Parking Lot	555.00	Space	3.82	166,050.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	353.15	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2022

Land Use - Total Project Area (Industrial Uses) is 30.22 acres

Construction Phase - Construction anticpated to be completed in 2022

Off-road Equipment - Hours are based on an 8-hour workday

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes

Off-road Equipment -

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes

Banning Point (Industrial Construction - Unmitigated) - Riverside-South Coast County, Summer

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Trips and VMT - Vendor Trips adjusted based on CalEEMod defaults for Building Construction and number of days for Site Preparation, Grading, and Building Construction

Grading - Analysis conservatively assumes that up to 10 acres can be disturbed per day

Architectural Coating - AQ-1: Use Low VOC Paint

Vehicle Trips - Construction run only

Energy Use - Construction run only

Water And Wastewater - Construction run only

Solid Waste - Construction run only

Construction Off-road Equipment Mitigation - Rule 403

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Refrigerated Warehouse-No Rail	154.99	1000sqft	3.56	154,990.00	0
Unrefrigerated Warehouse-No Rail	464.97	1000sqft	10.67	464,969.00	0
Other Asphalt Surfaces	530.34	1000sqft	12.17	530,340.00	0
Parking Lot	555.00	Space	3.82	166,050.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	353.15	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2022

Land Use - Total Project Area (Industrial Uses) is 30.22 acres

Construction Phase - Construction anticpated to be completed in 2022

Off-road Equipment - Hours are based on an 8-hour workday

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes

Off-road Equipment -

Off-road Equipment - Crawler Tractors used in lieu of Tractors/Loaders/Backhoes

Banning Point (Industrial Construction - Unmitigated) - Riverside-South Coast County, Winter

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Trips and VMT - Vendor Trips adjusted based on CalEEMod defaults for Building Construction and number of days for Site Preparation, Grading, and Building Construction

Grading - Analysis conservatively assumes that up to 10 acres can be disturbed per day

Architectural Coating - AQ-1: Use Low VOC Paint

Vehicle Trips - Construction run only

Energy Use - Construction run only

Water And Wastewater - Construction run only

Solid Waste - Construction run only

Construction Off-road Equipment Mitigation - Rule 403

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2023
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	340.53	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2023

Land Use - Total Project Area (Commercial Uses) is 6.83 acres

Construction Phase - Operations run only

Off-road Equipment - Operations run only

Vehicle Trips - Trip characteristics based on information provided in the Traffic analysis

Fleet Mix - Fleet Mix adjusted based on the CalEEMod default fleet mix and the ratio fo vehicle classes (LDA, LDT1, LDT2, MDV, LHDT1, LHDT2, MHDT, and HHDT)

Banning Point (Commercial Operations) - Riverside-South Coast County, Annual

Regional Shopping Center	16.20	1000sqft	0.37	16,200.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2023
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	340.53	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2023

Land Use - Total Project Area (Commercial Uses) is 6.83 acres

Construction Phase - Operations run only

Off-road Equipment - Operations run only

Vehicle Trips - Trip characteristics based on information provided in the Traffic analysis

Fleet Mix - Fleet Mix adjusted based on the CalEEMod default fleet mix and the ratio fo vehicle classes (LDA, LDT1, LDT2, MDV, LHDT1, LHDT2, MHDT, and HHDT)

Banning Point (Commercial Operations) - Riverside-South Coast County, Summer

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	353.15	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2022

Land Use - Total Project Area (Industrial Uses) is 30.22 acres

Construction Phase - Operations run only

Off-road Equipment - Operations run only

Vehicle Trips - Trip Characteristics based on information provided in the Traffic analysis

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Fleet Mix adjusted based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, MDV, LDHT1, LDHT2, and HHDT)

Banning Point (Industrial Operations) - Riverside-South Coast County, Annual

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	353.15	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2022

Land Use - Total Project Area (Industrial Uses) is 30.22 acres

Construction Phase - Operations run only

Off-road Equipment - Operations run only

Vehicle Trips - Trip Characteristics based on information provided in the Traffic analysis

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Fleet Mix adjusted based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, MDV, LDHT1, LDHT2, and HHDT)

Banning Point (Industrial Operations) - Riverside-South Coast County, Summer

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Parking Lot	555.00	Space	3.82	166,050.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	353.15	**CH4 Intensity (lb/MWhr)**	0.03	**N2O Intensity (lb/MWhr)**	0.004

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Intensity factors adjusted to reflect the RPS for 2022

Land Use - Total Project Area (Industrial Uses) is 30.22 acres

Construction Phase - Operations run only

Off-road Equipment - Operations run only

Vehicle Trips - Trip Characteristics based on information provided in the Traffic analysis

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Fleet Mix adjusted based on the CalEEMod default fleet mix and the ratio of the vehicle classes (LDA, LDT1, LDT2, MDV, LDHT1, LDHT2, and HHDT)

Banning Point (Industrial Operations) - Riverside-South Coast County, Winter

[a] Vehicle miles traveled are for modeled truck route only.

[b] Emission rates determined using EMFAC 2017. Idle emission rates are expressed in grams per idle hour rather than grams per mile.

[c] This column includes the total truck travel and truck idle emissions. For idle emissions this column includes emissions based on the assumption that each truck idles for 15 minutes and each TRU idles for 30 minutes on-site.

Traffic Assessment

February 8, 2022

Mr. Adam Rush
City of Banning
99 E. Ramsey Street
Banning, CA 92220

SUBJECT: BANNING POINT (TPM 38164) TRAFFIC ASSESSMENT

Dear Mr. Adam Rush:

Urban Crossroads, Inc. is pleased to submit this letter report to document the Traffic Assessment prepared for the proposed Banning Point (TPM 38164) development (referred to as **Project**) located on the northeast corner of Sun Lakes Village Drive and Sun Lakes Boulevard in the City of Banning. Specifically, the purpose of this level of service (LOS) based focused traffic assessment is to identify potential site adjacent and off-site intersection improvements that may be required with the addition of the proposed Project and compare those findings to those published in the Sun Lakes Village North Specific Plan Amendment No. 5 (dated September 4, 2020, referred to as **SPA No. 5 Traffic Study**).

SUMMARY OF FINDINGS

The Project is proposed to consist of 464,969 square feet of high-cube fulfillment center warehouse use (75% of the industrial use), 154,990 square feet of high-cube cold storage warehouse use (25% of the industrial use), 16,200 square feet of fast casual restaurant use, 1,600 square feet of coffee-donut shop with drive-through window use, and 16,200 square feet of strip retail plaza use (see Exhibit 1). Consistent with the SPA No. 5 Traffic Study, the industrial uses are proposed on the northern end of the site with the commercial retail uses fronting Sun Lakes Boulevard to the south. The proposed access to the site is also consistent with the SPA No. 5 Traffic Study, with access points proposed along Sun Lakes Village Drive and two driveways along Sun Lakes Boulevard to the east. The westerly driveway on Sun Lakes Boulevard into the commercial retail area is proposed to have full access, aligning with the existing Country Club Drive and the easterly driveway on Sun Lakes Boulevard will be restricted to right-in/right-out access only (to be controlled by the existing raised median). The proposed Project is anticipated to generate a total of 2,186 two-way trips per day with 124 AM peak hour trips and 234 PM peak hour trips (actual vehicles).

Consistent with the SPA No. 5 Traffic Study, the following 9 study area intersections were evaluated as part of this focused traffic assessment (see Exhibit 2):

1. Highland Springs Av. & I-10 Westbound Ramps
2. Highland Springs Av. & I-10 Eastbound Ramps
3. Highland Springs Av. & 2nd St.
4. Highland Springs Av. & 1st St. / Sun Lakes Bl.
5. Sun Lakes Village Dr. & Driveway 1
6. Sun Lakes Village Dr. & Sun Lakes Bl.
7. Driveway 2/Country Club Dr. & Sun Lakes Bl.
8. Driveway 3 & Sun Lakes Bl.
9. Twin Hills Dr./Country Club Dr. & Sun Lakes Bl.

The Project will construct a traffic signal at Sun Lakes Village Drive and Country Club Drive on Sun Lakes Boulevard, lengthen the eastbound left turn pocket at Sun Lakes Village Drive to accommodate 150-feet of storage, and widen Sun Lakes Village Drive along the Project's frontage to accommodate dedicated lanes for trucks to enter the Project. Delays for the proposed Project are anticipated to be less than those anticipated with the project evaluated in the SPA No. 5 Traffic Study. However, the Project should contribute its fair share towards off-site improvement needs through payment of fees into pre-existing fee programs (such as WRCOG TUMF and County DIF) and/or fair share contribution. The proposed Project fair share percentages range between 2-14.5% (as compared to the 6.7-34.2% for the project evaluated in the SPA No. 5 Traffic Study).

TRIP GENERATION

CURRENTLY APPROVED TRIP GENERATION

The SPA No. 5 Traffic Study evaluated the development of 877,298 square feet of industrial park use and 37,189 square feet of commercial retail use within the area bounded by the proposed Project. There was also 52,065 square feet of medical office use evaluated in the SPA No. 5 Traffic Study, however, this portion of the Specific Plan lies outside of the proposed Project boundary. As such, only the industrial park and commercial retail uses have been contemplated for the purposes of this trip generation assessment. The trip generation summary for the currently approved Project uses is shown on Table 1. As shown on Table 1, the currently approved uses were anticipated to generate 3,844 two-way trips per day, with 375 trips during the AM peak hour and 445 trips during the PM peak hour. In passenger car equivalents (PCE), the currently approved uses were anticipated to generate 4,530 two-way PCE trips per day with 440 AM PCE peak hour trips and 498 PM PCE peak hour trips. Excerpts from the SPA No. 5 Traffic Study are included in Attachment A.

[1] TSF = thousand square feet

[2] Total Trips = Passenger Cars + Truck Trips.

PROPOSED PROJECT TRIP GENERATION

The Project is proposed to consist of 464,969 square feet of high-cube fulfillment center warehouse use (75% of the industrial use), 154,990 square feet of high-cube cold storage warehouse use (25% of the industrial use), 16,200 square feet of fast casual restaurant use, 1,600 square feet of coffee-donut shop with drive-through window use, and 16,200 square feet of strip retail plaza use.

Trip generation and vehicle mix for the proposed Project land uses are based upon information collected by the Institute of Transportation Engineers (ITE) as provided in their latest Trip Generation Manual (11th Edition, 2021) in conjunction with the South Coast Air Quality Management District (SCAQMD) Warehouse Truck Trip Generation Data Results and Usage (2014) for the High-Cube Cold Storage Warehouse land use and the High-Cube Warehouse Trip Generation Study (WSP, January 29, 2019) for the High-Cube Fulfillment Center Warehouse land use. The trip generation rates for the proposed Project are provided on Table 2.

TRIP GENERATION COMPARISON

As shown in Table 5, the development of the proposed Project is anticipated to generate 1,800 fewer two-way PCE trips per day with 318 fewer AM PCE peak hour trips and 239 fewer PM PCE peak hour trips as compared to the currently approved uses. The trip generation comparison has been performed for the PCE trips only as the peak hour intersection operations analysis conducted in the SPA No. 5 Traffic Study was based on PCE.

TRIP DISTRIBUTION

Trip distribution is the process of identifying the probable destinations, directions or traffic routes that will be utilized by Project traffic. The potential interaction between the planned land uses and surrounding regional access routes are considered, to identify the route where the Project traffic would distribute. The Project trip distribution and assignment process represents the directional orientation of traffic to and from the Project site. The trip distribution pattern of passenger cars is heavily influenced by the geographical location of the site, the location of surrounding land uses, and the proximity to the regional freeway system. The trip distribution pattern for truck traffic is also influenced by the local truck routes. Given these differences, separate trip distributions were generated for both passenger cars and truck trips. The Project (industrial) passenger car and truck trip distribution patterns are graphically depicted on Exhibits 3 and 4, respectively. Exhibit 5 shows the retail trip distribution patterns. All distribution patterns are consistent with the SPA No. 5 Traffic Study.

INTERSECTION OPERATIONS ANALYSIS

EXISTING PLUS PROJECT (E+P) CONDITIONS

Existing baseline traffic volumes are consistent with the SPA No. 5 Traffic study. Specifically, historic traffic count data was utilized in conjunction with an adjustment factor (2% per year, compounded annually) to establish a current baseline condition (as to not understate volumes that might be influenced by the pandemic). Project traffic was added to baseline volumes to develop E+P traffic volumes. Turning volumes shown are in PCE, but the ADT volumes are reflected in actual vehicles. E+P peak hour intersection volumes are shown on Exhibit 6. As shown on Table 6, the study area intersections are anticipated to operate at an acceptable LOS (LOS D or better) for E+P traffic conditions consistent with the E+P results from the SPA No. 5 Traffic Study. Table 6 also shows the net change in the delays between the project evaluated in the SPA No. 5 Traffic Study and the currently proposed Project. The change in delay shows reductions to the anticipated E+P delays with the proposed Project. Intersection operations worksheets for E+P traffic conditions are provided in Attachment B.

TABLE 6: SUMMARY OF INTERSECTION ANALYSIS

#	Intersection	Traffic Control[2]	E+P (SPA No. 5) Delay[1] (secs.) AM	E+P (SPA No. 5) Delay[1] (secs.) 9	Twin Hills Dr./Country Club Dr. & Sun Lakes Bl.	AWS	8.8	8.2	A	A	8.6	8.2	A	A	-0.2	0.0

* **BOLD** = Level of Service (LOS) does not meet the applicable jurisdictional requirements (i.e., unacceptable LOS).

[1] Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown. HCM delay reported in seconds.

[2] CSS = Cross-street Stop; AWS = All-way Stop; TS = Traffic Signal; **CSS** = Improvement

[3] Minimum acceptable LOS for each applicable jurisdiction.

[4] The Project will construct a traffic signal as part of the Project design features.

Long-range (horizon year) intersection improvements are noted in Table 7 and identifies whether the improvements are included in a pre-existing fee program (such as the City's Development Impact Fee or County Transportation Uniform Mitigation Fee programs). If the improvement is not included in any pre-existing fee program, then it is assumed the Project would either construct the improvement or contribute its fair share towards the improvements needed to maintain acceptable LOS. Table 7 shows the fair share contribution identified previously in the SPA No. 5 Traffic Study and the Project's fair share based on the currently proposed development. Detailed fair share calculations for the applicable intersection is shown on Table 8.

TABLE 7: SUMMARY OF IMPROVEMENTS BY ANALYSIS SCENARIO

#	Intersection Location	Jurisdiction	Analysis Scenarios 2040 Without & With Project	Improvements in Fee Program?[1]	Project Responsibility[2]	SPA No. 5 Traffic Study Fair Share %[3]	Current Fair Share %[3]
1	Highland Springs Av. & I-10 WB Ramps	Banning, Beaumont, Caltrans	Add SB free right turn lane	No	Fair Share	22.4%	9.0%
			Add WB left turn lane	No	Fair Share		
2	Highland Springs Av. & I-10 EB Ramps	Banning, Beaumont, Caltrans	Add 2nd EB right turn lane	No	Fair Share	29.5%	13.1%
3	Highland Springs Av. & 2nd St.	Banning, Beaumont	Restripe the EB approach to provide dual left turn lanes and one shared through-right turn lane	No	Fair Share	32.9%	15.1%
			Modify the traffic signal to protect the eastbound and westbound left turns and to implement lead-lag operations for the eastbound and westbound left turns, with the eastbound left turn running as lag	No	Fair Share		
4	Highland Springs Av. & 1st St./Sun Lakes Bl.	Banning, Beaumont	Add 2nd SB left turn lane	No	Fair Share	21.8%	8.5%
			Add 2nd WB through lane	No	Fair Share		
6	Sun Lakes Village Dr. & Sun Lakes Bl.	Banning	Install a Traffic Signal	No	Construct[4]	34.2%	11.8%
9	Twin Hills Dr./Country Club Dr. & Sun Lakes Bl.	Banning	Install a Traffic Signal	No	Fair Share	6.7%	1.7%

[1] Program improvements constructed by project may be eligible for fee credit. In lieu fee payment is at discretion of City.
[2] Identifies the Project's responsibility to construct an improvement or contribute a fee payment or fair share towards the implementation of the improvements shown.
[3] Represents the fair share percentage for the Project during the most impacted peak hour.
[4] Project has committed to constructing the traffic signal located at Sun Lakes Village Drive at Sun Lakes Boulevard.

		AM:	216	13	1,052	836	1.6%
		PM:	245	35	2,281	2,036	**1.7%**

* Highest deficient peak hour represented in **BOLD** and shown on Table 7.

SITE ACCESS RECOMMENDATIONS

Site access recommendations for the Project driveways are shown on Exhibit 7 and are consistent with those recommended in the SPA No. 5, with the exception of the following:

- Driveway 2 improvements on Sun Lake Village Drive are no longer applicable as the driveway is no longer being proposed.
- The intersection of Sun Lakes Village Drive and Sun Lakes Boulevard will be signalized by the Project. In addition the existing landscaped median will be modified to accommodate a 150-foot eastbound left turn lane.
- Sun Lakes Village Drive will be widened to 54-feet of pavement in order to accommodate a 14-foot southbound right turn lane, 13-foot southbound left turn lane, 13-foot northbound through lane (providing access to the Sun Lakes Village Shopping Center), and a 14-foot northbound right turn lane (providing access into the Project).
- Project will install a traffic signal and modify the existing landscaped median at Driveway 2/Country Club Drive in order to accommodate a 150-foot eastbound left turn lane at the intersection of Driveway 2/Country Club Drive and Sun Lakes Boulevard.

A queuing analysis has been conducted for Horizon Year (2040) With Project traffic conditions to determine the necessary turn pocket storage lengths shown on Exhibit 7. Queuing analysis worksheets are provided in Attachment C.

TRUCK ACCESS

Due to the typical wide turning radius of large trucks, a truck turning template has been overlaid on the site plan at the Project driveway (Driveway 1) anticipated to be utilized by heavy trucks in order to determine appropriate curb radii and to verify that trucks will have sufficient space to execute turning maneuvers (see Exhibit 8). As shown on Exhibit 8, the proposed curb radii at Driveway 1 and the intersection of Sun Lakes Village Drive at Sun Lakes Boulevard are anticipated to accommodate the ingress and egress of heavy trucks as currently designed.

If you have any questions, please contact me directly at (949) 861-0177.

8	Dwy. 3/Country Club Dr. & Sun Lakes Bl.	AWS/**TS**[4]	8.7	8.2	A	A	17.3	19.0	B	B	C
9	Dwy. 4 & Sun Lakes Bl.	**CSS**	Future Intersection				9.0	10.1	A	B	C
10	Twin Hills Dr./Country Club Dr. & Sun Lakes Bl.	AWS	8.6	8.0	A	A	8.8	8.2	A	A	C

* **BOLD** = Level of Service (LOS) does not meet the applicable jurisdictional requirements (i.e., unacceptable LOS).

[1] Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown. HCM delay reported in seconds.

[2] CSS = Cross-street Stop; AWS = All-way Stop; TS = Traffic Signal; **CSS** = Improvement

[3] Minimum acceptable LOS for each applicable jurisdiction.

[4] The Project will construct a traffic signal as part of the Project design features.

Table 7-1

Project Fair Share Calculations

#	Intersection		Existing	Project	2040 With Project	Total New Traffic	Project Fair Share[1]

Vehicle Miles Traveled (VMT) Analysis

October 20, 2021

Ms. Pam Steele
MIG
1650 Spruce Street, Suite 102
Riverside, California 92507

SUBJECT: BANNING POINT VEHICLE MILES TRAVELED (VMT) ANALYSIS

Dear Ms. Pam Steele:

The following vehicle miles traveled (VMT) analysis has been prepared for the proposed Banning Point (**Project**) in the City of Banning.

PROJECT OVERVIEW

The Project is proposed to consist of 464,969 square feet of high-cube fulfillment center warehouse use (75% of the industrial use), 154,990 square feet of high-cube cold storage warehouse use (25% of the industrial use), 16,200 square feet of fast-food restaurant without drive-through window use, 1,600 square feet of coffee-donut shop with drive-through window use, and 16,200 square feet of shopping center use. (See attachment A) The Project as proposed appears consistent with the industrial and commercial components of the approved Sun Lakes Village North Specific Plan Amendment No. 5[1] (**SPA No.5**).

BACKGROUND

Changes to California Environmental Quality Act (CEQA) Guidelines were adopted in December 2018, which require all lead agencies to adopt VMT as a replacement for automobile delay-based level of service (LOS) as the new measure for identifying transportation impacts for land use projects. This statewide mandate went into effect July 1, 2020. To aid in this transition, the Governor's Office of Planning and Research (OPR) released a Technical Advisory on Evaluating Transportation Impacts in CEQA (December 2018) (**Technical Advisory**). (2) Based on OPR's Technical Advisory, the City of Banning has developed their own Traffic Impact Analysis Guidelines for Local Transportation Analysis and Vehicle Miles Traveled Analysis (September 2021) (**City Guidelines**), which is currently in draft form and pending final City Council adoption. (3) The draft City Guidelines have been utilized to prepare this VMT analysis, which is consistent with City direction.

[1] SPA No.5; https://ceqanet.opr.ca.gov/2020029074/3

PROJECT SCREENING

The City's Guidelines provides details on appropriate "screening thresholds" that can be used to identify when a proposed land development project is anticipated to result in a less than significant impact without conducting a more detailed analysis. The applicable screening thresholds to the Project are broken into the following types, applicable screening criteria are in **bold** and are to be evaluated further:

- **Transit Priority Area (TPA) Screening**
- **Map Based Screening based on Low VMT Area**
- **Local-Serving Retail Screening**
- Redevelopment Projects
- Local-Serving Community Projects
- Local-Serving Essential Services Projects
- Affordable Housing
- **Small Project Screening**

A land development project need only to meet one of the above screening thresholds to result in a less than significant impact.

For the purposes of this analysis, the initial VMT screening process where applicable has been conducted using the WRCOG VMT Screening Tool (**Screening Tool**), which uses screening criteria consistent with the screening thresholds recommended in the City's Guidelines.

TPA SCREENING

Consistent with guidance identified in the Technical Advisory and City Guidelines, projects located within a Transit Priority Area (TPA) (i.e., within ½ mile of an existing "major transit stop"[2] or an existing stop along a "high-quality transit corridor"[3]) may be presumed to have a less than significant impact absent substantial evidence to the contrary.

However, the presumption may not be appropriate if a project:

- Has a Floor Area Ratio (FAR) of less than 0.75;
- Includes more parking for use by residents, customers, or employees of the project than required by the jurisdiction (if the jurisdiction requires the project to supply parking);

[2] Pub. Resources Code, § 21064.3 ("'Major transit stop' means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.").
[3] Pub. Resources Code, § 21155 ("For purposes of this section, a high-quality transit corridor means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.").

- Is inconsistent with the applicable Sustainable Communities Strategy (as determined by the lead agency, with input from the Metropolitan Planning Organization); or
- Replaces affordable residential units with a smaller number of moderate- or high-income residential units.

Based on the Screening Tool results presented in Attachment B, the Project site is not located within ½ mile of an existing major transit stop, or along a high-quality transit corridor.

The TPA screening threshold is not met.

LOW VMT AREA SCREENING

The City Guidelines state that, "proposed residential, office, industrial, or mixed-use projects, which are located within the low VMT zones identified after applying appropriate VMT analysis thresholds (provided later in this chapter) in the screening tool, and which do not require a GPA or COZ would be deemed to have less than significant impact." The Screening Tool uses the sub-regional Riverside County Transportation Analysis Model (RIVTAM) to measure VMT performance within individual traffic analysis zones (TAZ's) within the WRCOG region. The Project's physical location based on parcel number was selected within the Screening Tool to determine the relevant TAZ's VMT as compared to the jurisdictional average (see Attachment B). The Project boundary is located in TAZ 4344 and would appear to be within a low VMT generating TAZ based on daily home-based work (HBW) VMT per worker. Based on a review of the land use information contained within TAZ 4344 for the RIVTAM base year (2012) model, the zone includes very low levels of employment and low amounts of population and household data. The proposed Project would significantly increase the quantity and type of employment uses in the zone and would therefore not be entirely consistent with the underlying land use assumptions. (See Attachment B)

The Low VMT Area screening threshold is not met.

LOCAL SERVING RETAIL SCREENING

The City Guidelines identifies that local serving retail projects less than 50,000 square feet may be presumed to have a less than significant impact absent substantial evidence to the contrary. In addition to local serving retail, other types of local serving uses such as day care centers, non-destination hotels, affordable housing, places of worship, municipal services and other local serving uses may also be presumed to have a less than significant impact as local serving in nature and would tend to shorten vehicle trips. The proposed Project intends to develop 16,200 square feet of fast-food restaurant without drive-through window use, 1,600 square feet of coffee-donut shop with drive-through window use, and 16,200 square feet of shopping center use. The retail uses within the proposed Project does not exceed the 50,000 square feet.

The Project Type screening threshold is met for the Project's retail component only.

SMALL PROJECT SCREENING

The City's Guidelines identifies that projects generating fewer than 500 daily vehicle trips (for projects requiring a GPA and fewer than 1,000 daily vehicle trips (for projects not requiring a GPA) are anticipated to meet the City's Project Trip Screening threshold and result in a less than significant impact. Based on the Project's forecasted trip generation (see Attachment C) would generate 3,844 daily vehicle trips which is above 1,000 daily vehicle trip threshold.

The Project Trip screening threshold is not met.

The Project's retail component is anticipated to have a less than significant impact. Since none of the applicable land development screening criteria were met for the Project's industrial component, a project level VMT analysis should be prepared for the Project's industrial component only.

PROJECT VMT ASSESSMENT

The Riverside Transportation Analysis Model (RIVTAM) is a useful tool to estimate VMT as it considers interaction between different land uses based on socio-economic data such as population, households and employment. The City Guidelines identifies that until RIVCOM is released by WRCOG, RIVTAM is the appropriate tool for conducting VMT analysis for land use projects in the City.

Project VMT has been calculated using the most current version of RIVTAM. Adjustments in socio-economic data (SED) (i.e., Project employment) was made to a separate TAZ within the RIVTAM model to reflect the Project's proposed employment uses (i.e., industrial uses). A separate TAZ is used to isolate the Project's VMT.

Table 1 summarizes the employment estimates for the Project. It should be noted that the employment estimates are consistent with the land use to employment generation factors from the Riverside County General Plan. (4)

TABLE 1: EMPLOYMENT ESTIMATES

Land Use	Building Area	Building Area per Employee	Estimated Employees[4]
Industrial	619,959 sf	1,030 sf	602

Adjustments to employment factors for the Project's TAZ were made to baseline scenario and the RIVTAM model was then run inclusive of the Project's SED.

PROJECT VMT CALCULATION

Consistent with recommendations contained in the City's Guidelines, calculation of VMT for "other land uses" that are not residential or retail land use types are evaluated using VMT per employee[5]. For land

[4] Riverside County General Plan Employment Factors
[5] City's Guidelines; Page 23.

uses where VMT per capita or VMT per employee are suitable metrics, the City Guidelines suggest the use of the Production-Attraction (PA) trip matrices be utilized. Using these matrices, project generated VMT was calculated consistent with the PA matrices methodology identified in Section 5.4 Detail VMT Forecasting Methodology of the City Guidelines. VMT is then normalized by dividing by the number of Project employees. As shown in Table 2, the Project's VMT per employee is 14.26.

TABLE 2: PROJECT VMT PER EMPLOYEE

	Baseline
Employment	602
VMT[6]	8,582
HBW VMT / Worker[7]	14.26

CITY OF BANNING VMT

The City's Guidelines provide VMT thresholds for their predominant land use types such as residential, office and retail. For "other land uses" City Guidelines state the threshold as "any net increase in VMT per employee for uses that are consistent with the General Plan, and for projects seeking a GPA the threshold would be 10.9 VMT per employee". As the proposed Project is consistent with the recently approved SPA No. 5, a threshold of no net increase in VMT per employee should be utilized. The VMT per employee value previously calculated for the SPA No. 5 is utilized as the impact threshold.

PROJECT LEVEL VMT ASSESSMENT

Table 3 illustrates the comparison between Project generated VMT per employee to the VMT per employee previously calculated for the Sun Lakes Village North Specific Plan Amendment No. 5 VMT Analysis.[8] The VMT per employee value for the approved SPA No. 5 was 14.33, while the Project's calculated VMT per employee value is 14.26. The Project would not result in a net increase in VMT per employee and would therefore not result in a significant impact.

[6] VMT=Vehicle Tips x Trip Length. Where VT = 855 HBW (Attraction) Trips and TL= 10.0372 HBW (Attraction) Miles. Both VT and TL derived from the model.

[7] HBW VMT/Employee is a measure of all auto trips between home and work and does not include heavy duty truck trips or freight, which is consistent with OPR direction and Riverside County VMT calculation guidelines.

[8] SPA No. 5 VMT Analysis; Page 5, Table 2

TABLE 3: VMT PER EMPLOYEE COMPARISON

	Baseline VMT per Employee
SPA No.5	14.33
Project	14.26
Difference	-0.07
Net Increase?	No

CONCLUSION

In summary, the Project's retail component was found to meet City adopted local serving retail screening threshold and is therefore the retail component of the Project is presumed to result in a less than significant impact. The Project's industrial component was then evaluated and compared to the City's adopted impact threshold of no net increase in VMT per employee. The Project generated VMT per employee value was found to be less than that already disclosed in the approved SPA No. 5 VMT analysis. Therefore, the Project's potential impact to VMT is presumed to be less than significant.

EXECUTIVE SUMMARY

Urban Crossroads, Inc. has prepared this noise study to determine the potential noise impacts and the necessary noise mitigation measures, if any, for Banning Point development ("Project"). The Project is proposed to consist of 464,969 square feet of high-cube fulfillment center warehouse use (75% of the industrial use), 154,990 square feet of high-cube cold storage warehouse use (25% of the industrial use), 16,200 square feet of fast-food restaurant without drive-through window use, 1,600 square feet of coffee-donut shop with drive-through window use, and 16,200 square feet of shopping center use. This study has been prepared to satisfy applicable City of Banning standards and thresholds of significance based on guidance provided by Appendix G of the California Environmental Quality Act (CEQA) Guidelines. (1)

The results of this Banning Point Noise and Vibration Impact Analysis are summarized below based on the significance criteria in Section 4 of this report. Table ES-1 shows the findings of significance for each potential noise and/or vibration impact under CEQA before and after any required mitigation measures.

TABLE ES-1: SUMMARY OF CEQA SIGNIFICANCE FINDINGS

Analysis	Significance Findings	
	Unmitigated	**Mitigated**
Off-Site Traffic Noise	*Less Than Significant*	-
Operational Noise	*Less Than Significant*	-
Construction Noise	*Less Than Significant*	-
Construction Vibration	*Less Than Significant*	-

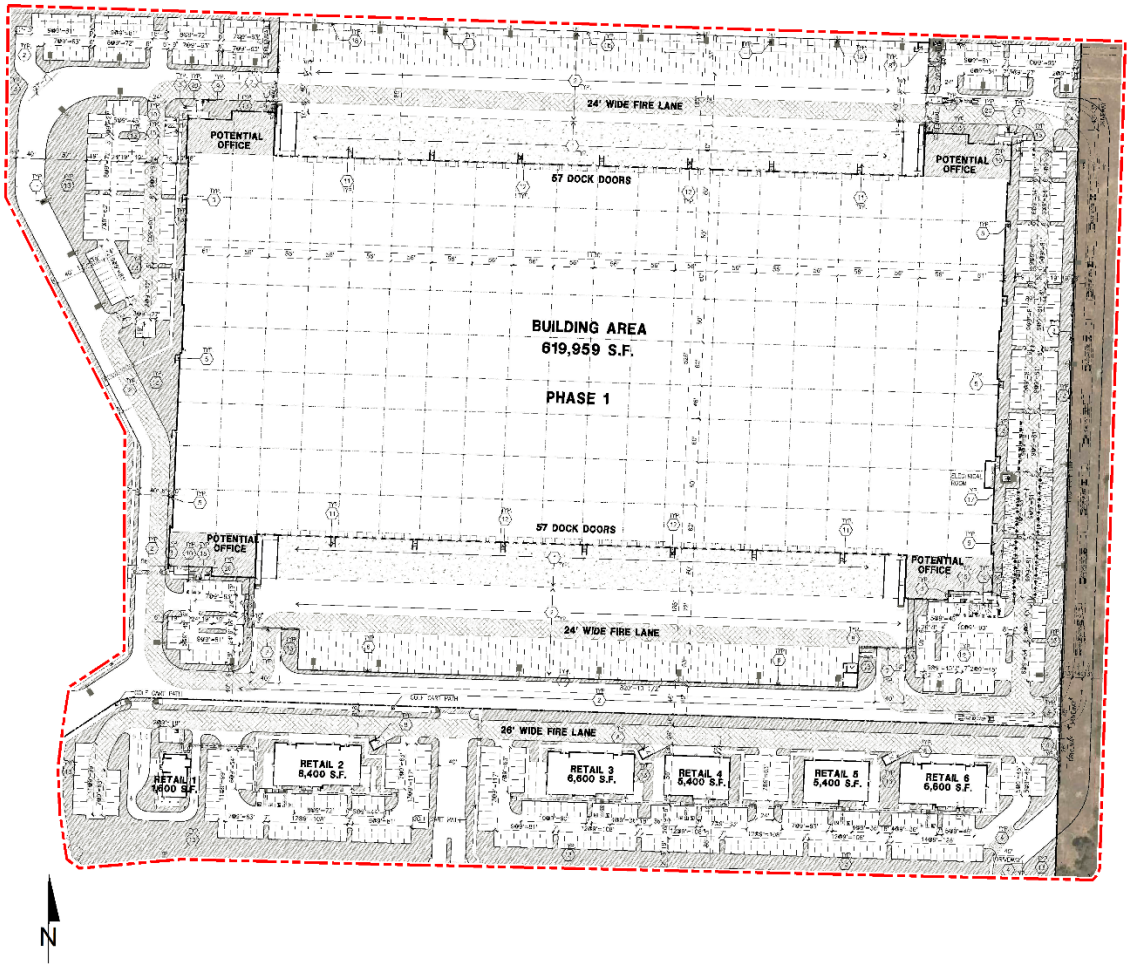
1 INTRODUCTION

This noise analysis has been completed to determine the noise impacts associated with the development of the proposed Banning Point ("Project"). This noise study briefly describes the proposed Project, provides information regarding noise fundamentals, sets out the local regulatory setting, presents the study methods and procedures for noise and vibration analysis, and evaluates the future exterior noise environment.

1.1 SITE LOCATION

The Banning Point Project is located on the northeast corner of Sun Lake Village Drive and Sun Lake Boulevard in the City of Banning, as shown on Exhibit 1-A. The nearest sensitive residential land uses are located east and south of the project site. The I-10 Freeway and Union Pacific rail line located just north of the Project site represent the primary sources of noise activity in the Project study area.

1.2 PROJECT DESCRIPTION



The Project is proposed to consist of 464,969 square feet of high-cube fulfillment center warehouse use (75% of the industrial use), 154,990 square feet of high-cube cold storage warehouse use (25% of the industrial use), 16,200 square feet of fast-food restaurant without drive-through window use, 1,600 square feet of coffee-donut shop with drive-through window use, and 16,200 square feet of shopping center use. The Project as proposed is consistent with the industrial and commercial components of the approved Sun Lakes Village North Specific Plan Amendment No. 5 (**SPA No.5**).

The on-site Project-related noise sources are expected to include: loading dock activity, roof-top air conditioning units, drive-through speakerphone, trash enclosure activity, parking lot vehicle movements, and truck movements. This noise analysis is intended to describe noise level impacts associated with the expected typical operational activities at the Project site.

2 FUNDAMENTALS

Noise is simply defined as "unwanted sound." Sound becomes unwanted when it interferes with normal activities, when it causes actual physical harm or when it has adverse effects on health. Noise is measured on a logarithmic scale of sound pressure level known as a decibel (dB). A-weighted decibels (dBA) approximate the subjective response of the human ear to broad frequency noise source by discriminating against very low and very high frequencies of the audible spectrum. They are adjusted to reflect only those frequencies which are audible to the human ear. Exhibit 2-A presents a summary of the typical noise levels and their subjective loudness and effects that are described in more detail below.

EXHIBIT 2-A: TYPICAL NOISE LEVELS

COMMON OUTDOOR ACTIVITIES	COMMON INDOOR ACTIVITIES	A - WEIGHTED SOUND LEVEL dBA	SUBJECTIVE LOUDNESS	EFFECTS OF NOISE
THRESHOLD OF PAIN		140	INTOLERABLE OR DEAFENING	HEARING LOSS
NEAR JET ENGINE		130		
		120		
JET FLY-OVER AT 300m (1000 ft)	ROCK BAND	110		
LOUD AUTO HORN		100	VERY NOISY	
GAS LAWN MOWER AT 1m (3 ft)		90		
DIESEL TRUCK AT 15m (50 ft), at 80 km/hr (50 mph)	FOOD BLENDER AT 1m (3 ft)	80		SPEECH INTERFERENCE
NOISY URBAN AREA, DAYTIME	VACUUM CLEANER AT 3m (10 ft)	70	LOUD	
HEAVY TRAFFIC AT 90m (300 ft)	NORMAL SPEECH AT 1m (3 ft)	60		
QUIET URBAN DAYTIME	LARGE BUSINESS OFFICE	50	MODERATE	SLEEP DISTURBANCE
QUIET URBAN NIGHTTIME	THEATER, LARGE CONFERENCE ROOM (BACKGROUND)	40		
QUIET SUBURBAN NIGHTTIME	LIBRARY	30	FAINT	NO EFFECT
QUIET RURAL NIGHTTIME	BEDROOM AT NIGHT, CONCERT HALL (BACKGROUND)	20		
	BROADCAST/RECORDING STUDIO	10	VERY FAINT	
LOWEST THRESHOLD OF HUMAN HEARING	LOWEST THRESHOLD OF HUMAN HEARING	0		

2.1 RANGE OF NOISE

Since the range of intensities that the human ear can detect is so large, the scale frequently used to measure intensity is a scale based on multiples of 10, the logarithmic scale. The scale for measuring intensity is the decibel scale. Each interval of 10 decibels indicates a sound energy ten times greater than before, which is perceived by the human ear as being roughly twice as loud. (2) The most common sounds vary between 40 dBA (very quiet) to 100 dBA (very loud). Normal conversation at three feet is roughly at 60 dBA, while loud jet engine noises equate to 110 dBA at approximately 1,000 feet, which can cause serious discomfort. (3) Another important aspect of noise is the duration of the sound and the way it is described and distributed in time.

2.2 NOISE DESCRIPTORS

Environmental noise descriptors are generally based on averages, rather than instantaneous, noise levels. The most used figure is the equivalent level (L_{eq}). Equivalent sound levels are not measured directly but are calculated from sound pressure levels typically measured in A-weighted decibels (dBA). The equivalent sound level (L_{eq}) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period (typically one hour) and is commonly used to describe the "average" noise levels within the environment.

To describe the time-varying character of environmental noise, the statistical or percentile noise descriptors L_{50}, L_{25}, L_8 and L_2, are commonly used. The percentile noise descriptors are the noise levels equaled or exceeded during 50 percent, 25 percent, 8 percent and 2 percent of a stated time. Sound levels associated with the L_2 and L_8 typically describe transient or short-term events, while levels associated with the L_{50} describe the steady state (or median) noise conditions. The relies on the percentile noise levels to describe the stationary source noise level limits. While the L_{50} describes the noise levels occurring 50 percent of the time, the L_{eq} accounts for the total energy (average) observed for the entire hour.

Peak hour or average noise levels, while useful, do not completely describe a given noise environment. Noise levels lower than peak hour may be disturbing if they occur during times when quiet is most desirable, namely evening and nighttime (sleeping) hours. To account for this, the Community Noise Equivalent Level (CNEL), representing a composite 24-hour noise level is utilized. The CNEL is the weighted average of the intensity of a sound, with corrections for time of day, and averaged over 24 hours. The time-of-day corrections require the addition of 5 decibels to dBA L_{eq} sound levels in the evening from 7:00 p.m. to 10:00 p.m., and the addition of 10 decibels to dBA L_{eq} sound levels at night between 10:00 p.m. and 7:00 a.m. These additions are made to account for the noise sensitive time periods during the evening and night hours when sound appears louder. CNEL does not represent the actual sound level heard at any time, but rather represents the total sound exposure. The City of Banning relies on the 24-hour CNEL level to assess land use compatibility with transportation related noise sources.

2.3 SOUND PROPAGATION

When sound propagates over a distance, it changes in level and frequency content. The way noise reduces with distance depends on the following factors.

2.3.1 GEOMETRIC SPREADING

Sound from a localized source (i.e., a stationary point source) propagates uniformly outward in a spherical pattern. The sound level attenuates (or decreases) at a rate of 6 dB for each doubling of distance from a point source. Highways consist of several localized noise sources on a defined path and hence can be treated as a line source, which approximates the effect of several point sources. Noise from a line source propagates outward in a cylindrical pattern, often referred to as cylindrical spreading. Sound levels attenuate at a rate of 3 dB for each doubling of distance from a line source. (2)

2.3.2 GROUND ABSORPTION

The propagation path of noise from a highway to a receiver is usually very close to the ground. Noise attenuation from ground absorption and reflective wave canceling adds to the attenuation associated with geometric spreading. Traditionally, the excess attenuation has also been expressed in terms of attenuation per doubling of distance. This approximation is usually sufficiently accurate for distances of less than 200 ft. For acoustically hard sites (i.e., sites with a reflective surface between the source and the receiver, such as a parking lot or body of water), no excess ground attenuation is assumed. For acoustically absorptive or soft sites (i.e., those sites with an absorptive ground surface between the source and the receiver such as soft dirt, grass, or scattered bushes and trees), an excess ground attenuation value of 1.5 dB per doubling of distance is normally assumed. When added to the cylindrical spreading, the excess ground attenuation results in an overall drop-off rate of 4.5 dB per doubling of distance from a line source. (4)

2.3.3 ATMOSPHERIC EFFECTS

Receivers located downwind from a source can be exposed to increased noise levels relative to calm conditions, whereas locations upwind can have lowered noise levels. Sound levels can be increased at large distances (e.g., more than 500 feet) due to atmospheric temperature inversion (i.e., increasing temperature with elevation). Other factors such as air temperature, humidity, and turbulence can also have significant effects. (2)

2.3.4 SHIELDING

A large object or barrier in the path between a noise source and a receiver can substantially attenuate noise levels at the receiver. The amount of attenuation provided by shielding depends on the size of the object and the frequency content of the noise source. Shielding by trees and other such vegetation typically only has an "out of sight, out of mind" effect. That is, the perception of noise impact tends to decrease when vegetation blocks the line-of-sight to nearest residents. However, for vegetation to provide a substantial, or even noticeable, noise reduction, the vegetation area must be at least 15 feet in height, 100 feet wide and dense enough to completely obstruct the line-of-sight between the source and the receiver. This size of vegetation may provide up to 5 dBA of noise reduction. The Federal Highway Administration (FHWA) does not consider the planting of vegetation to be a noise abatement measure. (4)

2.3.5 REFLECTION

Field studies conducted by the FHWA have shown that the reflection from barriers and buildings does not substantially increase noise levels. (4) If all the noise striking a structure was reflected back to a given receiving point, the increase would be theoretically limited to 3 dBA. Further, not all the acoustical energy is reflected back to same point. Some of the energy would go over the structure, some is reflected to points other than the given receiving point, some is scattered by ground coverings (e.g., grass and other plants), and some is blocked by intervening structures and/or obstacles (e.g., the noise source itself). Additionally, some of the reflected energy is lost due to the longer path that the noise must travel. FHWA measurements made to quantify

reflective increases in traffic noise have not shown an increase of greater than 1-2 dBA; an increase that is not perceptible to the average human ear.

2.4 NOISE CONTROL

Noise control is the process of obtaining an acceptable noise environment for an observation point or receiver by controlling the noise source, transmission path, receiver, or all three. This concept is known as the source-path-receiver concept. In general, noise control measures can be applied to these three elements.

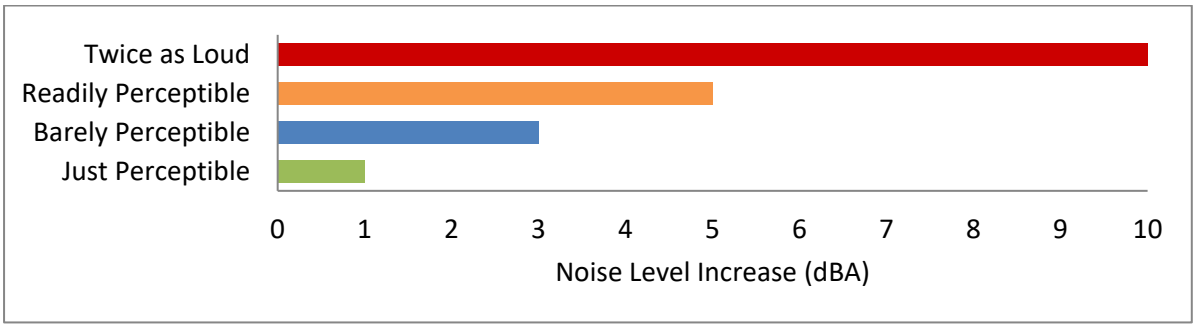
2.5 NOISE BARRIER ATTENUATION

Effective noise barriers can reduce noise levels by up to 10 to 15 dBA, cutting the loudness of traffic noise in half. A noise barrier is most effective when placed close to the noise source or receiver. Noise barriers, however, do have limitations. For a noise barrier to work, it must be high enough and long enough to block the path of the noise source. (4)

2.6 LAND USE COMPATIBILITY WITH NOISE

Some land uses are more tolerant of noise than others. For example, schools, hospitals, churches, and residences are more sensitive to noise intrusion than are commercial or industrial developments and related activities. As ambient noise levels affect the perceived amenity or livability of a development, so too can the mismanagement of noise impacts impair the economic health and growth potential of a community by reducing the area's desirability as a place to live, shop and work. For this reason, land use compatibility with the noise environment is an important consideration in the planning and design process. The FHWA encourages State and Local government to regulate land development in such a way that noise-sensitive land uses are either prohibited from being located adjacent to a highway, or that the developments are planned, designed, and constructed in such a way that noise impacts are minimized. (5)

2.7 COMMUNITY RESPONSE TO NOISE



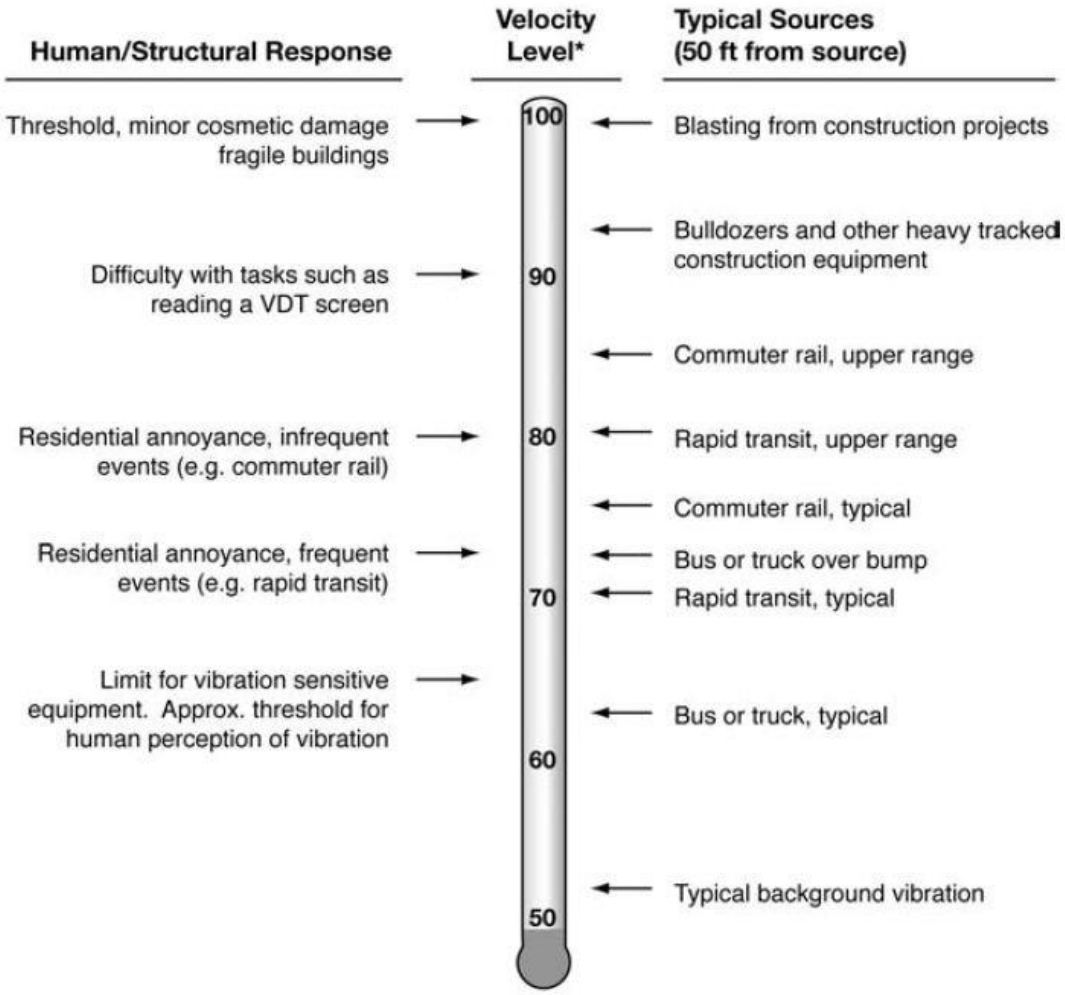
Community responses to noise may range from registering a complaint by telephone or letter, to initiating court action, depending upon everyone's susceptibility to noise and personal attitudes about noise. Several factors are related to the level of community annoyance including:

- Fear associated with noise producing activities;
- Socio-economic status and educational level;
- Perception that those affected are being unfairly treated;
- Attitudes regarding the usefulness of the noise-producing activity;
- Belief that the noise source can be controlled.

Approximately ten percent of the population has a very low tolerance for noise and will object to any noise not of their making. Consequently, even in the quietest environment, some complaints will occur. Twenty-five percent of the population will not complain even in very severe noise environments. Thus, a variety of reactions can be expected from people exposed to any given noise environment. (6) Surveys have shown that about ten percent of the people exposed to

traffic noise of 60 dBA will report being highly annoyed with the noise, and each increase of one dBA is associated with approximately two percent more people being highly annoyed. When traffic noise exceeds 60 dBA or aircraft noise exceeds 55 dBA, people may begin to complain. (6) Despite this variability in behavior on an individual level, the population can be expected to exhibit the following responses to changes in noise levels as shown on Exhibit 2-B. A change of 3 dBA is considered *barely perceptible*, and changes of 5 dBA are considered *readily perceptible*. (4)

EXHIBIT 2-B: NOISE LEVEL INCREASE PERCEPTION



2.8 VIBRATION

Per the Federal Transit Administration (FTA) *Transit Noise and Vibration Impact Assessment Manual* (7), vibration is the periodic oscillation of a medium or object. The rumbling sound caused by the vibration of room surfaces is called structure-borne noise. Sources of ground-borne vibrations include natural phenomena (e.g., earthquakes, volcanic eruptions, sea waves, landslides) or human-made causes (e.g., explosions, machinery, traffic, trains, construction equipment). Vibration sources may be continuous, such as factory machinery, or transient, such as explosions. As is the case with airborne sound, ground-borne vibrations may be described by amplitude and frequency.

There are several different methods that are used to quantify vibration. The peak particle velocity (PPV) is defined as the maximum instantaneous peak of the vibration signal. The PPV is most frequently used to describe vibration impacts to buildings but is not always suitable for evaluating human response (annoyance) because it takes some time for the human body to respond to vibration signals. Instead, the human body responds to average vibration amplitude often described as the root mean square (RMS). The RMS amplitude is defined as the average of the squared amplitude of the signal and is most frequently used to describe the effect of vibration on the human body. Decibel notation (VdB) is commonly used to measure RMS. Decibel notation (VdB) serves to reduce the range of numbers used to describe human response to vibration. Typically, ground-borne vibration generated by man-made activities attenuates rapidly with distance from the source of the vibration. Sensitive receivers for vibration include structures (especially older masonry structures), people (especially residents, the elderly, and sick), and vibration-sensitive equipment and/or activities

The background vibration-velocity level in residential areas is generally 50 VdB. Ground-borne vibration is normally perceptible to humans at approximately 65 VdB. For most people, a vibration-velocity level of 75 VdB is the approximate dividing line between barely perceptible and distinctly perceptible levels. Typical outdoor sources of perceptible ground-borne vibration are construction equipment, steel-wheeled trains, and traffic on rough roads. If a roadway is smooth, the ground-borne vibration is rarely perceptible. The range of interest is from approximately 50 VdB, which is the typical background vibration-velocity level, to 100 VdB, which is the general threshold where minor damage can occur in fragile buildings. Exhibit 2-C illustrates common vibration sources and the human and structural response to ground-borne vibration.

EXHIBIT 2-C: TYPICAL LEVELS OF GROUND-BORNE VIBRATION

Source: Federal Transit Administration (FTA) Transit Noise and Vibration Impact Assessment Manual.

3 REGULATORY SETTING

To limit population exposure to physically and/or psychologically damaging as well as intrusive noise levels, the federal government, the State of California, various county governments, and most municipalities in the state have established standards and ordinances to control noise. In most areas, automobile and truck traffic is the major source of environmental noise. Traffic activity generally produces an average sound level that remains constant with time. Air and rail traffic, and commercial and industrial activities are also major sources of noise in some areas. Federal, state, and local agencies regulate different aspects of environmental noise. Federal and state agencies generally set noise standards for mobile sources such as aircraft and motor vehicles, while regulation of stationary sources is left to local agencies.

3.1 STATE OF CALIFORNIA NOISE REQUIREMENTS

The State of California regulates freeway noise, sets standards for sound transmission, provides occupational noise control criteria, identifies noise standards, and provides guidance for local land use compatibility. State law requires that each county and city adopt a General Plan that includes a Noise Element which is to be prepared per guidelines adopted by the Governor's Office of Planning and Research (OPR). (8) The purpose of the Noise and safety Element is to *limit the exposure of the community to excessive noise levels*. In addition, the California Environmental Quality Act (CEQA) requires that all known environmental effects of a project be analyzed, including environmental noise impacts.

3.2 CITY OF BANNING GENERAL PLAN NOISE ELEMENT

The City of Banning General Plan Noise Element coordinates the community's land uses with the existing and future noise environment, and provides design measures that are intended to minimize or avoid community exposure to excessive noise levels. (9) The implementation of policies and programs set forth in the Noise Element are used to reduce or even avoid current and future noise impacts and land use conflicts. The goal of the City of Banning General Plan Noise Element is *a noise environment that complements the community's residential character and its land uses*. (9) The nine policies of the Noise Element which are used pursue this goal are presented below:

Policy 1 *The City shall protect noise sensitive land uses, including residential neighborhoods, schools, hospitals, libraries, churches, resorts and community open space, from potentially significant sources of community noise.*

Policy 2 *The relationship between land use designations in the Land Use Element and changes in the circulation pattern of the City, as well as individual developments, shall be monitored and mitigated.*

Policy 3 *Private sector project proposals shall include measures that assure that noise exposures levels comply with State of California noise insulation standards as defined in Title 25 (California Noise Insulation Standards) and/or Banning Ordinances 1138 and 1234, whichever is more restrictive.*

Policy 4 *The City shall maintain a General Plan Circulation Map and assure low levels of traffic within neighborhoods by assigning truck routes to major roadways only.*

Policy 5 *The City shall ensure that flight paths and airport improvements adhere to all local, state and federal noise regulations.*

Policy 6 *All development proposals within the noise impact area of the Interstate and the railroad shall mitigate both noise levels and vibration to acceptable levels through the preparation of focused studies and analysis in the development review and environmental review process.*

Policy 7 *The City shall coordinate with adjoining jurisdictions to assure noise-compatible land uses across jurisdictional boundaries.*

Policy 8 *The City shall impose and integrate special design features into proposed development that minimize impacts associated with the operation of air conditioning and heating equipment, onsite traffic, and use of parking, loading and trash storage facilities.*

Policy 9 *The City shall support development that results in grade separated railroad tracks.*

The noise criteria identified in the City of Banning Noise Element (Table V-4) are guidelines to evaluate the land use compatibility of transportation-related noise. The compatibility criteria, shown on Exhibit 3-A, provides the City with a planning tool to gauge the compatibility of land uses relative to existing and future exterior noise levels. The *Land Use Compatibility for Community Noise Environments* guidelines indicate that industrial and commercial land uses, such as the Project, are considered both *normally acceptable* with noise levels approaching 70 dBA CNEL and 67 dBA CNEL, respectively. (9)

EXHIBIT 3-A: LAND USE COMPATIBILITY FOR COMMUNITY NOISE ENVIRONMENTS

Land Uses	CNEL (dBA)						
	50	55	60	65	70	75	80
Residential - Single Family Dwellings, Duplex, Mobile Homes	A	B	B	B	C	D	D

Source: *California Department of Health Services, "Guidelines for the Preparation and Content of the Noise Element of the General Plan," 1990*

A **Normally Acceptable**: With no special noise reduction requirements assuming standard construction.

B **Conditionally Acceptable**: New construction or development should be undertaken only after a detailed analysis of the noise reduction requirement is made and needed noise insulation features included in the design

C **Normally Unacceptable**: New construction is discouraged. If new construction does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.

D **Clearly Unacceptable**: New construction or development should generally not be undertaken.

3.3 CITY OF BANNING MUNICIPAL CODE STANDARDS

To analyze noise impacts originating from a designated fixed location or private property such as the Banning Point Project, stationary-source (operational) noise levels and noise from construction activities are typically evaluated against standards established under the City's Municipal Code.

3.3.1 OPERATIONAL NOISE STANDARDS

For noise-sensitive residential property, the City of Banning Municipal Code, Chapter 8.44.050, identifies exterior noise levels standards of 55 dBA L_{eq} for the daytime hours (7:00 a.m. to 10:00 p.m.) and 45 dBA L_{eq} during the nighttime (10:00 p.m. to 7:00 a.m.) hours. Further, Chapter 8.44.050 indicates that if the existing ambient noise level already exceeds any of the exterior noise level limit categories, then the standard shall be adjusted to reflect the ambient conditions. The City of Banning Municipal Code Noise Standards are included in Appendix 3.1.

3.3.2 CONSTRUCTION NOISE STANDARDS

To control noise impacts associated with the construction of the proposed Project, the City has established limits to the hours of operation. Section 8.44.090 of the City's Municipal Code indicates that construction activity is considered exempt from the noise level limits of the Municipal Code if activity is limited to the hours of 7:00 a.m. to 6:00 p.m. (10) However, the Municipal Code further indicates that *nothing contained herein shall permit any person to cause sound levels to at any time exceed fifty-five dB(A) for intervals of more than fifteen minutes per hour as measured in the interior of the nearest occupied residence or school.* Therefore, the analysis presented in this noise study evaluates Project-related construction noise levels based on the interior noise level limit of 55 dBA at the nearest sensitive receiver locations (e.g., residential homes). The 55 dBA interior construction noise level limit is used in this noise study based on the energy-average equivalent (L_{eq}) noise level to determine potential impacts since the analysis assumes a worst-case duration of Project construction activity, averaged over the any time period, and is therefore, more conservative than the interval of 15 minutes or more as identified in the Municipal Code.

3.4 VIBRATION STANDARDS

Construction activity can result in varying degrees of ground-borne vibration, depending on the equipment and methods used, distance to the affected structures and soil type. Construction vibration is generally associated with pile driving and rock blasting. Other construction equipment such as air compressors, light trucks, hydraulic loaders, etc., generates little or no ground vibration. (7)

To analyze vibration impacts originating from the operation and construction of the Banning Point, vibration-generating activities are appropriately evaluated against standards established under a City's Municipal Code, if such standards exist. However, the City of Banning does not identify specific vibration level limits. Therefore, for analysis purposes, the Caltrans *Transportation and Construction Vibration Guidance Manual*, (11 p. 38) Table 19, vibration

damage are used in this noise study to assess potential temporary construction-related impacts at adjacent building locations. The nearest noise sensitive buildings adjacent to the Project site can best be described as “older residential structures” with a maximum acceptable continuous vibration threshold of 0.3 PPV (in/sec).

This page intentionally left blank

4 SIGNIFICANCE CRITERIA

The following significance criteria are based on currently adopted guidance provided by Appendix G of the California Environmental Quality Act (CEQA) Guidelines. (8) For the purposes of this report, impacts would be potentially significant if the Project results in or causes:

A. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

B. Generation of excessive ground-borne vibration or ground-borne noise levels?

C. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

While the City of Banning General Plan Guidelines provide direction on noise compatibility and establish noise standards by land use type that are sufficient to assess the significance of noise impacts, they do not define the levels at which increases are considered substantial for use under Guideline A. CEQA Appendix G Guideline C applies to nearby public and private airports, if any, and the Project's land use compatibility.

