As the global leader of foodservice distribution, we think of Sysco as being, in equal measure, a food sales and marketing company, as well as a supply chain company. To be successful in our industry, we must be innovators and strong operators in both food sales and supply chain. During fiscal year 2022, our Recipe for Growth strategy advanced our capabilities in both arenas, enabling our growth and strengthening our leadership position. Over the past couple of years, we have transformed Sysco from being the most efficient operator in our industry, to becoming a growth company. We remain the most profitable in our sector from an adjusted EBITDA margin perspective, and, we have added to that success the accelerant known as growth. We successfully grew our market share by more than a full point over the past calendar year. That success was driven by Sysco growing more than 1.3 times the U.S. industry at large in our fiscal year 2022. We are confident in our ability to continue growing faster than the industry, profitably. Why? We have a strategy that is focused on our customers and our associates. We are listening to our customers and associates and providing them more of what they need, helping them solve challenging issues, and providing them with innovation that enables their success. We have always had the broadest assortment in the industry, introduced to our customers through the industry's best trained sales force. Over the last couple of years, we have taken that position of strength and improved the flexibility and agility of our supply chain. Additionally, we have improved our ability to be "right on price" through strong partnerships with our suppliers and a new pricing tool that enables us to target pricing at the item level for each individual customer. That is Sysco: innovating in food sales and supply chain. I am pleased with the progress we are making, and I am extremely excited for our future.

Strong Financial Performance Achieved During Industry Pandemic Recovery

I'm very proud of the strong financial performance Sysco delivered in FY22. We grew annual sales by 36.9%[1], on a comparable 52-week basis, to more than $68 billion. We delivered $2.6 billion of adjusted operating income.[1] In the U.S., Sysco grew more than 1.3 times the industry. This result exceeded our goal for the year, and our second half of the year performance was even stronger than the first. This outperformance in the U.S., along with much improved performance in our international businesses, helped drive over $17 billion of total company sales growth for the year.

During the fiscal year, we successfully executed our capital allocation strategy. We made significant investments in our business, reduced Sysco's debt by $450 million, and returned $1.5 billion to shareholders, through both share repurchases and dividends. As a result, we ended the year at 2.9x net debt to Adjusted EBITDA[1].

Substantial Progress Toward our Recipe for Growth Strategy

We made substantial progress on our Recipe for Growth strategy, which aims to strengthen our capabilities in five pillars: Digital, Products and Solutions, Supply Chain, Customer Teams and Future Horizons. FY22 highlights include:

- Implemented an intelligent, data-driven pricing system to improve our ability to be "right on price" at the customer and item level.
- Enhanced Shop, our digital shopping platform, by personalizing our customers' experience and improving search navigation, making it even easier to re-order essentials, and introducing product recommendation engines that increase customer basket size.

1 *Each of these measures are non-GAAP financial measures. See pages 28 through 38 in the accompanying Form 10-K and Annex A for a reconciliation of non-GAAP measures to the corresponding GAAP results and an explanation of the adjustments that we have made in order to calculate these adjusted measures.*

- Introduced new customer propositions called Sysco Your Way and Sysco Perks. Both programs are intended to improve the service experience to our most strategic customers. Both programs will be scaled in the coming year, nationally.
- Transformed our U.S. supply chain to a full six-day service week, while also converting most of our associates to a four-day schedule. This change will enable Sysco to grow profitably for years to come by better leveraging our physical assets and setting the industry standard for increased service.
- Launched new training programs for our frontline associates, including our Sysco Driver Academy and a CDL training program to help source new drivers from within Sysco and provide new career opportunities to our associates.
- Advanced our specialty cuisine platforms through acquisition and integration of new companies. We are scaling our Italian platform through our Greco and Sons business, introducing top-selling items to most geographies and improving team selling across businesses. We also advanced our capabilities in the fast-growing and profitable produce category by adding two acquisitions to FreshPoint, our specialty produce company.

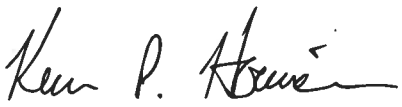
Sysco is leading the industry from a position of strength, and we remain confident that our Recipe for Growth strategy will enable us to grow 1.5x faster than the total market by the end of fiscal year 2024.

Leading our Industry Toward a Sustainable Future

We are proud to have been the first company in our industry to commit to a science-based target to reduce our greenhouse gas emissions. We announced our commitment to purchase nearly 800 electric trucks, and we piloted an electric refrigerated trailer, which we believe will ultimately result in our ability to make deliveries to our customers in fully electric vehicles, reducing both carbon and noise pollution.

