City review and acceptance.
- **Linear distance measuring to within +/-0.5%**.
- A class 1 inertial profiler for simultaneously capturing dual-wheel path (left and right) International Roughness Index (IRI) measurements to the hundredth inch, in accordance with AASHTO R48. The profiler has gone through **ASTM E-950** certification and **was independently certified by Texas A&M Transportation Institute (TTI) in March 2024.** The inertial profiler meets the requirements and will be operated in accordance with **AASHTO Standards M 328, R 57-10, R 56-10, and R43M/R43-7**.
- Applanix POS/LV with DGPS (**Provides accurate internal GPS navigation for geo-locating pavement and right of way asset information**).

The RAS team will conduct pavement survey work on dry pavement and in lighting conditions that ensure accurate crack detection. We will collect imagery during daylight hours only, with no rain, fog, or snow visibility obstructions. Any road segment(s) that exhibits low image quality due to lighting will be recollected at a later time. The industry is currently migrating toward automated intelligence (AI) rating for 100% linear assessment of the roads, in accordance with guidelines within the **ASTM D6433, ASTM E1656, and ASTM E3303**. This methodology removes the subjectivity of rating small sample areas of the road segment where the sample may not represent the condition of the entire roadway segment.



Ladybug 360^{o} Imagery

All collected pavement and ROW imagery will be provided in appropriate state plane coordinates while being collected in one continuous pass at posted roadway speeds for residential roads and two pass-testing arterial and collectors. The high-definition panoramic Ladybug camera will be used to inventory and capture right-of-way (ROW) assets for extraction. The images will be collected as a 360^{o} right-of-way panorama, including forward, rearward, and downward pavement viewing images. Each image will be electronically tagged with location information for plotting within a spatial environment.

Example Ladybug ROW Imagery & Pavement LCMS-2 Imagery Deliverables

Task 4: Detailed Quality Assurance & Quality Control Work Plan

RAS has also developed a detailed 30-page **Data Quality Management Plan (DQMP)** to provide our clients with a systemized method for assuring data is representative of the conditions present. Included in the DQMP is a description of condition survey procedures, data collection vehicle calibration, range of accuracy, data checks, safety procedures, verification by trained engineers, roadway segment review/verification, and integration into Cartegraph. A unique feature of our quality managmenet plans is a 10-mile field verification pilot reviewed by RAS, Bucknam Infrastructure Group, & City Staff that will illustrate the completeness and accuracy of the RAS data stream. We can supply the City of Banning with our published 30-page DQMP at the request of City Staff. The document's length and technical nature didn't make it suitable for inclusion with this proposal submission.

Quality Assurance Step #1– Network Database Review (Completeness / Gap Analysis)

While a simple routine in every project, the cornerstone to project initiation is conducting a complete diagnostic of the roadway network, including a full and thorough assessment of the City's GIS centerline and Cartegraph inventory database. This will include a review of the City's data requirements (i.e., what information is needed/desired) and subsequent data gap analysis (what is missing).

RAS will include the following in this initial review:

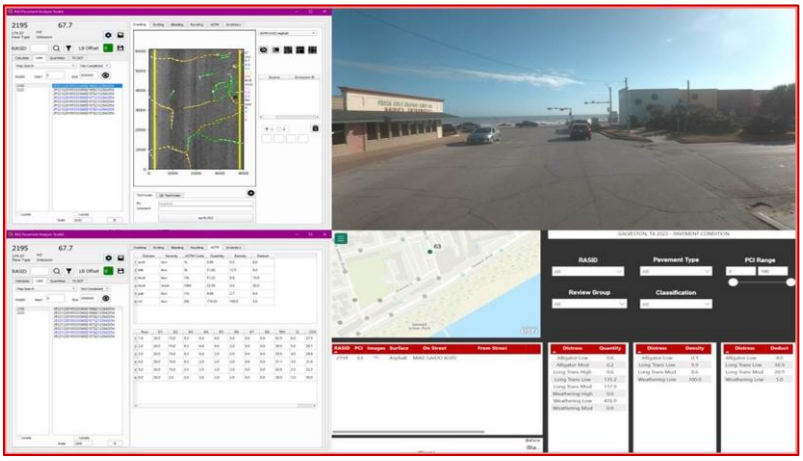
a. Base inventory information, (i.e., Functional Class, lengths, areas, surface type, etc.)
b. Historical condition information
c. Status of survey history
d. Construction and maintenance history
e. Review of maintenance and rehabilitation treatments and unit costs
f. Review of existing pavement deterioration curves
g. Review of Scenario Builder routines to ensure City is maximizing latest updates (optional task)

Quality Assurance Step #2 – Mobilization/Calibration/Pilot/Kickoff

> *"The pilot data field validation was crucial to our acceptance and buy-in on our pavement quality assessment. Mr. Gordon explained each condition, the methods of measurement of the distresses, and how the PCI score calculations could help us understand the meaning and relationship of the values to our perceptions of pavement performance. This personalized process allowed us to make maintenance decisions from the data provided with confidence." Zayne Huff, City of Southlake*

The importance of the **field pilot** cannot be understated as it has become a routine milestone for the RAS Team on all pavement condition projects. The pilot allows RAS to collect, process, and review condition data with City Staff to ensure accuracy with the data collection and interpretation protocols. In addition to the City's eventual review of the 10-mile pilot data, **RAS subconsultant Bucknam Infrastructure Group (a local pavement management consultant), will conduct an independent 3rd party review of the 10-mile pilot to assist in the quality review process. The review of the RAS condition data and Bucknam QC will be hosted by Senior Pavement Engineer, Scot Gordon, PE, IAM in the field, where he will review site conditions with City Staff**. Scot uses a field tablet that contains the segment PCI scores along with the deduct points assigned to each distress such that everyone understands the PCI impacts of distresses that are present. The importance of this step is to make necessary corrections to the processing routines that result from local standard construction practices/soil conditions and to ensure accuracy with the approach. As certified ASTM D6433 inspectors, Bucknam will conduct a walking survey on the 10 miles of roadway through the selection of representative samples for each segment, covering a minimum of 20% of the total section area and samples will be 2,500 square feet (+/- 1,000 sqft) in size.

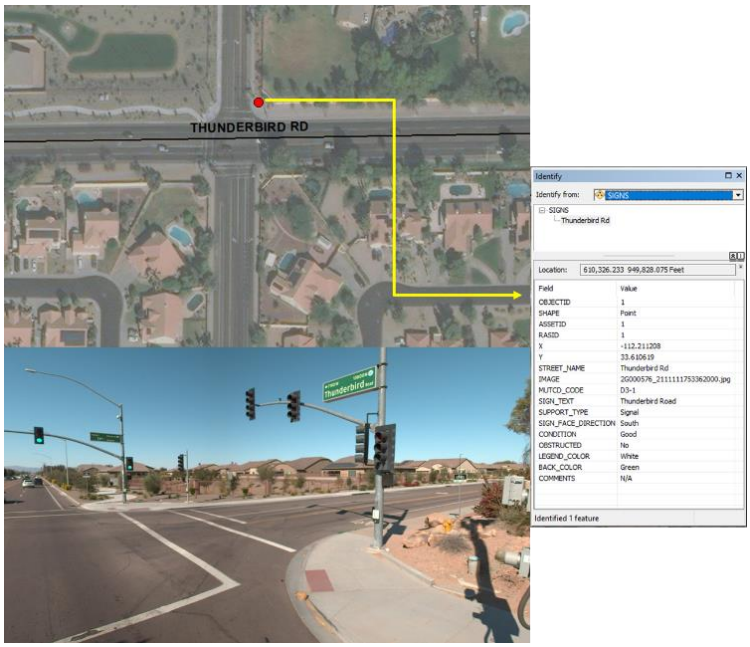
As a cornerstone to the development of quality data deliverables, Scot Gordon, PE has performed a pilot data field validation with agency staff on hundreds of pavement condition surveys. Throughout his career, Scot has worked with various agencies on the **field pilot data validation** including but not limited to:



- Houston, TX
- Durham, NC
- Virginia Beach, VA
- Indianapolis, IN
- Fort Worth, TX
- Salt Lake City, UT
- Denver, CO
- Albuquerque, NM
- Charlotte, NC

Quality Assurance Step #3 – Subsystem Monitoring in The Field

During the survey, the RAS collection software monitors the GPS subsystems and alerts the operator if the GPS feed drops out or if GPS quality is compromised. The IMU will provide acceleration-based corrections during this time to ensure that GPS accuracy is maintained as much as possible. The RAS team will also review a randomized sample of images to ensure that it complies with the requirements of the specifications throughout the course of the network matching and event QC. Upon completion of the network matching, an image report shall be generated with the total image count compared with that expected for each road. Daily Progress Reports are produced by uploading sensor, GPS, and event data and matching against the road network definition. Progress reports include the following, road sections collected, length discrepancies, and remaining sections to be completed.



Quality Assurance Step #4 – Automated Crack Analysis & Engineer Review

After data is collected in the field and uploaded to the office environment, it is imported using the RAS AI enhanced pavement rating tool **RoadTRIP™ (Technical Rating Intelligence Program)**. The import process creates mappings to the data so that users do not need to keep track of where the data is stored on central data server(s). At this stage, the major data processing tasks also occur, such as generation of right-of-way and pavement image streams; calculation of profile, roughness, rutting, detection of cracks, lane-markings, man-made objects, and other distresses. The **RoadTRIP™** application was designed around the ASTM D6433 data collection protocols and contains a **PCI calculator** that uses distress deduct curves and Q-correction. This PCI is used for Quality Assurance before importing detailed extent/severity distress data into Cartegraph. **RoadTRIP™** was programmed with sophisticated algorithms that use sound geometry and distress density to properly classify and quantify pavement distresses.

An experienced pavement inspector will perform QC to confirm the distresses and severity of the pavement condition data collected by the automated technology. This manual quality review is performed, in accordance with the principles of the ASTM D6433 standard, using the LCMS pavement images gathered during collection with the distresses superimposed and color coded.

Task 5a: ROW Asset Inventory

RAS has a proven methodology to perform asset inventory and inspection services for **Transportation, Walkability, and Stormwater** infrastructure. At a minimum, each requested asset will receive a photograph and geolocation for plotting within a spatial environment **(with signs, markings/striping, ADA ramps, and sidewalks receiving a condition assessment)**. Eash asset class will be provided to the City as a file geodatabase, with imagery links, and formatted for import to Cartegraph OMS.

The following **Data Dictionary** will be taken to develop the right-of-way asset inventory and condition assessment for the City's requested infrastructure assets.

ROW Asset Data Dictionary

RAS can post-process the Ladybug panoramic imagery using RAS software to collect attributes for each asset type captured. Note that each of these ROW assets will include geolocation and a hyperlinked photo. Each of the attributes *highlighted in light blue* will be included as a **no-cost, value-add to the inventory**.

			City of Banning ROW Asset Data Dictionary					
Selected Asset	**Code**	**Geometry**	**Field 1 Attribute**	**Field 1 Data**	**Field 2 Attribute**	**Field 2 Data**	**Field 3 Attribute**	**Field 3 Data**
Signs	SIGN	Point	SIGN_ID or Client Schema	Unique identifier for each sign e.g. 100000 or Client Schema	SIGN_Condition	An identification of the condition of the sign. Populated as 1-Good 2-Fair 3-Poor	SIGN_MUTCD	Numerical MUTCD Code for the Sign
Supports	SS	Point	SS_ID or Client Schema	Unique identifier for each sign support e.g. 200000 or Client Schema	SS_Type	An identification of the material type of support structure (wood, utility pole, bridge, etc.)	N/A	N/A
Pavement Markings	PM	Point	PM_ID or Client Schema	Unique identifier for each pavement marking e.g. 300000 or Client Schema	PM_Condition	An identification of the condition of the pavement marking. Populated as 1-Good 2-Fair 3-Poor	PM_Type	The type of marking taken from a picklist of custom MUTCD codes (bike symbol, railroad crossing, double arrow LT, etc.)
Pavement Striping	PS	Linear	PS_ID or Client Schema	Unique identifier for each painted/inlaid striping e.g. 400000 or Client Schema	PS_Condition	An identification of the condition of the striping. Populated as 1-Good 2-Fair 3-Poor	PS_Type	The type of striping taken from a picklist of custom codes (solid, dashed, double, etc.)
Light Fixtures	LF	Point	LF_ID or Client Schema	Unique identifier for each light fixture e.g. 500000 or Client Schema	LF_Condition	An identification of the condition of the light structure. Populated as 1-Good 2-Fair 3-Poor	LF_Support Type	The construction style of the support e.g. wood mast, round metal, ornamental, etc.
Guardrails	GR	Linear	GR_ID or Client Schema	Unique identifier for each guardrail e.g. 600000 or Client Schema	GR_Condition	An identification of the condition of the guardrail. Populated as 1-Good 2-Fair 3-Poor	GR_Type	The primary construction material of guardrail e.g. cable, concrete, bike/ped, etc.
Pedestrian Curb Ramps	RAMP	Point	RAMP_ID or Client Schema	Unique identifier for each curb ramp e.g. 700000 or Client Schema	RAMP_Condition	An identification of the condition of the curb ramps. Populated as 1-Good 2-Fair 3-Poor	RAMP_VIF	Identifies the presence of truncated domes or other visual impairment facilities
Sidewalks	SW	Linear	SW_ID or Client Schema	Unique identifier for each sidewalk structure e.g. 800000 or Client Schema	SW_Condition	An identification of the condition of the sidewalk. Populated as 1-Good 2-Fair 3-Poor	SW_Type	A description of the primary method or style of construction (stand-alone, boulevard, etc.)
Trees	TREE	Point or Linear	TREE_ID or City Schema	Unique identifier for each tree withing the adjacent right-of-way e.g. 900000 or City Schema	Note: Trees that are bunched together will be drawn in as a linear asset.	N/A	N/A	N/A
Inlets	INLT	Point	INLT_ID or Client Schema	Unique identifier for each storm inlet e.g. 1000000 or Client Schema	INLT_TYPE	Type of inlet contruction (open, covered, grate, etc.)	N/A	N/A
Outlets	OUT	Point	OUT_ID or Client Schema	Unique identifier for each outlet e.g. 1100000 or Client Schema	OUT_TYPE	Type of outlet constuction (open, covered, grate, etc.)	N/A	N/A
Catch Basins	CABA	Point	CABA_ID or Client Schema	Unique identifier for each catch basin e.g. 1200000 or Client Schema	CABA_TYPE	Type of catch basin construction (open, covered, grate, etc.)	N/A	N/A
Retention Basins	REBA	Point	REBA_ID or Client Schema	Unique identifier for each retention basin e.g. 1300000 or Client Schema	REBA_TYPE	Type of retention basin construction (open, covered, grate, etc.)	N/A	N/A
Culverts	CUL	Point	CUL_ID or Client Schema	Unique identifier for each culvert e.g. 1400000 or Client Schema	CUL_TYPE	Type of culvert construction (open, covered, grate, etc.)	N/A	N/A

			City of Banning ROW Asset Data Dictionary					
Selected Asset	**Code**	**Geometry**	**Field 1 Attribute**	**Field 1 Data**	**Field 2 Attribute**	**Field 2 Data**	**Field 3 Attribute**	**Field 3 Data**
Manholes	MAN	Point	MAN_ID or Client Schema	Unique identifier for each manhole e.g. 1500000 or Client Schema	MAN_TYPE	Style of manhole (circular, rectangular, etc.)	N/A	N/A
Outfalls	OF	Point	OF_ID or Client Schema	Unique identifier for each outfall e.g. 1600000 or Client Schema	OF_TYPE	Type of outfall construction (open, covered, grate, etc.)	N/A	N/A
Trash Capture Devices	TCD	Point	TCD_ID or Client Schema	Unique identifier for each trash capture device e.g. 1700000 or Client Schema	N/A	N/A	N/A	N/A

Sign Retroreflectivity Assessment

RAS is aware that traffic fatality rates are 3 times higher during nighttime than daytime with reduced nighttime roadway visibility as a common factor. RAS also recognizes the importance of nighttime visibility of traffic control devices as our population ages. In general, older individuals have declining vision and slower reaction times. Signs that are easier to see and read at night can help older drivers retain their freedom of mobility and remain independent. RAS can provide the City with a Federal Highway Administration (FHWA) Visual Nighttime Inspection Method and would record in the database whether the sign meets the minimum guidelines in the MUTCD.

Visual Nighttime Inspection Method

The Visual Inspection Method involves an inspector (over age 60) that will assess the visibility and retroreflectivity of the traffic signs as the signs are approached. Signs need to be replaced if they do not meet the comparison defined in one of the three approved procedures: Calibration Signs Procedure, Consistent Parameters Procedure, and the Comparison Panels Procedure. For this project, we will be utilizing a combination of the Calibration Signs Procedure and the Comparison Panels Procedure. The description of these procedures is provided as contained in the FHWA document:

Calibration Signs Procedure **-** Calibration signs are viewed prior to conducting the nighttime inspection. The calibration signs have retroreflectivity levels at or above the minimum levels. These signs are set up where the inspectors can view the calibration signs in a manner similar to how they will conduct the nighttime inspection. The inspector uses the visual appearance of the calibration sign to establish the evaluation threshold for that night's inspection activities.

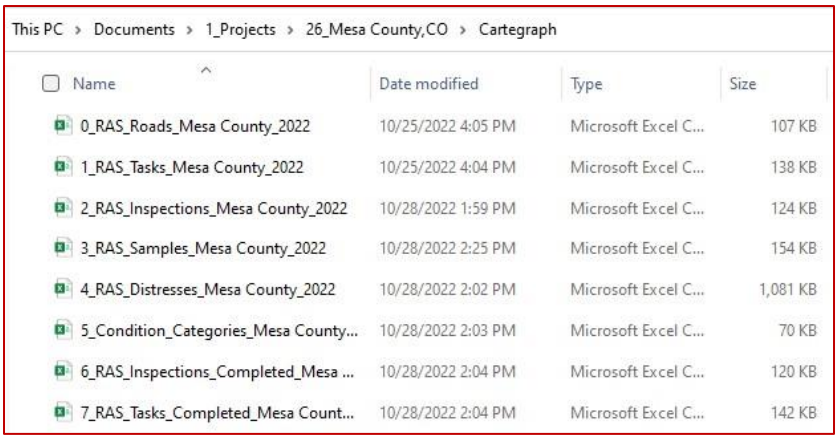
Calibration signs are needed for each color of sign for which there are minimum levels. The calibration signs are viewed at typical viewing distances and from the same vehicle that will be used for conducting the inspections. The calibration signs need to be safely stored between inspections so that the retroreflectivity of the calibration signs does not deteriorate over time. Calibration signs are checked at periodic intervals to ensure that the calibration panels have the appropriate retroreflectivity levels.

Comparison Panels Procedure **-** Small comparison panels are used to assess the retroreflectivity of questionable signs. The comparison panels are fabricated at retroreflectivity levels that are at or above the minimum levels. When the retroreflectivity of a sign is considered to be questionable, a comparison panel is attached to the sign and the sign/panel combination is viewed by the inspector.

If the comparison panel appears brighter than the sign, the sign needs to be replaced. Utilizing both of these methods will help the inspector in situations where the retroreflectivity is questionable. The inspector will use the Calibration Signs Procedure, and if the inspector encounters a situation where the inspector is not sure, the inspector can then use the Comparison Panels Procedure.

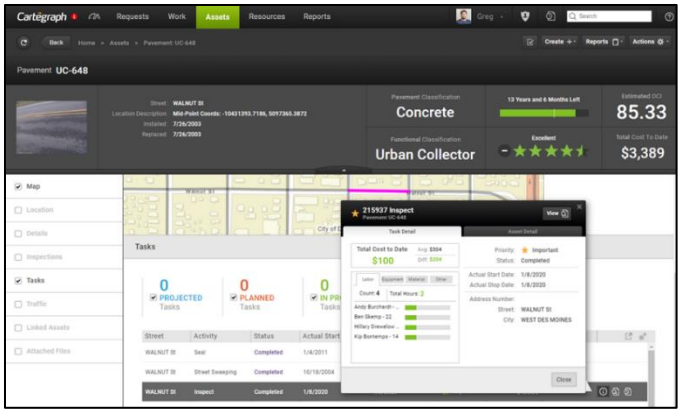
Sign Reflectivity Attribute Model

- **Non Compliant** – Extremely low or no visibility when viewed at distances over 500 feet (greater than 10 skips or at a distance when the sign first comes into view) and/ or not legible at 250 feet or less (i.e. Less than 5 skips).
- **Compliant** – Clearly visible when viewed at distances over 500 feet (greater than 10 skips or at a distance when the sign first comes into view) and good legibility at 250 feet or less (i.e. Less than 5 skips).



We will utilize the two-person data collection method, where one person drives the vehicle and the second person (over age 60) assesses the retroreflectivity of each sign. The reflectivity assessment will be entered into the project delivery sign geodatabase.

Task 5b: Import to Cartegraph OMS Asset Management System



As a strategic business partner of Cartegraph, the RAS team is commonly tasked with importing new pavement inspection data into an agency's production Cartegraph environment. RAS has assigned **Cartegraph's former Senior Vice President of Services, Jeff Booth, MBA,** to manage Cartegraph import and data configuration. RAS Director of Deliverables, Jeff Booth, brings over **10 years of experience intimately working with Cartegraph and 7 years of municipal experience serving as an IT Project Manager**. A typical Cartegraph import happens in two phases as follows:

Phase I: Test Environment – most agencies operating an enterprise system such as Cartegraph OMS have a test environment specifically set up for vendors to test a data load or parameter configuration prior to moving into production. During this stage, the RAS team formats the 2,500 sq.ft. inspection samples or segment level distress data for import into the Cartegraph OMS software. The data is loaded as a new inspection such that it DOES NOT overwrite any legacy data within the software. Old inspections are retained and simply no longer utilized for budgetary modeling purposes.

Data loading for Cartegraph users includes the development of a series of 7 specific import sheets (see image to right) that are formatted for use with the Cartegraph import/export utility. The import sheets cover updates to core segment attribution, tasks, inspections, samples, distress data, and condition categories. The RAS approach to data import is approved and recommended by Cartegraph. While RAS routinely imports data to Cartegraph, we find it imperative to begin with a test environment to fully ensure data integrity.

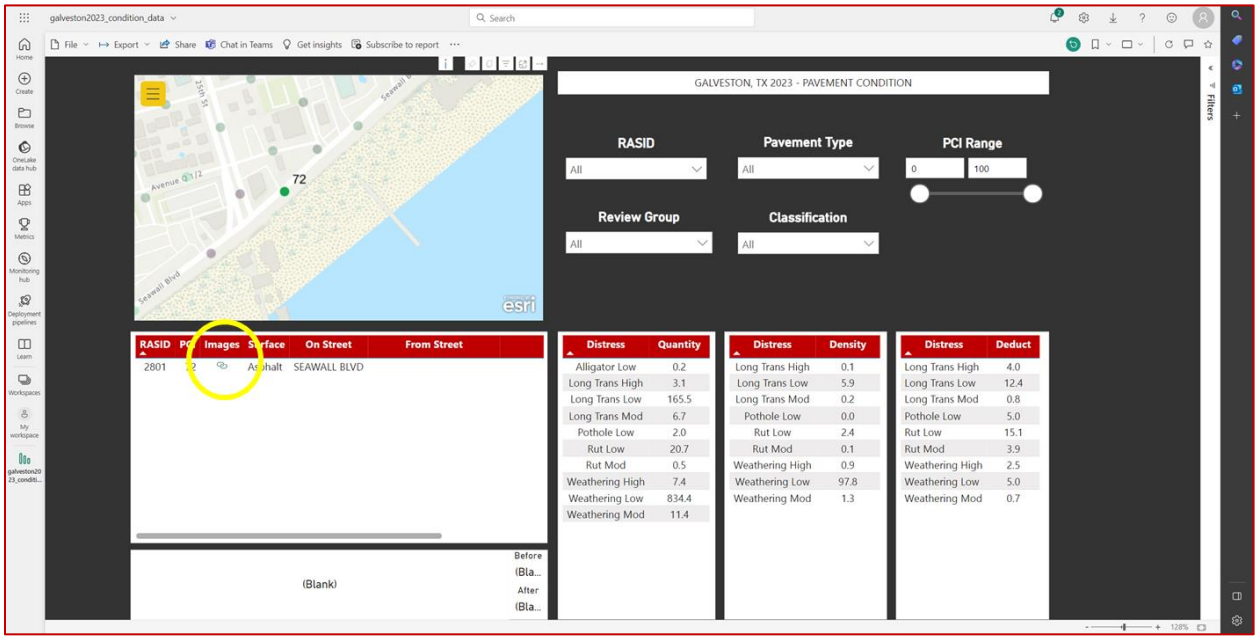
Phase II: Production Environment – Upon completion of the import to the test environment, the RAS Team has our Cartegraph support team review the loaded data to ensure there are no gaps in the data structure or format. Upon acceptance of Cartegraph, the RAS team moves the database into the City's production environment, generally in off-hours to ensure minimal downtime for City Staff and Services. RAS has the team, resources, and expertise to conduct a seamless production load to Cartegraph.

Task 6a: Final Deliverables and Preparation of Summary Report

Hosted RAS Data Validation Portal

While RAS is passionately dedicated to quality data before it is delivered to our clients, we also firmly believe that every client should have the ability to review that data set without having to be software or database experts. So, while most consultants deliver an Excel spreadsheet or a File Geodatabase that the City has to review internally, RAS takes it one step further by setting up a Microsoft PowerBI dashboard that was specifically designed to assist the City in their review of the RAS data.

Below is an image of the **RAS Data Validation Tool** that resides within PowerBI. As can be seen, City staff will have easy access to a map that displays the **pavement condition data** on a segment-by-segment basis. The user has the ability to filter by unique ID or even a PCI range, pavement type, or functional classification depending on what they would like to visualize. Upon clicking on the desired segment for inspection, the distress deducts are then displayed in the lower right-hand side of the screen, indicating that this particular segment with a PCI of 72 is largely impacted by low severity longitudinal and transverse cracking in addition to low severity rutting. The user can then click on an image link (circled in yellow below) to verify the displayed distress deducts by virtually driving down the segment.



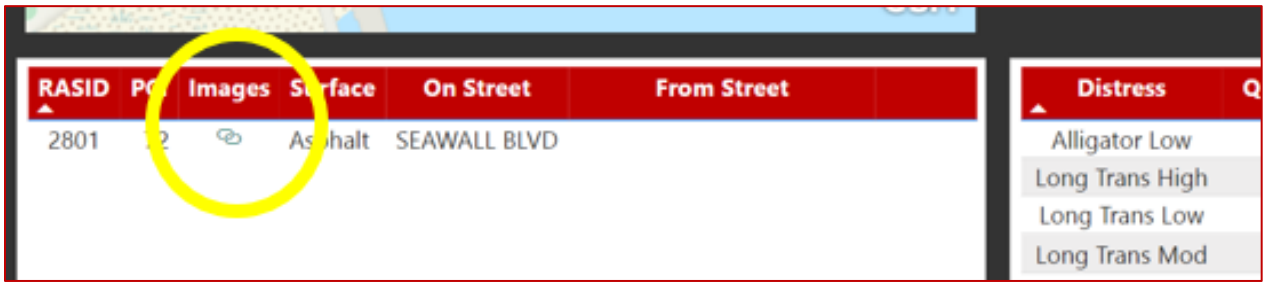


Image Link Zoomed In:

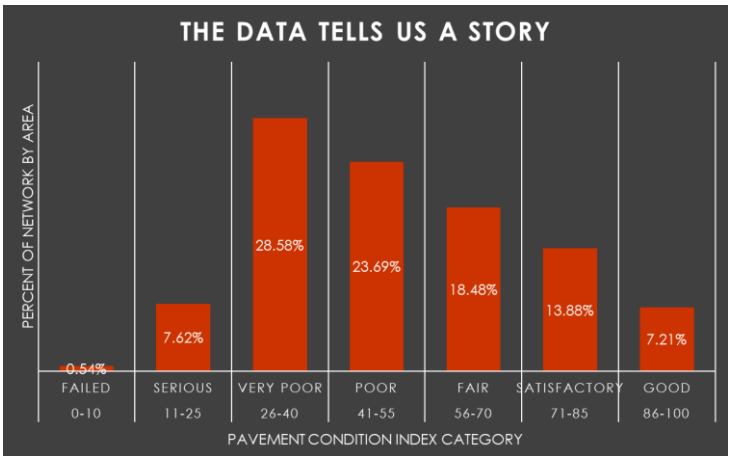
Segment Level Images Every 20-Feet

After clicking the image link for that pavement segment, the high-resolution Ladybug images are then populated such that the user can virtually drive the segment in question to visually verify the average PCI or even the detailed distress deducts. The purpose of this application is to assist the City in their review of the RAS inspection data and create a highly visualized space in which to do so.



Final Summary Report/Executive Summary

RAS will provide the City a final report/executive summary including study objectives, and description of the methodology utilized. A Letter of Certification will be provided with the report to verify the fixed asset count, methodology, assets inventoried, assets in unserviceable condition, missing assets, assets in a state of disrepair, and recommendations for developing a comprehensive replacement schedule.

In addition to the fixed asset report, RAS will provide a final pavement report including an inventory of all roads, current pavement conditions for each street function classification, and network OCI, PCI, and IRI. The City will receive statistical charts, graphs, and area maps illustrating all PCI results, street segment lengths, widths, area, lane count, pavement type, the overall City's road quality, and findings from the pavement evaluation.

A draft of the Final Summary Report will be presented at approximately 75% completion and will require working sessions and feedback from the City to develop the most accurate report for execution. The report will be provided for review by City staff and modified based on comments to produce a final report which will be delivered as a bound report and in Microsoft Word (.doc and .docx) and Adobe (.pdf) format.

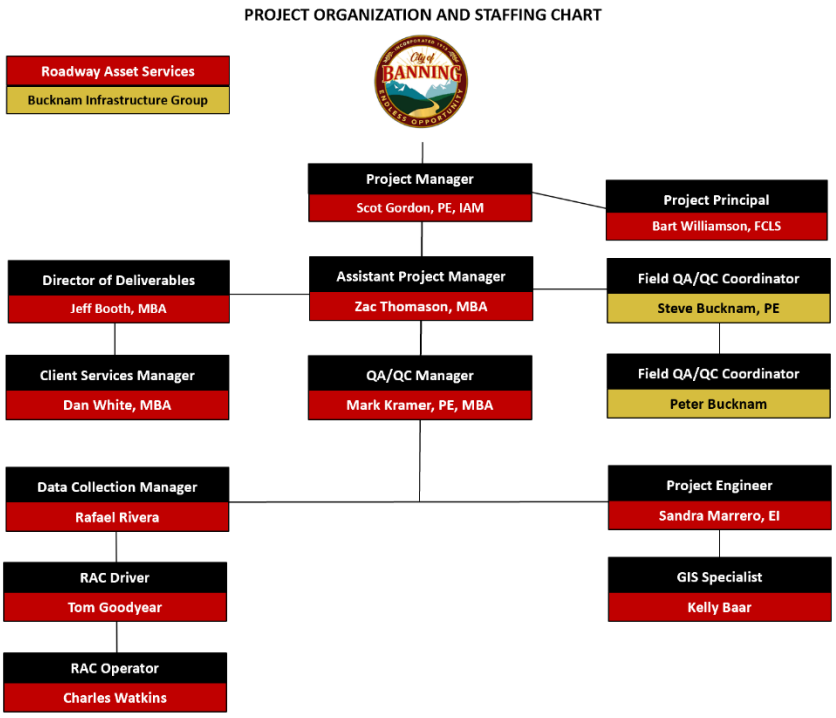
All collected pavement data will be in a format for use with NOBEL GIS software and the Cartegraph OMS software. **RAS is both a preferred Cartegraph Business Partner.** RAS has recently completed imports into Cartegraph for Salt Lake City, UT; Denver, CO; Mesa County, CO; Anderson County, SC; Kingsport, TN; Corpus Christi, TX; New Braunfels, TX; Sarasota, FL; Virginia Beach, VA; Okaloosa County FL; Kansas City, MO; ; San Antonio, TX; South Salt Lake, UT; and Collier County, FL.

Task 6b: City Staff Responsibilities

To complete the City's contract, RAS requires the City's assistance in giving access to NOBEL GIS and existing pavement database, attending the field pilot to review PCI scores and pavement distress interpretations, attending the kickoff meeting and biweekly progress meetings, and reviewing the draft report.

RAS will not lease, purchase, or rent any City owned facilities or properties.

Company Information



B. Company Information

Roadway Asset Services, LLC	Bart Williamson, Chief Executive Officer (210)837-5249 bwilliamson@roadwayassetservices.com 6001 W Parmer Lane, Ste 370-1102 Austin, TX 78727 (210)837-5249
Bucknam Infrastructure Group, Inc.	Peter Bucknam (714)501-1024 peter@bucknam-inc.com 3548 Seagate Way, Ste 230 Oceanside CA 3548 (760)216-6529

RAS is registered with the California Secretary of State under the following entity number 202252114342. RAS is also a self-certified small business according to the Small Business Administration (SBA) NAICS code designation. Both Roadway Asset Services, LLC and Bucknam Infrastructure Group, Inc are independent of the City of Banning as defined by generally accepted auditing standards in the U.S. General Accounting Office's Government Auditing Standards (1994). RAS has not been involved in any litigation, mediation, or arbitration in the past 5 years and has never had a license or certification claim or disciplinary action taken.

Company Personnel

C. Company Personnel

Organizational structure is important to understand as it can often shed light on whom a municipal agency will really be working with on any given assignment. While the City can select any qualified data collector as a short-term vendor, RAS prefers to **develop long term consultative relationships** with our clients that result in turn-key pavement management implementations that exceed client expectations. The key personnel assigned to this project are all long-time veterans of the industry and have extensive experience in pavement distress field rating, Pavement Condition Index (PCI) processing, multi-year prioritization, Cartegraph configurations, and custom database integrations. All assigned key professional staff are properly licensed to practice in California.

RAS has included Bucknam Infrastructure Group, Inc to conduct a 3rd party QA/QC validation of the field pilot and assist with local management. RAS and Bucknam have worked together since 2021 for the City of Rancho Palos Verdes, CA pavement management and ROW asset inventory project.

- **Project Manager and Senior Pavement Engineer, Scot Gordon, PE, IAM (214)789-9941** who has over 32 years of experience in pavement engineering, design, and transportation planning. Mr. Gordon will review distress interpretations and provide expertise in pavement management optimization. During project initiation, Scot will perform a 10-mile field pilot validation study to make necessary corrections to processing routines and review quality assurance measures with City staff.
- **Assistant Project Manager, Zac Thomason, MBA (623)640-2897** brings extensive experience in pavement management with over 17 years of experience, over **350 condition studies** personally managed, and has served as Assistant Project Manager for pavement condition studies in the following California agencies: **Long Beach, Pasadena, Fontana, Orange County, Yucaipa, La Mesa, Carlsbad, Anaheim, Lancaster, Coachella Valley Association of Governments (CVAG), San Luis Obispo, Modesto, and many other California agencies throughout his career.** Mr. Thomason will serve as a liaison between the RAS team and Bucknam team.
- **Project Principal, Bart Williamson, FCLS (210)837-5249** has over 32 years of project management experience and will work with Mr. Gordon and Mr. Thomason to coordinate project needs, resources, and ensure high-quality deliverables are received in a timely manner.

- **Director of Deliverables, Jeff Booth, MBA (210)837-5249** has over 25 years of experience leading projects of all sizes in the Government Sector. Mr. Booth previously served 10 years as **Cartegraph's Senior Vice President of Services.** Due to his intimate knowledge of Cartegraph, Mr. Booth will be responsible for importing and formatting data into Cartegraph.
- **Client Services Manager, Dan White, MBA (570)394-2959** has over 12 years of experience in pavement condition assessments throughout the Country. Mr. White will coordinate with various RAS team members to ensure continuity and accuracy of the project.
- **Quality Assurance/Quality Control Manager, Mark Kramer, PE (480)606-8775** has 24 years of experience in engineering and information technology projects. He is an expert in custom database integrations, application design/programming, data science, CMMS software, data management, data analysis, and delivery of IT driven projects. Mr. Kramer will coordinate with RAS pavement evaluation team and independent QA/QC coordinators, Bucknam Infrastructure Group, to ensure data collected from automated equipment and artificial intelligence correlates with visual ratings.
- **Field QA/QC Coordinator & Local Pavement Engineer, Steve Bucknam (California PE No. 20903) (714)501-1024** will provide local knowledge on soil conditions, local construction practices, and assist in maintenance recommendations based on knowledge from previous California clients. Steve has assisted the following California agencies in Pavement Condition Assessments: **Monrovia, Covina, Big Bear Lake, Rialto, El Segundo, Norwalk, Laguna Woods, Pomona, Westminster, Buena Park, Huntington Beach, Rancho Palos Verdes, Gardena, Sierra Madre**, and many others.
- **Field QA/QC Coordinator, Peter Bucknam (714)501-1024** will provide local knowledge and conduct a third-party quality assurance evaluation of the 10 mile field pilot validation study. Peter will also participate in the overall management of the project with a local office. He has managed over 70 Southern California clients including: **Santa Ana, Huntington Beach, Ontario, Palmdale, Pomona, Orange, Fullerton, Westminster, Buena Park, Laguna Beach, Glendale, Lomita, Lawndale, and Buena Park.**
- **Data Collection Manager, Rafael Rivera (407)701-6397** has over 13 years of experience in automated pavement and ROW data collection field efforts. Mr. Rivera is responsible for updating schedules based on collection status, overseeing the daily operation crew, and initiating/reviewing the evaluation process for pavement and ROW assets.
- **Project Engineer, Sandra Marrero, EI, (210)837-5249** has over 8 years of experience evaluating pavement conditions, processing pavement ratings, preparing reports, and performing maintenance budget scenarios. Ms. Marrero will lead the pavement analysis team in the review of data.

Roadway Asset Services

G. SCOT GORDON, PE, IAM

PROJECT MANAGER, SENIOR PAVEMENT ENGINEER

Mr. Gordon serves as President and Lead Pavement Engineer at Roadway Asset Services. Mr. Gordon has 32 years of experience in transportation engineering, geotechnical engineering, and construction materials testing including pavement design and optimization for transportation networks. As a professional engineer, he has managed numerous projects such as design/build highway projects, airfield pavement, and other government projects. He is an expert in the design, evaluation, monitoring, and research of pavement as well as pavement rehabilitation and soil stabilization. Scot has completed numerous projects related to pavement management system implementation, pavement condition surveys, sign management surveys, sidewalk condition surveys, and road assessments utilizing LiDAR.

KEY PROJECTS

City of Rancho Palos Verdes, CA– Roadway Asset Management
Mr. Gordon served as the RAS Project Manager for the City of Rancho Palos Verdes' mobile data collection project for its 150 centerline mile network. The project consisted of utilizing RAC vehicles to provide a ROW asset inventory. The ROW Asset inventory included the following assets: curb and gutter, curb ramps, concrete medians, and guardrails.

City and County of Denver, CO– Pavement Condition Assessment
Mr. Gordon was a Project Manager for the automated data collection project of the City's 5,756 miles of roadways. The project assessed various City assets including 3,602 protective barriers, 11,979 pavement markings, 188,019 MUTCD signs and supports, and 3,488 miles of sidewalks. Following collection, PCI and IRI data were integrated into the City's GIS. The pavement data was configured and ingested in Deighton's dTIMS. The ROW assets were imported into **Cartegraph**.

City of Salt Lake City, UT– Pavement Condition Assessment
Mr. Gordon was the Project Manager for Salt Lake City's pavement condition assessment on 592 centerline miles of City-maintained roads, GIS based mapping, geodatabase design for import into **Cartegraph**, and long term pavement preservation plans utilizing historic and current analysis. The project also included budget analysis and maintenance optimization for the City's pavement network in support of the maintenance of these assets relative to the overall network.

Mesa County, CO- Pavement Data Collection
Mr. Gordon served as the Project Manager for the County's pavement condition survey of 698 centerline miles of roads. Mr. Gordon was responsible for assuring data collection by the RAC vehicles developed unique identifiers for each road segment so the County can maintain a persistent link to GIS data. Mr. Gordon selected pavement treatments based on PCI ratings and identified distress types. Pavement imagery and survey results were incorporated into the County's pavement management system, **Cartegraph**.

City of Albuquerque, NM- Asset Inventory and Pavement Condition Survey
Mr. Gordon served as the Project Manager for the City's pavement condition assessment on 4,548 lane miles and asset inventory on 2,614 miles of sidewalks, 13,731 sidewalk obstructions, 40,198 ramps, 113,673 traffic signs, 28,631 pavement markings, 2,495 miles of pavement striping, 438 miles of bike lanes, 3,337 miles of curb and gutter, 64 miles of guardrail, 1.45 square miles of streetscapes, 1,651 traffic calming devices, 34,531 control boxes/structures, 2,177 backflows, 18,554 storm inlets/drainage, 88,325 manholes, 554 bike lane hazards, & .73 square miles of medians.

Douglas County, CO- Pavement Condition Survey 2022
Mr. Gordon served as the Project Manager for this project which included automated data collection for pavement condition surveys per the ASTM D6433, budget analysis and maintenance optimization for the County's approximately 1,012-mile pavement network. Following collection and analysis, data was formatted into **Cartegraph**. Mr. Gordon prepared and presented pavement management repair recommendations and reports.

City of Kansas City, MO- Pavement Evaluation & ROW Survey
Mr. Gordon is serving as the Project Manager for the City's pavement condition assessment on 3,599 test miles of roadways. Roadway Asset Collection (RAC) vehicles are being utilized for pavement evaluation and ASTM D6433 PCI calculation. Following collection and analysis, RAS will provide the City with a **Cartegraph** import sheet for import into the City's current database. In addition, RAS is providing a Videologger for staff to virtually travel the roadways.

City of San Antonio, TX – Pavement Condition Index Modeling
Mr. Gordon served as the Project Manager for the evaluation of PCI rate deterioration between the 2019 PCI survey results within the **Cartegraph** database and 2022. The project consisted of providing deterioration models, recommending improvements for overall maintenance, and providing an average PCI per year per District. Mr. Gordon managed long-term pavement preservation strategies, pavement treatment, pavement modeling, pavement management system optimization, pavement maintenance prioritization, treatment implementation timelines, alternative pavement material recommendations, and budget optimization. Mr. Gordon evaluated PCI trigger levels in the decision tree to determine the effectiveness of each treatment for improved PCI values and life extension.

City of Corpus Christi, TX- Pavement Data Collection and Integration
Mr. Gordon served as the Project Manager for the City's pavement condition data and ROW asset inventory on 2,448 miles of roadways. In addition to the pavement scope, RAS assessed 1,555 miles of sidewalks, 1,525 miles of curb and gutter, 5,352 pavement markings, 896 miles of pavement striping, 51,872 traffic signs, and 18,009 ADA ramps. Following collection, pavement information was integrated into **Cartegraph**. Mr. Gordon was responsible for performing quality assurance checks to ensure distress interpretations from the RAC vehicle matched field validation results. He was also responsible for establishing monthly coordination meetings with City staff to update project timelines and present current results.

City of South Salt Lake, UT- Pavement Analysis
Mr. Gordon is serving as the Project Manager for the City's ASTM D6433 based pavement condition assessment on 80 test miles. RAC vehicles will be used to calculate PCI scores for import into **Cartegraph**. Following collection and analysis, RAS is creating a Pavement Master Plan to include maintenance rehabilitation options as well as budget scenarios. Mr. Gordon will conduct a field pilot study to validate PCI deduct points and ensure consistency with the City's interpretation of distresses.

Roadway Asset Services

ZAC THOMASON, MBA

ASSISTANT PROJECT MANAGER, SENIOR VICE PRESIDENT

Mr. Thomason brings over 17 years of dedicated pavement and asset management experience where his focus has been on the use of semi-automated and automated technologies for pavement distress surveys, enterprise software implementation, pavement preservation, budget modeling & forecasting, and multi-year rehabilitation plan development. In addition to pavements, Mr. Thomason has vast experience with Right of Way asset inventory development that ranges from roadside features such as signs & supports, sidewalks, pedestrian curb ramps, striping & markings, curb & gutter, guardrail, bike racks, and nearly any asset that can be seen in the right of way. He has also managed complex sidewalk and pedestrian curb ramp inventory assignments that have included off road vehicle data collection, advanced LiDAR surveys to acquire geometric measurements (ramp, landing, & flare), long-range project prioritization sequencing, and project planning.

FIRM

EXPERIENCE
17 years

EDUCATION
M.B.A., Business Administration, University of Phoenix, 2007
B.S., Global Business, Arizona State University, 2005

Municipal Leadership Experience in California & the Southwest: Long Beach, Pasadena, Fontana, Orange County, Imperial County, Carlsbad, La Mesa, Lancaster, San Luis Obispo, Coachella Valley Association of Governments (CVAG), & Modesto, CA; Yuma, Casa Grande, Marana, Pinal County, Glendale, Goodyear, Scottsdale, Gilbert, Prescott, Coconino County, & Bullhead City, AZ; Albuquerque, Roswell, Las Cruces, Los Alamos County, and Dona Ana County, NM.

PROJECT LEADERSHIP ROLES

City of Long Beach, CA– Pavement Condition Survey and Software Implementation
Mr. Thomason served as the Project Manager for the City's pavement condition survey on 1,000 test miles of roadways. The scope also included a full functional classification review to ensure each roadway was assigned an appropriate traffic range for use in eventual prioritization and assignment of degradation curves. The project also included structural subgrade testing using a Dynaflect device on 270 survey miles of arterial and collector roadways. The condition data was processed into a modified ASTM D6433 PCI score and reported on a district-by-district basis (9 districts). The arterial roadway network was run as a separate model to align with City funding structure and the residential roadways were run as a hybrid between independent district selection and "need" based funding. The results were aggregated to the network level such that the results of the network as a whole could be reported to the County. The condition data was loaded into Lucity.

City of Pasadena, CA– Pavement Condition Survey & Analysis
Mr. Thomason served as the Project Manager for the City's pavement condition assessment on 450 survey miles of roads. Surface distress data was collected using semi-automated laser based technologies following the ASTM D6433 protocols and subgrade condition data was collected via a Dynaflect device on 243 survey miles of arterial and collector roadways. A specialized Sidewalk Surface Tester was mobilized to survey pedestrian curb ramps and capture information such as ramp type, condition, slope (ramp/landing/flare), visual impairment facility presence/condition, and several other attributes. In addition, a series of right of way asset features were also inventoried which included the following: signs & supports, street furniture, street markings, curb markings, traffic signals, speed humps, guardrail, and roadside pedestrian fencing. The pavement inventory and condition data were loaded into Lucity.

Coachella Valley Association of Governments (CVAG) – Surface Condition Survey
Mr. Thomason served as the Assistant Project Manager for the Coachella Valley Association of Governments pavement condition update. Semi-automated data collection equipment was utilized to survey nearly 700 survey miles of arterial roadways for agencies such as Palm Desert, La Quinta, Indio, Indian Wells, Desert Hot Springs, Palm Springs, Rancho Mirage, Cathedral City, Coachella, and Riverside County. The data was collected following ASTM D6433 standards and a Pavement Condition Index (PCI) was calculated for each roadway. A full pavement analysis and modeling exercise was conducted to establish forecasted conditions at various levels of funding. The data was loaded to the PAVER software.

Pima County, AZ- Pavement Condition Index Services
Mr. Thomason served as the Project Manager for the automated data collection of 3,788 lane miles of roadways. A separate PCI was calculated for each StreetSaver management section, which totaled 6,510 sections. Final deliverables included a summary spreadsheet and PCI dataset comparing the PCI per the collected data and the PCI per the StreetSaver current PCI calculation.

City & County of Denver, CO– Pavement Condition Survey & dTIMS Format
Mr. Thomason served as the Assistant Project Manager for the automated data collection project of the City's 5,756 miles of roadways. The project assessed various City assets including 3,602 protective barriers, 11,979 pavement markings, 188,019 MUTCD signs and supports, and 3,488 miles of sidewalks. Following collection, PCI and IRI data were integrated into the City's GIS. The ROW assets were imported into **Cartegraph**. The pavement data was configured and ingested in Deighton's dTIMS. The distress data protocols were customized specifically for the City of Denver to ensure data collection matched the configuration of their Deighton dTIMS software. For example, longitudinal cracking was reported as "wheel path" and "non-wheel path" as set up in their system.

City of Virginia Beach, VA– Pavement Condition Assessment
Mr. Thomason served as the Assistant Project Manager for the City's pavement condition assessment on 2,327 test miles of roadways. The scope of services included pavement condition rating and assessment, pavement management repair recommendations, **Cartegraph** import and training, and collection of assets within the ROW including curb ramps and sidewalks.

Douglas County, CO- Pavement Condition Survey 2022
Mr. Thomason served as the Assistant Project Manager for this project which included automated data collection for pavement condition surveys per the ASTM D6433, budget analysis and maintenance optimization for the County's approximately 1,012-mile pavement network. Following collection and analysis, data was formatted into **Cartegraph**. Mr. Thomason assisted with pavement modeling and worked with County Staff to develop pavement management repair recommendations and reports.

Laramie County, WY- Pavement Condition Survey
Mr. Thomason is serving as the Assistant Project Manager for the County's automated pavement condition assessment on 266 test miles of roadways. RAC vehicles equipped with a LCMS-2 are being utilized to calculate ASTM D6433 PCI scores. Following pavement data collection, RAS is formatting the data for load into **Cartegraph**.

City of Kansas City, MO- Pavement Evaluation & ROW Survey
Mr. Gordon is serving as the Project Manager for the City's ASTM D6433 based pavement condition assessment on 3,599 test miles of roadways. Following collection and analysis, RAS will provide the City with a **Cartegraph** import sheet for import into the current database.

Roadway Asset Services

JEFF BOOTH, MBA
DIRECTOR OF DELIVERABLES

FIRM
Roadway Asset Services

EXPERIENCE
25 years

EDUCATION
B.S., Management/Computer Information Systems, Park University, 2001

M.B.A, Business Administration, Management and Operations, Webster University, 2003

Mr. Booth has 25 years of experience leading projects of all sizes in the Government Sector. With a career that consists of **serving as the Professional Services and Delivery Director at Cartegraph Systems**, serving as the Senior Information Technology Project Manager in the Bexar County Public Works department, and acting as the Project Manager/Delivery Director, Mr. Booth has a professional and customer-centric approach to every project.

KEY PROJECTS

City of San Antonio, TX– Sidewalk Condition Assessment
Mr. Booth is serving as the Director of Deliverables for the City's sidewalk condition assessment on 5,339 miles of sidewalks. RAS is utilizing its bikeRAC solution to continuously capture distress data that will be aggregated to a Sidewalk Condition Rating (SCR) score. The SCR is developed based on vertical discontinuity, horizontal discontinuity, obstructions, and cross slope violations. The City uses **Cartegraph** for asset management.

Bexar County, TX- Transition Plan for Pedestrian Facilities
During his time as the Senior IT Manager at Bexar County Public Works department, Mr. Booth was responsible for updating the transition plan for sidewalks/pedestrian facilities. The transition plan established a database of all pedestrian facilities in the unincorporated areas of Bexar County. Specifically, the study focused on inventorying names of street sections with pedestrian facilities, lengths of those facilities, obstructions and tripping hazards within those facilities, and developing a database of all pedestrian access points (curb ramps, etc) within those facilities.

City of San Antonio, TX- Asset Management System
While working at **Cartegraph OMS**, Mr. Booth served as the Project Manager and Executive Sponsor through the City of San Antonio's deployment of the street operations system and asset collection efforts.

City of Dacono, CO- Pavement Condition Assessment
Mr. Booth is serving as the Project Manager for the City's pavement condition assessment on 66 lane miles of roadways. In addition to a pavement evaluation, RAS is conducting a ROW asset assessment on traffic signs, sidewalks, and pedestrian curb ramps. Following collection and analysis, RAS is formatting data for import into **Cartegraph**.

City of Grapevine, TX- ROW Asset Inventory and Pavement Condition Assessment
Mr. Booth is serving as the Director of Deliverables for the City's ROW asset inventory and pavement condition assessment on 395 miles of roadways. RAS is collecting sidewalk data to include location, length, width, location in relation to curb and gutter, greenspace existence, and sidewalk condition to create a shape file for incorporation into the City's GIS system. RAS is also collecting sidewalk barrier free ramp data to include location, configuration, presence of truncated domes or other detectable warning features, and condition. Following collection, RAS is importing the data into **Cartegraph**.

Roadway Asset Services

BART WILLIAMSON, FCLS

PROJECT PRINCIPAL

Mr. Williamson brings over 30 years of management experience in a wide variety of projects and programs that include public works, insurance and transportation on a national level. He has developed an in-depth understanding of business processes and politics that are germane to governments. Mr. Williamson has assisted with asset management needs assessments, management of pavement condition surveys, and ROW collection projects.

FIRM
Roadway Asset Services

EXPERIENCE
32 years

EDUCATION
B.S., Business Marketing
Honors and Distinction
Indiana University, 1989

KEY PROJECTS

City of Rancho Palos Verdes, CA– Roadway Asset Management
Mr. Williamson served as the RAS Project Principal for the City of Rancho Palos Verdes' mobile data collection project for its 150 centerline mile network. The project consisted of utilizing RAC vehicles to provide a ROW asset inventory. The ROW Asset inventory included the following assets: curb and gutter, curb ramps, concrete medians, and guardrails.

Arizona Department of Transportation- Pavement Condition Survey
Mr. Williamson was RAS Project Principal for the Arizona Department of Transportation's pavement condition survey of 5,000 test miles. Automated data collection vehicles were utilized to provide pavement data and imagery in accordance with the HPMS guidelines. Mr. Williamson coordinated project needs and established channels of communication with the Department staff.

Coconino County, AZ- Pavement & Asset Management Services
Mr. Williamson was the Project Principal for the County's pavement condition assessment on 511 test miles of roadways. Automated data collection vehicles were utilized to collect pavement distress data for an ASTM D6433 compliant rating. Following collection and analysis, RAS loaded data into Lucity for pavement analysis and multi-year plan development.

City of Prescott, AZ- Pavement Condition Survey
Mr. Williamson is serving as the Project Principal for the City's pavement condition assessment on 458 test miles of roads. In addition to calculating a Pavement Condition Index (PCI), RAS is performing deflection testing utilizing a Falling Weight Deflectometer (FWD) on 189 test miles of roadways. A comprehensive ROW assessment is being conducted on signs, sidewalks, pedestrian curb ramps, curb and gutter, driveways, and guardrails. Following collection and analysis, data will be imported into Lucity for running budgetary models.

City of Albuquerque, NM– Pavement Condition Survey
Mr. Williamson served as the Project Principal for the City's pavement condition assessment on 4,548 lane miles and asset inventory on 2,614 miles of sidewalks, 13,731 sidewalk obstructions, 40,198 ramps, 113,673 traffic signs, 28,631 pavement markings, 2,495 miles of pavement striping, 438 miles of bike lanes, 3,337 miles of curb and gutter, 64 miles of guardrail, 1.45 square miles of streetscapes, 1,651 traffic calming devices, 34,531 control boxes/structures, 2,177 backflows, 18,554 storm inlets/drainage, 88,325 manholes, 554 bike lane hazards, & .73 square miles of medians. Mr. Williamson coordinated project needs and met with the City to understand goals for the project.

Sarasota County, FL- Pavement Condition Survey
Mr. Williamson served as the Project Principal for Sarasota County's 1,500 centerline miles of paved roads. The project included pavement data collection utilizing automated data collection vehicles, QA/QC checks to confirm accuracy of the AI processing routines, and data import into **Cartegraph**.

Anderson County, SC- Road Condition Survey
Mr. Williamson is serving as the Project Principal for Anderson County's pavement condition assessment on 1,785 test miles of roadways. Automated RAC vehicles are being used to collect pavement distress imagery for evaluation according to the ASTM D6433 definitions. Following data collection, RAS will format data for import into **Cartegraph** and will work with County staff to configure budget scenarios within Cartegraph Scenario Builder.

City of Salt Lake City, Utah – Pavement Condition Assessment
Mr. Williamson was the Project Principal for Salt Lake City's pavement condition assessment. The project included an automated pavement surface inventory and distress survey on approximately 592 centerline miles of City-maintained roadways, GIS based mapping, geodatabase design, implementation for an import into the City's **Cartegraph** pavement management system, and long term pavement preservation plans utilizing historic and current analysis. The project also included data and budget analysis and maintenance optimization for the City's pavement network in support of the maintenance of these assets relative to the overall transportation network.

Bexar County, TX– Pavement and ROW Asset Management
Mr. Williamson was the Project Manager of four automated data collection projects for Bexar County. The projects consisted of collecting roadway asset data related to the County's pavement network and traffic infrastructure including 30,837 traffic signs, sidewalks, pavement markings, and guardrails. The network was collected utilizing an automated data collection vehicle to capture street level imagery for use in pavement and asset extraction. The image database was comprised of industry standard JPEGs, with geo-referenced information being delivered via an Esri geodatabase and linked to **Cartegraph**.

Town of Frederick, CO- Pavement Condition Survey
Mr. Williamson is serving as the Project Principal for the Town's pavement condition assessment on 130 test miles of roadways. RAC vehicles are utilized to collect pavement distress imagery for ASTM D6433 PCI processing. Following collection and data analysis, RAS will format the data for import into **Cartegraph**.

Laramie County, WY- Pavement Condition Survey
Mr. Williamson is serving as the Project Principal for the County's automated pavement condition assessment on 266 test miles of roadways. RAC vehicles equipped with a LCMS-2 are being utilized to calculate ASTM D6433 PCI scores. Following pavement data collection, RAS is formatting the data for load into **Cartegraph**. Mr. Williamson is responsible for project coordination, scope development, and RAC van mobilization.

City of Corpus Christi, TX- Pavement Data Collection and Integration
Mr. Williamson served as the Project Principal for the City's pavement condition data and ROW asset inventory on 2,448 miles of roadways. In addition to the pavement scope, RAS assessed 1,555 miles of sidewalks, 1,525 miles of curb and gutter, 5,352 pavement markings, 896 miles of pavement striping, 51,872 traffic signs, and 18,009 ADA ramps. Following collection, pavement information was integrated into **Cartegraph**.

DAN WHITE, MBA

CLIENT SERVICES MANAGER

Mr. White has been at the helm of over 150 right-of-way asset inventories and pavement management projects ranging from small cities to large government municipalities. With a career focused in project management and client relationship development, he understands the nuances of muncipal client project administration for consulting services. Mr. White has spent the last 12 years dedicated to the field of professional engineering services, specializing in asset management, and pavement data collection technologies.

FIRM

KEY PROJECTS

City of Conroe, TX- Pavement Data Collection and Extraction Services
Mr. White is serving as the Client Services Manager for the City of Conroe's pavement data collection on 475 centerline miles of roadways. Automated Roadway Asset Collection (RAC) vehicles are being utilized to collect 2D/3D pavement imagery used for pavement distress rating according to the ASTM D6433. Following collection, RAS will integrate data with the City's existing ArcGIS system and deliver a **Cartegraph** import data sheet. Mr. White assisted in the kick-off meeting and led final scope negotiations with City Staff.

City of Denver, CO –Pavement Condition Assessment and Asset Inventory
Mr. White served as the Client Services Manager for the automated data collection project of the City's 5,756 miles of roadways. The project analyzed various City assets including 3,602 protective barriers, 11,979 pavement markings, 118,019 MUTCD specialty signs and supports, and 3,488 miles of sidewalks. Following collection, PCI and IRI data were implemented into the City's GIS. The pavement data was configured and ingested in Deighton's dTIMS. The ROW assets were imported into **Cartegraph.**

City of Las Cruces, NM- Pavement Condition Survey
Mr. White is serving as the Client Services Manager for the City's pavement condition assessment on 658 test miles of roadways. In addition to the base pavement scope, RAS is conducting a ROW asset inventory on pavement striping, pavement markings, bike lanes, and traffic signs and supports. RAS will load the data into the City's existing Lucity software and perform pavement analysis including running budgetary models and updating supersegments.

Anderson County, SC- Road Condition Survey
Mr. White is serving as the Client Services Manager for Anderson County's pavement condition assessment on 1,785 test miles of roadways. Automated RAC vehicles are being used to collect pavement distress imagery for evaluation according to the ASTM D6433 definitions. Following data collection, RAS will format data for import into **Cartegraph** and will work with County staff to configure budget scenarios within Cartegraph Scenario Builder.

Town of Gilbert, AZ- 2024 Pavement Rating Services
Mr. White is serving as the Client Services Manager for the Town's pavement condition assessment on 550 test miles of roadways. In addition to PCI rating, RAS is conducting Falling Weight Deflectometer (FWD) testing on 125 test miles of roadways. Following collection and analysis, RAS will import data into Lucity for multi-year plan development.

Mr. Kramer serves as the Chief Data Officer at Roadway Asset Services. Mr. Kramer has 26 years of experience in engineering and information technology projects including pavement condition, sign inventory, and sidewalk condition surveys. He is an expert in commercial off the shelf software, data management, data analysis, and delivery of technology projects. The following is a brief list of projects he has managed.

PAVEMENT AND ASSET PROJECT EXPERIENCE

City of Long Beach, CA– Pavement Condition Survey

Mr. Kramer served as the QA/QC Manager for the City's pavement condition survey on 1,000 test miles of roadways. The scope also included a full functional classification review to ensure each roadway was assigned an appropriate traffic range for use in eventual prioritization and assignment of degradation curves. The project also included structural subgrade testing using a Dynaflect device on 270 survey miles of arterial and collector roadways. The condition data was processed into a modified ASTM D6433 PCI score and reported on a district-by-district basis (9 districts). The arterial roadway network was run as a separate model to align with City funding structure and the residential roadways were run as a hybrid between independent district selection and "need" based funding. The results were aggregated to the network level such that the results of the network as a whole could be reported to the County. The condition data was loaded into Lucity.

City of Pasadena, CA– Pavement Condition Survey & Analysis

Mr. Kramer served as the Project Manager for the City's pavement condition assessment on 450 survey miles of roads. Surface distress data was collected using semi-automated laser based technologies following the ASTM D6433 protocols and subgrade condition data was collected via a Dynaflect device on 243 survey miles of arterial and collector roadways. A specialized Sidewalk Surface Tester was mobilized to survey pedestrian curb ramps and capture information such as ramp type, condition, slope (ramp/landing/flare), visual impairment facility presence/condition, and several other attributes. In addition, a series of right of way asset features were also inventoried which included the following: signs & supports, street furniture, street markings, curb markings, traffic signals, speed humps, guardrail, and roadside pedestrian fencing. The pavement inventory and condition data were loaded into Lucity.

City of Kansas City, MO- Pavement Evaluation & ROW Survey

Mr. Kramer is serving as the QA/QC Manager for the City's pavement condition assessment on 3,599 test miles of roadways. Roadway Asset Collection (RAC) vehicles are being utilized for pavement evaluation and ASTM D6433 PCI calculation. Following collection and analysis, RAS will provide the City with a **Cartegraph** import sheet for import into the City's current database. In addition, RAS is providing a Videologger for staff to virtually travel the roadways.

Roadway Asset Services

RAFAEL RIVERA
DATA COLLECTION MANAGER

Mr. Rivera has over 12 years of experience in automated data collection of pavement and ROW asset inventories. Mr. Rivera has been involved with collection and management of over 100,000 miles of roadways. Mr. Rivera's positions have included automated data collection vehicle operator, pavement analyst, LiDAR analyst, and GIS analyst.

FIRM
Roadway Asset Services

EXPERIENCE
14 years

EDUCATION
B.S., Mechanical Engineering, University of Central Florida, 2011
B.S., Aerospace Engineering, University of Central Florida, 2016

KEY PROJECTS

City of Rancho Palos Verdes, CA– Roadway Asset Management
Mr. Rivera served as the Data Collection Manager for the City of Rancho Palos Verdes' mobile data collection project for its 150 centerline mile network. The project consisted of utilizing RAC vehicles to provide a ROW asset inventory. The ROW Asset inventory included the following assets: curb and gutter, curb ramps, concrete medians, and guardrails.

City of Salt Lake City, UT– Pavement Condition Assessment
Mr. Rivera was the Data Collection Manager for the City's automated pavement surface inventory and distress survey on approximately 592 centerline miles. Final deliverables consisted of PCI values, GIS based mapping, geodatabase design, import into **Cartegraph**, data and budget analysis, maintenance optimization, and pavement preservation plans with an examination of historic and current analysis. Mr. Rivera provided route tracking for field operation crew and ensured 100% of the network was collected.

Arizona Department of Transportation- City of Buckeye- Sign Data Collection
Mr. Rivera was the Data Collection Manager for the collection of a road sign inventory and visual nighttime retroreflectivity inspection of all road signs located within the LPA jurisdictional boundaries. The daytime inventory and condition assessment of the City's 1,850 test miles of roadway was collected via automated data collection vehicles. The retroreflectivity assessment was conducted using an FHWA approved nighttime visual assessment methodology.

City of Denver, CO– Pavement Condition Assessment
Mr. Rivera served as the Data Collection Manager for the automated data collection project of the City's 5,756 miles of roadways. The project analyzed various City assets including protective barriers, pavement markings, MUTCD specialty signs, sign support, sidewalks, and sidewalk obstructions. Following collection, PCI and IRI data were implemented into the City's GIS. The ROW assets are being imported into **Cartegraph.**

Pima County, AZ- Pavement Condition Survey
Mr. Rivera was the Data Collection Manager for Pima County's pavement data collection on 2,248 test miles of roadways. RAC vehicles were utilized to collect pavement condition imagery for automated crack detection and PCI rating. The project was completed within a strict 3-month timeline to meet the County's reporting goals. Mr. Rivera was responsible for providing route tracking to RAC vehicle operators and ensuring automated data collection equipment was functioning properly.

C. Stephen Bucknam, Jr., P.E.
StreetSaver Supervisor

Mr. Bucknam has over forty years of experience in the administration, management, planning, design and construction management of public works, and development programs and projects including: pavement management programs, transportation, street, highway, alley, project management, capital improvement programming and budgeting, and council presentation. Mr. Bucknam previously served as Contract City Engineer for the City of Arcadia responsible for long range advanced planning of the City's transportation engineering program. Directed the preparation of the City's Transportation Master Plan which identified, consistent with the City's General Plan the transportation related needs under these requirements so of AB 1600 nexus constraints.

StreetSaver Coordinator

Peter Bucknam is an expert in infrastructure project management, pavement management-training, planning, resource management, implementation and program management. Mr. Bucknam has managed a wide range of Pavement Management infrastructure project tasks including the collection and input of PMP - ROW conditional survey data, preparation of Public Works capital improvement program projections and reports, infrastructure/software needs assessments, GIS/GPS data collection, data conversion and quality control. Mr. Bucknam has performed infrastructure management services for over 70+ agencies and has personally served as project manager for 750+ PMP projects.

Roadway Asset Services

SANDRA MARRERO, E.I.

PROJECT ENGINEER

FIRM
Roadway Asset Services

EXPERIENCE
10 years

EDUCATION
B.S., Civil Engineering, University of Puerto Rico, 2013

REGISTRATIONS
-FL Engineer Intern, Certificate Number:1100023293

Ms. Marrero works on the firm's roadway asset collection projects with a pavement analysis component. Sandra has over ten years of experience evaluating pavement conditions, processing pavement ratings, preparing reports, performing maintenance budget scenarios, reporting the results of project finding in meetings, and discussing with the Client. Her software experience includes **Cartegraph**, Streetlogix, PAVER, VUEWorks, ArcGIS, AutoCAD, and Civil 3D.

KEY PROJECTS

City of Kingsport, TN – Pavement Condition Survey
Ms. Marrero served as a Project Engineer for the City's Pavement Condition Survey which included network database development, automated field surveys, budget analysis, and maintenance optimization for the City's approximately 400 centerline-mile pavement network. This project also included training of the City's engineering and field staff, the development of repair and rehabilitation scenarios, and the creation of budgeting decision trees to assist in optimization. Additionally, the data was imported into **Cartegraph.**

City of New Braunfels, TX– Pavement Data Collection
Ms. Marrero served as a Project Engineer for the City's pavement condition survey of its more than 469 test miles of roadways. Pavement data was collected utilizing an RAC vehicle that captures images for all pavement and ROW assets. Following collection, PCI survey results were analyzed utilizing RAS' Road TRIP software to identify distresses. Pavement imagery and data was integrated into **Cartegraph**.

City of Salt Lake City, UT– Pavement Condition Assessment
Ms. Marrero served as a Project Engineer for the automated pavement condition survey on 592 centerline miles of roadways. The project included PCI scores, GIS based mapping, geodatabase design and implementation for an import into **Cartegraph**, pavement preservation plans with respect to the historic and current analysis, and data and budget analysis. Ms. Marrero performed a PCI review and assisted in the preparation of the pavement final report/executive summary.

City of Albuquerque, NM– Pavement Condition Survey
Ms. Marrero served as a Project Engineer for the mobile image data collection project of the City's 4,548 lane mile network. RAC vehicles were utilized, in accordance with the ASTM D6433, to provide the City with a PCI value for each street segment and the overall PCI value for the network. The project also included an extensive ROW asset inventory on 2,614 miles of sidewalks, 13,731 sidewalk obstructions, 40,198 ramps, 113,673 traffic signs, 28,631 pavement markings, 2,495 miles of pavement striping, 438 miles of bike lanes, 3,337 miles of curb and gutter, 64 miles of guardrail, 1.45 square miles of streetscapes, 1,651 traffic calming devices, 34,531 control boxes/structures, 2,177 backflows, 18,554 storm inlets/drainage, 88,325 manholes, 554 bike lane hazards, & .73 square miles of medians. Ms. Marrero assisted with data integration in the City's pavement management software, VUEWorks.

Experience and References

E. Experience and References

Roadway Asset Services, LLC (RAS) is an Engineering Firm (License #: F-22104) headquartered in Austin, TX. As a pavement and asset management consulting firm, RAS specializes in automated pavement inspections, field pilot validations, AI processing supplemented with manual pavement engineer QC, ROW imagery capture, pavement analysis optimization, asset extraction, image viewer software, Cartegraph inspection imports, and consulting services to transportation agencies and municipalities across the U.S. RAS offers comprehensive experience and subject matter expertise in the fields of engineering, surveying, asset management, transportation planning, and GIS. **RAS was founded on the core principles of collaborating with our clients, cultivating those relationships, and embracing innovation in technology resources.** RAS Team Members strive to provide accurate data-driven results that allow our clients to make the best possible management decisions while enjoying the passion we all share in improving infrastructure. Within the past 4 years, **RAS has obtained over 100 contracts from transportation agencies for pavement condition surveys, ROW asset inventories, and data analysis which translates to approximately 75,000 miles of roadways processed, QC validated, and analyzed. In addition, the RAS executive team brings a combined 150 years of experience in pavement condition survey management.** Throughout their careers, the RAS leadership team has been involved in pavement condition and ROW asset surveys for agencies of similar size across the country including:

Rancho Palos Verdes, CA	Long Beach, CA	Pasadena, CA
Oceanside, CA	Albuquerque, NM	Pima County, AZ
Prescott, AZ	Gilbert, AZ	Coconino County, AZ
Salt Lake City, UT	West Jordan, UT	South Salt Lake, UT
Denver, CO	Grand Junction, CO	Mesa County, CO

As a local subconsultant to the team, Bucknam Infrastructure Group will assist the RAS team by conducting a 3rd party field pilot verification (10-mile pilot) and local project management coordination of resources. **The Bucknam team is located in Southern California and is composed of registered civil engineers, former Director of Public Works, City Engineers, and maintenance specialists who will implement solutions based on specific infrastructure needs**. RAS and Bucknam Infrastructure Group represent a powerhouse of pavement management expertise when combined as a unified team and have previously worked together on Pavement Condition Assessments for Rancho Palos Verdes and Pomona. **Bucknam Infrastructure Group has assisted more than 70 Southern California local agencies in Pavement Management Programs**. A sample of these clients is listed below and throughout this proposal:

Ontario	Monrovia	Laguna Hills
Rancho Palos Verdes	Fullerton	El Segundo
Redlands	Pomona	Laguna Beach
Lomita	Huntington Beach	Orange

The RAS team offers the City of Banning unmatched subject matter expertise and knowledge ranging from managing and delivering municipal automated pavement data collection projects, to pavement engineering and configuration of the analysis operating parameters of the City's Cartegraph OMS asset management system. Our team is uniquely qualified to exceed the requirements of this project through the use of advanced data collection technology, Artificial Intelligence (AI) processing routines, and rigorous hands-on Quality Control (QC) by an experienced pavement engineering team. RAS is a **Strategic Business Partner with Cartegraph**, which enables the leadership team to have a complete understanding of the **Cartegraph OMS pavement management modules.** The RAS team are experts in the import of new pavement inspection data into Cartegraph without losing any historical data. RAS does not overwrite any legacy data in the Cartegraph OMS system, we simply add a new inspection to avoid losing system integrity. Throughout their careers, the RAS leadership team has managed Cartegraph implementations or conversions with other Cities and Counties, including:

- Virginia Beach, VA
- San Antonio, TX
- Anderson County, SC
- Corpus Christi, TX
- Kingsport, TN
- Denton, TX
- Okaloosa County, FL
- Salt Lake City, UT
- Sarasota County, FL
- Denver, CO
- South Salt Lake, UT
- New Braunfels, TX
- Collier County, FL
- Kansas City, MO
- Cheyenne, WY
- Laramie County, WY
- Mesa County, CO
- Douglas County, CO

The RAS key personnel's combined experience exceeds 150 years in asset and pavement management. While RAS has only been registered since July 2020, the following lists RAS key personnel's experience within the industry.

RAS Staff	Title & Project Role	Years in Industry
Bart Williamson, FCLS	CEO & Principal-in-Charge	18 Years
Scot Gordon, PE, IAM	President & Principal Engineer	32 Years
Mark Kramer, PE, MBA	Chief Data Officer & QA Manager	26 Years
Rafael Rivera	Chief Technical Officer & Field Manager	13 Years
Zac Thomason, MBA	Sr. VP, Business and Client Services	18 Years

RAS is a limited liability company with strong internal controls and conservative business practices for continued financial growth. RAS has never filed for bankruptcy and has attached the following 3 years of financial statements to demonstrate stability and excellence in the industry.

Pavement Condition Survey	$ 207,694.00	266	Laramie County, WY	X	X	X	X	X	X	X	X	X

City of Salt Lake City, UT- Pavement Condition Survey

RAS performed the 2021 pavement condition survey for Salt Lake City's 730 test mile network. RAS completed the ASTM D6433 based survey using its fleet of RAC vehicles. RAS provided GIS based deliverables and formatted the data for import into **Cartegraph**. RAS performed a pilot study, provided a final report, produced a Videologger, and assisted City staff in presenting data to City Council regarding various funding amounts and strategies for improving the City's PCI and its level of service.

RAS produced a videologger for the City to take a virtual drive down a roadway for a snapshot of pavement and ROW conditions. The videologger provides the client with access to ROW and pavement imagery in an organized manner to quickly make informed decisions on conditions within various areas of the City's network without having to leave the office.

The evaluation project also included a technical report presenting the predominate distresses and statistical analysis of the condition results and repair recommendations. The report provided results based upon surface type and division of functional classification for all roadways. The results were used to develop a more cost-effective approach to maintenance, improving the City's preservation techniques and optimizing budgetary expenditures.

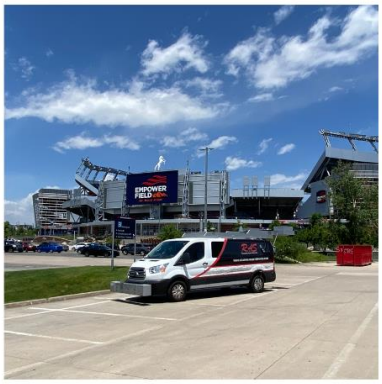
Letter of Recommendation for Roadway Asset Services (RAS)

To Whom It May Concern,

In 2021, RAS was chosen from a list of highly competitive Pavement Asset Surveyors and Management Professionals to provide services to Salt Lake City Engineering. During the past nine months, we have worked with RAS to update our current pavement condition survey for the City's 575 centerline miles of roadway. We had prior experience with the executive management team of RAS preparing a previous pavement condition survey and trusted them to help us with this update. Bart Williamson and Scot Gordon have been instrumental providing meaningful data to refresh SLC's overall pavement condition ratings and deterioration modeling for the City.

The City's pavement assets were collected throughout the years using various older collection techniques and methodologies adhering to the standard ASTM D6433. Scot Gordon helped us understand the transition from our older survey sections to the latest LCMS technology and rating program. These cutting-edge techniques allow for 100 percent analysis of the evaluated lanes. Scot took the time to visit during our pilot evaluation stage and walked the streets with our staff. He carefully explained how the rating and deduct values vary with the specific distress types. Scot's unique understanding of distress conditions and the relationships to the various soil types, along with the weather conditions, in the Salt Lake City area has been invaluable. He explained these relationships and the underlying causes including potential damage from each distress type.

In addition, Scot worked with our staff to identify rating scores based upon the pavement type, the asset condition, and the recommended maintenance improvements. He also helped us refine our deterioration curves to better model our future pavement performance. This understanding of our unique pavement environment along with his guidance has provided our staff with valuable tools to improve our roadway network and management system.



Based on my involvement and working relationship with the staff at RAS, I would highly recommend RAS for any City or County pavement condition assessment or ROW asset management project. RAS has proven to be flexible, knowledgeable, and honest with our team. They have provided valuable tools which enhance Salt Lake City's pavement management system and improved the accuracy of our infrastructure data. We look forward to working with RAS on future projects and thank them again for the commitment to the Salt Lake City asset management endeavors. Please feel free to contact me if you have further questions.

Sincerely,

David Jones David Jones
Public Way Coordination Program Manager - Engineering Division

DEPARTMENT *of* PUBLIC SERVICES

SALT LAKE CITY CORPORATION

City & County of Denver, CO- Pavement Condition Assessment & Asset Inventory

RAS conducted an Asset Inventory for the City and County of Denver that consisted of a pavement condition and ROW assessment on 3,086 test miles of roadways. Pavement distress imagery was collected using Roadway Asset Collection (RAC) vehicles. In addition to the pavement condition assessment, RAS completed a ROW asset inventory on 3,602 protective barriers (guardrail, bollard, jersey barrier), 11,979 pavement markings (linear, specialized, etc), 188,019 MUTCD signs and sign supports,1,740 miles of striping, and 3,488 miles of sidewalks.

RAS provided the City and County with street level 360 imagery of assets for all roads within the City limit. RAS utilized the Ladybug 360 camera to extrapolate MUTCD sign data per the identified schema. Delivery of ROW data was in an ESRI Geodatabase and formatted for import into the City's asset management software, **Cartegraph**. The pavement condition data was imported into Deighton dTIMS.

RAS provided DOTI with a summary report detailing findings and conclusions. The report included statistical charts, graphs, and area mas illustrating all PCI results. The report was delivered in Microsoft Word (.doc and.docx) and Adobe (.pdf) formats.

RAS Role: RAS served as the Prime Consultant

January 9th, 2024

Letter of Recommendation for Roadway Asset Services (RAS)

To Whom It May Concern,

RAS provided professional services for the City and County of Denver to complete a comprehensive ROW asset inventory and pavement condition assessment. The scope of work included an inventory and assessment on 3,488 linear miles of sidewalks, 20,687 pavement markings, 3,642 protective barriers, 213,439 MUTCD signs, 117,242 sign supports, 1,789 miles of striping, 380 linear miles of bike lanes, and nearly 2,000 centerline miles of roadway inspections. All ROW asset data was delivered in an ESRI Geodatabase and captured specific attributes to align with the City's existing Cartegraph database schema for implantation into the OMS software.

To meet the specific needs of the Department of Transportation and Infrastructure (DOTI), RAS conducted a parcel-based sidewalk inventory and assessment to ensure the data capture was granular enough for the City's use. The RAS team developed the sidewalk feature class such that there was a unique ID for each sidewalk parcel and that each parcel was related to the pavement segment ID. In addition, the RAS team extracted the following attribution from the sidewalk imagery (FacilityID, MasterID, UniqueID (Sidewalk ParcelID), X/Y start and end points, sidewalk type (present or missing), street name, surface type, detached (yes or now), condition, length, width, and the image path). DOTI intends to use the parcel level sidewalk inspection data to assist in further sidewalk analysis to acquire the necessary funding to begin mitigating sidewalk deficiencies on a parcel-by-parcel basis. In addition, this inventory will service as the foundation for future ADA transition planning endeavors.

The RAS team also conducted a pavement condition assessment on 3,086 test miles of roadways using a modified ASTM D6433 evaluation criteria. The Pavement Condition Index (PCI) score that is calculated by the DOTI pavement management program is utilized to assist the department in allocating resources and prioritizing the multi-year planning effort.

Based on my involvement and working relationship with the staff at RAS, I would highly recommend the RAS team for any City or County asset management project. They have proven to be an invaluable consulting partner in the City and County of Denver's asset management system and are clearly dedicated to the accuracy of our infrastructure data. We look forward to working with RAS on future projects and thank them again for their commitment to our asset management endeavors.

Sincerely,

Jason Smiley

RAS Role: RAS served as the Prime Consultant

City of Albuquerque, NM- Pavement Condition Survey and ROW Asset Inventory

RAS completed a pavement condition survey for the City's 4,548 lane mile network of roadways and alleys. The RAC vehicle drove all roads in both directions to provide the most expansive collection for the City. Additionally, RAS completed an extensive ROW inventory on the following assets for the City: **113,673 traffic signs, 28,631 pavement markings, 2,495 miles of pavement striping, 2,614 miles of sidewalks, 40,198 ramps, 438 miles of bike lanes, 3,337 miles of curb and gutter, 64 miles of guardrail, 1.45 square miles of streetscapes, 1,651 traffic calming devices, 34,531 control boxes, 2,177 backflows, 18,554 storm inlets, 13,731 sidewalk hazards, 88,325 manholes, 554 bike lane hazards, 13,731 sidewalk hazards, .73 square miles of medians.** All GIS based deliverables were imported into VUEWorks.

For the traffic sign inventory, RAS extracted the following attributes: Asset ID, X,Y location, MUTCD code, sign text, photo image link, physical condition rating (good, fair, poor), location, post total, sign facing direction, travel direction, obstructions, legend color, back color, hump case, and support structure type.

A unique service RAS completed for the City is polygon mapping of all areas of City maintained roads. Polygon mapping divides intersections as a separate area of consideration based on the increased flow of traffic. This allows the City to order precise amounts of materials when developing specific projects.

May 5, 2022

Letter of Recommendation for Roadway Asset Services (RAS)

To Whom It May Concern,

RAS completed a Citywide inventory of our pedestrian access throughout the City of Albuquerque by completing an inventory and condition assessment of the City's sidewalks, sidewalk obstructions which were geopoint located, ADA ramps and driveways that form the basis of our pedestrian network. The sidewalk inventory conducted by RAS allowed the City to begin tracking its needs related to pedestrian accessibility throughout the City.

For this project, RAS inventoried 2,614 linear miles of sidewalk throughout the City of Albuquerque. The project began with an initial data set that was delivered to the City for acceptance and feedback prior to performing the Citywide assessment. Additionally, the inventory included a curb ramp assessment of 40,198 ramps which were located and assessed within the City. All deliverables for the sidewalk and ADA ramp inventory were provided in City defined segments as GIS based deliverables as well as imported into the City's enterprise asset management software solution, VUEWorks. As a part of the pedestrian access project for the City, RAS also conducted an inventory and review of over 400 miles of bike lanes.

I have also worked with the executive management team of RAS during previous asset management endeavors for the City's ROW inventory and pavement management program updates. The Executive Leadership Team of Bart Williamson, Scot Gordon, and Rafael Rivera have been critical in working with the City in providing meaningful data to move forward with our asset management program and deterioration modeling to determining funding and management needs.

In addition to the sidewalk and ADA ramp assessment, the RAS Team has worked with the City to inventory and assess other Right-of-Way assets including a detailed traffic sign inventory and condition assessment on over 113,000 signs throughout the City. The latest Traffic Sign Inventory provided a gap analysis review of signage that had been added since the previous inventory. The updated database is being managed in both GIS and VUEWorks.

Based on my involvement and working relationship with Bart Williamson, Scot Gordon, and Rafael Rivera I would highly recommend RAS for any City or County considering a sidewalk inventory and condition assessment. They have improved the City of Albuquerque's asset management system and the accuracy of our infrastructure data. We look forward to working with RAS on future projects and thank them again for their commitment to the City of Albuquerque.

Sincerely,

Doug Rizor
Retired-Systems Program Manager II (Retired as of 6/1/2022)
505-321-8145
Rizor.d.abq@gmail.com

Dear Members of the Selection Committee,

As an enterprise software solutions company who works with over 900 municipal agencies across the Country, we are dedicated to developing best-in-class CMMS software solutions that government agencies can leverage to harness data gathered by Public Works and Engineering departments. There is a very close relationship between software and the data it houses as both require the other to get the most out of each. To this end, Opengov / Cartegraph prides itself in developing a team of partners who can assist in the implementation of Cartegraph across the Country.

Roadway Asset Services, LLC (RAS), is a full-service asset management consulting firm that Cartegraph fully supports and often recommends for the acquisition of powerful data such as objective pavement condition data using automated technologies and right of way asset inventories that are developed in a spatial environment. RAS' services often expand beyond the field of data collection and commonly migrate the production load of their collected data into the OMS platform. In addition, as Subject Matter Experts in the field of pavement management, RAS commonly assists agencies in the configuration of the Scenario Builder operating parameters to ensure the analysis results are in alignment with each agency's real world activities and priorities.

RAS is actively working with 10 municipal agencies who utilize the OpenGov / Cartegraph OMS software and this does not account for any contracts that they successfully closed out at the time of this writing. These are simply active contracts that they are working on today that are dedicated to the Opengov / Cartegraph OMS system.

OpenGov / Cartegraph fully supports the RAS team in this proposal effort and would recommend their services as a means to acquire highly objective data and additional 3rd party Cartegraph configuration expertise. If any questions arise as a result of this letter of support, please do not hesitate to reach out for any additional clarification.

Thank you,

Chloe Cowart
OpenGov, Account Executive
ccowart@opengov.com

(816) 716-8335

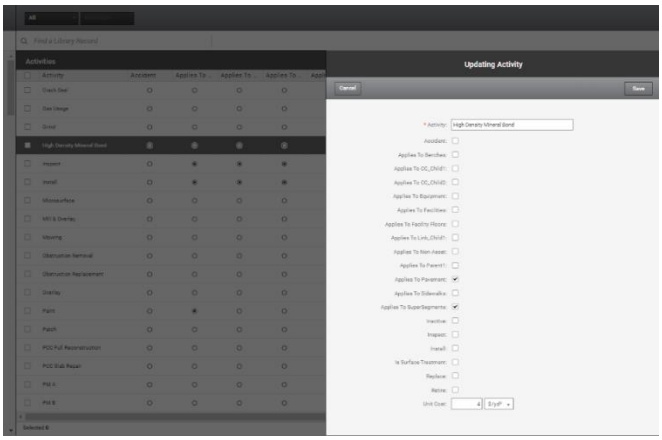
Value Added Services

Value Added Services

Optional Services: Council Presentation (Included with Base Scope of Work)

The RAS team can provide a Client Presentation that includes data, charts, and all final summary report data to showcase the results of the pavement condition survey. Our Leadership Team has extensive experience preparing and presenting results of pavement and asset condition assessments, as well as pavement budget scenarios and maintenance plans to elected officials and constituents.

The Client Presentations are a standard scope that we provide to all our asset management clients. Our team has worked with City Councils with several agencies including San Antonio, TX; Corpus Christi, TX; Durham, NC; Pitkin County, CO; Indianapolis, IN; Rowlett, TX; and Laredo, TX to name a few.

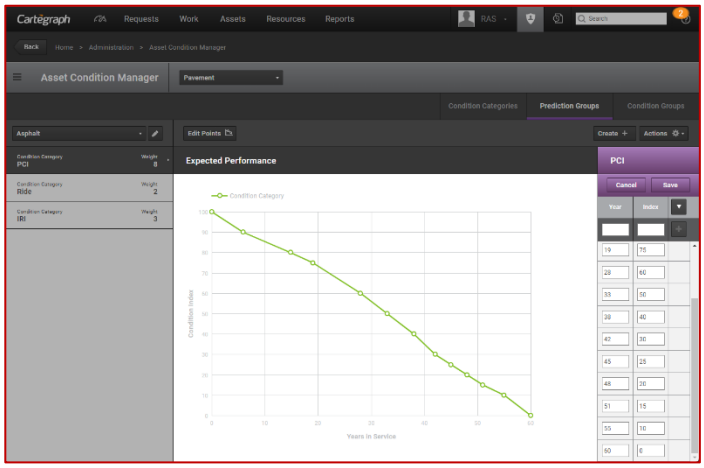


Optional Service: Cartegraph OMS Configuration & Pavement Analysis (Additional Fee)

Scenario Builder Configuration and Optimization for Pavement Management

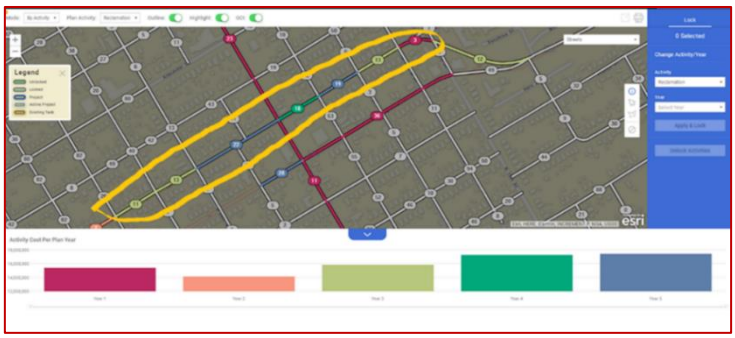
While running the Scenario Builder models themselves might seem straight-forward, the RAS approach to such an analysis involves the following sequences and client engagements during the process in an effort to configure the parameters that serve as the intelligence within Scenario Builder:

- **Current database review** – most issues can be resolved at the initiation of a project by completing a brief review of the City's existing GIS and Cartegraph OMS setup. All RAS projects begin with a review by our Project Manager. Any recommended changes to the segmentation or budgetary model configuration will be discussed during this stage. The benefit of the RAS team in this stage is in their intimate knowledge of Cartegraph OMS configuration, including areas of recommended improvement.



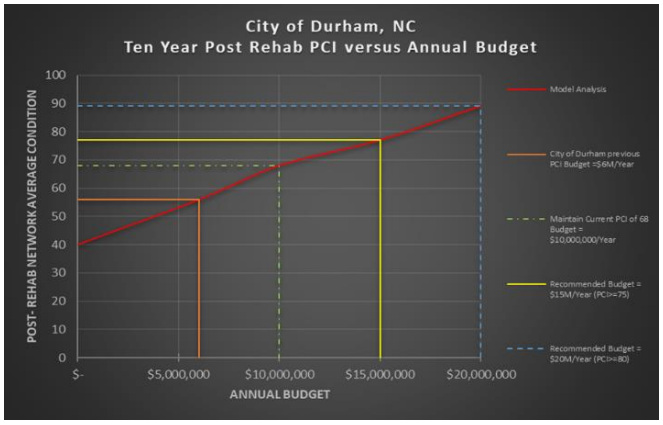
- **Maintenance & Rehabilitation Setup** – to ensure the results of the budget model runs meet the City's expectations, Scot Gordon will discuss the City's current Maintenance and Rehabilitation setup within the Cartegraph OMS system under the "**Protocol Library**". As a Professional Engineer with extensive pavement experience, Scot is well versed with the application of pavement rehabilitation techniques, trigger points, real-world impact to OCI, and life cycles. As a part of this process, RAS will work with the City to determine the right treatment (prescription) at the right time. As completed with many agencies across the Country, RAS will work with City staff to review the existing pavement rehabilitation model parameters that are currently setup within the Scenario

Builder Protocol Library. These parameters will be updated based on actual City expenditures for each activity and real world life cycle estimates that relate to OCI impact. This includes reviewing Min/Max PCI, Breakpoint PCI, decision trees for treatments (using the advanced filter text in the Protocol Library), costs, and OCI impact values.



RAS can also discuss other treatments that the City may or may not be using, their benefits, their return on investment, and their adoption across the Country. The results of the scenarios would include investment benefit information indicating the cost per square foot of benefit for each maintenance strategy based on maintenance rehabilitation costs. This can be reported in a number of ways, but commonly as the cost per sqft to increase the PCI by increments of 1 point.

- **Deterioration Curves** – forecasting pavement conditions within Cartegraph requires a detailed set of pavement deterioration curves for each roadway traffic classification, pavement material type, etc. as designated by the City. Scot will review the existing OMS "**Prediction Groups**" to ensure there is enough granularity within the functional classes, pavement types, and that the deterioration curves assigned to each Prediction Group reflects realistic degradation rates in the City. If alterations to the curves are necessary, Scot will lead the update with the City and RAS team. Scenario Builder will pull the data configurations used in the Prediction Groups and Protocol Library to create clear, accurate predictions on everything from OCI gains to budget impacts over time. Scot Gordon and the RAS team have developed hundreds of deterioration curves based on collected data. Scot will work with the historical data, along with the collected data from this project, to develop updated and further refined deterioration curves for each combination of street classification and pavement surface type, representative of the climate.



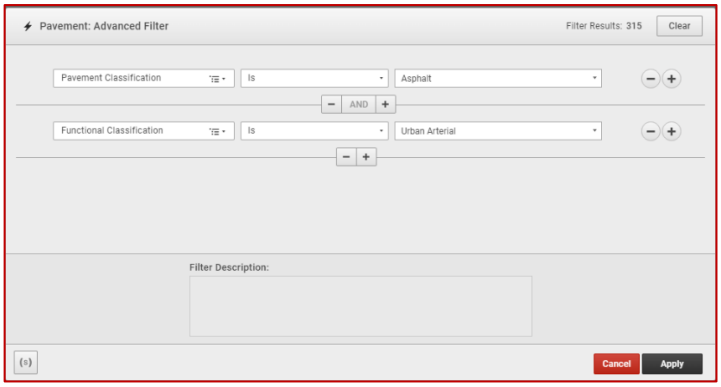
RAS has protocols in place that preserve historical collection data and use past surveys to assist in modeling through documenting the change in conditions between past surveys and the current collected data. RAS will make the comparisons between the surveys easily viewable for City staff to determine if outliers exist.

- **Supersegment Development** – the Cartegraph Scenario Builder module runs models on the layers loaded into the system. While older versions of Cartegraph could only house a single layer, Cartegraph now gives users the ability to house a

Supersegment layer, which is simply multiple segments stitched together to form a logical project or management section. The benefit of utilizing a Supersegment layer for use in Scenario Builder is that it runs the budgetary scenario at the project level, producing real-world rehabilitation plans that are ready for City review, modification, or acceptance. Our team will also provide recommendations to City staff for best practices in developing practically sized Supersegments to yield model results that can be acted upon. RAS also utilizes Cartegraph's "**Automation Manager**" when developing or updating an agencies budgetary models using the Supersegment approach.

Budget Model Development

The RAS Team separates itself from our competition through our devotion to the most critical aspect of the project, which is collaborating with the City on how to take the objective condition data and utilize it to make meaningful decisions involving the City's infrastructure.

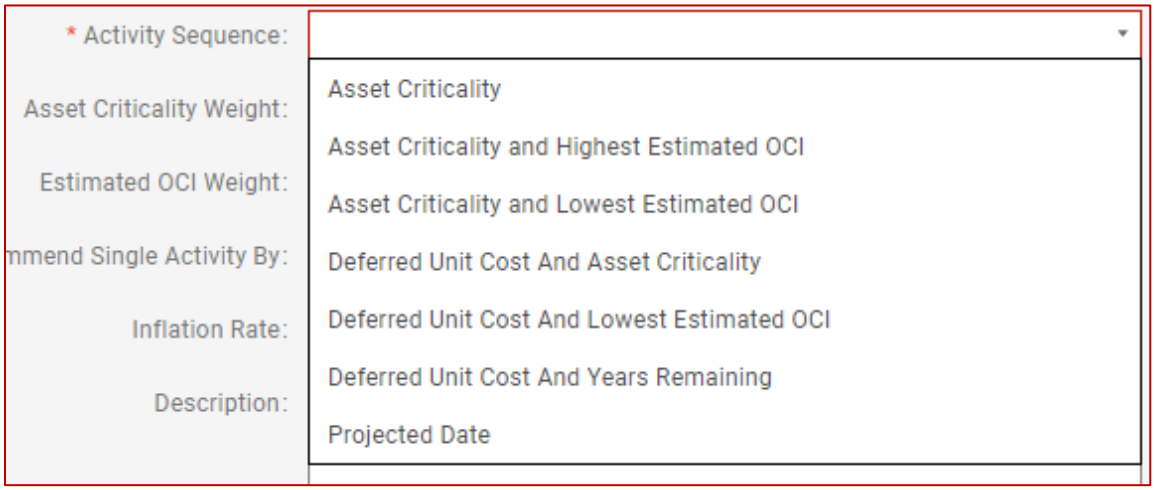


RAS follows the "AASHTO Transportation Asset Management Guide – A Focus on Implementation" which provides a framework for organizations to utilize and update the management of their assets to improve decision-making, monitor performance, and support integrated decisions in programming projects. The observed distresses and calculated OCI values will be used within Cartegraph to rank projects using distress types indicating load, non-load, and environmental related causes of each distress.

Running budgetary models within a pavement management system requires a deep understanding of the database structure behind the application. The RAS approach to budgetary modeling will involve up to 10 pavement management scenarios using different philosophies, budget levels, and distributions. While **RAS will define the scenarios to be run with City staff, at a minimum the following questions should be answered with the scenarios:**

- How much funding will be required to maintain an OCI of 70 over the next 5 years?
- How much funding is required annually to maintain my existing pavement conditions?
- What will the estimated network OCI be over the next 5 years if current funding levels are maintained?
- What budget is required to control the growth in backlog?
- What are the recommended pavement strategies?

RAS will also consult with City staff to develop models utilizing different types of rehabilitation strategies (worst first, best first, most economic, need year, etc.). RAS understands that getting buy-in from City Administrators and Elected Officials means developing a long-range rehabilitation plan that considers local priorities. The RAS team will ensure that already approved rehabilitation work is programmed into the budgetary models for selection during the run. In addition, RAS will consult with City staff to identity the total cost (mill, overlay, traffic control, striping, etc.) of each rehabilitation method.



Infusing Optimization into the Cartegraph OMS Analysis

Optimization is a broad-based term that has many different definitions. For most pavement management systems, optimization is the ability to prioritize a multi-year rehabilitation plan using several different factors that are important to the City and based on sound engineering constraints. For example, RAS commonly configures the Scenario Builder models using "Asset Filters" that allows our team to include a different set of maintenance and rehabilitation activities for roadways of different pavement types, traffic, and strength.

With the Asset Filters setup, our team can then assign "Criticality" factors to each functional classification, pavement type, and pavement strength rating that assist in prioritizing the multi-year plan and the development of an optimized rehabilitation plan. **However, this is only the beginning of an RAS Optimized Multi-Year Plan.**

The RAS team also includes a true **Financial Optimization Framework (FOF)** as a part of the Cartegraph OMS analysis. While the user could run a multi-year plan using the assigned "Asset Criticality" only, RAS prefers to infuse financial optimization through the use of the "Deferred Unit Cost" sequence logic.

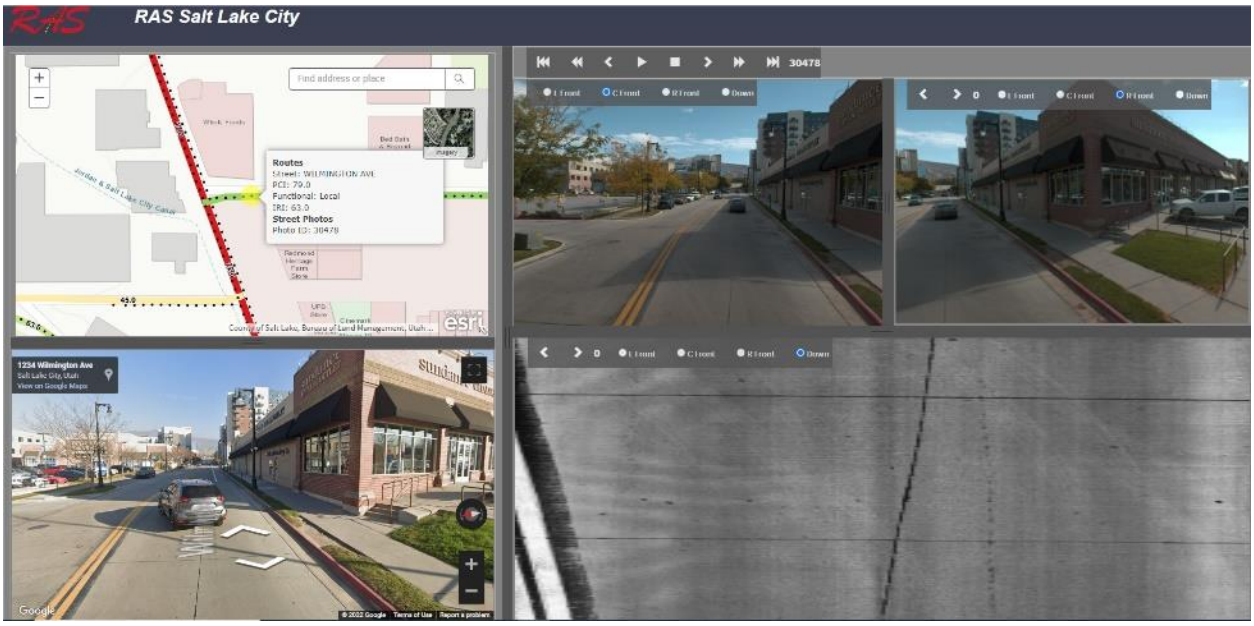
This sequence option allows the analysis to consider the future costs of deferring segments and allowing them to fall into the next more expensive rehab category. By calculating the cost of deferral, the sequence also identifies the "Need Year" of each segment and prioritizes the highest cost of deferrals while focusing on selecting critical roads that are within a few points of dropping into the next category. The "Deferred Unit Cost" sequencing is traditionally combined with the customized criticality assignments in an effort to generate a truly financially optimized pavement management program.

Mark Kramer, QA/QC Manager, and Zac Thomason, Assistant Project Manager, participated in the initial development of this financial optimization logic in the Cartegraph OMS Scenario Builder through multiple conversations and demonstrations with the Cartegraph software development team.

To further enhance upon optimization, Project Manager and Senior Pavement Engineer, Scot Gordon looks forward to visiting with City staff on other **innovative considerations** to pavement management such as **including OCI of curb and gutter in selecting roads for maintenance; whether or not to deduct for potholes if the City has a pothole repair crew; how to get all council districts above a specific PCI threshold; and focused analysis on top traveled corridors where you are improving the level of service on the roads receiving the greatest traffic while also analyzing the impacts to the remainder of the network.**

For example, Scot performed additional analysis scenarios for the City of San Antonio to identify variable funding needs to achieve and maintain the set goals for each Council District (minimum PCI of 70), based on pavement condition performance. To accomplish this, Mr. Gordon worked with the City to determine the proper mix between preservation and reconstruction within each of the 10 Council Districts to achieve the minimum baseline number of a PCI of 70 per district.

For example, in the City of Fort Worth, Scot worked with City Staff to incorporate curb and gutter as a factor in street selection for maintenance. In addition, the previous evaluation deducted for potholes in their PCI score, while the most recent survey reversed this decision as their crews were repairing these distresses daily and a preference to not have potholes influence the PCI value were expressed.



For the City of Durham, NC we used the most recent census data and the City's Federal Information Processing Series (FIPS) codes to review social-economic factors such as median household income and racial diversity to further factor optimization to ensure equal street maintenance across the City.

Each of the examples above were combined with sound financial optimization that allowed for a truly customized multi-year plan that met the needs of local constituents, elected officials, and City staff.

Optional Services: RAS Data Viewer & Videologger (Additional Fee)

If the City desires web-hosted condition photos, as an optional service RAS can provide the City with the RAS Videologger which is a web hosted full-service image viewer that allows our clients to select a section of roadway from the GIS-based map to visually display the inventory elements and the results of their survey. The viewer is hosted on a reliable web platform such as Amazon Web Services (AWS). The RAS Videologger allows the City to load pavement and ROW imagery for a specific location within the City and sequentially travel down the roadway. If needed within the Videologger, the City can load high-resolution images to provide more detailed site investigation while displaying OCI, PCI, and IRI data for the selected section. In addition, the Videologger **houses the Ladybug Panoramic ROW imagery, LCMS downward pavement imagery**, PCI scores, and right of way inventories.

Following the Pavement Condition Assessment, all **LCMS-2 camera imagery** will be loaded to the videologger with each image resulting in 1 mm-pixel resolution and horizontal resolution of 4,000 pixels. The benefit of having the LCMS imagery on the same platform as the Ladybug imagery is the ability to use the forward-facing camera to see what a typical driver would see from a windshield while comparing it against the downward LCMS laser array that focuses only on the pavement surface itself.

Optional Services: Detailed Sidewalk and Ramp Condition Assessment (Additional Fee)

RAS can provide the City with a detailed and comprehensive sidewalk condition assessment. The expanded scope would include utilizing one or more e-bikes (PROWagon™) to drive every sidewalk for assessment and digital image capture. The data collection would happen independently of the street assessment as the PROWagon™ was designed specifically for sidewalk condition assessments. The PROWagon™ is equipped to accurately capture individual distresses for a 0-100 sidewalk condition index (SCI).

Upon completion of the sidewalk network HD video capture, the imagery is processed using a custom rating application that begins the process by linking the corresponding imagery to its appropriate sidewalk segment. From here, the rating software is utilized by each RAS Sidewalk Inspector to individually map all moderate/severe distresses (distress type following Banning's distresses, distress severity, & XY coordinate), allowing RAS to develop heat maps for each distress type with XY locations. Each distress encountered is tagged to the corresponding sidewalk image and assigned the image XY for mapping purposes.

The individual distress data is then processed to calculate a distress density per sidewalk segment and calculate a Sidewalk Condition Index (SCI) using the distress data collected in the field such as **surface deterioration or spalling, missing pavement, vertical displacements, holes or cracks, missing or damaged castings, and root intrusion.**

Required Forms

COMPLIANCE WITH PRESIDENTIAL EXECUTIVE ORDERS IMPOSING SANCTIONS AGAINST THE RUSSIAN FEDERATION (RUSSIA)

Executive Order Nos. 13660, 13661, 13662, 13685, 13849, and 14065, and the Directives thereunder, (collectively "Orders"), impose economic sanctions against Russia ("Sanctions"), and establish prohibitions that include, but are not limited to:

(i) engaging in certain commercial transactions with a person or entity whose property or interest is blocked and/or who is listed on the Treasury Department's List of Specially Designated Nationals and Blocked Persons ("SDN List") or Sectoral Sanctions Identification List ("SSI List"); and

(ii) exporting or importing goods, services, or technology, to or from Crimea, or the Donetsk or Luhansk region, in Ukraine.

Please review the economic sanctions imposed in response to Russia's actions in Ukraine, including, but not limited to, the Orders, Directives, and sanctions identified on the U.S. Department of the Treasury website (or any successor website): https://home.treasury.gov/policy-issues/financial-sanctions/sanctions-programs-and-country-information/ukraine-russia-related-sanctions

Based on your review of the Sanctions and/or your personal knowledge, by signing below you certify that (i) no person, or entity or any owner thereof, submitting this bid or proposal, is a Blocked Person or is a person or entity listed on the SDN List or the SSI List; or is otherwise subject to any of the prohibitions created by the Sanctions or any of the Orders; and (ii) no performance required by a contract awarded by the City to the bidder or proposer signed for below will involve the prohibited exporting or importing of goods, services, or technology, to or from Crimea, or the Donetsk or Luhansk region, in Ukraine, or will otherwise involve conduct prohibited by any of the Sanctions.

Dear New Vendor,

The City of Banning is pleased to inform you that we are in the process of setting up your company as a new vendor in our system for the purpose of initiating future purchase orders, and/or enabling payment(s). The City would like to request the following information from your company that is required in order for us to complete your profile, and any further transactions:

- Vendor Masterfile Sheet (enclosed, please complete and return with the following applicable documentation - page 2)
- W9 form (required) (attached if needed pages 3-8, please return only first page {3})
- City of Banning Business Tax Certificate Application [with Business Tax Summary](may not apply if you are not conducting business in Banning - pages 9-10)
- Certificate(s) of liability insurance naming the City of Banning as additional insured with corresponding endorsement pages (may not be required if no on-site work is being performed - Requirements listed page 11)

For convenience, completed documents may be returned to the City Requestor via email, or mailed to the address stated above.

Feel free to reach out to us if you have any questions.

Sincerely,

City of Banning
Finance Department

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person** ▸ Bart Wilson **Date** ▸ 3/25/2024

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

Summary of Vendor Insurance Requirements

1) Limits of insurance*:

   (a) General Liability insurance with limits of not less than $1,000,000 for bodily injury and property damage; $1,000,000 for personal and advertising injury; $2,000,000 products and completed operations aggregate and $2,000,000 general aggregate.
   (b) Auto Liability insurance endorsed for “any auto” with limits of liability of not less than $1,000,000 per accident for bodily injury and property damage.
   (c) Professional Liability (Errors and Omissions) insurance appropriate to Consultant’s profession, with limits of liability of not less than $1,000,000 per claim/occurrence and $2,000,000 policy aggregate **(only required if contract involves the rendering of a professional service).**
   (d) Workers' Compensation insurance as required under the California Labor Code.
   (e) Employer's Liability insurance with limits of liability of not less than $1,000,000, each accident; $1,000,000 disease each employee; and $1,000,000 disease policy limit.
   (f) California Insurance Commissioner to do business in the State of California and rated not less than “A- VII” in Best's Insurance Rating Guide.

   *Limits can be adjusted based on the City of Banning judgement based on services provided.

Certificate holder should appear as follows:

City of Banning
Attn: Purchasing Division
99 E. Ramsey Street
Banning, CA 92220-4837

2) The certificate of insurance should read "The City of Banning, its officers, officials, employees and agents are additional insured as respects to General Liability and Auto Liability insurance. This insurance is primary, and our obligations are not affected by any other insurance carried by such additional insured whether primary, excess, contingent, or on any other basis. Waiver of subrogation for Workers’ Compensation insurance as respects to the City of Banning, its officers, officials, employees and agents.”

3) Additional insured endorsement, with primary and non-contributory language or a primary insurance endorsement, for General Liability insurance **(including ongoing operations and completed operations)**. The additional insured should read, "The City of Banning, its officers, officials, employees, agents and volunteers". Examples of primary insurance language are "Such insurance as is afforded by the policy is primary and any other insurance shall be excess and not contribute to the insurance afforded by this endorsement" or "This insurance is primary, and our obligations are not affected by any other insurance carried by such additional insured whether primary, excess, contingent, or on any other basis". The endorsement number needs to be included in the accord description of certificate of insurance.

4) Additional insured endorsement for Auto Liability insurance. The additional insured should read, "The City of Banning, its officers, officials, employees and agents.” The endorsement number needs to be included in the accord description of certificate of insurance.

5) Waiver of subrogation endorsement for Workers’ Compensation insurance should read, “the City of Banning, its officers, officials, employees and agents.” The endorsement number needs to be included in the accord description of certificate of insurance.

6) The “Retro Date” must be shown for the Professional Liability insurance. **(only required if contract involves the rendering of a professional service).**

7) A copy of the Declarations & Policy Endorsements page for the General Liability policy.

Should you have any questions with respect to the foregoing, please do not hesitate in contacting the Purchasing Division at (951) 922-3129. Thank you.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 03/25/2024

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

CITY OF BANNING
STAFF REPORT

TO: **CITY COUNCIL**

FROM: **Douglas Schulze, City Manager**

PREPARED BY: **Doug Schulze, City Manager**
Doug Schulze, City Manager

MEETING DATE: **July 9, 2024**

SUBJECT: **Consideration of Resolution 2024-117, Approving an Exclusive Negotiating Agreement with Investel Development LLC for City-Owned Real Property Located at 150 E. Ramsey Street, Banning (APNs 541-181-032, 541-181-033, 541-181-034, AND 541-181-035)**

RECOMMENDATION:

Adopt Resolution 2024-117.

BACKGROUND:

Investel Development LLC ("Investel") and the City of Banning entered into an Exclusive Negotiating Agreement (ENA) on February 23, 2023. The term of the ENA ended on January 10, 2024. Investel has submitted a Preliminary Application Conference application for the proposed development of the property and that PAC was held in early 2024. The developer has been working to refine the project based on input received during the PAC and has been in continuous contact with City staff. Investel is in the process of preparing documents required for the Uniform Development Application, which includes a variety of engineering studies and reports. Investel has requested that the City enter into a new ENA with a term through the end of 2024.

JUSTIFICATION:

Development of 150 E. Ramsey Street is a priority for the City of Banning and will serve as a catalyst for downtown redevelopment. The project will generate property taxes, sales taxes, temporary occupancy taxes (Hotel tax), and jobs. In addition, the project will create housing within the downtown that will result in a demand for services in the area as well as increase the median income.

FISCAL IMPACT:

Entering into a new ENA will not have any additional financial impact. The remaining work on the project application is the responsibility of the owner/developer.

ALTERNATIVES:

Do not adopt Resolution 2024-117 and provide direction to staff.

EXCLUSIVE NEGOTIATING AGREEMENT

This EXCLUSIVE NEGOTIATING AGREEMENT ("ENA") is dated as of July 10, 2024 and is entered into by and between the CITY OF BANNING ("City") and Investel Development, LLC ("Developer"). The City and the Developer are sometimes individually referred to herein as a "Party" and are sometimes collectively referred to herein as the "Parties."

RECITALS

A. The City owns the land in the City of Banning, California described on Exhibit "A" (the Property) and desires to invite the Developer to propose a development plan for a mixed use of Hotel and Apartment/Retail project on the Property (the "Project").

B. The City intends to incur significant costs in negotiating and preparing a disposition and development agreement or "DDA".

C. The Developer has therefore requested that the City negotiate with the Developer on an exclusive basis for a specified period of time to establish the terms and conditions of the DDA.

D. It is anticipated that during the term of this ENA, City staff and consultants and attorneys of the City will devote substantial time and effort in meeting with the Developer and its representatives and consultants, reviewing proposals, plans and reports, negotiating and preparing and revising the DDA, obtaining consultant advice and reports including an appraisal.

NOW, THEREFORE, The Developer has proposed the follows:

1. The term of The ENA shall commence on the date hereof and shall end on the earlier of: (i): December 31, 2024, or (ii) the date on which the City of the Developer terminates this ENA provided in Sections 2 below (the "ENA Period").

2. The City Manager may terminate this ENA by written notice to the Developer if the Developer should fail to comply with or perform any material provisions of this ENA and such failure is not cured within thirty (30) days after City Manger's delivery of written notice to the Developer (or such other period of time if such failure cannot by its nature be cured within such thirty (30) day period, so long as Developer diligently proceeds with efforts to cure such failure), or if reasonable progress is not being made in negotiations hereunder as determined by the City Manager in good faith. The Developer may terminate this ENA by written notice to the City if the Developer determines that it does not wish to pursue the Project any further.

3. During the ENA Period, the City shall not negotiate with any person or entity other than the Developer for the sale, lease, or development of the Property.

4. City must comply with California's surplus property statutes (Government Code Sections 54220-54234). City shall be solely responsible for all costs associated with the negotiation with California state.

5. City shall agree to convey the Property to Developer at no cost to Developer and Developer will agree to accept such conveyance.

6. The City shall confirm that the CEQA/EIR process is not a requirement for Project entitlement if the total site area of the Project is under five (5) acres.

7. City has provided to Developer phase one environment report and will be responsible for all costs associated with preparation of the report.

8. City has provided to Developer ALTA land title survey and will be responsible for all costs associated with preparation of the survey.

9. Developer desires to have the flexibility to merge and redivide the parcel within the parcel 1, 2, 3, and 4 boundaries (see EXHIBIT A).

10. City has confirmed that N. Alessandro St. does not need to be kept as a public through street on the Property.

11. City shall confirm that all utility lines are ready to be connected to the Property, and the capacity is sufficient. City shall be solely responsible for payment of all fees and charges in case of public utility line upgrade is needed.

12. In connection with the initial operation of the Project, to assist in creating future financial feasibility necessary to allow the operation of the project to proceed, the Developer has proposed certain financial assistance from the City including the rebates of a portion of the Transient Occupancy Tax Revenues and Sales Tax Revenues generated by the Project.

13. City shall provide to the Developer copies of all currently written information regarding the Property in its processions, to the extent not previously delivered to the Developer and to the extend material to the Property or Project and not subject to the attorney-client attorney work-product privilege.

14. The Parties understand and agree that no Party is under any obligation whatsoever to approve or enter into the DDA, and that notwithstanding its approval of this ENA, each party shall have the right to disapprove the DDA, its sole and absolute discretion, and in that regard, the Developer hereby expressly agrees that City shall not be bound by any implied covenant of good faith and fair dealing in connection with such approval or disapproval of any of the DDA. In the event of the expiration or earlier termination of this ENA, the City shall be free to negotiate with any persons or entities with respect to Property.

15. The Developer shall indemnify, defend, and hold the City and its officers, directors, members, employees, agents and contractors harmless from any and all claims, liabilities, losses, damages, costs and expenses relating to or arising out of this ENA or the Developer's failure to perform any obligation of the Developer under this ENA, or any challenges to the validity

of this ENA. The Developer's obligations under the preceding sentence shall survive the expiration or earlier termination of this ENA.

16. The Developer represents and warrants that its undertakings pursuant to this ENA are for the purpose of development of the Property and not for speculation in land, and the Developer recognized that, in view of the importance of the development of the Property to the general welfare of the community, the qualifications and identity of the Developer and its principals are of particular concern to the City; therefore, this ENA may not be assigned by the Developer without the prior express written consent of the City Manager in his sole and absolute discretion. However, the City acknowledges that the Developer may intend to form a new entity to be party to the DDA, and Developer may do so provided that such new entity is controlled and majority-owned by Developer or by owners of Developer, and provided, further, that the Developer first delivers to City a copy of new entity's organizational documents and any amendments thereto, and any other documents necessary for the City to confirm compliance with the foregoing ownership and control conditions.

17. Any notice, request, approval or other communication to be provided by one Party to the other shall be in writing and provided by certified mail, return receipt requested, or a reputable overnight delivery service and addressed as follows:

Developer:
SCG America
12966 Euclid Street Suite 300
Garden Grove, CA 92840

City:
City of Banning
99 E. Ramsey Street
Banning, CA 92220
Attn: City Manager

Notice shall be deemed delivered: (i) if sent by certified mail, then upon the date of delivery or attempted delivery shown on the return receipt; or (ii) if delivery by overnight delivery service, then one (1) business day after delivery to the service as shown by records of the service.

18. This ENA constitutes the entire agreement of the Parties hereto with respect to the subject matter hereof. There are no agreements or understandings between the Parties and no representations by either Party to the other as an inducement to enter into this ENA, except as may be expressly set forth herein, and any and all prior discussions and negotiations between the Parties are superseded by this ENA.

19. This ENA may not be altered, amended or modified except by a writing duly authorized and executed by all Parties.

20. No provision of this ENA may be waived except by an express written waiver duly authorized and executed by the waiving Party.

21. If any Party should bring any legal action or proceeding relating to this ENA or to enforce any provision hereof, the Party in whose favor a judgment or decision is rendered shall be entitled to recover reasonable attorneys' fees and expenses from the other. The Parties agree that any legal action shall be filed in and shall occur in the County of Los Angeles.

22. The interpretation and enforcement of this ENA shall be governed by the laws of the State of California.

23. Time is of the essence of each and every provision hereof in which time is a factor.

24. This ENA may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same ENA. Executed counterparts of this ENA may be delivered electronically by email to: dschulze@banningca.gov (for City) and to kenhao.hsu@scgamerica.com (for Developer).

IN WITNESS WHEREOF, the Parties hereto have executed this ENA as of the day and year first written above.

RESOLUTION 2024-117

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING AN EXCLUSIVE NEGOTIATING AGREEMENT WITH INVESTEL DEVELOPMENT LLC FOR CITY-OWNED REAL PROPERTY LOCATED AT 150 EAST RAMSEY STREET, BANNING (APNS 541-181-032, 541-181-033, 541-181-034, AND 541-181-035)

WHEREAS, Investel Development LLC ("Investel") is a California limited liability company based in Garden Grove, California; and

WHEREAS, the City of Banning is the owner of real property located at 150 East Ramsey Street, Banning, California 92220 (APNs 541-181-032, -033, -034, and -035); and

WHEREAS, on January 10, 2023, the City Council adopted Resolution 2023-13, approving an Exclusive Negotiating Agreement ("ENA") with Investel , which ENA expired on January 10, 2024; and

WHEREAS, Investel has submitted an application for a Preliminary Application Conference to the City's Planning Division and has discussed a proposed apartment/retail building and hotel project ("proposed project") with City staff; and

WHEREAS, Investel is revising the proposed project based on City staff input and is completing required studies and reports; and

WHEREAS, Investel will be investing substantial time and money to complete the entitlement process and desires to enter into a new ENA with the City to secure their investment.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves the Exclusive Negotiating Agreement for 150 E. Ramsey Street, Banning, CA 92220, attached hereto as Exhibit A.

SECTION 2. The City Council authorizes and directs the City Manager ("Authorized Representative"), or his designee, to sign the Exclusive Negotiating Agreement with Investel Development LLC on behalf of the City Council.

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

Alberto Sanchez, Mayor
City of Banning

LEGAL DESCRIPTION

THIS PROPERTY SURVEYED AND SHOWN HEREON IS THE SAME PROPERTY AS DESCRIBED IN SCHEDULE A OF STEWART TITLE GUARANTY COMPANY ORDER NO. 23000110392, DATED MARCH 30, 2023.

THE LAND REFERRED TO HEREIN IS SITUATED IN THE STATE OF CALIFORNIA, COUNTY OF RIVERSIDE UNINCORPORATED AND DESCRIBED AS FOLLOWS:

PARCEL 1: APN 541–181–39 (UNDERLYING APNS 541–181–34; 541–181–35 AND 541–181–38)

PARCEL B OF LOT LINE ADJUSTMENT 21–5001 RECORDED MAY 28, 2021 AS DOCUMENT NO. 2021–0329136, OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, DESCRIBED AS FOLLOWS:

PORTION OF PARCELS 1 AND 2 OF PARCEL MAP NO. 36285 AS SHOWN BY MAP ON FILE IN BOOK 238 OF PARCEL MAPS AT PAGES 24 THROUGH 25, INCLUSIVE THEREOF, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, LYING WITHIN SECTION 10, TOWNSHIP 3 SOUTH, RANGE 1 EAST, SAN BERNARDINO MERIDIAN, DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHWESTERLY CORNER OF SAID PARCEL 2, SAID CORNER BEING ON THE SOUTHERLY RIGHT OF WAY OF RAMSEY STREET (WIDTH VARIES);

THENCE SOUTH 89° 35' 53" EAST ALONG THE NORTHERLY LINE OF SAID PARCEL 2 AND ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 19.27 FEET TO AN ANGLE POINT THEREON;

THENCE NORTH 45° 15' 40" EAST CONTINUING ALONG SAID NORTHERLY LINE OF PARCEL 2 AND SAID RIGHT OF WAY LINE, A DISTANCE OF 23.98 FEET TO AN ANGLE POINT THEREON;

THENCE SOUTH 89° 35' 53" EAST CONTINUING ALONG SAID NORTHERLY LINE AND SAID RIGHT OF WAY LINE, A DISTANCE OF 9.00 FEET;

THENCE LEAVING SAID NORTHERLY LINE AND SAID RIGHT OF WAY LINE SOUTH 00° 00' 00" EAST, A DISTANCE OF 288.80 FEET TO THE SOUTHERLY LINE OF SAID PARCEL 1;

THENCE NORTH 89° 46' 39" WEST ALONG SAID SOUTHERLY LINE OF PARCEL 1, A DISTANCE OF 669.26 FEET TO THE SOUTHWESTERLY CORNER THEREOF;

THENCE NORTH 0° 06' 51" EAST ALONG THE WESTERLY LINE OF SAID PARCEL 1, A DISTANCE OF 17.12 FEET TO AN ANGLE POINT THEREON;

THENCE SOUTH 89° 46' 41" EAST ALONG SAID WESTERLY LINE, A DISTANCE OF 29.01 FEET TO AN ANGLE POINT THEREON;

THENCE NORTH 0° 07' 01" EAST ALONG SAID WESTERLY LINE, A DISTANCE OF 94.50 FEET TO THE NORTHWESTERLY CORNER OF SAID PARCEL 1;

THENCE NORTH 90° 00' 00" EAST ALONG THE NORTHERLY LINE OF SAID PARCEL 1 AND ALONG THE SOUTHERLY LINE OF PARCEL 3 AND 4 OF SAID PARCEL MAP, A DISTANCE OF 594.72 FEET TO THE SOUTHEASTERLY CORNER THEREOF;

THENCE NORTH 0° 00' 00" WEST ALONG THE EASTERLY LINE OF SAID PARCEL 3, A DISTANCE OF 158.02 FEET TO THE **POINT OF BEGINNING**.

TOGETHER WITH PARCELS 3 AND 4 OF PARCEL MAP NO. 36285 AS SHOWN BY MAP ON FILE IN BOOK 238 OF PARCEL MAPS AT PAGES 24 THROUGH 25, INCLUSIVE THEREOF, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, LYING WITHIN SECTION 10, TOWNSHIP 3 SOUTH, RANGE 1 EAST, SAN BERNARDINO MERIDIAN.

PARCEL 2: APN 541–181–37

PARCEL A OF LOT LINE ADJUSTMENT 21–5001 RECORDED MAY 28, 2021 AS DOCUMENT NO. 2021–0329136, OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, DESCRIBED AS FOLLOWS:

PORTIONS OF PARCELS 1 AND 2 OF PARCEL MAP NO. 36285 AS SHOWN BY MAP ON FILE IN BOOK 238 OF PARCEL MAPS AT PAGES 24 THROUGH 25, INCLUSIVE THEREOF, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, LYING WITHIN SECTION 10, TOWNSHIP 3 SOUTH, RANGE 1 EAST, SAN BERNARDINO MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWESTERLY CORNER OF SAID PARCEL 2, SAID CORNER BEING ON THE SOUTHERLY RIGHT OF WAY OF RAMSEY STREET (WIDTH VARIES);

THENCE SOUTH 89° 35' 53" EAST ALONG THE NORTHERLY LINE OF SAID PARCEL 2 AND ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 19.27 FEET TO AN ANGLE POINT THEREON;

THENCE NORTH 45° 15' 40" EAST CONTINUING ALONG SAID NORTHERLY LINE OF PARCEL 2 AND SAID RIGHT OF WAY LINE, A DISTANCE OF 23.98 FEET TO AN ANGLE POINT THEREON;

THENCE SOUTH 89° 35' 53" EAST CONTINUING ALONG SAID NORTHERLY LINE AND SAID RIGHT OF WAY LINE, A DISTANCE OF 9.00 FEET TO THE TRUE POINT OF BEGINNING;

THENCE LEAVING SAID NORTHERLY LINE OF PARCEL 2 AND SAID SOUTHERLY RIGHT OF WAY LINE SOUTH 00° 00' 00" EAST, A DISTANCE OF 288.80 FEET TO THE SOUTHERLY LINE OF SAID PARCEL 1;

THENCE SOUTH 89° 46' 39" EAST ALONG SAID SOUTHERLY LINE, A DISTANCE OF 222.77 FEET TO THE SOUTHEASTERLY CORNER OF SAID PARCEL 1, SAID CORNER BEING ON THE WESTERLY RIGHT OF WAY LINE OF MARTIN STREET (30.00FEET IN WESTERLY HALF WIDTH);

THENCE NORTH 00° 07' 55" EAST ALONG THE EASTERLY LINE OF SAID PARCEL 1 AND ALONG SAID WESTERLY RIGHT OF WAY LINE, A DISTANCE OF 279.19 FEET TO THE NORTHEASTERLY CORNER OF SAID PARCEL 1, SAID POINT BEING ON SAID SOUTHERLY RIGHT OF WAY LINE OF RAMSEY STREET;

THENCE NORTH 65° 32' 39" WEST ALONG THE NORTHEASTERLY LINE OF SAID PARCEL 1 AND SAID SOUTHERLY RIGHT OF WAY LINE, A DISTANCE OF 21.85 FEET TO THE NORTHERLY LINE OF SAID PARCEL 1;

THENCE NORTH 89° 35' 53" WEST ALONG SAID NORTHERLY LINE AND ALONG SAID SOUTHERLY RIGHT OF WAY LINE, A DISTANCE OF 203.52 FEET TO THE **TRUE POINT OF BEGINNING**.

APN: 541–181–039, 541–181–037
APN: 541–181–034, 541–181–035, 541–181–037, AND 541–181–038

(END OF LEGAL DESCRIPTION)

ENCUMBRANCE NOTES

THE FOLLOWING ENCUMBRANCES ITEMS ARE THOSE CONTAINED IN STEWART TITLE GUARANTY COMPANY ORDER NO. 23000110392, DATED MARCH 30, 2023 AND HAVE THE SAME NUMERICAL DESIGNATION AS IN THE REPORT. THOSE WHICH CAN BE PLOTTED ON THE SURVEY AS SHOWN THUS ○ . THE REMAINING ITEMS CANNOT BE PLOTTED AND REFERENCE TO THE RECORDED DOCUMENT SHOULD BE MADE FOR FURTHER PARTICULARS.
[....] INDICATES SURVEYOR'S COMMENTS.

EXCEPTIONS

1 WATER RIGHTS, CLAIMS OR TITLE TO WATER IN, OR, UNDER THE PROPERTY, WHETHER OR NOT SHOWN BY THE PUBLIC RECORDS.

2 OWNERSHIP OF, OR RIGHTS TO, MINERALS OR OTHER SUBSTANCES, SUBSURFACE AND SURFACE, OF WHATSOEVER KIND, INCLUDING, BUT NOT LIMITED TO COAL, ORES, METALS, LIGNITE, OIL, GAS, GEOTHERMAL RESOURCES, BRINE, URANIUM, CLAY, ROCK, SAND AND GRAVEL IN, ON, UNDER AND THAT MAY BE PRODUCED FROM THE LAND, TOGETHER WITH ALL RIGHTS, PRIVILEGES, AND IMMUNITIES RELATING THERETO, WHETHER THE OWNERSHIP OR RIGHTS ARISE BY LEASE, GRANT, EXCEPTION, CONVEYANCE, RESERVATION OR OTHERWISE, AND WHETHER OR NOT APPEARING IN THE PUBLIC RECORDS OR LISTED IN SCHEDULE B. STEWART TITLE GUARANTY COMPANY AND ITS ISSUING AGENT MAKE NO REPRESENTATION AS TO THE PRESENT OWNERSHIP OF ANY SUCH INTERESTS. THERE MAY BE LEASES, GRANTS, EXCEPTIONS, OR RESERVATIONS OF INTERESTS THAT ARE NOT LISTED.

SURVEYOR'S NOTES

1. BASIS OF BEARINGS IS THE CENTERLINE OF RAMSEY STREET TAKEN AS NORTH 89°37'18" EAST PER PARCEL MAP NO. 36285, PM 238/24-25.
2. —●— INDICATES FOUND MONUMENTS AS NOTED.
3. ■ INDICATES MONUMENTS PER PREVIOUS WEBB SURVEY UNDER W.O. 19-123 AS SHOWN ON PM 238/24-25.
4. ○ INDICATES MONUMENT TO BE SET PER PM 238/24-25
5. ALL DIMENSIONS ARE MEASURED IN FEET AND DECIMAL PARTS THEREOF.
6. ALL BEARINGS READ IN A NORTHERLY DIRECTION UNLESS OTHERWISE NOTED.
7. TOTAL AREA OF THE SUBJECT PROPERTY IS 5.19 ACRES, MORE OR LESS.
8. PROPERTY WAS SURVEYED IN ACCORDANCE WITH STEWART TITLE GUARANTY COMPANY ORDER NO. 23000110392, DATED MARCH 30, 2023.
9. THIS SURVEY WAS PERFORMED WITH TRIMBLE S7 TOTAL STATIONS & TRIMBLE 12i GPS RECEIVERS, AND COMPLETED ON APRIL 13, 2023.
10. ( ) INDICATES RECORD OR CALCULATED DATA PER PM 238/24-25, UNLESS OTHERWISE NOTED
11. < > INDICATES RECORD OR CALCULATED DATA PER LLA NO. 21-5001, INST. #2021-0329136 O.R., REC. 05/28/2021.
12. SYMBOLS SHOWN ON THE SURVEY ARE NOT DRAFTED TO SCALE.
13. ////// INDICATED RESTRICTED ACCESS.

ALTA NOTES:

1. NO PROPOSED CHANGES IN STREET RIGHT OF WAY LINES MADE AVAILABLE TO THE SURVEYOR. NO EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS OBSERVED IN THE PROCESS OF CONDUCTING THE FIELDWORK.
2. NO PLOTTABLE OFFSITE (I.E., APPURTENANT) EASEMENTS OR SERVITUDES DISCLOSED IN DOCUMENTS PROVIDED TO OR OBTAINED BY THE SURVEYOR.
3. PROPERTY HAS ACCESS TO AND FROM SAN GORGONIO AVE., RAMSEY ST. & MARTIN AVE. BEING PUBLIC ROADS.

1" = 40'

40 0 40 80 120

THIS SURVEY WAS BASED ON AVAILABLE RECORD INFORMATION AT THE TIME OF SURVEY. ALL LINE WORK SHOWN HAS BEEN VERIFIED TO THE REFERENCE INFORMATION AS INDICATED ON THE SURVEY.

BASIS OF COORDINATES

ASSUMED 10000.00,10000.00 PER AA WEBB PREVIOUS W.O. 2019-0123.

BENCHMARK DATA

NGS BM #H 1311 (DX3597)
ELEV. = 2364.82 FEET (NAVD 88)

RECOVERY NOTE BY NATIONAL GEODETIC SURVEY 1988.
RECOVERED IN GOOD CONDITION.
NEW DESCRIPTION FOLLOWS:
IN BANNING, AT THE CROSSING OF THE SOUTHERN PACIFIC RAILROAD AND 8TH STREET, INTHE NORTHEAST END OF THE ABUTMENT OF A RAILROAD BRIDGE, 4.8 M (15.7 FT) NORTH OF THE NORTH RAIL, 0.9 M (3.0 FT) WEST OF THE EAST END OF THE BRIDGE. THE MARK IS 0.3 M BELOW THE RAILROAD.

DATUM SHIFT TO NGVD 29 IS -2.67 FEET.

THIS SHEET IS PREPARED FROM A SINGLE AERIAL PHOTOGRAPH AND HAS BEEN PRINTED TO PROVIDE AN OVERALL AVERAGE SCALE OF 30 FEET TO THE INCH. VARIATIONS IN SCALE ARE INHERENT IN A PHOTO MAP OF THIS TYPE DUE TO DIFFERENCES IN GROUND ELEVATIONS, HEIGHTS OF BUILDINGS, BUILDING OVERHANGS AND SHADOW EFFECTS. THEREFORE, NO ATTEMPT SHOULD BE MADE TO SCALE ACCURATE DISTANCES OR BEARINGS FROM THIS PHOTO.

EXCLUSIVE NEGOTIATING AGREEMENT

This EXCLUSIVE NEGOTIATING AGREEMENT ("ENA") is dated as of February 23, 2023 and is entered into by and between the CITY OF BANNING ("City") and Investel Development, LLC ("Developer"). The City and the Developer are sometimes individually referred to herein as a "Party" and are sometimes collectively referred to herein as the "Parties."

RECITALS

A. The City owns the land in the City of Banning, California described on Exhibit "A" (the Property) and desires to invite the Developer to propose a development plan for a mixed use of Hotel and Retail project on the Property (the "Project").

B. The City intends to incur significant costs in negotiating and preparing a disposition and development agreement or "DDA".

C. The Developer has therefore requested that the City negotiate with the Developer on an exclusive basis for a specified period of time to establish the terms and conditions of the DDA.

D. It is anticipated that during the term of this ENA, City staff and consultants and attorneys of the City will devote substantial time and effort in meeting with the Developer and its representatives and consultants, reviewing proposals, plans and reports, negotiating and preparing and revising the DDA, obtaining consultant advice and reports including an appraisal.

NOW, THEREFORE, The Developer has proposed the follows:

1. The term of The ENA shall commence on the date hereof and shall end on the earlier of: (i): January 10, 2024, or (ii) the date on which the City of the Developer terminates this ENA provided in Sections 2 below (the "ENA Period").

2. The City Manager may terminate this ENA by written notice to the Developer if the Developer should fail to comply with or perform any material provisions of this ENA and such failure is not cured within thirty (30) days after City Manger's delivery of written notice to the Developer (or such other period of time if such failure cannot by its nature be cured within such thirty (30) day period, so long as Developer diligently proceeds with efforts to cure such failure), or if reasonable progress is not being made in negotiations hereunder as determined by the City Manager in good faith. The Developer may terminate this ENA by written notice to the City if the Developer determines that it does not wish to pursue the Project any further.

3. During the ENA Period, the City shall not negotiate with any person or entity other than the Developer for the sale, lease, or development of the Property.

4. City must comply with California's surplus property statutes (Government Code Sections 54220-54234). City shall be solely responsible for all costs associated with the negotiation with California state.

DocuSign Envelope ID: FD3C2E48-3812-4B66-AB43-63F909B13C1C

5. City shall agree to convey the Property to Developer at no cost to Developer and Developer will agree to accept such conveyance.

6. The City shall confirm that the CEQA/EIR process is not a requirement for Project entitlement if the total site area of the Project is under five (5) acres.

7. City shall provide to Developer phase one environment report and will be responsible for all costs associated with preparation of the report.

8. City shall provide to Developer ALTA land title survey and will be responsible for all costs associated with preparation of the survey.

9. Developer desires to have the flexibility to merge and redivide the parcel within the parcel 1, 2, 3, and 4 boundaries (see EXHIBIT A).

10. City shall confirm if N. Alessandro St. needs to be kept as a public through street on the Property.

11. City shall confirm that all utility lines are ready to be connected to the Property, and the capacity is sufficient. City shall be solely responsible for payment of all fees and charges in case of public utility line upgrade is needed.

12. In connection with the initial operation of the Project, to assist in creating future financial feasibility necessary to allow the operation of the project to proceed, the Developer has proposed certain financial assistance from the City including the rebates of a portion of the Transient Occupancy Tax Revenues and Sales Tax Revenues generated by the Project.

13. City shall provide to the Developer copies of all currently written information regarding the Property in its processions, to the extent not previously delivered to the Developer and to the extend material to the Property or Project and not subject to the attorney-client attorney work-product privilege.

14. The Parties understand and agree that no Party is under any obligation whatsoever to approve or enter into the DDA, and that notwithstanding its approval of this ENA, each party shall have the right to disapprove the DDA, its sole and absolute discretion, and in that regard, the Developer hereby expressly agrees that City shall not be bound by any implied covenant of good faith and fair dealing in connection with such approval or disapproval of any of the DDA. In the event of the expiration or earlier termination of this ENA, the City shall be free to negotiate with any persons or entities with respect to Property.

15. The Developer shall indemnify, defend, and hold the City and its officers, directors, members, employees, agents and contractors harmless from any and all claims, liabilities, losses, damages, costs and expenses relating to or arising out of this ENA or the Developer's failure to perform any obligation of the Developer under this ENA, or any challenges to the validity

DocuSign Envelope ID: FD3C2E48-3812-4B66-AB43-63F909B13C1C

of this ENA. The Developer's obligations under the preceding sentence shall survive the expiration or earlier termination of this ENA.

16. The Developer represents and warrants that its undertakings pursuant to this ENA are for the purpose of development of the Property and not for speculation in land, and the Developer recognized that, in view of the importance of the development of the Property to the general welfare of the community, the qualifications and identity of the Developer and its principals are of particular concern to the City; therefore, this ENA may not be assigned by the Developer without the prior express written consent of the City Manager in his sole and absolute discretion. However, the City acknowledges that the Developer may intend to form a new entity to be party to the DDA, and Developer may do so provided that such new entity is controlled and majority-owned by Developer or by owners of Developer, and provided, further, that the Developer first delivers to City a copy of new entity's organizational documents and any amendments thereto, and any other documents necessary for the City to confirm compliance with the foregoing ownership and control conditions.

17. Any notice, request, approval or other communication to be provided by one Party to the other shall be in writing and provided by certified mail, return receipt requested, or a reputable overnight delivery service and addressed as follows:

Developer:
SCG America
12966 Euclid Street Suite 300
Garden Grove, CA 92840

City:
City of Banning
99 E. Ramsey Street
Banning, CA 92220
Attn: City Manager

Notice shall be deemed delivered: (i) if sent by certified mail, then upon the date of delivery or attempted delivery shown on the return receipt; or (ii) if delivery by overnight delivery service, then one (1) business day after delivery to the service as shown by records of the service.

18. This ENA constitutes the entire agreement of the Parties hereto with respect to the subject matter hereof. There are no agreements or understandings between the Parties and no representations by either Party to the other as an inducement to enter into this ENA, except as may be expressly set forth herein, and any and all prior discussions and negotiations between the Parties are superseded by this ENA.

19. This ENA may not be altered, amended or modified except by a writing duly authorized and executed by all Parties.

DocuSign Envelope ID: FD3C2E48-3812-4B66-AB43-63F909B13C1C

20. No provision of this ENA may be waived except by an express written waiver duly authorized and executed by the waiving Party.

21. If any Party should bring any legal action or proceeding relating to this ENA or to enforce any provision hereof, the Party in whose favor a judgment or decision is rendered shall be entitled to recover reasonable attorneys' fees and expenses from the other. The Parties agree that any legal action shall be filed in and shall occur in the County of Los Angeles.

22. The interpretation and enforcement of this ENA shall be governed by the laws of the State of California.

23. Time is of the essence of each and every provision hereof in which time is a factor.

24. This ENA may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same ENA. Executed counterparts of this ENA may be delivered electronically by email to: dschulze@banningca.gov (for City) and to kenhao.hsu@scgamerica.com (for Developer).

IN WITNESS WHEREOF, the Parties hereto have executed this ENA as of the day and year first written above.

Statement of Information
(Limited Liability Company)

LLC-12

22-B49171

FILED

In the office of the Secretary of State of the State of California

MAR 08, 2022

This Space For Office Use Only

IMPORTANT — This form can be filed online at bizfile.sos.ca.gov.

Read instructions **before completing this form.**

Filing Fee - $20.00

Copy Fees - First page $1.00; each attachment page $0.50; Certification Fee - $5.00 plus copy fees

1. Limited Liability Company Name (Enter the **exact** name of the LLC. If you registered in California using an alternate name, see instructions.)

INVESTEL DEVELOPMENT LLC

2. 12-Digit Secretary of State Entity Number	**3. State, Foreign Country or Place of Organization** (only if formed outside of California)
202003410101	CALIFORNIA

4. Business Addresses

	City (no abbreviations)	State	Zip Code
a. Street Address of Principal Office - Do not list a P.O. Box 12966 Euclid Street , Suite 300	Garden Grove	CA	92840
b. Mailing Address of LLC, **if different than item 4a** 12966 Euclid Street , Suite 300	Garden Grove	CA	92840
c. Street Address of **California** Office, if Item 4a is not in California Do not list a P.O. Box 12966 Euclid Street , Suite 300	Garden Grove	**CA**	92840

5. Manager(s) or Member(s)

If no managers have been appointed or elected, provide the name and address of each member. At least one name and address must be listed. If the manager/member is an individual, complete Items 5a and 5c (leave Item 5b blank). If the manager/member is an additional managers/members, enter the names(s) and address(es) on Form LLC-12A.

a. First Name, if an individual - Do not complete Item 5b	Middle Name	Last Name	Suffix

b. Entity Name - Do not complete Item 5a
SCG AMERICA CONSTRUCTION INC

c. Address	City (no abbreviations)	State	Zip Code
12966 Euclid Street , Suite 300	Garden Grove	CA	92840

6. Service of Process (Must provide either Individual **OR** Corporation.)

INDIVIDUAL – Complete Items 6a and 6b only. Must include agent's full name and California street address.

a. California Agent's First Name (if agent is **not** a corporation)	Middle Name	Last Name	Suffix
DANNY YINFENG		WEI	

b. Street Address (if agent is **not** a corporation) - **Do not enter a P.O. Box**	City (no abbreviations)	State	Zip Code
12966 Euclid Street , Suite 300	Garden Grove	**CA**	92840

CORPORATION – Complete Item 6c only. Only include the name of the registered agent Corporation.

c. California Registered Corporate Agent's Name (if agent is a corporation) – Do not complete Item 6a or 6b

7. Type of Business

Describe the type of business or services of the Limited Liability Company
Hotel and Hospitality Holding Company

8. Chief Executive Officer, if elected or appointed

a. First Name	Middle Name	Last Name	Suffix

b. Address	City (no abbreviations)	State	Zip Code

9. Labor Judgment

Does a Manager or Member have an outstanding final judgment issued by the Division of Labor Standards Enforcement or a court of law, for which no appeal therefrom is pending, for the violation of any wage order or provision of the Labor Code?	☐ Yes ☑ No

10. By signing, I affirm under penalty of perjury that the information herein is true and correct and that I am authorized by California law to sign.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Laurie Sampson, Assistant City Manager** **Doug Schulze, City Manager**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consider Resolution 2024-118, Rescinding its Adoption of Resolution 2024-66, and Approving an Office Lease with Riverside County on Behalf of the Emergency Management Department for Office Space within the Armory Located at 2041 W. Nicolet St. to be used by the Radio Amateur Emergency Service (RACES)**

RECOMMENDATION:

Adopt Resolution 2024-118.

BACKGROUND:

RACES stands for "Radio Amateur Civil Emergency Service" a protocol created by the Federal Emergency Management Agency (FEMA) and the Federal Communications Commission (FCC). Many government agencies across the county train their Auxiliary Communications Service volunteers using RACES protocol. Amateur Radio Operators, also known as Ham Radio Operators, are an important component in an Emergency Communication Plan. The Radios will still operate without cell towers and phone lines.

JUSTIFICATION:

The Pass Area RACES organization is highly trained and is an integral part of the Emergency Response Plan should an emergency occur. The Armory has been designated as the Emergency Operations Command (EOC) and having RACES located in the building will ensure any emergency operation is conducted efficiently.

On May 14, 2024, the Council adopted Resolution 2024-66, approving an Office Lease Agreement with Riverside County Emergency Management Services. RACES provides a public benefit and Riverside County has requested the $100 per month utility charge included on page 6, paragraph 10, be waived. City staff have deemed this an acceptable request.

FISCAL IMPACT:

RACES will pay $1 per year for a total of three years, with an option to renew. They will no longer be required to contribute to the utilities of the Armory $100 per month.

ALTERNATIVES:

The Pass Area RACES groups have used several locations to train and store their equipment. None have worked out long term. As the Armory is now our designated Emergency Operations Center, housing RACES there is the best solution to the needs of RACES and the City. If RACES must find another location it would impede communications in the event of an emergency.

OFFICE LEASE

(Space in Armory Building)

This OFFICE LEASE ("Lease") is dated _____, 2024, and is entered into by and between the CITY OF BANNING (the "Landlord") and the COUNTY OF RIVERSIDE (the "Tenant") on behalf of the Emergency Management Department.

RECITALS

A. Landlord is the owner of certain real property (the "Property") located in the City of Banning, County of Riverside, State of California, commonly known as the Armory Building (the "Building"), located at 2041 Nicolet Street (APN: 538-082-013).

B. Tenant desires to lease from Landlord, and Landlord desires to lease to Tenant, office space in the Building commonly known as the south office room (approximately 162 square feet of space) described on Exhibit "A" (the "Premises"), upon and subject to the terms and conditions hereinafter set forth.

AGREEMENT

1. Memorandum of Lease; Term; Termination Option.

(a) Concurrently with its execution and delivery of a counterpart original of this Lease, Tenant shall also execute and deliver to Landlord a counterpart of the Memorandum of Lease in substantially the form attached hereto as Exhibit "B" for execution and recording by Landlord, as required by California law.

(b) The term of this Lease shall commence on _____, 2024, and shall expire three (3) calendar years thereafter ("Term"), unless terminated earlier in accordance with the terms of this Lease. Landlord shall give Tenant keys to the door of the Building and the door of the Premises and the alarm code, and Tenant shall not change any locks or codes. Tenant acknowledges that its use of the areas of any portions of the Building and parking areas other than the actual Premises is non-exclusive and is in common with the Landlord and other tenants of the Building.

(c) Either party may terminate this Lease at any time upon sixty (60) days' prior written notice to the other party.

2. Use: Compliance with Laws.

(a) The Premises may be used by Tenant solely for City of Banning and County of Riverside emergency response operations performed by Tenant's volunteer operators of Radio Amateur Civil Emergency Service ("RACES"). RACES is a protocol created by the Federal Emergency Management Agency and the Federal Communications Commission (FCC Part 97, Section 407). The RACES volunteer operators serve Tenant pursuant to guidelines and mandates established by Riverside County emergency management officials. The RACES volunteer operators are: (1) licensed Radio Amateurs; (2) certified by a civil defense agency; (3) able to

communicate on Amateur Radio frequencies during drills, exercises, and emergencies; and (4) the only Amateur Radio operators authorized to transmit during declared emergencies when the President of the United States specifically invokes the *War Powers Act*.

