CITY COUNCIL REGULAR MEETING AGENDA
Tuesday, March 12, 2024
7:00 PM
City Council Chambers
City Hall, One Twin Pines Lane, Belmont, California

The meeting will be broadcast live to Belmont residents on Comcast Cable Channel 27, streamed live via the City's website at www.Belmont.gov. The public may also attend the meeting in the Chambers and address the Council from the Chambers.

PUBLIC COMMENT:
To maximize time for live public comment, we encourage members of the public to provide comments by joining the Committee meeting via Zoom : For web, visit https://belmont-gov.zoom.us/ select "Join" and enter **Meeting ID: 95745673035**. Use the Raise Hand feature to request to speak. You may rename your profile if you wish to remain anonymous.

For dial- in comments, call *67 1-(669) 900-6833 (your phone number will appear on the live broadcast if *67 is not dialed prior to the phone number), enter **Meeting ID: 95745673035**, and press *9 to request to speak. All public comments are subject to a 3-minute time limit unless otherwise determined by the Committee Chair.

If you wish to submit written public comment, you may send an email to cclerk@belmont.gov before the council considers the item. Please indicate the agenda item topic or agenda item number you wish to comment on in your email's subject line. Any public comment regarding agenda items that are received from the publication of the agenda through the meeting date will be made part of the meeting record but will not be read during the Council meeting.

Fund Types:

General Fund - Used to account for and report all financial resources not accounted for and reported in another fund.

Special Revenue Funds - Used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specific purposes other than debt service or capital projects.

Capital Projects Funds - Used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital ass

Debt Service & Other Funds - Includes funds used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest; funds used to finance and account for special activities and services performed by a designated department for other departments in the City on a cost reimbursement basis; and funds to account for operations financed and operated in a manner similar to a private business enterprise with the intent that the cost of providing goods and services is primarily financed through user charges; and funds used to account for assets held by the City as an agent.

Management Discussion and Analysis

(Items with unfavorable budget variance more than $0.1 million)

General Fund

Revenues

a) Taxes - The budget variance is primarily due to the timing of receipts. In addition, the majority of Sales Tax and Transient Occupancy Taxes (TOT) received in July are related to June activities, which are subject to an account adjustment.

b) Licenses and permits - The budget variance is primarily due to the timing of receipts and an accounting adjustment.

c) Miscellaneous - The budget variance is primarily due to the timing of the annual Crystal Springs Uplands School (CSUS) Public Service Fee, which will be received in a future reporting period.

Other Funds

Revenues

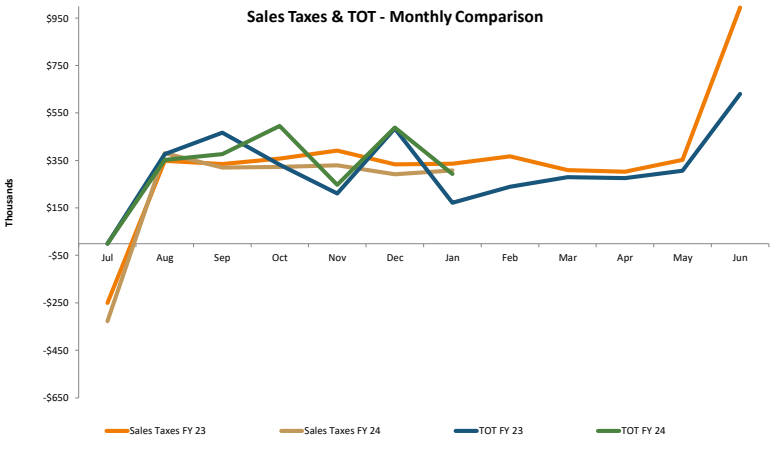
a) Taxes - The budget variance is primarily due to the timing of receipts. In addition, the majority of Sales Tax received in July are related to June activities, which are subject to an accounting adjustment.

d) Intergovernmental - The revenue will be received in a future reporting period.

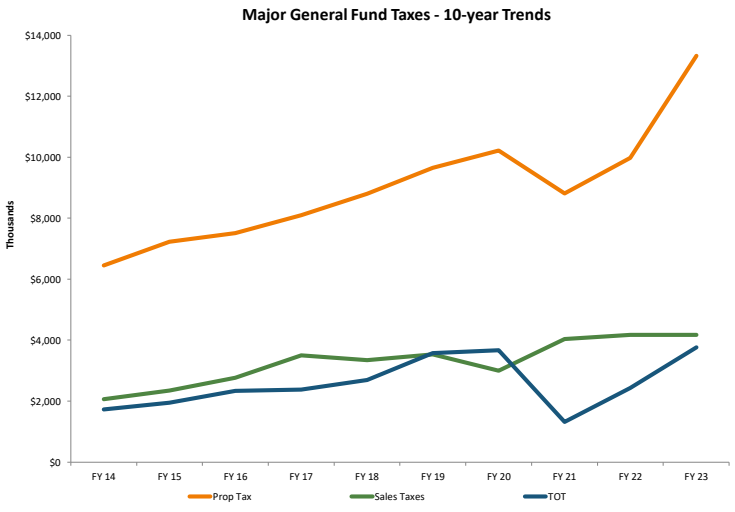
e) Charge for Services - Various in lieu/impact fees and sewer connection fee budgeted for are not materialized in the current reporting period.

f) Operating Transfers In – Budgeted operating transfers are recorded at the end of the fiscal year based on actual results.

Other Funds



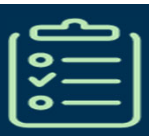
Expenditures



g) General Government - The annual insurance premiums and OPEB contributions were paid in July.

h) Public Safety - First quarter payments of $1.7M to BSCFD and $2.3M to San Mateo Consolidated Fire Department were made in July.

i) Debt Service - Semi-annual debt service on bonds were paid in August and January.



Trends

** July Sales Tax & TOT revenues received were for June activities and accrued to the previous FY. July revenues will be received in August.

ORDINANCE NO 2024-

AN ORDINANCE OF THE CITY OF BELMONT AMENDING BELMONT CITY CODE PROVISIONS IN CHAPTER 2, ARTICLE IV PERTAINING TO CITY ADVISORY BODIES

THE CITY COUNCIL OF THE CITY OF BELMONT DOES ORDAIN AS FOLLOWS:

SECTION 1. BCC CHP 2, ART VI AMENDED

Belmont City Code Chapter 2, Article VI is amended to read:

Article VI – City Advisory Bodies

Sec. 2-160 Title

This article, which may be referred to as "Boards and Commissions Code", specifies the city advisory bodies, whether designated a board, commission, or committee, created by the city council and establishes uniform rules for all city advisory bodies.

Sec. 2-161 Role in city government

City advisory bodies are those subsidiary legislative bodies of the city council whose membership does not include one or more members of the council. These city bodies advise and assist the city council and city staff in the development, implementation, and promotion of broad city goals and policies, and when expressly authorized by specific delegation of the city council, may make or participate in making city decisions that would otherwise be reserved to the city council and city staff. When making or participating in making city decisions, these bodies adhere to federal, state and local law as well as the policies and regulations adopted by the City Council and in doing so act solely for public as opposed to personal interest. City advisory bodies enhance city government when they promote effective and efficient city decision-making.

City advisory bodies play an important public-facing role in city government, acting as channels of communication and information between the city government and the general public and special interest groups, as an interface between the city council and the public, and as the venue for public hearings on city policy matters and project decisions. City advisory bodies help shape the public perception of city government and members should expect that their statements and conduct may be perceived by the public as a reflection of the City Council and the city government as a whole. As the public face of the Council, members of city advisory bodies are expected to conduct themselves in a manner consistent with council policy and the expectations of the Council as their appointing body, including the Code of Ethics and Conduct for Elected and Appointed Officials.

Sec. 2-162 Appointment

(a) Appointment to the city advisory bodies specified in this article are made by the City Council except as otherwise specified.

(b) Appointment to a city advisory body is based on such criteria as expertise, ability to

work well with staff and the public, commitment to fulfilling official duties, effectiveness as a representative of the City Council and city government, and commitment, fidelity and adherence to city values, policies, priorities and expectations as expressed by the City Council.

(c) Appointees assume their office upon taking the oath of office and continue until they resign their appointment in writing, their appointment is declared vacated, or a replacement is appointed and has taken the oath of office.

(d) Appointees are at will and serve at the pleasure of the city council. Appointees have no vested rights in the office to which they are appointed or to remain in office for any period of time. The City Council may declare an appointed office vacant at any time without cause. Any such action by the council is not intended to reflect or imply any defect in the integrity or character of the appointee.

(e) The appointment periods stated in this code for each body are established for the convenience of the City Council in making appointments and considering new appointments. Appointment periods begin on the first day of March and end on the last day of February unless the Council determines otherwise.

(f) Appointees serve without compensation except as the City Council may prescribe from time to time by resolution. Any such compensation may be reduced or eliminated at any time for an advisory body as a whole by the city council without cause.

Sec. 2-163 Qualifications to hold office

(a) To be eligible for appointment to a city advisory body, a prospective appointee must:

(1) Be a resident of the City of Belmont;

(2) Have submitted a statement to the city clerk acknowledging he or she has read and understands the City's Code of Ethics and Conduct; and,

(3) Not be an officer and employee of the city, except as otherwise provided herein.

(b) An appointee must, throughout the period of appointment, be eligible to hold office under subsection (a) and timely comply with the following requirements:

(1) Submit documentation to the city clerk attesting that the appointee has completed the ethics training specified by Government Code Section 53235 ("AB 1234 training") within 30 days of assuming office and thereafter by April 1 of every other year; and

(2) Submit a completed California Fair Political Practices (FPPC) Statement of Economic Interests ("Form 700") to the city clerk within 30 days of assuming office and each year thereafter by the April 1.

(c) If the city manager determines that an appointee has failed to meet any of the qualification requirements in subsections (a) or (b), he or she must provide a written notice of disqualification to the appointee.

(d) An appointee who fails to possess qualifications specified in subsection (a) is deemed to have vacated his or her office upon commencement of the noncompliance.

(e) An appointee who fails to maintain qualifications specified in subsections (b)(1) or (b)(2) may not after notice from the city manager participate as a member of the city advisory body to which the person was appointed during the period of noncompliance, and may not receive compensation for the period of noncompliance.

Sec. 2-164 Procedures applicable to all city advisory bodies

(a) Meetings.

(1) City advisory bodies are to conduct their meetings in accordance with the Brown Act, the principles of due process, Rosenberg's Rules of Order, as may be revised from time to time, and the council's Code of Ethics and Conduct for Elected and Appointed Officials. Each body may adopt such supplemental procedures as are consistent with this section, the policies and regulations adopted by the city council, the administrative policies of the city manager, and state and federal law.

(2) Regular meetings of city commissions are held in the city council's chambers and commence at 7 p.m. All other city advisory bodies' regular meetings are held at City Hall in the room and at the time designated on the agenda.

(3) Agendas for city advisory bodies are prepared by the secretary to the body in consultation with the chair.

(4) City advisory body meetings must substantially follow the procedural rules in the city council's protocols, as amended, for order of business and rules of discussion, and addressing the body. For purposes of application to the advisory body, references to the council, mayor, and city clerk mean the advisory body, the chair, and the secretary, respectively. Failure of an advisory body to follow the protocols does not affect the jurisdiction of the body or invalidate action taken at a meeting that is otherwise in conformity with the law.

(b) Officers. By April 15 of each calendar year, the members of a city advisory body are to meet in regular session and elect from their members a chair and vice-chair. The role of the chair, and in his or her absence the vice-chair, is to conduct the meetings and facilitate discussions of the body and to enforce meeting protocols. The chair and vice-chair hold office for one year or until their successors are elected.

(c) Quorum. A majority of the appointed voting members of a city advisory body constitutes a quorum. A member who abstains from voting is counted as present for purposes of determining quorum.

(d) Voting on motions. City advisory bodies take formal action by motion. Unless otherwise specified by the city council or required by law, a simple majority of the members present and voting is required to pass a motion. A member who abstains from voting is not counted as voting for purposes of determining a majority.

(e) Minutes. Each city advisory body keep summary minutes. The minutes are maintained

on file in the department of the staff person assigned to be the secretary of the body.

(f) Teleconferencing. Teleconferencing by city advisory body members is permitted, and must comply with Government Code Section 54953(b) and the Council's rules for teleconferencing by Council members. The agenda and information describing the particular location where the teleconference will take place should be posted at or near the main entrance of the facility containing the teleconferenced location as soon as feasible but not less than six hours before commencement of the meeting.

(g) City Policies. Members of city advisory bodies must conduct themselves in accordance with city administrative polices including use of technology and the management of public records.

(h) The procedures applicable to city advisory bodies may be established and amended by council resolution, and when so established or amended and in conflict with this section, supersede this section.

Sec. 2-165 Fiscal limits

City advisory bodies must not incur, allow or permit to accrue any debt or liability in excess of available funds appropriated for its purposes by the city council.

Sec. 2-166 Established city advisory bodies

(a) Planning commission.

(1) A planning commission consisting of a minimum of five and maximum of seven members is created.

(2) Planning commission appointments are for three years unless otherwise determined by the city council.

(3) The duties of the planning commission are as follows:

(A) Review and recommend to the city council the adoption of amendments to the general plan.

(B) Exercise the control provided by city ordinances over the subdivision of land within the city.

(C) Exercise the control provided by city ordinances over the zoning plan and advise as to proposed changes in the plan.

(D) Perform such other functions and duties as may be required by other city ordinances.

(E) Perform such other duties as may be assigned to the commission by the city council.

(4) Regular meetings of the planning commission take place on the 1st and 3rd Tuesdays of the month.

(b) Parks and recreation commission.

(1) A parks and recreation commission consisting of a minimum of five voting members and a maximum of seven voting members and two non-voting youth members is created. The two non-voting youth members must be at least 13 years old, and no more than 17 years old at the time of appointment ("youth commissioners") and must present parental/guardian consent to be considered for appointment. The youth members may not receive compensation and serve only in an advisory capacity.

(2) Parks and recreation commission appointments are for one year for a youth commissioner and two years for other members unless otherwise determined by the city council.

(3) The duties of the parks and recreation commission are as follows:

(A) Advise the city council on the adoption and amendment of policies and programs in the general plan related to city recreation and open space in accordance with Government Code Sections 65353 and 65354.

(B) Advise the parks and recreation department on standards for and matters related to development of recreational areas, facilities, parks and programs.

(C) Assist the parks and recreation department in making periodic inventories of recreational services and facilities and parks that exist or may be needed, and interpret such matters to the public and the city council.

(D) Advise the parks and recreation department in the preparation of the annual budget and long-range recreation and park capital improvement program.

(E) Advise the public works department regarding bicycle and pedestrian projects eligible for Transportation Development Act local transportation funding and the development of comprehensive bicycle plans.

(F) Perform such other duties as may be assigned to the commission by the city council.

(4) Regular meetings of the parks and recreation commission take place on the 1st Wednesday of the month.

(c) Measure I Advisory Committee.

(1) Committee established. A Measure “I” Advisory Committee consisting of a minimum of three and a maximum of five members is created to report annually to the city council regarding the collection and expenditure of revenue from Measure “I”, the Belmont Streets and City Services Measure, a one-half cent transaction and use tax.

(2) Committee appointments. Appointments to the committee are for three years unless otherwise determined by the city council.

(3) Committee duties. The committee's duties are to review and evaluate Measure "I" annual reports and the general scope of the associated audit work. Based on the

committee's review and the audit opinions of the independent auditor, the committee reports whether there is reasonable assurance that the Measure "I" money is being properly spent and reported on. The committee's report is be transmitted through the city manager's office to the city council for consideration at a city council meeting. The city manager will provide any reasonable administrative or technical assistance to enable the committee to fulfill its duties.

(4) Conflicts. In order to preserve the integrity and independence of the advisory process, committee members may not have a role in determining the use of revenue generated by Measure "I".

(5) Meetings. The committee meets once to be briefed on the annual budget (mid-year) and again to review the Measure “I” audit report.

Sec. 2-167. Roster of appointive positions.

In accordance with Government Code Section 54972, the city clerk must maintain an accurate roster of all regular and on-going city advisory bodies which are appointed by the city council. The roster is to list the qualifications for appointment, state that all appointments serve at the pleasure of the city council, and for each appointive position, the name of the current appointee, the date of their appointment, and the period of appointment applicable to their office.

Sec. 2-168. Subsidiary bodies.

City advisory bodies may not create subsidiary legislative bodies unless specifically authorized by the city council.

SECTION 2. EFFECTIVE DATE.

This Ordinance takes effect and is operational 30 days after its adoption.

STAFF REPORT

Meeting Date:	March 12, 2024
Agency:	City of Belmont
Staff Contact:	Bozhena Palatnik, Public Works Department, (650) 595-7463, bpalatnik@belmont.gov
Agenda Title:	2025 Sanitary Sewer Rehabilitation Project
Agenda Action:	Resolution

Recommendation

Adopt a resolution authorizing the City Manager to execute a Task Order with Schaaf and Wheeler Consulting Civil Engineers for an amount not to exceed $164,715 for 2025 Sanitary Sewer Rehabilitation Project.

Strategic Focus Area

Infrastructure and Mobility

Background

As part of the on-going Pavement Rehabilitation Program, City staff is planning to reconstruct pavement on 8 streets in summer of 2025. All streets are in poor condition and require significant amount of work. In an effort to avoid cutting into newly paved roads, staff assess the sewer infrastructure at these locations before they get repaved. Public Works Operations and Engineering staff video inspected all sanitary and storm sewer infrastructure located under these streets, evaluated the results, and determined that several sanitary sewer pipes are deteriorated and need to be replaced/repaired prior to pavement project. The infrastructure in need of repairs is located on the following streets:

- Forest Avenue
- Coronet Blvd.
- Ralston Frontage Rd
- Lower Lock Ave
- Comstock Circle
- E Street
- Pullman Avenue
- Monte Cresta Drive

Approximately 3,400 linear feet of pipes need to be replaced and/or repaired using open trench and/or trenchless methods.

Analysis

In order to complete the sewer repairs and replacements prior to the street rehabilitations, the City plans to complete the sewer construction by July 2025.

Staff solicited proposals from civil engineering firms under its on-call services to design, bid and provide construction support services, and selected Schaaf and Wheeler Consulting Civil Engineers for this project. The design will start in April 2024 and is projected to be finished before the end of the calendar year 2024, giving sufficient time to bid and construct the project.

Alternatives

1. Take no action.
2. Refer back to staff for further information.

RESOLUTION NO. 2024 –

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BELMONT APPROVING TASK ORDER WITH SCHAAF AND WHEELER CONSULTING CIVIL ENGINEERS FOR AN AMOUNT NOT TO EXCEED $164,715 FOR 2025 SANITARY SEWER REHABILITATION PROJECT

WHEREAS, Public Works staff video inspected sanitary and storm sewer pipes prior to 2025 Pavement project and discovered 3,400 linear feet of sanitary sewer pipes in need of repair/replacement; and,

WHEREAS, Staff solicited proposals from qualified civil engineering firms under existing on-call agreements; and,

WHEREAS, Staff selected Schaaf and Wheeler Consulting Civil Engineers to design this project for an amount not to exceed $164,715.

WHEREAS, $164,715 has been budgeted from the Residential Gravity Replacement Capital Improvement Project Account #399-3-730-7074-8331.

NOW, THEREFORE, the City Council of the City of Belmont resolves as follows:

SECTION 1. The City Manager is authorized to execute a Task Order with Schaaf and Wheeler Consulting Civil Engineers for an amount not to exceed $164,715.

Scope of Work

2025 Sewer Rehabilitation Project

December 6, 2023

This Scope of Work includes the preparation of bid documents, bid support services, and construction support services for the replacement, rehabilitation, and/or repair of sewer pipe segments as identified in Attachment A. This scope includes the review of the sanitary sewer mains within approximately 13,750 linear feet of proposed street rehabilitation areas with the assumption that approximately 20% of the sewer segments will need to be replaced, rehabilitated, and/or repaired. Review will include assessment of the City's existing available CCTV inspection data, field investigations, and manhole inspections.

Task 1: Meetings

Schaaf & Wheeler will attend three (3) design review meetings with the City.

Task 2: Data Collection and Review

Schaaf & Wheeler will collect existing available information from the City, including as-builts, reports, CCTV data, hydraulic modeling data and reports, and any other pertinent data available from the City.

Task 3: Sewer Assessment & Summary Memorandum

Schaaf & Wheeler will review, assess, and prioritize approximately 13,750 linear feet of sewer CCTV inspection video files and PACP reports. Schaaf & Wheeler will review the pipe segment locations to determine preliminary pipe repair methodologies and associated construction costs.

Schaaf & Wheeler will develop a report summarizing the data, review process, assessment methodology, and recommended capital improvements. A preliminary estimate of probable construction cost will be prepared and included in the report.

Task 4: Utility Coordination

Schaaf & Wheeler will coordinate with the utility companies to obtain their service maps and to coordinate the project. Utility maps will be used to develop the project basemap, this scope does not include any additional detailed utility investigations. Utility potholing is included as an optional task to this scope.

Schaaf & Wheeler will coordinate with and prepare figures for the Mid-Peninsula Water District in locations where the sewer lines are within 10 feet of the adjacent water lines.

Task 5: Site Visits

Schaaf & Wheeler will perform site visits for all proposed pipe repair locations to identify and document existing conditions, potential construction access routes, construction impacts, inspect manholes, and to identify existing utilities. The locations of proposed excavations and disturbance will be estimated in the field and the surface improvements will be documented. This scope assumes that two people will spend 2 days in the field. Schaaf & Wheeler will require assistance from City staff to coordinate access and locate manholes on private property and easements.

Schaaf & Wheeler will document the proposed impacts within the bid documents by either including details on the plans or including as an appendix to the specifications.

Task 6: 65% Design

Schaaf & Wheeler will initiate the detailed design effort which will include project basemapping, layouts of sewer lines, lateral locations based on CCTV data, utility locations based on utility basemaps and site visits, construction details, construction cost estimate, and a construction schedule. This scope assumes the following:

- Design documents will be prepared for the locations identified under Task 3. All sites will be prepared under one set of construction documents.
- Total length of sewer mains to be rehabilitated or replaced will be approximately 3,000 linear feet (20% of the sewer mains reviewed). This is based on review of similar sewer mains throughout the City. If the total length of sewer mains requiring repairs is larger than anticipated, additional fee may be required to proceed with detailed design.
- The detail and accuracy of the existing City's sewer basemaps should be sufficient to develop construction documents for all rehabilitation projects. Sewer re-alignment, easement research, and easement acquisition are not included within this scope of services. Topographic surveying is included as an optional task to this scope of services.

Task 7: 95% Design

After receiving and reviewing comments from the City, Schaaf & Wheeler will prepare the 95% construction documents. Construction documents will include detailed plans, technical specifications, and engineer's estimates.

The 95% plans will include detailed profiles for all locations where open trench or pipe bursting is proposed. The location of all laterals will be identified based on CCTV data and will be shown on the plans. Sewer flow rates based on the City's modeling/master plan will be included on the Drawings for sewer bypass designs to be prepared by the Contractor.

Task 8: Final Design

After receiving and reviewing comments from the City Schaaf & Wheeler will prepare the final construction documents. Construction documents will include bid-ready plans, technical specifications, City front end specifications, and engineer's estimates.

Task 9: Bid Support Services

Schaaf & Wheeler will provide bid support services which may include attendance at the pre-bid meeting, responding to questions from bidders, prepare addenda, and evaluation of bids.

Task 10: Construction Support

Schaaf & Wheeler will be available to assist the City as desired throughout the construction process. Construction support assistance may include:

- Pre-construction meeting attendance;
- Review and approve shop drawings and submittals;
- Review contractor's request for information (RFIs) and furnish additional drawings and/or specifications for supplementing, clarifying, and/or correcting purposes;

- Attend meetings and site visits when necessary (up six online or telephone meetings and two on site meetings/visits are included);
- Assist with the review of construction, and other activities, as required;
- Prepare, review, and recommend approval of change orders as required;
- Provide one set of reproducible record drawings that reflect the changes to the work during construction based upon Contractor markups, drawings and other data furnished by the Contractor, City, and Consultants. The record drawings will also be provided in AutoCAD format.

Optional Task A: Topographic Surveying

Schaaf & Wheeler's subconsultant, Kier & Wright will perform topographic surveying in limited locations deemed necessary to properly identify sewer slopes, utility alignments, etc. This scope of work includes approximately two days of topographic surveying, additional surveying can be provided for an additional fee if deemed necessary.

Optional Task B: Utility Potholing

Schaaf & Wheeler's subconsultant, Subtronic Corporation will perform utility locating where potential utility conflicts exist. Subtronic will USA all locations to be potholed. This scope includes up to two days of utility potholing, additional potholing can be performed for an additional fee if deemed necessary; however, we do not anticipate the need for a significant amount of potholing since most of the pipes will be replaced at a similar line and grade to the existing pipes.

Assumptions

- The tasks, approach, schedule and proposed fees included within this proposal assumes the following:
- Limited topographic surveying is included as an optional task, if additional surveying is deemed necessary it can be performed for an additional scope and fee.
- This scope a limited amount of detailed utility investigations and potholing as an optional task. Additional utility investigations and potholing can be performed for an additional fee if deemed necessary.
- This scope excludes geotechnical investigations and assistance.
- This scope excludes easement research and obtaining title reports.

Schedule

See the attached project schedule. The schedule has an assumed notice to proceed date.

Schaaf & Wheeler
CONSULTING CIVIL ENGINEERS

STAFF REPORT

Meeting Date:	March 12, 2024
Agency:	City of Belmont
Staff Contact:	Bozhena Palatnik, Public Works, (650) 595-7463, bpalatnik@belmont.gov
Agenda Title:	Salson Trail Storm Damage Repair Project
Agenda Action:	Resolution

Recommendation

Adopt a resolution authorizing the City Manager to execute a Task Order with Mott MacDonald Group, Inc. for an amount not to exceed $167,945 for design, bid, and construction support services for the Salson Trail Storm Damage Repair Project.

Strategic Focus Area

Infrastructure and Mobility

Background

The Salson Trail is an unpaved fire road in the City of Belmont (City) located south of the Sugar Loaf Open Space area near East Laurel Creek Road. The trail provides recreation opportunities and important emergency access for firefighting to approximately 100 acres of open space area along the tributary of Laurel Creek. The open space is tightly surrounded by residential neighborhoods in the Cities of Belmont and San Mateo. Additionally, the trail provides maintenance access to the 10-inch sanitary sewer line running along part of the trail and servicing approximately 400 houses. The sewer main is vitrified clay pipe (VCP) and is subjected to common aging conditions such as joint separation, root intrusion, and cracks.

During the large storm events in December 2022 and January 2023, part of the trail that crosses the tributary with a 48" storm culvert was damaged by excessive flow and overtopped the crossing. The events caused erosion of the banks, caused much of the emergency access road to collapse, and jeopardized the sanitary sewer main. The City has been working with FEMA to repair areas impacted from these storm events, via federal grant moneys available through the Hazard Mitigation and Public Assistance grant programs.

The risks associated with failure of the 48" culvert was qualitatively reviewed and include the following:

- Potential environmental hazards and fines associated with failure of the 10" sewer line under the trail.
- Potential debris flows and sediment deposition downstream.
- Frequent response and repair need for City O&M staff.
- Potential fire safety issues due to inability for fire crews to use the fire road.

The following improvements need to be completed as part of this project:

- Upsizing the existing 48-inch corrugated metal pipe (CMP) cross culvert to a 60-inch reinforced concrete pipe (RCP) to provide future resiliency for large storm events
- Installation of a concrete headwall and trash rack at the upstream end
- Installation of rip rap at the downstream end
- Replacement of the 10-inch sanitary sewer vitrified clay pipe (VCP) with modern materials meeting city standards
- Hydroseeding as site restoration and restoring unpaved dirt road within culvert limits so road can be utilized as an emergency access and maintenance road.

Analysis

City staff reached out to on-call consultants seeking design service for the project improvements, and Mott MacDonald Group, Inc. responded with the most comprehensive proposal that included the following tasks:

- Data collection, site visits, and environmental evaluation.
- Surveying, potholing, and coordination with permitting agencies.
- Preparation of 65%, 95% and 100% plans and specifications in accordance with the City's standards.
- Providing support services to City during bidding phase including responding to Requests for Information (RFIs) from bidders and evaluating bids received.
- Providing construction phase support services including but not limited to review of submittals, contract change order preparation and/or review, responding to RFIs, and as-built preparation.

This project is on a critical path for completion prior to next year's wet season. The project is anticipated to be completed by October 2024. The City will receive $186,795 from the Federal Emergency Management Agency (FEMA) Hazard Mitigation program and will need to fund the balance for the total project cost. During the design phase, an Engineer's Estimate will determine the actual construction costs, currently estimated to be around $650,000. Staff will seek Council approval at a later date for authorization to construct the project and allocate necessary City funds.

Alternatives

1. Take no action.
2. Refer back to staff for further information.

Council	Statutory/Contractual Requirement	Posting of Agenda

RESOLUTION NO. 2024 –

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BELMONT APPROVING A TASK ORDER WITH MOTT MACDONALD GROUP, INC. FOR AN AMOUNT NOT TO EXCEED $167,945 FOR DESIGN, BID, AND CONSTRUCTION SUPPORT SERVICES FOR THE SALSON TRAIL STORM DAMAGE REPAIR PROJECT

WHEREAS, the storm events of winter 2022/2023 damaged a 48" storm culvert that caused erosion and bank cutting, cut off the emergency access road, and jeopardized the sanitary sewer line services; and,

WHEREAS, the City has been working with FEMA to repair damages from these storm events, via federal grant moneys available through the Hazard Mitigation and Public Assistance grant programs; and,

WHEREAS, staff solicited proposals from qualified civil engineering firms under existing on-call agreements; and,

WHEREAS, staff selected Mott MacDonald Group, Inc. to design this project for an amount not to exceed $167,945; and,

WHEREAS, $167,945 has been budgeted from the Measure I Storm Capital Improvement Project Account #399-3-730-6020-9030.

NOW, THEREFORE, the City Council of the City of Belmont resolves as follows:

SECTION 1. The City Manager is authorized to execute a Task Order with Mott MacDonald Group, Inc. for an amount not to exceed $167,945 for design, bid, and construction support services for the Salson Trail Storm Damage Repair Project.

Mohamed Basma, PE

Mohamed.Basma@mottmac.com

Feb 27, 2024

Dear Bozhena,

Mott MacDonald Group Inc. (Mott MacDonald) is pleased to submit this Task Order (TO) proposal in accordance with our Master Architectural and Engineering Agreement to provide design services for the City of Belmont (City's) Culvert Replacement – Salson Trail Project (Project). This TO proposal was prepared in response to your email request on Feb 7, 2024, and subsequent follow-on discussions.

Project Understanding

We understand that the City of Belmont is seeking design plans as part of emergency repairs to an existing CMP culvert on Salson Trail that was damaged during the large storm events in December 2022 and January 2023. The project includes upsizing the existing 48-inch corrugated metal pipe (CMP) cross culvert to a 60-inch reinforced concrete pipe (RCP), a concrete headwall and trash rack at the upstream end, rip rap at the downstream end, replacement of the 10-inch sanitary sewer vitrified clay pipe (VCP), , hydroseeding as site restoration and restoring unpaved dirt road within culvert limits so road can be utilised as an emergency firefighting access and maintenance road. We understand from the project H&H report and from evaluation of aerial imagery that the culvert conveys flow from a recognized tributary to Laurel Creek. As a result, depending on the extent of work required and the methods proposed, culvert repairs could require permitting from one or more of the resource agencies. Our approach to environmental support for the project is designed to expedite environmental clearances as much as possible. Accordingly, our budget provides for us to assist by preparing a CEQA Notice of Exemption (NOE) for the City's use as soon as adequate information is available from design process (typically at 65% PS&E milestone). If this project is assigned to our team, early in the design process, we will initiate environmental evaluation of the site and initiate early coordination with agencies and provide insight into permit pathways. Assuming aquatic permits are required, we will discuss options to streamline authorization process and we will work with City to determine an efficient course of action. Permits are included as optional tasks in our budget and may need to be refined depending on which permit is triggered.

DocuSign Envelope ID: 40FADB07-A8C1-48B6-A416-7C1FFE11F199

Figure 1 - Culvert location on Salson trail and culvert condition

Scope of Work

Task 1 Project Management

Overall management of Mott MacDonald in-house staff including contract administration, budget and schedule control, monthly project reports, invoicing, coordination meetings with the City, and performing quality control. Mott MacDonald assumes a design project duration of three (3) months.

Deliverables:

- Kick-Off Meeting Agenda and Minutes
- Monthly invoices and progress reports
- Coordination Meeting Agendas and Minutes – a maximum of three (3) project meetings and one (1) meeting with Resource agencies

Task 2 – Field visit and Environmental Evaluation

This task will involve collecting and reviewing existing available CAD files and GIS data, as-built review for existing culvert and sanitary sewer system, determining if existing flowline elevations can be utilised, meeting with City Engineering and Maintenance team, reviewing hydrology and hydraulics reports, reviewing the City and Caltrans standards. This task will also provide for an early dialogue with three (3) of the resource agencies (as described to in Task 7), to verify permit pathways and confirm CEQA approach is acceptable strategy. To support these conversations, we will be conducting biological and ecological reconnaissance evaluation of the site to figure out the jurisdictional boundaries and any issues related to special-status species

Deliverables:

- Evaluation Memo verifying resource agency jurisdiction and permit pathways.

Task 3 – Plans Specifications and Estimates

This task of developing design plans for culvert and sewer line replacement, and roadway repair within project limits will involve reviewing the as-built and collected information and developing 65% design Plans, specifications, and estimates preparing a CEQA Notice of Exemption for the City's use, meeting with City personnel to review the 65% design package and producing a 100% PSE plan set that incorporates the City's comments and then proceed to develop a biddable set of documents.

Deliverables:

DocuSign Envelope ID: 40FADB07-A8C1-48B6-A416-7C1FFE11F199

- 65%PS&E. Anticipated list of engineering drawings will include –
    - General Plans (Title sheets, Notes and legend, key map and Demolition plan)
    - Plan, profile and details sheets for culvert and sewer line
    - Erosion control, tree protection plan
    - City Standard Details
- CEQA Notice of Exemption
- 65% Review Meeting Minutes
- Responses to City comments on the 65% submittal
- 100% PS&E documents
- Bid Package

Task 4 – Bidding Support

The team will attend the pre-bid meeting and respond to any bidder questions. Mott

Deliverables:

- Provide responses to up to two (2) bidder inquiries (RFIs)
- Preparation of up to one (1) bid addenda.

Task 5 – Design Services During Construction

The team will provide construction support by attending the preconstruction meeting, attend up to three (3) construction meetings, responding to contractor request for information (RFI) and attending a final walk through for punch list item as and providing status reports. This will be billed on a time and materials basis up to the approved budget.

Deliverables:

- Review and respond to contractor submitted RFI's .
- Review and respond to shop drawing submittals
- Preparing of Record Drawings (AutoCAD and PDF)

Task 6 – Cal OES and/or FEMA Coordination Support (Optional)

The team will provide assistance as needed for completion of OES forms in order for the city to claim reimbursement for the construction of the new culvert

Deliverables:

- As- needed technical assistance and support with OES forms.

Task 7 – Environmental Resource Agency Permits (Optional)

Through this task, the team will provide for preparation and submittal of Section 404 pre-construction notification, Section 401 Water Quality application package and Section 1602 Notification package. The team will provide with responses to questions by the Resource agencies on the application, assuming minor questions that need no further technical work and all permit fees are paid by City. Any additional expedited work related to cultural resource reporting will be additional. This task also assumes that any potential need for Incidental Take Permits for listed species cab be avoided by incorporating Avoidance of Minimization Measures (AMM's) into the project. The team is available to revisit the budget for this task as the permitting needs are clarified.

Deliverables:

- USACE Clean Water Act Section 404 permit
- RWQCB Clean Water Act Section 401 WQC permit

DocuSign Envelope ID: 40FADB07-A8C1-48B6-A416-7C1FFE11F199

- DFW Section 1602 Streambed Alteration Agreement

Assumptions

The following assumption were made for this proposal:

- Schedule assumes a two-week City review period. No other agency review has been assumed.
- City will identify and coordinate key stakeholders and operation staff for attending meetings.
- Mott MacDonald fee proposal is based on the hourly rates which are effective until June 30, 2024.
- Existing 10-inch VCP sanitary sewer pipe will be replaced from maintenance hole to maintenance hole (approximately 245 linear feet). It is assumed the pipe material for replacing the existing sewer pipe will be in accordance with City Standards.
- City will provide with AutoCAD file for existing ground and any GIS mapping available.
- Scope of work does not include National Environmental Policy Act (NEPA) compliance activities.
- Assuming a maximum of 17 PS&E plan sheets.
- Culvert headwall and rip rap for slope stabilization will conform to Caltrans Standards.
- Trench backfills and roadway improvements will conform to City Standards.
- Mott Macdonald assumes five (5) RFI’s and eight (8) shop drawing submittal reviews.

Exclusions

The proposal excludes the following services which can be provided at the request of the City at an additional cost:

- Relocation of other utilities
- Topographic survey
- Potholing activities/utility location
- Support for FEMA funding.
- Modeling to confirm pipe size and hydraulic sizing is excluded from the scope of services.

Schedule

Below is a tentative schedule and will be updated in more detail after the kick-off meeting.

NTP	March 20, 2024
Evaluation memo	May 1, 2024
Submit Draft Plans (65% PSE)	May 31, 2024
CEQA NOE	June 15, 2024
Submit Final Plans (100% PSE)	July 1, 2024
Bidding and Contractor Approval	August 15, 2024
Design Support during Construction	October 31, 2024

DocuSign Envelope ID: 40FADB07-A8C1-48B6-A416-7C1FFE11F199

Fee Proposal

Mott MacDonald will provide the above scope of services on a time-and-materials not-to-exceed fee basis in accordance with our Master Services Agreement. The estimated not to exceed fee is $76,592 as shown in the attached fee estimate. An additional $77,781 is estimated for two (2) optional tasks that includes the fee expected for any or all the permits that may be needed to construct the project.

Thank you for the opportunity to submit a TO proposal to complete this important work. Please feel free to contact me or Bindu Samudrala, the Project Manager, if you have any questions. Bindu can be reached by phone at (518) 986-1309 or via e-mail at himabindu.samudrala@mottmac.com.

Sincerely,

Mott MacDonald Group, Inc

STAFF REPORT

Meeting Date:	March 12, 2024
Agency:	City of Belmont
Staff Contact:	Laura Russell, Deputy Community Development Director, lrussell@belmont.gov
Agenda Title:	Agreement with Lisa Wise Consulting, Inc. for Planning Services
Agenda Action:	Resolution

Recommendation

Adopt a resolution authorizing the City Manager to negotiate and execute services agreements with Lisa Wise Consulting, Inc. totaling an amount not-to-exceed $73,792.

Strategic Focus Area

Economic Development and Housing

Background

From time to time the City uses third-party planning consultants for services related to policy analysis and zoning ordinance amendments. Since the comprehensive update to the General Plan and adoption of the Belmont Village Specific plan in 2017, the City has experienced significant development activity in the City. Through the process of reviewing and approving those projects, staff has identified opportunities to improve and clarify the zoning ordinance. Additionally, the zoning ordinance must be periodically updated to remain compliant with State law. These types of amendments require skilled planners with expertise which may not be readily available inhouse.

Analysis

Staff requests that the City Council authorize the procurement of planning services to assist with zoning ordinance amendments and specialized analysis. City staff believes the use of planning services is reasonable and appropriate for this type of specialized planning work. The work will be divided into three independent engagements (task orders no. 1, no. 2 and no. 3) and tasks will be billed on a time and materials basis, with close coordination with staff to ensure work product that meets the City's needs at a reasonable cost. The cost of this work will be paid from the General Plan Maintenance Fund, which is intended to fund ongoing advance planning needs to further the goals of the General Plan. The authorization for the planning services requested is limited to the amount of available funds appropriated within the fiscal year budget for that purpose.

The zoning ordinance amendments include:

- Task Order No. 1: Updates to implement the 2023-2031 Housing Element and State law;
- Task Order No. 2: Analyze maximum building height scenarios in the Corridor Mixed Use (CMU) District and implement appropriate zoning changes; and
- Task Order No. 3: Consolidation of two existing zoning sections related to parking to eliminate redundancies and be consistent with State law.

Lisa Wise Consulting, Inc. is a highly qualified consultant firm with experience in similar work for dozens of California cities. They employ planners with various specialized skills including technical code writing, policy analysis, market economics and architectural modeling. Staff recommends their services for completion of these phased zoning ordinance amendments.

Alternatives

1. Deny the request.
2. Continue the item for further discussion.

Fiscal Impact

☐ No Fiscal Impact

☒ Funding Source Confirmed: The current fiscal year 2023-24 operating budget in the General Plan Maintenance Fund (Account# 212-5-906-8351) includes sufficient funding for task orders no. 1 through no. 3 with Lisa Wise Consulting, Inc. totaling an amount not-to-exceed $73,792 towards long-range planning efforts. The costs are anticipated to be repaid via ancillary development and associated established fees.

RESOLUTION NO. 2024 –

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BELMONT AUTHORIZING THE CITY MANAGER TO NEGOTIATE AND EXECUTE SERVICES AGREEMENTS WITH LISA WISE CONSULTING, INC. TOTALING AN AMOUNT NOT-TO-EXCEED $73,792

WHEREAS, the City has need from time to time of planning services related to policy analysis and zoning ordinance amendments that require skilled planners with particular expertise; and,

WHEREAS, Lisa Wise Consulting, Inc. has demonstrated expertise in the planning and policy field as described in Exhibit A; and,

WHEREAS, the City has a General Plan Maintenance Fund which is intended to fund ongoing advance planning needs to further the goals of the General Plan; and,

WHEREAS, the current fiscal year 2023-24 operating budget in the General Plan Maintenance Fund (Account# 212-5-906-8351) includes sufficient funding for the combined scopes or work with Lisa Wise Consulting, Inc. totaling an amount not-to-exceed $73,792 towards long-range planning efforts. The costs are anticipated to be repaid via ancillary development and associated established fees; and,

NOW, THEREFORE, the City Council of the City of Belmont resolves as follows:

SECTION 1. The City Manager is authorized to negotiate and execute services agreements totaling an amount not-to-exceed $73,792 with Lisa Wise Consulting, Inc. to provide planning services related to policy analysis and zoning code amendments at the rates set forth in Exhibit B.

LWC

City of Belmont Zoning Ordinance Updates
Task Order #1: Housing Element Implementation

Prepared by Lisa Wise Consulting, Inc. (LWC)
February 29, 2024

This Task Order #1 prepared for the City of Belmont ("City") describes the work required to assist the City in completing the amendments to the City of Belmont Zoning Ordinance needed to fully implement the 6th Cycle Belmont Housing Element. The amendments are intended to implement identified Housing Element policies, bring the Ordinance into compliance with recent changes in State law, introduce best practices into the Ordinance, and make the Ordinance incrementally more effective and easy to use.

This Task Order #1 was initially requested by City staff at a November 21 meeting and subsequent emails regarding the City's needs related to the Housing Element certification. The scope below reflects the needs discussed in late 2023, the final adopted version of the Housing Element, and the Zoning Ordinance amendments that the City adopted in January 2024. All meetings are assumed to be conducted online via a video-conferencing platform.

SCOPE OF WORK

Task 1A: Meetings with City Staff (4)

LWC will prepare for and attend up to four one-hour meetings with City staff on the needed Zoning Ordinance amendments. At these meetings, topics may include, but are not limited to:

- Discussion of relevant background material (post-2017 General Plan amendments, recent Zoning Ordinance amendments, recent Specific Plans and Specific Plan amendments, Design Guidelines, Design Standards, etc.);
- Review of working Zoning Ordinance Amendments (graphics, format, content, cross-references, etc.); and
- Development of presentation slides.

Task 1B: Draft Zoning Ordinance Amendments

LWC will prepare Draft Zoning Ordinance Amendments needed to implement identified programs within the 6th Cycle Belmont Housing Element, as noted in a table prepared by City staff and shared with LWC. The amendments will include the following:

- Minor edits needed to account for new Objective Design Standards prepared by the City. No significant reformatting and additional graphics anticipated;
- Edits for consistency with AB 2162;
- Edits to define and regulate the following in accordance with State law: mobile home parks, farmworker housing, large residential care facilities, small residential care facilities, emergency shelters, transitional housing, and supportive housing;
- A revised definition of "family"; and
- Other amendments needed based on the most recent draft Housing Element, as noted by City staff.

LWC will prepare the amendments in a "track changes" version (Word) of all affected existing Zoning Ordinance sections for ease of review and discussion. This will include at minimum sections 2, 4, 5, 5A, 13, and 31. LWC will work with the City to identify additional sections that may require amendments and agree on actions to be taken. This may include but is not limited to sections 5C, 8, 9. Where appropriate, LWC will develop graphics to illustrate new standards. To prepare these documents, the City will provide LWC with current Word files of all affected Zoning Ordinance sections. Upon review of the draft material, the City staff will provide LWC with a single set of non-conflicting comments.

Task 1C: Presentation Assistance (Optional)

LWC will assist City staff in preparing for up to two public hearings with LWC attendance via a video-conferencing platform. LWC's effort will entail preparing draft PowerPoint slides that present the recommended Zoning Ordinance amendments, including background, context, and new content. LWC will coordinate with City staff on the organization and content of the slides. LWC will be available to support staff at the meetings on a time and materials basis over and above the fee specified in this purchase order.

Task 1D: Final Zoning Ordinance Amendments

LWC will prepare Final Zoning Ordinance Amendments needed to fully implement the 6th Cycle Belmont Housing Element. The Final Amendments will reflect the community's, Planning Commission's, and City Council's comments on the Public Draft, and will be prepared in coordination with City Staff. The Final Amendments will be delivered in "clean" and "track changes" versions of the existing Zoning Ordinance (Word and PDF).

BUDGET

Task Order #1 will be billed on a time and materials basis at the rates listed below. Invoices will be submitted monthly and contain a description of work complete by percentage and total amount due. The total "not to exceed" budget for Task Order #1 is $13,744. The subtotal by task is shown in the table below:

City of Belmont Task Order #1: Housing Element Implementation	Lisa Wise Consulting, Inc.								Total Hours Per Task	Subtotal by Task
	Principal		Director		Senior		Associate			
	$297		$250		$195		$160

LWC

City of Belmont Zoning Ordinance Updates
Task Order #2: CMU Building Height Analysis

Prepared by Lisa Wise Consulting, Inc. (LWC)
February 29, 2024

This Task Order #2 prepared for the City of Belmont ("City") describes the work required to assist the City staff, community, and decision-makers in studying and making a determination about the maximum building height in the CMU zone. While this study is not required to implement the adopted Housing Element policies, the study will assist the City in weighing its options for preserving neighborhood scale and character and providing flexibility for the range of allowable development types and designs envisioned in the CMU. All meetings are assumed to be conducted online via a video-conferencing platform.

SCOPE OF WORK

Task 2A: Meetings with City Staff (4)

LWC will prepare for and attend up to four one-hour meetings with City staff on the CMU building height study. At these meetings, topics may include, but are not limited to:

- Discussion of relevant background material (recent General Plan amendments, Zoning Ordinance amendments, Specific Plans and Specific Plan amendments, Design Guidelines, Design Standards, etc.); and
- Discussion of specific CMU buildout assumptions, scenarios, and working diagrams.

Task 2B: Height Analysis

LWC will prepare a series of diagrams to demonstrate options for different building maximum height scenarios. The analysis will demonstrate a range of potential scenarios on one typical CMU site to be determined in coordination with City staff. The analysis will include scaled plans, sections, and axonometric drawings that demonstrate:

- Development type, mix of uses, and building configuration;
- Residential density, non-residential FAR, residential unit sizes, on-site open space;
- Residential and non-residential parking locations/configurations and ratios, reflecting compliance with AB 2097 as well as market-driven parking demand based on developed and proposed comparable projects;

- Assumptions regarding affordability (use of State Density Bonus Law *or* Community Benefit program);
- Ground level floor-to-floor height, typical upper-story floor-to-floor height, and overall building height based on the City's rules of measurement for building height; and

The City's applicable Objective Design Standards as articulated in the Belmont Zoning Ordinance Section 13 Design Review, and how the standards impact the development capacity and building massing on the test site. The diagrams and analyses will be developed to assist the City staff, community, and decision-making bodies weigh relevant trade-offs and options, and, ultimately, determine an appropriate maximum base building height in the CMU zoning district.

Task 2C: Draft Zoning Ordinance Amendments

Draft Zoning Ordinance Amendments needed to reflect the decision-making bodies' determination on the appropriate base maximum building height in the CMU zoning district. The amendments will include a "track changes" version (Word) of all affected existing Zoning Ordinance sections for ease of review and discussion. Where appropriate, LWC will develop graphics to illustrate new standards. To prepare these documents, the City will provide LWC with current Word files of all affected sections. Upon review of the draft material, the City staff will provide LWC with a single set of non-conflicting comments.

Task 2D: Presentation Assistance (Optional)

LWC will assist City staff in preparing for up to two public hearings with LWC attendance via a video-conferencing platform. LWC's effort will entail preparing draft PowerPoint slides that present the building height analysis, including background, assumptions, context, and options. LWC will coordinate with City staff on the organization and content of the slides. LWC will be available to support staff at the meetings on a time and materials basis over and above the fee specified in this purchase order.

Task 2E: Final Zoning Ordinance Amendments

LWC will prepare Final Zoning Ordinance Amendments needed to fully implement the decision-making bodies' direction on the appropriate base maximum building height in the CMU zoning district. The Final Amendments will reflect the community's, Planning Commission's, and City Council's comments on the Draft, and will be prepared in coordination with City Staff. The Final Amendments will be delivered in "clean" and "track changes" versions of the existing Ordinance (Word and PDF).

BUDGET

Task Order #2 will be billed on a time and materials basis at the rates listed below. Invoices will be submitted monthly and contain a description of work complete by percentage and total amount due. The total "not to exceed" budget for Task Order #2 is $31,394. The subtotal by task is shown in the table below:

City of Belmont Task Order #2: CMU Height Analysis	Lisa Wise Consulting, Inc.								Total Hours Per Task	Subtotal by Task
	Principal		Director		Senior		Associate			
	$297		$250		$195		$160			
	Hours	Cost	Hours	Cost	Hours	Cost	Hours	Cost		
Task 2A: Meetings with City Staff (4)		$ -	4	$ 1,000	6	$ 1,170	6	$ 960	16	$ 3,130
Task 2B: Height and Analysis		$ -	4	$ 1,000	30	$ 5,850	30	$ 4,800	64	$ 11,650
Task 2C: Draft Zoning Ordinance Amendments		$ -	4	$ 1,000	12	$ 2,340	12	$ 1,920	28	$ 5,260
Task 2D: Presentation Assistance (Optional)		$ -		$ -	24	$ 4,680	24	$ 3,840	48	$ 8,520
Task 2E: Final Zoning Ordinance Amendments	2	$ 594	2	$ 500	4	$ 780	6	$ 960	14	$ 2,834
Total	**2**	**$ 594**	**14**	**$ 3,500**	**76**	**$ 14,820**	**78**	**$ 12,480**	**170**	**$ 31,394**

LWC

City of Belmont Zoning Ordinance Updates

Task Order #3: Zoning Ordinance Update – Citywide Parking

Prepared by Lisa Wise Consulting, Inc. (LWC)
February 29, 2024

This Task Order #3 prepared for the City of Belmont ("City") describes the work required to assist the City staff in preparing a new section of the Belmont Zoning Ordinance to address citywide parking and loading standards. The new section is intended to replace two existing sections that regulate parking and loading in the city: Section 8-Off-Street Parking and Loading and Section 8A-Off-Street Parking and Loading in Corridor Mixed-Use and Regional Commercial Districts.

While this study is not required to implement the adopted Housing Element policies, the study will implement City policies related to parking; retain existing parking and loading standards as appropriate; ensure that standards address the City's needs and priorities; and ensure that standards are legally compliant and reflect general best practices. In addition, the single chapter will make it easier and simpler for the City staff to interpret and enforce parking standards for applicant projects. All meetings are assumed to be conducted online via a video-conferencing platform.

SCOPE OF WORK

Task 3A: Meetings with City Staff (4)
LWC will prepare for and attend up to four one-hour meetings with City staff on the parking and loading Zoning Ordinance section. At these meetings, discussion topics may include, but are not limited to:

- Section contents and organization;
- General parking regulations;
- Parking area, stall, and loading area design standards;
- Parking and loading ratio for various uses;
- Bicycle parking standards; and
- Transportation Demand Management.

Task 3B: Draft Zoning Ordinance Section 8 - Off-Street Parking and Loading

LWC will prepare Draft Zoning Ordinance Amendments needed to introduce a single consolidated Off-Street Parking and Loading section into the Belmont Zoning Ordinance. The new section will be developed to:

- Combine existing sections 8 and 8A of the Belmont Zoning Ordinance;
- Eliminate redundancies and contradictions across the two existing sections;
- Implement relevant programs of the 6th Cycle Belmont Housing Element;
- Carry forward parking policies and standards of the General Plan and applicable specific plans as appropriate;
- Be consistent with State law;
- Recognize required concessions and incentives granted by State law;
- Reflect market conditions; and
- Implement best practices related to parking and loading standards and design.

LWC will prepare a new Section 8 of the Belmont Ordinance that is intended to replace existing sections 8 and 8A of the Belmont Zoning Ordinance. Where appropriate, LWC will develop graphics to illustrate new standards. In addition, LWC will prepare amendments to other sections of the Zoning Ordinance where needed to properly reference the new Section 8 and to reflect the deletion of Section 8A. To prepare these documents, the City will provide LWC with Word files for review and discussion. Upon review of the draft material, the City staff will provide LWC with a single set of non-conflicting comments.

Task 3C: Presentation Assistance (Optional)

LWC will assist City staff in preparing for up to two public hearings with LWC attendance via a video-conferencing platform. LWC's effort will entail preparing draft PowerPoint slides that present the new Section 8: Off-Street Parking and Loading, including changes, new standards, and existing standards to remain. LWC will coordinate with City staff on the organization and content of the slides. LWC will be available to support staff at the meetings on a time and materials basis over and above the fee specified in this purchase order.

Task 3D: Final Zoning Ordinance Section 8 - Off-Street Parking and Loading

LWC will prepare Final Zoning Ordinance Amendments needed to introduce a single consolidated Off-Street Parking and Loading section into the Belmont Zoning Ordinance. The Final Amendments will reflect the community's, Planning Commission's, and City Council's comments on the Public Draft, and will be prepared in coordination with City Staff. The Final Amendments will be delivered in Word and PDF files.

BUDGET

Task Order #3 will be billed on a time and materials basis at the rates listed below. Invoices will be submitted monthly and contain a description of work complete by percentage and total amount due. The total "not to exceed" budget for Task Order #3 is $28,654. The subtotal by task is shown in the table below:

City of Belmont Task Order #3: Zoning Ordinance Update - Citywide Parking	Lisa Wise Consulting, Inc.								Total Hours Per Task	Subtotal by Task
	Principal		Director		Senior		Associate			
	$297		$250		$195		$160

RE: LWC Statement of Interest for Assisting the City of Belmont with Zoning Amendments in Phases

Dear Ms. Russell:

STATEMENT OF INTEREST: Lisa Wise Consulting, Inc. (LWC) is very pleased to submit this Statement of Interest and our qualifications to assist the City of Belmont to prepare code amendments to implement 6th Cycle Housing Element Programs and assure consistency across regulatory documents in a phased approach. As such, LWC will develop the parameters of subsequent phases as part of the previous phase and proceed with each phase on the City's approval and issuance of a Purchase Order/Task Order.

FIRM PROFILE: As a firm that has focused on comprehensive zoning ordinance updates and audits and assisting California cities comply with housing regulation for over 17 years, this is a target project for us. Please find as part of this memo, the LWC Firm Profile.

KEY STAFF: Our team of national zoning ordinance experts includes Lisa Wise, AICP and Roger Eastman, AICP, each with over 30-year experience managing comprehensive zoning ordinance engagements throughout California, the U.S. and Middle East. Monica Szydlick. AICP, will serve as Project Manage and brings over 17 years of zoning ordinance, urban design, and project management experience to our team. Caroline Chen, LWC Associate has over 5 years of urban planning and urban design experience and will support the team with document management, research, document review and edit and graphics and design. Attached herein are resumes for each of these key staff.

As the owner and CEO of Lisa Wise Consulting, Inc., I will oversee all aspects of the project. Roger Eastman, AICP will serve as Project Director and support Monica Szydlick, AICP who will be responsible for communication with the City and for the quality and timely delivery of project deliverables.

We remain available to address questions or comments, appreciate the opportunity to work with the City of Belmont on this important project.

Sincerely,

Lisa Wise, AICP President, CEO (805) 595-1345

FIRM OVERVIEW

Lisa Wise Consulting, Inc. (LWC) is an urban planning and economics firm with national experience dedicated to creating zoning ordinances and development codes that enable pedestrian and transit-oriented neighborhoods, revitalize built environments, and facilitate sustainable, well-designed places to live, work, and recreate. LWC has a strong resume in zoning code updates and amendments, objective design and development standards, specific plans, design guidelines, and the economics of land use, with a constant focus on placemaking, community involvement, and feasible implementation.

LWC's core business is working closely with cities and counties to understand the community vision, assess and update policies, programs and regulations aimed at streamlining the development review process, establishing objective design and development standards, and accelerating housing production. We are equally focused on implementation, by considering economic, fiscal impacts, and eligibility for funding.

LWC is engaged on 12 objective design and development standard projects and have successfully completed 70 comprehensive zoning code updates, diagnoses, and regulatory compliance assessments; and over 130 long range planning, housing, economic, and finance projects on time and to our client's satisfaction.

LWC core capabilities:

- Objective Design and Development Standards and Design Guidelines
- Zoning Ordinances, Development Codes, and Form-Based Codes
- Specific Plans, TOD plans, and Downtown Plans
- Housing Policies, Affordable Housing, and Anti-Displacement Strategies
- Market Analyses, Revitalization Strategies, and Financial Feasibility Studies
- Public Engagement, Visioning, and Community Consensus Modeling

LWC was founded in 2006 and has offices in San Francisco, San Luis Obispo, and Los Angeles. LWC is a Disadvantaged Business Enterprise (DBE) in California and Texas and a certified California Small Business (SBE).

LISA WISE, AICP

President, CEO

LWC

As a certified planner, Lisa has over 30 years of experience in land development code audits and updates, specific plans, housing policy, financial feasibility analysis, and the economic assessment of land use. Lisa is considered a national expert on code reform and the former Treasurer and Chair of the Form Based Code Institute (FBCI) as well as certified instructor for the FBCI courses.

Lisa has been directly responsible for a variety of projects that assess land use regulation, develop strategies for code updates, and support more vibrant and resilient communities. These include 70 code audits and updates, 35 economic engagements, 23 master and specific plans, 40 housing elements updates, and inclusionary and employee housing studies. Her work also includes Project Manager of Form Based Code Framework and Update in Riyadh (pop. 7 million) as well as a Code Assessment and Comprehensive Code and Map Update in Columbus, OH (pop. 920,000).

Lisa holds a Master's Degree in Accountacy from the University of De Paul in Chicago and a Master's in City and Regional Planning from California Polytechnic in San Luis Obispo, CA, where she is adjunct staff and lectures on Real Estate Finance and Housing.

MONICA SZYDLIK, AICP

Senior Associate

Monica brings over 17 years' experience in planning and urban design to LWC. She has focused her career on leading zoning code updates, zoning map updates, form-based development regulations, specific plans, transit-oriented development plans, streetscape design, and Objective Design Standards. Her skills include managing multi-disciplinary teams, meticulous attention to detail, deep understanding of land use regulations, facilitating community outreach, and delivering projects on time and within budget. Monica is an expert in integrating 3-D modeling, diagramming, and photo simulations for more attractive, publishing-quality reports and presentations. Monica brings a comprehensive approach that combines technical urban planning knowledge, an emphasis on architecture and design, and a focus on feasibility of implementation.

Monica holds a Master of Architecture from the University of Michigan and a Bachelor of Arts in History from the University of California, Berkeley.

Relevant Project Experience:

- Beaumont, CA | Objective Design Standards

CAROLINE CHEN

Associate

Caroline brings expertise in communicating how two-dimensional regulations influence the three-dimensional environment of residential neighborhoods, commercial corridors, and mixed-use zones. She is an expert in using the Adobe Creative Suite, SketchUp, AutoCAD, and other design programs to produce infographics, maps, and 3D models that enhance LWC's development codes and long-range plans. Caroline also brings experience in researching existing conditions and the assessment of zoning codes and specific plans. Caroline has taken on increasing responsibility, supporting the LWC Team on code updates in Las Vegas, Rancho Cucamonga, St. Helena, South San Francisco, and Woodland.

Caroline's professional background includes knowledge of the permit application and approval process through her work with San Francisco-based Geddes Ulinskas Architects. She holds a Bachelor of Science in City & Regional Planning and a minor in Landscape Architecture from California Polytechnic University, San Luis Obispo.

Relevant Project Experience:

STAFF REPORT

Meeting Date:	March 12, 2024
Agency:	City of Belmont
Staff Contact:	Brigitte Shearer, Parks and Recreation Director, (650) 595-7488, bshearer@belmont.gov
Agenda Title:	Review and Adoption of the Parks, Recreation, and Open Space Master Plan and the Environmental Impact Report Addendum to the 2035 General Plan
Agenda Action:	Motion

Recommendation

Adopt a resolution to approve the Parks, Recreation, and Open Space Master Plan and an Addendum to the previously approved adopted Environmental Impact Report developed for the City's 2035 General Plan.

Strategic Focus Area

Quality of Life

Background

Belmont's prior Parks and Open Space Master Plan was developed in 1992. Many of the goals within that plan were realized over the past three decades to develop the robust network of parks, fields, and open space that the community enjoys today. Semeria Park, Davey Glen Park, Belameda Park, College View Park, Patricia Wharton Park, Hastings Tot Lot, the Alexander Park permanent restroom, and open space trailheads are all results of that effort.

The City's 2035 General Plan, adopted in 2017, calls for an updated Master Plan to serve as a guiding framework for the planning, maintenance, development, and rehabilitation of Belmont's parks, recreation, and open space system implementable over a 15-year horizon.

The Parks, Recreation, and Open Space Master Plan (PROS Plan) project, initiated in December 2020, has culminated in a final document, organized as follows.

Executive Summary
Part I. Where We Are
- Chapter 1. Introduction
- Chapter 2. Context
- Chapter 3. Existing Conditions

Part II. Where We Want to Be
- Chapter 4. Community Input
- Chapter 5. Needs Assessment
- Chapter 6. Goals

Part III. How We Get There

Chapter 7. Strategies
Chapter 8. Recommendations
Chapter 9. Implementation

Appendices

Appendix A. Advisory Committee
Appendix B. Definitions
Appendix C. Park Inventory
Appendix D. NRPA Benchmarks
Appendix E. Amenity Projections
Appendix F. Open Space Management Plan
Appendix G. Prioritization Matrix
Appendix H. Probable Costs
Appendix I. Community Outreach

The PROS Plan project, originally planned for a 12-month effort, was extended by over 2 years to accommodate community outreach challenges due to the COVID-19 pandemic and, as a result of stakeholder input, the engagement of a consultant to conduct an Environmental Assessment and Recreation Use Assessment of Belmont's open space. Open space objectives, policies, and actions are included in the Open Space Management Plan (OSMP) developed by WRA, Inc, environmental consultants specifically engaged to conduct trail, wildlife, and vegetation assessments. The OSMP is included in the appendix of the PROS Plan.

The PROS Plan Advisory Committee held five meetings to review and provide comment on project milestones: March 4, 2021 to review the draft community survey; May 13, 2021 to review survey results and identify focus/stakeholder groups; September 30, 2021 to review draft recommendations for park improvements; April 5, 2022 to review PROS Plan and OSMP efforts to date and remaining tasks; and on May 31, 2022 to review the OSMP.

The Parks and Recreation Commission discussed the parks and park amenities component of the Master Plan during its July 21, 2021 meeting and outdoor recreation programming at its September 1, 2021 meeting. Gates + Associates presented the draft park improvement recommendations at the November 3, 2021 Parks and Recreation Commission meeting and at the November 23, 2021 City Council meeting. Staff also presented the draft park recommendations at the November 18, 2021 Youth Advisory Committee (YAC) meeting. At each Parks and Recreation Commission meeting in the first quarter of 2022 (January 12, February 2, and March 2), selected draft park improvements were presented and the public was encouraged to provide feedback on the Master Plan website, www.BelmontPROSplan.com.

An update on the PROS Plan, including the OSMP component, was presented to City Council on March 22, 2022 and to the Parks and Recreation Commission on May 4, 2022 and July 6, 2022.
The PROS Plan was recommended by the Parks and Recreation Commission on July 6, 2022 to the City Council for approval with the following amendments:

- Consolidate the OSMP's Base Plan and Management Alternatives objectives, policies, and

implementation actions into a single plan.

- Clearly present priority recommendations in the OSMP by theme - environmental sustainability, balanced recreation uses and trail management, and natural hazard mitigation.
- Pursue the creation of dedicated parkland in downtown Belmont and the Belmont Village Specific Plan area in response to potential residential density increase in the area due to anticipated housing unit development as outlined in the 2023-2031 Housing Element update.
- Apply consistent terminology to remove ambiguity.
- Refine specific graphics for clarity.

The PROS Plan (and OSMP) were presented to the City Council on July 12, 2022. Following numerous public comments and further deliberation, Council did not take any further action on the plan at that or a subsequent meeting.

The PROS Master Plan was originally intended to serve exclusively as a planning and feasibility study for the future of the City's parks and open spaces. This level of planning is statutorily exempt from CEQA analysis at the time of study, though potential projects reflected in the plan are subject to CEQA review before the city commits to proceed with the project. Staff evaluated the totality and degree of specificity of Plan's draft recommendations, including the OSMP's recommendations, and believes beginning CEQA review earlier than originally anticipated will benefit the City by (1) streamlining the future CEQA process for initiating individual projects, (2) ensuring timeliness of CEQA review, and (3) providing a fiscally prudent process for CEQA compliance.

WRA was engaged to prepare an initial study (IS) for the plan to determine if further environmental review under CEQA due to changes in the General Plan project, changes in circumstances, or new information.

Analysis

Throughout 2023, Gates + Associates further addressed the amendments recommended by the Commission, and WRA, Inc. comprehensively reviewed the City's existing environmental impact report (EIR) documents and the extent to which these documents addressed the Parks, Recreation, and Open Space (PROS) Master Plan and Open Space Management Plan (OSMP) recommendations. WRA, Inc. has prepared an EIR Addendum for the PROS Master Plan's recommendations as amended.

On January 10, 2024, both consultants attended the Parks and Recreation Commission's regular meeting to reintroduce the PROS Master Plan and its findings and recommendations. The final draft of the PROS Master Plan, including the OSMP and EIR Addendum, have been posted at BelmontPROSplan.com for community review. The community has been advised of the availability of documents through the following outreach channels.

Key Initiatives Summary

This Plan is meant to be a strategic roadmap that can adapt as times and circumstances change. This is even more timely as the City continues to plan its future in a post-Covid19 world. In addition, the financial realities of governments and public agencies nationwide have changed due to reduced revenues, and the Parks and Recreation Department will need to have an even greater emphasis on cost recovery to ensure long-term financial sustainability.

Despite these challenges, the Department's seasoned staff, committed to community's well-being and fostering a culture of collaboration, teamwork and forward-thinking, are essential for the successful implementation of the Plan.

The following Key Initiatives are the most significant desired outcomes and, when achieved, will serve as the legacy fulfilling the Plan's vision:

- Increasing the ease of access for all including walking and biking to PROS sites.
- Build and maintain multi-generational, multi-use recreation center(s), with replacement of the outdated and failing buildings at the Barrett Community Center site as a priority.
- Update outdated and failing park amenities including park restrooms, sports facilities, and infrastructure.
- Focus open space management on enhancing stream crossings, ensuring ADA-compliant access where feasible, implementing seasonal and weather-related maintenance guidelines, monitoring e-bike usage, implementing a fuels reduction plan, fostering volunteer programs, integrating trail calming features, and incorporating nature-based recreation initiatives.
- Diversify Funding Sources for long-term financial sustainability and plan to meet future levels of service, particularly in areas where development is planned.

At its February 7, 2024 meeting, the Parks and Recreation Commission's received a presentation from Gates + Associates and WRA, Inc. and subsequently unanimously recommended that the PROS Plan be presented to the City Council for adoption.

Alternatives

1. Take no action
2. Provide further input for additional revisions

RESOLUTION NO. 2024 –

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BELMONT ADOPTING THE PARKS, RECREATION, AND OPEN SPACE MASTER PLAN AND AN ADDENDUM TO THE PREVIOUSLY APPROVED ADOPTED ENVIRONMENTAL IMPACT REPORT DEVELOPED FOR THE CITY'S 2035 GENERAL PLAN.

WHEREAS, Belmont's prior Parks and Open Space Master Plan was developed in 1992, with many of its goals realized over past three decades to develop the robust network of parks, fields, and open space that the City enjoys today; and,

WHEREAS, the City's 2035 General Plan, adopted in 2017, calls for an updated Master Plan to be developed to guide Belmont's park, open space, and outdoor recreation vision, given current and future trends, constraints, and community needs; and,

WHEREAS, in September 2020 the City entered into a service agreement with Gates + Associates to develop a Parks, Recreation, and Open Space (PROS) Master Plan; and,

WHEREAS, the PROS Master Plan development included a site inventory and assessment; benchmarking and gap analysis for park sites and amenities; establishment of an advisory committee to provide feedback to the project team and consultants; engagement of an environmental consultant to develop an Open Space Management Plan; and development of outdoor recreation programming, park, and open space improvement recommendations; and,

WHEREAS, Gates + Associates and WRA, Inc., environmental consultants, have addressed clarifications recommended by the Parks & Recreation Commission in the PROS Master Plan and Open Space Management Plan, respectively; and,

WHEREAS, on October 24, 2017, the City Council adopted Resolution 2017-076 certifying a Final Program Environmental Impact Report for the Belmont 2035 General Plan, Phase 1/Interim Zoning, Belmont Village Specific Plan (BVSP), Belmont Village Zoning (BVZ), and Climate Action Plan; and,

WHEREAS, the City also engaged WRA, Inc, environmental consultants, to conduct a review of the City's existing environmental impact report documents and has prepared an EIR Addendum for the recommendations in the PROS Master Plan and Open Space Management Plan as amended (Proposed Project); and,

WHEREAS, following extensive community outreach; the Parks and Recreation Commission recommended the PROS Master Plan and Open Space Management Plan, including all Appendices and EIR Addendum, be presented to Council for adoption; and,

WHEREAS, the City Council has considered the EIR Addendum, the comments of the public both oral and written related to the Proposed Project, the staff reports and the materials in the record of the project.

NOW, THEREFORE, the City Council of the City of Belmont resolves as follows:

SECTION 1. The City Council concurs with the EIR Addendum findings and conclusions (attached hereto as Exhibit A) that the Proposed Project does not require a subsequent or supplemental EIR and that the Proposed Project will not result in new or substantially increased significant environmental impacts that were not previously disclosed in the certified 2017 EIR. The Council adopts the EIR Addendum and directs that all feasible mitigation measures included in the 2017 EIR be incorporated into the Proposed Project.

SECTION 2. The City Council adopts the PROS Master Plan and Open Space Management Plan, attached hereto as Exhibit B.

1.0 INTRODUCTION AND PURPOSE

The draft City of Belmont Parks, Recreation, and Open Space Master Plan (PROS Plan) is a strategic, forward-looking document that ultimately identifies decision-making framework and recommendations to plan, maintain, develop, and rehabilitate the City of Belmont's (City) network of parks, recreation, and open space (Gates + Associates, WRA Environmental Consultants, 2022). The preparation of the PROS Plan was in response to Policy 4.1-1 of the Parks, Recreation and Open Space Element of the 2035 General Plan (2035 GP) (City of Belmont, et al., 2017). This policy required an update to the 1992 City of Belmont Parks and Open Space Master Plan (Callander Associates, 1992). The PROS Plan studies the existing park system, outdoor recreation facilities and programming, and open spaces, including identifying goals, strategic actions, policies, and recommending park and open space improvements to be implemented over the next fifteen years.

Through the PROS Plan engagement process, public interest in the City's open space areas led to immediate implementation of Goal 7 in the PROS Plan: Develop and Implement an Open Space Management Plan (OSMP) – rather than implementation after completion of the PROS Plan. The OSMP was prepared based on an environmental assessment, a recreation assessment, and public input and is included in its entirety as Appendix G in the PROS Plan. OSMP components including existing conditions, management objectives, policies, and recommended actions are integrated within the PROS Plan framework. The PROS Plan is inclusive of the OSMP.

The potential impacts that may result from the adoption and implementation of the PROS Plan (hereafter referred to as the Proposed Project) are examined in this EIR Addendum to the certified City of Belmont General Plan, Phase I Zoning, Belmont Village Specific Plan, and Climate Action Plan Environmental Impact Report (2017 EIR) (State Clearinghouse [SCH] No. 2016082075) (City of Belmont, et al., 2017). The parks, recreation sites, and open spaces addressed in the Proposed Project lie within the geographic boundaries of the 2035 GP and potential impacts relate to the 2017 EIR. Two additional EIRs were reviewed and found to not fully apply to the Proposed Project including: 1987 San Juan Hills Area Plan EIR (SCH No. 198122320) (Larry Seeman Associates, Inc., 1987), and 1989 Western Hills Area Plan EIR (SCH No. 1989051615) (Tyler, 1989).

2.0 REQUIRED FINDINGS FOR USE OF AN ADDENDUM

Section 15164 of the State California Environmental Quality Act (CEQA) Guidelines states that an addendum to a previously certified EIR shall be prepared if some changes or additions are necessary to the previously certified document, but none of the conditions described in Section 15162 have occurred. Section 15162 of the State CEQA Guidelines identifies the conditions of a project that would require preparation of a subsequent EIR, such that an Addendum to the prior EIR would not be permitted under CEQA. A proposed change in a project will require preparation of a subsequent EIR if:

A. **The change in the project is substantial.** Substantial changes in the project are those that would require major revisions of the certified 2017 EIR due to the involvement of new significant environmental effects, or if a substantial increase in the severity of previously identified significant effects has occurred.

B. **The circumstances under which the project is undertaken have substantially changed.** Substantial changes in circumstances are those that would require major revisions of the 2017 EIR to describe and analyze new significant environmental effects, or any changes that would cause a substantial increase in the severity of the previously identified significant effects.

C. **New information of substantial importance, which was not known and could not have been known, with the exercise of reasonable diligence at the time the previous environmental impact report was certified as complete shows any of the following:**

1. The project will have one or more significant effects not discussed in the 2017 EIR.
2. Significant effects previously examined will be substantially more severe than shown in the 2017 EIR.
3. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative.
4. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

2.1 Summary of Findings for Use of an Addendum

Based on evaluation of the Proposed Project and the prepared analysis (Chapter 7), it has been determined that the Proposed Project does not meet the above criteria requiring a Subsequent or Supplemental EIR:

A. The potential impacts resulting from Proposed Project align with the Approved Project impacts discussed in the 2017 EIR and policies within the Recreation and Conservation Elements in the 2035 GP which would not result in substantial changes to the 2017 EIR or the severity of previously identified impacts.
B. The circumstances have not substantially changed between the certification of the 2017 EIR and the preparation of the PROS Plan in 2022.
C. No new information of substantial importance shows the above criteria.

This Addendum demonstrates that the Proposed Project would not result in new or substantially increased significant environmental impacts that were not previously disclosed in the 2017 EIR certified by the City. The City must incorporate all feasible mitigation measures included in the 2017 EIR into the Proposed Project. The City of Belmont is the lead agency under CEQA and maintains authority to approve this Addendum.

3.0 THE APPROVED PROJECT

The 2017 EIR analyzes the potential impacts of the 2035 GP, Phase I Zoning, Belmont Village Specific Plan (BVSP), and Climate Action Plan (CAP), collectively referred to hereafter as the Approved Project. The 2035 GP presents a vision for the City centered around five key vision statement categories including: Distinctive community development, Easy mobility, Natural beauty, Thriving culture, and Thriving economy. This vision is structured through goals, policies, and actions across six elements including: Land use, Circulation, Parks, Recreation, and Open

Space, Conservation, Safety, and Noise, which guide future development through the year 2035. Phase I Zoning is included as the first step in implementing the 2035 GP land use policies. The BVSP outlines a roadmap for potential development surrounding the Caltrain station. The Climate Action Plan (CAP) provides strategies for reducing the City's greenhouse gas (GHG) emissions.

Several potential impacts resulting from the Approved Project were analyzed in the 2017 EIR and are applicable to the Proposed Project including:

- impacts to biological resources like the development of vacant parcels currently consisting of native habitat;
- construction equipment and operations of development impacting air quality;
- impacts to hydrology and water quality through contamination of surface water from construction or industrial activities, increased amounts of impervious surfaces, and altered drainage patterns;
- construction equipment and activities resulting in noise impacts
- increased population resulting in wear and tear on park, recreation, and open space facilities; and
- development of new parks and recreational facilities potentially resulting in habitat disturbance, increased exposure of sensitive habitats to human activity, introduction of invasive species.

The Approved Project encompasses the range of potential impacts discussed in the 2017 EIR that could also result from the Proposed Project.

4.0 The Proposed Project

Project Title

City of Belmont Park, Recreation, and Open Space Master Plan

Lead Agency Name and Address

City of Belmont Parks and Recreation

Belmont, CA 94002

Contact Person and Phone Number

Brigitte Shearer
Director of Parks and Recreation
City of Belmont
(650) 595-7488

4.1 Regional Setting

The Proposed Project is located entirely within the City of Belmont in San Mateo County (County). Belmont lies about halfway between San Francisco and San José along the San Francisco peninsula, bounded by the cities of San Mateo, San Carlos, Redwood City, Foster City and unincorporated County land. The City's boundaries extend roughly from Highway 280 in the west past Highway 101 in the east and comprises about 4.7 square miles. The City has a population of around 27,000 residents as of 2022 (United States Census Bureau, 2022).

4.2 Local Setting

The Proposed Project consists of consists of 15 developed parks (60 acres), two undeveloped parks (6.5 acres), two open spaces areas (317 acres), and four schools (13 acres) under a joint-use agreement (JUA) with Belmont Redwood Shores School District (collectively referred to hereafter as the Planning Area; Figure 1). The parks and school sites are distributed across the City, while the open space areas are located near the western boundary of the City.

Park, school and open space areas in the City are typically surrounded by residential neighborhoods and other parks and recreational areas. Table 1 shows adjacent land uses, location (addresses), area (acres), as well as land use and zoning designations for each park, school, and open space area in the Proposed Project. More information about land use designations may be found in the 2035 GP Land Use Element (pages 2-16, 2-18), and updated zoning designations may be found in Figure 3-5 of the 2017 EIR.

Two developed parks have individual plans that were previously prepared, separate from the PROS Plan. The Belmont Community Center Conceptual Design Report was prepared for the Barrett Community Center, identified as number 2 in Figure 1 (Group 4 Architecture, 2020). The Twin Pines Park Master Plan was prepared for Twin Pines Park identified as number 21 in Figure 1 (Gates + Associates, 2019). These previously prepared plans are subject to separate CEQA review and will not be analyzed in this EIR Addendum. The Proposed Project includes interim recommendations for these Barrett Community Center and Twin Pines Park that will be addressed in this EIR Addendum.

The four schools that allow public access to fields for recreation under JUA's are Central Elementary School, Fox Elementary School, Nesbit Elementary School, and Ralston Middle School (numbered 5, 9, 14, 17 respectively in Figure 1)

Identified by numbers 12 and 18 in Figure 1, Hidden Canyon Park and Ralston Ranch Park respectively represent the undeveloped parks which the Proposed Project recommends building out into developed parks. Hidden Canyon Park (4.8 acres) on Carlmont Drive currently contains a paved road and gravel parking lot, in addition to fencing, a bench, portable toilet and ruderal vegetation. Ralston Ranch Park, across from 1 Ralston Ranch Road (1.3 acres), currently does not contain any structures and has a variety of planted trees. The remainder of the developed park areas exist within developed land uses and typically contain developed amenities like paved paths, play structures, picnic areas, fields, and sport courts.

The two open space areas that currently exist within the City are San Juan Canyon (SJC; 35 acres) identified by number 19 in Figure 1, and Waterdog Lake (WDL; 283 acres) identified by number 23 in Figure 1. Both open space areas contain trails through chaparral, oak woodland, and riparian habitats.

Note that the PROS Plan includes potential recommendations for "Opportunity Sites" which are locations that are not currently owned or managed by the City's Parks and Recreation department, but could be developed into parks. Because these opportunities are examples of creative ways to add more parks to the City and current zoning and land use designations are not identified, these sites and their associated recommendations are not analyzed in this EIR Addendum. If the City later decides to create new parks, associated impacts to those areas will be evaluated at that time.

5.0 PROPOSED PROJECT DESCRIPTION

The Proposed Project would adopt and implement the PROS Plan which provides an inventory of the existing parks, school sites, and open space areas and a forward-looking roadmap for the system over the next 15 years. The PROS Plan is organized into three major chapters; existing conditions ("Where we are"), desired future conditions ("Where we want to be"), and implementation recommendations ("How we get there").

The existing conditions ("Where are we") of parks and recreation facilities are described by categorizing sites into specific park typology that correlates increasing use intensity with providing more amenities (Table 2). Previous planning efforts including the 1992 City of Belmont Parks and Open Space Master Plan and 2035 GP used the categories Mini Park, Neighborhood Park, Community Park, and Special Facility. These categories were refined through the PROS Plan site assessments, community input, and conversations with Parks and Recreation staff to Tier 1 Neighborhood Park, Tier 2 Neighborhood Park, and Community Park.

Each typology has intrinsic expectations and character, identified minimum standards, referred to as Standard Baseline Amenities that they must provide, anticipated methods of travel to the site from a visitor's residence, and an access radii associated with the site's intensity of use. The Standard Baseline Amenities for each typology was used as the starting point for recommended improvements discussed in Chapter 5.2 of this document. Access Radii (the area around a park identified for prioritized bike and pedestrian transportation access) is a means to address areas of Belmont where residents are underserved by parks spaces because they are not easily accessible. The Access Radii have been revised from the 1992 City of Belmont Parks and Open Space Master Plan Services Areas to better account for the hilly terrain and lack of sidewalks in the western portion of the City.

Open space areas are excluded from the typology categorization as they do not require a minimum or maximum size and do not have the same requirements for Standard Baseline Amenities. Open space areas are minimally improved, provide opportunities for hiking, biking, running, dog walking, and passive enjoyment of nature, as well as a focus on native habitat conservation. Existing conditions of open space areas were evaluated through an Environmental Assessment and Recreation Use Assessment and Benchmarking which described the biological resources and recreation uses respectively (PROS Plan pages 86-111).

Table 2. Park Typologies

	TIER 1 NEIGHBORHOOD PARK	TIER 2 NEIGHBORHOOD PARK	COMMUNITY PARK

Access Radii	0.25 mile	0.5 mile	entire city
Previous Planning	Mini park	Neighborhood park	Community Park Special Facility

5.1 PROS Plan Framework

Through extensive public engagement, desired future conditions ("Where we want to be") were developed resulting in four Big Ideas: The City as Your Backyard, Outdoor Recreation for All, Celebrate the Outdoors, and Environmental and Financial Sustainability. Serving each big idea are goals and strategic actions which make up the overarching PROS Plan vision framework presented in Table 3. Nested within this framework, under Goal 7: Develop and Implement an Open Space Management Plan, are open space specific objectives and policies. These open space specific objectives and policies are presented in Table 4. Tables 3 and 4 represent only the strategic actions and policies that have potential to affect the environment; some may have the potential to impact the environment, and some provide best practices that would reduce environmental impacts. For the full list of strategic actions and policies see Chapter 7 in the PROS Plan.

Table 3. PROS Vision and Strategic Actions

Big Idea	Goal	Example Strategic Actions
The City as Your Backyard	**1.** Support a Connected Belmont by Encouraging a Robust Pedestrian, Bicycle, and Public Transit Network Unifying PROS Sites across the City.	1.B: An Interconnect Toolkit is a means to facilitate active transportation to and between parks. Beyond routes to increase ease of access to draft PROS sites for walking, biking, and public transport, the Toolkit should consider bike racks, water stations (with bottle-filling and dog bowls), bike repair stations, seating, and route information, along the preferred interconnections. Guide the Belmont to create connections and increase access to the existing PROS sites. 1.E: Provide multi-use trail links to and through open space in and around Belmont. Consider the tail network as a means to increase pedestrian connectivity across the City. Explore opportunities for easements to expand the multi-use trail network.
	2. Foster A Healthy Community Through Spaces, Amenities, Programs, And Public Art To Encourage Physical Activity, Social Interaction, And Highlight Belmont's Culture.	2.A: Develop amenities to facilitate physical exercise in parks and open spaces, such as looped walking paths and fitness equipment. 2.B: Social gathering spaces are an intrinsic element of our public parks and open spaces—a bench to chat with a neighbor, a picnic table to eat with friends, a reservable picnic area to host an outdoor celebration event. In addition to providing a natural, green area, parks serve as a gathering space, with playgrounds, picnic tables and grills, sports fields, and other facilities bringing together adults and children from all corners of Belmont. 2.C: Prioritize upgraded or new amenities or programs that promote physical activity and mental health for all ages, abilities, and interests.
	3. Expand and Enhance the Existing PROS System to Meet Evolving Community Needs by Establishing New Uses, Improved Spaces, and a Variety of Recreation Amenities.	3.B Belmont has limited opportunity to increase parkland acreage since it is almost built out. There are areas and neighborhoods of Belmont that have low access to and are under-served by parkland. A method to fill the gap and increase parkland is a "pop-up" park installation. A "pop-up" park installation can take many forms. • **Parklets** increase community gathering space by rethinking an under-utilized public space (commonly auto-oriented) such as on-street parallel parking spots or off-street parking lots. The installation of parklets since the onset of the COVID-19 pandemic has skyrocketed; they can be temporary or developed as a more permanent conversion of under-utilized public realm. • A **mobile recreation vehicle** brings recreation and play (i.e., portable basketball hoops, skate ramps, wellness class materials, arts and crafts, board games, etc.) to an under-served area of Belmont or to an existing PROS site to invigorate or supplement

		existing amenities and increase programming at a site for day or more. • **"Pop-up" play installations** are movable play materials that can be in a PROS site to supplement a community, test a play amenity without committing to permanent installation, or increase the experience at a site for a period of time or planned event; they can rotate through PROS sites or be a one-off installation. 3.C: Pursue opportunities to increase parkland acreage wherever possible. Capitalize on remnant or underutilized areas of City-owned land to craft new public green spaces. 3.G: Consider increasing off-leash space for dog running, events, and exercise. 3I: Consider means and methods to increase efficient year round use of athletic fields. Include reduction in water use and increase groundwater run off in the evaluation of synthetic turf. 3.J: Evaluate fields and courts across the City for the opportunity to provide lighted facilities for evening recreation and play.
Outdoor Recreation for All	**4.** Leverage assets of the pros system to support community health providing diverse, equitable, and inclusive spaces and amenities with accessible routes.	4.A: Prioritize park renovations, improvements, and development in neighborhoods that are less-served by existing PROS offerings. 4.C: Provide adequate and conveniently located comfort features such as seating and shade. 4E: All amenities and spaces within a park should be accessible by a safe path of travel. 4F: As play equipment ages and is identified for replacement, design new play space for inclusivity and accessibility. All Community Parks in Belmont should only upgrade existing playgrounds with all-abilities playgrounds going forward.
	5. Revitalize the PROS System to be Adaptable, Flexible, and Supportive of Many Uses and Users Now and into the Future	5B: Incorporate looped walking paths within, as connections to, and through parks as safe, accessible, and pleasant experiences to walk or roll.
	6. Partner with a Variety of Agencies, Departments, Volunteer Groups, Other Entities, and the Community to Actualize PROS Plan Goals and Policies.	6.F: Continue to utilize JUA's to expand the available PROS sites. Discuss improvements of JUA sites and amenities to benefit the public's use.

Celebrate Open Space	**7.** Develop and Implement an Open Space Management Plan.	The concurrently developed OSMP identified objectives and policies described in Chapter 5.2.1.
	8. Expand Educational Opportunities in Parks and Open Spaces to Highlight the Local Ecosystems.	8.E: Improve public access and education for the Belmont Creek waterway when restoring or enhancing the riparian habitat.
	9. Continue to Enrich Belmont's Outdoor Recreation Opportunities with Trail Improvements, Volunteer Collaborations, and Wayfinding Features.	9.B: Offer areas of respite, such as benches with shade and trail rest points. 9.C: Create trails to vista points or activity spaces that are accessible as possible given terrain constraints. 9.D: Identify locations where trails can be improved to established in open space to connect the City to other open space areas neighboring Belmont such as Sugarloaf Mountain.
Environmental and Financial Sustainability	10. Nurture the Ecological Strength of the Belmont's Natural Resources through Resource-efficient Landscapes and Operations.	10.B: Consider permeable paving options when replacing non-permeable paths. 10.C: Increase shade and tree canopy across the City with succession tree planting and monitoring of existing trees. 10.D: Use native, drought-tolerant, low-water plants in all park projects. 10.E: Utilize the OSMP to address trail erosion impacts.
	11. Provide High-Quality, Actively Managed, And Well-Maintained Pros Assets Supported By A Range Of Funding Sources.	
	12. Prioritize Sustainable, Resilient, And Responsible Management And Maintenance Practices, Improvements, And Projects At Pros Sites.	12.B: Continue to support and implement the CAP. 12.C: Integrate stormwater treatment, detention, and storage systems into all parks. 12.E: Transition to LED when replacing and upgrading lighting with special consideration given to minimizing light pollution.

Table 4. Open Space Specific Objectives and Policies

Theme	Objective	Example Policy Description
Environmental Sustainability	**Vegetation Protection**	P.1: Limit trail construction, and facility development in riparian and other wetland areas (and associated buffers) to protect them from disturbance. Recreational, educational, and other programmatic activities should be conducted in previously developed areas, when possible, to minimize impacts to riparian/wetland areas. P.2: Monitor open space conditions with an emphasis on documenting the location, distribution, and abundance of special-status plants and plant communities, native grasses, wildflowers, and other native flora. P.3: Align or relocate, modify trails to avoid impacting sensitive habitats such as wetlands and areas where endangered species are present. Avoid aligning trails along the boundaries of sensitive habitats. P.4: Protect riparian ecosystems and habitat to maintain natural hydrologic process, water quality, and wildlife benefits. If necessary, enhance and restore riparian habitats to improve function. P.5: Protect common native plant species from disturbance, such as trampling, and disease, such as Sudden Oak Death. P.6: Monitor and control exotic or nuisance plant species. P.7: Preserve and enhance riparian, stream, and other wetland communities locally and in coordination with other agencies to continue providing important habitat networks.
	Wildlife Protection	P.8: Monitor sensitive terrestrial and aquatic wildlife species in terms of their presence/absence and potential to occur on City of Belmont open space lands. For all ground disturbing activities conduct protocol level preconstruction surveys. P.9: Avoidance of sensitive wildlife species, critical breeding or nesting seasons, and critical breeding or nesting habitats during trail or facility construction. P.10: Protect common native wildlife species from disturbance, and disease. P.11: Preserve and enhance native wildlife habitat locally and in coordination with other agencies to continue protecting important habitat networks.
	Water Resources	P.12: Protect surface and ground water from chemical contamination. P.13: Minimize unnatural soil erosion and sedimentation of waters and wetlands.
	Science-based management	P.14: Develop performance measures when designing City projects for the purpose of open space management and collect monitoring data to evaluate project success. P.15: Designation and evaluation of trail improvement project proposals will be based the environmental sustainability and on best available data, including inventories of wildlife, and vegetation resources. The City will undertake site specific and programmatic efforts to extend and improve upon the biological data and recreational benefits underlying its decision-making criteria

Theme	Objective	Example Policy Description
	Expand ability	P. 18: Expand volunteer restoration programs subject to established protocols to ensure optimal environmental protection
Balanced Recreation Uses	**Balanced uses**	P.19: Trail access should be provided for a range of user capabilities and needs (including persons with physical limitations) in a manner consistent with State and Federal regulations. The Americans with Disabilities Act Accessibility Guidelines for Outdoor Developed Areas will inform trail improvement and maintenance where conditions permit. P.20: Design and improve trails to facilitate safe trail use by all visitors with a focus toward slowing travel speeds, adjusting sight lines for safety and speed calming, and establishing safe passing zones. P.21: The City may prohibit certain trail uses or apply increased trail use restrictions within certain areas to enhance safety, minimize conflicts between trail users, and protect natural resources in sensitive resource areas.
	Trail management	P.24: Authorized trailheads include site and trail identifying signage, allowed uses, posted trail map, garbage can with securable lid, and a dog waste bag dispenser. P.25: Monitor and evaluate open space trail conditions on City open space lands to identify significant erosion, informally created trails, trail redundancy or otherwise unnecessary trail segments. P.26: Maintain trails by improving drainage, hardening, widening based on critical evaluations, and in accordance with trail building standards in Chapter 3.5.3, or equivalent sources. P.27: Conduct any grading activities necessary for trail maintenance before soil conditions inhibit their excavation, movement, and compacting. P.28: Modification to any open space resources on open space lands is prohibited unless authorized personnel have given express approval to perform such tasks, including trail construction, improvement, closing, or decommissioning trails. P.30: Evaluate opportunities to construct new trails that could connect with other regional trails, with existing City recognized trails, and by designating other trails not currently formally recognized as part of the City's open space trail system. P.31: Evaluate opportunities to implement trail calming design features.
	User compatibility	P.32: To provide visitor opportunities to experience natural sounds, no amplified sounds – i.e. portable speakers – are allowed on open space lands unless expressly approved as part of a group activity permit. P.34: Use of Belmont open space lands is subject to the City's existing regulations. Including: hours of operation and, and entry into Waterdog Lake is prohibited.
	Enhance Partnerships	P37: Identify locations where trails can be improved or established in open space to connect the City and other open space areas neighboring Belmont, such as Sugarloaf Mountain. Coordinate with San Mateo County and the City of San Mateo.

Theme	Objective	Example Policy Description
Natural Hazard Mitigation	**Wildfire hazards**	P.38: Evaluate the potential to reduce forest fuel loading through the removal of smaller trees to reduce forest floor fuel buildup and ladder fuels. P.40: Prohibit activities that have a high risk of sparking fires during periods of extreme fire hazard. P.41: Close open space areas of particular concern during extreme fire weather, as determined by San Mateo Consolidated Fire Department, and increase patrol levels where appropriate. P.42: Consider use of a grazing program to reduce grassland fuels, brush encroachment, and encourage the vigor of native grass and forb species. P.43: Manage scrub, shrub, and chaparral communities to maintain a mosaic of ages and species within strategic management corridors on roads, ridgetops, and near residential development or other critical infrastructure to compartmentalize preserves and reduce fuel loads. P.44: Minimize and reduce ground disturbance, erosion, and rehabilitation efforts associated with heavy machinery fire suppression. P.46: Limb fallen trees/branches to reduce aerial fuels along trails.
	Protect life and property	P.47: Manage dead and dying trees to limit wind throw and falling trees and limbs. P.48: Manage severe erosion areas on hill slopes and near/within streams. P.49: Respond to trail and open space impacts resulting from severe weather, landslides, or other natural events.
	Improve cooperative planning	P.51: Partner with abutting property owners to manage adjacent vegetation and fuel levels. P.52: Work with PG&E to identify areas where wildlife risks could be reduced through increased vegetation management and/or transmission line undergrounds.

5.2 Recommended Improvements

Based on public engagement, park typologies, and associated strategic actions and policies, recommended improvements or actions for the parks, recreation, and open space areas in the Proposed Project were identified. These recommended improvements represent the implementation recommendations chapter ("How do we get there") of the PROS Plan. Table 5 provides an overview of potential actions that may take place at the sites identified in the Proposed Project. These actions are grouped by Accessibility, Amenity, and Landscape improvements. These actions are discussed briefly below and in greater detail in Chapter 8 of the PROS plan.

Accessibility: The Accessibility classification includes subcategories which increase and/or improve multi-modal access (e.g., car, bicycle, wheelchair, and pedestrian traffic). Accessibility improvements are intended to ensure that community members of different needs and abilities have equal opportunities to enjoy City parks and facilities. Examples of each subcategory include:

- Path additions – adding new paths where there was previously none, increasing path connectivity within park via creating looped paths;
- Path improvements for accessibility – minor repairs or improvements to existing paths or rebuilding path components (e.g., entrance stairs, ramps, and pathways) to bring up to ADA standards, improving existing connections to park facilities and equipment;
- Add Wi-Fi/technology improvements;
- Improve neighborhood connectivity – adding crosswalk to connect to adjacent park, trail, school, community gathering location (schools);
- Parking – increasing standard and/or ADA parking spots, increasing off-street parking spots, adding bike repair stations;
- Placemaking – increasing visibility, adding art, murals, entrance improvements.

Amenity: Park amenities are centered around things that park users directly interact with, like sports fields, park benches, play equipment, water fountains, and BBQs.

- Improve existing facilities - facilities are larger footprint features like sport courts, gathering spaces, bike skills track, play structures, and shade structures. Improvements include; resurfacing and restriping ball courts to increase use options; repairs, and rejuvenating/modernizing spaces; and rejuvenating outdoor classroom space.
- Improving existing equipment – equipment differs from facilities in that it takes up a smaller footprint and consist of individual items like outdoor fitness equipment, benches, picnic tables, bike repair station, BBQ, storage shed, trashcans, smaller play structure elements, drinking fountains, and fencing. Improvements include: equipment repairs and relocation of equipment to optimize use; reorienting benches to improve view; and creating safety barriers between play structures and busy streets.
- Adding facilities and equipment.
- Programming: includes partnership/coordination with schools, creating reservation systems for equipment and facilities, creating accessible social gathering spaces.

Landscape: Landscaping features are focused on the natural landscape that people passively interact with and provide an equally important role in improving user experience. The proposed landscaping actions feature environmental benefits, such as increasing the use of native plants increases habitat and food sources for endemic wildlife. Additional examples include:

- Planting additional native landscaping;
- Maintain existing landscaping (monitor and replace as needed);
- Interpretation additions (educational signage, wayfinding); and
- Synthetic turf (transition some existing fields into synthetic turf).

Table 5. Recommended Improvements

	Accessibility					Amenity						Landscape			
Park Name	Path additions	Path improvements	Technology	Neighborhood connectivity	Parking	Improve facilities	Improve equipment	Add facilities	Add equipment	Programming	Restroom	Add native landscaping	Maintain landscaping	Add Interpretation	Add synthetic turf

Waterdog Lake**		X								X			X	X	

*Improvements identified for these locations reflect interim improvements recommended by the PROS Plan, improvements required for implementation of the previously prepared plans are not discussed (refer to Chapter 4.2 of this document).

**These open space areas have different types of improvements recommended and discussed in more detail in Chapter 5.2.1.

5.2.1 Open Space Specific Improvements

Recommended improvements in the SJC and WDL open space areas are focused on improving trails and native vegetation, as well as implementing on-site programming and interpretation under the Proposed Project. The recommended improvements described below refer to those which are priorities for implementation (see Chapter 8 of the PROS Plan).[1]

Trail improvements. Recommendations for trail improvements following the trail construction best practices presented on pages 228-232 of the PROS Plan includes the following:

- Improve trail stream crossings at four primary locations in WDL.
- Improve trail conditions at three primary locations in WDL.
- Improve three trail segments to comply with ADA regulations.
- Add trail calming features in steep/narrow areas.

Programming. Recommendations for open space programming within SJC and WDL, including the following:

- Study visitor perceptions and measure visitor use (generally and focused on e-bikes);
- Manage trail use to improve visitor experiences;
- Increase nature-based recreation programs; and
- Formalize volunteer restoration programs.

Interpretation. Recommendations for open space area interpretation within SJC and WDL, including the following:

- Improve wayfinding and site identification signage; and
- Add Sudden Oak Death decontamination stations and signage.

Maintain landscaping. Recommendations for landscape/vegetation maintenance within SJC and WDL, including the following:

- Develop annual wildfire fuel reduction treatment plan;
- Maintain existing wildfire fuel treatment areas in WDL;
- Evaluate wildfire fuel conditions in SJC;
- Conduct protocol-level surveys for special status plant and wildlife species with potential to occur within a specific area;
- Implement early detection and response procedures for invasive plant species; and
- Restore and monitor native plant communities, such as bunchgrasses.

[1] Additional discussion of recommendations and implementation actions can be found in Chapter 9 of the PROS Plan.

6.0 PROJECT-RELATED APPROVALS, AGREEMENTS, AND PERMITS

The information contained in this EIR Addendum will be used by the City (the CEQA Lead Agency) as it considers whether to adopt and implement the Proposed Project. If the Proposed Project is adopted, the EIR addendum would be used by the City and responsible and trustee agencies in conjunction with various approvals and permits. These actions include, but may not be limited to, the following approvals by the agencies indicated. Permits would only be needed for a subset of implementation actions that cause ground disturbance or alter jurisdictional waters (state or federal).

CITY OF BELMONT

- Adoption of Parks, Recreation, and Open Space Master Plan
- Grading Permit

CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE

- Lake and Streambed Alteration Agreement for trail stream crossing improvements.

UNITED STATES ARMY CORPS OF ENGINEERS

- Clean Water Act Section 404 Permit for trail stream crossing improvements.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

- 401 Water Quality Certification for trail stream crossing improvements.

DRAFT

7.0 ENVIRONMENTAL ANALYSIS

The environmental factors checked below would be potentially affected by this Proposed Project.

☐ Aesthetics	☐ Greenhouse Gases	☐ Public Services
☐ Agricultural Resources	☐ Hazards and Hazardous Materials	☐ Recreation
☐ Air Quality	☐ Hydrology and Water Quality	☐ Transportation / Traffic
☐ Biological Resources	☐ Land Use / Planning	☐ Tribal Cultural Resources
☐ Cultural Resources	☐ Mineral Resources	☐ Utilities
☐ Energy	☐ Noise	☐ Wildfire
☐ Geology and Soils	☐ Population and Housing	☐ Mandatory Findings of Significance

This Addendum demonstrates that the Proposed Project would not result in new or substantially increased significant environmental impacts that were not previously disclosed in the 2017 EIR certified by the City. The City must incorporate all feasible mitigation measures included in the 2017 EIR into the Proposed Project. The City of Belmont is the lead agency under CEQA and maintains authority to approve this Addendum.

The purpose of the checklist is to evaluate the categories in terms of any "changed condition" (e.g., changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental effect (e.g., a new significant impact or substantial increase in the severity of a previously identified significant effect) that would require further environmental review (CEQA Guidelines Section 15162).

The questions posed in the checklist come from Appendix G of the State CEQA Guidelines. The explanation of the checklist evaluation categories is provided in Chapter 7.1 below.

7.1 Modified Environmental Checklist Form

The purpose of the checklist is to evaluate the categories in terms of any "changed condition" (e.g., changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental effect (e.g., a new significant impact or substantial increase in the severity of a previously identified significant effect) that would require further environmental review (CEQA Guidelines Section 15162).

The questions posed in the checklist come from Appendix G of the State CEQA Guidelines. The explanation of the checklist evaluation categories is provided in Chapter 5.1 below.

7.1.1 Explanation of Checklist Evaluation Categories

A. Discussion in the 2017 EIR and related documents?

This column provides a cross-reference to the 2017 EIR and related document(s) where information and analysis may be found relative to the environmental issue listed under each topic.

B. Less Impact than Approved Project?

This column indicates that the Proposed Project would have a lesser environmental impact than the Approved Project under the 2017 EIR.

C. New Less-than-significant impact?

This column indicates the Proposed Project would have a new less than significant environmental impact that was not previously disclosed in the 2017 EIR.

D. New Less-than-significant impact with Mitigation Incorporated?

This column indicates that the Proposed Project would have a new significant impact on the environment that would require mitigation measures that were not previously disclosed in the 2017 EIR.

E. New Potentially Significant Impact?

This column indicates the Proposed Project would have a new significant and unavoidable impact on the environment that cannot be reduced to a less-than-significant level with the incorporation of mitigation measures.

F. Same Impact as Approved Project?

This column indicates that the Proposed Project would have the same environmental impact as the Approved Project under the 2017 EIR.

DRAFT

7.2 Aesthetics

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a)	Have a substantial adverse effect on a scenic vista?	Yes	☒	☐	☐	☐	☐
b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	Yes	☐	☐	☐	☐	☒
c)	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the Project is in an urbanized area, would the Project conflict with applicable zoning and other regulations governing scenic quality?	Yes	☐	☐	☐	☐	☒
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	Yes	☐	☐	☐	☐	☒

DRAFT

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential aesthetic impacts included in the 2017 EIR, which analyzes the 2035 GP, include the following:

- Less than Significant: Adoption of the land use designations (and corresponding zoning districts) in the Land Use Element of the 2035 GP could result in higher density or intensity development that could partially obstruct views currently available to the public as well as degrade visual quality.

Findings

Implementation of 2035 GP policies will reduce the impacts of development on visual resources. The 2017 EIR found a less-than-significant effect for implementation of the Approved Project on scenic vistas (pages 4.1-16 through 4.1-22). In particular, 2035 GP Policies 2.13-1, 4.4-1, and 4.5-4 emphasize protection of views of open spaces and natural features.

According to the 2017 EIR, there are no state scenic highways within the City. The 2017 EIR (page 4.1-22) found a less-than-significant impact for implementation of the Approved Project on scenic resources within a state scenic highway. The 2017 EIR also states although it is not an officially designated State Scenic Highway, Ralston Avenue is a main thoroughfare through the City and provides a scenic route.

The 2017 EIR found a less-than-significant impact for implementation of the Approved Project on existing visual character (pages 4.1-22 through 4.1-26). 2035 GP Policy 2.13-3 mentions the need for new development to not dominate open space areas, and Policies 4.5-1 and 4.5-4 protect open space areas for scenic quality.

The 2017 EIR found a less-than-significant impact for implementation of the Approved Project on light or glare affecting day or nighttime views (pages 4.1-26 and 4.1-27). The 2035 GP includes a policy about minimizing light and glare from new development (Policy 2.13-4), and a policy requiring shielding and downward direction of light for outdoor lighting (Policy 5.3-6).

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.13-1: Ensure that new development is balanced with preservation of open space and natural features.

Policy 2.13-3: Ensure that the scale and character of new development is appropriate to the setting and intended use. Promote development that is scaled and sited to respect the natural terrain, so that hills, parks, open space, trees, and distant vistas, rather than buildings, dominate the overall landscape, while also developing the Belmont Village PDA and other focus areas for economic growth as concentrated, urban-scale nodes of activity.

Policy 2.13-4: Minimize light and glare from new development. *See also Policy 5.3-6 in the Conservation Element.*

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.4-1: Continue to designate and protect open space lands for the preservation of scenic areas, natural drainage ways, and plant and wildlife habitats; for outdoor recreation; and for public health and safety. *See also policies in the Conservation and Safety elements*.

Policy 4.4-5: Use the Parks, Recreation, and Open Space Master Plan to establish priorities for the protection, enhancement, and improvement of open space lands and trails for recreation purposes.

Policy 4.5-1: Consider open space dedication or acquisition of fee title land to ensure long-term preservation and protection only if public liability exposure can be acceptably limited to the extent feasible.

Policy 4.5-4: Seek to preserve the existing open space areas in the San Juan Hills and Western Hills, consistent with the Area Plans, especially on steep hillsides and sensitive habitat areas.

Policy 5.3-6: Avoid light pollution and unnecessary glare by requiring development projects to use design features and shielding methods that cast outdoor light downward and minimize glare and to install the minimum amount of outdoor lighting necessary for safety and security.

DISCUSSION OF POTENTIAL PROPOSED PROJECT IMPACTS

a) Have a substantial adverse effect on a scenic vista?

Less Impact than the Approved Project

The City does not have any scenic vistas as designated in the 2035 GP. The Proposed Project does not include any changes in land use designation which could affect density or intensity of development. While some existing parks and open spaces are visible from Ralston Avenue ('scenic route'), proposed improvements like trail or path improvements or seating additions would not damage the scenic resources therein, and the Proposed Project would not result in impacts greater from those outlined in the 2017 EIR. Furthermore, policies in the Proposed Project are based on policies within the 2035 GP; both sets of policies reduce the impacts to visual resources. Implementation of the Proposed Project would result less impact than those analyzed as part of the Approved Project in the 2017 EIR.

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

Same as the Approved Project – No Impact

With no state scenic highways within the City, no impact would occur as a result of the Proposed Project. While some existing parks and open spaces are visible from Ralston Avenue, proposed improvements like trail or path improvements or seating additions

DRAFT

would not damage the scenic resources therein, and the Proposed Project would not result in impacts different from those in the 2017 EIR.

c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Same as the Approved Project – No Impact

The Proposed Project maintains and improves existing open space and park areas. Improvements proposed to develop Hidden Canyon and Ralston Ranch Parks may add amenities like paths, benches, or natural play structures, and would maintain existing vegetation and add native plantings. Overall, these changes would not degrade the visual character of the sites or surrounding areas and not result in impacts different from those in the 2017 EIR. In addition, no changes in zoning are proposed that would change impacts analyzed by the 2017 EIR.

d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Same Impact as the Approved Project – Less than Significant

The Proposed Project includes Goal 3: Expand and Enhance the Existing PROS System to Meet Evolving Community Needs by Establishing New Uses, Improved Spaces, and a Variety of Recreation Amenities. This goal includes Policy 3.J: Evaluate fields and courts across the City for the opportunity to provide lighted facilities for evening recreation and play. Proposed nighttime lighting could increase the amount of light or glare associated with parks areas. 2035 GP Policies 2.13-4 and 5.3-6 outline minimizing light and glare (via design features and shielding methods, and installation of the minimum amount of outdoor lighting necessary for safety and security. Furthermore, as part of the Proposed Project, implementing Policy 12.E (transitioning to energy efficient lighting and minimizing light pollution through design) will further support reducing the level of Proposed Project impact to less than significant.

DRAFT

7.3 Agricultural and Forestry Resources

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	No	☐	☐	☐	☐	☒
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	No	☐	☐	☐	☐	☒
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	No	☐	☐	☐	☐	☒
d) Result in the loss of forest land or conversion of forest land to non-forest use?	No	☐	☐	☐	☐	☒
e) Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	No	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Potential Agricultural and Forestry impacts were not reviewed in the 2017 EIR due to lack of these resources within the 2017 EIR Planning Area.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

Same as Approved Project - No Impact

The California Department of Conservation's California Important Farmland Finder tool indicates that the areas of the Proposed Project are within land mapped as Urban and Built-Up Land or Other Land (California Department of Conservation, 2023). Within the two open space areas and the city's parks there are no lands designated as prime farmland, unique farmland, or farmland of Statewide Importance , thus, there would be no impacts.

b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?

Same as Approved Project - No Impact

California Department of Conservation's California Important Farmland Finder tool indicates that the areas are within land mapped as Urban and Built-Up Land or Other Land. There are no lands designated as having a Williamson Act contract, and no existing agricultural zoning as shown in Figure 2-4 of the 2035 GP Land Use Element, therefore, there would be no impacts.

c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland(as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?

Same as Approved Project - No Impact

The Proposed Project does not include any changes or actions that would conflict with existing zoning and there is no zoned timber or forest land within the Project Area. . The Proposed Project would not result in impacts on forest land or timberland.

d) Result in a loss of forest land or conversion of forest land to non-forest use?

Same as Approved Project - No Impact

The open space areas within the Proposed Project contain areas with at least 10% native tree canopy cover and could be considered forestland. The Proposed Project would implement selective vegetation removal of understory species to manage invasive plants and reduce wildfire risk (Policies P6, P38, P43, and P46). These actions would remove a small proportion of vegetation currently present and not result in loss or conversion of forest land, therefore, the Proposed Project has no impact.

DRAFT

e) **Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?**

Same as Approved Project - No Impact

None of the Proposed Project Planning Area is considered Farmland. As such, no impacts are anticipated to farmland as a result of implementation of the Proposed Project.

DRAFT

7.4 Air Quality

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.

Would the project:	*Discussed in the 2017 EIR? (Yes/No)*	*Less Impact than Approved Project?*	*New Less-than-significant impact?*	*New Less-than-significant impact with Mitigation Incorporated?*	*New Potentially Significant Impact?*	*Same Impact as Approved Project?*
a) Conflict with or obstruct implementation of the applicable air quality plan?	Yes	☒	☐	☐	☐	☐
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or state ambient air quality standard?	Yes	☒	☐	☐	☐	☐
c) Expose sensitive receptors to substantial pollutant concentrations?	Yes	☒	☐	☐	☐	☐
d) Result in other emissions (such as those leading to odors) affecting a substantial number of people?	Yes	☐	☐	☐	☐	☒

REGULATORY SETTING UPDATE

The 2017 EIR was prepared before the current, 2017 Clean Air Plan (2017 Plan) was finalized (Bay Area Air Quality Management Disctrict [BAAQMD], 2017). Thus, a summary of the updated 2017 Clean Air Plan is provided here.

The 2017 Plan updates the most recent Bay Area ozone plan, the Bay Area 2010 Clean Air Plan (BAAQMD, et al., 2010), pursuant to air quality planning requirements defined in the California Health & Safety Code. To fulfill state ozone planning requirements, the 2017 control strategy includes all feasible measures to reduce emissions of ozone precursors, in particular reactive organic gases (ROG) and nitrogen oxides (NOx), and reduce transport of ozone and its precursors to neighboring air basins.

The 2017 Plan also builds upon and enhances the BAAQMD's efforts to reduce emissions of fine particulate matter and toxic air contaminants. Similar to the 2010 Clean Air Plan, the 2017 Plan

achieves its goals and objectives by implementing control measures. Many of the control measures referenced in the 2017 Plan are found in Table 5-2: Transportation Control Measures. In particular, measures that encourage local transit use (TR3), safe routes to transit (TR7), and bike and pedestrian facilities in local plans (TR9) are the most relevant to Proposed Project, to the extent that the City's parks and two open space areas are readily accessible to non-vehicular modes of transport.

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential Air Quality impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- The 2017 EIR (pages 4.2-35 to 4.2-40) found significant and unavoidable impacts with regard to increases in emissions of nitrous oxides (NO_x).
- The 2017 EIR (4.2-40 to 4.2-44) found significant and unavoidable impacts for exposure of sensitive receptors to toxic air contaminants (TACs).
- The 2017 EIR (pages 4.2-44 to 4.2-46) found a less-than-significant impact regarding other emissions such as those leading to odors

Findings

The 2017 EIR analyzed whether the Approved Project would obstruct implementation of the BAAQMD Bay Area 2010 Clean Air Plan . The Approved Project would support implementation of the 2010 Clean Air Plan for construction and operational activities. The 2017 EIR concluded that adoption of the 2010 Clean Air Plan and development under the 2035 GP and BVSP would not fundamentally conflict with the 2010 Clean Air Plan.

The 2035 GP includes policies that address the control measures referenced in the updated, 2017 Clean Air Plan. For example:

> **CIRCULATION ELEMENT**
> **Policy 3.1-2:** Make Complete Streets practices a part of Belmont's planning, design, and operation of its circulation network, acknowledging that a flexible and context-sensitive approach to design will result in each roadway serving most users and the roadway network as a whole serving all users.
>
> **Policy 3.1-4:** Provide a transportation system that is well-connected within the city and to areas outside the city.
>
> **Policy 3.2-3:** Maintain and expand transit and active transportation networks that connect neighborhoods with key destinations to encourage travel by non-automobile modes while also improving public health.
>
> **Policy 3.2-5:** Comply with the adopted Complete Streets Policy of the City of Belmont.
>
> **Policy 3.4-3:** Seek innovative solutions to addressing traffic congestion and barriers to mobility that are due, in part, to Belmont's unique geography.

DRAFT

Policy 3.4-10: Support the installation of vehicle traffic-calming measures to ensure bicycle and pedestrian safety on roadways where the street typology prioritizes pedestrian and bicycle mobility, and especially on hillside streets.

Policy 3.5-5: Maintain and encourage use of the existing system of main and neighborhood bike routes. Incorporate bike lanes or pathways into the circulation system of any new subdivision, consistent with the citywide bike and trails network.

Policy 3.7-1: Ensure that adequate transit service facilities are provided in Belmont, including roadway geometry or traffic operations improvements when needed, and bus stop amenities including, but not limited to, lighted shelters, benches, and route information signs.

The 2017 EIR includes the full list of 2035 GP policies (pages 4.2-28-4.2-31 of the 2017 EIR) that would be implemented to ensure that impacts would be less than significant. In addition, the 2017 EIR outlines specific mitigation measures to ameliorate significant and unavoidable impacts.

MITIGATION MEASURES

AQ-1: Require Tier 4 engines on construction equipment.

AQ-2: Require construction fleet to use renewable diesel.

AQ-3: Require low-VOC coatings during construction.

AQ-4: Require fugitive dust best practices.

AQ-5: Promote green consumer products.

AQ-6: Require future projects located within 1,000 feet of receptors perform a construction health risk assessment.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Conflict with or obstruct implementation of the applicable air quality plan?

Less Impact than the Approved Project

The Proposed Project would not conflict with the 2017 Clean Air Plan. Strategies under Goal 1 in the Proposed Project focus on pedestrian and cycling networks to provide access to parks and open spaces. Construction of park and open space improvements (Table 5) would be required to comply with 2035 GP and 2017 Clean Air Plan policies. The Proposed Project would not result in impacts different than those analyzed in the 2017 EIR.

Construction-related impacts for both the draft PROS Plan and OSMP would be negligible in comparison to what was analyzed in the 2017 EIR, which included an analysis of about 29,000 square feet of development for parks. In contrast, total planned development that was analyzed in the air quality chapter of the 2017 EIR is approximately 2,900,600 square

feet. Ground-disturbing activity within the two open space areas would be accomplished mostly with manual labor avoiding construction related emissions. Ground-disturbing activities within the City's parks would mostly be accomplished with manual labor as well as handheld construction equipment (e.g., concrete saw, mechanical augur) as well as relatively small construction vehicles such as a Bobcat.

In terms of operational impacts, it is possible that vehicle miles traveled may slightly increase over the 15-year period during which the two plans would be implemented; however, proposed 2035 GP Policies 3.8-1 and 5.10-6, as well as BVSP Policy 3.5-1. Section 8A.7 of the Phase I Zoning regulations, applying citywide, requires implementation of Transportation Demand Management measures for all nonresidential projects greater than 10,000 square feet, and all nonresidential changes in use that would result in a net increase in average daily vehicle trips of 10 percent or greater. Based on the planned improvements to the city's parks and two open space areas, and the emphasis of 2035 GP policies on implementing transportation control measures from the 2017 Clean Air Plan, it is not likely that average daily trips over the 15-year planning horizon would increase by 10 percent given that the majority of Belmont residents live within a 10-minute walk of a park or open space area trailhead. Because only minor improvements would be made to Hidden Canyon and Ralston Ranch Parks, few additional vehicle trips are expected, rather a redistribution from existing trips to other existing parks. The Proposed Project would have less impact than the Approved Project.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less Impact than the Approved Project

Implementation of the Proposed Project would not result in a cumulatively considerable net increase of any criteria pollutant. Implementation of park and open space improvements could result in temporarily generated emissions of particulate matter and other criteria pollutants such as carbon monoxide or nitrous oxides due to use of construction equipment. However, any construction under the Proposed Project must adhere to the mitigation measures (AQ-1-AQ-4) identified in the 2017 EIR. The Proposed Project would have less impact than the Approved Project.

c) Expose sensitive receptors to substantial pollutant concentrations?

Less Impact than the Approved Project

Based on Table 5 in Chapter 5 of this document, there would be minor improvements made to Hidden Canyon and Ralston Ranch parks, minor improvements to five other parks, upgraded or new amenities at five parks, and park redesign at three parks, as well as trail maintenance and vegetation management actions the two open space areas. For the city's parks, much of the construction would be accomplished with manual labor, handheld construction equipment, or small-scale construction equipment. For the open space areas many of the ground disturbing activities would most likely be accomplished with manual labor. Finally, per guidance from the 2017 Clean Air Plan, any construction equipment used would have tier 3 or tier 4 engines to minimize emissions to the extent

possible. Thus, sensitive receptors would not be exposed to substantial pollutant concentrations for TACs. There would be new but less-than-significant impacts as a result of the Proposed Project and overall, less impacts as compared to those analyzed in the 2017 EIR.

The Proposed Project would comply with the 2017 EIR mitigation measure AQ-6 for any eligible construction work.

d) **Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?**

Same Impact as the Approved Project – Less than Significant

Implementation of the Proposed Project improvements (Table 5) would comply with BAAQMD Regulation 7, which defines substances that cause odors, and how to monitor them, and would result in less than significant impacts, same as than those analyzed in the 2017 EIR.

DRAFT

7.5 Biological Resources

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	Yes	☐	☒	☐	☐	☐
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	Yes	☐	☐	☐	☐	☒
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	Yes	☐	☐	☐	☐	☒

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	Yes	☐	☐	☐	☐	☒
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	Yes	☐	☐	☐	☐	☒
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	Yes	☐	☐	☐	☐	☒

ENVIRONMENTAL SETTING UPDATE

Due to the programmatic nature of the 2035 GP and its associated 2017 EIR, the habitat descriptions (pages 4.3-1 through 4.3-6) and mapping (Figure 4.3-1) are broad. In addition, since the 2017 EIR was certified in 2017, new information regarding natural communities within San Mateo County became available in the form of the San Mateo Fine Scale Vegetation Map (Golden Gate National Parks Conservancy, 2022). The 2022 spatial dataset was used for the PROS plan and the OSMP and maps habitats in greater detail than was previously depicted in the 2017 EIR. This provides vegetation classification at an alliance or association level, with global and state ranks provided; therefore, this identifies sensitive natural communities not previously discussed in the 2017 EIR. Sensitive natural communities not previously identified include:

- California bay woodland (*Umbellularia californica,* S3 G4),
- arroyo willow thickets (*Salix lasiolepis*, S3 G4), and
- California buckeye groves (*Aesculus californica*, S3 G3).

The habitat mapping for all other parks identified in the Proposed Project remains unchanged from what is identified in Figure 4.3-1 in the 2017 EIR; these parks are all located within developed or urban habitats. Given the developed and/or urban nature of these parks, potential for special-status plant and wildlife species are typically low. Should potential for species be determined based on a microhabitat analysis, those instances will be addressed by existing 2035 GP policies, as well as those included in the Proposed Project.

SPECIAL-STATUS SPECIES

Since both WDL and SJC contain similar habitats (e.g., coyote brush scrub, coast live oak woodland, arroyo willow thickets, and annual grasslands), the assessment of special-status species applies to both parks, unless otherwise noted. The environmental assessment, included in Appendix G of the PROS Plan, offers more detailed assessment compared to the programmatic evaluation of special status species in 2017 EIR. Species with a moderate or high potential to occur within WDL and SJC, or that have been documented to be present, are discussed below.

Plants – not previously considered in the 2017 EIR

Additional special-status plant species were considered during the review of the Proposed Project; these species are summarized below. The inclusion of the additional species was guided by regulatory changes and/or inclusion of CNPS Rank 4 species, new documented species occurrences, or the presence of specific habitat components within the parks or open space areas.

Pink star-tulip (*Calochortus comosa*), CRPR 4.2. Moderate Potential. Coastal scrub and meadows and seep habitat are present within the Planning Area along with seasonally moist meadows and forested habitats.

California bottle-brush grass (*Elymus californicus*), CRPR 4.3. Moderate Potential. California bottle-brush grass is a perennial graminoid in the grass family (Poaceae) that blooms from May to November. It typically occurs along stream banks or other mesic sites within broadleaf upland forest, cismontane woodland, North Coast coniferous forest, and riparian woodland habitat at elevations ranging from 45 to 1,530 feet (CNPS 2022). Associated species include Douglas fir (*Pseudotsuga menziesii*), coast redwood (*Sequoia sempervirens*), California bay, red alder (*Alnus rubra*), California hazelnut (*Corylus cornuta* var. *californica*), California coffeeberry, California blackberry, sword fern, hedge nettle (*Stachys ajugoides*), bracken fern (*Pteridium aquilinum*) and woodland brome (*Bromus laevipes*) (CNPS 2022, California Consortium of Herbaria 2022). California bottle-brush grass has a moderate potential to occur in the Study Area due to the presence of broadleafed upland forest, cismontane woodland, and riparian forest habitats are located within the Planning Area, and microhabitats of sandy humus soils are also present to support this species.

Harlequin lotus (*Hosackia gracilis*), CRPR 4.2. Moderate Potential. Harlequin lotus is a perennial forb in the pea family (Fabaceae) that blooms from March to July. It typically occurs in wetlands or ditches in broadleaf upland forest, coastal scrub, closed-cone coniferous forest, cismontane woodland, coastal prairie, meadow and seep, marsh and swamp, North Coast coniferous forest, and valley and foothill grassland habitat at elevations ranging from 0 to 2,275 feet (CNPS 2022). This species has a wetland indicator status of facultative wetland (FACW). Associated species include coyote brush, little quaking grass (*Briza minor*), California oat grass (*Danthonia californica*), blue-eyed grass (*Sisyrinchium bellum*), subterranean clover (*Trifolium*

subterraneanum) (CCH2 2022). Suitable habitat of broadleafed upland forest, cismontane woodland, coastal scrub, marshes and swamps, and meadows and seeps and microhabitats of wetlands and roadsides are present.

Bristly leptosiphon (*Leptosiphon acicularis*), CRPR 4.2. Moderate Potential. Bristly leptosiphon is an annual forb in the phlox family (Polemoniaceae) that blooms from April to July. It typically occurs in chaparral, cismontane woodland, coastal prairie, and valley and foothill grassland habitats at elevations ranging from 175 to 4,875 feet (CNPS 2022). Bristly leptosiphon has a moderate potential to occur within the Study Area due to the presence of associated species and vegetation types; however, this species typically occurs in natural open or herbaceous serpentine and/or volcanic areas.

Choris's popcornflower (*Plagiobothrys chorisianus* var. *chorisianus*), CRPR 1B.2. Moderate Potential. Choris's popcornflower is an annual herb that blooms from March to June. It typically occurs in chaparral, coastal prairie, coastal scrub at elevations ranging from 10 to 525 feet (CNPS 2022). Associated species include common yarrow, coyote brush, common toad rush (*Juncus bufonius*), brass buttons (*Cotula coronopifolia*), fringed willowherb (*Epilobium ciliatum*), California blackberry and Buck's horn plaintain (*Plantago coronopus*) (CDFW 2022). Chaparral and coastal scrub habitats are located within the Planning Area, and microhabitats of mesic sites (and low-lying depressions) are present to support this species.

Chaparral ragwort (*Senecio aphanactis*), CRPR 2B.2. Present. Chaparral ragwort is an annual herb that blooms from January to April. It typically occurs in chaparral, cismontane woodland, coastal scrub at elevations ranging from 50 to 2625 feet (CNPS 2022). Associated species include California buckwheat (*Eriogonum fasciculatum*), nude buckwheat, stork's bill, redstem filaree, black sage (*Salvia mellifera*), California sagebrush, and soap root. Chaparral, cismontane woodland, and coastal scrub habitats are present within the Planning Area.

Plants – previously considered in the 2017 EIR

The special-status plant species listed below were assessed as part of the 2017 EIR.

- Franciscan onion (*Allium peninsulare* var. *franciscanum*), CRPR 1B.2.
- Bent-flowered fiddleneck (*Amsinckia lunaris*), CRPR 1B.2.
- San Francisco collinsia (*Collinsia multicolor*), CRPR 1B.2.
- Western leatherwood (*Dirca occidentalis*), CRPR 1B.2.
- San Mateo woolly sunflower (*Eriophyllum latilobum*), FE, SE, CRPR 1B.1.
- Arcuate bush-mallow (*Malacothamnus arcuatus*), CRPR 1B.2.
- Woodland woolythreads (*Monolopia gracilens*), CRPR 1B.2.

Wildlife – not previously considered in the 2017 EIR

Additional special-status wildlife species were considered during the review of the Proposed Project; these species are summarized below (refer to Appendix G of the PROS Plan). The inclusion of the additional species was guided by regulatory changes, new documented occurrences, or the presence of specific habitat components within the parks or open space areas.

Olive-sided flycatcher (*Contopus cooperi*), CDFW Species of Special Concern. The olive-sided flycatcher is a summer resident in California, wintering in Latin America. It breeds in a variety of forested habitats, typically coniferous forests at higher elevations, but also in mixed forest and

woodlands at lower elevations. Breeding habitat is often associated with forest openings and edges, both natural (e.g., meadows, canyons) and man-made (e.g., logged areas). Nests are usually in conifers and placed at variable height on the outer portions of branches. This species forages for insects, usually from prominent tree snags. This species has not been documented on the sites, but mixed low-elevation forests are common habitats within the Planning Area and could support nesting by this species.

White tailed kite (*Elanus leucurus*), CDFW Fully Protected Species. The white-tailed kite is resident in open to semi-open habitats throughout the lower elevations of California, including grasslands, savannahs, woodlands, agricultural areas and wetlands. While this species is usually observed in closer proximity to San Francisco Bay, higher elevation areas characterized by small trees interspersed with grasses and low shrubs could provide nesting or foraging habitat for this species within City parks and open spaces.

American badger (*Taxidea taxus*), CDFW Species of Special Concern. The American badger is a large, semi-fossorial member of the weasel family. It is found uncommonly within the region in drier open stages of most scrub, forest, and herbaceous habitats where friable soils and prey populations are present. This species typically avoids highly trafficked areas where trails have been relatively compacted, or densely forested or vegetated habitats that dominate the open space areas; however, friable soils and more open habitats exist in higher elevation locations within the open space areas that could support this species. Thus, this species has moderate potential to occur.

Mountain Lion (*Puma concolor*). CDFW Candidate Species. Mountain lions are the second largest felid in North America and have the largest geographic range of any carnivore in the western hemisphere that stretches from southern Chile to the Canadian Yukon (CDFW online, accessed 10/19/2023). This large distribution speaks to the extreme adaptability of the species with respect to its ability to exploit a great variety of different habitats. This adaptability is largely explained by the species' ability to thrive across a huge range of environmental conditions. Mountain lions are mobile predators of the landscapes that they inhabit, with home ranges within the Santa Cruz mountains estimated to be between 40 and 150 square miles. Males tend to defend smaller territories against other males and females tend to have larger territories that may overlap with other lion's territories. Deer and smaller mammals make up the majority of their diets and their hunting activities are mostly nocturnal.

The Planning Area represents a pocket of marginally suitable habitat, largely surrounded by urban development. Highway 280 represents a major barrier to dispersal from more suitable habitat in the Santa Cruz mountains, and areas to the west are very densely populated. While some mountain lions may occasionally pass through the Planning Area, it is likely that most mountain lions would not traverse into this area due to offsite barriers and onsite recreational activities that are currently present. The Planning Area may be temporarily attractive to an individual mountain lion with a higher than typical tolerance for anthropogenic disturbance. However, it is unlikely that the site would remain occupied by a mountain lion for extended periods due to its limited size and correspondingly limited prey availability. Because the species is so adaptable, the recreational improvements proposed by the project would not be expected to have a significant impact on mountain lions, if present, because they would simply move on to another, more suitable part of their range.

DRAFT

Wildlife – previously considered in the 2017 EIR

The special-status plant wildlife listed below were assessed as part of the 2017 EIR.

- Western (Pacific) pond turtle (*Actinemys marmorata*), CDFW Species of Special Concern.
- San Francisco (saltmarsh) common yellowthroat (*Geothlypis trichas sinuosa*), CDFW Species of Special Concern.
- Hoary bat (*Lasiurus cinereus*), WBWG Medium.
- San Francisco dusky-footed woodrat (*Neotoma fuscipes annectens*), CDFW Species of Special Concern.

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential Biological Resources impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Direct impacts to special-status species could result from the conversion of habitat either temporarily, as a result of grading, excavation, and construction activities, or permanently from the ongoing operation and/or maintenance of a project or plan. Indirect impacts could result from elevated dust or noise levels or increased sediment loads in runoff from construction activities. Indirect impacts could also result from permanent alterations to hydrology upstream of habitats supporting sensitive species, including increased runoff, sedimentation, or pollutant loads, and increased human activity.
- Development of vacant parcels may affect riparian or sensitive habitat, though the areas that may develop are already designated for urban uses.
- Development resulting from implementation of the 2035 GP may result in both direct and indirect significant adverse impacts to jurisdictional wetlands or waters.
- Large areas of open space or undeveloped areas within the 2035 GP Planning Area may serve as wildlife corridors for common and listed species. Although development is expected on vacant lots currently designated for urban uses in developed areas, there is no future development planned under the 2035 GP in the open space areas, which, given their contiguous nature and geography, are more likely to function as wildlife corridors than small, scattered infill parcels amidst urban development. Therefore, although there may be indirect impacts to the movement of wildlife, these are not expected to result in direct impacts to habitat or fragmentation of open space.

Findings

The 2017 EIR (pages 4.3-30 to 4.3-35) found that implementation of the 2035 GP would have less-than-significant impacts on special-status species. The following is a summary of 2035 GP Policies which apply to reducing impact to special-status plant and wildlife species: Policy 4.4-1 requires the City to continue to designate and protect open space lands; Policy 4.5-4 encourages the City to preserve the existing open space areas in the San Juan Hills and Western Hills; Policy 4.4-6 requires the City to develop programs to control invasive species, which could modify habitats; Policy 5.1-3 protects against ecological succession and pathogen threats; Policy 5.3-1 requires the City to support the protection of habitats of special-status species; Policy 5.3-2 requires the City to protect ecologically important areas; Policies 5.1-1 and 5.1-4 ensure that improvements and planning of open space areas are consistent with the type of open space and the City's open space strategy; and Policies 2.14-3 and 5.1-2 specifically address the interface

between natural and developed areas to support wildlife needs. The 2035 GP analyzed the impacts on biological resources of developing 29,000 square feet in park related actions.

The 2017 EIR (pages 4.3-36 and 4.3-37) found impacts would be less than significant regarding riparian habitats and other sensitive natural communities. The 2017 EIR includes policies that would avoid or minimize impacts to sensitive habitat by requiring the protection and preservation of such resources. Policy 4.5-2 protects Belmont Creek from encroachment; Policy 5.3-2 requires the City to ensure that development does not disturb sensitive habitat and special-status species, including the creek corridors; and Policy 5.4-3 requires the City to protect wildlife habitat along Belmont's waterways.

The 2017 EIR (pages 4.3-37 and 4.3-38) found a less-than-significant impact would occur to state or federally protected wetlands during the implementation of the 2035 GP due to the implementation of policies and compliance with state, federal, and local regulations. 2035 GP Policy 5.3-2 requires the City to protect and restore the wetlands around O'Neill Slough, and Policy 5.4-3 requires the City to protect and restore a continuous corridor of wildlife habitat along Belmont's wetlands. In addition, if jurisdictional resources are determined to be potentially impacted by a project, all such future development projects would require Clean Water Act Section 404/401 Permits from the U.S. Army Corps of Engineers (USACE) and the RWQCB, respectively, and a 1600-Series Streambed Alteration Agreement with the CDFW. Compliance with federal and State standards would ensure that the Proposed Project does not result in a significant impact to federally and/or state-protected wetlands.

The 2017 EIR (pages 4.3-39 and 4.3-40) found that there were no significant impacts to movement of any native resident or migratory fish or wildlife species. According to the 2035 GP, there is there is no proposed future development that would alter land use from open space to development that would impact existing wildlife. Given the contiguous nature and geography of the open spaces, these areas are more likely to function as wildlife corridors than small, scattered infill parcels amidst urban development; therefore, although there may be indirect impacts to the movement of wildlife, these are not expected to result in direct impacts to habitat or fragmentation of open space. In addition, the 2035 GP includes policies that would minimize or avoid impacts to important wildlife corridors and linkages by requiring the protection and preservation of such resources. Policy 5.3-4 requires the City to maintain wildlife corridors, and Policy 5.4-3 requires the City to protect a continuous corridor of riparian habitat. Since 29,000 square feet of park related actions were already analyzed in the 2017 EIR, and the Proposed Project does not constitute new development or barriers, impacts would be the same as those analyzed in the Approved Project.

The 2017 EIR (pages 4.3-40 and 4.3-41) found no impact regarding conflicts with local policies or ordinances protecting biological resources. The City has a Tree Ordinance to promote the healthy growth of trees, control the removal of trees, and encourage the replacement of trees within the City. This ordinance requires that any tree removal be approved by the City's Tree Board. Policy 2.4-2 in the 2035 GP requires the City to maintain tree protection and removal standards, implemented by the Tree Ordinance. Implementation of the Proposed Project would continue to follow these regulations. If any Heritage Trees required removal, the trees would be removed in accordance with the City's policies and only after an appropriate permit is acquired. In addition to the City's Tree Ordinance, 2035 GP Policy 4.5-4 encourages the City to preserve the open spaces areas in the San Juan Hills and Western Hills area plans.

DRAFT

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.4-2: Maintain adequate and reasonable tree protection and removal standards and best management practices, implemented by the City's Tree Ordinance.

Policy 2.14-3: Create clear design standards for the interface between open spaces and neighborhoods, especially in the Urban/ Wildland Interface Zone. Standards should identify the margin of open space needed to allow wildlife, recreation, and aesthetic values to flourish while also reducing threats of fire and invasive plant species. Incorporate "Defensible Space" standards as needed in areas of high wildfire risk.

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.4-1: Continue to designate and protect open space lands for the preservation of scenic areas, natural drainage ways, and plant and wildlife habitats; for outdoor recreation; and for public health and safety. *See also policies in the Conservation and Safety elements.*

Policy 4.4-6: Develop programs to control invasive plant species that threaten the natural resources.

Policy 4.5-1: Consider open space dedication or acquisition of fee title land to ensure long-term preservation and protection only if public liability exposure can be acceptably limited to the extent feasible.

Policy 4.5-2: Protect Belmont Creek from future encroachment through regulation, development review, conservation easements, or other appropriate actions.

Policy 4.5-4: Seek to preserve the existing open space areas in the San Juan Hills and Western Hills, consistent with the Area Plans, especially on steep hillsides and sensitive habitat areas.

CONSERVATION ELEMENT

Policy 5.1-1: Ensure that any improvements recommended for open space areas are appropriate for the type of open space and the use proposed.

Policy 5.1-2: In portions of Belmont that include significant open space resources, use area plans to address the balance and interface between natural and developed areas.

Policy 5.1-3: Reduce risk of wildland fire, ecological succession, and pathogen threats (such as Sudden Oak Death) through active maintenance of public spaces and education and enforcement of development standards on private property.

Policy 5.1-4: Ensure that future acquisitions of open space land are compatible with the City's open space strategy and long-term interests. *See also Policy 4.5-1.*

DRAFT

Policy 5.3-1: Support the protection, preservation, restoration, and enhancement of habitats of State or federally listed rare, threatened, endangered and/or other sensitive and special status species, and favor enhancement of contiguous areas over small, segmented remainder parcels.

Policy 5.3-2: Continue to maintain, protect, restore, and enhance Belmont's ecologically important areas and seek to reduce impacts on them, including the creek corridors, the open space, and the wetlands around O'Neill Slough.

Policy 5.3-4: Maintain functional wildlife corridors and habitat linkage in order to contribute to regional biodiversity and the viability of rare, unique or sensitive biological resources throughout the city and region.

Policy 5.4-3: Protect, restore, and enhance a continuous corridor of native riparian vegetation and wildlife habitat along Belmont's waterways, water bodies, and wetlands.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife (CDFW) or United States Fish and Wildlife Service (USFWS)?

New Less-than-Significant Impacts

The environmental assessment conducted for the Proposed Project reported special-status plant species documented in the vicinity of the Proposed Project Planning Area (Planning Area). Some species have been documented in the two open space areas (WDL and SJC) and several others have potential to occur within the overall Planning Area based on various habitat and life cycle factors. Special-status wildlife species with moderate to high potential to occur in the Planning Area include hoary bat (*Lasiurus cinereus*), San Francisco dusky-footed woodrat (*Neotoma fuscipes annectens*), western pond turtle (*Actinemys marmorata*), and various special-status birds.

As summarized above, the following special-status species have potential to occur within the Planning Area and were not analyzed as part of the 2017 EIR. The inclusion of the additional species was guided by regulatory changes and/or inclusion of CNPS Rank 4 species, new documented species occurrences, or the presence of specific habitat components within the parks or open space areas.

- Pink star-tulip (*Calochortus comosa*), CRPR 4.2. Moderate Potential.
- California bottle-brush grass (*Elymus californicus*), CRPR 4.3. Moderate Potential.
- Harlequin lotus (*Hosackia gracilis*), CRPR 4.2. Moderate Potential.
- Bristly leptosiphon (*Leptosiphon acicularis*), CRPR 4.2. Moderate Potential.
- Choris's popcornflower (*Plagiobothrys chorisianus* var. *chorisianus*), CRPR 1B.2. Moderate Potential.
- Chaparral ragwort (*Senecio aphanactis*), CRPR 2B.2. Present.
- Olive-sided flycatcher (*Contopus cooperi*), CDFW Species of Special Concern.

- White tailed kite (*Elanus leucurus*), CDFW Fully Protected Species.
- American badger (*Taxidea taxus*), CDFW Species of Special Concern.
- Mountain Lion (*Puma concolor*). CDFW Candidate Species.

2035 GP policies, as well as Proposed Project policies, reduce the potential impacts to special-status species to a less than significant level. In addition to the 2023 GP policies described above, the implementation of the Environmental Sustainability Policies described in Chapter 5.1 of this document and Chapter 7 in the PROS Plan would benefit sensitive biological resources, including special-status species. These collective policies reduce the potential for impacts by avoiding sensitive habitats and maintaining small-impact footprints to the extent feasible while still achieving project goals. For most Proposed Project implementation actions, there would be no substantial adverse effects on special-status species; however, for some Proposed Project activities—such as increasing park accessibility and parking, addition of paths, repairing stream crossings, conducting trail maintenance, and reducing wildfire hazards in areas where special-status species could be present—adverse impacts to special-status species could occur without the implementation of 2035 GP and Proposed Project Environmental Sustainability policies to reduce impacts. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around special-status species, would result in new, less-than-significant impacts when compared to those analyzed in the 2017 EIR.

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the CDFW or USFWS?

Same Impact as Approved Project – Less than Significant

Riparian areas are located within the Proposed Project Planning Area. Per the 2017 EIR and the PROS Plan, riparian communities have been documented within WDL, SJC, and Ralston Ranch Park. Implementation of the following Proposed Project actions could result in potential impacts to riparian communities: trail maintenance, construction of new paths for accessibility, trail stream crossings, invasive plant removal, or wildfire fuel reduction.

Policies from Proposed Project are consistent with and add to the policies in the 2035 GP that aim to conserve and avoid impacts to riparian ecosystems. For example, the following Proposed Project policies further reduces potential impacts to less than significant: P1 limits trail construction and facility development in riparian corridors, wetlands, and each of these habitats' associated buffers to protect them from disturbance, and P2 requires aligning or relocating trails to avoid impacting sensitive habitats. Furthermore, just as the 2017 EIR outlines for the Approved Project, if riparian areas are determined to be potentially impacted by implementation of the Proposed Project, all applicable actions would require coordination with appropriate regulatory agencies. Compliance with federal and State standards would ensure that the Proposed Project does not result in a significant impact to protected riparian areas. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around

special-status species, would result the same impacts as the Approved Project when compared to those analyzed in the 2017 EIR.

c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Same Impact as Approved Project – Less than Significant

State or federally protected wetlands are located within the Proposed Project Planning Area; potential wetland areas are present within WDL and SJC Open Space Areas and several City parks may have potential wetlands present, such as Hidden Canyon and Ralston Ranch. Impacts to these features may occur due to implementation of Proposed Project actions, such as: trail maintenance, construction of new paths for accessibility, stream crossings, or wildfire fuel reduction. Proposed Project policies aim to conserve and avoid impacts to protected wetlands as well. For example, the Proposed Project includes the following policies: P1 limits trail construction and facility development in riparian and other wetland areas (and associated buffers) to protect them from disturbance; P3 states that trails would be aligned, relocated, and/or modified to avoid impacting sensitive habitats such as wetlands and areas where endangered species are present; and P7 states that riparian, stream, and other wetland communities would be preserved and enhanced in coordination with other agencies to continue providing important habitat networks. Furthermore, just as the 2017 EIR outlines for the Approved Project, if jurisdictional wetland resources are determined to be potentially impacted implementation of the Proposed Project, all applicable actions would require Clean Water Act Section 404/401 Permits from the U.S. Army Corps of Engineers (USACE) and the RWQCB, respectively, and a 1600-Series Streambed Alteration Agreement with the CDFW. Compliance with federal and State standards would ensure that the Proposed Project does not result in a significant impact to federally and/or state-protected wetlands. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around state and/or federally protected wetlands, would result the same impacts when compared to those analyzed in the 2017 EIR.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Same Impact as Approved Project - No Significant Impacts

Overall, the Proposed Project would have the same impacts as the Approved Project as analyzed in the 2017 EIR regarding wildlife movements. Wildlife species such as deer, coyote, and mountain lion, are expected to continue moving through the Proposed Project Planning Area as they currently do, or with more efficiency due to improvements to habitat such as invasive species removal and native species restoration, and decommissioning of visitor-created trails, thus creating more habitat areas. The Proposed Project does not include any new development that would hinder the ability of wildlife to move through the area. Proposed improvements at Hidden Canyon which may include new trails and play structure, would not substantially interfere with wildlife movement, in

fact native vegetation improvements in the park would likely improve wildlife movement ability. Ralston Ranch is surrounded by residential development and improvements like new trails are not expected to alter wildlife movement in the area.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Same Impact as Approved Project - No Significant Impacts

Tree removal may be necessary to implement Proposed Project actions, such as at Hidden Canyon and Ralston Ranch parks to accommodate park development. Tree removal may also be necessary at WDL and SJC open space areas as part of trail maintenance or wildfire fuel reduction actions. Any actions undertaken in this regard would need to comply with the City's Tree Ordinance, per the policies outlined in the 2035 GP. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies (e.g. P5, P9) around tree protection, would result in the same impact as the Approved Project when compared to those analyzed as part of the Approved Project in the 2017 EIR.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

Same Impact as Approved Project - No Significant Impacts

The 2017 EIR (pages 4.3-41 and 4.3-42) found no impact regarding conflict with provisions on an adopted Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other approved local, regional, or state habitat conservation plan because such plans do not exist within the City of Belmont. The Proposed Project is not subject to a HCP, NCCP, or any other habitat plan; therefore, the proposed project would not conflict with any habitat conservation plan, and impacts would be the same as those analyzed in the 2017 EIR.

DRAFT

7.6 Cultural Resources

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?	Yes	☒	☐	☐	☐	☐
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?	Yes	☐	☐	☐	☐	☒
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential Cultural Resources impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant with Mitigation: Implementation of the 2035 GP may result in actions that could adversely affect historic resources through future ground disturbing activities such as grading and excavation, or the demolition of resources.
- Less than Significant: Future development projects allowed under the Approved Project may involve grading, excavation, or other ground-disturbing activities and would be required to protect known resources. Three prehistoric sites have been recorded in Belmont. There are no archaeological sites currently listed on the National Register of Historic Places in Belmont.
- Less than Significant: Construction activities associated with the implementation of the Approved Project such as grading, excavation, and ground disturbing activities may result in the accidental destruction or disturbance of paleontological sites. No paleontological resources in the Planning Area have been identified for protection.
- Less than significant: Development has the potential to disturb human remains, and will adhere to state laws pertaining to their discovery.

DRAFT

Findings

The 2035 GP includes policies that would minimize or avoid impacts to historical resources by requiring the protection and preservation of such resources. Policy 2.23-1 updates the City's inventory of historic resources to ensure that historic resources are preserved and protected in Belmont; Policy 2.23-2 ensures that City ordinances adequately recognize and protect historic resources; Policy 2.23-3 considers creating a Historic Preservation Commission to administer and advise on historic preservation matters, such as updating the inventory of historic resources and updating the historic preservation ordinance; and Policy 2.23-4 encourages adaptive reuse of historic structures. Implementation of these policies would help to minimize or avoid impacts to historical resources. In addition, historic resources in the city are subject to the Structures of historic or Aesthetic Value Article within Belmont's Buildings Ordinance (Municipal Code Chapter 7, Article VII), which includes criteria for including resources in the city's historic resources inventory and procedures for designating those resources as historical. The Buildings Ordinance also requires permits to work on a historic resource.

To address actions that could adversely affect archaeological resources, the 2035 GP includes policies and regulations that would minimize or avoid impacts by requiring the protection and preservation of such resources. Policy 5.12-1 requires mitigation for development on sites suspected of being archeologically significant, including the three identified prehistoric sites; and Policy 5.12-2 requires that, if archaeological resources are discovered during construction, an evaluation be completed before construction activities resume.

The likelihood of finding new or undiscovered cultural resources within the 2017 EIR Planning Area is limited due to much of the development planned as infill for vacant lots which are known to have fill, not native soil. In addition, the General Plan includes Policy 5.12-1, which requires mitigation for development on sites suspected of being culturally significant; as well as Policy 5.12-2, which requires that, if cultural resources are discovered during construction, an evaluation be completed before construction activities resume. These policies would minimize or avoid impacts to cultural resources.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.23-1: Update the City's inventory of historic resources to ensure that historic resources are preserved and protected in Belmont.

Policy 2.23-2: Ensure that City ordinances adequately recognize and protect historic resources.

Policy 2.23-3: Consider creating a Historic Preservation Commission to administer and advise on historic preservation matters, such as updating the inventory of historic resources and updating the historic preservation ordinance**.**

Policy 2.23-4: Encourage adaptive reuse of historic structures – preserving their original design and character – as an option for preserving sites that are threatened with demolition or degradation.

CONSERVATION ELEMENT

Policy 5.12-1: Ensure that development avoids potential impacts to sites suspected of being archeologically, paleontologically, or culturally significant, tribal or otherwise, or of concern by requiring appropriate and feasible mitigation.

Policy 5.12-2: If cultural, archaeological, paleontological, or cultural resources, tribal or otherwise, are discovered during construction, grading activity in the immediate area shall cease and materials and their surroundings shall not be altered or collected until evaluation by a qualified professional is completed.

Mitigation Measures:

CULT-1: Require façade maintenance of the Firehouse Building.

CULT-2: Require historical signage at Firehouse Square.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Cause a substantial adverse change in the significance of a historical resource pursuant to CEQA Guidelines Section 15064.5?

Less Impact than the Approved Project

The 2035 GP includes Land Use Policies 2.23-1 through 2.23-4 that would minimize impacts to any previously undiscovered historic resources would apply to any resources found during implementation of the Proposed Project, specifically, Ralston Park, Hidden Canyon Park, and the two open space areas. Other parks are assumed to not have native soil, and thus the chances are low of finding any previously undocumented historic resources. While the Approved Project may adversely impact specific historic resources and the 2017 EIR requires Mitigation Measures CULT-1 and CULT-2, the Proposed Project would not affect these historic resources and the mitigation measures would not apply. Should any previously undiscovered historical resource be found during park development activity identified in the Proposed Project, the above referenced land use policies would result in less than significant impacts than the Approved Project as analyzed in the 2017 EIR.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines Section 15064.5?

Same Impact as the Approved Project – Less than Significant

Should any previously undiscovered archaeological resource be found during actions identified in the Proposed Project, 2035 GP Policy 5.12.2 pertaining to protection of archaeological resources and applicable state laws would be followed. If previously undocumented archaeological resources were discovered during construction policies would result in same less than significant impacts as those analyzed in the 2017 EIR.

b) Disturb any human remains, including those interred outside of dedicated cemeteries?

Same Impact as the Approved Project – Less than Significant

Should any human remains be encountered during ground disturbing activities associated with the draft Proposed Project, the San Mateo County Coroner would be notified, and if those remains are thought to be of Native American origin, the Native American Heritage

Commission would also be notified. Additionally, policies 5.12-1 and 5.12-2 from the 2035 GP Conservation Element would also apply to any ground disturbing actions associated with the draft Proposed Project. If any human remains are discovered during park development activities identified in the Proposed Project, the above referenced Conservation Element policies would result in same less than significant impacts as those analyzed in the 2017 EIR.

DRAFT

7.7 Energy

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a)	Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	Yes	☐	☐	☐	☐	☒
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential Energy impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant: The 2035 GP policies are consistent with and would go beyond State and local energy policies enacted to reduce energy consumption. Operational energy consumption and the intensity of that consumption under the 2035 GP would be lower than existing and 2035 no plan conditions. As such, the Approved Project would not result in a wasteful, inefficient, and unnecessary usage of energy.

Findings

The 2017 EIR found impacts from implementation of the 2035 GP would be less than significant regarding waste, inefficient and unnecessary consumption of energy resources. As noted in the 2017 EIR, construction associated with future projects consume gasoline and diesel through the operation of heavy-duty construction equipment and vehicles. In particular the 2017 EIR states:

> *The types of land uses envisioned under the plans would involve construction activities typical of development within the [2035 GP] Planning Area. No land uses are expected to require an extraordinary amount of energy consumption during construction, as may occur with large, industrial facilities, like new power plants or dams, because no such land use are proposed or permitted by the [Approved Project].*

In regard to operational impacts, land uses developed under the 2035 GP would generate new vehicle trips, which would consume gasoline and diesel. Developments would also result in the consumption of electricity and natural gas for power, heating, and cooking. Land Use Element Policy 2.3-2 (encourage higher density residential land use in proximity to commercial services,

employment opportunities, and major transportation corridors) as well as Circulation Element Policies 3.2-1 (promote energy efficiency), Policy 3.2-3 (maintain transit networks that connect neighborhoods), and Policy 3.5-9 (prepare the Comprehensive Pedestrian and Bicycle Plan for on-street and off-street bicycle and pedestrian facilities in the city) would ensure that consumption of energy resources would not be wasteful or inefficient.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.3-2: Encourage higher density residential uses located in close proximity to commercial services, employment opportunities, and major transportation corridors and facilities.

CIRCULATION ELEMENT

Policy 3.2-1: Promote energy efficiency and accommodate new and improved technology, such as alternative fuel vehicles, in meeting transportation needs.

Policy 3.2-3: Maintain and expand transit and active transportation networks that connect neighborhoods with key destinations to encourage travel by non-automobile modes while also improving public health.

Policy 3.5-9: Prepare the Comprehensive Pedestrian and Bicycle Plan for on-street and off-street bicycle and pedestrian facilities in the city.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Same Impact as the Approved Project – Less than Significant

In contrast to construction activities associated with 2035 GP, the actions outlined in the Proposed Project such as trail or path installation, stream crossings, and vegetation management would occur on a much smaller scale and generally involve manual labor and the use of handheld construction equipment.

Ground disturbing actions at Hidden Canyon and Ralston Ranch parks would occur on a much smaller scale than activities analyzed in the 2017 EIR. The 2035 GP policies applicable to Approved Project operational activities would be likewise applied to operational activities associated with the Proposed Project. Therefore, the Proposed Project will have the same impacts as the Approved Project and implement the same policies to reduce impacts to a less than significant level.

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Same Impact as the Approved Project – Less than Significant

Implementation of the construction and operation and maintenance actions associated with the Proposed Project would not result in a substantial adverse effect on local or regional energy supplies, peak or base period energy demand, or resource capacity. All of these actions would follow the same 2035 GP policies described in the Energy and GHG chapter of the 2017 EIR, pages 4.4-22 through 4.6-25. In addition, implementation of construction and operations and maintenance actions at Hidden Canyon and Ralston Ranch parks, and at the City's two open space areas would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. Actions completed in these areas would need to follow the same 2035 GP policies referenced above. Therefore, the Proposed Project will have the same impacts as the Approved Project and implement the same policies to reduce impacts to a less than significant level.

DRAFT

7.8 Geology and Soils

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a)	Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:						
i)	*Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?*	Yes	☒	☐	☐	☐	☐
ii)	*Strong seismic ground shaking?*	Yes	☒	☐	☐	☐	☐
iii)	*Seismic-related ground failure, including liquefaction?*	Yes	☒	☐	☐	☐	☐
iv)	*Landslides?*	Yes	☐	☐	☐	☐	☒
b)	Result in substantial soil erosion or the loss of topsoil?	Yes	☐	☐	☐	☐	☒
c)	Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?	Yes	☐	☐	☐	☐	☒
d)	Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code, creating substantial direct or indirect risks to life or property?	Yes	☐	☐	☐	☐	☒

DRAFT

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
e)	Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	Yes	☐	☐	☐	☐	☒
f)	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential geology and soils impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than significant: Implementation of the Approved Project may have the following impacts: All locations within the Planning Area could experience considerable groundshaking; Ground failure, including liquefaction, as a result of an earthquake could occur in the 2035 GP Planning Area depending on the underlying conditions including moisture content, relative size of soil particles, and density of subsurface materials within 50 feet of ground surface; and Landslides may occur on slopes of 15 percent or less; however, the probability is greater on steeper slopes that exhibit old landslide features such as scarps, slanted vegetation, and transverse ridges.

Findings

The 2017 EIR (pages 4.5-1 through 4.5-26) found a less-than-significant impact for implementation of the Approved Project in regard to causing potentially substantial adverse impacts related to rupturing of known earthquake faults. 2035 GP policies 3.4-6, 4.4-3, 5.2-1, 6.1-1 would reduce the impact to a less than significant level. According to the California Geological Survey, Belmont is not listed as being affected by an Alquist–Priolo Earthquake Fault Zone. 2035 GP Policy 6.1-8 requires that consideration of seismic and geologic hazards is considered early in the development process, and Policy 6.1-10 requires the City to identify structures that may be subject to damage from an earthquake and provide information on ways to rehabilitate the structures to improve safety. Potential adverse effects to people or structures from the rupture of a known earthquake fault would be minimized by implementing the above referenced policies.

The following 2035 GP Policies reduce the potential impact level of liquefaction to less than significant: Policy 6.1-3 prohibits development at high or very high risk of liquefaction; Policy 6.1-9 requires real estate transactions to declare known or suspected geologic hazards, such as liquefaction; and Policy 3.4-6 in the 2035 GP Circulation Element requires the location and design of new roadways to prevent erosion and minimize grading.

According to the Geology and Soils chapter of the 2017 EIR, generally, the younger and looser the sediment and the higher the water table, the more susceptible the soil is to liquefaction. Sediments most susceptible to liquefaction include Holocene (less than 10,000 years old) delta, river channel, flood plain, aeolian deposits, and poorly compacted fills. Dense soils, including well-compacted fills, have low susceptibility to liquefaction. Policy P13 from the OSMP aims to minimize unnatural soil erosion and sedimentation of waters and wetlands that could otherwise lead to an increase in risk. Additionally, with implementation of the 2035 GP policies, the potential impacts from liquefaction would be minimized to the greatest extent feasible.

The 2017 EIR (pages 4.5-1 through 4.5-26) found a less-than-significant impact for implementation of the Approved Project regarding erosion or the loss of topsoil. The 2035 GP policies and the Phase I Zoning regulations would further reduce potential impacts of erosion. 2035 GP Policy 3.4-6 minimizes erosion from new roadways; Policies 6.1-5 and 6.1-6 require geotechnical studies to address the risk of erosion; Policy 6.1-2 requires the City to continue to regulate development to ensure adequate mitigation of erosion hazards; and Policy 6.1-11 requires the City to support erosion prevention through revegetation and other methods. Section 7A, Off-Street Parking and Loading in Commercial Mixed Use and Regional Commercial Districts in the Phase I Zoning requires cross-grades to be designed for slower stormwater flow, which will minimize erosion.

The 2017 EIR (pages 4.5-1 through 4.5-26) found a less-than-significant impact for implementation of the Approved Project regarding supporting the use of septic tanks or alternative wastewater disposal systems. The City of Belmont Sewer Division oversees the collection and treatment of all wastewaters. Proposed 2035 GP Policy 6.5-5 reinforces the City ordinance, mandating all new development be connected to the City's sewer system; accordingly, all proposed improvements would be tied into the existing wastewater collection, as City ordinance requires new development in Belmont to connect to the City's wastewater system. Future development that may result from implementation of the 2035 GP would not require septic systems or other alternative wastewater disposal systems.

2035 GP POLICIES THAT REDUCE IMPACTS:

CIRCULATION ELEMENT

Policy 3.4-6: Locate, design, and landscape new roadways to preserve the beauty of the area, prevent erosion, and help shield residents from noise and air pollution. To the extent possible, retain trees and vegetative cover and minimize grading.

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.4-3: Consistent with the San Juan Hills and Western Hills area plans, cluster development in the hillside areas of western Belmont in order to maintain contiguous

habitat areas, minimize grading, and limit exposure to steep slopes and other sensitive areas. *See also policies in the Land Use Element.*

CONSERVATION ELEMENT

Policy 5.2-1: Encourage the retention of areas that are hazardous to public safety and welfare as undeveloped open space, including steep hillsides unsuitable for development as identified in area plans and other detailed geotechnical studies; hydrological areas of concern; areas of geological instability; and appropriate setback areas on either side of known active fault traces. *See also discussion and policies in the Safety Element.*

SAFETY ELEMENT

Policy 6.1-2: Continue to regulate development, including remodeling or structural rehabilitation, to ensure adequate mitigation of safety hazards on sites having a history or threat of seismic dangers, erosion, landslides, or shrink swell.

Policy 6.1-3: Prohibit development in areas at risk of landslides or high or very high liquefaction as shown in Figure 6-1, or on slopes steeper than 30 percent, unless detailed site investigations by licensed engineers ensure that risks do not exist, or can be reduced to acceptable levels and the structure will be protected for its expected life.

Policy 6.1-5: Geotechnical studies shall identify any geologic hazards affecting the proposed project site, any necessary mitigation measures, and a statement of the site's suitability for the proposed development and whether or not it will be safe from geologic hazard for its expected life. The study shall identify net developable areas, if any, based on landslide or ground shaking potential or erosion risk. Impacts from the development, such as those resulting from increased water runoff, shall also be determined. Such studies must be signed by a licensed Certified Engineering Geologist or Geotechnical Engineer and are subject to review and approval by City staff and/or contracted employees.

Policy 6.1-6: Require any geotechnical studies to include the study of expansive and creeping soils, as well as analysis of erosion, seismic, and other geotechnical hazards, and make recommendations, as warranted.

Policy 6.1-8: Ensure consideration of seismic and geologic hazards at the earliest possible point in the development process, preferably before comprehensive engineering work has commenced.

Policy 6.1-9: Require real estate transactions, development approval processes, and property titles to declare known or suspected seismic or geologic hazards on a property, including areas suspected of high or very high risk of liquefaction, shrink swell, or landslide.

Policy 6.1-10: Identify and catalogue structures that may be subject to serious structural damage in the event of a major earthquake, such as unreinforced masonry and soft story buildings, and provide information to property owners on ways to pay for rehabilitation of existing buildings.

DRAFT

Policy 6.1-11: Support erosion prevention of hillside areas at risk of landslide, as identified in Figure 6-1, by revegetation or other acceptable methods.

Policy 6.5-5: Require all new development to be connected to the City's sewer system.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a-i) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?

Less Impact than the Approved Project

Implementation of the proposed Project would have less impact than those analyzed in the 2017 EIR regarding risks of loss, injury, or death associated with rupturing of a known earthquake fault. The 2035 GP anticipates approximately 2.9 million square feet of new development. In contrast, the draft PROS Plan includes construction of at least one restroom at Hidden Canyon Park. The 2035 GP Policies included in the 2017 EIR would apply to the construction of a restroom (or other proposed park amenity) as part of Proposed Project implementation. The Proposed Project, when paired with the 2035 GP policies, would result in less impacts when compared to those analyzed in the 2017 EIR.

a-ii) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: Strong seismic ground shaking?

Less Impact than the Approved Project

In general, considering the proximity to the San Andreas fault, all locations within the Planning Area could experience considerable ground shaking. Policy 13 from the Proposed Project aims to minimize unnatural soil erosion and sedimentation of waters and wetlands that could otherwise lead to an increase in risk because ground shaking tends to be more severe in softer sediments such as alluvial deposits where surface waves can be amplified causing a longer duration. Additionally, with implementation of the 2035 GP policies which supplement the existing building code requirements, the potential impacts from ground shaking would be minimized to the greatest extent feasible. The Proposed Project, when paired with the 2035 GP policies, would result in less impacts when compared to those analyzed in the 2017 EIR.

a-iii) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: Seismic-related ground failure, including liquefaction?

Less Impact than the Approved Project

According to the Geology and Soils chapter of the 2017 EIR, generally, the younger and looser the sediment and the higher the water table, the more susceptible the soil is to liquefaction. Sediments most susceptible to liquefaction include Holocene (less than 10,000 years old) delta, river channel, flood plain, aeolian deposits, and poorly

compacted fills. Dense soils, including well-compacted fills, have low susceptibility to liquefaction. Policy 13 from the Proposed Project aims to minimize unnatural soil erosion and sedimentation of waters and wetlands that could otherwise lead to an increase in risk. Additionally, with implementation of the GP policies, the potential impacts from liquefaction would be minimized to the greatest extent feasible. The 2017 EIR analyzed the impacts of constructing multiple residential and commercial buildings for a total of 2.9 million square feet. The Proposed Project, when paired with the 2035 GP policies, would result in less impacts when compared to those analyzed in the 2017 EIR.

a-iv) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: Landslides?

Same Impact as the Approved Project – Less than Significant

Landslides may occur within the Planning Area on slopes of 15% or less, but the probability is greater on steeper slopes. For the Proposed Project, this impact is considered with the small amount of construction of park amenities, potential trail improvements, and stream crossings. Within the 2035 GP, Policy 5.2-1 that encourages that areas with steep slopes remain undeveloped is followed by the Proposed Project with the development of Hidden Canyon and Ralston Ranch occurring outside of steep slope or high landslide potential areas (see Figure 6-1 in 2035 GP).

Furthermore, 2035 GP Policy 6.1-11 that requires the City to support erosion prevention, and Proposed Project Policy 13 aims to minimize unnatural soil erosion and sedimentation of waters and wetlands and Policy 48 manages severe erosion areas on hill slopes that could otherwise lead to an increase in unstable slopes. With implementation of the 2035 GP policies, the potential impacts from liquefaction would be minimized to the greatest extent feasible. The Proposed Project, when paired with the 2035 GP policies, would result in the same impacts when compared to those analyzed in the 2017 EIR.

b) Result in substantial soil erosion or the loss of topsoil?

Same Impact as the Approved Project – Less than Significant

Potential impacts associated with substantial soil erosion or loss of topsoil could occur during ground disturbing activities as part of implementation of the Proposed Project. These activities include the following: trail maintenance and improvements, inclusion of park amenities, fire fuel reduction, and construction of park infrastructure, such as a bathroom. Policy 13 from the Proposed Project requires minimizing unnatural soil erosion and sedimentation of waters and wetlands that could otherwise lead to an increase in unstable slopes. Policy 48 manages severe erosion areas on hill slopes near/within streams. The Proposed Project also includes trail construction and maintenance standards and guidelines to reduce potential soil erosion. Additionally, with implementation of the 2035 GP policies, the potential impacts from liquefaction for construction of new park features at Hidden Canyon and Ralston Ranch parks, and from ground disturbing actions within WDL and SJC Open Space areas would be minimized to the greatest extent feasible. The Proposed Project, when paired with the 2035 GP policies and Proposed Project policies, would result in the same impacts when compared to those analyzed in the 2017 EIR.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

Same Impact as the Approved Project – Less than Significant

As in the 2017 EIR analysis, the potential hazards of unstable soil or geologic units would be addressed largely through the integration of geotechnical information in the planning and design process for individual projects to determine the local soil suitability for specific projects in accordance with standard industry practices and state-provided requirements, such as California Building Code (CBC) requirements which are used to minimize the risk associated with these hazards. The following 2035 GP policies were applied in the 2017 EIR to reduce impacts to less than significant and would be likewise applied to the Proposed Project: Policy 6.1-4 requires geotechnical site analysis for certain sites; Policy 6.1-6 requires geotechnical investigations to evaluate site specific geotechnical characteristics, including the study of expansive or creeping soils; and Policy 6.1-5 requires the geotechnical studies to propose mitigation measures, if necessary. These measures are enforced through compliance with the CBC to avoid or reduce hazards relating to unstable soils and slope failure. In addition, 2035 GP Policies 6.1-1 and 6.1-2 ensure the enforcement of safety standards for new development related to seismic activity, erosion, landslides, and shrink swell. As discussed in Impact 4.5-1 of the 2017 EIR, Policy 6.1-3 prevents development in areas at risk of landslides and liquefaction. Implementing the Proposed Project in Hidden Canyon, Ralston Ranch parks, and WDL and SJC would involve ground-disturbing activities (e.g., removal of vegetation at the two parks, trail vegetation removal, removal of wildfire prone vegetation), potentially on steep slopes; however, Proposed Project Policy 13 requires minimizing unnatural soil erosion and sedimentation of waters and wetlands that could otherwise lead to an increase in unstable slopes. The Proposed Project, when paired with the 2035 GP policies and Proposed Project policies, would result in the same impacts regarding unstable soil when compared to those analyzed in the 2017 EIR.

d) Be located on expansive soil, as defined in Table 18 1 B of the Uniform Building Code, creating substantial direct or indirect risks to life or property?