To help reach our Global Good Goal to donate $500 million worth of goods and services across our global communities by 2025, we launched a global volunteer recognition program in FY22. During the year, our associates volunteered more than 10,000 hours. Much of that time was spent in food banks, food shelters, and organizations focused on improving food insecurity. Additionally, Sysco donated millions of meals to support the communities we serve, and through our Nourishing Neighbors program we pledged to donate $1 million to Feeding America.

We continue to prioritize our efforts to advance diversity, equity and inclusion at Sysco. Our Global DEI Council developed our DEI framework and key initial priorities and we also launched new efforts to increase our purchases from diverse suppliers, including developing a diverse supplier mentorship program. Importantly, for the first time, we are including advancing our DEI and carbon reduction efforts in our executive compensation program. I am confident that our leadership team is fully committed to making meaningful progress.



Positioned to Deliver Long-Term, Profitable Growth

We could not have accomplished these impressive results without the more than 71,000 associates at Sysco, whose passion and dedication fuel our success. Our associates are the lifeblood and backbone of our company, and they ensure Sysco remains the leader in our industry. Their relentless focus on our customers represents a daily demonstration of our purpose in action – connecting the world to share food and care for one another. They continue to be an inspiration to me every single day.

While we are closely monitoring macroeconomic pressures across the globe, we're upbeat about our business and prepared to navigate another dynamic year. We will continue to deliver market share gains and profitable growth in FY23.

Our leadership team, board of directors, and all our associates are committed to delivering outstanding results to our shareholders as well as continuing to earn your trust and investment.

Sincerely,

Kevin Hourican
President & CEO

ITEM 1. BUSINESS

Unless this Form 10-K indicates otherwise or the context otherwise requires, the terms "we," "our," "us," "Sysco," or "the company" as used in this Form 10-K refer to Sysco Corporation together with its consolidated subsidiaries and divisions.

Overview

Sysco Corporation, acting through its subsidiaries and divisions, is the largest global distributor of food and related products primarily to the foodservice or food-away-from-home industry. Our purpose is "Connecting the World to Share Food and Care for One Another." We provided products and related services to approximately 700,000 customer locations, including restaurants, healthcare and educational facilities, lodging establishments and other foodservice customers during fiscal 2022.

Founded in 1969, Sysco commenced operations as a public company in March 1970 when the stockholders of nine companies exchanged their stock for Sysco common stock. Since our formation, we have grown from $115 million to our all-time high of $68.6 billion in annual sales in fiscal 2022, both through internal expansion of existing operations and through acquisitions.

Sysco's fiscal year ends on the Saturday nearest to June 30th. This resulted in a 52-week year ended July 2, 2022 for fiscal 2022, a 53-week year ended July 3, 2021 for fiscal 2021 and a 52-week year ended June 27, 2020 for fiscal 2020. We will have a 52-week year ending July 1, 2023 for fiscal 2023.

Sysco Corporation is organized under the laws of Delaware. The address and telephone number of our executive offices are 1390 Enclave Parkway, Houston, Texas 77077-2099, (281) 584-1390. This annual report on Form 10-K, as well as all other reports filed or furnished by Sysco pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (Exchange Act), are available free of charge on Sysco's website at *www.sysco.com* as soon as reasonably practicable after they are electronically filed with or furnished to the Securities and Exchange Commission (SEC).

Reporting Segments

Sysco distributes food and related products to restaurants, healthcare and educational facilities, lodging establishments and other foodservice customers. Our primary operations are located in North America and Europe. Under the accounting provisions related to disclosures about segments of an enterprise, we have combined certain operations into three reportable segments. "Other" financial information is attributable to our other operations that do not meet the quantitative disclosure thresholds.

- ***U.S. Foodservice Operations*** – primarily includes (a) the company's U.S. Broadline operations, which distribute a full line of food products, including custom-cut meat, seafood, produce, specialty Italian, specialty imports and a wide variety of non-food products and (b) our U.S. Specialty operations, which include our FreshPoint fresh produce distribution business, our Specialty Meats and Seafood Group specialty protein operations, our growing Italian Specialty platform anchored by Greco & Sons, our Asian specialty distribution company and a number of other small specialty businesses that are not material to the operations of Sysco;
- ***International Foodservice Operations*** – includes operations outside of the United States (U.S.), which distribute a full line of food products and a wide variety of non-food products. The Americas primarily consists of operations in Canada, Bahamas, Mexico, Costa Rica and Panama, as well as our export operations that distribute to international customers. Our European operations primarily consist of operations in the United Kingdom (U.K.), France, Ireland and Sweden;
- ***SYGMA*** – our U.S. customized distribution operations serving quick-service chain restaurant customer locations; and
- ***Other*** – primarily our hotel supply operations, Guest Worldwide.