(b) Tenant agrees that the Premises and its use of the Premises will at all times be in strict compliance with all applicable laws, rules, and regulations of all governmental authorities having jurisdiction, and Tenant, at its sole cost and expense, agrees to comply with all such laws, rules, and regulations, including, without limitation, all laws, rules, and regulations requiring the making of structural or extraordinary repairs or replacements to the Premises and all laws, rules, and regulations relating to the use, generation, storage, or release of Hazardous Materials. In addition to Tenant's other obligations of indemnity under this Lease, Tenant agrees to indemnify, protect, defend (by counsel reasonably satisfactory to Landlord) and hold Landlord and its officials, officers, agents, and employees, and each of them, harmless from and against all claims, losses, liabilities, actions, judgments, costs, and expenses (including reasonable attorneys' fees and costs) which they, or any of them, may suffer or incur arising from or relating to the use, generation, storage or release by Tenant, its agents, employees, contractors, guests or invitees of any Hazardous Materials in, on, or about the Premises.

(c) "Hazardous Materials" shall mean any and all of the following:

(i) any substance, product, waste, or other material of any nature whatsoever which is or becomes listed, regulated, or for which liability arises for misuse, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C.A. § 9601 *et seq.*; the Hazardous Materials Transportation Act, 49 U.S.C.A. § 1801 *et seq.*; the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C.A. § 6901 *et seq.*; the Toxic Substances Control Act, 15 U.S.C.A. § 2601 *et seq.*; the Clean Water Act, 33 U.S.C.A. § 1251 *et seq.*; the Insecticide, Fungicide, Rodenticide Act, 7 U.S.C.A. § 136 *et seq.*; the Superfund Amendments and Reauthorization Act, 42 U.S.C.A. § 6901 *et seq.*; the Clean Air Act, 42 U.S.C.A. § 7401 *et seq.*; the Safe Drinking Water Act, 42 U.S.C.A. § 300f *et seq.*; the Solid Waste Disposal Act, 42 U.S.C.A. § 6901 *et seq.*; the Surface Mining Control and Reclamation Act, 30 U.S.C.A. § 1201 *et seq.*; the Emergency Planning and Community Right to Know Act, 42 U.S.C.A. § 11001 *et seq.*; the Occupational Safety and Health Act, 29 U.S.C.A. §§ 655 and 657; the Hazardous Waste Control Act, Health & Saf. Code, § 25100 *et seq.*; the Hazardous Substance Account Act, Health & Saf. Code, § 25330 *et seq.*; the California Safe Drinking Water and Toxic Enforcement Act, Health & Saf. Code, § 25249.5 *et seq.*; the Underground Storage of Hazardous Substances, Health & Saf. Code, § 25280 *et seq.*; the Carpenter-Presley-Tanner Hazardous Substance Account Act, Health & Saf. Code, § 25300 *et seq.*; the Hazardous Waste Management Act, Health & Saf. Code, § 25170.1 *et seq.*; the Hazardous Materials Response Plans and Inventory, Health & Saf. Code, § 25001 *et seq.*; the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 *et seq.*, all as they may from time to time be amended;

(ii) any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or for which liability for misuse arises pursuant to any other federal, state, or local statute, law, ordinance, resolution, code, rule, regulation, order, or decree due to its hazardous, toxic or dangerous nature;

(iii) any petroleum, crude oil, or any substance, product, waste, or other material of any nature whatsoever that contains gasoline, diesel fuel, or other petroleum hydrocarbons other than petroleum and petroleum products contained within regularly operated motor vehicles; and

(iv) polychlorinated biphenyls (PCB), radon gas, urea formaldehyde, asbestos, and lead.

3. Rent. As rent for the Premises, Tenant agrees to pay to Landlord the sum of One and No/100 Dollar ($1.00) per year without prior notice and without offset or deduction.

4. Concessions. Landlord is not providing any so-called tenant concessions or allowances.

5. CASp Statement; "AS-IS" Premises.

(a) The Premises have not been inspected by a Certified Access Specialist (CASp). A CASp can inspect the subject premises and determine whether they comply with all of the applicable construction-related accessibility standards under state law. Although state law does not require a CASp inspection of the subject premises, a commercial property owner or lessor may not prohibit Tenant or a tenant from obtaining a CASp inspection of the subject premises for the occupancy or potential occupancy of Tenant or a tenant, if requested by Tenant or a tenant. The parties must mutually agree on the arrangements for the time and manner of the CASp inspection, the payment of the fee for the CASp inspection, and the cost of making any repairs necessary to correct violations of construction-related accessibility standards within the subject premises.

(b) Landlord and Tenant hereby agree that Landlord will not be obligated to obtain or pay for such an inspection report, and will not make or pay for any necessary repairs or alterations (all of which shall be the responsibility of the Tenant under this Lease).

(c) Tenant acknowledges that it has inspected the Premises and Tenant warrants and agrees that it is thoroughly familiar with the Premises and all aspects thereof, including, without limitation, the physical condition of the Premises, the zoning of the Premises and all other restrictions and limitations applicable to the Premises (whether or not of public record).

(d) Tenant acknowledges and agrees that the Premises are satisfactory to Tenant in all respects. Tenant agrees that neither Landlord nor any one acting on Landlord's behalf has made any representation or warranty of any kind or nature whatsoever respecting the condition of the Premises, their suitability for Tenant's use, or any other matter relating to the Premises (including, without limitation, the environmental condition of the Premises) or this Lease, and Tenant agrees that it is leasing the Premises in their "AS-IS CONDITION AND WITH ALL FAULTS."

6. Maintenance.

(a) Tenant agrees that it will, at its sole cost and expense, maintain the Premises and all portions thereof in a good, clean, and safe condition and state of repair. Tenant agrees that

Landlord has no obligation of any kind or nature to maintain, repair, or replace the Premises or any portion of the Premises.

(b) Tenant agrees that Tenant is solely responsible for the security, protection, and insuring of its equipment, materials, and other property, and that of its employees, servants, and contractors, located on or about the Premises. Tenant agrees that Landlord will have no liability of any kind or nature respecting any loss or theft of, or damage to, any such equipment, materials, or other property.

7. Insurance.

(a) Throughout the term of this Lease, Tenant shall pay for and maintain in full force and effect all policies of insurance required hereunder with an insurance company(ies) either (i) admitted by the California Insurance Commissioner to do business in the State of California and rated not less than "A-VII" in Best's Insurance Rating Guide, or (ii) authorized by the City Manager or his/her designee at any time and in his/her sole discretion, including Tenant's self-insurance program. The following policies of insurance or their equivalent as part of a program(s) of self-insurance acceptable to both parties, are required:

(i) Commercial general liability insurance which shall be at least as broad as Insurance Services Office (ISO) form CG 00 01 and shall include insurance for "bodily injury" and "property damage," including premises and operation, completed operations, and contractual liability (including, without limitation, indemnity obligations under this Lease) with limits of liability of not less than One Million Dollars ($1,000,000) per occurrence and Two Million Dollars ($2,000,000) general aggregate for bodily injury and property damage.

(ii) Commercial automobile liability insurance which shall be at least as broad as the most current version of Insurance Service Office (ISO) Business Auto Coverage Form CA 00 01, and include coverage for all owned, hired, and non-owned automobiles or other licensed vehicles (Code 1 Any Auto) with limits of liability of not less than One Million Dollars ($1,000,000) per accident for bodily injury and property.

(iii) Workers' compensation insurance as required under the California Labor Code.

(iv) Property insurance against all risks of loss to any tenant improvements or betterments, at full replacement cost with no coinsurance penalty provision.

(b) In the event Tenant purchases an Umbrella or Excess insurance policy(ies) to meet the minimum limits of insurance set forth above, this insurance policy(ies) shall "follow form" and afford no less coverage than the primary insurance policy(ies).

(c) Tenant shall be responsible for payment of any deductibles contained in any insurance policies required hereunder and Tenant shall also be responsible for payment of any self-insured retentions. Any deductibles or self-insured retentions must be declared to, and approved by, the City Manager or his or her designee. At the option of the City Manager, or his or her designee, either (i) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects Landlord, its officers, officials, employees, agents and volunteers; or (ii) Tenant shall

provide a financial guarantee, satisfactory to the City Manager, or his or her designee, guaranteeing payment of losses and related investigations, claim administration, and defense expenses. At no time shall Landlord, its officers, officials, employees, agents, or volunteers be responsible for the payment of any deductibles or self-insured retentions.

(d) All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled, non-renewed, or reduced in coverage or in limits except after thirty (30) calendar days' written notice by certified mail, return receipt requested, has been given to Landlord. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Tenant shall furnish Landlord with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during this Lease, Tenant shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than fifteen (15) calendar days prior to the expiration date of the expiring policy.

(e) The General Liability insurance policy shall be written on an occurrence form and shall name Landlord and its officers, officials, employees, agents, and volunteers as an additional insured. Such policy(ies) of insurance shall be endorsed so Tenant's insurance shall be primary and no contribution shall be required of Landlord, its officers, officials, employees, agents, or volunteers. The coverage(s) shall contain no special limitations on the scope of protection afforded to Landlord and its officers, officials, employees, agents, and volunteers. Should Tenant maintain insurance with broader coverage and/or limits of liability greater than those shown above, Landlord requires and shall be entitled to the broader coverage and/or the higher limits of liability maintained by Tenant. Any workers' compensation insurance policy shall contain a waiver of subrogation as to Landlord and its officers, officials, employees, agents, and volunteers. The property insurance policy shall name Landlord as a loss payee.

(f) Upon Landlord's request, Tenant shall immediately furnish Landlord with a complete copy of any insurance policy required under this Lease, including all endorsements, with said copy certified by the underwriter to be a true and correct copy of the original policy. This requirement shall survive expiration or termination of this Lease.

(g) The fact that insurance is obtained by Tenant shall not be deemed to release or diminish Tenant's liability, including, without limitation, liability under the indemnity provisions of this Lease. The duty to indemnify Landlord and its officers, officials, employees, agents, and volunteers shall apply to all claims and liability regardless of whether any insurance policies are applicable. The policy limits do not act as a limitation upon the amount of indemnification to be provided by Tenant. Approval or purchase of any insurance contracts or policies shall in no way relieve from liability nor limit the liability of Tenant, its board members, officers, officials, employees, members, agents, volunteers, persons under Tenant's supervision, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or anyone employed directly or indirectly by any of them.

(h) Tenant and its insurers hereby waive all rights of recovery against Landlord and its officers, officials, employees, agents, and volunteers, on account of injury, loss by, or damage to Tenant or its officers, officials, employees, members, agents, volunteers, persons under Tenant's supervision, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or

anyone employed directly or indirectly by any of them, or its property or the property of others under its care, custody and control. Tenant shall give notice to its insurers that this waiver of subrogation is contained in this Lease. This requirement shall survive termination or expiration of this Lease.

(i) If Tenant should sublease the Premises under this Lease, Tenant shall require sub-lessee to provide insurance protection in favor of Landlord, its officers, officials, employees, agents, and volunteers in accordance with the terms of each of the preceding paragraphs, except that the sub-lessee's certificates and endorsements shall be on file with Tenant and Landlord prior to the commencement of any sublease.

8. Damage/Destruction of Tenant Property. Landlord has no obligation to reimburse Tenant for the loss of or damage to fixtures, equipment or other personal property, except for loss or damage as is caused by the active gross negligence or willful misconduct of Landlord or its officers, employees, or agents. Tenant may insure all fixtures, equipment, or other personal property for its own protection if it so desires.

9. Indemnification.

(a) Tenant shall indemnify, hold harmless, and defend Landlord and each of its officers, officials, employees, agents, and volunteers from any and all loss, liability, fines, penalties, forfeitures, costs, and damages (whether in contract, tort, or strict liability, including, without limitation, personal injury, death at any time, and property damage, including damage by fire or other casualty) incurred by Landlord, Tenant, or any other person, and from any and all claims, demands, and actions in law or equity (including attorneys' fees and litigation expenses), arising or alleged to have arisen directly or indirectly out of: (i) the occupancy, maintenance, and use of the Premises and/or; (ii) the performance of this Lease. Tenant's obligations under the preceding sentence shall apply regardless of whether Landlord or any of its officers, officials, employees, agents, or volunteers are negligent, but shall not apply to any loss, liability, fines, penalties, forfeitures, costs, or damages caused solely by the gross negligence, or by the willful misconduct, of Landlord or any of its officers, officials, employees, agents, or volunteers.

(b) Should Tenant sublease the Premises under this Lease, Tenant shall require each sub-lessee to indemnify, hold harmless, and defend Landlord and each of its officers, officials, employees, agents, and volunteers in accordance with the terms of the preceding paragraph.

(c) This requirement shall survive termination or expiration of this Lease.

10. Utilities. Landlord shall be responsible for the cost of utilities (i.e., water, sewer, gas, heat, light, power, and all other utilities supplied to the Premises). It is agreed that Landlord is not liable for any failure or interruption of any utility or service, and the failure or interruption of any utility or service will not entitle Tenant to terminate this Lease or stop making any rental or other payments due under this Lease.

11. Taxes. Tenant acknowledges that this Lease may create a possessory interest subject to taxation and that Tenant may be subject to payment of any and all taxes levied on that possessory interest. Tenant shall also pay any property taxes assessed on its personal property.

12. Alterations.

(a) Tenant agrees that it will not make any alterations or improvements to the Premises, or any portion of the Premises, without Landlord's prior written consent in its sole and absolute discretion. No alterations or additions may affect the structural portions of the Premises, including, without limitation, the exterior or interior load-bearing walls, the foundation, or the roof of the Premises. Landlord shall be under no obligation to give its consent. If Landlord consents to the making of any alterations or improvements, Tenant agrees that such alterations or improvements will be made in strict compliance with all applicable laws, rules, and regulations of all governmental authorities having jurisdiction, will be performed in a good and workmanlike manner, and will be made in compliance with such other conditions, including, without limitation, the obtaining of performance and completion bonds, as Landlord may require in connection with the granting of its consent.

(b) Tenant agrees that it will pay, when due, all claims for labor or materials furnished or alleged to have been furnished to or for Tenant at or for use on the Premises, which claims are or may be secured by any mechanics' or materialmen's lien against the Premises or any interest therein. All alterations and improvements made by Tenant shall, at Landlord's option and at Tenant's sole cost and expense, be removed from the Premises at the end of the term of this Lease and the Premises restored to their condition prior to the making of such alterations or improvements.

13. Tenant's Property. All trade fixtures, equipment, and personal property of Tenant located at the Premises will remain the property of Tenant during the term of this Lease and may be removed by Tenant at any time and shall be removed by Tenant prior to the expiration or other termination of the term of this Lease. If Tenant does not do so, Landlord may retain or dispose of any such remaining fixtures, equipment, and personal property without obligation or liability to Tenant, and Tenant hereby waives all statutes and other laws to the contrary. Tenant, at Tenant's cost and expense, must promptly repair all damage to the Premises occasioned by Tenant's removal of its trade fixtures, equipment, and personal property.

14. Premises Damage and Destruction. If the Premises or any portion thereof are damaged or destroyed by any casualty (whether or not insured), either party may terminate this Lease by written notice to the other.

15. Assignment, Subletting, and Invitees. Tenant may not assign any of its rights or delegate any of its duties under this Lease, or sublet all or any part of the Premises nor permit the occupancy thereof by any other person or entity, except that the RACES volunteers operators shall be permitted invitees of Tenant's in the Premises. Within seven (7) business days of the date of this Lease, Tenant shall provide Landlord with a list of names of the RACES volunteer operators who Tenant intends to invite and permit on the Premises, and shall provide Landlord with an updated list of such operators within five (5) calendar days of Tenant's subsequent changes to permitted invitees.

16. Tenant Default. The occurrence of any one or more of the following shall constitute a default by Tenant:

(a) Failure by Tenant to make payment of rent or any other payments required to be made by Tenant hereunder within five (5) business days after written notice that they are past due.

(b) Failure by Tenant to keep and maintain any of the insurance required to be kept and maintained by Tenant under this Lease.

(c) Failure by Tenant to observe or perform any of the covenants or provisions of this Lease, other than as provided in subsections (b) and (c) of this Section 16, when such failure continues for a period of thirty (30) days after written notice of such failure is given by Landlord to Tenant; provided, that if the nature of Tenant's failure is such that more than thirty (30) days are reasonably required for its cure, then Tenant will not be deemed to be in default if Tenant promptly commences such cure and thereafter diligently prosecutes such cure to completion.

17. Remedies. If Tenant is in default, then, in addition to all other rights and remedies which Landlord may have at law or in equity, Landlord has the following rights and remedies which are not exclusive but are cumulative:

(a) To the extent permitted by law, Landlord can, with or without terminating this Lease, reenter the Premises and remove all property and persons therefrom, and any such property may be removed and stored in a public warehouse or elsewhere at the cost and for the account of Tenant. If Landlord elects to reenter or shall take possession of the Premises pursuant to legal proceedings or pursuant to any notice provided by law, and if Landlord has not elected to terminate this Lease, Landlord may either recover all rent as it becomes due under this Lease or relet the Premises or any part or parts thereof for such term or terms and upon such provisions as Landlord may deem advisable and will have the right to make repairs to and alterations of the Premises. No reentry or taking possession of the Premises by Landlord is to be construed as an election to terminate this Lease unless a written notice of such intention is given to Tenant by Landlord. Notwithstanding any reletting without termination by Landlord because of Tenant's default, Landlord may at any time after such reletting elect to terminate this Lease because of such default if Landlord elects to relet the Premises without terminating this Lease, then rent received by Landlord therefrom will be applied as follows:

(i) First, to any indebtedness from Tenant to Landlord other than rent due from Tenant;

(ii) Second, to all costs and expenses, including, without limitation, for maintenance, repairs, or alterations, incurred by Landlord in connection with reletting the Premises; and

(iii) Third, to the payment of rent due and unpaid under this Lease and the residual, if any, will be held by Landlord and applied in payment of future rent as the same may become due and payable under this Lease and to any damages and other amounts that Landlord is otherwise entitled to under this Lease. Should that portion of such rent received from such reletting during any month, which is applied to the payment of rent hereunder, be less than the rent payable hereunder during that month by Tenant, then Tenant agrees to pay such deficiency

to Landlord immediately upon demand. In no event will Tenant be entitled to any excess rent received by Landlord from such reletting.

(b) Landlord can terminate Tenant's right to possession of the Premises at any time. No act by Landlord other than giving written notice to Tenant will terminate this Lease. Acts of maintenance, efforts to relet the Premises, or the appointment of a receiver on Landlord's initiative to protect Landlord's interest under this Lease shall not constitute a termination of Tenant's right to possession. On termination, Landlord has the right to recover from Tenant any amount, and court costs, necessary to compensate Landlord for all detriment proximately caused by Tenant's default.

(c) Without waiving the default, Landlord can, at its sole option, pay such sums and/or take such actions as are necessary in Landlord's reasonable judgment in order to cure the default, and all sums expended or incurred by Landlord in connection therewith, together with interest thereon at the maximum rate permitted by law, shall be paid by Tenant to Landlord immediately on demand.

18. Landlord Entry. Landlord and its authorized representatives shall have the right upon reasonable prior written notice to Tenant to enter all portions of the Premises for any of the following purposes: (a) to determine whether the Premises are in good condition and whether Tenant is complying with its obligations under this Lease; (b) to inspect the Premises; (c) in connection with Landlord's design and construction planning respecting Landlord's future use of the Premises; and (d) to post notices of non-responsibility. Notwithstanding the foregoing to the contrary, Landlord and its authorized representatives shall have the right to enter the Premises at any time, and without notice to Tenant, where an emergency situation necessitates such entry. No exercise by Landlord of its rights under this Section shall entitle Tenant to any damages for any injury or inconvenience occasioned thereby or to any abatement of rent or other amounts payable under this Lease.

19. Surrender of Premises. Upon the expiration or other termination of the term of this Lease, Tenant agrees to surrender possession of the Premises, and every part thereof, to Landlord in good order, condition, and repair, ordinary wear and tear alone excepted. "Ordinary wear and tear" does not include any damage or deterioration that would have been prevented by good maintenance practice or by Tenant performing all of its obligations under this Lease.

20. Notices. Except as otherwise provided, all notices required or permitted to be given under this Lease must be in writing and addressed to the parties at their respective notice addresses set forth below; provided, that notices to Tenant may also be effectively given in writing and addressed to Tenant at the Premises address. Notices must be given by commercial delivery service) or by first-class mail, postage prepaid. Notices will be deemed effectively given, in the case of overnight messenger delivery, upon receipt (or if receipt is refused, upon attempted delivery), and in the case of mailing, three (3) days following deposit into the custody of the United States Postal Service (or inability to deliver, as shown on the return receipt). The notice addresses of the parties are as follows:

If to Landlord:

City of Banning
Attention: City Manager
99 East Ramsey Street
Banning, California 92220

If to Tenant:

Radio Amateur Civil Emergency Service
c/o Riverside County Emergency Management Department
Attention: Erik Ramirez
450 E. Alessandro Boulevard
Riverside, California 92508

21. Waiver and Release of Relocation Benefits. Tenant acknowledges that upon the expiration or earlier termination of the Term, including any extension thereof, or upon termination of any holdover tenancy (collectively "Expiration of Tenancy"), Tenant might be or become eligible to receive compensation, reimbursement, assistance, including, without limitation, the fair market value of real and personal property, loss of goodwill, loss of profits, actual and reasonable expenses for moving a business, loss of tangible personal property as a result of moving the business, expenses incurred in searching for a replacement site for the business, expenses to reestablish the business at the new site, "in-lieu payments," and other such benefits (collectively "Benefits") under the California Relocation Assistance Act (Gov. Code, § 7260 *et seq.*), Title 25 of the California Code of Regulations, Article 1, § 19 of the California Constitution, the California Eminent Domain Law (Code Civ. Proc., § 1230.010 *et seq.)*, or other similar local, state, or federal statute, ordinance, regulation, rule, or decisional law (collectively "Compensatory Laws"). Tenant further acknowledges that it has received full and fair compensation of all Benefits Tenant is or might be or might become entitled to recover from Landlord as a result of, or in any way related to, Expiration of the Tenancy, Landlord's acquisition of the Premises, and Landlord's occupancy and possession of the Premises. Therefore, being fully informed of and understanding the acknowledgments made herein and of Tenant's rights or potential rights to Benefits under the Compensatory Laws, Tenant hereby expressly and unconditionally waives, and releases Landlord from, any and all rights of Tenant to claim, demand, sue for, or receive any Benefits which Tenant is or might be or might become entitled to recover from Landlord as a result of, or in any way related to, Expiration of the Tenancy, Landlord's acquisition of the Premises, and Landlord's occupancy and possession of the Premises.

22. General.

(a) The acceptance by Landlord of any rental or other payments due hereunder with knowledge of the breach of any of the terms, covenants, or provisions of this Lease by Tenant shall not be construed as a waiver of any such breach. The acceptance at any time or times by Landlord of any sum less than that which is required to be paid by Tenant shall, unless Landlord specifically agrees otherwise in writing, be deemed to have been received only on account of the obligation for which it is paid, and shall not be deemed an accord and satisfaction notwithstanding

any provisions to the contrary written on any check or contained in any writing transmitting the same.

(b) The titles to the sections of this Lease are for convenience of reference only and are not a part of this Lease and shall have no effect upon the construction or interpretation of any part of this Lease. Any exhibits attached to this Lease are, however, a part of this Lease. This Lease shall be governed by and construed in accordance with the laws of the State of California, without regard to any otherwise governing principles of conflicts of law. In construing this Lease, none of the parties to it shall have any term or provision construed against it solely by reason of its having drafted the same.

(c) Any provision of this Lease that is invalid, illegal, or unenforceable shall be ineffective to the extent of such invalidity, illegality, or unenforceability without invalidating, diminishing, or rendering unenforceable the rights and obligations of the parties under the remaining provisions of this Lease.

(d) No term or provision of this Lease may be amended, altered, modified, or waived orally or by a course of conduct, but only by an instrument in writing signed by a duly authorized officer or representative of the party against which enforcement of such amendment, alteration, modification, or waiver is sought. Any amendment, alteration, modification, or waiver shall be for such period and subject to such conditions as shall be specified in the written instrument effecting the same. Any waiver shall be effective only in the specific instance and for the specific purpose for which given.

(e) This Lease and all exhibits attached to it constitutes the entire agreement of the parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements (whether written or oral) with respect to that subject matter.

(f) This Lease may be executed in several counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

(g) If either party hereto brings an action to enforce the terms hereof or declare rights hereunder, the prevailing party in such action, on trial or appeal, shall be entitled to reasonable attorneys' fees to be paid by the losing party as fixed by the court.

(h) Time is of the essence of each provision hereof in which time is a factor.

The parties have caused this Lease to be duly executed by their respective duly authorized officers or representatives as of the date first set forth above.

SPACE ABOVE THIS LINE FOR RECORDER'S USE

The undersigned declares that this Memorandum of Lease is exempt from Recording Fees pursuant to California Government Code Section 27383.

Exempt from Documentary Transfer Tax: Lease term less than 35 years.

MEMORANDUM OF LEASE

THIS MEMORANDUM OF LEASE (this "**Memorandum**") is dated as of _____, 2024, and is entered into by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California ("**Tenant**") and the CITY OF BANNING, a California municipal corporation ("**Landlord**").

R E C I T A L S

A. Landlord and Tenant executed that certain Office Lease dated _____, 2024 (the "**Lease**") for space in certain real property located in the City of Banning, County of Riverside, State of California commonly known as the Armory Building, located at 2041 Nicolet Street (APN: 538-082-013) (the "**Property**") described on Exhibit "A" (the "**Premises**").

B. Landlord and Tenant now desire to record this Memorandum in order to comply with California law requiring that municipal leases be recorded.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing recitals, and the covenants and conditions contained in the Lease, Landlord and Tenant hereby agree as follows:

1. Lease. Landlord has leased the Premises to Tenant, and Tenant has leased the Premises from Landlord, upon and subject to the terms and conditions set forth in the Lease. The Lease is hereby incorporated herein by this reference.

2. Term. The term of the Lease commences on _____, 2024, and expires on _____, 2027, unless the Lease is terminated earlier in accordance with the provisions of the Lease.

IN WITNESS WHEREOF, Landlord and Tenant have executed this Memorandum as of the date and year first above written.

RESOLUTION 2024-66

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING AN OFFICE LEASE WITH RIVERSIDE COUNTY ON BEHALF OF THE EMERGENCY MANAGEMENT DEPARTMENT FOR OFFICE SPACE WITHIN THE ARMORY LOCATED AT 2041 W. NICOLET ST. TO BE USED BY THE RADIO AMATEUR EMERGENCY SERVICES (RACES)

WHEREAS, RACES stands for "Radio Amateur Civil Emergency Service" a protocol created by the Federal Emergency Management Agency (FEMA) and the Federal Communications Commission (FCC). Many government agencies across the county train their Auxiliary Communications Service volunteers using RACES protocol. Amateur Radio Operators, also known as Ham Radio Operators, are an important component in an Emergency Communication Plan. The Radios will still operate without cell towers and phone lines; and

WHEREAS, the Pass Area RACES organization is highly trained and is an integral part of the Emergency Response Plan should an emergency occur. The Armory has been designated as the Emergency Operations Command (EOC) and having RACES located in the building will ensure any emergency operation is conducted efficiently; and

WHEREAS, RACES will pay $1 per year for a total of three years, with an option to renew. They will also contribute to the utilities of the Armory at a rate of $100 per month.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves the Office Lease Agreement with Riverside County Emergency Management Services and authorizes the City Manager to sign said agreement.

SECTION 2. The City Clerk shall certify the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions, and record the Agreement with he County of Riverside

PASSED, APPROVED AND ADOPTED this 14th day of May 2024.

Alberto Sanchez, Mayor
City of Banning

EXHIBIT A
Office Lease Agreement with Riverside County
on Behalf of the Emergency Management Department

OFFICE LEASE

(Space in Armory Building)

This OFFICE LEASE ("Lease") is dated _____, 2024, and is entered into by and between the CITY OF BANNING (the "Landlord") and the COUNTY OF RIVERSIDE (the "Tenant") on behalf of the Emergency Management Department.

RECITALS

A. Landlord is the owner of certain real property (the "Property") located in the City of Banning, County of Riverside, State of California, commonly known as the Armory Building (the "Building"), located at 2041 Nicolet Street (APN: 538-082-013).

B. Tenant desires to lease from Landlord, and Landlord desires to lease to Tenant, office space in the Building commonly known as the south office room (approximately 162 square feet of space) described on Exhibit "A" (the "Premises"), upon and subject to the terms and conditions hereinafter set forth.

AGREEMENT

1. Memorandum of Lease; Term; Termination Option.

(a) Concurrently with its execution and delivery of a counterpart original of this Lease, Tenant shall also execute and deliver to Landlord a counterpart of the Memorandum of Lease in substantially the form attached hereto as Exhibit "B" for execution and recording by Landlord, as required by California law.

(b) The term of this Lease shall commence on _____, 2024, and shall expire three (3) calendar years thereafter ("Term"), unless terminated earlier in accordance with the terms of this Lease. Landlord shall give Tenant keys to the door of the Building and the door of the Premises and the alarm code, and Tenant shall not change any locks or codes. Tenant acknowledges that its use of the areas of any portions of the Building and parking areas other than the actual Premises is non-exclusive and is in common with the Landlord and other tenants of the Building.

(c) Either party may terminate this Lease at any time upon sixty (60) days' prior written notice to the other party.

2. Use: Compliance with Laws.

(a) The Premises may be used by Tenant solely for City of Banning and County of Riverside emergency response operations performed by Tenant's volunteer operators of Radio Amateur Civil Emergency Service ("RACES"). RACES is a protocol created by the Federal Emergency Management Agency and the Federal Communications Commission (FCC Part 97, Section 407). The RACES volunteer operators serve Tenant pursuant to guidelines and mandates established by Riverside County emergency management officials. The RACES volunteer operators are: (1) licensed Radio Amateurs; (2) certified by a civil defense agency; (3) able to

communicate on Amateur Radio frequencies during drills, exercises, and emergencies; and (4) the only Amateur Radio operators authorized to transmit during declared emergencies when the President of the United States specifically invokes the *War Powers Act.*

(b) Tenant agrees that the Premises and its use of the Premises will at all times be in strict compliance with all applicable laws, rules, and regulations of all governmental authorities having jurisdiction, and Tenant, at its sole cost and expense, agrees to comply with all such laws, rules, and regulations, including, without limitation, all laws, rules, and regulations requiring the making of structural or extraordinary repairs or replacements to the Premises and all laws, rules, and regulations relating to the use, generation, storage, or release of Hazardous Materials. In addition to Tenant's other obligations of indemnity under this Lease, Tenant agrees to indemnify, protect, defend (by counsel reasonably satisfactory to Landlord) and hold Landlord and its officials, officers, agents, and employees, and each of them, harmless from and against all claims, losses, liabilities, actions, judgments, costs, and expenses (including reasonable attorneys' fees and costs) which they, or any of them, may suffer or incur arising from or relating to the use, generation, storage or release by Tenant, its agents, employees, contractors, guests or invitees of any Hazardous Materials in, on, or about the Premises.

(c) "Hazardous Materials" shall mean any and all of the following:

(i) any substance, product, waste, or other material of any nature whatsoever which is or becomes listed, regulated, or for which liability arises for misuse, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C.A. § 9601 *et seq.*; the Hazardous Materials Transportation Act, 49 U.S.C.A. § 1801 *et seq.*; the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C.A. § 6901 *et seq.*; the Toxic Substances Control Act, 15 U.S.C.A. § 2601 *et seq.*; the Clean Water Act, 33 U.S.C.A. § 1251 *et seq.*; the Insecticide, Fungicide, Rodenticide Act, 7 U.S.C.A. § 136 *et seq.*; the Superfund Amendments and Reauthorization Act, 42 U.S.C.A. § 6901 *et seq.*; the Clean Air Act, 42 U.S.C.A. § 7401 *et seq.*; the Safe Drinking Water Act, 42 U.S.C.A. § 300f *et seq.*; the Solid Waste Disposal Act, 42 U.S.C.A. § 6901 *et seq.*; the Surface Mining Control and Reclamation Act, 30 U.S.C.A. § 1201 *et seq.*; the Emergency Planning and Community Right to Know Act, 42 U.S.C.A. § 11001 *et seq.*; the Occupational Safety and Health Act, 29 U.S.C.A. §§ 655 and 657; the Hazardous Waste Control Act, Health & Saf. Code, § 25100 *et seq.*; the Hazardous Substance Account Act, Health & Saf. Code, § 25330 *et seq.*; the California Safe Drinking Water and Toxic Enforcement Act, Health & Saf. Code, § 25249.5 *et seq.*; the Underground Storage of Hazardous Substances, Health & Saf. Code, § 25280 *et seq.*; the Carpenter-Presley-Tanner Hazardous Substance Account Act, Health & Saf. Code, § 25300 *et seq.*; the Hazardous Waste Management Act, Health & Saf. Code, § 25170.1 *et seq.*; the Hazardous Materials Response Plans and Inventory, Health & Saf. Code, § 25001 *et seq.*; the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 *et seq.*, all as they may from time to time be amended;

(ii) any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or for which liability for misuse arises pursuant to any other federal, state, or local statute, law, ordinance, resolution, code, rule, regulation, order, or decree due to its hazardous, toxic or dangerous nature;

(iii) any petroleum, crude oil, or any substance, product, waste, or other material of any nature whatsoever that contains gasoline, diesel fuel, or other petroleum hydrocarbons other than petroleum and petroleum products contained within regularly operated motor vehicles; and

(iv) polychlorinated biphenyls (PCB), radon gas, urea formaldehyde, asbestos, and lead.

3. Rent. As rent for the Premises, Tenant agrees to pay to Landlord the sum of One and No/100 Dollar ($1.00) per year without prior notice and without offset or deduction.

4. Concessions. Landlord is not providing any so-called tenant concessions or allowances.

5. CASp Statement; "AS-IS" Premises.

(a) The Premises have not been inspected by a Certified Access Specialist (CASp). A CASp can inspect the subject premises and determine whether they comply with all of the applicable construction-related accessibility standards under state law. Although state law does not require a CASp inspection of the subject premises, a commercial property owner or lessor may not prohibit Tenant or a tenant from obtaining a CASp inspection of the subject premises for the occupancy or potential occupancy of Tenant or a tenant, if requested by Tenant or a tenant. The parties must mutually agree on the arrangements for the time and manner of the CASp inspection, the payment of the fee for the CASp inspection, and the cost of making any repairs necessary to correct violations of construction-related accessibility standards within the subject premises.

(b) Landlord and Tenant hereby agree that Landlord will not be obligated to obtain or pay for such an inspection report, and will not make or pay for any necessary repairs or alterations (all of which shall be the responsibility of the Tenant under this Lease).

(c) Tenant acknowledges that it has inspected the Premises and Tenant warrants and agrees that it is thoroughly familiar with the Premises and all aspects thereof, including, without limitation, the physical condition of the Premises, the zoning of the Premises and all other restrictions and limitations applicable to the Premises (whether or not of public record).

(d) Tenant acknowledges and agrees that the Premises are satisfactory to Tenant in all respects. Tenant agrees that neither Landlord nor any one acting on Landlord's behalf has made any representation or warranty of any kind or nature whatsoever respecting the condition of the Premises, their suitability for Tenant's use, or any other matter relating to the Premises (including, without limitation, the environmental condition of the Premises) or this Lease, and Tenant agrees that it is leasing the Premises in their "AS-IS CONDITION AND WITH ALL FAULTS."

6. Maintenance.

(a) Tenant agrees that it will, at its sole cost and expense, maintain the Premises and all portions thereof in a good, clean, and safe condition and state of repair. Tenant agrees that

Landlord has no obligation of any kind or nature to maintain, repair, or replace the Premises or any portion of the Premises.

(b) Tenant agrees that Tenant is solely responsible for the security, protection, and insuring of its equipment, materials, and other property, and that of its employees, servants, and contractors, located on or about the Premises. Tenant agrees that Landlord will have no liability of any kind or nature respecting any loss or theft of, or damage to, any such equipment, materials, or other property.

7. Insurance.

(a) Throughout the term of this Lease, Tenant shall pay for and maintain in full force and effect all policies of insurance required hereunder with an insurance company(ies) either (i) admitted by the California Insurance Commissioner to do business in the State of California and rated not less than "A-VII" in Best's Insurance Rating Guide, or (ii) authorized by the City Manager or his/her designee at any time and in his/her sole discretion, including Tenant's self-insurance program. The following policies of insurance or their equivalent as part of a program(s) of self-insurance acceptable to both parties, are required:

(i) Commercial general liability insurance which shall be at least as broad as Insurance Services Office (ISO) form CG 00 01 and shall include insurance for "bodily injury" and "property damage," including premises and operation, completed operations, and contractual liability (including, without limitation, indemnity obligations under this Lease) with limits of liability of not less than One Million Dollars ($1,000,000) per occurrence and Two Million Dollars ($2,000,000) general aggregate for bodily injury and property damage.

(ii) Commercial automobile liability insurance which shall be at least as broad as the most current version of Insurance Service Office (ISO) Business Auto Coverage Form CA 00 01, and include coverage for all owned, hired, and non-owned automobiles or other licensed vehicles (Code 1 Any Auto) with limits of liability of not less than One Million Dollars ($1,000,000) per accident for bodily injury and property.

(iii) Workers' compensation insurance as required under the California Labor Code.

(iv) Property insurance against all risks of loss to any tenant improvements or betterments, at full replacement cost with no coinsurance penalty provision.

(b) In the event Tenant purchases an Umbrella or Excess insurance policy(ies) to meet the minimum limits of insurance set forth above, this insurance policy(ies) shall "follow form" and afford no less coverage than the primary insurance policy(ies).

(c) Tenant shall be responsible for payment of any deductibles contained in any insurance policies required hereunder and Tenant shall also be responsible for payment of any self-insured retentions. Any deductibles or self-insured retentions must be declared to, and approved by, the City Manager or his or her designee. At the option of the City Manager, or his or her designee, either (i) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects Landlord, its officers, officials, employees, agents and volunteers; or (ii) Tenant shall

provide a financial guarantee, satisfactory to the City Manager, or his or her designee, guaranteeing payment of losses and related investigations, claim administration, and defense expenses. At no time shall Landlord, its officers, officials, employees, agents, or volunteers be responsible for the payment of any deductibles or self-insured retentions.

(d) All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled, non-renewed, or reduced in coverage or in limits except after thirty (30) calendar days' written notice by certified mail, return receipt requested, has been given to Landlord. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Tenant shall furnish Landlord with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during this Lease, Tenant shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than fifteen (15) calendar days prior to the expiration date of the expiring policy.

(e) The General Liability insurance policy shall be written on an occurrence form and shall name Landlord and its officers, officials, employees, agents, and volunteers as an additional insured. Such policy(ies) of insurance shall be endorsed so Tenant's insurance shall be primary and no contribution shall be required of Landlord, its officers, officials, employees, agents, or volunteers. The coverage(s) shall contain no special limitations on the scope of protection afforded to Landlord and its officers, officials, employees, agents, and volunteers. Should Tenant maintain insurance with broader coverage and/or limits of liability greater than those shown above, Landlord requires and shall be entitled to the broader coverage and/or the higher limits of liability maintained by Tenant. Any workers' compensation insurance policy shall contain a waiver of subrogation as to Landlord and its officers, officials, employees, agents, and volunteers. The property insurance policy shall name Landlord as a loss payee.

(f) Upon Landlord's request, Tenant shall immediately furnish Landlord with a complete copy of any insurance policy required under this Lease, including all endorsements, with said copy certified by the underwriter to be a true and correct copy of the original policy. This requirement shall survive expiration or termination of this Lease.

(g) The fact that insurance is obtained by Tenant shall not be deemed to release or diminish Tenant's liability, including, without limitation, liability under the indemnity provisions of this Lease. The duty to indemnify Landlord and its officers, officials, employees, agents, and volunteers shall apply to all claims and liability regardless of whether any insurance policies are applicable. The policy limits do not act as a limitation upon the amount of indemnification to be provided by Tenant. Approval or purchase of any insurance contracts or policies shall in no way relieve from liability nor limit the liability of Tenant, its board members, officers, officials, employees, members, agents, volunteers, persons under Tenant's supervision, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or anyone employed directly or indirectly by any of them.

(h) Tenant and its insurers hereby waive all rights of recovery against Landlord and its officers, officials, employees, agents, and volunteers, on account of injury, loss by, or damage to Tenant or its officers, officials, employees, members, agents, volunteers, persons under Tenant's supervision, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or

anyone employed directly or indirectly by any of them, or its property or the property of others under its care, custody and control. Tenant shall give notice to its insurers that this waiver of subrogation is contained in this Lease. This requirement shall survive termination or expiration of this Lease.

(i) If Tenant should sublease the Premises under this Lease, Tenant shall require sub-lessee to provide insurance protection in favor of Landlord, its officers, officials, employees, agents, and volunteers in accordance with the terms of each of the preceding paragraphs, except that the sub-lessee's certificates and endorsements shall be on file with Tenant and Landlord prior to the commencement of any sublease.

8. Damage/Destruction of Tenant Property. Landlord has no obligation to reimburse Tenant for the loss of or damage to fixtures, equipment or other personal property, except for loss or damage as is caused by the active gross negligence or willful misconduct of Landlord or its officers, employees, or agents. Tenant may insure all fixtures, equipment, or other personal property for its own protection if it so desires.

9. Indemnification.

(a) Tenant shall indemnify, hold harmless, and defend Landlord and each of its officers, officials, employees, agents, and volunteers from any and all loss, liability, fines, penalties, forfeitures, costs, and damages (whether in contract, tort, or strict liability, including, without limitation, personal injury, death at any time, and property damage, including damage by fire or other casualty) incurred by Landlord, Tenant, or any other person, and from any and all claims, demands, and actions in law or equity (including attorneys' fees and litigation expenses), arising or alleged to have arisen directly or indirectly out of: (i) the occupancy, maintenance, and use of the Premises and/or; (ii) the performance of this Lease. Tenant's obligations under the preceding sentence shall apply regardless of whether Landlord or any of its officers, officials, employees, agents, or volunteers are negligent, but shall not apply to any loss, liability, fines, penalties, forfeitures, costs, or damages caused solely by the gross negligence, or by the willful misconduct, of Landlord or any of its officers, officials, employees, agents, or volunteers.

(b) Should Tenant sublease the Premises under this Lease, Tenant shall require each sub-lessee to indemnify, hold harmless, and defend Landlord and each of its officers, officials, employees, agents, and volunteers in accordance with the terms of the preceding paragraph.

(c) This requirement shall survive termination or expiration of this Lease.

10. Utilities. Tenant agrees to pay, as additional rent, without prior demand and without deduction or offset, on or before the first business day of each calendar month (prorated for any partial calendar month during the Term of this Lease), the sum of One Hundred and No/100 Dollars ($100.00) per month for water, sewer, gas, heat, light, power, and all other utilities or services of any kind supplied to the Premises. It is agreed that Landlord is not liable for any failure or interruption of any utility or service, and the failure or interruption of any utility or service will not entitle Tenant to terminate this Lease or stop making any rental or other payments due under this Lease.

11. Taxes. Tenant acknowledges that this Lease may create a possessory interest subject to taxation and that Tenant may be subject to payment of any and all taxes levied on that possessory interest. Tenant shall also pay any property taxes assessed on its personal property.

12. Alterations.

(a) Tenant agrees that it will not make any alterations or improvements to the Premises, or any portion of the Premises, without Landlord's prior written consent in its sole and absolute discretion. No alterations or additions may affect the structural portions of the Premises, including, without limitation, the exterior or interior load-bearing walls, the foundation, or the roof of the Premises. Landlord shall be under no obligation to give its consent. If Landlord consents to the making of any alterations or improvements, Tenant agrees that such alterations or improvements will be made in strict compliance with all applicable laws, rules, and regulations of all governmental authorities having jurisdiction, will be performed in a good and workmanlike manner, and will be made in compliance with such other conditions, including, without limitation, the obtaining of performance and completion bonds, as Landlord may require in connection with the granting of its consent.

(b) Tenant agrees that it will pay, when due, all claims for labor or materials furnished or alleged to have been furnished to or for Tenant at or for use on the Premises, which claims are or may be secured by any mechanics' or materialmen's lien against the Premises or any interest therein. All alterations and improvements made by Tenant shall, at Landlord's option and at Tenant's sole cost and expense, be removed from the Premises at the end of the term of this Lease and the Premises restored to their condition prior to the making of such alterations or improvements.

13. Tenant's Property. All trade fixtures, equipment, and personal property of Tenant located at the Premises will remain the property of Tenant during the term of this Lease and may be removed by Tenant at any time and shall be removed by Tenant prior to the expiration or other termination of the term of this Lease. If Tenant does not do so, Landlord may retain or dispose of any such remaining fixtures, equipment, and personal property without obligation or liability to Tenant, and Tenant hereby waives all statutes and other laws to the contrary. Tenant, at Tenant's cost and expense, must promptly repair all damage to the Premises occasioned by Tenant's removal of its trade fixtures, equipment, and personal property.

14. Premises Damage and Destruction. If the Premises or any portion thereof are damaged or destroyed by any casualty (whether or not insured), either party may terminate this Lease by written notice to the other.

15. Assignment, Subletting, and Invitees. Tenant may not assign any of its rights or delegate any of its duties under this Lease, or sublet all or any part of the Premises nor permit the occupancy thereof by any other person or entity, except that the RACES volunteers operators shall be permitted invitees of Tenant's in the Premises. Within seven (7) business days of the date of this Lease, Tenant shall provide Landlord with a list of names of the RACES volunteer operators who Tenant intends to invite and permit on the Premises, and shall provide Landlord with an updated list of such operators within five (5) calendar days of Tenant's subsequent changes to permitted invitees.

16. Tenant Default. The occurrence of any one or more of the following shall constitute a default by Tenant:

(a) Failure by Tenant to make payment of rent or any other payments required to be made by Tenant hereunder within five (5) business days after written notice that they are past due.

(b) Failure by Tenant to keep and maintain any of the insurance required to be kept and maintained by Tenant under this Lease.

(c) Failure by Tenant to observe or perform any of the covenants or provisions of this Lease, other than as provided in subsections (b) and (c) of this Section 16, when such failure continues for a period of thirty (30) days after written notice of such failure is given by Landlord to Tenant; provided, that if the nature of Tenant's failure is such that more than thirty (30) days are reasonably required for its cure, then Tenant will not be deemed to be in default if Tenant promptly commences such cure and thereafter diligently prosecutes such cure to completion.

17. Remedies. If Tenant is in default, then, in addition to all other rights and remedies which Landlord may have at law or in equity, Landlord has the following rights and remedies which are not exclusive but are cumulative:

(a) To the extent permitted by law, Landlord can, with or without terminating this Lease, reenter the Premises and remove all property and persons therefrom, and any such property may be removed and stored in a public warehouse or elsewhere at the cost and for the account of Tenant. If Landlord elects to reenter or shall take possession of the Premises pursuant to legal proceedings or pursuant to any notice provided by law, and if Landlord has not elected to terminate this Lease, Landlord may either recover all rent as it becomes due under this Lease or relet the Premises or any part or parts thereof for such term or terms and upon such provisions as Landlord may deem advisable and will have the right to make repairs to and alterations of the Premises. No reentry or taking possession of the Premises by Landlord is to be construed as an election to terminate this Lease unless a written notice of such intention is given to Tenant by Landlord. Notwithstanding any reletting without termination by Landlord because of Tenant's default, Landlord may at any time after such reletting elect to terminate this Lease because of such default if Landlord elects to relet the Premises without terminating this Lease, then rent received by Landlord therefrom will be applied as follows:

(i) First, to any indebtedness from Tenant to Landlord other than rent due from Tenant;

(ii) Second, to all costs and expenses, including, without limitation, for maintenance, repairs, or alterations, incurred by Landlord in connection with reletting the Premises; and

(iii) Third, to the payment of rent due and unpaid under this Lease and the residual, if any, will be held by Landlord and applied in payment of future rent as the same may become due and payable under this Lease and to any damages and other amounts that Landlord is otherwise entitled to under this Lease. Should that portion of such rent received from such reletting during any month, which is applied to the payment of rent hereunder, be less than

the rent payable hereunder during that month by Tenant, then Tenant agrees to pay such deficiency to Landlord immediately upon demand. In no event will Tenant be entitled to any excess rent received by Landlord from such reletting.

(b) Landlord can terminate Tenant's right to possession of the Premises at any time. No act by Landlord other than giving written notice to Tenant will terminate this Lease. Acts of maintenance, efforts to relet the Premises, or the appointment of a receiver on Landlord's initiative to protect Landlord's interest under this Lease shall not constitute a termination of Tenant's right to possession. On termination, Landlord has the right to recover from Tenant any amount, and court costs, necessary to compensate Landlord for all detriment proximately caused by Tenant's default.

(c) Without waiving the default, Landlord can, at its sole option, pay such sums and/or take such actions as are necessary in Landlord's reasonable judgment in order to cure the default, and all sums expended or incurred by Landlord in connection therewith, together with interest thereon at the maximum rate permitted by law, shall be paid by Tenant to Landlord immediately on demand.

18. Landlord Entry. Landlord and its authorized representatives shall have the right upon reasonable prior written notice to Tenant to enter all portions of the Premises for any of the following purposes: (a) to determine whether the Premises are in good condition and whether Tenant is complying with its obligations under this Lease; (b) to inspect the Premises; (c) in connection with Landlord's design and construction planning respecting Landlord's future use of the Premises; and (d) to post notices of non-responsibility. Notwithstanding the foregoing to the contrary, Landlord and its authorized representatives shall have the right to enter the Premises at any time, and without notice to Tenant, where an emergency situation necessitates such entry. No exercise by Landlord of its rights under this Section shall entitle Tenant to any damages for any injury or inconvenience occasioned thereby or to any abatement of rent or other amounts payable under this Lease.

19. Surrender of Premises. Upon the expiration or other termination of the term of this Lease, Tenant agrees to surrender possession of the Premises, and every part thereof, to Landlord in good order, condition, and repair, ordinary wear and tear alone excepted. "Ordinary wear and tear" does not include any damage or deterioration that would have been prevented by good maintenance practice or by Tenant performing all of its obligations under this Lease.

20. Notices. Except as otherwise provided, all notices required or permitted to be given under this Lease must be in writing and addressed to the parties at their respective notice addresses set forth below; provided, that notices to Tenant may also be effectively given in writing and addressed to Tenant at the Premises address. Notices must be given by commercial delivery service) or by first-class mail, postage prepaid. Notices will be deemed effectively given, in the case of overnight messenger delivery, upon receipt (or if receipt is refused, upon attempted delivery), and in the case of mailing, three (3) days following deposit into the custody of the United States Postal Service (or inability to deliver, as shown on the return receipt). The notice addresses of the parties are as follows:

If to Landlord:

City of Banning
Attention: City Manager
99 East Ramsey Street
Banning, California 92220

If to Tenant:

Radio Amateur Civil Emergency Service
c/o Riverside County Emergency Management Department
Attention: Erik Ramirez
450 E. Alessandro Boulevard
Riverside, California 92508

21. Waiver and Release of Relocation Benefits. Tenant acknowledges that upon the expiration or earlier termination of the Term, including any extension thereof, or upon termination of any holdover tenancy (collectively "Expiration of Tenancy"), Tenant might be or become eligible to receive compensation, reimbursement, assistance, including, without limitation, the fair market value of real and personal property, loss of goodwill, loss of profits, actual and reasonable expenses for moving a business, loss of tangible personal property as a result of moving the business, expenses incurred in searching for a replacement site for the business, expenses to reestablish the business at the new site, "in-lieu payments," and other such benefits (collectively "Benefits") under the California Relocation Assistance Act (Gov. Code, § 7260 *et seq.*), Title 25 of the California Code of Regulations, Article 1, § 19 of the California Constitution, the California Eminent Domain Law (Code Civ. Proc., § 1230.010 *et seq.),* or other similar local, state, or federal statute, ordinance, regulation, rule, or decisional law (collectively "Compensatory Laws"). Tenant further acknowledges that it has received full and fair compensation of all Benefits Tenant is or might be or might become entitled to recover from Landlord as a result of, or in any way related to, Expiration of the Tenancy, Landlord's acquisition of the Premises, and Landlord's occupancy and possession of the Premises. Therefore, being fully informed of and understanding the acknowledgments made herein and of Tenant's rights or potential rights to Benefits under the Compensatory Laws, Tenant hereby expressly and unconditionally waives, and releases Landlord from, any and all rights of Tenant to claim, demand, sue for, or receive any Benefits which Tenant is or might be or might become entitled to recover from Landlord as a result of, or in any way related to, Expiration of the Tenancy, Landlord's acquisition of the Premises, and Landlord's occupancy and possession of the Premises.

22. General.

(a) The acceptance by Landlord of any rental or other payments due hereunder with knowledge of the breach of any of the terms, covenants, or provisions of this Lease by Tenant shall not be construed as a waiver of any such breach. The acceptance at any time or times by Landlord of any sum less than that which is required to be paid by Tenant shall, unless Landlord specifically agrees otherwise in writing, be deemed to have been received only on account of the obligation for which it is paid, and shall not be deemed an accord and satisfaction notwithstanding any provisions to the contrary written on any check or contained in any writing transmitting the same.

(b) The titles to the sections of this Lease are for convenience of reference only and are not a part of this Lease and shall have no effect upon the construction or interpretation of any part of this Lease. Any exhibits attached to this Lease are, however, a part of this Lease. This Lease shall be governed by and construed in accordance with the laws of the State of California, without regard to any otherwise governing principles of conflicts of law. In construing this Lease, none of the parties to it shall have any term or provision construed against it solely by reason of its having drafted the same.

(c) Any provision of this Lease that is invalid, illegal, or unenforceable shall be ineffective to the extent of such invalidity, illegality, or unenforceability without invalidating, diminishing, or rendering unenforceable the rights and obligations of the parties under the remaining provisions of this Lease.

(d) No term or provision of this Lease may be amended, altered, modified, or waived orally or by a course of conduct, but only by an instrument in writing signed by a duly authorized officer or representative of the party against which enforcement of such amendment, alteration, modification, or waiver is sought. Any amendment, alteration, modification, or waiver shall be for such period and subject to such conditions as shall be specified in the written instrument effecting the same. Any waiver shall be effective only in the specific instance and for the specific purpose for which given.

(e) This Lease and all exhibits attached to it constitutes the entire agreement of the parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements (whether written or oral) with respect to that subject matter.

(f) This Lease may be executed in several counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

(g) If either party hereto brings an action to enforce the terms hereof or declare rights hereunder, the prevailing party in such action, on trial or appeal, shall be entitled to reasonable attorneys' fees to be paid by the losing party as fixed by the court.

(h) Time is of the essence of each provision hereof in which time is a factor.

The parties have caused this Lease to be duly executed by their respective duly authorized officers or representatives as of the date first set forth above.

SPACE ABOVE THIS LINE FOR RECORDER'S USE

The undersigned declares that this Memorandum of Lease is exempt from Recording Fees pursuant to California Government Code Section 27383.

Exempt from Documentary Transfer Tax: Lease term less than 35 years.

MEMORANDUM OF LEASE

THIS MEMORANDUM OF LEASE (this "**Memorandum**") is dated as of _____, 2024, and is entered into by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California ("**Tenant**") and the CITY OF BANNING, a California municipal corporation ("**Landlord**").

RECITALS

A. Landlord and Tenant executed that certain Office Lease dated _____, 2024 (the "**Lease**") for space in certain real property located in the City of Banning, County of Riverside, State of California commonly known as the Armory Building, located at 2041 Nicolet Street (APN: 538-082-013) (the "**Property**") described on Exhibit "A" (the "**Premises**").

B. Landlord and Tenant now desire to record this Memorandum in order to comply with California law requiring that municipal leases be recorded.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing recitals, and the covenants and conditions contained in the Lease, Landlord and Tenant hereby agree as follows:

1. Lease. Landlord has leased the Premises to Tenant, and Tenant has leased the Premises from Landlord, upon and subject to the terms and conditions set forth in the Lease. The Lease is hereby incorporated herein by this reference.

2. Term. The term of the Lease commences on _____, 2024, and expires on _____, 2027, unless the Lease is terminated earlier in accordance with the provisions of the Lease.

IN WITNESS WHEREOF, Landlord and Tenant have executed this Memorandum as of the date and year first above written.

OFFICE LEASE

(Space in Armory Building)

This OFFICE LEASE ("Lease") is dated _____, 2024, and is entered into by and between the CITY OF BANNING (the "Landlord") and the COUNTY OF RIVERSIDE (the "Tenant") on behalf of the Emergency Management Department.

RECITALS

A. Landlord is the owner of certain real property (the "Property") located in the City of Banning, County of Riverside, State of California, commonly known as the Armory Building (the "Building"), located at 2041 Nicolet Street (APN: 538-082-013).

B. Tenant desires to lease from Landlord, and Landlord desires to lease to Tenant, office space in the Building commonly known as the south office room (approximately 162 square feet of space) described on Exhibit "A" (the "Premises"), upon and subject to the terms and conditions hereinafter set forth.

AGREEMENT

1. Memorandum of Lease; Term; Termination Option.

(a) Concurrently with its execution and delivery of a counterpart original of this Lease, Tenant shall also execute and deliver to Landlord a counterpart of the Memorandum of Lease in substantially the form attached hereto as Exhibit "B" for execution and recording by Landlord, as required by California law.

(b) The term of this Lease shall commence on _____, 2024, and shall expire three (3) calendar years thereafter ("Term"), unless terminated earlier in accordance with the terms of this Lease. Landlord shall give Tenant keys to the door of the Building and the door of the Premises and the alarm code, and Tenant shall not change any locks or codes. Tenant acknowledges that its use of the areas of any portions of the Building and parking areas other than the actual Premises is non-exclusive and is in common with the Landlord and other tenants of the Building.

(c) Either party may terminate this Lease at any time upon sixty (60) days' prior written notice to the other party.

2. Use: Compliance with Laws.

(a) The Premises may be used by Tenant solely for City of Banning and County of Riverside emergency response operations performed by Tenant's volunteer operators of Radio Amateur Civil Emergency Service ("RACES"). RACES is a protocol created by the Federal Emergency Management Agency and the Federal Communications Commission (FCC Part 97, Section 407). The RACES volunteer operators serve Tenant pursuant to guidelines and mandates established by Riverside County emergency management officials. The RACES volunteer operators are: (1) licensed Radio Amateurs; (2) certified by a civil defense agency; (3) able to

communicate on Amateur Radio frequencies during drills, exercises, and emergencies; and (4) the only Amateur Radio operators authorized to transmit during declared emergencies when the President of the United States specifically invokes the *War Powers Act*.

(b) Tenant agrees that the Premises and its use of the Premises will at all times be in strict compliance with all applicable laws, rules, and regulations of all governmental authorities having jurisdiction, and Tenant, at its sole cost and expense, agrees to comply with all such laws, rules, and regulations, including, without limitation, all laws, rules, and regulations requiring the making of structural or extraordinary repairs or replacements to the Premises and all laws, rules, and regulations relating to the use, generation, storage, or release of Hazardous Materials. In addition to Tenant's other obligations of indemnity under this Lease, Tenant agrees to indemnify, protect, defend (by counsel reasonably satisfactory to Landlord) and hold Landlord and its officials, officers, agents, and employees, and each of them, harmless from and against all claims, losses, liabilities, actions, judgments, costs, and expenses (including reasonable attorneys' fees and costs) which they, or any of them, may suffer or incur arising from or relating to the use, generation, storage or release by Tenant, its agents, employees, contractors, guests or invitees of any Hazardous Materials in, on, or about the Premises.

(c) "Hazardous Materials" shall mean any and all of the following:

(i) any substance, product, waste, or other material of any nature whatsoever which is or becomes listed, regulated, or for which liability arises for misuse, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C.A. § 9601 *et seq.*; the Hazardous Materials Transportation Act, 49 U.S.C.A. § 1801 *et seq.*; the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C.A. § 6901 *et seq.*; the Toxic Substances Control Act, 15 U.S.C.A. § 2601 *et seq.*; the Clean Water Act, 33 U.S.C.A. § 1251 *et seq.*; the Insecticide, Fungicide, Rodenticide Act, 7 U.S.C.A. § 136 *et seq.*; the Superfund Amendments and Reauthorization Act, 42 U.S.C.A. § 6901 *et seq.*; the Clean Air Act, 42 U.S.C.A. § 7401 *et seq.*; the Safe Drinking Water Act, 42 U.S.C.A. § 300f *et seq.*; the Solid Waste Disposal Act, 42 U.S.C.A. § 6901 *et seq.*; the Surface Mining Control and Reclamation Act, 30 U.S.C.A. § 1201 *et seq.*; the Emergency Planning and Community Right to Know Act, 42 U.S.C.A. § 11001 *et seq.*; the Occupational Safety and Health Act, 29 U.S.C.A. §§ 655 and 657; the Hazardous Waste Control Act, Health & Saf. Code, § 25100 *et seq.*; the Hazardous Substance Account Act, Health & Saf. Code, § 25330 *et seq.*; the California Safe Drinking Water and Toxic Enforcement Act, Health & Saf. Code, § 25249.5 *et seq.*; the Underground Storage of Hazardous Substances, Health & Saf. Code, § 25280 *et seq.*; the Carpenter-Presley-Tanner Hazardous Substance Account Act, Health & Saf. Code, § 25300 *et seq.*; the Hazardous Waste Management Act, Health & Saf. Code, § 25170.1 *et seq.*; the Hazardous Materials Response Plans and Inventory, Health & Saf. Code, § 25001 *et seq.*; the Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 *et seq.*, all as they may from time to time be amended;

(ii) any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or for which liability for misuse arises pursuant to any other federal, state, or local statute, law, ordinance, resolution, code, rule, regulation, order, or decree due to its hazardous, toxic or dangerous nature;

(iii) any petroleum, crude oil, or any substance, product, waste, or other material of any nature whatsoever that contains gasoline, diesel fuel, or other petroleum hydrocarbons other than petroleum and petroleum products contained within regularly operated motor vehicles; and

(iv) polychlorinated biphenyls (PCB), radon gas, urea formaldehyde, asbestos, and lead.

3. Rent. As rent for the Premises, Tenant agrees to pay to Landlord the sum of One and No/100 Dollar ($1.00) per year without prior notice and without offset or deduction.

4. Concessions. Landlord is not providing any so-called tenant concessions or allowances.

5. CASp Statement; "AS-IS" Premises.

(a) The Premises have not been inspected by a Certified Access Specialist (CASp). A CASp can inspect the subject premises and determine whether they comply with all of the applicable construction-related accessibility standards under state law. Although state law does not require a CASp inspection of the subject premises, a commercial property owner or lessor may not prohibit Tenant or a tenant from obtaining a CASp inspection of the subject premises for the occupancy or potential occupancy of Tenant or a tenant, if requested by Tenant or a tenant. The parties must mutually agree on the arrangements for the time and manner of the CASp inspection, the payment of the fee for the CASp inspection, and the cost of making any repairs necessary to correct violations of construction-related accessibility standards within the subject premises.

(b) Landlord and Tenant hereby agree that Landlord will not be obligated to obtain or pay for such an inspection report, and will not make or pay for any necessary repairs or alterations (all of which shall be the responsibility of the Tenant under this Lease).

(c) Tenant acknowledges that it has inspected the Premises and Tenant warrants and agrees that it is thoroughly familiar with the Premises and all aspects thereof, including, without limitation, the physical condition of the Premises, the zoning of the Premises and all other restrictions and limitations applicable to the Premises (whether or not of public record).

(d) Tenant acknowledges and agrees that the Premises are satisfactory to Tenant in all respects. Tenant agrees that neither Landlord nor any one acting on Landlord's behalf has made any representation or warranty of any kind or nature whatsoever respecting the condition of the Premises, their suitability for Tenant's use, or any other matter relating to the Premises (including, without limitation, the environmental condition of the Premises) or this Lease, and Tenant agrees that it is leasing the Premises in their "AS-IS CONDITION AND WITH ALL FAULTS."

6. Maintenance.

(a) Tenant agrees that it will, at its sole cost and expense, maintain the Premises and all portions thereof in a good, clean, and safe condition and state of repair. Tenant agrees that

Landlord has no obligation of any kind or nature to maintain, repair, or replace the Premises or any portion of the Premises.

(b) Tenant agrees that Tenant is solely responsible for the security, protection, and insuring of its equipment, materials, and other property, and that of its employees, servants, and contractors, located on or about the Premises. Tenant agrees that Landlord will have no liability of any kind or nature respecting any loss or theft of, or damage to, any such equipment, materials, or other property.

7. Insurance.

(a) Throughout the term of this Lease, Tenant shall pay for and maintain in full force and effect all policies of insurance required hereunder with an insurance company(ies) either (i) admitted by the California Insurance Commissioner to do business in the State of California and rated not less than "A-VII" in Best's Insurance Rating Guide, or (ii) authorized by the City Manager or his/her designee at any time and in his/her sole discretion, including Tenant's self-insurance program. The following policies of insurance or their equivalent as part of a program(s) of self-insurance acceptable to both parties, are required:

(i) Commercial general liability insurance which shall be at least as broad as Insurance Services Office (ISO) form CG 00 01 and shall include insurance for "bodily injury" and "property damage," including premises and operation, completed operations, and contractual liability (including, without limitation, indemnity obligations under this Lease) with limits of liability of not less than One Million Dollars ($1,000,000) per occurrence and Two Million Dollars ($2,000,000) general aggregate for bodily injury and property damage.

(ii) Commercial automobile liability insurance which shall be at least as broad as the most current version of Insurance Service Office (ISO) Business Auto Coverage Form CA 00 01, and include coverage for all owned, hired, and non-owned automobiles or other licensed vehicles (Code 1 Any Auto) with limits of liability of not less than One Million Dollars ($1,000,000) per accident for bodily injury and property.

(iii) Workers' compensation insurance as required under the California Labor Code.

(iv) Property insurance against all risks of loss to any tenant improvements or betterments, at full replacement cost with no coinsurance penalty provision.

(b) In the event Tenant purchases an Umbrella or Excess insurance policy(ies) to meet the minimum limits of insurance set forth above, this insurance policy(ies) shall "follow form" and afford no less coverage than the primary insurance policy(ies).

(c) Tenant shall be responsible for payment of any deductibles contained in any insurance policies required hereunder and Tenant shall also be responsible for payment of any self-insured retentions. Any deductibles or self-insured retentions must be declared to, and approved by, the City Manager or his or her designee. At the option of the City Manager, or his or her designee, either (i) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects Landlord, its officers, officials, employees, agents and volunteers; or (ii) Tenant shall

provide a financial guarantee, satisfactory to the City Manager, or his or her designee, guaranteeing payment of losses and related investigations, claim administration, and defense expenses. At no time shall Landlord, its officers, officials, employees, agents, or volunteers be responsible for the payment of any deductibles or self-insured retentions.

(d) All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled, non-renewed, or reduced in coverage or in limits except after thirty (30) calendar days' written notice by certified mail, return receipt requested, has been given to Landlord. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Tenant shall furnish Landlord with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during this Lease, Tenant shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than fifteen (15) calendar days prior to the expiration date of the expiring policy.

(e) The General Liability insurance policy shall be written on an occurrence form and shall name Landlord and its officers, officials, employees, agents, and volunteers as an additional insured. Such policy(ies) of insurance shall be endorsed so Tenant's insurance shall be primary and no contribution shall be required of Landlord, its officers, officials, employees, agents, or volunteers. The coverage(s) shall contain no special limitations on the scope of protection afforded to Landlord and its officers, officials, employees, agents, and volunteers. Should Tenant maintain insurance with broader coverage and/or limits of liability greater than those shown above, Landlord requires and shall be entitled to the broader coverage and/or the higher limits of liability maintained by Tenant. Any workers' compensation insurance policy shall contain a waiver of subrogation as to Landlord and its officers, officials, employees, agents, and volunteers. The property insurance policy shall name Landlord as a loss payee.

(f) Upon Landlord's request, Tenant shall immediately furnish Landlord with a complete copy of any insurance policy required under this Lease, including all endorsements, with said copy certified by the underwriter to be a true and correct copy of the original policy. This requirement shall survive expiration or termination of this Lease.

(g) The fact that insurance is obtained by Tenant shall not be deemed to release or diminish Tenant's liability, including, without limitation, liability under the indemnity provisions of this Lease. The duty to indemnify Landlord and its officers, officials, employees, agents, and volunteers shall apply to all claims and liability regardless of whether any insurance policies are applicable. The policy limits do not act as a limitation upon the amount of indemnification to be provided by Tenant. Approval or purchase of any insurance contracts or policies shall in no way relieve from liability nor limit the liability of Tenant, its board members, officers, officials, employees, members, agents, volunteers, persons under Tenant's supervision, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or anyone employed directly or indirectly by any of them.

(h) Tenant and its insurers hereby waive all rights of recovery against Landlord and its officers, officials, employees, agents, and volunteers, on account of injury, loss by, or damage to Tenant or its officers, officials, employees, members, agents, volunteers, persons under Tenant's supervision, vendors, suppliers, invitees, consultants, sub-consultants, subcontractors, or

anyone employed directly or indirectly by any of them, or its property or the property of others under its care, custody and control. Tenant shall give notice to its insurers that this waiver of subrogation is contained in this Lease. This requirement shall survive termination or expiration of this Lease.

(i) If Tenant should sublease the Premises under this Lease, Tenant shall require sub-lessee to provide insurance protection in favor of Landlord, its officers, officials, employees, agents, and volunteers in accordance with the terms of each of the preceding paragraphs, except that the sub-lessee's certificates and endorsements shall be on file with Tenant and Landlord prior to the commencement of any sublease.

8. Damage/Destruction of Tenant Property. Landlord has no obligation to reimburse Tenant for the loss of or damage to fixtures, equipment or other personal property, except for loss or damage as is caused by the active gross negligence or willful misconduct of Landlord or its officers, employees, or agents. Tenant may insure all fixtures, equipment, or other personal property for its own protection if it so desires.

9. Indemnification.

(a) Tenant shall indemnify, hold harmless, and defend Landlord and each of its officers, officials, employees, agents, and volunteers from any and all loss, liability, fines, penalties, forfeitures, costs, and damages (whether in contract, tort, or strict liability, including, without limitation, personal injury, death at any time, and property damage, including damage by fire or other casualty) incurred by Landlord, Tenant, or any other person, and from any and all claims, demands, and actions in law or equity (including attorneys' fees and litigation expenses), arising or alleged to have arisen directly or indirectly out of: (i) the occupancy, maintenance, and use of the Premises and/or; (ii) the performance of this Lease. Tenant's obligations under the preceding sentence shall apply regardless of whether Landlord or any of its officers, officials, employees, agents, or volunteers are negligent, but shall not apply to any loss, liability, fines, penalties, forfeitures, costs, or damages caused solely by the gross negligence, or by the willful misconduct, of Landlord or any of its officers, officials, employees, agents, or volunteers.

(b) Should Tenant sublease the Premises under this Lease, Tenant shall require each sub-lessee to indemnify, hold harmless, and defend Landlord and each of its officers, officials, employees, agents, and volunteers in accordance with the terms of the preceding paragraph.

(c) This requirement shall survive termination or expiration of this Lease.

10. Utilities. Tenant agrees to pay, as additional rent, without prior demand and without deduction or offset, on or before the first business day of each calendar month (prorated for any partial calendar month during the Term of this Lease), the sum of One Hundred and No/100 Dollars ($100.00) per month for water, sewer, gas, heat, light, power, and all other utilities or services of any kind supplied to the Premises. It is agreed that Landlord is not liable for any failure or interruption of any utility or service, and the failure or interruption of any utility or service will not entitle Tenant to terminate this Lease or stop making any rental or other payments due under this Lease.

11. Taxes. Tenant acknowledges that this Lease may create a possessory interest subject to taxation and that Tenant may be subject to payment of any and all taxes levied on that possessory interest. Tenant shall also pay any property taxes assessed on its personal property.

12. Alterations.

(a) Tenant agrees that it will not make any alterations or improvements to the Premises, or any portion of the Premises, without Landlord's prior written consent in its sole and absolute discretion. No alterations or additions may affect the structural portions of the Premises, including, without limitation, the exterior or interior load-bearing walls, the foundation, or the roof of the Premises. Landlord shall be under no obligation to give its consent. If Landlord consents to the making of any alterations or improvements, Tenant agrees that such alterations or improvements will be made in strict compliance with all applicable laws, rules, and regulations of all governmental authorities having jurisdiction, will be performed in a good and workmanlike manner, and will be made in compliance with such other conditions, including, without limitation, the obtaining of performance and completion bonds, as Landlord may require in connection with the granting of its consent.

(b) Tenant agrees that it will pay, when due, all claims for labor or materials furnished or alleged to have been furnished to or for Tenant at or for use on the Premises, which claims are or may be secured by any mechanics' or materialmen's lien against the Premises or any interest therein. All alterations and improvements made by Tenant shall, at Landlord's option and at Tenant's sole cost and expense, be removed from the Premises at the end of the term of this Lease and the Premises restored to their condition prior to the making of such alterations or improvements.

13. Tenant's Property. All trade fixtures, equipment, and personal property of Tenant located at the Premises will remain the property of Tenant during the term of this Lease and may be removed by Tenant at any time and shall be removed by Tenant prior to the expiration or other termination of the term of this Lease. If Tenant does not do so, Landlord may retain or dispose of any such remaining fixtures, equipment, and personal property without obligation or liability to Tenant, and Tenant hereby waives all statutes and other laws to the contrary. Tenant, at Tenant's cost and expense, must promptly repair all damage to the Premises occasioned by Tenant's removal of its trade fixtures, equipment, and personal property.

14. Premises Damage and Destruction. If the Premises or any portion thereof are damaged or destroyed by any casualty (whether or not insured), either party may terminate this Lease by written notice to the other.

15. Assignment, Subletting, and Invitees. Tenant may not assign any of its rights or delegate any of its duties under this Lease, or sublet all or any part of the Premises nor permit the occupancy thereof by any other person or entity, except that the RACES volunteers operators shall be permitted invitees of Tenant's in the Premises. Within seven (7) business days of the date of this Lease, Tenant shall provide Landlord with a list of names of the RACES volunteer operators who Tenant intends to invite and permit on the Premises, and shall provide Landlord with an updated list of such operators within five (5) calendar days of Tenant's subsequent changes to permitted invitees.

16. Tenant Default. The occurrence of any one or more of the following shall constitute a default by Tenant:

(a) Failure by Tenant to make payment of rent or any other payments required to be made by Tenant hereunder within five (5) business days after written notice that they are past due.

(b) Failure by Tenant to keep and maintain any of the insurance required to be kept and maintained by Tenant under this Lease.

(c) Failure by Tenant to observe or perform any of the covenants or provisions of this Lease, other than as provided in subsections (b) and (c) of this Section 16, when such failure continues for a period of thirty (30) days after written notice of such failure is given by Landlord to Tenant; provided, that if the nature of Tenant's failure is such that more than thirty (30) days are reasonably required for its cure, then Tenant will not be deemed to be in default if Tenant promptly commences such cure and thereafter diligently prosecutes such cure to completion.

17. Remedies. If Tenant is in default, then, in addition to all other rights and remedies which Landlord may have at law or in equity, Landlord has the following rights and remedies which are not exclusive but are cumulative:

(a) To the extent permitted by law, Landlord can, with or without terminating this Lease, reenter the Premises and remove all property and persons therefrom, and any such property may be removed and stored in a public warehouse or elsewhere at the cost and for the account of Tenant. If Landlord elects to reenter or shall take possession of the Premises pursuant to legal proceedings or pursuant to any notice provided by law, and if Landlord has not elected to terminate this Lease, Landlord may either recover all rent as it becomes due under this Lease or relet the Premises or any part or parts thereof for such term or terms and upon such provisions as Landlord may deem advisable and will have the right to make repairs to and alterations of the Premises. No reentry or taking possession of the Premises by Landlord is to be construed as an election to terminate this Lease unless a written notice of such intention is given to Tenant by Landlord. Notwithstanding any reletting without termination by Landlord because of Tenant's default, Landlord may at any time after such reletting elect to terminate this Lease because of such default if Landlord elects to relet the Premises without terminating this Lease, then rent received by Landlord therefrom will be applied as follows:

(i) First, to any indebtedness from Tenant to Landlord other than rent due from Tenant;

(ii) Second, to all costs and expenses, including, without limitation, for maintenance, repairs, or alterations, incurred by Landlord in connection with reletting the Premises; and

(iii) Third, to the payment of rent due and unpaid under this Lease and the residual, if any, will be held by Landlord and applied in payment of future rent as the same may become due and payable under this Lease and to any damages and other amounts that Landlord is otherwise entitled to under this Lease. Should that portion of such rent received from such reletting during any month, which is applied to the payment of rent hereunder, be less than

the rent payable hereunder during that month by Tenant, then Tenant agrees to pay such deficiency to Landlord immediately upon demand. In no event will Tenant be entitled to any excess rent received by Landlord from such reletting.

(b) Landlord can terminate Tenant's right to possession of the Premises at any time. No act by Landlord other than giving written notice to Tenant will terminate this Lease. Acts of maintenance, efforts to relet the Premises, or the appointment of a receiver on Landlord's initiative to protect Landlord's interest under this Lease shall not constitute a termination of Tenant's right to possession. On termination, Landlord has the right to recover from Tenant any amount, and court costs, necessary to compensate Landlord for all detriment proximately caused by Tenant's default.

(c) Without waiving the default, Landlord can, at its sole option, pay such sums and/or take such actions as are necessary in Landlord's reasonable judgment in order to cure the default, and all sums expended or incurred by Landlord in connection therewith, together with interest thereon at the maximum rate permitted by law, shall be paid by Tenant to Landlord immediately on demand.

18. Landlord Entry. Landlord and its authorized representatives shall have the right upon reasonable prior written notice to Tenant to enter all portions of the Premises for any of the following purposes: (a) to determine whether the Premises are in good condition and whether Tenant is complying with its obligations under this Lease; (b) to inspect the Premises; (c) in connection with Landlord's design and construction planning respecting Landlord's future use of the Premises; and (d) to post notices of non-responsibility. Notwithstanding the foregoing to the contrary, Landlord and its authorized representatives shall have the right to enter the Premises at any time, and without notice to Tenant, where an emergency situation necessitates such entry. No exercise by Landlord of its rights under this Section shall entitle Tenant to any damages for any injury or inconvenience occasioned thereby or to any abatement of rent or other amounts payable under this Lease.

19. Surrender of Premises. Upon the expiration or other termination of the term of this Lease, Tenant agrees to surrender possession of the Premises, and every part thereof, to Landlord in good order, condition, and repair, ordinary wear and tear alone excepted. "Ordinary wear and tear" does not include any damage or deterioration that would have been prevented by good maintenance practice or by Tenant performing all of its obligations under this Lease.

20. Notices. Except as otherwise provided, all notices required or permitted to be given under this Lease must be in writing and addressed to the parties at their respective notice addresses set forth below; provided, that notices to Tenant may also be effectively given in writing and addressed to Tenant at the Premises address. Notices must be given by commercial delivery service) or by first-class mail, postage prepaid. Notices will be deemed effectively given, in the case of overnight messenger delivery, upon receipt (or if receipt is refused, upon attempted delivery), and in the case of mailing, three (3) days following deposit into the custody of the United States Postal Service (or inability to deliver, as shown on the return receipt). The notice addresses of the parties are as follows:

If to Landlord:

City of Banning
Attention: City Manager
99 East Ramsey Street
Banning, California 92220

If to Tenant:

Radio Amateur Civil Emergency Service
c/o Riverside County Emergency Management Department
Attention: Erik Ramirez
450 E. Alessandro Boulevard
Riverside, California 92508

21. Waiver and Release of Relocation Benefits. Tenant acknowledges that upon the expiration or earlier termination of the Term, including any extension thereof, or upon termination of any holdover tenancy (collectively "Expiration of Tenancy"), Tenant might be or become eligible to receive compensation, reimbursement, assistance, including, without limitation, the fair market value of real and personal property, loss of goodwill, loss of profits, actual and reasonable expenses for moving a business, loss of tangible personal property as a result of moving the business, expenses incurred in searching for a replacement site for the business, expenses to reestablish the business at the new site, "in-lieu payments," and other such benefits (collectively "Benefits") under the California Relocation Assistance Act (Gov. Code, § 7260 *et seq.*), Title 25 of the California Code of Regulations, Article 1, § 19 of the California Constitution, the California Eminent Domain Law (Code Civ. Proc., § 1230.010 *et seq.),* or other similar local, state, or federal statute, ordinance, regulation, rule, or decisional law (collectively "Compensatory Laws"). Tenant further acknowledges that it has received full and fair compensation of all Benefits Tenant is or might be or might become entitled to recover from Landlord as a result of, or in any way related to, Expiration of the Tenancy, Landlord's acquisition of the Premises, and Landlord's occupancy and possession of the Premises. Therefore, being fully informed of and understanding the acknowledgments made herein and of Tenant's rights or potential rights to Benefits under the Compensatory Laws, Tenant hereby expressly and unconditionally waives, and releases Landlord from, any and all rights of Tenant to claim, demand, sue for, or receive any Benefits which Tenant is or might be or might become entitled to recover from Landlord as a result of, or in any way related to, Expiration of the Tenancy, Landlord's acquisition of the Premises, and Landlord's occupancy and possession of the Premises.

22. General.

(a) The acceptance by Landlord of any rental or other payments due hereunder with knowledge of the breach of any of the terms, covenants, or provisions of this Lease by Tenant shall not be construed as a waiver of any such breach. The acceptance at any time or times by Landlord of any sum less than that which is required to be paid by Tenant shall, unless Landlord specifically agrees otherwise in writing, be deemed to have been received only on account of the obligation for which it is paid, and shall not be deemed an accord and satisfaction notwithstanding any provisions to the contrary written on any check or contained in any writing transmitting the same.

(b) The titles to the sections of this Lease are for convenience of reference only and are not a part of this Lease and shall have no effect upon the construction or interpretation of any part of this Lease. Any exhibits attached to this Lease are, however, a part of this Lease. This Lease shall be governed by and construed in accordance with the laws of the State of California, without regard to any otherwise governing principles of conflicts of law. In construing this Lease, none of the parties to it shall have any term or provision construed against it solely by reason of its having drafted the same.

(c) Any provision of this Lease that is invalid, illegal, or unenforceable shall be ineffective to the extent of such invalidity, illegality, or unenforceability without invalidating, diminishing, or rendering unenforceable the rights and obligations of the parties under the remaining provisions of this Lease.

(d) No term or provision of this Lease may be amended, altered, modified, or waived orally or by a course of conduct, but only by an instrument in writing signed by a duly authorized officer or representative of the party against which enforcement of such amendment, alteration, modification, or waiver is sought. Any amendment, alteration, modification, or waiver shall be for such period and subject to such conditions as shall be specified in the written instrument effecting the same. Any waiver shall be effective only in the specific instance and for the specific purpose for which given.

(e) This Lease and all exhibits attached to it constitutes the entire agreement of the parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements (whether written or oral) with respect to that subject matter.

(f) This Lease may be executed in several counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

(g) If either party hereto brings an action to enforce the terms hereof or declare rights hereunder, the prevailing party in such action, on trial or appeal, shall be entitled to reasonable attorneys' fees to be paid by the losing party as fixed by the court.

(h) Time is of the essence of each provision hereof in which time is a factor.

The parties have caused this Lease to be duly executed by their respective duly authorized officers or representatives as of the date first set forth above.

SPACE ABOVE THIS LINE FOR RECORDER'S USE

The undersigned declares that this Memorandum of Lease is exempt from Recording Fees pursuant to California Government Code Section 27383.

Exempt from Documentary Transfer Tax: Lease term less than 35 years.

MEMORANDUM OF LEASE

THIS MEMORANDUM OF LEASE (this "**Memorandum**") is dated as of _____, 2024, and is entered into by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California ("**Tenant**") and the CITY OF BANNING, a California municipal corporation ("**Landlord**").

RECITALS

A. Landlord and Tenant executed that certain Office Lease dated _____, 2024 (the "**Lease**") for space in certain real property located in the City of Banning, County of Riverside, State of California commonly known as the Armory Building, located at 2041 Nicolet Street (APN: 538-082-013) (the "**Property**") described on Exhibit "A" (the "**Premises**").

B. Landlord and Tenant now desire to record this Memorandum in order to comply with California law requiring that municipal leases be recorded.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing recitals, and the covenants and conditions contained in the Lease, Landlord and Tenant hereby agree as follows:

1. Lease. Landlord has leased the Premises to Tenant, and Tenant has leased the Premises from Landlord, upon and subject to the terms and conditions set forth in the Lease. The Lease is hereby incorporated herein by this reference.

2. Term. The term of the Lease commences on _____, 2024, and expires on _____, 2027, unless the Lease is terminated earlier in accordance with the provisions of the Lease.

IN WITNESS WHEREOF, Landlord and Tenant have executed this Memorandum as of the date and year first above written.

RESOLUTION 2024-118

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, RESCINDING ITS ADOPTION OF RESOLUTION 2024-66, AND APPROVING AN OFFICE LEASE WITH RIVERSIDE COUNTY ON BEHALF OF THE EMERGENCY MANAGEMENT DEPARTMENT FOR OFFICE SPACE WITHIN THE ARMORY LOCATED AT 2041 W. NICOLET ST. TO BE USED BY THE RADIO AMATEUR EMERGENCY SERVICES (RACES)

WHEREAS, RACES stands for "Radio Amateur Civil Emergency Service" a protocol created by the Federal Emergency Management Agency (FEMA) and the Federal Communications Commission (FCC). Many government agencies across the county train their Auxiliary Communications Service volunteers using RACES protocol. Amateur Radio Operators, also known as Ham Radio Operators, are an important component in an Emergency Communication Plan. The RACES volunteer operators are: (1) licensed Radio Amateurs; (2) certified by a civil defense agency; (3) able to communicate on Amateur Radio frequencies during drills, exercises, and emergencies; and (4) the only Amateur Radio operators authorized to transmit during declared emergencies when the President of the United States specifically invokes the *War Powers Act*. The Radios will still operate without cell towers and phone lines; and

WHEREAS, the Pass Area RACES organization is highly trained and is an integral part of the Emergency Response Plan should an emergency occur. The Armory has been designated as the Emergency Operations Command (EOC) and having RACES located in the building will ensure any emergency operation is conducted efficiently; and

WHEREAS, the County desires to enter into an office lease agreement with the City for office space within the Armory Building located at 2041 W. Nicolet Street to be used by the Pass Area RACES; and

WHEREAS, on May 14, 2024, the City Council adopted Resolution 2024-66, approving an Office Lease Agreement with the County of Riverside on behalf of the Emergency Management Department (the "original Office Lease Agreement"). The terms of the original Office Lease Agreement required that the County pay rent in the amount of $1 per year for a total of three years, with an option to renew the term. The terms of the original Office Lease Agreement also required the County to pay $100 per month for utilities supplied to the leased office space, including water, sewer, gas, heat, light, power, and all other utilities or services of any kind. Riverside County Emergency Management Department staff have reviewed the terms of the original Office Lease Agreement after the City Council's adoption of Resolution 2024-66 and have requested that the City remove the requirement for the County to pay $100 per month for utilities as set forth in Section 10 of the original Office Lease Agreement because the Pass Area RACES provides a public benefit as described in the recitals above. City staff have no objections to the County's request and have prepared a new Office Lease Agreement, attached hereto as Exhibit A, for the City Council's consideration; and

WHEREAS, under the proposed new Office Lease Agreement, the County will pay rent in the amount of $1 per year for a total of three years, with an option to renew, and is not obligated to pay for utilities supplied to the leased office space.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council hereby rescinds its adoption of Resolution 2024-66.
SECTION 2. The City Council approves the Office Lease Agreement with Riverside County on behalf of the Emergency Management Department, attached hereto as Exhibit A, and authorizes the City Manager to sign the Agreement on behalf of the City Council.

SECTION 3. The City Clerk shall certify the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions, and record the Agreement with the County of Riverside

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

CITY OF BANNING
STAFF REPORT

TO: **CITY COUNCIL**

FROM: **Douglas Schulze, City Manager**

PREPARED BY: **Patrick Safari, Capital Improvement Projects Manager**
Art Vela, Director of Public Works

MEETING DATE: **July 9, 2024**

SUBJECT: **Consideration of Resolution 2024-119, Awarding a Professional Services Agreement for the Design of Traffic Signal Hardware Upgrade at 17 Intersections to STC Traffic, Inc. in the amount of $74,760 and Approving a 10% Contingency for a Total Project Budget of "Not-to-Exceed" $82,236**

RECOMMENDATION:

Adopt Resolution 2024-119.

BACKGROUND:

The City of Banning completed a Local Road Safety Plan (LRSP) in August 2022 that identified signalized intersections as an important area of focus for the safety of the city's residents and visitors. The collision data from January 1, 2017 to December 31, 2021 indicated that 61% of collisions at signalized intersections were either rear-end, broadside or sideswipe. These types of collisions are typically associated with failure to stop at a red signal. At signalized intersections, there were also a significant number of collisions and injuries involving bicycles and pedestrians. Seventeen (17) signalized intersections were identified as needing safety improvements.

On October 12, 2021, under Resolution 2021-91, the City Council approved Master Agreement 08-5214S21 with California Department of Transportation (Caltrans) for state funded projects.

On October 10, 2023, under Resolution 2023-167, the City Council approved a corresponding Program Supplement Agreement No. HSIPL-5214(016) for Caltrans Cycle 11 Highway Safety Improvement Program. The agreement authorizes the City of Banning to start the Preliminary Engineering (PE) phase.

On April 12, 2024, staff released a Request for Proposals (RFP) for Design Services for the Upgrade of Traffic Signal Hardware at 17 intersections on the City's public bidding platform. The proposals were due on May 17, 2024. In response to the RFP, four (4) proposals were received from the following consultants:

	Consultant	Score (Out of 100)
1)	STC Traffic, Inc.	91.33
2)	Kimley Horn, Inc.	86.33
3)	Minagar & Associates, Inc.	82.00
4)	LIN Consulting, Inc.	80.67

JUSTIFICATION:

The Project will improve safety of the signalized intersections by implementing countermeasures such as signal hardware improvements (lenses, back plates with retroreflective borders), installation of Emergency Vehicle Pre-emption (EVP) systems and installation of Audible Pedestrian Countdown Signal Heads (APS).

Staff evaluated the proposals based on qualifications, cost, experience with the requested scope of services and response to the request for proposals. As a result, staff recommend the award of a professional services agreement to STC Traffic, Inc., in the amount of $74,760.

The scope will consist of the preparation of Plans, Specifications and Estimates (PS&E) including construction support.

FISCAL IMPACT:

Staff recommends awarding an agreement to STC Traffic, Inc. in the amount of $74,760 and approving a 10% contingency in the amount of $7,476 for a total “not-to-exceed” project budget of $82,236.

The project is budgeted and will be funded from Measure A Funds, Account 100-4900-431.90-10.

The project costs are eligible and will be reimbursed by the State of California Department of Transportation Cycle 11 Highway Safety Improvement Program (HSIP). The City of Banning will receive monthly reimbursements from the State of California.

ALTERNATIVES:

Do not approve and provide alternative direction.

RESOLUTION 2024-119

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, AWARDING A PROFESSIONAL SERVICES AGREEMENT FOR THE DESIGN OF TRAFFIC SIGNAL HARDWARE UPGRADE AT 17 INTERSECTIONS TO STC TRAFFIC, INC. IN THE AMOUNT OF $74,760 AND APPROVING A 10% CONTINGENCY FOR A TOTAL PROJECT BUDGET NOT-TO-EXCEED $82,236

WHEREAS, the City of Banning completed a Local Road Safety Plan (LRSP) in August 2022 that identified signalized intersections as an important area of focus for the safety of the city's residents and visitors; and

WHEREAS, seventeen (17) signalized intersections were identified as needing safety improvements; and

WHEREAS, on October 12, 2021, under Resolution 2021-91, the City Council approved Master Agreement 08-5214S21 with California Department of Transportation (Caltrans) for state funded projects; and

WHEREAS, on October 10, 2023, under Resolution 2023-167, the City Council approved a corresponding Program Supplement Agreement No. HSIPL-5214(016) for Caltrans Cycle 11 Highway Safety Improvement Program. The agreement authorizes the City of Banning to start the Preliminary Engineering (PE) phase; and

WHEREAS, on April 12, 2024, staff released a Request for Proposals (RFP) for Design Services for the Upgrade of Traffic Signal Hardware at 17 intersections on the City's public bidding platform; and

WHEREAS, on May 17, 2024, in response to the RFP, four (4) proposals were received ranging in score from 80.67 to 91.33; and

WHEREAS, staff evaluated the proposals based on qualifications, cost, experience with the requested scope of services and response to the request for proposals. As a result, staff recommend the award of a professional services agreement to STC Traffic, Inc., in the amount of $74,760; and

WHEREAS, the Project will improve safety of the signalized intersections by implementing countermeasures such as signal hardware improvements (lenses, back plates with retroreflective borders), installation of Emergency Vehicle Pre-emption (EVP) systems and installation of Audible Pedestrian Countdown Signal Heads (APS); and

WHEREAS, the total project budget of $82,236, which includes a 10% contingency, will be funded by Measure A funds. The project costs are eligible and expected to be reimbursed by the State of California Department of Transportation Cycle 11 Highway Safety Improvement Program (HSIP).

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves the Professional Services Agreement with STC Traffic, Inc. in the amount of $74,760 and approving a 10% Contingency for a Total Project Budget of "Not-to-Exceed" $82,236.

SECTION 2. The City Council authorizes the City Manager, or designee, to make necessary budget adjustments, appropriations, and transfers related to this resolution.

SECTION 3. The City Council authorizes the City Manager to make necessary non-substantive changes and to execute the Professional Services Agreement with STC Traffic, Inc.

SECTION 4. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

Exhibit A
Professional Services Agreement with STC Traffic, Inc.

AGREEMENT FOR PROFESSIONAL SERVICES (C001048) FOR DESIGN OF TRAFFIC SIGNAL HARDWARE UPGRADE BY AND BETWEEN CITY OF BANNING AND STC TRAFFIC, INC.

THIS AGREEMENT FOR PROFESSIONAL SERVICES (herein "Agreement") is made and entered into this day: _____, ("Effective Date") by and between the **CITY OF BANNING,** a California municipal corporation ("City") and **STC TRAFFIC, INC**., a California Corporation, ("Consultant"). City and Consultant are sometimes hereinafter individually referred to as "Party" and hereinafter collectively referred to as the "Parties."

RECITALS

A. City has sought by a Request for Proposal, a proposal in response to RFP #24-064 for the performance of the services for Design of Traffic Signal Hardware Upgrade and as further defined and described particularly in Article 1 of this Agreement.

B. Consultant, following submission of a proposal for the performance of the services defined and described particularly in Article 1 of this Agreement, was selected by City to perform those services.

C. The Parties desire to formalize the selection of Consultant for performance of those services defined and described particularly in Article 1 of this Agreement and desire that the terms of that performance be as particularly defined and described herein.

D. Pursuant to the City of Banning's Municipal Code, City has authority to enter into this Agreement.

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained herein and other consideration, the value and adequacy of which are hereby acknowledged, the Parties agree as follows:

ARTICLE 1. SERVICES OF CONSULTANT

1.1 Scope of Services.

In compliance with all terms and conditions of this Agreement, Consultant shall provide those services specified in the "Scope of Services" attached hereto as **Exhibit A** and incorporated herein by this reference, which services may be referred to herein as the "Services" hereunder. As a material inducement to City entering into this Agreement, Consultant represents and warrants that it has the qualifications, experience, and facilities necessary to properly perform the Services required under this Agreement in a thorough, competent, and professional manner, and is experienced in performing the Services contemplated herein. Consultant shall at all times faithfully, competently and to the best of its ability, experience and talent, perform all Services described herein. Consultant covenants that it shall follow the highest professional standards in performing the Services required hereunder and that all materials will be of good quality, and fit for the purpose intended. For purposes of this Agreement, the phrase "highest professional

standards" shall mean those standards of practice recognized by one or more first-class firms performing similar work under similar circumstances.

1.2 Contract Documents and Exhibits.

This Agreement includes the Request for Proposal and Consultant's accepted proposal ("Contract Documents"), both of which are on file with the City and incorporated herein by this general reference as though fully set forth herein. **Exhibit A** (Scope of Services), **Exhibit B** (Special Requirements), **Exhibit C** (Schedule of Compensation), and **Exhibit D** (Schedule of Performance) also constitute a part of this Agreement and are incorporated into this Agreement by this reference. Except as set forth in Section 1.10 regarding **Exhibit B**, this Agreement controls over the Contract Documents and the provisions in **Exhibits A, B** and **C**.

1.3 Compliance with Law.

Consultant shall keep itself informed concerning all ordinances, resolutions, statutes, rules, and regulations of City and any Federal, State or local governmental entity having jurisdiction in effect at the time service is rendered, and shall render all Services hereunder in accordance therewith.

1.4 Licenses, Permits, Fees and Assessments.

Consultant shall obtain and maintain during the term of this Agreement, at its sole cost and expense, all necessary licenses, permits, certificates and approvals required by law for the performance of Services under this Agreement, including a City business license. Consultant shall have the sole obligation to pay for all fees, assessments and taxes, plus applicable penalties and interest, which may be imposed by law and which arise from or are necessary for Consultant's performance of the Services required by this Agreement. Consultant shall indemnify, defend and hold harmless City, its officers, employees or agents, against all such fees, assessments, taxes, penalties or interest levied, assessed or imposed against City hereunder.

1.5 Familiarity with Services.

By executing this Agreement, Consultant warrants that Consultant: (i) has thoroughly investigated and considered the Scope of Services to be performed, (ii) has carefully considered how the Services should be performed, and (iii) fully understands the facilities and any difficulties and restrictions attending performance of the Services under this Agreement. If the Services involve work upon any site, Consultant warrants that Consultant has or will investigate the site and is or will be fully acquainted with the conditions existing therein, prior to commencement of Services hereunder. Should Consultant discover any latent or unknown conditions, which will materially affect the performance of the Services hereunder, Consultant shall immediately inform City of such fact and shall not proceed except at Consultant's risk until written instructions are received from the Contract Officer (defined in Section 1.12. A).

1.6 Prevention of Loss and Damages.

Consultant shall adopt reasonable methods during the Term (defined in Section 3.4) to furnish continuous protection to the work product, and the equipment, materials, papers,

documents, plans, studies and/or other components thereof to prevent losses or damages, and shall be responsible for all such damages, to persons or property, until acceptance of the Services by City, except such losses or damages as may be caused by City's own negligence.

1.7 Further Responsibilities of Parties.

Both Parties agree to use reasonable care and diligence to perform their respective obligations under this Agreement. Both Parties agree to act in good faith to execute all instruments, prepare all documents and take all actions as may be reasonable necessary to carry out the purposes of this Agreement. Unless hereafter specified, neither Party shall be responsible to perform the Services of the other.

1.8 Additional Services.

City shall have the right at any time during the performance of the Services, without invalidating this Agreement, to order extra services beyond that specified in the Scope of Services or to make changes by altering, adding to or deducting from the Services. No such extra services may be undertaken unless a written order is first given by the Contract Officer to Consultant, which written order incorporates therein an adjustment in (i) the Contract Sum (as defined in Section 2.1), and/or (ii) the Schedule of Performance, (as defined in Section 3.2), and which written order is approved in writing by Consultant. Any increase in compensation of up to ten percent (10%) of the Contract Sum, or $25,000, whichever is less; or in the Schedule of Performance of up to one hundred eighty (180) days may be approved by the Contract Officer. Any greater increases, taken either separately or cumulatively, must be approved by City Council. It is expressly understood by Consultant that the provisions of this Section shall not apply to Services which are specifically set forth in the Scope of Services or which are reasonably contemplated therein. Consultant hereby acknowledges that it accepts the risk that the Services to be provided pursuant to the Scope of Services may be more costly or time consuming than Consultant anticipates and that Consultant shall not be entitled to additional compensation therefor.

1.9 Facilities and Equipment.

Except as otherwise provided, Consultant shall, at its own cost and expense, provide all facilities and equipment necessary to perform the Services required by this Agreement. City shall make available to Consultant only physical facilities such as desks, filing cabinets, and conference space ("City Facilities"), as City deems, in its sole discretion, to be reasonably necessary for Consultant's use while consulting with City employees and reviewing records and the information in possession of City. The location, quality, and time of furnishing City Facilities shall be in the sole discretion of City. In no event shall City be required to furnish any facilities that may involve incurring any direct expense, including but not limited to a computer, long distance telephone, network data, internet or other communication charges, vehicles and reproduction facilities.

1.10 Special Requirements.

Additional terms and conditions of this Agreement, if any, which are made a part hereof are set forth in the "Special Requirements" attached hereto as **Exhibit B** and incorporated herein by this reference. In the event of a conflict between the provisions of **Exhibit B** and any other provisions of this Agreement, the provisions of **Exhibit B** shall govern.

1.11 Corrections.

In addition to the indemnification obligations set forth in Article 4, and Sections 1.4, 1.13, 5.3, 5.4, and 6.3, Consultant shall correct, at its expense, all errors in the Services which may be disclosed during City's review of Consultant's report or plans. Should Consultant fail to make such correction(s) in a reasonably timely manner, such correction(s) may be made by City, and the cost thereof shall be charged to Consultant. In addition to all other available remedies, City may deduct the cost of such correction(s) from any retention amount held by City, or may withhold payment otherwise owed Consultant under this Agreement up to the amount of the cost of correction(s), as provided in Section 6.3.

1.12 Party Representatives.

A. Contract Officer: For the purposes of this Agreement, the Contract Officer shall be the City Manager, or such other person designated in writing by the City Manager ("Contract Officer"). Unless otherwise specified herein, any approval of City required hereunder shall mean the approval of the Contract Officer. The Contract Officer shall have authority, if specified in writing by the City Manager, to sign all documents on behalf of City required hereunder to carry out the terms of this Agreement.

B. Principals and Personnel of Consultant.

1) Consultant Representative: The following principal of Consultant is hereby designated as being the Consultant Representative authorized to act on Consultant's behalf regarding the Services specified herein and make all decisions in connection therewith:

Name	Title
Jason Stack	President

It is expressly understood that the experience, knowledge, capability and reputation of the foregoing Consultant Representative were a substantial inducement for City to enter into this Agreement. Therefore, the foregoing Consultant Representative shall be responsible during the term of this Agreement for directing all activities of Consultant and devoting sufficient time to personally supervise the Services hereunder. All personnel of Consultant, and any authorized agents, shall at all times be under the exclusive direction and control of the Consultant Representative. For purposes of this Agreement, the foregoing Consultant Representative may not be replaced nor may their responsibilities be substantially reduced or reassigned by Consultant without the express written approval of City. It shall be Consultant's responsibility to assure that the Contract Officer is kept informed of the progress of the performance of the Services, and Consultant shall refer any decisions which must be made by City to the Contract Officer.

2) Consultant's Personnel: Consultant has, or will secure at its own expense, all personnel required to perform the Services required under this Agreement. All of the Services required under this Agreement shall be performed by Consultant or under its supervision, and all personnel engaged in the Services shall be qualified to perform such Services. Consultant shall make every reasonable effort to maintain the stability and continuity of Consultant's staff and sub-contractors, if any, assigned to perform the Services required under this Agreement.

Consultant shall notify City of all changes in Consultant's staff and sub-contractors, if any, assigned to perform the Services required under this Agreement, prior to and during any such performance. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires to reassign any staff or sub-contractor of Consultant, City shall give notice as set forth in Section 8.1. Consultant shall, immediately upon the receipt of the notice to re-assign staff from City, reassign such person or persons.

1.13 Independent Contractor.

A. Consultant is an independent contractor and not an employee of City. Consultant shall have no power to incur any debt, obligation, or liability on behalf of City. All Services provided pursuant to this Agreement shall be performed by Consultant or under its supervision. Consultant will determine the means, methods, and details of performing the Services. Any additional personnel performing Services under this Agreement on behalf of Consultant shall also not be employees of City and shall at all times be under Consultant's exclusive direction and control. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

B. Consultant shall indemnify and hold harmless City and its elected officials, officers, employees, servants, designated volunteers, and agents serving as independent contractors in the role of City officials, from any and all liability, damages, claims, costs and expenses of any nature to the extent arising from Consultant's personnel practices. City shall have the right to offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this Section.

1.14 Prohibition Against Subcontracting or Assignment.

The experience, knowledge, capability and reputation of Consultant, the Consultant Representative and employees were a substantial inducement for City to enter into this Agreement. Therefore, Consultant shall not contract with any other entity to perform in whole or in part the Services required hereunder without the express written approval of City. In addition, neither this Agreement nor any interest herein may be transferred, assigned, conveyed, hypothecated or encumbered voluntarily or by operation of law, whether for the benefit of creditors or otherwise, without the prior written approval of City. Transfers restricted hereunder shall include the transfer to any person or group of persons acting in concert of more than twenty-five percent (25%) of the present ownership and/or control of Consultant, taking all transfers into account on a cumulative basis. In the event of any such unapproved transfer, including any bankruptcy proceeding, this

Agreement shall be void. No approved transfer shall release Consultant or any surety of Consultant of any liability hereunder without the express consent of City.

ARTICLE 2. COMPENSATION AND METHOD OF PAYMENT.

2.1 Contract Sum.

Subject to any limitations set forth in this Agreement, as full compensation for Services satisfactorily rendered, City shall pay Consultant at the hourly rates set forth in the "Schedule of Compensation" attached hereto as **Exhibit C** and incorporated herein by this reference. In no event shall Consultant be paid more than Seventy-Four Thousand Seven Hundred Sixty Dollars ($74,760.00) (the "Contract Sum"). The Contract Sum shall include the attendance of Consultant at all project meetings reasonably deemed necessary by City. Coordination of the performance of the Services with City is a critical component of the Services. If Consultant is required to attend additional meetings to facilitate such coordination, Consultant shall not be entitled to any additional compensation for attending those meetings.

2.2 Method of Compensation.

The method of compensation may include: (i) a lump sum payment upon completion of the Services, (ii) payment in accordance with specified tasks or the percentage of completion of the Services, (iii) payment for time and materials based upon Consultant's rates as specified in the Schedule of Compensation, provided that time estimates are provided for the performance of sub tasks, but not exceeding the Contract Sum or (iv) such other methods as may be specified in the Schedule of Compensation.

2.3 Reimbursable Expenses.

City shall only reimburse Consultant for those actual and necessary expenses expressly set forth in **Exhibit C**. Reimbursable expenses may include reimbursement for actual and necessary expenditures for reproduction costs, telephone expenses, and travel expenses approved by the Contract Officer in advance, or actual sub-contractor expenses of an approved sub-contractor pursuant to Section 1.14, and only if specified in the Schedule of Compensation.

2.4 Unauthorized Services and Expenses.

City will not pay for any Services or reimburse for any expenses incurred which are not specified in the Scope of Services, unless authorized in writing as set forth in Section 1.8 of this Agreement. City shall make payment for such authorized additional Services and expenses in accordance with Article 2 of this Agreement.

2.5 Invoices.

Each month Consultant shall furnish to City an original invoice for all Services performed and expenses incurred during the preceding month. Each such invoice shall contain all of the information set forth in Section III of **Exhibit C** to this Agreement. By submitting an invoice for payment under this Agreement, Consultant is certifying compliance with all provisions of the

Agreement. Consultant shall not invoice City for any duplicate Services performed by more than one person.

City shall independently review each invoice submitted by Consultant to determine whether the Services performed and expenses incurred are in compliance with the provisions of this Agreement. City will use its best efforts to cause Consultant to be paid within thirty (30) days of receipt of Consultant's correct and undisputed invoice, except as to any charges for Services performed or expenses incurred by Consultant which are disputed by City, or as provided in Section 6.3. In the event any charges or expenses are disputed by City, the original invoice shall be returned by City to Consultant for correction and resubmission. Review and payment by City of any invoice provided by Consultant shall not constitute waiver of any rights or remedies provided herein or any applicable law.

2.6 Waiver.

Payment to Consultant for Services performed pursuant to this Agreement shall not be deemed to waive any defects in Services performed by Consultant.

ARTICLE 3. PERFORMANCE SCHEDULE

3.1 Time of Essence.

Time is of the essence in the performance of this Agreement; provided, however, that the foregoing shall not be construed to limit or deprive a Party of the benefits of any grace or use period allowed in this Agreement.

3.2 Schedule of Performance.

Consultant shall commence the Services pursuant to this Agreement upon receipt of a written notice to proceed and shall perform all Services within the time period(s) established in the "Schedule of Performance" attached hereto as **Exhibit D** and incorporated herein by this reference.

3.3 Force Majeure.

The time period(s) specified in the Schedule of Performance for performance of the Services rendered pursuant to this Agreement may be extended because of any delays due to unforeseeable causes beyond the control and without the fault or negligence of Consultant. Such unforeseeable consequences include, but are not restricted to, acts of God or public enemy, unusually severe weather, fires, earthquakes, floods, epidemics, quarantine restrictions, riots, strikes, freight embargoes, wars, litigation, and/or acts of any governmental agency, including City, if Consultant shall within ten (10) days of the commencement of such delay notify the Contract Officer in writing of the causes of the delay. The Contract Officer shall ascertain the facts and the extent of delay, and extend the time for performing the Services for the period of the enforced delay when and if in the judgment of the Contract Officer such delay is justified, subject to the provisions of Section 1.8. The Contract Officer's determination (or the City Council's determination, in the event the period of enforced delay exceeds the period specified in Section 1.8) shall be final and conclusive upon the Parties to this Agreement. In no event shall Consultant

be entitled to recover damages against City for any delay in the performance of this Agreement, however caused; Consultant's sole remedy shall be the extension of the Agreement pursuant to this Section.

3.4 Term.

The Term of this Agreement shall be from the Effective Date through August 31, 2025 unless sooner terminated as provided in Article 6 of this Agreement or extended as provided in Sections 1.8 and 3.3 of this Agreement. Maximum term and any subsequent amendment or modification shall not exceed five (5) years.

ARTICLE 4. INSURANCE AND INDEMNIFICATION

4.1 Minimum Scope and Limits of Insurance.

Consultant shall procure and at all times during the term of this Agreement carry, maintain, and keep in full force and effect, insurance as follows:

A. Commercial General Liability Insurance with a minimum limit of $1,000,000.00 per occurrence for bodily injury, personal injury and property damage and a general aggregate limit of $2,000,000.00 per project or location. If Consultant is a limited liability company, the commercial general liability coverage shall be amended so that Consultant and its managers, members, affiliates, employees, agents and other persons necessary or incidental to its operation are insureds.

B. Automobile Liability Insurance for any owned, non-owned or hired vehicle used in connection with the performance of this Agreement with a combined single limit of $1,000,000.00 per accident for bodily injury and property damage. If Consultant does not use any owned, non-owned or hired vehicles in the performance of Services under this Agreement, Consultant shall obtain a non-owned auto endorsement to the Commercial General Liability policy.

C. Workers' Compensation Insurance as required by the State of California and Employer's Liability Insurance with a minimum limit of $1,000,000.00 per accident for bodily injury or disease. If Consultant has no employees while performing Services under this Agreement, workers' compensation policy is not required; however, Consultant shall execute a declaration that it has no employees.

D. Professional Liability/Errors and Omissions Insurance with minimum limits of $1,000,000.00 per claim and in the aggregate.

4.2 Acceptability of Insurers.

The insurance policies required under this Article shall be issued by an insurer admitted to write insurance in the State of California with a rating of A:VII or better in the latest

edition of the A.M. Best Insurance Rating Guide. Self-insurance shall not be considered to comply with the insurance requirements under this Article.

4.3 Additional Insured.

The commercial general and automobile liability policies shall contain an endorsement naming City, its officers, employees, agents and volunteers as additional insureds.

4.4 Primary and Non-Contributing.

The insurance policies required under this Article shall apply on a primary non-contributing basis in relation to any other insurance or self-insurance available to City. Any insurance or self-insurance maintained by City, its officers, employees, agents or volunteers, shall be in excess of Consultant's insurance and shall not contribute with it.

4.5 Consultant's Waiver of Subrogation.

The insurance policies required under this Article shall not prohibit Consultant and Consultant's employees, agents or sub-contractors from waiving the right of subrogation prior to a loss. Consultant hereby waives all rights of subrogation against City.

4.6 Deductibles and Self-Insured Retentions.

Any deductibles or self-insured retentions must be declared to and approved by City. At City's option, Consultant shall either reduce or eliminate the deductibles or self-insured retentions with respect to City; or Consultant shall procure a bond guaranteeing payment of losses and expenses.

4.7 Cancellations or Modifications to Coverage.

Consultant shall not cancel, reduce or otherwise modify the insurance policies required by this Article during the term of this Agreement. The commercial general and automobile liability policies required under this Agreement shall be endorsed to state that should the issuing insurer cancel the policy before the expiration date, the issuing insurer will endeavor to mail 30 days' prior written notice to City. If any insurance policy required under this Article is canceled or reduced in coverage or limits, Consultant shall, within two (2) Business Days (as defined in Section 8.12) of notice from the insurer, phone, fax or notify City via certified mail, return receipt requested, of the cancellation of or changes to the policy.

4.8 City Remedy for Noncompliance.

If Consultant does not maintain the policies of insurance required under this Article in full force and effect during the term of this Agreement, or in the event any of Consultant's policies do not comply with the requirements under this Article, City may either immediately terminate this Agreement or, if insurance is available at a reasonable cost, City may, but has no duty to, take out the necessary insurance and pay, at Consultant's expense, the premium thereon. Consultant shall promptly reimburse City for any premium paid by City, or City may withhold amounts sufficient to pay the premiums from payments due to Consultant.

4.9 Evidence of Insurance.

Prior to the performance of Services under this Agreement, Consultant shall furnish the City Clerk with a certificate or certificates of insurance and all original endorsements evidencing and effecting the coverages required under this Article. The endorsements are subject to City's approval. Consultant may provide complete, certified copies of all required insurance policies to City. Consultant shall maintain current endorsements on file with the City Clerk. Consultant shall provide proof to the City Clerk that insurance policies expiring during the term of this Agreement have been renewed or replaced with other policies providing at least the same coverage. Consultant shall furnish such proof at least two (2) weeks prior to the expiration of the coverages.

4.10 Indemnity Requirements not Limiting.

Procurement of insurance by Consultant shall not be construed as a limitation of Consultant's liability or as full performance of Consultant's duty to indemnify City under this Agreement.

4.11 Sub-contractor Insurance Requirements.

Consultant shall require each of its sub-contractors that perform Services under this Agreement to maintain insurance coverage that meets all of the requirements of this Article.

4.12 Indemnification, Hold Harmless, and Duty to Defend.

A. Indemnification of City.

1) To the fullest extent permitted by law, Consultant shall, at its sole cost and expense, defend, hold harmless and indemnify City and its elected officials, officers, attorneys, agents, employees, designated volunteers, successors, assigns and those City agents serving as independent contractors in the role of City officials (collectively "Indemnitees"), from and against any and all damages, costs, expenses, liabilities, claims, demands, causes of action, proceedings, expenses, judgments, penalties, liens, and losses of any nature whatsoever, including fees of accountants, attorneys, or other professionals and all costs associated therewith and the payment of all consequential damages (collectively "Liabilities"), at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Consultant, its officers, agents, servants, employees, sub-contractors, materialmen, consultants or their officers, agents, servants or employees (or any entity or individual that Consultant shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties. Consultant shall defend the Indemnitees in any action or actions filed in connection with any Liabilities with counsel of the Indemnitees' choice, and shall pay all costs and expenses, including all attorneys' fees and experts' costs actually incurred in connection with such defense. Consultant shall reimburse the Indemnitees for any and all legal expenses and costs incurred by Indemnitees in connection therewith.

2) Consultant shall pay all required taxes on amounts paid to Consultant under this Agreement, and indemnify and hold City harmless from any and all taxes, assessments, penalties, and interest asserted against City by reason of the independent contractor relationship created by this Agreement. Consultant shall fully comply with the workers' compensation law regarding Consultant and Consultant's employees. Consultant shall indemnify and hold City harmless from any failure of Consultant to comply with applicable workers' compensation laws. City may offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this subparagraph A.2.

3) Consultant shall obtain executed indemnity agreements with provisions identical to those in this Article from each and every sub-contractor or any other person or entity involved by, for, with or on behalf of Consultant in the performance of this Agreement. If Consultant fails to obtain such indemnity obligations, Consultant shall be fully responsible and indemnify, hold harmless and defend the Indemnitees from and against any and all Liabilities at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Consultant's sub-contractor, its officers, agents, servants, employees, sub-contractors, materialmen, consultants or their officers, agents, servants or employees (or any entity or individual that Consultant's sub-contractor shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties.

B. Workers' Compensation Acts not Limiting. Consultant's indemnifications and obligations under this Article, or any other provision of this Agreement, shall not be limited by the provisions of any workers' compensation act or similar act. Consultant expressly waives its statutory immunity under such statutes or laws as to City, its officers, agents, employees and volunteers.

C. Insurance Requirements not Limiting. City does not, and shall not, waive any rights that it may possess against Consultant because of the acceptance by City, or the deposit with City, of any insurance policy or certificate required pursuant to this Agreement. The indemnities in this Article shall apply regardless of whether or not any insurance policies are determined to be applicable to the Liabilities, tax, assessment, penalty or interest asserted against City.

D. Survival of Terms. Consultant's indemnifications and obligations under this Article shall survive the expiration or termination of this Agreement.

ARTICLE 5. RECORDS, REPORTS, AND RELEASE OF INFORMATION

5.1 Service Records.

Consultant shall keep, and require sub-contractors to keep, such ledgers, books of accounts, invoices, vouchers, canceled checks, reports, studies or other documents relating to the disbursements charged to City and Services performed hereunder (the "Service Records"), as shall be necessary to perform the Services required by this Agreement and enable the Contract Officer

to evaluate the performance of such Services. Any and all such Service Records shall be maintained in accordance with generally accepted accounting principles and shall be complete and detailed. The Contract Officer shall have full and free access to such Service Records at all times during normal business hours of City, including the right to inspect, copy, audit and make copies and transcripts from such Service Records. Such Service Records shall be maintained for a period of three (3) years following completion of the Services hereunder, and City shall have access to such Service Records in the event any audit is required. In the event of dissolution of Consultant's business, custody of the Service Records may be given to City, and access shall be provided by Consultant's successor in interest ("Consultant's Successor"). If custody of the Service Records is given to Consultant's Successor, Consultant shall give written notice to City of the transfer of the Service Records to Consultant's Successor. The notice shall include contact information (address and telephone number) for Consultant's Successor, and access shall be provided to City by Consultant's Successor.

5.2 Reports.

Consultant shall periodically prepare and submit to the Contract Officer such reports concerning the performance of the Services required by this Agreement as the Contract Officer shall require. Consultant hereby acknowledges that City is greatly concerned about the cost of Services to be performed pursuant to this Agreement. For this reason, Consultant agrees that if Consultant becomes aware of any facts, circumstances, techniques, or events that may or will materially increase or decrease the cost of the Services contemplated herein, Consultant shall promptly notify the Contract Officer of that fact, circumstance, technique or event and the estimated increased or decreased cost related thereto.

5.3 Ownership of Documents.

All drawings, specifications, maps, designs, photographs, studies, surveys, data, notes, computer files, reports, records, documents and other materials (the "Consultant Documents") prepared by Consultant, its employees, sub-contractors and agents in the performance of this Agreement shall be the property of City and shall be delivered to City upon request of the Contract Officer or upon the termination of this Agreement. Consultant shall have no claim for further employment or additional compensation as a result of the exercise by City of its full rights of ownership use, reuse, or assignment of the Consultant Documents hereunder. Any use, reuse or assignment of such completed Consultant Documents for other projects and/or use of uncompleted Consultant Documents without specific written authorization by Consultant will be at City's sole risk and without liability to Consultant, and Consultant's guarantee and warranties shall not extend to such use or assignment. Consultant may retain copies of such Consultant Documents for its own use. Consultant shall have an unrestricted right to use the concepts embodied therein. All sub-contractors shall provide for assignment to City of all Consultant Documents prepared by them; and in the event Consultant fails to secure such assignment, Consultant shall indemnify City for all damages resulting therefrom.

5.4 Confidentiality and Release of Information.

A. All information gained or work product produced by Consultant in performance of this Agreement shall be considered confidential, unless such information is in the

public domain or already known to Consultant. Consultant shall not release or disclose any such information or work product to persons or entities other than City without prior written authorization from the Contract Officer.

B. Consultant, its officers, employees, agents or sub-contractors, shall not, without prior written authorization from the Contract Officer or unless requested by the City Attorney, voluntarily provide documents, declarations, letters of support, testimony at depositions, response to interrogatories or other information concerning the Services performed under this Agreement. Response to a subpoena or court order shall not be considered "voluntary" provided Consultant gives City notice of such court order or subpoena.

C. If Consultant, or any officer, employee, agent or sub-contractor of Consultant, provides any information or work product in violation of this Agreement, then City shall have the right to reimbursement and indemnity from Consultant for any damages, costs and fees, including attorneys' fees, caused by or incurred as a result of Consultant's conduct.

D. Consultant shall promptly notify City should Consultant, its officers, employees, agents or sub-contractors be served with any summons, complaint, subpoena, notice of deposition, request for documents, interrogatories, request for admissions or other discovery request, court order or subpoena from any Party regarding this Agreement and the Services performed thereunder. City retains the right, but has no obligation, to represent Consultant or be present at any deposition, hearing or similar proceeding. Consultant agrees to cooperate fully with City and to provide City with the opportunity to review any response to discovery requests provided by Consultant. However, this right to review any such response does not imply or mean the right by City to control, direct, or rewrite the response.

ARTICLE 6. ENFORCEMENT OF AGREEMENT AND TERMINATION

6.1 California Law.

This Agreement, and any dispute arising from the relationship between the Parties to this Agreement, shall be interpreted, construed and governed both as to validity and to performance of the Parties in accordance with the laws of the State of California. Legal actions concerning any dispute, claim or matter arising out of or in relation to this Agreement shall be instituted in the Superior Court of the County of Riverside, State of California, or any other appropriate court in such county, and Consultant covenants and agrees to submit to the personal jurisdiction of such court in the event of such action. In the event of litigation in a U.S. District Court, venue shall lie exclusively in the Central District of California, in Riverside.

6.2 Disputes; Default.

A. In the event that City determines Consultant is in default under the terms of this Agreement, City shall have no obligation or duty to continue compensating Consultant for any Services performed after the date of default. In addition to the provisions of Section 4.8, and the right to terminate pursuant to Section 6.7, if the City Manager determines that Consultant is in default in the performance of any of the terms or conditions of this Agreement, City may serve Consultant with written notice of the default. Consultant shall have ten (10) calendar days after service upon it of the notice in which to cure the default by rendering a satisfactory performance.

In the event that Consultant fails to cure its default within such period of time, City may, notwithstanding any other provision of this Agreement, terminate this Agreement without further notice and without prejudice to any other remedy to which it may be entitled at law, in equity or under this Agreement.

B. In the event of termination pursuant to this Section, City may take over the Services and prosecute the same to completion by contract or otherwise, and Consultant shall be liable to the extent that the total cost for completion of the Services required hereunder exceeds the compensation herein stipulated (provided that City shall use reasonable efforts to mitigate such damages), and City may withhold any payments to Consultant for the purpose of set-off or partial payment of the amounts owed City as provided in Section 6.3.

6.3 Retention of Funds.

Consultant hereby authorizes City to deduct from any amount payable to Consultant (whether or not arising out of this Agreement): (i) any payment amount of which may be in dispute hereunder or which is necessary to compensate City for any losses, costs, liabilities, or damages suffered by City, (ii) all amounts retained pursuant to the provisions of Section 4.8, (iii) all amounts for which City may be liable to third parties, by reason of Consultant's acts or omissions in performing or failing to perform Consultant's obligation under this Agreement, and (iv) all payments due or that become due to Consultant during the period that Consultant or any of its sub-contractors fail to maintain any required insurance in full force and effect, until notice is received by City that the required insurance has been restored to full force and effect and that the premiums therefore have been paid for a period satisfactory to City, as provided in Section 4.9, above. In the event that any claim is made by a third party, the amount or validity of which is disputed by Consultant, or any indebtedness shall exist which shall appear to be the basis for a claim of lien, City may withhold from any payment due, without liability for interest because of such withholding, an amount sufficient to cover such claim. The failure of City to exercise such right to deduct or to withhold shall not, however, affect the obligations of Consultant to insure, indemnify, and protect City as elsewhere provided herein.

6.4 Waiver.

Waiver by any Party to this Agreement of any term, condition, or covenant of this Agreement shall not constitute a waiver of any other term, condition, or covenant. Waiver by any Party of any breach of the provisions of this Agreement shall not constitute a waiver of any other provision or a waiver of any subsequent breach or violation of any provision of this Agreement. Acceptance by City of any Services by Consultant shall not constitute a waiver of any of the provisions of this Agreement. No delay or omission in the exercise of any right or remedy by a non-defaulting Party on any default shall impair such right or remedy or be construed as a waiver. Any waiver by either Party of any default must be in writing, and shall not be a waiver of any other default concerning the same or any other provision of this Agreement.

6.5 Rights and Remedies are Cumulative.

Except with respect to rights and remedies expressly declared to be exclusive in this Agreement, the rights and remedies of the Parties are cumulative and the exercise by either Party

of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same default or any other default by the other Party.

6.6 Legal Action.

In addition to any other rights or remedies, either Party may take legal action, in law or in equity, to cure, correct or remedy any default, to recover damages for any default, to compel specific performance of this Agreement, to obtain declaratory or injunctive relief, or to obtain any other remedy consistent with the purposes of this Agreement. Notwithstanding any contrary provision herein, Consultant must file a statutory claim pursuant to Government Code Sections 905 et seq. and 910 et seq., in order to pursue a legal action against City under this Agreement.

6.7 Termination Prior to Expiration of Term.

This Article 6 shall govern any termination of this Agreement except as specifically provided in Section 6.2 for termination for default of Consultant. City reserves the right to terminate this Agreement at any time, with or without cause, upon thirty (30) days' written notice to Consultant, except that where termination is due to the fault of Consultant, the period of notice may be a shorter time as may be determined by the Contract Officer. In addition, Consultant reserves the right to terminate this Agreement at any time, with or without cause, upon sixty (60) days' written notice to City, except that where termination is due to the fault of City, the period of notice may be a shorter time as Consultant may determine. Upon receipt of any notice of termination, Consultant shall immediately cease all Services hereunder except such as may be specifically approved by the Contract Officer. Except where Consultant has initiated termination, Consultant shall be entitled to compensation for all Services rendered prior to the effective date of the notice of termination and for any Services authorized by the Contract Officer thereafter in accordance with the Schedule of Compensation or such as may be approved by the Contract Officer, except as provided in Section 6.3. In the event Consultant has initiated termination, Consultant shall be entitled to compensation only for the reasonable value of the work product actually produced hereunder. In the event of termination without cause pursuant to this Section, the terminating Party need not provide the non-terminating Party with the opportunity to cure pursuant to Section 6.2.

6.8 Attorneys' Fees.

In any litigation or other proceeding by which a Party seeks to enforce its rights under this Agreement (whether in contract, tort or both) or seeks a declaration of any rights or obligations under this Agreement, the prevailing Party in such action or proceeding, in addition to any other relief which may be granted, whether legal or equitable, shall be entitled to reasonable attorneys' fees. Attorneys' fees shall include attorney's fees on any appeal, and in addition the Party entitled to attorneys' fees shall be entitled to all other reasonable costs for investigating such action, taking depositions and discovery and all other necessary costs the court allows which are incurred in such litigation. All such fees shall be deemed to have accrued on commencement of such action and shall be enforceable whether or not such action is prosecuted to judgment.

ARTICLE 7. CITY OFFICERS AND EMPLOYEES: NON-DISCRIMINATION

7.1 Non-liability of City Officers and Employees.

No officer or employee of City shall be personally liable to Consultant, or Consultant's Successor, in the event of any default or breach by City or for any amount which may become due to Consultant or Consultant's Successor, or for breach of any obligation of the terms of this Agreement.

7.2 Conflict of Interest.

Consultant covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, which would conflict in any manner with the interests of City or which would in any way hinder Consultant's performance of Services under this Agreement. Consultant further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or sub-contractor without the express written consent of the Contract Officer. Consultant agrees to at all times avoid conflicts of interest or the appearance of any conflicts of interest with the interests of City in the performance of this Agreement.

No officer or employee of City shall have any direct or indirect financial interest in this Agreement within the scope of Government Code section 1090, nor shall any such officer or employee make, participate in making, or use his or her official position to influence, any City decision relating to the Agreement which has a material financial effect on his or her financial interests or the financial interests of any corporation, partnership or association in which he or she is, directly or indirectly, interested, in violation of any State statute or regulation. Consultant warrants that it has not paid or given, and will not pay or give any third party any money or other consideration for obtaining this Agreement.

Consultant and its officers, employees, associates and sub-contractors, if any, shall comply with all conflict of interest statutes of the State of California applicable to Consultant's Services under this Agreement, including the Political Reform Act (Gov. Code § 81000, et seq.) and Government Code Section 1090. During the term of this Agreement, Consultant may perform similar services for other clients; but Consultant and its officers, employees, associates and sub-contractors shall not, without the Contract Officer's prior written approval, perform services for another person or entity for whom Consultant is not currently performing services that would require Consultant or one of its officers, employees, associates or sub-contractors to abstain from a decision under this Agreement pursuant to a conflict of interest statute. Consultant shall incorporate a clause substantially similar to this Section into any subcontract that Consultant executes in connection with the performance of this Agreement.

7.3 Covenant Against Discrimination.

Consultant covenants that, by and for itself, its heirs, executors, assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, gender, sexual orientation, marital status, national origin, or ancestry in the performance of this Agreement. Consultant shall take affirmative action to insure that applicants are employed, and that employees

are treated during employment, without regard to their race, color, creed, religion, sex, marital status, national origin, or ancestry, or other protected class.

7.4 Unauthorized Aliens.

Consultant hereby promises and agrees to comply with all of the provisions of the Federal Immigration and Nationality Act, 8 U.S.C.A. §§ 1101, et seq., as amended, and in connection therewith, shall not employ unauthorized aliens as defined therein. Should Consultant so employ such unauthorized aliens for the performance of Services covered by this Agreement, and should the any liability or sanctions be imposed against City for such use of unauthorized aliens, Consultant hereby agrees to and shall reimburse City for the cost of all such liabilities or sanctions imposed, together with any and all costs, including attorneys' fees, incurred by City.

ARTICLE 8. MISCELLANEOUS PROVISIONS

8.1 Notices.

Any notice, demand, request, document, consent, approval, bill, invoice, report or other communication required or permitted under this Agreement shall be in writing and conclusively deemed effective: (a) on confirmed delivery by courier service or overnight delivery service during Consultant's and City's regular business hours; or (b) three (3) Business Days after deposit in the United States mail, by certified or registered mail, and addressed to the Party to be notified as set forth below:

If to City	Attn: Patrick Safari City Engineer City of Banning 99 East Ramsey Street Banning, California 92220 Email: psafari@banningca.gov
With a courtesy copy to:	Serita R. Young, City Attorney Richards, Watson & Gershon 350 South Grand Avenue, 37th Floor Los Angeles, California 90071 Email: SYoung@rwglaw.com
If to Consultant:	Attn: Jason Stack President STC Traffic, Inc. 5973 Avenida Encinas, Suite 218 Carlsbad, CA 92008 Email: Jason.stack@stctraffic.com

8.2 Interpretation.

The terms of this Agreement shall be construed in accordance with the meaning of the language used and shall not be construed for or against either Party by reason of the authorship of this Agreement or any other rule of construction which might otherwise apply.

8.3 Counterparts.

This Agreement may be executed in counterparts, each of which shall be deemed to be an original, and such counterparts shall constitute one and the same instrument.

8.4 Integration; Amendment.

This Agreement, and all exhibits referred to in this Agreement, constitute the final, complete and exclusive statement of the terms of the agreement between the Parties pertaining to the subject matter of this Agreement and supersede all other and cancels any and all previous negotiations, arrangements, agreements and understandings, if any, between the Parties, and none shall be used to interpret this Agreement. No Party has been induced to enter into this Agreement by, nor is any Party relying on, any representation or warranty except those expressly set forth in this Agreement. No amendment to or modification of this Agreement, nor any provision or breach hereof waived, shall be valid unless made in writing and approved by Consultant and by City Council. The Parties agree that this requirement for written modifications cannot be waived and that any attempted waiver shall be void.

8.5 Severability.

In the event that any one or more of the phrases, sentences, clauses, paragraphs, or sections contained in this Agreement shall be declared invalid or unenforceable by a valid judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining phrases, sentences, clauses, paragraphs, or sections of this Agreement which are hereby declared as severable and shall be interpreted to carry out the intent of the Parties hereunder unless the invalid provision is so material that its invalidity deprives either Party of the basic benefit of their bargain or renders this Agreement meaningless.

8.6 Mutual Cooperation.

A. City's Cooperation. City shall provide Consultant with all pertinent data, documents and other requested information as is reasonably available for Consultant's proper performance of the Services required under this Agreement.

B. Consultant's Cooperation. In the event any claim or action is brought against City relating to Consultant's performance of Services rendered under this Agreement, Consultant shall render any reasonable assistance that City requires.

8.7 No Third Party Beneficiaries Intended.

This Agreement is made solely for the benefit of the Parties to this Agreement and their respective successors and assigns, and no other person or entity may have or acquire a right by virtue of this Agreement.

8.8 Final Payment Acceptance Constitutes Release.

The acceptance by Consultant of the final payment made under this Agreement shall operate as and be a release of City from all claims and liabilities for compensation to Consultant for anything done, furnished or relating to Consultant's Services. Acceptance of payment shall be any negotiation of City's check or the failure to make a written extra compensation claim within ten (10) calendar days of the receipt of that check. However, approval or payment by City shall not constitute, nor be deemed, a release of the responsibility and liability of Consultant, its employees, sub-contractors and agents for the accuracy and competency of the information provided and/or Services performed; nor shall such approval or payment be deemed to be an assumption of such responsibility or liability by City for any defect or error in the Services prepared by Consultant, its employees, sub-contractors and agents.

8.9 Non-Appropriation of Funds.

Payments to be made to Consultant by City for Services performed within the current fiscal year which are within the current fiscal budget and within an available, unexhausted fund. In the event that City does not appropriate sufficient funds for payment of Consultant's Services beyond the current fiscal year, this Agreement shall cover payment for Consultant's Services only to the conclusion of the last fiscal year in which City appropriates sufficient funds and shall automatically terminate at the conclusion of such fiscal year.

8.10 Headings.

The headings in this Agreement are included solely for convenience of reference and shall not affect the interpretation of any provision of this Agreement or any of the rights or obligations of the Parties to this Agreement.

8.11 Word Usage.

Unless the context clearly requires otherwise, (a) the words "shall," "will" and "agrees" are mandatory and "may" is permissive; (b) "or" is not exclusive; and (c) "includes" or "including" are not limiting.

8.12 Business Days.

"Business Days" refers to days that the Banning City Hall is open for business.

8.13 Corporate Authority.

The persons executing this Agreement on behalf of the Parties hereto warrant that (i): such Party is duly organized and existing, (ii) they are duly authorized to execute and deliver

this Agreement on behalf of that Party, (iii) by so executing this Agreement, such Party is formally bound to the provisions of this Agreement, and (iv) the entering into this Agreement does not violate any provision of any other Agreement to which that Party is bound. This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the Parties.

8.14 Electronic Signatures.

Each Party may adopt as its signature an electronic identification consisting of a symbol or code that is affixed to or contained in each document transmitted by such Party ("electronic signature"). The Parties hereto herby agree that electronic signatures are acceptable, shall have the same force and effect under the law as original wet signatures, and shall be sufficient to verify that the Parties have executed this Agreement and such other documents transmitted by the Parties.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF the Parties hereto have executed this Agreement the day and year first hereinabove written.

CITY OF BANNING		CONSULTANT	
Douglas Schulze, City Manager	Date	NAME: TITLE:	Date
		NAME: TITLE:	Date
ATTEST:			
		Tax ID No.	
Caroline Patton Administrative City Clerk	Date	Address:	

NOTE: PROOF OF AUTHORITY TO BIND CONTRACTING PARTY REQUIRED. APPROPRIATE ATTESTATIONS SHALL BE INCLUDED AS MAY BE REQUIRED BY THE BYLAWS, ARTICLES OF INCORPORATION, OR OTHER RULES OR REGULATIONS APPLICABLE TO CONSULTANT'S BUSINESS ENTITY.

EXHIBIT "A"
SCOPE OF SERVICES

I. Consultant will perform the following Services in connection with providing Design of Traffic Signal Hardware Upgrade prepared in connection therewith:

II. As part of the Services, Consultant will prepare and deliver the following tangible work products and services to City:

1. Project Understanding and Approach

The City of Banning was recently awarded an HSIP Cycle 11 Grant to upgrade existing traffic signal hardware at 17 signalized intersections throughout the City.

STC is very familiar with this project, **having prepared the City's Local Road Safety Plan in August 2022 and the HSIP Cycle 11 funding application in September 2022.** We understand the City's needs. During the previous studies, our staff observed traffic operations and conducted safety evaluations and reviews at all 17 traffic signals in the project area.

Local Road Safety Plans were established by Caltrans in 2019 to provide funding to local agencies for developing a framework for identifying, analyzing, and prioritizing roadway safety improvements.

In the LRSP, STC identified this specific traffic signal hardware project for the City of Banning (retroreflective backplates, emergency vehicle preemption, ADA-compliant push buttons, countdown pedestrian heads, and LED safety lighting) as a worthy project to receive an HSIP grant based on our analysis of crash data using the countermeasure toolbox and documenting a high benefit cost ratio (BCR).

In September 2022, STC further assisted the City by preparing the HSIP Cycle 11 Citywide Traffic Signal Hardware Upgrades Project application, and the City was awarded the grant.

STC has been involved with this project from its inception and is very experienced with the latest signal equipment.

We model our company structure after a municipal Public Works/Engineering Division. We are former City Traffic Engineers and extensions of staff in our role as consultants; we operate and maintain TMCs and systems; we have been foreman for electrical contractors in traffic signal construction and maintenance; we have managed the municipal Public Works Electrical Division; and, we have worked for traffic signal system suppliers and manufacturers.

We are unique when compared to other consultants in that our staff have extensive experience in projects that involve traffic signal hardware and equipment, installation methods and procedures, and maintenance considerations. We only recommend products that provide the best benefit to the City.

Various case studies have proven that signal heads with retroreflective borders are a cost-effective strategy to reduce crashes within the influence of signalized intersections. Signal heads with retroreflective borders increase visibility during daytime and nighttime conditions as well as during nighttime power outages, and aid drivers' advance perception of the upcoming intersections.

STC has prepared several PS&E traffic signal hardware upgrades, including backplates, LED safety lighting, and ADA-compliant push buttons and countdown pedestrian heads on similar HSIP projects throughout Southern California (**See Section 5**).

STC typically recommends the replacement of existing backplates with new yellow retroreflective louvered backplates. The louvered design reduces the wind load on the traffic signal mast arm pole and will help extend the life cycle of the signal equipment.

Our field investigation in the City of Banning indicated that there are two existing older 3M programmable signal heads at the intersection of Ramsey Street & 22nd Street (**Photo Below**). These signal heads are no longer manufactured, and the retroreflective backplates are not compatible. For this case, STC will evaluate replacement of the signal head, retroreflective yellow tape, or retroreflective tape on metal strips riveted to the existing backplate.

Non-standard framework design at Highland Springs Avenue & I-10 EB Ramps (left). Older 3M programmable signal heads at Ramsey Street & 22nd Street (right).

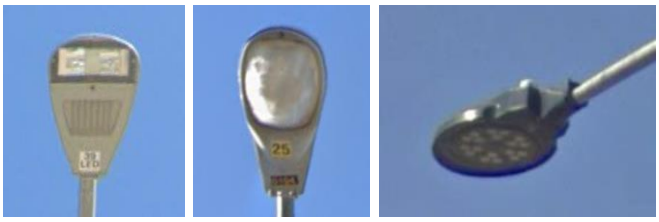
In addition, STC noted that there is a Type 1A signal pole with three signal heads without backplates due to the non-standard framework design at Highland Springs Avenue & I-10 EB Ramps. STC will recommend an alternate signal framework design to Caltrans so that new retroreflective backplates can be installed.

It has been STC's experience on similar HSIP signal hardware replacement projects that there are older traffic signal heads that are not compatible with the new yellow backplates and may require an alternate method of replacement. For these conditions, STC will develop alternate methods for replacement, such using yellow reflective tape, riveted metal reflective strips, or replacement of the old signal head to current industry standards.

Emergency vehicle preemption (EVP) systems at intersections have been in place for several decades. EVP is a proven signal feature that reduces conflicts between emergency vehicles and other roadway users. Collisions typically occur as emergency vehicles try to navigate through signalized intersections while others maneuver out of the path. EVP systems decrease emergency vehicle response times, which enhances emergency medical attention and is especially critical for crashes involving pedestrians and DUIs.

The City has done a great job at installing EVP systems on city-operated traffic signals. The only exception is at the traffic signal at Highland Springs Avenue & Ramsey Street and the two Caltrans maintained intersections at Highland Springs Avenue & I-10 EB and I-10 WB Ramps. STC has reviewed the conditions at these three intersections and determined that an emergency vehicle's coded strobe light will likely be blocked in the NB direction on Highland Springs Avenue as the emergency vehicle approaches the intersection of Highland Avenue & I-10 EB Ramp due to the railroad bridge structure (**See Below**).

During the field review, STC will evaluate whether there are any existing conduit runs for the NB advance detection loops. If there are advance loops with available capacity for EVP conductors, this could possibly be used and reduce the construction costs of adding new conduit, pull boxes, and signal poles. There is an existing street light pole located south of the railroad bridge where the EVP detectors could be mounted to provide adequate line of sight. STC will evaluate alternatives using infrared, radio and GPS technologies to newer, Cloud-based models of EVP technology where line of sight cannot be obtained.



The HSIP grant included funding to provide Accessible Pedestrian Signals (APS) and countdown pedestrian heads. The APS unit replaces the standard pedestrian push button and is designed to provide auditory, visual, and vibrotactile information to pedestrians who are blind or who have low vision so they can know when they should begin to cross at a signalized intersection.

Per the latest version of the California Manual on Uniform Traffic Control Devices (CA MUTCD), all pedestrian signal heads used at crosswalks where the pedestrian change interval is more than 7 seconds shall include a pedestrian change interval countdown timed display. On September 7, 2023, the Architectural and Transportation Barriers Compliance Board issued a final ruling on accessibility guidelines for pedestrian facilities in public rights-of-way (PROWAG). Ruling (R307) of PROWAG requires that pedestrian signals be able to communicate information about pedestrian signal timing in non-visual formats such as audible tones or speech messages, and vibrating surfaces.

STC will provide design plans for the removal and installation of new APS push buttons and countdown pedestrian heads.

STC will also prepare PS&E to replace the traffic signal safety lighting with LED safety lighting. There are a variety of safety lighting at each intersection with a combination of high pressure sodium lights and LED lights (**Photos Below**).

This task was not included in the RFP but was included in the HSIP grant the City received. STC will review each safety light and recommend a standard LED safety light. Since the City of Beaumont and Caltrans share some of these intersections with the City of Banning, STC will coordinate with those agencies to determine the safety light type to be used for replacement. STC has a great relationship with the City of Beaumont as the preferred on-call traffic engineering consultant for the City.

The City has a combination of high pressure sodium and LED traffic signal safety lights. STC will coordinate with the City to develop an LED safety lighting standard.

Scope of Work/Implementation Plan

The detailed Scope of Work presented below summarizes our knowledge of conditions in the project area, details of the work scope required, and our approach to the design effort to ensure quality, accuracy, and ultimate compliance with the project objectives.

Task 1.0. Project Management/ Administration

Task 1.1 Kick-off Meeting

STC's Project Manager, Rob Blough, PE, TE, will coordinate the day-to-day activities for the duration of the project and serve as the primary point of contact.

Within two weeks following the Notice to Proceed (NTP), Mr. Blough will schedule a project kick-off meeting with City staff and the project team to discuss the project objectives, schedule, scope, and City policies and procedures. Mr. Blough will set up and manage the project, provide utility coordination (if necessary), perform quality assurance and quality control prior to each milestone submittal and in conformance with Federal, State, and City standards.

STC will develop and maintain a detailed work program and project schedule to achieve Caltrans approval prior to the construction funding approval deadline. The work plan will include, at a minimum, details of methodology, sequence of tasks, lists of deliverables, milestone submittal schedule, summary of organizational responsibilities, and contracts. Mr. Blough will also coordinate progress meetings to discuss design issues, any potential modifications to the scope, action items, and next steps.

Task 1.2 Progress Meetings

STC will set up regular monthly status meetings with the City throughout the duration of the project and prepare meeting agendas. STC will prepare and email meeting agendas to City staff in advance of the meetings and email meeting minutes within seven (7) calendar days after each meeting. If necessary, STC will facilitate additional meetings with City Departments, Caltrans and other key stakeholders, creating meeting agendas with input from the City and Caltrans. These meeting minutes will be distributed within seven (7) calendar days of the meeting.

Task 1.3 Invoicing

STC will submit a progress report with monthly invoices to the City in an organized format and with sufficient detail and backup documentation to clearly identify personnel, hours worked, and tasks completed. STC will control all project documents and provide deliverables and final files to the City in electronic format and hard copy as requested.

STC will maintain project files and data in an organized, logical fashion, and will be able to promptly retrieve and distribute project information to the City in the event of an audit or Public Records Act (PRA) request.

<u>Task 1.0 Deliverables:</u>

- Work Plan
- Meeting Agendas and Meeting Minutes
- Monthly Invoices
- Project Schedule and Updates
- Project History File

Task 2.0 Preliminary Investigation/Site Assessment

Task 2.1 Field Investigation/Site Assessment

STC will conduct field investigations of all 17 traffic signals to verify and evaluate existing conditions relative to the project SOW.

STC will obtain and review all available documents and traffic signal as-builts. STC will compare the as-builts to existing conditions and document and evaluate the condition, type, and quantities of each traffic signal head, emergency vehicle preemption, pedestrian push buttons, pedestrian signal heads, and traffic signal safety lighting at all project intersections.

STC will inventory the traffic signal control box equipment and devices and document with photos and verify the conduit capacity for installation of new EVP systems as well as space inside the traffic control box for equipment.

If new conduits are proposed, STC will ensure that potholing is included as an option to be performed, as needed, to locate other utilities that may be in conflict. STC will obtain three (3) quotes from potholing contractors should the need be determined.

Utility companies will be consulted and coordinated with, and STC will detail all contacts and coordination efforts. STC will keep detailed notes and take photos of all equipment to keep as a record. If defective or deficient signal heads, safety lighting, pedestrian push buttons, pedestrian heads, or other traffic signal equipment are witnessed during field investigations, they will be documented and the City will be notified immediately.

The field documentation will also be utilized for PS&E development. Importantly, personnel performing this task must have a detailed understanding of traffic signal hardware and the various manufacturers and equipment models and features to properly evaluate and identify and inventory equipment and conditions.

Our staff are former **public works electricians and IMSA certified technicians** and are qualified in all aspects of traffic signal systems.

Task 2.1 Deliverables:

- On-Site Photos
- Letters to Utility Owners
- Utility As-built Maps
- Base Map
- Potholing (Option)
- Field Review Notes

Task 2.2 Potholing Services (Optional Task)

STC has included optional budget for potholing utilities as mentioned in the RFP. The locations of potholes will be discussed and agreed upon with the City before potholing. STC has accounted for up to five (5) potholes. STC will prepare necessary traffic control plans to be included in the permit submittal.

Task 2.2 Deliverables (Optional Task):

- Potholing Records in a Report Format

Task 2.3 Preliminary Engineering

STC will prepare preliminary engineering tables summarizing the existing and proposed signal head retroreflective yellow backplates, EVPs, accessible pedestrian push buttons, pedestrian countdown heads, and LED safety lights at each project intersection.

It has been STC's experience on similar HSIP signal hardware replacement projects that there are older traffic signal heads that are not compatible with the new yellow backplates and may require an alternate method of replacement. For these conditions, STC will develop alternate methods for replacement, such using yellow reflective tape, riveted metal reflective strips, or replacement of the old signal head to current industry standards.

Due to the high wind conditions in the City of Banning, STC will also evaluate the need for using louvered backplates to reduce the structural load on the signal poles with mast arms.

STC will meet with Caltrans to discuss the feasibility of installing EVPs at the intersections of Highland Springs Avenue and I-10 WB/EB ramps. Due to the grades on Highland Springs Avenue, the freeway and railroad bridge may be an obstruction to the proper functioning of the EVP systems at the ramps and alternative placement of optical receptors will be discussed with Caltrans.