Same Impact as the Approved Project – Less than Significant

As noted in the 2017 EIR, small areas of expansive soils are scattered throughout the Approved Planning Area. Review of Figure 6-1 in the 2035 GP shows that some of these small expansive soil areas overlap with Ralston Ranch, WDL, and SJC. However, the Proposed Project does not include any structures to be built in these areas. The 2035 GP includes policies to address potential impacts associated with expansive soils, including Policy 6.1-2 which regulates development and remodeling on sites with a history of shrink swell. The Proposed Project, when paired with the 2035 GP policies would result in the same impacts regarding expansive soils when compared to those analyzed in the 2017 EIR.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

Same Impact as the Approved Project – Less than Significant

The 2017 EIR highlighted the purview of the City Sewer Division, which oversees the collection and treatment of all wastewaters. In addition, the 2017 EIR outlines the 2035 GP policies that apply to septic tanks and wastewater infrastructure, including Policy 6.5-5, which reinforces the City ordinance, mandating all new development be connected to the City's sewer system. The Proposed Project includes only one restroom constructed at Hidden Canyon Park, located at the end of a residential area street. The restroom may connect to the City's existing sewer system. No other developments requiring wastewater disposal are proposed. As such, Proposed Project impacts would be the same as those for the Approved Project as outlined in the 2017 EIR.

f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Same Impact as the Approved Project – Less than Significant

The 2017 EIR found a less-than-significant impact (Impact 4.4-3, Cultural Resources Chapter) with regard to directly or indirectly destroying a unique paleontological resource, site, or feature. 2035 GP Action 5.12-2.b refers to protection of archaeological/ paleontological resources through site surveys (Policy 5.20), and site protection (Policy 5.21). Overall, Proposed Project actions, with the implementation of 2035 GP Policies, have less than significant impacts to potential paleontological resources or unique geologic features. These actions include the following: trail maintenance and construction, vegetation and fire fuel management, construction of new park paths and amenities, park landscaping and stream crossings. Should any paleontological resources be found during Proposed Project ground-disturbing activities, implementing the 2035 GP policies will result in the same impacts as the Approved Project.

DRAFT

7.9 Greenhouse Gas Emissions

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a)	Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	Yes	☐	☐	☐	☐	☒
b)	Conflict with any applicable plan, policy, or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?	Yes	☐	☐	☐	☐	☒

REGULATORY SETTING UPDATE

In 2008, the California Air Resources Board (ARB) adopted the *Climate Change Scoping Plan* (2008 Scoping Plan); a framework for change (California Air Resources Board, 2008). This document served as a framework for achieving the greenhouse gas (GHG) emission reduction targets set by Assembly Bill 32 (passed in 2006). In 2014, the ARB subsequently adopted the *First Update to the Climate Change Scoping Plan* (2014 First Update) (2014). The 2008 Scoping Plan and 2014 First Update outline a series of technologically feasible and cost-effective measures to reduce statewide GHG emissions. Another update was adopted in 2017, *California's 2017 Climate Change Scoping Plan* (2017 Scoping Plan) (2017), which incorporates, coordinates, and leverages many existing and ongoing efforts and identifies new policies and actions to accomplish the State's climate goals. It requires implementation of Senate Bill 32 (passed in 2016), which requires a 40% reduction in GHGs from 1990 levels by 2030. The 2017 Scoping Plan also includes the implementation of Assembly Bill 617 (passed 2017) to protect community health in disadvantaged communities. More recently, the ARB published the *2022 Scoping Plan for Achieving Carbon Neutrality* (2022 Scoping Plan) (2022) which identifies targets for carbon neutrality and a pathway for implementing Assembly Bill 1279 to reduce GHG emissions by 85% below 1990 levels by 2045. The 2022 Scoping Plan incorporates natural and working lands into GHG emissions and carbon neutrality strategies, identifies new clean technology and energy, and support transportation programs including Executive Order N-79-20 which requires all passenger vehicles sold in California to be zero-emission by 20245. The 2022 Scoping Plan also calls for evaluation and if needed strengthening of statewide programs leveraged in the 2017 Scoping Plan including: SB350, Low Carbon Fuel Standard, Mobile Sources/Sustainable Freight Action Plan, AB 1383, and the Cap and Trade program.

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential Greenhouse Gas Emission (GHG) impacts included in the 2035 GP and analyzed in the 2017 EIR include the following:

- Less than Significant with Mitigation: Construction associated with later projects under the 2035 GP would result in the temporary generation of GHG emissions. changes in the land use designations of certain areas could result in more intense construction activities under the 2035 GP than would have taken place under the previous general plan.
- Less than Significant: Operation of land uses supported by the 2035 GP would generate direct and indirect GHG emissions.
- Less than Significant: The 2035 GP does not conflict with an applicable plan, policy, or regulation adopted for the reducing the emissions of GHGs.

Findings

The 2017 EIR found there was a less-than-significant impact for both construction and operational phases of the Approved Project; however, the construction phase recommended the addition of mitigation to maintain less-than-significant impact levels. Accordingly, a high-level analysis was performed based on the average annual amount of development that may occur under the 2035 GP, assuming an equal amount of construction over the 17-year buildout period. New development would be required to comply with Best Management Practices (BMPs), which would reduce construction emissions consistent with BAAQMD (Bay Area Air Quality Management District) guidance and statewide emission reduction goals.

The 2017 EIR found less-than-significant impacts regarding conflicts with applicable plans, policies, or regulations adopted to reduce greenhouse emissions. AB 32 codifies the State's greenhouse gas (GHG) emissions reduction targets for 2020. California Air Resources Board (ARB) adopted the 2008 Scoping Plan and 2014 First Update as a framework for achieving the AB 32 targets. The 2008 Scoping Plan and 2014 First Update outline a series of technologically feasible and cost-effective measures to reduce statewide GHG emissions. The Climate Action Plan (CAP) developed as part of the Approved Project would reduce emissions 31% below 2005 levels and would result in emissions per service population of 3.2 metric tons CO2e per Service Population (SP). This goal exceeds ARB's recommendation of 15% below 2005. The 2017 updated Plan goes further, reducing GHG's from 1990 levels by 40 percent. The proposed 2035 GP and BVSP also include numerous policies to reduce operational and construction related GHG emissions. For example, 2035 GP Policies 2.3-2, 2.5-6, 3.2-4, and 3.6-3 and BVSP Policies 2.1-1, 2.1-3 and 2.1-5 support design and implementation of mixed-use developments, which would reduce growth-related Vehicle Miles Traveled (VMT). Expanding transit and increasing opportunities for active transportation (e.g., walking and biking) are also supported by the proposed 2035 GP, CAP, and BVSP (e.g., 2035 GP Policies 3.2-2, 3.2-4, 3.5-8 and BVSP Policies 3.2-2, 3.2-80).

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.1-2: Coordinate land use and transportation planning to ensure that land use patterns and intensities can be supported by and are accessible to the transportation

network, including pedestrian and bicycle facilities. *See also Policy 3.1-1 in Circulation Element.*

Policy 2.3-2: Encourage higher density residential uses located in close proximity to commercial services, employment opportunities, and major transportation corridors and facilities.

Policy 2.5-6: Enhance walkability and pedestrian orientation of the Village to create an identity, improve the atmosphere, and improve access to and utilization of transit, in accordance with the Belmont Village Specific Plan. *See also Policies in the Circulation Element.*

CIRCULATION ELEMENT

Policy 3.1-1: Ensure land use and circulation planning is developed concurrently. In portions of Belmont that include significant open space resources, use area plans to address the balance and interface between natural and developed areas.

Policy 3.2-2: Look for ways to partner with ride-sharing services as a means to reduce the need for car ownership and cover service gaps in the public transportation system.

Policy 3.2-4: Support thoughtful and appropriate land use locations and densities with development or redevelopment in Belmont that promote alternatives to travel via single-occupant vehicles. *See Policy 2.1-2 in the Land Use Element.*

Policy 3.5-8: Support and provide bicycle and pedestrian connections to commercial and employment areas to enhance accessibility.

Policy 3.6-3: Ensure that major new development is adequately served by transit.

MITIGATION MEASURES
AQ-2: Require construction fleet to use renewable diesel.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Same Impact as Approved Project – Less than Significant with Mitigation.

Construction activities resulting from implementation of the Proposed Project would be on a much smaller scale than those of the Approved Project analyzed in the 2017 EIR. The majority of parks, including the two open spaces will undergo minor improvements or have upgraded or new amenities added. Hidden Canyon Park would add at least one ADA parking space as well as new amenities, and Ralston Ranch would add benches and a walking path. The development of Hidden Canyon and Ralston Ranch parks are expected to distribute existing park visitors. Increases in visitation are expected as population increases, but not as a result of the Proposed Project. In addition, Strategies 1.A-1.F of the Proposed Project are focused on increasing pedestrian, bicycle, and transit

connectivity to parks and open spaces. Therefore, the Proposed Project will have the same impacts as the Approved Project and implement the same policies and mitigation measures to reduce impacts to a less than significant level.

b) Conflict with any applicable plan, policy, or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?

Same Impact as Approved Project – Less than Significant

As noted above, the Proposed Project would result in the development of two parks and relatively minor upgrades or additions to the remaining parks and open spaces. Implementation of Proposed Project Strategies 1.A-1.F to improve pedestrian, bicycle, and transit connections to parks and open spaces ensures alignment with 2035 GP policies under the Circulation and Land Use Elements discussed above which support reduction of GHG's in accordance with state law. Therefore, the Proposed Project will have the same impacts as the Approved Project and does not conflict with an applicable plan, policy, or regulation adopted for the reducing the emissions of GHGs.

DRAFT

7.10 Hazards and Hazardous Materials

Would the project:		*Discussed in the 2017 EIR? (Yes/No)*	*Less Impact than Approved Project?*	*New Less-than-significant impact?*	*New Less-than-significant impact with Mitigation Incorporated?*	*New Potentially Significant Impact?*	*Same Impact as Approved Project?*
a)	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	Yes	☐	☐	☐	☐	☒
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	Yes	☒	☐	☐	☐	☐
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	Yes	☐	☐	☐	☐	☒
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	Yes	☐	☐	☐	☐	☒

DRAFT

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	Yes	☐	☐	☐	☐	☒
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	Yes	☐	☐	☐	☐	☒
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential hazards and hazardous materials impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Implementation of the Proposed Project would include land uses and renewable energy systems that would require the routine use, transport, and disposal of hazardous materials and waste and may increase exposure to risk of hazards. Future construction activities associated with implementation of the Proposed Project may also generate hazardous materials and waste, such as fuels and oils from construction equipment and vehicles.
- Less-than-significant: impacts regarding safety hazards for projects within two miles of a public airport, or within an airport land use plan.
- less-than-significant: impacts regarding impairing implementation of or physically interfering with an adopted emergency response plan or emergency evacuation plan.

- Less than Significant: Implementation of the Approved Project to expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires

Findings

Policies in the 2035 GP further reduce potential hazards and hazardous materials impacts by supporting inspection and cleanup of contaminated sites. Policy 6.3-1 requires the City to facilitate cleanup programs at contaminated sites; Policy 6.3-2 requires applicants for development projects in potentially contaminated locations to perform inspection and cleanup; and Policy 6.3-3 establishes that the City will require project applicants to have sites inspected by a registered Environmental Assessor.

The 2017 EIR (pages 4.7-35 to 4.7-37) found less-than-significant impacts regarding safety hazards for projects within two miles of a public airport, or within an airport land use plan. The Airport Land Use Compatibility Plan (ALUCP) per California law ensures compatibility between the airport and nearby land uses. The San Carlos ALUCP specifies that the western Approved Project Planning Area is located within Area A of the Airport Influence Area (AIA) requiring state law real estate disclosures, and the eastern portion of the Approved Project Planning Area is within Area B of the AIA requiring review of land use policy actions.[2].

The 2017 EIR (pages 4.7-37 to 4.7-40) found less-than-significant impacts regarding impairing implementation of or physically interfering with an adopted emergency response plan or emergency evacuation plan. 2035 GP policies from the Safety Element (Policies 6.7-1 through 6.7-9 and Policies 6.9-1 through 6.9-3, and 6.10-1) ensure impacts of implementing the 2035 GP would remain less than significant.

The 2017 EIR (pages 4.7-40 through 4.7-43) found impacts regarding wildfires would be less than significant. Approximately half of the 2035 GP Planning Area is at risk for wildland fires. Development in these areas would be consistent with the City's Fire Code. These requirements reduce the threat to developed areas. In addition, the 2035 GP proposes policies that address the Urban/Wildland Interface Zone, wildland fire risk, and fire-fighting facilities and services. Policy 2.14-3 requires the City to create design standards for the interface between open spaces and neighborhoods, which would include standards for "Defensible Space" development to reduce wildfire risk, and Policy 6.6-9 requires development located within the Very High Fire Hazard Severity Zone (VHFHSZ) to maintain 100 feet of defensible space; Policies 4.4-7 and 5.1-3 reduce wildland fire risk through maintenance of public spaces to prevent accumulation of fuel for fires, and require the City to continue programs to reduce the fire danger in open spaces, such as establishing buffers between development projects and adjacent natural areas as well as establishing clear boundaries between open space and private property; Policies 6.6-1 and 6.6-6 support the Belmont Fire Protection District's fire protection services in the Wildland Urban Interface (WUI) so that resources will be allocated to fire protection; Policy 6.6-2 requires the City to work with the Mid-Peninsula Water District to ensure capacity to fight wildland fire scenarios to reduce the risk from new fires; and Policy 6.6-7 requires the city to participate in State and regional legislative and regulatory efforts to manage the Wildland Urban Interface. In addition, several policies, including 6.6-3, 6.6-4, 6.6-5, 6.6-8, 6.6-9, 6.6-10, and 6.6-11 require the City to continue practices that reduce the threat of fire for new development. Taken together,

[2] The Approved Project was found consistent with the San Carlos ALUCP on September 28, 2017.

the policies will help reduce the risk of fires starting in WUI areas and will allocate resources for fighting any fires that do happen to occur within the Approved Project Planning Area, reducing the significant risk of loss associated with wildfires.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.14-3: Create clear design standards for the interface between open spaces and neighborhoods, especially in the Urban/ Wildland Interface Zone. Standards should identify the margin of open space needed to allow wildlife, recreation, and aesthetic values to flourish while also reducing threats of fire and invasive plant species. Incorporate "Defensible Space" standards as needed in areas of high wildfire risk.

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.4-7: Continue programs to reduce the fire danger in the open space. *See Policy 5.1-3 in the Conservation Element.*

CONSERVATION ELEMENT

Policy 5.1-3: Reduce risk of wildland fire, ecological succession, and pathogen threats (such as Sudden Oak Death) through active maintenance of public spaces and education and enforcement of development standards on private property.

SAFETY ELEMENT

Policy 6.3-1: Facilitate clean-up programs at contaminated sites, particularly on properties with the potential to develop or be reused for public purposes.

Policy 6.3-2: Require applicants for development projects in a potentially contaminated location to perform inspection and cleanup if the site is found to be contaminated with hazardous substances.

Policy 6.3-3: Require project applicants of potentially contaminated sites to have the site inspected by a registered Environmental Assessor. Reports detailing the results must be submitted for City review, and level of remediation and cleanup must be in compliance with federal and State standards.

Policy 6.6-1: Support efforts by the Belmont Fire Protection District to meet its response time standards throughout Belmont, especially in areas in the Wildland Urban Interface.

Policy 6.6-2: Work with the Mid-Peninsula Water District to maintain adequate water supply for firefighting, including capacity for peak load under a reasonable worst case wildland fire scenario, to be determined by the Belmont Fire Protection District. In evaluating sites for new water storage facilities, place a priority on locations least subject to impacts from seismic activity and landsliding.

DRAFT

Policy 6.6-3: Continue to review development proposals to ensure that they incorporate appropriate fire-mitigation measures, including adequate provisions for evacuation and access by emergency responders.

Policy 6.6-4: Continue the Belmont Fire Protection District's participation in plan review of new buildings in potentially fire-prone areas.

Policy 6.6-5: Continue to require a fire prevention inspection of all buildings used as commercial businesses, places of assembly, multi-family residences, and hotels within the Belmont Fire Protection District's boundaries.

Policy 6.6-6: Promote and support the Belmont Fire Protection District's Vegetation Management Program to reduce fire hazards, particularly in areas in the Wildland Urban Interface.

Policy 6.6-7: Continue to participate in State and regional efforts to develop a clear legislative and regulatory framework to manage the Wildland Urban Interface.

Policy 6.6-8: Continue educating the public about local fire hazard prevention programs, including landscaping with fire resistant plants between residential and open space areas, weed control, brush control, controlled burns, and placement of trails and roads to serve as firebreaks. Work cooperatively with the Belmont Fire Protection District to promote public awareness of fire safety and emergency life support.

Policy 6.6-9: Continue to require development located within the VHFHSZ to maintain 100 feet of defensible space consistent with California Government Code Section 51182. *See also Policy 2.14-3 in the Land Use Element regarding defensible space.*

Policy 6.6-10: Continue to require development located within the Wildland Urban Interface (WUI) to follow the code requirements in Chapter 7A of the California Building Code, and require buildings to be constructed of ignition-resistant materials and methods.

Policy 6.6-11: Lessen the risk of wildfire and maintain clear and safe access and evacuation routes in areas of high and very high fire hazard severity by continuing to enforce Belmont Municipal Code section 7-401, which classifies nuisances as, in part, overgrown vegetation; dead, decayed, diseased, or hazardous trees, firewood; weeds and other vegetation that may be a fire hazard.

Policy 6.7-1: Adopt, maintain, and periodically update a Local Hazard Mitigation Plan, coordinating with regional planning efforts as possible.

Policy 6.7-2: Continue to monitor changes in the Federal Disaster Act and applicable State laws, keep City officials and residents aware of the impacts of these changes, and update as necessary the City's Emergency Response Plan, which provides adequate response to disasters, including emergency ingress and egress, and defines the expected roles of City, County, and regional agencies.

DRAFT

Policy 6.7-3: Update City codes and ordinances dealing with public safety and emergency preparedness and relief to comply with State law and reflect the latest information on hazards and mitigation strategies.

Policy 6.7-4: Continue to upgrade preparedness strategies and techniques in all departments so as to be prepared when a disaster, either natural or man-made, occurs.

Policy 6.7-5: Develop effective mechanisms for a coordinated response to natural and man-made emergencies by:

- Conducting regular emergency planning meetings and disaster preparedness exercises with City departments, the Fire District, the County, medical centers, and other emergency service providers and relevant public agencies;
- Holding emergency drills that require all City staff to be adequately trained to handle different kinds of emergency scenarios; and,
- Coordinating with the County on regional emergency communications.

Policy 6.7-6: Work with the Mid-Peninsula Water District to ensure that it has a plan and infrastructure for providing adequate water service and storage, including peak load water supply requirements, during and immediately after an emergency, including a major seismic event.

Policy 6.7-7: Require companies providing public utilities in Belmont to have plans for reestablishing service in the event of a major seismic event or other natural disaster.

Policy 6.7-8: Do not locate structures necessary for the protection of the public's health and safety, public assembly, or emergency services in hazardous areas, unless no reasonable alternative exists.

Policy 6.7-9: Ensure critical use facilities that are important to protecting health and safety in the community remain operational during an emergency.

Policy 6.9-1: Initiate periodic public information programs that explain the City's emergency preparedness programs, including the emergency communications system, evacuation routes, the importance of defensible space, the Community Emergency Response Teams, and shelter locations.

Policy 6.9-2: Promote programs to educate the public concerning the nature of earthquake, fire, and flood hazards in Belmont and measures that individuals can take to reduce risk.

Policy 6.9-3: Encourage school districts, agencies, and organizations that work with vulnerable populations, such as seniors, to develop and carry out education programs on disaster preparedness and response needs.

Policy 6.10-1: Ensure that new roadways are developed in accordance with standards in the Municipal Code (Sec. 7-11) requiring all-weather access prior to issuance of building permit. In all new development, require adequate access to be provided for emergency vehicles, including adequate widths, turning radii, hard standing areas, and vertical clearance; also require home addresses and street signage to be visible.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Same Impact as Approved Project – Less than Significant

Implementation of the Proposed Project would include operational and construction activities that would require the routine use, transport, and disposal of hazardous materials such as gasoline and diesel fuel and herbicides. Future construction activities associated with the implementation of the Proposed Project may also generate hazardous materials and waste, such as fuels and oils from construction equipment and vehicles. Policy 6.4-1 in the 2035 GP requires the City to continue to support hazardous waste collection by San Mateo County, the State of California, and the Water Resources Control Board, and Policy 6.4-2 requires the City to educate residents and businesses about proper use and disposal of hazardous materials. These efforts would also apply to Proposed Project and would help prevent hazardous materials from being improperly handled or disposed of, keeping such material out of the environment.

The Proposed Project would not involve construction of new dwelling units, industrial facilities, or commercial spaces. Additionally, Proposed Project maintenance and management action largely entail hand tools and small mechanized equipment with some use of gasoline and diesel fuel. Based on implementation of existing State, and local programs and regulations as well as the policies of the 2035 GP, the impacts of the Proposed Project are the same as the Approved Project as analyzed in the 2017 EIR.

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less than Approved Project

The Proposed Project does not include the development of industrial land uses, such as dry cleaners, gas stations, or manufacturers that could result in accident conditions involving the release of hazardous materials into the environment. Furthermore, the activities included in the Proposed Project would not require the use of hazardous materials associated with industrial or commercial land uses. Therefore, impacts would be less than those analyzed in the 2017 EIR.

c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Same Impact as Approved Project – Less than Significant

The 2017 EIR (pages 4.7-31 to 4.7-33) found less-than-significant impacts regarding emitting hazardous emissions within a quarter mile of an existing or new school. Several parks in the Proposed Project (Cipriani, McDougal, and O'Donnell parks) are within one quarter mile of schools. Any handling of hazardous materials used for construction or operation and maintenance actions at these locations would need to comply with federal,

state, and county regulations pertaining use of hazardous materials as described on page 4.7-21 of the 2017 EIR. Crystal Springs Middle School is within a quarter mile of the WDL Open Space area. In some cases, mechanized hand tools would be used to removal wildfire hazards, exotic vegetation, and clear vegetation along trails resulting in negligible emissions from gas powered engines. Based on implementation of existing State, and local programs and regulations as well as the policies of the 2035 GP, the impacts of the Proposed Project are the same as the Approved Project as analyzed in the 2017 EIR.

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Same Impact as Approved Project – Less than Significant

Ralston Middle School is a recognized hazardous waste site and is adjacent to the WDL Open Space Area. There are no documented hazardous material sites located in Hidden Canyon and Ralston Ranch Parks. Policies in the 2035 GP referenced above would further reduce potential impacts by supporting inspection and cleanup of contaminated sites. Based on implementation of existing State, and local programs and regulations as well as the policies of the 2035 GP, the impacts of the Proposed Project are the same as the Approved Project as analyzed in the 2017 EIR.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

Same Impact as Approved Project – Less than Significant

The Proposed Project Planning Area is located entirely within the footprint as the Approved Project Planning Area. As such, the Proposed Project Planning Area is located within Area A of the Airport Influence Area (AIA), and the eastern portion of the Proposed Project Planning Area is within Area B of the AIA. Implementation of actions contemplated for the Proposed Project will occasionally involve construction and operations and maintenance workers in those areas. No land use or zoning changes are proposed. Impacts would be the same as those analyzed in the 2017 EIR.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Same Impact as Approved Project – Less than Significant

The Proposed Project would result in new or upgraded trails and amenities to parks and open spaces. Any changes to the distribution of visitors to parks and open spaces resulting from the Proposed Project are not expected to interfere with emergency response or evacuation plans. Construction, maintenance, and use of parks and open spaces resulting from the Proposed Project must adhere to 2035 GP Safety Element policies including 6.7-1 through 6.7-5 which require the development and updating of mitigation and response plans, compliance with state laws and City codes, as well as refining preparedness and response efforts. The Proposed Project impacts would be the same as those analyzed in the 2017 EIR.

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

Same Impact as Approved Project – Less than Significant

The Proposed Project will result in the development of new amenities at Hidden Canyon Park which is surrounded by WDL on three sides. The Proposed Project will also result in fuel reduction treatments at WDL, with efforts focused in the region around Hidden Canyon Park (Lake Road, Hastings Drive, and Hallmark Drive), thus reducing risk of fire. The Proposed Project will result in replacing non-native vegetation across parks and open spaces with native vegetation reducing risk of loss from fire in these areas. Proposed Project Policies 38-52 address wildfire prevention, response, and mitigation in open space areas. The Proposed Project, when paired with the 2035 GP policies, would result in the same impacts regarding fire hazard when compared to those analyzed in the 2017 EIR.

DRAFT

7.11 Hydrology and Water Quality

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	Yes	☐	☐	☐	☐	☒
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	Yes	☒	☐	☐	☐	☐
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:						
i) result in substantial erosion or siltation on- or off-site;	Yes	☐	☐	☐	☐	☒
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	Yes	☐	☐	☐	☐	☒
iii) create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff; or	Yes	☐	☐	☐	☐	☒
iv) impede or redirect flood flows?	Yes	☐	☐	☐	☐	☒
d) In flood hazard, tsunami, or seiche zones, risk	Yes	☐	☐	☐	☐	☒

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
release of pollutants due to project inundation?						
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Potential Hydrology and Water Quality impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

Impacts

- Less Than Significant: The 2017 EIR (pages 4.8-18 and 4.8-19) found less-than-significant impacts regarding violating water quality standards. Implementation of the 2035 GP allows for additional development within the city that would increase the amount of impervious surfaces and could therefore increase the amount of runoff and associated pollutants during both construction and operation.
- Less than Significant: The 2017 EIR (pages 4.8-20 and 4.8-21) found less-than-significant impacts regarding decreasing groundwater supplies or interfering with groundwater recharge.
- Less than significant: The 2017 EIR (pages 4.8-22 to 4.8-25) found less-than-significant impacts regarding substantially altering the existing drainage pattern of a site or area. Implementation of the 2035 GP would not involve the direct alteration of existing streams, rivers, or other drainage patterns. However, future development/redevelopment allowed under the 2035 GP could impact the existing drainage system. Increases to impervious surfaces in connection with new development, such as roofs, patios, driveways, and parking areas could lead to increased stormwater flow and runoff into the local storm drains and creeks in the 2035 GP Planning Area, which could result in hydromodification effects to the local creek systems.
- Less than significant: Per the 2017 EIR, the Approved Project has less-than-significant impacts regarding the release of pollutants into flood hazard, tsunami, or seiche zones.
- Less than significant: The 2017 EIR found (pages 4.8-18 and 19) less than significant impacts with regard to obstructing implementation of a water quality control plan.

Findings

The 2017 EIR (pages 4.8-18 and 4.8-19) found less-than-significant impacts regarding violating water quality standards. The 2035 GP contains goals and policies pertaining to water quality, as listed below. Policy 6.2-9 requires the City to continue to comply with the Municipal Regional Stormwater Permit requirements, and Policy 6.2-10 requires compliance with the federal Clean Water Act (CWA), both of which define standards for water quality and impose requirements that will also limit the severity of any potential environmental effects caused by developments associated with the 2035 GP. In addition, Policy 5.5-3 requires development projects to incorporate best management practices (BMP) consistent with the National Pollutant Discharge Elimination System (NPDES) permit guidelines to ensure new construction is required to reduce its contribution of water pollutants to less-than-significant levels. Implementation of these practices would reduce the volume of runoff from impervious surfaces and increase the amount of natural filtration of pollutants from stormwater occurring on the site, generally improving the quality of stormwater before it enters the city's stormwater system.

The 2017 EIR (pages 4.8-20 and 4.8-21) found less-than-significant impacts regarding decreasing groundwater supplies or interfering with groundwater recharge. Policy 5.9-2 in the 2035 GP requires the City to encourage site design measures that facilitate groundwater recharge, and Policy 5.3-5 requires new construction to use best practices to preserve permeable surfaces. Policy 4.4-1 and 4.4-3 protect open space lands to allow for groundwater recharge. Similarly, the Phase I Zoning protects open space areas with the continuation of the Hillside Residential and Open Space and Open Space Public zoning districts, and the addition of the Open Space Privately-Owned district. These zoning districts preserve permeable surfaces from development, which will facilitate groundwater recharge.

The 2017 EIR (pages 4.8-22 to 4.8-25) found less-than-significant impacts regarding substantially altering the existing drainage pattern of a site or area. Several policies in the 2035 GP are intended to preserve natural watercourses or naturalized drainage channels, and to ensure future development incorporates BMPs to reduce runoff from a site. Policies 3.4-6 and 6.1-11 reduce the potential for erosion, which will help to preserve the existing drainage pattern within the General Plan Planning Area; Policies 4.4-1, 4.4-3, and 5.9-2 help protect open spaces areas from new development, which in turn will protect against increased rates of surface runoff within the 2035 GP Planning Area; Policies 4.5-2, 5.3-2, 5.4-1, 5.4-2, 5.4-3, and 5.4-4 address the maintenance and restoration of Belmont Creek and other waterways, thereby preventing alteration of the course of a stream or river in connection with future development permitted under the 2035 GP; and Policy 5.9-1 requires the City to continue to make improvements to the drainage system to improve drainage in areas that are currently underserved.

The 2017 EIR (pages 4.8-25 to 4.8-28) found less-than-significant impacts regarding the release of pollutants into flood hazard, tsunami, or seiche zones. As noted on page 4.8-37 of the 2017 EIR, the City is at low risk for being exposed to flood hazards, tsunamis, or seiches. Additionally, policies in the 2035 GP further reduce the potential impact. Policy 6.1-2 requires the City to regulate development to ensure mitigation of safety hazards on sites with a threat of landslides; Policy 6.1-3 prohibits development in areas at risk of landslides; Policy 6.1-5 requires geotechnical studies to identify hazards and mitigation measures; and Policy 6.1-9 requires real estate transactions to declare suspected geologic hazards.

DRAFT

The 2017 EIR found (pages 4.8-18 and 19) less-than-significant impacts with regard to obstructing implementation of a water quality control plan. The Approved Project Planning Area lies within the jurisdiction of the San Francisco Bay Regional Water Quality Control Board (RWQCB), which has adopted the Water Quality Control Plan (Basin Plan) for the San Francisco Bay Region, including the San Francisco Bay Estuary to implement plans, policies, and provisions for water quality management. The 2012 Basin Plan contains descriptions of the technical, legal, and programmatic bases of water quality regulations for the San Francisco Bay Region, which includes the Approved Project Planning Area. The Basin Plan defines beneficial uses for water bodies in the region, including municipal domestic supply, freshwater replenishment, cold freshwater habitat, fish migration, preservation of rare and endangered species, fish spawning, warm freshwater habitat, wildlife habitat, body contact recreation, and non-contact recreation. All actions in the 2035 GP must comply with Municipal Permit Order No. R9-2015-0049, NPDES Permit No. CAS612008, issued by the San Francisco Bay RWQCB, as well as General Plan policies 6.2-9 and 6.2-10.

2035 GP POLICIES THAT REDUCE IMPACTS:

CIRCULATION ELEMENT

Policy 3.4-6: Locate, design, and landscape new roadways to preserve the beauty of the area, prevent erosion, and help shield residents from noise and air pollution. To the extent possible, retain trees and vegetative cover and minimize grading.

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.4-1: Continue to designate and protect open space lands for the preservation of scenic areas, natural drainage ways, and plant and wildlife habitats; for outdoor recreation; and for public health and safety. *See also policies in the Conservation and Safety elements.*

Policy 4.4-3: Consistent with the San Juan Hills and Western Hills area plans, cluster development in the hillside areas of western Belmont in order to maintain contiguous habitat areas, minimize grading, and limit exposure to steep slopes and other sensitive areas. *See also policies in the Land Use Element.*

Policy 4.5-2: Protect Belmont Creek from future encroachment through regulation, development review, conservation easements, or other appropriate actions.

CONSERVATION ELEMENT

Policy 5.3-2: Continue to maintain, protect, restore, and enhance Belmont's ecologically important areas and seek to reduce impacts on them, including the creek corridors, the open space, and the wetlands around O'Neill Slough.

Policy 5.3-5: In design and construction, require use of best practices that preserve natural resources, such as soil, trees, native plants, and permeable surfaces.

Policy 5.4-1: Restore Belmont Creek to enhance ecological functions, biological resources, hydrology function, and flood control.

Policy 5.4-2: Preserve, where possible, natural watercourses or provide naturalized drainage channels within the city. Where necessary and feasible, implement restoration and rehabilitation measures.

Policy 5.4-3: Protect, restore, and enhance a continuous corridor of native riparian vegetation and wildlife habitat along Belmont's waterways, water bodies, and wetlands.

Policy 5.4-4: Preserve and enhance the natural riparian environment along waterway corridors, including Belmont Creek, by minimizing environmental and visual impacts. *See also Policy 4.5-2 in the Parks, Recreation, and Open Space Element*.

Policy 5.5-3: Require development projects to incorporate structural and non-structural best management practices (BMPs) to mitigate or reduce the projected increases in pollutant loads, in accordance with the NPDES permit guidelines.

Policy 5.9-1: Continue to make improvements and upgrades to the drainage system. Priorities should be to provide curbs and gutters to underserved areas (as feasible), improve facilities in areas that are subject to seasonal flooding, increase capacity of the system, and replace damaged lines in the storm drain system.

Policy 5.9-2: Encourage development projects of all sizes to incorporate site design measures that facilitate groundwater recharge and natural hydrological processes, allowing stormwater to infiltrate the ground on-site and/or be collected for reuse in landscaping and designated to on-site stormwater detention facilities. Such measures may include:

- Canopy trees or shrubs to absorb rainwater;
- Grading that lengthens flow paths over permeable surfaces and increases runoff travel time to reduce the peak hour flow rate;
- Partially removing curbs and gutters from parking areas where appropriate to allow stormwater sheet flow into vegetated areas;
- Installation of green roofs on buildings;
- Use of permeable paving in parking lots and other areas characterized by significant impervious surfaces;
- On-site stormwater detention, use of bioswales and bioretention basins to facilitate infiltration; and
- Integrated or subsurface water retention facilities to capture rainwater for use in landscape irrigation and other non-potable uses.

SAFETY ELEMENT

Policy 6.1-2: Continue to regulate development, including remodeling or structural rehabilitation, to ensure adequate mitigation of safety hazards on sites having a history or threat of seismic dangers, erosion, landslides, or shrink swell.

Policy 6.1-3: Prohibit development in areas at risk of landslides or high or very high liquefaction as shown in Figure 6-1, or on slopes steeper than 30 percent, unless detailed site investigations by licensed engineers ensure that risks do not exist, or can be reduced to acceptable levels and the structure will be protected for its expected life.

Policy 6.1-5: Geotechnical studies shall identify any geologic hazards affecting the proposed project site, any necessary mitigation measures, and a statement of the site's suitability for the proposed development and whether or not it will be safe from geologic hazard for its expected life. The study shall identify net developable areas, if any, based on landslide or ground shaking potential or erosion risk. Impacts from the development, such as those resulting from increased water runoff, shall also be determined. Such studies must be signed by a licensed Certified Engineering Geologist or Geotechnical Engineer and are subject to review and approval by City staff and/or contracted employees.

Policy 6.1-9: Require real estate transactions, development approval processes, and property titles to declare known or suspected seismic or geologic hazards on a property, including areas suspected of high or very high risk of liquefaction, shrink swell, or landslide.

Policy 6.1-11: Support erosion prevention of hillside areas at risk of landslide, as identified in Figure 6-1, by revegetation or other acceptable methods.

Policy 6.2-9: Periodically review maps prepared by FEMA and the State Department of Water Resources to identify changes in mapping of areas subject to flooding and amend the General Plan or Municipal Code as warranted.

Policy 6.2-10: Continue to comply with the Municipal Regional Stormwater Permit requirements for municipal authorities to address water quality and flow-related impacts of stormwater runoff; continue to enforce NPDES permits in Belmont; and continue to participate in the San Mateo Countywide Water Pollution Prevention Program.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Same Impact as the Approved Project – Less than Significant

Implementation of the Proposed Project may include construction actions at Hidden Canyon and Ralston Ranch parks, and actions in the two open space areas that involve repairing trails at multiple stream crossings. Furthermore, Proposed Project actions may include the continued use, maintenance of, or improvements to trail networks. These potential actions may have impacts on riparian vegetation and on localized erosion, thus potentially degrading water quality. In addition to the 2035 GP policies addressing water quality, the Proposed Project includes policies P7, P12 and P13; these policies center on conservation of water resources through the protection of surface and ground water from chemical contamination and minimization of soil erosion and sedimentation of waters and wetlands. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around water, would result the same, less-than-significant impacts as those analyzed in the 2017 EIR.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less Impact than the Approved Project

Implementation of the Proposed Project may include minor increases in impervious or semi-impervious surfaces as a result of some activities, such as path improvements like widening for accessibility. These potential actions may have impacts on local surface permeability. A negligible amount of impervious surfaces would be created through construction activity at Hidden Canyon and Ralston Ranch parks compared to development of residential, industrial, or commercial areas as analyzed in the 2017 EIR. 2035 GP policies, as well as policies included as part of the Proposed Project (P7, P12 and P13) center on conservation of water resources through the protection of surface and ground water from chemical contamination and minimization of soil erosion and sedimentation of waters and wetlands. In addition, P4 protects riparian ecosystems and habitat to maintain natural hydrologic processes, water quality, and wildlife benefits. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around water, would result in less impacts compared to those analyzed in the 2017 EIR.

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: (i) result in substantial erosion or siltation on- or off-site; (ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; (iii) create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff; or (iv) impede or redirect flood flows?

Same Impact as the Approved Project – Less than Significant

Implementation of the Proposed Project may include improvements to existing parks, trails, park accessibility, park equipment, and landscaping. These potential actions may have impacts through the increase of impervious surfaces and construction-related impacts during trail and park improvements. From the construction of parking spaces, a nominal amount of impervious surface could be added to Hidden Canyon and Ralston Ranch parks. 2035 GP policies, as well as policies included as part of the Proposed Project (P7, P12 and P13) center on conservation of water resources through the protection of surface and ground water from chemical contamination and minimization of soil erosion and sedimentation of waters and wetlands The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around water and drainage patterns, would result in the same, less than significant impacts compared to those analyzed in the 2017 EIR.

d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

Same Impact as the Approved Project – Less than Significant

Hidden Canyon and Ralston Ranch parks and the two open space areas (WDL and SJC) are at low risk of exposure to floods, seiche or tsunamis. As noted on pages 4.8-37 through 4.8-39 of the 2017 EIR none of these areas are in a 100-year flood zone, and the entire city of Belmont would be buffered by land in Redwood City and Foster City if a seiche or tsunami was to occur. Proposed Project impacts would be the same as those analyzed in the 2017 EIR.

e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Same Impact as the Approved Project – Less than Significant

The Proposed Project Planning Area is located within the Approved Project Planning Area. As noted in both the 2035 GP and the 2017 EIR, the Approved Project Planning Area is located within the jurisdiction of the San Francisco Bay Regional Water Quality Control Board (RWQCB), which has adopted the Water Quality Control Plan (Basin Plan). Furthermore, all actions in the 2035 GP, as well as the Proposed Project, would need to comply with Municipal Permit Order No. R9-2015-0049, NPDES Permit No. CAS612008, issued by the San Francisco Bay RWQCB, as well as General Plan policies 6.2-9 and 6.2-10. There would be new but less than significant impacts compared to those analyzed in the 2017 EIR. Within the Proposed Project, policies further reduce impacts: P7, P12, and P13 center on conservation of water resources; P8 centers on monitoring sensitive terrestrial and aquatic wildlife species; P9 highlights avoidance of sensitive and critical habitat during trail or facility construction accordingly; P3 states that trails will be aligned, relocated, or modified to avoid impacting sensitive habitats such as wetlands and areas where endangered species are present; and P4 protects riparian ecosystems and habitat to maintain natural hydrologic processes, water quality, and wildlife benefits. Overall, the Proposed Project policies and objectives align with the Basin Plan. The Proposed Project, when paired with the 2035 GP policies and the Proposed Project policies around water and drainage patterns, would result in the same, less than significant impacts compared to those analyzed in the 2017 EIR.

DRAFT

7.12 Land Use and Planning

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a)	Physically divide an established community?	Yes	☒	☐	☐	☐	☐
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	Yes	☒	☐	☐	☐	☐

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential land use and planning impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than significant impacts on community connectivity.
- Less-than-significant impact for implementation of the Approved Project conflicting with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.

Findings

The 2017 EIR (pages 4.9-22 through 4.9-24) found a less-than-significant impact for implementation of the 2035 GP on community connectivity. In particular, 2035 GP Policies 2.1-2, 2.3-4, 2.5-5, and 2.8-1 emphasize connectivity in land use planning. These policies would also apply to implementation of the PROS Plan and would have less impact than those analyzed in the 2017 EIR regarding community connectivity. The draft PROS Plan and OSMP include policies and implementation actions that would take place within and around the City's existing parks.

The 2017 EIR (pages 4.9-24 through 4.9-27) found a less-than-significant impact for implementation of the Approved Project conflicting with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. 2035 GP Policies 2.1-1, 2.12-1, and 2.14-2 emphasize consistency between the Approved Project and applicable land use plans, policies, and regulations, including the City's Zoning Ordinance.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.1-1: Maintain consistency between the General Plan and the *Zoning Ordinance* and Zoning Map.

Policy 2.1-2: Coordinate land use and transportation planning to ensure that land use patterns and intensities can be supported by and are accessible to the transportation network, including pedestrian and bicycle facilities. *See also Policy 3.1-1 in Circulation Element*.

Policy 2.3-4: Focus new development in or directly adjacent to already-developed areas, where it can be served by existing public services and infrastructure.

Policy 2.5-5: In accordance with the Belmont Village Specific Plan, provide incentives for infill development and redevelopment and adaptive reuse and restoration of existing buildings where appropriate in Belmont Village.

Policy 2.8-1: Enable infill properties to develop with uses and development intensities supporting a cohesive development pattern.

Policy 2.12-1: Designate parks and open space in the *Zoning Ordinance* using appropriate zoning classifications, which should be consistent with the General Plan land use designations "Public/Community" and "Open Space." Park zones should include recreational uses along with associated structures and infrastructure, and open space should include more passive uses.

Policy 2.14-2: Simplify and make consistent the land use and zoning designations for parks, open space, and hillsides. *See also Policy 2.12-1.*

CIRCULATION ELEMENT

Policy 3.1-1: Ensure land use and circulation planning is developed concurrently. In portions of Belmont that include significant open space resources, use area plans to address the balance and interface between natural and developed areas.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Physically divide an established community?

Less Impact than the Approved Project

2035 GP policies 2.1-2, 2.3-4, 2.5-5, and 2.8-1 emphasize connectivity in land use planning. These policies would also apply to implementation of the Proposed Project, which would have less impact than the Approved Project due to less proposed development activity. As previously discussed, the Proposed Project includes policies and implementation actions that would take place within and around the City's existing parks. Implementation of the Proposed Project would not cause physical division of an established community, as proposed actions would take place within the boundaries of existing parks and open space areas. Therefore, potential Proposed Project impacts which would physically divide any established community would be less than the Approved Project as assessed in the 2017 EIR.

b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less Impact than the Approved Project

Implementation of the Proposed Project would not conflict with any land use plan, policy, or regulation. The Proposed Project contain policies and implementation actions that are consistent with policies described in the 2035 GP, including recommendations for balanced recreation uses, trail management, user compatibility, and cooperative planning. Impacts would be less than those analyzed in the 2017 EIR. Therefore, potential Proposed Project impacts regarding conflicting with any land use plan, policy, or regulation would be less than the Approved Project as assessed in the 2017 EIR.

DRAFT

7.13 Mineral Resources

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	Yes	☐	☐	☐	☐	☒
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

The 2017 EIR found there to be no mineral resource impacts based on the implementation of the 2035 GP.

Findings

The 2017 EIR did not identify any impacts of the Approved Project on mineral resources. A search of the California Department of Conservation's "Mines Online" mapping tool indicated that no mines are located within the City of Belmont (California Department of Conservation, 2016). Moreover, an online search of Google Maps indicated that there are no quarries located in Belmont (Google Maps, 2023). The 2035 GP and BVSP do not identify any locally important mineral resource recovery sites in Belmont; therefore, because there are no known mineral resources regionally, or locally, there would be no impacts for both significant thresholds "a" and "b."

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

Same as Approved Project – No Impact

There are no known mineral resources regionally, or locally within the City. Therefore, there would be no impacts for loss of availability of a known mineral resource.

b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

Same as Approved Project – No Impact

There are no known mineral resources regionally, or locally within the City. Therefore, there would be no impacts for loss of availability of a locally important mineral resource recovery site.

DRAFT

7.14 Noise

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	Yes	☒	☐	☐	☐	☐
b) Generation of excessive groundborne vibration or groundborne noise levels?	Yes	☒	☐	☐	☐	☐
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential noise impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Significant and Unavoidable Impact: Implementation of the Approved Project would be in excess of standards established in the 2035 GP (page 4.10-22 to 4.10-39). Specifically, the Approved Project would allow for increased density in the Approved Project Planning Area, resulting in construction activities which will produce temporary increases in ambient noise levels that would exceed noise standards set forth in the 2035 GP. In

addition, the increased development density facilitated by the Approved Project would result in changes to traffic noise within the City.

- Significant and Unavoidable Impact: Implementation of the Approved Project would generate excessive groundborne vibration or groundborne noise levels from construction activities.
- Less than Significant: Implementation of the Approved Project would result in a less-than-significant impact regarding generation of excessive noise levels within the vicinity of a private airstrip, airport land use plan, or public airport.

Findings

The 2017 EIR found significant and unavoidable noise impacts from implementation of the Approved Project that would be in excess of standards established in the 2035 GP (page 4.10-22 to 4.10-39). Specifically, the Approved Project would allow for increased density in the Planning Area, resulting in construction activities which will produce temporary increases in ambient noise levels that would exceed noise standards set forth in the 2035 GP. Future development and redevelopment facilitated by the Approved Project will comply with Policy 7.1-3 of the 2035 GP and Policies 6.5-2 and 6.5-3 of the BVSP, which require that projects to implement adequate noise-reducing mitigation sufficient to meet noise exposure standards and require developers to mitigate noise exposure to sensitive receptors from construction activities to the extent feasible.

Additionally, the increased development density facilitated by the Approved Project would result in changes to traffic noise within the City. The Approved Project would also change the noise exposure standards for land uses in the City. The 2017 EIR found that implementation of the Approved Project will result in noise levels that increase to above thresholds contained in the 2035 GP and out of the normally acceptable range for some uses, which will constitute a significant and unavoidable noise impact.

New development facilitated by the Approved Project could also be exposed to train noise from the Caltrain commuter trail line that runs through the Planning Area, as well as other stationary sources of noise within the Planning Area. Several 2035 GP policies (7.1-1, 7.1-2, 7.1-4, 7.1-5, 7.1-6, 7.1-8, 7.1-9, 7.2-1, 7.3-1, and BVSP Policy 6.5-2) will help prevent the exposure of new sensitive land uses to excessive train noise and stationary source of noise. These impacts are classified to be less than significant by the 2017 EIR, and no mitigation measures are required.

The 2017 found that implementation of the Approved Project would result in significant and unavoidable impacts regarding generation of excessive groundborne vibration or groundborne noise levels from construction activities (page 4.10-39 to 4.10-42). Development facilitated by the Approved Project will result in construction activities that would include pile driving, resulting in temporary substantial increases in groundborne vibration. Vibration will also be produced by heavy duty equipment associated with some construction activities that may be felt by adjacent uses. 2035 GP Policies 7.1-10, 7.1-11, and BVSP Policy 6.5-4 will require developers of new development projects to implement mitigation practices to reduce vibration associated with construction activities. The 2017 EIR found that implementation of the Approved Project would result in less-than-significant impacts regarding groundborne vibration from stationary source vibration, traffic, and trains.

The 2017 EIR found that implementation of the Approved Project would result in a less-than-significant impact regarding generation of excessive noise levels within the vicinity of a private

airstrip, airport land use plan, or public airport (page 4.10-44 to 4.10-46). The Planning Area is situated within the vicinity of two airports: the San Carlos Airport and the San Francisco International Airport (SFO). A small portion of the Approved Project Planning Area is located in close proximity to the lowest established noise contour line associated with future operation of the San Carlos Airport, however, the noise level at this contour line would not conflict with any potential future land use associated with the Approved Project. No parts of the Approved Project Planning Area are located within forecasted noise contour lines for SFO, and it is unlikely that people associated with development or redevelopment of the Approved Project would be exposed to excessive noise levels from SFO for any substantial amount of time. 2035 GP Policy 7.3-2 would enhance coordination with the San Carlos Airport in improving its noise abatement program, which would reduce noise impacts associated with the San Carlos Airport.

2035 GP POLICIES THAT REDUCE IMPACTS:

NOISE ELEMENT

Policy 7.1-1: Update the City's Noise Ordinance as needed to be in conformance with the General Plan policies and noise standards.

Policy 7.1-2: Use the Community Noise Level Exposure Standards, shown in Table 7-1, as review criteria for new land uses. Require all new development that would be exposed to noise greater than the "normally acceptable" noise level range to reduce interior noise through design, sound insulation, or other measures.

Policy 7.1-3: Require noise-reducing mitigation to meet allowable outdoor and indoor noise exposure standards in Table 7-2. Noise mitigation measures that may be approved to achieve these noise level targets include but are not limited to the following:

- Construct façades with substantial weight and insulation;
- Use sound-rated windows for primary sleeping and activity areas;
- Use sound-rated doors for all exterior entries at primary sleeping and activity areas;
- Use minimum setbacks and exterior barriers;
- Use acoustic baffling of vents for chimneys, attic and gable ends; and
- Install a mechanical ventilation system that provides fresh air under closed window conditions.

Alternative acoustical designs that achieve the prescribed noise level standards may be approved, provided that a qualified Acoustical Consultant submits information demonstrating that the alternative designs will achieve and maintain the specific targets for outdoor activity areas and interior spaces.

Policy 7.1-4: Exclude residential and noise-sensitive uses located in the Belmont Village PDA from outdoor noise standards in Table 7-2, where it is determined application of noise mitigation measures will be detrimental to the realization of the General Plan's goals and policies to realize a vibrant activity center in the Village.

Policy 7.1-5: Ensure that building regulations require that noise-generating appliances serving new multi-family or mixed-use residential development are located or adequately insulated to protect residents from the noise.

Policy 7.1-6: Promote the use of noise attenuation measures to improve the acoustic environment inside residences where existing single-family residential development is located in a noise-impacted environment, such as along an arterial street or adjacent to a noise-producing use.

Policy 7.1-8: Continue to enforce applicable Federal and State Noise Insulation Standards (CCR, Title 24) and noise requirements.

Policy 7.1-9: Establish noise level performance standards for new equipment and vehicles purchased by the City consistent with the best available control technology (BACT) to minimize noise and vibration.

Policy 7.1-10: Require developers of new development anticipated to generate a substantial amount of vibration during construction to implement mitigation practices to reduce vibration, which can include: operating heavy equipment as far as practical from residential uses; using smaller bulldozers (operating weight less than 20,000 pounds) when grading must occur within approximately 50 feet of residential uses or other vibration sensitive uses; and using quiet pile driving technology when feasible.

Policy 7.1-11: Require development projects to include mitigation measures to protect the development from ground borne vibration from the railway if located within 120 feet of the centerline of Caltrain rail tracks. *See Policy 6.5-4 in the Environmental Sustainability, Health, and Safety chapter of the Belmont Village Specific Plan.*

Policy 7.2-1: Use the noise-sensitive land uses and transportation noise sources table (Table 7-2) and Future Noise Contours map (Figure 7-3) as criteria to determine acceptability of noise-sensitive land uses. Do not permit new noise-sensitive uses—including schools, hospitals, and places of worship—where noise levels are "normally unacceptable" or higher, if alternative locations are available for the uses in the city.

Policy 7.3-1: Work with Caltrans, Caltrain, SamTrans, and other agencies to mitigate transportation-related noise impacts on residential areas and sensitive uses. This may include encouraging installation of sound barriers or bus stop relocation in selected locations.

Policy 7.3-2: Continue to work with the San Carlos Airport in improving and implementing its noise abatement program.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

DRAFT

Less Impact than the Approved Project

2035 GP policies would apply to actions contemplated in the Proposed Project. Implementation of Proposed Project actions may generate temporary increases in noise from the use of construction equipment for the purposes of trail improvements, vegetation management, and park improvements. New use of Hidden Canyon and Ralston Ranch Parks is expected to have a nominal increase in ambient noise. Both parks are identified as "Neighborhood Tier 2" parks in the Proposed Project which are designed to support individuals and small groups and the majority of users are expected to arrive by walking or biking. Under the Proposed Project, no major construction projects (e.g., new sports fields, buildings or swimming pools) would be undertaken, construction periods would be shorter compared to other development type projects analyzed in the 2017 EIR. Therefore, Proposed Project actions are expected to have less impacts than Approved Project impacts analyzed in the 2017 EIR regarding generating a substantial temporary or permanent increase in ambient noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

b) Generation of excessive groundborne vibration or groundborne noise levels?

Less Impact than the Approved Project

2035 GP policies would apply to actions contemplated in the Proposed Project. Construction activities resulting from the Proposed Project, including restroom installation, play structure replacement, and path/trail development may produce minimal produce groundbourne noise or vibration. However, these activities are expected to produce significantly less groundbourne noise and vibration than the building development related construction, traffic, and train noise and vibration analyzed in the 2017 EIR. The impacts regarding generation of excessive groundborne vibration or groundborne noise levels would be less for the Proposed Project than those analyzed in the 2017 EIR.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Same Impact as the Approved Project – Less than Significant

The Proposed Project Planning Area is contained within the Approved Project Planning Area and the 2035 GP policies would apply to implementation of the Proposed Project. The Proposed Project impacts would be the same as those analyzed in the 2017 EIR.

7.15 Population and Housing

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	Yes	☒	☐	☐	☐	☐
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	Yes	☒	☐	☐	☐	☐

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential population and housing impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant: Implementation of the Approved Project has an either directly or indirectly inducing substantial unplanned population growth.
- Less than Significant: Implementation of the Approved Project will have less than significant impacts regarding displacement of substantial numbers of people or housing that would necessitate the construction of replacement housing .

Findings

The 2017 EIR found a less-than-significant impact for the Approved Project on either directly or indirectly inducing substantial unplanned population growth in an area (page 4.9-28 and 4.9-29). The 2035 GP and Phase I Zoning were designed to support population growth based on Association of Bay Area Governments (ABAG) and City/County Association of Governments (C/CAG) projections: approximately 4,100 people by 2035. The updated Phase I Zoning would accommodate growth in Belmont that is proportionate with the City's size, growth rate, and regional placement. Multiple policies in the 2035 GP would also help reduce the impact of population growth. 2035 GP Policy 2.9-1 would ensure that infrastructure would be built as growth occurs, rather than provided prematurely or in excess of reasonably expected growth

projects. Policy 2.8-1 would allow infill properties to be developed with uses and development intensities supporting a cohesive development pattern. In addition, various policies in the 2035 GP and measure TL.2 in the Climate Action Plan promote the expansion of roadways to encourage the use of public transit, bicycles, and walking, rather than extending roads or adding lanes.

The 2017 EIR found a less-than-significant impact for the Approved Project regarding displacement of substantial numbers of people or housing that would necessitate the construction of replacement housing elsewhere (2017 EIR page 4.9-30 through 4.0-32). The Approved Project would not cause significant land use changes to residential use areas within the Approved Project Planning Area. The 2035 GP and Phase 1 Zoning increase the capacity for the overall number of dwelling units within the City. Specifically, 2035 GP Policy 2.3-1 encourages the provision of lower- and moderate-income housing, and Policy 2.17-3 requires the City to prioritize support for affordable housing and public infrastructure. Additionally, BVSP Policies 2.3-1 2.3-3, 2.3-4, 2.3-6, 2,3-7, 2.3-8 and 5.8-5 encourage the development of affordable housing at all income levels, promote the assembly of multiple continuous parcels to create larger project sites for mixed-use and multi-family residential development, and promote infill development.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.3-1: Encourage the provision of lower- and moderate-income housing to meet the objectives of the Housing Element.

Policy 2.8-1: Enable infill properties to develop with uses and development intensities supporting a cohesive development pattern.

Policy 2.9-1: Allow sufficient density and intensity to enable new development to support all required infrastructure, community facilities, and open space.

Policy 2.17-3: Establish priorities for City funding to fulfill economic development objectives, including possible support for affordable housing and public infrastructure.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less Impact than the Approved Project

The Proposed Project would provide a structured management approach to managing the City's parks, recreation, and open space areas for the next 15 years. The Proposed Project does not propose new homes, business, or the expansion of roads or other infrastructure. Therefore, actions facilitated by the Proposed Project would not, either directly or indirectly, induce substantial population growth in Belmont; the impact would be less than those analyzed in the 2017 EIR.

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

Less Impact than the Approved Project

Implementation of the Proposed Project will not displace existing people or housing – Proposed Project action will occur within existing City parks and Open Spaces. A small number of 'vacant parcels' are slated for potential new park development; these parcels are not currently zoned for residential and, thus, will not displace planning housing projects. For the Proposed Project, this impact would be less than those analyzed in the 2017 EIR.

DRAFT

7.16 Public Services

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services:						
Fire protection?	Yes	☒	☐	☐	☐	☐
Police protection?	Yes	☒	☐	☐	☐	☐
Schools?	Yes	☒	☐	☐	☐	☐
Parks?	Yes	☐	☐	☐	☐	☒
Other public facilities?	Yes	☒	☐	☐	☐	☐

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential public services impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant: Implementation of the Approved Project would impact on fire and police protection.
- Less than Significant: Implementation of the Approved Project would impact public school facilities.
- Less than Significant: Implementation of the Approved Project would impact public park facilities.

Findings

The 2017 EIR found that implementation of the Approved Project would have a less-than-significant impact on fire and police protection (page 4.11-24 to 4.11-29). Development and population growth facilitated by the Approved Project would likely increase the demand for fire and police protection services within the Approved Project Planning Area. 2035 GP Policies 6.8-3, 2.3-4, 2.9-1, 6.6-8, and 6.9-2 would reduce the impact by requiring new development to be focused in already urbanized areas near existing services, requiring periodic evaluations of fire and police service capacities, and promoting fire safety education which would reduce the need for service calls. 2035 GP Policies 2.14-3, 4.4-7, 5.1-3, 6.6-6, and 6.6-7 would help reduce wildfires by implementing programs to manage natural hazards and effectively fight potential wildfires, and Policy 6.6-2 would require maintenance of adequate water supply for firefighting

and prioritize locations for new water storage facilities. BVSP Policies 5.6-2 and 5.6-3 would require the City to work with the Belmont Fire District to ensure adequate emergency access and fire flow capacity.

The 2017 EIR found that implementation of the Approved Project would have a less-than-significant impact on public school facilities (page 4.11-29 to 4.11-31). The 2017 EIR analyzed projected future school enrollment after implementation of the Approved Project using past trends of Belmont-Redwood Shores School District (BRSSD) and Sequoia Union High School District (SUHSD) enrollment. It was found that projected enrollment would likely exceed the capacity of existing school facilities, however SUSHD would complete construction of a new 10-classroom building at Carlmont High School in July 2017, which would serve 917 students. Implementation of the Approved Project could possibly require provision of new elementary school facilities, the siting of which would be regulated by the California Department of Education, rather than the City. Individual school development projects would be required to conduct environmental review pursuant to CEQA prior to project approval. To the extent feasible, any adverse environmental impacts caused by the development of new schools would be mitigated to a less-than-significant level.2035 GP Policy 2.10-3 and BVSP Policy 5.7-1 encourage the City to continue to work with public school districts to ensure accommodation of future student populations facilitated by implementation of the Approved Project.

The 2017 EIR found that implementation of the Approved Project would result in a less-than-significant impact on public park facilities (page 4.11-31 and 4.11-32). Implementation of the 2035 GP would result in a population increase of 4,100 residents, which would place additional physical demands on existing parks and recreational areas. Parks elements such as vegetation, water resources, built structures, walking/biking paths, sport facilities, and others would face increased wear-and-tear due to the increased park use over longer periods of time and/or more intensive use over the course of a typical day. Without proper maintenance, the useful lifetime of park amenities could be shortened. Furthermore, development facilitated by the Approved Project is expected to result in a need for additional parkland per the City's park acreage standards, established by 2035 GP Policy 4.1-2. The 2017 EIR concluded that this impact would be less than significant, as there is a sufficient amount of vacant land in the Approved Project Planning Area to meet future parkland needs. In addition, the Approved Project Planning Area contains 294 acres of undeveloped public open space, which is widely accessible to the public through a system of trails. These open spaces are not formally considered "parkland," however they complement the City's parks, recreation, and open spaces by providing a variety of outdoor recreational opportunities to the public.

A variety of 2035 GP, BVSP, and CAP policies would reduce the impact of the Approved Project on park facilities. 2035 GP Policy 4.7-1 requires the City to ensure that new development contributes park impact fees; Policies 2.10-1, 4.1-1, 4.2-1, and 4.4-5 support facilities performance standards established by the PROS Plan and OSMP; Policy 4.1-3 ensures compliance with the Quimby Act which requires development projects to provide adequate land for parks; Policies 4.6-1 and 4.6-2 improve access to parks and to the Belmont Creek; Policies 4.3-1 and 4.3-2 support additional recreational programs in Belmont; Policies 4.7-2 and 4.7-3 aim to find new funding sources for parks and recreation through public and private partnerships; Policy 4.2-3 supports maintaining the joint use agreement with Belmont-Redwood Shores School District for public use of recreational facilities, as well as pursuing other joint use agreements with Sequoia Union High School District and Notre Dame de Namur University. BVSP Policy 5.9-1 calls for addition of 2.2 acres of neighborhood parks in the BVSP area; Policies 5.9-2, 5.9-3, and 6.3-3 support the

development of new parks and community gathering spaces; policies 5.9-6 and 5.9-7 support improved connections to existing parks near the BVSP area, Policy 5.9-5 ensures safety and accessibility for parks in the BVSP area; and Policy 5.9-9 requires all development to comply with the City's parkland requirement. Measure TL2 in the CAP requires the remake of urban landscapes to include improved streetscapes, active transportation infrastructure, and beatification, which may provide recreational opportunities and gathering spaces that supplement existing park facilities. Phase I Zoning updates would also rezone various parcels within the Planning Area from Agriculture to Open Space and Public, which would more clearly delineate parks and open space land within Belmont. New parks would be planned and developed from impact fees charged to new development to ensure that the park acreage in the City increases over time commensurate to population growth.

The 2017 EIR identified that the construction of new park facilities necessitated by development facilitated by the Approved Project has the potential to negatively impact the environment (page 4.11-39 to 4.11-42). Impacts could include habitat disturbance and water pollution during construction, increased exposure of sensitive habitats to human activity and traffic, installation of impermeable surfaces, introduction of invasive species, and the conversion of open space that could otherwise have been preserved. In accordance with the projected population increase of 4,100 residents by 2035, the total amount of new parkland required would be 33.3 acres. The 2035 GP and Phase I Zoning focus development of new park land on underused and vacant parcels, thus minimizing impacts to undisturbed and undeveloped land. Specifically, 2035 GP Policy 2.9-1 requires the City to ensure that development standards require new development to support all required infrastructure, community facilities, and open space, and Policy 4.1-2 pursues opportunities to convert underutilized parcels into mini parks or community spaces, as feasible. Other proposed policies, as discussed in Chapter 4.3 "Biological Resources" of the 2017 EIR (page 4.3-1 to 4.3-42), establish guidelines and best management practices for construction, siting, and design that would require protection of water quality, identification of sensitive environmental habitats, and the protection of sites determined to have high habitat value. Specifically, Policy 2.3-4 requires new development to be within or adjacent to existing development, Policy 2.14-3 requires clear design standards for the interface between open spaces and development, and Policy 2.10-1 requires that plans for future recreational facilities are based on the PROS Plan and OSMP. BVSP Policy 6.3-3 requires the City to promote the development of parks that provide habitat services. Park and public facilities construction that would have the potential to adversely impact the environment would be required to conduct project-level environmental review in accordance with CEQA. Construction actions would need to be consistent with 2035 GP policies pertaining to protection of biological and cultural resources as well water resources and water quality (see Conservation Element).

The 2017 EIR found that implementation of the Approved Project would increase demand for library, city administrative, and other community facility services, but 2035 GP and BVSP policies would reduce the impact to a less-than-significant level (page 4.11-41 and 4.11.42). 2035 GP Policy 4.2-2 would ensure that these public services are improved and expanded to meet demand as development occurs, Policy 2.3-4 requires new development to be located within or adjacent to existing development, Policy 2.9-1 promotes new development to provide required facilities, BVSP policies 5.9-2, 5.9-3, 5.9-4, and 5.9-5 encourage new activity centers and community gathering spaces in the BVSP area, and BVSP Policy 5.9-7 encourages better connectivity to community facilities within one half mile of the BVSP area.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.3-4: Focus new development in or directly adjacent to already-developed areas, where it can be served by existing public services and infrastructure.

Policy 2.9-1: Allow sufficient density and intensity to enable new development to support all required infrastructure, community facilities, and open space.

Policy 2.10-1: Use the Parks, Recreation, and Open Space Master Plan to plan for future public facility and programming needs. *See Policy 4.2-1 in the Parks, Recreation, and Open Space Element.*

Policy 2.10-3: Continue to coordinate and collaborate with the public school districts that serve the Belmont community on school facilities and planning land use, and circulation issues to support high quality educational opportunities in Belmont, including access to schools, facility expansion and modernization, and strategies to address school enrollment and space needs or constraints, in order to ensure that school facilities will be adequate to accommodate student growth.

Policy 2.14-3: Create clear design standards for the interface between open spaces and neighborhoods, especially in the Urban/ Wildland Interface Zone. Standards should identify the margin of open space needed to allow wildlife, recreation, and aesthetic values to flourish while also reducing threats of fire and invasive plant species. Incorporate "Defensible Space" standards as needed in areas of high wildfire risk.

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.1-1: Use the Parks, Recreation, and Open Space Master Plan to define the vision, goals, and strategies for maintaining and improving Belmont's park system and to guide implementation efforts.

Policy 4.1-2: Strive to achieve and maintain a citywide standard of at least 5.0 acres of mini, neighborhood, and community parks per 1,000 residents, targeting a breakdown of 3.0 acres/1,000 residents for community parks and 2.0 acres/1,000 residents for neighborhood parks.

Policy 4.1-3: Ensure that all development projects comply with the City's parkland dedication requirements, in accordance with the Quimby Act, to provide adequate land for parks, open space, landscaping, and trails in appropriate locations through the dedication of land or otherwise providing for mini parks, planned trails, and other recreational space.

Policy 4.2-1: Review and update the types, amounts, and locations of community and recreation facilities as part of the Parks, Recreation, and Open Space Master Plan.

Policy 4.2-2: Building on the needs assessment, improve the quality and quantity of public community facilities in Belmont.

DRAFT

Policy 4.2-3: Continue joint use agreements with other agencies, institutions, and private organizations for public use of recreational facilities not owned by the City, especially in neighborhoods deficient in recreational facilities, if the joint use agreements can help meet the city's recreational needs and if the terms are favorable to the City.

Policy 4.3-1: Continue to provide recreational programs and services to serve the entire Belmont community.

Policy 4.3-2: Support other agencies, private organizations, and institutions that serve the Belmont community with recreational, social, and cultural activities.

Policy 4.4-5: Use the Parks, Recreation, and Open Space Master Plan to establish priorities for the protection, enhancement, and improvement of open space lands and trails for recreation purposes.

Policy 4.4-7: Continue programs to reduce the fire danger in the open space. *See Policy 5.1-3 in the Conservation Element.*

Policy 4.6-1: Maintain and improve access to parks and open space, especially in areas that lack land for additional parkland dedication and in areas where topography and lack of sidewalks inhibits easy pedestrian access to parks and recreation facilities.

Policy 4.6-2: Improve public access and connections to Belmont Creek. Promote use of this waterway corridor for passive recreation, education, and research.

Policy 4.7-1: Ensure that residential and nonresidential development projects contribute to the City's park, recreation, and open space resources commensurate with their impacts, through the Quimby Act and establishment and collection of park impact fees.

Policy 4.7-2: Continue to work with local, regional, and State agencies, nonprofit and community organizations, foundations, and grant sources to provide funding for Belmont's open space, parks, and recreation and assistance with maintenance and programming.

Policy 4.7-3: Support, where appropriate and feasible, partnerships with private businesses to conduct limited operations in park and recreation facilities (e.g., a concessions stand) to generate a revenue stream that may contribute to operations and maintenance costs.

CONSERVATION ELEMENT

Policy 5.1-3: Reduce risk of wildland fire, ecological succession, and pathogen threats (such as Sudden Oak Death) through active maintenance of public spaces and education and enforcement of development standards on private property.

SAFETY ELEMENT

Policy 6.6-2: Work with the Mid-Peninsula Water District to maintain adequate water supply for firefighting, including capacity for peak load under a reasonable worst case wildland fire scenario, to be determined by the Belmont Fire Protection District. In

evaluating sites for new water storage facilities, place a priority on locations least subject to impacts from seismic activity and landsliding.

Policy 6.6-6: Promote and support the Belmont Fire Protection District's Vegetation Management Program to reduce fire hazards, particularly in areas in the Wildland Urban Interface.

Policy 6.6-7: Continue to participate in State and regional efforts to develop a clear legislative and regulatory framework to manage the Wildland Urban Interface.

Policy 6.6-8: Continue educating the public about local fire hazard prevention programs, including landscaping with fire resistant plants between residential and open space areas, weed control, brush control, controlled burns, and placement of trails and roads to serve as firebreaks. Work cooperatively with the Belmont Fire Protection District to promote public awareness of fire safety and emergency life support.

Policy 6.8-3: Periodically evaluate police and fire services to ensure that the City is providing adequate protection in an efficient, cost-effective manner.

Policy 6.9-2: Promote programs to educate the public concerning the nature of earthquake, fire, and flood hazards in Belmont and measures that individuals can take to reduce risk.

DRAFT

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) ***Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services:***

- **Fire Protection?**
- **Police Protection?**
- **Schools?**
- **Parks?**
- **Other Public Facilities?**

Fire and Police Protection

Less Impact than the Approved Project

Implementation of Proposed Project actions would not directly or indirectly result in population growth which would require the provision of or need for new or physically altered fire or police facilities. Therefore, no adverse environmental impact would occur due to the provision of new or physically altered police or fire facilities. The impact would be less than the Approved Project.

Schools

Less Impact than the Approved Project

Implementation of the Proposed Project would not directly or indirectly result in population growth which would require the provision of or need for new school facilities. Therefore, no adverse environmental impact would occur due to the provision of new or physically altered public school facilities. Implementation of the Proposed Project would result in less impacts than the Approved Project.

Parks

Same Impact as the Approved Project – Less than Significant

The implementation of the Proposed Project would meet the policy set forth in the 2035 GP. The development of the Proposed Project is in response to the park needs identified in the 2035 GP and the 2017 EIR. Implementation of the Proposed Project, in association with applicable policies from the 2035 GP, would result in a nominal increase in visitor use and impacts would be less than those analyzed in the 2017 EIR.

Other Public Facilities

Less Impact than the Approved Project

Implementation of Proposed Project actions would not directly or indirectly result in population growth which would require the provision of or need for other public facilities. Therefore, no adverse environmental impact would occur due to the provision of new or physically altered library, city administrative, or other community facilities. The impact would be less than those analyzed in the 2017 EIR.

DRAFT

7.17 Recreation

a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	Yes	☐	☐	☐	☐	☒
b) Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential recreation impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant: Implementation of the Approved Project will impact use of existing neighborhood and regional parks and other recreational facilities.
- Less than Significant: Implementation of the Approved Project will impact the environment via construction or expansion of recreation facilities.

Findings

The 2017 EIR found less-than-significant impacts with regard to increasing use of existing neighborhood and regional parks and other recreational facilities. The EIR concluded that when the two open spaces are accounted for in meeting park and recreation demand, there is sufficient land to support future park and recreational areas. Policy 4.1-1 from the Park and Recreation Element directs the City to update its Park, Recreation and Open Space Plan.

The 2017 EIR found less-than-significant impacts with regard to construction or expansion of recreational facilities having an adverse physical effect on the environment. 2035 GP Policies 4.1-1. 4.2-1, and 4.4-5 would ensure the City updates the existing PROS plan to ensure demand for park and recreation resources are met.

2035 GP POLICIES THAT REDUCE IMPACTS:

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.1-1: Use the Parks, Recreation, and Open Space Master Plan to define the vision, goals, and strategies for maintaining and improving Belmont's park system and to guide implementation efforts.

Policy 4.2-1: Review and update the types, amounts, and locations of community and recreation facilities as part of the Parks, Recreation, and Open Space Master Plan.

Policy 4.4-5: Use the Parks, Recreation, and Open Space Master Plan to establish priorities for the protection, enhancement, and improvement of open space lands and trails for recreation purposes.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Same Impact as the Approved Project – Less than Significant

Community surveys conducted for the Proposed Project support the idea that many City residents use WDL and SJC to meet their recreation needs. Eighty percent of survey respondents indicated that they used the City's open space areas one to three times per week. Implementation of the Proposed Project may result in a minor increase in visitation, but it would not result in substantial physical deterioration of recreational facilities. Proposed Project Policies P19 through P23 address opportunities for a variety of type of users, and for providing for safe recreation opportunities. Additional applicable policies include: trail management policies (P24-P31) to protect natural resources, enhance wayfinding and help provide for visitor safety; user compatibility policies(P32-P35); and partnership policies (P36 and P33) which would encourage partnerships to help more effectively manage WDL and SJC. None of these policies would result in a substantial increase in visits that could cause substantial physical deterioration of park facilities; potential impacts would be the same as those analyzed in the 2017 EIR.

Proposed Project actions – including development of Hidden Canyon and Ralston Ranch parks-- could enhance visitor experiences and may result in a minor increase in visitation. Parking that would be added to Hidden Canyon would be used to encourage visitors who currently park on Carlmont Drive to use the parking lot instead. Development actions at Ralston Ranch would involve adding a seating area and a walking path. These actions are not expected to increase use of existing neighborhood and regional and other recreational facilities. Impacts would be the same as those analyzed in the 2017 EIR.

b) Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Same Impact as the Approved Project – Less than Significant

Proposed Project Environmental Sustainability Policies (see Table 5 in Chapter 5 of this document) would ensure any construction of expansion of facilities would not have an adverse physical effect. Some of the applicable policies include P1 (limits on trail construction), P3 (align, relocate or modify trails to avoid impacts), and P13 (control of erosion). Additional Balanced Recreation Use Policies are also applicable including, P25 (monitor erosion), and P26 (maintain trails with improved drainage and hardening). Proposed Project Impacts would be the same as those analyzed in the 2017 EIR. Furthermore, Proposed Project implementation – including actions at Hidden Canyon, Ralston Ranch parks, and WDL and SJC -- would involve minimal ground disturbance. The effects of these actions have been analyzed in previous chapters of this document, including the following: Air Quality, Biological Resources, Cultural Resources, Greenhouse Gases, and Noise. Impacts would be the same as those analyzed in the 2017 EIR.

REGULATORY SETTING UPDATE

Senate Bill (SB) 743 established Vehicle Miles Traveled (VMT) associated with a project as the metric for use in determining a project's transportation impacts, replacing the use of the delay-based criteria associated with a Level of Service (LOS) analysis. SB 743 was signed into law in 2013, and starting on July 1, 2020, all lead agencies were required to include an analysis of VMT, instead of LOS, into their CEQA analyses. Because the 2017 EIR was certified in 2017, the EIR included a discussion of LOS impacts, rather than VMT. Section 21099 subd. (b)(1) of the Public Resources Code directed the State Office of Planning and Research (OPR) to prepare and develop criteria for determining VMT thresholds of significance. The OPR identifies a screening threshold for small, land use projects as a project that generates or attracts fewer than 110 trips per day. Projects that generate fewer trips than this threshold may be assumed to result in a less-than-significant transportation impact. Generally, projects within one-half mile of either an existing major transit stop or a stop along an existing high quality transit corridor should be presumed to cause a less than significant transportation impact. In addition, projects that decrease vehicle miles traveled in the project area compared to existing conditions should be presumed to have a less than significant transportation impact (Cal. Code Regs. tit. 14 § 15064.3). While VMT was not considered in the 2017 EIR, caselaw states that it is acceptable to analyze LOS in an

addendum to an EIR that was prepared before VMT was the standard (Olen Properties Corp. v. City of Newport Beach, 2023).

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Impacts

Potential transportation impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant: Implementation of the Approved Project would result in the expansion of pedestrian, bicycle, and public transit facilities.
- Less than Significant: No policies, mobility, or structural heights in the Approved Project were found to result in air traffic safety risks.
- Less than Significant: The Approved Project may result in increased transit ridership.
- Less than Significant: The Approved Project would not result in hazardous design features.
- Significant and Unavoidable: Implementation of Approved Project would result in increased vehicular traffic congestion from development and population increases that would affect emergency vehicle response times.

Findings

The Approved Project exceeds the goals of City and County bicycle and pedestrian plans through implementation of 2035 GP Policies 3.5-1 through 3.5-7 that ensure active transportation connections between neighborhoods, provide design guidelines for Complete Streets, and ensure equitable access consistent with Americans with Disabilities Act (ADA) guidelines.

Increasing transit ridership was designed into the 2035 GP and Circulation Element Policies including 3.2-3 are aimed at expanding transit and active transportation networks. BVSP policies focus on improvement and location of transit stops. CAP measures aim to expand active transportation infrastructure which may reduce impacts resulting from increased transit ridership.

Development and roadway improvements proposed in the Approved Project would be implemented over time and be constructed to local, regional, and federal standards. 2035 GP Policy 3.9-1 ensures clear signage for designated truck routes.

Mitigation Measure 4.12-9 requires signal priority and adherence to emergency vehicle passing priority, but the impact would remain significant and unavoidable.

2035 GP POLICIES THAT REDUCE IMPACTS:

CIRCULATION ELEMENT

Policy 3.2-3: Maintain and expand transit and active transportation networks that connect neighborhoods with key destinations to encourage travel by non-automobile modes while also improving public health.

Policy 3.5-1: Preserve and maintain Belmont's existing sidewalks and pedestrian paths.

Policy 3.5-2: Require public sidewalks in conjunction with all new non-residential development.

Policy 3.5-3: Require public sidewalks in all new residential developments except in areas where construction of sidewalks would be incompatible with existing development and/or require excessive grading or tree removal. In such cases, adequate roadway shoulders, or alternative trails and pathways shall be provided to ensure the safety of pedestrians and cyclists.

Policy 3.5-4: Design sidewalks to comply with requirements set in the Belmont Village Specific Plan within the plan area.

Policy 3.5-5: Maintain and encourage use of the existing system of main and neighborhood bike routes. Incorporate bike lanes or pathways into the circulation system of any new subdivision, consistent with the citywide bike and trails network.

Policy 3.5-6: Preserve and maintain the system of pathways providing access to the open space areas in the Western Hills and the San Francisco Watershed, and develop the pathway network to provide access to the Bay.

Policy 3.5-7: Provide bicycle and pedestrian paths within scenic corridors wherever possible.

Policy 3.9-1: Identify and sign designated truck routes in Belmont, ensuring that clear signage is provided from the freeway to truck routes in the city.

MITIGATION MEASURES

4.12-9: Signal priority preemption equipment and strict adherence to emergency vehicle passing priority.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

Same Impact as the Approved Project- Less than Significant

Implementation of the Proposed Project would support existing active transportation plans through Strategic Actions 1.B and 1.E that aim to provide facilities for pedestrians and cyclists using active transportation networks between parks and open spaces. Development of Hidden Canyon Park and Ralston Ranch Park would comply with 2035 GP Policies governing circulation including Policy 3.1-1 that ensures land use and circulation planning are developed concurrently. Any temporary “pop-up” parks that may potentially occur in locations not currently used as parks (e.g., parking lots or roadways) would be required to comply with City municipal codes and 2035 GP Policies 3.4-1-3.4-10 that guide the maintenance and improvement of roads. The Proposed Project would result in the same impacts analyzed in the 2017 EIR.

b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Less Impact than the Approved Project

Implementation of the Proposed Project may result new vehicle trips to Hidden Canyon Park and Ralston Ranch Park after their development. Improvement of open space areas and developed parks is not expected to result in increased visitation or vehicle trips to open space or park locations. Vehicle trips to Hidden Canyon and Ralston Ranch Parks are not expected to exceed 110 trips per day given the limited parking at these locations. Hidden Canyon Park currently has a 12-stall parking lot that also serves a trailhead for WDL which is proposed to be expanded and include ADA spaces. The development of Ralston Ranch Park does not include off-street parking. In the Proposed Project, these parks are categorized as Neighborhood Tier 2 parks (see Chapter 5.0) where visitors are expected to primarily arrive by walking or biking. Both Hidden Canyon and Ralston Ranch Parks are less than 0.5mile from existing public transit (stops serviced by the San Mateo County Transportation District). The Proposed Project also supports pedestrian and bicycle access to parks and open spaces through Strategic Actions 1.A-1.F which guide pedestrian, bicycle, and public transit connections to park, recreation, and open space areas. These strategies may result in fewer vehicle trips and increased pedestrian, bicycle, and transit trips. The Proposed Project will also comply with the 2035 GP Policies in the Circulation Element. Therefore, the Proposed Project is expected to result in less impact to LOS than the Approved Project given the limited development and emphasis on pedestrian, bicycle, and transit access.

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Same Impact as the Approved Project - Less than Significant

The Proposed Project would result in improvements within park and open space boundaries. No changes to roads are proposed and therefore would not create any hazards due to design features. Potential impacts resulting from the Proposed Project would be the same as the Approved Project.

d) Result in inadequate emergency access?

Same Impact as the Approved Project - Significant and Unavoidable

Implementation of the Proposed Project may result in new vehicle trips to Hidden Canyon Park and Ralston Ranch Park after their development. Improvement of open space areas and developed parks is expected to result in redistributing existing visitation levels given that these parks and open spaces serve local residents. Increased visitation may occur over time as population increases. Therefore, visitation or vehicle trips to Hidden Canyon and Ralston Ranch Parks are not expected to increase vehicle congestion and thus not expected to affect emergency vehicle access. The Proposed Project would adhere to 2035 GP Safety Element Policies as well as Mitigation Measure 4.12-9. The Proposed Project

also supports pedestrian and bicycle access to parks and open spaces through Strategic Actions 1.A-1.F which guide pedestrian, bicycle, and public transit connections to park, recreation, and open space areas. These strategies may result in fewer vehicle trips and increased pedestrian, bicycle, and transit trips, which may improve emergency vehicle access. Potential impacts resulting from the Proposed Project on emergency access would be the same as the Approved Project.

DRAFT

7.19 Tribal Cultural Resources

Would the project:	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:						
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?	Yes	☐	☐	☐	☐	☒
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	Yes	☐	☐	☐	☐	☒

DRAFT

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

While the 2017 EIR was prepared before the inclusion of the Tribal Cultural Resources topic area, the analysis criteria presented below stem from the prior Criterion 5 under the Cultural Resources topic area which was discussed in the 2017 EIR.

Impacts

Potential tribal cultural resources impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than Significant; There is a low potential of finding new or undiscovered paleontological resources within the 2017 EIR Planning Area.

Findings

The 2017 EIR found a less-than-significant impact on tribal cultural resources, as defined in Public Resources Code section 21074 (page 4.4-26 and 4.4-27). Within the 2035 GP Planning Area, there are three sites listed in the National Register of Historic Resources, eight properties identified as eligible for the National Register of Historic Resources, and four properties listed in the California Office of Historic Properties Directory. None of these listed resources are identified as a tribal cultural resource, in accordance with Public Resources Code section 21074. The City contacted five tribes to further investigate the presence of tribal cultural resources within the 2035 GP Planning Area, however no requests for consultation were received. No available evidence suggested that tribal cultural resources are present that were not already identified as archaeological or historic resources. The City is required to comply with AB 52 for all future development within the Planning Area, which provides tribes the right to formal consultation with project lead agencies and requires tribal consultation if requests for consultation are received. 2035 GP Policy 5.12-1 requires mitigation for development on sites suspected of being culturally significant, and Policy 5.12-2 requires that, if cultural resources are discovered during construction, all construction activities must halt until an evaluation of the resource is completed.

2035 GP POLICIES THAT REDUCE IMPACTS:

CONSERVATION ELEMENT

Policy 5.12-1: Ensure that development avoids potential impacts to sites suspected of being archeologically, paleontologically, or culturally significant, tribal or otherwise, or of concern by requiring appropriate and feasible mitigation.

Policy 5.12-2: If cultural, archaeological, paleontological, or cultural resources, tribal or otherwise, are discovered during construction, grading activity in the immediate area shall cease and materials and their surroundings shall not be altered or collected until evaluation by a qualified professional is completed.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?

ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Same Impact as the Approved Project – Less than Significant

Implementation of the Proposed Project resulting in the development of Hidden Canyon and Ralston Ranch Parks, improvements to developed parks (see Table 5 in Chapter 5 of this document) and trail and wildfire fuels improvements at open spaces, will not adversely affect the significance of a tribal cultural resource since all parks and open spaces are within the Planning Area of the 2017 EIR and none of the listed resources in the 2017 EIR were identified as a tribal cultural resource, in accordance with Public Resources Code section 21074. However, there is potential for tribal cultural resources to be discovered during ground-disturbing activities associated with the Proposed Project, specifically within Hidden Canyon and Ralston Ranch parks, and the two open space areas (WDL and SJC). Implementation of the Proposed Project actions would be required to comply with policies 5.12-1 and 5.12-2 contained in the 2035 GP, which would reduce the potential impact to a less-than-significant level. Therefore, the Proposed Project will have the same impacts as the Approved Project and implement the same policies to reduce impacts to a less than significant level.

DRAFT

7.20 Utilities and Service Systems

Would the project:		*Discussed in the 2017 EIR? (Yes/No)*	*Less Impact than Approved Project?*	*New Less-than-significant impact?*	*New Less-than-significant impact with Mitigation Incorporated?*	*New Potentially Significant Impact?*	*Same Impact as Approved Project?*
a)	Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	Yes	☒	☐	☐	☐	☐
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	Yes	☐	☐	☐	☐	☒
c)	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	Yes	☒	☐	☐	☐	☐
d)	Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	Yes	☐	☐	☐	☐	☒

Would the project:		Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	Yes	☐	☐	☐	☐	☒

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

Note that the 2017 EIR included a Utilities chapterrather than the Utilities and Service Systems required by CEQA currently. The impacts discussed are similar between criteria and criteria are thus treated as equivalent between the 2017 EIR and this Addendum.

Impacts

Potential utilities and service system impacts included in the 2035 GP and analyzed as part of the 2017 EIR include the following:

- Less than significant with Mitigation: Implementation of the Approved Project would result in increases in population, increasing demand for water and wastewater services over established levels. Construction of water infrastructure would occur in existing developed and disturbed areas.
- Less than significant: The Approved Project would result in development that would generate increased stormwater volumes to the level of needing new stormwater infrastructure. Construction of this infrastructure would only occur in already disturbed and developed areas.
- Less than significant: Water demand is expected to grow as a result of the Approved Project, from developed and increasing population.
- Less than significant with Mitigation: Increased development and population resulting from the Approved Project would generate wastewater and increase collection and treatment needs over current levels.
- Less than significant: New industrial, commercial, and residential development is expected to increase solid waste generation under the Approved Project.
- Less than significant: Development under the Approved Project would be served by existing agreements with waste collection and disposal services (Rethink Waste and Recology) and be required to comply with federal, state, and local regulations for solid waste.

Findings

Policies 5.6-1, 5.6-3, and 5.6-5 in the 2035 GP aim to reduce water consumption per capita by expanding water conservation efforts. The CAP provides additional strategies to reduce water consumption by prioritizing higher density, infill projects, rebates for water efficient fixtures, and adopting recognized water conservation standards. Implementation of the BVSP would allow growth that would require the construction of new water facilities and associated mitigation

measures including UTIL-1: Require water line upsizing, UTIL-2: Require sewer line upsizing, and UTIL-3: Require Shoreway Pump Station upsizing.

Phase I zoning provides design standards to maximize parking lot permeability, reducing stormwater runoff, and CAP prioritizes development near existing infrastructure. 2035 GP policies that apply to the BVSP would reduce potential development impacts on stormwater infrastructure including Policies 6.2-9 and 5.9-2 which ensure compliance with stormwater permits (San Francisco Bay Municipal Regional Stormwater Permit [MRP] and NPDES) and encourage water recharge design standards.

While water demand is expected to grow under the Approved Project, water supplies will be preserved as a result of water conservation programs and efforts. 2035 GP Conservation Policies discussed above, including 5.7-3, which works to develop a recycled water program, would reduce potential impacts to water supplies.

The 2035 GP includes several policies aimed at increasing wastewater services including Policies 5.7-1 which requires improvements to the City's wastewater system that are consistent with local and regional plans, and 5.7-2 which ensures funding for such improvements. The same mitigation measures discussed above would also be required.

The City is able to meet current waste diversion targets and landfills have capacity that meets the projected needs of the Approved Project. The CAP includes measures to support waste diversion and recycling and 2035 GP Policy 5.8-1 promotes waste reduction, recycling, and composting.

Existing agreements with waste collection and disposal services Rethink Waste and Recology will continue to comply with federal, state, and local statutes and regulations with increased development under the Approved Project. The CAP also includes measures to reduce solid waste disposal needs.

2035 GP POLICIES THAT REDUCE IMPACTS:

CONSERVATION ELEMENT

Policy 5.6-1: Work with the Mid-Peninsula Water District to meet State targets for reducing per capita urban water use.

Policy 5.6-3: Encourage the Mid-Peninsula Water District to continue and expand its water conservation programs.

Policy 5.6-5: Continue the City's Water Conservation Strategy to reduce water use, control water cost, and promote environmental sustainability in municipal buildings, parks, landscaped areas, and athletic fields, as feasible and appropriate.

Policy 5.7-1: Continue to make improvements and upgrades to the wastewater system, consistent with the City's Sanitary Sewer System Capacity Analysis and the Silicon Valley Clean Water Conveyance System Master Plan.

Policy 5.7-2: Periodically review and update development impact fees, wastewater connection charges, and monthly service charges to ensure that adequate funds are collected to operate and maintain existing facilities and to construct new facilities.

Policy 5.7-3: Partner with Silicon Valley Clean Water to develop and implement a local purified/recycled water (treated wastewater) program for Belmont, as technology and infrastructure allow.

Policy 5.8-1: Promote solid waste reduction, recycling, and composting to Belmont residents and businesses as an important way to conserve limited natural resources and reduce greenhouse gas emissions.

Policy 5.9-2: Encourage development projects of all sizes to incorporate site design measures that facilitate groundwater recharge and natural hydrological processes, allowing stormwater to infiltrate the ground on-site and/or be collected for reuse in landscaping and designated to on-site stormwater detention facilities. Such measures may include:

- Canopy trees or shrubs to absorb rainwater;
- Grading that lengthens flow paths over permeable surfaces and increases runoff travel time to reduce the peak hour flow rate;
- Partially removing curbs and gutters from parking areas where appropriate to allow stormwater sheet flow into vegetated areas;
- Installation of green roofs on buildings;
- Use of permeable paving in parking lots and other areas characterized by significant impervious surfaces;
- On-site stormwater detention, use of bioswales and bioretention basins to facilitate infiltration; and
- Integrated or subsurface water retention facilities to capture rainwater for use in landscape irrigation and other non-potable uses.

SAFETY ELEMENT

Policy 6.2-9: Periodically review maps prepared by FEMA and the State Department of Water Resources to identify changes in mapping of areas subject to flooding and amend the General Plan or Municipal Code as warranted.

MITIGATION MEASURES

UTIL-1: Require water line upsizing.

UTIL-2: Require sewer line upsizing.

UTIL-3: Require upsizing of Shoreway Pump Station.

DRAFT

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Less Impact than the Approved Project

The Proposed Project would potentially result in the construction of a new restroom through the development of Hidden Canyon Park. While the details of this restroom are uncertain at this time, and could be installed separate from the wastewater system (i.e., as a pit toilet or composting toilet). A new restroom could also be connected to the City's wastewater system requiring additions to the system and adding to the amount of wastewater needing to be treated. Upgrades to the wastewater system required by 2035 GP Policy 5.7-1 would be implemented in addition to mitigation measures UTIL-1, 2, and 3, which would accommodate a restroom at Hidden Canyon given the expectation of population increases examined in the 2017 EIR.

The development of Hidden Canyon Park and Ralston Ranch Park may result in an increase of impermeable surfaces and subsequently increase stormwater runoff. Improvements to these parks would follow 2035 GP Policy 5.9-2 that encourages development to incorporate natural hydrologic process design to reduce the need for construction of stormwater drainage facilities. The native landscaping proposed for park improvements would aid in reduction of stormwater runoff.

The impact of park improvements and a potential restroom under the Proposed Project would be less than the expected development and population growth under the Approved Project on relocation or expansion of service systems.

b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Same Impact as the Approved Project – Less than Significant

The Proposed Project could result in the construction and use of a restroom at Hidden Canyon Park which would require additional water from City to operate. 2035 GP Policies 5.6-1, 5.6-3, and 5.6-5 would be implemented to support water conservation at all parks and CAP measures encouraging water efficient fixtures would be followed. The Proposed Project would also result in the installation of native vegetation and recommends the replacement of grass fields with artificial turf which would reduce or eliminate the need for irrigation. With the use of native plants, turf and adhering to exiting 2035 GP policies, impacts resulting from the Proposed Project on water supplies would be the same as the Approved Project.

c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Less Impact than the Approved Project

Implementation of the Proposed Project could result in an increase in wastewater generation through a new restroom at Hidden Canyon Park. Under 2035 GP Policies 5.7-1 and 5.7-2, improvements to the wastewater conveyance and treatment facilities and associated funding will be implemented. Mitigation measures UTIL-1, 2, and 3 from the 2017 EIR will also be implemented to expand wastewater system capacity for the projected population and development increases. The impact of the restroom in the Proposed Project on wastewater treatment will be less than the projected population and development increases of the Approved Project.

d) Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Same Impact as the Approved Project – Less than Significant

Implementation of the Proposed Project may result in solid waste generation during construction activities of park improvements such as concrete or asphalt from paved path replacement, materials associated with restroom construction, or disposal of old play or exercise equipment during replacement. Wildfire fuel reduction activities and replacement of landscaping with native plants may result in generation of solid waste in the form of vegetation. 2035 GP Policies including 5.8-1 promoting waste reduction, recycling, and composting would be followed which would reduce potential impacts of solid waste. Vegetation removed from parks and open spaces may be composted in alignment with CAP Measure WC4 aimed at diverting landscaping-related waste from landfills. The potential impacts of park improvements and development of Hidden Canyon and Ralston Ranch Parks under the Proposed Project would be the same as the Approved Project analyzed under the 2017 EIR.

e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Same Impact as the Approved Project – Less than Significant

Development of Hidden Canyon and Ralston Ranch Parks, other park improvements, and open space wildfire fuels reduction activities under the Proposed Project would result in generation of solid waste. The Proposed Project would follow 2035 GP Policy 5.8-1 that promotes solid waste reduction, recycling, and composting, as well as CAP measures that support waste reduction and diversion. All solid waste generated as part of the Proposed Project would be required to comply with federal, state, and local solid waste regulations. Impacts resulting from the Proposed Project would be the same as the Approved Project.

DRAFT

7.21 Wildfire

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:	*Discussed in the 2017 EIR? (Yes/No)*	*Less Impact than Approved Project?*	*New Less-than-significant impact?*	*New Less-than-significant impact with Mitigation Incorporated?*	*New Potentially Significant Impact?*	*Same Impact as Approved Project?*
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	Yes	☐	☐	☐	☐	☒
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	No	☐	☐	☐	☐	☒
c) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	No	☐	☐	☐	☐	☒
d) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	No	☐	☐	☐	☐	☒

DRAFT

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

In the 2017 EIR, wildfire impacts were addressed under Chapter 4.7 Hazards and Hazardous Materials and include:

Impacts

- Less than significant: Implementation of the 2035 GP would result in new developments and population growth, subsequently increasing demand for emergency services, potentially affecting the implementation of the San Mateo County Local Hazard Mitigation Plan (LHMP).
- Less than significant: While the Approved Project focuses on infill development, development could also occur in areas of High Fire Hazard or Very High Fire Hazard (Figure 4.7-3 in the 2017 EIR), potentially increasing the risk of life or structure loss due to fire.

Findings

The 2017 EIR found a less than significant impact of the Approved Project on emergency response or emergency evacuation plans (pages 4.7-37-4.7-40). Policies within the 2035 GP and BVSP would further reduce the potential impact including Policies 6.7-6 and 6.7-9 which require the City to coordinate with the County and local public utility agencies and companies on emergency preparedness.

The 2017 EIR found a less than significant impact of the Approved Project on exposure of people or structures to significant risk of loss involving wildfire (pages 4.7-40-4.7-43). The 2035 GP anticipates primarily infill development and its policies would reduce the risk of fire. Specifically, Policies 2.14-3, 6.6-9, 4.4-7, 5.1-3 require defensible space around structures including buffers between development and natural areas and maintenance of public spaces to prevent accumulation of fuels.

2035 GP POLICIES THAT REDUCE IMPACTS:

LAND USE ELEMENT

Policy 2.14-3: Create clear design standards for the interface between open spaces and neighborhoods, especially in the Urban/ Wildland Interface Zone. Standards should identify the margin of open space needed to allow wildlife, recreation, and aesthetic values to flourish while also reducing threats of fire and invasive plant species. Incorporate “Defensible Space” standards as needed in areas of high wildfire risk.

PARKS, RECREATION, AND OPEN SPACE ELEMENT

Policy 4.4-7: Continue programs to reduce the fire danger in the open space. *See Policy 5.1-3 in the Conservation Element.*

CONSERVATION ELEMENT

Policy 5.1-3: Reduce risk of wildland fire, ecological succession, and pathogen threats (such as Sudden Oak Death) through active maintenance of public spaces and education and enforcement of development standards on private property.

SAFETY ELEMENT

Policy 6.6-9: Continue to require development located within the VHFHSZ to maintain 100 feet of defensible space consistent with California Government Code section 51182. *See also Policy 2.14-3 in the Land Use Element regarding defensible space.*

Policy 6.7-6: Work with the Mid-Peninsula Water District to ensure that it has a plan and infrastructure for providing adequate water service and storage, including peak load water supply requirements, during and immediately after an emergency, including a major seismic event.

Policy 6.7-9: Ensure critical use facilities that are important to protecting health and safety in the community remain operational during an emergency.

DISCUSSION OF POTENTIAL PROPOSED PROJECT IMPACTS

a) Substantially impair an adopted emergency response plan or emergency evacuation plan?

Same Impact as the Approved Project – Less than Significant

The Proposed Project would result in the development of Hidden Canyon and Ralston Ranch Parks, and potentially increase temporary on-street parking in adjacent neighborhoods. Implementation of the Proposed Project would also result in the development of wildfire fuel treatment plans and maintenance of existing wildfire fuel treatment areas. The park developments would not increase demand for emergency services and wildfire fuels treatment plans and actions would benefit emergency response plans by reducing the risk of fire. 2035 GP Safety Element policies would be followed by the Proposed Project, as would the Proposed Project Natural Hazard Mitigation policies (Policies 38-52). Implementation of the Proposed Project would result the same impact as the Approved Project on emergency response plans.

b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

Same Impact as the Approved Project – Less than Significant

Development of Hidden Canyon Park and Ralston Ranch Park would result in more hardened surfaces in these locations. Development of these locations and improvements at existing parks would be consistent with Belmont's Fire Code. While increased public use is expected once Hidden Canyon and Ralston Ranch Parks are developed, it is not expected that this use will exacerbate wildfire risk in these areas or the adjacent open space areas. The Proposed Project would result in wildfire fuels treatment in existing and

new areas within open spaces. The Proposed Project would also result in the development of wildfire fuels treatment plans within open spaces. Because the Proposed Project will implement the 2035 GP Policies 2.14-3 and 4.4-7 to reduce the threat of fire in open spaces near neighborhoods through the Proposed Project Natural Hazard Mitigation Policies (Policies 38-52), it would result in the same impact as the Approved Project on exacerbating wildfire risks.

c) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

Same Impact as the Approved Project - Less than Significant

Implementation of the Proposed Project would result in fire fuels treatment in open space areas which would reduce the threat of fire, and reduce the potential post-fire hazards. Implementation of the Proposed Project would also result in trail improvements including restoration of decommissioned trails which would involve revegetation. This revegetation would reduce the risk of landslides. Development of Hidden Canyon Park would result in installation of vegetation potentially increasing fire fuels. 2035 GP policies 2.14-3, 4.4-7, 5.1-3 included in the 2017 EIR as reducing potential impact of the Approved Project on risk loss of structures and life describing appropriate vegetation management in open spaces and neighboring private properties would be followed by the Proposed Project. The Proposed Project would have the same impact as the Approved Project.

d) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

Same Impact as the Approved Project – Less than Significant

The Proposed Project would not result in the installation or maintenance of associated infrastructure. The Proposed Project would implement wildfire fuel treatment activities within open space areas that would follow 2035 GP Conservation Element policies (specifically 5.1-3) that describe reducing threat of fire while maintaining value for wildlife, recreation and aesthetics. In addition, Policy 43 in the Proposed Project recommends maintaining a mosaic of species and ages in fire adapted vegetation communities like chaparral especially near roads and infrastructure to reduce fuel loads. Policy 52 in the Proposed Project works with utility companies like Pacific Gas & Electric to target open space vegetation management activities to reduce wildfire risk associated with electrical lines. The Proposed Project would have the same impact as the Approved Project.

7.22 Mandatory Findings of Significance

		Discussed in the 2017 EIR? (Yes/No)	*Less Impact than Approved Project?*	*New Less-than-significant impact?*	*New Less-than-significant impact with Mitigation Incorporated?*	*New Potentially Significant Impact?*	*Same Impact as Approved Project?*
a)	Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	Yes	☒	☐	☐	☐	☐
b)	Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	Yes	☐	☐	☐	☐	☒

	Discussed in the 2017 EIR? (Yes/No)	Less Impact than Approved Project?	New Less-than-significant impact?	New Less-than-significant impact with Mitigation Incorporated?	New Potentially Significant Impact?	Same Impact as Approved Project?
c) Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?	Yes	☒	☐	☐	☐	☐

SUMMARY OF IMPACTS IDENTIFIED IN THE 2017 EIR

The 2017 EIR identified significant and unavoidable impacts to air quality, noise, and transportation.

DISCUSSION OF PROPOSED PROJECT IMPACTS

a) ***Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?***

Less Impact than the Approved Project

Implementation of the Proposed Project may result in short term potential impacts to habitat or cultural resources from ground-disturbing or vegetation removal activities. The Proposed Project however, would result in long-term benefits to habitat from native plant installation and trail drainage improvements. The Proposed Project would have no new significant impacts related to the potential for the degradation of the quality of the environment, a substantial reduction in the habitat of a fish or wildlife species, the drop of a fish or wildlife population below self-sustaining levels, a substantial reduction in the number or restriction on the range of a rare or endangered plant or animal. Implementation of the Proposed Project would not result in impacts to any known cultural resources which would be less impact than the Approved Project.

b) ***Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?***

Same Impact as the Approved Project

The 2017 EIR found the Approved Project to have cumulatively considerable impacts to air quality, cultural resources, greenhouse gases, noise, public utilities, and

transportation. This Addendum to the 2017 EIR found that the Proposed Project would have less impact than the Approved Project related to these topics. However, when these impacts from the Proposed Project are considered in addition to the impacts from the Approved Project, they would remain cumulatively considerable. Therefore, the Proposed Project's contribution to the significant cumulative air quality, cultural resources, greenhouse gases, noise, public utilities, and transportation impacts would result in the same cumulatively considerable impacts as the Approved Project as analyzed in the 2017 EIR.

c) ***Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?***

Less Impact than the Approved Project

The Proposed Project has not been found to generate new or substantially more severe environmental effects than those previously analyzed in the 2017 EIR; therefore, there is no likelihood of the Proposed Project causing substantial adverse effects on human beings, either directly and indirectly, beyond that which was previously analyzed in the 2017 EIR.

CITY OF BELMONT

DRAFT

EXECUTIVE SUMMARY

PARKS | RECREATION | OPEN SPACE MASTER PLAN

LET'S BUILD OUR BACKYARD

PURPOSE

The Parks, Recreation, and Open Space Master Plan (PROS Plan) is a strategic, forward-looking document. It studies the existing park system, outdoor recreation facilities and programming, and open spaces to identify a decision-making framework and recommendations to plan, maintain, develop, rehabilitate, and connect the City's network of parks, recreation, and open space for the next 15 years.

GUIDING PRINCIPLES

1. Provide **equitable access** to resources and activities across the entire city
2. Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position, or physical/cognitive ability
3. Make all users feel **welcome and safe**
4. Offer services and activities across a **range of interests, abilities, and ages**
5. Reflect our commitment to **environmental resilience and sustainability**
6. Respect the beauty and importance of our **natural resources**
7. Advance community **health and well-being**
8. Foster a sense of community and encourage **social interaction**
9. Provide **well-maintained** and actively managed facilities
10. **Adapt** to changing conditions and needs
11. Utilize a **transparent community process** to inform decisions

VISION

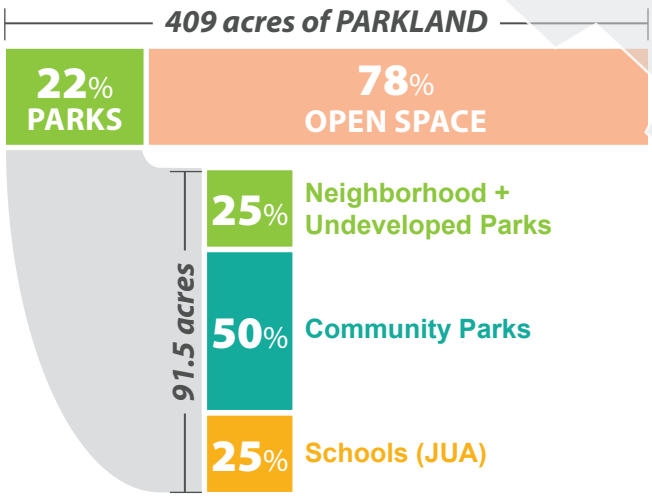
RE-IMAGINE THE BELMONT PARKS, RECREATION, AND OPEN SPACE (PROS) SYSTEM TO **CREATE THE CITY'S BACKYARD** THAT FOSTERS **INCLUSIVE, EXPERIENTIAL, AND NURTURING PUBLIC SPACES** BY SETTING THE **FRAMEWORK FOR DECISION MAKERS** IN THE PLANNING, MAINTENANCE, DEVELOPMENT, AND/OR REHABILITATION, IMPLEMENTABLE OVER A **15 YEAR HORIZON**.

VISION

The Belmont community recognizes the essential role that a well-designed PROS system plays in both individual and community health. The community engagement process revealed that Belmont residents are proud of their parks and open spaces and the recreation opportunities they provide. Be it a baseball game at Belmont Sports Complex, a basketball game at O'Donnell Park, climbing the playground at Semeria Park, attending an outdoor movie at Twin Pines Park, or exploring Waterdog Lake, Belmont's PROS system is intrinsically linked to the community's identity and social cohesion.

The National Recreation and Park Association found that in 2019, parks and recreation agencies generated $218 billion in economic activity nationwide, with California benefiting from $23 billion of the total. Statewide, parks and recreation agencies are significant employers. Park operations and capital spending positively influence the local economy, and Belmont is no exception.

The PROS Plan complements the goals and strategies of key planning documents such as the 2035 General Plan. Thoughtful management of the PROS system carries the responsibility of addressing climate resiliency and furthering active transportation strategies, as outlined in the City's Climate Action Plan and Comprehensive Pedestrian and Bicycle Plan. Together, the City's planning documents identify innovative solutions and look proudly towards the future of Belmont.



Learn more about the Purpose, Vision, and Guiding Principles in Chapter 1.

BELMONT'S PROS SYSTEM

The City of Belmont offers 409 acres of parks and open space—almost 14 percent of the city's land area. Belmont's parks, recreation, and open space system (PROS system) consists of 17 parks (of which 15 are developed), two open space areas, and four schools under a joint-use agreement with the Belmont-Redwood Shores School District. The parks and school sites are distributed across the city, while the open spaces are located only in the western hills.

The parks range in size, from less than 1 acre to over 20 acres, and vary in intensity of use. While not directly correlated, smaller parks tend to provide fewer amenities and therefore generate less use intensity. The PROS Plan uses a set of criteria known as Park Typologies to organize the sites and establish a baseline service level that Belmont parks must meet.

Learn more about the Context and Existing Conditions that served as the foundation for this PROS Plan in Chapters 2 and 3.

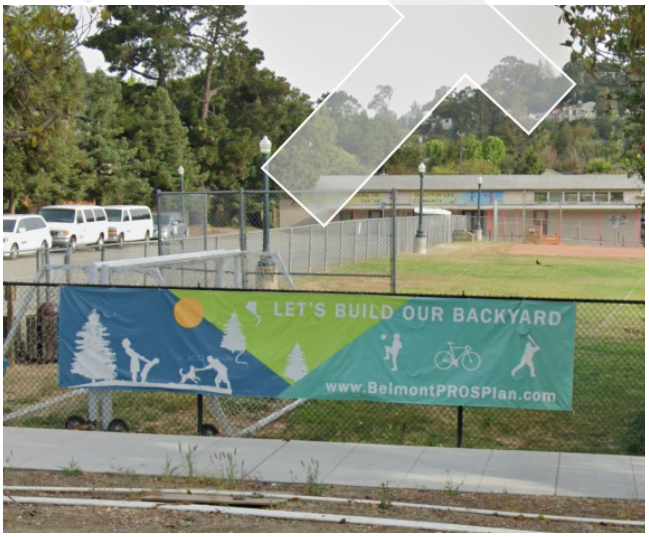
COMMUNITY INPUT

Community outreach was an integral component of the development of the PROS Plan. Beginning in Spring 2021, community engagement opportunities were held in a hybrid manner, utilizing virtual platforms and in-person events to hear from the Belmont community.

OUTREACH METHODS

Approximately 5,000 comments and responses were collected across all outreach methods. Participants were asked to share their preferences, priorities, and desired improvements for the PROS system. This process offered a wide range of outreach materials and input opportunities to maximize project awareness and community participation, including the development of an Advisory Committee, an online survey, in-person and virtual focus groups, pop-up and open house events, neighborhood meetings, a comprehensive social media campaign, and presentations at City Council and Parks and Recreation Commission public meetings.



COMMUNITY THEMES

The following community themes emerged as a result of the engagement process:

- Amenities For Social + Physical Activity
- More Seating Opportunities
- Physical Connections
- Amenities For Diverse Interests
- Accessible For All Abilities
- Create More With Less
- Connecting With Nature
- Available For Many Uses + Users
- Natural Resources
- Honor Belmont's Unique Landscapes

Learn more about the Community Input that directed the creation of this PROS Plan in Chapter 4.

BIG IDEAS + GOALS

Through community outreach, four **BIG IDEAS** emerged to define Belmont's vision for the future of the PROS system.

These four Big Ideas were used as the framework to present the Goals of the PROS Plan. They are also influenced by the General Plan's Park, Recreation, and Open Space Element and Conservation Element.

Learn more about the Goals for the PROS Plan in Chapter 6.

THE CITY AS YOUR BACKYARD

OUTDOOR RECREATION FOR ALL

CELEBRATE THE OUTDOORS

ENVIRONMENTAL + FINANCIAL SUSTAINABILITY

THE CITY AS YOUR BACKYARD

PROS Goal 1 Connect Belmont and unify PROS sites by encouraging a robust pedestrian, bicycle, and public transit network.

PROS Goal 2 Foster a healthy community through spaces, amenities, programs, and public art that promote and encourage physical activity, social interaction, and Belmont's culture.

PROS Goal 3 Meet evolving community needs by establishing new uses, improved spaces, and a variety of recreation amenities.

OUTDOOR RECREATION FOR ALL

PROS Goal 4 Improve community health through diverse, equitable, and inclusive spaces and amenities with accessible routes.

PROS Goal 5 Ensure future success through adaptability, flexibility, and support for many uses and users.

PROS Goal 6 Actualize PROS Plan by developing strong partnerships across private, public, and community groups.

CELEBRATE THE OUTDOORS

PROS Goal 7 Develop and implement an Open Space Management Plan (OSMP).

PROS Goal 8 Highlight local ecosystems through educational opportunities across parks and open spaces.

PROS Goal 9 Enrich outdoor recreation through trail improvements, volunteer collaborations, and wayfinding features.

ENVIRONMENTAL+FINANCIAL SUSTAINABILITY

PROS Goal 10 Nurture and strengthen natural resources through efficient and innovative landscape design.

PROS Goal 11 Diversify funding sources to ensure high-quality, actively-managed, and well-maintained PROS assets.

PROS Goal 12 Prioritize sustainable, resilient, and responsible management and maintenance practices.

DRAFT

FRAMEWORK

PROS PLAN

The organizational flowchart shown in Figure ES-3 summarizes the structure of the plan's framework. The Purpose and Vision established the Guiding Principles, which were used to plan the Community Input process. Community Themes emerged from the collected feedback and were further synthesized into Big Ideas and Goals. The PROS Plan used this framework to craft the Strategies and Recommendations that aim to provide guidance over a 15-year horizon.

OPEN SPACE MANAGEMENT PLAN

Goal 7 calls for the development of an Open Space Management Plan (OSMP). Developed in tandem with the PROS Plan, this study reviews Belmont's two open spaces utilizing an approach that adjusts for the unique components, considerations, and uses of these valuable outdoor community spaces.

As an attachment to the PROS Plan, the OSMP presents its Objectives, Policies, and Recommendations specific to the open spaces. The findings of the OSMP are presented throughout this document where appropriate as they complement the PROS Plan.

Learn more about the Planning Process for the PROS Plan in Chapter 1.

Figure ES-3: PROS Framework

PARKS | RECREATION | OPEN SPACE MASTER PLAN

Davey Glen Park

EXISTING CONDITIONS

PARK TYPOLOGIES

Parks were assigned a category, or Park Typology, that defines general expectations and character, establishes minimum amenities, and anticipates common methods of travel to the site. This also defines the Access Radius, or the distance used to delineate areas around a site that are easily reachable by the surrounding community. This approach identifies neighborhoods with low access to PROS sites and can demonstrate high-impact opportunities to expand the PROS system.

	NEIGHBORHOOD PARK **TIER 1**	NEIGHBORHOOD PARK **TIER 2 ***	COMMUNITY PARK
Character	Nature and Neighborhood Social Space	Nature, Group Gathering, and Play	Nature, Community Gathering, Recreation, and Play
Uses + Users	Passive Individuals to Small Groups	Passive + Active Individuals to Medium Groups	Passive + Active Individual to Large Groups
Standard Baseline Amenities	1. Natural Environment 2. Seating 3. Identifiable Amenity	1. Natural Environment 2. Seating 3. Play Amenity 4. Picnic Opportunity 5. Multi-Purpose Flexible Space 6. Recreation Amenity	1. Natural Environment 2. Seating 3. Play Amenity 4. Picnic Opportunity 5. Multi-Purpose Flexible Space 6. Recreation Amenity 7. Off-Street Parking 8. Permanent Restroom 9. Multi-Use Athletic Field or Community Facility
Size	No Size Requirements Typically less than 1 acre	No Size Requirements Over 2 acres should provide off-street parking	No Size Requirements
Transport Modes	Walking Biking	Walking Biking Some Driving	Walking Biking Driving
Access Radius	¼ mile	½ mile	Entire City
Previous Planning	Mini Park	Neighborhood Park	Community Park Special Facility

Table ES-1: Park Typologies

** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

Note: School (JUA) and Open Space Park Typologies do not have attributes such as Standard Baseline Amenities.

NEIGHBORHOOD PARK (TIER 1)

A Neighborhood Park Tier 1 is a small pocket of natural green space that supports local gatherings, promotes unplanned social interactions, and provides a peaceful place to talk or play. A Neighborhood Park Tier 1 has the lowest use intensity, meaning the few amenities at the site are expected to be used by only a handful of people at a single time. This Park Typology has an Access Radius of one quarter (¼) mile.

NEIGHBORHOOD PARK (TIER 2)

A Neighborhood Park Tier 2 provides a local connection to nature, supports social gatherings of small groups, and offers recreation and play activities. A Tier 2 Park is more intense in amenities and uses than a Tier 1 Park, but it still oriented toward a single visitor or smaller groups of less than 20 people. As such, there are at least two play and recreation amenities designed for use by multiple diverse visitors at a single time, as well as picnic amenities that support small group gatherings. These sites have an Access Radius of one half (½) mile.

COMMUNITY PARK

Community Parks are notable parks that act as community event venues, offering spaces and amenities for large group gatherings that can support dozens of users and multiple recreation programs simultaneously. Community Parks have high use intensities and generate the most visitors. For the purposes of this PROS Plan, this Park Typology has an Access Radius that spans the entire city.

UNDEVELOPED PARK

Undeveloped Parks are sites owned by the City that have limited or no amenities. Sites with this designation are slated for development into amenitized outdoor public spaces. For the purposes of the PROS Plan, the two Undeveloped Parks are planned as Neighborhood Parks Tier 2. This designation is used to evaluate park access within the Park Typologies framework by utilizing the same characteristics.

SCHOOL (JOINT USE AGREEMENT)

The City entered into a joint-use agreement with the Belmont-Redwood Shores School District for the public right to use recreational spaces in exchange for a maintenance commitment by the City. These sites have an Access Radius of one half (½) mile.

OPEN SPACE

Open Spaces are minimally improved or undeveloped natural areas open to the public for recreational activities. The OSMP, included in the Appendix, reviewed the two Open Space sites. Trailheads are depicted on Figure ES-4. For the purposes of this PROS Plan, this Park Typology has an Access Radius that spans the entire city.

Open Space

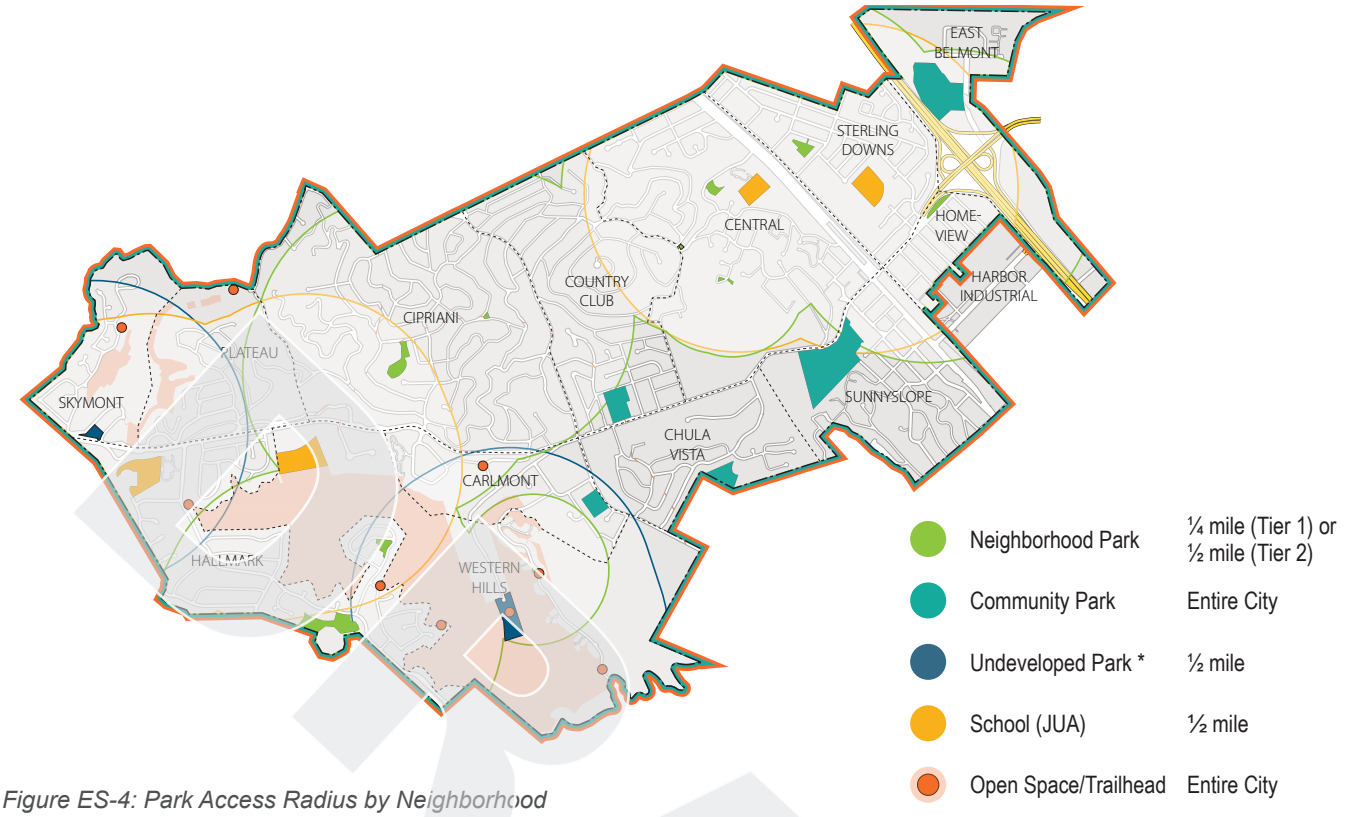

Figure ES-4: Park Access Radius by Neighborhood
** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

ACCESS + CONNECTIONS

Figure ES-4 highlights portions of the city where PROS sites are less accessible, as determined by the site's Park Typology and Access Radius. Overall, Belmont provides a high level of access to parks. Almost 90 percent of the population lives within a 10-minute (or ½-mile) walk of a PROS site. The national average for the percent of population that lives within a 10-minute walk of a park is 55 percent, based on data compiled by the Trust for Public Land. Belmont well surpasses this average.

Given the limited availability of land to establish new parks, enhancing connections to and between existing PROS sites is paramount. The 2016 Comprehensive Pedestrian and Bicycle Plan gives parks high priority for pedestrian and bicycle facility improvements. Safe and enjoyable multi-modal connections between parks are critical because they reduce transit-related injuries, improve circulation, and increase accessibility.

The City's improvements to Ralston Avenue as part of the Safe Routes to School program illustrate the ongoing effort to reduce conflict and increase connections between parks and recreation amenities for non-motorized transport.

AMENITY INVENTORY

An Amenity Inventory was conducted to document the quantity and quality of existing amenities within the PROS system. This study enables a comparison between a park's amenity offerings in relation to the minimum amenities it should be providing as defined by its Park Typology.

Learn more about the Existing Conditions and Needs Assessment that served as the foundation of this PROS Plan in Chapters 3 and 5.

STRATEGIES

This plan presents a suite of Strategies, applicable to the PROS system as a whole, to provide guidance to the City for future improvements to Belmont's outdoor amenities.

The Strategies build upon the PROS Goals, represent the opportunities and constraints within the PROS system, and serve as the guiding inspiration for future improvements as available resources and conditions evolve over time. The Strategies also include Objectives and Policies that are specific to Belmont's open spaces.

Learn more about the Strategies in Chapter 7.

Volunteers Working to Improve PROS Sites

Belmont Sports Complex

RECOMMENDATIONS

The PROS Plan presents a comprehensive set of Recommendations that are derived from the analyses and considerations that guided this study. The Recommendations directly respond to the Strategies presented in the plan, focusing on the equitable distribution of amenities throughout the community.

Recommendations are broken down into two primary categories: System-wide and Park-specific. System-wide Recommendations are informed by a holistic review of Belmont's unique PROS system and best management practices applicable to the City. Park-specific Recommendations are informed by individual site assessments and inventories. The Recommendations also include potential sites for new parks or joint-use agreements, as well as proposed improvements for Belmont's open spaces. Recommendations were driven by the community engagement process, which served as a key component of the PROS Plan.

SYSTEM-WIDE

System-wide Recommendations are pathways to carry out the established Goals and Strategies across the entire PROS system. These include:

- Activation Plan
- Inclusive+All-Abilities Play
- Interconnect Toolkit
- Pop-up Park Installations
- Social Gathering Space
- Usage Study

PARK-SPECIFIC

Each park in the City was evaluated for access, proximity, and available space to host new or enhanced amenities. A Recommendation Spectrum was used to contextualize the Park-specific Recommendations presented in the PROS Plan in terms of the magnitude of change. This tool organizes potential improvements into six categories based on the degree of intensity, spanning from the creation of a new park to the implementation of a minor improvement or existing master plan.

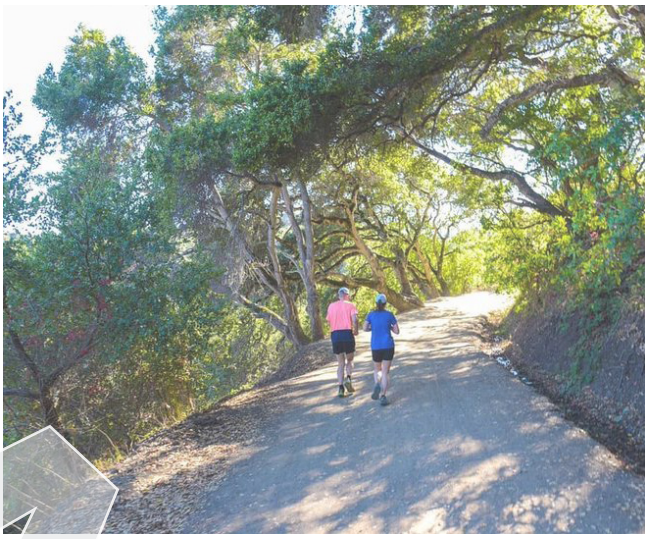
OPPORTUNITIES

NEW PARK OPPORTUNITY SITES

The PROS Plan identifies three potential sites for new parks in Belmont. As an almost completely built-out city, there are limited opportunities for new park sites. These sites are on land currently owned by a public entity and should be considered as opportunities to provide additional park acreage to Belmont residents. The new park opportunity sites are listed below by their priority ranking:

- Ralston Avenue + Old County Road
- Oak Knoll Drive
- Alameda de las Pulgas

POTENTIAL AGREEMENTS



The City may consider a joint-use agreement with the local schools and other organizations to facilitate or enhance public access. These are listed below, in order of their level of education:

- Carlmont High School
- Crystal Springs Middle School
- Notre Dame High School
- Notre Dame de Namur University/Stanford University

OPEN SPACE

Recommendations for Belmont's open spaces aim to improve the condition of existing trails, manage existing and future recreational uses, and protect environmental resources found in San Juan Canyon and Waterdog Lake Open Spaces.

Explore the Recommendations for improvements to the PROS system in Chapter 8.

Recreational Use on Open Space Trails

INCREASING MAGNITUDE OF RECOMMENDATIONS

Magnitude	EXISTING MASTER PLAN	MINOR IMPROVEMENT	UPGRADED OR NEW AMENITY	PARK REDESIGN	UNDEVELOPED PARKS	NEW PARK OPPORTUNITY
Existing Condition	Master plans recently adopted Created with extensive community input	Parks recently developed or in very good condition	Current park functioning well	Rethink accessibility and park layout No change in use	Existing park is undeveloped	Add parkland To fill gaps in park access City-owned property
Recommendation	Implement existing Master Plan	Minor improvements identified to maintain high quality	Upgrade existing amenity or new amenity to meet identified needs or gaps	Undertake park design plan	Develop and amenitize site	Create, develop, and amenitize site

Figure ES-5: Recommendations Spectrum

Note: The Recommendation Spectrum is used to frame Park-specific Recommendations for the Community Park, Neighborhood Park, and Undeveloped Park Typologies. It is not applied to School (JUA) or Open Space Typologies.

IMPLEMENTATION

PRIORITIZATION

Implementation of the PROS Plan will require multiple funding sources over many years. As such, a prioritization approach is crucial to meet the most pressing needs in the Belmont community in an effective and equitable manner. System-wide, Park-specific, and Open Space Recommendations are uniquely prioritized based on the feasibility of implementation and their ability to satisfy the PROS Goals. As circumstances, opportunities, resources, and demands evolve, criteria to prioritize implementation should be re-evaluated periodically, ideally every five years. The following factors were considered while developing the prioritization approach, listed alphabetically:

- Advances diversity, equity, and inclusion
- Aligns with other projects
- Funding availability
- Reduces operating costs or generates revenue
- "Quick win"
- Time-limited opportunity

PARK-SPECIFIC PRIORITIZATION RANKINGS

As funding to further develop PROS sites is limited and competitive, a Prioritization Matrix was developed to guide the implementation of Park-specific Recommendations as funds become available. Park-specific Recommendations were assigned point values for each of the four criteria, informed by the factors listed above. The point criteria categories, listed below, reflect the ability of the proposed project to:

- Further PROS Plan goals
- Respond to community priorities
- Resolve an existing deficiency
- Address an existing condition

For each PROS site, the total points were summed, averaged, and ranked to highlight which PROS sites have the highest potential to positively impact the community as a result of the proposed site-specific improvements. This prioritization approach intends to focus the City's efforts when determining which PROS sites to improve first but is not an absolute directive for the sequencing of development.

OVERALL PRIORITIZATION RANKINGS

SITE *	AVG POINTS	SITE RANK
Ralston Ave + Old County Road *	21.9	1
Oak Knoll Drive	18.8	2
Ralston Ranch Park	18.0	3
Alameda de las Pulgas	17.4	4
Alexander Park	14.5	5
O'Donnell Park	12.2	6
Hidden Canyon Park	12.0	7
Belameda Park	11.5	8
Twin Pines Park	11.4	9
Barrett Community Center	10.9	10
McDougal Park	10.9	
Cipriani Park	10.4	11
Hallmark Park	10.4	
Wakefield Park	10.4	
Hastings Tot Lot Park	10.2	12
Central Elementary School	10.0	13
Patricia Wharton Park	10.0	
College View Park	9.9	14
Belmont Sports Complex	9.4	15
Fox Elementary School	9.0	16
Nesbit School	9.0	
Ralston Middle School	9.0	
Davey Glen Park	8.0	17
Semeria Park	7.8	18

** Recommendations for this site may be temporary. The City is evaluating all development options.*
Note: Open Spaces are not included in rankings.
Note: Several parks are tied for the same rank. The tied parks are listed in alphabetical order.

Table ES-2: Overall Prioritization Rankings

ACTION PLAN

The Action Plan provides an implementation pathway for the realization of the PROS Plan by organizing next steps into three time frames: short term, long term, and ongoing. This tool is informed by partnership opportunities and overall priorities, and is intended to highlight projects that resolve deficiencies or repair unsafe conditions so that they are implemented sooner than other less impactful improvements.

OPEN SPACE PRIORITIES

There are seven priorities for open space improvements. These actions were selected in consideration of their implementation feasibility as well as their urgency in relation to conservation laws, wildfire safety, and visitor experience. The open space priorities are listed below:

- Stream crossing improvements
- Seasonal and weather dependent restrictions on maintenance activities
- Monitor use and survey visitors during e-bike pilot
- ADA-compliant trails
- Fuels reduction plan
- Volunteer restoration programs
- Nature-based recreation programs
- Trail calming features

Volunteers Working to Improve PROS Sites

FUNDING STRATEGIES

The PROS Plan identifies several sources of funding to implement the proposed improvements. These sources include the City's General Fund, revenue from the Parks and Recreation Department, Park Development Impact Fees, assessments, and bonds. This document also discusses alternative funding sources such as competitive grant programs, corporate and non-profit philanthropy, and universities that support Belmont's PROS system. The City will utilize a portfolio of funding strategies for capital improvements, maintenance, and operations.

PARTNERSHIPS

Partnerships between City departments, school districts, parks and recreation foundations, local volunteer groups, and service organizations will be instrumental in the realization of the PROS Plan.

Learn more about Implementation of the PROS Plan in Chapter 9.

THIS PAGE INTENTIONALLY LEFT BLANK

DRAFT

PART 1.
WHERE WE ARE

CHAPTER 1
INTRODUCTION

This plan serves as a road map for the future of the City's outdoor amenities and recreational programming. The plan evaluates the City's existing parks and open spaces using environmental and benchmark assessments, extensive community engagement, and recreational trend analysis to develop recommendations for improvement. It aims to inspire creative design and use of old and new spaces, honor the natural environment that makes Belmont unique, and provide enjoyable and safe recreational opportunities for all.

PURPOSE

The Parks, Recreation, and Open Space Master Plan (PROS Plan) is a strategic, forward-looking document. It studies the existing park system, outdoor recreation facilities and programming, and open spaces to identify a decision-making framework to plan, maintain, develop, and rehabilitate Belmont's parks, recreation, and open space system (PROS system) for the next 15 years.

VISION

The Belmont community recognizes the essential role that a well-designed PROS system plays in both individual and community health. The community engagement process revealed that Belmont residents are proud of their parks and open spaces and the recreation opportunities they provide. Be it a baseball game at Belmont Sports Complex, a basketball game at O'Donnell Park, climbing the playground at Semeria Park, attending an outdoor movie at Twin Pines Park, or exploring Waterdog Lake, Belmont's PROS system is intrinsically linked to the community's identity and social cohesion.

The National Recreation and Park Association found that in 2019, parks and recreation agencies generated $218 billion in economic activity nationwide, with California benefiting from $23 billion of the total. Statewide, parks and recreation agencies are significant employers. Park operations and capital spending positively influence the local economy, and Belmont is no exception.

The PROS Plan complements the goals and strategies of key planning documents such as the 2035 General Plan. Thoughtful management of the PROS system carries the responsibility of addressing climate resiliency and furthering active transportation strategies, as outlined in the City's Climate Action Plan and Comprehensive Pedestrian and Bicycle Plan. Together, the City's planning documents identify innovative solutions and look proudly towards the future of Belmont.

PURPOSE

SET THE **FRAMEWORK** FOR DECISION MAKERS IN THE **PLANNING, MAINTENANCE, DEVELOPMENT,** AND/OR **REHABILITATION** OF BELMONT'S **PARKS, RECREATION, + OPEN SPACE SYSTEM** FOR A 15 YEAR HORIZON.

VISION

RE-IMAGINE THE BELMONT PARKS, RECREATION, AND OPEN SPACE (PROS) SYSTEM TO **CREATE THE CITY'S BACKYARD** THAT FOSTERS **INCLUSIVE, EXPERIENTIAL, AND NURTURING PUBLIC SPACES** BY SETTING THE **FRAMEWORK FOR DECISION MAKERS** IN THE PLANNING, MAINTENANCE, DEVELOPMENT, AND/OR REHABILITATION, IMPLEMENTABLE OVER A **15 YEAR HORIZON**.

GUIDING PRINCIPLES

1. Provide **equitable access** to resources and activities across the entire city
2. Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position, or physical/cognitive ability
3. Make all users feel **welcome and safe**
4. Offer services and activities across a **range of interests, abilities, and ages**
5. Reflect our commitment to **environmental resilience and sustainability**
6. Respect the beauty and importance of our **natural resources**
7. Advance community **health and well-being**
8. Foster a sense of community and encourage **social interaction**
9. Provide **well-maintained** and actively managed facilities
10. **Adapt** to changing conditions and needs
11. Utilize a **transparent community process** to inform decisions

PLANNING PROCESS

The planning process undertaken for this PROS Plan is similar to many strategic planning processes:

- Define the scope of work and prepare a demographic analysis
- Perform a needs assessment to identify goals and recommendations
- Structure an implementation plan

The PROS Plan provides a clear path to accomplishing the community's vision through achievable steps in both the short term and long term, maximizing the sustainability and accessibility of the PROS system. It sets forth a framework that will guide the City as new opportunities arise and the needs of the diverse community evolve over time. For this study, Belmont's geography and demography were contextualized, previous planning documents were reviewed, existing conditions of the PROS system were evaluated; the need for new, expanded, or renovated PROS sites was assessed; the community was surveyed; and an implementation strategy was established (Figure 1-1).

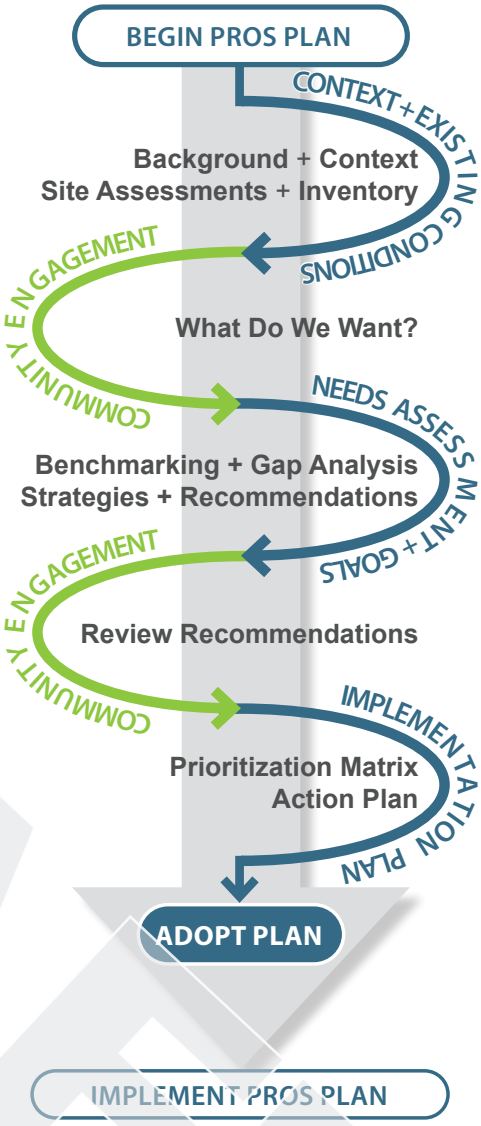

Figure 1-1: Planning Process

DRAFT

DOCUMENT ORGANIZATION

The PROS Plan is organized into three parts, each containing three chapters.

PART 1. WHERE WE ARE

This section provides context for the PROS Plan and summarizes the current conditions of the existing parks and open spaces. It serves as the foundation that the rest of the PROS Plan is built upon.

Chapter 1. **Introduction**
This chapter gives a brief overview of the purpose and value of the PROS Plan and its planning process.

Chapter 2. **Context**
This chapter provides contextual information such as community demographics and a discussion of existing planning documents.

Chapter 3. **Existing Conditions**
This chapter documents existing PROS sites, assessed both quantitatively and qualitatively.

PART 2. WHERE WE WANT TO GO

This section identifies the desired changes to the PROS system, supported by data from community feedback and extensive research.

Chapter 4. **Community Input**
This chapter outlines the community outreach efforts and the collective themes that emerged.

Chapter 5. **Needs Assessment**
This chapter documents parks and recreation service levels in comparable cities, identifies national and local recreation trends, and outlines standard amenity ratios.

Chapter 6. **Goals**
This chapter summarizes what the community desires for their PROS system and serves as the foundation for the recommendations presented in this plan.

PART 3. HOW WE GET THERE

This section looks to the future and explores the collective community vision. It presents the strategies and recommendations to further the PROS Goals and provides an implementation pathway to Build our Backyard.

Chapter 7. **Strategies**
This chapter outlines the strategic approach to realizing the vision of the PROS Plan.

Chapter 8. **Recommendations**
This chapter presents system-wide and park-specific recommendations, identifies opportunities for new parks, and describes methods to steward Belmont's treasured open spaces.

Chapter 9. **Implementation**
This chapter outlines the prioritization approach that drives the improvement, repair, and maintenance schedules for each park. It discusses potential funding strategies and partnerships for the implementation of the PROS Plan.

APPENDICES

The appendices are provided under a separate cover and include supporting data, relevant studies, and correspondence for the PROS Plan.

PARKS | RECREATION | OPEN SPACE MASTER PLAN

DRAFT

PART 1.
WHERE WE ARE

CHAPTER 2
CONTEXT

The City's vision statement captures Belmont's distinctive community character:

- Belmont prides itself on being **unique**
- Its small-town ambiance sets it apart as a **tranquil, safe, and desirable place** to live
- We get involved in town matters because **we care** about living here
- We **connect with each other** in all kinds of gathering places
- Our **strong sense of community** and enjoyment of the town's assets and activities deepen as we become better informed and connected

Source: 2035 General Plan

Figure 2-1: Regional Location Map

THE CITY OF BELMONT

SETTING

The City of Belmont incorporated in 1926. Located midway between San Francisco and San Jose on the San Francisco peninsula, the city covers just over 4.6 square miles in Northern California (Figure 2-1). Belmont is known for its wooded hills, spectacular views of the Bay, and acres of open space. It spans from Redwood Shores and the marshlands near the Bay's edge to the east to Crystal Springs Reservoir and the Santa Cruz Mountains to the west. The topography rises from sea level in the eastern areas to over 800 feet in the western hills.

Belmont is bisected north/south by Highway 101, El Camino Real (State Route 82), Caltrain railroad tracks, and Alameda de las Pulgas. The main transportation artery running east/west is Ralston Avenue.

Belmont offers 409 acres of parks and open space—totaling almost 14 percent of the city's geographical land area. There are 15 developed parks, 2 existing but undeveloped park sites, 4 school sites under a joint-use agreement (JUA), and 2 areas of dedicated open space. Park sites range in size from approximately 0.1 acres to over 19 acres. The open space areas range from 35 acres to over 280 acres.

Views from Belmont

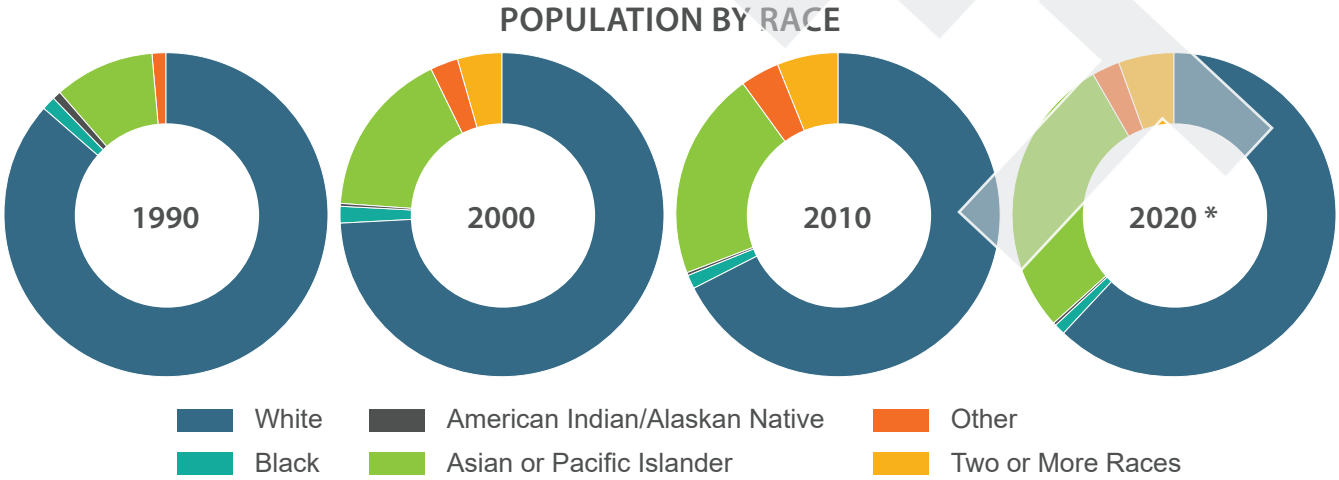
DEMOGRAPHICS

The City's previous PROS Plan was completed over 30 years ago. Since then, the City has transformed in many ways. The four recent decennial censuses show that Belmont is diversifying, aging, and densifying (Table 2-1 and Figure 2-2).

POPULATION

While Belmont's population has remained relatively stable over the last 30 years, increasing less than 10 percent from 1990 to 2020, its demographics have changed. Belmont now includes a greater proportion of Asian and Pacific Islander populations than in 1990, and more residents identify with two or more races. As of 2020, 35 percent of households speak a language other than English at home. Belmont is and will continue to be ethnically and culturally diverse.

AGE



With over 20 percent of the age distribution within Belmont being under 18, and nearly 20 percent of the population being aged 65 and over, considerations for the needs and desires of multiple age groups are important for a well-rounded PROS system now and into the future. The median age increased since 1990, currently at approximately 41 years old.

BELMONT DEMOGRAPHICS
1990 TO 2020

	1990	2000	2010	2020 *
Population	24,127	25,123	25,835	26,470
% under 18	17.7%	19.3%	23.0%	23.0%
% over 65	11.4%	13.2%	16.7%	16.7%
Population Density (per square mile)	5,133.4	5,348.5	5,496.8	5,631.9
Median Age	36.3	38.8	40.9	40.9
Male / Female % of Population	49.2% / 50.8%	49.2% / 50.8%	48.8% / 51.2%	49.7% / 50.3%
Housing Units	10,335	10,577	11,028	11,283
Median Household Income	$50,859	$80,905	$99,913	$156,052
Median House Value (owner-occupied)	$418,021	$593,200	$900,100	$1,527,500

Source: US Census Bureau Census Data for 1990, 2000, 2010. 2010 and 2019 American Community Survey 5-year Estimates. CA Dept of Finance Population Estimates Jan 1, 2020. Full tables are found in the Appendix.
** 2020 values are 2019 ACS estimates.*

Table 2-1: Belmont Demographics, 1990 to 2020

** 2020 values are 2019 ACS estimates.*

Figure 2-2: Demographic Data for Belmont, from 1990 to 2020

POPULATION FORECAST

To align with other planning documents guiding the City, the PROS Plan uses the 2035 forecasted population of 30,500 from the 2035 General Plan (adopted 2017) for all build-out scenarios. State-mandated increases in housing development impact every City on the peninsula, and Belmont is no exception. The City's Housing Element (2023-2031) is under revision to reflect additional housing units, which may have a higher projected population increase than the projections in the 2017 General Plan.

COMPARABLE CITIES

As a method to evaluate Belmont's PROS system, comparable cities were identified based on proximity, similar topography, and commensurate demographics. Burlingame, San Carlos, and Saratoga were chosen as benchmarks because of their similarities to Belmont: geographically (located in the southern Bay Area), topographically (hillsides and Bay edge), climate, population (similar quantity and growth over the last decade), as well as other social factors.

Belmont is the least populous of the comparable cities, although the population difference across all four is within a 15 percentage point range (Table 2-2). The age distributions are relatively similar, hovering at an average of approximately 23 percent under 18 years old and 17 percent over 65 years old. Population density, median household income, and land area are sufficiently comparable to Belmont.

PARKLAND

Public space makes up about 32 percent of Belmont's footprint (Figure 2-3). Of that area, approximately 43 percent is parks and open space. The remaining 57 percent is comprised of streets, sidewalks, and other rights-of-way. Belmont's parkland percentage is approximately 14 percent of its total land area, just below the national median of 15 percent.

The City provides 409 acres of parks and open space (Table 2-3). Of this, 91.5 acres (22 percent) are parks or school athletic fields with JUAs for public access and 317.5 acres (78 percent) are open space. The 91.5 acres of parkland consist of Community Parks (50 percent), Neighborhood Parks (developed and undeveloped, 25 percent) and athletic fields at local schools (25 percent).

The General Plan establishes the goal of 5 acres of parkland for every 1,000 residents (Policy 4.1-2), specifically 2 acres of neighborhood parkland and 3 acres of community parkland. Currently, Belmont provides 3.5 acres of parkland per 1,000 residents. This includes 0.9 acres of neighborhood parkland and 1.7 acres of community parkland. However, the General Plan does not consider open space in the calculation of parkland per 1,000 residents. Currently, Belmont provides 12 acres of open space per 1,000 residents, for a total of 15.5 acres of park and open space land per 1,000 residents (Table 2-3).

DEMOGRAPHICS
BELMONT AND COMPARABLE CITIES

	BELMONT	BURLINGAME	SAN CARLOS	SARATOGA
Population	26,470	29,746	29,814	30,546
% under 18	23.0%	23.6%	24.8%	20.6%
% over 65	16.7%	14.4%	15.6%	23.1%
Median Household Income	$156,062	$128,447	$182,083	$191,677
Land Area (square miles)	4.62	4.41	5.54	12.38
Population Density (Square Mile)	5,590.2	6,538.1	5,129.3	2,416.9

Source: 2019 American Community Survey 5-year Estimates. CA Dept of Finance Population Estimates for Jan 1, 2021

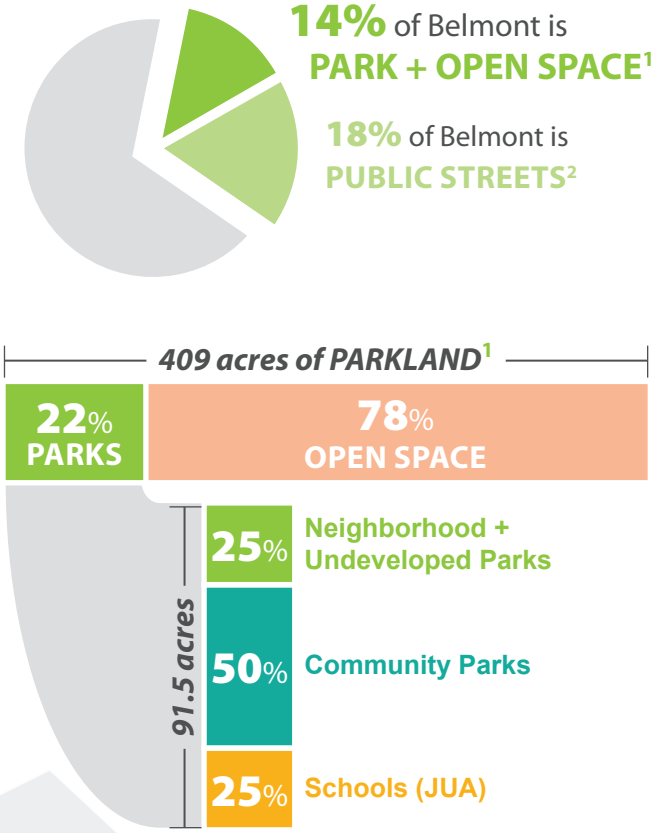

Table 2-2: Demographics, Belmont and Comparable Cities

Belmont provides more park acreage and open space acreage than any of the comparable cities (Table 2-4). The National Recreation and Parks Association (NRPA) Pacific Southwest region, which includes Northern California, has a median of provided parkland (excluding open space) of 3.9 acres per 1,000 residents. Nationally, the average provided parkland is 10.6 acres per 1,000 residents for jurisdictions of a similar size as Belmont (20,000 to 49,999 population).

PARKLAND ACREAGE			
	ACRE	% OF TOTAL ACREAGE	ACRES PER 1,000 RESIDENTS
PARK	68.1	16%	2.6

PLANNING CONTEXT

This PROS Plan is a forward-looking document to prepare Belmont's PROS system for future needs. Where appropriate, it references the following current and historical planning documents:

- 2035 General Plan (2017)
- Strategic Plan (2020, updated 2023)
- Public Art Master Plan (2020)
- Green Infrastructure Plan (2019)
- ADA Transition Plan (2018)
- Belmont Village Specific Plan (2017)
- Comprehensive Pedestrian and Bicycle Plan (2016)
- Complete Streets Policy (2013)
- Athletic Field Master Plan (2001)
- Open Space Trail Master Plan (1998)
- Parks and Open Space Master Plan (1992)
- Western Hills Area Plan (1990)
- San Juan Hills Area Plan (1988)

Two recent master plans are incorporated into this plan:

- Twin Pines Park Master Plan (2019)
- Belmont Community Center Conceptual Design Report (2020)

Twin Pines Master Plan (2019)

2035 GENERAL PLAN

The City adopted the 2035 General Plan in 2017. The Vision Statement of the General Plan has five components:

- Distinctive Community Character
- Easy Mobility
- Natural Beauty
- Thriving Culture
- Thriving Economy

The PROS Plan builds upon the following key strategies from the General Plan:

- **Preserve Existing Neighborhoods and High Quality of Life:** Ample parks and open space for residents.
- **Continue Commitment to Parks, Recreation, and Open Space:** Continued preservation of the natural open spaces and enhanced recreational facilities.

The system of park classification from the General Plan was used as the foundation for the Park Typologies and associated Standard Baseline Amenities used in the PROS Plan. The General Plan defines and classifies each park as a Mini Park, Neighborhood Park, Community Park, School Park, or Special Facility.

An implementation priority of the General Plan, approved in 2017, is an update to the 1992 Parks, Recreation, and Open Space Master Plan. The General Plan acknowledged that the 1992 document was outdated and no longer guiding the City's parks and recreation efforts. In response, the City developed this PROS Plan to continue to look forward and build a better Belmont. This plan fulfills a General Plan priority.

The Parks, Recreation, and Open Space Element and Conservation Element of the General Plan outline goals, policies, and actions to guides the City into the future that support efforts of the PROS Plan.

Parks and Recreation Goal 4.1
Provide an expanded, high quality, and diversified park system that serves the entire Belmont community, enhances community identity, and is conveniently located for community use.

- Policy 4.1-1: Use the Parks, Recreation, and Open Space Master Plan to define the vision, goals, and strategies for maintaining and improving Belmont's park system and guide to implementation efforts.
- Policy 4.1-2: Strive to achieve and maintain a citywide standard of at least 5.0 acres of mini, neighborhood, and community parks per 1,000 residents, targeting a breakdown of 3.0 acres/1,000 residents for community parks and 2.0 acres/1,000 residents for neighborhood parks.

Parks and Recreation Goal 4.2
Ensure that a wide variety of public community and recreation facilities are available to the entire Belmont community for recreational, social, and cultural activities.

- Policy 4.2-1: Review and update the types, amounts, and locations of community and recreational facilities as part of the Parks, Recreation, and Open Space Master Plan.
- Policy 4.2-2: Building on the needs assessment, improve the quality and quantity of public community facilities in Belmont.
- Policy 4.2-3: Continue joint use agreements with other agencies, institutions, and private organizations for public use of recreational facilities not owned by the City, especially in neighborhoods deficient in recreational facilities, if the joint use agreements can help meet the city's recreational needs and if the terms are favorable to the City.

Parks and Recreation Goal 4.3
Improve the quantity and quality of recreational programming and services to provide varied recreational opportunities for the entire Belmont community.

Open Space Goal 4.4
Continue to develop and support a balanced and integrated open space system reflecting a variety of considerations, including natural resource conservation, outdoor recreation, and public health and safety, to ensure synergies between various open space components and compatibility with land use planning.

- Policy 4.4-1: Continue to designate and protect open space lands for the preservation of scenic areas, natural drainage ways, and plant and wildlife habitats; for outdoor recreation; and for public health and safety.
- Policy 4.4-2: Maintain connectivity between large open spaces in Belmont and the region, including Waterdog Lake area, San Juan Hills area, Sugarloaf Mountain, and the open space in the San Francisco Public Utility District's Crystal Springs watershed.
- Policy 4.4-3: Consistent with the San Juan Hills and Western Hills area plans, cluster development in the hillside areas of western Belmont in order to maintain contiguous habitat areas, minimize grading, and limit exposure to steep slopes and other sensitive areas.
- Policy 4.4-4: Maintain and enhance trails in open spaces in Belmont. Continue to support opportunities for shared use of trails among multiple users, including pedestrians and mountain bicyclists. Promote knowledge, trail etiquette, and consideration of multiple users on trails through education programs and signage.
- Policy 4.4-5: Use the Parks, Recreation, and Open Space Master Plan to establish priorities for the protection, enhancement, and improvement of open space lands and trails for recreational purposes.
- Policy 4.4-6: Develop programs to control invasive plant species that threaten the natural resources.
- Policy 4.4-7: Continue programs to reduce the fire danger in the open space.
- Policy 4.4-8: Develop interpretive programs to help engender appreciation for the open space resources in Belmont.

Open Space Goal 4.5
Preserve and protect open space resources using various methods available to the City.

- Policy 4.5-1: Consider open space dedication or acquisition of fee title land to ensure long-term preservation and protection only if public liability exposure can be acceptably limited to the extent feasible.
- Policy 4.5-2: Protect Belmont Creek from future encroachment through regulation, development review, conservation easements, or other appropriate actions.
- Policy 4.5-3: Continue to prohibit off-road motorized vehicle use in open space areas to prevent damage to the environment.
- Policy 4.5-4: Seek to preserve the existing open space areas in the San Juan Hills and Western Hills, consistent with the Area Plans, especially on steep hillsides and sensitive habitat areas.

Open Space Goal 4.6
Improve and increase public access into open space areas where feasible and safe.

- Policy 4.6-1: Maintain and improve access to parks and open space, especially in areas that lack land for additional parkland dedication and in areas where topography and lack of sidewalks inhibits easy pedestrian access to parks and recreational facilities.
- Policy 4.6-2: Improve public access and connections to Belmont Creek. Promote use of this waterway corridor for passive recreation, education, and research.
- Policy 4.6-3: In multimodal transportation planning efforts, such as corridor studies and active transportation plans, ensure that parks, recreation facilities, and open spaces are considered key destinations for linkages to the bicycle and pedestrian networks.

Support for Parks, Recreation and Open Space Goal 4.7
Pursue sufficient and dedicated funding for acquisition, operations, protection, maintenance, and management of parks, recreation facilities, and natural open spaces and to meet the recreational programming and service needs of the Belmont Community.

- Policy 4.7-1: Ensure that residential and nonresidential development projects contribute to the City's park, recreation, and open space resources commensurate with their impacts, through the Quimby Act and establishment and collection of park impact fees.
- Policy 4.7-2: Continue to work with local, regional, and State agencies, nonprofit and community organizations, foundations, and grant sources to provide funding for Belmont;s open space, parks, and recreation and assistance with maintenance and programming.
- Policy 4.7-3: Support, where appropriate and feasible, partnerships with private businesses to conduct limited operations in park and recreation facilities (e.g. a concessions stand) to generate a revenue stream that may contribute to operations and maintenance costs.
- Policy 4.7-4: Encourage community involvement in the stewardship of Belmont's natural resources, including public and private work programs and special events to maintain open space lands.

The Conservation Element of the General Plan outlines goals, policies, and actions to guides the City into the future that support efforts of the PROS Plan.

DRAFT

Conservation Goal 5.1

Protect and maintain open space for the preservation of natural resources.

- Policy 5.1-1: Ensure that any improvements recommended for open space areas are appropriate for the type of open space and the use proposed.
- Policy 5.1-2: In portions of Belmont that include significant open space resources, use area plans to address the balance and interface between natural and developed areas.
- Policy 5.1-3: Reduce risk of wildland fire, ecological succession, and pathogen threats (such as Sudden Oak Death) through active maintenance of public spaces and education and enforcement of development standards on private property.
- Policy 5.1-4: Ensure that future acquisitions of open space land are compatible with the City's open space strategy and long-term interests.

Conservation Goal 5.2

Protect and preserve open space for public health, safety and recreation in areas that require special management for regulation.

- Policy 5.2-1: Encourage the retention of areas that are hazardous to public safety and welfare as undeveloped open space, including steep hillsides unsuitable for development as identified in area plans and other detailed geotechnical studies; hydrological areas of concern; areas of geological instability; and appropriate setback areas on either side of known active fault traces. See also discussion and policies in the Safety Element.
- Policy 5.2-2: Involve the public in stewardship of Belmont's open space resources.

Conservation Goal 5.3

Protect and restore biological and ecological resources in Belmont, including sensitive wildlife species and their habitats.

- Policy 5.3-1: Support the protection, preservation, restoration, and enhancement of habitats of State or federally listed rare, threatened, endangered and/or other sensitive and special status species, and favor enhancement of contiguous areas over small, segmented remainder parcels.
- Policy 5.3-2: Continue to maintain, protect, restore, and enhance Belmont's ecologically important areas and seek to reduce impacts on them, including the creek corridors, the open space, and the wetlands around O'Neill Slough.
- Policy 5.3-3: To the greatest extent feasible, ensure that development does not disturb sensitive habitat and special status species by requiring appropriate and feasible mitigation measures.
- Policy 5.3-4: Maintain functional wildlife corridors and habitat linkage in order to contribute to regional biodiversity and the viability of rare, unique or sensitive biological resources throughout the city and region.
- Policy 5.3-5: In design and construction, require use of best practices that preserve natural resources, such as soil, trees, native plants, and permeable surfaces.
- Policy 5.3-6: Avoid light pollution and unnecessary glare by requiring development projects to use design features and shielding methods that cast outdoor light downward and minimize glare and to install the minimum amount of outdoor lighting necessary for safety and security.
- Policy 5.3-7: Encourage the planting of native trees, shrubs, and grasslands in order to preserve the visual integrity of the landscape, provide habitat conditions suitable for native vegetation, and ensure the maximum number and variety of well-adapted plants are maintained.
- Policy 5.3-8: Use native or drought-resistant vegetation in landscaping on City-owned property, and encourage private property owners to use native or drought-resistant vegetation in landscaping on private property.
- Policy 5.3-9: Promote the healthy growth of trees and control the removal of trees within the city.
- Policy 5.3-10: Allow neighborhood community gardens as a permitted use in all residential zoning districts.

DRAFT

Conservation Goal 5.4

Preserve and restore Belmont's waterways and adjacent corridors as valuable community resources that serve as plant and wildlife habitats, groundwater recharge facilities, flood control and irrigation components, and connections between open space areas.

- Policy 5.4-1: Restore Belmont Creek to enhance ecological functions, biological resources, hydrology function, and flood control.
- Policy 5.4-2: Preserve, where possible, natural watercourses or provide naturalized drainage channels within the city. Where necessary and feasible, implement restoration and rehabilitation measures.
- Policy 5.4-3: Protect, restore, and enhance a continuous corridor of native riparian vegetation and wildlife habitat along Belmont's waterways, water bodies, and wetlands.
- Policy 5.4-4: Preserve and enhance the natural riparian environment along waterway corridors, including Belmont Creek, by minimizing environmental and visual impacts. See also Policy 4.5-2 in the Parks, Recreation, and Open Space Element.

Belmont Open Space Inhabitant

Conservation Goal 5.5

Preserve water quality by promoting the protection of Belmont's creeks and other natural water bodies from pollution.

- Policy 5.5-1: Continue to participate in the San Mateo Countywide Water Pollution Prevention Program.
- Policy 5.5-2: Encourage residents and businesses to use best management practices (BMPs) to reduce water pollutant loads that result from daily activities, such as using landscaping chemicals and fertilizers and repairing and washing cars outdoors.
- Policy 5.5-3: Require development projects to incorporate structural and non-structural best management practices (BMPs) to mitigate or reduce the projected increases in pollutant loads, in accordance with the NPDES permit guidelines.
- Policy 5.5-4: Ensure that the design and construction of new infrastructure elements does not contribute to stream bank or hillside erosion or creek or wetland siltation, and incorporates site design and source control BMPs, construction phase BMPs, and treatment control BMPs to minimize impacts to water quality.
- Policy 5.5-5: Implement water pollution prevention methods to the maximum extent practicable, supplemented by pollutant source controls and treatment.

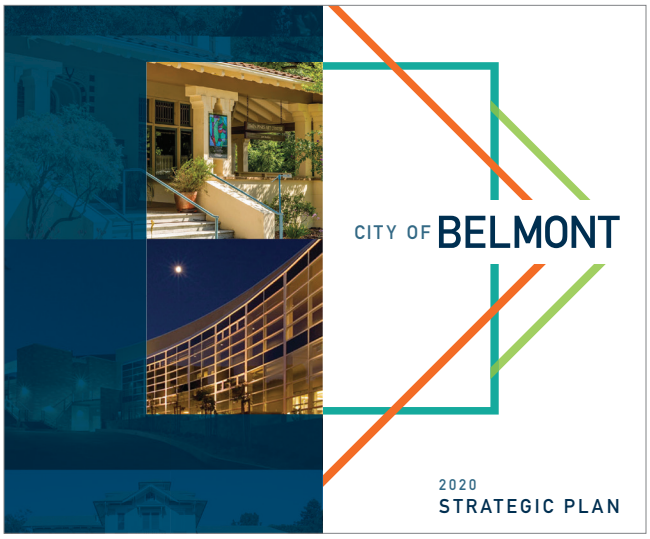
Conservation Goal 5.12

Preserve and protect areas and sites of prehistoric, cultural, and archaeological significance.

- Policy 5.12-1: Ensure that development avoids potential impacts to sites suspected of being archaeologically, paleontologically, or culturally significant, tribal or otherwise, or of concern by requiring appropriate and feasible mitigation.
- Policy 5.12-2: If cultural, archaeological, paleontological, or cultural resources, tribal or otherwise, are discovered during construction, grading activity in the immediate area shall cease and materials and their surroundings shall not be altered or collected until evaluation by a qualified professional is completed.

DRAFT

STRATEGIC PLAN



The Strategic Plan (2020) is a robust planning document that builds a unified vision for the future of Belmont's resources. Updated in 2023, this document presents five Strategic Focus Areas (SFA):

- Infrastructure and Mobility
- Economic Development and Housing
- Fiscal and Organization Sustainability
- Public Safety
- Quality of Life

The Infrastructure and Mobility SFA includes an objective to "improve parks and facilities" which identifies improvements to the Belmont Community Center, improvements to athletic fields, and an assessment of facility needs.

The Quality of Life SFA includes an objective to "improve parks and recreation programs and facilities," which identifies completion of the Barrett Community Center Master Plan, completion of this PROS Plan, and delivering an accessible, inclusive, age-friendly services, programs, and facilities.

The Public Safety SFA includes an objective to align forward-thinking public safety services with community need, which includes ensuring public safety with police and fire to leverage technology and innovation to protect the community against risks and threats.

Strategic Plan (2020, updated 2023)

PUBLIC ART MASTER PLAN

In 2017, the City undertook a placemaking effort that culminated in the adoption of the Public Art Master Plan (2020). This plan developed nine recommendations to guide public art implementation in Belmont; relevant recommendations are listed below.

Program Recommendation #1: Build upon Belmont's tradition of community engagement to expand citywide arts opportunities.

- Short-term: Create temporary artwork with the theme "environment" at Twin Pines Park and other locations.
- Mid-term: Create a permanent pop-up park space on the corner of Ralston Avenue and Old County Road or adjacent to City Hall on Sixth Street plaza.

Program Recommendation #4: Commission art that helps define city gateways and enhances neighborhood character.

- Short-term: Install an iconic gateway at Ralston Ave and Old County Road.

Program Recommendation #5: Encourage changing artwork displays and place them in both busy and unexpected places.

- Short-term: Install temporary artwork at Twin Pines Park and other locations.

Program Recommendation #7: Integrate art into new City capital construction projects.

- Mid-term: Include an artist in the design team for the Belmont Community Center.

Program Recommendation #9: Commission artwork that enhances people's experience of nature.

- Short term: Develop artwork for Twin Pines.
- Mid-term: Develop artwork for Waterdog Lake.

GREEN INFRASTRUCTURE PLAN

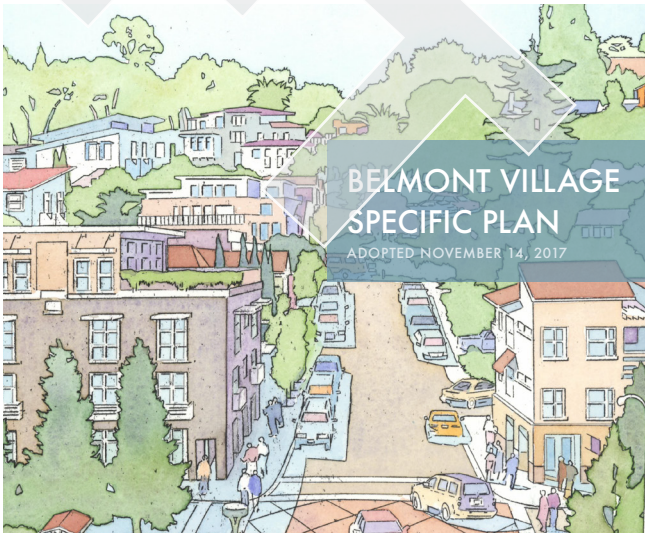
Green infrastructure is stormwater infrastructure that uses vegetation, soils, and natural processes to manage water and create healthier urban environments. Green infrastructure consists of natural and landscaped areas that provide habitat, flood protection, cleaner air, and cleaner water.

Belmont's Green Infrastructure Plan (2019) advances goals and guidelines from the General Plan, demonstrates intention to shift away from the existing gray storm drain infrastructure; supports achievement of County and regional goals; coordinate plans, policies, codes, standards, and ordinances; provides design guidance; a basis for coordination and collaboration among projects at the City, County, and regional scale; and raise public awareness. The plan identifies potential green infrastructure projects, many of which are within park sites or at schools. Barrett Community Center, McDougal Park, Twin Pines Park, and O'Donnell Park were identified as locations for potential projects of high importance. Incorporating green infrastructure in all park redesigns will benefit the Belmont community now and into the future.