Broadline operating sites distribute a full line of food products and a wide variety of non-food products to both traditional and chain restaurant customers, hospitals, schools, hotels, industrial caterers and other venues where foodservice products are served. SYGMA operating sites distribute a full line of food products and a wide variety of non-food products to certain chain restaurant customer locations. Selected financial data for each of our reportable segments, as well as financial information concerning geographic areas, can be found in Note 21, "Business Segment Information," in the Notes to Consolidated Financial Statements in Item 8.

Customers and Products

Sysco's customers in the foodservice industry include restaurants, hospitals and nursing homes, schools and colleges, hotels and motels, industrial caterers and other similar venues where foodservice products are served.

The products we distribute include:

- frozen foods, such as meats, seafood, fully prepared entrées, fruits, vegetables and desserts;
- canned and dry foods;
- fresh meats and seafood;
- dairy products;
- beverage products;
- imported specialties; and
- fresh produce.

We also supply a wide variety of non-food items, including:

- paper products such as disposable napkins, plates and cups;
- tableware such as china and silverware;
- cookware such as pots, pans and utensils;
- restaurant and kitchen equipment and supplies; and
- cleaning supplies.

A comparison of the sales mix in the principal product categories during the last three years is presented below:

(1) Other sales relate to non-food products, including textiles and amenities for our hotel supply business, equipment and subscription sales for our previously owned Cake business, and other janitorial products, medical supplies and smallwares.

Our distribution centers, which we refer to as operating sites, distribute branded merchandise, as well as products packaged under our private brands. Products packaged under our private brands have been manufactured for Sysco according to specifications that have been developed by our quality assurance team. In addition, our quality assurance team certifies the manufacturing and processing plants where these products are packaged, enforces our quality control standards and identifies supply sources that satisfy our requirements.

We believe that prompt and accurate delivery of orders, competitive pricing, customer service and the ability to provide a full array of products and services to assist customers in their foodservice operations are of primary importance in the marketing and distribution of foodservice products to our customers. Our operating sites offer daily delivery to certain customer locations and have the capability of delivering special orders on short notice. Through the sales and marketing representatives and support staff, we stay informed of the needs of our customers and acquaint them with new products and services. We also provide ancillary services relating to foodservice distribution, such as providing customers with product usage reports and other data, menu-planning advice, food safety training and assistance in inventory control, as well as access to various third-party services designed to add value to our customers' businesses.

No single customer accounted for 10% or more of Sysco's total sales for the fiscal year ended July 2, 2022.

We estimate that our sales by type of customer during the past three fiscal years were as follows:

Type of Customer	2022	2021	2020
Restaurants	63%	66%	62%
Healthcare	8	9	9
Education, government	8	6	8
Travel and leisure	7	5	7
Other[1]	14	14	14
TOTALS	**100%**	**100%**	**100%**

(1) Other includes cafeterias that are not stand-alone restaurants, bakeries, caterers, churches, civic and fraternal organizations, vending distributors, other distributors and international exports, as well as retail food sales and logistics services. None of these types of customers, as a group, exceeded 5% of total sales in any of the years for which information is presented.

We estimate that sales to our customers in the food service management (FSM) sector, which include large customers that service cafeterias in institutions such as universities, hospitals, and sporting venues, accounted for 6% of sales in fiscal 2022 as compared to 5% of sales in fiscal 2021. These sales are reflected within the respective customer types listed in the table above, depending on the type of customer the FSM operator serves.

Sources of Supply

We purchase from thousands of suppliers, both domestic and international, none of which individually accounted for more than 10% of our purchases for fiscal 2022. These suppliers consist generally of large corporations selling brand name and private label merchandise, as well as independent regional brand and private label processors and packers. We also provide specialty and seasonal products from small to mid-sized producers to meet a growing demand for locally sourced products. Our locally sourced products, including produce, meats, cheese and other products, help differentiate our customers' offerings, satisfy demands for new products, and support local communities. Purchasing is generally carried out through both centrally developed purchasing programs, domestically and internationally, and direct purchasing programs established by our various operating sites.

We administer a consolidated product procurement program designed to develop, obtain and ensure consistent quality food and non-food products. The program covers the purchasing and marketing of branded merchandise, as well as products from a number of national brand suppliers, encompassing substantially all product lines. Some of our products are purchased internationally within global procurement centers in order to build strategic relationships with international suppliers and to optimize our supply chain network. We also focus on increasing profitability by lowering operating costs and by lowering aggregate inventory levels, which reduces future facility expansion needs at our operating sites, while providing greater value to our suppliers and customers.

Working Capital Practices

Our growth is funded through a combination of cash on hand, cash flow from operations, commercial paper issuances and long-term borrowings. See the discussion in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" regarding our liquidity, financial position and sources and uses of funds.

We extend credit terms to some of our customers based on our assessment of each customer's creditworthiness. We monitor each customer's account and will suspend shipments if necessary.