4.1 CEQA GUIDELINES NOT FURTHER ANALYZED

The Project site is not located within two miles of a public airport or within an airport land use plan. The closest airport is the Banning Municipal Airport located roughly 4.4 miles east of the Project site. As such, the Project site would not be exposed to excessive noise levels from airport operations, and therefore, impacts are considered *less than significant,* and no further noise analysis is conducted in relation to CEQA Appendix G Guideline C.

4.2 NOISE LEVEL INCREASES

Noise level increases resulting from the Project are evaluated based on the Appendix G CEQA Guidelines described above at the closest sensitive receiver locations. Under CEQA, consideration must be given to the magnitude of the increase, the existing ambient noise levels, and the location of noise-sensitive receivers to determine if a noise increase represents a significant adverse environmental impact. This approach recognizes *that there is no single noise increase that renders the noise impact significant.* (12)

Unfortunately, there is no completely satisfactory way to measure the subjective effects of noise or of the corresponding human reactions of annoyance and dissatisfaction. This is primarily because of the wide variation in individual thresholds of annoyance and differing individual experiences with noise. Thus, an important way of determining a person's subjective reaction to a new noise is the comparison of it to the existing environment to which one has adapted—the so-called *ambient* environment. In general, the more a new noise exceeds the previously existing ambient noise level, the less acceptable the new noise will typically be judged. The Federal

Interagency Committee on Noise (FICON) (13) developed guidance to be used for the assessment of project-generated increases in noise levels that consider the ambient noise level. The FICON recommendations are based on studies that relate aircraft noise levels to the percentage of persons highly annoyed by aircraft noise. Although the FICON recommendations were specifically developed to assess aircraft noise impacts, these recommendations are often used in environmental noise impact assessments involving the use of cumulative noise exposure metrics, such as the average-daily noise level (CNEL) and equivalent continuous noise level (L_{eq}).

As previously stated, the approach used in this noise study recognizes *that there is no single noise increase that renders the noise impact significant*, based on a 2008 California Court of Appeal ruling on Gray v. County of Madera. (12) For example, if the ambient noise environment is quiet (<60 dBA) and the new noise source greatly increases the noise levels, an impact may occur if the noise criteria may be exceeded. Therefore, for this analysis, FICON identifies a *readily perceptible* 5 dBA or greater project-related noise level increase is considered a significant impact when the noise criteria for a given land use is exceeded. Per the FICON, in areas where the without project noise levels range from 60 to 65 dBA, a 3 dBA *barely perceptible* noise level increase appears to be appropriate for most people. When the without project noise levels already exceed 65 dBA, any increase in community noise louder than 1.5 dBA or greater is considered a significant impact if the noise criteria for a given land use is exceeded, since it likely contributes to an existing noise exposure exceedance.

The FICON guidance provides an established source of criteria to assess the impacts of substantial temporary or permanent increase in ambient noise levels. Based on the FICON criteria, the amount to which a given noise level increase is considered acceptable is reduced when the without Project noise levels are already shown to exceed certain land-use specific exterior noise level criteria. The specific levels are based on typical responses to noise level increases of 5 dBA or *readily perceptible*, 3 dBA or *barely perceptible*, and 1.5 dBA depending on the underlying without Project noise levels for noise-sensitive uses. These levels of increases and their perceived acceptance are consistent with guidance provided by both the Federal Highway Administration (4 p. 9) and Caltrans (14 p. 2_48).

4.3 SIGNIFICANCE CRITERIA SUMMARY

Noise impacts shall be considered significant if any of the following occur as a direct result of the proposed Project. Table 4-1 shows the significance criteria summary matrix.

TABLE 4-1: SIGNIFICANCE CRITERIA SUMMARY

Analysis	Condition(s)	Significance Criteria	
		Daytime	Nighttime
Off-Site Traffic	if ambient is < 60 dBA CNEL[1]	≥ 5 dBA CNEL Project increase	
	if ambient is 60 - 65 dBA CNEL[1]	≥ 3 dBA CNEL Project increase	
	if ambient is > 65 dBA CNEL[1]	≥ 1.5 dBA CNEL Project increase	
Operational	Exterior Noise Level Limit[2]	55 dBA L_{eq}	45 dBA L_{eq}
	if ambient is < 60 dBA L_{eq}[1]	≥ 5 dBA L_{eq} Project increase	
	if ambient is 60 - 65 dBA L_{eq}[1]	≥ 3 dBA L_{eq} Project increase	
	if ambient is > 65 dBA L_{eq}[1]	≥ 1.5 dBA L_{eq} Project increase	
Construction	Interior Noise Level Threshold[3]	55 dBA L_{eq}	n/a
	Vibration Level Threshold[4]	0.3 PPV (in/sec)	n/a

5 EXISTING NOISE LEVEL MEASUREMENTS

To assess the existing noise level environment, 24-hour noise level measurements were taken at five locations in the Project study area. The receiver locations were selected to describe and document the existing noise environment within the Project study area. Exhibit 5-A provides the boundaries of the Project study area and the noise level measurement locations. To fully describe the existing noise conditions, noise level measurements were collected by Urban Crossroads, Inc. on Wednesday, May 5th, 2021. Appendix 5.1 includes study area photos.

5.1 MEASUREMENT PROCEDURE AND CRITERIA

To describe the existing noise environment, the hourly noise levels were measured during typical weekday conditions over a 24-hour period. By collecting individual hourly noise level measurements, it is possible to describe the daytime and nighttime hourly noise levels and calculate the 24-hour CNEL. The long-term noise readings were recorded using Piccolo Type 2 integrating sound level meter and dataloggers. The Piccolo sound level meters were calibrated using a Larson-Davis calibrator, Model CAL 150. All noise meters were programmed in "slow" mode to record noise levels in "A" weighted form. The sound level meters and microphones were equipped with a windscreen during all measurements. All noise level measurement equipment satisfies the American National Standards Institute (ANSI) standard specifications for sound level meters ANSI S1.4-2014/IEC 61672-1:2013. (15)

5.2 NOISE MEASUREMENT LOCATIONS

The long-term noise level measurements were positioned as close to the nearest sensitive receiver locations as possible to assess the existing ambient hourly noise levels surrounding the Project site. Both Caltrans and the FTA recognize that it is not reasonable to collect noise level measurements that can fully represent every part of a private yard, patio, deck, or balcony normally used for human activity when estimating impacts for new development projects. This is demonstrated in the Caltrans general site location guidelines which indicate that, *sites must be free of noise contamination by sources other than sources of interest. Avoid sites located near sources such as barking dogs, lawnmowers, pool pumps, and air conditioners unless it is the express intent of the analyst to measure these sources*. (2) Further, FTA guidance states, t*hat it is not necessary nor recommended that existing noise exposure be determined by measuring at every noise-sensitive location in the project area. Rather, the recommended approach is to characterize the noise environment for clusters of sites based on measurements or estimates at representative locations in the community*. (7)

Based on recommendations of Caltrans and the FTA, it is not necessary to collect measurements at each individual building or residence, because each receiver measurement represents a group of buildings that share acoustical equivalence. (7) In other words, the area represented by the receiver shares similar shielding, terrain, and geometric relationship to the reference noise source. Receivers represent a location of noise sensitive areas and are used to estimate the future noise level impacts. Collecting reference ambient noise level measurements at the nearby sensitive receiver locations allows for a comparison of the before and after Project noise levels

and is necessary to assess potential noise impacts due to the Project's contribution to the ambient noise levels.

5.3 NOISE MEASUREMENT RESULTS

The noise measurements presented below focus on the average or equivalent sound levels (L_{eq}). The equivalent sound level (L_{eq}) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period. Table 5-1 identifies the hourly daytime (7:00 a.m. to 10:00 p.m.) and nighttime (10:00 p.m. to 7:00 a.m.) noise levels at each noise level measurement location.

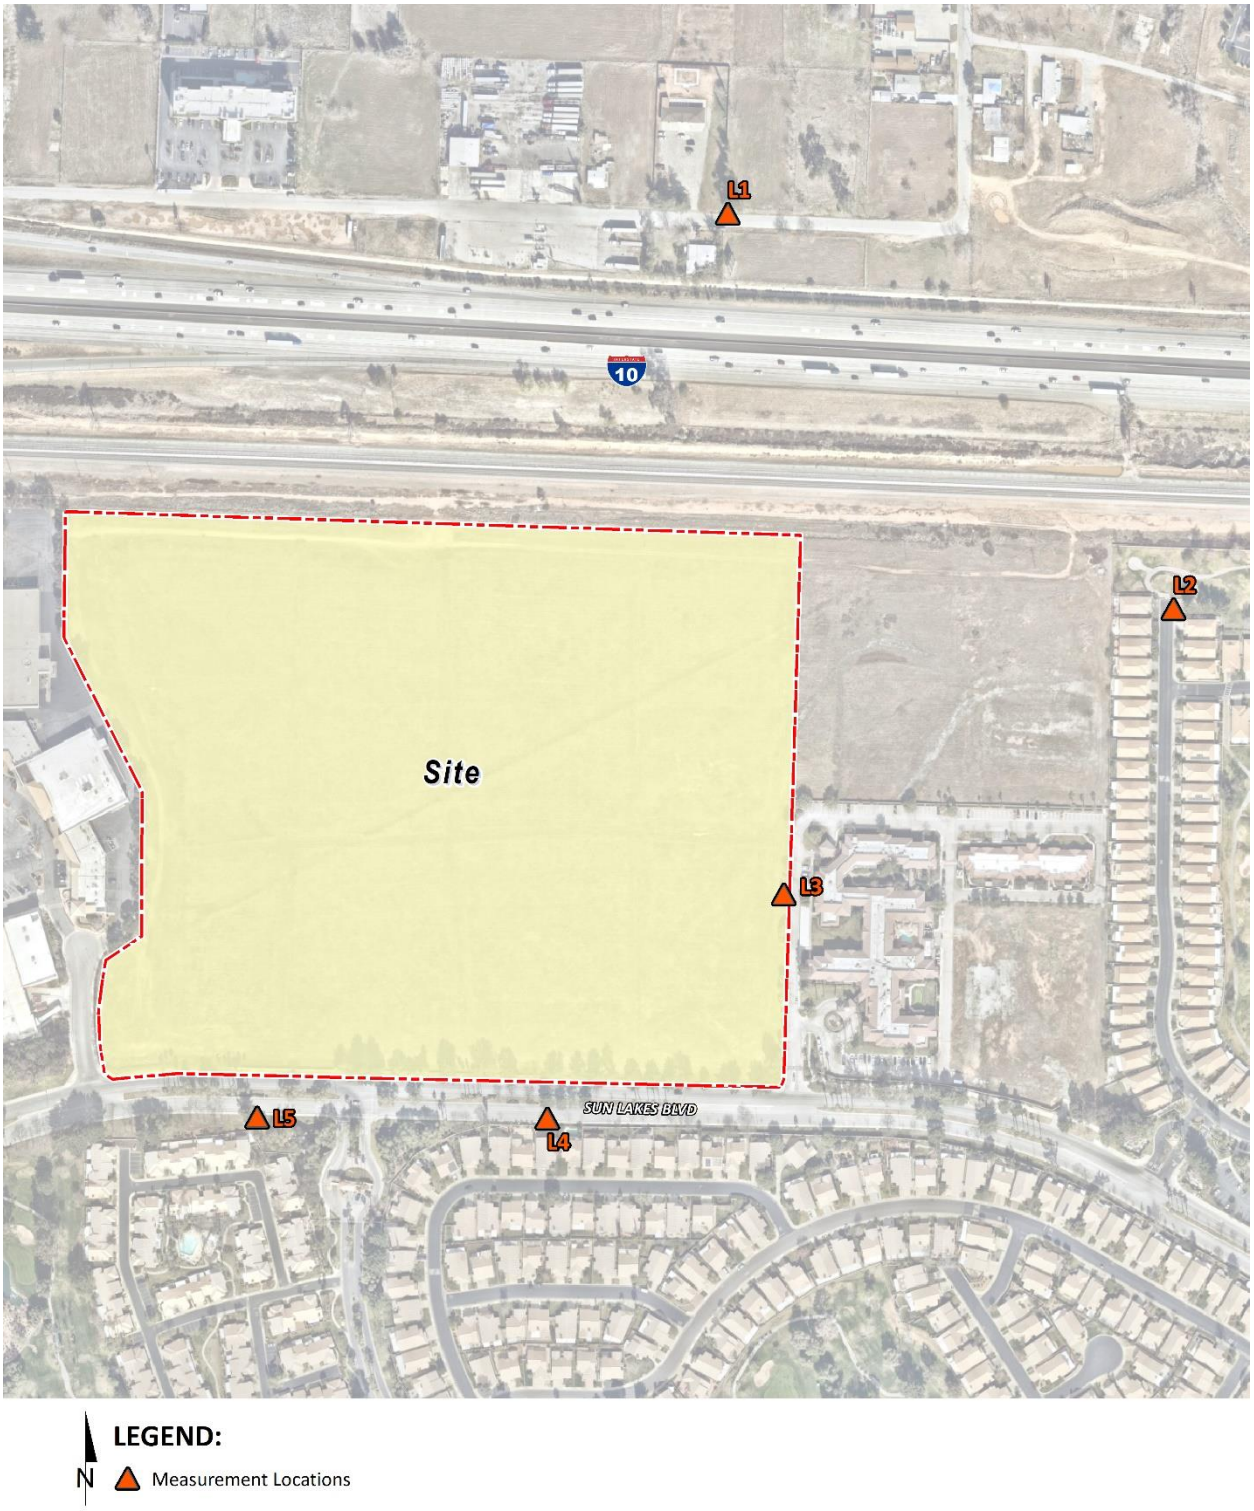

TABLE 5-1: 24-HOUR AMBIENT NOISE LEVEL MEASUREMENTS

Location[1]	Description	Energy Average Noise Level (dBA L_{eq})[2]	
		Daytime	Nighttime
L1	Located north of the Project site near single-family residence at 5778 Joshua Palmer Way.	66.5	65.4
L2	Located east of the Project site near single-family residence at 350 Northwood Avenue.	60.1	60.0
L3	Located east of the Project site near The Lakes Assisted Living & Memory Care at 5801 Sun Lakes Boulevard.	54.4	57.8
L4	Located south of the Project site near single-family residence at 5933 Oakmont Drive.	66.2	59.7
L5	Located south of the Project site near single-family residence at 6111 Wingfoot Avenue.	59.4	56.2

[1] See Exhibit 5-A for the noise level measurement locations.
[2] Energy (logarithmic) average levels. The long-term 24-hour measurement worksheets are included in Appendix 5.2.
"Daytime" = 7:00 a.m. to 7:00 p.m.; "Nighttime" = 10:00 p.m. to 7:00 a.m.

Table 5-1 provides the (energy average) noise levels used to describe the daytime and nighttime ambient conditions. These daytime and nighttime energy average noise levels represent the average of all hourly noise levels observed during these time periods expressed as a single number. Appendix 5.2 provides summary worksheets of the noise levels for each hour as well as the minimum, maximum, L_1, L_2, L_5, L_8, L_{25}, L_{50}, L_{90}, L_{95}, and L_{99} percentile noise levels observed during the daytime and nighttime periods.

6 TRAFFIC NOISE METHODS AND PROCEDURES

The following section outlines the methods and procedures used to estimate and analyze the future traffic noise environment. According to the *Banning Point (TPM 38164) Traffic Assessment* prepared by Urban Crossroads, Inc., the proposed Project is anticipated to generate a total of 2,292 actual vehicle trip-ends per day (1,996 passenger car trips and 296 truck trips). The previously approved Sun Lakes Village North Specific Plan Amendment No. 5 Traffic Study (dated September 4, 2020) would generate 3,844 trips per day. (16) The *Banning Point (TPM 38164) Traffic Assessment* determined that the Project would generate 1,404 fewer passenger car trips and 148 fewer truck trips than the previously approved Sun Lakes Village North Specific Plan Amendment No. 5 Traffic Study. Even though the proposed Project results in an overall reduction in vehicle trips, the following off-site traffic noise analysis was prepared to assess the incremental noise level increase attributed fully to the proposed Project without any credit for the previously approved project.

6.1 FHWA TRAFFIC NOISE PREDICTION MODEL

The expected roadway noise level increases from vehicular traffic were calculated by Urban Crossroads, Inc. using a computer program that replicates the Federal Highway Administration (FHWA) Traffic Noise Prediction Model- FHWA-RD-77-108. (17) This methodology is commonly used to describe the off-site traffic noise levels throughout California and is consistent with the City of Banning General Plan Noise Element. The FHWA Model arrives at a predicted noise level through a series of adjustments to the Reference Energy Mean Emission Level (REMEL).

In California the national REMELs are substituted with the California Vehicle Noise (Calveno) Emission Levels. (18) Adjustments are then made to the REMEL to account for: the roadway classification (e.g., collector, secondary, major or arterial), the roadway active width (i.e., the distance between the center of the outermost travel lanes on each side of the roadway), the total average daily traffic (ADT), the travel speed, the percentages of automobiles, medium trucks, and heavy trucks in the traffic volume, the roadway grade, the angle of view (e.g., whether the roadway view is blocked), the site conditions ("hard" or "soft" relates to the absorption of the ground, pavement, or landscaping), and the percentage of total ADT which flows each hour throughout a 24-hour period. Research conducted by Caltrans has shown that the use of soft site conditions is appropriate for the application of the FHWA traffic noise prediction model used in this analysis. (19)

6.1.1 OFF-SITE TRAFFIC NOISE PREDICTION MODEL INPUTS

Table 6-1 presents the roadway parameters used to assess the Project's off-site transportation noise impacts. Table 6-1 identifies the twenty off-site study area roadway segments, the distance from the centerline to adjacent land use based on the functional roadway classifications per the City of Banning General Plan Mobility Element, and the posted vehicle speeds. The ADT volumes used in this study area presented on Table 6-2 are based on *Banning Point (TPM 38164) Traffic Assessment by Urban Crossroads, Inc.* for the following traffic scenarios. (16)

1. Existing

2. Existing + Project
3. Horizon Year (2040)
4. Horizon Year (2040) + Project

The ADT volumes vary for each roadway segment based on the existing traffic volumes and the combination of project traffic distributions. This analysis relies on a comparative evaluation of the off-site traffic noise impacts at the boundary of the right-of-way of the receiving adjacent land use, without and with project ADT traffic volumes from the Project traffic study.

TABLE 6-1: OFF-SITE ROADWAY PARAMETERS

ID	Roadway	Segment	Classification[1]	Receiving Land Use[2]	Distance from Centerline to Receiving Land Use (Feet)[3]	Vehicle Speed (mph)

[1] City of Banning Circulation Element.
[2] Based on a review of existing aerial imagery. Noise sensitive uses limited to existing residential land uses.
[3] Distance to receiving land use is based upon the right-of-way distances.

To quantify the off-site noise levels, the Project related truck trips were added to the heavy truck category in the FHWA noise prediction model. The addition of the Project related truck trips increases the percentage of heavy trucks in the vehicle mix. This approach recognizes that the FHWA noise prediction model is significantly influenced by the number of heavy trucks in the vehicle mix.

Table 6-3 provides the time of day (daytime, evening, and nighttime) vehicle splits. Table 6-4 shows the traffic flow by vehicle type (vehicle mix) used for all without Project traffic scenarios, and Tables 6-5 to 6-6 show the vehicle mixes used for the with Project traffic scenarios. Due to the added Project truck trips, the increase in Project traffic volumes and the distributions of trucks on the study area road segments, the percentage of autos, medium trucks and heavy trucks will vary for each of the traffic scenarios. This explains why the existing and future traffic volumes and vehicle mixes vary between seemingly identical study area roadway segments.

7 OFF-SITE TRAFFIC NOISE ANALYSIS

To assess the off-site transportation CNEL noise level impacts associated with the proposed Project, noise contours were developed based on the *Banning Point Focused Traffic Analysis*. (16) Noise contour boundaries represent the equal levels of noise exposure and are measured in CNEL from the center of the roadway.

7.1 TRAFFIC NOISE CONTOURS

Noise contours were used to assess the Project's incremental traffic-related noise impacts at land uses adjacent to roadways conveying Project traffic. The noise contours represent the distance to noise levels of a constant value and are measured from the center of the roadway for the 70, 65, and 60 dBA noise levels. The noise contours do not consider the effect of any existing noise barriers or topography that may attenuate ambient noise levels. In addition, because the noise contours reflect modeling of vehicular noise on area roadways, they appropriately do not reflect noise contributions from the surrounding stationary noise sources within the Project study area. Tables 7-1 to 7-4 present a summary of the exterior traffic noise levels for each traffic condition. Appendix 7.1 includes the traffic noise level contours worksheets.

TABLE 7-1: EXISTING WITHOUT PROJECT CONTOURS

ID	Road	Segment	Receiving Land Use[1]	CNEL at Receiving Land Use (dBA)[2]	Distance to Contour from Centerline (Feet)

7.2 EXISTING PROJECT TRAFFIC NOISE LEVEL INCREASES

An analysis of existing traffic noise levels plus traffic noise generated by the proposed Project has been included in this report for informational purposes and to fully analyze all the existing traffic scenarios identified in the Traffic Study. However, the analysis of existing off-site traffic noise levels plus traffic noise generated by the proposed Project scenario will not actually occur since the Project would not be fully constructed and operational until opening year conditions. Table 7-1 shows the Existing without Project conditions CNEL noise levels. The Existing without Project exterior noise levels range from 70.0 to 76.0 dBA CNEL, without accounting for any noise attenuation features such as noise barriers or topography. Table 7-2 shows the Existing with Project conditions ranging from 70.1 to 76.0 dBA CNEL. Table 7-5 shows that the Project off-site traffic noise level increases range from 0.0 to 0.9 dBA CNEL on the study area roadway segments. Based on the significance criteria for off-site traffic noise presented in Section 4.1, land uses adjacent to the study area roadway segments would experience *less than significant* noise level impacts due to unmitigated Project-related traffic noise levels.

7.3 HORIZON YEAR TRAFFIC NOISE LEVEL INCREASES

Table 7-3 presents the Horizon Year without Project conditions CNEL noise levels. The Horizon Year without Project exterior noise levels range from 72.7 to 77.2 dBA CNEL, without accounting for any noise attenuation features such as noise barriers or topography. Table 7-4 shows that the Horizon Year with Project conditions will range from 72.7 to 77.2 dBA CNEL. Table 7-6 shows that the Project off-site traffic noise level increases range from 0.0 to 0.6 dBA CNEL on the study area roadway segments. Based on the significance criteria for off-site traffic noise presented in Section 4.1, land uses adjacent to the study area roadway segments would experience *less than significant* noise level impacts due to unmitigated Project-related traffic noise levels.

TABLE 7-5: EXISTING WITH PROJECT TRAFFIC NOISE LEVEL INCREASES

ID	Road	Segment	Receiving Land Use[1]	CNEL at Receiving Land Use (dBA)[1]			Incremental Noise Level Increase Threshold[2]

[3] Does the Project create an incremental noise level increase exceeding the significance criteria (Table 4-1)?

8 SENSITIVE RECEIVER LOCATIONS

To assess the potential for long-term operational and short-term construction noise impacts, the following sensitive receiver locations, as shown on Exhibit 8-A, were identified as representative locations for analysis. Sensitive receivers are generally defined as locations where people reside or where the presence of unwanted sound could otherwise adversely affect the use of the land. Noise-sensitive land uses are generally considered to include schools, hospitals, single-family dwellings, mobile home parks, churches, libraries, and recreation areas. Moderately noise-sensitive land uses typically include multi-family dwellings, hotels, motels, dormitories, out-patient clinics, cemeteries, golf courses, country clubs, athletic/tennis clubs, and equestrian clubs. Land uses that are considered relatively insensitive to noise include business, commercial, and professional developments. Land uses that are typically not affected by noise include: industrial, manufacturing, utilities, agriculture, undeveloped land, parking lots, warehousing, liquid and solid waste facilities, salvage yards, and transit terminals.

To describe the potential off-site Project noise levels, five receiver locations in the vicinity of the Project site were identified. All distances are measured from the Project site boundary to the outdoor living areas (e.g., private backyards) or at the building façade, whichever is closer to the Project site. The selection of receiver locations is based on FHWA guidelines and is consistent with additional guidance provided by Caltrans and the FTA, as previously described in Section 5.2. Other sensitive land uses in the Project study area that are located at greater distances than those identified in this noise study will experience lower noise levels than those presented in this report due to the additional attenuation from distance and the shielding of intervening structures. Distance is measured in a straight line from the project boundary to each receiver location.

R1: Location R1 represents the existing noise sensitive residence at 5778 Joshua Palmer Way, approximately 543 feet north of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receiver R1 is placed at the building façade. A 24-hour noise measurement was taken near this location, L1, to describe the existing ambient noise environment.

R2: Location R2 represents the existing noise sensitive residence at 301 Northwood Avenue, approximately 725 feet east of the Project site. Receiver R2 is placed at the private outdoor living area (backyard). A 24-hour noise measurement was taken near this location, L2, to describe the existing ambient noise environment.

R3: Location R3 represents the existing noise sensitive Assisted Living and Memory Care at 5801Sun Lakes Boulevard, approximately 110 feet east of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receiver R3 is placed at the building façade. A 24-hour noise measurement was taken, L3, to describe the existing ambient noise environment.

R4: Location R4 represents the existing noise sensitive residence at 5831 Oakmont Drive, approximately 115 feet south of the Project site. Receiver R4 is placed at the private outdoor living area (backyard). A 24-hour noise measurement was taken near this location, L4, to describe the existing ambient noise environment.

R5: Location R5 represents the existing noise sensitive residence at 6111 Wingfoot Avenue, approximately 134 feet south of the Project site. Since there are no private outdoor living areas (backyards) facing the Project site, receiver R5 is placed at the building façade. A 24-hour noise measurement was taken near this location, L5, to describe the existing ambient noise environment.

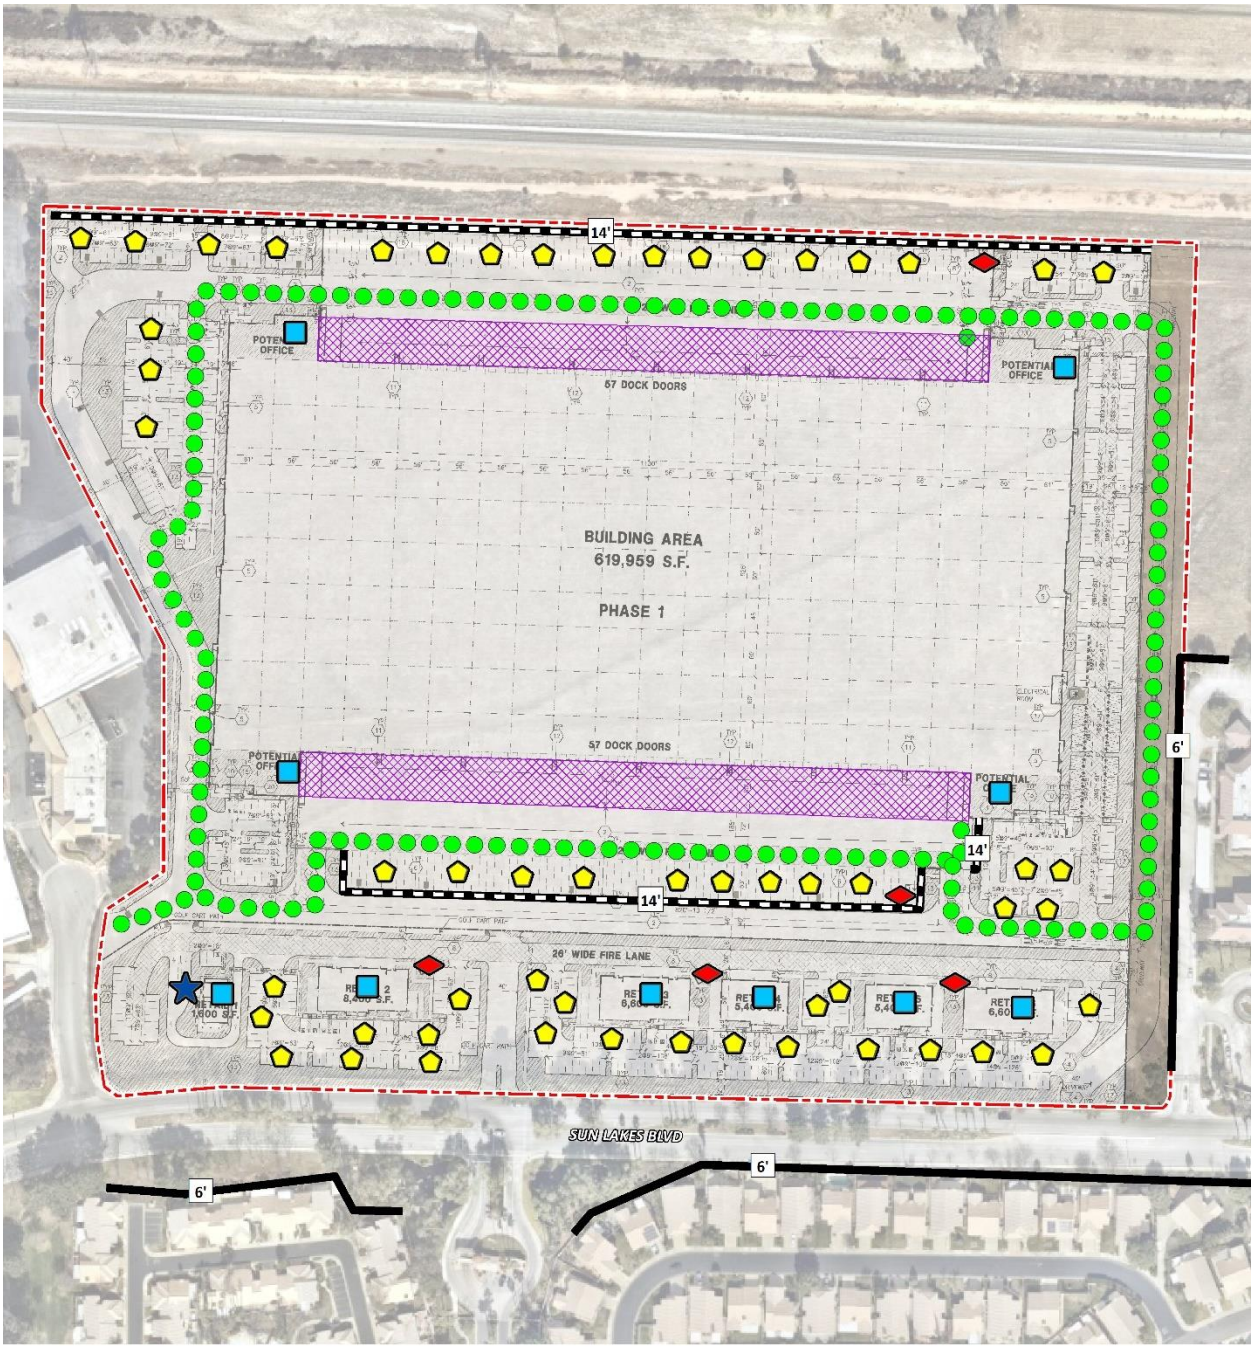
EXHIBIT 8-A: SENSITIVE RECEIVER LOCATIONS

9 OPERATIONAL NOISE IMPACTS

This section analyzes the potential stationary-source operational noise impacts at the nearest receiver locations, identified in Section 8, resulting from the operation of the Banning Point Project. Exhibit 9-A identifies the representative noise source activities used to assess the operational noise levels.

9.1 OPERATIONAL NOISE SOURCES

This operational noise analysis is intended to describe noise level impacts associated with the typical daytime and nighttime activities at the Project site. The on-site Project-related noise sources are expected to include: loading dock activity, roof-top air conditioning units, drive-through speakerphone, trash enclosure activity, parking lot vehicle movements, and truck movements.



9.2 REFERENCE NOISE LEVELS

To estimate the Project operational noise impacts, reference noise level measurements were collected from similar types of activities to represent the noise levels expected with the development of the proposed Project. This section provides a detailed description of the reference noise level measurements shown on Table 9-1 used to estimate the Project operational noise impacts. It is important to note that the following projected noise levels assume the worst-case noise environment with the loading dock activity, roof-top air conditioning units, drive-through speakerphone, trash enclosure activity, parking lot vehicle movements, and truck movements all operating at the same time. These sources of noise activity will likely vary throughout the day.

9.2.1 MEASUREMENT PROCEDURES

The reference noise level measurements presented in this section were collected using a Larson Davis LxT Type 1 precisions sound level meter (serial number 01146). The LxT sound level meter was calibrated using a Larson-Davis calibrator, Model CAL 200, was programmed in "slow" mode to record noise levels in "A" weighted form and was located at approximately five feet above the ground elevation for each measurement. The sound level meters and microphones were equipped with a windscreen during all measurements. All noise level measurement equipment satisfies the American National Standards Institute (ANSI) standard specifications for sound level meters ANSI S1.4-2014/IEC 61672-1:2013. (15)

Noise Source[1]	Noise Source Height (Feet)	Min./ Hour[2]		Reference Noise Level (dBA L_{eq}) @ 50 Feet	Sound Power Level (dBA)[3]
		Day	Night		
Cold Storage Loading Dock Activity	8'	60	60	65.7	111.5
Roof-Top Air Conditioning Units	5'	39	28	59.2	88.9
Drive-Thru Activity	3'	60	30	51.5	83.2
Trash Enclosure Activity	5'	10	10	59.3	89.0
Parking Lot Vehicle Movements	5'	60	60	56.1	79.0
Truck Movements	8'	60	60	58.0	93.2

[1] As measured by Urban Crossroads, Inc.

[2] Anticipated duration (minutes within the hour) of noise activity during typical hourly conditions expected at the Project site. "Daytime" = 7:00 a.m. - 10:00 p.m.; "Nighttime" = 10:00 p.m. - 7:00 a.m.

[3] Sound power level represents the total amount of acoustical energy (noise level) produced by a sound source independent of distance or surroundings. Sound power levels calculated using the CadnaA noise model at the reference distance to the noise source. Numbers may vary due to size differences between point and area noise sources.

9.2.2 COLD STORAGE LOADING DOCK ACTIVITY

To describe the loading dock activities, a reference noise level measurement was collected to represent the truck activities. The reference noise level measurement was taken in the center of the loading dock activity area and represents multiple concurrent noise sources resulting in a combined noise level of 65.7 dBA L_{eq} at a uniform distance of 50 feet. Specifically, the reference noise level measurement represents one truck located approximately 30 feet from the noise level meter with another truck passing by to park roughly 20 feet away, both with their engines idling. Throughout the reference noise level measurement, a separate docked and running reefer truck was located approximately 50 feet east of the measurement location. Additional background noise sources included truck pass-by noise, truck drivers talking to each other next to docked trucks, and air brake release noise when trucks parked.

9.2.3 ROOF-TOP AIR CONDITIONING UNITS

The noise level measurements describe a single mechanical roof-top air conditioning unit. The reference noise level represents a Lennox SCA120 series 10-ton model packaged air conditioning unit. At the uniform reference distance of 50 feet, the reference noise levels are 59.2 dBA L_{eq}. Based on the typical operating conditions observed over a four-day measurement period, the roof-top air conditioning units are estimated to operate for and average 39 minutes per hour during the daytime hours, and 28 minutes per hour during the nighttime hours. These operating conditions reflect peak summer cooling requirements with measured temperatures approaching 96 degrees Fahrenheit (°F) with average daytime temperatures of 82°F. For this noise analysis, the air conditioning units are expected to be located on the roof of the Project buildings.

9.2.4 DRIVE-THRU SPEAKERPHONE ACTIVITY

To describe the potential noise level impacts associated with potential drive-thru speakerphones and vehicle activities, a reference noise level measurement was collected. The reference noise

levels collected are expected to reflect potential drive-thru speakerphone noise level activities at the Project site, since the reference measurement includes both drive-thru speakerphone and vehicle activity noise. The noise sources included in the reference noise level measurement consist of voices of the employees over the speakerphone, customers' voices ordering food, car engines idling, car radios playing music, and cars queuing in the drive-thru lane. At 50 feet from the speakerphone, a reference noise level of 51.5 dBA L_{eq} was measured.

9.2.5 TRASH ENCLOSURE ACTIVITY

To describe the noise levels associated with a trash enclosure activity, Urban Crossroads collected a reference noise level measurement at an existing trash enclosure containing two dumpster bins. The trash enclosure noise levels describe metal gates opening and closing, metal scraping against concrete floor sounds, dumpster movement on metal wheels, and trash dropping into the metal dumpster. The reference noise levels describe trash enclosure noise activities when trash is dropped into an empty metal dumpster, as would occur at the Project Site. The measured reference noise level at the uniform 50-foot reference distance is 57.3 dBA L_{eq} for the trash enclosure activity. The reference noise level describes the expected noise source activities associated with the trash enclosures for the Project's proposed building. Typical trash enclosure activities are estimated to occur for 10 minutes per hour.

9.2.6 PARKING LOT VEHICLE MOVEMENTS

To describe the on-site parking lot activity a reference noise level of 56.1 dBA L_{eq} at 50 feet is used. Parking activities are expected to take place during the full hour (60 minutes) throughout the daytime and evening hours. The parking lot noise levels are mainly due cars pulling in and out of parking spaces.

9.2.6 TRUCK MOVEMENTS

The truck movements reference noise level measurement was collected over a period of 1 hour and 28 minutes and represents multiple heavy trucks entering and exiting the outdoor loading dock area producing a reference noise level of 59.8 dBA L_{eq} at 50 feet. The noise sources included at this measurement location account for trucks entering and existing the Project driveways and maneuvering in and out of the outdoor loading dock activity area.

9.3 CADNAA NOISE PREDICTION MODEL

To fully describe the exterior operational noise levels from the Project, Urban Crossroads, Inc. developed a noise prediction model using the CadnaA (Computer Aided Noise Abatement) computer program. CadnaA can analyze multiple types of noise sources using the spatially accurate Project site plan, georeferenced Nearmap aerial imagery, topography, buildings, and barriers in its calculations to predict outdoor noise levels.

Using the ISO 9613-2 protocol, CadnaA will calculate the distance from each noise source to the noise receiver locations, using the ground absorption, distance, and barrier/building attenuation inputs to provide a summary of noise level at each receiver and the partial noise level contributions by noise source. Consistent with the ISO 9613-2 protocol, the CadnaA noise

prediction model relies on the reference sound power level (L_w) to describe individual noise sources. While sound pressure levels (e.g., L_{eq}) quantify in decibels the intensity of given sound sources at a reference distance, sound power levels (L_w) are connected to the sound source and are independent of distance. Sound pressure levels vary substantially with distance from the source and diminish because of intervening obstacles and barriers, air absorption, wind, and other factors. Sound power is the acoustical energy emitted by the sound source and is an absolute value that is not affected by the environment.

The operational noise level calculations provided in this noise study account for the distance attenuation provided due to geometric spreading, when sound from a localized stationary source (i.e., a point source) propagates uniformly outward in a spherical pattern. A default ground attenuation factor of 0.5 was used in the noise analysis to account for mixed ground representing a combination of hard and soft surfaces. Appendix 9.1 includes the detailed noise model inputs used to estimate the Project operational noise levels presented in this section including the planned noise barriers.

9.4 PROJECT OPERATIONAL NOISE LEVELS

Using the reference noise levels to represent the proposed Project operations that include loading dock activity, roof-top air conditioning units, drive-through speakerphone, trash enclosure activity, parking lot vehicle movements, and truck movements, Urban Crossroads, Inc. calculated the operational source noise levels that are expected to be generated at the Project site and the Project-related noise level increases that would be experienced at each of the sensitive receiver locations. Table 9-2 shows the Project operational noise levels during the daytime hours of 7:00 a.m. to 10:00 p.m. The daytime hourly noise levels at the off-site receiver locations are expected to range from 38.4 to 47.5 dBA L_{eq}.

Table 9-3 shows the Project operational noise levels during the nighttime hours of 10:00 p.m. to 7:00 a.m. The nighttime hourly noise levels at the off-site receiver locations are expected to range from 37.4 to 46.5 dBA L_{eq}. The differences between the daytime and nighttime noise levels are largely related to the duration of noise activity with no nighttime car wash tunnel or vacuum operations.

TABLE 9-2: DAYTIME PROJECT OPERATIONAL NOISE LEVELS

Noise Source[1]	Operational Noise Levels by Receiver Location (dBA Leq)				
	R1	R2	R3	R4	R5

[1] See Exhibit 9-A for the noise source locations. CadnaA noise model calculations are included in Appendix 9.1.

9.5 PROJECT OPERATIONAL NOISE LEVEL COMPLIANCE

To demonstrate compliance with local noise regulations, the Project-only operational noise levels are evaluated against exterior noise level thresholds and the adjusted standards to reflect the ambient noise levels based on the City of Banning exterior noise level standards at nearest noise-sensitive receiver locations. Table 9-4 shows the operational noise levels associated with Banning Point Project will satisfy the County of San Bernardino exterior noise level standards at the nearest receiver locations with the planned 14-foot-high screen wall on the northern project boundary and the southern loading dock boundary as shown on Exhibit 9-A. Therefore, the operational noise impacts are considered *less than significant* at the nearest noise-sensitive receiver locations.

TABLE 9-4: OPERATIONAL NOISE LEVEL COMPLIANCE

Receiver Location[1]	Project Operational Noise Levels (dBA Leq)[2]		Noise Level Standards (dBA Leq)		Noise Level Standards Exceeded?[5]	
	Daytime	Nighttime	Daytime[3]	Nighttime[4]	Daytime	Nighttime
R1	47.5	46.5	60	65.4	No	No
R2	38.4	37.4	60	60.0	No	No
R3	44.1	42.9	60	57.8	No	No
R4	45.8	44.5	60	59.7	No	No
R5	45.9	44.7	60	56.2	No	No

[1] See Exhibit 8-A for the receiver locations.
[2] Proposed Project operational noise levels as shown on Tables 9-2 and 9-3.
[3] Exterior noise level standards, as shown on Table 4-1.
[4] Exterior noise level standards adjusted to reflect the ambient noise levels (see Table 5-1) per the City of Banning Municipal Code, Chapter 8.44.050 (Appendix 3.1).
[5] Do the estimated Project operational noise source activities exceed the noise level standards? "Daytime" = 7:00 a.m. - 10:00 p.m.; "Nighttime" = 10:00 p.m. - 7:00 a.m.

9.6 PROJECT OPERATIONAL NOISE LEVEL INCREASES

To describe the Project operational noise level increases, the Project operational noise levels are combined with the existing ambient noise levels measurements for the nearest receiver locations potentially impacted by Project operational noise sources. Since the units used to measure noise, decibels (dB), are logarithmic units, the Project-operational and existing ambient noise levels cannot be combined using standard arithmetic equations. (2) Instead, they must be logarithmically added using the following base equation:

$$SPL_{Total} = 10\log_{10}[10^{SPL1/10} + 10^{SPL2/10} + \ldots 10^{SPLn/10}]$$

Where "SPL1," "SPL2," etc. are equal to the sound pressure levels being combined, or in this case, the Project-operational and existing ambient noise levels. The difference between the combined Project and ambient noise levels describes the Project noise level increases to the existing ambient noise environment. As indicated on Tables 9-5 and 9-6, the Project will generate daytime and nighttime operational noise level increases ranging from 0.0 to 0.4 dBA L_{eq} at the nearest receiver locations. Project-related operational noise level increases will satisfy the operational noise level increase significance criteria presented on Table 4-1. Therefore, the incremental Project operational noise level increase is considered *less than significant* at all receiver locations.

TABLE 9-5: DAYTIME PROJECT OPERATIONAL NOISE LEVEL INCREASES

Receiver Location[1]	Total Project Operational Noise Level[2]	Measurement Location[3]	Reference Ambient Noise Levels[4]	Combined Project and Ambient[5]	Project Increase[6]	Increase Criteria[7]	Increase Criteria Exceeded?[7]

10 CONSTRUCTION IMPACTS

This section analyzes potential impacts resulting from the short-term construction activities associated with the development of the Project. Exhibit 10-A shows the construction noise source locations in relation to the nearest sensitive receiver locations previously described in Section 6.

10.1 CONSTRUCTION NOISE LEVELS

Noise generated by the Project construction equipment will include a combination of trucks, power tools, concrete mixers, and portable generators that when combined can reach high levels. The number and mix of construction equipment are expected to occur in the following stages:

- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

10.2 CONSTRUCTION REFERENCE NOISE LEVELS

To describe peak construction noise activities, this construction noise analysis was prepared using reference noise level measurements published in the Update of Noise Database for Prediction of Noise on Construction and Open Sites by the Department for Environment, Food and Rural Affairs (DEFRA). (20). The DEFRA database provides the most recent and comprehensive source of reference construction noise levels. Table 10-1 provides a summary of the DEFRA construction reference noise level measurements expressed in hourly average dBA Leq using the estimated FHWA Roadway Construction Noise Model (RCNM) usage factors (21) to describe the typical construction activities for each stage of Project construction.

EXHIBIT 10-A: CONSTRUCTION NOISE SOURCE AND RECEIVER LOCATIONS

TABLE 10-1: TYPICAL CONSTRUCTION REFERENCE NOISE LEVELS

Construction Stage	Reference Construction Activity[1]	Reference Noise Level @ 50 Feet (dBA L_{eq})[1]	Highest Reference Noise Level (dBA L_{eq})
Site Preparation	Crawler Tractors	77	77

10.3 TYPICAL CONSTRUCTION NOISE ANALYSIS

Using the reference construction equipment noise levels and the CadnaA noise prediction model, calculations of the Project construction noise level impacts at the nearest sensitive receiver locations were completed. To assess the worst-case construction noise levels, the Project construction noise analysis relies on the highest noise level impacts when the equipment with the highest reference noise level is operating at the closest point from the edge of primary construction activity (Project site boundary) to each receiver location. As shown on Table 10-2, the construction noise levels are expected to range from 48.9 to 69.0 dBA L_{eq}, and the highest construction levels are expected to range from 60.9 to 69.0 dBA L_{eq} at the nearest receiver locations from the property line. Appendix 10.1 includes the detailed CadnaA construction noise model inputs.

TABLE 10-2: TYPICAL CONSTRUCTION EQUIPMENT NOISE LEVEL SUMMARY

Receiver Location[1]	Construction Noise Levels (dBA L_{eq})					
	Site Preparation	Grading	Building Construction	Paving	Architectural Coating	Highest Levels[2]
R1	65.9	67.9	60.9	58.9	55.9	67.9
R2	58.9	60.9	53.9	51.9	48.9	60.9
R3	67.0	69.0	62.0	60.0	57.0	69.0
R4	66.5	68.5	61.5	59.5	56.5	68.5
R5	66.2	68.2	61.2	59.2	56.2	68.2

[1] Noise receiver locations are shown on Exhibit 10-A.
[2] Construction noise level calculations based on distance from the construction activity, which is measured from the Project site boundary to the nearest receiver locations. CadnaA construction noise model inputs are included in Appendix 10.1.

10.4 TYPICAL CONSTRUCTION NOISE LEVEL COMPLIANCE

The construction noise analysis shows that the highest construction noise levels will occur when construction activities take place at the closest point from the edge of primary construction activity to each of the nearby receiver locations. To evaluate whether the Project will generate potentially significant short-term noise levels at off-site sensitive receiver locations, the City of Banning interior construction noise level limit for residential uses of 55 dBA L_{eq}, previously described in Section 3, is used as the acceptable threshold for construction noise at the nearby sensitive receiver locations.

The interior noise level is the difference between the predicted exterior noise level at the building facade and the noise reduction of the structure. Typical building construction will provide a Noise Reduction (NR) of approximately 12 dBA with "windows open" and a minimum 25 dBA noise reduction with "windows closed." (4) (22) However, sound leaks, cracks and openings within the window assembly can greatly diminish its effectiveness in reducing noise. Several methods are used to improve interior noise reduction, including: (1) weather-stripped solid core exterior doors; (2) upgraded dual glazed windows; (3) mechanical ventilation/air conditioning; and (4) exterior wall/roof assembles free of cut outs or openings.

Table 10-3 shows the highest construction noise levels will range from 35.9 to 44.0 dBA L_{eq} with the estimated interior noise reduction of 25 dBA L_{eq}, and will satisfy the 55 dBA L_{eq} City of Banning interior construction noise level standard. The noise impact due to unmitigated Project construction noise levels is, therefore, considered a *less than significant* impact at the nearest sensitive receiver locations.

TABLE 10-3: TYPICAL CONSTRUCTION NOISE LEVEL COMPLIANCE

Receiver Location[1]	Construction Noise Levels (dBA L_{eq})				
	Highest Construction Noise Levels[2]	Interior Noise Reduction	Estimated Interior Noise Level Reduction	Threshold[3]	Threshold Exceeded?[4]
R1	67.9	-25	43	55	No
R2	60.9	-25	36	55	No
R3	69.0	-25	44	55	No
R4	68.5	-25	44	55	No
R5	68.2	-25	43	55	No

[1] Noise receiver locations are shown on Exhibit 10-A.
[2] Highest construction noise level calculations based on distance from the construction noise source activity to the nearest receiver locations as shown on Table 10-2.
[3] Construction Noise Level Threshold as shown on Table 4-1.
[4] Do the estimated Project construction noise levels exceed the construction noise level threshold?

10.5 CONSTRUCTION VIBRATION ANALYSIS

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods employed. Operation of construction equipment causes ground vibrations that spread through the ground and diminish in strength with distance. Ground vibration levels associated with various types of construction equipment are summarized on Table 10-4. Based on the representative vibration levels presented for various construction equipment types, it is possible to estimate the potential for human response (annoyance) and building damage using the following vibration assessment methods defined by the FTA. To describe the vibration impacts the FTA provides the following equation: $PPV_{equip} = PPV_{ref} \times (25/D)^{1.5}$

TABLE 10-4: VIBRATION SOURCE LEVELS FOR CONSTRUCTION EQUIPMENT

Equipment	PPV (in/sec) at 25 feet
Small bulldozer	0.003
Jackhammer	0.035
Loaded Trucks	0.076
Large bulldozer	0.089

Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual

Table 10-5 presents the expected Project related vibration levels at the nearby receiver locations. At distances ranging from 110 to 725 feet from Project construction activities, construction vibration velocity levels are estimated to range from 0.001 to 0.010 in/sec PPV. Based on maximum acceptable continuous vibration threshold of 0.3 PPV (in/sec), the typical Project construction vibration levels will satisfy the building damage thresholds at all the noise sensitive receiver locations. In addition, the typical construction vibration levels at the nearest sensitive

receiver locations are unlikely to be sustained during the entire construction period but will occur rather only during the times that heavy construction equipment is operating adjacent to the Project site boundaries.

TABLE 10-5: CONSTRUCTION EQUIPMENT VIBRATION LEVELS

Receiver[1]	Distance to Const. Activity (Feet)[2]	Typical Construction Vibration Levels PPV (in/sec)[3]					Thresholds PPV (in/sec)[4]	Thresholds Exceeded?[5]
		Small bulldozer	Jackhammer	Loaded Trucks	Large bulldozer	Highest Vibration Level		
R1	543'	0.000	0.000	0.001	0.001	0.001	0.3	No
R2	725'	0.000	0.000	0.000	0.001	0.001	0.3	No
R3	110'	0.000	0.004	0.008	0.010	0.010	0.3	No
R4	115'	0.000	0.004	0.008	0.009	0.009	0.3	No
R5	134'	0.000	0.003	0.006	0.007	0.007	0.3	No

[1] Receiver locations are shown on Exhibit 10-A.
[2] Distance from receiver location to Project construction boundary (Project site boundary).
[3] Based on the Vibration Source Levels of Construction Equipment (Table 10-4).

APPENDIX 3.1:

CITY OF BANNING MUNICIPAL CODE

This page intentionally left blank

Chapter 8.44 - NOISE

8.44.010 - Purpose.

The purpose of this chapter is to establish criteria and standards for the regulation of noise levels within the city and to implement the noise provisions contained in the city's General Plan.

(Code 1965, § 11D-01.)

8.44.020 - Findings.

It is hereby found and declared that:

A. The making, creation or maintenance of excessive, unnecessary, unnatural or unusually loud noises which are prolonged, unusual and unnatural in their time, place and use, affect and are a detriment to public health, comfort, convenience, safety, welfare and prosperity of the residents of the city; and

B. The necessity for the provisions and prohibitions hereinafter contained and enacted is hereby declared as a matter of legislative determination and public policy. It is further declared that the provisions and prohibitions hereinafter contained and enacted are in pursuance of and for the purpose of securing and promoting the public health, comfort, convenience, safety, welfare and prosperity and the peace and quiet of the city.

(Code 1965, § 11D-02.)

8.44.030 - Definitions.

"Ambient noise" shall mean the all-encompassing noise level associated with a given environment, being a composite of sounds from all sources, excluding any intrusive noise.

"Capital Improvement" shall mean major construction, acquisition or maintenance/repair projects. Typical examples of major construction would include new street improvements, park development and construction of public buildings or structures, treatment plants. Structures include lighting, sewer and water pipelines and other related utility structures including treatment plants, gas, electric and other infrastructure, landscaping and drainage facilities and all other public infrastructure. "Acquisitions" include the acquisition of land or interest in land. Major maintenance/repairs may include street resurfacing and modifications to public buildings and structures.

"Commercial purpose" shall mean the use, operation or maintenance of any sound-amplifying equipment for the purpose of advertising any business, goods or services and/or for the purpose of advertising or attracting the attention of the public to or soliciting patronage for any performance, entertainment, exhibition or event, or for the purpose of demonstrating any such sound equipment.

"Cumulative time period" shall mean a period of time composed of individual time segments which may be continuous or interrupted.

"Decibel (dB)" shall mean a measurement unit of sound pressure level which denotes the ratio between two quantities which are proportional to power; the number of decibels corresponding to the ratio of two amounts of power is ten times the logarithm to the base ten of this ratio.

"Governmental agency" shall mean the United States (federal government), the State of California, Riverside County, the City of Banning, the school district and any special district within Riverside County or any combination of these agencies.

"Impact noise" shall mean the sound produced by the impact or collision of one moving object or mass with a second object or mass that is stationary or moving.

"Intrusive noise" shall mean a sound which intrudes over and above the existing ambient noise level at a given location.

"Motor-driven vehicle" shall include, but not be limited to, any automobile, truck, van, bus, motorcycle, minibike, go-cart or other self-propelled vehicle, on or off road, and aircraft.

"Noise" shall mean any sound that is loud or disturbing or that interferes with one's ability to hear some other sound.

"Noise level" shall mean the "A" weighted sound pressure level in decibels audible to humans obtained by using a sound level meter. The unit of noise level measurement shall be designated as dB(A).

"Person" shall mean a person, firm, association, copartnership, joint venture, corporation or any entity, public or private in nature.

"Public property" shall mean property that is owned by any governmental agency as indicated in this section or held by the public, including, but not limited to, parks, streets, sidewalks, and alleys.

"Simple tone noise" shall mean a noise characterized by a predominant frequency or frequencies so that other frequencies cannot be readily distinguished.

"Sound pressure level of a sound, in decibels" shall mean twenty times the logarithm to the base ten of the ratio of the pressure of this sound to the reference pressure, which reference pressure shall be explicitly stated.

As used in Section 8.44.090(H), "person of normal hearing sensitivity" means a person who has a hearing threshold level of between zero decibels and twenty-five decibels HL averaged over frequencies 500, 1000, and 2000 Hertz.

(Code 1965, § 11D-03.)

(Ord. No. 1454, § 4, 10-9-12)

8.44.040 - Noise level measurement criteria.

A. Any noise level measurement, made pursuant to the provisions of this chapter, shall be determined by using a sound level meter that meets the minimum requirements of the American National Standard Institute for sound level meters, or by using an instrument with associated recording and analyzing equipment that will provide equivalent data.

B. The factors which shall be considered in determining whether a violation of the provisions of this section exists shall include, but not be limited to, the following:

1. The sound level of the objectionable noise;
2. The sound level of the ambient noise;
3. The proximity of the noise to residential sleeping facilities;
4. The nature and zoning of the area within which the noise emanates;
5. The number of persons affected by the noise source;
6. The time of day or night the noise occurs;
7. The duration of the noise and its tonal, informational or musical content;
8. Whether the noise is produced by a commercial or noncommercial activity;

C. The above factors shall be considered in addition to the noise levels set forth in this section in determining a violation. However, noises do not necessarily need to exceed those noise level limits to be considered unnecessary or unusual so as to cause discomfort or annoyance to persons in the area.

(Code 1965, § 11D-04.)

8.44.050 - Base ambient noise level.

All ambient noise measurements shall commence at the base ambient noise levels in decibels within the respective times and zones as follows:

Decibels	Time	Zone Use
45 dB(A)	10:00 p.m. — 7:00 a.m.	Residential
55 dB(A)	7:00 a.m. — 10:00 p.m.	Residential
75 dB(A)	Anytime	Industrial and commercial

Actual decibel measurements exceeding the levels set forth hereinabove at the times and within the zones corresponding thereto shall be employed as the "base ambient noise level" referred to in this chapter. Otherwise, no ambient noise shall be deemed to be less than the above specified levels.

(Code 1965, § 11D-05.)

8.44.060 - Exterior noise level measurement.

Except as otherwise specifically provided herein, all reference to "exterior noise" or "exterior noise levels" as used in this chapter shall be as measured at any point relative to the closest point of the source of the noise at the property line of the complaining party. Measurements will not be made during extraordinary times, such as during the movement of a nearby train or airplane.

(Code 1965, § 11D-06.)

8.44.070 - Maximum residential noise levels.

No noise level shall exceed the following for the duration periods specified:

Noise Level Exceeded	Maximum Duration Period
5 dB(A) above BANL	15 minutes any hour
10 dB(A) above BANL	5 minutes any hour
15 dB(A) above BANL	1 minute any hour
20 dB(A) above BANL	Not permitted

(Code 1965, § 11D-07.)

8.44.080 - Maximum nonresidential noise levels.

Any provision contained herein to the contrary notwithstanding, no exterior noise level shall exceed the base ambient noise levels (BANL) for nonresidential land uses set forth in any development agreement applicable to such development or as otherwise specifically set forth in any development standard which is by its terms enforceable by the city against the noise maker.

(Code 1965, § 11D-08.)

8.44.085 - Noise from public/governmental services exempt.

Sound emanating from the following sources is exempt from the provisions of this chapter:

A. Capital improvement projects of a governmental agency.

B. Maintenance and repair of public properties by a governmental agency.

C. Public safety personnel in the course of executing their official duties, including, but not limited to, sworn peace officers, emergency personnel, and public utility personnel. This exemption includes, without limitation, sound emanating from all equipment used by such personnel, whether stationary or mobile, so long as such sound is reasonably related to, and necessary for, the undertaking of official public safety duties.

(Ord. No. 1454, § 2, 10-9-12)

8.44.090 - Noises prohibited—Unnecessary noise standard.

Any other provision of this chapter notwithstanding, the following acts are expressly prohibited as a violation of this chapter. Such acts are hereby expressly declared to be loud, unusual and unnecessary noises in violation of this chapter. namely:

A. Horns, signaling devices, etc. The sounding of any horn or signaling device on any automobile, motorcycle, streetcar or other vehicle on any street or public place of the city, except as a danger warning. Back-up beepers may be sounded consistent with the maximum duration periods set forth in Section 8.44.080 of this chapter. The creation by means of any such signaling device of any unreasonably loud or harsh sound and, the sounding of any such device for an unnecessary and unreasonable period of time. For the purposes of establishing an unnecessary and unreasonable period of time with respect to automobile anti-theft alarm devices, such alarm shall not sound in excess of fifteen minutes.

B. Radios, televisions and stereos, etc. It shall be unlawful for any person, without special permit or as may otherwise be provided in this ordinance code, to play, use, operate or permit to be played, used or operated, any radio, television set, musical instrument, phonograph, stereophonic equipment, jukebox or other machine or device, for producing, reproducing or amplifying sound at such sound levels as to cause the sound level to exceed forty dB(A) as measured within the residence of any complaining person.

C. Loudspeakers, amplifiers for advertising. The using, operating or permitting to be played, used or operated of any radio receiving set, musical instrument, phonograph, loudspeaker, sound amplifier or other machine or device for the producing or reproducing of sound which is cast upon the public streets in such manner as to exceed the maximum exterior noise level permitted under this chapter.

D. Animals, fowl, etc. It is unlawful for any person to keep or allow to be kept, or suffer or permit any animal to remain upon the premises under the control of such a person, when such

animal habitually barks, whines or makes loud and unusual noises in such a manner as to disturb the peace and quiet of the neighbors surrounding or in the vicinity of such premises, or whose barking or howling or other sound or cry interferes with any person of ordinary sensitiveness in the reasonable and comfortable enjoyment of life and property. This provision shall not apply to farm animals within any zone where such farm animals are permitted by this ordinance code.