ADA TRANSITION PLAN

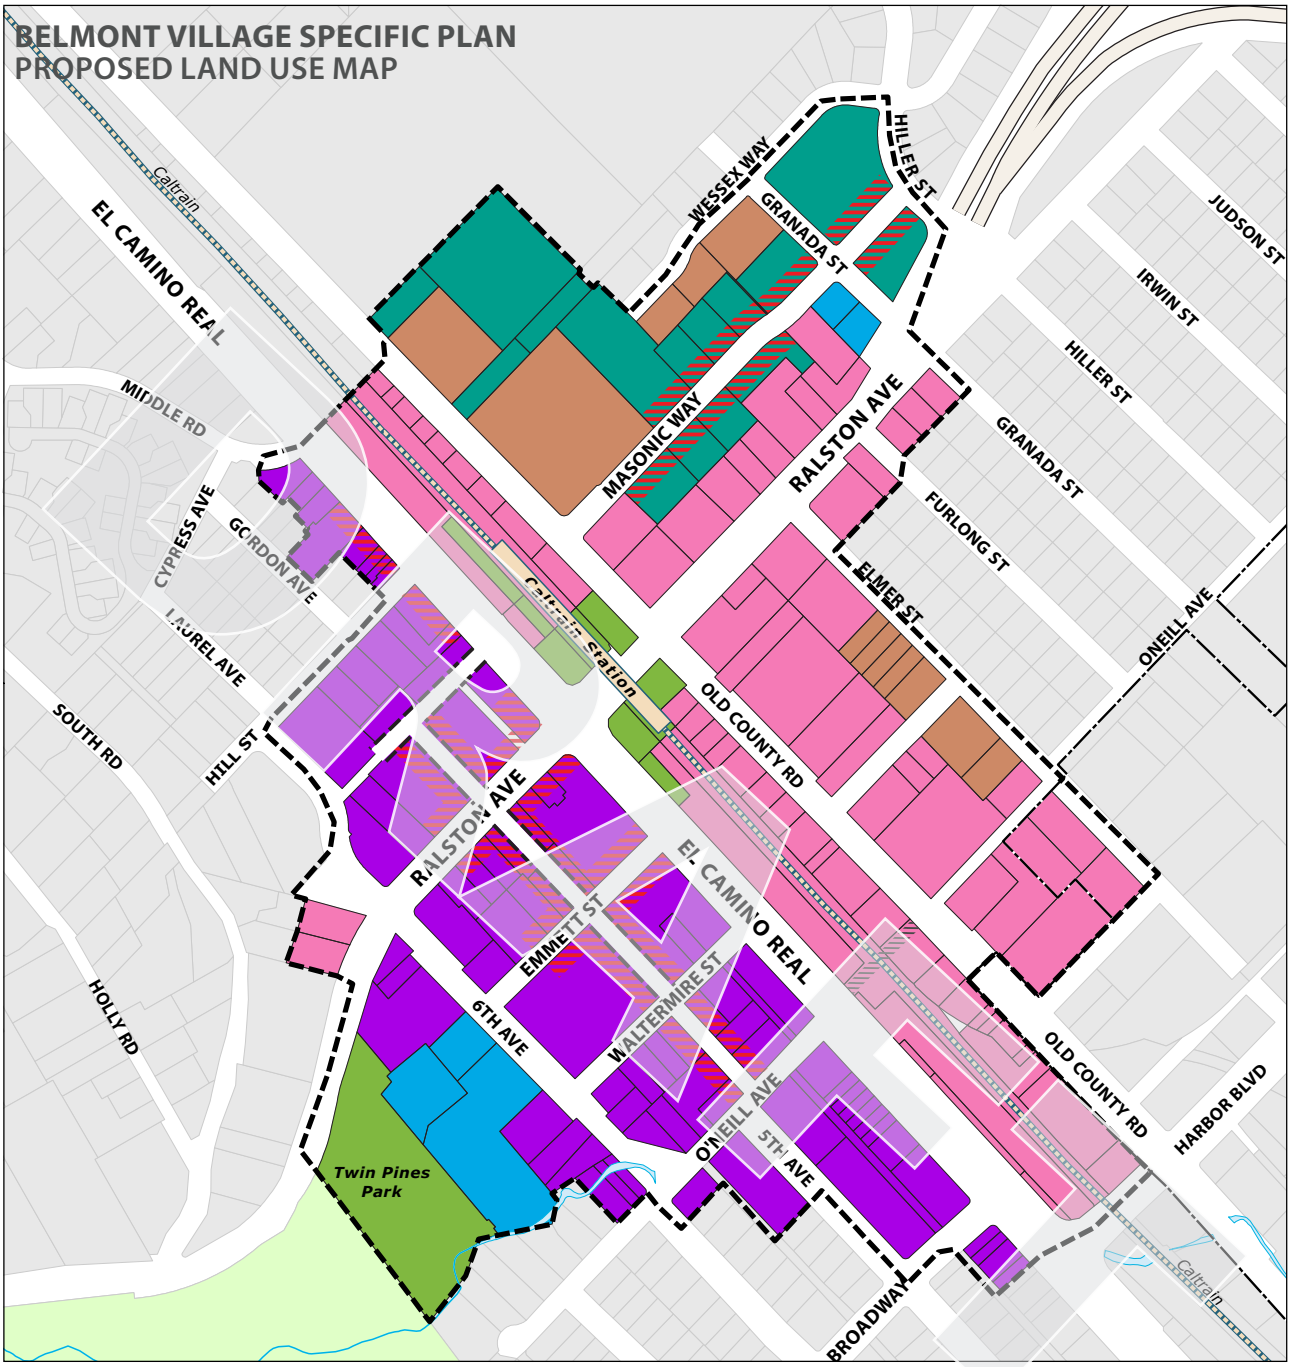
The ADA Transition Plan (2018) includes an ADA Self-Evaluation Report of City services, policies, and practices. The Evaluation Report included an evaluation of all PROS sites and public right-of-way including sidewalks, curb ramps, and pedestrian signals. The report documented accessibility barriers to the City's programs, services, facilities, and activities, and outlines a transition from a state of non-compliance to compliance.

CLIMATE ACTION PLAN



The Climate Action Plan (2017) offers pathways for residential energy efficiency. It recommends smart development patterns and vibrant complete neighborhoods that allow residents to travel safely and effectively via foot, bicycle, or public transportation. The proposed Climate Action Strategies and their respective measures focus on energy, transportation and land use, solid waste, and climate adaption solutions.

BELMONT VILLAGE SPECIFIC PLAN



The Belmont Village Specific Plan (2017) covers Belmont's downtown area, approximately 80 acres in size (Figure 2-5). The area is designated a Priority Development Area (an area identified for future growth) by the Metropolitan Transportation Commission and the Association of Bay Area Governments, and is expected increase in density through development of multi-family housing. The planning area includes the Ralston Avenue and Old County Road intersection, and the eastern portion of Twin Pines Park.

The plan's vision is to "realize Belmont Village's potential as the city's center of civic life with a unique sense of place. Create an attractive, vibrant, mixed use town center for Belmont, offering shopping, restaurants, entertainment, employment, and residential users in a compact, pedestrian-oriented setting. Enhance pedestrian and bicycle connections so that residents, visitors, and workers can walk, bike, and take transit. Design streets and public spaces to create a lively and attractive public realm with a distinctive identity."

Of particular importance to the PROS Plan are the public realm areas identified in the build-out scheme. The proposed land use near the Caltrain station, on City-owned land at the intersection of Ralston Avenue and Old County Road, is public Park/Plaza. Additionally, conceptual public areas are identified on privately-owned parcels as urban design community benefits.

Belmont Village Specific Plan (2017)

Figure 2-4: Belmont Village Specific Plan Proposed Land Use Map

PEDESTRIAN + BICYCLE PLAN

The Comprehensive Pedestrian and Bicycle Plan (2016) outlines goals and objectives that support a safe and connected active transportation network across Belmont.

- **Goal 1.** Create a safe and comfortable pedestrian and bicycle friendly environment that will encourage people of all ages to bike or walk.
- **Goal 2.** Increase the rate of walking and bicycling in Belmont.
- **Goal 3.** Promote multimodal transportation infrastructure that accommodates all users.
- **Goal 4.** Support adopted citywide, regional, and State goals related to the provision of complete streets.
- **Goal 5.** Provide a continuous network of pedestrian facilities that connects neighborhoods with key destinations and transit stops.
- **Goal 6.** Support the development of a citywide bicycle network.

The plan outlines measurable objectives, of which four of the seven directly relate to the PROS system.

- **Objective 2.** Reduce pedestrian network gaps by providing continuous sidewalks on 1) at least one side of most arterial and collector streets by 2030; and 2) at least one side of local streets that provide access to schools, parks, employment locations, and transit stops by 2030.
- **Objective 3.** Provide bicycle facilities on most segments of Belmont's 21-mile network of arterial and collector streets by 2030, including Class II bicycle lanes on at least half of the City's 11-mile arterial street network.
- **Objective 4.** Provide site-specific pedestrian and bicycle crossing enhancements wherever feasible at locations where pedestrian priority routes and bikeway corridors intersect arterial and collector streets, and at locations where such enhancements would reduce walking distance to adjacent school and transit stops.
- **Objective 5.** Increase the provision of secure bicycle parking, particularly within Downtown, at major parks and civic facilities, and consider updating zoning ordinance parking requirements to include bicycle-parking standards for non-residential development by 2021.

Enhancing access to and between destinations, with an emphasis on connecting downtown areas, schools, neighborhoods, transit hubs, and parks, is the primary focus of the plan. All PROS sites are considered destinations within this framework, and as a result, they are high priorities for multi-modal corridor improvement projects. The plan also focuses on reducing gaps and optimizing linkages to support regional access into and out of Belmont. The plan identifies neighborhoods that are lacking in active transportation infrastructure and proposes an extensive network of interconnected pedestrian and bicycle routes.

The proposed bicycle network connects beyond the city's boundary. Most recommendations are for Class III bike routes across the city. On certain streets, such as Ralston Avenue and Alameda de las Pulgas, Class II bike lanes are recommended. For these heavily trafficked and well-connected corridors, transforming on-street parking to active transportation infrastructure is a key recommendation.

The implementation of the recommendations are prioritized based on continuity, condition, and cost and availability of funding. The pedestrian projects focus on compliance with the Americans with Disabilities Act (ADA) and intersection crossings. Ralston Avenue, El Camino Real, and Alameda de las Pulgas are the top three streets for pedestrian and bicycle improvements.

COMPLETE STREETS POLICY

The City Council adopted a Complete Streets Policy in 2013 in support of a comprehensive and integrated transportation network. This includes infrastructure and design that allows safe and convenient travel along and across street for all users. The policy promotes safe, equitable, and convenient travel for all users while preserving flexibility, recognizing community context, and using the latest and best design. This policy directly influenced the General Plan and the Comprehensive Pedestrian and Bicycle Plan.

ATHLETIC FIELD MASTER PLAN

Recognizing the high-use and limited availability of space to increase the quantity of athletic fields, the City developed the Athletic Field Master Plan in 2001 to improve and maintain the playability of existing fields with significant upgrades. This plan is focused solely on the athletic turf areas and related athletic equipment and infrastructure. The Barrett Community Center, Cipriani Park, and McDougal Park were identified for improvements, as well as Central Elementary School, Fox Elementary School, Nesbit Elementary School, and Ralston Middle School.

PARKS + OPEN SPACE MASTER PLAN

The 1992 Parks and Open Space Master Plan outlined objectives and policies for development of the park system and preservation of open space. The plan set a park acreage goal of 5 acres for every 1,000 residents (2 acres Community Parks and 3 acres for Neighborhood or Mini Parks). Open space is defined in the 1992 plan as areas for passive recreation, education, and aesthetics. Preservation and expansion of open space is highly prioritized in the plan.

The plan's strategies and goals are the same goals furthered by this PROS Plan: improvements and redesigns to existing parks to meet community needs, improvements to joint-use sites, new park development where possible, open space management, and park connections. Similar to the 1992 plan, the PROS Plan aims to develop a high-quality public park system with adequate space and facilities to provide an appropriate mix of recreation activities for the City's residents (Objective 1: Park System Development) and preserve and enhance the existing open space resources of the City (Objective 2: Open Space).

OPEN SPACE TRAIL MASTER PLAN

The Open Space Trail Master Plan was adopted in 1998. It was developed by a citizens committee and identified existing and proposed multi-use and single-use trails, as well as trails to be removed.

WESTERN HILLS AREA PLAN

The City has taken steps in the last 30 years to purchase open space parcels in the Western Hills neighborhood to protect the natural environment for public use. Land use controls limit development due to the natural topography for safety, access, and to protect views. Adopted in 1990, the goals and objectives relevant to the PROS Plan revolve around land use regulations and the preservation of open space.

Land Use Goal: Encourage Open Space Protection

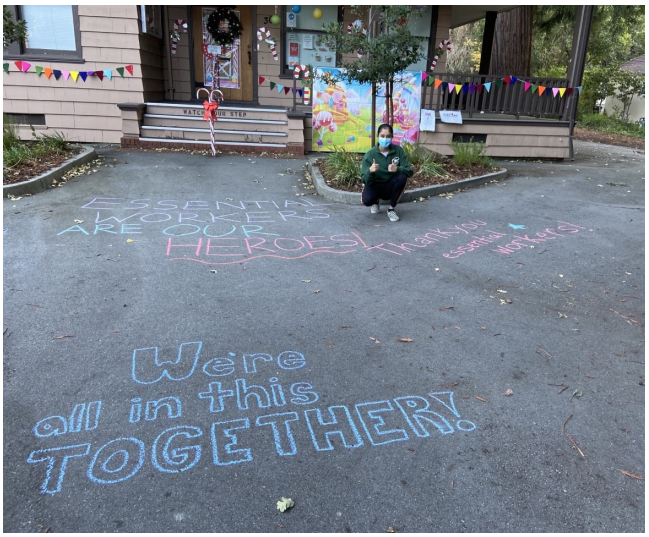
Encourage the preservation of open space in areas of scenic, natural resource, and recreational value, as well as areas that are geologically hazardous or steeply sloped. Assist private landowners in finding ways for them to manage and permanently preserve private open space.

Open Space Areas

- Policy 17. Preserve and maintain existing open space areas.
- Policy 18: Allow the use of open space areas for hiking trails and passive recreation where appropriate. Prohibit off-road motorized vehicles.
- Policy 19: Obtain open space and trail easements in favor of the City of Belmont over privately held open space land when cluster developments are approved.
- Policy 20: Coordinate trails on publicly owned open space with opportunities to expand trails onto large tracts of privately held open space, including a trail connection from Carlmont Drive to Water Dog Lake.

SAN JUAN HILLS AREA PLAN

For over 40 years, the City has recognized the San Juan Hills as a valuable natural feature with stunning views of Belmont and the surrounding area. The City established land use controls in 1988 to protect the natural topography and preserve the open space.



RECREATION TRENDS

COVID-19 PANDEMIC

The COVID-19 pandemic altered public perception of parks and outdoor recreation amenities. Local parks and open spaces offer refuge, respite, and the opportunity to enjoy fresh air and reconnect with nature to improve our physical and mental wellbeing.

Parks and public land saw higher-than-normal usage during the COVID-19 pandemic. Both anecdotal and documented evidence has shown increased use of park and recreation resources throughout the San Francisco Bay Area since the onset of the COVID-19 pandemic. For example, WRA conducted a study in San Mateo County Parks that showed a 40 percent increase in use of Pillar Point Bluff and Quarry Parks from 2019 to 2020. Indeed, in 2020, more Americans reported participating in outdoor recreation than ever before (Outdoor Foundation, 2022). However, the Outdoor Foundation found that as many as 25 percent of participants reported that they were unlikely to continue their activities once pandemic impacts subsided. In fact, National Park Service visitation in 2021 was lower compared to the 3 years preceding the onset of the COVID-19 pandemic (National Park Service, 2022). Therefore, it is possible that Belmont's open space areas experienced a surge in visitor use during 2020, but that use levels have decreased to pre-pandemic levels in 2022.

The increase in usage prompted a review of distribution disparities, accessible and inclusive spaces, and infrastructure maintenance requirements. Public parks and streetscapes enhance a community's quality of life, and as a result, jurisdictions are expanding parks and recreation opportunities in acknowledgment of their highly-visible role in a diverse and healthy urban realm.

Parks and Recreation Support at Twin Pines Park During COVID-19

CURRENT TRENDS

Recreation trends are explored as an evolving response to community desires and prediction of future needs. In order to plan for the future, recreation trends are utilized in conjunction with community input to inform recommendations, prioritize projects, and ultimately used to guide decisions.

Current and potential future recreation uses of the Belmont open space areas were assessed by examining national, statewide, regional surveys of outdoor recreation participation, as well as results from the community survey for the PROS Plan. Nationally, about 50 percent of people participate in outdoor recreation activities (Outdoor Foundation, 2022). According to the 2012 Outdoor Recreation Trends and Futures report, nationally, both how long and how often people spend time outdoors have increased over the previous 15 years (Cordell, 2012). However, the 2012 Survey on Public Opinions and Attitudes on Outdoor Recreation in California, suggested that the amount of time California respondents spend in outdoor recreation activities had remained roughly the same over the previous five years (California State Parks, 2014). This same study found that common activities for respondents were walking, hiking, and picnicking.

California State Parks (2014) also found that over 38 percent of San Francisco Bay Area respondents[1] visited parks at least once a week and about 27 percent used trails at least once a week. San Francisco Bay Area respondents also reported that their time spent at parks was increasing. Additionally, the most common activities reported by San Francisco Bay Area respondents were walking, hiking, and picnicking.

A study of visitors to San Mateo County parks found that respondents most often reported walking/hiking and running while much smaller proportions of visitors reported biking (Roberts et al., 2016). Respondents also indicated that they visit the parks to improve their physical fitness, be with family/friends, connect with nature, improve mental wellbeing, dog walking, and to experience scenic views.

PUBLIC HEALTH + WELL-BEING

Parks and open space are important elements to improve physical and mental health by promoting active living, stress reduction, and healthy lifestyles. Accelerated by the COVID-19 pandemic, and associated isolation due to the closures, parks and open spaces are recognized as an outlet for stress relief as well as an outlet for physical activity and relaxation.

RECONNECTING WITH NATURE

The positive physical and mental health benefits of green space are well-documented, as well as the ill effects of a sedentary lifestyle, excessive screen time, and lack of exploratory, unstructured outdoor play. Public health organizations and parks departments are working to reverse these negative impacts.

General recreation trends indicate that photography and nature-based activities are increasing in popularity, replacing more traditional outdoor activities like fishing and hunting (Cordell, 2012). In addition, the Survey on Public Opinions and Attitudes on Outdoor Recreation in California found latent demand for some activities where respondents reported that they wanted to start participating or participate more in picnicking and camping activities (California State Parks, 2014). Implications for these trends may include a decrease in fishing in Waterdog Lake and an increase in shoreline picnicking.

A CONNECTED COMMUNITY

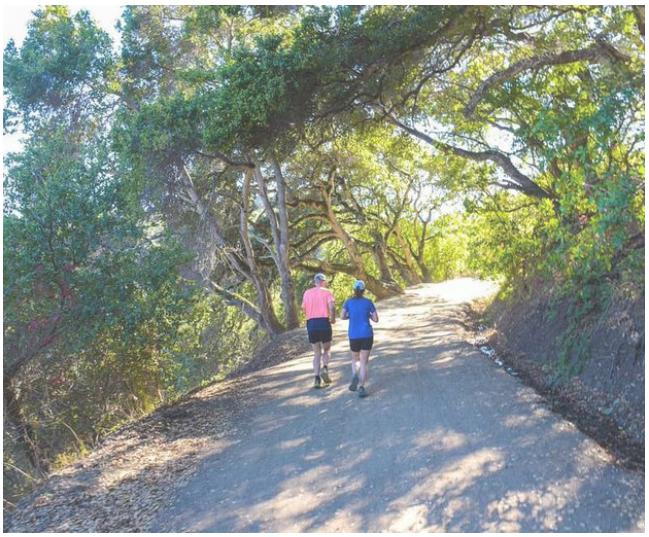
Parks are social spaces for community building activities and interactions. The COVID-19 pandemic temporarily closed places that foster social connections, such as schools and cafes. Parks offer the opportunity for planned and spontaneous social interactions that bolster community cohesion in an outdoor setting.

In addition to social connections, physical connectivity between parks is a priority. Dedicated infrastructure for active transportation modes (such as walking, bicycling, scootering, and skating) boosts community accessibility. Intermodal transportation is increasingly preferred over the private automobile, and the planning of safe and efficient alternative transportation modes to and from public gathering spaces is increasingly important on a local and regional level.

RECLAIMING PUBLIC SPACE

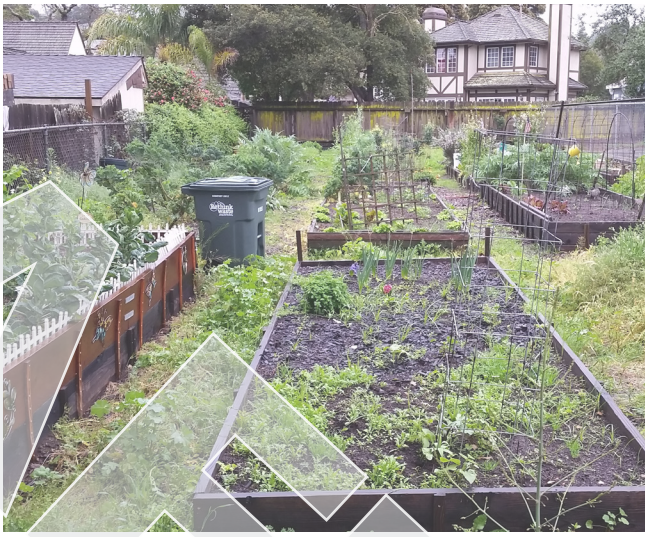
Cities and urban areas have been reallocating public spaces in many ways. These include transitioning of street right-of-way allocation to increase sidewalk widths and incorporate bicycle lanes, adding parklets to expand natural environments in urban environments, and adding outdoor dining experiences, which are even more prevalent in California's moderate climate.

Waterdog Lake Open Space Trail



ACTIVE AGING POPULATION

Approximately 40 percent of the current population is either under 18 or over 65 years old and are actively driving outdoor recreation trends. As the average lifespan increases, our population includes multiple generations of older adults seeking leisure activities or multi-generational park amenities and programs. Older adults are also looking for programs and amenities to stay physically active and socially engaged with their community and younger family members, such as hiking and gardening.



BICYCLES, E-BIKES, + OTHER TRAVEL MODES

In general, cycling participation has been rising in recent years especially in large cities like San Francisco (San Francisco Municipal Transportation Agency, 2022). One likely contributor to cycling participation is the growing use of electric pedal assist bicycles (e-bikes) which have had sales increase nearly 50 percent per year since 2013 (PeopleForBikes, 2017). In addition, e-bike use on trails within parks and protected areas appears to be increasing (PeopleForBikes, 2017). Though mountain biking participation is also increasing nationally (Newcomb, 2020), whether e-bikes are driving this increase is actively being researched (Federal Highway Administration, 2022). According to the 2020 study E-bikes on Public Lands, the majority of e-bike owners who ride on natural surface trails (henceforth: trails) reported owning multiple standard bikes in addition to an e-bike (Perry and Casey, 2020). This finding suggests that existing cyclists are the primary users of e-bikes on trails rather than those who are new to cycling. The implication for this that the number of cyclists on trails may not be increasing dramatically, but rather existing cyclists on trails are switching to e-bikes instead of standard bikes.

Some concerns over the use of e-bikes on trails have been focused on the potential for increased environmental impacts due to e-bikes being heavier, having wider tires, or being able to be ridden further than traditional bikes (Chaney et al., 2019). However, it has been found that e-bikes are essentially equivalent to traditional mountain bikes in terms of trail impact effects (The International Mountain Bicycling Association, 2015). Alternatively, riders of standard mountain bikes

Active Recreation Spaces for All Ages

Community Garden in Belmont

Bikes on Belmont Trails

have historically expressed concerns about visitor conflict and e-bike riders' behavior potentially resulting in getting all bikes banned from trails, but tensions seem to have eased in recent years as general bike restrictions have not come to fruition (Felton, 2015).

In California, e-bikes are not considered motor vehicles and are divided into three classes, where Class 1 e-bikes require pedaling to gain electric assist and have a maximum speed of 20 mph. Class 2 bikes with throttle-controlled motor and Class 3 allow higher speeds, up to 20 mph and 28 mph, respectively. References to e-bikes in this discussion refer solely to Class 1, as agencies that allow e-bikes on trails limit the policy to Class 1. Still, agency policies regulating Class 1 e-bikes on trails vary widely. The National Park Service has adopted the policy that e-bikes are allowed wherever bicycles are allowed (General Provisions; Electric Bicycles, 2020). California State Parks only allows e-bikes on trails in certain park types, i.e. e-bikes are allowed on trails in State Recreation Areas, while e-bikes are not allowed on trails in State Parks (California State Parks, 2021).[2] East Bay Regional Parks District allows e-bikes only on select paved paths (East Bay Regional Parks District, 2019).

More recently, the Midpeninsula Regional Open Space District, which does not allow e-bikes on trails, commissioned a set of studies to investigate visitor perceptions and ecological impacts of e-bikes. A report on these studies was submitted to the Board of Directors in March 2022 and recommended that e-bikes be allowed wherever bikes were allowed (Midpeninsula Regional Open Space District, 2022); on June 29, 2022, the Board of Directors passed e-bike policies that permitted their use only on specific trails in 2 out of 25 of its preserves.

Waterdog Lake Open Space Trail

The use of other electric transportation devices, such as electric skateboards, has the potential to increase usage on trails in open space lands. In fact, major manufacturers of electric skateboards already market some models for trail or "all-terrain" use.[3] Additionally, electric transportation devices can often be categorized as powered mobility devices which are protected under the Americans with Disabilities Act (Department of Justice, 2014).

DIVERSITY, EQUITY, + INCLUSION

Parks serve diverse communities and should offer inclusive spaces that can be enjoyed by all ages, abilities, and cultures. When visitors from different backgrounds enter an environment that allows them to feel comfortable and connected, they tend to engage in more positive, impactful ways. Societal changes in recent years have created an increased demand for inclusivity in public spaces, and as a result, accessibility, sensory experiences, and community support are basic requirements for today's parks.[4]

ENDNOTES

1 Respondents comprised of residents from Alameda, Contra Costa, Marin, Napa, Santa Clara, San Francisco, San Mateo, Solano, and Sonoma counties.

2 E-bikes are allowed on paved roads in California State Parks and generally on paved roads that allow cars.

Diversity, Equity, and Inclusion in Belmont Parks and Recreation

Native California Tree Planting (Quercus agrifolia, Coastal Live Oak)

In response, park and recreation departments play an important role by offering a diverse selection of park amenities and recreation programs that appeal to a broad range of groups. This includes locating new parks and green spaces in historically underserved areas with low park access as well as considering all ability levels and cultures when planning and designing new parks, programs, and facilities.

SUSTAINABILITY + RESILIENCY

Park and recreation agencies have the unique ability to build resilient communities through the incorporation of innovative and sustainable practices in their parks and open spaces. They have the opportunity to mitigate the impact of severe weather and climate change, improve tree canopy coverage across their jurisdiction, and restore flourishing and ecologically-functional habitats.

They also serve as community advocates, educators, and early adopters of new and proven environmental strategies. Following principles of low-impact design, incorporating green stormwater infrastructure, and installing native vegetation are examples of critically important approaches when designing resilient parks in the drought-prone and wildfire-prone environments of California.

Habitat Restoration Underway

The NRPA Sustainability in Parks and Recreation report (2022) identifies that the most common park and recreation agency sustainability actions, which include planting trees, transitioning to native and climate-adaptive vegetation, and updating or retrofitting buildings and other park infrastructure.[5] Belmont's Parks and Recreation Department looks towards the Climate Action Plan (2017), Green Infrastructure Plan (2019), and General Plan (2017) for relevant and impactful sustainability practices, goals, and regulations.

DRAFT

PART 1.
WHERE WE ARE

CHAPTER 3
EXISTING CONDITIONS

The Belmont Parks and Recreation Department oversees 15 developed parks and over 300 acres of open space, as well as playgrounds, athletic fields, community gardens, passive recreation areas, and trails. This chapter evaluates the existing parks, open spaces, and athletic fields to provide a foundation for recommendations and future improvements. The detailed site and condition assessment intends to inventory existing amenities, evaluate current conditions, record recreational uses, document potential accessibility issues, and generally review the overall park and open space environmental health.

OVERVIEW

Belmont's PROS system currently consists of 17 parks (15 developed and 2 undeveloped parks), two open spaces, and four schools under a joint-use agreement (JUA) with Belmont-Redwood Shores School District (BRSSD). The parks and school sites are distributed across Belmont, while the open spaces are located in the western hills (Figure 3-1 and Table 3-1).

The parks range in size, from less than an acre to over 20 acres, and vary in intensity of use. While not directly correlated, smaller parks tend to provide fewer amenities and therefore generate less use intensity. Park Typologies and their associated characteristics are used to organize the PROS sites to create a baseline service level that all parks must provide.

This assessment views the PROS system as a single, connected system. Considering how people arrive to a park via non-motorized transportation methods and the quality of the routes connecting park destinations are important aspects of the overall park visit experience. Additionally, the assessment emphasizes opportunities to enhance the experience in the existing parks, developed and undeveloped, over new parkland development to increase acreage.

Figure 3-1: Belmont Parkland Distribution

PARK, RECREATION, AND OPEN SPACE SITES				
	SITE	TYPOLOGY	SIZE (AC.)	ADDRESS
1	Alexander Park	Neighborhood Park Tier 2	1.3	400 Block of Yorkshire Way

Table 3-1: Belmont Parks, Recreation, and Open Space Sites

** Both Undeveloped Park sites are attributed as Neighborhood Park Tier 2.*

Neighborhood Park Tier 1 (Wakefield Park)

Neighborhood Park Tier 2 (Davey Glen Park)

Neighborhood Park Tier 2 (Alexander Park)

PARK TYPOLOGIES

Every PROS site in Belmont has been categorized as shown in Table 3-2. Each of these categories have intrinsic expectations and identified minimum standards or characteristics that the park type must provide. The previous Parks and Open Space Master Plan (1992) and 2035 General Plan used the categories Mini Park, Neighborhood Park, Community Park, School Park, and Special Facility. This PROS Plan began the assessment exercise with these categories. Through site assessments, community input, and conversation with Parks and Recreation staff, the Park Typologies were refined:

- Neighborhood Park Tier 1
- Neighborhood Park Tier 2
- Community Park
- Undeveloped Park
- School (JUA)
- Open Space

STANDARD BASELINE AMENITIES

Each Park Typology includes a set of Standard Baseline Amenities that the parks must provide at a minimum. The quantity of Standard Baseline Amenities compound as the use intensity increases, while also becoming more complex. These amenities are described in detail later in this chapter and defined in the Appendix.

ACCESS RADIUS

The Park Typology defines the Access Radius, or the value used to delineate an area around a park considered easily reachable, based on the anticipated methods to travel to the site. These areas are also delineated to prioritize connections for active transportation networks, as reflected in the Comprehensive Pedestrian and Bicycle Plan.

A small Access Radius is tied to a lower intended intensity of use. As the park use intensity increases, the Access Radius increases. Community Parks have the highest quantity of amenities, use intensity, and arrival modes so their Access Radius spans the entire city. The Access Radius definition was revised from the 1992 Parks and Open Space Master Plan.

	TIER 1 NEIGHBORHOOD PARK	TIER 2 NEIGHBORHOOD PARK *	COMMUNITY PARK
Character	Nature and Neighborhood Social Space	Nature. Group Gathering, and Play	Nature, Community Gathering, Recreation and Play
Uses + Users	Passive Individuals to Small groups	Passive + Active Individuals to Medium groups	Passive + Active Individual to Large Groups
	INCREASING PARK SIZE, AMENITY DENSITY, AND USE INTENSITY		
Standard Baseline Amenities	1. Natural Environment 2. Seating 3. Identifiable Amenity	1. Natural Environment 2. Seating 3. Play Amenity 4. Picnic Opportunity 5. Multi-Purpose Flexible Space 6. Recreation Amenity	1. Natural Environment 2. Seating 3. Play Amenity, Inclusive+All-Abilities 4. Picnic Opportunity 5. Multi-Purpose Flexible Space 6. Recreation Amenity 7. Off-Street Parking 8. Permanent Restroom 9. Multi-Use Athletic Field or Community Facility
Size	No Size Requirements Typically less than 1 acre	No Size Requirements Over 2 acres should provide off-street parking	No Size Requirements
Transport Modes	Walking Biking	Walking Biking Some Driving	Walking Biking Driving
Access Radius	¼ mile	½ mile	Entire City
Previous Planning	Mini Park	Neighborhood Park	Community Park Special Facility

Table 3-2: Park Typologies

** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2..*

Note: School (JUA) and Open Space Park Typologies do not have attributes such as Standard Baseline Amenities.

In the PROS Plan, the Access Radius approach is used to identify areas of Belmont where residents are outside of an existing buffer area and are therefore underserved. This not only identifies neighborhoods with low access to parks, but also heightens awareness for opportunities to increase parkland in underserved and under-accessible areas in Belmont.

NEIGHBORHOOD PARK (TIER 1)

A Neighborhood Park Tier 1 supports interaction with nature and acts as a neighborhood gathering space. It is the quintessential pocket of natural green space in a neighborhood, the hub of unplanned social interactions, and a peaceful place to talk or play.

These parks have the lowest use intensity, meaning the few existing amenities at the site are expected to be used by only a handful of people at a single time. These small parks have the lowest anticipated draw for users across the city and are expected to be reached mostly by walking or bicycling.

There are three Standard Baseline Amenities associated with a Tier 1 Park. The park provides access to a natural environment with a variety of plantings (trees, shrubs, ground cover) and seating. The site must provide at least one other Identifiable Amenity, such as a play area or small lending library. All amenities should be accessible by a paved route in good condition.

There is no minimum or maximum size for a Tier 1 Park, although they tend to be one acre or less. The Access Radius is one quarter (¼) mile. Visitors are expected to arrive by walking or biking.

NEIGHBORHOOD PARK (TIER 2)

A Neighborhood Park Tier 2 supports connection to nature, social gathering of small groups, and recreation and play activities.

A Tier 2 Park includes more amenities and uses than a Tier 1 Park, but it still oriented towards a single visitor or smaller groups of less than 20 people. As such, there are at least two amenities—play and recreation—designed for use by multiple and diverse visitors at a single time, as well as amenities that support small group gatherings such as picnics.

A Tier 2 Park provides, at minimum, the three Standard Baseline Amenities required for a Tier 1 Park and three additional amenities. The Identifiable Amenity required in a Tier 1 Park is a Play Amenity for Tier 2 Parks. The three additional Standard Baseline Amenities for a Tier 2 Park are Picnic Opportunity, Multi-Purpose Flexible Space, and Recreation Amenity. While not a requirement, some Tier 2 Parks currently offer permanent or portable restroom facilities.

There is no minimum or maximum size for a Tier 2 Park. The Access Radius is one half (½) mile. A majority of users are expected to arrive by walking or biking. As a more amenitized park, visitors arriving by car is anticipated. Neighborhood Parks (of either tier) over 2 acres in size should provide off-street parking.

COMMUNITY PARK

Community Parks are notable parks that offer spaces for large group gatherings, amenities that support dozens of users simultaneously, and the characteristics of a public community space. Community Parks are heavily used and therefore have high use intensities, generating the most visitors as a result of the amenities and recreational programming opportunities.

A Community Park provides, at minimum, the six Standard Baseline Amenities required for a Tier 2 Park and three more (Off-street Parking, a Permanent Restroom, and an Athletic Field or Community Facility). The Play Amenity at Community Parks should offer Inclusive+All-Abilities Play.

There is no minimum or maximum size for a Community Park. For the purposes of this PROS Plan, this Park Typology has an Access Radius area that spans the entire city. Visitors are expected to arrive by walking, biking, and driving.

UNDEVELOPED PARK

Undeveloped Parks are sites owned by the City that currently have limited or no park improvements. These areas are slated for development into amenitized parks within the PROS system. For the purposes of the PROS Plan, the two Undeveloped Parks are planned as Neighborhood Parks Tier 2. This designation sets the foundation to assess existing conditions within the Park Typologies framework.

SCHOOL (JOINT USE AGREEMENT)

The City entered into JUA with BRSSD for the right to use recreational spaces in exchange for a maintenance commitment by the City. School (JUA) sites typically provide an athletic field for public use outside of school hours. Organized recreational activities such as soccer, baseball, and softball are programmed at these sites. In prior planning documents, these parks were categorized as "School Parks."

There are no Standard Baseline Amenities for School (JUA) sites because the City does not own the sites. Visitors expected to arrive by walking, biking, and driving. The Access Radius is one half (½) mile.

OPEN SPACE

Open Spaces are minimally improved or undeveloped natural areas open to the public for various recreational activities. Open Spaces offer hiking, bicycling, running, dog walking, and passive enjoyment of nature. There is no minimum or maximum size or Standard Baseline Amenities for Open Spaces. For the purposes of this PROS Plan, this Park Typology has an Access Radius area that spans the entire city.

PARKLAND BY NEIGHBORHOOD

NEIGHBORHOOD	PARK	SCHOOL	OPEN SPACE
Carlmont	3.0		
Central	1.3	3.4	
Chula Vista	4.5

Skymont	1.3		
Sterling Downs	1.3	6.5	
Sunnyslope	21.1		
Western Hills	5.1	7.4	282.5
CITY TOTAL	**68.1**	**23.4**	**317.5**

Source: Parks and Recreation Department, 2035 General Plan

Table 3-3: Parkland by Neighborhood

PARKLAND DISTRIBUTION

The parkland in Belmont is well distributed across the City and throughout the many neighborhoods (Figure 3-2). All but one neighborhood (Plateau) has at least one developed or undeveloped park.

Belmont provides 3.5 acres of parkland for every 1,000 residents. As shown in Table 3-3, there are two neighborhoods that far exceed the City's cumulative parkland acreage per 1,000 residents (Sunnyslope and East Belmont). They provide over 10 acres of parkland per 1,000 residents. There are over 25 acres of parkland in these neighborhoods for approximately 2,470 people, which is the most parkland and the fewest residents of any census tract in Belmont.

As an almost completely built-out city—only 8 percent of land is identified as vacant in the General Plan—opportunities to increase the quantity of parkland are limited. Undeveloped parcels are scarce and transitioning a developed parcel can be cost prohibitive. Belmont must prioritize the improvement of the experience in existing PROS sites over increasing park acreage due to various constraints.

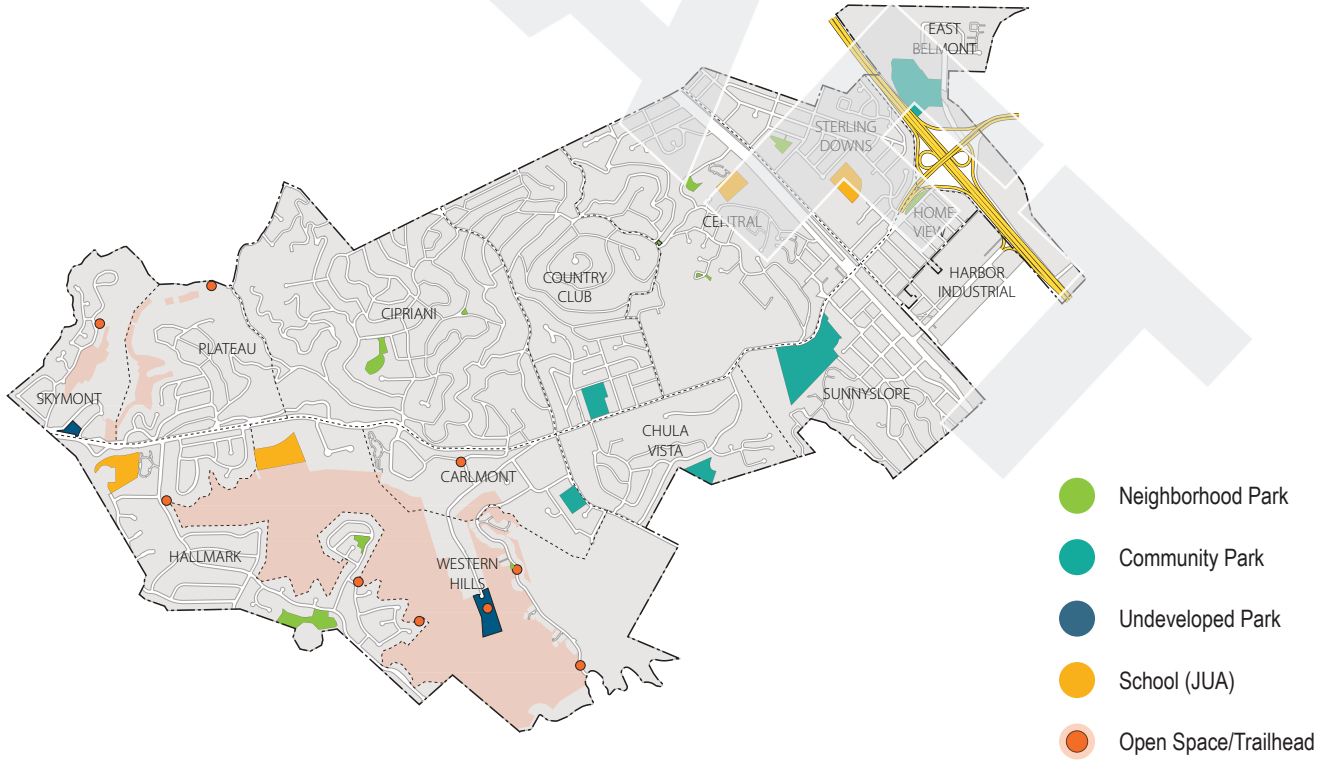

Figure 3-2: Parkland Distribution in Belmont Neighborhoods

ACCESS + CONNECTIONS

While all neighborhoods have parkland or open space, the entire neighborhood may not be within a 10-minute walk, typically considered as one half (½) mile. The Access Radius approach identifies areas around a PROS site that are considered accessible transit-wise, and highlight portions of the City where parks are not as easily reachable. The Access Radius for each Park Typology, shown in Figure 3-3, is dependent on the intended use intensity and anticipated modes of arrival. The Access Radius for Undeveloped Parks is based on the Park Typology it will become, and both Undeveloped Parks identified in the PROS Plan are considered Neighborhood Parks Tier 2. Neighborhoods with low access to existing park amenities are:

- Plateau
- Cipriani
- Country Club

These neighborhoods are considered under-served, and improvements to increase access to the existing PROS sites is paramount.

Overall, Belmont provides a high level of access to parks, with almost 90 percent of the population living within a 10-minute (½-mile) walk of a park. The national average for the percent of population that lives within a 10-minute walk of a park is 55 percent, based on data compiled by the Trust for Public Land. Belmont well surpasses this average.

Due to the limited availability of land to create more PROS sites, creating connections to support access to and between existing parks is key. In the Belmont Comprehensive Pedestrian and Bicycle Plan, parks are identified as destinations prioritized for pedestrian and bicycle infrastructure improvements. Creating safe and enjoyable connections between parks reduces access barriers and mitigates pedestrian-vehicle conflicts. The City's improvements on Ralston Avenue and collaboration with the Safe Routes to School program align with reducing conflict and increasing connections between parks for non-motorized transport.

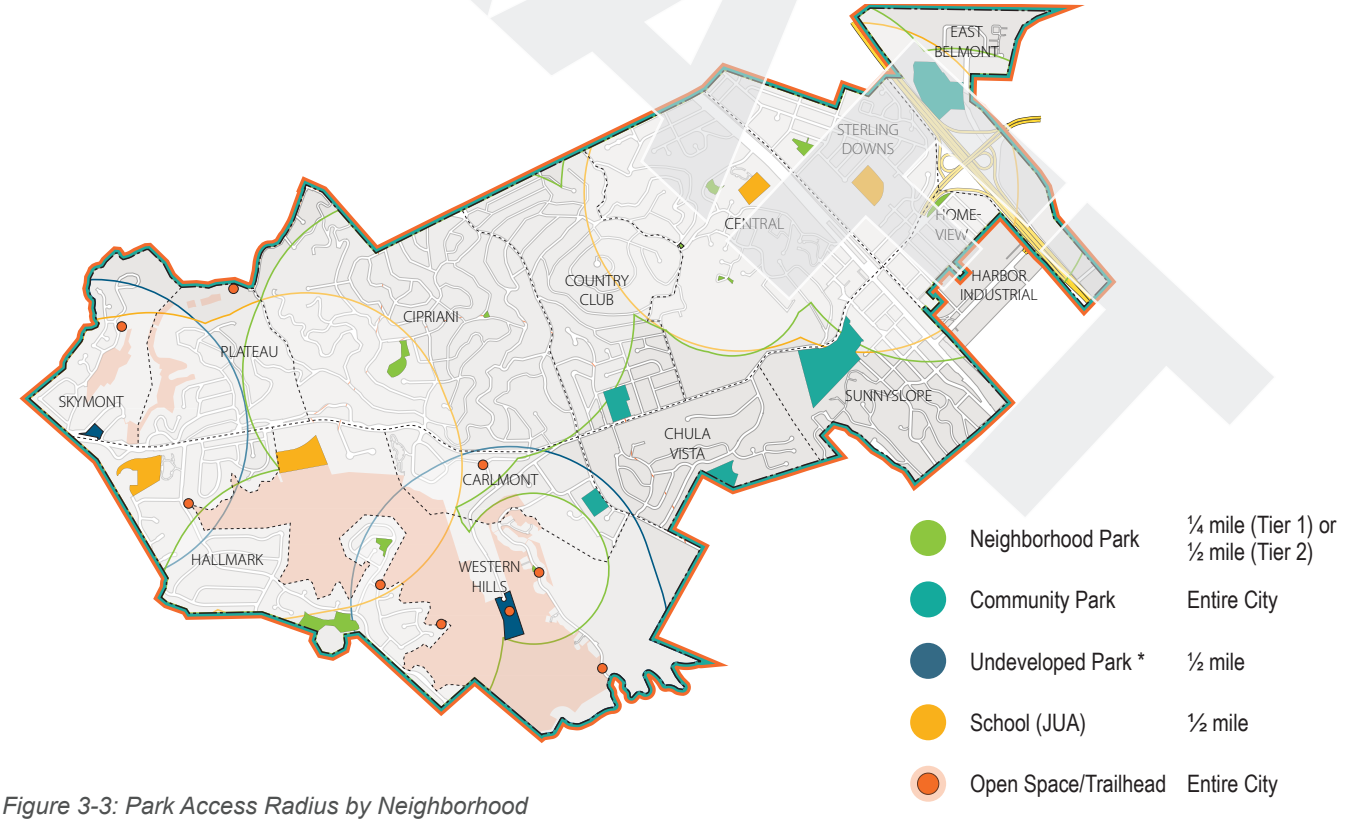

Figure 3-3: Park Access Radius by Neighborhood

** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

AMENITIES

This plan used a standardized list of amenities to inventory existing offerings within the PROS system and evaluate their condition. Athletic fields at School (JUA) sites are included in the inventory. There are four categories of Amenities: Standard Baseline, Benchmarked, Priority, and Secondary. Full definitions of the amenities are included in the Appendix.

STANDARD BASELINE AMENITIES

Shown in Figure 3-4 are the Standard Baseline Amenities for each Park Typology that clearly define the amenities a park must provide to meet the minimum requirements. The quantity of Standard Baseline Amenities required compound as the use intensity increases, while also becoming more complex.

NEIGHBORHOOD PARK (TIER 1)

The simplest park in Belmont, a Neighborhood Park Tier 1, has the fewest Standard Baseline Amenities. A Tier 1 Park must provide a natural environment with seating and an Identifiable Amenity.

NEIGHBORHOOD PARK (TIER 2)

A Neighborhood Park Tier 2 includes all Standard Baseline Amenities encompassed by a Tier 1 Park, replacing an Identifiable Amenity with a Play Amenity. Additionally, a Tier 2 Park must provide a Picnic Opportunity, Multi-Purpose Flexible Space, and a Recreation Amenity. Since both Undeveloped Parks are planned as Tier 2 Parks, they also have this attribute.

COMMUNITY PARK

A Community Park provides the most amenities for the public. A Community Park provides all amenities of a Tier 2 Park, as well as Off-Street Parking, Permanent Restroom, and either a Multi-Use Athletic Field or Community Facility. Playgrounds should be designed to offer Inclusive+All-Abilities Play.

Figure 3-4: Standard Baseline Amenities

** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

Note: School (JUA) and Open Space Park Typologies do not have Standard Baseline Amenities.

Playground at Davey Glen Park

Community Garden at Barrett Community Center

Reservable Picnic Area at Twin Pines Park

BENCHMARKED AMENITIES

Benchmarked Amenities are elements typically provided by a park and recreation system. The Benchmarked Amenities are:

- All-Abilities Playground
- Basketball Court (Full and Half)
- Multi-Use Athletic Field
- Play Element and Playground
- Reservable Picnic Area (Small and Large)

The quantity of Belmont's Benchmarked Amenities have been counted to generate a level of service amenity ratio. Comparisons of benchmarked amenity quantities and level of service Standard Amenity Ratios for comparable cities and at the national, regional, and state-wide level are discussed in Chapter 5.

PRIORITY AMENITIES

Priority Amenities were highly ranked in the community input survey or were a topic of importance in feedback discussions. These are amenities also considered common in California public parks that are either limited or nonexistent in Belmont. The Priority Amenities are:

- Community Garden
- Dog Park
- Dog Parklet
- Pump Track (Bike Park)
- Skate Park
- Water Play (Pool and Spray Element)

SECONDARY AMENITIES

These are amenities not identified as Standard Baseline, Benchmarked, or Priority, but in existence currently or identified through community input as potential amenities to provide in Belmont's PROS system. The Secondary Amenities are:

- Fitness Equipment Cluster
- Handball / Wallball Court
- Horseshoe Pit / Bocce Ball Court
- Outdoor Classroom
- Performance Space
- Teen Outdoor Space

PARK AMENITY INVENTORY			
BENCHMARKED AMENITY	TOTAL *	PARK	SCHOOL
All-Abilities Playground	**0**	0	0
Basketball Court (Full)	**13**	0	12
Basketball Court (Half)	**6**	4	2

Teen Outdoor Space	**1**	1	0

** Quantities do not include any amenities at Open Spaces*

Table 3-4: Park Amenity Inventory (2021)

AMENITY INVENTORY

The Amenity Inventory evaluates current conditions and accessibility of amenities to determine overall park health. Each amenity is identified with a green callout.

Table 3-4 provides a tally of the final inventory. The full Amenity Inventory matrix, identifying amenities at each park site, is included in the Appendix.

STANDARD BASELINE AMENITIES

Standard Baseline Amenities for the Park Typologies were catalogued. A ✓ means that amenity exists on the site. A ✘ means that amenity does not exist on the site.

NEIGHBORHOOD PARK (TIER 1)

Natural Environment

Seating

Identifiable Amenity

NEIGHBORHOOD PARK (TIER 2)

Tier 1 Requirements

Play Amenity

Picnic Opportunity

Multi-Purpose Flexible Space

Recreation Amenity

COMMUNITY PARK

Tier 2 Requirements

Off-Street Parking

Restroom, Permanent

Athletic Field or Community Facility

AMENITY CONDITION

Every park amenity was evaluated and assigned a condition rating of good, fair, or poor.

- **GOOD:** Features and facilities are functioning as intended with minimal wear/damage. No immediate action beyond preventative maintenance is required.
- **FAIR:** Features and facilities are showing some signs of wear/damage. Function and service is minimally impacted, and preventative maintenance is recommended.
- **POOR:** Features and facilities are damaged or worn to the point where basic functionality or user safety is compromised. Immediate replacement is recommended.

DRAFT

ALEXANDER PARK

400 Block of Yorkshire Way

Neighborhood Park Tier 2

1.3 acres

PARK OVERVIEW

Alexander Park is a high-use park tucked within a residential neighborhood. The park's entrance is off Yorkshire Way through a narrow access path between houses. The entrance is framed by a wooden trellis at the street that establishes the park within the surrounding neighborhood. A concrete walking path circles a majority of the main lawn area and leads to a picnic area. There are two play structures, two tennis courts, a half basketball court, a handball court, and two horseshoe pits. A new permanent restroom was constructed in 2017.

ALEXANDER PARK

EXISTING CONDITIONS

ACCESSIBILITY

- No accessible benches.
- Paved areas and paths need to be evaluated.

AMENITY

- Wood benches are in fair condition.
- BBQ is in poor condition.
- Restroom is new and in good condition.
- Horseshoe pits are underutilized and in poor condition.
- Tennis courts were resurfaced in 2022.

LANDSCAPE

- Entrance planting is in good condition. Some planting areas are bare.
- Lawn is in fair condition.
- Trees around perimeter of site are in fair condition.
- Pear trees near playground require trimming.
- Ivy needs removal by picnic areas.
- Large oak needs removal.

NEIGHBORHOOD PARK TIER 2

- ✓ Tier 1 Requirements
- ✓ Play Amenity
- ✓ Picnic Opportunity
- ✓ Multi-Purpose Flexible Space
- ✓ Recreation Amenity

1. Picnic and Horseshoe Area
2. Restroom, Permanent
3. Planting Area
4. Basketball Court (Half)
5. Playground
6. Tennis Courts
7. Multi-Use Lawn

BARRETT COMMUNITY CENTER

1835 Belburn Drive

Community Park

5.1 acres

PARK OVERVIEW

Barrett Community Center is a repurposed school building that offers classes, programs, and activities such as dance and preschool. The site includes a large athletic field, full basketball court, a playground, outdoor fitness equipment, a community garden, and a baseball field. In 2020, a conceptual design was developed that includes a new community center building, pool, increased on-site parking, a dedicated dog park area, and relocated and improved athletic fields.

CONTEXT MAP
Source: Google Earth, 2020

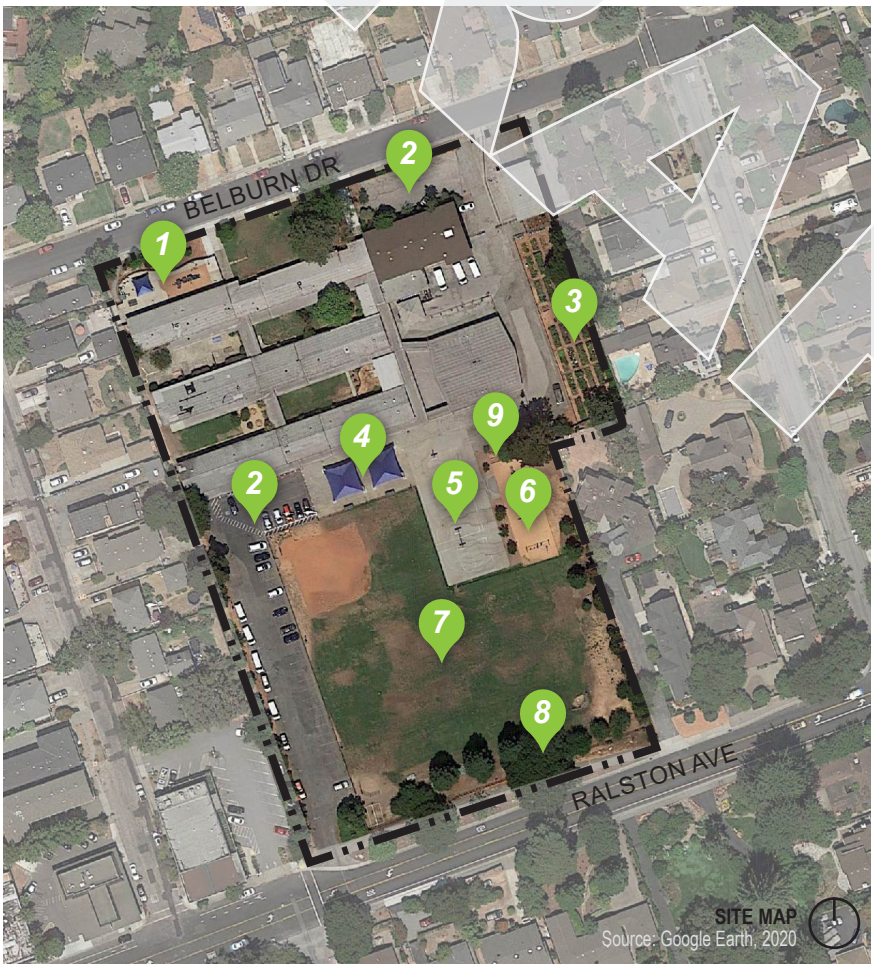
DRAFT

BARRETT COMMUNITY CENTER

EXISTING CONDITIONS

ACCESSIBILITY

- Most areas are accessible.
- Some ADA-accessible parking is available.



AMENITY

- Shade structure is in good condition.
- Picnic tables are in poor condition in lawn area.
- Outdoor fitness equipment in good condition.
- Playground in fair condition (not Inclusive + All-Abilities).
- Community garden space appears well maintained.

LANDSCAPE

- Turf is in fair condition with some drainage concerns.
- Trees around perimeter of site are in fair condition.
- Trees around playground are in good condition.
- Ivy near entrance needs remediation.
- Entrance planting is sparse.

COMMUNITY PARK

- ✓ Tier 2 Requirements
- ✓ Off-Street Parking
- ✓ Restroom, Permanent
- ✓ Athletic Field or Community Facility

1. Day Care Facility
2. Parking / Drop-Off
3. Community Garden
4. Shade Structure / Picnic Tables
5. Basketball Court (Full)
6. Playground
7. Multi-Use Athletic Field
8. Redwood Trees
9. Fitness Equipment

BELAMEDA PARK

1110 Alameda de las Pulgas

Community Park

3 acres

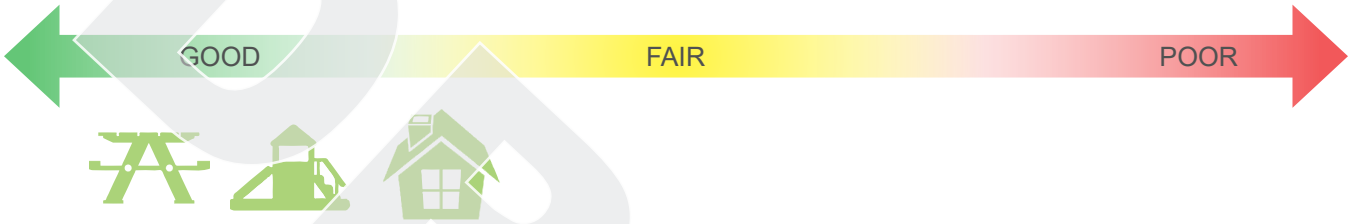
PARK OVERVIEW

Belameda Park is adjacent to Belmont Library. Large, old-growth oak trees line the paths, which create a sense of arrival to the park and the library. There is setback and protected from the roadway with slight elevation and a retaining wall. The playground was completed in 2008 and is in good condition. Picnic tables are in good condition. The rear of the site is multi-family residential structures, with a small access path to Village Drive. There is ADA access to tables and walking paths. There is a bus stop on Ralston Avenue adjacent to the park entrance. There are areas that present opportunities for further development.

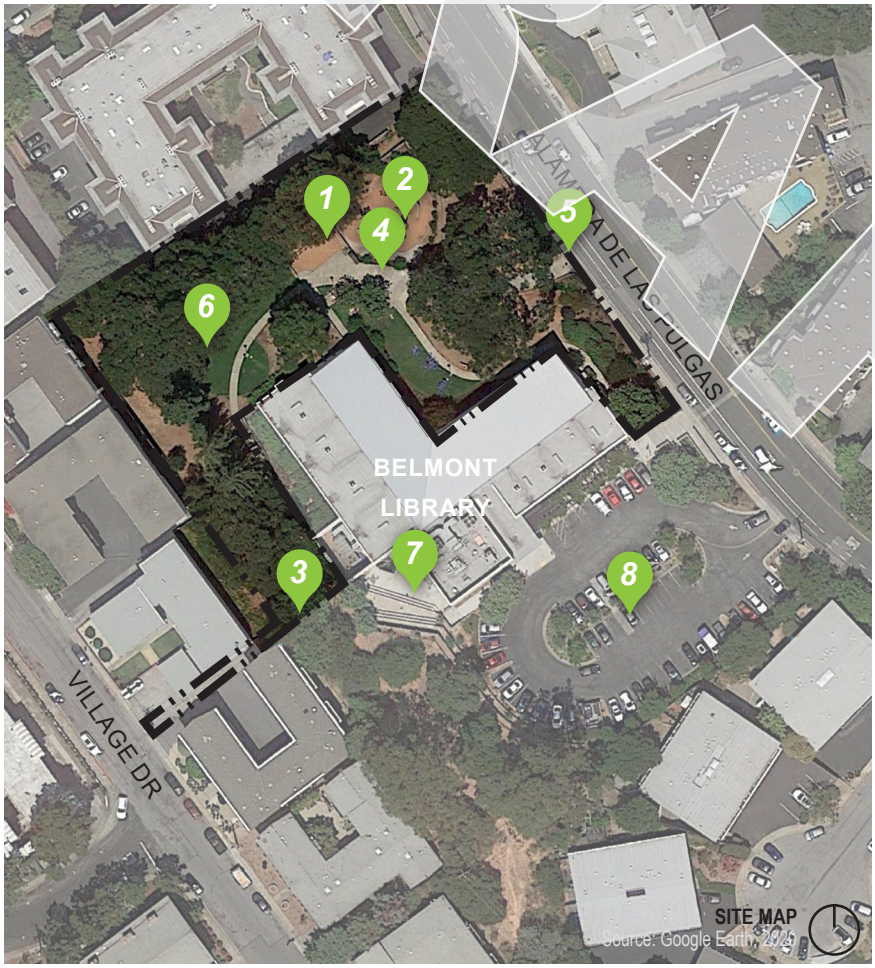
BELAMEDA PARK

EXISTING CONDITIONS

ACCESSIBILITY



- Site has accessible walkways and table.
- Playground has accessible entrance and some ground-level play.
- Concrete path is in good condition.



AMENITY

- Tables are in good condition
- Playground is in good condition (not Inclusive + All-Abilities).
- Swings are in good condition.

LANDSCAPE

- Mature trees appear in good condition, no hardscape crowding.
- Turf is in good condition.
- Entrance planting is sparse.
- Playground planting is sparse.

COMMUNITY PARK

- ✓ Tier 2 Requirements
- ✓ Off-Street Parking
- ✓ Restroom, Permanent
- ✓ Athletic Field or Community Facility

1. Play Element (Swing Set)
2. Playground
3. Walking Path (connects to Village Drive)
4. Picnic Tables
5. Bus Stop
6. Multi-Use Lawn
7. Library Amphitheater Space
8. Off-Street Parking

BELMONT SPORTS COMPLEX

550 Island Parkway

Community Park

11 acres

PARK OVERVIEW

The Belmont Sports Complex consists of three multi-use athletic fields. Baseball, softball, and soccer are the primary activities that occur at the site. The North Field was recently renovated with synthetic turf, a new backstop, new foul ball fencing, and new home-run fencing. The Marina and South Fields need new turf and some hardscape elements look problematic. There is a fenced playground, a picnic area with a BBQ area, and stored soccer nets north of the North Field. Adjacent to the picnic and playground is an open marsh area. The site was previously a landfill. There is a Conference Center that can be rented for events.

BELMONT SPORTS COMPLEX

EXISTING CONDITIONS

ACCESSIBILITY

- New field has ADA-accessible bleachers.
- Path is accessible.
- Picnic area is accessible.
- Concrete walkway from parking lot is accessible.
- Near Bay Trail connection and bicycle bridge connection.

AMENITY

- New PA system is needed.
- Hardscape is problematic.
- Foot bridge wood planks are in poor condition.
- Bleachers are in good condition (North Field) and poor condition (Marina and South Fields).
- Restroom needs renovation.
- Picnic area needs renovation.
- BBQ is in poor condition.

LANDSCAPE

- North Field is in great condition.
- Adjacent fields are in fair condition.
- Landscape near picnic area is empty and needs separation from marsh area.
- Trees near empty lot are in good condition, needs planting near tables.

COMMUNITY PARK

- ✓ Tier 2 Requirements
- ✓ Off-Street Parking
- ✓ Restroom, Permanent
- ✓ Athletic Field or Community Facility

1. Playground
2. Picnic Area
3. Concession Stand / Restroom
4. Multi-Use Athletic Field
5. Synthetic Turf
6. Conference Center
7. Parking Lot
8. Bay Trail Connection
9. Pedestrian Bridge
10. Drop-Off Area

CIPRIANI PARK

2525 Buena Vista Avenue

Neighborhood Park Tier 2

6 acres

PARK OVERVIEW

Cipriani Park is immediately adjacent to Cipriani Elementary School, but the site does not have a JUA. Cipriani Park provides the only dedicated dog park in Belmont. There is a multi-use athletic field, playground, and picnic area. The dog park is reachable from either the school parking lot or from the Buena Vista Drive park entrance. The dog park is a dirt lot with a chain link fence, a small shade structure, and a fenced small dog area. There is a playground located near the street, with a picnic area shaded by large trees. The site has low accessibility, steep terrain, and poor walking paths.

CIPRIANI PARK

EXISTING CONDITIONS

ACCESSIBILITY

- No ADA access to the dog park.
- Entrance from school parking lot is informal.
- Walk from park is not accessible given the slopes and problematic pavement.

AMENITY

- Small dog park area has a low level of wood chips.
- Playground is in fair condition.
- Shade structure is in fair condition
- Benches, tables, and fountain within dog areas are in fair condition.
- Fences are in fair condition.

LANDSCAPE

- Dog park users complain about the area getting too muddy.
- Park has limited planting.
- Mature trees near picnic areas appear in good to fair condition.

NEIGHBORHOOD PARK TIER 2

- ✓ Tier 1 Requirements
- ✓ Play Amenity
- ✓ Picnic Opportunity
- ✓ Multi-Purpose Flexible Space
- ✓ Recreation Amenity

1. Playground
2. Picnic Area
3. Multi-Use Athletic Field
4. Small Dog Park
5. Large Dog Park

COLLEGE VIEW PARK

1 College View Way

Neighborhood Park Tier 1

0.1 acres

PARK OVERVIEW

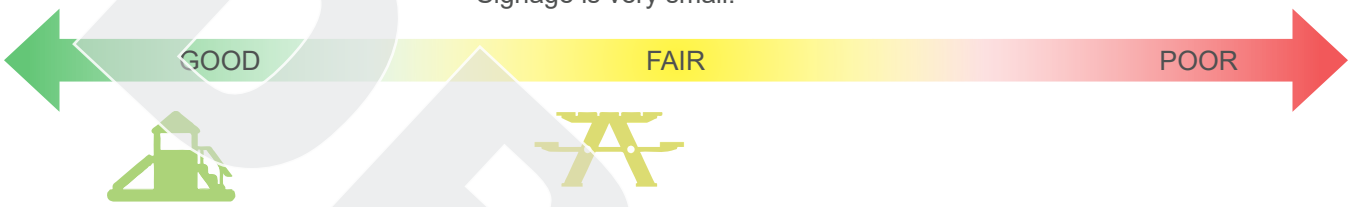
College View Park is a small park nestled within a residential area. The park sits adjacent to the Notre Dame de Namur University campus, which is reachable through a pedestrian gate behind the playground. The park contains a playground suitable for 5 to 12 year olds and a small picnic area. Site irrigation is battery operated. The central area is used by the community as a small gathering space. The central lawn supports various activities

CONTEXT MAP
Source: Google Earth, 2020

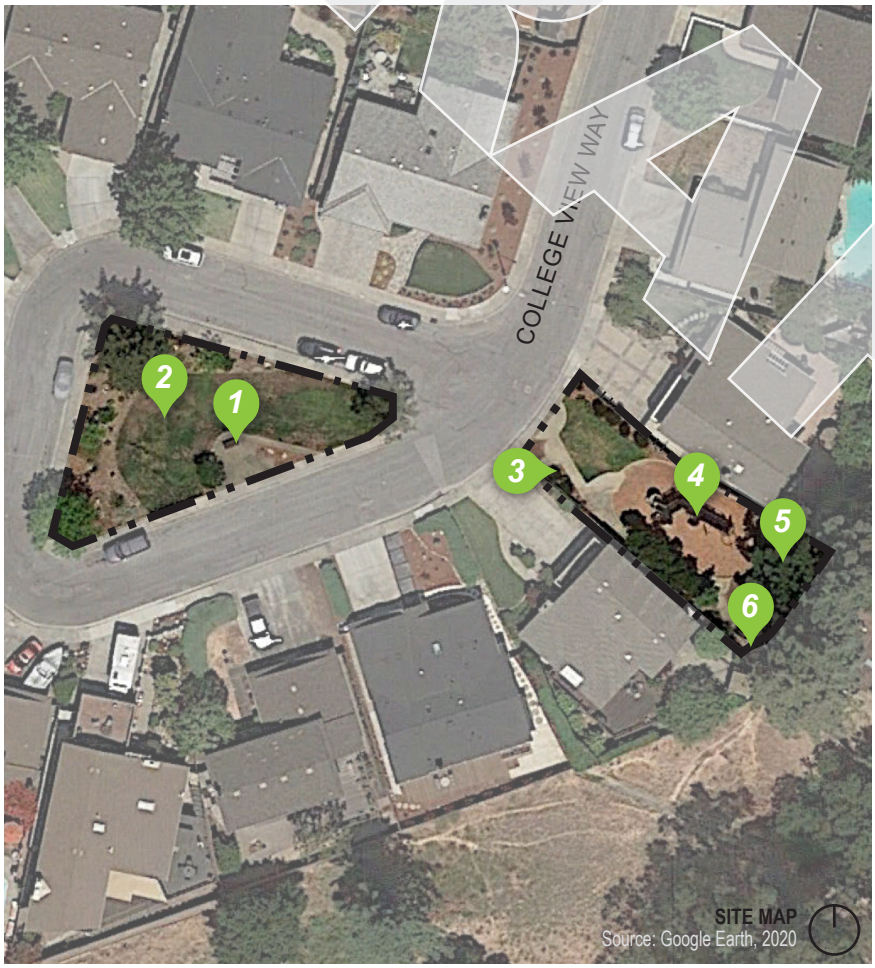
COLLEGE VIEW PARK

EXISTING CONDITIONS

ACCESSIBILITY



- Park is accessible with walkways that appear compliant.
- Central space has problematic hardscape.



AMENITY

- Playground is in good condition.
- Playground wood chips levels are low.
- Bench is in poor condition.
- Fence line is in fair condition.
- Picnic area is not established, tables are in fair condition.
- Benches in central area are in poor condition.
- Signage is very small.

LANDSCAPE

- Lawns are in fair condition.
- Large redwoods are in a neighboring yard.
- Planting areas have disorganized spacing.
- Trees appear to be in fair condition.
- Area by picnic tables is bare without planting.

NEIGHBORHOOD PARK TIER 1

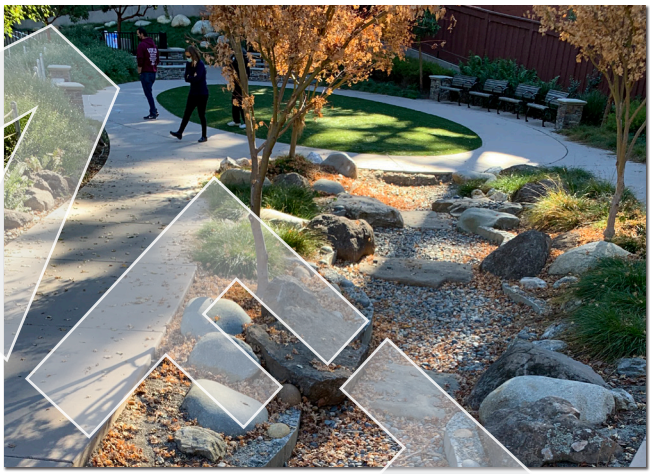
- ✓ Natural Environment
- ✓ Seating
- ✓ Identifiable Amenity

1. Bench
2. Multi-Use Lawn
3. Drinking Fountain
4. Playground
5. Picnic Area
6. Access to Notre Dame de Namur University

DAVEY GLEN PARK

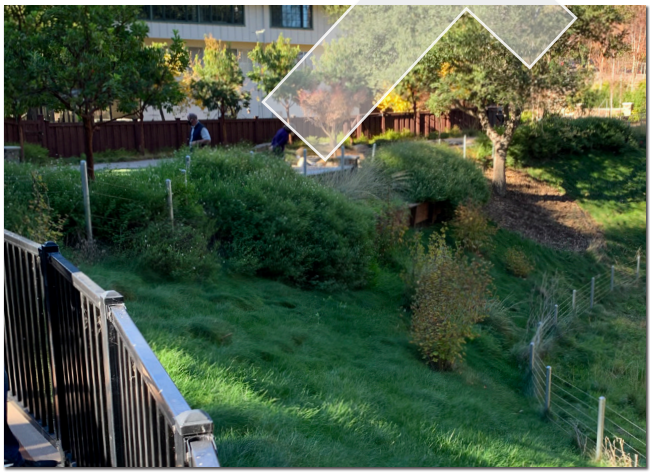
500 Davey Glen Road

Neighborhood Park Tier 2

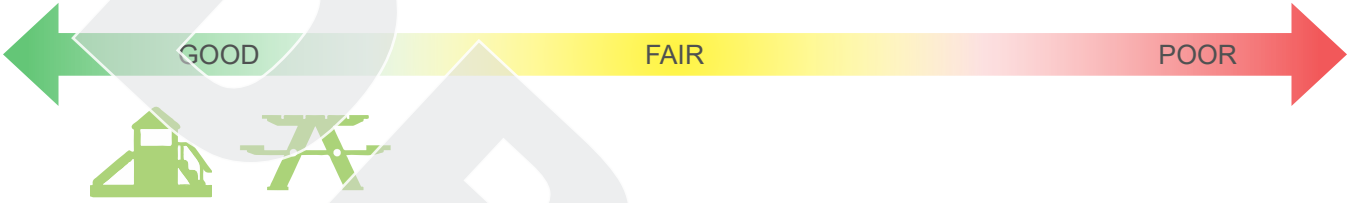


1.1 acres

PARK OVERVIEW



Davey Glen Park is a fully accessible park on a hillside surrounded by a eucalyptus grove. The park sits slightly lower than the adjacent road. There are stairs and an ADA-accessible ramp into the park. The park contains a rain garden and beautiful Marina Strawberry trees line the fence separating adjacent homes. The park provides a synthetic turf area, accessible picnic tables, benches, and an intricate play structure with rubber fall zones. The hillside is planted with a no-mow grass species and decorative boulders for visual interest.



DAVEY GLEN PARK

EXISTING CONDITIONS

ACCESSIBILITY
- Park is accessible.
- Picnic tables are accessible.

AMENITY
- Playground is in great condition.
- Picnic tables have some graffiti.
- Signage is in good condition.
- Concrete is in good condition.
- Benches are in good condition.
- Synthetic turf is in good condition.

LANDSCAPE
- Plantings are thriving and appear to be in good condition.
- Trees appear healthy.
- No-mow grass on hillside provides a visual appeal.

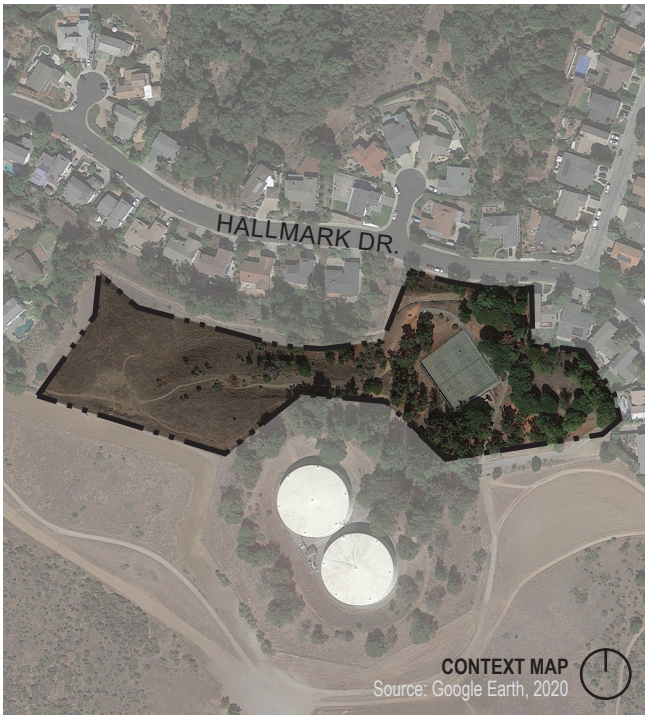
HALLMARK PARK

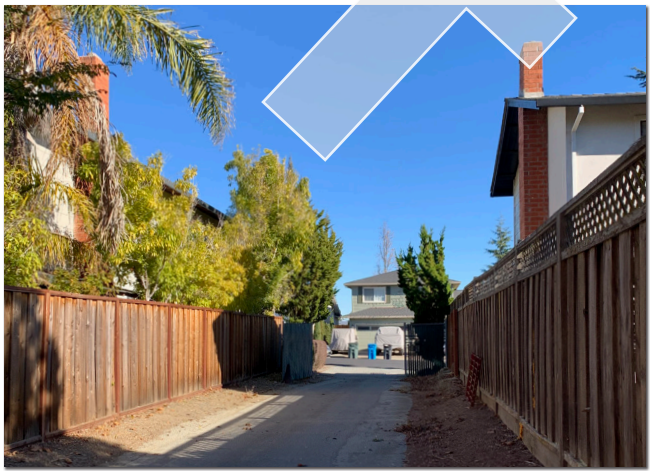


2599 Hallmark Drive

Neighborhood Park Tier 2

5.2 acres

PARK OVERVIEW



Hallmark Park has a residential community to the north and open space to the south. The land to the south belongs to the water district land and has a cross country course. The park include two tennis courts, a small playground, picnic tables, and some benches. There is an access road for the San Francisco Public Utilities Commission (SFPUC) that park visitors can pass through. Large growth pines are prevalent on site. The site is only partially developed, with the western half of the site untouched. Access is limited due to terrain and condition of paths.

DRAFT

HALLMARK PARK

EXISTING CONDITIONS

ACCESSIBILITY

- Path slope near entrance appears problematic.
- Uprooting is causing problems for the asphalt and tennis courts.

AMENITY

- Tennis courts were resurfaced in 2022.
- Benches are in fair condition.
- Playground is in fair condition.
- Picnic tables are in fair condition.

LANDSCAPE

- Trees are uprooting the hardscape and tennis court areas.
- Large areas are not planted.

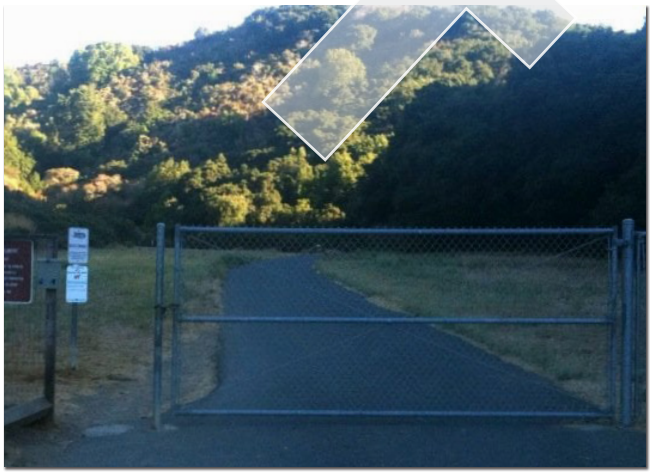
HIDDEN CANYON PARK

End of Carlmont Drive

Undeveloped

4.8 acres

PARK OVERVIEW

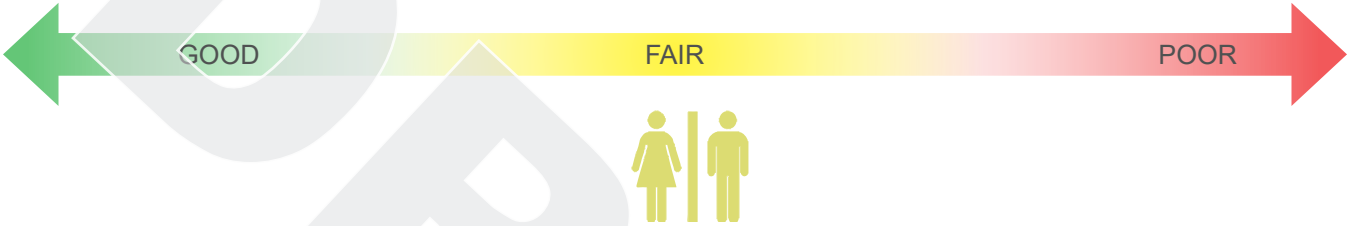


Hidden Canyon Park is an area that provides a connection to the various multi-use trails within Waterdog Lake Open Space. Near the entrance of the park is a large rectangular space with a single paved road that leads back to various trailheads. There is a gravel parking lot. Street parking is somewhat limited due to the location of the park at the terminus of a neighborhood street.

HIDDEN CANYON PARK

EXISTING CONDITIONS

ACCESSIBILITY



- Park is accessible from gravel parking lot.
- Paved linear strip is within the park area.

AMENITY

- Paved road is in good condition.
- Fence line is in good condition.
- Parking gravel levels are low in some locations.
- Parking stops are in fair condition.
- Bench is in fair condition.

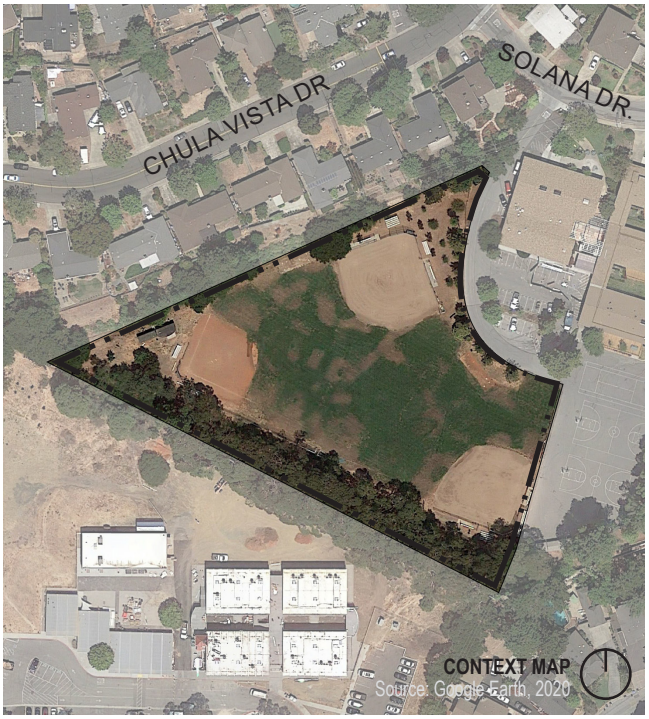
MCDOUGAL PARK



1405 Solana Drive

Community Park

4.5 acres

PARK OVERVIEW

McDougal Park is adjacent to the Charles Armstrong School (private school). The City grants the school limited use of the park. Amenities consist of three multi-use fields and a picnic area. The park has limited street parking and no off-street parking. The park is adjacent to residential homes to the north and the school to the east. A line of eucalyptus trees visually screen another adjacent school to the south. There are two shipping containers utilized as storage and a concession stand during games located away from the bulk of the park behind a backstop. There are portable restrooms on site.

MCDOUGAL PARK

EXISTING CONDITIONS

ACCESSIBILITY

- Park is not accessible.
- ADA-accessible seating and walkways are needed

AMENITY

- Infield creep is occurring.
- Portable restroom is in fair condition.
- Storage containers are in poor condition.
- Picnic tables are in poor condition.
- Benches are in poor condition.
- Fencing for diamonds is in fair condition.

LANDSCAPE

TWIN PINES PARK

30 Twin Pines Lane

Community Park

21.1 acres

PARK OVERVIEW

Twin Pines Park is a central and important park within Belmont and home to the Parks and Recreation Department. The park is bisected by Belmont Creek and include a large grove of eucalyptus trees with various programmed areas. The park contains playgrounds, nature play areas, group picnic areas with BBQs, horseshoe pits, rentable recreation buildings, and trail connections. There is a lawn used for community events. Creek exploration is attractive for children and various groups use the trail connections as recreational space. A Master Plan for the park was completed in 2019.

CONTEXT MAP
Source: Google Earth, 2020

TWIN PINES PARK

EXISTING CONDITIONS

ACCESSIBILITY

- Parking is located near playground.
- Redwood picnic area has an accessible pathway.
- Restroom pathway is not paved.

AMENITY

- Playgrounds are in good to fair condition (not Inclusive + All-Abilities).
- Tables are in fair to poor condition.
- Restroom by parking lot is in fair condition.
- Drinking fountains are in poor to fair condition.
- BBQs are in poor to fair condition.
- Picnic areas are in fair condition.

LANDSCAPE

- Entrance area, creek, and picnic areas lack planting.
- New tree plantings appear to be in good condition.
- Eucalyptus logs sit in open space.
- Trails are not delineated on the south side.
- Creek erosion needs addressing.
- Creek access needs improvement.
- Eucalyptus trees should be assessed.

OPEN SPACE ASSESSMENTS

In spring 2022, WRA Environmental Consultants evaluated Belmont's open spaces. The study includes an Environmental Assessment and a Recreation Use Assessment. WRA was specifically engaged for this due to their science-based process and professional expertise. This study was conducted to inform and support the development of the PROS Plan. Given the trail damage that occurred as a result of storms taking place in 2023, stewardship of Belmont's open spaces remains a priority to the City and its residents.

The Environmental Assessment collected data regarding sensitive biological communities, special-status species, and trail conditions. The Recreation Use Assessment uses various measurement techniques to collect data regarding recreation use and trends. Both site visits and desktop research were used to compile the information and findings provided in the Open Space Management Plan (OSMP). The OSMP, found in the Appendix, is supplemented by data tables, a discussion of the regulatory background and methodology, and the overall conclusions of both assessments.

ENVIRONMENTAL ASSESSMENT

INTRODUCTION

The Environmental Assessment reviewed the existing conditions of the biological resources, recreation, and wildfire hazards at Waterdog Lake (WDL) and San Juan Canyon (SJC). It assessed both areas for the presence of sensitive biological communities, special-status plant species, and special-status wildlife species. It also assessed the potential for the site to support special-status species and assessed the baseline quality of habitats near trails. This enables the City to track and evaluate any changes in habitat quality to implement management actions accordingly.

WDL is approximately 293 acres and features trails which meander through chaparral, oak woodland, and riparian habitats; a viewshed of the San Francisco Bay; and Waterdog Lake at its center. SJC is approximately 82 acres, located approximately three quarters (¾) of a mile west of WDL across from Ralston Avenue. WDL and SJC feature similar habitats and both sites are generally surrounded by single-family residential land use. Figure 3-5 depicts both open spaces, their trail networks, and residential surroundings.

THIS PAGE INTENTIONALLY LEFT BLANK

DRAFT

ENVIRONMENTAL FINDINGS

WILDLIFE AND PLANT SPECIES

In WDL and SJC, 7 special-status wildlife species have moderate to high potential to occur (Table 3-5), while 13 special-status plant species are present or have moderate to high potential to occur (Table 3-6). Plant species observed are mostly native with the exception of developed portions of the site, non-native annual grasslands, and eucalyptus groves. Over 90 percent of the study area consists of native biological communities with both non-sensitive and sensitive communities present (Table 3-7). Invasive species were observed, generally limited to patches of less than 50 square feet, representing a small portion of the overall area.

The overall habitat quality in both open spaces was determined to be high to moderate, with the areas adjacent to trails and residential development generally being of moderate quality. Areas with limited anthropogenic influence (set back from residential uses and major trails) contain high quality habitats. Figures 3-6 and 3-7 show the location of biological communities in WDL and SJC, respectively.

WILDLIFE	
POTENTIAL	SPECIES
Moderate or higher potential to occur	• Western (Pacific) pond turtle (Actinemys marmorata), CDFW Species of Special Concern • Olive-sided flycatcher (Contopus cooperi), CDFW Species of Special Concern • White tailed kite (Elanus leucurus), CDFW Fully Protected Species • San Francisco (saltmarsh) common yellowthroat (Geothlypis trichas sinuosa), CDFW Species of Special Concern • Hoary bat (Lasiurus cinereus), WBWG Medium • San Francisco dusky-footed woodrat (Neotoma fuscipes annectens), CDFW Species of Special Concern • American badger (Taxidea taxus), CDFW Species of Special Concern
Unlikely to occur	• California red-legged frog (Rana draytonii). Federal Threatened, CDFW Species of Special Concern

Table 3-5: Wildlife Likelihood to Occur in Study Area

Waterdog Lake Open Space Trail

PLANTS	
POTENTIAL	SPECIES
Present	• Franciscan onion (Allium peninsulare var. franciscanum), CRPR 1B.2. • San Francisco collinsia (Collinsia multicolor), CRPR 1B.2. • Western leatherwood (Dirca occidentalis), CRPR 1B.2. • Arcuate bush-mallow (Malacothamnus arcuatus), CRPR 1B.2. • Woodland woolythreads (Monolopia gracilens), CRPR 1B.2. • Chaparral ragwort (Senecio aphanactis), CRPR 2B.2.
High potential to occur	• San Mateo woolly sunflower (Eriophyllum latilobum), FE, SE, CRPR 1B.1.
Moderate potential to occur	• Bent-flowered fiddleneck (Amsinckia lunaris), CRPR 1B.2. • Pink star-tulip (Calochortus comosa), CRPR 4.2. • California bottle-brush grass (Elymus californicus), CRPR 4.3. • Harlequin lotus (Hosackia gracilis), CRPR 4.2. • Bristly leptosiphon (Leptosiphon acicularis), CRPR 4.2. • Choris's popcornflower (Plagiobothrys chorisianus var. chorisianus), CRPR 1B.2.

4 Determination based on the List of California Sensitive Natural Communities (CDFW 2021)

Table 3-7: Biological Communities within the Study Area

WILDFIRE

Table 3-8 shows the fire hazard ratings for fuel vegetation types as determined by the East Bay Regional Park District (EBRPD). The majority (approximately 147 acres) of vegetation in the WDL area is coastal live oak, which has a low hazard rating and ignition potential, since it is associated with Oak-Bay woodland. This also applies to the SJC, with the majority of vegetation there mapped as coastal live oak. However, based on the San Mateo County Hazard Mitigation Plan, the California Department of Forestry and Fire Protection has rated Belmont's open spaces as having very high wildfire hazards for WDL and high wildfire hazards for SJC. These hazard ratings are based on multiple factors including vegetation type and density, topography, weather, potential fire behavior, and potential for damage to human life and structures.

Both WDL and SJC have steeply sloped, vegetated areas adjacent to residential areas. Fires that start on slopes tend to travel uphill. The area west of Hastings Drive is classified as chamise which is associated with the North Coastal Scrub-Xeric vegetation type and has an extreme fuel hazard rating. Based on aerial photograph review, there is a buffer of grass or no vegetation between much of the housing west of Hastings Drive and the chamise vegetation.

Figures 3-8 and 3-9 depict areas that were treated for wildfire fuel reduction by the City between 2019 and 2021.

FIRE HAZARD RATING FOR FUEL VEGETATION TYPES

VEGETATION TYPE	HAZARD RATING	IGNITION POTENTIAL[1]
Grasslands + Herbaceous Vegetation		
Coastal Prairie	Moderate	2
Serpentine Bunchgrass Grasslands	Low	2
California Annual Grasslands	Moderate	1
Ruderal Vegetation	Moderate	3
Scrub Vegetation		
Maritime Chaparral (Manzanita-Chinquapin)	Extreme	6
North Coastal Scrub-Xeric	Extreme	4
North Coastal Scrub-Mesic	High	8
Coyote Brush Scrub	High	4
Non-native Scrub	High	6
Woodlands + Forest Plantations		
Mature Eucalyptus Forest	High	1
Young Eucalyptus Forest	High	2
Mature Monterey Pine Forest	Moderate to High	2
Young Monterey Pine Forest	High	2
Oak-Bay Woodland	Low	6-8
Redwood Forest	Low	8
Riparian Woodland	Low	8

Source: Wildfire Hazard Reduction and Resource Management Plan, EBRPD, 2010

1 Ignition potential was ranked 1 to 10, where the highest potential is represented by a "1" and the lowest potential is ranked by a "10."

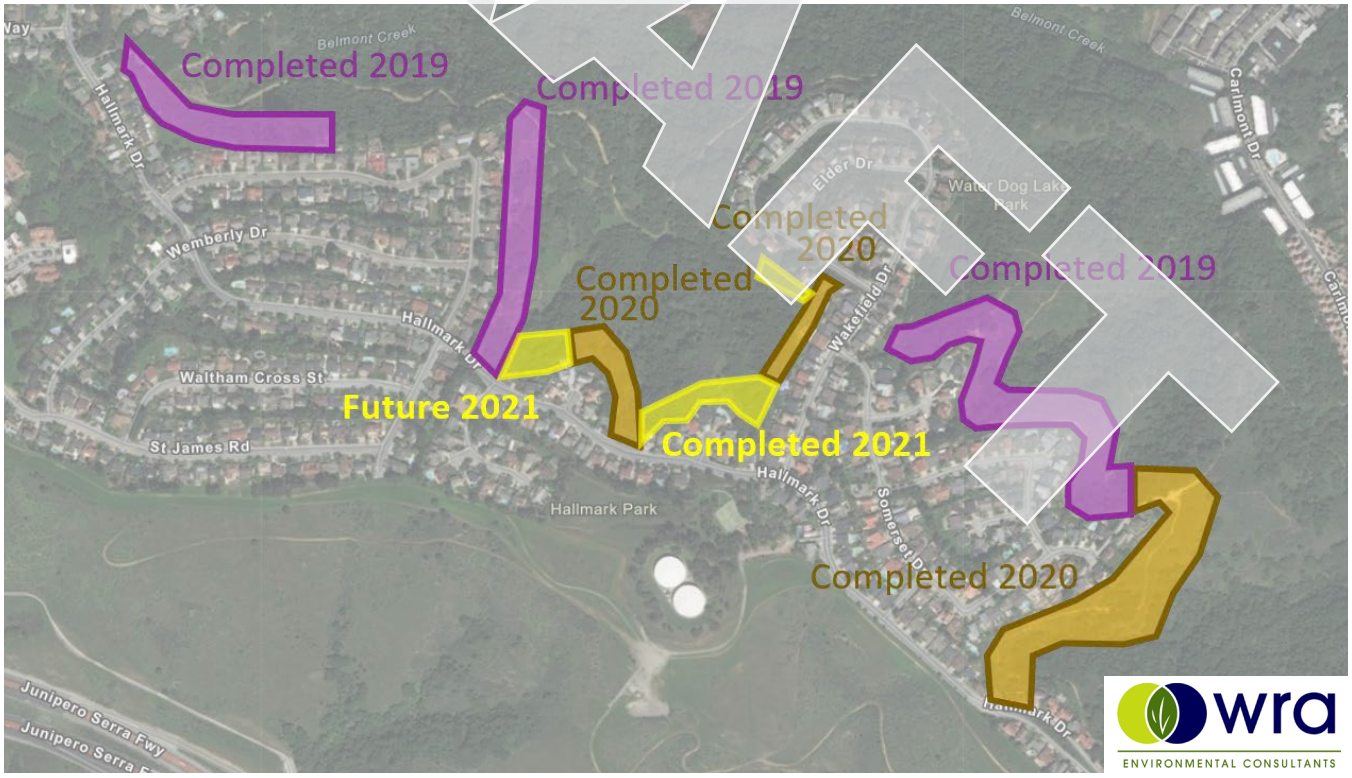

Figure 3-9: Wildfire Fuel Reduction Areas near Hallmark Drive

TRAIL EROSION

WRA documented trail conditions for approximately 13 miles of trails during March and April 2022. The purpose of the evaluation was to generally characterize environmental conditions in the trail network, which were used to develop recommendations presented later in this document. This effort was not a comprehensive inventory. The qualitative review of trail conditions on both mapped trails (those shown by City maps) and previously unmapped trails (those which are not shown on City maps, and are not permitted for public use) was based on the level of erosion and vegetation impacts observed.

Trail erosion categories include high, medium, and low erosion; these categories are defined in Table 3-9, along with a representative photo of the category. Point data were collected along the trail feature which are shown in Figure 3-110 and Figure 3-101. In addition, WRA noted stream crossing locations and determined if adjacent vegetation shows signs of impacts (trampling and/or what appears to be obvious/illegal vegetation trimming). Approximately 50 stream crossings were identified along existing trails with varied crossing mechanisms, such as a free-span wooden footbridge, a plank placed across the stream, or stepping stones that may pose risks to the riparian habitat below.

TRAIL CONDITIONS

EROSION CATEGORY		SAMPLE IMAGE
HIGH	There are more than two deep ruts located along the length of the trail, and there are several observations that it significantly interferes with pedestrian and cycling activities where it causes trail users to create additional pathways to avoid this erosion feature. For this category, evidence of trail user impacts resulting from the erosion feature includes more than one of the following: trail widening, braided trails, unsanctioned trails, soil compaction, and vegetation trampling.	
MEDIUM	There are one or two noticeable ruts forming along the length of the trail, and there are some observations that it significantly interferes with pedestrian and cycling activities. For this category, evidence of trail user impacts resulting from the erosion feature includes one of the following: trail widening, braided trails, unsanctioned trails, soil compaction, and vegetation trampling.	
LOW	There is a shallow rill forming along the length of the trail, but there are no observations that it significantly interferes with pedestrian and cycling activities. There is no evidence of trail users negatively impacting adjacent vegetation to avoid this erosion feature.	

Table 3-9: Trail Conditions

Note: Sample images above were taken within Belmont's open spaces.

DRAFT

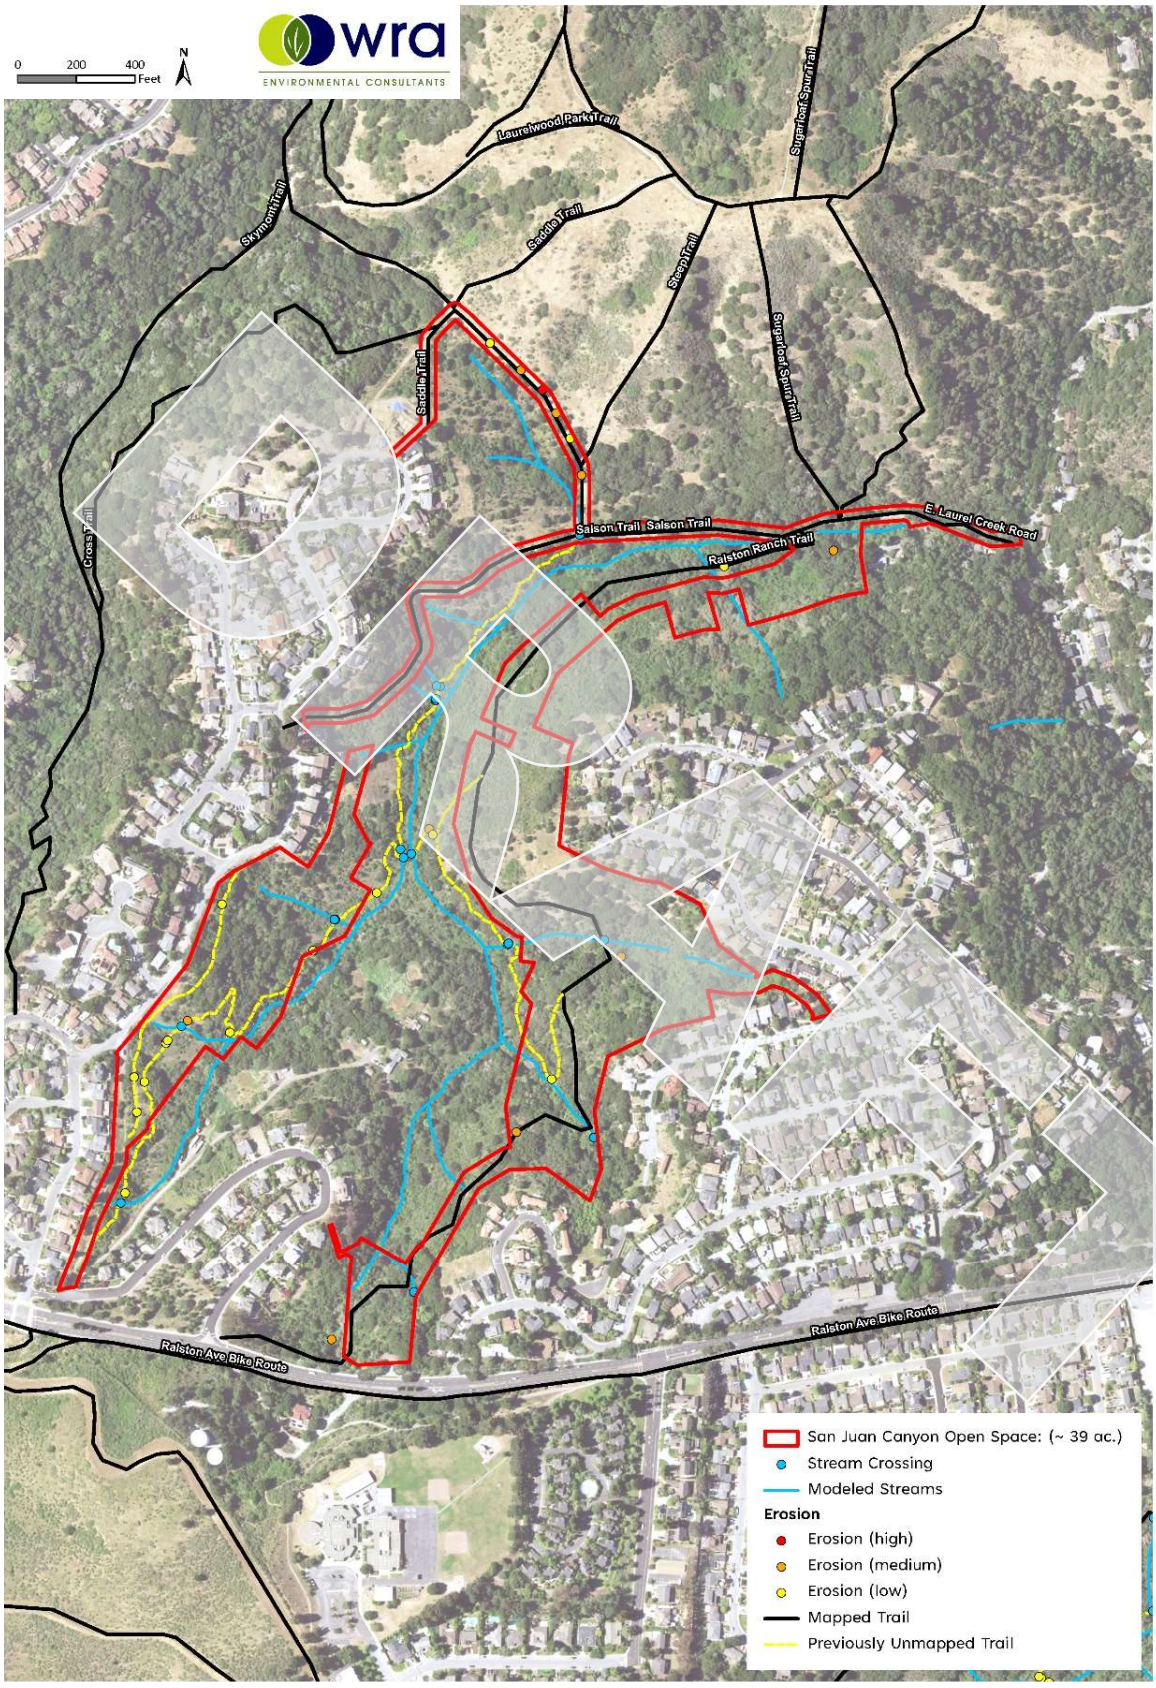

Figure 3-11: San Juan Canyon Open Space Trail Assessment

THIS PAGE INTENTIONALLY LEFT BLANK

DRAFT

The trails have a relatively small footprint, representing approximately 5 acres or 1.3 percent of the total open space acreage. Most trail erosion locations were found in the larger WDL area, and among those locations, the majority were assessed as exhibiting a low level of erosion. The number of locations assessed as having high erosion were about 1 in 10, or 8 to 11 percent for WDL and 0 to 8 percent for SJC.

These results demonstrate that the trail systems are in relatively good condition overall, but that there are specific locations of high erosion that should be addressed immediately.

Table 3-10 summarizes the trail erosion instances.

TRAIL EROSION INSTANCES

TYPE	LOW	MED	HIGH	TOTAL
WATERDOG LAKE				
Mapped	127 *(56%)*	77 *(34%)*	25 *(11%)*	229
Unmapped	59 *(83%)*	7 *(10%)*	6 *(8%)*	71
SAN JUAN CANYON				
Mapped	5 *(38%)*	7 *(54%)*	1 *(8%)*	13
Unmapped	11 *(85%)*	2 *(15%)*	0 *(0%)*	13

Table 3-10: Trail Erosion Instances

Note: Public access is not permitted on unmapped trails.

Recreational Use of Waterdog Lake Open Space Trails

RECREATION USE ASSESSMENT

INTRODUCTION

Recreation use is typically categorized as follows: who the visitors are, what activities they do, where they go, and how many visits a site receives. Measuring recreation use can provide monthly, seasonal, and annual data for visitation, but also can be used for funding requests, facility and open space planning, utility capacity estimates, and future management actions. Understanding the visitors and their perceptions can help the City meet visitor preferences for open space recreation. Table 3-11 provides a summary of methods available to evaluate recreation use. The Recreation Use Assessment also reviewed current and potential future open space recreation trends to identify best practices for trail usage, layout, and maintenance within the City of Belmont. The OSMP in the Appendix contains an in-depth overview of data collection methodologies that were chosen for this study.

RECREATION USE FINDINGS

TRAIL USAGE

The activities occurring on trails in both open spaces seem to be consistent, allowing hiking, dogs on leash, and biking. These types of activities are generally referred to as passive, which makes the recreation use occurring in both areas consistent with existing policy on all parcels. The Environmental Assessment found that wildlife habitats in WDL and SJC are in good condition, further suggesting that the current trail usage and trail density are not having undue negative impacts.

TRAIL DENSITY

Trail density is calculated by the total miles of trail over the acreage of the open space. Table 3-122 and 3-13 show the total trail mileage and trail density, respectively, for both mapped and previously unmapped trails.

SUMMARY OF VISITOR SURVEY AND COUNT METHODS

METHOD	WHO VISITORS ARE / VISITOR PERCEPTIONS	WHAT ACTIVITIES VISITORS DO	WHERE VISITORS GO	NUMBER OF VISITS
On-site visitor survey *Pros:* gather lots of information at once for people actively using the area *Cons:* time and resource intensive, only a snapshot in time	X	X	X	X
Online visitor survey *Pros:* gather lots of information at once, assess latent demand and reasons for not using open space areas, or decreased open space use *Cons:* Not all potential respondents have internet access, more difficult to control the sample of respondents selected to survey	X	X	X	X
Visitor counts from on-site observer *Pros:* easily collect digital data *Cons:* time and resource intensive		X	X	X
Visitor counts from remote motion-activated camera *Pros:* remote data collection *Cons:* time intensive or expensive data analysis		X	X	X
Visitor counts from automated counters *Pros:* remote data collection *Cons:* more types of data are more expensive		X	X	X
Visitor counts from cellphone location data *Pros:* data is voluntarily collected and preexisting *Cons:* unknown data reliability and potentially expensive			X	X

Table 3-11: Summary of Visitor Survey and Count Methods

MILES OF TRAILS IN BELMONT OPEN SPACES			
	TRAIL MILES		
TYPE	WATERDOG LAKE	SAN JUAN CANYON	TOTAL
Mapped	8.57 *(81%)*	1.04 *(45%)*	9.61 *(75%)*
Previously Unmapped	1.96 *(19%)*	1.26 *(55%)*	3.22 *(25%)*
All	10.53 *(100%)*	2.3 *(100%)*	12.83 *(100%)*

Table 3-12: Miles of Trails in Belmont Open Spaces

TRAIL DENSITY (TRAIL MILES PER ACRE)		
TYPE	WATERDOG LAKE	SAN JUAN CANYON
Mapped	0.03	0.01
Mapped + Previously Unmapped	0.04	0.03

Table 3-13: Trail Density in Belmont Open Spaces

COMPARABLE TRAIL DENSITIES (TRAIL MILES PER ACRE)		
	TOTAL SIZE (ACRES)	TRAIL DENSITY
Laurelwood/Sugarloaf Open Space	225	0.02
Big Canyon + Easton Parks	74	0.05

Table 3-14: Comparable Trail Densities

WDL and SJC have trail systems that are similar in density when compared to nearby open space areas (Table 3-14).

WDL (293 acres) has a trail density of about 0.03 miles per acre for mapped trails. Comparable to WDL in area, the Laurelwood/Sugarloaf Open Space (225 acres) in San Mateo has a trail density of 0.02 miles per acre. The Laurelwood Park and Sugarloaf Mountain Open Space Management Plan Amendment (2015) found a number of existing trails which are not mapped and not utilized in the trail density calculation (City of San Mateo Parks and Recreation, 2015). When WDL's previously unmapped trails are included, the trail density increases to 0.04 miles per acre.

SJC (81 acres) has a trail density of 0.01 miles per acre for mapped trails. When unmapped trails are included, the density increases to 0.03 miles per acre. Similar in size to SJC are Big Canyon and Eaton Parks (74 acres combined) in San Carlos, where the combined trail density is 0.05 miles per acre. The 2012 San Carlos Hillside Trails Plan also indicated that well established, unmapped trails existed (City of San Carlos, 2012). These unmapped trails would further increase the trail density in Big Canyon and Eaton Parks. These San Carlos parks allow hiking and dogs on leash, but do not allow bikes.

CHAPTER 4
COMMUNITY INPUT

Community engagement is the first step in identifying "Where We Want To Be." Community input was foundational to the PROS Plan and instrumental in the creation of the recommendations herein.

A majority of community feedback was collected virtually due to restriction in place for the COVID-19 pandemic. Almost 5,000 instances of engagement were recorded from participants for the PROS Plan, providing significant guidance for Belmont's PROS system over the next 15 years.

Table 4-1: Community Engagement Opportunities

OVERVIEW

Beginning in Spring 2021, community outreach efforts were conducted in a hybrid manner, utilizing virtual platforms and in person participation opportunities to hear from the Belmont community. Table 4-1 and Table 4-2 summarize the engagement opportunities and presentations that were held for the PROS Plan.

OUTREACH METHODS

Approximately 5,000 instances of engagement were recorded from participants for the PROS Plan. Respondents shared preferences, priorities, and identified gaps for improvement in the PROS system. The PROS engagement efforts employed a wide range of materials and formats to maximize project awareness and community participation. Methods included the creation of an Advisory Committee, an online survey, in-person and virtual focus groups, community pop-up events, neighborhood meetings, a comprehensive social media campaign, and public presentations. Throughout the duration of the PROS planning process, a dedicated project website and email address were available for the public to learn more about the PROS Plan, stay up-to-date on the project process, and share their thoughts with the project team.

ADVISORY COMMITTEE

The PROS Advisory Committee was formed at the outset of the project to provide insights, support outreach, and advise the PROS Plan.

- **Insights:** Represent a diverse perspective of interests and ideas
- **Outreach:** Gather feedback and serve as community liaison to Master Plan team
- **Advise:** Review and provide input on the Master Plan process

The Advisory Committee is a group of engaged community members, with representatives from City commissions and Belmont residents with different backgrounds and interests. Brief bios for all Advisory Committee members are included in the Appendix.

The Advisory Committee members are:

- Rui Bao
- Lynn Bell
- David Braunstein
- Nelson Corteway
- Dan Deguara
- Ulla Foehr
- Karen Haas-Foletta
- Sanaa Kapur
- Eli Latimerlo
- Austin Lee
- Craig Michaels
- Caroline Pyrz
- Sergio Raddavero
- Abby Sanders
- Scott Sisemore
- Bob Stahl
- Dean Wilson
- Susan Wright

PARKS + RECREATION COMMISSION

The Parks and Recreation Commission were heavily involved in the PROS Plan. The seven appointed members and two appointed youth members provided updates at each month's meeting about the PROS Plan and provided regular content for the PROS Plan team to consider and address. The PROS Plan was discussed at over 20 Parks and Recreation Commission meetings.

PROJECT WEBSITE + EMAIL

The project website (BelmontPROSplan.com) was launched in January 2021 as a resource for the community to learn about the project and stay up-to-date on the project progress, receive announcements on events, review presentations and draft excerpts, and share input on the PROS Plan. From January 2021 to January 2024, the website was visited approximately 12,000 times by about 9,600 unique visitors.

The project email (info@BelmontPROSplan.com) allowed interested community members to share their thoughts and comments to inform the planning process. In total, over 950 emails were received (January 2021 through January 2024). All emails were posted to the project website to increase project transparency. All emails received at the project email address are included in the Appendix.

Additionally, emails received by the Parks and Recreation Commissioners were posted to the project website. From November 2020 through January 2024, over 650 emails were received.

FOCUS GROUPS + NEIGHBORHOOD MEETINGS

Throughout 2021, over 75 people participated in 11 focus group interviews. Focus group topics are listed in Table 4-1. Neighborhood meetings were held for the two Undeveloped Parks (Hidden Canyon Park and Ralston Ranch Park) in October 2021. Conducted virtually, the meetings were advertised by postcards sent to nearby residences of the site and announced on the project website's event page. Over 50 people participated in both neighborhood meetings.

ONLINE SURVEY

The online survey was conducted online using the SurveyMonkey platform. Over 2,800 responses were received. The survey informed the PROS Plan about current likes and uses of Belmont's PROS sites and identified desired amenities. The full survey results are included in the Appendix.

COMMUNITY THEMES

Through the community engagement process, the following 10 common themes arose:

AMENITIES FOR SOCIAL + PHYSICAL ACTIVITY

Community members articulated a preference for their PROS system to continue to offer amenities for social and physical activity. Of survey respondents, 90 percent reported using Belmont parks and facilities for individual exercise, while 47 percent reported using the parks to gather with friends and family. Twin Pines Park (which offers reservable picnic areas and hosts citywide events like Concerts in the Park) and Belmont Sports Complex received the highest satisfaction ratings from survey takers, highlighting the community's desire to utilize these public facilities for social and physical activity.

MORE SEATING OPPORTUNITIES

Belmont residents expressed a desire for additional amenities that encourage people to linger, gather, and socialize in the parks. Participants in the youth, senior, and dog park focus groups cited additional seating as a high priority for park improvements. These three focus groups also requested additional shade, spaces for gathering and socializing, as well as other amenities to enhance comfortability at PROS sites.

A significant percentage of survey respondents cited using Belmont parks for more reflective, nature-based activities, with 60 percent identifying "commune with nature" and 55 percent selecting "peace and quiet" as their primary reason to visit Belmont's PROS sites. This use pattern supports the community desire for more seating opportunities, with over 50 percent of respondents identifying additional benches and places to sit as one of the top six amenities to enhance the Belmont PROS experience.

PHYSICAL CONNECTIONS

A cohesive, physically-connected PROS system is desired for Belmont. This theme was noted by the PROS Advisory Committee and at several Parks and Recreation Commission meetings as an overarching goal to foster active transportation modes to PROS sites. A robust and connected bicycle and pedestrian-friendly network makes it easier for residents and visitors to access the City's facilities without a car.

AMENITIES FOR DIVERSE INTERESTS

The Belmont community desires a PROS system that offers amenities for a diverse range of interests. At the conclusion of the online survey and focus group efforts, priority amenities were identified as important based on the amount community input. Priority amenities include a community garden, dog parklet, skate park, pump track, and water play options. At the youth focus group, participants expressed support for a pump track, which are becoming more popular throughout the nation. Addition of a skate park facility was also a popular suggestion noted in emailed comments.

ACCESSIBLE FOR ALL ABILITIES

Belmont's PROS sites should be accessible and inclusive for all abilities. They should accommodate users with both physical and/or developmental differences, and future improvements should be designed and implemented to increase inclusivity at Belmont's parks. The theme of inclusion was cited as one of the guiding principles of the PROS plan process.

Participants in the inclusivity focus group noted desires for inclusive play elements for older individuals, so as to accommodate more than just small children. They also desired opportunities for sensory and tactile play options, and protected spaces with multiple sight-lines and access points for easy supervision.

CREATE MORE WITH LESS

With Belmont's finite amount of available and undeveloped land, it is a priority to create more with less. In order to increase and create new amenities, it is critical to strategically layer uses at existing PROS sites to meet public demand. Potential strategies particularly identified at the school district and youth sports focus groups include implementing and maintaining joint-use agreements with school sites, and extending usable time to existing facilities by adding lighting to sports fields or utilizing synthetic turf so that nighttime and/or winter use is an option.

CONNECTING WITH NATURE

Connecting with nature is important to Belmont residents, and both the Advisory Committee and Parks and Recreation Commission agree. There is an identified need for accessible opportunities to enjoy the City's natural beauty and outdoor spaces. Approximately 60 percent of survey respondents reported communing with nature as one of the top five reasons to visit one of the City's parks, recreation facilities, or open spaces. Seeking "peace and quiet" was reported by 55 percent of respondents as another one of the top reasons to visit Belmont's PROS sites, echoing the community's value on simply enjoying the natural landscape aspects within their parks. Survey respondents also expressed an interest in "more nature-oriented activities," when asked about activities that would enhance their experience with outdoor recreation programs.

Furthermore, a large number of public comments from residents throughout the Bay Area were received from Waterdog Open Space enthusiasts voicing support for the trail network, balanced recreation use, and expanded access.

Open Space Management Plan Open House

AVAILABLE FOR MANY USES + USERS

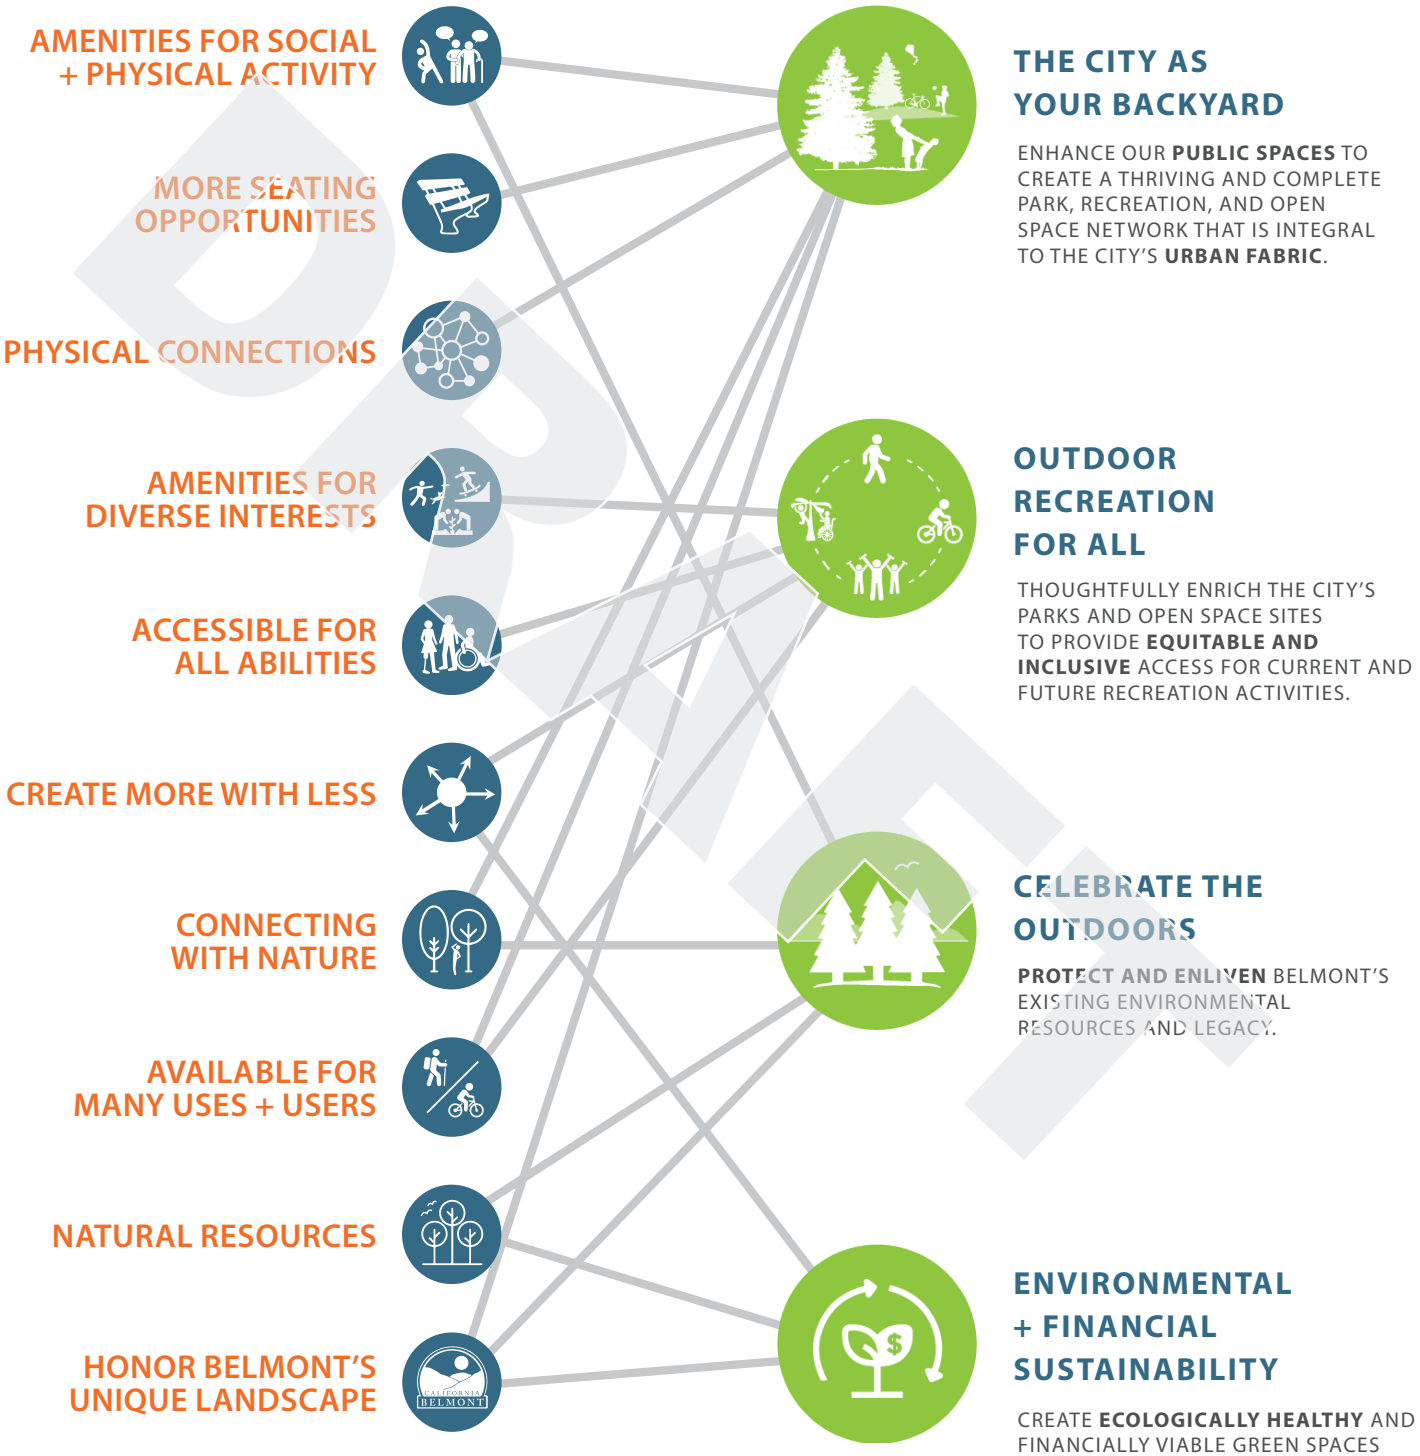
The community desires their PROS sites to be able to accommodate a range of uses and users. Concerns around usage conflicts on Open Space trails were a frequent topic of discussion at Parks and Recreation Commission meetings and within emails received from the public. Belmont's open spaces offer opportunities for fishing, interpretive walks, nature watching, volunteering, and partnering with schools for educational adventures. To create an inclusive PROS system and cultivate appreciation of Belmont's natural resources, it is important for the City to thoughtfully develop ways to accommodate different uses on trails and maintain a safe experience for all users. Participants and Advisory Committee members overwhelmingly supported implementation of balanced recreation use in Belmont's open spaces at the fifth Advisory Committee meeting.

NATURAL RESOURCES

Residents of Belmont value the natural beauty found within their parks and open spaces. There is a demonstrated desire among community members and the Parks and Recreation Commission for a stronger focus on environmental stewardship, sustainability, and resiliency with the City's natural resources. Specifically, Belmont's tree canopy was cited as an important natural resource. Approximately 65 percent of survey respondents identified maintaining and enhancing the tree canopy as one of the top six amenities that would enhance the Belmont park experience. The Parks and Recreation Commission also emphasized the importance of adding more trees in parks and beyond. Trees offer shade and cooler microclimates for recreation and social interaction and a changing tapestry of color throughout the year. They also mitigate noise pollution, screen unattractive views, and provide shelter and food for wildlife in Belmont.

HONOR BELMONT'S UNIQUE LANDSCAPE

The City of Belmont offers a unique combination of developed parkland and an abundance of well-loved open spaces and trails. Numerous emails from the public were received emphasizing community support for the City to protect wildlife and natural habitat when appropriate, prioritize accessibility and sustainability maintenance of the trails as they are, and demonstrate a high degree of environmental stewardship. The importance of environmental stewardship and honoring the unique landscape was also echoed by the Parks and Recreation Commission as well as numerous community and Advisory Committee members.



Early in the PROS planning process, open space was identified as a critical concern of the community. A dedicated effort to further study Waterdog Lake and San Juan Canyon Open Spaces is presented in the Appendix.

PROS Plan Banner at Barrett Community Center

INFORMING THE BIG IDEAS

The community themes were shaped into the PROS Plan's four **BIG IDEAS**. The Big Ideas are the organizational framework for the Goals, Strategies, and Recommendations presented later in this document.

PART 2.
WHERE WE WANT TO BE

CHAPTER 5

NEEDS ASSESSMENT

Building on existing conditions evaluation and feedback from the community, this chapter examines the level of service Belmont provides in their PROS system. The needs are derived from staff and community input. The gap analysis assessed benchmarked amenities provided by comparison cities and national values to identify and align with recreation trends.

Horseshoe Pits at Alexander Park

Playground at College View Park

Fitness Equipment Cluster at Barrett Community Center

AMENITY RATIO

Belmont provides a high-quality park system with many amenities. Amenity levels of service are determined to understand how the quantity of amenities serves the community system-wide. Amenity Ratios were developed using the Amenity Inventory and a projected quantity of people served by a single amenity. The Amenity Inventory and definitions of the amenity categories are found in Chapter 3.

Through discussions with the community and City staff, Amenity Ratios were assessed, evaluated, and adjusted to meet the Belmont's needs now and into the future. The Amenity Ratios include the amenities offered in the Neighborhood Parks, Community Parks, and School (JUA) sites. School-located amenities are only available for public use outside of school hours.

CURRENT AMENITY RATIOS

RESIDENTS SERVED BY A SINGLE AMENITY

Table 5-1 provides the number of residents served by a single instance of an amenity. For Belmont, understanding the service level amenities provide was the foundation for evaluating gaps and needs. The ratios can range drastically, from one instance serving just 1,300 residents (a playground), to one instance serving all 26,470 residents (a dog park). Amenity Ratios are calculated using the following formula:

Residents Served by an Amenity

$$\frac{\text{Population}}{\text{Amenity Quantity}} \qquad \frac{26{,}470 \text{ people}}{20 \text{ Playgrounds}} = 1{,}300 : 1$$

A lower quantity of people a single instance of an amenity serves, such as playgrounds (1,300:1), indicates Belmont has provided a high quantity of the amenity in relation to the total population. Playgrounds are especially prevalent across the city—for every 1,300 people, there is one playground. A higher quantity of people a single instance of an amenity serves, such a dog park (26,500:1), indicates there is a low quantity of the amenity in relation to the total population. With only one dog park, the single instance serves Belmont's entire population. Some benchmarked amenities do not currently exist in Belmont (pump track) and therefore do not have an Amenity Ratio.

Table 5-2: Current Amenity Ratios for Belmont, Amenity per 1,000 Residents

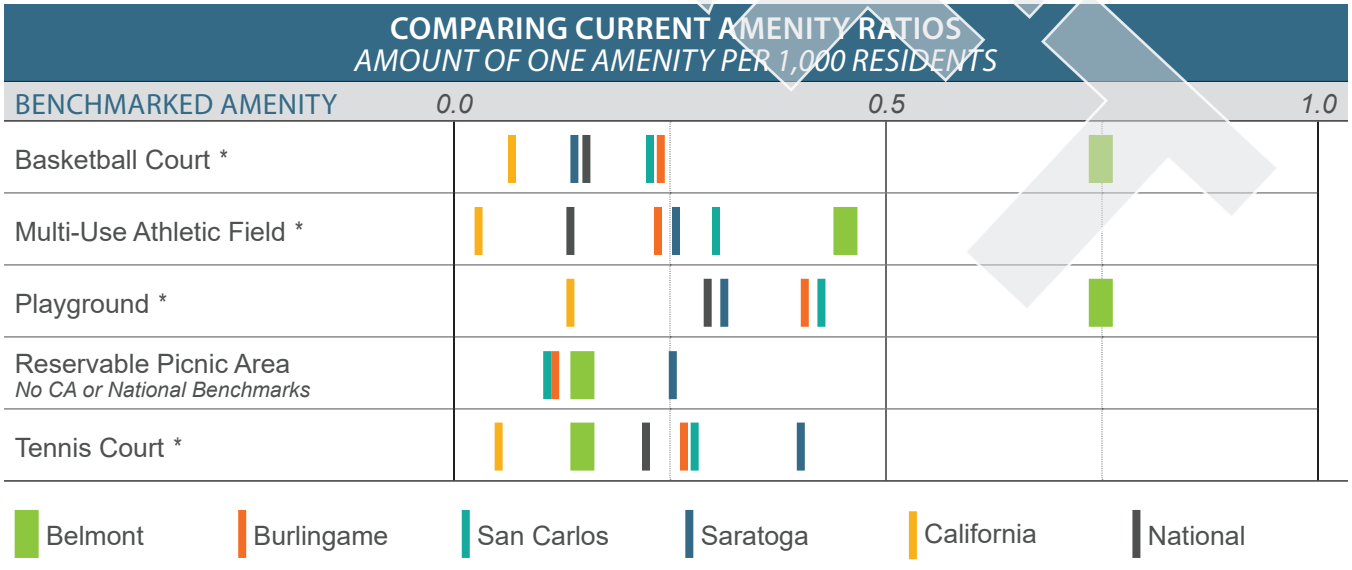
AMENITY PER 1,000 RESIDENTS

The same data was used to evaluate the quantity of a single amenity type that is available for every 1,000 Belmont residents. This was calculated using the following formula, using playgrounds as an example:

Amenity per 1,000 Residents

$$\frac{\text{Amenity Quantity}}{(\text{Population} / 1{,}000)} \qquad \frac{20 \text{ Playgrounds}}{26.47} = 0.76$$

Fuller bars in Table 5-2 indicate that this type of amenity has a higher level of service, meaning there are more instances of this amenity available to the public (proportional to the overall population). For example, there are 0.76 playgrounds, or 76 percent of a single playground, for every 1,000 residents. This is a very high level of service. Inversely, there are 0.04 dog parks for every 1,000 residents. This is a low level of service.



A summary of the Current Amenity Ratios is provided in Table 5-3 on the following page. A higher number of residents served by a single instance indicates that there are fewer of these amenities available per person. For example, if every resident of Belmont was using a community garden at the same time—distributed equally—there would be 13,200 people at each one. Alternatively, the higher number of an amenity available for every 1,000 residents, the better level of service.

BENCHMARKING

Benchmarks for three comparable cities, jurisdictions of a similar size across the nation, and all of California were used to compare Amenity Ratios as compiled by the National Recreation and Parks Association (NRPA). Not all amenities were compared in the benchmarks. The results are shown in Figure 5-1.

The benchmarking process illuminates how Belmont compares to its peer municipalities. The benchmarking data from peer communities is used to establish goals for improvement. For three of the five benchmarked amenities, Belmont well exceeds the comparison cities as well as State and national averages. For every 1,000 residents in Belmont, there are 0.72 basketball courts (inclusive of both half and full size courts), 0.76 playgrounds, and 0.45 multi-use athletic fields.

There are only two benchmarked amenities that Belmont does not have the highest level of service for the purposes of this analysis. Belmont provides just half the amount of a tennis court for every 1,000 residents compared to Saratoga, which provides the highest level of service for this amenity type. Tennis courts are the only benchmarked amenity that have an Amenity Ratio below the national average.

* *Includes amenities at School (JUA) sites.*

Table 5-3: Current Amenity Ratios

IDEAL AMENITY RATIOS

This process culminated in Ideal Amenity Ratios for Belmont shown in Table 5-4. The Ideal Amenity Ratios indicate the level of service that each amenity type should provide to maintain a high-quality PROS system, meeting current and future demands.

For some amenities, the Ideal Amenity Ratio and the Current Amenity Ratio are the same. For instance, the level of service of basketball courts (full and half) remains the same. This means the total quantity of courts is sufficiently meeting demand.

For other amenities, the Ideal Amenity Ratio is higher than the Current Amenity Ratio. This means the current quantity of an amenity is not enough to service the existing needs of the City. For example, reservable picnic areas, both large and small, are highly-used. Social gathering space was also highly ranked by the community. Therefore the Ideal Amenity Ratio requires a higher quantity of reservable picnic areas with a higher level of service ratio to adequately meet current need and to reflect the community interest.

High-interest amenities received a significant change in desired level of services based on survey results, feedback received via email, and comments from focus groups and pop-up events. Working closely with Parks and Recreation staff and the Belmont community, the desired service levels were adjusted iteratively to ensure that the desired level of service is plausible given the parkland available.

In rare instances, the Ideal Amenity Ratio is lower than the Current Amenity Ratio. For example, the Ideal Amenity Ratio for handball or wallball courts was reduced. The existing courts are not heavily used and there was little demand for additional courts.

Amenities such as pump tracks, skate parks, and All-Abilities playgrounds are not currently available in Belmont. Amenities without a Current Amenity Ratio have been assigned an Ideal Amenity Ratio based on benchmarks, recreation trends, or community input.

IDEAL AMENITY QUANTITY

The Ideal Amenity Ratio identifies the amenities that are already meeting the required quantities, amenities that need to be increased to meet the ideal level of service, and amenities that are provided in excess and therefore do not need to be increased. The Ideal Amenity Quantities were calculated by dividing the total population by the Ideal Amenity Ratio. For example, the Ideal Amenity Ratio for a community garden is one garden to serve 8,800 people (8,800:1). By dividing the City's population (26,470) by the residents served by a single garden, it can be determined that three community gardens are required to serve the 2022 population of Belmont.

To calculate the future need for an amenity, the same calculation is done using the forecasted 2035 population from the 2017 General Plan. The City's Housing Element is under revision to reflect additional housing units as required by the California Department of Housing and Community Development and projects a higher population increase as a result. The calculations in this chapter do not reflect the Housing Element projections. More information about the impact of the revised population forecast is included in the Appendix.

NEEDS: CURRENT (2022) AMENITIES

Table 5-5 presents the quantity of amenities necessary to serve the 2022 population. The "exists" column equates to currently available amenities that were documented in the PROS Amenity Inventory. The "ideal" column is the quantity of an amenity required to meet the identified level of service. The "+ add" column is the additional amenities required to meet the identified level of service (the difference between exists and ideal).

For most identified amenities, Belmont has set itself a higher level of service than it currently provides. These are denoted by a positive value in the "+ add" column. In some instances, a surplus of an amenity already exists than is required to meet the Ideal Amenity Ratio (a negative number in the "+ add" column). The PROS Plan does not recommend demolishing surplus amenities to meet the 2022 population calculations.

NEEDS: FUTURE (2035) AMENITIES

This PROS Plan looks 15 years into the future. As the population of Belmont increases, the quantity of amenities to sustain the Ideal Amenity Ratios must also increase. This analysis assumes the required amenities identified for the 2022 population were constructed.

Table 5-6 presents the amenities necessary to serve the forecasted 2035 population, as identified in the General Plan. Table 5-7 shows the differences in Ideal Amenity Quantities between 2022 and 2025 population scenarios.

IDEAL AMENITY QUANTITY *CURRENT 2022 POPULATION*			
BENCHMARKED AMENITY	EXISTS	2022 IDEAL	2022 + ADD

PART 2.
WHERE WE WANT TO BE

CHAPTER 6
GOALS

This chapter transitions the PROS Plan from the current status of the PROS system (Where We Are) to the ideal future (Where We Want To Be). The information presented in the previous chapters was synthesized to inform actions for the PROS system over the next 15 years. This chapter presents the Goals and summarizes the relationships between the Big Ideas, Guiding Principles, and Community Themes that came together serve as the guiding framework for the PROS Plan.

BIG IDEA: **THE CITY AS YOUR BACKYARD**

ENHANCE OUR **PUBLIC SPACES** TO CREATE A THRIVING AND COMPLETE PARK, RECREATION, AND OPEN SPACE NETWORK THAT IS INTEGRAL TO THE CITY'S **URBAN FABRIC**.

GUIDING PRINCIPLES

- Make all users feel *welcome and safe*
- Advance *community health and well-being*
- Foster a sense of community and encourage *social interaction*
- Utilize *transparent community process* to inform decisions

COMMUNITY THEMES

- Amenities for Social + Physical Activity
- More Seating Opportunities
- Physical Connections
- Connecting with Nature
- Available for Many Uses + Users
- Honor Belmont's Unique Landscape

PROS GOAL 1 — CONNECT BELMONT AND UNIFY PROS SITES BY ENCOURAGING A ROBUST PEDESTRIAN, BICYCLE, AND PUBLIC TRANSIT NETWORK.

PROS GOAL 2 — FOSTER A HEALTHY COMMUNITY THROUGH SPACES, AMENITIES, PROGRAMS, AND PUBLIC ART THAT PROMOTE AND ENCOURAGE PHYSICAL ACTIVITY, SOCIAL INTERACTION, AND BELMONT'S CULTURE.

PROS GOAL 3 — MEET EVOLVING COMMUNITY NEEDS BY ESTABLISHING NEW USES, IMPROVED SPACES, AND A VARIETY OF RECREATION AMENITIES.

DRAFT

BIG IDEA: **OUTDOOR RECREATION FOR ALL**

THOUGHTFULLY ENRICH THE CITY'S PARKS AND OPEN SPACE SITES TO PROVIDE **EQUITABLE AND INCLUSIVE** ACCESS FOR CURRENT AND FUTURE RECREATION ACTIVITIES.

GUIDING PRINCIPLES

- Provide *equitable access* to resources and activities across the entire city
- Promote *inclusion* to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position, or physical/cognitive ability
- Offer services and activities across a *range of interests, abilities, and ages*

COMMUNITY THEMES

- Amenities for Diverse Interests
- Accessible for All Abilities
- Create More with Less
- Available for Many Uses + Users

PROS **GOAL 4**

IMPROVE COMMUNITY HEALTH THROUGH DIVERSE, EQUITABLE, AND INCLUSIVE SPACES AND AMENITIES WITH ACCESSIBLE ROUTES.

PROS **GOAL 5**

ENSURE FUTURE SUCCESS THROUGH ADAPTABILITY, FLEXIBILITY, AND SUPPORT FOR MANY USES AND USERS.

PROS **GOAL 6**

ACTUALIZE PROS PLAN BY DEVELOPING STRONG PARTNERSHIPS ACROSS PRIVATE, PUBLIC, AND COMMUNITY GROUPS.

DRAFT

BIG IDEA: **CELEBRATE THE OUTDOORS**

PROTECT AND ENLIVEN BELMONT'S EXISTING ENVIRONMENTAL RESOURCES AND LEGACY.

GUIDING PRINCIPLES

- Respect the beauty and importance of our *natural resources*
- *Adapt* to changing conditions and needs

COMMUNITY THEMES

- Amenities for Social + Physical Activity
- Connecting with Nature
- Natural Resources
- Honor Belmont's Unique Landscape

PROS **GOAL 7** — **DEVELOP AND IMPLEMENT AN OPEN SPACE MANAGEMENT PLAN (OSMP).**

PROS **GOAL 8** — **HIGHLIGHT LOCAL ECOSYSTEMS THROUGH EDUCATIONAL OPPORTUNITIES ACROSS PARKS AND OPEN SPACES.**

PROS **GOAL 9** — **ENRICH OUTDOOR RECREATION THROUGH TRAIL IMPROVEMENTS, VOLUNTEER COLLABORATIONS, AND WAYFINDING FEATURES.**

DRAFT

BIG IDEA: **ENVIRONMENTAL + FINANCIAL SUSTAINABILITY**

CREATE **ECOLOGICALLY HEALTHY** AND FINANCIALLY VIABLE GREEN SPACES THAT WILL ENDURE INTO THE FUTURE..

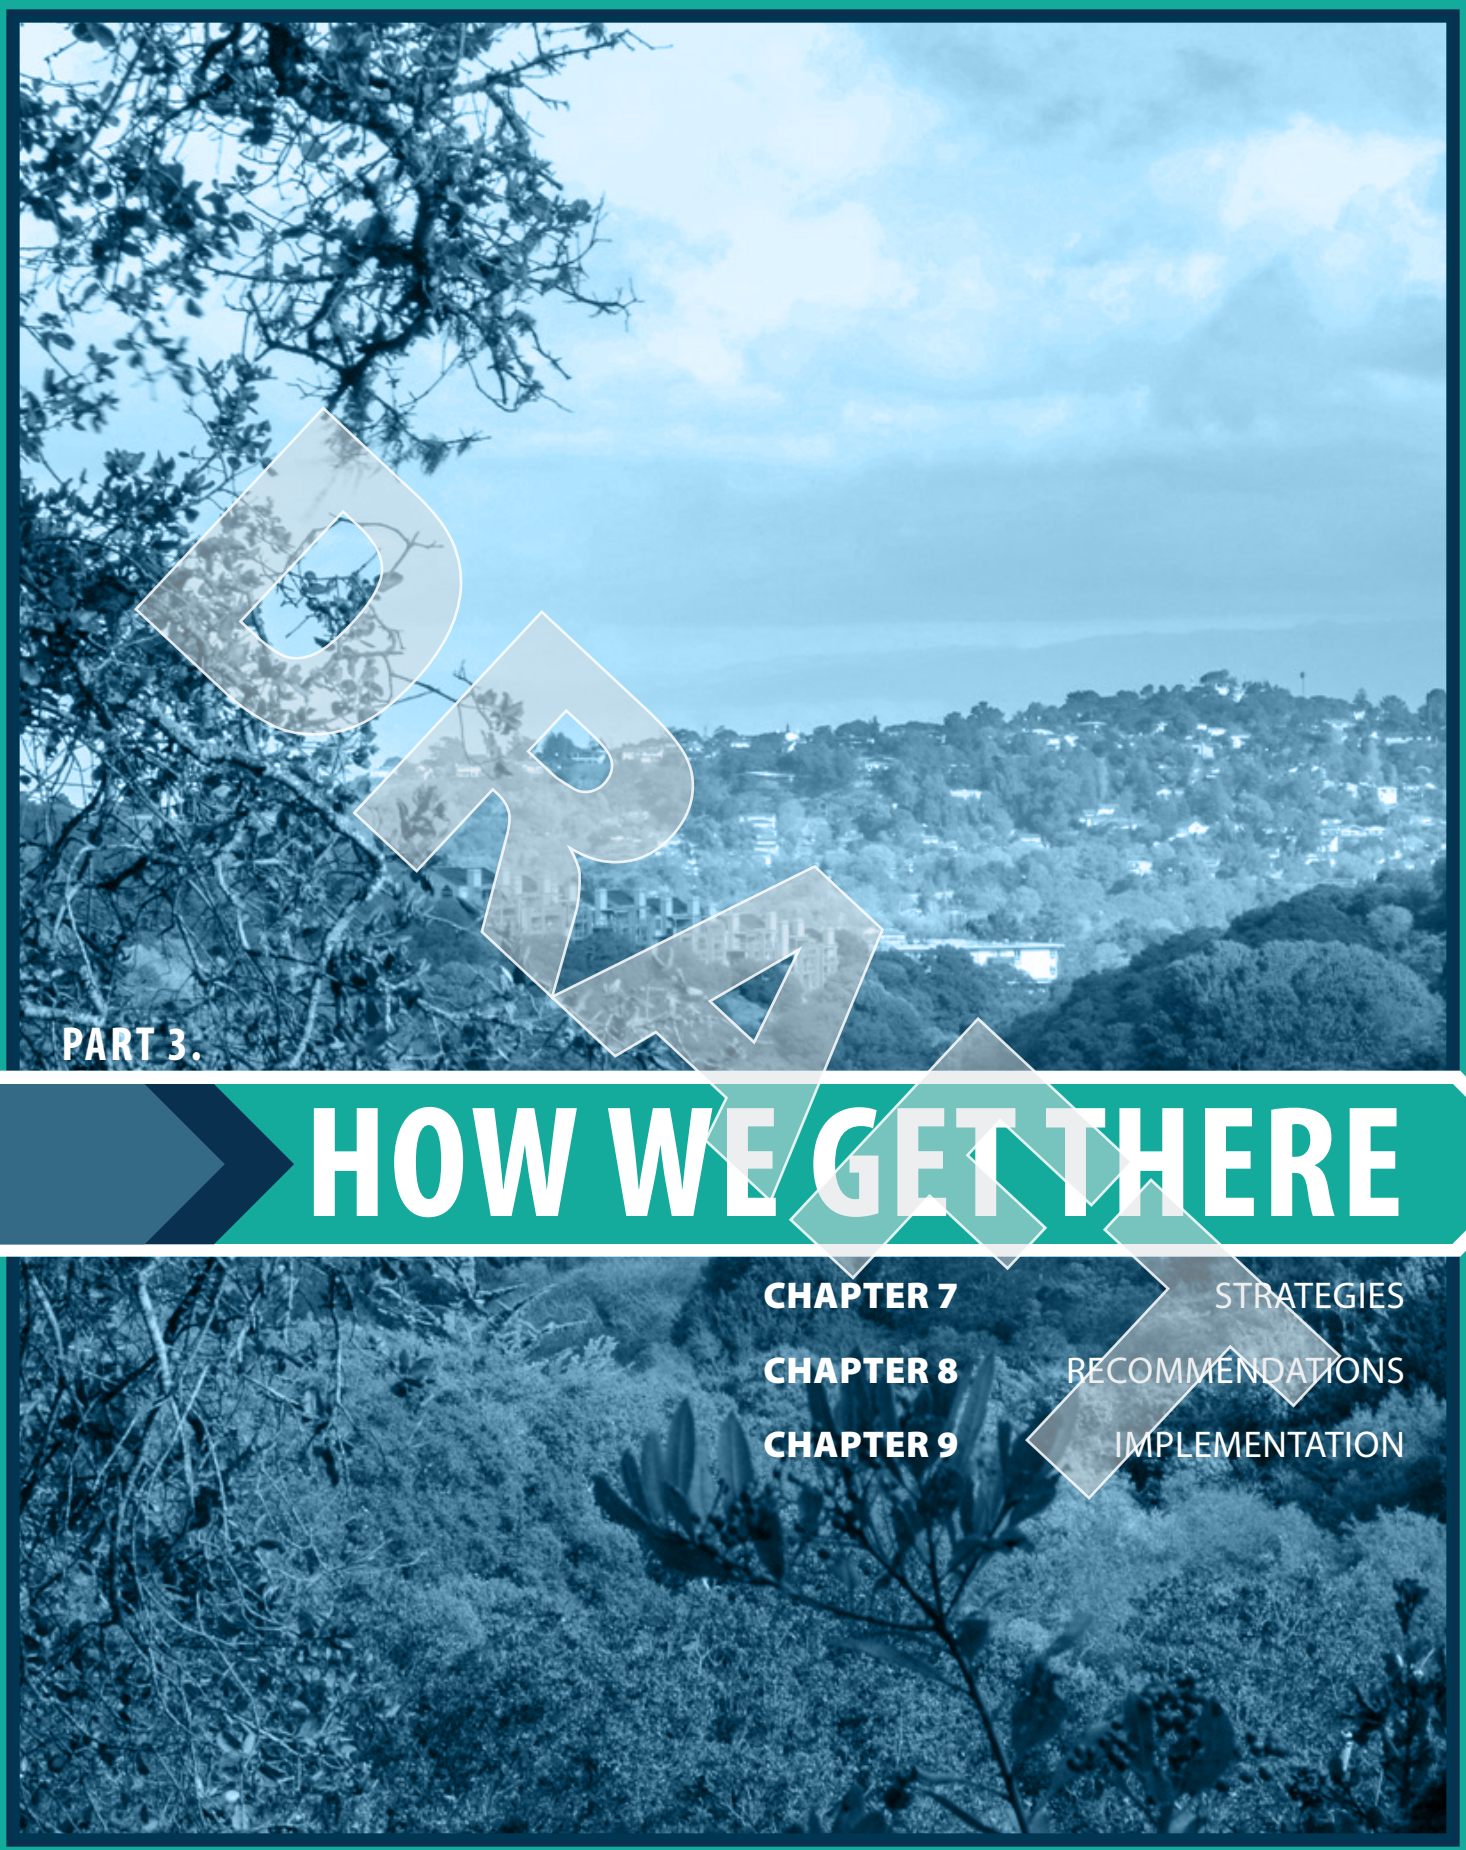
GUIDING PRINCIPLES

- Reflect our commitment to *environmental resilience and sustainability*
- Provide *well maintained* and actively managed facilities

COMMUNITY THEMES

- Create More with Less
- Natural Resources
- Honor Belmont's Unique Landscape

PROS **GOAL 10** NURTURE AND STRENGTHEN NATURAL RESOURCES THROUGH EFFICIENT AND INNOVATIVE LANDSCAPE DESIGN.



PROS **GOAL 11** DIVERSIFY FUNDING SOURCES TO ENSURE HIGH-QUALITY, ACTIVELY-MANAGED, AND WELL-MAINTAINED PROS ASSETS.

PROS **GOAL 12** PRIORITIZE SUSTAINABLE, RESILIENT, AND RESPONSIBLE MANAGEMENT AND MAINTENANCE PRACTICES.

PART 3.
HOW WE GET THERE

CHAPTER 7
STRATEGIES

This chapter presents the Strategies which were used to inform the Recommendations presented in the following chapter. The Strategies are organized by the PROS Goal that it responds to. This chapter also presents the Objectives and Policies unique to Belmont's open spaces.

STRATEGIES

The PROS Plan provides a comprehensive suite of Strategies, applicable to the PROS system as a whole, to provide guidance to the City for future improvements to Belmont's outdoor amenities.

The Strategies can be viewed as broad initiatives to address opportunities and constraints within the PROS system, while establishing the intention and inspiration for future improvements as available resources and conditions evolve over time.

The Strategies build upon the PROS Goals, which largely originate from the Park, Recreation, and Open Space Element and Conservation Element of the City's General Plan. They relate to site design, operation, and investment of resources in the PROS system.

Chapter 8 presents the Recommendations for the PROS system that were informed by the Strategies presented in this section.

Davey Glen Park

Belmont Sports Complex Athletic Field

DRAFT

THE CITY AS YOUR BACKYARD

PROS GOAL 1: CONNECT BELMONT AND UNIFY PROS SITES BY ENCOURAGING A ROBUST PEDESTRIAN, BICYCLE, AND PUBLIC TRANSIT NETWORK.

Strategy 1.A
Support the implementation of the Comprehensive Pedestrian and Bicycle Plan (2016) for creation of bicycle and pedestrian infrastructure that connects PROS sites as key destinations.

Strategy 1.B
Develop and implement an Interconnect Toolkit to facilitate active transportation to and between parks. The Toolkit should consider bike racks, water stations (with bottle-filling and dog bowls), bicycle repair stations, seating, and route information, at a minimum.

Strategy 1.C
Create pedestrian- and bike-centric activities and programs within parks, such as learn-to-bike amenities, and across Belmont, like organized races or runs, to foster community interest.

Strategy 1.D
Think of the streets as public realm when evaluating new opportunities to provide recreation and gathering space.

Strategy 1.E
Provide multi-use trail links to and through open space in and around Belmont. Consider the trail network a means to increase pedestrian connectivity across the city. Explore opportunities for easements to expand the multi-use trail network.

Strategy 1.F
Improve access, especially in underserved areas without opportunity for parkland increase, where topography or limited sidewalks limit pedestrian, bicycle, and mass transit access to existing PROS sites.

PROS GOAL 2: FOSTER A HEALTHY COMMUNITY THROUGH SPACES, AMENITIES, PROGRAMS, AND PUBLIC ART THAT PROMOTE AND ENCOURAGE PHYSICAL ACTIVITY, SOCIAL INTERACTION, AND BELMONT'S CULTURE.

Strategy 2.A
Develop amenities to facilitate physical exercise in parks and open spaces, such as looped walking paths and fitness equipment.

Strategy 2.B
Create gathering spaces to facilitate social interaction. When replacing or adding seating opportunities, use a clustered or paired seating arrangement to support group conversations in addition to single seats or benches.

Strategy 2.C
Prioritize new recreational programs that support community health and wellbeing for all ages, abilities, and interests.

Strategy 2.D
Support and encourage placemaking to strengthen community connections.

Strategy 2.E
Increase quiet and passive use opportunities for users to interact with natural spaces, especially in higher density areas.

Strategy 2.F
Implement the Public Art Master Plan (2020) in parks to reflect the City's dedication to art and culture.

Strategy 2.G
Create an Activation Plan to identify unique and innovative ways to energize the PROS system and further increase park activity and visitation.

THE CITY AS YOUR BACKYARD

PROS GOAL 3: MEET EVOLVING COMMUNITY NEEDS BY ESTABLISHING NEW USES, IMPROVED SPACES, AND A VARIETY OF RECREATION AMENITIES.

Strategy 3.A
Increase the experiential qualities of PROS sites to create memorable and distinctive visitor experiences.

Strategy 3.B
Pursue pop-up park installations, such as parklets and mobile recreation vehicles, to provide park and recreation opportunities in areas without permanent, physical amenities.

Strategy 3.C
Capitalize on remnant or underutilized areas of City-owned land to craft new public green spaces, with special attention towards addressing the parity of parkland distribution, by pursuing opportunities to increase acreage wherever possible.

Strategy 3.D
Conduct a Usage Study to understand high-use and low-use PROS sites and amenities.

Strategy 3.E
Actively engage with new development projects within the Belmont Village Specific Plan area to ensure quality parks and public spaces are provided.

Strategy 3.F
Consider the community's needs and preferences in the development of Hidden Canyon Park and Ralston Ranch Park.

Strategy 3.G
Consider increasing off-leash space for dog running, events, and exercise.

Strategy 3.H
Ensure that residential and non-residential development projects contribute to Belmont's PROS resources commensurate to their impacts if parkland dedication is not feasible.

Strategy 3.I
Explore methods to increase efficient and year-round use of athletic fields, with considerations towards the reduction of water use and capture of surface water runoff, in the evaluation of synthetic turf.

Strategy 3.J
Evaluate fields and courts across the city for the opportunity to provide lighted facilities for evening recreation and play.

Twin Pines Park Tree Canopy in Autumn

OUTDOOR RECREATION FOR ALL

PROS GOAL 4: IMPROVE COMMUNITY HEALTH THROUGH DIVERSE, EQUITABLE, AND INCLUSIVE SPACES AND AMENITIES WITH ACCESSIBLE ROUTES.

Strategy 4.A
Prioritize park renovations, improvements, and development in neighborhoods that are less-served by existing PROS offerings to address parity in amenity distribution.

Strategy 4.B
Incorporate universal design principles in all new PROS construction by providing spaces that are intuitive to understand with identical or equivalent experiences for visitors with diverse abilities and cognitive levels.

Strategy 4.C
Provide adequate and conveniently-located comfort features, such as seating and shade, to support use at PROS sites.

Strategy 4.D
Consider the physical needs of different user groups when planning and designing parks and trails and when selecting amenities and furnishings.

Strategy 4.E
All amenities and spaces within a park should be accessible by a safe path of travel.

Strategy 4.F
As play equipment ages and becomes eligible for replacement, design the new play space for inclusivity and adaptability to support healthy childhood development in a welcoming and imaginative atmosphere.

PROS GOAL 5: ENSURE FUTURE SUCCESS THROUGH ADAPTABILITY, FLEXIBILITY, AND SUPPORT FOR MANY USES AND USERS.

Strategy 5.A
Design new and upgraded PROS amenities and facilities that are versatile and attractive to the diverse and evolving Belmont community.

Strategy 5.B
Incorporate looped walking paths within and through parks as safe, accessible, and pleasant experiences to walk, run, and roll.

Strategy 5.C
Rethink low- or single-use spaces and intentionally layer compatible features and programs to maximize the functional value of existing parkland. For example, new striping on existing courts increases the practical usefulness of a single amenity's footprint.

Strategy 5.D
Provide recreational programs and activities, such as workshops and classes, that are relevant, interesting, and impactful to multiple generations and backgrounds.

Strategy 5.E
Provide for non-traditional forms of recreation as new trends and community needs arise. Remain open-minded and amenable towards emerging unconventional uses of parks and facilities.

Strategy 5.F
Promote flexible multi-use and multi-purpose spaces in all new design and improvement projects to ensure the relevancy and utility of these sites as community needs evolve.

Strategy 5.G
Periodically conduct a programming needs assessment for an in-depth evaluation of the participation and engagement levels of program offerings, ensuring that Belmont's recreation needs are met.

OUTDOOR RECREATION FOR ALL

PROS GOAL 6: ACTUALIZE PROS PLAN BY DEVELOPING STRONG PARTNERSHIPS ACROSS PRIVATE, PUBLIC, AND COMMUNITY GROUPS.

Strategy 6.A
Provide public engagement opportunities in all PROS planning and design projects to capture community desires for their city's backyard.

Strategy 6.B
Collaborate with community advocates to provide culturally-relevant experiences that celebrate diversity and raise awareness about unique traditions and practices.

Strategy 6.C
Support partnerships with private businesses for operations at PROS sites to generate revenue for the Parks and Recreation Department that are compatible with recreational access and the restoration of sensitive natural resources.

Strategy 6.D
Encourage long-term, volunteer-based public stewardship of parks, open spaces, and trails bolster ongoing maintenance and improvement efforts.

Strategy 6.E
Complement and supplement City recreational offerings by strengthening partnerships with local public agencies and private or non-profit organizations that offer relevant outdoor programming opportunities.

Strategy 6.F
Continue to utilize JUAs to expand the available PROS sites in the constrained and developed jurisdictional boundary. Discuss improvements of JUA sites and amenities to benefit the public's use.

Strategy 6.G
Streamline internal bureaucratic processes and encourage partnerships with non-governmental entities to compliment existing public art and placemaking endeavors.

Strategy 6.H
Co-host creative events with civic organizations that serve as platforms to promote ongoing volunteer opportunities and spark collaboration between community groups to collectively care for the PROS system.

Twin Pines Park

CELEBRATE THE OUTDOORS

PROS GOAL 7: DEVELOP AND IMPLEMENT AN OPEN SPACE MANAGEMENT PLAN (OSMP).

The OSMP establishes the Objectives for Belmont's Open Spaces, listed below.

ENVIRONMENTAL SUSTAINABILITY

Objective ES-1: Vegetation Protection Sustain and promote viable and diverse native plant communities that are characteristic of the region.

Objective ES-2: Wildlife Protection Maintain and promote healthy and diverse native wildlife populations.

Objective ES-3: Water Resources Protect and restore natural water courses, wetlands, and hydrologic processes.

Objective ES-4: Science-Based Management Use and document scientific knowledge of comparable open space resources and widely accepted and well documented resource management techniques as a basis for management decisions.

Objective ES-5: Expand Ability Expand ability to perform natural resource management.

BALANCED RECREATION USE

Objective BR-1: Balanced Recreation Uses Provide diverse, nature-dependent recreation activities in the city's open space areas.

Objective BR-2: Trail Management Improve and maintain trails to be environmentally sustainable.

Objective BR-3: User Compatibility Facilitate and encourage multi-use compatibility on trails.

Objective BR-4: Enhance Partnerships Enhance partnerships and programs aimed at improving recreation experiences.

NATURAL HAZARD MITIGATION

Objective NH-1: Wildfire Hazards Reduce the risk and severity of wildland fire and minimize the impact of fire suppression activities within City open spaces and adjacent residential areas.

Objective NH-2: Protect Life + Property Protect life and property from natural hazards, including neighboring communities during mitigation or hazard events.

Objective NH-3: Improve Cooperative Planning Improve cooperative planning to respond to natural hazards.

CELEBRATE THE OUTDOORS

PROS GOAL 8: HIGHLIGHT LOCAL ECOSYSTEMS THROUGH EDUCATIONAL OPPORTUNITIES ACROSS PARKS AND OPEN SPACES.

Strategy 8.A
Highlight the natural features within Belmont's parks and open spaces through unique educational and recreational hands-on programs.

Strategy 8.B
Incorporate environmental education elements into park designs, such as interpretative signage and trailhead bulletins.

Strategy 7.C
Increase stewardship efforts with organizations whose mission supports natural education.

Strategy 8.D
Promote public awareness of sustainable practices being implemented in the PROS system. Consider methods to increase public knowledge about environmentally-friendly choices in their homes and local neighborhoods.

Strategy 8.E
Improve public access to the Belmont Creek waterway, especially in Twin Pines Park, when restoring or enhancing the riparian habitat. Use temporary signage to explain the specific restoration methods and how visitors can avoid disturbing these efforts.

PROS GOAL 9: ENRICH OUTDOOR RECREATION THROUGH TRAIL IMPROVEMENTS, VOLUNTEER COLLABORATIONS, AND WAYFINDING FEATURES.

Strategy 9.A
Facilitate volunteer opportunities and advance stewardship with fun and engaging opportunities to care for our valuable natural environment.

Strategy 9.B
Offer areas of respite, such as benches with shade and trail rest points, along paths and trails to support outdoor recreation for all.

Strategy 9.C
Create trails to vista points or activity spaces that are as accessible as possible given the terrain restrains.

Strategy 9.D
Identify locations where trails can be improved or established in open space to connect the city and other open space areas neighboring Belmont, such as Sugarloaf Mountain and San Juan Canyon.

Strategy 9.E
Create a wayfinding signage system to educate and increase community use of PROS spaces. Provide pedestrian and bicycle transportation information, such as directions, route distance, and travel duration, to the nearest PROS site.

DRAFT

ENVIRONMENTAL + FINANCIAL SUSTAINABILITY

PROS GOAL 10: NURTURE AND STRENGTHEN NATURAL RESOURCES THROUGH EFFICIENT AND INNOVATIVE LANDSCAPE DESIGN.

Strategy 10.A
Use durable and low-maintenance material choices in all park development.

Strategy 10.B
Consider permeable paving options when adding paths or replacing non-permeable paths.

Strategy 10.C
Increase shade and tree canopy across the city with succession tree planting, volunteer planting events, and monitoring of existing trees for health and longevity.

Strategy 10.D
Use native, drought-tolerant, low-water plants in all park projects.

Strategy 10.E
Utilize the Open Space Management Plan to address trail erosion impacts.

Strategy 10.F
Protect native habitat without limiting public enjoyment of the natural environment unduly.

PROS GOAL 11: DIVERSIFY FUNDING SOURCES TO ENSURE HIGH-QUALITY, ACTIVELY-MANAGED, AND WELL-MAINTAINED PROS ASSETS.

Strategy 11.A
Prioritize funding towards projects that increase equity and inclusivity at PROS sites.

Strategy 11.B
Implement existing master plans for Twin Pines Park and Barrett Community Center.

Strategy 11.C
Actively pursue grants and partnerships to implement PROS improvements.

Strategy 11.D
Explore funding sources that support recreation programming or assist with operations and maintenance.

Strategy 11.E
Include maintenance considerations in all development, redevelopment, enhancement, and maintenance projects.

Strategy 11.F
Require high-quality planning, design, and construction administration for all future projects.

Strategy 11.G
As the PROS system evolves, evaluate and supplement City maintenance staffing and budgets to ensure high-quality conditions of amenities and assets.

Strategy 11.H
Periodically review the City's parkland dedication and in-lieu fee requirements, development costs, and building trends to address any changes that could necessitate a Park Impact Fee Nexus Study.

Strategy 11.I
Develop an approach to acquire open space lands to conserve scenic areas, natural drainage ways, and plant and wildlife habitat.

ENVIRONMENTAL + FINANCIAL SUSTAINABILITY

PROS GOAL 12: PRIORITIZE SUSTAINABLE, RESILIENT, AND RESPONSIBLE MANAGEMENT AND MAINTENANCE PRACTICES.

Strategy 12.A
Maximize water and energy efficiency in all PROS decisions. Support energy- and water-efficient "smart" upgrades, including installation of solar (photo-voltaic) panels, infrastructure for electric vehicle charging stations, and rain-sensing irrigation systems, in all new or upgraded sites.

Strategy 12.B
Continue to support and implement the Climate Action Plan (2017).

Strategy 12.C
Integrate stormwater treatment, detention, and storage systems into all parks.

Strategy 12.D
Incorporate succession tree planting into regular park maintenance considerations.

Strategy 12.E
Transition to LED when replacing and upgrading lighting, with special consideration given to minimizing light pollution.

DRAFT

Waterdog Lake Open Space

OPEN SPACE OBJECTIVES + POLICIES

The Open Space Management Plan (OSMP), initiated by PROS Goal 7, provides a programmatic framework to protect and manage Waterdog Lake (WDL) and San Juan Canyon (SJC) Open Spaces. The Objectives of the OSMP, illustrated on a previous page, are organized into three Themes:

ENVIRONMENTAL SUSTAINABILITY

BALANCED RECREATION USE

NATURAL HAZARD MITIGATION

Objectives are general statements articulating a desired outcome, which are further broken down by Policies.

As discussed in Chapter 3, an Environmental Assessment and a Recreation Use Assessment were conducted for the OSMP. The findings of these assessments, a review of the City's existing goals and policies for protecting and managing open space areas, and extensive community feedback informed the Policies. Tables 7-1 through 7-5 present the Policies organized by Objective.

ENVIRONMENTAL SUSTAINABILITY (ES)		
OBJECTIVE	POLICY	DESCRIPTION
ES-1 Vegetation Protection	P1	Limit trail construction, and facility development in riparian and other wetland areas (and associated buffers) to protect them from disturbance. Recreational, educational, and other programmatic activities should be conducted in previously developed areas, when possible, to minimize impacts to riparian/wetland areas.
	P2	Monitor open space conditions with an emphasis on documenting the location, distribution, and abundance of special-status plants and plant communities, native grasses, wildflowers, and other native flora.
	P3	Align or relocate, modify trails to avoid impacting sensitive habitats such as wetlands and areas where endangered species are present. Avoid aligning trails along the boundaries of sensitive habitats.
	P4	Protect riparian ecosystems and habitat to maintain natural hydrologic process, water quality, and wildlife benefits. If necessary, enhance and restore riparian habitats to improve function.
	P5	Protect common native plant species from disturbance, such as trampling, and disease, such as Sudden Oak Death.
	P6	Monitor and control exotic or nuisance plant species.
	P7	Preserve and enhance riparian, stream, and other wetland communities locally and in coordination with other agencies to continue providing important habitat networks.

Table 7-1: Environmental Sustainability Policies

DRAFT

ENVIRONMENTAL SUSTAINABILITY (ES)		
OBJECTIVE	POLICY	DESCRIPTION
ES-2 Wildlife Protection	P8	Monitor sensitive terrestrial and aquatic wildlife species in terms of their presence/ absence and potential to occur on City of Belmont open space lands.
	P9	Avoidance of sensitive wildlife species, critical breeding or nesting seasons, and critical breeding or nesting habitats during trail or facility construction.
	P10	Protect common native wildlife species from disturbance, and disease.
	P11	Preserve and enhance native wildlife habitat locally and in coordination with other agencies to continue protecting important habitat networks.
ES-3 Water Resources	P12	Protect surface and ground water from chemical contamination.
	P13	Minimize unnatural soil erosion and sedimentation of waters and wetlands
ES-4 Science-based Management	P14	Develop performance measures when designing City projects for the purpose of open space management and collect monitoring data to evaluate project success.
	P15	Designation and evaluation of trail improvement project proposals will be based on the environmental sustainability and on best available data, including inventories of wildlife, and vegetation resources. The City will undertake site specific and programmatic efforts to extend and improve upon the biological data and recreational benefits underlying its decision-making criteria.
ES-5 Expand Ability	P16	Develop written agreements with volunteer groups to perform natural resource management tasks.
	P17	The City will lead, coordinate, or partner with institutions, agencies, and organizations when conducting natural resource management activities.
	P18	Expand volunteer restoration programs subject to established protocols to ensure optimal environmental protection.

Table 7-2: Environmental Sustainability Policies (Continued)

DRAFT

BALANCED RECREATION USE (BR)		
OBJECTIVE	POLICY	DESCRIPTION
BR-1 Balanced Recreation Uses	P19	Trail access should be provided for a range of user capabilities and needs (including persons with physical limitations) in a manner consistent with State and Federal regulations. The Americans with Disabilities Act Accessibility Guidelines for Outdoor Developed Areas will inform trail improvement and maintenance where conditions permit.
	P20	Design and improve trails to facilitate safe trail use by all visitors with a focus toward slowing travel speeds, adjusting sight lines, and establishing safe passing zones.
	P21	The City may prohibit certain trail uses or apply increased trail use restrictions within certain areas to enhance safety, minimize conflicts between trail users, and protect natural resources in sensitive resource areas.
	P22	Maintain high quality visitor experiences.
	P23	Diversify recreation opportunities in the open space areas, subject to policies that apply to all users of these areas.
BR-2 Trail Management	P24	Authorized trailheads include site and trail identifying signage, allowed uses, posted trail map, garbage can with securable lid, and a dog waste bag dispenser.
	P25	Monitor and evaluate open space trail conditions on City open space lands to identify significant erosion, informally created trails, trail redundancy or otherwise unnecessary trail segments.
	P26	Maintain trails by improving drainage, hardening, widening based on critical evaluations, and in accordance with trail building standards in Section 3.5.3, or equivalent sources.
	P27	Conduct any grading activities necessary for trail maintenance before soil conditions inhibit their excavation, movement, and compacting.
	P28	Modification to any open space resources on open space lands is prohibited unless authorized personnel have given express approval to perform such tasks, including trail construction, improvement, closing, or decommissioning trails.
	P29	Authorized trails must have wayfinding signage and associated naming conventions.
	P30	Evaluate opportunities to construct new trails that could connect with other regional trails, with existing City recognized trails, and by designating other trails not currently formally recognized as part of the City's open space trail system.
	P31	Evaluate opportunities to implement trail calming design features.