STC has conducted a preliminary review of the line of sight and will develop alternative designs due to the railroad bridge blocking northbound line of sight at the Highland Springs Avenue and I-10 EB ramp signal. All documents and as-builts will be obtained and reviewed of the existing traffic signals from all involved agencies.

STC will prepare a table showing the results of our evaluation of all pedestrian push buttons and pedestrian heads. If there are any push button locations that are not in compliance with CA MUTCD or ADA, recommendations will be made to bring these into compliance. All pedestrian signal heads that have not been converted to countdown heads will be documented for replacement in the table.

If desired by the City, STC will coordinate with the City to develop a standard for wattage and fixture type for new LED safety lighting. Although the RFP does not specify replacement of safety lights, **STC has included this work effort as an added value task.** It should be noted that STC prepared the HSIP grant for the City and it included replacement of old lighting with LED safety lights.

STC has worked closely with contractors who perform this exact work during recent HSIP application preparations to understand the effort and cost associated with signal hardware replacements. This stage of the project will identify any potential shortcomings in the available HSIP grant funding for this project and allow for initiation of proactive solutions if desired.

Task 2.3 Deliverables:

- Table Summary of Back Plate Replacements
- Table Summary of Emergency Vehicle Preemption Installations
- Table Summary of Accessible Pedestrian Push Button Replacements
- Table Summary of Pedestrian Countdown Signal Head Replacements
- Table Summary of LED Safety Lighting Replacements
- Summary of Traffic Signal Control Box Inventory Including Photos

Task 3.0. Engineering Design

Task 3.1. Plan Preparation (60%, 90%, 100%)

STC will develop design plans for 17 traffic signals and incorporate the traffic signal hardware improvements that were identified during the Preliminary Engineering phase of this project (Task 2.3). The design will be developed in conformance with the latest City of Banning requirements, Green Book and Caltrans Specifications and Standard Plans, AASHTO, CA MUTCD, and Riverside County Regional Standard Drawings.

The design plan set will include a title sheet, general notes sheet, detail sheets, and individual intersection traffic signal improvement sheets at 1″ = 20′ scale. Plans will be submitted at 60% and 90% design for City review. The 100% design plans will be considered Final and submitted on Bond paper along with AutoCAD 2021 files.

Since the traffic signals on Highland Springs Avenue are jointly managed by the City of Banning and City of Beaumont, STC will also provide 60% and 90% design plans for review to the City of Beaumont. In addition, STC will also **provide plans to Caltrans** for their review of the two intersections at Highland Springs Avenue and I-10 EB/WB ramps.

The City of Banning provided eleven (11) intersection as-built traffic signal plans, and these will be utilized for a delta revision. Two (2) intersections are Caltrans maintained and STC will obtain copies of their as-builts. STC will coordinate with Caltrans to determine their requirements for design plan submittals. For the remaining four (4) intersections where there are no existing plans, STC will produce new plans. STC will prepare four (4) new traffic signal modification plans sufficient for a contractor to bid and complete the replacement of signal head backplates, installation of EVPs, replacement of pedestrian push buttons and countdown heads, and replacement of safety lighting. The plans will be prepared at a scale of 1" = 20'. The base plan will show existing right of way lines, roadway centerlines, curb, gutter and sidewalk, utilities of record. All traffic signal components will be drafted using the latest CAD standards for traffic signal design. Plans will include general notes, construction notes, phase diagrams, pole and equipment schedules, conduit and conductor schedules, and details for pole locations and foundations, pull boxes, and conduits.

All work identified on the plans will be approved and signed by a professional Civil Engineer registered in the State of California. Plans will be submitted at the 60%, 90% and 100% design levels.

Task 3.1 Deliverables:

- (60% and 90% Plans) Electronic Submittal (PDF) of 1-Title Sheet, 1-General Note and Area Map Sheet, 17-Traffic Signal Improvement Plan Sheets
- (100%/Final Plans) Bond Paper Submittal of 1-Title Sheet, 1-General Note and Area Map Sheet, 17-Traffic Signal Improvement Plan Sheets
- Four (4) sets of Final Design Plans on 24″x36 Bond Paper
- Final AutoCAD 2021 files

Task 4.0 Permitting

STC will investigate and process all required permits, including Caltrans and City of Beaumont encroachment permits. As an added value item, STC will prepare all necessary documents required for the Construction Funding Allocation Request (CON) in compliance with LAPM state funded HISP project implementation procedures. The deliverables shown under this task are anticipated to be included with the CON.

Task 4.0 Deliverables:

- Request for Funding Allocation Form
- Approved CEQA Notice of Exemption Documents
- Right-of-Way Certification
- State-only Finance Letter for Construction
- Detailed Engineer's Cost Estimate for Construction Items
- Printout from List of Selected HSIP Projects Highlighting City Project
- Caltrans Encroachment Permit
- City of Banning Encroachment Permit

Task 5.0 Specifications and Cost Estimate

Task 5.1 Project Specifications and Bid Documents

STC will prepare project specifications utilizing the City's most current boilerplate bid package for state funded projects, special provisions, and the latest edition of the Greenbook for Public Works Construction. The bid package will be prepared via Microsoft Word and remain in the City's boilerplate font and format. Project specifications and bid documents will include the detailed project description, bid item descriptions, preparation of bid schedule, applicable special provisions, and references to technical specifications.

Task 5.1 Deliverables:

- Bid Package (Word Document)
- Project Specifications at the 90% and 100% Design Levels (Word Document)

Task 5.2 Engineer's Estimate of Probable Construction Cost

The STC Team will provide an itemized engineer's estimate of probable cost at 90% and 100% levels of design for all proposed improvements.

The estimates will be detailed with unit prices and quantities for individual line items of work and specified equipment based on the historical cost index. Cost estimate details (items and descriptions) will be consistent with bid items and specification sections.

Task 5.2 Deliverables:

- Engineer's Cost Estimate at the 90% and 100% Design Levels (Excel)

Task 6.0 Bidding/Construction Support

STC will provide design support during advertisement and construction of the project including answering pre-bid questions and interpretations of the plans and specification either by email or phone. STC will respond to the contractor's RFIs, confer with the City's construction manager or inspector regarding RFIs as appropriate, and review shop drawings and material submittals.

All bidding communication will be directed through the City for issuance to the contractor. STC will prepare design changes during construction as authorized, attend the pre-bid and pre-construction meeting, and be available to answer questions from City staff or the contractor.

Task 6.0 Deliverables:

- Responses to Bidder's Questions/RFIs and Prepare Addenda
- Attend Pre-Bid and Pre-Construction Meetings
- Responses to Contractor's Submittals, Shop Drawings and RFIs
- Conduct Three (3) Site Visits During Construction as Requested
- Prepare As-Built Plans within One (1) Month of Receipt of As-Built Redlines from Contractor

III. In addition to the requirements of Parts I and II of this Scope of Services, during the performance of the Services, Consultant will keep City appraised through periodic status reports regarding the performance of the Services under this Agreement as set forth below and in Section 5.2, by the following means:

a. In-person meetings and/or teleconferences.

b. Email updates/questions to applicant team and City while reviews are underway.

c. Conference calls.

IV. All work product is subject to review and acceptance by City. If the City determines that any work product is unacceptable, for any reason, it must be revised by Consultant without additional charge to City until found satisfactory and accepted by City.

EXHIBIT "B"
SPECIAL REQUIREMENTS

TERMS FOR COMPLIANCE WITH CALIFORNIA LABOR LAW REQUIREMENTS

1. This Agreement calls for services that, in whole or in part, constitute "public works" as defined in Division 2, Part 7, Chapter 1 (commencing with Section 1720) of the California Labor Code ("Chapter 1"). Further, Consultant acknowledges that this Agreement is subject to (a) Chapter 1 and (b) the rules and regulations established by the Department of Industrial Relations ("DIR") implementing such statutes. Therefore, as to those Services that are "public works," Consultant shall comply with and be bound by all the terms, rules and regulations described in 1(a) and 1(b) as though set forth in full herein.

2. California law requires the inclusion of specific Labor Code provisions in certain contracts. The inclusion of such specific provisions below, whether or not required by California law, does not alter the meaning or scope of Section 1 above.

3. Consultant shall be registered with the Department of Industrial Relations in accordance with California Labor Code Section 1725.5, and has provided proof of registration to City prior to the Effective Date of this Agreement. Consultant shall not perform work with any subcontractor that is not registered with DIR pursuant to Section 1725.5. Consultant and subcontractors shall maintain their registration with the DIR in effect throughout the duration of this Agreement. If the Consultant or any subcontractor ceases to be registered with DIR at any time during the duration of the project, Consultant shall immediately notify City.

4. Pursuant to Labor Code Section 1771.4, Consultant's Services are subject to compliance monitoring and enforcement by DIR. Consultant shall post job site notices, as prescribed by DIR regulations.

5. Pursuant to Labor Code Section 1773.2, copies of the prevailing rate of per diem wages for each craft, classification, or type of worker needed to perform the Agreement are on file at City Hall and will be made available to any interested party on request. Consultant acknowledges receipt of a copy of the DIR determination of such prevailing rate of per diem wages, and Consultant shall post such rates at each job site covered by this Agreement.

6. Consultant shall comply with and be bound by the provisions of Labor Code Sections 1774 and 1775 concerning the payment of prevailing rates of wages to workers and the penalties for failure to pay prevailing wages. The Consultant shall, as a penalty to City, forfeit $200.00 for each calendar day, or portion thereof, for each worker paid less than the prevailing rates as determined by the DIR for the work or craft in which the worker is employed for any public work done pursuant to this Agreement by Consultant or by any subcontractor.

7. Consultant shall comply with and be bound by the provisions of Labor Code Section 1776, which requires Consultant and each subcontractor to: keep accurate payroll records and verify such records in writing under penalty of perjury, as specified in Section 1776; certify and make such payroll records available for inspection as provided by Section 1776; and inform City of the location of the records.

8. Consultant shall comply with and be bound by the provisions of Labor Code Sections 1777.5, 1777.6 and 1777.7 and California Administrative Code Title 8, Section 200 et seq. concerning the employment of apprentices on public works projects. Consultant shall be responsible for compliance with these aforementioned Sections for all apprenticeable occupations. Prior to commencing work under this Agreement, Consultant shall provide City with a copy of the information submitted to any applicable apprenticeship program. Within 60 days after concluding work pursuant to this Agreement, Consultant and each of its subcontractors shall submit to City a verified statement of the journeyman and apprentice hours performed under this Agreement.

9. The Consultant shall not perform Work with any Subcontractor that has been debarred or suspended pursuant to California Labor Code Section 1777.1 or any other federal or state law providing for the debarment of contractors from public works. The Consultant and Subcontractors shall not be debarred or suspended throughout the duration of this Agreement pursuant to Labor Code Section 1777.1 or any other federal or state law providing for the debarment of contractors from public works. If the Consultant or any subcontractor becomes debarred or suspended during the duration of the project, the Consultant shall immediately notify City.

10. Consultant acknowledges that eight hours labor constitutes a legal day's work. Consultant shall comply with and be bound by Labor Code Section 1810. Consultant shall comply with and be bound by the provisions of Labor Code Section 1813 concerning penalties for workers who work excess hours. The Consultant shall, as a penalty to City, forfeit $25.00 for each worker employed in the performance of this Agreement by the Consultant or by any subcontractor for each calendar day during which such worker is required or permitted to work more than eight hours in any one calendar day and 40 hours in any one calendar week in violation of the provisions of Division 2, Part 7, Chapter 1, Article 3 of the Labor Code. Pursuant to Labor Code section 1815, work performed by employees of Consultant in excess of eight hours per day, and 40 hours during any one week shall be permitted upon public work upon compensation for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay.

11. California Labor Code Sections 1860 and 3700 provide that every employer will be required to secure the payment of compensation to its employees. In accordance with the provisions of California Labor Code Section 1861, Consultant hereby certifies as follows:

> "I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract."
>
> **Date**_____ **Signature**_____

12. For every subcontractor who will perform work on the project, Consultant shall be responsible for such subcontractor's compliance with Chapter 1 and Labor Code Sections 1860 and 3700, and Consultant shall include in the written contract between it and each subcontractor a copy of those statutory provisions and a requirement that each subcontractor shall comply with those statutory provisions. Consultant shall be required to take all actions necessary to enforce such contractual provisions and ensure subcontractor's compliance, including, without limitation, conducting a periodic review of the certified payroll records of the subcontractor and upon becoming aware of the failure of the subcontractor to pay his or her workers the specified prevailing rate of wages. Consultant shall diligently take corrective action to halt or rectify any failure.

EXHIBIT "C"
SCHEDULE OF COMPENSATION

I. Consultant shall perform the following tasks ("Tasks") at the following rates as attached as Exhibit C-1.

II. Within the budgeted amounts for each Task, and with the approval of the Contract Officer, funds may be shifted from one Task sub-budget to another so long as the Contract Sum is not exceeded per Section 2.1, unless Additional Services are approved per Section 1.8.

III. City will compensate Consultant for the Services performed upon submission of a valid invoice. Each invoice is to include:

A. Line items for all personnel describing the Services performed, the number of hours worked, and the hourly rate.

B. Line items for all materials and equipment properly charged to the Services.

C. Line items for all other approved reimbursable expenses claimed, with supporting documentation.

D. Line items for all approved sub-contractor labor, supplies, equipment, materials, and travel properly charged to the Services.

PROPOSED PROJECT SCHEDULE

RESOLUTION 2021-91

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, AUTHORIZING THE EXECUTION OF THE CALIFORNIA DEPARTMENT OF TRANSPORTATION HIGHWAY SAFETY IMPROVEMENT PROGRAM STATE-AID MASTER AGREEMENT NO. 08-5214S21 AND PROGRAM SUPPLEMENT AGREEMENTS NO. HSIPSL-5214(013) AND NO. HSIPSL-5214(014)

WHEREAS, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 10 Highway Safety Improvement Program Benefit Cost Ratio category on October 15, 2020, for the purpose of making intersection improvements and installing sidewalks at the Omar/Ramsey Intersection; and

WHEREAS, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 10 Highway Safety Improvement Program Funding Set-asides category on October 15, 2020, for the purpose of installing/upgrading pedestrian crossings at four non-signalized intersections on Ramsey Street; and

WHEREAS, the City of Banning was notified on March 26, 2021, that the two grant applications were approved; and

WHEREAS, Master Agreement 08-5214S21 and the two corresponding Program Supplement Agreements HSIPSL-5214(013) (Ramsey-Omar Intersection Improvements and Sidewalk) for $18,800 and HSIPSL-5214(014) (Ramsey St. intersections) for $13,300 must be executed with Caltrans before grant funds may be claimed.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. Authorizes the City Manager or his designee to execute the Caltrans Master Agreement 08-5214S21, Program Supplement Agreement No. HSIPSL-5214(013), and Program Supplement Agreement No. HSIPSL-5214(014) and any related documents on behalf of the City of Banning.

PASSED, APPROVED AND ADOPTED this 12th day of October, 2021.

Colleen Wallace, Mayor
City of Banning

ATTEST:

Caroline Patton, Deputy City Clerk
City of Banning

APPROVED AS TO FORM AND LEGAL CONTENT:

Kevin G. Ennis, City Attorney

RESOLUTION 2023-167

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING PROGRAM SUPPLEMENT AGREEMENTS WITH THE STATE OF CALIFORNIA DEPARTMENT OF TRANSPORTATION FOR THREE HIGHWAY SAFETY IMPROVEMENT CYCLE 11 GRANTS FOR THE TRAFFIC SIGNAL HARDWARE UPGRADE AT SEVENTEEN SIGNALIZED INTERSECTIONS, PEDESTRIAN CROSSINGS UPGRADE AT NINETEEN INTERSECTIONS AND WILSON STREET/12TH STREET INTERSECTION IMPROVEMENTS

WHEREAS, on September 9, 2022, the City of Banning submitted a grant application to the State of California Department of Transportation (Caltrans) Cycle 11 Highway Safety Improvement Program for the upgrade of traffic signal hardware at seventeen (17) signalized intersections throughout the City; and

WHEREAS, on September 9, 2022, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 11 Highway Safety Improvement Program for the upgrade of pedestrian crossings at nineteen (19) intersections throughout the City; and

WHEREAS, on September 9, 2022, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 11 Highway Safety Improvement Program for the improvement of Wilson Street and 12th Street intersection; and

WHEREAS, on March 9, 2023, the City received notification from Caltrans that the City's three (3) HSIP grant applications selected for funding; and

WHEREAS, to proceed with the Preliminary Engineering (PE) phase, the City and Caltrans must execute Program Supplement Agreements No. HSIPSL-5214(016) for $54,000, HSIPSL-5214(017) for $76,500 and HSIPSL-5214(018) for $44,460 as part of the funding authorization process.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves Program Supplement Agreements with Caltrans for three (3) Highway Safety Improvement (HSIP) Cycle 11 grants for the Traffic Signal Hardware Upgrade at 17 Signalized Intersections, Pedestrian Crossings Upgrade at 19 Intersections and Wilson Street/12th Street Intersection Improvements.

SECTION 2. The City Council authorizes the City Manager or his designee to execute Program Supplement Agreements No. HSIPSL-5214(016), HSIPSL-5214(017) and HSIPSL-5214(018).

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 10th day of October 2023.

SPECIAL COVENANTS OR REMARKS

1. A. This PROJECT has received STATE funds from Highway Safety Improvement Program (HSIP). The ADMINISTERING AGENCY agrees to administer the PROJECT in accordance with the Highway Safety Improvement Program (HSIP) Guidelines, the Local Assistance Procedures Manual (LAPM), the Local Assistance Program Guidelines (LAPG), and this PROGRAM SUPPLEMENT.

   B. The STATE funds for this PROJECT may be provided under one or more phases, which are Preliminary Engineering (PE), Right-of-Way (R/W) and Construction (Con).

   A phase-specific fund allocation is required, in addition to other requirements, before reimbursable work can occur for the phase identified. Each allocation will be assigned an effective date and identify the amount of funds allocated per phase. Unless otherwise determined, the effective date of the phase-specific allocation will constitute the start of reimbursable expenditures for the phase. The STATE funds available for reimbursement will be limited to the amount allocated by the STATE for the phase.

   C. At the time of the first fund allocation approval for the Project, this PROGRAM SUPPLEMENT, a STATE-approved Allocation Letter and STATE Finance Letter are prepared to allow reimbursement of eligible PROJECT expenditures for the phase allocated.

   D. STATE and ADMINISTERING AGENCY agree that any additional fund allocations made after the execution of this PROGRAM SUPPLEMENT, for the phase that has been authorized in the first fund allocation approval or for a new phase, will be encumbered on this PROJECT by use of a STATE-approved Allocation Letter and a STATE Finance Letter and are subject to the terms and conditions thereof.

   E. This PROJECT is subject to the delivery requirements enacted by the HSIP guidelines. The delivery requirements may be accessed at: https://dot.ca.gov/programs/local-assistance/fed-and-state-programs/highway-safety-improvement-program/delivery-requirements-status-approved-projects.

   F. Award information shall be submitted by the ADMINISTERING AGENCY to the District Local Assistance Engineer immediately after project contract award and prior to the submittal of the ADMINISTERING AGENCY'S first invoice for the construction contract. Failure to do so will cause a delay in the State processing of invoices for the construction phase.

   G. The ADMINISTERING AGENCY shall invoice STATE for PE, R/W and CON costs no later than 180 days after the end of expenditure the phase. For construction costs, the ADMINISTERING AGENCY has 180 days after project completion or contract acceptance to make the final payment to the contractor, prepare the final Report of Expenditures and final invoice, and submit to STATE for verification and

SPECIAL COVENANTS OR REMARKS

payment.

H. ADMINISTERING AGENCY agrees to submit the final report documents that collectively constitute a "Report of Expenditures" within one hundred eighty (180) days of PROJECT completion. Failure of ADMINISTERING AGENCY to submit a "Final Report of Expenditures" within 180 days of PROJECT completion will result in STATE imposing sanctions upon ADMINISTERING AGENCY in accordance with the current LAPM provisions.

I. ADMINISTERING AGENCY agrees to comply with the requirements in 2 CFR Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (applicable to Federal and State Funded Projects).

J. By executing this PROGRAM SUPPLEMENT, ADMINISTERING AGENCY agrees to provide the STATE, upon request, with the information related to the PROJECT for the purpose of project evaluation or other purposes.

K. The ADMINISTERING AGENCY shall construct the PROJECT in accordance with the scope of work presented in the application and approved by the State. Any changes to the approved PROJECT scope without the prior expressed approval of the State are ineligible for reimbursement and may result in the entire PROJECT becoming ineligible for reimbursement.

MASTER AGREEMENT
ADMINISTERING AGENCY-STATE AGREEMENT FOR
STATE-FUNDED PROJECTS

08	City of Banning
District	Administering Agency

Agreement No. 08-5214S21

This AGREEMENT, is entered into effective this 14th day of October, 20 21, by and between the City of Banning, hereinafter referred to as "ADMINISTERING AGENCY," and the State of California, acting by and through its Department of Transportation (Caltrans), hereinafter referred to as "STATE", and together referred to as "PARTIES" or individually as a "PARTY."

RECITALS:

1. WHEREAS, the Legislature of the State of California has enacted legislation by which certain State funds are made available for use on local transportation related projects of public entities qualified to act as recipients of these state funds; and

2. WHEREAS, ADMINISTERING AGENCY has applied to the California Transportation Commission (CTC) and/or STATE for funding from a State-funded program (herein referred to as STATE FUNDS), as defined in the Local Assistance Program Guidelines (LAPG) and/or in the respective CTC Guidelines, for use on local authorized transportation related projects as a local administered project(s), hereinafter referred to as "PROJECT"; and

3. WHEREAS, said PROJECT will not receive any federal funds; and

4. WHEREAS, before STATE FUNDS will be made available for PROJECT, ADMINISTERING AGENCY and STATE are required to enter into an agreement to establish terms and conditions applicable to the ADMINISTERING AGENCY when receiving STATE FUNDS for a designated PROJECT facility and to the subsequent operation and maintenance of that completed facility.

NOW, THEREFORE, the PARTIES agree as follows:

ARTICLE I - PROJECT ADMINISTRATION

1. This AGREEMENT shall have no force or effect with respect to any program project unless and until a project- specific Program Supplement to this AGREEMENT for state funded projects, hereinafter referred to as "PROGRAM SUPPLEMENT", has been fully executed by both STATE and ADMINISTERING AGENCY.

2. The State approved project-specific allocation notification letter and approved CTC allocation documentation designate the party responsible for implementing PROJECT, type of work, and location of PROJECT for projects requiring CTC allocation by PROJECT component of work.

3. The PROGRAM SUPPLEMENT sets out special covenants as a condition for the ADMINISTERING AGENCY to receive STATE FUNDS from/through STATE for designated PROJECT. The PROGRAM SUPPLEMENT shall also show these STATE FUNDS that have been initially encumbered for PROJECT along with the matching funds to be provided by ADMINISTERING AGENCY and/or others. Execution of PROGRAM SUPPLEMENT by the PARTIES shall cause ADMINISTERING AGENCY to adopt all the terms of this AGREEMENT as though fully set forth therein in the PROGRAM SUPPLEMENT. Unless otherwise expressly delegated in a resolution by the governing body of ADMINISTERING AGENCY, and with written concurrence by STATE, the PROGRAM SUPPLEMENT shall be approved and managed by the governing body of ADMINISTERING AGENCY.

4. ADMINISTERING AGENCY agrees to execute and return each project-specific PROGRAM SUPPLEMENT. The PARTIES agree that STATE may suspend future allocations, encumbrances and invoice payments for any on- going or future STATE FUNDED PROJECT performed by ADMINISTERING AGENCY if any project-specific PROGRAM SUPPLEMENT is not returned, unless otherwise agreed by STATE in writing.

5. ADMINISTERING AGENCY further agrees, as a condition to the release and payment of STATE FUNDS encumbered for the PROJECT described in each PROGRAM SUPPLEMENT, to comply with the terms and conditions of this AGREEMENT and all the agreed-upon Special Covenants or Remarks incorporated within the PROGRAM SUPPLEMENT, and Cooperative/Contribution Agreement where appropriate, defining and identifying the nature of the specific PROJECT.

6. STATE FUNDS will not participate in any portion of PROJECT work performed in advance of the effective date of allocation by CTC, or by STATE for allocations delegated to STATE by CTC, for said PROJECT.

7. Projects allocated with STATE FUNDS will be administered in accordance with the current CTC STIP Guidelines, applicable chapter(s) of the LAPG, LAPM and/or any other instructions published by STATE.

8. ADMINISTERING AGENCY agrees to ensure compliance with all relevant State laws and requirements for work related to PROJECT, including the California Environmental Quality Act (CEQA).

9. ADMINISTERING AGENCY's eligible costs for preliminary engineering work includes all preliminary work directly related to PROJECT up to contract award for construction, including, but not limited to, environmental studies and permits (E&P),

preliminary surveys and reports, laboratory work, soil investigations, the preparation of plans, specifications and estimates (PS&E), advertising for bids, awarding of a contract and project development contract administration.

10. ADMINISTERING AGENCY's eligible costs for construction engineering include actual inspection and supervision of PROJECT construction work; construction staking; laboratory and field testing; and the preparation and processing of field reports, records, estimates, final reports, and allowable expenses of employees/consultants engaged in such activities.

11. Unless the PARTIES agree otherwise in writing, ADMINISTERING AGENCY's employees or its contracted engineering consultant shall be responsible for all PROJECT engineering work.

12. ADMINISTERING AGENCY shall not proceed with final design of PROJECT until final environmental approval of PROJECT. Final design entails the design work necessary to complete the PS&E and other work necessary for a construction contract but not required earlier for environmental clearance of that PROJECT.

13. If PROJECT is not on STATE-owned right-of-way, PROJECT shall be constructed in accordance with Chapter 11 of the LAPM that describes minimum statewide design standards for local agency streets and roads. The design standards for projects off the National Highway System (NHS) allow STATE to accept either the current Caltrans Highway Design Manual standards, the current FHWA-adopted American Association of State Highway and Transportation Officials (AASHTO) A Policy on Geometric Design of Highways and Streets standards, or the approved geometric design standards of ADMINISTERING AGENCY. Additionally, for projects off the NHS, STATE will accept ADMINISTERING AGENCY-approved standard specifications, standard plans, materials sampling and testing quality assurance programs that meet the conditions described in the then current Local Assistance Procedures Manual.

14. If PROJECT involves work within or partially within STATE-owned right-of-way, that PROJECT shall also be subject to compliance with the policies, procedures and standards of the STATE Project Development Procedures Manual and Highway Design Manual and where appropriate, an executed cooperative agreement between STATE and ADMINISTERING AGENCY that outlines the PROJECT responsibilities and respective obligations of the PARTIES. ADMINISTERING AGENCY and its contractors shall each obtain an encroachment permit through STATE prior to commencing any work within STATE rights-of-way or work which affects STATE facilities.

15. When PROJECT is not on the State Highway System (SHS) but includes work to be performed by a railroad, the contract for such work shall be prepared by ADMINISTERING AGENCY or by STATE, as the PARTIES may hereafter agree. In either event, ADMINISTERING AGENCY shall enter into an agreement with the railroad providing for future maintenance of protective devices or other facilities installed under the contract.

16. ADMINISTERING AGENCY shall comply with the provisions of sections 4450 and 4454 of the California Government Code, as well as other Department of General Services guidance, if applicable, for the contract PS&E for the construction of buildings, structures, sidewalks, curbs and related facilities for accessibility and

usability. Further requirements and guidance are provided in Title 24 of the California Code of Regulations.

17. ADMINISTERING AGENCY shall provide a full-time public employee to be in responsible charge of each PROJECT. ADMINISTERING AGENCY shall provide or arrange for adequate supervision and inspection of each PROJECT. ADMINISTERING AGENCY may utilize consultants to perform supervision and inspection work for PROJECT with a fully qualified and licensed engineer. Utilization of consultants does not relieve ADMINISTERING AGENCY of its obligation to provide a full-time public employee to be in responsible charge of each PROJECT.

18. Unless otherwise provided in the PROGRAM SUPPLEMENT, ADMINISTERING AGENCY shall advertise, award, and administer the PROJECT construction contract or contracts.

19. The cost of maintenance, security, or protection performed by ADMINISTERING AGENCY or contractor forces during any temporary suspension of PROJECT or at any other time may not be charged to the PROJECT.

20. ADMINISTERING AGENCY shall submit PROJECT-specific award information to STATE's District Local Assistance Engineer, within sixty (60) days after contract award.

21. ADMINISTERING AGENCY shall submit the final report documents that collectively constitute a "Final Project Expenditure Report", LAPM Exhibit 17-M, within one hundred eighty (180) days of PROJECT completion. Failure by ADMINISTERING AGENCY to submit a "Final Project Expenditure Report", within 180 days of project completion will result in STATE imposing sanctions upon ADMINISTERING AGENCY in accordance with the Local Assistance Procedures Manual.

22. ADMINISTERING AGENCY shall comply with the Americans with Disabilities Act (ADA) of 1990 that prohibits discrimination on the basis of disability and all applicable regulations and guidelines issued pursuant to the ADA.

23. The Governor and the Legislature of the State of California, each within their respective jurisdictions, have prescribed certain nondiscrimination requirements with respect to contract and other work financed with public funds. ADMINISTERING AGENCY agrees to comply with the requirements of the FAIR EMPLOYMENT PRACTICES ADDENDUM, attached hereto as Exhibit A and further agrees that any agreement entered into by ADMINISTERING AGENCY with a third party for performance of work connected with PROJECT shall incorporate Exhibit A (with third party's name replacing ADMINISTERING AGENCY) as parts of such agreement.

24. ADMINISTERING AGENCY shall include in all contracts and subcontracts awarded when applicable, a clause that requires each subcontractor to comply with California Labor Code requirements that all workers employed on public works aspects of any project (as defined in California Labor Code sections 1720-1815) be paid not less than the general prevailing wage rates predetermined by the Department of Industrial Relations as effective at the date of contract award by the ADMINISTERING AGENCY.

ARTICLE II - RIGHTS-OF-WAY

1. No contract for the construction of a STATE FUNDED PROJECT shall be awarded until all necessary rights of way have been secured. Prior to the advertising for construction of PROJECT, ADMINISTERING AGENCY shall certify and, upon request, shall furnish STATE with evidence that all necessary rights-of-way are available for construction purposes or will be available by the time of award of the construction contract.

2. The furnishing of rights of way by ADMINISTERING AGENCY as provided for herein includes, and is limited to, the following, unless the PROGRAM SUPPLEMENT provides otherwise.

(a) Expenditures of capital and support to purchase all real property required for PROJECT free and clear of liens, conflicting easements, obstructions and encumbrances, after crediting PROJECT with the fair market value of any excess property retained and not disposed of by ADMINISTERING AGENCY.

(b) The cost of furnishing of right-of-way as provided for herein includes, in addition to real property required for the PROJECT, title free and clear of obstructions and encumbrances affecting PROJECT and the payment, as required by applicable law, of damages to owners of remainder real property not actually taken but injuriously affected by PROJECT.

(c) The cost of relocation payments and services provided to owners and occupants pursuant to Government Code sections 7260-7277 when PROJECT displaces an individual, family, business, farm operation or nonprofit organization.

(d) The cost of demolition and/or the sale of all improvements on the right-of-way after credit is recorded for sale proceeds used to offset PROJECT costs.

(e) The cost of all unavoidable utility relocation, protection or removal.

(f) The cost of all necessary hazardous material and hazardous waste treatment, encapsulation or removal and protective storage for which ADMINISTERING AGENCY accepts responsibility and where the actual generator cannot be identified, and recovery made.

3. ADMINISTERING AGENCY agrees to indemnify and hold STATE harmless from any liability that may result in the event the right-of-way for a PROJECT is not clear as certified by ADMINISTERING AGENCY, including, but not limited to, if said right-of-way is found to contain hazardous materials requiring treatment or removal to remediate in accordance with Federal and State laws. ADMINISTERING AGENCY shall pay, from its own non- matching funds, any costs which arise out of delays to the construction of PROJECT because utility facilities have not been timely removed or relocated, or because rights-of-way were not available to ADMINISTERING AGENCY for the orderly prosecution of PROJECT work.

ARTICLE III - MAINTENANCE AND MANAGEMENT

1. ADMINISTERING AGENCY will maintain and operate the property acquired, developed, constructed, rehabilitated, or restored by PROJECT for its intended public use until such time as the parties might amend this AGREEMENT to otherwise provide. With the approval of STATE, ADMINISTERING AGENCY or its successors in interest in the PROJECT property may transfer this obligation and responsibility to maintain and operate PROJECT property for that intended public purpose to another public entity.

2. Upon ADMINISTERING AGENCY's acceptance of the completed construction contract or upon contractor being relieved of the responsibility for maintaining and protecting PROJECT, ADMINISTERING AGENCY will be responsible for the maintenance, ownership, liability, and the expense thereof, for PROJECT in a manner satisfactory to the authorized representatives of STATE and if PROJECT falls within the jurisdictional limits of another Agency or Agencies, it is the duty of ADMINISTERING AGENCY to facilitate a separate maintenance agreement(s) between itself and the other jurisdictional Agency or Agencies providing for the operation, maintenance, ownership and liability of PROJECT. Until those agreements are executed, ADMINISTERING AGENCY will be responsible for all PROJECT operations, maintenance, ownership and liability in a manner satisfactory to the authorized representatives of STATE. If, within ninety (90) days after receipt of notice from STATE that a PROJECT, or any portion thereof, is not being properly operated and maintained and ADMINISTERING AGENCY has not satisfactorily remedied the conditions complained of, the approval of future STATE FUNDED PROJECTS of ADMINISTERING AGENCY will be withheld until the PROJECT shall have been put in a condition of operation and maintenance satisfactory to STATE. The provisions of this section shall not apply to a PROJECT that has been vacated through due process of law with STATE's concurrence.

3. PROJECT and its facilities shall be maintained by an adequate and well-trained staff of engineers and/or such other professionals and technicians as PROJECT reasonably requires. Said operations and maintenance staff may be employees of ADMINISTERING AGENCY, another unit of government, or a contractor under agreement with ADMINISTERING AGENCY. All maintenance will be performed at regular intervals or as required for efficient operation of the complete PROJECT improvements.

4. ADMINISTERING AGENCY shall comply with all applicable law, including but not limited to, all applicable legal authority regarding construction standards.

ARTICLE IV - FISCAL PROVISIONS

1. All contractual obligations of STATE are subject to the appropriation of resources by the Legislature and the allocation of resources by the CTC.

2. STATE'S financial commitment of STATE FUNDS will occur only upon the execution of this AGREEMENT, the execution of each project-specific PROGRAM SUPPLEMENT and/or STATE's approved finance letter.

3. ADMINISTERING AGENCY agrees, as a minimum, to submit invoices in arrears for reimbursement of allowable PROJECT costs at least once every six months commencing after the STATE FUNDS are encumbered on either the project-specific PROGRAM SUPPLEMENT or through a project-specific finance letter approved by STATE. STATE reserves the right to suspend future allocations and invoice payments for any on-going or future STATE FUNDED project performed by ADMINISTERING AGENCY if PROJECT costs have not been invoiced by ADMINISTERING AGENCY for a six-month period

4. Invoices shall be submitted on a standardized billing summary template, in accordance with Chapter 5 of the LAPM to claim reimbursement by ADMINISTERING AGENCY. For construction invoices, pay estimates must be included.

5. ADMINISTERING AGENCY must retain at least one copy of supporting backup documentation for allowable costs incurred and claimed for reimbursement by ADMINISTERING AGENCY. ADMINISTERING AGENCY agrees to submit supporting backup documentation with invoices if requested by State. Acceptable backup documentation includes, but is not limited to, agency's progress payment to the contractors, copies of cancelled checks showing amounts made payable to vendors and contractors, and/or a computerized summary of PROJECT costs.

6. Payments to ADMINISTERING AGENCY can only be released by STATE as reimbursements of actual allowable PROJECT costs already incurred and paid for by the ADMINISTERING AGENCY.

7. Indirect Cost Allocation Plans/Indirect Cost Rate Proposals (ICAP/ICRP), Central Service Cost Allocation Plans and related documentation are to be prepared and provided to the Inspector General - Independent Office of Audits and Investigations for review and approval prior to ADMINISTERING AGENCY seeking reimbursement of indirect cost incurred within each fiscal year being claimed for reimbursement. ICAPs/ICRPs must be prepared in accordance with the requirements set forth in 2 CFR, Part 200, Chapter 5 of the LAPM, and the ICAP/ICRP approval procedures established by STATE.

8. STATE will withhold the greater of either two (2) percent of the total of all STATE FUNDS encumbered for each PROGRAM SUPPLEMENT or $40,000 until ADMINISTERING AGENCY submits the Final Report of Expenditures for each completed PROGRAM SUPPLEMENT PROJECT.

9. The estimated total cost of PROJECT, the amount of STATE FUNDS obligated, and the required matching funds may be adjusted by mutual consent of the PARTIES with a finance letter, and an allocation notification letter when applicable. STATE FUNDING may be increased to cover PROJECT cost increases only if such additional funds are available and the CTC and/or STATE concurs with that increase in the

form of an allocation and finance letter.

10. When such additional STATE FUNDS are not available, ADMINISTERING AGENCY agrees that any increases in PROJECT costs must be defrayed with ADMINISTERING AGENCY's own funds.

11. ADMINISTERING AGENCY shall use its own non-STATE FUNDS to finance the local share of eligible costs and all PROJECT expenditures or contract items ruled ineligible for financing with STATE FUNDS. STATE shall make the final determination of ADMINISTERING AGENCY's cost eligibility for STATE FUNDED financing with respect to claimed PROJECT costs.

12. ADMINISTERING AGENCY will reimburse STATE for STATE's share of costs for work performed by STATE at the request of ADMINISTERING AGENCY. STATE's costs shall include overhead assessments in accordance with section 8755.1 of the State Administrative Manual.

13. STATE FUNDS allocated by the CTC and/or STATE are subject to the timely use of funds provisions approved in CTC Guidelines and State procedures approved by the CTC and STATE.

14. STATE FUNDS encumbered for PROJECT are available for liquidation only for a limited period from the beginning of the State fiscal year when those funds were appropriated in the State Budget. STATE FUNDS not liquidated within these periods will be reverted unless a Cooperative Work Agreement (CWA) is submitted by ADMINISTERING AGENCY and approved by the California Department of Finance in accordance with Section 16304 of the Government Code. The exact date of fund reversion will be reflected in the STATE signed PROJECT finance letter.

15. Payments to ADMINISTERING AGENCY for PROJECT-related travel and subsistence (per diem) expenses of ADMINISTERING AGENCY forces and its contractors and subcontractors claimed for reimbursement or as local match credit shall not exceed rates authorized to be paid to rank and file STATE employees under current California Department of Human Resources (CalHR) rules unless a Cooperative Work Agreement (CWA) is submitted by ADMINISTERING AGENCY and approved by the California Department of Finance in accordance with Government Code section 16304. If the rates invoiced by ADMINISTERING AGENCY are in excess of CalHR rates, ADMINISTERING AGENCY is responsible for the cost difference, and any overpayments inadvertently paid by STATE shall be reimbursed to STATE by ADMINISTERING AGENCY on demand.

16. ADMINISTERING AGENCY agrees to comply with California Government Code 4525-4529.14. Administering Agency shall undertake the procedures described in California Government Code 4527(a) and 4528(a). Administering Agency shall also comply with 2 CFR Part 200 Uniform Administrative Requirements, Cost Principles and Audit Requirement for Federal Awards, excluding 2 CFR Part 200.318-200.326.

17. ADMINISTERING AGENCY agrees and will assure that its contractors and subcontractors will be obligated to agree that Contract Cost Principles and Procedures, 48 CFR, Federal Acquisition Regulations System, Chapter 1, Part 31, et seq., shall be used to determine the allowability of individual PROJECT cost items.

Every recipient and sub-recipient receiving PROJECT funds under this AGREEMENT shall comply with Federal administrative procedures in accordance with 2 CFR, Part 200, Uniform Administrative Requirements, Cost Principles and Audit Requirement for Federal Awards, excluding 2 CFR Part 200.318-200.326Governments. ADMINISTERING AGENCY agrees to comply with the provisions set forth in 23 CFR Parts 140, 645 and 646 when contracting with railroad and utility companies.

18. Every recipient and sub-recipient receiving PROJECT funds under this AGREEMENT shall comply with 2 CFR 200 excluding 2 CFR Part 200.318-200.326, 48 CFR Chapter 1, Part 31, LAPM, Public Contract Code (PCC) 10300- 10334 (procurement of goods), PCC 10335-10381 (non-A&E services), California Government Code 4525-4529.5 including 4527(a) and 4528(a), and other applicable STATE regulations.

19. Any PROJECT costs for which ADMINISTERING AGENCY has received payment or credit that are determined by subsequent audit to be questioned, disallowed, or unallowable under 2 CFR, Part 200, 48 CFR, Chapter 1, Part 31, 23 CFR Parts 140, 645 and 646, LAPM, Public Contract Code (PCC) 10300-10334 (procurement of goods), PCC 10335-10381 (non-A&E services), California Government Code 4525-4529.5 including 4527(a) and 4528(a), and other applicable STATE regulations are subject to repayment by ADMINISTERING AGENCY to STATE and may result in STATE imposing sanctions on ADMINISTERING AGENCY as described in Chapter 20 of the Local Assistance Procedures Manual.

20. Should ADMINISTERING AGENCY fail to refund any moneys due upon written demand by STATE as provided herein or should ADMINISTERING AGENCY breach this AGREEMENT by failing to complete PROJECT without adequate justification and approval by STATE, then, within thirty (30) days of demand, or within such other period as may be agreed to in writing between the PARTIES hereto, STATE, acting through the State Controller, the State Treasurer, the CTC or any other public entity or agency, may intercept, withhold and demand the transfer of an amount equal to the amount paid by or owed to STATE for each PROJECT, from future apportionments, or any other funds due ADMINISTERING AGENCY from the Highway Users Tax Fund or any other sources of funds, and/or may also withhold approval of future STATE FUNDED projects proposed by ADMINISTERING AGENCY.

21. Should ADMINISTERING AGENCY be declared to be in breach of this AGREEMENT or otherwise in default thereof by STATE, and if ADMINISTERING AGENCY is constituted as a joint powers authority, special district, or any other public entity not directly receiving funds through the State Controller, STATE is authorized to obtain reimbursement from whatever sources of funding are available, including the withholding or transfer of funds, 20from those constituent entities comprising a joint powers authority or by bringing of an action against ADMINISTERING AGENCY or its constituent member entities, to recover all funds provided by STATE hereunder.

22. ADMINISTERING AGENCY acknowledges that the signatory party represents the ADMINISTERING AGENCY and further warrants that there is nothing within a Joint Powers Agreement, by which ADMINISTERING AGENCY was created, if any exists, that would restrict or otherwise limit STATE's ability to recover STATE FUNDS improperly spent by ADMINISTERING AGENCY in contravention of the terms of this AGREEMENT.

ARTICLE V

AUDITS, THIRD PARTY CONTRACTING, RECORDS RETENTION AND REPORTS

1. STATE reserves the right to conduct technical and financial audits of PROJECT work and records and ADMINISTERING AGENCY agrees, and shall require its contractors and subcontractors to agree, to cooperate with STATE by making all appropriate and relevant PROJECT records available for audit and copying as required by paragraph three (3) of Article V.

2. ADMINISTERING AGENCY, its contractors and subcontractors shall establish and maintain a financial management system and records that properly accumulate and segregate reasonable, allowable, and allocable incurred PROJECT costs and matching funds by line item for the PROJECT. The financial management system of ADMINISTERING AGENCY, its contractors and all subcontractors shall conform to Generally Accepted Accounting Principles, enable the determination of incurred costs at interim points of completion, and provide support for reimbursement payment vouchers or invoices sent to or paid by STATE.

3. ADMINISTERING AGENCY, ADMINISTERING AGENCY's contractors and subcontractors, and STATE shall each maintain and make available for inspection and audit by STATE, the California State Auditor, or any duly authorized representative of STATE or the United States, all books, documents, papers, accounting records, and other evidence pertaining to the performance of such contracts, including, but not limited to, the costs of administering those various contracts, and ADMINISTERING AGENCY shall furnish copies thereof if requested. All of the above-referenced parties shall make such AGREEMENT and PROGRAM SUPPLEMENT materials available at their respective offices at all reasonable times during the entire PROJECT period and for three (3) years, or 35 years for Prop 1B funds, from the date of final payment to ADMINISTERING AGENCY.

4. ADMINISTERING AGENCY shall not award a construction contract over $25,000 on the basis of a noncompetitive negotiation for work to be performed under this AGREEMENT without the prior written approval of STATE. All contracts awarded by ADMINISTERING AGENCY intended or used as local match credit must meet the requirements set forth in this AGREEMENT regarding local match funds.

5. ADMINISTERING AGENCY shall comply with Chapter 10 (commencing with Section 4525) Division 5 of Title 1 of the Government Code and shall undertake the procedures described in California Government Code 4527(a) and 4528(a). Administering Agency shall comply with Chapter 10 of the LAPM for A&E Consultant Contracts.

6. ADMINISTERING AGENCY shall comply with Government Code Division 5 Title 1 sections 4525-4529.5 and shall undertake the procedures described in California Government Code 4527(a) and 4528(a) for procurement of professional service contracts. Administering Agency shall follow Public Contract Code Section 10335-10381 for other professional service contracts.

7. Any subcontract entered into by ADMINISTERING AGENCY as a result of this AGREEMENT shall contain all of the provisions of Article IV, FISCAL PROVISIONS, and this ARTICLE V, AUDITS, THIRD-PARTY CONTRACTING, RECORDS RETENTION AND REPORTS and shall mandate that travel and per diem reimbursements and third-

party contract reimbursements to subcontractors will be allowable as PROJECT costs only after those costs are incurred and paid for by the subcontractors.

8. To be eligible for local match credit, ADMINISTERING AGENCY must ensure that local match funds used for a PROJECT meet the fiscal provisions requirements outlined in ARTICLE IV in the same manner that is required of all other PROJECT expenditures.

9. Except as provided in this Article, this AGREEMENT is solely between and for the benefit of the PARTIES and there are no third-party beneficiaries.

ARTICLE VI - MISCELLANEOUS PROVISIONS

1. ADMINISTERING AGENCY agrees to use all PROJECT funds reimbursed hereunder only for transportation purposes that are in conformance with Article XIX of the California State Constitution and other California laws.

2. ADMINISTERING AGENCY shall conform to all applicable State and Federal statutes and regulations, and the Local Assistance Program Guidelines and Local Assistance Procedures Manual as published by STATE and incorporated herein, including all subsequent approved revisions thereto applicable to PROJECT unless otherwise designated in the project-specific executed PROJECT SUPPLEMENT.

3. This AGREEMENT is subject to any additional restrictions, limitations, conditions, or any statute enacted by the State Legislature or adopted by the CTC that may affect the provisions, terms, or funding of this AGREEMENT in any manner.

4. ADMINISTERING AGENCY and the officers and employees of ADMINISTERING AGENCY, when engaged in the performance of this AGREEMENT, shall act in an independent capacity and not as officers, employees or agents of STATE.

5. Each project-specific PROGRAM SUPPLEMENT shall separately establish the terms and funding limits for each described PROJECT funded under this AGREEMENT and that PROGRAM SUPPLEMENT. No STATE FUNDS are obligated against this AGREEMENT.

6. ADMINISTERING AGENCY certifies that neither ADMINISTERING AGENCY nor its principals are suspended or debarred at the time of the execution of this AGREEMENT, and ADMINISTERING AGENCY agrees that it will notify STATE immediately in the event a suspension or a debarment occurs after the execution of this AGREEMENT.

7. ADMINISTERING AGENCY certifies, by execution of this AGREEMENT, that no person or selling agency has been employed or retained to solicit or secure this AGREEMENT upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by ADMINISTERING AGENCY for the purpose of securing business. For breach or violation of this warranty, STATE has the right to annul this AGREEMENT without liability, pay only for the value of the PROJECT work actually performed, or in STATE's discretion, to deduct from the price of PROGRAM SUPPLEMENT consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

8. In accordance with Public Contract Code section 10296, ADMINISTERING AGENCY hereby certifies under penalty of perjury that no more than one final unappealable finding of contempt of court by a federal court has been issued against ADMINISTERING AGENCY within the immediate preceding two (2) year period because of ADMINISTERING AGENCY's failure to comply with an order of a federal court that orders ADMINISTERING AGENCY to comply with an order of the National Labor Relations Board.

9. ADMINISTERING AGENCY shall disclose any financial, business, or other relationship with STATE that may have an impact upon the outcome of this AGREEMENT or any individual PROJECT encompassed within a PROGRAM SUPPLEMENT. ADMINISTERING AGENCY shall also list current contractors who may have a financial interest in the outcome of a PROJECT undertaken pursuant to this

AGREEMENT. These disclosures shall be delivered to STATE in a form deemed acceptable by the STATE prior to execution of this AGREEMENT.

10. ADMINISTERING AGENCY hereby certifies that it does not have, nor shall it acquire, any financial or business interest that would conflict with the performance of any PROJECT initiated under this AGREEMENT.

11. ADMINISTERING AGENCY certifies that this AGREEMENT was not obtained or secured through rebates, kickbacks or other unlawful consideration either promised or paid to any STATE employee. For breach or violation of this warranty, STATE shall have the right, in its sole discretion, to terminate this AGREEMENT without liability, to pay only for PROJECT work actually performed, or to deduct from a PROGRAM SUPPLEMENT price or otherwise recover the full amount of such rebate, kickback, or other unlawful consideration.

12. Any dispute concerning a question of fact arising under this AGREEMENT that is not disposed of by agreement shall be decided by the STATE's Contract Manager, who shall be identified to ADMINISTERING AGENCY at the time of execution of this AGREEMENT and, as applicable , any time that Contract Manager changes during the duration of this AGREEMENT who may consider any written or verbal evidence submitted by ADMINISTERING AGENCY. The decision of the Contract Manager, issued in writing, shall be conclusive and binding on the PARTIES on all questions of fact considered and determined by the Contract Manager.

13. Neither the pending of a dispute nor its consideration by the Contract Manager will excuse the ADMINISTERING AGENCY from full and timely performance in accordance with the terms of this AGREEMENT and each PROGRAM SUPPLEMENT.

14. Neither STATE nor any officer or employee thereof is responsible for any injury, damage or liability occurring by reason of anything done or omitted to be done by ADMINISTERING AGENCY under or in connection with any work, authority or jurisdiction of ADMINISTERING AGENCY arising under this AGREEMENT. It is understood and agreed that ADMINISTERING AGENCY shall fully defend, indemnify and save harmless STATE and all of its officers and employees from all claims and suits or actions of every name, kind and description brought forth under, including but not limited to, tortuous, contractual, inverse condemnation or other theories or assertions of liability occurring by reason of anything done or omitted to be done by ADMINISTERING AGENCY under this AGREEMENT.

15. Neither ADMINISTERING AGENCY nor any officer or employee thereof is responsible for any injury, damage or liability occurring by reason of anything done or omitted to be done by, under or in connection with any work, authority or jurisdiction arising under this AGREEMENT. It is understood and agreed that STATE shall fully defend, indemnify and save harmless the ADMINISTERING AGENCY and all of its officers and employees from all claims, suits or actions of every name, kind and description brought forth under, including but not limited to, tortuous, contractual, inverse condemnation and other theories or assertions of liability occurring by reason of anything done or omitted to be done by STATE under this AGREEMENT.

16. In the event of (a) ADMINISTERING AGENCY failing to timely proceed with effective PROJECT work in accordance with the project-specific PROGRAM SUPPLEMENT; (b) failing to maintain any applicable bonding requirements; and (c)

otherwise materially violating the terms and conditions of this AGREEMENT and/or any PROGRAM SUPPLEMENT, STATE reserves the right to terminate funding for that PROJECT upon thirty (30) days' written notice to ADMINISTERING AGENCY.

17. No termination notice shall become effective if, within thirty (30) days after receipt of a Notice of Termination, ADMINISTERING AGENCY either cures the default involved or, if the default is not reasonably susceptible of cure within said thirty (30) day period the ADMINISTERING AGENCY proceeds thereafter to complete that cure in a manner and time line acceptable to STATE.

18. Any such termination shall be accomplished by delivery to ADMINISTERING AGENCY of a Notice of Termination, which notice shall become effective not less than thirty (30) days after receipt, specifying the reason for the termination, the extent to which funding of work under this AGREEMENT and the applicable PROGRAM SUPPLEMENT is terminated and the date upon which such termination becomes effective, if beyond thirty (30) days after receipt. During the period before the effective termination date, ADMINISTERING AGENCY and STATE shall meet to attempt to resolve any dispute. In the event of such termination, STATE may proceed with the PROJECT work in a manner deemed proper by STATE. If STATE terminates funding for PROJECT with ADMINISTERING AGENCY for the reasons stated in paragraph sixteen (16) of ARTICLE VI, STATE shall pay ADMINISTERING AGENCY the sum due ADMINISTERING AGENCY under the PROGRAM SUPPLEMENT and/or STATE-approved finance letter prior to termination, provided, however, ADMINISTERING AGENCY is not in default of the terms and conditions of this AGREEMENT or the project-specific PROGRAM SUPPLEMENT and that the cost of any PROJECT completion to STATE shall first be deducted from any sum due ADMINISTERING AGENCY.

19. In the case of inconsistency or conflicts with the terms of this AGREEMENT and that of a project-specific PROGRAM SUPPLEMENT and/or Cooperative Agreement, the terms stated in that PROGRAM SUPPLEMENT and/or Cooperative Agreement shall prevail over those in this AGREEMENT.

20. Without the written consent of STATE, this AGREEMENT is not assignable by ADMINISTERING AGENCY either in whole or in part.

21. No alteration or variation of the terms of this AGREEMENT shall be valid unless made in writing and signed by the PARTIES, and no oral understanding or agreement not incorporated herein shall be binding on any of the PARTIES.

IN WITNESS WHEREOF, the parties have executed this AGREEMENT by their duly authorized officer.

EXHIBIT A - FAIR EMPLOYMENT PRACTICES ADDENDUM

1. In the performance of this Agreement, ADMINISTERING AGENCY will not discriminate against any employee for employment on account of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military and veteran status. ADMINISTERING AGENCY will take affirmative action to ensure that employees are treated during employment without regard to their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military and veteran status. Such action shall include, but not be limited to, the following: employment; upgrading; demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. ADMINISTERING AGENCY shall post in conspicuous places, available to employees for employment, notices to be provided by STATE setting forth the provisions of this Fair Employment section.

2. ADMINISTERING AGENCY, its contractor(s) and all subcontractors shall comply with the provisions of the Fair Employment and Housing Act (Gov. Code, 1290-0 et seq.), and the applicable regulations promulgated thereunder (Cal. Code Regs., Title 2, 11000, et seq.). The applicable regulations of the Fair Employment and Housing Commission implementing Government Code section 12900(a-f), set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations are incorporated into this AGREEMENT by reference and made a part hereof as if set forth in full. Each of the ADMINISTERING AGENCY'S contractors and all subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreements, as appropriate.

3. ADMINISTERING AGENCY shall include the nondiscrimination and compliance provisions of this clause in all contracts and subcontracts to perform work under this AGREEMENT.

4. ADMINISTERING AGENCY will permit access to the records of employment, employment advertisements, application forms, and other pertinent data and records by STATE, the State Fair Employment and Housing Commission, or any other agency of the State of California designated by STATE, for the purposes of investigation to ascertain compliance with the Fair Employment section of this Agreement.

5. Remedies for Willful Violation:

(a) STATE may determine a willful violation of the Fair Employment provision to have occurred upon receipt of a final judgment to that effect from a court in an action to which ADMINISTERING AGENCY was a party, or upon receipt of a written notice from the Fair Employment and Housing Commission that it has investigated and determined that ADMINISTERING AGENCY has violated the Fair Employment Practices Act.

(b) For willful violation of this Fair Employment Provision, STATE shall have the right

to terminate this Agreement either in whole or in part, and any loss or damage sustained by STATE in securing the goods or services thereunder shall be borne and paid for by ADMINISTERING AGENCY and by the surety under the performance bond, if any, and STATE may deduct from any moneys due or thereafter may become due to ADMINISTERING AGENCY, the difference between the price named in the Agreement and the actual cost thereof to STATE to cure ADMINISTERING AGENCY's breach of this Agreement.

RESOLUTION 2021-91

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, AUTHORIZING THE EXECUTION OF THE CALIFORNIA DEPARTMENT OF TRANSPORTATION HIGHWAY SAFETY IMPROVEMENT PROGRAM STATE-AID MASTER AGREEMENT NO. 08-5214S21 AND PROGRAM SUPPLEMENT AGREEMENTS NO. HSIPSL-5214(013) AND NO. HSIPSL-5214(014)

WHEREAS, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 10 Highway Safety Improvement Program Benefit Cost Ratio category on October 15, 2020, for the purpose of making intersection improvements and installing sidewalks at the Omar/Ramsey Intersection; and

WHEREAS, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 10 Highway Safety Improvement Program Funding Set-asides category on October 15, 2020, for the purpose of installing/upgrading pedestrian crossings at four non-signalized intersections on Ramsey Street; and

WHEREAS, the City of Banning was notified on March 26, 2021, that the two grant applications were approved; and

WHEREAS, Master Agreement 08-5214S21 and the two corresponding Program Supplement Agreements HSIPSL-5214(013) (Ramsey-Omar Intersection Improvements and Sidewalk) for $18,800 and HSIPSL-5214(014) (Ramsey St. intersections) for $13,300 must be executed with Caltrans before grant funds may be claimed.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. Authorizes the City Manager or his designee to execute the Caltrans Master Agreement 08-5214S21, Program Supplement Agreement No. HSIPSL-5214(013), and Program Supplement Agreement No. HSIPSL-5214(014) and any related documents on behalf of the City of Banning.

PASSED, APPROVED AND ADOPTED this 12th day of October, 2021.

PROGRAM SUPPLEMENT NO. 00000A277
to
ADMINISTERING AGENCY-STATE AGREEMENT
FOR STATE FUNDED PROJECTS NO 08-5214S21

Adv. Project ID 0824000001

Date: September 19, 2023
Location: 08-RIV-0-BAN
Project Number: HSIPSL-5214(016)
E.A. Number:
Locode: 5214

This Program Supplement, effective 9/7/2023, hereby adopts and incorporates into the Administering Agency-State Agreement No. 08-5214S21 for State Funded Projects which was entered into between the ADMINISTERING AGENCY and the STATE with an effective date of 10/14/2021 and is subject to all the terms and conditions thereof. This PROGRAM SUPPLEMENT is executed in accordance with Article I of the aforementioned Master Agreement under authority of Resolution No. 2023-167 approved by the ADMINISTERING AGENCY on Oct. 10, 2023 (See copy attached).

The ADMINISTERING AGENCY further stipulates that as a condition to the payment by the State of any funds derived from sources noted below encumbered to this project, Administering Agency accepts and will comply with the Special Covenants and remarks set forth on the following pages.

PROJECT LOCATION: 17 signalized intersections throughout the City of Banning.

TYPE OF WORK: Upgrade Signals **LENGTH:** 0.0(MILES)

Estimated Cost	State Funds		Matching Funds		
	STATE	$54,000.00	LOCAL		OTHER
$60,000.00			$6,000.00		$0.00

FOR **Chief, Office of Project Implementation**
Division of Local Assistance

Date 10/24/2023

I hereby certify upon my personal knowledge that budgeted funds are available for this encumbrance:

Accounting Officer Jennie Yee **Date** 9/19/2023 $54,000.00

SPECIAL COVENANTS OR REMARKS

1. A. This PROJECT has received STATE funds from Highway Safety Improvement Program (HSIP). The ADMINISTERING AGENCY agrees to administer the PROJECT in accordance with the Highway Safety Improvement Program (HSIP) Guidelines, the Local Assistance Procedures Manual (LAPM), the Local Assistance Program Guidelines (LAPG), and this PROGRAM SUPPLEMENT.

   B. The STATE funds for this PROJECT may be provided under one or more phases, which are Preliminary Engineering (PE), Right-of-Way (R/W) and Construction (Con).

   A phase-specific fund allocation is required, in addition to other requirements, before reimbursable work can occur for the phase identified. Each allocation will be assigned an effective date and identify the amount of funds allocated per phase. Unless otherwise determined, the effective date of the phase-specific allocation will constitute the start of reimbursable expenditures for the phase. The STATE funds available for reimbursement will be limited to the amount allocated by the STATE for the phase.

   C. At the time of the first fund allocation approval for the Project, this PROGRAM SUPPLEMENT, a STATE-approved Allocation Letter and STATE Finance Letter are prepared to allow reimbursement of eligible PROJECT expenditures for the phase allocated.

   D. STATE and ADMINISTERING AGENCY agree that any additional fund allocations made after the execution of this PROGRAM SUPPLEMENT, for the phase that has been authorized in the first fund allocation approval or for a new phase, will be encumbered on this PROJECT by use of a STATE-approved Allocation Letter and a STATE Finance Letter and are subject to the terms and conditions thereof.

   E. This PROJECT is subject to the delivery requirements enacted by the HSIP guidelines. The delivery requirements may be accessed at: https://dot.ca.gov/programs/local-assistance/fed-and-state-programs/highway-safety-improvement-program/delivery-requirements-status-approved-projects.

   F. Award information shall be submitted by the ADMINISTERING AGENCY to the District Local Assistance Engineer immediately after project contract award and prior to the submittal of the ADMINISTERING AGENCY'S first invoice for the construction contract. Failure to do so will cause a delay in the State processing of invoices for the construction phase.

   G. The ADMINISTERING AGENCY shall invoice STATE for PE, R/W and CON costs no later than 180 days after the end of expenditure the phase. For construction costs, the ADMINISTERING AGENCY has 180 days after project completion or contract acceptance to make the final payment to the contractor, prepare the final Report of Expenditures and final invoice, and submit to STATE for verification and

SPECIAL COVENANTS OR REMARKS

payment.

H. ADMINISTERING AGENCY agrees to submit the final report documents that collectively constitute a "Report of Expenditures" within one hundred eighty (180) days of PROJECT completion. Failure of ADMINISTERING AGENCY to submit a "Final Report of Expenditures" within 180 days of PROJECT completion will result in STATE imposing sanctions upon ADMINISTERING AGENCY in accordance with the current LAPM provisions.

I. ADMINISTERING AGENCY agrees to comply with the requirements in 2 CFR Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (applicable to Federal and State Funded Projects).

J. By executing this PROGRAM SUPPLEMENT, ADMINISTERING AGENCY agrees to provide the STATE, upon request, with the information related to the PROJECT for the purpose of project evaluation or other purposes.

K. The ADMINISTERING AGENCY shall construct the PROJECT in accordance with the scope of work presented in the application and approved by the State. Any changes to the approved PROJECT scope without the prior expressed approval of the State are ineligible for reimbursement and may result in the entire PROJECT becoming ineligible for reimbursement.

RESOLUTION 2023-167

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING PROGRAM SUPPLEMENT AGREEMENTS WITH THE STATE OF CALIFORNIA DEPARTMENT OF TRANSPORTATION FOR THREE HIGHWAY SAFETY IMPROVEMENT CYCLE 11 GRANTS FOR THE TRAFFIC SIGNAL HARDWARE UPGRADE AT SEVENTEEN SIGNALIZED INTERSECTIONS, PEDESTRIAN CROSSINGS UPGRADE AT NINETEEN INTERSECTIONS AND WILSON STREET/12TH STREET INTERSECTION IMPROVEMENTS

WHEREAS, on September 9, 2022, the City of Banning submitted a grant application to the State of California Department of Transportation (Caltrans) Cycle 11 Highway Safety Improvement Program for the upgrade of traffic signal hardware at seventeen (17) signalized intersections throughout the City; and

WHEREAS, on September 9, 2022, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 11 Highway Safety Improvement Program for the upgrade of pedestrian crossings at nineteen (19) intersections throughout the City; and

WHEREAS, on September 9, 2022, the City of Banning submitted a grant application to the State of California Department of Transportation Cycle 11 Highway Safety Improvement Program for the improvement of Wilson Street and 12th Street intersection; and

WHEREAS, on March 9, 2023, the City received notification from Caltrans that the City's three (3) HSIP grant applications selected for funding; and

WHEREAS, to proceed with the Preliminary Engineering (PE) phase, the City and Caltrans must execute Program Supplement Agreements No. HSIPSL-5214(016) for $54,000, HSIPSL-5214(017) for $76,500 and HSIPSL-5214(018) for $44,460 as part of the funding authorization process.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves Program Supplement Agreements with Caltrans for three (3) Highway Safety Improvement (HSIP) Cycle 11 grants for the Traffic Signal Hardware Upgrade at 17 Signalized Intersections, Pedestrian Crossings Upgrade at 19 Intersections and Wilson Street/12th Street Intersection Improvements.

SECTION 2. The City Council authorizes the City Manager or his designee to execute Program Supplement Agreements No. HSIPSL-5214(016), HSIPSL-5214(017) and HSIPSL-5214(018).

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 10th day of October 2023.

Alberto Sanchez, Mayor
City of Banning

RE: Request for Proposals – Design Services for the Upgrade of Traffic Signal Hardware RFP-24-064

STC Traffic, Inc. (STC) is pleased to submit our qualifications to the City of Banning for Design Services for the Upgrade of Traffic Signal Hardware (RFP-24-064).

We love working for the City and collaborating with City staff. Not only does the City have a strong familiarity with our team through on-call contracting for traffic engineering services, but City staff regularly rely on us for important jobs. We completed the City's Local Roadway Safety Plan (LRSP) and **prepared the HSIP Cycle 11 grant application** for this project.

We understand the City's needs on this project—through previous studies, our staff have observed traffic operations and conducted safety evaluations and reviews at all 17 of the traffic signals in the project area. Additionally, we have prepared PS&E for traffic signal hardware upgrades on similar HSIP projects throughout Western Riverside County, including for the Cities of Hemet, Jurupa Valley, and Temecula, to name a few.

Our core function is focused on delivering these types of project to the public. We do not stray from this mission. As the contact person for this RFP and authorized representative to execute an agreement with the City, we have read and complied with all terms and conditions of the RFP and acknowledge all addenda. We are willing to enter into a contract under the terms and conditions prescribed by the RFP and Sample Agreement. We look forward to working with the City.

Sincerely,

Jason Stack, President
5973 Avenida Encinas, Suite 218
Carlsbad, CA 92008
(760) 602-4290, jason.stack@stctraffic.com

1. Project Understanding and Approach

The City of Banning was recently awarded an HSIP Cycle 11 Grant to upgrade existing traffic signal hardware at 17 signalized intersections throughout the City.

STC is very familiar with this project, **having prepared the City's Local Road Safety Plan in August 2022 and the HSIP Cycle 11 funding application in September 2022.** We understand the City's needs. During the previous studies, our staff observed traffic operations and conducted safety evaluations and reviews at all 17 traffic signals in the project area.

Local Road Safety Plans were established by Caltrans in 2019 to provide funding to local agencies for developing a framework for identifying, analyzing, and prioritizing roadway safety improvements.

In the LRSP, STC identified this specific traffic signal hardware project for the City of Banning (retroreflective backplates, emergency vehicle preemption, ADA-compliant push buttons, countdown pedestrian heads, and LED safety lighting) as a worthy project to receive an HSIP grant based on our analysis of crash data using the countermeasure toolbox and documenting a high benefit cost ratio (BCR).

In September 2022, STC further assisted the City by preparing the HSIP Cycle 11 Citywide Traffic Signal Hardware Upgrades Project application, and the City was awarded the grant.

STC has been involved with this project from its inception and is very experienced with the latest signal equipment.

We model our company structure after a municipal Public Works/Engineering Division. We are former City Traffic Engineers and extensions of staff in our role as consultants; we operate and maintain TMCs and systems; we have been foreman for electrical contractors in traffic signal construction and maintenance; we have managed the municipal Public Works Electrical Division; and, we have worked for traffic signal system suppliers and manufacturers.

We are unique when compared to other consultants in that our staff have extensive experience in projects that involve traffic signal hardware and equipment, installation methods and procedures, and maintenance considerations. We only recommend products that provide the best benefit to the City.

Various case studies have proven that signal heads with retroreflective borders are a cost-effective strategy to reduce crashes within the influence of signalized intersections. Signal heads with retroreflective borders increase visibility during daytime and nighttime conditions as well as during nighttime power outages, and aid drivers' advance perception of the upcoming intersections.

STC has prepared several PS&E traffic signal hardware upgrades, including backplates, LED safety lighting, and ADA-compliant push buttons and countdown pedestrian heads on similar HSIP projects throughout Southern California (**See Section 5**).

STC typically recommends the replacement of existing backplates with new yellow retroreflective louvered backplates. The louvered design reduces the wind load on the traffic signal mast arm pole and will help extend the life cycle of the signal equipment.

Our field investigation in the City of Banning indicated that there are two existing older 3M programmable signal heads at the intersection of Ramsey Street & 22nd Street (**Photo Below**). These signal heads are no longer manufactured, and the retroreflective backplates are not compatible. For this case, STC will evaluate replacement of the signal head, retroreflective yellow tape, or retroreflective tape on metal strips riveted to the existing backplate.

Non-standard framework design at Highland Springs Avenue & I-10 EB Ramps (left). Older 3M programmable signal heads at Ramsey Street & 22nd Street (right).

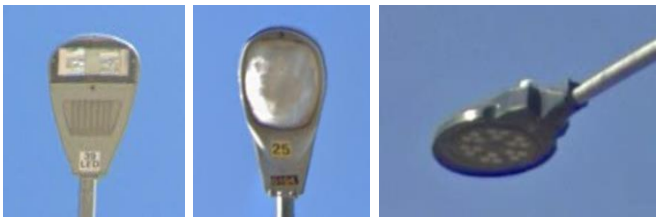
In addition, STC noted that there is a Type 1A signal pole with three signal heads without backplates due to the non-standard framework design at Highland Springs Avenue & I-10 EB Ramps. STC will recommend an alternate signal framework design to Caltrans so that new retroreflective backplates can be installed.

It has been STC's experience on similar HSIP signal hardware replacement projects that there are older traffic signal heads that are not compatible with the new yellow backplates and may require an alternate method of replacement. For these conditions, STC will develop alternate methods for replacement, such using yellow reflective tape, riveted metal reflective strips, or replacement of the old signal head to current industry standards.

Emergency vehicle preemption (EVP) systems at intersections have been in place for several decades. EVP is a proven signal feature that reduces conflicts between emergency vehicles and other roadway users. Collisions typically occur as emergency vehicles try to navigate through signalized intersections while others maneuver out of the path. EVP systems decrease emergency vehicle response times, which enhances emergency medical attention and is especially critical for crashes involving pedestrians and DUIs.

The City has done a great job at installing EVP systems on city-operated traffic signals. The only exception is at the traffic signal at Highland Springs Avenue & Ramsey Street and the two Caltrans maintained intersections at Highland Springs Avenue & I-10 EB and I-10 WB Ramps. STC has reviewed the conditions at these three intersections and determined that an emergency vehicle's coded strobe light will likely be blocked in the NB direction on Highland Springs Avenue as the emergency vehicle approaches the intersection of Highland Avenue & I-10 EB Ramp due to the railroad bridge structure (**See Below**).

During the field review, STC will evaluate whether there are any existing conduit runs for the NB advance detection loops. If there are advance loops with available capacity for EVP conductors, this could possibly be used and reduce the construction costs of adding new conduit, pull boxes, and signal poles. There is an existing street light pole located south of the railroad bridge where the EVP detectors could be mounted to provide adequate line of sight. STC will evaluate alternatives using infrared, radio and GPS technologies to newer, Cloud-based models of EVP technology where line of sight cannot be obtained.



The HSIP grant included funding to provide Accessible Pedestrian Signals (APS) and countdown pedestrian heads. The APS unit replaces the standard pedestrian push button and is designed to provide auditory, visual, and vibrotactile information to pedestrians who are blind or who have low vision so they can know when they should begin to cross at a signalized intersection.

Per the latest version of the California Manual on Uniform Traffic Control Devices (CA MUTCD), all pedestrian signal heads used at crosswalks where the pedestrian change interval is more than 7 seconds shall include a pedestrian change interval countdown timed display. On September 7, 2023, the Architectural and Transportation Barriers Compliance Board issued a final ruling on accessibility guidelines for pedestrian facilities in public rights-of-way (PROWAG). Ruling (R307) of PROWAG requires that pedestrian signals be able to communicate information about pedestrian signal timing in non-visual formats such as audible tones or speech messages, and vibrating surfaces.

STC will provide design plans for the removal and installation of new APS push buttons and countdown pedestrian heads.

STC will also prepare PS&E to replace the traffic signal safety lighting with LED safety lighting. There are a variety of safety lighting at each intersection with a combination of high pressure sodium lights and LED lights (**Photos Below**).

This task was not included in the RFP but was included in the HSIP grant the City received. STC will review each safety light and recommend a standard LED safety light. Since the City of Beaumont and Caltrans share some of these intersections with the City of Banning, STC will coordinate with those agencies to determine the safety light type to be used for replacement. STC has a great relationship with the City of Beaumont as the preferred on-call traffic engineering consultant for the City.

The City has a combination of high pressure sodium and LED traffic signal safety lights. STC will coordinate with the City to develop an LED safety lighting standard.

Scope of Work/Implementation Plan

The detailed Scope of Work presented below summarizes our knowledge of conditions in the project area, details of the work scope required, and our approach to the design effort to ensure quality, accuracy, and ultimate compliance with the project objectives.

Task 1.0. Project Management/ Administration

Task 1.1 Kick-off Meeting

STC's Project Manager, Rob Blough, PE, TE, will coordinate the day-to-day activities for the duration of the project and serve as the primary point of contact.

Within two weeks following the Notice to Proceed (NTP), Mr. Blough will schedule a project kick-off meeting with City staff and the project team to discuss the project objectives, schedule, scope, and City policies and procedures. Mr. Blough will set up and manage the project, provide utility coordination (if necessary), perform quality assurance and quality control prior to each milestone submittal and in conformance with Federal, State, and City standards.

STC will develop and maintain a detailed work program and project schedule to achieve Caltrans approval prior to the construction funding approval deadline. The work plan will include, at a minimum, details of methodology, sequence of tasks, lists of deliverables, milestone submittal schedule, summary of organizational responsibilities, and contracts. Mr. Blough will also coordinate progress meetings to discuss design issues, any potential modifications to the scope, action items, and next steps.

Task 1.2 Progress Meetings

STC will set up regular monthly status meetings with the City throughout the duration of the project and prepare meeting agendas. STC will prepare and email meeting agendas to City staff in advance of the meetings and email meeting minutes within seven (7) calendar days after each meeting. If necessary, STC will facilitate additional meetings with City Departments, Caltrans and other key stakeholders, creating meeting agendas with input from the City and Caltrans. These meeting minutes will be distributed within seven (7) calendar days of the meeting.

Task 1.3 Invoicing

STC will submit a progress report with monthly invoices to the City in an organized format and with sufficient detail and backup documentation to clearly identify personnel, hours worked, and tasks completed. STC will control all project documents and provide deliverables and final files to the City in electronic format and hard copy as requested.

STC will maintain project files and data in an organized, logical fashion, and will be able to promptly retrieve and distribute project information to the City in the event of an audit or Public Records Act (PRA) request.

<u>Task 1.0 Deliverables:</u>

- Work Plan
- Meeting Agendas and Meeting Minutes
- Monthly Invoices
- Project Schedule and Updates
- Project History File

Task 2.0 Preliminary Investigation/Site Assessment

Task 2.1 Field Investigation/Site Assessment

STC will conduct field investigations of all 17 traffic signals to verify and evaluate existing conditions relative to the project SOW.

STC will obtain and review all available documents and traffic signal as-builts. STC will compare the as-builts to existing conditions and document and evaluate the condition, type, and quantities of each traffic signal head, emergency vehicle preemption, pedestrian push buttons, pedestrian signal heads, and traffic signal safety lighting at all project intersections.

STC will inventory the traffic signal control box equipment and devices and document with photos and verify the conduit capacity for installation of new EVP systems as well as space inside the traffic control box for equipment.

If new conduits are proposed, STC will ensure that potholing is included as an option to be performed, as needed, to locate other utilities that may be in conflict. STC will obtain three (3) quotes from potholing contractors should the need be determined.

Utility companies will be consulted and coordinated with, and STC will detail all contacts and coordination efforts. STC will keep detailed notes and take photos of all equipment to keep as a record. If defective or deficient signal heads, safety lighting, pedestrian push buttons, pedestrian heads, or other traffic signal equipment are witnessed during field investigations, they will be documented and the City will be notified immediately.

The field documentation will also be utilized for PS&E development. Importantly, personnel performing this task must have a detailed understanding of traffic signal hardware and the various manufacturers and equipment models and features to properly evaluate and identify and inventory equipment and conditions.

Our staff are former **public works electricians and IMSA certified technicians** and are qualified in all aspects of traffic signal systems.

Task 2.1 Deliverables:

- On-Site Photos
- Letters to Utility Owners
- Utility As-built Maps
- Base Map
- Potholing (Option)
- Field Review Notes

Task 2.2 Potholing Services (Optional Task)

STC has included optional budget for potholing utilities as mentioned in the RFP. The locations of potholes will be discussed and agreed upon with the City before potholing. STC has accounted for up to five (5) potholes. STC will prepare necessary traffic control plans to be included in the permit submittal.

Task 2.2 Deliverables (Optional Task):

- Potholing Records in a Report Format

Task 2.3 Preliminary Engineering

STC will prepare preliminary engineering tables summarizing the existing and proposed signal head retroreflective yellow backplates, EVPs, accessible pedestrian push buttons, pedestrian countdown heads, and LED safety lights at each project intersection.

It has been STC's experience on similar HSIP signal hardware replacement projects that there are older traffic signal heads that are not compatible with the new yellow backplates and may require an alternate method of replacement. For these conditions, STC will develop alternate methods for replacement, such using yellow reflective tape, riveted metal reflective strips, or replacement of the old signal head to current industry standards.

Due to the high wind conditions in the City of Banning, STC will also evaluate the need for using louvered backplates to reduce the structural load on the signal poles with mast arms.

STC will meet with Caltrans to discuss the feasibility of installing EVPs at the intersections of Highland Springs Avenue and I-10 WB/EB ramps. Due to the grades on Highland Springs Avenue, the freeway and railroad bridge may be an obstruction to the proper functioning of the EVP systems at the ramps and alternative placement of optical receptors will be discussed with Caltrans.

STC has conducted a preliminary review of the line of sight and will develop alternative designs due to the railroad bridge blocking northbound line of sight at the Highland Springs Avenue and I-10 EB ramp signal. All documents and as-builts will be obtained and reviewed of the existing traffic signals from all involved agencies.

STC will prepare a table showing the results of our evaluation of all pedestrian push buttons and pedestrian heads. If there are any push button locations that are not in compliance with CA MUTCD or ADA, recommendations will be made to bring these into compliance. All pedestrian signal heads that have not been converted to countdown heads will be documented for replacement in the table.

If desired by the City, STC will coordinate with the City to develop a standard for wattage and fixture type for new LED safety lighting. Although the RFP does not specify replacement of safety lights, **STC has included this work effort as an added value task.** It should be noted that STC prepared the HSIP grant for the City and it included replacement of old lighting with LED safety lights.

STC has worked closely with contractors who perform this exact work during recent HSIP application preparations to understand the effort and cost associated with signal hardware replacements. This stage of the project will identify any potential shortcomings in the available HSIP grant funding for this project and allow for initiation of proactive solutions if desired.

<u>Task 2.3 Deliverables:</u>

- Table Summary of Back Plate Replacements
- Table Summary of Emergency Vehicle Preemption Installations
- Table Summary of Accessible Pedestrian Push Button Replacements
- Table Summary of Pedestrian Countdown Signal Head Replacements
- Table Summary of LED Safety Lighting Replacements
- Summary of Traffic Signal Control Box Inventory Including Photos

Task 3.0. Engineering Design

Task 3.1. Plan Preparation (60%, 90%, 100%)

STC will develop design plans for 17 traffic signals and incorporate the traffic signal hardware improvements that were identified during the Preliminary Engineering phase of this project (Task 2.3). The design will be developed in conformance with the latest City of Banning requirements, Green Book and Caltrans Specifications and Standard Plans, AASHTO, CA MUTCD, and Riverside County Regional Standard Drawings.

The design plan set will include a title sheet, general notes sheet, detail sheets, and individual intersection traffic signal improvement sheets at 1″ = 20′ scale. Plans will be submitted at 60% and 90% design for City review. The 100% design plans will be considered Final and submitted on Bond paper along with AutoCAD 2021 files.

Since the traffic signals on Highland Springs Avenue are jointly managed by the City of Banning and City of Beaumont, STC will also provide 60% and 90% design plans for review to the City of Beaumont. In addition, STC will also **provide plans to Caltrans** for their review of the two intersections at Highland Springs Avenue and I-10 EB/WB ramps.

The City of Banning provided eleven (11) intersection as-built traffic signal plans, and these will be utilized for a delta revision. Two (2) intersections are Caltrans maintained and STC will obtain copies of their as-builts. STC will coordinate with Caltrans to determine their requirements for design plan submittals. For the remaining four (4) intersections where there are no existing plans, STC will produce new plans. STC will prepare four (4) new traffic signal modification plans sufficient for a contractor to bid and complete the replacement of signal head backplates, installation of EVPs, replacement of pedestrian push buttons and countdown heads, and replacement of safety lighting. The plans will be prepared at a scale of 1" = 20'. The base plan will show existing right of way lines, roadway centerlines, curb, gutter and sidewalk, utilities of record. All traffic signal components will be drafted using the latest CAD standards for traffic signal design. Plans will include general notes, construction notes, phase diagrams, pole and equipment schedules, conduit and conductor schedules, and details for pole locations and foundations, pull boxes, and conduits.

All work identified on the plans will be approved and signed by a professional Civil Engineer registered in the State of California. Plans will be submitted at the 60%, 90% and 100% design levels.

Task 3.1 Deliverables:

- (60% and 90% Plans) Electronic Submittal (PDF) of 1-Title Sheet, 1-General Note and Area Map Sheet, 17-Traffic Signal Improvement Plan Sheets
- (100%/Final Plans) Bond Paper Submittal of 1-Title Sheet, 1-General Note and Area Map Sheet, 17-Traffic Signal Improvement Plan Sheets
- Four (4) sets of Final Design Plans on 24″x36 Bond Paper
- Final AutoCAD 2021 files

Task 4.0 Permitting

STC will investigate and process all required permits, including Caltrans and City of Beaumont encroachment permits. As an added value item, STC will prepare all necessary documents required for the Construction Funding Allocation Request (CON) in compliance with LAPM state funded HISP project implementation procedures. The deliverables shown under this task are anticipated to be included with the CON.

Task 4.0 Deliverables:

- Request for Funding Allocation Form
- Approved CEQA Notice of Exemption Documents
- Right-of-Way Certification
- State-only Finance Letter for Construction
- Detailed Engineer's Cost Estimate for Construction Items
- Printout from List of Selected HSIP Projects Highlighting City Project
- Caltrans Encroachment Permit
- City of Banning Encroachment Permit

Task 5.0 Specifications and Cost Estimate

Task 5.1 Project Specifications and Bid Documents

STC will prepare project specifications utilizing the City's most current boilerplate bid package for state funded projects, special provisions, and the latest edition of the Greenbook for Public Works Construction. The bid package will be prepared via Microsoft Word and remain in the City's boilerplate font and format. Project specifications and bid documents will include the detailed project description, bid item descriptions, preparation of bid schedule, applicable special provisions, and references to technical specifications.

Task 5.1 Deliverables:

- Bid Package (Word Document)
- Project Specifications at the 90% and 100% Design Levels (Word Document)

Task 5.2 Engineer's Estimate of Probable Construction Cost

The STC Team will provide an itemized engineer's estimate of probable cost at 90% and 100% levels of design for all proposed improvements.

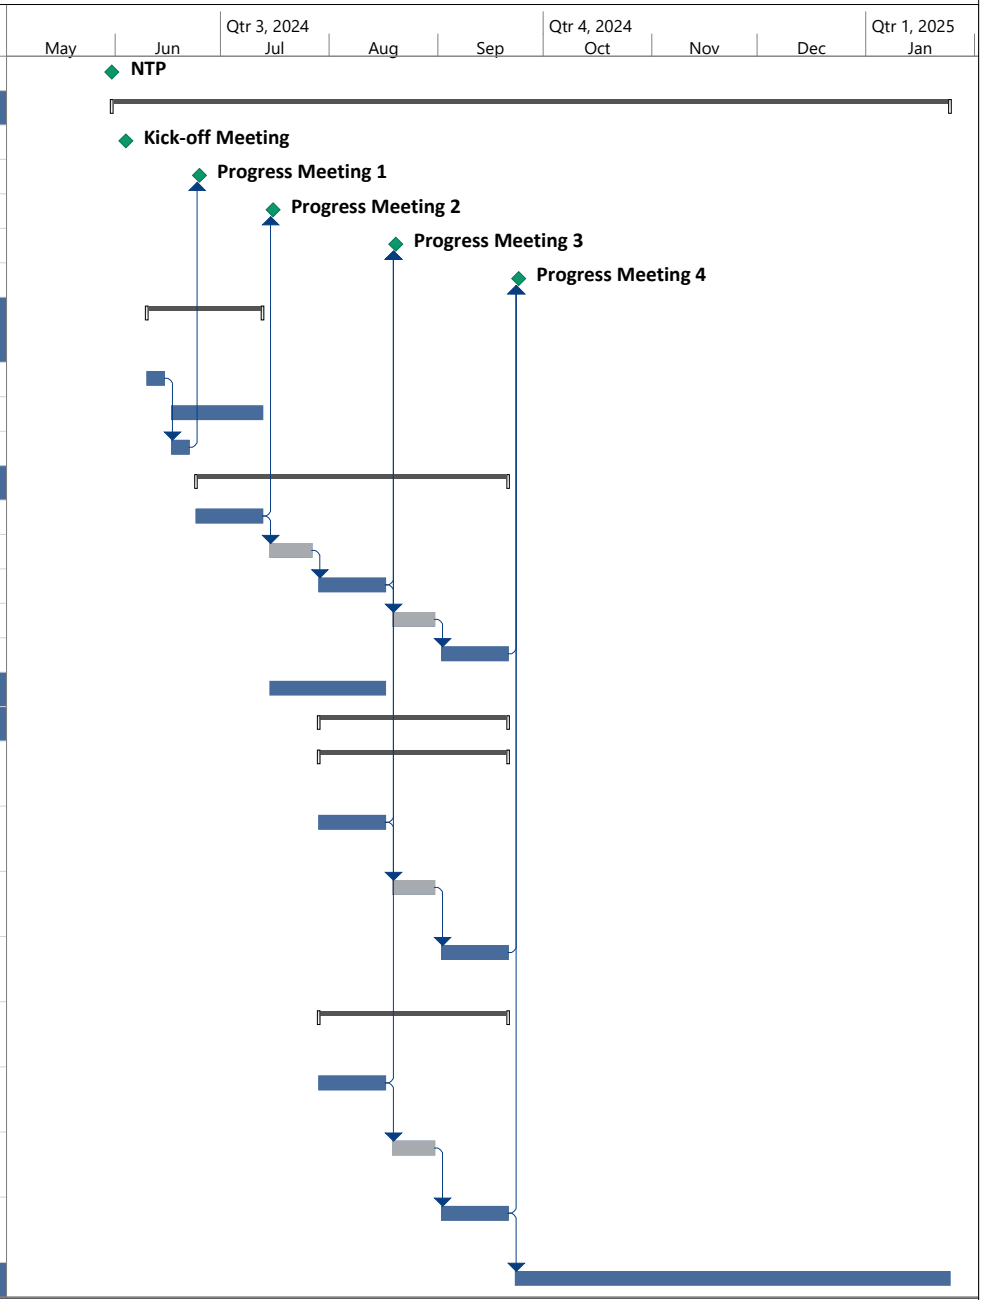
The estimates will be detailed with unit prices and quantities for individual line items of work and specified equipment based on the historical cost index. Cost estimate details (items and descriptions) will be consistent with bid items and specification sections.

Task 5.2 Deliverables:

- Engineer's Cost Estimate at the 90% and 100% Design Levels (Excel)

Task 6.0 Bidding/Construction Support

STC will provide design support during advertisement and construction of the project including answering pre-bid questions and interpretations of the plans and specification either by email or phone. STC will respond to the contractor's RFIs, confer with the City's construction manager or inspector regarding RFIs as appropriate, and review shop drawings and material submittals.



All bidding communication will be directed through the City for issuance to the contractor. STC will prepare design changes during construction as authorized, attend the pre-bid and pre-construction meeting, and be available to answer questions from City staff or the contractor.

Task 6.0 Deliverables:

- Responses to Bidder's Questions/RFIs and Prepare Addenda
- Attend Pre-Bid and Pre-Construction Meetings
- Responses to Contractor's Submittals, Shop Drawings and RFIs
- Conduct Three (3) Site Visits During Construction as Requested
- Prepare As-Built Plans within One (1) Month of Receipt of As-Built Redlines from Contractor

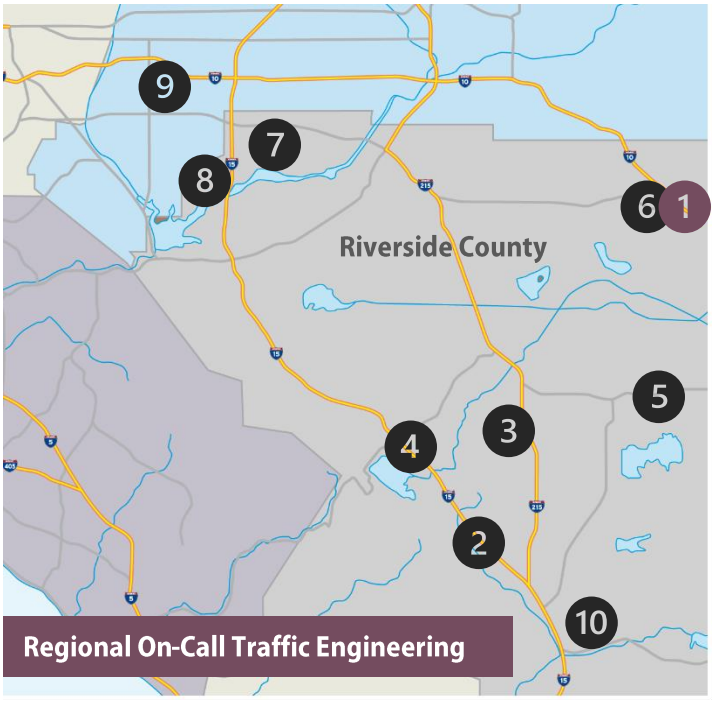
May 17, 2024

STC Task | City Task | Milestone | Summary

2. Statement of Qualifications

STC Traffic, Inc. *has been providing professional traffic engineering services to municipal agencies in Southern California for over 17 years.*



Our team is recognized for its ability to creatively solve problems arising from the most challenging traffic engineering projects.

We are comprised of professional engineers in traffic and civil engineering, traffic operations engineers, certified planners, certified IMSA signal technicians, ITS and systems and network engineers, and Public Works electricians/ inspectors. These are exactly the professionals that the City will need to deliver this HSIP project.

STC is structured as a full-service extension of City staff precisely so that our planners, designers, and ITS experts can address the City's immediate needs.

STC currently provides on-call traffic engineering services to a wide variety of regional municipal agencies, including the City of Banning.

Each of our contracts demonstrates STC's strong local and regional presence and ability to deliver the range of services that the City requires, from engineering design services to construction support services. We are modeled after a municipal Public Works/Engineering Division so that we can provide a wide breadth of traffic engineering services on a flexible basis.

As shown above, STC provides traffic engineering services to the following agencies:

[1] **Banning**	[4] Lake Elsinore	[7] Jurupa Valley
[2] Murrieta	[5] Hemet	[8] Eastvale
[3] Menifee	[6] Beaumont	[9] Ontario
		[10] Temecula

Seasoned Project Management

The STC Team will be led by Rob Blough, PE, TE, and supported by in-house technical staff in STC's planning, engineering, and systems and operations divisions. Rob has 25 years of experience as the City Traffic Engineer for the City of Encinitas and 5 years for the City of Menifee.

Dedication to Municipal Engineering

- We support all levels of effort for our municipal clients—including addressing immediate needs that may be small in scope or varied in service. Our staff are always available to provide assistance at a moment's notice.
- Our team knows the City of Banning's standards, guidelines, and preferences. We know the traffic systems, how the systems operate at a component and logic level, and how traffic behaves—expertise based on many decades of experience working with the same systems.
- Our staff are comfortable at the TMC, in the cabinet, and on the corner, viewing operations with their own eyes to see how cars, bicycles, and pedestrians move along corridors from intersection to intersection, making sure that exactly what we expect to see is actually out on the street. We emphasize this across the board when preparing plans. This is one of the special things about STC—the City can always count on us to be present on the street.

Guaranteed Availability

Our team currently supports the City of Banning with on-call traffic engineering services and are regularly on site and/or in the vicinity. We will provide the same level of service and availability on this HSIP project. We are 100% committed to providing boots-on-the-ground and local resources whenever they are needed for this contract.

STC Traffic, Inc. | Est. 2007
California Corporation

Litigation

Neither STC nor key personnel have been involved in any litigation in the past five (5) years.

3. Company Personnel

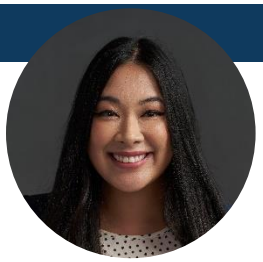
STC's Organizational Chart for the project is shown below—resumes for key staff (Rob Blough) and support staff are included at the end of this section. All assigned key professional staff are properly licensed to practice in California.

Our foremost approach to meeting the City's needs for this project is to provide the highest-quality staff. STC is modeled in the image of the municipal public works traffic division. We are comprised of professional engineers (traffic/civil), professional traffic operations engineers, certified signal technicians (up to IMSA Level III), ITS systems and network engineers, and public works electricians and inspectors—the team proposed for this Project is the same team that has delivered traffic signal hardware upgrades, including backplates, on similar HSIP projects in the Cities of Jurupa Valley and Hemet. This will give the City confidence in our ability to deliver a successful project.

**Additional support staff available as needed*

Rob Blough, PE, TE

PROJECT MANAGER*



Rob has 25 years of experience as the City Traffic Engineer for the City of Encinitas and five years for the City of Menifee. He often functions as the City Traffic Engineer in many of STC's on-call contracts throughout Riverside County. During his 30+ year government career as City Traffic Engineer for two unique cities, Rob gained the knowledge of how local governments operate, both in a high-growth developing City like Menifee (No. 1 fastest growth City in California 2017-2022), and in a City with heavy public participation like Encinitas that prioritized maintaining its community character through addressing neighborhood traffic issues.

Rob is a hands-on traffic engineer that understands how to work with the public, elected officials, citizen groups, and other public agencies. He has both the technical knowledge and insight to address complex traffic issues, identify problems, develop solutions and alternatives, and present results both in writing and orally to citizens, traffic commissions, planning commissions, and City Councils.

While City Traffic Engineer with the City of Encinitas, he prepared over 1,000 technical reports and presented these reports in public meetings at over 300 Traffic Commission, Planning Commission, and City Council meetings and workshops. He understands what the City of Banning's needs in a traffic engineer and will provide the City with his wealth of experience with any HSIP project issue the City will typically experience. He has extensive experience in traffic signal design, signal timing, traffic operations, and trouble-shooting problems in the field, design of traffic calming, roundabouts, parking issues, streetscape projects, interchange projects, school traffic safety issues, striping plan design and field implementation, traffic control plan review, creating work orders, and working with contractors, public works inspectors, and Caltrans District 8.

Designated*
Key Personnel

Rob Blough, PE, TE
Principal Engineer
C: (760) 518-8126
E: Rob.blough@stctraffic.com

Ashley Adamos, EIT

GRANT PROCESSING

Ashley has over 10 years of specialized experience developing HSIP grants and LRSPs, including the LRSP for the City of Banning. She is STC's resident "grant guru" and has prepared grant applications for the HSIP, ATP, Safe Routes to School (SRTS), and Smart Growth programs. She has prepared over 50 grant applications for nine different agencies and has achieved $30M+ in grant funding for roadway safety projects, including this project. She has extensive experience in all project phases including production of evaluations, studies, grant applications, PS&E, and record drawings for various HSIP projects and will be able to support the City with all areas of HSIP project delivery.

PRINCIPAL MANAGER

Rob Blough PE, TE

Rob's professional experience includes serving 20 years as the City Traffic Engineer for the City of Encinitas and 5 years for the City of Menifee, where he managed all aspects of City transportation tasks, including working directly with maintenance staff in the field to troubleshoot signal issues and working with elected and appointed officials, citizens, community groups, Caltrans, and school districts. He currently manages on-call tasks for cities of Cathedral City, Beaumont, Menifee, and Jurupa Valley and provides on-call plan check services for the City of Banning.

Years of Experience: 34

Education

B.S. Civil Engineering, University of California, Irvine, 1990

Professional Registrations

Professional Engineer (Civil) CA, #60204

Professional Engineer (Traffic) CA, #1829

Relevant Experience

City of Menifee, Traffic Engineering Services, 2018-2023

City Traffic Engineer. Responsible for all traffic engineering functions with limited staff and intensive development in a fast-growing city. He joined HSIP projects for citywide implementation of wireless traffic signal interconnect during the construction phase. He worked with STC to address issues from the contractor, reconfiguring radios and documenting needs and solutions to bring signals online. He continued to work with STC for the HSIP grant application, design, and construction of citywide pedestrian improvements that included pedestrian countdown heads and APS push buttons. He continues to support the City under a current on-call contract.

City of Temecula, HSIP Cycle 11 Streetlight & Traffic Signal Communications Upgrade, 2023-Present

Project Manager. Rob is responsible for overseeing all project elements for improvements that include fiber and wireless traffic signal interconnect, state-of-the-art ATC control technology, new traffic signal coordination, safety lighting upgrades, traffic signal and pedestrian head visibility upgrades, and signal rewiring.

City of Beaumont, On-Call Traffic Engineering Services, 2023-Present

Principal Manager. Leading task orders for on-call contract to support Capital Improvement Projects, traffic operation and analysis, and traffic safety improvements. Rob is currently managing the upgrade of the existing traffic signal at the intersection of Cougar Way/Beaumont Avenue, which includes coordination with the city and their traffic signal maintenance contractor, developing a Basis of Design, and traffic signal progamming.

City of Jurupa Valley, On-Call Traffic Engineering Services, 2023-Present

Principal Manager. Manages task orders issued by the City. He conducts monthly meetings with City staff to discuss status of projects, provides land development review, and traffic design plan checks.

City of Cathedral City, On-Call Traffic Engineering Services, 2023-Present

Project Manager. Manages task orders issued by the City. Scope includes speed data analysis, intersection control studies, safety studies, plan review, traffic signal design, grant support, and other services. Recent tasks completed include development of four successful grant applications for HSIP Cycle 11.

Additional Regional Experience

- City of Menifee, HSIP Cycle 7 Citywide Traffic Signal Interconnect
- City of Menifee, HSIP Cycle 8 Citywide Pedestrian ADA Improvements

PROJECT ENGINEER III

Ashley Adamos EIT

Ashley is an engineer with 10 years of versatile experience in traffic engineering and transportation planning. With a strong understanding of local standards and federal funding requirements, she is a proven expert at aligning municipal goals with grant funding opportunities. She is STC's resident "grant guru" and has prepared grant applications for the HSIP, ATP, Safe Routes to School, and Smart Growth programs, achieving upwards of $40M in grant funding for roadway safety projects.

Years of Experience: 10

Education

B.S. Civil Engineering, Cal Poly Pomona, 2011

UC Berkeley Institute of Transportation Studies, 2019

Professional Registrations

Engineer-In-Training (EIT), CA #144928

Relevant Experience

City of Banning, HSIP Cycle 11 Grant Management Services and Local Roadway Safety Plan, 2022

Project Engineer III. Ashley led development and submittal of the City's three successful HSIP grant applications and served as task lead for preparation of the City's LRSP. She was responsible for extensive coordination with the City, developing the countermeasure toolboxes, identifying Priority Projects, overseeing preparation of the report, and stakeholder outreach.

City of Jurupa Valley, HSIP Cycle 10 Citywide Traffic Signal Coordination and Safety Upgrades, 2023-Present

Project Engineer III. The project aims to implement citywide traffic signal system safety improvements through improved traffic signal interconnect and signal timing, coordination, and operation and upgraded traffic signal heads with retroreflective back plates. Ashley manages grant processing and led efforts for traffic communications network analysis, which includes documenting the existing system's functionality and deficiencies, assessment of bandwidth needs, implementation and prioritization strategies, and mapping of current, near-term, and future network architecture. She is currently supporting development of PS&E.

Various Agencies, HSIP Grant Applications, 2015-Present

Task Order Manager. Ashley has prepared 18 HSIP applications for 8 public agencies in San Diego and Riverside Counties resulting in over $10.8 million in successful awards since HSIP Cycle 7. She is an expert in creating the most complete crash database possible by cross-referencing and combining data from the SWITRS and TIMS state databases, local Crossroads crash databases, and local collision reports by coordinating with police departments and local agency safety officers. She oversees data analysis, production of collision diagrams and crash summaries, application of LRSM countermeasures, benefit-cost ratio calculations, and responses to narrative grant application questions. 100% of the HSIP applications she has prepared were selected for approval.

Additional Regional Experience

- City of Menifee, HSIP Cycle 7 Traffic Signal Communications and TMC
- City of Eastvale, On-Call Traffic Engineering Services
- City of Moreno Valley, On-Call Traffic Engineering Services
- City of Temecula, On-Call Traffic Engineering Services
- Various Riverside County Agencies, Local Roadway Safety Plan & SSAR
- Various Riverside County Agencies, HSIP Grants Management
- City of Eastvale, Limonite Traffic Signal Synchronization

PROJECT ENGINEER III

Myles Baidy TE

Myles has seven years of experience in transportation planning and intersection operation analysis. His prior experience in Boston provides a fresh perspective on transportation solutions and innovation. His transportation planning experience includes detailed analysis of transportation impacts analysis, LOS, roadway safety audits, and complete street policies and programs. He also has experience in traffic signal design, intersection modeling, and community outreach. He supported the development of Banning's Local Road Safety Plan, HSIP Cycle 11 grant applications, and provides on-call traffic engineering services.

Years of Experience: 7

Education

B.S. Civil Engineering, University of Massachusetts Amherst, 2016

Professional Registrations

Professional Engineer (Traffic) CA, #3094

Relevant Experience

City of Banning, HSIP Cycle 11 Grant Management Services and Local Roadway Safety Plan, 2022

Project Engineer III. Myles conducted preliminary review of pertinent city documents applicable to the City's street system and collected and reviewed traffic collision data and any relevant planned improvements. Traffic collision data was utilized to identify any critical safety issues from which proven counter measures were derived and implemented in the final document.

City of Jurupa Valley, HSIP Cycle 10 Citywide Traffic Signal Coordination and Safety Upgrades, 2023-Present

Project Engineer III. Supported HSIP grant development for citywide traffic signal system safety improvements through improved traffic signal interconnect and signal timing, coordination, and operation and upgraded traffic signal heads with retroreflective back plates. Myles helped develop the traffic communications network report, which mapped out the City's existing traffic communications system, supported development of the implementation strategy, and is currently developing PS&E.

City of Cathedral City, HSIP Cycle 10 Ramon Road Signalized Pedestrian Crossing, 2020-Present

Project Engineer III. Myles supported the Basis of Design, which evaluated the optimal location and control type for the proposed midblock pedestrian crossing, prompting the City to forgo a HAWK signal for a standard pedestrian signal crossing as the option that offered greater benefits. He continues to support follow-on phases of the project.

City of Menifee, On-Call Traffic Engineering Services, 2020-Present

Project Engineer III. Myles conducts a variety of planning and preliminary engineering studies to support City initiatives under the on-call services contract. Recent projects he has completed include developing a spreadsheet to track Riverside County projects that border the City and provide mitigation recommendations for projects that impact Menifee roadways, a signal/allway stop warrant analysis for Menifee Road at Mapes Rd & Menifee Road, and conducting speed counts to determine speed limit thresholds citywide.

Additional Regional Experience

- City of National City, HSIP Cycle 9 Protected Left-Turn Enhancements
- City of Cathedral City, On-Call Traffic Engineering Services
- City of Jurupa Valley, On-Call Traffic Engineering Services
- City of Menifee, On-Call Traffic Engineering Services
- Riverside County Agencies, Local Roadway Safety Plans

CONSTRUCTION MANAGER

Brett Hansen IMSA I

Brett leads STC's construction engineering and construction management support services. He is well-versed in standard specifications and plans required by government agencies, skilled in field analysis, and has expertise in electrical and communications systems. He supports HSIP projects by providing construction support, developing technical specifications and cost estimates for bid packages, and onsite integration support.

Years of Experience: 13

Education

B.S. Civil Engineering (mathematics minor), California State University, Chico, 2011

Certifications

IMSA Level 1 - Traffic Signal Field Technician

Corning Fiber Installation Certified

Relevant Experience

City of Hemet, HSIP Cycle 10 Citywide Traffic Signal Visibility Upgrades, 2023-Present

Construction Manager. The City was awarded an HSIP grant to upgrade existing backplates with retroreflective backplates at 40 signalized intersections throughout the City's major arterials. Brett has overseen field investigations, field inventory, and is providing bid and construction support.

City of Jurupa Valley, HSIP Cycle 10 Citywide Traffic Signal Coordination and Safety Upgrades, 2023-Present

Construction Manager. The project aims to implement citywide traffic signal system safety improvements through improved traffic signal interconnect and signal timing, coordination, and operation and upgraded traffic signal heads with retroreflective back plates. Brett developed preliminary cost estimates and will lead construction support services.

City of San Bernardino, HSIP Cycle 9 Signal Hardware Upgrades at 224 Signalized Intersections, 2022-2024

Construction Manager. Project will replace or install new equipment to the City's existing traffic signal system. Hardware upgrades include traffic signal heads, pedestrian signal heads, and pedestrian pushbuttons. Brett was responsible for construction support.

City of National City, HSIP Cycle 7 Citywide Safety Lighting Enhancements, 2019-2020

Construction Manager. STC provided engineering services for proposed lighting improvements after successfully securing HSIP funding for the project. The project aims to upgrade safety lighting to LED luminaries at 32 signalized intersections along nine major traffic corridors in National City. Brett oversaw field investigations to document and inventory existing safety lighting fixtures.

City of San Marcos, HSIP Cycle 5 Citywide LED Safety Lighting Conversion, 2018-2019

Construction Manager.STC provided engineering services for the conversion of the City's safety lighting from low-pressure sodium to LED lighting technology, performed market-based and field analysis to create a list of qualified product solutions, and mapped all lights throughout the City with attributes and developed highly detailed technical specifications. Brett led construction support services and processing of as-built drawings.

Additional Regional Experience

- City of Menifee, HSIP Cycle 7 Citywide Traffic Signal Interconnect
- City of Temecula, HSIP Cycle 7 Fiber Optic Communication System Upgrade

SENIOR CONSTRUCTION ENGINEER/INSPECTOR

Kevin Stone IMSA II

Kevin is a construction engineer/inspector with over 30 years of experience in constructing, installing, troubleshooting, repairing, and maintaining traffic signal systems and electrical systems. Prior to joining STC, Kevin served as the general foreman of maintenance for over 350 traffic signals and four traffic signal technicians in the Cities of Santee, El Cajon, La Mesa, Lemon Grove, Imperial Valley, and Camp Pendleton; served as an electrical foreman for 20 years; and served as lead traffic signal technician for the City of Oceanside with responsibility for on-call service 24/7 for over 160 traffic signals.

Years of Experience: 30

Certifications

IMSA Level 2 - Traffic Signal Field Technician

IMSA Work Zone Safety

Relevant Experience

City of Jurupa Valley, HSIP Cycle 10 Citywide Traffic Signal Coordination and Safety Upgrades, 2023-Present

Sr. Construction Engineer/Inspector. The project aims to implement citywide traffic signal system safety improvements through improved traffic signal interconnect and signal timing, coordination, and operation and upgraded traffic signal heads with retroreflective back plates. Kevin performed extensive field review and reviewed existing as-builts.

City of Temecula, HSIP Cycle 11 Streetlight & Traffic Signal Communications Upgrade, 2023-Present

Sr. Construction Engineer/Inspector. Project improvements including fiber and wireless traffic signal interconnect, state-of-the-art ATC control technology, new traffic signal coordination, safety lighting upgrades, traffic signal and pedestrian head visibility upgrades, and signal rewiring. Kevin performed extensive field review to verify existing conditions and equipment and revise as-builts.

City of San Bernardino, HSIP Cycle 9 Signal Hardware Upgrades at 224 Signalized Intersections, 2022-2024

Sr. Construction Engineer/Inspector. Project will replace or install new equipment to the City's existing traffic signal system. Hardware upgrades include traffic signal heads, pedestrian signal heads, and pedestrian pushbuttons. Kevin is responsible for verifying contractor installed facilities and keeping a daily record of contractor activities.

Riverside County, On-Call Traffic Signal Services, 2000-2015

Signal Contractor. Prior to joining STC, Kevin serviced traffic signals throughout Riverside County. The work included: modifications of existing signals, communications, and inventory; supervising the removal of old equipment and the installation of new equipment; conducting interconnect runs; coordination with municipalities, contractors, and utilities; final inspections and punch list review.

Additional On-Call Experience

- City of Temecula, HSIP Cycle 7 Fiber Optic Communication System Upgrade
- City of National City, HSIP Cycle 7 Pedestrian ADA Improvements
- City of National City, HSIP Cycle 7 Traffic Signal Communications Upgrade
- City of Fontana, On-Call Traffic Engineering Services
- City of Menifee, On-Call Traffic Engineering Services
- RCTD, Scott Road Interchange at I-215
- RCTD, Jurupa Road Grade Separation
- City of Eastvale, Limonite Avenue Corridor Synchronization Project

PROJECT ENGINEER II

Gianluca Pesaresi EIT

Gianluca has over 7 years of experience in the fields of traffic engineering and traffic signal operations. Prior to joining STC, he served as a traffic engineering intern for the City of Encinitas, where he was primarily responsible for assisting with traffic calming measures in residential areas, reviewing traffic control plans, and working closely with citizens to resolve traffic-related issues. In his current role, Gianluca applies his experience and technical skills in traffic engineering design, data collection/analysis, graphics production, and before/after traffic analyses in support of municipal projects.

Years of Experience: 7

Education

B.S. Civil Engineering, San Diego State University, 2017

Professional Registrations

Engineer-In-Training (EIT), CA # 162712

Relevant Experience

City of Banning, HSIP Cycle 11 Grant Management Services, 2022

Project Engineer II. STC prepared three successful HSIP applications on behalf of the City. Gianluca assisted with data collection and analysis, basemapping, and developed project figures.

City of Banning, On-Call Plan Check Services, 2021-Present

Project Engineer II. Serving as traffic consultant, STC provides on-call plan checking services for several Riverside County agencies. Gianluca has provided plan checks for the City of Banning that include new traffic signals and signal modifications, street lighting, signing and striping, and traffic control.

City of Jurupa Valley, HSIP Cycle 10 Citywide Traffic Signal Coordination and Safety Upgrades, 2023-Present

Project Engineer III. Supported HSIP grant development for citywide traffic signal system safety improvements through improved traffic signal interconnect and signal timing, coordination, and operation, and upgraded traffic signal heads with retroreflective back plates. Gianluca conducted extensive field reviews and developed PS&E.

City of Cathedral City, HSIP Cycle 10 Ramon Road Signalized Pedestrian Crossing, 2020-Present

Project Engineer II. STC evaluated the optimal location and control type for the proposed midblock pedestrian crossing, prompting the City to forgo a HAWK signal for a standard pedestrian signal crossing as the option that offered greater benefits. Gianluca supported PS&E and utility coordination.

City of Poway, HSIP Cycle 10 Poway Road Corridor Improvements, 2023-Present

Project Engineer II. Project improvements include safety signage, installation or extension of medians, and traffic signal modifications to implement dillema zone detection at five signalized intersections along the project corridor. Gianluca conducted field reviews, developed exhibits for alternatives analysis, developed base work, and prepared PS&E for traffic signal and civil countermeasures.

Additional Regional Experience

- City of Lake Elsinore, HSIP Cycle 8 Traffic Signal Improvements
- City of Temecula, HSIP Cycle 9 Traffic Signal System Upgrades
- City of National City, HSIP Cycle 7 Citywide Safety Lighting Upgrades
- City of Cathedral City, On-Call Traffic Engineering Services
- City of Temecula, On-Call Traffic Engineering Services
- City of Jurupa Valley, On-Call Traffic Engineering Services
- Various Riverside County Agencies, On-Call Plan Checking Services

4. Disclosure

STC has no past or current business and personal relationships with any current Banning elected official, appointed official, City employee, or family member of any current Banning elected official, appointed official, or City employee.

5. Experience and References

STC meets all of the City's prerequisites for performing the Scope of Work:

- STC has over 17 years of experience delivering similar projects for municipal agencies.
- STC has not filed for bankruptcy under any business name over the past five (5) years.
- STC is a registered vendor with the City, and has been providing services to the City on an ongoing basis.
- STC and all key personnel are properly licensed to practice in California.
- STC is registered with the Department of Industrial Relations (CA DIR #1000009329).

Local Banning Experience

In 2022, STC prepared the Local Road Safety Plan for the City of Banning under a highly constrained timeline, completing the project within approximately four months.

Potential safety projects were evaluated based on the City of Banning's roadway needs, crash data analysis, roadway network screening, stakeholder feedback, and countermeasure toolbox. Two priority projects and one HSIP funding set-aside project were identified for development of a preliminary project scope, cost estimate, and benefit cost ratio (BCR) analysis utilizing the most recent Cycle 11 HSIP Analyzer. In order to supplement local funds while proactively implementing roadway safety, the priority projects were developed based on eligibility for HSIP grant funding.

As a result of our work, the City received successful HSIP Cycle 11 funds for Signal Hardware (17 Intersections, **This Project**), Pedestrian Crossing Upgrades (19 Intersections), and Wilson St & 12th St Pedestrian School Crossing (Set-Aside) in the amounts of $390,510, $526,500, and $249,300, respectively.

Extensive Caltrans District 8 Experience

Over the past 10 years, STC has completed dozens of contracts for HSIP grant-funded projects, which required coordination with DLA for project delivery. Our staff is versed in the LAPM, and we recognize the City needs STC to self-deliver our expertise and drive the agenda for this project.

We will execute deadlines, required reporting, and coordinate with internal and external parties. We will keep the City in the loop with regular communication and be conscious of the City's time and our efficiency. We have done this time and time again on representative projects, and our track record in Riverside County, along with our intimate knowledge of the City of Banning's LRSP and underlying grant application, puts our team in a strong position to successfully deliver this project.

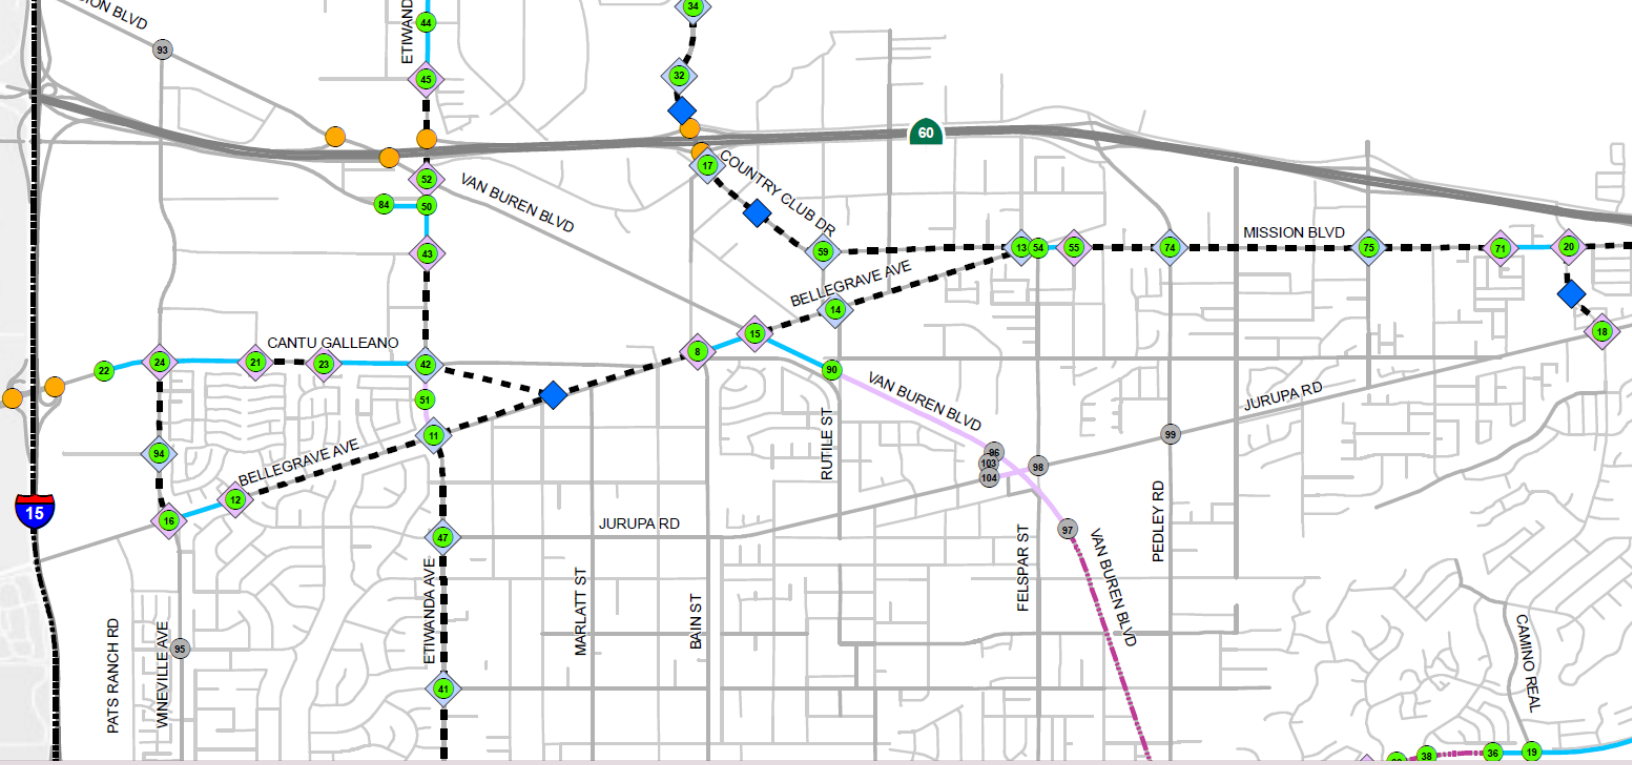
STC has delivered HSIP funded projects since HSIP Cycle 1 and has direct experience on HSIP funded projects for traffic signal upgrades and improvements.

For all of these projects, STC was intimately involved in the coordination and administrative efforts with Caltrans District 8, Caltrans Local Assistance, and the representative local agencies. STC has recent experience producing HSIP grant applications applying the S2 (Improve Signal Hardware) countermeasure and has keen insight to the associated construction methods and costs. Additionally, STC has extensive experience delivering HSIP grant funded projects with state-only and federal funding sources. Additionally, our Project Manager, Rob Blough, PE, TE, has extensive experience coordinating with Caltrans District 8 during his time as City Traffic Engineer for the City of Menifee between 2018-2023. We have included Caltrans-specific descriptions in the SOW (See Permitting), including key deliverables for Task 4 that show our value-add with regards to Caltrans experience.

Citywide HSIP Traffic Signal Upgrades | Temecula, CA

2023-Present

Project Role
Prime



Contract Value
NTE $317,730

Key Staff
Rob Blough, PE, TE
Brett Hansen, IMSA I

Client Reference #1
Nick Minicilli, Senior Traffic Engineer
41000 Main Street, Temecula CA 92590
nick.minicilli@temeculaca.gov, (951) 693-3917

The City of Temecula championed this initiative with the successful pursuit of HSIP Cycle 11 grant funding to improve citywide traffic signal system safety.

Our team authored the HSIP Cycle 11 grant for this project on behalf of the City and is currently delivering the project. The project expands the footprint of the City's traffic systems and infrastructure improvements to bring these safety and operation benefits to additional roadways and intersections. The HSIP Cycle 11 grant funds a range of improvements including fiber and wireless traffic signal interconnect, state-of-the-art ATC control technology, new traffic signal coordination, **safety lighting upgrades, traffic signal and pedestrian head visibility and upgrades,** and signal rewiring.

Citywide HSIP Traffic Signal Safety Upgrades | Jurupa Valley, CA

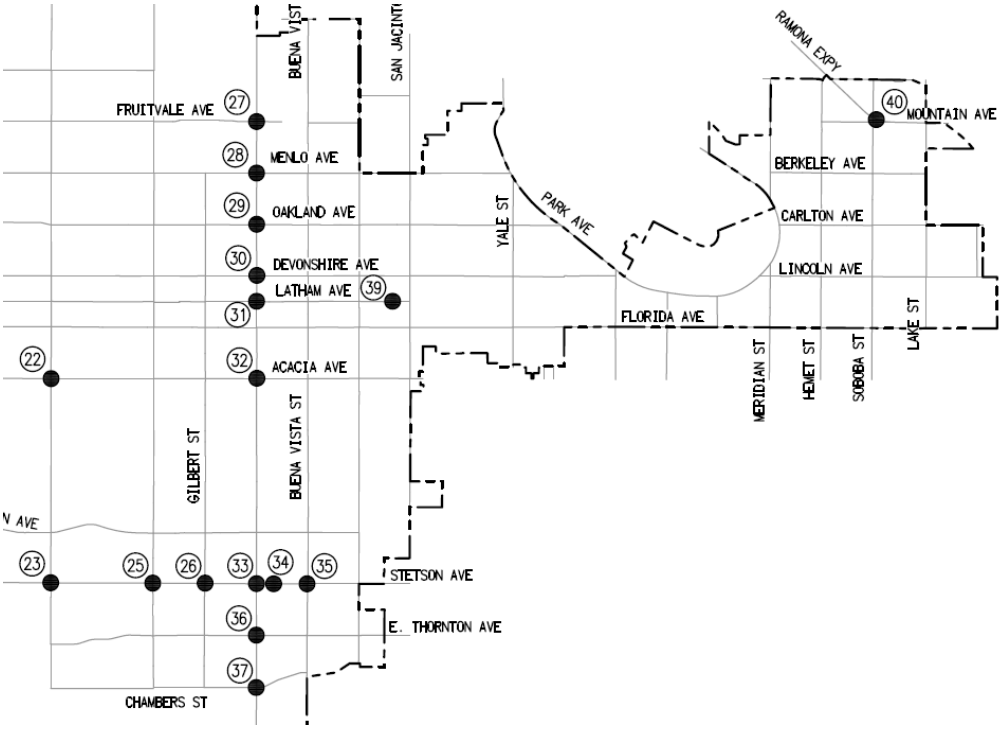
8930 Limonite Avenue, Jurupa Valley CA 92509
oduran@jurupavalley.org, (951) 332-6464 Ext. 242

This comprehensive project includes full evaluation of the City's existing traffic signals and traffic communications network, assessment of strategies to upgrade the City's existing traffic signals and communications infrastructure, recommendations for infrastructure upgrades, and PS&E for the traffic signal equipment/ construction phase. The project is a significant investment on the part of the City of Jurupa Valley in traffic signal systems and ITS infrastructure.



The City championed this initiative with a successful pursuit of HSIP Cycle 10 grant funding to improve citywide traffic signal system safety through improved traffic signal interconnect and signal timing, coordination, and operation; and upgraded **traffic signal heads with retroreflective back plates.**

This project was specifically identified as one of four high priority CIP projects in the City's Local Road Safety Plan (LRSP).

STC was selected for the project and has been providing key areas of technical delivery including a traffic signal communication and ITS master plan and design and engineering plans, specifications, and estimate, among other services.

Citywide HSIP Traffic Signal Visibility Upgrades | Hemet, CA 2023-2024

Project Role
Prime

Contract Value
NTE $50,000

Key Staff
Ivan Gonzalez
Brett Hansen, IMSA I

Client Reference #3
Jileen Ferris, Deputy Public Works Director
445 E Florida Avenue, Hemet, CA 92543
JFerris@hemetca.gov, (951) 765-2360

The City of Hemet was recently awarded an HSIP grant to upgrade existing backplates with retroreflective backplates at 40 signalized intersections throughout the City's major arterials. A citywide systemic analysis identified a high incidence rate within the influence area of signalized intersections, and the City sought to reduce collision incidence at signalized intersections and improve safety for all motorists by replacing existing backplates with retroreflective backplates. STC prepared the plans, specifications, and estimates (PS&E) for the Highway Safety Improvement Program funded project.

Tasks consisted of field investigations, preliminary engineering, environmental documentation, final plan preparation, LAPM Construction Funding Allocation Request, and bid and construction support, very similar to the scope of services requested by the City of Banning for this project.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Holly Stuart, Public Works Program Manager** **Art Vela, Director of Public Works**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-120, Approving and Authorizing Submittal of California Emergency Management Agency Form to California Office of Emergency Services Form 130 Designating Personnel to Act As the Agent for the City When Seeking Financial Assistance After a Disaster**

RECOMMENDATION:

Adopt Resolution 2024-120.

BACKGROUND:

The CalOES Form 130 authorizes the positions listed to execute for and on behalf of the City of Banning for the purpose of obtaining certain Federal financial assistance under Public Law 93-288 as amended by the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1988, and/or state financial assistance under the California Disaster Assistance Act (CDDA).

The positions designated on the form will be the City Manager, Administrative Services Director and Director of Public Works.

The CDAD in Title 2, Division 1, Chapter 7.5 of the California Code provides State financial assistance for recovery efforts to counties, cities and/or special district after a State disaster has been proclaimed. CDAA can be implemented as "stand alone" funding sources following a Director of California Office of Emergency Services Concurrence for a local emergency, or a Governor's Proclamation when there is no federal declaration.

The Robert T. Stafford Disaster Relief and Emergency Assistance Act, P.L. 93-288, as amended, 42 U.S.C. 5121 et seq., and Related Authorities, provides Federal financial assistance for Individual and/or Public Assistance after a Federal Major Disaster or Emergency Declaration is proclaimed. Public Assistance can include response, recovery, and mitigation after an Emergency or Major Disaster Declaration. Individual Assistance can include recovery and/or mitigation after a Major Disaster Declaration is proclaimed.

JUSTIFICATION:

It is required that City Council designate personnel to be the City's Applicant Agents and to submit CalOES Form 130 in order to eligible for financial assistance after a Governor or Presidential disaster proclamation.

The form will be effective for a period of three years.

FISCAL IMPACT:

There is no fiscal impact in the approval of staff recommendation although the approval will provide the City the opportunity to seek financial assistance during Governor and/or Presidential disaster proclamation.

ALTERNATIVES:

Do not approve and provide alternative direction to staff.

ATTACHMENTS:

1. Resolution 2024-120 Cal OES 130 Form.docx

RESOLUTION 2024-120

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING AND AUTHORIZING THE SUBMITTAL OF CALIFORNIA EMERGENCY MANAGEMENT AGENCY FORM CAL OES 130 DESIGNATING PERSONNEL TO ACT AS THE AGENT FOR THE CITY WHEN SEEKING FINANCIAL ASSISTANCE AFTER A DISASTER

WHEREAS, California Office of Emergency Services (CalOES) Form 130 authorizes the positions listed to execute for and on behalf of the City of Banning for the purpose of obtaining certain Federal financial assistance under Public Law 93-288 as amended by the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1988, and/or state financial assistance under the California Disaster Assistance Act (CDDA); and

WHEREAS, the CDAD in Title 2, Division 1, Chapter 7.5 of the California Code provides State financial assistance for recovery efforts to counties, cities and/or special district after a State disaster has been proclaimed. CDAA can be implemented as "stand alone" funding sources following a Director of California Office of Emergency Services Concurrence for a local emergency, or a Governor's Proclamation when there is no federal declaration; and

WHEREAS, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, P.L. 93-288, as amended, 42 U.S.C. 5121 et seq., and Related Authorities, provides Federal financial assistance for Individual and/or Public Assistance after a Federal Major Disaster or Emergency Declaration is proclaimed. Public Assistance can include response, recovery, and mitigation after an Emergency or Major Disaster Declaration. Individual Assistance can include recovery and/or mitigation after a Major Disaster Declaration is proclaimed; and

WHEREAS, the positions designated on the form will be the City Manager, Administrative Services Director and Director of Public Works; and

WHEREAS, the form will be effective for a period of three years.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. City Council adopts this resolution approving California Office of Emergency Services Form 130 designating the City's Applicant Agents when seeking financial assistance after a Governor or Presidential disaster proclamation. City Council designates the City Manager, Administrative Services Director and Director of Public Works as the designees.

SECTION 2. City Council directs the City Clerk to certify and transmit Cal OES Form 130 to the California Office of Emergency Services.

SECTION 3. The City Clerk shall certify the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

Cal OES Form 130 Instructions

A Designation of Applicant's Agent Resolution for Non-State Agencies is required of all Applicants to be eligible to receive funding. A new resolution must be submitted if a previously submitted Resolution is older than three (3) years from the last date of approval, is invalid or has not been submitted.

When completing the Cal OES Form 130, Applicants should fill in the blanks on page 1. The blanks are to be filled in as follows:

Resolution Section:

Governing Body: This is the group responsible for appointing and approving the Authorized Agents.
Examples include: Board of Directors, City Council, Board of Supervisors, Board of Education, etc.

Name of Applicant: The public entity established under the laws of the State of California. Examples include: School District, Office of Education, City, County or Non-profit agency that has applied for the grant, such as: City of San Diego, Sacramento County, Burbank Unified School District, Napa County Office of Education, University Southern California.

Authorized Agent: These are the individuals that are authorized by the Governing Body to engage with the Federal Emergency Management Agency and the Governor's Office of Emergency Services regarding grants applied for by the Applicant. There are two ways of completing this section:

1. Titles Only: If the Governing Body so chooses, the titles of the Authorized Agents would be entered here, not their names. This allows the document to remain valid (for 3 years) if an Authorized Agent leaves the position and is replaced by another individual in the same title. If "Titles Only" is the chosen method, this document must be accompanied by a cover letter naming the Authorized Agents by name and title. This cover letter can be completed by any authorized person within the agency and does not require the Governing Body's signature.

2. Names and Titles: If the Governing Body so chooses, the names **and** titles of the Authorized Agents would be listed. A new Cal OES Form 130 will be required if any of the Authorized Agents are replaced, leave the position listed on the document or their title changes.

Governing Body Representative: These are the names and titles of the approving Board Members.
Examples include: Chairman of the Board, Director, Superintendent, etc. The names and titles **cannot** be one of the designated Authorized Agents, and a minimum of two or more approving board members need to be listed.

Certification Section:

Name and Title: This is the individual that was in attendance and recorded the Resolution creation and approval.
Examples include: City Clerk, Secretary to the Board of Directors, County Clerk, etc. This person **cannot** be one of the designated Authorized Agents or Approving Board Member (if a person holds two positions such as City Manager and Secretary to the Board and the City Manager is to be listed as an Authorized Agent, then the same person holding the Secretary position would sign the document as Secretary to the Board (not City Manager) to eliminate "Self Certification."

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Emery Papp, Senior Planner**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-121, Approving a Deposit/Reimbursement Agreement with NP Banning Industrial, LLC**

RECOMMENDATION:

Approve Resolution 2024-121.

BACKGROUND:

NP Banning Industrial, LLC is proposing to develop an approximately 533.8-acre property in the City and partially within the City's Sphere of Influence commonly known as the Sunset Crossroads Project (the "Project").

The proposed Project envisions the development of industrial and commercial uses on a 533.8-acre site through adoption of a proposed Sunset Crossroads Specific Plan (the "Specific Plan"), including up to 268,400 square feet of medical office, professional office, education, recreation, and commercial uses, a travel center with refueling uses, and a 125-room hotel on 47.9-acres; and up to 5,545,000 square feet of industrial uses (including up 330,000 square feet of cold storage uses) on 392.0 acres. The proposed Project will also seek approval of a Development Agreement and a General Plan Amendment and Zone Changes amending the land use designations within the Specific Plan area to General Commercial (GC), Industrial (I), Open Space – Parks (OS-P), and Open Space – Resources (OS-R). Approximately 65.6 acres of the Project site would be retained as Open Space - Resources (OS-R) and/or Open Space – Parks (OS-P) use, including a five-acre passive park. Approximately 253.7 acres of the Project site are located outside the current City boundaries within the City's Sphere of Influence (SOI); therefore, the Project envisions annexation of this area into the City. The City, in its role as Lead Agency, has also prepared a draft Environmental Impact Report (Draft EIR) analyzing the environmental impacts of the proposed Project.

Chapter 3.36 of the Banning Municipal Code provides for reasonable recovery of costs borne by the City for expenses relating to land development. The Developer has agreed to fund and be solely responsible for all third party consulting costs and the City's legal costs associated with the preparation of plans, studies, and agreements for the Project. Moreover, the Developer has agreed to terms set forth in the Deposit/Reimbursement Agreement for the Project, which include deposits, reimbursements, eligible expenses, deposit administration, and other provisions related to the cost of processing the entitlement applications.

The following is a summary of the Agreement between the City and the Developer:

- City's Control Over Employees and Contractors. With regard to the applications for the Project, the City has sole discretion to select its employees and contractors assigned to work on the applications; to direct work and evaluate performance, terminate, and replace such employees and contractors; and to

pay employees and contractors from a City account.

- Initial and Supplemental Deposits. The Developer is required to deposit $50,000 with the City within 3 business days following execution of the Agreement to be allocated as follows: (i) $25,000.00 to apply for and process a Development Agreement; (ii) $5,000.00 for reoccurring meetings with City staff, (iii) $10,000.00 for engineering and other consultant costs; and (iv) $10,000.00 for the City's legal (non-litigation) costs. The City may request additional funds whenever it believes, in good faith, that the deposit balance is insufficient to cover 90 days' worth of eligible expenses. The Developer must make the additional deposit within 5 business days of the City's written request. The deposit must generally maintain a minimum balance of $5,00 and will not accrue interest.
- Eligible Expenses. The deposit shall be used to pay for the costs incurred by the City in connection with the following: (i) preparing necessary CEQA reports and documents, and additional supporting documentation, as necessary and appropriate in accordance with CEQA; (ii) distributing such documentation to responsible agencies and others; (iii) noticing and holding public hearings and considering public comments on such CEQA documents and reports; (iv) considering certification of such CEQA documents and reports and other documentation through a City Council resolution in accordance with CEQA; (v) preparing, negotiating, and approving the permits, entitlements, and conditions of the Project, including without limitation, the environmental documents; (vi) preparing and negotiating all further legal documents in connection with the transaction, including without limitation, technical reports, reclamation plans, development agreements, owner participation agreements, leases, franchise agreements, waste hauling agreements, franchise ordinances, and similar agreements and instruments; (vii) litigation and other legal costs associated with the Project; (viii) the fees and expenses of any consultants employed by the City in connection with the Project, including without limitation, the Draft EIR and Final EIR, all Project applications submitted by Developer (and all aspects associated therein), Development Agreement, and the Fiscal Impact Analysis; (ix) studies, reports and design services related to development of any Project-related infrastructure; and (x) any and all other actions reasonably taken by the City in connection with development of the Project.
- Administration of the Deposit. The City will administer the deposit and maintain accounting records of the expenditures at all times. The City will provide the Developer with monthly cost reports. The City will return any unexpended portion of the deposit to the Developer, without interest, less an amount equal to any unpaid eligible expenses previously incurred by the City upon approval of all entitlements, the expiration of all applicable appeal periods, and if a legal or administrative challenge is made to the entitlements, then upon the resolution of such challenge.
- CEQA Consultant. CEQA requires independent judgment by the lead agency. Therefore, any consultant hired by the City to prepare the EIR for the Project must be under contract with and directed by the City. The Developer may not attempt to direct, influence, or otherwise control the CEQA consultant in the performance of the work.
- No Obligation by City to Approve the Project; No Debt or Liability. The Agreement does not obligate the City to certify the EIR or take any action approving the Project. Moreover, the Agreement is not a debt or liability of the City and the City is not liable under the Agreement other than to return the unexpended and uncommitted portions of the deposit.
- Indemnification and Indemnification Deposit. The Developer must indemnify and hold the City harmless from any and all actions arising from or related to the proposed entitlements. The City may require the Developer to deposit funds to cover its indemnification obligations or provide other security. If the Developer fails to timely pay the deposit or provide the required security, the City may abandon the action without liability to the Developer and may recover from the Developer any attorneys' fees and other costs for which the City may be liable for abandonment of the action. Additionally, if the Developer fails to timely pay the deposit or provide the required security, the City may also defend the action and the Developer will be liable to the City for such defense costs.
- Indemnification for Developer's Construction. The Developer must indemnify and hold the City harmless from damages, personal injury or death that may arise from the Developer's, its agents', contractors', subcontractors', or employees' operations under the Agreement. The Developer's indemnification obligations do not apply to the City's gross negligence or willful misconduct.

JUSTIFICATION:

The primary reasons to support authorization of a Deposit/Reimbursement Agreement between the City of Banning and NP Banning Industrial, LLC are threefold.

First, the proposed Agreement allows the City to recover costs for processing the Developer's entitlement applications related to the proposed Project. The Project entitlements include a General Plan Amendment, the Sunset Crossroads Specific Plan, Zone Changes, Development Agreement, annexation, and an EIR analyzing the environmental impacts of the Project The Banning Municipal Code provides authority to recover expenses from the Developer for third party consulting costs and any potential for City's legal costs associated with the processing of plans, studies, agreements, and entitlements for the Project.

Second, the Agreement gives the City discretion and control in hiring and managing contractors and consultants for their work on the Project. This includes environmental consultants, which allow the City to have independent judgement over the environmental studies, technical studies, and preparation of the EIR.

Lastly, the proposed Agreement further supports that the City is under no obligation to take any action to approve the Project. It also provides that the proposed Agreement or any other agreement between the City and the Developer does not create a debt or a liability other than to return un-expended or uncommitted portions of the deposit to the Developer. The Agreement also provides that the Developer must indemnify and hold harmless the City, its officials, officers, employees and agents from any and all actions arising from or related to the proposed entitlements. The Developer may be required to deposit funds to cover its indemnification obligations or to provide other forms of security. The proposed Agreement also specifies that the deposit account must not fall below the amounts specified in the Agreement.

FISCAL IMPACT:

All costs shall be borne by the Developer. There is no Fiscal Impact to the City.

ALTERNATIVES:

1. Adopt Resolution 2024-121, as recommended.
2. Do not adopt Resolution 2024-121, and provide alternative direction to staff.

RESOLUTION 2014-121

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING A DEPOSIT/REIMBURSEMENT AGREEMENT WITH NP BANNING INDUSTRIAL, LLC

WHEREAS, the City of Banning Municipal Code Chapter 3.36 provides for recovery of costs reasonable borne by the City for expenses relating to land development; and

WHEREAS, NP Banning Industrial, LLC (the "Developer") is proposing to develop an approximately 533.8-acre property in the City and partially within the City's Sphere of Influence commonly known as the Sunset Crossroads Project ("Project"); and

WHEREAS, the Project contemplates a General Plan Amendment, the Sunset Crossroads Specific Plan, Zone Changes, annexation, and an Environmental Impact Report analyzing the environmental impacts of the Project (the "Entitlements"); and

WHEREAS, the Developer has agreed to fund and be solely responsible for any third-party consulting costs and the City's legal costs associated with the preparation of plans, studies, and agreements for the Project; and

WHEREAS, the Developer has agreed to terms set forth in the Deposit/Reimbursement Agreement for deposits, reimbursements, eligible expenses, deposit administration, and other provisions related to the cost of processing the Entitlements; and

WHEREAS, City Council finds that the provisions of the Deposit/Reimbursement Agreement are proper, in the best interest of the City, and in compliance with City's Municipal Code.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves the Deposit/Reimbursement Agreement with NP Banning Industrial, LLC, attached as Exhibit A.

SECTION 2. The City Council authorizes the City Manager to execute the Deposit/Reimbursement Agreement on behalf of the City Council in a form approved by the City Attorney.

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

DEPOSIT/REIMBURSEMENT AGREEMENT

CITY OF BANNING AND NP BANNING INDUSTRIAL, LLC

RELATING TO THE DEVELOPMENT OF SUNSET CROSSROADS PROJECT

THIS DEPOSIT/REIMBURSEMENT AGREEMENT ("Agreement") is made this ____ day of _____, 24__, by and between the CITY OF BANNING, a municipal corporation ("City"), and NP Banning Industrial, LLC ("Developer") (collectively, the "Parties").

RECITALS:

WHEREAS, the City of Banning Municipal Code Chapter 3.36 provides for recovery of reasonable costs borne relating to providing products or services relating to the development of the property located adjacent on the south side of Interstate 10 between Highland Home Road and Sunset Avenue (Assessor's Parcel Numbers (APNs): _____);

WHEREAS, the City's policy provides that the City shall be the lead agency as defined by the California Environmental Quality Act, Public Resources Code § 21000 *et seq*. ("CEQA"), for the purpose of conducting environmental review of the Project, and shall prepare all CEQA reports and supporting documentation, distribute such reports and documentation to responsible agencies and others, hold public hearings and consider public comments, and consider certification of such environmental review report and other documentation through a City Council Resolution, as necessary and appropriate in accordance with CEQA;

WHEREAS, the Project contemplates preparing general plan amendments, land use approvals, development agreements, access plans, and financing mechanisms (the "Entitlements");

WHEREAS, the Municipal Code Chapter 3.36 provides that Developer shall fund and be solely responsible for all third-party consulting costs and the City's legal costs associated with the development of such plans, studies and agreements as set forth in this Agreement;

WHEREAS, the Parties now desire to specify the terms of such deposit/reimbursement, including a cash deposit to be made by Developer with on-going payments to City and deposit restoration provisions as provided herein.

AGREEMENT:

NOW, THEREFORE, in consideration of the foregoing and the mutual covenants set forth herein, and for other consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties hereto agree as follows:

Section 1. Construction.

This Agreement shall be liberally constructed to accomplish its intent. In the event of any irresolvable conflict or inconsistency in the terms of the agreements, the City Manager shall make a final decision.

Section 2. Conflicts of Interest.

(a) No Financial Relationship. By law, the documents required by CEQA must be independently prepared by City. Accordingly (See Section 4), during the existence of the processing and preparation of the Project's CEQA document and related technical studies, and for a period of one (1) year after final resolution of Developer's application for the Project, neither Developer, nor any of its representatives, agents or other persons acting in concert with Developer, shall enter into any financial relationship with any City official, employee, or contractor. Nor, during such period, shall Developer propose to enter into any future relationship with any City official, employee, or contractor. This shall not prevent Developer's consulting with an Environmental Consultant as permitted by Section 5 of this Agreement.

(b) Developer's Representations and Warranties. Developer represents and warrants that it has not entered into any arrangement to pay financial consideration to, and has not made any payment to, any City official, agent or employee that would create a legally cognizable conflict of interest as defined in the Political Reform Act (California Government Code sections 87100 *et seq*.).

(c) Developer's Acknowledgments. Subject to the reimbursement requirements set forth below, Developer acknowledges and agrees as follows with respect to its application for the Project:

(1) The City has sole discretion to select which of its employees and contractors are assigned to work on the application.

(2) The City has sole discretion to direct the work and evaluate the performance of the employees and contractors assigned to work on the application, and the City retains the right to terminate or replace at any time any such person.

(3) The City has sole discretion to determine the amount of compensation paid to employees or contractors assigned to work on the application.

(4) The City, not Developer, shall pay employees and contractors assigned to work on the application from a City account.

(d) The Parties acknowledge and agree that the processing of Developer's application for the Project is not contingent on the hiring of any specific contractor.

Section 3. The Deposit; Additional Advances.

(a) Establishing and Supplementing Deposit. Within three (3) business days following execution of this Agreement, Developer shall provide to the City an initial deposit of $50,000.00, to be allocated as follows: (i) $25,000.00 to apply for and process a Development Agreement (DA) in accordance with Chapter 15.52 of the Banning Municipal Code and the associated CEQA compliance; (ii) $5,000.00 for reoccurring meetings with City staff, (iii) $10,000.00 for engineering and other consultant costs; and (iv) $10,000.00 for the City's legal (non-litigation) costs. The City shall monitor its expenses and the balance in the deposit account and whenever it believes, in good faith, that there will be insufficient funds to pay all of the City's expenses for the next ninety (90) days, the City may make a written request for additional funds ("Additional Advance"), which shall state the existing balance and the additional amount requested. The City may request the funds it reasonably believes necessary to cover a period not exceeding ninety (90) days. The deposit account shall generally maintain a minimum balance of five thousand dollars ($5,000.00). The initial deposit and Additional Advanced funds are hereinafter collectively referred to as the "Deposit." Developer shall make the Additional Advance within five (5) business days of City's written request therefor. If Developer fails to timely make the Additional Advance, the City may cease all additional work by staff and consultants on the Entitlements (as defined in subsection (b) below), until the Additional Advance has been received.

(b) Eligible Expenses. The Deposit shall be used to pay for the costs incurred by the City in connection with the following (all of which shall be deemed "Eligible Expenses"): (i) preparing necessary CEQA reports and documents, and additional supporting documentation, as necessary and appropriate in accordance with CEQA; (ii) distributing such documentation to responsible agencies and others; (iii) noticing and holding public hearings and considering public comments on such CEQA documents and reports; (iv) considering certification of such CEQA documents and reports and other documentation through a City Council Resolution in accordance with CEQA; (v) preparing, negotiating, and approving the permits, Entitlements, and conditions of the Project, including without limitation, the environmental documents; (vi) preparing and negotiating all further legal documents in connection with the transaction, including without limitation, technical reports, reclamation plans, development agreements, owner participation agreements, leases, franchise agreements, waste hauling agreements, franchise ordinances, and similar agreements and instruments; (vii) litigation and other legal costs associated with the Project; (viii) the fees and expenses of any consultants employed by the City in connection with the Project, including without limitation, the Draft and Final Environmental Impact Report, all Project applications submitted by Developer (and all aspects associated therein), Development Agreement, and the Fiscal Impact Analysis; (ix) studies, reports and design services related to development of any Project-related infrastructure; and (x) any and all other actions reasonably taken by the City in connection with development of the Project.

(c) Administration of Deposit. The Deposit may be commingled with other funds of the City for purposes of investment and safekeeping. The Deposit shall not accrue interest. The City will administer the Deposit and shall use the Deposit to pay for Eligible Expenses. The City shall maintain satisfactory accounting records as to the expenditure of the Deposits at all times and shall provide Developer with monthly costs reports.

(d) Unexpended Funds. Upon approval of all necessary Entitlements, the expiration of all applicable appeal periods, and if a legal or administrative challenge is made to the Entitlements, then upon the resolution of such challenge in accordance with Section 8, the City shall return any then-unexpended portion of the Deposit to Developer, without interest, less an amount equal to any unpaid Eligible Expenses previously incurred by the City.

Section 4. Compliance with Guidelines: Independent Judgment.

The CEQA Guidelines at sections 15084 and 15090 require the lead agency to exercise its independent judgment in approving environmental documents. Payment of the cost of preparation of the environmental documents by Developer does not undermine the independent preparation of the environmental documents by the City. Accordingly, it is understood that any consultant hired by the City to provide a peer-review of environmental documents, including without limitation firms currently listed on the City's on-call list[1], shall be under contract to and directed by the City, and Developer shall not attempt to direct, influence, or otherwise control the consultant in the performance of the work. Any questions or concerns Developer may have will be directed to the City.

Section 5. Developer's Rights Concerning Expenses and Review of Documents.

(a) Statements of Account. The City shall provide Developer a summary of expenditures made from the Deposit, and the unexpended balance thereof, whenever requesting any Additional Advance and within ten (10) business days of receipt by the City of a written request therefore submitted by Developer. On a monthly basis, City shall provide Developer with a cost report, including copies of each statement or invoice received from any consultant whose costs are chargeable as Eligible Expenses.

(b) Review of Documents. City shall give Developer at least ten (10) days notice along with copies of any proposed contract with the peer reviewer, change orders or contract amendments, drafts, Project Description and Alternatives, comments to the environmental documents received from third parties and proposed responses to those comments, and related documents so that Developer shall have the opportunity to provide comments or objections thereto, prior to the City finalizing, filing, or otherwise releasing any of the foregoing. The City shall also provide Developer with draft copies of all other reports and studies funded through this Agreement. Developer may discuss issues with the City or its consultants and may make comments orally or in writing. The City shall also use reasonable efforts to permit Developer's review with respect to agendas and staff reports for all open City Council, Planning Commission and other public body meetings at which the Project or related matters are to be considered, and by providing Developer with draft copies thereof prior to or concurrently with the transmission of such documents to the appropriate body. It is expressly understood that City consultants retained by the City are under contract solely with the City, and the City is free to disregard the comments of Developer and exercise its independent judgment in making payments to the Consultants or revising or accepting the Consultant's work product, without any liability whatsoever to Developer therefor.