E. Construction, landscape maintenance or repair.

1. It shall be unlawful for any person to engage in or permit the generation of noise related to landscape maintenance, construction including erection, excavation, demolition, alteration or repair of any structure or improvement, at such sound levels, as measured at the property line of the nearest adjacent occupied property, as to be in excess of the sound levels permitted under this chapter, at other times than between the hours of 7:00 A.M. and 6:00 P.M. The person engaged in such activity is hereby permitted to exceed sound levels otherwise set forth in this chapter for the duration of the activity during the above described hours for purposes of construction. However, nothing contained herein shall permit any person to cause sound levels to at any time exceed fifty-five dB(A) for intervals of more than fifteen minutes per hour as measured in the interior of the nearest occupied residence or school.
2. Construction related noise as defined in subsection (E)(1) immediately above, may take place outside the time period set forth in subsection (E)(1) and above the relative sound levels in case of urgent necessity in the interest of public health and safety, and then only with the prior permission of the building inspector. Such permit may be granted for a period not to exceed three days or until the emergency ends, whichever is less. The permit may be renewed for periods of three days while the emergency continues.
3. Unless exempted by this chapter, if the building official should determine that the public health and safety will not be impaired by the construction related noise, the building inspector may issue a permit for construction within the hours of 6:00 P.M. and 7:00 A.M., upon application being made at the time the permit for the work is awarded or during the progress of the work. The building official may place such conditions on the issuance of the permit as to him or her shall seem appropriate to maintain the public health and safety.

F. Machinery, equipment, fans and air conditioning. It shall be unlawful for any person to operate, cause to operate or permit the operation of any machinery, equipment, device, pump, fan, compressor, air conditioning apparatus or similar mechanical device, including the use of any steam shovel, pneumatic hammer, derrick, steam or electric hoist, blower or power fan, or any internal combustion engine, the operation of which causes noise due to the

explosion of operating gases or fluids, or other appliance, in any manner so as to create any noise which would cause the noise level at the property line of the property upon which the equipment or machinery is operated to exceed the base ambient noise level by five dB(A).

G. Motor driven vehicles. It shall be unlawful for any person to operate any motor driven vehicle within the city that, due to the nature of the operation of the vehicle, or due to the operating condition of the vehicle, or due to any modification made to the vehicle, in such manner as to exceed noise levels set forth in Section 8.44.050 hereof.

1. Exhaust. It shall be unlawful for any person to discharge into the open air the exhaust of any steam engine, stationary internal combustion engine, motorboat or motor driven vehicle except through a muffler or other device which will effectively prevent loud or explosive noises therefrom.

H. Notwithstanding any other provisions of this chapter and in addition thereto, it shall be unlawful for any person to willfully make or continue, or cause to be made or continued, any loud, unnecessary and unusual noise which disturbs the peace or quiet of any neighborhood or which causes discomfort or annoyance to any reasonable person of normal hearing sensitivity residing in the area. The standard which may be considered in determining whether a violation of the provisions of this section exists may include, but not be limited to, the following:

1. The level of noise;
2. Whether the nature of the noise is usual or unusual;
3. Whether the origin of the noise is natural or unnatural;
4. The level and intensity of the background noise, if any;
5. The proximity of the noise to residential sleeping facilities;
6. The nature of the zoning of the area within which the noise emanates;
7. The density of the inhabitation of the area within which the noise emanates;
8. The time of the day and night the noise occurs;
9. Whether the noise is recurrent, intermittent, or constant;
10. The duration of the noise; and
11. Whether the noise is produced by a commercial or noncommercial activity.

I. No person shall use or operate a radio, tape player, tape recorder, record player, television or similar device in a vehicle on a street, which is audible to a person of normal hearing sensitivity, more than twenty-five feet from said vehicle.

(Code 1965, § 11D-09.)

(Ord. No. 1454, § 3, 10-9-12)

8.44.100 - Application between zones.

In applying the regulations set forth in this chapter, each source of noise shall be subject only to such regulation as shall apply to the zone, including any designated truck route, within which it is located. A use lying adjacent to a zone with a more restrictive noise requirement hereunder shall not be required to conform to that more restrictive requirement. For purposes of this subsection, "zone" shall be as utilized in Title 17 of the Banning Ordinance Code.

(Code 1965, § 11D-10.)

8.44.110 - Manner of enforcement.

A. Upon the occurrence of an alleged violation of this chapter or any provision contained herein, the alleged violator shall be issued a written notice to appear before the abatement hearing officer described in Chapter 8.48 of this Code. Such notice may be issued by any person authorized to issue a notice for violation of any provision of this Code.

B. The notice shall set forth the section alleged to have been violated, the manner of the violation and the date and time of such violation. The notice shall otherwise be in the form and served in the manner and within the time set forth in Chapter 8.48 of this Code. The alleged violator shall be given notice and the opportunity to appear at the hearing and there show cause why the alleged violation should not be found to constitute a nuisance.

C. The abatement hearing officer shall hear the matter and shall make a determination of the existence of a nuisance as for any matter heard pursuant to Chapter 8.48. The alleged violator shall thereafter be given notice of the determination of the abatement hearing officer in the manner provided by this chapter.

D. An appeal from a determination of the abatement hearing officer shall be taken in the manner provided in chapter 8.48 of this Code.

E. The police department shall have the power and duty to enforce the following noise control provisions of this Code: Section 8.44.090(H) and section 8.44.090(I) of this Code. Any person found to be in violation of section 8.44.090(H) and section 8.44.090(I), shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be fined in an amount not exceeding one thousand dollars, or be imprisoned in the county jail for a period of not exceeding six months, or by both fine and imprisonment. Each day such violation is committed or permitted to continue shall constitute a separate offense and shall be punishable as such hereunder.

(Code 1965, § 11D-11.)

8.44.120 - Violation a misdemeanor.

Any person violating any determination of the nuisance abatement board issued under this chapter shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be fined in an amount not exceeding one thousand dollars, or be imprisoned in the city or county jail for a period not exceeding six

months, or by both such fine and imprisonment. Each day such violation is committed or permitted to continue shall constitute a separate offense and shall be punishable as such hereunder.

(Code 1965, § 11D-12.)

8.44.130 - Additional remedy—Injunction.

As an additional remedy, the operation or maintenance of any device, instrument, vehicle or machinery in violation of any provision hereof and which causes discomfort or annoyance to reasonable persons of normal sensitiveness or which endangers the comfort, repose, health or peace of residents in the area shall be deemed, and is declared to be a public nuisance and may be subject to abatement summarily by a restraining order or injunction issued by a court of competent jurisdiction.

(Code 1965, § 11D-13.)

8.44.140 - Fees.

A fee shall be set as determined by resolution of the city council.

(Code 1965, § 11D-14.)

FHWA-RD-77-108 HIGHWAY NOISE PREDICTION MODEL (9/12/2021)

Scenario: E
Road Name: Highland Springs Av.
Road Segment: n/o I-10 Fwy. WB Ramps
Project Name: Banning Point
Job Number: 13841

SITE SPECIFIC INPUT DATA

Highway Data

Average Daily Traffic (Adt):	32,793 vehicles
Peak Hour Percentage:	8.33%
Peak Hour Volume:	2,732 vehicles
Vehicle Speed:	30 mph
Near/Far Lane Distance:	78 feet

Site Data

Barrier Height:	**0.0 feet**
Barrier Type (0-Wall, 1-Berm):	0.0
Centerline Dist. to Barrier:	67.0 feet
Centerline Dist. to Observer:	67.0 feet
Barrier Distance to Observer:	0.0 feet
Observer Height (Above Pad):	5.0 feet
Pad Elevation:	0.0 feet
Road Elevation:	0.0 feet
Road Grade:	0.0%
Left View:	-90.0 degrees
Right View:	90.0 degrees

NOISE MODEL INPUTS

Site Conditions (Hard = 10, Soft = 15)

Autos:	15
Medium Trucks (2 Axles):	15
Heavy Trucks (3+ Axles):	15

Vehicle Mix

VehicleType	Day	Evening	Night	Daily
Autos:	71.9%	12.2%	15.9%	86.85%
Medium Trucks:	75.3%	7.0%	17.7%	1.94%
Heavy Trucks:	60.4%	12.0%	27.6%	11.21%

Noise Source Elevations (in feet)

Autos:	0.000		
Medium Trucks:	2.297		
Heavy Trucks:	8.004	Grade Adjustment:	0.0

Lane Equivalent Distance (in feet)

Autos:	54.708
Medium Trucks:	54.546
Heavy Trucks:	54.562

FHWA-RD-77-108 HIGHWAY NOISE PREDICTION MODEL (9/12/2021)

Scenario: HY 2040+P
Road Name: Sun Lakes Blvd.
Road Segment: e/o Sun Lakes Village Dr.
Project Name: Banning Point
Job Number: 13841

SITE SPECIFIC INPUT DATA

Highway Data

Average Daily Traffic (Adt):	10,452 vehicles
Peak Hour Percentage:	8.33%
Peak Hour Volume:	871 vehicles
Vehicle Speed:	35 mph
Near/Far Lane Distance:	48 feet

Site Data

Barrier Height:	**0.0 feet**
Barrier Type (0-Wall, 1-Berm):	0.0
Centerline Dist. to Barrier:	50.0 feet
Centerline Dist. to Observer:	50.0 feet
Barrier Distance to Observer:	0.0 feet
Observer Height (Above Pad):	5.0 feet
Pad Elevation:	0.0 feet
Road Elevation:	0.0 feet
Road Grade:	0.0%
Left View:	-90.0 degrees
Right View:	90.0 degrees

NOISE MODEL INPUTS

Site Conditions (Hard = 10, Soft = 15)

Autos:	15
Medium Trucks (2 Axles):	15
Heavy Trucks (3+ Axles):	15

Vehicle Mix

VehicleType	*Day*	*Evening*	*Night*	*Daily*
Autos:	71.9%	12.2%	15.9%	87.87%
Medium Trucks:	75.3%	7.0%	17.7%	1.79%
Heavy Trucks:	60.4%	12.0%	27.6%	10.34%

Noise Source Elevations (in feet)

Autos:	0.000		
Medium Trucks:	2.297		
Heavy Trucks:	8.004	*Grade Adjustment:*	0.0

Lane Equivalent Distance (in feet)

Autos:	44.147
Medium Trucks:	43.947
Heavy Trucks:	43.966

PLANNING COMMISSION ADJOURNED MEETING

99 E Ramsey Street, Banning, CA

Tuesday, October 19, 2021 - 6:30 PM

ACTION MINUTES

I. CALL TO ORDER at 6:30 p.m.

Present: Chairman Shaw, Vice Chairman Brosious, Commissioner Krick, Commissioner Lopez, Commissioner Santana.

II. PUBLIC COMMENTS: (ITEMS NOT ON THE AGENDA)

Public comments opened.

No comments from the public.

Public comments closed.

III. CONSENT CALENDAR ITEM

ACTION: Motion/Second (Krick/Brosious)
(Motion Carried 5-0) Passed.

To approve: Minutes – September 1, 2021, Regular Meeting.

IV. DISCUSSION ITEM:

AB 361 – Open meetings: state and local agencies: teleconferences.

Director Rush said we would need to make specific findings monthly for Commissioners who still wishes to participate via Zoom. City Council will provide policy direction at their next meeting.

V. PUBLIC HEARING: opened at 6:35 p.m.

1. NOTICE OF EXEMPTION FOR CONSIDERATION OF DESIGN REVIEW NO. 21-7002, THE PROPOSED RESIDENTIAL ARCHITECTURAL FLOOR PLANS, ELEVATIONS, AND STANDARDS FOR AN APPROVED TENTATIVE TRACT MAP

CONSISTING OF 16 LOTS, INCLUDING ONE DETENTION BASIN/OPEN SPACE, DESIGN REVIEW INCLUDES THE REVIEW OF 15 SINGLE-FAMILY, ONE-STORY HOMES WITH 4 TO 5 BEDROOMS AND ATTACHED TWO-CAR GARAGES. LOW DENSITY RESIDENTIAL (APN: 534-272-009).

R. Thomsen, applicant, was available for questions.

Commissioner Krick requested tubular steel or wrought iron fencing around the perimeter of the detention basin.

Applicant said the owner approved wrought iron fencing per County guidelines.

Public comments opened.

No comments from the public.

Public comments were closed by the Chair.

ACTION: Motion/Second (Krick/Brosious)

That the Planning Commission adopt Resolution 2021-14:

I. Make a determination under CEQA Guidelines that the project is Categorically Exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15332 (Class 32-Infill Developments): and

II. Approve Design Review 21-7002 to allow 15 single-family, one-story homes with 4 to 5 bedrooms and attached two-car garages in the Low Density-Residential (LDR) zoning district.

(Motion Carried 5-0) Passed

2. NOTICE OF EXEMPTION AND NOTICE OF PUBLIC HEARING FOR DESIGN REVIEW 21-7011 AND CONDITIONAL USE PERMIT 21-8017 TO CONSIDER A PROPOSAL TO DEVELOP AND OPERATE A 65-MEGAWATT BATTERY ENERGY STORAGE FACILITY, WITH AN 85-FOOT-TALL GENERATION TIE-IN POWER POLE, LOCATED IN THE INDUSTRIAL (I) ZONE ON REAL PROPERTY LOCATED AT 300 GALLEHER WAY, (APN 541-220-024)

T. Miller, Electric Utility Director said this is great project, event thought the Banning Electric Utility won't benefit, it will help the grid in the area.

Commissioner Brosious asked about facility operations and security protocols.

Commissioner Lopez asked about outdoor lighting and hours of operation.

Commissioner Santana asked if the intention is for other business to use this energy.

Commissioner Krick asked if there is a possibility of street dedication of Galleher Way.

Public comments opened.

R. Phelps, resident of Banning asked what are the fire considerations that would affect the surrounding properties.

Public comments closed.

ACTION: Motion/Second (Krick/Santana)

That the Planning Commission adopt Resolution 2021-15 recommending the City Council:

I. Make a determination under CEQA Guidelines that the project is Categorically Exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15332 (Infill Development Projects); and

II. Approve Design Review 21-7011 and Conditional Use Permit 21-8017 for a proposed 65-megawatt battery energy storage facility with 85-foot-tall power pole on a 1.83-acre parcel of land in the Industrial (I) zoning district.

(Motion Carried 5-0) Passed

3. NOTICE OF INTENT TO ADOPT A NEGATIVE DECLARATION AND CONSIDERATION OF GENERAL PLAN AMENDMENT 21-2504 TO ADOP THE 2021-2029 HOUSING ELEMENT, IN THE CITY OF BANNING, CALIFORNIA

Public comments opened.

No comments from the public.

Public comments closed.

ACTION: Motion/Second (Krick/Lopez)

That the Planning Commission adopt Resolution 2021-17 recommending the City Council:

I. Make a determination under CEQA Guidelines that the Project will not have a significant impact on the environment pursuant to the adoption of a Negative Declaration in accordance with Section 15070 and 150702; and

II. Approve General Plan Amendment 21-2504 recommending adoption of the 2021-2029 Hosing Element to the City Council.

(Motion Carried 5-0) Passed

4. CONSIDERATION OF DESIGN REVIEW NO. 21-7008 & TENATIVE PARCEL MAP NO. 21-4001, A PROPOSED INDUSTRIAL WAREHOUSE BUILDING MEASURING APPROXIMATELY 620,000 SQUARE FEET WHICH INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE AND SIX (6) RETAIL/RESTAURANT BUILDINGS, TOTALING 34,000 SQUARE FEET. THE TENTATIVE PARCEL

MAP WILL SUBDIVIDE THE 37-ACRE PARCEL INTO THREE (3) LOTS, FOR FINANCING AND CONVEYANCE PURPOSES, WITHIN THE SUN LAKE VILLAGE NORTH SPECIFIC PLAN AREA (APN: 419-140-057).

Director Rush presented Modified Conditions of Approval:

Condition #16: **Delete** (~~Hours of operation shall be no earlier than 7:00 a.m. and no later than 10:00 p.m~~.)

Condition #26: **Modify** (clarify to say that "Developer to update Trip Generation Report to determine when installation of a traffic signal at the intersection of Sun Lakes Boulevard and Future Driveway 3 (as shown in the TIA) and Country Club Drive will be necessary (either as part of initial construction or at a later date when the retail portion of the Project is constructed). Project applicant shall reach out to the Sun Lakes Country Club staff to coordinate temporary access during construction.")

Condition #50: (clarify to sat that "Prior to the issuance of a grading permit or building permit, the applicant shall finalize the Trip Generation Report and submit the report to the Engineering Division for review and approval. All mitigation identified in the Trip Generation Report and this DR Approval shall be implemented by the applicant to the satisfaction of the City Engineer.")

Condition #70: **Modify** (include the word "public" before the word "improvements" to clarify this applies to public improvements only).

J. Everett, Director of Development - Creation Equity gave a PowerPoint presentation of the proposed project.

Commissioner Krick had questions regarding truck traffic circulation within the facility, fencing and landscaping being proposed.

Commissioner Brosious asked if the front docking area will be at grade, and the number of truck visits it will generated per day.

J. Everett said the Specific Plan Amendment adopted reduces the number of trucks visits by 400 a day and hours of operation will be 24 hours 7 days a week.

Applicant said they are in discussion with staff to potentially extending the left turn deceleration lane on Sun Lakes Blvd. to allow for more cars to make the left turn and reduce the traffic congestion.

Director Rush said staff recommended that there be an updated traffic count at the time they are ready to submit improvement plans.

Commissioner Lopez asked if the length of the trucks were considered on the study during peak hours of traffic. He feels it needs to be clarity and be realistic about it.

C. So, P.E.- Urban Crossroads said that a project-specific traffic was not done for the Specific Plan Amendment because it didn't have a development plan associated with it. For the current plan they looked at trip generation assessment, but it did not go into detail for the items that will be looked in the future as mentioned by staff.

Commissioner Lopez asked for further studies be done for this project.

Commissioner Krick said there should be a separate lane for vehicles to queue in to get into the shopping center on Sun Lakes Blvd. Side without causing any problems for the public.

The applicant said they feel these requests can be accommodated and happy to look at alternatives for solutions the Planning Commission feels it's appropriate.

Commissioner Santa asked if there are any stipulations on providing livable minimum wages that would help benefit the Banning residents.

J. Everett said this project will generate about 760 permanent jobs and provide electric vehicle charging stations. The future tenants will focus on hiring local people that are located within short distance of the site.

Commissioner krick asked questions about retail trash enclosures.

Director Rush said the City Council recently passed an ordinance regarding changes to the trash enclosures receptacles for retail businesses per State law.

Public comments opened.

Thirty (30) residents of Banning spoke against the project, primarily traffic problems, health assessment, noise, air pollution, emergency access and potential decrease in property values the proposed Industrial warehouse building would bring on the surrounding area.

Forty (40) emails received before the meeting against the proposed Industrial warehouse building; and

A petition for disapproval of the proposed Industrial warehouse building. One hundred twenty-two (122) signatures collected.

Public comments closed.

Commissioner Brosious asked if the project can be conditioned to widen Sun Lakes Blvd and go all the way to Highland Springs.

A. Vela, Public Works Director said current data would have to be analyzed.

J. Zemon-Creation Equity said language can be stipulated on the final plans regarding truck idling, the language will be stipulated in a covenant for the tenant.

Commissioner Krick asked if the stop lights could be upgrade from Wilson Street to Sun Lakes Blvd.to alleviate concern of the community for emergency vehicles.

J. Zemon said he's happy to take all comments in to account and hope to satisfy the community in terms of traffic circulation.

Commissioner Santana feels there is more information that needs to be covered to alleviate the community concerns.

ACTION: Motion/Second (Lopez/Santana)
To continue the meeting to a date not certain to analyze the project.

(Motion Carried 5-0) Passed

V. PLANNING COMMISSIONER COMMENTS

No comments from the Planning Commission.

VI. COMMUNITY DEVELOPMENT DIRECTOR COMMENTS

A General Plan Update workshop will be scheduled for the next Planning Commission meeting.

VII. ADJOURNMENT

Adjournment of the Planning Commission of the October 19, 2021, Meeting at 11:13 p.m.

The next regular meeting of the Banning Planning Commission is scheduled for Wednesday, November 3, 2021, at 6:30 p.m. in the City Council Chambers.

Minutes prepared by:

Sandra B. Calderon

_____
Sandra B. Calderon
Development Project Coordinator/Recording Secretary

J. Zemon talked about the design changes that will allow to alleviate congestion. He said the warehouse will be built first and no tenant has been identified for it. The warehouse's groundbreaking is at least six to eight months out, and the building would likely be occupied no sooner than two years from now.

The development is projected to bring the city $4M in developer impact fees in the near future. Once the project is built out and leased, the city is projected to see $325K in recurring annual revenues and more than 700 full time jobs created.

The applicant is willing to work with the City of Beaumont and the City of Banning to upgrade the stop signal lights by adding an Opticom emergency response system on Sun Lakes Blvd and Highland Springs Avenue traffic lights for emergency vehicles.

Public comments opened.

Thirty-three members of the public spoke against the project, the majority being residents of Sun Lakes, The Lakes and Four Seasons Communities. The top concerns are quality of life issues, such as increased traffic, noise, and pollution.

Public comments were closed by the Chair.

The Planning Commission's decision is final, pending an appeal filed with the City within the next 15 days for City Council consideration.

S. Young, Assistant City Attorney said that that city staff determined there were no facts to support a supplement or a redraft because the Banning Pointe project has been scaled down since the EIR was certified in 2020.

ACTION: Motion/Second (Krick/Brosious)

That the Planning Commission adopt Resolution 2021-16, recommending the City Council:

I. Make the determination that the Project, and the circumstances under which the Project is undertaken, do not involve substantial changes which will result in new significant environmental effects, and the Project does not involve new information of substantial importance which shows that the Project will have significant effects not discussed in the prior FEIR. All potential environmental impacts associated with the “Sun Lakes Village North Specific Plan Amendment No. 5” project and the Project are adequately addressed by the prior FEIR, the Statement of Overriding Considerations, the MMRP. Therefore, in accordance with CEQA Guidelines Section 15162 (Subsequent EIRs and Negative Declarations), a Notice of Determination (NOD) has a been prepared for the Commission to consider in conjunction with the Project.

II. Approve Design Review 21-7008 and Tentative Parcel Map 38164 for a proposed Industrial Warehouse building which includes office space and six retail/restaurant buildings. The Tentative Parcel Map will subdivide a 47-acre parcel into three (3) lots, for financing and conveyance purposes in the Sun Lakes Village North Specific Plan Area.

With the following added condition of approval:

The applicant is to work with the City of Beaumont to install signal preemption devices installed on the exiting stop lights on the South Sun Lakes Blvd. between Second Street, Sun Lakes Blvd., and the Interchange.

(Motion Carried 3-2) with Commissioners Lopez and Santana voting against. Roll call vote.

V. PLANNING COMMISSIONER COMMENTS

No Comments from the Community Development Director.

VI. COMMUNITY DEVELOPMENT DIRECTOR COMMENTS

No Comments from the Planning Commission.

VII. ADJOURNMENT

Adjournment of the Planning Commission of the December 1, 2021, Meeting at 11:19 p.m.

The next regular meeting scheduled for January 5, 2022, of the Banning Planning Commission is adjourned to Wednesday, January 12, 2022, at 6:30 p.m. in the City Council Chambers.

Minutes prepared by:

Sandra B. Calderon

RESOLUTION 2021-16

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF BANNING, CALIFORNIA, MAKING ENVIRONMENTAL DETERMINATIONS UNDER CEQA GUIDELINES SECTION 15162, AND APPROVING DESIGN REVIEW 21-7008 & TENTATIVE PARCEL MAP 31864, TO ALLOW THE SUBDIVISION OF 47 ACRES INTO THREE (3) COMMERCIAL AND INDUSTRIAL PARCELS FOR FINANCING PURPOSES AND PERMIT THE CONSTRUCTION OF A PROPOSED INDUSTRIAL WAREHOUSE BUILDING OF 619,959 SQUARE FEET ON 47-ACRES, INCLUDING 10,000 SQUARE FEET OF OFFICE SPACE, AND SIX (6) RETAIL/RESTAURANT BUILDINGS TOTALING 34,000 SQUARE FEET, ON REAL PROPERTY LOCATED WITHIN THE BOUNDARIES OF THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN AMENDMENT NO. 5 (APN: 419-140-057)

WHEREAS, Sun Lakes Highland, LLC has applied for a Design Review 21-7008 and a Tentative Parcel Map 31864 for a new industrial and retail development proposing one (1) industrial building and six (6) retail/restaurant buildings; and for the subdivision of the site into three (3) parcels; and

WHEREAS, the Banning Municipal Code Title 16 and the Subdivision Map Act allows the subdivision of approximately 47 acres into three (3) commercial/industrial lots within the Sun Lakes Village North Specific Plan Area subject to the approval of a Tentative Parcel Map; and

WHEREAS, on October 19, 2021 and December 1, 2021, the Planning Commission held the noticed public hearing at which time interested persons had an opportunity to testify in support of, or opposition to, the project and at which the Planning Commission considered the Design Review 21-7008 & Tentative Parcel Map 31864; and

WHEREAS, on October 8th and November 19th of 2021, the City gave public notice as required under Government Code Section 66451.3 by advertising in the Record Gazette Newspaper, and mailing notices to all property owners within 300-feet on October 8, 2021, and 1,000 feet on November 19, 2021, of the project site of the holding of a public hearing for the Planning Commission's review and recommendation, at which time the project would be considered; and

NOW THEREFORE, the Planning Commission of the City of Banning does hereby resolve, determine, find, and order as follows:

SECTION 1: ENVIRONMENTAL FINDINGS

The Planning Commission, considering the whole record before it, including but not limited to, the staff recommendation as provided in the Staff Report dated October 19, 2021, and documents incorporated therein by reference, and any other evidence [within

the meaning of Public Resources Code § 21080(e) and § 21082.2] within the record or provided at the public hearing of this matter, hereby finds and determines as follows:

A. Public Record:

Pursuant to the California Environmental Quality Act ("CEQA") (Cal. Pub. Res. Code, § 21000 *et seq.*), the State Guidelines (14 Cal. Code Regs. § 15000 *et seq.*), City staff has considered the potential environmental impacts of the Project. Potential environment issues associated with the proposed Project were analyzed in the previously certified Environmental Impact Report for the *Sun Lakes Village North Specific Plan Amendment No. 5* (SCH 2020029074) which documents are on file in the Community Development Department. There have been no substantial changes in the Project nor in the circumstances under which the Project is undertaken which will require major revisions of the previous certified environmental document; nor is there new information that shows that the Project will have a new or changed significant environmental effect on the environment, or an effect more severe than originally thought. Therefore, in accordance with CEQA Guidelines Section 15162, Subsequent EIRs and Negative Declarations, a subsequent environmental document is not required.

B. CEQA:

i. The approval of the Project is in compliance with requirements of the California Environmental Quality Act ("CEQA"), in that on October 19th and December 1st, 2021, at duly noticed public hearings, the Planning Commission considered the project's Conditions of Approval and Mitigation Monitoring Report and Program (MMRP) and found that there have been no substantial changes in the Project nor in the circumstances under which the Project is undertaken which will require major revisions of the previous certified environmental document; nor is there new information that shows that the Project will have a new or changed significant environmental effect on the environment, or an effect more severe than originally thought. Therefore, in accordance with CEQA Guidelines Section 15162, Subsequent EIRs and Negative Declarations, a subsequent environmental document is not required.

ii. The Planning Commission has independently reviewed the Project and staff's recommendation and based upon the whole record before it, and in the Planning Commission's independent review and judgment, finds that that the Project is not subject to further environmental review pursuant to the CEQA Guidelines because: (1) the Project, and the circumstances under which the Project is undertaken, do not involve substantial changes which will result in new significant environmental effects and that the Project does not involve new information of substantial importance which shows that the Project will have significant effects not discussed in the

prior EIR; and (2) all potential environmental impacts associated with Project are adequately addressed by the prior EIR.

iii. The Community Development Director is authorized to file a Notice of Determination in accordance with CEQA.

C. Multiple Species Habitat Conservation Plan (MSHCP).

a. As determined through the previously certified EIR, the Project is found to be consistent with the MSHCP. The project is located outside of any MSHCP criteria area and mitigation is provided through payment of the MSHCP Mitigation Fee.

SECTION 2. Required Municipal Code and Subdivision Map Act Findings for Approval for Tentative Parcel Map 31864. An application for a Tentative Parcel Map requires that it meet specific findings in accordance with Title 16 (Subdivisions) of the Banning Municipal Code and Government Code Section 66473.5 and Section 66474. The Planning Commission of the City of Banning does hereby make the following findings and determinations in connection with the approval of the project:

A. Finding: The proposed map is consistent with the General Plan and the Sun Lakes Village North Specific Plan (SLVSP) Amendment No. 5.

Findings of Fact:
The General Plan land use designation for the site is classified as Business Park and the SLVSP land use designation is Business and Warehouse Zoning District.The Project and the associated Tentative Parcel Map will be consistent with the General Plan and SLVSP in that the proposed Map will result in the development of this Specific Plan area as industrial warehouse building (619,959 gross floor area), which includes 10,000 square feet of office and a separate parcel containing six (6) Retail buildings totaling 34,000 square feet to the south varying in size from 1,600 square feet to 8,400 square feet. Additionally, the land area allocated within the SLVSP Land Use Plan for the Business & Warehouse District, Retail & Service District, and Office & Professional District will be consistent with the proposed subdivision of parcels as a result of the Tentative Parcel Map. One of the primary policies of the Land Use Element of the General Plan is that projects adjacent to existing neighborhoods shall be carefully reviewed to assure that neighborhood character is protected. The proposed Tentative Parcel Map serves to achieve this objective in that the subdivision design is consistent with the existing surrounding neighborhood. Considering all these aspects, the proposed Map furthers the objectives and policies of the General Plan and is compatible with the land uses districts within the general vicinity of the Project.

B. Finding: The design or improvement of the proposed subdivision is consistent with the City's General Plan and the Sun Lakes Village North Specific Plan (SLVSP) Amendment No. 5.

Findings of Fact:
The proposed subdivision has been designed to meet City standards which provide satisfactory pedestrian and vehicular circulation, including emergency vehicle access and on-site improvements, such as streets, utilities, and drainage facilities have been designed and are conditioned to be constructed in conformance with City standards which is consistent with the City's General Plan.

Section 2.2.1.(Semi-Truck Access) of the SLVSP identifies Sun Lakes Village Drive as an access point for semi-trucks to the Business & Warehouse District. Currently, the Sun Lakes Village Shopping Center utilizes Sun Lakes Village Drive for truck deliveries in both eastbound and westbound directions. As such, the Project's access points along Sun Lakes Boulevard have been evaluated and any necessary driveway widening, adequate truck maneuvering, and signalized intersections have been provided per the City Engineer. Additionally, the Project is located near Interstate 10 freeway which allows for ideal access to industrial-type lands and helps minimize potential traffic impacts, which is consistent with General Plan Policy Nos. 8, 10, & 11 for Industrial uses.

C. Finding: The site is physically suitable for the type of development.

Findings of Fact:
The 47-acre site is relatively flat, rectangular in shape, and will create several vehicular access points off Sun Lakes Boulevard adequate for the proposed industrial/commercial uses. The proposed project is adjacent to existing commercial development and has availability of all services including, streets, water, sewer, and electricity. Therefore, the site is physically suitable for this type of development.

D. Finding: The site is physically suitable for the density of development.

Findings of Fact:
The site is located within the Business & Warehouse Zoning District within the Sun Lakes Village Specific Plan Area, which allows for warehouse, professional office, and retail/restaurant use. The project proposes development of an industrial warehouse building measuring 619,959 gross floor area, which includes 10,000 square feet of office and six (6) Retail buildings totaling 34,000 square feet to the south varying in size from 1,600 square feet to 8,400 square feet. As per the Sun Lake Village North Specific Plan, the subdivision as proposed is suitable for the density of development.

E. Finding: The design of the subdivision or the proposed improvements are not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.

Findings of Fact:
The site is currently vacant and does not contain any significant vegetation or habitat for wildlife. Per the Multiple Habitat Conservation Plan (MSHCP), there is no evidence that any endangered, threatened, or listed species of plant or animal, or its habitat, is located on the site. There is no evidence that vernal pool complex, similar bodies of water, or conditions suitable for forming such bodies of water exist on the site. The Project incorporates conditions intended to comply with the recommendations of the MSHCP. In addition, this Project has been conditioned to comply with the environmental policies and regulations of the City of Banning and those of all local and regional governmental agencies having jurisdiction over the site.

F. Finding: The design of the subdivision or type of improvements is not likely to cause serious public health problems.

Findings of Fact:
The design of the subdivision is in conformance with the City's General Plan, Zoning Ordinance, and Subdivision Ordinance, the construction of all units on the site has been conditioned to comply with all applicable City of Banning ordinances, codes, and standards including, but not limited to, the California Uniform Building Code, the City's Ordinances relating to Stormwater runoff management and controls. In addition, the design and construction of all improvements for the subdivision has been conditioned to be in conformance with adopted City street and public works standards. The City's ordinances, codes, and standards have been created based on currently accepted standards and practices for the preservation of the public health, safety, and welfare.

G. Finding: The design of the subdivision or the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision.

Findings of Fact:
Other than easements for Banning Provided Utilities and Southern California Edison, no easements of record or easements established by judgement of a court of competent jurisdiction for public access across the site have been disclosed in a search of the title records for the site and the City does not otherwise have any constructive or actual knowledge of any other such easements.

SECTION 3. Required Municipal Code Findings and Recommendation of Approval for Design Review 21-7008. Section 17.56.050 of the City of Banning Zoning

Ordinance requires that Design Review meets certain findings prior to the approval by the Planning Commission. The following findings are provided in support of the approval of the Design Review 21-7008:

A. Finding: The proposed project is consistent with the General Plan.

Findings of Fact:
The property is located within the Sun Lakes Village Specific Plan Area and has a "Business Park" General Plan Land Use designation. As stated in the City's General Plan, "Light industrial manufacturing and office/warehouse buildings are appropriate in this designation. Restaurants and retail uses ancillary to a primary use, and professional offices are City of Banning General Plan Community Development III-8 also appropriate. Commercial development, such as large-scale retail (club stores, home improvement, etc.) and mixed-use project may also be permitted, subject to a conditional use permit." The Project as proposed intends to develop an industrial warehouse building measuring 619,959 gross floor area, which includes 10,000 square feet of office and six (6) Retail buildings totaling 34,000 square feet to the south varying in size from 1,600 square feet to 8,400 square feet. Therefore, the Project is consistent with the intended uses for this General Plan designation.

B. Finding: The proposed project is consistent with the Zoning Ordinance, including the development standards and guidelines for the district in which it is located.

Findings of Fact:
The site is located within the Business & Warehouse Zoning District within the Sun Lakes Village Specific Plan Area which allows for warehouse, professional office, and retail/restaurant use. As proposed, the Project meets all required development standards as outline in Section 3.1 (Development Standards) of the Sun Lakes Village Specific Plan (SLVSP). These include such requirements as setback, height, landscaping, parking, etc. Additionally, the Project meets those Design Guidelines outlined in Section 3.2 of the SLVSP with regard to such elements as architectural articulation, blended use of building materials, and fenestration treatment. Therefore, the Project meets the City's zoning code development standards and design guidelines. The 37-acre site is relatively flat, rectangular in shape, and will create several vehicular points off Sun Lakes Boulevard adequate for the proposed industrial/commercial uses. The proposed project is adjacent to existing commercial development and has availability of all services including, streets, water, sewer, and electricity. Therefore, the site is physically suitable for this type of development.

C. **Finding: The design and layout of the proposed project will not unreasonably interfere with the use and enjoyment of neighboring existing or future development and will not result in vehicular and/or pedestrian hazards.**

Findings of Fact:
The site is located within the Business and Warehouse Zoning District within the Sun Lakes Village Specific Plan Area which allows for warehouse, professional office, and retail/restaurant use. The Project is bounded by Interstate 10 freeway to the north, Sun Lakes Village Shopping Center to the west, Sun Lakes Country Club to the south, and Sun Lakes Assisted Living & Memory Care to the east. Given that Sun Lakes Boulevard is a Major Highway between Highland Springs Avenue to Highland Home Road, the capacity for truck and automobile traffic volumes for commercial and industrial purposes is adequate. Major Highways are intended to connect residential and retail uses without encroaching upon neighborhoods. Signalized intersections are proposed to be installed at Highland Springs/Sun Lakes Boulevard and at Sun Lakes Boulevard/Country Club Drive to ensure safe pedestrian and vehicular crossing along Sun Lakes Boulevard. The 37-acre site is relatively flat, rectangular in shape, and will create several vehicular access points off Sun Lakes Boulevard adequate for the proposed industrial/commercial uses. The proposed project is adjacent to existing commercial development and has availability of all services including, streets, water, sewer, and electricity. Therefore, the site is physically suitable for this type of development.

D. **Finding: The design of the proposed project is compatible with the character of the surrounding neighborhood.**

Findings of Fact:
The site is bounded by the Interstate 10, Sun Lakes Country Club, The Lakes Assisted Living, and Sun Lakes Village Shopping Center. The northern portion of the project site is a proposed industrial warehouse building measuring 619,959 gross floor area, which includes 10,000 square feet of office. Six (6) Retail buildings totaling 34,000 square feet to the south ing in size from 1,600 square feet to 8,400 square feet. Building 1 will include a coffee restaurant with a drive-thru and the remaining five (5) buildings will be for retail and/or restaurant uses. Since the adjacent uses involve similarly intense uses such as commercial/retail, the Project will be compatible with the surrounding neighborhood.

SECTION 4. Planning Commission Action: Approval of Project with Conditions. Based on the foregoing, the Planning Commission of the City of Banning hereby approves Design Review 21-7008 & Tentative Parcel Map 31864 to permit the subdivision of approximately 47 acres into three (3) commercial/industrial lots and development of an industrial warehouse building measuring 619,959 square feet to

include 10,000 square feet of office space, and six (6) retail/restaurant buildings totaling 34,000 square feet located within the Sun Lakes Village North Specific Plan Area as shown in the attached plans (Exhibit A) (Assessor's Parcel No. 419-140-057), and subject to the recommended Conditions of Approval attached as Exhibit B.

PASSED, APPROVED AND ADOPTED this 1st day of December, 2021

Conditions of Approval

PROJECT: Design Review 21-7008 & Tentative Parcel Map 21-4001
SUBJECT: Conditions of Approval (Planning Commission Resolution 2021-16)
APPLICANT: Pamela Steele, MIG, Inc.
LOCATION: North of Sun Lakes Boulevard, east of Highland Springs Avenue, south of Interstate 10, and west of Highland Home Road in the Sun Lakes Village North Specific Plan (APN 540-180-055)

EXHIBIT A
To Planning Commission Resolution 2021-16

*** All fair share agreements, covenant agreements and agreements subject to recordation will be subject to review and approval by the City Attorney and will include appropriate enforcement provisions by the City and be properly securitized.**

Community Development Department

A. GENERAL REQUIREMENTS:

1. The project shall always comply with all federal, state, County and City laws, codes, regulations, and standards, including those that relate to hazardous materials.

2. The applicant shall indemnify, protect, defend, and hold harmless, the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, from any and all claims, demands, lawsuits, writs of mandamus, and other actions and proceedings (whether legal, equitable, declaratory, administrative or adjudicatory in nature), and alternative dispute resolutions procedures (including, but not limited to, arbitrations, mediations, and other such procedures) (collectively "Actions"), brought against the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, that challenge, attack, or seek to modify, set aside, void, or annul, the action of, or any permit or approval issued by, the City and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof (including actions approved by the voters of the City), for or concerning the project, whether such actions are brought under the California Environmental Quality Act (CEQA), State Planning and Zoning Law, the Subdivisions Map Act, Code of Civil Procedure Section 1085 or 1094.5, or any other state, federal, or local statute, law, ordinance, rule, regulation, or any decision of a competent jurisdiction. It is expressly agreed that the City

shall have the right to approve, which approval will not be unreasonably withheld, the legal counsel providing the City's defense, and that applicant shall reimburse City for any costs and expenses directly and necessarily incurred by the City in the course of the defense. City shall promptly notify the applicant of any Action brought and City shall cooperate with applicant in the defense of the Action.

3. Approval of this entitlement shall not waive compliance with any sections of the Banning Municipal Code (BMC), other applicable City ordinances, in effect at the time of building permit issuance.

4. The Project permitted under Design Review 21-7008 & Tentative Parcel Map 21-4001 shall commence construction within two (2) years from the date of this approval, or the Design Review shall become null and void. Additionally, if after commencement of construction, activities are discontinued for a period of one (1) year, the Design Review approval shall become null and void. The Community Development Director may, upon a written application being filed 30 days prior to expiration and for good cause, grant a onetime extension not to exceed 12 months. Upon granting of an extension, the Community Development Director shall ensure that the Design Review complies with all current provisions of Title 17 of the Banning Municipal Code.

5. A copy of the signed Resolution of approval and all Conditions of Approval imposed on the Design Review shall be reproduced in legible form on the improvement plans submitted for review and approval as required by the reviewing department.

6. Prior to any occupancy/use of the project site, or business activity being commenced thereon, all Conditions of Approval shall be completed to the satisfaction of the Community Development Director.

7. A trash enclosure shall be provided with three decorative walls, enhanced wall caps, a pedestrian entrance, a gate, and a structural steel cover, in a style compatible with the structure's architecture. The gate shall be maintained in working order and shall remain closed except when in use.

8. Exterior lighting shall be shielded or recessed so that light is contained within the boundaries of the parcel on which the lighting is located. All lighting shall be directed downward and away from adjoining properties and public rights-of-way.

9. Any roof-mounted equipment or utility equipment on the side of the structure, or on the ground, shall not be visible from adjacent properties, the public right-of-way, or the parking lot. Any architectural screening that is proposed to shield the roof-mounted equipment shall be

compatible in terms of colors and materials of the building. Landscape screening for ground mounted equipment shall be of sufficient size and quantity to fully screen the equipment.

10. A complete landscape/irrigation package prepared by a landscape architect licensed by the State of California shall be reviewed and approved by the Planning Division prior to issuance of building permit. The plans shall include the following elements:

    a. Water conservation concept statement.
    b. Calculation of maximum applied water allowance.
    c. Calculation of estimated total water use.
    d. Landscape design plan.
    e. Irrigation design plan.
    f. Certificate of substantial completion.
    g. The landscape plan shall demonstrate compliance with Zoning Ordinance requirements related to minimum dimensions and percentages of landscaping in parking areas, including required front yard setback landscaping.

11. Storage use and removal of toxic substances, solid waste, and flammable liquids shall conform to all applicable federal, state, and local regulations. All required licensing shall always be maintained in good order. Lapse or revocation of any required license shall result in the voiding of the Business License.

12. The subject property shall be developed and maintained in accordance with the site plans stamped approved by the City and on file in the Planning Division, the conditions contained herein, and the applicable regulations within the Banning Municipal Code.

13. If human remains are encountered during grading and other construction excavation, the developer/owner shall stop/cease work in the immediate vicinity and the County Coroner shall be contacted pursuant to State Health and Safety Code Section 7050.5.

14. Trash collection shall occur between the hours of 8:00 a.m. and 6:00 p.m. only.

15. All graffiti shall be removed immediately or within 24 hours of notice from the City.

16. Hours of operation shall be no earlier than 7:00 a.m. and no later than 10:00 p.m.

17. Commercial zoning districts shall be permitted wall signs per the area of the wall (length times height of the wall). The area devoted to such signs shall not exceed twenty percent of the wall area. All parts, portions, and materials shall be maintained and kept in good repair. The display surface of all signs shall be kept clean, neatly painted, and free from rust and corrosion. Any cracked, broken surfaces, malfunctioning lights, missing sign copy or other unmaintained or

damaged portion of a sign shall be repaired or replaced within thirty calendar days following notification by the City.

18. Pedestrian walkways should not intersect the drive-through aisles, but where they do, they shall have clear visibility, and they must be emphasized by enriched paving or striping.

PUBLIC WORKS DEPARTMENT:

19. A Public Works Permit shall be required prior to commencement of any work within the public right-of-way. The contractor working within the public right-of-way shall submit proof of a Class "A" State Contractor's License, City of Banning Business License, and Liability Insurance. Any existing public improvements, or public improvements not accepted by the City that are damaged during construction shall be removed and replaced as determined by the City Engineer or his/her representative

.

20. Prior to the issuance of any grading, construction, or public works permit by the City, the applicant shall obtain any necessary clearances and/or permits from the following agencies:
    a. Fire Marshal (access)
    b. Public Works Department (grading permits, street improvement permits)
    c. Riverside County Flood Control & Water Conservation District (storm drain)
    d. California Regional Water Quality Control Board Colorado River Basin (RWQCB)
    e. South Coast Air Quality Management District (SCAQMD)

21. The applicant is responsible for meeting all requirements of permits and/or clearances from the above listed agencies. When the requirements include approval of improvement plans, the applicant shall furnish proof of such approvals when submitting improvements plans to the City.

22. The following improvement plans shall be prepared by a Civil Engineer licensed by the State of California and submitted to the Engineering Division for review and approval. A separate set of plans shall be prepared for each line item listed below. Unless otherwise authorized in writing by the City Engineer, the plans shall utilize the minimum scale specified and shall be drawn on 24" x 36" Mylar film. Plans may be prepared at a larger scale if additional detail or plan clarity is desired (Note: the applicant may be required to prepare other improvement plans not listed here pursuant to improvements required by other agencies and utility purveyors):

    a. Rough Grading Plans — 1" = 40' horizontal
        A. (All Conditions of Approval shall be reproduced
        B. on last sheet of set)

    b. Haul Route Plans — 1" = 40' horizontal

c. Clearing Plans — 1" = 50' horizontal
   A. (Include construction fencing plan)
d. Erosion Control & SWPPP, WQMP — 1" = 40' Horizontal
   A. (Note: a, b, c & d shall be reviewed
   B. and approved concurrently)
e. Storm Drain Plans — 1" = 40' Horizontal
f. Street Improvement Plans — 1" = 40' Horizontal
   i. 1" = 4' Vertical
g. Precise Grading Plans — 1" = 40' Horizontal
h. Landscaping Plans — 1" = 20 Horizontal
i. Water Improvement Plans — 1" = 40' Horizontal
   i. 1" = 4' Vertical
j. Sewer Improvement Plans — 1" = 40' Horizontal
   i. 1" = 4' Vertical

23. Other engineered improvement plans prepared for City approval that are not listed herein shall be prepared in formats approved by the City Engineer prior to commencing plan preparation.

24. All off-site plan and profile, street improvement plans, and signing & striping plans shall show all existing improvements for a distance of at least 200-feet beyond the project limits, or at a distance sufficient to show any required design transitions.

25. A small index map shall be included on the title sheet of each set of plans, showing the overall view of the entire work area.
26. Upon completion of construction, the Developer shall furnish the City with reproducible record drawings on Mylar film of all improvement plans that were approved by the City Engineer. Each sheet shall be clearly marked "As-Built" or "As-Constructed" and shall be stamped and signed by the engineer or surveyor certifying the accuracy and completeness of the drawings. The applicant shall have all AutoCAD files submitted to the City, revised to reflect the "As-Built" conditions.

Street Improvements/Right-of-Way

Construct right-of-way improvements (driveway approach, sidewalk, parkway, raised median, access ramp, street lighting, etc.) fronting the site per City of Banning Standard Drawings. Street lights shall be installed offset of the existing street lights.

27. Installation of a traffic signal at the intersection of Sun Lakes Boulevard, future Driveway 3 (as shown in the TIA) and Country Club Drive. Project applicant shall reach out to the Sun Lakes Country Club staff to discuss impacts to their access.

28. Provide paved golf cart access adjacent to the sidewalk through the property and at the proposed traffic signal entrance.
29. Construct street improvements as identified by the project's traffic impact analysis (TIA).
30. The City and Developer are to enter into a Public Improvement Agreement to guarantee the construction of the public improvements as listed in the Conditions of Approval and as shown on the approved plans. The applicant shall work with the City Attorney's Office to execute the Agreement and pay all related legal processing fees.
31. All street improvement designs shall provide pavement and lane transitions per City of Banning and Caltrans standards for transition to existing street sections.
32. Any public improvements damaged during the course of construction shall be replaced to the satisfaction of the City Engineer, or his/her designee.
33. The applicant shall plant and perpetually maintain trees, shrubs, and ground cover placed in the parkway, slopes adjacent to public right-of-ways constructed in connection with the project. This includes providing irrigation and the clearing of debris and weed removal. The applicant shall be required to enter into a Landscape Maintenance Agreement for the perpetual maintenance of landscaping within the public right-of-way fronting the project site.
34. All required public improvements for the project shall be completed, tested, and approved by the Engineering Division prior to issuance of any Certificate of Occupancy.

GRADING & DRAINAGE:

35. Submit a Drainage Study with hydrologic and hydraulic analysis for developed and undeveloped (existing) conditions to the Engineering Division for review and approval. The study and analysis shall be prepared by a civil engineer licensed by the State of California. Drainage design shall be in accordance with Banning Master Drainage Plan adopted by Riverside County Flood Control and Water Conservation District (RCFCD), RCFCD Hydrology Manual, and standard plans and specifications. The 10-year storm flow shall be contained within the street curbs, and the 100-year storm shall be contained within the street right-of-way; when this criteria is exceeded, additional drainage facilities shall be designed and constructed.
36. At a minimum, all development will make provisions to store runoff from rainfall events up to and including the one-hundred three-hour during event. Post-development peak urban runoff discharge rates shall not exceed pre-development peak urban runoff discharge rates.
37. Prior to issuance of any building permit, the applicant shall install trash filters in all catch basins adjacent to the site and/or will be constructed as part of the storm drain improvements for this development. The trash filters shall comply with the requirements of the Trash Amendment as amended and approved in accordance with California Regional Water Quality Control Board Colorado River Basin Region Order No. R7-2013-0011.
38. If the site is located in a Flood Area as identified in Flood Insurance Rate Map dated August 28, 2008 the developer is responsible for providing a certification by a registered professional engineer or architect demonstrating that encroachments shall not result in any increase in flood levels during the occurrence of the base flood discharge.

39. The project grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage areas, outlet points and outlet conditions. Otherwise, a drainage easement shall be obtained for the release of concentrated or diverted storm flows. The project shall accept and convey storm flows from the adjacent property to the north.
40. The applicant shall comply with Chapter 13.24 "Stormwater Management Systems" of the Banning Municipal Code (BMC) and Title 18 "Grading, Erosion and Sediment Control" of the California Building Code related to excavation and grading; and, the State Water Resources Control Board's orders, rules and regulations.
41. For construction activities including clearing, grading or excavation of land that disturbs one (1) acre or more of land, or that disturbs less than one (1) acre of land, but which is a part of a construction project that encompasses more than one (1) acre of land, the applicant shall be required to submit a Storm Water Pollution Protection Plan (SWPPP) and file a Notice of Intent (NOI) with the Regional Water Quality Control Board.
42. The applicant shall ensure that the required SWPPP is available for inspection at the project site at all times through and including acceptance of all improvements by the City.
43. The applicant's SWPPP shall include provisions for all of the following Best Management Practices ("BMPs"):
44. Temporary Soil Stabilization (erosion control).
45. Temporary Sediment Control.
46. Wind Erosion Control.
47. Tracking Control.
48. Non-Storm Water Management.
49. Waste Management and Materials Pollution Control.
50. All erosion and sediment control BMPs proposed by the applicant shall be designed using the CASQA BMP handbook and approved by the City Engineer prior to any onsite or offsite grading, pursuant to this project.
51. The approved SWPPP and BMPs shall remain in effect for the entire duration of project construction until all improvements are completed and accepted by the City.
52. Prior to issuance of any grading or building permit, a Project-Specific Water Quality Management Plan (WQMP) shall be reviewed and approved in accordance with California Regional Water Quality Control Board Colorado River Basin Region Order No. R7-2013-0011.
53. Prior to the issuance of any building permit(s), a precise grading plan shall be submitted to the City Engineer for review and approval. A grading permit shall be obtained prior to commencement of any grading activity.
54. Grading and excavations in the public right-of-way shall be supplemented with a soils and geology report prepared by a professional engineer or geologist licensed by the State of California.
55. Prior to the issuance of a building permit, the applicant shall provide a lot pad certification stamped and signed by a qualified civil engineer or land surveyor. Pad certification shall list the pad elevation as shown on the approved grading plan, the actual pad elevation and the difference between the two, if any. Such pad certification shall also list the relative compaction of the pad soil.

TRAFFIC/CIRCULATION:

56. Prior to the issuance of a grading permit or building permit, the applicant shall submit and obtain approval in writing from the Fire Marshall for the plans for all public or private access drives or streets. The plans shall include plan and sectional views and indicate the grade and width of the access road measured flow-line to flow-line. When a dead-end access exceeds 150 feet or when otherwise required, a clearly marked fire apparatus access turnaround must be provided and approved by the Fire Marshall. Applicable covenant, conditions or restrictions or other approved documents shall contain provisions which prohibit obstructions such as speed bumps/humps, control gates or other modifications within said easement or access road unless prior approval of the Fire Marshall is granted.
57. Driveway grades shall not exceed eight percent unless approved by the City Engineer.
58. Access drives to the public right-of-way shall be restricted to those approved by the City Engineer as shown on the approved plans.
59. Prior to the issuance of any certificate of occupancy, all fire hydrants shall have a blue reflective pavement marker indicating the hydrant location on the street/access driveway as approved by the Fire Marshall and must be maintained in good condition by the property owner until the street is accepted for maintenance.
60. Prior to the issuance of a grading permit or building permit, the applicant shall conduct a Traffic Impact Analysis and submit the report to the Engineering Division for review and approval. All mitigation identified in the Traffic Impact Analysis shall be implemented by the applicant to the satisfaction of the City Engineer.

TRASH & RECYCLING:

61. Construction debris shall be disposed of at a certified recycling site. It is the responsibility of the developer to contact the City's franchised solid waste hauler, Waste Management of the Inland Valley, at 1-800-423-9986 for disposal of construction debris.
62. The developer shall participate in the City's recycling and diversion programs by providing a solid waste enclosure to accommodate necessary solid waste containers.
63. All new development projects including, but not limited to, industrial and business buildings and facilities, as well as, multi-family complexes shall provide a solid waste enclosure to accommodate trash, recycle and organics waste bins and/or containers. Solid waste enclosures for multiple tenant properties, such as a shopping center, must design the enclosure to accommodate all waste containers of the property.
64. Solid waste enclosures shall be located on the site to be serviced.
65. The enclosure shall be designed for the exclusive use of housing solid waste containers including trash, recyclable and organics materials.
66. Enclosures Design Criteria:
    a. The size and dimensions of the trash enclosure shall be based on the required number and size of containers at a minimum accommodating one (1) container each for trash, recyclables and organics materials.

b. Enclosure shall be architecturally compatible with the primary building on site to provide a coordinated design.
c. Exterior materials and colors of the enclosure shall match the building walls.
d. Chain link fencing with or without/plastic slats is prohibited.
e. Enclosure shall have solid metal or wood gates with latches that can be secured in an open or closed position.
f. Enclosures shall be constructed in a permanent manner.
g. Exterior must be fully enclosed with solid roofing to prevent rainfall from entering the enclosure and to prevent wind dispersal, as well as, offsite transport of trash and recycling.
h. Provide the minimum clearance for collector and user accessibility.
i. City Engineer approval shall be obtained in writing prior to the construction of any solid waste enclosure.

WATER:

67. Submit water improvement plans to the Public Works Department along with anticipated peak water demands and hydraulic analysis to justify pipe sizes. Pipes shall be ductile iron, wrapped in V-Bio polyethylene. All water services 2" and smaller shall use plastic-coated copper tubing.

68. Separate irrigation meters will be required for outdoor use.

69. All commercial, industrial, and irrigation water services shall have Reduced Pressure Principle Backflow Preventors. RP Backflow Preventors shall be of a model approved by USC.

70. On-site fire hydrants shall be part of a privately-owned and maintained fire protection system. Private fire hydrants shall be painted safety red, to differentiate from publicly-owned fire hydrants which are typically yellow.

71. Because of the project's location at a pressure zone boundary, an above-ground pressure regulating station may be required, pending review of the water improvement plans by the City Engineer.

RECYCLED WATER:

72. Plans for a purple-pipe non-potable irrigation system shall be designed and submitted to the Public Works Department. Pipes shall be ductile iron, wrapped in purple V-Bio polyethylene. All water services 2" and smaller shall use plastic-coated copper tubing. Plans should include a signage plan typical of a non-potable irrigation system.

73. An interim connection between the potable and non-potable systems shall be installed by way of a single backflow preventor, until such a time as the City's non-potable backbone system is extended west along Sun Lakes Blvd.

WASTEWATER

74. A sewer improvement plan shall be prepared and submitted to the Public Works Department, extending the public sewer from Sun Lakes Blvd. Sewer main material shall be PVC SDR 26. Sewer system design shall avoid placing manholes in low spots, or connecting storm water drainage facilities to the sewer system.

75. When available, estimated sewer discharge quantities and quality shall be submitted to the Public Works Department for review. Depending on the nature of the discharge, grease interceptor(s) may be required.

FEES:

76. Plan check fees for professional report review (geotechnical, drainage, WQMP, etc.), and all improvement plans review, shall be paid at the time of submittal of said documents for review and approval in accordance with the fee schedule in effect at the time of submittal.
77. Public Works Inspection fees shall be paid prior to issuance of any permits in accordance with the fee schedule in effect at time of time of scheduling.
78. A plan storage fee shall be paid for any engineering plans that may be required prior to issuance of certificate of occupancy in accordance with the fee schedule in effect at the time the fee is paid.
79. Water, Sewer, and Non-potable impact fees shall be paid prior to issuance of Building permit. Water meter and water meter installation fees shall be due prior to meter release.

FINAL PARCEL MAP:

80. Prior to approval of the Final Map, the applicant shall construct on-site and off-site improvements required for the development of the property in accordance with the approved plans and satisfy its obligations for same, or shall furnish a fully secured and executed Subdivision Improvement Agreement on terms agreed to by the Parties guaranteeing the construction of such improvements and the satisfaction of its obligations for same, or shall agree to any combination thereof. For off-site improvements, the procedures and requirements of Government Code Section 66462.5 shall apply, including the potential acquisition of those rights by the City or waiver of the City's requirement to obtain those rights.
81. Security for the construction of public improvements in accordance with Government Code Section 66499 shall be as follows:

a. Faithful Performance Bond 100% of estimated cost
b. Labor and Material Bond 100% of estimated cost
c. Monumentation Bond $5,000.00

82. Securities for the public improvements shall be on file with the City Clerk prior to scheduling the final map for approval by City Council. Unit prices for bonding estimates shall be those specified or approved by the City Engineer.
83. Revisions to the tentative map during plan check including, but not limited to, lot line alignments, easements, improvement plan revisions, and similar minor changes that are in substantial compliance with the tentative map, or associated conditions of approval, shall be administratively approved through the plan check process with the mutual consent and approval of the Developer, the Community Development Director and City Engineer. Final maps shall be amended in accordance with the Subdivision Map Act.
84. Prior to approval of any final map the applicant shall identify and include in its improvement plans those routine structural and non-structural Best Management Practices (BMP's).
85. Submit a copy of the title report, closure calculations, and any separate instruments or necessary right-of-way documents to the Engineering Division prior to final map approval.
86. An original Mylar of the final map (after recordation) shall be provided to the City for the record files.
87. Public improvements shall be completed and accepted by City of Banning prior to release of Faithful Performance Bond and Labor and Material Bond for such improvements. Faithful Performance Bond for applicable public improvements shall be reduced to 10% once City accepts improvements into maintenance period. Final 10% to serve as the maintenance bond for the 1-year maintenance period.
88. A record of all street centerline monument ties shall be submitted to the Engineering Division upon completion of improvements or prior to release of Monumentation Bond.

FIRE DEPARTMENT:

89. Fire Hydrants and Fire Flow: Prior to the issuance of building permits, plans for the water system shall be submitted to the fire department for review and approval. The water system shall be capable of delivering the required fire flow. Fire hydrant(s) location and spacing shall comply with the fire code. An approved water supply for fire protection during construction shall be made available prior to the arrival of combustible materials on site. Reference 2016 California Fire Code (CFC) 507.5.1, 3312, Appendices B and C.

90. Fire Department Access: Prior to building permit issuance, provide a site plan showing the fire lanes. Access roads shall be provided to within 150 feet to all portions of the exterior building walls and shall have an unobstructed width of not less than 24 feet. The construction of the access roads shall be all weather and capable of sustaining 40,000 lbs. over two axles for areas of residential development and 60,000 lbs. over two axels for commercial developments. Approved vehicle access, either permanent or temporary, shall be provided during construction Ref. CFC 503.1.1, 3310.1 and 503.2.1

91. Requests for installation of traffic calming designs/devices on fire apparatus access roads shall be submitted and approved by the Office of the Fire Marshal. Ref. CFC 503.4.1

92. Grading Permit Fire Department Review: Submittal to the Office of the Fire Marshal for Precise Grading Permit will be required.

93. Construction Permits Fire Department Review: Submittal of construction plans to the Office of the Fire Marshal for development, construction, installation and operational use permitting will be required. Final fire and life safety conditions will be addressed when the Office of the Fire Marshal reviews these plans. These conditions will be based on occupancy, use, California Building Code (CBC), California Fire Code, and related codes, which are in effect at the time of building plan submittal.