A majority of our sales orders are filled within 24 hours of when customer orders are placed. We generally maintain inventory on hand to be able to meet customer demand. The level of inventory on hand will vary by product depending on shelf-life, supplier order fulfillment lead times and customer demand. We also make purchases of additional volumes of certain products based on supply or pricing opportunities.

We take advantage of suppliers' cash discounts where appropriate. Otherwise, we pay our suppliers according to our payment terms.

Global Support Center

Our Global Support Center (GSC) staff makes available a number of centralized services to our operating sites and our shared services staff performs support activities for employees, suppliers and customers. Members of these group possess experience and expertise in, among other areas, customer and vendor contract administration, accounting and finance, treasury, legal, information technology, payroll and employee benefits, risk management and insurance, sales and marketing, merchandising, inbound logistics, human resources, strategy and tax compliance services. The GSC also makes available supply chain expertise, such as in warehousing, distribution, and omni-channel strategic services, which provide assistance in operational best practices, including space utilization, energy conservation, fleet management and work flow.

Capital Improvements

During fiscal 2022, 2021 and 2020, $632.8 million, $470.7 million and $720.4 million, respectively, were invested in facilities, technology, equipment, delivery fleet and other capital asset enhancements. From time to time, we dispose of assets in the normal course of business; we consider proceeds from these asset sales to be an offset to capital expenditures. During fiscal 2022, 2021 and 2020, capital expenditures, net of proceeds from sales of assets, were $608.7 million, $411.5 million and $691.7 million, respectively. Capital expenditures, net of proceeds from sales of assets, as a percentage of sales during fiscal 2022, 2021 and 2020 were 0.9%, 0.8% and 1.3%, respectively. In order to preserve our liquidity in response to the COVID-19 pandemic, we reduced our capital expenditures by eliminating capital projects that were not critical for our business in fiscal 2021, and in fiscal 2022, our capital expenditures returned to more normal levels. During the three years ended July 2, 2022, capital expenditures were financed primarily by internally generated funds and bank and other borrowings. We expect to finance our fiscal 2023 capital expenditures from cash flows from operations and bank and other borrowings.

Human Capital Resources

We believe engaged and empowered associates drive business success and that attracting, developing and retaining the best talent globally to drive our business success is a key driver of the company's long-term value. Our diverse associates and inclusive culture create an environment where associates can develop their skills and contribute to our success by driving strong financial performance. As of July 2, 2022, we employed approximately 71,000 employees, including 49,000 U.S. employees and 22,000 employees outside the United States, as compared to approximately 58,000 employees as of July 3, 2021. Also, approximately 98% of our U.S.-based associates are classified as full-time associates, defined as employees who work 30 or more hours per week and approximately 17% of our employees were represented by unions, primarily the International Brotherhood of Teamsters and unions in France and Sweden. Approximately 9.0% of our union employees are covered by collective bargaining agreements that are subject to renegotiation in fiscal 2023.

Talent Acquisition and Talent Management

Maintaining a pipeline of talent is critical to our ongoing success and is essential to our succession planning efforts and to growing leaders throughout the organization. Our leadership is responsible for attracting and retaining top talent by facilitating an environment where employees feel supported and encouraged in their professional and personal development. Specifically, we promote employee development by cultivating a high-impact learning culture for our associates through a variety of enterprise development programs and learning resources, including goal-setting and career development processes. We commit to investing in our employees through on the job training and coaching.

A key focus of our Talent Acquisition has been achieving hiring targets for our transportation associates. Throughout our industry, drivers are in short supply and hiring is a challenge. In fiscal 2022, Sysco invested in its first Sysco Driver Academy, enabling us to develop and train our own drivers, which we refer to as Delivery Partners. This program gives our warehouse associate population an opportunity to Delivery Partners. Trainees are paid to attend the academy, and we pay for their licensing and certification fees.

Additionally, through a program titled Sysco Speaks, we conduct annual, confidential engagement surveys of our global workforce that are administered and analyzed by an independent third party.

Total Rewards

We are committed to equal pay for equal work, regardless of gender, race, ethnicity or other personal characteristics. To deliver on that commitment, we benchmark and set pay ranges based on market data and consider various factors, such as an employee's role and experience, job location and individual performance. We also regularly review our compensation practices to promote fair and equitable pay. In fiscal 2022, our hourly associates received an average hourly wage of $23.49, and 100% of associates in our U.S. distribution facilities received pay above state minimum wage thresholds. Also, our full-time associates receive paid vacation and sick time benefits, short-term and long-term incentives, retirement plans, training and development, access to career opportunities, paid pregnancy and adoption leave benefits, short-term and long-term disability benefits, health and welfare benefits, and recognition, as well as other programs like dependent scholarships and employee discounts.