Table 7-3: Balanced Recreation Use Policies (Continued)

BALANCED RECREATION (BR)		
OBJECTIVE	POLICY	DESCRIPTION
BR-3 User Compatibility	P32	To provide visitor opportunities to experience natural sounds, no amplified sounds – i.e. portable speakers – are allowed on open space lands unless expressly approved as part of a group activity permit.
	P33	On multiuse trails, the following etiquette rules apply: cyclists yield to all other trail users, pedestrians yield to equestrians. Downhill travel yield to uphill travel. Maintain safe speeds and announce yourself when passing.
	P34	Use of Belmont open space lands is subject to the City's existing regulations, including hours of operation. Entry into Waterdog Lake is prohibited.
	P35	On multiuse trails, follow best practices and City Code re: : group size s. Groups of 25 or more require a permit under City code (Ch 16, Article II, Sec 16-28).
BR-4 Enhance Partnerships	P36	Develop written agreements with volunteer groups to perform trail maintenance or construction tasks.
	P37	Identify locations where trails can be improved or established in open space to connect the City and other open space areas neighboring Belmont, such as Sugarloaf Mountain. Coordinate with San Mateo County and the City of San Mateo.

Table 7-4: Balanced Recreation Use Policies (Continued)

Belmont Open Space Views

NATURAL HAZARD MITIGATION (NH)		
OBJECTIVE	POLICY	DESCRIPTION
NH-1 Wildfire Hazards	P38	Evaluate the potential to reduce forest fuel loading through the removal of smaller trees to reduce forest floor fuel buildup and ladder fuels.
	P39	Prepare wildland fire response plans and include suppression activities, first responders, mutual aid agreements, as well as detailed maps of infrastructure and sensitive resources to be avoided.
	P40	Prohibit activities that have a high risk of sparking fires during periods of extreme fire hazard.
	P41	Close open space areas of particular concern during extreme fire weather, as determined by San Mateo Consolidated Fire Department, and increase patrol levels where appropriate.
	P42	Consider use of a grazing program to reduce grassland fuels, brush encroachment, and encourage the vigor of native grass and forb species.
	P43	Manage scrub, shrub, and chaparral communities to maintain a mosaic of ages and species within strategic management corridors on roads, ridgetops, and near residential development or other critical infrastructure to compartmentalize preserves and reduce fuel loads.
	P44	Minimize and reduce ground disturbance, erosion, and rehabilitation efforts associated with heavy machinery fire suppression.
	P45	Develop guidelines for post-fire appropriate rehabilitation measures to address erosion, revegetation, invasive species, trail and road stability, security, public safety, and natural and cultural resources.
	P46	Limb fallen trees/branches to reduce aerial fuels along trails.
NH-2 Protect Life and Property	P47	Manage dead and dying trees to limit wind throw and falling trees and limbs.
	P48	Manage severe erosion areas on hill slopes and near/within streams.
	P49	Respond to trail and open space impacts resulting from severe weather, landslides, or other natural events.
NH-3 Improve Cooperative Planning	P50	Participate in county Fire Safe Councils and any relevant Community Wildfire Protection Plan (CWPP) efforts.
	P51	Partner with abutting property owners to manage adjacent vegetation and fuel levels.
	P52	Work with PG&E to identify areas where wildlife risks could be reduced through increased vegetation management and/or transmission line undergrounds.

Table 7-5: Natural Hazard Mitigation Policies

THIS PAGE INTENTIONALLY LEFT BLANK

DRAFT

DRAFT

PART 3.
HOW WE GET THERE

CHAPTER 8

RECOMMENDATIONS

This chapter proposes future improvements derived from the existing conditions analysis, community feedback, and needs assessment presented earlier in this plan. They directly respond to the Strategies presented in the previous chapter.

Recommendations include upgrades, additions, and reconfigurations specific to individual PROS sites as well as proposed improvements for the entire PROS system. This chapter also recommends improvements specific to Belmont's open spaces.

OVERVIEW

The PROS Plan presents a comprehensive set of Recommendations that are derived from the analyses and considerations that guided this study. The Recommendations directly respond to the Strategies presented in the previous chapter, focusing on the equitable distribution of amenities throughout the community. Recommendations were bolstered by the community engagement process, which served as a key component of the PROS Plan.

SYSTEM-WIDE

System-wide Recommendations are potential pathways to carry out established Goals and Strategies across the entire PROS system. They are informed by a holistic review of Belmont's unique outdoor resources, established best management practices for the region, and new, creative approaches to increase visitation and usage.

PARK-SPECIFIC

This chapter provides a detailed map of each park and locates potential improvements, informed by the site assessments and inventories, to satisfy the park's Standard Baseline Amenities requirement as dictated by its individual Park Typology.

OPPORTUNITIES

This chapter presents ideal locations for new parks to increase access to public green space in a strategic manner. This section also outlines potential joint-use agreements (JUA) with local schools to offer additional recreational opportunities.

OPEN SPACE

This chapter also proposes improvements for Belmont's open spaces, focused on striking a balance between recreational use, environmental preservation, and the reduction of natural hazards.

SYSTEM-WIDE

The System-wide Recommendations are listed alphabetically below, associated with the Big Idea and Strategy that informed it.

ACTIVATION PLAN

THE CITY AS YOUR BACKYARD, Strategy 2.G

An Activation Plan is an initiative to energize existing and future PROS sites with recreation programming, community events, and unique activities. People make places, and an active PROS site increases interest and use in the space. An Activation Plan focuses on means and methods to increase activity with unique programming such as a book festival, self-defense class, dog training workshop, picnic day, and other reoccurring or one-off events specific to the community's interests. An Activation Plan can focus on a specific site or the entire system—Twin Pines Park and the Belmont Sports Complex represent opportunities for further activation to attract and engage residents, employees, and visitors of Belmont.

INCLUSIVE + ALL-ABILITIES PLAY

OUTDOOR RECREATION FOR ALL, STRATEGY 4.F

The cultural and social values of diversity, equity, and inclusion are core to the City of Belmont. An inclusive PROS system is reflected in the Guiding Principles and Goals of this plan. Multiple Strategies reference recreation opportunities that are designed for a diverse population of visitors.

The System-wide Recommendation for Inclusive+All-Abilities Play proposes that all playground upgrades and replacements in the PROS system evaluate the inclusion of these elements and principles in their design. Further, all Community Parks in Belmont should only upgrade existing playgrounds with Inclusive+All-Abilities playgrounds going forward. Open space trail accessibility improvements could include efforts to ensure that several segments can accommodate mobility devices, each offering distinctive recreation experiences. In doing so, Belmont will enrich the quality of life for all residents.

INTERCONNECT TOOLKIT

THE CITY AS YOUR BACKYARD, Strategy 1.B

An Interconnect Toolkit is a means to facilitate active transportation to and between parks. Beyond routes to increase ease of access to PROS sites for walking, biking, and public transport, the Toolkit should consider bicycle racks and repair stations, water stations (with bottle-filling and dog bowls), seating, and route information along the interconnections.

The Interconnect Toolkit should be used in collaboration with Safe Route to Parks. A joint effort between the National Recreation and Parks Association (NRPA) and Safe Routes Partnership, Safe Routes to Parks is a program that promotes safer and easier access to PROS sites via walking, biking, and public transportation. Belmont has identified a need to increase access and connectivity to parks. Utilizing the Safe Routes to Parks framework will guide the City to create connections and increase access to the existing PROS sites.

POP-UP PARK INSTALLATIONS

THE CITY AS YOUR BACKYARD, Strategy 3.B

Belmont has limited opportunity to increase parkland acreage as an almost fully developed city. There are areas and neighborhoods of the City that have low access to and are underserved by the existing parkland. A possible method to increase recreational opportunities to address this gap is a pop-up park installation, which can take many forms:

- **Public parklets** can activate an underutilized pocket of the urban environment, such as on-street parallel parking spots or off-street parking lots, to increase community gathering space. Parklets can be temporary, or they can be implemented as a more permanent conversion to vibrant public space.
- A **mobile recreation vehicle** can bring temporary recreation and play elements to an underserved area or existing PROS site to invigorate or supplement existing amenities. Examples of play and programming possible with a mobile recreation vehicle are portable basketball hoops, skate ramps, health and wellness workshops, arts and crafts, board games, and movable lawn games.
- **Pop-up play experiences** are movable play elements and materials that can be located in a PROS site for a period of time to supplement a community, test a play amenity without committing to permanent installation, or increase the experience at a site for a period of time or event. Pop-up play experiences can rotate through PROS sites or be a one-off installation. They can be easy integrated with other programs and recreational offerings and should feature creative play opportunities aligned with new trends and evolving community interests.

Pop-up Park Installation Example: Park + Play

Pop-up Park Installation Example: Foam Blocks

SOCIAL GATHERING SPACE

THE CITY AS YOUR BACKYARD, Strategy 2.B

Social gathering spaces are an intrinsic element of our public parks and open spaces. This could be a bench to chat with a neighbor, a picnic table to eat with friends, or a reservable picnic area to host an outdoor celebration event. All developed parks in Belmont have a bench, and almost all have at least one picnic table.

The Vision Statement for the City defines the community character with "We connect with each other in all kinds of gathering places." As social gathering places for people of all ages, abilities, cultural backgrounds, and lived experiences, PROS sites are important public spaces that foster social connections and serve as community hubs. Successful spaces for interaction are places where people—often from many parts of the community and/or diverse backgrounds—meet naturally and interact comfortably because of the nature or attraction of the space and its associated activities. In addition to providing a natural green area, parks offer playgrounds, picnic tables and grills, sports fields, and other facilities bringing together adults and children alike.

Gathering spaces can build community connections to increase social cohesion, or the strength of relationships and the sense of solidarity among members of a community. Community cohesion is a social determinant of health, also known as the conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of quality-of-life outcomes and risks.

Seating locations to promote social interaction and lingering—an intentional lengthening of a park or public space visit due to it being enjoyable to remain—should generally follow these guidelines:

- Place seating with a view of the action while removed from the main flow of pedestrian traffic.
- Consider innovative and untraditional seating options to offer unique and memorable visitor experiences.
- Orient several benches at 90° to 120° angles rather than linear rows, allowing groups to face each other.
- Provide both clustered and isolated seating opportunities for various levels of privacy.
- Offer seating in both the sun and the shade, ideally with protection from wind and rain.
- Space seating opportunities with enough room for a wheelchair to fit between to engage in the group conversation in a comfortable manner.
- Supply both fixed and movable seating elements (where feasible).

Social Gathering Space Example: Unique Seating Elements

Buckeye Reservable Picnic Area in Twin Pines Park

USAGE STUDY

THE CITY AS YOUR BACKYARD, Strategy 3.D

Usage Studies gather measurable data about usage patterns to understand how to best optimize the limited resources that are available to the Parks and Recreation Department. The gathered measurements provide data to evaluate many aspects of a park or open space site, such as quantity of visitors, amenity utilization, high- or low-traffic areas, access points and methods, group sizes, and more. Usage measurements quantify the use of PROS sites and amenities, including characteristics of their users, and can inform PROS management about other issues related to sites usage.

Without measurements, it is impossible to know whether a PROS system is meeting the needs of its community members. The PROS Plan Community Survey asked respondents for data similar to what can be gathered in a Usage Study, but a Usage Study can generate more precise and accurate information than a general survey.

Assessments can be as simplistic or detailed as staffing, budget, and schedule allow. Studies can be for a point in time (meaning conducted once to create a snapshot of usage during a specified duration) or over time (meaning a study conducted annually, or seasonally) to compare changes. There are benefits and costs associated with both, and based on the usage measurements requested, either can achieve the desired results.

Methods to measure park usage are numerous. Systematic observation is the most commonly used. With representative times of day and days of the week, a general estimate of a PROS site utilization can be determined either through on-site observations or various technological approaches such as park behavior mapping. Typically, observation is done at both peak and low-use times for a broader understanding of site and amenity usage and users. Site or amenity usage measurements can be extensive, including duration of use per user, quantity of users in a certain time frame, circulation patterns around or into a site, and more. User characteristics can range from simple (counting quantity of users) to more detailed, including estimated age group, race/ethnicity, and level of physical activity (such as sedentary, moderate, or vigorous).

A Usage Study at Hidden Canyon Park, for example, would allow staff to understand this undeveloped park's current conditions and visitor activities. Subsequent and periodic Usage Studies at this location, as the recommended park improvements are implemented in phases, would provide useful feedback and highlight any impacts or changes to the site and surrounding community. Follow-up Usage Studies are most valuable when conducted following the same methodology and timing as the initial Usage Study.

Usage Study Example: Park Behavior Mapping

Usage Study Example: Observation

PARK-SPECIFIC RECOMMENDATIONS

INCREASING MAGNITUDE OF RECOMMENDATIONS

Magnitude	EXISTING MASTER PLAN	MINOR IMPROVEMENT	UPGRADED OR NEW AMENITY	PARK REDESIGN	UNDEVELOPED PARKS	NEW PARK OPPORTUNITY
Existing Condition	Master plans recently adopted Created with extensive community input	Parks recently developed or in very good condition	Current park functioning well	Rethink accessibility and park layout No change in use	Existing park is undeveloped	Add parkland To fill gaps in park access City-owned property
Recommendation	Implement existing master plan	Minor improvements identified to maintain high quality	Upgrade existing amenity or new amenity to meet identified needs or gaps	Undertake park design plan	Develop and amenitize site	Create, develop, and amenitize site

Figure 8-1: Recommendations Spectrum

RECOMMENDATION MAGNITUDES

Each park in the City was evaluated for access, proximity, and available space to host new or enhanced amenities. The Recommendation Spectrum was used to outline and contextualize the Park-specific Recommendations presented in the PROS Plan. This tool organizes improvements by the magnitude of change, spanning from the creation of a new park to the implementation of a minor improvement or existing master plan. The Recommendation Spectrum is used to frame Park-specific Recommendations for the Community Park, Neighborhood Park, and Undeveloped Park Typologies. It is not applied to schools with joint-use agreements (JUA) because the sites are owned by Belmont Redwood Shores School District (BRSSD). It is also not applied to the Open Space Park Typology, because management of these sites is covered in a separate section given the unique considerations for these valuable resources.

The following section defines the magnitudes as shown in Figure 8-1 and presented in Table 8-1.

EXISTING MASTER PLAN

Two parks in Belmont have recently adopted master plans: Twin Pines Park Master Plan (2019) and Barrett Community Center Conceptual Design Plan (2020). Creation of these master plans utilized extensive public engagement efforts to inform the preferred amenities. The PROS Plan recommends implementing the master plans for these two parks.

MINOR IMPROVEMENT

Several parks require only minor adjustments to meet the Standard Baseline Amenity requirements as outlined by their Park Typology. These parks feature amenities identified as being in good condition.

UPGRADED OR NEW AMENITY

These parks are functioning well but have the ability to meet community needs to a higher degree with upgraded or new amenities. In some instances, the amenities are nearing the end of their usable life and have been identified for replacement.

RECOMMENDATION MAGNITUDE PER PARK SITE		
SITE	PROPOSED TYPOLOGY	RECOMMENDATION MAGNITUDE
Alexander Park	Neighborhood Tier 2	Upgraded or New Amenity
Barrett Community Center	Community	Existing Master Plan
Belameda Park	Community	Upgraded or New Amenity
Belmont Sports Complex	Community	Upgraded or New Amenity
Cipriani Park	Neighborhood Tier 2	Park Redesign
College View Park	Neighborhood Tier 1	Minor Improvements
Davey Glen Park	Neighborhood Tier 2	Minor Improvements
Hallmark Park	Neighborhood Tier 2	Park Redesign
Hasting Tot Lot Park	Neighborhood Tier 1	Park Redesign
Hidden Canyon Park	Neighborhood Tier 2	Undeveloped Park
McDougal Park	Community	Upgraded or New Amenity
O'Donnell Park	Neighborhood Tier 2	Upgraded or New Amenity
Patricia Wharton Park	Neighborhood Tier 1	Minor Improvements
Ralston Ranch Park	Neighborhood Tier 2	Undeveloped Park
Semeria Park	Neighborhood Tier 2	Minor Improvements
Twin Pines Park	Community	Existing Master Plan
Wakefield Park	Neighborhood Tier 1	Minor Improvements

Table 8-1: Park Recommendation Magnitudes

PARK REDESIGN

Three parks are considered poorly accessible or under-utilizing their acreage. These sites have been identified for a park redesign including creation of design master plans for accessibility-related improvements.

UNDEVELOPED PARK

There are two sites considered Undeveloped Parks by the Parks and Recreation Department, both recommended for development into Neighborhood Parks Tier 2.

NEW PARK OPPORTUNITY

As an almost completely built-out city, there are limited opportunities to increase parkland acreage or improve access coverage in low-access areas. Recommendations for opportunity sites work towards improving both. As potential new PROS sites, these areas would need extensive improvement.

SCHOOL (JUA)

The City has a JUA with BRSSD for four school athletic fields, which allows limited public access to the field outside of school hours. The City provides landscape maintenance for the athletic field and shares the cost of water. Since the City does not own this land, recommendations for these sites will require a consensus agreement and cost-sharing with BRSSD to implement. Recommendations for School (JUA) sites are not evaluated by the Recommendations Spectrum.

OPEN SPACE

Open Space recommendations are not included in the Recommendations Spectrum. These sites are discussed in more detail in the Open Space Management Plan (OSMP).

RECOMMENDATIONS MAP

The following pages illustrate the Park-specific Recommendations and identify opportunity sites for future park and recreation amenities. Each PROS site has a Recommendations Map with a legend illustrating how to read the recommendation symbols. If a recommendation symbol does not have a number, it indicates that the recommendation is park-wide or otherwise does not have a specific location.

STANDARD BASELINE AMENITIES

All sites are measured against the Standard Baseline Amenities requirement for their assigned Park Typology. For most sites, the Standard Baseline Amenities are already existing; for some sites, the park is lacking one or more. Some parks have been assigned a new Park Typology, and some parks are undeveloped and therefore lack the Standard Baseline Amenities for any Park Typology. The Standard Baseline Amenities are identified on each Recommendations Map and can be referenced in Table 8-2 below.

STANDARD BASELINE AMENITIES

NEIGHBORHOOD PARK (TIER 1)

- (a) Natural Environment
- (b) Seating
- (c) Identifiable Amenity

NEIGHBORHOOD PARK (TIER 2) *

- (a) Natural Environment
- (b) Seating
- (c) Play Amenity
- (d) Picnic Opportunity
- (e) Multi-Purpose Flexible Space
- (f) Recreation Amenity

COMMUNITY PARK

- (a) Natural Environment
- (b) Seating
- (c) Play Amenity
- (d) Picnic Opportunity
- (e) Multi-Purpose Flexible Space
- (f) Recreation Amenity
- (g) Off-Street Parking
- (h) Permanent Restroom
- (i) Athletic Field or Community Facility

Table 8-2: Standard Baseline Amenities

** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

Note: School (JUA) and Open Space Park Typologies do not have Standard Baseline Amenities.

DRAFT

RECOMMENDATION TYPES

Recommendations that go beyond Standard Baseline Amenities are grouped by category, defined below.

ACCESSIBILITY

This classification includes enhancements which increase safety and enhance circulation to and within the park. Accessibility improvements are intended to ensure that community members of all abilities have an equal opportunity to enjoy parks and outdoor facilities. Examples of accessibility improvements include:

- **Path additions** – adding new paths to connect all amenities and offer continuous walking loops.
- **Path improvements** – implementing minor repairs or improvements to existing paths or rebuilding path components (e.g., entrance stairs, ramps, and pathways) to comply ADA standards.
- **Technology** – offering free Wi-Fi internet for safety and convenience.
- **Neighborhood connectivity** – adding crosswalks to connect to adjacent parks, trails, schools, and community gathering locations.
- **Parking** – increasing standard and/or ADA parking spots, increasing off-street parking spots, and adding bicycle repair stations.
- **Placemaking** – increasing visibility and adding art features, murals, or entrance and gateway improvements.

AMENITY

Park amenities are the physical features that visitors directly interact with. Facilities are defined as features with larger footprints like sport courts, gathering spaces, bike tracks, play structures, and shade structures. Equipment differs from facilities in that these have a smaller footprints and consist of individual items like outdoor fitness elements, benches, picnic tables, bicycle repair stations, BBQs, storage sheds, trash receptacles, and drinking fountains. Examples of amenity improvements include:

- **Enhance facilities** – resurfacing and restriping courts, modernizing play structures, rejuvenating outdoor classroom space, creating safety barriers between play structures and busy streets.
- **Enhance equipment** – repairing and relocating features to optimize use, reorienting seating elements to improve view, and replacing furnishings at or near their end of usable life.
- **Amenity additions** – installing new and attractive facilities and equipment.
- **Programming** – collaborating with schools, creating reservation systems for equipment and facilities, and promoting accessible social gathering spaces.

LANDSCAPE

Landscaping features are natural elements that visitors passively interact with, serving as a critical piece of the user experience. The proposed landscaping actions offer benefits such as increasing habitat and food sources for local wildlife populations or extending the use of recreational amenities. Examples of landscape improvements include:

- **Native plants** – expand native planting areas.
- **Maintenance** – maintain existing landscaping (monitor and replace as needed).
- **Signage** – Add interpretation elements such as educational and wayfinding signage.
- **Increase usage** – Transition some existing fields to synthetic turf where feasible to increase annual usable time.

ALEXANDER PARK

NEIGHBORHOOD-SERVING RECREATION OASIS

ICON LEGEND

- Existing Standard Baseline Amenity
- Recommendation: Add Standard Baseline Amenity
- Recommendation: Add accessibility, amenity, or landscape *(Specific location recommended within the park)*
- Recommendation: Add accessibility, amenity, or landscape *(Apply throughout the park OR has numerous possible locations)*

ALEXANDER PARK

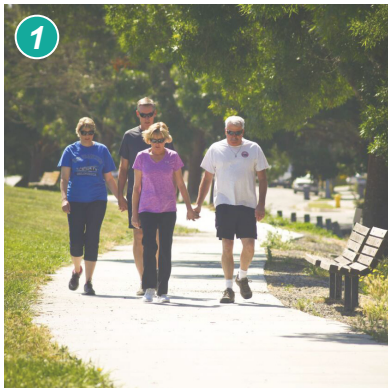
RECOMMENDATIONS UPGRADED OR NEW AMENITY

NEIGHBORHOOD PARK TIER 2 STANDARD BASELINE AMENITIES

- (a) Natural Environment
- (b) Seating
- (c) Play Amenity
- (d) Picnic Opportunity
- (e) Multi-Purpose Flexible Space
- (f) Recreation Amenity

ACCESSIBILITY

- Park redesign plan for proposed park amenities
- 1 Continue looped walking path around lawn
- 2 Provide ADA-accessible path to existing and new amenities
- 3 Increase visibility and celebrate the park by enhancing the street entrance experience (incorporating art, such as murals, along the entrance access)



AMENITY

- 4 Resurface and re-stripe tennis courts to include pickleball *(completed Summer 2022)*
- 5 Repair/replace BBQs
- 6 Add bocce ball court
- 7 Replace an existing playground with Inclusive+All-Abilities Play*
- Increase seating opportunities

LANDSCAPE

- 8 Monitor Oak tree
- Enhance existing plantings with native and drought-tolerant species
- Maintain high-quality landscape condition across the site
- Expand tree canopy and shade with tree plantings (maintain central lawn without obstruction)

CHARACTER IMAGES

Looped Walking Path(s)

OPPORTUNITIES

NEW PARK OPPORTUNITY SITES

The PROS Plan identifies three potential sites for new parks in Belmont. As an almost completely built-out City, there are limited opportunities for new park sites. All sites are on land currently owned by a public entity. These sites should be considered as opportunities to provide additional park acreage to Belmont residents.

RALSTON AVENUE + OLD COUNTY ROAD

There is an opportunity for a new park at the intersection of Ralston Avenue and Old County Road in the Sterling Downs and Homeview neighborhoods. The site straddles Ralston Ave and is between the Caltrain tracks and Old County Road.

This area was proposed for a Park/Plaza land use classification in the Belmont Village Specific Plan (2017). This designation highlights places that may be suitable to serve the outdoor recreational needs of the community on publicly-owned land. Areas with this designation may consider amenities such as play structures, seating, fountains, public art, and special landscape features, as well as walkways and trails that are part of larger circulation networks.

During the PROS Plan process, this site was recognized during the Housing Element 2023-2031 update process as a potential housing opportunity. Recommendations for improvements to this site may be temporary, pending the development of the downtown area. The City is evaluating all development options at this location.

OAK KNOLL DRIVE

Oak Knoll Drive is a residential street that terminates in a cul-de-sac with trees and planting in a dirt area at the center, located in the Central neighborhood. This site was identified by feedback from adjacent residents.

ALAMEDA DE LAS PULGAS

Alameda de las Pulgas is an arterial street that traverses Belmont from north to south. At the northern edge of the city, at the intersection with Forest Avenue the Cipriani and County Club neighborhoods, there are opportunities for new park space on either edge of the right-of-way.

POTENTIAL AGREEMENTS

The City has an existing JUA with BRSSD for four school sites: Central Elementary School, Fox Elementary School, Nesbit School, and Ralston Middle School. Public access to amenities through JUAs fluctuate over time. The City will continue to pursue opportunities as they arise. The City may consider establishing or expanding JUAs with the following schools, or other organizations, to facilitate and enhance public access to outdoor green space:

CRYSTAL SPRINGS MIDDLE SCHOOL

Crystal Springs Middle School is a private school located adjacent to Ralston Middle School. The City has an existing JUA in place. The site has a synthetic turf soccer field and a dual-use basketball and volleyball court that are ideal opportunities to expand recreation opportunities available for Belmont residents.

CARLMONT HIGH SCHOOL

Carlmont High School is an ideal opportunity to pursue a JUA with the Sequoia Union High School District. The school has seven tennis courts, two diamond fields, a track, a football field, and a basketball court that could supplement recreation amenities provided by the City.

NOTRE DAME HIGH SCHOOL

Notre Dame High School is located adjacent to the Notre Dame de Namur University (NDNU)/ Stanford University campus. The high school has multiple recreation amenities that could supplement opportunities available to Belmont residents, including a diamond field and volleyball courts.

NOTRE DAME DE NAMUR UNIVERSITY/ STANFORD UNIVERSITY CAMPUS

Currently, the City does not have a JUA with the NDNU/ Stanford University campus. There are two tennis courts, a soccer field, and undeveloped area on the north and east campus edges due to the topography. Entering into a JUA with the campus for public access to the tennis courts is a potential option to help maintain the Ideal Amenity Ratio. The undeveloped areas have unofficial trails connecting College View Park to campus and Ralston Avenue. Formalizing pedestrian access from the Central neighborhood to the campus is a potential opportunity to improve public access.

RETHINKING THE STREETSCAPE

Over 18 percent of Belmont land is public right-of-way. This public space is mostly dedicated to automobiles as travel lanes and parking. Aligning with other City planning documents, innovative approaches to allocate public right-of-way land will be imperative for establishing active transportation methods as attractive and efficient ways to move about the City. Transitioning our streets to prioritize the health and safety of pedestrians and bicyclists over vehicular movements will improve the quality of the streetscape and the connectivity of the PROS system as a whole.

Participants in the community engagement process were supportive of increasing the ease of access for walking and biking to PROS sites. Given the limited opportunities to develop new parks, enhancing the active transportation network will enable residents to further connect with existing recreational amenities. Parks with adjacent bus stops offer opportunities to ensure that children have a safe place to wait for the bus and navigate to school. By acknowledging the important role transportation systems have in our communities and their intersection with parks, the City can implement solutions that have two-fold benefits to the safety of residents, students, visitors, and employees alike. While specific streetscape improvement opportunities were not identified in this analysis, the PROS Plan supports further consideration towards underutilized right-of-way land and its potential to offer key connections to parks in Belmont.

Rethinking the Streetscape

FUTURE DEVELOPMENT PROJECTS

In addition to the opportunity site at Ralston Avenue and Old County Road, the Specific Plan notes that additional parks, open spaces, and public spaces are required to be provided in development projects on lots over 12,000 square feet within the Village Core, Station Core, and Village Corridor Mixed Use area. As parcels within these districts are redeveloped in the future, the PROS Plan encourages projects on these sites to feature public green space components, such as a pocket park or plaza, specifically near new housing developments. The City will continue to seek opportunities with property owners and housing/commercial developers to offer additional amenities, such as tennis courts and synthetic turf fields, to the growing Belmont community.

INCREASE IN PUBLIC PARKLAND

As noted in earlier chapters, Belmont provides 3.5 acres of parkland and 15.5 acres of open space acreage per 1,000 residents. The General Plan has a goal of 5 acres of parkland per 1,000 residents with no acreage goal for open space. While the identified opportunities do not reach the desired parkland ratio from the General Plan, any increase in publicly-available green space is beneficial and should be pursued given the increase in housing projects as a result of the 2023-2031 Housing Element update process. Opportunity sites may increase park access in neighborhoods with lower parkland acreage per resident. Parkland acreage with opportunity sites is shown in Table 8-3.

PARKLAND ACREAGE WITH OPPORTUNITY SITES

PARK TYPE	TOTAL ACRES	ACRES PER 1,000 RESIDENTS
Neighborhood Parks	23.4	0.9
Community Parks	44.7	1.7
Schools (JUA)	23.4	0.9
New Park Opportunity Sites	0.9	0.03
Potential Agreements	7.1	0.3
Total	99.5	3.8

DRAFT

OPEN SPACE RECOMMENDATIONS

The Open Space Recommendations were generated from existing City goals and policies for protecting and managing open space areas, feedback from the community, the Environmental Assessment, and the Recreation Use Assessment. The findings of the Environmental Assessment and Recreation Use Assessment are found in Chapter 3 and the Open Space Objectives and Policies are found in Chapter 7. The full OSMP is found in the Appendix.

Each Open Space Recommendation is assigned a rating as easy, medium, or hard to implement. The feasibility designation scale incorporates two aspects by which an action can be evaluated: the operational capacity of the City's existing programs, funding, and staff to implement the action, and the scope of the action. Definitions of the ratings are found in Table 8-6.

Tables 8-7, 8-8, and 8-9 present the Open Space Recommendations by Theme (listed below) and ties them to the Policy it is responding to.

OPEN SPACE RECOMMENDATION RATINGS	
CATEGORY	DESCRIPTION
EASY	These actions can be performed immediately under existing City programs, funding, or with minimal additional effort.
MEDIUM	These actions require additional planning, equipment, staffing, funding—either internal or external, or other operational changes.
HARD	These actions may require substantial planning, interagency coordination, staffing, funding, or other operational changes.

Table 8-6: Open Space Recommendation Ratings

OPEN SPACE THEMES

- ENVIRONMENTAL SUSTAINABILITY
- BALANCED RECREATION USE
- NATURAL HAZARD MITIGATION

Views from Belmont

ENVIRONMENTAL SUSTAINABILITY		
EASY	MEDIUM	HARD
1. Provide educational materials on Sudden Oak Death (SOD) and information about how to minimize the spread of SOD at high use trailheads. (P5)	1. Realign, add drainage, or otherwise improve trail sections identified in the Recreation Use Assessment as having "high" erosion levels. The Rambler Trail was identified as a top priority given its severity. Prioritize other trail segments for improvement and incorporate into a multi-year workplan. (P13/P26)	1. Periodically inventory trails and facilities to assess any impacts to watercourses, riparian areas, and wetlands, and prepare plans for protection or restoration, as appropriate. (P3)
2. To the extent possible, avoid vegetation management activities during nesting bird season, February 1 to August 31. If nesting bird season cannot be avoided, conduct nesting bird surveys per California Department of Fish and Wildlife (CDFW) guidance. (P9)	2. Implement an "early detection and response" protocol as defined in the Environmental Assessment, to monitor and control new or spreading exotic or undesirable species. Create an agreement and work plan with existing volunteer groups to perform the work in accordance with the protocol. (P6/P16)	2. Conduct protocol surveys for sensitive wildlife or plant species, as defined by the USFWS or CDFW, in areas where these species have at least moderate potential to occur, whenever conducting ground disturbing activities. (P2)
3. Temporarily close trails during extremely wet conditions. Temporary closure periods will be determined by City staff based on evaluation of conditions and forecasted weather patterns. (P13)	3. Actively seek additional funding sources to support natural resource management. (P17)	3. Improve trail stream crossings by either realigning the trail to prevent crossing the stream altogether or elevating the trail over the stream. (P3/P4/P9/P13)
4. Prohibition of dogs in water bodies. Dogs are not allowed to enter any water bodies, including streams and marshes, on open space lands. Messaging and signage and education should be developed. (P13)	4. Restore and expand native bunchgrass areas. (P2/P6/P18)	
5. Avoid ground disturbing activities like trail maintenance and construction activities prior to rain events. (P13)	5. Install wildlife cameras at high activity locations or in riparian habitats to monitor wildlife presence. Coordinate with local agencies and non-profits (e.g. Felidae) to share wildlife camera data to support wildlife distribution study regionally. (P7/P17)	
6. Engage volunteer groups to monitor plant and wildlife species using citizen science efforts like Audubon Christmas Bird Count or "bio-blitzes." (P5/P10)	6. Install decontamination stations at high use trailheads to prevent the spread of SOD. (P5)	

Table 8-7: Environmental Sustainability Open Space Recommendations

BALANCED RECREATION USE		
EASY	MEDIUM	HARD
1. Increase education and enforcement of open space regulations including dogs on leash, speed limits, amplified sound, etc. (P23/P32)	1. Designate existing connection routes or build new trails between open space areas and to other adjacent protected lands. (P30/P35)	1. Implement an e-bike pilot program similar to existing regulations on nearby Midpeninsula Regional Open Space District. The City will observe the effects of the pilot to determine if additional studies, outreach, and policies are needed. (P21/P23)
2. Periodically conduct visitor surveys to gauge experiences for all trail users. (P22)	2. Implement single-use and one-way trail segments in areas identified in the Recreation Use Assessment following sufficient public outreach. (P21)	2. Add calming features on trails to reduce speed, and add landings for respite, passing, and vistas. (P20/P31)
3. Clearly identify property boundaries of open space lands and develop an education and enforcement program for adjacent landowners conducting illegal modifications to open space lands (e.g. building trails to access open space lands from their house or neighborhood). (P28)	3. Evaluate potential new nature-based recreation programming for open space lands. Specifically, collaborate with environmental educators or other groups to develop a series of docent led nature walks for a variety of audiences. (P22/P23)	
4. Develop a standard trail naming policy for designated trails. The naming policy will be adopted on all open space signage and messaging. (P29)	4. Incorporate or decommission trails identified in the Recreation Use Assessment following further public outreach. (P20)	
5. Update regulatory signage at trailheads to use a consistent design across City open space lands. (P24)	5. Decommission redundant trail segments. Conduct de-compaction and revegetation where needed. (P1/P20)	
	6. Develop a policy for managing organized group use of open space lands, such as camps, school field trips, and exercise classes. (P23)	
	7. Identify three trail segments that can be made ADA compliant which offer the following visitor experiences: travel along a ridgeline, travel along a canyon floor, and panoramic views. (P19)	

Table 8-8: Balanced Recreation Open Space Recommendations

DRAFT

NATURAL HAZARD MITIGATION		
EASY	MEDIUM	HARD
1. Widen existing fuel breaks and treated wildland-urban-interface areas. (P47)	1. Remove invasive Acacia trees which pose a significant threat of casting embers during fire. (P38)	1. Inventory City open space lands to assess fuel loads and forest structure related to fire. Identify access issues and City and community or regional fire concerns. (P38)
2. Trim trees and mow or remove invasive species ladder fuels along trails to maintain tree health and minimize crown fire. (P38)	2. Create "islands" of vegetation by thinning in steepest areas and fuel breaks to break up crown fires and reduce potential erosion and preserve habitat. (P43)	2. Conduct a field-based evaluation of fuel conditions in SJC and WDL for possible further fuel reduction treatments. (P38)
3. Continue fuel reduction treatments in previously treated areas in WDL. (P38)	3. Remove invasive species from areas recently cleared for fuel reduction. (P38)	3. Coordinate with fire agencies and neighboring communities to identify locations where additional fire suppression infrastructure is desirable and practical (e.g. hydrants, water tanks, helicopter zones, safety zones, fuel breaks, consistent with the incident command system. Work cooperatively with these groups to install needed infrastructure. (P39/P51)
	4. Develop annual fuel reduction treatment plan. (P39)	
	5. Encourage neighboring property owners to maintain adequate fire clearance around existing development. Consult with regulatory agencies to encourage that construction of new development maintains fire agency recommended setbacks for fire clearance between new development and City forest and woodland. (P51)	
	6. Actively seek additional funding sources to support wildfire hazard mitigation. (P38/P39)	
	7. Develop emergency response plan for extreme weather, landslides, and resulting trail impacts. (P49)

PART 3.
HOW WE GET THERE

CHAPTER 9

IMPLEMENTATION

Implementing the PROS Plan will require multiple funding sources over many years. As such, prioritizing actions to meet the most pressing needs will be necessary to successfully improve the PROS system in an equitable and efficient manner. Recommendations presented in the previous chapter have been prioritized to guide future decisions for the sequencing of improvement projects. This chapter also discusses the methods used for prioritization, funding mechanisms, and partnership opportunities.

OVERVIEW

The PROS Plan is intended to be a living document to guide implementation over the next 15 years. As circumstances, opportunities, resources, trends, and demands evolve over the plan's horizon, criteria to prioritize implementation should be re-evaluated periodically, ideally every five years.

As opportunities arise, improvements will likely shift in relative importance and time frames for implementation will need to be adjusted accordingly. The criteria in this chapter will guide the decision-making process and determine which projects make the best use of available resources. The Action Plan compiles the next steps for implementation, broken down into short term, long term, or ongoing time frames.

The cost to implement the PROS Plan exceeds the City's financial resources. A variety of funding sources, such as the City's General Fund, department revenue, Development Impact Fees, assessments and bonds, grants, and partnerships are required to implement the improvements. Probable cost estimates for the Park-specific Recommendations were generated based on 2022 construction and implementation costs and are found in the Appendix. As the projects move closer to implementation, probable costs included in this PROS Plan will require adjustment for inflation.

CURRENT PROJECTS

Several City projects were underway during the planning process that further PROS Goals and Strategies.

- Twin Pines Park Belmont Creek Restoration
- Twin Pines Park Water Detention Basin
- Sports Complex Conference Center Roof Replacement *(completed December 2021)*
- Hallmark Park Tennis Court Resurfacing *(completed Spring 2022)*
- Belmont Village Streetscape Design Guidelines *(completed November 2022)*
- Alexander Park Tennis and Basketball Court Resurfacing *(completed Summer 2022)*
- Ralston Avenue Corridor Improvement Project Segment 3 *(completed September 2023)*

PRIORITIZATION

As funding to further develop PROS sites is limited and competitive, a prioritization approach is provided to guide the City in the gradual implementation of the PROS Plan. The prioritization of PROS Recommendations (referred to as "projects" in this section) is critical to ensuring that the City provides recreational opportunities that are accessible to all.

PRIORITIZATION CRITERIA

The following general criteria factored into the prioritization analysis:

- **Advances diversity, equity, and inclusion:** Projects that address inequities in services, improve PROS sites in underserved neighborhoods, increase access, or advance diversity, equity, and inclusion initiatives are a priority.
- **Aligns with other projects:** Some proposals align with or can be leveraged with other projects, either being undertaken by the City or other public agency. Projects or initiatives with multiple benefits, or those that advance the goals, projects, and directions of other City or County plans, often have more funding opportunities.
- **Funding availability:** Projects or initiatives for which the City has identified funding sources should be moved to active status as capacity allows, considering if the costs are one-time or recurring.
- **Reduces operating costs or generates revenue:** Projects or initiatives that can create additional revenue, improve maintenance or operations efficiencies, and conserve water or reduce water usage costs should be given high priority to move forward.
- **Quick win:** Some projects can be quickly implemented, demonstrating results to the community and meeting immediate needs. Quick wins maintain public engagement while longer term and more complicated projects are underway.
- **Time-limited opportunity:** Opportunities that arise may come with a time constraint. Time-limited opportunities that advance the City's goals should be leveraged with urgency.

PARK-SPECIFIC PRIORITIZATION

Park-specific Recommendations were prioritized by holistically evaluating all improvements proposed across the PROS system. The Prioritization Matrix allocates points to each proposed project based on the degree to which it meets the criteria. The Prioritization Matrix is a guide to implementation, not an absolute directive for the sequencing of site development. When funding sources become available, the City should pursue all opportunities for implementation of the most impactful and competitive projects.

PARK-SPECIFIC CRITERIA

The Recommendations were assigned point values for each of the four criteria, which represent the proposed project's ability to:

- Further PROS Plan goals
- Respond to community priorities
- Resolve an existing deficiency
- Address an existing condition

The sum of all values across each criteria informs the ranking, with higher values equating to higher priority. Table 9-1 summarizes the criteria and their associated possible point values.

GOALS

A point is assigned for each PROS Goal that a project furthers. All projects further at least one, with the average project furthering four.

COMMUNITY PRIORITY

A project was also assigned points based on community input received throughout the PROS planning process. Projects were categorized as high, medium, and not applicable—the high category, worth 5 points, was awarded if all or mostly all input was in support of the project type. For example, walking paths were heavily favored in the online survey; therefore, proposals for walking paths at any PROS site were awarded 5 points. The medium category, worth 3 points, contains projects that received a majority of supportive feedback, but opposition was noted. The "not applicable" category awards 0 points and includes projects with limited mention during the engagement process, approximately equal amounts of support and opposition, or it is related to operations and maintenance.

PRIORITIZATION CRITERIA		
CRITERIA	MEASURE	POINTS
Goals	Project furthers one or more PROS Goal. • Each Goal *(1 pt)*	0 - 12
Community Priority	Project supported by community input. Point assigned based on quantity of positive support. • Not applicable *(0 pts)* • Medium *(3 pts)* • High *(5 pts)*	0 - 5
Resolve Deficiency	Project address an existing deficiency identified in PROS Plan. • Demographic group *(3 pts)* • Underserved area of Belmont *(7 pts)* • Anticipated Areas of Increased Residential Density *(3 pts)* • New use *(3 pts)* • Availability of amenity/ use *(3 pts)* • Resolve access issues *(3 pts)*	3 - 22
Existing Condition	Project replaces or upgrades an existing amenity/site. • New or not applicable *(0 pts)* • Good *(0 pts)* • Fair *(1 pt)* • Poor *(2 pts)* • Critical or unsafe *(5 pts)*	0 - 5
Maximum points possible		*44*

Table 9-1: Prioritization Criteria

RESOLVE DEFICIENCY

Points were assigned depending on if a project addresses an existing deficiency. A project geared toward a specific, underserved demographic group (i.e. teens) was assigned 3 points. A project proposed in an area with low park access is assigned 7 points. A project in an area expected to densify (increase in residential units) was assigned 3 points. A project that proposes a new use for site, or a use not currently offered in the PROS system, is assigned 3 points. A recommendation to increase the quantity of an amenity beyond the identified Ideal Amenity Quantity to meet the Ideal Amenity Ratio, based on benchmarking and population projections, is assigned 3 points. A recommendation to increase or solve access issues to a PROS site or amenities within the site, such as paths, bicycle repair, and sidewalks, is assigned 3 points.

EXISTING CONDITION

Replacement or upgrade projects are assigned points based on the existing condition of the amenity. Items identified as critical or unsafe are assigned 5 points. Items identified in poor condition are assigned 2 points. Items identified in fair condition are assigned 1 point. Items in good condition or recommendations for an entirely new amenity received 0 points.

Points for all criteria were summed, revealing four top ranking projects as the highest priority for implementation.

- Replacing an existing playground at Alexander Park with an All-Abilities playground
- Upgrading the Barrett Community Center with Inclusive+All-Abilities Play
- Adding a skate park to the Ralston Avenue and Old County Road opportunity site
- Implementing the Belmont Community Center Conceptual Design Report (2020)

Prioritization allows the City to focus efforts rather than dictate an exact sequencing of projects. Not all projects have the same level of complexity or community engagement, nor do they have the same requirements related to coordination and funding. The full Prioritization Matrix is included in the Appendix.

SITE PRIORITIZATION

As a means to focus the City's efforts, the value of points assigned to projects at an individual site were averaged to highlight locations with the highest potential to positively impact the community. The average points were calculated by dividing the total points by the number of projects at each location.

The prioritization rankings are shown in Tables 9-2 through 9-5, which include existing parks (Neighborhood Parks and Community Parks), Undeveloped Parks, Schools (JUA), and New Park Opportunity Sites, respectively. Table 9-6 provides the combined prioritization rankings for all sites. Open Spaces were not included in this analysis.

PRIORITIZATION RANKINGS
*EXISTING PARKS **

SITE	AVG POINTS	SITE RANK
Alexander Park	14.5	1
O'Donnell Park	12.2	2
Belameda Park	11.5	3
Twin Pines Park	11.4	4
Barrett Community Center	10.9	5
McDougal Park	10.9	
Cipriani Park	10.4	6
Hallmark Park	10.4	
Wakefield Park	10.4	
Hastings Tot Lot Park	10.2	7
Patricia Wharton Park	10.0	8
College View Park	9.9	9
Belmont Sports Complex	9.4	10
Davey Glen Park	8.0	11
Semeria Park	7.8	12

** Includes both Neighborhood Parks and Community Parks.*
Note: Several parks are tied for the same rank. The tied parks are listed in alphabetical order.

PRIORITIZATION RANKINGS
UNDEVELOPED PARKS

SITE	AVG POINTS	SITE RANK
Ralston Ranch Park	18.0	1
Hidden Canyon Park	12.0	2

Note: Implementation of the recommendations for these sites would require further study and community outreach.

Table 9-3: Undeveloped Park Prioritization Rankings

PRIORITIZATION RANKINGS
*SCHOOLS (JUA) **

SITE	AVG POINTS	SITE RANK
Central Elementary School	10.0	1
Fox Elementary School	9.0	2
Nesbit School	9.0	
Ralston Middle School	9.0	

** Includes only existing JUAs.*
Note: Several parks are tied for the same rank. The tied parks are listed in alphabetical order.
Note: These sites are owned by BRSSD. Implementation of the recommendations would require consensus agreement and cost-sharing with the district.

Table 9-4: School (JUA) Prioritization Rankings

PRIORITIZATION RANKINGS
NEW PARK OPPORTUNITY SITES

SITE (UNDEVELOPED PARK)	AVG POINTS	SITE RANK
Ralston Ave + Old County Road *	21.9	1
Oak Knoll Drive	18.8	2
Alameda de las Pulgas	17.4	3

** Recommendations for this site may be temporary. The City is evaluating all development options.*

Table 9-5: New Park Opportunity Site Prioritization Rankings

OVERALL PRIORITIZATION RANKINGS

SITE *	AVG POINTS	SITE RANK
Ralston Ave + Old County Road *	21.9	1
Oak Knoll Drive	18.8	2
Ralston Ranch Park	18.0	3
Alameda de las Pulgas	17.4	4
Alexander Park	14.5	5
O'Donnell Park	12.2	6
Hidden Canyon Park	12.0	7
Belameda Park	11.5	8
Twin Pines Park	11.4	9
Barrett Community Center	10.9	10
McDougal Park	10.9	
Cipriani Park	10.4	11
Hallmark Park	10.4	
Wakefield Park	10.4	
Hastings Tot Lot Park	10.2	12
Central Elementary School	10.0	13
Patricia Wharton Park	10.0	
College View Park	9.9	14
Belmont Sports Complex	9.4	15
Fox Elementary School	9.0	16
Nesbit School	9.0	
Ralston Middle School	9.0	
Davey Glen Park	8.0	17
Semeria Park	7.8	18

** Recommendations for this site may be temporary. The City is evaluating all development options.*
Note: Open Spaces are not included in rankings.
Note: Several parks are tied for the same rank. The tied parks are listed in alphabetical order.

Table 9-6: Overall Prioritization Rankings

While the Ralston Avenue and Old County Road opportunity site received the highest overall prioritization value, proposed projects at this location may be temporary due to potential residential development requirements to meet the City's Regional Housing Needs Assessment (RHNA) allocation. The City is evaluating all development options for this site.

The increase in parkland acreage and the addition of an amenity otherwise not available in the PROS system (skate park) resolves existing deficiencies and therefore led to the highest ranking. Semeria Park was the lowest prioritized park site due to the fact that it was recently revitalized and the two proposed projects are considered minor adjustments.

FUNDING STRATEGIES

In order to fulfill the PROS Goals, the City will require a portfolio of funding strategies for capital improvements, maintenance, and operations. A variety of funding strategies are outlined below; this list is not exhaustive, and at every opportunity, the City should explore funding alternatives to continue to provide a first-rate PROS system.

GENERAL FUND

Sources of revenue include the City's General Fund budget comprised of tax revenues, service charges, franchises, and other sources. The fiscal year (FY) 2022 budget includes dedicated funding for the Goals, Strategies, and Recommendations encompassed in this PROS Plan, including funding for public art, a city-wide tree assessment, and street improvements. The FY2022 General Fund budget of $22.7 million allocated $2 million towards culture and recreation (8 percent). The FY2023 budget, illustrated in Figure 9-1, also allocates approximately 8 percent towards culture and recreation ($2.2 million).

The Capital Improvement Projects program (CIP) is funded largely by the General Fund. The FY2022 CIP budget is $22.9 million; it allocated 2 percent towards recreational facilities and 1 percent towards parks and open spaces. The FY2023 CIP budget is $19.3 million; it allocates 4 percent towards recreational facilities and 2 percent towards parks and open spaces.

PARKS + RECREATION DEPT REVENUE

Additional funding comes from rental fees for Parks and Recreation amenities, such as the reservable picnic areas, as well as program fees for recreation services, user fees, donations, and aid from other government agencies. These fees typically offset the cost of operation and maintenance of the services provided.

DEVELOPMENT IMPACT FEES

The City's requirements for parkland dedication and in-lieu fees were adopted by City Council ordinance and resolution in September 2020. The Quimby Act permits the City to require the dedication of land or impose a requirement of the payment of fees in lieu, or a combination of both, for park or recreation purposes as a condition of the approval of a tentative parcel map.

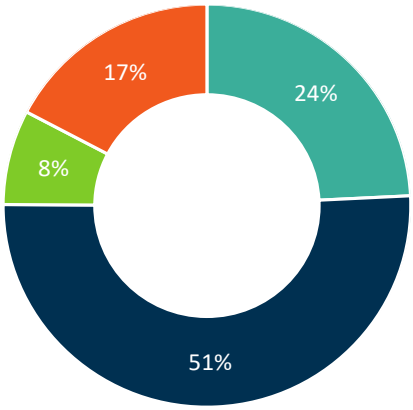

Figure 9-1: FY2023 General Fund Budget

Belmont Municipal Code Chapter 17 Article IV includes information on the parkland dedication requirements and in-lieu fees. At the time of the PROS Plan adoption, the City required 3.44 acres of parkland per 1,000 residents (Section 17-104(a)).

Development Impact Fees are also assessed by the City under the Mitigation Fee Act to provide one-time impact fees imposed upon development projects, for the purpose of mitigating the impacts they have on the need for certain capital improvements (such as transportation infrastructure, park land and facilities, police and fire facilities, and affordable housing). The City's Municipal Code Chapter 17 Article III outlines the Development Impact Fees. The City's Nexus Study to assess and set the Park Development Impact Fee was adopted by City Council resolution in September 2020.

ASSESSMENTS AND BONDS

An assessment or bond measure could address demonstrated funding needs for capital improvements, upgrades, and new park elements. Supplemental property assessments can be special assessment districts, such as Community Facilities Districts or Enhanced Infrastructure Financing Districts. The creation of an assessment district permits a public agency to assess housing units or land parcels. The assessment revenues can be used for parkland acquisition, development, and/or maintenance. The

agency can choose to use the revenue generated on a pay-as-you-go basis or can sell bonds in order to receive a lump sum amount. The bonds are then paid back from the annual revenue generated from the assessment. Establishment of an assessment district requires a vote of property owners—the majority of returned votes must be in favor of establishing or revising the district.

A General Obligation Bond is a voter-approved bond with the assessment placed on real property for a specified period of time (typically 15 to 20 years). A General Obligation Bond requires a two-thirds voter majority to pass. The funds generated can only be used for capital improvements, not maintenance.

A Revenue Bond is used to fund revenue-generating facilities, such as the Barrett Community Center. Revenue produced by the facility is used to pay back the bond. If revenue alone is not sufficient to pay back the bond, the City will have to support repayment of the bond by other means.

GRANTS

The California Department of Parks and Recreation offers grant funding on both a competitive and non-competitive basis. There are multiple competitive grant programs for which projects in this PROS Plan would be considered eligible, for example, the Recreation Trails Program and the Habitat Conservation Fund. The Recreation Trails Program provides funds annually for recreational trails and trail-related projects. The Habitat Conservation Fund supports nature interpretation programs to bring urban residents into park and wildlife areas, protection of various plant and animal species, and the acquisition and preservation of wildlife corridors and trails.

California voters passed Proposition 68 in 2018. Also known as the Parks, Environment, and Water Bond Act, it authorized $4 billion in general obligation bonds for State and local parks, environmental protection projects, water infrastructure projects, and flood protection projects. Funding is available through two non-competitive programs—the Per Capita Program and the Recreational Infrastructure Revenue Enhancement Program (RIRE). The Per Capita Program grants funds to local governments for park rehabilitation, creation, and improvement on a per capita basis. Grant recipients are encouraged to utilize awards to rehabilitate existing infrastructure and to address deficiencies in neighborhoods lacking access to the outdoors. The RIRE Program funds projects aimed at improving or enhancing local or regional park infrastructure for the purposes of revenue enhancement.

OTHER FUNDING

In recent years, corporate philanthropy, individual giving, and foundation funding has increased significantly. According to the National Recreation and Park Association (NRPA), this type of funding for City -owned parks increased from $499 million in 2018 to $596 million in 2019. This funding opportunity is difficult to forecast and best suited for local organizations.

Additional funding sources are available from the federal and State government, non-profit and private organizations, professional associations, and citizen donations. Federal and State funding is available for parks, open space, transportation, and wildfire fuel mitigation projects. Non-profit and private organizations, such as charities, local employers, and universities, are potential sources of funding for PROS improvements. Professional associations, such as the NRPA and the California Park and Recreation Society, offer unique resources and opportunities the City should pursue as projects align. Citizen donations, already a source of funding utilized by the City for the PROS system, remains a viable avenue for funding.

The PROS Plan provides a general foundation for seeking partnerships, sponsorships, donations, and grants to help fund park improvements and expand recreational opportunities for the Belmont community. As unique and alternative opportunities arise outside of those identified in this plan, the City should pursue new funding avenues where applicable and feasible.

PARTNERSHIPS

Partnerships between City departments, school districts, parks and recreation foundations, local volunteer groups, and service organizations will be instrumental in the realization of the PROS Plan.

CITY DEPARTMENTS

The successful implementation of the PROS Plan will require the efforts of multiple City departments. As the Community Development Department oversees the implementation of the Belmont Village Specific Plan and other planning applications, they are instrumental in the implementation effort. As both the Community Development and Public Works Departments undertake improvements to the City's roadways and streetscapes, they have the opportunity to address connectivity gaps between PROS sites. Proposed public art and placemaking projects will interface with the Parks and Recreation Department. Public safety input from the Fire Department will be essential. Other public agencies in Belmont will continue to be important partners in the PROS implementation effort.

SCHOOL DISTRICTS

The City has an ongoing partnership with the Belmont -Redwood Shores School District (BRSSD) to increase public access to recreation spaces. The joint-use agreements (JUA) for four school sites (Central, Fox, Nesbit, and Ralston Middle) were renewed for 10 years in 2019. The City should continue to partner with BRSSD for public access to the fields at these sites, as well as continue to pursue new JUAs where possible. Partnerships with additional schools in Belmont should be continually evaluated.

PARKS FOUNDATIONS

Non-profit park and recreation foundations are a viable partnership avenue. Foundations are independent organizations that provide volunteer and financial support for recreation, educational programs, and environmental projects. For example, the Belmont Park Boosters have provided funds for park, recreation, and community improvements since 1973. Throughout the PROS planning process, Belmont residents have been active participants. Existing volunteer interest and community engagement may generate additional partnerships to strengthen support for the PROS Plan.

VOLUNTEER GROUPS

Volunteer groups engage, empower, and organize interested residents that are able to donate their time to improve the City's PROS system. Most typically integrated with the Parks and Recreation Department as stewards, volunteer organizations enable the greater community to contribute to the upkeep and improvements of the PROS system. Community service opportunities, such as park clean-up days, allow residents of all ages to become active participants in creating outdoor community space. Partnering with local volunteers for PROS projects can strengthen ties within the community as we Build our Backyard.

SERVICE ORGANIZATIONS

Local chapters of service organizations, such as Kiwanis and Rotary, are dedicated to giving back to their communities and often fundraise for local improvement projects. For example, the City of Vacaville's Rotary Club was instrumental in the creation of the new all-inclusive Play 4 All Park. Partnerships with local chapters of service organizations represent meaningful and collaborative opportunities to achieve a shared vision for the future of Belmont's PROS system.

Play 4 All Park (Opened 2022 in Vacaville, CA)

ACTION PLAN

The Action Plan provides an outline of important targets to guide decision-makers in the implementation of the PROS Plan. It incorporates the System-wide Recommendations and synthesizes the Park-specific Recommendations into manageable, high-level groupings. The Action Plan further organizes these into three time frames:

- Short Term
- Long Term
- Ongoing

It is informed by the partnership opportunities and priorities presented earlier in this chapter. This is a tool intended to highlight projects that resolve deficiencies or repair unsafe conditions, so that they are implemented sooner than other less impactful improvements.

Tables 9-7 and 9-8 present the Action Plan. This version is a snapshot of priorities as of the time of the PROS Plan adoption. The Action Plan is a tool that is intended to be updated as circumstances, resources, opportunities, and community needs change. It is recommended to revisit this exercise approximately every five years. Priorities specific to Belmont's open spaces are discussed in the following section.

Views from Belmont

DRAFT

Rainbow Over the Belmont Sports Complex

ACTION PLAN				
ACTION	*POTENTIAL PARTNERS*	SHORT TERM	LONG TERM	ON-GOING
Continue to engage with the community on current and future PROS site planning efforts				X
Continue to identify opportunities for off-leash dog activity				X
Continue to maintain the high-quality landscape at PROS sites				X
Continue to promote and create awareness of the PROS sites, programs, and activities through the City website, social media, participation with City events, and other advertising and communication methods				X
Continue to support implementation of the City's ADA Transition Plan	*Public Works*			X
Create and maintain a list of open space maintenance and improvement projects for volunteer organizations to steward	*Community organizations*			X
Implement Pop-up Park Installations	*Community Development, community organizations*			X
Look for ways to establish alternative forms of revenue for programs that may include sponsorships, partnerships, and/or an expanded volunteer program				X
Monitor development activities in the Belmont Village Specific Plan area for opportunities to increase PROS offerings as the area densifies	*Public Works, Community Development*			X
Monitor opportunities for new PROS sites				X
Pilot new recreation programs, formats, and events. Continue to balance active and passive recreation opportunities	*Community organizations*			X
Provide recreation events that encourage use of the pedestrian and bike networks	*Community organizations*			X
Publish bike and walking route information online and in the District's public materials such as the recreation program guide				X
Pursue a partnership with the university campus (Notre Dame de Namur University/Stanford University) as an opportunity to increase public access to natural space and recreation amenities	*University*			X
Pursue partnerships with school sites that do not currently have a JUA with the City	*School Districts*			X
Reduce energy and water use with efficient landscape, fixtures, systems, and materials				X
Re-evaluate recommendations to update the prioritization matrix as situations and conditions change				X

DRAFT

ACTION PLAN				
ACTION	*POTENTIAL PARTNERS*	SHORT TERM	LONG TERM	ON-GOING
Explore project funding options for implementation of existing park master plans for Barrett Community Center and Twin Pines Park				X
Secure project funding for high-priority Park-specific Recommendations and Open Space Recommendations	*Public Works, School Districts, Community Organizations*			X
Seek out partners to offer new and diverse recreation programs and opportunities at PROS sites	*Community Organizations*			X
Work with existing JUA partners for proposed improvements that increase times available for public use of facilities	*School Districts*			X
Work with Public Works to improve bike and pedestrian network connections in street right-of-way to PROS sites	*Public Works*			X
Develop park design plans for the identified Opportunity Sites: Ralston Avenue + Old County Road, Oak Knoll Drive, and Alameda de las Pulgas		X		
Develop an Interconnect Toolkit	*Public Works, Community Organizations*	X		
Evaluate community interest and potential for expanding the parks and recreation Booster foundation to further partner and support PROS	*Community Organizations*	X		
Prioritize Inclusive+All-Abilities Play in the PROS system (Alexander Park, Barrett Community Center, and Community Parks)		X		
Provide secure bike parking at parks, with racks located near entrances and social gathering spaces. Add self-service bike repair stations at PROS sites along bike facilities		X		
Research, evaluate, and implement programs to activate PROS sites		X		
Undertake a Usage Study of PROS sites		X		
Continue to evaluate Ideal Amenity Quantities as Belmont's population changes over the 15-year horizon of the PROS Plan			X	
Develop a PROS Activation Plan			X	
Develop park redesign plans for Alexander Park, Cipriani Park, Hallmark Park, Hasting Tot Lot Park, and McDougal Park			X	
Develop park design plans for undeveloped parks Hidden Canyon Park and Ralston Ranch Park			X	
Implement existing park master plans for Twin Pines Park and Barrett Community Center			X	

Table 9-8: PROS Action Plan (Continued)

OPEN SPACE PRIORITIES

OVERVIEW

Recommendations presented in the previous chapter provide guidance to the City for decisions related to the preservation, management, and operation of Belmont's open spaces. They were informed by the findings from the Environmental Assessment, Recreation Use Assessment, community input, best management practices used throughout the Bay Area, and professional judgment. Given the unique considerations of open spaces compared to urban parkland, these PROS sites were analyzed using a framework that adjusts for the presence of sensitive biological resources and unique recreational uses. The Open Space Management Plan (OSMP), found in the Appendix, includes a full discussion on the analysis techniques, scientific findings, and proposed improvements related Belmont's open spaces.

The easy, medium, and hard ratings for each Recommendation presented in the previous chapter provide information about the level of effort and investment needed to enact the change. Recommendations could be deemed as be priorities regardless of their rating as easy, medium, or hard, as some projects indicated as "hard" may be more urgent than others.

Volunteers Working to Improve PROS Sites

PRIORITY TIERS

Recommendations were prioritized to highlight those that are most urgent. Recommendations were separated into two tiers where Tier 1 contains actions that are the highest priority due to laws protecting species and habitats, regional wildfire safety, or important visitor experiences—these projects should be addressed urgently. Tier 2 contains projects aimed at diversity and equity goals as well as visitor experience. Actions in this category are important to address but less urgent than those in Tier 1.

Table 9-9 summarizes priorities for the conservation and restoration of Belmont's open spaces.

Open Space Trail Visitor

TIER 1 HABITAT PROTECTION, WILDFIRE SAFETY, + VISITOR EXPERIENCE	
ENVIRONMENTAL SUSTAINABILITY	
Stream Crossing Improvements	WRA identified multiple stream crossings requiring improvements and prioritized the top seven crossings most in need of improvements.
Seasonal / Weather Dependent Restrictions on Maintenance Activities	Ensure that the City's routine trail maintenance actions avoid nesting bird season to the extent possible, and avoid working in wet weather conditions (emergencies excepted) to the extent feasible.
BALANCED RECREATION USE	
Monitor Use and Survey Visitors During E-Bike Pilot	Take an approach similar to what Midpeninsula Regional Open Space District to develop a policy for e-bike use. The district studied use levels and visitor responses for a year before making policy recommendations to their Planning and Natural Resource Committee.
ADA-Compliant Trails	Identify three trail segments that offer distinctive recreation experiences and ensure those segments comply with the California State Parks Accessibility Guidelines. One segment will offer the experience to travel along a ridgeline, another segment will offer an experience to travel along a canyon floor, and a third segment will offer opportunities for panoramic views.
NATURAL HAZARD MITIGATION	
Fuels Reduction Plan	The fuels reduction plan would prioritize fuel break areas to be treated as shown in the OSMP, and would highlight additional areas that would benefit from fuels reduction.

TIER 2 EQUITY-BASED PROGRAMS + VISITOR EXPERIENCE	
ENVIRONMENTAL SUSTAINABILITY	
Volunteer Restoration Programs	These programs which have been informally carried out would be codified and respond to the interests and actions of environmentally focused community members.
BALANCED RECREATION USE	
Nature-Based Recreation Programs	Respond to the community's interest in environmental education with focused programs that, among other things, may reinforce support for protecting the two open space areas and create "citizen scientists."
Trail Calming Features	Implement trail calming features in targeted locations to respond to community comments about feeling some sections of trails are unsafe due to blind turns, steep slopes, narrow trails, or a combination of all three.
NATURAL HAZARD MITIGATION	
N/A	N/A

CITY OF BELMONT

DRAFT

EXECUTIVE SUMMARY

PARKS | RECREATION | OPEN SPACE MASTER PLAN

LET'S BUILD OUR BACKYARD

PURPOSE

The Parks, Recreation, and Open Space Master Plan (PROS Plan) is a strategic, forward-looking document. It studies the existing park system, outdoor recreation facilities and programming, and open spaces to identify a decision-making framework and recommendations to plan, maintain, develop, rehabilitate, and connect the City's network of parks, recreation, and open space for the next 15 years.

GUIDING PRINCIPLES

1. Provide **equitable access** to resources and activities across the entire city
2. Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position, or physical/cognitive ability
3. Make all users feel **welcome and safe**
4. Offer services and activities across a **range of interests, abilities, and ages**
5. Reflect our commitment to **environmental resilience and sustainability**
6. Respect the beauty and importance of our **natural resources**
7. Advance community **health and well-being**
8. Foster a sense of community and encourage **social interaction**
9. Provide **well-maintained** and actively managed facilities
10. **Adapt** to changing conditions and needs
11. Utilize a **transparent community process** to inform decisions

VISION

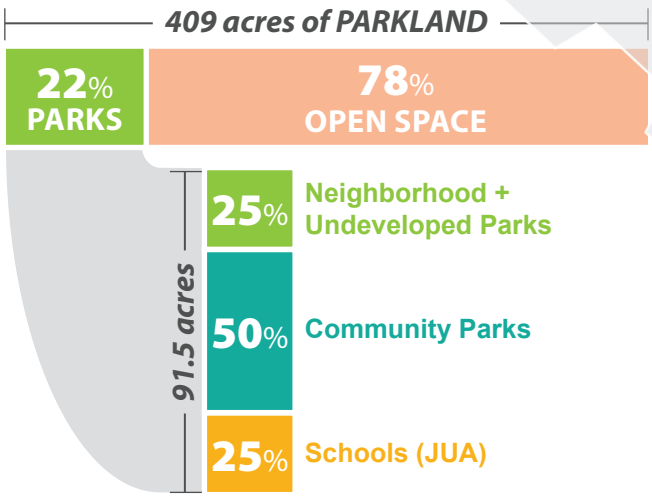
RE-IMAGINE THE BELMONT PARKS, RECREATION, AND OPEN SPACE (PROS) SYSTEM TO **CREATE THE CITY'S BACKYARD** THAT FOSTERS **INCLUSIVE, EXPERIENTIAL, AND NURTURING PUBLIC SPACES** BY SETTING THE **FRAMEWORK FOR DECISION MAKERS** IN THE PLANNING, MAINTENANCE, DEVELOPMENT, AND/OR REHABILITATION, IMPLEMENTABLE OVER A **15 YEAR HORIZON**.

VISION

The Belmont community recognizes the essential role that a well-designed PROS system plays in both individual and community health. The community engagement process revealed that Belmont residents are proud of their parks and open spaces and the recreation opportunities they provide. Be it a baseball game at Belmont Sports Complex, a basketball game at O'Donnell Park, climbing the playground at Semeria Park, attending an outdoor movie at Twin Pines Park, or exploring Waterdog Lake, Belmont's PROS system is intrinsically linked to the community's identity and social cohesion.

The National Recreation and Park Association found that in 2019, parks and recreation agencies generated $218 billion in economic activity nationwide, with California benefiting from $23 billion of the total. Statewide, parks and recreation agencies are significant employers. Park operations and capital spending positively influence the local economy, and Belmont is no exception.

The PROS Plan complements the goals and strategies of key planning documents such as the 2035 General Plan. Thoughtful management of the PROS system carries the responsibility of addressing climate resiliency and furthering active transportation strategies, as outlined in the City's Climate Action Plan and Comprehensive Pedestrian and Bicycle Plan. Together, the City's planning documents identify innovative solutions and look proudly towards the future of Belmont.



Learn more about the Purpose, Vision, and Guiding Principles in Chapter 1.

BELMONT'S PROS SYSTEM

The City of Belmont offers 409 acres of parks and open space—almost 14 percent of the city's land area. Belmont's parks, recreation, and open space system (PROS system) consists of 17 parks (of which 15 are developed), two open space areas, and four schools under a joint-use agreement with the Belmont-Redwood Shores School District. The parks and school sites are distributed across the city, while the open spaces are located only in the western hills.

The parks range in size, from less than 1 acre to over 20 acres, and vary in intensity of use. While not directly correlated, smaller parks tend to provide fewer amenities and therefore generate less use intensity. The PROS Plan uses a set of criteria known as Park Typologies to organize the sites and establish a baseline service level that Belmont parks must meet.

Learn more about the Context and Existing Conditions that served as the foundation for this PROS Plan in Chapters 2 and 3.

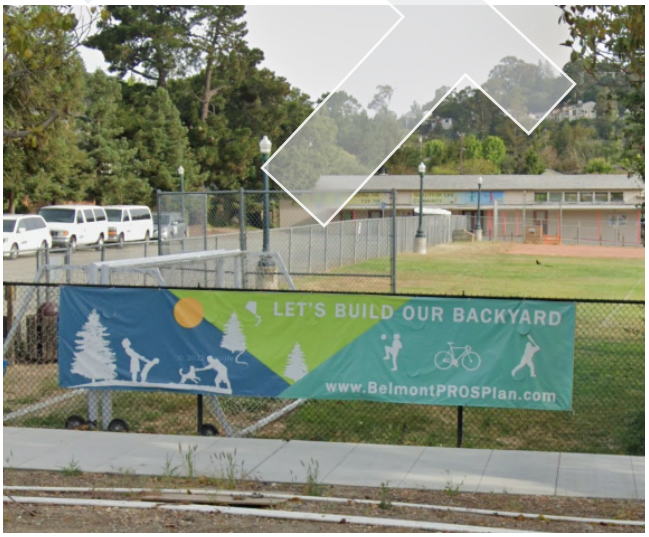
COMMUNITY INPUT

Community outreach was an integral component of the development of the PROS Plan. Beginning in Spring 2021, community engagement opportunities were held in a hybrid manner, utilizing virtual platforms and in-person events to hear from the Belmont community.

OUTREACH METHODS

Approximately 5,000 comments and responses were collected across all outreach methods. Participants were asked to share their preferences, priorities, and desired improvements for the PROS system. This process offered a wide range of outreach materials and input opportunities to maximize project awareness and community participation, including the development of an Advisory Committee, an online survey, in-person and virtual focus groups, pop-up and open house events, neighborhood meetings, a comprehensive social media campaign, and presentations at City Council and Parks and Recreation Commission public meetings.



COMMUNITY THEMES

The following community themes emerged as a result of the engagement process:

- Amenities For Social + Physical Activity
- More Seating Opportunities
- Physical Connections
- Amenities For Diverse Interests
- Accessible For All Abilities
- Create More With Less
- Connecting With Nature
- Available For Many Uses + Users
- Natural Resources
- Honor Belmont's Unique Landscapes

Learn more about the Community Input that directed the creation of this PROS Plan in Chapter 4.

EMAILS + COMMENTS	**1,600+** (JANUARY 2021 TO FEBRUARY 2024)
FOCUS GROUPS	**11** MEETINGS **75+** PEOPLE
ONLINE SURVEY	**2,800+** RESPONSES
ADVISORY COMMITTEE	**5** MEETINGS
PARKS + RECREATION COMMISSION	**20+** MEETINGS
CITY COUNCIL	**5** PRESENTATIONS
POP-UP + OPEN HOUSE EVENTS	**5** EVENTS

PROS Plan Banner at Barrett Community Center

BIG IDEAS + GOALS

Through community outreach, four **BIG IDEAS** emerged to define Belmont's vision for the future of the PROS system.

These four Big Ideas were used as the framework to present the Goals of the PROS Plan. They are also influenced by the General Plan's Park, Recreation, and Open Space Element and Conservation Element.

Learn more about the Goals for the PROS Plan in Chapter 6.

THE CITY AS YOUR BACKYARD

OUTDOOR RECREATION FOR ALL

CELEBRATE THE OUTDOORS

ENVIRONMENTAL + FINANCIAL SUSTAINABILITY

THE CITY AS YOUR BACKYARD

PROS Goal 1 Connect Belmont and unify PROS sites by encouraging a robust pedestrian, bicycle, and public transit network.

PROS Goal 2 Foster a healthy community through spaces, amenities, programs, and public art that promote and encourage physical activity, social interaction, and Belmont's culture.

PROS Goal 3 Meet evolving community needs by establishing new uses, improved spaces, and a variety of recreation amenities.

OUTDOOR RECREATION FOR ALL

PROS Goal 4 Improve community health through diverse, equitable, and inclusive spaces and amenities with accessible routes.

PROS Goal 5 Ensure future success through adaptability, flexibility, and support for many uses and users.

PROS Goal 6 Actualize PROS Plan by developing strong partnerships across private, public, and community groups.

CELEBRATE THE OUTDOORS

PROS Goal 7 Develop and implement an Open Space Management Plan (OSMP).

PROS Goal 8 Highlight local ecosystems through educational opportunities across parks and open spaces.

PROS Goal 9 Enrich outdoor recreation through trail improvements, volunteer collaborations, and wayfinding features.

ENVIRONMENTAL+FINANCIALSUSTAINABILITY

PROS Goal 10 Nurture and strengthen natural resources through efficient and innovative landscape design.

PROS Goal 11 Diversify funding sources to ensure high-quality, actively-managed, and well-maintained PROS assets.

PROS Goal 12 Prioritize sustainable, resilient, and responsible management and maintenance practices.

DRAFT

FRAMEWORK

PROS PLAN

The organizational flowchart shown in Figure ES-3 summarizes the structure of the plan's framework. The Purpose and Vision established the Guiding Principles, which were used to plan the Community Input process. Community Themes emerged from the collected feedback and were further synthesized into Big Ideas and Goals. The PROS Plan used this framework to craft the Strategies and Recommendations that aim to provide guidance over a 15-year horizon.

OPEN SPACE MANAGEMENT PLAN

Goal 7 calls for the development of an Open Space Management Plan (OSMP). Developed in tandem with the PROS Plan, this study reviews Belmont's two open spaces utilizing an approach that adjusts for the unique components, considerations, and uses of these valuable outdoor community spaces.

As an attachment to the PROS Plan, the OSMP presents its Objectives, Policies, and Recommendations specific to the open spaces. The findings of the OSMP are presented throughout this document where appropriate as they complement the PROS Plan.

Learn more about the Planning Process for the PROS Plan in Chapter 1.

Figure ES-3: PROS Framework

PARKS | RECREATION | OPEN SPACE MASTER PLAN

Davey Glen Park

EXISTING CONDITIONS

PARK TYPOLOGIES

Parks were assigned a category, or Park Typology, that defines general expectations and character, establishes minimum amenities, and anticipates common methods of travel to the site. This also defines the Access Radius, or the distance used to delineate areas around a site that are easily reachable by the surrounding community. This approach identifies neighborhoods with low access to PROS sites and can demonstrate high-impact opportunities to expand the PROS system.

	NEIGHBORHOOD PARK **TIER 1**	NEIGHBORHOOD PARK **TIER 2 ***	COMMUNITY PARK
Character	Nature and Neighborhood Social Space	Nature, Group Gathering, and Play	Nature, Community Gathering, Recreation, and Play
Uses + Users	Passive Individuals to Small Groups	Passive + Active Individuals to Medium Groups	Passive + Active Individual to Large Groups
Standard Baseline Amenities	1. Natural Environment 2. Seating 3. Identifiable Amenity	1. Natural Environment 2. Seating 3. Play Amenity 4. Picnic Opportunity 5. Multi-Purpose Flexible Space 6. Recreation Amenity	1. Natural Environment 2. Seating 3. Play Amenity 4. Picnic Opportunity 5. Multi-Purpose Flexible Space 6. Recreation Amenity 7. Off-Street Parking 8. Permanent Restroom 9. Multi-Use Athletic Field or Community Facility
Size	No Size Requirements Typically less than 1 acre	No Size Requirements Over 2 acres should provide off-street parking	No Size Requirements
Transport Modes	Walking Biking	Walking Biking Some Driving	Walking Biking Driving
Access Radius	¼ mile	½ mile	Entire City
Previous Planning	Mini Park	Neighborhood Park	Community Park Special Facility

Table ES-1: Park Typologies

** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

Note: School (JUA) and Open Space Park Typologies do not have attributes such as Standard Baseline Amenities.

NEIGHBORHOOD PARK (TIER 1)

A Neighborhood Park Tier 1 is a small pocket of natural green space that supports local gatherings, promotes unplanned social interactions, and provides a peaceful place to talk or play. A Neighborhood Park Tier 1 has the lowest use intensity, meaning the few amenities at the site are expected to be used by only a handful of people at a single time. This Park Typology has an Access Radius of one quarter (¼) mile.

NEIGHBORHOOD PARK (TIER 2)

A Neighborhood Park Tier 2 provides a local connection to nature, supports social gatherings of small groups, and offers recreation and play activities. A Tier 2 Park is more intense in amenities and uses than a Tier 1 Park, but it still oriented toward a single visitor or smaller groups of less than 20 people. As such, there are at least two play and recreation amenities designed for use by multiple diverse visitors at a single time, as well as picnic amenities that support small group gatherings. These sites have an Access Radius of one half (½) mile.

COMMUNITY PARK

Community Parks are notable parks that act as community event venues, offering spaces and amenities for large group gatherings that can support dozens of users and multiple recreation programs simultaneously. Community Parks have high use intensities and generate the most visitors. For the purposes of this PROS Plan, this Park Typology has an Access Radius that spans the entire city.

UNDEVELOPED PARK

Undeveloped Parks are sites owned by the City that have limited or no amenities. Sites with this designation are slated for development into amenitized outdoor public spaces. For the purposes of the PROS Plan, the two Undeveloped Parks are planned as Neighborhood Parks Tier 2. This designation is used to evaluate park access within the Park Typologies framework by utilizing the same characteristics.

SCHOOL (JOINT USE AGREEMENT)

The City entered into a joint-use agreement with the Belmont-Redwood Shores School District for the public right to use recreational spaces in exchange for a maintenance commitment by the City. These sites have an Access Radius of one half (½) mile.

OPEN SPACE

Open Spaces are minimally improved or undeveloped natural areas open to the public for recreational activities. The OSMP, included in the Appendix, reviewed the two Open Space sites. Trailheads are depicted on Figure ES-4. For the purposes of this PROS Plan, this Park Typology has an Access Radius that spans the entire city.

Open Space

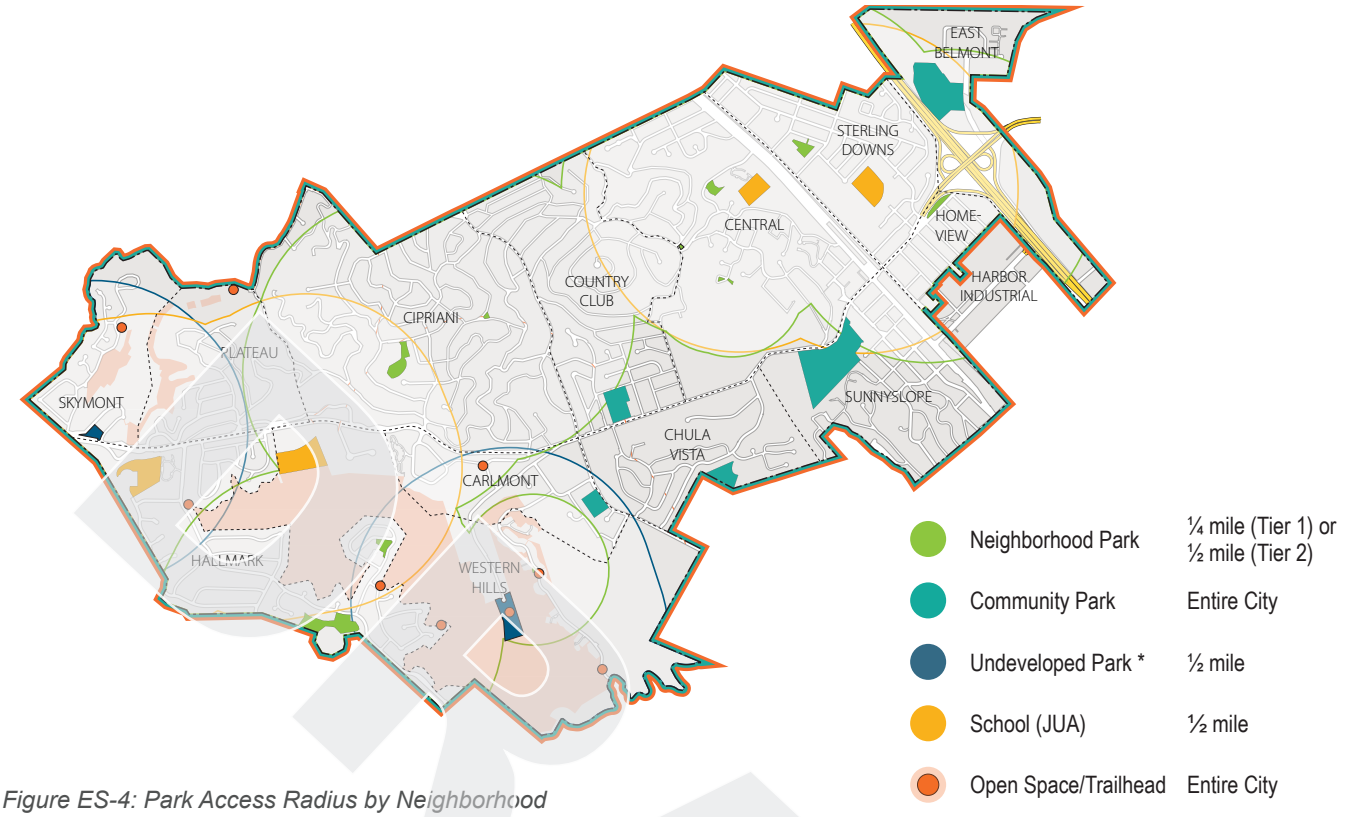


Figure ES-4: Park Access Radius by Neighborhood
** Both Undeveloped Park sites are attributed as Neighborhood Parks Tier 2.*

ACCESS + CONNECTIONS

Figure ES-4 highlights portions of the city where PROS sites are less accessible, as determined by the site's Park Typology and Access Radius. Overall, Belmont provides a high level of access to parks. Almost 90 percent of the population lives within a 10-minute (or ½-mile) walk of a PROS site. The national average for the percent of population that lives within a 10-minute walk of a park is 55 percent, based on data compiled by the Trust for Public Land. Belmont well surpasses this average.

Given the limited availability of land to establish new parks, enhancing connections to and between existing PROS sites is paramount. The 2016 Comprehensive Pedestrian and Bicycle Plan gives parks high priority for pedestrian and bicycle facility improvements. Safe and enjoyable multi-modal connections between parks are critical because they reduce transit-related injuries, improve circulation, and increase accessibility.

The City's improvements to Ralston Avenue as part of the Safe Routes to School program illustrate the ongoing effort to reduce conflict and increase connections between parks and recreation amenities for non-motorized transport.

AMENITY INVENTORY

An Amenity Inventory was conducted to document the quantity and quality of existing amenities within the PROS system. This study enables a comparison between a park's amenity offerings in relation to the minimum amenities it should be providing as defined by its Park Typology.

Learn more about the Existing Conditions and Needs Assessment that served as the foundation of this PROS Plan in Chapters 3 and 5.

STRATEGIES

This plan presents a suite of Strategies, applicable to the PROS system as a whole, to provide guidance to the City for future improvements to Belmont's outdoor amenities.

The Strategies build upon the PROS Goals, represent the opportunities and constraints within the PROS system, and serve as the guiding inspiration for future improvements as available resources and conditions evolve over time. The Strategies also include Objectives and Policies that are specific to Belmont's open spaces.

Learn more about the Strategies in Chapter 7.

Volunteers Working to Improve PROS Sites

Belmont Sports Complex

RECOMMENDATIONS

The PROS Plan presents a comprehensive set of Recommendations that are derived from the analyses and considerations that guided this study. The Recommendations directly respond to the Strategies presented in the plan, focusing on the equitable distribution of amenities throughout the community.

Recommendations are broken down into two primary categories: System-wide and Park-specific. System-wide Recommendations are informed by a holistic review of Belmont's unique PROS system and best management practices applicable to the City. Park-specific Recommendations are informed by individual site assessments and inventories. The Recommendations also include potential sites for new parks or joint-use agreements, as well as proposed improvements for Belmont's open spaces. Recommendations were driven by the community engagement process, which served as a key component of the PROS Plan.

SYSTEM-WIDE

System-wide Recommendations are pathways to carry out the established Goals and Strategies across the entire PROS system. These include:

- Activation Plan
- Inclusive+All-Abilities Play
- Interconnect Toolkit
- Pop-up Park Installations
- Social Gathering Space
- Usage Study

PARK-SPECIFIC

Each park in the City was evaluated for access, proximity, and available space to host new or enhanced amenities. A Recommendation Spectrum was used to contextualize the Park-specific Recommendations presented in the PROS Plan in terms of the magnitude of change. This tool organizes potential improvements into six categories based on the degree of intensity, spanning from the creation of a new park to the implementation of a minor improvement or existing master plan.

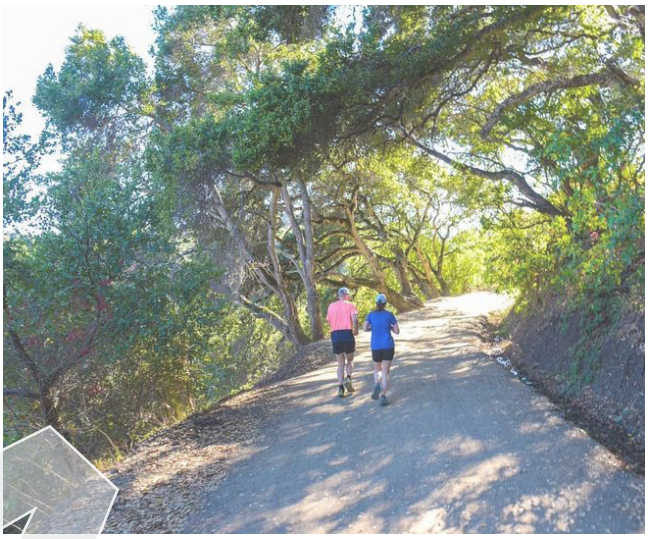
OPPORTUNITIES

NEW PARK OPPORTUNITY SITES

The PROS Plan identifies three potential sites for new parks in Belmont. As an almost completely built-out city, there are limited opportunities for new park sites. These sites are on land currently owned by a public entity and should be considered as opportunities to provide additional park acreage to Belmont residents. The new park opportunity sites are listed below by their priority ranking:

- Ralston Avenue + Old County Road
- Oak Knoll Drive
- Alameda de las Pulgas

POTENTIAL AGREEMENTS



The City may consider a joint-use agreement with the local schools and other organizations to facilitate or enhance public access. These are listed below, in order of their level of education:

- Carlmont High School
- Crystal Springs Middle School
- Notre Dame High School
- Notre Dame de Namur University/Stanford University

OPEN SPACE

Recommendations for Belmont's open spaces aim to improve the condition of existing trails, manage existing and future recreational uses, and protect environmental resources found in San Juan Canyon and Waterdog Lake Open Spaces.

Explore the Recommendations for improvements to the PROS system in Chapter 8.

Recreational Use on Open Space Trails

INCREASING MAGNITUDE OF RECOMMENDATIONS

Magnitude	EXISTING MASTER PLAN	MINOR IMPROVEMENT	UPGRADED OR NEW AMENITY	PARK REDESIGN	UNDEVELOPED PARKS	NEW PARK OPPORTUNITY
Existing Condition	Master plans recently adopted Created with extensive community input	Parks recently developed or in very good condition	Current park functioning well	Rethink accessibility and park layout No change in use	Existing park is undeveloped	Add parkland To fill gaps in park access City-owned property
Recommendation	Implement existing Master Plan	Minor improvements identified to maintain high quality	Upgrade existing amenity or new amenity to meet identified needs or gaps	Undertake park design plan	Develop and amenitize site	Create, develop, and amenitize site

Figure ES-5: Recommendations Spectrum

Note: The Recommendation Spectrum is used to frame Park-specific Recommendations for the Community Park, Neighborhood Park, and Undeveloped Park Typologies. It is not applied to School (JUA) or Open Space Typologies.

IMPLEMENTATION

PRIORITIZATION

Implementation of the PROS Plan will require multiple funding sources over many years. As such, a prioritization approach is crucial to meet the most pressing needs in the Belmont community in an effective and equitable manner. System-wide, Park-specific, and Open Space Recommendations are uniquely prioritized based on the feasibility of implementation and their ability to satisfy the PROS Goals. As circumstances, opportunities, resources, and demands evolve, criteria to prioritize implementation should be re-evaluated periodically, ideally every five years. The following factors were considered while developing the prioritization approach, listed alphabetically:

- Advances diversity, equity, and inclusion
- Aligns with other projects
- Funding availability
- Reduces operating costs or generates revenue
- "Quick win"
- Time-limited opportunity

PARK-SPECIFIC PRIORITIZATION RANKINGS

As funding to further develop PROS sites is limited and competitive, a Prioritization Matrix was developed to guide the implementation of Park-specific Recommendations as funds become available. Park-specific Recommendations were assigned point values for each of the four criteria, informed by the factors listed above. The point criteria categories, listed below, reflect the ability of the proposed project to:

- Further PROS Plan goals
- Respond to community priorities
- Resolve an existing deficiency
- Address an existing condition

For each PROS site, the total points were summed, averaged, and ranked to highlight which PROS sites have the highest potential to positively impact the community as a result of the proposed site-specific improvements. This prioritization approach intends to focus the City's efforts when determining which PROS sites to improve first but is not an absolute directive for the sequencing of development.

OVERALL PRIORITIZATION RANKINGS

SITE *	AVG POINTS	SITE RANK
Ralston Ave + Old County Road *	21.9	1
Oak Knoll Drive	18.8	2
Ralston Ranch Park	18.0	3
Alameda de las Pulgas	17.4	4
Alexander Park	14.5	5
O'Donnell Park	12.2	6
Hidden Canyon Park	12.0	7
Belameda Park	11.5	8
Twin Pines Park	11.4	9
Barrett Community Center	10.9	10
McDougal Park	10.9	
Cipriani Park	10.4	11
Hallmark Park	10.4	
Wakefield Park	10.4	
Hastings Tot Lot Park	10.2	12
Central Elementary School	10.0	13
Patricia Wharton Park	10.0	
College View Park	9.9	14
Belmont Sports Complex	9.4	15
Fox Elementary School	9.0	16
Nesbit School	9.0	
Ralston Middle School	9.0	
Davey Glen Park	8.0	17
Semeria Park	7.8	18

** Recommendations for this site may be temporary. The City is evaluating all development options.*
Note: Open Spaces are not included in rankings.
Note: Several parks are tied for the same rank. The tied parks are listed in alphabetical order.

Table ES-2: Overall Prioritization Rankings

ACTION PLAN

The Action Plan provides an implementation pathway for the realization of the PROS Plan by organizing next steps into three time frames: short term, long term, and ongoing. This tool is informed by partnership opportunities and overall priorities, and is intended to highlight projects that resolve deficiencies or repair unsafe conditions so that they are implemented sooner than other less impactful improvements.

OPEN SPACE PRIORITIES

There are seven priorities for open space improvements. These actions were selected in consideration of their implementation feasibility as well as their urgency in relation to conservation laws, wildfire safety, and visitor experience. The open space priorities are listed below:

- Stream crossing improvements
- Seasonal and weather dependent restrictions on maintenance activities
- Monitor use and survey visitors during e-bike pilot
- ADA-compliant trails
- Fuels reduction plan
- Volunteer restoration programs
- Nature-based recreation programs
- Trail calming features

Volunteers Working to Improve PROS Sites

FUNDING STRATEGIES

The PROS Plan identifies several sources of funding to implement the proposed improvements. These sources include the City's General Fund, revenue from the Parks and Recreation Department, Park Development Impact Fees, assessments, and bonds. This document also discusses alternative funding sources such as competitive grant programs, corporate and non-profit philanthropy, and universities that support Belmont's PROS system. The City will utilize a portfolio of funding strategies for capital improvements, maintenance, and operations.

PARTNERSHIPS

Partnerships between City departments, school districts, parks and recreation foundations, local volunteer groups, and service organizations will be instrumental in the realization of the PROS Plan.

Learn more about Implementation of the PROS Plan in Chapter 9.

APPENDIX A
ADVISORY COMMITTEE

RUI BAO

BRSSD Chief Business Officer

LYNN BELL

My husband and I moved to the Belmont Heights neighborhood in 2003 when our sons were ages one and three. We were thrilled to be adjacent to the Waterdog open space where we had mountain biked since the mid-1990s. Over the years Waterdog has offered us a safe and convenient space to bike, hike, jog, walk the dog, push the stroller, and look for critters. Our youngest son's opportunity to hone his bike skills so close to home has lead him to pursue professional cycling, albeit on the road versus the trails. While we have played in Belmont's parks, participated in various recreation programs and competed on the athletic fields, it is Waterdog we love the most due to its myriad options for exercise, recreation and enjoyment of the outdoors.

DAVID BRAUNSTEIN

David has lived in Belmont for 26 years. He first volunteered to serve on the Library Task Force that ultimately brought the city a state of the art library and library services. He later served on the Belmont City Council from 2007-2015, twice serving as mayor.

While on city council, he visited and learned about all of the parks in the city. He served on two city committees that are relevant to his service to the PROS Committee - 1) the 2x2x2 Educational Committee (made up of the Belmont Redwood Shores School District, the City of Redwood City, and the City of Belmont, as well as 2) a joint committee with Notre Dame de Namur University. Both committees addressed a variety of institutional/ district issues as well as field use. During this time, David supported new traffic configurations to support bikers, walkers, and joggers; the turfing project at the Belmont Sports Complex; and purchasing land to convert to open space. Prior to joining the PROS Committee, David served on the Barrett Community Task Force to help recommend a new Community Center.

Professionally, David has taught social studies at Carlmont High School for the last 19 years. During that time he coached and assisted the freshman football team for two years.

David and his wife Patricia have three children and he and his family have used many of the Park and Recreation Services and the open space that Belmont has to offer. Between them, David and Patricia have coached multiple seasons of soccer, baseball, and softball at most sporting venues in Belmont, including the Barrett Community Center, Ralston Middle School, Fox, Sandpiper, McDougal, and the Belmont Sports Complex. His daughter currently plays baseball at multiple fields in Belmont and dances at the Barrett Community Center. David supported his sons while they competed in track and field at Carlmont. His entire family enjoy the Waterdog trails and actively enjoy a wealth of Belmont's Park and Recreation programs.

NELSON CORTEWAY

- Age 46
- Lived in Belmont Heights for 18 years
- Former Youth Sports Coach
- Married to Kelly (Local Principal)
- 20YO Daughter and 16YO son
- Avid Water Dog Trail User
- Police Captain

DAN DEGUARA

BRSSD Superintendent

ULLA FOEHR

I've lived in the Central neighborhood of Belmont for 18 years with my husband and 3 daughters who are now ages 18, 16 and 14, the younger two are in Belmont public schools. I'm a Parks and Recreation commissioner, former soccer and volleyball coach, public school art educator, walker, hiker, swimmer and dog-owner.

KAREN HAAS-FOLETTA

30 year resident of Belmont in the Cipriani Neighborhood. I am the Executive Director of Footsteps Child Care with 4 locations in Belmont serving infants through middle school.

SANAA KAPUR

Youth Commissioner on the Parks & Recreation Commission for 2 years

Youth Advisory Committee liaison

ELI LATIMERLO

My work centers on cultivating relationships between the Social Sector and Industry that solve today's challenges and shape tomorrow's outcomes. My professional experience is diverse - reflecting acumen gained while holding leadership positions in the nonprofit, corporate, academic, and global business development sectors. As a Development professional I have identified and negotiated relationships between corporations, foundations, and the social sector that strengthen their value propositions, while effectively measuring and evaluating impact.

I have lead initiatives in many social enterprises, including Rape Trauma Services, North Peninsula Family Alternatives, LifeMoves (a homeless services agency), LMS Productions (a theatrical nonprofit and production company), the Dorothy Stang Center for Social Justice and Community Engagement, Silicon Valley Community Foundation, and (at present) Santa Clara University where I serve as Sr. Director of Development at Miller Center for Social Entrepreneurship.

I am an NLP Practitioner, a Certified Career Coach, and I hold a Master's Degree in Counseling Psychology and a Bachelor's in Communications (Photojournalism and Advertising Design).

My passions include photography, cycling, tennis, and traveling with my family.

AUSTIN LEE

42 years old and a Belmont resident for 9 years. We have two children ages 9 and 7 who both attend Fox Elementary right near our Plateau Skymont neighborhood. Most of our activities center around visits to parks and open spaces with our friends and neighbors. I've been a Park and Rec Commissioner for one year and have also volunteered as an AYSO and Little League coach.

CRAIG MICHAELS

Has served on the Belmont Parks and Recreation Commission since 2013, including the Twin Pines Master Plan and Off-Leash at Barrett Pilot Committees. He is also on the board of the Belmont Boosters, Emerald Lake Country Club, and Playworks. He's a graduate of the University of Virginia and Northwestern University and works in technology marketing. Craig has lived in Belmont since 2011 with his wife, two kids, a "water dog" named Molly, and Bella the cat.

CAROLINE PYRZ

I have lived in the Homeview neighborhood for approximately six years. I have two young children who enjoy playing sports and visiting local playgrounds. I currently serve as the chair of the City of Belmont's Planning Commission.

SERGIO RADDAVERO

- Lived in Belmont since 1998 near Cipriani school
- 11 Year old daughter in the 5th grade at Cipriani school
- 16 year old daughter in the 10th grade at Carlmont High School
- 19 year old son at Chico State, graduated Carlmont High School 2020
- Wife is a school teacher in Millbrae CA
- A member of the AYSO Belmont Region 108 board
- USSF Soccer referee, College Soccer Referee and High Soccer Referee for D2 schools and high school like Notre Dame de Namur University and Carlmont

ABBY SANDERS

2021 Carlmont graduate, will be attending UC Davis in the Fall Youth Commissioner on the Parks & Recreation Commission for 2 years Youth Advisory Committee member for 5 years

SCOTT SISEMORE

I'm Scott Sisemore. My wife and I have lived in the Sterling Downs neighborhood since 2006. One of our biggest influences in moving to Belmont was the open space at Waterdog and Hidden Canyon. We like to walk our dog, hike, trail run, bird watch and mountain bike along the trails. We have two sons. One at Carlmont and the other in middle school. The older boy now rides mountain bikes at Waterdog with the local high school team, the Beasts. I spent 7 years managing little league baseball teams for BRSLL.

I own and operate one of Belmont's only wineries, Waxwing Wine Cellars, in the Harbor Business Center at the corner of Harbor and Industrial in Belmont.

BOB STAHL

Resident of Belmont Heights since 1985, avid hiker of Brooks, Rambler & Chaparral trails 5-7 days weekly, loves long bike rides to Portola Valley, Bay Trail, etc., semi retired but still consulting in the beverage industry.

DEAN WILSON

- 39 year resident in McDougal neighborhood
- Active adult/ grandparent
- Previously involved in youth sports
- Active user of Belmont parks and open spaces

SUSAN WRIGHT

I'm a former Parks & Recreation Commissioner who has lived in the Central neighborhood for 18 years. I have a son who goes to Ralston Middle School. I work in the sustainability field.

DRAFT

DRAFT

APPENDIX B
DEFINITIONS

STANDARD BASELINE AMENITIES

COMMUNITY FACILITY
FURNISHING

A community facility is a community center, recreation center, aquatics center, senior center, conference center, or any other similar space, programmed with recreation classes or offerings, or maintained by the Parks and Recreation Department.

GATHERING SPACE
FURNISHING

A gathering space is an area designed to facilitate social interaction. It should provide user comforts (seats and shade) to encourage users to linger. A unique focal element or ability to watch other park activities (children playing in playground, a pickleball match, dog park, etc.) should be incorporated into the design of gathering space.

IDENTIFIABLE AMENITY
FURNISHING

An identifiable amenity is any amenity either defined in this chapter, or an amenity that is easily definable as a single play or recreation amenity.

MULTI-PURPOSE FLEXIBLE SPACE
LANDSCAPE

A multi-purpose flexible is a flat turf area for free play. It is not sized to accommodate formal sports games and is not considered a multi-use athletic field.

MULTI-USE ATHLETIC FIELD
FURNISHING

See Benchmarked Amenities for definition.

NATURAL ENVIRONMENT
LANDSCAPE

A natural environment is any area with a natural landscape not designed or developed or any area that has been designed and developed to provide public access to planted spaces with trees, shrubs, and/or ground cover.

PARKING, OFF-STREET
ACCESSIBILITY

Off-street parking is a paved or compacted earth flat area located near the entrance of a park. The parking lot must include ADA-accessible stall(s) and an accessible path to the park and from the street right-of-way. The number of stalls provided depends on the size, use intensity, and available space of each park.

PICNIC OPPORTUNITY
FURNISHING

A picnic opportunity area contains picnic table(s) for public use without the need for reservation. When feasible, locate the picnic table(s) near other park elements, such as a playground or game court, and in the shade. Picnic areas should contain at least one ADA-accessible table.

PLAY AMENITY
FURNISHING

A play amenity is any park amenity or furnishing deliberately intended to facilitate play. Examples include a playground, tennis court, basketball court, or water play element. An amenity can be both a Play and Recreation Amenity.

RECREATION AMENITY
FURNISHING

A recreation amenity is any amenity or feature that promotes activity and/or exercise. Examples include a walking path, pump track, basketball or tennis court. An amenity can be both a Play and Recreation.

RESTROOM, PERMANENT
FURNISHING

A permanent restroom is, at minimum, a single ADA-accessible restroom structure with toilet and sink connected to utilities. The restroom should include a light and locking door for patrons. Permanent restrooms must be accessible by a paved path, and are typically located near the parking lot. In most instances, a water fountain should be installed on an external wall of the restroom structure. The facility can be locked outside park hours, and must have a scheduled cleaning to maintain sanitary conditions and for restocking.

RESTROOM, PORTABLE
FURNISHING

A portable restroom is a single, self-contained toilet placed at a strategic location within a park when there is need for a toilet but a permanent restroom is not feasible at the site. A cleaning and maintenance schedule is required to empty and maintain a sanitary toilet. Should be ADA-accessible where possible.

SEATING
FURNISHING

Seating typically means benches, or any other park furnishing deliberately intended as a seating space.

BENCHMARKED AMENITIES

BASKETBALL COURT
FURNISHING

A basketball court should be located where surveillance is convenient and where noise does not impact adjacent users.

MULTI-USE ATHLETIC FIELD
FURNISHING

A multi-use athletic field is a well-maintained turf field with dimensions large enough to accommodate many types of activities, such as soccer, lacrosse, football, rugby, baseball, and softball. Field markings are overlaid to maximize the sports use opportunities to be play on the same turf area. Field surface can either be natural or synthetic turf. Synthetic fields increase field use by 50% due to reduced down time required to account for weather and wear.

PLAY ELEMENT
FURNISHING

A play element is a single play item, such as swings, a teeter-totter, a slide, or monkey bars, with wood fibar chips or safety surfacing on the ground surrounding.

PLAYGROUND
FURNISHING

A playground is a grouping of play elements designed for children with safety surfacing. All playgrounds should provide inclusive access. Each playground should have a unique theme that reflects the park character. Seating opportunities should be placed nearby and oriented for visual supervision by parents/ guardians.

PLAYGROUND, ALL-ABILITIES
ACCESSIBILITY

An all-abilities playground is an inclusive playground structure(s) and surrounding area universally designed as a sensory-rich environment for users of all-abilities. All-abilities play elements engage physical, cognitive, communicative, social/emotional, and sensory needs to promote development and interaction. Seating opportunities should be placed nearby and aligned for visual supervision by parents.

RESERVABLE PICNIC AREA, SMALL
FURNISHING

A small reservable picnic area is a grouping of picnic tables able to accommodate groups less than 75 people, with shade and a BBQ. Parks with a reservable picnic areas should have a permanent restroom and access to adequate parking.

RESERVABLE PICNIC AREA, LARGE
FURNISHING

A large reservable picnic area is a grouping of picnic tables able to accommodate groups over 75 people with a shade structure and a BBQ. Parks with a reservable picnic areas should have a permanent restroom and access to adequate parking.

TENNIS COURT
FURNISHING

A tennis court should be fenced and striped to accommodate tennis play, or both pickleball and tennis. Adjacent seating should be provided for spectators and those waiting to play.

DRAFT

PRIORITY AMENITIES

COMMUNITY GARDEN
FURNISHING

A community garden is a fenced area with rentable garden plots for Belmont residents. There must be a minimum of 2 plots available for residents to rent. Access to water must be provided for gardening. Storage shed(s) for garden tools are preferred. The guidelines for the Belmont Community Garden apply.

DOG PARK
FURNISHING

A dog parklet is an informal fenced space for all-sized dogs to be off leash. The area should include shaded seating area for dog-owners to survey their pet(s), a dog waste station, and a trash receptacle. The fenced area can be dirt. Dog parklets are intended for local, neighborhood use.

DOG PARKLET
FURNISHING

A dog park includes two separate fenced spaces for small and large dogs to be off leash. The area should include shaded seating for dog-owners to survey their pet(s), a dog waste station, a trash receptacle, and a water fountain equipped for people and dog use with a double-gated entrance to the area. The fenced area can either be decomposed granite, natural or synthetic turf, and should be designed to create a minimum dimension to facilitate running and throwing. May include agility elements for dog play.

LOOP PATH
FURNISHING

A loop path is a wide, multi-use path that loops through a park. The path can be paved (concrete) or compacted gravel (decomposed granite), and minimum width of five feet for two people to pass side by side. The looped path should provide connection between the park entrance(s) or parking lot, playground, picnic area, or other points of interest. Planting should occur in areas of interest/entry/exit to designate and formalize the path. Seating should be provided at intervals along the path.

PUMP TRACK (BIKE PARK)
FURNISHING

A pump track is designed for riders to use their momentum to gather speed and reduce the need for pedaling through the course. Pump tracks should be a series of rollers and berms, typically made of packed soil, wood, or concrete designed for beginner to intermediate riders without high jumps. Prefabricated and modular pump track systems are available. Pump tracks can be designed as a loop track or allow for free form riding, much like a skate park.

SKATE PARK
FURNISHING

A skate park is a concrete area which contains a mix of terrain styles and trick elements, can also be of modular design, and prefabricated of other materials for installation. A skate park should be designed for beginner and intermediate abilities. A skate park should be fenced within a park. Restroom access preferred.

WATER PLAY, POOL
FURNISHING

A pool is proposed as a key component of the Barrett Community Center Master Plan. Belmont currently rents pool space at Carlmont High School during the summer.

WATER PLAY, SPRAY ELEMENT
FURNISHING

A spray element is a single water play feature that is activated to begin spraying water and automatically turns off after a set amount of time. Examples include a misting stick or ground spray water jet.

WATER PLAY, SPRAY PARK
FURNISHING

A spray park is a destination grouping of water play spray elements and/or water playground. Shade is recommended and there should be a permanent restroom in the park. Seating with shade should be available with sightlines for parents to watch children.

SECONDARY AMENITIES

FITNESS EQUIPMENT COURSE OR CLUSTER
FURNISHING

A course of cluster of fitness equipment is more than one permanent work-out apparatus focused on a single exercise movement. The equipment can be places along a path to create a course, or grouped together to create a cluster. Examples include pull up or push up bars, sit up bench, chest press, leg press, or cardio walker. Equipment must not require an electrical connection, should be low maintenance, and only include mechanical moving elements if desired by the community.

HANDBALL / WALLBALL COURT
FURNISHING

A handball or wallball court is a vertical wall, with a paved playing area the same width as the wall. When multiple courts run along a single wall, a shorter perpendicular wall separates each court. Ball walls are typically co-located in parks that have tennis courts.

HORSESHOE PIT / BOCCE BALL COURT
FURNISHING

A horseshoe pit and/or bocce ball court is a dual-purpose court sized to allow either a game of horseshoes or bocce ball.

OUTDOOR CLASSROOM
FURNISHING

An outdoor classroom is a space designed for educational programs, with seating (permanent or movable) oriented towards a single space for a teacher/leader. An outdoor classroom should be co-located on a site already allied with organized education or recreation programs. An outdoor classroom requires shade, access to restrooms, and must provide water nearby.

PERFORMANCE SPACE
FURNISHING

A performance area is a space dedicated to performance. The stage area should be paved, provide power, be enclosed with a shade canopy, and may or may not be raised. The seating space is an informal area facing the stage that can have permanent seating or provide free-form use for picnic blankets and camping chairs.

TEEN OUTDOOR SPACE
FURNISHING

A teen outdoor space is an activity or gathering space designed for teens.

DRAFT

OPEN SPACE

ADAPTIVE MANAGEMENT

Adaptive management is a decision process that promotes flexible decision making that can be adjusted in the face of uncertainties as outcomes from management actions and other events become better understood.

BEST PRACTICE MANAGEMENT

The preferred manner in which an activity is to be performed in order to be protective of both human health and the environment.

DISTURBANCE (ECOLOGICAL)

The disruption of an ecosystem's structure and function, generally with effects that last for time periods longer than a single seasonal growing cycle for vegetation.

FUEL REDUCTION

The removal of combustible vegetation to reduce the amount of flammable material to prevent or reduce the spread of wildfire.

HABITAT

The combination of living and non-living factors which contains suitable living conditions for a species within the range of that species.

HABITAT NETWORK

The configuration of patches of habitat allowing species dispersal through a landscape.

INVASIVE SPECIES

Animal or plant species that take over sufficiently large areas to reduce biodiversity.

MONITORING

Periodically collect data/information to track changes over time.

NATIVE

Those elements of the natural world occurring within an ecosystem prior to disturbance from an outside event.

NATURAL RESOURCE MANAGEMENT

Natural resource management generally consists of protecting, restoring, enhancing, and monitoring native vegetation and wildlife, and monitoring and protecting the quality of geological and hydrological conditions.

NON-NATIVE

Species which moved into, or were introduced into, pre-serve environments as a direct or indirect result of human activities.

NATURAL RESOURCE MANAGEMENT

Natural resource management generally consists of protecting, restoring, enhancing, and monitoring native vegetation and wildlife, and monitoring and protecting the quality of geological and hydrological conditions.

REDUNDANT TRAILS

Redundant trails are those trails that connect the same locations as an existing recognized trail. In some cases, these redundant trails are located within the same trail alignment as the city recognized trail, appearing as social or braided trails.

RESTORATION

The process of returning land that has been degraded and disturbed into functional habitat.

RIPARIAN

Riparian areas are defined as the vegetative and wildlife areas adjacent to perennial and intermittent streams and other freshwater bodies, such as lakes, ponds, and reservoirs.

SENSITIVE RESOURCE AREAS

Sensitive resource areas include habitats or natural communities that are either unique, of relatively limited distribution in the region, or of particularly high value for wildlife; however, these habitats may or may not necessarily contain special-status species. Sensitive natural communities are usually identified in regional or local plans, policies, or regulations, or by the U.S. Fish and Wildlife Service or California Department of Fish and Wildlife.

WILDFIRE HAZARD MITIGATION

Action taken to reduce or eliminate long-term risk to people and their property from hazards such as proximity of flammable vegetation, dead or dying tree limbs, or pollution or contamination in close proximity to homes or public facilities.

WILDLIFE CORRIDOR

The structural and functional link between patches of habitat used by migrating animals in fulfillment of their life cycle.

APPENDIX D

NRPA BENCHMARKS

NRPA AMENITY RATIOS

The National Recreation and Parks Association (NRPA) compiles park metrics from park and recreation agencies across the nation annually. The intent of publishing this data is to allow park and recreation agencies to benchmark peer agencies in their mission to serve their residents.

The following tables are the amenity ratios gathered from over 1,000 park and recreation agencies for the 2021 NRPA Agency Performance Review.

AMENITY RATIOS FOR JURISDICTIONS OF A SIMILAR SIZE

The NRPA has processed the gathered data to allow jurisdictions to compare their amenity offerings to jurisdictions serving a similar size population. The population ranges are: less than 20,000, 20,000 to 49,999, 50,000 to 99,999, 100,000 to 250,000, and more than 250,000. Belmont has a 2020 population within the 20,000 to 49,999 range.

AMENITY RATIOS FOR THE PACIFIC SOUTHWEST REGION

The NRPA has processed the gathered data to allow jurisdictions to compare their amenity offerings to jurisdictions in their region. The regions are: New England, Mid-Atlantic, Southern, Great Lakes, Midwest, Southwest, Pacific Northwest, and Pacific Southwest.

AMENITY RATIOS FOR CALIFORNIA

The NRPA has processed the gathered data to allow jurisdictions to compare their amenity offerings to jurisdictions in their state.

APPENDIX E

AMENITY PROJECTIONS

The PROS Plan used the General Plan forecasted population of 30,500 by the year 2035.

During the PROS Plan process, the City began an update to the General Plan Housing Element. The previous Housing Element covered the 8-year span from 2015 to 2023. The upcoming Housing Element, in progress at the time of the PROS Plan, will cover 2023 to 2031. The 2023-2031 Housing Element will reflect increased population projections as a result of the additional housing units needed to respond to the Regional Housing Needs Assessment (RHNA) allocation. Belmont was assigned a RHNA allocation of 1,785 new housing units for the 2023-2031 housing cycle.

During the 2023-2031 Housing Element update, the population forecasts in the General Plan were evaluated and revised. At an average of 2.44 people per unit, the RHNA allocation of 1,785 new housing units equates to a potential increased population of 4,463 residents by 2031. To account for the increase in the forecasted population, the Ideal Amenity Quantities for the Future 2035 population were revised. The benchmark and amenity analysis tables included in this section consider this additional projected population increase.

1.0 Executive Summary

In 2021, the City of Belmont (City) began developing an updated Parks, Recreation, and Open Space Master Plan (PROS Plan) as forward-looking guide for planning, maintaining, developing, and rehabilitating the City's system of parks, recreation sites, and open space areas over the next 15 years. As part of the PROS Plan, this Open Space Management Plan (OSMP) was developed to better understand the conditions in the City's two open space areas and provide a programmatic framework to address key management topics. The OSMP is organized into three chapters:

- Chapter 2.0 contains the Environmental Assessment which includes a characterization of existing conditions including flora and fauna, trail erosion, and wildfire hazards. Considerations for habitat improvements and wildfire hazard reduction are provided.
- Chapter 3.0 contains the Recreation Use Assessment and Benchmarking which includes discussions of current open space recreation trends, trail usage, condition, and density, and provides best practices for trail design, construction, and maintenance.
- Chapter 4.0 contains the Management Plan which utilizes the conclusions from the previous two chapters, City staff and public input to outline a framework of objectives, policies and recommendations focused on environmental sustainability, balanced recreation use, and natural hazard mitigation themes.

The salient findings of each chapter are summarized below. The content of this OSMP has been integrated into the formatting of the PROS Plan and references to the PROS Plan are inclusive of this OSMP (Appendix G of the PROS Plan also contains the OSMP).

Belmont's two open space areas are Waterdog Lake Open Space Area (WDL) and San Juan Canyon Open Space Area (SJC) which are both located in the western portion of the city (Figure 2.1). Both WDL and SJC contain trails through native and non-native vegetation communities and provide nature-based recreation opportunities including hiking, biking, dog walking, and wildlife and plant study.

1.1 Environmental Assessment Findings

Across both WDL and SJC Open Space areas, 11 special-status plant species and 7 special-status wildlife species have moderate/high potential to occur or are present. Limited portions of the open space areas are comprised of developed areas, eucalyptus groves, and non-native annual grassland. The majority of both WDL and SJC contain native plant species. Indeed, over 90 percent of the open space lands consist of native biological communities and both non-sensitive and sensitive communities exist. Invasive species were observed, though generally limited to patches of less than 50 square feet and represented a small portion of the overall area. As such, the overall habitat quality of the open space lands is determined to be of high quality to moderate quality, with the areas adjacent to trails and residential development generally being moderate quality. Areas with limited anthropogenic influence (set back from residential uses and major trails), have high quality habitat.

WRA mapped trail conditions for approximately 13 miles of trails, including trails that are found on city maps as well as previously unmapped trails. Collectively, the trails have a relatively small "footprint," representing approximately five acres of open space, i.e., of 1.3 percent of the total open space acreage.

Most trail erosion locations were found in the larger WDL area, and among those locations, the majority were assessed as exhibiting a "low" level of erosion. For both WDL and SJC, approximately 1 in every 10 erosion locations were categorized as "high" erosion. These results demonstrate that the trail systems in each open space area are in relatively good condition overall, but that there are specific locations of "high" erosion that should be addressed immediately. In addition, approximately 50 stream crossings were identified along existing trails with varied crossing mechanisms, ranging from a free-span wooden footbridge to a plank placed across the stream, to stepping stones. Many of these crossings should also be improved in the near term to provide better protection of the riparian habitat below.

The majority (approximately 147 of 290 acres) of vegetation in WDL is coastal live oak, which has a low hazard rating and ignition potential (East Bay Regional Parks District, 2010). This situation also applies to SJC, with the majority of vegetation there mapped as coastal live oak. However, according to the Safety Element of the 2035 City of Belmont General Plan WDL lies within the Very High Fire Hazard Zone, and SJC lies with the High Fire Hazard Zone, based on factors including steep topography, weather, and the potential to damage human life and structures (City of Belmont, 2017).

1.2 Recreation Assessment Findings

The population of Belmont and San Mateo County is increasing and the rates of participation in nature-based recreation activities are expected to continue to increase as well. In general, cycling participation has been rising in recent years especially in large cities like San Francisco (San Francisco Municipal Transportation Agency, 2022). One likely contributor to cycling participation is the growing use of electric pedal assist bicycles (e-bikes) which have had sales increase nearly 50 percent per year since 2013 (PeopleForBikes, 2017). In addition, e-bike use on trails within parks and protected areas appears to be increasing (PeopleForBikes, 2017). Though mountain biking participation is also increasing nationally (Newcomb, 2020), whether e-bikes are driving this increase is actively being researched (Federal Highway Administration, 2022). The implication for this that the number of cyclists on trails may not be increasing dramatically, but rather existing cyclists on trails are switching to e-bikes instead of standard bikes.

As part of the public engagement process for the RROS Plan, the *Belmont Parks, Outdoor Recreation Programs and Open Space Community Survey* (PROS Survey; Gates + Associates, 2021) collected responses to an online survey during April 2021. The PROS Survey found that residents from Belmont, as well as neighboring cities like San Mateo, San Carlos, and Redwood City, participate in walking, running, biking, and dog-walking on Belmont's open space trails. The PROS Survey also found that most respondents visited open space areas multiple times per week, typically for a duration of 1-2 hours or more, and typically for the purposes of exercising, communing with nature, and experiencing peace and quiet.

Both the WDL and SJC have trail systems that are similar in density when compared to similarly urban open space areas in neighboring cities in San Mateo County. Both WDL and SJC have previously unmapped trails that make up 25 percent of all trail miles.

1.3 Management Plan

The OSMP has been prepared to provide a programmatic framework to address three main themes: environmental sustainability, balanced recreation use, and mitigation of natural hazards. Within each theme is a hierarchy of objectives, policies, and recommendations. The objectives are general statements that articulate a desired outcome. Policies are more specific statements that state what steps the City

may take to achieve a desired outcome. Recommendations are measurable actions that specify how a desired outcome can be achieved. The objectives, policies, and recommendations were developed based on existing City planning documents, City staff input, the considerations from Chapters 2 and 3 of this document, public input from the PROS Survey, emailed public comments, and an open house event held in May 2022.

1.3.1 Priority Recommendations

Several recommendations were identified as being priorities, based on habitat protection, wildfire safety, and visitor experience (Tier 1) and equity-based programs and visitor experience (Tier 2). Upon adoption of the PROS Plan, the following actions should be prioritized for implementation at WDL and SJC.

Tier 1: Habitat Protection, Wildfire Safety, and Visitor Experience

Environmental Sustainability

- **Stream Crossing Improvements:** WRA identified multiple stream crossings requiring improvements and prioritized the top seven crossings most in need of improvements.
- **Seasonal / Weather Dependent Restrictions on Maintenance Activities:** Ensure that the City's routine trail maintenance actions avoid nesting bird season to the extent possible, and avoid working in wet weather conditions (emergencies excepted) to the extent feasible.

Balanced Recreation Use

- **Monitor Use and Survey Visitors During E-Bike Pilot:** Take an approach similar to what Midpeninsula Regional Open Space District has done to develop a policy for e-bike use. The district studied use levels and visitor responses for a year before making policy recommendations to their Planning and Natural Resource Committee.
- **ADA-Compliant Trails:** Identify three trail segments that offer distinctive recreation experiences and ensure those segments comply with the California State Parks Accessibility Guidelines. One segment will offer the experience to travel along a ridgeline, another segment will offer an experience to travel along a canyon floor, and a third segment will offer opportunities for panoramic views.

Natural Hazard Mitigation

- **Fuels Reduction Plan:** The fuels reduction plan would prioritize fuel break areas to be treated as shown and Figures 2.4 and 2.5, and would highlight additional areas that would benefit from fuels reduction.

Tier 2: Equity-Based Programs and Visitor Experience

Environmental Sustainability

- **Volunteer Restoration Programs:** These programs which have been informally carried out would be codified and respond to the interests and actions of environmentally focused community members.

Balanced Recreation Use

- **Nature-Based Recreation Programs:** Respond to the community's interest in environmental education with focused programs that, among other things, may reinforce support for protecting the two open space areas and create "citizen scientists."
- **Trail Calming Features:** Implement trail calming features in targeted locations to respond to community comments about feeling some sections of trails are unsafe due to blind turns, steep slopes, narrow trails, or a combination of all three.

DRAFT

2.0 Environmental Assessment

2.1 Introduction

This chapter provides an environmental assessment of existing conditions pertaining to biological resources, trail erosion, and wildfire hazards at WDL and SJC. Following the baseline information collected for these resources, management recommendations are provided to promote a balanced and fair approach that considers environmental protection, public health and safety, diverse recreation, and sustainability. This assessment was conducted by WRA, Inc. (WRA) to inform and support the OSMP as part of the PROS Plan. This chapter describes the results of the site visit, which assessed the open space areas for (1) the presence of sensitive biological communities, special-status plant species, and special-status wildlife species, (2) the potential for the site to support special-status plant and wildlife species.

In addition to documenting existing biological communities and sensitive habitats in both park units, WRA broadly assessed the baseline quality of such habitats located near the trails. This will enable the City to track and evaluate any changes in habitat quality and implement management actions accordingly.

WDL is approximately 290 acres of city-owned property and features the following: trails which meander through chaparral, oak woodland, and riparian habitats; a viewshed of the San Francisco Bay; and Waterdog Lake at its center. SJC is approximately 39 acres of City-owned property surrounded by undeveloped parcels that are privately owned, located approximately ¾-mile west of Waterdog, across Ralston Way. SJC features similar habitats as WDL. Both open spaces are generally surrounded by single-family residential land use; boundary lines depicted are approximate to illustrate the Study Area within which the environmental the recreation assessments were performed (Figure 2.1).

2.2 Regulatory Background

The following sections explain the regulatory context of the biological assessment, including applicable laws and regulations that were applied to the field investigations and would apply to any future, ground disturbing actions to sensitive and common species that the city may choose to implement following adoption of the PROS Plan.

2.2.1 Special-Status Species

Special-status species include those plants and wildlife species that have been formally listed, are proposed as endangered or threatened, or are candidates for such listing under the federal Endangered Species Act (FESA) or California Endangered Species Act (CESA). These Acts afford protection to both listed and proposed species. In addition, California Department of Fish and Wildlife (CDFW) Species of Special Concern (SSC), and National Marine Fisheries Service (NMFS) Species of Concern (SOC), are species that face extirpation if current population and habitat trends continue. U.S. Fish and Wildlife Service (USFWS) Birds of Conservation Concern, sensitive species included in USFWS Recovery Plans, and CDFW special-status invertebrates are also considered special-status species. Although CDFW Species of Special Concern generally have no special legal status, they are given special consideration under CEQA. In addition to regulations for special-status species, most birds in the United States, including non-status species, are protected by the Migratory Bird Treaty Act (MBTA) of 1918. Under this legislation, destroying active nests, eggs, and young is illegal. Bat species designated as "High Priority" by the Western Bat Working Group qualify for legal protection under Section 15380(d) of the CEQA Guidelines. "High Priority" species are defined as "imperiled or are at high risk of imperilment based on available information on distribution, status, ecology and known threats".

Plant species included within the California Native Plant Society (CNPS) Inventory of Rare and Endangered Plants (Inventory, CNPS 2020) with California Rare Plant Rank (Rank) of 1, 2, and 3 are also considered special-status plant species and must be considered under the CEQA. Some Rank 4 plant species meet the definitions of Section 1901 Chapter 10 of the Native Plant Protection Act or Sections 2062 and 2067 of the California Fish and Game Code (CFGC) that outlines CESA. However, the CNPS and CDFW strongly recommend that these species be fully considered during the preparation of environmental documentation related to CEQA. This may be particularly appropriate for the type locality of a Rank 4 plant species, for populations at the periphery of a species range, or in areas where the taxon is especially uncommon or has sustained heavy losses, or from populations exhibiting unusual morphology or occurring on unusual substrates. A description of Ranks is provided below in Table 2.1.

Table 2.1. Description of Ranks and Threat Codes

California Rare Plant Ranks (formerly known as CNPS Lists)	
Rank 1A	Presumed extirpated in California and either rare or extinct elsewhere
Rank 1B	Rare, threatened, or endangered in California and elsewhere
Rank 2A	Presumed extirpated in California, but common elsewhere
Rank 2B	Rare, threatened, or endangered in California, but common elsewhere
Rank 3	Plants about which more information is needed - A review list

California Rare Plant Ranks (formerly known as CNPS Lists)	
Rank 4	Plants of limited distribution - A watch list
Threat Ranks	
0.1	Seriously threatened in California
0.2	Moderately threatened in California
0.3	Not very threatened in California

2.2.2 Sensitive Biological Communities

Sensitive biological communities include habitats that fulfill special functions or have special values, such as wetlands, streams, and riparian habitat. These habitats are regulated under federal regulations (such as the Clean Water Act [CWA]), state regulations (such as the Porter-Cologne Act, the CDFW Streambed Alteration Program, and CEQA), or local ordinances or policies (such as City or County Tree Ordinances, Special Habitat Management Areas, applicable Local Coastal Programs, and General Plan Elements).

2.2.3 Waters of the United States

The stream channels in WDL connect to Belmont Creek, which empties out into the San Francisco Bay, a traditional navigable water. SJC includes Laurel Creek, which also empties into the San Francisco Bay. Based on the current federal regulations, this establishes a federal nexus; stream channels and creeks within the open space areas are therefore potentially considered Waters of the U.S. Section 404 of the CWA gives the U.S. Environmental Protection Agency (EPA) and the Corps regulatory and permitting authority regarding discharge of dredged or fill material into "navigable" waters of the U.S. Section 502(7) of the CWA defines navigable waters as "waters of the United States, including territorial seas." Section 328 of Chapter 33 in the Code of Federal Regulations (CFR) defines the term "waters of the United States" as it applies to the jurisdictional limits of the authority of the Corps under the CWA. A summary of this definition of "waters of the United States" in 33 CFG 328.3(a) includes:

> *(1) waters which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide; the territorial seas; or interstate waters;*
>
> *(2) impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (5) of this section;*
>
> *(3) tributaries of waters identified in paragraph (1) or (2) of this section that are relatively permanent, standing or continuously flowing bodies of water;*
>
> *(4) wetlands adjacent to the following waters: waters identified in paragraph (1) of this section; or relatively permanent, standing or continuously flowing bodies of water identified in paragraph (2) or (3) of this section and with a continuous surface connection to those waters;*

(5) intrastate lakes and ponds not identified in paragraphs (1) through (4) of this section that are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (1) or (3) of this section.

In the Corps Rivers and Harbors regulations (33 CFR Part 329.4), the term "navigable waters of the U.S." is defined to include all those waters that are subject to the ebb and flow of the tide, and/or presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.

The definitions of wetlands and non-wetland waters, as well as areas exempt from jurisdiction, are discussed in more detail below.

Wetlands

Wetlands are defined in 33 CFR 328.3(c) as:

…those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

The basis for determining whether a given area is a wetland for the purposes of Section 404 of the CWA is outlined in the *U.S. Army Corps of Engineers Wetlands Delineation Manual* (Corps Manual; Environmental Laboratory 1987) and the *Regional Supplement to the Corps of Engineers Delineation Manual* for the respective region (Arid West or Western Mountains, Valleys, and Coast for California). As defined in 33 CFR 328.4(c), the extent of federal jurisdiction within wetlands is defined as extending to the limit of the wetland as determined using the methods outlined in the manuals.

Areas Exempt from Section 404 Jurisdiction

Some areas that meet the technical criteria for wetlands or waters may not be jurisdictional under the CWA per Section 404 regulations and the Corps Manual. As defined in 33 CFR 328.3(b), the following features are exempt from Section 404 Jurisdiction:

(1) Waste treatment systems, including treatment ponds or lagoons, designed to meet the requirements of the Clean Water Act;

(2) Prior converted cropland designated by the Secretary of Agriculture. The exclusion would cease upon a change of use, which means that the area is no longer available for the production of agricultural commodities. Notwithstanding the determination of an area's status as prior converted cropland by any other Federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA;

(3) Ditches (including roadside ditches) excavated wholly in and draining only dry land and that do not carry a relatively permanent flow of water;

(4) Artificially irrigated areas that would revert to dry land if the irrigation ceased;

(5) Artificial lakes or ponds created by excavating or diking dry land to collect and retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing;
(6) Artificial reflecting or swimming pools or other small ornamental bodies of water created by excavating or diking dry land to retain water for primarily aesthetic reasons;
(7) Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is abandoned and the resulting body water meets the definition of waters of the United States; and
(8) Swales and erosional features (e.g., gullies, small washes) characterized by low volume, infrequent, or short duration flow.

2.2.4 Waters of the State

The Dickey Water Pollution Act of 1949 and Porter Cologne Act of 1969 established the State Water Resources Control Board (SWRCB) and nine Regional Water Quality Control Board (RWQCB) districts in the State of California. The SWRCB and each RWQCB district regulates activities in Waters of the State, which include Waters of the U.S. Waters of the State are defined by the Porter-Cologne Act as "any surface water or groundwater, including saline waters, within the boundaries of the state." In addition, the SWRCB has adopted a wetland definition that is similar to, but slightly different from, that used by the Corps. The state definition as adopted in April 2019 and currently in effect, states that:

> *An area is wetland if, under normal circumstances, (1) the area has continuous or recurrent saturation of the upper substrate caused by groundwater, or shallow surface water, or both; (2) the duration of such saturation is sufficient to cause anaerobic conditions in the upper substrate; and (3) the area's vegetation is dominated by hydrophytes or the area lacks vegetation.*

The RWQCB regulates discharges of fill and dredged material under Section 401 of the CWA and the Porter-Cologne Water Quality Control Act through the State Water Quality Certification Program. State Water Quality Certification is necessary for all projects that require a Corps permit, or fall under other federal jurisdiction, and have the potential to impact waters of the State. In order for a Section 404 permit to be valid, Section 401 of the CWA requires a Water Quality Certification or waiver to be obtained. The Water Quality Certification (or waiver) determines that the permitted activities will not violate water quality standards individually or cumulatively over the term of the action. Water quality certification must be consistent with the requirements of the CWA, CEQA, the CESA and Porter-Cologne Act.

If a proposed project or portion of a proposed project does not require a federal permit, but does involve dredge or fill activities that may result in a discharge to Waters of the State, the RWQCB has the option to regulate the dredge and fill activity under its state authority in the form of Waste Discharge Requirements or Certification of Waste Discharge Requirements. In these cases, a Water Quality Certification is not necessary under Section 401 of the CWA because federal jurisdiction does not apply.

2.2.5 Streams, Lakes, and Riparian Habitat

Streams and lakes, as habitat for fish and wildlife species, are subject to jurisdiction by CDFW under Sections 1600-1616 of the CFGC. Alterations to or work within or adjacent to streambeds or lakes generally require a 1602 Lake and Streambed Alteration Agreement. The term stream, which includes creeks and rivers, is defined in the California Code of Regulations (CCR) as follows: "a body of water that flows at least periodically or intermittently through a bed or channel having banks and supports fish or other aquatic life. This includes watercourses having a surface or subsurface flow that supports or has supported riparian vegetation" (14 CCR 1.72). In addition, the term stream can include ephemeral streams, dry washes, watercourses with subsurface flows, canals, aqueducts, irrigation ditches, and other means of water conveyance if they support aquatic life, riparian vegetation, or stream dependent terrestrial wildlife (CDFG ESD 1994). Riparian is defined as, "on, or pertaining to, the banks of a stream;" therefore, riparian vegetation is defined as, "vegetation which occurs in and/or adjacent to a stream and is dependent on, and occurs because of, the stream itself" (CDFG ESD 1994). Removal of riparian vegetation also requires a Section 1602 Lake and Streambed Alteration Agreement from CDFW.

2.2.6 Other Sensitive Biological Communities

Other sensitive biological communities not discussed above include habitats that fulfill special functions or have special values. Natural communities considered sensitive are those identified in local or regional plans, policies, regulations, or by the CDFW. The CDFW ranks sensitive communities as "threatened" or "very threatened" and keeps records of their occurrences in its Natural Diversity Database (CNDDB, CDFW 2020). Sensitive plant communities are also identified by CDFW on their *List of California Natural Communities Recognized by the CNDDB* (CDFW 2020). Impacts to sensitive natural communities identified in local or regional plans, policies, regulations or by the CDFW or USFWS must be considered and evaluated under CEQA (CCR: Title 14, Div. 6, Chap. 3, Appendix G). Specific habitats may also be identified as sensitive in City or County General Plans or ordinances.

2.2.7 Relevant City of Belmont Policies

Policies relative to management and conservation of the City's open space areas are found in the following planning documents:

- Belmont Parks and Open Space Plan (1992)
- City of Belmont General Plan, Parks, Recreation, and Open Space Element (2017)
- City of Belmont General Plan, Conservation Element (2017)
- The Western Hills Area Plan (1990)

Belmont Parks and Open Space Plan (1992)

Action focused recommendations from the 1992 Belmont Parks and Open Space Plan include the following:

- The preserved open space should be retained in a natural state for passive recreation, education, and aesthetic purposes.
- Vegetation management will be required to create and maintain native ecosystems and for fire control.
- Development should be limited to those types of facilities that support the intended passive uses, including trails, trailheads, signage, picnic areas, and small neighborhood parks.

Relevant policies from the 1992 Belmont Parks and Open Space Plan include the following:

- Assist the Fire Protection District to identify wildland fire hazard areas and develop fire access roads.
- Preserve large contiguous units of open space.
- Protect wildlife habitat by maintaining wildlife corridors and preserving habitat and corridors in new residential neighborhoods.

City of Belmont General Plan, Parks and Conservation Elements (2017)

Goals and policies presented in the General Plan apply to all areas within the City. The goals and policies listed below from the Parks, Recreation, and Open Space Element as well as the Conservation Element are especially relevant to this OSMP (City of Belmont, 2017) and include the following:

- Continue to develop and support a balanced and integrated open space system reflecting a variety of considerations, including natural resource conservation, outdoor recreation, and public health and safety, to ensure synergies between various open space components and compatibility with land use planning.
- Continue to designate and protect open space lands for the preservation of scenic areas, natural drainage ways, and plant and wildlife habitats; for outdoor recreation; and for public health and safety. See also policies in the Conservation and Safety elements.
- Maintain connectivity between large open spaces in Belmont and the region, including the WDL area, San Juan Hills area, Sugarloaf Mountain, and the open space in the San Francisco Public Utility District's Crystal Springs watershed.
- Consistent with the San Juan Hills and Western Hills area plans, cluster development in the hillside areas of western Belmont in order to maintain contiguous habitat areas, minimize grading, and limit exposure to steep slopes and other sensitive areas. See also policies in the Land Use Element.
- Develop programs to control invasive plant species that threaten the natural resources.
- Continue programs to reduce the fire danger in the open space.
- Preserve and protect open space resources using various methods available to the City.
- Protect Belmont Creek from future encroachment through regulation, development review, conservation easements, or other appropriate actions.
- Seek to preserve the existing open space areas in the San Juan Hills and Western Hills, consistent with the Area Plans, especially on steep hillsides and sensitive habitat areas.
- Protect and maintain open space for the preservation of natural resources.
- Ensure that any improvements recommended for open space areas are appropriate for the type of open space and the use proposed.
- In portions of Belmont that include significant open space resources, use area plans to address the balance and interface between natural and developed areas.
- Reduce risk of wildland fire, ecological succession, and pathogen threats (such as Sudden Oak Death) through active maintenance of public spaces and education and enforcement of development standards on private property.
- Ensure that future acquisitions of open space land are compatible with the City's open space strategy and long-term interests.
- Protect and restore biological and ecological resources in Belmont, including sensitive wildlife species and their habitats.

- Support the protection, preservation, restoration, and enhancement of habitats of State or federally listed rare, threatened, endangered and/or other sensitive and special status species, and favor enhancement of contiguous areas over small, segmented remainder parcels.
- Continue to maintain, protect, restore, and enhance Belmont's ecologically important areas and seek to reduce impacts on them, including the creek corridors, the open space, and the wetlands around O'Neill Slough.
- To the greatest extent feasible, ensure that development does not disturb sensitive habitat and special status species by requiring appropriate and feasible mitigation measures.
- Maintain functional wildlife corridors and habitat linkage in order to contribute to regional biodiversity and the viability of rare, unique or sensitive biological resources throughout the city and region.
- In design and construction, require use of best practices that preserve natural resources, such as soil, trees, native plants, and permeable surfaces.
- Avoid light pollution and unnecessary glare by requiring development projects to use design features and shielding methods that cast outdoor light downward and minimize glare and to install the minimum amount of outdoor lighting necessary for safety and security.
- Encourage the planting of native trees, shrubs, and grasslands in order to preserve the visual integrity of the landscape, provide habitat conditions suitable for native vegetation, and ensure the maximum number and variety of well-adapted plants are maintained.
- Preserve and restore Belmont's waterways and adjacent corridors as valuable community resources that serve as plant and wildlife habitats, groundwater recharge facilities, flood control and irrigation components, and connections between open space areas.
- Restore Belmont Creek to enhance ecological functions, biological resources, hydrology function, and flood control.
- Preserve, where possible, natural watercourses or provide naturalized drainage channels within the city. Where necessary and feasible, implement restoration and rehabilitation measures.
- Protect, restore, and enhance a continuous corridor of native riparian vegetation and wildlife habitat along Belmont's waterways, water bodies, and wetlands.
- Preserve and enhance the natural riparian environment along waterway corridors, including Belmont Creek, by minimizing environmental and visual impacts.
- Preserve water quality by promoting the protection of Belmont's creeks and other natural water bodies from pollution.
- Continue to participate in the San Mateo Countywide Water Pollution Prevention Program.
- Encourage residents and businesses to use best management practices (BMPs) to reduce water pollutant loads that result from daily activities, such as using landscaping chemicals and fertilizers and repairing and washing cars outdoors.
- Require development projects to incorporate structural and non-structural best management practices (BMPs) to mitigate or reduce the projected increases in pollutant loads, in accordance with the NPDES permit guidelines.
- Ensure that the design and construction of new infrastructure elements does not contribute to stream bank or hillside erosion or creek or wetland siltation, and incorporates site design and source control BMPs, construction phase BMPs, and treatment control BMPs to minimize impacts to water quality.
- Implement water pollution prevention methods to the maximum extent practicable, supplemented by pollutant source controls and treatment.

The Western Hills Area Plan (1990)

Relevant goals and policies from the 1990 Western Hills Area Plan include the following:

- Encourage Open Space Protection: Encourage the preservation of open space in areas of scenic, natural resource, and recreational value, as well as areas that are geologically hazardous or steeply sloped. Assist private landowners in finding ways for them to manage and permanently preserve private open space.
- Preserve and maintain existing open space areas.

2.3 Methods

On March 8, 21, and 22, 2022 WRA biologists, Ivy Poisson and Brian Kearns, traversed over 10 miles of existing trails within the Study Area to:

1. Ground-truth vegetation communities obtained from the San Mateo County vegetation mapping dataset (2021)
2. Determine if existing conditions provide suitable habitat for special-status plant or wildlife species,
3. Determine the baseline conditions of habitat quality within view from the trails,
4. Conduct a qualitative trail assessment, and
5. Determine the open spaces' consistency with existing regulations and policies.

A list of incidental species observations was also compiled. Plant nomenclature follows the Jepson Flora Project (2022), except where noted. For cases in which taxonomic discrepancies occur between Baldwin et al. and the CNPS Inventory, precedence was given to the species classification used in the Inventory.

2.3.1 Sensitive Biological Communities

The San Mateo County vegetation mapping dataset (2021) was examined to provide baseline information on plant communities. Biological communities present in the Study Area were classified based on existing plant community descriptions described in the *Preliminary Descriptions of the Terrestrial Natural Communities of California* (Holland 1986) and *A Manual of California Vegetation* (Sawyer et al. 2009). However, in some cases it is necessary to identify variants of community types or to describe non-vegetated areas that are not described in the literature. Biological communities were classified as sensitive or non-sensitive as defined by CEQA, and other applicable laws and regulations. Each biological community is given a state or global ranking, ranging from 1 to 5. These rankings are defined below, with G indicating global status, and S indicating state status for California. State and/or global rankings of 1, 2, or 3 are considered sensitive.

1 **Critically Imperiled** — At very high risk of extinction or elimination due to very restricted range, very few populations or occurrences, very steep declines, very severe threats, or other factors.
2 **Imperiled** — At high risk of extinction or elimination due to restricted range, few populations or occurrences, steep declines, severe threats, or other factors.
3 **Vulnerable** — At moderate risk of extinction or elimination due to a fairly restricted range, relatively few populations or occurrences, recent and widespread declines, threats, or other factors.

4 **Apparently Secure** — At fairly low risk of extinction or elimination due to an extensive range and/or many populations or occurrences, but with possible cause for some concern as a result of local recent declines, threats, or other factors.

5 **Secure** — At very low risk of extinction or elimination due to a very extensive range, abundant populations or occurrences, and little to no concern from declines or threats.

Non-sensitive biological communities are those communities that are not afforded special protection under CEQA, and other state, federal, and local laws, regulations and ordinances, and generally are ranked 4 or 5 on a global or state level. These communities may provide suitable habitat for some special-status plant or wildlife species and are discussed below. Sensitive biological communities are defined as those communities that are given special protection under CEQA and other applicable federal, state, and local laws, regulations and ordinances. Applicable laws and ordinances are discussed above. Special methods used to identify sensitive biological communities are discussed below.

Wetlands and Waters

The Study Area was surveyed at a reconnaissance level to determine if any wetlands and waters potentially subject to jurisdiction by the Corps, RWQCB, or CDFW were present. The assessment was based primarily on the presence of wetland plant indicators but may also include any observed indicators of wetland hydrology as defined by the Corps Manual (Environmental Laboratory 1987) and the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Region* (Corps 2008). Any potential wetland areas were identified as areas dominated by plant species with a wetland indicator status of obligate wetland (OBL), facultative wetland (FACW), or facultative (FAC) as given on the U.S. Department of Agriculture: National Wetland Plant List (Corps 2020). Evidence of wetland hydrology can include evidence such as visible inundation or saturation, surface sediment deposits, algal mats and drift lines, and oxidized root channels. Given that the site visits did not include a routine-level wetland delineation and was only reconnaissance level, soils were not examined in the field as part of this assessment. Streams were remotely mapped in ArcGIS using hydrologic modeling tools. Using the 2010 ARRA lidar dataset, streams were modeled using a 3-acre watershed with a nearest neighbor algorithm to determine flowlines.

2.3.2 Special-status Species

Potential occurrence of special-status species in the Study Area was evaluated by first determining which special-status species occur in the vicinity of the Study Area through a literature and database search. Database searches for known occurrences of special-status species were for the San Mateo and eight surrounding 7.5-minute U.S. Geological Survey (USGS) quadrangles. The following sources were reviewed to determine which special-status plant and wildlife species have been documented to occur in the vicinity of the Study Area:

- CNDDB records (CDFW 2022)
- USFWS Information for Planning and Conservation Species (USFWS 2022)
- CNPS Inventory records (CNPS 2022)
- California Bird Species of Special Concern (Shuford and Gardali 2008)
- USFWS Critical Habitat Mapper (USFWS 2022)

Special status species are defined as federally or state listed species (threatened or endangered; FT, ST, FE, SE), CDFW Species of Special Concern (SSC) and CDFW Fully Protected (FP). In addition to federal and state listing status for plant species, species with a California Native Plant Society Rare Plant Ranking (CRPR) of 1 through 4 is also included in this report.[1] Bats are also given special consideration if they are listed by the Western Bat Working Group (WBWG) as Medium or High.[2]

2.3.3 Habitat Quality

The overall habitat quality of the Study Area was evaluated based on the cover of native versus non-native plant species, presence and extent of invasive plant species, and extent of anthropogenic disturbance. General notes and observations of plant species composition were made throughout the Study Area by WRA biologists while traversing throughout the existing trail network, followed by a review of aerial imagery, in order to assign a general value to the Study Area. This assessment is qualitative in nature and should not be interpreted to be a comprehensive assessment of each biological community that is identified within the Study Area. The definitions of habitat quality ranking are listed in Table 2.2 below.

Table 2.2. Habitat Quality Categories

High Quality / Mostly Intact ● Vegetation is composed of greater than 75 percent native plant cover ● Invasive species are generally absent based on visual estimates from the trail network ● Visible evidence of vegetation trampling by trail users is absent or negligible
Moderate Quality / Moderately Altered or Impacted ● Vegetation is composed of greater than 50 percent native plant cover ● Invasive species are present but was observed to be less than 50 square feet based on visual estimates from the trail ● Visible evidence of vegetation trampling by trail users is present but not extensive
Low Quality ● Vegetation is composed of less than 50 percent native plant cover based on visual estimates from the trail ● Invasive species are present, comprise more than 100 square feet, and is observed to be crowding out/negatively impacting native species within the vegetation community ● Visible evidence of vegetation trampling by trail users is present but not extensive
Low Quality / Extensively Altered or Impacted ● Vegetation is composed of less than 50 percent native plant cover based on visual estimates from the trail ● This habitat features an invasive species as a dominant or codominant in the tree/shrub/herb stratum ● Visible evidence of vegetation trampling by trail users is present and extensive

2.3.4 Trail Assessment

The purpose of the trail environmental condition assessment was to generally characterize environmental conditions on open space trails, which could be used to develop recommendations that could be implemented as part of the OSMP. A qualitative assessment of trail conditions on both mapped trails (those shown by City maps) and unmapped trails (those which are not shown on City maps) was made

[1] Definitions of CRPR ranking is available here: https://www.cnps.org/rare-plants/cnps-rare-plant-ranks

[2] WBWG "High" designation represents those species considered the highest priority for funding, planning, and conservation actions; "medium" designation indicates a level of concern that should warrant closer evaluation, more research, and conservation actions of both the species and possible threats.

based on the level of erosion and vegetation impacts observed. Categories include high, medium, and low erosion; these categories are defined in Table 2.3 below, along with a representative photo of the category. Point data were collected along the trail feature. In addition, WRA also noted if adjacent vegetation shows signs of impacts (trampling, what appears to be obvious/unsanctioned vegetation trimming). Maps of trail conditions can be found in Chapter 3.

Table 2.3. Trail Condition Categories

High	**High Erosion** There are more than two deep ruts located along the length of the trail, and there are several observations that it significantly interferes with pedestrian and cycling activities where it causes trail users to create additional pathways to avoid this erosion feature. For this category, evidence of trail user impacts resulting from the erosion feature includes more than one of the following: trail widening, braided trails, unsanctioned trails, soil compaction, and vegetation trampling.	
Medium	**Medium Erosion** There are one or two noticeable ruts forming along the length of the trail, and there are some observations that it significantly interferes with pedestrian and cycling activities. For this category, evidence of trail user impacts resulting from the erosion feature includes one of the following: trail widening, braided trails, unsanctioned trails, soil compaction, and vegetation trampling.	
Low	**Low Erosion** There is a shallow rill forming along the length of the trail, but there are no observations that it significantly interferes with pedestrian and cycling activities. There is no evidence of trail users negatively impacting adjacent vegetation to avoid this erosion feature.	

2.4 Results

2.4.1 Biological Communities and Vegetation Management

Non-sensitive biological communities in the Study Area include developed areas, coast live oak woodland (*Quercus agrifolia*, S4 G5), eucalyptus groves (*Eucalyptus* spp., not ranked), coyote brush scrub (*Baccharis pilularis*, S5 G5), California sagebrush scrub (*Artemisia californica*, S5 G5), chamise chaparral (*Adenostoma fasciculatum*, S5 G5), non-native annual grassland (not ranked), and developed. Sensitive biological communities include California bay woodland (*Umbellularia californica*, S3 G4), arroyo willow thickets (*Salix lasiolepis*, S3 G4), and California buckeye groves (*Aesculus californica*, S3 G3). **Figure 2.2** and **Figure 2.3** shows the location of each biological community for WDL and SJC, respectively. Descriptions for each biological community are provided below, the mapped extent of each biological community within each open space is identified in Table 2.4.

Table 2.4. Biological Communities within the Study Area

Biological Community[1]	Natural Community[3]	WDL (acres)	SJC (acres)[5]	percent of Study Area
Non-Sensitive[4]				
broadleafed upland forest	coast live oak woodland	146.75	48.59	52.1
broadleafed upland forest	eucalyptus groves	1.59	0.05	0.4
coastal scrub	coyote brush scrub	18.82	18.45	9.9
chaparral	California sagebrush scrub	22.84	-	6.1
chaparral	chamise chaparral	52.01	-	13.9
chaparral	mixed shrub	8.97	-	2.4
valley and foothill grassland	non-native annual grassland	8.78	4.93	3.7
developed[2]		0.84	2.07	0.8
Sensitive[4]				
broadleafed upland forest	California bay woodland	22.62	-	6.0
riparian woodland	arroyo willow	7.23	5.87	3.5
riparian woodland	California buckeye groves	1.70	1.68	0.9

Belmont, California

DRAFT

THIS PAGE INTENTIONALLY LEFT BLANK

Coast live oak woodland (*Quercus agrifolia*, S4 G5) are known from the outer and inner Coast Ranges, Transverse Ranges, and southern coast from northern Mendocino County south to San Diego County. This vegetation community is typically located on terraces, canyon bottoms, slopes, and flats underlain by deep, well-drained sandy or loam substrates with high organic content (Sawyer et al. 2009). Within the Study Area, coast live oak woodlands occupy approximately 194 acres, or 51.8 percent. Coast live oak woodlands are generally found in the cooler, north-facing slopes in WDL and throughout SJC. Dominant species in the tree layer include coast live oak, California bay, and California buckeye, with coast live oak comprising greater than 50 percent of the relative cover in this stratum, with less than 30 percent relative cover of California bay. Most stands contain a relatively dense and well-developed tree canopy reducing the density of a shrub layer to scattered individuals. Shrub species observed in the coast live oak woodlands include poison oak (*Toxicodendron diversilobum*), snowberry (*Symphoricarpos albus*), sticky monkey flower (*Diplacus aurantiacus*), coyote brush, toyon (*Heteromeles arbutifolia*), elderberry (*Sambucus nigra* ssp. *caerulea*), and blueblossom (*Ceanothus thyrsiflorus*). The herbaceous layer is dominated by a mix of shade tolerant native herbs and non-native, invasive forbs. Native species includes but is not limited to the following: common yarrow (*Achillea millefolium*), California mugwort (*Artemisia douglasiana*), miner's lettuce (*Claytonia perfoliata*), soaproot (*Chloragalum pomeridianum*), bee plant (*Scrophularia californica*). Non-native herbaceous species include oat grass (*Avena fatua*), ripgut brome (*Bromus diandrus*), scarlet pimpernel (*Lysimachia arvensis*), and sow thistle (*Sonchus asper*).

Eucalyptus groves (*Eucalyptus* spp., not ranked) are known from the Coast Ranges and Central Valley, typically as planted woodlands and sheiterbelts to buffer coastal winds and provide shade. These groves are not described in Holland (1986), but are included in Sawyer et al. (2009), which describes eucalyptus groves as *Eucalyptus globulus* Semi-Natural Woodland Stands. This vegetation alliance is dominated by one of several eucalyptus species, which are not native to North America. Eucalyptus groves are frequently situated in rural and semi-urbanized settings, along streams, and coastal hills and prairies. Eucalyptus groves comprise 0.4 percent of the Study Area and is limited to a small stand within the northeastern corner of Waterdog, at the end of Cliffside Court. A small stand of trees was observed in SJC, along Ralston Ranch Road.

Coyote brush scrub (*Baccharis pilularis*, S5 G5) is described by Sawyer (2009) as known from the outer Coast Ranges and Sierra Nevada Foothills from Del Norte County south to San Diego County. This vegetation community is typically located on river mouths, riparian areas, terraces, stabilized dunes, coastal bluffs, open hillsides, and ridgelines on all aspects underlain by variable substrate of sand to clay (Sawyer et al. 2009). Within the Study Area, this biological community often intergrades with coast live oak woodland and California sagebrush scrub, and share many of the common species found in the understory, like poison oak, California sagebrush, blue blossom, and California blackberry (*Rubus ursinus*).

California sagebrush scrub (*Artemisia californica*, S5 G5) is known from the outer Coast Ranges, western Transverse Range, and Peninsular Ranges from Marin County south to San Diego County. This vegetation community is typically located steep, well-drained slopes underlain by shallow alluvial and colluvial derived soils (Sawyer et al. 2009). Within the Study Area, California sagebrush scrub is only found within Waterdog. This community often intergrades with coast live oak woodland, California bay woodland, and coyote brush scrub. The majority of California sagebrush scrub occurs in the southeastern section of Waterdog. Coast live oak was occasionally observed within this scrub community, but the individual oak trees were still relatively small and is at low cover. Other shrub species observed include coyote brush, poison oak, and sticky monkey flower. Species within the herbaceous layer consist of a mix of native and

nonnative species; native species include purple needle grass and Pacific sanicle, non-native species include compact brome and scarlet pimpernel.

Chamise chaparral (*Adenostoma fasciculatum*, S5 G5) occurs across cismontane California in a variety of topographic settings from coastal bluffs to steep, lower montane slopes (Sawyer et al. 2009). This biological community is found only at Waterdog, on the arid, south-facing slopes. Other shrub species observed within this community include California sagebrush, coyote brush, poison oak, blueblossom, sticky monkey flower, and common manzanita (*Arctostaphylos manzanita*). Occasionally, French broom was also observed (*Genista monspessulana*). Native species observed in the herbaceous layer include purple needle grass (*Stipa pulchra*), manroot (*Marah fabacea*), and soap plant. Non-native species include compact brome (*Bromus madritensis*), scarlet pimpernel, and black mustard (*Brassica nigra*).

Mixed shrub (no ranking) consists of an even mix of California sagebrush, chamise, and coyote brush in the shrub layer. Since these three species are co-dominants (approx. 30 percent relative cover each), this does not fit into any of the vegetation classifications and membership rules described by the Manual of California Vegetation (CNPS 2022b). Other non-dominant shrubs include sticky monkey flower, toyon, fuchsia flowered gooseberry (*Ribes speciosum*), and buck brush (*Ceanothus cuneatus*). Species observed in the herbaceous layer are similar to the other shrub-scrub communities described previously.

Non-native annual grassland (no ranking) is described by Holland (1986) as a dense to sparse cover of non-native annual grasses with flowering culms 0.2- to 1-meter-high and is often associated with numerous species of showy-flowered annual forbs. Most species found in this biological community within the Study Area include non-native grasses and forbs that are characteristic of disturbed areas. This includes oatgrass (*Avenua fatua),* black mustard (*Brassica nigra),* bull thistle (*Cirsium vulgare),* common stork's bill (*Erodium botrys),* Italian ryegrass (*Festuca perennis),* fennel (*Foeniculum vulgare),* barley (*Hordeum murinum),* burr medic (*Medicago polymorpha)*, Harding grass (*Phalaris aquatica),* English plantain (*Plantago lanceolata*), and lesser trefoil (*Trifolium dubium*). Native species observed in this habitat type include purple needlegrass (*Stipa pulchra*), nude buckwheat (*Eriogonum nudum*), California goldfields (*Lasthenia californica)*, pineapple weed (*Matricaria discoidea*), and Torrey's melic grass (*Melica torreyana*). Occasionally, there are small individuals of coast live oak or coyote brush appearing in this community, but this generally appears at less than 1 percent absolute cover – i.e., not in large enough absolute or relative cover to be classified as coast live oak woodland or coyote brush scrub. Generally, no clear dominants for any of the species listed above were observed in this habitat type; as such, there was no vegetation community from the Manual of Californica Vegetation that was suitable to be applied. Non-native annual grassland is found in both open spaces, has no ranking, and is not considered to be a sensitive habitat type.

Developed areas are areas within the park extent that have been cleared of natural vegetation communities and sometimes consist of impermeable surfaces like concrete. Developed areas are fairly limited within the open space areas (approximately 2 percent of the Study Area) and are restricted to the outer edges of the open spaces that are adjacent to residences.

California bay woodland (*Umbellularia californica*, S3 G4) are known from the inner and outer Coast Ranges, Transverse Ranges, and Sierra Nevada Foothills from Del Norte County south to San Diego County. This vegetation community is typically located on terraces, canyon bottoms, north-facing slopes, and rock outcrops underlain by shallow to deep sand to loam substrates (Sawyer et al. 2009). Within the Study Area, this community type is found along streams in canyon bottoms and intergrades with arroyo willow

thickets. Dominant species in the tree layer include California bay and coast live oak with California bay comprising greater than 30 percent of the relative cover in this stratum. In most locations, the tree canopy is extremely dense, therefore reducing the shrub and herbaceous layers within these communities. Scattered individuals of shrubs include poison oak, and fuchsia flowered gooseberry. The herbaceous layer is relatively depauperate and dominated by shade tolerant forbs including California maidenhair (*Adiantum jordanii*), miner's lettuce, California bedstraw (*Galium californicum*), manroot, Pacific sanicle (*Sanicula crassicaulis*), and chickweed (*Stellaria media*). California bay is a noted alternate host for sudden oak death (SOD) caused by the water mold, *Phytophthera ramorum*.

Arroyo willow thickets (*Salix lasiolepis*, S4 G4) are common throughout the state of California and consist of a canopy dominated by arroyo willows. To qualify as a true arroyo willow thicket, there must be 50 percent relative cover in the shrub or tree canopy (Keeler-Wolf et al. 2003) or at least 25 percent absolute cover. Understory plants consist of typical scrub vegetation which varies throughout the community's geographic range. This community is typically found along stream banks and benches, slope seeps, and along drainages (CNPS 2020b). Within the Study Area, arroyo willow thickets are found along canyon bottoms, adjacent to streams. Coast live oak trees are also found within the tree stratum but are typically around 10-15 percent of the relative cover. Poison oak is found growing among the arroyo willows, with stinging nettle (*Urtica dioica*), bee plant, common snowberry, and soap plant occurring in the herbaceous layer.

California buckeye groves (*Aesculus californica*, S3 G3) are known from the southern Cascade Range, Coast Ranges, northern Transverse Range, and Sierra Nevada Foothills from Siskiyou County south to Ventura County. This vegetation community is typically located on shallow, moderate to well-drained soils in canyons and alluvial terraces (Sawyer et al. 2009). Within the Study Area, California buckeye groves can be found along canyon bottoms, adjacent to streams; this commonly intergrades with the California bay and arroyo willow thickets along the riparian corridor. California buckeye groves are limited, at 0.9 percent of the Study Area. Co-dominant species within the tree stratum include California buckeye, California bay, and coast live oak. The understory is fairly depauperate, with coyote brush and stinging nettle being the most observed species.

2.4.2 Special-Status Species

Since both WDL and SJC contain similar habitats (e.g., coyote brush scrub, coast live oak woodland, arroyo willow thickets, and annual grasslands), the assessment of special-status species applies to both parks, unless otherwise noted.

A total of 94 special-status plant species and 59 special-status wildlife species were evaluated for potential to occur within the Study Area. Of these, 11 special-status plant species and 7 special-status wildlife species have moderate/high potential to occur or are present within the Study Area. Species were ruled out if the Study Area was not within the known/expected range for the species, if the Study Area does not contain suitable habitat/microhabitat necessary to support this species, or if the species is generally understood to be extirpated from the region. All plant and wildlife species observed during the March 2022 site visits are included as Attachment A. The full list of the special status-species considered for this project is listed in Attachment B**.** Each species that has moderate/high potential to occur on site, or are present, are discussed below.

Plants

Franciscan onion (*Allium peninsulare* var. *franciscanum*), CRPR 1B.2. **Present**. Franciscan onion is a perennial forb in the lily family (Liliaceae) that blooms from May to June. It typically occurs on dry hillsides underlain by clay substrate, often derived from serpentine, in cismontane woodland and valley and foothill grassland habitat at elevations ranging from 165 to 975 feet (CDFW 2022, CNPS 2022). This species has a serpentine affinity rank of weak indicator (1.8) (Safford et al. 2005). Associated species include California bay, California buckeye, coast live oak, leather oak (*Q. durata*), and purple needlegrass (CDFW 2022). This species was documented within both WDL and SJC open spaces in 2015, located within coast live oak woodland (CDFW 2022). This species was not observed during the March site assessments; however, the surveys did not take place during the blooming period for this species and was not intended to be a rare plant survey.

Bent-flowered fiddleneck (*Amsinckia lunaris*), CRPR 1B.2. **Moderate Potential**. Bent-flowered fiddleneck is an annual forb in the forget-me-not family (Boraginaceae) that blooms from March to June. It typically occurs in open areas within cismontane woodland, valley and foothill grassland, and coastal bluff scrub habitat often underlain by clay substrate at elevations ranging from 10 to 1,625 feet (CDFW 2022, CNPS 2022). Associated species include coast live oak, buck brush, poison oak, common yarrow, goldenback fern (*Pentagramma triangularis*), one-sided bluegrass (*Poa secunda*), woolly sunflower (*Eriophyllum lanatum*), and slender wild oat (*Avena barbata*) (CDFW 2022). Cismontane woodland and valley and foothill grassland habitats are present within the Study Area. The nearest documented CNDDB occurrence is 1.5 southwest of SJC open space, and 1.5 miles northwest of Waterdog, in 2018 (CDFW 2022). This occurrence was in native and non-native grassland on a south-facing slope; similar habitats are found within the Study Area.

Pink star-tulip (*Calochortus comosa*), CRPR 4.2. **Moderate Potential.** Coastal scrub and meadows and seep habitat are present within the Study Area, along with seasonally moist meadows and forested habitats. The nearest occurrences are 5 miles to the northwest, within the Crystal Springs reservoir recreation area.

San Francisco collinsia (*Collinsia multicolor*), CRPR 1B.2. **Present**. San Francisco collinsia is an annual herb that blooms from March to May. It typically occurs in closed-cone coniferous forest and coastal scrub at elevations ranging from 100 to 900 feet (CNPS 2022). Associated species include poison oak, coyote brush, California coffeeberry (*Frangula californica*), snowberry, California blackberry, western leatherwood, oso berry (*Oemleria cerasiformis*), baby blue eyes (*Nemophila menziesii),* and California buttercup (*Ranunculus californicus,* CDFW 2022). Coastal scrub habitat and moist, shady scrub or forest microhabitat is located within the Study Area boundary; there is one CNDDB occurrence in SJC and two CNDDB occurrences in WDL Open Space.

Western leatherwood (*Dirca occidentalis*), CRPR 1B.2. **Present**. Western leatherwood is a deciduous shrub in the mezereum family (Thymelaeaceae) that blooms from January to April, but is typically identifiable via vegetative structures into late summer and/or early fall. It typically occurs on brushy, mesic slopes in partial shade in broadleaf upland forest, chaparral, closed-cone coniferous forest, cismontane woodland, North Coast coniferous forest, riparian forest, and riparian woodland habitat at elevations range from 165 to 1,285 feet (CDFW 2022, CNPS 2022, Baldwin et al. 2012). Associated species include coast live oak, California bay, poison oak, toyon, California buckeye, coyote brush, yerba buena (*Clinopodium douglasii*), sword fern (*Polystichum munitum*), Pacific sanicle, and Douglas iris (*Iris douglasiana*) (CDFW 2022).

Western leatherwood has several CNDDB occurrences within WDL and was observed during trail and habitat assessment surveys in March.

California bottle-brush grass (*Elymus californicus*), CRPR 4.3. **Moderate Potential**. California bottle-brush grass is a perennial graminoid in the grass family (Poaceae) that blooms from May to November. It typically occurs along stream banks or other mesic sites within broadleaf upland forest, cismontane woodland, North Coast coniferous forest, and riparian woodland habitat at elevations ranging from 45 to 1,530 feet (CNPS 2022). Associated species include Douglas fir (*Pseudotsuga menziesii*), coast redwood (*Sequoia sempervirens*), California bay, red alder (*Alnus rubra*), California hazelnut (*Corylus cornuta* var. *californica*), California coffeeberry, California blackberry, sword fern, hedge nettle (*Stachys ajugoides*), bracken fern (*Pteridium aquilinum*) and woodland brome (*Bromus laevipes*) (CNPS 2022, California Consortium of Herbaria 2022). California bottle-brush grass has a moderate potential to occur in the Study Area due the presence of broadleafed upland forest, cismontane woodland, and riparian forest habitats are located within the Study Area, and microhabitats of sandy humus soils are also present to support this species. The nearest documented CNPS occurrence is 2 miles to the northeast.

San Mateo woolly sunflower (*Eriophyllum latilobum*), FE, SE, CRPR 1B.1. **High Potential.** San Mateo woolly sunflower is a perennial herb that blooms from May to June. It typically occurs in cismontane woodland, coastal scrub, and lower montane coniferous forest habitats at elevations ranging from 150 to 1085 feet (CNPS 2022). Associated species include coast live oak, California buckeye, California bay, foothill needle grass (*Stipa lepida*), California sagebrush, and white globe lily (*Calochortus albus*) (CDFW 2022). Suitable habitat of cismontane woodland and coastal scrub habitats are located within the Study Area, microhabitats of roadcuts are present, and most of the associated species were also observed throughout the Study Area. The nearest CNDDB occurrence is 1.5 miles to the northwest, along a road.

Harlequin lotus (*Hosackia gracilis*), CRPR 4.2. **Moderate Potential.** Harlequin lotus is a perennial forb in the pea family (Fabaceae) that blooms from March to July. It typically occurs in wetlands or ditches in broadleaf upland forest, coastal scrub, closed-cone coniferous forest, cismontane woodland, coastal prairie, meadow and seep, marsh and swamp, North Coast coniferous forest, and valley and foothill grassland habitat at elevations ranging from 0 to 2,275 feet (CNPS 2022). This species has a wetland indicator status of facultative wetland (FACW). Associated species include coyote brush, little quaking grass (*Briza minor*), California oat grass (*Danthonia californica*), blue-eyed grass (*Sisyrinchium bellum*), subterranean clover (*Trifolium subterraneanum*) (CCH2 2022). Suitable habitat of broadleafed upland forest, cismontane woodland, coastal scrub, marshes and swamps, and meadows and seeps and microhabitats of wetlands and roadsides are present. The nearest CNDDB occurrence is approximately 2 miles west of the Study Area.

Bristly leptosiphon (*Leptosiphon acicularis*), CRPR 4.2. **Moderate Potential.** Bristly leptosiphon is an annual forb in the phlox family (Polemoniaceae) that blooms from April to July. It typically occurs in chaparral, cismontane woodland, coastal prairie, and valley and foothill grassland habitats at elevations ranging from 175 to 4,875 feet (CNPS 2022). Bristly leptosiphon has a moderate potential to occur within the Study Area due to the presence of associated species and vegetation types; however, this species typically occurs in natural open or herbaceous serpentine and/or volcanic areas. The nearest CNPS occurrence is 2.5 miles to the west.

Arcuate bush-mallow (*Malacothamnus arcuatus*), CRPR 1B.2. **Present.** Arcuate bush-mallow is a shrub that blooms from April to September. It typically occurs in chaparral and cismontane woodland habitats

at elevations ranging from 50 to 1165 feet (CNPS 2022). Associated species include coast live oak, bigberry manzanita (*Arctostaphylos glauca*), chamise, western leather wood, California sagebrush, coyote brush, and buck brush (CDFW 2022). Chaparral and cismontane woodland habitat and gravelly alluvium microhabitats are present within the Study Area, in addition to a documented CNDDB occurrence within WDL as of 2013. This species was not observed during the March 2022 trail assessment and habitat reconnaissance surveys, which was conducted before the bloom period.