94. Phased Construction Access: If construction is phased, each phase shall provide approved access for fire protection prior to any construction. Ref. CFC 503.1

95. Fire Sprinkler System: All new commercial structures 3,600 square feet or larger shall be protected with a fire sprinkler system. Ref CFC 903.2 as amended by the City of Banning.

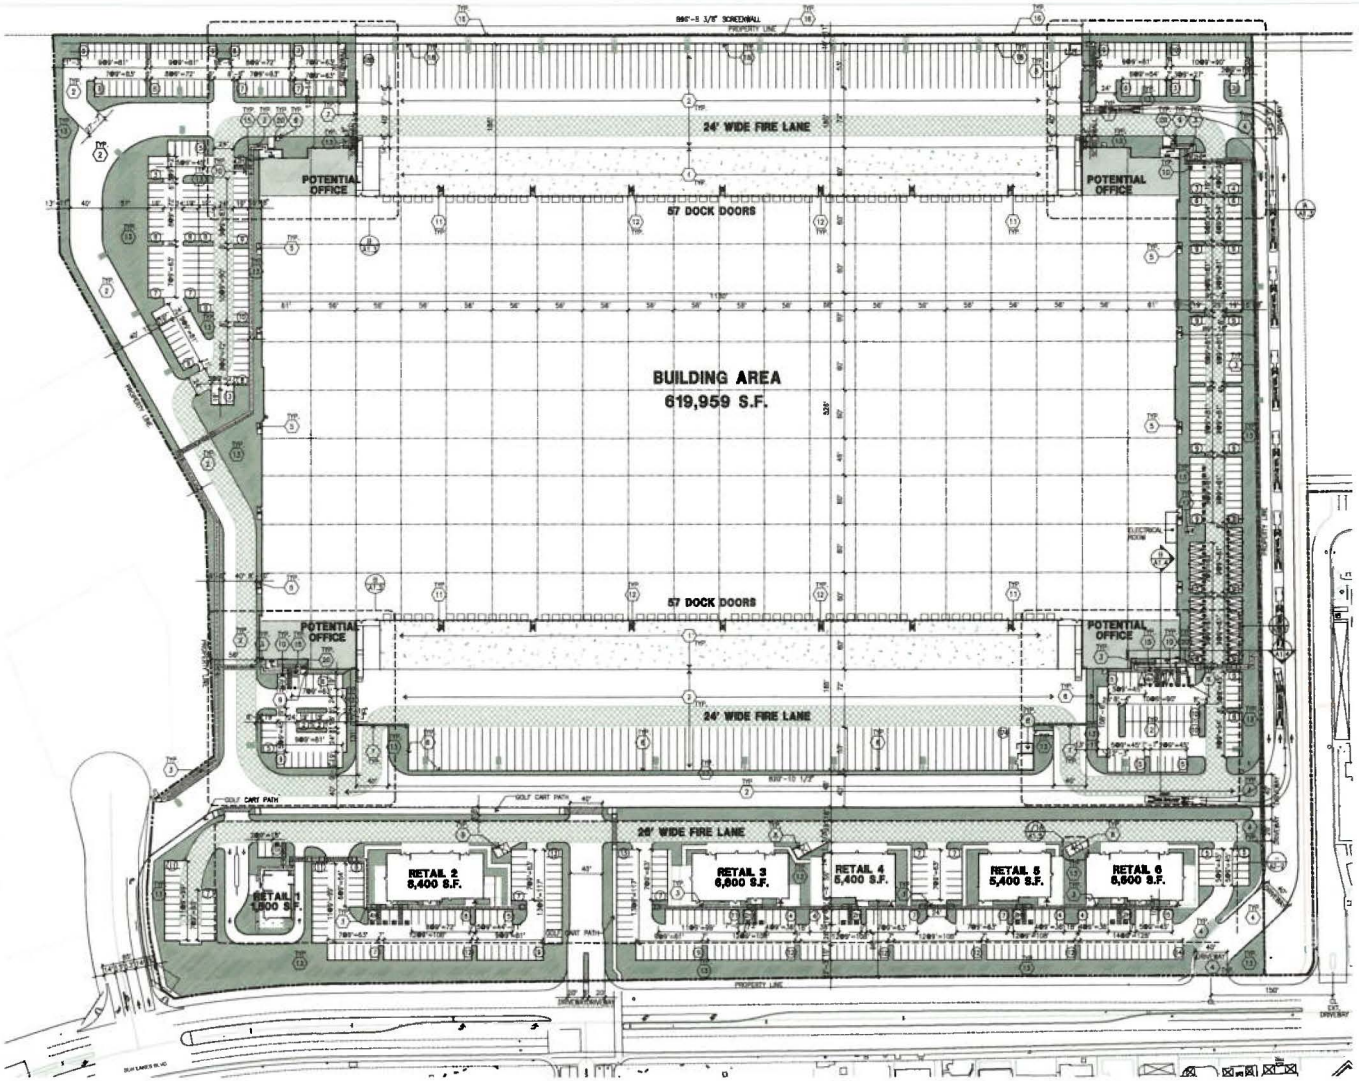
96. Fire Alarm and Detection System: A water flow monitoring system and/or fire alarm system may be required and determined at time of building plan review. Ref. CFC 903.4, CFC 907.2 and NFPA 72

97. Knox Box and Gate Access: Buildings shall be provided with a Knox Box. The Knox Box shall be installed in an accessible location approved by the Office of the Fire Marshal. All electronically operated gates shall be provided with Knox key switches and automatic sensors for access. Ref. CFC 506.1

98. Addressing: All commercial buildings shall display street numbers in a prominent location on the address side and additional locations as required. Ref. CFC 505.1 and County of Riverside Office of the Fire Marshal Standard #07-01

99. Buildings in excess of 300,000 square feet in area shall be required to provide a fire command center for fire department operations and shall comply with 2019 CFC sections 508.1.1 through 508.1.8 as amended and adopted by the City of Banning and Riverside County Fire. (2019 CFC 508.1)

100. Emergency Responder Radio Coverage Systems: Projects that do not meet the exceptions set forth by the Riverside County Office of the Fire Marshal shall provide plans for an emergency responder radio coverage system. Ref. CFC 510.1 and Riverside County Office of the Fire Marshal Technical Policy #TP19-002



101. Strategic Planning Review: This planning case will also be reviewed by Riverside County Fire Department Strategic Planning for the cumulative impact on the Fire Department's ability to provide an acceptable level of service. Additional requirements may be conditioned by Strategic Planning to mitigate these impacts. Questions for Strategic Planning can be addressed to RRUStrategicPlanningBureau@fire.ca.gov.

102. Use the Above Statement only if it meets the Strategic Planning Case Review Criteria below:
    a. Environmental Impact Reports
    b. General Plan Amendments
    c. Specific Plans
    d. Developments that are in very high fire hazard severity zones in the LRA and developments in the SRA
    e. Residential with 500 or more dwelling units
    f. Commercial/Industrial developments of 1,000,000 sq ft or more

Added Condition by Planning Commission

103. The applicant is to work with the City of Beaumont to endeavor to have signal preemption devices installed on the exiting stop lights on the South Sun Lakes Blvd. between Second Street, Sun Lakes Blvd., and the Interchange.

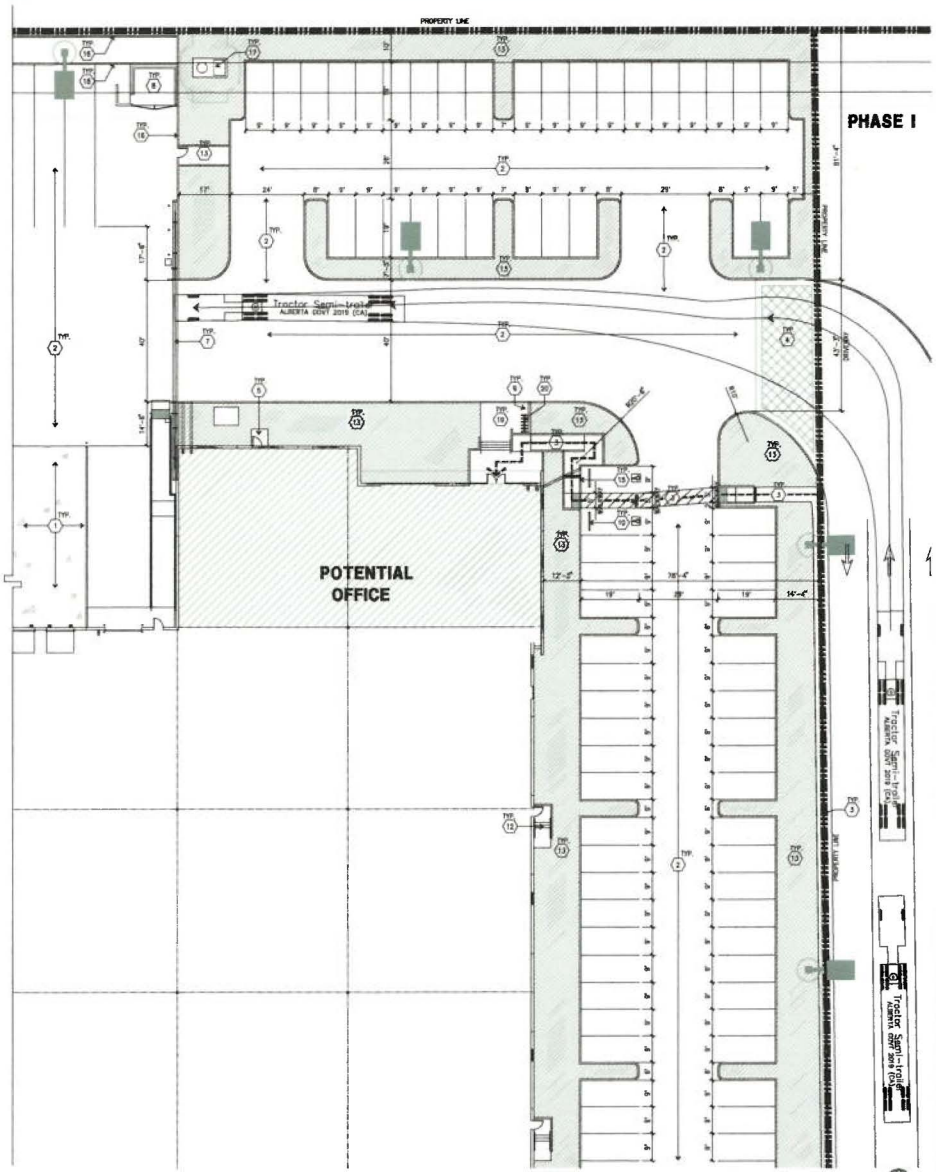
Title: ENLARGED SITE PLAN

Project Number: 20384
Drawn by: SLM
Date: 11/12/21
Revision:



Sheet

DAB-A1.2

2404

ENLARGED SITE PLAN (B)
scale: 1/16" = 1'-0"

ENLARGED SITE PLAN (A)
scale: 1/16" = 1'-0"

SITE PLAN KEYNOTES

1. HEAVY BROOM FINISH CONC. PAVEMENT.
2. PAVING PER CIVIL
3. CONCRETE WALKWAY
4. DRIVEWAY APRON @ ENTRANCE
5. 5'-0"(@ -6"x6" MIN. THICK CONCRETE EXTERIOR LANDING PAD TYP. AT ALL EXTERIOR MAN DOORS TO LANDSCAPED AREAS. FINISH TO BE MEDIUM BROOM FINISH. SLOPE TO BE 1/4" : 12" MAX.
6. 8'H WROUGHT IRON FENCE
7. PROVIDE METAL, MANUAL OPERATED GATES W/ KNOX-PAD LOCK PER FIRE DEPARTMENT STANDARDS PER DRIVEWAY.
8. TRASH ENCLOSURE, REFER TO DAB-A1.5
9. SMOKING AREA.
10. PRE-CAST CONC. WHEEL STOP
11. CONC. FILLED GUARD POST "6 DIA. U.N.O. 42" H.
12. EXTERIOR CONC. STAIR.
13. LANDSCAPE. SEE "L" DRGS. LANDSCAPE AREAS INDICATED BY SHADED PATTERN.
14. HANDICAPPED ENTRY SIGN
15. HANDICAPPED PARKING STALL SIGN
16. 14' CONCRETE TILT WALL TO SCREEN THE TRUCK YARD AND GENERATOR
17. APPROXIMATE LOCATION OF THE TRANSFORMER AND GENERATOR
18. 12" CONCRETE CURB
19. CONCRETE SIDEWALK. SEE CIVIL PLAN.
20. BIKE RACK.

SITE PLAN GENERAL NOTES

1. NOT USED.
2. IF SOILS ARE EXPANSIVE IN NATURE, USE STEEL REINFORCING FOR ALL SITE CONCRETE.
3. ALL DIMENSIONS ARE TO THE FACE OF CONCRETE WALL, FACE OF CONCRETE CURB OR CMU LINE U.N.O.
4. SEE "C" PLANS FOR ALL CONCRETE CURBS, GUTTERS AND SWALES. DETAILS ON SHEET A0.1 ARE MINIMUM STANDARDS.
5. THE ENTIRE PROJECT SHALL BE PERMANENTLY MAINTAINED WITH AN AUTOMATIC IRRIGATION SYSTEM, PRIOR TO INSTALLATION & AT LEAST 60 DAYS BEFORE BLDG. COMPLETION.
6. SEE "C" DRAWINGS FOR POINT OF CONNECTIONS TO OFF-SITE UTILITIES. CONTRACTOR SHALL VERIFY ACTUAL UTILITY CONTRACTOR SHALL VERIFY ACTUAL UTILITY LOCATIONS.
7. PROVIDE POSITIVE DRAINAGE AWAY FROM BLDG. SEE "C" DRAWINGS.
8. CONTRACTOR TO REFER TO "C" DRAWINGS FOR ALL HORIZONTAL CONTROL DIMENSIONS. SITE PLANS ARE FOR GUIDANCE AND STAKING LAYOUT POINTS.
9. SEE "C" DRAWINGS FOR FINISH GRADE ELEVATIONS.
10. CONCRETE SIDEWALKS TO BE A MINIMUM OF 4" THICK W/ TOOLED JOINTS AT 8' O.C. EXPANSION/CONSTRUCTION JOINTS SHALL BE A MAXIMUM 12' EA. WAY W/ 1/20 MAX. SLOPE. EXPANSION JOINTS TO HAVE COMPRESSIVE EXPANSION FILLER MATERIAL OF 1/4". SEE "L" DRAWINGS FOR FINISH.
11. NOT USED
12. PAINT CURBS AND PROVIDE SIGNS TO INFORM OF FIRE LANES AS REQUIRED BY FIRE DEPARTMENT.
13. CONSTRUCTION DOCUMENTS PERTAINING TO THE LANDSCAPE AND IRRIGATION OF THE ENTIRE PROJECT SITE SHALL BE SUBMITTED TO THE BUILDING DEPARTMENT AND APPROVED BY PUBLIC FACILITIES DEVELOPMENT PRIOR TO ISSUANCE OF BUILDING PERMITS.
14. PRIOR TO FINAL CITY INSPECTION, THE LANDSCAPE ARCHITECT SHALL SUBMIT A CERTIFICATE OF COMPLETION TO PUBLIC FACILITIES DEVELOPMENT.
15. ALL NEW UTILITY CONNECTIONS WITHIN THE ROAD RIGHT OF WAY ARE PER SEPARATE REVIEW AND PERMIT
16. ALL LANDSCAPE AND IRRIGATION DESIGNS SHALL MEET CURRENT CITY STANDARDS AS LISTED IN GUIDELINES OR AS OBTAINED FROM PUBLIC FACILITIES DEVELOPMENT.
17. NOT USED.
18. LANDSCAPED AREAS SHALL BE DELINEATED WITH A MINIMUM SIX INCHES (6") HIGH CURB
19. APPROVED CONCEPTUAL LANDSCAPE PLAN PRIOR TO GRADING PERMIT

KETNOTES - FLOOR PLAN

1. CONCRETE TILT-UP PANEL.
2. STRUCTURAL STEEL COLUMN.
3. TYPICAL STOREFRONT SYSTEM WITH GLAZING. SEE OFFICE BLOW-UP AND ELEVATIONS FOR SIZE, COLOR AND LOCATIONS.
4. CONCRETE RAMP W/ 42"HIGH CONC TILT-UP GUARD WALL OR BUILDING WALL ON BOTH SIDE OF RAMP. SEE "S" DWG FOR DETAIL.
5. 9'-0" X 10' TRUCK DOOR, SECTIONAL OH., STANDARD GRADE. DESIGNED TO RESIST WIND 90 MPH., EXPOSURE "C".
6. EXTERIOR CONCRETE STAIR
7. 3'-6"X5'-6"X4" THICK CONCRETE EXTERIOR LANDING PAD TYPICAL AT ALL EXTERIOR MAN DOORS TO LANDSCAPED AREA. FINISH TO BE MEDIUM BROOM FINISH. SLOPE TO BE 1/4" - 12" MAX. PROVIDE WALK TO HARD SURFACE PER CITY REQUIREMENTS.
8. LOUVERED OPENING FOR VENTILATION.
9. DOCK DOOR BUMPER
10. 12' X 14' DRIVE THRU, SECTIONAL OH., STANDARD GRADE. DESIGNED TO RESIST WIND 90 MPH., EXPOSURE "C".
11. 3'X7' HOLLOW METAL EXTERIOR MAN DOOR. DESIGNED TO RESIST WIN 90 MPH., EXPOSURE "C".
12. NOT USED
13. NOT USED
14. CONC. FILLED GUARD POST. 8" DIA. U.N.O.. 42"H.
15. EXTERIOR DOWNSPOUT WITH OVERFLOW SCUPPER.
16. 2' GUARD
17. APPROXIMATE LOCATION OF ELECTRICAL ROOM

GENERAL NOTES - FLOOR PLAN

A. THIS BUILDING IS DESIGNED FOR HIGH PILE STORAGE WITH FIRE ACCESS MAN DOORS AT 100' MAXIMUM O.C. A SEPARATE PERMIT WILL BE REQUIRED FOR ANY RACKING/CONVEYER SYSTEMS.
B. FIRE HOSE LOCATIONS SHALL BE APPROVED PER FIRE DEPARTMENT.
C. THE BUILDING FLOOR SLAB IS SLOPED, SEE "C" DRAWINGS FOR FINISH SURFACE ELEVATIONS.
D. WAREHOUSE INTERIOR CONCRETE WALLS ARE PAINTED WHITE. COLUMNS ARE TO RECEIVE PRIMER ONLY. ALL CMU, GD. WALLS IN WAREHOUSE TO RECEIVE 1 COAT OF WHITE TO COVER.
E. SLOPE POUR STRIP 1/2" TO EXTERIOR AT ALL MANDOOR EXITS. SEE "S" DRAWINGS FOR POUR STRIP LOCATION.
F. ALL DIMENSIONS ARE TO THE FACE OF CONCRETE PANEL WALL, GRIDLINE, OR FACE OF STUD U.N.O.
G. SEE CIVIL DRAWINGS FOR POINT OF CONNECTIONS TO OFF-SITE UTILITIES. CONTRACTOR TO VERIFY ACTUAL UTILITY LOCATIONS. PLUMBING/ELECTRICAL COORDINATION.
H. FOR DOOR TYPES AND SIZES, SEE DETAIL SHEET A0.4. NOTE, ALL DOORS PER DOOR SCHEDULE ARE FINISH OPENINGS.
I. CONTRACTOR TO PROTECT AND KEEP THE FLOOR SLAB CLEAN. ALL EQUIPMENT TO BE DIAPERED INCLUDING CARS AND TRUCKS.
J. ALL EXIT MAN DOORS IN WAREHOUSE TO HAVE ILLUMINATED EXIT SIGN. HARDWARE.
K. HIGHLY FLAMMABLE AND COMBUSTIBLE MATERIAL SHALL NOT BE USED OR STORED IN THIS BUILDING.
L. EACH EXTERIOR EXIT DOOR SHALL BE IDENTIFIED BY A TACTILE EXIT SIGN WITH THE WORDS "EXIT". THE MOUNTING HEIGHT FOR SUCH SIGNAGE SHALL BE 60" FROM FINISH FLOOR LEVEL TO THE CENTER OF THE SIGN.
M. NON-ACCESSIBLE DOOR. PROVIDE WARNING SIGN LOCATED IN THE INTERIOR SIDE PER CBC 11338.1.1.1
N. ALL ROOF MOUNTED MATERIALS SHALL BE FULLY SCREENED FROM PUBLIC VIEW, SEE A/A6.1 OFFICE SECTION.

FLOOR SLAB AND POUR STRIPS REQ.

THESE NOTES ARE VERY MIN. REQUIREMENT. SEE "S" DWGS FOR ADDITIONAL REQUIREMENTS

1. FLOOR COMPACTION - 95%
2. TRENCH COMPACTION - 90%
3. BUILDING FLOOR SLAB:
   A. 6" THICK MIN. UNREINFORCED CONCRETE OVER COMPACTED SOILS
   B. 3/4" - 16"LONG @ 12" O.C. DOWELS AT ALL CONSTRUCTION JOINTS
      3/4" - 18"LONG @ 24" O.C. DOWELS IN DOWEL BASKET AT ALL CONTROL JOINTS.
   C. 4,000 P.S.I. REQUIREMENT.
   D. SLUMP TO BE 4" +/- 1"
   E. JOINT SPACING PER A.C.I. 302-R-96
   F. SAW-CUT DEPTH 1/4 T, SOFT SAW-CUTTING WITHIN 2 HRS OF FINISHING
4. CONTRACTOR TO BUILD FOR CLASS V FLOOR PER A.C.I. 302-R-96
5. CONCRETE SLAB TO HAVE STEEL FLOAT HARD TROWEL BURNISHED FINISH.
6. CONTRACTOR TO CURE SLAB TO BE WET CURING USING BURLENE FOR 7 DAYS MIN.
7. ALL EQUIPMENT & MOVING VEHICLES SHALL BE DIAPERED.
8. NO DRAINES, CONCRETE TRUCKS, OR ANYTHING HEAVIER WILL BE PLACED ON THE SLAB.
9. SLAB TO BE FF35 FL24 MEASURED WITHIN 24 HOURS.
10. NO FLY ASH IN THE CONCRETE
11. WHERE [ ] INDICATED, PROVIDE VAPOR BARRIER (15MIL STEGO OR EQUAL) UNDER THE CONCRETE SLAB. PROVIDE SAND PER SOILS ENGINEER OR MANUFACTURER'S RECOMMENDATION.
    CONCRETE SLAB IN FUTURE OFFICE AREAS, WHERE SAND OVER WOVEN ARE REQUIRED, SHALL BE NATURALLY HYDRATED WITHOUT USE OF BURLENE, CURING COMPOUND, OR RELEASE AGENTS.
    CONTROL/CONSTRUCTION JOINTS SHALL NOT BE FILLED WITH MM-80 JOINT FILLER IN FUTURE OFFICE AREAS.
12. SEAL CONCRETE SLAB W/ "LIPIDOLIN" SEALER

scale: 1" = 20'-0"

KEYNOTES - ELEVATIONS

1. CONCRETE TILT-UP PANEL/PARAPET. PROVIDE CONTROL JOINTS AS SHOWN ON DRAWINGS. WATERPROOF ALL WALLS WHERE GRADE IS HIGHER AND EXPOSED TO THE WEATHER SIDE. WATERPROOFING TO BE PROTECTED WITH PROTECTION BOARD AND A MIN. OF 6" OF GRAVEL. PROVIDE TRENCH DRAIN AT BOTTOM AND DRYLOCK TO CURB OR TIME TO STORM DRAIN. NOT REQUIRED AT DOCK HIGH CONDITION OR AT RAMP WALLS.
2. PANEL JOINT. SEE "S" DRAWINGS. SEE 4/A0.5
3. PANEL REVEAL. ALL REVEALS TO HAVE A MIN. OF 3/8" CHAMFER. REVEAL COLOR TO MATCH ADJACENT BUILDING FIELD COLOR. U.N.O.
4. OVERHEAD DOOR @ SERVICE YARD. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER-STRIPPING PROTECTION ALL AROUND. PAINT TO MATCH FIELD COLOR.
5. OVERHEAD DOOR @ DOCK HIGH. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER-STRIPPING PROTECTION ALL AROUND. PAINT TO MATCH BUILDING COLOR
6. CONCRETE STAIR, LANDING AND GUARDRAIL W/ METAL PIPE HANDRAIL. PROVIDE NON SKID NOSING TO MEET ADA REQUIREMENTS. PROVIDE CONTRASTING COLORED 3" WIDE DIAGONAL STRIPE DESIGN, TO CONCRETE AT TOP LANDING AND BOTTOM TREAD PER ADA REQUIREMENTS.
7. METAL LOUVER, SEE DETAIL 8/A0.6. PAINT TO MATCH BUILDING COLOR
8. METAL DOORS, SEE DOOR SCHEDULE.
9. PROVIDE COMPLETE DRAINAGE ALL AROUND DOOR. PROVIDE 7'0R MIN OVERTEX ABOVE DOOR. PAINT TO MATCH FIELD COLOR.
10. ENTRY WITH CANOPY, WITH 2 OVERFLOW SCUPPERS. SEE DETAIL 11/A1.1/A1.2
10. DOCK BUMPER. SEE DETAIL 4/A0.6.
11. ALUMINUM STOREFRONT FRAMING WITH TEMPERED GLAZING AT ALL DOORS, AND WINDOWS. SEE DETAIL 12/A0.6
13. METAL GATE WITH KNOX BOX PER FIRE DEPARTMENT SEE 8/A0.2
14. EXTERIOR METAL STAIR. SEE DETAILS 1, 2, 3, 3A, 5/A0.5.
15. EXTERIOR ROOF DRAIN WITH 2 OVERFLOW SCUPPERS. CONTRACTOR TO VERIFY WITH "P" RISER. SEE DETAIL 17/A0.5.
16. NOT USED.
17. ILLUMINATED ADDRESS PER FIRE DEPT. REQUIREMENTS. 24"H x 3" THICK HIGH DENSITY FOAM "HELVARD BOLD" LETTER W/ 1/16" PVC FACES EPOXY TO WALL. COLOR TO BE SELECTED BY ARCHITECT.
18. CONCRETE RAMP AND GUARDRAIL W/ METAL HANDRAIL.
19. PARAPET RETURN. SEE ROOF PLAN AND "S" DWGS.
20. ROOF LINE BEYOND.
21. EXTERIOR LIGHTING FIXTURE. CENTER BETWEEN PANEL OR ON JOINT U.N.O. SEE "E" DWGS.
22. CONC. FILLED STEEL BOLLARDS, SEE PLR. PLAN.
23. NOT USED.
24. PIPE STEEL CANOPY. SEE "S" DWG. DETAIL 17, 18/A0.3A.
25. DOWNSPOUT PROTECTION. SEE DETAIL 8/A0.3A.

SAFETY NOTES - GLAZING

NOTE: EACH LIGHT OF SAFETY GLAZING MATERIAL INSTALLED IN HAZARDOUS LOCATIONS SHALL BE DESIGNED BY PERMANENT LABEL THAT SPECIFIES THE LABELLER, AND STATES THAT SAFETY GLAZING MATERIAL HAS BEEN UTILIZED IN SUCH INSTALLATIONS.

A. GLAZING IN DOORS AND EGRESS DOORS EXCEPT JALOUSIES.

B. GLAZING IN FIXED AND SLIDING PANELS OF SLIDING DOOR ASSEMBLIES AND PANELS IN SWING DOORS OTHER THAN BARRIERS DOORS

C. GLAZING IN STORM DOORS.

D. GLAZING IN ALL UNFRAMED SWINGING DOORS.

E. GLAZING IN DOORS AND ENCLOSURES FOR HOT TUBS, WHIRLPOOLS, SAUNAS, STEAM ROOMS, BATHROOMS, AND SHOWERS.

F. GLAZING IN FIXED OR OPERABLE PANELS ADJACENT TO A DOOR WHERE THE NEAREST EXPOSED EDGE OF THE GLAZING IS WITHIN 24 INCHES ARC OF EITHER VERTICAL EDGE OF THE DOOR IN A CLOSED POSITION AND WHERE THE BOTTOM EDGE OF THE GLAZING IS LESS THAN 60 INCHES ABOVE THE WALKING SURFACE.

G. GLAZING IN AN INDIVIDUAL FIXED OR OPERABLE PANEL, OTHER THAN DESCRIBED IN ITEMS E AND F, THAT MEET ALL OF THE FOLLOWING ARC PRESENT:
1. EXPOSED ARC OF AN INDIVIDUAL PANE GREATER THAN 9 SQUARE FEET.
2. EXPOSED BOTTOM EDGE LESS THAN 18 INCHES ABOVE THE FLOOR.
3. EXPOSED TOP EDGE GREATER THAN 36 INCHES ABOVE THE FLOOR.
4. ONE OR MORE WALKING SURFACES WITHIN 36 INCHES HORIZONTALLY OF THE PLANE OF THE GLAZING.

H. GLAZING IN RAILINGS REGARDLESS OF HEIGHT ABOVE A WALKING SURFACE INCLUDING ALL SELECTORAL BALUSTER PANELS AND NONSTRUCTURAL WINFILL PANELS.

I. GLAZING IN WALLS AND FENCES USED AS THE BARRIER FOR INDOOR AND OUTDOOR SWIMMING POOLS AND SPAS WHEN ALL OF THE FOLLOWING CONDITIONS ARE PRESENT:
1. THE BOTTOM EDGE OF THE GLAZING IS LESS THAN 60 INCHES ABOVE THE POOL SIDE OF THE GLAZING.
2. THE GLAZING IS WITHIN 5 FEET OF A WHARING POOL OR SPA WATER'S EDGE.

J. GLAZING IN WALLS ENCLOSING STAIRWAY LANDINGS OR STAIRS 5 FEET OF THE BOTTOM AND TOP OF STAIRWAYS WHERE THE BOTTOM EDGE OF THE GLASS IS LESS THAN 60 INCHES ABOVE A WALKING SURFACE.

GENERAL NOTES - ELEVATIONS

A. ALL PAINT COLOR CHANGES TO OCCUR AT INSIDE CORNERS UNLESS NOTED OTHERWISE.
B. ALL PAINT FINISHES ARE TO BE FLAT UNLESS NOTED OTHERWISE.
C. T.O.P., FL= TOP OF PARAPET ELEVATION.
D. F.F. = FINISH FLOOR ELEVATION.
E. STOREFRONT CONSTRUCTION, GLASS, METAL ATTACHMENTS AND LINTELS. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS PRIOR TO INSTALLATION.
F. CONTRACTOR SHALL FULLY PAINT ENTIRE CONCRETE PANEL W/ SELECTED COLORS. ARCHITECT AND OWNER SHALL APPROVE PRIOR TO PAINTING REMAINDER OF BUILDING.
G. BACK SIDE OF PARAPETS TO HAVE SMOOTH FINISH AND BE PAINTED WITH ELASTOMERIC PAINT.
H. FOR SPANDREL GLAZING, ALLOW SPACE BEHIND SPANDREL TO BREATH.
I. USE ADHESIVE BACK BOOZI STRIPS FOR ALL BRICK FORMS.
K. THE FIRST COAT OF PAINT TO BE ROLLED-ON AND THE SECOND COAT TO BE SPRAYED-ON

COLOR SCHED. - ELEVATIONS

	1	CONCRETE TILT-UP PANEL	PAINT BRAND: SHERWIN WILLIAMS COLOR: SW 7674 PEPPERCORN

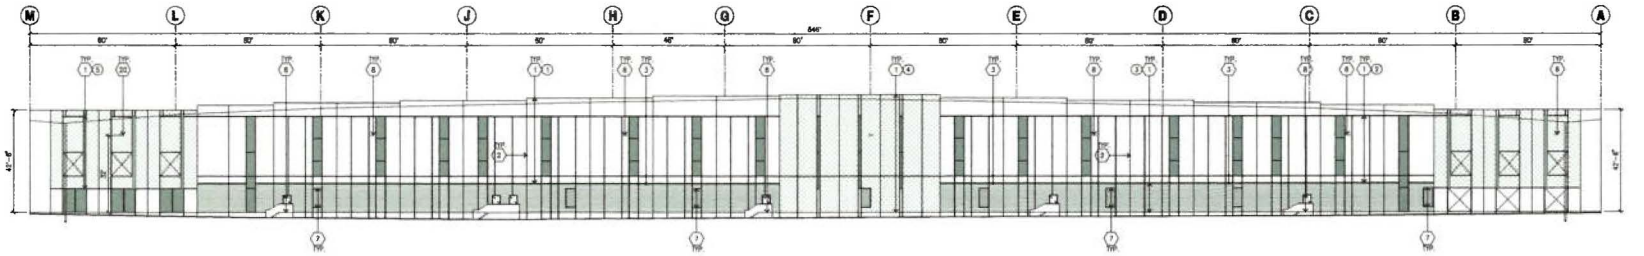
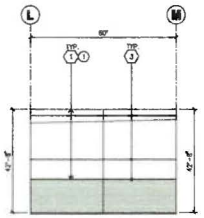
Title: ELEVATION

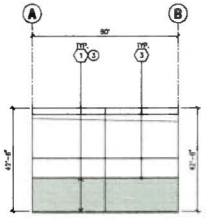


Project Number: 2038
Drawn by: SLM
Date: 11/13/21
Revision:

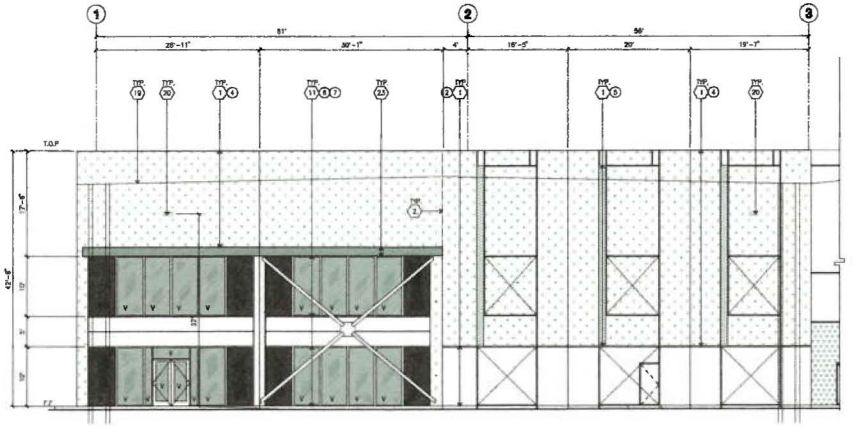
Sheet:
DAB-A3.1



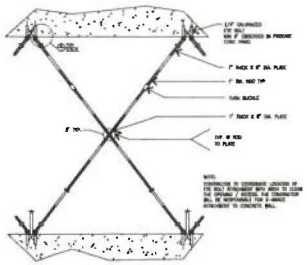
2412



SOUTH ELEVATION (CON'T.) A
scale: 1" = 20'-0"



EAST ELEVATION B
scale: 1" = 20'-0"



SOUTHEAST ELEVATION E
scale: 1" = 20'-0"

NORTHEAST ELEVATION D
scale: 1" = 20'-0"

ENLARGED NORTH ELEVATION C
scale: 1/16" = 1'-0"

X-BRACE ELEVATION AT STOREFRONT F
scale: NTS

KEYNOTES - ELEVATIONS

1. CONCRETE TILT-UP PANEL/PARAPET. FINISH GRADE VARIES. SEE TYP. DRAWINGS. WATERPROOF ALL WALLS WHERE GRADE IS HIGHER AND EXPOSED TO THE WEATHER ONE SIDE. WATERPROOFING TO BE PROTECTED WITH PROTECTION BOARD AND A MIN. OF 6" OF GRAVEL. PROVIDE TRENCH DRAIN AT BOTTOM AND DAYLIGHT TO CURB OR PAVE TO STORM DRAIN. NOT REQUIRED AT DOCK HIGH CONDITION OR AT WRAP WALLS.
2. PANEL JOINT. SEE "S" DRAWINGS. REF A/A0.3
3. PAINT. PAINT ALL REVEALS TO HAVE A MIN. OF 3/8" CHAMFER. REVEAL COLOR TO MATCH ADJACENT BUILDING FIELD COLOR. U.N.O.
4. OVERHEAD DOOR @ BRAKE THRU. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER-STRIPPING PROTECTION ALL AROUND. PAINT TO MATCH FIELD COLOR.
5. OVERHEAD DOOR @ DOCK HIGH. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER-STRIPPING PROTECTION ALL AROUND. PAINT TO MATCH FIELD COLOR.
6. CONCRETE STAIR, LANDING AND GUARDRAIL W/ METAL PIPE HANDRAIL. FINISHED RISER SHALL NOT EXCEED 7" AND TREAD SHALL NOT BE LESS THAN 11" WITH NOSING NOT EXCEEDING 1-1/2". PROVIDE CONTRASTING COLOR AT TOP AND BOTTOM STEP. ENSURE NO CONCRETE AT TOP LANDING AND BOTTOM STEP. REF DETAIL FOR ADA REQUIREMENTS.
7. METAL LOUVER. SEE DETAIL 6/A0.4. PAINT TO MATCH BUILDING COLOR
8. HOLLOW METAL DOORS. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER STRIPPING ALL AROUND DOOR. PROVIDE FOR RAIN DIVERTER ABOVE DOOR. PAINT TO MATCH FIELD COLOR.
9. EXTERIOR METAL DOWNSPOUT WITH 3 OVERFLOW SCUPPERS. SEE DETAIL 13/A0.4, 17/A0.4
10. DOCK BUMPER. SEE DETAIL 4/A0.4.
11. ALUMINUM STOREFRONT FRAMING WITH TEMPERED GLAZING AT ALL DOORS, AND WINDOWS. SEE DETAIL 17/A0.4
12. METAL GATE WITH KNOX BOX PER FIRE DEPARTMENT SEE 8/A0.2
13. EXTERIOR METAL SIGN. SEE DETAILS 1, 2, 3, 3A, 5/A0.5.
14. INTERIOR ROOF DRAIN WITH 2 OVERFLOW SCUPPERS. CONTRACTOR TO VERIFY WITH "P" ENGR. SEE DETAIL 11/A0.5.
15. NOT USED.
16. ALUMINUM BUILDING ADDRESS PER FIRE DEPT. REQUIREMENTS. 24"H x 12"W SHOP HIGH DENSITY FOAM "HELVANO BOLD" LETTER W/ 1/16" PVC FACES EPOXY TO WALL. COLOR TO BE SELECTED BY ARCHITECT
17. CONCRETE RAMP AND GUARDRAIL W/ METAL HANDRAIL.
18. PARAPET BEYOND. SEE ROOF PLAN AND "S" DWGS.
19. ROOF LINE BEYOND.
20. EXTERIOR LIGHTING FIXTURE. CENTER BETWEEN PANEL OR ON JOINT U.N.O. SEE "E" DWGS.
21. CONC. FILLED STEEL BOLLARDS. SEE PLAN PLAN.
22. NOT USED.
23. TUBE STEEL CANOPY. SEE "S" DWG. DETAILS 17, 18/A0.3A
24. DOWNSPOUT PROTECTION. SEE DETAIL 5/A0.3A.

SAFETY NOTES - GLAZING

NOTE: EACH LIGHT OF SAFETY GLAZING MATERIAL INSTALLED IN HAZARDOUS LOCATIONS SHALL BE IDENTIFIED BY PERMANENT LABEL THAT SPECIFIES THE LABELLER, AND STATES THAT SAFETY GLAZING MATERIAL HAS BEEN UTILIZED IN SUCH INSTALLATIONS.

A. GLAZING IN MIRRORS AND DOORS (DOOR EXCEPT JALOUSIES.
B. GLAZING IN FIXED AND SLIDING PANELS OF SLIDING DOOR ASSEMBLIES AND PANELS IN SWING DOORS OTHER THAN WINDROSE DOORS
C. GLAZING IN STORM DOORS.
D. GLAZING IN ALL ENCLOSED SHOWING DOORS.
E. GLAZING IN DOORS AND ENCLOSURES FOR HOT TUBS, WHIRLPOOLS, SAUNAS, STEAM ROOMS, BATHTUBS, AND SHOWERS.
F. GLAZING IN FIXED OR OPERABLE PANELS ADJACENT TO A DOOR WHERE THE NEAREST EXPOSED EDGE OF THE GLAZING IS WITHIN 24 INCHES ARC OF EITHER VERTICAL EDGE OF THE DOOR IN A CLOSED POSITION AND WHERE THE BOTTOM EDGE OF THE GLAZING IS LESS THAN 60 INCHES ABOVE THE WALKING SURFACE.
G. GLAZING IN AN INDIVIDUAL FIXED OR OPERABLE PANEL, OTHER THAN DESCRIBED IN ITEMS E AND F, THAT MEET ALL OF THE FOLLOWING ARE PRESENT:
   1. EXPOSED ARC OF AN INDIVIDUAL PANE GREATER THAN 9 SQUARE FEET.
   2. EXPOSED BOTTOM EDGE LESS THAN 18 INCHES ABOVE THE FLOOR.
   3. EXPOSED TOP EDGE GREATER THAN 36 INCHES ABOVE THE FLOOR.
   4. ONE OR MORE WALKING SURFACES WITHIN 36 INCHES HORIZONTALLY OF THE PLANE OF THE GLAZING.
H. GLAZING IN RAILINGS REGARDLESS OF HEIGHT ABOVE A WALKING SURFACE, INCLUDING ANY STRUCTURAL BALUSTER PANELS AND NONSTRUCTURAL IN-FILL PANELS.
I. GLAZING IN WALLS AND FENCES USED AS THE BARRIER FOR INDOOR AND OUTDOOR SWIMMING POOLS AND SPAS WITH ALL OF THE FOLLOWING CONDITIONS ARE PRESENT:
   1. THE BOTTOM EDGE OF THE GLAZING IS LESS THAN 60 INCHES ABOVE THE POOL SIDE OF THE GLAZING.
   2. THE GLAZING IS WITHIN 5 FEET OF A SWIMMING POOL OR SPA WATER'S EDGE.
J. GLAZING IN WALLS ENCLOSING STAIRWAY LANDINGS OR WITHIN 5 FEET OF THE BOTTOM AND TOP OF STAIRWAYS WHERE THE BOTTOM EDGE OF THE GLASS IS LESS THAN 60 INCHES ABOVE A WALKING SURFACE.

GENERAL NOTES - ELEVATIONS

A. ALL PAINT COLOR CHANGES TO OCCUR AT INSIDE CORNERS UNLESS NOTED OTHERWISE.
B. ALL PAINT FINISHES ARE TO BE FLAT UNLESS NOTED OTHERWISE.
C. T.O.P. EL.= TOP OF PARAPET ELEVATION.
D. F.F. = FINISH FLOOR ELEVATION.
E. STOREFRONT CONSTRUCTION: GLASS, METAL ATTACHMENTS AND LINTELS. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS PRIOR TO INSTALLATION.
F. CONTRACTOR SHALL FULLY PAINT ONE CONCRETE PANEL W/ SELECTED COLORS, SCHEDULE AND SHALL APPROVE PRIOR TO PAINTING BALANCE OF BUILDING.
G. BACK SIDE OF PARAPETS TO HAVE SMOOTH FINISH AND BE PAINTED WITH ELASTOMERIC PAINT.
H. FOR SPANDREL GLAZING, ALLOW SPACE BEHIND SPANDREL TO BREATH.
J. USE ADHERING BACK BOOD STRIPS FOR ALL REVEAL FORMS.
K. THE FIRST COAT OF PAINT TO BE ROLLED-ON AND THE SECOND COAT TO BE SPRAYED-ON

RESOLUTION 2022-14

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BANNING, CALIFORNIA, (1) APPROVING TENTATIVE PARCEL MAP NO. 38164, ALLOWING THE SUBDIVISION OF APPROXIMATELY 47 GROSS ACRES OF VACANT LAND, INTO THREE PARCELS; (2) APPROVING DESIGN REVIEW 21-7008 AND AFFIRMING THE PLANNING COMMISSION'S APPROVAL OF THAT APPLICATION AND DENYING AN APPEAL OF THAT DECISION AND PERMITTING THE CONSTRUCTION OF A PROPOSED INDUSTRIAL WAREHOUSE BUILDING OF 619,959 SQUARE FEET, INCLUDING 10,000 SQUARE FEET OF OFFICE SPACE, AND SIX RETAIL/COMMERCIAL BUILDINGS TOTALING 34,000 SQUARE FEET, ON REAL PROPERTY LOCATED WITHIN THE BOUNDARIES OF THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN AMENDMENT NO. 5 (APN: 419-140-057); AND (3) ADOPTING AN ADDENDUM UNDER THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) AND MAKING FINDINGS IN SUPPORT THEREOF, INCLUDING FINDING OF CONSISTENCY WITH THE CERTIFIED ENVIRONMENTAL IMPACT REPORT PREPARED FOR AMENDMENT NO. 5 TO THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN (SCH # 2020029074)

WHEREAS, on December 8, 2020, the City Council certified the Final Environmental Impact Report (EIR) (SCH #2020029074) prepared for, and approved, Amendment No. 5 to the Sun Lakes Village North Specific Plan (SLVNSP) (Ordinance 1571 for Zone Change 20-3501). Amendment No. 5 revised the Specific Plan Land Use Plan from Retail Commercial (Auto Dealer) to Business Park & Warehouse (BW), Office & Professional (OP), and Retail & Service (RS), and revised the permitted land uses, development standards (including maximum building height, setbacks, open space, landscaping, parking, and signage), and design guidelines for the development and implementation provisions of the SLVNSP; and

WHEREAS, the EIR for Amendment No. 5 to the SLVNSP is now final, beyond challenge, and is conclusively presumed to comply with CEQA; and

WHEREAS, in furtherance of the interests of Sun Lakes Highland, LLC (Applicant), an application was submitted for Tentative Parcel Map No. 38164 (TPM 21-4001) to subdivide approximately 47.11 acres of vacant real property into three commercial and industrial parcels, and for Design Review 21-7008, to construct a 619,959 square-foot industrial building with 10,000 square feet of office space, and six retail/commercial buildings totaling 34,000 square feet and associated utility, parking, roadway, and landscaping improvements (all together, the Project), on APN 419-140-057; and

WHEREAS, on October 19, 2021, and December 1, 2021, the Planning Commission conducted duly noticed public hearings on the Project, at which time interested persons had an opportunity to testify in support of or in opposition to the Project. At the conclusion of the public hearing on December 1, 2021, the Planning Commission adopted Resolution No. 2021-16, approving Tentative Parcel Map No. 38164 and approving Design Review 21-7008, including conditions of for approval of the Project. Pursuant to Banning Municipal Code Chapter 16.14, the Planning Commission's

decision has been interpreted by City Staff and the City Council as a recommendation to the City Council for approval of that Map; and

WHEREAS, pursuant to Banning Municipal Code Section 17.68.100, three applications seeking to appeal the Planning Commission's decision on the Project were received during the appeal period following the Planning Commission's action; and

WHEREAS, an appeal application was received from Golden State Environmental Justice Alliance and was subsequently rejected as being incomplete because it did not state the grounds or reasons for its appeal, did not request a specific action, and incorrectly described the project; and

WHEREAS, an appeal application was received from Supporters Alliance For Environmental Responsibility (SAFER), who subsequently withdrew its appeal on January 18, 2022, and announced its support for the Project; and

WHEREAS, on December 7, 2021, the law firm of Shute, Mihaly & Weinberger submitted an appeal on behalf of Appellant, Pass Area Action Group, and a three-page letter on behalf of Appellant, which was supplemented by a 428-page letter submitted via email on January 24, 2022; and

WHEREAS, the public hearing on Tentative Parcel Map 38164 and the appeal hearing on Design Review 21-7008 was scheduled for January 31, 2022, and in compliance with applicable law, the City provided public notice of the public hearing by advertising in the Record Gazette Newspaper on January 21, 2022, and by mailing notices to all property owners within 1,000 feet of the subject site; and

WHEREAS, the City subsequently received requests from both Pass Area Action Group and the Applicant to continue the appeal hearing to allow for additional time to review the materials related to the Project; and

WHEREAS, in recognition of the requests from both Appellant and Applicant for a continuance of the public hearing, at the regularly scheduled City Council meeting held on January 25, 2022, the City Council voted to cancel the appeal hearing previously noticed January 31, 2022, and to reschedule the public hearing to February 17, 2022; and

WHEREAS, the City provided public notice of the rescheduled public hearing on Tentative Parcel Map 38164 and the appeal hearing on Design Revie 21-7008 by advertising in the Record Gazette Newspaper on February 4, 2022, and by again mailing (on February 3, 2022) notices to property owners within a 1,000-foot radius of the subject site; and

WHEREAS, on February 17, 2022, the City Council of the City of Banning conducted a duly noticed public hearing on the Appeal, at which time all interested persons, including Appellant and Applicant, were given an opportunity to speak and to present both oral and written evidence in support of and in opposition to the Appeal; and

WHEREAS, all legal prerequisites prior to the adoption of this Resolution have occurred; and

WHEREAS, the City Council has considered all information related to this matter, as presented at the public meetings of the City Council identified herein, including supporting reports by City Staff, written materials timely received by the City, and information provided during public meetings.

NOW THEREFORE, the City Council of the City of Banning does hereby resolve, determine, find, and order as follows:

SECTION 1: **Recitals**. This Council hereby specifically finds that all of the facts set forth in the Recitals above are true and correct, and are incorporated herein.

SECTION 2: **Environmental Findings**.

A. The Project has been reviewed in connection with the requirements of the California Environmental Quality Act (CEQA) (Public Resources Code § 21000, *et seq.*) and the State CEQA Guidelines (14 C.C.R. § 15000, *et seq.*). Based upon all of the applications, plans, submittals, and evidence presented to the Planning Commission on October 19, 2021 and December 1, 2021, the additional submittals from the Appellant and the Applicant, and the public hearing held on February 17, 2022 (including written and oral staff reports and supporting documentation, together with public testimony), and in the exercise of its independent judgment based upon the whole of the record and the evidence presented to it, this Council hereby specifically finds and concludes, as provided in the succeeding subsections of this Section 2, as follows with respect to environmental review related to the Project.

B. The EIR prepared for Amendment No. 5 to the SLVNSP analyzed the potential development of 877,298 square feet of industrial and warehouse uses, 52,065 square feet of medical office uses, and 37,189 square feet of retail uses. The EIR analyzed the potential environmental impacts from this type of development in the areas of: aesthetics, air quality, biological resources, cultural resources, energy, geology and soils, greenhouse gas emissions, hydrology and water quality, land use and planning, noise, transportation, tribal cultural resources, and utilities and service systems. The EIR concluded that Amendment No. 5 to the SLVNSP had the potential to result in a net increase of building square footage and that certain air quality, greenhouse gas emissions, and traffic impacts would be significant and unavoidable even after the imposition of mitigation and regulatory compliance. The City Council determined that the benefits of Amendment No. 5 outweighed the Amendment's environmental impacts, and adopted a Statement of Overriding Considerations on December 8, 2020. The EIR was certified on December 8, 2020, and was never challenged. It is now final, beyond challenge, and conclusive in all respects.

C. Amendment No. 5 to the SLVNSP was adopted on December 8, 2020, by way of City Council Resolution No. 2020-141. Its text was added into the City's Zoning Code portion of the Municipal Code by way of Ordinance No. 1571, which was introduced on December 8, 2020, adopted on January 12, 2021, and became effective on February 11, 2021. It was never challenged and is now final, beyond challenge, and in effect for all purposes.

D. The Project proposes a smaller development than that analyzed in the EIR. The Project proposes 619,959 square feet of industrial use (split between 75% [or 464,969 square feet] of high-cube fulfillment center warehouse use and 25 % [or 154,990 square feet] of high-cube cold storage warehouse use), and 34,000 square feet of retail uses, along with associated utility, parking, roadway, and landscaping improvements. The Project does not include development of any of the office uses analyzed in the EIR.

E. The project is found to be consistent with the Multi-Species Habitat Conservation Program (MSHCP). The project is located outside of any MSHCP criteria area and mitigation is provided through payment of the MSHCP Mitigation Fee.

F. The mitigation measures imposed as part of the prior EIR remain valid and applicable to the Project and are imposed as Condition of Approval No. 2. The same benefits described in the Statement of Overriding Considerations for Amendment No. 5 to the SLVNSP remain applicable to the Project.

G. The prior EIR, which was a "Program EIR," has been reviewed to determine if the Project is within the scope of what was analyzed in the EIR. Based on this review and analysis, an addendum/consistency checklist, entitled "Banning Point Addendum / Consistency Checklist to the Sun Lakes Village North Specific Plan Amendment No. 5 Environmental Impact Report" (updated version dated February 10, 2022) ("Addendum") has been prepared pursuant to Public Resources Code Section 21166 and CEQA Guidelines Sections 15162, 15164, and 15168(c). CEQA Guidelines Section 15164(a) provides that the lead agency "shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred." CEQA Guidelines Section 15164(c) further provides that an "addendum need not be circulated for public review but can be included in or attached to the final EIR" and CEQA Guidelines Section 15164(e) provides that a "brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included" in the addendum, the agency's findings, or elsewhere in the administrative record.

H. The Addendum evaluated the Project's potential environmental effects in light of those effects previously disclosed in the prior EIR to determine

whether any of the conditions described in CEQA Guidelines Section 15162 calling for subsequent CEQA review have occurred.

I. The City Council has considered whether additional environmental review is required for the Project beyond what was analyzed and disclosed in the now-final EIR and in the Addendum. All environmental impacts of Amendment No. 5 to the SLVNSP (including those impacts related to the development of industrial and warehouse uses and retail uses, such as those proposed by the Project) were analyzed, disclosed, and mitigated as set forth in the EIR (SCH# 2020029074) that was certified on December 8, 2020; this conclusion is supported by the detailed Addendum and its supporting technical reports and data. Therefore, any potential environmental impacts resulting from the types of land development proposed by the Project already have been analyzed and disclosed in the certified EIR that is now final in all respects and is beyond challenge. Furthermore, a subsequent EIR is not required as discussed below.

J. Public Resources Code Section 21166 and the corresponding CEQA Guidelines Section 15162 provide that no subsequent EIR shall be prepared for a project unless, on the basis of substantial evidence in the light of the whole record, "major revisions" of the EIR are needed to reflect (i) substantial changes to the project involving new significant environmental effects or a substantial increase in the severity of previously identified significant effects; (ii) substantial changes to the circumstances under which the project is undertaken involving new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or (iii) new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete, showing that the project will have one or more significant effects not discussed in the previous EIR, or significant effects previously examined will be substantially more severe than shown in the previous EIR, or mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative, or mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative. At this point in the process, "in-depth review has already occurred, the time for challenging the sufficiency of the original EIR has long since expired, and the question is whether circumstances have changed enough to justify repeating a substantial portion of the process." (*Bowman v. City of Petaluma* (2008) 185 Cal.App.3d 1065, 1073-1074.) As a result, any issues with the earlier EIR that were raised or could have been raised are barred from further consideration. (*Comm. for Green Foothills v. Santa Clara County Bd. of Supervisors* (2010) 48 Cal.4th 32, 50.)

K. No information has been presented to the City demonstrating that any of the criteria set forth in Public Resources Code Section 21166, or CEQA Guidelines Sections 15162 or 15163, are present.

(1) No information has been presented to the City to demonstrate that any substantial changes have occurred with respect to the Project involving new significant environmental effects or a substantial increase in the severity of previously identified significant effects. Rather, the Project proposes the same type of land uses analyzed in the EIR and approved as part of Amendment No. 5 to the SLVNSP, but it is smaller in scope. The Project therefore serves to implement the vision for the area described in Amendment No. 5 to the SLVNSP, and is consistent the land use envisioned in the SLVNSP and its EIR. Furthermore, the Addendum comprehensively analyzed the Project in comparison to the EIR in each environmental impact area and concluded that there are no new or substantially greater impacts than those previously disclosed, analyzed, and mitigated (to the extent feasible) in the EIR. The City Council finds that the Addendum, including its supporting technical reports, to constitute substantial evidence in support of this conclusion.

(2) No information has been presented to the City to demonstrate that any substantial changes have occurred with respect to the circumstances under which the Project is undertaken involving new significant environmental effects or a substantial increase in the severity of previously identified significant effects. The Project remains consistent with the project described in the prior EIR for Amendment No. 5 to the SLVNSP and is smaller in scope than the development anticipated in that document and approved in Amendment No. 5 to the SLVNSP. There have been no changes to the SLVNSP area that would alter the ability of the Project to remain consistent with the SLVNSP and the environmental impacts analyzed in the prior EIR.

(3) No information has been presented to the City to demonstrate that there is any new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete showing that the Project will have any significant or more severe effects than those discussed in the prior EIR, or that additional mitigation measures or alternatives would substantially reduce any significant effects on the environment disclosed in the prior EIR. No information, let alone substantial evidence, has been presented to suggest that the current Project has environmental impacts beyond those previously analyzed, disclosed, and mitigated as set forth in the EIR. No information

regarding any purported greater environmental impacts, or the need for additional mitigation or alternatives, has been presented.

L. The Appellant's contention in its January 24, 2022, letter that preparation of a program-level EIR for Amendment No. 5 to the SLVNSP was not proper is a time-barred attack on that EIR. The EIR was never challenged and is lawful, valid, and conclusive for all purposes. Furthermore, the SLVNSP is a Specific Plan and therefore is a legislative enactment and environmental review at the program, or plan, level was appropriate.

M. The Appellant's contention in its January 24, 2022, letter that the Project constitutes a "new" project not within the scope of that studied in the EIR is unfounded. As shown in the Addendum, and its supporting technical reports in the areas of air quality, greenhouse gas emissions, health risk assessment, trip generation memorandum, and vehicle miles traveled (VMT) analysis, Project impacts are not greater or more impactful than previously disclosed, analyzed, and approved in connection with Amendment No. 5 to the SLVNSP, including considering the addition of 154,990 square feet of high-cube cold storage warehouse use within the overall 619,959 square feet of industrial use. The Addendum and its supporting documentation expressly considered the use of high-cube cold storage industrial uses and found impacts to be within the scope of those analyzed in the EIR. The City Council expressly finds that the analysis contained in the Addendum and its supporting technical reports is credible, supported by facts, and constitutes substantial evidence.

N. The Appellant's contention in its January 24, 2022, letter that the EIR's analysis in the areas of transportation, air quality, greenhouse gas emissions, and noise is insufficient to apply to the Project is unfounded. The City Council finds that several of Appellant's contentions, including those set forth in the technical memoranda attached to their letter, are unfounded; rely on flawed assumptions (including but not limited to those related to horsepower, emission factors, and trip generation rates) leading to incorrect conclusions; are speculative (such as unsupported assumptions about the use of emergency diesel generators); or amount at most to a disagreement among experts, including over issues such as trip generation and trip lengths that were settled in the EIR and are now beyond challenge. A disagreement among experts is not a sufficient reason to set aside an EIR and a lead agency such as the City may choose to accept the determinations and conclusions in the EIR if they are supported by substantial evidence. (CEQA Guidelines Section 15151.) The City Council further finds that other of Appellant's contentions, such as that no vehicle miles traveled (VMT) analysis or noise impacts analysis have occurred, are factually incorrect and therefore lack foundation. The City Council also finds that other contentions, including those regarding the efficacy of mitigation measures imposed as part of Amendment No. 5 to the SLVNSP and its EIR, are time-barred and an impermissible collateral attack on the prior EIR. The

City Council expressly finds that substantial evidence supports the conclusions in the certified EIR, and that no new information has been presented to invalidate these conclusions.

O. The Appellant's contention in its January 24, 2022, letter that a new cumulative impacts analysis was required is incorrect. The prior EIR included a cumulative impacts analysis; no such analysis is also required as a separate, standalone component of a determination that a subsequent EIR is not required.

P. The Appellant's contention in its January 24, 2022, letter that the City was required to separately notify South Coast Air Quality Management District (SCAQMD) and the California Air Resources Board of the Project is incorrect. There is no obligation to notify other public agencies of an addendum or a determination that a project does not require additional environmental review. Furthermore, other public agencies were properly notified of the preparation of the prior EIR and then subsequently had the opportunity to comment on it. SCAQMD provided a comment on the notice of preparation of the EIR and then did not submit any comments on the EIR.

Q. The City Council finds, in the exercise of its independent judgment and based on substantial evidence in the whole of the record, that no further environmental review is required, including pursuant to Public Resources Code Section 21166, or CEQA Guidelines Sections 15162 or 15163, because (i) the Project will not have new or substantially more severe impacts than what was disclosed in the EIR; (ii) all applicable mitigation measures in the EIR remain applicable to the Project and are imposed on the Project as a condition of approval; and (iii) the Project will not require any new mitigation measures, all as documented in the Addendum. The Addendum and its supporting technical reports and memoranda constitute substantial evidence in support of the City Council's conclusion and findings. The City Council hereby adopts the Addendum.

R. The Community Development Director shall cause to be a filed a Notice of Determination for the Project in accordance with CEQA.

S. The custodian of records for the documents that constitute the record of proceedings upon which the City Council's decision is based is the City Clerk of the City of Banning. Those documents are available for public review in the Planning Division located at 99 E. Ramsey Street, Banning, California, 92220.