[1] The City's approved on-call list of environmental firms includes: MBI, Webb, Romo Planning Group, VCS Environmental, & CASC Engineering and Consulting, Inc.

Section 6. No Obligation to Adopt environmental documents or to Approve Project.

The provisions of this Agreement shall in no way obligate the City to adopt the environmental documents or take any action approving the Project. The City shall use its independent judgment in determining whether to approve the Entitlements, and environmental documents. In the event that the City adopts the environmental documents, the City shall use its independent judgment in determining the significance of any impacts, approving any mitigation program, adopting a statement of overriding considerations, or taking any other action. The City shall have no liability to Developer in any manner whatsoever therefor, other than providing the accounting of expenses as provided herein.

Section 7. Agreement Not a Debt or Liability of City.

It is hereby acknowledged and agreed that this Agreement is not a debt or liability of the City. The City shall not in any event be liable hereunder other than to return the unexpended and uncommitted portions of the Deposit as provided in Sections 3(d) and 3(e) above, and to provide an accounting under Section 5(a) above. The City shall not be obligated to advance any of its own funds with respect to the environmental documents or for any of the other purposes listed in Section 2(b) hereof. No official, officer, employee or agent of the City shall be personally liable hereunder to any extent.

Section 8. Indemnification and Hold Harmless.

(a) Non-liability of City Concerning Entitlements. The Parties acknowledge that there may be challenges to the legality, validity and adequacy of the Entitlements and/or this Agreement in the future; and if successful, such challenges could delay or prevent the performance of this Agreement and the development of the Project. The City shall have no liability under this Agreement for the inability of Developer to develop the Project as the result of a judicial determination that the Entitlements, the reclamation plan, the general plan, the zoning, the land use regulations, or any portions thereof are invalid or inadequate or not in compliance with law.

(b) Participation in Litigation: Indemnity. Developer agrees to indemnify, protect, defend, and hold harmless the City and its officials, officers, employees, agents, elected boards, commissions, departments, agencies, and instrumentalities thereof, from any and all actions, suits, claims, demands, writs of mandamus, liabilities, losses, damages, penalties, obligations, expenses, and any other actions or proceedings (whether legal, equitable, declaratory, administrative, or adjudicatory in nature), and alternative dispute resolution procedures (including, but not limited to, arbitrations, mediations, and other such procedures) arising from or related to the Entitlements (including, but not limited to, attorneys' fees and costs) (herein the "Claims and Liabilities") for any such Claims or Liabilities brought against the City and/or any of its officials, officers, employees, agents, departments, agencies, and/or instrumentalities thereof; and Developer shall be responsible for any monetary judgment arising therefrom, whether such Claims and Liabilities are brought under CEQA, planning and zoning laws, the Subdivision Map Act, Code of Civil Procedure section 1085 or 1094.5, or any other federal, state, or local statute, law, ordinance, rule, regulation, or any decision of a competent

jurisdiction. Developer may be required to deposit funds to cover its indemnification obligation or to provide other security. If Developer fails to timely pay such funds, the City may abandon the action without liability to Developer and may recover from Developer any attorneys' fees and other costs for which the City may be liable for abandonment of the action. The City shall provide Developer with notice of the pendency of such action and request that Developer pay for the costs to defend such action. It is expressly agreed that the City shall have the right to utilize the City Attorney's office or use other legal counsel of its choosing, and Developer shall promptly pay or reimburse the City for any reasonable legal costs and fees incurred by City. If Developer fails to do so, the City may defend the action and Developer shall be liable to the City for the cost thereof, but if the City chooses not to defend the action, the City shall have no liability to Developer. Developer's obligation to pay the defense costs of the City shall extend until final judgment, including any appeals. Developer shall remain liable, other than in the case where judgment adverse to the City and Developer's position has been rendered, or where a settlement has been negotiated that is materially adverse to the Project. If Developer chooses to reduce the scope of the Project or abandon the Entitlements in order to settle any such litigation, the City shall reasonably cooperate in effecting a settlement. The Parties acknowledge and agree that if litigation is filed attacking the issuance of Project approvals, including the Project's CEQA document, the Parties may choose to enter into a common interest and indemnity agreement which may supplant the provisions of this section 8(b).

(c) Hold Harmless: Developer's Construction and Other Activities. Developer hereby agrees to, and shall defend, save and hold the City and each of its elected and appointed boards, commissions, officers, agents, and employees harmless from any and all claims, costs (including attorneys' fees) and liability for any damages, personal injury or death, that may arise, directly or indirectly, from Developer's or Developer's agents, contractors, subcontractors, agents, or employees' operations under this Agreement, whether such operations are conducted by Developer or by any of Developer's agents, contractors or subcontractors or by any one or more persons directly or indirectly employed by or acting as agent for Developer or any of Developer's agents, contractors or subcontractors. Nothing herein is intended to make Developer liable for the acts of the City's officers, employees, agents, contractors, or subcontractors.

(d) Exception. The obligations of Developer under this Section shall not apply to any claims, actions, or proceedings arising through the gross negligence or willful misconduct of the City, its members, officers, or employees.

(e) Survival of Indemnity Obligations. All indemnity provisions set forth in this Agreement shall survive termination of this Agreement.

Section 9. Notices.

Any notices, requests, demands, documents, approvals or disapprovals given or sent under this Agreement from one party to another (collectively, the "Notices") shall be given to the party entitled thereto at its address set forth below, or at such other address as such party may provide to the other parties in writing from time to time, namely:

If to Developer:

NP Banning Industrial, LLC
Attn: J.J. Jenkins
12977 N. Outer Forty Rd., Suite 203
St. Louis, MO 63141
Email: jjenkins@northpointkc.com

If to the City:

City Manager
City of Banning
99 E. Ramsey Street
Banning, CA 92220

With a copy to:
Richards Watson Gershon
350 South Grand Avenue, 37th Floor
Los Angeles, CA 90071
Attn: Serita R. Young, City Attorney

Each such Notice shall be deemed delivered to the party to whom it is addressed: (i) if personally served or delivered, upon delivery; (ii) if given by fax, upon the sender's receipt of an appropriate answerback or other written acknowledgement; (iii) if given by registered or certified mail, return receipt requested, deposited with the United States mail postage prepaid, seventy-two (72) hours after such notice is deposited with the United States mail; (iv) if given by overnight courier, with courier charges prepaid, twenty-four (24) hours after delivery to said overnight courier; or (v) if given by any other means, upon delivery at the address specified in this Section.

Section 10. California Law.

This Agreement shall be governed by, construed in accordance with, and interpreted under the laws of the State of California. The venue for any litigation regarding this Agreement shall be Riverside County, State of California.

Section 11. Severability.

If any part of this Agreement is held to be illegal or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall be given effect to the fullest extent reasonably possible.

Section 12. Attorneys' Fees.

In the event that any party shall commence any legal action or proceeding to enforce or interpret this Agreement, the prevailing party in such action or proceeding shall be entitled to recover its costs of suit, including reasonable attorneys' fees.

Section 13. Ambiguities.

In the event of any asserted ambiguity in, or dispute regarding, the interpretation of any matter herein, the interpretation of this Agreement shall not be resolved by any rules of interpretation providing for interpretation against the party who caused the uncertainty to exist or against the drafting party.

Section 14. Counterparts.

This Agreement may be executed in multiple counterparts, each of which shall be deemed an original.

Section 15. Authority.

The persons executing this Agreement on behalf of the parties hereto warrant that: (i) such party is duly organized and existing; (ii) they are duly authorized to execute and deliver this Agreement on behalf of said party; (iii) by so executing this Agreement, such party is formally bound to the provisions of this Agreement; and (iv) the entering into of this Agreement does not violate any provision of any other agreement to which said party is bound.

IN WITNESS THEREOF, the Parties hereto have executed this Agreement as of the day and year written alongside their respective signature line below.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Nicole Jews, Human Resources Manager** **Lincoln Bogard, Administrative Services Director**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-122, Adopting Administrative Policy, Risk Management (RM) #6 - A Workplace Violence Prevention Plan**

RECOMMENDATION:

Adopt Resolution 2024-122.

BACKGROUND:

On September 20, 2023, Governor Newsom signed Senate Bill No. 553 ("SB 553") into law, which requires certain California employers to take steps to prevent and respond to workplace violence. Notably, SB 553 added Section 6401.9 to the California Labor Code, which, effective July 1, 2024, requires covered employers to adopt a comprehensive workplace violence prevention plan that must include, among other things, the following:

- The names or job titles of the individuals responsible for implementing and maintaining the workplace violence prevention plan.
- Procedures to obtain the active involvement of employees in developing, implementing, and reviewing the workplace violence prevention plan, including their participation in identifying, evaluating, and correcting workplace violence hazards, designing, and implementing training, and reporting and investigating workplace violence incidents.
- Methods the employer will use to coordinate the implementation of the workplace violation prevention plan among employees in the same facility or department.
- Procedures for the employer to respond to workplace violence and to prohibit retaliation against employees who make reports of workplace violence.
- Procedures for ensuring compliance with the workplace violence prevention plan.
- Procedures for communicating with employees regarding workplace violence matters.
- Procedures for developing and providing training on the employer's workplace violence prevention plan.
- Assessment procedures to identify and evaluate workplace violence hazards.
- Procedures for correcting workplace violence hazards in a timely manner.
- Procedures for post-incident response and investigation.

In addition to developing and implementing a workplace violence prevention plan, covered employers must also "record information in a violent incident log about every incident, post-incident, response, and workplace violation injury investigation" performed in accordance with the workplace violence prevention plan.

California employers subject to the law must also review and update their workplace violence prevention

plans on an annual basis and provide an evaluation of the incidents that occurred and maintain records of workplace violence hazards previously identified.

With the utilization and aid of Sedgwick Risk Management, the City obtained a template that is compliant with the new law's requirements and has modified it to reflect the City's specific information and responsible individuals.

JUSTIFICATION:

With the signing of Senate Bill No. 553 ("SB 553") on September 20, 2023, which requires certain California employers to take steps to prevent and respond to workplace violence, the City was mandated to create a Workplace Violence Prevention plan. This policy will be added to the Risk Management (RM) #6 Policy and Procedures for the City. Annual updates to Council will occur going forward, including an evaluation of incidents from the previous year.

FISCAL IMPACT:

None

ALTERNATIVES:

Do not adopt Resolution 2024-122 and provide alternative direction to staff.

RESOLUTION 2024-122

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, ADOPTING ADMINISTRATIVE POLICY, RISK MANAGEMENT (RM) #6, A WORKPLACE VIOLENCE PREVENTION PLAN

WHEREAS, on September 20, 2023, Governor Newsom signed Senate Bill No. 553 ("SB 553") into law, which requires certain California employers to take steps to prevent and respond to workplace violence. SB 553 added Section 6401.9 to the California Labor Code, which, effective July 1, 2024, requires covered employers to adopt a comprehensive workplace violence prevention plan; and

WHEREAS, with the utilization and aid of Sedgwick Risk Management, the City obtained a template plan that is compliant with the new law's requirements and has modified it to reflect the City's specific information and responsible individuals; and

WHEREAS, the City of Banning will be adding this policy to the current Administrative Policy in the Risk Management (RM) section #6.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council adopts the Administrative Policy, Risk Management (RM) #6 - A Workplace Violence Prevention Plan, attached as Exhibit A.

SECTION 2. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

Alberto Sanchez, Mayor
City of Banning

Workplace Violence Prevention Plan

CITY OF BANNING ADMINISTRATIVE POLICY		
Subject: WORKPLACE VIOLENCE PREVENTION PLAN		Policy No. RM-6
Reference: Approved by Resolution No. 2024-XXX on July 9, 2024	Effective: July 1, 2024	Page No. 1 of 16

On September 20, 2023, Governor Newsom signed Senate Bill No. 553 ("SB 553") into law, which requires certain California employers to take steps to prevent and respond to workplace violence. Notably, SB 553 added Section 6401.9 to the California Labor Code, which, effective July 1, 2024, requires covered employers to adopt a comprehensive workplace violence prevention plan that must include, among other things, the following:

- The names or job titles of the individuals responsible for implementing and maintaining the workplace violence prevention plan.
- Procedures to obtain the active involvement of employees in developing, implementing, and reviewing the workplace violence prevention plan, including their participation in identifying, evaluating, and correcting workplace violence hazards, designing, and implementing training, and reporting and investigating workplace violence incidents.
- Methods the employer will use to coordinate the implementation of the workplace violation prevention plan among employees in the same facility or department.
- Procedures for the employer to respond to workplace violence and to prohibit retaliation against employees who make reports of workplace violence.
- Procedures for ensuring compliance with the workplace violence prevention plan.
- Procedures for communicating with employees regarding workplace violence matters.
- Procedures for developing and providing training on the employer's workplace violence prevention plan.
- Assessment procedures to identify and evaluate workplace violence hazards.
- Procedures for correcting workplace violence hazards in a timely manner.
- Procedures for post-incident response and investigation.

In addition to developing and implementing a workplace violence prevention plan, covered employers must also "record information in a violent incident log about every incident, post-incident, response, and workplace violation injury investigation" performed in accordance with the workplace violence prevention plan.

California employers subject to the law must also review and update their workplace violence prevention plans on an annual basis and provide an evaluation of the incidents that occurred and maintain records of workplace violence hazards previously identified.

With the utilization and aid of Sedgwick Risk Management, the City obtained a template that is compliant with the new law's requirements and has modified it to reflect the City's specific information and responsible individuals.

Policy

CITY OF BANNING is committed to providing a work environment that is free of disruptive, threatening, or violent behavior involving any employee, appointed or elected official, volunteer, contractor, client, and/or visitor. Our policy is to establish, implement, and maintain an effective plan as required by SB 553. The regulation requires us to establish, implement, and maintain, at all times in all our facilities, a workplace violence prevention plan for purposes of protecting employees and other personnel from aggressive and violent behavior at the workplace.

Our Workplace Violence Prevention (WVP) plan is available upon request for examination and copying to our employees, their representatives, and the Chief of Cal/OSHA or his or her designee.

Prohibited Acts

CITY OF BANNING will not ignore, condone, or tolerate *threats of violence* or *workplace violence* by any employee, appointed or elected official, volunteer, contractor, client, or visitor.

- *Threats of violence* include both verbal and non-verbal conduct that causes a person to fear for his or her safety because there is a reasonable possibility he or she might be physically injured and that serves no legitimate work-related purpose.

- *Workplace violence* means any act of violence or threat of violence that occurs at the work site. The term workplace violence shall not include lawful acts of self-defense or defense of others. Workplace violence includes the following:
  - The threat or use of physical force against an employee that results in, or has a high likelihood of resulting in, injury, psychological trauma, or stress, regardless of whether the employee sustains an injury
  - An incident involving the threat or use of a firearm or other dangerous weapon, including the use of common objects as weapons, regardless of whether or not the employee sustains an injury

  Workplace violence can be categorized into four types:

  Type 1: Workplace violence committed by a person who has no legitimate business at the work site - includes violent acts by anyone who enters the workplace with the intent to commit a crime

  Type 2: Workplace violence directed at employees by customers, clients, patients, students, inmates, or visitors

  Type 3: Workplace violence against an employee by a present or former employee, supervisor, or manager

  Type 4: Workplace violence committed in the workplace by someone who does not work there but has or is known to have had a personal relationship with an employee

In addition, CITY OF BANNING prohibits all *dangerous weapons* not used for fire suppression, accident and incident response, emergency medical services, the service of law enforcement, or security duties on all CITY OF BANNING property. Any employee or appointed or elected official in possession of prohibited dangerous weapons on CITY OF BANNING property is in violation of this policy and may be subject to disciplinary action up to and including dismissal. Any volunteer, contractor, client, or visitor in possession of prohibited dangerous weapons will be banned from the premises. *Dangerous weapons* include any instrument capable of inflicting death or serious bodily injury.

Responsibility and Authority

Workplace Violence Prevention Plan Administrator

The HUMAN RESOURCES MANAGER, or an assigned designee, is the designated WVP Plan Administrator (Administrator) and has the authority and responsibility for developing, implementing, and maintaining this plan and conducting or overseeing any investigations of workplace violence reports. The HUMAN RESOURCES MANAGER will also be able to answer employee questions concerning this plan.

The HUMAN RESOURCES MANAGER, or an assigned designee, shall solicit feedback and input from employees and their authorized representatives in developing and implementing the WVP plan. Active involvement of employees could include, but is not limited to, their participation in identifying, evaluating, and correcting workplace violence hazards; in designing and implementing training; and in reporting and investigating workplace violence incidents.

The HUMAN RESOURCES MANAGER, or an assigned designee, shall coordinate implementation of the workplace violence prevention plan with other employers (ex. contracted security staff and other employers on site), when applicable, to ensure those employers and their employees understand their respective roles as provided in the plan. These other employers and their staff shall be provided with training on CITY OF BANNING'S WPV plan.

Managers and Supervisors

Responsibilities include:

- Implementing the plan in their work areas;
- Providing input to the Administrator regarding the plan;
- Participating in investigations of workplace violence reports; and
- Answering employee questions concerning this plan.

Employees

Responsibilities include:

- Complying with the plan;

- Maintaining a violence-free work environment;
- Attending all training;
- Following all directives, policies, and procedures; and
- Reporting suspicious persons in the area and alerting the proper authorities when necessary.

Compliance

The Administrator is responsible for ensuring the plan is clearly communicated and understood by all employees. The following techniques are used to ensure all employees understand and comply with the plan:

- Informing all employees of the plan during new employee safety orientation training and ongoing workplace violence prevention training;
- Ensuring *all* employees, including managers, and supervisors receive training on this plan;
- Providing comprehensive workplace violence prevention training to managers and supervisors concerning their roles and responsibilities for plan implementation;
- Evaluating employees to ensure their compliance with the plan;
- Disciplining employees, appointed or elected officials, and volunteers who engage in threats of violence behaviors up to and including dismissal; and
- Ensuring training of this plan is conducted on a ANNUAL basis.

Communication and Training

Managers and supervisors are responsible for communicating with employees about workplace violence in a form readily understandable by all employees.

Employees are encouraged to inform their supervisors about any threats of violence or workplace violence. Employees may use the Workplace Violent Incident Log (Appendix A) to assist in their reporting of incidents. No employee will be disciplined for reporting any threats of violence or workplace violence.

After the employee has reported their concerns about any threats of violence or workplace violence to their supervisor, the supervisor will report this information to the Administrator who will investigate the incident. The Administrator will then inform the employee of the results of their investigation and any corrective actions to be taken as part of the CITY OF BANNING'S responsibility in complying with hazard correction measures outlined in the WVP plan.

Any employee who believes he or she has the potential of violent behavior is encouraged to use CITY OF BANNING's confidential Employee Assistance Program:

EMPLOYEE CONNECT
Main Phone Number: 888-628-4824
Website: https://www.guidanceresources.com/groWeb/login/login.xhtml or download the GuidanceNow mobile app available via Apple App store and/or Android Play Store
GuidanceResources.com login credentials:
Username: LFGSupport Password: LFGSupport1

Employee training on workplace violence will include:

- This plan;
- Workplace violence risks that employees may encounter in their jobs;
- How to recognize the potential for violence and escalating behavior;
- Strategies to de-escalate behaviors and to avoid physical harm;
- CITY OF BANNING alerts, alarms, or systems that are in place to warn of emergencies;
- How to report incidents to law enforcement; and
- CITY OF BANNING'S EAP

Employees assigned to respond to alerts, alarms, or systems that are in place to warn others will receive additional training that includes:

- General and personal safety measures;
- Aggression and violence predicting factors;
- The assault cycle;
- Characteristics of aggressive and violent persons;
- Verbal intervention and de-escalation techniques and physical maneuvers to defuse and prevent violent behavior;
- Strategies to prevent physical harm;
- Appropriate and inappropriate use of restraining techniques and medications as chemical restraints in acordance with Title 22; and
- An opportunity to practice the taught maneuvers and techniques, including a debriefing session.

Training will occur:

- When the plan is first established;
- At time of hire or transfer;
- Annually for employees performing patient contact activities and their supervisors;
- Annually for employees assigned to respond to internal alerts, alarms, or systems;
- When new equipment or work practices are introduced; and
- When a new or previously unrecognized workplace violence hazard has been identified

Employees who receive training in a form other than live will have the opportunity to meet with a person knowledgeable on the plan within one business day of the training for interactive questions to be answered.

Procedures

Responding to Actual or Potential Workplace Violence Emergencies

In the event of an actual or potential workplace violence emergency, CITY MANAGER OR DEPARTMENT DIRECTOR will alert employees of the presence, location, and nature of the workplace violence through the following methods:

- INTERCOM OR TEXT MESSAGE

When any employee becomes aware of an actual or potential workplace violence emergency, they shall notify the CITY MANAGER OR DEPARTMENT DIRECTOR.

Employees shall implement the run, hide, fight protocols where appropriate. Evacuation routes and sheltering locations will be communicated to affected staff. If employees are not able to evacuate or shelter in place, they are authorized to take all reasonable actions necessary to fight or subdue an active shooter or assailant.

Employees can obtain help from staff assigned to respond to workplace violence emergencies, such as security personnel by calling the following number: POLICE DISPATCH (951) 922-2288. If no security personnel are located at the worksite, employees shall call 911 to report the incident and request assistance from law enforcement.

Emergencies and Reporting a Crime

For immediate assistance in an emergency that is <u>not</u> associated with a service call, contact emergency services or law enforcement by calling 911. For immediate assistance in an emergency associated with a service call in progress, follow internal procedures for requesting immediate back-up assistance by notifying local law enforcement. Employees should also notify their supervisor, manager, and the Administrator as soon as possible.

Reporting Workplace Violence Concerns

Employees who witness or experience *threats of violence* or *workplace violence* can report the incident through their chain of command or directly to Human Resources. Employees may report anonymously and without fear of reprisal by submitting the incident in writing through interoffice mail.

Restraining Orders

Employees or other personnel affiliated with the CITY OF BANNING who have an active restraining order issued against another person that includes the workplace are encouraged to provide a copy of the restraining order to their supervisor and the Administrator. Supervisors who receive notification of a restraining order that includes the workplace will meet with the

Administrator to decide what actions, if any, need to be initiated.

Hazard Assessment

Workplace hazard assessments will include:

- An annual review of the past year's workplace violence incidents; and
- Periodic physical security assessments.

The Workplace Violence Prevention Environmental Hazard Assessment & Control Checklist (Appendix B) can be used to assist with the security assessment. Inspections are performed according to the following schedule:

- Once a year;
- When the plan is implemented;
- When new, previously unidentified workplace violence/security hazards are recognized; and
- When workplace violence injuries or threats of injury occur.

Hazard Correction

Work practice controls will be used to correct unsafe work conditions, practices, or procedures that threaten the security of employees.

Work practice controls are defined as procedures, rules, and staffing that are used to effectively reduce workplace violence hazards. Work practice controls may include, but are not limited to:

- Appropriate staffing levels;
- Provision of dedicated safety personnel (i.e. security guards);
- Employee training on workplace violence prevention methods; and
- Employee training on procedures to follow in the event of a workplace violence incident.

Corrective actions will be implemented in a timely manner based on the severity of the hazard, documented and dated.

Post Incident Response and Investigation

Managers and supervisors will use the Workplace Violent Incident Log (Attachment A) to assist in documenting incidents and investigations.

These procedures will occur following an incident:

- Provide immediate medical care or first aid;
- Identify all employees involved in the incident;

- Offer staff individual trauma counseling resources;
- Conduct a debriefing with all affected staff;
- Determine if corrective measures developed under this plan were effectively implemented; solicit feedback from all personnel involved in the incident as to the cause of this incident and if injuries occurred, how injury could have been prevented; and
- Record the incident in the Workplace Violent Incident Log.

Recordkeeping

- Records of workplace violence hazard identification, evaluation, and correction will be maintained for five years in accordance with the recordkeeping requirements of SB 553.
- Training for each employee, including the employee's name, training dates, type of training, and training provider will be maintained for a minimum one year.
- Records of violent incidents (Workplace Violent Incident Log) will be maintained a minimum of five years at HUMAN RESOURCES OFFICE.

Annual Review

CITY OF BANNING's Workplace Violence Prevention Plan will be reviewed annually and updated as needed considering the following criteria:

- Staffing;
- Sufficiency of security systems;
- Job, equipment, and facility design and risks;
- Modifications or additions to tasks and procedures that affect plan implementation;
- Newly identified hazards;
- Prior year incidents;
- Identified deficiencies; and
- Feedback provided by employees and their authorized representatives.

Appendix A

WORKPLACE VIOLENT INCIDENT LOG

This form must be completed for every record of violence in the workplace

Incident ID #*:	**Date and Time of Incident:**	**Department:**
Specific Location of Incident:		

** Do not identify employee by name, employee #, or SSI. The Incident ID must not reflect the employee's identity)*

Describe Incident (Include additional pages if needed):

Assailant information:

☐ Patient	☐ Client	☐ Customer
☐ Family or Friend of Patient	☐ Family or Friend of Client	☐ Family or Friend of Customer
☐ Partner/Spouse of Victim	☐ Parent/Relative of Victim	☐ Co-Worker/Supervisor/Manager
☐ Former Partner/Spouse of Victim	☐ Animal	☐ Person In Custody
☐ Robber/Burglar	☐ Passenger	☐ Stranger
☐ Student	☐ Other:	

Circumstances at time of incident:

☐ Employee Performing Normal Duties	☐ Poor Lighting	☐ Employee Rushed
☐ Employee Isolated or Alone	☐ High Crime Area	☐ Low Staffing Level
☐ Unable to Get Help or Assistance	☐ Working in a Community Setting	☐ Unfamiliar or New Location
☐ Other:		

Location of Incident:

☐ Patient or Client Room	☐ Emergency or Urgent Care	☐ Hallway
☐ Waiting Room	☐ Restroom or Bathroom	☐ Parking Lot or Outside Building
☐ Personal Residence	☐ Breakroom	☐ Cafeteria
☐ Other:		

Type of Incident (check as many apply):

☐ Robbery	☐ Grabbed	☐ Pushed
☐ Verbal Threat or Harassment	☐ Kicked	☐ Scratched
☐ Sexual Threat, Harassment, or Assault	☐ Hit with an Object	☐ Bitten
☐ Animal Attack	☐ Shot (or Attempted)	☐ Slapped
☐ Threat of Physical Force	☐ Bomb Threat	☐ Hit with Fist
☐ Threat of Use of Weapon or Object	☐ Vandalism (of Victim's Property)	☐ Knifed (or Attempted)
☐ Assault With A Weapon or Object	☐ Vandalism (of Employer's Property)	☐ Arson
☐ Robbery	☐ Other:	

Consequences of incident:

Medical care provided? ☐ Yes ☐ No Law enforcement called? ☐ Yes ☐ No Security contacted? ☐ Yes ☐ No

Did anyone provide assistance to conclude the event? ☐ Yes ☐ No Days lost from work (if any) _____

Actions taken by employer to protect employees from a continuing threat? ☐ Yes ☐ No

Appendix B

WORKPLACE VIOLENCE PREVENTION
ENVIRONMENTAL HAZARD ASSESSMENT & CONTROL CHECKLIST

Assessed by:	**Title:**
Location(s) Assessed:	

This checklist is designed to evaluate the workplace and job tasks to help identify situations that may place employees at risk of workplace violence.

Step 1: Identify risk factors that may increase CITY OF BANNING's vulnerability to workplace violence events

Step 2: Conduct a workplace assessment to identify physical and process vulnerabilities

Step 3: Develop a corrective action plan with measurable goals and target dates

STEP 1: IDENTIFY RISK FACTORS

Yes	No	Risk Factors	Comments:
		Does staff have contact with the public?	
		Does staff exchange money with the public?	
		Does staff work alone?	
		Is the workplace often understaffed?	
		Is the workplace located in an area with a high crime rate?	
		Does staff enter areas with high crime rates?	
		Does staff have mobile workplaces?	
		Does staff perform public safety functions that might put them in conflict with others?	
		Does staff perform duties that may upset people?	
		Does staff work with people known or suspected to have a history of violence?	
		Do any employees have a history of threats of violence?	

STEP 2: CONDUCT ASSESSMENT

Building Interior

Yes	No	Building Interior	Comments:
		Are employee ID badges required?	
		Are employees notified of past workplace violence events?	
		Are trained security personnel or staff accessible to employees?	
		Are bullet resistant windows or similar barriers used when money is exchanged with the public?	
		Are areas where money is exchanged visible to others?	
		Is a limited amount of cash kept on hand with appropriate signage?	
		Could someone hear an employee who called for help?	
		Do employees have a clear line of sight of visitors in waiting areas?	
		Do areas used for client or visitor interviews allow co-employees to observe problems?	
		Are waiting and work areas free of objects that could be used as weapons?	
		Is furniture in waiting and work areas arranged to prevent employee entrapment?	
		Are clients and visitors clearly informed how to use the department services so they will not become frustrated?	
		Are private, locked restrooms available for employees?	
		Do employees have a secure place to store personal belonging?	

Building Exterior

Yes	No	Building Exterior	Comments:
		Do employees feel safe walking to and from the workplace?	
		Are the entrances to the building clearly visible from the street?	
		Is the area surrounding the building free of bushes or other hiding places?	
		Are security personnel provided outside the building?	
		Is video surveillance provided outside the building?	
		Is there enough lighting to see clearly?	
		Are all exterior walkways visible to security personnel?	

Parking Area

Yes	No	Parking Area	Comments:
		Is there a nearby parking lot reserved for staff?	
		Is the parking lot attended and secure?	
		Is the parking lot free of blind spots and landscape trimmed to prevent hiding places?	
		Is there enough lighting to see clearly?	
		Are security escorts available?	

Security Measures

Yes	No	Security Measures	Comments:
		Is there a response plan for workplace violence emergencies?	
		Are there physical barriers? (between staff and clients)	
		Are there security cameras?	
		Are there panic buttons?	
		Are there alarm systems?	
		Are there metal detectors?	
		Are there X-ray machines?	
		Do doors lock?	
		Does internal telephone system activate emergency assistance?	
		Are telephones with an outside line programed for 911?	
		Are there two-way radios, pagers, or cell phones?	
		Are there security mirrors?	
		Is there a secured entry?	
		Are there personal alarm devices?	
		Are there “drop safes” to limit available cash?	
		Are pharmaceuticals secured?	
		Is there a system to alert staff of the presence, location, and nature of a security threat?	
		Is there a system in place for testing security measures?	

STEP 3: DEVELOP CORRECTIVE ACTION PLAN

(Action Plan Types: BI – Building Interior, BE – Building Exterior, PA – Parking Area, SM – Security Measure)

Type	Action Item	Person(s) Responsible	Target Date	Status	Comments

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Brandon Robinson, Electrical Engineering Supervisor** **Art Vela, Public Works Director**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-123, Approving the Line Extension Reimbursement Agreement Between the City of Banning and Robertson's Ready Mix, LTD**

RECOMMENDATION:

Adopt Resolution 2024-123.

BACKGROUND:

The Banning Quarry ("Quarry") is an existing aggregate (sand and gravel) mine and processing plant located in the northeastern portion of the City. The Quarry has been owned and operated by Robertson's since 1997, and originally consisted of mining operations across 186 acres. Pursuant to a Development Agreement between Robertson's Ready Mix, LTD and City of Banning in 2020, the active mining area ("Mining Area") was expanded to 209 acres. A City of Banning Electric Utility ("BEU") pole line that served existing services for the mining site had existed on the border between the original 186 acres and the expanded area, making it impossible to mine a significant area of the South Pit.

As a result, Robertson's Ready Mix agreed to compensate BEU for removing and relocating the utility distribution pole line to allow full access to mining in the expanded area. City Staff has drafted a Line Extension Reimbursement Agreement ("LEA"), attached herewith as Exhibit A, that defines the scope of the project and provides a mechanism for payment for the work that will be completed by BEU.

JUSTIFICATION:

This LEA will allow the Electric Utility to relocate the distribution facilities serving the power supply at Robertson's Ready Mix, enabling the customer to continue mining operations onsite more efficiently and without the presence of utility infrastructure near mining pits.

FISCAL IMPACT:

Staff recommends the City Council approve the LEA with Robertson's Ready Mix with an initial deposit amount of $295,000 due to the City from Robertson's Ready Mix upon execution of the LEA, and allow Robertson's Ready Mix to contribute additional deposits or payments to cover any additional eligible expenses incurred by the City.

ALTERNATIVES:

Do not adopt Resolution 2024-123 and provide alternative direction to staff.

ATTACHMENTS:

1. Resolution 2024-123, Robertsons Agreement.docx
2. Banning - Line Extension Agreement (Robertson_s Ready Mix)_draft 7-1-24.pdf

RESOLUTION 2024-123

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING THE LINE EXTENSION REIMBURSEMENT AGREEMENT BETWEEN THE CITY OF BANNING AND ROBERTSON'S READY MIX, LTD

WHEREAS, the City of Banning ("City") is a general law municipality governed by elected City Council Members; and

WHEREAS, the City owns and operates a retail electrical energy distribution system which serves load to end-use costumers in an assigned area of service; and

WHEREAS, in 2020, the City and Robertson's Ready Mix, Ltd. executed a Development Agreement, which allowed for the expansion of the active mining area at the Banning Quarry from 186 acres to 209 acres; and

WHEREAS, the City's Electric Utility Department ("BEU") owns a utility distribution pole line that served existing services for the mining site and is located on the border between the original 186 acres and the expanded area (the "South Pit"); the pole line inhibits access to a significant area of the South Pit by Robertson's Ready Mix, Ltd.; and

WHEREAS, Robertson's Ready Mix, Ltd. has agreed to compensate BEU for removing and relocating the utility distribution pole line to allow full access to mining in the expanded area; and

WHEREAS, the draft Line Extension Reimbursement Agreement ("LEA") defines the scope of the project and provides a mechanism for deposit of funds and reimbursement of costs to the City for eligible expenses related to the work that will be completed by BEU; and

WHEREAS, execution of the proposed LEA will enable Robertson's Ready Mix, Ltd. to continue mining operations onsite more efficiently and without the presence of utility infrastructure near mining pits.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council approves the Line Extension Reimbursement Agreement with Robertson's Ready Mix, Ltd., attached hereto as Exhibit A, authorizes the City Manager to execute the Agreement in a form approved by the City Attorney on behalf of the City Council, and authorizes the City Manager to make any necessary non-substantive revisions to the Agreement prior to execution.

SECTION 2. The City Council authorizes the City Manager, or his designee, to make necessary budget adjustments, appropriations, and transfers related to this resolution.

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED, AND ADOPTED this 9th day of July 2024.

Alberto Sanchez, Mayor
City of Banning

Line Extension Reimbursement Agreement with Robertson's Ready Mix, Ltd.

CITY OF BANNING ELECTRIC LINE EXTENSION
REIMBURSEMENT AGREEMENT FOR PROJECT NO. _____

This Electric Line Extension Reimbursement Agreement ("Agreement") is dated _____ __, 2024 (the "Effective Date"), and is by and between the City of Banning, a California municipal corporation ("City") and Robertson's Ready Mix, Ltd., a California limited partnership ("Applicant"). City and Applicant are sometimes referred to in this Agreement individually as a "Party" and collectively as the "Parties".

RECITALS

1. City owns and operates electric distribution lines and services within the Robertson's Ready Mix property at 1990 N Hargrave St, Banning, CA . Applicant is currently extending mining operations into a portion of the property that is in direct conflict with existing electric distribution facilities for which Applicant is seeking an electrical line extension from the Banning Electric Utility, an electric enterprise operated by City, to relocate the City-owned distribution facilities.

2. The specific electrical line extension that is the subject of this Agreement is referred to herein as Project No. ____ or simply the Project. The Project is generally described as an overhead electric line extension adjacent to the Robertson's Ready mix property line on Hoffer St., Evans St., Gilman St., and Theodore St. The Project deposit costs associated with this Agreement are further detailed and defined in both Exhibit A to this Agreement and the construction plans related to this Agreement.

3. It is the mutual intent of the Parties that this Agreement is necessary to set forth the terms and conditions by which Applicant shall reimburse City for the work and material required for the Project.

NOW, THEREFORE, the Parties agree as follows:

AGREEMENT

1. **City Electric Line Extension and Construction Work.** City shall extend and install electric lines ("Electrical Facilities") for the Project as further detailed in Exhibit A to this Agreement and in accordance with all applicable City ordinances, resolutions, and standards; provided that City will install only those Electrical Facilities that, in City's judgment, will be used within a reasonable time to serve permanent loads. All service extensions shall be installed pursuant to City's Electric Rules and Regulations. The City will be responsible for planning, designing, and engineering Distribution Line Extensions using the City Electric Utility's standards for material, design, and construction.

2. **Ownership of Electrical Facilities.** Title to and ownership of the Electrical Facilities constructed by City shall vest in City. Applicant agrees that upon completion and acceptance by City of any Applicant-installed Electrical Facilities, title to each and every component part thereof shall immediately pass to City free and clear of all liens and encumbrances.

3. **Applicant's Obligations.**

   A. Applicant shall, at its sole cost and expense and in accordance with City's specifications and timing requirements for the Project, pay to City, as specified herein and before the start of construction, City's estimated-installed costs thereof.

   B. Applicant shall also be responsible for 100% of the cost for all offsite improvements required to extend or upgrade overhead/underground distribution lines to the Project site. Nothing in this Agreement shall entitle Applicant to any reimbursements for such work performed and completed under this Agreement; unless City and Applicant subsequently agree that the cost may be shared between Applicant and City because the offsite improvements benefit the whole area, including any new Customer/Applicant.

4. **Rights-of-Way.** Applicant hereby grants to City rights-of-way and easements for the Distribution Line Extension over the shortest, most practical, available, and acceptable route over, within, and through Applicant's property for the purpose of delivering electric service as part of the Project. Such rights-of-way and easement shall include the right of City and its authorized agents and representatives to access and have complete and exclusive control of the operation, repair, alteration, and maintenance of the Electrical Facilities, including but not limited to, periodic reading, maintenance, and replacement of meters and to trim trees as necessary.

   In the event City requires formal rights-of-way, easements, land leases, or permits for installation of Electrical Facilities on or over Applicant's property, or the property of others, Applicant acknowledges and agrees that City shall not be obligated to install any Electrical Facilities for the Project unless and until any such formal rights-of-way, easements, land leases, or permits are obtained for, and at no cost to City. In no event shall this Agreement be construed to obligate City to condemn any property interest.

5. **Deposit & Reimbursement.** Within ten (10) business days following execution of this Agreement, Applicant shall deposit Two Hundred Ninety-Five Thousand Dollars ($295,000) (the "Deposit"). City shall maintain the Deposit in a separate account and shall have the right to draw upon the Deposit for reimbursing City for all Eligible Expenses, as defined in the Section 6 below.

Applicant shall thereafter maintain the Deposit in such amounts as City, in its sole and reasonable discretion, deems necessary to cover City's Eligible Expenses it has incurred or expects to incur within the next sixty (60) days. The final payment shall be for the difference between the final actual and estimated inspection, project management, and construction costs. City shall notify Applicant of the final actual inspection, project management, and construction costs for the Project, including an itemized statement, within fifteen (15) business days of completion of Project construction. Applicant shall submit the third payment to City within ten (10) business days' receipt of City's notice.

Within ninety (90) days of either expiration of this Agreement or receipt of Applicant's earlier termination of this Agreement, City shall return any then-unexpended portion of the Deposit to Applicant, without interest, less an amount equal to any unpaid Eligible Expenses previously incurred by the City.

6. **Eligible Expenses.** Applicant's Deposit shall be used to reimburse City for all costs reasonably incurred in completing the Project, primarily on a time and material basis ("Eligible Expenses"), including, without limitation, the following:

   - Materials, commodities, consumables, tools, and equipment used for the installation of Electrical Facilities up to line energization and the City's acceptance of a line section or secondary service;
   - Fee payments and payments to contractors employed by the City in connection with the Project; and
   - The fully burdened labor cost for staff time for: (i) Project design, inspection, and management; (ii) preparing and reviewing reports and supporting documentation; and (iii) attending meetings in connection with the Project; and
   - Any and all other costs reasonably incurred by City in connection with the Project.

7. **Street Lighting Facilities** Street lighting and Distribution Line Extensions within the Project solely for service to street lighting equipment shall be installed in accordance with the appropriate street light requirements. Street Lights shall be located at points determined by the City over streets to be dedicated to the City or by Applicant for privately owned and maintained streets open to and used by the general public.

   The necessity and location of street lighting related to this Project will fall under the responsibility of City of Banning Public Works Department. However, all maintenance of street lighting shall be the responsibility of City of Banning Electric Utility. Street light revenues are not applicable toward refunds for Distribution Line Extensions.

8. **Payment Adjustments.** If the load information provided by Applicant results in City having installed Electrical Facilities that are in excess of those needed to serve the actual loads, and City elects to reduce such excess Electrical Facilities, Applicant shall pay to City the total costs to remove, abandon, or replace the excess Electrical Facilities, less the estimated salvage of any removed Electrical Facilities.

9. **Force Majeure.** In the event that either Party shall be delayed or hindered, or prevented from performance of any act required by this Agreement by reason of acts of God, strikes, lockouts, labor troubles, shortage of labor or material, weather conditions, governmental rule or regulation, judgement or order of any court or commission, delay in obtaining necessary land rights, riots, insurrection, terrorism, war or other reason of similar nature not the fault of the party delayed in performing the work or doing the acts required under the terms of this Agreement, then the performance of such act shall be excused for the period of the delay caused by the foregoing. Financial inability shall not be deemed an excuse for delay under this Section.

   City shall have the right, furthermore, in the event of its inability to obtain sufficient supplies, materials, or labor to meet its construction requirements, to allocate materials and labor to construction projects that City, in its sole discretion, deems most important to serve the needs of its customers and the general public. Any delay in City's performance under this Agreement resulting from such allocation shall be deemed to be cause beyond City's control.

10. **Agreement Revision.** If Applicant does not commence installation of any Electrical Facilities which are Applicant's responsibility or City is prevented from commencing the installation of the Electrical Facilities for causes beyond its reasonable control within one year from the effective date of this Agreement, City may, in its discretion, revise its cost estimate and recalculate the refundable and/or non-refundable amounts set forth herein. City will notify Applicant of such increased costs and give the option to either terminate this Agreement or pay City the additional charges.

11. **Agreement Termination.** If at any time during the term of this Agreement, the Applicant decides to discontinue construction of the electric line extension, for any reason, this Agreement may be terminated. Upon termination of the Agreement, Applicant agrees to forfeit that portion of the Deposit paid to City for its expenses covering any engineering, surveying, right of way acquisition and other associated work incurred by City. If such expenses are greater or less than the refundable and/or non-refundable Deposit, Applicant shall pay to City, or City shall refund the balance to Applicant, without interest, as the case may be.

    This Agreement shall immediately terminate, and the obligations of the Parties under this Agreement shall cease, on Applicant's failure to: (1) submit a payment to City by or before the deadline specified in this Agreement; and/or (2) perform any work it is required to do for completion of the Project. Upon termination, City may remove the Electrical Facilities.

12. **Indemnification.** Each party (the "Indemnifying Party") shall indemnify, defend, and hold harmless the other party, its affiliates, and its respective officers, directors, employees, agents, and representatives (each an "Indemnified Party") from and against any and all liabilities, claims, suits, actions, arbitration proceedings, administrative proceedings, and regulatory proceedings, judgments, settlements, losses, costs, and expenses (including reasonable attorneys' fees), and injuries or damages of any kind whatsoever, in law or equity, arising from or in connection with the performance of this Agreement, and attributable to the fault of the Indemnifying Party. Following a determination of the percentage of fault or liability by agreement between the Parties or a court of competent jurisdiction, the Indemnifying Party shall indemnify the Indemnified Party(ies) for the percentage of liability determined. The Indemnified Party shall promptly notify the Indemnifying Party of any such claim and reasonably cooperate with the Indemnifying Party in defense of such claims at the Indemnifying Party's expense. With respect to any and all such aforesaid suits, actions, or other legal proceedings of every kind that may be brought or instituted against an Indemnified Party, the Indemnifying Party shall defend the Indemnified Party, at the Indemnifying Party's own cost, expense, and risk, and shall pay and satisfy any judgment, award, or decree that may be rendered against the Indemnified Party. The Indemnifying Party shall reimburse Indemnified Parties for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. The Indemnifying Party's obligation shall not be restricted to insurance proceeds, if any. All duties of the Parties under this section shall survive termination of this Agreement.

13. **Assignment of Agreement.** After Applicant has performed its construction obligations hereunder, Applicant may assign this Agreement, in whole or in part, to its successor or successors. Assignment of the Agreement shall not release Applicant from any of the obligations under this Agreement unless otherwise provided therein. Any assignment of the Agreement to a successor(s) shall be mutually agreed upon between the City and the Applicant.

14. **Joint and Several Liability.** Where two or more individuals or entities are joint Applicants under this Agreement, all Applicants shall be jointly and severally liable to comply with all terms and conditions herein.

15. **Warranty.** Applicant warrants that all work and/or equipment furnished or installed by Applicant shall be free of defects in workmanship and material. The warranty period shall begin from the date of final acceptance by City and extend for one (1) year. Should the work develop defects during that period, City, at its election, shall either (a) repair or replace the defective work and/or equipment, or (b) demand that Applicant repair or replace the defective work and/or equipment and, in either event, Applicant shall be liable for all costs associated with such repair and/or replacement. Applicant upon demand by City, shall promptly correct, to City's satisfaction and that of any governmental agency having jurisdiction, any breach of any warranty.

16. **Agreement Effective Date.** This Agreement shall not be effective unless it is (1) signed by City's authorized individual, (2) executed and delivered by Applicant to City together with payment required hereunder within thirty (30) days of the date in Paragraph 1 of this Agreement and (3) accepted by City. This Agreement shall then be effective on the date executed by City and shall take effect without further notice to Applicant.

17. **Jurisdiction.** This Agreement is subject to the applicable provisions of City's tariffs, including City of Banning Electric Utilities Rules and Regulations. This Agreement shall, at all times, be subject to such changes or modifications by California Energy Commission, as said Commission may, from time to time, direct in the exercise of its jurisdiction.

18. **Headings.** The headings in this Agreement are included solely for convenience of reference and shall not affect the interpretation of any provision of this Agreement or any of the rights or obligations of the parties to this Agreement.

19. **Exhibits.** All documents referenced as exhibits in this Agreement constitute a part of this Agreement and are incorporated into this Agreement by this reference. If any inconsistency exists or arises between a provision of this Agreement and a provision of any exhibit, the provisions of this Agreement shall control.

The Parties, through their respective authorized representatives, are signing this Agreement on the date stated in the introductory clause.

COST TO RELOCATE DISTRIBUTION FACILITIES

Classification	Quantity	Cost	Total
Poles (pole, insulators, x-arms)	20	$ 7,500.00	$ 150,000.00
Conductor (2700' x 4 cond)	10800	$ 5.00	$ 54,000.00
Misc Materials $1000/ pole	20	$ 1,000.00	$ 20,000.00
Additional Labor	lot		$ -
Contingency (20% Cost)	lot		$ -
Inflation (20%)	lot		$ -
Design	lot	$ 70,800.00	$ 70,800.00
Total			**$ 294,800.00**

Cost within the "additional Labor" category will cover Eligible Expenses related to the removal and disposal of original distribution facilities, project management inspection, etc as defined in Sections 5 and 6 of this Agreement. These costs will be provided within fifteen (15) business days of completion of Project construction and accompanied with an invoice for payment.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Art Vela, Public Works Director**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-124, Awarding a Contract with Pinnacle Petroleum Inc. for Unleaded and Diesel Bulk Fuel Services in the Amount of $500,000**

RECOMMENDATION:

Adopt Resolution 2024-124.

BACKGROUND:

The City of Banning's fleet consists of over 200 light, medium and heavy duty vehicles and equipment that are fueled at the City's corporate yard. The City's fleet operates on unleaded, diesel and compressed natural gas. In 2023 the City used 107,056 gallons of unleaded fuel and 11,694 gallons of diesel fuel.

Fuel purchases are exempted from the City's standard purchasing requirements, but in order to insure the City is getting the best value for fuel City staff advertised an invitation to bid (IFB-24-067: UNLEADED & DIESEL BULK FUEL SERVICES) on May 8, 2024. As a result the City received 3 bids. The lowest bid was submitted by Pinnacle Petroleum Inc.

As a result, staff recommends the award of a contract with Pinnacle Petroleum Inc. in the amount of $500,000 per year for a five (5) year period beginning Fiscal Year 2024/2025 through Fiscal Year 2029/2030 for unleaded and diesel bulk fuel services.

JUSTIFICATION:

Pinnacle Petroleum Inc. submitted the lowest bid to IFB-24-067: UNLEADED & DIESEL BULK FUEL SERVICES.

FISCAL IMPACT:

The contract will be funded by the Fleet Fund, Account No. 702-3800-480.36-11. The Fleet Fund is an interservice fund funded by all departments that utilize the Fleet Division's services.

ALTERNATIVES:

Do not approve staff recommendation and/or provide alternative direction.

Agreement with Pinnacle Petroleum, Inc.

AGREEMENT FOR CONTRACT SERVICES (C01049)

FOR UNLEADED AND DIESEL FUEL AND FUEL DELIVERY

By and Between

THE CITY OF BANNING,
A MUNICIPAL CORPORATION

and

Pinnacle Petroleum, Inc.

a California corporation

AGREEMENT FOR CONTRACT SERVICES (C01049) FOR UNLEADED AND DIESEL FUEL AND FUEL DELIVERY BY AND BETWEEN CITY OF BANNING AND PINNACLE PETROLEUM, INC.

THIS AGREEMENT FOR CONTRACT SERVICES (herein" Agreement") is made and entered into this day: _____, by and between the **CITY OF BANNING**, a municipal corporation ("City") and **PINNACLE PETROLEUM, INC.,** a California corporation ("Contractor"). City and Contractor are sometimes hereinafter individually referred to as "Party" and hereinafter collectively referred to as the "Parties.".

RECITALS

A. City has sought by issuance of an Invitation for Bids (IFB No. 24-067), the performance of the Services defined and described particularly in Article 1 of this Agreement.

B. Contractor, following submission of a bid for the performance of the Services defined and described particularly in Article 1 of this Agreement, was selected by the City to perform those Services.

C. Pursuant to the City of Banning's Municipal Code, City has authority to enter into this Agreement.

D. The Parties desire to formalize the selection of Contractor for performance of those Services defined and described particularly in Section 1 of this Agreement and desire that the terms of that performance be as particularly defined and described herein.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained herein and other consideration, the value and adequacy of which are hereby acknowledged, the parties agree as follows:

ARTICLE 1. SERVICES OF CONTRACTOR

1.1 Scope of Services.

In compliance with all terms and conditions of this Agreement, the Contractor shall provide those Services specified in the "Scope of Services" attached hereto as Exhibit "A" and "A-1" and incorporated herein by this reference, which Services may be referred to herein as the "Services" or "Work" hereunder. As a material inducement to the City entering into this Agreement, Contractor represents and warrants that it has the qualifications, experience, and facilities necessary to properly perform the Services required under this Agreement in a thorough, competent, and professional manner, and is experienced in performing the Work and Services contemplated herein. Contractor shall at all times faithfully, competently and to the best of its ability, experience and talent, perform all Services described herein. Contractor covenants that it shall follow the highest professional standards in performing the Work and Services required hereunder and that all materials will be of good quality, fit for the purpose intended. For purposes of this Agreement, the phrase "highest professional standards" shall mean those standards of practice recognized by one or more first-class firms performing similar work under similar circumstances.

1.2 Contractor's Proposal.

The Scope of Services shall include the Contractor's scope of work or bid which shall be incorporated herein by this reference as though fully set forth herein. In the event of any inconsistency between the terms of such proposal and this Agreement, the terms of this Agreement shall govern.

1.3 Compliance with Law.

Contractor shall keep itself informed concerning, and shall render all Services hereunder in accordance with all ordinances, resolutions, statutes, rules, and regulations of the City and any Federal, State or local governmental entity having jurisdiction in effect at the time service is rendered.

1.4 Licenses, Permits, Fees and Assessments.

Contractor shall obtain at its sole cost and expense such licenses, permits and approvals as may be required by law for the performance of the Services required by this Agreement. Contractor shall have the sole obligation to pay for any fees, assessments and taxes, plus applicable penalties and interest, which may be imposed by law and arise from or are necessary for the Contractor's performance of the Services required by this Agreement, and shall indemnify, defend and hold harmless City, its officers, employees or agents of City, against any such fees, assessments, taxes penalties or interest levied, assessed or imposed against City hereunder.

1.5 Familiarity with Work.

By executing this Agreement, Contractor warrants that Contractor (i) has thoroughly investigated and considered the Scope of Services to be performed, (ii) has carefully considered how the Services should be performed, and (iii) fully understands the facilities, difficulties and restrictions attending performance of the Services under this Agreement. If the Services involve work upon any site, Contractor warrants that Contractor has or will investigate the site and is or will be fully acquainted with the conditions there existing, prior to commencement of Services hereunder. Should the Contractor discover any latent or unknown conditions, which will materially affect the performance of the Services hereunder, Contractor shall immediately inform the City of such fact and shall not proceed except at Consultant's risk until written instructions are received from the Contract Officer.

1.6 Care of Work.

The Contractor shall adopt reasonable methods during the life of the Agreement to furnish continuous protection to the Work, and the equipment, materials, papers, documents, plans, studies and/or other components thereof, to prevent losses or damages, and shall be responsible for all such damages, to persons or property, until acceptance of the Work by City, except such losses or damages as may be caused by City's own negligence.

1.7 Warranty**.**

Contractor warrants all under the Agreement (which for purposes of this Section shall be deemed to include unauthorized Work which has not been removed and any non-conforming materials incorporated into the Work) to be of good quality and free from any defective or faulty material and workmanship. Contractor agrees to warranty labor for ninety (90) days. Parts, materials, and workmanship for a period of one year (or the period of time specified elsewhere in

the Agreement or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the Work, whichever is later) after the date of final acceptance, Contractor shall within ten (10) days after being notified in writing by the City of any defect in the Work or non-conformance of the Work to the Agreement, commence and prosecute with due diligence all Work necessary to fulfill the terms of the warranty at his sole cost and expense. Contractor shall act sooner as requested by the City in response to an emergency. In addition, Contractor shall, at its sole cost and expense, repair and replace any portions of the Work (or work of other contractors) damaged by its defective Work or which becomes damaged in the course of repairing or replacing defective Work. Contractor shall perform such tests as the City may require to verify that any corrective actions, including, without limitation, redesign, repairs, and replacements comply with the requirements of the Agreement. All costs associated with such corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor. All warranties and guarantees of subcontractors, suppliers and manufacturers with respect to any portion of the Work, whether express or implied, are deemed to be obtained by Contractor for the benefit of the City, regardless of whether or not such warranties and guarantees have been transferred or assigned to the City by separate agreement and Contractor agrees to enforce such warranties and guarantees, if necessary, on behalf of the City. In the event that Contractor fails to perform its obligations under this Section, or under any other warranty or guaranty under this Agreement, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming Work and any Work damaged by such Work or the replacement or correction thereof at Contractor's sole expense. Contractor shall be obligated to fully reimburse the City for any expenses incurred hereunder upon demand. This provision may be waived in Exhibit "B" if the Services hereunder do not include construction of any improvements or the supplying of equipment or materials.

1.8 Prevailing Wages.

Contractor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 1600, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "Public Works" and "Maintenance" projects. If the Services are being performed as part of an applicable "Public Works" or "Maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000.00 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. City shall provide Contractor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the project site. Contractor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

1.9 Further Responsibilities of Parties.

Both Parties agree to use reasonable care and diligence to perform their respective obligations under this Agreement. Both Parties agree to act in good faith to execute all instruments, prepare all documents and take all actions as may be reasonably necessary to carry out the purposes of this Agreement. Unless hereafter specified, neither Party shall be responsible for the Services of the other.

1.10 Additional Services.

City shall have the right at any time during the performance of the Services, without invalidating this Agreement, to order extra Work beyond that specified in the Scope of Services or make changes by altering, adding to or deducting from said Work. No such extra Work may be undertaken unless a written order is first given by the Contract Officer to the Contractor, incorporating therein any adjustment in (i) the Contract Sum, and/or (ii) the time to perform this Agreement, which said adjustments are subject to the written approval of the Contractor. Any increase in compensation of up to five percent (5%) of the Contract Sum or $25,000.00, whichever is less; or in the time to perform of up to one hundred eighty (180) days may be approved by the Contract Officer. Any greater increases, taken either separately or cumulatively must be approved by the City Council. It is expressly understood by Contractor that the provisions of this Section shall not apply to Services specifically set forth in the Scope of Services or reasonably contemplated therein. Contractor hereby acknowledges that it accepts the risk that the Services to be provided pursuant to the Scope of Services may be more costly or time consuming than Contractor anticipates and that Contractor shall not be entitled to additional compensation therefor.

1.11 Special Requirements.

Additional terms and conditions of this Agreement, if any, which are made a part hereof are set forth in the "Special Requirements" attached hereto as Exhibit "B" and incorporated herein by this reference. In the event of a conflict between the provisions of Exhibit "B" and any other provisions of this Agreement, the provisions of Exhibit "B" shall govern.

ARTICLE 2. COMPENSATION AND METHOD OF PAYMENT.

2.1 Contract Sum.

Subject to any limitations set forth in this Agreement, City agrees to pay Contractor the amounts specified in the "Schedule of Compensation" attached hereto as Exhibit "C" and "C-1", and incorporated herein by this reference. The total compensation, including reimbursement for actual expenses, shall not exceed, Five Hundred Thousand Dollars ($500,000.00) (the "Contract Sum"), unless additional compensation is approved pursuant to Section 1.10.

2.2 Method of Compensation.

The method of compensation may include: (i) a lump sum payment upon completion, (ii) payment in accordance with specified tasks or the percentage of completion of the Services, (iii payment for time and materials based upon the Contractor's rates as specified in the Schedule of Compensation, provided that time estimates are provided for the performance of sub tasks, but not exceeding the Contract Sum or (iv) such other methods as may be specified in the Schedule of Compensation.

2.3 Reimbursable Expenses.

Compensation may include reimbursement for actual and necessary expenditures for reproduction costs, telephone expenses, and travel expenses approved by the Contract Officer in advance, or actual subcontractor expenses if an approved subcontractor pursuant to Section 4.5, and only if specified in the Schedule of Compensation. The Scope of Services shall include the attendance of Contractor at all project meetings reasonably deemed necessary by the City. Coordination of the performance of the Work with City is a critical component of the Services. If

Contractor is required to attend meetings in addition to the project meetings, to facilitate coordination of the Services and/or Work, Contractor shall not be entitled to any additional compensation for attending said meetings.

2.4 Invoices.

Each month Contractor shall furnish to City an original invoice for all Work performed and expenses incurred during the preceding month in a form approved by City's Director of Finance. The invoice shall detail charges for all necessary and actual expenses by the following categories: labor (by sub-category), travel, materials, equipment, supplies, and sub-contractor charges. Sub-contractor charges shall also be detailed by such categories.

City shall independently review each invoice submitted by the Contractor to determine whether the Work performed and expenses incurred are in compliance with the provisions of this Agreement. Except as to any charges for Work performed or expenses incurred by Contractor which are disputed by City, or as provided in Section 7.3. City will use its best efforts to cause Contractor to be paid within forty-five (45) days of receipt of Contractor's correct and undisputed invoice. In the event any charges or expenses are disputed by City, the original invoice shall be returned by City to Contractor for correction and resubmission.

2.5 Waiver.

Payment to Contractor for Work performed pursuant to this Agreement shall not be deemed to waive any defects in Work performed by Contractor.

ARTICLE 3. PERFORMANCE SCHEDULE

3.1 Time of Essence.

Time is of the essence in the performance of this Agreement.

3.2 Schedule of Performance.

Contractor shall commence the Services pursuant to this Agreement upon receipt of a written notice to proceed and shall perform all Services within the time period(s) established in the "Schedule of Performance" attached hereto as Exhibit "D" and incorporated herein by this reference.

3.3 Force Majeure.

The time period(s) specified in the Schedule of Performance for performance of the Services rendered pursuant to this Agreement shall be extended because of any delays due to unforeseeable causes beyond the control and without the fault or negligence of the Contractor, including, but not restricted to, acts of God or of the public enemy, unusually severe weather, fires, earthquakes, floods, epidemics, quarantine restrictions, riots, strikes, freight embargoes, wars, litigation, and/or acts of any governmental agency, including the City, if the Contractor shall within ten (10) days of the commencement of such delay notify the Contract Officer in writing of the causes of the delay. The Contract Officer shall ascertain the facts and the extent of delay, and extend the time for performing the Services for the period of the enforced delay when and if in the judgment of the Contract Officer such delay is justified. The Contract Officer's determination shall be final and conclusive upon the parties to this Agreement. In no event shall Contractor be entitled to recover damages against the City for any delay in the performance of this Agreement,

however caused, Contractor's sole remedy being extension of the Agreement pursuant to this Section.

3.4 Inspection and Final Acceptance.

City may inspect and accept or reject any of Contractor's Work under this Agreement, either during performance or when completed. City shall reject or finally accept Contractor's Work within forty-five (45) days after it is submitted to City. City shall accept Work by a timely written acceptance, otherwise work shall be deemed to have been rejected. City's acceptance shall be conclusive as to such work except with respect to latent defects, fraud and such gross mistakes as amount to fraud. Acceptance of any Work by City shall not constitute a waiver of any of the provisions of this Agreement including, but not limited to, Article 1 and 5, pertaining to warranty, and indemnification and insurance, respectively.

3.5 Term.

Unless earlier terminated in accordance with Article 7 of this Agreement, the term of this Agreement shall commence upon execution by both Parties and shall expire on June 30, 2030, or extended in writing in advance by both Parties. Maximum term and any subsequent amendment or modification shall not exceed five (5) years.

ARTICLE 4. COORDINATION OF WORK

4.1 Representatives and Personnel of Contractor.

The following principal of Contractor (Principal) is hereby designated as being the principal and representative of Contractor authorized to act in its behalf with respect to the Work specified herein and make all decisions in connection therewith.

Liz McKinley – President

4.2 Representative Name, Title.

It is expressly understood that the experience, knowledge, capability and reputation of the foregoing principal was a substantial inducement for City to enter into this Agreement. Therefore, the foregoing principal shall be responsible during the term of this Agreement for directing all activities of Contractor and devoting sufficient time to personally supervise the Services hereunder. All personnel of Contractor, and any authorized agents, shall at all times be under the exclusive direction and control of the Principal. For purposes of this Agreement, the foregoing Principal may not be replaced nor may their responsibilities be substantially reduced by Contractor without the express written approval of City. Additionally, Contractor shall make every reasonable effort to maintain the stability and continuity of Contractor's staff and subcontractors, if any, assigned to perform the Services required under this Agreement. Contractor shall notify City of any changes in Contractor's staff and subcontractors, if any, assigned to perform the Services required under this Agreement, prior to and during any such performance.

4.3 Status of Contractor.

Contractor shall have no authority to bind City in any manner, or to incur any obligation, debt or liability of any kind on behalf of or against City, whether by contract or otherwise, unless such authority is expressly conferred under this Agreement or is otherwise expressly conferred in

writing by City. Contractor shall not at any time or in any manner represent that Contractor or any of Contractor's officers, employees, or agents are in any manner officials, officers, employees or agents of City. Neither Contractor, nor any of Contractor's officers, employees or agents, shall obtain any rights to retirement, health care or any other benefits which may otherwise accrue to City's employees. Contractor expressly waives any claim Contractor may have to any such rights.

4.4 Contract Officer.

The Contract Officer shall be such person as may be designated by the City Manager. It shall be the Contractor's responsibility to assure that the Contract Officer is kept informed of the progress of the performance of the Services and the Contractor shall refer any decisions which must be made by City to the Contract Officer. Unless otherwise specified herein, any approval of City required hereunder shall mean the approval of the Contract Officer. The Contract Officer shall have authority, if specified in writing by the City Manager, to sign all documents on behalf of the City required hereunder to carry out the terms of this Agreement.

4.5 Independent Contractor.

Neither the City nor any of its employees shall have any control over the manner, mode or means by which Contractor, its agents or employees, perform the Services required herein, except as otherwise set forth herein. City shall have no voice in the selection, discharge, supervision or control of Contractor's employees, servants, representatives or agents, or in fixing their number, compensation or hours of service. Contractor shall perform all Services required herein as an independent contractor of City and shall remain at all times as to City a wholly independent contractor with only such obligations as are consistent with that role. Contractor shall not at any time or in any manner represent that it or any of its agents or employees are agents or employees of City. City shall not in any way or for any purpose become or be deemed to be a partner of Contractor in its business or otherwise or a joint venturer or a member of any joint enterprise with Contractor.

4.6 Prohibition Against Subcontracting or Assignment.

The experience, knowledge, capability and reputation of Contractor, its principals and employees were a substantial inducement for the City to enter into this Agreement. Therefore, Contractor shall not contract with any other entity to perform in whole or in part the Services required hereunder without the express written approval of the City. In addition, neither this Agreement nor any interest herein may be transferred, assigned, conveyed, hypothecated or encumbered voluntarily or by operation of law, whether for the benefit of creditors or otherwise, without the prior written approval of City. Transfers restricted hereunder shall include the transfer to any person or group of persons acting in concert of more than twenty-five percent (25%) of the present ownership and/or control of Contractor, taking all transfers into account on a cumulative basis. In the event of any such unapproved transfer, including any bankruptcy proceeding, this Agreement shall be void. No approved transfer shall release the Contractor or any surety of Contractor of any liability hereunder without the express consent of City.

ARTICLE 5. INSURANCE, INDEMNIFICATION AND BONDS

5.1 Insurance Coverages.

Throughout the life of this Agreement, Contractor shall pay for and maintain in full force and effect all policies of insurance required hereunder with an insurance company(ies) that meet the standards specified in Section 5.5. The following policies of insurance are required:

(i) COMMERCIAL GENERAL LIABILITY insurance which shall be at least as broad as the most current version of Insurance Services Office (ISO) Commercial General Liability Coverage Form CG 00 01 and include insurance for "bodily injury," "property damage" and "personal and advertising injury" with coverage for premises and operations (including the use of owned and non-owned equipment), products and completed operations, and contractual liability (including, without limitation, indemnity obligations under the Contract) with limits of liability of not less than the following:

$1,000,000 per occurrence for bodily injury and property damage

$1,000,000 per occurrence for personal and advertising injury

$2,000,000 aggregate for products and completed operations

$2,000,000 general aggregate

(ii) COMMERCIAL AUTOMOBILE LIABILITY insurance which shall be at least as broad as the most current version of Insurance Service Office (ISO) Business Auto Coverage Form CA 00 01, and include coverage for all owned, hired, and non-owned automobiles or other licensed vehicles (Code 1 Any Auto) with limits of liability of not less than $5,000,000 per accident for bodily injury and property damage.

(iii) WORKERS' COMPENSATION insurance as required under the California Labor Code.

(iv) EMPLOYERS' LIABILITY insurance with limits of liability of not less than $1,000,000 each accident, $1,000,000 disease policy limit and $1,000,000 disease each employee.

(v) POLLUTION LIABILITY Contractors' Pollution Legal Liability and/or Asbestos Legal Liability and/or Errors and Omissions (if project involves environmental hazards) with limits no less than $1,000,000 per occurrence or claim, and $2,000,000 policy aggregate.

In the event Contractor purchases an Umbrella or Excess insurance policy(ies) to meet the minimum limits of insurance set forth above, this insurance policy(ies) shall "follow form" and afford no less coverage than the primary insurance policy(ies).

If this Agreement continues for more than three (3) years duration, or in the event the City Manager or his/her designee determines that the work or Services to be performed under this Agreement creates an increased or decreased risk of loss to the City, the Contractor agrees that the minimum limits of the insurance policies may be changed accordingly upon receipt of written notice from the City Manager, or his/her designee.

Contractor shall be responsible for payment of any deductibles contained in any insurance policies required hereunder and Contractor shall also be responsible for payment of any self-insured retentions.

Any deductibles or self-insured retentions must be declared to, and approved by, the City Manager or his/her designee. At the option of the City Manager or his/her designee, either: (i) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects to City, its Council members, officers, officials, employees and agents; or (ii) Contractor shall provide a financial

guarantee, satisfactory to the City Manager or his/her designee, guaranteeing payment of losses and related investigations, claim administration and defense expenses. At no time shall the City be responsible for the payment of any deductibles or self-insured retentions.

5.2 General Requirements.

All policies of insurance required hereunder shall be endorsed to provide that the coverage shall not be cancelled, non-renewed, reduced in coverage or in limits except after 30 calendar day written notice has been given to City. Upon issuance by the insurer, broker, or agent of a notice of cancellation, non-renewal, or reduction in coverage or in limits, Contractor shall furnish City with a new certificate and applicable endorsements for such policy(ies). In the event any policy is due to expire during the work to be performed for City, Contractor shall provide a new certificate, and applicable endorsements, evidencing renewal of such policy not less than 15 calendar days prior to the expiration date of the expiring policy.

The General Liability and Automobile Liability insurance policies shall be written on an occurrence form. The General Liability (including ongoing and completed operations) and Automobile Liability shall name City and its officers, officials, employees, agents and volunteers as an additional insured. Such policy(ies) of insurance shall be endorsed so Contractor's insurance shall be primary and no contribution shall be required of City. The coverage shall contain no special limitations on the scope of protection afforded to the City and its officers, officials, employees, agents and volunteers. The Workers' Compensation insurance policy shall contain a waiver of subrogation as to City and its officers, officials, employees, agents and volunteers. Should Contractor maintain insurance with broader coverage and/or limits of liability greater than those shown above, City requires and shall be entitled to the broader coverage and/or the higher limits of liability maintained by Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to City.

If the Professional Liability (Errors and Omissions) insurance policy is written on a claims-made form:

1. The retroactive date must be shown, and must be before the effective date of the Agreement or the commencement of work by Contractor.

2. Insurance must be maintained and evidence of insurance must be provided for at least three years after any expiration or termination of the Agreement or, in the alternative, the policy shall be endorsed to provide not less than a three-year discovery period.

3. If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the effective date of the Agreement or the commencement of work by Contractor, Contractor must purchase extended reporting coverage for a minimum of three years following the expiration or termination of the Agreement.

4. A copy of the claims reporting requirements must be submitted to City for review.

5. These requirements shall survive expiration or termination of the Agreement.

Contractor shall furnish City with all certificate(s) and applicable endorsements effecting coverage required hereunder. All certificates and applicable endorsements are to be received and approved by the City Manager or his/her designee prior to City's execution of the Agreement and before work commences.

If at any time during the life of this Agreement or any extension, Contractor or any of its subcontractors fail to maintain any required insurance in full force and effect, all work under this Agreement shall be discontinued immediately, and all payments due or that become due to Contractor shall be withheld until notice is received by City that the required insurance has been restored to full force and effect and that the premiums therefore have been paid for a period satisfactory to City. Any failure to maintain the required insurance shall be sufficient cause for City to terminate this Agreement. No action taken by City hereunder shall in any way relieve Contractor of its responsibilities under this Agreement.

Upon request of City, Contractor shall immediately furnish City with a complete copy of any insurance policy required under this Agreement, including all endorsements, with said copy certified by the underwriter to be a true and correct copy of the original policy. This requirement shall survive expiration or termination of this Agreement.

The fact that insurance is obtained by Contractor shall not be deemed to release or diminish the liability of Contractor, including, without limitation, liability under the indemnity provisions of this Agreement. The duty to indemnify City and its officers, officials, employees, agents and volunteers shall apply to all claims and liability regardless of whether any insurance policies are applicable. The policy limits do not act as a limitation upon the amount of indemnification to be provided by Contractor. Approval or purchase of any insurance contracts or policies shall in no way relieve from liability nor limit the liability of Contractor, its principals, officers, employees, agents, persons under the supervision of Contractor, vendors, suppliers, invitees, subcontractors, or anyone employed directly or indirectly by any of them.

If Contractor should subcontract all or any portion of the Services to be performed under this Agreement, Contractor shall require each subcontractor to provide insurance protection in favor of City and its officers, officials, employees, agents and volunteers in accordance with the terms of each of the preceding paragraphs, except that the subcontractors' certificates and endorsements shall be on file with Contractor and City prior to the commencement of any work by the subcontractor.

5.3 Indemnification, Hold Harmless, and Duty to Defend.

A. Indemnities.

1) To the fullest extent permitted by law, Contractor shall, at its sole cost and expense, defend, hold harmless and indemnify City and its elected officials, officers, attorneys, agents, employees, designated volunteers, successors, assigns and those City agents serving as independent contractors in the role of City officials (collectively "Indemnitees"), from and against any and all damages, costs, expenses, liabilities, claims, demands, causes of action, proceedings, expenses, judgments, penalties, liens, and losses of any nature whatsoever, including fees of accountants, attorneys, or other professionals and all costs associated therewith and the payment of all consequential damages (collectively "Liabilities"), in law or equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Contractor, its officers, agents, servants, employees, subcontractors, materialmen, Contractors or their officers, agents, servants or employees (or any entity or individual that Contractor shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties. Contractor shall defend the Indemnitees in any action or actions filed in connection with any Liabilities with counsel of the Indemnitees' choice, and shall pay all costs

and expenses, including all attorneys' fees and experts' costs actually incurred in connection with such defense. Contractor shall reimburse the Indemnitees for any and all legal expenses and costs incurred by Indemnitees in connection therewith.

2) Contractor shall pay all required taxes on amounts paid to Contractor under this Agreement, and indemnify and hold City harmless from any and all taxes, assessments, penalties, and interest asserted against City by reason of the independent contractor relationship created by this Agreement. Contractor shall fully comply with the workers' compensation law regarding Contractor and Contractor's employees. Contractor shall indemnify and hold City harmless from any failure of Contractor to comply with applicable workers' compensation laws. City may offset against the amount of any fees due to Contractor under this Agreement any amount due to City from Contractor as a result of Contractor's failure to promptly pay to City any reimbursement or indemnification arising under this subparagraph A.2).

3) Contractor shall obtain executed indemnity agreements with provisions identical to those in this Section from each and every subcontractor or any other person or entity involved by, for, with or on behalf of Contractor in the performance of this Agreement. If Contractor fails to obtain such indemnity obligations, Contractor shall be fully responsible and indemnify, hold harmless and defend the Indemnitees from and against any and all Liabilities at law or in equity, whether actual, alleged or threatened, which arise out of, are claimed to arise out of, pertain to, or relate to the acts or omissions of Contractor's subcontractor, its officers, agents, servants, employees, subcontractors, materialmen, Contractors or their officers, agents, servants or employees (or any entity or individual that Contractor's subcontractor shall bear the legal liability thereof) in the performance of this Agreement, including the Indemnitees' active or passive negligence, except for Liabilities arising from the sole negligence or willful misconduct of the Indemnitees as determined by court decision or by the agreement of the Parties.

B. Workers' Compensation Acts not Limiting. Contractor's indemnifications and obligations under this Section, or any other provision of this Agreement, shall not be limited by the provisions of any workers' compensation act or similar act. Contractor expressly waives its statutory immunity under such statutes or laws as to City, its officers, agents, employees and volunteers.

C. Insurance Requirements not Limiting. City does not, and shall not, waive any rights that it may possess against Contractor because of the acceptance by City, or the deposit with City, of any insurance policy or certificate required pursuant to this Agreement. The indemnities in this Section shall apply regardless of whether or not any insurance policies are determined to be applicable to the Liabilities, tax, assessment, penalty or interest asserted against City.

D. Survival of Terms. Contractor's indemnifications and obligations under this Section shall survive the expiration or termination of this Agreement.

5.4 Performance Bond.

Concurrently with execution of this Agreement, and if required in Exhibit "B", Contractor shall deliver to City performance bond in the sum of the amount of the Contract Sum, in the form provided by the City Clerk, which secures the faithful performance of this Agreement. The bond shall contain the original notarized signature of an authorized officer of the surety and affixed thereto shall be a certified and current copy of his power of attorney. The bond shall be unconditional and remain in force during the entire term of the Agreement and shall be null and

void only if the Contractor promptly and faithfully performs all terms and conditions of this Agreement.

5.5 Sufficiency of Insurer or Surety.

Insurance or bonds required by this Agreement shall be satisfactory only if issued by companies qualified to do business in California, rated "A" or better in the most recent edition of Best Rating Guide, The Key Rating Guide or in the Federal Register, and only if they are of a financial category Class VII or better, unless such requirements are waived by the Risk Manager of the City ("Risk Manager") due to unique circumstances. If this Agreement continues for more than three (3) years duration, or in the event the Risk Manager determines that the work or Services to be performed under this Agreement creates an increased or decreased risk of loss to the City, the Contractor agrees that the minimum limits of the insurance policies and the performance bond required by Section 5.4 may be changed accordingly upon receipt of written notice from the Risk Manager; provided that the Contractor shall have the right to appeal a determination of increased coverage by the Risk Manager to the City Council of City within ten (10) days of receipt of notice from the Risk Manager.

ARTICLE 6. RECORDS, REPORTS, AND RELEASE OF INFORMATION

6.1 Records.

Contractor shall keep, and require subcontractors to keep, such ledgers, books of accounts, invoices, vouchers, canceled checks, reports, studies or other documents relating to the disbursements charged to City and Services performed hereunder (the "Books and Records"), as shall be necessary to perform the Services required by this Agreement and enable the Contract Officer to evaluate the performance of such Services. Any and all such Books and Records shall be maintained in accordance with generally accepted accounting principles and shall be complete and detailed. The Contract Officer shall have full and free access to such Books and Records at all times during normal business hours of City, including the right to inspect, copy, audit and make records and transcripts from such Books and Records. Such Books and Records shall be maintained for a period of 3 years following completion of the Services hereunder, and the City shall have access to such Books and Records in the event any audit is required. In the event of dissolution of Contractor's business, custody of the Books and Records may be given to City, and access shall be provided by Contractor's successor in interest.

6.2 Reports.

Contractor shall periodically prepare and submit to the Contract Officer such reports concerning the performance of the Services required by this Agreement as the Contract Officer shall require. Contractor hereby acknowledges that the City is greatly concerned about the cost of Work and Services to be performed pursuant to this Agreement. For this reason, Contractor agrees that if Contractor becomes aware of any facts, circumstances, techniques, or events that may or will materially increase or decrease the cost of the Work or Services contemplated herein or, if Contractor is providing Design Services, the cost of the project being designed, Contractor shall promptly notify the Contract Officer of said fact, circumstance, technique or event and the estimated increased or decreased cost related thereto and, if Contractor is providing design Services, the estimated increased or decreased cost estimate for the project being designed.

6.3 Ownership of Documents.

All drawings, specifications, maps, designs, photographs, studies, surveys, data, notes, computer files, reports, records, documents and other materials (the "Documents and Materials") prepared by Contractor, its employees, subcontractors and agents in the performance of this Agreement shall be the property of City and shall be delivered to City upon request of the Contract Officer or upon the termination of this Agreement, and Contractor shall have no claim for further employment or additional compensation as a result of the exercise by City of its full rights of ownership use, reuse, or assignment of the Documents and Materials hereunder. Any use, reuse or assignment of such completed Documents and Materials for other projects and/or use of uncompleted Documents and Materials without specific written authorization by the Contractor will be at the City's sole risk and without liability to Contractor, and Contractor's guarantee and warranties shall not extend to such use, revise or assignment. Contractor may retain copies of such Documents and Materials for its own use. Contractor shall have an unrestricted right to use the concepts embodied therein. All subcontractors shall provide for assignment to City of any Documents and Materials prepared by them, and in the event Contractor fails to secure such assignment, Contractor shall indemnify City for all damages resulting therefrom.

6.4 Confidentiality and Release of Information.

(a) All information gained or Work product produced by Contractor in performance of this Agreement shall be considered confidential, unless such information is in the public domain or already known to Contractor. Contractor shall not release or disclose any such information or Work product to persons or entities other than City without prior written authorization from the Contract Officer.

(b) Contractor, its officers, employees, agents or subcontractors, shall not, without prior written authorization from the Contract Officer or unless requested by the City Attorney, voluntarily provide documents, declarations, letters of support, testimony at depositions, response to interrogatories or other information concerning the Work performed under this Agreement. Response to a subpoena or court order shall not be considered "voluntary" provided Contractor gives City notice of such court order or subpoena.

(c) If Contractor, or any officer, employee, agent or subcontractor of Contractor, provides any information or Work product in violation of this Agreement, then City shall have the right to reimbursement and indemnity from Contractor for any damages, costs and fees, including attorney's fees, caused by or incurred as a result of Contractor's conduct.

(d) Contractor shall promptly notify City should Contractor, its officers, employees, agents or subcontractors be served with any summons, complaint, subpoena, notice of deposition, request for documents, interrogatories, request for admissions or other discovery request, court order or subpoena from any Party regarding this Agreement and the Work performed there under. City retains the right, but has no obligation, to represent Contractor or be present at any deposition, hearing or similar proceeding. Contractor agrees to cooperate fully with City and to provide City with the opportunity to review any response to discovery requests provided by Contractor. However, this right to review any such response does not imply or mean the right by City to control, direct, or rewrite said response.

ARTICLE 7. ENFORCEMENT OF AGREEMENT AND TERMINATION

7.1 California Law.

This Agreement shall be interpreted, construed and governed both as to validity and to performance of the Parties in accordance with the laws of the State of California. Legal actions concerning any dispute, claim or matter arising out of or in relation to this Agreement shall be instituted in the Superior Court of the County of Riverside, State of California, or any other appropriate court in such county, and Contractor covenants and agrees to submit to the personal jurisdiction of such court in the event of such action. In the event of litigation in a U.S. District Court, venue shall lie exclusively in the Central District of California, in Riverside.

7.2 Disputes; Default.

In the event that Contractor is in default under the terms of this Agreement, the City shall not have any obligation or duty to continue compensating Contractor for any Work performed after the date of default. Instead, the City may give notice to Contractor of the default and the reasons for the default. The notice shall include the timeframe in which Contractor may cure the default. This timeframe is presumptively thirty (30) days, but may be extended, though not reduced, if circumstances warrant. During the period of time that Contractor is in default, the City shall hold all invoices and shall, when the default is cured, proceed with payment on the invoices. In the alternative, the City may, in its sole discretion, elect to pay some or all of the outstanding invoices during the period of default. If Contractor does not cure the default, the City may take necessary steps to terminate this Agreement under this Article. Any failure on the part of the City to give notice of the Contractor's default shall not be deemed to result in a waiver of the City's legal rights or any rights arising out of any provision of this Agreement.

7.3 Retention of Funds.

Contractor hereby authorizes City to deduct from any amount payable to Contractor (whether or not arising out of this Agreement) (i) any amounts the payment of which may be in dispute hereunder or which are necessary to compensate City for any losses, costs, liabilities, or damages suffered by City, and (ii) all amounts for which City may be liable to third parties, by reason of Contractor's acts or omissions in performing or failing to perform Contractor's obligation under this Agreement. In the event that any claim is made by a third party, the amount or validity of which is disputed by Contractor, or any indebtedness shall exist which shall appear to be the basis for a claim of lien, City may withhold from any payment due, without liability for interest because of such withholding, an amount sufficient to cover such claim. The failure of City to exercise such right to deduct or to withhold shall not, however, affect the obligations of the Contractor to insure, indemnify, and protect City as elsewhere provided herein.

7.4 Waiver.

Waiver by any Party to this Agreement of any term, condition, or covenant of this Agreement shall not constitute a waiver of any other term, condition, or covenant. Waiver by any Party of any breach of the provisions of this Agreement shall not constitute a waiver of any other provision or a waiver of any subsequent breach or violation of any provision of this Agreement. Acceptance by City of any Work or Services by Contractor shall not constitute a waiver of any of the provisions of this Agreement. No delay or omission in the exercise of any right or remedy by a non-defaulting Party on any default shall impair such right or remedy or be construed as a waiver.

Any waiver by either Party of any default must be in writing and shall not be a waiver of any other default concerning the same or any other provision of this Agreement.

7.5 Rights and Remedies are Cumulative.

Except with respect to rights and remedies expressly declared to be exclusive in this Agreement, the rights and remedies of the Parties are cumulative and the exercise by either Party of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different times, of any other rights or remedies for the same default or any other default by the other party.

7.6 Legal Action.

In addition to any other rights or remedies, either party may take legal action, in law or in equity, to cure, correct or remedy any default, to recover damages for any default, to compel specific performance of this Agreement, to obtain declaratory or injunctive relief, or to obtain any other remedy consistent with the purposes of this Agreement.

7.7 Liquidated Damages.

Since the determination of actual damages for any delay in performance of this Agreement would be extremely difficult or impractical to determine in the event of a breach of this Agreement, the Contractor and its sureties shall be liable for and shall pay to the City the sum of Not Applicable as liquidated damages for each working day of delay in the performance of any service required hereunder, as specified in the Schedule of Performance (Exhibit "D"). The City may withhold from any monies payable on account of Services performed by the Contractor any accrued liquidated damages.

7.8 Termination Prior to Expiration of Term.

This Section shall govern any termination of this Contract except as specifically provided in the following Section for termination for cause. The City reserves the right to terminate this Contract at any time, with or without cause, upon thirty (30) days' written notice to Contractor, except that where termination is due to the fault of the Contractor, the period of notice may be such shorter time as may be determined by the Contract Officer. In addition, the Contractor reserves the right to terminate this Contract at any time, with or without cause, upon sixty (60) days' written notice to City, except that where termination is due to the fault of the City, the period of notice may be such shorter time as the Contractor may determine. Upon receipt of any notice of termination, Contractor shall immediately cease all Services hereunder except such as may be specifically approved by the Contract Officer. Except where the Contractor has initiated termination, the Contractor shall be entitled to compensation for all Services rendered prior to the effective date of the notice of termination and for any Services authorized by the Contract Officer thereafter in accordance with the Schedule of Compensation or such as may be approved by the Contract Officer, except as provided in Section 7.3. In the event the Contractor has initiated termination, the Contractor shall be entitled to compensation only for the reasonable value of the Work product actually produced hereunder. In the event of termination without cause pursuant to this Section, the terminating Party need not provide the non-terminating Party with the opportunity to cure pursuant to Section 7.2.

7.9 Termination for Default of Contractor.

If termination is due to the failure of the Contractor to fulfill its obligations under this Agreement, City may, after compliance with the provisions of Section 7.2, take over the Work and prosecute the same to completion by contract or otherwise, and the Contractor shall be liable to the extent that the total cost for completion of the Services required hereunder exceeds the compensation herein stipulated (provided that the City shall use reasonable efforts to mitigate such damages), and City may withhold any payments to the Contractor for the purpose of set-off or partial payment of the amounts owed the City as previously stated.

7.10 Attorneys' Fees.

If either party to this Agreement is required to initiate or defend or made a party to any action or proceeding in any way connected with this Agreement, the prevailing party in such action or proceeding, in addition to any other relief which may be granted, whether legal or equitable, shall be entitled to reasonable attorney's fees. Attorney's fees shall include attorney's fees on any appeal, and in addition a party entitled to attorney's fees shall be entitled to all other reasonable costs for investigating such action, taking depositions and discovery and all other necessary costs the court allows which are incurred in such litigation. All such fees shall be deemed to have accrued on commencement of such action and shall be enforceable whether or not such action is prosecuted to judgment.

ARTICLE 8. CITY OFFICERS AND EMPLOYEES: NON-DISCRIMINATION

8.1 Non-liability of City Officers and Employees.

No officer or employee of the City shall be personally liable to the Contractor, or any successor in interest, in the event of any default or breach by the City or for any amount which may become due to the Contractor or to its successor, or for breach of any obligation of the terms of this Agreement.

8.2 Conflict of Interest.

Contractor covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, which would conflict in any manner with the interests of City or which would in any way hinder Contractor's performance of Services under this Agreement. Contractor further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or subcontractor without the express written consent of the Contract Officer. Contractor agrees to at all times avoid conflicts of interest or the appearance of any conflicts of interest with the interests of City in the performance of this Agreement.

No officer or employee of the City shall have any financial interest, direct or indirect, in this Agreement nor shall any such officer or employee participate in any decision relating to the Agreement which effects his financial interest or the financial interest of any corporation, partnership or association in which he is, directly or indirectly, interested, in violation of any State statute or regulation. The Contractor warrants that it has not paid or given and will not pay or give any third party any money or other consideration for obtaining this Agreement.

8.3 Covenant Against Discrimination.

Contractor covenants that, by and for itself, its heirs, executors, assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, marital status, national origin, or ancestry in the performance of this Agreement. Contractor shall take affirmative action to insure that applicants are employed and that employees are treated during employment without regard to their race, color, creed, religion, sex, marital status, national origin, or ancestry.

8.4 Unauthorized Aliens.

Contractor hereby promises and agrees to comply with all of the provisions of the Federal Immigration and Nationality Act, 8 U.S.C.A. §§ 1101, et seq., as amended, and in connection therewith, shall not employ unauthorized aliens as defined therein. Should Contractor so employ such unauthorized aliens for the performance of Work and/or Services covered by this Agreement, and should the any liability or sanctions be imposed against City for such use of unauthorized aliens, Contractor hereby agrees to and shall reimburse City for the cost of all such liabilities or sanctions imposed, together with any and all costs, including attorneys' fees, incurred by City.

ARTICLE 9. MISCELLANEOUS PROVISIONS

9.1 Notices.

Any notice, demand, request, document, consent, approval, or communication that either Party desires or is required to give to the other Party or any other person shall be in writing and either served personally or sent by prepaid, first-class mail, in the case of the City, to the City Manager and to the attention of the Contract Officer, CITY OF BANNING, 99 East Ramsey Street, Banning, CA 92220 and in the case of the Contractor, to the person at the address designated on the execution page of this Agreement. Either Party may change its address by notifying the other Party of the change of address in writing. Notice shall be deemed communicated at the time personally delivered or in seventy-two (72) hours from the time of mailing if mailed as provided in this Section.

9.2 Interpretation.

The terms of this Agreement shall be construed in accordance with the meaning of the language used and shall not be construed for or against either Party by reason of the authorship of this Agreement or any other rule of construction which might otherwise apply.

9.3 Counterparts.

This Agreement may be executed in counterparts, each of which shall be deemed to be an original, and such counterparts shall constitute one and the same instrument.

9.4 Integration; Amendment.

This Agreement including the attachments hereto is the entire, complete and exclusive expression of the understanding of the Parties. It is understood that there are no oral agreements between the Parties hereto affecting this Agreement and this Agreement supersedes and cancels any and all previous negotiations, arrangements, agreements and understandings, if any, between the Parties, and none shall be used to interpret this Agreement. No amendment to or modification of this Agreement shall be valid unless made in writing and approved by the Contractor and by the

City Council. The parties agree that this requirement for written modifications cannot be waived and that any attempted waiver shall be void.

9.5 Severability.

In the event that any one or more of the phrases, sentences, clauses, paragraphs, or sections contained in this Agreement shall be declared invalid or unenforceable by a valid judgment or decree of a court of competent jurisdiction, such invalidity or unenforceability shall not affect any of the remaining phrases, sentences, clauses, paragraphs, or sections of this Agreement which are hereby declared as severable and shall be interpreted to carry out the intent of the Parties hereunder unless the invalid provision is so material that its invalidity deprives either Party of the basic benefit of their bargain or renders this Agreement meaningless.

9.6 Corporate Authority.

The persons executing this Agreement on behalf of the Parties hereto warrant that (i) such Party is duly organized and existing, (ii) they are duly authorized to execute and deliver this Agreement on behalf of said Party, (iii) by so executing this Agreement, such Party is formally bound to the provisions of this Agreement, and (iv) the entering into this Agreement does not violate any provision of any other Agreement to which said Party is bound. This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the Parties.

9.7 Electronic Signatures.

Each Party may adopt as its signature an electronic identification consisting of a symbol or code that is affixed to or contained in each document transmitted by such Party ("electronic signature"). The Parties hereto herby agree that electronic signatures are acceptable, shall have the same force and effect under the law as original wet signatures, and shall be sufficient to verify that the Parties have executed this Agreement and such other documents transmitted by the Parties.

[SIGNATURES ON FOLLOWING PAGE]

IN WITNESS WHEREOF the Parties hereto have executed this Agreement the day and year first hereinabove written.

EXHIBIT "A"
SCOPE OF SERVICES

I. Contractor will perform the following Services:

As specified in Scope of Work from IFB , Exhibit "A-1".

Scope of Work

GENERAL

The City of Banning wishes to contract with a responsible vendor to furnish and deliver bulk fuel for unleaded gasoline and diesel in accordance with the specifications outlined below.

All fuels shall meet current California Air Resource Board (CARB) applicable regulations as well as any other applicable Federal, State or other regulations.

The materials to be furnished under this proposal shall be delivered at such time and in such quantities as called for by the City of Banning.

The City of Banning reserves the right to add or delete locations for fuel delivery during the contract term.

These annual volumes are estimates only. The City shall not be penalized for purchasing more or less than the estimated volume.

The City will not agree to any minimum purchase requirements.

DELIVERY LOCATION / ESTIMATED QUANTITIES

Corporate Yard – 176 E. Lincoln St. Banning, CA 92220

One 10,000 gallon Clear Diesel Tank

Annual estimated volume: 12,000 gallons

Average delivery: 900 - 1200 gallons

Requires 3-4 week deliveries to keep tank at desired levels.

Scheduling shall be coordinated with the Fleet Department at this location.

One 10,000 gallon Unleaded Tank

Annual estimated volume: 100,000 gallons

Average delivery: 7,500 gallons

Requires 3-4 week deliveries to keep tank at desired levels.

Scheduling shall be coordinated with the Fleet Department at this location.

DELIVERY

Upon delivery of fuel to the location, drivers shall be required to "stick" the tank to ensure adequate storage capacity to accept the entire shipment without spillage and the readings will be recorded on the delivery receipts. The company shall be responsible for all spillage that may occur during transit, loading or unloading. Clean up shall be performed in accordance with EPA and State of California guidelines and requirements. Failure to do so will initiate corrective action and charge back to the vendor of any cost incurred. Prior to the first delivery, the company will submit a fuel spill clean-up plan for approval by the City.

Deliveries shall be made within 24 hours after order is placed unless otherwise specified by the ordering agency. The company shall respond to the City emails or calls within 48 hours.

The delivery truck shall establish a safety zone while making fuel delivery to prevent pedestrian or vehicle traffic from coming in contact with the delivery truck and hoses. Safety zone should be established using safety cones, barriers, caution tape and/or signage.

SUPPLY REQUIREMENTS

The Contractor shall have gasoline and diesel fuel supply contracts which shall assure the continuous supply of product during the contract period. Bidders may be required to furnish information supporting their ability to supply, without major interruption, the products covered in this bid

The Contractor shall have a reliable source of supply such as a major refiner to assure a continuous supply. However, it shall be thecontractor’ss responsibility to manage purchases from all sources so as not to jeopardize the ability to purchase fuel for the City in periods of tight supply.

In the event that federal, state or local regulations require fuel allocations or rationing at any time during the contract term, the vendor shall assign first priority to City's requirements or assign as prescribed by any federal, state, or local allocation program in effect.

Diesel Alternate As an alternate to the above #2 Diesel – Clear, Ultra-Low Sulfur, the City reserves the right to consider Renewable Diesel in lieu of conventional diesel and biodiesel fuels.

REPORTING

Upon request by the City, Company shall provide quarterly usage reports detailing the fuel type, quantity and date of each delivery (by location) and the cost per gallon. The cost per gallon shall be the net price the City was charged, including applicable taxes. Report shall also provide the total gallons purchased for each fuel type.

The City will verify the accuracy of delivered gallons by using one of the two internal automatic tank gauge measuring systems, Veede3r Root or Incon. The City reading will be compared to the Bill of Lading (BIL) quantity. If the reading is more than 200 gallons different, the delivery will be paid based on the City's system NET reading. In such cases, the City will email the reading receipt to the Company within ten (10) business days.

II. To the extent a project proposal consists of multiple subtasks, within the budgeted amounts for each subtask, and with the approval of the Contract Officer, funds may be shifted from one subtask sub-budget to another so long as the project budget is not exceeded per Section 2.1, unless additional services are approved per Section 2.3.

III. For each project assignment the City will compensate Contractor for the Services performed upon submission of a valid invoice. Each invoice is to include:

A. Line items for all personnel describing the Work performed, the number of hours worked, and the hourly rate.

B. Line items for all materials and equipment properly charged to the Services.

C. Line items for all other approved reimbursable expenses claimed, with supporting documentation.

D. Line items for all approved subcontractor labor, supplies, equipment, materials, and travel properly charged to the Services.

EXHIBIT "D"
SCHEDULE OF PERFORMANCE

I. The Contract Officer may approve extensions for performance of the Services in accordance with Section 3.5.

II. All work product is subject to review and acceptance by the City, and must be revised by the Contractor without additional charge to the City until found satisfactory and accepted by City.

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Lincoln Bogard, Administrative Services Director**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-125, Approving A Successor Memorandum of Understandings with the Teamsters Local 1932, Representing the Association of Mid-Management and Professional Employees, Effective July 1, 2022, through June 30, 2024, and Authorizing the City Manager to Finalize and Execute a Successor Agreement**

RECOMMENDATION:

Adopt Resolution. 2024-125.

BACKGROUND:

The City Council has previously approved a Tentative Agreement (TA) with Teamsters Local 1932 for the bargaining period of July 1, 2022, through June 30, 2024. That TA included language for a reopener to address two additional issues that needed additional legal research. The Council approved a TA with the group for those reopener items on June 11, 2024, and the union has since ratified via membership vote.

The TA with Teamsters Local 1932 representing the Teamsters Association of Managers Unit was accepted by City Council via Resolution 2023-059 in open session of City Council on March 28, 2023. That TA contained language for a reopener to address leave payouts and city funded healthcare options. The Teamsters Unit met and ratified that successor Tentative Agreement and now the Council is requested to accept the resulting Memorandum of Understanding (MOU).

JUSTIFICATION:

The City Council must ratify the MOUs for execution by the City Manager.

FISCAL IMPACT:

The fiscal impact was discussed with City Council in closed session and the original TA fiscal impact was discussed at the time of that approval.

ALTERNATIVES:

Do not adopt Resolution 2024-125 and provide staff alternate direction.

ATTACHMENTS:

1. Resolution 2024-125, MOU Teamsters.docx
2. 7.2.24 FINAL Teamsters MOU 2022-2024 (Clean).pdf

RESOLUTION 2024-125

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, APPROVING A SUCCESSOR MEMORANDUM OF UNDERSTANDING WITH THE TEAMSTERS LOCAL 1932 REPRESENTING THE ASSOCIATION OF MID-MANAGEMENT AND PROFESSIONAL EMPLOYEES, EFFECTIVE JULY 1, 2022, THROUGH JUNE 30, 2024, AND AUTHORIZING THE CITY MANAGER TO FINALIZE AND EXECUTE A SUCCESSOR AGREEMENT

WHEREAS, the City of Banning ("City") has formally recognized the Teamsters Local 1932 ("Teamsters') as the exclusive employee organization for the Association of Mid-Management and Professional Employees bargaining unit; and

WHEREAS, the prior Memorandum of Understanding ("MOU") between the City and the Teamsters expired on June 30, 2022; and

WHEREAS, the City labor representatives and Teamsters representatives have successfully met, conferred and signed a Tentative Agreement on the deal points for a successor MOU for the period of July 1, 2022 through June 30, 2024 pursuant to the Meyers-Milias-Brown Act (MMBA) (Gov't code Sections 3500-3511) and the City's Employer-Employee Relations Resolution 2010-45; and

WHEREAS, MMBA Section 3505.1 provides that: "If a tentative agreement is reached by the authorized representatives of the public agency and a recognized employee organization or recognized employee organizations, the governing body shall vote to accept or reject the tentative agreement within 30 days of the date it is first considered at a duly noticed public meeting. A decision by the governing body to reject the tentative agreement shall not bar the filing of a charge of unfair practice for failure to meet and confer in good faith. If the governing body adopts the tentative agreement, the parties shall jointly prepare a written memorandum of understanding"; and

WHEREAS, the Teamsters membership has ratified the Tentative Agreement for a successor MOU, where once approved by the governing body and the resulting final MOU is signed by the City Manager and Teamsters representatives becomes a binding agreement.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Banning as follows:

SECTION 1. The City Council hereby approves the Successor MOU between the City and Teamsters (Local 1932) representing the Association of Mid-Management and Professional Employees bargaining unit, for the period of July 1, 2022 through June 30, 2024.

SECTION 2. The City Council hereby authorizes and directs the City Manager or designee to finalize and execute the Successor MOU, based on the approved Tentative Agreements, on behalf of the City of Banning.

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

Alberto Sanchez, Mayor
City of Banning

ATTEST:

Caroline Patton, Administrative City Clerk
City of Banning

ARTICLE 1 – PREAMBLE

1.1 - Parties. This Memorandum of Understanding (hereinafter "MOU") is entered into between The City of Banning, a municipal corporation (hereinafter "City") and Teamsters Local 1932 (hereinafter "Union"), a California nonprofit mutual benefit corporation and the recognized employee organization for the mid-management and professional unit of representation (the "Unit"), relative to wages, hours, and other terms and conditions of employment as provided by Sections 3500-3510 of the California Government Code, otherwise known as the Meyers-Milias-Brown Act.

1.2 - Employee Organization Recognition. The City continues to formally recognize the Union as the Exclusive Recognized Employee Organization representing employees in the Unit presently or hereafter employed by the City and eligible for inclusion in the Union. It is understood that this MOU shall constitute a bar to any petition or request for recognition of any unit which includes classifications of employees covered by this MOU or such petitions to represent such Unit members at any time during the initial term of this MOU. This provision shall not preclude employees from exercising their rights as may be provided by the Meyers-Milias-Brown Act or the Employer-Employee Relations Resolution of the City.

1.3 - MOU Term. Except as otherwise provided herein, this MOU between the City and the Teamsters relative to wages, hours, and other terms and conditions of employment shall be effective as of July 1, 2022 and shall remain in full force and effect until June 30, 2024 or until a successor MOU is adopted or impasse procedures are completed and the City Council approves unilateral implementation of its last, best and final offer, whichever occurs first.

1.4 - Unit Members. This MOU covers employees in the following classifications:

Administrative City Clerk	Grants Program Manager
Assistant Civil Engineer	Homeless Services Director
Associate Civil Engineer	Management Analyst
Associate Civil Engineer w/Certification	Planning Engineer
Assistant Planner	Principal Civil Engineer
Assistant Public Works Director/City Engineer	Power Resources & Revenue Administrator
Associate Electrical Engineer	Public Works Program Manager
Business Support Manager	Public Works Superintendent
Capital Improvement Projects Manager	Purchasing Manager
CORE Manager	Recreation Manager
Customer Service & Billing Manager	Risk Management Analyst
Customer Service Supervisor	Senior Civil Engineer
Development Service Manager (Building Official)	Senior Electrical Engineer
Economic Development Manager	Senior Planner
Electric Operations Manager	Streets/Parks Maintenance Manager
Electric Engineering Supervisor	Transit Manager
Fleet Manager	Water/Wastewater Superintendent

ARTICLE 2- CONTINUATION OF RULES & POLICIES

2.1 - Governing Law. Subject to the terms of this MOU, all City Ordinances, Policies, Resolutions, Rules and Regulations, including the Personnel Rules and Regulations of the City of Banning, the Employer-Employee Relations Resolution; and the Administrative Policies of the City of Banning, or successor rules, shall remain in effect during the course of this MOU.

2.2 - Meet and Confer. The Union and the City agree to meet and confer during the term of this MOU over the adoption or revision of City Ordinances, Resolutions, Policies, Rules, Regulations, Administrative and/or Personnel Policies regarding mandatory subjects of negotiation pursuant to the Meyers-Milias-Brown Act, including but not limited to updating the City's Personnel Rules and the City's Employer- Employee Relations Resolution.

2.3 - Departmental Policies. The Union recognizes the right of the City to adopt new or revised departmental rules and regulations which are not in conflict with this MOU and which are not regarding mandatory subjects of negotiation. In adopting such new or revised departmental rules and regulations, the City shall receive and consider input, if any, submitted by Unit members. The process of making such input shall not delay the timely implementation of such rule. Such input shall generally be solicited as follows:

The City shall provide a draft of the proposed change to the President of the Union or his/her designee. At the time of providing the draft, a time shall be set to meet and confer on the proposed change. Such date shall be no less than twenty-five (25) and no more than thirty-five (35) calendar days following date of presentation of the draft.

Within twenty (20) days following date of presentation, the Union shall provide copies of its comments to the Administrative Services Director/Deputy City Manager or his/her designee in writing. Failure to provide written comments within the twenty (20) day time period shall be deemed to be acceptance of the proposal as presented and termination of the requirement for further meet and confer.

If agreement is not reached on the proposal at the first meeting, a second meeting shall be held within fifteen (15) days thereafter. If an agreement is not reached at the second meeting as to a matter which is not a mandatory subject of meet and confer, the City may proceed with the adoption of the policy without further meetings.

The time limits set forth herein may be modified by the written agreement of the parties.

ARTICLE 3- EMPLOYEE RIGHTS

3.1 – Non-discrimination. The provisions of this MOU shall apply to all persons covered by this MOU without discrimination on account of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex (including pregnancy, childbirth and related medical conditions), age, sexual orientation, citizenship status or any other basis protected by applicable law, nor will there be any discrimination with respect to hiring,

retention or any condition of employment because of membership or activities on behalf of the Union.

3.2 - Union Membership. The Union will accept into membership all eligible persons of the bargaining unit without regard to race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex (including pregnancy, childbirth and related medical conditions), age, sexual orientation, citizenship status or any other basis protected by applicable law.

3.3 - Rights Granted by State and Federal Law. Except as otherwise provided in this MOU, Unit members shall have all rights which may be exercised in accordance with State law, and applicable ordinances, resolutions, rules and regulations. However, Unit members shall not have the right to file a grievance for violation of any such law, ordinance, or resolution, except as specifically set forth herein.

3.4 - Additional Employee Rights. Unit members shall also have:

The right to form, join, and participate in activities of employee organizations of their own choosing for the purpose of representation on all matters of employer-employee relations.

The right to refuse to join, or to participate in the activities of employee organizations.

The right to be free from interference, intimidation, restraint, coercion, discrimination, or reprisal by other employees, employee organizations, management or supervisors, as a result of their exercise of rights indicated in sections (a) and (b) above.

ARTICLE 4 - MANAGEMENT RIGHTS

4.1 - City Rights. The Union recognizes and agrees that the City and its representatives have the responsibility and the authority to manage and direct all operations and activities of the City including, but not limited to, the exclusive right to determine the mission of its constituent departments, commissions and boards and the processes and the materials to be employed; the right to subcontract any work or operation; to expand or diminish services; to determine the procedures and standards of selection for employment and promotion; determine classifications; direct its employees; take disciplinary action; relieve its employees of duty because of lack of work or for other legitimate reasons; maintain the efficiency of governmental operations; determine the methods, means and personnel by which government operations are to be conducted and to assign work to employees; take all necessary actions to carry out its mission in emergencies; and, exercise complete control and discretion over its organization and work performance technology.

4.2 - Duty to Bargain Effects. When the decision to make the change is non-negotiable, but the effects of the decision are negotiable, the duty to provide notice and an opportunity to bargain arises at the time the decision is made and prior to taking action to implement the decision.

ARTICLE 5- UNION DUES DEDUCTION

5.1 - Union is authorized to use payroll deductions for collecting employee organizational dues monthly.

5.2 - The employee's earnings must be regularly sufficient after other legal and required deductions are made to cover the amount of the dues deduction authorized. When an employee is in a non-pay status for an entire pay period, no withholding will be made to cover that pay period from future earnings.

5.3 - In the case of an employee who is in a non-pay status during only part of the pay period, and the salary is not sufficient to cover the full withholding, no deduction shall be made. In this connection, all other legal and required deductions have priority over Union dues.

5.4 - The Union shall have the sole and exclusive right to have membership dues and voluntary deductions deducted for employees covered under this Agreement, upon appropriate written authorization by such employees to the Union. Union shall advise the City in writing of the membership dues and voluntary deductions to be deducted for each member. Union shall notify the City in writing of any changes to employee deductions thirty (30) days prior to the effective date of such change. The Union shall, as soon as possible, notify the City in writing if any member of the bargaining unit revokes a membership dues and voluntary deduction authorization.

5.5 - Union shall notify the City in writing of any employee who hereinafter comes into the bargaining unit and who has provided appropriate written authorization to the Union. The City shall deduct the approved bi-weekly membership dues and voluntary deductions in the pay period following receiving written notification from the Union.

5.6 - Employees in these Units who are members of the Union may withdraw from the Union at any time by sending notice to the Union. Union shall immediately certify to the City to terminate dues and voluntary deductions for any such employees, consistent with applicable law. An employee's deduction authorization shall automatically be canceled if the employee leaves the employ of the City or is transferred out of the Unit.

5.7 - The aggregate amount of Union dues deductions by the City shall be transmitted monthly to the Union. The City shall provide the Union with a list each month indicating the dues deducted from the pay of any Unit member and those Unit members for whom no deduction was made pursuant to the provisions of Sections 5.2, 5.3, and 5.6.

5.8 - The Union shall indemnify, defend, and hold the City harmless against any claims made, and against any suit instituted, against the City arising from this Article, including on account of employee authorizations, revocations, deductions made, cancelled, or changed in reliance on the Union's representations regarding employee dues and voluntary deduction authorizations. In addition, the Union shall refund to the City any amounts paid to it in error upon presentation of supporting evidence.

ARTICLE 6- UNION REPRESENTATIVES

Three (3) Unit members selected by the Union may attend scheduled meetings with City management during regular hours without loss of pay, provided that such employees shall not leave their work station or assignment without first providing adequate notice to their supervisor. Additional employees who are not on duty may participate at no additional cost to the City. Such meetings shall be scheduled in a manner consistent with the City's operating requirements and work schedules. Nothing herein shall be deemed to preclude the scheduling of such meetings at hours other than such employee's regular working hours, in which event attendance shall be without pay.

ARTICLE 7 -BULLETIN BOARDS

7.1 - Authorized Postings. The City will furnish adequate bulletin board space where currently available. Only areas designated by the Human Resource Department may be used for posting notices. Bulletin boards may be used for the following notices:

a) Scheduled Union meetings, agenda and minutes. Information on Union elections and election results.
b) Information regarding Union special, credit association, recreational, and related bulletins.
c) Reports of official business of the Union including reports of committees or the board of directors.
d) MOU, pay scales, job announcements, promotion lists, etc.
e) Such other items as may be approved by the Human Resource Director upon request of the Union.

7.2 - Posted Notices. Posted notices shall not be defamatory or violate any of the City's policies, nor shall they advocate election or defeat of candidates for public office. All notices to be posted may be dated and signed by an authorized representative of the Union. The Union may give notices to Unit members through the use of the City mail system and/or the City computer e-mail system.

ARTICLE 8- MEMORANDUM OF UNDERSTANDING COPIES

After it has been executed by the parties, the City shall provide the Union with one (1) executed copy and one (1) electronic copy (PDF) of this MOU. Union shall be responsible for providing copies of this MOU to Unit members at Union's expense. City shall also provide a copy of the executed MOU to any Unit member hired or promoted into the Unit after the effective date of the MOU. The City may charge for any additional copies.

ARTICLE 9 – MEETINGS

9.1 - Items of Mutual Concern. Upon mutual agreement of both the City and the Union, the parties may meet to discuss items of mutual concern. A meeting conducted under this section shall not

constitute a meet and confer or hearing under any grievance procedure.

9.2 - Use of City Facilities. The Union may be granted permission to use City facilities for the purpose of meeting with employees to conduct its internal affairs provided space for such meetings can be made available without interfering with City needs. Permission to use facilities must be obtained by the Union from the Administrative Services Director/Deputy City Manager or his/her designee. The Union shall be held fully responsible for any damages to and security of any facility that is used by the Union.

9.3 - Budget Oversight Committee. The City agrees to the creation of a Budget Oversight Committee, with the Union entitled to appoint one (1) member. Said Committee shall have an equal number of members appointed by the City's recognized Employee Union and the City. Said Committee shall be advisory only to the City Manager. City shall determine the necessity of meetings.

9.4- Subcontracting Work. The City shall notify the Union President of its intention to subcontract work performed by employees covered by this MOU no later than the date bids are requested for said contract work. The Union may comment on the proposed subcontracting and may request a meeting under Article 9 to discuss it or if applicable may ask for a meet and confer on the effects.

ARTICLE 10 - HOURS OF WORK

The parties agree that the City has the right to return to its traditional five day work week eight hour work day (5/8) work schedule, maintain its current four day work week ten hour work day (4/10) work schedule, or implement a nine day every two work week eighty work week (9/80) work schedule for some or all Union represented employees as appropriate in the sole discretion of the City as determined by each Department Head and with City Manager approval. The City shall provide at least thirty calendar day notice of a change in work schedules. Union represented employees currently working alternative work schedules at the time of the Union's ratification of the deal points of this MOU who are required to return to working the traditional five day work week eight hour work day (5/8) work schedule shall receive an additional three percent (3%) base salary wage increase for the time period that they are required to work that particular traditional work schedule. The Union reserves the option to waive this thirty day notice period.

For Employees working a (9/80) work schedule, the work period shall begin four hours after the start time of his or her eight hour shift on the day that corresponds with the employee's alternating regular day off such that the employee works four, nine-hour shifts and one four hour shift each seven-day work period. Employees working a traditional five day eight hour per work day (5/8) work week schedule or four day ten hour per work day (4/10) work week schedule will continue to maintain a week ending time of 11:59 pm on Sundays.

ARTICLE 11 · SALARIES, PERFORMANCE EVALUATIONS, RETIREMENT BENEFITS, AND EDUCATION INCENTIVE

11.1 - Salary Survey & Salary classifications.

The City will fund a salary survey by a professional consultant, that will commence in October 2022 and will establish negotiations with Teamsters for the 2020-2024 MOU.

The Salary Survey shall include the Cities listed below for each manager in the specified Divisions. At the conclusion of the Salary Survey, the high and low salaries will be disregarded and the mean salary for each position shall be determined as the salary to base negotiations on. In the event salary survey results are implemented from another bargaining unit in the City, the Mid-Manager Bargaining unit salary survey results will be implemented within 30 days. Both parties have the option to request a meeting and confer regarding the process of implementation.

General	Electric Utility	Water Utility	Wastewater Utility
La Quinta	Anaheim	Anaheim	Riverside
Coachella	Riverside	Azusa	Redlands
Palm Springs	Colton	Colton	Colton
Colton	Azusa	Riverside	Ontario
Azusa	Southern	Eastern	Chino
Corona	California	Municipal	Coachella Valley
Riverside	Edison	Water District	Eastern
	Pasadena	Redlands	Municipal
	Burbank		Water District

Unit classifications are assigned to salary ranges, as set forth below in accordance with the City's adopted Salary Table. Employees will be able to progress through the salary range as set forth in section 11.2.

CLASSIFICATION	***GRADE***
Administrative City Clerk	T79
Assistant Civil Engineer	T68
Associate Civil Engineer	T79
Associate Civil Engineer w/Certification	T79
Assistant Planner	T68
Assistant Public Works Director/City Engineer	T100
Associate Electrical Engineer	T85
Business Support Manager	T90
Capital Improvement Projects Manager	T85
CORE Manager	T85
Customer Service & Billing Manager	T85
Customer Service Supervisor	T79
Development Service Manager (Building Official)	T84
Economic Development Manager	T85

Electric Operations Manager	T100
Electric Engineering Supervisor	T90
Fleet Manager	T85
Grants Program Manager	T73
Homeless Services Director	T73
Management Analyst	T73
Planning Engineer	T76
Principal Civil Engineer	N/A
Power Resources & Revenue Administrator	T100
Public Works Program Manager	T85
Public Works Superintendent	T85
Purchasing Manager	T85
Recreation Manager	T81
Risk Management Analyst	T64
Senior Civil Engineer	T86
Senior Electrical Engineer	N/A
Senior Planner	T81
Streets/Parks Maintenance Manager	T70
Transit Manager	T85
Water/Wastewater Superintendent	T90

The City and the Union agree to meet and confer regarding the job description and salary range for the classification of Principal Civil Engineer at such time as the City desires to fund a position in that classification. The City reserves the right to fill the position with the current incumbent in the classification of Career Part-Time Associate Civil Engineer, or with any other qualified applicant, whichever best meets its needs at that time.

Targeted equity adjustments – Implement PSPC 2022 Total Compensation survey recommendations for Teamsters classifications. See attached effective October 26, 2022.

11.2 - Salaries, Performance Evaluations, Probationary Period & Assignment to Ranges.

a. 3% base wage increase effective July 1, 2022 and paid out the first full pay period following City Council approval of the new MOU.
b. 3% base wage increase effective the first full pay period including July 1, 2023.

This increase is for all Unit members still employed at the time this MOU is adopted by City Council.

Ranges with defined steps are shown on the salary schedule provided herewith. The salary table is calibrated in approximate 2.5% increments. Annual increases for satisfactory performance will be a minimum of two (2) steps or approximately 5%. Department Heads will have the option of granting a higher salary increase based on exceptional performance with approval of the City Manager. Unit members will continue to be evaluated using the employee performance evaluation form.

Employee shall be granted a step increase upon receiving a satisfactory overall evaluation on the City approved employee evaluation form OR such step increase will be automatically implemented if employee's supervisor is thirty days late on giving such evaluation, retroactive to the due date of the evaluation.

A first denial of a step increase shall not be an allowable subject of the exercise of employee rights under the grievance procedure outlined herein.

An employee denied a step increase shall thereafter have monthly meetings to review his/her performance with his/her supervisor and shall have the City approved employee evaluation form completed no later than six (6) months after the date of the performance evaluation which led to the denial of the step increase. If the employee's overall performance is rated satisfactory, then the employee shall be granted the appropriate step increase effective the first pay period following the six-month re-evaluation period. Such step increase shall not be retroactive.

If the employee's performance continues to be unsatisfactory after the six month re-evaluation period, the employee shall be given a final denial of step increase for the remainder of the regular evaluation period. After this final denial the monthly meetings to review his/her performance with his/her supervisor shall continue until the employee's next annual review. Denial of a step increase under this subsection shall be subject to review by an Evaluation Review Committee. The Evaluation Review Committee shall be comprised of the Employee Relations Officer, a non-evaluating Department Head selected by the employee, and an Union business representative. The Evaluation Review Committee shall make any adjustment to the evaluation that it deems justified by majority vote and its decision shall be final with no other right of appeal or grievance on the matter.

An employee at the top of his or her range shall have his or her performance evaluated at least annually within thirty (30) days of her/her anniversary date.

11.3 - Probationary Period. Employee will pass probation at the end of the one year probation period upon satisfactory performance evaluation, or shall pass probation if employee's supervisor does not provide the performance evaluation by the due date of such. The probationary period for promotions will remain at six (6) months.

Probation Extension on an employees' initial probation can be extended if necessary, for a period not to exceed six (6) months. If extended, such action must be extended during initial probation period. Any extended period of absence from duty four continuous weeks (2 pay periods) or more for any reason except scheduled vacation, will automatically cause a probation period to be extended equal to the period of absence.

The City agrees that as soon as practicable, job specifications will be reviewed to determine any necessary changes in minimum education requirements.

11.4 - California Public Employees Retirement System ("CalPERS") Formulas.

All Unit members hired prior to December 11, 2012 will remain eligible to receive the CalPERS retirement plan known as "two and one-half at fifty- five" retirement (2.5% @ 55) formula for Miscellaneous Employees.

Beginning on or after December 11, 2012, the City implemented the 2% @ 60 retirement formula for miscellaneous new hires with average three years for calculation of final retirement benefit, which after January 1, 2013 shall only apply to new hires defined by CalPERS as "classic members."

(Approved by City Council through side letter December 11, 2012.)

Beginning January 1, 2013, new hires defined by CalPERS as "new members" shall receive the newly created 2% @ 62 retirement formula with average of three years for calculation of final retirement benefit. (Mandated by the Public Employees' Pension Reform Act of 2013.)

11.5 - Contributions to CalPERS.

Effective January 1, 2013, all miscellaneous new hires defined by CalPERS as "new members" pay their full employee member contribution rate towards their CalPERS retirement benefit per the Public Employee's Pension Reform Act of 2013 (rates vary per retirement formula).

Effective the first full pay period that included January 22, 2013, all Union represented employees began paying their full member contribution rate as well to their respective retirement plan with CalPERS and the City eliminated any and all Employer Paid Member Contributions.

11.6 - FICA. – Unit members shall pay the employee's portion of the Federal Insurance Contributions Act ("FICA") tax and the City shall be responsible for payment of the employer's portion.

11.7 - Disability.

a) Each Unit member shall pay the cost of membership in the State Disability Insurance or other long term disability insurance selected by the City. City agrees to offer a short term disability program at the employee's expense provided that such short term disability program can be offered in conjunction with the City's existing long term disability insurance and the Short Term Disability waiting period will reduce from 30 days to 7 days.
b) An employee with sick leave accruals available may use their accruals in conjunction with STD/LTO benefits until exhausted. When sick leave is exhausted, an employee may use accumulated vacation leave and may also elect to use compensatory time to extend full pay as long as possible except when exempted by Human Resources Policy and the Family Leave Policy. An employee is prohibited from receiving more than 100% of salary in combined sick/vacation/comp time and the City mandated STD or LTD benefits.

11.8 - Direct Deposit. All Unit members shall be paid by direct deposit of their payroll check into an account of their choice, except those employees who either do not hold an account with a financial institution that offers direct deposit or who do not hold an account of any type. It shall be the responsibility of the employee to establish and maintain such account. When separation from the City is caused by death, payment of all outstanding compensation, including Salary and all remaining Sick Leave, Vacation, Comp Time or Holiday Time accruals shall be paid into the employee's direct deposit account the same as regular payroll.

11.9 - Residency Credit. All Unit members who reside within City limits shall receive one $150 per month per employee(s) discount against the cost of electric and water service during the period of such residence.

11.10 - Education Incentive. Unit members whose job specification does not require a bachelor's

degree as a minimum requirement shall receive additional compensation of $200.00 per month for a Bachelor's Degree; employees who possess a Bachelor's Degree and a job related certificate shall receive $225.00 per month; employees who possess a Bachelor's Degree and a certification through a professional designation of official competency after taking a test or meeting established criteria by a universally recognized authority or association will receive $250.00 per month; employees who possess a Master's Degree will receive $275.00 per month; those employees who possess a Master's Degree and a certification through a professional designation of official competency after taking a test or meeting criteria established by a universally recognized authority of association shall receive $300.00 per month.

ARTICLE 12- COMPENSATORY TIME, OVERTIME AND ON-CALL PAY

12.1- Exempt Employees.

Except as outlined in Article 12.8, the following listed Unit classifications shall not receive overtime pay:

Administrative City Clerk
Assistant Civil Engineer
Associate Civil Engineer
Associate Civil Engineer w/Certification
Assistant Planner
Assistant Public Works Director/City Engineer
Associate Electrical Engineer
Business Support Manager
Capital Improvement Projects Manager
CORE Manager
Customer Service & Billing Manager
Customer Service Supervisor
Development Service Manager (Building Official)
Economic Development Manager
Electric Operations Manager
Electric Engineering Supervisor
Fleet Manager
Homeless Services Director
Grants Program Manager
Management Analyst
Planning Engineer
Principal Civil Engineer
Power Resources & Revenue Administrator
Public Works Program Manager
Public Works Superintendent
Purchasing Manager
Recreation Manager
Risk Management Analyst
Senior Civil Engineer
Senior Electrical Engineer
Senior Planner

Streets/Parks Maintenance Manager
Transit Manager
Water/Wastewater Superintendent

12.2 - Non-Exempt Employees.

The following Unit members are entitled to receive overtime pay:

Assistant Planner
Associate Planner
Assistant Civil Engineer

12.3 - Compensated time off for Non-Exempt employees listed in Article 12.2:

Non-Exempt Unit members shall be paid for all overtime at the rate of time and one-half (1-112) for each hour worked, or they shall accrue compensatory time off hours at the rate of one and one-half hour (1-1/2) for each hour worked up to a maximum of two-hundred forty (240) hours.

Unit members may exercise the option to cash out a maximum of sixty (60) hours of compensatory time off per fiscal year.

12.4 - Hours Worked. For purposes of overtime calculation, "hours worked" for non- exempt Unit members shall include time spent in required court appearances as set forth in Article 14. All other hours paid for but not worked, including, but not limited to vacation, holiday, sick leave, on call time and compensatory time off shall not be counted as hours worked for overtime calculation.

12.5 - Non-Exempt Overtime. All work performed by Unit members listed in Article 12.2 in excess of forty (40) hours per week shall be paid at the rate of one and one half times (1-1/2) the employee's regular hourly base rate of pay, except for employees who choose to be compensated in additional compensatory time as outlined in Article 12.3. All overtime worked shall be authorized by a supervisor in advance of working overtime hours, if possible. Otherwise, the claim for overtime shall be subject to review by the Department Director.

12.6 - Non-Exempt On-Call Status. Only the employees listed in Article 12.2, the non FLSA exempt Unit members, shall be entitled to additional compensation for on call status. Unit members required to remain in an on call status shall, at employee's option, receive an additional eight (8) hours of compensatory time or pay at his/her regular rate for each week for such duty plus and additional one (1) hour for any week in which a holiday occurs. Unit members shall be entitled to receive the pro rata equivalent for any partial week.

When required to respond, Unit members shall receive, at employee's option, a minimum of two (2) hours of compensatory time or pay at his/her regular rate for any time worked during the first one (1) hour and compensatory time or pay at time and one-half (1-1/2) for each hour worked thereafter.

For purposes of this Article, Unit members shall be deemed to be in on call status only when all of the following conditions are met:

The appropriate Director has placed the employee in on call status by a notice in writing;

The employee is required to respond to the City Yard or other designated location within a specified time not to exceed thirty (30) minutes; and,

While on call the employee is prohibited from engaging in any activity which may interfere with the employee's ability to respond to an emergency call and immediately commence the required job performance.

12.7 - CTO Cash-Out. In the event a Unit member terminates his or her employment, the City shall "cash out" the employee's accrued compensatory time. The employee shall be compensated for all such compensatory time at his/her then current, straight time rate of pay.

12.8 - Contract Overtime for Non-Exempt Employees. In assessing costs against such other agency for work performed by Unit members, the City shall assess compensation for such employee at the rate of one and one-half (1-1/2) times the regular rate of compensation. Represented employees shall receive in compensation the greater of that received from the third party agency for the employee's services or such compensation as he/she shall be otherwise entitled to under law and this MOU.

12.9 - Personal Leave. Unit members shall receive paid personal leave time accrued at a rate of 3.77 hours per pay period to compensate for time spent in excess of normal working hours in completing their responsibilities. This personal leave time shall be capped at a total of one hundred ninety-two (192) hours, at which time accrual shall cease until the unused balance of accrued time drops below the cap.

a) In the event a Unit member terminates his or her employment with the City, the employee shall be compensated for all accrued personal leave at his or her current rate of pay.
b) Unit members may elect to receive cash in lieu of up to 60 hours of personal leave accrual each calendar year, subject to the terms and conditions set forth below. To receive cash in lieu of leave accrual, an employee must submit an irrevocable written election form no later than December 31st of the calendar year prior to the calendar year in which the employee wishes to receive cash in lieu of leave. The cash in lieu will be payable in the last pay period of November the following calendar year. Only leave hours already accrued in the calendar year for which an election is made may be cashed out. Cash-outs for leave hours accrued in a prior calendar year are not allowed. If a Unit member for any reason would not have accrued the full amount elected for cash-out during the current year, the cash-out amount will be reduced accordingly. Employees may choose to have the cash-out amount made as an employee contribution to the 457 Deferred Compensation Plan, subject to the applicable elective contribution limits imposed by IRS regulations.

ARTICLE 13 - ACTING PAY AND PROMOTION PAY

13.1 - Unit members temporarily assigned by management to fill a vacancy in a higher classification, when the vacancy is created by a departure, or when the incumbent is absent in excess of twenty (20) work days, shall be compensated from the first day working such assignment, and consecutive days worked thereafter, at the lowest pay range of the incumbent which is at least five percent (5%) above the acting employee's normal rate of compensation while

working in the higher classification. The conditions of this subsection are a prerequisite to the receipt of any higher acting pay. At such time as an employee is no longer performing work out of his permanent classification, he/she shall be compensated at his/her regular rate of pay for his/her permanent classification.

13.2 - Unit members promoted to work in a higher classification shall be paid five percent (5%) more than the employee received in the lower classification.

13.3 - Temporary assignments to perform work out of a Unit member's permanent classification shall be limited in duration to 960-hours in any one (1) year. A time extension to the temporary assignment beyond the initial six months may be made with the concurrence of the Union in writing.

ARTICLE 14 - PAY FOR JURY DUTY & COURT APPEARANCES

Any Unit member who shall be summoned for attendance to any court for jury duty during his/her normal working hours shall be deemed to be on duty and there shall be no loss of salary, but any jury fees received by him/her shall be paid into the City treasury. Any employee, who shall be called as a witness arising out of and in the course of his/her City employment, shall be deemed to be on duty and there shall be no loss of salary, but any witness fees received by him/her shall be paid into the City treasury. An employee absent as a witness in a private matter shall not be entitled to be paid during such absence, but he/she may, however, use vacation leave, holiday leave, personal leave or compensatory leave for such absence.

ARTICLE 15 - SAFETY, EQUIPMENT, AND TRAINING

15.1 - The City will provide Unit members safety equipment in accordance with California State Law. Effective the first full pay period in January, 2013, and annually thereafter, the City shall provide a yearly boot/safety shoe allowance of two-hundred fifty dollars ($250) to each employee who is required, by nature of his/her work to wear a specific type/style of shoe or boot. An approved shoe/boot is one which meets the minimum standards as determined by the department head. Departmental standards shall not be less than those which may be required by CAL/OSHA. Employees shall wear approved shoes/boots during working hours where required by work conditions.

15.2 - The City shall reimburse Unit members the reasonable replacement value of personal property destroyed in the course and scope of their employment. The employee shall make application for reimbursement by presenting to the appropriate supervisor the damaged or destroyed article. Personal property subject to this provision consists of personal property necessary to fulfill the employee's job duties and that is approved in advance for use on the job. Replacement for prescription eyewear is limited to two-hundred dollars ($200) per pair per year. Replacement for watches is limited to one-hundred dollars ($100) per year. Replacement of items will be secondary to any applicable insurance.

15.3 - A Joint Safety and Training Committee shall be continued.

a) Joint Safety and Training Committee. The Committee shall consist of an equal number of members appointed by the City and the Union. The Committee shall be advisory only. The Committee shall meet on a regular basis, but not less than once per quarter. The Union and City may agree to meet more frequently on a regular or special basis. The Committee may review work practices, training, procedures and rules and may recommend changes in the interest of health and safety. The Committee may review all serious accidents, injuries or fatalities, and include recommendations resulting from its review in the Committee's minutes.
b) Reporting. Minutes of all Committee meetings shall be posted on Union bulletin boards, with copies to the Human Resource Department and to the President of the Union, within five (5) working days after the Committee meeting. Specific questions submitted either to the Committees or by the Committees to City Management will be responded to within a reasonable time and the answers posted on Union bulletin boards.
c) Findings. Proceedings of the Committee shall be completely independent of any disciplinary action and the Committee's findings shall not be entered into the record of any such disciplinary proceedings.

ARTICLE 16– MILEAGE, MEALS AND OTHER REIMBURSEMENTS

16.1 - Effective the first full pay period following Council approval of new MOU, the following listed Unit member classifications will be provided with a three-fifty ($350) per month vehicle allowance under this section. The City also provides employees with mileage reimbursements as provided in the Administrative Policy E-1 dated September 1, 2001, except that AP E-1 item C.4 was amended as follows: mileage for trips exceeding forty (40) miles round trip shall be reimbursable at the current IRS rate for total trip mileage that exceeds forty (40) miles, an employee may only request reimbursement for expenses equal to or greater than twenty dollars ($20) and an employee must keep record of the mileage or aggregate from multiple trips to establish the twenty dollar ($20) minimum.

Administrative City Clerk	Electric Engineering Supervisor
Associate Civil Engineer	Grants Program Manager
Associate Electrical Engineer	Homeless Services Director
Associate Planner	Management Analyst
Associate Civil Engineer	Planning Engineer
Assistant Planner	Public Works Program Manager
Associate Electrical Engineer	Power Resource & Revenue Administrator
Business Support Manager	Principal Civil Engineer
Capital Improvement Projects Manager	Purchasing Manager
CORE Manager	Recreation Manager
Customer Service Supervisor	Senior Planner
Customer Service & Billing Manager	Senior Civil Engineer
Economic Development Manager	Transit Manager
	Water/Wastewater Superintendent

16.2 - The following listed Unit member classifications shall be provided with a City

Vehicle for performing City business and travel to and from work:
City Engineer
Development Services Manager (CBO)
Electric Operations & Maintenance Manager
Fleet Manager
Public Works Superintendent
Streets/Parks Maintenance Manager

In the event the City vehicle is unavailable, then the employee shall receive a vehicle allowance or mileage, consistent with City policy. The City is currently working on a new and updated Vehicle Policy and the parties agree to meet and confer on such policy even to the extent that it changes the benefits provided in this Article.

16.3 - All Unit members receiving such vehicle allowance shall name the City as an additional named insured on any policy of insurance providing coverage for the vehicle used by the employee for the purposes set forth herein. Proof of current insurance shall be available upon request.

16.4 - Unit members assigned a take home vehicle shall be reimbursed for use of their own vehicle for authorized City business at the rate set by the Internal Revenue Service.

16.5 - Unit members shall be reimbursed for meals as per the Administrative Policies of the City and in compliance with IRS rules, whichever is more current.

16.6 - The City shall bear the full cost of any fidelity or other bonds required of Unit members under any law or ordinance.

ARTICLE 17 - TUITION, AND PROFESSIONAL TRAINING AND TRAVEL

17.1 - Qualifications. Maximum reimbursement to all permanent employee Unit members shall be four thousand five hundred dollars ($4,500) per fiscal year for tuition and required books related to classes qualified for tuition reimbursement. Tuition paid will be reimbursed for courses approved by the Department Head and taken in an accredited educational institution provided that:

The subject matter of the course relates to obtaining a degree, including prerequisites, or relates directly to and contributes toward the employee's position with the City.

The employee has received at least a competent proficiency rating on the last evaluation report.

The employee has furnished evidence that the course has been completed with at least a 'C' grade or "pass" grade, verified by Human Resources.

17.2 - Reimbursement.

Requests for reimbursement must be completed and returned to the Human Resources

Department within three (3) weeks after receipt of course completion documentation. (No reimbursement will be made without bona fide receipts or documentation.)

Reimbursements will be made only after proof of completion of course with minimum 'C' average or "pass" and satisfactory receipts of payment for tuition are approved by the Human Resources Department.

17.3 - Training. The City hereby agrees to pay, as outlined in Article 16, the travel and subsistence expenses of Unit members for professional and official travel, meetings, and occasions required to continue the professional development of Unit members and to adequately pursue necessary official and other functions of the City, including but not limited to annual state conference of the California League of Cities, and such other national, regional, state and local governmental groups provided it is budgeted in the annual operations budget. Time spent in City required and approved training or conferences, including travel time shall be included as time worked in accordance with FLSA standards. The City shall not pay for the costs incurred to meet minimum job requirements. Reimbursement for meals, lodging or travel are subject to IRS rules for reporting compensation through payroll or reimbursement through accounts payable.

17.4 – Tools. The City hereby agrees to finance at no interest the purchase of any job- related tools or equipment that serve the professional development of any Unit members over the term of this MOU. Such tools and equipment shall be approved in advance by the Human Resource Department. Repayment to the City by the Unit member shall be made by payroll deductions until the amount loaned is completely repaid. The maximum period for repayment shall be two (2) years.

ARTICLE 18 - SICK LEAVE

18.1 - Sick Leave Accrual. Unit members shall accrue three and sixty-nine hundredth (3.69) hours of sick leave per pay period. Sick leave shall accrue up to a cap of four hundred (400) hours. Leave banks can be utilized for time off or for conversions per provisions in the MOU.

18.2 - Use of Sick Leave. Sick leave shall be granted only where consistent with the City's Sick Leave policy (currently AP-01), except as otherwise provided in the Family Medical Leave Act and Pregnancy Leave policies of the City (currently AP-02).

18.3 - Elective Sick Leave Cash Out

Unit members may elect to receive cash in lieu of up to 96 hours of sick leave accrual each calendar year, subject to the terms and conditions set forth below. To receive cash in lieu of leave accrual, an employee must submit an irrevocable written election form no later than December 31st of the calendar year prior to the calendar year in which the employee wishes to receive cash in lieu of leave. The cash out must not reduce the employee's available sick leave bank at the time of the cash-out below eighty (80) hours. The cash in lieu will be payable in the last pay period of November the following calendar year. Only leave hours already accrued in the calendar year for which an election is made may be cashed out. Cash-outs for leave hours accrued in a prior calendar year are not allowed. If a Unit member for any reason would not have accrued the full amount elected for cash-out during the current year, the cash-out amount will be reduced accordingly. Employees may choose to have the cash-out amount made as an employee contribution to the 457 Deferred Compensation Plan or to the Retiree Health Savings plan, subject to any applicable elective contribution limits imposed by

IRS regulations.

Sick Leave Upon Separation. Upon separation, service retirement, disability retirement, or termination, a Unit member shall be eligible to receive a cash payment for accrued sick leave in the "Banks" in an amount equivalent to straight time, to a maximum of ninety-six (96) hours. After ten (10) years of continuous City service, all hours accrued in the "Bank," less the total hours cashed out in 18.3, shall be eligible for conversion to cash in an amount equivalent to thirty percent (30%) of such unused sick leave. After twenty (20) years of continuous City service, a represented employee shall be eligible to convert to cash an amount equivalent to fifty percent (50%) of all unused sick leave. Such reimbursement to be computed based upon the employees' final compensation rate. (See AP-01.)

Sick Leave Conversion. Beginning with the eleventh (11) year of City service, Unit members may convert the value of the total amount of their sick leave bank minus forty (40) hours to either Deferred Compensation or the Retiree Health Savings via an irrevocable election. Conversion forms are due no later than November 1st of the eleventh year of service. The irrevocable option will be converted the following calendar year in the pay period that includes January 1st.

18.4 - Bereavement. All Unit members covered by this MOU are granted bereavement leave. In the event of the death of a member of their family, including spouse, domestic partner, mother, father, brother, sister, child, stepchild, grandchild, or grandparent of the employee or any one of the same relatives of the employee's spouse or domestic partner, the employee shall be allowed five days, thirty (30) hours of which are with pay, bereavement leave for each death of a family member. For the unpaid time between the 30 hours and five days, an employee may use vacation, compensatory time, sick leave, or any other paid leave that would otherwise be available. In the event of the death of a spouse or multiple family deaths occurring within a twenty-four (24) hour period, the employee shall be allowed forty (40) hours of bereavement leave.

18.5 - Bereavement- Use of Leave Balances. In addition to the foregoing bereavement leave, the Unit member may also utilize up to twenty (20) hours from accrued sick leave, if there is a death of a family member and up to forty (40) hours from accrued sick leave in the event of the death of a spouse or multiple family deaths. If the employee has insufficient accumulated sick leave to exercise this option, then the employee may utilize accrued vacation, or compensated time off for the additional bereavement leave.

18.6 - Administrative Leave. Employees will be granted paid time off based on their regular work schedule. Employees will be compensated for holidays while they are on paid administrative leave.

ARTICLE 19 - VACATION AND HOLIDAY LEAVE.

19.1 - Vacation Leave Accruals. Unit member vacation leave shall accrue in accordance with the following schedules:

(a) One (1) through four (4) years of service:
Ten (10) eight (8) hour days per year = three and eight hundredth (3.08) hours per pay period

(b) Beginning the fifth (5th) year through the ninth (9th) year:

Fifteen (15) eight (8) hour days per year = four and sixty-two hundredth (4.62) hours per pay period

(c) Beginning the tenth (10th) year & thereafter:
Twenty (20) eight (8) hour days per year= six and fifteen hundredth (6.15) hours per pay period

19.2 – Maximum Vacation Leave Accrual. Vacation leave may be accrued to a maximum of three-hundred twenty (320) hours. If an employee has accumulated the maximum allowed under this Article, said employee will receive no further vacation leave accruals until said employees uses a portion of his/her vacation leave and his/her vacation leave accruals have been reduced below the maximum. There shall be no retroactive receipt of any vacation leave lost as a result of this Article.

19.3 - Vacation Leave Approval Required. Vacation leave may be taken with approval of the employee's supervisor, and as otherwise consistent with the policies of the City. Vacation leave may be taken at any time after six (6) months of City employment. Vacation leave taken shall not be in excess of that actually accrued at the time such vacation leave is taken. Vacation leave must be approved a minimum of fourteen (14) days in advance of the first day of such vacation. Exceptions may be made to the fourteen (14) day notice requirement for emergencies or at the discretion of the employee's supervisor.

19.4 - Vacation Leave Payment upon Termination. Any Unit member who has been in continuous full-time service of the City for a period 960 hours, who is about to. terminate his or her employment, and has earned vacation leave to his/her credit, shall be paid for such vacation leave within one payroll period of the effective date of such termination.

19.5 – Elective Vacation Leave Cash Out. Unit members may elect to receive cash in lieu of up to 80 hours of vacation leave accrual each calendar year, subject to the terms and conditions set forth below.

To receive cash in lieu of leave accrual, an employee must submit an irrevocable written election form no later than December 31st of the calendar year prior to the calendar year in which the employee wishes to receive cash in lieu of leave. The cash out must not reduce the employee's available vacation leave bank at the time of the cash-out below eight (80) hours. The cash in lieu will be payable in the last pay period of November the following calendar year. Only leave hours already accrued in the calendar year for which an election is made may be cashed out. Cash-outs for leave hours accrued in a prior calendar year are not allowed. If a Unit member for any reason would not have accrued the full amount elected for cash-out during the current year, the cash-out amount will be reduced accordingly.

Employees may choose to have the cash-out amount made as an employee contribution to the 457 Deferred Compensation Plan, subject to the applicable elective contribution limits imposed by IRS regulations.

19.6 - Holiday Leave Accrual. The following holidays shall be granted to employees: New Year's Day, Martin Luther King Day, President's Day, Memorial Day, Juneteenth, Fourth of July, Labor Day, Veteran's Day, Thanksgiving, Day after Thanksgiving, Christmas Eve, Christmas and New Year's Eve.

One (1) ten (10) hour floating holiday will be credited to Employee's Holiday Leave bank July 1st

each year. Accrued floating holiday hours may be taken in one- hour increments. Leave balances must be used during the fiscal year or they will be cashed out according to Administrative Policy A-30.

Effective July 1st, 2013, all of a Unit member's existing holiday leave hours were moved to a new unique leave account bank. The cash value of any holiday leave hours in the unique leave account bank shall be equal to and, upon cash-out, remain at the employee's then current pay rate. Upon termination, for any reason, the employee shall be entitled to one- hundred percent (100%) of the unused holiday leave on the books then existing, including in the unique leave bank account.

19.7 - Holiday Leave Approval Required. Holiday leave (section 19.6 (a) and (b)) other than City recognized holidays (City Hall closed) must be approved a minimum of fourteen (14) days in advance of the first day of such leave. Exceptions may be made to the fourteen (14) day notice requirement for emergencies or at the discretion of the Unit member's supervisor.

19.8 - Holiday Leave Payment Upon Termination. Any Unit member, who is about to terminate his/her employment, and has earned Holiday leave to his/her credit, shall be paid for such holiday leave within one payroll period of the effective date of such termination at the employee's then current rate of pay.

19.9 - Additional Holidays. If, during the term of this MOU, the City Council recognizes an additional Holiday for City employees, Unit members will be granted the holiday.

19.10 - Promotional Pay Out of Leave –When employees transfer/promotions occur between bargaining groups, the leave hours will be transferred and maintained by the employee, not cashed out.

ARTICLE 20 - CAFETERIA PLAN

20.1.1 – Pre-January 1, 2024 Benefits. Effective July 1, 2019, the cafeteria plan contribution will be increased by $50 to $1,400 per month, or $16,800 annually to each Unit member for the cafeteria benefits plan detailed in this section.

Said contribution shall first be used to provide for health insurance for the employee. Employee shall be covered by health insurance with a City approved health plan unless the employee provides proof to the City that employee is covered by another acceptable health plan as determined by the City's Human Resource Department.

The balance may be used for any of the following or any combination thereof:

1. Health insurance for employee's spouse and/or dependents;
2. Dental Insurance for employee, spouse and/or dependents;
3. Eye care plan for employee, spouse and/or dependents;
4. Deferred compensation programs;
5. Eye care plan for employee, spouse and/or dependents; and
6. Supplemental insurance options.

a) Unit members may elect to receive ninety-two and five-tenths percent (92.5%) of the balance in cash as CalPERS non-includable taxable income.
b) The City will pay for life insurance in the amount of one-hundred fifty thousand dollars ($150,000) and the Unit member will pay the taxes on the portion of the premium attributable to coverage above fifty thousand dollars ($50,000).
c) During the term of the MOU, upon written notice by the City, parties agree to reopen this Article and begin meeting and conferring no later than two weeks following such written notice.

20.1.2 – Benefits Effective January 1, 2024.

The parties have completed the above re-opener negotiations of this Article. The following is effective January 1, 2024. Accordingly, the above Pre-January 1, 2024 Benefits under 23.1.1 shall no longer be in effect as of January 1, 2024.

(a) Health Benefit Contributions and Benefit Money.

i. Healthcare Plan Contributions – Effective January 1, 2024, the City shall contribute for each employee who participates in a City Healthcare Plan a maximum amount up to the 2024 rates for mid-tier HMO Healthcare Plan (Blue Shield Access+), which are stated below.

BS ACCESS+	
Single Employee	$756.65
2 Party	$1,513.30
Family	$1,967.29

Beginning January 1, 2025 and annually thereafter on January 1, the maximum annual inflator for the City contribution increase is up to 2.5% above the maximum contribution amount for rates for mid-tier HMO Healthcare Plan (Blue Shield Access+ in 2024) of the prior year.

ii. In addition to the healthcare plan contribution, employees participating in the City Healthcare Plan shall receive the following amounts as cafeteria plan Benefit Money.

Single Employee	$600
2 Party	$250
Family	$250

Employees may use the Benefit Money stated above for any combination of the following cafeteria plan benefits: (1) dental insurance for employee, spouse, and/or dependents; (2) vision insurance for employee, spouse, and/or dependents; (3) health flexible spending account (health FSA); and/or (4) additional City offered health benefits. Any leftover unused Benefit Money is forfeited.

*Because of requirements related to the 457 plan election, those employees who are currently contributing to their 457 plan amounts for 2024 from their cafeteria plan contribution would continue to maintain their current level of contribution using the cafeteria plan contribution through the end of 2024 only.

Employees shall be responsible for paying any cost for the employee's selected cafeteria plan benefits that exceed the City's contribution described above.

(b) Option to Opt-Out with Proof of Alternative Minimum Essential Coverage.

Employees who provide the City with reasonable evidence of alternative minimum essential coverage can decline, in writing, coverage under the City's Healthcare Plans and will not receive any cafeteria plan contribution from the City.

i. Employees hired before July 1, 2024 may opt out and choose to receive a maximum cash out of $1,000 per month as taxable income that is not includable as compensation earnable or pensionable compensation for CalPERS purposes if they meet the conditions of the eligible opt out arrangement described below. Such employees would also receive $150 per month as Non-Medical Benefit Money that may be used for (1) dental insurance for employee, spouse, and/or dependents; (2) vision insurance for employee, spouse, and/or dependents; (3) health flexible spending account (health FSA); and/or (4) additional City offered health benefits. Any leftover unused Non-Medical Benefit Money is forfeited.

ii. Employees hired after July 1, 2024 may opt out and choose to receive a maximum cash out of $500 per month as taxable income that is not includable as compensation earnable or pensionable compensation for CalPERS purposes if they meet the conditions of the eligible opt out arrangement described below. Such employees would also receive $150 per month as Non-Medical Benefit Money that may be used for (1) dental insurance for employee, spouse, and/or dependents; (2) vision insurance for employee, spouse, and/or dependents; (3) health flexible spending account (health FSA); and/or (4) additional City offered health benefits. Any leftover unused Non-Medical Benefit Money is forfeited.

*Because of requirements related to the 457 plan election, those employees who are currently contributing to their 457 plan amounts for 2024 from their cafeteria plan contribution would continue to maintain their current level of contribution using the cafeteria plan contribution through the end of 2024 only.

iii. Eligible Opt Out Arrangement – The eligible opt out arrangement conditions that must be satisfied in order for an employee to receive cash for opting out of the City's Healthcare Plan coverage are as follows:

a. The employee and the employee's Tax Family must have (or will have) minimum essential coverage through another source (other than coverage in the individual market, whether or not obtained through Covered California);
b. A Tax Family means all individuals for whom the employee reasonably expects to claim a personal exemption deduction for the taxable year(s) that cover the employee's plan year for which the eligible opt out arrangement applies;
c. The employee must provide reasonable evidence of the alternative minimum essential coverage for the employee and their Tax Family for applicable period. Reasonable evidence may include an attestation by the employee;
d. The employee must provide the evidence/attestation every plan year;
e. The employee must provide the evidence/attestation no earlier than a reasonable time before coverage starts (e.g., open enrollment). The evidence/attestation may also be provided within a reasonable time after the plan year starts; and

f. The cash for opting out cannot be made if the City knows or has reason to know that the employee or the employee's tax family member does not have alternative minimum essential coverage.