Woodland woolythreads (*Monolopia gracilens*), CRPR 1B.2. **Present.** Woodland woolythreads is an annual herb that blooms from March to July. It typically occurs in broadleafed upland forest, chaparral, cismontane woodland, north coast coniferous forest, and valley and foothill grassland habitats at elevations ranging from 330 to 3935 feet (CNPS 2022). Associated species include yerba santa (*Eriodictyon* spp.), chamise, buck brush, poison oak, bigberry manzanita, and sticky monkey flower (CDFW 2022). Suitable habitat of broadleafed upland forest, chaparral, cismontane woodland, and valley and foothill grassland and microhabitat of grassy sites in openings is present to support this species. There is a CNDDB occurrence within/adjacent to Waterdog; this record was documented in the 70s, and location is approximate, not exact.

Choris's popcornflower (*Plagiobothrys chorisianus* var. *chorisianus*), CRPR 1B.2. **Moderate Potential.** Choris's popcornflower is an annual herb that blooms from March to June. It typically occurs in chaparral, coastal prairie, coastal scrub at elevations ranging from 10 to 525 feet (CNPS 2022). Associated species include common yarrow, coyote brush, common toad rush (*Juncus bufonius*), brass buttons (*Cotula coronopifolia*), fringed willowherb (*Epilobium ciliatum*), California blackberry and Buck's horn plaintain (*Plantago coronopus*) (CDFW 2022). Chaparral and coastal scrub habitats are located within the Study Area, and microhabitats of mesic sites (and low-lying depressions) are present to support this species. The nearest CNDDB occurrence is approximately 2 miles to the southwest.

Chaparral ragwort (*Senecio aphanactis*), CRPR 2B.2. **Present.** Chaparral ragwort is an annual herb that blooms from January to April. It typically occurs in chaparral, cismontane woodland, coastal scrub at elevations ranging from 50 to 2625 feet (CNPS 2022). Associated species include California buckwheat (*Eriogonum fasciculatum*), nude buckwheat, stork's bill, redstem filaree, black sage (*Salvia mellifera*), California sagebrush, and soap root. Chaparral, cismontane woodland, and coastal scrub habitats are present within the Study Area, and there is a CNDDB occurrence within or near Waterdog.

Wildlife

Moderate or higher potential to occur

Western (Pacific) pond turtle (*Actinemys marmorata*), CDFW Species of Special Concern. The western pond turtle is the only native freshwater turtle in California. This turtle is uncommon to common in suitable aquatic habitat throughout California, west of the Sierra-Cascade crest and Transverse Ranges. Western pond turtles inhabit perennial aquatic habitats, such as lakes, ponds, rivers, streams, and canals that provide submerged cover and suitable basking structures, such as rocks and logs (Zeiner et. al. 1990). Western pond turtles prefer to nest on unshaded upland slopes close to their aquatic habitat, and hatchlings require shallow water with relatively dense emergent and submergent vegetation for foraging for aquatic invertebrates (Jennings and Hayes 1994).

A small number of turtles were briefly observed swimming in WDL, although it could not be determined whether the turtles were invasive red-eared sliders (*Trachemys scripta*) or pond turtles. Turtle habitat in general within the Study Area is limited to WDL, as no other perennial water bodies of this size exist. Emergent vegetation is present on the side of the lake most distant from the existing dam, and downed timber and rocky shorelines could provide suitable basking sites. Breeding habitat at this location would mostly be limited to the slope against the existing levee, which appears highly trafficked by recreational users. Given the presence of suitable habitat and the observation of turtles in WDL, it is highly likely that native turtles such as western pond turtle could be present in this aquatic habitat and occasionally in adjacent uplands.

Olive-sided flycatcher (*Contopus cooperi*), CDFW Species of Special Concern. The olive-sided flycatcher is a summer resident in California, wintering in Latin America. It breeds in a variety of forested habitats, typically coniferous forests at higher elevations, but also in mixed forest and woodlands at lower elevations. Breeding habitat is often associated with forest openings and edges, both natural (e.g., meadows, canyons) and man-made (e.g., logged areas) (Altman and Sallabanks 2012). Nests are usually in conifers, and placed at variable height on the outer portions of branches. This species forages for insects, usually from prominent tree snags.

Although this species was not observed during site visits, mixed low-elevation forests are common within the Study Area and could support nesting by this species. This species may be more commonly observed foraging within the Study Area.

White tailed kite (*Elanus leucurus*), CDFW Fully Protected Species. The white-tailed kite is resident in open to semi-open habitats throughout the lower elevations of California, including grasslands, savannahs, woodlands, agricultural areas and wetlands. Vegetative structure and prey availability seem to be more important habitat elements than associations with specific plants or vegetative communities (Dunk 1995). Nests are constructed mostly of twigs and placed in trees, often at habitat edges. Nest trees are highly variable in size, structure, and immediate surroundings, ranging from shrubs to trees greater than 150 feet tall (Dunk 1995). This species preys upon a variety of small mammals, as well as other vertebrates and invertebrates.

While this species is usually observed in closer proximity to San Francisco Bay, higher elevation areas characterized by small trees interspersed with grasses and low shrubs could provide nesting or foraging habitat for this species within the Study Area.

San Francisco (saltmarsh) common yellowthroat (*Geothlypis trichas sinuosa*), CDFW Species of Special Concern. This subspecies of the common yellowthroat is found in freshwater marshes, coastal swales, riparian thickets, brackish marshes, and saltwater marshes. Their breeding range extends from Tomales Bay in the north, Carquinez Strait to the east, and Santa Cruz County to the south. This species requires thick, continuous cover such as tall grasses, tule patches, or riparian vegetation down to the water surface for foraging and prefers willows for nesting (Shuford and Gardali 2008).

Although this species is more typically documented nesting in salt marshes around the San Francisco Bay Area, more isolated patches of riparian vegetation within the Study Area could potentially support nesting by this species. This type of vegetation exists around WDL and along stream drainages adjacent to trails.

Hoary bat (*Lasiurus cinereus*), WBWG Medium. Hoary bats are highly associated with forested habitats in the western United States, particularly in the Pacific Northwest. They are a solitary species and roost primarily in foliage of both coniferous and deciduous trees, near the ends of branches, usually at the edge of a clearing. Roosts are typically 10 to 30 feet above the ground. This species tolerates a wide range of temperatures and has been captured at air temperatures between 0 and 22 degrees Celsius. They usually emerge late in the evening to forage, typically from just over one hour after sunset to after midnight.

Many of the CNDDB occurrences in the immediate vicinity that document this species are older "specimen samples" from the early 1900's. However, this species is known to occur in forested habitats within the San Francisco Bay Area and immediate vicinity. Forested habitats within the Study Area, particularly in the vicinity of riparian areas that could provide sources of forage, should thus be considered to have moderate potential to support Hoary bat and other non-status bats with baseline protections.

San Francisco dusky-footed woodrat (*Neotoma fuscipes annectens*), CDFW Species of Special Concern. This subspecies of the dusky-footed woodrat occurs in the Coast Ranges between San Francisco Bay and the Salinas River (Matocq 2004). Occupied habitats are variable and include forest, woodland, riparian areas, and chaparral. Woodrats feed on woody plants, but will also consume fungi, grasses, flowers, and acorns. Foraging occurs on the ground and in bushes and trees. This species constructs robust stick houses/nests in areas with moderate cover and a well-developed understory containing woody debris. Breeding takes place from December to September. Individuals are active year-round and generally nocturnal.

Woodrat houses were observed widely throughout the Study Area, both along riparian strips and in more upland thickets of various types of shrubs. Densest concentrations of houses, however, were observed along creek drainages. While no individual woodrats were observed, this species should be assumed to have potential to nest in any portion of the Study Area with a relatively dense understory.

American badger (*Taxidea taxus*), CDFW Species of Special Concern. The American badger is a large, semi-fossorial member of the Mustelidae (i.e. weasel family). It is found uncommonly within the region in drier open stages of most scrub, forest, and herbaceous habitats where friable soils and prey populations are present. Badgers are typically solitary and nocturnal, digging burrows to provide refuge during daylight hours. Burrow entrances are usually elliptical (rather than round), and each burrow generally has only one entrance. Young are born in the spring and independent by the end of summer. Badgers are carnivores, preying on a variety of fossorial mammals (especially ground squirrels) and occasionally other vertebrates and their eggs. Home ranges for this species tend to be large, depending on the habitat available; population density averages one badger per square mile in prime open country (Long 1973).

This species is likely to avoid highly trafficked areas where trails have been relatively compacted, or densely forested or vegetated habitats that dominate the Study Area. However, friable soils and more open habitats exist in higher elevation locations within the Study Area that could support this species. It thus has moderate potential to occur.

Mountain Lion (*Puma concolor*), CDFW Candidate Species**.** Mountain lions are the second largest felid in North America and have the largest geographic range of any carnivore in the western hemisphere that stretches from southern Chile to the Canadian Yukon (CDFW online, accessed 10/19/2023). This large distribution speaks to the extreme adaptability of the species with respect to its ability to exploit a great variety of different habitats. This adaptability is largely explained by the species' ability to thrive across a

huge range of environmental conditions. Mountain lions are mobile predators of the landscapes that they inhabit, with home ranges within the Santa Cruz mountains estimated to be between 40 and 150 square miles. Males tend to defend smaller territories against other males and females tend to have larger territories that may overlap with other lion's territories. Deer and smaller mammals make up the majority of mountain lion diets and their hunting activities are mostly nocturnal.

The Study Area represents a pocket of marginally suitable habitat, largely surrounded by urban development. Highway 280 represents a major barrier to dispersal from more suitable habitat in the Santa Cruz mountains, and areas to the west are very densely populated. While some mountain lions may occasionally pass through the Study Area, it is likely that most mountain lions would not traverse into this area due to offsite barriers and onsite recreational activities that are currently present. The Study Area may be temporarily attractive to an individual mountain lion with a higher than typical tolerance for anthropogenic disturbance. However, it is unlikely that the site would remain occupied by a mountain lion for extended periods due to its limited size and correspondingly limited prey availability. Because the species is so adaptable, if disturbed they would simply move on to another, more suitable part of their range.

Unlikely to occur

California red-legged frog (*Rana draytonii*). Federal Threatened, CDFW Species of Special Concern. The California red-legged frog (CRLF) is the only native "pond frog" found throughout much of California. Suitable aquatic breeding habitat is characterized by deep and still or slow-moving water associated with emergent marsh and/or riparian vegetation, typically with at least 20 weeks of continuous inundation (USFWS 2010). Suitable features include ponds (perennial and non-), streams/creeks, seasonal wetlands, springs, seeps, man-made features (e.g. stock ponds, roadside ditches), marshes, dune ponds, and lagoons. Dependent upon local conditions, CRLF may complete its entire life cycle in a particular habitat patch (e.g., a perennial pond suitable for all life stages), or utilize multiple habitat types. In aquatic features that dry down seasonally, CRLFs often undergo aestivation (a period of inactivity) during the dry months, retreating to small mammal burrows or other substrates that provide suitable refugia (Thomson et al. 2016). Adults and sub-adults (newly metamorphosed individuals) may disperse from breeding habitats to nearby riparian and/or aestivation areas in the summer. Conversely, during the rainy season CRLFs may migrate from aestivation sites to waters suitable for breeding. During such dispersals, frogs can travel over one mile over a variety of topographic and habitat types (Bulger et al. 2003). Upland dispersal habitats are variable and typically include riparian corridors, grasslands, and oak savannas.

CRLF has been documented to occur in the vicinity of the Study Area, mainly within Crystal Springs reservoir and wetlands immediate adjacent (CDFW 2022). However, no occurrences have been documented within the Study Area or in locations immediately adjacent. Interstate 280 also constitutes a near complete dispersal barrier for this species, except in locations where hydrologic connectivity allows passage of this species from known occupied habitats and source populations (e.g., San Mateo Creek). The Study Area does not contain any potential corridors that would allow the passage of this species from known occupied habitats to habitats within the Study Area. Potentially suitable breeding habitats for this species within the Study Area are also extremely limited, given that most stream features are intermittent or ephemeral and do not possess appropriate vegetation for the attachment of egg sacks. WDL has potentially suitable habitat for this species given that it is a perennial water body, but to WRA's knowledge the species has not been identified within this water body and dispersal to this isolated location is unlikely.

Considering barriers to dispersal and the relative lack of suitable habitat, CRLF is unlikely to occur within the Study Area.

2.4.3 Habitat Quality

Except for developed portions of the site, eucalyptus groves, and the non-native annual grassland, the plant species observed within the Study Area are mostly native. This is also demonstrated by the biological communities listed in the previous section; over 90 percent of the Study Area consists of native biological communities. Invasive species were observed but were generally limited to patches of less than 50 square feet and represent a small portion of the overall Study Area. Unsurprisingly, the primary cause of vegetation impacts is from unauthorized trails and the inadvertent expanded width of trails (resulting from braided trails).

As such, the overall habitat quality of the Study Area is high quality to moderate quality, with the areas adjacent to trails and residential development generally being moderate quality. Areas adjacent to development/residential tend to be disturbed, via fire breaks that are then recolonized by non-native species annual species (non-native annual grassland). Some areas adjacent to homes were observed to have large patches of ice plant, and vegetation clearing where the tops of coast live oak and other shrubs were removed. Areas with limited anthropogenic influence (set back from residential uses and major trails), have high quality habitat.

DRAFT

2.4.4 Trail Environmental Conditions

The number of instances where erosion was noticed on both mapped and unmapped trails is shown in Table 2.5. The instances of erosion are categorized by the qualitative level, low, medium, high. In addition, approximately 50 stream crossings were identified along existing trails, and these crossings varied in terms of crossing mechanism. This ranges from a free-span wooden footbridge to a plank placed across the stream, to stepping stones.

Table 2.5. Trail Erosion Instances

Location	Low Erosion	Medium Erosion	High Erosion	Total Erosion Instances
WDL				
Mapped trails	127 (56%)	77 (34%)	25 (11%)	229
Unmapped trails	59 (83%)	7 (10%)	6 (8%)	71
SJC				
Mapped trails	5 (38%)	7 (54%)	1 (8%)	13
Unmapped trails	11 (85%)	2 (15%)	0 (0%)	13

2.4.5 Wildfire Hazard Analysis

Wildfire Hazards

However, according to the Safety Element of the 2035 City of Belmont General Plan WDL lies within the Very High Fire Hazard Zone, and SJC lies with the High Fire Hazard Zone (City of Belmont, 2017). These hazard ratings are based on multiple factors including:

- Vegetation type and density
- Topography (fires that start on slopes tend to travel uphill)
- Weather (including wind speed and direction, and relative humidity)
- Potential Fire Behavior (e.g., flame lengths, ability to generate embers)
- Potential to damage human life and structures

The two open space areas include steeply sloped, vegetated areas adjacent to residential areas and thus have been assigned relatively high wildfire hazard ratings. Figures 2.2 and 2.3 depict vegetation types across the city's two open space areas. The majority of vegetation in WDL and SJC is coastal live oak.

According to the *Wildfire Hazard Reduction and Resource Management Plan* prepared by East Bay Regional Park District (2010), the following fuel reduction methods are typically used to reduce wildfire fuels on Bay Area open space lands:

- Hand Labor;
- Mechanical Treatment;
- Chemical Treatment;
- Prescribed Burning and;
- Grazing.

Due to the configuration of, access to, and slopes within the WDL open space area, the only practical treatments for wildfire fuel reduction are hand labor and grazing. In contrast, SJC has better access for vehicles and large types of equipment, and therefore could be appropriate for using mechanical treatments to reduce wildfire fuels. Due to the proximity of Belmont's residential areas to adjacent open space areas, neither chemical treatment nor prescribed burning are recommended as fuel reduction treatments.

Fuel Hazards by Vegetation Types

Both ignition potential and fuel hazards are rated depending on the vegetation type as shown in Table 2.6.

Table 2.6. Fire Hazard Rating for Fuel Types Vegetation Type

Vegetation Type	Hazard Rating	Ignition Potential[1]
Grasslands and Herbaceous Vegetation		
Coastal Prairie	Moderate	2
Serpentine Bunchgrass Grasslands	Low	2
California Annual Grasslands	Moderate	1
Ruderal Vegetation	Moderate	3
Scrub Vegetation		
Maritime Chaparral (Manzanita-Chinquapin)	Extreme	6
North Coastal Scrub-Xeric	Extreme	4
North Coastal Scrub-Mesic	High	8
Coyote Brush Scrub	High	4
Non-native Scrub	High	6
Woodlands and Forest Plantations		
Mature Eucalyptus Forest	High	1

Vegetation Type	Hazard Rating	Ignition Potential[1]
Young Eucalyptus Forest	High	2
Mature Monterey Pine Forest	Moderate to High	2
Young Monterey Pine Forest	High	2
Oak-Bay Woodland	Low	6-8
Redwood Forest	Low	8
Riparian Woodland	Low	8

Source: Wildfire Hazard Reduction and Resource Management Plan, EBRPD, 2010
1-ignition potential was ranked 1 to 10, where the highest potential is represented by a "1" and the lowest potential is ranked by a "10."

Wildfires tend to start in vegetation that ignites easily such as annual grasslands, or coastal scrub. Once ignited, these vegetation types have a significant influence on a wildfire's rate of spread. Woodland areas tend to ignite much more slowly than grassland and shrub vegetation types, but once ignited can contribute to greater heat per unit area, and higher flame lengths. Under extreme weather conditions all vegetation types have the ability to contribute to a wildfire's rate of spread, heat per unit area, and flame length.

The majority (approximately 147 acres) of vegetation in the WDL open space area is coastal live oak (Figure 2.3), which has a low hazard rating and ignition potential, since it is associated with oak-Bay woodland. This situation also applies to the SJC open space area, with the majority of vegetation there mapped as coastal live oak. However, the area west of Hastings Drive is classified as chamise which is associated with the North Coastal Scrub-Xeric vegetation type, and has an extreme fuel hazard rating. Based on aerial photograph review, there is a buffer of grass or no vegetation between much of the housing west of Hastings Drive and the chamise vegetation on the open space. The city engages in wildfire fuel reduction activities in the WDL open space area, as depicted in Figures 2.4 and 2.5. There were three areas that were treated in 2021, and another group of areas treated in 2019 and 2021, also shown in Figures 2.4 and 2.5.

2.5 Conclusions and Considerations

2.5.1 Habitat and Species

Although the habitat within the open space areas appears to be in good health, there are still management considerations that can ensure this valuable community resource continues to thrive, for both residents and wildlife alike. The following conclusions and considerations are a result of observations from the reconnaissance site visits and community feedback.

Sudden Oak Death

Sudden oak death (SOD, or *Phythopthora ramorum*) is a pathogen that is a common management concern for Belmont's Open Spaces. Although SOD has been detected in San Mateo County (and much of the west coast), there are no current or active cases reported by statewide, citizen science SOD mapping efforts through Calinvasives or University of California Berkeley's SODmap (Calflora 2022 and UC Berkeley 2022). There are no reported cases in SJC open space, and there are three confirmed positive cases documented in Waterdog. These three cases are located along Lake Road Trail on a bay tree in 2014, one along Berry trail on a coast live oak tree in 2008, and another off-trail (southwest of Berry Trail) on a bay tree in 2013. However, these cases are inactive according to follow-up visits to the same infected trees as part of the Calinvasives mapping program in 2016, 2016, and 2014, respectively (Calflora 2022).

Although there are no known active cases according to these databases, it is still possible that SOD is present and dormant within Belmont's Open Spaces. Therefore, recommendations for SOD management include adding educational signage and decontamination equipment at all trailheads for these open spaces. Educational signage may include but is not limited to the following: photos that show what symptoms of SOD look like, how to report cases to the citizen science programs mentioned previously (if observed), how to reduce the risk of spread by avoiding trails 24-48 hours after a significant precipitation event and encouraging trail users to remove tracked mud found on the bottom of shoes and bike tires. Decontamination stations located at access points may include boot brushes and 70 percent isopropyl alcohol spray bottles that are mounted to the educational signage.

Invasive Species

Several observations of invasive species were detected within WDL and SJC.[3] This includes ice plant (*Carpobrotus edulis*, Cal-IPC: High), pampas grass (*Cortaderia selloana*, Cal-IPC: High), French broom (*Genista monspessulana*, Cal-IPC: High), and English ivy (*Hedera helix*, Cal-IPC: High). Trail working groups like Friends of the WDL and WDL Trailkeepers indicated current efforts to control these species, and these efforts were observed during the site assessment. For example, only the vegetative (non-flowering)

[3] *Invasive species are typically defined as California Invasive Plant Council (Cal-IPC) species rated Moderate or High. Species ranked as "high" is defined as "… species [that] have severe ecological impacts on physical processes, plant and animal communities, and vegetation structure. Their reproductive biology and other attributes are conducive to moderate to high rates of dispersal and establishment. Most are widely distributed ecologically." Moderate is defined as "… species [that] have substantial and apparent—but generally not severe—ecological impacts on physical processes, plant and animal communities, and vegetation structure. Their reproductive biology and other attributes are conducive to moderate to high rates of dispersal, though establishment is generally dependent upon ecological disturbance. Ecological amplitude and distribution may range from limited to widespread."*

portions of pampas grass were observed, as someone had removed the flowering heads to prevent the species from re-seeding.

Recommendations for managing invasive species found within the Study Area include early detection and response. Early detection and response are best management practices for invasive species control that focuses monitoring for new or spreading occurrences of undesirable species, then applies the most effective management action for the control of the species. For example, if an invasive species is primarily spread via seed, then attempts would be made to remove the flowering portion of the plant before the seeds have a chance to develop, mature, and spread. Another example would be species that spread via rhizome/stolons; the entire plant would be manually removed to prevent further spread.

Public community meetings for the open space planning efforts indicate that volunteer groups already have this type of program in place; therefore, continued collaboration between the City and community groups would be helpful for invasive species control efforts. Another advantage of the SOD decontamination stations (brushes and rubbing alcohol) also reduces the inadvertent introduction of weedy species by trail users.

Additional Surveys

Due to the large Study Area and number of special-status species with potential to occur, protocol-level surveys for special-status species with high or moderate potential to occur are recommended for any ground or vegetation disturbing activities. Having clearly defined project footprints, or smaller study areas, for protocol-level surveys will allow the City to use resource management budget wisely and comply with applicable federal, state, and local policies. This is because the number of species with potential to occur may be tailored based on the habitat present within the project footprint and will generally result in reduced species that need protocol-level surveys to determine presence/absence.

Generally, appropriately timed work can avoid or minimize impacts to special-status species and sensitive natural resources. For example, vegetation management activities should take place during September through January to avoid impacts to nesting birds. Nesting bird season is generally accepted as February 1 through August 31 for the City of Belmont. Another example includes conducting ground disturbance activities during the dry season (June through October) when possible, particularly if the project footprint will be located near waterways.

Habitat Enhancement and Restoration Opportunities

While most of the habitats found within the open spaces were in good condition, there are still opportunities for habitat enhancement and restoration, particularly within the non-native annual grassland and creek crossing spots within riparian corridors. As stated in the habitat description, the non-native annual grassland was observed to have mostly non-native species, with some native grasses and forbs. The presence of small patches of purple needlegrass (perennial bunchgrass) found in the understory of shrubs and within disturbed areas is promising, and this could be expanded by additional seeding, or planting more plugs of other perennial native bunchgrasses to compete with the non-native annuals. This should be followed up by monitoring these re-seeded or revegetated areas, with some supplemental water to help perennial bunchgrasses get established.

Generally, stream crossings should be minimized to the greatest extent feasible. Paths may be re-routed or consolidated to reduce the number of stream crossings. Retired crossings should be decommissioned

by placing signs indicating trail closure and habitat restoration, with physical barriers placed, like logs, while vegetation is filling back in. Vegetation will generally grow back in abandoned trails, but intervention may be needed if soil compaction or vegetation impacts are extensive. Revegetation methods like willow staking are common in riparian restoration efforts and would be appropriate for most creek crossing decommissioning locations within the open space. Where crossings are inevitable, a hydrologically appropriate crossing (that allows passage during high water flow events) should be planned and placed. This helps the waterway take its natural course with minimal anthropogenic influence, like increased erosion due to mechanical erosion from trail users. Collaborations between the City and with citizen science groups or volunteer groups could help ensure the success of these efforts.

2.5.2 Wildfire Hazard Reduction

Based on the wildfire hazard analysis, the following considerations are offered:

- If the city desires a more aggressive fuel treatment plan, develop and implement an annual fuel treatment plan.
- Maintain the currently treated areas as depicted in Figures 2.4 and 2.5.
- Evaluate wildfire fuel conditions in SJC for possible treatment. There are multiple areas with coyote brush scrub that could be treated to reduce wildfire hazards.
- Continue to maintain the low vegetation area west of Hastings Drive, and consider expanding this area downhill, subject to avoiding nesting bird season, and any other types of environmental requirements.

3.0 Recreation Use Assessment and Benchmarking

3.1 Purpose

This section describes current and potential open space recreation trends and summarizes best practices for trail usage, layout and maintenance within the City of Belmont. The Recreation Use Assessment and Benchmarking section draws from the findings of the Environmental Assessment presented in Chapter 2. The recommendations in this assessment were used to inform the Management Plan. This section includes an overview of regional surveys of open space related to outdoor recreation activity participation and recreation trends and their implications for the OSMP. Considerations for assessing future recreation use and trail conditions are provided, and an overview of best practices for trail construction, maintenance, and management is included.

Belmont Parks and Recreation Department staff indicated that common activities on open space areas are walking/running, biking, and dog walking. These types of activities are generally referred to as passive, which makes the recreation use occurring on Belmont's open space lands consistent with existing policies.

3.2 Current Outdoor Recreational Participation

Current and potential future recreation uses of the Belmont open space areas were assessed by examining national, statewide, regional surveys of outdoor recreation participation, as well as results from the community survey for the PROS Plan. Nationally, about 50 percent of people participate in outdoor recreation activities (Outdoor Foundation, 2022). According to the 2012 *Outdoor Recreation Trends and Futures* report, nationally, both how long and how often people spend time outdoors have increased over the previous 15 years (Cordell, 2012). However, the 2012 *Survey on Public Opinions and Attitudes on Outdoor Recreation in California*, suggested that the amount of time California respondents spend in outdoor recreation activities had remained roughly the same over the previous five years (California State Parks, 2014). This same study found that common activities for respondents were walking, hiking, and picnicking.

California State Parks (2014) also found that over 38 percent of San Francisco Bay Area respondents[4] visited parks at least once a week and about 27 percent used trails at least once a week. San Francisco Bay Area respondents also reported that their time spent at parks was increasing. Additionally, the most common activities reported by San Francisco Bay Area respondents were walking, hiking, and picnicking.

A study of visitors to San Mateo County parks found that respondents most often reported walking/hiking and running while much smaller proportions of visitors reported biking (Roberts et al., 2016). Respondents also indicated that they visited the parks to improve their physical fitness, be with family/friends, connect with nature, improve mental well-being, dog walking, and experience scenic views.

According to the 2021 *Belmont Parks, Outdoor Recreation Programs and Open Space Community Survey,* respondents typically visited open space areas multiple times per week, typically for a duration of 1-2 hours or more, and typically for the purposes of exercising, communing with nature, and experiencing peace and quiet ("Belmont Parks, Outdoor Recreation Programs and Open Space Community Survey," 2021). Survey respondents reported living not only in the City of Belmont, but also in nearby

[4] *Respondents comprised of residents from Alameda, Contra Costa, Marin, Napa, Santa Clara, San Francisco, San Mateo, Solano, and Sonoma counties.*

neighborhoods in San Mateo, San Carlos, and Redwood City. Belmont Parks and Recreation Department staff indicated that common activities on open space areas are walking/running, biking, and dog walking. These types of activities are generally referred to as passive, which makes the recreation use occurring on Belmont's open space lands consistent with existing policy on all parcels, including the John Brooks parcel.

Both anecdotal and documented evidence has shown increased use at park and recreation resources throughout the San Francisco Bay Area since the onset of the COVID-19 pandemic. For example, WRA conducted a study in San Mateo County Parks that showed a 40 percent increase in use of Pillar Point Bluff and Quarry Parks from 2019 to 2020. Indeed, in 2020, more Americans reported participating in outdoor recreation than ever before (Outdoor Foundation, 2022). However, the Outdoor Foundation found that as many as 25 percent of participants reported that they were unlikely to continue their activities once pandemic impacts subsided. In fact, National Park Service visitation in 2021 was lower compared to the 3 years preceding the onset of the COVID-19 pandemic (National Park Service, 2022). Therefore, it is possible that Belmont Open Space Areas experienced a surge in visitor use during 2020, but that use levels have decreased to pre-pandemic levels in 2022.

3.3 Recreation Trends and Implications

3.3.1 Cycling and e-bikes

In general, cycling participation has been rising in recent years, especially in large cities like San Francisco (San Francisco Municipal Transportation Agency, 2022). One likely contributor to cycling participation is the growing use of electric pedal assist bicycles (e-bikes) which have had sales increase nearly 50% per year since 2013 (PeopleForBikes, 2017). In addition, e-bike use on trails within parks and protected areas appears to be increasing (PeopleForBikes, 2017). Though mountain biking participation is also increasing nationally (Newcomb, 2020), whether e-bikes are driving this increase is actively being researched (Federal Highway Administration, 2022). According to the 2020 study *E-bikes on Public Lands*, the majority of e-bike owners who ride on natural surface trails (henceforth: trails) reported owning multiple standard bikes in addition to an e-bike (Perry and Casey, 2020). This finding suggests that existing cyclists are the primary users of e-bikes on trails rather than those who are new to cycling. The implication for this that the number of cyclists on trails may not be increasing dramatically, but rather existing cyclists on trails are switching to e-bikes instead of standard bikes.

Some concerns over the use of e-bikes on trails have been focused on the potential for increased environmental impacts due to e-bikes being heavier, having wider tires, or being able to be ridden further than traditional bikes (Chaney et al., 2019). However, it has been found that e-bikes are essentially equivalent to traditional mountain bikes in terms of trail impact effects (The International Mountain Bicycling Association, 2015). Alternatively, riders of standard mountain bikes have historically expressed concerns about visitor conflict and e-bike riders' behavior potentially resulting in getting all bikes banned from trails, but tensions seem to have eased in recent years as general bike restrictions have not come to fruition (Felton, 2015).

Under California Vehicle Code (§ 312.5), e-bikes are considered bicycles, not motor vehicles, and are divided into three classes, where Class 1 e-bikes require pedaling to gain electric assist and have a maximum speed of 20mph. Class 2 bikes with throttle-controlled motor and Class 3 allow higher speeds, up to 20 mph and 28mph, respectively. References to e-bikes in this discussion refer solely to Class 1 as agencies that typically allow e-bikes on trails limit the policy to Class 1. Still, agency policies regulating Class 1 e-bikes on trails vary widely. The National Park Service has adopted the policy that e-bikes are

allowed wherever bicycles are allowed (General Provisions; Electric Bicycles, 2020). California State Parks only allows e-bikes on trails in certain park types, i.e. e-bikes are allowed on trails in State Recreation Areas, while e-bikes are not allowed on trails in State Parks (California State Parks, 2021).[5] East Bay Regional Parks District allows e-bikes only on select paved paths (East Bay Regional Parks District, 2019). More recently, the Midpeninsula Regional Open Space District (District) -which does not allow e-bikes on trails - commissioned a set of studies to investigate visitor perceptions and ecological impacts of e-bikes. A report on these studies to the Board of Directors submitted in March 2022 included a recommendation that e-bikes be allowed wherever bikes were allowed (Midpeninsula Regional Open Space District, 2022). However, the Board decided on June 29, 2022 against the recommendations and to uphold the ban of e-bikes on trails – with the exception of 6.5 miles of paved roads and paths.

3.3.2 Electric transportation devices

The use of other electric transportation devices, such as electric skateboards, has the potential to increase usage on trails in open space lands. In fact, major manufacturers of electric skateboards already market some models for trail or "all-terrain" use.[6] Additionally, electric transportation devices can often be categorized as powered mobility devices which are protected under the Americans with Disabilities Act (Department of Justice, 2014).

3.3.3 General trends

More general recreation trends indicate that photography and nature-based activities have been increasing in popularity, replacing more traditional outdoor activities like fishing and hunting (Cordell, 2012). In addition, the *Survey on Public Opinions and Attitudes on Outdoor Recreation in California* found latent demand for some activities where respondents reported that they wanted to start participating or participate more in picnicking and camping activities (California State Parks, 2014). Implications for these trends may include a decrease in fishing in WDL and an increase in shoreline picnicking.

3.4 Assessing Recreation Use

3.4.1 Visitation and Recreation Use

To better gauge recreation use levels on open space lands in the face of emerging trends, many parks assess recreation use. Recreation use is typically categorized as follows: who the visitors are, what activities they do, where they go, and how many visits a site receives (aka visitation). Measuring recreation use can provide monthly, seasonal, and annual data for visitation, but also can be used for funding requests, facility planning, utility capacity estimates, future open space planning, and management actions. Understanding the visitors and their perceptions can help the City meet visitor preferences for recreation for open space areas, evaluate the effectiveness of the diversity, inclusion, and equity goals of the PROS Plan. A brief discussion of recreation use assessment options are provided below. Table 3.1 outlines brief pros and cons of the assessment options as well as what types of data they can be used to collect. Note that the type of technology, survey questions, or locations of data collection must be selected appropriately for the desired data type.

[5] *E-bikes are allowed on paved roads in California State Parks and generally on paved roads that allow cars.*
[6] *See Onewheel.com and Boostedusa.com*

Table 3.1. Summary of Visitor Survey and Count Methods

Method	Who visitors are/visitor perceptions	What activities visitors do	Where visitors go	Number of visits
On-site visitor survey Pros: gather lots of information at once for people actively using the area Cons: time and resource intensive, only a snapshot in time	X	X	X	X
Online visitor survey Pros: gather lots of information at once, assess latent demand and reasons for not using open space areas, or decreased open space use Cons: Not all potential respondents have internet access, more difficult to control the sample of respondents selected to survey	X	X	X	X
Visitor counts from on-site observer Pros: easily collect digital data Cons: time and resource intensive		X	X	X
Visitor counts from remote motion-activated camera Pros: remote data collection Cons: time intensive or expensive data analysis		X	X	X
Visitor counts from automated counters Pros: remote data collection Cons: more types of data are more expensive		X	X	X
Visitor counts from cellphone location data Pros: data is voluntarily collected and preexisting Cons: unknown data reliability and potentially expensive			X	X

On-site visitor surveys are useful in gathering large amounts of information from visitors and are a great way to gather demographic and other information regarding who the visitors are, what activities they participated in during their visit, and which trailheads and trails they used in addition to counting the number of visits. Data collected from surveys are often used for many years by both the agency involved as well as other local and neighboring agencies and researchers. Pairing on-site surveys with relatively infrequent planning processes such as park and recreation master plans can help keep the snapshot of data relevant and can provide immediate applications for the data. In addition, surveys can help understand visitor perceptions and on-site recreation experiences. If an online survey is used, perceptions can be gauged for potential visitors who have never visited or used to visit but don't anymore.

Visitor counting systems are the main method park and recreation agencies employ when collecting recreation use data. The term visitor use counting system is used to describe an ongoing effort to measure primarily the number of visits as well as visitors' locations and activities. In Table 3.1 above, the On-site

observer, Remote, motion-activated camera, and Automated counters are all methods that can be used as part of a visitor counting system.

An on-site observer can collect a variety of information in addition to the types listed in Table 1 including group size, times of entry and exit, mode of access, and direction of travel. Additionally, observers can informally track compliance with open space regulations. Observers can be placed in multiple locations to assess which trails are being used and how much. When and where observers are stationed can be designed to fill in data gaps or minimize time in the field. Technology advances have made it easy for observers to log data digitally and automatically store in an online-accessible database. Data collection can also be tailored to minimize cleaning and analysis. Unfortunately, staff time conducting on-site observations can be expensive and potentially tedious for the people assigned, sometimes resulting in quality control issues with the data being collected.

Remote, motion-sensing cameras can be used in place of an on-site observer and are already used extensively for wildlife detection. Effective and secure placement can sometimes be challenging depending on the vegetation structure and site conditions. Even with technology advances photos typically must be manually downloaded and analyzed by staff.

The most common method used in visitor counting systems is automated counters. These types of counters range in complexity from a simple tally of visitors passing by an infrared beam that must be manually downloaded, to an integrated bicycle, pedestrian, equestrian counter automatically uploading data including activity type, direction of travel, and total number of visits to an online portal. Selecting automated counters depends on the type of information desired, and the budget. Automated counters must also be regularly maintained by staff to ensure quality data.

Continuing advancements in cellphone technology allows for passive tracking of location data. Some applications facilitate location tracking and allow users to voluntarily share data which can also made publicly available. An example of this type of app is Strava. Because this data comes from specific users who decided to use a particular app designed for tracking specific activities, the information gleaned about where visitors go in the open space can only be applied to a subset of people. Without other visitor counting technologies, there is no way to determine what proportion of visitors have been accounted for. Other applications track user location continuously in the background and sell the data.[7] This data can be expensive to purchase, but can potentially represent every visitor who recreates on open space lands with a smartphone.

Additional visitor counting systems regularly employed include automated vehicle counters and reservation systems. Vehicle counters can only be used to estimate number of visits and cannot be used to understand activity type. Reservation systems are typically employed in areas experiencing crowded conditions. Because activity type is of interest to the City and crowded conditions have not been observed or reported, these methods were determined to be unsuitable for the OSMP.

Any programming that the City or its partners want to undertake would do well to count participants not only to gauge the engagement of the program but also to understand the relationship of planned group activities with the visitation overall.

[7] *Many apps collect location data which may be sold to firms like Streetlight which aggregates the data and sells analysis packages.*

3.4.2 Trail Usage and Density

Both the WDL and SJC Open Spaces have trail systems that are similar in density when compared to nearby open space areas. Trail density is calculated by the total miles of trail over the acreage of the open space. WDL (293 ac) has a trail density of about .03 miles per acre for the trails included on current City maps - referred to as mapped trails.[8] Comparable to WDL in area, the Laurelwood/Sugarloaf Open Space (225 ac) in San Mateo has a trail density of .02 miles per acre. The *Laurelwood Park and Sugarloaf Mountain Open Space Management Plan Amendment* (City of San Mateo, 2015) found a number of existing trails which are not mapped and not utilized in the trail density calculation (City of San Mateo Parks and Recreation, 2015). When WDL's trails that do not appear on current City maps are included -referred to as previously unmapped trails- the trail density increases to .04 miles per acre. The activity types allowed on trails in both areas seem to be consistent, allowing hiking, dogs on leash, and biking. Table 3.2 shows the trail mileage for both mapped and previously unmapped trails in Belmont's open spaces.

SJC (39 acres) has a trail density of .03 miles per acre for mapped trails in the City-owned portion of the area. The total trail density on both City-owned parcels and private parcels, including unmapped trails, is also 0.3 miles per acre. The majority of previously unmapped trails are located on neighboring privately owned parcels. Similar in size to SJC and surrounding parcels are Big Canyon and Eaton Parks (74 acres combined) in San Carlos, where the combined trail density is .05 miles per acre. The 2012 *San Carlos Hillside Trails Plan* also indicated that well established, unmapped trails existed (City of San Carlos, 2012). These unmapped trails would further increase the trail density in Big Canyon and Eaton Parks. These San Carlos parks allow hiking and dogs on leash, but do not allow bikes.

Table 3.2. Miles of Trails in Belmont Open Spaces

Trails	WDL Trail Miles	SJC Trail Miles[1]	Total
Mapped	8.57 (81%)	1.04 (45%)	9.61 (75%)
Previously unmapped	1.96 (19%)	1.26 (55%)	3.22 (25%)
All	10.53 (100%)	2.3 (100%)	12.83 (100%)

[1]*Includes both City and neighboring parcels.*

Though research on the effects of trail density on wildlife and their habitat is limited, some studies have investigated the effect of trail creation on wildlife. Miller et al., (2020) suggest that the construction of new trails can negatively alter wildlife habitat in the short term, but species rebound and return to the area quickly. In addition, a study of urban open spaces in Ohio found that trails and recreationists did not limit the movement of wildlife (Escalambre, 2020). Similarly, a study conducted in San Francisco Bay Area open spaces found that different types of recreation activities -namely hiking and biking- do not seem to negatively impact wildlife (Reilly et al., 2017). Reilly et al., found that domestic dogs did seem to have a small effect on wildlife, but the effect was limited to a small number of species, in particular, nesting birds, and carnivores. WRA conducted an environmental assessment for Quarry Park and Pillar Point Bluff Park in San Mateo County and did not find any impacts from dogs on wildlife and plant species found in those parks. As part of this same project, WRA conducted a comprehensive review of studies that examined dog

[8] *Current City trail maps were developed in 2003. The trails shown on these maps are referred to as mapped trails. Other trails exist but are not shown on these maps, these trails are referred to as previously unmapped.*

related recreation impacts on wildlife across multiple park and recreation areas but found scant evidence of chasing or killing wildlife. Finally, the Environmental Assessment section of the OSMP found that wildlife habitats in WDL and SJC are in good condition suggesting that the current trail usage and trail density are not having undue negative impacts.

3.4.3 Trail Condition Assessment

During March and April 2022, WRA staff recorded trail conditions for the trail systems in both WDL and SJC.[9] Chapter 2.3.4 includes a description of the methods used for this assessment – note that this effort was not a comprehensive inventory. Point data of erosion instances and linear data of previously unmapped trails are shown in Figures 3.1 and 3.2. In addition, WRA also noted stream crossings and if adjacent vegetation shows signs of impacts (trampling, what appears to be obvious/illegal vegetation trimming).

DRAFT

Table 3.4 depicts erosion levels for the City's two open space areas. Most erosion locations were found in the larger WDL Open Space Area, and among those locations, the majority were assessed as "low" on both mapped and previously unmapped trails. For both WDL and SJC the number of locations assessed as having "high" erosion were about one in ten; 8-11 percent for WDL, and 0-8 percent for SJC. These results demonstrate that the trail systems in each open space area are in relatively good condition overall, but that there are locations of "high" erosion that should be addressed immediately.

Table 3.3. Instances of Erosion on Trails

Location	Low Erosion	Medium Erosion	High Erosion	Total Erosion Instances
WDL				
Mapped trails	127 (56%)	77 (34%)	25 (11%)	229
Previously unmapped trails	59 (83%)	7 (10%)	6 (8%)	71
SJC				
Mapped trails	5 (38%)	7 (54%)	1 (8%)	13
Previously unmapped trails	11 (85%)	2 (15%)	0 (0%)	13

Trail connections across neighboring private parcels are included in analyses.

Recreational uses can contribute to erosion on trails though the effect is largely mediated by the trail alignment, climate, and soil type (Leung and Marion, 1996). Some studies that have examined the relative impacts of different modes of recreation suggest that hiking trails experience more soil loss than biking trails, and equestrian and motorized trails experience the most soil loss. Typically, more soil loss – and other ecological impacts - results from recreation use occurring off-trail rather than on established trails (Hammitt et al., 2015).

3.5 Conclusions and Considerations

The following considerations offered are aimed at improving the condition of existing trails and managing existing and future recreation use. These considerations are not designed to increase recreation use on trails, and a variety of methods are described. The City may choose to implement one or more methods at their discretion. Considerations were developed from desktop research, field visits, and public comments. Methods consist of established best practices.

3.5.1 Trail Condition and Maintenance

Stream Crossings and Erosion

Attachment C shows specific locations with the most urgent need. Stream crossings should be either removed by rerouting the trail or protected with a structure (e.g. bridges). Trail professionals and

hydrologists should be consulted to determine the type of structure needed for each stream crossing. [10] Additional areas identified as having high levels of erosion should to be evaluated by trail professionals to determine if trail sections can be improved with drainage features or if the trail needs to be rerouted. Consider requiring training for volunteers engaged in trail construction and maintenance.

Previously Unmapped Trails

Once stream crossings and erosion issues have been remedied, most previously unmapped trails can be incorporated into City maps, named according to City policy, and wayfinding signage installed. Trail segments that should not be incorporated but rather decommissioned include trail segments surrounding erosion issues – i.e. the re-routing of a trail will result in sections being decommissioned. Additional unmapped trails that should be decommissioned are all those which exist between Waterdog Loop Trail and the shoreline of WDL. The steep slopes in this area not only makes these informal trails hazardous to visitor safety, but also can result in erosion, water quality, and riparian impacts. Decommissioned trails should be closed with signage, soil should be de-compacted and revegetated if needed.

Ongoing Assessments

Recommended trail maintenance standards and guidelines for the City's open space areas are based on information found in chapter 5 of the *County of Los Angeles Trails Manual* (County of Los Angeles Department of Parks and Recreation, 2013). The City may choose to adopt other reputable trail maintenance guidelines.

Trail maintenance should be based regular assessments of trail conditions. For many park and recreation agencies these are done on an annual basis, documenting trail conditions and need for maintenance and or repair. Trail inspectors should record information about runoff and potential effects on water quality of nearby habitats, spread of invasive exotic plants, and status and quality of any known sensitive resources in the immediate vicinity that could be affected by road or trail use and/or maintenance.

Generally, assessments should address the need for conducting the following activities:

- Tree and brush trimming
- Trail grading and reducing surface erosion
- Culvert cleaning
- Maintaining water crossings and structures for wet areas
- Maintaining signage
- Graffiti removal
- Homeless encampment removal
- Fire fuels reduction

[10] *See Santa Cruz Mountain Trail Stewardship*

3.5.2 Trail Operations and Management

Pilot Policy on Electric Transportation Devices

A pilot policy may be implemented regarding the use of e-bikes, and other electric transportation devices on trails which adheres to ADA regulations. A policy that can be implemented for at least 1 year during which usage, behavior, and visitor perceptions can be monitored is recommended. This policy may allow Class 1 e-bikes on trails where traditional bikes are allowed, similar to local agencies like Santa Clara County. Other electric transportation devices like electric skateboards may not be allowed on natural surface trails as they do not qualify as a bike or e-bike. Other-powered mobility devices as defined by the ADA may only be used by individuals with mobility disabilities on open space trails.

Wayfinding and Site Identification Signage

Wayfinding signage will need to be added to newly incorporated trails and closed signage to newly decommissioned trails to eliminate ambiguity. The City may also consider developing a trail naming policy. Consistent site identification signage should utilize a similar design across all open space lands and be installed at all designated trailheads. Attachment D shows examples of inconsistent signage design and ambiguous trailheads needing identification.

For trail operation, hours of use should be clearly posted at major access points like trailheads. Other relevant information, such as local regulations, or trail etiquette guidelines, should also be posted in these locations. Closure policies (e.g., wildfire hazard, wet weather conditions) should also be clearly posted. In addition, changes to trail or open space conditions may need to be communicated through multiple methods simultaneously such as website updates, and social media, as well as on-site signage.

Visitor Surveys and Education

Survey visitors and non-visitors to gather information on the effect of management actions on visitor experiences. Some management actions are only measurable by asking visitors about their experience, such as visitor feelings of safety and crowding. Online surveys are recommended to capture responses from people who may not be visiting and help to understand why and if people are being displaced.

The following education-related tools may be implemented at the City's discretion.

- Actively educating visitors on trail etiquette can help improve feelings of safety. The Slow and Say Hello philosophy encourages all trail users to slow down and communicate when passing any other visitor (Marin County Bicycle Coalition et al., 2022). This method does not rely on users memorizing the "share-the-trail" rules and encourages general friendliness. This method also educates visitors to slow whenever they encounter another user, which can potentially slow speeds overall. Actively educating all trail users can help diffuse feelings of resentment where one user groups feels like they are the only ones behaving correctly. This tool is recommended to be implemented first and in an ongoing capacity.

- Actively educating cyclists to use passive bells or providing loaner bells at trailheads can help all users hear when a bike is approaching.[11] Actively educating hikers to listen for bells must also happen in order to reduce startling situations.

Measure Recreation Use in Open Spaces

Consider automated counters installed at key trailheads that can differentiate between pedestrians and cyclists. On-site observers could be used instead of automated counters. Observers must be strategically deployed to collect data during all types of hours, days, seasons. Only staff should be used as on-site observers to avoid any bias or perception of bias that may come with the use of volunteers. Any group events should provide an estimate of the number of attendees.

Trail Rules and Etiquette

During the OSMP process, public meeting participants have expressed a wide range of experiences from wonderful to feeling unsafe. Participants who expressed feeling unsafe conveyed that trail user speed was a key factor. To address trail user speed, a variety of tools shown to slow speeds and improve perceptions of safety are provided.

The following trail regulation and design tools would need preemptive actions in order to be implemented. First, public outreach would be needed to identify specific trail segments where user speed is a concern for visitor safety. Second, those trail segments would need to be evaluated to determine the most appropriate tool to be implemented as not all tools may be feasible, effective, or supported by the public.

- Visitors' feeling of safety may be improved through the addition of regulations around trail user speed, such as signed speed limits or designated slow/walk zones. Many parks have a 15-mph speed limit on trails, however, without speedometers, users are unaware of their speed. Additionally, regulations rely on education and enforcement which can be challenging with limited staffing. Some trail segments may have faster speeds but would be a poor candidate for a slow zone because trail users would be physically unable to slow in time. For these segments, if safety was a concern, a different tool would be needed.

- Trail user speed can effectively be reduced through a number of biking specific trail design features described in section 4.1.3 below. Additional general design features include installing flat landings to narrow trails to provide areas of respite and wider areas for passing.

- Designating trails as single use can improve feelings of safety by increasing predictability by allowing only one activity type such as hiking only or biking only. Evaluating if/where this tool is appropriate will rely on visitor perceptions because if trail users do not support the change, compliance may be low. Compliance with single use may also be low if the trail segment is a key connector between other desirable segments or access to trailheads.

[11] *WRA staff noted during field visits that many cyclists already use passive bells when riding.*

- Designating trails as one-way can reduce the need for passing as well as reduce speed by making steep sections uphill only. Evaluating if/where this tool is appropriate will rely on visitor perceptions because if trail users do not support the change, compliance may be low. Evaluation of this tool will also rely on existing use patterns, where compliance with one-way directions may be low if existing use patterns show that users typically travel in the opposite direction.

Changes in visitor use patterns to enhance visitor experiences and protect sensitive resources can be facilitated through clearly communicated regulations and result in decreasing visitor conflict and decreasing environmental impacts. Trail closures during or immediately after rain events may help reduce erosion and may reduce vegetation trampling/trail braiding around wet/muddy areas. Temporal separation of visitor activities has also shown success in reducing conflict and unauthorized trail creation. Direction of travel on trails can be another dynamic management tools. Involving visitors in trail maintenance or clean-up days can be an effective way to teach visitors about trail etiquette, habitat protection, and engagement in management.

3.5.3 Trail Construction and Design

The following section contains guidelines and standards for designing and constructing new trails or rehabilitating existing trails. General information is presented that applies to all trails, followed by specific details for mountain bike trails and for trails that comply with the American with Disabilities Act (ADA). Many of these standards and guidelines can be found in the California State Park's *Trails Handbook* (California State Parks, 2019). The City may choose to adopt trail construction guidelines from other reputable sources.

General Standards and Guidelines

Trail design elements can be effective at protecting the surrounding habitats and in managing visitor use. Delineating edges of trails can help visitors identify authorized trails and discourages off-trail travel. Delineating trails can be done with natural materials such as logs or rocks, or with built materials like a short curb on a paved path. Often, if resources are especially sensitive or if off-trail travel is becoming a problem, barriers can be installed at trail margins. Barriers can include fencing or other structures, or they can consist of live vegetation like shrubs. However, sometimes barriers can be ineffective at preventing off-trail travel like that which results in trail braiding and trail widening. Usually in these situations, either a wider trail is needed, or the trail surface needs to be hardened with materials like gravel, or decomposed granite.

Effective trail design can be as simple as ensuring authorized trails access places that people want or need to go, and unauthorized trails are decommissioned effectively. Other trail design elements depend on the current use and desired use of the trail system. Seating, and wider gathering places are often installed at vistas. For these and areas with interpretive signage, such as trailheads, trail surfaces should be wider and hardened.

Locations for new trails should take advantage of existing roads, trails, or other disturbed areas wherever possible and appropriate.

Strategies should be implemented to keep visitors on trails and discourage informal trail creation. This is particularly important where there are steep slopes and sensitive resources and unauthorized trails that can sometimes result in environmental impacts. These strategies include:

- Install clear directional signage at trailheads and intersections.
- Provide educational signage on trail stewardship, including prohibition of establishment of new trails, shortcuts, etc. without City authorization.
- Install natural features as barriers to minimize unauthorized trail development.
- Use volunteer trail patrols to monitor and document newly developed unauthorized trails.
- Engage trail users in park stewardship.
- Use logs and vegetation debris to block newly developed unauthorized trails
- Trails will be aligned along cross slopes and outsloped as feasible; running slopes will be minimized to avoid erosion to the greatest extent feasible.
- Full bench construction shall be used where feasible. This means the full tread width is supported by undisturbed soil without the need for fill on the downhill side. This technique results in more stable trails that are less susceptible to erosion.
- Locally-sourced materials shall be used for trail construction as available.
- Rolling dips shall be constructed to direct water off the trail for minor seasonal drainage crossings and at appropriate intervals to effectively dewater trail based on trail slope.
- Armored rolling dips shall be constructed at moderate seasonal drainage crossings to minimize erosion and sediment impacts and provide all weather access for trail users.
- New riparian/creek crossings shall be located on geologically stable sites (i.e. low slopes in channel and banks) and constructed to minimize, to the greatest extent possible, streambank and bed erosion.
- Development of new public trails through landslide areas shall be avoided.
- Trail cross slope (perpendicular to the direction of travel) shall be 5 percent maximum, except at armored crossings and rolling dips where cross-slope shall not exceed 10%.

ADA Standards and Guidelines

The Americans with Disabilities Act (ADA) requires that some portion of a recreation resource or trail offer opportunities for those with disabilities. The following standards apply to trail design and construction to ensure reasonable access to all trail users:

- A clear tread width of accessible trails shall be 48” minimum, and 72” maximum.
- Cane-detectable edging shall be provided along at least one side of accessible trails. This can either include an elevation change (such as curb, 3” minimum height), or texture change (such as a transition from gravel to vegetation).
- Running slopes of accessible trails in the direction of travel shall be as follows:
    - 5 percent or less for any distance.
    - From 5.1 percent to 8.33 percent for 200’ maximum.
    - Cross slope (perpendicular to the direction of travel) of accessible trails shall be 3 percent maximum.

- Where accessible trail clear tread width is less than 60", and the running slope is greater than 5%, a 60" long resting space shall be provided at least every 200'.
- Accessible trails shall be constructed with an all-weather surface that retains its surface integrity when wet. Examples include stabilized soil or decomposed granite, wood or plastic decking, unit pavers, asphalt paving, or concrete.
- Steps shall not be permitted on accessible trails.
- Accessible trails shall not have tread obstacles, such as roots or rocks, higher than 3"
- Objects that protrude into an accessible trail between 27" and 80" from the ground shall not protrude more than 4". Objects mounted below 27", such as interpretive exhibits or benches, may protrude any amount but shall not reduce the clear width of the trail to less than 36".

Trail Design Features Specific to Mountain Bike Trails

Most of this section offers general standards and guidelines that are applicable to any trail type. However, there are specific aspects of mountain bike trail use that need to be carefully considered during the design process. According to the *California State Parks Trail Handbook*, an important element in mountain bike trail design is reducing the speed of cyclists. High rates of speed can lead to increased user conflicts with cyclists and other trail users, safety issues, resource degradation, and trail sustainability issues. Reducing mountain biker speed is a means of addressing these issues, and there are several design techniques that can be used to help reduce bike speed, including:

- Increasing trail sinuosity
- Reducing long sight lines
- Staying within the maximum sustainable grade
- Reducing tread width
- Use "run outs" at the bottom of lengthy downhill trail segments to provide for adequate braking distances
- Using natural or artificial features to create pinch points
- Avoiding flat ground to the extent feasible
- Texturing the trail tread

Using these design techniques collectively rather than simply relying on a single technique will result in greater speed reduction, user safety, and user satisfaction. Additional details on each of these techniques may be found in Chapter 6 of the Handbook.

Design of Drainage, Wetland, or Stream Crossings

The open space areas managed by the City of have multiple stream crossings. To maintain the City's trails in an environmentally sustainable manner, proper cross drainage will be required when a trail or road crosses an existing drainage, wetland, or stream. Whether a pipe or open conveyance is chosen, adequately sizing and sloping the cross drainage to convey up to the 100-year design flow is critical to ensuring long-term functionality with minimal maintenance. Selection and design of each crossing installation will consider, at a minimum, the trail type, required vehicle use and load-bearing capacity, stream type, fish-passage requirements, and estimated flood flows. Project-specific engineering design

and analysis will be conducted to ensure correct size, material, and placement before construction can begin.

The following standards and guidelines are generally applicable to drainage feature design, and or crossing wetlands and streams:

- Blocked culverts may affect water quality, change the watercourse, increase erosion or sediment runoff, or affect wildlife. Therefore, trails should be designed to minimize the need for culverts.
- Any unstable fill slopes and cut banks that have the potential to erode and negatively affect water quality of nearby wetlands and waters should be removed entirely and graded to a stable contour. These areas should be revegetated with appropriate native species.
- Sediment filtration barriers should be deployed around the edges of unstable slopes as necessary to prevent erosion and runoff into wetlands and waters.
- Grading and other activities associated with road or trail maintenance shall only occur during the dry months (generally April 1 to October 31), when associated erosion can be reduced to the maximum extent possible.

Dips and Water Bars

Rolling/reverse grade dips or water bars will be constructed to disperse flow and to minimize the potential for concentrated flow, which might otherwise cause rilling or gullying. Rolling dips are more durable and drivable than water bars and are therefore the preferred method.

Dip and bar spacing is dependent upon grade, soil type, and expected runoff volume. General guidance for spacing dips is as follows, although the specific engineering specification may differ, depending on site conditions and other factors:

- 2% - 3% grade = 200 to 300 feet
- 5% - 7% grade = 160 to 180 feet
- 8% - 10% grade = 140 to 150 feet

Ditch Relief Culverts and Outlets

Ditch relief culverts are necessary to drain an inside ditch at specified intervals to prevent excess velocities in the ditch or overflow onto the trail from the ditch. Relief culverts convey the flow under and across the trail or roadway to the outsloped area below. When a ditch relief or permanent culvert empties onto a steep slope, an extension of the piping may be warranted to prevent erosion at the outlet.

Slope Stability

Steep slopes adjacent to trails and roadways can result in slumping or gullying that can damage the road or trail and degrade water quality. The following measures are to be considered in stabilizing steep slopes adjacent to trails and roads:

- lay back the slope (modify to 2:1 or flatter) and install vegetation
- rip rap a steep slope (1:1)

- retaining wall

Slopes that are sloped back to 2:1 or flatter and seeded may also require temporary erosion-control blanket installations to stabilize the hill slope while the vegetation matures. A retaining wall may only be applicable in special cases where a short vertical slope (around 3 to 5 feet) needs to be stabilized in a park area that includes some urban or residential interface.

Biotechnical treatments, such as wattles or woody debris revetments, are the preferred method for slope stabilization over hardscape solutions, such as rip rap, when the designs are feasible under existing and forecasted site conditions.

Catchment Basins
The following methods may be used to capture and infiltrate runoff from any trails or parking areas. Method selection will be based on the site's available land area, soil type, groundwater level, and estimated volume of runoff to be collected. All the following options require engineering design prior to installation:

- Dry basin
- Wet basin
- Infiltration trench
- Subsurface infiltration gallery or drywell

Sensitive Areas

The best way to protect sensitive resources is to avoid locating trails in sensitive biological communities to the extent possible. The following standards and guidelines pertain to those situations for which it's infeasible for the trail to avoid traversing sensitive areas. While many routine maintenance activities will not require special permits, some maintenance activities and new trail construction may. When required, this process will typically result in implementation of best management practices (BMPs) required by the resource agencies. As defined in the OSMP, a BMP is a practice, or combination of practices, that has been determined to be most effective and practicable in preventing or reducing the level of environmental harm created from an activity to a level compatible with environmental goals and regulatory standards.

BMPs can be drawn upon during the resource permitting process and can be supplemented by any additional practices required by the resource agencies. For projects not requiring permits or regulatory involvement, appropriate BMPs should be implemented as necessary and practicable to protect sensitive resources on the City's open space areas. The general and topically specific practices can be considered as standards to be followed and implemented as appropriate for any road and trail management action. The BMPs have been divided into categories listed below:

- General
- Sensitive Natural Resources Best Management Practices
- Special-Status Wildlife Best Management Practices
- Special-Status Plants
- Invasive Plants
- Construction contracts

- Cultural Resources
- Water Quality
- Geologic Hazards
- Air Quality
- Noise

The specific BMPs within each of the categories may be found in Tables 6.2 through 6. 11, in chapter 6 of the Marin County *Road and Trail Management Plan* (Marin County Parks and Marin County Open Space District, 2014).

DRAFT

4.0 Management Plan

The purpose of the OSMP is to ensure environmental sustainability, balanced recreation use, and mitigation of natural hazards for the City's two open space areas. Adopting the over-arching PROS Plan (of which this OSMP is a subset of) will allow the City to augment existing goals and policies pertaining to open space. The City will also be able to commit to specific actions that may require new funding and possibly environmental compliance and permitting requirements.

4.1 Plan Development Process

During the planning process, the City and WRA staff developed a Base Plan and two alternatives to give the City the option of adding emphasis to topics of interest to the community. The Base Plan was developed to be relatively comprehensive to protect sensitive resources, guide trail maintenance, manage recreation, and mitigate the risk of natural hazards. The alternatives represented minor additions to the Base Plan: the Recreation Emphasis Alternative would supplement trail and recreational use policies; and the Habitat Protection Emphasis Alternative would include additional policies to prioritize the protection of native plant communities and wildlife.

During the May 31, 2022 PROS Plan Advisory Committee meeting, 4 plan options were presented to the community and Committee members, and they were asked which option they preferred. The responses below showed that people preferred the Base Plan with the Recreation Emphasis additions (37%) and the Base Plan plus all additions (40%). After continued discussion, the Committee recommended that both alternatives be combined with the Base Plan to better encompass all the topics desired by the community.

WHICH MANAGEMENT ALTERNATIVE DO YOU SUPPORT?	
	Percentage responses[1]
Base Plan	6%
Base Plan + Recreation Emphasis	37%
Base Plan + Habitat Restoration Emphasis	17%
Base Plan + Recreation Emphasis + Habitat Restoration Emphasis	40%

[1]*Responses for 35 people (including Advisory Committee members and public meeting participants).*

4.2 Management Plan Framework

The final management plan framework represents the combined emphasis and community desired topics.[12] Three main topic areas or themes were identified through City and public input and are used to organize the components of the plan. The themes include:

- Environmental sustainability,
- Balanced recreation use, and
- Mitigation of natural hazards,

[12] *In Chapter 4.2, policies that came from the Habitat Protection Emphasis Alternative have been identified with a single asterisk (*). Policies that had originally been listed under the Recreation Emphasis Alternative have been identified with a double asterisk (**).*

The components of the management plan framework include objectives, policies, and recommendations. The objectives are general statements that articulate a desired outcome. Policies are more specific statements that state what steps the City may take to achieve a desired outcome. Recommendations are measurable actions that specify how a desired outcome or policy can be achieved. Objectives, policies, and recommendations were developed based on existing City plans (discussed in Chapter 2.2.7), City staff and public input, as well as the considerations discussed in Chapters 2 and 3 of this document.

The following tables in Chapters 4.2.1 and 4.2.2 depict the objectives and policies across the three main themes. Chapter 4.2.3 displays tables of recommendations which are categorized by their degree of difficulty to carry out – when considering financial, staffing, and level of effort challenges. Finally, a small selection of recommendations were prioritized as those which are most needed.

DRAFT

4.2.1 Objectives

Table 4.1. Environmental Sustainability Objectives

THEME	OBJECTIVE	DESCRIPTION
Environmental Sustainability	**ES-1**	Sustain and promote viable and diverse native plant communities that are characteristic of the region.
	ES-2	Maintain and promote healthy and diverse native wildlife populations.
	ES-3	Protect and restore natural water courses, wetlands, and hydrologic processes.
	E-S4	Use and document scientific knowledge of comparable open space resources and widely accepted and well documented resource management techniques as a basis for management decisions.
	ES-5	Expand ability to perform natural resource management.

Table 4.2. Balanced Recreation Use Objectives

THEME	OBJECTIVE	DESCRIPTION
Balanced Recreation Use	**BR-1**	Provide diverse, nature-dependent recreation activities in the City's open space areas.
	BR-2	Improve and maintain trails to be environmentally sustainable.
	BR-3	Facilitate and encourage multi-use compatibility on trails.
	BR-4	Enhance partnerships and programs aimed at improving recreation experiences.

Table 4.3. Natural Hazard Mitigation Objectives

THEME	OBJECTIVE	DESCRIPTION
Natural Hazard Mitigation	**NH-1**	Reduce the risk and severity of wildland fire and minimize the impact of fire suppression activities within City open spaces and adjacent residential areas.
	NH-2	Protect life and property from natural hazards, including neighboring communities during mitigation or hazard events.
	NH-3	Improve cooperative planning to respond to natural hazards.

4.2.2 Policies

Table 4.4. Environmental Sustainability Policies

OBJECTIVE	POLICY	DESCRIPTION
ES-1: Vegetation Protection	**P1**	Limit trail construction, and facility development in riparian and other wetland areas (and associated buffers) to protect them from disturbance. Recreational, educational, and other programmatic activities should be conducted in previously developed areas, when possible, to minimize impacts to riparian/wetland areas.
	P2	Monitor open space conditions with an emphasis on documenting the location, distribution, and abundance of special-status plants and plant communities, native grasses, wildflowers, and other native flora.
	P3	Align or relocate, modify trails to avoid impacting sensitive habitats such as wetlands and areas where endangered species are present. Avoid aligning trails along the boundaries of sensitive habitats.
	P4	Protect riparian ecosystems and habitat to maintain natural hydrologic process, water quality, and wildlife benefits. If necessary, enhance and restore riparian habitats to improve function.
	P5	Protect common native plant species from disturbance, such as trampling, and disease, such as Sudden Oak Death.
	P6	Monitor and control exotic or nuisance plant species.
	P7	Preserve and enhance riparian, stream, and other wetland communities locally and in coordination with other agencies to continue providing important habitat networks.*
ES-2: Wildlife Protection	**P8**	Monitor sensitive terrestrial and aquatic wildlife species in terms of their presence/absence and potential to occur on City of Belmont open space lands.
	P9	Avoidance of sensitive wildlife species, critical breeding or nesting seasons, and critical breeding or nesting habitats during trail or facility construction.
	P10	Protect common native wildlife species from disturbance, and disease.
	P11	Preserve and enhance native wildlife habitat locally and in coordination with other agencies to continue protecting important habitat networks.*
ES-3: Water Resources	**P12**	Protect surface and ground water from chemical contamination.

OBJECTIVE	POLICY	DESCRIPTION
ES-3: Water Resources	**P13**	Minimize unnatural soil erosion and sedimentation of waters and wetlands.
ES-4: Science-Based Management	**P14**	Develop performance measures when designing City projects for the purpose of open space management and collect monitoring data to evaluate project success.
	P15	Designation and evaluation of trail improvement project proposals will be based on the environmental sustainability and on best available data, including inventories of wildlife, and vegetation resources. The City will undertake site specific and programmatic efforts to extend and improve upon the biological data and recreational benefits underlying its decision-making criteria.
ES-5: Expand Ability	**P16**	Develop written agreements with volunteer groups to perform natural resource management tasks.
	P17	The City will lead, coordinate, or partner with institutions, agencies, and organizations when conducting natural resource management activities.
	P18	Expand volunteer restoration programs subject to established protocols to ensure optimal environmental protection.*

**Policies came from the Habitat Protection Emphasis Alternative. **Policies came from the Recreation Emphasis Alternative.*

DRAFT

Table 4.5. Balanced Recreation Policies

OBJECTIVE	POLICY	DESCRIPTION
BR-1: Balanced Recreation Uses	**P19**	Trail access should be provided for a range of user capabilities and needs (including persons with physical limitations) in a manner consistent with State and Federal regulations. The Americans with Disabilities Act Accessibility Guidelines for Outdoor Developed Areas will inform trail improvement and maintenance where conditions permit.
	P20	Design and improve trails to facilitate safe trail use by all visitors with a focus toward slowing travel speeds, adjusting sight lines, and establishing safe passing zones.
	P21	The City may prohibit certain trail uses or apply increased trail use restrictions within certain areas to enhance safety, minimize conflicts between trail users, and protect natural resources in sensitive resource areas.
	P22	Maintain high quality visitor experiences.
	P23	Diversify recreation opportunities in the open space areas, subject to policies that apply to all users of these areas.
BR-2: Trail Management	**P24**	Authorized trailheads include site and trail identifying signage, allowed uses, posted trail map, garbage can with securable lid, and a dog waste bag dispenser.
	P25	Monitor and evaluate open space trail conditions on City open space lands to identify significant erosion, informally created trails, trail redundancy or otherwise unnecessary trail segments.
	P26	Maintain trails by improving drainage, hardening, widening based on critical evaluations, and in accordance with trail building standards in Section 3.5.3, or equivalent sources.
	P27	Conduct any grading activities necessary for trail maintenance before soil conditions inhibit their excavation, movement, and compacting
	P28	Modification to any open space resources on open space lands is prohibited unless authorized personnel have given express approval to perform such tasks, including trail construction, improvement, closing, or decommissioning trails.
	P29	Authorized trails must have wayfinding signage and associated naming conventions.

OBJECTIVE	POLICY	DESCRIPTION
BR-2: Trail Management	**P30**	Evaluate opportunities to construct new trails that could connect with other regional trails, with existing City recognized trails, and by designating other trails not currently formally recognized as part of the City's open space trail system.
	P31	Evaluate opportunities to implement trail calming design features.**
BR-3: User Compatibility	**P32**	To provide visitor opportunities to experience natural sounds, no amplified sounds – i.e. portable speakers – are allowed on open space lands unless expressly approved as part of a group activity permit.
	P33	On multiuse trails, the following etiquette rules apply: cyclists yield to all other trail users, pedestrians yield to equestrians. Downhill travel yield to uphill travel. Maintain safe speeds and announce yourself when passing.
	P34	Use of Belmont open space lands is subject to the City's existing regulations, including hours of operation. Entry into Waterdog Lake is prohibited.
	P35	On multiuse trails, follow best practices and City Code re: : group size s. Groups of 25 or more require a permit under City code (Ch 16, Article II, Sec 16-23).**
BR-4: Enhance Partnerships	**P36**	Develop written agreements with volunteer groups to perform trail maintenance or construction tasks.
	P37	Identify locations where trails can be improved or established in open space to connect the City and other open space areas neighboring Belmont, such as Sugarloaf Mountain. Coordinate with San Mateo County and the City of San Mateo.

**Policies came from the Habitat Protection Emphasis Alternative. **Policies came from the Recreation Emphasis Alternative.*

Table 4.6. Natural Hazard Mitigation Policies

OBJECTIVE	POLICY	DESCRIPTION
NH-1: Wildfire Hazards	**P38**	Evaluate the potential to reduce forest fuel loading through the removal of smaller trees to reduce forest floor fuel buildup and ladder fuels.
	P39	Prepare wildland fire response plans and include suppression activities, first responders, mutual aid agreements, as well as detailed maps of infrastructure and sensitive resources to be avoided.
	P40	Prohibit activities that have a high risk of sparking fires during periods of extreme fire hazard.
	P41	Close open space areas of particular concern during extreme fire weather, as determined by San Mateo Consolidated Fire Department, and increase patrol levels where appropriate.
	P42	Consider use of a grazing program to reduce grassland fuels, brush encroachment, and encourage the vigor of native grass and forb species.
	P43	Manage scrub, shrub, and chaparral communities to maintain a mosaic of ages and species within strategic management corridors on roads, ridgetops, and near residential development or other critical infrastructure to compartmentalize preserves and reduce fuel loads.
	P44	Minimize and reduce ground disturbance, erosion, and rehabilitation efforts associated with heavy machinery fire suppression.
	P45	Develop guidelines for post-fire appropriate rehabilitation measures to address erosion, revegetation, invasive species, trail and road stability, security, public safety, and natural and cultural resources.
	P46	Limb fallen trees/branches to reduce aerial fuels along trails.**
NH-2: Protect Life and Property	**P47**	Manage dead and dying trees to limit wind throw and falling trees and limbs.
	P48	Manage severe erosion areas on hill slopes and near/within streams.
	P49	Respond to trail and open space impacts resulting from severe weather, landslides, or other natural events.
NH-3: Improve Cooperative Planning	**P50**	Participate in county Fire Safe Councils and any relevant Community Wildfire Protection Plan (CWPP) efforts.
	P51	Partner with abutting property owners to manage adjacent vegetation and fuel levels.
	P52	Work with PG&E to identify areas where wildlife risks could be reduced through increased vegetation management and/or transmission line undergrounds.

**Policies came from the Habitat Protection Emphasis Alternative. **Policies came from the Recreation Emphasis Alternative.*

4.2.3 Recommendations

Below are recommended actions based on the City's goals, public input, and the environmental and recreation assessments in Chapters 2 and 3. Recommendations are designed to accomplish one or more of the policies laid out in the preceding tables. Relevant policies are referenced by the policy number and the notation "P#". Each recommendation has been categorized using the Easy, Medium, and Hard designations and color-coding in the scale below to estimate the feasibility and ease of implementation. The feasibility designation scale incorporates two aspects by which a recommendation can be evaluated: the operational capacity of the City's existing programs, funding, and staff to implement the action, and the scope of the action. Both of these aspects are considered as a spectrum.

Easy	Medium	Hard
These actions can be performed immediately under existing City programs, funding, or with minimal additional effort.	These actions require additional planning, equipment, staffing, funding – either internal or external, or other operational changes.	These actions may require substantial planning, interagency coordination, staffing, funding, or other operational changes.

To provide a brief example, in Table 4.7, providing educational materials on Sudden Oak Death (SDO) is categorized as an "Easy" action because recreation related SDO materials already exist and can be installed with minimal effort by existing staff or volunteers. In Table 4.8, designating existing connection routes or building new trails between open space areas is categorized as a "Medium" action because it would require planning outside of normal City operations, likely require additional funding and coordination with other agencies. In Table 4.9, inventory open space lands to assess fuel loads is considered a "Hard" action because it would require additional planning, funding, and expertise outside of normal City operations as well as likely be an ongoing need, requiring permanent resources.

Table 4.7. Environmental Sustainability Actions

Easy	Medium	Hard
1. Provide educational materials on Sudden Oak Death (SOD) and information about how to minimize the spread of SOD at high use trailheads. (P5) 2. To the extent possible, avoid vegetation management activities during nesting bird season, February 1 to August 31. If nesting bird season cannot be avoided, conduct nesting bird surveys per CDFW guidance. (P9) 3. Temporarily close trails during extremely wet conditions. Temporary closure periods will be determined by City staff based on evaluation of conditions and forecasted weather patterns. (P13) 4. Prohibition of dogs in water bodies. Dogs are not allowed to enter any water bodies, including streams and marshes, on open space lands. Messaging and signage and education should be developed. (P13) 5. Avoid ground disturbing activities like trail maintenance and construction activities prior to rain events. (P13) 6. Engage volunteer groups to monitor plant and wildlife species using citizen science efforts like Audubon Christmas Bird Count or "bio-blitzes." (P5/P10)*	1. Realign, add drainage, or otherwise improve trail sections identified in the Recreation Use Assessment as having "high" erosion levels. The Rambler Trail was identified as a top priority given its severity. Prioritize other trail segments for improvement and incorporate into a multi-year workplan. (P13/P26) 2. Implement an "early detection and response" protocol as defined in the Environmental Assessment, to monitor and control new or spreading exotic or undesirable species. Create an agreement and work plan with existing volunteer groups to perform the work in accordance with the protocol. (P6/P16) 3. Actively seek additional funding sources to support natural resource management. (P17) 4. Restore and expand native bunchgrass areas. (P2/P6/P18)* 5. Install wildlife cameras at high activity locations or in riparian habitats to monitor wildlife presence. Coordinate with local agencies and non-profits (e.g. Felidae) to share wildlife camera data to support wildlife distribution study regionally. (P7/P17)* 6. Install decontamination stations at high use trailheads to prevent the spread of SOD. (P5)*	1. Periodically inventory trails and facilities to assess any impacts to watercourses, riparian areas, and wetlands, and prepare plans for protection or restoration, as appropriate. (P3) 2. Conduct protocol surveys for sensitive wildlife or plant species, as defined by the USFWS or CDFW, in areas where these species have at least moderate potential to occur, whenever conducting ground disturbing activities. (P2) 3. Improve trail stream crossings by either realigning the trail to prevent crossing the stream altogether or elevating the trail over the stream. (P3/P4/P9/P13)

**Actions came from the Habitat Protection Emphasis Alternative. **Actions came from the Recreation Emphasis Alternative.*

Table 4.8. Balanced Recreation Actions

Easy	Medium	Hard
1. Increase education and enforcement of open space regulations including dogs on leash, speed limits, amplified sound, etc. (P23/P32) 2. Periodically conduct visitor surveys to gauge experiences for all trail users. (P22) 3. Clearly identify property boundaries of open space lands and develop an education and enforcement program for adjacent landowners conducting illegal modifications to open space lands (e.g. building trails to access open space lands from their house or neighborhood). (P28) 4. Develop a standard trail naming policy for designated trails. The naming policy will be adopted on all open space signage and messaging. (P29) 5. Update regulatory signage at trailheads to use a consistent design across City open space lands. (P24)	1. Designate existing connection routes or build new trails between open space areas and to other adjacent protected lands. (P30/P35)** 2. Implement single-use and one-way trail segments in areas identified in the Recreation Use Assessment following sufficient public outreach. (P21)** 3. Evaluate potential new nature-based recreation programming for open space lands. Specifically, collaborate with environmental educators or other groups to develop a series of docent led nature walks for a variety of audiences. (P22/P23)** 4. Incorporate or decommission trails identified in the Recreation Use Assessment following further public outreach. (P20) 5. Decommission redundant trail segments. Conduct de-compaction and revegetation where needed. (P1/P20) 6. Develop a policy for managing organized group use of open space lands, such as camps, school field trips, and exercise classes. (P23) 7. Identify three trail segments that can be made ADA compliant which offer the following visitor experiences: travel along a ridgeline, travel along a canyon floor, and panoramic views. (P19)	1. Implement an e-bike pilot program similar to existing regulations on nearby Midpeninsula Regional Open Space District. The City will observe the effects of the pilot to determine if additional studies, outreach, and policies are needed. (P21/P23) 2. Add calming features on trails to reduce speed, and add landings for respite, passing, and vistas. (P20/P31)

**Actions came from the Habitat Protection Emphasis Alternative. **Actions came from the Recreation Emphasis Alternative.*

Table 4.9. Natural Hazard Mitigation Actions

Easy	Medium	Hard
1. Widen existing fuel breaks and treated wildland-urban-interface areas. (P47)* 2. Trim trees and mow or remove invasive species ladder fuels along trails to maintain tree health and minimize crown fire. (P38)* 3. Continue fuel reduction treatments in previously treated areas in WDL. (P38)	1. Remove invasive Acacia trees which pose a significant threat of casting embers during fire. (P38)* 2. Create "islands" of vegetation by thinning in steepest areas and fuel breaks to break up crown fires and reduce potential erosion and preserve habitat. (P43)* 3. Remove invasive species from areas recently cleared for fuel reduction. (P38)* 4. Develop annual fuel reduction treatment plan. (P39) 5. Encourage neighboring property owners to maintain adequate fire clearance around existing development. Consult with regulatory agencies to encourage that construction of new development maintains fire agency recommended setbacks for fire clearance between new development and City forest and woodland. (P51) 6. Actively seek additional funding sources to support wildfire hazard mitigation. (P38/P39) 7. Develop emergency response plan for extreme weather, landslides, and resulting trail impacts. (P49)	1. Inventory City open space lands to assess fuel loads and forest structure related to fire. Identify access issues and City and community or regional fire concerns. (P38) 2. Conduct a field-based evaluation of fuel conditions in SJC and WDL for possible further fuel reduction treatments. (P38) 3. Coordinate with fire agencies and neighboring communities to identify locations where additional fire suppression infrastructure is desirable and practical (e.g. hydrants, water tanks, helicopter zones, safety zones, fuel breaks, consistent with the incident command system. Work cooperatively with these groups to install needed infrastructure. (P39/P51)

**Actions came from the Habitat Protection Emphasis Alternative. **Actions came from the Recreation Emphasis Alternative.*

4.2.4. Priorities

The easy-hard rating system for the recommendations listed above is aimed at providing City officials with more information regarding the level of effort and investment needed to enact these changes. Some actions are deemed to be priorities regardless of their rating as easy-medium-hard. These priority actions have been separated into two tiers where Tier 1 contains actions that are the highest priority due to laws protecting species and habitats, visitor and regional wildfire safety, or important visitor experiences. The actions in this category are important for the City to address right away. Tier 2 contains priority actions aimed at diversity and equity objectives and policies. The actions in this category are important to address soon but are less urgent than those in Tier 1.

Tier 1: Habitat Protection, Wildfire Safety, and Visitor Experience

Environmental Sustainability

- **Stream Crossing Improvements:** WRA identified multiple stream crossings requiring improvements and prioritized the top seven crossings most in need of improvements.
- **Seasonal / Weather Dependent Restrictions on Maintenance Activities:** Ensure that the City's routine trail maintenance actions avoid nesting bird season to the extent possible, and avoid working in wet weather conditions (emergencies excepted) to the extent feasible.

Balanced Recreation Use

- **Monitor Use and Survey Visitors During E-Bike Pilot:** Take an approach similar to what Midpeninsula Regional Open Space District has done to develop a policy for e-bike use. The district studied use levels and visitor responses for a year before making policy recommendations to their Planning and Natural Resource Committee.
- **ADA-Compliant Trails:** Identify three trail segments that offer distinctive recreation experiences and ensure those segments comply with the California State Parks Accessibility Guidelines. One segment will offer the experience to travel along a ridgeline, another segment will offer an experience to travel along a canyon floor, and a third segment will offer opportunities for panoramic views.

Natural Hazard Mitigation

- **Fuels Reduction Plan:** The fuels reduction plan would prioritize fuel break areas to be treated as shown and Figures 2.4 and 2.5, and would highlight additional areas that would benefit from fuels reduction.

Tier 2: Equity-Based Programs and Visitor Experience

Environmental Sustainability

- **Volunteer Restoration Programs:** These programs which have been informally carried out would be codified and respond to the interests and actions of environmentally focused community members.

Balanced Recreation Use

- **Nature-Based Recreation Programs:** Respond to the community's interest in environmental education with focused programs that, among other things, may reinforce support for protecting the two open space areas and create "citizen scientists."
- **Trail Calming Features:** Implement trail calming features in targeted locations to respond to community comments about feeling some sections of trails are unsafe due to blind turns, steep slopes, narrow trails, or a combination of all three.

DRAFT

5.0 Glossary

Objective	An objective is an overarching statement that articulates a desired outcome.
Policy	A policy is a more specific statement to help City staff achieve a desired outcome.
Recommendation	A recommendation is a discrete, measurable action that achieves a desired outcome.
Monitoring	Periodically collect data/information to track changes over time.
Riparian	Riparian areas are defined as the vegetative and wildlife areas adjacent to perennial and intermittent streams and other freshwater bodies, such as lakes, ponds, and reservoirs.
Habitat Network	The configuration of patches of habitat allowing species dispersal through a landscape.
Habitat	The combination of living and non-living factors which contains suitable living conditions for a species within the range of that species.
Disturbance	(Ecological) The disruption of an ecosystem's structure and function, generally with effects that last for time periods longer than a single seasonal growing cycle for vegetation.
Restoration	The process of returning land that has been degraded and disturbed into functional habitat.
Native	Those elements of the natural world occurring within an ecosystem prior to disturbance from an outside event.
Non-native	Species which moved into, or were introduced into, pre-serve environments as a direct or indirect result of human activities.
Fuel reduction	The removal of combustible vegetation to reduce the amount of flammable material to prevent or reduce the spread of wildfire.
Invasive species	Animal or plant species that take over sufficiently large areas to reduce biodiversity.
Wildfire hazard mitigation	Action taken to reduce or eliminate long-term risk to people and their property from hazards such as proximity of flammable vegetation, dead or dying tree limbs, or pollution or contamination in close proximity to homes or public facilities.
Best management practice	The preferred manner in which an activity is to be performed in order to be protective of both human health and the environment.
Natural resource management	Natural resource management generally consists of protecting, restoring, enhancing, and monitoring native vegetation and wildlife, and monitoring and protecting the quality of geological and hydrological conditions.

ATTACHMENT A– SPECIES OBSERVED DURING MARCH 2022 SITE VISITS

Attachment A-1. Wildlife species observed during March 2022 site visits.

Scientific name	Common Name	Status
Birds		
Callipepla californica	California quail	No status
Calypte anna	Anna's hummingbird	No status
Melospiza melodia	Song sparrow	No status
Melozone crissalis	California towhee	No status
Pipilo maculatus	Spotted towhee	No status
Regulus calendula	Ruby-crowned kinglet	No status
Cathartes aura	Turkey vulture	No status
Spinus psaltria	Lesser goldfinch	No status
Haemorhous mexicanus	House finch	No status
Cyanocitta stelleri	Steller's jay	No status
Aphelocoma californica	California scrub jay	No status
Colaptes auratus	Northern flicker	No status
Buteo lineatus	Red-shouldered hawk	No status
Toxostoma redivivum	California thrasher	No status
Junco hyemalis	Dark-eyed junco	No status
Corvus brachyrhynchos	American crow	No status
Chamaea fasciata	Wrentit	No status
Mergus merganser	Common merganser	No status
Anas platyrhynchos	Mallard	No status
Mammals		
Odocoileus hemionus	Black-tailed mule deer	No status
Reptiles and Amphibians		
Sceloporus occidentalis	Western fence lizard	No status
N/A	Pond turtle	Unknown

Conium maculatum	Poison hemlock	non-native (invasive)	perennial herb	-	Moderate	FACW
Cortaderia sp.	-	-	-	-	-	-
Cotoneaster sp.	-	-	-	-	-	-
Deschampsia danthonioides	Annual hairgrass	native	annual grass	-	-	FACW
Diplacus aurantiacus	Sticky monkeyflower	native	shrub	-	-	FACU
Dipterostemon capitatus	Blue dicks	native	perennial herb	-	-	FACU
Dirca occidentalis	Western leatherwood	native	shrub	Rank 1B.2	-	FAC
Eriodictyon californicum	Yerba santa	native	shrub	-	-	-
Eriogonum nudum	Naked buckwheat	native	shrub	-	-	-
Erodium botrys	Big heron bill	non-native	annual herb	-	-	FACU
Eucalyptus globulus	Blue gum	non-native (invasive)	tree	-	Limited	-
Festuca californica	California fescue	native	perennial grass	-	-	FACU
Foeniculum vulgare	Fennel	non-native (invasive)	perennial herb	-	High	-
Galium californicum	California bedstraw	native	perennial herb	-	-	-
Galium parisiense	Wall bedstraw	non-native	annual herb	-	-	UPL
Galium sp.	-	-	-	-	-	-
Genista monspessulana	French broom	non-native (invasive)	shrub	-	High	-
Geranium dissectum	Wild geranium	non-native (invasive)	annual herb	-	Limited	-
Heracleum maximum	Common cowparsnip	native	perennial herb	-	-	FACW

Scientific Name	Common Name	Origin	Form	Rarity Status	CAL-IPC Status	Wetland Status (AW 2020)
Heteromeles arbutifolia	Toyon	native	shrub	-	-	-
Hordeum murinum	Foxtail barley	non-native (invasive)	annual grass	-	Moderate	FACU
Juncus effusus	Common bog rush	native	perennial grasslike herb	-	-	FACW
Juncus sp.	-	-	-	-	-	-
Lasthenia californica	Goldfields	native	annual herb	-	-	FACU
Lonicera hispidula	Pink honeysuckle	native	vine, shrub	-	-	FACU
Lupinus succulentus	Arroyo lupine	native	annual herb	-	-	-
Lysimachia arvensis	Scarlet pimpernel	non-native	annual herb	-	-	FAC
Maianthemum stellatum	Starry false lily of the valley	native	perennial herb	-	-	FACU
Malva sp.	-	-	-	-	-	-
Marah fabacea	California man-root	native	perennial herb, vine	-	-	-
Matricaria discoidea	Pineapple weed	native	annual herb	-	-	FACU
Medicago polymorpha	Bur clover	non-native (invasive)	annual herb	-	Limited	FACU
Melica torreyana	Torrey's melica	native	perennial grass	-	-	-
Oxalis pes-caprae	Bermuda buttercup	non-native (invasive)	perennial herb	-	Moderate	-
Pedicularis densiflora	Indian warrior	native	perennial herb	-	-	-
Pentagramma triangularis	Gold back fern	native	fern	-	-	-
Phalaris aquatica	Harding grass	non-native (invasive)	perennial grass	-	Moderate	FACU
Pinus sp.	-	-	-	-	-	-
Plantago lanceolata	Ribwort	non-native (invasive)	perennial herb	-	Limited	FAC
Prunus virginiana var. demissa	Western choke cherry	native	tree, shrub	-	-	FAC

Scientific Name	Common Name	Origin	Form	Rarity Status	CAL-IPC Status	Wetland Status (AW 2020)
Quercus agrifolia	Coast live oak	native	tree	-	-	-
Ribes sanguineum var. glutinosum	Flowering currant	native	shrub	-	-	UPL
Ribes speciosum	Fuchsia flowered gooseberry	native	shrub	-	-	-
Rubus ursinus	California blackberry	native	vine, shrub	-	-	FAC
Salix sp.	-	-	-	-	-	-
Sambucus nigra ssp. caerulea	Blue elderberry	native	shrub	-	-	FACU
Sanicula crassicaulis	Pacific sanicle	native	perennial herb	-	-	-
Scirpus sp.	-	-	-	-	-	-
Scrophularia californica	California bee plant	native	perennial herb	-	-	FAC
Sonchus asper ssp. asper	Prickly sow thistle	non-native	annual herb	-	-	FAC
Stellaria media	Chickweed	non-native	annual herb	-	-	FACU
Stipa pulchra	Purple needle grass	native	perennial grass	-	-	-
Stipa sp.	-	-	-	-	-	-
Symphoricarpos albus var. laevigatus	Common snowberry	native	shrub	-	-	FACU
Toxicodendron diversilobum	Poison oak	native	vine, shrub	-	-	FACU
Trifolium dubium	Shamrock	non-native	annual herb	-	-	UPL
Trillium sp.	-	-	-	-	-	-
Typha sp.	-	-	-	-	-	-
Umbellularia californica	California bay	native	tree	-	-	FAC
Urtica dioica	Stinging nettle	native	perennial herb	-	-	FAC
Vicia sativa	Spring vetch	non-native	annual herb, vine	-	-	FACU
Vinca major	Vinca	non-native (invasive)	perennial herb	-	Moderate	FACU

- All species identified using the *Jepson eFlora* [Jepson Flora Project (eds.) 2022]; nomenclature follows *Jepson eFlora* [Jepson Flora Project (eds.) 2022]

[1] **California Native Plant Society. 2022. Inventory of Rare and Endangered Plants (online edition, v9-01 1.5). Sacramento, California. Online at: http://rareplants.cnps.org/; most recently accessed: March 2022**

FE:	Federal Endangered
FT:	Federal Threatened
SE:	State Endangered
ST:	State Threatened
SR:	State Rare
Rank 1A:	Plants presumed extinct in California
Rank 1B:	Plants rare, threatened, or endangered in California and elsewhere
Rank 2:	Plants rare, threatened, or endangered in California, but more common elsewhere
Rank 3:	Plants about which we need more information – a review list
Rank 4:	Plants of limited distribution – a watch list

[2] **California Invasive Plant Council. 2022. California Invasive Plant Inventory Database. California Invasive Plant Council, Berkeley, CA. Online at: http://www.cal-ipc.org/paf/; most recently accessed: April 2022**

High:	Severe ecological impacts; high rates of dispersal and establishment; most are widely distributed ecologically.
Moderate:	Substantial and apparent ecological impacts; moderate-high rates of dispersal, establishment dependent on disturbance; limited-moderate distribution ecologically
Limited:	Minor or not well documented ecological impacts; low-moderate rate of invasiveness; limited distribution ecologically
Assessed:	Assessed by Cal-IPC and determined to not be an existing current threat

OBL:	Almost always found in wetlands
FACW:	Usually found in wetlands
FAC:	Equally found in wetlands and uplands
FACU:	Usually not found in wetlands
UPL:	Almost never found in wetlands
NL:	Not listed, assumed almost never found in wetlands
NI:	No information; not factored during wetland delineation

ATTACHMENT B – SPECIAL STATUS SPECIES FOR WATERDOG LAKE AND OPEN SPACE AND SAN JUAN CANYON OPEN SPACE STUDY AREA

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
Plants			
San Mateo thorn-mint	FE, SE, Rank 1B.1	chaparral, valley and foothill grassland. Elevation ranges from 165 to 985 feet (50 to 300 meters). Blooms Apr-Jun.	**Unlikely.** Although chaparral and valley and foothill grassland habitats are present within the Study Area, no serpentine vertisol clay microhabitat is present.
Blasdale's bent grass	Rank 1B.2	coastal bluff scrub, coastal dunes, coastal prairie. Elevation ranges from 0 to 490 feet (0 to 150 meters). Blooms May-Jul.	**No Potential.** Suitable habitat is not present within Study Area.
Franciscan onion	Rank 1B.2	cismontane woodland, valley and foothill grassland. Elevation ranges from 170 to 1000 feet (52 to 305 meters). Blooms (Apr)May-Jun.	**Present.** Cismontane woodland and valley and foothill grassland habitats are present within the Study Area, and there are CNDDB occurrences in both SJC and WDL open space.
bent-flowered fiddleneck	Rank 1B.2	cismontane woodland, coastal bluff scrub, valley and foothill grassland. Elevation ranges from 10 to 1640 feet (3 to 500 meters). Blooms Mar-Jun.	**Moderate Potential.** Cismontane woodland and valley and foothill grassland habitats are present within the Study Area. Four CNDDB occurrences are documented within 1.5 miles northwest of the Study Area.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
California androsace	Rank 4.2	chaparral, cismontane woodland, coastal scrub, meadows and seeps, pinyon and juniper woodland, valley and foothill grassland. Elevation ranges from 490 to 4280 feet (150 to 1305 meters). Blooms Mar-Jun.	**Unlikely.** The Study Area is outside of the known range of this species.
coast rockcress	Rank 4.3	broadleafed upland forest, coastal bluff scrub, coastal prairie, coastal scrub. Elevation ranges from 10 to 3610 feet (3 to 1100 meters). Blooms Feb-May.	**Unlikely.** Although broadleafed upland forest and coastal scrub habitats are present within the Study Area, rocky microhabitat is not present to support this species.
Anderson's manzanita	Rank 1B.2	broadleafed upland forest, chaparral, north coast coniferous forest. Elevation ranges from 195 to 2495 feet (60 to 760 meters). Blooms Nov-May.	**Unlikely.** Although broadleafed upland forest and chaparral habitats are present within the Study Area, no redwood forest microhabitat is present.
Franciscan manzanita	FE, Rank 1B.1	coastal scrub. Elevation ranges from 195 to 985 feet (60 to 300 meters). Blooms Feb-Apr.	**Unlikely.** Although coastal scrub habitat is present within the Study Area, no serpentine outcrop microhabitat is present.
San Bruno Mountain manzanita	SE, Rank 1B.1	chaparral, coastal scrub. Elevation ranges from 900 to 1215 feet (275 to 370 meters). Blooms Feb-May.	**No Potential.** The Study Area is outside of the known range of this species; this species is restricted to the San Bruno Mountain in San Mateo County.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
Presidio manzanita	FE, SE, Rank 1B.1	chaparral, coastal prairie, coastal scrub. Elevation ranges from 150 to 705 feet (45 to 215 meters). Blooms Feb-Mar.	**Unlikely.** Although coastal scrub habitat is present within the Study Area, no serpentine outcrop microhabitat is present.
Montara manzanita	Rank 1B.2	chaparral, coastal scrub. Elevation ranges from 260 to 1640 feet (80 to 500 meters). Blooms Jan-Mar.	**No Potential.** The Study Area is outside of the known range of this species.
Pacific manzanita	SE, Rank 1B.1	chaparral, coastal scrub. Elevation ranges from 1085 to 1085 feet (330 to 330 meters). Blooms Feb-Apr.	**No Potential.** The Study Area is outside of known range of this species; this species is restricted to the San Bruno Mountain in San Mateo County.
Kings Mountain manzanita	Rank 1B.2	broadleafed upland forest, chaparral, north coast coniferous forest. Elevation ranges from 1000 to 2395 feet (305 to 730 meters). Blooms Dec-Apr.	**No Potential.** The Study Area is outside of the expected elevation range of this species.
ocean bluff milk-vetch	Rank 4.2	coastal bluff scrub, coastal dunes. Elevation ranges from 10 to 395 feet (3 to 120 meters). Blooms Jan-Nov.	**No Potential.** Suitable habitat is not present within Study Area.

DRAFT

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
coastal marsh milk-vetch	Rank 1B.2	coastal dunes, coastal scrub, marshes and swamps. Elevation ranges from 0 to 100 feet (0 to 30 meters). Blooms (Apr)Jun-Oct.	**Unlikely.** Although coastal scrub habitat is present within the Study Area, no mesic sites in dune or along streams/coastal salt marsh microhabitats are present.
alkali milk-vetch	Rank 1B.2	playas, valley and foothill grassland, vernal pools. Elevation ranges from 5 to 195 feet (1 to 60 meters). Blooms Mar-Jun.	**Unlikely.** Although valley and foothill grassland habitat is present within the Study Area, no alkali flats/flooded land/vernal pool microhabitat is present.
Brewer's calandrinia	Rank 4.2	chaparral, coastal scrub. Elevation ranges from 35 to 4005 feet (10 to 1220 meters). Blooms (Jan)Mar-Jun.	**Unlikely.** Although chaparral and coastal scrub habitats are present within the Study Area, and loamy soil microhabitat is also present in both open spaces, this species is typically found within recently disturbed (because of fire) sites. The nearest CNPS occurrence is 1 mile southeast of the WDL, and the last observation date was in 1973 in a recently burned area.
Oakland star-tulip	Rank 4.2	broadleafed upland forest, chaparral, cismontane woodland, lower montane coniferous forest, valley and foothill grassland. Elevation ranges from 330 to 2295 feet (100 to 700 meters). Blooms Mar-May.	**Unlikely.** Although broadleafed upland forest and valley and foothill grassland habitats are present within the Study Area, no serpentine microhabitat is present.
pink star-tulip	Rank 4.2	coastal prairie, coastal scrub, meadows and seeps, north coast coniferous forest. Elevation ranges from 35 to 3510 feet (10 to 1070 meters). Blooms Apr-Jun.	**Moderate Potential.** Coastal scrub and meadows and seep habitat are present within the Study Area, along with seasonally moist meadows and forested habitats. The nearest occurrences are 5 miles to the northwest, within the Crystal Springs reservoir recreation area.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
bristly sedge	Rank 2B.1	coastal prairie, marshes and swamps, valley and foothill grassland. Elevation ranges from 0 to 2050 feet (0 to 625 meters). Blooms May-Sep.	**Unlikely.** Although marshes and swamps are present within the Study Area along WDL margins, the nearest extant CNDDB occurrence is over 30 miles south.
johnny-nip	Rank 4.2	coastal bluff scrub, coastal prairie, coastal scrub, marshes and swamps, valley and foothill grassland, vernal pools. Elevation ranges from 0 to 1425 feet (0 to 435 meters). Blooms Mar-Aug.	**Unlikely.** The Study Area is outside of the known range of this species.
Congdon's tarplant	Rank 1B.1	valley and foothill grassland. Elevation ranges from 0 to 755 feet (0 to 230 meters). Blooms May-Oct(Nov).	**Unlikely.** Although the Study Area contains valley and foothill grassland habitat, it does not contain the microhabitat of alkaline clay soils needed to support this species.
pappose tarplant	Rank 1B.2	chaparral, coastal prairie, marshes and swamps, meadows and seeps, valley and foothill grassland. Elevation ranges from 0 to 1380 feet (0 to 420 meters). Blooms May-Nov.	**Unlikely.** Although the Study Area contains chaparral, meadows and seeps, and valley and foothill grassland habitat, it does not contain the microhabitat of alkaline-vernally mesic needed to support this species.
Point Reyes salty bird's-beak	Rank 1B.2	marshes and swamps. Elevation ranges from 0 to 35 feet (0 to 10 meters). Blooms Jun-Oct.	**No Potential.** The Study Area does not contain coastal salt marsh

DRAFT

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
San Francisco Bay spineflower	Rank 1B.2	coastal bluff scrub, coastal dunes, coastal prairie, coastal scrub. Elevation ranges from 10 to 705 feet (3 to 215 meters). Blooms Apr-Jul(Aug).	**Unlikely.** Although coastal scrub habitat is present within the Study Area, no microhabitats containing sandy soil on terraces and slopes are present.
robust spineflower	FE, Rank 1B.1	chaparral, cismontane woodland, coastal dunes, coastal scrub. Elevation ranges from 10 to 985 feet (3 to 300 meters). Blooms Apr-Sep.	**Unlikely.** The Study Area is outside of the known range of this species.
Franciscan thistle	Rank 1B.2	broadleafed upland forest, coastal bluff scrub, coastal prairie, coastal scrub. Elevation ranges from 0 to 490 feet (0 to 150 meters). Blooms Mar-Jul.	**Unlikely.** The Study Area is outside the known range of the species.
fountain thistle	FE, SE, Rank 1B.1	chaparral, cismontane woodland, meadows and seeps, valley and foothill grassland. Elevation ranges from 150 to 575 feet (45 to 175 meters). Blooms (Apr)May-Oct.	**Unlikely.** Although chaparral, cismontane woodland, meadows and seeps, and valley and foothill grassland habitats are present within the Study Area, microhabitat of serpentine seeps were not observed within the Study Area.
compact cobwebby thistle	Rank 1B.2	chaparral, coastal dunes, coastal prairie, coastal scrub. Elevation ranges from 15 to 490 feet (5 to 150 meters). Blooms Apr-Jun.	**Unlikely.** Although chaparral and coastal scrub habitat is present within the Study Area, dune and clay soil microhabitat is not present to support this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
lost thistle	Rank 1A		**No Potential.** Suitable habitat is not present within Study Area.
round-headed Chinese-houses	Rank 1B.2	coastal dunes. Elevation ranges from 0 to 65 feet (0 to 20 meters). Blooms Apr-Jun.	**No Potential.** Suitable habitat is not present within Study Area.
San Francisco collinsia	Rank 1B.2	closed-cone coniferous forest, coastal scrub. Elevation ranges from 100 to 900 feet (30 to 275 meters). Blooms (Feb)Mar-May.	**Present.** Coastal scrub habitat and moist, shady scrub or forest microhabitat is located within the Study Area boundary; there is one CNDDB occurrence in SJC and two CNDDB occurrences in WDL Open Space.
clustered lady's-slipper	Rank 4.2	lower montane coniferous forest, north coast coniferous forest. Elevation ranges from 330 to 7990 feet (100 to 2435 meters). Blooms Mar-Aug.	**No Potential.** Suitable habitat is not present within Study Area.
western leatherwood	Rank 1B.2	broadleafed upland forest, chaparral, cismontane woodland, closed-cone coniferous forest, north coast coniferous forest, riparian forest, riparian woodland. Elevation ranges from 80 to 1395 feet (25 to 425 meters). Blooms Jan-Mar(Apr).	**Present.** Western leatherwood has several CNDDB occurrences within WDL and was observed during trail and habitat assessment surveys in March.
California bottle-brush grass	Rank 4.3	broadleafed upland forest, cismontane woodland, north coast coniferous forest, riparian woodland. Elevation ranges from 50 to 1540 feet (15 to 470 meters). Blooms May-Aug(Nov).	**Moderate Potential.** Broadleafed upland forest, cismontane woodland, and riparian forest habitats are located within the Study Area, and microhabitats of sandy humus soils are also present to support this species. The nearest CNPS occurrence is 2 miles to the northeast.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
San Mateo woolly sunflower	FE, SE, Rank 1B.1	cismontane woodland, coastal scrub, lower montane coniferous forest. Elevation ranges from 150 to 1085 feet (45 to 330 meters). Blooms May-Jun.	**Moderate Potential.** Cismontane woodland and coastal scrub habitats are located within the Study Area, and microhabitats of roadcuts are also present. The nearest CNDDB occurrence is 1.5 miles to the northwest, along a road.
Hoover's button-celery	Rank 1B.1	vernal pools. Elevation ranges from 10 to 150 feet (3 to 45 meters). Blooms (Jun)Jul(Aug).	**No Potential.** Suitable habitat is not present within Study Area.
Jepson's coyote-thistle	Rank 1B.2	valley and foothill grassland, vernal pools. Elevation ranges from 10 to 985 feet (3 to 300 meters). Blooms Apr-Aug.	**No Potential.** Suitable habitat is not present within Study Area.
San Francisco wallflower	Rank 4.2	chaparral, coastal dunes, coastal scrub, valley and foothill grassland. Elevation ranges from 0 to 1805 feet (0 to 550 meters). Blooms Mar-Jun.	**Unlikely.** Although chaparral and coastal scrub habitats are present within the Study Area, no serpentine soils/outcrop microhabitat is present.
Hillsborough chocolate lily	Rank 1B.1	cismontane woodland, valley and foothill grassland. Elevation ranges from 490 to 490 feet (150 to 150 meters). Blooms Mar-Apr.	**Unlikely.** Although valley and foothill grassland habitat is present within the Study Area, no serpentine soils/outcrop microhabitat is present.
fragrant fritillary	Rank 1B.2	cismontane woodland, coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 10 to 1345 feet (3 to 410 meters). Blooms Feb-Apr.	**Unlikely.** Although coastal scrub and valley and foothill grassland habitats are present within the Study Area, no serpentine soils/outcrop microhabitat is present.
blue coast gilia	Rank 1B.1	coastal dunes, coastal scrub. Elevation ranges from 5 to 655 feet (2 to 200 meters). Blooms Apr-Jul.	**No Potential.** The Study Area is outside of the known range of this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
dark-eyed gilia	Rank 1B.2	coastal dunes. Elevation ranges from 5 to 100 feet (2 to 30 meters). Blooms Apr-Jul.	**No Potential.** Suitable habitat is not present within Study Area.
San Francisco gumplant	Rank 3.2	coastal bluff scrub, coastal scrub, valley and foothill grassland. Elevation ranges from 50 to 1310 feet (15 to 400 meters). Blooms Jun-Sep.	**Unlikely.** Although coastal scrub and valley and foothill grassland habitats are present within the Study Area, no serpentine soils/outcrop or sea bluff microhabitat is present.
Diablo helianthella	Rank 1B.2	broadleafed upland forest, chaparral, cismontane woodland, coastal scrub, riparian woodland, valley and foothill grassland. Elevation ranges from 195 to 4265 feet (60 to 1300 meters). Blooms Mar-Jun.	**No Potential.** The Study Area is outside of the known range of this species.
congested-headed hayfield tarplant	Rank 1B.2	valley and foothill grassland. Elevation ranges from 65 to 1835 feet (20 to 560 meters). Blooms Apr-Nov.	**Unlikely.** Although valley and foothill grassland habitat is located within the Study Area, the nearest documented CNDDB location is over 10 miles to the northwest.
short-leaved evax	Rank 1B.2	coastal bluff scrub, coastal dunes, coastal prairie. Elevation ranges from 0 to 705 feet (0 to 215 meters). Blooms Mar-Jun.	**No Potential.** Suitable habitat is not present within Study Area.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
Marin western flax	FT, ST, Rank 1B.1	chaparral, valley and foothill grassland. Elevation ranges from 15 to 1215 feet (5 to 370 meters). Blooms Apr-Jul.	**Unlikely.** Although chaparral and valley and foothill grassland habitats are present within the Study Area, no serpentine barrens/grassland microhabitat is present.
water star-grass	Rank 2B.2	marshes and swamps. Elevation ranges from 100 to 4905 feet (30 to 1495 meters). Blooms Jul-Oct.	**No Potential.** The Study Area is outside of the known range of this species.
Loma Prieta hoita	Rank 1B.1	chaparral, cismontane woodland, riparian woodland. Elevation ranges from 100 to 2820 feet (30 to 860 meters). Blooms May-Jul(Aug-Oct).	**Unlikely.** Although chaparral and riparian woodland habitats are present within the Study Area, microhabitats of serpentine soils/outcrop are not present to support this species
Kellogg's horkelia	Rank 1B.1	chaparral, closed-cone coniferous forest, coastal dunes, coastal scrub. Elevation ranges from 35 to 655 feet (10 to 200 meters). Blooms Apr-Sep.	**Unlikely.** Although chaparral and coastal scrub habits are present within the Study Area, microhabitats of old dunes and coastal sandhills are not present to support this species.
Point Reyes horkelia	Rank 1B.2	coastal dunes, coastal prairie, coastal scrub. Elevation ranges from 15 to 2475 feet (5 to 755 meters). Blooms May-Sep.	**Unlikely.** Although coastal scrub habitat is located within the Study Area, microhabitat of sandy flats and dunes near coast are not present to support this species.
harlequin lotus	Rank 4.2	broadleafed upland forest, cismontane woodland, closed-cone coniferous forest, coastal bluff scrub, coastal prairie, coastal scrub, marshes and swamps, meadows and seeps, north coast coniferous forest, valley and foothill grassland. Elevation ranges from 0 to 2295 feet (0 to 700 meters). Blooms Mar-Jul.	**Moderate Potential.** Suitable habitat of broadleafed upland forest, cismontane woodland, coastal scrub, marshes and swamps, and meadows and seeps and microhabitats of wetlands and roadsides are present. The nearest CNDDB

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
			occurrence is approximately 2 miles west of the Study Area.
island tube lichen	Rank 1B.3	chaparral, closed-cone coniferous forest. Elevation ranges from 1180 to 1330 feet (360 to 405 meters).	**No Potential.** The Study Area is below the expected elevation range for this species.
coast iris	Rank 4.2	coastal prairie, lower montane coniferous forest, meadows and seeps. Elevation ranges from 0 to 1970 feet (0 to 600 meters). Blooms Mar-May(Jun).	**Unlikely.** Although meadows and seeps habitats and microhabitat of mesic sites are located within the Study Area, the nearest known occurrence is located approximately 4 miles to the west on the other side of the Upper Crystal Springs Reservoir.
perennial goldfields	Rank 1B.2	coastal bluff scrub, coastal dunes, coastal scrub. Elevation ranges from 15 to 1705 feet (5 to 520 meters). Blooms Jan-Nov.	**Unlikely.** Although coastal scrub habitat is located within the Study Area, microhabitat of dunes along immediate coast is not present to support this species.
Contra Costa goldfields	FE, Rank 1B.1	cismontane woodland, playas, valley and foothill grassland, vernal pools. Elevation ranges from 0 to 1540 feet (0 to 470 meters). Blooms Mar-Jun.	**Unlikely.** Although cismontane woodland and valley and foothill grassland are located within the Study Area, microhabitats of vernal pools, swales, and low depressions are not present to support this species.
beach layia	FE, SE, Rank 1B.1	coastal dunes, coastal scrub. Elevation ranges from 0 to 195 feet (0 to 60 meters). Blooms Mar-Jul.	**Unlikely.** Although suitable habitat of coastal scrub is present within Study Area, microhabitat of sand dunes is not present to support this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
bristly leptosiphon	Rank 4.2	chaparral, cismontane woodland, coastal prairie, valley and foothill grassland. Elevation ranges from 180 to 4920 feet (55 to 1500 meters). Blooms Apr-Jul.	**Moderate Potential.** Chaparral, cismontane woodland, and valley and foothill grassland habitats are located within the Study Area. The nearest CNPS occurrence is 2.5 miles to the west.
serpentine leptosiphon	Rank 4.2	cismontane woodland, coastal scrub, valley and foothill grassland. Elevation ranges from 395 to 3710 feet (120 to 1130 meters). Blooms Mar-Jun.	**Unlikely.** Although cismontane woodland, coastal scrub, and valley and foothill grassland are located within the Study Area, microhabitat of serpentine soils are not present to support this species.
coast yellow leptosiphon	SE, Rank 1B.1	coastal bluff scrub, coastal prairie. Elevation ranges from 35 to 490 feet (10 to 150 meters). Blooms Apr-Jun.	**No Potential.** Suitable habitat is not present within Study Area.
large-flowered leptosiphon	Rank 4.2	cismontane woodland, closed-cone coniferous forest, coastal bluff scrub, coastal dunes, coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 15 to 4005 feet (5 to 1220 meters). Blooms Apr-Aug.	**No Potential.** The Study Area is outside of the known range of this species.
broad-lobed leptosiphon	Rank 4.3	broadleafed upland forest, cismontane woodland. Elevation ranges from 560 to 4920 feet (170 to 1500 meters). Blooms Apr-Jun.	**No Potential.** The Study Area is outside of the known range of this species.
rose leptosiphon	Rank 1B.1	coastal bluff scrub. Elevation ranges from 0 to 330 feet (0 to 100 meters). Blooms Apr-Jul.	**No Potential.** Suitable habitat is not present within Study Area.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
Crystal Springs lessingia	Rank 1B.2	cismontane woodland, coastal scrub, valley and foothill grassland. Elevation ranges from 195 to 655 feet (60 to 200 meters). Blooms Jul-Oct.	**Unlikely.** Although cismontane woodland and coastal scrub are located within the Study Area, microhabitats of grassy slopes on serpentine are not present to support this species.
San Francisco lessingia	FE, SE, Rank 1B.1	coastal scrub. Elevation ranges from 80 to 360 feet (25 to 110 meters). Blooms (Jun)Jul-Nov.	**No Potential.** The Study Area is outside of the known range of this species.
woolly-headed lessingia	Rank 3	broadleafed upland forest, coastal scrub, lower montane coniferous forest, valley and foothill grassland. Elevation ranges from 50 to 1000 feet (15 to 305 meters). Blooms Jun-Oct.	**Unlikely.** Although broadleafed upland forest and valley and foothill grassland habitats are located within the Study Area, microhabitats of clay serpentine soils are not present to support this species.
spring lessingia	Rank 4.3	chaparral, cismontane woodland, lower montane coniferous forest. Elevation ranges from 985 to 7055 feet (300 to 2150 meters). Blooms May-Jul.	**No Potential.** The Study Area is below the expected elevation range for this species.
Ornduff's meadowfoam	Rank 1B.1	meadows and seeps. Elevation ranges from 35 to 65 feet (10 to 20 meters). Blooms Nov-May.	**No Potential.** The Study Area is outside of the known range of this species.
San Mateo tree lupine	Rank 3.2	chaparral, coastal scrub. Elevation ranges from 295 to 1805 feet (90 to 550 meters). Blooms Apr-Jul.	**Unlikely.** Although chaparral and coastal scrub habitats are located within the Study Area, microhabitats of sandy soils and rocky hills are not present to support this species. In addition, most CNDDB occurrences are located in areas with more coastal influence (the western side of the Santa Cruz mountains).

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
arcuate bush-mallow	Rank 1B.2	chaparral, cismontane woodland. Elevation ranges from 50 to 1165 feet (15 to 355 meters). Blooms Apr-Sep.	**Present.** Chaparral and cismontane woodland habitat and gravelly alluvium microhabitats are present within the Study Area, in addition to a documented CNDDB occurrence within WDL as of 2013. This species was not observed during the March 2022 surveys, which was conducted before the bloom period.
northern curly-leaved monardella	Rank 1B.2	chaparral, coastal dunes, coastal scrub, lower montane coniferous forest. Elevation ranges from 0 to 985 feet (0 to 300 meters). Blooms (Apr)May-Jul(Aug-Sep).	**No Potential.** The Study Area is outside of the known range of this species.
woodland woollythreads	Rank 1B.2	broadleafed upland forest, chaparral, cismontane woodland, north coast coniferous forest, valley and foothill grassland. Elevation ranges from 330 to 3935 feet (100 to 1200 meters). Blooms (Feb)Mar-Jul.	**Present.** Suitable habitat of broadleafed upland forest, chaparral, cismontane woodland, and valley and foothill grassland and microhabitat of grassy sites in openings is present to support this species. There is a CNDDB occurrence within/adjacent to WDL; this record was documented in the 70s, and location is approximate, not exact.
white-rayed pentachaeta	FE, SE, Rank 1B.1	cismontane woodland, valley and foothill grassland. Elevation ranges from 115 to 2035 feet (35 to 620 meters). Blooms Mar-May.	**Unlikely.** Although cismontane woodland and valley and foothill grassland are located within the Study Area, microhabitats of soils derived from serpentine bedrock are not present to support this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
Michael's rein orchid	Rank 4.2	chaparral, cismontane woodland, closed-cone coniferous forest, coastal bluff scrub, coastal scrub, lower montane coniferous forest. Elevation ranges from 10 to 3000 feet (3 to 915 meters). Blooms Apr-Aug.	**Unlikely.** Although chaparral, cismontane woodland, and coastal scrub habitats are located within the Study Area, microhabitats of mudstone soils and humus are not present to support this species.
Choris' popcornflower	Rank 1B.2	chaparral, coastal prairie, coastal scrub. Elevation ranges from 10 to 525 feet (3 to 160 meters). Blooms Mar-Jun.	**Moderate Potential.** Chaparral and coastal scrub habitats are located within the Study Area, and microhabitats of mesic sites (and low-lying depressions) are present to support this species. The nearest CNDDB occurrence is approximately 2 miles to the southwest.
Hickman's popcornflower	Rank 4.2	chaparral, closed-cone coniferous forest, coastal scrub, marshes and swamps, vernal pools. Elevation ranges from 50 to 1280 feet (15 to 390 meters). Blooms Apr-Jun.	**No Potential.** The Study Area is outside of the known range of this species.
Oregon polemonium	Rank 2B.2	coastal prairie, coastal scrub, lower montane coniferous forest. Elevation ranges from 0 to 6005 feet (0 to 1830 meters). Blooms Apr-Sep.	**Unlikely.** Although coastal scrub habitat is located within the Study Area, the nearest CNDDB occurrence is over 5 miles to the northwest, on the other side of Crystal Springs Reservoir.
Marin knotweed	Rank 3.1	marshes and swamps. Elevation ranges from 0 to 35 feet (0 to 10 meters). Blooms (Apr)May-Aug(Oct).	**No Potential.** Suitable microhabitat of coastal salt marshes and brackish marshes are not present within Study Area.
Hickman's cinquefoil	FE, SE, Rank 1B.1	closed-cone coniferous forest, coastal bluff scrub, marshes and swamps, meadows and seeps. Elevation ranges from 35 to 490 feet (10 to 149 meters). Blooms Apr-Aug.	**No Potential.** The Study Area is outside of the known range of this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
Lobb's aquatic buttercup	Rank 4.2	cismontane woodland, north coast coniferous forest, valley and foothill grassland, vernal pools. Elevation ranges from 50 to 1540 feet (15 to 470 meters). Blooms Feb-May.	**Unlikely.** Although cismontane woodland and valley and foothill grassland habitats are present within the Study Area, the nearest CNDDB occurrence is approximately 3 miles to the southwest, separated by the 280 freeway.
adobe sanicle	SR, Rank 1B.1	chaparral, coastal prairie, meadows and seeps, valley and foothill grassland. Elevation ranges from 100 to 785 feet (30 to 240 meters). Blooms Feb-May.	**No Potential.** This species is extirpated from the Bay Area.
chaparral ragwort	Rank 2B.2	chaparral, cismontane woodland, coastal scrub. Elevation ranges from 50 to 2625 feet (15 to 800 meters). Blooms Jan-Apr(May).	**Present.** Chaparral, cismontane woodland, and coastal scrub habitats are present within the Study Area, and a there is a CNDDB occurrence within or near WDL.
Scouler's catchfly	Rank 2B.2	coastal bluff scrub, coastal prairie, valley and foothill grassland. Elevation ranges from 0 to 1970 feet (0 to 600 meters). Blooms (Mar-May)Jun-Aug(Sep).	**Unlikely.** Although valley and foothill grassland habitat is present within the Study Area, this species typically occurs in coastal areas west of the Santa Cruz mountains.
San Francisco campion	Rank 1B.2	chaparral, coastal bluff scrub, coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 100 to 2115 feet (30 to 645 meters). Blooms (Feb)Mar-Jul(Aug).	**Unlikely.** Although chaparral, coastal scrub, and valley and foothill habitats are present within the Study Area, microhabitats of mudstone or shale soil types are not documented within the Study Area.
long-styled sand-spurrey	Rank 1B.2	marshes and swamps, meadows and seeps. Elevation ranges from 0 to 835 feet (0 to 255 meters). Blooms Feb-May.	**No Potential.** The Study Area is outside of the known range of this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
most beautiful jewelflower	Rank 1B.2	chaparral, cismontane woodland, valley and foothill grassland. Elevation ranges from 310 to 3280 feet (95 to 1000 meters). Blooms (Mar)Apr-Sep(Oct).	**Unlikely.** Although chaparral, cismontane woodland, and valley and foothill grassland habitats are present within the Study Area, microhabitat of serpentine outcrops on ridges and slopes were not observed within the Study Area.
northern slender pondweed	Rank 2B.2	marshes and swamps. Elevation ranges from 985 to 7055 feet (300 to 2150 meters). Blooms May-Jul.	**No Potential.** The Study Area is below the elevation range for this species.
California seablite	FE, Rank 1B.1	marshes and swamps. Elevation ranges from 0 to 50 feet (0 to 15 meters). Blooms Jul-Oct.	**Unlikely.** Although perennial emergent vegetation is present at the fringes of WDL, microhabitat of coastal salt marsh is not present within the Study Area.
two-fork clover	FE, Rank 1B.1	coastal bluff scrub, valley and foothill grassland. Elevation ranges from 15 to 1360 feet (5 to 415 meters). Blooms Apr-Jun.	**Unlikely.** Although valley and foothill grassland habitat and open, sunny microhabitats are present within the Study Area, the nearest CNDDB occurrence is over 12 miles to the northwest.

DRAFT

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
saline clover	Rank 1B.2	marshes and swamps, valley and foothill grassland, vernal pools. Elevation ranges from 0 to 985 feet (0 to 300 meters). Blooms Apr-Jun.	**Unlikely.** Although marshes and swamps and valley and foothill grassland habitats are located within the Study Area, microhabitats of alkaline soils are not present to support this species.
San Francisco owl's-clover	Rank 1B.2	coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 35 to 525 feet (10 to 160 meters). Blooms Apr-Jun.	**Unlikely.** Although coastal scrub and valley and foothill grassland are present within the Study Area, the nearest known occurrence on CNDDB was recorded in 1950 and located within the Crystal Springs reservoir.
coastal triquetrella	Rank 1B.2	coastal bluff scrub, coastal scrub. Elevation ranges from 35 to 330 feet (10 to 100 meters).	**No Potential.** The Study Area is outside of the known range of this species.
Methuselah's beard lichen	Rank 4.2	broadleafed upland forest, north coast coniferous forest. Elevation ranges from 165 to 4790 feet (50 to 1460 meters).	**No Potential.** The Study Area is outside of the known range of this species.
Wildlife			
tricolored blackbird *Agelaius tricolor*	ST, SSC, RP	Nearly endemic to California, where it is most numerous in the Central Valley and vicinity. Highly colonial, nesting in dense aggregations over or near freshwater in emergent growth or riparian thickets. Also uses flooded agricultural fields. Abundant insect prey near breeding areas essential.	**Unlikely.** Dense stands of emergent vegetation are limited within the Study Area to around WDL. This isolated patch of vegetation and distance from source populations makes it unlikely for a colony to establish.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
golden eagle *Aquila chrysaetos*	CFP	Occurs year-round in rolling foothills, mountain areas, sage-juniper flats, and deserts. Cliff-walled canyons provide nesting habitat in most parts of range; also nests in large trees, usually within otherwise open areas.	**Unlikely.** No rocky cliffs or canyons are present to support nesting by this species. May periodically fly over the Study Area.
great blue heron *Ardea herodias*	none (breeding sites protected by CDFW)	Year-round resident. Nests colonially or semi-colonially in tall trees and on cliffs, also sequested terrestrial substrates. Breeding sites usually in close proximity to foraging areas: marshes, lake margins, tidal flats, and rivers. Forages primarily on fishes and other aquatic prey, also smaller terrestrial vertebrates.	**Unlikely.** No breeding sites located in the vicinity of the Study Area.
short-eared owl *Asio flammeus*	SSC	Occurs year-round, but primarily as a winter visitor; breeding very restricted in most of California. Found in open, treeless areas (e.g., marshes, grasslands) with elevated sites for foraging perches and dense herbaceous vegetation for roosting and nesting. Preys mostly on small mammals, particularly voles.	**Unlikely.** Grasslands that would support this species are generally not present within the Study Area. May occasionally disperse through or fly over the Study Area.
long-eared owl *Asio otus*	SSC	Occurs year-round in California. Nests in trees in a variety of woodland habitats, including oak and riparian, as well as tree groves. Requires adjacent open land with rodents for foraging, and the presence of old nests of larger birds (hawks, crows, magpies) for breeding.	**Unlikely.** Forest/grassland matrix is generally not present within the Study Area to support this species.
burrowing owl *Athene cunicularia*	SSC	Year-round resident and winter visitor. Occurs in open, dry grasslands and scrub habitats with low-growing vegetation, perches and abundant mammal burrows. Preys upon insects and small vertebrates. Nests and roosts in old mammal burrows, most commonly those of ground squirrels.	**Unlikely.** Areas of ground squirrel burrowing activity were not observed within the Study Area. The Study Area is generally forested or contains dense scrub/shrub cover, and thus does not provide suitable habitat for burrowing owl.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
marbled murrelet *Brachyramphus marmoratus*	FT, SE	Predominantly coastal marine. Nests in old-growth coniferous forests up to 30 miles inland along the Pacific coast, from Eureka to Oregon border, and in Santa Cruz/San Mateo Counties. Nests are highly cryptic, and typically located on platform-like branches of mature redwoods and Douglas firs. Forages on marine invertebrates and small fishes.	**No Potential.** No old-growth coniferous forests in the Study Area.
western snowy plover *Charadrius nivosus (alexandrines) nivosus*	FT, SSC, RP	Federal listing applies only to the Pacific coastal population. Year-round resident and winter visitor. Occurs on sandy beaches, salt pond levees, and the shores of large alkali lakes. Nests on the ground, requiring sandy, gravelly or friable soils.	**No Potential.** No beaches or large alkali lakes within the Study Area.
black tern *Chlidonias niger*	SSC	(Nesting colony) freshwater lakes, ponds, marshes and flooded agricultural fields. At coastal lagoons and estuaries during migration. Breeding range reduced. Breeds primarily in Modoc Plateau region, with some breeding in Sacramento and San Joaquin Valleys.	**No Potential.** No suitable nesting substrates are available for this species within the Study Area.
northern harrier *Circus hudsonius (cyaneus)*	SSC	Year-round resident and winter visitor. Found in open habitats including grasslands, prairies, marshes and agricultural areas. Nests on the ground in dense vegetation, typically near water or otherwise moist areas. Preys on small vertebrates.	**Unlikely.** Typical nesting habitat for this species is scarce within the Study Area. WDL constitutes the only water body, and the vegetation around this lake is either too tall or too scant to provide suitable nesting areas for northern harrier.
olive-sided flycatcher *Contopus cooperi*	SSC	Summer resident. Typical breeding habitat is montane coniferous forests. At lower elevations, also occurs in wooded canyons and mixed forests and woodlands. Often associated with forest edges. Arboreal nest sites located well off the ground.	**Moderate Potential.** Mixed forests are common within the Study Area and could support nesting by this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
yellow rail *Coturnicops noveboracensis*	SSC	Summer resident in eastern Sierra Nevada in Mono County, breeding in shallow freshwater marshes and wet meadows with dense vegetation. Also a rare winter visitor along the coast and other portions of the state. Extremely cryptic.	**No Potential.** The Study Area is outside of the known range of this species.
white-tailed kite *Elanus leucurus*	CFP	Year-round resident in coastal and valley lowlands with scattered trees and large shrubs, including grasslands, marshes and agricultural areas. Nests in trees, of which the type and setting are highly variable. Preys on small mammals and other vertebrates.	**Moderate Potential.** While this species is generally observed in closer proximity to San Francisco Bay, higher elevation areas characterized by small trees interspersed with grasses and low shrubs could provide nesting or foraging habitat for this species.
American peregrine falcon *Falco peregrinus anatum*	FD, SD, CFP	Year-round resident and winter visitor. Occurs in a wide variety of habitats, though often associated with coasts, bays, marshes and other bodies of water. Nests on protected cliffs and also on man-made structures including buildings and bridges. Preys on birds, especially waterbirds. Forages widely.	**Unlikely.** Cliffs or large manmade structures that could support nesting by this species are absent within the Study Area. May be observed flying over or foraging within the Study Area.
San Francisco common yellowthroat *Geothlypis trichas sinuosa*	SSC	Resident of the San Francisco Bay region, in fresh and salt water marshes. Requires thick, continuous cover down to water surface for foraging; tall grasses, tule patches, willows for nesting.	**Moderate Potential.** Dense emergent vegetation around WDL could support nesting by this species. May also be found in dense willow thickets in riparian areas.
bald eagle *Haliaeetus leucocephalus*	FD, SE, CFP	Occurs year-round in California, but primarily a winter visitor; breeding population is growing. Nests in large trees in the vicinity of larger lakes, reservoirs and rivers. Wintering habitat somewhat more variable but usually features large concentrations of waterfowl or fish.	**Unlikely.** Large trees or structures directly adjacent to large water bodies are not present within the Study Area. May be seen flying over or foraging within the Study Area given the proximity of Crystal Springs Reservoir.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
California black rail *Laterallus jamaicensis coturniculus*	ST, CFP	Year-round resident in marshes (saline to freshwater) with dense vegetation within four inches of the ground. Prefers larger, undisturbed marshes that have an extensive upper zone and are close to a major water source. Extremely secretive and cryptic.	**Unlikely.** Marsh habitats are extremely limited within the Study Area, and are exclusive to the small patch of emergent vegetation around WDL.
Alameda song sparrow *Melospiza melodia pusillula*	SSC	Year-round resident of salt marshes bordering the south arm of San Francisco Bay. Inhabits primarily pickleweed marshes; nests placed in marsh vegetation, typically shrubs such as gumplant.	**No Potential.** The Study Area is outside of the known range of this species.
black-crowned night heron *Nycticorax nycticorax*	none (breeding sites protected by CDFW)	Year-round resident. Nests colonially, usually in trees but also in patches of emergent vegetation. Rookery sites are often on islands and usually located adjacent to foraging areas: margins of lakes and bays.	**Unlikely.**
California Ridgway's (clapper) rail *Rallus obsoletus obsoletus*	FE, SE, CFP	Year-round resident in tidal marshes of the San Francisco Bay estuary. Requires tidal sloughs and intertidal mud flats for foraging, and dense marsh vegetation for nesting and cover. Typical habitat features abundant growth of cordgrass and pickleweed. Feeds primarily on molluscs and crustaceans.	**No Potential.** The study Area does not contain salt marsh habitats to support this species.
black skimmer *Rynchops niger*	SSC	Found primarily in southern California; South San Francisco Bay has a small resident population. Nests colonially on gravel bars, low islets, and sandy beaches	**No Potential.** The Study Area does not contain sandy beaches or gravel bars for this species to nest on.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
California least tern *Sternula antillarum browni*	FE, SE, CFP	Summer resident along the coast from San Francisco Bay south to northern Baja California; inland breeding also very rarely occurs. Nests colonially on barren or sparsely vegetated areas with sandy or gravelly substrates near water, including beaches, islands, and gravel bars. In San Francisco Bay, has also nested on salt pond margins.	**No Potential.** The Study Area does not contain sandy beaches or gravel bars for this species to nest on.
pallid bat *Antrozous pallidus*	SSC, WBWG High	Found in a variety of habitats ranging from grasslands to mixed forests, favoring open and dry, rocky areas. Roost sites include crevices in rock outcrops and cliffs, caves, mines, and also hollow trees and various manmade structures such as bridges, barns, and buildings (including occupied buildings). Roosts must protect bats from high temperatures. Very sensitive to disturbance of roosting sites.	**Unlikely.** Wooded habitats dominate the Study Area, which may provide foraging but are unlikely to provide roost habitats for this species.
Townsend's big-eared bat *Corynorhinus townsendii*	SSC, WBWG High	Associated with a wide variety of habitats from deserts to higher-elevation mixed and coniferous forests. Females form maternity colonies in buildings, caves and mines, and males roost singly or in small groups. Foraging typically occurs at edge habitats near wooded areas, e.g. along streams.	**Unlikely.** Wooded habitats dominate the Study Area, which may provide foraging but are unlikely to provide roost habitats for this species.
Steller (=Northern) sea lion *Eumetopias jubatus*	FD, MMC SSC	Breeds on Año Nuevo, San Miguel and Farallon islands, Point Saint George, and Sugarloaf. Hauls-out on islands and rocks. Needs haul-out and breeding sites with unrestricted access to water, near aquatic food supply and with no human disturbance.	**No Potential.** The Study Area does not contain any coastal beaches.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
hoary bat *Lasiurus cinereus*	WBWG Medium	Prefers open forested habitats or habitat mosaics, with access to trees for cover and open areas or habitat edges for feeding. Roosts in dense foliage of medium to large trees. Feeds primarily on moths.	**Moderate Potential.** Forested habitats within the Study Area could provide roosting habitat for this species.
fringed myotis *Myotis thysanodes*	WBWG High	Associated with a wide variety of habitats including dry woodlands, desert scrub, mesic coniferous forest, grassland, and sage-grass steppes. Buildings, mines and large trees and snags are important day and night roosts.	**Unlikely.** Wooded habitats dominate the Study Area, which may provide foraging but are unlikely to provide roost habitats for this species.
San Francisco dusky-footed woodrat *Neotoma fuscipes annectens*	SSC	Forest habitats of moderate canopy and moderate to dense understory. Also in chaparral habitats. Constructs nests of shredded grass, leaves, and other material. May be limited by availability of nest-building materials.	**Present.** Numerous woodrat houses were observed during 2022 site visits. This species is assumed to be present variously throughout the Study Area.
big free-tailed bat *Nyctinomops macrotis*	SSC, WBWG med-high	Occurs rarely in low-lying arid areas. Requires high cliffs or rocky outcrops for roosting sites.	**Unlikely.** Wooded habitats dominate the Study Area, which may provide foraging but are unlikely to provide roost habitats for this species.
mountain lion *Puma concolor*	CDFW Candidate	Diverse habitat types including temperate redwood forest, coniferous/deciduous forest, coastal chaparral, foothills and mountains.	**Moderate Potential.** Forested and chaparral habitats exist within the Study Area.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
salt-marsh harvest mouse *Reithrodontomys raviventris*	FE, SE, CFP	Endemic to emergent salt and brackish wetlands of the San Francisco Bay Estuary. Pickleweed marshes are primary habitat; also occurs in various other wetland communities with dense vegetation. Does not burrow, builds loosely organized nests. Requires higher areas for flood escape.	**No Potential.** No salt marsh habitats are present within the Study Area to support this species.
Alameda Island mole *Scapanus latimanus parvus*	SSC	Known only from Alameda Island. Found in a variety of habitats, especially annual and perennial grasslands. Prefers moist, friable soils. Avoids flooded soils.	**No Potential.** The Study Area is not on Alameda Island.
salt-marsh wandering shrew *Sorex vagrans halicoetes*	SSC	Salt marshes of the south arm of San Francisco Bay. Medium high marsh 6 to 8 feet above sea level where abundant driftwood is scattered among *Salicornia*.	**No Potential.** No salt marsh habitats are present within the Study Area to support this species.
American badger *Taxidea taxus*	SSC	Most abundant in drier open stages of most shrub, forest, and herbaceous habitats, with friable soils. Requires friable soils and open, uncultivated ground. Preys on burrowing rodents.	**Moderate Potential.** Higher elevation areas within the Study Area provide shrub and herbaceous habitats with friable soils that could allow for denning by this species.
Delta smelt *Hypomesus transpacificus*	FT, SE, RP	Lives in the Sacramento-San Joaquin estuary in areas where salt and freshwater systems meet. Occurs seasonally in Suisun Bay, Carquinez Strait and San Pablo Bay. Seldom found at salinities > 10 ppt; most often at salinities < 2 ppt.	**No Potential.** The Study Area is outside of the known breeding range for this species.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
tidewater goby *Eucyclogobius newberryi*	FE, SSC	Brackish water habitats along the California coast from Agua Hedionda Lagoon, San Diego County to the mouth of the Smith River. Found in shallow lagoons and lower stream reaches; requires fairly still but not stagnant water and high oxygen levels.	**No Potential.** No brackish water habitats are present within the Study Area to support this species.
California tiger salamander *Ambystoma californiense*	FE/FT, ST, RP	Populations in Santa Barbara and Sonoma counties currently listed as endangered; threatened in remainder of range. Inhabits grassland, oak woodland, ruderal and seasonal pool habitats. Adults are fossorial and utilize mammal burrows and other subterranean refugia. Breeding occurs primarily in vernal pools and other seasonal water features.	**No Potential.** The Study Area is outside of the known range of this species.
Santa Cruz black salamander *Aneides flavipunctatus niger*	SSC	Climbing salamanders of the genus *Aneides* frequent damp woodlands and are usually found hiding under various debris (i.e. bark, woodrat nests, logs). The Santa Cruz black salamander exists south of the San Francisco Bay and was only recently recognized as a separate and protected species. Santa Cruz black salamander is highly sedentary, preferring to stay hidden under riparian debris. Prey items include millipedes, spiders, and other insects (Stebbins and McGinnis 2012).	**Unlikely.** The Study Area is outside of the known range of this species.
green sea turtle *Chelonia mydas*	FT (west coast populations)	Found in fairly shallow waters inside reefs, bays and inlets with marine grass and algae. Open beaches with a sloping platform and minimal disturbance are required for nesting. This species exhibits high site fidelity.	**No Potential.** There are no coastal beaches within the Study Area.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
California giant salamander *Dicamptodon ensatus*	SSC	Occurs in the north-central Coast Ranges. Moist coniferous and mixed forests are typical habitat; also uses woodland and chaparral. Adults are terrestrial and fossorial, breeding in cold, permanent or semi-permanent streams. Larvae usually remain aquatic for over a year.	**Unlikely**. Few, if any, permanent streams that are likely to remain cool are present within the Study Area to support this species.
Pacific (western) pond turtle *Actinemys marmorata*	SSC	A thoroughly aquatic turtle of ponds, marshes, rivers, streams and irrigation ditches with aquatic vegetation. Require basking sites such as partially submerged logs, vegetation mats, or open mud banks, and suitable upland habitat (sandy banks or grassy open fields) for egg-laying.	**High Potential.** Turtles were observed in WDL, although it was not determined whether the turtles were invasive red-eared sliders (*Trachemys scripta*) or pond turtles. It is highly likely that native turtles could be present.
Alameda whipsnake *Masticophis lateralis euryxanthus*	FT, ST	Inhabits chaparral and foothill-hardwood habitats in the eastern Bay Area. Prefers south-facing slopes and ravines with rock outcroppings where shrubs form a vegetative mosaic with oak trees and grasses and small mammal burrows provide basking and refuge.	**No Potential.** The Study Area is outside of the known breeding range of this species.
California red-legged frog *Rana draytonii*	FT, SSC, RP	Lowlands and foothills in or near permanent sources of deep water with dense, shrubby or emergent riparian vegetation. Requires 11 to 20 weeks of permanent water for larval development. Associated with quiet perennial to intermittent ponds, stream pools and wetlands. Prefers shorelines with extensive vegetation. Disperses through upland habitats after rains.	**Unlikely.** Despite the presence of multiple occurrences around nearby Crystal Springs Reservoir, the Study Area is separated from these occurrences by Interstate 280 which constitutes a complete barrier to dispersal for CRLF. Additionally, no hydrologic connectivity appears to exist between potentially suitable habitats within the Study Area and known source populations.
San Francisco garter snake *Thamnophis sirtalis tetrataenia*	FE, SE, CFP, RP	Vicinity of freshwater marshes, ponds and slow moving streams in San Mateo County and extreme northern Santa Cruz County. Prefers dense cover and water depths of at least one foot. Upland areas near water are also very important.	**Unlikely.** Ponds and perennial streams are limited within the Study Area to support this species. CRLF being unlikely to occur also deprives this species of its chief prey item.

SPECIES	STATUS*	HABITAT	POTENTIAL FOR OCCURRENCE**
vernal pool fairy shrimp *Branchinecta lynchi*	FT, RP	Endemic to the grasslands of the Central Valley, central coast mountains, and south coast mountains, in astatic rain-filled pools. Inhabit small, clear-water sandstone-depression pools and grassed swale, earth slump, or basalt-flow depression pools.	**No Potential.** No vernal pools are present within the Study Area.
San Bruno elfin butterfly *Callophrys mossii bayensis*	FE	Limited to the vicinity of San Bruno Mountain, San Mateo County. Colonies are located on in rocky outcrops and cliffs in coastal scrub habitat on steep, north-facing slopes within the fog belt. Species range is tied to the distribution of the larval host plant, Sedum spathulifolium.	**Unlikely.** The Study Area is outside of the known range of this species.
monarch butterfly *Danaus plexippus*	none (winter roosts protected by CDFW)	Winter roost sites extend along the coast from northern Mendocino to Baja California, Mexico. Roosts located in wind-protected tree groves (eucalyptus, Monterey pine, Monterey cypress), with nectar and water sources nearby.	**Unlikely.** Large stands of trees with the appropriate wind block or thermoregulatory properties to support winter roosting by this species were not observed within the Study Area.
Bay checkerspot butterfly *Euphydryas editha bayensis*	FT, RP	Restricted to native grasslands on outcrops of serpentine soil in the vicinity of San Francisco Bay. *Plantago erecta* is the primary host plant; *Orthocarpus densiflorus* and *O. purpurscens* are the secondary host plants.	**Unlikely.** The Study Area is outside of the known range of this species.
Mission blue butterfly *Icaricia icarioides missionensis*	FE, RP	Inhabits grasslands and coastal chaparral of the San Francisco peninsula and southern Marin County, but mostly found on San Bruno Mountain. Three larval host plants: *Lupinus albifrons*, *L. variicolor*, and *L. formosus*, of which *L. albifrons* is favored.	**Unlikely.** The Study Area is outside of the known range of this species.

FE: Federal Endangered
FT: Federal Threatened
FD: Federal Delisted

RP:	Published Recovery Plan
SE:	State Endangered
ST:	State Threatened
SD:	State Delisted
SR:	State Rare
Rank 1A:	Plants presumed extinct in California
Rank 1B:	Plants rare, threatened, or endangered in California and elsewhere
Rank 2:	Plants rare, threatened, or endangered in California, but more common elsewhere
Rank 3:	Plants about which we need more information – a review list
Rank 4:	Plants of limited distribution – a watch list
CFP:	CDFW Fully Protected Species
SSC:	CDFW Species of Special Concern
MMC SSC:	Marine Mammal Commission Species of Special Concern
WBWG:	Western Bat Working Group Priority Species

DRAFT

ATTACHMENT C – EXAMPLE TRAIL SEGMENT RECOMMENDATIONS

The following locations were identified as priorities for trail improvements based on existing high levels of trail erosion. Implementation of trail improvements may require site review by necessary experts such as hydrologists, geotechnical engineers, or civil engineers.

Location: 37.49919, -122.2958

Recommendation: Drainage feature to convey stream flows, and a single path of travel across the bridge.

Location: 37.49953, -122.2971

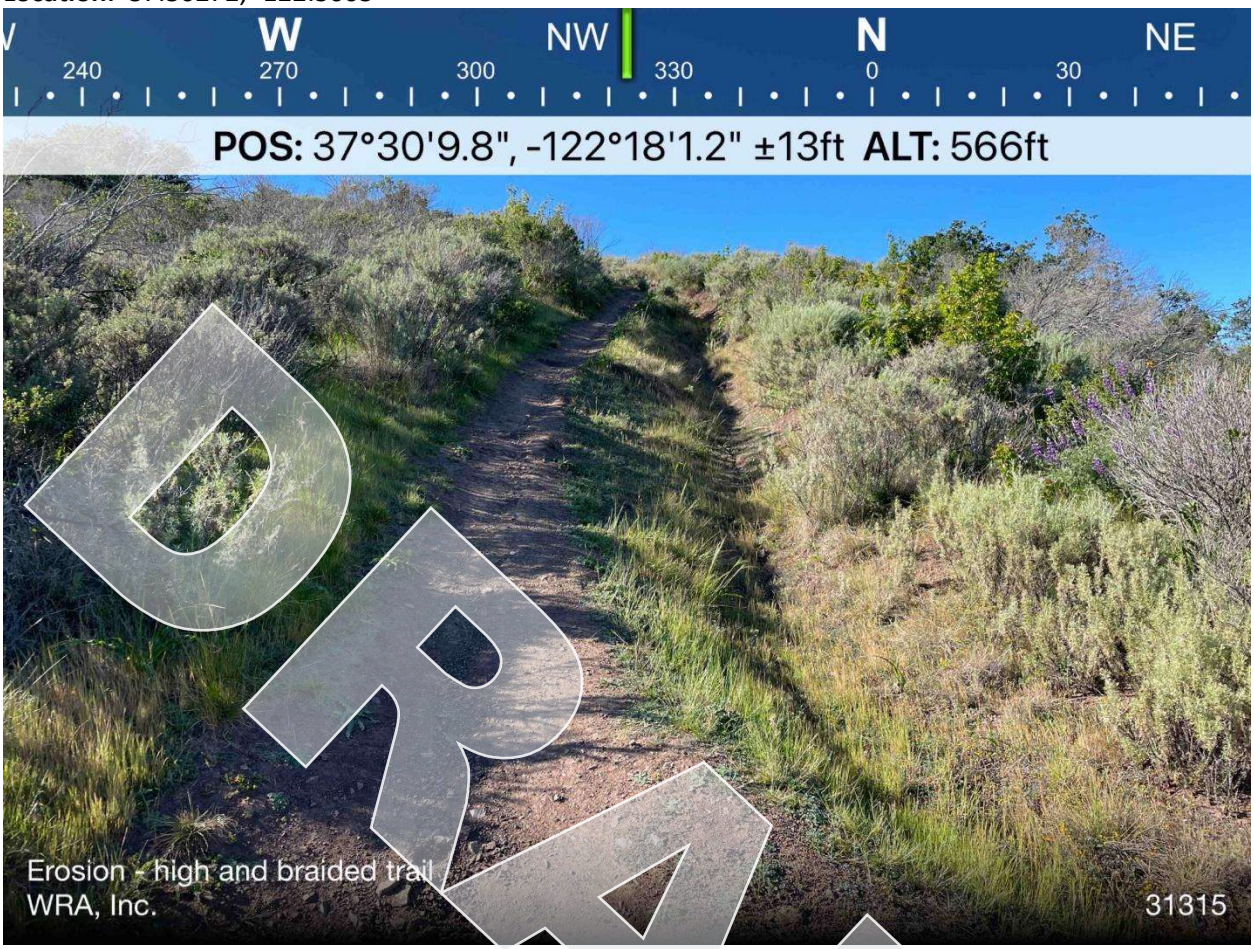
Recommendation: Drainage feature to convey stream flows, and a single path of travel across the bridge.

DRAFT

Location: 37.50067, -122.2967

Recommendation: Narrow the trail tread and re-contour to avoid channelizing storm flows.

DRAFT



Location: 37.50154, -122.2979

Recommendation: Replace existing with a wider bridge, and eliminate the braided trail through the stream channel.

DRAFT

Location: 37.50272, -122.3003

Recommendation: Re-contour to outslope trail tread, and/or add drainage feature to ensure water flows in the ditch instead of the trail.

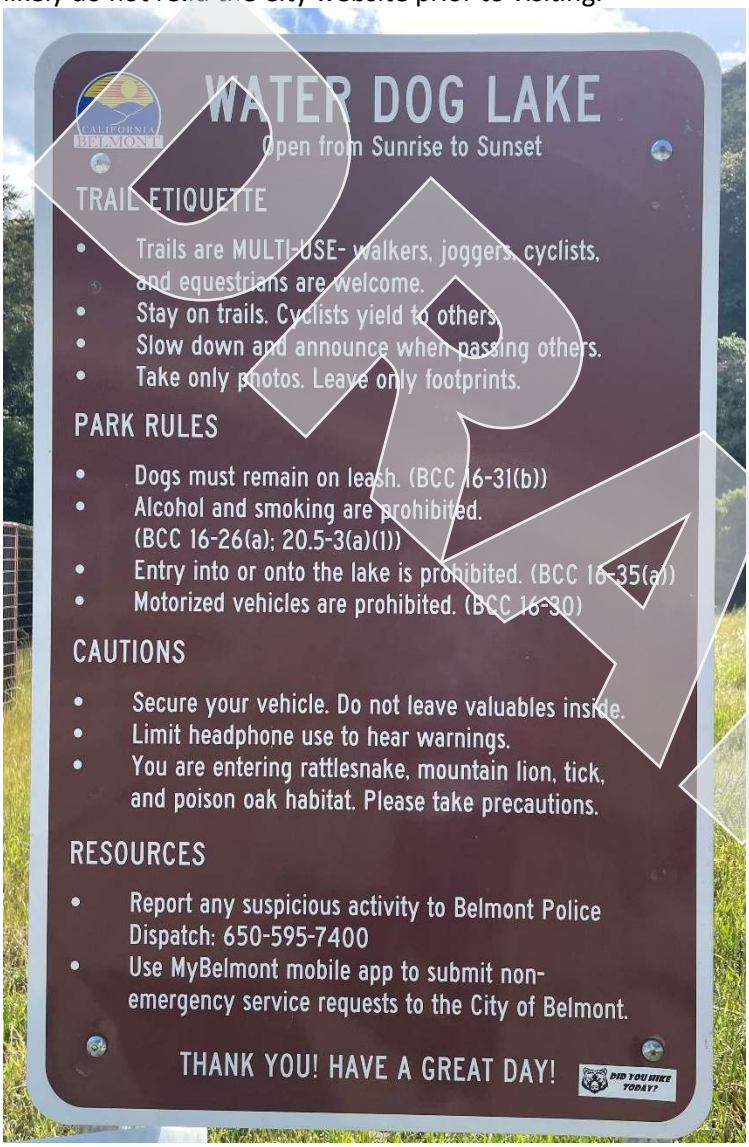
DRAFT

Location: 37.51764, -122.3218

Recommendation: Install puncheon since the areas before and after this stream crossing are frequently muddy.

DRAFT

Location: 37.499898, -122.298454



Recommendation: Close trail segment and install physical barrier to prevent future use. Reroute trail using nearby existing segments.

ATTACHMENT D – EXAMPLE SIGNAGE RECOMMENDATIONS

Specific examples of signage recommendations.

Use consistent naming conventions on all open space messaging. The photo below shows a sign indicating the location as WDL, however, on City trail maps this location is listed on Google as Hidden Canyon Park. This creates confusion for visitors not only trying to access or navigate the site, but also when interpreting regulations and where they may apply. Occasional information such as post-rain closures, and wildfire risk should also be communicated through on-site signage since many local visitors likely do not read the City website prior to visiting.

Use consistent sign design across City open space lands. The photo above and the photo below are both signs containing trail etiquette and regulatory information, but the design is drastically different. This can create confusion for visitors over what is an enforceable regulation and what is not. Different styles of signage also typically indicate different locations.

Use open space identifying signage at trailheads. Site and trail identification are necessary pieces of information at every trailhead. This lets visitors know they are in the right place and helps visitors distinguish designated trailheads from unauthorized access points. The photo below shows what Google labels as the John Brooks Trailhead. However, the signage does not identify the open space by name (WDL and Open Space) nor does it identify the trail by name. It is also recommended that trailheads be equipped with a trail map, trash can with lid, and dog waste bags.

APPENDIX G

PRIORITIZATION MATRIX

PRIORITIZATION MATRIX - TOTAL POINTS						
AMENITIES		POINTS				
PARK Site	AMENITY	GOALS	COMMUNITY PRIORITY	RESOLVE DEFICIENCY	EXISTING CONDITION	SUM
Alexander	Park redesign for proposed park amenities	5	5	12	1	**23**
Alexander	Continue looped walking path around lawn	4	5	3	0	**12**
Alexander	Provide ADA accessible path to existing and new amenities	6	5	6	0	**17**
Alexander	Increase visibility and celebrate the park by enhancing and upgrading the street entrance experience (incorporating art, such as murals, along the entrance access)	4	3	6	0	**13**
Alexander	Resurface and restripe Tennis Court to include Pickleball (completed Summer 2022)	4	3	9	1	**17**
Alexander	Repair/Replace BBQs	1	0	3	2	**6**
Alexander	Add Bocce Ball Court	4	3	6	0	**13**
Alexander	Replace an existing playground with an All-Abilities Playground	3	5	19	0	**27**
Alexander	Increase seating opportunities	3	5	3	0	**11**
Alexander	Monitor Oak tree	4	5	3	2	**14**
Alexander	Enhance existing plantings with native and drought-tolerant species	5	5	3	0	**13**
Alexander	Maintain high-quality landscape condition across the site	3	3	3	0	**9**
Alexander	Expand tree canopy and shade with tree plantings (maintain central lawn without obstruction)	5	5	3	1	**14**
Barrett Cor	Implement the recommendations from the Barrett Community Center Conceptual Design Report (2020)	6	5	6	0	**17**
Barrett Cor	Add seating opportunities	3	5	0	0	**8**
Barrett Cor	Remove fitness equipment on-site to re-use at alternative park location	1	0	0	0	**1**
Barrett Cor	Improve planting near entrance	5	3	0	2	**10**
Barrett Cor	Construct Multi-Use Athletic Field in Conceptual Design Report as synthetic turf	5	0	3	1	**9**
Barrett Cor	Restructure parking size and configuration	1	0	0	0	**1**
Barrett Cor	Add Dog Parklet	3	5	6	0	**14**
Barrett Cor	Add Pool (Water Play)	3	5	3	0	**11**
Barrett Cor	Add Spray Park (Water Play)	3	5	3	0	**11**
Barrett Cor	Relocate and upgrade Playground with inclusive, all-abilities play	4	5	16	1	**26**
Barrett Cor	Construct new Community Center	6	5	13	0	**24**

PRIORITIZATION MATRIX - TOTAL POINTS						
AMENITIES		POINTS				
PARK Site	AMENITY	GOALS	COMMUNITY PRIORITY	RESOLVE DEFICIENCY	EXISTING CONDITION	SUM
Barrett Cor	Consider synthetic turf for Multi-use Athletic Field	5	0	3	0	**8**
Barrett Cor	Relocate multi-use sports court	4	3	0	0	**7**
Barrett Cor	Add picnic area	2	5	0	0	**7**
Barrett Cor	Plant trees to increase shade	5	5	0	0	**10**
Belameda	Add fitness equipment course along existing and extended walking path (Recreation Amenity)	4	5	3	0	**12**
Belameda	Create walking loop extension	4	5	0	0	**9**
Belameda	Increase entrance and connection opportunities to create better park access	4	5	3	1	**13**
Belameda	Add Wi-Fi access to site	6	5	3	0	**14**
Belameda	Create a Teen Outdoor Space to complement offerings at the Belmont Library	3	5	6	0	**14**
Belameda	Continue path to create a walking and learn-to-bike loop in land west of parking lot	6	5	3	0	**14**
Belameda	Increase seating opportunities	3	5	0	0	**8**
Belameda	Consider inclusive, all-abilities play in playground	3	5	6	0	**14**
Belameda	Add native planting near entrance	5	5	0	1	**11**
Belameda	Refresh planting around playground	5	5	0	1	**11**
Belameda	Maintain high-quality landscape condition across the site	3	3	0	0	**6**
Belmont Sp	Add bike repair station	4	3	3	0	**10**
Belmont Sp	Create an accessible Social Gathering Space to promote social interactions	4	5	0	0	**9**
Belmont Sp	Redevelop underutilized space with a Pump Track (Bike Park)	4	5	6	0	**15**
Belmont Sp	Add a Fitness Equipment Course around North Field path	4	5	3	0	**12**
Belmont Sp	Relocate picnic tables	4	0	0	1	**5**
Belmont Sp	Increase seating opportunities	3	5	0	0	**8**
Belmont Sp	Add native planting areas	5	5	0	0	**10**
Belmont Sp	Consider transitioning South Field and Marina Field to synthetic turf	5	0	3	0	**8**
Belmont Sp	Add interpretive signage about marsh and bay ecology	2	3	3	0	**8**
Cipriani	Whole park redesign for better accessibility and space utilization with a Park Master Plan	5	0	0	1	**6**
Cipriani	Formalize dog park entrance from school's parking lot	4	3	3	1	**11**
Cipriani	Create ADA accessible path to all existing and new amenities	6	5	3	0	**14**

PRIORITIZATION MATRIX - TOTAL POINTS						
AMENITIES		POINTS				
PARK Site	AMENITY	GOALS	COMMUNITY PRIORITY	RESOLVE DEFICIENCY	EXISTING CONDITION	SUM
Cipriani	Rebuild entrance stairs, ramp, and pathway from Buena Vista Ave	6	5	3	2	**16**
Cipriani	Establish a Reservable Picnic Area, Small	3	5	0	0	**8**
Cipriani	Upgrade playground structure	3	5	0	1	**9**
Cipriani	Redesign dog park area to better address community needs and surfacing best suited to use	3	5	10	2	**20**
Cipriani	Increase seating opportunities	3	5	0	0	**8**
Cipriani	Consider additional amenities in partnership with adjacent school	4	3	0	0	**7**
Cipriani	Add trees around perimeter of fenced dog park area for shade	5	5	0	0	**10**
Cipriani	Evaluate multi-use flexible lawn for turf improvement	4	0	0	1	**5**
College Vie	Assess paved surface for access and repair/replace as needed	6	5	0	2	**13**
College Vie	Consider creating and interconnected pedestrian and bicycle priority route between College View Park, Semeria Park, and Patricia Wharton Park	4	5	3	0	**12**
College Vie	Explore opportunities to connect to the NDNU Campus	4	3	3	0	**10**
College Vie	Continue to refill wood chips in Playground area periodically	1	0	0	1	**2**
College Vie	Replace benches	4	3	0	2	**9**
College Vie	Add planted area near picnic area	5	5	0	2	**12**
College Vie	Plant trees to increase shade	5	5	0	1	**11**
Davey Glen	Add signage for a walking loop within the park (depicted path on ramp, around lawn, and stairs is 0.1 mile)	4	3	3	0	**10**
Davey Glen	Continue to maintain the high-quality planting across the site	3	3	0	0	**6**
Hallmark	Create seating in shaded area (Multi-purpose Flexible Space)	3	5	0	0	**8**
Hallmark	Whole park redesign for better accessibility and space utilization with a Park Master Plan	5	3	0	2	**10**
Hallmark	Evaluate paths' accessibility and reconstruct as needed	6	5	0	2	**13**
Hallmark	Resurface and restripe Tennis Courts to include Pickleball (completed Spring 2022)	4	3	6	1	**14**
Hallmark	Update, expand, and consider relocating playground structure	3	5	0	1	**9**
Hallmark	Increase seating opportunities	3	5	0	0	**8**
Hallmark	Plant trees to replace declining existing trees across the site (succession planting)	5	5	0	1	**11**
Hallmark	Plant trees to increase shade	5	5	0	1	**11**

APPENDIX H

PROBABLE COSTS

Opinion of Probable Construction Costs	ALEXANDER PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
-. Park redesign for proposed park amenities				
Park design plan (medium-sized park)	1	LS	$ 150,000	$ 150,000
1. Continue looped walking path around lawn				
Site preparation	680	SF	$ 5	$ 3,400
Concrete path (48" wide)	680	SF	$ 25	$ 17,000
2. Provide ADA accessible path to existing and new amenities				
Site preparation	880	SF	$ 5	$ 4,400
Concrete path (48" wide)	880	SF	$ 25	$ 22,000
3. Increase visibility and celebrate the park by enhancing the entrance at the street and upgrade the experience by incorporating art, such as murals, along the entrance access				
Artful park sign	1	EA	$ 25,000	$ 25,000
Mural on fence	1	LS	$ 15,000	$ 15,000
4. Resurface and restripe Tennis Court to include Pickleball (completed Summer 2022)				
Current project, probable cost not included				
5. Repair/Replace BBQs				
Demolish existing BBQ	1	LS	$ 1,000	$ 1,000
BBQ	2	EA	$ 2,500	$ 5,000
6. Add Bocce Ball Court				
Site preparation	1,700	SF	$ 15	$ 25,500
Bocce court	1	EA	$ 200,000	$ 200,000
7. Replace an existing playground with an All-Abilities Playground				
Demolish existing playground	1	LS	$ 25,000	$ 25,000
All-abilities playground structure (medium)	1	LS	$ 750,000	$ 750,000
Playground safety surfacing	2,125	SF	$ 45	$ 95,625
-. Increase seating opportunities *(price per bench)*				
Site preparation	25	SF	$ 5	$ 125
Bench	1	EA	$ 3,500	$ 3,500
Concrete pad	25	SF	$ 25	$ 625
8. Monitor Oak tree				
Arborist visit (park site, annually)				*Conducted by City arborist*
-. Enhance existing plantings with native and drought-tolerant species *(price per 100 SF)*				
Native planting	100	SF	$ 15	$ 1,500
-. Maintain high-quality landscape condition across the site				
Maintenance effort, probable cost not included				
-. Expand tree canopy and shade with tree plantings (maintain central lawn without obstruction) *(price per tree)*				
Tree (24" box)	1	EA	$ 650	$ 650

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	ALEXANDER PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
SUBTOTAL				**$ 1,345,325**
Soft Costs			25%	$ 336,331
Contingency			30%	$ 403,598
PROBABLE CONSTRUCTION COST				**$ 2,085,254**

DRAFT

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	BARRETT COMMUNITY PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
Implement the recommendations from the Barrett Community Center Conceptual Design Report (2020)				
Refer to 2020 Conceptual Design Report				
PROBABLE CONSTRUCTION COST				

DRAFT

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	BELAMEDA PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
f. Add fitness equipment course along existing and extended walking path (Recreation Amenity)				
Site preparation	300	SF	$ 5	$ 1,500
Fitness equipment station	3	EA	$ 15,000	$ 45,000
Concrete pad	300	SF	$ 25	$ 7,500
1. Create walking loop extension				
Site preparation	500	SF	$ 5	$ 2,500
Concrete path (48" wide)	500	SF	$ 25	$ 12,500
-. Increase entrance and connection opportunities to create better park access				
Park sign	1	EA	$ 7,500	$ 7,500
Artful park sign	1	EA	$ 25,000	$ 25,000
-. Add Wi-Fi access to site				
Wi-Fi	1	LS	$ 30,000	$ 30,000
2. Create a Teen Outdoor Space to complement offerings at the Belmont Library				
Site preparation	500	SF	$ 5	$ 2,500
Concrete area pad	500	SF	$ 25	$ 12,500
Alternative seating (seat pads, wall, etc.)	4	EA	$ 4,000	$ 16,000
Picnic Table	2	EA	$ 4,500	$ 9,000
3. Continue path to create a walking and learn-to-bike loop in land west of parking lot				
Site preparation	3,300	SF	$ 5	$ 16,500
Concrete path (72" wide)	3,300	SF	$ 25	$ 82,500
-. Increase seating opportunities *(price per bench)*				
Site preparation	25	SF	$ 5	$ 125
Bench	1	EA	$ 3,500	$ 3,500
Concrete pad	25	SF	$ 25	$ 625
4. Add native planting near entrance				
Native planting	500	SF	$ 15	$ 7,500
Drip irrigation	500	SF	$ 12	$ 6,000
5. Refresh planting around playground				
Native planting	1,500	SF	$ 15	$ 22,500
-. Maintain high-quality landscape condition across the site				
Maintenance effort, probable cost not included				
SUBTOTAL				**$ 310,750**
Soft Costs			25%	$ 77,688
Contingency			30%	$ 93,225
PROBABLE CONSTRUCTION COST				**$ 481,663**

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	BELMONT SPORTS COMPLEX			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
1. Add bike repair station				
Site preparation	100	SF	$ 5	$ 500
Bike repair station	1	EA	$ 5,000	$ 5,000
Concrete pad	100	SF	$ 25	$ 2,500
2. Create an accessible Social Gathering Space to promote social interactions				
Site preparation	4,000	SF	$ 5	$ 20,000
Concrete pad	4,000	SF	$ 25	$ 100,000
Shade structure (small)	1	EA	$ 50,000	$ 50,000
Bench	6	EA	$ 3,500	$ 21,000
Picnic table	4	EA	$ 4,500	$ 18,000
3. Redevelop underutilized space with a Pump Track (Bike Park)				
Site preparation	11,250	SF	$ 5	$ 56,250
Pump track (asphalt surface)	1	LS	$ 500,000	$ 500,000
4. Add a Fitness Equipment Course around North Field path				
Site preparation	300	SF	$ 5	$ 1,500
Fitness equipment station	3	EA	$ 15,000	$ 45,000
Concrete pad	300	SF	$ 25	$ 7,500
5. Relocate picnic tables				
Site preparation	700	SF	$ 5	$ 3,500
Relocate picnic table	1	LS	$ 2,500	$ 2,500
Concrete pad	700	SF	$ 25	$ 17,500
-. Increase seating opportunities *(price per bench)*				
Site preparation	25	SF	$ 5	$ 125
Bench	1	EA	$ 3,500	$ 3,500
Concrete pad	25	SF	$ 25	$ 625
6. Add native planting areas				
Native planting	4,500	SF	$ 15	$ 67,500
Drip irrigation	4,500	SF	$ 12	$ 54,000
7. Consider transitioning South Field and Marina Field to synthetic turf				
South Field - Site preparation	69,000	SF	$5	$ 345,000
South Field - Synthetic sports field turf (base, cork infill, grading, drainage)	69,000	SF	$50	$ 3,450,000
Marina Field - Site preparation	33,000	SF	$5	$ 165,000
Marina Field - Synthetic sports field turf (base, cork infill, grading, drainage)	33,000	SF	$50	$ 1,650,000
8. Add interpretive signage about marsh and bay ecology				
Interpretive signage	3	EA	$ 8,000	$ 24,000

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	CIPRIANI PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
-. Whole park redesign for better accessibility and space utilization with a Park Design Plan				
Park design plan (large-sized park)	1	LS	$ 200,000	$ 200,000
1. Formalize dog park entrance from school's parking lot				
Site preparation	800	SF	$ 5	$ 4,000
Park sign	1	EA	$ 7,500	$ 7,500
Concrete path (48" wide)	800	SF	$ 25	$ 20,000
2. Create ADA accessible path to all existing and new amenities				
Site preparation	860	SF	$ 5	$ 4,300
Concrete path (48" wide)	860	SF	$ 25	$ 21,500
3. Rebuild entrance stairs and pathway from Buena Vista Ave				
Site preparation	2,600	SF	$ 5	$ 13,000
Concrete stair and ramp	1	LS	$ 500,000	$ 500,000
Concrete path (48" wide)	2,000	SF	$ 25	$ 50,000
4. Establish a Reservable Picnic Area, Small				
Site preparation	750	SF	$ 5	$ 3,750
Concrete area pad	750	SF	$ 25	$ 18,750
Accessory furniture for picnic area	1	LS	$ 3,000	$ 3,000
Shade structure (small)	1	EA	$ 50,000	$ 50,000
Picnic table	6	EA	$ 4,500	$ 27,000
5. Upgrade playground structure				
Demolish existing playground	1	LS	$ 25,000	$ 25,000
Playground structure (medium)	1	LS	$ 225,000	$ 225,000
Playground safety surfacing	900	SF	$ 45	$ 40,500
6. Redesign dog park area to better address community needs and surfacing best suited to use				
Demolish existing dog park	1	LS	$ 10,000	$ 10,000
Fence, chain link (6')	750	LF	$ 100	$ 75,000
Pedestrian entry gate	6	EA	$ 5,000	$ 30,000
Synthetic surfacing dog park	26,000	SF	$ 35	$ 910,000
Dog agility furniture	3	EA	$ 1,500	$ 4,500
Dog waste station	3	EA	$ 1,500	$ 4,500
Bench	6	EA	$ 3,500	$ 21,000
Picnic table	4	EA	$ 4,500	$ 18,000
Concrete pad	550	SF	$ 25	$ 13,750
Shade structure (small)	1	EA	$ 50,000	$ 50,000
-. Increase seating opportunities *(price per bench)*				
Site preparation	25	SF	$ 5	$ 125
Bench	1	EA	$ 3,500	$ 3,500
Concrete pad	25	SF	$ 25	$ 625
-. Consider additional amenities in partnership with adjacent school				

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	CIPRIANI PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
7. Add trees around perimeter of fenced dog park area for shade				
Tree (24" box)	3	EA	$ 650	$ 1,950
8. Evaluate multi-use flexible lawn for turf improvement				
Turf evalutation (determine extent of repair)	1	LS	$ 10,000	$ 10,000

PROBABLE CONSTRUCTION COST				**$ 846,765**

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

Opinion of Probable Construction Costs	HIDDEN CANYON PARK			
Item	**Quantity**	**Unit**	**Unit Cost**	**Subtotal**
b. Add seating opportunities (Seating) *(price per bench)*				
Site preparation	25	SF	$ 5	$ 125
Bench	1	EA	$ 3,500	$ 3,500
Concrete pad	25	SF	$ 25	$ 625
c. Add Nature Play Element (Play Amenity)				
Site preparation	1,200	SF	$ 5	$ 6,000
Play element (independent play, swing, etc.)	3	EA	$ 40,000	$ 120,000
Playground safety surfacing	1,200	SF	$ 45	$ 54,000
d. Add a small and shaded Picnic Areas (Picnic Opportunity)				
Site preparation	1,500	SF	$ 5	$ 7,500
Concrete area pad	1,500	SF	$ 25	$ 37,500
Accessory furniture for picnic area	2	LS	$ 3,000	$ 6,000
Shade structure (small)	2	EA	$ 50,000	$ 100,000
Picnic table	6	EA	$ 4,500	$ 27,000
e. Add an Outdoor Classroom (Multi-purpose Flexible Space)				
Site preparation	500	SF	$ 5	$ 2,500
Decomposed granite area pad	500	SF	$ 12	$ 6,000
Bench	8	EA	$ 3,500	$ 28,000
-. Whole park design for amenities and accessibility with a Park Design Plan				
Park design plan (medium-sized park)	1	LS	$ 150,000	$ 150,000
1. Add ADA parking stall				
Parking lot ADA striping	*See Recommendation 2. Re-stripe entire lot*			
Signage	1	EA	$ 500	$ 500
2. Increase quantity of parking stalls to better accommodate current parking demand				
Site preparation	3,500	SF	$ 5	$ 17,500
Asphalt paving	3,500	SF	$ 25	$ 87,500
Parking lot striping	1	LS	$ 15,000	$ 15,000
3. Add restroom with water fountain				
Prefabricated restroom	1	LS	$ 500,000	$ 500,000
Restroom utility connection	1	LS	$ 25,000	$ 25,000
4. Add Open Space Gateway Element				
Site preparation	300	SF	$ 5	$ 1,500
Open Space gateway element	1	LS	$ 50,000	$ 50,000
-. Maintain native plantings				
Maintenance effort, probable cost not included				
-. Remove non-native plants				
Maintenance effort, probable cost not included				
-. Add shade (trees or shade structure) to seating areas *(price per tree)*				
Tree (24" box)	1	EA	$ 650	$ 650

Opinion of Probable Construction Costs assumed amenity quantities are for pricing purposes only, and do not imply, affect, or otherwise assume the quantity of improvements that will be implemented at a PROS site.