SECTION 3: **Tentative Parcel Map Findings**. Subsection (B) of Section 16.14.050 of the Banning Municipal Code provides that any action taken by the City Council with respect to the Tentative Parcel Map shall be supported by the findings required by Sections 66427.1, 66473.5, 66474, 66474.1 and 66474.6 of the California Government Code and Section 21100 of the California Public Resources Code.

A. Applicable Findings. The City Council finds that Sections 66427.1 does not apply because this Project does not involve the conversion of residential real property into a condominium project, a community apartment project, or a stock cooperative project. The City Council also finds that Section 66474.1 does not apply because the City Council's action in this matter relates to a Tentative Parcel Map and not a Final Parcel Map. The City Council finds that the other sections noted in the introductory paragraph of this Section do apply to this Tentative Parcel Map. The following subsections are intended to provide the required findings in accordance with Government Code Sections 66473.5, 66474, 66474.1, 66474.6 and Public Resources Code Section 21100.

B. Tentative Parcel Map No. 38164 is consistent with the goals, policies and programs of the City's General Plan and with the Sun Lakes Village North Specific Plan Amendment No. 5.

(1) The General Plan land use designations for the site are General Commercial and Business Park with a Specific Plan Overlay. The Specific Plan designations for the site are Business & Warehouse District and Retail and Service District. The Community Development Element of the General Plan provides that Specific Plan land use designations become the General Plan overlay land use designations in the Specific Plan area.

(2) The Tentative Parcel Map will divide the existing 47.11-acre property into three parcels consistent with the land uses proposed to be developed on the site and consistent with the General Plan and Specific Plan land use designations, as more fully explained in the succeeding subsections below. The subsections provided in this Subsection (B) provide the findings required by Government Code Section 66473.5 and 66474 (a).

(3) The proposed Project consists of the development of an industrial warehouse building of 619,959 square feet of gross floor area, which includes 10,000 square feet of office and a separate parcel containing six (6) retail buildings totaling 34,000 square feet to the south varying in size from 1,600 square feet to 8,400 square feet.

(4) The Community Development Element of the General Plan contains goals, policies and programs for the development of industrial, commercial and residential uses. With respect to the industrial uses, the General Plan specifies the general goal that "A balanced mix of non-polluting industrial land uses which provide local jobs for the City's residents." The project will provide a non-polluting industrial use and provide jobs for City residents. Specifically, the industrial portion of the project is not

an industrial factory and the uses within the buildings and the warehouse operation are subject to several mitigation measures that require the use of electrical hookups at loading docks (AQ-3), truck idling limitations (AQ-4), the use of electric or natural gas service equipment to reduce fuel consumption and emissions (AQ-5) and a minimum of three (3) electric-vehicle charging stations. In addition, other mitigation measures are imposed on the Project during the grading and construction of the site, including the use of low VOC paint (AQ-1) and limitations on grading activities to ensure emissions do not exceed SCAQMD's significance thresholds. With these mitigation measures the project will not exceed local significance thresholds for emissions and ensure that the Project satisfies the non-polluting goal for industrial uses as provided in the General Plan.

(5) The Community Development Element of the General Plan contains several policies applicable to industrial development projects including: Policy 6 that provides that the land use map shall include sufficient industrial lands for manufacturing, warehousing and distribution, while carefully considering compatibility with adjacent lands; Policy 8 that provides that industrial lands shall be located on major roadways with good access to Interstate 10, to assure that potential traffic impacts associated with tractor-trailers are minimized; and Policy 10 that provides that the Zoning Ordinance shall include principles, design standards and guidelines which encourage development of high quality industrial projects." The Project is consistent with Policy 6 because the size of the portion of the site designated for business and warehouse uses is relatively large (30.22 acres) and is appropriately located immediately adjacent to the I-10 freeway and the Southern Pacific Railroad line to the north of the Project site. In addition, the warehouse use is located on the portion of the site that will be screened and buffered from residential uses to the south and east by the retail and service buildings to be located in the Retail and Services District that exists between the residential uses in Sun Lakes to the south of Sun Lakes Boulevard and the industrial building and by the Office and Professional District uses in the future that will exist between the warehouse uses and the residential and assisted living uses to the east of the Project site. The Project is consistent with Policy 8 because it will be immediately adjacent to Interstate 10 on the north, and the lot configuration and access points into and out of the site are designed to provide for the minimum amount of travel distance on Sun Lakes Boulevard to Highland Springs Avenue and then onto Interstate 10 and eventually from Sun Lakes Boulevard to the Sunset Avenue and onto Interstate 10 when the Sun Lakes Boulevard extension is completed. Finally, the

Project, as more fully explained in connection the Project's consistency with the Specific Plan includes a variety of design elements, setbacks, landscaping features that will provide a high quality industrial project.

(6) The Economic Development Element of the General Plan provides the goal for a balanced, broadly based economy that provides a full range of economic and employment opportunities, while maintaining high standards of development and environmental protection. The Project will increase the availability of job opportunities for not only warehouse employees but also retail and service based business opportunities. The Applicant has asserted that the Project would create as many as 722 local jobs in the City of Banning. The proposed development and buildings will improve the City's property tax base, boost sales tax, provide jobs and revenue for the City's economy. The Applicant has asserted that the Project would generate approximately $4,119,780 to the City in Development Impact Fees and as much as $325,000 in annual tax revenues to the City. The Project is also consistent with the following applicable Economic Development Element Policies: Policy 2 for the City to take a proactive role in the recruitment of new businesses that will generate and broaden employment opportunities, increase discretionary incomes and contribute to City General Fund Revenues; Policy 3 to encourage infill development that will increase the efficiencies of new utilities, infrastructure and public services; and Policy 9 which require development to be responsible for its fair share of on-site and off-site improvements. The Project will provide physical space for a large business or businesses to conduct warehouse uses in the City and spaces for up to six new retail and service uses to serve the immediate community and the City. These new businesses will provide a wide range of different job opportunities from warehouse jobs to office, retail and services jobs and thereby create the diverse job opportunities in the City that will provide opportunities for residents to find new jobs to increase their discretionary incomes. Overall, through property tax, economic activity and job creation, the Project is anticipated to contribute to the City's General Fund revenues in and amount of approximately $325,000 per year. The Project is an infill project using a long-standing vacant site for land uses on lots configured and planned to be appropriately sited between other existing uses and already served by existing streets, utilities and infrastructure. Finally, the project includes design features to ensure all on-site amenities consistent with the City's development standards are paid for by the applicant and that fair share contributions in the form of payment of the City's

applicable development impact fees are collected from the development.

(7) The Sun Lakes Village North Specific Plan Amendment No. 5 specifies Guiding Objectives for the development in the Specific Plan Area. Those Objectives are as follows: (1) Allow for a range of land uses that reflects current market conditions given the trend away from brick-and-mortar retail; (2) Respond to an increase in e-commerce, especially driven by the coronavirus pandemic; (3) Promote high quality development to safeguard the existing asset of Sun Lakes Country Club and other development in the vicinity; (4) Locate and design truck courts and semi-truck circulation to minimize impacts on surrounding land uses and development; and (5) Expand access to restaurants, shopping, and services for the nearby Sun Lakes Country Club Community. The proposed Project accomplishes all these Objectives by reflecting current real estate market trends toward more e-commerce uses which necessarily includes warehouse uses as a key component of the supply chain required for the storage, shipping and availability of e-commerce goods. The lot configuration locates truck courts and semi-truck circulation towards the interior and northerly portion of the site next to the Southern Pacific Railroad line and Interstate 10 and away from the residential uses in the Sun Lakes Country Club. The design elements and project conditions will ensure that the landscape features and design elements projects a high quality development to safeguard the quality of development within the Sun Lakes Country Club community. Finally, the Project will provide up to six sites and buildings for restaurants, shopping and services for the Sun Lakes Country Club Community within the Retail and Service District of the Project site that is located immediately north of Sun Lakes Boulevard and convenient to that Community.

(8) Tentative Parcel Map No. 38164 is consistent with the following goals, policies, and/or programs of the Noise Element of the City's General Plan:

(a) Policy 1 states that the City shall protect noise sensitive land uses, including residential neighborhoods, from potentially significant sources of community noise. The certified Program Environmental Impact Report ("PEIR") prepared for the Sun Lakes Village North Specific Plan Amendment No. 5 ("SLVNSP") states that the maximum base ambient noise level in Municipal Code Section 8.44.050 applicable to the Project is 75 dB(A) while existing ambient noise levels in the vicinity of the site range from 60.4 to 66.2 dB(A). The PEIR

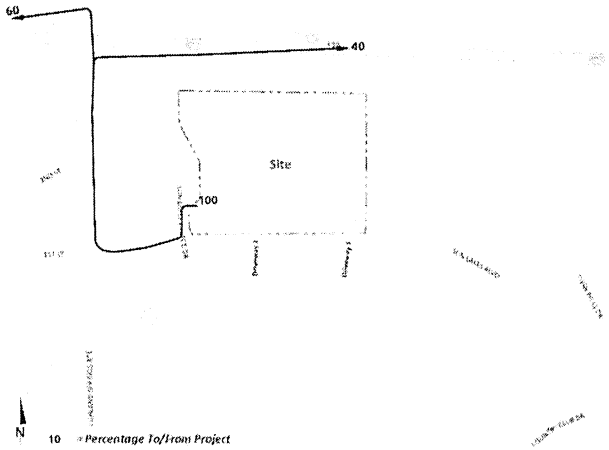
determined that construction noise from the Project site could be significant for the closest noise sensitive uses, which are the single-family homes located east of the Office & Professional District of the SLVNSP planning area and the senior apartments/assisted living/memory care residential facility located east of the planning area. The PEIR recommended Mitigation Measure NOI-1 to reduce this impact to less than significant levels. To minimize noise impacts of the proposed Tentative Parcel Map No. 38164, the applicant has been conditioned to implement Mitigation Measure NOI-1. PEIR Table 4.10-5 demonstrates that the proposed Tentative Parcel Map No. 38164 would not have significant operational traffic-related noise impacts on surrounding land uses.

(b) Program 1.B. states that the City shall maintain and enforce its Noise Control Ordinances that establish community-wide noise standards and identify measures designed to resolve noise complaints. The applicant has been conditioned to comply with the City's noise ordinances.

(9) The design and improvement of the subdivision proposed under Tentative Parcel Map No. 38164 is consistent with the Noise Element of the City's General Plan.

(a) Program 1.A. states that the City shall require building setbacks, the installation of wall and window insulation, soundwalls, earthen berms, and/or other mitigation measures in areas exceeding the City's noise limit standards for private development projects as they occur. As indicated in Table 13 (Operational Noise Level Compliance) of the Urban Crossroads Noise Study prepared for PEIR Addendum/Consistency Analysis, the proposed Tentative Parcel Map No. 38164 will not exceed the City's noise limit standards for private development projects.

Table 13: Operational Noise Level Compliance



Receiver Location[1]	Noise Levels (dBA L_{eq})[2]		Noise Standard (dBA L_{eq})		Exceeds Standard?[4]	
	Daytime	Nighttime	Daytime	Nighttime[3]	Daytime	Nighttime
R1	47.5	46.5	60	68.3	No	No
R2	38.4	37.4	60	60.4	No	No
R3	44.1	42.9	60	57.0	No	No
R4	45.8	44.5	60	64.5	No	No
R5	45.9	44.7	60	63.1	No	No

Source: Table 7-4, Urban Crossroads, February 2022 Daytime" = 7:00 a.m. - 10:00 p.m.; "Nighttime" = 10:00 p.m. - 7:00 a.m.

(b) Policy 4 states that the City shall assure low levels of traffic within neighborhoods by assigning truck routes to major roadways only. The proposed Project will construct two (2)

new access driveways on Sun Lakes Boulevard, which will be constructed to meet City standards and will have direct access to/from Interstate 10 via Highland Springs Avenue, a major roadway. The future extension of Sun Lakes Boulevard to the east may also provide for future access to/from Interstate 10 via Sunset Avenue, another major roadway. Exhibit 4 from the Urban Crossroads Traffic Assessment for the project, below, indicates truck trip distribution based on current truck route conditions:

EXHIBIT 4: PROJECT (INDUSTRIAL TRUCK) TRIP DISTRIBUTION

C. The design and improvement of the subdivision proposed under Tentative Parcel Map No. 38164 is consistent with the City's General Plan and the Sun Lakes Village North Specific Plan Amendment No. 5.

(1) The Tentative Parcel Map covers an area of approximately 47.11 acres and proposes to divide that area into three parcels to be consistent with the proposed land uses to be allowed on each of those parcels. Based on the findings contained in the subsections below, the design and improvement of the subdivision is consistent with the General Plan and the Sun Lakes Village North Specific Plan Amendment No. 5. The findings in the following subsections are intended to provide the analysis for approval of the Tentative Parcel Map under Government Code Section 66474 (b).

(2) The largest proposed parcel is 30.22 acres and is in the northwestern portion of the Map and is adjacent to backside of the Sun Lakes Village Shopping Center, the Southern Pacific Railroad and the Interstate-10 Freeway. This parcel is proposed for a warehouse building of approximately 619,959 square feet along with associated truck parking, loading, landscaping and

other uses. The design of the subdivision to locate this large parcel closest to the Southern Pacific Railroad line and to Interstate 10 and then have this parcel improved with a warehouse and associated uses is consistent with the General Plan Policies 7 of the City's Industrial Land Use Goal which provides that there shall be sufficient lands for manufacturing, warehousing and distribution, while carefully considering compatibility with adjacent lands. Creating a parcel of 30.22 acres sufficient to accommodate the proposed warehouse building while at the same time placing that parcel closest to commercial uses to the west, a railroad line and Interstate 10 to the north, a future office building to the east and a new grouping of commercial retail and service buildings to the south, allows for the warehousing proposed uses farthest away from residential uses to the south and complies with this Policy of carefully considering compatibility with adjacent land uses. In addition, designing this subdivision to accommodate a warehouse building is consistent with Policy 8 which provides that industrial lands shall be located on major roadways with good access to Interstate 10, to assure that potential traffic impacts associated with tractor-trailers are minimized. The design provides for access into and out of the site from Sun Lakes Boulevard to Highland Springs Avenue and onto Interstate 10.

(3) The second largest parcel is approximately 10.06 acres and is located on the eastern portion of the side and adjacent to an assisted living facility and residential units designed on smaller lots that are part of the Sun Lakes Country Club active adult/golf course community. On this lot, offices and professional uses are intended to be located but no development is currently proposed. This parcel is sufficient in size in terms of depth and width to accommodate a variety of building configurations that could be proposed on the site and meet all required development standards as set forth in Table 2 of the Sun Lakes Village North Specific Plan Amendment No. 5.

(4) The third and smallest parcel is approximately 6.83 acres and is located on the southern edge of the Map and adjacent to Sun Lakes Boulevard. On this lot, retail stores, restaurants and service uses are proposed as contemplated by the Sun Lakes Village North Specific Plan Retail and Service District designation for the site. This lot design will provide for up to six separate retail and service uses to not only serve the needs of the residential neighborhood to the south, but also provide a buffer and screen between those residential uses and the warehouse building north of that parcel.

(5) The Tentative Parcel Map is designed to meet City standards which provide satisfactory pedestrian and vehicular circulation, including emergency vehicle access. Specifically, Section 2.2.1.(Semi-Truck Access) of the Specific Plan identifies Sun Lakes Village Drive as an access point for semi-trucks to the Business & Warehouse District. Currently, the Sun Lakes Village Shopping Center utilizes Sun Lakes Village Drive for truck deliveries in both eastbound and westbound directions. Project's access points along Sun Lakes Boulevard have been evaluated and necessary driveway widening, adequate truck maneuvering, and signalized intersections have been provided as conditions of approval (See Street Improvement/Right of Way Conditions of approval, including Condition 27.) Additionally, the Project is located near Interstate 10 freeway which allows for ideal access to industrial-type lands and helps minimize potential traffic impacts, which is consistent with General Plan Policy Nos. 8 for the Industrial Goal of the Community Development Element.

D. The subject site is physically suitable for the type of development proposed under Tentative Parcel Map No. 38164.

(1) The Tentative Parcel Map covers an area of approximately 47.11 acres and proposes to divide that area into three parcels to be consistent with the proposed land uses to be allowed on each of those parcels. Based on the findings contained in the subsections below, the site contained within the boundaries of the Tentative Parcel Map is physically suitable for the type of development proposed pursuant to Tentative Parcel Map 38164. The findings in the following subsections are intended to provide the findings required by Government Code Section 66474 (c).

(2) The largest proposed parcel is 30.22 acres and is in the northwestern portion of the Map and is adjacent to backside of the Sun Lakes Village Shopping Center, the Southern Pacific Railroad and the Interstate-10 Freeway. This parcel is approximately 1,316,349 square feet in size, exceeds the minimum parcel size of 10,000 square feet, has a lot depth of 876 feet that exceeds the minimum required depth of 100 feet, has a lot width of 1,270 feet which exceeds the minimum lot width of 70 feet, and is large enough to accommodate the proposed development of a 619,959 square-foot warehouse building with associated truck access and parking areas, loading docks, employee parking and landscape areas. The proposed floor area ratio will be 47% of the site and less than the 55% maximum allowed for the parcel. The development will be set back 10 feet from the north and west property lines of the site, consistent with required development standards, and allow for building setbacks

to far exceed the required setbacks from the rear (185 feet when 20 feet is required) the side (70 feet when 20 feet is required) and front (185 feet when 20 feet is required). The parcel is also sufficient to provide for 402 parking spaces when 360-362 parking spaces are required by the Specific Plan and Banning Municipal Code Chapter 17.28.

(3) The second largest parcel is approximately 10.06 acres and is located on the eastern portion of the side and adjacent to an assisted living facility and residential units designed on smaller lots that are part of the Sun Lakes Country Club active adult/golf course community. On this lot, offices and professional uses are intended to be located but no development is currently proposed. This parcel is sufficient in size in terms of depth and width to accommodate a variety of building configurations that could be proposed on the site and meet all required development standards as set forth in Table 2 of the Sun Lakes Village North Specific Plan Amendment No. 5.

(4) The third and smallest parcel is approximately 6.83 acres and is located on the southern edge of the Map and adjacent to Sun Lakes Boulevard. On this lot, retail stores, restaurants and service uses are proposed. This parcel is approximately 297,492 square feet in size, exceeds the minimum parcel size of 6,000 square feet, has a lot depth of 200 feet that exceeds the minimum required depth of 100 feet, has a lot width of 1,300 feet which exceeds the minimum lot width of 60 feet, and is large enough to accommodate the proposed development of six commercial buildings ranging size from 1,600 square feet to 8,400 square feet for a total of 34,000 square feet, along with associated utility, parking roadway, and landscaping improvements. The proposed floor area ratio will be approximately 11% of the site and less than the 60% maximum allowed for the parcel. The development will satisfy the 20 foot and 10-foot landscape setbacks from Sun Lakes Boulevard and the west project boundary, respectively, and allow for building setbacks to exceed the required setbacks from the rear (30 feet when 20 feet is required) the side (80 feet when 20 feet is required) and front (100 feet when 10 feet is required). The parcel is also sufficient to provide for 289 parking spaces (16 for the drive-thru and 273 for the retail) when a total of 146 are required by the Specific Plan.

(5) All three of the parcels are relatively flat and are designed to take vehicular access from access points along Sun Lakes Boulevard that are adequate in location, design and configuration for truck traffic into and out of the warehouse parcel, the office parcel and the retail and service use parcel. All three parcels are adjacent to

Sun Lakes Boulevard to provide water, sewer and electricity to the site.

E. The site is physically suitable for the proposed density of development under Tentative Parcel Map No. 38164.

(1) As noted in the preceding section D above, the Tentative Parcel Map covers an area of approximately 47.11 acres and proposes to divide that area into three parcels to be consistent with the proposed land uses to be allowed on each of those parcels. Based on the findings contained in the subsections below, the site contained within the boundaries of the Tentative Parcel Map is physically suitable for the density of development proposed pursuant to Tentative Parcel Map 38164. The findings in the following subsections are intended to provide the findings required by Government Code Section 66474 (d).

(2) The largest proposed parcel is 30.22 acres and is in the northwestern portion of the Map and is adjacent to backside of the Sun Lakes Village Shopping Center, the Southern Pacific Railroad and the Interstate-10 Freeway. This parcel is approximately 1,316,349 square feet in size and is large enough to accommodate the proposed development of a 619,959 square-foot warehouse building with associated truck access and parking areas, loading docks, employee parking and landscape areas. The proposed floor area ratio will be 47% of the site and less than the 55% maximum allowed for the parcel. The development will include landscape setbacks 10 feet from the north and west property lines of the site, consistent with required development standards, and allow for building setbacks to far exceed the required setbacks from the rear (185 feet when 20 feet is required) the side (70 feet when 20 feet is required) and front (185 feet when 20 feet is required). The parcel is also sufficient to provide for 402 parking spaces when 360-362 parking spaces are required by the Specific Plan and Banning Municipal Code Chapter 17.28. By achieving or exceeding all development standards, the density of the proposed development is suitable for the proposed site.

(3) The second largest parcel is approximately 10.06 acres and is located on the eastern portion of the side and adjacent to an assisted living facility and residential units designed on smaller lots that are part of the Sun Lakes Country Club active adult/golf course community. On this lot, offices and professional uses are intended to be located but no development is currently proposed. This parcel is sufficient in size in terms of depth and width to accommodate a variety of building configurations that could be

developed up to the 60% floor area of the site allowed on the parcel and large enough so that it could meet all required development standards as set forth in Table 2 of the Sun Lakes Village North Specific Plan Amendment No. 5.

(4) The third and smallest parcel is approximately 6.83 acres and is located on the southern edge of the Map and adjacent to Sun Lakes Boulevard. On this parcel, retail stores, restaurants and service uses are proposed. This parcel is approximately 297,492 square feet in size and is large enough to accommodate the proposed development of six commercial buildings ranging size from 1,600 square feet to 8,400 square feet for a total of 34,000 square feet, along with associated utility, parking roadway, and landscaping improvements. The proposed floor area ratio will be approximately 11% of the site and less than the 60% maximum allowed for the parcel. The development will satisfy the 20 foot and 10-foot landscape setbacks from Sun Lakes Boulevard and the west project boundary, respectively, and allow for building setbacks to exceed the required setbacks from the rear (30 feet when 20 feet is required) the side (80 feet when 20 feet is required) and front (100 feet when 10 feet is required). The parcel is also sufficient to provide for 289 parking spaces (16 for the drive-thru and 273 for the retail) when a total of 146 are required by the Specific Plan.

F. The design of the subdivision and improvements proposed under Tentative Parcel Map No. 38164 are not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.

(1) As previously discussed in the findings contained in Subsection B of this Section 3, Tentative Parcel Map 38164 is consistent with the Sun Lakes Village North Specific Plan Amendment No. 5. That Specific Plan was analyzed in the previously certified EIR for the Sun Lakes North Specific Plan Amendment No. 5. As previously discussed in Section 2 of this Resolution, which findings are incorporated herein by this reference as if fully set forth herein, and as demonstrated by the Addendum referred to in that Section, the EIR disclosed and evaluated all potential environmental impacts related to the development of the Project site with the current land uses. The EIR found no significant and unavoidable impacts to any biological resources, and the Addendum found that no new or substantially greater impacts would occur pursuant to the Project. A condition of the Tentative Map approval imposes all mitigation measures set forth in the Mitigation Monitoring and Reporting Program that was adopted with the Sun Lakes Village North Specific Plan Amendment No.

5. Based on the imposed mitigation measures, the environmental impacts arising from the design and improvement of the Tentative Parcel Map will be mitigated to a level less than significance to not cause substantial environmental damage within the meaning of subsection (e) of Government Code Section 66474 and Public Resources Code Section 21100.

(2) The site is currently vacant and does not contain any significant vegetation or habitat for wildlife. The site is not located within any Multiple Habitat Conservation Plan (MSHCP) Criteria Cell or subunit which indicates that this site contains no endangered, threatened, or listed species of plant or animal, or its habitat, on the site. The site is not mapped within an area where additional surveys are required for any amphibian, mammal or other criteria species. There is no evidence that vernal pool complex, similar bodies of water, or conditions suitable for forming such bodies of water exist on the site. The site is not within or adjacent to any MSHCP Conservation Areas. The site is mapped within a Borrowing Owl required habitat and a pre-construction Burrowing Owl Survey and a Nesting Bird Survey are imposed as mitigation measures for this Project (BIO-1 and BIO-2). Finally, the site is mapped within a Narrow Endemic Plant Species required habitat suitability assessment survey area and an assessment was performed that determined that the site did not provide suitable habitat for the San Diego ambrosia, Brand's phacelia and the San Miguel Savory. In addition, the site does not show any existing trees on site, but even it if did, BIO-3 would require replacement of such trees. Therefore, based on these findings and with the imposition of BIO-1 through BIO-3, potential impacts to biological resources will be mitigated to less than significance so as not to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat within the meaning of subsection (e) of Government Code Section 66474 and Public Resources Code Section 21100.

G. The design of the subdivision and improvements proposed under Tentative Parcel Map No. 38164 are not likely to cause serious health problems.

(1) Based on the warehouse building proposed to be developed on the site, and pursuant to Mitigation Measure AQ-7, a diesel health risk assessment was prepared which is attached to the Addendum document as Appendix B to that document. That analysis evaluated the potential mobile source health risk impacts to receptors (residents or workers) associated with the development of the Project. Health risk exposures were modeled in accordance with the guidelines in the SCAQMD's Health Risk

Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis. SCAQMD recommends using the Environmental Protection Agency's (U.S. EPA's) AERMOD model which has been employed accordingly. Risk calculations were conducted consistent with the Office of Environmental Health Hazards Assessment (OEHHA)'s 2015 Risk Assessment Guidelines. Detailed health risk modeling results are presented at Appendix B to this Memorandum. The analysis also evaluated potential health risk impacts that could result from exposure to Toxic Air Contaminants (TACs), including diesel particulate matter (DPM) generated by heavy-duty diesel trucks from on-site idling, on-site travel, and off-site travel. The modeled source area is shown in Exhibit D to the Appendix B of the Addendum Document. At the maximally exposed individual receptor (MEIR), the maximum incremental cancer risk attributable to the Project is estimated at 1.32 in one million, which is less than the SCAQMD threshold of 10 in one million. At this same location, non-cancer risks were estimated to be <0.01, which would not exceed the applicable SCAQMD threshold of 1.0. As such, the Project will not cause a significant human health or cancer risk at any potentially affected receptors within the meaning of subsection (f) of Government Code Section 66474.

(2) As noted in prior subsections, the design of proposed Tentative Parcel Map No. 38164 is in conformance with the City's General Plan, the Sun Lakes North Specific Plan Amendment No. 5 and the certified EIR. The Project has been conditioned to comply with all applicable Specific Plan requirements and requirements of the City's ordinances, codes, and standards including, but not limited to, the California Uniform Building Code, the City's Ordinances relating to Stormwater runoff management and controls. In addition, the design and construction of all improvements for the subdivision has been conditioned to be in conformance with adopted City street and public works standards. Based on the project design and its conformity to these standards, the design of the subdivision and its improvements are not likely to cause serious health problems within the meaning of subsection (f) of Government Code Section 66474.

H. The design of the subdivision and improvements proposed under Tentative Parcel Map No. 38164 will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision.

Other than easements for City of Banning water, sewer and electrical utilities, Southern California Edison, no easements of record or easements

established by judgement of a court of competent jurisdiction for public access across the site have been disclosed in a search of the title records for the site and the City does not otherwise have any constructive or actual knowledge of any other such easements. Accordingly, the Parcel Map will not conflict with easements or access through the property within the meaning of subdivision (g) of Government Code Section 66474.

I. The design of the proposed Tentative Parcel Map No. 38164 provides, to the extent feasible, for future passive or natural heating or cooling opportunities in the subdivision.

Tentative Parcel Map No. 38164 does not propose any design features that would conflict with future passive or natural heating or cooling opportunities.

J. The discharge of waste from the proposed subdivision into an existing community sewer system would not result in a violation of existing requirements imposed by the California Regional Water Quality Control Board.

The discharge of sewage from the site will occur through a sewer connection within Sun Lakes Boulevard and proceed through a series of sewer pipes to the City's wastewater treatment plant in the southeast corner of the City. In connection with the approval of the Project, the applicant is required to obtain all necessary clearances and permits from the California Water Quality Control Board for the Colorado River Basin (Condition 20 (d)). With the design of the Project and Map and compliance with this condition, the discharge of waste into the City's sewer system will not result in a violation of Regional Water Quality Control Board requirements within the meaning of Government Code Section 66474.6.

SECTION 4: **Design Review Approval Findings.** Section 17.56.050 of the City of Banning Municipal Code requires that applications for Design Review approval satisfy certain specified findings and criteria. The City Council makes the following findings to approve Design Review 21-7008:

A. The proposed project is consistent with the General Plan.

(1) The General Plan land use designations for the site are General Commercial and Business Park with a Specific Plan Overlay. The Specific Plan designations for the site are Business & Warehouse District and Retail and Service District. The Design Review application seeks approval of buildings and improvements for development of an industrial warehouse building of 619,959 square feet of gross floor area, which includes 10,000 square feet of office and a separate parcel containing six (6) retail buildings totaling 34,000 square feet to the south varying in size from 1,600 square feet to 8,400 square feet.

(2) The Community Development Element of the General Plan contains goals, policies and programs for the development of industrial, commercial and residential uses. With respect to the industrial uses, the General Plan specifies the general goal that "A balanced mix of non-polluting industrial land uses which provide local jobs for the City's residents." The project will provide a non-polluting industrial use and provide jobs for City residents. Specifically, the industrial portion of the project is not an industrial factory and the uses within the buildings and the warehouse operation are subject to several mitigation measures that require the use of electrical hookups at loading docks (AQ-3), truck idling limitations (AQ-4), the use of electric or natural gas service equipment to reduce fuel consumption and emissions (AQ-5) and a minimum of three (3) electric-vehicle charging stations. In addition, other mitigation measures are imposed on the Project during the grading and construction of the site, including the use of low VOC paint (AQ-1) and limitations on grading activities to ensure emissions do not exceed SCAQMD's significance thresholds. With these mitigation measures the project will not exceed local significance thresholds for emissions and ensure that the Project satisfies the non-polluting goal for industrial uses as provided in the General Plan.

(3) The Community Development Element of the General Plan contains several policies applicable to industrial development projects including: Policy 6 that provides that the land use map shall include sufficient industrial lands for manufacturing, warehousing and distribution, while carefully considering compatibility with adjacent lands; Policy 8 that provides that industrial lands shall be located on major roadways with good access to Interstate 10, to assure that potential traffic impacts associated with tractor-trailers are minimized; and Policy 10 that provides that the Zoning Ordinance shall include principles, design standards and guidelines which encourage development of high quality industrial projects." The Project is consistent with Policy 6 because the size of the portion of the site designated for business and warehouse uses is relatively large (30.22 acres) and is appropriately located immediately adjacent to the I-10 freeway and the Southern Pacific Railroad line to the north of the Project site. In addition, the warehouse use is located on the portion of the site that will be screened and buffered from residential uses to the south and east by the retail and service buildings to be located in the Retail and Services District that exists between the residential uses in Sun Lakes to the south of Sun Lakes Boulevard and the industrial building and by the Office and Professional District uses in the future that will exist between the warehouse uses and the residential and assisted living uses

to the east of the Project site. The Project is consistent with Policy 8 because it will be immediately adjacent to Interstate 10 on the north, and the lot configuration and access points into and out of the site are designed to provide for the minimum amount of travel distance on Sun Lakes Boulevard to Highland Springs Avenue and then onto Interstate 10 and eventually from Sun Lakes Boulevard to the Sunset Avenue and onto Interstate 10 when the Sun Lakes Boulevard extension is completed. Finally, the Project, as more fully explained in connection the Project's consistency with the Specific Plan includes a variety of design elements, setbacks, landscaping features that will provide a high quality industrial project.

(4) The Economic Development Element of the General Plan provides the goal for a balanced, broadly based economy that provides a full range of economic and employment opportunities, while maintaining high standards of development and environmental protection. The Project will increase the availability of job opportunities for not only warehouse employees but also retail and service based business opportunities. The proposed development and buildings will improve the City's property tax base, boost sales tax, provide jobs and revenue for the City's economy. The Project is also consistent with the following applicable Economic Development Element Policies: Policy 2 for the City to take a proactive role in the recruitment of new businesses that will generate and broaden employment opportunities, increase discretionary incomes and contribute to City General Fund Revenues; Policy 3 to encourage infill development that will increase the efficiencies of new utilities, infrastructure and public services; and Policy 9 which require development to be responsible for its fair share of on-site and off-site improvements. The Project will provide physical space for a large business or businesses to conduct warehouse uses in the City and spaces for up to six new retail and service uses to serve the immediate community and the City. These new businesses will provide a wide range of different job opportunities from warehouse jobs to office, retail and services jobs and thereby create the diverse job opportunities in the City that will provide opportunities for residents to find new jobs to increase their discretionary incomes. Overall, through property tax, economic activity and job creation, these Project will contribute to General Fund revenues. The Project is an infill project using a long-standing vacant site for land uses on lots configured and planned to be appropriately sited between other existing uses and already served by existing streets, utilities and infrastructure. Finally, the project includes design features to ensure all on-site amenities consistent with the City's development standards are paid for by

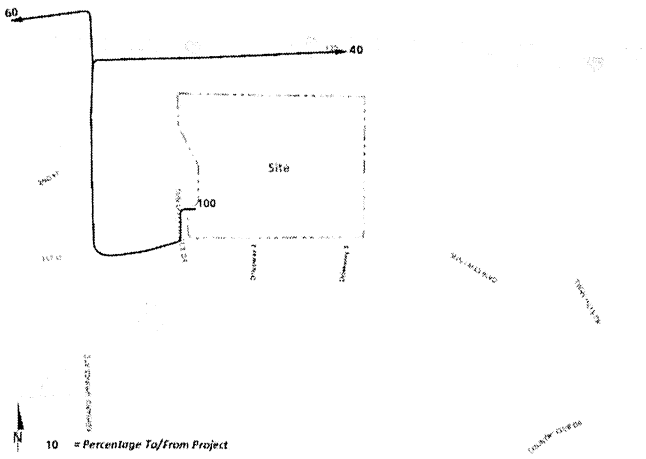
the applicant and that fair share contributions in the form of payment of the City's applicable development impact fees are collected from the development.

(5) The proposed project is consistent with the following goals, policies, and/or programs of the Noise Element of the City's General Plan:

(a) Policy 1 states that the City shall protect noise sensitive land uses, including residential neighborhoods, from potentially significant sources of community noise. The certified PEIR prepared for the SLVNSP states that the maximum base ambient noise level in Municipal Code Section 8.44.050 applicable to the Project is 75 dB(A) while existing ambient noise levels in the vicinity of the site range from 60.4 to 66.2 dB(A). The PEIR determined that construction noise from the Project site could be significant for the closest noise sensitive uses, which are the single-family homes located east of the Office & Professional District of the SLVNSP planning area and the senior apartments/assisted living/memory care residential facility located east of the planning area. The PEIR recommended Mitigation Measure NOI-1 to reduce this impact to less than significant levels. To minimize noise impacts of the proposed Tentative Parcel Map No. 38164, the applicant is conditioned to implement Mitigation Measure NOI-1. PEIR Table 4.10-5 demonstrates that the proposed Tentative Parcel Map No. 38164 would not have significant operational traffic-related noise impacts on surrounding land uses.

(b) Program 1.A. states that the City shall require building setbacks, the installation of wall and window insulation, soundwalls, earthen berms, and/or other mitigation measures in areas exceeding the City's noise limit standards for private development projects as they occur. As indicated in Table 13 (Operational Noise Level Compliance) of the Urban Crossroads Noise Study prepared for PEIR Addendum/Consistency Analysis, the proposed Tentative Parcel Map No. 38164 will not exceed the City's noise limit standards for private development projects.

Table 13: Operational Noise Level Compliance



Receiver Location[1]	Noise Levels (dBA L_{eq})[2]		Noise Standard (dBA L_{eq})		Exceeds Standard?[4]	
	Daytime	Nighttime	Daytime	Nighttime[3]	Daytime	Nighttime
R1	47.5	46.5	60	68.3	No	No
R2	38.4	37.4	60	60.4	No	No
R3	44.1	42.9	60	57.0	No	No
R4	45.8	44.5	60	64.5	No	No
R5	45.9	44.7	60	63.1	No	No

Source: Table 7-4, Urban Crossroads, February 2022 Daytime" = 7:00 a.m. - 10:00 p.m.; "Nighttime" = 10:00 p.m. - 7:00 a.m.

(c) Program 1.B. states that the City shall maintain and enforce its Noise Control Ordinances that establish community-wide noise standards and identify measures designed to resolve noise complaints. The approval of the proposed project has been conditioned to comply with the City's noise ordinances.

(d) Policy 4 states that the City shall assure low levels of traffic within neighborhoods by assigning truck routes to major roadways only. The proposed Project will construct two (2) new access driveways on Sun Lakes Boulevard, which will be constructed to meet City standards and will have direct access to/from Interstate 10 via Highland Springs Avenue, a major roadway. The future extension of Sun Lakes Boulevard to the east may also provide for future access to/from Interstate 10 via Sunset Avenue, another major roadway. Exhibit 4 from the Urban Crossroads Traffic Assessment for the project, below, indicates truck trip distribution based on current truck route conditions:

EXHIBIT 4: PROJECT (INDUSTRIAL TRUCK) TRIP DISTRIBUTION

B. The proposed project is consistent with the Zoning Ordinance, including the development standards and guidelines for the district in which it is located.

(1) The Sun Lakes Village North Specific Plan Amendment No. 5, which was incorporated into the Zoning Ordinance as Section 17.96 by way of Ordinance No. 1591, provides the development standards and guidelines for the proposed Project site. The Specific Plan provides Guiding Objectives for the development in the Specific Plan Area. Those Objectives are as follows: (1) Allow for a range of land uses that reflects current market conditions given the trend away from brick-and-mortar retail; (2) Respond to an increase in e-commerce, especially driven by the coronavirus pandemic; (3) Promote high quality development to safeguard the existing asset of Sun Lakes Country Club and other development in the vicinity; (4) Locate and design truck courts and semi-truck circulation to minimize impacts on surrounding land uses and development; and (5) Expand access to restaurants, shopping, and services for the nearby Sun Lakes Country Club Community. The proposed Project accomplishes all these Objectives by reflecting current real estate market trends toward more e-commerce uses which necessarily includes warehouse uses as a key component of the supply chain required for the storage, shipping and availability of e-commerce goods. The proposed Project locates truck courts and semi-truck circulation towards the interior and northerly portion of the site next to the Southern Pacific Railroad line and Interstate 10 and away from the residential uses in the Sun Lakes Country Club. The design elements and project conditions will ensure that the landscape features and design elements projects a high quality development to safeguard the quality of development within the Sun Lakes Country Club community. Finally, the Project will provide up to six sites and buildings for restaurants, shopping and services for the Sun Lakes Country Club Community within the Retail and Service District of the Project site that is located immediately north of Sun Lakes Boulevard and convenient to that Community.

(2) As proposed, the Project meets all required development standards as outline in Section 3.1 (Development Standards) of the Sun Lakes Village North Specific Plan (SLVNSP). These include such requirements as setback, height, landscaping, parking, etc. Additionally, the Project meets those Design Guidelines outlined in Section 3.2 of the SLVNSP with regard to such elements as architectural articulation, blended use of building materials, and fenestration treatment. Therefore, the Project meets the City's Zoning Ordinance development standards and design guidelines, as more fully explained in the following subsections.

(3) The warehouse building is proposed to be located on a 30.22-acre parcel located in the northwestern portion of the Project site and is adjacent to backside of the Sun Lakes Village Shopping Center, the Southern Pacific Railroad and the Interstate-10 Freeway. This parcel is entirely within the Business and Warehouse District of the Specific Plan which allows for a variety of warehouse uses as permitted uses in that District. The parcel on which the warehouse building will be located is approximately 1,316,349 square feet in size and is large enough to accommodate the proposed development of a 619,959 square-foot warehouse building with associated truck access and parking areas, loading docks, employee parking and landscape areas. The proposed floor area ratio will be 47% of the site and less than the 55% maximum allowed for the parcel. The development will include landscape setbacks 10 feet from the north and west property lines of the site, consistent with required development standards, and allow for building setbacks to far exceed the required setbacks from the rear (185 feet when 20 feet is required) the side (70 feet when 20 feet is required) and front (185 feet when 20 feet is required). The parcel is also sufficient to provide for 402 parking spaces when 360-362 parking spaces are required by the Specific Plan and Banning Municipal Code Chapter 17.28. By achieving or exceeding all development standards, the proposed warehouse component of the Project satisfies the finding that the Project is consistent with the applicable development standards.

(4) The retail and service buildings are proposed to be located on an approximate 6.83-acre parcel that is located on the southern edge of the Project Site and adjacent to Sun Lakes Boulevard. This parcel is entirely within the Retail and Service District of the Specific Plan which allows for a variety of retail, restaurant and service uses as permitted uses in that District. On this parcel, retail stores, restaurants and services buildings are proposed. This parcel is approximately 297,492 square feet in size and is large enough to accommodate the proposed development of six commercial buildings ranging size from 1,600 square feet to 8,400 square feet for a total of 34,000 square feet, along with associated utility, parking roadway, and landscaping improvements. The proposed floor area ratio will be approximately 11% of the site and less than the 60% maximum allowed for the parcel. The development will satisfy the 20 foot and 10-foot landscape setbacks from Sun Lakes Boulevard and the west project boundary, respectively, and allow for building setbacks to exceed the required setbacks from the rear (30 feet when 20 feet is required) the side (80 feet when 20 feet is required) and front (100 feet when 10 feet is required). The

proposed Project will provide for 289 parking spaces (16 for the drive-thru and 273 for the retail) when a total of 146 are required by the Specific Plan.

(5) The proposed project is consistent with the Noise Ordinance. As detailed in the Urban Crossroads Noise Study prepared for PEIR Addendum/Consistency Analysis, the proposed project will not exceed an ambient noise level of 75 dB(A), as required under Banning Municipal Code ("BMC") Section 8.44.050. As detailed in the Urban Crossroads Noise Study prepared for PEIR Addendum/Consistency Analysis, the proposed project will not exceed the maximum exterior noise levels required of nonresidential uses. Further, the project has been conditioned to comply with all applicable noise standards set forth in BMC Section 8.44.090 and the Sun Lakes North Village Specific Plan Amendment No. 5 and mitigation measures imposed under the PEIR.

C. The design and layout of the proposed project will not unreasonably interfere with the use and enjoyment of neighboring existing or future development and will not result in vehicular and/or pedestrian hazards.

(1) The design and layout of the proposed Project places the warehouse use on the largest of the three parcels (30.22 acres) and appropriately locates that parcel and warehouse building and associated uses immediately adjacent to the I-10 freeway and the Southern Pacific Railroad line to the north of the Project site. In addition, the warehouse use is located on the portion of the site that will be screened and buffered from residential uses to the south and east by the retail and service buildings to be located in the Retail and Services District that exists between the residential uses in Sun Lakes Golf Course Community that lies south of Sun Lakes Boulevard and the industrial building and by the Office and Professional District uses in the future that will exist between the warehouse uses and the residential and assisted living uses to the east of the Project site. In addition, the warehouse building will back up against the rear of the Sun Lakes Village Shopping Center buildings rather than facing those Shopping Center buildings. By this design of the location of the warehouse building, the Project is not anticipated to unreasonably interfere with the use and enjoyment of neighboring uses and future development.

(2) The proposed Project locates truck courts and semi-truck circulation towards the interior and northerly portion of the site next to the Southern Pacific Railroad line and Interstate 10 and away from the residential uses in the Sun Lakes Country Club. The lot configuration

and access points into and out of the site are designed to provide for the minimum amount of travel distance on Sun Lakes Boulevard to Highland Springs Avenue and then onto Interstate 10 and eventually from Sun Lakes Boulevard to the Sunset Avenue and onto Interstate 10 when the Sun Lakes Boulevard extension is completed. Sun Lakes Boulevard is a Major Highway between Highland Springs Avenue to Highland Home Road with adequate capacity for truck and automobile traffic volumes for commercial and industrial purposes. Signalized intersections are proposed to be installed at Highland Springs/Sun Lakes Boulevard and at Sun Lakes Boulevard/Country Club Drive to ensure safe pedestrian and vehicular crossing along Sun Lakes Boulevard. For these reasons, the development will not result in vehicular or pedestrian hazard.

D. The design of the proposed project is compatible with the character of the surrounding neighborhood.

(1) As explained in Subsection (C) above, the warehouse building and associated uses will be surrounded by compatible uses. The entire northern boundary of the site on which the warehouse building will be located is bounded by the Southern Pacific Railroad line and then Interstate 10. Locating a warehouse building up against that rail line and freeway corridor is entirely appropriate and compatible with transportation uses that occur on that rail line and freeway corridor. To the west of the warehouse building is the backside of the Sun Lakes Village Shopping Center. This is commercial development project that will shield the warehouse building from persons coming to and from that Shopping Center. Locating the warehouse building behind a commercial shopping center building will not interfere with the use of that Shopping Center and is compatible with that use. To the south of the warehouse building is the Retail and Service District of the Specific Plan. On that site there will be shops, restaurants and services businesses along with a parking lot. Located the warehouse to the rear of and on the backside of these retail and service buildings will not interfere with those retail and service business and is compatible with those uses. Finally, most of the easterly side the warehouse parcel will be adjacent to a currently vacant parcel that is proposed for office and professional uses. That future office and professional development on that easterly parcel will provide substantial screening and buffering of the residential and assisted living uses to the east of the warehouse building. In addition, a landscape buffer along the entire easterly edge of the Project site will further screen the warehouse use from those other easterly uses. Finally, the placement of the warehouse building and associated uses on this site will mean that the warehouse building and truck uses on that site will be more than 800 feet from the northern boundary of the Sun Lakes Country Club residential community. For

all these reasons, the design of the project to place and develop a warehouse building and use on the rear of the Project site and as buffered by the other buildings and uses surrounding that site, provides that it will be compatible with the character of the surrounding neighborhood.

(2) As noted in part (1) of this Subsection (D) above, the proposed retail, restaurant and service buildings to be located on the southerly parcel of the proposed development will be situated between Sun Lakes Boulevard on the south and the industrial warehouse building on the north. In addition, to the proposed landscaping along the frontage of Sun Lakes Boulevard, these retail, restaurant and service buildings and uses will function as a visual and physical buffer from the Sun Lakes Country Club residents on the south side of Sun Lakes Boulevard, the closest of which is approximately 800 feet away from the proposed industrial building. These proposed retail, restaurant and services uses in proximity of existing adjacent residential uses will also be similar to the uses in the existing commercial/retail uses in the Sun Lakes Village Shopping Center. These buildings and uses will provide needed retail, restaurant and service uses for the residents of the Sun Lakes Country Club community. For these reasons, the Project's proposed uses on the Retail and Service District parcel will be compatible with the surrounding neighborhood.

SECTION 5: Project Approval and Denial of Appeal. Based upon the findings and conclusions set forth in Sections 1 through 4 above, and all of the evidence (both written and oral) in the record, this Council hereby approves Tentative Parcel Map 38164; approves Design Review 21-7008, and thereby denying the Appeal of the Planning Commission's approval of Design Review 21-7008; and imposes all of the Conditions of Approval set forth on Exhibit A to this Resolution, which are hereby incorporated.

SECTION 6: Certification. The City Clerk shall certify to the adoption of this Resolution.

SECTION 7: Effect. This Resolution shall take effect immediately upon its adoption.

SECTION 8: Judicial Review. The time within which judicial review, if available, of this decision must be sought is governed by California Code of Civil Procedure Section 1094.6, unless a shorter time is provided by other applicable law. The City Clerk shall mail by first class mail, postage prepaid, a certified copy of this Resolution and a copy of the affidavit or certificate of mailing to the Appellant, Applicant, and any other persons or entities requesting notice of determinations related to the decision.

PASSED, APPROVED AND ADOPTED this 17th day of February 2022.

Kyle Pingree, Mayor
City of Banning

ATTEST:

Caroline Patton, Deputy City Clerk
City of Banning

APPROVED AS TO FORM AND LEGAL CONTENT:

Kevin G. Ennis, City Attorney
Richards, Watson & Gershon

CERTIFICATION:

I, Caroline Patton, Deputy City Clerk of the City of Banning, California, do hereby certify that the foregoing Resolution 2022-14, was duly adopted by the City Council of the City of Banning, California, at a regular meeting thereof held on the 17th day of February 2022 by the following vote, to wit:

AYES: Happe, Pingree, Sanchez, and Wallace.

NOES: Hamlin.

ABSENT:

ABSTAIN:

Caroline Patton, Deputy City Clerk
City of Banning, California

CONDITIONS OF APPROVAL

City of Banning

Community Development Department

Conditions of Approval

PROJECT: Design Review 21-7008 & Tentative Parcel Map 38164 (Banning Point)
SUBJECT: Conditions of Approval (City Council Resolution 2022-14)
APPLICANT: Sun Lakes Highland, LLC.
LOCATION: North of Sun Lakes Boulevard, east of Highland Springs Avenue, south of Interstate 10, and west of Highland Home Road in the Sun Lakes Village North Specific Plan (APN 540-180-055)

EXHIBIT A
To City Council Resolution 2022-14

*** All fair share agreements, covenant agreements and agreements subject to recordation will be subject to review and approval by the City Attorney and will include appropriate enforcement provisions by the City and be properly securitized.**

Community Development Department

A. GENERAL REQUIREMENTS:

1. The project shall always comply with all federal, state, County and City laws, codes, regulations, and standards, including those that relate to hazardous materials.

2. All activities undertaken in connection with the development and operation of the project that is approved by Tentative Parcel Map 8164 and Design Review 21-7008 shall be subject to and shall comply with all Mitigation Measures contained in the Final EIR for the Sun Lakes Village North Specific Plan Amendment No. 5 (SCH No. 20200029074) and the Mitigation Monitoring and Reporting Program (MMRP) adopted in connection with the approval of the Sun Lakes Village North Specific Plan Amendment No. 5.

3. The applicant shall indemnify, protect, defend, and hold harmless, the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, from any and all claims, demands, lawsuits, writs of mandamus, and other actions and proceedings (whether legal, equitable, declaratory, administrative or adjudicatory in nature), and alternative dispute resolutions procedures (including, but not limited to, arbitrations, mediations, and other such procedures) (collectively "Actions"), brought against the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, that challenge, attack, or seek to modify, set aside, void, or annul, the action of, or any permit or approval issued by, the City and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof (including actions approved by the voters of the City), for or concerning the project, whether such actions are brought under the California Environmental Quality Act

(CEQA), State Planning and Zoning Law, the Subdivisions Map Act, Code of Civil Procedure Section 1085 or 1094.5, or any other state, federal, or local statute, law, ordinance, rule, regulation, or any decision of a competent jurisdiction. It is expressly agreed that the City shall have the right to approve, which approval will not be unreasonably withheld, the legal counsel providing the City's defense, and that applicant shall reimburse City for any costs and expenses directly and necessarily incurred by the City in the course of the defense. City shall promptly notify the applicant of any Action brought and City shall cooperate with applicant in the defense of the Action.

4. Approval of this entitlement shall not waive compliance with any sections of the Banning Municipal Code (BMC), other applicable City ordinances, in effect at the time of building permit issuance.

5. The Project permitted under Design Review 21-7008 & Tentative Parcel Map 38164 shall commence construction within two (2) years from the date of this approval, or the Design Review shall become null and void. Additionally, if after commencement of construction, activities are discontinued for a period of one (1) year, the Design Review approval shall become null and void. The Community Development Director may, upon a written application being filed 30 days prior to expiration and for good cause, grant a onetime extension not to exceed 12 months. Upon granting of an extension, the Community Development Director shall ensure that the Design Review complies with all current provisions of Title 17 of the Banning Municipal Code.

6. A copy of the signed Resolution of approval and all Conditions of Approval imposed on the Design Review shall be reproduced in legible form on the improvement plans submitted for review and approval as required by the reviewing department.

7. Prior to any occupancy/use of the project site, or business activity being commenced thereon, all Conditions of Approval shall be completed to the satisfaction of the Community Development Director.

8. A trash enclosure shall be provided with three decorative walls, enhanced wall caps, a pedestrian entrance, a gate, and a structural steel cover, in a style compatible with the structure's architecture. The gate shall be maintained in working order and shall remain closed except when in use.

9. Exterior lighting shall be shielded or recessed so that light is contained within the boundaries of the parcel on which the lighting is located. All lighting shall be directed downward and away from adjoining properties and public rights-of-way.

10. Any roof-mounted equipment or utility equipment on the side of the structure, or on the ground, shall not be visible from adjacent properties, the public right-of-way, or the parking lot. Any architectural screening that is proposed to shield the roof-mounted equipment shall be compatible in terms of colors and materials of the building. Landscape screening for ground mounted equipment shall be of sufficient size and quantity to fully screen the equipment.

11. A complete landscape/irrigation package prepared by a landscape architect licensed by the State of California shall be reviewed and approved by the Planning Division prior to issuance of building permit. The plans shall include the following elements:

    a. Water conservation concept statement.

b. Calculation of maximum applied water allowance.

c. Calculation of estimated total water use.

d. Landscape design plan.

e. Irrigation design plan.

f. Certificate of substantial completion.

g. The landscape plan shall demonstrate compliance with Zoning Ordinance requirements related to minimum dimensions and percentages of landscaping in parking areas, including required front yard setback landscaping.

12. A. Prior to the issuance of the Temporary Certificate of Occupancy for the warehouse building the developer shall install all landscaping specified for the retail service district pursuant to city approved landscape plans.

12. B. Storage use and removal of toxic substances, solid waste, and flammable liquids shall conform to all applicable federal, state, and local regulations. All required licensing shall always be maintained in good order. Lapse or revocation of any required license shall result in the voiding of the Business License.

13. The subject property shall be developed and maintained in accordance with the site plans stamped approved by the City and on file in the Planning Division, the conditions contained herein, and the applicable regulations within the Banning Municipal Code.

14. If human remains are encountered during grading and other construction excavation, the developer/owner shall stop/cease work in the immediate vicinity and the County Coroner shall be contacted pursuant to State Health and Safety Code Section 7050.5.

15. Trash collection shall occur between the hours of 8:00 a.m. and 6:00 p.m. only.

16. All graffiti shall be removed immediately or within 24 hours of notice from the City.

17. Hours of operation shall be no earlier than 7:00 a.m. and no later than 10:00 p.m.

18. Commercial zoning districts shall be permitted wall signs per the area of the wall (length times height of the wall). The area devoted to such signs shall not exceed twenty percent of the wall area. All parts, portions, and materials shall be maintained and kept in good repair. The display surface of all signs shall be kept clean, neatly painted, and free from rust and corrosion. Any cracked, broken surfaces, malfunctioning lights, missing sign copy or other unmaintained or damaged portion of a sign shall be repaired or replaced within thirty calendar days following notification by the City.

19. Pedestrian walkways should not intersect the drive-through aisles, but where they do, they shall have clear visibility, and they must be emphasized by enriched paving or striping.

PUBLIC WORKS DEPARTMENT:

20. A Public Works Permit shall be required prior to commencement of any work within the public right-of-way. The contractor working within the public right-of-way shall submit proof of a Class

"A" State Contractor's License, City of Banning Business License, and Liability Insurance. Any existing public improvements, or public improvements not accepted by the City that are damaged during construction shall be removed and replaced as determined by the City Engineer or his/her representative.

21. Prior to the issuance of any grading, construction, or public works permit by the City, the applicant shall obtain any necessary clearances and/or permits from the following agencies:

    a. Fire Marshal (access)

    b. Public Works Department (grading permits, street improvement permits)

    c. Riverside County Flood Control & Water Conservation District (storm drain)

    d. California Regional Water Quality Control Board Colorado River Basin (RWQCB)

    e. South Coast Air Quality Management District (SCAQMD)

22. The applicant is responsible for meeting all requirements of permits and/or clearances from the above listed agencies. When the requirements include approval of improvement plans, the applicant shall furnish proof of such approvals when submitting improvements plans to the City.

23. The following improvement plans shall be prepared by a Civil Engineer licensed by the State of California and submitted to the Engineering Division for review and approval. A separate set of plans shall be prepared for each line item listed below. Unless otherwise authorized in writing by the City Engineer, the plans shall utilize the minimum scale specified and shall be drawn on 24" x 36" Mylar film. Plans may be prepared at a larger scale if additional detail or plan clarity is desired (Note: the applicant may be required to prepare other improvement plans not listed here pursuant to improvements required by other agencies and utility purveyors):

    a. Rough Grading Plans — 1" = 40' horizontal
        A. (All Conditions of Approval shall be reproduced
        B. on last sheet of set)

    b. Haul Route Plans — 1" = 40' horizontal

    c. Clearing Plans — 1" = 50' horizontal
        A. (Include construction fencing plan)

    d. Erosion Control & SWPPP, WQMP — 1" = 40' Horizontal
        A. (Note: a, b, c & d shall be reviewed
        B. and approved concurrently)

    e. Storm Drain Plans — 1" = 40' Horizontal

    f. Street Improvement Plans — 1" = 40' Horizontal
        i. 1" = 4' Vertical

    g. Precise Grading Plans — 1" = 40' Horizontal

h.	Landscaping Plans	1" = 20 Horizontal
i.	Water Improvement Plans	1" = 40' Horizontal i. 1" = 4' Vertical
j.	Sewer Improvement Plans	1" = 40' Horizontal i. 1" = 4' Vertical

24. Other engineered improvement plans prepared for City approval that are not listed herein shall be prepared in formats approved by the City Engineer prior to commencing plan preparation.

25. All off-site plan and profile, street improvement plans, and signing & striping plans shall show all existing improvements for a distance of at least 200-feet beyond the project limits, or at a distance sufficient to show any required design transitions.

26. A small index map shall be included on the title sheet of each set of plans, showing the overall view of the entire work area.

27. Upon completion of construction, the Developer shall furnish the City with reproducible record drawings on Mylar film of all improvement plans that were approved by the City Engineer. Each sheet shall be clearly marked "As-Built" or "As-Constructed" and shall be stamped and signed by the engineer or surveyor certifying the accuracy and completeness of the drawings. The applicant shall have all AutoCAD files submitted to the City, revised to reflect the "As-Built" conditions.

Street Improvements/Right-of-Way

28. Construct right-of-way improvements (driveway approach, sidewalk, parkway, raised median, access ramp, street lighting, etc.) fronting the site per City of Banning Standard Drawings. Street lights shall be installed offset of the existing street lights.

29. Installation of a traffic signal at the intersection of Sun Lakes Boulevard, future Driveway 3 (as shown in the TIA) and Country Club Drive. Project applicant shall reach out to the Sun Lakes Country Club staff to discuss impacts to their access.

30. Provide paved golf cart access adjacent to the sidewalk through the property and at the proposed traffic signal entrance.

31. Construct street improvements as identified by the project's traffic impact analysis (TIA).

32. The City and Developer are to enter into a Public Improvement Agreement to guarantee the construction of the public improvements as listed in the Conditions of Approval and as shown on the approved plans. The applicant shall work with the City Attorney's Office to execute the Agreement and pay all related legal processing fees.

33. All street improvement designs shall provide pavement and lane transitions per City of Banning and Caltrans standards for transition to existing street sections.

34. Any public improvements damaged during the course of construction shall be replaced to the satisfaction of the City Engineer, or his/her designee.

35. The applicant shall plant and perpetually maintain trees, shrubs, and ground cover placed in the parkway, slopes adjacent to public right-of-ways constructed in connection with the project. This includes providing irrigation and the clearing of debris and weed removal. The applicant shall be required to enter into a Landscape Maintenance Agreement for the perpetual maintenance of landscaping within the public right-of-way fronting the project site.

36. All required public improvements for the project shall be completed, tested, and approved by the Engineering Division prior to issuance of any Certificate of Occupancy.

GRADING & DRAINAGE:

37. Submit a Drainage Study with hydrologic and hydraulic analysis for developed and undeveloped (existing) conditions to the Engineering Division for review and approval. The study and analysis shall be prepared by a civil engineer licensed by the State of California. Drainage design shall be in accordance with Banning Master Drainage Plan adopted by Riverside County Flood Control and Water Conservation District (RCFCD), RCFCD Hydrology Manual, and standard plans and specifications. The 10-year storm flow shall be contained within the street curbs, and the 100-year storm shall be contained within the street right-of-way; when this criteria is exceeded, additional drainage facilities shall be designed and constructed.

38. At a minimum, all development will make provisions to store runoff from rainfall events up to and including the one-hundred three-hour during event. Post-development peak urban runoff discharge rates shall not exceed pre-development peak urban runoff discharge rates.

39. Prior to issuance of any building permit, the applicant shall install trash filters in all catch basins adjacent to the site and/or will be constructed as part of the storm drain improvements for this development. The trash filters shall comply with the requirements of the Trash Amendment as amended and approved in accordance with California Regional Water Quality Control Board Colorado River Basin Region Order No. R7-2013-0011.