20.2 – IRS 125 Flexible Spending Plan (Cafeteria Plan). During the term of this MOU, the City shall maintain an Internal Revenue Service (IRS) Section 125 plan which will allow Unit members to allocate specified amounts of monthly pre-tax salary or wages for the reimbursement of medical care expenses or dependent care expenses or both, as well as health and welfare insurance premiums, with the exception of disability insurance premiums.

20.3 - Eye Wear Reimbursement. The City will reimburse Unit members and/or their spouse & dependents a maximum combined total annual (per fiscal year) amount for all covered (employee/spouse/dependents) of three-hundred dollars ($300) for prescription eyewear every year from the date of last reimbursement.

ARTICLE 21 - LAYOFFS AND RE-EMPLOYMENT

21.1 - Purpose. The purpose of this Article is to provide a fair and equitable basis for the reduction of full-time classified personnel due to insufficient work or funds.

21.2 - Reasons for Layoff. The City retains the right to determine when a lack of work or lack of funds condition exists. Lack of work means that a category of work effort within the City can be fulfilled with fewer employees at an acceptable level of service. Lack of funds means that the City cannot sustain operations at the current level of employment within the funding available.

21.3 - Notice of Layoff. Any layoff initiated under the provisions of this MOU can take place at any time during the year. The City shall notify the affected Unit members in writing at least sixty (60) calendar days prior to the employee's last day of work. The City reserves the right to pay the employee for such sixty (60) day period or any remaining portion thereof, and to require the employee to immediately vacate City property. A copy of any notice will be forwarded to the appropriate Union representative. Any notice of layoff shall specify the reason for the layoff and effective date. The form, procedure and timing of such notice shall be subject to the established Grievance Procedure, provided however, that the City's decision to layoff is not subject to the Grievance Procedure. The date of layoff shall not be delayed by the pendency of a grievance.

21.4 - Order of Layoff. Any layoff shall be effective within classes determined by the City. The order of layoff shall be based on the City Manager's evaluation of critical position function and seniority measured as the length of uninterrupted service within the class as measured to the date of the layoff notice.

21.5 - Equal Seniority. If two (2) or more employees subject to layoff have equal class seniority, then the determination as to who has seniority shall be based upon total length of uninterrupted service with the City

21.6 - Re-Employment Rights.
Any Unit member who has been given a written notice of layoff may compete for any open position for which he or she is qualified. The City will make reasonable efforts to notify the affected

employee of any position that is open or any future position that is opening for the Unit member's consideration. The Human Resource Department shall receive and date the resume/application and set up testing for the Unit member who is qualified for that position. The Unit member shall compete with any other laid off employee who also qualifies for that position. A Unit member that has been laid off and is qualified shall compete for the position that has opened or that is opening prior to it being open to present employees or to the public.

Unit members who have been laid off or reduced in classification under the provisions of this Article shall be placed upon reemployment lists for a period of two (2) years, or until they are re-employed with the City, whichever occurs first. For purposes of this section, "reemployment" means any full-time employment with the City. Employees on a reemployment list shall have hiring preference for vacancies in their original classifications in order of their respective seniorities within those classifications, with the most senior employees having first preference. Employees on such reemployment lists shall also have preference over new hires in applying for vacancies in bargaining unit classifications other than those from which they were laid off, and according to the City's usual and customary hiring practices.

(c) This Article shall be implemented consistent with the provisions of Administrative Policy AP-10.

ARTICLE 22 - GRIEVANCE PROCEDURE

22.1 - FLSA Applicability. As to all Unit members, no discipline may be imposed except as consistent with FLSA rules for the applicable class of exempt employee.

22.2 - Grievable Matters. Any permanent employee in the Unit who has a grievance based upon his/her demotion, dismissal, reduction in pay, improper treatment, violation of the personnel ordinance or salary resolution, shall be entitled to have the matter reviewed through the following grievance procedure outlined in this Article. This right shall not extend to complaints concerning Performance Evaluation forms.

22.3 - Informal Step. An attempt shall be made to ascertain all facts and adjust such grievance on an informal basis between the Unit member and, if he/she desires, his/her representative, and the immediate supervisor. Presentation of such grievance shall be made within fourteen (14) calendar days of the incident causing the grievance, or the date on which the employee first became aware of it.

22.4 - Step One. If the grievance is not adjusted to the satisfaction of the Unit member under the procedures set forth in Sections 22.3 above, the employee or his/her representative may submit the grievance, in writing, to their department head, within fourteen (14) calendar days after the completion of the last step under paragraph 23.3 above. The department head and a representative of the Human Resources department shall meet with the employee and his/her representative if applicable, within fourteen (14) calendar days of receipt of such written grievance, and the department head shall deliver a decision in writing, to the employee, along with the reasons for such decision, within fourteen (14) calendar days after the meeting.

22.5 - Step Two. If the grievance is not adjusted to the satisfaction of the employee under the procedure set forth in Section 22.4 above, the employee or his/her representative may submit written notice to the City Manager within fourteen (14) calendar days after the completion of the last step under paragraph 22.4 above of his/her intent to submit the matter to advisory arbitration. The procedures set forth below shall be followed.

a) Within seven (7) calendar days of receipt of the written notice, the parties shall request a list of seven (7) arbitrators from the Federal Mediation and Conciliation Service.
b) Within fourteen (14) calendar days of receipt of the list of arbitrators the City and the Union shall attempt to reach an agreement on an arbitrator. Failing to agree on an arbitrator, the Union and the City shall take turns striking the names or arbitrators from the FMCS list until one (1) name remains. The Union shall strike the first name.
c) The parties shall contact the arbitrator to arrange for a mutually convenient time and date for the advisory arbitration hearing.
d) The cost of the arbitrator shall be split equally by the City and the Union.
e) All arbitration proceedings shall be recorded. The arbitrator shall be required to provide both parties with a decision and with written findings of fact in support of the decision. The arbitrator's decision shall be consistent with and supported by the substantive law.

22.6 - Step Three. Within seven (7) calendar days after the Union and City receive the advisory arbitrator's recommendation, either party may submit written argument whether the arbitrator's opinion should be accepted, rejected or modified. Within fourteen (14) calendar days after the seven (7) day period above has expired, the City Manager shall advise the Union and the department head whether the City Manager is accepting, rejecting, or modifying the recommended decision. The decision of the City Manager shall be final and binding.

22.7 - Time Extensions. The above time limits may be changed by mutual agreement.

ARTICLE 23- SAVINGS CLAUSE

If any of the provisions contained in this MOU are determined to be unlawful, then only such provision(s) shall be deleted from this MOU with the remainder of this MOU remaining in full force and effect Upon the issuance of a decision by a Court of Competent Jurisdiction declaring any section of this MOU to be unlawful, unenforceable, unconstitutional, or not applicable, the parties agree to meet and confer as soon as possible concerning only those sections.

ARTICLE 24 - COMPLETE AGREEMENT

Anything contained herein to the contrary notwithstanding, during the meeting and conferring resulting in this MOU, the City and the Union each had the unlimited right and opportunity to make demands and proposals with respect to any subject matter as to which the Meyers-Milias-Brown Act imposes an obligation to meet and confer. Except as specifically set forth elsewhere in this MOU, the City expressly waives its right to require the Union meet and confer, and the Union expressly waives its right to require the City to meet and confer, over all matters as to which the

Meyers-Milias-Brown Act imposes an obligation to meet and confer, whether or not: (a) such matters are specifically referred to in this MOU; (b) such matters were discussed between the City and the Union during the negotiations which resulted in this MOU; (c) such matters were within the contemplation of or knowledge of the City or the Union at the time this MOU was negotiated and executed. This MOU contains the entire understanding, undertaking, and agreement of the City and the Union, after exercise of the right and opportunity referred to in the first sentence of this Article, and finally determines all matters of meeting and conferring for its term. Changes in this MOU, whether by addition, waiver, deletion, amendment, or modification, must be reduced to writing and executed by both the City and the Union.

ARTICLE 25 - RATIFICATION AND EXECUTION

This MOU has been developed as a result of meet and confer sessions between authorized representatives of the City and the Union regarding issues related to wages, hours and other terms and conditions of employment. The City's representatives and the Union have reached an understanding as to certain recommendations to be made to the City Council for the City of Banning and have agreed that the parties hereto will jointly urge said Council to adopt this MOU as a new wage and benefit resolution which will provide for the changes contained in said joint recommendation. The parties hereto acknowledge that this MOU shall not be in full force and effect until adoption by the Banning City Council.

CITY OF BANNING REPRESENTATIVES

Date: _____, 2024

By:

Doug Schulze, City Manager	Lincoln Bogard, Administrative Services Director
Nicole Jews, Human Resources Manager	
Arturo Vela, Public Works Director	

Attest:

By: _____

City Clerk

CITY OF BANNING
STAFF REPORT

TO:	**CITY COUNCIL**
FROM:	**Douglas Schulze, City Manager**
PREPARED BY:	**Perry Gerdes, Water/Wastewater Superintendent** **Art Vela, Director of Public Works**
MEETING DATE:	**July 9, 2024**
SUBJECT:	**Consideration of Resolution 2024-06 UA, Adopting the City of Banning's Sanitary Sewer Management Plan**

RECOMMENDATION:

Adopt Resolution 2024-06 UA.

BACKGROUND:

On July 14, 2009 the City Council adopted Resolution 2009-56 for the City of Banning Sanitary Sewer Management Plan per the State of California Water Resources Control Board ("State Board") Order No. 2006-0003-DWQ ("Order"). The Order contained Statewide General Waste Discharge Requirements (GWDR) for sanitary sewer systems to follow. The State Board the Order and issued Order 2022-0103-DWQ which became effective June 5, 2023. The City submitted an application package requesting regulatory coverage on July 6, 2023 and received confirmation of new regulatory coverage effective August 9, 2023. This new coverage gave requirements to comply by certain dates including a requirement to develop, certify and upload an updated Sewer System Management Plan (SSMP).

The goal of the GWDR is to eliminate the occurrence of preventable sanitary sewer overflows by requiring public agencies to develop and implement written programs that improve the effectiveness and sustainability of existing sewer systems. Currently, the City has an existing SSMP in place but does not meet the new Board Order requirements. As part of the Order 2022-0103-DWQ, the City is required to have the new SSMP adopted by the governing body prior to August 9, 2024.

Therefore, staff worked with a consultant to produce an updated document for the City of Banning. A copy of the document is attached to this report.

JUSTIFICATION:

On August 9, 2023 State Water Resource Control Board approved the application package from the City of Banning for the New Regulatory Coverage; Statewide Sanitary Sewer Systems General Order 2022-0103-DWQ. The order contains statewide General Waste Discharge Requirements that the City of Banning must meet to remain in compliance with the order including the adoption of an updated SSMP.

FISCAL IMPACT:

There is no fiscal impact associated with the approval of Resolution 2024-06 UA.

ALTERNATIVES:

Do not approve Resolution 2024-06 UA and provide alternative direction to staff. Not approving Resolution 2024-06 UA would likely result in non-compliance with Order 2022-0103-DWQ.

ATTACHMENTS:

1. Resolution 2024-06 UA, Sanitary Sewer Plan.docx

RESOLUTION 2024-06 UA

A RESOLUTION OF THE UTILITY AUTHORITY OF THE CITY OF BANNING, CALIFORNIA, ADOPTING THE CITY OF BANNING'S SANITARY SEWER MANAGEMENT PLAN

WHEREAS, the City of Banning owns and operates a public sewer system; and

WHEREAS, on August 9, 2023, the State Water Resources Control Board issued Order 2022-0103 DWQ which became in effect June 5, 2023; and

WHEREAS, on July 6, 2023 the City received confirmation of new regulatory coverage effective August 9, 2023; and

WHEREAS, the goal of the General Waste Discharge Requirements is to eliminate the occurrence of preventable sanitary sewer overflows by requiring public agencies to develop and implement written programs that improve the effectiveness and sustainability of existing sewer systems; and

WHEREAS, Order 2022-0103 DWQ requires that the City update and adopt the City's Sanitary System Management Plan (SSMP).

NOW, THEREFORE, BE IT RESOLVED by the Banning Utility Authority of the City of Banning as follows:

SECTION 1. The Banning Utility Authority adopts the Sewer System Management Plan.

SECTION 2. The Banning Utility Authority authorizes the City Manager, or designee, to make necessary budget adjustments, appropriations, and transfers related to this resolution.

SECTION 3. The City Clerk shall certify to the adoption of this resolution and shall cause a certified resolution to be filed in the book of original resolutions.

PASSED, APPROVED AND ADOPTED this 9th day of July 2024.

Alberto Sanchez, Chairperson
Banning Utility Authority

ATTEST:

Caroline Patton, Secretary
Banning Utility Authority

APPROVED AS TO FORM:

Serita R. Young, Authority Counsel
Richards, Watson & Gershon

CERTIFICATION:

I, Caroline Patton, Secretary of the Banning Utility Authority, do hereby certify that the foregoing Resolution 2024-06 UA, was duly adopted by the Banning Utility Authority of the City of Banning, California, at a regular meeting thereof held on the 9th day of July 2024 by the following vote, to wit:

AYES:

NOES:

1.0 Goal and Introduction

The goal of the Sewer System Management Plan (SSMP) is to provide a plan and schedule to:

- Properly manage, operate, and maintain all parts of the City's sanitary sewer system(s),
- Reduce and prevent spills, and
- Contain and mitigate spills that do occur.

This plan outlines the procedures, practices, and policies that we employ to minimize sanitary sewer overflows (SSOs), protect public health and the environment, and ensure compliance with the Statewide General Waste Discharge Requirements for Sanitary Sewer Systems as established by the California State Water Resources Control Board (Order No. 2022-0103-DWQ), hereinafter referred to as the General Order.

The SSMP is structured to address all required elements outlined in the General Order, including:

1. **Goals**: Establishing clear goals to manage and maintain our sewer system.
2. **Organization**: Defining roles and responsibilities within our agency.
3. **Legal Authority**: Ensuring we have the legal authority to enforce regulations.
4. **Operation and Maintenance Program**: Maintaining the sewer system efficiently.
5. **Design and Performance Provisions**: Setting standards for new and rehabilitated infrastructure.
6. **Spill Emergency Response Plan**: Responding effectively to SSOs.
7. **Sewer Pipe Blockage Control Program**: Reducing blockages caused by fats, oils, and grease (FOG), rags, and debris.
8. **System Evaluation, Capacity Assurance and Capital Improvements**: Assessing and improving system capacity.
9. **Monitoring, Measurement, and Program Modifications**: Continuously improving our SSMP.
10. **Internal Audits**: Regularly auditing the SSMP for effectiveness.

11. **Communication Program**: Keeping stakeholders informed.

1.1 Regulatory Context

The SSMP for the City is developed to comply with the State Water Resources Control Board (SWRCB) Order No. 2022-0103-DWQ, which mandates the minimization of SSOs to protect public health and the environment. The SSMP includes a comprehensive inventory of the sewer system, regular preventive maintenance, capacity management, emergency response procedures, and public education programs. Implementation involves coordinated efforts across departments, with staff trained on SSMP protocols and responsibilities. Preventive maintenance activities include scheduled inspections and cleanings using advanced technologies, while capital improvement projects ensure the system's capacity and reliability. The emergency response plan provides clear procedures for SSO incidents, supported by continuous monitoring and timely reporting to regulatory agencies. To maintain compliance and effectiveness, the SSMP undergoes a comprehensive audit every three years, with updates occurring every six years. This structured approach ensures the SSMP remains a dynamic tool for effective sewer system management.

A dedicated team comprising various key positions within the City of Banning and a contracted team of environmental compliance professionals led the development of the SSMP. The team members include the Director of Public Works, Water/Wastewater Superintendent, the Sewer System Supervisor, and G&G Environmental Compliance, Inc. (G&G). Each member played a crucial role in the review, development, implementation, and updating of the SSMP, ensuring compliance with all 11 required elements of the WDR, outlined in the above section.

The City has established a process to ensure the SSMP will be fully implemented as written. This includes regular training sessions, internal audits, and performance evaluations. Additionally, the agency confirms that periodic reviews of the SSMP will be conducted to ensure continuous compliance, effective implementation, and ongoing improvements. This structured approach ensures that all elements of the SSMP are addressed comprehensively, maintaining the integrity and effectiveness of the sewer system management program.

1.2 Sewer System Management Plan Update Schedule

To ensure the effectiveness and compliance of our SSMP, the City has established a regular schedule for development, updates and internal audits shown below:

Requirements	Initial Regulatory Due Date	Next Scheduled Date	Ongoing Due Date
SSMP Certification and Upload	August 9, 2024	August 9, 2030	Every six years
SSMP Audit	July 1, 2027	July 1, 2030	Every three years after the initial audit
Electronic Sanitary Sewer System Boundary Map	August 9, 2024	As Updates Occur	As map is updated, include in the Change Log and submit updated copy to the State.

Table 1-1 SSMP Update Schedule

To ensure the SSMP remains effective and compliant with the General Order, the City has established a comprehensive update plan. This plan includes significant milestones aimed at preventing SSOs and enhancing the overall performance of the sewer system. The SSMP includes a change log to document incremental changes made to the SSMP to keep it current and more effective. The change log is located in Appendix G.

Regular flow monitoring will be conducted across the entire sewer system to identify areas with potential capacity issues and inform necessary improvements. The CCTV inspection cycle will be completed systematically, covering all critical sections of the sewer system to identify defects and areas needing maintenance or repair. The rehabilitation of key lift stations will be undertaken to maintain reliable operations and prevent SSOs. Major capital improvement projects will be initiated to increase the capacity of the sewer system, accommodate future growth, and prevent SSOs. Additionally, new sewer maintenance equipment, such as vacuum trucks and inspection tools, will be purchased and deployed to enhance maintenance capabilities.

These milestones are integral parts of our SSMP, reflecting our commitment to proactive maintenance, timely upgrades, and continuous improvement. By adhering to this structured update schedule and achieving these milestones, the City ensures the SSMP remains a dynamic and effective tool for managing the sanitary sewer system, preventing SSOs, and protecting public health and the environment.

A Change Log is provided in the SSMP to track changes made to the SSMP during the permit cycle that are intended to maintain current contact information, updated procedural documentation, and other changes as necessary to maintain the effectiveness of the program.

1.3 Sewer System Asset Overview

The sewer system for the City of Banning, located in Riverside County, is regulated by Region 7 - Colorado River Basin Regional Water Quality Control Board. Covering a service area of 23 square miles and serving a population of 31,221, the system includes 10,422 residential sewer connections and 591 commercial/industrial connections. The City owns and operates 25 of the laterals within this system.

The infrastructure comprises 125 miles of gravity sewer mains, 5 miles of force mains, and 5 lift stations. Additionally, the City owns and operates a Water Reclamation Facility located at 2242 East Charles Street in Banning, CA. This facility has a design capacity of 3.6 million gallons per day (MGD), with an average flow of 2.4 MGD and an average dry weather flow of 2.3 MGD.

There are no structures within the system that divert stormwater into the sewer system. In the City of Banning, the responsibility for the upper and lower portions of the sewer lateral falls to the owner of the building connected to the sewer system. This includes the service lateral running from the collection main to the building.

For a detailed visual representation, refer to the City's up-to-date map of its sewer system, which provides comprehensive information on the layout and components of the sewer infrastructure.

2.0 Organization

This section identifies organizational staffing responsible and integral for implementing the SSMP. More specifically, it identifies the following:

a. The name of the Legally Responsible Official as required in section 5.1 of the General Order;

b. The position titles, telephone numbers, and email addresses for management, administrative, and maintenance positions responsible for implementing specific Sewer System Management Plan elements;
c. Organizational lines of authority; and
d. Chain of communication for reporting spills from receipt of complaint or other information, including the person responsible for reporting spills to the State and Regional Water Boards and other agencies, as applicable. (For example, county health officer, county environmental health agency, and State of Emergency Services.)

2.1 Authorized Representatives

The City's authorized representative responsible for the overall operation and maintenance of City facilities, as well as ensuring compliance with the Waste Discharge Requirement for Sanitary Sewer Systems (WDR SSS), is the Water/Wastewater Superintendent.

The Wastewater Collection Supervisor is authorized as Data Submitters in the California Integrated Water Quality System Project (CIWQS) and is responsible for entering data.

2.2 Roles and Responsibilities

City Council - Policy makers; approves city budget allocations; and SSMP and legal authority approval.

City Manager – Recommends policy, plans organizes, and directs the activities of all City Departments including the Public Utilities Department. Reviews budgets and recommends financing related to wastewater system infrastructure. Reports and advises the City Council regarding financial impacts of city and regulatory programs on the citizens and businesses within the City.

Legal Counsel – Reviews and recommends appropriate legal authority language needed for Ordinances, Municipal Codes, and advises the City on a wide range of legal issues pertaining to City management.

Public Utilities Director - Under general policy direction, plans, organizes, directs and implements the City's Public Utilities Department activities and operations. Prepares wastewater collection system planning documents, manages capital improvement delivery system, documents new and rehabilitated assets and assists in coordinating the development and implementation of SSMP.

Asst. Public Utilities Director - Under general policy direction, plans organizes, directs and implements comprehensive strategies and programs for the operation of a large potable water distribution and wastewater collection and treatment system. The Asst. Public Utilities director also assists in coordinating the development and implementation of SSMP.

Senior Engineer – Provides engineering expertise to the review of projects; conformance with standards; develops and approves new standards; and ensures wastewater system integrity is maintained in a manner that provides a reliable infrastructure for the transportation, treatment, and disposal or re-use of wastewater.

Water & Wastewater Superintendent – Under the general direction of the Public Utilities Director plans, organizes, and supervises the operations and maintenance for the City's Water & Wastewater Department. The Water and Wastewater Superintendent develops procedures and plans (including the SSMP) to ensure safe, effective, and compliant operational programs.

Wastewater Collection System Supervisor - Assists in coordinating the development and implementation of the City's SSMP. Manages field operations and maintenance activities, provides relevant information to agency management, prepares and implements contingency plans, leads emergency response, investigates and reports SSOs and trains field crews. Supervises the operation, maintenance, and cleaning of lift stations domestic sewer systems and contract wastewater systems.

Collection System Crew - Performs a wide variety of preventive maintenance activities, mobilizes and responds to notification of stoppages and SSOs (mobilize sewer cleaning equipment, by-pass pumping equipment, and portable generators). Assists with sewer line cleaning, inspects, repairs sewer lift stations and performs required maintenance.

Construction Inspector - Ensures that new and rehabilitated assets meet City standards, works with field crews to handle emergencies when contractors are involved, and provides verbal reports to Senior Engineer.

Sewer Pipe Blockage Control Program Services – The City contracts out the Pretreatment (Source Control) and FOG Program services. This Program is responsible for the performance of inspections, permitting, and compliance activities needed to protect the sewer collection system from prohibited and other conditional restrictions established by Ordinance and permit requirements. The Water & Wastewater Superintendent manages this

contract. The program also provides Best Management Practices (BMP) literature to food service establishments.

The following Table lists key personnel and contact information:

Positions	Office Phone No.	Cellular Phone No.	E-mail
City Manager	(951) 922-3105		dschulze@banningca.gov
Legal Counsel	(949)223-1170 Ext. 5409		
Public Utilities Director	(951) 922-2134	(951) 545-9585	avela@banningca.gov

Wastewater Collection System Crew	(951) 392-7172		
Construction Inspector	(951) 922-3142	(951) 232-4017	jthompson@banningca.gov
Pretreatment Program Source Control & FOG Program	(951) 683-3538	(951) 346-8233	ev@ggcorp.net

Table 2-1 Key Personnel and Contact Information

2.3 SSMP Organizational Chart

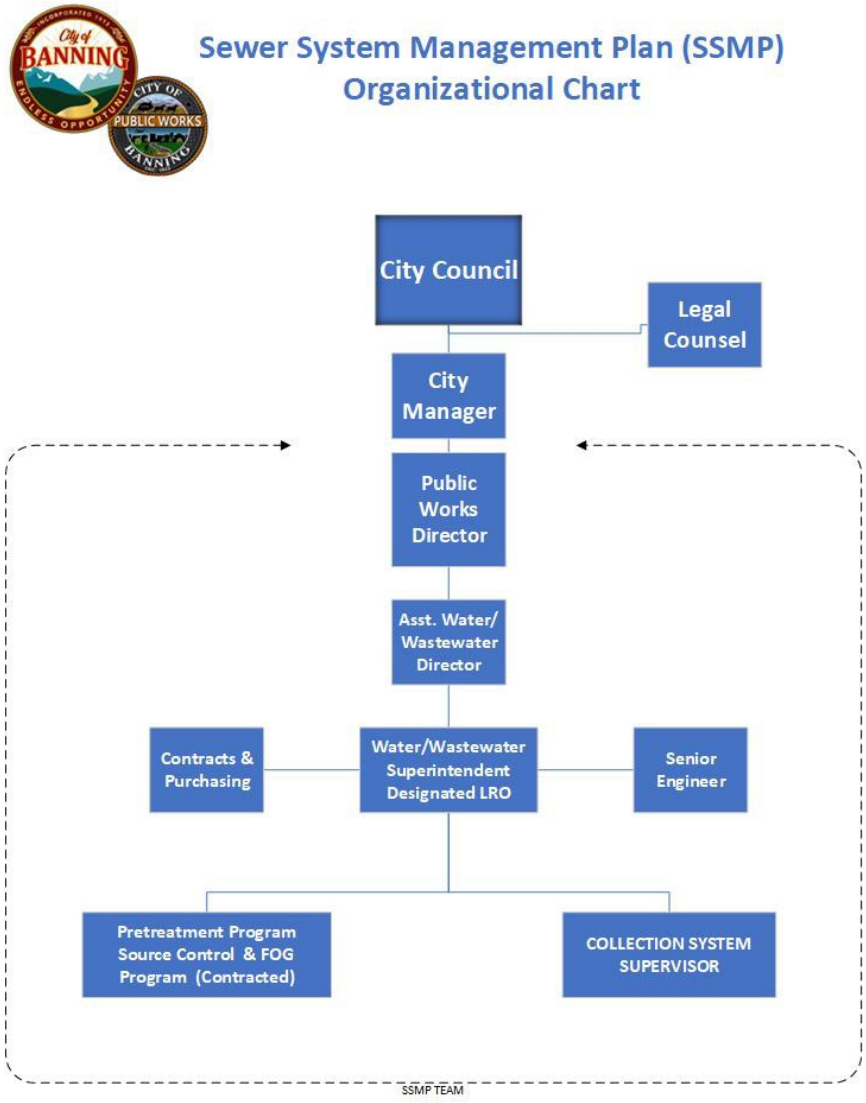

Figure 2-1 Organization Chart

2.4 SSO Chain of Communication

The City's Spill Emergency Response Plan Flow Diagram can be found in Appendix F. The flow chart provides a chain of communication for reporting spills from receipt of complaint or other information, including the person responsible for reporting spills to the State and Regional Water Boards and other agencies, as applicable.

3.0 Legal Authority

This section describes how the City's legal authority addresses those mandatory SSMP provisions outlined in Section 3, Legal Authority, of Attachment D to the General Order.

3.1 Illicit Discharges

Illicit discharges are prohibited from entering into the City's sewer system by Ordinance No. 1271 and Municipal Code Section 13.20.050 Prohibited discharges. This section prohibits the discharge of any material or waste that could harm the collection system, including, but not limited to, any solids or viscous substances of such size or character, or in such quantity, that they may cause obstruction to flow in the collection system. It also prohibits the discharge of any rainwater, stormwater, groundwater, street drainage, subsurface drainage, roof drainage, yard drainage, water from yard fountains, ponds, lawn sprays, or any other uncontaminated water. Additionally, fats or greases in excessive concentrations that would tend to cause adverse effects on the wastewater system are prohibited, as well as any toxic or poisonous solids, liquids, or gases in such quantities that, alone or in combination with other waste substances, may create pass-through or interference.

3.2 Design and Construction

Sewers and sewer connections are required to meet the criteria contained in the Greenbook: Standard Specifications for Construction & Standard Drawings for Water & Sewer Facilities, and the latest City approved edition of the Uniform Plumbing Code.

3.3 Service Lateral Access

The City has sewer easements in place to ensure access for maintenance, inspection, or repairs for portions of the lateral owned or maintained by the City. The City has a variety of methods for obtaining easements to construct and maintain sewer lines through private property:

- Acquisition of the easement through voluntary purchase from the owner.
- Acquisition through condemnation for a sewer line easement.

- As a condition of development, the property owner is requested to dedicate or grant an easement to the City for sewer line installation.

3.4 Enforcement

The City has the authority to enforce the conditions of Municipal Code Chapter 14.20, Industrial Wastewater Collection and Treatment, through Municipal Code Section 14.20.240 - Enforcement. Further, California Government Code, Sections 54739-54740 grants the City the authority to regulate and/or prohibit, by the adoption of an ordinance, and by issuance of control mechanisms, the discharge of any waste, directly or indirectly, to the City's sewerage facilities.

4.0 Operation and Maintenance Program

The City of Banning employs an Operations and Maintenance Program consistent with the requirements outlined in Section 4.0 of Attachment D to the General Order. The purpose of this program is to prevent environmental discharges by ensuring that all facilities, treatment, and control systems designed to contain and convey sewage to a treatment plant are maintained in good working order and operated as designed.

4.1 Updated Map of Sanitary Sewer System

Figure 4-1 below illustrates the sewer system service area boundaries. The State and Regional Water Boards will be provided access to the City's most up-to-date maps of the sanitary sewer system via https://new.geoviewer.io/, the City's GIS system. The City has established view-only access for Water Boards staff. Upon request, the view-only credentials will be provided to the State and Regional Water Boards via both email and phone call. Additionally, GIS maps will be accessible at the City for review by Water Board Inspectors.

4.2 Preventive Operation and Maintenance Activities

This section describes the City's scheduling system and data collection system for preventive operation and maintenance activities conducted by City staff and contractors.

Planned Operation and/or Maintenance Activity	Activity Schedule/Goal	Party Responsible for Performing Activity
Sewer line inspection and cleaning	The entire sewer system is inspected and cleaned **biennially**. Additionally, specific attention will be given to known problem areas, including those prone to tree root intrusion. These areas will undergo higher-frequency inspections and maintenance to proactively address potential issues before they escalate. Additionally, areas where roots become a problem the City hires a company to perform herbicide foaming agent to kill roots within the troubled area.	City Staff and Contractors
Visual inspections of manholes	Manholes are visually inspected **annually.** Additionally, 50% of the manholes in the system are sprayed with insecticide **biennially**.	City Staff and Contractors
CCTV inspections of sewer pipes	CCTV inspections occur at an average rate of **2-2.5 miles/month**.	City Staff

Table 4-1Preventive Operation and Maintenance Schedule

4.2.1 Sewer Line Inspection and Cleaning

A work order system is used to track the time spent cleaning the City's sewer system. Scheduled cleanings are based on the date the system was last cleaned, with the goal of cleaning the entire sewer system every 12 months. Therefore, the last cleaned date is typically 12 months prior to the current date. However, this date can change

based on need-based cleanings, such as removing blockages. At the beginning of each week, the collection crew is informed about the lines that require servicing that week. When a section of the sewer is cleaned, the collection crew completes a cleaning record for that section, including:

- Date and time of the cleaning
- Method of cleaning
- Identity of the cleaning personnel
- Cause of any stoppages
- Location of stoppage or routine cleaning activity
- Any further actions that are necessary or taken

Upon completing the job, the collection crew documents their findings on the inspection order. All completed inspection orders are entered into the Nobel "Geoviewer" GIS system, along with daily statistics (e.g., sewer line footage cleaned, CCTV footage). The information from the work orders is then entered into the sewer maintenance log. This data allows for the identification of trends in various sewer problems, such as root intrusion, grease accumulation, hydraulic restrictions, and surcharge conditions. Additionally, the information from the inspection orders helps determine if an area requires high frequency cleaning due to periodic obstructions like roots or grease.

A sewer line inspection program has been developed to document chronic sewer problems and recommend increased cleaning frequencies for problematic areas. Additionally, the sources of these chronic issues will be identified and addressed. Problematic sites are added to the high-frequency cleaning list until the issues are effectively mitigated.

4.2.2 Visual Inspections of Manholes

The City's Wastewater Department and contractors inspect manholes as part of the cleaning activities. If deficiencies are found, a work order is created to address the issue. During the inspection of manholes and sewer lines, the following observations are recorded:

- Conditions of the manhole frame and cover
- Evidence of surcharge
- Offsets or misalignments

- Details of the primary cause of cracks or breaks in the manhole or pipe, including blockages
- Presence of corrosion (only if extreme)
- If repairs are necessary
- Manhole identifying number and location
- Wastewater flow only if surcharged or backed up
- Presence of infiltration, location, and estimated quantity
- Accumulations of grease, debris, or grit

4.2.3 CCTV Inspections

The City's closed-circuit television (CCTV) inspection crew and contractors perform video inspections of the sewer lines. City crews are trained in the use of the equipment. These video inspections focus on the following:

- Pipe size, type, length, and joint spacing
- Distances are recorded
- Structural deficiencies
- Corrosion
- Inflow/Infiltration
- Illegal connections
- Results of the video inspection
- CCTV operator name
- Cleanliness of the line
- Location and identification of the line and manholes being examined

Upon completion of the CCTV examination, the sewer line is rated based on the defects discovered during the video inspection. The City acknowledges that the CCTV program is essential for the effective management and maintenance of the sewer collection system.

4.2.4 Data Collection System

The City uses Nobel, a GIS program, to document and track system inspection and maintenance activities. City staff employ Nobel to record the distance of sewer pipes inspected through CCTV and visual means, the distance cleaned, locations of emergency call-outs, sewer repairs, lift station maintenance and repairs, and sewer investigations. Periodically, the City generates a report from the data

entered into Nobel, presented as a table. This information is used by the City to address areas with frequent problems.

4.3 Training

To comply with the General Order, the City employs a comprehensive training program that includes the following components:

- **General Order Requirements**: Staff receive detailed training on the specific obligations and responsibilities outlined in the General Order.
- **Spill Emergency Response Plan**: Training covers the City's Spill Emergency Response Plan procedures, including practice drills.
- **Spill Volume Estimations**: Filed operators are trained in accurately estimating spill volumes using practices and estimation tools.
- **CIWQS Reporting**: Staff responsible for data submission are trained in electronic procedures within the CIWQS platform.

This structured training ensures all staff are knowledgeable and prepared to comply with the requirements of the General Order.

4.4 Equipment Inventory

The City maintains a comprehensive inventory of sewer system equipment to ensure the efficient operation and maintenance of the sewer collection system. This inventory includes detailed records of all equipment used in the system, along with the identification of critical replacement and spare parts necessary for maintaining system reliability and performance.

Equipment Inventory:

The inventory includes, but is not limited to, the following types of equipment:

- Pumps and motors
- Valves and actuators
- Manhole covers and frames
- Sewer cleaning and inspection equipment (e.g., jetting machines, CCTV inspection units)
- Monitoring and control systems

Critical Replacement and Spare Parts:

To minimize downtime and ensure prompt repairs, the City identifies and maintains a stock of critical replacement and spare parts. These parts are essential for addressing equipment failures and include:

- Spare pumps and motor units
- Backup valves and actuators
- Replacement manhole covers and frames
- Essential components for sewer cleaning and inspection equipment
- Spare parts for monitoring and control systems

Inventory Management:

The City employs a systematic approach to inventory management, which includes:

- Regular audits of the equipment inventory to ensure accuracy and availability
- A tracking system to monitor the usage and replenishment of spare parts
- Coordination with suppliers to ensure the timely procurement of critical components
- Documentation of all equipment and parts in a centralized database accessible to maintenance staff

This inventory and management system ensures that the City is well prepared to handle maintenance and emergency situations, thereby maintaining the integrity and reliability of the sewer collection system.

5.0 Design and Performance Provisions

This section outlines updated design criteria, construction standards, and inspection procedures for sewer system infrastructure. It ensures that construction, repair, and rehabilitation activities meet current hydraulic capacity requirements and operational standards. Additionally, it specifies procedures for inspecting and testing newly constructed, installed, repaired, and rehabilitated components to ensure quality and reliability.

5.1 Updated Design Criteria and Construction Standards and Specifications

The City has established design criteria for the construction, installation, repair, and rehabilitation of sewer system infrastructure. These criteria include:

- **Pipelines**: Minimum diameter, material specifications, slope requirements, and hydraulic capacity.
- **Pump Stations**: Design flow rates, pump capacity, redundancy requirements, and control systems.
- **Appurtenances**: Manhole specifications, backflow prevention devices, and connection standards.

The City's design criteria can be found in the 2018 Integrated Master Plan (Appendix E) while our construction details can be found on the City's website at: https://banningca.gov/21/Engineering.

5.2 Procedures and Standards

The City's procedures and standards for inspecting and testing newly constructed, newly installed, repaired, and rehabilitated system pipelines, pumps, and other equipment are based on the Greenbook: Standard Specifications for Public Works Construction. This established standard encompasses the necessary guidelines and requirements for ensuring the quality and integrity of all relevant system components.

6.0 Spill Emergency Response Plan

6.1 State Regulatory Requirement

Each Enrollee shall develop and implement an overflow emergency response plan that identifies measures to protect public health and the environment. At a minimum, this plan must include:

(a) Proper notification procedures so that the primary responders and regulatory agencies are informed of all SSOs in a timely manner;
(b) A program to ensure an appropriate response to all overflows;
(c) Procedures to ensure prompt notification to appropriate regulatory agencies and other potentially affected entities (e.g. health agencies, Regional Water Boards, water suppliers, etc.) of all SSOs that potentially affect public health or reach the waters of the State in accordance with the MRP. All SSOs shall be reported in accordance with this MRP, the California Water Code, other State Law, and other applicable Regional Water Board WDRs or National Pollution Discharge Elimination System (NPDES) permit requirements. The SSMP should identify the officials who will receive immediate notification;
(d) Procedures to ensure that appropriate staff and contractor personnel

are aware of and follow the ERP and are appropriately trained;

(e) Procedures to address emergency operations, such as traffic and crowd control and other necessary response activities;

(f) A program to ensure that all reasonable steps are taken to contain and prevent the discharge of untreated and partially treated wastewater to waters of the United States and to minimize or correct any adverse impact on the environment resulting from the SSOs, including such accelerated or additional monitoring as may be necessary to determine the nature and impact of the discharge;

(g) Clean the spill area and drainage conveyance system in a manner that does not inadvertently impact beneficial uses in the receiving waters;

(h) Implement technologies, practices, equipment, and interagency coordination to expedite spill containment and recovery;

(i) Implement pre-planned coordination and collaboration with storm drain agencies and other agencies/departments prior, during, and after spill event;

(j) Conduct post spill assessments of spill response activities;

(k) Document and report spill events as required in the General Order; and

(l) Annually, review and assess effectiveness of the Spill Emergency Response Plan, and update Plan as needed.

6.2 Spill Emergency Response Plan Operating Procedures

The City has created SOP's that address specific aspects of its SSO emergency response that satisfies plan requirements contained within the WDR SSS. All staff are trained on the procedures contained within the applicable SOP's and all contractors who may be working on or around sewer facilities are made aware of emergency response procedures in their scope of work which is included in mandatory pre-job training sessions. A copy of the Spill Emergency Response Plan can be found in Appendix F.

7.0 Sewer Pipe Blockage Control Program

This section outlines the comprehensive Sewer Pipe Blockage Control Program aimed at preventing or mitigating blockages within the sanitary sewer system. The program encompasses various strategies and initiatives to prevent, manage, and address blockages caused by substances such as FOG and other pipe-blocking materials.

Discharges of FOG from animal and vegetable sources can cause sewer line blockages, leading to SSOs. The primary sources of FOG discharges are Food

Service Establishment (FSE), such as restaurants, cafeterias, penal institutions, schools, colleges, universities with food services, and commercial kitchens, as well as residential users. These discharges often result from poor housekeeping practices in restaurants and uninformed decisions by residential users, ultimately leading to SSOs.

Rags are commonly introduced into the sewer system by hospitals, hotels, industrial launderers, assisted living facilities, and residential users. When rags enter the sewer system, they can cause blockages that may result in SSOs. These discharges often stem from uninformed decisions by commercial, industrial, and residential users.

Other common sewer pipe blocking categories include root intrusions. Tree roots can become difficult to control, and sometimes they will permeate sewer lines and cause blockages. The City implements mitigating efforts to control root intrusion and they include sewer line inspections and cutting.

7.1 Public Education and Outreach Program

The City has developed a comprehensive public education and outreach program to promote the proper disposal of pipe-blocking substances, including FOG, rags, and other materials. The objective of this program is to prevent sewer line blockages and SSOs by informing and educating residents, businesses, and institutions within the city.

The outreach program targets a variety of audiences, including residential users, FSEs, commercial kitchens, schools, colleges, universities, hospitals, healthcare facilities, and industrial facilities.

To effectively reach these audiences, the City will utilize a range of educational materials and methods, such as:

- Regular inspections at FSEs and industrial facilities.
- Informational brochures and flyers distributed semi-annually.
- Distribution of BMP posters at FSEs.
- Direct mailings to residents and businesses.
- Collaboration with local organizations and agencies.

The implementation schedule for these activities includes:

- Semi-annual inspections and educational visits to FSEs and other facilities.

- Semi-annual distribution of informational brochures and flyers.
- Consistent delivery of BMP posters whenever an FSE is found to be missing one.
- Ongoing collaboration with local organizations and agencies.

Regular inspections are the primary means of education and outreach to the FSE community. During FSE inspections, inspectors take the opportunity to inform and educate owners or managers about the various laws and regulations that impact their business. They also provide useful information related to interceptor design, maintenance, and businesses that can assist restaurants in maintaining pretreatment equipment. Topics covered include:

1. Product usage and substitution;
2. Good housekeeping practices;
3. Grease interceptor evaluation;
4. Ordinance 1271 legal authority citations; and
5. The City's wastewater permits requirements.

Inspectors provide BMP FOG Posters, displayed below, to each FSE and instruct site managers on the importance and requirements of implementing BMPs. Posting FOG Posters is mandatory, and failure to implement BMPs will result in enforcement actions.

Figure 7-1 FSE BMP Posters

The City will evaluate the effectiveness of the public education and outreach program through community feedback, inspection results, and the frequency of SSOs. An annual review of the program will be conducted, and necessary adjustments will be made to enhance its effectiveness and ensure it meets the needs of the community.

7.2 Disposal Plan and Schedule

The City has developed a comprehensive plan to ensure the proper disposal of pipe-blocking substances, including FOG, rags, and other debris, generated within the sanitary sewer system service area. This plan includes a list of acceptable disposal facilities, a schedule for regular disposal, and provisions for additional facilities as needed.

The following facilities are approved for the disposal of FOG, rags, and other debris:

Baker Commodities
4020 Bandini Blvd.
Vernon, CA 90058
(323) 267-3634

California Pumping and Sanitation
1057 S. Washington Ave.
San Bernardino, CA 92408
(866) 672-1177

Co-West
2586 Shenandoah Way
San Bernardino, CA 92407
(909) 887-4309

JN Grease Services
P.O. Box 7093
Riverside, CA
(951) 343-1221

These facilities have been vetted to ensure they meet all necessary regulatory and operational standards. The list is reviewed and updated annually.

FSEs and other facilities must dispose of used cooking grease and oil in designated containers and hire a third-party company for waste hauling as needed. Additionally, commercial, industrial, and residential users are instructed to dispose of other pipe-blocking substances, such as rags, in their garbage cans, provided they comply with all garbage hauler requirements. Emergency disposal services are available to promptly address unexpected blockages.

Compliance with the disposal plan is monitored through regular inspections and audits of FSEs and other facilities. These facilities must maintain

records of all disposal activities, including receipts from approved disposal facilities, which must be available for review upon request.

7.3 Legal Authority and Preventive Measures

The discharge of wastewater by a user that causes a sewer line obstruction or blockage is prohibited by the federal Clean Water Act (40 CFR 403.5(b)(3)) and Ordinance 1206. This authority allows the City to take necessary actions to prevent harmful discharges, ensuring the protection of the sewer infrastructure and the environment.

Prohibited discharges include but are not limited to hazardous waste, FOG, rags, chemicals, and any substances that can cause blockages or damage to the sewer system. To enforce these prohibitions, the City established an inspection and monitoring program. Regular inspections, including CCTV inspections and manhole checks, are conducted to identify potential issues. Preventive maintenance activities, such as routine sewer line cleaning and root control measures, are implemented to keep the sewer system in good working order.

Public education and outreach programs are crucial in preventing discharges that cause blockages. The City informs residents and businesses about proper disposal practices through informational materials, routine inspections, and resources available on the City's website. These efforts help to ensure that the community understands the importance of keeping harmful substances out of the sewer system.

The City's enforcement mechanisms include issuing Notices of Violation (NOVs), Cease and Desist Orders (CDOs), and imposing fines for non-compliance with discharge prohibitions. Severe or repeated violations may result in legal action. By maintaining a firm legal framework and proactive measures, the City effectively prevents spills and blockages, ensuring the integrity and reliability of the sewer system.

7.4 Grease Removal Device Requirements

The City mandates that all FSEs, including restaurants, cafeterias, commercial kitchens, and similar facilities, install grease removal devices such as grease traps or interceptors to prevent FOG from entering the sewer system. These requirements are in place to ensure the effective management of FOG discharges and to prevent blockages that could lead to SSOs. The County of Riverside Department of Environmental Health generally does not allow the indoors installation of grease traps.

Grease removal devices must meet the design criteria specified in the current version of the Uniform Plumbing Code. Devices must be adequately sized based on the volume and type of wastewater generated by the facility. Each device must include at least two chambers with manhole covers and a sample box to allow for compliance sampling.

Proper maintenance of grease removal devices is crucial for their effective operation. FSEs are required to clean and maintain their devices regularly to ensure that at least 75% of the design capacity is available at all times. The City conducts semi-annual inspections of grease interceptors to evaluate their condition and effectiveness in removing FOG.

FSEs must implement BMPs to minimize FOG discharges. These practices include proper disposal of cooking oil, regular cleaning of kitchen equipment, and employee training on FOG management. The City provides FOG BMP posters that must be displayed at each facility to reinforce these practices. See Figure 7-1 for an example of the posters.

To ensure compliance, FSEs must maintain records of all maintenance activities, including cleaning schedules, service receipts, and inspections. These records must be available for review by City inspectors upon request.

7.5 Inspection and Enforcement Authority

The City is authorized to inspect grease-producing facilities under Municipal Code Section 13.20.210, which mandates regular inspections to ensure compliance with FOG regulations. Inspections are conducted semi-annually, and frequencies are increased based on the FSE's compliance history. During inspections, staff will check grease interceptors, review maintenance logs, and ensure that BMPs are being followed.

The ordinance provides the legal authority to take enforcement actions against any user causing a sewer line obstruction and/or SSO. Successful enforcement requires a firm foundation of court-admissible evidence, which must be objective and free of personal opinions. CCTV evidence is critical in enforcement actions against users responsible for sewer line blockages and/or SSOs. In addition to CCTV evidence, Pretreatment conducts inspections at suspected businesses to investigate the causes of blockages and/or SSOs. Once all evidence is collected, it is reviewed, and an enforcement strategy is developed.

The level of initial enforcement will always align with the severity or chronic nature of the violation. If debris accumulation in the sewer line has just begun (i.e., no SSO or sewer obstruction has occurred), a correction

notice may be issued to improve housekeeping practices and evaluate business practices. If debris accumulation is significant and/or an SSO has occurred, more severe enforcement actions are warranted. A Notice of Violation (NOV) or a Cease and Desist Order (CDO) may be issued with a compliance schedule to mitigate the conditions that caused the blockage and/or SSO. The NOV or CDO will require the immediate cessation of discharges causing the blockage and/or SSO, and the user must take all necessary actions to prevent future occurrences. Written corrective action plans are required, and users are held accountable for their implementation. Failure to comply with correction orders may result in additional civil and/or criminal actions.

Ordinance 1271 prohibits the use of any chemical or material that emulsifies, suspends, or dissolves oil and grease, as well as the use of any microbiological product to metabolize FOG. Pretreatment inspection staff continually search for these products during restaurant inspections. When a prohibited product is discovered, the user is ordered to stop its use immediately and remove it from the premises. Non-compliance with these orders may lead to further enforcement actions, including civil and/or criminal actions.

The City contracts with G&G Environmental Compliance, Inc. that employs three full-time inspectors trained and certified in FOG program enforcement. Inspectors undergo annual training to stay updated on FOG regulations and best practices. All inspections and enforcement actions are documented in the City's database, and activities are reviewed quarterly to assess the program's effectiveness and identify areas for improvement.

7.6 Identification of Blockage-Prone Sections

The City has implemented a program to identify sections of the sanitary sewer system that are prone to FOG blockages and to establish a cleaning schedule for each identified section. This program includes:

- **Data Collection and Analysis**: Historical data on SSOs and blockages are reviewed regularly. GIS mapping is used to track and visualize problem areas.
- **Regular Inspections**: Field inspections, including CCTV, are conducted regularly in high-risk areas. Findings are documented.
- **Prioritized Cleaning Schedule**: Based on inspection data and historical trends, cleaning schedules are developed with higher frequencies for problem areas.

- **Documentation**: All cleaning activities are recorded, including dates, locations, and observations, to ensure an effective and responsive maintenance program.
- **Ongoing Evaluation**: Performance metrics are established, and periodic reviews of the cleaning schedules are conducted to ensure their effectiveness and make adjustments as needed.
- **Staff Coordination and Training**: Regular training and communication ensure that all relevant personnel are informed and equipped to address FOG issues.
- **Reporting**: Activities and compliance with the General Order are reported to regulatory bodies, and public awareness initiatives are conducted to educate the community on the importance of proper FOG disposal.

7.7 Source Control Measures Implementation

The City implements a comprehensive approach to address FOG discharges into the sanitary sewer system. Through field inspections and stakeholder engagement, we have identified key areas within each sewer system section where FOG sources are prevalent. We enforce regulatory compliance by conducting regular inspections of FOG-generating establishments and ensuring adherence to relevant regulations and ordinances.

To raise awareness and promote proper FOG disposal practices, we have developed public education and outreach programs targeting residents and businesses. These programs provide valuable information on the importance of FOG control and offer training and resources to establishments to implement best management practices.

Furthermore, we offer technical assistance and support to establishments to help them effectively manage FOG. Our collaboration with industry associations and stakeholders enhances our efforts in providing guidance and support to FOG-generating establishments.

To monitor FOG discharges and assess their impact, we have established a robust monitoring program. This allows us to track FOG levels in the sewer system and take necessary enforcement actions for non-compliance, including penalties and corrective measures.

8.0 System Evaluation, Capacity Assurance and Capital Improvements

This section of the SSMP details the City's approach to maintaining and improving its sanitary sewer system. In line with the General Order, the City routinely

evaluates and assesses system conditions using inspections and advanced technologies like CCTV surveys. Capacity assessments ensure the system can handle current and future flows, guided by updated design criteria and construction standards. Corrective actions are prioritized based on risk to address the most critical issues first, focusing resources on preventing system failures. The City also maintains a Capital Improvement Plan (CIP) to systematically address infrastructure needs, ensuring long-term reliability and compliance with regulatory requirements.

8.1 System Evaluation and Condition Assessment

To evaluate the sanitary sewer system assets, the City of Banning schedules and conducts routine CCTV inspections of the collection system, while its staff and contractors visually inspect lift stations. Additionally, the City reviews historical inspection records as part of the evaluation process.

Over the past five years, the City of Banning has experienced only one spill. This impressive spill record suggests that the current frequency of assessments is sufficient. The annual review of system data and incident reports will guide the identification of high-risk areas requiring more frequent assessment. Budget and resource constraints are also considered to ensure the plan's feasibility. The selected percentage is documented and justified in the SSMP, with progress and outcomes reported annually to adjust the plan as needed.

The City has pinpointed several areas in their sewer system that are prone to collapse and has initiated a plan to re-line these sections. However, these areas are not located near any environmentally sensitive zones, as outlined in Element 8.1 of the General Order. Additionally, according to the latest Clean Water Act Section 303(d) List, none of these sections are near receiving waters with bacterial-related impairments.

City of Banning staff systematically document observations and evidence of potential discharge conditions during and after visual and CCTV inspections. The information gathered during and after the inspections is maintained in the City’s GIS tracking system, Nobel. This information is then utilized to prioritize areas near water bodies and environmentally sensitive regions. Staff receive regular training to recognize and report conditions that could lead to sewage overflows, and immediate response protocols are in place for quick corrective actions. The City maintains a proactive maintenance schedule to address identified issues and prioritizes repairs based on severity and potential impact on water bodies. A public reporting system allows residents to report signs of sewage overflows, ensuring prompt investigation and action.

The City of Banning recognizes the potential impacts of increased storm volumes on the sanitary sewer system. As part of our SSMP, we have established procedures to identify and assess system assets vulnerable to flooding and erosion due to heavier and more frequent storm events. Regular CCTV inspections and visual inspections of lift stations will focus on areas historically prone to stormwater inflows. We will prioritize these areas for maintenance and infrastructure upgrades. Staff training programs will ensure our team is prepared to manage and mitigate climate-related risks, and public communication strategies will keep residents informed of potential impacts and necessary precautions. By implementing these procedures, the City aims to enhance the resilience of our sewer system against climate change-related challenges.

8.2 Capacity Assessment and Design Criteria

The City of Banning includes procedures to identify system components affected by hydraulic deficiencies or capacity limitations. The City utilizes data from the Integrated Master Plan (Appendix E) developed by Carollo, which includes comprehensive flow monitoring and inflow and infiltration (I/I) analysis. This analysis, conducted over a four-week period, establishes baseline sewer flows, estimates available capacity, and isolates I/I impacts. The City assesses system components for dry-weather peak flows and wet weather conditions, evaluating their capacity to handle identified peak flows and extreme weather events. The IMP also informs the identification of major sources contributing to peak flows and the necessary redundancy in pumping and storage capacities. By integrating these procedures, the City ensures that key system elements are adequately sized to prevent spills caused by hydraulic deficiencies and limited capacity.

8.3 Prioritization of Corrective Action

Despite the City's impressive track record with very few spills, we remain committed to using insights from condition and capacity assessments to effectively prioritize corrective actions. After conducting routine evaluations, including inspections and capacity analyses, the City assesses the severity of potential spills associated with system deficiencies. This assessment considers factors such as the potential environmental impact, public health risks, and the likelihood of system failure. Corrective actions are then prioritized based on these severity factors, ensuring that the most critical issues, which could lead to significant spills or adverse impacts, are addressed first. By integrating these assessments into our prioritization process, the City aims to mitigate risks and enhance the overall resilience of the sewer system.

8.4 Capital Improvement Plan

The 2018 Integrated Master Plan provides detailed project schedules and completion dates for all capital improvement initiatives, ensuring timely implementation. The City's 5-year CIP outlines internal and external funding sources for each project, securing financial resources necessary for successful execution. To ensure effective project execution, the City's operations and engineering staff regularly hold routine meetings to coordinate during the planning, design, and construction phases of capital projects. Although there are no other impacted utility agencies, this internal collaboration ensures seamless integration and execution of the CIP.

9.0 Monitoring, Measurement and Program Modifications

This section addresses the City's Adaptive Management, which addresses Plan-implementation effectiveness and the steps for necessary Plan improvement. The City accomplishes this by:

- Maintaining relevant information to establish and prioritize appropriate Plan activities;
- Monitoring the implementation and measuring the effectiveness of each Plan Element;
- Assessing the success of the preventive operation and maintenance activities;
- Updating Plan procedures and activities, as appropriate, based on results of monitoring and performance evaluations; and
- Identifying and illustrating trends, including spill frequency, locations, and estimated volumes.

9.1 Maintaining Relevant Information

The City maintains a centralized database to collect and store all relevant SSMP information, including audit findings, inspection reports, and maintenance records. Regular internal audits are conducted to evaluate compliance and prioritize necessary improvements.

9.2 Monitoring Implementation and Measuring Effectiveness

The Through the State's CIWQS database, the City will monitor the number of spills, spill categories, and spill causes. This data will be utilized to assess the effectiveness of the current Plan and program, identifying areas that need improvement. For instance, if spills are found to be caused by

structural deficiencies, the City will create and implement a plan to enhance its operation and maintenance program.

9.3 Assessing Success of Preventive Operation and Maintenance Activities

Evaluation metrics are established to assess the success of preventive operations and maintenance activities. Field assessments and feedback from staff are used to identify practical challenges and opportunities for enhancement.

9.4 Updating Plan Procedures and Activities

A continuous improvement process is implemented to update SSMP procedures and activities based on monitoring results and performance evaluations. Stakeholders are engaged in the review and update process through regular workshops and training sessions.

9.5 Identifying and Illustrating Spill Trends

Spill data is analyzed to identify trends in frequency, locations, and estimated volumes. GIS mapping tools are used to visualize spill locations and identify hotspots. Root cause analysis is performed for recurring spills to develop targeted solutions and incorporate lessons learned into preventive measures and Plan updates.

9.6 System Resilience

To ensure the effectiveness of resilience measures, we continuously monitor system performance and make necessary adjustments. This includes:

1. **Performance Metrics**: Tracking key performance indicators such as the number of spills, response times, and maintenance activities.

2. **Data Analysis**: Analyzing data from inspections, maintenance records, and spill reports to identify trends and areas for improvement.

3. **Feedback Loop**: Incorporating feedback from system operators, maintenance crews, and the public to refine our procedures and enhance system resilience.

By integrating these procedures into the SSMP, the City maintains a resilient sewer system that can effectively respond to current and future challenges, ensuring the protection of public health and the environment.

10.0 Internal Audits

The City will conduct comprehensive internal audits of the SSMP at a minimum frequency of once every three years, with the first audit due July 1, 2027. These audits are designed to evaluate the implementation and effectiveness of the SSMP, ensure compliance with the General Order, and identify and correct deficiencies to prevent spills and discharges. Each audit will cover the period following the last audit and an audit report will be submitted to the CIWQS Sanitary Sewer System Database within six months after the end of each audit period.

The scope of these audits includes evaluating the SSMP's effectiveness in preventing spills, assessing compliance with the General Order, identifying deficiencies related to ongoing spills and discharges, and recommending necessary modifications to improve the SSMP. The audit will be appropriately scaled to the size and performance of the sewer system, including the number of spills.

The audit team will include sewer system operators and other relevant personnel, with their input being crucial and considered in the audit findings. The audit process begins with a thorough preparation phase, during which previous audit reports and corrective actions are reviewed, and relevant data and documentation related to SSMP activities, spill records, and compliance measures are gathered.

The audit team will consist of the Water and Wastewater Superintendent and a consulting firm to provide third-party independent observation and input into the SSMP's effectiveness. During the execution phase, the audit team will conduct interviews with sewer system operators and other key staff, inspect and review SSMP procedures, maintenance records, and spill response actions, and evaluate the effectiveness of preventive maintenance activities and spill response strategies. In the analysis phase, the collected data will be examined to identify trends, deficiencies, and areas for improvement, and current performance will be compared against SSMP goals and regulatory requirements.

An audit report will be prepared that includes the audit findings, recommended corrective actions, and confirmation that sewer system operators' input has been considered. This report will also include a proposed schedule for addressing identified deficiencies and will be submitted to the CIWQS Sanitary Sewer System Database, ensuring it is accessible only to Water Boards staff.

Following the audit, an action plan will be developed to address the deficiencies identified in the audit report. Responsibilities and timelines for implementing corrective actions will be assigned, and progress will be monitored to ensure that corrective actions are completed as scheduled. The completion of corrective actions

and any subsequent improvements in the SSMP will be documented to ensure continuous improvement and compliance with the General Order.

11.0 Communication Program

This section addresses the City's processes for effective communication with the public and owners/operator of connected systems. The procedures ensure transparency, public involvement, and coordinated management of the sewer system.

11.1 Public Notification of Spills and Discharges

In the event of a spill or discharge that results in the closure of public areas or enters a designated area classified as waters of the state, the City will promptly notify the public through multiple channels. These channels include the City's official website, social media platforms, local news outlets, and community alert systems. The notifications will include details about the incident, affected areas, potential health risks, and recommended actions for the public.

11.2 Public Involvement in SSMP Development and Updates

The City will actively seek public input during the implementation and update of the SSMP. Public meetings and workshops will be held to present the SSMP. These platforms will provide a platform for the public to ask questions, provide feedback, and suggest improvements. All public input will be considered in the finalization of the SSMP and subsequent updates.

11.3 Regular Updates and Information Sharing

The City will maintain a dedicated section on its website for SSMP-related information, including current plans, updates, and progress reports. Regular updates will be provided to keep the public informed about ongoing and upcoming activities related to sewer system management. Additionally, the City's website will be used to communicate the SSMP, FOG Control Program, and other wastewater-related guidance documents and policies. The SSMP, Ordinance, Enforcement Response Plan, and the FOG program will be available for public review, which will also contain feedback opportunities for the public to comment on the City's wastewater services.

Furthermore, the City is providing the Water Boards with access to the City's GIS system, which contains up-to-date sanitary sewer maps, to facilitate effective communication and transparency.

11.4 Communication with Owners/Operators of Connected Systems

The requirement stated in the General Order mandates that the SSMP must include procedures for the Enrollee to communicate with owners/operators of systems that connect into the Enrollee's system, including satellite systems, for system operation, maintenance, and capital improvement-related activities.

However, the City does not have any systems that connect into its sewer system, nor does it have any satellite systems. Therefore, this specific requirement is not applicable to the City's SSMP.

The City's sewer system is a standalone system with no external systems connecting into it. As a result, there are no external owners or operators with whom the City needs to communicate regarding system operation, maintenance, or capital improvement-related activities. All sewer operations and activities are managed internally by the City's own staff and resources.

STATE OF CALIFORNIA
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SANTA ANA REGION

ORDER NO. R8-2010-0033
NPDES NO. CAS 618033

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT AND WASTE DISCHARGE REQUIREMENTS FOR THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, THE COUNTY OF RIVERSIDE, AND THE INCORPORATED CITIES OF RIVERSIDE COUNTY WITHIN THE SANTA ANA REGION

AREA-WIDE URBAN RUNOFF MANAGEMENT PROGRAM

The following Discharger(s) are subject to waste discharge requirements as set forth in this Order:

Table 1. Municipal Permittees (Dischargers)

Principal Permittee	Riverside County Flood Control and Water Conservation District (RCFC&WCD)*	
Co–Permittees	1. Beaumont	9. Moreno Valley
	2. Calimesa	10. Murrieta
	3. Canyon Lake	11. Norco
	4. Corona	12. Perris
	5. County of Riverside (County)	13. Riverside
	6. Hemet	14. San Jacinto
	7. Lake Elsinore	15. Wildomar
	8. Menifee	

The Principal Permittee and the Co-Permittees are collectively referred to as the Permittees or the Dischargers.

Table 2. - Administrative Information

This Order was adopted by the Regional Water Board on:	**January 29, 2010**
This Order will become effective on:	**January 29, 2010**
This Order will expire on:	**January 29, 2015**
The U.S. Environmental Protection Agency (USEPA) and the California Regional Water Quality Control Board have classified this discharge as a major discharge.	
The Discharger must file a Report of Waste Discharge in accordance with Title 23, California Code of Regulations, as application for issuance of new waste discharge requirements no later than 180 days in advance of the Order expiration date.	

IT IS HEREBY ORDERED, that this Order supersedes Order No. R8-2002-0011 except for enforcement purposes, and, in order to meet the provisions contained in Division 7 of the California Water Code (CWC) and regulations adopted there under, and the provisions of the federal Clean Water Act (CWA), and regulations and guidelines adopted there under, the Permittees must comply with the requirements in this Order.

I, Gerard J. Thibeault, Executive Officer, do hereby certify that this Order No. R8-2010-0033 with all attachments is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Santa Ana Region, on January 29, 2010.

I. FACILITY INFORMATION

A. Each of the municipalities listed in Table 1, above, hereinafter called Permittees, owns and/or operates portions of the municipal separate storm sewer system (MS4[1]), through which Urban Runoff is discharged into Waters of the United States (Waters of the US) that are located within the jurisdiction of the Santa Ana Regional Water Quality Control Board (Santa Ana Region). The MS4 falls into one or more of the following categories: (1) a medium or large MS4 that services a population of greater than 100,000 or 250,000 respectively; or (2) an MS4 which contributes to a violation of a Water Quality Standard; or (3) an MS4 which is a significant contributor of Pollutants to Waters of the US; or (4) an MS4 owned and/or operated by a small municipality that is interrelated to a medium or large municipality. Section 402(p) of the CWA requires that discharges of Urban Runoff from MS4 be regulated under a National Pollutant Discharge Elimination System (NPDES) permit.

B. This Order regulates the discharge of Pollutants in Urban Runoff from non-agricultural Anthropogenic sources from the MS4 that is owned and/or operated by the Permittees. The Permittees lack legal jurisdiction over discharges into their MS4 facilities from agricultural activities, State and federal facilities, public schools and hospitals, utilities, railroads, and special districts, Native American tribal lands, wastewater management agencies and other point and non-point source discharges otherwise permitted by the Regional Board. The Regional Board recognizes that the Permittees should not be held responsible for discharges from such facilities or Pollutants in those discharges. However, to the extent that the Permittees authorize the connection of these discharges into their MS4s, this Order requires the Permittees to provide written notification of Water Quality Management Plan (WQMP) requirements for post-construction best management practices (BMPs) and/or other applicable requirements of this Order. A WQMP approved by the Permittee who owns the MS4 may constitute compliance with the General Construction Permit post construction Standards[2] for the Permit Area.

C. The Co-Permittees have established legal authority to control discharges into the MS4 facilities that they own and/or operate. As owners and/or operators of the MS4, the Permittees are responsible for discharges into their MS4 facilities to the extent of their legal authority. The discharge of Pollutants into the MS4 may cause or contribute to, or threaten to cause or contribute to, a condition of Pollution in Receiving Waters. Federal regulations, 40 CFR 122.26(d)(2)(i), require the Permittees to control the discharge of Pollutants into the MS4 to the maximum extent practicable (MEP).

---

1 Note: Acronyms and capitalized terms used in this document are defined in Appendix 4.
[2] The State General Construction Permit Section Order No. 2009-0009-DWQ XIII

Certain activities and sources that generate Pollutants present in Urban Runoff may be beyond the ability of Permittees to prevent or eliminate. Examples of these activities and sources include, but are not limited to: emissions from internal combustion engines, brake pad wear and tear, atmospheric deposition, bacteria and wildlife (including feral cats and dogs) and leaching of naturally occurring nutrients and minerals from local soils. This Order is not intended to address background or naturally occurring Pollutants or flows.

D. The Permittees have identified Major Outfalls and have submitted maps of existing MS4 facilities. The Co-Permittees reported having approximately 269 miles of underground storm drains, and 95 miles of channels[3]. The RCFC&WCD reported having 75 miles in underground storm drains and 59 miles of channels in the Permit Area.

E. On February 5, 2008 Wildomar residents voted for cityhood and the city incorporated on July 1, 2008. Menifee residents voted for cityhood on June 3, 2008 and the city incorporated on October 1, 2008. Both cities in letters dated May 5 and May 6, 2009, respectively, have expressed their intent to be a Co-Permittee in this Order and for the purposes of this Order shall be considered as such. Urban Runoff from the cities of Menifee, Murrieta and Wildomar discharges into watersheds within the Santa Ana Regional Board and the San Diego Regional Board jurisdictions. Therefore, these cities are regulated by MS4 permits issued by both Regional Boards. Urban Runoff from the County of Riverside and RCFC&WCD discharge into watersheds within the Santa Ana, San Diego and Colorado River Region Regional Board jurisdictions. Therefore, these entities are regulated by MS4 permits issued by three Regional Boards.

F. The Permit Area contains 1,396 square miles or 19.1% of the 7,300 square miles within Riverside County and includes 15 of the 26 municipalities within Riverside County. The more densely populated areas of Riverside County are located within the Santa Ana Regional Board's jurisdiction. The population of the Permit Area was estimated at 1,237,388 as of January 1, 2006[4]. The California Department of Finance estimates that as of January 1, 2009, the population of Riverside County was 2,107,653[5]. Other portions of Riverside County are regulated by the San Diego and the Colorado River Basin Regional Boards.

[4] Section 3.3.1 of the 2007 ROWD (Western Riverside Council of Governments (WRCOG), Sub-regional Growth Forecast, Riverside County Projection (Revised Draft), November 22, 2006.)
[5] E-1 report dated April 30, 2009 (http://www.dof.ca.gov/research/demographic/reports/estimates/e-1/2008-09/documents/E-1_2009%20Press%20Release.pdf).

II. FINDINGS

The California Regional Water Quality Control Board, Santa Ana Region (hereinafter the "Regional Board") finds that:

A. BACKGROUND

1. The Co-Permittees own and operate flood control facilities. Some of the natural channels, streambeds and other drainage facilities that are generally considered as Waters of the U.S. have been converted to flood control facilities. In such cases, where a natural streambed is modified to convey storm water flows, the conveyance system becomes both a MS4 and a Water of the US.

2. The Permittees are currently discharging from the MS4 pursuant to Order No. R8-2002-0011, NPDES Permit No. CAS 618033. This Order renews Order No. R8-2002-0011 and regulates discharges of Urban Runoff from the MS4 within Riverside County.

3. On April 27, 2007, the RCFC&WCD, in cooperation with the County of Riverside, (the "County") and the incorporated cities of Beaumont, Calimesa, Canyon Lake, Corona, Hemet, Lake Elsinore, Moreno Valley, Murrieta, Norco, Perris, Riverside, and San Jacinto, jointly submitted a permit renewal application, a Report of Waste Discharge (the "2007 ROWD"), to renew the NPDES permit for discharges of Urban Runoff from the MS4 in the Permit Area. Subsequently, the cities of Menifee and Wildomar also signed letters of intent to include discharges from their MS4 facilities under this MS4 Permit. The County and incorporated cities are hereinafter the "Co-Permittees", and collectively with the Principal Permittee referred to as the "Permittees". The Permit Area is shown in Appendix 1 and includes the urban areas and those portions of agriculture and open space as shown on Appendix 1 that may convert to industrial, commercial, or residential use during the term of this Order.

4. To more effectively carry out the requirements of this Order, the Permittees have agreed that the RCFC&WCD will continue as the Principal Permittee and the County and the incorporated cities within the Permit Area will continue as the Co-Permittees.

5. The Permittees submitted a revised Drainage Area Management Plan ("2007 DAMP") as contained in Appendix B of the 2007 ROWD. The proposed DAMP identifies programs and policies, including best management practices (BMPs), to achieve Water Quality Standards in the Receiving Waters. These BMPs can be organized into two categories: BMPs for existing facilities and BMPs for New Development and Significant Redevelopment. Both categories include regulatory activities, public education programs, waste management, and operations and

maintenance activities. The Permittees currently implement the 2006 DAMP. With the adoption of this Order, the Permittees are required to implement the 2007 DAMP. The DAMP is a dynamic document that defines the MEP standard (see discussion of this term in the Glossary, Appendix 4) for the Permittee activities and is incorporated by reference as an enforceable element of this Order.

6. This Order requires the Permittees to revise the DAMP and associated documents to incorporate new MS4 Permit requirements which include recommendations from the 2007 ROWD. Future modifications of the DAMP, once approved by the Regional Board Executive Officer[6], are also enforceable elements of this Order.

7. During the Third Term Permit, Regional Board staff conducted an evaluation of each of the Permittees' Urban Runoff programs. This evaluation indicated that most of the Permittees lacked proper documentation of procedures and policies for implementation of various elements of their Urban Runoff program. This Order requires each Permittee to develop a Local Implementation Plan (LIP) that documents its internal procedures for implementation of the various program elements described in the DAMP and this Order.

8. On July 13, 1990, the Regional Board adopted the first term Riverside County MS4 permit, Order No. 90-104 (NPDES No. CA 8000192). On March 8, 1996, the Regional Board renewed Order No. 90-104 by adopting the second term Riverside County MS4 permit, Order No. 96-30 (NPDES No. CAS618033). On October 25, 2002, the Regional Board renewed Order No. 96-30 by adopting the third term MS4 permit, Order No. R8-2002-0011(NPDES No. CAS618033).

9. This Order renews Order No. R8-2002-0011 (NPDES No. CAS618033), and regulates discharges of Urban Runoff from the MS4 within the Permit Area in Riverside County. This Order is the fourth term permit and is intended to regulate the discharge of Pollutants in Urban Runoff from non-agricultural Anthropogenic activities and sources under the jurisdiction of and/or maintenance responsibility of the Permittees and is not intended to address background or naturally occurring Pollutants or flows.

10. The Santa Ana River Basin is the major watershed within the Santa Ana Region. The Regional Board and the Permittees recognize the importance of watershed

[6] The Executive Officer shall provide members of the public with notice and at least a 30-day comment opportunity for all documents submitted in accordance with this Order. If the Executive Officer, after considering timely submitted comments, concludes that the document is adequate or adequate with specified changes, the Executive Officer may approve the document or present it to the Board for its consideration at a regularly scheduled and noticed meeting. If there are significant issues that cannot be resolved by the Executive Officer, the document will be presented to the Board for its consideration at a regularly scheduled meeting.

management initiatives and regional planning and coordination in the development and implementation of programs and policies related to water quality protection.

11. It is recognized that in some cases MS4 facilities are used to convey Urban Runoff to sub-regional or regional Treatment Control BMPs or may incorporate regional BMPs directly. The Regional Board recognizes this appropriate strategy for treatment provided that Waters of the US are not used to convey Pollutants. Further, such BMPs are not considered MS4 or Waters of the US.

12. A number of regional and watershed-wide efforts are underway in which the Permittees are active participants. The Regional Board also recognizes that, in certain cases, diversion of funds targeted for certain monitoring programs to regional monitoring programs may be necessary. The Executive Officer is authorized to approve, after proper public notification and consideration of all comments received, reallocation of resources to the watershed management initiatives and regional planning and coordination programs and regional monitoring programs.

13. The Permittees are required to submit all documents, where appropriate, to the Regional Board in an electronic format. All such documents will be posted at the Regional Board's website and all interested parties will be notified. In addition, the website will include the administrative and civil procedures for appealing any decision made by the Executive Officer. Some Urban Runoff issues, such as monitoring, public education, and training can be more effectively addressed on a regional or statewide basis thereby increasing program consistency and efficiency. This Order encourages continued participation in such programs and policies.

B. LEGAL AUTHORITIES

1. This Order Is issued pursuant to Section 402 of the CWA, the Porter-Cologne Water Quality Control Act (Division 7 of the Water Code, commencing with Section 13000), applicable State and federal regulations, all applicable provisions of statewide Water Quality Control Plans and Policies adopted by the State Water Resources Control Board (State Board), the Water Quality Control Plan for the Santa Ana River Basin adopted by the Regional Board (Basin Plan), the California Toxics Rule (CTR), and the California Toxics Rule Implementation Plan. This Order also serves as Waste Discharge Requirements (WDRs) pursuant to Article 4, Chapter 4, Division 7 of the Water Code (commencing with Section 13260).

2. This Order is consistent with the following precedential Orders adopted by the State Board addressing municipal storm water NPDES Permits: Order 99-05-DWQ (Petition of Environmental Health Coalition/Receiving Water Limitation Language for Municipal Storm Water Permits), Order WQ-2000-11 (Petitions Bellflower, City of Arcadia, Western States Petroleum Association, Review of RWQCB and Its

Executive Officer Pursuant to Order 96-054, Permit for Municipal Storm Water and Urban Run-Off Discharges within Los Angeles County), Order WQ 2001-15 (In the Matter of the Petitions of Building Industry Association of San Diego County and Western States Petroleum Association), and Order WQO 2002-0014 (Petitions of Aliso Viejo, et al/Order to stay provision F.5.f of the permit and part of last sentence of Finding 26, permit issued by San Diego Regional Water Quality Control Board).

3. Consistent with the State Board's orders, this Order requires the Permittees to comply with the applicable Water Quality Standards, which is to be achieved through an iterative approach requiring the implementation of increasingly more effective BMPs until Water Quality Standards are not impaired by Urban Runoff. All MS4 permits issued in California specify certain minimum BMPs and incorporate an iterative process that requires increasingly more effective BMPs if the Water Quality Standards are not met.

4. The federal Clean Water Act established a national policy designed to help maintain and restore the physical, chemical and biological integrity of the nation's waters. In 1972, the CWA established the NPDES permit program to regulate the discharge of Pollutants from Point Sources to Receiving Waters. From 1972 to 1987, the main focus of the NPDES program was to regulate conventional Pollutant sources such as sewage treatment plants and industrial facilities. As a result, on a nationwide basis, non-point sources, including agricultural runoff and Urban Runoff, now contribute a larger portion of many kinds of Pollutants than the more thoroughly regulated sewage treatment plants and industrial facilities.

5. Studies conducted by the USEPA, the states, counties, cities, flood control districts and other entities dealing with Urban Runoff indicate that the following are major sources of Urban Runoff Pollution nationwide:

   a. Industrial Facilities where appropriate Pollution Prevention and BMPs are not implemented;

   b. Construction Sites where erosion and sediment controls and BMPs are not implemented; and,

   c. Runoff from urbanized areas.

6. The 1987 amendments to the CWA added Section 402(p) that required the USEPA to develop permitting regulations for storm water discharges from MS4 and from Industrial Facilities, including construction sites. The USEPA promulgated the final Phase I storm water regulations on November 16, 1990. Neither the 1987 amendments to the CWA nor the Phase I storm water regulations (40 CFR Part 122) have been amended since their effective dates.

7. Prior to the USEPA's promulgation of the final storm water regulations, three counties (Orange, Riverside, and San Bernardino) and their incorporated cities located within the Regional Board's jurisdiction requested area-wide NPDES MS4 permits. These area-wide MS4 NPDES permits are:

   a. Orange County, NPDES No. CAS 618030

   b. Riverside County, NPDES No. CAS 618033

   c. San Bernardino County, NPDES No. CAS 618036

8. Consistent with the CWA and the USEPA regulations promulgated pursuant thereto, the State Board and the Regional Board have adopted a number of permits to address Pollution from the sources identified in Finding 5, above. Industrial activities (as defined in 40 CFR 122.26(b)(14)) including construction activities on one or more acres are to be covered under one of the following permits and those individuals or entities that engage in such activities are required to secure permission to engage in such identified activities pursuant to the provisions of one of the following permits:

   a. State Board Order No. 97-03-DWQ, for storm water runoff from industrial activities (NPDES No. CAS000001), (the "General Industrial Activities Storm Water Permit").

   b. State Board Order No. 99-08-DWQ, for storm water runoff from construction activities (NPDES No. CAS000002), (the "General Construction Activity Storm Water Permit"). Order No. 99-08- DWQ was amended by State Board Resolution No. 2001-046 on April 26, 2001, to incorporate monitoring provisions as directed by the Superior Court, County of Sacramento. This Order was renewed on September 2, 2009 by State Board Order No. 2009-0009-DWQ. The requirements of Order No. 2009-0009-DWQ will be effective July 1, 2010.

   c. State Board Order No. 99-06-DWQ (NPDES No. CAS000003) for storm water runoff from facilities (including freeways and highways) owned and/or operated by the California Department of Transportation ("Caltrans").

   d. State Board Order No. 2003-0007-DWQ, for discharges of storm water runoff associated with small linear underground/overhead construction projects (NPDES No. CAS000005), (the "General Permit-Small Linear Underground Projects). After July 1, 2010, most linear construction projects will be regulated under State Board Order No. 2009-0009-DWQ.

   e. The Regional Board also issues individual storm water NPDES permits for certain Industrial Facilities within the Santa Ana River watershed. Currently

there is only one individual storm water NPDES permit that has been issued by the Regional Board for an Industrial Facility (March Air Reserve Base) located within the Permit Area. Additionally, the Regional Board has issued NPDES permits for a number of facilities that discharge process wastewater and storm water; storm water discharge requirements are included in such a facility's NPDES permit.

9. Section 402(p) of the CWA establishes two different performance standards for storm water discharges. NPDES MS4 permits require controls to reduce the discharge of Pollutants to the MEP. NPDES permits issued for industrial storm water discharges (including construction activities) must meet Best Available Technology (BAT) and Best Conventional Pollutant Control Technology (BCT) standards. The CWA and the USEPA regulations allow each state the flexibility to decide what constitutes the MEP.

10. This Order does not constitute an unfunded mandate subject to subvention under Article XIII.B, Section (6) of the California Constitution for several reasons, including the following:

    a. This Order implements federally mandated requirements under CWA Section 402(p)(3)(B). (33 USC § 1342(p)(3)(B)).

    b. The Permittees' obligation under this order are similar to, and in many respects less stringent than, the obligations of non-governmental dischargers who are issued NPDES permits for storm water discharges.

    c. The Permittees have the authority to levy service charges, fees, or assessments to pay for compliance with this Order[7].

    d. The Permittees requested permit coverage in lieu of compliance with the complete prohibition against the discharge of Pollutants contained in federal Clean Water Act Section 301, subdivision (a). (33 USC § 1311(a)).

11. Section 13225 of the CWC identifies the Regional Board as being the enforcement authority for NPDES permits, including the Industrial General Permit, and the Construction General Permit which are collectively referred to as the "General Stormwater Permits." However, in many areas, the Industrial Facilities and Construction Sites discharge directly into MS4 facilities owned and operated by the Permittees. These Industrial Facilities and Construction Sites are also regulated under local ordinances and regulations. The Permittees and Regional Board staff work together to avoid duplicative efforts in regulating these facilities. As part of

[7] Voter approval may be required for new tax levies.

this coordination, the Permittees have been notifying Regional Board staff when they observe, during their routine activities, conditions that result in a threat or potential threat to water quality, or when a required Industrial Facility or Construction Site fails to obtain coverage under the appropriate General Stormwater Permit.

12. This Order does not authorize any act that results in the taking of a threatened or endangered species or any act that is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code Sections 2050 to 2097) or the Federal Endangered Species Act (16 U.S.C.A. Sections 1531 to 1544). This Order requires compliance with Effluent Limits, Receiving Water Limits, and other requirements to protect the Beneficial Uses of Waters of the US. The Permittees are responsible for meeting all requirements of the applicable Endangered Species Act.

13. The Permittees may petition the Regional Board to issue a separate NPDES permit to any discharger of Non-storm Water into MS4 facilities that they own or operate.

14. The Regional Board has considered anti-degradation requirements, pursuant to 40 CFR 131.12 and State Board Resolution No. 68-16, for this discharge. The Regional Board finds that the Urban Runoff regulated under this Order is consistent with the federal and state anti-degradation requirements and a complete anti-degradation analysis is not necessary. This Order requires the continued implementation of programs and policies to reduce the discharge of Pollutants in Urban Runoff. This Order includes additional requirements to control the discharge of Pollutants in Urban Runoff from “Significant Redevelopment,” and “New Development,” as defined in Finding II.G. and Section XII of this Order.

C. RATIONALE FOR REQUIREMENTS

1. The Regional Board developed the requirements in this Order based on information submitted as part of the 2007 ROWD (including the 2007 DAMP), monitoring and reporting data, program audits, and other available information and consistent with the CWA, CWC and regulations adopted thereunder.

2. The Fact Sheet (Appendix 6) which contains additional background information and rationale for requirements specified in this Order is hereby incorporated into this Order and constitutes part of the Findings for this Order. Appendices 1 through 5 and 7 are also incorporated into this Order.

D. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA)

1. Under Water Code Section 13389, this action to adopt an NPDES permit is exempt from the provisions of CEQA, Public Resources Code Sections 21100 -21177 (*County of Los Angeles v. California State Water Resources Control Board* [2006] 142 Cal Appl. 4th 985, mod. [Nov. 6, 2006, B184034] 50 Cal. Rptr 3rd 619, 632-636). This action also involves the re-issuance of WDRs for existing facilities and as such, is exempt from the provisions of CEQA (commencing with Section 21100) in that the activity is exempt pursuant to Title 14 of the California Code of Regulations Section 15301.

2. Compliance with this Order and the DAMP does not necessarily constitute mitigation that is sufficiently specific to satisfy the requirements of CEQA with regards to projects. The intent of the DAMP, WQMP, Storm Water Pollution Prevention Plan (SWPPP) and other programs and policies incorporated into this order is to minimize the impacts from a specific project to a level that is below significance as defined in CEQA.

E. DISCHARGE CHARACTERISTICS

1. This Order regulates Urban Runoff from areas under the jurisdiction of the Permittees. The term Urban Runoff as used in this Order includes storm water runoff, snowmelt runoff and surface runoff and drainage as defined in Appendix 4.
2. Pollutants in Urban Runoff can threaten and adversely affect human health and the environment. Human illnesses have been clearly linked to recreating near storm drains flowing into coastal waters[8]. Also, Pollutants in Urban Runoff can bioaccumulate in receiving waters in the tissues of invertebrates and fish and eventually consumed by humans and other animals.
3. Urban Runoff can carry Pollutants described in the Fact Sheet to rivers, streams, and lakes within the Permit Area (collectively the “Receiving Waters”). In addition, although infrequently, Urban Runoff from the Permit Area can carry these Pollutants to other receiving waters such as the Pacific Ocean.
4. Management of Dry Weather discharges resulting from urbanization provides an opportunity to promote water conservation as well as address water quality.
5. The Co-Permittees discharge Urban Runoff into lakes, drinking water reservoirs, rivers, streams, creeks, and tributaries thereto within the Upper Santa Ana River, Middle Santa Ana River, and San Jacinto hydrologic units within the Santa Ana Region, as shown in Tables 3a and 3b. Some of the Receiving Waters have been designated as Impaired by the Regional Board and the USEPA pursuant to CWA Section 303(d).

[8] The Santa Monica Bay Restoration Project, Epidemiology Study, 1996.

Table 3b. Beneficial Uses and 2006 CWA Section 303(d) Impaired Waters

Watershed Management Areas in Riverside County	Hydraulic Unit	Beneficial Uses
Upper Santa Ana River		
Santa Ana River, Reach 3,	801.21, 801.25, 801.27,	AGR, GWR, REC1, REC2, WARM, WILD, RARE, SPWN
Santa Ana River, Reach 4	801.27, 801.44	GWR, REC1, REC2, WARM, WILD, SPWN
Temescal Creek – Reach 1	801.25	REC1, REC2, WARM, WILD
Temescal Creek – Reach 2	801.32, 801.25	INTERMITTENT - AGR, IND, GWR, REC1, REC2, LWARM
Temescal Creek – Reach 3 **See Lee Lake**		
Temescal Creek – Reach 4	801.34	RARE, INTERMITTENT - AGR, GWR, REC1, REC2, WARM, WILD
Temescal Creek – Reach 5	801.35	AGR, GWR, REC1, REC2, WARM, WILD, RARE
Temescal Creek – Reach 6	801.35	INTERMITTENT - GWR, REC1, REC2, WARM, WILD
Coldwater Canyon Creek	801.32	MUN, AGR, GWR, REC1, REC2, WARM, WILD
Bedford Canyon Creek	801.32	INTERMITTENT - GWR, REC1, REC2, WARM, WILD
Dawson Canyon Creek	801.32	MUN, GWR, REC1, REC2, WARM, WILD
Day Creek	801.21	MUN,PROC, GWR, REC1, REC2, COLD, WILD
San Sevaine Creek	801.21	INTERMITTENT - MUN, GWR, REC1, REC2, COLD, WILD
San Timoteo Wash Reach 3	801.62	IGWR, REC1, REC2, WARM, WILD, RARE
Little San Gorgonio Creek & Tributaries	801.62, 801.63, 801.69	MUN, GWR, REC1, REC2, COLD, WILD
Sunnyslope Channel	801.27,	MUN, REC1, REC2, WARM, WILD, SPWN
Tequesquite Arroyo (Sycamore Creek)	801.27,	GWR, REC1, REC2, WARM, WILD, SPWN
Chino Basin/ Middle Santa Ana		
Chino Creek, Reach 1A	801.21	REC1, REC2, WARM, WILD, RARE
Chino Creek, Reach 1B	801.21	REC1, REC2, WARM, WILD, RARE
Mill Creek (Prado Area)	801.25	REC1, REC2, WARM, WILD, RARE
Cucamonga Creek – Reach 1	801.21	GWR, REC1, REC2, LWARM, WILD

Watershed Management Areas in Riverside County	Hydraulic Unit	Beneficial Uses
San Jacinto San Jacinto River reaches 1 and 6	802.31, 802.32 & 802.21	INTERMITTENT - MUN, AGR, GWR, REC1, REC2, WARM, WILD
San Jacinto San Jacinto River reaches 3-5	802.11, 802.14, 802.21,	INTERMITTENT - AGR, GWR, REC1, REC2, WARM, WILD
San Jacinto San Jacinto River reach 2 **See Canyon Lake**		
San Jacinto San Jacinto River reach 7	802.21	MUN, AGR, GWR, REC1, REC2, COLD, WILD
- Bautista Creek	802.21, 802.23	MUN, AGR, GWR, REC1, REC2, COLD, WILD
Strawberry Creek	802.21	MUN, AGR, GWR, REC1, REC2, COLD, WILD
Fuller Mill Creek	802.22	MUN, AGR, GWR, REC1, REC2, COLD, WILD
Stone Creek	802.21	MUN, AGR, GWR, REC1, REC2, COLD, W ILD
Salt Creek	802.12	INTERMITTENT - REC1, REC2, WARM, WILD
Logan, Black Mtn, Juaro Canyon, Indian, Hurkey, Poppet and Protrero Creeks, and other Tributaries to these Creeks	802.21, 802.22	INTERMITTENT - MUN, AGR, GWR, REC1, REC2, WARM, WILD
Lakes		
Lake Elsinore	802.31	REC1, REC2, WARM, WILD
Canyon Lake	802.11	MUN, AGR, GWR, REC1, REC2, WARM, WILD
Lake Hemet	802.22	MUN, AGR, GWR, POW, REC1, REC2, WARM, COLD, WILD, SPWN
Lake Fulmor	802.21	MUN, AGR, REC1, REC2, WARM, COLD, WILD
Lake Perris	802.11	MUN, AGR, IND, PROC, GWR, REC1, REC2, COMM, WARM, COLD, WILD
Lake Evans	801.27	REC1, REC2, WARM, COLD, WILD
Lake Mathews	801.33	MUN, AGR, IND, PROC, GWR, REC1, REC2, WARM, WILD, RARE
Lee Lake	801.34	AGR, IND, GWR, REC1, REC2, WARM, WILD
Mockingbird Reservoir	801.26	AGR, REC1, REC2, WARM, WILD

AGR: Agricultural Supply; MUN: Municipal and Domestic Supply; GWR: Groundwater Recharge; IND – Industrial Service Supply, POW – Hydropower generation, REC1: Water Contact Recreation; REC2: Non-Contact Water Recreation; WARM: Warm Freshwater Habitat; LWARM: Limited Warm Freshwater Habitat, COLD - Cold freshwater habitat, WILD: Wildlife Habitat, RARE – Rare threatened or endangered species. SPWN – Spawning, reproduction and development waters.

6. Urban Runoff is defined in the Glossary (Appendix 4). It includes those discharges from residential, commercial, industrial, and construction areas within the Permit Area and excludes discharges from Open Space[9], feedlots, dairies, farms and agricultural fields. Urban Runoff consists of storm water and "authorized non-storm water" (see Section VI) surface runoff from drainage sub-areas with various, often mixed, land uses within all of the hydrologic drainage areas that discharge into the Receiving Waters. In addition to Urban Runoff, the MS4 regulated by this Order receives flows from Open Space, agricultural activities, state and federal properties and other non-urban land uses not under the control of the Permittees. The quality of the discharges from the MS4 varies considerably and is affected by, among other things, past and present land use activities, basin hydrology, geography and geology, season, the frequency and duration of storm events, and the presence of past or present illegal and allowed disposal practices and Illicit Connections.

7. Pathogens (from sanitary sewer overflows, septic system leaks, and spills and leaks from portable toilets, pets, wildlife, and human activities) can impact water contact recreation and non-contact water recreation. Floatables (from trash) are an aesthetic nuisance and can be a substrate for algae and insect vectors. Oil and grease can coat birds and aquatic organisms, adversely affecting respiration and/or thermoregulation. Other petroleum hydrocarbon components may cause Toxicity to aquatic organisms and may impact human health. Suspended and settleable solids (from sediment, trash, and industrial activities) may be deleterious to benthic organisms and may cause anaerobic conditions to form. Sediments and other suspended particulates may cause turbidity, clog fish gills and interfere with respiration in aquatic fauna. They may also screen out light, hindering photosynthesis and normal aquatic plant growth and development. However, it is recognized that storm flows from non-urbanized areas such as national forest, state parks, wilderness, and agriculture, as shown on Appendix 1, naturally exhibit high levels of suspended solids due to climate, hydrology, geology and geography.[10] Toxic Substances from pesticides, petroleum products, metals, and industrial wastes can cause acute and/or chronic Toxicity, and can bioaccumulate in organisms to levels that may be harmful to human health. Nutrients (from fertilizer use, fire fighting chemicals, decaying plants, confined animal facilities, pets, and wildlife) may cause excessive algal blooms. These blooms may lead to problems with taste, odor, color and increased turbidity, and may depress the dissolved oxygen content, leading to fish kills.

---

[9] Only includes Open Space in strictly unurbanized areas. See Glossary definition of Urban Runoff.
[10] Riverside County Flood Control and Water Conservation District's "Hydrology Manual," dated April 1978 and page II-4 of "Santa Ana River, Design Memorandum No. 1, Phase II GDM on the Santa Ana River Mainstem, including Santiago Creek, Volume 2, Prado Dam." dated August 1988 and D.I. Inman & S.A. Jenkins "Climate Change and the Episodicity of Sediment Flux in Small California Rivers," Journal of Geology, Volume 107, pp. 251-270, 1999.

8. Bacteria and nutrients are the Pollutants of Concern for a majority of the inland waters that are listed under the 303(d) list of Impaired Waterbodies or an adopted Total Maximum Daily Load (TMDL). This Order requires the Permittees to identify sources of bacteria and nutrients in Urban Runoff to their MS4 and to control those Pollutant sources.

9. Recent information[11] shows that plastic wastes and materials released to surface water bodies can harm aquatic species by entanglement or ingestion. This Order requires the Permittees to consider facilities that handle nurdles[12] as a high priority site for inspection, and outreach. Nurdles are a major contributor to marine debris. During a three month study of Orange County researchers found them to be the most common beach contaminant[13]. Nurdles comprised roughly 98% of the beach debris collected in a 2001 Orange County study.

10. The Permittees' water quality monitoring data submitted to date document a number of exceedances of Water Quality Objectives for various Urban Runoff-related Pollutants (fecal coliform bacteria, nutrients, total suspended solids, turbidity, metals, etc.) at various watershed monitoring stations.

11. This Order includes requirements for control of Dry Weather flows from Permittee activities that may cause an exceedance of Water Quality Objectives in Receiving Waters for Total Dissolved Solids (TDS) or total inorganic nitrogen (TIN). Storm water was considered to be an insignificant source for nitrogen/TDS in groundwater.

12. The Permittees' 2003-2004, 2004-2005, 2005-2006, 2006-2007 and 2007-2008 Annual Reports indicate exceedances of Water Quality Objectives for each core MS4 monitoring station discussed in a through g, below. The Permittees have identified nutrients and bacteria as priority constituents for initial corrective actions.

    a. Corona Storm Drain (40) - Six samples were collected and analyzed for fecal coliforms. Three samples were collected in the Dry Season and three during Wet Weather events. All samples analyzed exceeded bacteria (as fecal coliform) Water Quality Objectives with a maximum value of 160,000 MPN fecal coliforms. Boron analyses exceeded Water Quality Objectives of 0.75 mg/L in

---

[12] A nurdle is a plastic pellet, also known as pre-production plastic pellet or plastic resin pellet.
[13] Moore, Charles (2002). "A comparison of neustonic plastic and zooplankton abundance in Southern California's coastal waters and elsewhere in the North Pacific". *Algalita Marine Research Foundation*. http://www.mindfully.org/Plastic/Ocean/Marine-Debris-Panel30oct02.htm.

one out of eighteen samples collected (0.78 mg/L). Six samples were collected and analyzed for Total Dissolved Solids (TDS) in 2003-2004. All samples were below the Temescal Creek and Santa Ana River Reach 3 Water Quality Objectives of 800 mg/L/700 mg/L TDS (respectively) and only one (11 mg/L) of ten samples (2005-2008) exceeded the 10 mg/L total nitrogen objective.

b. Sunnymead Channel (316) - Three samples were collected during Wet Weather events and analyzed for fecal coliforms in this time frame. All samples were greater than 5000 MPN and exceeded bacteria Water Quality Objectives of 200 or 400 MPN fecal coliforms. Two samples were collected during Wet Weather events and analyzed for TDS and were below the Water Quality Objective of 700 mg/L for Canyon Lake. Total nitrogen values in all ten samples collected during Wet Weather events were below the Water Quality Objective of 8 mg/L.

c. Hemet Channel (318) - All four Wet Weather samples were detected at greater than 7000 MPN and exceeded the bacteria Water Quality Objective of 200 or 400 MPN for fecal coliforms. As Salt Creek does not have numeric objectives for TDS, the Receiving Water for Salt Creek is Canyon Lake with an objective of 700 mg/L TDS. All eighteen samples collected during Wet Weather events and analyzed for TDS were below the Canyon Lake Water Quality Objective. Total nitrogen values in all nine samples collected during Wet Weather events were below the Water Quality Objective of 8 mg/L.

d. Magnolia Center (364) – Eleven out of thirteen samples (3-Wet Weather samples [>160000 MPN maximum concentration] and 10 dry [5000 MPN maximum]) collected exceeded the Water Quality Objective for fecal coliform (200 or 400 MPN MPN). Two (both collected during Wet Weather events) out of thirty-four samples identified total nitrogen concentrations in excess of the 10 mg/L Water Quality Objective. The maximum concentration measured was 13 mg/L. Water Quality Objective of 700 mg/L TDS were exceeded in three out of eight samples analyzed. The maximum TDS concentration was 930 mg/L TDS.

e. University Wash Channel (702) – All three samples were detected at greater than 5000 MPN concentration and exceeded the fecal coliform Water Quality Objectives of 200 or 400 MPN. The maximum concentration was 13,000 MPN. One (11 mg/L) out of sixteen samples analyzed for total nitrogen was above the Santa Ana River Reach 4 Water Quality Objective of 10 mg/L. Ten samples analyzed for TDS were below Water Quality Objective of 550 mg/L.

f. North Norco Channel (707) – Three out of four samples (>16000 MPN maximum) analyzed for fecal coliform exceeded bacteria Water Quality Objective of 200 or 400 MPN fecal coliform. Three (1300 mg/L maximum concentration dry, 900 mg/L wet) out of four samples analyzed for TDS were above the Santa Ana River-Reach 3 Water Quality Objective of 700 mg/L. Two

samples were Dry Weather and two samples were Wet Weather. One out of ten samples analyzed for total nitrogen exceeded the Water Quality Objective of 10 mg/L for total nitrogen.

g. Perris Line J Channel (752) – All four Wet Weather samples analyzed exceeded bacterial indicator Water Quality Objective the highest value was 13,000 MPN fecal coliform. Two of four samples analyzed for TDS exceeded the Water Quality Objective of 700 mg/L for Canyon Lake. One out of twelve samples analyzed exceeded the Water Quality Objective of 8 mg/L for total nitrogen.

13. The Permittees are participating in several studies in conjunction with the Storm Water Monitoring Coalition (SMC), Storm Water Quality Standards Task Force, the Lake Elsinore and Canyon Lake TMDL Task Force, the Middle Santa Ana River TMDL Task Force and Southern California Coastal Water Research Project (SCCWRP) to address the elevated fecal bacterial indicator levels. Also, the Permittees are anticipating that the use of fecal bacterial indicator will be changed to E. coli and the reclassification of REC uses for several MS4 facilities in the near future. However, E. coli data still indicates Water Quality Objective exceedances that will need to be addressed as part of the TMDL.

14. The above monitoring results, the 303(d) list of Impaired Waterbodies and the approved TMDLs indicate that bacterial contamination is one of the persistent problems in Urban Runoff. TMDL Implementation Plans including Urban Runoff Waste Load Allocations (WLAs) have been adopted by the Regional Board for the Middle Santa Ana River to address this problem. It should be noted, however, that the work of the Storm Water Quality Standards Task Force is likely to result in changes to Recreational Water Quality Objectives and implementation measures, including the suspension of recreational standards during high flow events. Further, some MS4 facilities may be recategorized as REC 2 or REC X (REC 1 nor REC 2) pursuant to Use Attainability Analyses (UAAs). These changes will likely allow the Permittees to focus their TMDL compliance resources on bacterial contamination that is affecting recreational swimming areas used during the Dry Season as the highest priority.

15. The Santa Ana River is the major Receiving Water in the Permit Area. During non-storm periods the flow in the River is dominated by effluent from POTW discharges. POTW discharges are regulated under NPDES permits issued by the Regional Board. In addition, the quality of the Santa Ana River within the Upper Santa Ana sub-watershed is greatly influenced by runoff from agricultural activities. Urban Runoff from the Permit Area constitutes a minor component of the Dry Weather flow in the Upper Santa Ana and San Jacinto sub-watersheds of the Santa Ana River. However, Urban Runoff may be more polluted than POTW discharges and therefore a more significant concern based on monitoring results identified in the Annual Reports.

F. CWA SECTION 303(D) LISTED WATERBODIES AND TMDLS (ALSO SEE SECTION K)

1. Water quality assessment conducted by Regional Board staff has identified a number of Beneficial Use Impairments due, in part, to Urban Runoff. Section 305(b) of the CWA requires the USEPA and each state that has been delegated NPDES permitting authority to routinely monitor and assess the quality of waters of their respective regions. If this assessment indicates that Beneficial Uses are not met, then that waterbody must be listed under Section 303(d) of the CWA as an Impaired Waterbody.
2. Based on the Regional Board's 2006[14] water quality assessment a number of water bodies within the Permit Area are listed (see Table 4, below) as Impaired pursuant to Section 303(d).

Table 4 - Impaired Waterbodies

Waterbody	Pollutant	Potential Sources	Proposed TMDL Completion
Santa Ana River, Reach 3,	Pathogens	Dairies	Approved 2007
Canyon Lake	Nutrients	Non-point Source	Approved 2005
	Pathogens	Non-point Source	Listing under evaluation
Lake Elsinore	Nutrients	Non-point Source	Approved 2005
	Unknown Toxicity PCBs	Unknown Unknown Non-point Source	2021 2019
Lake Fulmor	Pathogens	Unknown Non-point Source	2019
Santa Ana River, Reach 4	Pathogens	Non-point Source	2019

3. Federal regulations require that a total maximum daily load (TMDL) be established for each 303(d) listed waterbody for each of the Pollutants causing Impairment. The TMDL is the total amount of a Pollutant that can be discharged to a subject waterbody, while still enabling the waterbody to attain Water Quality Standards in

[14] On April 24, 2009, the Regional Board adopted Resolution No. R8-2009-0032 approving the CWA Section 305(b) Integrated Report/CWA Section 303(d) List of Impaired Waterbodies. Minor additional modifications were approved by the Regional Board on October 23, 2009. When the revised list is approved by the State Board and the USEPA, the 2006 list will be updated.

the receiving water. Attaining Water Quality Standards means that the receiving waterbody's Water Quality Objectives are met and its Beneficial Uses are protected. The TMDL is the sum of the individual WLAs for point source inputs, Load Allocations (LAs) for Non-Point Source inputs and natural background, and a margin of safety. The TMDLs are one of the bases for limitations established in Waste Discharge Requirements.

4. The Basin Plan amendment incorporating the Middle Santa Ana River Watershed Bacterial Indicator TMDLs (MSAR TMDL) was approved by the Regional Board on August 26, 2005 (Resolution No. R8-2005-0001), by the State Board on May 15, 2006, by the state's Office of Administrative Law on September 1, 2006, and by the USEPA on May 16, 2007.

5. The MSAR TMDL established limits for Bacterial source Indicators for Santa Ana River (Reach 3), Chino Creek (Reaches 1 and 2), Prado Park Lake, Mill Creek (Prado Area), and Cucamonga Creek (Reach 1). The MSAR TMDLs Implementation Plan identifies three sub-watersheds in Riverside County that drain to the Santa Ana River, Reach 3: 1) Riverside Watershed - Contributes surface drainage generally westward from the City of Riverside to the Santa Ana River; 2) Temescal Canyon watershed - Contributes surface drainage generally northward to Temescal Creek and then to the Santa Ana River; and 3) Chino Basin - The southeastern portion of the Chino Basin drains generally south to the Santa Ana River in Riverside County.

6. The MSAR TMDLs specifies WLAs for Urban Runoff, and discharges from concentrated animal feeding operations. LAs are specified for runoff from other types of agriculture and from natural sources (open space/undeveloped forest land). WLAs and LAs are specified for both Dry Season discharges and Wet Season discharges, with separate compliance dates. To protect REC1 Beneficial uses, the TMDL has WLAs for fecal coliform and *E. coli*. The Basin Plan currently does not have an established Water Quality Objective for *E. coli*. Stakeholders in the Santa Ana Region have formed the Storm Water Quality Standards Task Force (SWQSTF) to evaluate USEPA's bacterial indicator recommendations and appropriate recreational beneficial use designations for waterbodies throughout the Region. The SWQSTF is expected to make recommendations for the adoption of alternative bacterial indicators such as *E.coli,* based on USEPA's "Ambient Water Quality Criteria for Bacteria - 1986". These and other recommendations of the SWQSTF are likely to result in changes to recreational Water Quality Objectives.

7. The MSAR TMDL Implementation Plan assigns responsibilities to specific MS4 dischargers to identify sources of impairment, to propose BMPs to address those sources, and to monitor, evaluate, and revise BMPs as needed, based on the effectiveness of the BMP implementation program. These are generally considered as the short-term solutions. The MSAR Permittees are required to develop and

implement a long-term solution (a Comprehensive Bacteria Reduction Plan (CBRP)) designed to achieve compliance with the WLAs by the dates specified in the TMDLs. Specific Implementation Plan tasks are described in Chapter 5 of the Basin Plan and are assigned to one or more of the Permittees. Requirements of the TMDL Implementation Plan tasks are incorporated into this Order. A number of these Implementation Plan tasks are also jointly assigned to non-Permittee stakeholders. The stakeholders have established TMDL task forces to jointly implement and coordinate the TMDL Implementation Plan tasks.

8. The MSAR TMDL Task Force members are listed in Table 5.

Table 5 - Middle Santa Ana River Bacterial Indicator TMDL Task Force

MS4 Permittees	**Non-MS4 Permittees**
Corona, City of	Santa Ana Watershed Project Authority
Norco, City of	US Department of Agriculture, Forest Service
Riverside, City of	Ag Pool, Milk Producers Council
Riverside, County of	Region 4 MS4 Permittees - Claremont and Pomona (pending formal agreement)
RCFC&WCD	Regional Board
San Bernardino County Flood Control District (representing the County of San Bernardino and the municipalities named in the TMDL)[(San Bernardino County, and the Cities of Chino, Chino Hills, Fontana, Montclair, Ontario, Rancho Cucamonga, Rialto and Upland)]	

9. Pursuant to Task 3 of the MSAR TMDL, on June 29, 2007, the Regional Board approved the monitoring program (Resolution No. R8-2007-0046) proposed by the TMDL Task Force. Pursuant to Task 4 of the MSAR TMDL, on April 18, 2008, the Regional Board approved the Urban Source Evaluation Plan (USEP) that included a BMP effectiveness study (Resolution No. R8-2008-0044) proposed by the TMDL Task Force. This Order requires the Permittees on the Task Force to continue to implement the approved monitoring program and the USEP.

10. A BMP effectiveness study was completed as part of the MSAR Watershed–Wide and BMP effectiveness components of the Middle Santa Ana River Water Quality Monitoring Plan (dated April 3, 2008). The results of this study will be incorporated into a BMP selection criteria that will be used as a guide to address bacterial indicator sources within the MSAR watershed. The Principal Permittee plans to conduct a phase 2 study at its Low Impact Development (LID) testing facility to evaluate the effectiveness of several LID-based BMPs, which will further guide BMP selection in the MSAR watershed.

11. As part of Task 4.1, the MSAR Permittees completed the first phase of the approved USEP (Resolution No. R8-2008-0044) and the report is currently under review by Regional Board staff. Several discrete sources of bacterial indicator were identified, controlled, or eliminated as a result of this effort. Based on the outfall monitoring data collected to date, additional sites are identified, monitored and prioritized yearly for further evaluation in the next phases of the USEP. The next phase of the USEP that will focus on an implementation plan to retrofit BMPs to address elevated bacterial indicators from urban drainage areas flowing into Mill Creek and Cucamonga Creek in San Bernardino County is currently being evaluated.

12. Consistent with Task 4.3, this Order requires the Permittees to revise the DAMP to incorporate the results of the USEP and/or other studies. The DAMP revisions shall include schedules for meeting the bacterial indicator WLAs based on the schedule established in the MSAR TMDLs and the results of the USEP and/or other studies. These revisions shall also provide a proposal and schedule for 1) evaluating the effectiveness of BMPs and other control actions implemented and 2) evaluating compliance with the bacterial indicator WLAs for Urban Runoff by initiating a WLA pre-compliance evaluation monitoring program[15].

13. Pursuant to Task 4.5, the Permittees are required to revise the Water Quality Management Plan to incorporate BMPs as per the USEP, Task 4.1, for New Development and Significant Redevelopment Projects.

14. The Permittees are required to develop a CBRP to achieve compliance with the WLAs by the compliance dates. Periodic evaluation and update of the CBRP may be necessary based on a BMP effectiveness analysis to ensure compliance with the WLAs by the compliance dates.

15. Within the Permit Area, there are two watershed-wide MSAR TMDL monitoring stations (WW-S1 Santa Ana River Reach 3 at MWD Crossing and WW-S4 Santa Ana River Reach 3 at Pedley Avenue). The MSAR Permittees are required to comply with the numeric Bacterial Indicator targets at these monitoring locations by December 31, 2015 for the Dry Weather conditions (April 1 through October 31, as defined in the TMDL) and by December 31, 2025 for the Wet Weather conditions (November 1 through March 31, as defined by the TMDL).

16. In the absence of an approved CBRP, the WLAs become the final numeric WQBEL that must be achieved by the compliance dates.

---

[15] Pre-compliance evaluation monitoring is monitoring conducted prior to the TMDL compliance date to assess the effectiveness of BMPs implemented in reducing pollutant(s) of concern by the compliance date.

17. On December 20, 2004, the Regional Board adopted Resolution R8-2004-0037 amending the Basin Plan to incorporate the Lake Elsinore and Canyon Lake Nutrient TMDLs. These TMDLs were subsequently approved by the State Board on May 19, 2005, by the Office of Administrative Law on July 26, 2005 and by the USEPA on September 30, 2005. These TMDLs include urban WLAs that are now incorporated into Chapter 5 of the Basin Plan. For both Canyon Lake and Lake Elsinore, the TMDLs specify causal numeric targets (nitrogen and phosphorus) and response numeric targets (chlorophyll *a*, dissolved oxygen and un-ionized ammonia). The TMDLs also specify nitrogen and phosphorus WLAs (point source discharges) and LAs (nonpoint source discharges) for each lake. Compliance with interim dissolved oxygen and chlorophyll a numeric targets is to be achieved by December 31, 2015. Compliance with the final numeric targets and WLAs and LAs is to be achieved by December 31, 2020. The LAs and WLAs are specified as 10-year running average.

18. The nitrogen and phosphorus WLAs and LAs for Canyon Lake are applicable to those discharges tributary to Canyon Lake. The nitrogen and phosphorus WLAs and LAs for Lake Elsinore apply to those areas downstream of Canyon Lake and to overflows from Canyon Lake.

19. TMDL Implementation Plans for each TMDL assign responsibilities to specific MS4 dischargers/stakeholders to identify sources of Impairment, to propose BMPs to address those sources, and to monitor, evaluate and revise BMPs based on monitoring results. Specific TMDL Implementation Plan tasks associated with Urban Runoff are described in Chapter 5 of the Basin Plan and are assigned to one or more of the Permittees. Requirements of the TMDL implementation plan tasks are incorporated into this Order and were proposed for inclusion in Chapter 13 of the DAMP (see 2007 ROWD). Several of these tasks are also jointly assigned to non-Permittee stakeholders. The Permittees have established TMDL Task Forces to jointly implement and coordinate those tasks.

20. To evaluate compliance with TMDL WLAs as per the Implementation Plans, the Permittees proposed to submit a Comprehensive Nutrient Reduction Plan to:

    a. Evaluate the effectiveness of BMPs and other control actions implemented; and

    b. Evaluate the progress towards compliance with the nutrient WLA for Urban Runoff.

21. The Canyon Lake and Lake Elsinore Nutrient TMDL Task Force (also referred to as the San Jacinto Watershed Urban Dischargers) members are tabulated below:

Table 6 - Canyon Lake and Lake Elsinore Nutrient TMDL Task Force

Riverside MS4 Permittees	Non-Permittees
Beaumont, City of	California Department of Fish and Game
Canyon Lake, City of	California Department of Transportation (Caltrans),
Hemet, City of	Eastern Municipal Water District
Lake Elsinore, City of	Elsinore Valley Municipal Water District
Moreno Valley, City of	U.S. Air Force (March Air Reserve Base), March Joint Powers Authority,
Murrieta, City of	U.S. Forest Service
Perris, City of	Western Riverside County Agricultural Coalition
San Jacinto, City of	
Riverside, City of	
Riverside, County of	
RCFC&WCD	

22. The cities of Menifee and Wildomar were recently incorporated and are responsible for compliance with the Canyon Lake and Lake Elsinore Nutrient TMDL requirements. They have the option to participate in the TMDL Task Force or comply with the TMDL requirements on their own.

23. Interim compliance (compliance determination prior to the final WLA compliance dates) determination with the WLAs in the TMDLs will be based on the Lake Elsinore and Canyon Lake (LE/CL) Permittees progress towards implementing the various TMDL Implementation Plan tasks as per the resultant studies and plans approved by the Regional Board. The CL/LE Permittees are required to develop a Comprehensive Nutrient Reduction Plan (CNRP) designed to achieve compliance with the WLAs by the final compliance date for approval of the Regional Board. In the absence of an approved CNRP, the WLAs specified in the approved Canyon Lake/Lake Elsinore Nutrient TMDL will constitute the final numeric WQBELs.

G. NEW DEVELOPMENT/SIGNIFICANT REDEVELOPMENT – WQMP /LID

1. The California Constitution and Government Code provide the Co-Permittees planning policy powers that mandate that the Co-Permittees review and condition New Development consistent with the Subdivision Map Act, CEQA, and their respective general plans, ordinances, and resolutions to ensure the general public's health and safety. If these constitutional and statutory mandates are not properly implemented and local ordinances and resolutions are not properly enforced, there is a creditable potential that New Development could result in the discharge of Pollutants via Urban Runoff to the Waters of the U.S within the Permit Area.

2. Significant development has taken place in Riverside County in the last decade. These developments have resulted in the urbanization of many areas. Urbanization generally increases Urban Runoff volume and velocity of runoff and the amount of Pollutants in the runoff. As development occurs, natural vegetated

pervious ground cover is converted to impervious surfaces such as highways, streets, rooftops and parking lots. Natural vegetated soil can both absorb rainwater and remove Pollutants providing an effective natural purification process. In contrast, impervious surfaces can neither absorb water nor remove Pollutants, and the natural purification characteristics are lost. Additionally, urban development can significantly increase Pollutant loads as the increased population density causes proportionately higher levels of vehicle emissions, vehicle maintenance wastes, municipal sewage wastes, pesticide, household hazardous wastes, pet wastes, trash, and other Anthropogenic Pollutants.

3. Urbanization can especially threaten environmentally sensitive areas (ESAs) and stream geomorphology. ESAs typically have a much lower capacity to withstand Pollutant loads. In essence, development that is ordinarily insignificant in its impact on the environment may in a particular sensitive environment become significant. Designated ESAs are defined in the Glossary (Appendix 4).

4. Unmitigated high volumes and velocities of discharges from MS4 facilities associated with new development (which may include non-Urban Runoff) into natural watercourses can alter the natural rate of change of a stream and adversely impact aquatic ecosystems and stream habitat and cause stream bank erosion and physical modifications. These changes are the result of Hydromodification. Typically, Hydromodification especially impacts those natural streams in the developing foothills and in other urbanizing fringe portions of the Permit Area.

5. On October 5, 2000, the State Board adopted Order No. WQ-2000-11, which is a precedential order. Order No. WQ-2000-11 required that Urban Runoff generated by 85th percentile storm events from specific types of development categories be infiltrated, filtered or treated. The essential elements of this precedential order were incorporated into the 2002 MS4 Permit and are incorporated herein. In accordance with the requirements specified in the 2002 MS4 Permit, the Permittees developed a model WQMP and Template.

6. The WQMP and Template provide a framework to incorporate some of the watershed protection principles into the Co-Permittees' planning, construction and post-construction phases of New Development and Significant Redevelopment projects. The WQMP includes site design (including, where feasible, LID principles), Source Control and Treatment Control elements to reduce the discharge of Pollutants in Urban Runoff. On September 17, 2004, the Regional Board approved the WQMP. The Co-Permittees are requiring proponents of New Developments and Significant Redevelopments to develop and implement site-specific WQMPs. This Order requires Co-Permittees to continue requiring preliminary project-specific WQMPs as early as possible during the environmental review or planning phase (land use entitlement) and to review and approve final project-specific WQMP that is in substantial conformance with the preliminary

project-specific WQMP prior to the issuance of any building or grading permit. This Order also requires Co-Permittees to verify functionality of post-construction BMPs prior to issuance of certificate of occupancy and to track and ensure long term operation and maintenance of those BMPs as per the approved project-specific WQMPs.

7. An audit of each of the Pemittees' Urban Runoff management programs during the term of the 2002 MS4 Permit indicated no clear nexus between the watershed protection principles, including LID techniques specified in the WQMP and the Permittees' General Plan or related documents such as Development Standards, Zoning Codes, Conditions of Approval and Project Development Guidance. Existing procedures, ordinances, local codes, and development standards may be barriers to implementation of LID practices. This Order requires the Permittees to evaluate their General Plans, comprehensive or master plans, zoning codes, subdivision ordinances, project development standards, conditions of approval or related documents to determine whether the removal of any barriers, within their control, is feasible for implementation of LID techniques and other requirements of this Order. Where feasible, the Co-Permittees will make appropriate changes to remove barriers to implement LID techniques and other requirements of this Order.

8. This Order also requires the Permittees to review and enforce covenants, conditions and restrictions (CC&R) or develop other mechanisms to ensure proper long term operation and maintenance of post-construction BMPs.

9. In addition to addressing post-development water quality, the WQMP includes requirements to protect ESAs and address potential Hydromodification issues. Section 4.4 of the WQMP requires identification of Hydrologic Conditions of Concern (HCOC). An HCOC exists when a site's hydrologic regime is altered and there are significant impacts on downstream channels and aquatic habitats, alone or in conjunction with impacts of other projects. Currently, New Development and Significant Re-development projects are required to perform this assessment and incorporate appropriate BMPs to ensure existing hydrologic conditions are maintained. This Order requires the Permittees to implement LID techniques to minimize HCOC.

10. Management of the impacts of urbanization on water quality and stream stability in the Permit Area is more effective if the techniques are implemented at the project site, within the neighborhood and within each Co-Permittee's jurisdiction based on an overall watershed plan. The Permittees have identified Major Outfalls and have submitted maps of existing MS4 facilities. This Order requires the Permittees to expand upon the existing maps to include a map of its lined and unlined channels and streams within the Permit Area with the goal of identifying, prioritizing, and developing specific action plans for protecting those segments of streams that are vulnerable to development impacts.

11. This Order further requires the Permittees to develop a Watershed Action Plan that would address TMDL Implementation Plan BMP strategies and provide regional tools to address Hydromodification. The Permittees may choose to implement a single Watershed Action Plan for the entire Permit Area, or subdivide the Permit Area into sub-watersheds as appropriate to cost-effectively address TMDL requirements. The Watershed Action Plan integrates existing watershed based planning efforts and incorporates watershed tools to manage cumulative impacts of development on vulnerable streams, preserve structure and function of streams, and protect source, surface and groundwater quality and water supply in the permitted area. The Watershed Action Plan should integrate Hydromodification and water quality management strategies with land use planning policies, ordinances, and plans within each jurisdiction. Existing Permittee watershed planning efforts include the Western Riverside County Multiple Species Habitat Conservation Plan, Special Area Management Plan, Santa Ana and San Jacinto Integrated Regional Watershed Management Plans, Lake Elsinore and Canyon Lake and Middle Santa Ana River TMDL Task Forces, SCCWRP Hydromodification sensitivity mapping project, and various regional BMP evaluations being conducted by the Principal Permittee in conjunction with various water districts should be evaluated and incorporated into the Watershed Action Plan as necessary to address TMDL Implementation Plan requirements and Hydromodification. The regional efforts should be evaluated, and if necessary, enhanced to provide Permittees with the tools to integrate Hydromodification and TMDL management strategies with Permittee MS4 Permit compliance programs and land use planning policies, ordinances, and plans within appropriate Permittee jurisdictions within the Permit Area.

12. Pending completion of a Watershed Action Plan and implementing tools, management of the impacts of urbanization shall be accomplished on a per project and per jurisdiction basis through jurisdictional implementation of the watershed tools incorporated into the local general plans, ordinances and other requirements and the project-specific WQMPs.

13. The SMC in collaboration with SCCWRP and the California Storm Water Quality Association (CASQA) with funding from the State Water Resources Control Board and CASQA is developing a LID manual for Southern California. This manual will be incorporated into the CASQA BMP Handbooks. The Permittees are encouraged to utilize the LID manual as a resource to implement LID techniques once completed.

14. This Order requires the project proponents to first consider preventative and conservation techniques (e.g., preserve and protect natural features to the MEP) prior to considering mitigative techniques (Structural BMPs such as infiltration systems, or other Treatment Control BMPs). The mitigative measures should be

prioritized with the highest priority for BMPs that remove Pollutants in Urban Runoff and reduce the volume of Urban Runoff, such as infiltration, then other BMPs, such as harvesting and use, evapotranspiration and bio-treatment should be considered. Consistent with the MEP standard, these LID BMPs must be implemented at the project site. Consideration of "highest and best use" of the discharge should also be considered. For example, Lake Elsinore is evaporating faster than runoff from natural precipitation can recharge it. Requiring infiltration of 85% of runoff events for projects tributary to Lake Elsinore would only exacerbate current water quality problems associated with Pollutant concentration due to lake water evaporation. In cases where rainfall events have low potential to recharge Lake Elsinore (i.e. no hydraulic connection between groundwater to Lake Elsinore, or other factors), requiring infiltration of Urban Runoff from projects is counterproductive to the overall watershed goals. Project proponents, in these cases, would be allowed to discharge Urban Runoff, provided they used equally effective filtration-based BMPs. The Regional Board also recognizes that site conditions, including site soils, contaminant plumes, high groundwater levels, etc., could limit the applicability of infiltration and other LID BMPs at certain project sites. Where LID BMPs are not feasible or appropriate at the project site, more traditional, but equally effective BMPs (proprietary or non-proprietary) should be implemented. This Order provides for alternatives and in-lieu programs where preferred LID BMPs are infeasible or inappropriate. In addition, extra diligence should also be performed when proposing infiltration BMPs in areas where the proposed land use is often associated with soil and groundwater contamination. Pre-treatment of the water prior to infiltration is necessary in most cases. Proprietary treatment devices may be utilized when it is demonstrated that they meet or exceed the MEP standard.

15. The USEPA has determined that LID/green infrastructure can be a cost-effective and environmentally preferable approach for the control of storm water pollution and to minimize downstream impacts by mimicking pre-development hydrology. LID techniques promote the reduction of impervious areas which may achieve multiple environmental and economic benefits in addition to enhanced water quality and supply, stream and habitat protection, cleaner air, reduced urban temperature, increased energy efficiency and other community benefits such as aesthetics recreation, and wildlife areas. This Order incorporates a volume capture metric based on the design volume specified in the WQMP.

16. If not properly designed and maintained, Treatment Control BMPs could create a nuisance and/or habitat for vectors[16] (e.g., mosquitoes and rodents). The 2002 MS4 Permit required the Permittees to closely collaborate with the local vector

[16] Managing Mosquitoes in Storm water Treatment Devices, Marco E. Metzger, University of California Davis, Division of Agriculture and Natural Resources, Publication 8125.

control agencies during the development and implementation of such Treatment Control BMPs. The Permittees should continue these collaborative efforts with the vector control agencies to ensure that Treatment Control BMPs do not become a Nuisance or a potential source of Pollutants. The requirements specified in this Order include identification of responsible agencies for maintaining the Treatment Control BMPs and for providing funding for operation and maintenance.

17. If not properly designed and maintained, groundwater infiltration systems may adversely impact groundwater quality. Restrictions placed on Urban Runoff infiltration in this Order (Section XI.D.8) are based on recommendations provided by the USEPA Risk Reduction Laboratory. The Permittees should work closely with the water districts and water conservation districts to insure groundwater protection.

18. This Order incorporates new project categories and revised thresholds for several categories of new development and redevelopment projects that trigger the requirement for a WQMP. The 2008 National Research Council (NRC) report[17] indicates that roads and parking lots constitute as much as 70% of total impervious cover in ultra-urban landscape, and as much as 80% of the directly connected impervious cover. Roads tend to capture and export more storm water Pollutants than other impervious covers. As such, roads are included as a priority development category for which WQMPs are required. Private New Development and Significant Redevelopment projects incorporating roads typically allow road runoff to be addressed as part of the overall water quality strategy for the larger common plans of development. Permittee streets, roads and highways capital projects have special limitations. For example, the footprint of street, road and highway capital projects is often limited and may have hydraulic constraints due to lack of underground storm drain systems that would otherwise be necessary to hydraulically facilitate treatment of runoff. There are also limitations specified in state and federal design and code specifications that may limit or prohibit certain BMPs. Permittees may also be subject to flow diversion liability and limited road maintenance budgets and equipment. Street, road and highway projects that function as part of the MS4 also receive runoff and associated Pollutants from both existing urban areas and other external sources, including adjacent land use activities, aerial deposition, brake pad and tire wear and other sources that may be outside the Co-Permittee's authority to regulate and/or economic or technological ability to control. These offsite flows can overwhelm Treatment Control BMPs designed to address the footprint (consistent with the typical requirements for a WQMP) of street, road or highway capital projects incorporating curb and gutter as part of its storm water conveyance function. Despite these limitations, the Regional Board finds that Permittee construction of streets, roads and highway capital

[17] National Research Council Report (2008), http://www.nap.edu/catalog.php?record_id=12465

projects may provide an opportunity to address Pollutant loads from existing urban areas. However, due to the nature of the facilities and projects, it would be unduly burdensome for the Co-Permittees to maintain WQMP documents for transportation projects (in addition to Facility Pollution Prevention Plans and other overlapping requirements of this Order). The Permittees are therefore not required to prepare WQMP documents for street, road and highway capital projects, but instead are required to develop functionally equivalent documents that include site specific consideration utilizing BMP guidance to address street, roads and highway capital project runoff to the MEP.

19. The NRC report also indicates that there is a direct relationship between impervious cover and the biological condition of downstream receiving waters. The Permittees are required to address HCOC from New Development and Significant Redevelopment projects to minimize downstream impacts.

H. CO-PERMITTEE INSPECTION PROGRAMS

1. Each Co-Permittee conducts inspections of those Construction Sites for which it has issued either a grading or building permit to determine compliance with its ordinances, regulations, and codes, including its Storm Water Ordinance. Each Co-Permittee, consistent with its ordinances, rules and regulations, inspects each site for compliance with the conditions of approval governing the grading or building permit. These inspections have been expanded by the Co-Permittees to determine that sites requiring coverage under the General Construction Activity Storm Water Permit have obtained permit coverage by verifying that a Waste Discharge Identification (WDID) number has been issued by the State Board..

2. The DAMP addresses compliance strategies with regard to industrial and commercial facilities. As part of their Urban Runoff management activities, the Principal Permittee and the County entered into an agreement, dated August 10, 1999 by which they have developed and funded, in cooperation with the Riverside County Environmental Health Department, the "Compliance Assistance Program" (CAP) which includes a storm water survey component as part of existing inspections of hazardous material handlers and retail food service activities. The CAP consists of educational outreach to the inspected facilities and detailed storm water compliance surveys for each facility that must secure a hazardous materials permit for either storing, handling or generating such materials (there are approximately 5,500 facilities of which approximately 2,300 are inspected annually, and all facilities are inspected at least once during a two year cycle) and retail food facilities (there are approximately 6,750 facilities, all of which are inspected 1 to 3 times annually). Storm Water Compliance Surveys are conducted with each inspection of hazardous materials facilities, and at least once during the MS4 Permit term for restaurants. Restaurant inspectors are authorized to conduct

additional surveys if they observe an IC/ID or ordinance violation. The type of industrial/commercial establishment that is inspected includes, but is not limited to, automobile mechanical repair, maintenance, fueling, or cleaning operation, automobile or other vehicle body repair or painting operations, and painting or coating operations. Completed surveys that indicate non-compliance are forwarded to the appropriate Co-Permittee's enforcement division for follow up action. In addition, the cities of Corona and Riverside, which operate publicly owned treatment works (POTW), conduct annually on average, approximately 4,400 wastewater pre-treatment inspections, on a variety of industrial and commercial establishments within their respective jurisdictions, including, but not limited to, retail food establishments, car washes, and carpet, drape & furniture cleaning establishments. The Permittees have agreed to notify Regional Board staff when conditions are observed during such inspections that appear to be in violation of either the Storm Water General Permits or a permit issued by the Regional Board.

3. An evaluation of the Permittees' inspection programs during the 2002 MS4 Permit indicated a wide range of compliance and non-compliance with the Construction Cite and Industrial and Commercial Facilities inspection requirements. In many instances, the Construction Site and Facilities' return to compliance was not properly documented. This Order includes requirements for a more effective inspection program and includes a performance measure, time to return to compliance, as a metric for program effectiveness.

I. ILLICIT CONNECTIONS/ ILLEGAL DISCHARGES (IC/ID)

1. Illegal Discharges to the MS4 can contribute to contamination of Urban Runoff and other surface waters. During the term of the 1990 MS4 Permit, the underground MS4 facilities were inspected and only one Illicit Connection was identified. Open channels and other aboveground elements of the MS4 are inspected for evidence of Illegal Discharges as an element of routine maintenance by the Permittees. The Permittees also developed a program to prohibit IC/IDs to their MS4 facilities. Continued surveillance and enforcement of these programs are required to eliminate IC/IDs. The Permittees have a number of procedures in place to eliminate IC/IDs to the MS4, including Construction Site and Commercial, and Industrial Facility inspections, MS4 facility inspections, water quality monitoring and reporting programs, and public education.

2. The Permittees have the authority to control Pollutants in Urban Runoff, to prohibit IC/ID, to control spills, and to require compliance and carry out inspections of the MS4 facilities within their respective jurisdictions. The Co-Permittees have been extended necessary legal authority through California

statutes and local charters. Consistent with this statutory authority, each of the Co-Permittees have adopted their respective Storm Water Ordinances.

3. Even though the Permittees have established the authority and the procedures to detect and eliminate IC/IDs, audits conducted during the term of the 2002 MS4 Permit indicated that this program element is generally carried out passively through complaint response. IC/IDs are also detected through inspection programs and maintenance activities. Reports from maintenance inspectors are also typically logged as complaints. This Order requires each Permittee to revise this program element based on the Center for Watershed Protection's Illegal Discharge Detection and Elimination: A Guidance Manual for Program Development and Technical Assessments, or equivalent program.

J. TECHNOLOGY-BASED EFFLUENT LIMITATIONS (Not Applicable)

K. WATER QUALITY-BASED EFFLUENT LIMITATIONS (WQBELs) AND TMDL WLA

1. 40 CFR 122.44(d) requires that NPDES permits include WQBELs to attain and maintain applicable numeric and narrative water quality criteria to protect the Beneficial Uses of the Receiving Water. Where numeric water quality criteria have not been established, 40 CFR 122.44(d) specifies that WQBELs may be established using USEPA criteria guidance under CWA section 304(a), proposed State criteria or a State policy interpreting narrative criteria supplemented with other relevant information, or an indicator parameter. In *Defenders of Wildlife, et al* v. *Browner,* No. 98–71080 (9th Cir, October 1999), the Court held that the CWA does not require strict compliance with State Water Quality Standards for MS4 permits under section 301(b)(1)(C), but that at the same time, the CWA does give the permitting authority the discretion to incorporate appropriate WQBEL under another provision, CWA Section 402(p)(3)(B)(iii). The use of BMPs to control or abate the discharge of Pollutants is allowed by 40 CFR 122.44(k)(3) when Numeric Effluent Limitations are infeasible or when practices are reasonably necessary to achieve Effluent Limitations and standards or to carry out the purposes and intent of the CWA. The legislative history and the preamble to the federal storm water regulations indicate that the Congress and the USEPA were aware of the difficulties in regulating Urban Runoff solely through traditional end-of-pipe treatment. It is the Regional Board's intent to require the Permittees to implement BMPs consistent with the MEP standard in order to support attainment of Water Quality Standards. This Order includes Receiving Water Limitations based on Water Quality Objectives; it prohibits the creation of Nuisance and requires the reduction of Water Quality Standards Impairment in Receiving Waters. The Permit includes a procedure for determining whether Urban Runoff is causing or contributing to exceedances of Receiving Water Limitations and for evaluating whether the DAMP must be revised to include additional or more effective BMPs designed to meet

Water Quality Standards. The Order establishes an iterative process to determine compliance with the Receiving Water Limitations.

2. To support attainment of Water Quality Standards, consistent with the MEP standards, this Order aims to reduce the discharge of Pollutants in Urban Runoff from the MS4 by requiring Permittees to:
   a. Implement BMPs at Permittee facilities and activities,
   b. Require BMPs, including where appropriate, LID techniques, to be implemented at New Development and Significant Redevelopment project sites prior to accepting discharges into their MS4 facilities, where feasible,
   c. Implement and annually evaluate the DAMP and each Permittee's LIP for effectiveness in reducing Pollutants in Urban Runoff, and
   d. Determine if Urban Runoff is contributing to exceedances of Water Quality Objectives or Beneficial Uses in Receiving Waters by comparing outfall and receiving water monitoring results to: (1) Water Quality Objectives (WQOs), (2) California Toxic Rule (CTR), (3) USEPA Multi-Sector Permit Parameter Benchmark Values and (4) other appropriate data identified by the Permittees. The Permittees should also evaluate the Regional Monitoring reports prepared by SCCWRP to assess trends in Urban Runoff and Receiving Water quality within the Permit Area.
3. Federal regulations (40 CFR 122.44(d)(1)(vii)(B) require inclusion of Effluent Limits that are "consistent with the assumptions and requirements of any available WLA for the discharge prepared by the State and approved by USEPA." Consistent with this requirement, this Order includes interim effluent limits and a process for developing a BMP-based approach which, if adopted by the Regional Board prior to the compliance dates(s) specified in the associated comprehensive plan, shall become the final WQBEL(s). The Permittees are required to submit a comprehensive plan describing the proposed BMPs and the documentation demonstrating that the BMPs are expected to attain the WLAs by the compliance dates when implemented. If the Regional Board approves this comprehensive plan, this Order will be amended to include the comprehensive plan as the final WQBEL(s). If the Regional Board does not approve the comprehensive plan prior to the compliance date; the WLAs will become the final WQBEL(s) on the applicable compliance date and will remain in effect until a comprehensive plan is approved by the Regional Board. The comprehensive plan will be updated, as necessary, to reflect evaluations of the effectiveness of the BMPs, including evaluations presented in the annual reports.

4. These WQBELs are consistent with the assumptions and requirements identified in the TMDL Implementation Plans adopted with the TMDLs because the WQBELs are expected to be sufficient to meet the WLAs by the compliance dates. The

TMDLs within the Permit Area are described in Section F, above. These include the following:

a. MSAR Bacterial Indicator TMDL

i. The TMDL relies on this Order to implement the WLAs for Urban Runoff from the MSAR Permittees.

ii. This Order requires the MSAR Permittees to fully comply with the TMDL Implementation Plan. The TMDL Implementation Plan includes requirements for monitoring, and submittal of plans and schedules to implement short term solutions and develop long-term solutions to achieve TMDL compliance by the specified compliance dates.

iii. There are two components in the MSAR TMDL (fecal coliform and *E. coli*). The Basin Plan currently does not have an established objective for *E. coli*. The work that is currently being done by SWQSTF is expected to make recommendations for the adoption of *E. coli* objectives and revised WLAs based on *E.coli*. This Order incorporates the current WLAs as WQBELs. If the WLAs are revised, this Order will be reopened to incorporate the new WLAs.

iv. Upon adoption of this Order, the tasks identified in the MSAR TMDL Implementation Plan that have been developed by the MSAR Permittees and approved by the Regional Board become the interim Effluent Limits.

v. The MSAR Permittees are required to develop a Comprehensive Bacteria Reduction Plan(CBRP) designed to achieve WLAs by the compliance date. Once approved by the Regional Board, the CBRP becomes the final Effluent Limit. In the absence of an approved CBRP, the WLAs become the final numeric WQBEL by the compliance date specified in the TMDL.

b. Canyon Lake and Lake Elsinore Nutrient TMDLs

i. This Order is consistent with the Urban WLAs specified in the Canyon Lake and Lake Elsinore Nutrient TMDLs.

ii. Consistent with the TMDL Implementation Plan, this Order requires the LE/CL Permittees to identify sources of Impairment, propose BMPs to address those sources, and to monitor, evaluate and revise BMPs based on the monitoring results. Specific TMDL Implementation Plan tasks are described in Chapter 5 of the Basin Plan and are assigned to one or more of

the Permittees. Requirements of the TMDL Implementation Plan tasks are incorporated into this Order and Chapter 13 of the 2007 DAMP.

iii. In Chapter 13 of the 2007 DAMP submitted with the ROWD, the LE/CL Permittees have proposed BMP programs, consistent with the aforementioned TMDL Implementation Plan tasks.

iv. This Order also requires the LE/CL Permittees to monitor at representative Urban Runoff monitoring locations defined in the Consolidated Program for Water Quality Monitoring (CMP), (Phase 2 TMDL Monitoring is specified in the Lake Elsinore and Canyon Lake Nutrient TMDL Monitoring Plan dated February 15, 2006) and TMDL Implementation Plan and to evaluate the effectiveness of BMPs implemented in the Permit Area in reducing Pollutants of Concern in Urban Runoff to determine progress towards attainment of WLAs by the specified compliance date.

v. The Regional Board recognizes that additional research is needed to determine the most appropriate control mechanism to attain Water Quality Standards for nutrients in these two lakes. This Order provides the LE/CL Permittees the flexibility to meet the WLAs through a variety of techniques. Even though, the WLAs for the Canyon Lake and Lake Elsinore Nutrient TMDLs are expressed as WQBELs, if Water Quality Standards in the Lakes are met through biological or other in-Lake control mechanisms, the LE/CL Permittees' obligation to meet the WLAs is satisfied. as the impairment for which the TMDLs were developed would not exist anymore. The Permittees in the affected watersheds are required to develop a CNRP designed to achieve the WLAs by the compliance dates specified in the TMDL. In the absence of an approved CNRP, the WLAs become the final numeric WQBELs for nutrients.

L. WATER QUALITY CONTROL PLAN (BASIN PLAN)

1. The Regional Board adopted a revised Water Quality Control Plan for the Santa Ana River Basin (hereinafter Basin Plan) that became effective on January 24, 1995. The Basin Plan designates Beneficial Uses, establishes Water Quality Objectives, and contains implementation programs and policies to achieve those Water Quality Objectives for all waters in the Santa Ana Region addressed through the Basin Plan.

2. More recently, the Basin Plan was significantly amended to incorporate revised boundaries for groundwater subbasins, now termed "management zones", new nitrate-nitrogen and TDS objectives for the new management zones, and new nitrogen and TDS management strategies applicable to both surface and ground

waters. This Basin Plan Amendment was adopted by the Regional Board on January 22, 2004. The State Board and the Office of Administrative Law (OAL) approved the amendment on September 30, 2004 and December 23, 2004, respectively. The USEPA approved the surface water standard and related provisions of the amendment on June 20, 2007.

3. TDS and TIN limitations in Table 4-1 of the Basin Plan are specified in this Order for Permittees' discharges subject to the De Minimus Permit. Where Dry Season flows are identified as part of the IC/ID program element, this Order also requires Permittees to establish their baseline discharge concentration for Dry Season conditions.

4. As discussed in Section K, WQBELs, and TMDL WLA, the Basin Plan has been amended to incorporate several TMDLs and TMDL Implementation Plans adopted for waterbodies within the Permit Area. In addition, the Basin Plan implements State Board Resolution 88-63, which established a state policy that all waters, with certain exceptions, are suitable or potentially suitable for municipal or domestic water supply. Thus, as discussed in detail in the Fact Sheet, Beneficial Uses recognized in the Basin Plan for Receiving Waters in the Permit Area are as follows:

    a. Municipal and Domestic Supply,
    b. Agricultural Supply,
    c. Industrial Service Supply,
    d. Industrial Process Supply,
    e. Groundwater Recharge,
    f. Hydropower Generation,
    g. Water Contact Recreation,
    h. Non-contact Water Recreation,
    i. Warm Freshwater Habitat,
    j. Limited Warm Freshwater Habitat,
    k. Cold Freshwater Habitat,
    l. Preservation of Biological Habitats of Special Significance,
    m. Wildlife Habitat,
    n. Rare, Threatened or Endangered Species, and
    o. Spawning, Reproduction, and Development

5. The existing and potential Beneficial Uses of groundwater that could be impaired by the discharge of Urban Runoff within the Permit Area include one or more of the following:

    a. Municipal and Domestic Supply,
    b. Agricultural Supply,
    c. Industrial Service Supply, and

d. Industrial Process Supply

6. The Basin Plan also incorporates by reference all State Board water quality control plans and policies including the 1990 Water Quality Control Plan for Ocean Waters of California (Ocean Plan) and the 1974 Water Quality Control Policy for Enclosed Bays and Estuaries of California (Enclosed Bays and Estuaries Policy). Water Quality Objectives specified in the Basin Plan are local numeric and narrative objectives that may be more stringent than the national or statewide water quality criteria.

M. NATIONAL TOXICS RULE (NTR) AND CALIFORNIA TOXICS RULE (CTR)

NTR and CTR are blanket water quality criteria that apply to all surface water discharges. However, the *Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California* states that the Policy does not apply to regulation of storm water discharges. Regional Board believes that compliance with Water Quality Standards through implementation of BMPs is appropriate for regulating Urban Runoff. The USEPA articulated this position on the use of BMPs in storm water permits in the policy memorandum entitled, ‘‘Interim Permitting Approach for Water Quality-Based Effluent Limitations in Storm Water Permits’’ (61 FR 43761, August 9, 1996).[18]

N. STATE IMPLEMENTATION POLICY (SIP)

See Section M, above.

O. COMPLIANCE SCHEDULES AND INTERIM REQUIREMENTS

The Basin Plan contains schedules for achieving compliance with WLAs for Bacterial Indicators in the MSAR watershed and nutrients in the San Jacinto watershed (Canyon Lake/Lake Elsinore). It is appropriate to require the CL/LE Permittees to comply with those time schedules for various deliverables as specified in the approved TMDL Implementation Plans. Consistent with the State Board’s Compliance Schedule Policy (Resolution No. 2008-0025), this Order incorporates interim and final Effluent Limits, where applicable. Additionally, since the TMDL compliance dates are outside the term of this MS4 Permit, it is also appropriate to require the Permittees to monitor and report the effectiveness of BMPs implemented in the Permit Area to evaluate progress towards attainment of WLAs by the time schedules specified in the adopted TMDLs. This Order includes the schedules for deliverables as part of the TMDL Implementation Plans as well as a requirement to monitor the effectiveness of BMPs in the Permit

[18] See discussions on Wet Weather Flows in the Federal Register/Vol. 65, No. 97/Thursday, May 18, 2000/Rules and Regulations

Area in reducing Pollutant discharges and to report progress towards compliance with the TMDL WLAs by the compliance dates.

P. ANTIDEGRADATION POLICY

40 CFR 131.12 requires that State Water Quality Standards include an antidegradation policy consistent with the federal policy. The State Board established California's antidegradation policy in Resolution No. 68-16. Resolution No. 68-16 incorporates the federal antidegradation policy where the federal policy applies under federal law. Resolution No. 68-16 requires that existing quality of waters be maintained unless degradation is justified based on specific findings. The Regional Board's Basin Plan implements, and incorporates by reference, both the State and federal antidegradation policies. As discussed in detail in the Fact Sheet (see sections IV and V), the permitted discharges are consistent with the antidegradation provisions of 40 CFR 131.12 and State Board Resolution No. 68-16.

Q. ANTI-BACKSLIDING

Sections 402(o)(2) and 303(d)(4) of the CWA and federal regulations at 40 CFR 122.44(l) prohibit backsliding in NPDES permits. These anti-backsliding provisions require Effluent Limitations in a reissued NPDES permit to be as stringent as those in the previous permit, with some exceptions where Effluent Limitations may be relaxed. All Effluent Limitations in this Order are at least as stringent as the Effluent Limitations in the 2002 Order.

R. PUBLIC EDUCATION/PARTICIPATION

1. Public participation during the development of Urban Runoff management programs and implementation plans is necessary to ensure that all stakeholder interests and a variety of creative solutions are considered. In addition, the federal storm water regulations require public participation in the development and implementation of the Urban Runoff management program. As such, the Permittees are required to solicit and consider all comments received from the public and submit copies of the comments to the Executive Officer of the Regional Board with the Annual Reports. In response to public comments, the Permittees may modify reports, plans, or schedules prior to submittal to the Executive Officer.

2. There are Pollutants in Urban Runoff from privately owned and operated facilities such as residences, businesses and commercial establishments and public and private institutions. A successful NPDES MS4 permit program should include the participation and cooperation of public entities, private businesses, and public and private institutions. Therefore, public education is a critical element of the DAMP. As the population increases in the Permit Area, it will be even more important to

continue to educate the public regarding the impact of human activities on the quality of Urban Runoff.

3. In addition to the Regional Board, a number of other stakeholders are involved in the management of the water resources of the Region. These include, but are not limited to, the incorporated cities in the Region, POTWs, the three counties, and the Santa Ana Watershed Project Authority and its member agencies. The entities listed in Appendix 2 are considered as potential dischargers of Urban Runoff in the Permit Area. It is expected that these entities will also work cooperatively with the Permittees to manage Urban Runoff. The Regional Board, pursuant to 40 CFR 122.26(a), has the discretion and authority to require non-cooperating entities to participate in this Order or to issue individual MS4 permits. The Permittees may request the Regional Board to issue a separate NPDES Permit to any discharger into MS4 facilities they own or operate.

4. Cooperation and coordination among the stakeholders (regulators, Permittees, the public, and other entities) are critical to optimize the use of finite public resources and ensure economical management of water quality in the Region. Recognizing this fact, this Order focuses on integrated watershed management and seeks to integrate the programs of the stakeholders, especially the holders of the three MS4 permits within the Regional Board's jurisdiction.

5. Education is an important aspect of every effective Urban Runoff management program and the basis for changes in behavior at a societal level. Education of municipal planning, inspection, and maintenance department staff is especially critical to ensure that in-house staff understand how their activities impact water quality, how to accomplish their jobs while protecting water quality, and their specific roles and responsibilities for compliance with this Order. Public education, designed to target various urban land users and other audiences, is also essential to inform the public of how individual actions affect Receiving Water quality and how adverse effects can be minimized.

6. Some Urban Runoff issues, such as public education and training, can be effectively addressed on a regional or statewide basis. Regional approaches to Urban Runoff management can improve program consistency and promote sharing of resources, which can result in implementation of more efficient programs. In particular the counties of San Bernardino and Riverside and their collective municipalities are encouraged to cooperatively work together and generate a unified education and training program.

S. PERMITTEE FACILITIES AND ACTIVITIES

1. The Permittees own/operate facilities where industrial or related activities take place that may have an impact on Urban Runoff quality. Some of the Permittees

enter into contracts with outside parties to carry out activities that may also have an impact on Urban Runoff quality. These facilities and related activities include, but are not limited to, street sweeping, catch basin cleaning, maintenance yards, vehicle and equipment maintenance areas, waste transfer stations, corporation and storage yards, parks and recreational facilities, landscape and swimming pool maintenance activities, MS4 maintenance activities and the application of herbicides, algaecides and pesticides.

2. This Order requires continued implementation of BMPs intended to reduce Pollutant discharges from those Permittee activities/facilities that are found to be significant sources of Pollutants in Urban Runoff. This Order prohibits non-storm water discharges from facilities owned or operated by the Permittees unless the discharges are exempt under Section VI of this Order or are permitted by the Regional Board under an individual NPDES permit.