Diversity, Equity and Inclusion

Our Diversity, Equity and Inclusion (DEI) team develops global strategic initiatives that are implemented to ensure that the needs specific to each region are addressed. To accelerate our global efforts to create a more diverse workforce and an equitable and inclusive culture, we hired a Vice President, Chief Diversity Officer in fiscal 2021. We use our Global DEI Advisory Council, which has been tasked with creating our three-year DEI Roadmap and Real Talk Dialogues, to provide leaders and associates safe forums to have open, honest, two-way and completely voluntary conversations. Our chief executive officer signed the CEO Pledge, as part of the CEO Action for Racial Equity, a group that includes business leaders from across the Fortune 100 companies that is committed to advancing diversity and inclusion in the workplace. In addition, we are a member of the Business Coalition for Equality Act, a group of U.S. employers that support legislation providing the same protections for LGBTQ+ associates as other protected groups under federal law.

As of July 2, 2022, in the U.S, women held 24% of management roles (defined as managers of people) and 28% of officer roles (defined as executives and senior level employees within the global support center and field organizations). In the U.S., Hispanic or Latinx, Black or African American, and Asian employees held 13%, 9% and 4% of management roles and 4%, 9%, and 7% of officer roles, respectively.

Our Associate Resource Groups (ARGs) are voluntary, associate-led groups organized to foster a diverse, inclusive workplace at Sysco, and are a critical element of our engagement and DEI efforts at both our headquarters and at operating sites by interested associates.

Competition

A large number of companies are engaged in the distribution of food and non-food products to the foodservice industry. Our customers may choose to purchase products directly from wholesale or retail outlets, including club, cash and carry and grocery stores, online retailers, or negotiate prices directly with our suppliers. We compete with local and regional distributors and some organizations that operate on a multi-region basis. In addition, these local, regional and multi-regional distributors can create purchasing cooperatives and marketing groups to enhance their competitive abilities by expanding their product mix, improving purchasing power and extending their geographic capabilities. Our customers are accustomed to purchasing from multiple suppliers and channels concurrently. Customers can choose from many broadline foodservice distributors, specialty distributors that focus on specific categories such as produce, meat or seafood, other wholesale channels, club stores, cash and carry stores, grocery stores and numerous online retailers. Since switching costs are very low, customers can make supplier and channel changes very quickly. We believe that the principal competitive factors in the foodservice industry are effective customer contacts, the ability to deliver a wide range of quality products and related services on a timely and dependable basis, and competitive prices. There are few barriers to market entry.

We estimate that we serve about 17% of the approximately $300 billion annual foodservice market in the U.S., as estimated by Technomic, Inc., for calendar year 2021. Technomic projects the market size to increase to approximately $345 billion by the end of calendar 2022. We also serve certain international geographies that vary in size and amount of market share. We believe, based upon industry trade data, that our sales to the U.S. and Canada food-away-from-home industry were the highest of any foodservice distributor during fiscal 2022. While comprehensive industry statistics are not available, we believe that, in most instances, our operations in the U.S. and Canada are among the leading distributors of food and related non-food products to foodservice customers in those trading areas. We believe our competitive advantages include our sales consultants; our diversified product base, which includes quality-assured Sysco brand products; our service reliability; the ancillary services we provide to our customers, such as business reviews and menu analysis; and our multi-regional presence in North America and Europe, combined with a large geographical footprint of multi-temperature warehouses, which mitigates some of the impact of regional economic declines that may occur over time.

Government Regulation

Our company is required to comply, and it is our policy to comply, with all applicable laws and regulations in the numerous countries throughout the world in which we do business.

In the U.S., as a marketer and distributor of food products, we are subject to the Federal Food, Drug and Cosmetic Act and regulations promulgated thereunder by the U.S. Food and Drug Administration (FDA). The FDA regulates food safety and quality through various statutory and regulatory mandates, including manufacturing and holding requirements for foods through good manufacturing practice regulations, hazard analysis and critical control point (HACCP) requirements for certain foods, and the food and color additive approval process. The agency also specifies the standards of identity for certain foods, prescribes the format and content of information required to appear on food product labels, regulates food contact packaging and materials, and maintains a Reportable Food Registry for the industry to report when there is a reasonable probability that an article of food will cause serious adverse health consequences. For certain product lines, we are also subject to the Federal Meat Inspection Act, the Poultry Products Inspection Act, the Perishable Agricultural Commodities Act, the Packers and Stockyard Act and regulations promulgated by the U.S. Department of Agriculture (USDA) to interpret and implement these statutory provisions. The USDA imposes standards for product safety, quality and sanitation through the federal meat and poultry inspection program. The USDA reviews and approves the labeling of these products and also establishes standards for the grading and commercial acceptance of produce shipments from our suppliers. We are also subject to the Public Health Security and Bioterrorism Preparedness and Response Act of 2002, which imposes certain registration and record keeping requirements on facilities that manufacture, process, pack or hold food for human or animal consumption, as well as Food Defense, which is a responsibility of the Department of Homeland Security.