40. If the site is located in a Flood Area as identified in Flood Insurance Rate Map dated August 28, 2008 the developer is responsible for providing a certification by a registered professional engineer or architect demonstrating that encroachments shall not result in any increase in flood levels during the occurrence of the base flood discharge.

41. The project grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage areas, outlet points and outlet conditions. Otherwise, a drainage easement shall be obtained for the release of concentrated or diverted storm flows. The project shall accept and convey storm flows from the adjacent property to the north.

42. The applicant shall comply with Chapter 13.24 "Stormwater Management Systems" of the Banning Municipal Code (BMC) and Title 18 "Grading, Erosion and Sediment Control" of the California Building Code related to excavation and grading; and, the State Water Resources Control Board's orders, rules and regulations.

43. For construction activities including clearing, grading or excavation of land that disturbs one (1) acre or more of land, or that disturbs less than one (1) acre of land, but which is a part of a construction project that encompasses more than one (1) acre of land, the applicant shall be required to submit a Storm Water Pollution Protection Plan (SWPPP) and file a Notice of Intent (NOI) with the Regional Water Quality Control Board.

44. The applicant shall ensure that the required SWPPP is available for inspection at the project site at all times through and including acceptance of all improvements by the City.

45. The applicant's SWPPP shall include provisions for all of the following Best Management Practices ("BMPs"):

46. Temporary Soil Stabilization (erosion control).

47. Temporary Sediment Control.

48. Wind Erosion Control.

49. Tracking Control.

50. Non-Storm Water Management.

51. Waste Management and Materials Pollution Control.

52. All erosion and sediment control BMPs proposed by the applicant shall be designed using the CASQA BMP handbook and approved by the City Engineer prior to any onsite or offsite grading, pursuant to this project.

53. The approved SWPPP and BMPs shall remain in effect for the entire duration of project construction until all improvements are completed and accepted by the City.

54. Prior to issuance of any grading or building permit, a Project-Specific Water Quality Management Plan (WQMP) shall be reviewed and approved in accordance with California Regional Water Quality Control Board Colorado River Basin Region Order No. R7-2013-0011.

55. Prior to the issuance of any building permit(s), a precise grading plan shall be submitted to the City Engineer for review and approval. A grading permit shall be obtained prior to commencement of any grading activity.

56. Grading and excavations in the public right-of-way shall be supplemented with a soils and geology report prepared by a professional engineer or geologist licensed by the State of California.

57. Prior to the issuance of a building permit, the applicant shall provide a lot pad certification stamped and signed by a qualified civil engineer or land surveyor. Pad certification shall list the pad elevation as shown on the approved grading plan, the actual pad elevation and the difference between the two, if any. Such pad certification shall also list the relative compaction of the pad soil.

TRAFFIC/CIRCULATION:

58. Prior to the issuance of a grading permit or building permit, the applicant shall submit and obtain approval in writing from the Fire Marshall for the plans for all public or private access drives or streets. The plans shall include plan and sectional views and indicate the grade and width of the access road measured flow-line to flow-line. When a dead-end access exceeds 150 feet or when otherwise required, a clearly marked fire apparatus access turnaround must be provided and approved by the Fire Marshall. Applicable covenant, conditions or restrictions or other approved documents shall contain provisions which prohibit obstructions such as speed bumps/humps,

control gates or other modifications within said easement or access road unless prior approval of the Fire Marshall is granted.

59. Driveway grades shall not exceed eight percent unless approved by the City Engineer.

60. Access drives to the public right-of-way shall be restricted to those approved by the City Engineer as shown on the approved plans.

61. Prior to the issuance of any certificate of occupancy, all fire hydrants shall have a blue reflective pavement marker indicating the hydrant location on the street/access driveway as approved by the Fire Marshall and must be maintained in good condition by the property owner until the street is accepted for maintenance.

62. Prior to the issuance of a grading permit or building permit, the applicant shall conduct a Traffic Impact Analysis and submit the report to the Engineering Division for review and approval. All mitigation identified in the Traffic Impact Analysis shall be implemented by the applicant to the satisfaction of the City Engineer.

TRASH & RECYCLING:

63. Construction debris shall be disposed of at a certified recycling site. It is the responsibility of the developer to contact the City's franchised solid waste hauler, Waste Management of the Inland Valley, at 1-800-423-9986 for disposal of construction debris.

64. The developer shall participate in the City's recycling and diversion programs by providing a solid waste enclosure to accommodate necessary solid waste containers.

65. All new development projects including, but not limited to, industrial and business buildings and facilities, as well as, multi-family complexes shall provide a solid waste enclosure to accommodate trash, recycle and organics waste bins and/or containers. Solid waste enclosures for multiple tenant properties, such as a shopping center, must design the enclosure to accommodate all waste containers of the property.

66. Solid waste enclosures shall be located on the site to be serviced.

67. The enclosure shall be designed for the exclusive use of housing solid waste containers including trash, recyclable and organics materials.

68. Enclosures Design Criteria:

    a. The size and dimensions of the trash enclosure shall be based on the required number and size of containers at a minimum accommodating one (1) container each for trash, recyclables and organics materials.
    b. Enclosure shall be architecturally compatible with the primary building on site to provide a coordinated design.
    c. Exterior materials and colors of the enclosure shall match the building walls.
    d. Chain link fencing with or without/plastic slats is prohibited.
    e. Enclosure shall have solid metal or wood gates with latches that can be secured in an open or closed position.

f. Enclosures shall be constructed in a permanent manner.

g. Exterior must be fully enclosed with solid roofing to prevent rainfall from entering the enclosure and to prevent wind dispersal, as well as, offsite transport of trash and recycling.

h. Provide the minimum clearance for collector and user accessibility.

i. City Engineer approval shall be obtained in writing prior to the construction of any solid waste enclosure.

WATER:

69. Submit water improvement plans to the Public Works Department along with anticipated peak water demands and hydraulic analysis to justify pipe sizes. Pipes shall be ductile iron, wrapped in V-Bio polyethylene. All water services 2" and smaller shall use plastic-coated copper tubing.

70. Separate irrigation meters will be required for outdoor use.

71. All commercial, industrial, and irrigation water services shall have Reduced Pressure Principle Backflow Preventors. RP Backflow Preventors shall be of a model approved by USC.

72. On-site fire hydrants shall be part of a privately-owned and maintained fire protection system. Private fire hydrants shall be painted safety red, to differentiate from publicly-owned fire hydrants which are typically yellow.

73. Because of the project's location at a pressure zone boundary, an above-ground pressure regulating station may be required, pending review of the water improvement plans by the City Engineer.

RECYCLED WATER:

74. Plans for a purple-pipe non-potable irrigation system shall be designed and submitted to the Public Works Department. Pipes shall be ductile iron, wrapped in purple V-Bio polyethylene. All water services 2" and smaller shall use plastic-coated copper tubing. Plans should include a signage plan typical of a non-potable irrigation system.

75. An interim connection between the potable and non-potable systems shall be installed by way of a single backflow preventor, until such a time as the City's non-potable backbone system is extended west along Sun Lakes Blvd.

WASTEWATER

76. A sewer improvement plan shall be prepared and submitted to the Public Works Department, extending the public sewer from Sun Lakes Blvd. Sewer main material shall be PVC SDR 26. Sewer system design shall avoid placing manholes in low spots, or connecting storm water drainage facilities to the sewer system.

77. When available, estimated sewer discharge quantities and quality shall be submitted to the Public Works Department for review. Depending on the nature of the discharge, grease interceptor(s) may be required.

FEES:

78. Plan check fees for professional report review (geotechnical, drainage, WQMP, etc.), and all improvement plans review, shall be paid at the time of submittal of said documents for review and approval in accordance with the fee schedule in effect at the time of submittal.

79. Public Works Inspection fees shall be paid prior to issuance of any permits in accordance with the fee schedule in effect at time of time of scheduling.

80. A plan storage fee shall be paid for any engineering plans that may be required prior to issuance of certificate of occupancy in accordance with the fee schedule in effect at the time the fee is paid.

81. Water, Sewer, and Non-potable impact fees shall be paid prior to issuance of Building permit. Water meter and water meter installation fees shall be due prior to meter release.

FINAL PARCEL MAP:

82. Prior to approval of the Final Map, the applicant shall construct on-site and off-site improvements required for the development of the property in accordance with the approved plans and satisfy its obligations for same, or shall furnish a fully secured and executed Subdivision Improvement Agreement on terms agreed to by the Parties guaranteeing the construction of such improvements and the satisfaction of its obligations for same, or shall agree to any combination thereof. For off-site improvements, the procedures and requirements of Government Code Section 66462.5 shall apply, including the potential acquisition of those rights by the City or waiver of the City's requirement to obtain those rights.

83. Security for the construction of public improvements in accordance with Government Code Section 66499 shall be as follows:

a.	Faithful Performance Bond	100% of estimated cost
b.	Labor and Material Bond	100% of estimated cost
c.	Monumentation Bond	$5,000.00

84. Securities for the public improvements shall be on file with the City Clerk prior to scheduling the final map for approval by City Council. Unit prices for bonding estimates shall be those specified or approved by the City Engineer.

85. Revisions to the tentative map during plan check including, but not limited to, lot line alignments, easements, improvement plan revisions, and similar minor changes that are in substantial compliance with the tentative map, or associated conditions of approval, shall be administratively approved through the plan check process with the mutual consent and approval of the Developer, the Community Development Director and City Engineer. Final maps shall be amended in accordance with the Subdivision Map Act.

86. Prior to approval of any final map the applicant shall identify and include in its improvement plans those routine structural and non-structural Best Management Practices (BMP's).

87. Submit a copy of the title report, closure calculations, and any separate instruments or necessary right-of-way documents to the Engineering Division prior to final map approval.

88. An original Mylar of the final map (after recordation) shall be provided to the City for the record files.

89. Public improvements shall be completed and accepted by City of Banning prior to release of Faithful Performance Bond and Labor and Material Bond for such improvements. Faithful Performance Bond for applicable public improvements shall be reduced to 10% once City accepts improvements into maintenance period. Final 10% to serve as the maintenance bond for the 1-year maintenance period.

90. A record of all street centerline monument ties shall be submitted to the Engineering Division upon completion of improvements or prior to release of Monumentation Bond.

FIRE DEPARTMENT:

91. Fire Hydrants and Fire Flow: Prior to the issuance of building permits, plans for the water system shall be submitted to the fire department for review and approval. The water system shall be capable of delivering the required fire flow. Fire hydrant(s) location and spacing shall comply with the fire code. An approved water supply for fire protection during construction shall be made available prior to the arrival of combustible materials on site. Reference 2016 California Fire Code (CFC) 507.5.1, 3312, Appendices B and C.

92. Fire Department Access: Prior to building permit issuance, provide a site plan showing the fire lanes. Access roads shall be provided to within 150 feet to all portions of the exterior building walls and shall have an unobstructed width of not less than 24 feet. The construction of the access roads shall be all weather and capable of sustaining 40,000 lbs. over two axles for areas of residential development and 60,000 lbs. over two axels for commercial developments. Approved vehicle access, either permanent or temporary, shall be provided during construction Ref. CFC 503.1.1, 3310.1 and 503.2.1

93. Requests for installation of traffic calming designs/devices on fire apparatus access roads shall be submitted and approved by the Office of the Fire Marshal. Ref. CFC 503.4.1

94. Grading Permit Fire Department Review: Submittal to the Office of the Fire Marshal for Precise Grading Permit will be required.

95. Construction Permits Fire Department Review: Submittal of construction plans to the Office of the Fire Marshal for development, construction, installation and operational use permitting will be required. Final fire and life safety conditions will be addressed when the Office of the Fire Marshal reviews these plans. These conditions will be based on occupancy, use, California Building Code (CBC), California Fire Code, and related codes, which are in effect at the time of building plan submittal.

96. Phased Construction Access: If construction is phased, each phase shall provide approved access for fire protection prior to any construction. Ref. CFC 503.1

97. Fire Sprinkler System: All new commercial structures 3,600 square feet or larger shall be protected with a fire sprinkler system. Ref CFC 903.2 as amended by the City of Banning.

98. Fire Alarm and Detection System: A water flow monitoring system and/or fire alarm system may be required and determined at time of building plan review. Ref. CFC 903.4, CFC 907.2 and NFPA 72

99. Knox Box and Gate Access: Buildings shall be provided with a Knox Box. The Knox Box shall be installed in an accessible location approved by the Office of the Fire Marshal. All electronically

operated gates shall be provided with Knox key switches and automatic sensors for access. Ref. CFC 506.1

100. Addressing: All commercial buildings shall display street numbers in a prominent location on the address side and additional locations as required. Ref. CFC 505.1 and County of Riverside Office of the Fire Marshal Standard #07-01

101. Buildings in excess of 300,000 square feet in area shall be required to provide a fire command center for fire department operations and shall comply with 2019 CFC sections 508.1.1 through 508.1.8 as amended and adopted by the City of Banning and Riverside County Fire. (2019 CFC 508.1)

102. Emergency Responder Radio Coverage Systems: Projects that do not meet the exceptions set forth by the Riverside County Office of the Fire Marshal shall provide plans for an emergency responder radio coverage system. Ref. CFC 510.1 and Riverside County Office of the Fire Marshal Technical Policy #TP19-002

103. Strategic Planning Review: This planning case will also be reviewed by Riverside County Fire Department Strategic Planning for the cumulative impact on the Fire Department's ability to provide an acceptable level of service. Additional requirements may be conditioned by Strategic Planning to mitigate these impacts. Questions for Strategic Planning can be addressed to RRUStrategicPlanningBureau@fire.ca.gov.

104. Use the Above Statement only if it meets the Strategic Planning Case Review Criteria below:

a. Environmental Impact Reports

b. General Plan Amendments

c. Specific Plans

d. Developments that are in very high fire hazard severity zones in the LRA and developments in the SRA

e. Residential with 500 or more dwelling units

f. Commercial/Industrial developments of 1,000,000 sq ft or more

Condition Added by Planning Commission and Modified by City Council

105. The Developer shall pay for and install traffic signal preemption devices on up to 5 traffic signal intersections from and including Ramsey/Highland Springs to Sun Lakes Boulevard/Highland Springs, not to exceed the cost of $100,000. The applicant shall coordinate these efforts with both the City of Banning and Beaumont..

Condition Added by City Council

106. The Developer shall pay the City $175,000 to be used by the City for fire station/fire apparatus capital improvements in the City, which amount shall be in addition to the Fire Facilities Development Impact Fee that is owing for the Project. The fee shall be paid prior to the Temporary Certificate of Occupancy on the warehouse building.

END

The following information comprises the minutes for a special meeting of the City Council, a joint meeting of the Banning City Council and Banning Utility Authority and a joint meeting of the Banning City Council and the Banning City Council sitting in its capacity as the Successor Agency Board.

MINUTES **2/17/2022**
CITY COUNCIL **SPECIAL MEETING**

COUNCIL MEMBERS PRESENT: Council Member Mary Hamlin
Council Member David Happe
Council Member Alberto Sanchez
Mayor Pro Tem Colleen Wallace
Mayor Kyle Pingree

COUNCIL MEMBERS ABSENT: None

OTHERS PRESENT: Doug Schulze, City Manager
Kevin Ennis, City Attorney
Marie Calderon, City Clerk
Caroline Patton, Deputy City Clerk
Adam Rush, Community Development Director
Art Vela, Director of Public Works*
Suzanne Cook, Finance Director*
Tom Miller, Electric Utility Director*
Ralph Wright, Parks and Recreation Director*
Nate Smith, Deputy Director of Public Works/City Engineer*
James Wurtz, Economic Development Manager
Ginetta Giovinco, City Attorney's Office*
Jeff Horn, Police Captain
Emery Papp, Senior Planner
Paul Lindley, Fire Marshal*
Sandra Calderon, Development Project Coordinator
Sandra Castaneda, Office Specialist
*Participated via teleconference.

1. CALL TO ORDER

Mayor Pingree called the special meeting to order at 5:00 p.m.

1.1 Roll Call

COUNCIL MEMBER	PRESENT	ABSENT
Hamlin, Mary	✕	
Happe, David*	✕	
Pingree, Kyle	✕	
Sanchez, Alberto	✕	
Wallace, Colleen	✕	

1.2 Pledge of Allegiance - Mayor Pro Tem Wallace led the pledge of allegiance.

2. PUBLIC HEARINGS

2.1. Banning Point Project – Consideration of a Tentative Subdivision Map to Divide 47 Acres into 3 Parcels of Land and Design Review Approval of a Proposed Industrial Warehouse Building of 619,959 Square Feet, including 10,000 Square Feet of Office Space and Six Retail/Commercial Buildings Totaling 34,000 Square Feet within the Sun Lakes Village North Specific Plan Amendment No. 5 (APN 419-140-057)

Mayor Pingree announced the procedural requirements that would be followed during the public hearing.

Mayor Pro Tem Wallace announced she had met with Bob Walter from Sun Lakes on February 10th and the project developers around November 10th to ask questions about the project.

Council Member Hamlin announced she had met with Josh Zemon on October 18th via Zoom, November 10th and January 19th.

Council Member Happe announced he had met with the applicant (representatives from both Creation Equity and Urban Crossroads) on January 7th and January 19th.

Council Member Sanchez announced he had not met with the applicant or appellants, but has received a lot of emails and public comment.

Mayor Pingree announced he met with the applicant on November 10th and around January 13th.

All members of the City Council said that the information learned in these meetings was already included in the staff report. They brought no predetermined bias and had not made up their mind regarding the determinations they would be considering tonight.

Adam Rush, Community Development Director, presented the staff report.

Mayor Pingree announced a recess at 6:28 p.m. The meeting resumed at 6:40 p.m.

Applicant Presentation
Josh Zemon of Creation Equity presented on behalf of the project applicant.

Appellant Presentation
Gabriel Ross of Shute, Mihaly & Weinberger LLP presented on behalf of the appellant, Pass Area Action Group.

Public Testimony

- Alphonso Sanchez spoke in support of the project.
- Juan Serrato spoke in support of the project.
- Alex Zamora spoke in support of the project.
- Richard Licerio spoke in support of the project.
- Jose Radillo spoke in support of the project.
- Bill Quisenberry spoke in support of the project.
- Ralph Velador spoke in support of the project.
- Efrain Lopez spoke in support of the project.
- Virginia Cervantes (Regina?) spoke in opposition to the project.
- John Ramey spoke in opposition to the project.
- Randy Robbins spoke in opposition to the project.
- Ken Johnson spoke in opposition to the project.
- Jim Thurow spoke in opposition to the project.
- Bonnie Mitchell spoke in opposition to the project.
- Bill Hobbs spoke in opposition to the project.
- Lynette Smilac spoke in opposition to the project.
- Ron Pitts did not speak to the project.
- Diane Berley spoke in opposition to the project.
- Paul Perkins spoke in opposition to the project.
- William McNees-Smith spoke in opposition to the project.
- Howard Katz spoke in opposition to the project.
- Brown Bruce spoke in opposition to the project.
- Marian Putnam spoke in opposition to the project.
- Charles (Michael) Volz spoke in opposition to the project.
- Beverly Rashidd spoke in support of the project.
- Vickie Sellers spoke in support of the project.
- Bob Messier spoke in opposition to the project.

Mayor Pingree announced a recess at 8:03 p.m. The meeting was reconvened at 8:18 p.m.

- Anita Chatigny spoke in opposition to the project.
- Susan Knepper-Moore spoke in opposition to the project.
- Juanita Diaz spoke in support of the project.

Speakers Jim Johnson and Tom Leamy had left the meeting before they were called to speak.

- Sheri Flynn spoke in opposition to the project.
- Dave Getka spoke in opposition to the project.
- Ann Oliver spoke in opposition to the project.
- Gregg Schafer spoke in opposition to the project.
- Bob Walter spoke in opposition to the project.

- Hebe Tabachnik spoke in opposition to the project.
- Daniel Rappelhofer spoke in opposition to the project.
- Virginia DeBry spoke in opposition to the project.
- Lilly Aguilera spoke in opposition to the project.
- Liliana Hollmann spoke in opposition to the project.
- Ken Fazekas spoke in opposition to the project.
- Richard Meltard spoke in opposition to the project.
- Jose Garcia spoke in support to the project.
- Jayson Baiz spoke in support to the project.
- Thomas Ruiz spoke in support to the project.
- Joanne Graham spoke in opposition to the project.
- Corinne Marshall said she was neutral on the project, but she thought it was a lightning rod for other issues.
- Kathleen Aranda spoke in opposition to the project.
- Kathleen Dale spoke in opposition to the project.
- Karen Amirson spoke in opposition to the project.
- Laura Leindecker said she was neutral on the project but that the city needed development.
- Ron Roy spoke in opposition to the project.

Deputy City Clerk Patton announced that the city had received seven items of correspondence since the agenda was published. Comments received included:

- Letter from Urban Crossroads (Applicant's CEQA consultant) – Received 2/15/2022
- Letter from Shute, Mihaly & Weinberger, LLP (Representing Appellant) – Received 2/16/2022
- Allen Matkins LLP Letter in Support – Received 2/16/2022
- Kathleen Dale Letter in Opposition – Received 2/17/2022
- Ron Roy Letter of Opposition – Received 2/17/2022
- Prejext CEQA Consultant Response to Comments – Received 2/17/2022

Additional written comments following Public Comment included:

- Ron Pitts Public Comment in Opposition – Submitted in Meeting 2/17/2022
- Paul Perkins Public Comment in Opposition – Submitted in Meeting 2/17/2022

Appellant Rebuttal
Gabriel Ross provided a response to comments made in public testimony on behalf of the appellant.

Applicant Rebuttal
Josh Zemon and project consultants responded on behalf of the applicant.

City Council asked questions of the applicant and staff regarding potential conditions of approval.

Mayor Pingree announced a recess at 10:39 p.m. The meeting was reconvened at 11:00 p.m.

Mayor Pingree closed the public hearing at 11:23 p.m.

Motion to approve the Resolution 2022-14 as amended with three added conditions of approval:

- **Divide Condition 11 into two parts. Existing Condition 11 is retitled 11b, and an additional section be added to be titled 11a, which will read "Prior to the issuance of the Temporary Certificate of Occupancy for the warehouse building the developer shall install all landscaping specified for the retail service district pursuant to city approved landscape plans."**
- **Update Condition 103, to read, "The developer shall pay for and install traffic signal preemption devices on up to 5 traffic signal intersections from and including Ramsey/Highland Springs to Sun Lakes Boulevard/Highland Springs, not to exceed the cost of $100,000. The applicant shall coordinate these efforts with both the City of Banning and Beaumont."**
- **Additional requirement that the applicant contribute an amount equal to the Development Impact Fee (DIF) payment for the development, $175,000, to go toward a fire apparatus for a future fire station in the area.**

Motion by Council Member Sanchez
Seconded by Mayor Pro Tem Wallace

COUNCIL MEMBER	YES	NO	ABSTAIN	RECUSE	ABSENT

Subject: City Council Special Meeting 2/17/22 - Comments
Attachments: 021722_CComments.pdf

Good morning - please share the attached comments with each Council member and appropriate City staff.

Please ensure that these comments are included in the project record.

Thank you,

Kathleen Dale
Resident and Property Owner, District 4

It is abundantly clear from what has transpired over the course of the hearings for this project that this Council and City administration are seriously disconnected from the community. Even if you can dismiss the emotional pleas you have heard from scores of community members, your decision must be based upon evidence and facts in the record before you. THE SIMPLE FACT IS THAT YOU MAY NOT APPROVE THE DEVELOPER'S PROJECT AS PRESENTED ON THE BAISIS OF THE RECORD BEFORE YOU.

The following is by no means an exhaustive listing of all that is wrong with the record before you, but it is enough to demonstrate that if you want to accommodate the developer's request, you must first amend the Specific Plan, amend the City's Commercial Vehicle Routes (Resolution 2005-91), and conduct an environmental analysis that adequately addresses and mitigates project impacts.

Supporting facts:

1. **The proposed project conflicts with substantive requirements of the Sun Lakes Village North Specific Plan**.
    a. Key excerpts from the Specific Plan are provided on page 5 for your convenience. The Specific Plan is only 41 pages and each of you should take the time to read and digest it before taking any action on development of this site.
    b. Circulation. There is not an exhibit that clearly depicts the proposed parcel boundaries in the current agenda package or any of the prior agenda packages. Based upon language within the staff report, the public can only assume that the proposed parcel configurations conform to the land use designation boundaries under the specific plan (see Figure 2, page 4 of the staff report). The circulation design for the warehouse has usurped the intended access for the Office and Professional District, which besides being in conflict with specific plan provisions requiring truck access to be limited to the Business and Warehouse District, effectively landlocks this parcel.
    c. Pedestrian Circulation. The expansive foot print of the warehouse building, associated slopes, and the use of the intend access to the Office and Professional District for truck circulation preclude any reasonable implementation of the fundamental concept within the Specific Plan for pedestrian interconnection between the three land use districts. The landscaping plan on page 24 of Attachment 5 of the staff report provides a good overview of the site plan that illustrates the complete lack of consideration for this key specific plan provision.
    d. Phasing. Specific Plan provisions at Section 4.7.1 clearly provide that the retail uses along the Sun Lakes Boulevard frontage are to go in first. The proposed reversed phasing with this project is in direct conflict with the Specific Plan.

e. Screening. The conclusory statements in the staff report regarding the effects of landscaping and the future retail buildings in screening the proposed massive warehouse must instead be supported by substantial evidence. This could take the form of illustrative diagrams depicting lines of sight from key perspectives and/or an on-site framework erection (as is used within coastal communities to understand building mass and visibility). Analysis must take into effect comparative finished grades, including that the truck drive adjacent to The Lakes development is 10 feet above that existing facility, and that finished grades for the warehouse pad are up to 10 feet above existing Sun Lakes Boulevard.

f. Screening. The plans for the warehouse building incredulously include a 14-foot concrete screen wall along the truck docks where they face the railroad and freeway, but a 6-foot open metal fence where the truck docks face Sun Lakes Boulevard (see plan sheet DAB A1.6, page 7 of staff report Attachment 5). Even if the future retail buildings would ultimately provide effective screening, how on earth will a six-foot open fence provide screening in the interim?

g. Screening. The plans before you include no landscape buffer adjacent to The Lakes development (recall that the warehouse truck drive at this common boundary is perched 10 feet above them). See the landscaping plan on page 24 of Attachment 5 of the staff report.

2. The CEQA analysis presented for your consideration does not take key project characteristics into consideration

a. Analyses for aesthetics, air quality and noise does not appear to take into consideration the relative grade of the source and receptors, namely that the trucks along the eastern access drive are 10 feet above the adjacent receptors.

b. Analyses for air quality and noise does not appear to take into consideration the design change that pushed the truck access for the warehouse out onto the access panhandle for the Office and Professional District and closer to sensitive receptors (see Exhibit C, page 11 of 2/10/22 air quality memo and Exhibit 8-A, page 36 of 2/7/22 noise study report).

c. Exhibit 6 on addendum page 69 and Exhibit 7 on addendum page 71 suggest that attenuation effects for a 6-foot wall along the edge of The Lakes development have been considered in the noise analysis – how can such a wall provide any such attenuation when the finished grade on the truck access road is above the top of the wall?

d. Analysis for air quality and noise appears to erroneously characterize the nature of outdoor use areas for residential receptors across Sun Lakes Boulevard (assumes no outdoor yard areas oriented toward the road; see page 10 of 2/10/22 air quality memorandum).
e. Analysis of biological impacts does not address the narrow endemic plant species of concern, which are correctly Marvin's Onion and Many-stemmed dudleya (verifiable with interactive mapping tool on Western Riverside County Regional Conservation Agency website).
f. Analysis of biological impacts does not address the riverine/riparian resources on the site.
a. The feasibility of the temporary noise barrier noted in Mitigation Measure NOI-1 on page 67 of the addendum must be demonstrated. Slopes and grade differentials at the interface with The Lakes facility suggest it is not likely a temporary noise barrier could be effectively erected. If this is the case, construction noise impacts would be unavoidable and significant and would trigger the requirement for a subsequent EIR.
b. The resolution presented for your approval claims that Condition of Approval 2 pulls forward all applicable mitigation measures from the prior specific plan EIR (see item F on page 4). No such condition is apparent in the conditions appended to the resolution posted with the staff report.

3. The intended CEQA compliance vehicle for this project only became evident with release of the City Council agenda a few days ago

Prior to issuance of public notices for this hearing sometime between February 1, 2022 and February 4, 2022, notices and staff reports had only disclosed that staff had done a consistency analysis and that a Notice of Determination had been prepared for Planning Commission and City Council consideration. No documentation associated with the purported staff consistency analysis was made available to the public, nor does it appear to have been provided to the Planning Commission, or the City Council until a few days ago. It was only with the release of the agenda packet a few days ago that the 686-page addendum finally surfaced. The fundamental omissions with the applicability of an addendum in this circumstance aside, that document is only dated February 10, 2022, including some of the supporting technical analysis! Even if the City is not required to provide public review for an addendum, how on earth did the Planning Commission consider this information, how on earth has the Council had time to independently review it, and how on earth did the City release a public notice relying on this document before it even existed?

4. **City zoning and General Plan designations**
   The General Plan and Zoning exhibit included as page 28 of Attachment 5 to the staff report depicts land use designations that are the reverse of those in the Specific Plan – namely a Business Park designation is depicted adjacent to Sun Lakes Boulevard and a General Commercial designation is depicted adjacent to the freeway. This fundamental discrepancy in the City's plans must be resolved.
5. **Commercial vehicle routes**
   The City has designated certain streets in the city for use by heavy trucks by means of Resolution 2005-91. A copy of the current map is attached for your convenience. Please note that Sun Lakes Boulevard is not a designated commercial vehicle route.

Sun Lakes Village North Specific Plan (Amendment 5) Excerpts

Section 2.2-1 – Semi-truck access is to be limited to the Business and Warehouse District.

Section 2.2.5 – on-site pedestrian circulation to connect the three districts and facilitate employee access to restaurants and retail uses. Repeated in Section 3.2.1, item 4; Section 3.2.5, item 5; Section 3.2.6, item 5; and Section 3.2.7, item 3.

Section 3.2.1, item 2 – provide a connected internal drive aisle linking the Retail & Service District to the Office & Professional District entry road to allow greater passenger vehicle access. Repeated in Section 3.2.6, Item 2 and Section 3.2.7, item 8.

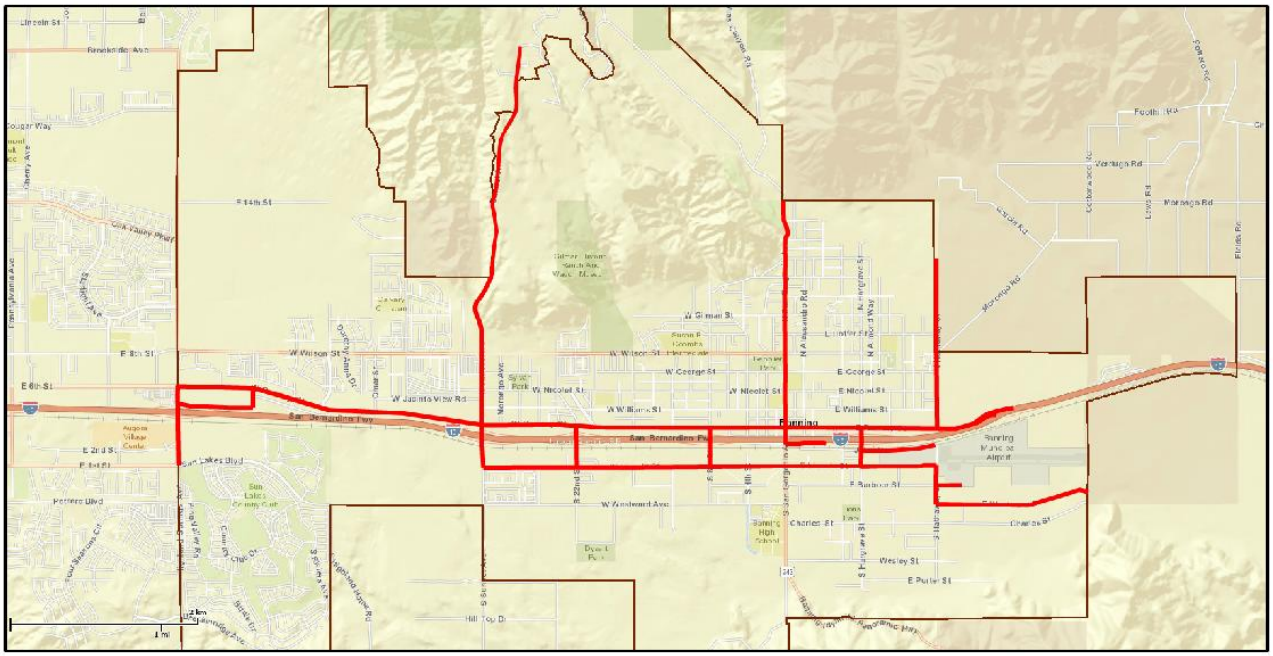
Section 3.2.1, item 5 – stormwater management facilities are to be developed as landscaped features that integrate with onsite pedestrian circulation system.

Section 3.2.1, item 7 – drive aisles are to be design to minimize conflicts with pedestrian movements.

Section 3.2.2, item 4 – provide enhanced architectural detail for Business Park & Warehouse District building elevations visible from Sun Lakes Boulevard.

Section 3.2.3, item 7 - locate, grade, and design projects to direct stormwater runoff from building roofs and paved areas into swaled landscape areas that serve a dual purpose of retention/infiltration as well as a visual amenity.

Section 3.2.4, item 2 - locate, design, and/or screen truck courts, dock doors, and truck parking areas so they are not visible from Sun Lakes Boulevard. Ensure that these areas are concealed while in use, including the tops of truck trailers. Repeated in Section 3.2.5, item 4.



Section 3.2.4, item 3 - use evergreen screen trees along with shrubs and groundcover to create a 20-foot-wide landscape buffer along the northeastern Specific Plan boundary adjacent to the existing residential parcels. Select tree species and size to ensure a solid tree screen above the existing wall within one year. Repeated in Section 3.2.6, item 4.

Section 3.2.7, item 4 - provide clear and well-designed pedestrian access to buildings from the street, parking lot, and Specific Plan pedestrian circulation system through careful building siting, circulation design, decorative hardscape, and landscaping.

Section 4.6.2 - Specific Plan Amendments are required when proposed changes to text or exhibits significantly alter the intent or development concepts of the Specific Plan. Specific Plan Amendments shall be processed in the same manner as the original Specific Plan approval, which includes review by the Planning Commission and adoption by the City Council.

Section 4.7.1 - construction of development and improvements within the Retail & Service District shall be completed prior to occupancy of development within the Business & Warehouse District.

Resolution No. 2005-91 Commercial Vehicle Routes

Subject: Banning Point warehouse project

Follow Up Flag: Follow up
Flag Status: Completed

I am opposed to allow a truck warehouse in this location. Senior resident communities. Sun Lakes, Four Seasons,and the Lakes Memory care facilities.

You are seeing before you this evening a group of people that have expressed a concern about this project and future projects that will effect our City.

You the City Council need to investigate all areas of what is presented to you to vote on. This means you need to go beyond what is stated by staff to you. This means that information presented may be incorrect or slanted to be made acceptable. I understand that READING all the attachments is time consuming but is necessary to be successful as a Council Member.

If a problem is presented do not through it away, ask for an explanation that is believable.

It is time for the City Council start asking your voters what they want, not what you want or the City Staff wants. I believe you are blocking the will of the Community which makes you out of touch. You are becoming Autocratic, instead of Democratic.

Thank You

Paul Perkins

Exhibit B - Written Public Comment

2/17/2022 Recd CP

Good Evening Mayor, City Council, Staff and Residents of Banning,

My name is Ron Pitts; my Wife's Name is Bobby Pitts. We are residents in District 3 and are respectfully asking for the recusal of Council Member Hamlin in the Banning Point Warehouse vote tonight and are further asking for her resignation as City Council member for District 3 immediately. In addition to the evidence that the lawyer for the Pass Action Group submitted of bias in favor of the Banning Point warehouse project the following additional reasons are provided.

1. Council Member Hamlin has received over 100 emails from concerned citizens asking her to vote NO on this project. She forwarded those emails to city employees like Adam Rush but then forwarded those same emails to Josh Zemon (managing principal, creation equity (developer)), some to Phil Lomardo (Cushman & Wakefield, leasing broker for this project) and some to her public relations company, OPRUSA, often times complaining that she is receiving and I quote "another one." Or "Another one from someone who doesn't understand…"

2. On several occasions she has sent Sun Lakes and Pass Action Group Facebook postings that are private Facebook pages to these same individuals who have no access to them "warning " them of comments and actions i.e. protests, hiring of lawyers, what the Sun Lakes HOA is thinking about, etc. For example and I quote

"This is what is being spread around the community. There are ads in the newspaper, letters to the editor and articles in our community magazine. They are raising funds to sue the City and possibly the developers. You have a real battle on your hands." Or

"I hope I'm not bugging you, but I feel you need to know. These posts are from private groups that only Sun Lakers can see. I want to keep you updated on the "chatter".

3. By her actions and comments she no longer represents the Citizens of District 3 but feels it is her duty to keep the developers and their vendors informed about what her constituents are doing to stop this atrocity. Her numerous emails to the developers (over 100) show that her concern is ensuring the project goes through as planned. And again I quote from emails between the Council Member and Creation Equity.

"Josh
Congratulations on passing the first hurdle with the Planning Commission. As you saw, my constituents are extremely upset with me and don't understand that there was nothing I could do. It was not presented to the Council for a vote - yet. I am sure the group will appeal but probably have no legal grounds to stop the project." Email to Josh Zemon (Creation Equity dated Dec 2, 2021.) (Day after planning commission vote to approve.)

"Josh
I guess your company needs an aggressive campaign to correct the misinformation, speculations, rumors, and fears about the Banning Pointe project. Maybe some sort of handout with the facts might be helpful.

Mary" Email dated 13 Dec 2021@10:30am

4. Her Constituents have no trust in her ability nor do they believe that she can represent them in the future. She even believes this, as on multiple emails she has made the same statements. From the same email above to Josh Zemon (Creation Equity dated Dec 2, 2021.):

"I need to do some damage control. A building is just a building until someone occupies it. I would like to be seen and being involved in finding suitable businesses to occupy the property.
I know that I can't control who leases the property, but if I can be perceived as being part of the selection process, it might go a long way to repair the negativity. "

Not only does this particular email show what she believes is a lost of trust from the Constituents of District 3 but also shows her complete bias for voting "Yes" prior to the tonight's hearing on the appeal before the council.

Here is another example in he own words: "I know. All I tried to do is give the facts. When that sign was put up and they heard the word "warehouse" the panic set in. Their ears are closed and their mouths are open.
Now my reputation is ruined. People I have known for 14 years won't speak to me. Some are calling for me to resign, sell my home and move. There is even a recall movement. It's become a nightmare." Email dated 11/29/2021 to Josh Zemon. This seems to enough of a nightmare that she has hired a Public Relations firm (OPRUSA) to repair her reputation, but even with that the voters in her district are organizing a recall campaign because they do not believe or trust her.

5. Mary Hamlin has had several "off the record" meetings with the developers and their representatives. I'm sure they are just "fact" finding but from a perception point of view, individuals (Mr. Santana) have been remove from their positions for far less. Again according to emails between the Leasing Broker for the project and the Council Member:

Council Member Hamlin meet with Phil Lomardo 6 Dec 2021@ 2:00 pm at Starbucks in Barnes and Noble Citrus Plaza, Redlands to discuss working with Cushman and Wakefield in assisting to choose the tenants for the warehouse.

Or email exchange between Josh Zemon and Mary Hamlin:
"Hi Councilwoman Hamlin – can we plan on 12:00pm PT on 11/10? Location TBD, maybe lunch at a local Banning restaurant? Please let me know and I will circulate an invite.
Thank you,
Josh

"12 noon on the 10th will work for me.
Mary Hamlin"

"Did you decide on a location for Wed? I would vote for Russo's since Station Tap House is owned by a member of the City Council.
Mary Hamlin

Sent from my iPhone"

Based on the above and over 100 emails between Council Member Mary Hamlin, Josh Zemon of Creation Equity (the developers) and their representatives, her bias in favor of this project both by deeds and written word under both State and Local Law require her to recluse herself from consideration of this project, the perception of wrong doing and the most important point the lost of Trust and belief that she can not nor will she represent the Constituents of District 3 in the future. We ask that she recluse herself from the vote and resign her position as Council Member for District 3 tonight.

Thank You

SUPERIOR COURT OF THE STATE OF CALIFORNIA

COUNTY OF RIVERSIDE, RIVERSIDE HISTORIC COURTHOUSE

PASS ACTION GROUP, Petitioner and Plaintiff, v. CITY OF BANNING; CITY COUNCIL OF THE CITY OF BANNING; and DOES 1-20, Respondents and Defendants.	Case No. CVRI2201482 **~~[PROPOSED]~~ JUDGMENT** Dept.: 1 Judge: Hon. Harold W. Hopp Action Filed: April 18, 2022 Trial Date: March 13, 2024
SUN LAKES HIGHLAND, LLC; CREATION EQUITY, LLC; and DOES 21-40, Real Parties in Interest.	

Petitioner and Plaintiff Pass Action Group ("Petitioner") challenged the City of Banning's February 17, 2022 adoption of Resolution 2022-14, which approved (1) Tentative Parcel Map No. 38164, (2) Design Review 21-7008, and (3) an Addendum and related findings pursuant to the California Environmental Quality Act ("CEQA") for the Banning Point Project.

The hearing on Petitioner's Verified Petition for Writ of Mandate and Complaint for Injunctive Relief ("Petition") in this matter was held on March 13, 2024 before the Honorable Harold W. Hopp in Department 1 of the Riverside County Superior Court. Kevin P. Bundy and Orran G. Balagopalan of Shute, Mihaly & Weinberger LLP appeared on behalf of Petitioner.

Ginetta L. Giovinco of Richards, Watson & Gershon appeared on behalf of Respondents and Defendants City of Banning and City Council of the City of Banning. Paige H. Gosney of Allen Matkins Leck Gamble Mallory & Natsis LLP appeared on behalf of Real Parties in Interest Sun Lakes Highland, LLC and Creation Equity, LLC.

On March 15, 2024, having reviewed the administrative record, Petitioner's request for judicial notice, the briefs and papers submitted by counsel, and the arguments of counsel, and the matter having been submitted for decision, the Court issued its Ruling on Matter Submitted ("Ruling"), attached hereto as Exhibit A and incorporated herein.

IT IS HEREBY ORDERED AND ADJUDGED that:

1. The Petition is granted for the reasons and to the extent set forth in this Court's March 15, 2024 Ruling.

2. A peremptory writ of mandate ("Writ") directed to Respondents and Defendants shall issue under seal of this Court:

a. Ordering Respondents and Defendants to set aside and vacate all approvals for the Banning Point Project in which City Council Member Mary Hamlin participated, including Resolution 2022-14, Tentative Parcel Map No. 38164, Design Review 21-7008, and the Addendum and related CEQA findings for the Banning Point Project, within 90 days; and

b. Instructing Respondents and Defendants that any future hearing reconsidering approval of the Banning Point Project must be conducted without the participation of the biased council member.

3. Respondents and Defendants shall file and serve an initial return to the Writ no later than 120 days after service of the Writ or as otherwise agreed by the parties. The return shall specify the actions taken to comply with the terms of the Writ. Respondents and Defendants may file supplemental returns to the writ as necessary to apprise the Court of any further actions taken to comply with the Writ.

4. For purposes of cost recovery, Petitioner is the prevailing party. Petitioner may apply to recover its costs in an amount to be determined by this Court pursuant to a timely filed

and served memorandum of costs, subject to any timely filed and served motion to tax costs. (Cal. Rules of Court, rule 3.1700.)

5. This Court shall retain jurisdiction to consider a motion by Petitioner for an award of reasonable attorneys' fees pursuant to Code of Civil Procedure, section 1021.5 and California Rules of Court, rule 3.1702.

The Clerk is ordered to enter this Judgment.

DATED: 4/3, 2024

PASS ACTION GROUP vs CITY OF BANNING

Honorable Harold W. Hopp, Judge
E. Escobedo, Courtroom Assistant
Court Reporter: None

APPEARANCES:
No Appearances

Court subsequently rules on matter taken under submission on: 03/13/2024 for Hearing on Writ of Mandate (CEQA).
-
Petitioner Pass Action Group brings this action challenging the approval of the Banning Point Project, which it alleges violates CEQA, petitioner's and the public's right to a fair hearing, planning and zoning laws, and the Banning Municipal Code. The Banning Point Project (the Project) includes a tentative parcel map and design review authorizing the subdivision of the site and construction of a warehouse of approximately 620,000 square feet, 10,000 square feet of office space, and 150,000 square feet of high-cube cold storage and six retail buildings comprising 34,000 square feet. The property that would be subject to the development is 47 acres of undeveloped land in the City of Banning. Respondents are the City and its City Council. Real party is Sun Lakes Highland, LLC and Creation Equity, LLC. Petition, ¶¶s 14 to 18.

Right to a Fair Hearing. The petition and complaint raise four issues. First, that three members of the City Council participated in the discussion and approval of the Project despite having made comments allegedly showing bias in favor of it, violating Petitioner's and the public's right to a fair hearing.

"Quasi-judicial or "administrative" hearings are subject to the fair process requirements of California Code of Civil Procedure section 1094.5(b) and, when a vested property or liberty interest is implicated, to the due process requirements of both the federal and state constitutions." The California Municipal Law Handbook (Cal. CEB 2023) § 2.56 citing Today's Fresh Start, Inc. v Los Angeles County Office of Education (2013) 57 Cal.4th 197, 212. "The decision-maker must be fair and impartial." Id. citing, Woody's Group, Inc. v. City of Newport Beach (2015) 233 Cal.App.4th 1012,

1027 (invalidated city council decision on appeal of land use application when council member appealing planning commission decision showed bias and violated local procedures); Golden Day Schools v. Dept. of Education (2000) 83 Cal.App.4th 695, 709 ("initial decision-maker may not sit on review board"). "Fair process and due process require both actual fairness and the appearance of fairness." Id., citing Nightlife Partners, Ltd. v. City of Beverly Hills (2003) 108 Cal.App.4th 81, 94 ("due process violation when lawyer, advocate for defendant city, later acted as advisor to the judge of administrative appeal").

"Comments made by an agency member before hearing may constitute evidence of an unacceptable probability of actual bias such that the member could not act as a 'reasonably impartial, non-involved reviewer.'" Id., citing Nasha v. City of Los Angeles (2004) 125 Cal.App.4th 470, 484. "A personal interest or involvement in the outcome of a matter, or with any participant, that is unrelated to the merits requires disqualification." The California Municipal Law Handbook (Cal. CEB 2023) § 2.167; see Mennig v. City Council (1978) 86 Cal.App.3d 341, 351. "This rule does not preclude holding opinions, philosophies, or strong feelings about issues or specific projects; it also does not proscribe expression of views about matters of importance in the community, particularly during an election campaign." Id. City of Fairfield v. Superior Court (1975) 14 Cal.3d 768, 780-782. "The decisionmaker's actions, however, must not 'cross the line into advocacy' for or against a project." Id., citing Petrovich Development Co., LLC v. City of Sacramento (2020) 48 Cal.App.5th 963, 974. Proof of actual bias is not necessary; "it is sufficient to invalidate a decision if 'an unacceptable probability of actual bias' by the municipal decision-maker is established." Id., citing Woody's Group, 233 Cal.App.4th at 1022.

"There is a presumption that administrative adjudicators are unbiased. In the absence of financial or other personal interest, and when rules mandating an agency's internal separation of functions and prohibiting ex parte communications are observed, the presumption of impartiality can be overcome only by specific evidence demonstrating actual bias or a particular combination of circumstances creating an unacceptable risk of bias." Id., citing Morongo Band of Mission Indians v. State Water Resources Control Board (2009) 45 Cal.4th 731, 741; Petrovich, 48 Cal.App.5th at 973 ("requiring 'concrete facts' establishing bias"). "The party asserting bias has the burden of establishing a disqualifying interest." Id., citing Sweeney v. California Regional Water Quality Control Board (2021) 61 Cal.App.5th 1093, 1144.

Petitioner contends that three council members made statements demonstrating bias. The Court finds that they have met their burden as to one of the three.

Council member Mary Hamlin emailed Petitioner's president, stating that "project appears to be good for the whole community and in the long run will lift the entire community." AR 13051. The email included an attached information sheet that stated the project would have a positive impact on new housing, new businesses and continued growth that would "far outpace" any adverse impact on property values. AR 13054. The information sheet indicated that it would be a mistake for the City to deny approval. AR 13051, 13054. Council member Hamlin also distributed a document on the second day of a Planning Commission hearing on the Project. The document stated that the Project was not a "distribution center" and would have only three large trucks per hour, that she would have opposed it if the Project were a distribution center with hundreds of trucks. AR 17080-17085. In fact, the project is anticipated to have as many as 296 truck trips per day. AR 592. The following day, Hamlin emailed the managing principal of Real Party Creation Equity, congratulating him on the Planning Commission's approval. AR 19736. She asked to be involved in leasing discussions for the project to do damage control and "repair the negativity" to her reputation with constituents. AR 19723-19736. The following week, she further suggested contacting a reporter to correct the record and help her repair her damaged image. AR 17615.

Council member Alberto Sanchez twice posted to social media commenting favorably on the Project before the City Council held a hearing. One post called the Project "great," bringing jobs and tax revenue, reducing homeless population and that that retail aspect "looks great as well." AR 13056. Another added that traffic is being mitigated and that this would be growth, which Banning residents want. AR 19728.

Council member Colleen Wallace, then Mayor, gave a state of the city address in October, 2021, stating that building in Banning is needed to encourage children who grew up in Banning to return and invest. AR 13042-13043.

Council member Sanchez moved for approval of the Project and council member Wallace seconded the motion. However, even with that context, their statements do not overcome the presumption that

they are unbiased. There has been no showing of a financial or personal interest in the Project and no specific evidence demonstrating actual bias or a particular combination of circumstances creating an unacceptable risk of bias, in the language used by the Court in the Morongo Band of Mission Indians case. 45 Cal.4th at 741.

Councilmember Hamlin, however, demonstrated a personal interest in the success of the Project, rehabilitating her reputation with her constituents. Further, her statements clearly advocate a position in favor of the Project. She not only made statements in favor of the Project, she circulated information that inaccurately understated the number of truck trips the Project would generate, contrary to the final traffic study. AR 592. She stated that the warehouse was not a distribution center but was more like an industrial office building, which is clearly incorrect. AR 13052. While review of the Project was pending, she asked to be involved in leasing discussions. She encouraged the principal of Creation Equity to seek positive press releases and to engage in an "aggressive campaign" to support the Project. AR 17615, 19742. These actions are similar to the "coaching" found in Petrovich, 48 Cal.App.5th at 974-976 (council member took affirmative steps to assist project proponents, acting as an advocate, not as a neutral). That she stated at the hearing that she was unbiased and ultimately voted against its approval does not show her to be unbiased.

City of Fairfield, on which the City relies, is a different situation. As the Supreme Court noted, the "proceedings did not turn upon the adjudication of disputed facts" or applying standards to facts, "the few factual controversies were submerged into the overriding issue of whether the construction of the shopping center would serve the public interest." 14 Cal.3d at 779-780. Moreover, many of the statements made by council members in City of Fairfield were made during election campaigns. The Supreme Court stated that such statements "do not disqualify the candidate from voting on matters which come before him after his election." 14 Cal.3d at 781.

These factors are not present here. The City Council was making a determination as to whether the facts required a subsequent or supplemental Environmental Impact Report or whether an addendum to the Project Environmental Impact Report would be sufficient. Council member Hamlin's statements were not made during an election campaign. Her participation in the City Council's discussion and decision to approve the Project requires the Court to grant the petition. Woody's Group, Inc., 233 Cal.App.4th at 1031 (remedy for participation of biased council member is to grant writ and send

matter back to city council with instructions to reconsider the matter without the participation of the biased council member).

Although the Court is not required to go farther, having found sufficient basis to grant the writ, it will briefly explain its view on the remaining issues. In summary, it does not find that Petitioner has carried its burden of proof on any remaining issue and would not grant the writ but for the fair hearing issue.

There was substantial evidence to support the Council's decision not to prepare a supplemental EIR. Petitioner contends that the City failed to comply with CEQA because it merely prepared an addendum to the Program EIR and did not prepare a supplemental or subsequent EIR for the Project addressing cumulative impacts from the Project and the Sunset Crossroads project, which is currently under environmental review. The Sunset Crossroads project would include 5.5 million square feet of warehouse space and would be located not far from the Project.

Whenever a further discretionary approval by the lead or responsible agency is required for a project for which an EIR or a negative declaration has been certified or adopted, the agency has to consider whether a subsequent or supplemental EIR should be required for that further approval. Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) § 19.2. "To give a degree of finality to the results, CEQA includes a presumption against requiring any further environmental review once an EIR has been prepared for a project." Id., citing Cal. Pub. Res. Code § 21161; Friends of the College of San Mateo Gardens v. San Mateo County Community College District (2016) 1 Cal. 5th 937, 949; see also CEQA Guidelines § 15162.

As the court explained in the leading case of Bowman v. City of Petaluma (1986) 185 Cal.App.3d 1065, 1073: "[S]ection 21166 comes into play precisely because in-depth review has already occurred, the time for challenging the sufficiency of the original EIR has long since expired [§21167(c)], and the question is whether circumstances have changed enough to justify repeating a substantial portion of the process." Once a project has been approved, no additional steps to comply with CEQA are required, unless a further discretionary approval of the project is necessary. Id. citing Martis Camp Community Ass'n v. County of Placer (2020) 53 Cal.App.5th 569, 604. New information appearing after a project approval does not require that the approval be reopened (CEQA Guidelines

§ 15162(c)), but if another discretionary approval is needed, "the agency considering that approval must determine whether further CEQA review is required due to changes in the project, changes in circumstances, or new information." Id. citing CEQA Guidelines § 15162(a), (c); Willow Glen Trestle Conservancy v. City of San Jose (2020) 49 Cal.App.5th 127, 131.

There are three formats available to add to or amend the EIR depending on the circumstances. If major changes are required to make a previous EIR adequate, a subsequent EIR is required. Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) § 19.4.

A supplemental EIR may be prepared by the agency if any of the conditions requiring a further EIR exist, "but only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation." Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) §19.5; CEQA Guidelines §15162(a). CEQA Guidelines do not define "minor additions or changes" however, a supplement only has to have the information necessary to make the previous EIR adequate. Id.; CEQA Guidelines §15163(b). "Thus, an EIR supplement need respond only to the project changes, changes in circumstances, or new information that triggered the need to prepare a further EIR …." Id. The discretionary decision to prepare a supplemental EIR as opposed to a subsequent EIR "is tested under a reasonableness standard, with the focus on 'the substance of the EIR, not its nominal title." Id.; City of Irvine v. County of Orange (2015) 238 Cal.App.4th 526, 540.

An addendum to a previously certified EIR must be prepared "when changes or additions to the EIR are necessary but none of the conditions in" CEQA Guidelines §15162 that trigger preparation of a subsequent or supplemental EIR have occurred. Kostka & Zischke, Practice Under the CEQA (CEB 2020-2021) §19.6; citing Friends of the College of San Mateo Gardens, 1 Cal.5th at 946. "Preparation of an addendum is thus a way to make minor corrections to an EIR without recirculating the EIR for further review." Id. at §19.6; CEQA Guidelines §15164(c). "An addendum may also be used to evaluate changes to a project, changes in circumstances, or new information, and to document the agency's determination that a subsequent or supplemental EIR is not required. Id.; CEQA Guidelines §15164(e). "The agency's decision-making body must consider the addendum along with the final EIR before making a decision on the project." Ibid.

Where the agency finds "that impacts resulting from changes to the project do not differ significantly

from those described in the prior EIR, a further EIR is not required." Id. at § 19.13 citing Bowman v. City of Petaluma (1986) 185 Cal.App.3d 1065, 1079 (following a change in access to a project site, an updated traffic report's conclusions were substantially identical to those in the original EIR, which were not considered substantial so, no further EIR was required); see Citizens Against Airport Pollution v. City of San Jose (2014) 227 Cal.App.4th 788, 802 (an addendum's analysis showing that noise and air pollution impacts from airport operations would decrease in the future, supported agency's determination that changes would not result in new significant impacts or substantially different impacts from what was described in prior EIRs); Fund for Environmental Defense v. County of Orange (1988) 204 Cal.App.3d 1538, 1548 (subsequent EIR not required for change in source of water for project because addendum to EIR concluded that impacts were same as those assessed in project EIR even though provider of water service changed).

There is no dispute but that the differences between the original project and the current version of the Project do not result in new significant environmental impacts. Indeed, the current version of the Project is significantly smaller than the original project.

Have there been substantial changes "with respect to the circumstances under which the project is being undertaken which would require major revisions to the environmental impact report"? Cal. Pub. Res. Code § 21166(b); CEQA Guidelines § 15612(a)(2) (adds "due to the involvement of new significant, environmental effects or a substantial increase in the severity of previously identified significant effects.") If there are such changes, a subsequent or supplemental EIR is required only if: 1) the change in circumstances is substantial; 2) the change involves new or more severe significant environmental impacts; 3) the change will require major revisions to the previous EIR on the new or more severe impacts; and 4) the impacts were not covered in the previous EIR. Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) § 19.14.

Third, has new information that "was not known and could not have been known at the time the environmental impact report was certified as complete" become available? Id. at § 19.18 citing Cal. Pub. Res. Code §21166(c). The CEQA Guidelines explain that the new information could not have been known with the exercise of reasonable diligence and must be of "substantial importance." Id. citing CEQA Guidelines § 15162(a)(3).

Petitioner argues that both the second (substantial changes to the circumstances under which the Project is being undertaken) and third (new information that could not have been known has become available) conditions exist because of the Sunset Crossroads project.

Petitioner asserts that three months after the PEIR was certified, the City issued a notice of preparation for thee Sunset Crossroads project. AR112944-12961. Sunset Crossroads involves over 500 acres and, as noted above, would include 5.5 million square feet of industrial/logistics use. AR 12944, 12950, 12956. It requires an amendment of the City's general plan for much of the acreage, a specific plan creating 19 distinct planning areas, a parcel map and vesting tract map, and a pre-annexation and development agreement. AR 12944-12945. The Sunset Crossroads would be about half a mile away from the Project at the closest point. The Sun Lakes senior community is between the projects. AR 8580, 12954. The Sunset Crossroads would include an extension of Sun Lakes Boulevard, which trucks from the Project could use to access the nearby freeway (although as City points out, there would be a much shorter access to the freeway without using the extension of Sun Lakes Boulevard).

Petitioner is correct, of course, that the PEIR and the addendum do not analyze the cumulative impact of the Project and Sunset Crossroads. However, City argues that Petitioner has not shown that the changed circumstances compel the conclusion that the significant environmental effects will be different or more severe than those previously identified and that "major revisions" to the PEIR are necessary. The Project is smaller—about 30 percent smaller—than what was contemplated by the PEIR. Would the Project have cumulatively considerable incremental effects? CEQA Guidelines § 15130(a). If not, the effect is not so significant as to require a subsequent or supplemental EIR. Id. If other projects by themselves would have significant cumulative impacts—something that is highly likely true for Sunset Crossroads—that "does not constitute substantial evidence that the proposed project's incremental effects are cumulatively considerable." CEQA Guidelines § 15064(h)(4).

City asserts that it relied on SCAQMD methodology in concluding that if the project-specific impacts exceed SCAQMD's local and regional thresholds of significance, only then would the impact be cumulatively considerable. The City determined that the Project would comply with the Air Quality Management Plan, and would not exceed regional or local significance levels. AR 135-138, 224-226, 5861, 2760.

City also argues that the Sunset Crossroads project is too uncertain to constitute a change in circumstances that would require assessing the cumulative impact of the Project and Sunset Crossroads.

To the extent that it is certain, the Sunset Crossroads project if approved would involve far more land, a much larger construction, and a general plan amendment, a specific plan creating 19 distinct planning areas, a parcel map and vesting tract map, and a pre-annexation and development agreement. It would no doubt have far more significant environmental impacts than the Project. If other projects by themselves would have significant cumulative impacts—which seems clearly the case here—that is not substantial evidence that the proposed project's incremental effects are cumulatively considerable. CEQA Guidelines § 15064(h)(4). Accordingly, the Court concludes that substantial evidence supported the City's decision not to include cumulative impacts from the Project and Sunset Crossroads in the environmental documents for the Project and to prepare an addendum instead of a supplemental or subsequent EIR for the Project.

Substantial evidence supported the City's project approval findings. Petitioner argues that there is no guarantee that the office and retail space that is to serve as a buffer between the existing housing and the warehouse element of the Project will be built in time to serve as a buffer and may never be built. City found the tentative map and design review consistent with the general plan and the specific plan amendment.