3. Program evaluations conducted during the term of the 2002 MS4 Permit indicated varying degrees of compliance/noncompliance at Permittee facilities and activities. This Order requires each Permittee to review its inventory of fixed facilities, field operations and drainage facilities to ensure that Permittee facilities do not cause or contribute to a Pollution or Nuisance in Receiving Waters. Permittee fixed public facilities and field operations are to be inspected annually.

T. MUNICIPAL CONSTRUCTION PROJECTS

1. The 2002 MS4 Permit authorized the discharge of storm water from construction activities on an acre or more, that are under ownership or direct responsibility of the Permittees. Permittees were required to notify the Regional Board prior to commencement of construction activities, and to comply with the latest Statewide General Construction Permit. Permittees were also required to develop a SWPPP and monitoring program specific to the Construction Site. Program evaluations conducted during the term of the 2002 MS4 Permit indicated that some Permittees were not submitting or were not aware of the requirement to submit a NOI and subsequent Notice of Termination (NOT) for Permittee Construction Sites. This Order continues the notification requirement.
2. This Order builds upon the requirement of the 2002 MS4 Permit by requiring Permittees to include post-construction BMP information for Permittee Construction Sites meeting WQMP and General Construction Permit criteria along with the NOT submitted to the Executive Officer upon completion of the construction activity. The NOT must include photographs of the completed project, a site map including structural post-construction BMP locations, long term operation and maintenance responsibility information, field verification report and copies of the final field verification reports required under Section XII.I. Permittees are required to develop

a database of post-construction BMPs per Section XII.K.4. for which they are responsible and reference this database in the LIPs.

3. Emergency Permittee public works projects required to protect public health and safety are exempted from these requirements, until the emergency ends, at which time they need to comply with the requirements.

U. MONITORING AND REPORTING

1. 40 CFR 122.48 requires that all NPDES permits specify requirements for monitoring and reporting. Sections 13267 and 13383 of the CWC authorize the Regional Board to require technical and monitoring reports. The Monitoring and Reporting Program, Attachment 3, establishes monitoring and reporting requirements to implement federal and State requirements.

2. An effective monitoring program characterizes Urban Runoff, identifies problem areas, and determines the impact of Urban Runoff on receiving waters and the effectiveness of BMPs. The Principal Permittee administers the CMP for the Permittees. The CMP includes Wet and Dry Season monitoring of MS4 Outfalls and Receiving Waters throughout Riverside County.

3. The Regional Board recognizes the importance of watershed management efforts and regional planning and coordination in the development and implementation of programs and policies related to Receiving Water quality protection, including the Urban Runoff program and TMDL processes. In light of recent TMDLs that have been developed and the expectation of future TMDLs, this Order allows the Permittees to develop a Coordinated Watershed Monitoring Plan that shows the nexus among various Urban Runoff related monitoring programs that the Permittees are participating and the MS4 permit requirements including but not limited to WLA pre-compliance, BMP effectiveness, urban source and trend evaluation, Receiving Water quality and Hydromodification effects monitoring as part of the requirements of the Monitoring and Reporting Program.

4. Multiple entities, such as POTWs, MS4, CAFOs, and other permitted and non-permitted dischargers, discharge into the same water bodies. The discharges from these various sources could potentially affect the water quality of these water bodies even when these dischargers are complying with their discharge permits. Monitoring the Receiving Waters where these multiple types of discharges take place is necessary to determine these water bodies' compliance with Water Quality Objectives and their attainment of Beneficial Uses.

5. In the past, multiple entities have individually monitored the water bodies receiving their discharges to determine impacts to these waters from their discharges. The

monitoring has resulted in fragmented data that is inconsistent in quality, and that has potentially resulted in duplication of resources.

6. The SMC's "Model Monitoring Program for Municipal Separate Storm Sewer Systems in Southern California", August 2004 Technical Report #419 indicated that "…the lack of mass emissions stations in the inland counties hampers their ability to estimate the proportional contribution of these inland areas to cumulative loads downstream." The SMC consists of representatives from the Counties of Ventura, Los Angeles, Orange, San Bernardino, Riverside, and San Diego and the City of Long Beach. Consistent with this coordinated effort, this Order includes requirements for mass emissions monitoring.
7. Every two years, the Regional Board will assess readily available data to determine if the water bodies within its jurisdiction comply with the Water Quality Objectives and attain the assigned Beneficial Uses. The data reviewed for the assessment comes from sources such as municipalities, POTWs, individual public submittals, TMDL monitoring, and special studies. The data necessary for the assessment is of known and documented quality and generated under the auspices of a Quality Assurance Project Plan (QAPP). The data also is required to be statistically sufficient to assess if the water body is meeting Water Quality Objectives and to determine if water quality is declining over time.
8. A coordinated monitoring effort is needed for each sub-watershed in the Santa Ana Region that will provide statistically sufficient data. These data should be collected with appropriate quality control and quality assurance programs and should be made available in an electronic format to meet assessment objectives.
9. The Regional Board has identified sub-watersheds in the Santa Ana Region where potential duplication of effort is taking place. These sub-watersheds include: the Upper Santa Ana River watershed, MSAR watershed, Lower Santa Ana River watershed, and the San Jacinto River watershed.
10. Regional Board staff proposes to require the various entities discharging into the waterbodies in these sub-watersheds to coordinate monitoring efforts, prepare, submit for approval, and implement a watershed monitoring plan; a QAPP, and a data management, validation, verification mechanism in order to meet the assessment objectives.
11. Under the direction of the MS4 permittees, SCCWRP is coordinating a watershed monitoring effort in Southern California. The Santa Ana Region is included in their monitoring effort. This effort will potentially produce data that will meet the needs of the Regional Board in assessing water quality. This Order requires the Permittees to continue their participation in this regional effort.

V. STANDARD AND SPECIAL PROVISIONS

The dischargers must comply with all standard provisions and with those additional conditions that are applicable under Federal NPDES Regulations 40 CFR122.41 and 40 CFR 122.42.

W. NOTIFICATION OF INTERESTED PARTIES

The Regional Board has notified the dischargers and interested agencies and persons of its intent to prescribe WDRs for the discharge and has provided them with an opportunity to submit their written comments and recommendations. Details of notification are provided in the Fact Sheet for this Order.

X. CONSIDERATION OF PUBLIC COMMENT

The Regional Board has notified the Permittees, all known interested parties, and the public of its intent to issue WDRs for this discharge and has provided them with an opportunity to submit their written views and recommendations.

The Regional Board, in a public meeting, heard and considered all comments pertaining to the discharge and the requirements of this Order. Details of the Public Hearing are provided in the Fact Sheet for this Order.

Y. ALASKA RULE

On March 30, 2000, USEPA revised its regulation that specifies when new and revised State and Tribal Water Quality Standards become effective for CWA purposes (40 CFR 131.21, 65 FR 24641, April 27, 2000). Under the revised regulation (also known as the Alaska rule), USEPA must approve new and revised Water Quality Standards submitted to USEPA after May 30, 2000 before being used for CWA purposes. The final rule also provides that standards already in effect and submitted to USEPA by May 30, 2000 may be used for CWA purposes, whether or not approved by USEPA.

Z. COMPLIANCE WITH CZARA

The Coastal Zone Act Reauthorization Amendments of 1990 (CZARA), Section 6217(g), requires coastal states with approved coastal zone management programs to address Non-Point Source Pollution impacting or threatening coastal water quality. The CZARA addresses five sources of non-point pollution: agriculture, silviculture, urban, marinas, and Hydromodification. This Order addresses the management measures required for the urban category. Compliance with requirements specified in this Order relieves the Permittees for developing a Non-Point Source Plan, for the urban category, under CZARA.

AA. NON-POINT SOURCE DISCHARGES

Consistent with the State Board's 2004 "Policy for the Implementation and

Enforcement of the Nonpoint Source Pollution Control Program," the Regional Board may issue WDRs for Non-Point Source (NPS) Pollutant discharges, such as agricultural irrigation runoff or return flows that are not subject to NPDES requirements, if identified as a significant source of Pollutants. In addition, if the water quality significance of Non-Point Source discharges is not clearly understood, the Regional Board may issue conditional waivers of WDRs to Non-Point Source dischargers, and require monitoring to gather the information necessary to effectively manage these discharges.

BB. STRINGENCY REQUIREMENTS FOR INDIVIDUAL POLLUTANTS. (N/A)

CC. FISCAL RESOURCES

California is experiencing a fiscal crisis unprecedented since the Great Depression. The November 2009 unemployment rate is 12.2 percent in California and 14.7 percent in Riverside County.[19] The seasonally adjusted national unemployment rate in November 2009 is at a 26-year high of 10.2 percent. The Federal Reserve projected that the national unemployment rate, currently at a 26-year high of 9.4 percent, will pass 10 percent by the end of the year. Most federal policymakers said it could take "five or six years" for the economy and the labor market to get back on a path of long-term health.[20] State and local governments are experiencing significant budgetary shortfalls and are reducing staffing and programs across the board. Given this economic environment, priority will be given to preserving the most essential elements of existing Urban Runoff programs and identifying and implementing strategies to improve the efficiency of existing programs in protecting Receiving Waters.

Intentionally Blank

PERMIT REQUIREMENTS:

IT IS HEREBY ORDERED that the Riverside County Flood Control and Water Conservation District, the County of Riverside, and the incorporated cities of Beaumont, Calimesa, Canyon Lake, Corona, Hemet, Lake Elsinore, Menifee, Moreno Valley, Murrieta, Norco, Perris, Riverside, San Jacinto, and Wildomar, in order to meet the provisions contained in Division 7 of the Water Code and regulations adopted thereunder, and the provisions of the CWA, as amended, and the regulations and guidelines adopted there under, must comply with the following:

III. PERMITTEE RESPONSIBILITIES:

A. RESPONSIBILITIES OF THE PRINCIPAL PERMITTEE:

1. The Principal Permittee shall be responsible for managing the overall Urban Runoff program and shall:

   a. Coordinate revisions to the DAMP.

   b. Implement area-wide management programs, monitoring and reporting programs, and related plans as required by this Order.

   c. Coordinate chemical and biological water quality monitoring and any other monitoring as required by the Executive Officer.

   d. Prepare, coordinate the preparation of, and submit to the Executive Officer, those reports and programs necessary to comply with this Order.

   e. Provide staff support to the Management Steering Committee (Appendix 4, Glossary) to address Urban Runoff management policies for the Permit Area and coordinate the review, and necessary revisions to the DAMP and Implementation Agreement. The Management Steering Committee will continue to meet consistent with the requirements of Section XVII.D of this Order.

   f. Coordinate and conduct Technical Committee (Appendix 4) meetings consistent with the requirements of Section XVII.D of this Order. The Technical Committee will continue to direct the development of the DAMP and coordinate the implementation of the overall Urban Runoff program.

   g. Take the lead role in initiating and developing area-wide programs and activities necessary to comply with this Order.

h. Coordinate activities and participate in committees/subcommittees formed to comply with this Order.

i. Coordinate the implementation of this Order with the Regional Board and Co-Permittees, including the submittal of joint reports, plans, and programs as required under this Order.

j. Provide technical and administrative support to the Co-Permittees, including informing them of the status of known pertinent municipal programs, pilot projects, and research studies.

k. Coordinate with the Co-Permittees the implementation and necessary updates to Urban Runoff quality management programs, monitoring and reporting programs, implementation plans, public education, other Pollution Prevention measures, household Hazardous Waste collection, and BMPs outlined in the DAMP and take other actions consistent with the MEP standard.

l. Gather and disseminate information on the status of statewide Urban Runoff programs and evaluate the information for potential use in the execution of this Order. Hold workshops focused on Urban Runoff regulatory requirements, BMPs, and other related topics.

m. Compile information provided by the Co-Permittees and determine the effectiveness of the overall Urban Runoff program in attaining Receiving Water Quality Standards. This determination must include a comparative analysis of monitoring data to the applicable Water Quality Objectives for Receiving Waters as specified in Chapter 4 of the Basin Plan.

n. Solicit and coordinate public input for major changes to the Urban Runoff management programs and the implementation thereof.

o. Coordinate the development and implementation of procedures and performance standards, to assist in the consistent implementation of BMPs consistent with the MEP standard, as well as Urban Runoff management programs, among the Co-Permittees.

p. Participate in watershed management programs and regional and/or statewide monitoring and reporting programs.

q. In collaboration with the Co-Permittees, other MS4 Programs and/or CASQA, develop guidelines for defining expertise and competencies of storm water program managers and inspectors and develop and submit for approval a training program for various positions in accordance with these guidelines and Section XV of this Order.

r. Within 6 months of adoption of this Order, the Principal Permittee shall develop a library of BMP performance reports, and revise the library annually thereafter. At a minimum, obsolete performance reports should be removed and updated reports from the Permittees, CalTrans, CASQA, American Society of Civil Engineers or other appropriate sources that include more effective and proven BMPs should be added. The library may use national, statewide or regional reports. The purpose of this library is to facilitate the Permittees approval of BMPs, review and approval of WQMPs, etc.

s. Within 6 months of adoption of this Order, the Principal Permittee shall coordinate a review of the DAMP with the Co-Permittees to determine the need for update or revisions to ensure compliance with the requirements of this Order and establish a schedule for those revisions.

2. The activities of the Principal Permittee shall also include, but not be limited to, the following for MS4 owned or operated by the Principal Permittee:

a. To cause appropriate enforcement actions as necessary against IC/IDs to its MS4 to ensure compliance with Urban Runoff management programs, ordinances and implementation plans, including physical removal of Illicit Connections and prohibition of Illegal Discharges.

b. Ensure that applicants for encroachment permits for permanent connection to its MS4 facilities are notified in writing of their obligations to comply with Storm Water Ordinances, WQMP, and General Stormwater Permit requirements. The Principal Permittee shall make sure that encroachment activities within the limits of its rights-of-way comply with the General Construction Permit post construction standards. An encroachment project with a WQMP reviewed and approved by the Co-Permittee with jurisdictional authority may constitute compliance with the General Construction Permit post construction standards[21].

c. Conduct inspections and maintain the MS4 facilities over which it has jurisdiction.

d. Review and revise, if necessary, those agreements to which it is a party and those regulations and policies it deems necessary to provide adequate legal authority to maintain the MS4 facilities for which it has jurisdiction and to take those actions required of it by this Order and the federal Storm Water Regulations (see Section VIII);

[21] The State General Construction Permit Order No. 2009-0009-DWQ, Section XII

e. Monitor, document, and report that appropriate enforcement actions against Illegal Discharges to the MS4 facilities for which it has jurisdiction are taken and pursued as necessary to ensure compliance with Urban Runoff management programs, implementation plans, and regulations and policies, including physical elimination of IC/IDs (see Section IX);

f. Continue to respond or cause the appropriate entity or agency to respond to emergency situations such as accidental spills, leaks, and IC/IDs to prevent or reduce the discharge of Pollutants to its MS4 facilities and to the Receiving Waters (see Section XVI).

g. Track, monitor, and keep training records of all personnel involved in the implementation of the Principal Permittee's Urban Runoff management program.

B. RESPONSIBILITIES OF THE CO-PERMITTEES:

1. Each Co-Permittee shall complete a LIP, in conformance with Section IV of this Order and the approved LIP template.

2. Each Co-Permittee shall be responsible for managing the Urban Runoff program within its jurisdiction and shall:

   a. Maintain adequate legal authority to control the contribution of Pollutants to the MS4 and enforce those authorities.

   b. Conduct inspections of and maintain its MS4 facilities in accordance with the criteria developed pursuant to Section XIV.

   c. Continue to implement management programs, monitoring and reporting programs, appropriate BMPs listed in the DAMP and LIP, and related plans as required by this Order and take such other actions consistent with the MEP standard.

   d. Continue to seek sufficient funding for the area-wide Urban Runoff management plan, local Urban Runoff program management, Urban Runoff enforcement, public outreach and education activities and other Urban Runoff related program implementation.

   e. Continue to coordinate with other public agencies as appropriate, to facilitate the implementation of this Order and the DAMP/LIP.

   f. Ensure that applicants for encroachment permits for permanent connection to Permittee MS4 facilities are notified of their obligations to comply with Storm

Water Ordinances, WQMP, and the State General Construction Permit post construction standards. The Permittees shall enforce their Storm Water Ordinances to the extent of their legal authority. An encroachment project with a WQMP reviewed and approved by the Co-Permittee who owns the MS4 may constitute compliance with the General Construction Permit post construction standards[22].

g. Maintain up-to-date MS4 facility maps. Annually review these maps and if necessary, submit revised maps to the Principal Permittee with the information required for preparation of the Annual Report.

h. Prepare and submit to the Principal Permittee in a timely manner specific reports/information, related to the Co-Permittees' Urban Runoff management program, necessary to develop an Annual Report for submittal to the Executive Officer.

3. The Co-Permittees' activities shall include, but not be limited to, the following:

a. Participate in the Management Steering Committee and the Technical Committee meetings consistent with the requirements of Section XVII.D of this Order.

b. Conduct and coordinate with the Principal Permittee surveys and monitoring needed to identify Pollutant sources and drainage area characteristics within its jurisdiction. Where an Illegal Discharge crosses jurisdictional boundaries, to the extent feasible coordinate with neighboring jurisdictions to locate and end the Illegal Discharge.

c. Prepare and submit reports to the Principal Permittee to facilitate compilation of joint reports to the Regional Board in compliance with submittal deadlines.

d. Participate in the development and implementation of plans, strategies, management programs, monitoring and reporting programs that are proposed by the Principal Permittee, Technical Committee, or the Management Steering Committee to comply with this Order.

e. Participate in subcommittees formed by the Principal Permittee, Technical Committee, or the Management Steering Committee to comply with this Order.

[22] The State General Construction Permit Section XIII

f. Respond to or arrange for the appropriate entity or agency to respond to Emergency Situations such as accidental spills, leaks, IC/IDs, etc., to prevent or reduce the discharge of Pollutants to their MS4 facilities and the Receiving Waters.

g. Continue to pursue enforcement actions as necessary within its jurisdiction for violations of Storm Water Ordinances, and other elements of its Urban Runoff management program.

C. IMPLEMENTATION AGREEMENT

The Permittees shall allow any cities that were not signatories to the original Implementation Agreement but have been subsequently added to this Order to participate in the Implementation Agreement. The Permittees must annually review their Implementation Agreement and determine the need, if any, for additional revision. Beginning with the first Annual Report after adoption of this Order the Permittees must include the findings of this review and a schedule for any necessary revision(s) to the Implementation Agreement, if any. A copy of the signature page and any revisions to the Agreement shall be included in the Annual Report.

IV. LOCAL IMPLEMENTATION PLAN:

A. Within 6 months of adoption of this Order, the Permittees shall develop and submit for approval of the Executive Officer a LIP template. The LIP template shall be amended as the provisions of the DAMP are amended to address the requirements of this Order. The LIP template shall facilitate a description of the Co-Permittee's individual programs to implement the DAMP, including the organizational units responsible for implementation and identify positions responsible for Urban Runoff program implementation. The description shall specifically address:

1. Overall program management, including internal reporting requirements and procedures for communication and accountability;

   a. Interagency or interdepartmental agreements necessary to implement the Permittee's Urban Runoff program

   b. A summary of fiscal resources available to implement the Urban Runoff program;

   c. The ordinances, agreements, plans, policies, procedures and tools (e.g. checklists, forms, educational materials, etc.) used to execute the DAMP, including legal authorities and enforcement tools.

   d. Summarize procedures for maintaining databases required by the Permit;

   e. Describe internal procedures to ensure and promote accountability;

2. WQBELs to implement the TMDLs (Section VI.D);
3. Receiving Water Limitations (Section VII.D).
4. Legal authority/enforcement (Section VIII)
    a. Identify enforcement procedures, and
    b. Identify actions and procedures for tracking return to compliance;
5. Illicit Connections/Illegal Discharges (IC/ID); Litter, Debris and Trash Control (Section IX).

    The procedures and the staff positions responsible for different components of their IC/ID and Illegal Discharge Detection and Elimination (IDDE) Programs.
6. Sewage Spills, Infiltration into the MS4 Systems from Leaking Sanitary Sewer Lines, Septic System Failures, and Portable Toilet Discharges (Section X)

    A description of the interagency or interdepartmental sewer spill response coordination within each Permittee's jurisdiction.
7. Co-Permittee inspection programs(Section XI),
    a. Maintenance of Construction, Industrial, Commercial, and Post-Construction BMP databases;
    b. Procedures for incorporating erosion and sediment control BMPs into the permitting of Construction Sites (Section XI.B)
    c. Implementation of the Residential Program (Section XI.E.)
    d. Specify the verification procedure(s) and any tools utilized to verify that coverage under the General Construction Permit;
8. New Development (Including Significant Redevelopment) (Section XII)
    a. A list of discretionary maps and permits over which the Permittee has the authority to require WQMPs;
    b. Permittee procedures to implement the Hydromodification Management Plan.
    c. Permittee procedures and tools to implement the WQMP.(Sections XII.H, XII.I & XII.K)
    d. Permittee procedures for Municipal Road Projects (Section XII.F).
    e. A description of the credits programs or other in-lieu programs implemented (Section XII.G).
9. Public education and outreach (Section XIII)
10. Permittee Facilities and Activities (Section XIV)
    a. A description of the Permittee's MS4 facilities;
    b. At a minimum a list of facilities that include the following:

i. Parking facilities;

ii. Fire fighting training facilities;

iii. Facilities and activities discharging directly to environmentally sensitive areas such as 303(d) listed waterbodies or those with a RARE beneficial use designation;

iv. POTWs (including water and wastewater treatment plants) and sanitary sewage collection systems;

v. Solid waste transfer facilities;

vi. Land application sites;

vii. Corporate yards including maintenance and storage yards for materials, waste, equipment and vehicles;

viii. Household hazardous waste collection facilities;

ix. Municipal airfields;

x. Maintenance Facilities serving parks and recreation facilities;

xi. Special event venues following special events (festivals, sporting events);

xii. Other municipal areas and activities that the Permittee determines to be a potential source of Pollutants.

11. Compliance of Permittee Facilities and Activities with the General Construction Permit and De-Minimus Permit (Section XIV.G).

12. Training Program for Storm Water Managers, Planners, Inspectors and Municipal Contractors (Section XV);

    a. Training log forms

    b. Identify departments and positions requiring training

B. Within 12 months of approval of the LIP template, and amendments thereof, by the Executive Officer, each Permittee shall complete a LIP[23], in conformance with the LIP template. The LIP shall be signed by the principal executive officer or ranking elected official or their duly authorized representative pursuant to Section XX.M of this Order.

[23] As the Principal Permittee is not a general purpose government, some portions of the NPDES MS4 Program may not be applicable to it. The Principal Permittee should identify the basis for its exclusion from the applicable program elements in the appropriate LIP section.

C. Each Permittee shall annually review and evaluate the effectiveness of its Urban Runoff programs to determine the need for revisions to its LIP as necessary in compliance with Section VIII.H of this Order, and document revisions in the Annual Report.

V. DISCHARGE PROHIBITIONS:

A. In accordance with the requirements of 40 CFR 122.26(d)(2)(i)B) and 40 CFR 122.26(d)(2)(i)(F), the Permittees shall prohibit IC/IDs (see Appendix 4) from entering the MS4.

B. The discharge of Urban Runoff from the MS4 to Receiving Waters containing Pollutants, including trash and debris, that have not been reduced consistent with the MEP standard is prohibited.

C. Non-storm Water discharges from public agency activities into Waters of the US are prohibited unless the Non-storm Water discharges are permitted by a NPDES permit, granted a waiver, or as otherwise specified in Section VI, below.

D. Discharges from the MS4 shall be in compliance with the discharge prohibitions contained in Chapter 5 of the Basin Plan.

E. Discharges of Urban Runoff from the Permittee's MS4 shall not cause or contribute to a condition of Pollution, Contamination, or Nuisance (as defined in CWC Section 13050).

F. The discharge of any substances in concentrations toxic to animal or plant life is prohibited.

VI. EFFLUENT LIMITATIONS, DISCHARGE SPECIFICATIONS AND OTHER TMDL RELATED REQUIREMENTS

For purposes of this Order, a discharge may include storm water or other types of discharges identified below.

A. ALLOWED DISCHARGES:

The discharges identified need not be prohibited by the Permittees unless identified by the Permittees or the Executive Officer as a significant source of Pollutants. The DAMP shall include public education and outreach activities directed at reducing these discharges even if they are not substantial contributors of Pollutants to the MS4.

1. Discharges composed entirely of storm water;

2. Air conditioning condensate;
3. Irrigation water from agricultural sources ;
4. Discharges covered by a NPDES Permit, WDRs, or waivers issued by the Regional Board or State Board.
5. Discharges from landscape irrigation, lawn/garden watering and other irrigation waters. These shall be minimized through public education and water conservation efforts, as prescribed under this Order Section XI.E. Residential Program.
6. Passive foundation drains[24];
7. Passive footing drains[25];
8. Water from crawl space pumps[26];
9. Non-commercial vehicle washing,(e.g. residential car washing (excluding engine degreasing) and car washing fundraisers by non-profit organization);
10. Dechlorinated swimming pool discharges (cleaning wastewater and filter backwash shall not be discharged into the MS4 or to Waters of the US)
11. Diverted stream flows[27];
12. Rising ground waters[28] and natural springs;
13. Uncontaminated ground water infiltration as defined in 40 CFR 35.2005 (20) and uncontaminated pumped groundwater (as defined in Appendix 4, glossary),
14. Flows from riparian habitats and wetlands;
15. Emergency fire fighting flows (i.e., flows necessary for the protection of life and property do not require BMPs and need not be prohibited. However, appropriate BMPs to reduce the discharge of Pollutants to the MEP must be implemented when they do not interfere with health and safety issues [see also Appendix K of the DAMP]).
16. Waters not otherwise containing Wastes as defined in California Water Code Section 13050 (d), and
17. Other types of discharges identified and recommended by the Permittees and approved by the Regional Board.

---

[24] Allowed discharges only if the source water drained from the foundation is storm water or uncontaminated groundwater. Discharges from contaminated groundwater may require coverage under the De Minimus Permit (Order No. R8-2009-0003, NPDES No. CAG998001) or General Groundwater Cleanup Permit (Order No. R8-2007-0008, NPDES Permit No CAG918001) or its latest version.

[25] See footnote 24, above.

[26] Allowed discharges only if the discharge is uncontaminated, otherwise permit coverage under the De Minimus Permit or Order No. 2006-0008-DWQ (NPDES No. CAG990002), General NPDES Permit for Discharges from Utility Vaults and Underground Structures to Surface Waters (General Permit-Utility Vaults).

[27] Diversion of stream flows that encroach into Waters of the US requires a 404 permit from the US Army Corps of Engineers and a 401 Water Quality Certification from the Regional Board. Stream diversion that requires active pumping also requires coverage under the De Minimus Permit, Order No. R8-2009-0003.

[28] Discharge of rising ground water and natural springs into surface water is only allowed if groundwater is uncontaminated. Otherwise, coverage under the General Groundwater Cleanup Permit, Order No. R8-2007-0008 may be required.

When types of discharges listed above are identified as a significant source of Pollutants to Waters of the US, a Permittee must either: prohibit the discharge category from entering the MS4 or ensure that Source Control BMPs and Treatment Control BMPs are implemented to reduce or eliminate Pollutants resulting from the discharge. The Permittees shall evaluate the permitted discharges, as listed above to determine if any are a significant source of Pollutants to the MS4 and notify the Executive Officer if any are a significant source of Pollutants to the MS4.

B. DISCHARGE SPECIFICATIONS FOR DISCHARGES FROM PERMITTEE OWNED AND/OR OPERATED FACILITIES AND ACTIVITIES - DE-MINIMUS DISCHARGES[29] :

The following types of discharges from Permittee owned and/or operated facilities and activities are authorized by this Order provided they are in compliance with the terms and conditions of the General De Minimus Permit except that separate coverage under that permit is not required.

1. *Discharges from potable water sources, including water line flushing, superchlorinated water line flushing, fire hydrant system flushing, and hydrostatic test water from pipelines, tanks and vessels*: These discharges shall be dechlorinated to a concentration of 0.1 ppm[30] or less, pH adjusted if necessary, and volumetrically and velocity controlled to prevent re-suspension of sediments.

2. *Discharges from lawn, greenbelt and median watering and other irrigation runoff[31] from non-agricultural operations*: These discharges shall be minimized through requirements consistent with Section 5.3 of the DAMP and Section XIV of this Order.

3. *Dechlorinated swimming pool discharges:* Dechlorinated to a concentration of 0.1 ppm[32] or less, pH adjusted and reoxygenated if necessary, and volumetrically and velocity controlled to prevent resuspension of sediments. Swimming pool cleaning wastewater and filter backwash shall not be discharged to the MS4.

4. *Discharges from facilities that extract, treat and discharge water diverted from Waters of the US*: These discharges shall meet the following conditions:

---

[29] General De Minimus Permit for Discharges to Surface Waters, Order NO. R8-2009-0003, NPDES No. CAG 998001 (General De Minimus Permit).
[30] Total residual chlorine = 0.1 mg/l or parts per million (ppm) or less; compliance determination shall be at a point before the discharge mixes with any Receiving Water.

[31] Non-agricultural irrigation using recycled water must comply with the statewide permit for Landscape Irrigation Using Recycled Water and the State Department Health guidelines.
[32] See footnote 30.

a. The discharges to Waters of the US must not contain Pollutants added by the treatment process or Pollutants in greater concentration than the influent;

b. The discharge must not cause or contribute to a condition of erosion;

c. Be in compliance with Section 401 of the CWA; and

d. Conduct monitoring in accordance with Section XIX of this Order.

5. *Construction dewatering wastes:* The maximum daily concentration limit for Total Suspended Solids (TSS) shall not exceed 75 mg/L; sulfides shall not exceed 0.4 mg/L; total petroleum hydrocarbons shall not exceed 0.1 mg/L; and oil and grease shall not exceed 15 mg/L.

6. *For all de-minimus type of discharges:* The pH of the discharge shall be within 6.5 to 8.5 pH units and there shall be no visible oil and grease in the discharge.

7. Table 4-1 of the Basin Plan incorporates TDS/TIN objectives for groundwater and surface waters within the Santa Ana Region. Permittees discharging to those Receiving Waters shall ensure compliance with the following for Dry Season conditions:

   a. For discharges to surface waters where groundwater will not be affected by the discharge, the maximum daily concentration (mg/L) of TDS and/or TIN of the effluent shall not exceed the Water Quality Objectives for the Receiving Water where the effluent is discharged, as specified in Table 4-1 of the Basin Plan[33].

   b. For discharges to surface waters where the groundwater will be affected by the discharge, the TDS and/or TIN concentrations of the effluent shall not exceed the Water Quality Objectives for the surface water where the effluent is discharged and the affected groundwater management zone, as specified in Table 4-1 of the Basin Plan. The more restrictive Water Quality Objectives shall govern. However, treated effluent exceeding the groundwater management zone Water Quality Objectives may be returned to the same management zone from which it was extracted without reduction of the TDS or TIN concentrations so long as the concentrations of those constituents are no greater than when the groundwater was first extracted. Incidental increases in the TDS and TIN concentrations (such as may occur during air stripping) of treated effluent will not be considered increases for the purposes of determining compliance with this discharge specification.

8. The Regional Board may add categories of Non-storm Water discharges that are not significant sources of Pollutants or remove categories of Non-storm Water discharges

[33] Resolution No. R8-2004-0001

listed above based upon a finding that the discharges are a significant source of Pollutants.

C. NON-POINT SOURCE (NPS) DISCHARGES:

The NPS discharges are being addressed through the Non-Point Source Program.

D. WATER QUALITY BASED EFFLUENT LIMITATIONS TO IMPLEMENT THE TOTAL MAXIMUM DAILY LOADS (TMDLs)

1. The MIDDLE SANTA ANA RIVER (MSAR) WATERSHED BACTERIA INDICATOR TMDL

Interim WQBELs (effective upon adoption of this Order)

a. The MSAR Permittees[34] as part of the MSAR Task Force (Table 5) shall:

i. Continue to implement the watershed-wide water quality monitoring program (including any future amendments thereto) approved by the Regional Board (Resolution No. R8-2007-0046) as per Task 3 of the MSAR TMDL Implementation Plan.

ii. Submit reports summarizing all relevant data from the MSAR watershed-wide water quality monitoring program. Beginning in 2010, the cool (or wet) season report is due to the Executive Officer by May 31st of each year (for monitoring conducted from November 1st through March 31st) and the warm (dry) season report is due to the Executive Officer by December 31st of each year (for monitoring conducted from April 1st through October 31st).

iii. Submit comprehensive reports every three years summarizing the data collected for the preceding 3 year period and evaluating progress towards achieving the Urban WLA by the dates specified in the TMDL. The first report is due to the Executive Officer on February 15, 2010.

iv. Continue to implement the approved (Regional Board Resolution No. R8-2008-0044) USEP developed as per Task 4.1 of the MSAR TMDL Implementation Plan. The USEP must describe the specific methods that will be used to identify urban sources, strategies, and BMPs to address

[34] Riverside County MS4 Permittees in the MSAR watershed (County of Riverside, and the Cities of Corona, Norco, Riverside are collectively referred to as the "MSAR Permittees")

those sources. Submit semi-annual reports on January 31st and July 31st of each year as required under the approved USEP, and any amendments thereto. In years where the comprehensive report referenced in VI.D.1.a.iii above is due on February 15, the comprehensive report, Dry Season report (Due December 31st) and the January 31st USEP reports may be combined into a single submittal due February 15th

v. Revise the DAMP as specified in Task 4.3 of the MSAR-TMDL Implementation Plan. Summarize any such revisions in the annual report due to the Executive Officer by November 30 of each year.

vi. Revise the WQMP as specified in Task 4.5 of the MSAR TMDL Implementation Plan. Summarize any such revisions in the Annual Report due to the Executive Officer by November 30 of each year.

vii. Amend the LIP to be consistent with the revised DAMP and WQMPs within 90 days after said revisions are approved by the Regional Board. Summarize any such LIP amendments in the Annual Report due to the Executive Officer by November 30 of each year.

Final WQBELs for MSAR Bacterial Indicator TMDL under Dry Season Conditions

b. The final WQBELs for Bacterial Indicators during the Dry Season shall be achieved by December 31, 2015. These final Effluent Limits shall be considered effective for enforcement purposes on January 1, 2016.

c. The Final WQBELs for MSAR Bacterial Indicator TMDL during the Dry Season shall be developed and implemented in the following manner:

i. The MSAR Permittees shall prepare for approval by the Regional Board a Comprehensive Bacteria Reduction Plan (CBRP) describing, in detail, the specific actions that have been taken or will be taken to achieve compliance with the Urban WLA during the Dry Season (April 1st through October 31st) by December 31, 2015. The CBRP must include:

(1) The specific ordinance(s) adopted to reduce the concentration of Bacterial Indicator in urban sources.

(2) The specific BMPs implemented to reduce the concentration of Bacterial Indicator from urban sources and the water quality improvements expected to result from these BMPs.

(3) The specific inspection criteria used to identify and manage the urban sources most likely causing exceedances of Water Quality Objectives for Bacterial Indicators.

(4) The specific regional treatment facilities and the locations where such facilities will be built to reduce the levels of Bacterial Indicator discharged from urban sources and the expected water quality improvements to result when the facilities are complete.

(5) The scientific and technical documentation used to conclude that the CBRP, once fully implemented, is expected to achieve compliance with the Urban WLA for Bacterial Indicator by December 31, 2015.

(6) A detailed schedule for implementing the CBRP. The schedule must identify discrete milestones to assess satisfactory progress toward meeting the Urban WLA during the Dry Season by December 31, 2015. The schedule must also indicate which agency or agencies are responsible for meeting each milestone.

(7) The specific metric(s) that will be established to demonstrate the effectiveness of the CBRP and acceptable progress toward meeting the Urban WLA for Bacterial Indicator by December 31, 2015.

(8) The DAMP, WQMP and LIPs shall be revised consistent with the CBRP no more than 180 days after the CBRP is approved by the Regional Board.

(9) Detailed descriptions of any additional BMPs planned, and the time required to implement those BMPs, in the event that data from the watershed-wide water quality monitoring program indicate that Water Quality Objectives for Bacterial Indicator are still being exceeded after the CBRP is fully implemented.

(10) A schedule for developing a CBRP needed to comply with the Urban WLA for Bacterial Indicator during the Wet Season (November 1st thru March 31st) to achieve compliance by December 31, 2025.

ii. The draft CBRP must be submitted to the Regional Board by December 31, 2010. The Permittees may submit the plan individually, jointly or through a collaborative effort with other urban dischargers such as the existing MSAR-TMDL Task Force. Regional Board staff will review the draft CBRP and recommend necessary revisions no more than 90 days after receiving the draft CBRP. The MSAR Permittees must submit the final version of the CBRP no more than 90 days after receiving the comments from Regional

Board staff. The Regional Board will schedule a public hearing to consider approving the CBRP, as a final WQBEL for the Dry Season Urban WLA, no more than 120 days after the final plan is submitted by the MSAR Permittees. In approving the CBRP as the final WQBELs, the Regional Board shall find that the CBRP, when fully implemented, shall achieve the Urban WLA for Bacterial Indicator by December 31, 2015.

iii. Once approved by the Regional Board, the CBRP shall be incorporated into this Order as the final WQBELs for Bacterial Indicator for the Dry Season. Based on BMP effectiveness analysis, the CBRP shall be updated, if necessary. The updated CBRP shall be implemented upon approval by the Regional Board.

d. Should the process set forth in Section VI.D.1.c, above not be completed by January 1, 2016, then the Urban WLA for the Dry Season specified in the MSAR-TMDL shall become the final numeric WQBELs for Bacterial Indicator in the Dry Season as follows:

i. WLA for Fecal Coliform from Urban Sources for the Dry Season (April 1st through October 31st)[35]
5-sample/30-day logarithmic mean less than 180 organisms/100mL and not more than 10% of the samples exceed 360 organisms/100mL for any 30-day period.

ii. WLA for *E. Coli* from Urban Sources for the Dry Season (April 1st through October 31st)[36]
5-sample/30-day logarithmic mean less than 113 organisms/100 mL and not more than 10% of the samples exceed 212 organisms/100mL for any 30-day period.

Final WQBELs for Bacterial Indicator during the Wet Season (effective Jan. 1, 2026)

In the event this Order is still in effect on December 31, 2025, and the Regional Board has not adopted alternative final WQBEL during the Wet Season by that date, then the Urban WLAs specified in the MSAR TMDL for the Wet Season

[35] 5-sample/30-day logarithmic mean less than 180 organisms/100mL and not more than 10% of the samples exceed 360 organisms/100mL for any 30-day period.

[36] 5-sample/30-day logarithmic mean less than 113 organisms/100 mL and not more than 10% of the samples exceed 212 organisms/100mL for any 30-day period.

(November 1st through March 31st) will automatically become the final numeric WQBEL for the MSAR Permittees on January 1, 2026.

2. **LAKE ELSINORE/CANYON LAKE (SAN JACINTO WATERSHED) NUTRIENT TMDLS**

Interim WQBELS:

a. *Lake Elsinore In-Lake Sediment Nutrient Reduction Plan:* Pursuant to Resolution No. R8-2007-0083, or as amended by subsequent adopted Regional Board resolutions, each LE/CL Permittee shall continue to implement the approved strategy for reducing in-lake sediment nutrient loads as summarized in Table 7, below:

Table 7 - Lake Elsinore In-lake Sediment Nutrient Reduction Strategy

Lake Elsinore In-lake Sediment Reduction Strategy Task	Due Date
Submit Phase 2 Alternatives	December 31, 2010*
Submit O&M Agreement for Fishery Management Program	December 31, 2010*
Submit O&M Agreement for Aeration and Mixing Systems	December 31, 2010*
Submit Phase 2 Projects Plans	June 30, 2011*
Complete Phase 2 Project Implementation	December 31, 2014
Implement in-lake and watershed monitoring programs	Annual reports due August 31 every year.

*Within 60 days of receipt of comments from Regional Board staff, Permittees shall submit a final revised plan that will be acceptable for adoption by the Regional Board, unless otherwise directed by the Executive Officer.

b. Lake Elsinore/Canyon Lake Model Update Plan*:* Pursuant to Resolution No. R8-2007-0083, or as amended by subsequent adopted Regional Board resolutions, each LE/CL Permittee shall continue to implement the Model Update Plan as per the schedule summarized Table 8 below: The Model Update Plan shall specify how the Permittees will determine compliance with the WLAs.

Intentionally Blank

Table 8 - Lake Elsinore/Canyon Lake Model Update Plan

Model Update Task	Due Date
Linkage Analysis Study	August 31, 2010
Watershed Source Loading Study	August 31, 2010
Model Evaluation	December 31, 2010
Construct/Calibrate Model	June 30, 2011
Conduct Model Scenarios	August 31, 2011
Model Update Final Report	November 30, 2011

c. Revise the DAMP, WQMP and LIPs as necessary to implement the interim WQBEL compliance plans submitted pursuant to paragraph a and b of this section and summarize all such revisions in the Annual Report.

Final WQBELs (Effective December 31, 2020)

d. To achieve compliance with TMDL WLAs as per the TMDL Implementation Plans, the LE/CL Permittees shall submit a Comprehensive Nutrient Reduction Plan (CNRP) by December 31, 2011 describing, in detail, the specific actions that have been taken or will be taken to achieve compliance with the urban WLA by December 31, 2020. The CNRP must include the following:

i. Evaluation of the effectiveness of BMPs and other control actions implemented. This evaluation shall include the following:

(a) The specific ordinance(s) adopted or proposed for adoption to reduce the concentration of nutrient in urban sources.

(b) The specific BMPs implemented to reduce the concentration of urban nutrient sources and the water quality improvements expected to result from these BMPs.

(c) The specific inspection criteria used to identify and manage the urban sources most likely causing exceedances of water quality objectives for nutrients.

(d) The specific regional treatment facilities and the locations where such facilities will be built to reduce the concentration of nutrient discharged from urban sources and the expected water quality improvements to result when the facilities are complete.

and

ii. Proposed method for evaluating progress towards compliance with the nutrient WLA for Urban Runoff. The progress evaluation shall include:

(a) The scientific and technical documentation used to conclude that the CNRP, once fully implemented, is expected to achieve compliance with the urban waste load allocation for nutrient by December 31, 2020.

(b) A detailed schedule for implementing the CNRP. The schedule must identify discrete milestones decision points and alternative analyses necessary to assess satisfactory progress toward meeting the urban waste load allocations for nutrient by December 31, 2020. The schedule must also indicate which agency or agencies are responsible for meeting each milestone.

(c) The specific metric(s) that will be established to demonstrate the effectiveness of the CNRP and acceptable progress toward meeting the urban waste load allocations for nutrient by December 31, 2020.

(d) The DAMP, WQMP and LIPs shall be revised consistent with the CNRP no more than 180 days after the CNRP is approved by the Regional Board.

(e) Detailed descriptions of any additional BMPs planned, and the time required to implement those BMPs, in the event that data from the watershed-wide water quality monitoring program indicate that water quality objectives for nutrient are still being exceeded after the CNRP is fully implemented.

e. The draft CNRP must be submitted to the Regional Board by December 31, 2011. The LE/CL Permittees may submit the plan individually, jointly or through a collaborative effort with other urban dischargers such as the existing LE/CLTMDL Task Force. Regional Board staff will review the document and recommend necessary revisions no more than 90 days after receiving the draft plan. The LE/CL Permittees must submit the final version of the plan no more than 90 days after receiving the comments from Regional Board staff. The Regional Board will schedule a public hearing to consider approving the CNRP, as a final water quality-based effluent limitation for the Nutrient WLA, no more than 90 days after the final plan is submitted by the LE/CL Permittees. In approving the CNRP as the final WQBELs, the Regional Board shall make a finding that the CNRP, when fully implemented, shall achieve the urban WLA for nutrient by December 31, 2020; and,

f. Once approved by the Regional Board, the CNRP shall be incorporated into this Order as the final WQBELs for LE/CL Nutrient TMDL. Based on BMP effectiveness analysis, the CNRP shall be updated, if necessary. The updated CNRP shall be implemented upon approval by the Regional Board.

g. Compliance with the WLA is based on a 10-year running average. Hence, data collection consistent with the approved Phase 2 LE/CL TMDL monitoring program required in the Monitoring and Reporting Program must commence by December 31, 2010[37].

h. A summary of all relevant data from water quality monitoring programs shall be submitted in the Annual Report. This will include an evaluation of compliance with the LE/CL TMDL by reporting the effectiveness of the BMPs implemented in the watershed to control nutrient inputs into the lake from Urban Runoff pursuant to Regional Board Resolution No. R8-2006-0031 and R8-2007-0083, or as amended by subsequent Regional Board adopted resolutions.

i. The DAMP, WQMP and LIPs shall be revised as necessary to implement the plans submitted pursuant to paragraph a through h of this section and summarize all such revisions in the Annual Report.

j. In the event that the Regional Board has not adopted alternative final WQBELs, in accordance with Section VI.D.2.d., above, by December 31, 2020, the Urban WLAs specified in Tables 9 and 10, below, shall automatically become the final numeric WQBELs for the LE/CL Permittees to be achieved by December 31, 2020. These final Effluent Limits shall be considered effective for enforcement purposes on January 1, 2021.

Table 9 - Canyon Lake Nitrogen and Phosphorus Waste Load and Load Allocations[a]

Canyon Lake Nutrient TMDL	Final Total Phosphorus Waste Load Allocation (kg/yr)[b, c]	Final TN Waste Load Allocation (kg/yr) [b, c]
Urban	306 (675 lbs/yr)	3,974 (8763 lbs/yr)
Septic systems	139 (306 lbs/yr)	4,850 (10692 lbs/yr)

[a] The WLAs for Canyon Lake apply to those land uses located upstream of Canyon Lake.

[b] Final WLA compliance to be achieved by December 31, 2020.

[c] TMDL and WLA specified as 10-year running average.

Table 10 - Lake Elsinore Nitrogen and Phosphorus Waste Load and Load Allocations[a]

[37] Resolution No. R8-2004-0037 requires initiation of the Phase 2 watershed-wide Wet Season monitoring upon completion of the Phase 1 in-lake monitoring program. Regional Board staff is currently in discussion with LE/CL TMDL Task Force regarding this transition and are expected to identify reductions in Phase 1 monitoring program that will offset the costs of the enhanced Phase 2 program.

Lake Elsinore Nutrient TMDL	Final Total Phosphorus WLA (kg/yr)[b, c]	Final TN WLA (kg/yr)[c, d]
Urban	124 (273.3 lbs/yr)	349 (769.4 lbs/yr)
Septic systems	69 (152 lbs/yr)	608 (1340 lbs/yr)

[a] The Lake Elsinore TMDL WLAs for septic systems only apply to those land uses located downstream of Canyon Lake.

[b] Final compliance to be achieved by December 31, 2020.

[c] TMDL and WLA specified as 10-year running average.

[d] WLA for supplemental water should be met as a 5 year running average by December 31, 2020.

[e] WLA for Canyon Lake overflows

k. The LE/CL Permittees may demonstrate compliance with the WLAs using either of the following two methods:

i. Directly, using relevant monitoring data and approved and approved modeling procedures to estimate actual nitrogen and phosphorus loads being discharged to the lakes, or,

ii. Indirectly, using water quality monitoring data and other biological metrics approved by the Regional Board, to show Water Quality Standards are being consistently attained (as measured by the response targets identified in the LE/CL TMDL).

l. The TMDLs explicitly support the trading of pollutant allocations among sources to the extent that such allocation tradeoffs optimize point and non-point source control strategies to achieve the WQBELs in the most efficient manner.

VII. RECEIVING WATER LIMITATIONS

A. Urban Runoff discharges from the Permittees' MS4 shall not cause or contribute to exceedances of Receiving Water Quality Standards (as defined by Beneficial Uses and Water Quality Objectives in Chapter 4 of the Basin Plan) for surface waters or ground waters.

B. The DAMP and its components, including the LIPs, must be designed to achieve compliance with Receiving Water Limitations associated with discharges of Urban Runoff to the MEP. It is expected that compliance with Receiving Water Limitations will be achieved through an iterative process and the application of increasingly more effective BMPs.

C. The Permittees shall comply with Section V.B and VII.A of this Order, through timely implementation of control measures and other actions to reduce Pollutants in Urban Runoff in accordance with the DAMP and other requirements of this Order, including modifications thereto.

D. If exceedances of Water Quality Standards persist notwithstanding implementation of the DAMP and other requirements of this Order, the Permittees shall assure compliance with Sections V.B and VII.A of this Order, by complying with the following procedure:

1. Upon a determination by either the Permittees or the Executive Officer that the discharges from the MS4 are causing or contributing to an exceedance of an applicable Water Quality Standard, the Permittees shall:

   a. Promptly, within two (2) working days, provide oral or e-mail and thereafter submit a report to the Executive Officer that describes the BMPs that are currently being implemented and the additional BMPs that will be implemented to prevent or reduce those Pollutants that are causing or contributing to the exceedance of the applicable Receiving Water Quality Standards.

   b. The report may be incorporated in the annual update to the DAMP, unless the Executive Officer directs an earlier submittal.

   c. The report shall include an implementation schedule.

   d. The Executive Officer may require modifications to the report.

   e. Submit any modifications to the report required by the Executive Officer within 30 days of notification;

2. Within 30 days following approval by the Executive Officer of the report described above, the Permittees shall revise the DAMP, applicable LIPs, and monitoring program to incorporate the approved modified BMPs that have been and will be implemented, the implementation schedule, and any additional monitoring required;

3. Implement the revised DAMP, applicable LIPs and monitoring program in accordance with the approved schedule.

4. If the exceedance is solely due to discharges to the MS4 from activities or areas outside the Permittees jurisdiction or control, the Permittees must, within two (2) working days of becoming aware of the situation, provide oral or e-mail notice to the Executive Officer of the determination of the exceedance and provide written documentation of these discharges to the Executive Officer within ten (10) calendar days of becoming aware of the situation.

5. So long as the Permittees have complied with the procedures set forth above and are implementing the revised LIP, DAMP, and monitoring program, the Permittees do not have to repeat the same procedure for continuing or recurring exceedances of the same Receiving Water Limitation unless the Executive Officer determines it is necessary to develop additional BMPs

6. Nothing in Section VII.D prevents the Regional Board from enforcing any provision of this Order while the Permittee prepares and implements the above report.

VIII. LEGAL AUTHORITY/ENFORCEMENT

A. The Permittees shall maintain adequate legal authority to control the discharge of Pollutants to the MS4 from Urban Runoff and enforce those authorities. This may be accomplished through ordinance, statute, permit, contract or similar means. Such legal authority must address all IC/IDs into the MS4, including those from residential, commercial, industrial and construction sites. The Permittees shall use the enforcement guidelines developed in Section 3.4 and 4.5 of the DAMP or develop their own enforcement program and shall incorporate the enforcement program into their LIP. Such legal authority must also at a minimum include and authorize the Permittees to:

1. Carry out all inspections, surveillance, and monitoring necessary to determine compliance and noncompliance with their ordinances and permits. The Permittee must have authority, to the extent permitted by California and federal Law and subject to the limitations on municipal action under the constitutions of California and the United States, to enter, monitor, inspect, and gather evidence (pictures, videos, samples, documents, etc.) from residential, industrial, commercial, and construction sites discharging into the MS4 within the limits of its statutory authority. The Permittees shall progressively and decisively take enforcement actions against any violators of the Storm Water Ordinance. These enforcement actions must, at minimum, meet the guidelines and procedures listed in Sections 3.4 and 4.5 of the DAMP.

2. Control the contribution of Pollutants to the MS4;

3. Stop Pollutant discharge or threat of discharge if a discharger is unable or unwilling to correct significant non-compliance where there is a serious threat to public health or the environment;

4. Require the use of BMPs to prevent or reduce the discharge of Pollutants into MS4 consistent with the MEP standard.

5. Require documentation on the effectiveness of BMPs implemented to reduce the discharge of Pollutants to the MS4; and

6. The Co-Permittees' Storm Water Ordinances or other local regulatory mechanisms shall include sanctions to ensure compliance. Sanctions shall include but are not limited to: oral and/or written warnings, notice of violation or non-compliance, administrative compliance orders, stop work or cease and desist order, a civil citation or injunction, the imposition of monetary penalties or criminal prosecution (infraction or misdemeanor). These sanctions shall be issued in a decisive manner within a predetermined timeframe, from the time of the violation's occurrence and/or follow-up inspection.

B. The Co-Permittees shall take progressive and decisive enforcement actions against violators of their Storm Water Codes and Ordinances, in accordance with the federal storm water regulations (40CFR, Part 122.26(d)(2)(I)(A-F)), and adopted/established guidelines and procedures as described in Section 3.4 of the DAMP. The Co-Permittees shall consider the time to return to compliance as one measure of effectiveness of their Storm Water Ordinances or enforcement response procedure. The Co-Permittees shall document these actions in their records (including electronic databases as outlined in the DAMP) and Annual Reports. The Co-Permittees shall use their authority to bring dischargers into immediate compliance with enforcement actions.

C. Within three (3) years of adoption of this Order, the Co-Permittees shall promulgate and implement ordinances that would control known pathogen or Bacterial Indicator sources such as animal wastes, if necessary.

D. The Co-Permittees shall continue to provide notification to the Executive Officer of storm water related information obtained during site inspections of construction and industrial sites regulated by the General Storm Water Permits and of sites that should be regulated under the General Storm Water Permits. The notification should include perceived violations of the General Storm Water Permits or local requirements, prior history of violations of the Permittee's Storm Water Ordinance, enforcement actions related to the Storm Water Ordinance taken by the Permittee, and other relevant information. In addition, Sections XVI.B of this Order addresses additional notification requirements for construction, industrial and commercial sites not covered under the General Storm Water Permits. Notification shall not prevent or delay the Co-Permittees from independently taking appropriate actions to bring Construction Sites and Industrial Facilities into compliance with their local ordinances, rules, regulations and WQMP.

E. The Permittees are encouraged to enter into interagency agreements with owners of other MS4, such as CalTrans, school and college districts, universities, Department of Defense, Native American Tribes, etc., to control the contribution of Pollutants into their

MS4 from the non-Permittee MS4. The Regional Board will continue to notify the owner/operator of the MS4 systems and the Permittee if the Board issues a permit for discharges into the MS4.

F. The Co-Permittees shall annually review their Storm Water Ordinances and provide findings within the Annual Report on the effectiveness of these ordinances and enforcement programs in prohibiting the following types of discharges to the MS4 (the Co-Permittees may propose appropriate BMPs in lieu of prohibiting these discharges, where the Co-Permittees are responsible for ensuring that dischargers adequately maintain those BMPs):

1. Sewage, where a Co-Permittee operates the sewage collection system (also prohibited under the Statewide SSO Order[38]);
2. Wash water resulting from the hosing or cleaning of gas stations, auto repair garages, and other types of automobile service stations;
3. Discharges resulting from the cleaning, repair, or maintenance of any type of equipment, machinery, or facility, including motor vehicles, concrete mixing equipment, portable toilet servicing, etc.;
4. Wash water from mobile auto detailing and washing, steam and pressure cleaning, carpet/upholstery cleaning, pool cleaning and other such mobile commercial and industrial activities;
5. Water from cleaning of municipal, industrial, and commercial sites, including parking lots, streets, sidewalks, driveways, patios, plazas, work yards and outdoor eating or drinking areas, etc.;
6. Runoff from material storage areas or uncovered receptacles that contain chemicals, fuels, grease, oil, or other Hazardous Materials[39];
7. Discharges of runoff from the washing of hazardous material from paved or unpaved areas;
8. Discharges of pool or fountain water containing chlorine, biocides, or other chemicals; pool filter backwash containing debris and chlorine;
9. Pet waste, yard waste, litter, debris, sediment, etc.; and,
10. Restaurant or food processing facility wastes such as grease, floor mat and trash bin wash water, food waste, etc.

---

[38] State Board WQO No. 2006-0003.
[39] Hazardous material is defined as any substrate that poses a threat to human health or the environment due to its toxicity, corrosiveness, ignitability, explosive nature or chemical reactivity. These also include materials named by EPA to be reported if a designed quantity of the material is spilled into the waters of the United States or emitted into the environment.

G. Within 24 months after Order adoption, each Co-Permittee shall submit a certification statement, signed by its legal counsel, that the Co-Permittee has obtained all necessary legal authority in accordance with 40 CFR 122.26(d)(2)(i) (A-F) and to comply with this Order through adoption of ordinances and/or municipal code modifications. A copy of the certification shall also be placed in the LIP.

H. Annually thereafter, Permittees shall evaluate the effectiveness of implementation and enforcement response procedures with respect to the above items. The findings of these reviews, along with recommended corrective actions, where appropriate, and schedules shall be submitted as part of the Annual Report for the corresponding reporting period. The LIP shall be updated accordingly.

IX. ILLICIT CONNECTIONS/ILLEGAL DISCHARGES (IC/ID); LITTER, DEBRIS AND TRASH CONTROL

A. Consistent with each Co-Permittees statutory authority, the Co-Permittees have adopted Storm Water Ordinances. The Co-Permittees must continue to prohibit IC/IDs to the MS4 through their Storm Water Ordinances and the Principal Permittee must do so through its statutory authority. In addition, the Permittees must continue to implement and improve routine inspection and monitoring and reporting programs for their MS4 facilities. If routine inspections or Dry Season monitoring indicate IC/IDs, they must be investigated and eliminated or permitted within sixty (60) calendar days of receipt of notice by its staff or from a third party.

B. The Permittees upon being put on notice by staff or a third party must immediately (within 24 hours of receipt of notice by its staff or from a third Party) investigate all spills, leaks, and/or other illegal discharges to the MS4. Based upon their assessment and as specified below, the Permittees must provide notifications and reporting as described in Section 4 of the DAMP and Section XVI of this Order.

C. The Permittees shall control Illegal Dumping that may result in a discharge of Pollutants to the MS4 to the MEP. The Permittees shall describe their procedures and authorities for managing Illegal Dumping in their LIP.

D. Within 18 months of adoption of this Order, the Permittees shall review and revise their IC/ID program to include a pro-active IDDE using the Guidance Manual for Illicit Discharge, Detection, and Elimination by the Center for Watershed Protection[40] or any

[40] USEPA (Illicit Discharge Detection and Elimination - A Guidance Manual for Program Development and Technical Assessments) by the Center for Watershed Protection and Robert Pitt, University of Alabama, October 2004, updated 2005).

other equivalent program consistent with Section IX.E below. The result of this review shall be reported in the Annual Report and include a description of the Permittees' revised pro-active program, procedures and schedules. The LIP shall be updated accordingly.

E. The Permittees' revised IC/ID programs shall specify an IDDE program for each Co-Permittee to individually, or in combination:

   a. Develop an inventory and map of Permittee MS4 facilities and Outfalls to Receiving Waters.

   b. Develop a schedule to be submitted within 18 months to conduct and implement systematic investigations of MS4 open channels and Major Outfalls.

   c. Use field indicators to identify potential Illegal Discharges, if applicable;

   d. Track Illegal Discharges to their sources[41] where feasible; and

   e. Educate the public about Illegal Discharges and Pollution Prevention where problems are found.

F. The Permittees shall continue to integrate IC/ID detection and elimination into their inspection programs, training of Permittee staff, and monitoring data collection and other indicator data.

G. The Permittees shall annually review and evaluate their IC/ID program, including litter/trash BMPs, to determine if the program needs to be adjusted. Findings of the review and evaluation shall be submitted with the Annual Report.

H. The Permittees shall maintain a database summarizing IC/ID incident response (including IC/IDs detected as part of field monitoring activities). This information shall be updated on an ongoing basis and submitted with the Annual Report.

I. The Permittees shall control, consistent with the MEP standard, Illegal Discharges (including the discharge of spills, leaks, or dumping of any materials other than storm water and authorized non-storm water) into the MS4. All reports of Illegal Discharge shall be promptly investigated and reported as specified in Section XVI (Notification Requirements).

J. In the 2004-2005 Annual Report, the Permittees characterized trash, determined its main source(s) and developed and implemented appropriate BMPs to reduce and/or to eliminate the discharge of trash and debris to Waters of the US to the MEP. The BMPs should be continued and their effectiveness must be reported in the Annual Report.

K. Where non-jurisdictional IC/IDs within a Permittees jurisdiction are identified, the Permittees will notify the responsible party and the Executive Officer of the discharge.

---

[41] Table 2: Land uses, Generating Sites and Activities that Produce Indirect Discharges from IDDE, A Guidance Manual for Program Development and Technical Assessments, October 2004 CWP.

X. SEWAGE SPILLS, INFILTRATION INTO THE MS4 SYSTEMS FROM LEAKING SANITARY SEWER LINES, SEPTIC SYSTEM FAILURES, AND PORTABLE TOILET DISCHARGES

A. The Permittees shall continue to provide local sanitation districts 24-hour access to the MS4 to address sewage spills. The Permittees shall continue to work cooperatively with the local sewer agencies to determine and control the impact of infiltration from leaking sanitary sewer systems on Urban Runoff quality. Each Permittee shall implement control measures necessary to minimize infiltration of seepage from sanitary sewers to the MS4 through routine preventative maintenance of the MS4.

B. Each Permittee shall continue to cooperate and coordinate with the sewage collection/treatment agencies as described in Appendix I of the DAMP to swiftly respond to and contain sewage spills that may discharge into its MS4. Management and/or preventive measures shall continue to be implemented for sources including portable toilets, failing septic systems, and failing private laterals that may cause or contribute to Urban Runoff Pollution problems in Permittee jurisdictions.

C. Permittees who are regulated under the SSO Order No. 2006-0003-DWQ, shall continue to comply with that Order to control sanitary system overflows.

D. Permittees with septic systems in their jurisdiction shall maintain the inventory of septic systems within its jurisdiction completed in 2008. Updates to the inventory will be maintained by County Environmental Health via a database of new septic systems approved since 2008.

XI. CO-PERMITTEE INSPECTION PROGRAMS

The Permittee inspection programs are outlined in Sections 7 and 8 of the DAMP and describe some of the minimum inspection and enforcement procedures utilizing existing inspection programs, provides criteria for characterizing the significance of violations, criteria for prioritizing violations, appropriate response actions corresponding to the priority of violations and identifies the hierarchy of enforcement/compliance responses. Section 3.4 of the DAMP provides a framework to standardize the implementation and enforcement by the Co-Permittees of their respective Storm Water Ordinances. The Co-Permittees shall continue to enforce their respective Storm Water Ordinances consistent with the DAMP and this Order.

A. GENERAL REQUIREMENTS

1. The Co-Permittees shall continue to maintain and update a database inventory of all active Construction Sites, and Industrial and Commercial Facilities within their jurisdiction consistent with the database requirements of Section 7 and 8 of the DAMP. Construction Sites and Industrial and Commercial Facilities shall be

included in the database inventories regardless of whether the Construction Sites or Commercial and Industrial Facilities are subject to the General Construction Permit or the General Industrial Permit or other individual NPDES permit or WDRs.

2. The Co-Permittee inspection database inventory described in Section XI.A.1 shall be maintained in an electronic database format that may be made available to the Regional Board upon request (e.g. request via phone call, e-mail, letter, etc,). The database inventory must be consistent with the requirements of Sections 7 and 8 of the DAMP. Supporting paper (or electronic) files shall also be maintained and made available upon Regional Board request. Supporting files should include a record of inspection dates, the results of each inspection, photographs (if any), video (if any) and a summary of any enforcement actions taken. The inventory databases shall be updated on an annual basis and an electronic copy shall be provided with each Annual Report.
3. The Co-Permittee shall not issue an occupancy permit to an Industrial Facility or other license authorizing the facility to operate, unless the applicant is informed of the General Industrial Permit and that it may have to secure coverage under the General Industrial Permit. The Co-Permittees shall verify during Industrial Facility inspections whether a site has obtained necessary permit coverage under the General Industrial Permit.
4. If the Industrial Facility's SIC code falls under the mandatory category the Co-Permittee shall notify the Regional Board and the applicant that they may be required to obtain coverage under the General Industrial Permit.
5. Permits for Construction Sites shall not be granted until appropriate coverage under the General Construction Permit (s) is verified.
6. Perceived Non-filers for the General Storm Water Permits shall be reported consistent with Section XVI.E.
7. If a Co-Permittee receives notice by its staff or from a third party of a non-Emergency Situation representing a possible violation of the General Storm Water Permit or other permit issued by the State or Regional Board to an Industrial Facility or Construction Site, the Co-Permittee shall, within two (2) working days, provide oral or e-mail notice to Regional Board staff of the location within its jurisdiction where the incident occurred and describe the nature of the incident. After notifying the Regional Board, no further action is necessary regarding the General Storm Water Permits. However, each Co-Permittee shall take appropriate actions to bring an Industrial Facility or Construction Site into compliance with its Storm Water Ordinances.
8. The Co-Permittees need not inspect facilities already inspected by Regional Board staff if the inspection was conducted within the specified time period. Regional

Board staff inspection information is available at www.ciwqs.ca.gov[42].

9. Each Co-Permittee shall respond to complaints received from third parties regarding Construction Sites and Industrial and Commercial Facilities in a timely manner to ensure that the sites are not a source of Pollutants to the MS4 and the Receiving Waters.
10. The Co-Permittees shall enforce their Storm Water Ordinances and permits at all Construction Sites and Industrial, and Commercial Facilities in a fair, firm and consistent manner. Sanctions for non-compliance as required under Section VIII (Legal Authority/Enforcement) shall be deemed adequate to bring the site into compliance with their Storm Water Ordinances and permits.
11. Each Co-Permittee shall document, evaluate and annually report the effectiveness of its enforcement procedures in achieving prompt and timely compliance with inspection programs. Sanctions for non-compliance shall be adequate to bring the site into compliance and to stop the Pollutant discharge consistent with the requirements of Section VIII of this Order.
12. The Principal Permittee and the County have implemented the CAP. Through the Riverside County Department of Environmental Health, the CAP addresses storm water compliance issues at restaurant facilities and businesses that must have a hazardous material permit for either storing, handling or generating hazardous materials. As described in Section 8 of the DAMP, the Permittees must either participate in the CAP or implement an equivalent inspection program. The cities of Corona and Riverside maintain such programs through their respective POTW pre-treatment programs that may be supplemented by the activities of the Department of Environmental Health during routine inspections. The County is establishing a stand-alone NPDES Storm water Compliance Inspection and Enforcement Program (CIEP) for Industrial and Commercial Facilities in the unincorporated areas of the County.
13. Where inspections and/or enforcement required by this Order are carried out on behalf of the Co-Permittee by other agencies or departments such as the County Department of Environmental Health, county and local fire departments, hazardous materials programs, code enforcement, industrial pretreatment, and building and safety, the Co-Permittee shall monitor and annually evaluate and report adequacy of program coverage and enforcement response in complying with this Order.
14. All inspectors shall be trained in accordance with Section XV.

[42] To obtain access to the State database, registration at the following link is necessary: http://www.waterboards.ca.gov/water_issues/programs/ciwqs/chc_npdes.shtml. Contact information is available at http://www.waterboards.ca.gov/water_issues/programs/ciwqs/contactus.shtml.

B. CONSTRUCTION SITES

1. Each Co-Permittee shall include in the electronic database identified in Section XI.A.2 an inventory of all Construction Sites within its jurisdiction for which building or grading permits have been issued and activities at the site include: soil movement; uncovered storage of materials or wastes, such as dirt, sand or fertilizer; or exterior mixing of cementaceous products, such as concrete, mortar or stucco.

2. Each Permittee shall continue to prioritize Construction Sites within its jurisdiction as a high, medium or low threat to water quality. Evaluation of construction sites shall be based on factors, which shall include but not be limited to: soil erosion potential, project size, proximity and sensitivity of Receiving Waters and any other relevant factors. At a minimum, high priority Construction Sites shall include: sites disturbing 50 acres and greater; sites disturbing over 1 acre with Direct Discharge to Receiving Waters with CWA Section 303(d) listed waters for sediment or turbidity impairments; site specific characteristics[43] ; and any other relevant factor. At a minimum, medium priority construction sites shall include: sites disturbing between 10 to less than 50 acres of disturbed soil.

3. Each Permittee shall conduct Construction Site inspections for compliance with its ordinances (grading, WQMPs, etc.) and local permits (building, grading, etc.). The Permittees shall develop a checklist for conducting Construction Site inspections. Inspections of Construction Sites shall include, but not be limited to:

    a. Verification of coverage under the General Construction Permit (PRDs or Waste Discharge Identification Number [WDID]) during the initial inspection. As Permittees become aware of changes in ownership, they shall notify Regional Board staff.

    b. Ensure that the BMPs implemented on-site are effective for the appropriate phase of construction (preliminary stage, mass grading stage, streets and utilities stage etc.).

    c. Visual observations for Illegal Discharges, potential Illicit Connections, and potential Pollutant sources.

    d. Implementation and maintenance of BMPs required under local requirements.

    e. An assessment of the effectiveness of BMPs implemented at the site and the need for any additional BMPs.

[43] The recently adopted General Construction Permit Order No. 2009-0009-DWQ includes risk-based characterization of construction sites based on site-specific conditions.

4. At a minimum, the inspection frequency shall include the following:
   a. During the Wet Season (October 1 through May 31 of each year), all high priority Construction Sites are to be inspected, in their entirety, once a month. All medium priority Construction Sites are to be inspected at least twice during the Wet Season. All low priority Construction Sites are to be inspected at least once during the Wet Season. Construction Sites that disturb less than one acre may be inspected on an as needed basis. When BMPs or BMP maintenance is deemed inadequate or out of compliance, an inspection frequency of at least once per week should be maintained until BMPs and BMP maintenance are brought into compliance.
   b. During the Dry Season (June 1 through September 30 of each year), all Construction Sites shall be inspected at a frequency sufficient to ensure that sediment and other Pollutants are properly controlled and that unauthorized, Non-storm Water discharges are prevented.

C. INDUSTRIAL FACILITIES

1. To establish priorities for inspection, the Permittees shall continue to prioritize Industrial Facilities within their jurisdiction as a high, medium, or low threat to water quality. Continual evaluation of these Industrial Facilities should be based on such factors as type of industrial activities (i.e., SIC codes), materials or wastes used or stored outside, Pollutant discharge potential, compliance history, facility size, proximity and sensitivity of Receiving Waters and any other relevant factors described in Section 8 of the DAMP. At a minimum, a high priority shall be assigned to: Industrial Facilities subject to section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA); Industrial Facilities that handle or generate Pollutants for which the receiving water is impaired, facilities that have a significant potential to release pre-production plastics or nurdles into the environment, and Industrial Facilities with a high potential for or history of unauthorized, Non-storm Water discharges.
2. Each Co-Permittee shall conduct Industrial Facility inspections for compliance with its ordinances, permits and this Order. Industrial Facility inspections shall be consistent with Section 8 of the DAMP. If an inspection indicates the need for follow-up, Co-Permittee follow-up inspections shall include a review of the Industrial Facility's material and waste handling and storage practices, written documentation of Pollutant control BMP implementation and maintenance procedures, digital photographic documentation of water quality violations as well as evidence of past or present unauthorized, Non-storm Water discharges and enforcement actions issued at the time of the Co-Permittee inspection. Report of inspections shall be included in the Annual Report and shall provide the basis for downgrading or upgrading priority ranking of Industrial Facilities.

3. All high priority Industrial Facilities are to be inspected at least once a year; all medium priority Industrial Facilities are to be inspected at least once every two years; and all low priority Industrial Facilities are to be inspected at least once during the term of this Order. In the event that inappropriate material or waste handling or storage practices are observed, or unauthorized, non-storm water discharges are observed, an enforcement order shall be issued and a re-inspection frequency adequate to bring the Industrial Facility into compliance must be maintained (at a minimum, once a month or within the compliance schedule prescribed by the Co-Permittee in a written notice to the discharger). Once compliance is achieved, a minimum inspection frequency of once every six months should be maintained for the annual reporting period.
4. Each Co-Permittee shall continually identify undocumented Industrial Facilities within its jurisdiction and shall add them to the database, as identified in Section XI.A.2. Additionally, each Industrial Facility shall be listed as per the criteria in specified in Section XI.C.1 within 15 days from the initial date of discovery of the Industrial Facility.
5. Each Permittee shall require Industrial Facilities to implement source control and pollution prevention measures consistent with the requirements of Section 8.of the DAMP.

D. COMMERCIAL FACILITIES

1. Each Permittee shall continue to implement the CAP or equivalent, pursuant to Section 8. of the DAMP and Section XI.A.9 (complaints) of this Order; Section 8 shall be modified to clarify the types of facilities specifically addressed by the CAP. Within 18 months, the Co-Permittees shall also identify any facilities that transport, store or transfer pre-production plastic pellets and managed turf facilities (e.g. private golf courses, athletic fields, cemeteries, and private parks) within their jurisdiction and determine if these facilities warrant additional inspection to protect water quality.
2. The Permittees shall continue to develop BMPs applicable for each of the Commercial Facilities described in Section 8 of the DAMP.
3. The Co-Permittees shall continue to prioritize Commercial Facilities within their jurisdiction as a high, medium, or low threat to water quality based on such factors as the type, magnitude, and location of the commercial activity, proximity and sensitivity of Receiving Waters, potential for discharge of Pollutants to the MS4, Commercial Facilities that handle or generate Pollutants for which the Receiving Water is Impaired, frequency of inspections and facilities with a high potential for or history of unauthorized, Non-storm Water discharges.
4. All high priority Commercial Facilities shall be inspected at least once per year; all medium priority Commercial Facilities shall be inspected at least every two years; and all low priority Commercial Facilities shall be inspected at least once during the

term of this Order. At a minimum, each Commercial Facility shall be required to implement source control and pollution prevention BMPs consistent with the requirements of Section 8 of the DAMP. Co-Permittee follow-up inspections should include a review of BMPs implemented, their effectiveness and maintenance; written and photographic documentation of materials and waste handling and storage practices; evidence of past or present unauthorized, Non-storm Water discharges; and an assessment of management/employees awareness of storm water pollution prevention measures.

5. In the event that inappropriate material or waste handling or storage practices are observed, or there is evidence of past or present unauthorized, Non-storm Water discharges, a written enforcement order shall be issued at the time of the initial inspection for CAP equivalent inspection programs or at the time of the CAP follow-up inspection, to bring the Commercial Facility into compliance.
6. Within 18 months of adoption of this Order, the Co-Permittee shall notify all mobile businesses based within their jurisdiction concerning the minimum Source Control and Pollution Prevention BMPs that they must develop and implement. For purposes of this Order, mobile businesses include: mobile auto washing/detailing; equipment washing/cleaning; carpet, drape, furniture cleaning; and mobile high pressure or steam cleaning activities that are based out of a Co-Permittee's jurisdiction. The mobile businesses shall be required to implement appropriate BMPs within 3 months of being notified by the Co-Permittees. The Co-Permittees shall also notify mobile businesses discovered operating within their jurisdiction.
7. Within 24 months of adoption of this Order, the Co-Permittees shall develop an enforcement strategy to address mobile businesses.
8. The Co-Permittees should continue to maintain the CAP restaurant inspection program, or equivalent. Inspections for Commercial Facilities with restaurants shall, at a minimum, address:
    a. Oil and grease disposal to verify that these wastes are not poured onto a parking lots, streets or adjacent catch basins;
    b. Trash bin areas, to verify that these areas are clean, the bin lids are closed, the bins are not used for liquid waste disposal and wash water from the bins is not disposed of into the MS4;
    c. Parking lot, alley, sidewalk and street areas to verify that floor mats, filters and garbage containers are not washed in those areas and that no wash water is disposed of in those areas;
    d. Parking lot areas to verify that they are cleaned by sweeping, not by hosing down, and that the facility operator uses dry methods for spill cleanup; and,
    e. Violations of the Storm Water Ordinance shall be enforced by the jurisdictional Co-Permittee.

E. RESIDENTIAL PROGRAM

1. Within 18 months of adoption of this Order, each Co-Permittee shall develop and implement a residential program consistent with these requirements to reduce the discharge of Pollutants from residential activities to the MS4, consistent with the MEP standard.
2. The Co-Permittees shall identify residential activities that are potential sources of Pollutants and develop and/or enhance Fact Sheets/BMPs as appropriate. At a minimum, this should include: residential auto washing and maintenance activities; use and disposal of pesticides, herbicides, fertilizers and household cleaners; and collection and disposal of pet wastes. The Permittees shall distribute the Fact Sheets/BMPs and appropriate information from organizations such as the Riverside-Corona Resource Conservation District[44] and USDA's Backyard Conservation Program[45] to the residents to ensure that discharges from the residential areas are not causing or contributing to a violation of Water Quality Standards in the Receiving Waters.
3. The Co-Permittees, collectively or individually, shall facilitate the proper collection and management of used oil, toxic and hazardous materials, and other household wastes. The Permittees should continue distribution of information regarding the dates and locations of temporary and permanent household hazardous waste and antifreeze, oil, battery and paint collection events and facilities, and financial support of household hazardous waste and antifreeze, oil, battery and paint collection facilities and events or curbside or special collection sites managed by the Co-Permittees or private entities, such as solid waste haulers.
4. The Regional Board recommends continuation of Co-Permittee efforts to coordinate with local water purveyors and other stakeholders to encourage efficient irrigation and minimize runoff from residential areas.
5. The Co-Permittees shall enforce their Storm Water Ordinance as appropriate to control the discharge of Pollutants associated with residential activities.
6. Each Co-Permittee shall include an evaluation of its residential program in the Annual Report starting with the second Annual Report after adoption of this Order.

---

[44] The Riverside-Corona Resource Conservation District (RCRCD) provides gardening and horticulture information appropriate for the area including native plant selection, backyard management, alternatives to pesticide, irrigation scheduling and composting. The RCRCD is sponsored by the cities and county of Riverside Only Rain Down the Storm Drain Pollution Prevention Program.

[45] Backyard Conservation, Bringing Conservation from the Countryside to Your Backyard, USDA Natural Resources Conservation Service, National Association of Conservation Districts, Wildlife Habitat Council and National Audubon Society.

XII. NEW DEVELOPMENT (INCLUDING SIGNIFICANT REDEVELOPMENT)

A. GENERAL REQUIREMENTS:

1. Each Co-Permittee, consistent with the DAMP, and requirements of this Order, when considering any map or permit for a New Development or Significant Redevelopment project for which discretionary approval is sought, must continue to require such map or permit to obtain coverage under the General Construction Permit, where applicable, prior to the issuance of grading or construction permits. Each Co-Permittee shall specify its verification procedure and any tools utilized for this purpose in its LIP.

2. Each Co-Permittee must continue to implement those BMPs identified in Section 7.1 of the DAMP. Each Permittee shall ensure that the erosion and sediment control plans it approves include appropriate erosion and sediment control BMPs (i.e., erosion measures for slopes greater than a certain length or hill-side developments, ingress/egress controls, perimeter controls, run-on diversion, if significant) such that a distinct and effective combination of BMPs consistent with site risk is implemented through all phases of construction.

3. The land use approval process of each Co-Permittee must continue to require post-construction BMPs, Source Control BMPs and Treatment Control BMPs and identify their locations and long-term maintenance responsibilities consistent with the requirements of this Order.

4. Each Permittee shall ensure, consistent with the MEP standard and within the limits of its legal authority, that runoff from New Development and Significant Redevelopment projects not regulated under this Order but that require encroachment permits for connections to the MS4 regulated under this Order are consistent with the requirements of this Order including the model WQMP for the Permit Area.
5. Each Permittee shall ensure that appropriate BMPs to reduce erosion and mitigate Hydromodification are included in the design for replacement of existing culverts or construction of new culverts and/or bridge crossings to the MEP[46].
6. Each Permittee shall ensure, consistent with the MEP standard, that runoff from development projects it approves, does not cause nuisance to adjoining downstream properties and stream channels.
7. Each Permittee shall ensure to the MEP that MS4s[47] are appropriately maintained consistent with Section XIV of this Order or are adequately maintained by a legally responsible party.

---

[46] This type of project may require a CWA Section 404 Permit.

8. Each Permittee shall require applicants to minimize the short and long-term adverse impacts on Receiving Water quality from New Development and Significant Redevelopment maps or permits where discretionary approval is sought, as required in Section XII.D below, by: (1) continuing to review, approve, and verify implementation of project-specific WQMPs, implementation of LID principles, where feasible; (2) addressing HCOCs; and (3) ensuring that long term BMP operation and maintenance mechanisms are in place prior to project closure or issuance of certificates of occupancy.

9. The requirements of Section XII.D below shall apply to Permittee projects that meet the New Development and Significant Redevelopment criteria.

10. Each Permittee shall participate in the development of a Watershed Action Plan, described in Section XII.B, below, to integrate water quality, stream protection and storm water management and use within the Permit Area with land use planning policies, ordinances, and plans.

B. WATERSHED ACTION PLAN

1. An integrated watershed management approach may facilitate integration of planning and project approval processes with water quality and quantity control measures. Management of the impacts of Permit Area urbanization on water quality and stream stability is more effectively done on a per-site, neighborhood and municipal basis based on an overall watershed plan. Pending completion of the Watershed Action Plan consistent with this section, management of the impacts of urbanization shall be accomplished using existing programs. The Permittees shall develop a Watershed Action Plan to address the entire Permit Area. The Permittees may choose to develop sub-watershed action plans based on the overall Watershed Action Plan in the future based on new 303(d) impairments, TMDL requirements, or other factors.

2. The Permittees shall develop and submit to the Executive Officer for approval a Watershed Action Plan that describes and implements the Permittees' approach to coordinated watershed management. The objective of the Watershed Action Plan is to address watershed scale water quality impacts of urbanization in the Permit Area associated with Urban TMDL WLAs, stream system vulnerability to Hydromodification from Urban Runoff, cumulative impacts of development on

[47] Urban runoff conveyance systems created or resulting from development projects approved by Permittees.

vulnerable streams, preservation of Beneficial Uses of streams in the Permit Area, and protection of water resources, including groundwater recharge areas.

3. Within three years of Permit adoption, the Co-Permittees shall develop the Watershed Action Plan and implementation tools to address impacts of urbanization in a holistic manner. At a minimum, the Watershed Action Plan shall include the following:
   a. Describe proposed Regional BMP approaches that will be used to address Urban TMDL WLAs.
   b. Develop recommendations for specific retrofit studies of MS4, parks and recreational areas that incorporate opportunities for addressing TMDL Implementation Plans, Hydromodification from Urban Runoff and LID implementation.
   c. Description of regional efforts that benefit water quality (e.g. Western Riverside County Multiple Species Habitat Conservation Plan, TMDL Task Forces, Water Conservation Task Forces, Integrated Regional Watershed Management Plans) and their role in the Watershed Action Plan. The Permittees shall describe how these efforts link to their Urban Runoff Programs and identify any further coordination that should be promoted to address Urban WLA or Hydromodification from Urban Runoff to the MEP.
4. Within two years of adoption of this Order, the Permittees shall delineate existing unarmored or soft-armored stream channels in the Permit Area that are vulnerable to Hydromodification from New Development and Significant Redevelopment projects.
5. Within two years of completion of the delineation in Section XII,B.4 above, develop a Hydromodification management plan (HMP) describing how the delineation will be used on a per project, sub-watershed, and watershed basis to manage Hydromodification caused by urban runoff. The HMP shall prioritize actions based on drainage feature/susceptibility/risk assessments and opportunities for restoration.
   a. The HMP shall identify potential causes of identified stream degradation including a consideration of sediment yield and balance on a watershed or sub-watershed basis.
   b. Develop and implement a HMP to evaluate Hydromodification impacts for the drainage channels deemed most susceptible to degradation. The HMP will identify sites to be monitored, include an assessment methodology, and required follow-up actions based on monitoring results. Where applicable, monitoring sites may be used to evaluate the effectiveness of BMPs in preventing or reducing impacts from Hydromodification.

6. Identify Impaired Waters [CWA § 303(d) listed] with identified Urban Runoff Pollutant sources causing impairment, existing monitoring programs addressing those Pollutants, any BMPs that the Permittees are currently implementing, and any BMPs the Permittees are proposing to implement consistent with the other requirements of this Order. Upon completion of XII.B.4, develop a schedule to implement an integrated, world-wide-web available, regional geodatabase of the impaired waters [CWA § 303(d) listed], MS4 facilities, critical habitat preserves defined in the Multiple Species Habitat Conservation Plan and stream channels in the Permit Area that are vulnerable to Hydromodification from Urban Runoff.

7. Develop a schedule to maintain the geodatabase required in Section XII.B.4 and other available and relevant regulatory and technical documents associated with the Watershed Action Plan.

8. Within three years of adoption of this Order, the Watershed Action Plan shall be submitted to the Executive Officer for approval and incorporation into the DAMP. Within six months of approval, each Permittee shall implement applicable provisions of the approved revised DAMP and incorporate applicable provisions of the revised DAMP into the LIPs for watershed wide coordination of the Watershed Action Plan.

9. The Permittees shall also incorporate Watershed Action Plan training, as appropriate, including training for upper-level managers and directors into the training programs described in Section XV. The Co-Permittees shall also provide outreach and education to the development community regarding the availability and function of appropriate web-enabled components of the Watershed Action Plan.

10. Invite participation and comments from resource conservation districts, water and utility agencies, state and federal agencies, non-governmental agencies and other interested parties in the development and use of the Watershed Geodatabase;

C. INCORPORATION OF WATERSHED PROTECTION PRINCIPLES INTO PLANNING PROCESSES

1. Within 24 months of adoption of this Order, each Co-Permittee shall review its General Plan and related documents including, but not limited to its development standards, zoning codes, conditions of approval and development project guidance to eliminate any barriers to implementation of the LID principles and HCOC discussed in Section XII.E of this Order. The results of this review along with any proposed action plans and schedules shall be reported in the Annual Report for the corresponding reporting year. Any changes to the project approval process or procedures shall be reflected in the LIP.

2. The Co-Permittees shall continue to ensure that their General Plan and related land use ordinances and land use approval processes (including, but not limited to, its approved development standards, zoning ordinances, standard conditions of approval, or project development guidelines) ensure the principles and policies enumerated below are properly considered and are incorporated, as appropriate, into the land use approval process to the MEP:
   a. Limit disturbance of natural water bodies and drainage systems; conserve natural areas; protect slopes and channels; minimize significant adverse impacts from Urban Runoff on the biological integrity of natural drainage systems and water bodies;
   b. Minimize changes in hydrology and Pollutant loading; require incorporation of controls including Source Control and Treatment Control BMPs to mitigate any projected increases in Pollutant loads and flows; ensure that post-development runoff rates and velocities from a site do not adversely impact downstream erosion and stream habitat; minimize the quantity of Urban Runoff directed to impermeable surfaces and the MS4; and maximize the percentage of permeable surfaces to allow more percolation of Urban Runoff into the ground;
   c. Preserve wetlands, riparian corridors, and buffer zones that provide important water quality benefits; establish reasonable limits on the clearing of vegetation from the project site;
   d. Encourage the use of BMPs to manage Urban Runoff quantity and quality, consistent with XII.C.1 above;
   e. Provide for appropriate permanent measures to reduce Pollutant loads in Urban Runoff from the development site; and
   f. Establish development guidelines for areas particularly susceptible to erosion and sediment loss.

3. The Co-Permittees, when acting as a CEQA Lead Agency for a project requiring a CEQA document, must identify at the earliest possible time in the CEQA process resources under the jurisdiction by law of the Regional Board which may be affected by the project. The preliminary WQMP should identify the need for any CWA Section 401 certification. The Co-Permitees should coordinate project review with Regional Board staff pursuant to the requirements of CEQA. Upon request by Regional Board staff, this coordination shall include the timely provision of the discharger's identity and their contact information and the facilitation of early-consultation meetings.

4. The following potential impacts shall be considered during CEQA review:
   a. Potential impact of project construction on Urban Runoff.
   b. Potential impact of project's post-construction activity on Urban Runoff.

c. Potential for discharge of Pollutants from areas of material storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing), waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor areas.

d. Potential for discharge of Urban Runoff to affect Beneficial Uses of the Receiving Waters.

e. Potential for significant changes in the flow velocity and/or volume of Urban Runoff that could cause environmental harm.

f. Potential for significant increases in erosion of the project site or surrounding areas.

5. Each Permittee shall provide the Regional Board with the draft amendment or revision when a pertinent General Plan element or the General Plan is noticed for comment in accordance with Govt. Code § 65350 et seq.

D. WATER QUALITY MANAGEMENT PLAN (WQMP) FOR URBAN RUNOFF (FOR NEW DEVELOPMENT/ SIGNIFICANT REDEVELOPMENT):

1. Each Permittee shall continue to require project-specific WQMPs for those maps and permits described below for which discretionary approval is sought and as further described in Section 6 and Appendix O of the DAMP. Within 18 months of adoption of this Order, the Permittees shall submit a revised WQMP to incorporate new elements required in this Order. The primary objective of the WQMP, by addressing Site Design, Source Control and Treatment Control BMPs applied on a regional, sub-regional or site specific basis, is to ensure that the land use approval process of each Co-Permittee will minimize Pollutant loads in Urban Runoff from maps or permits for which discretionary approval is given.
2. Each Co-Permittee shall ensure that an appropriate WQMP is prepared for the following categories of New Development and Significant Redevelopment projects for which a map or permit for discretionary approval is sought:

   a. *All significant re-development projects:* Significant re-development is defined as the addition or replacement of 5,000 or more square feet of impervious surface on an already developed site. Significant Redevelopment does not include routine maintenance activities that are conducted to maintain original line and grade, hydraulic capacity, original purpose of the facility, or emergency redevelopment activity required to protect public health and safety. Where redevelopment results in an increase of less than fifty percent of the impervious surfaces of a previously existing developed site, and the existing development was not subject to WQMP requirements, the numeric sizing criteria discussed below applies only to the addition or replacement, and not to the entire developed site.

Where redevelopment results in an increase of fifty percent or more of the impervious surfaces of a previously existing developed site, the numeric sizing criteria applies to the entire development.

b. For purposes of this Order, the categories of development identified below, shall be collectively referred to as "New Development".

   i. New developments that create 10,000 square feet or more of impervious surface (collectively over the entire project site) including commercial and industrial projects and residential housing subdivisions requiring a Final Map. (i.e., detached single family home subdivisions, multi-family attached subdivisions, condominiums, apartments, etc.); mixed use and public projects (excluding Permittee road projects). This category includes development projects on public and private land, which fall under the planning and building authority of the Co-Permittees.

   ii. Automotive repair shops (with SIC codes 5013, 5014, 5541, 7532-7534, 7536-7539).

   iii. Restaurants (with SIC code 5812) where the land area of development is 5,000 square feet or more.

   iv. Hillside developments disturbing 5,000 square feet or more which are located on areas with known erosive soil conditions or where the natural slope is twenty-five percent or more.

   v. Developments of 2,500 square feet of impervious surface or more adjacent to (within 200 feet) or discharging directly into ESAs.

   vi. Parking lots of 5,000 square feet or more exposed to storm water. Parking lot is defined as land area or facility for the temporary parking or storage of motor vehicles.

   vii. Retail Gasoline Outlets (RGOs) that are either 5,000 square feet or more with a projected average daily traffic of 100 or more vehicles per day.

   viii. Emergency public safety projects in any of the above-listed categories may be excluded if the delay caused due the requirement for a WQMP compromises public safety, public health and/or environmental protection.

3. WQMPs shall include BMPs (on-site and/or watershed-based), for the discharge of any urban sourced 303(d) listed Pollutant to an Impaired Waterbody on the 303(d) list such that the discharge shall not cause or contribute to an exceedance of Receiving Water Quality Objectives.

4. Treatment Control BMPs shall be in accordance with the approved WQMP and must be sized to comply with one of the following numeric sizing criteria:

a. VOLUME - Volume–based Treatment Control BMPs shall be designed to infiltrate, filter, or treat either:

   i. The volume of runoff produced from a 24-hour, 85th percentile storm event, as determined from the County of Riverside's 85th Percentile Precipitation Isopluvial Map; or,

   ii. The volume of annual runoff produced by the 85th percentile, 24-hour rainfall event determined as the maximized capture storm water volume for the area, from the formula recommended in Urban Runoff Quality Management, WEF Manual of Practice No. 23/ASCE Manual of Practice No. 87 (1998); or,

   iii. The volume of annual runoff based on unit basin storage volume, to achieve 80% or more volume treatment by the method recommended in California Storm Water Best Management Practices Handbook – Industrial/Commercial (1993); or,

   iv. The volume of runoff, as determined from the local historical rainfall record, that achieves approximately the same reduction in Pollutant loads and flows as achieved by mitigation of the 85th percentile, 24-hour runoff event;

   OR

b. FLOW - Flow-based BMPs shall be designed to infiltrate, filter, or treat either:

   i. The maximum flow rate of runoff produced from a rainfall intensity of 0.2 inch of rainfall per hour; or,

   ii. The maximum flow rate of runoff produced by the 85th percentile hourly rainfall intensity, as determined from the local historical rainfall record, multiplied by a factor of two; or,

   iii. The maximum flow rate of runoff, as determined from the local historical rainfall record that achieves approximately the same reduction in Pollutant loads and flows as achieved by mitigation of the 85th percentile hourly rainfall intensity multiplied by a factor of two.

5. Within 24 months of adoption of this Order, the Permittees shall develop a procedure for streamlining regulatory agency approval of regional Treatment Control BMPs. The recommendations should include information needed to be submitted to Regional Board for consideration of regional Treatment Control BMPs. At a minimum, it should include: BMP location; type and effectiveness in removing Pollutants of Concern; projects tributary to the regional treatment system; engineering design details; funding sources for construction, operation and maintenance; and parties responsible for monitoring effectiveness, operation and maintenance.

6. The Permittees shall continue to require other development projects for which a map or permit for discretionary approval is sought (projects that are not New Developments or Significant Re-developments required to develop project-specific

WQMPs) to incorporate conditions of approval, to require appropriate Site Design, Source Control and any other BMPs which may or may not include Treatment Control BMPs.

7. The Permittees shall ensure that the revised WQMP addresses:
   a. A review and update of Source Control BMPs required for New Development and Significant Redevelopment.
   b. Update of the list of Treatment Control BMPs, including an evaluation of their effectiveness based on national, statewide or regional studies.
8. Groundwater Protection:

   Treatment Control BMPs utilizing infiltration [exclusive of incidental infiltration and BMPs not designed to primarily function as infiltration devices (such as grassy swales, detention basins, vegetated buffer strips, constructed wetlands, etc.)] must comply with the following minimum requirements to protect groundwater:

   a. Use of structural infiltration Treatment Control BMPs shall not cause or contribute to an exceedance of groundwater Water Quality Objectives.
   b. Use of structural infiltration Treatment Control BMPs shall not cause a Nuisance or pollution as defined in Water Code Section 13050.
   c. Use of structural infiltration Treatment Control BMPs shall not be used in areas of known soil or groundwater contamination[48], without written authorization from the Regional Board Executive Officer.
   d. Located at least 100 feet horizontally from any water supply well.
   e. The vertical distance from the bottom of any infiltration structural Treatment Control BMP to the historic high groundwater mark shall be at least 10 feet. Where the groundwater basins do not support Beneficial Uses, this vertical distance criteria may be reduced, provided groundwater quality is maintained.
   f. Source Control and Pollution Prevention BMPs shall be implemented to protect groundwater quality.
   g. Adequate pretreatment of runoff prior to infiltration shall be required in gas stations and large commercial parking lots.
   h. Unless adequate pre-treatment of runoff is provided prior to infiltration, structural infiltration Treatment Control BMPs must not be used for areas of industrial or light industrial activity, such as: areas subject to high vehicular traffic (25,000 or more daily traffic), car washes; nurseries; or any other high threat to water quality land uses or activities.

[48] Extra diligence should also be performed when proposing infiltration BMPs in areas where the proposed land use is often associated with soil and groundwater contamination.

i. Class V injection wells or dry wells must not be placed in areas subject to vehicular[49] repair or maintenance activities[50], such as an auto body repair shop, automotive repair shop, new and used car dealership, specialty repair shop (e.g., transmission and muffler repair shop), or any facility that does any vehicular repair work.

E. LOW IMPACT DEVELOPMENT (LID) AND HYDROMODIFICATION MANAGEMENT TO MINIMIZE IMPACTS FROM NEW DEVELOPMENT/SIGNIFICANT REDEVELOPMENT PROJECTS:

1. Within 18 months of adoption of this Order, the Permittees shall update the WQMP to address LID principles and HCOC consistent with the MEP standard. A copy of the updated WQMP shall be submitted to the Executive Officer for approval. Within six months of approval, each Permittee shall implement the updated WQMP. Onsite LID principles as close to Pollution sources as possible shall be given preference, however, project site, sub-regional or regional LID principles may also be applied.

2. The Permittees shall require those projects identified in Section XII.D.2. to infiltrate, harvest and use, evapotranspire and/or bio-treat[51] the 85th percentile storm event ("Design Capture Volume"). The Design Capture Volume should be calculated as specified in Section XII.D.4.a, above. It is recognized that LID principles are not universally applicable and they are dependent on factors such as: soil conditions including soil compaction and permeability, groundwater levels, soil contaminants (Brownfield development), space restrictions (in-fill projects, redevelopment projects, high density development, transit-oriented developments), highest and best use of Urban Runoff (to support downstream uses), etc. Any portion of this volume that is not infiltrated, harvested and used, evapotranspired, and/or bio-treated shall be treated and discharged in accordance with the requirements set forth in Section XII.G, below.

3. The Permittees shall incorporate LID site design principles into the revised WQMP to reduce runoff to a level consistent with the MEP standard. The Co-Permittees

---

[49] Vehicles include automobiles; motor vehicles include trucks, trains, boats, motor cycles, farm machineries, airplanes, and recreation vehicles such as snow mobiles, all terrain vehicles, and jet skis.

[50] United States Environmental Protection Agency, Office of Water, EPA 816-R-00-008, September 2000 *State Implementation Guidance - Revisions to the UIC Regulations for Class V Injection Wells and* "Class V Rule" (*Revisions to the Underground Injection Control Regulations for Class V Injection Wells*, 64 FR 68546) *indicate that these activities are prohibited from Class V injection wells.*

[51] A properly engineered and maintained bio-treatment system may be considered only if infiltration, harvesting and use and evapotranspiration cannot be feasibly implemented at a project site (feasibility criteria will be established in the WQMP [Section XII.G.1]. Specific design, operation and maintenance criteria for bio-treatment systems shall be part of the WQMP that will be produced by the Permittees.

shall require that New Development and Significant Redevelopment projects include Site Design BMPs during the development of the project-specific WQMP. The design goal shall be to maintain or replicate the pre-development hydrologic regime through the use of design techniques that create a functionally equivalent post-development hydrologic regime through site preservation techniques and the use of integrated and distributed infiltration, retention, detention, evapotranspiration, filtration and treatment systems. The revised WQMP should continue to consider Site Design BMPs described in Appendix O of the DAMP and LID principles described in the pending Southern California Stormwater Monitoring Coalition/CASQA *LID Guidance Manual for Southern California*.

4. Within 18 months of adoption of this Order, each Permittee shall revise, where feasible its ordinances, codes, building and landscape design standards to promote green infrastructure/LID techniques including, but not limited to, the following:

   a. Landscaping designs that promote longer water retention and evapotranspiration such as 1 foot depth of compost/top soil in commercial and residential areas on top of 1 foot of non-compacted subsoil, concave landscape grading to allow runoff from impervious surfaces, and water conservation by selection of water efficient native plants, weather-based irrigation controllers, etc.

   b. Allow permeable surface designs in low traffic roads and parking lots. This may require land use/building code amendment.

   c. Allow natural drainage systems for street construction and catchments (with no drainage pipes) and allow vegetated ditches and swales where feasible.

   d. Require landscape in parking lots to provide treatment, retention or infiltration.

   e. Reduce curb requirements where adequate drainage, conveyance, treatment and storage are available.

   f. Amend land use/building codes to allow no curbs, curb cuts and/or stop blocks in parking areas and residential streets with low traffic.

   g. Use of green roof, rain garden, and other green infrastructure in urban/suburban area.

   h. Allow rainwater harvesting and use.

   i. Narrow streets provide alternatives to minimum parking requirements, etc. to facilitate LID where acceptable to public safety departments.

j. Consider vegetated landscape for storm water treatment as an integral element of streets, parking lots, playground and buildings.

k. Consider and facilitate application of landform grading techniques[52] and revegetation as an alternative to traditional approaches, particularly in areas susceptible to erosion and sediment loss such as hillside development projects,

l. Other site design BMPs identified in the WQMP not included above.

5. Consistent with the requirements of AB 1881, each Co-Permittee is mandated to update its landscape ordinance. The bill requires the local agencies to adopt the State Model Water Efficient Landscape Ordinance[53] or prepare one that is "at least as effective" as the State Model by January 2010. The proposed state model ordinance applies to landscape requiring a building or landscape permit, plan check or design review. Each Permittee shall provide the Regional Board a copy of its report to Department of Water Resources (DWR).
6. Each Permittee shall implement effective education programs to educate property owners to use Pollution Prevention BMPs and to maintain on-site hydrologically functional landscape controls.
7. To reduce Pollutants in Urban Runoff, address Hydromodification, and manage Urban Runoff as a resource to the MEP, the revised WQMP shall specify preferential use of Site Design BMPs that incorporate LID techniques, where feasible, in the following manner (from highest to the lowest priority):
   a. Preventative measures (these are mostly non-structural measures, e.g., preservation of natural features to a level consistent with the MEP standard; minimization of Urban Runoff through clustering, reducing impervious areas, etc.) and
   b. Mitigation measures (these are structural measures, such as, infiltration, harvesting and use, bio-treatment, etc.).
8. The mitigation or structural Site Design BMPs shall also be prioritized (from highest to lowest priority):
   a. Infiltration BMPs (examples include permeable pavement with infiltration beds, dry wells, infiltration trenches, surface and sub-surface infiltration basins. The Permittees should work with local groundwater management agencies to ensure that infiltration Treatment Control BMPs are designed appropriately;

---

[52] http://www.epa.gov/Region3/mtntop/pdf/appendices/d/aquatic-ecosystem-enhanc-symp/symposiumfinal.pdf

[53] http://www.owue.water.ca.gov/docs/final_reg_text.pdf

b. BMPs that harvest and use (e.g., cisterns and rain barrels); and

c. Vegetated BMPs that promote infiltration and evapotranspiration including bioretention, biofiltration and bio-treatment. Upon the Permittees' determination of LID infeasibility per Section XII.G, design capture volume specified in Section XII.D.4, that is not addressed by onsite or offsite LID *Site Design BMPs* as listed above shall be treated using *Treatment Control BMPs* as described in Section XII.G.

9. Hydrologic Condition of Concern (HCOC):

a. The Permittees shall continue to ensure, consistent with the MEP standard, through their review and approval of project-specific WQMPs that New Development and Significant Redevelopment projects do not pose a HCOC due to increased runoff volumes and velocities.

b. A New Development and Significant Redevelopment project does not cause a HCOC if any one of the following conditions is met:

i) The project disturbs less than one acre and is not part of a common plan of development.

ii) The volume and the time of concentration[54] of storm water runoff for the post-development condition is not significantly different from pre-development condition for a 2-year return frequency storms (a difference of 5% or less is considered insignificant). This may be achieved through Site Design and Treatment Control BMPs.

iii) All downstream conveyance channels to an adequate sump (e.g. Prado Dam, Lake Elsinore, Canyon Lake, Santa Ana River or other lake, reservoir or natural resistant feature) that will receive runoff from the project are engineered and regularly maintained to ensure design flow capacity, and no sensitive stream habitat areas will be affected; or not identified in the Permittees Hydromodification sensitivity maps required in Section XII.B.3, and no sensitive stream habitat areas will be affected.

iv) The Permittees may request a variance from these criteria based on studies conducted by the Southern California SMC, SCCWRP, CASQA, or other regional studies. Requests for consideration of any variances should be submitted to the Executive Officer.

c. If a HCOC exists, the WQMP shall include an evaluation of whether the project will adversely impact downstream erosion, sedimentation or stream habitat. This evaluation should include consideration of pre- and post-development hydrograph volumes, time of concentration and peak discharge velocities for a

[54] Time of concentration is defined as the time after the beginning of rainfall when all portions of the drainage basin are contributing simultaneously to flow at the outlet.

2-year storm event, construction of sediment budgets, and a sediment transport analysis. If the evaluation determines adverse impacts are likely to occur, the project proponent shall implement additional Site Design BMPs, on-site BMPs, Treatment Control BMPs and/or in-stream BMPs[55] to mitigate the impacts. The project proponent should first consider Site Design BMPs and on-site BMPs prior to proposing in-stream BMPs; in-stream BMPs must not adversely impact Beneficial Uses or result in sustained degradation of Receiving Water quality and shall require all necessary regulatory approvals[56]:

d. HCOC are considered mitigated if they meet one of the following conditions:

   i. Require additional onsite or offsite mitigation to address potential erosion or habitat impact using LID BMPs.

   ii. The project is developed consistent with an approved Watershed Action Plan that addresses HCOC for the downstream Receiving Waters.

   iii. Mimicking the pre-development hydrograph with the post-development hydrograph, for a 2-year return frequency storm. Generally, the hydrologic conditions of concern are not significant, if the post-development hydrograph is no more than 10% greater than pre-development hydrograph. In cases where excess volume cannot be infiltrated or captured and reused, discharge from the site must be limited to a flow rate no greater than 110% of the pre-development 2-year peak flow.

e. If site conditions do not permit items i, through iv, above, the alternatives and in-lieu programs discussed under Section XII.G, below, may be considered.

F. ROAD PROJECTS

1. Within 24 months of adoption of this Order, the Co-Permittees shall develop standard design and post-development BMP guidance to be incorporated into projects for streets, roads, highways, and freeway improvements, under the jurisdiction of the Co-Permittees to reduce the discharge of Pollutants from the projects to the MEP. The draft guidance shall be submitted to the Executive Officer for review and approval and shall meet the performance standards for site design/LID BMPs, Source Control and Treatment Control BMPs as well as the

[55] In-stream measures involve modifying the receiving stream channel slope and geometry so that the stream can convey the new flow regime without increasing the potential for erosion and aggradation. In-stream measures are intended to improve long-term channel stability and prevent erosion by reducing the erosive forces imposed on the channel boundary.

[56] In-stream control projects require a Stream Alteration Agreement from the California Department of Fish & Game, a CWA section 404 permit from the U.S. Army Corps of Engineers, and a section 401 certification from the Water Board. Early discussions with these agencies on the acceptability of an in-stream modification are necessary to avoid project delays or redesign.

HCOC criteria. The guidance and BMPs shall address streets, roads or highways under the jurisdiction of the Co-Permittees used for transportation of automobiles, trucks, motorcycles, and other vehicles, and excludes routine road maintenance activities where the surface footprint is not increased. The guidance shall incorporate principles contained in the USEPA guidance, "Managing Wet Weather with Green Infrastructure: Green Streets" to the MEP and at a minimum shall include the following:

a. Guidance specific to new road projects;

b. Guidance specific to projects for existing roads;

c. Size or impervious area criteria that trigger project coverage;

d. Preference for green infrastructure approaches wherever feasible;

e. Criteria for design and BMP feasibility analyses on a project-specific basis.

2. Within six months of approval by the Executive Officer, the Permittees shall implement the standard design and post-development BMP guidance for all road projects. Pending approval of the standard design and post-development BMP guidance, site specific WQMPs for streets road and highway projects shall be required pursuant to Section XII.D.2.

G. ALTERNATIVES AND IN-LIEU PROGRAMS

1. Within 18 months of adoption of this Order, the Permittees shall develop technically-based feasibility criteria for project evaluation to determine the feasibility of implementing LID BMPs which may include factors such as a groundwater protection assessment to determine if infiltration BMPs are appropriate for the site[57]. These criteria shall be submitted to the Executive Officer for approval. Only those projects that have completed a feasibility analysis as per the approved criteria should be considered for alternatives and in-lieu programs. If a particular BMP is not technically feasible, other BMPs should be implemented to achieve the same level of compliance, or if the cost of BMP implementation greatly outweighs the Pollution control benefits, the Co-Permittees may grant a waiver of the BMPs. All waivers, along with waiver justification documentation, must be submitted to the Executive Officer for approval in writing within 30 days prior to Permittee approval.

[57] Such feasibility determinations may be based on regional analyses conducted by the Permittees (see finding G-14) or on site specific conditions. Site specific determinations shall be certified by a Professional Civil Engineer registered in the State of California, and will be documented in the project WQMP, which shall be approved by the Permittee prior to submittal to the Executive Officer. Within 30 days of submittal to the Executive Officer, the Permittee will be notified if the Executive Officer intends to take any action.

If a waiver is granted, the Permittees shall ensure that project proponents participate in one of the in-lieu programs discussed in this section.

2. The Permittees may collectively or individually propose to establish an Urban Runoff fund to be used for urban water quality improvement projects within the same watershed that is funded by contributions from developers granted waivers. The contributions should be at least equivalent to the cost savings for waived projects and the urban runoff funds shall be expended for projects that provide at least an equivalent amount of water quality improvement (there shall be no net impact on water quality due to a waived project). If a waiver is granted and an Urban Runoff fund is established, the Annual Report for the year should include:
   a. Total amount deposited into the funds; and
   b. The party responsible for managing the Urban Runoff fund;
   c. Projects funded or proposed to be funded with monies from the urban runoff fund with details on expected water quality improvement;
   d. Party or parties responsible for designing, construction, operation and maintenance of urban runoff funded projects, and
   e. Current status and a schedule for project completion.

3. The obligation to install Treatment Control BMPs at a New Development or Significant Redevelopment project is met if, for a common plan of development, BMPs are constructed with the requisite capacity to serve the entire common project, even if certain phases of the common project may not have BMP capacity located on that phase in accordance with the requirements specified above. The goal of the WQMP is to develop and implement practicable programs and policies to minimize the effects of urbanization on site hydrology, Urban Runoff flow rates, velocities, duration and time of concentration and Pollutant loads. This goal may be achieved through watershed-based Treatment Control BMPs, in combination with site-specific BMPs. All Treatment Control BMPs should be located as close as possible to the Pollutant sources, should not be located within Waters of the US, and Pollutant removal should be accomplished prior to discharge to Waters of the US. Regional Treatment Control BMPs shall be operational prior to occupation of any of the New Development or Significant Redevelopment project sites tributary to the regional Treatment Control BMP.

4. The Permittees may establish, where feasible and practicable, a water quality credit system for alternatives to infiltration, harvesting and use, evapotranspiration and other LID and Hydromodification requirements specified above. The following types of projects may be included in this credit system:
   a. Redevelopment projects that reduces the overall impervious area
   b. Brownfield redevelopment

c. High density developments (>7 units per acre)
d. Mixed use and transit-oriented development (within ½ mile of transit)
e. Dedication of undeveloped portions of the project site to parks, preservation areas and other pervious uses
f. Regional treatment systems with a capacity to treat flows from all upstream developments
g. Offsite mitigation or dedicated mitigation areas within the same watershed
h. Highly urbanized areas such as city center area
i. Historic Districts and Historic Preservation areas
j. Live-work developments
k. In-fill projects
l. Projects that enhance the transport of coarse sediment to the coast for beach replenishment.

5. The water quality credit system should not result in a net impact on water quality.

6. A summary of waivers of LID (along with a short description of the Section XII.G.2 through XII.G4 In-Lieu program selected), Hydromodification and Treatment Control BMPs along with any water quality credit granted, in-lieu projects, or urban runoff fund contribution required by each Co-Permittee shall be included in the Annual Report.

H. APPROVAL OF WQMP

Within 18 months of adoption of this Order, each Permittee shall develop and implement standard procedures and tools and include in its LIP the following:

1. The Permittees shall utilize a mechanism for review and approval of WQMPs, including a checklist that incorporates the minimum requirements of the model WQMP. The process for review and approval shall be described in the Permittees LIP.
2. The Co-Permittees shall maintain a database to track structural post-construction BMPs (consistent with XII.K.4 below).
3. Continue to ensure that the entity(ies) responsible for BMP maintenance and the mechanism for BMP funding is identified prior to WQMP approval.
4. The Permittees shall train those involved with WQMP reviews in accordance with Section XV, Training Requirements.

I. FIELD VERIFICATION OF BMPS

1. The Co-Permittees' permit close-out procedures shall include field verification that structural Site Design, Source Control and Treatment Control BMPs are designed, constructed and functional in accordance with the approved WQMP.
2. Prior to occupancy, the Co-Permittees shall verify through visual observation that the BMPs are working and functional.
3. The Co-Permittees may accept self-certification or third-party certification of BMPs from State-licensed professional engineers.

J. CHANGE OF OWNERSHIP AND RECORDATION

The Co-Permittees shall establish a mechanism to ensure that appropriate easements and ownerships are properly recorded in public records at the County and/or the city and the information is conveyed to all appropriate parties when there is a change in project or site ownership.

K. OPERATION AND MAINTENANCE OF POST-CONSTRUCTION BMPS

1. The Co-Permittees shall ensure that structural post construction BMPs are designed and implemented with control measures necessary to effectively minimize the creation of Nuisance or Pollution associated with vectors, such as mosquitoes, rodents, flies, etc. The Co-Permittee should work with the local vector agencies to ensure that structural post construction BMPs are designed to minimize the potential for vector breeding during operation and maintenance.
2. The Co-Permittees shall specify conditions of approval and as built inspections ensure that require proper maintenance and operation of any structural post construction BMPs including requirements for vector control.
3. The parties responsible for the maintenance and operation of the structural post construction BMPs, and a funding mechanism for operation and maintenance of structural post construction BMPs for the life of the project shall be identified prior to issuance of occupancy permits. Design of these structures shall allow adequate access for maintenance.
4. Each Co-Permittee shall maintain a database to track the operation and maintenance of the structural post construction BMPs installed after adoption of this Order. The database shall include: type of BMP; watershed where it is located; date of certification; party responsible for maintenance and any problems identified during inspection including any vector or nuisance problems.
5. Within 18 months of adoption of this order and annually thereafter, all Permittee-owned structural post construction BMPs installed after the date of this Order shall be inspected prior to the Rainy Season. The Co-Permittees shall also develop an

inspection frequency for New Development and Significant Redevelopment projects, based on the project type and the type of structural post construction BMPs deployed. Pursuant to XII.K.4, all New Development and Significant Redevelopment, structural post construction BMPs shall be inspected within the five-year Permit Term. The Co-Permittees shall ensure that the BMPs are operating and are maintained properly and all BMPs are working effectively to remove Pollutants in runoff from the site. If vector problems are identified, the Co-Permittees should work with the vector control agencies to remedy vector control problems. All inspections shall be documented and kept as Permittee record. The Co-Permittees may accept inspection reports conducted and certified by state licensed professional engineers in lieu of Co-Permittee inspections.

6. The Annual Report shall include a list of all structural post construction BMPs approved contained in the database required in XII.K.4 above.

L. PRE-APPROVED PROJECTS

The above provisions for LID and HCOC are not applicable to projects that have an approved WQMP as of the date of approval of the revised WQMP. The above provisions shall be implemented in a manner consistent with the MEP standard for all other projects 45 days from the date of approval of the revised WQMP. The Regional Board recognizes that full implementation may not be feasible for certain projects which have received tentative tract or parcel map or other discretionary approvals.

XIII. PUBLIC EDUCATION AND OUTREACH

A. The Permittees shall continue to implement the public education efforts already underway and shall continue to promote the most effective elements of the comprehensive public and business education strategy contained in the ROWD and Section 10 of the DAMP. As part of the Annual Report, the Permittees shall review their public education and outreach efforts and revise their activities to adapt to the needs identified in the annual reassessment of program priorities with particular emphasis on addressing the Pollutants of Concern. Results of this review shall direct the focus of its public education effort and cause recommendations for any changes to the public and business education program including: (1) how to make the multimedia efforts more effective; (2) a reevaluation of audiences and key messages for targeted behaviors; and (3) opportunities for participation in regional and statewide public education efforts. The goal of the public and business education program shall be to target 100% of the residents, including businesses, commercial and industrial establishments.
B. A status report on the requirements of this section and any changes to the on-going public education program shall be described in the Annual Report.

C. The Permittees shall implement an assessment program to measurably increase public knowledge of its communities regarding MS4 and impacts of Urban Runoff on Receiving Waters. The Permittees shall implement programs that can measure the change in behavior of its target communities to reduce Pollutant releases to the MS4 and the environment. A description of the program tasks, schedule and measurable goals shall be included in the first Annual Report due after adoption of this Order.

D. When feasible, the Permittees shall participate in joint outreach programs with other agencies including, but not limited to, the Santa Ana Watershed Project Authority, Caltrans, and other county and municipal storm water programs to ensure that a consistent message on storm water pollution prevention is disseminated to the public.

E. The Permittees shall continue to ensure that appropriate outreach materials are available for construction, industrial and commercial inspection programs. Outreach materials should be provided to Permittee inspectors for distribution to inspected facilities.

F. Within 18 months from the date of adoption of this Order, the Permittees shall ensure that they have developed, maintained and distributed BMP guidance for the control of those potentially polluting activities identified during the term of the 2002 MS4 Permit, which are not otherwise regulated by any agency, including guidelines for the household use of fertilizers, pesticides, herbicides and other chemicals, and guidance for mobile vehicle maintenance, carpet cleaners, commercial landscape maintenance, and pavement cutting. These guidance documents shall be distributed to the public, trade associations, etc., through participation in community events, trade association meetings and/or by mail.

G. The Permittees shall ensure that appropriate educational materials, including the BMP brochures, are provided to all new industrial and commercial enterprises within their jurisdiction at the time appropriate permits (e.g. business licenses or occupancy permits) are issued.

H. The Permittees shall continue to maintain, and if necessary enhance, public education materials to encourage the public to report: Illegal Dumping and unauthorized, non-storm water discharges from residential, industrial, construction and commercial sites into public streets, storm drains and to surface waterbodies and their tributaries; clogged storm drains; and faded stencils or missing catch basin markers. The Principal Permittee's hotline and web site shall provide guidance regarding where to locate information regarding general Urban Runoff pollution control measures. The hotline and website information shall be included in outreach materials and shall be listed in the governmental pages of prominent regional phone books and on the Co-Permittees' website.

I. The Permittees shall maintain a Public Education Committee to provide oversight and guidance for the implementation of the public education program. The Permittees shall

continue to participate in the Public Education Committee to review and update existing guidance for the implementation of the public education program. One of the functions of the Public Education Committee shall be to review outreach materials for construction, industrial and commercial inspection programs and residential outreach to ensure they appropriately address common violations observed during inspections. Once deficiencies are identified, alternative text to address the deficiency shall be developed within 6 months and reported in the Annual Report. The Public Education Committee shall meet at least twice per year.

J. The Permittees shall continue to sponsor or staff a table or booth at community, regional, and/or countywide events to distribute public education materials related to Urban Runoff pollution prevention to the public. Each Permittee shall participate in at least one event per year.

K. Successful implementation of the provisions and limitations in this Order will require the cooperation of all the public agency organizations within Riverside County having programs/activities that have an impact on Urban Runoff quality. This may include, but not be limited to, those listed in Appendix 2. As such, the Permittees should coordinate their efforts with those organizations where feasible and appropriate to ensure participation in implementing the requirements of this Order. The Permittees should notify the Regional Board where assistance is needed improving local cooperation.

L. Within 18 months of adoption of this Order, each Permittee shall develop BMP Fact Sheets for mobile businesses for distribution consistent with the requirements of Section XI.D.6. At a minimum, the mobile business Fact Sheets/training program should include: laws and regulations dealing with Urban Runoff and discharges to MS4; appropriate BMPs and proper procedures for disposing of Wastes generated from each mobile business category.

M. The Principal Permittee shall continue to develop and distribute BMP guidance for Permittee and contract field operations and maintenance staff to provide guidance in appropriate Pollution Prevention measures, how to respond to spills and reports of Illegal Discharges, etc.

XIV. PERMITTEE FACILITIES AND ACTIVITIES

A. Each Permittee shall continue to implement measures to ensure that their facilities and activities do not cause or contribute to a Pollution or Nuisance in Receiving Waters, as defined in Section 13050 of the Water Code. The Permittees must annually review their activities and facilities to determine the need for revisions to Section 5 of the DAMP and to their LIP. The Annual Report shall include the findings of this review and a schedule for any needed revisions. The Permittees should continue to use Facility Pollution Prevention Plans as noted in Chapter 5 of the DAMP to ensure that the Permittee facilities are not sources of Pollutants to the Waters of the US to the MEP.

B. Within 12 months of adoption of this Order, each Permittee shall review its inventory of fixed facilities listed in the DAMP, its field operations and MS4 facilities to ensure that Permittee facilities and activities are addressed by Facility Pollution Prevention Plans consistent with Chapter 5 of the DAMP and do not cause or contribute to a Pollution or Nuisance in Receiving Waters. Existing Facility Pollution Prevention Plans shall be reviewed to insure proper BMPs for these facilities. For Permittee facilities and/or activities tributary to CWA Section 303(d) Impaired Water Bodies that generate Pollutants for which the water body is Impaired, additional Pollutant-specific Source Control BMPs to target that Pollutant shall be identified and implemented in the Facility Pollution Prevention Plan to the MEP.

C. Each Permittee shall conduct inspections of its fixed facilities and field operations identified in Chapter 5 of the DAMP annually to ensure that they do not contribute Pollutants to Receiving Waters. The Permittees shall record the findings in the inspection forms developed by the Permittees. Each Permittee shall implement BMPs to manage the application, storage, and disposal of pesticides, herbicides, and fertilizers associated with their facilities and activities. At a minimum, the Facility Pollution Prevention Plans for these facilities and activities shall:

1. Ensure that Permittee applicators (including contractors) and distributors have appropriate training, permits, and certifications;
2. Utilize integrated pest management measures that rely on non-chemical solutions, to the extent practicable;
3. Promote the use of native vegetation into facility landscaping;
4. Include schedules for irrigation and chemical application to the extent feasible; and
5. Collect and properly dispose of unused pesticides, herbicides, and fertilizers.
6. The following BMP fact sheets are identified as minimum BMPs::
   i. SC-35/SC-61, Safer Alternative Products
   ii. SC-41, Building & Grounds Maintenance
   iii. SC-60, Housekeeping Practices
   iv. SC-73, Landscape Maintenance

D. Each Permittee shall review, update, and implement the individual clean out schedules and frequency for its MS4, including open channels, catch basins, retention/detention facilities and wetlands created for Urban Runoff treatment during the Wet and Dry Season to protect Receiving Water quality consistent with the MEP standard. The inspection and cleaning frequency for all portions of the specified MS4 shall be included in each Permittee's LIP and shall be evaluated annually to determine the need for adjusting the inspection and cleaning frequency. Each Permittee must clean those MS4 facilities where there is evidence of Illegal Discharge. In addition, each Permittee must clean those retention/detention basins and MS4 where the inspection reveals that the storage

volume is about 25% full or if accumulated sediment or debris impairs the hydraulic capacity of the facility.

E. Unless otherwise supported by field information, each Permittee shall at a minimum inspect, clean, and maintain at least 80% of its open channels, catch basins, retention/detention basins, and wetlands created for Urban Runoff treatment on an annual basis, with 100% of the facilities in a two year period. The MS4 clean out schedule shall continue to be included in the Annual Report.

F. Each Permittee shall examine opportunities to retrofit existing MS4 facilities with water quality protection measures, where feasible.

G. PERMITTEE COMPLIANCE WITH GENERAL PERMITS

1. GENERAL CONSTRUCTION PERMIT

a. All Permittee Construction Sites shall be in compliance with the latest adopted version of the General Construction Permit.

b. This Order authorizes the discharge of storm water runoff from Permittee Construction Sites that may result in land disturbance consistent with the acreage criteria of the General Construction Permit.

c. Prior to commencement of construction activities, the Permittees shall notify the Executive Officer of the proposed Construction Site by submitting a NOI, or Permit Registration Documents (PRDs) as provided in Attachment 5, and a location map depicting the Construction Site location. The filing fees for these NOIs/PRDs are waived for the Permittees.

d. Upon completion of the construction project, the Executive Officer shall be notified of the completion of the project by submitting (1) A Notice of Termination (NOT), provided in Attachment 5. (2) Photographs of the completed project; (3) A site map (depicting the project location and the locations of structural post-construction BMPs, including the latitude and longitude if appropriate); and (4) copies of the final field verification reports required under Section XII.I.

e. The Permittees shall develop, approve, and implement a WQMP for Permittee projects that meet the requirements of Section XII.D. of this Order.

f. The Permittees shall develop and implement a SWPPP and the monitoring and reporting program for their construction projects that meet the requirements of the latest version of the General Construction Permit. The Permittee must review and approve SWPPPs prepared by their contractors.

g. The Permittees shall give advance notice to the Executive Officer of planned changes in the construction activity, which may result in non-compliance with the latest version of the General Construction Permit.

h. Emergency Permittee projects required to protect public health and safety are exempted from compliance with the requirements of this subsection until the emergency ends, at which time they need to comply with the requirements of this section.

2. GENERAL DE-MINIMUS PERMIT DISCHARGES

a. The Permittees are authorized to discharge de-minimus types of discharges listed under the latest adopted version of the Regional Board's General De Minimus Discharge Permit, currently Order No. R8-2009-0003. The de-minimus discharges from Permittee owned and/or operated facilities and/or activities shall be in compliance with Order No. R8-2009-0003 except that the Permittees need not pay the filing fee.

b. The Permittees shall notify the Executive Officer of the proposed discharge at least 15 days prior to start of the discharge, by submitting a NOI and supporting documents, as provided in Attachment 7.

c. For existing Permittee Dischargers (authorized to discharge under Order No. R8-2009-003 prior to the adoption date of this Order), discharges will continue to be regulated under the terms and conditions of Order No. R8-2003-0003 until a new discharge authorization is issued, provided that the Discharger submits, by June 10, 2010, an updated NOI, a copy of the current Monitoring & Reporting Program previously issued to the Discharger, and proposed treatment modifications (if any). If no application for continued discharges are submitted by that date, the Discharger shall do one of the following:

   i. Cease discharge and submit a letter informing the Regional Board that coverage under Order R8-2009-003 is no longer needed; or

   ii. Apply for new discharge authorization as a new de-minimus discharge, under this Order.

XV. TRAINING PROGRAM FOR STORM WATER MANAGERS, PLANNERS, INSPECTORS AND MUNICIPAL CONTRACTORS

A. Within 24 months of adoption of this Order, the DAMP and each Permittee's LIP shall be updated to include a program to provide formal and where necessary, informal training to Permittee staff that implement the provisions of this Order. Formal training must be implemented as described herein and may consist of regional training provided by the Permittees or individual Co-Permittee training provided in-lieu of Principal Permittee training. Informal training (i.e. tailgate training) shall be implemented by each Permittee on an as-needed basis to supplement the formal

training. Each Permittee shall maintain a written and/or electronic record of stormwater training provided to its storm water and related program staff.

B. The training programs should be coordinated with the local Vector Control District to ensure that vector control issues related to post-construction BMPs maintenance and operation are incorporated into the training curriculum.

C. **Formal Training**: The formal training programs shall educate Permittee employees responsible for implementing requirements of this Order, by providing training on the following Permittee activities: construction site inspection, WQMP review, residential/industrial/commercial site inspection, and Permittee facility maintenance. Formal training may be conducted in classrooms or using videos, DVDs or other multimedia. The program shall consider all applicable Permittee staff such as storm water program managers, construction/industrial/ commercial/residential inspectors, planners, engineers, public works crew, etc. and shall: define the required knowledge and competencies for each Permittee compliance activity, outline the curriculum, include testing or other procedures to determine that the trainees have acquired the requisite knowledge to carry out their duties, and provide proof of completion of training such as Certificate of Completion, and/or attendance sheets. The formal training curriculum shall:

1. Highlight the potential effects that Permittee or Public activities related to their job duties can have on water quality.
2. Overview the principal applicable water quality laws and regulations that are the basis for the requirements in the DAMP.
3. Discuss the provisions of the DAMP that relate to the duties of the target audience, including but not limited to:
    a. The requirements of the DAMP regarding Storm Water Ordinances, resolutions, codes, and standards that relate to the duties of the target audience, including enforcement thereof;
    b. Overview of CEQA requirements contained in Section XII.C of this Order.
    c. Implementation and assessment of SWPPPs and Facility Pollution Prevention Plans relative to the duties of the target audience;
    d. Selection, implementation and maintenance of appropriate BMPs relative to the duties of the target audience;
    e. Tools, checklists and procedures included in the DAMP to assist in implementing the requirements of this Order relative to the duties of the target audience.

D. **Informal Training:** The informal training shall ensure that staff have the requisite knowledge to implement the applicable provisions in the Permittee's LIP, such as (but not limited to):

1. The requirements of local Storm Water Ordinances, resolutions, codes, and standards that relate to the duties of the target audience;
2. Local tools, checklists and/or procedures to implement the requirements of this Order relative to the duties of the target audience.
3. The proper use and maintenance of erosion and sediment controls;
4. Vector control issues related to storm water pollution control BMPs.

E. **Reporting**: Formal training shall be summarized and documented in the Annual Reports.

F. **Schedule**: At a minimum, the training schedule should include the following:

1. New Permittee employees responsible for implementing requirements of this Order must receive informal training within six months of hire and formal training within one year of hire.
2. Permittee facility maintenance staff must receive formal training at least once every two years.
3. Permittee inspection and code enforcement (if applicable) employees must receive formal or informal refresher training focused on appropriate BMP implementation at least once a year prior to the rainy season.
4. Other existing Permittee employees responsible for implementing the requirements of this Order must receive formal training at least once during the term of this Order.
5. The start date for training programs described in this Section shall be included in the schedule required in Section III.A.1.q, but shall be no later than six months after Executive Officer approval of DAMP updates applicable to the Permittee activities described in Section XIV.

G. The Permittees shall require verification of BMP training from contract staff where applicable.

H. The Permittee(s) shall include designated Regional Board staff on training notification e-mails announcing upcoming formal training sessions.

XVI. NOTIFICATION REQUIREMENTS

A. Within 24 hours of discovery, the Permittees shall provide oral or email notification to Regional Board staff of events within its jurisdiction that are determined to be an Emergency Situation. Following oral notification, a written report must be submitted within 10 days of receipt of notice of the Emergency Situation, detailing the nature of the non-compliance, any corrective action taken by the site/facility owner, other relevant information (e.g., past history of the Emergency Situation, environmental damage resulting from the Emergency Situation, site/facility owner responsiveness) and the type of enforcement, consistent with Section 4 of the DAMP, that will be carried out by the Co-Permittee. Further, incidences of noncompliance shall be

recorded along with the information noted in the written report and the final outcome/enforcement for the incident in the databases for Construction Sites, and Industrial or Commercial Facility inspections, as appropriate.

B. Notification requirements for non-Emergency Situations that are discovered during the course of Construction Site and Industrial Facility inspections that may be a violation of the General Stormwater Permits are addressed in Sections XI.A.7 of this Order.

C. Sewage spill notification shall be consistent with the timelines specified in the Statewide General Waste Discharge Requirements for Sanitary Sewer Systems, Water Quality Order No. 2006-0003-DWQ.

D. All reportable quantities of Hazardous Waste spills as per 40CFR 117 and 302 shall be reported within 24 hours. All spill incidents shall be also included in the Annual Report. These requirements are consistent with the Notification requirements for IC/IDs that are addressed in Section IX.B of this Order.

E. Enforcement requirements for Construction Sites and Industrial Facilities operating without an applicable General Stormwater Permit are specified in Section XI.A.7. These Sites and Facilities shall be reported within 14 calendar days to Regional Board staff by electronic mail or other written means. Permittees' notifications of facilities' failure to obtain required coverage under the General Construction Permit, or General Industrial Permit, including requirements to file PRDs. A PRD, NOI, No Exposure Certification, Notice of Non-applicability, and/or 401 Certification must include, at a minimum, the following documentation:

1. Name of the Site or Facility
2. Operator of the Site or Facility
3. Owner of the Site or Facility
4. Construction or Commercial/Industrial activity being conducted at the Site or Facility that is subject to the General Construction Permit, General Industrial Permit or 401 Certification
5. Records of communication with the facility operator regarding the violation, which must include at least an inspection report.

F. The Permittees shall report to the Executive Officer:

1. Any enforcement actions and known discharges of Urban Runoff to MS4 facilities, known to the Permittees, which may have an impact on human health or the environment consistent with Sections XI.A and XI.B above; if the discharge is to Canyon Lake or any tributary to Canyon Lake, Elsinore Valley Municipal Water District shall also be notified immediately; and
2. Any suspected or reported activities on federal, state, or other entity's land or facilities, where the Permittees do not have any jurisdiction, and where the suspected or reported activities may be contributing Pollutants to Waters of the US

XVII. PROGRAM MANAGEMENT ASSESSMENT/DAMP REVIEW

A. By November 30 of each year, the Permittees shall evaluate the effectiveness of the Urban Runoff management program described in the DAMP to determine the need for any revisions in order to reduce Pollutants in MS4 discharges consistent with the MEP standard consistent with the reporting requirements in Appendix 3, Section IV.B. In addition, the first Annual Report (November 2010) after adoption of this Order shall include the following:

1. Review of the formal training needs of Permittee employees.
2. Review of coordination meeting/training for the designated NPDES inspectors.
3. Proposal for assessment of Urban Runoff management program effectiveness on an area wide as well as jurisdiction-specific basis. Permittees shall utilize the CASQA Guidance[58] for developing these assessment measures at the six outcome levels. The assessment measures must target both water quality outcomes and the results of municipal enforcement activities consistent with the requirements of Appendix 3, Section IV.B.

B. The Annual Report shall include the findings of this review and a schedule to address necessary revisions, or a copy of the amended DAMP with the proposed changes. Replacement pages are acceptable if modifications are not extensive. Annual Reports shall also be submitted in electronic format.

C. Upon the effective date of this Order, the Permittees shall implement the 2007 DAMP and modify it to be consistent with the requirements of this Order and the schedules contained herein.

D. Each Permittee shall designate at least one representative to the Management Steering Committee and Technical Committee. The Principal Permittee shall be notified immediately, in writing, of changes to the designated representative to either Committee. The designated representative for each Committee shall attend that Committee's meeting as follows: at least one (1) out of two (2) Management Steering Committee meetings and eight (8) out of ten (10) Technical Committee meetings per year to discuss issues related to permit implementation and regional and statewide issues.

E. The Permittees shall continue to implement all elements of the approved DAMP. Program elements revised in compliance with the requirements of this Order must be implemented in conformance with the schedules specified in this Order following approval of the Executive Officer.

[58] CASQA, May 2007. Municipal Storm Water Program Effectiveness Assessment Guidance.

XVIII. FISCAL RESOURCES

A. Each Permittee shall exercise its full authority to secure the resources necessary to meet the requirements of this Order. This Order may be revised to adjust time schedules to accommodate prioritization of available resources.

B. The Permittees shall prepare and submit a financial summary to the Executive Officer. The financial summary shall be submitted with the Annual Report each year and shall, at a minimum, include the following:

1. Each Permittee's MS4 Permit compliance expenditures for the previous fiscal year;
2. Fiscal developments that may impact availability of funding for MS4 Permit compliance program implementation and to achieve the required implementation schedule;
3. Each Permittee's MS4 Permit compliance program budget for the current fiscal year;
4. A description of the source of funds to implement the MS4 Permit compliance program, and;
5. Each Permittee's estimated budget to implement the MS4 Permit compliance program for the next fiscal year.

XIX. MONITORING AND REPORTING PROGRAM

The Permittees must comply with Monitoring and Reporting Program No. R8-2010-0033, Appendix 3, and any revisions thereto, which are hereby made a part of this Order. The Executive Officer is hereby authorized to revise the Monitoring and Reporting Program in a manner consistent with this Order to allow the Permittees to participate in regional, statewide, national or other monitoring and reporting programs in lieu of or in addition to Monitoring and Reporting Program No. R8-2010-0033. In addition, dates for completion and implementation of certain program elements and reporting requirements are outlined in the Monitoring and Reporting Program.

XX. PROVISIONS

A. All reports submitted by the Permittees as per the requirements in this Order for the approval of the Executive Officer shall be publicly noticed and made available on the Regional Board's website, or through other means, for public review and comments. The Executive Officer shall consider all comments received prior to approval of the reports. Any unresolved significant issues shall be scheduled for a public hearing at a Regional Board meeting prior to approval by the Executive Officer.

B. Permittees shall demonstrate compliance with all the requirements in this Order and shall implement the DAMP and any modifications, revisions, or amendments thereto, which are developed pursuant to this Order or determined by the Permittees to be necessary to

meet the requirements of this Order. The DAMP, including any approved amendments thereto is hereby made an enforceable component of this Order.

C. The Permittees shall implement all elements of the DAMP and its components. Where the dates in the DAMP are different from the corresponding dates in this Order, the dates in this Order shall prevail. Any proposed revisions to the DAMP shall be submitted with the Annual Report for review and approval by the Executive Officer. All approved revisions to the DAMP shall be implemented as per the time schedules approved by the Executive Officer. In addition to those specific controls and actions required by: (1) the terms of this Order and (2) the DAMP and its components, each Permittee shall implement additional controls, if any are necessary, to reduce the discharge of Pollutants in Urban Runoff consistent with the MEP standard.

D. Certain BMPs implemented or required by the Permittees for Urban Runoff management may create habitat for vectors (e.g., mosquitoes and rodents) if not properly designed and maintained. Close collaboration and cooperative effort between the Permittees and local vector control agencies and the State Department of Health Services are necessary to minimize potential vector habitat and public health impacts resulting from vector breeding. Nothing in this Order is intended to prohibit inspection or abatement of vectors by the State or local vector control agencies in accordance with the respective Health and Safety Code.

E. Upon approval by the Executive Officer all plans, reports and subsequent amendments required by this Order shall be implemented and shall become an enforceable part of this Order. Prior to approval by the Executive Officer, these plans, reports and amendments shall not be considered as an enforceable part of this Order.

F. The MS4 permit application and special NPDES program requirements are contained in 40 CFR 122.21 (a), (b), (d)(2), (f), (p); 122.41 (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l); and 122.42 (c), and are incorporated into this Order by reference.

G. The Permittees must comply with all terms, requirements, and conditions of this Order. Any violation of this Order constitutes a violation of the CWA, its regulations and the California Water Code, and is grounds for enforcement action, Order termination, Order revocation and re-issuance, denial of an application for re-issuance, Order revisions, or a combination thereof.

H. Permittees must continue to take reasonable steps to minimize or prevent any discharge to the MS4 that has a reasonable likelihood of adversely affecting human health or the environment.

I. Regional Board staff, USEPA, and other authorized representatives must be allowed to:

1. Inspect Permittee records associated with compliance of this Order.

2. Access and copy records that are kept under the conditions of this Order.

3. Photograph and inspect any facilities or equipment (including monitoring and control equipment) that are related to or may impact storm water discharge or authorized Non-storm Water discharge.

4. Conduct sampling, and monitoring activities for the purpose of assuring compliance with this Order, or as otherwise authorized by the CWA and/or the Water Code.

5. Review the Permittee's programs and request the Regional Board to authorize modification to Permittee programs to comply with the requirements of this Order.

6. Request copies of data, monitoring reports, and sampling data and copies of the Permittee's conclusions and evaluations of the data.

J. This Order does not convey any property rights or any exclusive privileges.

K. The issuance of this Order does not authorize any injury to persons or property or invasion of other private rights, or any infringement of State or local law or regulations.

L. When Permittees become aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Regional Water Board, State Board, or USEPA, the Permitttees must promptly submit such facts or information.

M. All applications, reports, or information submitted to the Regional Board, State Board, and/or USEPA are to be signed and certified by either:

1. A principal executive officer or ranking elected official. For purposes of this provision, a principal executive officer of a federal agency includes: (i) the chief executive officer of the agency, or (ii) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., Regional Administrators of USEPA)

2. A duly authorized representative of the person in 1, above. A person is a duly authorized representative only if the authorization is made in writing by a person described above;

3. The authorization specified either an individual or a position having responsibility for the overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, position of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company (A duly authorized representative may thus be either a named individual or any individual occupying a named position.); and

4. The written authorization is submitted to the Executive Officer.

5. If an authorization described above is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization must be submitted to the Executive Officer prior to or together with any reports, information, or applications, to be signed by an authorized representative.

6. Any person signing a document described above must make the following certification:

   "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations".

XXI. PERMIT MODIFICATION

A. Following appropriate public notice, and in accordance with 40 CFR 122.41(f), this Order may be modified, revoked or reissued prior to its expiration date for the following reasons:
   1. To address significant changes in conditions identified in the technical reports required by the Regional Board which were unknown at the time of the issuance of this Order;
   2. To incorporate applicable requirements of statewide water quality control plans adopted by the State Water Resources Control Board or any amendments to the Basin Plan (including TMDLS) approved by the Regional Board, the State Board and, if necessary, by the Office of Administrative Law and the USEPA;
   3. To comply with any applicable requirements, guidelines, or regulations issued or approved under the Clean Water Act, if the requirements, guidelines, or regulations contain different conditions or additional requirements than those included in this Order; or,
   4. To incorporate new or revised program elements and compliance schedule(s) necessary to comply with this Order;

B. The filing of a request by the Permittees for modification, revocation and re-issuance, or termination or a notification of planned changes or anticipated noncompliance does not stay any conditions of this Order.

C. Pursuant to Section 13228 of the Water Code, the Regional Board may exercise its option for allowing the portion of the City of Murrieta located within the Santa Ana Region to be regulated by the San Diego Regional Water Quality Control Board under its Riverside County MS4 Permit. Similarly, if the San Diego Regional Water Quality Control Board authorizes this Regional Board to exercise authority over the City of Menifee within the

portions of the City regulated by the San Diego Regional Water Quality Control Board, this Regional Board will exercise its authority under this Order in those Regions.

XXII. PERMIT EXPIRATION AND RENEWAL

A. This Order expires on January 29, 2015, and the Permittees must file a ROWD no later than 180 days in advance of such expiration date as application for issuance of new waste discharge requirements. The ROWD shall, at a minimum, include the following:

1. Names and mailing address(es) of the primary administrative and technical contacts for the Permittees that operate the MS4;
2. Any revisions to the DAMP including, but not limited to, all the activities the Permittees propose to undertake during the next permit term, goals and objectives of such activities, an evaluation of the need for additional source control and/or structural BMPs, any proposed pilot studies, etc.;
3. Changes in land use and/or population including map updates;
4. Any significant changes to the MS4 including map updates of the MS4; and
5. An assessment of the overall Urban Runoff management program and its effectiveness in meeting Water Quality Standards. If Water Quality Standards are not being met, the ROWD shall include new or revised program elements and compliance schedule(s) necessary to comply with Section VI of this Order.

B. The ROWD, Annual Reports and other information submitted under this Order shall be signed by either a principal executive officer or a ranking elected official (40 CFR 122.22(a)(3)) or a duly authorized representative as per 40 CFR 122.22(b).

C. This Order shall serve as an NPDES Permit pursuant to Section 402(p) of the Clean Water Act, or amendments thereto, and shall become effective ten days after the date of its adoption provided the Regional Administrator of the USEPA has no objections. If the Regional Administrator objects to its issuance, the Permit shall not become effective until such objection is withdrawn.

D. The Regional Board is authorized to enforce the terms of this permit under several provisions of the CWC, including, but not limited to, sections 13385, 13386, and 13387.

E. Order No. R8-2002-0011 is hereby rescinded.

I, Gerard J. Thibeault, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Santa Ana Region, on January 29, 2010**.**

MONITORING AND REPORTING PROGRAM

ORDER NO. R8-2010-0033

State of California
California Regional Water Quality Control Board
Santa Ana Region

Monitoring and Reporting Program No. R8-2010-0033
NPDES No. CAS618033

for
Riverside County Flood Control and Water Conservation District,
The County of Riverside and the Cities of Riverside County
Within the Santa Ana Region
AREA-WIDE URBAN STORM WATER RUNOFF MANAGEMENT PROGRAM

I. OBJECTIVES

The overall goal of the Urban Runoff monitoring program is to support the development of an effective Urban Runoff management program. The following are the major objectives:

A. To identify those Receiving Waters, which, without additional action to control pollution from urban storm water runoff, cannot reasonably be expected to achieve or maintain applicable Water Quality Standards required to sustain the designated beneficial uses, the goals, and the objectives of the Basin Plan.

B. To develop and support an effective Urban Runoff management program.

C. To identify significant water quality problems, related to discharges of Urban Runoff within the Permit Area.

D. To determine water quality status, trends, and Pollutants of concern associated with Urban Runoff and their impact on the Beneficial Uses of the Receiving Waters.

E. To analyze and interpret the collected data to determine the impact of Urban Runoff and/or validate relevant water quality models.

F. To characterize Pollutants associated with Urban Runoff, and to assess the influence of urban land uses on Receiving Water quality and associated Beneficial Uses.

G. To identify other sources of Pollutants in Urban Run off to the maximum extent possible (e.g., including, but not limited to, atmospheric deposition, contaminated sediments, other non-point sources, etc.)

H. To identify and permit or prohibit Illicit Connections.

I. To identify, verify and prohibit Illegal Discharges.

J. To verify and to identify sources of Pollutants in Urban Runoff.

K. To evaluate the effectiveness of the DAMP and WQMPs, including an estimate of Pollutant reductions achieved by the Site Design (Low Impact Development [LID], Treatment Control and Source Control BMPs implemented by the Permittees.

L. To evaluate the effectiveness of proposed Urban Runoff management programs to protect Receiving Water quality.

II. GENERAL MONITORING PROVISIONS

A. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity [40 CFR 122.41(j)].

1. This includes any unusual discharge or discharge condition, including bypasses, upsets, and maintenance-related conditions affecting effluent quality in the case of storm channels and flow quality in the case of streams and lakes

2. All sample collection, handling, storage, and analysis shall be in accordance with test procedures under 40 CFR Part 136 (latest edition) "*Guidelines Establishing Test Procedures for the Analysis of Pollutants*," promulgated by the USEPA, the guidance being developed by the State Board pursuant to Water Code Section 13383.5, or other methods which are more sensitive than those specified in 40 CFR 136 and approved by the Executive Officer.

3. For priority Toxic Pollutants that are identified in the California Toxics Rule (CTR) (65 Fed. Reg. 31682), the Minimum Levels (MLs) published in Appendix 4 of the Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California (SIP) shall be used for all analyses, unless otherwise specified.

4. For priority Toxic Pollutants, if the Permittee can demonstrate that a particular ML is not attainable, in accordance with procedures set forth in 40 CFR 136, the lowest quantifiable concentration of the lowest calibration standard analyzed by a specific analytical procedure (assuming that all the method specified sample weights, volumes, and processing steps have been followed) may be used instead of the ML listed in Appendix 4 of the SIP. The Principal Permittee must submit documentation from the laboratory to the Regional Board Executive Officer for approval prior to raising the ML for any constituent.

B. All chemical, bacteriological, and Toxicity analyses shall be conducted at a laboratory certified for such analyses by an appropriate governmental regulatory agency.

C. Analytical methods, target reporting limits and data reporting formats shall be compatible with California's Surface Water Ambient Monitoring Program (SWAMP) Quality Assurance Management Plan and with SWAMP's Procedures for Conducting Routine Field Measurement unless otherwise specified in this Monitoring and Reporting Program (MRP).

D. Revisions of this MRP are appropriate to ensure that the Permittees are in compliance with requirements and provisions contained in this Order. Revisions may be made under the direction of the Executive Officer at any time during the term of the Order, and may include redistribution of monitoring resources to address TMDL needs, a reduction or increase in the number of parameters to be monitored, the frequency of monitoring, or the number and size of samples collected.

E. The Executive Officer is authorized to allow the Permittees to participate in regional, statewide, national, or other monitoring programs in addition to or as part of this Urban Runoff monitoring program. Also, the Permittees are authorized to complement their Urban Runoff monitoring data with data from other monitoring sources, provided the monitoring conditions and sources are similar to those in the Santa Ana River watershed.

F. The CWA provides that any person who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this Order shall, upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than two years, or both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment is a fine of not more than $20,000 per day of violation, or by imprisonment of not more than four years, or both [40 CFR 122.41(j)(5)].

III. MONITORING PROGRAM

A. The Principal Permittee has been monitoring Urban Runoff and Receiving Waters since the first MS4 permit term. The Principal Permittee currently implements the Consolidated Monitoring Program (CMP) and participates in a number of other storm water or TMDL related monitoring programs such as: TMDL Bacterial and Nutrient Monitoring, WLA Compliance, BMP Effectiveness, Urban Source and Trend Evaluation, Receiving Water Quality, Hydromodification and Bioassessment. The Principal Permittee shall continue to implement the CMP and continue to participate in other related monitoring programs.

B. The Principal Permittee, on behalf of the Co-Permittees, participates (through a memorandum of understanding and cooperative agreements) with the 16 member agencies of the Storm Water Monitoring Coalition (SMC). The Permittees shall continue to cooperate with other MS4 permittees (including

Orange County and San Bernardino County), Southern California Coastal Water Research Project (SCCWRP), POTW operators, the dairy industry, the Santa Ana Watershed Project Authority (SAWPA), and other public and private organizations in the watershed to develop coordinated surface water quality monitoring programs, databases, and special studies as appropriate. The Regional Board supports continued coordination with SCCWRP and the SMC to facilitate and implement coordinated watershed based monitoring programs. The Permittees may use coordinated monitoring efforts such as the Middle Santa Ana River (MSAR) and Lake Elsinore/Canyon Lake (LE/CL) TMDL Task Forces, SCCWRP and SMC regional monitoring programs to address partially, or in full, the requirements of this MRP. A proposed coordinated monitoring program shall result in the development and implementation of a monitoring plan that:

1. Fully addresses the requirements of this MRP;

2. Describes how the external monitoring programs address the requirements of the MRP;

3. Include a quality assurance plan, including data management, validation, verification mechanism for the portions of the monitoring directly conducted by the Permittees;

4. Reference the locations of the quality assurance plans for regional components; and

5. Result in a coordinated Annual Report summarizing the pertinent Urban Runoff data from the coordinated programs necessary to address this MRP.