The Food Safety Modernization Act (FSMA) has significantly expanded our food safety requirements. We have established and continue to maintain comprehensive, prevention-based controls across the food supply chain that are both verified and validated, as required by FDA regulations implementing FSMA. The FSMA further imposes requirements for food products imported into the U.S. and provides the FDA with mandatory recall authority.

We and our products are also subject to state and local regulation through such measures as the licensing of our facilities; enforcement by state and local health agencies of state and local standards for our products; and regulation of our trade practices in connection with the sale of our products. Our facilities are subject to regulations issued pursuant to the U.S. Occupational Safety and Health Act by the U.S. Department of Labor. These regulations require us to comply with certain manufacturing, health and safety standards to protect our employees from accidents and to establish hazard communication programs to transmit information on the hazards of certain chemicals present in products we distribute. We are also subject to the National Labor Relations Act, which governs the process for collective bargaining between employers and employees and protects the rights of both employers and employees in the workplace.

Our processing and distribution facilities must be registered with the FDA biennially and are subject to periodic government agency inspections by the FDA and USDA. Our facilities are generally inspected at least annually by federal and/or state authorities. We also must establish communication programs to transmit information about the hazards of certain chemicals present in some of the products we distribute. In addition, we must comply with Federal Trade Commission standards with respect to any claims made about our food products in advertising and marketing materials.

Our customers include several departments of the federal government, including the Department of Defense and Department of Veterans Affairs facilities, as well as certain state and local entities. These customer relationships subject us to additional regulations applicable to government contractors.

We are also subject to regulation by numerous federal, state and local regulatory agencies, including, but not limited to, the U.S. Department of Labor, which sets employment practice standards for workers, and the U.S. Department of Transportation, as well as its agencies, the Surface Transportation Board, the Federal Highway Administration, the Federal Motor Carrier Safety Administration, and the National Highway Traffic Safety Administration, which collectively regulate our trucking operations through the regulation of operations, safety, insurance and hazardous materials. We must comply with the safety and fitness regulations promulgated by the Federal Motor Carrier Safety Administration, including those relating to drug and alcohol testing and hours-of service. Such matters as weight and dimension of equipment also fall under federal and state regulations. We are subject to regulations of the Federal Aviation Administration covering items transported by air. In addition, we are subject to the Federal False Claims Act, and similar state statutes, which prohibit knowingly presenting or causing to be presented a false or fraudulent claim for payment to the government and the knowing and improper retention of overpayments.

The U.S. Foreign Corrupt Practices Act (FCPA) prohibits bribery of public officials to obtain or retain business in foreign jurisdictions. The FCPA also requires us to keep accurate books and records and to maintain internal accounting controls to detect and prevent bribery and to ensure that transactions are properly authorized and recorded. We have implemented and continue to develop a robust anti-corruption compliance program applicable to our global operations to detect and prevent bribery and to comply with these and other anti-corruption laws in countries where we operate.

Our business is subject to competition laws in the various jurisdictions where we operate, including the Sherman Antitrust Act and related federal and state antitrust laws in the U.S. These laws and regulations generally prohibit competitors from fixing prices, boycotting competitors, or engaging in other conduct that unreasonably restrains competition. In many jurisdictions, compliance with these competition laws is of special importance to us, and our operations may come under special scrutiny by competition law authorities, due to our competitive position in those jurisdictions.

Outside the U.S., our business is subject to numerous similar statutes, regulations, and other regulatory requirements. For example, we are subject to legal and regulatory requirements of the European Union (the EU), as well as those of EU countries where we conduct business (including Ireland, France and Sweden), which requirements relate to, among other things, competition, product composition, packaging, labeling, advertisement (including nutrition and health claims) and the safety of food products, as well as the health, safety and working

conditions of employees. We are subject to privacy laws in the EU, including the General Data Protection Regulation (GDPR), which requires companies to meet certain requirements regarding the handling of personal data. In addition, our business is subject to the U.K. Modern Slavery Act 2015, which requires certain companies that operate in the U.K. to prepare a report describing steps that they have taken to ensure that slavery and human trafficking is not taking place in their supply chain or business. Our business is also subject to the U.K. Bribery Act 2010, an anti-corruption law that criminalizes the failure by a company to prevent persons associated with that company from offering or paying bribes to government officials or non-government persons in order to obtain or retain business or a business advantage for the company, as well as restricting the offer, payment or receipt of bribes to or from governmental officials and non-governmental persons.