"Courts will defer to an agency's decision on consistency with its own plan unless, on the basis of evidence before the decision-making body, a "reasonable person" could not have found the project to be consistent." Kostka & Zischke, Practice Under the CEQA (CEB 2023) § 12.33 citing The Highway 68 Coalition v County of Monterey (2017) 14 Cal.App.5th 883, 896 (a determination of consistency between a project and a "general plan can be reversed only if it is based on evidence from which no reasonable person could have reached the same conclusion"); Clover Valley Foundation v City of Rocklin (2011) 197 Cal.App.4th 200, 239 ("no reasonable person would have determined that the project was inconsistent with the general plan").

Notably, perfect conformity between a project and the general plan is not required, only compatibility

with the general plan's objectives and policies is needed. That determination is subject to a highly deferential standard of review. It is Petitioner's burden to establish inconsistency. California Native Plant Society v. City of Rancho Cordova (2009) 172 Cal.App.4th 603, 638. The Court will not substitute its judgment for the City's; the City's determination "comes to this court with a strong presumption of regularity." Ibid. This is because courts recognize that "the body which adopted the general plan policies in its legislative capacity has unique competence to interpret those policies when applying them in its adjudicatory capacity" and "the governmental agency must be allowed to weigh and balance the plan's policies when applying them." Naraghi Lakes Neighborhood Preservation Assn. v. City of Modesto (2016) 1 Cal.App.5th 9, 18-19.

City's conclusion that the Project is consistent with the general plan and specific plan amendment is supported by substantial evidence. The City found that the Project will not unreasonably interfere with use and enjoyment of neighboring properties because the warehouse is to be built up against the I-10 freeway and the railroad away from residences; it will back up against Sun Lakes Village Shopping Center buildings away from residences to the south and east; and the retail and offices uses will provide screening/buffering from these residential uses "in the future." AR 81 (emphasis added by Petitioner.) However, as argued by the City, there is nothing in its findings that required the retail and office elements (R&S District) would be built before or concurrently with the warehouse or would change the findings if the retail and office space were developed later. That an alternative condition could be proposed to address Petitioner's screening concerns—requiring the landscaping—and was adopted supports the City's finding. City could and did find that landscaping is a reasonable alternative for buffering to the construction of the office and retail space.

Project does not conflict with the noise element of the general plan. Petitioner argues that the Project approval authorizes heavy truck use on Sun Lakes Boulevard, which violates the noise element of the general plan because that street is not designated as a truck route. Program 4.A provides that other than traffic providing location-specific services and deliveries, construction and delivery trucks are limited to designated truck routes, which does not include Sun Lakes Boulevard. The City is within its discretion to interpret its general plan. Naraghi Lakes Neighborhood Preservation Assn. v. City of Modesto (2016) 1 Cal.App.5th 9, 18-19. Its determination is within that discretion.

For the foregoing reasons, the Petition is granted in part. Petitioner to prepare a proposed Writ and to

---

circulate it in the manner required by Rule 3.1312 of the California Rules of Court.

Notice to be given by Clerk.
Minute entry completed.

SUPERIOR COURT OF CALIFORNIA, COUNTY OF RIVERSIDE

PASS ACTION GROUP vs CITY OF BANNING

Honorable Harold W. Hopp, Judge
E. Escobedo, Courtroom Assistant
Court Reporter: None

APPEARANCES:
No Appearances

Court subsequently rules on matter taken under submission on: 03/13/2024 for Hearing on Writ of Mandate (CEQA).
-
Petitioner Pass Action Group brings this action challenging the approval of the Banning Point Project, which it alleges violates CEQA, petitioner's and the public's right to a fair hearing, planning and zoning laws, and the Banning Municipal Code. The Banning Point Project (the Project) includes a tentative parcel map and design review authorizing the subdivision of the site and construction of a warehouse of approximately 620,000 square feet, 10,000 square feet of office space, and 150,000 square feet of high-cube cold storage and six retail buildings comprising 34,000 square feet. The property that would be subject to the development is 47 acres of undeveloped land in the City of Banning. Respondents are the City and its City Council. Real party is Sun Lakes Highland, LLC and Creation Equity, LLC. Petition, ¶¶s 14 to 18.

Right to a Fair Hearing. The petition and complaint raise four issues. First, that three members of the City Council participated in the discussion and approval of the Project despite having made comments allegedly showing bias in favor of it, violating Petitioner's and the public's right to a fair hearing.

"Quasi-judicial or "administrative" hearings are subject to the fair process requirements of California Code of Civil Procedure section 1094.5(b) and, when a vested property or liberty interest is implicated, to the due process requirements of both the federal and state constitutions." The California Municipal Law Handbook (Cal. CEB 2023) § 2.56 citing Today's Fresh Start, Inc. v Los Angeles County Office of Education (2013) 57 Cal.4th 197, 212. "The decision-maker must be fair and impartial." Id. citing, Woody's Group, Inc. v. City of Newport Beach (2015) 233 Cal.App.4th 1012,

1027 (invalidated city council decision on appeal of land use application when council member appealing planning commission decision showed bias and violated local procedures); Golden Day Schools v. Dept. of Education (2000) 83 Cal.App.4th 695, 709 ("initial decision-maker may not sit on review board"). "Fair process and due process require both actual fairness and the appearance of fairness." Id., citing Nightlife Partners, Ltd. v. City of Beverly Hills (2003) 108 Cal.App.4th 81, 94 ("due process violation when lawyer, advocate for defendant city, later acted as advisor to the judge of administrative appeal").

"Comments made by an agency member before hearing may constitute evidence of an unacceptable probability of actual bias such that the member could not act as a 'reasonably impartial, non-involved reviewer.'" Id., citing Nasha v. City of Los Angeles (2004) 125 Cal.App.4th 470, 484. "A personal interest or involvement in the outcome of a matter, or with any participant, that is unrelated to the merits requires disqualification." The California Municipal Law Handbook (Cal. CEB 2023) § 2.167; see Mennig v. City Council (1978) 86 Cal.App.3d 341, 351. "This rule does not preclude holding opinions, philosophies, or strong feelings about issues or specific projects; it also does not proscribe expression of views about matters of importance in the community, particularly during an election campaign." Id. City of Fairfield v. Superior Court (1975) 14 Cal.3d 768, 780-782. "The decisionmaker's actions, however, must not 'cross the line into advocacy' for or against a project." Id., citing Petrovich Development Co., LLC v. City of Sacramento (2020) 48 Cal.App.5th 963, 974. Proof of actual bias is not necessary; "it is sufficient to invalidate a decision if 'an unacceptable probability of actual bias' by the municipal decision-maker is established." Id., citing Woody's Group, 233 Cal.App.4th at 1022.

"There is a presumption that administrative adjudicators are unbiased. In the absence of financial or other personal interest, and when rules mandating an agency's internal separation of functions and prohibiting ex parte communications are observed, the presumption of impartiality can be overcome only by specific evidence demonstrating actual bias or a particular combination of circumstances creating an unacceptable risk of bias." Id., citing Morongo Band of Mission Indians v. State Water Resources Control Board (2009) 45 Cal.4th 731, 741; Petrovich, 48 Cal.App.5th at 973 ("requiring 'concrete facts' establishing bias"). "The party asserting bias has the burden of establishing a disqualifying interest." Id., citing Sweeney v. California Regional Water Quality Control Board (2021) 61 Cal.App.5th 1093, 1144.

CVRI2201482
PASS ACTION GROUP vs CITY OF BANNING

Honorable Harold W. Hopp, Judge
E. Escobedo, Courtroom Assistant
Court Reporter: None

Petitioner contends that three council members made statements demonstrating bias. The Court finds that they have met their burden as to one of the three.

Council member Mary Hamlin emailed Petitioner's president, stating that "project appears to be good for the whole community and in the long run will lift the entire community." AR 13051. The email included an attached information sheet that stated the project would have a positive impact on new housing, new businesses and continued growth that would "far outpace" any adverse impact on property values. AR 13054. The information sheet indicated that it would be a mistake for the City to deny approval. AR 13051, 13054. Council member Hamlin also distributed a document on the second day of a Planning Commission hearing on the Project. The document stated that the Project was not a "distribution center" and would have only three large trucks per hour, that she would have opposed it if the Project were a distribution center with hundreds of trucks. AR 17080-17085. In fact, the project is anticipated to have as many as 296 truck trips per day. AR 592. The following day, Hamlin emailed the managing principal of Real Party Creation Equity, congratulating him on the Planning Commission's approval. AR 19736. She asked to be involved in leasing discussions for the project to do damage control and "repair the negativity" to her reputation with constituents. AR 19723-19736. The following week, she further suggested contacting a reporter to correct the record and help her repair her damaged image. AR 17615.

Council member Alberto Sanchez twice posted to social media commenting favorably on the Project before the City Council held a hearing. One post called the Project "great," bringing jobs and tax revenue, reducing homeless population and that that retail aspect "looks great as well." AR 13056. Another added that traffic is being mitigated and that this would be growth, which Banning residents want. AR 19728.

Council member Colleen Wallace, then Mayor, gave a state of the city address in October, 2021, stating that building in Banning is needed to encourage children who grew up in Banning to return and invest. AR 13042-13043.

Council member Sanchez moved for approval of the Project and council member Wallace seconded the motion. However, even with that context, their statements do not overcome the presumption that

they are unbiased. There has been no showing of a financial or personal interest in the Project and no specific evidence demonstrating actual bias or a particular combination of circumstances creating an unacceptable risk of bias, in the language used by the Court in the Morongo Band of Mission Indians case. 45 Cal.4th at 741.

Councilmember Hamlin, however, demonstrated a personal interest in the success of the Project, rehabilitating her reputation with her constituents. Further, her statements clearly advocate a position in favor of the Project. She not only made statements in favor of the Project, she circulated information that inaccurately understated the number of truck trips the Project would generate, contrary to the final traffic study. AR 592. She stated that the warehouse was not a distribution center but was more like an industrial office building, which is clearly incorrect. AR 13052. While review of the Project was pending, she asked to be involved in leasing discussions. She encouraged the principal of Creation Equity to seek positive press releases and to engage in an “aggressive campaign” to support the Project. AR 17615, 19742. These actions are similar to the “coaching” found in Petrovich, 48 Cal.App.5th at 974-976 (council member took affirmative steps to assist project proponents, acting as an advocate, not as a neutral). That she stated at the hearing that she was unbiased and ultimately voted against its approval does not show her to be unbiased.

City of Fairfield, on which the City relies, is a different situation. As the Supreme Court noted, the “proceedings did not turn upon the adjudication of disputed facts” or applying standards to facts, “the few factual controversies were submerged into the overriding issue of whether the construction of the shopping center would serve the public interest.” 14 Cal.3d at 779-780. Moreover, many of the statements made by council members in City of Fairfield were made during election campaigns. The Supreme Court stated that such statements “do not disqualify the candidate from voting on matters which come before him after his election.” 14 Cal.3d at 781.

These factors are not present here. The City Council was making a determination as to whether the facts required a subsequent or supplemental Environmental Impact Report or whether an addendum to the Project Environmental Impact Report would be sufficient. Council member Hamlin’s statements were not made during an election campaign. Her participation in the City Council’s discussion and decision to approve the Project requires the Court to grant the petition. Woody’s Group, Inc., 233 Cal.App.4th at 1031 (remedy for participation of biased council member is to grant writ and send

matter back to city council with instructions to reconsider the matter without the participation of the biased council member).

Although the Court is not required to go farther, having found sufficient basis to grant the writ, it will briefly explain its view on the remaining issues. In summary, it does not find that Petitioner has carried its burden of proof on any remaining issue and would not grant the writ but for the fair hearing issue.

There was substantial evidence to support the Council's decision not to prepare a supplemental EIR. Petitioner contends that the City failed to comply with CEQA because it merely prepared an addendum to the Program EIR and did not prepare a supplemental or subsequent EIR for the Project addressing cumulative impacts from the Project and the Sunset Crossroads project, which is currently under environmental review. The Sunset Crossroads project would include 5.5 million square feet of warehouse space and would be located not far from the Project.

Whenever a further discretionary approval by the lead or responsible agency is required for a project for which an EIR or a negative declaration has been certified or adopted, the agency has to consider whether a subsequent or supplemental EIR should be required for that further approval. Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) § 19.2. "To give a degree of finality to the results, CEQA includes a presumption against requiring any further environmental review once an EIR has been prepared for a project." Id., citing Cal. Pub. Res. Code § 21161; Friends of the College of San Mateo Gardens v. San Mateo County Community College District (2016) 1 Cal. 5th 937, 949; see also CEQA Guidelines § 15162.

As the court explained in the leading case of Bowman v. City of Petaluma (1986) 185 Cal.App.3d 1065, 1073: "[S]ection 21166 comes into play precisely because in-depth review has already occurred, the time for challenging the sufficiency of the original EIR has long since expired [§21167(c)], and the question is whether circumstances have changed enough to justify repeating a substantial portion of the process." Once a project has been approved, no additional steps to comply with CEQA are required, unless a further discretionary approval of the project is necessary. Id. citing Martis Camp Community Ass'n v. County of Placer (2020) 53 Cal.App.5th 569, 604. New information appearing after a project approval does not require that the approval be reopened (CEQA Guidelines

§ 15162(c)), but if another discretionary approval is needed, "the agency considering that approval must determine whether further CEQA review is required due to changes in the project, changes in circumstances, or new information." Id. citing CEQA Guidelines § 15162(a), (c); Willow Glen Trestle Conservancy v. City of San Jose (2020) 49 Cal.App.5th 127, 131.

There are three formats available to add to or amend the EIR depending on the circumstances. If major changes are required to make a previous EIR adequate, a subsequent EIR is required. Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) § 19.4.

A supplemental EIR may be prepared by the agency if any of the conditions requiring a further EIR exist, "but only minor additions or changes would be necessary to make the previous EIR adequately apply to the project in the changed situation." Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) §19.5; CEQA Guidelines §15162(a). CEQA Guidelines do not define "minor additions or changes" however, a supplement only has to have the information necessary to make the previous EIR adequate. Id.; CEQA Guidelines §15163(b). "Thus, an EIR supplement need respond only to the project changes, changes in circumstances, or new information that triggered the need to prepare a further EIR …." Id. The discretionary decision to prepare a supplemental EIR as opposed to a subsequent EIR "is tested under a reasonableness standard, with the focus on 'the substance of the EIR, not its nominal title." Id.; City of Irvine v. County of Orange (2015) 238 Cal.App.4th 526, 540.

An addendum to a previously certified EIR must be prepared "when changes or additions to the EIR are necessary but none of the conditions in" CEQA Guidelines §15162 that trigger preparation of a subsequent or supplemental EIR have occurred. Kostka & Zischke, Practice Under the CEQA (CEB 2020-2021) §19.6; citing Friends of the College of San Mateo Gardens, 1 Cal.5th at 946. "Preparation of an addendum is thus a way to make minor corrections to an EIR without recirculating the EIR for further review." Id. at §19.6; CEQA Guidelines §15164(c). "An addendum may also be used to evaluate changes to a project, changes in circumstances, or new information, and to document the agency's determination that a subsequent or supplemental EIR is not required. Id.; CEQA Guidelines §15164(e). "The agency's decision-making body must consider the addendum along with the final EIR before making a decision on the project." Ibid.

Where the agency finds "that impacts resulting from changes to the project do not differ significantly

from those described in the prior EIR, a further EIR is not required." Id. at § 19.13 citing Bowman v. City of Petaluma (1986) 185 Cal.App.3d 1065, 1079 (following a change in access to a project site, an updated traffic report's conclusions were substantially identical to those in the original EIR, which were not considered substantial so, no further EIR was required); see Citizens Against Airport Pollution v. City of San Jose (2014) 227 Cal.App.4th 788, 802 (an addendum's analysis showing that noise and air pollution impacts from airport operations would decrease in the future, supported agency's determination that changes would not result in new significant impacts or substantially different impacts from what was described in prior EIRs); Fund for Environmental Defense v. County of Orange (1988) 204 Cal.App.3d 1538, 1548 (subsequent EIR not required for change in source of water for project because addendum to EIR concluded that impacts were same as those assessed in project EIR even though provider of water service changed).

There is no dispute but that the differences between the original project and the current version of the Project do not result in new significant environmental impacts. Indeed, the current version of the Project is significantly smaller than the original project.

Have there been substantial changes "with respect to the circumstances under which the project is being undertaken which would require major revisions to the environmental impact report"? Cal. Pub. Res. Code § 21166(b); CEQA Guidelines § 15612(a)(2) (adds "due to the involvement of new significant, environmental effects or a substantial increase in the severity of previously identified significant effects.") If there are such changes, a subsequent or supplemental EIR is required only if: 1) the change in circumstances is substantial; 2) the change involves new or more severe significant environmental impacts; 3) the change will require major revisions to the previous EIR on the new or more severe impacts; and 4) the impacts were not covered in the previous EIR. Kostka & Zischke, Practice Under the CEQA (CEB 2022-2023) § 19.14.

Third, has new information that "was not known and could not have been known at the time the environmental impact report was certified as complete" become available? Id. at § 19.18 citing Cal. Pub. Res. Code §21166(c). The CEQA Guidelines explain that the new information could not have been known with the exercise of reasonable diligence and must be of "substantial importance." Id. citing CEQA Guidelines § 15162(a)(3).

Petitioner argues that both the second (substantial changes to the circumstances under which the Project is being undertaken) and third (new information that could not have been known has become available) conditions exist because of the Sunset Crossroads project.

Petitioner asserts that three months after the PEIR was certified, the City issued a notice of preparation for thee Sunset Crossroads project. AR112944-12961. Sunset Crossroads involves over 500 acres and, as noted above, would include 5.5 million square feet of industrial/logistics use. AR 12944, 12950, 12956. It requires an amendment of the City's general plan for much of the acreage, a specific plan creating 19 distinct planning areas, a parcel map and vesting tract map, and a pre-annexation and development agreement. AR 12944-12945. The Sunset Crossroads would be about half a mile away from the Project at the closest point. The Sun Lakes senior community is between the projects. AR 8580, 12954. The Sunset Crossroads would include an extension of Sun Lakes Boulevard, which trucks from the Project could use to access the nearby freeway (although as City points out, there would be a much shorter access to the freeway without using the extension of Sun Lakes Boulevard).

Petitioner is correct, of course, that the PEIR and the addendum do not analyze the cumulative impact of the Project and Sunset Crossroads. However, City argues that Petitioner has not shown that the changed circumstances compel the conclusion that the significant environmental effects will be different or more severe than those previously identified and that "major revisions" to the PEIR are necessary. The Project is smaller—about 30 percent smaller—than what was contemplated by the PEIR. Would the Project have cumulatively considerable incremental effects? CEQA Guidelines § 15130(a). If not, the effect is not so significant as to require a subsequent or supplemental EIR. Id. If other projects by themselves would have significant cumulative impacts—something that is highly likely true for Sunset Crossroads—that "does not constitute substantial evidence that the proposed project's incremental effects are cumulatively considerable." CEQA Guidelines § 15064(h)(4).

City asserts that it relied on SCAQMD methodology in concluding that if the project-specific impacts exceed SCAQMD's local and regional thresholds of significance, only then would the impact be cumulatively considerable. The City determined that the Project would comply with the Air Quality Management Plan, and would not exceed regional or local significance levels. AR 135-138, 224-226, 5861, 2760.

City also argues that the Sunset Crossroads project is too uncertain to constitute a change in circumstances that would require assessing the cumulative impact of the Project and Sunset Crossroads.

To the extent that it is certain, the Sunset Crossroads project if approved would involve far more land, a much larger construction, and a general plan amendment, a specific plan creating 19 distinct planning areas, a parcel map and vesting tract map, and a pre-annexation and development agreement. It would no doubt have far more significant environmental impacts than the Project. If other projects by themselves would have significant cumulative impacts—which seems clearly the case here—that is not substantial evidence that the proposed project's incremental effects are cumulatively considerable. CEQA Guidelines § 15064(h)(4). Accordingly, the Court concludes that substantial evidence supported the City's decision not to include cumulative impacts from the Project and Sunset Crossroads in the environmental documents for the Project and to prepare an addendum instead of a supplemental or subsequent EIR for the Project.

Substantial evidence supported the City's project approval findings. Petitioner argues that there is no guarantee that the office and retail space that is to serve as a buffer between the existing housing and the warehouse element of the Project will be built in time to serve as a buffer and may never be built. City found the tentative map and design review consistent with the general plan and the specific plan amendment.

"Courts will defer to an agency's decision on consistency with its own plan unless, on the basis of evidence before the decision-making body, a "reasonable person" could not have found the project to be consistent." Kostka & Zischke, Practice Under the CEQA (CEB 2023) § 12.33 citing The Highway 68 Coalition v County of Monterey (2017) 14 Cal.App.5th 883, 896 (a determination of consistency between a project and a "general plan can be reversed only if it is based on evidence from which no reasonable person could have reached the same conclusion"); Clover Valley Foundation v City of Rocklin (2011) 197 Cal.App.4th 200, 239 ("no reasonable person would have determined that the project was inconsistent with the general plan").

Notably, perfect conformity between a project and the general plan is not required, only compatibility

with the general plan's objectives and policies is needed. That determination is subject to a highly deferential standard of review. It is Petitioner's burden to establish inconsistency. California Native Plant Society v. City of Rancho Cordova (2009) 172 Cal.App.4th 603, 638. The Court will not substitute its judgment for the City's; the City's determination "comes to this court with a strong presumption of regularity." Ibid. This is because courts recognize that "the body which adopted the general plan policies in its legislative capacity has unique competence to interpret those policies when applying them in its adjudicatory capacity" and "the governmental agency must be allowed to weigh and balance the plan's policies when applying them." Naraghi Lakes Neighborhood Preservation Assn. v. City of Modesto (2016) 1 Cal.App.5th 9, 18-19.

City's conclusion that the Project is consistent with the general plan and specific plan amendment is supported by substantial evidence. The City found that the Project will not unreasonably interfere with use and enjoyment of neighboring properties because the warehouse is to be built up against the I-10 freeway and the railroad away from residences; it will back up against Sun Lakes Village Shopping Center buildings away from residences to the south and east; and the retail and offices uses will provide screening/buffering from these residential uses "in the future." AR 81 (emphasis added by Petitioner.) However, as argued by the City, there is nothing in its findings that required the retail and office elements (R&S District) would be built before or concurrently with the warehouse or would change the findings if the retail and office space were developed later. That an alternative condition could be proposed to address Petitioner's screening concerns—requiring the landscaping—and was adopted supports the City's finding. City could and did find that landscaping is a reasonable alternative for buffering to the construction of the office and retail space.

Project does not conflict with the noise element of the general plan. Petitioner argues that the Project approval authorizes heavy truck use on Sun Lakes Boulevard, which violates the noise element of the general plan because that street is not designated as a truck route. Program 4.A provides that other than traffic providing location-specific services and deliveries, construction and delivery trucks are limited to designated truck routes, which does not include Sun Lakes Boulevard. The City is within its discretion to interpret its general plan. Naraghi Lakes Neighborhood Preservation Assn. v. City of Modesto (2016) 1 Cal.App.5th 9, 18-19. Its determination is within that discretion.

For the foregoing reasons, the Petition is granted in part. Petitioner to prepare a proposed Writ and to

---

circulate it in the manner required by Rule 3.1312 of the California Rules of Court.

Notice to be given by Clerk.
Minute entry completed.

From: Gordon Farley <fargoisinsocal@aol.com>
Date: January 8, 2022 at 9:40:19 AM PST
To: Kyle Pingree <kpingree@banningca.gov>, Mary Hamlin <mhamlin@banningca.gov>, Doug Schulze <dschulze@banningca.gov>, eshaw@banningca.gov, Adam Rush <arush@banningca.gov>, editor@recordgazette.net, bob.walter@sunlakescc.com, marsha.midgett@sunlakescc.com
Subject: "Banning Point" Warehouse Project
Reply-To: Gordon Farley <fargoisinsocal@aol.com>

I am protesting the warehouse project based upon the following reasons:

1. Traffic congestion currently being experienced at the Highland Springs underpass of
the I-10 and on Highland Springs Avenue between the I-10 and First Street (Beaumont)

and Sun Lakes Boulevard (Banning).

2. Anticipated additional traffic congestion from the hundreds of trucks traveling between
the I10 and the warehouse complex
.
3. Anticipated noise emanating from the warehouse and from the hundreds of trucks traveling between the I10 and the warehouse and moving within the warehouse complex.

4. Anticipated pollution caused by hundreds of trucks traveling to and from the warehouse and moving within the warehouse complex.

INCREASED TRAFFIC The developer has stated that there will

be one truck arrival every five minutes, for a minimum of twelve trucks per hour and 288 trucks per day; AT PEAK HOURS IT COULD MEAN TWENTY TRUCKS ON OUR STREETS AT THE SAME TIME, this will massively congest our streets. Large numbers of trucks will also endanger pedestrian, golf cart and automobile traffic.

· HEALTH AND SAFETY Increased traffic means fire, police, and medical emergency vehicles will be delayed in reaching their destinations, creating the potential for life threatening situations.

· NOISE, LIGHT AND AIR POLLUTION Diesel trucks create noise, pollute the air, and the distribution centers have exterior lights; pollution taking place twenty-four hours per day.

· IMPACT ON "THE LAKES" CARE FACILITY
The Distribution Center will be immediately adjacent to "The Lakes", a care facility for seniors with compromised health conditions. Noise, air pollution, light pollution, and restricted emergency traffic all pose serious complications to their well-being. · PROPERTY VALUES The presence of a Distribution Center across the street from a retirement community will certainly diminish the appeal of retiring in this environment, and as a consequence, will reduce property values.

· CITY ISSUES
Distribution Centers require infrastructure support including significant electrical needs, water, natural gas, and sewer, which when combined with existing residential and commercial requirements, will stress the City's capacity. Furthermore, increased truck traffic will increase the needs for street repair and will necessitate increases in City staff to accommodate these needs. Finally, it can be anticipated that litigation against the City (and City Council members as individuals) from a variety of incidents, as the result of the City Council's decision to move this project forward, will place additional far reaching financial strains on resources, both now and in the future.

PASS ACTION GROUP BOARD MEETING MINUTES

The Pass Action Group Board Meeting was held in the Main Clubhouse Lounge at 2:00 pm on January 4, 2022.

Board Members Present: 11 of the 16 were present.

Randy Robbins, Howard Katz, Jeannie Lloyd, Jim Moran, Bob Messier, Diane Berley, Sheri Flynn, Jim Corrigan, Bruce Brown, Janet Flamang, and Beverly Rashidd were in attendance.

Call to Order

President Randy Robbins called the meeting to order at 2:06 PM.

Jim Moran circulated a sign in sheet for the meeting record.

Jeannie Lloyd distributed copies of the Treasurer's report.

Review and vote on meeting minutes from 12/28 meeting.

Minutes were reviewed and Diane Berley motioned for approval with changes/corrections noted below, Jim Moran seconded motion and the motion carried with an 11-0 vote.

Noted changes:

1) In the Legal Report, "roll" should be "role"
2) In the New Business section, wordsmithing relating to a future meeting in the Sun Lakes Ballroom was needed.

There was also a discussion about AQMD that Sheri Flynn felt should have been in the meeting minutes. After a long debate, it was decided that Randy Robbins, Sheri Flynn, and Howard Katz would remain at the table after today's meeting was adjourned to have further discussion on the topic.

President's Report – Randy Robbins

Randy Robbins reported that there was no indication that the hearing has been scheduled as of yet.

Treasurer's Report – Jeannie Lloyd

The status of the funds in the bank for the month of December was presented to the group.

There were two expenses noted since the last meeting was held. One was check 1002, written for $704.70 to cover the cost of the printing copies of PAG letter to all residents in Sun Lakes and to many homes in Four Seasons. The other was check 103, which was written to cover the cost of two billboards for four weeks. That check was written for $4,940. Bevely Rashidd motioned approval, seconded by Jim Corrigan – Motion carried 11-0

Bruce Brown asked if our financial information was being kept in more than one place. Those records are kept by both Jeanne Lloyd and Randy Robbins.

Legal Report – Diane Berley and Sheri Flynn

Sheri Flynn discussed a letter that Gabriel Ross had asked her and Diane Berley to review. The letter, being sent to the Banning City Council and Mayor, detailed the inadequacies related to the EIR. Gabe was asking if we felt that his letter should be sent right away or held until the Appeal date was known. The belief was that sending the letter early was a good idea only if we believed that appeared willing to work with us. Otherwise, sending it early was showing out hand and providing them more time to address issues. The advantage to sending the letter later was that the city would have less time to prepare for the appeal meeting. It was decided to send the letter 10 days before the appeal was to be heard. That decision was based partly on our own perception of how the City of Banning was leaning. It was also influenced by Randy Robbins reporting that not one of the many emails he had sent to the City Council members had been answered.

There was follow-up discussion regarding details of how the appeal will be handled. It was discussed as to whether or not Gabe Ross will be in attendance at the appeal or simply handle via zoom. Gabriel Ross would prefer handling the appeal via zoom. Another option would be for him to drive down. That does not appear to be an appealing option, as the entire drive would be billed. Randy Robbins asked Diane Berley if she thought that Gabriel Ross could be effective on Zoom. Diane Berley indicated that it wouldn't be terrible. While there is some concern about the facility and Zoom, and it would be more personal and better overall if Mr. Ross could be on hand.

There were questions about who performed the initial EIR, as well as who had paid for it. Sheri Flynn believes that the City of Banning provided the EIR and that the developer paid for it. Diane Berley asked about the differences between a Program EIR, and a Project EIR. Sheri Flynn explained that a Program EIR covers a wider array of area, but lacks the detail that a Project EIR provides.

Sheri Flynn believes we should attempt to get the Zoning thrown out, as the EIR performed was not for an industrial site. She explained that the city did not follow their own rules, because you cannot change zoning if the change results in a negative effect on the health and welfare of residents of Banning.

Volunteer Committee – Bruce Brown

Bruce Brown reported that there would be no formal report at today's meeting. He did indicate that new signs had been ordered and that he will show them at next week's meeting.

Howard Katz will work with Bruce Brown and Jim Corrigan to determine the cost of a mass-mailing in Banning.

Jim Corrigan is looking into rules and regulations for yard signs in the area.

Communication Committee – Howard Katz

Howard Katz reported on the billboards that will be in place by January10th. One billboard is 12X24, and the other is roughly 10X36. Examples were shared with the group.

There was discussion using The Patch or the Next Door app for advertising. Both methods can localize information, and the patch is a no-cost option. Howard Katz noted that he had posted something on The Patch, but had not been able to find it online yet.

Howard Katz and Beverly Rashidd detailed advertising options for The Press Enterprise and Record Gazette. Howard Katz took the lead on The Press Enterprise and outlined three options.

1. Ads in the paper at a cost of $2,161 per day.
2. Stickers on the paper, above the fold. A minimum of 10,000.
3. Ads on the Press Enterprise Website. Unlike options 1 & 2, there were advantages to option 3.
    a. Can be localized by zip code.
    b. The ability to click a link to the Pass Action Group Website.
    c. Minimum but is manageable at $500

Howard Katz recommended option 3 only.

Beverly Rashidd reported on options at The Record Gazette. Options included:

1. Full Page ads at $1,025 (Black & White) or $1,335 (Color). Non-profit prices were less. Prime Placement (page 3) ads cost more.
2. Stickers that we would have to make and supply cost $295 per week.

The decision was made to table this discussion and revisit it at a later time.

Howard Katz indicated that Newsletter #7 was about ready to be sent ou8

HOA/Government Committee – Randy Robbins

Randy Robbins noted that there would be no update for Government this week.

Randy Robbins reported that he had spoken to the President of the Four Seasons HOA this week.

Randy Robbins is working to get an article/update into the February issue of Lifestyles.

Old Business

Randy Robbins noted that he is continuing to address incorporation. His CPA has an attorney that he uses to set up corporations. That attorney will make contact with Randy Robbins.

Randy Robbins asked the group to be thinking about the upcoming appeal, and what approach the PAG should take.

Sheri Flynn reported thar Gabriel Ross indicated that we should utilize protestors on the day before and day of the appeal. It was suggested that we make 5-10 signs specific to the hearing to increase community awareness.

New Business

No new business was added this week.

Adjournment

A motion was made by Bruce Brown and seconded by Diane Berley to adjourn the meeting. Motion carried and meeting was adjourned at 4:15 pm

PASS ACTION GROUP BOARD MEETING MINUTES

The Pass Action Group Board Meeting was held in the Main Clubhouse Lounge at 2:00 pm on January 11, 2022.

Board Members Present: 8 of the 16 were present.

Randy Robbins, Howard Katz, Jim Moran, Diane Berley, Sheri Flynn, Janet Flamang, Gracie Luna, and Beverly Rashidd were in attendance.

Call to Order

President Randy Robbins called the meeting to order at 2:09 PM.

Jim Moran circulated a sign in sheet for the meeting record.

Review and vote on meeting minutes from 1/11 meeting.

Minutes were reviewed and Howard Katz motioned for approval with change/clarification noted below, Janet Flamang seconded the motion and the motion carried with an 8-0 vote.

1. **Noted change:** 1) Beverly Rashidd pointed out that the minutes stated that "Stickers that we would have to make and supply cost $295 per week". The $295 would actually cover one edition of the Record Gazette.

President's Report – Randy Robbins

Randy Robbins provided information to our attorney Gabe Ross following a call with Sheri Flynn and Diane Berley. Among the items forwarded to Mr. Ross were copies of his earlier interactions with Mary Hamlin and Adam Rush.

The PAG strategy of getting the word out was discussed and examples of how it is working were presented. The Four Seasons Breeze, Sun Lakes Life, and Record Gazette remain constant providers of information. There has been a recent article in the Banning Estates, and a newsletter in the Gilman Springs Estates.

The Appeal meeting on January 31st will be by Zoom only. Randy Robbins is attempting to clarify how much time we will be given to speak. To date, the City of Banning and the developers have been given unlimited time to present, and we have been limited.

Treasurer's Report – Randy Robbins presenting for Jeannie Lloyd

There was no formal report presented, but Randy Robbins noted that we have currently raised nearly $3,000 in donations through the Give Butter on-line site.

Legal Report – Diane Berley and Sheri Flynn

Sheri Flynn and Diane Berly had an extensive call with the assistant for attorney Gabe Ross this week. It was noted that if our case turns into a lawsuit, Kevin Bundy is expected to be brought in. Mr. Bundy was unavailable when the process began, but was part of conversations as we began.

The attorneys continue to work on the letter that will be sent to the City Council and Mayor on January 21st. They are clarifying that the EIR was prepared in a Business Warehouse setting that later was

changed to Industrial. Sheri Flynn believes we should attempt to get the Zoning thrown out, as the EIR performed was not for an industrial site. She explained that the city did not follow their own rules, because you cannot change zoning if the change results in a negative effect on the health and welfare of residents of Banning.

It was noted that we may not be able to address some areas of the EIR due to a statute of limitations. Later in the meeting, Randy Robbins asked Diane Berley if we missed a deadline due to fraudulent action, would the deadline be revised? Dinae Berley responded that if we should show that our lack of reacting was due to their lack of notification, it would help. As noted in previous minutes, our HOA claims they were not notified and the letter to The Lakes was sent to a previous lender and did not reach anyone currently associated with The Lakes.

Another topic discussed involved the ability, or inability to get documents from the City of Banning. Sheri Flynn indicated that she has set up an account twice with the city, yet it does not recognize her email.

Sheri Flynn spoke of the early plans from the developer. Those plans noted that the retail area would be built first, acting as a buffer to the warehouse. Today, plans call for the warehouse to be built in 2022, with the retail area to follow in 2023. Randy Robbins noted that there were also mixed messages coming from the developer on how much of a presence they have in California. On one occasion, Creation indicated that Banning Pointe was their only project in the state. Recently, they have said they have 41 projects in work here.

Another change noted by Sheri Flynn discussed related to the change to expected operating hours of the project. The sign initially called for operating hours of 7:00am to 10:00pm. With no notification or discussion, the operating hours became 24 hours per day, 7 days a week. That change would certainly affect traffic and pollution. Sheri Flynn believes that this alone constitutes a sufficient cause to obtain a new EIR.

Diane Berley outlined the role of the Attorney General, who could get involved later but possesses more influence than power. It was also noted that the best results of a CEQA lawsuit might be in forcing the City of Banning and developers to start the process over. This could delay things for up to three years. Randy Robbins added that a delay like that could cause concern for investors, as he discussed typical investor expectations and timelines. A long delay in this flawed process could influence them to look at alternative options.

Sheri Flynn indicated that Gabe Ross has contacts at the AG's office and AQMD and that Mr. Ross would be sending letters to both.

<u>Volunteer Committee – Bruce Brown</u>

Bruce Brown was ill and unable to attend the meeting. He did indicate that new signs had been made and had been given to Randy Robbins.

Bruce Brown had a proposal for a mass-mailing to Sun Lakes and Four Seasons residents. The cost for this would exceed $2,000. The proposal was not a recommendation. Instead, it was provided in case the group wanted to proceed in that direction. There was talk of using non-typical sized postcards in this effort, hoping that they would get more attention.

Howard Katz noted that the use of oversized postcards increases the cost, as they are not priced as postcards. This can expensive for a process that typically leads to only 1-2% of people actually taking the time to read it. Janet Flamang suggested using volunteers to place postcards in the cubbies below mailboxes. Jim Moran those who did not know, that not all districts have mailboxes. This extends the time it takes to deliver. As District Delegate, Jim Moran can deliver his newsletters in a district with mailboxes in 20 minutes. As a Delegate in a district with no mailboxes, it takes Randy Robbins nearly to hours to leave newsletters on porches.

Communication Committee – Howard Katz

Howard Katz reported that he currently uses two different email addresses to sent messages. He is limited to 1,000 per day from each. This activity is pushing the limits of his ability to communicate and is recommending the use of a service like Constant Contact, which would allow him to send an unlimited number of messages. Another option discussed was Mail Chimp, which was thought to be less expensive and more user friendly. This topic will be on Old Business next week to clarify cost and have a motion presented, though we all agree that this is warranted.

The Newsletters developed and distributed by Howard Katz have been well reviewed and have resulted in an increase of requests to get on our mailing list.

As a follow-up to a question in the January 4th meeting, Howard Katz clarified the website option of The Press Enterprise. Last week, Howard was asked if you had to have a subscription to the Press Enterprise enable to view ads. The answer was both yes and no. To view ads on the Press Enterprise site, you need to have a subscription. However, anybody with extra ad space can bid on and pick up an ad. Plus, the Press Enterprise acts as an agent. Howard Katz indicated that he would set it up if we choose to proceed. Randy Robbins suggested postponing that decision until we understand what kind of impact our billboards would have.

At this point, too many people in zip codes 92220 and 92223 still have no idea that this battle is even taking place. Janet Flamang would like to see information getting into the hands of residents. Sheri Flynn feels that the people we need to influence are the members of the City Council and that the letter coming from our attorneys on January 21st will do that. Randy Robbins provided his opinion that the City of Banning staff has misled the City Council. Beverly Rashidd reiterated that we needed to ensure that this is presented as a Banning issue, and not a Sun Lakes issue.

Janet Flamang asked if we could put out a communication explaining all of the acronyms used and what they mean. We constantly use EIR, CC&R, CEQA, and others. The hope is that by providing a full explanation of terms, we make it easier for everyone to understand. It was requested that this information be put into the next Communication Newsletter.

HOA/Government Committee – Randy Robbins

Randy Robbins asked Bob Walter discussed a potential change to the CC&R's to be put on the ballot for Sun Lakes elections in April. Currently, the CC&R's do not allow money from the HOA to be spent on items outside the walls of Sun Lakes. As a result, the HOA is prohibited from providing any funds to the PAG. The advantage of having this item coincide with an already scheduled election is that it adds no cost to the process. If a special election takes place, the cost is roughly $15,000 including the use of a third-party firm.

Old Business

The only topic on the agenda concerned the use of newspapers, and that topic was covered earlier in the meeting.

New Business

Randy Robbins presented a letter of resignation from George Moyer. The Moyers are leaving Sun Lakes. After hearing from Howard Katz, who was reviewing our bylaws, potential replacements were discussed. Randy Robbins gave an overview on John Swem, who had shown interest early on. Another name was Ron Roy. Sheri Flynn committed to speak with Ron Roy to see if he had interest. Beverly Rashidd made a motion to postpone the nomination for one week. This would allow some of the members out today to take part. It would also give the team time to consider any other viable candidates. Diane Berley provided the 2nd for the motion, and the motion carried with an 8-0 vote.

There was a great deal of discussion on picketing/protesting. With the Appeal meeting being conducted via Zoom, there is little to be gained by protesting outside on that day. Gracie Luna suggested that the corner of 2nd street and Highland Springs would be a good place to start. Howard Ketz clarified that we do not need a permit to protest and that he had already spoken to the police. The police response was that as long as we behaved ourselves and stayed out of traffic, there would be no problem. Sheri Flynn requests that we get people to send letters and emails to the City of Banning. Randy Robbins was asked by Sheri Flynn if a protest sign that included email addresses for City of Banning staff members. Randy Robbins responded that creating a sign should not be a problem. Jim Moran made a motion with a 2nd from Howard Katz January 23rd and 29th, at times to be decided by the volunteer committee. Motion carried 8-0.

Adjournment

A motion was made by Howard Katz and seconded by Beverly Rashidd to adjourn the meeting. Motion carried and meeting was adjourned at 3:42 pm.

PASS ACTION GROUP BOARD MEETING MINUTES

The Pass Action Group Board Meeting was held in the Main Clubhouse Lounge at 2:00 pm on January 18, 2022.

Board Members present: 9 of the 16 were present.

Randy Robbins, Howard Katz, Jeannie Lloyd, Bob Messier, Jim Corrigan, Jan Flammang, Sheri Flynn, Bruce Brown, and Diane Berley were in attendance.

Call to Order

President Randy Robbins called the meeting to order at 2:08 pm.

Randy Robbins circulated a sign in sheet for the meeting record.

Protest Planning and Communication – Bruce Brown

Ron and Bobby Pitts attended as special attendees to discuss plans for the protest of 01/21/22. Bruce noted that Ron and Bobby have been instrumental in getting signs designed and made. There was discussion as to where protesters would meet and sign distribution. Protesters were to meet at Sun Lakes Blvd and Highland Springs Ave and disburse from there. After this discussion Ron and Bobby Pitts were dismissed from the meeting and thanked for their attendance.

Vacant Board Position – Randy Robbins

Randy Robbins reported that with the resignation of George Moyer, there is now a vacancy and asked for a motion to open the floor for nominations. Howard Katz moved, Jeannie Lloyd seconded, and the motion carried to open the floor for nominations. Howard Katz nominated John Swem. Sheri Flynn nominated Ron Roy. John Swem was in attendance and introduced himself and discussed his qualifications. Sheri Flynn read a resume for Ron Roy. John Swem left the room while the Board discussed both candidates. There was a vote done by hand and Ron Roy was appointed to fill the position.

Review and vote on meeting minutes from 01/18/22 meeting.

Minutes were reviewed and Jim Corrigan moved approval with below noted changes and clarifications. Howard Katz seconded the motion, motion carried 9-0.

Changes:

1. Page 1 – Under Legal Report – Paragraph 1 - First sentence to read: Sheri Flynn and Diane Berley had a one-hour call with attorney Gabe Ross and assistants this week.
2. Page 2 – Under Legal Report – Paragraph 3 – Third sentence to read: Diane Berley responded that if we show that our lack of reacting was due to their lack of notification, it would help, but there is no remedy under CEQA.
3. Page 2 – Under Legal Report – Paragraph 6 – Second sentence to read: The resolution initially called for operating hours of 7:00a, to 10:00pm.
4. Page 3 – Under HOA/Government – First sentence to read: Randy Robbins reported Bob Walter discussed a potential change to the CC&R's to be put on the ballot for Sun Lakes elections in April.

President's Report – Randy Robbins

Randy reported that Josh Zemon of Creation Equity had reached out via email inviting the P.A.G. to meet with Creation Equity representatives on Wednesday January 19th. After discussion with Sheri Flynn, Diane Berley, and Gabe Ross it was determined that it would not be in our best interests, and we declined the meeting.

Randy reported that he had reached out the City Clerk to clarify our speaking time for the 01/31/22 appeal hearing. At the time of the meeting the City Clerk's office had not yet responded. Randy will follow up.

Randy will continue to make periodic Facebook posts addressing protests and other important information.

Treasurer's Report – Jeannie Lloyd

Jeannie submitted a Treasurers report. Donations are still coming in weekly.

Legal Report – Diane Berley and Sheri Flynn

A letter was read from our attorney, Gabe Ross, detailing a letter that will be sent to the City on Friday 01/21/22. Among the details was asking for a continuance until the we can present our case in person versus on Zoom. Diane and Sheri will continue to work with Gabe Ross on our final letter that will be sent to City ahead of the Appeal Hearing.

EIR – Sheri Flynn

Sheri reported that she had requested more documents from the city.

Volunteers – Bruce Brown

In addition to the protest information noted above, Bruce emphasized that we need to continue to get the word out about the protests so that we have maximum participation.

Communication – Howard Katz

Howard reported that the billboards were up, and he has received positive comments via email on them. Howard discussed if we were to reserve the billboards for additional time it would be best to commit as soon as possible.

Howard discussed the online "click ads." It was decided that for now we would not implement this program.

There was further discussion about continuing to get more awareness. Randy Robbins reported that various HOA's in the City of Banning had placed our information in their respective newsletters.

Old Business

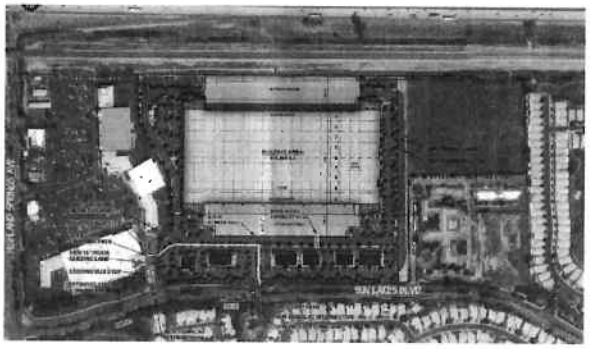
Jim Corrigan addressed the issue of incorporation and Board Member protections. Randy Robbins noted that he had a name for a new attorney for advice and would be talking to her and have a report at the January 25th Board meeting.

Randy Robbins reported that he will work with Howard Katz on looking into using an email service, such as Mail Chimp or Constant Contact. This will relieve pressure on Howard's personal email accounts.

New Business

There was discussion about alternative uses for the Creation property. During discussion it was noted that at this time our commitment to our donors is to fight the warehouse across from Sun Lakes. Should the project change there would need to be further discussion as to Pass Action Group's role moving forward.

There was discussion noting the Mary Hamlin has potential "Conflict of Interest" due to her leadership involvement in both Faith in Action and the Pass Job Connection employment agency. Sheri stated she would bring these potential conflicts to Gabe Ross' attention.



Adjournment

A motion was made by Howard Katz to adjourn the meeting, it was seconded by Jim Corrigan. The motion carried and the meeting was adjourned at 3:35 p.m.

PASS ACTION GROUP BOARD MEETING MINUTES

Minutes from three of our January 2022 Board meetings are attached for your information. They are from our January 4th, 11th, and 18th meetings.

BANNING CITY COUNCIL SPECIAL MEETING TO HEAR OUR WAREHOUSE APPEAL

The City of Banning has postponed a special City Council meeting to hear our appeal of the Banning Planning Commission's approval of the Banning Point Warehouse/Distribution Center project from Monday, January 31, 2022, to Thursday February 17, 2022, at 5:00pm in the Banning City Council Chambers. The postponement was granted based upon requests by us and the Banning Point developer.

We believe the City of Banning and the developer were surprised by the depth, quantity, and quality of information submitted by our legal representative in a letter dated January 24, 2022 with attachments sent to the Banning City Council

(17 pages of letter and 421 pages of attachments). We think the city and the developer needed extra time to digest this information and prepare their responses.

The January 31st meeting was to be all Zoom attendance. As of now, we do not know if attendance at the February 17th meeting will be the same or if the public will be allowed to attend in-person. We will distribute that information by email and posted on our website, www.passactiongroup.org, as it becomes available. Please watch for our emails and postings.

However, the format of the appeal portion of the February 17th meeting (postponed from January 31st) will have basically the following format, as stated in the following excepted from a letter from Kevin G. Ennis, the City of Banning's attorney:

> "...The Applicant [developer] and the Appellant (Pass Area Action Group) will each be given ten (10) minutes to present their position after the staff presentation at the Public Hearing on Monday January 31, 2022. They will also each be given five (5) minutes to rebut each other's presentation. Then there will be questions from the City Council to the Applicant and the Appellant followed by public comments. After all comments, the Applicant and the Appellant will each be given a few minutes to respond to any comments made by the public..."
>
> Please refer to the attachment for the full text of Mr. Ennis' letter.

After all of this, the City Council will vote to accept or deny our appeal. What will happen after the vote, acceptance or denial of our appeal, we will learn at that time.

JANUARY STREET PROTESTS

January 21st

We held a street protest between 3:00pm and 5:00pm on January 21st. It was very successful. The estimated number of people who attended is from 120 to 150, depending upon who was asked. In other words, we did not do an official count of attendees.

Signs were plentiful and colorful. There were professionally printed and home made signs and all of them were colorful with appropriate messages. We

supplied almost 100 of the signs. Most of them were returned to us so we could use them for future protests. We appreciate their return.

After discussions with the Banning City Hall and the Banning Police Department, we requested attendees stay off the grass around the businesses in the shopping center, stay off the streets, and be polite. Everyone adhered to these requests. The protest was orderly and not a single problem was encountered.

We invited KABC-TV, KNBC-TV, the Desert Sun, the Press Enterprise, the Record Gazette, Sun Lakes Life, and a unattached free-lance reporter to attend and cover us. Only the free-lance reporter joined us. He took a video of the protest and also the location where the proposed warehouse complex is planned for construction. Please click on the following link to watch the video:

https://youtu.be/DQ0ozpewPnE

January 28th

The January 29th street protest will be held between 12:00 noon and 2:00pm. We hoping for at least as good a turnout as the one on January 21st. Signs will again be available for attendees or they can display their individuality and creativity by making and bringing their own.

We anticipate the same decorum shown at last week's protest to be shown on the 29th so that we can continue to protest in Banning without running afoul of Banning City Hall and the Banning Police Department.

We again invited KABC-TV, KNBC-TV, the Desert Sun, the Press Enterprise, the Record Gazette, Sun Lakes Life, and the free-lance reporter attend and cover us.

DISTRIBUTING OUR MESSAGE

Billboards

We contracted for two billboards on the I10 which are displaying our message in opposition to the planned warehouse. One billboard faces west for viewing by traffic traveling east on the I10 and is located just before the eastbound Highland Springs offramp. The other faces east for traffic traveling west on the I10 and is located just before the westbound Highland Springs offramp. The billboard proofs are attached for your information.

The billboards are being seen and getting peoples' attention. We know that from the positive comments and feedback we have received since they were installed.

Internet Postings

We have a Facebook group that has been gaining popularity and getting a lot of action. We and others have been posting to the group to share news and commentary. If you are a Facebook subscriber, please visit the site/group and catch up with the latest news and commentary.

Information on our www.passactiongroup.org website has been growing since it was introduced. Please visit the site to see what is available. Also, please sign up on the site to be added to our email list to receive our weekly newsletters.

JANUARY 28TH RECORD GAZETTE WAREHOUSE ARTICLE

The following article authored by David James Heiss was published in the January 28, 2022 edition of the Record Gazette.

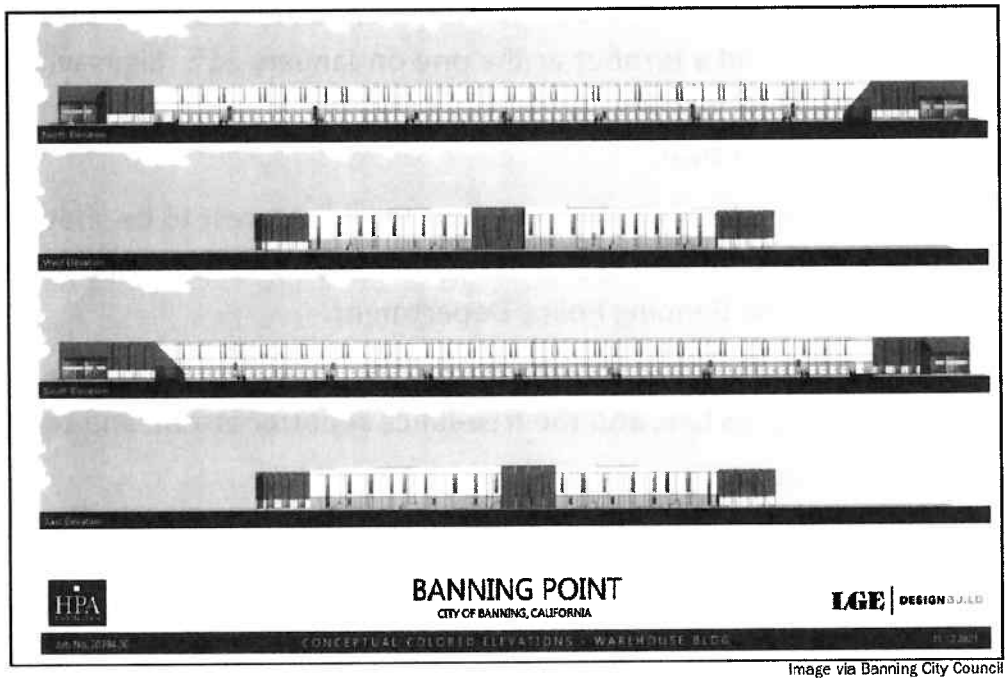

Image via Banning City Council
Proposed Banning Point warehouse plans.

By DAVID JAMES HEISS, *Record Gazette front page, January 28, 2022*

The contentious Banning Point, with its proposed 619,959 square-foot industrial building and additional 34,000 square feet of office space and retail or restaurant space planned across the street from Sun Lakes Country

Club, will be the subject of a public hearing at Banning's city hall on Feb. 17, beginning at 5 p.m.

The Banning Point project has raised numerous complaints and concerns and letters to the editor of the Record Gazette regarding an already overwhelmed traffic nightmare on Highland Springs [Avenue], public safety accessibility, and citizens' health related to a potential proliferation of increased truck traffic.

At the Dec. 1, 2021 Banning Planning Commission's meeting, the Sun Lakes Village North Specific Plan project to subdivide 47 acres into three lots narrowly approved 3-2, with Commissioner Richard Krick explaining to a packed city hall filled with mostly Sun Lakes residents that "the developer has every legal right" to build its warehouse in the location across the street from the retirement community, and that "it cannot be changed."

Krick motioned to approve the planning commission's resolution, and received additional support from commissioners Scott Brosious and Eric Shaw.

Commissioners David Lopez and Marco Santana opposed the measure.

A coalition of citizens calling themselves the Pass Action Group has been coordinating protests, and have officially filed to appeal the Planning Commission's vote.

Pass Action Group's Communications Chairman Howard Katz has expressed "We are protesting the City of Banning Planning Commission's approval of the construction of a 620,000 square foot warehouse on 49 acres on Sun Lakes Boulevard in the middle of senior, 55+ communities with more than 10,000 inhabitants," stating that "estimates are for one tract[or]-trailer or large box truck every five minutes in or out of the warehouse 24 hours a day ... the negative health impact on our seniors is incalculable."

The meeting will be in-person and via Zoom, and broadcast on line at banninglive.viebit.com

Staff Writer David James Heiss may be reached at dheiss@recordgazette.net, and messages may be left at (951) 849-4586 x114.

FUTURE ACTIVITIES

Public Meeting

We are considering holding another public Pass Action Group meeting after the City of Banning Special City Council meeting on February 17th, maybe on February 25th. We will distribute specific meet4ing information by Tuesday evening, February 22nd.

BACKGROUND

Introduction

This is not the first time a major commercial development has been proposed for the vacant land across from Sun Lakes Country Club. The two previous attempts were for a sewage treatment plant and a new car dealership. Both projects were eventually cancelled due to the determined pushback from Sun Lakes Country Club residents.

We are banding together this time to oppose the construction of a warehouse that will bring an unacceptable number of daily truck traffic, diesel truck noise, and diesel truck pollution. The Pass Action Group was formed to be the head of our opposition to this project.

Pictures

The two pictures presented at the top of this newsletter were received from the site developer:

1. The left picture presents the proposed warehouse from its southwest corner, from a slightly elevated position, looking northeasterly. Just south of the warehouse is a string of retail/restaurant businesses.
2. The right picture presents the warehouse and retail/restaurant businesses looking from overhead. Please notice the comparative size of the warehouse building to the current shopping center buildings to its left, or west of it. The proposed warehouse is considerably bigger than the other buildings and they are not small.

   Please notice the yellow line in the picture. This is a defined as a golf cart path to ease Sun Lakes resident entry into the shopping center. The

2574

developer is offering this to Sun Lakes residents to lessen our resistance to the project.

The street to the right of Big 5, between it and the proposed development, will be widened 14 feet to provide an additional lane for incoming truck traffic. The developer proposes the newly widened street will be divided into five lanes. Three inbound lanes, the right two dedicated for truck traffic into the warehouse and the left one for traffic into the shopping center and passenger bus traffic, since passenger buses will continue to use the bus stop currently located on this street. The other two lanes will be for trucks exiting the warehouse onto Sun Lakes Boulevard merging with exiting shopping center traffic and exiting bus traffic.

Send Your Comments (emails and letters) to the City of Banning and the Media

Emails and letters protesting the warehouse should be sent to one or more of the people listed below:

1. Banning Mayor – Kyle Pingree, kpingree@banningca.gov
2. Banning District 3 Councilwoman – Mary Hamlin, mhamlin@banningca.gov
3. Banning City Manager – Doug Schulze, dschulze@banningca.gov
4. Banning City Planning Commission – Eric Shaw, eshaw@banningca.gov
5. Banning City Community Development Director – Adam Rush, arush@banningca.gov
6. KABC-TV Reporter – Rob McMillan, rob.m.mcmillan@abc.com
7. KNBC-TV Reporter – Tony Shin – tony.shin@nbcuni.com
8. Desert Sun Reporter – Tom Coulter, tcoulter@gannet.com
9. Press Enterprise Reporter – David Downey, ddowney@scng.com
10. Press Enterprise Reporter – Jeff Horseman, jhorseman@scng.com
11. Record Gazette Editor – Rachael Garcia, editor@recordgazette.net
12. Record Gazette Reporter – David James Heiss, dheiss@recordgazette.net
13. Sun Lakes Life Editor – Rachael Garcia, editor@recordgazette.net

14. Sun Lakes Country Club Board of Directors Vice President – Robert Walter, bob.walter@sunlakescc.com
15. Sun Lakes Country Club Board of Directors President – Marsha Midgett, marsha.midgett@sunlakescc.com

You could state that you are protesting the warehouse project based upon one or more of the following reasons:

1. Traffic congestion currently being experienced at the Highland Springs underpass of the I10 and on Highland Springs Avenue between the I10 and First Street (Beaumont) and Sun Lakes Boulevard (Banning).
2. Anticipated additional traffic congestion from the hundreds of trucks traveling between the I10 and the warehouse complex.
3. Anticipated noise emanating from the warehouse and from the hundreds of trucks traveling between the I10 and the warehouse and moving within the warehouse complex.
4. Anticipated pollution caused by hundreds of trucks traveling to and from the warehouse and moving within the warehouse complex.

FUNDING

As you can imagine, we will need funds to accomplish this effort. The following are the types of expenditures we anticipate:

1. Commercial copying;
2. Printing supplies;
3. Website registration and monthly charges;
4. Billboards and signs;
5. Newspaper advertisements;
6. Posters and flyers; and
7. Legal fees.

If you can contribute to help fund our expenses, please contact Randy Robbins at randyllump@yahoo.com or Howard Katz at hkatz@twopawz.net. A contribution button is located on our website for your convenience. Please note, contributions to this project are not tax deductible.

WEBSITE

Our internet domain name was registered with Godaddy and our website is currently operational, thanks to our web expert Lyndon Taylor. Please visit our website www.passactiongroup.org.

JOIN OUR GROUP

When you visit our website click on **CONTACT US** at the top of the screen. A new page will be displayed where you can request to **JOIN OUR GROUP** and provide your thoughts about the warehouse. Please enter your personal contact information and any comments you want to make.

Joining is free and you will receive in return updates about our activities. We will keep your personal information confidential, that is, we will not distribute our membership database.

Subject: Banning Point Project

Mayor Kyle Pingree,
Mayor Pro Tem Colleen Wallace
Councilman Alberto Sanchez
Councilwoman Mary Hamlin
Councilman David Happe

We are writing to ask that you vote against building warehouses in a residential area and specifically to vote against the Banning Point Project on Sun Lakes Boulevard near Highland Springs Avenue.

We moved to this area almost 24 years ago because of the rural beauty of Banning. During that time, we have watched Beaumont explode with growth (both residential and commercial). Traffic on Highland Springs Avenue is reflective of that growth, all without anything being done to improve the current infrastructure.

Change is inevitable and we would like to see growth and municipal income for the city Banning, but building a warehouse in a residential part of the city is not the way to achieve that. The eastern end of Banning has very little in the way of services such as grocery stores, shopping opportunities and service based industries that would generate income for the city. Bringing in these type of businesses would serve the residents, provide jobs and tax dollars.