APPENDIX I

COMMUNITY OUTREACH

ONLINE SURVEY

The online survey was open to the public for the entire month of April 2021. Over 2,800 responses were collected, of which 49 percent were from Belmont residents.

FOCUS GROUPS

In total, over 75 people participated across 11 focus groups. The focus group dates and topic areas were:

- June 3, 2021. Youth + Teen
- June 4, 2021. District + Joint-Use
- June 8, 2021. Seniors
- June 8 + 15, 2021. Dog Owners
- June 24, 2021. Youth Sports
- June 29, 2021. Inclusion
- June 29, 2021. Schools
- October 18, 2021. Hidden Canyon Park
- October 20, 2021. Ralston Ranch Park
- November 18, 2021. Youth Advisory Committee

ADVISORY COMMITTEE PRESENTATIONS

The Advisory Committee consisted of 18 Belmont residents. The members and their bios are listed in Appendix A. The Committee met five times over the PROS Plan project duration.

- March 4, 2021. Project Initiation
- May 13, 2021. Community Input Summary
- September 30, 2021. Park-specific Recommendations
- April 5, 2022. Open Space Management Plan
- May 31, 2022. Open Space Management Plan

PUBLIC PRESENTATIONS

The Parks and Recreation Commission received updates about the PROS Plan from the Parks and Recreation Director on a monthly basis. Several public presentations were provided at various meetings by the consultants.

PARKS AND RECREATION COMMISSION

- February 3, 2021
- June 2, 2021
- November 3, 2021
- May 4, 2022
- July 6, 2022
- January 10, 2024
- February 7, 2024

PLANNING COMMISSION

- April 6, 2021

CITY COUNCIL

- March 9, 2021
- November 23, 2021 (Study Session)
- March 22, 2022
- July 12, 2022
- March 12, 2024 *

** Presentation not included in the Appendix*

PARK-SPECIFIC RECOMMENDATION COMMENTS

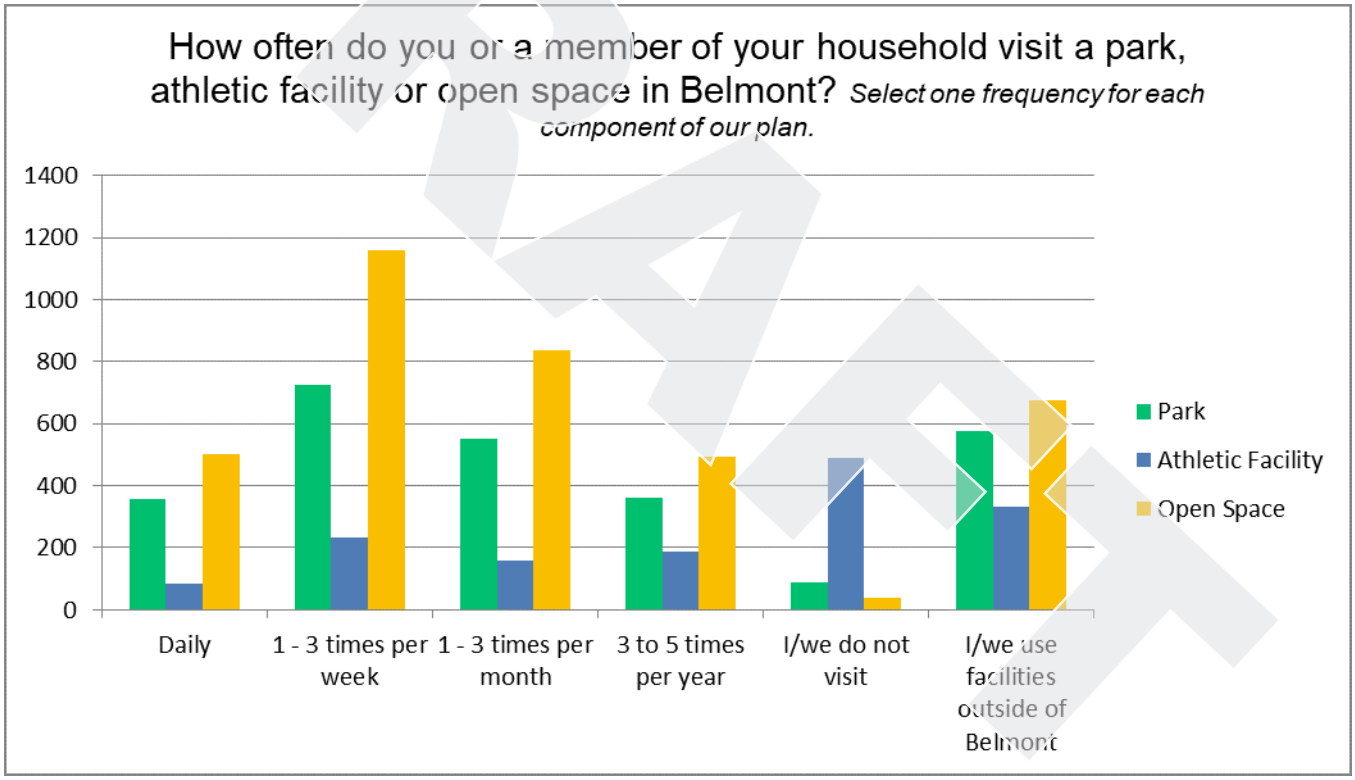
The Park-specific Recommendations were available for public review and comment from September 2021 through March 2022. Approximately 60 comments were collected on the project website.

EMAILS TO INFO@BELMONTPROSPLAN.COM

Over 950 emails were received at the PROS Plan project email address from January 2021 to February 2024. Emails were posted to the project website on a monthly basis.

EMAILS TO PARKS+RECREATION COMMISSION

Over 650 emails were received by the Parks and Recreation Commission about the PROS Plan from November 2020 to February 2024. Emails were posted to the project website on a monthly basis.



ONLINE SURVEY QUESTIONS

QUESTION	QUANTITY OF RESPONSES				
	Total	Resident		Non-resident	
1. How often do you or a member of your household visit a park, athletic facility or open space in Belmont? Select one frequency for each component of our plan.	2,790	1,296	*46.5%*	1,342	*48.1%*
2. What is the typical length of your visit to parks, athletic facilities, and open spaces in Belmont?	2,776	1,290	*46.5%*	1,337	*48.2%*
3. Why do you visit parks, athletic facilities, and open spaces? Check all that apply.	2,795	1,294	*46.3%*	1,345	*48.1%*
4. How do you usually travel to parks, athletic facilities, and open spaces in Belmont? Check all that apply.	2,790	1,294	*46.4%*	1,341	*48.1%*
5. For the parks, athletic facilities, and open spaces you visit in Belmont, please tell us how you would rate the condition of that space? Select all that apply.	2,744	1,273	*46.4%*	1,328	*48.4%*
6. What factors limit your use of our parks, athletic facilities, and open spaces? Check all that apply.	1,575	812	*51.6%*	694	*44.1%*
7. The following amenities or uses would greatly enhance my experience with parks in Belmont.	2,609	1,294	*49.6%*	1,228	*47.1%*
8. The following amenities or uses would greatly enhance my experience with open spaces in Belmont.	2,709	1,267	*46.8%*	1,310	*48.4%*
9. The following programs or activities would greatly enhance my experience with outdoor recreation programs and activities in Belmont.	2,306	1,160	*50.3%*	1,076	*46.7%*
10. What factors limit your participation in outdoor programs and activities offered by the City of Belmont. Check all that apply.	2,159	1,081	*50.1%*	1,027	*47.6%*
11 In which neighborhood do you live? Select one.	2,646	1,298	*49.1%*	1,348	*50.9%*
12. What is your age?	2,733	1,289	*47.2%*	1,347	*49.3%*
13. Do you have children or youth in your household? Check all that apply.	2,711	1,286	*47.4%*	1,333	*49.2%*
14. How would you describe yourself? Check all that apply.	2,670	1,271	*47.6%*	1,313	*49.2%*

ONLINE SURVEY QUESTIONS

Question 1. Other Responses

- Hiking trails throughout the county
- Mid-Penn Open Space
- Children not yet participating in sports
- various open spaces, county parks, state parks
- Once a year
- Edgewood and Pulgas Ridge
- Pacifica open spaces
- Mid pen open space
- MPOSD
- Hidden Canyon
- Bay and coast access
- MPOSD
- 2nd home, North Lake Tahoe and San Mateo Athletic Club
- No dog parks in Belmont
- Edgewood, Sawyer trail, Bay trail
- Highlands Rec - Stanford RC fitness ctr
- Are used to walk at Waterdog on a daily basis but because of the crowds and the bikes, I now go elsewhere. I do this for two hours daily.
- we do not go any more after angry meeting with bike rider on trail
- All over San Mateo county
- I am considering moving to Belmont
- Skeggs, Windy Ridge, Russian Ridge, Mt. Tam, etc
- between 2 kids probably 7 times per week
- Bike trails ,(dirt and paved), BMX PUMPTRACKS
- Mountain bike trails!!
- I am a huge outdoor enthusiast and use our parks, open spaces daily!
- All
- Skeggs
- Bay Meadows
- I am an NDNU alumni and used to use the park twice a week.
- Water Dog Park
- Beaches, Ski Resorts/Areas
- Pulgas Ridge, Stulsaft, Windy Hill, Montara Mountain
- Waterdog Lake Open Space Park & Laurelwood Park
- Centro Chileno Lautaro (a non-profit organization) is extremely fortunate to have found the beautiful, large and secluded Redwood Grove in Belmont Park. Our annual picnic draws the highest attendance in our program and is a highlight in our calendar for many years. We celebrate Nature, a beautiful outdoor space with our multi-generational families, old and new members and friends. We share the barbeque, favorite Chilean foods and wine, music, dance, games and the joy of comradery. Our Scholarship Program also has a special ceremony to present our qualifying university students with their deserving Scholarship Awards at that event. In the past, we have used a smaller, cozy Cabin to host smaller luncheon events as well.
- Tennis and Pickleball
- Bay trail from Ralston to past Oracle 3 times/week
- swimming pool
- Bike routes
- I wish Belmont has a community swimming pool. & athletic facility
- Hiking and walking
- Before the pandemic, I used to attend yoga classes weekly at the lodge through parks and rec. This does not reflect that usage.
- Pickle Ball courts in Foster City
- There are almost no athletic facilities in Belmont, such as tennis courts or swimming pool
- Ice rink
- this is before Covid
- I used parks and athletic field extensively when my children were young
- We walk the Bay Trails
- Pre-pandemic, my 3 kids were playing soccer on the Belmont fields multiple times per week
- Woodside, Portola Valley, Mid Peninsula open space
- Serendipity School will use for outdoor activities
- Filoli, Coyote Point
- Tahoe Donner
- 4-7 times a week
- Mid pen open space, golden gate park
- Barrett community center's outdoor space: daily
- Purisima Creek, El Corte de Madera, Russian Ridge, Foothill
- Waterdog Lake Open Space / Park
- I visit Twin Pines park ~ once a year. I walk past Patricia Wharton Park daily. (The trees are in bloom now!!) Used to go to Cipriani dog park--bad experience with large dog.
- Save waterdog
- Alameda
- Less since the pandemic began and the trails got busier.

ONLINE SURVEY QUESTIONS

QUESTION 2. WHAT IS THE TYPICAL LENGTH OF YOUR VISIT TO PARKS, ATHLETIC FACILITIES, AND OPEN SPACES IN BELMONT?

Resident and Non-Resident Ratings of Parks, Athletic Facilities in Belmont (Unsatisfactory/Satisfactory)

DRAFT

ONLINE SURVEY QUESTIONS

Question 5. Other Responses

- Watershed, cross country trails
- destruction of natural area is through WD/HC; city manages this open space as a bike park and the bikers treat it like that w/illegal trails & arrogant behavior (we built this trail, etc)
- sadly not many parks with swings for kids.
- Fox School field often has mole hills
- I am aware oof waterdog
- Sugarloaf
- Cipriani Dog Park users need to be restricted from running their dogs on the lawn and in the lower park. Frequently I have seen them also on the lawn in front of the school and on the school property. Perhaps put grass or and dog runs in the existing dog area. Too much dog urination and pooping on lawn and in the lower park. People let their dogs run off leash as soon as they get to grass area. This needs to really be addressed. Thank you.
- Notre Dame is private & ive missed wandering up to their Chapel
- I do know most of the park in the area
- I live in East Palo Alto
- Waterdog and Hidden Canyon are the most important and most awesome bike friendly parks for residents around. They are the jewel of our biking community.
- We need dedicated bike trails at Cipriana/dog park
- Keep mountain biking in all open spaces. It is an activity many of us do frequently as our primary means of exercise.
- love to mountain bike in Waterdog
- WE love Twin Pines, it is close to the main roads close to Safeway, centrally located. Parking can be found.
- Education about these parks.... this is the first map i ever saw
- I suggest to prohibit biking in Waterdog trails in the winter or when it's wet. Tire tracks tear up the trails.
- Reference is to problems with biking in Belmont's open space. Need to limit biking or eliminate it entirely.
- Trails beyond Lake road are dangerous and not safe for kids
- See above. We don't use Belmont OS. There are far better options.
- trail markings are confusing and often missing in the waterdog open space
- san juan and waterdog-please leave it natural as is, that's the beauty (especially waterdog, please stop the political flyers being posted in plastic and completely duct taped to the gate and signs!)
- Cipriani lower fields are in disrepair. The grass is never mowed and biting insects attack kids at practices. Ppl constantly take their dogs off leash in the grassy park areas where it's not permitted.
- School fields are riddled with gopher holes. The mounds and holes are just asking for twisted in broken ankles.
- Ralston Ranch and Hidden Canyon Park have been undeveloped for too long! Would like to have parks there!
- undeveloped hidden canyon park should be developed into a pump track or other recreational amenity
- We love the multi-use open space areas, as they are great for the whole family (kids, bikes, dogs, etc.)!
- Sheep Camp trail, rate- unsatisfactory as we appreciate trails where we can bring our dog and ride our bicycles

ONLINE SURVEY QUESTIONS

Factors that Limit Use of Parks, Athletic Facilities, and Open Spaces

ONLINE SURVEY QUESTIONS

Question 6. Other Responses

- Danger from bikes is my biggest concern and tend to go to parks where biking is not allowed
- unsafe road access to the parks - crossing busy streets,
- Tick infestation
- Nothing limits my use of the parks, everything in Belmont is close enough to ride a bike to.
- Bikes make it dangerous for walkers!
- Bikes not allowed at some open space areas - this is unfortunate as trails open to bikes get crowded.
- My only limitations is my time out of the office.
- enjoyment of nature is not possible due to bikers; biking is not compatible with nature hiking which is why it's not allowed anywhere else on the Peninsula
- A Belmont shuttle which goes around to various parks, open space, the library, the train station, and maybe even to downtown san carlos would be great.
- The roads around the parks should have more dedicated bike lanes that are safe for families and kids.
- Lack of benches, particularly for older residents.
- Too many people
- Cyclists and hikers should have separate trails at Waterdog. Hiking at Waterdog can be dangerous because of the cyclists
- I avoid on weekend 1. Many no mask bike riders 2. Disrespectful loud demanding bikers
- I primarily visit the open spaces to ride bikes with my friends and families. I also visit to walk my dogs.
- Nothing really limits me
- Lack of time is primary reason I can't use these facilities
- No factor limit my use. I go to Waterdog often.
- Wild animals scare me having younger kids around.
- Two many bikers on the path, which make me feel not safe.
- keeping open space open is key
- Poison Oak
- Trail user interaction
- Trails need repair/maintenance (and widening in some cases). More signage.
- Signage. Visible reminders a park is there.
- Afraid of fast driving bikes that don't warn you
- Nothing is currently limiting my use
- Water dog: No complaints! Safe, lovely
- Nothing limits my use of the Open Spaces, that is unless the rules change in regards to bicycles...
- I used to work in RW City, so that brought me to Waterdog. I live in SJ, so only visit Waterdog occasionally
- We would like to see more parks/open spaces with off-leash dog trails.
- Crowded with hikers so I try and go early.
- Nothing limits me from enjoying the spaces.
- If I didn't work full time, I would utilize the parks and open space 5-7 days a week
- Waterdog: Small trail system. More of an afterwork destination. Go elsewhere on weekends.
- The high number of people (but this is mostly a COVID reason)
- None of the above.
- Biking not permitted or lack of interesting riding trails
- None of these apply, i am satisfied with the level of attention the space preserve gets
- just not enough trails and access for cycling
- I'd be more likely to use the areas athletic facilities if there was a pool available
- Need more access for dogs
- The lack of respect the hikers have for bikers. I have been riding waterdog since 1992 when it was only a handful of trails. Waterdog trails were built by mountain bikers first. Hiking is great also but it seems like some of these hikers are very disrespectful and rude.
- The parks feel like a safe place to be when you're a biker or a walker.
- Not having access to biking trails
- We like parks much but Waterdog not safe any more
- Nine
- Hostility toward mountain biking and class 1 ebike
- you have completely skipped the elephant in the room which is dog friendly parks. There are extreme limitations on parks that will except dogs off leash - Cipriani is a barren wasteland but at least allows off leash when you can tolerate the burning sun without shelter, Barrett Park is perfect for those slivers of time when people are allowed to bring their dogs into the safety of the fenced in, green space but the times are way too limited and from what I've heard the future plans are to create a mini Cipriani that's basically a dog run and not a park that welcomes dogs.
- I do not make the time to visit these places. It is all my bad; nothing to do with the infrastructure.
- None
- NO Probems
- danger of mt. biking
- Nothing
- Having enough free time to get to the park :-)
- i got stung by a bee once
- my schedule

ONLINE SURVEY QUESTIONS

- I wish there was a local pool I could swim in that was outdoors. Due to Covid, none were available and there haven't been any updates about swimming pool availability to residents.

Question 6. Other Responses (con't)

- Would like to see designated directions on some trails for bike traffic and alternating use on weekend days bike only vs hike only. Some of the parks in Golden, Colorado had bikes only on even weekend days and hikers only on odd days, which helped prevent collisions and allow both types of trail user to utilize the space safely and to their own ability level.
- Have become very crowded during pandemic.
- None
- Bikes don't belong in any natural area! They destroy wildlife habitat!
- None of the above as I use our Parks and Open Spaces all the time.
- Not inclusive to cyclists - especially with kids. This is where we go for fun on bikes.
- UNDERDEVELOPED MOUNTAIN BIKE TRAILS
- Large crowds of maskless hikers in waterdog on single track. Not a lot of space for either group (hikers/bikers) to get out of each other's way
- No factors
- I am only interested in mtn biking in the waterdog hidden canyon area
- COVID
- There are no factors that limit my use of the parks/athletic facilities/open spaces.
- Nothing limits my use of them really
- Happily use spaces when I have time
- Poison oak!
- Nothing
- Bikes are disallowed on most trails.
- Ticks, poison oak and heat in summer
- No limitations
- I very much enjoy the parks, especially mountain biking with my niece and nephew around Water Dog Open Space.
- Poison oak in water dog
- Why are all your choices asked in a negative tone?
- I feel like parks and open space is close, accessible and has adequate facilities for me.
- I have many parks and open spaces that are closer to my home, however waterdog, I will make a special trip to.
- Please keep mountain biking at Waterdog Park
- Too many Mountain Bikes. I am extremely concerned about the increasing amounts of e-bikes destroying the trails
- Nothing limits my use
- not limited at all
- None apply - not limited
- I have no issue with getting to Belmont's open spaces as I live between them and access is easy
- i don't live in belmont so i ride down from sf to waterdog to ride.
- None, I go to water dog lake park and other parks close by, daily
- I come to Waterdog for the singletrack mountain bike trails (I haven't visited the other parks)
- None apply.
- Weather conditions
- We Love wATER dOG pARK ...we hike and bike it ... love the trails and our dog Karma does as well :)
- public pool
- I have gone on my own and with a friend to take a walk and we always feel safe and enjoy our time outdoors.
- softball field at BSC is really under-maintained compared to the baseball field
- We need more tennis court.
- Granting reservations to sports teams during days & time appropriate for seniors without authorization and notice to immediate residents.
- I would love to see more safe biking areas available for younger children, particularly in the open spaces.
- Nothing. I am pleased with this great resource of me and my family.
- Dogs not allowed in many places. No public restrooms at school fields.
- do not feel I have any limitations
- Dangerous mountain bikers
- More than anything the open space at Hidden Canyon has been ruined by biking. This is a serious issue.
- Tennis courts ar Hallamark park are woefully need resurfacing and the fencing repaired.
- Congestion on Ralston near El Camino and near Notre Dame can be a huge deterrent depending on time of day
- Pets not allowed
- Off-leash dogs and dog poop in parks and school fields
- I enjoy the ooen space and do not feel limited
- I've not been going to Water Dog Lake and some of the other trails because there have been so many people there during the pandemic
- Don't feel limited in use!

ONLINE SURVEY QUESTIONS

- Poison ivy/oak
- Restrooms there but ICK or inoperable
- No limitations! I love our parks open for all activities, even those that I do not do such as biking
- The open spaces are wonderful for biking
- At times walking is scary becuz of mountain bikes on same paths.
- N/A for all
- baseball field availability

Question 6. Other Responses (con't)

- COVID quarantine
- I would walk the single paths below Hallmark but the bike riders go very fast and speed by me with little warning so I've given up walking those beautiful single paths.
- Inadequate playgrounds
- El Camino does not even have pedestrian for the most part, some parts where there is pedestrian, they are not walking friendly at all
- Mountain bikers make me afraid to hike the canyon trails. Maybe limit bikers to three days a week.
- I feel there are no limitations.
- my children are grown
- I would love to learn amount more parks for my kids that I don't know of, yet.
- Habits.
- I don't feel limited in my use of any spaces
- getting anywhere is not a problem
- As a person living with Crohn's Disease, I can't go too far anywhere without knowing for sure that there will be restrooms AND THAT THEY WILL BE UNLOCKED. Reliable restroom hours would be greatly appreciated.
- I'm looking for equestrian access
- Athletic facilities: unaware of how to schedule/reserve time for use
- Many of the Belmont school fields are in very poor shape (safety issues for those playing baseball/ soccer there). Not enough easy access picnic tables or garbage cans in our parks. Restrooms were not always supplied or open (pre-covid).
- No factors limit my families use of parks and open space
- I am responding on behalf of Serendipity School - otherwise I do not use Belmont facilities
- Too crowded during COVID with some people not wearing masks
- N/A
- People biking too fast and too close scare me as I walk Waterdog (southwest of the lake, near hidden canyon and San Carlos). Please don't allow electric bikes: it's scary enough as is...
- Can't bring my dog
- Mountain bikers in Open Space areas
- Playgrounds are very limited; would love a Magical Bridge style park
- No factors limit my use of parks. Dog poo all over waterdog open space is annoying but it does not limit my use
- not all have options for off-leash dogs
- N/A
- E-bikes cruising fast
- often crowded since Spring 2020.
- there are no factors limiting my use of any of the facilities i visit
- Too busy; overdeveloped; no hiking
- no factors limit my use
- Too crowded from visitors driving to venue instead of staying within walking distance of their own locations.
- Nothing limits my use of our parks, open space or athletic fields.
- Mountain biking in Waterdog has been getting pushed out of that area. As a resident I have regularly worked and maintained these trails. Most hiker and other people interaction have been positive, however some have had a position that bike riding doesn't belong in waterdog. This is not what I want my open spaces to turn into. We need to find a way that we can all enjoy the open space. If that means we make biking trails and hiking trails.
- Too many hikers to bike safely.
- Over zealous hikers stopping bikers and spreading misinformation
- Alexander Park tennis courts need refinishing.

ONLINE SURVEY QUESTIONS

Question 7. Other Responses

- Fewer Multi-use trails in Waterdog and more hiking only.
- Develop trail system behind Twin Pines Park; develop grass surface dog park like Skyline Park in Burlingame
- More bike trails
- Nothing, leave them as is.
- More dog parks
- no wonder your theme is “build” your backyard == we need to UNbuild the open space; reduce trails; keep bikes on fire roads only (it’s the standard)
- Need public pool
- Need a community lap pool
- community pool is needed
- More bike trails! Please!
- ice rink!!
- Ice rink for hockey
- Add more off-pavement bike trails
- More Mountain bike trails (fast growing sport in the USA)
- Add more garbage cans
- Large grassy dog park areas!!!!
- Dedicated mountain biking trails
- Bike-only trails - this is safer for everyone and would be unique
- Add more or even a mountain bike only trails
- build more legal mtb trails or even mtb only trails
- more bike trails
- better condition for athletic fields
- Mountain biking trails
- Build new mountain bike trails
- more bike trails
- Link bike paths
- Mountain bike trails
- Ice rink baby!
- Mountain bike opportunities
- trail maintenance in Waterdog to aid trail usage, better maps and trail signs
- create bike only trails!
- trails for dogs, educate park users about what you can expect from dog owners (voice command, no jumping)
- More Mountain bike trails
- Mountain bike specific trails would be nice, or at least trails where hikers would expect to encounter mountain bikers and not be startled or vocally complain about someone going by slowly at a reasonable distance.
- Ensure mountain biking opportunities

ONLINE SURVEY QUESTIONS

Question 7. Other Responses (con't)

- Off leash dog areas
- recommend we remove not native trees that obstruct the view
- After school programs for schools/ field trips/Art centers/music/large fish ponds like Central Park
- Dog waste bags and bins at San Juan Canyon.
- More places to bike without fear of car obliteration.
- Add More places to mountain bike
- please consider adding a community pool as temps have risen so much over the years.
- hazardous fuel reduction is necessary.
- More multi use trails in the open space
- bike trails and bike lanes to and from
- More mountain biking access
- I am happy as they are
- A large space for RC hobbyists.
- Drinking Water
- When adding new facilities, please considerate not to put neighborhood residents in stress. There are too many bikers vehicles nowadays concentrate in some areas.
- Keep mountain biking options at waterdog
- More paths to run
- Please leave nature alone!
- Install more mats for the playground structure instead of wood chips
- Twin Pines has been ruined by both the South Rd unnecessary bike path & removal of trees
- More bike friendly and bike specific trails!
- More biking trails
- I can't answer most of these without knowing what location you are talking about!
- Mountain Bike Trail (Including Class 1 E-Bike)
- DOG FRIeNDLY!!!!!!
- Add more dog poop bags
- Maintain mountain bike access.
- Belmont 100% needs a skatepark
- Bike parks have been an amazing addition to family use of facilities in communities where they have been added. Top of my list.
- Calisthenics stations/equipment: pull up bars, dips
- Mountain bike trails
- Maintain Mountain Biking Access
- More mountain bike only trails (technical single track) give us our own trails
- More mountain bike access
- Disc Golf course pretty please
- specific biking and hiking trails. some trails are very steep to walk on
- Disc Golf
- Mountain bike trails
- Ice Skating
- Stop Getting rid of and adulterating our biking trails!! We have so little left to ride and this is the HOME of mountainbiking, and we drive it away!!
- More dedicated mountain bike trails!!
- Don't allow bicycles in any natural area; restrict them to paved roads.
- More mountain bike trails
- Add more Mountain Bike Specfic Trails to Waterdog.
- Expand Mountain biking trails
- More Mountain Biking space.
- A public pool would be nice
- Separate user groups on multi use trails in water dog - build more single user group trails for both groups, plant more trees
- Access for bikes in OSP
- Preserve and expand mountain bike trail networks
- Open spaces are excellent as is
- Off leash, fenced dog park area. Open all day. Within walking distance of all our apartment complexes with no lawns (western hills)
- Keep mountain biking in all open spaces. It is an activity many of us do frequently as our primary means of exercise.
- ice rink
- add more single tracks for mountain biking
- Mountain biking!
- Kid climbing walls
- I am very interested in new trails open to mountain bikes.
- Allow for more mountain bike enhancements to make the trails safer and more accessible to all users.
- Continue allowing mountain biking
- Maintain waterfog access w Bikes
- More single track for hiking and mountain biking
- More mountain bike loops if there is space at parks other than Waterdog
- outdoor music venues
- Often we have had to bring in more portable tables and chairs to the Redwood Grove to include all of our attending group.
- Pickleball badly needed!
- Aquatic is strongly needed!!!
- limit high-speed bike traffic and large groups of cyclists; protect trails from erosion and make bridges more foot-friendly

ONLINE SURVEY QUESTIONS

Question 7. Other Responses (con't)

- With Regard to Open spaces (Waterdog): For the safety of all users more signage at strategic locations would be helpful to warn people to pay more attention. There are exposed areas and possible dangers and accidents that can be prevented with signage.
- I vote for a bike track to separate the bikes from the hikers at Waterdog.
- Access to athletic parks for ad hoc play (versus teams)
- Radically limit biking in Hidden Canyon and Waterdog Lake
- Indoor basketball courts would be great, either for walk-in use, rental, or league play.
- maintain mountain biking access
- More places to ride bikes
- belmont has few sidewalks in the hills: we are worried about the kids biking on the street without a designated lane
- Avoid costly and high-maintenance sporting facilities that are not used by a majority of public
- Belmont need a public pool for lane swimming
- Off-leash dog areas
- Please replace trees on properties that the city removes to update sidewalks and streets. We lost 5 oak trees on Ralston and we're told to replace them ourselves after you cut them down. Very unexceptable!!
- It's not a matter of more, it's a matter of improving what we have!
- Waterdog and San Juan Canyon are fantastic as is.
- pickleball courts
- Safe and official access to Belmont Creek in Twin Pines Park
- space for dogs offleash
- Mostly "no opinion" here because I think the spaces are already really great.
- baseball fields for open use (beyond little league) should be open to all and reservable for all
- I'd be interested in indoor aquatics, but it's too windy and cool for outdoor water activities.
- Please allow only walkers to use the single paths in Waterdog and Hidden Canyon and NOT ALLOW bikers to use those single paths.. People with disabilities such as hearing, walking and even having children should be limited to WALKERS.
- Costly to maintain
- Skating rink
- Ice rink
- Bike dirt jumps park, like one in Fosters city by shell beach that was recently closed, would've be awesome!
- Burton Park in San Carlos would be a strong guideline
- Unique nature based play areas. Like the wood stumps in twin pines.
- Parking for Waterdog
- Aquatics top priority
- For me, things seem ok as they are.
- Off leash dog areas
- Dog park with grass instead of dirt
- bocce ball court
- Upgrade the play structures in Twin Pines Park.
- A skate park, pump track and all abilities playground would be amazing! I want my middle schooler and his friends to have more outdoor activity options that they can easily travel to.
- more trash receptacles would benefit each place
- Add more bike trails
- Public swimming pool is sorely needed. We live in a cool location, so balance lovely shade trees with our need for winter sun. Also, Bocce courts should be a survey option!!!
- equestrian access
- more open space bike access
- More mountain bike trails.
- Upgrade Mcdougal softball fields
- bocce ball courts (belmont has promised these for years)
- pump track and/or skate park would be a great addition
- Repair/replace broken areas: swing hinges at Twin Pines, Dry rockbed at davey glen
- Frisbee Golf
- I would like to have a town swimming pool
- My family drives to other local towns for skate parks and pump tracks. Would be great to have them here in Belmont. Plus, we could do with more dog parks in Belmont. The closest one to us is Laurie Meadows (San Mateo).
- Community pool please
- Add more dog parks/off leash areas
- safe dedicated (not shared) bike trails
- Dog park areas - and ones that are open all day, year-round, with room to run
- Dedicated biking and walking trails

ONLINE SURVEY QUESTIONS

Question 7. Other Responses (con't)

- More shade is needed in the dog park--not in the Open Space unless replacing dead trees, or whatever the natural setting was. A bike pump track is acceptable outside of open space areas or Twin Pines Park.
- don't want city pool.. continued availability of carlmont pool is sufficient. since roads in belmont are not great for kids to bike, need more opportunities for them to bike.
- I think we should keep bikes at waterdog
- Continue allowing mountain bikers to use Waterdog and Hidden Canyon- Strongly Agree
- Please enchance existing Mountain bike trails and keep Ebikes and motorized bikes out
- More dog friendly spaces!
- Having some mountain bike only single track at Waterdog and hidden canyon would be great
- A pump track must happen for Belmont. This will support out youths and give them a place to grow and realize that the community supports them.
- Bike only trails

ONLINE SURVEY QUESTIONS

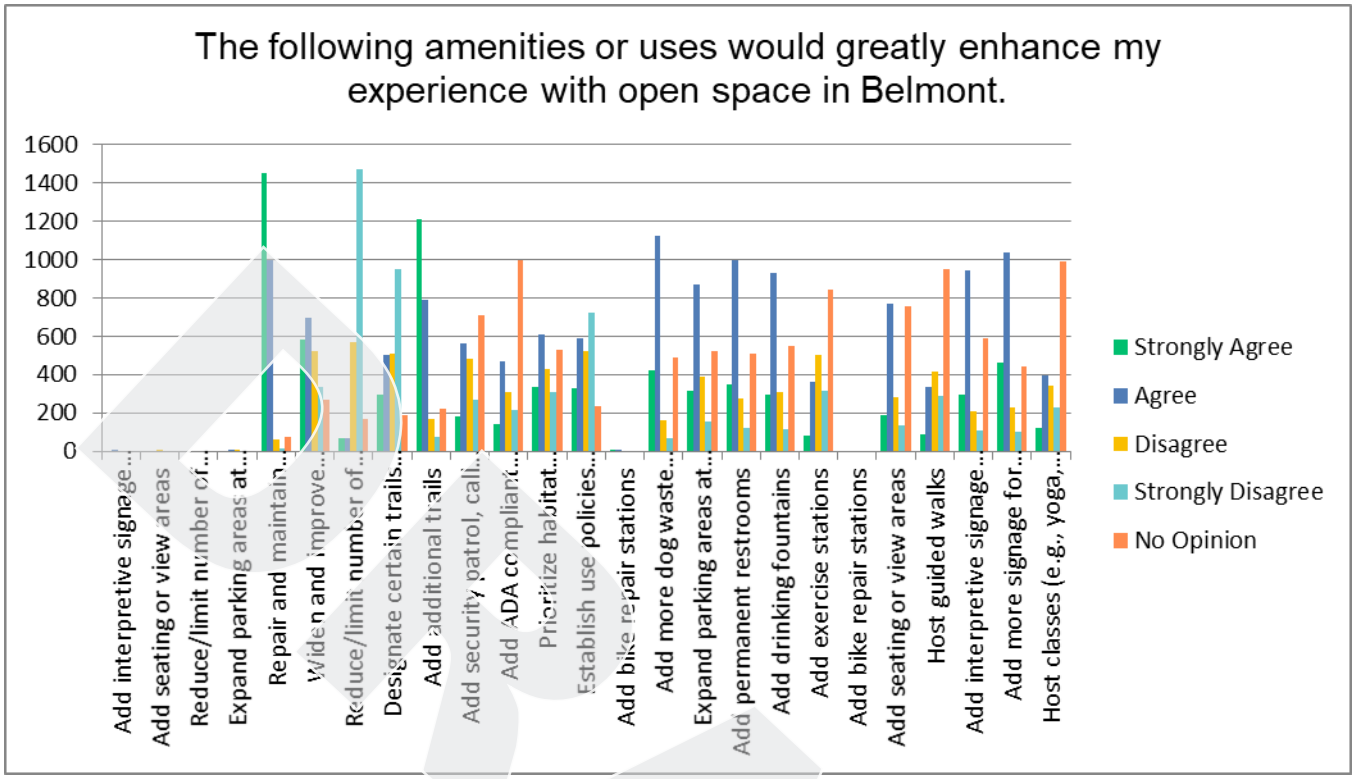
DRAFT



ONLINE SURVEY QUESTIONS

Question 8. Other Responses

- Electric bike should be banned. They are mini motorcycles in disguise.
- I oppose closing waterdog to e-bikes
- The "use policies" question is too broad. I'd say no to ebikes, but I'd be against trail speeds (because what's fast on one trail is slow on another) and no to use hours, unless that's to ADD access
- There are plenty of hiker specific trails all over the Bay Area. MTB specific trails are needed!
- I hike and mountain bike and enjoy using the trails for both activities
- Over use by so many cars parked at Lake Road/Hallmark Drive
- Add an off leash dog trail or area.
- manage WD as an open space not as a sports facility; people need to get back to nature; a place to be quiet, enjoy the bird calls, be present
- Plant more trees if possible
- I'm happy with our multi use trails - I love the mountain bike use, maybe restrictions on especially bike use after heavy rains tho? to prevent erosion? Plus not keen on e-bikes, unless maybe for ADA use?
- Need public pool
- I would like to see some additional trails added to create nicer loops that my kids can ride on without doing the steepest climbs. We should do native plant restoration on the sides of some of the wider trails and make them narrower.
- Please don't limit mountain bike access. Make bells on bikes mandatory to encourage friendly trail sharing.
- For safety dog lease law enforcement, poison oak removal.
- Ban mountain bikes from narrow trails. This is an accident waiting to happen. Many times I have almost collided with a mountain biker. It is frightening and ruins the experience of enjoying Belmont's open space.
- Keep trails open to bikes
- mountain biking needs to be preserved in open space. It is all teens have to do here.
- More bike events!!!
- I am a huge advocate for directional mixed multi use trails. The new Cotoni Coast Dairy Project is a leader in this area.
- Please protect mountain bike trails
- More Mountain bike trails (fast growing sport in the USA)

ONLINE SURVEY QUESTIONS

Question 8. Other Responses (con't)

- More people are moving to bicycles to reduce traffic and pollution. So we see more bike riders in the open spaces. Please encourage this.
- Use policies are already established at trailheads and while habitat does need to be protected, it should also be enjoyed by everyone. Would love to see more mountain-bike trails at Water Dog Park. This place has wonderful single-tracks for biking!
- Mountain biking originated in the Bay Area - please support it. Waterdog is unique and special for bikes - please keep it open.
- Having lived in multiple places around the country, parks which expand user trails but limit use to one method (bike only, hiker only, etc.) have more sustainable and enjoyable open areas. This allows more targeted maintenance to address use-specific issues and reduces unfavorable interactions between users. Infrastructure can also be targeted more efficiently to reduce cost.
- Keeping all trals open to mountain biking
- Maintain bike access
- More space for mountain biking would be excellent
- Do not limit use, ie. stop biking in Water Dog Park. Instead engage the bikers in helping with trail maintenance and education about trail etiquette.
- Dog stations so those people who pickup pet waste and leave it on the side of a trail for other users to step in...
- More mountain biking trails
- Please keep Waterdog Park open to mountain biking. It is a staple park for our local mtb community. The mountain biking community has also done a lot for the park with respect to trail upkeep and maintenance. It it one of the most engaging and fun parks in the area for this activity.
- continue to allow all mountain bikes
- allow bikes
- GGNRA type signs: horses have priority over hikers over bikers
- Please add bike specific/only trails with technical trail features
- allow more biking
- Please keep mountain biking allowed in Waterdog!
- I love mountain biking at Waterdog. Beautiful trails and friendly people.
- Improve and add trails (not necessarily widen) trails for mountain biking and hiking. Single Tracks are great.
- Signage on trails for directions and navigation
- Directional trails
- Allow mountain biking. Single direction trails or alternative days for bikes only.
- bike only trail!
- Maintain access to non electric bikes
- Mountain-bike specific trails - at least as many as hiker-only, and built specifically to be enjoyed by bike! (bermed turns, optional technical sections, etc.)
- Please do not attempt to segregate bikes from pedestrians, etiquette signage is more appropriate
- I very much like the multi-use aspect, with especially hikers and bikers interplay. The "tensions" are over-reported. Both as a hiker (with family) and as a biker, I almost always have positive interactions.
- Allow mountain bikes
- Increase mountain biking trails & promote user awareness.
- I feel strongly that we should continue to allow multi-use of open space trails including biking and dog walking.
- More mountain bike trails
- Protect mountain bike access to Waterdog park. Use restrictions advocated by a vocal minority does not represent the community.
- off leash dog areas like at Pulgas Trails
- More acces for people on bikes in open spaces and larger parks. Host guided bike rides.
- Allow safe mixed use of trails and do not prioritize one group over another.
- please consider adding a community pool as temps have risen so much over the years.
- Guided bike ride
- Ask hikers, joggers, and walkers not to wear headphones in both ears, as it's dangerous on a multi-use trail.
- add more mountain biking trails
- Dog walkers are not always respectful leaving their waste bag behind on trail. Also, it's disgusting that they are allowed in parks where people picnic and play on the lawn. Especially for children. Restrict dog access in family picnic/play areas.
- ADD MMANY MORE OFF LEASH DOG SITES!!
- Please keep Water Dog Lake Park as it is and open for mountain biking
- Keep water dog open to bikes!
- prioritize multi use trails, specifically for mountain bikers who are often under represented. Limit electric bike use to wide lanes and fire roads.

ONLINE SURVEY QUESTIONS

Question 8. Other Responses (con't)

- Biking has gotten out of hand. My use of parks during covid has increased & im there for r&r, not an EXTREME experience. Signage + bike patrols issuing citations for everyone coming into town (we are a destination) would help
- Bike access to more trails and parks
- no bikes on nature trails. bikes need to slow down.
- Mt bike access for 90% of trails.
- Keep mountain biking in Waterdog
- Add more Mountain Bike Trail (Including Class 1 E-Bike)
- Although I am a hiker, the bikers created the Waterdog trail system and have maintained many of the trails. Electric bikes are not destroying trails (they are electric assist just helping with the hills). They do not tear up trails. Designate one way trails (narrow too) for bikes as well as hikers. Don't limit bikes to wide trails (in general without the features they like). I have lived here for 35 years so I have watched the trails behind my house grow. Please also reclaim trails where people have moved fencing down and over the trail (into open space). This is especially true in the Belmont Heights area. Thank you
- Please make every attempt to keep the open space parks undeveloped and do habitat restoration of native plants. Walking only, please NO BIKES!! They are a threat to hikers and destroy trails and habitat
- Please build a skatepark
- If 'designate trails for certain uses' means 'designate the trails maintained by the mountain bike community as mountain bike primary, others welcome', that is ok. If 'hikers only', that is not OK.
- DOG FrIENDLY
- Please keep mountain biking access in Waterfog. It is perfect just as it is!
- Keep water dog as a bike friendly park. There are plenty of parks that are hiking only.
- None of the above as offerings are more than adequate. People take care of needs.
- Additional trail access for bicycles
- thank you for allowing mountain bikes, one thing I've seen work really well near my parents in MI is one directional trails - so hikers travel clockwise bikes travel counter-clockwise. This greatly mitigates trail conflicts & works really well on loop trails
- Alternating use periods for cyclists/mountain bikes should be implemented to better serve both hikers and cyclists, this would alleviate the concerns that both groups have in running into the other at high speeds, and help control erosion. For example odd days are cyclist allowed, even days are closed to cyclist.
- Establish more trails for cycling and hiking!
- Increase capacity for safe mountain biking, and better educating the locals about trail etiquette and maintaining a healthy relationship with hikers. One must be aware of the others existence and respect it.
- E-bikes should be banned from trails.
- Keep the trails open to everyone.
- maintain or expand bike access to trails. Consider means to improve the trail experience for all types of trail users
- Keep Water dog and Hidden Canyon Bike friendly! It's the best place. I love it so much.
- Strongly support mountain biking at Water Dog. This has been a wonderful activity for my family for years in a super safe and beautiful setting. IF we lost this there would be nowhere to go..
- All mountain biking and electric bikes
- More signage for trail safety is a great idea. I understand some people are uncomfortable with mountain bikes on the trails, but feel this is purely an education issue. I'm a mountain biker and am probably the most courteous person on the trails--everyone could be so.
- Off Road/Mt Biking Trails
- You may want to add mountain bike specific downhill trails that aren't used for hiking, but don't limit mountain bikes otherwise.
- Stop Ruining bike trails!!!!!! Not everything needs to be an ADA compliant road. Some people accept that fact.
- Add two trail systems, one for hikers and one for mountain bikers. (Mountain biking trails can be dual use.)
- Cipriani/Dog park are world famously known for the mountain biking trails, please add more it will enhance the Belmont economy !
- More mountain bike trails!!!
- Waterdog would benefit from seperating Hiking and Mountain biking on some of the narrower trails.
- more bike trails
- It is important to me that access remain available for all open space users including hikers, joggers, bikers, and dog owners.
- more mountain biking trails, please! (there is already a huge shortage in the bay area)

ONLINE SURVEY QUESTIONS

Question 8. Other Responses (con't)

- Mountain biking is a key recreational activity for healthy exercise and should continue to thrive and expand in Water Dog.
- Ban e-bikes and actually enforce it
- leave the open space as natural as possible.
- Open spaces are excellent as is
- Keep mountain biking legal at water dog! It's a great park and an awesome resource for people getting into the sport!
- Create more bike and ebike trails
- Please allow biking but limit electric bike.
- Add more MTB trails
- Keep Waterdog open for Hikers and Mountain Bikers
- Keep mountain biking in all open spaces. It is an activity many of us do frequently as our primary means of exercise.
- keep trails as they are for mountain biking
- Please keep Water Dog open to all users including Mountain Biking!
- Keep open space free and unregulated.
- Add more bicycle trails - single or multi use for bicycles
- more mountain biking trial access
- Areas for bicycling with kids and friends especially mountain but road also
- Mountain biking skills and trail etiquette
- I feel strongly that trails should remain multi-use. Adding at least one long circuit that is dog-friendly for urban hiking. Such as making the Sheep camp trails open to dogs so hikers can get over to Canada Rd.
- Keep mountain biking on trails
- I am a mountain biker, BUT Mountain Bike/e-bikes utilization needs to be either eliminated or drastically policed. It is out of control!
- Belmont's embracing of Mountain biking is very special and is a great way to get the youth invested in protecting and enjoying nature.
- 'designate uses' might be 'designate direction' for things like finch which gets narrow but is fun in bother directions.
- Better control of loose dogs.
- Allow multi-use including mountain biking on trails.
- Since our preferred Redwood Grove at Twin Pines is so far from the parking lot...it would help the "aging Committee members" if a road could allow 'some cars' closer parking to unload/load the equipment for our big event.
- limit high-speed bike traffic and large groups of bikes
- As previously mentioned more signage would be helpful; in particular, a good example is the "three witches", three consecutive hills. Here there, is traffic coming up and down (bikers and hikers) and there is some exposure adding to the safety concern. So, signage at the base as well as the top of this section would remind users to pay attention and exercise safety.
- More bike lanes on Belmont roadways
- Keeping the poison oak in check is key to enjoying the open space. The trail crew has been doing a good job at it for my last several visits.
- I suggest to prohibit biking in Waterdog trails in the winter or when it's wet. Tire tracks tear up the trails.
- Most important would be to severely limit biking in hidden canyon and waterdog and other places inappropriate to biking
- More mountain bike only trails
- please maintain mountain bike access to waterdog park
- It is great to have access to great mountain biking trails at waterdog, please don't get rid of mtb access!
- More bike access
- I believe establishing use policies are important, but as presented in the examples it seems this is targeted the exclusion of bicycling activities
- We go to open space to see nature, animals, flowers, plants. Do NOT bring in distractions from nature or encouage more dogs. Nature education-docent led walks would be great.
- More bike paths / trails at parks and open spaces as well as connect them to non-park infrastructure (e.g., multiuse paths on the way to parks and open space to safely bike there).
- We need limits on biking. My dog got hit the other day by a mountain biker.
- This section sounds specifically geared towards improvements at the Water Dog Lake / Hidden Canyon Open Space. Unfortunately, COVID-19 has increased the use of this area significantly and people are making demands for improvements. This space is a jewel in the rough but let's not polish it to a luster - therein lies the beauty of this wonderful resource. It is by no means a pristine habitat ecologically but let's make an effort to not gussy it all up and disturb the wildlife that call it their home and make it an overly attractive destination that draws people from all around the bay area. BTW - the new signage is very nice so kudos there!Thanks!

ONLINE SURVEY QUESTIONS

Question 8. Other Responses (con't)

- Again, I think the conditions & services are already really great - no improvements needed IMO.
- Add trash containers for dog waste or other trash
- Ban E-bikes in open space areas. Enforce park hours - no use after sunset.
- Remove invasive plants like ivy and oxalis that climb over existing native trees. Take out eucalyptus and replace with safer choices.
- Limit mountain bikers to three days a week.
- Weed control e.g. safely with goats
- enhance the wi-fi access so cell phones work
- Please don't restrict dogs from trails, like Sawyer Camp Trail does.
- multi use paths very hard for pedestrians - I feel like I'm always about to get run over. Also masking restrictions are not consistent and people dont' follow them.
- Particularly in open space, trail maintenance is essential. While the efforts by certain groups (biking) are very helpful, there are large areas of trail where vertical trails have allowed water runoff to severely rut the trail. I am all for volunteer efforts, and do want to participate myself, but some areas of the trail esp at water dog need to be re engineered, preferably with some professional advice
- Please do not restrict use to only walkers. That would be a terrible loss to our children who love to bike where they are safe from cars.
- Add more bike trails
- Guided walks are a great way to introduce the public to lesser known open spaces— learn to appreciate what we have
- Horse trails
- More open space for bikes
- Like the new trail signage in WD Open Space
- consider use hours / directions for multi-modes - walkers and cycling
- How has NorCal missed the memo on the importance of posting trail operation and etiquette signage - people can't know what they don't know - THIS BEFORE ALL ELSE PLS!
- multi-use trails have been successful for many years and should be kept that way
- "Exploration spaces" for kids would be great - kid-oriented trails with lots to learn about
- It would be nice to keep our open space open and available to all. I do not believe that all or most open space trails should be required to be ADA compliant. We DO need some trails that are accessible (in open space, recreational, and/ or parks) but not every trail, everywhere.
- The open space is a beautiful multi-use open space trail system, that should in my opinion continue to be multi-use for the entire community of hikers, bikers, dog walkers, and nature lovers. Of course we want to simultaneously protect habitat, but please note that our open space is designated as recreational open space. it is not a nature preserve and was intended for people to use it responsibly.
- Would love an off leash pet area in one of the open spaces!!!
- Please leave open space trails narrow and primitive. Narrow the wide trails to 2-3 feet when possible. This gives a more intimate and close experience with nature.
- All access for respectful mountain biking
- Stop e-bike use, limit number of bikes and their speed so I don't have to walk scared all the time
- Limit and enforce mountain bikes to selected trails
- I believe we should improve & add agenda specific (including hiking, dog walking...) trails but not widen existing. The current landscape of many of the trails are too restrictive in grade to reach a large population of hikers.
- Enforce lease law for dogs. Half of the dogs are off lease in Water Dog Lake Open Space
- How about enforce existing policies - no motorized vhicles, dogs on leash, pick up dog waste (curious dogs not mentioned in "policies" above)
- There are existing policies, so education around them is important. I wouldn't want to create additional restrictions.
- No E-bikes
- Trails are well maintained currently by an active group of volunteers(and perhaps others).
- bike speed limits are more appropriate than limiting ebikes.. it isn't the bike that speeds, it is the person riding it.. i ride a class 3 bike and i turn off the motor on mulit use trails.. as i get passed by cyclists on road bikes. i have one of those too.. i keep my speed down.
- Designate uphill/downhill designated trails when they are particularly steep/narrow/winding.
- Stop the gradual widening of narrow (singletrack) trails and the safety risk to hikers by either restricting their use to hikers only, as done in other open space/parks in the peninsula region, or, as a last resort, by adding regularly spaced step-out spots for hikers to allow bikes to safely pass, along with signs showing what is expected.

ONLINE SURVEY QUESTIONS

Question 8. Other Responses (con't)

- Open spaces should be "open" to everyone. Limiting their use - e.g. telling bikers they can only ride on certain trails at certain times is unfair. And I'm a hiker, not a biker.
- Prohibit bikes on narrow single track trails. Prohibit new trails made by bikers! Security patrol so rules are followed would be good but no lighting.
- Eliminate bikes from single track trails. Have monitors on trails to enforce rules. Currently night riders are on trails after sunset.
- More off leash dog accessible trails
- 1. More dog friendly and off leash spaces. 2. Please clean up Patricia Wharton Park. Much of the year, it has dead plants and lots of weeds!
- Take out informal bike paths and clean up trails, add trail signage, eliminate water pollution from bad maintenance activities by city
- No night bike riding on open space trails please. Homes feel very exposed when people are on the trails at night. We are supposed to because at sunset and we need signage that states that.
- Bike riding in Waterdog needs to be prioritized with the number of youths that ride there, and people that use the area (precovid) it has been primarily mountain bike riders, now we have in influx of people here we need to accommodate for all users by creating more bike specifications trails to unclog the congestion.
- The section pertaining to usage guidelines seems biased towards limiting bicycles, while there are as many, if not more disobedient hikers in open spaces. A mutually beneficial approach here would be preferred.
- To improve the multi-use nature of the open space, designated usage days could be an option' 'Beginner Bike Saturdays' (Promote bike use, restrict hikers), 'Strolling Sundays' (promote hiking, restrict bike use), 'Mellow Mondays' (restrict all usage to allow the nature to recuperate).
- would designate Waterdog as cycling-focused park and Edgewood/others as hiking-focused

ONLINE SURVEY QUESTIONS

Question 9. Other Responses

- Those "volunteers" were not doing maintenance. They modified trails to allow bikes to go faster. They also built illegal trails.
- Understanding the need for quiet activities, walking in nature, in our open spaces.
- how about environmental classes -- that introduce different ways of looking at our impacts to our world, environment, etc.
- Need a public pool
- More Mountain bike trails (fast growing sport in the USA)
- More mountain bike trails and multi use trails.
- I would love to volunteer to do trail work or even contribute to fund additional mountain biking trails at Water Dog.
- More Mountain biking event for all ages
- Please preserve Waterdog trails and add more trails for mountain biking where possible
- group biking
- More paths to ride bikes
- After school programs
- volunteer invasive plant removal projects
- More mountain biking options
- more single track mountain biking trails
- Local ecology walks/talks would be awesome, also encouragement and signage to leave no trace. Often I find garbage/trash that has blown onto trails, we are all responsible and we should all work to pick up and maintain these amazing public spaces which we all benefit from. I would love for there to be engagement and representation of community from all aspects and uses, including mountain biking!
- The parcours course recently removed from the path alongside Oracle was great. The fitness stations by Design Tech are awesome. Pp bring their stretch bands, rings, other gear to max out exercise possibilities
- More bicycle specific trails
- Difficult to answer questions without more specificity.
- already very busy don't add more. Make quiet for nature
- Mountain Biking events (Including Class 1 E-Bike)
- Skatepark!!!!!!!!
- Could also do alternating weeks of the month to provide for longer periods of acces/ closure
- Youth Mountain Biking classes

ONLINE SURVEY QUESTIONS

Question 9. Other Responses

- I would love to help with trail work. We have amazing bike trails because bikers created them. It takes a biker to make a good bike trail. These trails also benefit hikers and walkers. It would be great to get involved.
- Guided mountain bike rides at Water Dog.
- As a 3X weekly mountain biker, I'd be happy to help with trail work
- Trail maintenance for mountainbiking
- Mountain biking trails!
- Habitat restoration (removal of non-native plants)
- teach kids to mountain bike
- Improve mountain biking trails and access
- More Mountain Biking Trails are needed.
- Open spaces are excellent as is
- It's pretty good as is. Maybe more access to e-bikes and mountain bikes.
- Mountain Biking Trail Association to Support the Parks and help fundraise
- Limit group events. They clog up trails.
- Keep mountain biking in all open spaces. It is an activity many of us do frequently as our primary means of exercise.
- Waterdog Open Space could be utilized better by the City with fun and educational activities.
- non-facebook information re volunteer opportunites
- More biking please!
- our family loves movie nights and Camp SOAR, more summer programs for teens/ middle schoolers would be great
- Aquatics
- Recognize the damage biking has done to open space
- Stop charging a fortune for teams to use a field
- Keep open spaces for nature only, not rec or activities. Yes more non-sporting activities in parks and sport fields for those who don't do sports. But not in open spaces
- Pickleball courts
- Food trucks or wine nights for adults
- I'm not very familiar with Belmont Parks and Rec programs/activities
- More advertisements, as I am not aware of these activities/programs
- Trail work not run or organized by biker groups.
- Civic group volunteers to Clean up trash in parks, trails and creeks
- Community Gardening
- Natural system stewardship science activities

ONLINE SURVEY QUESTIONS

Question 10. Other Responses

- Dangerous walking with bikers on same trail.
- I am not aware of many outdoor programs/activities offered
- Dangerous encounters with speeding bikers
- No
- greater variety of trails
- Not interested in organized activities.
- Hikers that go on trails not meant for hiking
- Vague rules about Ebikes
- Plenty of options already
- lack of places to lock bikes
- Nothing limits my use
- Don't know about the outdoor programs/activities.
- Increased crowding at waterdog
- I am a mtn biker. I ride in Waterdog to keep variety in my riding schedule
- Frankly, i just don't know about them!
- I am not limited to access currently
- Would love to see more trail maintenance to remove and repair ruts, improve trails for mountain bikes, more habitat protection with narrower trails and posted signs not to go off the trails.
- I don't know what programs are offered.
- Unsafe for kids to get there by themselves (by walking or biking across El Camino and/or Ralston)
- Areas for biking have become overcrowded with hikers and joggers who don't pay attention to others on the trail, making it unsafe for anyone on the trail.
- Would like access to the City Pool on Carlmont Campus or have City build another one at Barrett Comm. Ctr.
- I only use the open space for biking
- Water dog trails have gotten too crowded on weekends. Difficult to walk with bikes on narrow trails
- live in san francisco. takes time to get down there. We LOVE Waterdog park for hiking and mountain biking with the family.
- I can't bring my dog
- I wasn't really aware of the programs offered.
- I'm a water aerobics kind of person and yoga / sr classes all offered at 10-11 am so am working by then...
- ADA
- Dog access
- No access for bikes
- we go with family. we do not do programs.
- No skatepark
- Too many mountain bikers making hiking dangerous. Almost run over by the on multiple occasion.

ONLINE SURVEY QUESTIONS

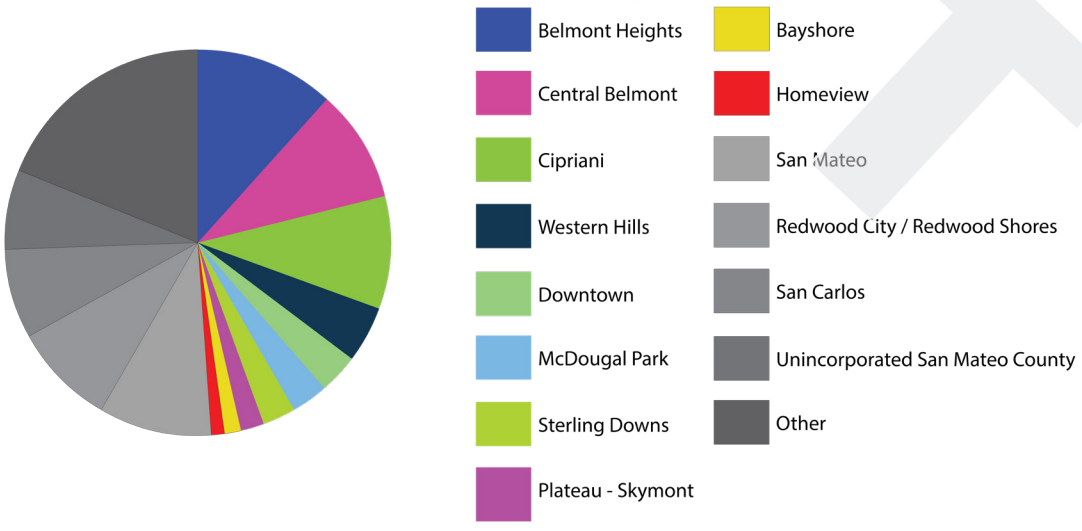
Question 10. Other Responses (con't)

- Lack of internal motivation. Nothing about the infrastructure.
- I spend time enjoying nature, but I would be more present if there was a skateboarding space.
- Not really aware what programs and activities are available but at the same time I'm not seeking them either.
- I am often unaware of the offerings, mostly my own fault for not staying on top of the Parks & Rec calendar.
- not interested
- I don't really know where to find informatikn
- Signage are not very good
- I love mountain biking! Especially at Cipriani/dog parks!
- When I have a family, outdoor programs/ activities will be more relevant to me
- There is no Mountain Biking program
- No interest. I mountain bike and play organized soccer
- I use the outdoors to be alone not in groups.
- Lack of well built mountain bike trails
- Unaware of the programs
- Hostilities from hikers on multi-use trails - I no longer use Belmont parks during crowded hours because there are too many maskless groups with no awareness of others
- Need more mountain bike trails
- Hateful attitude towards cyclists and bikers
- Don't know about them
- My daughter is just old enough to join classes but have been hesitant due to covid
- Bikes are disallowed.
- lack of variety/quantity of open spaces
- Covid / family obligations
- facebook seems to be the only way to get info for trail maintenance
- Not my style
- Not really aware of the opportunities available
- Now that ZOOM is available I did enroll in "Loteria" game. Perhaps, I will enroll in an exercise class.
- swimming!
- Space availability
- The lack of available programs for youths in 2020 and 2021 (e.g. aquatics, holiday events, youth classes) has dramatically reduced my use of Belmont programming and I have had to look to other city parks and recs for options..
- Bikes whizz around blind curves often without warning or courtesy; large groups are especially rude and dangerous
- Dog waste is a real deterrent
- Pandemic
- I am not familiar with outdoor activities offered for adults by the city.
- Barrett is in need of a refresh--When? The field at Central needs to be leveled and the grass cut more frequently.
- Please put baby or any swings at College View and Twin Pines parks....pleaseeeeee
- Events fill up fast, can't join
- Need to keep nature preserve areas for hiking only and do not make trails for bikers or use these areas for activities that would damage trails and hurt wildlife
- I'm handicapped, so my enjoyment of the parks is limited, but my son and his family love the parks
- Traffic congestion along Ralston near El Camino and near Notre Dame can be a huge deterrent depending on time of day
- People trying to shut down my mountain bike trails
- Organized outdoor programs are not necessary for me
- Kid activities in neighborhood parks like nature ed, plants or creative arts
- Biking dangers.
- Additional advertising/promotion
- Don't know about them!
- Overcrowding of limited number of trails
- The activities are not well advertised
- Limited availability by either too few or not enough openings
- My age (86)
- as a senior with some stability issues i need to have a level environment with multiple locations with places to rest. most events are aimed at younger or wheelchair mentality. i am neither
- Not well enough informed of classes and quality
- I love Belmont and all that it offers.
- I'm unaware of what outdoor programs and activities are available and when.
- Not enough variety/options for my kids, more educational/STEAM type kids classes AFTER school, during summer.
- Not aware of these programs at all
- I don't know about them
- I am not quite aware of the currently available programs
- I do other volunteer work and do not always have time.
- Unaware of such programs

DRAFT

ONLINE SURVEY QUESTIONS

Question 10. Other Responses (con't)



- Like to hike and bike with my own groups
- We forget to look at the class offerings because we are so busy with kids, school, etc.
- I do not like organized events, however, I frequently use the Water Dog trails for mountain biking
- Classes fill before I register
- I like ot get out and walk with friends - not participate in group activities
- I don't participate in group exercises due to Covid 19
- Awareness and ease of registration
- I don't feel safe hiking in the Waterdog Open Space with bikes zipping by on narrow trails. Please ban electric bikes.
- Covid
- my time, and my awareness
- Lack of awareness of programs
- I don't know what's offered
- Not aware of programs
- Not interested in organized activities
- 65+ older bicycle rides
- Too crowded

Question 11. Other Responses (con't)

- I live outside Belmont. But In-laws live there and friends who I do mountain biking with regularly and play in parks with the kids.
- Centro Chileno Lautaro has members throughout the bay area. It gathers at Twin Pines because it is a central point for everyone. It offers great September weather. It is close to the hi-ways and roads and allows our large group the opportunity to gather, easily meet and see each other. Close by it offers a playground for the little children. The bathrooms are visually within the area and there are further tables for those wanting more quiet and distancing. Twin Pines meets all of our criteria.

ONLINE SURVEY QUESTIONS

QUESTION 15. WHAT ELSE WOULD YOU LIKE US TO KNOW ABOUT BELMONT'S PARKS?

- I love the parks. Especially twin pines and Water Dog.
- I used to use the neighborhood park at lot more with young children. After they left home, I prefer going to water dog.
- There is nothing in the survey regarding community gardens so I'm not sure why you are sending this to me.
- No tennis courts with lights
- Water dog lake should be left open to dogs and bikers!
- Three new rogue trails have been created by bikers at the parklet on the upper/Southern end of Hallmark Dr. damaging the hillside and causing erosion, just so that they can have quick access to the existing trail below. Consider adding a fence, down below and just above the existing trail, to block access to the trail from that site, but not to block the scenic view from the parklet benches.
- Community center seems pretty run down and not inviting.
- Hoping that some changes happen before my kids outgrow plans.
- N/a
- love waterdog open space for mountain biking, has been a staple of mine since starting to mountain bike 20 years ago, trails and hikers and mountain bikers all in harmony
- A pump track would be fantastic!
- Not enough athletic sports court (new Barrett will help). Need more basketball and tennis courts.
- I do not feel safe walking the trails at Water Dog lake, especially on weekends when there are so many bicyclists,
- I love mountain biking here. The most accessible biking trail in the peninsula.
- Keep them clean and safe, please
- When I first moved to Belmont in 2003 with a one and three-year-old I was disappointed in the playgrounds. Coming from Redwood City where there were many interesting options Belmont had nothing new or oriented to that young age.
- Doesn't feel like a place you can sit down and relax, enjoy the sun or outdoor air. I don't even remember there is a place to sit down in Barrette outdoor. Let's not emphasize on outdoor picnic or BBQ in the park, what about just for a group of retired neighbors to sit around chatting, playing chess, poker, what have you, so a gazebo may be nice, a water fountain nearby maybe nice, and make sure the bike path not to traverse the park, maybe limited to the perimeter for bike. And I could really use a swimming pool, either open the one in high school for residents, or create a facility like the one in Highland area of San Mateo.
- Why do we advertise Belmonts bike paths so people drive from distant area (example East Bay using gasoline=pollution) to use our trails?
- Thanks for having great clean parks to visit with my family.
- I love our parks and open spaces.
- I love them as they are, can see that water features etc would make more fun especially when hot. i traveled to san carlos and san mateo parks alot when the kids were younger for more features
- It would be great if kids and a family could safely ride bikes on dedicated bike paths from the waterfront to laurelwood and waterdog parks and past it to the connector to canada road and sawyer camp trail.
- Hallmark Park tennis courts are in dire need of surfacing (dangerous cracks caused by surrounding pine trees which should be removed). Also the playground at Hallmark Park is pretty sad and it would be great if it were replaced with a picnic area, pull up bars, and/or sand volleyball court and maybe a small section of turf. Is there potential for a public-private partnership to renovate the park?
- I see the neighboring parks with some amazing play structures and multiuse areas. (Like Bedsford park in San Mateo). Why don't we have a space like that in Belmont?
- Diversity is very important so any one of any age of any interest can enjoy the outdoors and have a place to enjoy life. Legal biking trails need to remain and expand to more parks Along with skate parks there should be an equivalent facility to bikes and there should be more skate parks and bike parks, period. You are excluding a large number of the community that have no place to go. Another one of my hobbies/interest is offroad RC racing. There should be at least 1 dirt track where hobbyists can go to enjoy driving and racing their cars. This is along the same lines as the skate park and bmx/mountain bike needs. These demographic groups have been ignored for the most part

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Please keep me posted on the plans for improvement of Belmont's parks.
- Note: I am a Mtn Biker. I have lived in several places with shared use hiking/biking trails; Water Dog struggles in this regard. We don't need to restrict trails to make them safe; just add rules of the road to make traffic predictable. Examples: specify traffic directions on certain days (e.g., trails are specified as downhill some days (MWF), then uphill others (S-T-Thu). Mark the trailheads accordingly (e.g., color codes) so hikers and bikers know which way bike traffic is going. Require bells on all bikes on all trails (city provides bells at every trailhead; bikers borrow and return as they go on and off trails - San Luis Obispo does this). Restrictions aren't what's needed; what's needed are clear, simple, easy rules to make movement predictable
- The vista point on Ralston near Christian dr needs repaving
- I do not support further changes to Twin Pines Park.
- Please keep Water Dog Open Space and Hidden Canyon Open Space open to bikers
- We use the Belmont parks and open spaces daily. We love walking the dog there or bringing her to the dog park for exercise. Water dog is an awesome place to hike together.
- Keep MTB in open spaces
- My family and I have been enjoying Water Dog for biking and hiking for many years. I try my best to be courteous, safe and friendly to others sharing the trails. Would be very sad to see it prohibit biking. It's one of the few nearby places that I enjoy with my family to get exercise and connect with nature.
- not many available at walking distance, specially on the hilly area of downtown. streets are very unsafe and kids can't play even outside the house. no side walks. not sure where the tax dollar is used in Belmont.
- Need trails paved for use with walkers or canes
- Bicyclists are generally very friendly to hikers, runners, walkers in WaterDog park.
- I love the parks I visit in Belmont and think ya'll are doing a great job. Also very glad to have an open space (Waterdog Lake) that's walking distance from my home.
- I would like to see more overhead lights in the areas of the parks where outdoor recreation is used. During the summer months when the weather is warmer. More people are walking around in the summertime due to our nice summer weather in the evenings.
- n/a
- Widening the trails so that runners do not have to dive into the poison oak and bushes to avoid bikers would be very nice.
- I love riding my bike there and I hope to continue to do so!
- I think Belmont Parks should remain multi-use spaces. Hikers, runners, bikes, and dogs should be allowed. Trail etiquette signs would help with this. Excluding bicyclists from trails is inequitable.
- I love them!
- Water Dog Park is one of the few remote biking locations that I am willing to drive some distance to access as it is such a good venue for mountain biking. Please don't take that away.
- Bike riding is an inclusive and therapeutic activity for people with disabilities such as my dad. Disallowing the use of bikes on trails would take away the one thing my dad can do that is active because he is disabled.
- My wife and I live in central Belmont and walk through Twin Pines park every week as we do loops through the neighborhood. We've enjoyed music and cultural festivals there over the years as well.
- Hallmark Park should have at least a porta potty. I used to include walk a around the tennis courts in my route but just got disgusted with human waste behind trees and bushes.
- The pandemic has been a challenging time for everyone. A mask mandate has been in place since last spring. I use a park or trail almost every day. I've seen hundreds of people with no mask because there's been zero enforcement.
- great place to visit
- Little or no management.
- Keep mountain biking
- Keep them clean and safe
- Tennis courts at Hallmark park need work. School fields used for youth sports are generally sub-par.
- Allow Mountainbiking in Waterdog park to continue
- I really look forward to taking my son to the pump track once its complete.
- Need more dog parks - especially wide open grassy areas for dogs to run.
- Too Little public art and every park doesn't need a sports field.
- Love the biking opportunities
- more BBQ areas

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Children play structures are not maintained well. Hallmark park play ground desperately needs to be upgraded/replaced!
- Belmont's park can be more natural than in many other places -- creeks, trees, etc. Let's embrace this, and let other areas build parks of grass expanses and highly build structures and landscapes.
- Another outdoor archery range in the Bay Area would be great! There's not much in the Bay Area and spread out too far from each other.
- Love how hikers and bikes can all get along .
- In general these are wonderful gems adding to the quality of living in our community. Some upgrades in infrastructure will have tremendously magnified positive improvement. I'm glad to see these under consideration and look forward to the implementation and enjoyment.
- Love the mountain biking trails at Waterdog!
- Bike trails
- Waterdog (and Carlmont Jumps) are the only places in Belmont and the surrounding communities where cyclists have access to local trails. It is a wonderful place for children to learn to ride and for an after-work fitness ride. Waterdog's trails were built by mountain bikers and the volunteer opportunities allowed us to give back to the community.
- Great job with Belmont Sports Complex. I was a Belmont AYSO coach and ref for a long time, then at Belmont United Soccer Club. Nice to have good fields.
- There needs to be areas designated to bikers and areas designated to hikers so that both groups can enjoy themselves peacefully
- Simplicity goes a long way and helps keep parks clean. In general, Belmont's parks add lots of value.
- I love mountain biking At waterdog
- Belmont is great for mountain biking ! Let's try to add more trails for multi use bike / walk / run
- Please consider a community pool. There are none that are open year-round for swim lessons, lap swim, or recreational swim in Belmont, San Carlos, or Redwood City.
- N/A
- Growing up mountain biking in waterdog park and Carlmont hills had an immense positive impact on my life.
- I don't use them as much any more with kids older / moved out. But was very pleased with the parks as is.
- I think parks are very important and am happy to see planning for the future.
- The playing fields at many / most of the Belmont locations are in dire need of repair and maintenance. With the exception of the new turf at BSC, almost all fields have a grade (uphill / downhill), have very inconsistent covering (spotty coverage of grass, holes around irrigation, and rodent damage), and are often closed during precipitation. I have coached youth soccer for years and have been disappointed by the condition of our fields and have even seen injuries due to the inconsistent coverage (ankle injuries, tripping, etc.). It is expensive to cover every field with turf. However, a couple additional fields should be covered with turf to provide better playing surfaces and alternatives to the BSC. Fields that are not covered with turf need to be re-graded, have new irrigation installed, and re-seeded.
- Love the parks!
- We love the parks! We need more bike Lanes connecting the parks.
- We are a biking family that is always looking for a safe space to ride bikes with our young child.
- The trail bikes make Waterdog lake a dangerous place to walk & enjoy.
- I love riding Waterdog with my kids! That is what brings us to Belmont.
- Love all the parks
- There are several I routinely pass without knowing they're there
- Keep the speeding bikes off the trails
- NA
- Keep it open to MTB use!
- Please open all bike trails to all bikes including classs 1 Ebikes
- bikes need to continue to have access to the park
- I care strongly about preserving biking access and dog access to Waterdog Park. Biking and hiking at Waterdog park are why I moved to Belmont and bought my first home there. It is the first place I want to take my foster kids to share my love of nature with them, and take my dogs. It is the crown jewel of Belmont because of its very open access and use policies. Restricting that will diminish its value to the community.
- Nice place to spend time
- Working well for us at this point. A bit of maintenance and signage and we're good. Don't screw it up.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Water dog is one of the best parks in all of Northern California.
- Keep access for cyclists / mountain bikers. We pay just as much in taxes as others and deserve equal access.
- Please do not reduce the use of cycling in Belmont. Waterdog is a nearby treasure that my family enjoys riding on.
- Please preserve the mountain bike
- Need to continue to allow bikes in parks!
- How Belmont will be inclusive of all visitors/ activities and not excluding specific activities (e.g. mountain bikers, eBikes)
- With the increased popularity of cycling and mountain biking more trails are needed. There is often a misunderstanding by hikers/ equestrians that mountain bikes just want to go fast - not true - want fun flowy trails with turns, not wide open straight down fire roads. Narrow trails increase safety by reducing speed.
- I really like mountain biking in water dog park
- Please do not restrict biking
- The remarkable bike and hiking trails are a great feature of town Additional entertainment and activities catering to the visitors seem to make sense
- Keep mountain bike trails open. Expand access
- Let's make them better
- Keep mountain biking trails
- We need skate parks and pump tracks.
- Convenient location! There should be SOME one way trails to lessen confrontations between bikes and peds.
- We simply do not visit parks that are not dog-friendly. We have worked very hard to train our pup to be social, loving and respond to our commands. We wish that more parks and trails were off-leash for dogs under voice-command.
- For bike use I recommend alternating days of access for different user groups, a bell box program, directional trails, or realignment of problematic trails.
- It would be nice to have a park similar to berresford or burton in our community. We have always gone to these parks due to the amenities and options.
- Please keep bike access at waterdog! We can and should get along, bowing to special interests on this is anti-inclusion
- Stop changing them, they are parks, leave them alone.
- I use the open space for mountain biking.
- If dog owners cannot make their dog's excrement vanish, they're banned. Make it so.
- Make sure they have dedicated people making sure they are kept clean.
- Please make it easier and safer to walk to the parks by adding sidewalks and crosswalks.
- There's overuse and not enough oversight. For example, I use hidden canyon park where dogs are not on a leash. I've seen people smoke marijuana late at night, seen used condoms etc. also, speed bumps are needed near the parking spot because people fly through. Too many bikers on the trails make it very difficult to have a peaceful hike on a weekend with young children.
- We walk Belmont parks basically daily one way or another. Especially love hiking and biking Waterdog and Sugarloaf.
- Mountain biking is important to all that access and maintain the trails in thebpark
- Need after school programs
- More access to trails for people on bikes, more connected routes
- It's the closest place for me to go out and ride my mountain bike outside of San Francisco!
- We fully enjoy the parks. Glad they are multi use.
- nothing
- Mostly well maintained, warn against people wanting to change too much or cater to access at the compromise of raw & natural spaces
- Bicycle access should be expanded
- Allow bikes on trails
- If you are going to cut down trees as you did in Hallmark Park last year, could you at least NOT do that just at bird nesting season. Aside from needlessly cutting down beautiful 30 plus year old trees (when just minor repair of the pathway would have solved the root invasion problem) we lost birds that were just nesting. Even birds in trees not directly cut abandoned their nest from the disruption going on around them.
- Waterdog and Hidden Valley are the reasons why we moved here (all the way from Singapore). We value the opportunities it brings to us as individuals, to our children, as a family, and for the community. It has been our haven and "playground" for many years already, ranging from running, hiking, to biking. We love it and take care of it every week!
- Too many dogs.
- Please keep open to mountain biking
- I enjoy mountain biking on the Waterdog trails, please keep those accessible to mountain biking!

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Please do not restrict biking at Waterdog park. It is an integral part of the community. There are pure hiking and running trails just across from it at Crystal springs
- We need more access bike-only trails.
- Water dog Park is great for Mountain Biking. Many of the trails were created and maintained by Mountain Bikers.
- Love biking and hiking there
- Myself and other mountain bikers are part of the reason why the Open Space around WaterDog Lake is so popular. I strongly object to efforts to restrict mountain biking and completely support improvements that benefit ALL trail users
- Most parks have chipped paint, wood splinters... It would be good to identify a number to call at all parks to clean this up.
- Access for all.
- It's wonderful Belmont allows mountain biking at Waterdog. I can't thank Belmont enough for allowing this activity.
- Not enough designated areas for off leash dog activities. Belmont NEEDS dog parks!
- Please keep singletrack singletrack! Mountain bikers need Water Dog and will volunteer to maintain it. If walkers complain, sell/require bells on mtbikes to give more warning when they're coming, like Mt Sutro has done.
- The open spaces are the best thing about living in Belmont for us, but their maintenance does seem neglected.
- Too many bikes
- I take my dog every day to Waterdog park on leash and we enjoy our hike and meeting other dog lovers and friends. Please keep this park open to all especially dog lovers and bikers.
- I love taking my dog on leash to water dog and hallmark, it's so quaint and a beautiful place to enjoy nature
- We love being able to ride our bikes through waterdog park and enjoy the trails, peacefulness, and scenery
- Please designate certain trails within Waterdog for biking. Please add signage that the parks an open space are closed from sunset to sunrise. Please add rattlesnake and mountain lion caution signs to the Hallmark Park area. Please have Belmont PD patrol the entrances to the park in the evenings. Do not add trail leading this will encourage people on trails in the evening time when they are closed.
- Some parks (Hallmark Park) need to be better maintained. Some sidewalks at the parks are uneven and could result in someone tripping and falling.
- Please save mountain biking on multi-use trails!
- More dog friendly off leash areas (with grass).
- I didn't know there were so many
- Mountain biking
- The Waterdog Lake area is becoming a "zoo". Too many bikers, riding in packs, loud and lack curtesy towards others...
- Dog parks are needed with shade and grass.
- Keep up the good work.
- Adding a flow trail for mountain biking would be very fun
- Please can a municipal indoor/outdoor pool (like in Europe) be considered for Barrett or elsewhere - Belmonters are either seniors or families basically. Year round aquaexercise for seniors can happen inside, like the Mills Pool. Outside is a lap/rec pool. Perfect world: a swim-thru section connecting both :)
- Please add more mountain biking trails. Also a pump track will help. At the moment there are very few mountain biking trails available and one has to drive great distances for access.
- Enjoy biking.
- They are a treasure - water fountains always appreciated, but often break down so something more "water bottle" oriented might be hardier option.
- Oppose creating attractions with regional draw
- Archery range
- more dog access
- Continue to allow mountain bikes access to Waterdog.
- Great system but the growth of mountain biking means that more trails and access need to be added
- Used more of them extensively when my child was young, and now less often — but still appreciate them.
- Parks very nice but busy. We like quiet and nature to teach children.
- General focus on improving fields (without potholes) and existing areas (e.g. resurfacing tennis courts or updating playgrounds where applicable) would be my suggested first step.
- Our kids love the parks
- Contract out services/maintenance like many other cities and SAVE money!
- Allow mountain biking

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Nothing but I would like to know... What will happen to Barrett?
- While we like twin pines And fox elementary, we sometimes find ourselves going more often to San Mateo parks, which have more amenities.
- BIKE RIDING IS POWERFULL GOOD FOR THE HEALTH OF PEOPLE AND THE ECONOMY AND LOCAL CITY AND STATE
- They're fun
- Barrett Park is under utilized by allowing individual artist to use an enormous amount of the public space. Also limiting the access of dog owners for off leash exercise and interaction and socialization is a real loss to the community
- We really enjoy the parks, it's well maintained, but it would be great to update the tan bark to something newer like rubber floors.
- it would be great to have a skateboard park in belmont.
- More skateparks please
- NA
- No skateparks or skate spaces is no bueno!

Question 15. Other Responses (con't)

- There are still so many I have yet to visit.
- I love mountain biking at Waterdog. It's such a great way for me to get outside with my friends and enjoy nature.
- They feel worn down compared to neighboring towns
  With exception of new at Fox & Cipriani
  Davey Glen needs shade
- Please do not restrict mountain bike access at Waterdog, thank you!
- keep mountain biking an option in waterdog!
- Bicycling and walking dogs is very important in nature
- I wish there was a public swimming pool open year-round for lap swimming and during warm weather for recreational swim for kids.
  Also, I wish that the Barrett playground had better shade for the summer (and a better wind break for the winter!)...that Park is nice during spring and fall but can be really cold/hot during winter/summer.
- Belmont parks are wonderful! I travel from Redwood city to use the parks!
- Needs bike/ skate park.
- I am strongly opposed to any project that allows mountain biking in natural areas.
  The truth is that mountain biking is an anti-environmental, destructive, industry supported, self-centered activity that creates destruction where it attempts to penetrate natural lands and the public trust. Unlike the misinformation from proponents of this invasion, it is clear to see this is an industry/ bike association/single-minded advocate agenda to penetrate public programs, buildings, and natural areas for self-centered gain, whether it be corporate sales, association control, or self-centered thrills, all with undue pressure/influence on local officials and at the expense of unique treasures like local parks and natural venues. It is a strategy that plays out across the nation, poisoned by the mantra of the privatized radical individual as opposed to the common good and public trust. These spaces are meant for all of the people, not the minority of a few to pursue restricted single-use narcissist adventure. Open space parklands remain places of reflection and undisturbed connections with nature, among the diverse animal and plant life, terrain, and peace those things create. Objective national research documents the destruction that mountain biking wreaks on the environment as well as on people who want to pursue passive recreation. Despite their false P.R. promotional distortions, mountain bikers are only interested in their constant self-indulgent thrills at the expense of nature and people. It is only about themselves and their addiction, not about others, animals, birds, plant life, the environment, nature or anything beyond their myopia. It is a pathetic mutation of what makes us truly human.
  You must confront this intrusion and deny any use of the park for mountain biking or similar restricted-use disruptive activity. Do you as a city want to turn every park into yet another industry-lobbied sports complex? Parks and natural environments are not gymnasiums, race tracks, sports complexes, or circus adventure rides, despite the propaganda from the industry and IMBA bike association partners, replete with their websites, consulting, and talking points, a 21st century snake-oil medicine show.
  Do you really want the invasion of this destructive, dangerous, and restricted self-centered activity for a few with its consequent documented national history of future expansion, destruction, and danger to people (with permanent injuries and lawsuits against the city), or do you value something more: a place of reflection and connection with nature, others, and oneself, giving us our full humanity, nature's gift to us all for generations past, present, and future?

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Water dog park is a great place to hike and mountain bike. Having mountain bike in WDP for over 25 years and helped build and maintain the trails both bikers and hikers can coexist
- Keep mountain bikes on trails at WDog.
- they are great!
- They are working fine. Dog waste is the only problem.
- Belmont open space trails are treasures by cyclists- please do not take access away. Cycling groups are historically some of the most active in maintaining trails and are happy to help their community find ways to exist with other use groups.
- Kids enjoy playgrounds but will be outgrowing soon.
- Mountain Biking needs to be allowed throughout Waterdog.
- N/A
- N/A
- Belmont could use more public tennis courts
- It's important to keep access to mountain biking
- N/a
- They are a gem. I was introduced to them by my Belmont resident friends, and the the Twin Pines park in particular is just such a cool place to poke around -- hiking and biking as well as picnicing.
- Patricia Wharton and Davey Glenn parks are a joke due to their layout and offerings. Even though these are small spaces, they could have offered better facilities/play structures.
- I'd like them to be open to all users - hikers, bikes, equestrians, whatever. The more diverse use the better.
- It is nice to have parks to walk, hike, bike, and enjoy nature. Allowing all the activities allows the community to exercise and enjoy nature:
- Don't disallow the bikers to enjoy your open space areas.
- Belmont has some nice parkland for a small city. It is one of the aspects I love most about the city.
- I love mountain biking at Waterdog...it's a recognized park for MTB enthusiasts
- Penalties for people who don't leash their dogs.
- Glad we have them!
- Great parks. I like the dog stations.
- I think Belmont could use park rangers and/or open space patrol.
- Keep WaterDog open and accessible for all. I often travel to Belmont for lunches and since my daughter lives there, take my mtn. bike!
- Please preserve multi use trails, maintain mountain bike access to single track and fireroads. Please create clear rules about e-bike use.
- Allow more mountain biking and electric bikes.
- Cycling is very important to me, sharing trails with hikers and walkers and others is very important to me.
- Keep Waterdog and other Belmont Parks open to bikes
- Building a pump track would be a huge asset to the community. Pumptracks offer kids of all ages safe spaces to practice their skills. A paved pumptracks is usable by bikes, skateboard s and scooters. See the new pumptracks in watsonville for inspiration
- These places are best for young children and family gatherings. Also runners and joggers.
- we need to preserve and take care of our parks.
- Please ban bicycles from all unpaved trails!
- Parks serve kids and adults but could do better for teens.
- Thank you for the gift of over 20 years of Moutain Biking at Waterdog. I also installed a Bench with your help to commerate my good biking friend who died too young at 50. We used to tide WaterDog 3 times a week together. Great memories.
- Please keep bike trails open
- The mountain bike access to Water Dog is both unique and needed. There are essentially no other areas nearby where mountain biking is legal on singletrack trails. It should be maintained. Thanks!
- Irrigation and drainage issues can limit use of park fields.
- The park systems have been my solace during this world pandemic! Please do not close the trails to cyclists. We put a lot of sweat and tears working on those trails at Waterdog. We are a very respectful group.
- They are a fantastic location to spend time with my young child and spouse. They have everything we need.
- We need more mountain bike access
- Waterdog and Laurelwood trails are terrific. Thank you for investing in those and keeping them open to mountain biking. It inspiring a new generation of young riders in addition to those of us who have been using them for decades
- Water Dog is the only local mountain biking option that doesn't create a lot of car pollution to get to.
- Bikers are tax payers and a group that places greathello importance on park access.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Would like to see some (lighted) pickleball courts. It's one of today's fastest growing sports for people of all ages.
- Limiting trail use to cyclists would be a huge mistake. Think of it this way, would you consider limiting trail use to walkers? What is the issue with cyclists?
- Hello. I am writing to ask you to PLEASE not cave into pressure by some groups to limit access to Waterdog and Hidden Canyon park to bikes. There are a ton of people, myself included, who use the parks on a very regular basis for exercise for myself and my teenage son. It has been a critical aspect of keeping our sanity during the pandemic, and one of my primary sources of exercise and keeping healthy. While there will always be a few people in any sport who may not have great etiquette, the VAST majority of mountain bikers are just people like me -- middle aged professionals -- who consider access to this park and it's singletrack trails to be a huge benefit to our mid peninsula community. I have actually seen more situations of groups of hikers who are walking 4-5 wide on the fire road and get annoyed when I ring my bell and ask them to go by, or who are wearing headphones and can't hear you coming up behind them, than I have seen mountain bikers being ""rude"" to hikers. Putting up additional signage to remind people to be courteous and adding speed limit signs are great ideas that have worked well at many other regional parks. But I've heard that there is a well organized set of individuals who are trying to position mountain bikers as a menace and that the best solution to a perceived problem is to shut trails down to our usage. I can't stress highly enough that I believe that is a horrible outcome. I use the trails myself, and I introduced my son who has Aspergers (ASD) to mountain biking on the trails. It would be a tragedy if we lost access to this local gem. I am happy to talk live any time, and if there is an in person or Zoom meeting to hear comments from the community, I would welcome the opportunity to attend and share my point of view. I know it is shared by many in the cycling community. Thank you for listening.

- Anti-racist policy

Question 15. Other Responses (con't)

- I love riding mountain bikes at Belmont parks and would hate to see them go. I ride there anywhere from 5 to everyday if the week.
- Waterdog is an amazing asset. Mountain bikers from the entire peninsula love it. Please keep it open to mountain bikes.
- Water Dog Park is a blessing to have in our area. I am an avid hiker & mountain biker & use Water Dog frequently for both activities. Love the multi-use trails!
- Get ppl to leash and clean up after their dogs.
- We value the ability to take our dogs out to your parks as well as playing sports with friends.
- Nothing
- i love riding bikes and i want to keep being able to
- We moved here for the mountain biking
- I've been mountain biking in Belmonts parks for more than 20 years. This past year has seen an incredible increase in use and while that may be frustrating for some it would be difficult to argue that more people out enjoying nature in Belmont is a bad thing. In addition to the great physical and mental benefits it's without question that cycling also brings economic benefit to the community. From an environmental perspective there are countless scientific (not options) that have shown mountain biking to be no more impactful to the current status of the land than other activities.
- Waterdog is a great place for mountain biking. Mountain bikers must have continued access to all trails in waterdog
- Waterdog is a treasure. Keep it beautiful and open to hikers and bikes.
- mountain biking is huge here and we should make for features and designated mountain bike trails
- Great parks, well kept and great opportunity to sustainably develop well built mountain bike trails for many generations and economic benefits.
- Like to Mtn Bike Water dog

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Waterdog could be a better experience for everyone if the user groups were separated - bikers should be allowed to have more technical features and trails without the potential danger of coming around a downhill corner and into a group of people and hikers should be able to enjoy nature and feel safe without having to be aware of bikes. Multi use fire roads around the perimeter and equal numbers of group specific trails. Limiting the access of one just fosters resentment and solves nothing, fostering the separate desires of each group will make waterdog a better park and improve an already great place to spend an afternoon immeasurably
- Nice parks
- I go to Belmont & spend money in Belmont with friends specifically to mountain bike @ water dog. It's such a unique place on the peninsula
- N/A
- Waterdog is for biking! Don't let hikers take that away from us, it has been a biking spot for 30 years
- Let the bikes ride in water dog park. The people who are against it don't even visit water dog park.
- Waterdog is a great place to mountain bike and should continue to be available for bicycles
- Keep Mountain Bikers in Belmont! Keep the Belmont Mountain Biking reputation!
- Pump tracks are incredibly beneficial to youth development. They teach social skills, a love for exercise and keeping kids out of trouble. It did for a lot of my friends
- M
- Keep Trails open to bikes
- Love water dog for mountain biking. It is my only source of exercise 2-3 days a week and I frequent the park often
- Love to ride bicycle at waterdog Park area. Please don't close down trials for bike use.
- DO NOT CLOSE THE TRAIL FOR MOUNTAIN BIKING. This is not the right choice and will hurt the local businesses significantly
- Please keep the current multi-use purposes of trails and expand number of biking trails where possible.
- Please preserve Water Dog for mountain bikers.
- I love the Belmont Parks and Open Spaces and really enjoy mountain biking at Waterdog Park and have also supported trail restoration days there. I have also taken my youth biking program with youth from Siena Youth Center of Redwood City and they loved the park. It is one of the closest mountain biking parks to us so we very much appreciate it.
- Great trail network for mountain biking and ebikes. Live in San Jose and travel here to visit the park and support local restaurants post ride
- Water Dog and Twin Pines have helped get me through this pandemic. I ride my bike there, hike there, meet up with friends there. Thank you.
- Keep and enhance all cycling opportunities including mountain biking
- Keep Waterdog Park a park
- The mountain biking is excellent and the Bay Area has a long history in this sport, going back to the beginning of mountain biking itself.
- Really enjoy biking and walking
- I would love to see a pump track put into the flat space at the back of Carlmont. Our entire family absolutely loves being close to Waterdog and Carlmont for the biking. We ride our bikes thru there most days and the confidence I have seen from my girls thru biking is incredible.
- Water do park is a hidden gem for mountain biking. It is quite rare to find such good riding in a city.
- Twin Pines maintains a unique aura due it's tree canopy and creek system, a magical miniature escape right from down town. A near perfect blend.
- love the mountain biking comraderie at waterdog open space, hikers and mountain bikers share the space quite nicely
- Keep trails open to all uses
- Love mount biking there
- My wife and I really enjoy the mountain biking at Water dog.
- Mostly nicely kept
- Mountain biking is an important sport and part of our peninsula identify
- There needs to be more access mountain biking. Bike sales and purchases generate a lot of sales tax income. I don't like riding with the kids on multiple use trails and having to compete with hikers and horses. Biking deserves its own trail network and accessibility.
- Keep water dog a premier place for mountain biking.
- Love the bike trails! My kids love going out as a family and enjoying them
- Waterdog is such a great place to ride bikes for people of all ages. I enjoy riding there with my grandson.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Water Dog should be about inclusion to all users, not exclusive for those with agendas to keep users from Enjoying the open space. Water Dog is surrounded by housing and development. There's a Dam creating the lake. It's not a Nature Preserve, but a large park in the middle of a small city. To ban Mountain Biking due to preserving "nature" is not a valid position as it relates to all current human activity in and around Water Dog proximity.
- Coexist.
- The Waterdog trail system was a great place to mountain bike while I attended NDNU. It would be a shame to see the best mountain biking within rideable distance from the university taken away from the staff and faculty.
- Love Mountainbiking at Waterdog, the only park reachable by bike from RWS. Think current multi use should continue that everyone can enjoy this park respectfully to other activities
- I love the mountain biking in waterdog park. Its great to take kids into the outdoors.
- They are great
- Hand sanitizer stations would be great.
- Yes on skateparks and yes on pump tracks. Give the kids more outdoors options for creativity and exercise.
- When I lived in Belmont I rode my mtb at water dog at least 3 times a week. It's an important part of people's lives in Belmont and the Peninsula.
- Biking trails are necessary in these areas, it's a great way to encourage fitness and bring communities together
- They are great and access for all activities should be expanded so people have the ability to enjoy the resource as they would like.
- Alexander park used to be so beautiful. Now almost all of its trees have been removed. Also, we should consider putting in a dog park.
- Please keep water dog lake park open to mountain baking. There are many of us that enjoy a reasonable mellow ride in this park. We are not "crazies," just like to enjoy nature from a bike.
- Water dog is some of the best mountain trail system that is so close to home
- Mountain biking is an important part of my life and waterdog park is an amazing mountain biking location. I understand people are trying to remove my rights to access this park for mountain biking which is wrong. Mountain bikers deserve access to this park just same as walkers and hikers
- Water Dog park is the best mountain biking location in the entire Bay Area. I know of people traveling from hours away to enjoy it. The idea of removing mountain biking from this park should not be considered.
- Need more mountain bike trails- hugely popular, my entire family bikes and my grandkids and i learned to bike at waterdog park in belmont. Its great for family and community health!
- It's great to be able to bike to Waterdog and mountain bike with my 50+ year old friends and then bike home.
- Let people continue to enjoy Waterdog Park/Hidden Canyon with as few restrictions as possible. Allow mountain bikers, runners and hikers to enjoy it.
- Various improvements have been done over the years with landscaping, clean-ups, etc., but those are then not maintained and soon plants die, and improvements deteriorate. The City should also prioritize walking and biking which it has never done, so that people are generally outside more and interacting as a community.
- When we lived in Belmont they were wonderful resources for our family and (at the time) small child. I still enjoy visiting them periodically when we return to see friends, and overall they are still excellent.
- Needs to be updated with more grass areas that do not allow dogs.
- Please continue to allow all uses and increase general respect of all users for other users.
- Please do not reduce multi-use trail access particularly for cyclists. Trail maintenance, education, and etiquette guidance are ways for multi-activity users to coexist well and keep trails in good condition.
- Great mountain biking and hiking. Brings us there and we spend money in town
- Mountain bike trails are great. Thank you!
- I love the mountain bike trails at Water dog! Please do not take that away.
- expand mountain biking footprint
- Do not restrict mountain bike access. Keep mountain bike access as it is or expand access.
- Keep up the good work.
- Filling this out specifically to advocate for the preservation of Waterdog park to continue access for mtb'ers. It's one of the few local parks that allow riders. As such it's a jewel of a place to go-a closeby urban oasis for hikers and bikers. Not many cities can boast that.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Mountain biking is a feature of the parks
- I enjoy the multiple use of trails and the open trail policy
- I love water dog lake park for its mountain biking trails. Please continue to allow mountain bike access!
- I have enjoyed Waterdog for mountain biking for the past 25 years, it is my"happy place" and gives me energy!
- Water dog lake park should continue letting mountain bikers ride the trails, it's the best trail system around and a great workout for all and it's very easy to ride for all ages
- Please keep trails open to biking since water dog is one of the best areas in the Bay Area for riding
- I am thankful that Belmont offers a diversity of parks
- I use waterdog for mountain biking. It's a great place to ride. Multi use trails work when people respect each other and the venue.
- How can we expand biking opportunities?
- Belmont parks are good but need better maintenance
- rubberized pads instead of bark at twin pines, maybe incorporate natural features as part of playground like concrete hill slide with stairs by the creekside hill
- Please repave the Alexander and Hallmark Tennis courts. They are in disrepair
- Fire prevention: regular cleanup of dead trees and other fuel that can start fires.
- Keep it open and keep it for everyone to enjoy.
- We visit Twin Pines and Alexander the most and love those parks.
- The best way to stay updated on activities/events in the park.
- I would love to see more investment in parks for kids especially redoing barrett community center.
- The playground and tennis court at Hallmark park really need maintenance and upgrade.
- Tennis courts in Hallmark park need re-surfacing and overall improvement
- The tennis courts at Alexander Park are in shambles. They need to be redone ASAP. Look at the courts at Dolphin Park in Redwood City if you need an example of what a proper tennis court set up looks like.
- Add swimming and more tennis
- Please continue to support and enhance bike use.
- We love the parks. They are worth investment !
- I love the views.
- The newer playground equipment at Semeria, Davey Glen & O'Donnell is good. Keep it coming. New bathroom @ Alexander is much better.
- They are very much appreciated
- I used to use them when I lived in Belmont and I think they're great.
- Happy w/current level of communication; consider posting more to Nextdoor as well.
- I would love, love, love a bicycle pump track and designated mountain bike trails with features.
- Best things about Twin Pines for our dog outings are its natural undeveloped wooded areas (in back) and creek access. Over-developing with more facilities/amenities would likely bring rules/restrictions that ruin it for us.
- They are fantastic. Great resource for residents and welcoming to visitors.
- The field at Ralston should be regraded and reseeded or replaced with turf. Wind barriers would be great!!
- Y'all are doing a great job and I love the city's parks.
- Being able to walk from my home to playgrounds and open space areas is a big benefit of living in Belmont
- Try to keep the trees remaining in Twin Pines Park - I hated to see so many of them cut down for the bike path.
- I do occasionally enjoy the parks in Belmont, but live here because of the Multi-Use trails in the open space. I'm for any improvement to the outdoor recreation opportunities in Belmont, but believe that the recreation opportunities are limited to 'drive my kids to the park' in many instances. The rec facilities across Hwy 101 are difficult to get to on foot or via bicycle from across town, there are no dedicated, protected bike lanes or walking paths that allow for pedestrian or cyclist access to / from locations. For instance: Ralston Ave. is the only feasible corridor for east / west travel from Western Hills, Plateau Skymont / Belmont heights to downtown (Or east of 101 rec). Protected bike and pedestrian lanes would hugely enhance access and should be considered as vehicle vs pedestrian or cyclist fatalities continue to rise.
- Lovely. Bereford, Twin Pines, Waterdog.Perfect!
- It would be great to have a pool in Belmont! I have to join Bay Club or travel to San Mateo for public swimming most of the year.
- Hidden Canyon is a gem and should have options for bikers and hikers.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Belmont needs a good safe connection from upper Ralston (by Fox and Ralston Schools) to the rest of Belmont (Alameda, El Camino, 101). If there was a safe route for biking that connected all of Belmont it would greatly improve the use of Belmont Parks.
- Please replace trees that are removed. Since we came to Belmont in 2006, there have been 8 or 9 trees removed from Alexander Park and only 4 replanted.
- I enjoy riding my mountaing bike several times a year at Waterdog open space. I sometimes ride with my wife and children. Somethimes with a group of other advanced riders.
- Please put baby or swings in general at Twin Pines and College View parks...they were taken out and very much missed... also have bubble days and other days added... plant many more trees....also a map like on this survey - I did not know about many of these parks
- Keep them accessible to mountain bikers, please!
- The parks need a restroom especially for kids. Also, the play structures need much updating and the parks need an overhaul. It would be nice if parks can also have a space for kids to ride their bikes/scooters as well. In the summer it can be very hot, so it's important to provide shade. Additionally, it's important that dogs do not go where kids go as many owners do not pick up their dog poop....
- Keep access to bikes!
- Too many tall trees. They look and sound very dangerous during wind storm
- Soccer fields in schools like Central, Nesbit and Ralston are ankle breakers. Same with Barrett Community Center's field. It will be nice if they can be at least repaired or fixed to prevent accidents.
- I love Barrett and Twin Pines which I can walk to. Will Barrett still be remodeled?
- more music
- I enjoy the parks and open space as they are and don't see a big need for changes
- We really enjoy the parks. Please keep it up!
- The tan bark in the play structure areas should be replaced with a more rubbery surface. Kids are filthy after they play there.
- Waterdog and Hidden Canyon are very dangerous now due to inconsiderate mountain bikers
- I love the Organic Community Garden. It is a wonderful place which provides opportunity for social connection within the community and puts into practice the idea of environmental stewardship and sustainability.
- The fences at Fox are ridiculous. Please take them down.
- Waterdog is a terrific local resource for mountain biking for our children.
- Keep the trails open for hikers and bikers!
- Need better bigger playgrounds, like beresford park
- Not well known. Better use of space. More vegetation, and more benches.
- What the future plans are now for Barrett Community Center.
- We usually stick to parks around El Camino, otherwise we stay in Redwood Shores.
- I love running at water dog - it's been over crowded during Covid though and makes social distancing challenging.
- Who is charge? Needs more small local parks and playgrounds where adults can socialize and children play in their neighborhoods. How about tables with chess boards, no place for adults to meet in Ciprinani. It's necessary to have a dog to socialize with other adults
- The parks are so small that they aren't great for walking/running but even a simple loop makes it more enjoyable.
- I didn't realise the schools had public parks not about most of the other. Not sure if there is a section on the website describing them and their facilities.
- More multi-sport paths for bikes
- Please add aquatics like pools, water fountain, sprinklers, etc for kids.
- Repair Barrett!
- A lot of trees have been removed from Twin Pines Park. We require residents to do tree replacement, the City should be required to do the same.
- Need a skate park
- They are very beautiful
- Restricted dog offleash hours at Barret are a continuing frustration.
- love the ball fields
- More yoga in parks
- There are way more than I know about. Let people know what great parks we have!
- Love water dog for mountain biking
- I'd love for you to maintain or expand cycling access.
- Great and unique place e mountain biking
- None
- please maintain mountain bike access to waterdog park

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- Do not restrict mountain bikes!
- Best part about the parks + open spaces is the range of people who can use them, and the varienty of things for which they get used
- Mountain biking is good
- Keep access for mountain bikers!
- Limit use to sundown
- Parks are great but too geared to sports leagues. Kids who are more for arts and science have few opportunities.
- Keep mtb trails in water dog
- Mountain biking is destroying the trails.
- Parks are great and give communities a place to gather
- My wife children and I have been biking at Waterdog since 2000 when I lived on Tahoe Avenue in Belmont. I am disconcerted by the effort to shut down biking at the Waterdog trails. I have volunteered many many hours and donated close to $1000 for trail maintenance in the last 10 years. I believe that we should foster a multi use environment that's respectful of all users. I understand that hikers are often intimidated by bikers that maybe going too fast. The answer is not to shut down trails but to educate. We should put trail etiquette signs at the trailheads and critical downhill areas. We should work with Belmont are bike shops to influence riders. I for one am happy to volunteer and help lead these efforts. My email is given below.
- Mountain Biking in Water Dog is my favorite pastime. My time in the Bay Area would not be the same without it.
- Providing bike specific AND pedestrian specific singletrack is a plus. It helps all users and helps to avoid conflict.
- The condition of the bathrooms facilities (or lack thereof) making going to Belmont parks & playgrounds challenging. We usually go to San Carlos or San Mateo because their bathroom facilities are much newer and cleaner.
- Earlier mention that we have a lot of wonderful parks and need to maintain / make improvements to what we have. For the most part I believe this is the focus of Park & Rec maintenance staff currently.
- Larger play structures would be nice, especially at Barrett given the amount of use it gets.
- Please plant more trees. They cut noise from the rail tracks and Ralston corridor from traveling up and up and up. Provide shade and cool temperatures in the summer. Cut winds all year long. Definitely add more benches too!
- Twin Pines could use a little upkeep w/ foliage and trimming trees.
- Please add more playgrounds.
- Tennis court reservations are often unavailable, but go unused so courts are really available. Perhaps a small upfront payment would insure most use their reservation.
- We love the parks and would appreciate more and better tennis courts.
- I would love for a community garden or a rose garden. Wakefield park seems like the ideal park to transform into a specially park.
- Enjoy seeing the mixed use in our community - dance school, Chinese school, childcare, art studios - it really offers lots of different outlets for various needs and interests.
- Understand that mountain bikers are the primary users and resource to help build and maintain a vibrant open space and healthy community. Water dog is an amazing resource for hundreds of bikers from the entire peninsula who specifically come to Belmont to ride and spend money within the city.
- Enforce dog leash rules on Water Dog trail! Not safe
- Love the outdoor events at Twin Pines Park like concerts and movies and Earth Day
- Please resurface the tennis court at Hallmark Park. It has large cracks and raised surfaces. Someone, someday, is going to trip and break a bone on its current surface.
- I LOVE Belmont's parks & am super grateful for the parks & recs programming & facilities. I think the city does a great job maintaining diverse facilities and keeping them accessible to everyone.
- I would like to have interesting and newer playgrounds for kids.
- Field space use and reservations need to be transparent, there seems to be preferential treatment for certain sports / organizations
- My girls used to play softball at Barrett, McDougal, & BSC. Although BSC is an improvement, still in general, most other cities have better facilities for their girls. The same can be said for the soccer fields.
- more time needs to be spent by staff on maintenance and on-going upkeep

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- parks are all really small. no place to "picnic" while kids are playing. Better play structures for middle schoolers
- Doing a great job
- Better playground facilities would be ideal.
- Reserve land for ice rink
- The Barrett Community Center should be torn down and made into a new park with state of the art play structures. It is in the heart of our town and it is currently old and underutilized.
- Twin Pines can be creepy in the back area. Have seen some sketchy people. The play structure has terrible tanbark
- More police patrols
- There are only a few with playgrounds. Some of the playgrounds also need to be redone
- Belmont has excellent parks, and I think they are a huge part of what makes Belmont a great place to live. I would like to see the city acquire more land and use it to build more parks. Especially in areas like Sterling Downs, where I live, and there is so much concrete and traffic and less trees and open space than in other areas like Cipriani or the Western Hills. I would like to see the city keep cell phone towers and antennaes out of the parks, as I have seen this happen in other cities, like San Carlos, to the detriment of the aesthetics and safety of the park goers there. Along the water ways, in Twin Pines for instance, I would like to see invasive plants like ivy removed, where it can climb up trees like Buckeyes and cause damage to the tree.
- We always want more & improved parks.
- Don't overbuild Barrett when it is re-done. Open field areas are nice.
- I think the hidden canyon park that is now undeveloped would be a great place for families to picnic. Add some benches and leave the area open for the children to explore.
- Grateful for Parks & Rec employees!
- cleanliness is an issue
- Add more water features! We need places to cool off in the summer!
- We would really like a swimming facility. The whole family would use it.
- Pretty good the way they are. Spend the money elsewhere where it may be needed more.
- I'd like some wide open grassy areas to walk my dog. The biggest drawback about recreation in Belmont is that streets are poorly paved and sidewalks are limited, so we have to drive before we walk.
- Love them
- Belmont parks overall are great. Keep up the good work.
- A dog park in twin pins would be awesome
- There are too many baseball/softball fields in Belmont. Does every park have to have a baseball field to the detriment of other sports? The city could use a proper community pool (Carlmont High's is not truly accessible to the general public), more Soccer turf fields, Volleyball courts (beach and hardcourt), BMX pump track and a skate park.
- More paths / sidewalks to the parks and/ or open space would be nice. Cutting down on driving areas and making more walking/ biking spaces instead of car traffic.
- Crystal Springs CC Course isn't mentioned b/c it belongs to SF Watershed but I use it every single day and love it. It's a huge part of my life satisfaction.
- Belmont Parks and Rec does a great job maintaining our parks.
- Ralston field is a mess. I am afraid that kids will get hurt running on the field.
- I love to go there with others
- Mountain bike access is critical and needs to be expanded
- I love the Belmont parks! At different times and different stages in parenting, the parks maintained my sanity - giving my kids a terrific place to play /expend energy; a social outlet for me. I have literally spent thousands of hours at Alexander park, Barrett, Cipriani and the Belmont Library park over the last decade.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- As population density increases and our area is surrounded by large protected areas further west and south in the county, it is essential to have local outdoor options that are well developed. The parks and open spaces in Belmont are no longer virgin wilderness, nor should they be returned to that state. To minimize congestion on our crowded roads, we should have well developed local options for walking running biking and hiking to maximize the wonderful spaces that were set aside. I am concerned certain groups want to severely limit the activities of other groups. I don't think that would be equitable, especially for activities that might be "different" than one individual likes to pursue. The virtues of tolerance and respect would be admirable guiding principles for us all to keep in mind as we continue to improve our local resources and preserve for all and future generations.
- I mountain bike in water dog with my wife, children and friends 3 times per week. It's great!
- We use the current parks a LOT. For running, walking, dog walking, biking. The kids hang out at Barrett and Twin Pines a lot. We use the dog park at Cipriani. So we (multiple of us) use these multiple times per week (each). We like using these parks and consider them a significant asset to our home in Belmont. We would be upset if things changed which limited our use.
- Would like to see better weed control performed on the grass areas.
- They are awesome and super fun to bring my kids. You are doing great!
- Get rid of the illegal Soho Bike trail.
- Please make more trails accessible and make at least one park accessible to children with disabilities
- Hallmark park is so sad.. please upgrade it, tennis courts.
- Building community around our public parks is a great idea. Without a true downtown area, Belmont lacks the clear central destination that other Bay Area communities enjoy. Hoping the plans around El Camino will help change this vibe.
- Uses should remain open to all. Stop trying to add restrictions or designations.
- Keep Waterdog open for mountain biking.
- Baseball game facilities are superior to girls softball
- Please do not limit the very few mountain biking opportunities (Waterdog for example) in our city. I would really rather not burn fuel to drive to riding locations outside the area.
- A skate park and a pump track would be great for our older kids, we have plenty of playgrounds
- Please keep mountain biking at all available parks, including Waterdog
- I'm not very familiar with parks in Belmont. I tend to frequent parks that are within walking distance to my home in San Carlos
- N/A
- We love our parks and open spaces... it's one of the reasons we moved here
- We have plenty of sports fields and playgrounds for younger kids. We need more amenities like skate parks or pump tracks for middle school and high school kids.
- I think the parks are great. I take my kids three to four times a week to Central and McDougal Parks.
- We love the parks in Belmont! It's one of the reasons we've lived here for the last 12 years.
- They are underdeveloped.
- Please fix the asphalt trail to Hallmark park and the Cross Country Course. The tree roots have broken up the asphalt and it is an accident waiting to happen. This is a high traffic area with tennis courts, playground and many going to the cross country course.
- Dog friendly please!
- When are you bringing adult classes back. Maybe outdoor until we can be indoor again or by zoom like other gyms did.
- We have lots of tiny parks! It would be great to have a bigger multi-use park w/walking paths, seating areas and nice gardens/landscaping near a food area (like San Mateo's Central Park).
- It would be nice to have some grass and shade trees at the Cipriani Dog park
- Electric bikes should be allowed wherever bikes are allowed. The ADA allows for people with health issues to use an electric bike to exercise and get around
- I think Belmont has done a great job managing there Parks.

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- We have two city parks that are undeveloped, and a great need for more park space. The space at the end of Carlmont Drive should be developed into something great for the city, such as a dog park which is much needed, or a community garden, or a bicycle feature such as a skills course or pump track. We love the parks in the city and know that cost is an issue for more parks. The carlmont drive location could be made into a fantastic amenity for the city for a relatively low cost if it is bicycle oriented. It would create a safe place for kids of all ages to hone their cycling skills.
- Swimming places!!!!
- Too many eucalyptus in Twin Pines - play areas should have artificial turf (grass dies too quickly)
- Parking needed everywhere
- I love the new BSC turf field and go there for workouts during the day on weekdays. Very quiet at that time of day and high quality turf that can be used year round. Thank you!!!
- I'd love a second dog park
- We need more fields, better quality fields, better playgrounds but get rid of the tanbark.
- They are great, but we need to stay on it and keep ahead of the curve by constantly improving and adding features.
- I love Belmont parks - you are doing a great job!!
- NA
- We use and like LauriWoods a lot. It is great for our grand children.
- Improve Ralston Middle school field to turf, multi purpose
- More shade trees please. And more areas to sit and relax outside.
- Please do not eliminate mountain biking use at waterdog
- A treasure, and increased use is a blessing, not a curse. Dialing up trail etiquette signage and advocacy will do a lot for perceive conflicts
- They allow our children space to move, interact with peers, and grow.
- It would be nice to have a perimeter walking track at each of the elementary schools. That would help alleviate pressure on the open spaces, as some folks prefer to walk around their community. Also, this would help with running club at each school site that would help students burn off much needed energy.
- I would like to attend more Council meetings. But a the same small handful of people complain at the Council meetings about bikers at Waterdog wastes a large amount of time in each meeting discouraging me to attend the meetings for other issues. Please find some way to limit their complaints.
- Generally very happy with the types and amounts of parks. Thanks!
- Belmont has such a wonderful small parks spread across our little town. Unfortunately there are none walkable from where I live and the closest ones do not have any parking available. TheNew park at Davie Glen is usually filled up with apartment residence in the parking places for that could be used for the park. Maybe some time restricted parking so that people who want to actually use the park and don't live within walking distance would be wonderful.
- We love them to death. Lets work to preserve and repair what we have.
- The updated Belmont sports complex has been great for multiple activities. Well done!
- I love the pocket park near my house. I walk there daily with my dog and appreciate the plantings (especially the cherry blossoms right now).
- Shade, fields and courts are important for the community
- I would love to see the bike pump track project resurrected. Our area needs it.
- Please put in a skatepark!!!
  Sports fields (especially Central Elementary) have lots of holes and need maintenance to prevent injuries. I marked yes, for more athletic fields, but perhaps we just need to improve and maintain the ones we have.
- The playgrounds in particular do feel up to today's standards -- we go to Palo Alto, San Mateo, and Los Gatos for playgrounds.
- Plant more tree and shrubs where appropriate. Do NOT remove Eucalyptus trees or other non-native trees if they are healthy. Plant more Sequoia sempervirens.
- It would be great to have a place for youth bicycling/ skateboarding to get them outside. A bike pump-track where we can teach children to ride in a safe environment would be a nice addition.
- Maintenance is poor- weeds everywhere, Benches are sparse and or facing the wrong way
- Continue to create, enhance and focus on multi-use trails
- Mixed use makes the most sense. Share all open space. Offer opportunities to earn a sticker for learning share the trail etiquette

ONLINE SURVEY QUESTIONS

Question 15. Other Responses (con't)

- None
- Twin Pines is a real gem
- While I love how Belmont has preserved the natural surroundings and trails, the city really needs to update our playgrounds and community center. You can see how much they are aging. It would be great if the Barrett Community Center and Twin Pines Parks could be updated to accommodate both younger and older kids and have more water features. Redwood City and San Mateo have wonderful parks like Red Morton and Beresford Parks that accommodate kids of all ages and interests.
- We love mountain biking at Waterdog
- Belmont Sports Complex is a good facility that could be even better. We could expand its facilities and make it a really great youth sports complex for the city and the region. Most of the parks could be modernized and optimized to better use these great spaces and make them more appealing. With Notre Dame de Na Mur closing to undergrads, can we repurpose their facilities for the cut of belmont and its residents?
- .Water dog open space is fantastic for riding bikes with my teen daughter
- The regions open spaces and parks are a terrific resource. I use them daily to hike. Waterdog is one of my favorites; I've been going several times a week for almost 20 years. I love that it's quiet and in a "natural" state. And I love how polite and helpful the bikers are.
- Why did we add those exercise stations at Barrett? They might be in use by adults, but I've only ever seen kids play on them.
- Keep biking
- We enjoy the parks activities for kids (play structures) and for being welcoming places to meet with others.
- Please encourage SFPUC,SMCo Parks to allow dog walking and bicycle riding on Sheep Camp trail from St James rd all the way to Canada rd
- Make certain trails for bikes only, certain trails for hikers only and certain bike trails to be permanently single directional
- This is an amazing survey and full of great ideas. I am so glad you're spending the time to do these improvements.
- Would like to see Patricia Wharton Park maintained. It's usually filled with weeds an dead plants
- I would love to see the city plant more trees!
- Please work to increase the number of sports fields, and to also improve them.
- We love our Belmont parks and open space areas! Thank you for all you do!
- Appreciate freedom of mountain bikes and hiking at waterdog
- I'd love to keep Waterdog open for mountain bikes, maybe adding some bike only trails would help, and trail etiquette sessions for new mountain bikers to be respectful to hikers and other trail users in existing multi use trails.
- Belmont has some hidden bat area gems. Please keep open space as undeveloped as possible.
- I appreciate all the work that goes into trail maintenance.
- Please fix the water fountain for dogs at Semeria Park. Please add poop bags the Cipriani dog park.
- Tennis court access is so limited in our fair town, currently. It would be great if we had more options or the courts at NDNU were made available to the city. Alternatively, the courts at Alexander Park (which are great) could use wind shields and definitely are past due for refinishing.
- Love 'em

DRAFT

ONLINE SURVEY QUESTIONS

QUESTION 16. WHAT ELSE WOULD YOU LIKE US TO KNOW ABOUT BELMONT'S OPEN SPACES?

- We hiked for the first time at Hidden Valley Park trails today and thought it would benefit from more signage. At several points we couldn't figure out where we were on the map we brought along.
- I love the Open Spaces
- Over the year, I can see gradual deterioration of water dog trails. Now the ruts and gravel surface replaced the top soil making it hard to walk. I believe much of the erosion is caused by mountain bikes as many other open spaces found out. I am sure it is not due to water related soil erosion as we have not had a good rain in years. We need to limit the number of mountain bikes using open space and designated the wide trails for them. The walking trails are too narrow for them and I have seen them widening the trails by riding on the vegetation. The number of bikers have also increased dramatically. Many of them dresses to kill in full armor outfit to protect themselves in case of a bad fall. I almost feel that I need to dress like them in case we have a collision. I had too many close calls. I hope you consider banning bikes on hiking trails and at the minimum limit them to certain day of the week or certain hours. I witnessed a hiker knocked down by a bike, he zipped away in no time before we got a good description of him. If the current trend continues, I may not be going back to water dog.
- Mountain bikers at water dog open space has made hiking and sharing the trail annoying and sometimes dangerous. Recommend disallow bikes on certain hike only trails.
- I enjoy living next to Water Dog. I hike there a lot. On the weekend, it is not safe to hike in Water Dog. There are too many bikers. My family would rather drive to open spaces in the surrounding community, hike there and eat dinner there before coming home. Lately because of the pandemic, there are a lot of bikers during weekdays also. It becomes a safety problem for me. I would like to see bikes restricted to riding on the wide trails and leave the narrow trails for hikers to walk slowly and appreciate the flora and fauna. Bikers go so fast that they can only focus on the trails or they might fall into the canyon. They go too fast to appreciate any scenery. It is a waste of scenery to have bikers going down the trails. My suggestion is to ban bikes from narrow trails.
- Riding my bike in the open space is safer than riding on the road. It has kept me healthy especially during the pandemic. Please don't take it away.
- My family really enjoys the open space for bike trail riding. This is a very good activity with proper social distancing and excercise.
- I would like to ban all bikes from Belmont Water Dog Hidden Canyon Open Space. Bikes are noisy and going too fast. They like to go off trails and gradually creating new trails and bypass. They have no respect and no appreciation for the environment. They treat the open space as their amusement park. They might have a lot of fun using the trails for free. The environmental damage they created will deprive future generations of Belmont residents from enjoying natural surrounding that is close to home. By the way, many of the bikers come from all over the bay area. Why should they be able to come and mess up our open space backyard?
- As a Mt Bike enthusiast I have helped maintain and build trails. And I am a responsible, courteous biker. Do not let the one bad apple spoil it for the responsible people.
- We are very fortunate to have access to trails so close to home that are available for: hiking, mountain biking and trail running.
- I oppose restrictions on all kinds off bikes in waterdog open space
- Keep them open to dogs on leash
- I learned to mountain bike at Waterdog Lake around five years ago. Having just turned 60, I fully appreciate biking in the open spaces.
- I feel sorry for the homeowners next to and within a block of Lake Rd on both sides of Hallmark Dr because of the massive increase of people using the open space for hiking and mountain biking. The narrow single-track trails should be for hikers only as the bikers are causing safety problems and environmental damage to the ecosystem. Belmont police should patrol the area, at least during the busy use times, and write citations to bikers for deviating off of the six multi-use trails onto the narrow trails that should only be used by hikers to enjoy the nature, quiet and solitude.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Open spaces promote the biodiversity of other species which makes the earth habitable for all life, most especially humans. Our open spaces are being destroyed at an alarming rate by humans transforming habitats for their own purposes, e.g., resource-extractive industry practices, like clear-cutting trees, drilling for oil and gas, and mining; real-estate development in places that have been off limits before; and overuse for recreation. Combined with Climate Change our natural and necessary open spaces are more threatened than ever, which means their protection through conservation should be prioritized. Our local open spaces should be managed first and foremost for conservation and recreation should managed around that goal.
- We are very fortunate to have access to trails so close to home that are available for hiking, mountain biking, and trail running.
- Maintain and continue mt. biking access
- We are very fortunate to have access to trails so close to home that are available for: hiking, mountain biking and trail running.
- We are very fortunate to have access so close to home to trails that vary from wide dirt roads to narrow technical single track that are available for hiking, mountain biking and trail running.
- I love biking in Water Dog! I can bike there from my home. It has been a saving grace for me during the pandemic. I always try to be courteous, watching my speed and yielding to hikers and never biking on wet trails. It is a special, singular space.
- Leave Waterdog as it is and don't limit it as there should be different activities allowed.
- N/a
- It would be helpful to mountain bikers to limit dog walking to the wider two-track trails, as not all dog walkers pick up after their pets, and even fewer adhere to leash rules. Both of these situations can create safety hazards, especially with more trail traffic. Horses leave the biggest messes that are absolutely no fun to ride through, but dogs are much more common. There are sadly few great sections of single track on the peninsula, but Waterdog has some for sure. I would love to see more support for our sport and would love official opportunities to help build and maintain trails for everyone to enjoy the outdoors safely and responsibly. Thanks!
- keep mountain biking allowed on the trails, genuine gem of the city of belmont, brings in lots of neighboring riders of the city and includes their stimulation of the local economy
- Please keep water dog open to mountain bikes!
- Bikes and walkers cannot share narrow trails. We have come close to being hit by speeding bikes at Hidden Canyon.
- I am a mountain bike user and appreciate that ALL users are welcome.
- We have no trails near our neighborhood.
- The answer to avoiding trail conflicts in this time of increased usage is education and encouragement, not restrictions. A great example is Fernandez Ranch, which has almost no rules, but terrific and cheerful co-existence between user groups. The mantra is "play nice".
- MTB in Waterdog is considered one of the best local resources for mountain biking. Please do no limit access.
- Can Belmont coordinate with the PUC, the City of San Mateo and others to create longer, contiguous open space or trails connecting many of the great open spaces that we have.
- Designate some trails to only-bikes or only-walkers. Widen trails that are used for both to allow safer simultaneous passage.
- Beautiful. Right now, good balance for hikers/bikers, etc. Lived next to Waterdog for 15 years and have not noticed environmental problems that a few, highly vocal citizens bring up. I do not mountain bike.
- I love mountain biking here. The most accessible biking trail in the peninsula.
- I travel to Belmont to ride at Dog Park. It's a lovely park that is well suited for exercise by mountain bike, and I would love to see that opportunity preserved. It draws my family down from Marin to visit Belmont and the peninsula. I think it's probably too small a park to rationalize eBike trails--the distances are so small they'll wind up doing hot laps around the park.
- I was born and raised in Belmont and have been visiting Belmont's open spaces for as long as I can remember. I have been riding the trails in these open spaces for nearly 30 years, and the condition has barely changes in that time. Hikers and cyclists can coexist on the trails, everyone just needs to remember to consider their neighbor.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Mountain bikers on hiking trails are a big danger and liability for the City of Belmont. It is not safe to bring little kids there. The bikers are going too fast around corners. I might have to stop going there and visit San Carlos and San Mateo parks and open spaces instead.
- Nature rules
- Waterdog is a convenient place to bring my young children for outdoor and environmental education without having to drive miles to national parks. Mountain bikes are disturbing the peaceful atmosphere. The bikers are speeding down hill making it a safety issue. Their rude behaviors are bad example for my kids.
- I hike and bike in Waterdog and San Juan weekly and love, love them. I am very concerned about a local group's push to limit biking. Many of us cyclists began to mountain bike due to our interest in nature and preservation so these are not at all mutually exclusive activities.
- I have seen the Water Dog Open Space degradated over the year by mountain bikes. They damaged vegetation along the trails. Seedlings of invasive species were brought to Water Dog because these mountain bikers come from all over the Bay Area. I would like to see mountain bikes banned from our trails. Additionally the bikers are very rude and they ride too fast. It is a matter of time before I get hit by a speeding bike.
- Why are mountain bikes allowed on all the trails instead of just the wide trails? Hikers are getting run over on the narrow trails and it is very dangerous because bikers jump and speed so we have to jump out of the way. Also, the hiking trails are damaged by the bikes and need lots of repair.
- Do not block bicycle access. It is healthy both for the individual and the environment.
- I am very sad to see the destruction and damage to our open spaces in Belmont, and to our wildlife due to mountain biking activities and lack of respect for nature and anyone who's not on a bike. What is it going to take for the city of Belmont to prioritize protecting its open spaces and citizens over whatever it is that it is getting in return for allowing the mountain bikers to do as they wish with our trails and open spaces?
- Road erosion in Waterdog Lake, with more and more trees that used to hold the road together fell down, what are we going to do about it? I wonder if biking there is to be blamed. Can we plan new trees to replace the fallen ones?
- Keep mountain biking at Waterdog.
- Try to keep natural quiet for residents use and for safe walking.
- Please continue allowing mountain bike access in all the outdoor spaces. We need safe and local spaces to exercise. more restrictions should be placed on horses - and they should have to pick up after themselves similarly to dogs.
- I love the fact there is a having and bike trail right in our backyard. I bring my family on hikes and come across all sorts of plants and animals. I bike the waterdog trails and have brought my small dog to the lake. Its a great place and I would not change much about it. Its 5 min away from busy life but once you come in it feels like its miles from anything.
- We especially enjoy biking & hiking on the trails.
- too many bikes on narrow trails. too many unleashed dogs in open spaces/trails.
- On a biweekly basis, I hop on my mountain bike and ride over to Waterdog to enjoy the miles of incredible shared open space trails. Recently, I've gone with my 10 year old son and 12 year old daughter and they both, especially the former, love it. It's one of the few activities they enjoy involving the outdoors besides organized sports (which are severely limited at the moment due to Covid). And as you can imagine, any hour spent away from their devices is an hour towards good mental health and fitness. When I ride, I always carry a bell and "ding" it when I come around corners or hear people in the distance. That said, I ALWAYS yield to pedestrians and exchange pleasant greetings when we meet each other on the trails. Waterdog is one of the few places in public these days where I am reminded of the vibrant community we have here in Belmont. I have of course noticed that during the pandemic, the trails have become more congested than before, but almost everyone I see is cordial and friendly. I'm sure there are aggressive bike riders who may give a bad impression to a vocal minority. That said, I've personally run into more issues with off-leash dogs and bags of poop than I have seen involving riders. I support keeping Waterdog Open Space an accessible and sustainable place for recreation, connecting with nature and building community. In the new Master Plan, I request you to consider:

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Maintaining the trails, as they are, for multi-use for hiking, biking, dog walking, exercise, connecting with nature, etc., consistent with best practices of other open spaces
- Continuing outreach and education to trail users and groups to ensure safe and sustainable use of our trails. Encourage riders to use bells. Put up signs on riding/hiking etiquette Please do not takeaway this passion of mine and my kids. We love to hike, fish and bike at Waterdog. It would be a shame to lose the ability to enjoy the trails on our bikes.
- Waterdog is one of the best local Mountain Bike areas on the Peninsula.
- I don't like the mountain bikers speeding down water dog
- The last 20 years has had a devastating impact on the condition of the Waterdog/Hidden Canyon open space -- increased trails, destruction of riparian areas and habitat, dramatic reduction in tree cannopy, wildlife reduction ... if we do not implement measures to not only stop, but REVERSE, this destruction we will not give our children the same beautiful open space we inherited ... I'm ashamed that our generation made the world a worse place -- this same destruction we are doing in Belmont is being done on a global level ... everyone has their own excuse why they are destroying the earth and environment. This is our opportunity to reverse the destruction of WD/HC.
- Please separate bikes from hikers - it is scary and dangerous to have them on the same paths like at Waterdog.
- I thoroughly disagree with the ongoing initiative to remove mountain biking from the open spaces.
- Again, i love them. love their wildness. love running there, love that my kids and friends can bike there.
- My 12 and 14-year-old kids love to ride bikes at waterdog park. They have worked with us to rebuild bridges and to improve drainage on the trails. The outdoor community around the park has been a great outlet and source of inspiration for them, even during covid. It has taught them about service and community.
- Open spaces need benches and restrooms, but too much development destroys the character and beauty of open space. I prefer open space to parks and athletic spaces, mostly because age. But we need all options to be inclusive.
- This is one of the few areas to slow biking in all of the bay area. Please do not reduce bike access
- Having access to Water Dog for MTB use has been an excellent outlet for me to destress during the pandemic. I love being able to ride so close to my house.
- Regulations on mountain bike speed while maintaining current access
- Belmont's open spaces are a treasure on the peninsula. They should be managed for the enjoyment of all users and unfortunately there are MTBers who do not practice good trail etiquette and this affects the experience of other users. I, as a MTBer myself would prefer some management of the trails (even/odd days, limited trail access) to a ban on bikes there as it is the only weekday place to ride on the peninsula.
- Waterdog open space is the crown jewel! My wife and I were just talking about how amazing it is to be able to walk from our house with our kids (and dog) and be able to access trails. There are very few places on the peninsula where this is feasible so Belmont should invest in keeping the Waterdog trail system and hillsides well-preserved for future hikers/runners/bikers.
- DO not allow bike pump!!!
- I enjoy hiking, biking, and walking my dog in the open space.
- Our entire family absolutely loves mountain biking and hiking in Belmont's open spaces. It was one of the attractions for us to choose moving to Belmont.
- Hidden Canyon/Waterdog open space has been a successful multi-use trail system for over 30 years. The trails are maintained in large part by mountain biking groups who put in hundreds of hours of labor per year, fixing bridges, repairing trail damage, and drainage/erosion management. The result is a vibrant multi-use trail system that draws people from Belmont and beyond. Please keep up this good work.
- Essential, increase please
- We should be able to let mountain bikers use the open spaces.
- They should remain a place for ALL to enjoy outdoor activity -- not just a select few. This includes biking, hiking, trail running, whatever the folks in the community enjoy.
- Multi use is critical!! My friends and colleagues come from afar to mountain bike Waterdog with me and then eat and drink and be merry in local establishments.
- Please don't ban MTB.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Waterdog needs to seriously combat the over use of mountain bikers. They come from outside our city because it is one of the few places that allows them to get away with the destruction and dangers the present. I urge you to please change the rules that will deter these people from destroying our natural environment. The bikers add illegal trails and scare the daylights out of hikers. I look forward to the days when my family and I can safely hike through Waterdog without fear of injury.
- See above
- The combination use of Waterdog trails for hikers and bikers is VERY dangerous. I have almost been hit numerous times by mountain bikers who are riding fast around corners on narrow trails. Frankly, I am amazed I haven't been hit yet.
- I would like to preserve mountain biking use in our open spaces. It is a wonderful option for people and can be done in concert with hikers.
- We really enjoy mountain biking at Water Dog Open Space with family and friends. It is a short ride from our house, so we don't have to get in the car to get there to enjoy the beautiful trails around the lake and beyond!
- I mountain bike regularly at Hidden Canyon and Waterdog Park - LOVE IT.
- Bikers are too aggressive and riding too fast. I almost got run over several time. They should be prohibited from open space.
- Bicyclists are generally very friendly to hikers, runners, walkers in WaterDog park.
- Make open space safe for hiking and nature walk.
- Members of the ROMP mountain bike community (led by Dave and Becky Orr, Berry Stevens) hand-built a significant number of the Water Dog Lake Open Space trails during the period of 2001 -2004 with the understanding that these multi-use trails would be permanent features of the preserve. The City of Belmont needs to honor that commitment, as hundreds of volunteer hours (if not more) removed old trash and debris, along with poison oak from what was an informal trash dump. Policy enforcement, NOT exclusion needs to be embraced.
- Parks are great way to get kids of the cell phone and into nature. The only way I can get my nephews out is on a mountain bike. The more trails, the better for our community. Bike safe trails should be a priority for the kids.
- People off trail a lot destroying natural habitat. Bikers do not yield to walkers they yell coming thru as they barrel downhill on very narrow trails. Leaving you to jump in the brush. Many times there are 4or more in a row. Often i have gone for some peace and quiet only to have a walker or biker playing loud music with no earphones. Its a hot mess of stuff on weekends and evenings. Everyone does whatever they want
- I would like to keep the open space trails we have today open to dogs and bikes.
- Keep mountain biking access open and allow to continue to use single tracks
- Love the area where I live, but would like to see less traffic in my area due to Hallmark Park close by and Water Dog Trail. Not sure if we could ever build a parking facility for people to park and then walk to their destinations.
- Waterdog is a great space for everyone to enjoy (hikers, bikers, etc) and I think with proper trail maintenance and education to those using this space we all can continue to use it together
- I love biking and bike with family every month. But some areas of Waterdog trail is too narrow and full of blind corners. Some (not all) mountain bikers chase a fast speed, now making the waterdog no longer safe for Pet, children, and local family walk.
- Save the mountain bike trails!
- The mountain biking is really great, and I hope to have this activity continued.
- Waterdog is one of the premiere mountain bike riding destinations in the Peninsula. I would love to see these riding areas preserved. As user base has increased, adding multi direction trails and signage could be key.
- I think Belmont's Open Spaces should remain multi-use spaces. Hikers, runners, bikes, and dogs should be allowed. Trail etiquette signs would help with this. Excluding bicyclists from trails is inequitable. Can't we all learn to use the space together?
- If you have volunteer opportunities I'd love to help out!
- There are many parks for walking a group sports but few for real trail riding. Let's Make Water Dog a excellent place to ride instead of taking the one place we have away.
- The opportunity to be able to mountain bike in water dog is a really amazing resource. A lot of people value it, use it responsibly for that purpose and love that it is so close to their neighborhoods.
- Would love to see more MTB legal trails!

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Bike riding is an inclusive and therapeutic activity for people with disabilities such as my dad. Disallowing the use of bikes on trails would take away the one thing my dad can do that is active because he is disabled.
- Waterdog & Hidden Canyon Open Spaces have been a godsend for me during the pandemic. I mountain bike there every week, and it is for me a 'moving meditation'. I take friends hiking there as well--it's a tremendous local amenity.
- Keep Waterdog open to mountain biking
- Open spaces like Water Dog in Belmont have been an amazing part of my life. Having a area near my house to progress my biking skills with my Dad and younger brother was amazing.
- Having regular and fairly easy access to parks and open spaces has been a privilege during this unprecedented and challenging time. The facilities have been heavily used by local residents and tax payers as well as a lot of people from outside the area. I've been a resident and tax payer in the area for more than 20 years. While it's important we welcome visitors when and where we can, my experience is that the City government seems to work very hard trying to accommodate the needs and wishes of people who either don't live in the area or don't pay taxes (or both), frequently to the detriment of residents and tax payers. I hope this plan reflects the long-term needs of those who live here and pay the taxes that make it all work.
- Please keep them quiet and relating to nature. Please do not allow any sport activities within open space. Keep the atmosphere serene for the sake of animals and humans. Where else can one go to expect such solitude?
- Belmont currently provides fantastic mountain bike trails for the community. Many of these trails would not exist without the active participation of the mountain bike community. Please keep the trails open to mountain bikes in the Waterdog open space area.
- the more opportunitiea people can have to apend more of their lives outdoors, the better our society is.
- I have lived in Belmont since I was 5 years old (25 now). I became interested in mountain biking at a very young age, and having access to the wonderful trails in the Waterdog Lake area helped spark this interest into a life-long passion for mountain biking, outdoor recreation, hiking, and in general, appreciation for nature. I think it is very important to preserve access to this unique and amazing trail system for all uses (biking, hiking, etc.) for generations to come.
- As a mountain biker and trail runner, these open spaces are awesome!
- How you work with privately owned open space that is adjacent/borders public space but users do not know that and end up causing damage (bike riders)?
- I'd like to see the trails remain open to mountain bikes (non-electric). Belmont has beautiful open spaces and it's a pleasure to enjoy them, even from as far away as Menlo Park.
- Waterdog is the only place in Belmont and the surrounding communities where cyclists have access to local trails. In particular, it is a great location for singletrack, technical trails. It is a wonderful place for children to learn to ride and for an after-work fitness ride.
- I am both a hiker and easy-level/intermediate mountain biker. At Waterdog though, I am primarily a hiker although I have biked there too. Please do not limit or prohibit mountain biking at Waterdog. All the bikers I've countered for over 3 years now are polite, show etiquette, they will wait for me when I'm hiking. We can all co-exist and have fun at Waterdog. And especially for youth, the only other mountain biking option would mean driving which young people may not be old enough to drive yet or may not have a car. It is such a healthy sport that builds character and perseverance. I would be willing to contribute to a Waterdog fund if meant mountain biking could stay exactly as it is. I would be willing to go do trail maintenance if that meant it could stay as is. California was the birth place of mountain biking but more and more, it seems people who don't understand the sport are turning against it. We can't let that happen.
- Please continue to permit Mtn biking in Waterdog. There should be equity foe all parties who use the park. Think outside of the box. If there is a concern, have alternate day use. Eliminating bike use would not be fair.
- Waterdog's rustic qualities are wonderful!
- Walking should be acomodated.restrict by cycles out of area users.
- Bike riding should continue to be allowed along with dogs.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- The mountain biking in Waterdog is super fun but could definitely use some work to make it safe for everyone that uses the trail system. Organizing and rallying the community for volunteer days to improve conditions would be awesome.
- Access to trail systems for mountain bikers is an essential component of maintaining interest in the outdoors in our area. Please don't further limit access to trails for cyclists, it's already difficult to find places close to home to enjoy our sport and passion
- Keep it wilderness. No facilities like skate parks, bike bump tracks, etc. Allow official trails only. Reserve certain trails for walking only. Ban motorized vehicles. Adequately fund and staff for vigilant maintenance. Enforce regulations.
- more access for bikers on trails
- Allow us to continue mountain biking in Waterdog
- Water Dog should ban all biking. Most of the bikers are from out of our area and are a menace on the trails.
- It is a great place to go for a bike ride and due to the variety of trails and option I can vary my ride based on time and energy.
- I feel very strongly that outside interest groups (i.e. the Sierra Club) have no business in telling county residents how they should engage in healthy outdoor exercise (i.e. biking) in county parks. It's absolutely hypocritical that they bemoan the lack of interest in younger people in the outdoors, then actively work to block young people from engaging in outdoor sports like mountain biking.
- Remove bikes from the open spaces. they destroy trails and cause trip hazards that could result in the city being sued.
- Segregate areas for peaceful hiking from mountain biking.
- As an older biker I try to be an ambassador for mountain bikers. I do wish more trail were open to those of us who just want to view the trail just as the hikers are able. Bikers feel penalized because we are allowed to ride certain areas.
- Waterdog is a great place for Mountain Biking, and it would be a shame if access was reduced.
- Please keep Water dog open to biking. Water dog is a legacy park for biking and should not be reclassified.
- I frequent Waterdog twice weekly to mountain bike. I have done volunteer work on these trails. I am a safe, courteous rider who yields to hikers/runners and other trail users. Most mountain bikers do the same. There will always be some bad apples but this also includes hikers and runners who have headphones on and do not hear the bikers who are using their voices loudly to let them know we are coming up on them. So if they are startled that is because they have earphones in. Also, a lot of runners/hikers have their dogs off leash which also is dangerous to cyclists. So I understand trail conflicts but we can all do a better job at making the trails safer. It is not just mountain bikers that can create tension out there. I love this area to bike in. I do what I can to help maintain these trails. It helps decrease my stress and gives me a chance to connect with nature. Please do not close these trails to cyclists. If anything, I would prefer that we all come together to work on strategies to mitigate trail conflicts instead of just closing it to a segment of the population. Thank you!
- More BBQ areas
- Great place to go riding. Have taken my 2 year old daughter to ride on the flat dirt area before trail. She loves it. Great place to relax
- Water Dog park is a gem; When moved here in 2014 didn't know about it, but has been my go to when I want to get a quick bike ride in. No need to jump in the car and add traffic and pollution.
- Mountain Biking is a family sport that promotes a healthy lifestyle. It brings revenue to the city.
- more single track mountain bike trails
- These are a rare resource. First, please protect them. Second, please make room for bicycling -- this is the future.
- I do not think mountain bike use in Water Dog Lake open space should be restricted or limited. Also, open spaces should be for recreation, not just "contemplation" of nature. Let's move away from the old, exclusive way of thinking about our community, and welcome people from all backgrounds to use our parks and open spaces.
- Biking at Water Dog Lake is a great afterwork ride on the way home. If I could afford to buy a house adjacent to it I would.
- I have travelled to Waterdog Lake specifically for mountain biking with friends living in Belmont for years, both while living in San Mateo County and living elsewhere in the bay area. I hope that it's excellent multi-use trail system continues to be a safe place to hike and mountain bike for residents and visitors alike, as it's location provides easy access for those living on the eastern side of the hills of the peninsula.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I have been riding my mountain bike at Waterdog for over 10 years and really enjoy the trails it has to offer.
- Waterdog is incredible! It's key to my mental health to have somewhere to bike and be forced to fully embrace the present moment. It's my meditation!
- Please keep Waterdog open for mountain biking :)
- These are a major factor in why we love living in Belmont so much. Our open spaces are truly essential to our community and sprit and need to remain open to all including bicycles. As we have seen during the pandemic- these areas offer true natural outdoor refuge under local control. Maintaining the open spaces I believe is of utmost importance to the future health and well being of our community.
- Love riding Waterdog. Please do not greatly restrict cycling there.
- My family use waterdog for biking and as part of my commute. If biking were limited it would lose my support.
- Keep the mountain biking trails!!
- I love the open spaces! Keep them open and awesome! I also love mountain biking in the open spaces.
- Belmont is a great place to enjoy the outdoors. Keeping trail access available for ALL trail users is the only way to provide a chance for everyone to enjoy them. Furthermore, expanding trails and the existing trail network would alleviate crowding and provide volunteer opportunies for those looking to serve.
- I have enjoyed mountain biking at Belmont's Water Dog Open Space for many years. It is the closest Open Space to where I reside and has some of the best legitimate single-track trails in the Bay Area. As a female mountain biker, I have found most hikers and mountain bikers there to be very friendly and encouraging. I always try to be very courteous to hikers, watch my speed, and give them the right of way. Water Dog is where I can get away and enjoy nature and the peace and quiet while getting exercise 2-3 times a week. It would be extremely upsetting if trails were not open to bikes. Please keep them multi-use.
- What trails there are and what they're like
- Having access to mountain biking in Belmont has given my teenage son and his friends a healthy outlet to exercise, be in nature, and improve their riding skills. They have proper trail etiquette and yield to hikers (and horses, elsewhere.) They are respectful of the trails and the people who use them. It is because of local accessible trails like these in Belmont, that these teenage boys are growing up healthy and having fun, (I.e. not needing to turn to drugs or other illegal things.) Instead, they have been able to acquire and hone skills and an activity (mountain biking), that they will take with them to college and through life! Please keep these trails open to mtn biking to give our youth (and adults) a healthy outlet.
- Access to open space within city limits is very important and not every city has it so I believe that access to locations like Waterdog for everyone is critical.
- Waterdog Park has been singly responsible for fostering my kids love of mountain biking. Due to its proximity we are able to ride there frequently. My hog school kids and their friends who also ride there recently organized a bike donation for distribution to underprivileged children of San Mateo County. They have learned comprehensive bike repair and building as a result of their passion for riding. They have gained independence by learning to ride to and from Waterdog end ride responsibility without parental supervision. They have learned to appreciate nature and litter management on trails. The reason I mention all of this is it's all traceable back to Waterdog Park and the passion and life lessons it's fostered
- Waterdog park is a really amazing place to ride and I feel it is very important to keep it open for bikers and add more trail signage so that speed limits and trail usage is understood better.
- Waterdog park is a great resource for mountain biking
- I volunteer with a local high school mountain bike team, and kids having access to local trails they can ride their bikes to is critical in times like this with COVID and way too much screen time etc. Please add more trails with mountain bike access and continue to maintain the waterdog trails with volunteer trailwork so the kids have local places they can engage with and volunteer at that is connected to something they care about.
- Waterdog is special for mountain bikes - unique even. Please keep it open for mountain bikes. Harness the energy of the local mountain bike community - we will help to build and maintain trails, clean the open space, etc.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Water Dog lake is why I took this survey - to express my strong support for it to remain open for mountain biking. In addition to being good for hiking, it is a great place for both mountain biking and trail running. The Carlmont track and cross country teams train there regularly whether as a team or individuals, and I think it is a big part of their success.
- Water dog park should be enjoyed by all: walkers, runners and mountain bikers.
- Maintain multi-use access and activities to best meet the needs of the whole local and greater communities. Belmont offers unique outdoor spaces around SF Bay that many people enjoy in a variety of ways, and that are readily accessible before and after work on weekdays in addition to weekends.
- Even though I live in San Jose, I work in San Mateo and found Waterdog Lake Open Space as a convenient place to get in a quick ride on my mountain bike before work. I've also encountered many teenagers from the local area who tell me they ride at Waterdog Lake Open Space because it allows them to mountain bike without the need to have their parents drive them to the mountains.
- The trails are well used by students getting into mountain biking and practicing for races. Please don't take this space away from them. This is one place they can get to without needing parents to drive them.
- The mountain biking resource that is Waterdog dog is of immense value to the cycling community. Have been enjoying for 20 years and the benefits to my health and happiness are immense. There is no other mtb trails system nearby.
- Access for all to Open Spaces critical. Mountain biking community is under-served in Peninsula, yet is fastest growing segment of Open Space use
- More mountain biking access please not less
- I like the biking trails.
- Waterdog is the only place in Belmont and San Mateo County where cyclist have access to local trails. It is a wonderful place for children to learn to ride their bikes and for an after-work fitness ride. Waterdog's trail were built by mountain bikers and the volunteer opportunities allows us to give back to community.
- There needs to be areas designated to bikers and areas designated to hikers so that both groups can enjoy themselves peacefully
- I am firmly in support of mountain bike access at Water Dog Open Space. Reducing trails and limiting access is not the answer; building multi-use climbing trails and responsibly-built single-use descending trails is a great path forward for this particular area. I would also like to see more trail stewardship in Water Dog, as many of the trails are rutted and in need of repair. Volunteering events and paid professional stewardship are top of mind for me.
- Love the bike trails and riders should be encouraged to follow trail entiquete
- Open spaces need to be open to all users. That includes hikers/walkers, equestrian, and bikers.
- Waterdog is the only place in Belmont and San Mateo County where cyclist have access to local trails. It is a wonderful place for children to learn to ride their bikes and for an after-work fitness ride. Waterdog's trail were built by mountain bikers and the volunteer opportunities allows us to give back to community.
- I strongly oppose limiting mountain biking in any form - walker/hiker complaints can be handled with awareness campaigns that target everyone. As a mountain biker, I sometimes also encounter disrespectful mountain bikers - but also disrespectful hikers, dog wakers, joggers, etc. But that is a minority, and we, the decent majority, can influence and educate those less mindful of their surroundings without municipal bureaucracy.
- Belmont's open spaces are truly their strong point. I grew up riding bikes in the various open spaces along the peninsula and was formed by the passionate group of riders I met through the trail systems. When Passion Trail Bikes used to host trail maintenance days, I learned how to effectively perform trail maintenance to make enjoyable bike trails that were sustainable in the local environment. I believe the open spaces can be improved by incorporating more single use trails to improve biker and hiker enjoyment while sustaining the local ecosystem. One form of enjoyment doesn't have a larger impact that the other, simply different impacts. Single use trails allow more targeted approaches to trail creation, maintenance, and use which improves everyone's satisfaction. It also gives the community a greater say in their own interests, and potentially brings in more volunteers. Not every trail needs to be rideable by everyone, having a variety of trail types and difficulties reduces negative interactions and leaves everyone with a more satisfying experience.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- people who come here to ride mountain bike trails also stop and eat and drink nearby after riding.
- I love mountain biking At waterdog
- LOVE Waterdog
- My sons, friends, family and I use Waterdog Lake Park for regular mountain biking, and have for years. I also use the trails for hiking and walking with my dog. I understand that there is a movement to remove biking from this open space. This is where my sons grew up biking with their friends, and where I learned to bike with my son and his bike team. These kids still frequent the park for training, and can ride there from their homes. If access is denied, where will the kids go biking, especially the younger ones who cannot drive? What will they do with their time when they are bored, and usually decide to take to the trails? Should they sit inside and play video games instead? Or hang out and get high behind grocery stores? Remember who uses those trails, and how they use them, and what will happen to those groups of people when the trails are taken away. Is this really better for the community?
- Belmont has a strong and growing mountain bike community and we are lucky to be one of the few cities that allow younger kids to enjoy nature by riding bikes. Middle school and high school students are not likely to use these trails on their own unless they are into mountain biking and this should be encouraged in the city.
- Waterdog is a great park for mountain biking with friends and family while enjoying nature and still being close to everything. All open spaces should allow bikes on all paths.
- Please maintain bike access at Water Dog
- I love mt. biking at Waterdog park. Over the years I have volunteered to help maintain and helped to build the new trail around the lake. I hope you maintain mt. biking access to the park as it is one of my favorite places to ride.
- They are great, and a light touch would be better. Trails are extensive enough, not looking to the city to drive increased usage or increase amenities.
- Open spaces are critical for cycling. Having local open spaces that kids can get to without parents being required to drive is so important for kids to get outside and have fun. Limiting open space or trails would be a major negative in my eyes.
- I really enjoy mountain biking in Waterdog Open Space and would be very disappointed to see changes made that preclude me from that enjoyment.
- Our family loves mountain biking at Water Dog. It's a wonderful community and affords a unique option for us to ride as a family. It's very important for our kids and our own recreational welfare and enjoyment of nature near our home.
- Waterdog is one of the few places to go mountain biking. It would be great to expand the trails for that purpose, as there aren't many places available to mountain biking in the bay area.
- In Waterdog Open there has been destruction of parts of singletrack trails. I am unsure of whether it was a poorly guided initiative by the city or one by someone trying to illegally modify the trails on their own accord but it has ultimately worsened the trail system. An example of this is on upper creek trail in hidden valley where one part of a fork in the trail was destroyed and the consequent rubble left the remaining lower fork dangerously narrow. It isn't unfortunate to see the quality of these trails ruined for no apparent reason
- One of my favorite things to do from home is to ride my bike to Waterdog for mountain biking. Belmont has a unique resource at Waterdog that provides an outlet for a quick trail ride from home and that does not require a car trip for many users. I do this alone and with my entire family a couple times per week. There is a strong community of mountain bikers in Belmont and the surrounding area who treasure this accessible and amazing resource.
- Please preserve Waterdog trails and add more trails for mountain biking where possible
- Designating the park as a wildlife preserve makes little sense. The park is surrounded by all sides by residential development. The wildlife that habitates there has adapted to the presence of humans. There is no need to designate this 300 acre park as a wildlife preserve when there is a 23,000 acre wildlife preserve just on the other side of 280, the San Francisco Public Utilities Commission Peninsula Watershed. During COVID-19 the demand for trails increased significantly and they have become more crowded and there is a clear demand for more trails. I am glad that more people are going outdoors which is amazing for public health. Informing people who may not have gone outdoors as much prior to COVID-19 about trail etiquette may be good.
- Plans to increase open space

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Keep waterdog open to all users! Expand access as much as possible.
- These are such an amazing public resource for multi-use activities, please do not add any new restrictions on how these spaces can be used!
- The multi-use access is great. I take full advantage of Water Dog Park, walking with our dog, hiking, trail running and mountain biking. It would be a shame to limit use and access due to the voice of a small vocal group.
- I love WaterDog. The Trail Stewards have done an unbelievable job creating and maintaining the trails for mountain bikers. Without their work over the last 10-20 years, we would not be blessed with such an incredible local/ close/ fun/ accessible resource to mountain bike locally. Truly a gem, and so lucky our community has it.
- How mountain bikers have been dedicated for trail building and maintenance at Water Dog Park. The volunteers have spent significant time.
- My family has lived in Belmont for over 50 years. My kids and I love to bike and hike the Waterdog Open Space. Please keep all the trails in the Waterdog Open Space accessible to mountain biking. Thank You!
- More trails for ALL user groups, multi use trails.
- Please maintain multiuse trails for biking/Mtn Biking
- Love the open space. Love that we can bike but we need more green bike Lanes in Belmont
- We are a biking family that is always looking for a safe space to ride bikes with our young child.
- Waterdog is a treasure and I love it for hiking AND biking!
- I enjoy biking the trails at WaterDog weekly. Belmont is unique among Peninsula cities with the amount of well maintained trails for riding.
- Biking is very important
- please keep open space open to all and promote proper trail adequate to all
- I am adamantly against a "controlled burn" of the open space.
- Multi-use pathways and/or calendar day-specific use would help mitigate trail conflicts.
- these are vital to the community and why I enjoy Belmont, these spaces should be kept open to all activities and not limited to select users.
- More bike trails are needed.
- Keep mtb trails open
- The bike trails are an amazing place for people to socialize while getting healthy exercise. Save them:)
- Belmont has the best mountain biking trails around
- Please keep Waterdog Park open to mountain bikes.
- Would love louder announcement of waterdog maintenance volunteer opportunities
- The trail network for mountain biking is great, but I think it may be time to have designated directional trails. I.e downhill only trails. Lots of other areas I cycle have these rules. Simple signage helps. As well as signs to remind others to keep their ears open for oncoming cyclists. It's a group effort to keep everyone safe and keep these spaces open to ALL who enjoy them.
- Waterdog Park is a gem for mountain biking and should continue to be. Additional signage for trail etiquette could help with reminding people how to use trails politely, but, in my many, many visits there, both for cycling and hiking, I have never felt unsafe.
- Mountain biking on singletrack trails in Waterdog Is spectacular. It should be welcomed and expanded for kids and adults. Too many people drive long distances to mountain biking trails, limiting access to the sport. Waterdog is a gem for mountain-biking Belmont residents and everyone in the Bay.
- Water dog is a gem for Bay Area mountain bikers. I use to live right near the park and loved riding and hiking in there. I still enjoy visiting from SF.
- Reducing biking access will lead to riders poaching trails and increased conflicts with hikers. Increase access for all trailer users is the best option. They're plenty of hike-only trails throughout the Bay Area. Multiuse trails must remain available.
- Please keep tails open for mountain bikers. Mountain bikers as a whole are very keen on trail etiquette, safety, community, and respecting nature.
- Waterdog is SUCH a gem on the peninsula, it would be a shame to limit its offerings
- Keep them open for bikes!
- continue to allow mountain bikes in the open space, it's one of the few places available in the area
- Variety of activities means it is inclusive
- My entire family of 4 loves to bike at Waterdog. We really encourage you to consider enhancing the biking opportunities in this open space for bikers of all ages. A rolling park / pump track area with picnic tables at the base has been a valuable asset in many other communities for kids and adults of all ages.
- Please open all trails to all bikes including class 1 Ebikes
- bikes need to continue to have access to the park

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Some of the best biking is at Waterdog Lake. It is a treasure and I hope it will not be taken away. There are few other good biking trails that don't require a drive.
- I love Waterdog Park and the current freedom for all users to enjoy it.
- I love water dog park, I run there all the time, I appreciate the lack of restrictions that lets everyone enjoy the park, I've never had bad experiences with any of the different users
- Safer bike routes to Belmont parks and open space would be great. Especially the corridor between the bike bridge to Twin Pines Park. I have been hit by a car while riding my bike across Old County Road at Masonic and I have seen others get hit at the same intersection. Crossing El Camino on a bike or on foot is downright dangerous and scary. Light up cross walks when you push the walk button would be a HUGE safety improvement for relatively little cost.
- This is the one place that I can come and connect with nature on my bike. This has helped me improve my fitness and recuperate with my spinal injury and asthma. Please don't take it away.
- We enjoy biking Water Dog :-)
- Maintaining bike access at Water Dog is essential! It's the reason I still come back to visit Belmont, to ride with friends and family at Water Dog and then visit the tavern afterwards for lunch!
- Waterdog park should remain open to bikes
- Love using the space for mountain biking
- Working well for us.
- Water dog is great! It doesn't need to change, just needs to be maintained. I am always respectful on my mountain bike and hiking with my dog. We have never had or seen an issue I'm in the last 4 years.
- Please continue to allow biking on the trails in Waterdog park so everyone can enjoy the area in multiple ways. I find the cyclists to be courteous, cautious, and respectful of the hikers on the trails.
- keep them open. water dog is one of the few places with decent mountain biking trails around the peninsula.
- Please continue to allow mountain bike access as well as improve trails. If possible expand trails for all of us to use.
- I bike frequently at Water Dog and find it to be an incredibly valuable resource. I find that trail users of all types (hikers, runners, bikers) get along well. One recommendation to consider would be use of bells on bikes. I ride with a bell on my bike and I get lots of thank yous from other trail users. We could consider having "loaner" bells at the trailheads that riders without bells could attach to their bikes. San Luis Obispo County has done something along these lines: https://www.cccmb.org/bells4bikes
- Belmont maintains some of the very few parks and open spaces that allow cycling. Cyclists helped build and maintain many of the trails in the parks they have access to (example: Lake Loop at Waterdog), and are an important asset to parks systems.
- I would like to see more Mountain Biking trails
- Need to continue to allow bikes in open spaces
- Increase opportunities for mountain biking
- We love mountain biking! Ketchum, Idaho is a great case study for excellent management of multi-use trails to benefit all.
- Waterdog park as a mountain biking venue is one of the best places on the Peninsula, I have considered moving my family to Belmont just for this reason. Please do not limit or restrict mountain biking in Waterdog Park in favor of other so-called "more compatible" activities, since that is just a subjective point of view. Instead, focus on making it a place where all families can do all sorts of activities with a minimum of conflict.
- Please keep Waterdog available as a biking area.
- water dog is a treasure. please preserve access for mountain biking
- Thank you for providing great outdoor spaces! Given the strong increase in mountain bike participation over the last few years, I suggest we add additional trails in the Open Spaces so we avoid user conflicts. Simply banning bikes will not solve the issue of insufficient space.
- There is an organized group trying to use this survey to get you to limit mountain bike access to the open space. you should not consider the survey a 'vote' no matter how many of the same sort of comments you get it should be considered on the merits. One great insight is worth more than a thousand terrible ones
- How will Belmont make the parks and trails open to all visitors.
- Having trails that allow mountain bike access is attractive and brings me to Belmont regularly to ride my bike.
- Have loved cycling in WaterDog park for years, it is a rare gem and access to all users should be protected!
- Keep Mountain Bike access open

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Preserve the open space. There's is plenty of room for everyone and all activities.
- Keep them open to bicyclists.
- I'd like to maintain cycling access to Waterdog Lake - it is one of the very few areas where mountain biking is allowed.
- Water Dog park is one of the only places I can mountain bike and take my dog - many of the places in Palo Alto do not allow animals and are too far to travel. In the pandemic, mountain biking is crucial for my mental and physical health as my preferred sport - please keep Water Dog bike and dog friendly!
- The water dog mountain biking community (eg trailkeepers) is a great group.
- I really enjoy the open spaces! I wish some of the bicyclists would not go so fast, but overall I feel safe. Most of them are very responsible.
- I LOVE the bike trails
- Maintain biking access to waterdog park, one of the best in the peninsula.
- Please keep mountain biking access open!
- Our entire family loves to mountain bike at Waterdog open space. It is such a wonderful asset for Belmont. The space is well used and maintained. It is our favorite part of Belmont!
- Water Dog is a gem! Love the multi-use trails for hiking, dog walking, and especially mountain biking.
- I strongly support multi-use in the open spaces. This includes cycling and hiking together. I'm sure each group can find people misbehaving in other groups, but as someone who regularly does both activities (as many do), I am really against outright limits/restrictions rather than encouraging good behavior during shared use.
- The hikers have a problem with mountain bikers in Belmont more than anywhere else. No reason why they cant share the trails just like every city in California does.
- Please do not ban mountain biking at Waterdog. This has been a great place for me and my kids to enjoy biking together safely. Thank you.
- Please keep Waterdog open to mountain bikes.
- Having Waterdog as a local, ride from the house, mountain bike option is a unique and amazing option that adds housing value and supports local bike shops.
- It would be a shame to exclude mountain bikes from waterdog because of a few bad interactions. Whenever I ride there I see ten friendly encounters for every bad one and that is much better than it was 10 years ago when I lived closer and rode there more often.
- I appreciate the multi-use trails you've made available to the community. As a result I and many of my friends visit local restaurants and small businesses.
- Please do not restrict biking at waterdog
- All trails should be multiuse. If crowding becomes a factor, allow mtn biking on odd or even days (as is done on some other high traffic trails).
- Please allow use of electric bicycles as OPDMD (Other Personal Disability Mobility Device) on all trails.
- How can we build/access/advocate for more mountain bike trails?
- Waterdog is the only place in Belmont and the surrounding communities where cyclist have access to local trails. It is a wonderful place for children to learn to ride and for an after-work fitness ride. Waterdog's trail were built by mountain bikers and the volunteer opportunities allows us to give back to community.
- Keep mountain bike trails open. Expand access
- Waterdog is an amazing local trail network that has provided hundreds of hours of use for myself, friends and family. When there, I typically purchase goods from local Belmont shops. I'm a biker and hiker and am upset to hear about the initiative to limit biking there. Trail etiquitte is the best cure for these backlashes, everyone needs to be aware that bikers are present. If the trail network was expanded to the other side of 280 (where the cross country course is) there wouldn't be as much congestion in Waterdog.
- Keep OS open to all ages and activities, post trail etiquette signage. Perhaps recommend limited group sizes? As a mountain biker who frequently visits Waterdog and San Juan OSPs, large groups of hikers or e-bikers can be annoying. If I could, I would revise trail etiquette to recommend small groups of no more than 6 individuals. Large groups of hikers and e-bikers seem to cause the most trail blockage and stoppages. Groups of hikers block the trail and large groups of e-bikers force you to stop and pull over to let them pass. Same could be said for large groups of analog mountain bikers, I suppose!
- The mountain biking at Waterdog is what brings me to Belmont. I like grabbing lunch there afterwards.
- Save the environment

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I'm against turning Waterdog into a Preserve which would limit access and activities in the open space.
- Please preserve mountain bike access in Waterdog
- Through the pandemic, mountain biking has been a saving grace for my family. We would love to have more opportunities for riding mountain trails
- More trails for hiking, biking, and allow dogs on leash. Shaded trails are good. All ability trails. Not generally in favor of ebikes, except on one way/ wider trails
- Keep mountain biking trails
- The mountain biking paths are quite high quality and I feel very fortunate to have such good mountain biking paths so close to my home (2 miles)
- We need more dedicated bike trails.
- Mountain Biking is not a CRIME
- Belmont is a great place to live due to access to trails and nature for both myself and my family. If mountain biking were limited I would 100% consider moving out of Belmont.
- Maintaining trail access for all kinds of users is important. Waterdog is a widely enjoyed mountain biking spot for users of all skill levels. Safe trail usage does not need to exclude any type of usage, it requires communication and understanding amongst all users.
- They need better parking lots with restrooms
- Some of the trails used in multiple ways (Bike, Run, Hike, Horses) could be time-shared (eg. even/odd days of the month) if there is too much conflict. I don't think that needs to be for all trails, just those that see a lot of multi-use. Other ways to mitigate conflict are: single-direction trails, required use of bells on bikes. Some or all of these measures can be applied with sufficient forethought on the impact to the user's enjoyment.
  Trail design and maintenance is critical for the environment as well as our enjoyment. There are groups that specialize in this and should be consulted (eg. Mountain Bikers of Santa Cruz have a great reputation for creating both hiking and biking trails in the bay area).
- I really appreciate the effort to send the survey out and capture the community's feedback! Thanks all.
- There are municipalities all across the US (and world) that very successfully manage/operate mutli-use trail systems in open space areas with little to no user conflicts. I would hope that Belmont in the heart of Silicon Valley could also be a leading example of a modern approach to multi-user trails. There's no reason to reinvent the wheel here - simply copy the strategies and tactics from some of the best managed trail system municipalities in the country.
- We love to bike with our dog in Waterdog Lake Park -- It is fantastic. The recent trail work is marvelous and we would love to support it in any way we can.
- Please maintain bike access in Belmont's open spaces.
- Waterdog is a a great outdoor space for all sorts of activities - please keep it open to all. and a bike pump track would be a super addition.
- Waterdog shall remain open to bikes!
- The main exercise my 11 year old and I got during Covid was mountain biking and Water Dog is a favorite.
- Belmont's mountain biking trails bring me so much joy and help me stay fit. The canyon is so beautiful and challenging. When I ride I always use a bell so that hikers hear me coming... Hikers often thank me for the bell. Requiring bell use could be one way to ensure bikers and hikers can use the trails safely together.
- Waterdog played a part in my learning to mountain bike, and it's a great place for riders, new and experienced, to enjoy nature together and share memorable experiences
- I visit Waterdog to mountain bike. It's some of the best urban-adjacent mountain biking on the peninsula, and it would be a tremendous loss if mountain bike access were restricted or revoked.
- Waterdog Park should remain open to mountain bikers. it was our go-to site when I was teaching my son MTB riding skills. User conflict on the trails and high usage can be mitigated. Measures could include: alternating days of access for different user groups, a bell box program, directional trails, or realignment of problematic trails.
- Please keep these open to mountain bikes and dogs. We can all coexist!
- Please keep bike access at waterdog! We can and should get along, bowing to special interests on this is anti-inclusion
- Please keep Waterdog open to bikes. I've been riding it for the past 20 years and it's a special place. Put effort into a respectful riding outreach program if necessary, but please don't ban bikes. It provides a unique and accessible location for easy access to outdoor exercise.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Please keep waterdog accessible to bikes. Limiting e-bikes is probably a good idea.
- Stop Villainizing cycling from the complaints of a few people who don't understand.
- Biking and hiking at Waterdog openspace is very nice. The trails are well maintained and welcoming for all.
- Please keep open spaces open to Mountain bikes
- Love Waterdown open space. Mountain biking is great, fantastic trail network and overall very nice people I have encountered there. Also hike and walk the dog in many trails there. A fantastic mixed use park that is close to home and fun.
- Water Dog open space is a critical part of my weekly routine. I ride my bike there at least once a week and would be very sad to lose the fitness / de-stress / nature viewing it is has to offer. Please keep these trails open for multi-use.
- Water dog park is a fantastic gem. My family and I have ridden bikes and hiked there for 20 yeast. Fantastic!
- Fantastic mountain biking opportunities right in our backyard.
- I believe the trails should remain multi use trails and be able to have pets(dogs) with you on the trails. I've been on the trails at Belmonts open spaces for almost a year. There has been zero issues with dogs and mountain bikers. I know we can all coexist like we have been.
- The community of mountain bikers has created a space where folks can gather, get exercise, reduce work stress and find nature. More of these opportunities would be welcome, especially for the youth although at age 49 I value riding trails at the top.
- Please keep Belmont's open space available for dog walking and biking. That and the quality of schools are the main reasons we moved to Belmont 7 years ago.
- Please keep trails open for mountain biking
- I think there should be better signage to limit/ advise electric mountain bike speeds, and limit all activities that may damage dirt roads after a rain.
- It is critical to keep open spaces open and not limit their use to certain activities.
- Biking and hiking at Waterdog is my primary use of open space in Belmont
- Waterdog should remain available to all bikers, hikers and walkers. They all cohabitate just fine now. None of these three groups seem to have a detrimental effect on the open space. All should be able to enjoy it.
- Please retain equal access for all users, hikers and bikers alike.
- Preserving mountain biking access is extremely important to me
- Don't let greedy developers take over
- Please maintain bike access on the trails.
- Would like to maintain shared trail use. Has been a great integral local trail system for mountain biking and would be disappointed if that were lost.
- Our open spaces are too crowded with mixed use visitors – especially on weekends. Allowing our citizens to ride bikes in our open spaces creates safety, noise and privacy issues that require supervision, policing. Riding bikes also can cause environmental degradation. All of these negatives come with costs to our city, including maintenance, habitat restoration and surveillance. We have a finite amount of money to spend on the needs of our residents. Adding these costs will definitely require additional city funds. Where will we get these additional funds? If we cannot find additional funds what city expenditure are we willing to trade off for the right to ride a bike in our open space? Speeding down a mountain side is definitely not the best or safest way to enjoy nature. Speeding bike riders are not compatible with families walking along a trail. Mixing these two groups will only lead to dangerous accidents and possible injuries. Given these issues, I do not see any benefit of allowing people to continue to bike in our open spaces. Additionally, I do not understand why we are allowing people from outside our city to bike in our open space without charging an access fee to cover the costs of the above problems that occur. Finally, I don't understand why we would need lighted trail heads. I don't agree with this, since people should only be allowed to walk or hike on a trail during daylight hours. One should carry a flash light if one expects to be out during nighttime hours or might get lost and need lighting to find their way.
- Please keep the trails as multi use. It should continue to be shared so everyone has access for recreation and for emotional well being. No one should be excluded.
- My family loves Water Dog. We enjoy walking, biking and walking our dogs. Please don't limit access to anyone.
- Maintain multiuse

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- use water dog often and appreciate the ability to hike, bike and run with our dog
- I'd like to be able to continue to mountain bike in Waterdog park.
- Need Art
- Waterdog Lake, Hidden Canyon & San Juan Canyon are fabulous multi-use resources. Do not be swayed by the activists who want to limit access to trails by mountain-bikers, the very people who established and maintain these trails.
- More bike trails!
- More access to trails for people on bikes, more connected routes
- We believe that the Belmont Open Spaces should remain open to all patrons including bikers and dog walkers. Residents should not be limited in their enjoyment of nature.
- Please do not consider restricting usage at waterdog lake.
- Waterdog Lake is a wonderful and unique open space. I love it just the way it is!
- Love it as is
- Enjoy mountain biking and hiking and the friendly atmosphere.
- Open space needs to stay open to everyone.
- Keep Waterdog open for Mt. Biking!
- Mostly well maintained, warn against people wanting to change too much or cater to access at the compromise of raw & natural spaces
- I often feel that Water Dog Lake Park and other open spaces in Belmont are designed for the enjoyment of people who live near there, but not for those of us who live in lower Belmont. Part of the reason is that Ralston Avenue is the only way to get there. It's just not easy or safe to bike from lower Belmont to upper Belmont, and parking near the entrances is a pain, otherwise our family might make outings to Belmont's open spaces more often!
- Mountain Biking is very important at Water Dog. There is abundant support to do trail work under supervision and management by the city.
- preserve waterdog for mt bikers it is well known and respected I have been riding there for past twenty years and hiking for past 40 years
- I use WaterDog open space to walk my dogs, to hike, and my kids ride their bikes there. We all enjoy it immensely and have never had any problems with the mountain bikers on the trails. In fact, they are often extremely polite and cautious.
- As a former Boy Scout, an Eagle Scout & leader, we have coordinated several Eagle projects at Water Dog Park to improve the trails for multi-use hiking and mountain biking throughout the years. Waterdog has been one of the view parks in Northern Silicon Valley where trails allow and encourage outdoor exercise, Mtn biking, trailing running and are well maintained. It would be unconscionable and detrimental to the community around Belmont and the valley to limit the use of this park and restrict the Mtn biking that the community has embraced over 3 decades.
- Let's stop the anti biking rhetoric. You will always have bikers and it's fun. Instead of creating animosity, why not simply designate right of way to bikers on certain downhill tracks. Easy. Bike braking bumps aren't destroying the world so everyone should calm down instead of creating issues that aren't there.
- Waterdog should stay open for everyone
- Bicycle access should be expanded
- I learned to ride a proper mountain bike at Waterdog. The trails are so accessible, and I don't even need to drive to get there, that is unheard of. Waterdog is the only place in Belmont and San Mateo County where cyclists have access to local trails. It is a wonderful place for children to learn to ride their bikes and for an after-work fitness ride. Waterdog's trails were built by mountain bikers and the volunteer opportunities allows us to give back to community.
- The multi trail use at Waterdog is awesome, so great to see the kind sharing of space between hikers, bicyclers, joggers...
- Allow bikes on trails
- Waterdog has been hugely successful and is widely used because it welcomes all trail users. Limiting access to any group would be very disappointing.
- please keep waterdog open to mountain bikers. I've been enjoying the trails for 27 years and have helped maintain them.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Open spaces need to be protected and preserved with respect for the natural ecology. Without such protection, the canyons and open spaces will not be able to support the plants and wildlife that are critcal for their survival. Cutting trees, carving illegal and too numerous trails, running over wildlife and building thrill seeking slaloms for speed by bikers is destroying our beautiful canyon. There is also the safety issue for those hikers who have to jump off the trail to avoid speeding bikers. We need to stop this destruciton before it is too late. Walking and hiking are great forms of recreation too and do not do the type of damage the bikers are doing in the name of recreation.
- The mountain biking community treats waterdog with respect and the utmost care. it is unfair for a group to trry to take away decades of involvement in the area just because they began to hike and find it inconvenient for them. For any locals, these trails have been a common meeting place for mountain bikers all around the area and it would be a shame to let a group dictate the culture of the area.
- Keep waterdog open for biking and hiking. It's a great space and enjoyed by many.
- These are the only trails available to cyclists in Belmont and San Mateo County, which makes them a precious resource to the community, including anyone who enjoys riding a bike.
- More bike specific trails
- Belmont open spaces and the opportunity to trail run and bike in them are one of the primary reasons we moved to Belmont. There is a strong local community of dedicated trail users on foot and on wheels that cares about multi-use access and thoughtfully developed tails. They are an underutilized resource for the town and if encouraged by an updated master plan, would be significant stewards of the open spaces.
- I grew up riding water dog lake with friends for 15 years about 15 years ago. I sometimes make it down there to enjoy the scenery and trails I rode as teen. I love water dog trails! I rode amateur cross-country mountain biking back in the day and attribute that to be able to train and develop in the water dog open space
- Waterdog open space is a local jewel to escape into a natural environment. Historically, it has been a multi-use destination. Over the last couple of decades, the mountain bike community has organized in cooperation with the city to build and repair trails. These trails have been used by runners, dog walkers, walkers, and cyclists. A small minority has built unapproved trails. These trails are poorly constructed and encourage erosion and trail user conflict. In my opinion, they should be retired. Furthermore, the advent of e-bikes has complicated user conflicts and erosion. Given their power and speed, e-bikes should not be allowed in the open space. Overall, though, the multi-use nature of the trails works well and should continue into the future.
- Please keep trails open for mountain bikes
- Please continue to allow mountain biking at Water Dog. I have been biking there for 20 years, always respected the multi use trails, and have never had anything but positive interactions with other trail users (hikers, bikers, everyone).
- We enjoy the Belmont Open Spaces. The mix use trails can be challenging at times. It would be great to have dedicated trails for bikes, hikers etc.
- Please keep Water Dog and other Open Spaces multi-use. Its the best bonding moments and time I have with my children in the immediate area. Thank you
- Make sure you give the bikers access to good trails. I am a hiker and don't mind the bikers if they have a bell so I know they are coming. Some parts of the trails are too narrow for a hiker and biker to pass without great care. Bikers usually yield to hikers but the trails should either accommodate both or maybe have a single use bike trails separate from hiker trails.
- Water Dog Lake park is the best mountain biking on the peninsula, and it's readily accessible by transit + bike unlike most mountain biking trails which require long drives up to Skyline boulevard.
- I want to know that mountain biking is welcome and encouraged within the community.
- I think the Open Spaces are a key area for Mountain bikes, hikers, and runners on the Peninsula. In my experience, which includes numerous runs in the Waterdog Lake area, the three groups have been respectful of each other, and protective of nature.
- Maintain mountain biking trails at Waterdog
- Bike access to trails if very important for the residents and users of the park. The recent push to get bikes banned is distressing and will greatly reduce the appeal of living in the area and this park in general. There are plenty of spaces where bikes arent allowed, lets keep some areas where it is.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Mountain biking trails at Water Dog are an important community asset, not only for Belmont residents but for residents of the larger area. They also bring business to Belmont shops and restaurants.
- Bikers helped build the trails in Waterdog and are an active user group which needs to be supported.
- Water Dog is an incredible location for mountain biking, a sport that is increasingly being limited in the Bay Area. We should help to preserve the sport by keeping water dog open space bike friendly.
- Looking towards the future, more people will be needing space to for recreation. I believe a combination of growing, maintaining existing, and/or creating new facilities will be the key to having a place for everyone to do what they love and are passionate about.
- Bikes are already banned from so many trails in the Bay Area. If we could raise awareness about better trail etiquette for both bikers and hikers/ joggers, we could share multi-use trails more safely.
- They have become dangerous with speeding and reckless mountain bikers. The bikers have "cleared" trails and cut down tree branches. They should have their own designated spaces where families, hikers and walkers will not be disturbed.
- I use Belmont open spaces mostly for trail running. Open space trails are very convenient for this. Keep up the good work.
- I have been proud to volunteer to maintain and build trails at water dog park, as a mountain biker and hiker, I feel strongly that these trails are best kept multi-use; there is simply no other trail system most of us can ride to on our bikes for mountain biking; and mountain biker stewardship is one of the primary reasons this space has been so well maintained and successful.
- Waterdog has been a tremendous help physically and emotionally, specially during the pandemic. I love riding my bike here and have started bringing my 2 girls to ride their bikes here as well. It's a treasure to the community
- Love mountain biking there. Would be great to have mountain bike specific trails to avoid conflicts with hikers.
- Waterdog is the only place in Belmont and San Mateo County where cyclist have access to local trails. It is a wonderful place for children to learn to ride their bikes and an after-work fitness ride. Waterdog's trail were built by mountain bikers and volunteer opportunities allows us to give back to community.
- I greatly appreciate the opportunity to take my dog on hikes with me in Waterdog OS. The Peninsula has few such places compared to many other counties around the Bay Area. This is a huge benefit to me for continuing to live in this town after having raised my two children here.
- I enjoy mountain biking at Water dog park. It's a great place to connect with nature and get exercise while ride a bicycle. Please do not limit access to Waterdog park for mountain bikers. Please keep water dog park open so all can use it for exercise and recreation.
- Please keep Belmont Open Space's open for mountain bikers! We love mountain biking there.
- Use of the trails at Waterdog for mountain biking is something that should be maintained. This offers a great way for people like myself to exercise in the middle of the day, taking a break from work and getting a nice outdoor experience so close to the office. I think etiquette is key, bikers, hikers, walkers, etc. can all use trails equally and share such great spaces.
- Great space - need to have more volunteer days to do trail Maintenance - we use to help thru bike shop in Belmont.
- Keep forever, expand, control, maintain
- I love the ability to Mountain Bike at Waterdog
- Myself and other mountain bikers are part of the reason why the Open Space around WaterDog Lake is so popular. I strongly object to efforts to restrict mountain biking and completely support improvements that benefit ALL trail users.
- I have been mountain biking at Waterdog Open Space for 15 years. It is my primary form of exercise and stress relief. The location of the park allows for me to ride there every week. Other mountain biking locations are distant drives away. Waterdog is a key destination for many local mountain bikers. I typically see 3 to 5 bikers on the trails whenever I ride. We need to preserve the ability to ride mountain bikes at Waterdog Open Space for this active community. I am concerned about the health of the plants at Waterdog. I have seen the terrain drying out over the last 10 years. Oaks are dying and the brush is tinder dry. Please establish a plan to reduce the fire hazard in the space. I am very willing to assist in working on trail repair or vegetation management. Happy to help!!