All of our company's facilities and other operations in the U.S. and elsewhere around the world are subject to various environmental protection statutes and regulations, including those in the U.S., the U.K. and the EU, relating to: (1) the use of water resources and the discharge of wastewater; (2) the discharge of pollutants into the air, including vehicle emissions; (3) proper handling, treatment and disposing of solid and hazardous wastes; and (4) protecting against and appropriately investigating and remediating spills and releases. Further, most of our distribution facilities have ammonia-based refrigeration systems and tanks for the storage of diesel fuel and other petroleum products which are subject to laws regulating such systems and storage tanks (including the investigation and remediation of soil and groundwater contamination associated with the use of underground storage tanks). See "Item 1A. Risk Factors - Business and Operational Risks - We may incur significant costs to comply with environmental laws and regulations, and we may be subject to substantial fines, penalties, or third-party claims for non-compliance."

General

We have numerous trademarks that are of significant importance, including the SYSCO® and Brakes® trademarks, in addition to our privately branded product trademarks that include these trademarks. In fiscal 2022, six of our private brands had sales at or near $1 billion. These trademarks and the private brands on which they are used are widely recognized within the foodservice industry. Both our U.S. and European trademarks are effective for a ten-year period, and we generally renew our trademarks before their expiration dates unless a particular trademark is no longer in use. We believe the loss of the SYSCO® trademark would have a material adverse effect on our results of operations. We do not have any material patents or licenses.

We are not engaged in material research and development activities relating to the development of new products or the improvement of existing products.

Our sales do not generally fluctuate significantly on a seasonal basis; therefore, our business is not deemed to be seasonal.

As of July 2, 2022, we operated 333 distribution facilities throughout North America and Europe.

ITEM 1A. RISK FACTORS

The following discussion of "risk factors" identifies the most significant factors that may adversely affect our business, operations, financial position or future financial performance. This information should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and related notes contained in this report. The following discussion of risks is not all inclusive but is designed to highlight what we believe are the most significant factors to consider when evaluating our business. These factors could cause our future results to differ from our expectations expressed in the forward-looking statements identified within "Management's Discussion and Analysis of Financial Condition and Results of Operations," and from other historical trends.

Industry and General Economic Risks

Our industry is characterized by low margins, and periods of significant or prolonged inflation or deflation affect our product costs and may negatively impact our profitability.

The foodservice distribution industry is characterized by relatively high inventory turnover with relatively low profit margins. Volatile food costs have a direct impact on our industry. We experienced an elevated inflation rate of approximately 15.0% in our U.S. Broadline operations during fiscal 2022, primarily in the paper and disposables, poultry and meat categories. In periods of significant product cost inflation, if we are unable to pass on all or a portion of such product cost increases to our customers in a timely manner, our results of operations would be adversely affected. In addition, periods of rapidly increasing inflation may adversely affect our business due to the impact of such inflation on discretionary spending by consumers and our limited ability to increase prices in the current, highly competitive environment. Conversely, our business may be adversely affected by periods of product cost deflation, because we make a significant portion of our sales at prices that are based on the cost of products we sell plus a percentage margin, mark-up or fee per case. As a result, our results of operations may be adversely affected during periods of product cost deflation, even though our gross profit percentage may remain relatively constant.

A shortage of qualified labor and increases in labor costs could negatively affect our business and materially reduce earnings.

The future success of our operations, including the achievement of our strategic objectives, depends on our ability, and the ability of certain third parties on which we rely, to identify, recruit, develop and retain qualified and talented individuals. As a result, any shortage of qualified labor could significantly adversely affect our business. Any such shortage could decrease our ability to effectively serve our customers and achieve our strategic objectives. In the current operating environment, we are experiencing a shortage of qualified labor in certain geographies, particularly with regard to recruiting and retaining warehouse workers and drivers, resulting in increased costs from certain temporary wage actions, such as hiring and referral and retention bonus programs. See the discussion under "Human Capital Resources" in Item 1, "Business" for additional information regarding our talent acquisition and talent management efforts in the context of these labor shortages. Unsuccessful recruiting and retention efforts as a result of such continuing shortages for a prolonged period of time could have a material adverse effect on the company's financial condition and results of operations.

Labor shortages will also likely lead to higher wages for employees and higher costs to purchase the services of third parties. Increases in labor costs, such as increases in minimum wage requirements, wage inflation and/or increased overtime, reduce our profitability and that of our customers. Increases in such labor costs for a prolonged period of time could have a material adverse effect on the company's financial condition and results of operations.

Global health developments and economic uncertainty resulting from the COVID-19 pandemic continue to adversely affect, our business, financial condition and results of operations.

Public health crises, pandemics and epidemics, such as the COVID-19 pandemic, have impacted our operations directly and may continue to impact us directly, or may continue to disrupt the operations of our business partners, suppliers and customers in ways that could have an adverse effect on our business, results of operations and financial condition. Fear of such events may further alter consumer confidence, behavior and spending patterns, and could adversely affect the economies and financial markets of many countries (or globally), resulting in an economic downturn that could affect customers' demand for our products.