C. Within 12 months of adoption of this Order, the Permittees shall review the CMP, Regional and TMDL related monitoring programs that they conduct or participate to determine their effectiveness in achieving the Urban Runoff assessment requirements contained in Section IV.B, below. If this review indicates any data gaps, the Principal Permittee shall submit a revised CMP, or coordinate revisions to other regional programs for approval of the Executive Officer to ensure that the combined efforts adequately address the requirements of Section IV.B. The revised CMP, including a description of how other regional efforts combine with the CMP to address requirements of Section IV.B shall be submitted within 16 months of adoption of this Order and shall be implemented within six months of its approval by the Executive Officer. Pending approval of the revised CMP, current monitoring efforts will continue to be implemented.

D. <u>TMDL/303(d) Listed Waterbody Monitoring</u>: The Permittees identified as dischargers in adopted TMDLs shall continue to participate in TMDL monitoring programs as required by TMDL Implementation Plans. The compliance schedules for the two approved TMDLs within the Permit Area are beyond the five year MS4 Permit term. This Order requires Permittees identified as

dischargers in their respective TDMLs to conduct monitoring required by the TMDL Implementation Plans to determine the effectiveness of the BMPs implemented in reducing Pollutant loads and eventually to attain WLA by the deadlines specified in the respective TMDL Implementation Plans.

1. MSAR Bacteria WLA TMDL USEP monitoring

    a. On June 14, 2007, the TMDL task force members submitted a source evaluation plan and a monitoring plan. The Regional Board approved these plans on June 29, 2007, Resolution No. R8-2007-0046. A revised monitoring plan and an urban Bacterial Indicator source evaluation plan were approved by the Regional Board on April 18, 2008, Resolution No. R8-2008-0044. The MSAR Permittees within the MSAR watershed shall continue to conduct monitoring and source evaluations in accordance with the approved plans and report the findings in accordance with the schedules specified in the approved plans or as updated by subsequent Regional Board approved revisions.

    b. In conformance with Task 3 of the TMDL Implementation Plan contained in Resolution R8-2005-0001, the Permittees shall individually, or in conjunction with the MSAR TMDL Task Force, prepare a triennial report summarizing the data collected for the preceding 3 year period and evaluating compliance with the WLAs. The first report shall be due February 15, 2010.

    c. The Permittees shall conduct monitoring and reporting consistent with Section VI.D. of this Order to evaluate the effectiveness of the BMPs implemented in the watershed and determine their progress towards attaining compliance with the interim WQBELs, and final BMP-based WQBELS, if approved, or the final numeric WQBELS/WLAs.

2. Lake Elsinore/Canyon Lake Nutrient TMDL

    a. Monitor and report the effectiveness of the BMPs implemented in the watershed to control nutrient inputs into the lakes from Urban Runoff. Submit an Annual Report summarizing all relevant data from water quality monitoring programs and evaluating compliance with the LE/CL TMDL by reporting the effectiveness of the BMPs implemented in the watershed to control nutrient inputs into the lake from Urban Runoff pursuant to Regional Board Resolution No. R8-2006-0031 and R8-2007-0083, or as amended by subsequent Regional Board adopted resolutions.

    b. The Permittees shall conduct monitoring and reporting consistent with Section VI.D. of this Order to evaluate the effectiveness of the BMPs implemented in the watershed and determine their progress towards attaining compliance with the interim WQBELs, and final BMP-based WQBELS, if approved, or the final numeric WQBELS/WLAs.

E. In addition, any requirements developed by the State Board in accordance with Water Code Section 13383.5 shall be considered during any revision of the CMP. The revised CMP shall, at a minimum, include the following:

1. Mass Emissions Monitoring – Core Stations:

a. An estimate of flow in cubic feet per second (cfs) from the Outfall/stream at the time of sampling.

b. Monitor mass emissions in Urban Runoff to:

i) Estimate the total mass emissions from the MS4s to Receiving Waters.

ii) Assess trends in mass emissions associated with specific urban storm water discharges from the MS4 over time.

iii) Determine if Urban Runoff may be contributing to exceedances of Water Quality Objectives or Beneficial Uses in Receiving Waters by comparing water quality data from Outfall and Receiving Water results to: (1) Water quality Objectives (WQOs); (2) California Toxic Rule (CTR) (3) USEPA Multi-Sector Permit Parameter Benchmark Values and (4) other MS4 discharger's monitoring data or other appropriate data identified by the Permittees. The Permittees should also evaluate the Regional Monitoring reports prepared by SCCWRP to assess trends in Urban Runoff and Receiving Water quality within the Permit Area.

iv) Representative samples from the first sampleable storm event (based on mobilization criteria to be established in the CMP) of the Wet Season (October 1 to May 31) and two more storm events shall be collected during the Wet Season. A minimum of two Dry Weather samples shall also be collected. Samples from the first sampleable storm event each year shall be analyzed for constituents according to the list provided in the 2007-2008 Santa Ana Region Monitoring Annual Report, Attachment A. This list includes 40 CFR 122 Appendix D Tables II and III, and Tables IV and V if expected to be present, and additional constituents. All samples shall be analyzed for *E. coli*, nutrients (Nitrates + Nitrites, potassium, and phosphorous), hardness[1], metals, pH, TSS, TOC, pesticides/herbicides, and Pollutants/stressors for 303(d) listed Receiving Waters. Dry Weather samples should also include analyses for TPH (8015M – direct injection) and oil and grease. The analyte list will be reviewed annually. Constituents may be added to the list for a selected monitoring station if they are expected to be present, and removed from the list if three consecutive samples from the station have not had detectable concentrations of the constituent.

[1] Hardness is necessary to evaluate some metal Water Quality Objectives in receiving waters.

v) Monitoring locations shall be integrated into a GIS database system. All monitoring data shall continue to be placed in an electronic database.

2. Water Column Toxicity Monitoring: Analyses for Toxicity to aquatic species shall be performed on receiving water samples to determine if there may be impacts of Urban Runoff on Toxicity of Receiving Waters. The *Ceriodaphnia dubia* survival (acute), Fathead Minnow larval survival (acute), and Selenastrum Capricornutum growth (chronic) tests shall be used to evaluate Toxicity on the sample from the first sampleable storm event, plus one other Wet Season storm event sample. Where applicable, two Dry Weather samples shall also be collected or equivalent procedures shall be proposed in the CMP. In addition, criteria shall be identified which will trigger the initiation of Toxicity Identification Evaluations (TIEs) and Toxicity Reduction Evaluations (TREs).

   To the extent that the Toxicity testing developed as part of the Regional Bioassessment Monitoring described in item 5 and Section D below, or other standardized Toxicity testing protocols developed by the State Board, Regional Board, SMC or SCCWRP, satisfies the objective of determining the impact of Urban Runoff on Toxicity of Receiving Waters, the Permittees may satisfy this requirement by participating in the regional bioassessment effort or conducting Toxicity testing consistent with the standardized protocols.

3. Illicit Connection/Illegal Discharge (IC/ID) Monitoring: The Permittees shall review and update their Dry Weather and Wet Weather reconnaissance strategies to identify and eliminate IC/IDs using the Guidance Manual for Illicit Discharge, Detection, and Elimination developed by the Center for Watershed Protection[2] or any other equivalent program. Where possible, the use of GIS to identify geographic areas with a high density of industries associated with gross Pollution (e.g. electroplating industries, auto dismantlers) and/or locations subject to maximum sediment loss (e.g. New Development) may be used to determine areas for intensive monitoring efforts. The Dry Weather monitoring for nitrogen and total dissolved solids shall be used to establish a baseline dry weather flow concentration for TDS and TIN at each Core monitoring location.

4. Sources of Data: Where possible and applicable, water quality data shall be obtained from monitoring efforts of other public or private agencies/entities (e.g., Caltrans).

5. Bioassessment: In lieu of developing an independent bioassessment program as required in the prior term permit, the Principal Permittee, on behalf of the Co-Permittees, participates (through a memorandum of understanding and cooperative agreements) with the 16 member agencies of the SMC. The SMC's Bioassessment Working Group conducts bioassessments on a regional basis. The Principal Permittee in coordination with SCCWRP shall ensure that

[2] USEPA (Illicit Discharge Detection and Elimination - A Guidance Manual for Program Development and Technical Assessments) by the Center for Watershed Protection and Robert Pitt, University of Alabama, October 2004, updated 2005).

a sufficient number of monitoring stations are selected for this program from locations within the Permit Area.

a. The Principal Permittee, in collaboration with the SMC, shall conduct sampling, analysis, and reporting of specified in-stream biological and habitat data within the 5-year permit cycle according to the protocols specified in the SCCWRP Tech Report No. 539.

b. Within Riverside County, the bioassessment project area consists of the lower half of the MSAR watershed, the San Jacinto watershed, and the northern Santa Margarita watershed (northern San Diego) for a total of 1.5 watershed units, a minimum of 9 samples shall be collected per year[3]. Within Riverside County's Santa Ana and San Jacinto Watersheds, which are in the Permit Area, the Permittees shall sample 5 sites per year. SWAMP samples 2 sites per year.

c. For long-term trend monitoring, the Principal Permittee shall collect a minimum of 1 sample per year during the dry weather index period, as noted in the SCCWRP Tech Report No. 539. Additional samples may be collected to improve data quality for trend analysis. At a minimum, chemistry and aquatic Toxicity should be used as indicators for trend analysis.

d. Any baseline and historic information on stream geomorphology and ecological health, including aquatic habitats, in the Receiving Waters and the findings from the trend analysis shall be used to evaluate the effectiveness of Urban Runoff management program, including the requirements specified in the Order.

6. A Quality Assurance Program Plan (QAPP) within the CMP that describes how data will be collected and analyzed to ensure that data is consistent with State and Regional Board monitoring programs and is of high quality. Dischargers shall develop a QAPP that is compatible with the State's Surface Water Ambient Monitoring Program (SWAMP) QAPP and approved by the Regional Board's Quality Assurance Officer. A QAPP template is available, upon request, through the State Board's SWAMP website (http://www.waterboards.ca.gov/water_issues/programs/swamp/qapp.shtml). All analytical methods, target reporting limits, and data reporting formats should be SWAMP compatible unless otherwise specified in this MRP. The QAPP will include location of sample site(s), description of analytical techniques, data quality objectives, and other standard quality assurance information.

[3] See Table 4 page 15 of Technical Report No.539.

7. A procedure for the collection, analysis, and interpretation of existing data from local, regional or national monitoring programs. These data sources may be utilized to:
   a. Characterize different sources of Pollutants discharged to the MS4;
   b. Determine pollutant generation, transport and fate;
   c. Develop a relationship between land use, development size, storm size and the event mean concentration of Pollutants;
   d. Determine spatial and temporal variances in Urban Runoff quality and seasonal and other bias in the collected data; and
   e. Identify any unique features of the permitted area.
   f. The Permittees are encouraged to use water quality data from similar studies, if available.

8. The CMP update shall include descriptions of:
   a. The number of monitoring stations;
   b. Monitoring locations within MS4s, Major Outfalls, and Receiving Waters; environmental indicators (e.g., ecosystem, flow, biological, habitat, chemical, sediment, stream health, etc.) chosen for monitoring; The initial update shall at least contain the sampling stations listed in Table 1, below:

Table 1 Current Core Monitoring Stations

Station Number	Class	Station Description	Latitude	Longitude
40	Outfall	Corona Storm Drain – Line K Harrison & Sheridan St.	33.885	-117.568611
316	Outfall	Sunnymead Chanel – Line B Alessandro & Heacock	33.917778	-117.242222
318	Outfall	Hemet Channel @ Sanderson Ave.	33.734167	-117.005556
364	Outfall	Magnolia Center – SD @ Santa Ana River	33.964722	-117.414444
702	Outfall	University Wash – Market & Bowling Green	33.9975	-117.370833
707	Outfall	North Norco Channel @ Country Club Lane	33.907778	-117.583889
752	Outfall	Perris Line J - Sunset Ave below Murrieta Rd.	33.803333	-117.2075

   c. Total number of samples to be collected from each station, frequency of sampling during Wet Weather and Dry Weather, short duration or long duration storm events, type of samples (grab, 24-hour composite, etc.), justification for composite versus discrete sampling, type of sampling equipment, quality assurance/quality control procedures followed during sampling and analysis, analysis protocols to be followed (including sample preparation and maximum reporting limits), and qualifications of laboratories performing analyses;

d. A procedure for analyzing the collected data and interpreting the results. This procedure shall include the evaluation of the effectiveness of the BMPs, a comparative analysis of the Permittees' monitoring data to the USEPA Multi-Sector Permit Parameter Benchmark Values and applicable Water Quality Objectives specified in Chapter 4 of the Basin Plan, and the need for any refinement of the WQMPs, the DAMP and or/the LIPs.

e. Parameters selected for field screening and for laboratory work; and

f. A description of the responsibilities of all the participants in this program, including cost sharing.

g. Receiving Water Monitoring:

Permittees shall select at least one representative receiving water location within each of the San Jacinto River and Santa Ana River watersheds. These locations should be close Major Outfalls, coordinated with other regional monitoring programs to the extent feasible, include locations where chronic and/or persistent water quality problems associated with Urban Runoff have been identified, and should be selected so as to be useful to determine if Urban Runoff is causing or contributing to violations of Water Quality Standards in the Receiving Waters.

h. Monitoring within MS4s:
Permittees shall evaluate their current CMP MS4 monitoring locations (identified in Table 1, above) to ensure that they are representative of urban runoff. The objective of this monitoring element is to determine the pollutant loads from the MS4s and to determine their trend. This monitoring requirement may be incorporated into the mass emissions monitoring described in III.E.1, above.

F. REGIONAL WATERSHED MONITORING

1. The objectives of the Regional Watershed Monitoring Program overseen by the SWAMP and the SMC and coordinated by SCCWRP are:

   a. To assess the current status of streams in Southern California.

   b. To identify major stressors to aquatic life.

   c. To monitor the trend in water quality in Southern California streams.

2. The bioassessment discussed above, should provide information about the biological, chemical and toxicological integrity of Receiving Waters. Baseline and trend monitoring information on the biotic and geomorphological condition of the Receiving Waters should be used to evaluate the effectiveness of the Urban Runoff pollution control measures.

3. The Riverside County Regional Watershed monitoring area is within the lower half of the MSAR watershed, the San Jacinto watershed, and the northern Santa Margarita watershed (northern San Diego) for a total of 1.5 watershed units[4]. Within Riverside County's Santa Ana and San Jacinto watersheds, the Permittees sample 5 sites per year. SWAMP samples 2 sites per year.

4. The sampling sites in each watershed unit were determined according to distribution or abundance of the three land uses: urban, agriculture, or open. The sampling grid includes 15 watershed units located from Ventura to San Diego and as far east as San Bernardino and Riverside Counties. A total of 450 samples in the 15 watershed units will be collected within a five year period to assess the spatial extent of impacts to streams within the area. Samples will be collected at sites representing each of the three land use types. Each site will be sampled only once during an index period and not all sites need to be sampled during the same year. One-fifth of the samples (90 samples) will be collected each year for the 15 watersheds. Sampling events shall be conducted between 4 to 12 weeks following the last significant rainfall. No sampling shall occur within 72 hours of any measurable rainfall. The default index period will be from May 15 to July 15. The specifics and details of the Regional Watershed Program are discussed in "The Regional Monitoring of Southern California's Watershed SMC Bioassessment Working Group", SCCWRP, Technical Report No. 539, December 2007 (The Tech Report).

5. Any baseline and historic information on stream geomorphology and ecological health, including aquatic habitats, in the Receiving Waters and the findings from the trend analysis shall be used to evaluate the effectiveness of Urban Runoff management program, including the requirements specified in the Order.

G. HYDROMODIFICATION MONITORING PROGRAM

This Order requires development and implementation of a Hydromodification Monitoring Plan as part of the Watershed Action Plan (WAP) to evaluate the effectiveness of hydromodification controls implemented within the Permit Area (Some or all of the following requirements may be satisfied by the Permittees participation in the "Development of Tools for Hydromodification Assessment and Management' Project" undertaken by the SMC and coordinated by SCCWRP and follow on efforts to develop Hydromodification monitoring guidance).

1. The Order requires the Permittees to revise the DAMP to incorporate Watershed Action Plan principles within three years of adoption of the Order. The hydromodification requirements require the Permittees to identify

[4] See Table 4 page 15 of Technical Report No.539.

vulnerable streams and possible BMPs to minimize HCOCs and tools to measure any impacts on geomorphology and aquatic resources.

2. The Hydromodification monitoring program shall:

   a. Assess the effectiveness of Hydromodification management within the Permit Area.

   b. Predict the effects of urbanization on stream stability within the Permit Area.

H. LOW IMPACT DEVELOPMENT BMP MONITORING

The Principal Permittee shall continue to participate in data collection and monitoring to assess the effectiveness of LID techniques in semi-arid climate as part of the SMC project titled, "Quantifying the Effectiveness of Site Design/ Low Impact Development Best Management Practices in Southern California". The Principal Permittee is also developing a regional LID BMP testing and demonstration facility at the main office that meets the intent of this requirement (currently the facility data is intended to be integrated into the SMC project).

IV. RECORD KEEPING REQUIREMENTS

A. All monitoring activities shall meet the following requirements:

1. The Permittees shall retain records of all monitoring information, including all calibration and maintenance of monitoring instrumentation, copies of all reports prepared as per this MRP and records of all data used to complete the Report of Waste Discharge and Annual Reports for a period of at least five years from the date of the sample, measurement, report, or application. This period may be extended by request of the Regional Board or USEPA at any time and shall be extended during the course of any unresolved litigation regarding this discharge [40 CFR 122.41(j)(2), CWC section 13383(a)].

2. Records of monitoring information shall include [40 CFR 122.41(j)(3)]:
   a. The date, exact place, and time of sampling or measurements;
   b. The individual(s) who performed the sampling or measurements;
   c. The date(s) analyses were performed;
   d. The individual(s) who performed the analyses;
   e. The analytical techniques or methods used; and
   f. The results of such analyses.

3. Calculations for all Effluent Limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified in this MRP [40 CFR 122.41(l)(4)(iii)].

B. PROGRAM EFFECTIVENESS ASSESSMENT AND REPORTING

1. All progress reports and proposed strategies and plans required by this Order shall be signed by the Principal Permittee, and copies shall be submitted to the Executive Officer under penalty of perjury.

2. The Permittees shall submit an Annual Report to the Executive Officer and to the Regional Administrator of the USEPA, Region 9, no later than November 30th, of each year. This progress report shall also be submitted in a mutually agreeable electronic format that is text searchable. Any monitoring data shall also be submitted electronically in the form outlined in Section IV.B.4 of this MRP. At a minimum, the Annual Report shall include the following:

   a. A review of the status of program implementation and compliance (or non-compliance) with the schedules contained in this Order;

   b. An assessment of the effectiveness of BMPs established under the IC/ID program and the DAMP. The effectiveness may be measured in terms of how successful the program has been in eliminating IC/IDs and/or reducing pollutant loads in urban storm water runoff, including summaries of Permittee actions to investigate and eliminate or permit IC/IDs and measures to reduce and/or eliminate the discharge of Pollutants, including trash and debris

   c. As assessment of BMPs and their effectiveness in addressing Pollutants causing or contributing to an exceedance of water quality objectives in Receiving Waters that are on the 303(d) list of impaired waters. The effectiveness evaluation shall consider changes in land use and population on the quality of Receiving Waters and the impact of development on sediment loading within sediment impaired Receiving Waters and recommend necessary changes to program implementation and monitoring needs.

   d. An assessment of the Permittees compliance status with the Receiving Waters Limitations, Section VII of this Order, including any proposed modifications to the DAMP if the Receiving Water Limitations are not fully achieved.

   e. An overall program assessment. The Permittees are encouraged to use the program assessment methodology described in the 2007 ROWD. The Permittees should determine, to the extent practicable, water quality

improvements and Pollutant load reductions resulting from implementation of various program elements. The Permittees may also use the "Municipal Storm Water Program Effectiveness Assessment Guidance" developed by CASQA in May 2007 as guidance for assessing program effectiveness at various outcome levels. The assessment should include each program element required under this Order, the expected outcome and the measures used to assess the outcome. The Permittees may propose any other methodology for program assessment using measurable targeted outcomes.

f. Description of program modifications and improvements identified during the program assessment above along with implementation schedule for incorporation of revisions into the Local Implementation Plans (LIPs).

g. An assessment of any modifications to the WQMPs, or the DAMP made to comply with CWA requirements to reduce the discharge of Pollutants to the MEP;

h. A summary, evaluation, and discussion of monitoring results from the previous year and any changes to the monitoring program to be made the following year;

i. A fiscal resources analysis progress report as described in Section XVIII.B of Order No. R8-2010-0033 including:

   i. Each Permittee's expenditures for the previous fiscal year;

   ii. Each Permittee's budget for the current fiscal year; and

   iii. A description of the source of funds.

j. A draft work plan that describes the proposed implementation of the LIPs and DAMP for next fiscal year. The work plan shall include clearly defined tasks, responsibilities, and schedules for implementation of the storm water program and each Permittee's actions for the next fiscal year;

k. Major changes in any previously submitted plans/policies;

l. If the Implementation Agreement is revised, a copy of the signature page and revisions to the Implementation Agreement.

m. A review of each Permittee's Storm Water Ordinances and their enforcement practices to assess their effectiveness in prohibiting non-exempt, Non-storm Water discharges to the MS4 (The Permittees may propose appropriate BMPs in lieu of prohibiting these discharges, where the Permittees are responsible for ensuring that dischargers adequately maintain those BMPs).

3. The Co-Permittees shall be responsible for the submittal of all required information/materials needed to comply with this order in a timely manner to the Principal Permittee. A duly authorized representative of the Co-Permittee shall sign all such submittals under penalty of perjury.

4. The monitoring data transmittals to the Regional Board shall be in the form developed by the SMC and approved by the State Board in the document entitled "Standardized Data Exchange Formats". This document was developed in order to provide a standard format for all data transfers so that data can be universally shared and evaluated from various programs.

V. REPORTING SCHEDULE

All reports required by this Order shall be submitted to the Executive Officer in accordance with the following schedule:

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
III.A.1.e III.B.3.a,d,e & XVII.D.		Management Steering Committee meetings to discuss MS4 Permit implementation	Held at least twice per year.	Annual Report
III.A.1.f III.B.3.a,d,e & XVII.D.		Permittee Technical Committee meetings to discuss permit implementation	Held at least 10 times each year	Annual Report
III.B.3.a,d,e & XVII.D.		Co-Permittees participate in Management Steering and Technical Committee meetings to discuss MS4 Permit implementation	Attend at least 1 out of 2 Management and 8 out of 10 Technical meetings each year	Annual Report
III.A.1.r		The Principal Permittee shall develop a library of BMP performance reports, and revise the BMP performance report annually thereafter.	Within 6 months of permit adoption	
III.A.1.s		The Principal Permittee shall coordinate a review of the DAMP with the Co-Permittees to determine the need for update or revisions and establish a schedule for those revisions.	Within 6 months of permit adoption	
III.B.2.g		Submit up-to-date MS4 facility maps	Annually to Principal Permittee	Annual Report

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
III.B.2.h		Submit reports & information for Annual Report	Annually to Principal Permittee	Annual Report
III.C.		Evaluate Implementation Agreement annually to determine need for revision.	Annually	Report findings and schedule for revisions to the Implementation Agreement in 2009-2010 Annual Report.
III.C.		Allow new permittees to join MS4 permit	Per schedule required in Section III.A.1.s	Report findings and schedule for revisions to the Implementation Agreement in 2009-2010 Annual report.
IV.A.		Permittees shall develop and submit for approval a LIP Template	Within 6 months of adoption of Order	
IV.B.		Complete a Co-Permittee specific LIP	Within 12 months of approval of the Template	Within 12 months of approval of the Template
VI.D.1.a.ii		Submit reports summarizing all relevant data from the watershed-wide water quality monitoring program.	Beginning in 2010 Cool (or wet) weather Warm (or dry) weather	 May 31st December 31st.
VI.D.1.a.iii		Submit comprehensive reports every three years summarizing the data collected for the preceding 3 year period and evaluating progress towards achieving the urban waste load allocation by the dates specified in the TMDL.	Beginning in 2010 every three years	February 15, 2010.
VI.D.1.a.iv		Submit semi-annual reports each year as required under the approved USEP, and any amendments thereto.	The Dec 31st report (VI.D.1.a.ii) and the Jan 31st report (VI.D.1.a.iv) may be incorporated into the (VI.D.1.a.ii) report for the years the tri-annual report is generated.	Semi-annually on January 31st and July 31st

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
VI.D.1.a.v		Revise the DAMP as specified in Task 4.2 of the MSAR-TMDL Implementation Plan.	Sumarize data in Annual Report.	Annual Report
VI.D.1.a.vi		Revise the Water Quality Management Plan (WQMP)	As specified in Task 4.4 of the MSAR-TMDL Implementation Plan.	Annual Report
VI.D.1.a.vii		Amend the Local Implementation Plans (LIP) to be consistent with the revised DAMP and WQMPs within 90 days after said revisions are approved by the Regional Board. Summarize any such LIP amendments in the annual report		Annual Report
VI.D.1.b. & VI.D.1.c.		The MSAR Permittees shall submit a Comprehensive Bacteria Reduction Plan (CBRP) to achieve the final WQBELs for bacterial indicators during the Dry Season by December 31, 2015. Enforcement starts no sooner than January 1, 2016		Draft by December 31, 2010 Final by Dec 31, 2015.
VI.D.1.c.i.(8)		Revise the DAMP, WQMP, & LIPs	Within 180 days of CBRP approval.	
VI.D.2.a.		Submit Phase 2 Alternatives	December 31, 2010	
		Submit O&M for Agreement for Fishery Management Program	December 31, 2010	
		Submit O&M for Agreement for Aeration and Mixing Systems	December 31, 2010	
		Submit Phase 2 Projects Plans	June 30, 2011	
		Complete Phase 2 Project Implementation	December 31, 2014	
		Implement in-lake and watershed monitoring programs	Annual Reports due August 31 every year.	
VI.D.2.b.		Linkage Analysis Study	August 31, 2010	
		Watershed Source Loading Study	August 31, 2010	

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
		Model Evaluation	December 31, 2010	
		Construct/Calibrate Model	June 30, 2011	
		Conduct Model Scenarios	August 31, 2011	
		Model Update Final Report	November 30, 2011	
VI.D.2.c.		Revise DAMP, WQMP, & LIPs to incorporate the compliance plans required above.		Annual Report
VI.D.2.h.		Summarize all relevant data from water quality monitoring programs and evaluate compliance with the LE/CL TMDL	Annually	Annual Report
VI.D.2. d. & VI.D.2. e.		Submit CNRP	December 31, 2011	December 31, 2020.
VI.D.2.a.		Initiate Phase 2 LE/CL TMDL data collection.	December 31, 2010	
VI.D.2.j.		Tables 9 & 10 become WQBELs if CNRP is not adopted by Regional Board	December 31, 2020	
VII.D.1		Report upon determination that discharges from the MS4 are causing or contributing to an exceedance of an applicable WQS	Within two (2) working days	Within Annual update of DAMP
VII.D.2		Modify DAMP, LIP, and MRP to address Receiving Water Limit Violations and implementation schedule.	---	30 days after approval of Subsection VI.D. report by Executive Officer
VII.D.4		Report any exceedance solely due to discharges outside the Permittees jurisdiction.		Within two (2) working days of becoming aware of the situation, provide oral or e-mail notice and provide written documentation within ten (10) calendar days of becoming aware of the situation.
VIII.C.		Promulgate ordinances that would control for known pathogen or Bacterial Indicator sources	Within 3 years of adoption	Annual Report

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
VIII.F.		Review Storm Water Ordinances for effectiveness in prohibiting discharges to the MS4	Annual Report	
VIII. G.		Certification statement, signed by the Chief legal counsel, that the Permittee has obtained all necessary legal authority	Within 24 months of Order adoption.	Annual Report
VIII.H.		Permittees shall effectiveness of, implementation and enforcement response procedures.	Annually	Annual Report
IX. A.		Eliminate or permit IC/IDs		60 calendar days from receipt of notice from a third party.
IX.D.		Review and revise IC/ID program	18 months after Order adoption	Annual Report
IX.G.		Annually review and evaluate their IC/ID or IDDE program to determine if the program needs to be adjusted.	Annually	Annually
IX.H.		Maintain database summarizing IC/ID incident response	Annually	Annual Report
X.D.		Maintain inventory of septic systems within its jurisdiction completed in 2008.	Ongoing	Annual Report.
XI.A.11.		Each Permittee shall document, evaluate and annually report the effectiveness of its enforcement procedures in achieving prompt and timely compliance.	Annually	Annual Report
XI.A.13.		Permittees to evaluate and report adequacy of inspection programs conducted by other agencies on behalf of Permittee.	Annually	Annual Report

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
XI.B.4.		An inventory and inspection frequency of: Wet Season(Oct 1 – May 31): High = 1/mo., Med = 2/season, low = 1/season Dry Season: All construction sites shall be inspected at a frequency sufficient to ensure that sediment and other Pollutants are properly controlled and that unauthorized, Non-Storm Water discharges are prevented		Annual Report
XI.C.3		All high priority industrial facilities are to be inspected at least once a year; all medium priority sites are to be inspected at least once every two years; and all low priority sites are to be inspected at least once per permit cycle.		Annual Report
XI.D.4		All high priority sites shall be inspected at least once a year; all medium priority sites shall be inspected at least every two years; and all low priority sites shall be inspected at least once per MS4 Permit cycle.		Annual Report
XI.D.6		Notify all mobile businesses operating within the County concerning the minimum source control and pollution prevention measures that they must develop and implement.	Within 18 months of adoption of this Order	Annually
XI.D.7		The Principal Permittee shall develop an enforcement strategy to address mobile businesses.	Within 24 months of adoption of this Order	Annually

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
XI.E.1		Each Permittee shall develop and implement a residential program to reduce the discharge of Pollutants from residences to the MS4s to the MEP.	Within 18 months of adoption of this Order	Annually
XI.E.6.		Co-Permittees to provide an evaluation of its residential program	Annually starting with the second Annual Report following MS4 Permit adoption	Annually starting with the third Annual Report following MS4 Permit adoption
XII.B.3 & B8.		The Co-Permittees shall submit to the Regional Board a Watershed Action Plan	Within three years of adoption of MS4 Permit.	Annual Report
XII.B.5		Develop HMP	Submit within 4 years of adoption	
XII.C.1.		Each Permittee shall review the watershed protection principles and policies in its General Plan and related documents to eliminate barriers to LID.	Within 24 months of adoption of this Order	Annually
XII.D.1.		Each Permittee to submit a revised WQMP to incorporate new elements required in the Order	Within 18 months of adoption of this Order	Annual Report
XII.D.5.		Principal Permittee to develop recommendations for streamlining regulatory agency approval of regional Treatment Control BMPs.	Within 24 months of adoption of this Order	Annually
XII.E.1		Permittees shall update the WQMP to incorporate LID principles,	18 months of Order adoption	
XII.E.4.		Revise Ordinances to promote Green Infilstructure	18 months of Order adoption. Implement within 6 months of EO approval.	
XII.E.5.		Each Permittee to update its landscape ordinance consistent with requirements of AB 1881 and annually evaluate effectiveness with respect to water efficiency and water conservation goals	January 31, 2010	2011-2012 Annual Report

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
XII. F.		Develop standard design and post-development BMP guidance for streets, roads etc. projects.	Within 24 months of adoption of this Order, Implement within 6 months of EO approval.	
XII.G1.		Permittees shall establish technically-based feasibility criteria for project evaluation to determine feasibility of implementing LID	Within 18 months of MS4 Permit adoption	No reporting specified
XII.H.		Each Permittee shall develop and implement standard procedures and tools, and include in its LIP.	Within 18 months of adoption of this Order	Annually
XII.K.4.		The Permittees shall maintain a database to track operation and maintenance of post-construction BMPs.		Annually
XII.K.5		Public Agency Treatment Control BMPs, shall be inspected prior to the Wet Season.	Within18 months of Order adoption and within the 5 year permit term.	Annually
		New Development (Redevelopment) Treatment Control BMPs, shall be inspected prior to the Wet Season.	Based on schedule submitted but at least once within the 5 year permit term.	Annually
XII.K.6.		Provide list of all post-construction Treatment Control BMPs approved, constructed and/or operating	Annually	Annual Report
XII.L.		Provisions for LID and HCOC included in WQMP.	Within 45 days of approval of WQMP.	
XIII.A.		Review public education and outreach efforts and revise their activities to adapt to the needs identified in the annual reassessment.		Annual Report
XIII.B.		Status report on Public Education and Outreach requirements and changes to the ongoing program	Annually	Annual Report

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
XIII.C.		Implement assessment program to measure increases in public knowledge of impacts of Urban Runoff on Receiving Waters	First Annual Report following MS4 Permit adoption	
XIII.F.		The Permittees shall develop, maintain and distribute BMP guidance for the control of those potentially polluting activities identified during the previous permit cycle, which are not otherwise regulated by any agency, including guidelines for the household use of fertilizers, pesticides, herbicides and other chemicals, and guidance for mobile vehicle maintenance, carpet cleaners, commercial landscape maintenance, and pavement cutting.	Within 18 months of adoption of this Order	Annual Report
XIII.I.		The Public Education Committee shall meet at least twice per year.		Annual Report
XIII.J.		Sponsor or staff an Urban Runoff table or booth at community, regional, and/or countywide events to distribute public education materials to the public.	Each Permittee shall participate in at least one event per year.	Annually
XIII.K.		Involve public agency organizations, listed in Appendix 2, in Urban Runoff program. Notify the Regional Board where assistance is needed in improving local cooperation.		Annual Report
XIII.L		Develop and distribute BMP Fact Sheets for mobile businesses	Within 18 months of adoption of this Order	
XIV.A.		Review activities and facilities to determine the need for revisions to Section 5 of the DAMP and LIP.	Annually	Annual Report

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
XIV.B.		Each Permittee shall review its inventory of fixed facilities listed in the DAMP, its field operations and MS4 facilities to ensure that public agency facilities and activities do not cause or contribute to a Pollution or nuisance in Receiving Waters.	Within 12 months of adoption of this Order	Annual Report
XIV.C.		Conduct inspections of its fixed facilities and field operations.	Annually	Annual Report
XIV. D.		Evaluate cleaning schedule.	Annually	Annual Report
XIV.E.		Unless otherwise determined, each Permittee shall inspect, clean & maintain at least 80% of it's open channels, catch basins, retention/detention basins, and wetlands created for Urban Runoff treatment.	Annually	Annual Report
XIV.G1.c.		Notify the Executive Officer of the proposed construction project by electronically submitting Permit Registration Documents (PRDs).	Prior to commencement of each construction project.	
XIV.G1.d.		the Executive Officer shall be notified of the completion of the project by submitting a Notice of Termination (NOT).	Upon completion of each construction project.	
XIV.G2.b.		Notify the Executive Officer of each proposed deminimus discharge at least 15 days prior to start of the discharge	At least 15 days prior to discharge.	At least 15 days prior to discharge.
XV.A		DAMP and each Permittee's LIP shall be updated to include a program to provide formal and where necessary, informal training to Permittee staff that implement the provisions of this Order	Within 24 months of adoption of Order	DAMP will be updated within 24 months of adoption of Order. LIP will be updated within 12 months of approval of LIP template by EO

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[(a)]**			
XV.A., XV.E. .		Each Permitee's LIP shall describe a program to provide formal and informal training to Permittee staff and contractors that implement the provisions of this Order. Provide the specified training.	Within 24 months of adoption of this Order and annually thereafter.	LIP will be updated within 24 months of order adoption.
XV.F.		Principal Permittee shall provide and document training to applicable Permittee staff on area wide procedures such as the DAMP, and any other applicable guidance and procedures developed by the Permittees to address activities in fixed facilities as well as field operations, including MS4 maintenance.	Within 12 months of adoption of this Order, within 12 months of hire and every two years, thereafter.	Bi-annually
XV.H*		Principal Permittee shall notify Regional Board staff		When notifying Permittees of training session.
XVI.A.		Notify of emergency events..		Within 24 hours of discovery
XVI.C		Sewage spill notification shall be consistent with the timelines specified in the Statewide General Waste Discharge Requirements for Sanitary Sewer Systems, Water Quality Order No. 2006-0003-DWQ.		Consistent with 2006-003-DWQ.
XVI.D.		Hazardous Waste Spills	Notify within 24 hours.	
XVI.E.		Facilities operating without an applicable General permit.		Reported within 14 calendar days
XVII.A.		Evaluate the effectiveness of the Urban Runoff management program.	By November 30 of each year.	Annually by November 30.
XVII.B.		Amended DAMP pages.		Annual Report
XVIII.B.		Financial analysis report		Annual Report
XXII.A.		Report of Waste Discharge	180 days before permit expires	Jan 29, 2015

Reference		Item	Completion Time after Permit Adoption or Frequency	Report Due Date
Permit	**DAMP[a]**			
Appendix 3, III.C.		Review CMP to determine their effectiveness in Urban Runoff program assessment	Within 12 months of adoption of this Order	N/A
		Submit Revised CMP	Within 16 months of adoption of this Order and implement within 6 months of approval.	
Appendix 3, III.D.1.b.		Prepare a triennial report summarizing the data collected for the preceding 3 year period and evaluating compliance with the WLAs.	Every three years	The first report shall be due February 15, 2010.
Appendix 3, III.D.2		Submit an annual report summarizing all relevant data from water quality monitoring programs and evaluating compliance with the LE/CL TMDL by reporting the effectiveness of the BMPs implemented in the watershed to control nutrient inputs into the lake from Urban Runoff pursuant to Regional Board Resolution No. R8-2006-0031 and R8-2007-0083, or as amended by subsequent Regional Board adopted resolutions.	Annually	Annual Report
Appendix 3, IV.B.2.		Annual Report	Annually	November 30th

(a) This column to be completed by Permittees.

Date: 1-29-10 Ordered by

Gerard J. Thibeault
Executive Officer

APPENDIX 4

GLOSSARY

ORDER NO. R8-2010-0033

Appendix 4, GLOSSARY

40 CFR – Code of Federal Regulations Title 40: Protection of the Environment.

Annual Report – Report summarizing compliance information required to be submitted annually to the Regional Board on or before each November 30th.

Anthropogenic – Generated from human activities

APN – Assessor's parcel number

Basin Plan – Water Quality Control Plan developed by the Regional Board for the Santa Ana River watershed.

BAT [Best Available Technology] – Technology-based standard established by Congress in CWA Section 402(p)(3)(A) for industrial dischargers of storm water. Technology-based standards establish the level of Pollutant reductions that dischargers must achieve, typically by treatment or by a combination of Source Controls and Structural BMPs. BAT generally emphasizes treatment methods first and Pollution Prevention and Source Control BMPs secondarily. The best economically achievable technology that will result in reasonable further progress toward the national goal of eliminating the discharge of all Pollutants is determined in accordance with regulations issued by the USEPA Administrator. Factors relating to the assessment of BAT shall take into account the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, the cost of achieving such effluent reduction, non-water quality environmental impact (including energy requirements), and such other factors as the permitting authority deems appropriate.

BCT [Best Conventional Technology] – Treatment techniques, processes, and procedure innovations, and operating methods that eliminate or reduce chemical, physical, and biological Pollutant constituents.

Beneficial Use – Uses of water necessary for the survival or well being of man, plants, and wildlife. These uses of water serve to promote the tangible and intangible economic, social, and environmental goals. “Beneficial Uses” that may be protected include, but are not limited to: domestic, municipal, agricultural and industrial supply; power generation; recreation; aesthetic enjoyment; navigation; and preservation and enhancement of fish, wildlife, and other aquatic resources or preserves. Existing Beneficial Uses are those that were attained in the surface or ground water on or after November 28, 1975; and potential Beneficial Uses are those that would probably develop in future years through the implementation of various control measures. “Beneficial Uses” are equivalent to “Designated Uses” under federal law. [California

Water Code Section 13050(f)] Beneficial Uses for the Receiving Waters are identified in the Basin Plan.

Biological Integrity – Defined in Karr J.R. and D.R. Dudley. 1981. Ecological perspective on water quality goals. Environmental Management 5:55-68 as: "A balanced, integrated, adaptive community of organisms having a species composition, diversity, and functional organization comparable to that of natural habitat of the region." Also referred to as ecosystem health.

BMP [Best Management Practices] – Defined in 40 CFR 122.2 as schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the Pollution of Waters of the U.S. BMPs also include treatment requirements, operating procedures and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. In the case of MS4 permits, BMPs are typically used in place of Numeric Effluent Limits.

CAFO – Concentrated animal feeding operation.

Caltrans – California Department of Transportation.

CAP – The Commercial and Industrial Compliance Assistance Program is a Riverside County Environmental Health Department program that includes a storm water survey and educational outreach as part of existing inspections of Hazardous Material handlers and retail food service activities. Hazardous Waste handling facilities are inspected at least once during a two-year cycle. Restaurants are inspected at least once during the MS4 Permit cycle. Any completed surveys that indicate non-compliance are forwarded to the appropriate jurisdiction's code enforcement division. The Permittees notify Regional Board staff when conditions are observed during such inspections that appear to violate the General Storm Water Permits or a permit issued by the Regional Board.

CEQA – California Environmental Quality Act (Section 21000 et seq. of the California Public Resources Code).

CIEP – Compliance Inspection and Enforcement Program

Cleaning – Removal of litter or debris that can impact Receiving Waters.

CMP – Consolidated Program for Water Quality Monitoring, Riverside County Flood Control and Water Conservation District, October 2008.

Commercial Facilities – Businesses that have the potential to discharge Pollutants to the MS4 not otherwise covered by the General Industrial Permit that are described in Section 8.1 of the DAMP. These businesses are inspected as part of the CAP or equivalent as described in Section 8.1 of the DAMP. Commercial Facilities include businesses based in a Permittee's jurisdiction that perform mobile carpet, drape or

furniture cleaning; mobile automobile or other vehicle washing and mobile high pressure or steam cleaning.

Comprehensive TMDL Plan – A plan presenting a long-term solution designed to achieve compliance with the WLAs by the dates specified in the TMDLs. This plan includes a description of the proposed BMPs and the documentation demonstrating that the BMPs are expected to attain the WLAs by the compliance dates when implemented.

Conditions of Concern – Scour, erosion (sheet, rill and/or gully), aggradation (raising of a streambed from sediment deposition), and changes in fluvial geomorphology, hydrology or the aquatic ecosystem.

Construction Site – A site with activities for which building or grading permits have been issued and activities at the site include: soil movement; uncovered storage of materials or wastes, such as dirt, sand or fertilizer; or exterior mixing of cementaceous products, such as concrete, mortar or stucco.

Contamination – As defined in the Porter-Cologne Water Quality Control Act, contamination is “an Impairment of the quality of waters of the State by Waste to a degree which creates a hazard to the public health through poisoning or through the spread of disease.” Contamination includes any equivalent effect resulting from the disposal of Waste whether or not Waters of the U.S. are affected.

Co-Permittees – County of Riverside and the cities of Beaumont, Calimesa, Canyon Lake, Corona, Hemet, Lake Elsinore, Menifee, Murrieta, Moreno Valley, Norco, Perris, Riverside, San Jacinto and Wildomar.

County – County of Riverside, a legal subdivision of the State of California.

CSA 152 – County Service Area 152

CWA – Federal Clean Water Act

CZARA – Coastal Zone Act Reauthorization Amendments of 1990

DAMP [Drainage Area Management Plan] – The DAMP is a programmatic document developed by the Permittees and approved by the Executive Officer that outlines the major programs and policies that the Permittees individually and/or collectively implement to manage Urban Runoff in the Permit Area.

DDT – Dichlorodiphenyltrichloroethane – An insecticide first used in 1939. Most uses of DDT were banned in 1972, with limited exception for public health purposes.

De Minimus Permit – General De Minimus Permit for Discharges to Surface Waters, Order NO. R8-2009-0003, NPDES No. CAG 998001

Design Capture Volume – (See Permit, XII.E.2)

Discretionary Project – Per Section 15357 of the Guidelines for CEQA "Discretionary Project" means a project which requires the exercise of judgment or deliberation when the public agency or body decides to approve or disapprove a particular activity, as distinguished from situations where the public agency or body merely has to determine whether there has been conformity with applicable statutes, ordinances, or regulations. A timber harvesting plan submitted to the State Forester for approval under the requirements of the Z'berg-Nejedly Forest Practice Act of 1973 (Pub. Res. Code Sections 4511 et seq.) constitutes a discretionary project within the meaning of the California Environmental Quality Act. Section 21065(c).

Direct Discharge (Table 3a) – A discharge directly from an MS4 to a receiving water such that the MS4 discharge does not first co-mingle with waters from another receiving water or conveyance.

Dry Season/Dry Weather - The season excluding the Wet Season. Generally it will be June 1 through September 30 of each year, unless specifically defined otherwise in a applicable TMDL Implementation Plan.

Effective Impervious Area (EIA) – EIA is the portion of the total impervious area that is directly connected to the drainage collection system. EIA includes street surfaces, paved driveways connecting to the street, rooftops which are hydraulically connected to the curb or storm sewer system, and paved parking lots that drain to a storm sewer system.

Impervious area such as rooftops, streets, sidewalks, and parking areas do not allow water to drain into the soil. Impervious area that collects and drains the water directly to a stream or wetland system via pipes or sheet flow is considered “effective impervious area” because it effectively drains the landscape. Impervious area that drains to landscaped areas, swales, parks and other impervious areas is considered “ineffective” because the water is allowed to infiltrate through the soil and into ground water, without a direct connection to the stream or wetland.

Reducing effective impervious area is defined as disconnecting impervious surfaces such as sidewalks, rooftops, parking areas, and streets, from the drainage system so that runoff percolates into the soil and does not flow directly to streams. Disconnecting the stormwater system allows the watersheds’ hydrologic cycle to respond in a manner that more closely reflects pre-disturbed conditions. EIA reduction can occur as part of new development, redevelopment, or be part of a retrofit design. The level of benefit is determined by how well the practices minimize runoff in small to mid size storm events.

Effectiveness Assessment Outcome Level 1 - Compliance with Activity-based Permit Requirements – Level 1 outcomes are those directly related to the implementation of specific activities prescribed by this Order or established pursuant to it.

Effectiveness Assessment Outcome Level 2 - Changes in Attitudes, Knowledge, and Awareness – Level 2 outcomes are measured as increases in knowledge and awareness among target audiences such as residents, businesses, and municipal employees.

Effectiveness Assessment Outcome Level 3 - Behavioral Change and BMP Implementation – Level 3 outcomes measure the effectiveness of activities in affecting behavioral change and BMP implementation.

Effectiveness Assessment Outcome Level 4 - Load Reductions – Level 4 outcomes measure load reductions which quantify changes in the amounts of pollutants associated with specific sources before and after a BMP or other control measure is employed.

Effectiveness Assessment Outcome Level 5 - Changes in Urban Runoff and Discharge Quality – Level 5 outcomes are measured as changes in one or more specific constituents or stressors in discharges into or from MS4s.

Effectiveness Assessment Outcome Level 6 - Changes in Receiving Water Quality – Level 6 outcomes measure changes to receiving water quality resulting from discharges into and from MS4s, and may be expressed through a variety of means such as compliance with water quality objectives or other regulatory benchmarks, protection of biological integrity, or beneficial use attainment.

Effluent Limitations – means any restriction on quantities, discharge rates, and concentrations of Pollutants which are discharged from Point Sources into Waters of the U.S., waters of the “contiguous zone,” or the ocean (40 CFR 122.2).

Emergency Situation – At a minimum, sewage spills that could impact water contact recreation, all sewage spills above 1,000 gallons, an oil spill that could impact wildlife, a Hazardous Material spill where residents are evacuated, all reportable quantities of Hazardous Waste spills as per 40CFR 117 and 302, and any incident reportable to the OES (1-800-852-7550).

Erosion and Sediment Control Plan (ESCP) – These are water quality protection plans that include control measures for erosion prevention and sediment controls that would minimize the mobilization of sediment from the project site.

ESA – Environmentally Sensitive Area - An area “in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in

an ecosystem and which would be easily disturbed or degraded by human activities and developments" (Reference: California Public Resources Code § 30107.5).

ESAs subject to storm water mitigation requirements are:

1. Areas adjacent to Receiving Waters designated as "Preservation of Biological Habitats of Special Significance (BIOL)", "Spawning, Reproduction, and Development (SPWN)" or "Rare, Threatened, or Endangered Species (RARE)" Beneficial Uses in the Basin Plan;

2. Areas within the MSHCP that contain rare or especially valuable plant or animal life or their habitat. These areas are considered mitigated as the MSHCP contains substantive alternatives analysis for any proposed development that has the potential to impact resources.

3. Areas adjacent to CWA 303(d) Listed Water Bodies or adopted TMDLs with implementation plans that have yet to achieve the Urban WLA or LA goals; and

4. Any other equivalent environmentally sensitive areas which the Permittees have defined.

Executive Officer - The Executive Officer of the Regional Board.

General Construction Permit – State Board Order No. 2009-0009 DWQ (NPDES No. CAS000002) or the most recent draft of the General Construction Permit issued by the State Board subsequent to issuance of this Order.

General Dairy Permit – Regional Board Order No. R8-2007-0001 (NPDES No. CAG018001) for CAFOs.

General De Minimus Discharges Permit – Regional Board Order No. R8-2009-0003.

General Industrial Permit – State Board Order No. 97-03 DWQ (NPDES No. CAS000001) or the most recent General Permit for Storm Water Discharges Associated with Industrial Activities issued by the State Board subsequent to issuance of this Order.

General Storm Water Permits – General Industrial Permit (State Board Order No. 97-03 DWQ, NPDES No. CAS000001) and General Construction Permit (State Board Order No. 2009-0009-DWQ NPDES No. CAS000002), or the most recent applicable General Permit issued by the State Board subsequent to the issuance of this Order.

General Utility Vaults Permit– State Board Order No. 2006-0008-DWQ, NPDES No. CAG990002.

GIS – Geographical Information System.

Green Infrastructure – Generally refers to technologically feasible and cost-effective systems and practices that use or mimic natural processes to infiltrate, evapotranspirate, or reuse stormwater or runoff on the site where it is generated. This is a concept that highlights the importance of the natural environment in decisions about land use planning. In particular there is an emphasis on the "life support" functions provided by a network of natural ecosystems, with an emphasis on connectivity to support long term sustainability. (Also see Low Impact Development.)

Hazardous Material – Any substance that poses a threat to human health or the environment due to its toxicity, corrosiveness, ignitability, explosive nature or chemical reactivity. These also include materials named by the USEPA to be reported if a designated quantity of the material is spilled into the Waters of the U.S. or emitted into the environment.

Hazardous Waste – defined as "any waste, which, under Section 600 of Title 22 of this code, is required to be managed according to Chapter 30 of Division 4.5 of Title 22 of this code." [CCR Title 22, Division 4.5, Chapter 11, Article1]

HCOC – Hydrologic Condition of Concern - An HCOC exists when a site's hydrologic regime is altered and there are significant impacts on downstream channels and aquatic habitats, alone or in conjunction with impacts of other projects.

Hydromodification - the "alteration of the hydrologic characteristics of coastal and non-coastal waters, which in turn could cause degradation of water resources."[1] (USEPA 2007)

IC/ID – Illicit Connection/Illegal Discharge

IDDE - Illicit Discharge Detection and Elimination Program

Illegal Discharge –Defined at 40 CFR 122.26(b)(2) as any discharge to the MS4 that is not composed entirely of storm water, except discharges pursuant to an NPDES permit, discharges that are identified in Section VI.A. of this Order, and discharges authorized by the Executive Officer.

Illicit Connection – Any connection to the MS4 that is prohibited under local, state, or federal statutes, ordinances, codes, or regulations. The term Illicit Connection includes all non storm-water discharges and connections except discharges pursuant to an NPDES permit, discharges that are identified in Section V, Effluent Limitations and

[1] USEPA. 2007. *National Management Measures to Control Nonpoint Source Pollution from Hydromodification.* EPA 841-B-07-002. U.S. Environmental Protection Agency, Office of Water, Washington DC

Discharge Specifications, of this Order, and discharges authorized by the Executive Officer.

Impaired – Relates to waterbodies where it is presumed Beneficial Uses are not attained.

Impaired Waterbody / Impaired Waters – Section 303(b) of the CWA requires each of California's Regional Water Quality Control Boards to routinely monitor and assess the quality of waters of their respective regions. If this assessment indicates that Beneficial Uses are not met, then that waterbody must be listed under Section 303(d) of the CWA as an Impaired Waterbody. The 2006 water quality assessment found a number of water bodies within the Permit Area as Impaired pursuant to Section 303(d). In the Permit Area, these include: Canyon Lake (for pathogens); Lake Elsinore (for PCBs and unknown toxicity); Lake Fulmor (for pathogens); Santa Ana River, Reach 3 (pathogens); and Santa Ana River, Reach 4 (for pathogens).

Impairment – A waterbody condition where Beneficial Uses are not attained.

Implementation Agreement – The Implementation Agreement establishes the responsibilities of each Permittee and a procedure for funding the shared costs.

Impressions – The most common measure is "gross impressions" that includes repetitions. This means if the same person sees an advertisement or hears a radio or sees a TV advertisement a thousand times, that will be counted as 1000 Impressions.

Industrial Facility – Facilities defined in Attachment 1 of the General Industrial Permit. These facilities are also addressed by the CAP or equivalent as described in Section 8.1 of the DAMP.

LA – [Load Allocations] – Distribution or assignment of TMDL Pollutant loads to entities or sources for existing and future Non-Point Sources, including background loads.

Land Disturbance – The clearing, grading, excavation, stockpiling, or other construction activity that result in the possible mobilization of soils or other Pollutants into the MS4. This specifically does not include routine maintenance activity to maintain the original line and grade, hydraulic capacity, or original purpose of the facility. This also does not include emergency construction activities required to protect public health and safety. The Permittees should first confirm with Regional Board staff if they believe that a particular routine maintenance activity is exempt under this definition from the General Construction Permit or other Orders issued by the Regional Board.

Local Implementation Plan (LIP) – Document describing an individual Permittee's procedures, ordinances, databases, plans, and reporting materials for compliance with the MS4 Permit.

Low Impact Development (LID) – Comprises a set of technologically feasible and cost-effective approaches to storm water management and land development that combines a hydrologically functional site design with Pollution Prevention measures to compensate for land development impacts on hydrology and water quality. LID techniques mimic the site's predevelopment hydrology by using site design techniques that store, infiltrate, evapotranspire, bio-treat, bio-filter, bio-retain or detain runoff close to its source.

Major Outfall – Outfalls with a pipe diameter of 36 inches or greater or drainage areas draining 50 acres or more.

Management Steering Committee – Committee to address Urban Runoff management policies for the Permit Area and coordinate the review and necessary revisions of the DAMP and Implementation Agreement. The Management Steering Committee consists of one or more city manager or equivalent representatives from each Permittee.

MEP [Maximum Extent Practicable] MEP is an acronym for "Maximum Extent Practicable" and refers to the standard for implementation of storm water management programs.
Section 402(p)(3)(B)(iii) of the Clean Water Act requires that municipal storm water permits "shall require controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques, and system design and engineering
methods, and such other provisions as the Administrator or the State determines appropriate for the control of such pollutants."

In practice, compliance with the MEP standard is evaluated by how well the Permittees implement the "minimum measures" identified by EPA, including: (1)Public education and outreach on storm water impacts; (2) Public involvement/participation; (3) Illicit discharge detection and elimination; (4) Construction site storm water runoff control; (5) Post-construction storm water management in new development and redevelopment; and (6) Pollution prevention/good housekeeping for municipal operations. Collectively, these minimum measures are often referred to as "Best Management Practices" or BMPs. The MEP standard does not require Permittees to reduce pollutant concentrations below natural background levels, nor does it require further reductions where pollutant concentrations in the receiving water already meet water quality objectives. In implementing the MEP standard, it is appropriate for Permittees to prioritize their resource allocation to address the storm water pollution problems that pose the greatest and most immediate threat to human health or the environment.

MEP is a technology-based standard established by Congress in CWA section 402(p)(3)(B)(iii) that operators of MS4s must meet. Technology-based standards establish the level of pollutant reductions that dischargers must achieve, typically by treatment or by a combination of source control and treatment control BMPs. MEP

generally emphasizes pollution prevention and source control BMPs primarily (as the first line of defense) in combination with treatment methods serving as a backup (additional line of defense). MEP considers economics and is generally, but not necessarily, less stringent than BAT. A definition for MEP is not provided either in the statute or in the regulations. Instead the definition of MEP is dynamic and will be defined by the following process over time: municipalities propose their definition of MEP by way of their urban runoff management programs. Their total collective and individual activities conducted pursuant to the urban runoff management programs becomes their proposal for MEP as it applies both to their overall effort, as well as to specific activities (e.g., MEP for street sweeping, or MEP for MS4 maintenance). In the absence of a proposal acceptable to the Regional Board, the Regional Board defines MEP.

In a memo dated February 11, 1993, entitled "Definition of Maximum Extent Practicable," Elizabeth Jennings, Senior Staff Counsel, SWRCB addressed the achievement of the MEP standard as follows:

“To achieve the MEP standard, municipalities must employ whatever Best management Practices (BMPs) are technically feasible (i.e., are likely to be effective) and are not cost prohibitive. The major emphasis is on technical feasibility. Reducing pollutants to the MEP means choosing effective BMPs, and rejecting applicable BMPS only where other effective BMPS will serve the same purpose or the BMPS would not be technically feasible, or the cost would be prohibitive. In selecting BMPS to achieve the MEP standard, the following factors may e useful to consider:

a. Effectiveness: Will the BMPS address a pollutant (or pollutant source) of concern?

b. Regulatory Compliance: Is the BMP in compliance with storm water regulations as well as other environmental regulations?

c. Public Acceptance: Does the BMP have public support?

d. Cost: Will the cost of implementing the BMP have a reasonable relationship to the pollution control benefits to be achieved?

e. Technical Feasibility: Is the BMP technically feasible considering soils, geography, water resources, etc?

The final determination regarding whether a municipality has reduced pollutants to the maximum extent practicable can only be made by the Regional or State Water Boards, and not by the municipal discharger. If a municipality reviews a lengthy menu of BMPS and chooses to select only a few of the least expensive, it is likely that MEP has not been met. On the other hand, if a municipal discharger employs all applicable BMPS except those where it can show that they are not technically feasible in the locality, or whose cost would exceed any benefit derived, it would have met the standard. Where a choice may be made between two BMPS that should provide generally comparable

effectiveness, the discharger may choose the least expensive alternative and exclude the more expensive BMP. However, it would not be acceptable either to reject all BMPS that would address a pollutant source, or to pick a BMP base solely on cost, which would be clearly less effective. In selecting BMPS the municipality must make a serious attempt to comply and practical solutions may not be lightly rejected. In any case, the burden would be on the municipal discharger to show compliance with its permit. After selecting a menu of BMPS, it is the responsibility of the discharger to ensure that all BMPS are implemented."

Ministerial – Per Section 15369 of the CEQA Guidelines, Ministerial describes a governmental decision involving little or no personal judgment by the public official as to the wisdom or manner of carrying out the project. The public official merely applies the law to the facts as presented but uses no special discretion or judgment in reaching a decision. A ministerial decision involves only the use of fixed standards or objective measurements, and the public official cannot use personal, subjective judgment in deciding whether or how the project should be carried out. Common examples of ministerial permits include automobile registrations, dog licenses, and marriage licenses. A building permit is ministerial if the ordinance requiring the permit limits the public official to determining whether the zoning allows the structure to be built in the requested location, the structure would meet the strength requirements in the Uniform Building Code, and the applicant has paid his fee.

MSAR – Middle Santa Ana River

MSHCP – Western Riverside County Multiple Species Habitat Conservation Plan

MS4 – **[Municipal Separate Storm Sewer System]** – A conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, natural drainage features or channels, modified natural channels, man-made channels, or storm drains): (i) Owned or operated by a State, city town, borough, county, parish, district, association, or other public body (created by or pursuant to State law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under State law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or designated and approved management agency under section 208 of the CWA that discharges to Waters of the U.S.; (ii) Designated or used for collecting of conveying storm water; (iii) Which is not a combined sewer; (iv) Which is not part of the POTW as defined at 40 CFR 122.2.

New Development – The categories of development identified in Section XI.D of this Order. New Development does not include routine maintenance to maintain original line and grade, hydraulic capacity, or original purpose of a facility, nor does it include emergency New Development required to protect public health and safety. Dischargers should confirm with Regional Board staff whether or not a particular routine maintenance activity is subject to this Order.

New Urbanism – New Urbanism refers to the use of creative strategies to develop ways that preserve natural lands and critical environmental areas, protect water and air quality, and reuse already-developed land. This is based on principles of planning and architecture that work together to create human-scale, walkable communities that preserve natural resources.

NOI [Notice of Intent] – A NOI is an application for coverage under the General Storm Water Permits.

Non-Point Source – Refers to diffuse, widespread sources of Pollution. These sources may be large or small, but are generally numerous throughout a watershed. Non-Point Sources, include but are not limited to urban, agricultural or industrial area, roads, highways, construction sites, communities served by septic systems, recreational boating activities, timber harvesting, mining, livestock grazing, as well as physical changes to stream channels, and habitat degradation. Non-Point Source Pollution can occur year round any time rainfall, snowmelt, irrigation, or any other source of water runs over land or through the ground, picks up Pollutants from these numerous, diffuse sources and deposits them into rivers, lakes and coastal waters or introduces them into groundwater.

Non-storm Water – All discharges to and from a MS4 that do not originate from precipitation events (i.e., all discharges to a MS4 other than storm water). Non-storm Water includes Illicit Discharges, non-prohibited discharges and NPDES permitted discharges.

NOT - Notice of Termination – Formal notice to the Regional Board of intent to terminate water discharge for projects covered under a General Stormwater Permit.

NPDES [National Pollutant Discharge Elimination System] – Permits issued under Section 402(p) of the CWA for regulating discharge of Pollutants to Waters of the U.S.

Nuisance – As defined in the Porter-Cologne Water Quality Control Act a Nuisance is “anything which meets all of the following requirements: 1) Is injurious to health, or is indecent, or offensive to the senses, or an obstruction to the free use of property, so as to interfere with the comfortable enjoyment of life or property. 2) Affects at the same time an entire community or neighborhood, or any considerable number of persons, although the extent of the annoyance or damage inflicted upon individuals may be unequal. 3) Occurs during, or as a result of, the treatment or disposal of Wastes.”

Numeric Effluent Limitations – A quantitative limitation on Pollutant concentrations or levels to protect Beneficial Uses and Water Quality Objectives of a water body. When Numeric Effluent Limits are met at the “end-of-pipe,” the effluent discharge generally will not cause Water Quality Standards to be exceeded in the receiving waters (i.e., Water Quality Standards will also be met).

Nurdles – A plastic pellet, also known as pre-production plastic pellet or plastic resin pellet.

NURP - National Urban Runoff Program

OES – The Governor's Office of Emergency Services, an agency of the State of California.

"Only Rain Down The Storm Drain" Pollution Prevention Program – County Urban Runoff public education program.

Open Space – Any parcel or area of land or water that is essentially unimproved or devoted to an open-space use for the purposes of (1) the preservation of natural resources, (2) the managed production of resources, (3) outdoor recreation, or (4) public health and safety. [Riverside County General Plan, adopted October 7, 2003. Technical Appendix A , Glossary]

Order – Order No. R8-2010-0033 (NPDES No. CAS618033)

Outfall – Means a Point Source as defined by 40 CFR 122.2 a, the point where a municipal separate storm sewer discharges to Waters of the U.S. and does not include open conveyances connecting two municipal separate storm sewers, or pipes, tunnels, or other conveyances which connect segments of the same stream or other Waters of the U.S. and are used to convey Waters of the U.S.. [40 CFR 122.26 (b)(9)]

PAHs – Polycyclic aromatic hydrocarbons. PAHs occur in oil, coal, and tar deposits, and are produced as byproducts of fuel burning (whether fossil fuel or biomass). As a Pollutant, they are of concern because some compounds have been identified as carcinogenic, mutagenic, and teratogenic. PAHs are also found in foods.

Party – Defined as an individual, association, partnership, corporation, municipality, state or federal agency, or an agent or employee thereof. [40 CFR 122.2]

PCBs – Polychlorinated biphenyls. Due to PCB's toxicity and classification as persistent organic Pollutants, PCB production was banned by the United States Congress in 1976 and by the Stockholm Convention on Persistent Organic Pollutants in 2001.

Permit Area – In the Santa Ana Region, the portion of the Santa Ana River watershed that is within the County and regulated under the MS4 Permit. The Permit Area is identified on Appendix 1 as "Permittee Urban Area" and those areas under the Permittee's jurisdictions designated as "Agriculture" and "Open Space" on Appendix 1 that will convert to Permittee Urban Area when developed to industrial, commercial, or residential use during the term of the Order.

Permittees – Co-Permittees and the Principal Permittee

Point Source – Any discernible, confined, and discrete conveyance, including, but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operations, landfill leachate collection systems, vessel, or other floating craft from which pollutants are or may be discharged.

Pollutant – Broadly defined as any agent that may cause or contribute to the degradation of water quality such that a condition of Pollution or Contamination is created or aggravated.

Pollutants of Concern –Pollutants expected to be present on the project site. In developing this list, consideration should be given to the chemicals and potential Pollutants available for storm water to pick-up or transport to Receiving Waters and legacy Pollutants at the project site. Pollutants of Concern for New Development and Significant Redevelopment projects are those Pollutants identified above for which a downstream water body is also listed as Impaired under the CWA Section 303(d) list or by a TMDL.

Pollution – As defined in the Porter-Cologne Water Quality Control Act, Pollution is the alteration of the quality of the Waters of the U.S. by Waste, to a degree that unreasonably affects either of the following: A) the waters for Beneficial Uses (i.e., when the Water Quality Objectives have been violated); or B) facilities that serve these Beneficial Uses. Pollution may include Contamination.

Pollution Prevention –Defined as practices and processes that reduce or eliminate the generation of Pollutants, in contrast to Source Control, Pollution Control, Treatment Control BMPs, or disposal.

Post-Construction BMPs – A subset of BMPs including Site Design, Source Control, and Treatment Control BMPs which detain, retain, filter or educate to prevent the release of Pollutants to surface waters during the final functional life of development.

POTW – [Publicly Owned Treatment Works] – Wastewater treatment facilities owned by a public agency.

Principal Permittee – Riverside County Flood Control and Water Conservation District [RCFC&WCD].

Public Education Committee – Committee established by the Permittees to provide oversight and guidance for the implementation of the public education program.

QAPP - Quality Assurance Project Plan

Rainy Season – See Wet Season.

RCFC&WCD – Riverside County Flood Control and Water Conservation District

REC – Recreational Beneficial Use.

Receiving Water(s) – Waters of the U.S.within the Permit Area.

Receiving Water Limitations – Requirements included in the Orders issued by the Regional Boards to assure that the regulated discharges do not violate Water Quality Standards established in the Basin Plan at the point of discharge to Waters of the U.S. Receiving Water Limitations are used to implement the requirement of CWA section 301(b)(1)(C) that NPDES permits must include any more stringent limitations necessary to meet Water Quality Standards.

Receiving Water Quality Objectives – Water Quality Objectives specified in the Basin Plan for Receiving Waters.

Region – The portion of the Santa Ana River watershed within Riverside County.

Regional Board – California Regional Water Quality Control Board, Santa Ana Region.

RGO – Retail gasoline outlet

Riverside County – Territory within the geographical boundaries of the County.

ROWD [Report of Waste Discharge] – Application for issuance or re-issuance of WDRs.

Sanitary Sewer Overflow (SSO) – Any overflow, spill, release, discharge or diversion of untreated or partially treated wastewater from a sanitary sewer system.

Santa Ana Region – Area under the jurisdiction of the Regional Board.

SARA – Superfund Amendments and Reauthorization Act. SARA amended the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) on October 17, 1986. SARA reflected USEPA's experience in administering the complex Superfund program during its first six years and made several important changes and additions to the program. SARA:

- stressed the importance of permanent remedies and innovative treatment technologies in cleaning up Hazardous Waste sites;
- required Superfund actions to consider the standards and requirements found in other State and Federal environmental laws and regulations;
- provided new enforcement authorities and settlement tools;

- increased State involvement in every phase of the Superfund program;
- increased the focus on human health problems posed by Hazardous Waste sites;
- encouraged greater citizen participation in making decisions on how sites should be cleaned up; and
- increased the size of the trust fund to $8.5 billion.

SARA also required USEPA to revise the Hazard Ranking System (HRS) to ensure that it accurately assessed the relative degree of risk to human health and the environment posed by uncontrolled Hazardous Waste sites that may be placed on the National Priorities List (NPL).

SAWBAA – Santa Ana Watershed Benefit Assessment Area

SCCWRP – Southern California Coastal Water Research Project

Sediment – Soil, sand, and minerals washed from land into water. Sediment resulting from anthropogenic sources (i.e. human induced land disturbance activities) is considered a Pollutant. This Order regulates only the discharges of Sediment from anthropogenic sources and does not regulate naturally occurring sources of Sediment. Sediment may destroy fish-nesting areas, clog animal habitats, and cloud waters so that sunlight does not reach aquatic plants.

SIC [Standard Industrial Classification] – Four digit industry code, as defined by the US Department of Labor, Occupational Safety and Health Administration. The SIC Code is used to identify if a facility requires coverage under the General Industrial Activities Storm Water Permit.

Significant Redevelopment – As defined in Section XI.D.3.a.

SIP - Appendix 4 of the Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California

Site Design BMPs – Any project design feature that reduces the creation or severity of potential pollutant sources or reduces the alteration of the project site's natural flow regime. Redevelopment projects that are undertaken to remove Pollutant sources (such as existing surface parking lots and other impervious surfaces) or to reduce the need for new roads and other impervious surfaces (as compared to conventional or low-density New Development) by incorporating higher densities and/or mixed land uses into the project design, are also considered site design BMPs

Smart Growth Principles – Smart Growth refers to the use of creative strategies to develop ways that preserve natural lands and critical environmental areas, protect water and air quality, and reuse already-developed land.

SMC - Storm Water Monitoring Coalition

Source Control BMPs – In general, activities or programs to educate the public or provide low cost non-physical solutions, as well as facility design or practices aimed to limit the contact between Pollutant sources and storm water or authorized Non-Storm Water. Examples include: activity schedules, prohibitions of practices, street sweeping, facility maintenance, detection and elimination of IC/IDs, and other non-structural measures. Facility design (structural) examples include providing attached lids to trash containers, canopies for fueling islands, secondary containment, or roof or awning over material and trash storage areas to prevent direct contact between water and Pollutants.

Southern California Monitoring Coalition (SMC) - A regional group working to improve monitoring program design, parameter test methods, calibrate labs, evaluate the effectiveness of BMPs, and/or advance the science and understanding of Urban Runoff impacts on Receiving Waters.

SSMP – Sewer System Management Plan

SSO Order – Statewide General Waste Discharge Requirements for Sanitary Sewer Systems, Water Quality Order No. 2006-0003-DWQ.

State Board – California State Water Resources Control Board

Storm Water – Storm water runoff and snow melt runoff from urban, open space, and agricultural areas consisting only of those discharges that originate from precipitation events. Storm water is that portion of precipitation that flows across a surface to the MS4 or receiving waters. Examples of this phenomenon include: the water that flows off a building's roof when it rains (runoff from an impervious surface); the water that flows into streams when snow on the ground begins to melt (runoff from a semi-pervious surface); and the water that flows from a vegetated surface when rainfall is in excess of the rate at which it can infiltrate into the underlying soil (runoff from a pervious surface). When all other factors are equal, runoff increases as the perviousness of a surface decreases. During precipitation events in urban areas, rain water may pick up and transports Pollutants through storm water conveyance systems, and ultimately to Waters of the U.S.

Storm Water Ordinance – The Storm Water/Urban Runoff Management and Discharge Control Ordinances and ordinances addressing grading and erosion control adopted by each of the Co-Permittees.

Structural BMPs – Physical facilities or controls that may include secondary containment, treatment measures, (e.g. first flush diversion, detention/retention basins, and oil/grease separators), run-off controls (e.g., grass swales, infiltration trenches/basins, etc.), and engineering and design modification of existing structures.

Subdivision Map Act - Section 65000 et seq. of the California Government Code

SWAMP - Surface Water Ambient Monitoring Program

SWPPP [Storm Water Pollution Prevention Plan] – Plan required by the General Construction Permit to minimize and manage Pollutants to minimize Pollution from entering the MS4, identifying all potential sources of Pollution and describing planned practices to reduce Pollutants from discharging off the site.

SWQSTF – Storm Water Quality Standards Task Force

TDS – Total dissolved solids.

Technical Committee – A committee consisting of one or more representatives from each Permittee that provides technical direction on the development of the DAMP and the implementation of the overall Urban Runoff program.

Technology-Based Effluent Limitations – A permit limit for a Pollutant that is based on the capability of a treatment method to reduce the Pollutant to a certain concentration.

TIN – Total Inorganic Nitrogen

TMDL [Total Maximum Daily Load] – Maximum amount of a Pollutant that can be discharged into a water body from all sources (point and non-point) and still maintain Water Quality Standards. Under CWA Section 303(d), TMDLs must be developed for all water bodies that do not meet Water Quality Standards after application of technology-based controls.

TMDL Implementation Plan – Component of a TMDL that describes actions, including monitoring, needed to reduce Pollutant loadings and a timeline for implementation. TMDL Implementation Plans can include a monitoring or modeling plan and milestones for measuring progress, plans for revising the TMDL if progress toward cleaning up the waters is not made, and the date by which Water Quality Standards will be met (USEPA Final TMDL Rule: Fulfilling the Goals of the CWA, EPA 841-F-00-008, July 2000).

Toxic Substance – A substance that can cause Toxicity.

Toxicity – Adverse responses of organisms to chemicals or physical agents ranging from mortality to physiological responses such as impaired reproduction or growth anomalies.

Treatment Control BMPs – Any engineered system designed and constructed to remove Pollutants from Urban Runoff. Pollutant removal is achieved by simple gravity

settling of particulate Pollutants, filtration, biological uptake, media adsorption or any other physical, biological, or chemical process.

Tributary – a stream, river, or MS4 which flows into downstream receiving water, MS4 or BMP.

TSS – Total suspended solids.

Uncontaminated Pumped Groundwater – Groundwater that meets the surface Water Quality Objectives specified in the Basin Plan to which it is proposed to be discharged.

Urban Runoff – Urban Runoff includes those discharges from residential, commercial, industrial, and construction areas within the Permit Area and excludes discharges from Open Space[2], feedlots, dairies, farms and agricultural fields. Urban Runoff discharges consist of storm water and non-storm water surface runoff from drainage sub-areas with various, often mixed, land uses within all of the hydrologic drainage areas that discharge into the Waters of the U.S. In addition to Urban Runoff, the MS4s regulated by this Order receive flows from Open Space, agricultural activities, agricultural fields state and federal properties and other non-urban land uses not under the control of the Permittees. The quality of the discharges from the MS4s varies considerably and is affected by, among other things, past and present land use activities, basin hydrology, geography and geology, season, the frequency and duration of storm events, and the presence of past or present illegal and allowed disposal practices and Illicit Connections.

The Permittees lack legal jurisdiction over storm water discharges into their respective MS4 facilities from agricultural activities, California and federal facilities, utilities and special districts, Native American tribal lands, wastewater management agencies and other point and non-point source discharges otherwise permitted by or under the jurisdiction of the Regional Board. The Regional Board recognizes that the Permittees should not be held responsible for such facilities and/or discharges. Similarly, certain activities that generate Pollutants present in Urban Runoff are beyond the ability of the Permittees to eliminate. Examples of these include operation of internal combustion engines, atmospheric deposition, brake pad wear, tire wear, residues from lawful application of pesticides, nutrient runoff from agricultural activities, leaching of naturally occurring minerals from local geography. Urban Runoff does not include background Pollutant loads or naturally occurring flows.

USEP – Urban Source Evaluation Plan for the MSAR TMDL.

USEPA – United States Environmental Protection Agency.

[2] This use of Open Space excludes Open Space integrated into urbanized areas such as pocket parks, landscaped medians, walking trails, etc. Open Space is intended to address essentially unimproved areas in strictly unurbanized settings.

Waste – As defined in Water Code Section 13050(d), “Waste includes sewage and any and all other waste substances, liquid, solid, gaseous, or radioactive, associated with human habitation, or of human or animal origin, or from any producing, manufacturing, or processing operation, including waste placed within containers of whatever nature prior to, and for purposes of, disposal.” Article 2 of CCR Title 23, Chapter 15 (Chapter 15) contains a waste classification system that applies to solid and semi-solid waste that cannot be discharged directly or indirectly to waters of the state and which therefore must be discharged to land for treatment, storage, or disposal in accordance with Chapter 15. There are four classifications of waste (listed in order of highest to lowest threat to water quality): hazardous waste, designated waste, non-hazardous solid waste, and inert waste.

Waste Discharge Requirements (WDRs) – As defined in Section 13374 of the California Water Code, the term "Waste Discharge Requirements” is the equivalent of the term "permits" as used in the Federal Water Pollution Control Act, as amended. The Regional Board usually reserves reference to the term “permit” to Waste Discharge Requirements for discharges to surface Waters of the U.S.

Waste Load Allocations (WLAs)– Maximum quantity of Pollutants a discharger of waste is allowed to release into a particular waterway, as set by a regulatory authority. Discharge limits usually are required for each specific water quality criterion being, or expected to be, violated. Distribution or assignment of TMDL Pollutant loads to entities or sources for existing and future Point Sources.

WQBEL – Water Quality Based Effluent Limitations

Water Code – California Water Code

Waters of the U.S. – Waters of the U.S. can be broadly defined as navigable surface waters and all tributary surface waters to navigable surface waters. Groundwater is not considered to be a Waters of the U.S. As defined in 40 CFR 122.2, the Waters of the U.S. are defined as: (a) All waters, which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide; (b) All interstate waters, including interstate “wetlands;” (c) All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, “wetlands,” sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation or destruction of which would affect or could affect interstate or foreign commerce including any such waters: (1) Which are or could be used by interstate or foreign travelers for recreational or other purposes; (2) From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or (3) Which are used or could be used for industrial purposes by industries in interstate commerce; (d) All impoundments of waters otherwise defined as Waters of the U.S. under this definition; (e) Tributaries of waters identified in paragraphs (a) through (d) of this definition; (f) The territorial seas; and (g) “Wetlands” adjacent to waters (other than waters that are themselves wetlands) identified in paragraphs (a)

through (f) of this definition. Waters of the U.S. do not include prior converted cropland. Notwithstanding the determination of an area's status as prior converted cropland by any other federal agency, for the purposes of the CWA, the final authority regarding CWA jurisdiction remains with the USEPA.

Water Quality Objectives – Means the numeric or narrative limits or levels of water quality constituents or characteristics which are established for the reasonable protection of Beneficial Uses of water or the prevention of Nuisance within a specific area. [California Water Code Section 13050(h)]

Water Quality Standards –The water quality goals of a waterbody (or a portion of the waterbody) designating Beneficial Uses to be made of the water and the Water Quality Objectives or criteria necessary to protect those uses. These standards also include California's anti-degradation policy.

Watershed – That geographical area which drains to a specified point on a watercourse, usually a confluence of streams or rivers (also known as drainage area, catchments, or river basin).

Watershed Action Plan (WAP) – Integrated plans for managing a watershed that include consideration of water quality, Hydromodification, water supply and habitat protection. The Watershed Action Plan integrates existing watershed based planning efforts and incorporates watershed tools to manage cumulative impacts of development on vulnerable streams, preserve structure and function of streams, and protect source, surface and groundwater quality and water supply in the Permit Area. The Watershed Action Plan should integrate Hydromodification and water quality management strategies with land use planning policies, ordinances, and plans within each jurisdiction.

WDID [Waste Discharge Identification] – Identification number provided by the State when a Notice of Intent is filed.

Wet Season/Wet Weather – October 1 through May 31st of each year unless defined otherwise in the specific applicable TMDL implementation plan. The Middle Santa Ana River TMDL defines the wet season as November 1 through March 31st and the Canyon Lake/Lake Elsinore TMDL monitoring defines it as October 1st through May 31st.

WQMP – Water Quality Management Plan as discussed in Section 6 of the DAMP.

WRCOG - Western Riverside Council of Governments

APPENDIX 5

NOTICE OF INTENT AND NOTICE OF TERMINATION FOR MUNICIPAL CONSTRUCTION ACTIVITIES

ORDER NO. R8-2010-0033

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD – SANTA ANA REGION

NOTICE OF INTENT

TO COMPLY WITH THE TERMS OF THE RIVERSIDE COUNTY MUNICIPAL STORMWATER PERMIT FOR STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITIES

ORDER No. R8-2010-0033 (NPDES No. CAS618033)

MARK ONLY ONE ITEM 1. ☐ New Construction/Reconstruction 2. ☐ Change of Information for WDID# _____

I. OWNER

Name	Contact Person		
Mailing Address	Title		
City	State **CA**	Zip	Phone ( ) – Fax ( ) – Email :

II. CONTRACTOR INFORMATION

Name	Contact Person		
Local Mailing Address	Title		
City	State	Zip	Phone ( ) – Fax ( ) – Email:

III. SITE INFORMATION

A. Project Title	Site Address		
City/Unincorporated Area	State **CA**	Zip	Contact Person Phone ( ) –
B. Construction commencement date: (Month / Day / Year)	C. Projected construction completion date: (Month / Day / Year)		

D. Type of Work: ☐ Utility ☐ Flood Control ☐ Transportation ☐ Other (Specify) Description of Work: _____	E. Total size of project/construction site: ____Acres Total size of area to be disturbed:_ ____Acres.

IV. RECEIVING WATER INFORMATION

A. Does the storm water runoff from the construction site discharge to (check all that apply):

1. ☐ Indirectly to Waters of the U.S.
2. ☐ MS4 Facility - Enter owner's name:_____
3. ☐ Directly to Waters of U.S. (e.g. , river, lake, creek, stream, or to a pipe/channel that flows without inflow from other sources between site and water body etc.)

V. IMPLEMENTATION OF NPDES PERMIT REQUIREMENTS

A. STORM WATER POLLUTION PREVENTION PLAN (SWPPP) (mark one) ☐ A SWPPP has been prepared for this project and is available for review ☐ A SWPPP will be prepared and ready for review by (date): ___/___/___ B. Date WQMP approved by MS4 Permittee: ___/___/___ ☐ Not Applicable.	C. MONITORING PROGRAM (MP) (mark one) ☐ A MP has been prepared for this facility and is available for review ☐ A MP will be prepared and ready for review by (date): ___/___/___

VI. CERTIFICATIONS

"I certify under penalty of law that this document and all attachments were prepared under my direction and supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine or imprisonment. In addition, I certify that Order No. R8-2010-0033; (specifically Sections XII.F., XIV, XVI, and XX), including the development and implementation of a Storm Water Pollution Prevention Plan and a Monitoring Program Plan, will be complied with."

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD – SANTA ANA REGION

NOTICE OF TERMINATION

OF COVERAGE UNDER THE RIVERSIDE COUNTY MUNICIPAL STORMWATER PERMIT
FOR STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITY

ORDER No. R8-2010-0033 (NPDES No. CAS618033)

I. WDID No. _____

II. OWNER

Name	Contact Person		
Mailing Address	Title		
City	State	Zip	Phone ( ) – Fax ( ) – Email:

III. SITE INFORMATION

A. Original Project Title	Site Address			
City/Unincorporated Area	State CA	Zip	Site Contact Person	
B. Contractor Name	Phone ( ) – Fax ( ) – Email:		Title	
Local Mailing Address	City		State	Zip
Qualified SWPPP Practitioner	Phone ( ) – Fax ( ) – Email:			

IV. BASIS OF TERMINATION

__ 1. The construction project is completed and the following conditions have been met.

- ☐ All elements of the Storm Water Pollution Prevention Plan have been completed.
- ☐ Construction materials and waste have been disposed of properly.
- ☐ The site is in compliance with all local storm water management requirements.
- ☐ A post-construction storm water operation and management plan is in place (Attach a description of the post construction BMPs, the location (Latitude /Longitude), and a map of the locations of the post construction BMPs).
- ☐ Date field verification inspection performed and include a copy of the field verification report. ___/___/___

__ 2. Construction activities have been suspended; either temporarily ____ or indefinitely ___ and the following conditions have been met.

- ☐ All elements of the Storm Water Pollution Prevention Plan have been completed.
- ☐ Construction materials and waste have been disposed of properly.
- ☐ The site is permanently stabilized (greater than 3 years without maintenance).
- ☐ The site is in compliance with all local storm water management requirements.

Date of suspension ____ / ____ / ____ Expected start up date ____ / ____ / ____

V. CERTIFICATION

I certify under penalty of law that all storm water discharges associated with construction activity from the identified site that are authorized by NPDES General Permit No. CAS000002 have been eliminated or that I am no longer the owner of the site. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge storm water associated with construction activity under the General Permit, and that discharging pollutants in storm water associated with construction activity to Waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this Notice of Termination does not release an owner of liability for any violation of the General Permit or the Clean Water Act.

State of California

California Regional Water Quality Control Board

Santa Ana Region

3737 Main Street, Suite 500

Riverside, CA 92501- 3348

FACT SHEET

January 29, 2010

ITEM: 09

SUBJECT: Waste Discharge Requirements for the Riverside County Flood Control and Water Conservation District, the County of Riverside, and the Incorporated Cities of Riverside County within the Santa Ana Region, Urban Runoff Management Program, Order No. R8-2010-0033 (NPDES No. CAS 618033)

I. INTRODUCTION

A. PROJECT

The attached pages contain information concerning an application for renewal of Waste Discharge Requirements and a National Pollutant Discharge Elimination System (NPDES) permit, Order No. R8-2010-0033 (Order), NPDES No. CAS 618033, which prescribes Waste Discharge Requirements for Urban Runoff (as defined in Appendix 4) from the cities and the unincorporated areas in Riverside County within the jurisdiction of the Santa Ana Regional Board Water Quality Control Board (Regional Board). This Order regulates discharges of Urban Runoff from the Permit Area, as defined in Order No. R8-2010-0033 and shown in Appendix 1.

If appropriate Pollution control measures are not implemented, Urban Runoff, (as defined in Appendix 4 – Glossary), may contain pathogens (bacteria, protozoa, viruses), sediment, trash, fertilizers (nutrients, mostly nitrogen and phosphorus compounds), oxygen-demanding substances (decaying matter), pesticides (DDT, chlordane, diazinon, chlorpyrifos), heavy metals (cadmium, chromium, copper, lead, zinc), and petroleum products (oil & grease, PAHs, petroleum hydrocarbons).

If not properly managed and controlled, urbanization may change the stream hydrology and increase Pollutant loading to Receiving Waters. As a watershed undergoes urbanization, pervious surface area decreases, runoff volume and velocity may increase, riparian habitats and wetland habitats decrease, the frequency and severity of flooding may increase, and Pollutant loading may increase. Most of these impacts occur due to human activities (Anthropogenic) that occur during and/or after urbanization. The Pollutants and hydrologic changes may

cause declines in aquatic resources, cause toxicity to aquatic organisms, and impact human health and the environment. Based on information provided in Section D of the Riverside County Flood Control and Water Conservation District's (RCFC&WCD or the Principal Permittee as context indicates) Hydrology Manual, it is feasible that, in semi-arid regions, development may result in the creation of a net increase in absorption.

Properly planned high-density development may reduce urban sprawl and problems associated with sprawl. Urban in-fill and high-density development are elements of smart growth, which creates the opportunity to maintain relatively natural open space elsewhere in the Permit Area (see Appendix 4). The goal of Low Impact Development (LID) is to mimic pre-development runoff quality and quantity.

On April 27, 2007, The RCFC&WCD in cooperation with the County of Riverside (the County) and the incorporated cities of Beaumont, Calimesa, Canyon Lake, Corona, Hemet, Lake Elsinore, Moreno Valley, Murrieta, Norco, Perris, Riverside, and San Jacinto jointly submitted a NPDES Application No. CAS 618033, a Report of Waste Discharge (the ROWD) and a revised Drainage Area Management Plan (DAMP) to renew the Municipal Separate Storm Sewer System (MS4) NPDES permit for the Santa Ana River watershed (the Permit Area) within Riverside County. This Order renews the NPDES permit authorizing Urban Runoff in the Permit Area (see Appendix 1, "urban area" includes those portions of "agriculture" and "open space" that convert to industrial, commercial, or residential use during the term of this Order). To more effectively carry out the requirements of this Order, the Permittees have agreed that the RCFC&WCD will continue as the Principal Permittee and the County and the incorporated cities will continue as the Co-Permittees.

On February 5, 2008 Wildomar residents voted for cityhood and the City incorporated on July 1, 2008. Menifee residents voted for cityhood on June 3, 2008 and the City incorporated on October 1, 2008. On May 6, 2009, the City of Menifee and on May 5, 2009, the City of Wildomar submitted Letters of Intent to be a Co-Permittee in this Order and for the purposes of this Order shall be considered as such. The cities in the Permit Area, along with the County, are collectively referred to as the Co-Permittees, and collectively, with the Principal Permittee, the Permittees.

B. PROJECT AREA

The Permit Area contains 1,396 square miles or 19.1% of the 7,300 square miles within Riverside County and includes 15 of the 26 municipalities within Riverside County. The California Department of Finance estimates that as of January 1,

2006, the population of Riverside County is 1,953,330 of which 1,237,388[1] reside within the Permit Area. The California Department of Finance estimates that as of January 1, 2009, the population of Riverside County was 2,107,653[2]. Beaumont, Calimesa, and Canyon Lake have populations of 25,000 or less. The County, Corona, Moreno Valley and Riverside have populations of 100,000 or more. The Southern California Association of Governments estimates that the County of Riverside will grow by 16% between 2006 and 2010 (2008 RTP Growth Forecast by City). The most significant percentage growth in population between 2006 and 2010 occurred in the Cities of Beaumont, Calimesa, and San Jacinto.

Land uses in Riverside County within the Santa Ana River Region include open space, residential, commercial, light industrial, heavy industrial, and agriculture. The agricultural land uses include row crops, nurseries, citrus groves and vineyards, dairies, ranches, poultry and hog farms, and other agricultural related uses with one single-family residence allowed per 10 acres (County of Riverside General Plan, Land Use Element 2003). The conversion of agricultural lands and open space to other "developed" land uses has been ongoing and will continue. Based on Riverside County Assessor's Parcel Data as of February 2006, the land use mix of the County area within the Santa Ana Region was: 29,441 acres used or zoned for commercial/industrial purposes (3.3%), 70,499 acres for residential purposes (7.9%), 11,798 acres utilized for improved streets and roads (1.3%), 9,872 acres are used for parks and recreational facilities (1.1%), 70,164 acres are used for rural residential (7.9%), 453,976 acres are utilized for open space (50.8%), and 48,627 acres are used for agricultural purposes (5.4%). The federal, state, tribal, and non-Permittee jurisdictional lands within the portion of Riverside County within the Santa Ana Region total 199,064 acres (22.3%).

Less than one fifth (1/5) of Riverside County is within the Permit Area. The Permit Area includes the "urban area" as shown in Appendix 1 and those portions of "agriculture" and "open space" as shown on Appendix 1 that do convert to industrial, commercial or residential use during the term of this Order. The Permit Area is delineated by the San Bernardino-Riverside County boundary line on the north and northwest, the Orange-Riverside County boundary line on the west, the Santa Ana-San Diego Regional Board boundary line on the south, and the Santa Ana-Colorado River Basin Regional Board boundary line on the east. Sixty-seven percent of Riverside County's population resides within the Regional Board's jurisdiction. The San Diego and the Colorado River Basin Regional Water Quality Control Boards regulate Urban Runoff from those portions of Riverside County outside of the Permit Area shown in Appendix 1.

[1] As per Section 3.3.1 of the 2007 ROWD, (Western Riverside Council of Governments (WRCOG), excluding the cities of Menifee and Wildomar

[2] E-1 report dated April 30, 2009 (http://www.dof.ca.gov/research/demographic/reports/estimates/e-1/2008-09/documents/E-1_2009%20Press%20Release.pdf).

C. CLEAN WATER ACT REQUIREMENTS

The federal Clean Water Act (the "CWA") established a national policy designed to help maintain and restore the physical, chemical and biological integrity of the nation's waters. In 1972, the CWA established the NPDES permit program to regulate the discharge of Pollutants from Point Sources to "Waters of the U.S.". From 1972 to 1987, the main focus of the NPDES program was to regulate conventional Pollutant sources such as sewage treatment plants and industrial facilities. As a result, on a nationwide basis, non-point sources, including agricultural runoff and Urban Runoff, now contribute a larger portion of many kinds of Pollutants than the more thoroughly regulated sewage treatment plants and industrial facilities.

The National Urban Runoff Program (NURP) final report to the Congress (USEPA, 1983) concluded that the goals of the CWA could not be achieved without addressing Urban Runoff discharges. The 1987 CWA amendments established a framework for regulating Urban Runoff. Pursuant to these amendments, the Santa Ana Regional Board began regulating discharges from MS4s in 1990.

II. REGULATORY BACKGROUND AND CLEAN WATER ACT REQUIREMENTS

As water flows over streets, parking lots, construction sites, and industrial, commercial, residential, and municipal areas, it may intercept Pollutants from these areas and transport them to Waters of the U.S.. As indicated in I.A, above, Urban Runoff may contain pathogens, sediment, trash, fertilizers, oxygen-demanding substances, pesticides, heavy metals, and petroleum products. If not properly managed and controlled, urbanization may adversely impact water quality and quantity in the receiving waters.

However, urban development projects that incorporate LID concepts may reduce the impact of urban development on runoff water quality and quantity.

Studies[3] conducted in the Southern California area have established storm water runoff from urban areas as significant sources of Pollutants in surface waters. The Santa Ana River is impacted by agricultural, other discharges and Urban Runoff as it flows through the San Bernardino County and Riverside County areas prior to flowing through Orange County and into the Pacific Ocean.

If not properly controlled, Urban Runoff could be a significant source of Pollutants in the Waters of the U.S. Table 1 includes a list of Pollutants, potential sources, and some of the adverse environmental consequences mostly resulting from urbanization.

[3] Bay, S., Jones, B. H. and Schiff, K, 1999, Study of the Impact of Stormwater Discharge on Santa Monica Bay. Sea Grant Program, University of Southern California; and Haile, R.W., et al., 1996, An Epidemiological Study of Possible Adverse Health Effects of Swimming in Santa Monica Bay. Southern California Coastal Water Research Project (1992), Surface Runoff to the Southern California Bight.

Table 1[4]
Pollutant Sources and Impacts of a Number of Pollutants On Waters of the U.S.

Pollutants	Sources	Effects and Trends
Toxins (e.g., biocides, PCBs, trace metals, heavy metals)	Industrial and municipal wastewater; runoff from farms, forests, urban areas, and landfills; erosion of contaminated soils and sediments; vessels; atmospheric deposition	Poison and cause disease and reproductive failure; fat-soluble toxins may bioconcentrate, particularly in birds and mammals, and pose human health risks. Inputs into Waters of the U.S. have declined, but remaining inputs and contaminated sediments in urban and industrial areas pose threats to living resources.
Pesticides (DDT, diazinon, chlorpyrifos)	Urban Runoff, agricultural runoff, commercial, industrial, residential and farm use	The use of legacy pesticides (DDT, chlordane, dieldrin) has been banned or restricted; still persists in the environment; some of the other pesticide uses are curtailed or restricted.
Biostimulants (organic wastes, plant nutrients)	Sewage and industrial wastes; runoff from farms and urban areas; nitrogen from combustion of fossil fuels	Organic wastes overload bottom habitats and deplete oxygen; nutrient inputs stimulate algal blooms (some harmful), which reduce water clarity, and alter food chains supporting fisheries. While organic waste loading has decreased, nutrient loading has increased (NRC, 1993a, 2000a).
Petroleum products (oil, grease, petroleum hydrocarbons, PAHs)	Urban Runoff and atmospheric deposition from land activities; accidental spills; oil & gas production activities; natural seepage; and PAHs from internal combustion engines	Petroleum hydrocarbons can affect bottom organisms and larvae; spills affect birds, mammals and aquatic life. While oil Pollution from accidental spills and production activities has decreased, diffuse inputs from land-based activities have not (NRC, 1985).
Radioactive isotopes	Atmospheric fallout, industrial and military activities	Bioaccumulation may pose human health risks where contamination is heavy.
Sediments	Erosion from farming, construction activities, forestry, mining, development; river diversions; coastal dredging and mining	Reduce water clarity and change bottom habitats; carry toxins and nutrients; clog fish gills and interfere with respiration in aquatic fauna. Sediment delivery by many rivers has decreased, but sedimentation poses problems in some areas.
Plastics and other debris	Ships, boats, fishing nets, containers, trash, Urban Runoff	Entangles aquatic life or is ingested; degrades, beaches, lake shores, near shore habitats, and wetland habitats. Floatables (from trash) are an aesthetic Nuisance and can be a substrate for algae and insect vectors.
Thermal	Cooling water from power plants and industry, urban run off from impervious surfaces	Kills some temperature-sensitive species; and displaces others. Generally, less a risk to marine life than thought 20 years ago.
Noise	Vessel propulsion, sonar, seismic prospecting, low-frequency sound used in defense and research	May disturb marine mammals and other organisms that use sound for communication.
Pathogens (bacteria, protozoa, viruses)	Sewage, Urban Runoff, livestock, wildlife, and discharges from boats and cruise ships.	Pose health risks to swimmers and consumers of aquatic life. Sanitation has improved, but standards have been raised (NRC 1999a).
Alien species	Ships and ballast water, fishery stocking, aquarists	Displace native species, introduce new diseases; growing worldwide problem (NRC 1996).

[4] Adapted from "Marine Pollution in the United States" prepared for the Pew Oceans Commission, 2001.

The CWA prohibits the discharge of any Pollutant to navigable waters from a Point Source unless an NPDES permit authorizes the discharge. Efforts to improve water quality under the NPDES program traditionally and primarily focused on reducing Pollutants in discharges of industrial process wastewater and municipal sewage. The 1987 amendments to the CWA required MS4s and industrial facilities, including construction sites, to obtain NPDES permits for storm water runoff from their facilities. On November 16, 1990, the USEPA promulgated the final NPDES Phase I storm water regulations. The storm water regulations are contained in 40 CFR Parts 122, 123 and 124.This Order does not constitute an unfunded local government mandate subject to subvention under Article XIIIB, Section (6) of the California Constitution for several reasons, including, but not limited to, the following. First, this Order implements federally mandated requirements under federal Clean Water Act section 402, subdivision (p)(3)(B). (33 U.S.C. § 1342(p)(3)(B).) This includes federal requirements to effectively prohibit non-storm water discharges, to reduce the discharge of pollutants to the maximum extent practicable, and to include such other provisions as the Administrator or the State determines appropriate for the control of such pollutants. Federal cases have held these provisions require the development of permits and permit provisions on a case-by-case basis to satisfy federal requirements. (*Natural Resources Defense Council, Inc. v. U.S.E.P.A.* (9th Cir. 1992) 966 F.2d 1292, 1308, fn.17). The authority exercised under this Order is not reserved state authority under the Clean Water Act's savings clause (*cf. Burbank v. State Water Resources Control Bd.* (2005) 35 Cal.4th 613, 627-628 [relying on 33 U.S.C. § 1370, which allows a state to develop requirements which are not "less stringent" than federal requirements]), but instead, is part of a federal mandate to develop pollutant reduction requirements for municipal separate storm sewer systems. To this extent, it is entirely federal authority that forms the legal basis to establish the permit provisions. (See, *City of Rancho Cucamonga v. Regional Water Quality Control Bd.-Santa Ana Region* (2006) 135 Cal.App.4th 1377, 1389; *Building Industry Ass'n of San Diego County v. State Water Resources Control Bd.* (2004) 124 Cal.App.4th 866, 882-883.)

Likewise, the provisions of this Order to implement total maximum daily loads (TMDLs) are federal mandates. The federal Clean Water Act requires TMDLs to be developed for water bodies that do not meet federal water quality standards. (33 U.S.C. § 1313(d).) Once the U.S. Environmental Protection Agency or a state develops a TMDL, federal law requires that permits must contain effluent limitations consistent with the assumptions of any applicable wasteload allocation. (40 C.F.R. § 122.44(d)(1)(vii)(B).)

Second, the local agency permittees' obligations under this Order are similar to, and in many respects less stringent than, the obligations of non-governmental dischargers who are issued NPDES permits for storm water discharges. With a few inapplicable exceptions, the Clean Water Act regulates the discharge of pollutants from point sources (33 U.S.C. § 1342) and the Porter-Cologne regulates the

discharge of waste (Wat. Code, § 13263), both without regard to the source of the pollutant or waste. As a result, the "costs incurred by local agencies" to protect water quality reflect an overarching regulatory scheme that places similar requirements on governmental and nongovernmental dischargers. (See *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 57-58 [finding comprehensive workers compensation scheme did not create a cost for local agencies that was subject to state subvention].)

The Clean Water Act and the Porter-Cologne Water Quality Control Act largely regulate storm water with an even hand, but to the extent there is any relaxation of this even-handed regulation, it is in favor of the local agencies. Except for municipal separate storm sewer systems, the Clean Water Act requires point source dischargers, including discharges of storm water associated with industrial or construction activity, to comply strictly with water quality standards. (33 U.S.C. § 1311(b)(1)(C), *Defenders of Wildlife v. Browner* (1999) 191 F.3d 1159, 1164-1165 [noting that industrial storm water discharges must strictly comply with water quality standards].) As discussed in prior State Water Resources Control Board decisions, this Order does not require strict compliance with water quality standards. (SWRCB Order No. WQ 2001-15, p. 7.) The Order, therefore, regulates the discharge of waste in municipal storm water more leniently than the discharge of waste from non-governmental sources.

Third, the local agency permittees have the authority to levy service charges, fees, or assessments sufficient to pay for compliance with this Order. The fact sheet demonstrates that numerous activities contribute to the pollutant loading in the municipal separate storm sewer system. Local agencies can levy service charges, fees, or assessments on these activities, independent of real property ownership. (See, e.g., *Apartment Ass'n of Los Angeles County, Inc. v. City of Los Angeles* (2001) 24 Cal.4th 830, 842 [upholding inspection fees associated with renting property].) The ability of a local agency to defray the cost of a program without raising taxes indicates that a program does not entail a cost subject to subvention. (*County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487-488.)

Fourth, the Permittees have requested permit coverage in lieu of compliance with the complete prohibition against the discharge of pollutants contained in federal Clean Water Act section 301, subdivision (a) (33 U.S.C. § 1311(a)) and in lieu of numeric restrictions on their discharges. To the extent, the local agencies have voluntarily availed themselves of the permit, the program is not a state mandate. (Accord *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 107-108.) Likewise, the Permittees have voluntarily sought a program-based municipal storm water permit in lieu of a numeric limits approach. (See *City of Abilene v. U.S. E.P.A.* (5th Cir. 2003) 325 F.3d 657, 662-663 [noting that municipalities can choose between a management permit or a permit with numeric limits].) The local agencies' voluntary decision to file a report of waste discharge proposing a program-based

permit is a voluntary decision not subject to subvention. (See *Environmental Defense Center v. USEPA* (9th Cir. 2003) 344 F.3d 832, 845-848.)

Fifth, the local agencies' responsibility for preventing discharges of waste that can create conditions of pollution or nuisance from conveyances that are within their ownership or control under state law predates the enactment of Article XIIIB, Section (6) of the California Constitution.

On July 13, 1990, the Regional Board adopted the first term Riverside County Area-wide MS4 Permit, Order No. 90-104 (NPDES No. CA 8000192), for Urban Runoff from areas in Riverside County within the Permit Area. On March 8, 1996, the Regional Board renewed Order No. 90-104 by adopting the second term area-wide MS4 Permit, Order No. 96-30, (NPDES No. CAS618033). On October 25, 2002, the Regional Board renewed Order No. 96-30 by adopting the third term area-wide MS4 Permit, Order No. R8-2002-0011.

This Order renews the area-wide NPDES MS4 Permit for the Permit Area for the fourth-term, in accordance with Section 402 (p) of the CWA and all requirements applicable to an NPDES permit issued under the issuing authority's discretionary authority. The requirements included in this Order are consistent with the CWA, the federal regulations governing urban storm water discharges, the Water Quality Control Plan for the Santa Ana River Basin (Basin Plan), the California Water Code, and the State Water Resources Control Board's (State Board) Plans and Policies.

The Basin Plan is the basis for the Regional Board's regulatory programs. The Basin Plan was developed and is periodically reviewed and updated in accordance with relevant federal and state law and regulation, including the CWA and the California Water Code. As required, the Basin Plan designates the Beneficial Uses of the waters of the Region and specifies Water Quality Objectives intended to protect those uses. (Beneficial Uses and Water Quality Objectives, together with an anti-degradation policy, comprise federal "Water Quality Standard"). The Basin Plan also specifies an implementation plan, which includes certain discharge prohibitions. In general, the Basin Plan makes no distinctions between wet and dry weather conditions in designating Beneficial Uses and setting Water Quality Objectives, i.e., the Beneficial Uses, and correspondingly, the Water Quality Objectives are assumed to apply year-round. (Note: In some cases, Beneficial Uses for certain surface waters are designated as "I", or intermittent, in recognition of the fact that surface flows (and Beneficial Uses) may be present only during wet weather.) Most Beneficial Uses and Water Quality Objectives were established in the 1971, 1975, 1983, and 1995 Basin Plans. The 1995 Basin Plan was updated in February 2008[5]. Amendments to the Basin Plan included new nitrate-nitrogen and TDS objectives for specified

[5] http://www.waterboards.ca.gov/santaana/water_issues/programs/basin_plan/index.shtml

management zones, new nitrogen and TDS management strategies applicable to both surface and ground waters and various Total Maximum Daily Loads (TMDLs) and TMDL Implementation Plans that had been adopted for Impaired Waterbodies within the region.

Water Code Section 13241 requires that certain factors must be considered when Water Quality Objectives are established. These factors include economics and the need for developing housing in the Region. During the 2002 MS4 Permit development process, the Permittees raised an issue regarding compliance with Section 13241 of the California Water Code with respect to Water Quality Objectives for wet weather conditions, specifically the cost of achieving compliance during wet weather conditions and the need for developing housing within the Region and its impact on Urban Runoff. During the 2006 review of the Basin Plan, this matter was incorporated on the triennial review list. To begin addressing this issue, Regional Board staff, in collaboration with the MS4 Permittees in the Santa Ana River watershed, has organized a Storm Water Quality Standards Task Force (SWQSTF).

The SWQSTF is analyzing, monitoring and documenting actual and potential Beneficial Uses of surface waters within the Santa Ana River watershed. Based on the findings, the SWQSTF plans to recommend changes to the current Beneficial Use designations and Water Quality Objectives specified in the Basin Plan. This Order may be reopened to incorporate any changes to the Water Quality Standards. The SWQSTF is currently focusing on Recreational Beneficial Uses. In the meantime, the provisions of this Order will result in reasonable further progress towards the attainment of the existing Water Quality Objectives, in accordance with the discretion in the permitting authority recognized by the United States Court of Appeals for the Ninth Circuit in Defenders of Wildlife vs. Browner, 191 F.3d 1159, 1164 (9th Cir. 1999).

III. EXCLUSIONS TO THE PERMIT AREA

Areas of the County not addressed or which are excluded by the storm water regulations and areas not under the jurisdiction of the Permittees were excluded from the area requested for coverage under the ROWD. These include the following areas and activities:

- Federal lands and State properties, including, but not limited to, military bases, national forests, hospitals, colleges and universities, and highways;
- Native American tribal lands;
- Open space and rural (non-urbanized) areas;

- Agricultural lands (return flows from irrigated agriculture and nonpoint source agricultural activities are exempted under the CWA); and

- Utilities, railroads, and special districts (including school districts, park districts, publicly owned treatment works (POTWs) and water utilities, etc.).

These areas in the Permit Area for which coverage under a NPDES MS4 permit is excluded, are shown in Appendix 1. The Regional Board will coordinate with these entities to implement programs that are consistent with the requirements of this Order. The Regional Board, pursuant to 40 CFR 122.26(a), has the discretion and authority to require non-cooperating entities to participate in this Order. The Regional Board may also consider such facilities for coverage under its NPDES permitting scheme pursuant to USEPA Phase II stormwater regulations.

The Regional Board recognizes that the Permittees should not be held responsible for discharges from such facilities or Pollutants in those discharges. However, to the extent that the Permittees authorize the connection of the discharges from these facilities into their MS4, this Order requires the Permittees to notify these facilities, in writing, of the state and local post-construction standards and/or other applicable requirements of this Order.

IV. BENEFICIAL USES

Stormwater flows discharged to MS4s in the Permit Area are tributary to various waterbodies (inland surface streams, lakes and reservoirs) of the State. The Beneficial Uses of these waterbodies may include municipal and domestic supply, agricultural supply, industrial service and process supply, groundwater recharge, water contact recreation, non-contact water recreation, and sport fishing, warm freshwater habitat, cold freshwater habitat, preservation of biological habitats of special significance, wildlife habitat and preservation of rare, threatened or endangered species. The ultimate goal of this Order is to protect the Beneficial Uses and quality of the Receiving Waters.

To protect the Beneficial Uses of the Receiving Waters, the Pollutants from all sources, including Urban Runoff, need to be controlled. Recognizing this, and the fact that Urban Runoff contains Pollutants, an area-wide MS4 permit is the most effective way to develop and implement a comprehensive Urban Runoff management program in a timely manner. This area-wide MS4 permit contains requirements with time schedules that will allow the Permittees to continue to address water quality problems caused by Urban Runoff through their management programs to reduce Pollutants in Urban Runoff discharges consistent with the MEP standard [See Appendix 4, Glossary].

V. WATERSHED MANAGEMENT IN THE UPPER SANTA ANA RIVER BASIN

A. Management Approach

To regulate and control Urban Runoff from the Permit Area to the MS4, an area-wide approach is expected to be most effective. The entire MS4 is not controlled by a single entity; the RCFC&WCD, the County, several cities, the State Department of Transportation (Caltrans), and the U.S. Army Corps of Engineers, in addition to other smaller entities, manage portions of the MS4. In addition to the cities, the County and the RCFC&WCD, there are a number of other significant contributors of Urban Runoff to the MS4. These include: large institutions such as the State university system, prisons, schools, hospitals, etc.; federal facilities such as military sites, etc.; State agencies, such as Caltrans; water and wastewater management agencies such as Eastern and Western Municipal Water District; the National Forest Service and State parks. The State Board has issued a separate NPDES MS4 permit to Caltrans. In addition, Caltrans, and the other contributors identified, are not under the jurisdiction of the Permittees. The management and control of the entire MS4 cannot be effectively carried out without the cooperation and efforts of all these entities. Also, it would not be effective to issue a separate MS4 permit to each of the entities within the Permit Area whose land/facilities drain into the MS4 facilities operated by the Permittees and ultimately to Waters of the U.S.. The Regional Board has concluded that the best management option for the Permit Area is to issue an area-wide NPDES MS4 permit to the Permittees.

Although, the Urban Runoff from the Permit Area drains to the Prado Basin, and ultimately into Orange County, Urban Runoff from Orange County areas are regulated under NPDES No. CAS 618030. Some areas within Riverside County are within the Colorado River Basin and San Diego Regional Boards' jurisdictions. Permit requirements for Urban Runoff from the drainage areas of Riverside County within the jurisdiction of the San Diego and Colorado River Basin Regional Boards are addressed by those Regional Boards.

In developing Urban Runoff management and monitoring programs, consultation/coordination with other drainage management entities and other Regional Boards is essential. Common programs, reports, implementation schedules and efforts are desirable and will be utilized to the MEP.

Cooperation and coordination among all the stakeholders are essential for efficient and economical management of the Santa Ana River watershed. It is also critical to manage Non-point Sources at a level consistent with the management of Urban Runoff in a watershed in order to successfully prevent or remedy water quality Impairment. Regional Board staff will facilitate coordination of monitoring and management programs among the various stakeholders.

An integrated watershed management approach for Urban Runoff in the Santa Ana River watershed is consistent with the Strategic Plan (2008-2012[6]) and Initiatives for the State and Regional Boards and the draft California Water Plan Update[7]. A watershed wide approach is also necessary for implementation of the Load Allocations (LAs) and Waste Load Allocations (WLAs) developed under the TMDL process. The Permittees and all the affected entities are encouraged to participate in regional or watershed solutions, instead of project-specific and fragmented solutions.

The Pollutants in Urban Runoff originate from multiple sources and effective control of these Pollutants requires a cooperative effort of all the stakeholders and many regulatory agencies. Every stage of urbanization should be considered in developing appropriate Urban Runoff Pollution control methodologies. The program's success depends upon consideration of Pollution control techniques during planning, construction and post-construction operations. At each stage, appropriate Pollution Prevention , Site Design , Source Control, and, if necessary, Treatment Control BMPs should be considered.

B. SUB-WATERSHEDS AND MAJOR CHALLENGES

The Santa Ana River watershed is the major watershed within the Santa Ana Region. This watershed is divided into three sub-watersheds: the Lower Santa Ana, Upper Santa Ana, and San Jacinto.

1. The lower Santa Ana River sub-watershed (downstream from Prado Basin) includes the north half of Orange County. The Upper Santa Ana River sub-watershed includes the southwestern corner of San Bernardino County and the northwestern corner of Riverside County. The San Jacinto sub-watershed includes the northwest corner of Riverside County south of the Upper Santa Ana River sub-watershed within the Santa Ana Region.

   Generally, the San Bernardino County drainage areas drain to the Riverside County drainage areas, and Riverside County drainage areas discharge to Orange County through Prado Dam on the Santa Ana River. Most of the flow in the Santa Ana River is recharged into the groundwater in San Bernardino, Riverside, and Orange counties but infrequently some of the flow may be discharged to the Pacific Ocean as a result of heavy storm events.

   Water from rainfall and snow melt runoff, and surfacing ground water from various areas either discharge directly to the Santa Ana River or to watercourses tributary to the Santa Ana River. Other major rivers in the Permit Area include the San Jacinto River and Temescal Creek. The San

[6] State Water Resources Control Board, Strategic Plan Update, 2008-2012, September 2, 2008
[7] http://www.waterplan.water.ca.gov/docs/cwpu2009/1208prd/vol2/UrbanRunoff_PRD_09.pdf

Jacinto Mountain areas drain into the San Jacinto River, which discharges into Canyon Lake and then to Lake Elsinore. The San Jacinto River is ephemeral. Smaller storms tend to be fully captured by Canyon Lake, which the San Jacinto River drains into, with discharges from Canyon Lake to Lake Elsinore only occurring in larger events or wetter years. Any overflow from Lake Elsinore is tributary to Temescal Creek, which flows into the Santa Ana River at the Prado Flood Control Basin. Overflow from Lake Elsinore occurs infrequently, only once every 12 to 15 years.

2. Upper Santa Ana River Sub-watershed:

   a. Reach 3 of the Santa Ana River (Prado Dam to Mission Boulevard in Riverside): Pathogens are the Pollutant of Concern for Reach 3 based on adopted TMDLs and the 2006 303(d) list . With the adoption of the TMDL for Bacterial Indicators, the Basin Plan now contains schedules for achieving compliance with WLAs for Bacterial Indicators in the Middle Santa Ana River (MSAR) subwatershed.

   b. Reach 4 of the Santa Ana River: Reach 4 of the Santa Ana River is the portion of the River from Mission Boulevard Bridge in Riverside to the San Jacinto fault (Bunker Hill Dike) in San Bernardino. Reach 4 is also listed in the CWA Section 303(d) as an Impaired Waterbody. Most of Reach 4 of the River is in San Bernardino County. Pathogens are the Pollutant of Concern for Reach 4and a TMDL is scheduled for completion in 2019.

   c. Other water quality problems along this reach of the River include the buildup of total dissolved solids (TDS, dissolved salts or minerals) and nitrogen, largely in nitrate form. The buildup of TDS and nitrates can impact downstream Beneficial Uses, including groundwater recharge. The buildup of TDS and nitrate is mostly due to agricultural uses, including dairies and the application of fertilizers, municipal and industrial wastewater discharges, and reuse and recycling operations. A complex set of programs and policies are included in the Basin Plan to address this problem, including a water supply plan, a wastewater management plan, and a groundwater management plan. Other elements of the Basin Plan include the Non-point Source program and the storm water program. The Basin Plan identifies the Statewide General Permits and the MS4 permits as the regulatory tools for storm water management in the Basin. In light of the recently adopted Nitrogen-TDS objectives for certain management zones, this Order requires the Permittees to determine baseline concentration of these constituents in dry weather runoff, if any, from significant Outfall locations. The Order also includes Effluent Limitations for TDS and nitrates under dry weather conditions.

d. San Jacinto Sub-watershed: Canyon Lake and Lake Elsinore are in this watershed and are listed on the 2006 303(d) list for pathogens (Canyon Lake) and PCBs and unknown Toxicity (Lake Elsinore). Nutrient TMDLs have been developed for both Canyon Lake and Lake Elsinore. The Basin Plan contains schedules for achieving compliance with WLAs for nutrients in the San Jacinto sub-watershed (Canyon Lake/Lake Elsinore).

C. CWA SECTION 303(d) LIST AND TMDLS:

Pursuant to Section 303(b) of the CWA, the 2006 water quality assessment conducted by the Regional Board listed a number of waterbodies within the Region under Section 303(d) of the CWA as Impaired Waterbodies. These are waterbodies where Water Quality Objectives are being violated and it is presumed that the designated Beneficial Uses are not met. The sources of the Impairments include POTW discharges, and runoff from agricultural, open space and urban land uses. The Impaired Waterbodies in Riverside County within the Santa Ana Regional Board's jurisdiction are listed in Table 2. In addition, CWA Section 303(d) requires states to develop and submit to USEPA for approval a list of waterbodies that are not meeting Water Quality Standards and are not expected to attain these standards even with technology based controls. CWA Section 305(b) requires States to biennially prepare and submit to the USEPA for approval a report assessing statewide surface water quality.

Regional Board staff have reviewed and reevaluated all water quality monitoring and information, combined the CWA Section 305(b) Report with the Section 303(d) List of Impaired Waters and introduced the Proposed 2008 303(d)-305(b) Integrated Report that was adopted by the Regional Board on April 24, 2009. The additional Impaired Waterbodies that are on this list are also identified in Table 2. The Proposed 2008 303(d)-305(b) Integrated Report will not be effective until it has been approved by the State Board or the USEPA.

Federal regulations require that a TMDL be established for each 303(d) listed waterbody for each of the Pollutants causing Impairment. The TMDL is the total amount of the Pollutant that can be discharged without Impairing Water Quality Standards in the Receiving Water, i.e., Water Quality Objectives are met and the Beneficial Uses are protected. It is the sum of the individual WLAs for point source inputs, and LAs for Non-point Source inputs and natural background, with a margin of safety. The TMDLs are the basis for limitations established in Waste Discharge Requirements. TMDLs are being developed for all Pollutants identified in Table 2. The Permittees are required to revise their DAMP, at the direction of the Executive Officer, to incorporate TMDL Program Implementation Plans developed and approved pursuant to the process for the designation and implementation of TMDLs for Impaired Waterbodies.

For 303(d) listed waterbodies identified as potentially Impaired by Urban Runoff and without a TMDL, the Permittees are required to provide special protections such as requiring effective post-construction BMPs, enhanced training programs and developing targeted public outreach that would address the Pollutants of Concern.

This Order incorporates TMDLs that have been adopted for Bacterial Indicator in the MSAR watershed and for nutrients in the Lake Elsinore and Canyon Lake watersheds. On August 26, 2005, the Regional Board adopted Resolution No. R8-2005-001 amending the Basin Plan to incorporate Bacterial Indicator TMDL for MSAR watershed. On December 20, 2004, the Regional Board adopted resolution R8-2004-0037 amending the Basin Plan to incorporate the Lake Elsinore and Canyon Lake nutrient TMDLs. The stakeholders in these watersheds, including applicable Permittees, are collaborating in the development and implementation of the TMDLs.

This Order includes conditions necessary to implement the TMDLs already approved by the Regional Board as required by federal regulations at 40 CFR 122.44(d)(vii)(B). This Order incorporates the WLAs as Water Quality-Based Effluent Limitations (WQBEL) and requires Permittees to achieve the WLA for Urban Runoff through an iterative process of implementing BMPs. Failure to submit a TMDL Implementation Plan to the Regional Board or failure to implement the approved plan in a timely manner will be deemed to violate the conditions of this Order. The CWA requires the Permittees to have appropriate controls to reduce the discharge of Pollutants to the MEP, including management practices, control techniques and systems, design and engineering methods, and such other provisions as the Administrator or the State determines appropriate for the control of such Pollutants (33 USC 1342(p)(3)(B)). MEP is a dynamic performance standard and it evolves as the knowledge of Urban Runoff control measures increases. Permittees are required to monitor and report effectiveness of their BMPs with respect to Pollutant reduction goal(s) as one measure of progress toward reducing Pollutant loads from urban sources in accordance with the compliance schedules specified in the TMDL Implementation Plans. If on-going monitoring indicates that implemented BMPs are insufficient to assure compliance with the relevant Water Quality Standard(s), then the Permittees are required to develop and implement more effective BMPs for the controllable urban sources within their jurisdiction to the MEP. In addition, the Permittees are required to submit a revised Comprehensive TMDL Plan documenting the completion schedule for any additional and/or more effective BMPs and must execute the plan upon approval by the Executive Officer. Taken together, these permit conditions are consistent with the facts and assumptions specified in the TMDLs, including the TMDL Implementation Plans, and are expected to achieve compliance with the related WLAs.

Discharge specifications are included for de-minimus types of discharges from Permittee-owned or Permittee-operated facilities and activities and for TDS and total inorganic nitrogen for dry weather discharges.

Table 2

2006 CWA Section 303(d) Listed Waterbodies and April 24, 2009 Proposed 2008 Integrated Report of 305(b) and 303(d) List of Water Quality Limited Segments

WATERBODY	HYDRO UNIT	POLLUTANT/ STRESSOR	SOURCE	SIZE AFFECTED
Canyon Lake	802.120	Pathogens	Nonpoint Source	453 Acres
Lake Elsinore	802.310	Unknown Toxicity	Unknown Nonpoint Source	2431 Acres
		PCB's.	Unknown Nonpoint Source	2431 Acres
		Proposed for 2008 Sediment Toxicity	Unknown Point and/or Nonpoint Sources	2431 Acres
Lake Fulmor	802.210	Pathogens	Unknown Nonpoint Source	4.2 Acres
Santa Ana River, Reach 3	801.200	Pathogens	Unknownn Nonpoint Source	3 miles
		Proposed for 2008 Copper – Wet Season	Unknown Nonpoint Source	3 Miles
Temescal Creek Reach 1		Proposed for 2008 pH	Unknown	Unknown

VI. FIRST, SECOND, AND THIRD TERM PERMITS

1. STORM WATER POLLUTION CONTROL PROGRAMS AND POLICIES

1. Prior to USEPA's promulgation of the final regulations implementing the storm water requirements of the 1987 CWA amendments, the counties of Orange, Riverside and San Bernardino requested an area-wide NPDES permit for storm

water runoff for each of the county areas within the Regional Board's jurisdiction. On July 13, 1990, the Regional Board issued Order No. 90-104 to the Permittees (first term MS4 Permit). In 1996, the Regional Board adopted Order No. 96-30 for the Riverside County Permit Area (second term permit). On October 24, 2002, the Regional Board adopted Order No. R8-2002-0011 for the Riverside County Permit Area (third term MS4 Permit). These MS4 Permits included the following requirements:

a. Prohibited Non-storm Water discharges to the MS4s with certain exceptions.
b. Required the Permittees to develop and implement a DAMP to reduce Pollutants in Urban Runoff to the MEP.
c. Required the discharges from the MS4 to meet in Receiving Waters.
d. Required the Permittees to identify and eliminate IC/IDs to the MS4.
e. Required the Permittees to establish legal authority to enforce Storm Water Ordinances.
f. Required monitoring of dry weather flows, storm flows, and Receiving Water quality, and program assessment.
g. Required the Permittees to inventory, prioritize and inspect construction sites and industrial and commercial facilities based on threat to water quality.
h. Required the Permittees to develop a restaurant inspection program to address practices that may impact Urban Runoff quality such as oil and grease disposal, trash bin area management, parking lot cleaning, spill clean-up, and inspection of grease traps or interceptors to ensure adequate capacity and proper maintenance.
i. Required the Permittees to review and approve Water Quality Management Plans (WQMPs) for categories of New Development and Significant Redevelopment projects to address post-development Urban Runoff water quality and Hydromodification.
j. Required the Permittees to develop a unified response plan to respond to sewage spills that may impact Receiving Water quality.

2. During the first term MS4 Permit, the Permittees developed a DAMP that was approved by the Executive Officer on January 18, 1994. The DAMP included five BMP groups: environmental education activities, solid waste activities, road drainage system operations and maintenance, regulatory and enforcement activities, and structural controls. The DAMP was updated as part of the second and third-term MS4 Permits. The Permittees submitted a revised DAMP with the ROWD for the fourth term MS4 Permit renewal.

3. The RCFC&WCD performs water quality monitoring activities in support of three separate area-wide NPDES MS4 Permits (Santa Ana, San Diego and Colorado River Basin) under the Consolidated Monitoring Program (CMP). The CMP

contains a combined 132 historical, active, and special project sampling locations in the three MS4 Permit regions. Within the Permit Area, water column samples and/or sediment samples have been collected at a total of 93 locations over the last nineteen years. These 93 locations are comprised of 45 MS4 outfalls, 43 Receiving Water, 8 sediment, and 2 special interest sampling locations. In addition, the Permittees participate in a number of sub-regional and regional monitoring programs and special studies.

4. During the third term MS4 Permit, the Executive Officer approved the delay in implementing the bioassessment requirement to allow the development of indices of biological integrity applicable to inland waters. Subsequently, a regional bioassessment monitoring was initiated by the Surface Water Ambient Monitoring Program (SWAMP) to determine the conditions of the receiving waters in a more holistic way. The Southern California Watershed Research Project (SCCWRP), in conjunction with the southern California MS4 Permit programs, has developed a regional bioassessment monitoring program in which the Permittees participating. This Order requires the Permittees to continue to participate in the regional bioassessment monitoring program. It is expected that these regional monitoring stations combined with other Permittee and regional monitoring efforts will be used to identify water quality problem areas and to re-evaluate the monitoring program and the effectiveness of the DAMP. The future direction of some of the DAMP program elements will depend upon the results of the ongoing studies and a holistic approach to watershed management.

5. Other elements of the Urban Runoff management program included identification and elimination of IC/IDs and establishment of adequate legal authority to control Pollutants in Urban Runoff discharges. The Permittees have completed a survey of their MS4 to identify IC/IDs and have adopted appropriate ordinances to establish legal authority. Some of the more specific achievements during the second and third term MS4 Permits are as follows:

   a. During the second term MS4 Permit, the Permittees operated under an Implementation Agreement that sets forth the responsibilities of the Permittees as defined in the 1996 MS4 Permit. The Permittees update this agreement during each MS4 Permit term. The Permittees have adopted Storm Water Ordinances regarding the management of Urban Runoff. The Storm Water Ordinances provide the Permittees with the legal authority to implement the requirements of the MS4 Permit and the key regulatory requirements contained in 40 CFR Section 122.26(d)(2)(I)(A-F).

   b. Revised DAMP: Includes 28 Construction Site and 36 Municipal and Industrial Source Control BMPs that are to be implemented by the Permittees for purposes of controlling Pollutants associated with Urban Runoff to the MEP. The Permittees also strengthened enforcement and compliance elements of the DAMP. Enhanced the Construction Site

inspections, the Industrial and Commercial Facility inspections, New Development review requirements, and the Permittee facilities and activities program.

c. Cooperated in the establishment of TMDL Task Forces and workgroups for Lake Elsinore, Canyon Lake and the MSAR.

d. Assisted in development and implementation of the TMDLs for Canyon Lake, Lake Elsinore and the MSAR.

e. Developed and updated methods to track program effectiveness such as resident surveys, tracking hotline inquiries, and web counters.

f. In August 1999 the RCFC&WCD and the County's Environmental Health Department executed an agreement that provides the framework for an area-wide Commercial and Industrial Compliance Assistance Program (CAP).

g. The Permittees have participated in the CMP.

h. The Permittees administered area-wide programs including: Hazardous Materials emergency response, household hazardous waste collection, industrial/commercial CAP and public education and outreach. Some of these programs were coordinated with Caltrans and local agencies.

i. A Municipal Facilities Strategy was established then later incorporated into the DAMP, the Supplement "A" New Development Guidelines were amended to require compliance with the Riverside County WQMP for specific categories of New Development and Significant Redevelopment projects.

j. The Riverside County WQMP was developed in 2004. The Model WQMP is a post-construction planning tool to address Urban Runoff from New Development and Significant Redevelopment. The WQMP is implemented on a watershed-specific level, and provides guidance for project specific post-construction BMPs to address the quantity and quality of Urban Runoff from New Development and Significant Redevelopment projects. Any New Development or Significant Redevelopment project that requires discretionary approval must submit a project-specific WQMP to the appropriate Permittee. The project-specific WQMP ensures that management of Urban Runoff to protect Receiving Water quality is considered a priority during project design and operation.

k. Established the Management Steering Committee that brings together the city managers in the Permit Area promoting consensus and communication on a regional basis.

l. Formation of sub-committees to guide and develop specific program elements (Construction Activities, Industrial/Commercial Activities, New Development/ Significant Redevelopment, Public Education, Permittee Facilities & Activities, Monitoring, & Finance).

m. Evaluated and revised ordinances, regulations, rules, and codes to ensure appropriate level of legal authority.

n. A Technical Advisory Committee for overall program development and implementation was established.

o. Program Review: A number of existing programs were reviewed to determine their effectiveness in combating Urban Runoff Pollution and to recommend alternatives and or improvements, including Permittee activities and facilities, IC/IDs to the MS4 systems, and existing monitoring programs.

p. Enhanced Public Education program through development of new outreach materials and programs.

q. Public Education: A number of steps were taken to educate the public, businesses, industries, and commercial establishments regarding their role in implementing Urban Runoff Pollution controls. The Industrial Facility dischargers were notified of the Urban Runoff regulatory requirements. For a number of unregulated activities, BMP guidance documents were developed and a toll free hotline was established for reporting any suspected water quality problems.

r. The Permittee's website hosted by RCFC&WCD, including the "Only Rain Down the Storm Drain" public information page, was developed and is continually enhanced. It contains resources for residential facilities, businesses, developers and contractors. The website is accessible from the RCFC&WCD home page. The website offers free brochures that all web site visitors can print in quantities or can order including:

  i. *After the Storm* – a citizen's guide to understanding MS4 Pollution in your neighborhood or when performing daily activities.

  ii. *Automotive Maintenance & Car Care* – guidelines for keeping your auto shop or retail fuel facility in environmental shape.

  iii. *Outdoor Cleaning Activities* – guideline for outdoor cleaning activities and wastewater disposal.

  iv. *Pools, Spas and Fountains* –Environmental maintenance suggestions for pool, spa, and fountain owners.

  v. *What's the Scoop* – tips for a healthy pet and a healthier environment.

  vi. *Household Hazardous Waste (HHW)* – A schedule of collection locations for proper disposal of HHW.

  vii. *Storm Water Pollution Found in Your Neighborhood* – door hanger.

s. In addition to the information provided on the Only Rain Down the Storm Drain website, the Public Education and Outreach Program has:

i. Tested and/or implemented several new Public Education and Outreach Program effectiveness tracking mechanisms including call tracking, web counters, testing, and surveys.

ii. Conducted a review of the efficacy of Permittee employee training programs.

iii. Enhanced the toll free storm water Pollution reporting hot line to include public education information and support for the public and other interested stakeholders.

iv. Enhanced on-line registration access for NPDES training to help facilitate training of appropriate Permittee employees.

v. Worked with the Riverside-Corona Resource Conservation District to develop home garden workshops and presentations to elementary and middle schools and staff to raise public awareness of Urban Runoff management issues and Source Control BMPs and to encourage volunteers, partners, and groups to gather annually for a trash and debris clean-up day along the Santa Ana River.

vi. Developed special newspaper and billing inserts, fliers and advertisements to raise public awareness of Urban Runoff management issues and Source Control BMPs. A radio advertising campaign was also developed and implemented for a limited time.

vii. Developed and presented workshops regarding household hazardous waste use and proper disposal at major home improvement stores throughout Riverside County.

viii. Placed numerous advertisements in the Penny Saver and Bargain Bulletin to raise public awareness of Urban Runoff management.

ix. In cooperation with certain County Service Areas and other programs, pet waste signs with bag dispensers have been installed at various parks to help encourage the proper disposal of animal waste.

x. Coordinated with County-wide Animal Control Facilities, as well as city-owned animal control facilities and Humane Societies, to distribute specific materials to the County Agricultural inspectors as well as Regional Board inspectors for use during facility inspections.

xi. Distributed educational and outreach materials to the County Agricultural inspectors as well as Santa Ana Regional Board staff inspectors for use during facility inspections.

xii. Cooperated with the Western Riverside Council of Government (WRCOG) in the Used Oil Block Cycle Grant that decreases the amount of illegally dumped motor oil by promoting the addition of new Certified Oil Collection Centers.

xiii. Participated in WRCOG's "Cleanest County in the West" program to address issues relating to litter and illegal dumping which targeted both students and adults.

xiv. Supplemental Environmental Projects: As a result of an environmental enforcement case settlement brought by the County Department of Environmental Health, Conoco Phillips and Downs Energy developed two posters and a billboard, respectively. These items were designed to increase the awareness of appropriate BMPs for retail fuel businesses.

t. Permittee Training: Training was provided to Permittee employees to implement New Development Guidelines and Public Works BMPs. The fourth-term MS4 Permit specifies additional training requirements to focus on necessary competencies for storm water program managers, Permittee planners and inspection staff. This was added following information collected during Regional Board staff audits of Permittees' storm water management programs, which found that a number of the Permittees' staff and/or contractors were not adequately trained to properly implement the required program elements contained within the third term MS4 Permit and/or training programs were not properly documented.

u. Related Activities: Modified MS4s by channel stabilization and creation of sediment basins; eliminated or permitted and documented Illicit Connections to the MS4s.

v. Pursued and received Proposition 50 Planning Grant to develop an Integrated Regional Watershed Management Plan for the San Jacinto watershed and to facilitate implementation of the Canyon Lake/Lake Elsinore Nutrient TMDL.

w. Pursued and received two Proposition 40 Integrated Regional Watershed Management Plan implementation grants to facilitate the MSAR TMDL and LE/CL TMDLs.

x. Co-Permittees developed and maintain an inventory database (or databases) of Construction Sites 1-acre or larger for which they have issued a building or grading permit. For each Construction Site/project included in a Co-Permittee's inventory, the Co-Permittees have assigned a priority of "high," "medium," or "low" to reflect the Construction Site's potential for Impairing Receiving Water quality.

y. Created databases for the Commercial and Industrial Facilities within each jurisdiction.

z. Developed a GIS Web Browser to assist developers and Permittees in identifying pertinent water quality information for proposed New Development projects.

aa. Developed Planning Application forms for Permittee use to ensure that the need for a project-specific WQMP was properly identified for New Development and Significant Redevelopment projects early in the planning process.

bb. Developed a FAQ and watershed Impairment maps to assist Permittees and developers with preparing and reviewing project-specific WQMPs.

cc. Enhanced online watershed maps to assist developers and the public with identifying areas tributary to Impaired Waterbodies.

dd. Developed a BMP design handbook to standardize BMP selection and design in Riverside County.

ee. Initiated development of an enhanced BMP Design Handbook to provide additional guidance for LID and post-construction BMP design.

ff. Participation in the Storm Water Monitoring Coalition (SMC) efforts to evaluate LID options and establish guidance for BMP implementation for Southern California areas.

gg. Participation in SCCWRP's Hydromodification studies to develop scientifically based design guidance for Southern California.

hh. Initiated cooperative program with County Environmental Health to promote environmental enhancement projects in lieu of fines for violations of environmental laws. This initiative resulted in the billboard advertising campaign to promote appropriate BMPs for gas stations and garages.

ii. Prepared a one-year evaluation of litter management BMPs. This evaluation assessed the relative efficiency and cost effectiveness of Anthropogenic litter management BMPs including: street sweeping, catch basin cleaning, deployment of trash receptacles, public education, and MS4 maintenance. As a result, a Litter Removal Inspection Form was developed that assisted the Permittees in identifying and prioritizing areas with litter problems. The Permittees augmented the litter management programs including employee/contractor training, Industrial and Commercial Facility inspections, recycling programs including bulk-item collection, participation in watershed clean-up efforts, and illegal dumping retrieval.

jj. The RCFC&WCD coordinated GIS-based maps for Permittee MS4 facilities. The MS4 maps are updated annually with new information provided by the Permittees as part of the Annual Reporting process. The GIS layers are also now available on the RCFC&WCD's website through an internet GIS browser.

kk. Updated Model Facilities Pollution Prevention Plan for Permittee facilities not requiring coverage under the General Permit for Storm Water Discharges Associated with Industrial Activities (General Industrial Permit).

ll. The Permittees completed a MS4 assessment in 2004 to identify opportunities for incorporation of regional BMP retrofits within the limits of existing infrastructure.

mm. Pursued a Proposition 13 Grant, through the Santa Ana Watershed Project Authority, to develop a LID BMP Demonstration and Testing Facility. RCFC&WCD has continued to develop this project and plans to start construction this winter despite the current freeze on new grant projects.

B. PRIOR TERM PERMITS - WATER QUALITY IMPROVEMENTS

An accurate and quantifiable measurement of the impact of the above stated Urban Runoff management programs is difficult, due to a variety of reasons, such as the variability in chemical water quality data, the incremental nature of BMP implementation, lack of baseline monitoring data, and the existence of some of the programs and policies prior to initiation of formal Urban Runoff management programs. There are generally two accepted methodologies for assessing water quality improvements: (1) conventional monitoring such as chemical-specific water quality monitoring; and (2) non-conventional monitoring, such as monitoring of the amount of HHW collected and disposed off at appropriate disposal sites, the amount of used oil collected, and the amount of Anthropogenic debris removed from the MS4, etc.

The Permittees' water quality monitoring data submitted to date document a number of exceedances of Basin Plan Water Quality Objectives for various Urban Runoff-related Pollutants; the most notable among these excceedances was fecal coliform bacteria. Where these exceedances have resulted in the development of TMDLs for the MSAR, this Order requires the Permittees named in the TMDL: to comply with the WLAs for Bacterial Indicators consistent with the Implementation Plan requirements defined in the MSAR Bacterial Indicator TMDL.

During the prior MS4 Permit terms, there was an increased focus on watershed management initiatives and coordination among the MS4 permittees in Orange, Riverside and San Bernardino Counties. These efforts resulted in a number of regional monitoring programs and other coordinated program and policy developments. The Principal Permittee continues to be an active participant in the SWQSTF, the Canyon Lake/Lake Elsinore nutrient TMDL, the MSAR Bacterial Indicator TMDL, and the SMC studies. In addition to the TMDL implementation and monitoring activities, the Permittees participate in the Regional Integrated Freshwater Bioassessment Monitoring Program, the BMP Effectiveness Project assessing the effectiveness of LID techniques. Riverside and San Bernardino MS4 Programs are also coordinating on the development of several outreach programs.

It is anticipated that with continued implementation of the revised DAMP, the programs proposed in the ROWD incorporated into this Order and other

requirements specified in this Order, the goals and objectives of the storm water regulations will be met, including protection of the Beneficial Uses of all Receiving Waters.

VII. FUTURE DIRECTION/2007 ROWD

A. Recognizing the significant resources utilized in developing the 2002 MS4 Permit and the significant commitment the Permittees are making to address water quality Impairments, including those identified in the 2006 303(d) List as high priority for establishment of TMDLs, the Permittees proposed in the 2007 ROWD to maintain the fundamental structure and content of the 2002 MS4 Permit and the 2005 DAMP with modifications to reflect:

1. Removed descriptions of studies that have been completed;
2. Updated references to related orders by the Regional Board and State Board;
3. Adoption of TMDL requirements;
4. Evolution of compliance programs;
5. Further standardization and definition of terms;
6. Consolidation of similar compliance requirements [training requirements, reporting requirements, IC/ID requirements] to simplify the Order, increase readability and prevent the need for duplicative language;
7. Deletion of requirements in the 2002 MS4 Permit that described the development of compliance program elements which were incorporated into the 2005 DAMP;
8. Development of LIPs by the Permittees during the fourth term Order;
9. Addition of Permittee coverage under the Small Linear Underground Projects (State Board Order No. 2003-0007-DWQ, NPDES No. CAS000005) and Utility Vaults (State Board Order No. 2006-0008-DWQ, NPDES No. CAG990002) General Permits;
10. Recognition that the Municipal Facilities Strategy and Enforcement Compliance Strategies have been incorporated into the DAMP; and
11. Regional Board staff comments received by the Permittees during the third term permit, including comments received during the January 22, 2007 ROWD kick-off meeting regarding topics such as LID, Hydromodification, LIPs, etc.

B. In addition, the 2007 ROWD proposed continuing with the 2005 DAMP with some revisions. Based on an effectiveness assessment analysis, the following significant changes were incorporated into the Permittees 2007 draft DAMP compliance programs:

1. The Permittees proposed to complete preparation of LIPs within 12 months of Order adoption. The Permittees propose to develop LIPs that will:
   a. Specify how each program element of the DAMP shall be implemented;
   b. Describe the ordinances, plans, policies, procedures, and tools (e.g., checklists, forms, educational materials, etc.) used to execute the DAMP;
   c. Identify the organizational units responsible for implementation of each program element;
   d. Establish internal reporting requirements to ensure and promote accountability; and
   e. Describe an adaptive method of evaluation and assessment of program effectiveness for the purpose of identifying program improvements.

2. The final report "BMP Siting Study for the Santa Ana Permit Area" was released in May 2005. The sites identified in this study are likely to be further evaluated for opportunities to implement Regional BMPs necessary to comply with existing and future TMDLs.

3. Proposed revisions to the 2002 MS4 Permit provisions to reflect the unified IC/ID reporting procedures currently contained within the DAMP for simplicity and clarity.

C. Regional Board Approach to Consolidation of Overlapping NPDES Permit Requirements

1. During the third term MS4 Permit, the Permittees reviewed the applicability of the General Permit-Small Linear Underground Projects (State Board Order No. 2003-0007-DWQ, NPDES No. CAS000005), the General Permit-De Minimus Discharges (Order No. R8-2003-0061 as amended by Order Nos. R8-2005-0041 and R8-2006-0004), and the General Permit-Utility Vaults (Order No. 2006-0008-DWQ, NPDES No. CAG990002) to their activities such as hydrant flushing, maintenance on potable water supply system(s), construction dewatering, and the short-term and intermittent discharges from the de-watering of utility vaults and underground structures. Since the DAMP incorporates BMPs for the activities covered by these general permits, the Permittees recommended separate coverage under the Small Linear Underground Projects, De Minimus Discharges, or Utility Vaults General Permits was not necessary. This Order now includes coverage for De Minimus discharges from Permittee-owned facilities and activities specifically excluded from coverage under the General Waste Discharge Requirements for Discharges to Surface Waters that Pose an Insignificant (De Minimus) Threat to Water Quality, NPDES NO. CAG998001, Order No. R8-2009-0003. Permittees shall continue to obtain separate coverage for activities covered

by the Small Linear Underground Projects and Utility Vaults General Permits, unless these permits are incorporated into the General Construction Permit.

2. Specific identification of the types of discharges that must have coverage under the General De Minimus Permit and the General Construction Permit, is included in Section 5 of the 2007 DAMP. This Order requires the Permittees to include a description of those de minimus discharges into the Permittees' LIP, including a Regional Board notification process.

3. Prioritized inspections and monitoring based on sampling and monitoring results and other metrics to help target activities that present the highest risk to water quality.

D. During the fourth term Order, the following revisions to the Public Education and Outreach Program will be priorities:

1. Continue coordination of public education outreach with adjacent MS4s.

2. Continue to evaluate and enhance outreach materials for IC/IDs, nutrients, fertilizers, and pesticides.

3. Continue to focus the Public Education and Outreach Program on the Pollutants causing the greatest impacts to water quality, determined by the monitoring results and the list of Impaired Waterbodies [303(d) list].

The Permittees have already taken several steps in this direction. For example, the Permittees have provided spray bottles with environmentally friendly pesticide recipes printed on the side to residents at community fairs; the Permittees have developed or are in the process of developing brochures for septic system management, landscape management, and gardening; the Riverside and San Bernardino County Permittees are coordinating on a Curiosity Quest Episode (KVCR Family Show) to promote BMPs for nutrients, fertilizers and pesticides and the Permittees place information in hardware and gardening stores regarding pesticide and fertilizer management. The Permittees also incorporate other materials to address general Pollutants of Concern.

E. As a result of continued program effectiveness assessment the Permittees propose to update Annual Reporting forms to incorporate specific reporting requirements for all effectiveness assessment metrics.

F. Enhanced online watershed maps to assist developers and the public with identifying areas tributary to Impaired Waterbodies.

G. WQMP

1. The Permittees committed to maintain the "Frequently Asked Questions" information sheet for New Development and Significant Redevelopment projects to assist with the development and implementation of the revised WQMP.

2. The Permittees committed to update the Riverside County Storm Water Quality Best Management Practice Design Handbook to (1) better incorporate LID design concepts, (2) incorporate guidance to describe how developments can offset Hydromodification impacts with LID and (3) incorporate additional design guidance to ensure maintainability and functionality of BMPs, throughout the life of the development. This Order further requires the Permittees to revise the WQMP consistent with the requirements of the Order.
3. The Permittees committed to maintain the WQMP template to assist developers with developing a project-specific WQMP.
4. An audit of each of the Permittees' Urban Runoff management programs during the third term MS4 Permit indicated no clear nexus between the watershed protection principles, including LID techniques, specified in the WQMP and the Permittees' General Plan or related documents such as Development Standards, Zoning Codes, Conditions of Approval, Project Development Guidance, etc.. It appears that many of the existing procedures, Development Standards, Ordinances and Municipal Codes may be barriers to implement LID BMPs. This Order requires the Permittees to facilitate LID techniques specified in this Order.

H. The Regional Board has proposed a revised Notice of Intent and Notice of Termination for Permittee construction projects to assist Regional Board staff with identifying locations and owners of Permittee projects.

I. The Permittees have committed to annual updates to Sanitary Sewer Overflow Procedures to ensure proper contact information for Permittee and outside agencies.

J. WATERSHED APPROACH

1. TMDL for Bacterial Indicator in the MSAR subwatershed and nutrients in the Canyon Lake and Lake Elsinore subwatershed are incorporated into this Order (See Section V.C). The Permittees support TMDL implementation and agreed to participate in a comprehensive water quality monitoring program to ensure that Urban Runoff meets the Water Quality Objectives identified in the Basin Plan and are consistent with the WLAs specified in the TMDLs. This Order requires that, consistent with the requirements of the respective TMDL Implementation Plans, the Permittees use the water quality monitoring of Urban Runoff to evaluate the effectiveness of the BMP programs.

2. The USEPA has recommended a shift to watershed-based NPDES permitting[8] and watershed approach[9] to CWA programs, including NPDES programs. The Permittees and the Regional Board also recognize that a watershed-based approach is expected to be effective in controlling Pollutants in Urban Runoff. Consistent with this approach, this Order requires the Permittees to develop and implement programs that integrate Hydromodification and water quality management strategies with land use planning policies, ordinances, and plans within each jurisdiction. A *watershed approach* considers the diverse Pollutant sources and stressors and watershed goals within a defined geographic area (i.e., watershed boundaries). A watershed approach has three basic components:

   a. *Geographic Focus*: Watersheds are nature's boundaries. They are the land areas that drain to surface waterbodies, and they generally include lakes, rivers, estuaries, wetlands, streams, and the surrounding landscape. Groundwater recharge areas are also considered.

   b. *Sound Management Techniques Based on Strong Science and Data*: Sound scientific data, tools, and techniques are critical to evaluate the process. Actions taken include characterizing priority watershed water quality problems and solutions, developing and implementing action plans, and evaluating their effectiveness within the watershed.

   c. *Partnerships/Stakeholder Involvement*: Watersheds transcend political, social, and economic boundaries. Therefore, it is important to involve all the affected interests in designing and implementing goals for the watershed. Watershed teams may include representatives from all levels of government, public interest groups, industry, academic institutions, private landowners, concerned citizens, and others.