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Don't close Waterdog to mountain biking!
- We need mountain biking access, though courtesy signs for etiquette would be welcome.
- Preserve - enhance access to mountain bikes, gravel bikes please
- Water Dog Open Space is a fantastic place to take my family for mtn biking and we love taking our dog there for hikes and swims.
- I have run, hiked with my dogs, mountain biked at water dog for last 15 years and it's a gem to our community to have this open for multi use
- keep mountain biking in hidden canyon please
- Please keep WaterDog open to multi use.
- Belmont open spaces is probably one of the last places in this entire area we can ride our mountain bikes on dirt. Please support this sport.
- Access for all.
- Waterdog is a terrific and well respected multi-use activity that works well for all users.
- Water Dog Lake Park is a great place to safely mountain bike.
- Please don't restrict mountain biking at Water Dog park. Also consider class 1 e-bike usage if they're currently not allowed.
- I strongly oppose any efforts to limit bike access to Waterdog Open Space.
- The mountain biking is fantastic, I use it every week, and was a decisive reason I moved to the area 10 years ago.
- Please don't limit the mountain biking trails. They are popular because they are terrific!
- It's amazing that a small city like Belmont has such great Open Space areas!
- I have been mountain biking at Water Dog for over a decade. It's such a joy and privilege to be able to bike from my house to the trails. All the other options involve driving 30 minutes or more each way. Thanks for maintaining this excellent resource.
- Love the mountain biking at Water Dog. Please preserver and expand options to ride bikes on the trails.
- Our entire family loves mountain biking and hiking at waterdog
- Please keep open space trails multi use
- Bikes should be limited to Wide fire trails and excluded from narrow trails.
- Belmont Open Spaces need to be appreciated and preserved for future generations. Currently, they are being severely eroded by too much mountain biking traffic.
- More trail running amenities. Trail running is very unique in this area and it would be great to foster the community In Waterdog
- Open spaces need to include designated areas for off leash dog parks
- Water Dog Lake park is one of the best mountain biking locations in the SF Bay Area, please do not change it. I go there every week.
- I live in Belmont Heights near Hallmark Park and the open space here (including waterdog lake) is a huge bonus to living here. Every day I go hiking on the trails here with my dog and it is just a really special place to have right in your backyard. What makes it not special are mountain bikers who zip and zoom up and down the trails and do not get off to walk when there are hikers. I have had to jump out of the way with my dog and my toddler to not get run over. I think we need clear signs that limit mountain bikers on the trails, and definitely not widening the john brooks trail. that goes right behind many houses in the belmont heights area and is better suited to hikers enjoying the views. Whatever you plan to do please do not make a bike pump course or anything to attract more mountain bikers to the waterdog lake area. It's a fragile ecosystem and bikers are just not very careful with their surroundings. A better place for a bike course would be at a sports center, not in our fragile open space area!
- Just discovered them biking retrains and they are wonderful.
- I am in favor of a halt to trail development at Waterdog. Maintain existing trails, and prevent creation of new ones. Rules of the road signage would be helpful. I am also supportive of "feet only" hours when hikers don't have to watch for bikes. I am strongly against restricting cycling to wide trails. Mountain bikers build most of the single track, and have as much right to use as anyone. Teach courtesy and responsibility first.
- There is a lot of frustration among residents in our neighborhood with mountain bikers who visit the water dog and hidden canyon open spaces but ride at dangerous speeds and do not give right of way to hikers, often on electric bikes (ie motorized vehicles)
- Too many bikes
- I love the open space preserves and using the trails for cycling. I've used them many times
- I am extremely disappointed that adding items to the open space is MUCH more prevalent in your survey than is maintaining and improving the natural habitat and beauty of these spaces.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I believe it is very important to preserve open space in its natural state so that EVERYONE can enjoy the beauty of Belmont and appreciate our community and nature together.
- Again please keep Waterdog park open and same for the Hallmark cross country. Everyone runs these trails including me and I enjoy meeting my running friends and enjoy the beautiful well kept space. Let's keep the space open for the community to enjoy in its natural state.
- I mountain bike in Waterdog every day. its an amazing mountain biking location!
- Please create a master trail map. I would utilize belmonts parks and open spaces more often if I had maps (preferably online and in apps like AllTrails) and knew where to go
- Please designate certain trails within Waterdog for biking. Please add signage that the parks an open space are closed from sunset to sunrise. Please add rattlesnake and mountain lion caution signs to the Hallmark Park area. Please have Belmont PD patrol the entrances to the park in the evenings. Do not add trail leading this will encourage people on trails in the evening time when they are closed.
- Prohibit bikes on Waterdog Lake Open Space hiking trails. Bikers present a risk of bodily injury or death to hikers on the narrow hiking trails in that open space.
- Please keep allowing mountain biking at Waterdog. The vast majority of us follow the rules and are courteous to other trail users.
- Support biking on Waterdog trails
- I love mountain biking at Water Dog and generally find my fellow bikers are respectful of hikers and nature and am a big proponent of multi use trails.
- There are too many bike riders on narrow trails in the open space. I have almost been run over several times by bike riders going fast. The narrow trails are not suitable for both hikers and bike riders.
- Please save mountain biking on multi-use trails!
- Mountain bikes are sometimes an issue on narrow trails so some strategies to allow for both biking and hiking would be welcome (like designated trails)
- I didn't know about San Juan
- Save mountain biking trails and access
- I would like mountain bike access for my children and myself at waterdog. To take that away would be a shame.
- I love and have been mountain biking in Water dog park for years. It is very unique in offering such wonderful trails open to biking right in our backyard. Love sharing with all (hiking, groups, biking, etc.)!
- Waterdog is a great hiking and biking trail. Please keep it that way. We need more multi use trails not less. Please do not reduce the number of mountain biking trails.
- Keep cycling open to all users and groups
- Waterdog Park and open space is very well kept.
- Waterdog Mountain Biking is accessible, fun and enjoyable.
- Multi-use trails are the way.
- Keep access for bikes and please do not remove trail features or widen trails
- Please curtail mountain biking. It should've been regulated earlier. The hills behind CHS w/jumps & bumps is awesome for them. Courtesy levels are pretty low elsewhere.
- The entire purpose of Water dog is bicycling. Is it a GREAT local resource to improve ones gravel and mountain biking climbing and descending skills on. Do NOT let the crazy NIMBY haters-of-everyone steal that.
- Please add more mountain biking trails. Also a pump track will help. At the moment there are very few mountain biking trails available and one has to drive great distances for access.
- I'm not a trail biker but they need more than simply access to broad open flat trails - could more trails be created to give THEM that range of challenges that are part of their sport and a smaller set dedicated to hikers as the riding groups have been so active in maintaining the trails?
- I love Belomont open spaces because it is a great place to go on bike rides with my family. Belmont open spaces is great because it is open to bikers and walkers, and should stay that way. San Carlos or redwood city does not have many places to go biking and if you close down biking in Belmont open spaces there won't be any close places to bike at. It is really important to keep biking open to all.
- Oppose creating attractions with regional draw

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- The shared use of Waterdog has been a great example of a community sharing its resources. Opening up more shared outdoor space will ensure a distribution of use as opposed to closing places for single use which would put undo stress on other locations. City's, humans and nature thrive with caring diversity and teaching younger generations that respect for environment while using it is how we thrive and thus we can all share its resources and protect them as opposed to limiting them and teaching that caring for nature means being kept out. We should all be a part of it and care for it.
- Make additional Mt Bike trails to separate bikes from hikers on SOME sections
- Continue to let us mountain bike at waterdog please.
- Waterdog is a great park and wonderful place to Mountain Bike
- more dog acess
- Belmont Open Spaces are an excellent place to promote health and wellness in our communities. We have to do our part to keep our communities healthy by having easy access to parks and open spaces. We should not discriminate on what activities are accessible.
- There is a rising popularity in mountain bikes and this is a good opportunity to draw people in to parks
- Please add more mountain bike access
- Waterdog has been my backyard for nearly 40 years.. The increased bike traffic, particularly groups of bikers, has detracted from my enjoyment of it.
- I love the bike trails at water dog.
- As a daily hiker, I have stopped going to Belmont's open spaces because of overcrowding and bikes. I now go to Edgewood Park, Windy Hill, Montera Mountain, Purissima, and other open spaces which are much better and safer. It's a shame to see what has happened to Belmont's open spaces over the last two decades.
- Save mountain miking. So many trails for hiking and equestrian.
- Don't break something that's working. The open space is great and works. Keep up with maintenance of bridges but that's about it. No need to change, redirect, restrict or (shudder) remove any trails. I □□ Belmont OS.
- I've stopped goi g to water dog to hike the canyon because of the issue of bikers on the trail being too reckless.
- Too busy and activities. Sad to see damage of nature.
- Bikers are ruining Water Dog Lake and the surrounding paths in Belmont Heights. I would strongly like to see their number and use of those spaces and trails reduced or banned. Preferably banned. I don't mind outside residents to use our parks and trails, but the bikes must be stopped in ruining once was a peaceful, safe place to hike with children and animals.
- REMOVE BIKES FROM SENSITIVE TRAILS. The only trail safe for biking is Lake Road. Bikes should be banned from all other trails for safety to both hikers and the hillsides. Cyclists are damaging the environment and pushing hikers off the trail.
- Bike access enhances the outdoor experience
- The trails are amazing and best when shared by all who love them!
- It is pertinent that mountain bikers restrain access to Water Dog Open Space. It is a great sport that provides recreational experiences that are enjoyed by many people, for which the extent is only increasing. On the whole, mountain bikers are very considerate to hikers so it would be very disappointing if a small group of anti biker advocates paints an inaccurate image of us in an attempt to limit access. As in your mission statement, access should only be widened and not narrowed in order to provide access to the greatest number of people across different backgrounds.
- We have lived in Belmont Heights for 35 years. The primary reason we purchased our home was the natural beauty and serenity of the open space surrounding us. The trails offer a sense of peace, and the ability to appreciate and enjoy nature's gift of an undisturbed natural habitat that protects our wildlife and vegetation.
  To incorporate and encourage mass public foot or bike traffic into our open spaces would destroy the rare beauty and serenity that helps define the City of Belmont. Bikers have already damaged and modified our trails without permission, and present safety hazards for trail walkers.
- I have been enjoying mountain biking in water dog park and open space for years and now enjoy it with my kids. I am very appreciative of the trail system and respect it's mixed use needs. Thank you for maintaining it and keeping it mixed use.
- Keep Mountain Biking alive!
- I use the open spaces on a regular basis. It's close to my work and regularly access Waterdog for lunchtime rides as well as cutting through on my commute home.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Should be open for all uses
- Keep Mountain Bike Trail (Including Class 1 E-Bike) access at Waterdog! Please expand the access as well.
- I primarily go to Watertdog because I can cycle and walk my dogs there.
- The John brooks trail sits behind my back yard. I rarely use any of the water dog trails. They do not feel safe with the proliferation of mountain bikers who often have no regard for walkers or runners. I love to walk in the neighborhood on the streets, at the.xcountry trail or to drive yo sawyer camp. But sadly water dog trails just do not feel like a good option. I am also greatly concerned about the destruction of the natural habitat caused by these cyclists.
- More bike friendly trails and access.
- Please reclaim areas that have recently been fenced off that belong to the City. People are trying to make their yards bigger....this is illegal!
- Waterdog Open Space is an outstanding open space for multi-use. Mountain biking there is such an amazing space to use.
- STEWARTSHIP LIKE TRAILWORKERS,COM AT WILDER RANCH IN SANTA CRUZ,CA
- What are the plans for keeping this as natural as possible? Multi use trails are NOT safe and 40 years of trying to make this work has been a failure with cyclists continually speeding, making illegal trails and hitting hikers and equestrians
- Offers an exceptional opportunity for off road cycling.
- Please put a skatepark keep kids out of trouble
- Skate parks
- The Belmont Open Spaces set a high quality example of welcoming users of multiple types (e.g. MTB, hikers) which others should aspire.
- more dog friendly
- Keep access open for us responsible mountain bikers who also volunteer time to care for the trails
- Love the open spaces, however, there are way too many mountain bikers who have come too close to hikers. Please BAN the mountain bikers from using the trails.
- Please limit the mountain biking at hidden valley and water dog and the area near water dog from Geraldine and village dr. it's quite dangerous for hikers. Enhancing the park facilities would be great as well. San Carlos parks have a lot more features (water pad). A swimming facility would be great as well!
- Water Dog is great just as it is. There is no need to make extensive changes there, except maybe to manage the poison oak in certain sections. I have been mountain biking there for over 20 years and am truly grateful to have it so close to home. I would love to participate in some trail maintenance opportunities for the park.
- More trails for hiking
- Thanks for the survey. I'm a hiker, trail runner, dog walker, and mountain biker. I filled out this survey with mountain biking Waterdog in mind. It seems lately, after over 20 years of riding Waterdog, that hikers are upset and seem to feel that we are unwelcome pests. There has been increased trail use with COVID of course, and an increase in the popularity of mountain biking. I'm hopeful that we can all work together to share these great trails. I've heard there is a vocal group that would like to ban mountain biking within the park. I hope this isn't true and that you all understand that these trails can easily be shared and loved. Thanks!
- Need to maintain mountain biking access. Need to restrict e-bike use.
- NA
- Keep the open spaces - they are the best thing about Belmont
- Mountain biking at Waterdog with my son has been a profound experience. It has provided an activity that bonds us, something that he can improve at and be proud of, and gets us doing something intensely physical and skilful in nature. It is the antidote to screens.
- Preserve all forms of activity, including biking and skating.
- Water Dog has always been bike friendly. That's where my kids learned to mountain bike too. A vocal minority should not change what has always worked fine.
- Same for Open Spaces
- I enjoy mountain biking at waterdog and fully support that we maintain access to mountain bikers along with hikers. I do not agree with reducing access to mountain bikers, because many people will ride even if it's prohibited and that would cause more tension between mountain bikers and other park users.
- Please keep these spaces open for bike usage. They are a true gem and rarity on the peninsula.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Thank you for allowing mountain bike access! Keep working with the mountain bike community to keep access open to all.
- We adore Water Dog park. My son rides there with his friends at least 3x a week. It has been a gift to have such an amazing resource for his friends and him for outdoor exercise within riding distance from our house.
- Keep waterdog open space open to mountain biking
- The trails are great. Would love to see more, and more time spent building new ones!
- Please do NOT block mountain bike access to this park, this is a popular destination for mountain bikers. Mountain bikes do not damage or harm the park any more than hikers or dog walkers
- Cycling in Waterdog is a great pleasure, and one of the limited spaces available to cyclists within short drive of San Francisco.
- Continue to allow bike access in Water Dog Lake Park and open Space, and in The Hidden Canyon Park!
- Bicycling and walking dogs is very important in nature
- water dog is an excellent resource as it is. I would not change a thing. The mountain biking folks have done a LOT to make the space better.
- I have been mountain bike riding in the Waterdog Lake Open Space since the 1990's. Back then there were far fewer trails to ride as there are now. Over the years, trails have been added and maintained by mountain bikers. So when I hear of opposition to mountain bikers riding in Waterdog, it disappoints and concerns me. Mountain bikers should be credited with some of the trail expansion and maintenance over the past few decades. I am not blind to the fact that there are some mountain bikers that ride with excessive speed and poor etiquette. I have also witnessed hikers and dog walkers that are guilty of poor etiquette as well. But in all my years riding and hiking in Waterdog, those folks are in the minority. Yet it appears they have the loudest voices. I think we all just need to get along, take a deep breath and remind ourselves of the beauty we have access to at Waterdog Lake Open Space.
- I was directed to this survey because apparently there is a small but very vocal anti-recreation group lobbying to limit access to open spaces by restricting bikes. Whether or not this is true, I'm hear to say how much I enjoy having these trails to hike and ride right in my backyard. I would also like to reiterate the PROS Guiding Principles of "equitable access" and "inclusion" and a reminder that people lobbying for restrictions go against those principles. Thanks!
- Please keep waterdog fully open to cyclists. It is one of the few local opportunities for mountain biking.
- Biking on the trails is one of the best parts of the open space.
- Biking is my daily exercises there after work for my coworkers and friebds. Please don't take it away. We have been courtesy to all hikers and trail users.
- I go to Waterdog Lake at least once a week -- love it!
- Open spaces should be available for mixed use. Waterdog park especially is a fantastic park for both biking and hiking and walking. Widening trails and increasing signage and safety information would be beneficial to everyone who frequents the park and would make the space safer and enjoyable for everyone.
- I love to mountain bike on your trails
- Access to mountain biking in waterdog is a tremendous benefit to everyone who lives from RWC to San Mateo - it's the only place like it and the only place many people can get to routinely. Really enjoy and appreciate the effort that goes in to providing such a luxury!
- Ensure an inclusive environment for all outdoor enthusiasts i.e. continue to allow mountain biking at Waterdog Open Space. We can all get along and respect each other's activity.
- Mountain biking deserves to have access to the fun trails in your area
- Please continue access to mountain biking at Waterdog!
- Please keep the open spaces open to biked and dogs
- Keep single track at waterdog open to mountain biking please
- Having Waterdog as an area close to home to introduce kids to mountain biking is invaluable
- Waterdog lake is spectacular, providing a place to mountain bike so close to home adds excellent value to the area, I would pay a day use fee or annual usage pass to keep the mountain bike trails open at water dog lake.
- Please keep open for mt bikes

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I am strongly opposed to any project that allows mountain biking in natural areas.
  The truth is that mountain biking is an anti-environmental, destructive, industry supported, self-centered activity that creates destruction where it attempts to penetrate natural lands and the public trust. Unlike the misinformation from proponents of this invasion, it is clear to see this is an industry/bike association/single-minded advocate agenda to penetrate public programs, buildings, and natural areas for self-centered gain, whether it be corporate sales, association control, or self-centered thrills, all with undue pressure/influence on local officials and at the expense of unique treasures like local parks and natural venues. It is a strategy that plays out across the nation, poisoned by the mantra of the privatized radical individual as opposed to the common good and public trust. These spaces are meant for all of the people, not the minority of a few to pursue restricted single-use narcissist adventure. Open space parklands remain places of reflection and undisturbed connections with nature, among the diverse animal and plant life, terrain, and peace those things create. Objective national research documents the destruction that mountain biking wreaks on the environment as well as on people who want to pursue passive recreation. Despite their false P.R. promotional distortions, mountain bikers are only interested in their constant self-indulgent thrills at the expense of nature and people. It is only about themselves and their addiction, not about others, animals, birds, plant life, the environment, nature or anything beyond their myopia. It is a pathetic mutation of what makes us truly human.
  You must confront this intrusion and deny any use of the park for mountain biking or similar restricted-use disruptive activity. Do you as a city want to turn every park into yet another industry-lobbied sports complex? Parks and natural environments are not gymnasiums, race tracks, sports complexes, or circus adventure rides, despite the propaganda from the industry and IMBA bike association partners, replete with their websites, consulting, and talking points, a 21st century snake-oil medicine show.
  Do you really want the invasion of this destructive, dangerous, and restricted self-centered activity for a few with its consequent documented national history of future expansion, destruction, and danger to people (with permanent injuries and lawsuits against the city), or do you value something more: a place of reflection and connection with nature, others, and oneself, giving us our full humanity, nature's gift to us all for generations past, present, and future?
- More trails for mountain biking at water dog please!
- Waterdog Lake is a beautiful preserve. I'm an old, slow biker, and I love to ride from Crestview down to Alameda Las Pulgas through the park on the fire road. Please don't take that route away from us.
- thank you for allowing bikes. I loved helping build the lake loop in 2010. Though I didn't love all the poison oak I came home with!!! It's fun to see it being used as intended.
- Keep mountain bikes on trails at WDog.
- Waterdog and Hidden Canyon are full-on gems for mountain biking in the area. With some routine trail maintenance the area could be an amazing and sustainably built which may help address all the concerns that are being brought up around that recently. The mountain biking scene is known for being very interested in volunteering for trail building and maintenance (see santacruztrails.org) , but with little to none of these opportunities in Belmont Open Spaces where cycling is permitted, this creates much more of a cost/overhead to the parks department to do so and blame on the cyclists themselves.
- Keep them open to multi-use
- I currently live in Seattle and am planning a move to the bay area for a new job (we are still house hunting), and my wife and I were specifically hoping to be close to Belmont since it seems like a great neighborhood for our family, and because I love to mountain bike and I heard Water Dog park is a great place to enjoy the outdoors on a bike. I am also unable to walk for long distances on uneven ground due to knee troubles so a mountain bike is the only way I can really enjoy the outdoors. I was really sad to hear that the community is considering banning mountain bikes please reconsider banning what many people find as an important part of their life and ability to enjoy time outside in nature!
- Our family enjoy the hiking and biking trails.
- They are great as is. Dog waste is the only real problem
- Belmont open space trails are treasures by cyclists- please do not take access away. Cycling groups are historically some of the most active in maintaining trails and are happy to help their community find ways to exist with other use groups.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Bike access at Waterdog should continue... There are far more parks in the area that prohibit biking (Pulgas, Edgewood, etc) than allow it... Waterdog is special and the access should be preserved.
- Multi-use trails that allow my kids and I to mountain bike, hike. Hiking and biking with parents. Kids are progressing with bicycle skills and translating to everyday use.
- Keep Mountain Biking alive and well in Waterdog
- I love Belmont open spaces and would love to see more trails for hiking and mountain biking use! Thank you!
- Mountain biking in an incredibly sacred aspect of Belmont's overall culture, and remains an excellent form of exercise, connection with nature, and social activity that has transformed my life, as well as that of countless others. Limiting it or abolishing it entirely will simply bring many of your park and open space goers elsewhere, negatively impacting not only your reputation but also local economy. Further, mountain bikers have been responsible for much of the maintenance of their own trail systems, so why not let them continue a harmless act of community betterment?
- Belmont has amazing places to bikes and really helps the Belmont library with book-a-bike!
- I have been a home owner in Belmont for 31 years and have been an avid mountain bike rider and a Waterdog trail maintenance and trail creator with local bicycle stores for these 31 years. As a Waterdog mountain biker I have volunteered dozens of hours to park and trail maintenance.
- It's important to keep access to mountain biking
- Water dog is great for mountain biking and Carlmont is great for dirt jumping (on bikes). Kids and I love having access to those activities
- N/a
- I use Waterdog as a place I can ride my bike to keep up my cardiovascular health as I am unable to run so biking is less impactful on my body. I am in my 60's and enjoy riding my bike at Waterdog.
- Keep to trails open and accessible to everyone, except ebike riders.
- I love the biking availability in water dog and surrounding open spaces
- Allow bike access!!!
- With local friends, mtn biking in Waterdog has been the highlight of my year. It is challenging! Great for learning skills, fun, and small and accessible. I know of nowhere else in the Peninsula with it's varied and interesting terrain. I've learned a lot here and enjoy every visit. I do limit my visits to weekdays to avoid tthe higher use times. I've been impressed that most folk are courteous and happy! I have many fun places to hike, but none approaching anything like Waterdog for mountain biking. If you don't bike here, you may not realize what an incredible place this is for us.
- It needs more Mountain Bike Specific trails made for and by with input from mountain bikers. Skills development areas as well
- Please continue to allow full access to mountain bike riders in open space areas such Waterdog Lake Open Space. It is an amazing resource to have both an excellent hiking, biking and family friend space in the heart of the SF Bay Area. To lose its mixed use would be a terrible shame.
- With all that open space, we should add a mix use a disc golf course that shares space with the hiking/biking trails. Also, we should not limit the trail use further, especially at Water Dog. I have a back injury that prevents me from walking/running/hiking but I am still able to get exercise by riding my bike. Those trails (with their elevation) are very important to my physical health.
- Bike trails in Waterdog are amazing and have been well maintained by bikers for years, removing access to them would be a giant mistake.
- Waterdog is a vital multi-use open space that is enjoyed by mountain bikers, hikers, dog walkers and runners. We must keep this open space open to all.
- It is nice having multi-use trails for everyone to enjoy.
- Don't disallow the bikers to enjoy your open space areas
- Mounting Biking at water dog is a great asset and should be expanded.
- Please allow us to continue mountain biking at Waterdog, it has the best trails in the area and the community is great.
- Open spaces are for all people. Let's keep the trails open to all forms of recreation so that we can enjoy the outdoors as a community not as adversaries.
- Biking and hiking waterdog with my family has been a welcome respite during these particularly tough times recently.
- We visit Water Dog Lake all the time and feel very lucky to have this open space to enjoy and appreciate nature.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- It's so nice to have Waterdog nearby for mountain biking!
- Please keep access to all, and do not limit trail use.
- More trails needed.
- I mountain bike and I hike extensively on all trails in Belmont. This activity on these trails is the most important aspect of my personal health. I will be happy to volunteer to help preserve the trails for both activities.
- Beautiful trails that have been a so popular to mountain bikers for years. Easy to access for the local bike enthusiasts. Keep it open for people who enjoy the sport and healthy lifestyle by riding in open spaces.
- They are a treasure, between Water Dog Open Space and San Juan, the habitat seems to be thriving (aside from draught), and I think it is due to the sheer size. Can we talk to SF Water to remove fences to allow even better wildlife passage?
- Bicycle and running trails are super important and encourage outdoor exercise
- Please continue to support multi-use trails at all open spaces. Please also support eBike access. This helps the aging mountain bike community and as long as they obey speed limits should not be considered different than conventional bikes. Thank you
- Waterdog is a treasure for multi-use. The mountain bike community has had a great relationship with the city and community. Don't let a small vocal minority wreck it.
- we LOVE mountain biking here. please keep it open to us!
- I am in support of mountain biking at Waterdog. It is a valuable resource to provide access to mountain biking close to to where people live
- Penalties for people who don't leash their dogs.
- Waterdog is a great and safe place to mountain bike where I typically see families mountain biking together. Most fellow mountain bikers I cross paths with are friendly and courteous to other mountain bikers and hikers. We always give hikers the right of way. I've never seen any mountain bikers going unsafe speeds, especially since we know that it's a popular park for bikers and hikers at all times.
- I love mountain biking with my dad at Waterdog. Its an incredible space to get exercise and with so many limited options for mountain biking within city limits it makes this park truly unique. Please don't limit access!
- Glad we have them!
- The ability to ride my bike in Waterdog is one of the best parts about living in Belmont!
- Waterdog and Hidden Canyon are the best bike trail open spaces on the peninsula. They truly are amazing and world class trails. Please keep them the way they are.
- Strongly support mountain biking at Water Dog. This has been a wonderful activity for my family for years in a super safe and beautiful setting. IF we lost this there would be nowhere to go.
- As an avid hiker, jogger, and mountain biker, I've really enjoyed utilizing Belmont Parks and also open spaces such as Water Dog. Open spaces is one of the main reasons I moved into the area a couple years ago, and has absolutely been a god-send during the pandemic for me and my twin boys. I know there has been some brewing debate over whether to keep them multi-use or not, and I can say that this is critical to me. I hike/jog about 50% of the time, bike the other 50% of the time. In terms of trail etiquette, I've had run in's hiker to hiker as much as I've had biker to hiker, and even biker to biker. (Note: I've also been harassed twice by hikers while riding my bike!) My point is, it's mutual and we're all in this together. Volume is up bc of the pandemic, and I can only imagine nerves are frayed and people are bumping into each other more now (hopefully, we get back to a normal soon!). I think more posted signs with positive reminders of common courtesy, to mask up when around or approaching others, and just common sense rules of engagement would honestly go a long way! This, vs unilateral or one-sided decisions with long-term negative ramifications pitting one group vs another. I'd be willing to volunteer to man educational booths at the trail heads as well! Thank you!
- I think Belmont could use park rangers and/or open space patrol.
- keep access open to biking in waterdog. limit access to ebikes on all off-pavement areas.
- Keep and expand human powered mountain bike access
  Prohibit e-bikes on all singletrack trails and on most dirt trails
- Enjoy mt biking at Water Dog
- Family interest is high to support a bicycle pump track

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Waterdog Park is one of the very few mixed use open spaces available on the east side of 280 on the Penninsula, which allows mountain biking. This is an activity enjoyed on an inter-generational basis and is especially important for youth in the area that otherwise would be unable to get to more distant trails for biking. In my experience the trails are shared with other users courteously, and the mountain biking community has historically invested countless volunteer hours in creating and maintaining trails in the Waterdog open space. It is a unique gem on the peninsula for riders to enjoy mixed use trails with other members of the outdoor community.
- I as a minority love going to the park and feel even safer when I see young kids riding their bikes their.
- Belmont needs to expand its open space trail system making it accessible to bikes and hikers. A good way to create harmony between uses is designate trails one way and put up signage as a reminder to be courteous.
- Our whole family enjoys use of the open space, particularly the hiking and mountain biking at Water Dog. It's a great neighborhood amenity and one that should be open to all uses.
- I've been grateful to mountain bike in Waterdog for a number of years. It's a treasure for those "of a certain age" who now need E bikes, and can find few places on the peninsula where they are allowed. Please keep Waterdog Park E Mountain Bike accessable.
- Allow more mountain biking and electric bikes.
- Continued access to mountain biking is very important to me. I think that mountain bikers have been generally very involved in trail creation at Waterdog. I would be willing to help with trail maintenance, brainstorming about appropriate signage, etc.
- I love being able to mountain bike. Taking that away would severely impact my opinion of my city and home. There seem to be a few angry non-athletic types that are hell-bent on ruining life for the rest of us. Please don't take away an activity that my family is passionate about.
- Mountain bikers built and maintain those trails. Please don't limit them to hikers. We have always coexisted just fine. If necessary, we can make bike-only or hiker only sections of trails (there are spots we ride that they cannot walk).
- Waterdog is a great place to mountain bike and there aren't enough such areas in the Bay Area. It's okay to make trails one way if that makes folks feel safer.
- I would like you to know that inside Water Dog Open Space, there are premier mountain biking trails that have been shared with hikers for over 20 years. Trails such as Rambler, Elevator, Chaparral, John Brooks, etc. These trails should be kept as combined hiking, running, and mountain biking trails.
- Mountain biking needs to stay open at Waterdog. This is a great local resource and people have been riding there for many years. You would need to drive a long distance to mountain bike somewhere else.
- Water Dog and Hidden Canyon owe their origins to mountain bikers. Crowds during pandemic have made things a bit tighter with hikers. Pandemic will end. Biking's impact on mental health is huge and has driven bike industry shortages during the pandemic. We should be looking for ways to accommodate bikes and facilitate smoother hiker encounters rather than baning.
- Please keep Waterdog open to recreational use for hiking, running, and mountain biking. It is one of the few places to easily access mtn biking without a car. It's a gem for car-free, teenagers, etc.
- Please keep Waterdog open to all trail users please!
- We should be able to keep mt biking and trail usage for multi use as long as we maintain and care for them. Most mt bikers I've met are courteous and use proper trail etiquette. We can be a community policing/enforcing community in Water Dog.
- The park is an extremely valuable resource for the cycling community with very few local trails open to bicycles. Its a place where people can recreate safely after work on well designed trailed trails. There is also very little confrontation with other users because the trails aren't particularly dangerous or high speed and it is very easy to share the trail with others.
- Please distinguish between the various classes of E bikes when defining policies, class 1 E bikes should not be treated the same as class 2 and 3
- Please maintain access to mountain bikes! In face potentially expand the number of trails for mountain bikers.
- Cycling is very important to me, sharing trails with hikers and walkers and others is very important to me.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Water dog Park is a refuge from the hustle and bustle of our daily lives. Please maintain equal access for all existing trail users- hikers, jogger, mountain bikers, dog walkers. It is important to be inclusive, and have trails open to all.
- Cycling on the trails is a very important activity for many people. When I bike at Waterdog, I see lots of people showing up after work with their bikes to enjoy the trails, which is made easier by the proximity of their residences to Waterdog.
- Keep Waterdog and other Belmont Parks open to bikes
- Less adulteration of biking trails. you already force us to a 15mph speed limit and now you want to rip out anything that not flat or wheelchairr accessable.
- Please don't band mountain bikes. Its a large friendly community. Mountain biking communities and organization help build many trails, even hiker only trails.
- Please let mountain bikers be part of the priority when planning access and maintenance
- Mountain Biking at Waterdog is an essential activity
- Please keep open spaces all inclusive. Recreation and exercise of all types is extremely important. Waterdog is one of the few places to quickly get a mountain bike ride in near me, a vocal minority should not dictate access to an area that has been key to my health for so many years.
- Please do not close open spaces to mountain bikes. This would be a huge disservice to a large community. Instead I would focus on educating all trail users on etiquette, invest in smart trail design and increase volunteer opportunities for trail maintenance
- This is where my kids learned to ride mountain bikes, I hope this uniquely accessible land remains accessible to families on bikes.
- Keep WaterDog open for mountain biking. It's one of the major benefits of Belmont and a great location for outdoor biking close to home with no car travel required to get there.
- Ciprian/Dog parks are my favorite places to mountain bike. I also love the natural habitats. I wish there are more bike specific trails. The natural wildlife should not be disturbed by large gatherings or construction.
- Waterdog is a gem for bicycling.
- Keep Waterdog open to bikers
- Please don't limit or restrict mountain biking in Belmont.
- Waterdog is a gem and haven for mountain biking.
- Keep bicycle access at Waterdog trails!
- Please ban bicycles from all unpaved trails!
- They are for everyone, and I fully support MTB activities in those spaces.
- Trail conflict can be reduced with education so one side does not feel they own a space over another e.g mountain biker over hiker or vice Vera
- Let's keep trails for mountain biking - great way for kids to get moving and be outside. Waterdog is a gem of a park that is unique in urban settings
- Please keep Waterdog open space open to Mountain bikes. Mountin biking is a popular way of experiencing the bay area parks and open spaces. There a many Mountain bikers of all ages in the community and Water dog is a cherished park for us.
- Waterdog is valuable venue for mountain biking for older riders such as myself (56yo) due to proximity and to avoid driving to other peninsula preserved

Question 16. Other Responses (con't)

- Waterdog is a gem. It is essential to keep the open space accessible for multi-use including mountain biking!
- Bike trails are great
- We appreciate single track riding in Waterdog Lake Open Space.
- Mountain biking is an essential activity to many of our families here in Belmont. It's crucial we continue to build and grow with our neighbors this active lifestyle of mountain biking.
- Same as above :)
- Belmont's Open Spaces are very rare and special to me because of their mountain biking trails. That is how I unwind, spend time with my young son, and spend time with friends and family. There are no other mountain biking options that I can ride my bike to.
- Open spaces like Waterdog should not be turned into a Nature Preserve and take certain activities away.
- The mountain bike trail access at Waterdog lake was one of the deciding factors when deciding to purchase a home in the area. It is important that we keep this trail open to all users!

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- It is important that we keep trails open to biking. It brings people from all over the peninsula to our town and helps businesses thrive in the local community. Whether it's to purchase bike related products, a meal and beverage after the ride or just running some errands in the neighborhood, mountain bikers contribute to the local community.
- Bikes make the open space a more friendly and lively environment. The more bikes the better!!
- I ride my bike about once a month in Waterdog. I ride there from Mountain View. I'm a strong proponent to keep Waterdog open to bikes, as it is one of the few areas where bike riding in an open space is permitted. I'm a strong believer in multi-use open space recreation, which mean walking, hiking, biking,... can all co-exist next to each other. However, each group should follow behavior etiquette rules, e.g. as a bike rider I'm always extra courteous to hikers. However, I also experienced that not all bike riders are like this, so there is need for education. As well as education for hikers, as I experienced very often that despite several announcement calls of me about to pass, hikers either move to the wrong side of the path, not move at all, or occupy the whole path. We all want to enjoy the open spaces, which means each side needs to stick to behavior rules, and respect each other.
- Please keep them multi-use (ie. allow MTB) and also allowing eBikes. Posting trail sharing etiquette signs will help but there's no need to ban MTB or try to turn Water Dog into something it never was (ie. some kind of nature preserve).
- Open Spaces/Parks should be inclusive of all levels of ability and all types of sports/activities/ exercise. Biking is a form of exercise for many people in our area and we need to maintain muti-use trails and respect different forms of exercise.
- I absolutely love Waterdog for hiking, trail running, and biking.
- We need mountain bike access
- Waterdog, Hidden Valley, and San Juan Canyon are all tremendous gems for the Belmont and surrounding communities. They allow for easy access to nature for exercise, reflection and provide an opportunity for us to introduce our children to nature and to outdoor exercise such as hiking and biking. It is wonderful that these areas are accessible to all trail users. My children love biking and hiking in Waterdog and it is great to have a safe, car-free area for them to ride and walk.
- The fact that hikers and bikers can share and get along.
- Please keep trails open to all users. My whole family enjoys Belmont's Open Spaces whether it's on foot or on 2 wheels. As one of the last places on the peninsula open to bicycles, it is up to Belmont to set an example of how multiuse trails can be a valuable asset to the community.
- The allowance of mountain bikes on this trail makes this open space treasured and a source of pride. To limit or eliminate bikes on trails due to a small number of users, relative to bike riding users would be grossly unfair and counterbalance the true user majority voice.
- Waterdog is one of the best Mountain Biking locations in the Mid Peninsula region.
- Please don't ban mountain bikes in any of the open spaces, especially Waterdog and San Juan Canyon.
- Please do not restrict Mountain Bike access in Belmont. Mountain biking is already over regulated on the peninsula and Belmont is a gem/privilege that we don't take for granted. Let's work together to maintain the land and keep the trails safe so that ALL trail users can enjoy the trail space.
- Please keep them Open to all multiuse activities, unlike Foothills park in Los Altos.
- My Family, Friends and I have been riding bikes at Waterdog and hidden canyon for a decade. It is a wonderful frail system that should stay open and friendly to mountain biking as there are very few locations like it.
- Multi use is important.
- Please don't ban biking, I love biking in Belmont. It has been a godsend during COVID
- Please preserve mountain bike access at Waterdog. Also engage mtb community to assist with trail maintenance. Ok to ban ebikes, or limit their use to specific trails.
- Mostly use Waterdog for family exercise with our dog and mountain biking. Enhancing this area for these activities are most important to us.
- Water dog park and the open space surrounding it is a piece of mounting biking history and brings the community together. Our local mountain bikers are very respectful of the land and maintain it better than any organized trail crew could. This park is known throughout the country for its mountain biking and must be protected.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- If you want to be inclusive, you need to allow mountain bike access. For whatever reason, there is a small but vocal group of people who seem to think mountain biking isn't a valid form of recreation, but we could not disagree more.
- Mountain biking in Water Dog Park is awesome! Let's keep it open for mountain bikes.
- Please don't restrict bike access to waterdog. There are very few nearby trails open to bikes.
- Water Dog is ideally situated to continue to offer some of the best mountain biking trails in the region. Mountain biking is a healthy form of exercise and should continue to thrive and expand in Water Dog.
- Leave Waterdog open to mountain biking. Maybe designate mtb specific trails and directions.
- Mountain biking in Water Dog lake park is my favorite use of the open space in Belmont.
- Belmont open spaces are important to local mountain bikers. Mountain biking needs an appropriate setting. Other activities that can occur anywhere/everywhere should not take priority over activities like mountain biking that need certain conditions. Please keep the cycling community in mind.
- I ride these too on my mountain bike that i recently got and am trying to improve there I don't go to any other places so I'm praying it doesn't get destroyed.
- There should be no changes to mountain bike use in Water Dog. It is a good mix today, and I use it for biking as well as hiking and see no issues with mixed use.
- Ppl to leash and clean up after their dogs.
- We mountain bike at Waterdog and more guidance would be nice. If we could have select trails where hikers yield to mountain bikers and also max speeds that would increase safety a lot. Community build days would also allow hikers and bikers to work together to maintain trails, taking some effort off of the city and park to do so.
- Please don't restrict bone access to waterdog. It's a great park and such a great place to ride. I have never had any issues there or seen any bad interactions between bikers and hikers.
- Keep Waterdog open to biking!!!!
- I really enjoy meeting with friends in the summer evenings to bike at Waterdog and then have dinner after in Belmont
- Nothing
- Nothing
- Do not limit mountain biking from Waterdog open space. There are very limited places for mountain bikers and this community should allow for different outdoor activities and not limit to only a few.
- Bikes are needed and the majority of people upswing open space are riding bikes
- Continue mountain bike access at waterdog
- I have health limitations and am unable to go on extended hikes. I am able to bicycle as long as I can use my electric assist bicycle. I hope to continue to ride at Water Dog and not have Belmont close it to me.
- Please don't restrict access for bikers! Biking is the one thing that has kept me (and many others) sane during the pandemic. Please maintain trail access for all users.
- Please keep this open to cyclists. Waterdog is an amazing place to ride and closing it to cyclists would crush so many people.
- More bike trails, or bike specific trails
- Mountain biking in Waterdog is a great location and form of exercise.
- I enjoy hiking and Mountain Biking at Waterdog mostly.
- Rumor is a group is trying to eliminate mountain biking in water dog. I've been a regular biker there since the early 90's it would be a shame to loose access to this wonderful place.
- Needs more mountain bike trails built by professionals.
- Keep Water Dog open for mountain biking!
- The mountain bike trails are very important to me both as a cyclist and hiker. I think keeping multi user access to the water dog trails is very important
- Water dog is a great resource for everyone. There is no reason to change current rules. Trails should CONTINUE to get shared by all.
- keep open, NO DEVELOPEMENT. You keep widening the trails for the bikers, you are turning nature trails into streets, Turn the open space into nature preserves.
- Nice open space
- It's my understanding the vast majority of trails in the water dog open space preserve were created by cyclists so it's frustrating to hear residence with more money are trying to curtail the use of these trails to cyclist. I'm disappointing the Belmont would entertain such a ridiculous Idea

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I moved to Belmont because of the biking trails and it saddens me to see the hostility prevalent recently. I think the additional pressure of the pandemic has added to the numbers of users and we could all do a better job of being nicer to each other. I have a bell and I slow down for hiking groups and still get uncomfortable comments. On top of that, trails are getting wider and less fun. I think we could improve the situation for everyone by separating the user groups and allowing volunteers from each user group to take a larger role in trail maintenance and stewardship
- Please do not limit mountain bike access to Waterdog Open Space. Mountain bikers are great stewards and spend lots of time maintaining local trails.
- N/A
- Opportunities to recreate in open spaces is very important. Trail access must be equitable for different user groups including mountain biking.
- Mt bike riders have only one accessible place to ride in the mid peninsula, Waterdog/John Brooks. For years we have enjoyed this space without conflict, and have worked to maintain trails. During the pandemic, the use by hikers has increased resulting in some conflict, and apparently, a well funded group lobbying to prohibit mt biking. I urge the planning committee not to give in to this group and consider the long history of use and stewardship by mt bike riders
- We need to keep Waterdog as multi-use including cycling. It is the mountain bikers who volunteer and work on the trails, not the hikers.
- I recently discovered the sport of mountain biking and it is an amazing way to connect with the city as well as nature. I wish there were more opportunities to help trail building!
- Do not restrict mountain biking
- Please keep mountain bike access!!!!! It is a healthy option fort people if all ages!!!!
- Please respect the history of trails in waterdog/ hidden canyon areas that were created by mtn bikers with layout help from park rangers. Keep these trails open for mtn biking with no restrictions
- Keep water dog lake park bike trails
- Limiting mountain biking is a mistake. Mountain biking brings sustainable revenue and access to a significant number of Trail Stewards to assist in sustainable maintenance of trail systems.
- Waterdog is for biking! Don't let hikers take that away from us, it has been a biking spot for 30 years
- Please keep mouNtain bike acccess to water dog
- Mountain biking in water dog open space is a great way to get together with friends. Really glad it's so accessible from neighborhoods and workplaces in the peninsula.
- Maintain access to open spaces for mountain bikes! Safe, healthy exercise!
- Keep mountain biking at waterdog please
- Add more trail systems for bikers. Keep Waterdog park open for mountain biking and multi-use (walking, running, dog walking)
- I think mountain biking is a great sport that gets people of all ages out in nature and exercising. The sport is growing fast and is great for the community. Not just for health but and for the town economy. Lost of people visiting spending money
- Great local mountain bike area, good stress reliever for me after work
- N/A
- Waterdog needs to stay open to mountain bikers.
- Please keep mountain biking a part of Water Dog. There are so few accessible mountain bike parks in the Bay Area and this one is a rare gem.
- I love mountain biking!
- Please keep open to mountain biking.
- Keep mountain biking at waterdog, it's a gem!
- Water dog rocks! I have been riding Waterdogs trails on my mountain bike with friends and family for 15 years and enjoy that it is so close
- Multi use open spaces for hiking, walking, running, mountain biking, etc. are perfect.
- Mountain biking in Belmont open spaces is one of my favorite things to and that is one reason I live as close to Belmont as I can
- We love to Mountain Bike through Waterdog. It's just around the corner and a unique open space in the city.
- Belmont is best known for its mountain biking so why ban it?
- Mountain biking trails are amazing and I use them all the time and donate money and volunteer hours for their maintenance
- Keep it open to bikes including ebikes please! But ok having a speed limit if pedestrians feel unsafe.
- Watedog park is one of the few area available to ride mountain bikes (ebike and anonlogy) in Belmont only have had positive interaction with other hikers and bikes using the trails

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Most mountain bikers are hikers too, and we want to share these parks/open spaces! We always try to follow good trail etiquette and I've never had any issues with other Trail users. There are only so many parks and open spaces available for mountain bikes, it's important to protect ongoing access!
- Have more trails to mountain biking, it's a great sport, my son lost 15 pounds by doing mountain biking and he loves it.
- Reference the Mid-Pen policy for e-Bikes & people with mobility disability. Maybe have a small laminated placard (like handicap placards for vehicles) which can be attached to the handlebar of the e-Bike.
- I love the mountain bike trails.
- Great place to ride mountain in the middle of an urban area. It is a gem for trails and riding.
- Water dog is an amazing space for recreation. As an avid trail runner, hiker, and mountain biker, I appreciate it's proximity to my house - I can run and bike from my front door! I am in strong support of keeping water dog available to multi-use, it's an important asset to our community, and it drives people local businesses in the area as a result of it being a mid-week destination for trail runners, hikers, and mountain bikers
- Keep trails open to bikes
- Set the paths as one direction, like demo or skegs- it will keep riders and bikers safer using the trails together
- We need to keep these open to all activities. Recent limitation on biking and ebiking is excluding a large segment of Belmont residents. Open spaces should be accessible to all residents and all activities
- As part of the plan, I'd like to request that mountain bikers retain access, particularly at Water Dog. It's a beautiful area and provides mountain bike riders with a great way to get exercise and enjoy nature.
- I primarily use Belmont's open spaces while biking on the Peninsula. They're a treasured space and I value the ability to bike through open spaces like Waterdog. I believe we can both maintain access to Waterdog but also preserve its natural character.
- Please keep trails open to mountain bikes
- do not close the trail for mountain biking. this is discriminatory for people who live far from other available trails.
- Please keep the current multi-use purposes of trails and expand number of biking trails where possible.
- The effort to limit or bar mountain bikers from Waterdog Park is incredibly unfair to those of us who are responsible and considerate riders, and who enjoy and respect the beauty of the open space. I have been visiting the park and riding the trails since the early 90's. It is especially unfair to consider limiting access given that many of the trails were built by mountain bikers. Without them, the park trail system would not be what it is today. Perhaps the key is education and posting of "rules" that many long time riders are very familiar with — yielding or slowing for hikers, yielding to uphill riders, not riding in wet conditions, etc. We should all be able to share the trail system and do it in a way that is safe and enjoyable for everyone.
- Please keep access open to mountain bikes!
- Keep open to all users (walkers, dogs, cyclists, hikers, etc).
- More mountain biking trails would be nice.
- My whole family loves mountain biking at Waterdog! Fun spot... thanks!
- Strongly feel that bicycles should have more access to open space areas. During the pandemic there has been an increase in bicycle and this will continue in the future I believe.
- Keep building more trails for the youth they truly love getting out there.
- One of few places in the Bay Area that has easy access to mountain bike trails without long drive into the mountains. More communities should expand biking in these city parks for this reason and makes Belmont an area I would like to live in. Reduction of mountain bike access in Belmont parks would limit accessibility to those who do not have means (car/bike rack/etc) or time to go to more remote trail networks.
- I love being able to step into nature so easily!
- Keep and enhance all cycling opportunities including mountain biking
- Waterdog is a gem of an open space and to be able to ride my bike to mountain biking trails like these is a big joy in my life of fitness.
- Keeping trails open for hikers mountain bikers and pets is very important
- Waterdog is an absolute gem, including for gravel and mountain bike use. If anything, it would be great to further expand the number of trails for bike access.
- love Waterdog for mountain biking. Wish the Cross Country Trail was open to bikes.
- Keep Waterdog open to mountain biking and multi-use

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Water dog is truly a gem for the mountain bike community.
- Keep bikes alive
- Keep the mountain biking!
- Consider a Mountain Bike Steward program for open space to help educate and teach proper trail etiquette.
- Keep bike access to trails in waterdog park!!
- Waterdog park is one of the best mountain biking/running trail network around. Please keep biking available
- Really enjoy biking running and walking at Hallmark and Waterdog
- Love mountain biking at Waterdog. Please limit electric bikes.
- Love MTB at waterdog!
- We should allow for all activities for hiking biking and walkers. We all deserve an outdoor space!!!
- Water Dog is where I first learned to mountain bike, and how I made new friends in the area. I'm thankful that the city keeps this space open to bikes, and am happy to be a part of the volunteer maintenance group to help maintain the trails for all users.
- I would love to see an increase in Mtn bike trails throughout the open space. There are so many Mtn bikers and not enough space. All of our friends are into it and we have friends that come from miles around to ride with us. I think it's a great opportunity to drive business in Belmont, similar to Santa Cruz
- Biking in Waterdog is one of the great trails in the Bay Area. Please keep this open to all! Bikers and hikers together make it a great open space
- Waterdog is a gem amongst the peninsula, especially for it's unique accessibility to all groups from small children in strollers (lake road) to mountain bikes. This inclusivity is amazing.
- Keep Waterdog Open for Hikers and Mountain bikers. We've been riding, coexisting, and showing respect to each other for over 10 years.
- We love Waterdog! Keep it open for hiking and biking.
- love the mountain biking comraderie at waterdog open space, hikers and mountain bikers share the space quite nicely
- Mountain biking trails are popular and most bikers are considerate of hikers and walkers. More singletrack trails will help ease the traffic on more popular hiking/walking trails.
- Keep waterdog accessible to biking. It is just as important as walking.
- Biking at water dog has saved my sanity. As a new mother I was so grateful to have a place to mountain bike so close to home where I could exercise without spending hours apart from my baby driving to skyline. It has need a great place to walk after work and introduce my child to hiking and biking. It is something so special and unique (first drove from sf to bike back when I lived there) that not many communities have. With so many other hiking and jogging options I hope this park stays bike friendly.
- More information about mountain biking trails
- Do not limit trail use
- I only discovered Waterdog during the COVID shelter-at-home orders last year, and I am so thankful that this place exists. I have taken my family there for biking many times and it has helped to keep my family both physically and mentally healthy during this pandemic. In addition, when we visit Waterdog we also stop at the nearby Carlmont Village shopping area for lunch and coffee and I have started shopping at Belmont Bikes. Keeping Waterdog accessible to bikers and hikers helps Belmont's economy. With the pandemic, there are many new users to the open space and they need to be educated on proper trail etiquette, posted signs and outreach will help to keep it enjoyable for both experienced users of Waterdog as well newcomers to the benefits of Waterdog.
- Keep it accessible to everyone
- They are open to all people . Close enough to take my family on hikes and bike riding. And how to appreciate nature
- Please retain mountain biking use at Water Dog, it's the only area close to me that I frequent often.
- My wife and I really enjoy the mountain biking at Waterdog.
- It would be great to see expanded access to mountain biking and more mountain biking trails in Belmont's open spaces as that is our family's primary activity, and the primary use activity for many families that we know.
- Preserve multi-use trails
  Require all mountain bikes to use a bell on handlebars to announce their approach
  Ban e-bikes - too dangerous. No different than "lite" motorcycle

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Belmont Open Space has been a gem of a spot for access to mountain biking. As an avid mountain biker and a lover of the outdoors, I expect the trails to be remain as multi-use for all to enjoy. Mountain biking is not a crime. It is merely another form of outdoor activity.
- world class mountain biking. point of city pride
- Though many of the trails were built by and maintained by mountain bikers, Waterdog Lake is one of the few open spaces in the area where all trail users are welcome. We should resist the urge to limit use, however motor vehicles do not belong on the trails (E-Bikes). The trails are well built for 25-30 lb bikes, but not for 50-60 lb motorized vehicles.
- Keep access to mountain bikes. Engage the Mt. Bike community to build trails.
- Keep Waterdog available to mountain bikers. Do your share to provide space for riders. There are so many places for hikers already. We can all coexist easily.
- I'm a hiker, trail runner, dog walker, dad, and mountain biker. I've been doing all of these activities at waterdog for 20 years. Myself, and countless other mountain bikers have spent many hours working on these trails, going back to Passion Trail Bike days long ago.
  I feel like lately, perhaps with the increase in users since COVID, and the increase in the popularity of mountain biking, that people are angry every time they see a bike on the trail. I'm polite, and always yield to hikers. Many of these individuals are new to the outdoors and are unfamiliar with mountain bikes.
  Please don't let these people try to limit or end our use on bikes. Waterdog is one of the only areas around that allows bikes.
  Thank you for listening and thank you for the survey!
- I strongly support the use of bikes at Waterdog Park. My experiences with shared use on the trails has been positive.
- Water Dog / Hidden Canyon is one of the great peninsula MTB resources. There are very few local MTB trails anywhere on the peninsula that offer the same level of mountain biking challenge.
- Expand mountain biking access
- It's known in the peninsula as a mountain bike destination with friendly locals. Mountain bikers are known to be very active in maintaining the trails and keeping it beautiful
- Waterdog is a treasure and the mountain biking community gives back a great deal to maintaining the trails here. I take my family mountain biking here all the time and it's perfect for them.
- Mountain biking could be easily expanded and many volunteers/collectives would assemble to help.
- The open spaces are an amazing asset for all local residents to get out enjoy and the outdoors and some exercise. I have been mountain biking at the trails at waterdog park for 15 years and appreciate having this amazing space in my backyard. I find riders to be very thoughtful , respectively sharing the trails with all users. I have heard recently that a small group wants to restrict or completely prohibit mountain biking at water dog - that would be a mistake and unfair to a group that has been a good steward of the open space..
- Keep mountain biking in all open spaces. It is an activity many of us do frequently as our primary means of exercise.
- It is a great resource for mountain bikers, and I hope it stays that way. I am willing to help with maintenance, and I always make an effort to be considerate to hikers so we can all enjoy the space.
- For 25 years I have been riding mountain bikes in the Waterdog Open space preserve(back when the lake had waterdogs in it). I have spent days building permitted trails and have many riding friends who have done the same. It is the best urban mountain biking trails in the bay area located in our backyards. It makes me sad to think some would to take these trails, a lot of them built and maintained by many bikers, away from us. It also is a destination place. bringing many to support local restaurants down the street, not to mention our new bike shop "Belmont Bikes" which has made Carlmont shopping center a destination center itself. With the disappearance of local ice rinks, I do not believe we need to narrow our choices of recreation. There are many of us, why can we keep our choices of recreation open.
- Please do not close trails to mountain bikes.
- It's special because it is a multi-use open space. My family and I hike and bike there often.
- I love that I can walk and mountain bike right from my house and get peace and quiet, nature, exercise and a challenging ride. I see people using the trails for many different reasons and respecting each other and getting along.
- Waterdog Open Space is a valuable resource for me for after work bike rides.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- There needs to be more access mountain biking. Bike sales and purchases generate a lot of sales tax income. I don't like riding with the kids on multiple use trails and having to compete with hikers and horses. Biking deserves its own trail network and accessibility.
- Leave trails open for multi use!
- Have really enjoyed mountain biking at Waterdog with friends and would like to continue to come to Waterdog in the future.
- Please keep all bike trails and add more if possible. We need more trails to enjoy the outdoors and be respectful and responsible with nature
- Many Respectful Mountain Bikers visit Water Dog and spend time and money at Belmont due to the trails. Please do not limit Mountain Biking at Water Dog.
- Please preserve mountain biking at Waterdog Lake Park, it is one of the few easily accessible trail networks in the area for locals and its generally well maintained by volunteers
- Keep and maintain the mountain biking trails!
- I ride mountain bikes with my two sons multiple times a week at Waterdog. I work in San Carlos. My two sons go to school in Belmont. It is a fantastic open space that is close to home and work.
- Waterdog is a local treasure that has allowed me to get at least 5 non-active people out on mountain bikes and become nature people.
- Keep mountain biking at water dog
- Waterdog open space is a hidden gem! I often visit to bike and hike the trials either with friends or family (I live in Foster City). The trials must remain open to all.
- We love mountain biking here. Everyone enjoys nature a different way. For us it's biking. Don't take away my nature time.
- please keep Water Dog open to mountain biking
- Please keep them open to mountain bikes, it is one of the few places left to ride in the area.
- I've been riding my mountain bike at waterdog for about 5 years now. It's a great form of exercise and my friends and I are very respectful of all other hikers and bikers. In my opinion the bikers actually outnumber the hikers by a great margin and I think it's ridiculous that this small group of individuals think they have the right to close down the parks to all mountain biking. I see mountain bikers of all ages enjoying the trails and I hope to still be riding there for years to come!
- Waterdog is an amazing place. I use it once a week for a mountain bike ride with friends and it a highlight of my week.
- Mountain biking at waterdog is so much fun!!!
- Allowing mountain bikers at Waterdog is beneficial for the broader community. Mountain bikers maintain trails and look out for people/animals/nature in distress. Mountain biking promotes health and well being, and is a positive experience for young people. Without activities like mountain biking young people turn to crime, drugs and antisocial behavior.
- Please keep mountain biking open in belmont open spaces
- I wish there was more mountain biking allowed.
- I mostly use Waterdog to mountain bike and walk my dog. I would like to see the dog leash requirement a actively enforced. I would estimate that 4 out of 5 people with dogs on the trail have their dog off leash. At minimum signs should be posted that dogs must be on leash.
- Water dog is one of the best mountain biking trail systems on this side of the peninsula. It offers a rare opportunity for hikers and bikers to recreate in nature so close to an urban area. The outdoor recreation use here needs to be preserved so many can enjoy the wonderful trails.
- I'd like to advocate for safe mtn biking.
- Before taking drastic measures to appease minor, yet vocal, opposition to shared trail use, please consider small measures to increase awareness and respect amongst trail users. The term "stewardship" is a good one that the trail community has been using more regularly in the area. Trail users are, in general, all out for the same reason, and with respect and awareness trails can be enjoyably used by all.
- Try are great
- These are the only local mountain bike trails. Please do not take them away.
- The open space areas of Belmont are what makes Belmont such a great and unique place to live. Being able to run/walk/bike to one of the opens spaces is a great way to get outside, exercise, and spend time with the family. I don't understand the constant chatter about bikers/hikers not getting along. I'm out there as a runner, hiker, and biker...and I've never experienced any hostilities from either side in my 16 years of living here. It really baffles me. Most times is actually quite the opposite with everyone being polite and friendly to one another.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I strongly support cycling at WaterDog. For the past 12 years I have frequented those trails with friends and family on our bikes for both fun and exercise. It's a great spot to ride to and enjoy the trails from the house without having to drive. I encourage the commitment to cycling at WaterDog and would love to see Belmont embrace an already strong base of cyclists in the area who enjoy this space.
- I mountain bike at Waterdog a few times a week and appreciate that I can get there from my home in San Carlos without having to drive! My son also learned how to mountain bike at Waterdog, as it has a wide range of trails for both beginners and seasoned riders, so it is a good place to learn and to improve! I love it and have been going there regularly for the past 15 years!
- Please maintain bicycle access to Waterdog Lake Open Space.
- We need more access for bicycling. More trails, and pumptracks. There are so few places to ride trails that everyone has to go to the same trails. More trails that are close to residential areas so people dont have to drive to the trail head. Please dont take away biking access from any open space. Open more trails please.
- Access for mountain biking is very important to me. I have lived here for 19 years and this has always been a safe and accessible recreation for me and my family. Please do not ban mountain biking at Waterdog. This has been a peaceful coexistence of hikers and bikers and everyone who enjoys the open space. I hope we can find a way to preserve access for everyone.
- As a family, we very much appreciate Waterdog and the biking/hiking available there. Thank you!
- Keep the legendary Waterdog open to mountain bikes. Perhaps not e-bikes though.
- Keep em open
- Biking trails are necessary in these areas, it's a great way to encourage fitness and bring communities together
- Waterdog is the best for biking! So grateful to have a biking spot so close to home.
- Mountain biking access is critical. Currently mountain biking in Waterdog area is a fantastic experience, which I have used for years. I have friends who live in Belmont and we all enjoy it. Restricting access due to a loud minority pushing an agenda would be a true disservice to your constituents.
- I'd love to see mountain biking eliminated at waterdog. I hate watching our trails keep being rutted by bikers in the rain muds.
- Continue to allow use by bikers, hikers and runners. Limit dogs
- keep open spaces open to mountain bikes
- Please keep water dog park open to bikes and prioritize trail maintenance and etiquette for all user types rather than closing anything down
- Please allow and expand mountain biking at water dog! Some hiking only trails combined with some biking only trails could work well.
- Waterdog is a special place for mountain bikers and families. Many places in the bay area have open space that safely and sensibly share the trails for riders, hikers, families.
- Water Dog Open Space is a wonderful place for mountain biking, one of the few on this side of the mountains, an even on the peninsula. It has the potential to be a wonderful mixed use area for everyone.
- I would really advocate for keeping mountain biking at Waterdog, it's great to have a local park where we can do this activity. (I"m a middle aged woman, and yes, I mountain bike too)
- The trails take continuous maintenance to prevent erosion and maintain rideability
- Mountain bikers are a vital part of the northern California outdoor community, and Belmont open spaces are a great opportunity for mountain bikers to access and enjoy nature.
- Mountain biking is Belmont's biggest draw for me. I usually get food at a local restaurant after rides.
- I love Waterdog for not only hiking/dog walking but mountain biking. I am disappointed to hear there is a vocal minority out there that is opposed to mountain biking/multiuse of this beautiful area. Unfortunately, having roots in the north bay this is not a new phenomenon to me but I guess I naively expected better from my peninsula neighbors. Please do not bow to these elitists.
- They are fantastic and let people enjoy them with as few restrictions as possible.
- Mountain bikers are respectful of the space. Please oh please don't limit our access. I beg of you.
- Waterdog has always been taken care of, and loved by mountain bikers. It needs to remain open for mountain bikers. More places to ride means less crowded trails, trails in better shape, and more opportunities.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Waterdog Canyon is an amazing resource and an absolutely beautiful place to escape the noise of hectic Bay Area life. I feel like the trails are well-maintained, though there may be too many - its quite the maze. Trail signage is not clear, and does not include a "You are here" indication. These trails should remain multi-use! There are so little biking trails, or trails that allow dogs - these activities need to remain accessible to residents.
- Please preserve, maintain and improve the mountain and road bike access to open spaces. The cycling community is a large part of the soul of the Penninsula.
- I've been My biking in Belmont open spaces for over 20 years and would hate to see this right be taken away
- due to the pandemic Waterdog is one of the places where I can easily maintain my mental health by MTbiking around. I'll be happy to help in maintain and restore the trails
- Waterdog Park is a relatively hidden gem and a wonderful resource for trail biking that was riding distance from our home in Belmont (unlike most places that are still legal to ride), and an easy ride from parking at shopping areas. The trails are a great place for riders of all ages to learn to love mountain biking without the risk and difficulty of the bigger places that still allow bikes, such as Corte Madera (aka Skeggs). When we lived there I, like many other cyclists, helped build and maintain those trails. There are so few places left to ride a bike in the woods in the Bay Area, particularly for relative novices or younger riders, and it would be an immense tragedy to close them to the cycling community, who care as deeply about experiencing nature as those who prefer to enjoy the trails on foot.
- Need to forbid mountain bikes as they are greatly damaging the trails and are very dangerous to hikers, especially the electric bikes. Way way too many bikers that do not live in Belmont are frequently coming to waterdog to bike. Most are going too fast and do not watch out for kids or hikers.
- I mt bike in Waterdog often as it's one of a few trails that is close to home (<20 min drive), but is one of the more enjoyable technical trails. A lot of inner city trails are dumbed down, i.e. Arastradero is paved now. There's no other nearby trails that offer similar experience to really being out in the mountains. It's easily accessible after work. I like going on Mondays when Off the Grid is scheduled. When I ride, I use a bell, Timber bell to be exact. This constantly alerts others that I am coming around the corner. I don't try to ride to set KOMs. I'm cautious about other trail users. My experience is riders hear the bell with no problem, even as they approach at speed. Hikers on the other hand, act like they don't hear it. They act surprised like they didn't see me, but they do, and they still don't get out of the way. I'm polite to stop and let them pass. I understand where they're coming from. There are other riders that are pure dicks who just want to ride for speed. But there are also ignorant hikers who aren't considerate to move out of the middle when others (riders or hikers) want to pass. I'm for signage to emphasize sharing the trails and proper etiquette. I'm also for promoting bells for all users. It would be nice to have 1 or 2 downhill designated trails for both hikers and riders to avoid approaching traffic. I think this may help all have fun. And if they're having fun, maybe they'll consider pitching in to maintain the trails like some MTBers do. I don't see hikers pitching in.
- Having Waterdog trails built for multiuse over the past few decades has been a wonderful use of this space. I mtn bike for over 30 yrs, so I love having trails.
- Local MTB access is crucial! It is one of the greatest amenities of Belmont's park/open space system.
- Would ask not to remove mountain bike access. There are so few legal trails and with the sport's growth in popularity and helping people to get outdoors and exercise, removing access would not be a good answer. Would suggest for multi-use setting up days for different activities. For example, odd days are for hiking and foot traffic, even days for bikes.
- We love open spaces. Spaces that are open to all uses.
- We have plenty of accessible preserve space in the region. I want to see Belmont continue to use Waterdog and its associated areas for outdoor recreation, particularly biking.
- Bike trails are great
- Mtn. Biking should be open to trails in Water Dog open space. Do not limit or ban biking.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Please do not reduce multi-use trail access particularly for cyclists. Trail maintenance, education, and etiquette guidance are ways for multi-activity users to coexist well and keep trails in good condition.
- Keep mountain biking
- Keep bicycle access in all parks
- Maintain bike access at waterdog
- Mountain bike trails are great. Thank you!
- Belmont Open Spaces must be designated as an Open Preserve.
- All trails currently open to mountain biking need to remain that way. We bought a home in Belmont for access to these mountain biking trails
- There's no perfect world for anyone, we all want to enjoy the open space and may do so through different activities. Mutual respect and helpful resources to facilitate everyone's enjoyment seem the best way to address concerns from distinct groups
- nothing, i love you guys man
- Do not make rules about open space access that are more restrictive than current. A vocal minority does not represent the current users.
- Water Dog is one of the nicest Mountain Biking areas on the peninsula, especially mid-peninsula. I've been riding at Water Dog Park for 10+ years and have never encountered an issue with other riders or with hikers. Both coexist very well. It would be an absolute tragedy if mountain biking was to banned. I see all ages and ethnicities riding the park.
- My primary use of Belmont's open spaces is to mountain bike and is the sole reason I visit Belmont. While I am in town I purchase fuel, shop, and visit restaurants.
- I want to encourage the continued shared use of open spaces allowing cyclists, hikers, e-bikers and others to coexist as they have for the 15 years I've lived in Belmont. Bikers at Waterdog have organized and have helped maintain trails for over a decade. New generations of kids growing up in Belmont love to cycle and are taught to be respectful of others. Allegations of conflict/accidents with hikers or environmental degradation aren't based on facts. Helping everyone coexist by creating etiquette guidelines and signage and encouraging bells on bikes, discouraging headphones on everyone, etc. could be helpful, but after riding for 15 years I feel confident in my many interactions that we are all able to share our resources happily.
- Keep them open for bikes
- It is critical to maintain unrestricted mountain bike access to Waterdog Park. It's one of the few excellent areas to ride on the Peninsula.
- Waterdog is a premier biking location in the area and it is critical to a bunch of us to keep it open to biking. I wear a bell on my bike and am always courteous to pedestrians. Please keep biking options open on trails.
- Please continue to embrace mountain biking it is the beat way to get the youth invested in preserving and loving nature while involved in an exciting activity
- Mountain bike advocates built the trails in Waterdog and should not be restricted.
- I really enjoy mountain biking in the open space on the weekends. It's one of my favorite things about living here. As a father of 3 it's an amazing amenity for our family.
- Please continue to provide trail access for mountain bikes. Trail access is very difficult to come by in the Bay area without having to drive a car to it. Cyclists can ride to Waterdog Park from their homes and ride trails. This is better for our society's collective carbon footprint.
- Mountain bike trails and access are very important to the community - I have ridden at Waterdog as a youth as mountain biking started in the 1980's - this is an important open space that is important to the community and a mountain biking community that maintains trails the park and other members equally.
- belmont was an amazing place to come mountain bike after school growing up. i'll never forget the bonding my father and i were able to have on easily accessible trails. one of the benches now resides in his name, and i come back now and again to visit him and remember. if you were to remove mountain biking from this place, i would loose a part of my family
- Waterdog Park was instrumental in the development of my love of mountain biking and building a strong community of bike friends.
- Keep mixed use! Do not restrict bikes.
- As I age my ability to enjoy the outdoors becomes more limited. In particular, I cannot walk for more than about a mile... but I can ride a mountain bike a much further distance and this allows me to continue to enjoy the outdoors. I'm very much opposed to limiting access to mountain bikes because it limits my ability to enjoy the outdoors.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I've been riding Belmont's open spaces for the past 20+ years. It is an amazing place in my back yard. Please do not change that.
- Wonderful
- We LOVE biking the trails in Waterdog.
- Rare to find this in the bay and in particular, so amongst the neighborhood
- The open spaces are an excellent way to be in nature and to exercise either through mountain biking, running, or hiking. There's plenty of space for all and they NO impact on the environment.
- I love the open spaces and get most of my weekly exercise and some of the family exercise there too. The number of loose dogs in Waterdog is a concern though, many owners have them off-leash on the trails, scaring wildlife, causing near encounters with bikers and scare kids that might not be comfortable with large loose dogs up close.
- We love mountain biking at Water Dog! It is where my son learned to ride trails. It is a treasure and it's shared use should be preserved.
- Keep the bureaucrats out of the park
- Its extremely important to keep access to a wide variety of uses. Limiting our Open space to fit the needs of a minority of users will hurt our community.
- Waterdog Lake is my favorite place to mountain bike, locally. It's amazing. Hours and hours of volunteer work have made the place a wonderful (MULTI-USE) playground.
- I like to ride my bike at Waterdog Park frequently.
- Please keep water dog open to all users who use it right now. Bikers, Hikers, Dogs, etc. Improve it, do not go backwards.
- Mountain biking saved my mental health. Please keep water dog open for bikers
- Keep Waterdog accessible to bikers!
- Expand into more spaces if possible and connect them
- Mountain biking is a huge economic boost. Please take advantage of its massive growth over the last few years and it's huge potential.
- Love mountain biking at waterdog, it is the only reason I go! Best place to do it. Please continue and expand use
- I love water dog lake park for its mountain bike trail! It is the only place I can ride after work and is a wonderful place to ride. I've only had positive interactions with other trail users and would love to keep that access or even expand it!
- Love to hike and bike in water dog park. It is great to have such a nice open space so close to home.
- I have built trails and mountain biked Waterdog for the last 20 years. Waterdog is an important mountain biking destination and most of the trails exist because of the hard work the mountain biking community put in there. I do hope that this plan will continue to allow access to this great local resource to the mountain biking community.
- Please keep Waterdog open space open for bikers. It's is a place my family and friends use for exercise and learning the sport of biking. The trails are challenging and a great learning environment.
- Leave for the mountain bike riders.
- Waterdog Openspace is one of the best opportunities for outdoor recreation on the peninsula, and since the recent resurgence of volunteerism (and Belmont Parks collaboration with volunteer groups) it's gotten even better. For all the negativity I've heard in the townhalls and public meetings I've never had an _actual_ negative experience while recreating in the park (aside from the occasional Poison Oak rash). This space is well loved by residents and visitors alike and should continue to be an example of open space land stewardship to the whole bay area.
- Hikers sometimes walk in very large groups
- Waterdog is a gem
- Keep mountian bike access at water dog
- Water dog lake park should continue letting mountain bikers ride the trails, it's the best trail system around and a great workout for all and it's very easy to ride for all ages
- Keep cycling in Waterdog open. it's fun and accessible for those of us on the Peninsula and in Belmont.
- Walkers and mountain bikers have been coexisting and sharing trails in Waterdog park for many, many years. I strongly support continued shared use of all trails in Waterdog.
- I love Waterdog! I am a mountain biker and I have taught other women how to mountain bike at Waterdog. It's fun, easy to get to, beautiful, challenging, safe, friendly --- I just love it.
- Bicyclists are committed to maintaining and improving trails
- I am thankful these spaces remain protected and will not be developed into more housing
- Really enjoy the Waterdog trails, Hallmark cross country course
- It's important to maintain equitable access for mountain biking in Waterdog Park

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- I love mountain biking at water dog. We selected our home to be within riding distance to the park. Never had an issue with people walking or walking myself. Please don't ban.
- I love mountain biking at Waterdog. Please continue to allow mountain biking.
- My main reason for visiting Belmont is to mountain bike at Waterdog. It's extremely valuable to have great trail access in such an accessible location. I regularly visit by myself, with other friends and with my family.
- mountain bikers are generally courteous - and great citizens of the park and open space- maintaining trails etc
- mountain Biking in open space is very important to me.
- What are plans to expand biking opportunities?
- Please keep mountain biking.
- Please keep WaterDog open to Mountain bikes, thank you!
- We love what we have. We want to keep multi-use trails multi-use and inclusive. There are a few bad apples out there who make it their mission who if they had it their way would want it only for Belmont residence and not make it multi-use or severely limit the multi-use aspect to the point it would add no benefit for those other multi-use groups.
- Open spaces are one of the reasons we chose to live in Belmont. Waterdog and San Juan are fantastic multi use spaces that we use every day for dog walking, biking and hiking and the space is unique and should be preserved for use for everyone and for all activities
- I've been responsibly riding my mountain bike in Belmont Canyon for 15+ years. I ride the trails 1-2x/week. I've never once witnessed any bad behavior from anyone, quite frankly. I'd be happy to testify on this point at any open public hearing.
- I taught my two daughters to ride their bikes at Waterdog. They love riding on the trails. They love to do "bikenics" where we ride and then picnic.
- Mountain biking is a key activity that needs to be preserved.
- Are you going to add any new trails for riding and hiking at Water Dog Park?
- For the past 20+ years I have enjoyed the open space in Belmont. Specifically Water Dog and I continue to travel 40+ minutes to go there and spend time Mountain biking and going to parks with family and friends.
- 'Love waterdog' is great outreach
- It would be really great if we could have something like the Pulgas Open Air Reserve where a portion of the trails are open for dogs to be off-leash.
- Water Dog Lake trails are great for walking but don't like all the bicyclists as a safety issue.
- Few parks in the Bay Area offer a large, open area for an organized group such as ours.
- A couple friends have asked me to speak out to continue allowing bikes at Waterdog. I think mixed use is OK but more signs about etiquette and trail speed would help.
- The best way to stay updated on activities/ events in the open spaces?
- We love the open spaces. They are worth investment!
- More trails would help disperse trail users.
- More mountain bike areas please.
- Dog waste receptacles are much needed for Open spaces where dogs are allowed with weekly pick-up of waste.
- Great places
- They should be protected from erosion by constant creation of accessory roads for bike riders
- Why did you let these trails become almost impossible to hike on? With proper maintenance and usage these parks could be beautiful.
- I don't go too often but I love and strongly support mountain biking in Water Dog. I am sad to see gradual erosion over the sixteen years that I've been visiting the park... I'd support the city putting a bit more resources into repair and maintenance of the trails.
- Ongoing developments at Waterdog.
- More signage and safety precautions would be helpful as preventive measures. As I stated, "Three Witches" is a section of concern as well as other areas with exposure. The reason for my concern is that while people seem more aware on the trails now (an improvement), there still are people that don't pay attention. I continue to use a Bell and yell "heads up" when I approach blind areas, while people thank me for the warning, I do notice people who wear earbuds and are still not paying attention. Luckily my antennas are always on high alert and I anticipate issues out of concern for my safety and others. However, I think it's inevitable that if this is not addressed there could be some serious injuries.
- How do I learn more about plans for the donated land within Upper Lock and Belmont Canyon Rd? Is this being considered for an Open Space?

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Same as above but even more so: better left alone in natural (rugged) state like its been forever than developed with facilities that bring increased regulation and encroachment.
- I strongly support mountain bike access in Belmont's open spaces. Waterdog Park is a great place for weekday riding in the Bay Area.
- Special resource that are vital for residents and local community.
- Bike lanes need to be improved along Ralston and parts of alameda. It is dangerous riding along Ralston to get to the bay trail or to the middle school.
- We love Waterdog but the bikes can be a nuisance for hikers. Would LOVE a pool and indoor basketball court at the new Barrett Rec Center!
- I also really appreciate the city's open spaces - they are incredible and were a huge factor in me moving here. I most often hike, run, walk my dog, and ride my bike in Waterdog/ Hidden Canyon. I believe expanded signage would go a long way in making the spaces more enjoyable for more people. I also advocate a restriction against any sort of motorized bikes (including e-bikes) in the spaces. Lastly, I would like to see extended use hours for the open spaces. I would enjoy being able to have a picnic dinner with the sunset from the top of Waterdog.
- Being able to walk from my home to playgrounds and open space areas is a big benefit of living in Belmont
- I would like it if there could be set hours for hikers and other hours for bikers on the Waterdog-Hidden Canyon trails, or have differentiated trails. The trails are so narrow and winding that it is hard for hikers to step aside to let bikers go by, even though the bikers have been very courteous and alert.
- People are and have always been friendly on the trails and I'd like to keep that atmosphere above all else.
- Belmont's open spaces are small and surrounded on all sides by development. There are dedicated, large nature preserves within minutes of either of the open spaces. Trail users of all types have gotten along on the trails here for 20+ years without incident and households / families rely on having a safe place within riding / walking distance where they can be in nature getting some exercise. There are plenty of opportunities to expand the trail systems at both parks to accommodate more users while keeping the 'wild' flavor of the parks that make them so fun and popular. The primary thing diminishing my enjoyment of the open spaces is the small group of activist agitators who have made turning the open spaces into hiker-only nature walks their cause. Whatever happens with the PROS plan, I hope that the City will finally clarify the future of the trails system so that we can either rest easy and continue enjoying the parks, or move.
- Belmont needs more bike lanes on roads connecting our parks.
- Belmont needs a good safe connection from upper Ralston (by Fox and Ralston Schools) to the rest of Belmont (Alameda, El Camino, 101). If there was a safe route for biking that connected all of Belmont it would greatly improve the use of Open Spaces.
- I'm tired of the complaining from the same 3 people about mountain bikes in Water Dog. My condolences to city staff and commissioners, that you have to listen to them all the time! I have been hiking in Waterdog weekly for 14 years and have had 1000 positive interactions with bikers and maybe 1 negative one. Bikes are not the scourge that these people seem to think. Please keep Waterdog open to bikers.
- I would like to know that Belmont values MTB recreaction and will keep the trails open.
- Please keep them safe and cared for... have and hold clean up days for the community - we will get out there and at the end serve ice cream ot something...
- Same as above
- Please keep trails open to bikes. My main usage is biking, the trails are great for it, I worry this will limit access to trails on bike.
- Not enough space. Looks crowded at time. Full of wood chips. Which could give a splinter
- Water dog is by far the best mountain biking experience available without using a car to haul my bike somewhere
- I love that dogs are allowed at Water Dog, thank you. I would be interested in volunteering to help with that space.
- My husband and I use open space trails 1-3 per week. Current signage needs immediate attention due to either missing or unreadable signage. We are often letting other hikers know where to go since trails aren't clearly marked. Along with trail markers, trail area maps in key places would also be helpful to navigate.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Concern over the health of Water Dog Lake . It seems to continually draining water yet it was used as a water source for a fire in the San Juan Canyon in 2020. I have been unsuccessful in finding out any information on the Lake. Thanks
- I suggest to prohibit biking in Waterdog trails in the winter or when it's wet. Tire tracks tear up the trails.
- I bike waterdog several times a week. I love it there!
- We LOVE the open spaces. Please do not develop them with artificial structures and continue to preserve nature.
- Trails are in terrible condition due to neglect and biker activity. Not safe hiking in Water Dog.
- fix/upgrade existing open spaces, especially Hallmark park.
- San Juan canyon trails have been over used and not well maintained- and people keep making new ones. Please let nature and animals live here- we've already had to deal with the new construction of houses - and have significant decrease in animals and foliage over the past 5 years. It's very sad. In addition, fire departments are using sugarloaf mountain as training and absolutely demolished the trails last summer. I know that's not Belmont open space but it connects to it and is same canyon.
- We are appreciative of the many trails and options in Waterdog.
- Bicycles are dangerous to us. I can't afford to get hit. Jumping out of their way is also risky. Motorized bicycles should be banned obviously; they travel faster and are heavier. Ideally bicycles would be banned on certain days so we could walk safely.
- Please, please, please. Leave the open trails as they are. Do not change anything. Let us all share them! Mountain bikers, people who go for a walk, to exercise and to be by themselves. Stop bugging bikers. We should be all nice to them and to each other and share all the roads
- Obviously, my central concern is with the damage done by biking in the last two years. It is severe at Hidden Canyon/Waterdog and the park and rec people refuse to recognize this. We have attempted to make our concerns known to NO avail. Instead, the city has over-accommodated bikers. Please leave nature preserves for walkers who do not damage the area or wildlife. No other municipality allows such destructive use on their nature trails. Many hikers have stopped walking in the Western Hills area because of the bikers, including myself and I live on Carlmont Drive! Most bikers also come from outside the community and don't care what they are doing to the trails and wildlife, or what they do to the general feeling of peaceful and sustainable open space, which has been impacted negatively by their presence. Open space in the Western Hills has thus become inhospitable to hikers. It is important to note that the bikers are almost exclusively male, between 20-40, which is a very small, select group that leaves everyone else out. Yet still Belmont parks & rec caters to bikers more than other users of these trails by making it easier for bikers to park, clean themselves and their bikes, and so forth. Bikers also often ride in packs, which is even worse on the trails than single riding, and their yells and general clamor destroys the peaceful ambience of natural spaces, not to mention making the trails dangerous for walkers. I watch big trucks with multiple bikes in them, as well as groups of bikers, go up and down Carlmont Drive all day long on their way to and from the Hidden Canyon area. Bikers run on and over large rock outcrops destroying them, they've made the meadow into a sand trap gutted with erosion and wheel tracks, they create an unfriendly environment for wildlife, which has caused wildlife to leave the area, and they create deep ruts in trails that make it hard for walkers to navigate. I've also seen bikers spraying pesticides on poison oak along the trails. I've watched as bikers do "pump track" exercises in the open meadow (in groups); I've even seen them bring into the meadow pump track ramps to use for this purpose. And yet walkers' concerns about these issues have been completely ignored by parks and rec over the past two years. Indeed, we have even had a serious problem with bikers at night in the hills at Hidden Canyon. Police have been called many times but nothing is done. The biking situation has become outrageous and even tragic for the natural environment. Many of us feel that our environment has been badly treated and our concerns about this are not only unheard by Belmont city government but actively thwarted. At Hidden Canyon the parking lot is widened for the big trucks the bikers drive in, a bike cleaning apparatus is erected, and an ugly outhouse is stationed at the trailhead for bikers who assemble there in large groups--groups composed of all men of a certain age. Early evening at Hidden Canyon often finds women hikers having to walk through a crowd of men stripping themselves of their sweaty clothes after biking as they gather in

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

pseudo parties around their trucks. Meanwhile, there has been no attempt at rejuvenation of Hidden Canyon's ruined areas. Whose open space is this?
- More trails would be nice
- Water Dog park is an excellent place for hikers and bicyclists. Trail etiquette signage would help both users be more considerate to the other.
- Please preserve, and ensure accessibility.
- Need to keep Waterdog park open to mountain bikers and invest in maintenance.
- Are there nature talks for all ages!
- They are hidden gems. Need better signage (there was none in San Juan). Good thing I printed out a map before I left home, but I still wasn't quite sure if I was going the right way.
- Waterdog and Hidden Canyon are one of the few local open space where locals can mountain bike. Mtn bikers and hikers can co-exist and I have always found the interaction friendly between the two. Please keep these open spaces open to biking.
- I love Belmont for its trees and open spaces - keep them!
- They should stay based in nature and not be expanded into big attractions with a lot going on all the time. Being so close to nature is incredible and should be treasured.
- More multi-sport paths for bikes
- They are great
- They provide a wonderful resource for my kids and I to mountain bike. Unfortunately there are few legal options for narrow trail riding in the Bay Area. It's nice to have these so close by and accessible to everyone. It would be a loss to the bay area if cyclists were excluded from even more of our open space.
- I like the suggestion of guided hikes/interpretive hikes. Need to do a better job in marketing the open spaces. So many people not even aware it's there.
- Access to excellent mountain bike trails is so essential for promoting personal and famil health and wellness, while also promoting community and environment-preservering transportation.
- Need more bike trails
- The mountain bike trails need more work
- The trail bikes are out of control(dangerous) At Water Dog Lake there are too many off leash dogs(sorry)
- Keep bike access to Waterdog
- more signage on trails, more permanent restrooms
- Please continue to allow biking access to Waterdog.
- please continue to allow mountain biking in water dog park. it is the only good place to ride this side of skyline rd.
- Should accommodate all users. Should increase trails to accommodate increased usage. It is a false choice that we can have recreation or nature but not both.
- Please do not remove mountain bike access to Waterdog. Absolutely the wrong decision and would severely limit close mountain bike access.
- Kicking mountain bikers out of Belmonts open spaces will merely encourage illegal trails, as well as alienating a large user class who frequently performs maintenance on said trails.
- Bike trails bring more business to the area.
- Waterdog is the only place I can ride my mountain bike without having to drive. It's one of my favorite things to do after work.
- Improve mountain biking trails and access.
- Please keep open for biking! It is an important part of our lives for so many of us.. Thank you!
- Please keep Waterdog bike accessible.
- I'd like for you to maintain or expand cycling access.
- Mountain biking is a wonderful, healthy, fun way to get outside and enjoy nature. Mountain bikes and bikers can coexist wonderfully with hikers etc. on mixed use trails.
- Waterdog open space preserve trails are fantastic. There are no other trails like them that are so easy to reach. I used them when I worked in San Mateo county - I was able to bike to them from work. I still visit them regularly from San Francisco. They are well built, interesting, and pack a great ride into a small distance. Signage could be improved - they are a little confusing at first.
- I love being able to make a quick escape and go for a quick mountain bike ride in Water Dog
- Water Dog is the rare open space where cyclists can actually ride their bikes to and from the trail head, it's a unique gem and should be open to all users to enjoy safely and responsibly.
- Keep trails open to mountain bikes! Mountain biking is not a crime!
- As a mountain biker Belmont's got one of the few mountain bike accessible outdoor spaces that doesn't require many hours of driving. It'd be a huge loss losing that.
- Please keep mountain bike access!
- Please keep the trails open for mountain biking at water dog
- Do not restrict mountain bikes!

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Add bike only directional trails
- Accessibility for bikes and mountain bikes
- I love biking through Belmont's open spaces.
- I enjoy occasional trips to Waterdog to go mountain bike riding. It is a fantastic area for riding. Maintaining and even expanding access for mountain biking is a good goal to have.
- Best part about the parks + open spaces is the range of people who can use them, and the varienty of things for which they get used
- Biking is an important community activity
- Bicycling at Waterdog is a great local resource for the surrounding communities. I believe with the proper park support and signage that bicycling at Waterdog can be safe and respectful to all user groups.
- Please maintain full bike access to Waterdog
- Please keep things bike friendly.
- Please do not remove mountain bike access to Waterdog! We can all share the trails and get along.
- Waterdog is a wonderful place, and I think with proper etiquette we can all share the trails. I would love the opportunity to give back to the place I enjoy by volunteering for trail work days.
- We frequently use the open spaces that are available for cycling that's separate from traffic and have had nothing but polite and respectful interactions with other hikers and wildlife. Would greatly appreciate keeping this space available for current and future generations of cyclists.
- These are unique biking trials in the Bay Area that make weekday rides accessible without having to travel all the way to state parks. It'd also be useful to have designated trail directions, or alternating biking/hiking only days.
- I love the open spaces especially the opportunity's for getting out and exercising via mountain bike riding! I would love to see more trails!
- Keep water dog open to mountain bikes
- I ride the trails here regularly from my home. It would be a huge loss to not have trails which can be accessed by bicycle.
- Please keep open spaces available for mountain bike use
- It is extremely important to me that Waterdog Park is not closed to mountain bikers. Waterdog is one of the only mountain biking locations on the northern peninsula, and if bikers are not allowed there it will no longer be possible for me to exercise before or after work. Riding at Waterdog is a cherished and treasured activity for me and I love having the ability to mountain bike close to my home.
- Keep access for mountain bikers!
- Limit use to sundown.
  Provide trails for mountain bikes riders
  Widen trails
- We need more active bicyclist, mountain biker trails. Mountain biking is quickly growing and the community needs more places to ride.
- We moved here for the open spaces for kids but are disappointed in the condition. Bikers make trails unsafe for kids, environment is damaged so the only lesson we teach the kids is how humans are thoughtlessly hurting the earth.
- Improved bike access (for ebikes and regular bikes) to and in the open spaces would be fantastic!
- Keep mtb trails in water dog
- Mountain biking is fantastic, not many towns have similar trails in close proximity.
- Bike access on trails is an amazing resource, restricting this would be a serious loss for the peninsula. Waterdog is the reason I visit Belmont.
- Do not close waterdog trails to biking! Designate them as mixed use.
- Please do not remove access for bikes. It is a great way for people to exercise while spending time with friends and family. Many of us use timber bells which switch on and off to let people know of their presence on the trail. This isn't to get the right away, but to make everyone feel safe. Knowing someone is coming your direction far ahead of time helps everyone have a safe experience out there. I wouldn't even want e-bikes banned since i see many people in their 50s and 60s on them having a blast. They are not blowing past people being unsafe. e-bikes allows them to make the climbs they can't otherwise. This also allows them to spend time with grand kids and younger family members while bonding in a hobby/sport they enjoy
- Keep access open for all activities. I may not bike but I want bikes to be able to use open spaces.
- Belmont's Waterdog Lake park is a gem for the Peninsula. Keep trail access open to all users, including bikes.
- Expanding multi-use access would encourage more people to get out into nature, thereby fostering better health, a better sense of community and more appreciation for nature within Belmont.
- Please keep Waterdog open to mountain biking and preserver the single track trails.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Mountain Biking in Water Dog and Laurelwood is something I cannot live without.
- I've always felt that different trail users (hike, runner, cyclist) get along very well in Waterdog. I don't always have the same experience in other locations. I think users really value what Waterdog Open Space provides.
- Being able to take kids to ride mountain bikes at Waterdog has been super rewarding for both myself and seeing the kids grow. I'd be very sad to see this option removed and one avenue for teens to get out disappear.
- The Open Spaces are a wonderful treasure. They provide excellent opportunity to get close to nature right in an urban backyard. In the many years I've been visiting the Belmont Open Spaces I've encountered nothing but pleasure and fulfillment, both in terms of my ability to enjoy the space and my interactions with other users. Other than keeping up with maintenance (and adding a trail here and there) I wouldn't change anything. Even the "unofficial" trails are excellent and I wouldn't remove them. When making decisions please keep in mind these are city Open Space, not a Wilderness Preserves.
- I love Waterdog, but I no longer walk or run there because I'm startled by too many mountain bikers. If there some trails that were exclusively for hikers, that might be helpful.
- See note in "other" for number 8.
- More trails would be great. And more trail signs/ maps around hidden canyon and water dog lake.
- Love Waterdog for mtb
- There are many open spaces in the Peninsula where bikes are not allowed. Waterdog and San Juan Canyon offer some of the best single track biking in the Bay Area and I hope The city of Belmont will keep them as multi-use. Thanks.
- Please plant or preserve trees and bushes. They cut noise. Provide shade and cool temperatures in the summer. Cut winds all year long. Definitely add more benches too!
- I love running to San Juan Canyon and Waterdog.
- Open space for bikers and dogs is very valuable for me and my family
- Our family mountain bikes in Waterdog every week and it is one of our favorite things to do on our neighborhood. Please keep open spaces open to mountain biking!!
- I really love mountain biking and hiking at Waterdog park, and think it's a great place for both, and it shouldn't get closed to biking. I'm also excited for the possibility of a pump track!! It would be a good opportunity for younger kids to develop their skills, and fun for older kids and adults.
- It is important to my family that open space trails remain multi-use. We have hikers, bikers and joggers in our household.
- Keep it available for mountain biking. Put up signs warning new users that some trails are moderately diificuly
- The City has done an excellent job keeping mountain biking open in city open space. Keep up the good work.
- Animal waste is an on-going issue
- I've used Water Dog Park to mountain bike before and after work for years. It is an escape for me and I have only ever had positive experiences with other trail users. I have been told that a small minority of trail users are trying to use this process to eliminate bicycle use on the singletrack at Water Dog. I love these trails. Please do not take these experiences away from people like me in order to serve a vocal minority. Different user groups can and do share trails in peace, as they have for the last 20+ years at Water Dog.
- I LOVE Water Dog lake - this is a gem of a park. I heard that some people want to prevent mountain biking and would be sad if that was restricted. While our family doesn't mountain bike there, we hike there a lot and truly don't mind sharing the trails. Our neighbors mountain bike here frequently & would hate to see them restricted from it. Our experience has been that most trail users are respectful & courteous.
- I would prefer open spaces to have restrooms.
- I've lived in Belmont for 50+ years. I've been going to Waterdog since before the city even paid any attention to the area. Do not take away the ability to ride mountain bikes at Waterdog! It's wonderful exercise and I have been riding there for years. The amount of hikers there will decrease as the pandemic goes away. Bikers and hikers can get along.
- Volunteer opportunities for maintenance and improvement.
- Please
  Keep the cross country trail open, maintained, and no dog/bike(s).
- Keeping them open and accessible to mountain biking is a great activity for the family.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Please close illegal trails, ban bikes from narrow single trails, invest in native plant, education and species protections,
- Enjoy the cycling on the fire road and trails in Waterdog. Seems to be a lot of families enjoying the activity and looking forward to taking my girls with me when they are a little older.
- Didn't even know there was so much open space. Would be great to get a trail map via email or in mail
- They are treasures that should be available to many user groups. Exclusion of classes should not be a priority. Belmont residents are lucky to have these areas.
- Doing a great job
- We love waterdog and have recently discovered hidden canyon after 10 years in Belmont.
- They are beautiful and we are lucky to have them for both biking and hiking.
- Water Dog is great resource that brings me to Belmont to mountain bike and patronize local businesses. Please do not limit mountain bike access to Water Dog.
- Regulate Waterdog trails for no ebikes!
- More police patrol
- Bikes in open space must be restricted to certain trails or times
- It would be nice to put more trail maps and signage on the trails for navigation
- I would like them to be fortified against wildfire through innovative approaches like controlled burns.
- Love them, continue to encourage bikers & hikers to co-exist together.
- More areas for leashed dogs
- Please maintain the level of offroad cycling options within the Belmont open spaces like Waterdog. This is one of the great things about Belmont that other cities don't have.
- I'm worried that the activities that are important to me (e.g. mountain biking) will no longer be allowed because of a very small yet very vocal group of people.
- I love the open spaces and always think we should have more.
- I don't think the trails should be designated for use as either walking or scootering (children) or mountain biking.
- Do not add restrictions.
- cleanliness is an issue
- Waterdog Open Space is a tremendous resource and widely used. Please allocate sufficient resources to better maintain it, please enforce dog poop rules, and please continue to allow mountain biking.
- Please keep open space
- I LOVE the open spaces in Belmont!
- Pretty good the way they are. Spend the money elsewhere where it may be needed more.
- Water Dog Lake is awesome! Please restore and update the trail signage, especially the mountain lion safety signs and the trail name signs. Also, please add signage to unlabeled secondary trails. Thanks!
- General guidelines
- Love them; wish bikes were more controlled
- Belmont has a great open space area's that should be shared by all. There should be a little give and take.
- It needs to be protected and left alone. There is little sacred living space left for the animals.
- Hallmark Trail/Cross Country: can not be lost, closed or sold for housing. Stunning area for our community to enjoy.
- Maintain bike access. It's nice to have a place to ride offroad without cars
- Our Open Spaces are the jewels in Belmonts Crown. Expanding/maintaining and improving them would be a benefit to the community.
- Same as #15
- Please keep Water Dog as perfect as it is. Please do not add a skateboarding ramps or anything else that will ruin it. It is perfect as is. Please keep the CSM space above Belmont Heights just the way it is.
- Waterdog Lake is an amazing open space used extensively by a wide mix of people. Mountain biking is one of the important activities that the open space hosts. While there have been complaints by a few specific people about biking, the vast majority people easily share the trails, follow trail etiquette and are polite, friendly and respectful of people enjoying mixed use trails. Please do not let a few unhappy people take away an unique and wonderful recreational resource. More etiquette signage and even some activity specific trail restrictions could alleviate conflict. Thank you Belmont!
- multi use paths very hard for pedestrians - I feel like I'm always about to get run over. Also masking restrictions are not consistent and people dont' follow them.
- I am very concerned that a small group of outspoken protagonists are trying to eliminate mountain biking from water dog area.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Great to have nice nature close by.
- Open Space needs to be available for all users.
- Desperately need more trails, dedicated use to prevent conflict between bikes and hikers.
- Mountain bike access is critical and needs to be expanded
- I love Waterdog and Sugarloaf/San Juan Canyon. It can be challenging, because all of the trails have intermittently become impacted over the last few years, but I strongly believe that restricting/ limiting trail use is the wrong approach.
- More bike specific trails.
- I mountain bike in water dog with my wife, children and friends 3 times per week. It's great!
- Mostly just parking. But that's a tough one to fix.
- Our (I live in Belmont) Open space is a gem for me personally. I can walk my dog there, I can ride my bike there, I can invite my friends there for a group hike. Lots of way for me to utilize.
- We LOVE Waterdog. Please don't take away the joy of riding the trails. My kids ride daily. This has benefited them tremendously during the pandemic.
- I love taking my children bike riding at water dog park it is great exercise and so much safer than riding on asphalt or dealing with autos
- Please keep open for biking
- It's the reason why I moved my family to be near Sugarloaf.
- Waterdog is a fantastic mtn. biking spot! Please help keep it open to bikes, if we need more rules, so be it! I would strongly urge you to ban ebikes.
- They are great the way they are. They are a unique treasure on the peninsula.
- Please preserve trail access at Waterdog for biking.
- Please keep Water Dog trails open for bicycling.
- The water dog park is unique in its quality of mountain biking trails. Expanding the network would be great.
- In general, I think the open spaces are great. Easy to visit, limited crowds, nature-focused. I don't want to lose the "get away" aspect of them.
- One of the best things about belmont is biking at water dog. It's one of the few activities I can still do that doesn't aggravate my knees.
- love trail running, hiking with kids and biking!
- I appreciate Water Dog being one of the FEW mountain biking areas in the Bay Area that allow dogs. My pup loves it!
- LOVE Waterdog park, wouldlove it if had WIFI Coverage or at least cell service in the park, for emergency usage, and to listen to music/ podcasts while walking. Also please weed the poison oak more please. More love to the Cross Country trail behind the HallMark park would be awesome too - it's neglected .
- Please keep mountain bike access open!
- Mountain biking has been a part of the open space for this long without issue, is unjust the opinion of a select few threaten to close the only reason why I would visit Belmont.
- Waterdog Park is a wonderful resource and a great example of a successful and sustainable multi-use trail system. Perfect spot to introduce young people to mountain biking and a love of the outdoors!
- Uses should remain open to all. Stop trying to add restrictions or designations.
- it's great for mountain biking for all age groups
- Need more mountain bike trails
- Open space and trail access for multiple user groups (running, biking, hiking, walking, etc) is paramount. Adding directional or biking only trails could greatly improve the ability of the open space areas to accommodate a diverse and growing user group and minimize trail conflicts. Enhancing the frequency of trail work days and working to improve and restore habitat along trails allows multiple benefits for the community and ecosystem.
- I love that I can go to a spot that is close by to enjoy nature and to exercise outdoors. Trail Running, Hiking, and Biking.
- This is a vital resource for the rapidly growing local community of cyclists. More and more people are picking up biking, and this is great for public health and community resilience. The open spaces are great for this! Please don't enact changes that take this away or decrease the benefit of the open spaces for cyclists.
- More open space for bikes
- I appreciate having an option to mountain bike within the 280 corridor.
- appreciate the multi use and natural feel
- Please don't let a vocal minority of trail users drive policy for all residents.
- Waterdog has a great trail network that is easy to access and convenient for most. Let's keep the trails open for all!
- Like to see continued access for Mountain biking in waterdog park.
- Appreciate the trail connections from sheep camp trail; I ride from Canada entrance

Question 16. Other Responses (con't)

ONLINE SURVEY QUESTIONS

- We enjoy mountain biking there and want to keep it open for all users
- Please keep mountain biking at all available parks, including Waterdog
- I am so grateful that the city of Belmont has been working closely with the Waterdog Trailkeepers to keep Waterdog safe for all participants alike, environmentally focused, and welcoming.
- Waterdog has a great and storied mountain biking history. It is a valuable resource to the community. Please preserve this resource and outlet for teens and community members.
- Please keep open to cycling.
- WaterDog park is an absolute treasure. I appreciate that it is a mountain biking mecca. If i felt safer hiking those trails on foot I would do it more often, but dealing with bikes can be stressful. Is there any tracking of accident locations and causes? Perhaps some specific danger spots could be addressed. Some parts of the trail could be widened to allow for peaceful coexistence.
- There is not enough open space in teh bay area. With it's limited quantity it needs to be made accessible for all users in a way that reduces trail conflict.
- How did we completely miss the mark on trail use signage?
- Waterdog park is the perfect place for kids to ride mountain bikes. My children often demand to go to Waterdog to ride bikes as it is safe, fun, and well scaled to riders, walkers, and hikers of all skill levels. I strongly endorse multiuser access for all human powered activities, biking and hiking both.
- Keep Waterdog open to mountain bikes like it is today
- I love the Belmont Open Spaces. The trails are wide and excellent. And I've enjoyed the lower density the times I've visited. I travel from San Carlos to visit Belmont's open spaces as they are far superior than those in San Carlos.
- I have been using Water Dog/Hidden Valley for years to trail run, walk and exercise my dog - it is the closest open space to my house. Bikes have never been a problem in the past, however, since Covid, this has been a serious issue. The number of mtn bikers has increased 10x and many do not follow the park rules. I have been nearly taken out multiple times as they exceed safe speeds on steep and narrow trails. They are also the least likely to follow social distancing or wear a mask.
- I've been riding my mtn bike at Waterdog for 30 years and it's a great local area for the community. Love the trail systems and they could be expanded.
- I primarily visit Waterdog to ride my bike and always really enjoy it. It's unique to most open space on the peninsula because of the way its surrounded by development on the ridgelines. Being so accessible to so many people makes it a real treasure. The challenge seems to be how encourage all people who want to experience the park to share it with one another.
- We love Waterdog and it's bike/hiking trails
- Mountain biking and bird watching in waterdog lake park is amazing. I love this little oasis.
- Waterdog Open Space is a fantastic multi-use recreation area that supports a broad group of enthusiasts. In particular, the opportunity to get kids on bikes and off the roads (which have gotten more and more dangerous over time) is essential. There simply are not enough areas they can ride, particularly for those who aren't old enough to drive. Riding bikes at Waterdog is a very important part of my family's exercise and bonding routine and has been for well over a decade.
- I love the multi-use trails at Waterdog. Please maintain access for biking.
- the trails are doing well thanks to volunteer efforts from mountain biking groups and it it vital that multi-use access be preserved to keep this going
- I support keeping the trails open to hikers, bikers, dog walkers - basically everyone. The trails have been multi-use for decades, and the system is working well.
- I use Waterdog for Mountain Biking several times a week. I'd like the city to help maintain the trails but overall I think the conflicts are minimal and can be managed to allow all users to enjoy the park.
- Belmont's parks, water dog lake specifically is what got me into mountain biking 6 years ago. The skills I learned over years of hard work turned me into the cyclist I am today. This year, I traveled to Germany to race cross country mountain bike. I was the only American, racing against people from all over Europe, including the world champion and multiple national champions from all over Europe. I wouldn't be the cyclist I am today if it wasn't for waterdog.
- They are underdeveloped. Opportunity to optimize the resource for all to enjoy.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Love the mountain biking at Waterdog. Have been helping trail maintenance, and hope the trail stay open for mountain biking. Would be acceptable with me to prohibit bikes with motors if that helps with avoiding issues. I will get an electric bike someday, but think they and non-ebikes are not the same.
- keep them well maintained and open to everyone.
- Love the new trail marking signs!
- Please protect. Very disappointed and disturbing to see what bike riders and electric bikes, night riders and what some have done to the trails.I see groups of the bicycle community coming out of the trails with shovels and saws who are making their own trails and tearing out plants and trees to carve out new trails destroying the walking trails and open space.
- Love them!
- Pls widen trails and remove poison oak. I'd use the trails a lot more with my dog if not so much poison oak right at the edge of narrow trails.
- Please reduce the yellow jacket population with environmentally safe traps, in the early spring
- I've lived in Belmont for 35 years and very much enjoy the Multi use open space that Belmont has. My entire family enjoys biking and hiking in these open spaces. My hope is they remain multi use.
- Would like to know of any development proposals in these areas, especially San Juan Canyon where there are still numerous privately owned lots.
- The open space in Belmont is amazing and our family is there all the time. continuing the multi-use nature of these trails is the highest priority for us, as we hike there, walk the dog there, and ride our bikes there. We moved to Belmont because of the multi-use trails. We can all get along and the entire community should benefit from this great asset.
- Is there a chance of keeping cyclists off the Lake Loop Trail?
- Both bikes and walkers should be able to use the open space
- I love to bike, hike, dog walk and run at Waterdog, Hidden Canyon and San Juan open spaces. Let's keep those trails open to all users that use them respectively and follow the rules, which is the vast majority of the users. One or two new, well built and designed trails in WDLP for mixed use would really be nice!
- Please keep them open for leashed dogs
- Belmont really lacks bigger open spaces compared to neighboring cities.
- They are great, but we need to stay on it and keep ahead of the curve by constantly improving and adding features.
- I think generally they are working very well.
- Trail use is perfect as is, a vocal minority is the source of complaints. We do not need more rules and regulation.
- Waterdog Park has been an excellent example of a multi-use park, that accommodates bikers, hikers, dog walkers, etc. for years. The local mountain bike community has been a huge advocate and steward of Waterdog and has helped develop the trail system there. As past residents of Belmont, now San Carlos, Waterdog has always been our "backyard" mountain bike ride and should continue to be for years to come.
- There is a limited number of parks that allow mountain biking. Building on this activity in Water Dog could increase the city appeal to many visitors.
- Love the bike trails in water dog! It's nice that they are accessible without having to drive 20+ minutes up to skyline. Also great that you can ride from house to trail. Having more options like this and more trails would be amazing for the community and kids. As parent's not having to worry about them riding on busy streets would be great!
- Specifically, there are people who want to limit the ability to ride mt. bikes at Waterdog. The misinformation surrounding "mt. biking destroys natural habitat" is disturbing. Waterdog is a mt. bikers gem in the middle of the massive suburban expanse that is Silicon Valley. If restricted in any way, Waterdog should be made a mt. biker-only park as there are PLENTY of other places nearby where bikes are not allowed at all. Best option is to keep is shared use and not to impose other restrictions on bikers there.
- I want you to consider that we are doing a 15 year forward-looking exercise here during a pandemic where our Open Spaces are seeing (I suspect) all time high usage areas. I don't want high traffic to turn into reduced access in response to high trail traffic.
- The open space area's should be for all to enjoy not just a specific group.
- Twin Pines is great
- Please continue mixed use for all Open Spaces. We hike with our dog and also mountain bike, and would love to be able to continue to do both.
- Add Cross Country Trail into Belmont's care

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Limit bicycle use on the trails or widen them. The current trails are too narrow for bicycles and make it dangerous for walkers and runners.
- Please do not eliminate mountain biking use at waterdog
- Increased use is a blessing, not a curse. Dialing up trail etiquette signage and advocacy will do a lot for perceive conflicts
- They were a significant factor in our decision to move to Belmont. I would not like them limited.
- Keep open and maintain
- Water dog is a treasure for mountain biking and it's history should be celebrated. Expansion of this city asset is highly encouraged.
- Trail signs
- The sharing of narrow trails with bikes and hikers is totally unsafe. If is hasn't already happened, someone will be killed or seriously injured because the trails are too narrow to accommodate bikes and hikers. On the wide main trails, bikes are often going 20 to 30 mph downhill. Whether on narrow or wide trials going too fast is common and dangerous. thank you for sponsoring this survey
- Belmont Open spaces should be available to all mountain bikers and hikers. It is a way for many families to get out and exercise, as well as keep student's out of trouble.
- I want to make sure EVERYONE has the ability to use the parks. I know there is a group of retired people who are actively trying to ban bikers from the open spaces. That is exactly what we should not be doing. Encourage safe considerate joint usage.
- Please give more recognition to all the volunteer groups that maintain Waterdog and let the public know how these volunteer groups use the park.
- I bike and hike in Waterdog, being able to go there by bike rather than having to drive is a real Godsend. It has been especially important during lockdown. Thanks for your work on these open spaces.
- I think we should designate Waterdog and Hidden Canyon as cycling-focused open space. We already have so many hiking-only spaces (Big Canyon, Cross Country Course, Edgewood, Huddard, the list goes on) yet cyclists have no designated open spaces for cycling. This is not fair. If the hikers don't want to share with cyclists - fine - then let's designate some trails for cyclists only. This would include most the single track at WD. Hikers can keep to Lake Road and Lake Loop.
- Waterdog is great for mountain biking. many of the trails have been improved the last few years by volunteers from MTB community. Waterdog is not a "natural" environment as some like to think. It needs management to help resolve issues of erosion and fire danger due to unnatural thick brush. Waterdog is one of the only close biking areas on the peninsula. Hundreds of bikers per week access it by riding to it locally. Many teens use this area for biking, who would not be interested in just hiking there. Don't give in to the selfish neighbors who want Waterdog all to themselves without bikes. The biking community has a lot of potential to make Waterdog better for all. The new trail signs are a great start. I use a bike bell and other users really thank me for it. I would suggest setting up some " borrow a bell" stations at entrances for MTBers. This could be a good Eagle Scout project or other youth driven project. Much of the erosion prone areas have been like that for 30 plus years. Not caused recently by bikes. Waterdog could be the crown jewel of Belmont if it's us embraced as the awesome biking resource it is.
- Limit bikes to be used only on large fire road trails.
- Belmont open spaces and parks are one of the main reasons this area is so great! I love the volunteer opportunities to maintain the trails (walking & bike trails)
- I mostly walk & hike, but Belmont needs to adapt its parks and open space to offer more unique activities, and less of the common ones we can do anywhere.
- Waterdog has been a blessing as my son and I have gotten into mountain biking and found it to be an amazing community in a time needed especially for my son.
- I wish you could remedy the damage done by bikes to hiking trails (ruts, etc.)
- Keep Waterdog open to mountainbiking. And keep the trails as they are with challenges to tide on.
- Being able to mountain bike at Waterdog is amazingly special and unique. A true gem
- It's scary to hike on trails because of danger of getting hit by speeding bikes, trails are really rutted and trashed from so many bikes

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Having safe, legal places to let my dog run off-leash are very important to me. One of the things my dog and I miss most is having mountain bike trails we can enjoy together; we used to live in Bend, OR where dogs are allowed on most all trails. Barrett Community Center and Cipriani park are great, but expanding off leash access at Waterdog/Hidden Canyon would be awesome, and a perfect place to have off leash areas.
- Dangerous to hike on trails because of speeding bikers, there are to many trails for small amount of area, wildlife is being decimated by biking
- Mountain biking is an essential use of Water Dog park and should continue to be allowed without restriction.
- Convenient and generally well maintained. Only issue is the conflict between mountain bikers and hikers/walkers on narrow trails. Very difficult to pass or be passed when the poison oak is in full bloom (so to speak), as you can't really step off the trail. Plus, mountain bikers often seem to feel they have the right of way, which I don't believe they do.
- I love to mountain bike at water dog! So thankful this is in my back yard.
- Love cycling! Love to walk dog
- The parks are crowded since COVID. We need more trails and cycling-specific trails, to spread out the people better.
- The parks & open space is for all, not the few, particularly those that make websites to promote hate or sabotage the trails with derbies in the name of their view. It is irresponsible not to plan for increased usage stemming from the increased housing developments over the last many years. Pls More Trees & More Trails.
- So grateful for Waterdog!
- People running dogs off leash, like at Water Dog, make me less likely to visit
- Should remain multi use areas for all to enjoy (bikers, hikers, dog walkers-if they can follow the rules, etc). Should prioritize & enforce existing policies rather than create more (dogs on leash, no electric vehicles, pick up after your dog). Should add new trails or at least leave in place existing trails rather than block them as has recently taken place. Forcing the same, or more trail users (as has been the case during Covid) onto fewer trails does not improve safety.
- There is a clear miscommunication between cyclists and hikers using the open spaces, and a method needs to be used to please both parties; something that preserves bikers' access to all single track but also satisfies hikers' complaints of trail erosion and damage.
- The most important thing you can do for the future is to provide, maintain and increase your trails and open space areas. They will be used (walking, jogging, biking) by more of the population over time.
- Continue to improve the trails against water erosion, they get better every year. Additional trails 1-2 designated for bikes only would be great.
- Erosion prevention and control needs to be better addressed
- The parking and pedestrian situation needs to be improved at the Hallmark Drive water dog trail head. Very dangerous to both Hallmark area residents and visitors.
- We love mountain biking at Waterdog, bought our first home because of the location. Thank you for maintaining the trails, please don't widen them or make them easier for riders. I hope E-bikes can be banned.
- I would like to see trails remain multi-use and signage / education on trail etiquette. I would also love to see more multi-use trails and more organized trail maintenance activities. My family and I get a lot of pleasure, fitness and stress relief from hiking and biking in Belmont Open Spaces. I know there is a lot of controversy about biking vs. hiking. It would be very sad to see biking eliminated from the Open Spaces. Recent issues are due to increased crowds and education. Thanks very much!
- Keep them open to mountain bikes. Consider directional trails.
- Continue to create, enhance and focus on multi-use trails
- I love riding my bike on challenging trails.
- Keep them open and available for all to use
- Why renavatiuons are being made to trails that benefit hikers more than bikers
- My family loves Belmont Parks and the winding city streets, but they are not safe places for my children to ride bicycles, so we travel to other cities for them. They have ridden pump tracks before, and would absolutely love to have one closer than Santa Cruz.
- Thanks for setting up the survey for us to provide feedback! :) Here's my opinion as someone who lives in Hillsdale but come to Waterdog weekly for hiking and mountain biking:

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

1. Trail use is likely going to increase year over year. It's more realistic to think about how to accommodate growing number of visitors. Making trails more restrictive is only counterproductive.
2. Some trails are too rutty because of rainfall, corrosion, and footprints/wheelprints. There are existing solutions applied at other open spaces to alleviate corrosion. Example: upper Elevator trail in Hidden Canyon could use some maintenance.
3. Some trails are too narrow or "blind" for hikers and bikes.
4. Trail signage and trail etiquette are very necessary to educate and guide all users of the open spaces. As a hiker and mountain biker I can see why it's annoying if someone "speeds" on the trails. It's like drivers who speed too. Simple gestures like slowing down when passing and trail bell can make passing more friendly.

- Please persevere these spaces and make sure we protect our environment.
- Would love more trails and signs in the rugged areas.
- We need to keep the Water Dog Lake park open as it provides multi use space (biking, hiking. jogging, running, dog walking, relaxation, etc)
- A bike pump track would be a great addition. Living in Cipriani there is no safe place for kids to ride a bicycle nearby. Waterdog should remain a multi use park. This is a great resource for all users. More trails would be good and I am sure that mountain biking community would be willing to volunteer for trail building
- San Juan canyon open space presents a great opportunity to polish a local gem and get the most out of the space.
- Would be nice to develop a hiking/biking trail on the Cranfield easement, in conjunction with San Carlos.
- I know mountain biking has become a bit of a controversial topic. I understand it has some downsides such as trail wear, and safety concerns for hikers. If there is consideration about banning mountain biking, I would love if some middle ground could be found, perhaps removing biking from some trails, while labeling others as bike only, or hike with the knowledge that bikers may come. I think information about trail etiquette as well as volunteer events to help maintain the trails could really help educated mountain bikers on both respect for the trails and respect for other users. I know somethings may seem obvious, but if we don't take the time to educate users, we can't expect them to know everything. Educating others is part of being a good steward of the activity you participate in.
- Having recently moved from out of state, one of the reasons where my partner and I chose our home was it's proximity to Waterdog Open Space. We both love hiking, running and cycling in Waterdog. It is such a great space and a jewel that most cities wish they had. That being said, there is a lot of discussion about banning bike from the park. We think there is room for everyone to co-exist within the park. As someone who runs almost as much as rides in Waterdog, I feel there needs to be more awareness and education about trail etiquette from all users of the space. I really don't think banning one group will solve anything and could potentially cause more issues of illegal trail building & poaching. That would be the worst thing for Waterdog as it would create more erosion and damage to the amazing open space. Please don't let a small group of people dictate and close this wonderful space off to cyclists.
- The trail keepers and volunteers are doing a great job at Waterdog! Thanks.
- Please do not take biking away from Waterdog based on the opinion of a few.
- I consider an Open Space to be similar to a National Wilderness area, that is, no motorized vehicles (including electric bikes), very limited amenities, focused on preservation of the natural environment. This is different from a National Park.
- If the balance of Waterdog trails for bikes and hikers needs to be further addressed, it's likely due to the large increase in traffic of both since 2020. I highly recommend doing a free or "encouraged donation" reservation process, and occasionally do an enforcement. The Tamarancho trail park in Marin County does something similar and it's worked well.
- the open spaces are wonderful.. and so improved since i moved here 30 years ago. i really appreciate the mountain bike community for their upkeep of the trails.. i remember when it was challenging to hike.. i got lost a few times because the trails weren't well marked. i also feel safer walking around on the ""single track"" since there are more people around with the bikers...

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- The trails around Waterdog Lake are an incredible resource for Belmont and the neighboring cities. When my wife and I were looking to move to the area 11 years ago, access to this open space and trail network for riding mountain bikes was high on the priority list. As our family grew to include 2 young boys, we enjoy using this park as a family on and off the bike. What would make Belmont even better is if they had an all ages / abilities bike park like the new Ramsay Park pump track that just opened up in Watsonville. Thank you for your time and consideration!
- They're great. Been mountain biking here since 1998 and in some ways has saved my life.
- Water Dog is by far the most accessible place on the Peninsula for singletrack mountain biking. It is used by high school teams and adult riders for exercise, exposure to nature, and for enjoying an activity that promotes health and getting outside! The complaints about biking at WD by a vocal minority can easily be addressed through signage, education, and smart trail design and maintenance- even something as simple as designating trail directionality, or promoting the use of bells on bikes. These have been implemented successfully in communities across the country!
- The 15 year Master Plan seems like a great time for prioritizing habitat preservation, trail quality and safety for the enjoyment of visitors. To do so will take more active management and money than in the past.
- The regions open spaces and parks are a terrific resource. I use them daily to hike. Waterdog is one of my favorites; I've been going several times a week for almost 20 years. I love that it's quiet and in a "natural" state. And I love how polite and helpful the bikers are.
- I have been biking here for my whole life and I know that there is a big movement to ban bikes from trails. Bikers have been the people that mostly maintain the trails and keep them in good condition. Please don't ban bikes here.
- Is there too much use of the waterdog bike trails? I'm honestly not sure if mountain bikes are pushing out vegetation in the area. The other is the drainage along the side of the fire road in waterdog seems to be getting deeper every year. Is that expected?
- Important to alot. Creates a community
- Please don't cave to the vocal anti-bike minority. the trails are for everyone and the space is plenty big to accommodate all. And why prevent night riding??? just let people ride, the more they ride at night the less they will ride during the day when hikers/walkers abound.
- The hiking trails and all of waterdog lake area are one of belmont's most unique and welcoming features.
- Really appreciate an open space for biking that is close to where I live and doesn't require driving,
- I feel that the nature, wildlife and humans have been threatened by bikers and made the open space very unsafe. They race by with disregard to wildlife and humans. They have carved out many trails and made some existing ones unsafe by wearing them down and making them slippery. I no longer feel safe bringing my grandkids on the trails as I did with my own children. I have almost been hit several times by bikers in the last twelve months,
- I like biking in them
- Bikers have caused the trails in Water Dog to be unsafe. The use of bikes has threatened wildlife. Bikes should be banned from the Open Space. The trails are no longer a place where a individual can take a peaceful walk or hike. Many people including the elderly and parents with small children now avoid the Open Space as it has been over run by disrespecting bikers.
- None
- I love biking on water dog's trails with my brother
- We love them. We use them 3-4 times per week.
- Absolutely love biking, running and hiking with my dog. And I would love to help with trail maintenance. I
- Waterdog is excellent for mountain biking (and hiking). Please keep it multi use.
- Parking and traffic at Waterdog Lake entrances on weekends is out of control during peak times. Interferes with nearby residents.
- At Water dog and surrounding trails there has been a plethora of new E-bike riders and the trails are not safe enough to allow them to use. My main concerns are with their speed and etiquette. they do not slow down for other trail users and often cause more damage to the trail systems due to most E-bikes ranging from 50-80lbs where most normal mountain bikes max out at 30lbs.
- I would love to see the city plant more trees!
- I love Belmont Open Spaces!
- The open spaces are regional assets that deserve care appropriate for their incredible value.

ONLINE SURVEY QUESTIONS

Question 16. Other Responses (con't)

- Mtn bikes should only be allowed on wider trails, not narrow hiking trails due to hiker and biker safety. Illegal trails such as "Labor of Love" trails built by thrill seeking bikers should be closed because they are too narrow for hikers and bikers to share safely.
- By encouraging folks outside of Belmont to hike our trails we have severely increased the number of people who are accessing the trails and it has caused an issue in our neighborhood with parking, trash, safety and people abusing the trails. Please put up signs that the trails are closed from sunset to sunrise. There's also crime and drugs at the bottom of sheep camp trail. Which starts starts in Belmont. Please monitor Waterdog, CSM cross country trail and Sheep Camp more. Putting up dog stations, trash cans and new signage and leaving up the old signage and not taking it down is making the neighborhood look junky and less desirable. There should be more signage that goes out to the open space in the Belmont Heights area that warns of rattlesnakes and mountain lions. During Covid so many kids just running off trails and into the bushes and someone's going to get her at some point.
- Please keep the Open Spaces as multi-purpose recreational areas that are currently being used as.
- Please do not limit, ban or restrict the use of bikes in Waterdog Park. One of the reasons we moved to Belmont was to be close to Waterdog for mountain biking.
- We appreciate both hiking and biking in the open space areas. We have been able to safely do both for the last three decades, and are strongly against those who wish to limit access to others.
- It's wonderful for mt bikes it one of our only places to enjoy close by
- Keep Waterdog open to bikes and support the needs of mountain bike riders in Waterdog. Create more bike specific trails and pump track.
- I'd love to see the steep trails on the belmont side of laurelwood worked on a bit to be easier to go up and down. Also I'd walk to it if we didn't have the bizarre custom of blocking sidewalks by parking on them. It sucks.
- It seems that the past year has been very hard on the trail systems at the open spaces. Lots of wear and tear from increased use, both hiker and cyclist, and lack of trail maintenance shows. The trails need a major refresh to remain safe for all users.
- The Belmont parks are a huge part of my children's lives and I would like to see the open space, trails, and bike access to see continued investment.
- Belmont's Open Spaces are a jewel, and Waterdog and it's multi-use nature (biking, hiking, etc...) was one of the main reasons I decided to settle in the area. I would really like to see Waterdog's multi-use nature maintained.
- Designated use trails and more trails to ensure that there are enough for everyone would go a long way to allowing me to use the trails I used to love so much before the pandemic made them unsafe due to increased use.
- Really appreciate the work done recently at Waterdog/Hidden Canyon; have been mountain biking here for 13 years and appreciate the city's recent improvements
- There are Belmont residents who harass bikers and spread misinformation about the effects of biking on the environment and are working to ban bikes from water dog lake.
- I would recommend we designate Waterdog as a cycling-focused park and keep the trails narrow and somewhat primitive. Hikers can recreate at one of the many no-bikes regional parks (Edgewood, Cross Country Course, Big Canyon, etc). Cyclists have limited open space choices and and inadequate recreational resources for their needs
- Arbitrarily limiting access to Waterdog to a specific group based on fear and prejudice is really lame. I am deeply disappointed with these residents who, instead of offering a real solution to the problems we face, want to take the ball and go home. There is much more that we could do to improve relations between all users, including posting reminders to yield to other users (bikes yield to runners/hikers) and reminders to hike on the right. I've been riding/running/hiking in Waterdog since 1991 and have never seen more angry and entitled Karens walking around the space as I have seen lately. They don't wear masks, are standing in the middle of the trail, and scream at cyclists to "slow down" regardless of our pace. They are looking for a confrontation to justify their anger and entitlement and shouldn't be accommodated.
- Love 'em

ONLINE SURVEY QUESTIONS

QUESTION 17. WHAT ELSE WOULD YOU LIKE US TO KNOW ABOUT BELMONT'S OUTDOOR RECREATION PROGRAMS (THIS INCLUDES YOUTH SPORTS, OUTDOOR EXERCISE, ETC)?

- Lacking compared to neighboring towns of San Carlos and San Mateo
- N/a
- no opinion
- While I glance at the park and rec activity guide (now that my sons are adults), I am not aware of outdoor programs for adults.
- You have programs for seniors and youths, but nothing for working professionals. The hours the programs offer are in the working hours, and there is nothing of interest to the working professionals. I understand it could be difficult to find qualified instructors or facilitators for the programs, but I haven't seen any public call of recruitments either.
- Great for recreational sports fields!
- Keep doing what you are doing. I love the updates you made to the Softball / Soccer Fields at the Sports Complex.
- Please add more pickleball courts with lights that are open all day and in the evening
- You need to create SAFE bicycle lanes in Belmont that are not shared with a traffic lane (as in downtown Belmont). You need a protected bike lane west of Cipriani on Ralston where cars are going 40+ mph and there is no shoulder. Ralston Middle School kids would be able to safely ride to school, and the general public would not be taking our lives in our hands any time we wanted to go for a recreational ride. San Carlos, Foster City, and San Mateo have managed to increase their bicycle safety routes; why not Belmont!?
- Yeah, Sports complex is great now - more turf would be good!
- Oitdoor lap swimming pool.
- I grew up with a neighborhood pool where a kid could get a membership for the summer and go play all summer. Having only Carlmont's pool available during work days for 2 or 3 hours isn't very useful for the community and it is expensive!
- With the exception of Belmont Sports Complex, our fields are often in poor shape. More maintenance needs to be performed to keep them up.
- Is the track at Carlmont HS open to the public?
- pricey for the tax paying residents. $5 price difference between resident and non-resident pricing. the barrett community centre building is fall apart. again don't see the tax dollar being used
- I do not participate too much in recreation programs due to my work schedule. But I like the idea of outdoor tour guides maybe on the weekends at some of our beautiful open spaces. Maybe a volunteer program to clean up and plant native gardens in some areas of Belmont. Also bring back the music groups in Twin Pines park for Sunday's. Maybe more events at Twin Pines park would be nice.
- n/a
- I think it's great!
- Bike riding is an inclusive and therapeutic activity for people with disabilities such as my dad. Disallowing the use of bikes on trails would take away the one thing my dad can do that is active because he is disabled.
- All sports activities should be included in these locations.
- I think it is important that you not exclude people. Belmont has done an amazing job of balancing biking and hiking. That should be celebrated - there are room for improvements, but please don't over regulate. Biking is booming and Belmont can lead the way on sharing off-road access.
- My son would love to participate in kids' cycling classes at the pump track once it's complete.
- Allow classes to use space for free if they are free classes.
- We enjoy these programs with all ages and members of our family and look forward to more.
- It's been many years since I've participated in outdoor programs, but I believe there's value in these programs. I believe a community trail crew/maintenance team would be popular and allow people to build what they want out of their outdoor experience.
- Expand class offerings for youth and adults. Also, there doesn't seem to be much of anything for tweens (10-13).
- Youth mountain bike teams are in cities all around California and are a great way for kids to get involved and get outside. I wish Belmont had one when I was in middle school or high school so I could have improved my skills. The trails of Belmont make many people great riders and I myself just recently competed in a national championship for mountain biking and it all started on Belmont trails.
- We would love to see access to public swimming.
- N/A

ONLINE SURVEY QUESTIONS

Question 17. Other Responses (con't)

- Our kids love these and want more opportunities to participate
- Need more opportunities for youth to engage with our community.
- You should put up a banner before summer camp enrollment opens up, to drive web traffic.
- The National Interscholastic Cycling League is a fantastic youth sports opportunity for nearby students, who could train at Waterdog.
- NA
- bikes need to continue to have access to the park
- More outdoor education opportunities for youth would be great.
- No opinion
- These can change the feel and crowding of a natural area like Waterdog. It would be a negative for me and my family.
- no need for these. there are plenty of other options in the area
- Please keep trails maintained and do not restrict usage access
- I'd like to know when outdoor rec program will include mountain biking classes through the Belmont parks and rec. Thx!
- Keep mountain bike trails open. Expand access
- Make more of it!
- Keep mountain biking trails
- Where are the mountain bike classes?
- I would like to know that cycling access to open space remains a priority within San Mateo and I would like you to know that other forms of recreation can coexist with cyclists.
- Waterdog lake presents an important opportunity for the youth of this community to engage in fun outdoor activities, such as mountain biking. Restricting access to waterdog lake for this activity would force us to drive further away to places like San Jose. There are not many places that provide this opportunity mid peninsula.
- Biking and hiking at Waterdog is my primary use of open space in Belmont
- Need more activities for the middle aged and elders
- More programs
- N/A
- nothing
- Exercise isn't just physical..it is mental. Having a free Waterdog park to be able to ride a bike with my kids or go for a run on extensively well maintained trails that our own scouts have volunteered countless hours from Troop 42 and other troops in the area would not just be sad and disappointing, it would be selfish, self-serving, limiting and frankly, criminal on the level of those few who are selfishly trying to shut down this popular mountain biking and exercising Mecca...one of the very few, well maintained ones left in Silicon Valley.
- Waterdog is the only place in Belmont and San Mateo County where cyclist have access to local trails. It is a wonderful place for children to learn to ride their bikes and for an after-work fitness ride. Waterdog's trail were built by mountain bikers and the volunteer opportunities allows us to give back to community.
- Allow bikes on trails
- Please more youth programs!
- We don't use these.
- please consider adding a community pool as temps have risen so much over the years.
- Permanent Outdoor Pickleball Courts
- Needs to include lap swimming access for the community, and reliable access to tennis courts - the only City-only court I know of is the single courts at Alexander and Hallmark Parks. Would like to know the official status of Carlmont courts - are they a community resource? same with their pool. These are the major swim and tennis resources available. After the JCC left Belmont in the early 2000's, these kinds of resources were never replaced.
- These are always at weird times that don't accommodate parents that work. Please have some classes that start after work ends.
- Teach people to value health and nature and their responsibility to protect and support nature for a healthy and sustainable environment to be enjoyed by many future generations.
- Thank you for the abundant access to parks
- Keep the spaces open for all. It's a beautiful way for our community to stay together.
- Expand youth activities
- Local parks and open space should be open and inclusive to all. Excluding certain groups is not fair.
- More mind/body offerings like yoga & Tai chi in the evening. We are on the Silicon Wheel hamster wheel & business hours are impossible to join anything
- Oppose creating activities with regional draw
- Belmont Sports Complex has been a treasured gem for my son to use and us parents to watch. We're lucky to have it.
- You do a great job of management of the parks and open space

ONLINE SURVEY QUESTIONS

Question 17. Other Responses (con't)

- Build some tennis courts and fix the ones up off of Hallmark. Please do NOT make the tennis courts as duel use with pickleball courts they are two incompatible activities.
- Nothing
- The brsll program is outstanding. We need to have the Nesbit baseball field upgraded. We also need a community swimming pool.
- LET US EXPAND THE PROGRAMS
- Skate parks
- N/a
- NA
- We need a real youth center with an indoor basketball court. There is no reason you can't put one at the BSC.
- The youth needs skate parks or skate spaces
- Will try some classes
- Bicycling and walking dogs is very important in nature
- Mountain biking uses
- I am strongly opposed to any project that allows mountain biking in natural areas. The truth is that mountain biking is an anti-environmental, destructive, industry supported, self-centered activity that creates destruction where it attempts to penetrate natural lands and the public trust. Unlike the misinformation from proponents of this invasion, it is clear to see this is an industry/bike association/single-minded advocate agenda to penetrate public programs, buildings, and natural areas for self-centered gain, whether it be corporate sales, association control, or self-centered thrills, all with undue pressure/influence on local officials and at the expense of unique treasures like local parks and natural venues. It is a strategy that plays out across the nation, poisoned by the mantra of the privatized radical individual as opposed to the common good and public trust. These spaces are meant for all of the people, not the minority of a few to pursue restricted single-use narcissist adventure. Open space parklands remain places of reflection and undisturbed connections with nature, among the diverse animal and plant life, terrain, and peace those things create. Objective national research documents the destruction that mountain biking wreaks on the environment as well as on people who want to pursue passive recreation. Despite their false P.R. promotional distortions, mountain bikers are only interested in their constant self-indulgent thrills at the expense of nature and people. It is only about themselves and their addiction, not about others, animals, birds, plant life, the environment, nature or anything beyond their myopia. It is a pathetic mutation of what makes us truly human.
  You must confront this intrusion and deny any use of the park for mountain biking or similar restricted-use disruptive activity. Do you as a city want to turn every park into yet another industry-lobbied sports complex? Parks and natural environments are not gymnasiums, race tracks, sports complexes, or circus adventure rides, despite the propaganda from the industry and IMBA bike association partners, replete with their websites, consulting, and talking points, a 21st century snake-oil medicine show.
  Do you really want the invasion of this destructive, dangerous, and restricted self-centered activity for a few with its consequent documented national history of future expansion, destruction, and danger to people (with permanent injuries and lawsuits against the city), or do you value something more: a place of reflection and connection with nature, others, and oneself, giving us our full humanity, nature's gift to us all for generations past, present, and future?
- N/a
- N/A
- N/a
- N/A
- Belmont needs a public aquatics center at Barrett.
- The parks have great potential for making better mountain bike trails. If somehow some of the trails can be connected and more mantained, that would bring a lot of people to the parks.
- Mountain biking with my kids at water dog is a fantastic way to get outdoors without traveling too far.
- I think it is very good to our youth out into nature, especially kids from families where that activity is not assured.
- Great options and facilities for team sports.
- I recommend sending more information about the programs
- Penalties for people who don't leash their dogs.
- Didn't know we had that!
- Is there a site that I can refer to that has a list of opportunities? I'm aware of youth sports with my kids, but less so with outdoor programs.

ONLINE SURVEY QUESTIONS

Question 17. Other Responses (con't)

- Belmont is severely lacking in adequate sports facilities compared to anywhere else in the Bay Area. The grass fields are mostly terrible and even dangerous to play sports on. I do prefer grass fields over artificial although realize artificial is easier all round
- Allow more mountain biking and electric bikes.
- Ice Skating should be encouraged to return to Belmont.
- Best those programs are held at recreation centers and park areas with dedicated trails for walking and play. The wildlife in open spaces can be dangerous due to predators such as mountain lions and rattlesnakes and those animals should also be protected from curious children and dangerous of construction.
- Same as above.
- Belmont should start a youth Mountain Bike weekly ride in Waterdog Open Space/Hidden Canyon trailhead.
- Please keep parks open to multiuse activities.
- Would love to have the opportunity to do educational hikes with naturalists, mycologists, historians, etc.
- Increase number of program. Have trained volunteer leading the program.
- n/a
- Nothing
- Nothing
- Do not capture economic growth of mountain biking.
- N/A
- More bike lanes and implementation of safety expert recommendations for Ralston Ave
- I've been hiking and mountain biking in Hidden Canyon/Water dog for 25 years. It has been my primary exercise destination during that time.
- Please prioritize mountain bike access to trails
- Make it all inclusive for ALL people.
- Do not close the trails for mountain biking. My kids love biking around here and need the space for outdoor experiences.
- Keep and enhance all cycling opportunities including mountain biking
- HS Mtn bike teams?
- Keep area open to all uses
- Mountain biking
- The new turf at the recreational center makes it one of the best fields in the area
- A skate park would be greatly appreciated by the kids as well as parents.
- Many of the Mountain Biking Community welcome the opportunity and are involved in maintaining the trails at Water Dog.
- in keeping with the master plan's stated goal of equity and inclusion, mountain bikes should be allowed on all recreational multi-use trails.
- They are great
- Important to keep mountain biking access to waterdog park
- Build a paved pump track or 3!
- It would be interesting to attend a small yoga class at an open space
- Mountain bike youth camps please!!!
- Having a youth mtn bike club / team that is city sponsored would be wonderful & a great way to educate youth on bike safety/etiquette
- na
- I have not partipated in any of the programs
- N/A
- I cannot comment on this
- What are plans to expand biking opportunities?
- more open swim times in summer
- Maybe update the summer concert series at Twin Pines to attract younger participants.
- Please build Pickleball courts... it is the fastest growing sport in America. Foster city did an amazing job!
- The best way to stay updated on activities/events for the ORP.
- The tennis courts at Hallmark Park need to be resurfaced and skirted around to prevent debris getting into the courts.
- More facilities and classes for sports and recreations would be great!
- what is timing of expanding Belmont's outdoor recreation programs again?
- Not interested.
- More mountain bike programs please.
- New turf field @ BSC is great. Would be nice if Belmont United could use the area outside of the baseball fence for practices when baseball is there/ not there. It's been empty many times I've been there & BU is playing on sloped, crappy fields.
- Ongoing updates about development at Barrett and master plan. Activity guide was important part of our yearly planning; looking forward activities resuming and there being enough space.
- I would also like to add, Belmont should offer a First Aid class. Maybe they already do?
- There should be a focus on mountain biking.
- More yoga and Zumba classes on weekends and late afternoons.

DRAFT

ONLINE SURVEY QUESTIONS

- **Question 17. Other Responses (con't)**
- We don't use these programs
- I'd like to hear more about the cities programs. The things that are available are not necessarily on our radar or we're not subscribed to the correct places to see them.
- Some fields should have soccer nets available outside of organized team sports. All nets locked up otherwise.
- Belmont needs a good safe connection from upper Ralston (by Fox and Ralston Schools) to the rest of Belmont (Alameda, El Camino, 101). If there was a safe route for biking that connected all of Belmont it would greatly improve the utilization of Recreation Programs
- Not much for teens to do in Belmont. Once they age out of AYSO and Little League, then what? Need sports activities for the non-varsity kids. A skate park would be fantastic.
- Nothing at this time. Thank you.
- Have reasonable fees or if a resident free - use our tax dollars for our community ….have bands in the summer again, and offer classes on the green grass areas if not inside.
- Dedicated outdoor spaces for exercises. Nature.
- I wish Belmont has a swimming pool and a athletic facility like Highland Rec Center in San Mateo.
- Nice job on belmont sports complex
- All of the Park and Rec activities (especially the exercise classes) are offered during the day when people are working or in the evening. Please offer more adult and senior classes on the weekend (and not limited to early morning).
- It would be great to have a nice recreation center like the PJCC in Foster City, something that can work for everyone. Low cost!!!!!!!!
- More would be nice
- Facilities outdated and not very inviting. Would hesitate to leave children there for an activity.
- Mountain bike lessons for families. This is becoming a popular sport for families and need more training.
- We love Belmont United.
- A running track would be great. Carlmont HS has a track but it is very unclear if/ when that is available for public use so even clarifying that would be helpful.
- I don't participate in rec programs.
- The parking lot is challenging at Barrett. Tough getting in and out for vehicles and pedestrians.
- Bie and skate parks.
- I do not use these services
- More dancing classes and yoga classes
- Aquatics programs would be a huge addition for our family. Right now we have to go to the highlands pool in San Mateo.
- More publicity would help.
- You should not be charging money to use fields that sit empty most of the time. We want to play soccer at lunch on weekdays, but instead we stay inside.
- None
- organized activities aren't for me, but not opposed to them unless they substantially detract from everyone else's ability to bike, play, walk, etc.
- So much emphasis on sports leagues and not enough about learning and creating in the outdoors.
- More programs for youth are helpful. Homework club and after-school hangouts help keep the community out there and interacting with each other
- It would be great for Belmont to add a skatepark and bicycle pump track.
- I love them. I love biking in Belmont.
- Waterdog lake needs permanent restrooms at both ends.
- For years when our kids were little and played competitive sports we pushed for turf fields so way to go on finally getting some of these in place! The Sports Complex looks great and I only wish my kids could've used these but happy for those who can.
- A pool would be a fantastic addition for Belmont. Hopefully this is still in the works for the Barrett update.
- Add more tennis and running programs. Think of road bike programs too. Huge road bike community here in a Belmont (always escaping to Woodside or Hillsborough...)
- We very much appreciate these programs and use them extensively. Thank you for offering them.
- Would like to encourage more outdoor sports for youth
- Would like to know what programs are available in a timely manner.
- Would like swimming, tennis courts, kids after school activities
- Love camp soar.
- Adding swimming for kids and families. Classes, camps, recreational, family splash times, etc....
- N/A
- We need pickleball courts!!!

ONLINE SURVEY QUESTIONS

Question 17. Other Responses (con't)

- Many of the youth activities are much more expensive than surrounding communities (for example, the Redwood City soccer program is half the price, which is why we chose it, despite being a Belmont resident)
- Our teen LOVED the hiking club program run by Brandon. More of those types of programs please. Broken into age groups
- I think the Outdoor Recreation Programs are very high quality, thank you.
- Not really interested in these.
- Youth sports are so important and offering them at the rec level is essential. thank you for offering them!
- Please offer more swimming options in Belmont. We need our kids to be water-safe. Please open up swim lessons for kids!
- Pretty good the way they are. Spend the money elsewhere where it may be needed more.
- Any possibility of a community pool at Barrett?
- We love Camp SOAR and hope it comes back for Summer 2021! Also, we'd love to see more all-sports or multi-sports classes so our kids can experience a lot of different sports and figure out what they like and don't like.
- Free events and general guidelines
- ice skating rink would be so great
- More adult outdoor classes please.
- A swimming pool/aquatics would be a wonderful addition.
- -I wish that we had a community pool that was more accessible to kids (Carlmont pool has very limited hours for free swim and is overcrowded by campers when it is open). -I want to reiterate my sentiment that the trails should be open to all (even e-bikes).
- We used to use these, mostly at Barrett, but as the kids get older less. Still we know a lot of people who use these. They are important.
- More aquatics programs for kids - after school and on weekends, summer time camps. More STEAM/educational programs.
- community pool would be great
- Construct Bocce ball courts as the City has promised!!
- It would be nice to see more outdoor recreation programs for tweens and teens
- I am not aware of any such program. I've lived here for two years and have not seen any information on any programs.
- N/A
- My son is in BRSLL so we've practiced at Nesbit and Ralston. I'd love to see the city have a better plan for Barrett Community center.
- Underdeveloped. The Belmont Sports Complex in general could be further developed for more fields and parking.
- More things for youth or ways to get to know others your age.
- Bring some classes back.
- I'm sure you know this... it is always hard to find fields/spaces to play sports.
- I believe a community pool like the one in Highland center would help the community
- Swimming pools needed
- BRSLL and local AYSO are great but our kids no longer playing organized sports. Fully support these programs, though and want there to be plenty of fields for the next generations.
- I haven't seen much of what's on offer, more publicity or signage would be a good idea.
- Good job balancing needs between sports and individual users!
- NA
- Do you have mountain biking camps for kids? Most outdoor programming seems to be for team-based skill sports, as opposed to mountain biking, or endurace-based sports which a) can be a lifelong sport (unlike most team sports), and b) can instill in kids a deep love of outdoors, hopefully leading to children with a passion for sustainability and stewardship of our precious outdoors and habitats.
- Keep funding to insure that our youth have a place to learn and enjoy
- More drop in adult exercise classes would be great! We need a community pool.
- Please do not eliminate mountain biking use at waterdog
- Needs by far the most focus is the poor condition of fields and recreation facilities at the schools. In general, they are poorly maintained. This is by far where resources should be directed. The grass fields are okay a few months a year only. The outdoor basketball courts are antiquated.
- Better restrooms at fields. Swimming pool.

ONLINE SURVEY QUESTIONS

Question 17. Other Responses (con't)

- The city of San Francisco just partnered with Outward bound to run a ropes course. We have one in our backyard and it would be nice if our community is able to use this resource. Perhaps, we can also partner with Outward bound to make this community connections.
- More basketball courts please
- A pump track would be great for young kids starting to ride.
- Keep up the good work!
- So many of the recreation programs for individuals who are older than 55 are offered during the day. Many individuals who are over 55 are still working and would still like to take part in the recreation programs that park and rec's offers.
- You guys do a great job!
- Would be nice if the lake were stalked with fish occasionally for kids to experience fishing.
- The top youth sports priorities for our family are softball and swimming.
- We love movie nights!
- I started working with groups to improve youth sport fields when my kids were 6 & 4. They are now 21 & 19 & just last year the sports complex got turfed. This took WAY TOO LONG! Too much bureaucracy! Prioritize these projects and get them done!
- It is very important to maintain an adequate budget for future maintenance of our facilities, including buildings, structures, play equipment, lighting, etc. And do not forget to increase City maintenance staff as you add facilities to the Department. This includes park landscape maintenance staffing, equipment and supplies.
- I love the idea of more outdoor exercise, also would love to see a large community garden where we can teach children (and adults) the how to grow food, the importance of eating local, importance of pollinators, birds, etc.
- NA
- I would really love to see swimming classes and a pool, either to be able to use the high school pool, or build one at Barrett or wherever else there is space.
- None
- It would be great if Belmont offered more programs so we don't have to go to other cities for tennis or soccer camps or dance lessons!
- Yoga sounds nice
- Mountain biking at waterdog is big
- None
- Teen activities
- love the youth programs, especially dance for my daughters
- Love 'em

FOCUS GROUPS

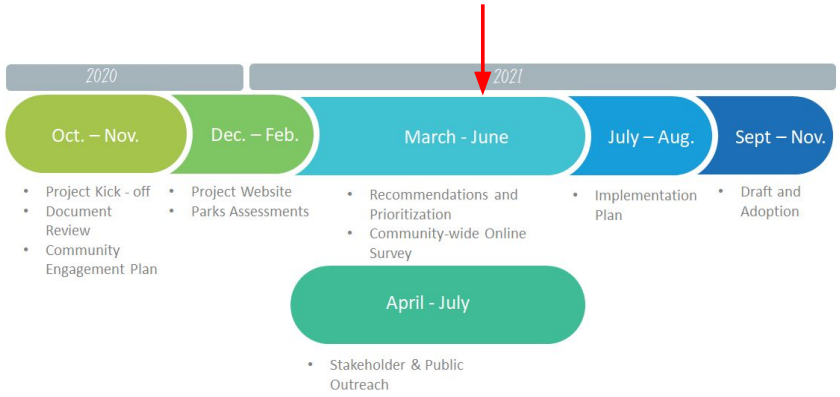
PURPOSE



Set the **framework** for decision makers in the planning, maintenance, development, and/or rehabilitation of Belmont's parks and open space system and related recreational programming for a **15 year horizon**.

MASTER PLAN GOALS & GUIDING PRINCIPLES

- Provide **equitable access** to resources and activities across the entire city
- Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position or physical/cognitive ability
- Offer services and activities across a range of **interests, abilities, and ages**
- Reflect our commitment to **environmental resilience** and sustainability
- Respect the beauty and importance of our **natural resources**
- Advances **community health and well-being**
- Foster a sense of **community** and encourage **social interaction**
- Are **well maintained** and actively managed over time
- Can **adapt** to changing conditions and needs
- Utilize **transparent community process** to inform decisions

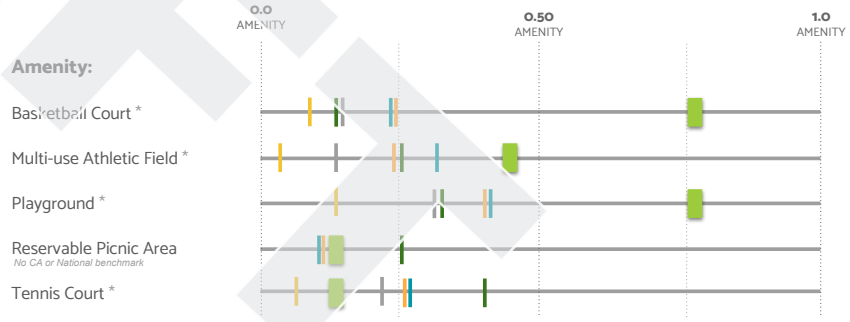
EXISTING CONDITION: HIDDEN CANYON

UNDEVELOPED PARK

1. Parking lot
2. Restroom, Portable
3. Fence Line
4. Boot Brush
5. Paved Road
6. Cleared Space
7. Terminus of Paved Road
8. Box Culvert
- Trailhead

ACCESSIBILITY
- Park is accessible from gravel parking lot.
- Paved linear strip within park area.

AMENITY
- Paved road is in good condition.
- Fence line is in good condition.
- Parking gravel levels are low in some locations.
- Parking stops are in fair condition.
- Bench is in fair condition.



LANDSCAPE
- Naturalized area. Lots of native plants on the hillsides.
- Park area is not planted.
- Parking lot is not planted.
- Parking lot trees in good condition. Some shade provided to cars.

GOOD — FAIR — POOR

PUBLIC RESPONSE: HIDDEN CANYON

VIRTUAL FOCUS GROUP MONDAY 10/18

- **Poor maintenance condition** noted currently, and more of a concern if increased amenities at site
- **Concerned about vehicular access** (traffic volume and speed, parking)
- Many participants voiced support to keep the space **natural and quiet**
- **Phased implementation** supported in order to manage traffic concerns
- **Picnic tables, seating, and child outdoor play amenity** generally supported

DRAFT **RECOMMENDATIONS:** RALSTON RANCH

UNDEVELOPED PARK

Accessible : Trees : Planting

FOCUS GROUPS

PUBLIC RESPONSE: RALSTON RANCH

VIRTUAL FOCUS GROUP WEDNESDAY 10/20

- **Walking paths and seating** supported by multiple participants
- Neighborhood residents **generally against a dog-oriented amenity**
- Maintain and increase **trees**
- Respect **natural environment** in any proposed changes
- **Traffic, specifically exiting** Ralston Ranch Rd, considered negative to residents
- Child **play element** supported

NEW PARK OPPORTUNITY

Accessible : Planting

PUBLIC RESPONSE: RECOMMENDATIONS

PUBLIC COMMENTS RECEIVED OCTOBER 2021

- Multiple comments in support of **Pump Track (Bike Park)** at Belmont Sports Complex (requests to include and exclude bike amenity at Hidden Canyon)
- Positive response to proposed park at **Alameda de las Pulgas** (Opportunity Site)
- Seating and Permanent Restroom for Hidden Canyon, add bike repair station
- Request for more **Youth- and Teen-oriented spaces**
- Splash park (water play) at O'Donnell not encouraged
- Yes to **Bocce ball** (multiple locations)
- Request for **dog-oriented amenities**, limited support for proposed sites
- Maintain **natural environs** on undeveloped parks
- Neighbors support **park creation at summit of Oak Knoll Drive**

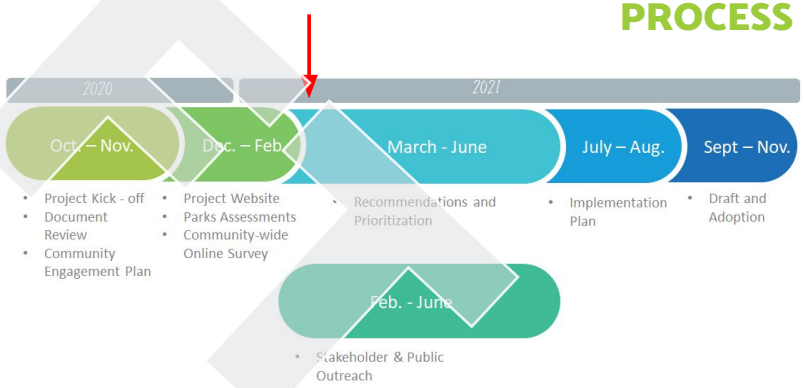
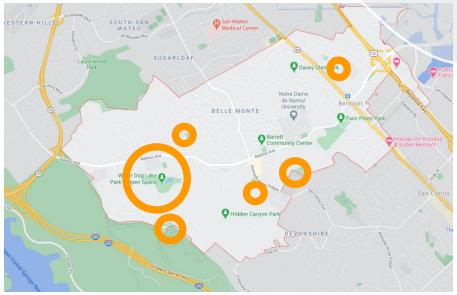
PURPOSE



Set the **framework** for decision makers in the planning, maintenance, development, and or rehabilitation of Belmont's Parks and open space system and related recreational programming for a **15 year horizon.**

GOALS & GUIDING PRINCIPLES

Develop a Master Plan that:



- Provide **equitable access** to resources and activities across the entire city
- Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position or physical/cognitive ability
- Offer services and activities across a range of **interests, abilities, and ages**
- Reflect our commitment to **environmental resilience** and sustainability
- Respect the beauty and importance of our **natural resources**
- Advances **community health and well-being**
- Foster a sense of **community** and encourage **social interaction**
- Are **well maintained** and actively managed over time
- Can **adapt** to changing conditions and needs
- Utilize **transparent community process** to inform decisions

10

OPEN SPACE MANAGEMENT PLAN

The purpose of the Open Space Management Plan is to guide City decision-making for:

- Managing sensitive resources
- Balancing recreation uses
- Mitigating hazards

11

OPEN SPACE MANAGEMENT PLAN

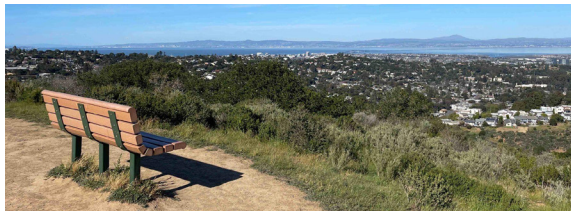
12

ADVISORY COMMITTEE PRESENTATIONS

OPEN SPACE MANAGEMENT PLAN

Plan process includes 8 tasks:

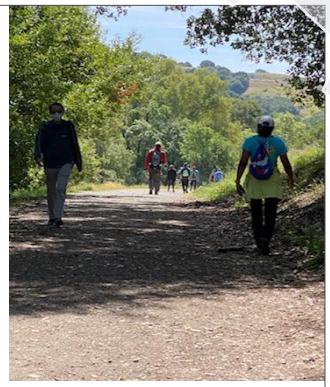
1. Project startup and orientation
2. Review of existing information
3. Develop goals and policies
4. Describe existing environmental conditions
5. Describe current and potential future recreational activities
6. Develop Management Alternatives and recommendations
7. Prepare Open Space Management Plan
8. Meetings for public input and Plan adoption



13

OPEN SPACE MANAGEMENT PLAN

Current Tasks



1. Task 3: Develop Goals, Policies, and Implementation Actions
2. Task 4: Describe existing environmental conditions
3. Task 5: Describe current and potential recreational activities
4. Task 6: Development Management Alternatives

14

Task 3: Goals and Policies

1. Reviewed goals and policies from existing City planning documents.
2. Identified those goals and policies relevant to the OSMP.
3. Reviewed and adapted goals, policies, and implementation actions from regional open space management plans.

15

Task 3: Goals and Policies

Goal=A general statement that articulates a desired outcome.

Policy=A more specific statement that states what steps the City will take to achieve a desired outcome.