As an alternative to a warehouse, the land could be utilized to build a sit-down restaurant(s), a shopping venue, office buildings or service based businesses, providing much needed services for residents, jobs, and tax dollars.

The truck traffic that the Banning Point warehouse will bring will make the traffic on Highland Springs Avenue untenable while significantly increasing air and noise pollution.

We are asking that you please vote NO on the Banning Point Project.

Sincerely,

William & Anita Lawrence

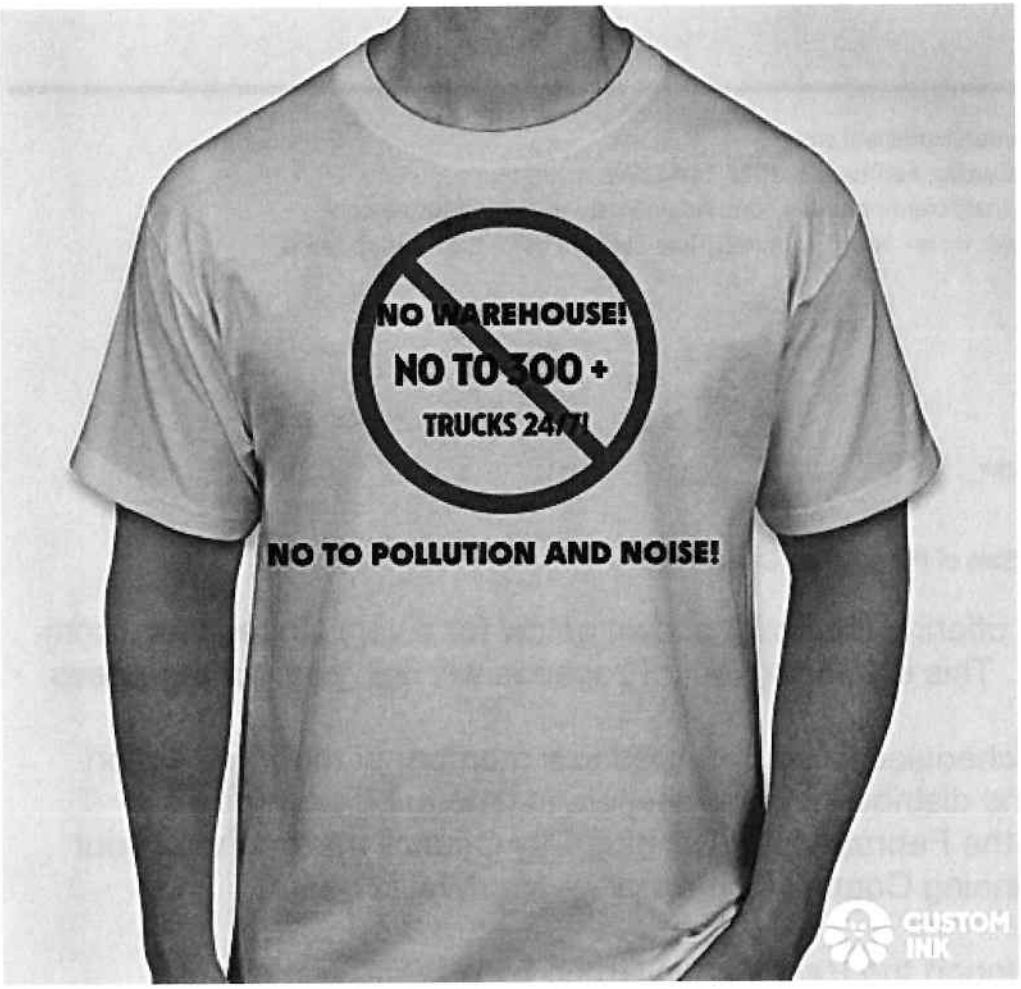
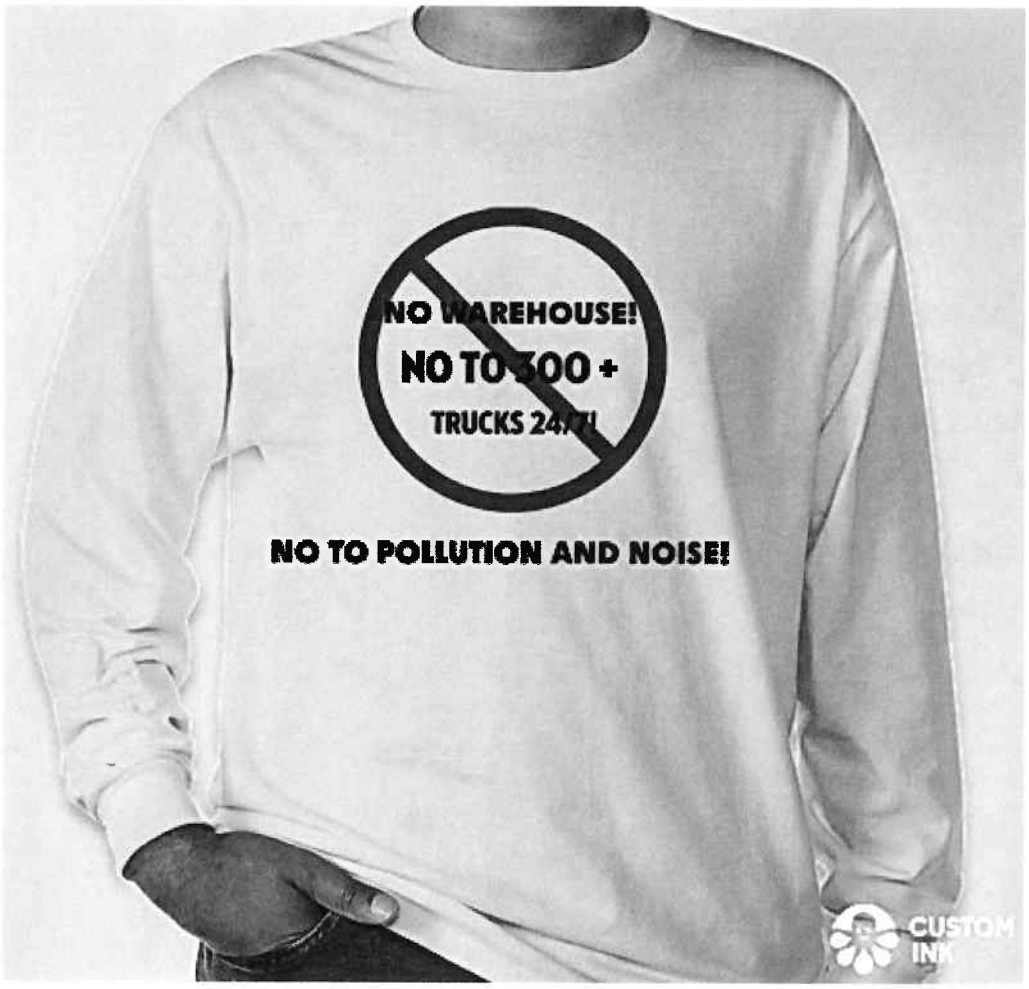
Subject: ===> Hurry - Limited Time Sale of Pass Action Group Shirts

The Pass Action Group is offering the shirts shown below for a very limited time, from now through February 7th. This is a fundraiser. Proceeds will help pay our legal fees.



The shirts you order are scheduled to be delivered to a member of the Pass Action Group on February 14th and distributed to purchasers in time to be worn at our February 16th protest and the February 17th Banning City Council meeting when our appeal of the Banning Planning Commission's project approval is heard.

Join the opposition and support the Pass Action Group by wearing one of our shirts. Just click on the following link:



https://www.customink.com/g/cmz0-00cj-aw9r?pc=TXN-173480&utm_campaign=gof_org_open&utm_content=body_gof&utm_medium=email&utm_source=gof_org_txn

The following are pictures of the shirts being offered. Just click on the above link to transfer to the webpage where you can order them.

> I hope you can read the attached article I wanted to bring to your attention not only this article but something about the developers or creation that you are working with I've been looking on their website and I wanted you to take a look at how many black and brown people they have on their staff all of their publicity basically shows white wealthy men with a few white wealthy pretty slim women sprinkled in. I would like to encourage you to look closely at the warehouse development on sun lakes Boulevard. I would like you to look closely at the infrastructure of firefighters how they fight fires for tilt up buildings the mega water needed how would they evacuate an assisted living facility with one way in and one way out with fire trucks fire hoses mega water different mutual aid working together radio frequencies command control the list goes on. I live in the 21st-century and I realize warehouses will come no matter how much I don't want them to and how much I know it will ruin our environment. But if all the places you put warehouses you must really see if you look with your heart and common sense and not dollar signs that this location for a refrigeration logistics warehouse is just not the right place the traffic trucks the roads the freeway first responders and the other millions and millions of square foot of warehouses that are coming. Money gets everybody's attention including mine but my community is not for sale not like this you tell me over and over again my friend you don't believe we're on the eve of destruction. If any of you would meet with me I would love to sit down and talk to you respectfully and share my thoughts
>
> two minutes in a public forum and I requested three minutes from the mayor but who knows? call me I owe a debt of gratitude that debt of gratitude is for the people who came before me the ones who wanted to protect the air the children the environment our cities. Subject: Current & Added Warehouse Traffic

Dear Banning City Council Members:

Currently, traffic on Highland Springs is horrendous; the addition of hundreds of trucks/day will create a real nightmare. So given that Highland Springs cannot handle current traffic, how can a mega warehouse project be approved? Have you personally witnessed the current amount of traffic on Highland Springs when the stores in Beaumont are open? Please come and observe traffic at about 4 pm, and you'll witness gridlock as drivers attempt to turn north from 2nd street onto Highland Springs. The proposed project will negatively affect the population of adjacent communities, businesses and also shoppers who come from surrounding cities.

Also, for the safety and welfare of Banning and Beaumont residents living south of the 10 Freeway, wouldn't it be prudent to have a fire station built south of the 10 before enabling warehouse truck traffic to slow down response times for fire and ambulance vehicles coming from north of the freeway?

I don't know where in Banning you live, but ask yourself one question: Would I want to live across the street from a mega warehouse with all the traffic, noise and pollution created by such a structure? It's inconceivable to think that any City Council Members could vote to approve such a project which will negatively affect thousands of residents within this area.

> **Subject: EMS, FIRE AND POLICE RESPONSE TIMES**
>
> Dear elected official(s), My name is Ray Frydendall, I am a newer resident of the 4 Season community. I am also a recently retired fire captain / paramedic. I served 33 years for the city of Alhambra Fire Department. Both my wife and I understand the importance of city revenue; however, there is the major importance of public safety in the community and the cities of Banning and Beaumont.
> As a former fire captain, I cant stress the importance of response times, specially to the retirement communities.
> The Riverside County Fire Department serves both communities of 4 Seasons and Sun Lakes. Both are 55+ communities with over 5000 homes combined.
> As you are aware, there are NO fire stations or police stations other than the CHP station south of the 10 freeway. The traffic on both Pennsylvania and Highland Springs is horrible as it is right now!
> If you add more traffic with the warehouse (semi-trucks), there will be no way for EMS, fire or police to have reasonable response times to these communities! This WILL result in loss of life and loss of property!
> I encourage you to look into the public safety aspect of the warehouse location and its affect on OUR public safety! The other option is to build more fire stations and police stations south of the freeway! I would really like to hear from you.
>
> Respectfully,
>

The warehouse is directly adjacent to an assisted living center with the most vulnerable residents in the city and adjacent to the many homes on the north side of Sun Lakes, and directly across the street from the rest of Sun Lakes.

From everything I have read, the city has not been honest or forthcoming about the pollution that would be caused 24/7 by refrigeration trucks polluting the air in the immediate vicinity of the thousands of homes belonging to Seniors in Banning.

This is shameful and a dereliction of duty of the elected officials in Banning.

DO NOT POLLUTE THE AIR THAT WILL DIRECTLY AFFECT THOUSANDS OF SENIORS LIVING IN BANNING.

Sincerely, Diane Nethercott

know that warehouses will be the thing of the future and I know that Banning needs funds but when I attended the meeting over a year ago this area was going to be a go to place for tourists and locals. It sounded great and now this. To put a warehouse right in our faces is unreal. Next to a health facility and in the midst of us seniors. You've heard thousands of times already our traffic is a mess. We are concerned about the air, ambulances and general getting around our towns. I beg you to please turn down this warehouse that is costing us so much money to fight and put something nice in it's spot. You can put the warehouses elsewhere where it won't interfere with our traffic and be an eye sore. Mary, I was hoping you would have looked out for us. I even let you put your sign in my yard when you were running. I pray everyday that you will listen to the people of Banning and Beaumont and do the right thing. Don't put the warehouse in our faces.

Subject: Banning Pointe Warehouse Project

Surely you are aware of the grid lock which occurs multiple times daily or weekly on 2nd street and Highland Springs avenue. It's hard to imagine how bad traffic may get with all of the trucks the Banning Point warehouse project would bring from/to Highway 10, making traffic even worse than what is the case now. In addition, perhaps you've read about other cities' "buyers remorse" from the damage warehouses have done to the environment, health issues, and even infrastructure due to road damage these huge, heavy trucks cause. It's also been reported that the warehouse jobs proved to not be living wage jobs. For these reasons and many more that others are bringing to your attention, I implore you to think about all of the pluses and minuses and vote NO on the Banning Pointe warehouse project for the betterment

of citizens, young and old, of Banning. Thank you for your thoughtful consideration of my request.

City of Banning

Community Development Department

NOTICE OF PUBLIC HEARING AND NOTICE OF EXEMPTION FOR CONSIDERATION OF DESIGN REVIEW NO. 21-7008 & TENTATIVE PARCEL MAP NO. 21-4001, A PROPOSED INDUSTRIAL WAREHOUSE BUILDING MEASURING APPROXIMATELY 620,000 SQUARE FEET WHICH INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE AND SIX (6) RETAIL/RESTAURANT BUILDINGS, TOTALING 34,000 SQUARE FEET. THE TENTATIVE PARCEL MAP WILL SUBDIVIDE THE 37-ACRE PARCEL INTO THREE (3) LOTS, FOR FINANCING AND CONVEYANCE PURPOSES, WITHIN THE SUN LAKE VILLAGE NORTH SPECIFIC PLAN AREA. (APN: 419-140-057).

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning Planning Commission, to be held Tuesday, October 19, 2021, at 6:30 p.m. in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California, to consider a Notice of Exemption and Design Review No. 21-7008 and Tentative Parcel Map No. 21-4001, a proposed industrial warehouse building measuring approximately 620,000 square feet which includes 10,000 square feet of office space and six (6) retail/restaurant buildings, totaling 34,000 square feet. The tentative parcel map will subdivide the 37-acre parcel into three (3) lots, for financing and conveyance purposes, within the Sun Lake Village North Specific Plan Area. The Community Development Department has determined that the project is categorically exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15332 (Class 32 - Infill Developments) and has prepared a Notice of Exemption (NOE).

THE TENTATIVE PARCEL

MAP WILL INVOLVE THE SUBDIVISION OF THE 37-ACRE LOT IN THREE (3) LOTS WITHIN THE SUN LAKE VILLAGE NORTH SPECIFIC PLAN AREA. (APN: 419-140-057).

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning Planning Commission, to be held Tuesday, October 19, 2021, at 6:30 p.m. in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California, to consider a Notice of Exemption and Design Review No. 21-7008 and Tentative Parcel Map No. 21-4001, a proposed industrial warehouse building measuring approximately 620,000 square feet to include 10,000 square feet of office space; and six (6) retail/restaurant buildings totaling 34,000 square feet. The tentative parcel map will involve the subdivision of the 37-acre lot in three (3) lots within the Sun Lake Village North Specific Plan Area. The Community Development Department has determined that the project is categorically exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15332 (Class 32 - Infill Developments) and has prepared a Notice of Exemption (NOE).

PROPERTY OWNERS CERTIFICATION FORM

I, VINNIE NGUYEN certify that on May 18, 2021,

The attached property owners list was prepared by Riverside County GIS,

APN (s) or case numbers 419-140--57 for

Company or Individual's Name RCIT - GIS,

Distance buffered 300'

Pursuant to application requirements furnished by the Riverside County Planning Department. Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.

Community Development Department

NOTICE OF PUBLIC HEARING FOR CONSIDERATION OF DESIGN REVIEW NO. 21-7008 & TENTATIVE PARCEL MAP NO. 38164, A PROPOSED MIXED-USE INDUSTRIAL/RETAIL DEVELOPMENT ON APPROXIMATELY 37-ACRES OF A 47-ACRE PARCEL WITHIN THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN, AS AMENDED. THE PROJECT INCLUDES A SHELL INDUSTRIAL BUILDING MEASURING 619,959 SQUARE FEET, WHICH INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE. IN ADDITION, THE PROJECT PROPOSES SIX (6) RETAIL/RESTAURANT BUILDINGS TOTALING 34,000 SQUARE FEET. THE TENTATIVE PARCEL MAP WILL SUBDIVIDE THE 47-ACRE PARCEL INTO THREE (3) LOTS, FOR FINANCING AND CONVEYANCE PURPOSES. (APN: 419-140-057).

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning Planning Commission, to be held Wednesday, December 1, 2021, at 6:30 p.m. in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California, to consider Design Review No. 21-7008 and Tentative Parcel Map No. 38164, a proposed mixed-use industrial/retail development on approximately 37-acres of a 47-acre parcel within the Sun Lakes Village North Specific Plan, as amended (the "Project"). The Project includes a shell industrial building measuring 619,959 square feet, which includes 10,000 square feet of office space. In addition, the Project proposes six (6) retail/restaurant buildings totaling 34,000 square feet. The tentative parcel map will subdivide the 47-acre parcel into three (3) lots, for financing and conveyance purposes, within the Sun Lake Village North Specific Plan Area. Pursuant to the California Environmental Quality Act (CEQA) and the CEQA Guidelines, the Community Development Department has considered the potential environmental impacts of the Project. Community Development Department staff has also reviewed the Final Environmental Impact Report (FEIR) for the "Sun Lakes Village North Specific Plan Amendment No. 5" project certified by the City Council on December 8, 2020 (Resolution 2020-141) and the Statement of Overriding Considerations and Mitigation, Monitoring, and Reporting Program (MMRP) adopted by the Council on the same day, including the impacts and mitigation measures identified therein. Based on that review, the Community Development Department has determined that the Project and the circumstances under which the Project is undertaken do not involve substantial changes which will result in new significant environmental effects, and the Project does not involve new information of substantial importance which shows that the Project will have significant effects not discussed in the prior FEIR. All potential environmental impacts associated with the "Sun Lakes Village North Specific Plan Amendment No. 5" project and the Project are adequately addressed by the prior FEIR, the Statement of Overriding Considerations, the MMRP. Therefore, in accordance with CEQA Guidelines Section 15162 (Subsequent EIRs and Negative Declarations), a Notice of Determination (NOD) has a been prepared for the Commission to consider in conjunction with the Project.

To observe and participate in the online video portion of the meeting through your personal computer or device, follow this link:

Meeting ID: 827 9487 8682
Passcode: 894694
Dial in: +1 669 900 9128 US * Meeting ID: 827 9487 8682

To observe the live meeting through your personal computer, but not participate with video or oral comments, you may use your computer or smart phone to enter the following or click on the link:
https://banninglive.viebit.com

Information regarding the CEQA Determination, Design Review and Tentative Map, can be obtained by contacting the City's Community Development Department, Planning Division at (951) 922-3125, or by going to the City of Banning website at https://banningca.gov/Archive.aspx?AMID=60&Type=&ADID=

All parties interested in speaking either in support of or in opposition to this item are invited to attend the hearing by accessing the videoconference or by sending their written comments by email to scalderon@banningca.us or by mail to the Community Development Department, Planning Division, City of Banning at 99 E. Ramsey Street, Banning, California, 92220.

If you challenge any decision regarding the above proposal in court, you may be limited to raising only those issues you or someone else raised in written correspondence delivered to the Planning Commission Recording Secretary prior to, at, or during the time the Planning Commission makes its recommendation on the proposal; or, you or someone else raised at the public hearing or in written correspondence delivered to the hearing body at, or prior to, the hearing (California Government Code, Section 65009).

NOTICE OF PUBLIC HEARING FOR CONSIDERATION OF DESIGN REVIEW NO. 21-7008 & TENTATIVE PARCEL MAP NO. 38164, A PROPOSED MIXED-USE INDUSTRIAL/RETAIL DEVELOPMENT ON APPROXIMATELY 37-ACRES OF A 47-ACRE PARCEL WITHIN THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN, AS AMENDED. THE PROJECT INCLUDES A SHELL INDUSTRIAL BUILDING MEASURING 619,959 SQUARE FEET, WHICH

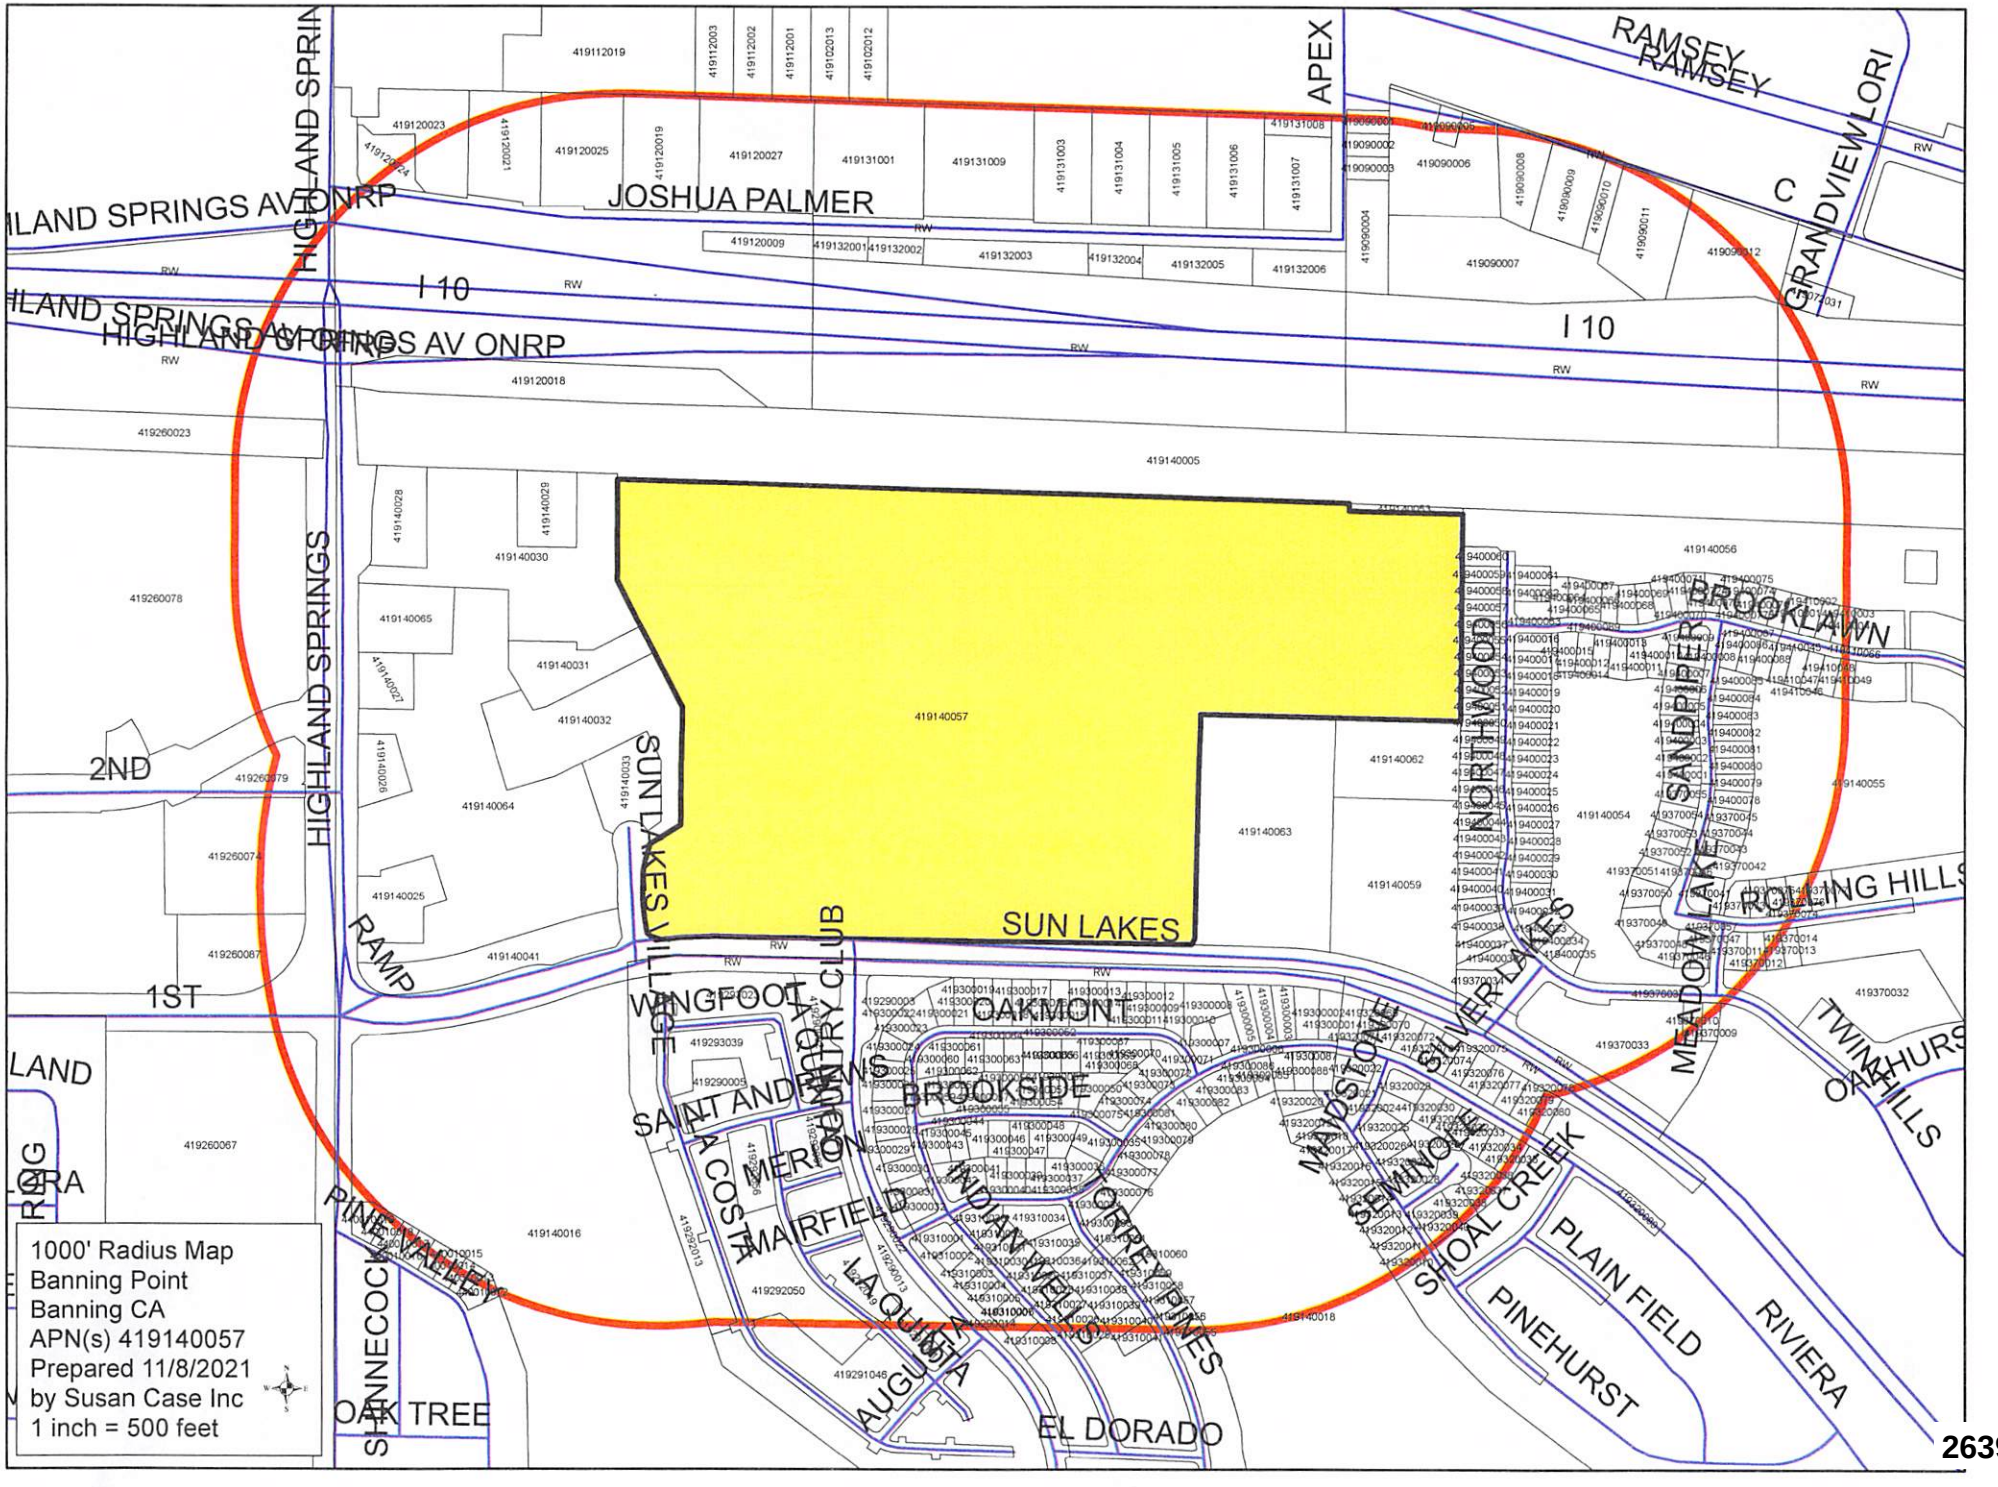
INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE. IN ADDITION, THE PROJECT PROPOSES SIX (6) RETAIL/RESTAURANT BUILDINGS TOTALING 34,000 SQUARE FEET. THE TENTATIVE PARCEL MAP WILL SUBDIVIDE THE 47-ACRE PARCEL INTO THREE (3) LOTS, FOR FINANCING AND CONVEYANCE PURPOSES. (APN: 419-140-057).

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning Planning Commission, to be held Wednesday, December 1, 2021, at 6:30 p.m. in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California, to consider Design Review No. 21-7008 and Tentative Parcel Map No. 38164, a proposed mixed-use industrial/retail development on approximately 37-acres of a 47-acre parcel within the Sun Lakes Village North Specific Plan, as amended (the Project). The Project includes a shell industrial building measuring 619,959 square feet, which includes 10,000 square feet of office space. In addition, the Project proposes six (6) retail/restaurant buildings totaling 34,000 square feet. The tentative parcel map will subdivide the 47-acre parcel into three (3) lots, for financing and conveyance purposes, within the Sun Lake Village North Specific Plan Area. Pursuant to the California Environmental Quality Act (CEQA) and the CEQA Guidelines, the Community Development Department has considered the potential environmental impacts of the Project

impacts of the Project. Community Development Department staff has also reviewed the Final Environmental Impact Report (FEIR) for the Sun Lakes Village North Specific Plan Amendment No. 5 project certified by the City Council on December 8, 2020 (Resolution 2020-141) and the Statement of Overriding Considerations and Mitigation, Monitoring, and Reporting Program (MMRP) adopted by the Council on the same day, including the impacts and mitigation measures identified therein. Based on that review, the Community Development Department has determined that the Project and the circumstances under which the Project is undertaken do not involve substantial changes which will result in new significant environmental effects, and the Project does not involve new information of substantial importance which shows that the Project will have significant effects not discussed in the prior FEIR. All potential environmental impacts associated with the Sun Lakes Village North Specific Plan Amendment No. 5 project and the Project are adequately addressed by the prior FEIR, the Statement of Overriding Considerations, the MMRP. Therefore, in accordance with CEQA Guidelines Section 15162 (Subsequent EIRs and Negative Declarations), a Notice of Determination (NOD) has a been prepared for the Commission to consider in conjunction with the Project.

To observe and participate in the online video portion of the meeting through your personal computer or device, follow this link:

https://us02web.zoom.us/j/82794878682?pwd=SFUrMGNKQVIQRHMxaTFHMnJI-Yk92QT09
Meeting ID: 827 9487 8682
Passcode: 894694
Dial in: +1 669 900 9128 US * Meeting ID: 827 9487 8682
To observe the live meeting through your personal computer, but not participate with video or oral comments, you may use your computer or smart phone to enter the following or click on the link: https://banninglive.viebit.com
Information regarding the CEQA Determination, Design Review and Tentative Map, can be obtained by contacting the City's Community Development Department, Planning Division at (951) 922-3125, or by going to the City of Banning website at https://banningca.gov/Archive.aspx?AMID=60&Type=&ADID=
All parties interested in speaking either in support of or in opposition to this item are invited to attend the hearing by accessing the videoconference or by sending their written comments by email to scalderon@banningca.us or by mail to the Community Development Department, Planning Division, City of Banning at 99 E. Ramsey Street, Banning, California, 92220.
If you challenge any decision regarding the above proposal in court, you may be limited to raising only those issues you or someone else raised in written correspondence delivered to the Planning Commission Recording Secretary prior to, at, or during the time the Planning Commission makes its recommendation on the proposal; or



district on the proposal, or, you or someone else raised at the public hearing or in written correspondence delivered to the hearing body at, or prior to, the hearing (California Government Code, Section 65009).

BY ORDER OF THE COMMUNITY DEVELOPMENT DIRECTOR OF THE CITY OF BANNING, CALIFORNIA

NOTICE OF PUBLIC HEARING FOR CONSIDERATION OF TENTATIVE PARCEL MAP NO. 38164 AND AN APPEAL BY THE PASS ACTION GROUP (PAG) OF THE PLANNING COMMISSIONS APPROVAL OF DESIGN REVIEW NO. 21-7008, BOTH FOR THE BANNING POINT PROJECT A PROPOSED MIXED-USE INDUSTRIAL AND RETAIL DEVELOPMENT ON APPROXIMATELY 37-ACRES OF A 47-ACRE PARCEL, WITHIN THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN, AS AMENDED. THE PROJECT INCLUDES A SHELL INDUSTRIAL BUILDING MEASURING 619,959 SQUARE FEET, WHICH INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE. IN ADDITION, THE PROJECT PROPOSES SIX (6) RETAIL AND RESTAURANT BUILDINGS, TOTALING 34,000 SQUARE FEET. (APN: 419-140-057)

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning City Council, to be held Tuesday, June 11, 2024, at 5:00 p.m. (or as soon thereafter) in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California. On May 6, 2024, a Riverside County Superior Court issued a Writ of Mandate in Pass Action Group v. City of Banning, et al., (1) ordering the City within 90 days to set aside and vacate all prior approvals of the Banning Point Project in which former City of Banning Councilmember Hamlin participated, including City Council Resolution 2022-14, Tentative Parcel Map No. 38164, Design Review 21-7008, and the Addendum and related CEQA findings for the Banning Point Project, and (2) instructing the City that any future hearing reconsidering approval of the Banning Point Project must be conducted without the participation of former Council Member Hamlin. In accordance with the Writ, the City Council will consider (without the participation of former Council Member Hamlin) (1) an application for approval of Tentative Parcel Map No. 38164, allowing the subdivision of approximately forty-seven (47) gross acres of vacant land into three (3) parcels, and (2) an appeal by the Pass Action Group (PAG) of the Planning Commission's approval of Design Review No. 21-7008, on December 1, 2021 (by adoption of Planning Commission Resolution No. 2021-16 by a 3-2-0 vote), together permitting the construction of a proposed mixed-use industrial and retail development on approximately 37-acres of a 47-acre parcel within the Sun Lakes Village North Specific Plan, as amended (collectively, the Project). The Project includes a shell industrial building measuring approximately 619,959 square feet, which includes approximately 10,000 square feet of office space. In addition, the Project proposes six (6) retail and restaurant buildings totaling approximately 34,000 square feet. The Project has been reviewed in connection with the requirements of the California Environmental Quality Act (CEQA) and the CEQA Guidelines. Community Development Department staff have reviewed the Final Program Environmental Impact Report (FEIR) for the Sun Lakes Village North Specific Plan Amendment No. 5 project, certified by the City Council on December 8, 2020 (by adoption of Resolution 2020-141), and the Statement of Overriding Considerations, including the Mitigation, Monitoring, and Reporting Program (MMRP), adopted by the City Council on the same day, to determine if the Project is within the scope of what was analyzed in that FEIR, which is now beyond challenge.. Based on this review, an addendum/consistency checklist, entitled Banning Point Addendum / Consistency Checklist to the Sun Lakes Village North Specific Plan Amendment No. 5 Environmental Impact Report (updated version dated February 10, 2022) (Addendum) has been prepared pursuant to Public Resources Code Section 21166 and CEQA Guidelines Sections 15162, 15164, and 15168(c). The Addendum evaluated the Projects potential environmental effects in light of those effects previously disclosed in the FEIR to determine whether any of the conditions described in CEQA Guidelines Section 15162 calling for subsequent CEQA review have occurred. Community Development Department staff have determined that no further environmental review is required, including pursuant to Public Resources Code Section 21166, or CEQA Guidelines Sections 15162 or 15163, because (i) the Project will not have new or substantially more severe impacts than what was disclosed in the FEIR; (ii) all applicable mitigation measures in the FEIR remain applicable to the Project and are imposed on the Project as a condition of approval; and (iii) the Project will not require any new mitigation measures, all as documented in the Addendum.

To observe the live meeting through your personal computer or smart phone enter the following link: https://banninglive.viebit.com or view on the Banning Government Channel on Cable Television Information regarding Tentative Parcel Map No. 38164, Design Review No. 21-7008, and the CEQA Determination (Addendum) can be obtained by contacting the City's Community Development Department, Planning Division at (951) 922-3125, or by going to the City of Banning website at https://banningca.gov/Archive.aspx?AMID=60&Type=&ADID= . All parties interested in speaking either in support of or in opposition to this item are invited to attend the public hearing or by sending their written comments by email to the Administrative City Clerk at cityclerks@banningca.gov or by mail to the City Clerk at City of Banning at 99 E. Ramsey Street, Banning, CA 92220. If you challenge any decision regarding the above Project in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Administrative City Clerk of the City of Banning at, or prior to, the public hearing (Cal. Gov. Code, 65009(b)(3)). BY ORDER OF THE COMMUNITY DEVELOPMENT DIRECTOR OF THE CITY OF BANNING, CALIFORNIA

The Project includes a shell industrial building measuring approximately 619,959 square feet, which includes approximately 10,000 square feet of office space. In addition, the Project proposes six (6) retail and restaurant buildings totaling approximately 34,000 square feet.

The Project has been reviewed in connection with the requirements of the California Environmental Quality Act (CEQA) and the CEQA Guidelines. Community Development Department staff have reviewed the Final Program Environmental Impact Report (FEIR) for the "Sun Lakes Village North Specific Plan Amendment No. 5" project, certified by the City Council on December 8, 2020 (by adoption of Resolution 2020-141), and the Statement of Overriding Considerations, including the Mitigation, Monitoring, and Reporting Program (MMRP), adopted by the City Council on the same day, to determine if the Project is within the scope of what was analyzed in that FEIR, which is now beyond challenge. Based on this review, an addendum/consistency checklist, entitled "Banning Point Addendum / Consistency Checklist to the Sun Lakes Village North Specific Plan Amendment No. 5 Environmental Impact Report" (updated version dated February 10, 2022) ("Addendum") has been prepared pursuant to Public Resources Code Section 21166 and CEQA Guidelines Sections 15162, 15164, and 15168(c). The Addendum evaluated the Project's potential environmental effects in light of those effects previously disclosed in the FEIR to determine whether any of the conditions described in CEQA Guidelines Section 15162 calling for subsequent CEQA review have occurred. Community Development Department staff have determined that no further environmental review is required, including pursuant to Public Resources Code Section 21166, or CEQA Guidelines Sections 15162 or 15163, because (i) the Project will not have new or substantially more severe impacts than what was disclosed in the FEIR; (ii) all applicable mitigation measures

in the FEIR remain applicable to the Project and are imposed on the Project as a condition of approval; and (iii) the Project will not require any new mitigation measures, all as documented in the Addendum.

NOTICE OF PUBLIC HEARING FOR CONSIDERATION OF TENTATIVE PARCEL MAP NO. 38164 AND AN APPEAL BY THE PASS ACTION GROUP (PAG) OF THE PLANNING COMMISSIONS APPROVAL OF DESIGN REVIEW NO. 21-7008, BOTH FOR THE BANNING POINT PROJECT A PROPOSED MIXED-USE INDUSTRIAL AND RETAIL DEVELOPMENT ON APPROXIMATELY 37-ACRES OF A 47-ACRE PARCEL, WITHIN THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN, AS AMENDED. THE PROJECT INCLUDES A SHELL INDUSTRIAL BUILDING MEASURING 619,959 SQUARE FEET, WHICH INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE. IN ADDITION, THE PROJECT PROPOSES SIX (6) RETAIL AND RESTAURANT BUILDINGS, TOTALING 34,000 SQUARE FEET. (APN: 419-140-057)

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning City Council, to be held Tuesday, July 9, 2024, at 5:00 p.m. (or as soon thereafter) in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California. On May 6, 2024, a Riverside County Superior Court issued a Writ of Mandate in Pass Action Group v. City of Banning, et al., (1) ordering the City within 90 days to set aside and vacate all prior approvals of the Banning Point Project in which former City of Banning Councilmember Hamlin participated, including City Council Resolution 2022-14, Tentative Parcel Map No. 38164, Design Review 21-7008, and the Addendum and related CEQA findings for the Banning Point Project, and (2) instructing the City that any future hearing reconsidering approval of the Banning Point Project must be conducted without the participation of former Councilmember Hamlin. In accordance with the Writ, the City Council will consider (without the participation of former Councilmember Hamlin) (1) an application for approval of Tentative Parcel Map No. 38164, allowing the subdivision of approximately forty-seven (47) gross acres of vacant land into three (3) parcels, and (2) an appeal by the Pass Action Group (PAG) of the Planning Commissions approval of Design Review No. 21-7008, on December 1, 2021 (by adoption of Planning Commission Resolution No. 2021-16 by a 3-2-0 vote), together permitting the construction of a proposed mixed-use industrial and retail development on approximately 37-acres of a 47-acre parcel within the Sun Lakes Village North Specific Plan, as amended (collectively. the Project). The Project includes a shell industrial building measuring approximately 619,959 square feet, which includes approximately 10,000 square feet of office space. In addition, the Project proposes six (6) retail and restaurant buildings totaling approximately 34,000 square feet. The Project has been reviewed in connection with the requirements of the California Environmental Quality Act (CEQA) and the CEQA Guidelines. Community Development Department staff have reviewed the Final Program Environmental Impact Report (FEIR) for the Sun Lakes Village North Specific Plan Amendment No. 5 project, certified by the City Council on December 8, 2020 (by adoption of Resolution 2020-141), and the Statement of Overriding Considerations, including the Mitigation, Monitoring, and Reporting Program (MMRP), adopted by the City Council on the same day, to determine if the Project is within the scope of what was analyzed in that FEIR, which is now beyond challenge. Based on this review, an addendum/consistency checklist, entitled Banning Point Addendum / Consistency Checklist to the Sun Lakes Village North Specific Plan Amendment No. 5 Environmental Impact Report (updated version dated February 10, 2022) (Addendum) has been prepared pursuant to Public Resources Code Section 21166 and CEQA Guidelines Sections 15162, 15164, and 15168(c). The Addendum evaluated the Projects potential environmental effects in light of those effects previously disclosed in the FEIR to determine whether any of the conditions described in CEQA Guidelines Section 15162 calling for subsequent CEQA review have occurred. Community Development Department staff have determined that no further environmental review is required, including pursuant to Public Resources Code Section 21166, or CEQA Guidelines Sections 15162 or 15163, because (i) the Project will not have new or substantially more severe impacts than what was disclosed in the FEIR; (ii) all applicable mitigation measures in the FEIR remain applicable to the Project and are imposed on the Project as a condition of approval; and (iii) the Project will not require any new mitigation measures, all as documented in the Addendum.

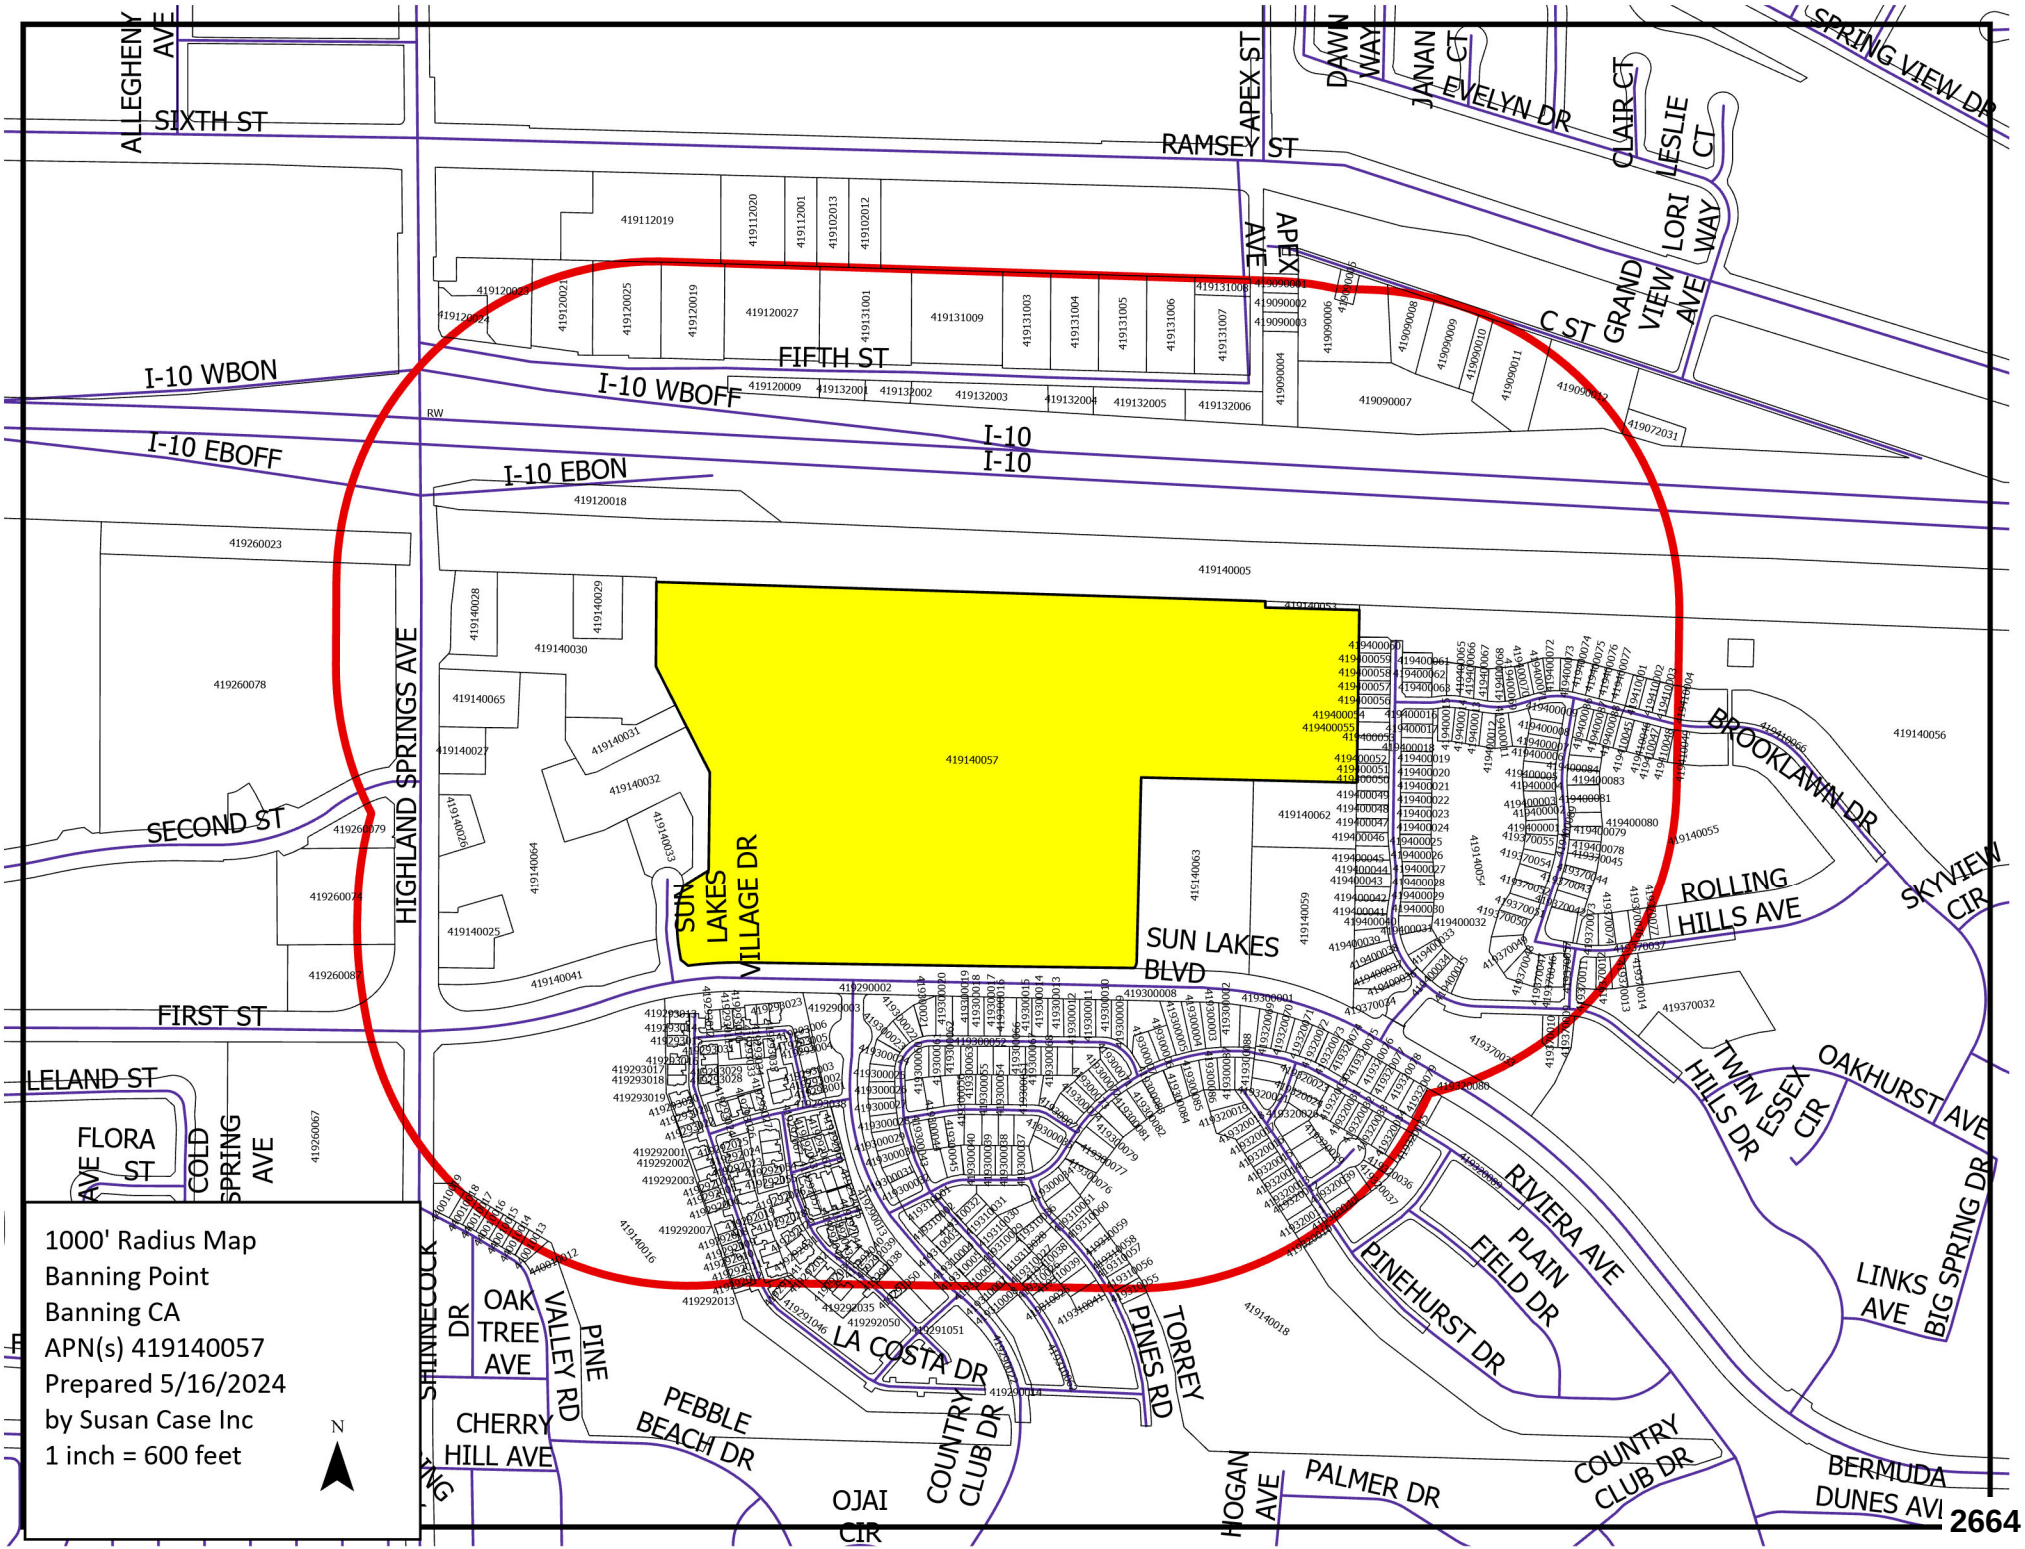
AFFIDAVIT OF MAILING OF NOTICE OF PUBLIC HEARING

Project: DR 21-7008 & TPM 38164

The undersigned hereby certifies as follows:

I am now, and at all times hereinafter mentioned was, the Development Project Coordinator of the City of Banning, California.



On the 25th day of June, 2024, pursuant to Government Code Sections 65091(a)(1) and (a)(4) and Banning Municipal Code Sections 17.68.020(B)(2) and (B)(3), I caused to be mailed by first-class mail, postage prepaid, a true and correct copy of the notice of public hearing attached hereto as Exhibit "B" to the owner of the real property that is the subject to the public hearing and to each property owner within 1000 feet of the subject real property, at the respective names and addresses listed in Exhibit "A," as shown on the latest equalized assessment roll or the records of the Riverside County Office of the Treasurer-Tax Collector.

I certify under penalty of perjury that the foregoing is true and correct.

Executed on the 25th day of June, 2024, at City of Banning, County of Riverside, State of California.

Sandra B. Calderon
Development Project Coordinator

NOTICE OF PUBLIC HEARING FOR CONSIDERATION OF TENTATIVE PARCEL MAP NO. 38164 AND AN APPEAL BY THE PASS ACTION GROUP (PAG) OF THE PLANNING COMMISSION'S APPROVAL OF DESIGN REVIEW NO. 21-7008, BOTH FOR THE BANNING POINT PROJECT A PROPOSED MIXED-USE INDUSTRIAL AND RETAIL DEVELOPMENT ON APPROXIMATELY 37-ACRES OF A 47-ACRE PARCEL, WITHIN THE SUN LAKES VILLAGE NORTH SPECIFIC PLAN, AS AMENDED. THE PROJECT INCLUDES A SHELL INDUSTRIAL BUILDING MEASURING 619,959 SQUARE FEET, WHICH INCLUDES 10,000 SQUARE FEET OF OFFICE SPACE. IN ADDITION, THE PROJECT PROPOSES SIX (6) RETAIL AND RESTAURANT BUILDINGS, TOTALING 34,000 SQUARE FEET. (APN: 419-140-057)

NOTICE IS HEREBY GIVEN of a public hearing before the City of Banning City Council, to be held Tuesday, July 9, 2024, at 5:00 p.m. (or as soon thereafter) in the Council Chambers, City Hall, 99 East Ramsey Street, Banning, California. On May 6, 2024, a Riverside County Superior Court issued a Writ of Mandate in Pass Action Group v. City of Banning, *et al.*, (1) ordering the City within 90 days to set aside and vacate all prior approvals of the Banning Point Project in which former City of Banning Councilmember Hamlin participated, including City Council Resolution 2022-14, Tentative Parcel Map No. 38164, Design Review 21-7008, and the Addendum and related CEQA findings for the Banning Point Project, and (2) instructing the City that any future hearing reconsidering approval of the Banning Point Project must be conducted without the participation of former Councilmember Hamlin. In accordance with the Writ, the City Council will consider (without the participation of former Councilmember Hamlin) (1) an application for approval of Tentative Parcel Map No. 38164, allowing the subdivision of approximately forty-seven (47) gross acres of vacant land into three (3) parcels, and (2) an appeal by the Pass Action Group (PAG) of the Planning Commission's approval of Design Review No. 21-7008, on December 1, 2021 (by adoption of Planning Commission Resolution No. 2021-16 by a 3-2-0 vote), together permitting the construction of a proposed mixed-use industrial and retail development on approximately 37-acres of a 47-acre parcel within the Sun Lakes Village North Specific Plan, as amended (collectively. the "Project"). The Project includes a shell industrial building measuring approximately 619,959 square feet, which includes approximately 10,000 square feet of office space. In addition, the Project proposes six (6) retail and restaurant buildings totaling approximately 34,000 square feet.

The Project has been reviewed in connection with the requirements of the California Environmental Quality Act (CEQA) and the CEQA Guidelines. Community Development Department staff have reviewed the Final Program Environmental Impact Report (FEIR) for the "Sun Lakes Village North Specific Plan Amendment No. 5" project, certified by the City Council on December 8, 2020 (by adoption of Resolution 2020-141), and the Statement of Overriding Considerations, including the Mitigation, Monitoring, and Reporting Program (MMRP), adopted by the City Council on the same day, to determine if the Project is within the scope of what was analyzed in that FEIR, which is now beyond challenge. Based on this review, an addendum/consistency checklist, entitled "Banning Point Addendum / Consistency Checklist to the Sun Lakes Village North Specific Plan Amendment No. 5 Environmental Impact Report" (updated version dated February 10, 2022) ("Addendum") has been prepared pursuant to Public Resources Code Section 21166 and CEQA Guidelines Sections 15162, 15164, and 15168(c). The Addendum evaluated the Project's potential environmental effects in light of those effects previously disclosed in the FEIR to determine whether any of the conditions described in CEQA Guidelines Section 15162 calling for subsequent CEQA review have occurred. Community Development Department staff have determined that no further environmental review is required, including pursuant to Public Resources Code Section 21166, or CEQA Guidelines Sections 15162 or 15163, because (i) the Project will not have new or substantially more severe impacts than what was disclosed in the FEIR; (ii) all applicable mitigation measures

in the FEIR remain applicable to the Project and are imposed on the Project as a condition of approval; and (iii) the Project will not require any new mitigation measures, all as documented in the Addendum.

To observe the live meeting through your personal computer or smart phone enter the following link: https://banninglive.viebit.com or view on the Banning Government Channel on Cable Television

Information regarding Tentative Parcel Map No. 38164, Design Review No. 21-7008, and the CEQA Determination (Addendum) can be obtained by contacting the City's Community Development Department, Planning Division at (951) 922-3125, or by going to the City of Banning website at https://banningca.gov/Archive.aspx?AMID=60&Type=&ADID=

All parties interested in speaking either in support of or in opposition to this item are invited to attend the public hearing or by sending their written comments by email to the Administrative City Clerk at cityclerks@banningca.gov or by mail to the City Clerk at City of Banning at PO Box 998, Banning, CA 92220, or personally deliver to: 99 E. Ramsey Street, Banning, CA 92220.

If you challenge any decision regarding the above Project in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Administrative City Clerk of the City of Banning at, or prior to, the public hearing (Cal. Gov. Code, § 65009(b)(3)).

BY ORDER OF THE COMMUNITY DEVELOPMENT DIRECTOR OF THE CITY OF BANNING, CALIFORNIA

AFFIDAVIT OF POSTING OF NOTICE OF PUBLIC HEARING

Project: DR 21-7008 & TPM 38164

The undersigned hereby certifies as follows:

I am now, and at all times hereinafter mentioned was, Development Project Coordinator of the City of Banning, California.

On the 25th day of June, 2024, pursuant to Government Code Section 65091(a)(5)(B), I posted a true and correct copy of the notice of public hearing attached hereto as Exhibit "B" at each of the two public places specified below.

I certify under penalty of perjury that the foregoing is true and correct.

Executed on the 25th day of June, 2024, at Banning, County of Riverside, State of California.

Sandra B. Calderon
Development Project Coordinator
City of Banning