There are two major sub-watersheds in Riverside County within the Permit Area – the MSAR subwatershed, consisting of the portions of the Permit Area that drain to Reaches 3 and 4 of the Santa Ana River, and the San Jacinto River sub-watershed, which consists of the portions of the Permit Area that drain to Lake Elsinore. The Permittees participate in the MSAR TMDL Task Force and the Lake Elsinore and Canyon Lake TMDL Task Forces, which are stakeholder driven, watershed-based efforts to address Pollutants of Concern in the respective sub-watersheds. The Permittees have also implemented several stakeholder driven, watershed-based conservation programs such as the Special Area Management

[8] USEPA: Watershed-based NPDES permitting is a process that emphasizes addressing all stressors within a hydrologically-defined drainage basin, rather than addressing individual Pollutant sources on a discharge-by-discharge basis.

[9] USEPA (1996a): "The watershed approach is a coordinating framework for environmental management that focuses public and private sector efforts to address the highest priority problems within hydrologically defined geographic areas, taking into consideration both ground and surface water flow."

Plan, the Western Riverside County Multiple Species Conservation Plan, the San Jacinto River Integrated Watershed Management Plan and the Santa Ana Watershed Project Authority One Water One Watershed Plan.

These efforts are also addressed and discussed in the DAMP, which integrates these efforts into a coherent and uniform compliance program to protect Receiving Waters. Due to economies of scale and the fact that many of the Permittees have jurisdiction in both sub-watersheds, the Permittees have opted to continue to implement uniform MS4 Permit compliance programs across the entire Permit Area (for example Permittee training programs educate inspectors about the impacts and sources of pathogens and nutrients as opposed to offering separate sub-watershed specific training programs for the San Jacinto and MSAR sub-watersheds). The Permittees have indicated that as source assessments and monitoring data results from the aforementioned watershed efforts produce findings regarding potential urban sources of Pollutants of Concern that they may opt, in the future, to develop specific action plans for the MSAR and San Jacinto River sub-watersheds, or potentially even tributaries there-of. If so, the DAMP will be appropriately modified to clarify the sub-watershed specific components.

The Permittees also currently implement interim Hydromodification criteria and have committed to revising their Hydromodification management programs based on studies currently being conducted by the SCCWRP. This Order requires the Permittees to continue to pursue these watershed planning efforts and enhance them as appropriate to address Pollutants of Concern.

J. To promote program transparency, each Permittee proposed to develop its own LIP that:

   a. Specifies how each program element of the DAMP shall be implemented;

   b. Describes the ordinances, plans, policies, procedures, and tools (e.g., checklists, forms, educational materials, etc.) used to execute the DAMP;

   c. Identifies the organizational units responsible for implementation of each program element;

   d. Establishes internal reporting requirements to ensure and promote accountability; and

   e. Describes an adaptive method of evaluation and assessment of program effectiveness for the purpose of identifying program improvements.

K. The audits conducted by Regional Board staff have also shown a significant deficiency in measuring program effectiveness. This Order requires quantifiable measures for evaluating program effectiveness.

L. The above-mentioned strategies for the fourth-term Order build upon and continue the programs and policies developed by the Permittees during the prior MS4 Permit terms as described in Sections VI and VII above.

M. A combination of these programs and policies and the requirements specified in this Order should ensure control of Pollutants in Urban Runoff from the MS4 owned and/or controlled by the Permittees.

VIII. ORDER REQUIREMENTS AND PROVISIONS

The legislative history of storm water statutes (1987 CWA Amendments), USEPA regulations (40CFR Parts 122, 123, and 124), and clarifications issued by the State Board (State Board Orders No. WQ 91-03 and WQ 92-04) indicate that a non-traditional NPDES permitting strategy was anticipated for regulating Urban Runoff. Due to the economic and technical infeasibility of full-scale end-of-pipe treatments and the complexity of Urban Runoff quality and quantity, MS4 permits generally include narrative requirements for the implementation of BMPs in place of Numeric Effluent Limits.

The requirements included in this Order are meant to specify those management practices, control techniques and system design and engineering methods that will result in protection of the Beneficial Uses of the Receiving Waters consistent with the MEP standard. State Board (Orders No. WQ 98-01 and WQ 99-05) concluded that MS4s must meet the technology-based MEP standard and Water Quality Standards. The U.S. Court of Appeals for the Ninth Circuit subsequently held that strict compliance with Water Quality Standards in MS4 permits is at the discretion of the local permitting agency.

The ROWD included a discussion of the current status of Riverside County's Urban Runoff management program and the proposed programs and policies for the next five years (fourth-term Order). This Order incorporates these documents and specifies performance commitments for specific elements of the Permittees Urban Runoff management program.

This Order recognizes the significant progress made by the Permittees during the first three MS4 Permit terms in implementing the storm water regulations. This Order also recognizes regional and innovative solutions to such a complex problem, addresses deficiencies in the Permittees' Urban Runoff programs observed during the audits conducted by Regional Board staff, and considers comments by the USEPA on other draft MS4 Permits. This Order specifies quantifiable performance measures to determine compliance and assess the effectiveness of the Urban Runoff programs. This Order incorporates an integrated watershed approach in solving water quality and Hydromodification impacts resulting from urbanization and aims to promote LID techniques as a key element to mitigate impacts from New Development and Significant Redevelopment projects. The proposed Order also requires the Permittees

to implement TMDL WLA through iterative BMP programs as required in the respective approved TMDL Implementation Plans (See Section V.C). The goal of these programs and policies that are included in this Order is to achieve and maintain Water Quality Standards in the Receiving Waters.

The essential components of the Urban Runoff management program, as established by federal regulations [40 CFR 122.26(d)] are: (i) Adequate Legal Authority, (ii) Fiscal Resources, (iii) Storm Water Quality Management Program (SQMP) - (Public Information and Participation Program, Industrial/Commercial Facilities Program, Development Planning Program, Development Construction Program, Public Agency Activities Program, IC/IDs Elimination Program), and (iv) Monitoring and Reporting Program. The major sections of the requirements in this Order include: I. Facility Information, II. Findings, III. Permittee Responsibilities, IV. Local Implementation Plan, V. Discharge Prohibitions, VI. Effluent Limitations, Discharge Specifications and Other TMDL Related Requirements, VII. Receiving Water Limitations, VIII. Legal Authority/Enforcement, IX. Illicit Connections/Illegal Discharges; Litter, Debris and Trash Control, X. Sewage Spills, Infiltration into MS4 Systems from Leaking Sanitary Sewer Lines, Septic System Failures, and Portable Toilet Discharges, XI. Co-Permittee Inspection Programs, XII. New Development (including Significant Redevelopment), XIII. Public Education and Outreach, XIV. Permittee Facilities and Activities, XV. Training Program For Storm Water Managers, Planners, Inspectors And Municipal Contractors, XVI. Notification Requirements, XVII. Program Management/DAMP Review, XVIII. Fiscal Resources, XIX. Monitoring and Reporting Program, XX. Provisions, XXI Permit Modification, and XXII. Permit Expiration and Renewal.

These programs and policies are intended to improve Urban Runoff quality and protect the Beneficial Uses of Receiving Waters of the Permit Area.

A. RESPONSIBILITIES

The responsibilities of the Principal Permittee are to coordinate the overall Urban Runoff management program and the Co-Permittees are responsible for managing the Urban Runoff program within their jurisdictions as detailed in the ROWD and the proposed Order, Order No. R8-2010-0033.

The existing Implementation Agreement needs to be revised to include the cities that were not signatories to this Agreement. The Order requires that a copy of the signature page and any revisions to the Agreement be included in the specified Annual Report.

B. DISCHARGE PROHIBITIONS

In accordance with CWA Section 402(p)(3)(B)(ii), this Order prohibits the discharge of Non-storm Water to the MS4s, with a few exceptions. The specified exceptions are consistent with 40 CFR 122.26(d)(2)(iv)(B)(1). If the Permittees or the

Executive Officer determines that any of the exempted Non-storm Water discharges is a significant source of Pollutants, a separate NPDES permit or coverage under the Regional Board's De Minimus Permit will be required.

C. EFFLUENT LIMITATIONS AND DISCHARGE SPECIFICATIONS, INCLUDING WASTE LOAD ALLOCATIONS FOR DISCHARGES TO 303(d) LISTED WATERBODIES WITH ADOPTED TMDLS

The Order clarifies allowed discharges and those discharges (only from Permittee owned or operated facilities and activities) allowed only if certain discharge specifications are met, such as those covered under the De Minimus Permit. These discharges should be consistent with the Regional Board's General De Minimus Permit for Discharges to Surface Waters, Order No. R8-2009-0003, NPDES No. CAG 998001. Permittees' de minimus discharges covered under this Order include: 1) dewatering wastes from subterranean seepage, except for discharges from utility vaults; 2) discharges resulting from hydrostatic testing of vessels, pipelines, tanks, etc.; 3) discharges resulting from the maintenance of potable water supply pipelines, tanks, reservoirs, etc.; 4) discharges resulting from the disinfection of potable water supply pipelines, tanks, reservoirs, etc.; 5) discharges from potable water supply systems resulting from initial system startup, routine startup, sampling of influent flow, system failures, pressure releases, etc.; 6) discharges from fire hydrant testing or flushing; 7) air conditioning condensate; 8) swimming pool discharges; 9) discharges resulting from diverted stream flows; and 10) construction dewatering wastes. The DAMP and the LIP are required to be revised to incorporate information regarding Permittees' de minimus discharges.

This Order requires Permittees to implement established TMDL WLAs specified for Urban Runoff through an iterative BMP approach (see Section V.C above).

D. RECEIVING WATER LIMITATIONS

Receiving Water Limitations are included to ensure that discharges of Urban Runoff from MS4s do not cause or contribute to violations of applicable Water Quality Standards in Receiving Waters. The compliance strategy for Receiving Water Limitations is consistent with the USEPA and State Board guidance and recognizes the complexity of Urban Runoff management.

This Order requires the Permittees to meet Water Quality Standards in Receiving Waters in accordance with USEPA requirements, as specified in State Board Order No. WQ 99-05. If Water Quality Standards are not met through implementation of certain BMPs, the Permittees are required to re-evaluate the programs and policies and to propose additional BMPs. Compliance determination will be based on this iterative BMP implementation process.

E. LEGAL AUTHORITY/ENFORCEMENT

Each Permittee has adopted ordinances, municipal codes, and other regulations to establish legal authority to control discharges to the MS4s and to enforce these regulations as specified in 40 CFR 122.26(d)(2)(I)(B, C, E, and F). The Permittees are required to enforce these ordinances and to take enforcement actions against violators (40 CFR 122.26(d)(2)(iv)(A-D)).

The enforcement activities undertaken by a majority of the Permittees have consisted primarily of Notices of Violation, which act to educate the public on the environmental consequences of Illegal Discharges. In the case of the County, additional action has sometimes included recovery of investigation and clean-up costs from the responsible parties. In the event of egregious or repeated violations, the option exists for a referral to the County District Attorney for possible prosecution or to the Regional Board for enforcement under the California Water Code or the CWA. In order to eliminate unauthorized, Non-storm Water discharges, reduce the amount of Pollutants commingling with Urban Runoff and thereby protect water quality, an additional level of enforcement is required between Notices of Violation and District Attorney referrals.

The third term MS4 Permit required the Permittees to establish the authority and resources to administer either civil or criminal fines and/or penalties for violations of their Storm Water Ordinances. The Permittees now have this authority for penalties. Within the fourth term Order, Permittees are required to exercise this authority by developing an enforcement program to be administered within the industrial, commercial and construction elements of their Urban Runoff management programs. The enforcement program has been required to be included as an update to each Permittee's LIP. The effectiveness of this program must be documented in the Annual Reports submitted by the Permittees. However, it is acknowledged that once cases have been referred to the District Attorney or Environmental Crimes Task Force, etc. for prosecution, case details are confidential.

The fourth term Order further requires the Permittees to document and implement progressive and decisive enforcement actions, evaluate the effectiveness of their enforcement program and sanctions by tracking compliance and evaluating the amount of time to return to compliance.

This Order requires the Permittees to include in the LIP their legal authority and mechanisms to implement the various program elements required by this Order to properly manage, reduce, and mitigate potential Pollutant sources within each Permittee's jurisdiction. The LIP shall include citations of appropriate local ordinances, identification of departmental jurisdictions and key personnel in the implementation and enforcement of those ordinances. The LIP shall include

procedures, tools and timeframes for progressive enforcement actions and procedures for tracking compliance.

F. ILLICIT CONNECTIONS/ILLEGAL DISCHARGES; LITTER, DEBRIS AND TRASH CONTROL

Federal regulation, 40 CFR 122.26(d)(2(iv)(B), requires the Permittees to eliminate illicit discharges to the MS4s. The Permittees have completed a survey of the MS4 and eliminated or permitted all identified Illicit Connections. The Permittees have also established a program to address Illegal Discharges and a mechanism to respond to spills and leaks and other incidents of discharges to the MS4.

The Permittees currently have several programs to address IC/IDs:

1. The Permittees operate a toll free phone line, provide e-mail access for filing complaints and take direct calls regarding IC/ID reports from third parties. These reports are investigated by Permittee staff and reported in IC/ID investigation forms. All Permittee public education outreach materials promote the use of these reporting mechanisms.
2. Permittee staff receive training on identification and reporting of IC/IDs to appropriate Permittee staff. These reports are investigated and reported in IC/ID reporting forms.
3. The Permittees conduct Industrial and Commercial Facility and Construction Site inspections to identify potential IC/IDs. The outcomes of these inspections are reported in inspection reporting databases.
4. The Permittees contribute funds to the County Hazardous Materials Response Team to train and educate them to handle Illegal Discharges or accidental hazardous waste discharges so as to prevent IC/IDs. A summary of HAZMAT activities is provided in the Annual Reports.
5. The RCFC&WCD monitors Office of Emergency Service reports for potential IC/ID incidents and investigates them as appropriate. Results are reported in the RCFC&WCD complaint call database and reported to the Permittees as appropriate.
6. The RCFC&WCD has developed an online GIS tool that identifies the location of District and Permittee MS4 facilities to facilitate IC/ID investigations and response.
7. The Permittees have developed a Sanitary Sewer Overflow Procedure to limit the potential for sewage spills to the MS4.
8. RCFC&WCD, as Principal Permittee, has dedicated staff that conducts dry weather monitoring and also evaluates RCFC&WCD MS4 facilities for maintenance problems and/or IC/IDs. Detected IC/IDs from monitoring data or field inspections are reported to the District's NPDES section, logged into

RCFC&WCDs complaint database, and reported to the appropriate Permittee for follow up action.

However, with a few exceptions, program evaluations conducted during the third term MS4 Permit showed that this program element is primarily complaint driven or an incidental component of municipal inspections or MS4 inspections for a number of Permittees. This Order requires the Permittees to ensure their LIPs describe each Permittee's plan for focused, systematic IC/ID investigations, outfall reconnaissance surveys, indicator monitoring, and track their sources[10]. A proactive Illicit Discharge Detection and Elimination (IDDE) program should be integrated with other LIP program elements as appropriate including: mapping of the Permittees' MS4 to track sources, aerial photography, Permittee inspection programs for construction, industrial, commercial, MS4, Permittee facilities, etc., watershed monitoring, public education and outreach, Pollution Prevention, and rapid assessment of stream corridors to identify dry weather flows and illegal dumping.

G. SEWAGE SPILLS, INFILTRATION INTO MS4 SYSTEMS FROM LEAKING SANITARY SEWER LINES, SEPTIC SYSTEM FAILURES, AND PORTABLE TOILET DISCHARGES

Federal regulation, 40 CFR 122.26(d)(2)(iv)(B)(4), requires the Permittees to develop procedures to prevent, contain, and respond to spills that may discharge into the MS4s. The Permittees have already developed a program to address various types of spills to the MS4s. This Order requires the Permittees to continue to implement the unified sewer response plans in collaboration with the local sanitary sewer system operators. To facilitate swift response actions, the Permittees are required to provide 24-hour access to MS4s to the sanitary sewer system operators. The Permittees should also work cooperatively with the sanitary sewer system operators to determine if exfiltration from leaking sanitary sewer lines is causing or contributing to Urban Runoff Pollution problems. In addition, the Permittees are required to control infiltration or seepage from sanitary sewers to the MS4s through routine preventive maintenance of the MS4 (40 CFR 122.26(d)(2)(iv)(B)(7)). This Order also requires the Permittees to implement control measures and procedures to prevent, respond to, contain and clean up all sewage and other spills from sources such as portable toilets and septic systems.

On May 2, 2006, the State Board issued the Statewide General Waste Discharge Requirements for Sanitary Sewer Systems, Water Quality Order No. 2006-0003-DWQ (SSO Order) to address proper management and operation of sewer collection systems and to control sanitary sewer overflows. It requires dischargers/enrollees to develop and implement a written Sewer System Management Plan (SSMP) approved by the discharger's governing board and

[10] Table 2: Land uses, Generating Sites and Activities that Produce Indirect Discharges from IDDE, A Guidance Manual for Program Development and Technical Assessments, October 2004 CWP.

report sewer spills through an on-line reporting system. This Order requires the Permittees have reviewed the unified sewage spill response plan developed during the third term MS4 Permit with the local sewering agencies and determined that it is consistent with the requirements of the SSO Order. This Order also requires each Permittee to include in its LIP the interagency or interdepartmental sewer spill response coordination and responsibilities.

The MS4 program audits indicated that a majority of the Permittees with septic systems have inadequate information with regard to the number and location of those systems within their jurisdiction. This Order requires the Permittees with septic systems to develop within 2 years of adoption of this Order, an inventory of septic systems within its jurisdiction and establish a program to ensure that failure rates are minimized.

H. CO-PERMITTEE INSPECTION PROGRAM;

Federal regulations, 40 CFR 122.26(d)(2)(iv)(A-D), require the Permittees to inventory, prioritize and inspect Industrial and Commercial Facilities and Construction Sites. This Order requires the Co-Permittees to continue inspections of Industrial and Commercial Facilities and Construction Sites within their jurisdiction in order to control the Pollutants entering the MS4. The Co-Permittees will continue to maintain the inventory of Industrial and Commercial Facilities and Construction Sites in the above categories, prioritize these facilities based on threat to water quality, and perform regular inspections to insure compliance with local ordinances. While initial observations of non-compliance may result in 'educational' type enforcement, repeated non-compliance will result in more disciplinary forms of enforcement, such as monetary penalties, stop work orders or permit revocation.

An evaluation of Permittee inspection programs during the third term MS4 permit indicated certain deficiencies in the Industrial and Commercial Facility and Construction Site inspection programs of some of the Permittees. In many instances, program documentation of progressive enforcement and facilities' return to compliance were not properly documented. This Order requires Permittees to document inspections and enforcement and evaluate the effectiveness of their inspection and enforcement program by tracking the time for facilities or sites to return to compliance. The Permittees who do not have an internet accessible database are required to initiate quarterly reporting and update of the inventory, inspection and enforcement database for facilities within their jurisdiction.

In order to address discharges to the MS4 from residential sources, the fourth term MS4 Permit requires the Permittees to develop and implement a residential program to prevent residential discharges from causing or contributing to a violation of Water Quality Standards in the Receiving Waters (40 CFR 122.26(d)(2)(iv)(A)).

I. NEW DEVELOPMENT (INCLUDING SIGNIFICANT REDEVELOPMENT)

Federal regulation, 40 CFR 122.26(d)(2)(iv)(A)(2), requires the Permittees to develop a comprehensive master plan to address discharges from New Development and Significant Redevelopment projects. During the third term MS4 Permit, the Permittees revised their New Development guidelines to address water quality and Hydromodification impacts resulting from urbanization. A WQMP for Urban Runoff was approved by the Regional Board in 2004 and became effective in 2005. This Order requires the Permittees to continue to work towards the goal of restoring and preserving the natural hydrologic cycles in proposed urban developments by reviewing and approving project-specific WQMPs to address post-construction impacts. The WQMP should be designed to address water quality impacts, including Hydrologic Conditions of Concern (HCOC), from New Development and Significant Redevelopment projects through: (1) Site Design BMPs, including LID techniques; (2) Source Control BMPs; and (3) Treatment Control BMPs. This Order recognizes the importance of LID techniques to minimize the impact of urbanization on water quality. This Order requires the project proponents to infiltrate, harvest and reuse, evapotranspirate, or bio-treat the volume of runoff from a 24-hour, 85th percentile storm event where feasible. The Order also provides alternatives and in-lieu programs for project sites where infiltration, harvesting and re-use, evapotranspiration and bio-treatment are not feasible.

Program evaluations conducted during the third term MS4 Permit indicated a need for establishing a clear nexus between the watershed protection principles (including LID) and the planning and approval processes of the Permittees. This Order requires the Permittees to review and revise their Development Standards, Zoning Codes, Conditions of Approval, Development Project Guidance, ordinances, and other related documents to identify and eliminate barriers to incorporate watershed protection principles.

The SMC, including project lead agency, the San Bernardino County Flood Control District, in collaboration with SMC member, SCCWRP and the California Storm Water Quality Association (CASQA), is developing a LID Manual for Southern California with funding from the State Board, CASQA and other sources. This manual will be incorporated into the CASQA BMP Handbooks. The Permittees are encouraged to utilize the manual as a resource for proper LID design and implementation techniques.

Program evaluations have also suggested a need for improvement in the Permittees' inspection, and tracking of post-construction BMPs. This Order requires the Permittees to revise their close-out procedures to include field

verification that Site Design, Source Control and Treatment Control BMPs are operational and consistent with the approved WQMP.

This Order incorporates new project categories and revised thresholds for several categories of New Development and Significant Redevelopment projects that trigger the requirement for a WQMP. New project categories include streets, roads and highways of 5,000 square feet or more of paved surface and retail gasoline outlets (RGOs) with 5,000 square feet or more with 100 or more average daily vehicle traffic. The threshold criteria that trigger the WQMP requirement for non-residential commercial/industrial construction projects have been reduced from 100,000 square feet to 10,000 square feet or more of impervious surface. The threshold for residential subdivision projects has also been revised from 10 units or more to a threshold of 10,000 square feet or more of impervious surface.

This Order incorporates new project categories and revised thresholds for several categories of New Development and Significant Redevelopment projects that trigger the requirement for a WQMP. The 2008 National Research Council (NRC) report[11] indicates that roads and parking lots constitute as much as 70% of total impervious cover in ultra-urban landscape, and as much as 80% of the directly connected impervious cover. Roads tend to capture and export more storm water Pollutants than other impervious covers. As such, roads are included as a priority development category for which WQMPs are required. The NRC report also indicates that there is a direct relationship between impervious cover and the biological condition of downstream receiving waters. The Permittees are required to address HCOC from New Development and Significant Redevelopment projects to minimize downstream impacts. Private New Development and Significant Redevelopment projects incorporating roads typically allow road runoff to be addressed as part of the overall water quality strategy for the larger common plans of development. Permittee streets, roads and highways capital projects have special limitations. For example, the footprint of street, road and highway capital projects is often limited and may have hydraulic constraints due to lack of underground storm drain systems that would otherwise be necessary to hydraulically facilitate treatment of runoff. There are also limitations specified in state and federal design and code specifications that may limit or prohibit BMPs. Permittees may also be subject to flow diversion liability and limited road maintenance budgets and equipment. Street, road and highway projects that function as part of the MS4 also receive runoff and associated Pollutants from both existing urban areas and other external sources, including adjacent land use activities, aerial deposition, brake pad and tire wear and other sources that may be outside the Co-Permittee's authority to regulate and/or economic or technological ability to control. These offsite flows can overwhelm Treatment Control BMPs designed to address the footprint (consistent with the typical requirements for a WQMP) of street, road or highway capital projects incorporating curb and gutter as part of its stormwater conveyance function. Despite these limitations, the Regional

[11] National Research Council Report (2008), http://www.nap.edu/catalog.php?record_id=12465

Board finds that Permittee construction of streets, roads and highway capital projects may provide an opportunity to address Pollutant loads from existing urban areas. However, due to the nature of the facilities and projects, it would be unduly burdensome for the Co-Permittees to maintain WQMP documents for transportation projects (in addition to Facility Pollution Prevention Plans and other overlapping requirements of this Order). The Permittees are therefore not required to prepare WQMP documents for street, road and highway capital projects, but instead are required to develop equivalent documents that include site specific consideration utilizing BMP guidance to address street, roads and highway capital project runoff to the MEP.

As public works, streets, roads and highway projects are the only facilities typically captured by the new WQMP category, and these projects typically have unique constraints that make them difficult to address through the WQMP process, a separate set of requirements has been established for addressing this category of development. Roads that are typically constructed as part of a development are typically incorporated into the broader WQMP for the development activity, providing more options for mitigation via the WQMP process.

Consistent with a long term holistic approach to address water quality and Hydromodification impacts resulting from urbanization, this Order requires Permittees to continue to develop tools that facilitate integration, to the extent practicable, of water quality, stream protection, storm water management and re-use strategies with land use planning policies, ordinances, and plans within each jurisdiction. These tools should address cumulative impacts of development on vulnerable streams, preserve or restore, consistent with the MEP standard, the structure and function of streams, and protect surface and groundwater quality. For 303(d) listed waterbodies with Urban Runoff Pollutant sources and without a TMDL, the Permittees are required to provide special protections such as requiring more effective post-construction BMPs focus training programs and develop targeted public outreach that would address the urban source of the Pollutant of Concern. The Permittees are also required to participate in the TMDL development and implementation.

J. PUBLIC EDUCATION AND OUTREACH;

Federal regulation, 40 CFR 122.26(d)(iv), requires the Permittees to develop a comprehensive storm water management plan with public participation and 40 CFR 122.26(d)(iv)(B)(6) requires the Permittees to engage in outreach activities to facilitate the proper management of Pollutants. Public outreach is an important element of the overall urban Pollution Prevention program. The Permittees have committed to implement a strategic and comprehensive public education program to maintain the integrity of the Receiving Waters and their ability to sustain Beneficial Uses. The Principal Permittee has taken the lead role in the outreach programs and has targeted various groups including businesses, industry, development, utilities, environmental groups, institutions, homeowners, school

children, and the general public. The Permittees have developed a number of educational materials, have established a storm water Pollution Prevention hotline, started an advertising and educational campaign, and distributed public education materials at a number of public events. The Permittees are required to continue these efforts and to expand public participation and education programs.

The Permittees have already developed BMP fact sheets to address sources from residential activities such as auto washing and maintenance activities; use and disposal of pesticides, herbicides, fertilizers and household cleaners; and collection and disposal of pet wastes.

This Order requires the Permittees to annually review their public education and outreach efforts and revise their activities, if necessary, to address public outreach needs fed back from other Urban Runoff program elements. Federal regulation, 40 CFR 122.26(d)(v), requires the Permittees to conduct a program assessment to determine the reduction in Pollutant loadings due to Urban Runoff management programs. Each Permittee is required to implement an assessment program, guided by the CASQA Guidance manual or equivalent alternative, to measure the change in behavior of its target communities to reduce discharge of Pollutants to the MS4 and the environment.

K. PERMITTEE FACILITIES AND ACTIVITIES;

Federal regulation, 40 CFR 122.26(d)(iv)(A), requires the Permittees to ensure that their activities and facilities do not cause or contribute to violations of Water Quality Standards in receiving waters. Education of Permittee planning, inspection, and maintenance staff is critical to ensure that Permittee facilities and activities do not cause or contribute to an exceedance of Receiving Water Quality Standards. The 2002 MS4 Permit also specified minimum requirements for street sweeping and inspection and maintenance of drainage facilities. The Permittees were also required to develop and distribute BMP fact sheets for various Permittee activities. Permittee as well as contract staff that perform Permittee activities were required to be properly trained. The second and third term MS4 Permits required the Permittees to prepare a Municipal Facilities Strategy (MFS) to ensure that Permittee facilities and activities do not contribute Pollutants to Receiving Waters. The MFS was incorporated into Section 5 of the DAMP during the third term MS4 Permit. Each year, by August 1st, the Permittees are required to review their activities and facilities to determine the need for revisions to Section 5 of the DAMP.

This Order continues and builds upon the requirement of the third term MS4 Permit by requiring Permittees to include structural post-construction BMP information for certain Permittee projects along with the Notice of Termination submitted to the Executive Officer upon completion of the construction activity. The Notice of Termination must include photographs of the completed project, a location map, and for public works projects subject to a WQMP, structural post-

construction BMP location, field verification report and identify long term operation and maintenance responsibility. Permittees are required to develop a database of post-construction BMPs for which the Permittees are responsible and shall reference this database in the LIP.

Program evaluations conducted during the third term MS4 Permit indicated varying degrees of compliance at Permittee facilities and activities. This Order requires each Permittee to inventory its fixed facilities, field operations and MS4 facilities to ensure that Permittee facilities do not cause or contribute to a Pollution or Nuisance in Receiving Waters. These facilities and field operations are to be prioritized for inspection according to threat to water quality.

Fixed Permittee facilities and field operations include, but are not limited to fire training facilities, corporate yards, maintenance and storage yards, animal shelters, water treatment facilities, swimming pools, warehouses, and hazardous materials storage facilities, and recreation facilities. The Permittees are required to include in their LIP procedures and schedules for inspections and maintenance of Permittee facilities and activities. Urban Runoff from other Permittee facilities, such as airports, wastewater treatment plants and landfills, is regulated under the General Industrial Permit.

L. PERMITTEE CONSTRUCTION PROJECTS

The third term MS4 Permit authorized the discharge of storm water from Construction Sites on one acre or more that are under ownership or direct responsibility of the Permittees. The Permittees were required to notify the Executive Officer prior to commencement of construction activities, and to comply with the substantive requirements of the latest Statewide General Construction Activities Storm Water Permit.

Program evaluations conducted during the third term MS4 Permit indicated that some of the Permittees were not submitting or were not aware of the requirement to submit a Notice of Intent and a Notice of Completion for Permittee construction projects.

M. TRAINING PROGRAM FOR STORM WATER MANAGERS, PLANNERS, INSPECTORS AND MUNICIPAL CONTRACTORS

Education of Permittee planning, inspection, and maintenance staff is important to ensure that land use decisions, local permit approvals and Permittee facilities and activities do not cause or contribute to an exceedance of Receiving Water Quality Standards. During the term of the 2002 MS4 Permit, the Permittees attended training classes specific to major Urban Runoff program elements including New Development/Significant Redevelopment, Construction Site and Industrial Facility inspections, and Permittee activities.

This Order requires the Permittees, in conjunction with a broader array of MS4 Programs or CASQA, to define the program implementation training needs for Urban Runoff program staff, including contractors, managers and inspectors. The training curriculum must be designed for Permittee facilities and field operations staff, Permittee inspection staff, Urban Runoff program managers and those involved in the review and approval of WQMPs and CEQA documents, including Permittee contractors. The audits of the Permittees indicated the need for better inter-departmental collaboration and communication in the local Urban Runoff program implementation. This Order requires LIPs to develop and document processes and procedures for coordination between planners, plan reviewers, engineers and inspectors to ensure that appropriate post-construction BMPs are approved, installed, and are operational.

N. NOTIFICATION REQUIREMENTS

Most of the notification requirements that were spread throughout the third term MS4 Permit were consolidated into one section.

O. PROGRAM MANAGEMENT ASSESSMENT/DAMP REVIEW

The DAMP is a management document that needs to be updated with the new requirements of this Order.

P. FISCAL RESOURCES

Each Permittee is expected to exercise its full authority to secure the resources necessary to meet all requirements of this Order. See Section IX for existing funding mechanisms and potential limitations to Permittee funding.

Q. MONITORING AND REPORTING REQUIREMENTS

During the first term MS4 Permit and part of the second term MS4 Permit, the Permittees conducted monitoring of the Urban Runoff flows, Receiving Water quality, and sediment quality. The Santa Ana Phase I NPDES Monitoring Program began in November 1991 with 27 monitoring sites. The program has been reduced in phases to more specifically address Urban Runoff program needs and to redirect monitoring resources to TMDL-related activities. There was a time where samples were collected on a rotational basis with no consistent monitoring from year to year. On April 14, 2003, with the submittal of an Interim Monitoring Program, monitoring at seven core sampling locations (Sampling Stations 040, 316, 318, 364, 702, 707, and 752) was established that provided representative and consistent monitoring results for the Permit Area.

The Riverside County monitoring programs, as well as other monitoring programs nationwide, have shown that there is a high degree of uncertainty in

the quality of Urban Runoff and that there are significant variations in the quality of Urban Runoff spatially and temporally. However, most of the monitoring programs to date have indicated that there are a number of Pollutants in Urban Runoff. A link between Pollutants in Urban Runoff and Beneficial Use Impairments has been established in a few studies.

This Order requires the Permittees identified as TMDL stakeholders in an approved TMDL to continue to comply with applicable TMDL Implementation Plan requirements, including monitoring requirements, and to implement Urban TMDL WLAs through an iterative BMP approach (see Section V.C above).

Wet and Dry Seasons are defined differently by the various monitoring programs included in this Order. The Middle Santa Ana TMDL defines the Wet Season as November 1 through March 31st and the Canyon Lake/Lake Elsinore TMDL monitoring defines it as October 1st through May 31st. The Monitoring and Reporting Program for this Order generally defines the Wet Season as October 1st through May 31st. Monitoring required under this Order is expected to be conducted consistent with the applicable seasonal definitions.

The MSAR Bacterial Indicator TMDL and Canyon Lake/Lake Elsinore Nutrient TMDL requires the Permittees to comply with TMDL Implementation Plan requirements to revise the DAMP to incorporate BMPs in the Permittees Urban Runoff programs. This Order requires the Permittees to evaluate the effectiveness of the BMPs implemented as part of the DAMP in conformance with the TMDL Implementation Plan requirements.

This MS4 monitoring program includes sampling Urban Runoff at a variety of sites located throughout the Permit Area for three storm events per year. Urban Runoff samples will be collected and analyzed for a variety of constituents. In addition to these efforts, the Permittees are reevaluating their overall Urban Runoff monitoring program to determine its effectiveness in meeting the following objectives:

1. Assess rates of mass loading
2. Assess influence of land use on water quality
3. Assess compliance with Water Quality Objectives
4. Assess effectiveness of water quality controls
5. Detect IC/IDs
6. Identify problem areas and/or trends
7. Identify Pollutants of Concern
8. Identify baseline conditions
9. Establish/maintain a water quality database

To accomplish these goals, the following activities are conducted:

1. Collect water quality data
2. Collect rainfall/runoff data
3. Establish quality assurance/control procedures
4. Conduct data analysis and archiving
5. Install and maintain appropriate equipment
6. Prepare an Annual Report

RCFC&WCD, in its role as Principal Permittee, participates in the SMC and other task forces. The goal of the SMC is to develop the technical information necessary to better understand storm water mechanisms and impacts, and then develop the tools that will effectively and efficiently improve storm water decision-making. Some of the cooperative monitoring efforts conducted through the SMC and other task forces include Comparative Evaluation of Microbial Source Tracking Techniques, Model Monitoring Program Guidance, Peak Flow Study, and Laboratory Inter-Calibration Studies. Under the auspices of the SMC, SCCWRP prepared "Model Monitoring Program for Municipal Separate Storm Sewer Systems in Southern California", August 2004 Technical Report No. 419. This report noted, "...the lack of mass emissions stations in the inland counties hampers their ability to estimate the proportional contribution of these inland areas to cumulative loads downstream". The SMC consists of representatives from the Counties of Ventura, Los Angeles, Orange, San Bernardino, Riverside, and San Diego and the Cities of Long Beach, and Los Angeles, the Los Angeles, Santa Ana and San Diego Regional Boards, the State Board, SCCWRP, Caltrans, and the USEPA. This Order requires the Permittees to continue mass emissions monitoring to determine Pollutant loading.

During the second and third term MS4 Permits, there was an increased focus on watershed management initiatives and coordination among the MS4 permittees in Orange, Riverside and San Bernardino Counties. The MS4 permittees participated in a number of regional monitoring programs and other coordinated program and policy developments, such as the Regional Integrated Freshwater Bioassessment Monitoring Program, and the BMP Effectiveness Assessment. The Principal Permittee continues to be an active participant in the SWQSTF, MSAR Bacterial Indicator TMDL, Canyon Lake/Lake Elsinore (San Jacinto) Nutrient TMDL and the SMC. This Order recommends that the Permittees continue their participation in these types of watershed coordination efforts and provides them with opportunities to use these efforts to comply with applicable requirements of the Permit.

The third term MS4 Permit required the Permittees to initiate bioassessment monitoring. To allow for a holistic approach, this Order requires the Permittees to participate in the Regional Integrated Freshwater Bioassessment Monitoring

Program in lieu of a separate bioassessment monitoring program for the Permit Area.

This Order requires the Permittees to re-evaluate their CMP and submit a revised plan for approval. The revised CMP should integrate the goals and objectives of the Watershed Action Plan and rectify data gaps from previous monitoring efforts.

R. PROVISIONS – Standard Language per NPDES regulations.

S. PERMIT MODIFICATION– Standard Language per NPDES regulations.

T. PERMIT EXPIRATION AND RENEWAL– Standard Language per NPDES regulations.

IX. WATER QUALITY BENEFITS, COST ANALYSIS, AND FISCAL ANALYSIS

There are direct and indirect benefits from clean lakes and beaches, clean water, and a clean environment. It is difficult to assign a dollar value to the benefits the public derives from fishable and swimmable waters. In 1972, at the start of the NPDES program, only 1/3 of the U.S. waters were swimmable and fishable. In 2008, more than 2/3 of the U.S. waters met these criteria. In the 1999 "*Money"* magazine survey of the "Best Places to Live", clean water and air ranked as two of the most important factors in choosing a place to live. Thus environmental quality has a definite link to property values.

The true magnitude of the Urban Runoff problem is still elusive and any cost estimate for cleaning up Urban Runoff would be premature short of end-of-pipe treatments. For Urban Runoff, end-of-pipe treatments are cost prohibitive and are not generally considered as a technologically feasible option. Over the last decade, the Permittees have attempted to define the problem and implemented BMPs to the MEP to combat the problem.

The costs incurred by the Permittees in implementing these programs and policies can be divided into three broad categories:

A. Shared costs: These are costs that fund activities performed mostly by the Principal Permittee under the Implementation Agreement. These activities include overall storm water program coordination; intergovernmental agreements; representation at the SWQSTF, Regional Board/State Board meetings and other public forums; preparation and submittal of compliance reports and other reports required under the NPDES permits, responding to Water Code Section 13267 requests, budget and other program documentation; coordination of consultant studies, Co-Permittee meetings, and training seminars.

B. Individual Costs for DAMP Implementation: These are costs incurred by each Permittee for implementing the BMPs (drainage facility inspections for Illicit Connections, drain inlet/catch basin stenciling, public education, etc.) included in the DAMP. A number of programs and policies for Non-Point and Urban Runoff Pollution controls existed prior to the MS4 permit program. However, the DAMP that was developed and implemented in response to the MS4 Permits required additional programs and policies for Urban Runoff Pollution control.

C. Individual Costs of Pre-Existing Programs: These are costs incurred by each Permittee for water Pollution control measures which were already in existence prior to the MS4 permit program. These programs included recycling, litter control, street sweeping, drainage facility maintenance, and emergency spill response.

Historically, the Permittees have employed four distinct funding methods to finance their NPDES Activities. Many Permittees utilize a combination of these funding sources. The different methods include:

A. Santa Ana Watershed Benefit Assessment Area

In 1991, the RCFC&WCD established the Santa Ana Watershed Benefit Assessment Area (SAWBAA) to fund its NPDES activities. Currently, SAWBAA revenues fund both area-wide NPDES program activities and the RCFC&WCD's individual MS4 permit compliance activities.

B. County Service Area 152

In December 1991, the County of Riverside formed County Service Area 152 (CSA 152) to provide funding for compliance activities associated with its NPDES permit activities. Under the laws that govern CSAs, sub-areas may be established within the overall CSA area with different assessment rates set within each sub-area. The cities of Corona, Moreno Valley, Norco, Riverside, Lake Elsinore and San Jacinto elected to participate in CSA 152.

C. Utility Charge

The City of Hemet funds a portion of its NPDES program activities through a utility charge.

D. General Fund /Other Revenues

Permittees also utilize general fund revenue to finance their NPDES activities. Several Permittees also report using general fund and other revenue sources (e.g., gas taxes, developer fees, etc.) to fund a portion of their Urban Runoff management activities.

The Annual Report provides the most recent budgets and expenditure projections available for the costs incurred by the Permittees in implementing these programs and policies. The following information, in parenthesis, on the current economic conditions was provided by the Permittees.

{Current Economic Conditions
The following information was provided by the Permittees and does not constitute a finding by the Regional Board:

Historically, the Permittees have employed several funding methods to finance their MS4 Permit compliance activities. Unfortunately, the mortgage crisis, collapse of the housing market and the economic recession has resulted in the cessation of virtually all development activity and has significantly reduced sales tax revenue in the Santa Ana Region. Property tax revenues have been reduced by the high level of foreclosure activity and reduced property values. Property tax revenues have been further reduced by homeowner requests for reassessments to reflect the reduced property values. The impact of these economic conditions on the Permittees in the Santa Ana Region has been particularly severe. As a result, funds typically provided by these funding methods has been severely reduced, and it is anticipated that this condition will continue for an indefinite period. The funding methods historically used and the effects of the economic situation on the availability of funds through these sources are summarized as follows:

- Santa Ana Watershed Benefit Assessment Area. In 1991, the District established the Santa Ana Watershed Benefit Assessment Area to fund its MS4 Permit compliance activities. Currently, the Benefit Assessment revenues fund the District's share of the area-wide MS4 Permit program activities and the District's individual compliance activities as a Permittee. Under the Benefit Assessment each parcel is taxed based on the impervious area of each parcel at a set rate established through Proposition 218. This rate has not been increased since 1991 and increases in revenues have resulted from increases in the number of contributing parcels resulting from New Development. In 2007/08 the Santa Ana Watershed Benefit Assessment generated approximately $2,030,000 in revenue. These revenues are used to fund the District's compliance activities and the bulk of the administrative costs associated with the District's duties as Principal Permittee.

  Outlook: The District expects at best to maintain, if not see temporary reductions in Benefit Assessment revenues due to the significant number of homes that are not paying property tax due to foreclosure. An increase in the established Benefit Assessment rate to compensate for these reductions would require approval of 2/3 of the voters or 50% of the property owners and is unlikely, especially in the current economic climate. An increase in the number of contributing parcels will not occur until the development industry recovers.

- General Fund/Other Revenues. The County and the Cities utilize general fund revenue to finance most of their MS4 Permit compliance activities. General fund revenue is generated by property tax, sales tax, and auto license taxes.

  Outlook: The Permittees expect a continued reduction in the funds available through General Fund/Other Revenues through at least FY 2010/2011. Historically, the Permittees have investigated other funding sources, including a phone survey conducted by LESJWA with support from the District and the County of Riverside to evaluate the possibility of passing a new assessment to fund water quality improvements benefiting Lake Elsinore. The results of the survey found insufficient voter support for water quality-related issues to move forward with a special election. The Permittees have also formed a finance committee which has met several times to obtain information about actions that they can take to maximize revenues and potential alternative funding sources. These efforts met with some success, particularly in relation to maximizing fees for service; however significant new funding sources were not identified or available to the Permittees even during the more favorable economic conditions experienced during the term of the 2002 Riverside County MS4 Permit.

- Fees. Several Permittees charge fees for services such as inspections, plan check and other recoverable costs related to compliance with the 2002 Riverside County MS4 Permit. These fees cover both the direct and indirect costs associated with conducting these inspections/reviews including associated compliance tracking and reporting.

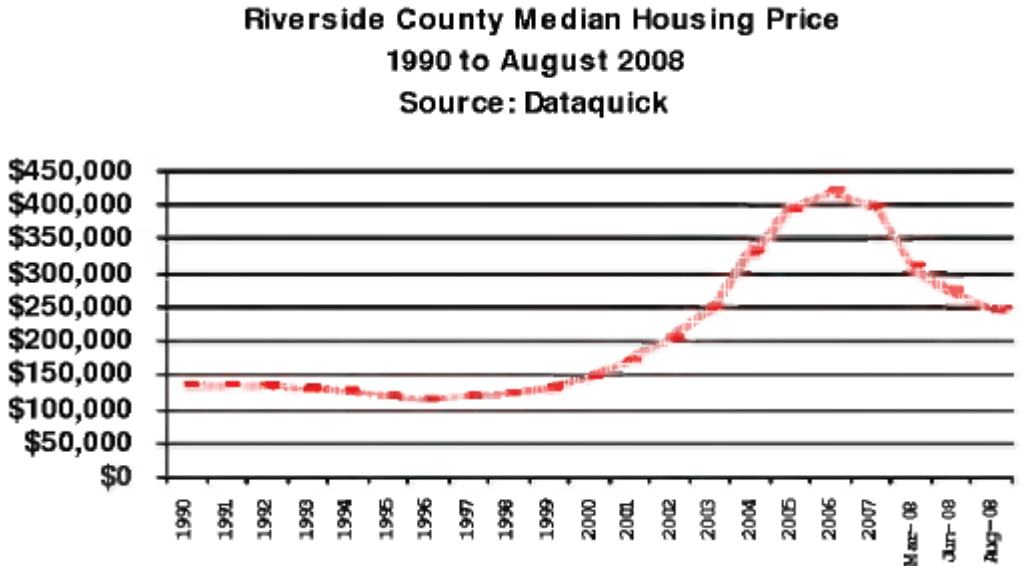
  Outlook: It is notable that, with the virtual collapse of the development industry in the Santa Ana Region, the fees received by the Permittees for review of New Developments and Construction Site inspections have been significantly reduced. With this reduced level of fee-based income, maintenance of the existing inspection and plan review programs will place a burden on overall funding of the compliance programs. The Permittees do not expect revenues from fees to recover until the development industry recovers. Even with recovery of the development industry, it is anticipated that revenues from fees will be reduced for the majority of the Cities within the Santa Ana Region and the County due to the reduced area remaining for development in their jurisdictions.

- Grants. The Permittees have actively pursued and, as available, used grants to fund compliance programs.

  Outlook: In December the State's budget crisis resulted in a directive to State agencies from the Department of Finance to halt projects that rely on bond funds, including those funded by Proposition 40, Proposition 50 or Proposition 84. The State of California is the primary source of grant funding for water

quality projects. Future availability of funds to resume compliance projects funded by grants is uncertain.

It is clear that the current economic climate and that of the foreseeable future is creating a significant burden upon the Permittees that will make the continuance of all existing MS4 Permit compliance programs difficult. If new funding sources or alternative combinations of funding sources cannot be identified, it is likely that compliance program funding will be further impacted.



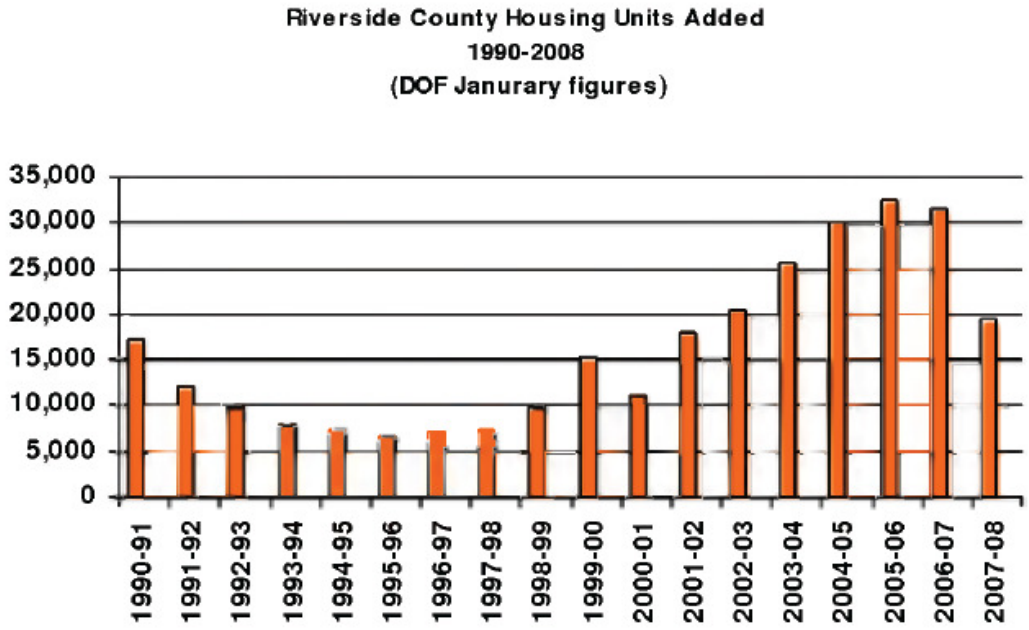
Economic Projections

According to Chicago Title, Southwest Riverside County has experienced a very significant increase in supply of single-family residential units on the market. As a result, housing price indicators are very negative. In the majority of the Southwest Riverside submarket, the pending price is less than closing price that suggests the weakness of the market. The October 2008 count of bank owned (REO) properties for Riverside County as a whole was 12,078. The number of foreclosures was 23,480. The presence of high levels of REO properties will continue to negatively affect the price line. In addition, the level of foreclosures is increasing. At the end of January 2009, 68% of the homes listed for sale are foreclosures or short sales[12].

With regard to other sectors of the economy, Riverside County has taken a serious turn for the worse in 2008, with projections indicating that the severe downturn will continue through 2009 at the very least. The economic difficulties being faced in the Southwest Riverside submarket is the result of the dramatic downturn in the housing market in this area, the national financial turmoil, the worldwide credit crisis, and the increasing consumer debt crisis. According to Beacon Economics, a respected economics consulting firm in Los Angeles, Inland Southern California is clearly at the epicenter of this economic turmoil, with extremely high rates of unemployment at present. Unemployment rates in Inland Southern California are expected to reach 12.4% (Riverside County beat that – unemployment was 14.6% in November 2009 – California Employment Development Department) before this deep recession is over. Housing prices are expected to continue their precipitous decline from their peak levels in the two Inland Southern California counties through at least 2011. According to Dataquick, median home prices in Riverside County peaked at $415,000 in January 2007. At the end of this cycle, the median home price in Riverside County is expected to be $198,000. Figure 1 depicts the median housing price in Riverside County over the period 1990 to August 2008.

[12] Orange County Register, January 27, 2009, p. 11.

Figure 1. Riverside County Median Housing Price (1990 – August 2008)



Source: Riverside County Center for Demographic Research. 2008. Riverside County Progress Report, pg 14.

Local Government sales tax revenues remained fairly stagnant through 2006 and began to decline in early 2007, according to Beacon. By the second quarter of 2008, the taxable sales in Riverside County declined by 7.7%. This will continue with taxable sales possibly bottoming out by 2010. These shocks are expected to continue and accelerate within the southwest Riverside County economy.

As a direct outcome of the current economy and the economic outlook into the term of the 2009 Riverside County MS4 Permit, the number of New Development proposals has plummeted and any significant rebound is not forecast. New and redevelopment projects will likely remain minimal. As shown in Figure 2, the number of housing units being added each year has dropped below the levels seen at any point in time during the 2002 Riverside County MS4 Permit. These numbers will likely continue to decrease for a significant portion of the new 2010 Riverside County MS4 Permit term.

Figure 2. Riverside County Housing Units Added (1990 – 2008)

Source: Riverside County Center for Demographic Research. 2008. Riverside County Progress Report, pg 12.

These economic issues and projections directly affect and limit both:

- The need for including enhanced New Development and Significant Redevelopment requirements in the 2010 Riverside County MS4 Permit, and

- The Permittees ability to fund, and even seek new funding sources for additional MS4 Permit requirements for New Development and Significant Redevelopment projects.

Permittee specific projections are as follows:

County of Riverside

The County is operating with a structural deficit of $12 million and plans a 25% budget reduction from FY 2008/2009 through FY 2011/2012. The County's current budget of $4.7 billion represents a 5% reduction from the previous year and next year's budget is expected to be cut by 10%. These cuts are directly associated with the decline in property values caused by the high number of foreclosures. There are concerns about having to use discretionary funds to meet State mental health and social service mandates. In addition, the County is dependent on funds from Federal and State sources. If during this time of economic crisis Federal and State funding sources are reduced or eliminated, any unfunded programs will be terminated. Only core County programs will continue.

The primary source of general fund revenue is from property taxes and sales tax. With the unprecedented number of foreclosures, reduced property values, and declining sales, general fund revenue is in a downward spiral. Another source of funding is through the Solid Waste Tipping Fees paid at the County landfills. Volume is down 15% since 2006 with anticipated downward trend to 40% reduction in solid waste through 2014. Programs that are partially funded through tipping fee allotments will be impacted. Due to the declining economy the recycling market has collapsed. Virtually no recyclable materials are being shipped for reprocessing. This loss of revenue and increased disposal costs is further impacting the general fund.

Cuts of 25% for all Net County Cost general fund programs will translate into reduction of County services and elimination of unfunded State and Federal programs. Only core value programs will be provided (including public safety and fee programs).

The County has instituted a hiring freeze and required each department to create a report outlining the projected effects of the budget cuts. The County currently employs over 20,000 people, and layoffs are expected to result from the findings of these departmental reports. It is anticipated that this will impact program delivery for stormwater related activities. No County department will be able to sustain current staffing levels as they try to meet the 25% budget reduction strategy.[13] [14]

City of Menifee

The newly incorporated City of Menifee FY 2008/2009 initial budget was estimated from their comprehensive fiscal analysis that was submitted to the Local Agency Formation Commission during the incorporation process. Because of the economic uncertainty, and the fact that the City is only now beginning to staff positions, it is unknown what the immediate impact of the fiscal crisis will be. The County is responsible for assisting the City in meeting its MS4 Permit compliance requirements during the first year of incorporation which expires October 1, 2009. Currently, the level of property tax revenue that will be available to the City is uncertain. Funding for MS4 Permit compliance requirements was not explicitly budgeted. A financial hardship currently exists because of the costs associated with incorporation.

City of Murrieta

The City of Murrieta's FY 2008/2009 budget did not increase compared to FY 2007/2008. The City has identified a $3.3 million budget shortfall for the current fiscal year ending on June 30, 2009. This represents approximately 8.2% of the City's projected revenue which must be absorbed in five months.

[13] "The Realities of Recession in California: A Statewide Report by U.S. Senator Barbara Boxer, December, 2008, p. 18.
[14] Riverside County Executive Office, January, 2008.

The shortfalls are primarily due to reduced sales tax and property tax revenues. Department heads are currently working on revised budgets to adjust for the loss in revenue.

Additional, budget cuts are anticipated for FY 2009/2010 because the immediate economic outlook is not good. There have been approximately 2,000 home foreclosures within the City. Sales tax revenue is estimated to drop 12.5%, property tax revenue will drop, and the State took approximately $525,000 out of redevelopment funds. Murrieta did not receive any vehicle licensing fees from the State and it appears likely that the State will take more revenue from the cities to solve its budget problems. New NPDES requirements that increase compliance costs will create a financial hardship for the City.

City of Riverside

The City of Riverside has seen declining general fund revenue over the last two fiscal years in virtually all categories. The City's most recent projection indicates that total general fund revenues for the current fiscal year will be under $200 million, down from a budget of $215 million as adopted, and $226.5 million in the prior fiscal year. This represents a decline over two fiscal years of approximately 12%. Specifically, property tax and sales tax revenue continue their decline, which is primarily attributable to decreased residential construction activity and in the case of sales tax declining automobile sales.

The decline in revenue has resulted in a corresponding reduction to general fund expenditures. Specifically, approximately 12% of the positions authorized for the general fund have been vacated and unfunded, either through transferring staff to other funds, attrition or limited layoffs of temporary and contract staff. Additionally, the level of service provided to the community in virtually all City departments has been reduced through funding reductions to items such as street maintenance, recreation programs and libraries, though great care has been taken to minimize the impact of cuts to the public. It is anticipated that in the near term the economic situation will not improve, and staff is preparing a budget for the upcoming fiscal year that anticipates further decreases in revenue.

City of Wildomar

The newly incorporated City of Wildomar FY 2008/2009 initial budget was estimated from their comprehensive fiscal analysis that was submitted to the Local Agency Formation Commission during the incorporation process. Because of the economic uncertainty, and the fact that the City is only now beginning to staff positions, it is unknown what the immediate impact of the fiscal crisis will be. The County is responsible for assisting the City in meeting its MS4 Permit compliance requirements the first year of incorporation that expires July 1, 2009. Currently, the level of property tax revenue that will be

available to the City is uncertain. Funding for MS4 Permit compliance requirements was not explicitly budgeted. A financial hardship currently exists because of the costs associated with incorporation.}

X. ANTIDEGRADATION ANALYSIS

The Regional Board has considered whether a complete antidegradation analysis, pursuant to 40 CFR 131.12 and State Board Resolution No. 68-16, is required for these Urban Runoff discharges. The Regional Board finds that the Pollutant loading rates to the Receiving Waters will be reduced with the implementation of the requirements in this Order. As a result, the quality of Urban Runoff discharges and Receiving Waters will be improved, thereby improving protection for the Beneficial Uses of Waters of the U.S.. Since this Order will not result in a lowering of water quality, a complete antidegradation analysis is not necessary, consistent with the federal and state antidegradation requirements.

XI. ANTI-BACKSLIDING

Sections 402(o)(2) and 303(d)(4) of the CWA and federal regulations at 40 CFR 122.44(l) prohibit backsliding in NPDES permits. These anti-backsliding provisions require Effluent Limitations in a reissued NPDES permit to be as stringent as those in the previous permit, with some exceptions where Effluent Limitations may be relaxed. All Effluent Limitations in this Order are at least as stringent as the Effluent Limitations in the 2002 Order.

XII. PUBLIC WORKSHOP AND PUBLIC HEARING

Regional Board conducted a public workshop regarding the proposed Order on August 3, 2009 at the City of Loma Linda, Council Chambers, 25541 Barton Road, Loma Linda, CA. Based on the comments received, a second draft was released for public review and comments on October 22, 2009. The third draft, issued on December 15, 2009, will be considered for adoption at a public hearing as follows:

Date and time:	January 29, 2010; meeting starts at 9:00 a.m.
Location:	City of Loma Linda, Council Chambers 25541 Barton Road Loma Linda, CA

A Notice of Public Hearing and Hearing Procedure is posted on the Regional Board's website indicated below. An agenda for the public hearing to consider adoption of the proposed Order will be posted on the Regional Board's website approximately 10 days prior to the meeting date at:

http://www.waterboards.ca.gov/santaana/water_issues/programs/stormwater/riverside_permit.shtml

This information may be also obtained by calling the Regional Board office at 951-782-4130.

The Regional Board recognizes the significance of Riverside County's Storm Water/Clean Water Protection Program and will conduct, participate, and/or assist with any workshop during the term of this Order to promote and discuss the requirements of this Order and the progress of the Urban Runoff management program. The details of the public workshops will be posted on the Regional Board's website indicated above. Persons wishing to be included in the mailing list for any of the items related to this permit may register their name, mailing address and phone number with the Regional Board office at the address given below.

XIII. PUBLIC HEARING

The Regional Board will hold a public hearing regarding the proposed waste discharge requirements. A Notice of Public Hearing was published in the Legal Notices section of the Press Enterprise, a local newspaper, on November 13, 2009. The public hearing on this item is scheduled as indicated above in Section XI. Additional information regarding the public hearing will also be posted on the website indicated above. Further information regarding the conduct and nature of the public hearing concerning these waste discharge requirements may be obtained by writing or visiting the Santa Ana Regional Board office, 3737 Main Street, Suite 500, Riverside, CA 92501. This and other information are also available at the website at: www.waterboards.ca.gov/santaana.

XIV. INFORMATION AND COPYING

Persons wishing further information may write to the above address or call Keith Elliott at (951) 782-4925. Copies of the application, proposed waste discharge requirements, and other documents (other than those which the Executive Officer maintains as confidential) are available at the Regional Board office for inspection and copying by appointment scheduled between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday (excluding holidays, and furlough days).

XV. REGISTER OF INTERESTED PERSONS

Any person interested in a particular application or group for applications may leave his name, address and phone number as part of the file for an application. Copies of tentative waste discharge requirements will be available on the web for all interested parties to download.

E-mail registration:
http://www.waterboards.ca.gov/resources/email_subscriptions/reg8_subscribe.shtml

XVI. RECOMMENDATION

Staff recommendation is to adopt the tentative Order, Order No. R8-2010-0033, as presented.

APPENDIX 7

NOTICE OF INTENT AND NOTICE OF TERMINATION FOR DE-MINIMUS DISCHARGES

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SANTA ANA REGION
NOTICE OF INTENT
TO COMPLY WITH THE TERMS AND CONDITIONS OF THE

☐ **Riverside County MS4 Permit**
ORDER NO. R8-2010-0033
NPDES NO. CAS 618033

☐ **San Bernardino County MS4 Permit**
ORDER NO.R8-2010-0036
NPDES NO. CAS618036

GENERAL WASTE DISCHARGE REQUIREMENTS FOR DISCHARGE TO SURFACE WATERS
THAT POSE INSIGNIFICANT (DE MINIMUS) THREAT TO WATER QUALITY

I. PERMITTEE (*Person/Agency Responsible for the Discharge*)
Agency/Company
Name:_____
Address/*Street* _____
City _____State _____ZIP_____ Contact Person: _____
Phone: (_____) _____; Email: _____

II. FACILITY
Name:_____
Address/Street _____
City _____State _____ZIP_____ Contact Person:_____
Phone: (_____) _____; Email: _____

a. Projected Flow Rate (gpd):_____,
b. Receiving Water (identify):_____

III. INDICATE EXISTING PERMIT NUMBER: (*if applicable*)
a. Individual Permit Order No. _____ NPDES No. _____
b. General Permit Order No. R8-2010-003-_____
c. Others (specify) _____

IV. CERTIFICATION:

I certify under penalty of law that I am an authorized representative of the permittee and that I have personally examined and am familiar with the information submitted in this application and all attachments and that, based on my inquiry of those persons immediately responsible for obtaining the information contained in the application, I believe the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment. In addition, I certify that the permittee will comply with the terms and conditions stipulated in Orders No. R8-2009-0003 and (R8-2010-0033 or R8-2010-0036, as applicable) including the monitoring and reporting program issued by the Executive Officer of the Regional Board.

Name: _____Title:_____
(type or print)

Signature: _____ Date: _____

Email: _____

Remarks: If changes to facility ownership and/or treatment processes were made after the issuance of the existing permit, please provide a description of such changes on another sheet and submit it with this Notice of Intent.

V. OTHER REQUIRED INFORMATION - FOR NEW DISCHARGERS AND FOR NEW DISCHARGES AND LOCATIONS NOT PREVIOUSLY REPORTED BY EXISTING DISCHARGERS.

Please provide a COMPLETE characterization of your discharge. A complete characterization includes, but is not limited to:

a. A list of constituents and the discharge concentration of each constituent;

b. The estimated average and maximum daily flow rates at unit of gallons per day(gpd); the frequency and duration of the discharge and the date(s) when discharge will start;

c. The proposed discharge location(s) as latitude and longitude for each discharge point;

d. A description of the proposed treatment system (if appropriate);

e. The affected receiving water; the receiving water(s) shall be
   1) receiving storm drain/creek, and/or
   2) the ultimate receiving water, such as Santa Ana River, San Jacinto River, Lake Elsinore, Prado Park Lake, etc.;

f. A map showing the path from the point of initial discharge to the ultimate receiving water. Please try to limit your maps to size of 8.5” X 11”.

g. A list of known or suspected leaking underground tanks and other facilities or operations that have, or may have impacted the quality of the underlying groundwater within 200 feet of the site property lines for projects with expected discharge flow rates of less than 100,000 gallons per day and within 500 feet of the site property lines for projects with expected discharge flow rates of greater than 100,000 gallons per day.

h. Any other information deemed necessary by the Executive Officer.

VI. OTHER

Attach additional sheets to explain any responses which need clarification. List attachments with titles and dates below:

You will be notified by a representative of the RWQCB within 30 days of receipt of your application. The notice will state if your application is complete or if there is additional information you must submit to complete your application, pursuant to Division 7, Section 13260 of the California Water Code.

STATE WATER RESOURCES CONTROL BOARD
1001 I Street, Sacramento, California 95814
ORDER WQ 2022-0103-DWQ

STATEWIDE WASTE DISCHARGE REQUIREMENTS

GENERAL ORDER FOR SANITARY SEWER SYSTEMS

This Order was adopted by the State Water Resources Control Board on December 6, 2022.
This Order shall become effective **180 days after the Adoption Date of this General Order,** on June 5, 2023. The Enrollee shall comply with the requirements of this Order upon the Effective Date of this General Order.

This General Order does not convey any property rights of any sort or any exclusive privileges. The requirements prescribed herein do not authorize the commission of any act causing injury to persons or property, protect the Enrollee from liability under federal, state, or local laws, nor create a vested right for the Enrollee to continue the discharge of waste.

CERTIFICATION

I, Jeanine Townsend, Clerk to the Board, do hereby certify that this Order with all attachments is a full, true, and correct copy of the Order adopted by the State Water Board on December 6, 2022.

1. INTRODUCTION

This General Order regulates sanitary sewer systems designed to convey sewage. For the purpose of this Order, a sanitary sewer system includes, but is not limited to, pipes, valves, pump stations, manholes, siphons, wet wells, diversion structures and/or other pertinent infrastructure, upstream of a wastewater treatment plant headworks. A sanitary sewer system includes:

- Laterals owned and/or operated by the Enrollee;
- Satellite sewer systems; and/or
- Temporary conveyance and storage facilities, including but not limited to temporary piping, vaults, construction trenches, wet wells, impoundments, tanks and diversion structures.

Sewage is untreated or partially treated domestic, municipal, commercial and/or industrial waste (including sewage sludge), and any mixture of these wastes with inflow or infiltration of stormwater or groundwater, conveyed in a sanitary sewer system. Sewage contains high levels of suspended solids, non-digested organic waste, pathogenic bacteria, viruses, toxic pollutants, nutrients, oxygen-demanding organic compounds, oils, grease, pharmaceuticals, and other harmful pollutants.

For the purpose of this General Order, a spill is a discharge of sewage from any portion of a sanitary sewer system due to a sanitary sewer system overflow, operational failure, and/or infrastructure failure. Sewage and its associated wastewater spilled from a sanitary sewer system may threaten public health, beneficial uses of waters of the State, and the environment.

This General Order serves as statewide waste discharge requirements and supersedes the previous State Water Resources Control Board (State Water Board) Order 2006-0003-DWQ and amendments thereafter. All sections and attachments of this General Order are enforceable by the State Water Board and Regional Water Quality Control Boards (Regional Water Boards). Through this General Order, the State Water Board requires an Enrollee to:

- Comply with federal and state prohibitions of discharge of sewage to waters of the State, including federal waters of the United States;
- Comply with specifications, and notification, monitoring, reporting and recordkeeping requirements in this General Order that implement the federal Clean Water Act, the California Water Code (Water Code), water quality control plans (including Regional Water Board Basin Plans) and policies;
- Proactively operate and maintain resilient sanitary sewer systems to prevent spills;
- Eliminate discharges of sewage to waters of the State through effective implementation of a Sewer System Management Plan;
- Monitor, track, and analyze spills for ongoing system-specific performance improvements; and
- Report noncompliance with this General Order per reporting requirements.

An Enrollee is a public, private, or other non-governmental entity that has obtained approval for regulatory coverage under this General Order, including:

- A state agency, municipality, special district, or other public entity that owns and/or operates one or more sanitary sewer systems:
  - greater than one (1) mile in length (each individual sanitary sewer system);
  - one (1) mile or less in length where the State Water Board or a Regional Water Board requires regulatory coverage under this Order; or
- A federal agency, private company, or other non-governmental entity that owns and/or operates a sanitary sewer system of any size where the State Water Board or a Regional Water Board requires regulatory coverage under this Order in response to a history of spills, proximity to surface water, or other factors supporting regulatory coverage.

For the purpose of this Order, a sanitary sewer system includes only systems owned and/or operated by the Enrollee.

2. REGULATORY COVERAGE AND APPLICATION REQUIREMENTS

2.1. Requirements for Continuation of Existing Regulatory Coverage

To continue regulatory coverage from previous Order 2006-0003-DWQ under this General Order, **within the 60-days-prior-to the Effective Date of this General Order**, the Legally Responsible Official of an existing Enrollee shall electronically certify the Continuation of Existing Regulatory Coverage form in the online California Integrated Water Quality System (CIWQS) Sanitary Sewer System Database. The Legally Responsible Official will receive an automated CIWQS-issued Notice of Applicability email, confirming continuation of regulatory coverage under this General Order. All regulatory coverage under previous Order 2006-0003-DWQ will cease on the Effective Date of this Order.

An Enrollee continuing existing regulatory coverage is not required to submit a new application package or pay an application fee for enrollment under this General Order. The annual fee due date for continued regulatory coverage from previous Order 2006-0003-DWQ to this General Order remains unchanged.

A previous Enrollee of Order 2006-0003-DWQ that fails to certify the Continuation of Existing Regulatory Coverage form in the online CIWQS database by the Effective Date of this Order is considered a New Applicant, and will not have regulatory coverage for its sanitary sewer system(s) until:

- A new application package for system(s) enrollment is submitted per section 2.2 (Requirements for New Regulatory Coverage) below; and
- The new application package is approved per section 2.2.2 (Approval of Application Package (For New Applicants Only)).

2.2. Requirements for New Regulatory Coverage

No later than 60 days prior to commencing and/or assuming operation and maintenance responsibilities of a sanitary sewer system, a duly authorized representative that

maintains legal authority over the public or private sanitary sewer system is required to enroll under this General Order by submitting a complete application package as specified below and as provided in Attachment B (Application for Enrollment Form) of this General Order.

Unless required by a Regional Water Board, a public agency that owns a combined sewer system subject to the Combined Sewer Overflow Control Policy (33 U.S. Code § 1342(q)), is not required to enroll, under this Order, the portions of its sanitary sewer system(s) that collects combined sanitary wastewater and stormwater.

2.2.1. Application Package Requirements

The Application for Enrollment package for new applicants must include the following items:

- **Application for Enrollment Form**. The form in Attachment B of this General Order must be completed, signed, and certified by a Legally Responsible Official, in accordance with section 5.1 (Designation of a Legally Responsible Official) of this General Order. If an electronic Application for Enrollment form is available at the time of application, a new applicant shall submit its application form electronically; and
- **Application Fee**. A fee payable to the "State Water Resources Control Board" in accordance with the Fee Schedule in the California Code of Regulations, Title 23, section 2200, or subsequent fee regulations updates.

  The application fee for this General Order is based on the sanitary sewer system's threat to water quality and complexity designations of category 2C or 3C, which is assigned based on the population served by the system. The current Fee Schedule for sanitary sewer systems is listed under subdivision (a)(2) at the following website: Fee Schedule (https://www.waterboards.ca.gov/resources/fees/water_quality/).

2.2.2. Approval of Application Package (For New Applicants Only)

The Deputy Director of the State Water Board, Division of Water Quality (Deputy Director) will consider approval of each complete Application for Enrollment package. The Deputy Director will issue a Notice of Applicability letter which serves as approved regulatory coverage for the new Enrollee.

If the submitted application package is not complete in accordance with section 2.2.1 (Application Package Requirements) of this General Order, the Deputy Director will send a response letter to the applicant outlining the application deficiencies. The applicant will have 60 days from the date of the response letter to correct the application deficiencies and submit the identified items necessary to complete the application package to the State Water Board.

2.2.3. Electronic Reporting Account for New Enrollee

Within 30 days after the date of the Approval of Complete Application Package for System Enrollment, a duly authorized representative for the Enrollee shall obtain a CIWQS Sanitary Sewer System Database user account by clicking the "User Registration" button and following the directions on the CIWQS Login Page

(https://ciwqs.waterboards.ca.gov). If additional assistance is needed to establish an online CIWQS user account, contact State Water Board staff by email at CIWQS@waterboards.ca.gov. The online user account will provide the Enrollee secure access to the online CIWQS database for electronic reporting.

2.3. Regulatory Coverage Transfer

Regulatory coverage under this General Order is not transferable to any person or party except after an existing Enrollee submits a written request for a regulatory coverage transfer to the Deputy Director, at least 60 days in advance of any proposed system ownership transfer. The written request must include a written agreement between the existing Enrollee and the new Enrollee containing:

- Acknowledgement that the transfer of ownership is solely of an existing system with an existing waste discharge identification (WDID) number;
- The specific ownership transfer date in which the responsibility and regulatory coverage transfer between the existing Enrollee and the new Enrollee becomes effective; and
- Acknowledgement that the existing Enrollee is liable for violations occurring up to the ownership transfer date and that the new Enrollee is liable for violations occurring on and after the ownership transfer date.

The Deputy Director will consider approval of the written request. If approved, the Deputy Director will issue a Notice of Applicability letter which serves as an approved transfer of regulatory coverage to the new Enrollee.

3. FINDINGS

3.1. Legal Authorities

3.1.1. Federal and State Regulatory Authority

The objective of the Clean Water Act is to restore and maintain the chemical, physical, and biological integrity of the waters of the United States (33 U.S.C. 1251). The Water Code authorizes the State Water Board to implement the Clean Water Act in the State and to protect the quality of all waters of the State (Water Code sections 13000 and 13160).

3.1.2. Discharge of Sewage

A discharge of untreated or partially treated sewage is a discharge of waste as defined in Water Code section 13050(d) that could affect the quality of waters of the State and is subject to regulation by waste discharge requirements issued pursuant to Water Code section 13263 and Chapter 9, Division 3, Title 23 of the California Code of Regulations. A discharge of sewage may pollute and alter the quality of the waters of the State to a degree that unreasonably affects the beneficial uses of the receiving water body or facilities that serve those beneficial uses (Water Code section 13050(l)(1)).

3.1.3 Water Boards Authority to Require Technical Reports, Monitoring, and Reporting

Water Code sections 13267 and 13383 authorize the Regional Water Boards and the State Water Board to establish monitoring, inspection, entry, reporting, and recordkeeping requirements. Water Code section 13267(b), authorizes the Regional Water Boards to "require any person who has discharged, discharges, or is suspected of having discharged or discharging, or who proposes to discharge waste within its region… or is suspected of having discharged or discharging, or who proposes to discharge, waste outside of its region that could affect the quality of water within its region shall furnish, under penalty of perjury, technical or monitoring reports which the regional board requires…In requiring those reports, the regional board shall provide the person with a written explanation with regard to the need for the reports and shall identify the evidence that supports requiring that person to provide the reports." Water Code section 13267(f) authorizes the State Water Board to require this information if it consults with the Regional Water Boards and determines that it will not duplicate the efforts of the Regional Water Boards. The State Water Board has consulted with the Regional Water Boards and made this determination.

The technical and monitoring reports required by this General Order and Attachment E (Notification, Monitoring, Reporting and Recordkeeping Requirements) are necessary to evaluate and ensure compliance with this General Order. The effort to develop required technical reports will vary depending on the system size and complexity and the needs of the specific technical report. The burden and cost of these reports are reasonable and consistent with the interest of the state in protecting water quality, which is the primary purpose of requiring the reports.

Water Code section 13383(a) authorizes the Water Boards to "establish monitoring, inspection, entry, reporting, and recordkeeping requirements… for any person who discharges, or proposes to discharge, to navigable waters, any person who introduces pollutants into a publicly owned treatment works, any person who owns or operates, or proposes to own or operate, a publicly owned treatment works or other treatment works treating domestic sewage, or any person who uses or disposes, or proposes to use or dispose, of sewage sludge." Section 13383(b) continues, "the state board or the regional boards may require any person subject to this section to establish and maintain monitoring equipment or methods, including, where appropriate, biological monitoring methods, sample effluent as prescribed, and provide other information as may be reasonably required."

Reporting of spills from privately owned sewer laterals and systems pursuant to section 5.15 (Voluntary Reporting of Spills from Privately-Owned Sewer Laterals and/or Private Sanitary Sewer Systems) of this General Order is authorized by Water Code section 13225(c) and encouraged by the State Water Board, wherein a local agency may investigate and report on any technical factors involved in water quality control provided the burden including costs of such reports bears a reasonable relationship to the need for the report and the benefits to be obtained therefrom. The burden of reporting private spills under section 5.15 (Voluntary Reporting of Spills from Privately-Owned Sewer Laterals and/or Private Sanitary Sewer Systems) is minimal and is outweighed by the benefit of providing Regional Water Boards an opportunity to respond to these spills

when an Enrollee, which in many cases has a contractual relationship with the owner of the private system, has knowledge of the spills.

3.1.4. Water Board Authority to Prescribe General Waste Discharge Requirements

Water Code section 13263(i) provides that the State Water Board may prescribe general waste discharge requirements for a category of discharges if the State Water Board finds or determines that:

- The discharges are produced by the same or similar operations;
- The discharges involve the same or similar types of waste;
- The discharges require the same or similar treatment standards; and
- The discharges are more appropriately regulated under general waste discharge requirements than individual waste discharge requirements.

Since 2006, the State Water Board has been regulating over 1,100 publicly owned sanitary sewer systems (See section 3.1.5 (Previous Statewide General Waste Discharge Requirements) of this General Order). California also has a large unknown number of unregulated privately owned sanitary sewer systems. All waste conveyed in publicly owned and privately owned sanitary sewer systems (as defined in this General Order) is comprised of untreated or partially treated domestic waste and/or industrial waste. Generally, sanitary sewer systems are designed and operated to convey waste by gravity or under pressure; system-specific design elements and system-specific operations do not change the common nature of the waste, the common threat to public health, or the common impacts on water quality. Spills of waste from a sanitary sewer system prior to reaching the ultimate downstream treatment facility are unauthorized and enforceable by the State Water Board and/or a Regional Water Board. Therefore, spills from sanitary sewer systems are more appropriately regulated under general waste discharge requirements.

As specified in Water Code sections 13263(a) and 13241, the implementation of requirements set forth in this Order is for the reasonable protection of past, present, and probable future beneficial uses of water and the prevention of nuisance. The requirements implement the water quality control plans (Basin Plans) for each Regional Water Board and take into account the environmental characteristics of sewer service areas and hydrographic units within the state. Additionally, the State Water Board has considered water quality conditions that could reasonably be achieved through the coordinated control of all factors that affect water quality, costs associated with compliance with these requirements, the need for developing housing within California, and the need to protect sources of drinking water and other water supplies.

3.1.5. Previous Statewide General Waste Discharge Requirements

On May 2, 2006, the State Water Board adopted Order 2006-0003-DWQ serving as Waste Discharge Requirements pursuant to Article 4, Chapter 4, Division 7 of the Water Code (commencing with section 13260) for inadvertent discharges to waters of the State. Order 2006-0003-DWQ prohibited discharges of untreated or partially treated sewage. Order 2006-0003-DWQ also required system-specific management, operation, and maintenance of publicly owned sewer systems greater than one mile in length.

To decrease the impacts on human health and the environment caused by sewage spills, the previous Order required enrollees to develop a rehabilitation and replacement plan that identifies system deficiencies and prioritizes short-term and long-term rehabilitation actions. The previous Order also required enrollees to:

1. Maintain information that can be used to establish and prioritize appropriate Sewer System Management Plan activities; and
2. Implement a proactive approach to reduce spills.

The previous Order required Sewer System Management Plan elements for "the proper and efficient management, operation, and maintenance of sanitary sewer systems, while taking into consideration risk management."

On July 30, 2013, the State Water Board amended General Order 2006-0003-DWQ with Order WQ 2013-0058-EXEC, Amending Monitoring and Reporting Program for Statewide General Waste Discharge Requirements for Sanitary Sewer Systems.

Many enrollees of Order 2006-0003-DWQ have already implemented proactive measures to reduce sewage spills. Other enrollees, however, still need technical assistance and funding to improve sanitary sewer system operation and maintenance for the reduction of sewage spills.

3.1.6. Existing Memorandum of Agreement with California Water Environment Association

The California Water Environment Association is a nonprofit organization dedicated to providing water industry certifications, training, and networking opportunities. The Association's Technical Certification Program provides accredited sanitary sewer system operator certification for collection system operators and maintenance workers.

On February 10, 2016, the State Water Board entered into a collaborative agreement with the Association titled *Memorandum of Agreement Between the California State Water Resources Control Board and the California Water Environment Association - Training Regarding Requirements Set Forth in Statewide General Waste Discharge Requirements for Sanitary Sewer Systems*. The Memorandum sets forth collaborative training necessary for regulated sanitary sewer system personnel to operate and maintain a well operating system and ensure full compliance with statewide sewer system regulations.

On March 15, 2018, the State Water Board and the California Water Environment Association amended the existing Memorandum of Agreement to include collaborative outreach and expand training needs associated with further updates to Water Board regulations for sanitary sewer systems. The State Water Board encourages further Agreement updates as necessary to support improved sewer system operations and the professionalism of collection system operators.

3.2. General

3.2.1. Waters of the State

Waters of the State include any surface water or groundwater, including saline waters, within the boundaries of the state as defined in Water Code section 13050(e), and are inclusive of waters of the United States.

3.2.2. Sanitary Sewer System Spill Threats to Public Health and Beneficial Uses

Sewage contains high levels of suspended solids, pathogenic organisms, toxic pollutants, nutrients, oxygen-demanding organic compounds, oil and grease and other pollutants. Sewage spills may cause a public nuisance, particularly when sewage is discharged to areas with high public exposure such as streets and surface waters used for drinking, irrigation, fishing, recreation, or other public consumption or contact uses.

More specifically, sanitary sewer spills may:

- Adversely affect aquatic life and/or threaten water quality when reaching receiving waters;
- Inadvertently release trash, including plastics;
- Impair the recreational use and aesthetic enjoyment of surface waters by polluting surface water or groundwater;
- Threaten public health through direct public exposure to bacteria, viruses, intestinal parasites, and other microorganisms that can cause serious illness such as gastroenteritis, hepatitis, cryptosporidiosis, and giardiasis;
- Negatively impact ecological receptors and biota within surface waters; and
- Cause nuisance including odors, closure of beaches and recreational areas, and property damage.

Sanitary sewer system spills may pollute receiving waters and threaten beneficial uses of surface water and groundwater. Potentially threatened beneficial uses include, but are not limited to the following (with associated acronym representations as included in statewide water quality control plans and Regional Water Boards' Basin Plans):

- Municipal and Domestic Supply (MUN)
- Water Contact Recreation (REC-1) and Non-Contact Water Recreation (REC-2)
- Cold Freshwater Habitat (COLD)
- Warm Freshwater Habitat (WARM)
- Native American Culture (CUL)
- Wildlife Habitat (WILD)
- Rare, Threatened, or Endangered Species (RARE)
- Spawning, Reproduction, and/or Early Development (SPWN)
- Wetland Habitat (WET)
- Agricultural Supply (AGR)
- Estuarine Habitat (EST)

- Commercial and Sport Fishing (COMM)
- Subsistence Fishing (SUB)
- Tribal Tradition and Culture (CUL)
- Tribal Subsistence Fishing (T-SUB)
- Aquaculture (AQUA)
- Marine Habitat (MAR)
- Preservation of Biological Habitats of Special Significance (BIOL)
- Migration of Aquatic Organisms (MIGR)
- Shellfish Harvesting (SHELL)
- Industrial Process Supply (PROC)
- Industrial Service Supply (IND)
- Hydropower Generation (POW)
- Navigation (NAV)
- Flood Peak Attenuation/Flood Water Storage (FLD)
- Water Quality Enhancement (WQE)
- Fresh Water Replenishment (FRSH)
- Groundwater Recharge (GWR)
- Inland Saline Water Habitat (SAL)

3.2.3. Proactive Sanitary Sewer System Management to Eliminate Spill Causes

Finding 3 of the previous Order, 2006-0003-DWQ, states: “Sanitary sewer systems experience periodic failures resulting in discharges that may affect waters of the state. There are many factors (including factors related to geology, design, construction methods and materials, age of the system, population growth, and system operation and maintenance), which affect the likelihood of an SSO [sanitary sewer overflow]. A proactive approach that requires Enrollees to ensure a system-wide operation, maintenance, and management plan is in place will reduce the number and frequency of SSOs within the state. This approach will in turn decrease the risk to human health and the environment caused by SSOs.”

Many spills are preventable through proactive attention on sanitary sewer system management using the best practices and technologies available to address major causes of spills, including but not limited to:

- Blockages from sources including but not limited to:
  - Fats, oils and grease;
  - Tree roots;
  - Rags, wipes and other paper, cloth and plastic products; and
  - Sediment and debris.
- Sewer system damage and exceedance of sewer system hydraulic capacity from identified system-specific environmental, and climate-change impacts, including but not limited to:

- Sea level rise impacts including flooding, coastal erosion, seawater intrusion, tidal inundation and submerged lands;
- Increased surface water flows due to higher intensity rain events;
- Flooding;
- Wildfires and wildfire induced impacts;
- Earthquake induced damage;
- Landslides; and
- Subsidence.

- Infrastructure deficiencies and failures, including but not limited to:
  - Pump station mechanical failures;
  - System age;
  - Construction material failures;
  - Manhole cover failures;
  - Structural failures; and
  - Lack of proper operation and maintenance.
- Insufficient system capacity (temporary or sustained), due to factors including but not limited to:
  - Excessive and/or increased storm or groundwater inflow/infiltration;
  - Insufficient capacity due to population increase and/or new connections from industrial, commercial and other system users; and
  - Stormwater capture projects utilizing a sanitary sewer system to convey stormwater to treatment facilities for reuse.
- Community impacts, including but not limited to:
  - Power outages;
  - Vandalism; and
  - Contractor-caused or other third party-caused damages.

3.2.4. Underground Sanitary Sewer System Leakage

Portions of some sanitary sewer systems may leak, causing underground exfiltration (exiting) of sewage from the system. Exfiltrated sewage that remains in the underground infrastructure trench and/or the soil matrix, and that does not discharge into waters of the State (surface water or groundwater) may not threaten beneficial uses.

Underground exfiltrated sewage may threaten beneficial uses if discharged to waters of the State. Exfiltrated sewage that discharges to groundwater may impact beneficial uses of groundwater and pollute groundwater supply. Additionally, if in close proximity, exfiltrated sewage may enter into a compromised underground drainage conveyance system that discharges into a water of the United States, or into groundwater that is hydrologically connected to (feeds into) a water of the United States, thus potentially causing: (1) a Clean Water Act violation, (2) threat and impact to beneficial uses, and/or (3) surface water pollution.

3.2.5. Proactive Sanitary Sewer System Management to Reduce Inflow and Infiltration

Excessive inflow (stormwater entering) and infiltration (groundwater seepage entering) to sanitary sewer systems is preventable through proactive sewer system management using the best practices and technologies available. The efficiency of the downstream wastewater treatment processes is dependent on the performance of the sanitary sewer system. When the structural integrity of a sanitary sewer system deteriorates, high volumes of inflow and infiltration can enter the sewer system. High levels of inflow and infiltration increase the hydraulic load on the downstream treatment plant, which can reduce treatment efficiency, lead to bypassing a portion of the treatment process, cause illegal discharge of partially treated effluent, or in extreme situations make biological treatment facilities inoperable (e.g., wash out the biological organisms that treat the waste).

3.3. Water Quality Control Plans, Policies and Resolutions

The nine Regional Water Boards have adopted region-specific water quality control plans (commonly referred to as Basin Plans) that designate beneficial uses, establish water quality objectives, and contain implementation programs and policies to achieve those objectives. The State Water Board has adopted statewide water quality control plans, policies and resolutions establishing statewide water quality objectives, implementation programs and initiatives.

3.3.1. State Water Board Antidegradation Policy

On October 28, 1968, the State Water Board adopted Resolution 68-16, titled Statement of Policy with Respect to Maintaining High Quality of Waters in California, which incorporates the federal antidegradation policy. Resolution 68-16 requires that existing water quality be maintained unless degradation is justified based on specific findings.

The continued prohibition of sewage discharges from sanitary sewer systems into waters of the State aligns with Resolution 68-16. A sewage discharge from sanitary sewers to waters of the State is prohibited by this Order. Therefore, this Order does not allow degradation of waters of the State. In addition, this Order: (1) further expands the existing prohibition of sewage discharges to include waters of the State, in addition to waters of the United States as provided in previous Order 2006-0003-DWQ, and (2) enhances the ability for Water Board enforcement of violations of the established prohibitions.

3.3.2. State Water Board Sources of Drinking Water Policy

On May 19,1988, the State Water Board adopted Resolution 88-63 (amended on February 1, 2006), titled Sources of Drinking Water, establishing state policy that all waters of the State, with certain exceptions, are suitable or potentially suitable for municipal or domestic supply.

3.3.3. State Water Board Cost of Compliance Resolution

On September 24, 2013, the State Water Board adopted Resolution 2013-0029, titled Directing Actions in Response to Efforts by Stakeholders on Reducing Costs of

Compliance While Maintaining Water Quality Protection. Through this resolution, the State Water Board committed to continued stakeholder engagement in identifying and implementing measures to reduce costs of compliance with regulatory orders while maintaining water quality protection and improving regulatory program outcomes.

3.3.4. State Water Board Human Right to Water Resolution

On February 16, 2016, the State Water Board adopted Resolution 2016-0010, titled Adopting the Human Right to Water as a Core Value and Directing its Implementation in Water Board Programs and Activities, addressing the human right to water as a core value and directing Water Board programs to implement requirements to support safe drinking water for all Californians.

On November 16, 2021, the State Water Board adopted Resolution 2021-0050 titled Condemning Racism, Xenophobia, Bigotry, and Racial Injustice, and Strengthening Commitment to Racial Equity, Diversity, Inclusion, Access, and Anti-racism. Among other actions, through Resolution 2021-0050, the State Water Board, in summary as corresponding to this General Order, reaffirms its commitment to its Human Right to Water resolution, upholding that every human being in California deserves safe, clean, affordable, and accessible water for human consumption, cooking, and sanitation purposes. Resolution 2021-0050 provides the State Water Board commitment to:

- Protect public health and beneficial uses of waterbodies in all communities, including communities disproportionately burdened by wastes discharge of waste to land and surface water;
- Restore impaired surface waterbodies and degraded aquifers; and
- Promote multi-benefit water quality projects.

Through Resolution 2021-0050, the State Water Board also commits to expanding implementation of its Climate Change Resolution to address the disproportionate effects of extreme hydrologic conditions and sea-level rise on Black, Indigenous, and people of color communities, prioritizing:

- The right to safe, clean, affordable, and accessible drinking water and sanitation;
- Sustainable management and protection of local groundwater resources;
- Healthy watersheds; and
- Access to surface waterbodies that support subsistence fishing.

On June 7, 2022, the State Water Board adopted a Resolution, titled Authorizing the Executive Director or Designee to Enter into One or More Multi-Year Contracts Up to a Combined Sum of $4,000,000 for a Statewide Wastewater Needs Assessment, supporting the equitable access to sanitation for all Californians and implementation of Resolutions 2016-0010 and 2021-0050.

This General Order supports the State Water Board priority in collecting a comprehensive set of data for California's wastewater systems, including sanitary sewer systems. Data reported per the requirements of this Order will be used with data from other Water Boards' programs, to further develop criteria and create a statewide risk

framework to prioritize critical funding and infrastructure investments for California's most vulnerable populations, including disadvantaged or severely disadvantaged communities with inadequate or failing sanitation systems and threatened access to healthy drinking water supplies.

3.3.5. State Water Board Open Data Resolution

On July 10, 2018, the State Water Board adopted Resolution 2018-0032, titled Adopting Principles of Open Data as a Core Value and Directing Programs and Activities to Implement Strategic Actions to Improve Data Accessibility and Associated Innovation, directing regulatory programs to assure all monitoring and reporting requirements support the State Water Boards' Open Data Initiative.

3.3.6. State Water Board Response to Climate Change

On March 7, 2017, the State Water Board adopted Resolution 2017-0012, titled Comprehensive Response to Climate Change, requiring a proactive response to climate change in all California Water Board actions, with the intent to embed climate change consideration into all programs and activities.

3.4. California Environmental Quality Act

The adoption of this Order is an action to reissue general waste discharge requirements that is exempt from the California Environmental Quality Act (Public Resources Code section 21000 et seq.) because it is an action taken by a regulatory agency to assure the protection of the environment and the regulatory process involves procedures for protection of the environment (Cal. Code Regs., Title 14, section 15308). In addition, the action to adopt this Order is exempt from CEQA pursuant to Cal. Code Regs., Title 14, section 15301, to the extent that it applies to existing sanitary sewer collection systems that constitute "existing facilities" as that term is used in sections 15301 and 15302, to the extent that it results in the repair or replacement of existing systems involving negligible or no expansion of capacity.

3.5. State Water Board Funding Assistance for Compliance with Water Board Water Quality Orders

The State Water Board, Division of Financial Assistance administers the implementation of the State Water Board financial assistance programs, per Board-adopted funding policies. Among other funding areas, the Division administers loan and grant funding for the planning and construction of wastewater and water recycling facilities per funding program-specific policies and guidelines. Applicants may apply for Clean Water State Revolving Fund low-interest loan, Small Community Wastewater grant funding assistance, and other funding available at the time of application, for some of the costs associated with complying with this General Order.

Funding applicants may obtain further information regarding current funding opportunities, and Division of Financial Assistance staff contact information at the following website: Financial Assistance Funding - Grants and Loans | California State Water Resources Control Board.
(https://www.waterboards.ca.gov/water_issues/programs/grants_loans/)

Section 13477.6 of the Water Code authorizes the Small Community Grant Fund. The Small Community Grant Fund allows the State Water Board to provide grant funding assistance to small, disadvantaged communities and small severely disadvantaged communities that may not otherwise be able to afford a loan or similar financing for projects to comply with requirements of this General Order. The State Water Board also considers loan forgiveness on a disadvantaged community-specific basis.

For disadvantaged communities' wastewater needs, the State Water Board places priority on the funding of projects that address:

- Public health;
- Violations of waste discharge requirements and National Pollutant Discharge Elimination System (NPDES) permits;
- Providing sewer system service to existing septic tank owners; and
- High priority public health and water quality concerns identified by a Regional Water Board.

3.6. Notification to Interested Parties

On January 31, 2022, the State Water Board notified interested parties and persons of its intent to reissue Sanitary Sewer Systems General Order 2006-0003-DWQ by issuing a draft General Order for a 60-day public comment period. State Water Board staff conducted extensive stakeholder outreach and encouraged public participation in the adoption process for this General Order. On March 15, 2022, the State Water Board held a public meeting to hear and consider oral public comments. The State Water Board considered all public comments prior to adopting this General Order.

THEREFORE, IT IS HEREBY ORDERED, that pursuant to Water Code sections 13263, 13267, and 13383 this General Order supersedes Order 2006-0003-DWQ, Order WQ 2013-0058-EXEC, and any amendments made to these Orders thereafter, except for enforcement purposes and to meet the provisions contained in Division 7 of the Water Code (commencing with section 13000) and regulations adopted thereunder, and the provisions of the Clean Water Act and regulations and guidelines adopted thereunder, the Enrollee shall comply with the requirements in this Order.

4. PROHIBITIONS

4.1 Discharge of Sewage from a Sanitary Sewer System

Any discharge from a sanitary sewer system that has the potential to discharge to surface waters of the State is prohibited unless it is promptly cleaned up and reported as required in this General Order.

4.2. Discharge of Sewage to Waters of the State

Any discharge from a sanitary sewer system, discharged directly or indirectly through a drainage conveyance system or other route, to waters of the State is prohibited.

4.3. Discharge of Sewage Creating a Nuisance

Any discharge from a sanitary sewer system that creates a nuisance or condition of pollution as defined in Water Code section 13050(m) is prohibited.

5. SPECIFICATIONS

5.1. Designation of a Legally Responsible Official

The Enrollee shall designate a Legally Responsible Official that has authority to ensure the enrolled sanitary sewer system(s) complies with this Order, and is authorized to serve as a duly authorized representative. The Legally Responsible Official must have responsibility over management of the Enrollee's entire sanitary sewer system, and must be authorized to make managerial decisions that govern the operation of the sanitary sewer system, including having the explicit or implicit duty of making major capital improvement recommendations to ensure long-term environmental compliance. The Legally Responsible Official must have or have direct authority over individuals that:

- Possess a recognized degree or certificate related to operations and maintenance of sanitary sewer systems, and/or
- Have professional training and experience related to the management of sanitary sewer systems, demonstrated through extensive knowledge, training and experience.

For example, a sewer system superintendent or manager, an operations manager, a public utilities manager or director, or a district engineer may be designated as a Legally Responsible Official.

The Legally Responsible Official shall complete the electronic CIWQS "User Registration" form (https://ciwqs.waterboards.ca.gov/ciwqs/newUser.jsp). A Legally Responsible Official that represents multiple enrolled systems shall complete the electronic CIWQS "User Registration" form for each system.

The Enrollee shall submit any change to its Legally Responsible Official, and/or change in contact information, to the State Water Board within 30 calendar days of the change by emailing ciwqs@waterboards.ca.gov and copying the appropriate Regional Water Board as provided in Attachment F (Regional Water Quality Control Board Contact Information) of this General Order.

5.2. Sewer System Management Plan Development and Implementation

To facilitate adequate local funding and management of its sanitary sewer system(s), the Enrollee shall develop and implement an updated Sewer System Management Plan. The scale and complexity of the Sewer System Management Plan, and specific elements of the Plan, must match the size, scale and complexity of the Enrollee's sanitary sewer system(s). The Sewer System Management Plan must address, at minimum, the required Plan elements in Attachment D (Sewer System Management Plan – Required Elements) of this General Order. To be effective, the Sewer System Management Plan must include procedures for the management, operation, and maintenance of the sanitary sewer system(s). The procedures must: (1) incorporate the

prioritization of system repairs and maintenance to proactively prevent spills, and (2) address the implementation of current standard industry practices through available equipment, technologies, and strategies.

For an existing Enrollee under Order 2006-0003-DWQ that has certified its Continuation of Existing Regulatory Coverage, per section 2.1 (Requirements for Continuation of Existing Regulatory Coverage) of this General Order:

Within six (6) months of the Adoption Date of this General Order:

- The Legally Responsible Official shall upload the Enrollee's existing Sewer System Management Plan to the online CIWQS Sanitary Sewer System Database.

For a new Enrollee:

Within twelve (12) months of the Application for Enrollment approval date:

- The governing entity of the new Enrollee shall approve its Sewer System Management Plan; and
- The Legally Responsible Official shall certify and upload its Sewer System Management Plan to the online CIWQS Sanitary Sewer System Database.

5.3. Certification of Sewer System Management Plan and Plan Updates

The Legally Responsible Official shall certify and upload its Sewer System Management Plan and all subsequent updates to the online CIWQS Sanitary Sewer System Database.

5.4. Sewer System Management Plan Audits

The Enrollee shall conduct an internal audit of its Sewer System Management Plan, and implementation of its Plan, at a minimum frequency of once every three years. The audit must be conducted for the period after the end of the Enrollee's last required audit period. **Within six months after the end of the required 3-year audit period**, the Legally Responsible Official shall submit an audit report into the online CIWQS Sanitary Sewer System Database per the requirements in section 3.10 (Sewer System Management Plan Audit Reporting Requirements) of Attachment E1 of this General Order.

Audit reports submitted to the CIWQS Sanitary Sewer System Database will be viewable only to Water Boards staff.

The internal audit shall be appropriately scaled to the size of the system(s) and the number of spills. The Enrollee's sewer system operators must be involved in completing the audit. At minimum, the audit must:

- Evaluate the implementation and effectiveness of the Enrollee's Sewer System Management Plan in preventing spills;
- Evaluate the Enrollee's compliance with this General Order;
- Identify Sewer System Management Plan deficiencies in addressing ongoing spills and discharges to waters of the State; and

- Identify necessary modifications to the Sewer System Management Plan to correct deficiencies.

The Enrollee shall submit a complete audit report that includes:

- Audit findings and recommended corrective actions;
- A statement that sewer system operators' input on the audit findings has been considered; and
- A proposed schedule for the Enrollee to address the identified deficiencies.

A new Enrollee of this General Order (that did not have a sanitary sewer system enrolled in the previous State Water Board Order 2006-0003-DWQ) shall conduct its first internal Sewer System Management Plan audit for the time period between the date of submittal of its certified Sewer System Management Plan and the third subsequent December 31st date. The audit report must be submitted into the online CIWQS Sanitary Sewer System Database **by July 1 of the following calendar year**.

See the following tables for clarification:

Initial Audit Period and Audit Due Date for New Enrollees

	Audit Period	Audit Due Date
New Enrollee	Certified Sewer System Management Plan Submittal Date through the third subsequent December 31st date	July 1st date after audit period
Example	*Certified Sewer System Management Plan Submittal Date of August 2, 2025* *Audit Period of August 2, 2025 through December 31, 2027*	*July 1, 2028*

Initial Audit Period for Transition from 2-Year Audit Required in Previous Order 2006-0003-DWQ to 3-Year Audit Required in this General Order

	Audit Period	Audit Due Date
An Enrollee previously regulated by Order 2006-003-DWQ	A 3-year period starting from the end of last required 2-year Audit Period	Within six months after end of 3-year Audit Period
Example	*Last required Audit Period start date of August 2, 2021;* *Audit Period of August 2, 2021 through August 1, 2024*	*February 1, 2025*

Three-Year Ongoing Audit Period

	Audit Period	Audit Due Date
Each Enrollee	A 3-year period starting from the end of last required Audit Period	Within six months after end of 3-year Audit Period

5.5. Six-Year Sewer System Management Plan Update

At a minimum, the Enrollee shall update its Sewer System Management Plan every six (6) years after the date of its last Plan Update due date. (For an Enrollee previously regulated by Order 2006-0003-DWQ, the six-year period shall commence on the due date identified in section 3.11 of Attachment E1 (Notification, Monitoring, Reporting and Recordkeeping Requirements) of this Order. The Updated Sewer System Management Plan must include:

- Elements required in Attachment D (Sewer System Management Plan – Required Elements) of this Order;
- Summary of revisions included in the Plan update based on internal audit findings; and
- Other sewer system management-related changes.

The Enrollee's governing entity shall approve the updated Plan. The Legally Responsible Official shall upload and certify the approved updated Plan in the online CIWQS Sanitary Sewer System Database in accordance with section 3.11 (Sewer System Management Plan Reporting Requirements) of Attachment E1 (Notification, Monitoring, Reporting and Recordkeeping Requirements) of this General Order. During the time period in between Plan updates, the Enrollee shall continuously document changes to its Sewer System Management Plan in a change log attached to the Plan.

5.6. System Resilience

The Enrollee shall include and implement system-specific procedures in its Sewer System Management Plan to proactively prioritize: (1) operation and maintenance, (2) condition assessments, and (3) repair and rehabilitation, to address ongoing system resilience, as specified in Attachment D (Sewer System Management Plan – Required Elements) of this General Order.

5.7. Allocation of Resources

The Enrollee shall:

- Establish and maintain a means to manage all necessary revenues and expenditures related to the sanitary sewer system; and
- Allocate the necessary resources to its sewer system management program for:
  - Compliance with this General Order,
  - Full implementation of its updated Sewer System Management Plan,
  - System operation, maintenance, and repair, and
  - Spill responses.

5.8. Designation of Data Submitters

The Legally Responsible Official may designate one or more individuals as a Data Submitter for reporting of spill data. The Legally Responsible Official shall authorize the designation of Data Submitter(s) through the online CIWQS database (https://ciwqs.waterboards.ca.gov) prior to the individuals establishing a CIWQS user account (https://ciwqs.waterboards.ca.gov/ciwqs/newUser.jsp) and entering spill data into the online CIWQS Sanitary Sewer System Database.

The Legally Responsible Official shall submit any change to its Data Submitter(s), and/or change in Data Submitter contact information, to the State Water Board within 30 calendar days of the change, by emailing ciwqs@waterboards.ca.gov and copying the appropriate Regional Water Board as provided in Attachment F (Regional Water Quality Control Board Contact Information) of this General Order.

5.9. Reporting Certification

The Legally Responsible Official shall electronically certify, on the Enrollee's behalf, all applications, reports, the Sewer System Management Plan(s) and corresponding updates, and other information submitted electronically into the online CIWQS Sanitary Sewer System Database, as follows:

"I certify under penalty of perjury under the laws of the State of California that the electronically submitted information was prepared under my direction or supervision. Based on my inquiry of the person(s) directly responsible for gathering the information, to the best of my knowledge and belief, the information submitted is true, accurate, and complete, and complies with the Statewide Sanitary Sewer Systems General Order. I am aware that there are significant penalties for submitting false information."

Hardcopy submittals to the State Water Board must be accompanied by the above certification statement.

5.10. System Capacity

The Enrollee shall maintain the system capacity necessary to convey: (1) base flows during dry weather conditions, and (2) wet weather peak flows consistent with designated local historic storms. Design storms must take into account system-specific stormwater contributions via inflow and infiltration, and location-specific depth of groundwater and storm frequencies. The Enrollee shall implement capital improvements to provide adequate hydraulic capacity to:

- Meet or exceed the design criteria as defined in the Enrollee's System Evaluation and Capacity Assurance element of its Sewer System Management Plan; and
- Prevent system capacity-related spills, and adverse impacts to the treatment efficiency of downstream wastewater treatment facilities.

5.11. System Performance Analysis

The Enrollee shall include a running 10-year system performance analysis in its Annual Report. The analysis must include two CIWQS-generated graphs presenting the following information:

Graph 1 – Total Spill Volume per Year:

X axis: A 10-year period which includes the current calendar year and the nine previous calendar years;

Y axis: The total spill volume, per Spill Category, for each calendar year.

Graph 2 – Total Number of Spills per Year:

X axis: A 10-year period which includes the current calendar year and the nine previous calendar years;

Y axis: The total number of spills, per Spill Category, for each calendar year.

The current calendar year is the calendar year covered in the Annual Report.

The Enrollee shall generate the graphs in CIWQS, using the existing data in the online CIWQS Sanitary Sewer System Database at the following graph generation link: (https://ciwqs.waterboards.ca.gov/ciwqs/readOnly/PublicReportSSOServlet?reportAction=criteria&reportId=sso_operation_report).

5.12. Spill Emergency Response Plan and Remedial Actions

For Existing Enrollees (with regulatory coverage under Order 2006-0003-DWQ):

Within six (6) months of the Adoption Date of this General Order, the Enrollee shall update and implement its Spill Emergency Response Plan, per Attachment D, section 6 (Spill Emergency Response Plan) of this General Order.

For New Enrollees:

Within six (6) months of the Application for Enrollment approval date, the Enrollee shall develop and implement a Spill Emergency Response Plan, per Attachment D, section 6 (Spill Emergency Response Plan) of this General Order.

The Enrollee shall certify, in its Annual Report, that its Spill Emergency Response Plan is up to date.

The Spill Emergency Response Plan shall include measures to protect public health and the environment. The Enrollee shall respond to spills from its system(s) in a timely manner that minimizes water quality impacts and nuisance by:

- Immediately stopping the spill and preventing/minimizing a discharge to waters of the State;
- Intercepting sewage flows to prevent/minimize spill volume discharged into waters of the State;
- Thoroughly recovering, cleaning up and disposing of sewage and wash down water; and
- Cleaning publicly accessible areas while preventing toxic discharges to waters of the State.

5.13. Notification, Monitoring, Reporting and Recordkeeping Requirements

The Enrollee shall comply with notification, monitoring, reporting, and recordkeeping requirements in Attachment E1 of this General Order.

5.13.1. Spill Categories

Individual spill notification, monitoring and reporting must be in accordance with the following spill categories:

- **Category 1 Spill**

  A Category 1 spill is a spill of any volume of sewage from or caused by a sanitary sewer system regulated under this General Order that results in a discharge to:

  - A surface water, including a surface water body that contains no flow or volume of water; or
  - A drainage conveyance system that discharges to surface waters when the sewage is not fully captured and returned to the sanitary sewer system or disposed of properly.

    Any spill volume not recovered from a drainage conveyance system is considered a discharge to surface water, unless the drainage conveyance system discharges to a dedicated stormwater infiltration basin or facility.

A spill from an Enrollee-owned and/or operated lateral that discharges to a surface water is a Category 1 spill; the Enrollee shall report all Category 1 spills per section 3.1 of Attachment E1 (Notification, Monitoring, Reporting and Recordkeeping Requirements) of this General Order.

- **Category 2 Spill**

  A Category 2 spill is a spill of 1,000 gallons or greater, from or caused by a sanitary sewer system regulated under this General Order that does not discharge to a surface water.

  A spill of 1,000 gallons or greater that spills out of a lateral and is caused by a failure or blockage in the sanitary sewer system, is a Category 2 spill.

- **Category 3 Spill**

  A Category 3 spill is a spill of equal to or greater than 50 gallons and less than 1,000 gallons, from or caused by a sanitary sewer system regulated under this General Order that does not discharge to a surface water.

  A spill of equal to or greater than 50 gallons and less than 1,000 gallons, that spills out of a lateral and is caused by a failure or blockage in the sanitary sewer system is a Category 3 spill.

- **Category 4 Spill**

  A Category 4 spill is a spill of less than 50 gallons, from or caused by a sanitary sewer system regulated under this General Order that does not discharge to a surface water.

  A spill of less than 50 gallons that spills out of a lateral and is caused by a failure or blockage in the sanitary sewer system is a Category 4 spill.

5.13.2. Annual Report

The Enrollee shall submit an Annual Report (previously termed as Collection System Questionnaire in Order 2006-0003-DWQ) as specified in section 3.9 (Annual Report) of Attachment E1 (Notification, Monitoring, Reporting and Recordkeeping Requirements) of this General Order.

For new Enrollees: Within 30 days of obtaining a CIWQS account, a new Enrollee shall submit its initial Annual Report, as specified in section 3.9 (Annual Report) of Attachment E1 (Notification, Monitoring, Reporting and Recordkeeping Requirements) of this General Order.

5.14. Electronic Sanitary Sewer System Service Area Boundary Map

For continuing enrollees, starting on July 1, 2025, and no later than December 31, 2025:

For new enrollees – no earlier than July 1, 2025, or within 12 months of the Application for Enrollment approval date, whichever date is later:

The Legally Responsible Official shall submit, to the State Water Board, geospatial data detailing the locations of the Enrollee's sanitary sewer system service area boundary, per the required content and specifications in section 3.8 (Electronic Sanitary Sewer System Service Area Boundary Map) of Attachment E1 of this General Order, for each system identified by a WDID number.

An Enrollee of a disadvantaged community that may need assistance developing an electronic map to comply with this requirement, may contact State Water Board staff for assistance at SanitarySewer@waterboards.ca.gov.

5.15. Voluntary Reporting of Spills from Privately-Owned Sewer Laterals and/or Private Sanitary Sewer Systems

Within 24 hours of becoming aware of a spill (as described below) from a private sewer lateral or private sanitary sewer system that is not owned/operated by the Enrollee, the Enrollee is encouraged to report the following observations to the online CIWQS Sanitary Sewer System Database at the following link: https://ciwqs.waterboards.ca.gov:

- A spill equal or greater than 1,000 gallons that discharges (or has a potential to discharge) to a water of the State, or a drainage conveyance system that discharges to waters of the State; **or**
- Any volume of sewage that discharges (or has a potential to discharge) to surface waters.

In the CIWQS module, the Enrollee is encouraged to identify:

- Time of observation;
- Description of general spill location (for example, street name and cross street names);
- Estimated volume of spill;
- If known, general description of spill destination (for example, flowing into drainage channel, flowing directly into a creek, etc.); and
- If known, name of private system owner/operator.

The CIWQS database will make the name and contact information of the entity voluntarily reporting a private spill, accessible to State and Regional Water Board staff only. The CIWQS database will only make information regarding the actual spill, accessible to the public.

5.16. Voluntary Notification of Spills from Privately-Owned Laterals and/or Systems to the California Office of Emergency Services

Upon observing or acquiring knowledge of any of the following from a private sewer lateral or private sanitary sewer system that is not owned/operated by the Enrollee, the Enrollee is encouraged to notify the California Office of Emergency Services (as provided by Health and Safety Code section 5410 et. seq. and Water Code section 13271), or inform the responsible party that State law requires such notification to the Office of Emergency Services by any person that causes or allows a sewage discharge to waters of the State:

- A spill equal to 1,000 gallons or more that discharges (or has a potential to discharge) to waters of the State, or a drainage conveyance system that discharges to waters of the State; or
- A spill of any volume to surface waters.

5.17. Unintended Failure to Report

If an Enrollee becomes aware that they unintentionally failed to submit relevant facts in any report required in this General Order, the Enrollee shall promptly notify Regional Water Board and State Water Board staff. Regional Water Board contact information is included in Attachment F of this Order. State Water Board staff shall be contacted by email at SanitarySewer@waterboards.ca.gov for assistance in formally amending the corresponding report(s) in the online CIWQS Sanitary Sewer System Database.

5.18. Duty to Report to Water Boards

In accordance with Water Code section 13267 and/or section 13383, upon request by the State Water Board Executive Director (or designee) or a Regional Water Board Executive Officer (or designee), the Enrollee shall provide the requested information which the State or Regional Water Board deems necessary to determine compliance with this General Order.

5.19. Operation and Maintenance

To prevent discharges to the environment, the Enrollee shall maintain in good working order, and operate as designed, any facility or treatment and control system designed to contain sewage and convey it to a treatment plant.

6. PROVISIONS

6.1. Enforcement Provisions

The following enforcement provisions are based on existing federal and state regulations, laws and policies, including the federal Clean Water Act, the state Water Code and the State Water Board Enforcement Policy.

6.1.1. Enforceability of Clean Water Act and Water Code Violations

Noncompliance with requirements of this General Order or discharging sewage without enrolling in this General Order constitutes a violation of the Water Code and a potential

violation of the Clean Water Act and is grounds for an enforcement action by the State Water Board or the applicable Regional Water Board. Failure to comply with the notification, monitoring, inspection, entry, reporting, and recordkeeping requirements may subject the Enrollee to administrative civil liabilities of up to $10,000 a day per violation pursuant to Water Code section 13385; up to $1,000 a day per violation pursuant to Water Code section 13268; or referral to the Attorney General for judicial civil enforcement. Discharging waste not in compliance with the requirements of this General Order or the Clean Water Act may subject the Enrollee to administrative civil liabilities up to $10,000 a day per violation and additional liability up to $10 per gallon of discharge not cleaned up after the first 1,000 gallons of discharge; up to $5,000 a day per violation pursuant to Water Code section 13350 or up to $20 per gallon of waste discharged; or referral to the Attorney General for judicial civil enforcement.

6.1.2. Monetary Penalties

The Water Code provides the State and Regional Water Boards the authority to pursue formal enforcement actions, including imposing administrative liability and civil monetary penalties, for non-compliance with the requirements of this General Order and violations of the Clean Water Act.

6.1.3. Falsifying or Failure to Report

The Water Code provides that any person failing or refusing to furnish technical or monitoring program reports, as required under this General Order, or falsifying any information provided in the technical or monitoring reports is subject to administrative liability and civil monetary penalties. Any person who knowingly fails or refuses to furnish technical or monitoring program reports or falsifies any information provided in reports required by this General Order is subject to criminal penalties.

6.1.4. Severability of General Order

The provisions of this General Order are severable; if any provision of this Order, or the application of any provision of this Order to any circumstance, is held invalid, the application of such provision to other circumstances and the remainder of this Order shall not be affected thereby.

6.1.5. Indirect Discharges

In the event that a spill enters into a drainage conveyance system, the Enrollee shall take all feasible steps to prevent discharge of sewage into waters of the State by blocking or redirecting the flow in the drainage conveyance system, removing the sewage from the drainage conveyance system, and cleaning the system in a manner that does not inadvertently impact beneficial uses of the receiving water body.

6.1.6. Water Boards' Considerations for Discretionary Enforcement

Consistent with the State Water Board Enforcement Policy, when considering Water Code section 13327 factors, the State Water Board or a Regional Water Board may consider the Enrollee's efforts to contain, control, clean up, and mitigate spills. In assessing the factors, the State Water Board or the applicable Regional Water Board will consider:

- The Enrollee's compliance with this General Order with a focus on compliance with reporting requirements;
- The Enrollee's provision of adequate funding to implement the requirements of this General Order;
- The Enrollee's compliance with providing a complete and updated Sewer System Management Plan;
- The Enrollee's compliance with implementing its Sewer System Management Plan;
- The overall effectiveness of the Enrollee's Sewer System Management Plan with respect to:
    - System management, operation, and maintenance,
    - Adequate treatment facilities, sanitary sewer system facilities, and/or components with an appropriate design capacity, to reasonably prevent spills (e.g. adequately enlarging treatment or collection facilities to accommodate growth, infiltration and inflow, etc.),
    - Preventive maintenance (including cleaning, root grinding, and fats, oils, and grease control) and source control measures,
    - Implementation of backup equipment,
    - Inflow and infiltration prevention and control,
    - Appropriate sanitary sewer system capacity to prevent spills, and
    - The Enrollee's responsiveness to stop and mitigate the impact of the discharge;
- The Enrollee's compliance with identifying the cause of the spill;
- The Enrollee's use of available information and observations to accurately estimate the spill volume and identify the affected or potentially affected receiving waters;
- The Enrollee's thoroughness of cleaning up sewage in drainage conveyance systems after the spill(s);
- The Enrollee's use of water quality and biological monitoring and assessment to determine the short-term and long-term impacts to beneficial uses and the environment;
- The Enrollee's follow up actions to improve system performance;
- The Enrollee's implementation of feasible alternatives to prevent spills, such as:
    - Use of temporary storage or waste retention,
    - Reduction of system inflow and infiltration,
    - Collection and hauling of waste to a treatment facility,
    - Prevention of and/ or containment of spills due to a design storm event identified in the Enrollee's Sewer System Management Plan,

- Implementation of available equipment, technologies, strategies, and recommended industry practices for maintaining and managing sewer systems to prevent spills, and contain and eliminate discharges to waters of the State; and

- The spill duration and factors beyond the reasonable control of the Enrollee causing the event.

6.1.7. Enforcement Discretion Based on Reporting Compliance

Consistent with the State Water Board Enforcement Policy, the State Water Board or a Regional Water Board may consider the Enrollee's efforts to comply with spill reporting requirements when determining compliance with Water Code section 13267 and section 13383. When assessing Water Code section 13227 factors, the State Water Board or the applicable Regional Water Board will consider:

- The Enrollee's diligence to comply with all reporting requirements in this General Order;
- The use of best available information for the Enrollee's reporting of spill start date and start time in which the release of sewage from the sanitary sewer system initiated;
- The Enrollee's reporting of spill end date, and end time to be the date and time in which the release of sewage from the sanitary sewer system was stopped;
- The Enrollee's diligence to accurately estimate and report spill volumes;
- The Enrollee's subsequent verification and/or updates to initial Draft Spill Reports in accordance with this General Order; and
- The Enrollee's timely certification of required spill reports.

Consistent with Water Code section 13267 and section 13383, the State Water Board or a Regional Water Board may require an Enrollee to report the results of a condition assessment of a specified portion of the Enrollee's sanitary sewer system.

6.2. Other Regional Water Board Orders

It is the intent of the State Water Board that sanitary sewer systems be regulated in a manner consistent with federal and state regulations. This Order will not be interpreted or applied:

- In a manner inconsistent with the federal Clean Water Act;
- To authorize a spill or discharge that is illegal under either the Clean Water Act, the Water Code, and/or an applicable Basin Plan prohibition or water quality standard;
- To prohibit a Regional Water Board from issuing an individual National Pollutant Discharge Elimination System (NPDES) permit or individual waste discharge requirements superseding an Enrollee's regulatory coverage under this General Order for a sanitary sewer system authorized under the Clean Water Act or Water Code;

- To supersede any more specific or more stringent waste discharge requirements or enforcement orders issued by a Regional Water Board; or
- To supersede any more specific or more stringent state or federal requirements in existing regulation, an administrative/judicial order, or Consent Decree.

6.3. Sewer System Management Plan Availability

The Enrollee's updated Sewer System Management Plan must be maintained for public inspection at the Enrollee's offices and facilities and must be available to the public through CIWQS and/or on the Enrollee's website, in accordance with section 3.8 (Sewer System Management Plan Reporting Requirements) of Attachment E1 (Notification, Monitoring, Reporting and Recordkeeping Requirements) of this General Order.

6.4. Entry and Inspection

6.4.1. Entry and Availability of Information

The Enrollee shall allow State and Regional Water Board staff, upon presentation of credentials and other documents as may be required by law, to:

- Enter upon the Enrollee's premises where a regulated facility or activity is located or conducted, or where records are kept under the requirements of this General Order;
- Have access to and reproduce any records required to be maintained by this General Order;
- Inspect any facility and/or equipment (including monitoring and control equipment), practices, or operations required in this General Order; and
- Sample or monitor substances or parameters for assuring compliance with this General Order, or as otherwise authorized by the Water Code.

6.4.2. Pre-Inspection Questionnaire

The Enrollee shall provide pre-inspection information to State and Regional Water Board staff through the completion of a Pre-Inspection Questionnaire provided by Water Board staff.

ATTACHMENT A - DEFINITIONS

Annual Report

An Annual Report (previously termed as Collection System Questionnaire in Order 2006-0003-DWQ) is a mandatory report in which the Enrollee provides a calendar-year update of its efforts to prevent spills.

Basin Plan

A Basin Plan is a water quality control plan specific to a Regional Water Quality Control Board (Regional Water Board), that serves as regulations to: (1) define and designate beneficial uses of surface and groundwaters, (2) establish water quality objectives for protection of beneficial uses, and (3) provide implementation measures.

Beneficial Uses

The term “Beneficial Uses” is a Water Code term, defined as the uses of the waters of the State that may be protected against water quality degradation. Examples of beneficial uses include but are not limited to, municipal, domestic, agricultural and industrial supply; power generation; recreation; aesthetic enjoyment; navigation; and preservation and enhancement of fish, wildlife, and other aquatic resources or preserves.

California Integrated Water Quality System (CIWQS)

CIWQS is the statewide database that provides for mandatory electronic reporting as required in State and Regional Water Board-issued waste discharge requirements.

Data Submitter

A Data Submitter is an individual designated and authorized by the Enrollee’s Legally Responsible Official to enter spill data into the online CIWQS Sanitary Sewer System Database. A Data Submitter does not have the authority of a Legally Responsible Official to certify reporting entered into the online CIWQS Sanitary Sewer System Database.

Disadvantaged Community

A disadvantaged community is a community with a median household income of less than eighty percent (80%) of the statewide annual median household income.

For the purpose of this General Order, there is no differentiation between a small and large disadvantaged community.

Drainage Conveyance System

A drainage conveyance system is a publicly- or privately-owned separate storm sewer system, including but not limited to drainage canals, channels, pipelines, pump stations, detention basins, infiltration basins/facilities, or other facilities constructed to transport stormwater and non-stormwater flows.

Enrollee

An Enrollee is a public, private, or other non-governmental entity that has obtained approval for regulatory coverage under this General Order, including:

- A state agency, municipality, special district, or other public entity that owns and/or operates one or more sanitary sewer systems:
  - greater than one (1) mile in length (each individual sanitary sewer system);
  - one mile or less in length where the State Water Resources Control Board or a Regional Water Quality Control Board requires regulatory coverage under this Order, or
- A federal agency, private company, or other non-governmental entity that owns and/or operates a sanitary sewer system of any size where the State Water Resources Control Board or a Regional Water Quality Control Board requires regulatory coverage under this Order in response to a history of spills, proximity to surface water, or other factors supporting regulatory coverage.

Environmentally Sensitive Area

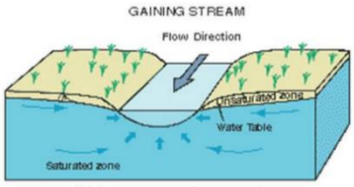
An environmentally sensitive area is a designated agricultural and/or wildlife area identified to need special natural landscape protection due to its wildlife or historical value.

Exfiltration

Exfiltration is the underground exiting of sewage from a sanitary sewer system through cracks, offset or separated joints, or failed infrastructure due to corrosion or other factors.

Flood Control Channel

A flood control channel is a channel used to convey stormwater and non-stormwater flows through and from areas for flood management purposes.



Governing Entity

A governing entity includes but is not limited to the following:

- A publicly elected governing board, council, or commission of a municipal agency;
- A Department or Division director of a federal or state agency that is not governed by a board;
- A governing board or commission of an organization or association; and
- A private system owner/manager that is not governed by a board.

Hydrologically Connected

Two waterbodies are hydrologically connected when one waterbody flows, or has the potential to flow, into the other waterbody. For the purpose of this General Order, groundwater is hydrologically connected to a surface water when the groundwater feeds into the surface water. (The surface waterbody in this example is termed a gaining stream as it gains flow from surrounding groundwater.)

Lateral (including Lower and Upper Lateral)

A lateral is an underground segment of smaller diameter pipe that transports sewage from a customer's building or property (residential, commercial, or industrial) to the Enrollee's main sewer line in a street or easement. Upper and lower lateral boundary definitions are subject to local jurisdictional codes and ordinances, or private system ownership.

A lower lateral is the portion of the lateral located between the sanitary sewer system main, and either the property line, sewer clean out, curb line, established utility easement boundary, or other jurisdictional locations.

An upper lateral is the portion of the lateral from the property line, sewer clean out, curb line, established utility easement boundary, or other jurisdictional locations, to the building or property.

Legally Responsible Official

A Legally Responsible Official is an official representative, designated by the Enrollee, with authority to sign and certify submitted information and documents required by this General Order.

Nuisance

For the purpose of this General Order, a nuisance, as defined in Water Code section 13050(m), is anything that meets all of the following requirements:

- Is injurious to health, or is indecent or offensive to the senses, or an obstruction to the free use of property, so as to interfere with the comfortable enjoyment of life or property;
- Affects at the same time an entire community or neighborhood, or any considerable number of persons, although the extent of the annoyance or damage inflicted upon individuals may be unequal; and
- Occurs during, or as a result of, the treatment or disposal of wastes.

Private Sewer Lateral

A private sewer lateral is the privately-owned lateral that transports sewage from private property(ies) into a sanitary sewer system.

Private Sanitary Sewer System

A private sanitary sewer system is a sanitary sewer system of any size that is owned and/or operated by a private individual, company, corporation, or organization. A private sanitary sewer system may or may not connect into a publicly owned sanitary sewer system.

Potential to Discharge, Potential Discharge

Potential to Discharge, or Potential Discharge, means any exiting of sewage from a sanitary sewer system which can reasonably be expected to discharge into a water of the State based on the size of the sewage spill, proximity to a drainage conveyance system, and the nature of the surrounding environment.

Receiving Water

A receiving water is a water of the State that receives a discharge of waste.

Resilience

Resilience is the ability to recover from or adjust to adversity or change, and grow from disruptions. Resilience can be built through planning, preparing for, mitigating, and adapting to changing conditions.

Sanitary Sewer System

A sanitary sewer system is a system that is designed to convey sewage, including but not limited to, pipes, manholes, pump stations, siphons, wet wells, diversion structures and/or other pertinent infrastructure, upstream of a wastewater treatment plant headworks, including:

- Laterals owned and/or operated by the Enrollee;
- Satellite sewer systems; and/or
- Temporary conveyance and storage facilities, including but not limited to temporary piping, vaults, construction trenches, wet wells, impoundments, tanks and diversion structures.

For purpose of this Order, sanitary sewer systems include only systems owned and/or operated by the Enrollee.

Satellite Sewer System

A satellite sewer system is a portion of a sanitary sewer system owned or operated by a different owner than the owner of the downstream wastewater treatment facility ultimately treating the sewage.

Sewer System Management Plan

A sewer system management plan is a living document an Enrollee develops and implements to effectively manage its sanitary sewer system(s) in accordance with this General Order.

Sewage

Sewage, and its associated wastewater, is untreated or partially treated domestic, municipal, commercial and/or industrial waste (including sewage sludge), and any mixture of these wastes with inflow or infiltration of stormwater or groundwater, conveyed in a sanitary sewer system.

Spill

A spill is a discharge of sewage from any portion of a sanitary sewer system due to a sanitary sewer system overflow, operational failure, and/or infrastructure failure. Exfiltration of sewage is not considered to be a spill under this General Order if the exfiltrated sewage remains in the subsurface and does not reach a surface water of the State.

Training

Training is in-house or external education and guidance needed that provides the knowledge, skills, and abilities to comply with this General Order.

Wash Down Water

Wash down water is water used to clean a spill area.

Waste

Waste, as defined in Water Code section 13050(d), includes sewage and any and all other waste substances, liquid, solid, gaseous, or radioactive, associated with human habitation, or of human or animal origin, or from any producing, manufacturing, or processing operation, including waste placed within containers of whatever nature prior to, and for purposes of, disposal.

Waste Discharge Identification Number (WDID)

A waste discharge identification number (WDID) identifies each individual sanitary sewer system enrolled under this General Order. A WDID number is assigned to each enrolled system upon an Enrollee's approved regulatory coverage.

Waters of the State

Waters of the State are surface waters or groundwater within boundaries of the state as defined in Water Code section 13050(e), in which the State and Regional Water Boards have authority to protect beneficial uses. Waters of the State include, but are not limited to, groundwater aquifers, surface waters, saline waters, natural washes and pools, wetlands, sloughs, and estuaries, regardless of flow or whether water exists during dry conditions. Waters of the State include waters of the United States.

Waters of the United States

Waters of the United States are surface waters or waterbodies that are subject to federal jurisdiction in accordance with the Clean Water Act.

Water Quality Objective

A water quality objective is the limit or maximum amount of pollutant, waste constituent or characteristic, or parameter level established in statewide water quality control plans and Regional Water Boards' Basin Plans, for the reasonable protection of beneficial uses of surface waters and groundwater and the prevention of nuisance.

ATTACHMENT B – APPLICATION FOR ENROLLMENT

1. Enrollment Status: (Mark only one item)

☐ New Enrollee

☐ New Enrollee with previous regulatory coverage under Order 2006-0003-DWQ
(that failed to certify continuation of coverage in CIWQS per Order 2022-XXXX-DWQ)
Existing WDID Number: _____

2. Applicant Information:

Legally Responsible Official Submitting Application

First and Last Name: _____

Title: _____

Phone: _____

Email: _____

System Owner/Operator Name: _____

Mailing Address:_____

City, State, Zip:_____

County:_____

Sanitary Sewer System Name: _____

Regional Water Quality Control Board(s): _____

Signature and Date: _____

3. Applicant Type (Check one):

☐ City ☐ County ☐ State ☐ Federal ☐ Special District

☐ Government Combination ☐ Private ☐ Other Non-governmental Entity

4. Wastewater Treatment Plant Receiving Sanitary Sewer System Waste:

Wastewater Treatment Plant Permittee:_____

WDID No.: _____

5. Billing Information

Billing Address: _____

City, State, Zip: _____

Billing Contact Person and Title: _____

Phone and Email Address: _____

6. Application Fee:

The application fee, as required by Water Code section 13260, is based on the daily population served by the sanitary sewer system. See updated Fee Schedule. (https://www.waterboards.ca.gov/resources/fees/water_quality/)

Check one of the following and enter fee amount:

☐ Population Served < 50,000 – Total Fee submitted: $ _____

☐ Population Served ≥ 50,000 – Total Fee submitted: $ _____

Make the fee payment payable to the State Water Resources Control Board and mail the complete application package to:

State Water Resources Control Board, Accounting Office
P. O. Box 1888
Sacramento, CA 95812-1888

Attention: Statewide Sanitary Sewer System Program

7. Application Submittal Certification

I certify under penalty of perjury under the laws of the State of California that to the best of my knowledge and belief, the information in the submitted application package is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment.

Print Name: _____

Title: _____

Signature: _____Date: _____

ATTACHMENT C - NOTICE OF TERMINATION

1. Enrollee Information

Enrollee Name: _____

WDID No:_____

Legally Responsible Official Requesting Termination of Coverage: _____

First and Last Name: _____

Title: _____

Phone: _____

Email: _____

Mailing Address: _____

City, State, Zip: _____

County: _____

Sanitary Sewer System Name(s) or Unique Identifier(s): _____

Regional Water Quality Control Board(s): _____

Signature and Date:_____

2. Basis of Termination

Explanation of termination, including subsequent regulatory coverage and subsequent owner/operator of enrolled sanitary sewer system, as applicable:

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

3. Regulatory Coverage Termination Certification

I certify under penalty of perjury under the laws of the State of California that to the best of my knowledge: 1) the sanitary sewer system I officially represent is not required to be regulated under the Statewide Waste Discharge Requirements for Sanitary Sewer Systems Order 2022-XXXX-DWQ, and 2) the information submitted in this Notice of Termination is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine or imprisonment. Additionally, I understand that the submittal of this Notice of Termination does not release sanitary sewer system agencies from liability for any violations of the Clean Water Act.

Print Name: _____

Title: _____

Signature: _____Date: _____

For State Water Board Use Only

☐ Approved for Termination ☐ Denied and Returned to Enrollee

Deputy Director of Water Quality Signature: _____

Date: _____Notice of Termination Effective Date: _____

ATTACHMENT D – SEWER SYSTEM MANAGEMENT PLAN – REQUIRED ELEMENTS

Table of Contents

1. Sewer System Management Plan Goal And Introduction D-2
   1.1. Regulatory Context D-2
   1.2. Sewer System Management Plan Update Schedule D-3

   8.1 System Evaluation and Condition Assessment D-7
   8.2. Capacity Assessment and Design Criteria D-8
   8.3. Prioritization of Corrective Action D-9
   8.4. Capital Improvement Plan D-9
9. Monitoring, Measurement and Program Modifications D-9
10. Internal Audits D-10
11. Communication Program D-10

ATTACHMENT D – SEWER SYSTEM MANAGEMENT PLAN – REQUIRED ELEMENTS

A Sewer System Management Plan (Plan) is a living planning document that documents ongoing local sewer system management program activities, procedures, and decision-making – at the scale necessary to address the size and complexity of the subject sanitary sewer system(s). This Plan may incorporate other programs and other plans by reference, to address short-term and long-term system resilience through:

- Proactive planning and decision-making;
- Local government ordinances;
- Updated operations and maintenance activities and procedures;
- Implementation of capital improvements;
- Sufficient local budget to support staff resources, contractors, equipment, and training; and
- Updated training of staff and contractors.

The Enrollee's development, update, and implementation of a Sewer System Management Plan addressing the requirements of this Attachment is an enforceable component of this General Order. As specified in Provision 6.1 (Enforcement Provisions) of this General Order, consistent with the Water Code and the State Water Board Enforcement Policy, the State Water Board or a Regional Water Board may consider the Enrollee's efforts in implementing an effective Sewer System Management Plan to prevent, contain, control, and mitigate spills when considering Water Code section 13327 factors to determine necessary enforcement of this General Order.

This Attachment includes the following required elements that the Enrollee shall address in its Plan and subsequent updates. The Enrollee shall identify any requirement in this Attachment that is not applicable to the Enrollee's sewer system and shall explain in its Plan why the requirement is not applicable.

1. SEWER SYSTEM MANAGEMENT PLAN GOAL AND INTRODUCTION

The goal of the Sewer System Management Plan (Plan) is to provide a plan and schedule to: (1) properly manage, operate, and maintain all parts of the Enrollee's sanitary sewer system(s), (2) reduce and prevent spills, and (3) contain and mitigate spills that do occur.

The Plan must include a narrative Introduction section that discusses the following items:

1.1. Regulatory Context

The Plan Introduction section must provide a general description of the local sewer system management program and discuss Plan implementation and updates.

1.2. Sewer System Management Plan Update Schedule

The Plan Introduction section must include a schedule for the Enrollee to update the Plan, including the schedule for conducting internal audits. The schedule must include milestones for incorporation of activities addressing prevention of sewer spills.

1.3. Sewer System Asset Overview

The Plan Introduction section must provide a description of the Enrollee-owned assets and service area, including but not limited to:

- Location, including county(ies);
- Service area boundary;
- Population and community served;
- System size, including total length in miles, length of gravity mainlines, length of pressurized (force) mains, and number of pump stations and siphons;
- Structures diverting stormwater to the sewer system;
- Data management systems;
- Sewer system ownership and operation responsibilities between Enrollee and private entities for upper and lower sewer laterals;
- Estimated number or percent of residential, commercial, and industrial service connections; and
- Unique service boundary conditions and challenge(s).

Additionally, the Plan Introduction section must provide reference to the Enrollee's up-to-date map of its sanitary sewer system, as required in section 4.1 (Updated Map of Sanitary Sewer System) of this Attachment.

2. ORGANIZATION

The Plan must identify organizational staffing responsible and integral for implementing the local Sewer System Management Plan through an organization chart or similar narrative documentation that includes:

- The name of the Legally Responsible Official as required in section 5.1 (Designation of a Legally Responsible Official) of this General Order;
- The position titles, telephone numbers, and email addresses for management, administrative, and maintenance positions responsible for implementing specific Sewer System Management Plan elements;
- Organizational lines of authority; and
- Chain of communication for reporting spills from receipt of complaint or other information, including the person responsible for reporting spills to the State and Regional Water Boards and other agencies, as applicable. (For example, county

health officer, county environmental health agency, and State Office of Emergency Services.)

3. LEGAL AUTHORITY

The Plan must include copies or an electronic link to the Enrollee's current sewer system use ordinances, service agreements and/or other legally binding procedures to demonstrate the Enrollee possesses the necessary legal authority to:

- Prevent illicit discharges into its sanitary sewer system from inflow and infiltration (I&I); unauthorized stormwater; chemical dumping; unauthorized debris; roots; fats, oils, and grease; and trash, including rags and other debris that may cause blockages;
- Collaborate with storm sewer agencies to coordinate emergency spill responses, ensure access to storm sewer systems during spill events, and prevent unintentional cross connections of sanitary sewer infrastructure to storm sewer infrastructure;
- Require that sewer system components and connections be properly designed and constructed;
- Ensure access for maintenance, inspection, and/or repairs for portions of the service lateral owned and/or operated by the Enrollee;
- Enforce any violation of its sewer ordinances, service agreements, or other legally binding procedures; and
- Obtain easement accessibility agreements for locations requiring sewer system operations and maintenance, as applicable.

4. OPERATION AND MAINTENANCE PROGRAM

The Plan must include the items listed below that are appropriate and applicable to the Enrollee's system.

4.1. Updated Map of Sanitary Sewer System

An up-to-date map(s) of the sanitary sewer system, and procedures for maintaining and providing State and Regional Water Board staff access to the map(s). The map(s) must show gravity line segments and manholes, pumping facilities, pressure pipes and valves, and applicable stormwater conveyance facilities within the sewer system service area boundaries.

4.2. Preventive Operation and Maintenance Activities

A scheduling system and a data collection system for preventive operation and maintenance activities conducted by staff and contractors.

The scheduling system must include:

- Inspection and maintenance activities;

- Higher-frequency inspections and maintenance of known problem areas, including areas with tree root problems;
- Regular visual and closed-circuit television (CCTV) inspections of manholes and sewer pipes.

The data collection system must document data from system inspection and maintenance activities, including system areas/components prone to root-intrusion potentially resulting in system backup and/or failure.

4.3. Training

In-house and external training provided on a regular basis for sanitary sewer system operations and maintenance staff and contractors. The training must cover:

- The requirements of this General Order;
- The Enrollee's Spill Emergency Response Plan procedures and practice drills;
- Skilled estimation of spill volume for field operators; and
- Electronic CIWQS reporting procedures for staff submitting data.

4.4. Equipment Inventory

An inventory of sewer system equipment, including the identification of critical replacement and spare parts.

5. DESIGN AND PERFORMANCE PROVISIONS

The Plan must include the following items as appropriate and applicable to the Enrollee's system:

5.1. Updated Design Criteria and Construction Standards and Specifications

Updated design criteria, and construction standards and specifications, for the construction, installation, repair, and rehabilitation of existing and proposed system infrastructure components, including but not limited to pipelines, pump stations, and other system appurtenances. If existing design criteria and construction standards are deficient to address the necessary component-specific hydraulic capacity as specified in section 8 (System Evaluation, Capacity Assurance and Capital Improvements) of this Attachment, the procedures must include component-specific evaluation of the design criteria.

5.2. Procedures and Standards

Procedures, and standards for the inspection and testing of newly constructed, newly installed, repaired, and rehabilitated system pipelines, pumps, and other equipment and appurtenances.

6. SPILL EMERGENCY RESPONSE PLAN

The Plan must include an up to date Spill Emergency Response Plan to ensure prompt detection and response to spills to reduce spill volumes and collect information for prevention of future spills. The Spill Emergency Response Plan must include procedures to:

- Notify primary responders, appropriate local officials, and appropriate regulatory agencies of a spill in a timely manner;
- Notify other potentially affected entities (for example, health agencies, water suppliers, etc.) of spills that potentially affect public health or reach waters of the State;
- Comply with the notification, monitoring and reporting requirements of this General Order, State law and regulations, and applicable Regional Water Board Orders;
- Ensure that appropriate staff and contractors implement the Spill Emergency Response Plan and are appropriately trained;
- Address emergency system operations, traffic control and other necessary response activities;
- Contain a spill and prevent/minimize discharge to waters of the State or any drainage conveyance system;
- Minimize and remediate public health impacts and adverse impacts on beneficial uses of waters of the State;
- Remove sewage from the drainage conveyance system;
- Clean the spill area and drainage conveyance system in a manner that does not inadvertently impact beneficial uses in the receiving waters;
- Implement technologies, practices, equipment, and interagency coordination to expedite spill containment and recovery;
- Implement pre-planned coordination and collaboration with storm drain agencies and other utility agencies/departments prior, during, and after a spill event;
- Conduct post-spill assessments of spill response activities;
- Document and report spill events as required in this General Order; and
- Annually, review and assess effectiveness of the Spill Emergency Response Plan, and update the Plan as needed.

7. SEWER PIPE BLOCKAGE CONTROL PROGRAM

The Sewer System Management Plan must include procedures for the evaluation of the Enrollee's service area to determine whether a sewer pipe blockage control program is needed to control fats, oils, grease, rags and debris. If the Enrollee determines that a program is not needed, the Enrollee shall provide justification in its Plan for why a program is not needed.

The procedures must include, at minimum:

- An implementation plan and schedule for a public education and outreach program that promotes proper disposal of pipe-blocking substances;
- A plan and schedule for the disposal of pipe-blocking substances generated within the sanitary sewer system service area. This may include a list of acceptable disposal facilities and/or additional facilities needed to adequately dispose of substances generated within a sanitary sewer system service area;
- The legal authority to prohibit discharges to the system and identify measures to prevent spills and blockages;
- Requirements to install grease removal devices (such as traps or interceptors), design standards for the removal devices, maintenance requirements, best management practices requirements, recordkeeping and reporting requirements;
- Authority to inspect grease producing facilities, enforcement authorities, and whether the Enrollee has sufficient staff to inspect and enforce the fats, oils, and grease ordinance;
- An identification of sanitary sewer system sections subject to fats, oils, and grease blockages and establishment of a cleaning schedule for each section; and
- Implementation of source control measures for all sources of fats, oils, and grease reaching the sanitary sewer system for each section identified above.

8. SYSTEM EVALUATION, CAPACITY ASSURANCE AND CAPITAL IMPROVEMENTS

The Plan must include procedures and activities for:

- Routine evaluation and assessment of system conditions;
- Capacity assessment and design criteria;
- Prioritization of corrective actions; and
- A capital improvement plan.

8.1 System Evaluation and Condition Assessment

The Plan must include procedures to:

- Evaluate the sanitary sewer system assets utilizing the best practices and technologies available;

- Identify and justify the amount (percentage) of its system for its condition to be assessed each year;
- Prioritize the condition assessment of system areas that:
    - Hold a high level of environmental consequences if vulnerable to collapse, failure, blockage, capacity issues, or other system deficiencies;
    - Are located in or within the vicinity of surface waters, steep terrain, high groundwater elevations, and environmentally sensitive areas;
    - Are within the vicinity of a receiving water with a bacterial-related impairment on the most current Clean Water Act section 303(d) List;
- Assess the system conditions using visual observations, video surveillance and/or other comparable system inspection methods;
- Utilize observations/evidence of system conditions that may contribute to exiting of sewage from the system which can reasonably be expected to discharge into a water of the State;
- Maintain documents and recordkeeping of system evaluation and condition assessment inspections and activities; and
- Identify system assets vulnerable to direct and indirect impacts of climate change, including but not limited to: sea level rise; flooding and/or erosion due to increased storm volumes, frequency, and/or intensity; wildfires; and increased power disruptions.

8.2. Capacity Assessment and Design Criteria

The Plan must include procedures to identify system components that are experiencing or contributing to spills caused by hydraulic deficiency and/or limited capacity, including procedures to identify the appropriate hydraulic capacity of key system elements for:

- Dry-weather peak flow conditions that cause or contributes to spill events;
- The appropriate design storm(s) or wet weather events that causes or contributes to spill events;
- The capacity of key system components; and
- Identify the major sources that contribute to the peak flows associated with sewer spills.

The capacity assessment must consider:

- Data from existing system condition assessments, system inspections, system audits, spill history, and other available information;
- Capacity of flood-prone systems subject to increased infiltration and inflow, under normal local and regional storm conditions;

- Capacity of systems subject to increased infiltration and inflow due to larger and/or higher-intensity storm events as a result of climate change;
- Increases of erosive forces in canyons and streams near underground and above-ground system components due to larger and/or higher-intensity storm events;
- Capacity of major system elements to accommodate dry weather peak flow conditions, and updated design storm and wet weather events; and
- Necessary redundancy in pumping and storage capacities.

8.3. Prioritization of Corrective Action

The findings of the condition assessments and capacity assessments must be used to prioritize corrective actions. Prioritization must consider the severity of the consequences of potential spills.

8.4. Capital Improvement Plan

The capital improvement plan must include the following items:

- Project schedules including completion dates for all portions of the capital improvement program;
- Internal and external project funding sources for each project; and
- Joint coordination between operation and maintenance staff, and engineering staff/consultants during planning, design, and construction of capital improvement projects; and Interagency coordination with other impacted utility agencies.

9. MONITORING, MEASUREMENT AND PROGRAM MODIFICATIONS

The Plan must include an Adaptive Management section that addresses Plan-implementation effectiveness and the steps for necessary Plan improvement, including:

- Maintaining relevant information, including audit findings, to establish and prioritize appropriate Plan activities;
- Monitoring the implementation and measuring the effectiveness of each Plan Element;
- Assessing the success of the preventive operation and maintenance activities;
- Updating Plan procedures and activities, as appropriate, based on results of monitoring and performance evaluations; and
- Identifying and illustrating spill trends, including spill frequency, locations and estimated volumes.

10. INTERNAL AUDITS

The Plan shall include internal audit procedures, appropriate to the size and performance of the system, for the Enrollee to comply with section 5.4 (Sewer System Management Plan Audits) of this General Order.

11. COMMUNICATION PROGRAM

The Plan must include procedures for the Enrollee to communicate with:

- The public for:
  - Spills and discharges resulting in closures of public areas, or that enter a source of drinking water, and
  - The development, implementation, and update of its Plan, including opportunities for public input to Plan implementation and updates.
- Owners/operators of systems that connect into the Enrollee's system, including satellite systems, for:
  - System operation, maintenance, and capital improvement-related activities.

ATTACHMENT E1 – NOTIFICATION, MONITORING, REPORTING AND RECORDKEEPING REQUIREMENTS

Table of Contents

1. Notification Requirements E1-3
   - 1.1. Notification of Spills of 1,000 Gallons or Greater to the California Office of Emergency Services E1-3
   - 1.2. Spill Notification Information E1-4
   - 1.3. Notification of Spill Report Updates E1-4
2. Spill-Specific Monitoring Requirements E1-5
   - 2.1 Spill Location and Spread E1-5
   - 2.2 Spill Volume Estimation E1-5
   - 2.3. Receiving Water Monitoring E1-5
   - 2.4. Safety and Access Exceptions E1-8
3. Reporting Requirements E1-8
   - 3.1. Reporting Requirements for Individual Category 1 Spill Reporting E1-8
   - 3.2. Reporting Requirements for Individual Category 2 Spill Reporting E1-12
   - 3.3. Monthly Certified Spill Reporting for Category 3 Spills E1-14
   - 3.4. Monthly Certified Spill Reporting for Category 4 Spills E1-16
   - 3.5. Amended Certified Spill Reports for Category 3 Spills E1-16
   - 3.6. Annual Certified Spill Reporting of Category 4 and/or Lateral Spills E1-16
   - 3.7. Monthly Certification of “No-Spills” or “Category 4 Spills” and/or “Non-Category 1 Lateral Spills” E1-16
   - 3.8. Electronic Sanitary Sewer System Service Area Boundary Map E1-17
   - 3.9. Annual Report (Previously termed as Collection System Questionnaire in General Order 2006-0003-DWQ) E1-17
   - 3.10. Sewer System Management Plan Audit Reporting Requirements E1-19
   - 3.11. Sewer System Management Plan Reporting Requirements E1-19
4. Recordkeeping Requirements E1-20
   - 4.1. Recordkeeping Time Period E1-20
   - 4.2. Availability of Documents E1-20
   - 4.3. Spill Reports E1-20
   - 4.4. Recordkeeping of Category 4 Spills and Non-Category 1 Lateral Spills E1-21
   - 4.5. Sewer System Telemetry Records E1-22
   - 4.6. Sewer System Management Plan Implementation Records E1-22
   - 4.7. Audit Records E1-23

4.8. Equipment Records.....E1-23
4.9. Work Orders.....E1-23