Implementation Action=A measurable action that specifies how a desired outcome is achieved.

Developing definitions for key terms (e.g., riparian resources, sensitive resources)

16

ADVISORY COMMITTEE PRESENTATIONS

Task 3: Goals and Policies

1. Existing planning documents include goals, policies, and implementation actions in the following categories:
   a. Protection of sensitive resources
   b. Trail maintenance
   c. Visitor Demand and Management
   d. Visitor Safety and Hazard Management

17

Task 3: Goals and Policies

1. Identified ***new*** categories to address management issues and public comments:
   a. New unauthorized trails
   b. Trail closures - redundant trails
   c. Protection of riparian resources
   d. Adaptive Management
   e. Use of e-bikes
   f. Wildfire hazards

18

Task 4: Environmental Assessment

Desktop Review of Environmental Conditions

1. CNDDB records
2. USFWS Information for Planning and Conservation Species
3. CNPS Inventory records
4. California Bird Species of Special Concern
5. USFWS Critical Habitat Mapper

19

Task 4: Environmental Assessment

Field Assessment of Environmental Conditions Waterdog and San Juan Canyon open spaces

1. "Ground-truth" vegetation communities obtained from the San Mateo County vegetation mapping.
2. Assess conditions of 9.6 miles of trails.
3. Determine if existing conditions provide suitable habitat for any special-status plant or wildlife species.
4. Assess baseline conditions of vegetation as observed from trails.

20

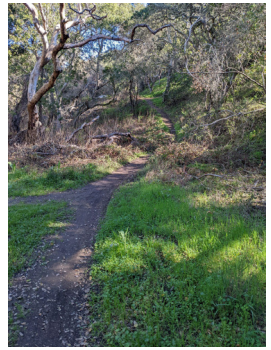
ADVISORY COMMITTEE PRESENTATIONS

Task 4: Environmental Assessment

Potentially suitable habitat for:

1. Western leatherwood
2. San Francisco Dusky Footed Woodrat

Image source: National Park Service



21

Task 4: Environmental Assessment

Trail Assessment reviewed the following:

1. Trail erosion
2. Presence of multiple trails (social trails) in a single area
3. Presence of legacy trails
4. Stream crossings

22

Task 4: Environmental Assessment

23

Task 4: Environmental Assessment

24

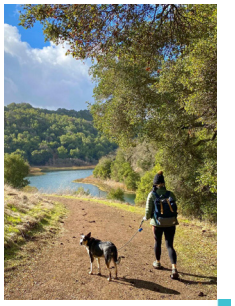
25

Task 5: Recreational Use Assessment

Examine current and future recreation uses

1. Both current and future use in Belmont open space areas are influenced by local population size.
2. Belmont's population grew at 10% during the last decade.
3. Other factors, such as the pandemic and new technology, also influence use in more significant ways than population size.
4. Results of regional park surveys show trail use and wildlife and scenery viewing most frequently engaged activities for open space areas.



26

Task 5: Recreational Use Assessment

Managing the open space trail system

1. Trail system design and maintenance can accommodate varying levels of use while avoiding environmental degradation
2. Legacy trails were not always built or maintained with current Best Management Practices for trail design and maintenance
3. Management options for legacy trails:
   a. Re-construct in the current, exact location
   b. Construct new segment along the same general route
   c. Re-route
   d. Seasonal closures
   e. Permanent closures

27

Task 6: Management Alternatives

1. Developing two management alternatives for the OSMP.
2. Each alternative represents a mix of goals, policies, and implementation actions to address management concerns and public comments.
3. Choice between alternatives is typically not "All or None."

28

ADVISORY COMMITTEE PRESENTATIONS

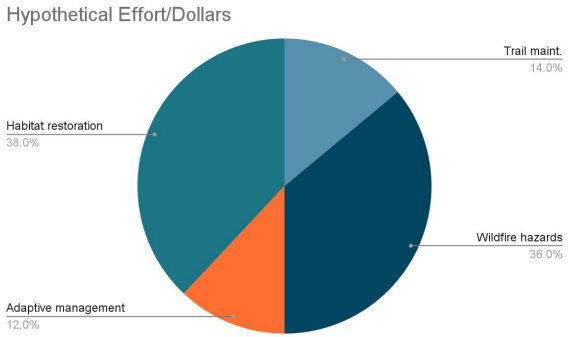
Task 6: Management Alternatives

Management Alternatives must address all goal/policy categories:

1. Protection of sensitive resources
2. Trail maintenance
3. Visitor Demand and Management
4. Visitor Safety and Hazard Management
5. New unauthorized trails
6. Trail closures
7. Protection of riparian resources
8. Adaptive Management
9. Use of e-bikes
10. Wildfire hazards

29

Task 6: Management Alternatives



Defining management actions:

1. Trail maintenance: periodic, regular actions to clean or repair drainage structures (Water bars, rolling dips).
2. Habitat restoration: identifying areas where native plants could be successfully restored, then designing and implementing restoration plans.
3. Adaptive Management: periodically collecting information on resources conditions and determining any follow-up actions to meet restoration or protection goals.
4. Wildfire hazards: periodically reducing excessive fuels through grazing, manual labor and equipment.

30

Task 6: Management Alternatives

How should the city and its partners allocate effort to the OSMP?

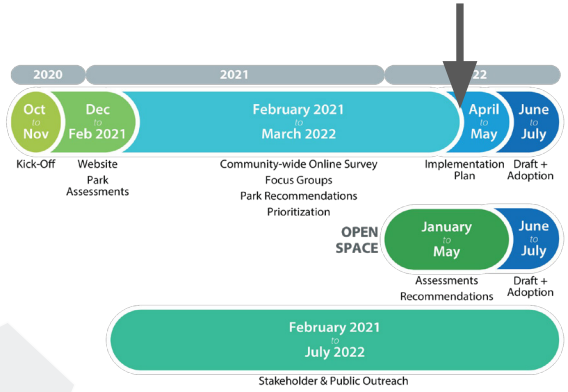
31

Preliminary conclusions

1. Existing plans focused on protection sensitive resources, trail maintenance, visitor demand and management, and visitor safety/hazard management.
2. New policies are needed to address: adaptive management, trail management, protecting riparian resources, e-bikes, and wildfire hazards.
3. Multiple trail sections are in poor condition and need immediate attention.
4. Habitat conditions show minimal degradation.
5. Western leatherwood (plant) and SF Dusky-footed woodrat were found.
6. There are some opportunities for habitat restoration.
7. There are multiple opportunities for periodic wildfire hazard reduction.

32

ADVISORY COMMITTEE PRESENTATIONS



Next Steps

1. Finish Environmental Use Assessment.
2. Finish Recreation Use Assessment.
3. Finish Management Alternatives.
4. Prepare Draft Open Space Management Plan.
5. Solicit Public Feedback.

33

SCHEDULE

DRAFT

ADVISORY COMMITTEE PRESENTATIONS

PARKS, RECREATION AND OPEN SPACE MASTER PLAN

Advisory Committee Meeting
May 31, 2022

PROS Plan purpose:
*Set the **framework for decision makers** in the planning, maintenance, development, and/or rehabilitation of Belmont's Parks and open space system for a **15 year horizon**.*

GATES +ASSOCIATES 1

AGENDA*

***Purpose** To discuss the Open Space Management Plan and provide guidance for the future of Belmont's Open Spaces*

Open Space Management Plan

- Environmental Assessment
- Base Plan and Management Alternatives
- Implementation Actions and Requirements

Next Steps

2

OPEN SPACE MANAGEMENT PLAN

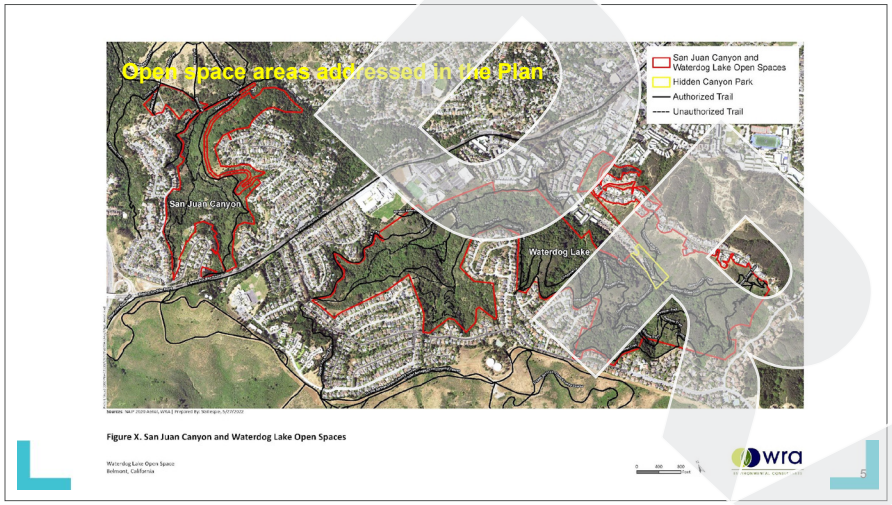
Adoption of the OSMP will enable the city to:

- **Augment existing goals and policies pertaining to open space**
- **Commit to specific "implementation actions"**
  - *Actions may require funding, and possible environmental compliance and permitting requirements.*

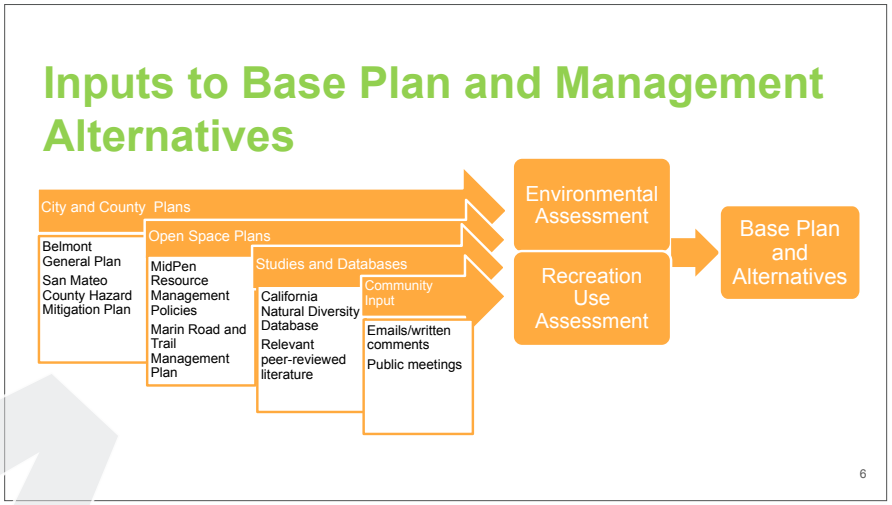
3

OPEN SPACE MANAGEMENT PLAN*

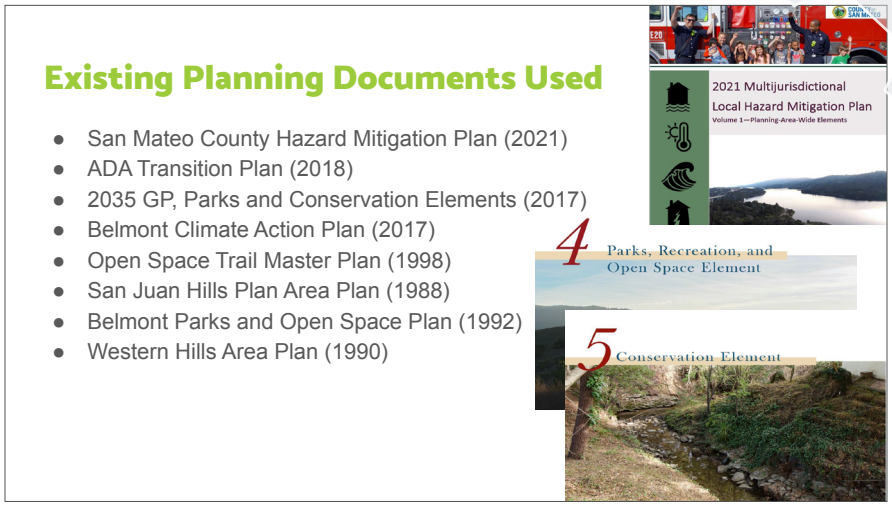
Key issues addressed:



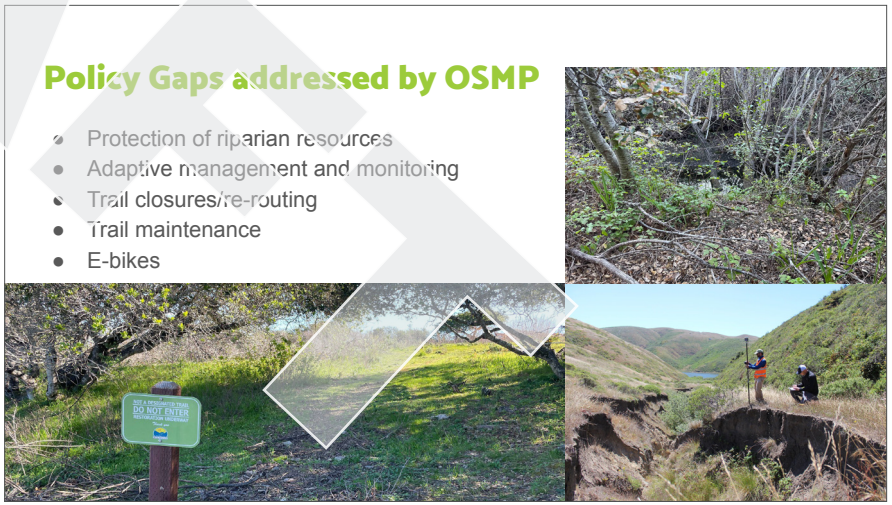
Environmental Sustainability



Balanced Recreational Uses + Trail Management



Natural Hazard Mitigation



4

ADVISORY COMMITTEE PRESENTATIONS

ADVISORY COMMITTEE PRESENTATIONS

Environmental Assessment

9

Environmental Assessment

- **The environmental assessment is:**
  - Is a master planning level study to support development of goals, policies, and implementation actions.
  - Involves limited fieldwork to identify any environmental concerns that will require detailed field based evaluation.
- **The environmental assessment is <u>not:</u>**
  - A research project
  - A complete vegetation survey of the entire open space areas
  - A series of wildlife surveys to verify the presence of common or sensitive wildlife species.

10

Environmental Assessment Components

Desktop Review and Field Assessment of:

1. Common & sensitive plant species
2. Common & sensitive animal species
3. Vegetation communities-naturally occurring and exotic
4. Trail conditions

11

Environmental Assessment: Methods

Desktop Review of Environmental Conditions

- CNDDB records
- USFWS Information for Planning and Conservation Species
- CNPS Inventory records
- California Species of Special Concern
- USFWS Critical Habitat Mapper

12

ADVISORY COMMITTEE PRESENTATIONS

Environmental Assessment: Methods

Field Assessment of Environmental Conditions (WDL and SJC)

1. Verify in the field vegetation communities identified in San Mateo County data (2021)
2. Assess conditions of trails
3. Determine if existing conditions provide suitable habitat for any special-status species
4. Assess baseline conditions of vegetation and wildlife habitat
5. Note any common wildlife and plant species observed

13

Environmental Assessment: Results

Initial Field Assessment of Environmental Conditions

- 2 WRA staff performed field assessments on March 8, 21, and 22
- Traversed over 10 miles of existing trails

14

Vegetation Rating Categories:

- High Quality/Mostly Intact
- Moderate Quality/Moderately Altered
- Low Quality
- Low Quality/ Extensively Altered

Environmental Assessment: Results

Verify in the field vegetation communities at Waterdog Lake

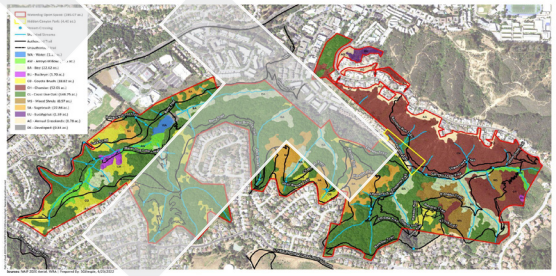


Figure 3. Waterdog Lake & Open Space Land Cover Types

16

ADVISORY COMMITTEE PRESENTATIONS

Most abundant vegetation types at WDL

17

Environmental Assessment: Results

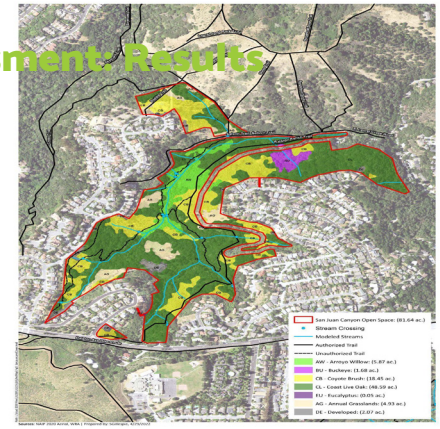

Figure 2. San Juan Canyon Open Space Land Cover Types

Most abundant vegetation types at SJC

19

Environmental Assessment: trail condition indicators

A. Trail erosion
B. Presence of multiple (braided) trails or trail sections in a single area
C. Presence of unofficial trails
D. Stream crossings

20

ADVISORY COMMITTEE PRESENTATIONS

Environmental Assessment: Trail Condition Findings

Location	Low Erosion	Medium Erosion	High Erosion	Total Erosion Instances
WATERDOG LAKE				
Official trails	127 (56%)	77 (34%)	25 (11%)	229
Unofficial trails	59 (83%)	7 (10%)	6 (8%)	71
SAN JUAN CANYON				
Official trails	5 (38%)	7 (54%)	1 (8%)	13
Unofficial trails	11 (85%)	2 (15%)	0 (0%)	13

21

Environmental Assessment: Trail Density Findings

- Trail density not having an effect on other environmental indicators:
  - Presence of common wildlife species
  - Presence of special status wildlife species
  - Habitat conditions
  - Carnivore movements

22

Environmental Assessment: Findings

Sensitive Wildlife with Moderate or higher potential to occur

- Western (Pacific) pond turtle
- Olive-sided flycatcher
- White-tailed kite
- San Francisco (saltmarsh) common yellowthroat
- Hoary bat
- American badger

23

Environmental Assessment: Findings

During the March site visits WRA confirmed presence of these two special-status species

1. Western leatherwood
2. San Francisco Dusky Footed Woodrat

24

ADVISORY COMMITTEE PRESENTATIONS

Environmental Assessment: Findings

Regarding baseline conditions of vegetation and wildlife habitat:

A. Most vegetation is in good condition.
B. Low potential to occur for many sensitive plant and animal species identified during "desktop" review
C. Recreation use generally not having environmental impacts
   a. *Exception: trails that go directly through stream channels that are not "protected" with erosion stabilization features*
D. Both open space areas contain habitat for bobcats and mountain lions.

25

Environmental Assessment: Findings

Common Wildlife Identified

- California towhee
- Spotted towhee
- Wrentit
- California quail
- Anna's hummingbird
- Common Merganser
- Mallard
- Red-shouldered hawk
- Mountain lion*
- Bobcat*
- Black-tailed mule deer
- Western fence lizard
- Pond turtle

26

Environmental Assessment: Findings

Common Plants Identified

- Bullthistle
- Annual hairgrass
- Sticky monkeyflower
- Yerba santa
- Blue gum eucalyptus
- Fennel
- French broom
- Toyon
- Foxtail barley
- Goldfields
- Arroyo lupine
- Pineapple weed
- Bur clover
- Gold back fern
- Harding grass
- Western choke cherry
- Coast live oak
- California blackberry
- Common snowberry

27

Environmental Assessment: Trail Critical and Possible Recommendations

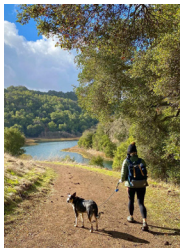
1. Critical: Address severe erosion areas
2. Critical: Protect stream crossings or reroute
3. *Consider potential further assessment to determine disposition of trails for appropriate management:*
   - *Maintain as is*
   - *Re-construct in the current, exact location for hydrology*
   - *Construct new segment along the same general route*
   - *Re-route entire trail*
   - *Seasonal closures*
   - *Permanent closures*

28

ADVISORY COMMITTEE PRESENTATIONS

Recreation Use Assessment

29

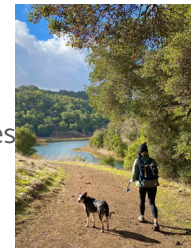


Recreation Use Assessment: Methods*

Desktop Review

1. Note potential safety issues during trail conditions assessment.
2. Review local and regional trends in open space recreational uses.
3. Consider opportunities to improve trail user experiences.

Field Assessment of Environmental Conditions



- 2 WRA staff performed 2 additional days of field assessments

30

Recreational Use Assessment: Findings

- Many trails or trail segments lack adequate signage and wayfinding.
- Some trail segments lack sustainable alignments/construction.
- There are multiple areas where visitor experiences could be enhanced.

31

Recreation Use Assessment: Recommendations

1. Adopt trail construction standards for which existing trails can be assessed and improved.
2. Consider single use and single travel direction trail segments to enhance visitor experiences.
3. Measure recreation use and survey non-visitors to evaluate visitor experiences and management actions.

32

ADVISORY COMMITTEE PRESENTATIONS

Wildfire Hazard Assessment

33

Wildland Fire Assessment: Findings

1. Calfire rates the two open space areas as very high (WDL) and high for SJC
2. Majority of vegetation in WDL and SJC open space areas are ranked low hazard and low ignition potential.
3. Many of the WDL open space lands immediately adjacent to residential areas subjected to recent fuel reduction.

34

Management Alternatives Update

35

Base Plan and Management Alternatives

1. The Base Plan is a set of objectives, policies, and implementation actions.
   a. Added new objectives and policies based on WRA's expertise and experience.
   b. Many of these originated from city planning documents.
2. Objectives and policies from 2035 GP, Park & Recreation, and Conservation Elements are incorporated by reference.
3. One alternative provides an additional recreational policy.
4. One alternative provides additional habitat protection and restoration policies.

36

DRAFT

ADVISORY COMMITTEE PRESENTATIONS

Objectives cover the following categories:

- Environmental Sustainability
- Balanced Recreation Use
- Natural Hazard Mitigation
- Vegetation Protection
- Wildlife Protection
- Water Resources
- Science based Management (Adaptive management)
- Expanded ability (human, financial resources)

37

Base Plan

- Includes 39 new policies.
- Includes 28 implementation actions.
- Representative implementation actions include:
  - *Actively seek additional funding sources to support wildfire hazard mitigation.*
  - *Periodically conduct visitor surveys to gauge experiences for all trail users.*
  - *Monitor and control exotic or nuisance plant species.*

38

Recreation Emphasis Alternative

- Contains 1 additional policy (evaluate new trails)
- Includes 3 additional implementation actions:
  - *Designate existing connection routes or build new trails between open space areas*
  - *Implement single-use and one-way trail segments in areas identified in the Recreation Use Assessment*
  - *Evaluate potential new nature-based recreation programming for open space lands.*

39

Habitat Emphasis Alternative

- Contains 4 additional new policies:
  - *Expand volunteer restoration programs.*
  - *Preserve and enhance native wildlife habitat.*
  - *Preserve and enhance riparian, stream, and other wetland communities.*
  - *Partner with abutting property owners to manage adjacent fuel loads and vegetation.*

40

DRAFT

ADVISORY COMMITTEE PRESENTATIONS

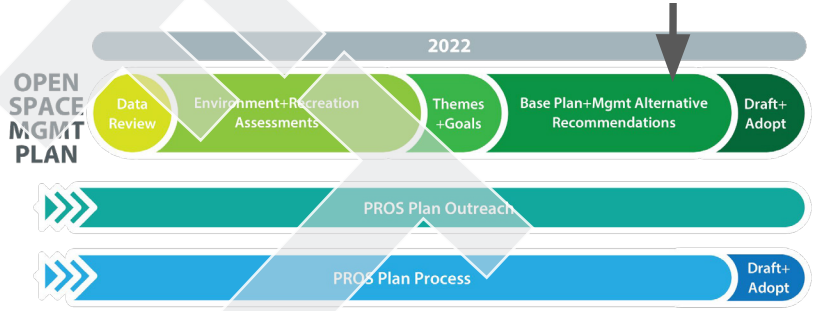
Habitat Emphasis Alternative

- Contains 4 additional implementation actions:
  - *Engage volunteer groups to monitor plant and wildlife species using citizen science efforts.*
  - *Restore and expand native bunchgrass areas.*
  - *Install wildlife cameras at high activity locations or in riparian habitats to monitor wildlife presence.*
  - *Install decontamination stations at high use trailheads to prevent the spread of SOD.*

41

Implementation Requirements and Examples*

Easy	Medium	Hard
These actions can be performed immediately under existing City programs, funding, or with minimal additional effort.	These actions require additional planning, equipment, staffing, funding – either internal or external, or other operational changes.	These actions may require substantial planning, interagency coordination, staffing, funding, or other operational changes.
Provide educational materials on Sudden Oak Death (SOD) and information about how to minimize the spread of SOD at high use trailheads.	Realign, add drainage or otherwise improve trail sections identified in the Recreation Use Assessment as having "high" erosion levels. The Rambler Trail was identified as a top priority given its severity. Prioritize other trail segments for improvement and incorporate into a multi-year workplan.	Periodically inventory trails and facilities to assess any impacts to watercourses, riparian areas, and wetlands, and prepare plans for protection or restoration, as appropriate.



42

Next Steps

1. Review/comment on Environmental Assessment and Recreation Use Assessment.
2. Review/comment on Base Plan.
3. Review/comment on Alternatives.
4. Open House event June 13
   - Hidden Canyon Park, 5-7pm
5. Plan adoption by City Council July 12.

SCHEDULE

Others?

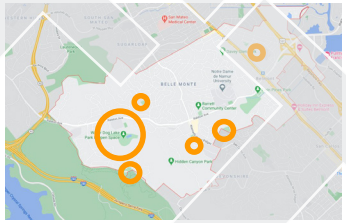
HONOR THE PAST

- 2001 Athletic Field Master Plan
- 2018 ADA Transition Plan
- Parks, Recreation & Open Space element of General Plan
- Twin Pines & Barrett Master Plans & community outreach summaries
- San Juan Hills Area Plan
- Belmont Village Specific Plan
- Climate Action Plan
- Community Center Conceptual Design Report
- Green Infrastructure Design Guide
- 1998 Open Space Trail Master Plan
- 1992 Parks and Open Space Master Plan
- Park Improvement Impact Fee Nexus Study Draft
- Parcel Maps for Water Dog Lake and San Juan Canyon
- Belmont and School Joint Use Agreement
- Western Hills Area Plan
- GIS Maps of Parks



GUIDING PRINCIPLES

- **General Plan**
  - Community character
  - Easy mobility
  - Natural beauty
  - Thriving culture
  - Parks create sense of community and quality of life
  - Harmony with land use policies and the Circulation Element
- **PROS Master Plan RFP**
  - Sustainability
  - Inclusion
  - Environmental stewardship
  - Fire safety
  - Preservation
  - Historical and cultural character
- **Other Objectives**
  - Consider the mature park system, evolving (not growing) demographics and address specific challenges
  - Reimagine the park system with evolving use patterns, emerging trends, embraces technology
  - Focus investment on public / private collaboration, revenue generating operations and maximizing public benefit/ return with a clear action plan

BENCHMARKING

Benchmarking of 3 comparable Cities
- *San Carlos*
- *Foster City*
- *Burlingame*

City Staff Park Usage Study
- ***Open Space*** *– Waterdog*
- ***Community Parks*** *– McDougal Park & Athletic Fields, Belameda Park*
- ***Neighborhood Parks*** *– Cipriani, Alexander Park, Hallmark Park*

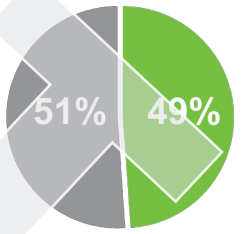
PURPOSE

Set the **framework** for decision makers in the planning, maintenance, development, and/or rehabilitation of Belmont's parks and open space system and related recreational programming for a **15 year horizon.**



MASTER PLAN GOALS & GUIDING PRINCIPLES

- Provide **equitable access** to resources and activities across the entire city
- Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position or physical/cognitive ability
- Offer services and activities across a range of **interests, abilities, and ages**
- Reflect our commitment to **environmental resilience** and sustainability
- Respect the beauty and importance of our **natural resources**
- Advances **community health and well-being**
- Foster a sense of **community** and encourage **social interaction**
- Are **well maintained** and actively managed over time
- Can **adapt** to changing conditions and needs
- Utilize **transparent community process** to inform decisions

9

COMMUNITY INPUTS: **FOCUS GROUPS**

SCHOOL DISTRICT/ YOUTH SPORTS

Incentivize **school field improvements**

Continued **growth in sports field demand**

Interest in synthetic turf

INCLUSIVITY

Inclusive play elements sized larger (not just for small children)

Sensory and tactile play

Protected spaces, but with multiple sightlines and access points

YOUTH

Hang-out space for youth/teens

Add **seating**

Larger-sized play equipment

Community tables

Game areas

SENIORS

More **seating**

More **shade**

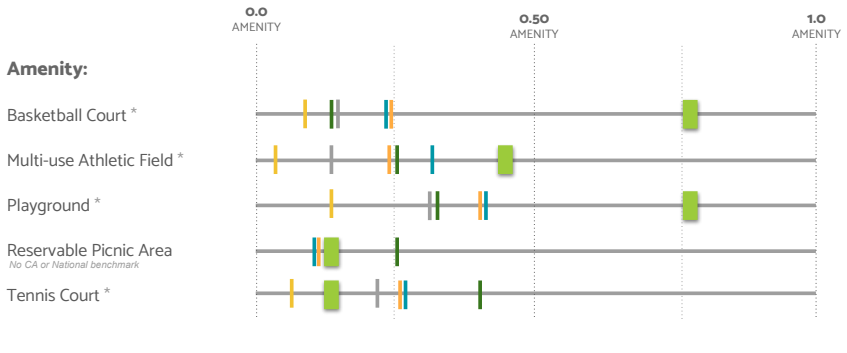
Generally happy with existing parks

DOG OWNERS

More **shade**

More **seating**

More **gathering and social** spaces



More waste bins

Water fountain

10

AMENITIES: **BENCHMARKED**

per **1,000** RESIDENTS

* includes amenities at Belmont's Schools (JUA) sites

11

PARK TYPOLOGIES

Community Park

- Generate the most visitors
- High use intensities
- Accessed by foot, bike, or car
- Large capture area (1/2 mile radius)

STANDARD BASELINE AMENITIES

1. Natural Environment
2. Seating
3. Play Amenity
4. Picnic Opportunity
5. Multi-purpose Flexible Space
6. Recreation Amenity
7. Off-Street Parking
8. Permanent Restroom
9. Multi-use Athletic Field or Community Facility

Neighborhood Park Tier 2

- **Interacting with nature, gathering, and recreation**
- Local and nearby neighborhoods
- Accessed by foot, bike, and car
- Medium capture area (1/4 mile radius)

STANDARD BASELINE AMENITIES

1. Natural Environment
2. Seating
3. Play Amenity
4. Picnic Opportunity
5. Multi-purpose Flexible Space
6. Recreation Amenity

Neighborhood Park Tier 1

- **Interacting with nature or gathering**
- Local neighborhood
- Mainly accessed by foot or by bike
- Small capture area (1/8 mile radius)

STANDARD BASELINE AMENITIES

1. Natural Environment
2. Seating
3. Identifiable Amenity

12

PARKS + RECREATION COMMISSION PRESENTATIONS

PUBLIC RESPONSE: HIDDEN CANYON

VIRTUAL FOCUS GROUP MONDAY 10/18

- **Poor maintenance condition** noted currently, and more of a concern if increased amenities at site
- **Concerned about vehicular access** (traffic volume and speed, parking)
- Many participants voiced support to keep the space **natural and quiet**
- **Phased implementation** supported in order to manage traffic concerns
- **Picnic tables, seating, and child outdoor play amenity** generally supported

22

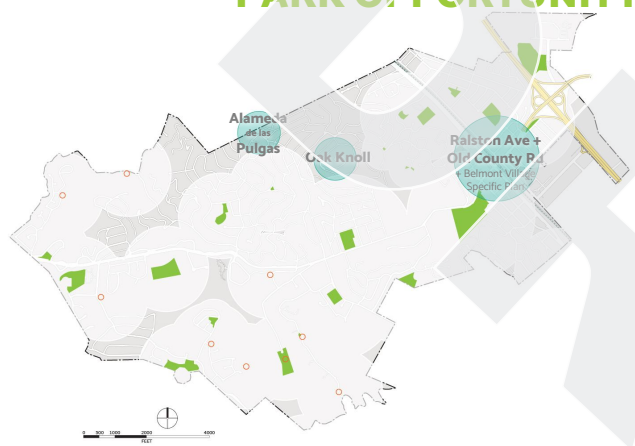
DRAFT **RECOMMENDATIONS:** RALSTON RANCH

UNDEVELOPED PARK

Accessible : Trees : Planting

23

PUBLIC RESPONSE: RALSTON RANCH



VIRTUAL FOCUS GROUP WEDNESDAY 10/20

- **Walking paths and seating** supported by multiple participants
- Neighborhood residents **generally against a dog-oriented amenity**
- Maintain and increase **trees**
- Respect **natural environment** in any proposed changes
- **Traffic, specifically exiting** Ralston Ranch Rd, considered negative to residents
- Child **play element** supported

PUBLIC RESPONSE: RECOMMENDATIONS

PUBLIC COMMENTS RECEIVED OCTOBER 2021

- Multiple comments in support of **Pump Track (Bike Park)** at Belmont Sports Complex (requests to include and exclude bike amenity at Hidden Canyon)
- Positive response to proposed park at **Alameda de las Pulgas** (Opportunity Site)
- Seating and Permanent Restroom for Hidden Canyon, add bike repair station
- Request for more **Youth- and Teen-oriented spaces**
- Splash park (water play) at O'Donnell not encouraged
- Yes to **Bocce ball** (multiple locations)
- Request for **dog-oriented amenities**, limited support for proposed sites
- Maintain **natural environs** on undeveloped parks
- Neighbors support **park creation at summit of Oak Knoll Drive**

PARKS + RECREATION COMMISSION PRESENTATIONS

PARKS, RECREATION AND OPEN SPACE MASTER PLAN

Park and Recreation Commission Meeting
May 4, 2022

PROS Plan purpose:
*Set the **framework for decision makers** in the planning, maintenance, development, and/or rehabilitation of Belmont's Parks and open space system for a **15 year horizon**.*

GATES +ASSOCIATES 1

AGENDA

***Purpose** To discuss the Open Space Management Plan and provide guidance for the future of Belmont's Open Spaces*

Open Space Management Plan

- Overview of planning process and tasks
- Results of the environmental and recreation assessments
- Overview on Management alternatives development

Schedule + Next Steps

2

OPEN SPACE MANAGEMENT PLAN

Today we're talking about these tasks:

1. Review of existing information
2. Develop goals and policies
3. Conduct environmental assessment
4. Conduct recreational assessment
5. Develop Management Alternatives and recommendations

3

WRA Team

WRA Staff	Experience Summary	Role on Belmont OSMP
Leslie Lazaroff	Environmental regulatory compliance for public access/habitat restoration projects for San Francisco Parks and Recreation, San Mateo County Parks and Recreation, and East Bay Regional Parks District.	Principal in charge, regulatory strategy
John Baas, Ph.D.	Open space planning for Midpen, San Mateo, Marin and Sonoma counties, and California Dept. of Water Resources.	Project Manager, recreation ecology, trail conditions assessment, wildfire hazard assessment
Ivy Poisson	Open space planning for Sonoma County Regional Parks, botanical surveys for Midpen.	Plant and vegetation communities evaluation
Brian Kearns, Ph.D.	Specialized expertise in bird surveys, wildlife evaluations for San Mateo County Parks, East Bay Regional Park District, and City of Cupertino Parks & Rec	Wildlife evaluation and trail condition assessment

4

PARKS + RECREATION COMMISSION PRESENTATIONS

WRA Team (continued)

WRA Staff	Experience Summary	Role on Belmont OSMP
Rob Schell	Expertise on biology of the California red-legged frog, California tiger salamander and vernal pool species.	Senior advisor for wildlife evaluations for the environmental assessment
Robin Graham	Protected area planning for GGNRA. Expertise includes impacts from recreation, visitor use assessments, stakeholder engagement, and visitor management.	Trail condition assessment, visitor management, recreation ecology
Jason Mills	Experience with wildfire hazard reduction, and wildfire recovery/revegetation for Sonoma, Sonoma County Agricultural Preservation and Open Space District, and Napa Firewise Council.	Wildfire hazard analysis advice for environmental assessment

5

6

OPEN SPACE MANAGEMENT PLAN

Adoption of the OSMP will enable the city to:

- Augment existing goals and policies pertaining to open space
- Commit to specific "implementation actions"
  - *Actions may require funding, and possible environmental compliance and permitting requirements.*

7

OPEN SPACE MANAGEMENT PLAN

1. **The OSMP is based on:**
   - review of city planning documents
   - review of historical information
   - environmental & recreation assessments
   - community input
2. **A forward looking plan for the next 15 years**

8

PARKS + RECREATION COMMISSION PRESENTATIONS

OPEN SPACE MANAGEMENT PLAN

Key issues addressed:

Environmental Sustainability

Balanced Recreational Uses + Trail Management

Natural Hazard Mitigation

9

Environmental Assessment

- **The environmental assessment is:**
  - Is a master planning level study to support development of goals, policies, and implementation actions.
  - Involves limited fieldwork to identify any environmental concerns that will require detailed field based evaluation.
- **The environmental assessment is not:**
  - A research project
  - A complete vegetation survey of the entire open space areas
  - A series of wildlife surveys to verify the presence of common or sensitive wildlife species.

10

Environmental Assessment

11

Environmental Assessment Components

Desktop Review and Field Assessment of:

1. Common & sensitive plant species
2. Common & sensitive animal species
3. Vegetation communities-naturally occurring and exotic
4. Trail conditions

12

PARKS + RECREATION COMMISSION PRESENTATIONS

Environmental Assessment: Methods

Desktop Review of Environmental Conditions

- CNDDB records
- USFWS Information for Planning and Conservation Species
- CNPS Inventory records
- California Bird Species of Special Concern
- USFWS Critical Habitat Mapper

Field Assessment of Environmental Conditions (WDL and SJC)

1. Verify in the field vegetation communities identified in San Mateo County data (2021)
2. Assess conditions of trails
3. Determine if existing conditions provide suitable habitat for any special-status species
4. Assess baseline conditions of vegetation and wildlife habitat
5. Note any common wildlife and plant species observed

13

Environmental Assessment: Results

Initial Field Assessment of Environmental Conditions

- 2 WRA staff performed field assessments on March 8, 21, and 22
- Traversed over 10 miles of official and unofficial trails

14

Environmental Assessment: Results

1. **Verify in the field vegetation communities at Waterdog Lake**

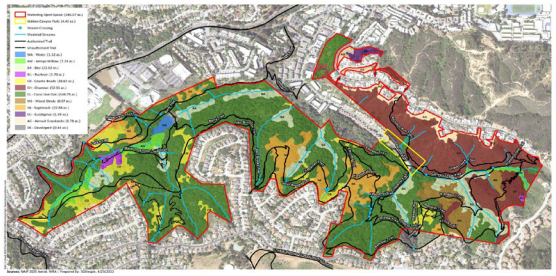

Figure 3. Waterdog Lake & Open Space Land Cover Types

15

Environmental Assessment: Results

1. **Verify in the field vegetation communities San Juan Canyon**

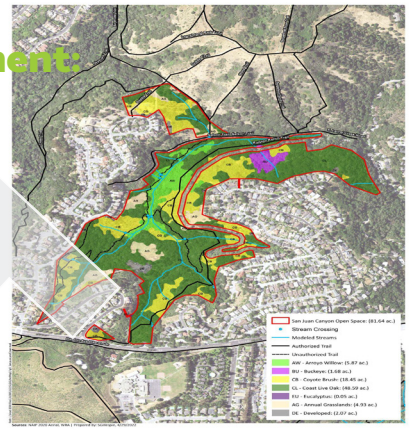

Figure 2. San Juan Canyon Open Space Land Cover Types

PARKS + RECREATION COMMISSION PRESENTATIONS

Environmental Assessment: Methods

2. Assess Trail Conditions:

A. Trail erosion
B. Presence of multiple trails or trail sections in a single area
C. Presence of legacy trails
D. Stream crossings

Low erosion

Medium erosion

High erosion

17

Environmental Assessment: Trail Condition Findings

Level of Erosion	Waterdog Lake	San Juan Canyon	Totals
Low	86 (61%)	5 (42%)	91 (59%)
Medium	39 (28%)	6 (50%)	45 (29%)
High	16 (11%)	1 (8%)	17 (12%)
Total	141 (100%)	12 (100%)	153 (100%)

18

Environmental Assessment: Findings

Sensitive Wildlife with Moderate or higher potential to occur

- Western (Pacific) pond turtle
- Olive-sided flycatcher
- White-tailed kite
- San Francisco (saltmarsh) common yellowthroat
- Hoary bat
- American badger

19

Environmental Assessment: Findings

3. During the March site visits we confirmed presence of these two special-status species

1. Western leatherwood
2. San Francisco Dusky Footed Woodrat

20

PARKS + RECREATION COMMISSION PRESENTATIONS

Environmental Assessment: Findings

4. Assess baseline conditions of vegetation and wildlife habitat.

A. Most vegetation is in good condition.
B. Low potential to occur for many sensitive plant and animal species identified during "desktop" review
C. Recreation use generally not having environmental impacts
   a. *Exception: trails that go directly through stream channels that are not "protected" with erosion stabilization features*
D. Both open space areas have low potential to serve as wildlife migration corridors.

21

Environmental Assessment: Findings

5. Common Wildlife Identified

- California towhee
- Spotted towhee
- Wrentit
- California quail
- Anna's hummingbird
- Common Merganser
- Mallard
- Red-shouldered hawk
- Black-tailed mule deer
- Western fence lizard
- Pond turtle

22

Environmental Assessment: Findings

5. Common Plants Identified

- Bullthistle
- Annual hairgrass
- Sticky monkeyflower
- Yerba santa
- Blue gum eucalyptus
- Fennel
- French broom
- Toyon
- Foxtail barley
- Goldfields
- Arroyo lupine
- Pineapple weed
- Bur clover
- Gold back fern
- Harding grass
- Western choke cherry
- Coast live oak
- California blackberry
- Common snowberry

23

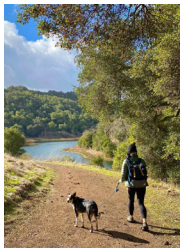
Environmental Assessment: Trail Critical and Possible Recommendations

1. Critical: Address severe erosion areas
2. Critical: Protect stream crossings or reroute
3. *Consider potential further assessment to determine disposition of trails for appropriate management:*
   - *Maintain as is*
   - *Re-construct in the current, exact location for hydrology*
   - *Construct new segment along the same general route*
   - *Re-route entire trail*
   - *Seasonal closures*
   - *Permanent closures*

24

PARKS + RECREATION COMMISSION PRESENTATIONS

Recreation Use Assessment

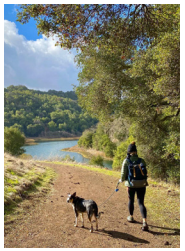


25

Recreational Use Assessment: Methods

Desktop Review

1. Note potential safety issues during trail conditions assessment.
2. Review local and regional trends in open space recreational uses.
3. Consider opportunities to improve trail user experiences.



Field Assessment of Environmental Conditions

- 2 WRA staff performed 2 additional days of field assessments focused on trail mapping

26

Recreational Use Assessment: Findings

- Many trails or trail segments lack adequate signage and wayfinding.
- There are multiple parallel, braided trails.
- There are multiple areas where visitor experiences could be enhanced.

27

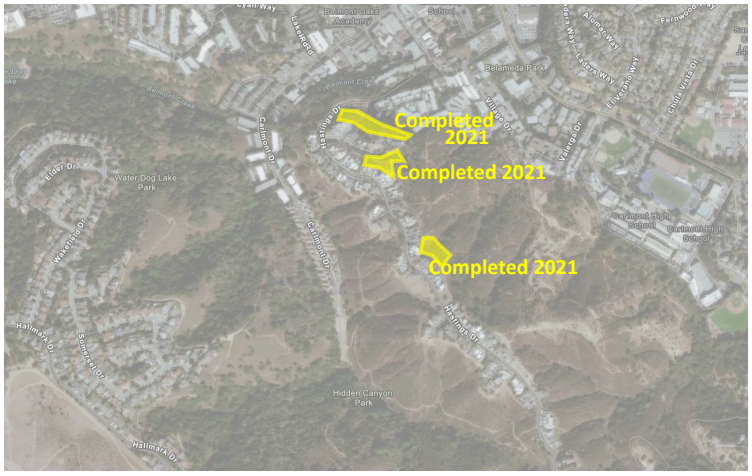
Recreational Use Assessment: Recommendations

1. Adding calming features to reduce speed, and landings for respite
2. Consider separate, new single use trails to enhance visitor experiences
3. For parallel, braided trails, designate as single use, one-way use or close if unnecessary

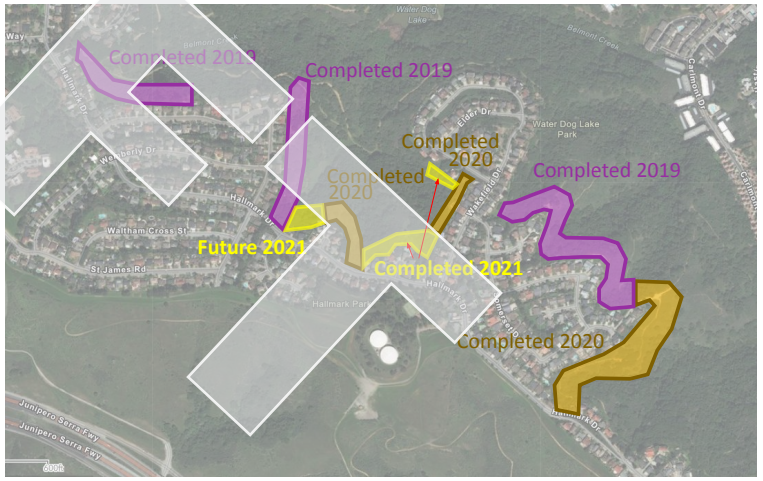
28

PARKS + RECREATION COMMISSION PRESENTATIONS

Wildfire Hazard Assessment



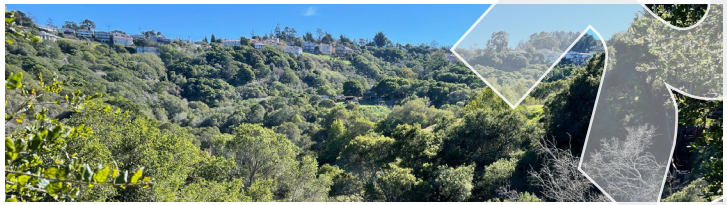
29



Wildland Fire Assessment: Methods

1. Desktop review of aerial photography
2. Observe fuel conditions from trails
3. Review city's recent fuel treatment activity
4. Evaluate wildfire hazards and ignition potential based on vegetation types mapped and observed

30



PARKS + RECREATION COMMISSION PRESENTATIONS

Wildland Fire Assessment: Findings

1. Calfire rates the two open space areas as very high (WDL) and high for SJC
2. Majority of vegetation in WDL and SJC open space areas are ranked low hazard and low ignition potential.
3. Many of the WDL open space lands immediately adjacent to residential areas subjected to recent fuel reduction.

33

Wildland Fire Assessment: Recommendations

1. Consider developing an annual fuel treatment plan
2. Continue maintaining treatment areas
3. Conduct a field based evaluation of conditions in SJC open space for possible treatments

34

Management Alternatives Update

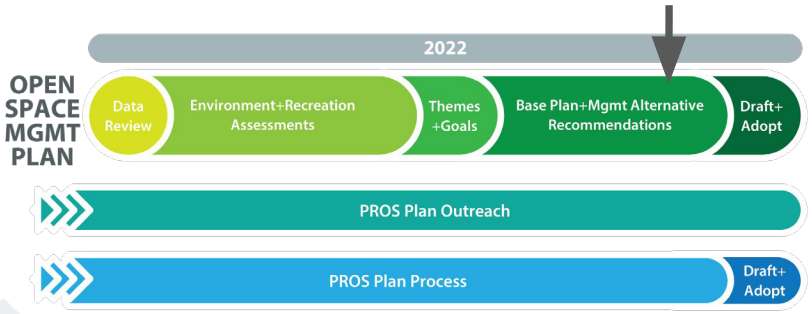
35

Task 6: Management Alternatives

1. The "Base" Plan is a set of goals, policies, and implementation actions.
   a. Added new policies and goals based on WRA's expertise and experience.
   b. Many of these originated from city planning documents.
2. One alternative provides additional recreational policies (e.g. e-bikes)
3. One alternative provides additional habitat protection and restoration policies.

36

PARKS + RECREATION COMMISSION PRESENTATIONS



Next Steps

1. Publish Draft Environmental Use Assessment.
2. Publish Draft Recreation Use Assessment.
3. Publish Draft Management Alternatives.
4. Prepare Draft Open Space Management Plan.
5. Solicit Public Feedback.
6. Plan adoption.

37

SCHEDULE

Continuing Community Input Opportunities

- Email to info@belmontprosplan.com
- May 31st PROS Advisory Committee
- OSMP Event planned for mid-June

PARKS + RECREATION COMMISSION PRESENTATIONS

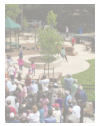
PARKS, RECREATION AND OPEN SPACE MASTER PLAN



Parks & Recreation Commission
July 6, 2022

PROS Plan purpose:
*Set the **framework for decision makers** in the planning, maintenance, development, and/or rehabilitation of Belmont's Parks and open space system for a **15 year horizon**.*

GATES +ASSOCIATES

1

AGENDA

Purpose *To review and recommend the PROS Plan to the City Council*

PROS Plan

- Process
- Vision
- Recommendations
- Open Space Management Plan
- Implementation Strategy

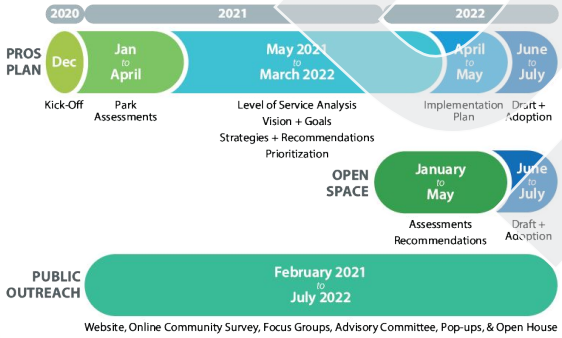
2

BelmontPROSplan.com

Info@belmontprosplan.com

3

Process: GUIDING PRINCIPLES



1. Provide **equitable access** to resources and activities across the entire city
2. Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position, or physical/cognitive ability
3. Make all users feel **welcome and safe**
4. Offer services and activities across a **range of interests, abilities, and ages**
5. Reflect our commitment to **environmental resilience and sustainability**
6. Respect the beauty and importance of our **natural resources**
7. Advance community **health and well-being**
8. Foster a sense of community and encourage **social interaction**
9. Provide **well maintained** and actively managed facilities
10. **Adapt** to changing conditions and needs
11. Utilize **transparent community process** to inform decisions

Open Space Open House

Process: AN ENGAGED COMMUNITY

How the COMMUNITY informed and influenced the PROS Plan
(a sample)

1. Open Space Management Plan
   a. WRA Environmental Consultants
   b. PROS Plan schedule extended
2. Proposed uses at undeveloped parks
   a. Hidden Canyon Park + Ralston Ranch Park
3. Opportunity Site: Oak Knoll Drive
4. Additional Advisory Committee meeting

PROS PLAN VISION

Re-imagine the Belmont Parks, Recreation, and Open Space (PROS)system to **create the City's Backyard** that fosters **inclusive, experiential, and nurturing public spaces** by setting the framework for decision makers in the planning, maintenance, development, and/or rehabilitation, implementable over a **15 year horizon**.

PARKS + RECREATION COMMISSION PRESENTATIONS

Vision: COMMUNITY THEMES

- Amenities for Social + Physical Activity
- Create More with Less
- More Seating Opportunities
- Connecting with Nature
- Physical Connections
- Available for Many Uses + Users
- Amenities for Diverse Interests
- Natural Resources
- Accessible for All Abilities
- Honor Belmont's Unique Landscape

9

Vision: BIG IDEAS + GOALS

- The City as Your Backyard
- Outdoor Recreation for All
- Celebrate the Outdoors
- Prioritize Environmental + Financial Sustainability

10

The Ideas: BIG IDEAS + GOALS

The City as Your Backyard

Goal 1. Support a **connected Belmont** by encouraging a **robust pedestrian, bicycle, and public transit network** unifying PROS sites across the City.

Goal 2. Foster a **healthy community** through spaces, amenities, programs, and public art to encourage **physical activity**, **social interaction**, and highlight Belmont's **culture and history**.

Goal 3. Expand and enhance the existing PROS system to **meet evolving community needs** by establishing **new uses**, **improved spaces**, and recreation amenities that **highlight the natural environment**.

11

Vision: BIG IDEAS + GOALS

Outdoor Recreation for All

Goal 4. Leverage assets of the PROS system to **support community health** providing **diverse**, **equitable**, and **inclusive** spaces and amenities with **accessible routes**.

Goal 5. Revitalize the PROS system to be **adaptable**, **flexible**, and supportive of **many uses and users** now and into the future.

Goal 6. **Partner** with a variety of agencies, departments, volunteer groups, other entities, and the community to **actualize PROS Plan goals** and policies.

12

PARKS + RECREATION COMMISSION PRESENTATIONS

Vision: BIG IDEAS + GOALS

Celebrate the Outdoors

Goal 7. Develop and implement an **Open Space Management Plan**.

Goal 8. **Expand educational opportunities** in parks and open spaces to highlight the local ecosystems.

Goal 9. Continue to **enrich Belmont's outdoor recreation opportunities** with trail improvements, volunteer collaborations, and wayfinding features.

13

Vision: BIG IDEAS + GOALS

Prioritize Environmental + Financial Sustainability

Goal 10. Nurture the **ecological strength** of the City's natural resources through **resource-efficient landscapes** and operations.

Goal 11. Provide **high-quality**, **actively-managed**, and **well-maintained** PROS assets supported by a range of funding sources.

Goal 12. Prioritize **sustainable**, **resilient**, and **responsible management and maintenance** practices, improvements, and projects at PROS sites.

14

Vision: CITY-WIDE PARK ACCESS

- **Interconnected Park System**
  - Amenities distributed across the system
- **Prioritize pedestrian and bicycle access to green spaces**
  - Identify areas with low access
  - Promote ped and bike infrastructure to reduce areas with low access
  - Investigate new park opportunity sites in areas with low access

15

Recommendations: SYSTEM-WIDE STRATEGIES

74
Strategies

- Broad recommendations to impact the entire PROS system
- Organized under the Big Ideas and Goals
- Furthered by:
  - Strategic actions
  - Park-specific recommendations
  - Open Space Management Plan

16

PARKS + RECREATION COMMISSION PRESENTATIONS

Recommendations: STRATEGIC ACTIONS

- Inclusive + All-Abilities Play

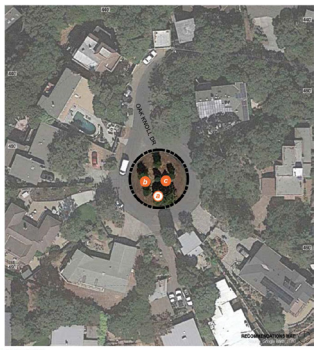
- Social Gathering Space

- "Pop-up" Park Installations

- PROS Activation Plan
- Usage Study

17

RECOMMENDATIONS SPECTRUM



INCREASING MAGNITUDE OF RECOMMENDATIONS

Magnitude	EXISTING MASTER PLAN	MINOR IMPROVEMENT	UPGRADED OR NEW AMENITY	PARK REDESIGN	UNDEVELOPED PARKS	NEW PARK OPPORTUNITY
Existing Condition	Master Plans recently adopted Created with extensive community input	Parks recently developed or in Very Good condition	Current park functioning well	Rethink accessibility and park layout No change-in-use	Existing park is undeveloped	Add Parkland To fill gaps in park access City-owned property
Recommendation	Implement Existing Master Plan	Minor improvements identified to maintain high-quality	Upgrade existing amenity or new amenity to meet identified needs or gaps	Undertake Park Master Plan	Develop and amenitize site	Create, develop, and amenitize site

18

Recommendations: NEW PARK OPPORTUNITY

OAK KNOLL DRIVE

Community Feedback: Identified as an Opportunity Site via neighbor's input, strong community support for new park

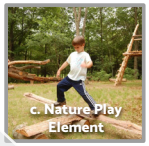
b. Benches

c. Play Element

"Safety Circle" Signage

Accessible : Planting

19



Recommendations: UNDEVELOPED PARK

HIDDEN CANYON PARK

Community Feedback: Community revised Option A
Nature-oriented, phase improvements per community request

b. Seating Opportunities

c. Nature Play Element

d. Picnic Area

e. Outdoor Classroom

3. Restroom

4. Open Space Gateway

1. ADA Parking : 2. Parking : Accessible : Seating : Planting : Shade

20

PARKS + RECREATION COMMISSION PRESENTATIONS

Recommendations: EXISTING PARK MASTER PLAN

TWIN PINES PARK

21

OPEN SPACE MANAGEMENT PLAN

The Open Space Management Plan identifies objectives, policies, and implementation actions for:

1. Environmental sustainability
2. Balanced recreation use
3. Natural hazard mitigation
4. Vegetation protection
5. Wildlife protection
6. Water resources
7. Science based management
8. Expanded implementation resources

22

OPEN SPACE MANAGEMENT PLAN

23

OPEN SPACE MANAGEMENT PLAN

Plan consists of:

1. Environmental Assessment
2. Recreational Use Assessment
3. Base Plan
4. Management Alternatives

Methods included:

- Desktop research
- Site visits
- Community and stakeholder input

24

PARKS + RECREATION COMMISSION PRESENTATIONS

FINDINGS

Key Findings from Environmental Assessment, Recreation Use Assessment

1. **Over 90 percent of the open space lands consist of native biological communities.**
2. 11 special-status plant species and 7 special-status wildlife species have moderate/high potential to occur or are present.
3. Non-native species generally limited.
4. **Trails represent about 1.3 percent of open space lands.**
5. Approximately 50 stream crossings identified.
6. **Less than 10% of trail erosion ratings were considered "high."**
7. Rates of participation in nature-based recreation are increasing.

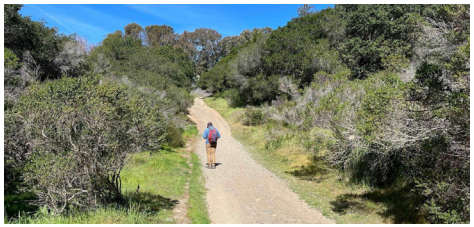
25

FINDINGS

Key Findings Wildfire Hazard Assessment

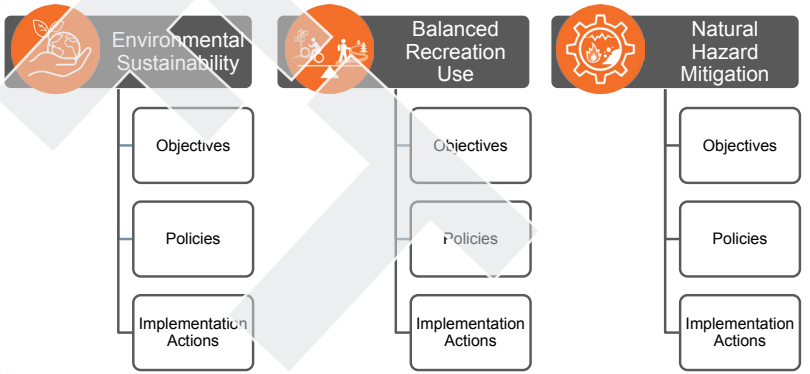
Steep topography, weather, and the potential to damage human life and structures

- Very high wildfire hazards for WDL
- High wildfire hazards for SJC



26

FINDINGS



Key Takeaways

1. Overall habitat quality is high.
2. Existing nature-based recreational uses can continue on existing mapped and established, previously unmapped trails.
3. Continue wildfire fuel reduction efforts.

27

OPEN SPACE THEMES

28

DRAFT

PARKS + RECREATION COMMISSION PRESENTATIONS

BASE PLAN + MGMT ALTERNATIVES

Base Plan

Comprehensive set of objectives, policies and implementation actions designed to:

- Protect sensitive resources
- Guide trail management and manage recreation
- Mitigate the risk of natural hazards

Recreation Emphasis Alternative

Additional policy and implementation actions related trails and recreational use

Habitat Emphasis Alternative

Additional policies and implementation actions related to vegetation restoration and wildlife protection

29

Mgmt Alt: COMMUNITY PREFERENCE

Management Alternatives	% of Vote
Base Plan (alone)	6%
Base Plan + Recreation Emphasis	37%
Base Plan + Habitat Emphasis	17%
Base Plan + Recreation Emphasis + Habitat Emphasis	40%

Advisory Committee #5 (5/31/22).
Poll question: Which Management Alternatives do you support?
35 responses (8 AC members + 27 participants)

30

IMPLEMENTATION ACTIONS

Recommendations based on:

- PROS Plan Big Ideas + Goals,
- Findings from WRA assessments,
- Public feedback
- Clear next steps for the City

31

IMPLEMENTATION ACTIONS

An implementation action is a discrete, measurable action that achieves a desired outcome.

Environmental Sustainability

Ex. Improve stream crossings

Balanced Recreation Use

Ex. Monitor visitor use levels

Natural Hazard Mitigation

Ex. Using grazing reduce wildfire fuels

32

PARKS + RECREATION COMMISSION PRESENTATIONS

IMPLEMENTATION ACTIONS

Implementation Action Ratings

Easy	Medium	Hard
These actions can be performed immediately under existing City programs, funding, or with minimal additional effort.	These actions require additional planning, equipment, staffing, funding – either internal or external, or other operational changes.	These actions may require substantial planning, interagency coordination, staffing, funding, or other operational changes.

33

PRIORITY RECOMMENDATIONS

- Improve stream crossings (Hard)
- Fuels reduction plan (Medium)
- Monitor recreation use (Hard)
- Seasonal/weather dependent restrictions on maintenance (Easy)

34

FURTHER RECOMMENDATIONS

- Develop recreation and volunteer restoration programs
- Examine portfolio of solutions for multi-use trail experiences

35

IMPLEMENTATION

- **PRIORITIZATION MATRIX**
  To prioritize park-specific recommendations
- **FUNDING STRATEGIES + PARTNERSHIPS**
  Portfolio of funding for capital improvements, maintenance, and operations
- **ACTION PLAN**
  for short term, long term, or ongoing

36

DRAFT

PARKS + RECREATION COMMISSION PRESENTATIONS

PRIORITIZATION MATRIX

- To further **PROS Plan goals**
  - 12 goals
- To respond to **community priority**
  - N/A, Medium, High
- To serve an **existing deficiency**
  - Demographic group, Underserved area of Belmont, Anticipated Areas of Increased Residential Density, New use, Availability of amenity/use, Resolve access issues
- To address an **existing condition**
  - N/A, Good, Fair, Poor, Critical or unsafe

PARK SITE PRIORITIZATION RANKINGS *

SITE (PARK + JUA)	AVG POINTS[1]	SITE RANK
Opportunity: Ralston + Old County	21.9	1
Opportunity: Oak Knoll Dr	18.8	2
Ralston Ranch	13.0	3
Opportunity: Alameda de las Pulgas	17.4	4
Alexander	14.5	5
O'Donnell	12.2	6
Hidden Canyon	12.0	7
Belamela	11.5	8
Twin Pines	11.1	9
Barrett Community Center, McDougal	10.3	10
Cipriani, Hallmark, Wakefield	10.4	11
Hastings Tot Lot	10.2	12
Patricia Wharton, JUA: Central	10.0	13
College View	9.9	14
Belmont Sports Complex	9.4	15
JUA: Fox, JUA: Nesbit, JUA: Ralston	9.0	16
Davey Glen	8.0	17
Semeria	7.8	18

** Open Space Sites not included in rankings*
1 Avg Points calculated by dividing the total points for all recommendations at a site by number of recommendations for the site
2 Improvements at this Opportunity site would be temporary due to expected development of the property

PARKS + RECREATION COMMISSION PRESENTATIONS

PARKS, RECREATION, AND OPEN SPACE (PROS) MASTER PLAN

Parks & Recreation Commission
January 10, 2024

PROS PLAN VISION
Re-imagine the Belmont PROS system to create the City's Backyard that fosters inclusive, experiential, and nurturing public spaces by **setting the framework for decision makers** in planning, maintenance, development, and/or rehabilitation, implementable over a **15 year horizon**.

GATES +ASSOCIATES 1

AGENDA

Meeting Purpose: Receive update on the Parks, Recreation, and Open Space Master Plan (PROS Plan).

MEETING TOPICS:

1. Framework + Approach of PROS Plan
2. Document Organization and Components
3. PROS Strategies + Recommendations
4. Recap + Next Steps

2

INTRODUCTION

PROS PLAN PURPOSE:

- Study the existing PROS system: parks (developed and undeveloped), joint-use schools, and open spaces
- Present system-wide and park-specific prioritized recommendations
- Identify opportunities to increase parkland
- Develop a decision-making framework and implementation strategy

3

GUIDING **PRINCIPLES**

1. Provide **equitable access** to resources and activities across the entire city
2. Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position, or physical/cognitive ability
3. Make all users feel **welcome and safe**
4. Offer services and activities across a **range of interests, abilities, and ages**
5. Reflect our commitment to **environmental resilience and sustainability**
6. Respect the beauty and importance of our **natural resources**
7. Advance community **health and well-being**
8. Foster a sense of community and encourage **social interaction**
9. Provide **well maintained** and actively managed facilities
10. **Adapt** to changing conditions and needs
11. Utilize **transparent community process** to inform decisions

PARKS + RECREATION COMMISSION PRESENTATIONS

ENVISIONING CITY-WIDE PARK ACCESS

Interconnected Park System

- Ensure amenities are well distributed across the PROS system

Prioritize Access to Green Spaces

- Identify areas with low access
- Align with ongoing efforts to promote pedestrian + bicycle infrastructure
- Investigate new park opportunity sites

STRATEGIES

74
Strategies

- **Broad strategies to impact the entire PROS system**
- **Organized under the Big Ideas and Goals**
- **Furthered by:**
  - System-wide Recommendations
  - Park-specific Recommendations
  - Open Space Recommendations

SYSTEM-WIDE RECOMMENDATIONS

Inclusive + All-Abilities Play

Social Gathering Space

"Pop-up" Park Installations

Interconnect Toolkit

PROS Activation Plan

Usage Study

PARK-SPECIFIC RECOMMENDATIONS

1. Neighborhood Parks (Tier 1 and Tier 2)
2. Community Parks
3. Undeveloped Parks
4. Schools with Joint-Use Agreements
5. Opportunity Sites
6. Open Space

Recommendation magnitude is evaluated + contextualized by category:

- Implement existing master plan
- Minor improvement
- Upgraded or new amenity
- Park redesign
- Undeveloped park

TWIN PINES PARK

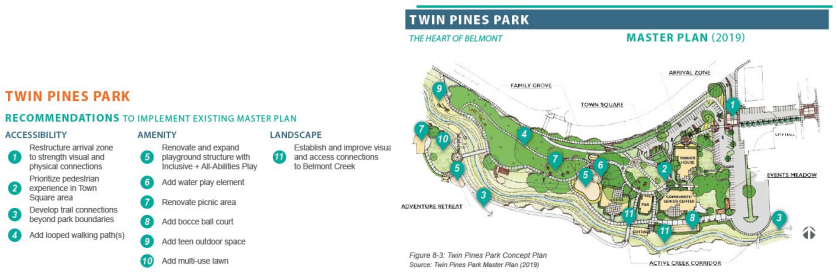

Figure 8-3: Twin Pines Park Concept Plan
Source: Twin Pines Park Master Plan (2019)

OSMP **PURPOSE**

The Open Space Management Plan (OSMP) used a science-based technical approach to provide a comprehensive set of **objectives, policies, and recommended actions** designed to protect sensitive resources, guide trail and recreation management, and mitigate the risk of natural hazards.

- Site visits, mapping inventories, community input, City and County plans, relevant databases, peer-reviewed literature, an **Environmental Assessment**, and a **Recreational Use Assessment** informed three overarching themes:

Environmental Sustainability

Balanced Recreation Use

Natural Hazard Mitigation

Assessments evaluated the environmental conditions and risks to **trails, streams, habitat, vegetation** as well as the **impacts of current recreational use** on sensitive resources.

PARKS + RECREATION COMMISSION PRESENTATIONS

OSMP **FINDINGS**

Key Takeaways

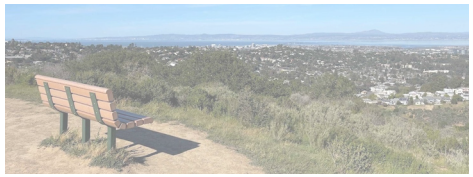
1. Overall habitat quality is high.
2. Existing nature-based recreational uses can continue on established mapped and unmapped trails.
3. **Continue wildfire fuel reduction efforts.**

Priority - Tier 1 Recommendations

- Improve stream crossings (Hard)
- Seasonal/weather dependent restrictions on maintenance (Easy)
- Fuels reduction plan (Medium)
- Monitor recreation use (Hard)

Priority - Tier 2 Recommendations

- Nature-based recreation programs (Medium)
- Volunteer restoration programs (Easy)
- Trail calming features (Hard)



Easy	Medium	Hard
These actions can be performed immediately under **existing** City programs, funding, or with minimal additional effort.	These actions require **additional** planning, equipment, staffing, funding – either internal or external, or other operational changes.	These actions may require **substantial** planning, interagency coordination, staffing, funding, or other operational changes.

17

OSMP **RECOMMENDED STUDIES**

The OSMP recommends **further studies** to guide open space improvements:

- Annual Fuel Reduction Plan
- Annual Trail Inventories
- Annual Recreation Usage Observation Studies
- Trail Design Guidelines *(Specific to Belmont, or adopt an existing set from the State or other reputable source that includes ADA standards)*
- Engineering Studies for Stream Crossing Projects

18

IMPLEMENTATION

PRIORITIZATION MATRIX

To prioritize park-specific recommendations based on its ability to..

- Further the 12 **PROS Plan Goals**
- Respond to **community priority**
- Serve an **existing deficiency**
- Address an **existing condition**

FUNDING STRATEGIES + PARTNERSHIPS

Portfolio of funding for capital improvements, maintenance, and operations

ACTION PLAN

Short term, long term, or ongoing

PARK SITE PRIORITIZATION RANKINGS *

SITE (PARK + JUA)	AVG POINTS[1]	SITE RANK
Opportunity: Ralston + Old County[2]	21.9	1
Opportunity: Oak Knoll Dr	18.8	2
Ralston Ranch	18.0	3
Opportunity: Alameda de las Pulgas	17.4	4
Alexander	14.5	5
O'Donnell	12.2	6
Hidden Canyon	12.0	7
Belameda	11.5	8
Twin Pines	11.4	9
Barrett Community Center, McDougal	10.9	10
Cipriani, Hallmark, Wakefield	10.4	11
Hastings Tot Lot	10.2	12
Patricia Wharton, JUA: Central	10.0	13
College View	9.9	14
Belmont Sports Complex	9.4	15
JUA: Fox, JUA: Nesbit, JUA: Ralston	9.0	16
Davey Glen	8.0	17
Semeria	7.8	18

** Open Space Sites not included in rankings*

1 Avg Points calculated by dividing the total points for all recommendations at a site by number of recommendations for the site

2 Improvements at this Opportunity site would be temporary due to expected development of the property

19

RECAP: **REVISIONS**

The PROS Plan was **recommended by the Parks and Recreation Commission** on July 6, 2022 to the City Council for **approval with the following amendments, now complete**:

1. **Consolidate the OSMP's Base Plan and Management Alternatives objectives, policies, and implementation actions into a single plan.**
2. Clearly present **priority recommendations in the OSMP by theme - environmental sustainability, balanced recreation uses and trail management, and natural hazard mitigation.**
3. Pursue the creation of **dedicated parkland in downtown Belmont** and the Belmont Village Specific Plan area in response to potential residential density increase in the area due to anticipated housing unit development as outlined in the 2023-2031 Housing Element update.
4. Apply consistent terminology to remove ambiguity.
5. Refine specific graphics for clarity.

20

PARKS + RECREATION COMMISSION PRESENTATIONS

RECAP: CEQA

Pursuant to the California Environmental Quality Act (CEQA), an **Addendum to the General Plan Environmental Impact Report (EIR)** was prepared by WRA.

1. **Required Approvals, Agreements, and Permits** *(expected - not an exhaustive list)*
   a. Adoption of the PROS Plan (City)
   b. Grading Permit (City)
   c. Trail Stream Crossing Improvement Permits
      i. Lake and Streambed Alteration Agreement (CA Department of Fish and Wildlife)
      ii. Clean Water Act Section 404 Permit (US Army Corps of Engineers)
      iii. 401 Water Quality Certification (CA Regional Water Quality Control Board)
2. **Addendum Analysis + Findings**
   a. The Proposed Project would not result in new or substantially increased significant environmental impacts that were not previously disclosed in the 2017 EIR certified by the City.
3. **Technical Studies**
   a. The Environmental Assessment is included in the OSMP. No further technical studies were required.

21

NEXT STEPS

1. Post documents on project website for community review.
2. Present at February Commission meeting.
3. Present to Council following Commission recommendation.

22

www.BelmontPROSplan.com Info@BelmontPROSplan.com

23

RECAP: OSMP

Base Plan: Initial Policies and Recommendations

ADD ONS
- **+Recreation Emphasis Alternative**
  Additional policies and actions related trails and recreational use
- **+Habitat Emphasis Alternative**
  Additional policies and actions related to vegetation restoration and wildlife protection

The Base Plan and Alternatives were combined into ONE Management Plan based on feedback

May 31, 2022 (Advisory Committee #5) *35 responses (8 AC members + 27 participants)*

Poll: Which Management Alternatives do you support?	% of Vote
Base Plan (alone)	6%
Base Plan + Recreation Emphasis	37%
Base Plan + Habitat Emphasis	17%
Base Plan + Recreation Emphasis + Habitat Emphasis (combined)	40%

PARKS + RECREATION COMMISSION PRESENTATIONS

EXAMPLE: MINOR IMPROVEMENTS

WAKEFIELD PARK

EXAMPLE: UPGRADED OR NEW AMENITY

O'DONNELL PARK

OSMP PURPOSE

OSMP: A SET OF OBJECTIVES, POLICIES, AND PRIORITIES BASED ON...

- **Environmental Assessment**: trails, stream crossings, habitat, vegetation
- **Recreational Use Assessment**: impact of recreation on sensitive resources
- Site visits + data collected in the field
- Relevant databases + peer-reviewed literature
- Community input
- Regional best practices, guidelines + regulations

Environmental Sustainability

Balanced Recreation Use

Natural Hazard Mitigation

15

OSMP FINDINGS

KEY TAKEAWAYS

1. Overall habitat quality is high
2. Existing nature-based recreational use can continue on established mapped + unmapped trails
3. Continue wildfire fuel reduction efforts

PRIORITIES

TIER 1

- Improve stream crossings (H)
- Seasonal/weather-dependent restrictions on maintenance (E)
- Fuels reduction plan (M)
- Monitor recreation use (H)

TIER 2

- Improve stream crossings (H)
- Nature-based recreation programs (M)
- Volunteer restoration programs (E)
- Trail calming features (H)

Easy

These actions can be performed immediately under **existing** City programs, funding, or with minimal additional effort.

Medium

These actions require **additional** planning, equipment, staffing, funding – either internal or external, or other operational changes.

Hard

These actions may require **substantial** planning, interagency coordination, staffing, funding, or other operational changes.

16

PARKS + RECREATION COMMISSION PRESENTATIONS

FURTHER **STUDIES**

NEXT STEPS

- Utilize the methodology presented in the OSMP for ongoing observation + monitoring
- Develop an annual Fuel Reduction Plan
- Conduct engineering studies for future stream crossing projects
- Adopt trail design guidelines

(specific to Belmont OR adopt an existing set from the State or other reputable source)

IMPLEMENTATION

PRIORITIZATION: BASED ON THE ABILITY OF A RECOMMENDATION TO...

- Further the PROS goals
- Respond to community priorities
- Resolve an existing deficiency
- Address an existing condition

FUNDING + PARTNERSHIPS: OPPORTUNITIES TO COLLABORATE ON...

- Capital improvements
- Maintenance + operations

ACTION PLAN: IMPORTANT TARGETS IN THREE TIME FRAMES...

- Short term > Long term > Ongoing

RECENT **REVISIONS**

THE PROS PLAN WAS **RECOMMENDED** BY THE PARKS AND RECREATION COMMISSION ON JULY 6, 2022 TO CITY COUNCIL FOR APPROVAL **WITH THE FOLLOWING AMENDMENTS**...

1. Consolidate the OSMP's Base Plan and Management Alternatives objectives, policies, and implementation actions into a single plan.
2. Clearly present priority recommendations in the OSMP by theme - environmental sustainability, balanced recreation uses and trail management, and natural hazard mitigation.
3. Pursue the creation of dedicated parkland in downtown Belmont and the Belmont Village Specific Plan area in response to potential residential density increase in the area due to anticipated housing unit development as outlined in the 2023-2031 Housing Element update.
4. Apply consistent terminology to remove ambiguity.
5. Refine specific graphics for clarity.

2024 COMMISSIONER COMMENTS

REVISION **SUMMARY**

LAYOUT/FORMATTING/GRAPHICS

1. Color-coding/revising graphics, tables, images, figures + captions for consistency
2. Section/chapter headers renamed/reorganized for clarity/flow/readability
3. Information presented visually where needed

CONTENT/TEXT

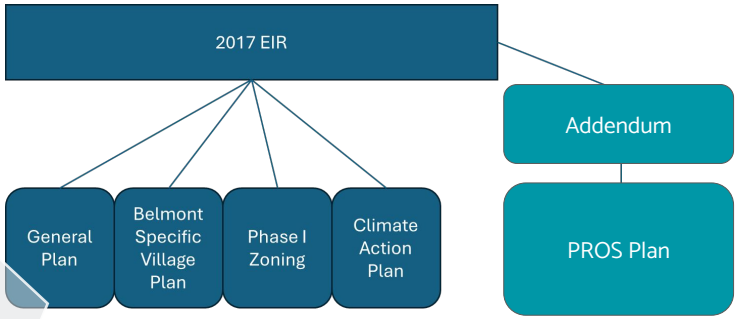
1. Terms clearly defined + used consistently
2. Text became more concise while preserving content/details
3. Concepts/topics elaborated/reworded/explained further where needed
4. Reflects latest information available + recent meetings/outreach statistics

NOT CHANGED: THE PRIMARY TAKEAWAYS OF THE DOCUMENT...

- Inventory + needs assessment results
- Recommendations + opportunity sites
- Prioritization matrix + action plan

PARKS + RECREATION COMMISSION PRESENTATIONS

CEQA **UPDATE**



CEQA PATHWAY

- The PROS Plan was reviewed according to California Environmental Quality Act (CEQA)
- Policies and actions in the PROS Plan (including OSMP) were largely already addressed in the General Plan
- To retain consistency and reduce redundancy, **an addendum to the 2017 EIR** was prepared
- The addendum and the 2017 EIR are programmatic – ***they address potential impacts that may result from the implementation of policies and actions***

Addenda are used to make changes or additions to prior EIRs or NDs without major changes to the
- Project,
- Circumstances,
- Information.

21

CEQA **UPDATE**

22

CEQA **UPDATE**

EIR ADDENDUM

- The addendum analyzed the potential impacts from the PROS Plan as they relate to the impact discussed in the 2017 EIR

FINDINGS

- Limited new impacts were less than significant
- No new significant impacts that had not already been discussed - no additional review is needed
- All mitigation measures will apply

The addendum will accompany the PROS Plan to City Council for approval

23

NEXT **STEPS**

1. **PRESENT TO CITY COUNCIL FOLLOWING COMMISSION RECOMMENDATION**
2. **AS SPECIFIC PROJECTS EMERGE, INITIATE COMMUNITY ENGAGEMENT**
3. **PERIODICALLY REVISIT THE PROS PLAN AS RESOURCES BECOME AVAILABLE + PRIORITIES CHANGE**

24

DRAFT

PLANNING COMMISSION PRESENTATIONS

PARKS, RECREATION AND OPEN SPACE MASTER PLAN

Presentation to Belmont Planning Commission
April 6, 2021

AGENDA

Purpose: Present the City of Belmont's Parks, Recreation and Open Space (PROS) Master Plan Project

- The Team
- Project Overview
- Outreach Strategy
- Efforts to Date
- Next Steps

The Team

Consultant: **Gates + Associates**

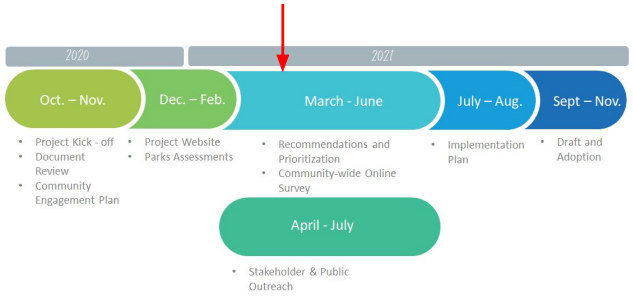
City Staff: **Belmont Parks & Recreation Department**

Advisory Committee: **Representatives of Belmont's neighborhoods, demographics, and interests**

PURPOSE

Set the **framework** for decision makers in the planning, maintenance, development, and/or rehabilitation of Belmont's parks and open space system and related recreational programming for a **15 year horizon.**

DRAFT



PLANNING COMMISSION PRESENTATIONS

GOALS & GUIDING PRINCIPLES

Develop a Master Plan that:

- Provide **equitable access** to resources and activities across the entire city
- Promote **inclusion** to people of all backgrounds, regardless of race, gender, sexual orientation, socioeconomic position or physical/cognitive ability
- Offer services and activities across a range of **interests, abilities, and ages**
- Reflect our commitment to **environmental resilience** and sustainability
- Respect the beauty and importance of our **natural resources**
- Advances **community health and well-being**
- Foster a sense of **community** and encourage **social interaction**
- Are **well maintained** and actively managed over time
- Can **adapt** to changing conditions and needs
- Utilize **transparent community process** to inform decisions

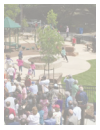
CITY COUNCIL PRESENTATIONS



PARKS, RECREATION AND OPEN SPACE MASTER PLAN

City Council
March 22, 2022

PROS Plan purpose:
*Set the **framework for decision makers** in the planning, maintenance, development, and/or rehabilitation of Belmont's Parks and open space system for a **15 year horizon**.*

GATES +ASSOCIATES 1

AGENDA

***Purpose** To update City Council on PROS Plan progress and the Open Space Management Plan*

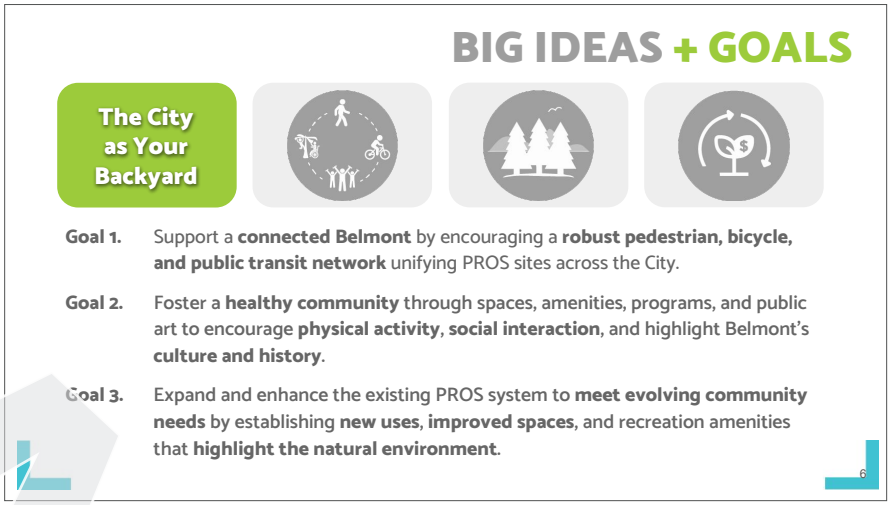
- Efforts to Date
- Big Ideas + Goals
- An Engaged Community
- Park Recommendations + Prioritization
- Open Space Management Plan
- Schedule + Next Steps

2

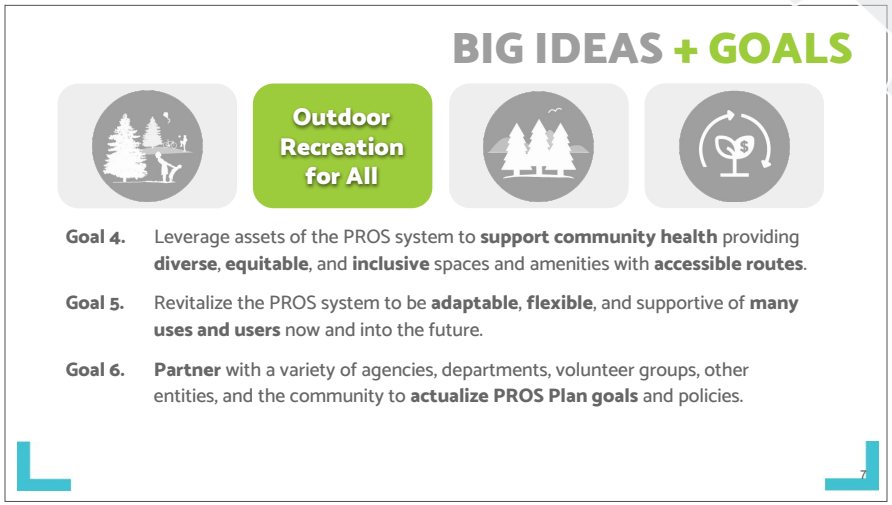
BelmontPROSplan.com Info@belmontprosplan.com

3

EFFORTS TO DATE



- Existing Conditions Assessments
- Community Engagement
- Benchmarking + Trends
- Park Typologies
- Park-specific Recommendations
  - Park-specific Focus Groups: Hidden Canyon 10/18, Ralston Ranch 10/20
  - In-depth review at January, February, and March 2022 Parks & Recreation Commission
- Goals and Strategies
- Open Space Management Plan
- Recommendation Prioritization Criteria
- Continuing Community Engagement



4

DRAFT

CITY COUNCIL PRESENTATIONS

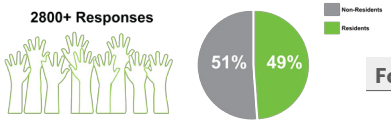
CITY COUNCIL PRESENTATIONS

BIG IDEAS + GOALS

Prioritize Environmental + Financial Sustainability

Goal 10. Nurture the **ecological strength** of the City's natural resources through **resource-efficient landscapes** and operations.

Goal 11. Provide **high-quality, actively-managed**, and **well-maintained** PROS assets supported by a range of funding sources.



Goal 12. Prioritize **sustainable, resilient**, and **responsible management and maintenance** practices, improvements, and projects at PROS sites.

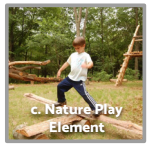
DRAFT **RECOMMENDATIONS:** ALEXANDER

UPGRADED/NEW AMENITY

Community Feedback: Positive support for recommendations

5. BBQs : **8.** Trees: Plantings : Planting : Shade

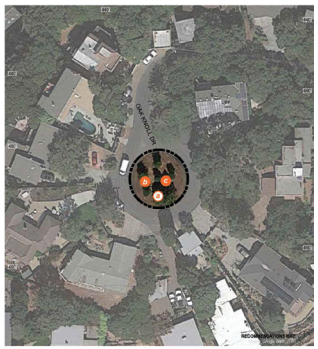
13



DRAFT **RECOMMENDATIONS:** HIDDEN CANYON

UNDEVELOPED PARK

Community Feedback: Nature-oriented, phase improvements



1. ADA Parking : **2.** Parking : Accessible : Seating : Planting : Shade

14

DRAFT **OPPORTUNITY:** OAK KNOLL

NEW PARK OPPORTUNITY

Community Feedback: Strong neighborhood support for new park

Accessible : Planting

15

PUBLIC RESPONSE: RECOMMENDATIONS

PUBLIC COMMENTS FROM OCTOBER 2021 to MARCH 2022

- Support for **Pump Track (Bike Park)** at Belmont Sports Complex
- Strong support by neighbors for **park creation at summit of Oak Knoll Drive**
- Water-conscious **native plants and trees** in parks
- Positive response to proposed park at **Alameda de las Pulgas** (Opportunity Site)
- Seating, Nature Play, and Restroom for Hidden Canyon Park
- Request for more **Youth- and Teen-oriented spaces**
- Splash park (water play) at O'Donnell not encouraged, game tables preferred
- Support for **Bocce ball** (multiple locations)
- Request for **dog-oriented amenities** but opposition to proposed sites
- Maintain **natural environs** in undeveloped parks
- Phased improvements at undeveloped sites (Hidden Canyon Park and Ralston Ranch Park)
- Increase signage and **art to celebrate** parks
- Support for redevelopment of Community Center at Barrett
- Support for **active transportation** (bike/walk) as a priority
- **Some opposition** to new uses/amenities in existing parks

16

CITY COUNCIL PRESENTATIONS

PRIORITIZATION CRITERIA

To sort recommendations into short, medium or long term projects

Community Support	(High, Low, N/A)
Existing Condition	(Unsafe, Poor, Fair, N/A or New)
Project Complexity	(High, Low)
Estimated Cost	(High, Low)
Further a Goal	(point per goal)
Funding Opportunities	(Grant Potential, General Fund, Partner)
Users Serves	(Youth, Teen, Adult, Senior)
To Meet Underserved	(Need, Area, Demographic)
Reduce Operation and Maintenance	(High, Low)
Sustainability Improvements	(High, Low)

17

OPEN SPACE MANAGEMENT PLAN

Status Update and Next Steps

18

OPEN SPACE MANAGEMENT PLAN

Plan process includes 8 tasks:

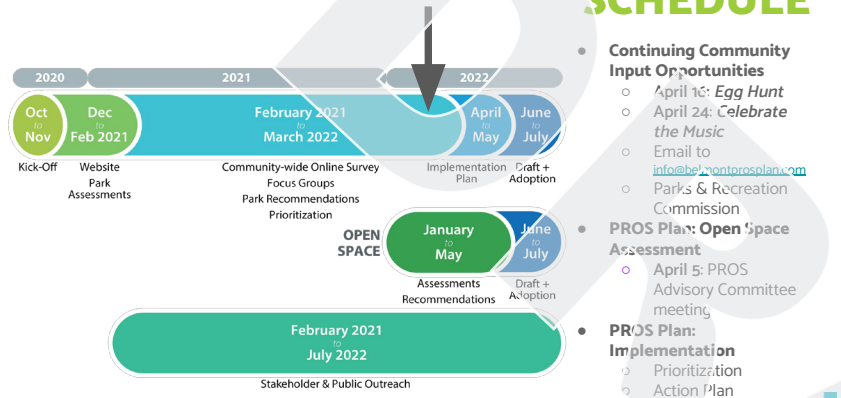
1. Project startup and orientation
2. Review of existing information
3. Develop goals and policies
4. Describe existing environmental conditions
5. Describe current and potential future recreational activities
6. Develop Management Alternatives and recommendations
7. Prepare Open Space Management Plan
8. Meetings for public input and Plan adoption

19

OPEN SPACE MANAGEMENT PLAN

Ongoing task status:

1. Task 3: Goals and Policies
2. Task 4: Describe existing environmental conditions
3. Task 5: Describe current and potential recreational activities



Next Steps:

1. Draft report on environmental conditions, March 2022
2. Draft Two Management Alternatives, April 2022
3. Draft Open Space Management Plan, April 2022
4. City Council adoption of Open Space Management Plan, July 2022

PROS PLAN VISION

Re-imagine the Belmont Parks, Recreation, and Open Space (PROS)system to **create the City's Backyard** that fosters **inclusive, experiential, and nurturing public spaces** by setting the framework for decision makers in the planning, maintenance, development, and/or rehabilitation, implementable over a **15 year horizon**.

CITY COUNCIL PRESENTATIONS

Vision: COMMUNITY THEMES

- Amenities for Social + Physical Activity
- Create More with Less
- More Seating Opportunities
- Connecting with Nature
- Physical Connections
- Available for Many Uses + Users
- Amenities for Diverse Interests
- Natural Resources
- Accessible for All Abilities
- Honor Belmont's Unique Landscape

9

Vision: BIG IDEAS + GOALS

- The City as Your Backyard
- Outdoor Recreation for All
- Celebrate the Outdoors
- Prioritize Environmental + Financial Sustainability

10

The Ideas: BIG IDEAS + GOALS

The City as Your Backyard

Goal 1. Support a **connected Belmont** by encouraging a **robust pedestrian, bicycle, and public transit network** unifying PROS sites across the City.

Goal 2. Foster a **healthy community** through spaces, amenities, programs, and public art to encourage **physical activity**, **social interaction**, and highlight Belmont's **culture and history**.

Goal 3. Expand and enhance the existing PROS system to **meet evolving community needs** by establishing **new uses**, **improved spaces**, and recreation amenities that **highlight the natural environment**.

11

Vision: BIG IDEAS + GOALS

Outdoor Recreation for All

Goal 4. Leverage assets of the PROS system to **support community health** providing **diverse**, **equitable**, and **inclusive** spaces and amenities with **accessible routes**.

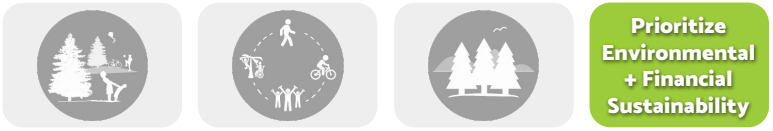
Goal 5. Revitalize the PROS system to be **adaptable**, **flexible**, and supportive of **many uses and users** now and into the future.

Goal 6. **Partner** with a variety of agencies, departments, volunteer groups, other entities, and the community to **actualize PROS Plan goals** and policies.

12

CITY COUNCIL PRESENTATIONS

Vision: BIG IDEAS + GOALS



Goal 7. Develop and implement an **Open Space Management Plan**.

Goal 8. **Expand educational opportunities** in parks and open spaces to highlight the local ecosystems.

Goal 9. Continue to **enrich Belmont's outdoor recreation opportunities** with trail improvements, volunteer collaborations, and wayfinding features.

13

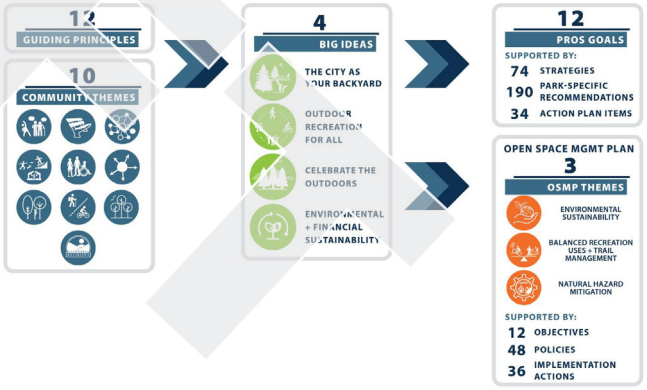
Vision: BIG IDEAS + GOALS

Goal 10. Nurture the **ecological strength** of the City's natural resources through **resource-efficient landscapes** and operations.

Goal 11. Provide **high-quality**, **actively-managed**, and **well-maintained** PROS assets supported by a range of funding sources.

Goal 12. Prioritize **sustainable**, **resilient**, and **responsible management and maintenance** practices, improvements, and projects at PROS sites.

14



Vision: CITY-WIDE PARK ACCESS

- **Interconnected Park System**
  - Amenities distributed across the system
- **Prioritize pedestrian and bicycle access to green spaces**
  - Identify areas with low access
  - Promote ped and bike infrastructure to reduce areas with low access
  - Investigate new park opportunity sites in areas with low access

15

VISION TO IMPLEMENTATION

21

Recommendations: EXISTING PARK MASTER PLAN

TWIN PINES PARK

ACCESSIBILITY

1. Restructure arrival zone to strength visual and physical connections
2. Prioritize pedestrian experience in Town Square area
3. Develop trail connections beyond park boundaries
4. Add looped walking paths

AMENITY

5. Renovate and expand Playground structure
6. Add Water Play Element
7. Renovate Picnic Area
8. Add Bocce Ball Court
9. Add Teen Outdoor Space
10. Add Multi-use Lawn

LANDSCAPE

11. Establish and improve visual and access connections to Belmont Creek

22

OPEN SPACE MANAGEMENT PLAN

The Open Space Management Plan identifies objectives, policies, and implementation actions for:

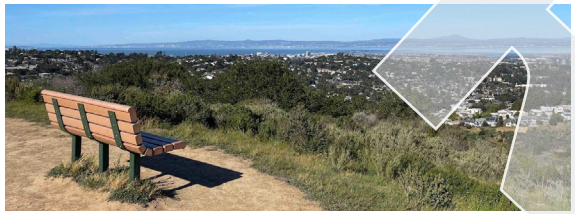
1. Environmental sustainability
2. Balanced recreation use
3. Natural hazard mitigation
4. Vegetation protection
5. Wildlife protection
6. Water resources
7. Science based management
8. Expanded implementation resources

23

OPEN SPACE MANAGEMENT PLAN

24

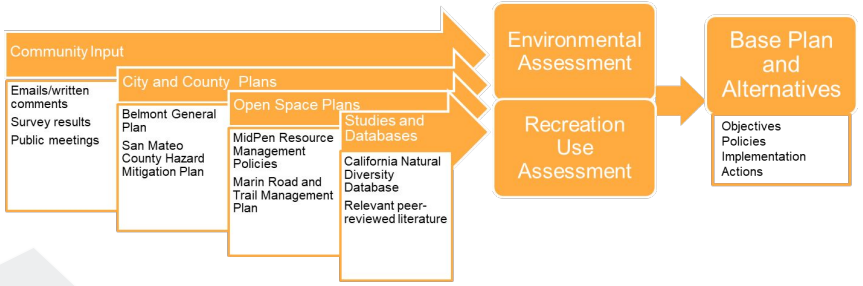
CITY COUNCIL PRESENTATIONS



OPEN SPACE MANAGEMENT PLAN

Plan consists of:

1. Environmental Assessment
2. Recreational Use Assessment
3. Objectives, policies, implementation actions



Methods included:

- Desktop research
- Site visits
- Community and stakeholder input

25

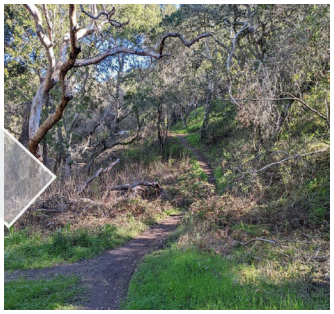
OSMP PROCESS

26

FINDINGS

Key Findings from Environmental Assessment, Recreation Use Assessment

1. **Over 90 percent of the open space lands consist of native biological communities.**
2. 11 special-status plant species and 7 special-status wildlife species have moderate/high potential to occur or are present.
3. Non-native species generally limited.
4. **Trails represent about 1.3 percent of open space lands.**
5. Approximately 50 stream crossings identified.
6. **Less than 10% of trail erosion ratings were considered "high."**
7. Rates of participation in nature-based recreation are increasing.



27

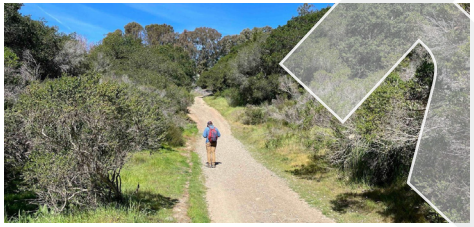
FINDINGS

Key Findings Wildfire Hazard Assessment

Steep topography, weather, and the potential to damage human life and structures

- Very high wildfire hazards for WDL
- High wildfire hazards for SJC

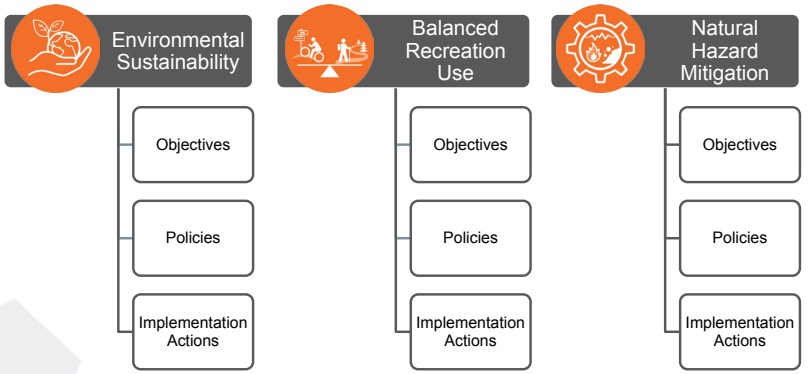
28



DRAFT

CITY COUNCIL PRESENTATIONS

FINDINGS



Key Takeaways

1. Overall habitat quality is high.
2. Existing nature-based recreational uses can continue on existing mapped and established, previously unmapped trails.
3. Continue wildfire fuel reduction efforts.

29

OPEN SPACE THEMES

30

COMBINE BASE PLAN + ALTERNATIVES

OSMP

Comprehensive set of objectives, policies and implementation actions designed to:

- Protect sensitive resources
- Guide trail management and manage recreation
- Mitigate the risk of natural hazards

+Recreation Emphasis Alternative

Additional policy and implementation actions related trails and recreational use

+Habitat Emphasis Alternative

Additional policies and implementation actions related to vegetation restoration and wildlife protection

31

COMMUNITY PREFERENCE

Management Alternatives	% of Vote
Base Plan (alone)	6%
Base Plan + Recreation Emphasis	37%
Base Plan + Habitat Emphasis	17%
Base Plan + Recreation Emphasis + Habitat Emphasis	40%

Advisory Committee #5 (5/31/22).
Poll question: Which Management Alternatives do you support?
35 responses (8 AC members + 27 participants)

32

DRAFT

CITY COUNCIL PRESENTATIONS

IMPLEMENTATION ACTIONS

Recommendations based on:

- PROS Plan Big Ideas + Goals,
- Findings from WRA assessments,
- Public feedback
- Clear next steps for the City

Recommendation to merge the Base Plan with both management alternatives

33

IMPLEMENTATION ACTIONS

An implementation action is a discrete, measurable action that achieves a desired outcome.

Environmental Sustainability

Ex. Improve stream crossings

Balanced Recreation Use

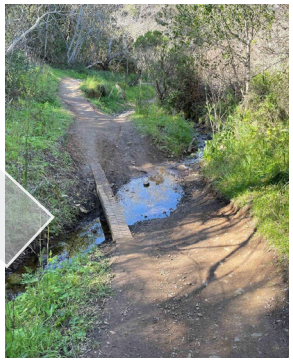
Ex. Monitor visitor use levels

Natural Hazard Mitigation

Ex. Using grazing reduce wildfire fuels

34

IMPLEMENTATION ACTIONS



Implementation Action Ratings

Easy	Medium	Hard
These actions can be performed immediately under existing City programs, funding, or with minimal additional effort.	These actions require additional planning, equipment, staffing, funding – either internal or external, or other operational changes.	These actions may require substantial planning, interagency coordination, staffing, funding, or other operational changes.

35

PRIORITY RECOMMENDATIONS

- Improve stream crossings (Hard)
- Fuels reduction plan (Medium)
- Monitor recreation use (Hard)
- Seasonal/weather dependent restrictions on maintenance (Easy)

36

CITY COUNCIL PRESENTATIONS

FURTHER RECOMMENDATIONS

- Develop recreation and volunteer restoration programs
- Examine portfolio of solutions for multi-use trail experiences

37

IMPLEMENTATION

- **PRIORITIZATION MATRIX**
  To prioritize park-specific recommendations
- **FUNDING STRATEGIES + PARTNERSHIPS**
  Portfolio of funding for capital improvements, maintenance, and operations
- **ACTION PLAN**
  for short term, long term, or ongoing

38

PRIORITIZATION MATRIX

- To further **PROS Plan goals**
  - 12 goals
- To respond to **community priority**
  - N/A, Medium, High
- To serve an **existing deficiency**
  - Demographic group, Underserved area of Belmont, Anticipated Areas of Increased Residential Density, New use, Availability of amenity/use, Resolve access issues
- To address an **existing condition**
  - N/A, Good, Fair, Poor, Critical or unsafe

PARK SITE PRIORITIZATION RANKINGS *

SITE (PARK + JUA)	AVG POINTS[1]	SITE RANK
Opportunity: Ralston + Old County[2]	21.9	1
Opportunity: Oak Knoll Dr	18.8	2
Ralston Ranch	18.0	3
Opportunity: Alameda de las Pulgas	17.4	4
Alexander	14.5	5
O'Donnell	12.2	6

CITY COUNCIL PRESENTATIONS

PR COMM RECOMMENDATION

The Parks, Recreation, and Open Space Master Plan (PROS Plan) was **recommended by the Parks and Recreation Commission** on July 6, 2022 to the City Council for **approval with the following amendments**.

1. **Consolidate the Open Space Management Plan's** Base Plan and Management Alternatives objectives, policies, and implementation actions **into a single plan**.
2. Clearly present **priority recommendations in the Open Space Management Plan** by theme - environmental sustainability, balanced recreation uses and trail management, and natural hazard mitigation.
3. Pursue the creation of **dedicated parkland in downtown Belmont** and the Belmont Village Specific Plan area in response to potential residential density increase in the area due to anticipated housing unit development as outlined in the 2023-2031 Housing Element update.
4. Apply consistent terminology to remove ambiguity.
5. Refine specific graphics for clarity.

DRAFT

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Belmont Sports Complex	"I would like to write in support of adding a a Pump Track (Bike Park). This is very much needed in the community, especially since the track in Foster City at Shorebird is no longer accessible and may never be coming back. Please make sure this is accessible for all ages and skill levels. Also, the beauty of the track at Foster City is that the track was made of dirt, so it was more forgiving than something made of concrete. Thank you for the opportunity to provide comments."	Kristie Eglsaer 9/30/21
Opportunity - Alameda De Las Pulgas	Adding benches here would be great, there are some great views from this location! We should also look to define the sidewalk here as it can be a major pedestrian thoroughfare. Also, if Play Elements are added we should ensure that a fence or similar is used due to the traffic on Alameda.	Jack Gaynor 10/3/21
Hidden Canyon Park	"Great to see recommendations for more amenities at Hidden Canyon, the benches and toilet facilities will be greatly appreciated by all users. Given the parks outdoor use, I would suggest adding drinking water facilities (for both people and pets). Additionally, there are a large number of recreational bike users that visit Hidden Canyon; adding a bike repair stand with tools would assist them. The site would also be a perfect location for a bike skills area or pump track given the flat location and proximity to the Waterdog trails to allow children and beginners to learn. Regarding the proposals both seem great, I personally think the dog park would see more use given the current trail users I see."	Jack Gaynor 10/3/21
Belmont Sports Complex	The proposal to build a pump track is great! This would be a great resource for kids and beginner cyclists to build their skills in a safe environment. The Can we look at locating the pump track near other areas of heavy cyclist use such as Waterdog open space?	Jack Gaynor 10/4/21
Alexander Park	"My name is Ryen Motzek, I grew up in Belmont and own a skate shop in San Mateo, where we sell lots of skateboards to Belmont residents. Belmont is where I started skating myself. I strongly suggest building a skatepark in this location. It can be a small, plaza like space that blends with normal architecture/landscape, such as https://www.dezeen.com/awards/2020/longlists/born-skateplaza/ Please feel free to let me know if you have any questions."	Ryen Motzek 10/7/21
Barrett Community Center	I encourage belmont to consider putting forth more of an effort on providing the youth of this city places to congregate and enjoy themselves, something Belmont has Always gone against. I'm just gunna say straight Belmont city council seriously needs to take into review what actions they take to support our youth because currently they are very slim.	Nicholas Hutter 10/7/21
Belmont Sports Complex	"Dear PROS Committee, My family is excited to see the possibility of a pump track at one of Belmont's parks. My kids (5 & 8) and I have enjoyed riding bikes together on multiple occasions at a pump track in South Lake Tahoe, and are thrilled that we might have a new, safe place for kids to ride bicycles near our home."	Chris March 10/7/21
Hallmark Park	Please consider area 2 in the park map to be used as a dog park. It is critically needed, and most of us using it is for that purpose now.	Bill Kurtz 10/9/21
O'Donnell Park	I walk in the park daily and I see people using the basketball courts frequently. I'm not sure why you'd want to eliminate one although there is another one at the other end of the park so they would still have a place to play. I object to replacing this area with a water play area. We are in a drought and with global warming I can't see this as the best use of our limited water resources. How about a bocce ball court? To the best of my limited knowledge there isn't one in Belmont. Also it would be nice to see something slated primarily for adult usage.	Susan Kotta-Wait 10/10/21
Hallmark Park	"I really like the idea of a Bocce Court at Hallmark Park! I hope it happens! It's a very effective use of space (typically, 2 to 4 players play at once)... Thanks, all, for the hard work! LKG"	Laurent Gharda 10/12/21
O'Donnell Park	I like the idea of making the picnic areas eligible for reservations, however, I would also suggest that those costs remain affordable/low since this park is truly a neighborhood park and doesn't offer the same amenities as others like Twin Pines. The BBQ's need an upgrade as well so I appreciate that being captured but consider also updating the picnic tables, especially if rental fees are being imposed. Instead of a water play space at the front of the park, I'd suggest something more low maintenance and sustainable that still adds another element of play to the facility (i.e. built in concrete games like cornhole, bocce ball, ping pong, ladderball, mini golf, etc.) with a nice seating area. More running water during times of drought (with no end in sight) may not be the wisest investment for the City. Better yet, I'd love to see Bankshot Basketball considered as it's an inclusive amenity for people of all abilities.	Noreen LEek 10/12/21

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Alexander Park	Yes, yes, yes to an updated play structure, pickleball lines, and bocce here!	Noreen Leek 10/12/21
Barrett Community Center	AMEN to a pool in Belmont at Barrett! 100% support!!!!	Noreen Leek 10/12/21
Opportunity - Ralston Ave & Old County Rd.	I'm not convinced that a skate park directly adjacent to the train station in this location, is the best idea. In all of Belmont, we see the most homeless/panhandlers in this intersection and I wouldn't feel comfortable allowing my kids to hang out there. I'd prefer to see that space used for something with a greater community benefit.	Noreen Leek 10/12/21
Belmont Sports Complex	"I'm happy to see the Bike Pump Track slated for the Belmont Sports Complex. It makes so much more sense than other possible locations (access, parking, facilities, safety, etc.) Thank you for having listened to the Belmont residents' (including my) concerns during the Parks & Rec Commission Meeting – Feb 5, 2020 re: Bike Pump Track in the Belmont City Council Chambers. The plan is shaping up nicely, including Bocce court at Hallmark Park!"	Laurent Gharda 10/14/21
Belmont Sports Complex	"Glad to see the Bike Pump Track is slated for BSC where it belongs; not in Waterdog Open Space! Thank You!"	Jennifer Lien 10/14/21
Barrett Community Center	I heard there have been complaints about residents using the Barrett for their dogs after dog hours have ended. I'm assuming this applies to the morning session as the evening session only last a couple of months during the year, surely not enough time worth complaining about considering how many households in Belmont have dogs. How many houses border Barrett (the complainers) vs how many residents use the dog park? I think that's a very important point to consider—the majority should be more important, meaning dog park users. It would be so easy to stop people from using the park after dog park hours have ended: put a lock on the gate overnight and put up a security camera to monitor daytime use. Belmont PD have the manpower to handle the gate locking and unlocking—they patrol Barrett regularly as it is. They also have the manpower to monitor a security camera that would show daytime abusers. Look to how San Carlos handles their City Hall Dog Park as an example. Belmont absolutely needs two spaces for dogs. Cipriani is located in a whole different world from Barrett. Residents in Central Belmont have to drive to get there, adding to the traffic problems we're already facing. Belmont should also have a hiking area for off-leash dogs, just one trail or section of a park would work. Look to Pulgas Ridge Preserve for an example of how to handle an off-leash space within a park. There are so many things geared towards children in Belmont but what about all the dogs? I don't have children but my taxes go towards them and not dogs. Residents complain about dog poop on the streets and illegal off-leash dogs at Water Dog Lake…this happens because Belmont hasn't allocated enough outlets for off-leash dog walking. With so many households having dogs in Belmont, the City needs to allocate more, not less, space for dogs. Please work with other cities to see how they handle their space allocation for dogs. Please make Belmont friendly for everyone, not just children. Thank you.	Katarina Koster 10/15/21
Hidden Canyon Park	We would like to get some benches and tables at this park. But we prefer not to have a dog park or pump track. City has not been maintaining it too well.	Keyuri Shah 10/17/21
Ralston Ranch Park	Dear Belmont Parks and Recreation, Thank you for soliciting feedback on the Open Space Master Plan. We attended an earlier feedback session that was focused on a pump park at Water Dog Lake – these thoughts are specific to Ralston Ranch Park. Or as we lovingly call it after 24-years of living next to it, the Ralston Ranch Woods. 1. We would like to see all or a much larger % of the park left natural (A) - ideally, all of it. Open space is what makes Belmont special and we are sad to see building being permitted in areas that had previously been restricted and the continued loss of wildlife habitat. Ralston Ranch Woods is home to owls, hawks, rabbits, deer and occasional fox, bobcats and mountain lions. We watch deer moving between the canyon on one side of RR to the other everyday (and our Ring cam is full of curious deer families grazing on our front lawn). So much of their open space is already encroached, it's really a shame to develop RR Woods – be it chopping down existing trees, or building sidewalks, fences and other structures. That said, we do understand that we're not the only stakeholders in this decision. So, we could support (B) and (C). 2. A play structure for small children (C) would be nice if positioned away from houses - and we already have a few benches (B) so that's not much of a change and would be a welcome addition for families who live and walk in the neighborhood.	Wendy Miller 10/19/21

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Ralston Ranch Park (con't)	3. Everything else – a dog park that clears trees and puts up fences, picnic tables and young adult gathering area directly on the other side of existing homes sounds awful. (D,E,F) First, dog parks are usually made of dirt (do you know how windy it gets up here?), surrounded by a chain link fence (how unsightly as you enter RRR) – and adding more parked cars at the only exit point for RRR (where we already have daycare drop-off and pick-up) will only add further the congestion. The clearing of trees also means more erosion. Most homes on the lower part of Ralston Ranch have sump pumps because of the water runoff in the winter that drains down the hill into their back yards – removing existing trees will only increase that problem. Second, Belmont has a problem managing gathering areas – look at the cars/people at the Len Turner Memorial Vista Point (even after dark) who smoke, leave alcohol bottles and trash spilling over trash bins for the crow to throw around. It's become a constant parking spot for Uber and Lift drivers, so the area needs more trash and recycling bins, more frequent servicing, and better monitoring by the police. Ditto for the car park areas at the trail head on Ralston Avenue and 92 intersections. Third, people already drive to RRR and park along the street to access the trail heads for mountain biking. I'd prefer to see the city put in a water fountain, trash and recycling cans at the RRR turn-around and service it regularly for all the folks using the 16-miles of trails cut into Belmont's open space. Hikers, dog walkers and mountain bikers. Lastly, encouraging gathering of more people from outside the immediate neighborhood is simply inviting more crime. Robberies have increased in our area and the Belmont Police have acknowledged we are a quick getaway for criminals due to the easy access to 101 and 280. Unintended consequences must be carefully considered – this would affect not only Ralston Ranch, but the Highlands and other neighborhoods around us. If Homer and I had our druthers, we'd like to see the city expand (A) and just maintain the woods by trimming and clearing brush 2X year for fire safety, leaving all of the 70-plus trees alone. It would keep the space open for wildlife habitat and continue to be a place of solitude and quiet reflection for we humans. I'd like to see Belmont take better care of what we have (maintaining the trees, managing trash left by those already using our open spaces) and addressing issues at the vista point and car park areas. To add to the conversation, how about planting and dedicating a grove of redwoods to those lost in the fires this year - with a natural labyrinth in the center? Some benches for quiet reflection or meditation would be delightful. While we'd like to see the space kept natural, we could support B & C if tucked into a quiet space in the park – set away from homes. Thank you for asking for our input! Best Regards – Wendy Miller & Homer Wong 2 Ralston Ranch Road, Belmont"	Wendy Miller (con't) 10/19/21
Ralston Ranch Park	I'd like to attend the meeting	Carol Rossi 10/19/21
Hidden Canyon Park	Thank you for hosting the session yesterday about the Hidden Canyon Park. I was there but didn't speak during during the meeting. I also live on Carlmont in the "pink" houses but not very close to the park. I, like many people there, would love to see the natural wildlife / open space feel maintained, with some improvements but nothing too invasive/disruptive. I don't think a dog park is a good idea for that reason, as well as others (issues with dogs off-leash, e.g.). I also would like to echo the statement made by several people that before we add more things, or in parallel, it would be good to improve the maintenance of what we do have. The park has typically been overgrown in the summer and muddy in the winter (ok, not so much lately, but we can hope). If we want to improve it for people's enjoyment, fixing those issues would be a good start. I like community gardens but I don't think this is the space for that either -- either it'd have to be seriously fenced and seriously watered (not advisable), or it'd die and/or get eaten by all the animals. Thank you for the good discussions!	Lara Crawford 10/19/21

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Ralston Ranch Park	Parks and Recreation: My general comments regarding the current Park proposal for Ralston Ranch Park. Firstly, I am unsure as to why the park limits are not extended all the way to the edge of sidewalks on Ralston Ave. It would make sense that this portion be included so that P&R can be responsible for maintaining and up keeping the entire area. It does not make sense to exclude this area as it provides another natural location to plant mitigation, replacement and screening trees for the community. Screening trees are important as they provide mitigation from wind, visual intrusion, natural screens for wildlife to pass through the community, and on occasion an obstruction for wayward vehicles that come off Ralston Ave. Yes, this has happened and more than once; and the last one made it pretty far down the hill. As for the elements of your plan: DOG PARK I am not sure that this location is the best and most appropriate location for a dog park. Typically dog parks service wider community areas. Cipriani is the much better dog park for the overall community and services much of the local community in our area. Regardless, the proximity of Cipriani would limit the usage of this specific dog park to a smaller, defined part of the community and more than likely nearby San Mateo residents. Residents of both of the Belmont communities should be the focus of this park and they both have established trailheads into the great open park areas adjacent to these communities. We have numerous dog owners in the community, including myself, and I personally prefer to walk my dogs through the trail system so that both the dogs and myself get exercise. So as a dog owner adjacent to this park, I would probably rarely use it. I am sure that will be true for most of the RRR community. This type of park also does not have great parking and access. The roadway set up with one exit probably is not great for any more added traffic. Every person parking to access the park would have to work as a single trip in each direction for each visit. There are already bikers and hikers that use the trailhead at the cul de sac that park along the street, and most of these users also go out illegally through the Christian exit. This is just another traffic safety risk, especially at that intersection. As I see it, most of this community would not necessarily use the dog park. However, most of the park is being captured as a dog park. As stated I am not sure that is the best usage of the space in the park for the neighborhood and the community. If having a dog park to service this part of the community is important to P&R, I would suggest studying other location and more specifically a dog park at Fox Elementary School as an extension of your JUA. This would be much more ideal as it supports a wider section of this community, including the Hallmark neighborhood. It allows for better usage of the park spaces and a more functional dog park, with much better access and parking. GATHERING/PICNIC AREAS Gathering areas are fine as long as they are well maintained and policed. We already have local experience with the attractive nuisance at the lookout with the drinking, smoking and sexual activity only 500' away. As a result, there is much apprehension from providing just another location for bad behavior to occur even closer to our homes. Regardless of this, the plan placing these gathering spaces, picnic areas and such directly adjacent to the homes is not good planning. These should be located farther away to preserve and protect the privacy of this home owners. This is another consequence of having most of the functional space being used for a dog park. If you remove the dog park, the other tier 2 amenities can be better situated farther from the homes, including any play structures, gathering areas, picnic areas, garbage receptacles, etc. It would also create one specific space that is more open, and that is easier to access, use, maintain, and police. This still does not mitigate the parking and traffic related issues. The goal should be to make this park be a destination primarily for the local communities surrounding it and not to draw in people from outside the community neighborhoods, especially those that have to specifically access it by car. Better for the community and better for the environment. We appreciate this upcoming forum to discuss the park as I think getting a better understanding of what the actual local affected	Roy Schnabel 10/20/21

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Ralston Ranch Park (con't)	communities want from this park is beneficial and good planning. Ultimately, I think that maintaining or preserving as much of the park as open space is probably a more ideal use of this park space. Your current online survey also seems to bear this out as only a very small percentage view the current space as unsatisfactory. If you eliminate those with no opinion than 85-90% of the respondents feel that the park in its current condition is excellent or satisfactory with over 60% of that in the excellent column. I would also recommend that any additional, replacement or mitigation trees be planted along the perimeters of the park especially at Ralston Ave and adjacent to those homes closest to the park to continue to provide both natural visual, privacy and wind barriers. Regards, Roy and Maria Schnabel 97 Ralston Ranch Road Belmont CA 94002"	Roy Schnabel (con't) 10/20/21
Hidden Canyon Park	I love biking at this park. Please keep it free and open for everyone to use. The best is after we stop at waterdog cafe or some other pub downtown and and have some wonderful food and drinks!	Ralph Grundler 10/25/21
Other	Keep Mountain Biking alive in Waterdog! This place is amazing and has allowed so many bay area citizens to connect with nature in a suburban landscape unlike any other.	Brent Ziegler 10/25/21
Opportunity - Oak Knoll Dr.	Hi we live on hillman and have a toddler who started to walk recently. Together with many other similar aged kid, we don't have a safe / toddler friendly playground within walking distance. The plan to build a playground area near oak knoll dr will largely benefit us and many similar familiars in this neighborhood, and I'm looking forward to hearing back from Belmont city!	Xuening Liu 10/30/21
Opportunity - Oak Knoll Dr.	"This area is in so much need of a park! There is no single play structure in a mile+ radius. That is, in the area with no sidewalks (or, worse: patchy and parked). It's not only exhausting, but also plain dangerous to walk a toddler/stroller ~3 miles round-trips to College View / Davey Glen. There are many families with small kids in immediate proximity of the Oak Knoll that would benefit greatly from having a park here."	Volha Zhurauskaya 10/30/21
Opportunity - Oak Knoll Dr.	"My wife and I and our two kids (ages 1 and 3) moved to 1904 Oak Knoll Dr in May of this year. One of our neighbors recently mentioned that there was a petition for adding a small playground at the top of Oak Knoll Dr. I would like to voice my support for this opportunity. Many of our neighbors on Valley View Ave and Oak Knoll Dr also have young kids, so a playground here would be much used. Currently, I've been alternating between Twin Pines and Beresford Park to reach a playground where my kids can play. The closest park to us seems to be Patricia Wharton Park. While beautiful and well-maintained, it's rather small and suitable for only sitting. Having a park with a playground in walking distance for our neighborhood would be great!"	Jason Wang 10/31/21
Opportunity - Oak Knoll Dr.	We live at Oak Knoll Drive and we have small kids, this can be a place to entertain and meet neighbors.	Heloisa Rodrigues 11/1/21
Opportunity - Oak Knoll Dr.	As a resident of this area with 2 kids and knowing how many kids in the area will benefit greatly from this project, I am strongly in favor of it. I really hope it gets approved and built as soon as possible. A nice park like this is sorely needed here and will be very much appreciated.	Eduardo Rodrigues 11/1/21
Opportunity - Oak Knoll Dr.	This is a critical need for the neighborhood. I love the idea of additional seating and a modest structure. Only consideration would be to ensure we maintain the tree coverage as much as possible.	Zack Rhoades 11/1/21
Hidden Canyon Park	I frequently walk in the Hidden Canyon / Waterdog area and the narrow trails especially are simply too narrow for the bikes to safely pass anyone. There really should be restrictions on what trails the bikers can go on and they should not be allowed at all on the narrow trails. There are too many of them and too many bad apples among them. Putting up signs doesn't do anything. The bikers ignore them. And given the proximity of Hallmark park, I'm not sure why the bikers can't just go there, and leave the wildlife (and pedestrians) in peace at Waterdog and Hidden Canyon. Ideally, bikers should be banned entirely from Waterdog and Hidden Canyon.	Michael McEvoy 11/2/21

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Barrett Community Center	Would really love the rebuild of Barrett Community Center to start breaking ground!	S Lee 12/7/21
Barrett Community Center	There is already a master plan approved and Conceptual Design report from 2020 for Barrett Community Center. Can we focus on executing the master plan, instead of spending resources in discovering new parks? Barret Community Center is old and the area is in much need of a renovation for community to enjoy.	A L 12/7/21
Barrett Community Center	Please please please do whatever possible to accelerate the Barrett center improvements. These are long overdue and will have a huge impact community life in Belmont.	Nadav Benbarak 12/7/21
Barrett Community Center	There are no basketball courts with lighting in Belmont. For those with young children or demanding work schedules this leaves only the evenings for a basketball game. It would be great to have lighting put in for some of the courts to enable this type of use. I personally organize a weekly game and drive 20 minutes to the nearest available court with lighting.	Nadav Benbarak 12/8/21
Barrett Community Center	Please accelerate the building of the new community center!	Paul Perry 12/14/21
Opportunity - Oak Knoll Dr.	Adding a playground at the top of Oak Knoll Drive is a great idea. There are lots of little kids living in the area with no park within walking distance. We live on Oak Knoll and always have to drive to a park. The small area at the top of Oak Knoll Dr isn't being used for anything right now so this would be a fantastic use of that space!	Jessie Hsu
Opportunity - Oak Knoll Dr.	"HI Belmont Planning Team, i'm so happy this made to public review. My family and I live on Hillman Ave would be ecstatic if there was a park within walking distance we could take our toddler son to! We've been trying to take a greener approach and not to use our car while in town, but it has been a challenge with going to parks. It would be great if there could be a small play structure for the kids in the neighborhood to play with, but even a patch of flat maintained area would be much appreciated! We'll be happy to volunteer some time to help build a park for all the neighborhood! Best. The Tam's"	Gregory Tam
Opportunity - Oak Knoll Dr.	My family and I sometimes walk up Oak Knoll Drive for short hike (as do many in the neighborhood), and the addition of a small park space there with seating area/bench will be a very welcome improvement to the community at the currently underused space.	Cheuk Chi Lo
Twin Pines Park	I really like the idea of providing ADA accessibility to all amenities. I would also recommend cleaning the bathrooms in Twin Pines Park as they are very old and usually dirty, and I support the idea of replacing the drinking fountain. This might be a long shot, but I have noticed that in various campuses and businesses across the Bay Area metal table tennis tables have been built. I think this is an awesome idea that gives the community a really fun way to engage in physical exercise, and it also promotes table tennis as a sport around the community. I think this could be implemented in any park, and I know its a long shot but just a suggestion.	Taran Tummala
Opportunity - Oak Knoll Dr.	"A park here would be highly desired due to none within 20-30 min walking distance and there's been a big inbound of young kids in the neighborhood. I see kids playing in the nearby streets frequently and a park would be a safer place to play. THANK YOU FOR YOUR CONSIDERATION!!! -Adriene Wong"	Adriene Wong
Opportunity - Oak Knoll Dr.	My wife and I have a 2 year old with another one on the way and would like to support the mini park at the top of Oak Knoll. We live at 1806 Mezes and currently have to walk all the way down to Davey Glen to access a park (or drive). We walked a couple of times but the distance has made it pretty difficult. A mini-park on Oak Knoll would be great. We moved to Belmont in 2020 and have really enjoyed it. A park in our vicinity would make it an even better place to raise our kids!	Ryan Hannink
Opportunity - Oak Knoll Dr.	Great plan! Really looking forward to having a playground at the top of Oak Knoll!	Robin Raffard

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Opportunity - Oak Knoll Dr.	I have lived on Oak Knoll Drive for 30 years and have always thought the circle center at the top of our street could be conveniently used as a basic, but attractive resting, sitting location for the many people who travel up and down our road. There are also a number of new families in the area with younger children that would make this convenience a real joy. The size of the location seems perfect for a bench, a park-style picnic table and maybe a small youth playground slide (for the toddlers) without overwhelming the space. Adding additional planting would provide a new level of attractiveness. It's a nice sized space that with a small upgrade could provide a really great little park for this area that's slightly under served in this regard. The vision would be to create both a functional and beautiful pinnacle (park) that travelers will ascend to atop the Oak Knoll Drive hill.	Jeff Murphy
Hidden Canyon Park	"Thank you for listening to our voices about preserving the natural beauty of Hidden Canyon and not over developing the area and encouraging even more traffic than we have today in our cul de sac. The proposed plans look great. I like that you're adding more amenities to areas that can accomodate higher traffic. Thank you for hearing our voices, acknowledging and incorporating our input into your proposed plans. Jakki"	Jakki Geiger
Opportunity - Oak Knoll Dr.	"We are residents of Oak Knoll for over five years; our younger one was born in Belmont. We enthusiastically support this initiative! Oak Knoll and the neighboring area are coming alive with toddlers and children. Since our terrain doesn't allow for much front yard mingling, a small park like this would be a great place for our children to get to know each other and build a community. Looking forward to this!"	Snigdha Sen
Hidden Canyon Park	"Hi I've been leaving in Hidden valley more than 10 years. I am (and family , including high school goes) very excited that city want to update the hidden canyon. Let's do it! :) During our dinner table conversation , kids came with the plan :) A jogging track (does go hand & hand with bicycles), few picnic tables , swings & gazebo for Thi Chi , meditation , Yoga or senior gathering. About plan definitely enhances the open nature around us & supports inclusiveness / community thinking. Thanks for all energy and efforts you all putting for us! Yogesh"	Yogesh kulkarni
Barrett Community Center	"Hi, I support the idea of spaces for teens to hang out. Indoor/outdoor pool and lighted basketball courts would be ideal. Thanks. Davinder"	Davinder Josephson
Fox Elementary School (JUA)	Please do not convert Ralston and Fox to artificial turf. It is such a joy for kids to be able to play on grass, it is better for the environment, and there are health concerns with turf fields.	Sumitra Chari
Alexander Park	As a member of the Sterling Downs Community, I would like to see updated plantings at Alexander Park with native plants to promote biodiversity and a healthier ecosystem.	Travis Bench Bench 1/27/22
Alexander Park	"Please no trees in the middle of the open grassy field, as that would block uses of the grass such as soccer, frisbee games. Looped path + bocce looks great!"	Doug Ricket 1/27/22
Alexander Park	Looped walking path and bocce ball court sounds great! Please leave the large field open and do not add trees in the middle of the field. Adding trees elsewhere, like over along the side of the playground area, would be great.	Jennifer Hennings 1/28/22
Barrett Community Center	Outdoor pool sounds AMAZING!! Please keep the pool -- we don't have any good public swimming pool options in Belmont and that would be an incredible addition to our city. Splash pad area is also great.	Jennifer Hennings 1/28/22
Twin Pines Park	The erosion behind the playground and the war memorial is not currently fenced off and kids could easily fall over the edge. Please add a fence to prevent kids from falling over the edge into the creek. The rest of the plans look great, especially improving creek access (#11), adding the grassy field (#10) and the water play element (#6).	Jennifer Hennings 1/2//22

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Hidden Canyon Park	"I live on Carlmont Drive, but based on the meeting on 2/2/2022 I think this applies across many of the park proposals as described in the meeting. Many of the neighborhoods have stated concerns over parking and traffic, but there doesn't seem to be any means to survey or assess current traffic and impact of adding elements with significant draw. For a Community Park proposed to draw from 1/4 mile, if you add parking are you not trying to pull people from farther away - this seemed inconsistent to me. Almost seems like less parking would serve to prioritize use for the local community, and potentially lead to further traffic challenges. The other area would be community-stated concerns over maintenance capacity - this should be well understood and studied in advance of the community making an investment in adding amenities which can not be safely maintained. If the answer is that the city can maintain these amenities, then I am in favor of additional development. I keep hearing this is a concern - but have not heard attempts to address this transparently. Thank you for sharing the pictures of the nature-themed elements, many of them are quite appealing. I would avoid fencing as much as possible as this is a significant concern for the wildlife movement."	Barbara Troupin 2/2/22
Cipriani Park	Dog park should be renovated w/fake turf and split into two separate areas- one for big dogs and one for little.	Monica Ryan 2/12/22
Ralston Ranch Park	I really like the idea of a small kids playground in the park. None of the current facilities are in walking distance for the residents of Ralston Ranch, Chistian Dr and others in the Skymont neighborhood.	Nikhil Madan 2/23/22
O'Donnell Park	I am one of the Co-Presidents of the Homeview Neighborhood Association. I've asked a few local neighbors that are frequent users of the park of their thoughts about some of the proposed upgrades/ additions to O'Donnell. Regarding the possibility of a water play space, one neighbor noted that the two nearby water play spaces in San Carlos/San Mateo are very crowded in the summertime and parking was an issue at those sites. O'Donnell only has limited street parking. Another voiced a concern about water waste, particularly during the ongoing droughts we are having. Other items - Yes, replacing the well work current BBQ's is needed. Some of the automated sprinklers should be extended to a couple of tree's that were planted several years ago, not making much progress due to lack of water in those areas. We've attempted to hand-water, but it's difficult.	Michael Fabel 2/25/22
Barrett Community Center	On of the most enriching experiences one can have in Belmont is to watch the dogs scampering about in the enclosed area while the owners enjoy a social visit. Unfortunately, for reasons unfathomable by most sentient beings, the park is off-limits most of the year while the field remains unused. I'm told Belmont devotes a portion of the resources to responding to complaints by some toothless hag living adjacent to the park anytime a resident brings her dog to the field 'off hours'. Belmont, alone on the peninsula, has a weird way of meeting the needs of their citizens. A manic love of regulations and a need to exercise power characterizes decades of poor governance in this insignificant town. You have this opportunity to embrace the beauty of dogs running free and their owners enjoying friendly banter. It's a beautiful sight.	Jerry Boyke 2/26/22
Wakefield Park	I support keeping Wakefield Park largely the way it is and oppose any further development of the Park. This is a small park for the immediate neighborhood. It serves its purpose well. I understand some may see the park as needing human development; I see the park as a perfect natural area (when it's not sprayed with herbicides). Before the herbicides were sprayed I would lay on the oak leaves under the magnificent oak trees and just enjoy the surroundings. The park was a requirement when our homes were built and the intent was for it always to remain a simple, natural setting with a couple of benches and a short path. REPAIRING portions of the path is warranted. I urge that we repair what is currently there instead of tearing out and rebuilding. Environmentalism must be included in everything we do. But, sadly it is not included in the PROS plan. Waste and adding to the landfill is not environmentally justified. Reducing our waste is critical to preserving natural resources and minimizing the use of landfills. Repairing and refurbishment involve reusing resources and preventing the use of more resources. Sadly, this is not reflected in any portions of the PROS process or proposal. A green PROS plan would include refurbishment & reuse, use of post-consumer recycled products, general practices that promote the use of plant-based or post-consumer ""plastics"" (structures, waste bags), etc. Our local landfill is expected to be full within a few years and Recology has not identified a new dumpsite.	Deniz Bolbol 2/28/22

DRAFT PARK-SPECIFIC RECOMMENDATION COMMENTS

PARK	COMMENT	COMMENTER
Wakefield Park (con't)	People with physical challenges would likely have difficulty getting up the hill to the park ... not every area can be ADA accessible; Wakefield Park is one of those areas. Please include in the MP working with local neighbors who want to adopt the Park to ensure it remains a natural area with healthy native habitat and not a dead zone sprayed with herbicide. Thank you.	Deniz Bolbol 2/28/22
O'Donnell Park	The current draft of the plan on this website indicates that the half basketball court would be converted to a water play space with spray elements. I strongly disagree with the conversion of the basketball court to a new amenity since it is frequently used by neighbors and Belmont residents. In fact, the court is the usual meeting space for our annual Homeview Halloween parade and costume contest. In addition, I do not believe there is a strong desire for the water play feature in this community given the megadrought, which will most likely mean that the water spray features will not be in use for prolonged periods of time. If the water play space must be featured in the PROS Master Plan, it should be installed adjacent to the smaller children's playground. There is a small concrete landing in between the basketball court and playground (at the end of the sidewalk slope) where this feature could be added without impacting the basketball court. Thank you consideration of this comment. Caroline Pyrz	Caroline Pyrz 3/2/22
Hallmark Park	I support maintaining the current walking paths and welcome commissioners' ideas regarding using a more natural looking, possibly more environmental and more durable material than asphalt. Glad you have already started maintenance on the tennis courts and adding pickle ball lines for another recreational activity but we already have 20,000 visitors per year entering our small Hallmark Park entrance and don't need to attract more visitors. Adding more oaks and native trees to replace the non-natives is welcome. Agree with commissioners that leaving the steep upper meadow alone is the right choice as well as eliminating the bocce court idea for Hallmark. That may be a good idea for Twin Pines Park Community Center. I am not opposed to upgrading the current tot lot with new equipment as long as it fits in the current landscape but I am not in favor of any big McDonald playland type structures that would require excavation and removal of trees ruining our natural setting, beauty and tranquility that we currently enjoy. Thank you for listening to the residents.	Jennifer Lien 3/4/22

1/14/2021	Dear Park Commissioners, With as few as 1,000 remaining, this beauty below is the rare and endangered San Francisco garter snake, christened “the most beautiful serpent in North America.” It is found ONLY in SF and the peninsula, and needs a riparian (pond/wetland) habitat for survival. I have seen one in Waterdog, and they are documented on the General Plan Conservation Element as present in Waterdog, but they are very rare and are protected under the Endangered Species Act (U.S Fish and Wildlife Service). If you are not aware of this beautiful creature, and our legal obligation to protect it, I highly recommend visiting this website to fully appreciate the importance of the disappearing riparian habitat that supports the few remaining animals; https://sfgartersnake.wixsite.com/dhsseadisc/why-should-you-care: Moreover I urge you to take immediate action to close the illegally built trail, cut by bikers, that bisects Waterdog marsh, trampling and fragmenting one of the few remaining habitats of this rare and endangered snake. That trail violates both the existing Park Master Plan (which stipulates no development in that marsh) and the John Brooks Contract, and it contradicts the General Plan Conservation Element.	Kristin Mercer
2/20/2021 and 2/27/2021	As residents of Belmont, we support keeping Waterdog Open Space an accessible and sustainable place for recreation, connecting with nature and building community. In the new Master Plan, we request you to consider: · Maintaining the trails, as they are, for multi-use for hiking, biking, dog walking, exercise, connecting with nature, etc., consistent with best practices of other open spaces · Continuing outreach and education to trail users and groups to ensure safe and sustainable use of our trails. The “Love Waterdog” campaign is great. · Continuing to collaborate with community groups and volunteers to support the maintenance and preservation of the trails. They are doing a great job along with Belmont P&R workers. Our trails get healthier every year. · Exploring options for new trails to spread people out and relieve congestion · Installing additional benches at key view spots Open space recreation carries enormous benefits for the folks that live in Belmont - a local park for stress reduction, exercise, revitalization, appreciation of nature, inculcation of conservationist and environmentalist ideals, fostering community pride, and improvement of quality of life. Our community has a need for recreational open space - Water dog has served this public need well for decades.	Karen and John Moody
2/23/2021	I often hike the trails at Waterdog Lake and would like to remind the Parks and Recreation Commissioners that this area is also known as the John Brooks Memorial Open Space. Isn't this because the land was donated by John Brooks? As I understand it, the land was donated with the expressed purpose of preserving a natural space. Please bear this in mind when considering any trail developments that might put recreational biking (trail biking and in particular extreme mountain biking, which is really a sport) above the preservation the natural landscape and habitat. Indeed, I am very opposed to the construction of any trails that would cater to or attract anyone engaging in extreme mountain biking (which I assume involves high speeds and jumping). This is would also open the city up to unnecessary liability. Furthermore, I sincerely hope that the you are not still considering locating a bike pump track within Waterdog Open Space. Such a track does NOT belong there!!	Connie Tettenborn

2/27/2021	Dear Parks and Recreation Commissioners and City Council, My name is Jack Gaynor and I am writing to provide a public comment for the Belmont Open Space Master Plan. My fiance and I have lived in the area and have enjoyed using the Open Spaces over the past three years that they were one of the deciding factors in our decision to settle here and start our family. The various open spaces, particularly Waterdog, have been a constant source of joy over the past years, particularly during 2020. We are both hikers, mountain bikers and trail runners, and the multi-use nature of all the trails as they currently are has been one of the things we love about Waterdog as it means we can vary how we can enjoy the open space from day to day. I have also volunteered with the Waterdog Trailkeepers to maintain the trails, fixing issues with drainage and adjusting the existing trails to better suit the multi-use nature, and I really appreciate that the Belmont Parks and Recreation department is collaborative in the care and maintenance of the trails. As such I support keeping Waterdog Open Space an accessible and sustainable place for recreation, connecting with nature and building community, for all trail users. In the new Master Plan, I request you to consider: Maintaining the trails, as they are, for multi-use for hiking, biking, dog walking, exercise, connecting with nature, etc., consistent with best practices of other open spaces Continuing outreach and education to all trail users and groups to ensure safe and sustainable use of our trails. The “Love Waterdog” campaign is great, and the signage really helps to share the nature of Waterdog. Continuing to collaborate with community groups and volunteers to support the maintenance and preservation of the trails. Speaking personally I think we are doing a great job along with Belmont P&R workers, and our trails get healthier every year. Open space recreation carries enormous benefits for the families that live in Belmont - a local park for stress reduction, exercise, revitalization, appreciation of nature, cultivating conservationist and environmentalist ideals, fostering community pride, and improvement of quality of life. Our community has a need for recreational open space for all trail users - Waterdog has served this public need well for decades and I hope that the Master Plan will continue this great history into the future. Please feel free to contact me if you need any additional comments.	Jack Gaynor
3/2/2021	I would like to recommend that the planned survey have “open ended” questions and also that the questions allow for resident comments whenever possible. That is, if the questions are designed to provide for pre-prepared potential answers to choose from, there should also be an opportunity for “other” whereby people can respond with their own created comments or answer.	Bob Stahl
3/2/2021	Dear Parks and Recreation Commissioners and City Council, I support keeping Waterdog Open Space an accessible and sustainable place for recreation, connecting with nature and building community. In the new Master Plan, I request you to consider: • Maintaining the trails, as they are, for multi-use for hiking, biking, dog walking, exercise, connecting with nature, etc., consistent with best practices of other open spaces. • Continuing outreach and education to trail users and groups to ensure safe and sustainable use of our trails. The “Love Waterdog” campaign is great. • Continuing to collaborate with community groups and volunteers to support the maintenance and preservation of the trails. They are doing a great job along with Belmont P&R workers. Our trails get healthier every year. Open space recreation carries enormous benefits for the folks that live in Belmont - a local park for stress reduction, exercise, revitalization, appreciation of nature, cultivating conservationist and environmentalist ideals, fostering community pride, and improvement of quality of life. Our community has a need for recreational open space - Waterdog has served this public need well for decades. Personally, mountain biking at Waterdog has been my number one source of physical and mental health for over ten years. More recently I now also ride with my kids there. It is a critical part of my health, happiness and well being. It is one of my favorite places on earth and I hope you keep it accessible for all.	Jay Maloney

3/3/2021	My name is Julianne Kline and I am writing to provide a public comment for the Belmont Open Space Master Plan. My fiance and I have been enjoying Waterdog Park for years, so much so that we have recently bought a home 3 miles away. Waterdog is one of the major venues where I learned to mountain and gravel bike over the past three years. Since it's so close to home (we lived nearby before the home purchase too), I can ride directly from my door to the park. It is the only place to mountain bike in the area where I do not need to load my bike into my car to get there, which makes it a convenient and environmentally friendly option. The park is also technical, and gives a newer biker like me a chance to work on difficult skills. During this tough pandemic, Waterdog had kept me and my fiance sane. I love gravel biking up Lake Road Trail, up through Sheep Camp Trail where I can come out on Canada Road. After hours on end stuck inside working from home, I enjoy taking breaks to hike the Crystal Springs Cross Country Trail. The trails are so beautiful and fun. I've recently explored San Juan Canyon which I discovered through word-of-mouth. More signage on these trails would help in making them more accessible to the community. Thank you for maintaining the beautiful trails and open spaces. I urge you to continue maintaining the trails for all trail users in the future plans, such that the multi-use nature of the trails will be retained for those of us who enjoy hiking, biking, dog walking, exercising, walking, etc. We look forward to building a life and a family here, and look forward to many years to come of use of the Belmont Open Spaces.	Julianne K
3/3/2021	Dear Belmont Parks and Recreation Commissioners and Open Space Master Plan Advisory Committee: Please create a separate process in the Master Plan to address future management of the Waterdog open space. Do not combine it with sporting activities or recreation classes. Waterdog used to be a wonderful place to take peaceful nature hikes. However lately the mountain bikes are taking over the trails. Some of them are considerate. But many tear up the trails, go off trail, or ride at inappropriate times like after a rainfall when the trails are soft and vulnerable to erosion. Senior citizens (like myself) especially are starting to feel less comfortable hiking there because of the trail damage hazards and because of the fear of being hit by a bike. We can't jump out of the way of an oncoming bike as quickly as we did when we were younger. Please save the precious Waterdog native habitat for wildlife and low-impact hiking.	Carol Wilhelmy
3/3/2021	Dear Belmont City Council, I am a long time resident of Belmont living and owning a home here for the past 35 years. My family and I have greatly enjoyed living in Belmont and have had much joy in being able to access Waterdog Open Space for recreational purposes including hiking and biking. It has served as a wonderful area for us as a community and spending time with family and friends of all ages connecting with nature. Our community has a need for this type of space, which Waterdog has served well for many years improving the quality of life in Belmont! I am reaching out to you as I understand that you are in process of developing a new Master Plan for this area. As you develop the new Master Plan, I ask that you please consider to maintain the existing trails which are used for multiple purposes including exercising such as hiking, biking and dog walking, as well as community building and connecting with nature. These types of activities align with those of other Open Spaces in the area. I believe that the current volunteers and community groups who maintain the trails are doing an awesome job and the trails are in great shape. I understand that there has been some discussion to change the park designation to be preserved as a wildlife preserve. I believe this would have negative impact on the overall Belmont community. Waterdog park is surrounded on all sides by residential development and the existing wildlife has adapted to the presence of people in this area. We are fortunate to already have a 23,000 acre wildlife preserve nearby on the other side of 280 (the San Francisco Public Utilities Commission Peninsula Watershed). Keeping the Waterdog Open Space as the recreational park it is today is one of the highlights that leads my family to desire to stay in this area. One of the activities that I personally enjoy in Waterdog is being able to ride my mountain bike in a safe and natural environment which is easily accessible from my home. The alternative to this would be to ride in the city streets with much traffic where even an experienced biker such as myself does not feel safe; unfortunately there are few bike lanes in Belmont and the roads are not wide enough to be bike friendly. The only other option involves loading my bike and driving a distance to find another place to ride, which is not convenient nor good for the environment.	Chris Miller

3/3/2021 (con't)	Just five years ago another Belmont institution, Belmont Iceland, closed operations suddenly and ended its long history of community recreation. Personally, I was involved with the hockey community there from 1978 until it closed in 2016. Needless to say, I was quite disappointed losing such an important part of our community. I had hoped that the city of Belmont could have kept the rink from closing permanently. Looking ahead to todays agenda and the possibility of not allowing mountain biking at Waterdog in Belmont, I stand strong in my convictions that this should not be allowed to happen for all the reasons stated above. For this 35 year resident of Belmont, I would very much like to see the Waterdog Open Space area remain the wonderful area it is serving the recreational needs of our community. Thank you very much for your consideration.	Chris Miller
3/4/2021	Dear Commissioners, I previously sent a comment via the contact link on the Parks and Open Space Plan website (https://belmontprosplan.com/). While I understand that our parks and open space areas are available for anyone to use, it appears that there is no line asking for the home address or at least the city of residence to verify that the opinions of Belmont residents are prioritized in the community input regarding the Master Plan. Will the online survey have such a requirement? There is ample documentation referring to Waterdog Lake as an Open Space Area. This designation should not be changed, and as an Open Space, motorized vehicles (including electric bikes) should be prohibited as stated in the 1992 Master Plan. Is there still a plan to build a bike pump track at Waterdog Lake? I am very opposed to this idea and would like to know where things stand with that earlier proposal.	Connie Tettenborn
3/4/2021	To whom it may concern, I'd love to see the city of Belmont build a skatepark- a few parents I know are going to try to go and support this idea.	Hays Michael
3/4/2021	Hello, I am very interested in seeing a Belmont skatepark constructed. Unfortunately I am not able to make the proposal meeting tonight, but I wanted to still voice my support. Thanks.	Joel Hamill
3/4/2021	Greetings, I'm a co-owner of Atlas Skateboard Store in San Mateo. We are the premiere shop that takes care of the skateboarders of the peninsula. We even have an employee that was born, raised and still lives in Belmont. I was his mentor at Carlmont HS about 12 years ago and then we hired him when he was old enough. I will not be able to attend tonight's meeting, but want to express my desire on behalf of the local youth to include a skateboard park in the planning as it is greatly needed in Belmont. Also, please involve skateboarders in the design process so as to not flub it as we have seen happen in other cities. Thank you for hearing me out and feel free to reach out to me any time.	Mike Manidis
3/4/2021	To whom it may concern, I unfortunately can't make the virtual meeting for tonight's master plan. However, I would like the voice the need for more skateparks in the Bay Area, specifically the desire to see a skatepark built in the City of Belmont. I work at Atlas Skateboard Store in San Mateo and as someone born and raised in San Mateo I spent a great deal of my life in Belmont. In the recent past I have seen many Bay Area cities build skateparks and would love to see Belmont follow suit to help sustain the rising amount of skateboarders on The Peninsula. Skateparks (or public places made available for skating) have a net positive effect on the community and would benefit the community greatly.	Patrick Beaudouin
3/4/2021	I cannot attend the meeting today. But I am very excited to see a fun place to skateboard being built in Belmont.	Derik Stevenson
3/4/2021	My name is Wayne Nguyen, I won't be able to attend the master meeting tonight. I do I want to discuss about having a skatepark for Belmont, it would add more public attention to the city. Please consider building a skatepark.	Wayne Nguyen
3/4/2021	I am unable to join tonights master plan meeting for a skatepark in belmont. I was born and raised in the area and always wished there was a skatepark in belmont. I would love to see one built for the community to enjoy.	Tim Quinn
3/4/2021	Hello my name is Greg Smith and I work at Thrasher Magazine and grew up in San Carlos. I won't be able to make the meeting tonight but I would very much like to see a skatepark built down there. Please keep me informed and also if there is anything I can do or future meetings. Thank you so much and good luck!	Greg Smith

3/4/2021	Skating has truly become one of the best ways for me to spend quality time with my son without having to feel like Im forcing him. Having a park local to us would be amazing and I strongly encourage you all to build one for the community.	John Shea
3/4/2021	I am not able to attend tonight's Master Plan meeting, but I want to share with you now my desire for a skateboard park to be a part of Belmont's future. I am 40 years old, have a PhD in mathematics, have worked as a professor and a community outreach program director, and have been a skateboarder for over 25 years. I know the value of skateboarding as a recreation, a culture, and a way of learning life lessons. I know that the people, young an old, of Belmont would benefit from a skatepark in their city	Jack Love
3/4/2021	Hello,Unfortunately I won't be able to join tonight's master plan meeting. But I would love to see a skatepark being built for me, my son and for all of us in the community.	Daniel Beck
3/4/2021	I will be unable to make the meeting regarding the Belmont skatepark tonight. I wanted to reach out regardless, in order to express that I would love to see this project come to light. I feel that it would be a positive contribution to the community and the youth. Please feel free to reach out if needed.	John Voskuyl
3/4/2021	My name is Jake London, a local lifelong skateboarder and Sales Representative for some of the top brands in the industry (e.g., Santa Cruz Skateboards). I am unable to join tonight's meeting, but am interested in your master plan and would love to see a skatepark included in these plans. There are 2.2 million new skateboarders in the world as a result of 2020, and the positive mental and physical effects of this activity are invaluable. This is especially true of the youth at this time.	Jake London
3/4/2021	I wanted to express my support for a skate park in Belmont. I'm unable to attend tonight's meeting. In the past I organized youth support for other city's skate parks and worked with park and rec departments to create safe skate programs that benefit riders of all ages. Skateboarding has opened up a lot of paths in life because it is a community sport that teaches perseverance, struggle along with granting sweet rewards for hard work. Please consider the positive effects having a skate park can have on the community and local businesses.	Larry Thomas
3/4/2021	My apologies for not being able to attend the meeting in person tonight I was pulled into work for a production emergency. I really hope you seriously consider a skateboard in the city of Belmont. Not only is it necessary to give kids a place to hang out, it's a place where kids learn the hard lessons in life. Where they learn how to overcome objectives, interact with all different types of people, and form a community of peers in which they learn to rely on. With parents being forced to work long hours to make ends meet it is more and more necessary to have safe hang out spots for our youth. Skateboarding is entering the Olympics and the state of California has always been a driving force in not only the sport but the industry as well. If the city doesn't consider sanctioning off space for a skatepark it is isolating a community from something they love. Please take this into consideration and thank you for your time.	Joey Escobar
3/4/2021	Unfortunately I am not able to attend tonight's master plan meeting but I would like to state that I am fully in favor of a skatepark being built. Skateparks are vital to the communities they are built in as they keep the community active and act as a second home to a lot of kids. Please consider this when making your decision.	Gabby Mejia
3/4/2021	Hey there my name is Jesse Narvaez I won't be able to join the meeting tonight but I'd love to say a few words thru email. I grew up in Redwood City but always skated all around the peninsula and from my 23 years of experience being a skateboarder I know that having a skatepark in your city helps a lot with kids staying out of trouble and best of all making friends. I now started my own skateboard company called Loopholewheels and I know that if it wasn't for the Phil Shao memorial skatepark in Redwood City I wouldn't be the same person I am today. Thank you for your time I hope Belmont gets its own skatepark in the near future.	Jesse Narvaez
3/4/2021	Hello, my name is Marissa. I won't be able to join tonights meeting but I wanted to show my interest in the idea of a new park being built.I have met so many great people in just my one year of skating and having a new park would be an amazing opportunity to meet more friends in the community, get outside away from constant technology and learn some new skills you never thought you could do. It's been very mentally healthy for me and so many people I've met and I hope to see more of it.	Marissa Rod
3/4/2021	I am writing as a 40 year old Carlmont high school graduate and avid skateboarder. I am not able to make it to tonight's meeting, but I would absolutely love to see a skate park in Belmont	Jack Shirley

EMAILS RECEIVED: INFO@BELMONTPROSPLAN.COM

3/4/2021	Unfortunately I am unable to join tonight's meeting. However I would like the city to know that I fully support the plans to build a skate park. Not only is a skatepark a place to build community, but it helps give kids and young adults (and adults!) a sense of purpose and place where they can exercise, practice discipline, build friendships and a community of their own. As a successful business owner and skateboarder myself, I truly value everything that skateboarding and it's global and local community has done for me. It has sent me around the world and built connections and friendships that have helped me succeed in my life. I truly hope the city will move forward with plans and recognizes the value and impact a skate park will bring to Belmont's thriving community and city.	Ian Ernzer
3/4/2021	cant make it tonight, but I want to say that skate parks are a safe outside individual activity that should be encouraged Please do a skate park in Belmont.	David Keagy
3/4/2021	I'm not able to attend tonight's master plan meeting but we would love to see a skatepark built for the community and the youth of Belmont. I've been skateboarding for over 20 years and it has taught me so many invaluable life lessons as well as introduced me to life time friends that I still am close with today. I'd love to help in the future and crossing my fingers i can one day bring my kids there!	Mike Richins
3/4/2021	Unfortunately, I am unable to attend tonight's Master Plan Meeting. Rather than attending I want to register my support for the skatepark here. Skateboarding has changed significantly in the past 20 years. Not only is it shaping up to be one of the most viewed events in the 2021 olympics it is also a possible remedy to the nation's growing obesity problem among the young. I think the building of a new skatepark will support the following -Offer a space for children and adults to participate in a free, accessible, and diverse physical activity. -Offer a place for high school age kids to meet and engage in healthy activity -Provide a place for kids to learn how to skateboard with the future possibility of representing their country and city in the olympics There is very little other than the financial hurdles that will not be ultimately beneficial from the skatepark being built.	James Beavis
3/4/2021	Hi, Growing up, there was never a good option for us to go skate without skating in private property and getting tickets. I think it would be a great addition for Belmont and get the youth outdoors. I would also enjoy spending time riding. Please consider this when voting.	Max Krieg
3/4/2021	Thank you so much for your assistance with creating a master plan in regards to our aim to building a skatepark, I'd still love to see the skatepark being built.	Tomoko Oikawa
3/4/2021	I am unable to make tonights master plan meeting, but I would love to see a skatepark built in Belmont!	Tobin Valverde
3/4/2021	I heard the city is having a meeting about building a skatepark and I really wanted to go but I'm unavailable. I've been living in the Bay Area my entire life and just recently city's have started building parks and I say the more the better. It doesn't have to be a major project with a huge pool and big ramps but just a plaza style skatepark is best.	Nick Perez
3/4/2021	I am personally in favor of adding a skateboard park to our community. A skateboard park will offer the youth of our community a safe and productive place to skateboard instead of in local parking lots. I hope you consider my thoughts on the issue	Dustin Waters
3/4/2021	The youth of Belmont would greatly benefit from having a skatepark built	Jordan Herz
3/4/2021	Hello, I am available to attend the Belmont master plan but I would suggest a skatepark to be built for all the local citizens and nearby ones. I think it would be great as anyone can enjoy a skatepark.	Lester Legarda

EMAILS RECEIVED: INFO@BELMONTPROSPLAN.COM

DATE	COMMENT	COMMENTER
3/4/2021	Hi my name is Robert Miron and I am unable to attend tonights meeting about the Belmont Master Plan. I grew up skateboarding in San Mateo and have lived in many places around the world, but throughout my travels and localities i would always reflect on how fortunate i was to not only grow up in the peninsula, but that i also grew up with a skatepark and the world of skateboarding in San Mateo. I think it is essential for Belmont to build a skatepark and budget one into it's master plan because there are no skate parks in Belmont and with the creativity and potential of students from Carlmont high school, a skatepark would fit right in and further foster an alternative outlet for Belmont and the surrounding peninsula citie	Robert Miron
3/4/2021	Sorry I'm not able to join the master plan meeting tonight about the skate park being built I think you guys should make it tho. Take some kids off the streets help out some kids learn some healthy active sports	Sean Rael
3/4/2021	I am sending this in regards to the skatepark, as I possibly cannot make the meeting tonight at 7. Being a skateboarder from the peninsula for over 10 years, the idea of a new park brings a lot of excitement. There hasn't been a lot of new skateparks, and the parks in the area are definitely outdated and becoming rough. I think a new park brings a lot of positivity and brings the community together, considering since covid has hit skateparks have become more crowded. Thank you for putting the new skatepark into consideration, and hopefully we can have a new skatepark soon!	Matthew Mehl
3/4/2021	My name is Nicholas Hutter and I have been a resident of Belmont for 31 years. I grew up in this town. And not only did I grow up in this town I grew up skateboarding in this town. Obviously my opinion may seem biased, but I can say with absolute certainty that the building of a decent sized, well built, yet simple, and not overly expensive skatepark along with the renovation of the Barret community center would bring great value to Belmont and our community. I propose the beginning of setting plans into action to rebuild our community center, if you can really call it that(I know it used to be an old school), and include a skatepark. At least that's where I had envisioned it since there appears to be room. I would love to see a few things change in Belmont, which would greatly increase Belmonts value, but this would be a great start. Who am I? Just a local resident who believes in providing the highest quality experience to all people around the world and of course in your immediate community. Let's do this!	Nicholas Hutter
3/4/2021	Hello, I was unable to attend last nights meeting and would very much like a skatepark Belmont can call its own. Skateparks are a source of wholesome entertainment and exercise and bring joy to a wide and diverse range of people. I am 40 years old and still am gravitated to skateparks after 25 years of skateboarding! Please supply our community with a skatepark	Nathan Perkel
3/4/2021	My apologies for not participating in the community call yesterday evening, March 4, 2021 at 7:00pm. However, I am writing to you now asking you to please hear us skateboarders out by saying we need a new skatepark; specifically in the city of Belmont. Speaking as a representative of the Skatepark on Treasure Island, as well as multiple other skateparks I have participated in donating for as well as build; having a well built, concrete skateboard park is the best alternative for the youth of today. Having a skateboard park in the city of Belmont would give many children, as well as young and even older adults a healthy way to exert their time and energy. Especially during these times of Covid, and self quarantine. I believe the citizens, not only of Belmont, but the larger Bay Area would greatly appreciate your consideration in building a skateboard park.	Clay Howell
3/5/2021	Hello All, I emailed the following to the Parks and Recreation commission, but I think it is good to send it here as well because otherwise I do not know whether the information would be available to everyone in the advisory committee and all consultants. I attended the first advisory committee zoom meeting, and a question I asked was not answered. I wondered whether the Master Plan process included the ability to re-designate an Open Space area because, for several reasons, it appears that the difference between a park and an open space is not well understood or appreciated by the advisory committee, the consultant(s) and perhaps even some Commissioners. For example, I asked for clarification of "bike repair stations", and a panelist replied that they could be in either a park or open space. Since if I remember correctly, this item in the survey was listed in the same space as permanent restroom facilities (with flush toilets?), this would suggest that the commission thinks it would be OK to build such facilies at Water Dog Lake Open Space. An open space is an essentially undeveloped area with the aim of preservation. Developments such as flush toilets and bike pump tracks and electric bikes do not belong in an Open Space preserve. Bike repair stations could be located in a parking lot area but not on the trails, but I would place them elsewhere in Belmont first if funds are limited.	Connie Tettenborn

DATE	COMMENT	COMMENTER
3/5/2021 (con't)	The definition and distinction between Parks and Open Spaces should be clearly presented at the beginning of the survey. (I do recall some separate sections for these two in the survey, but not the specifics.) Another point I asked about was addressed to some extent. I said that "widening trails" should not beconsidered a "trail improvement" because widening a narrow single-use trail would encourage even greater IMPROPER use of such a trail by bicyclists. Indeed, the concept of a single-use trail for hikers only has been totally ignored by the City. The 1992 Master Plan has a map of Water Dog Lake Open Space, which indicates that the loop trail around the lake is for hiking only. Unfortunately, not only is Water Dog Lake Open Space referred to as a Park in various online places, but Trailforks.com, which in part caters to mountain bikers, lists the Loop trail with 4 stars for bikers. The Berry trail is also listed for mountain bike use on this site. The incorrect listing of Water Dog Lake "Park" on this site should be removed and signs should clearly state NO BIKES on these trails. The maps of the area provided by the city should also mark them as foot traffic only. If part of the Hidden Valley area is not designated as Open Space, perhaps a trail there could be for only bikes? Another point I made regarding the survey and residency was also addressed, but I think that the question should be placed near the beginning of the survey, not the end, and should be required-- the form could not be completed or submitted if the question is left blank. Further, the options of "Don't know" or "Not sure" should be added along with "Not a Belmont resident" instead of "Other" because some new folks may not know the name of their neighborhood. (I didn't when I first moved here.) In this way, it will be possible to clearly identify which interests and priorities are those of Belmon citizens who are the ones paying city taxes. Thank you for considering my points. Connie Tettenborn	Connie Tettenborn
3/7/2021	Hello All, I would like to amend my earlier suggestion that the difference between Parks and open spaces be explained at the start of the survey so that residents will understand that there is a priority for preservation in open spaces. This introduction should include a clarification that Water Dog Lake is an example of an open space, and it should be stated that there is currently a ban on motorized vehicles at Water Dog Open Space. Because whether this ban includes e-bikes is debatable, a question should be added to the survey to specifically ask whether e-bikes should be prohibited in Water Dog preserve; the current ban is not being enforced regarding e-bikes, since the police chief (a mountain bike proponent) believes that he is enforcing the spirit of the law because, in his view, pedal-assist e-bikes are really no different from regular bikes. Yet according to what I have seen on Nextdoor.com, even some mountain bikers believe e-bikes should be prohibited. In the Advisory Committee meeting last week, I recall that e-bikes were included in a part of the survey, but I do not recall where and the video recording was not clear enough to tell. Because this is a complex topic--there are three different classes of e-bikes; it is not feasible to enforce speed limits; some bikes have much wider tires with potentially greater trail impacts--I do not think that the city should allow such bikes in our Open Spaces without proper review. A follow-up survey question to whether e-bikes should be prohibited should be "Should research into allowing e-bikes in Water Dog Open Space be carried out?" Note that from the Midpeninsula Open Space website: "Electric bicycles are not, and have never been, allowed on Midpen trails, except for use by individuals with a mobility disability on trails where bicycles are allowed." Instead of just letting people make their own decisions, signs that specifically prohibit e-bikes are currently posted at Midpen trailheads. It is true that due to public interest, "[Midpen] Staff will initiate a short-term unpaved trails study to start by summer/fall 2021 on lands of a regional partner agency where e-bikes are currently allowed," but at least they are doing the appropriate analysis. Decisions regarding the use of e-bikes is very critical because of the many sites online that refer to trails in Water Dog Open Space: Mtbproject.com (in which the description of a Water Dog Lake trail ends with"...a ripsnortingly fast ride. Have fun!"), mtbr.com (which has an advocacy forum for e-bikes), singletrack.com, (which specifically says e-bikes are allowed at Water Dog Lake). Thus, if e-bikes are not allowed elsewhere but are allowed here in Belmont's open space, the resulting increase in such bikes here would clearly negatively impact the peaceful enjoyment of the natural environment by hikers and the safety of both hikers and bikers. (An electric motor as small as that in an electric toothbrush makes an annoying buzz that can be heard 30 ft away in a different room!) Even if Belmont citizens want e-bikes in Water Dog Open Space, I strongly suggest that they be banned if Midpeninsula Open Space bans e-bikes at the completion of their study. Regards, Connie Tettenborn	Connie Tettenborn

3/7/2021	Dear City Council Members, We are Belmont residents and would like to share our opinion regarding the consideration to ban cycling from Waterdog. Both of our kids grew-up biking in these trails and our family enjoys daily walks through the park with our chocolate lab. The use of all open spaces has increased during the pandemic, and we are happy to see how our local trails have offered residents an option for healthy outdoor activity during these difficult times. The increased traffic comes with challenges, and it is clear that some modifications may be needed. However, we must remember that as the pandemic gets under better control some of this increase in use will decline. We have heard/seen arguments from both sides on this issue and it is clear that few people in the community have very strong opinions regarding this topic. While they may be the loudest, we do think they represent the character of our community and the friendliness that we see from almost everyone in the trails. We would support the following: Maintain all current trails open to bikes and pedestrians. Prevent the development of any new trails. Provide good maintenance to the current trails, and do not close any trails. Close trails for bikes (as needed) after rain. Prohibit night riding. Prohibit the use of e-bikes. Launch an education campaign to foster a culture of kindness, sharing and safety in the trails and in our community. Open communication and cooperation between Belmont Parks and Recreation and volunteer groups to upkeep, educate, and enforce rules at Waterdog Thank you for all the work you do.	Mauricia Ronderos
3/8/2021	Dear Parks and Recreation, please add me to the distribution list for upcoming PROS questionnaires and upcoming events so that I may participate. If OK, I would also like to forward the information to friends and neighbors to help get the word out. All the best, Thaddeus Block	Thaddeus Block
3/8/2021	As someone who has previously develop opinion polls, surveys and worked on focus groups, I found the survey difficult to follow due to the lack of organization and, in some questions, inconsistent use of categories (parks, open spaces, recreation facilities). Additionally, in some questions, conflating different categories and inconsistent use of terminology creates a lack of understanding of respondents' intentions. Confusing questions, leading options, and conflating categories make any survey ineffective by failing to yield an accurate understanding of respondents' intentions. Inconsistencies and lack of organization may lead to confusion which would further negate capturing respondents' true intentions. Lack of clarity creates confusion and results will be left to interpretations rather than yielding clear, understandable results. Because people likely will not spend excessive time trying to understand the intention of the question(s) -- making things as clear as possible is desirable. While I would be happy to provide detailed feedback, I have limited my comments to a few obvious clarifications that are needed: 1. #5 “”What factors limit your ability to visits our parks and open spaces”” “”ability”” refers to the participants' “”skills”” or “”capability”” or “”talent”” - rather I think you seek the factors that limit visitors' use of the parks and open spaces. Clearly conflating parks and open spaces means you will not know which answers apply to which area -- parks or open spaces. 2. #5 relates to parks & open spaces and “”facilities”” []Poor condition/maintenance of facility []The facilities Does not accommodate my needs	Deniz Bolbol

3/8/2021 (con't)	The word ""facilities"" has somewhat consistently be used to address recreation facilities -- now you use the word ""facilities"" in relation to parks and open spaces which is inconsistent and confusing 3. #7 please clarify by adding bold text: ""parks (not recreation facilities or open spaces)"" for clarification 4. #8 please clarify by adding bold text: ""outdoor recreation/athletic facilities (not open spaces or parks)"" for clarification 5. #9 please clarify by adding bold text: ""open spaces (not recreation facilities or parks)"" for clarification Again, the questions that conflate categories will not yield meaningful responses because the respondents' intention will be unknown. Ambiguous survey questions force an interpretation of the results; interpretation is usually not desired if capturing the respondents' true intentions is the goal.	Deniz Bolbol