In response to the outbreak of COVID-19 and its development into a pandemic, governmental authorities in many countries in which we operate, and in which our customers are present and suppliers operate, have, imposed mandatory closures, sought voluntary closures and imposed restrictions on, or advisories with respect to, travel, business operations and public gatherings or interactions. Among other matters, these actions have required or strongly urged various venues where foodservice products are served, including restaurants, schools, hotels and cruise liners, to reduce or discontinue operations, which have adversely affected and will continue to adversely affect demand in the foodservice industry, including demand for our products and services. Mutations of the virus have arisen, and are continuing to arise, some of which have proven to be particularly aggressive variants. As these variants spread, some governmental authorities have reintroduced certain restrictions and others may decide to do so in the future, which could adversely affect demand in the foodservice industry.

To the extent the COVID-19 pandemic continues to adversely affect our business, results of operations and financial condition, it may also have the effect of heightening many of the other risks described in this Annual Report on Form 10-K and subsequent filings with the SEC, such as those risks relating to our level of indebtedness, and may have an adverse effect on the price of our common stock.

Unfavorable macroeconomic conditions, as well as unfavorable conditions in particular local markets, may adversely affect our results of operations and financial condition.

Our results of operations are susceptible to regional, national and international economic trends and uncertainties. Economic conditions can affect us in the following ways:

- Unfavorable conditions can depress sales and/or gross margins in a given market.
- Food cost and fuel cost inflation can lead to reductions in the frequency of dining out and the amount spent by consumers for food-away-from-home purchases, reducing demand for our products.
- Heightened uncertainty in the financial markets negatively affects consumer confidence and discretionary spending.
- The inability to consistently access credit markets could impair our ability to market and distribute food products, support our operations and meet our customers' needs.
- Liquidity and the inability of our customers and suppliers to consistently access credit markets to obtain cash to support their operations can cause temporary interruptions in our ability to collect funds from our customers and obtain the products and supplies that we need in the quantities and at the prices that we request.
- Foreign exchange rate fluctuations can adversely impact our competitiveness and/or financial results.

The countries in which we operate, have experienced, from time to time, deteriorating economic conditions and heightened uncertainty in financial markets, which have adversely impacted business and consumer confidence and spending and depressed capital investment and economic activity in the affected regions. As reported in July 2022 by the U.S. Bureau of Economic Analysis, the U.S. economy experienced its second consecutive quarter of negative economic growth, which may represent a leading indicator of an upcoming recession. A prolonged economic downturn or recession in the U.S. or global economies, and the impact on GDP growth, corporate earnings, consumer confidence, employment rates, income levels and/or personal wealth, could have a material adverse effect on our results of operations and financial condition.

We may not be able to fully compensate for increases in fuel costs, and fuel hedging arrangements intended to contain fuel costs could result in above market fuel costs.

We require significant quantities of fuel for our delivery vehicles and are exposed to the risk associated with fluctuations in the market price for fuel. The price and supply of fuel can fluctuate significantly based on international, political and economic circumstances (such as Russia's invasion of Ukraine), as well as other factors outside our control, such as actions by the Organization of the Petroleum Exporting Countries, or OPEC, and other oil and gas producers, regional production patterns, weather conditions and environmental concerns, and the resurgence of demand, as travel restrictions associated with the COVID-19 pandemic are scaled back. The cost of fuel affects the prices we pay for products, as well as the costs we incur to deliver products to our customers. Although we have been able to pass along a portion of increased fuel costs to our customers in the past through, among other things, our fuel surcharge program, we may not be able to do so in the future. If fuel costs continue to increase in the future, we may experience difficulties in passing all or a portion of these costs along to our customers, which may adversely affect our results of operations.

We routinely enter into fuel hedging arrangements, including fuel derivatives, to hedge our exposure to volatile fuel prices. Nevertheless, our fuel hedging transactions may not be effective in protecting us from changes in fuel prices, and if fuel prices were to decrease significantly, these hedging arrangements would result in our paying higher-than-market costs for a portion of our diesel fuel. In addition, our future use of fuel derivatives would expose us to the risk that any of our counterparties fails to perform its obligations, whether due to its insolvency or otherwise, which could result in financial losses.

Economic and political instability could adversely affect our results of operations and financial condition.

Our international operations subject us to certain risks, including economic and political instability and potential unfavorable changes in laws and regulations in international markets in which we operate. For example, the U.K. exited the EU on January 31, 2020, with a transition period that ended on December 31, 2020. Local or regional geopolitical events, such as Brexit and, the "yellow vest" protests in France in 2020, have negatively impacted our operations. Similar future trade or labor disruptions or disputes could have a negative impact on our operations in the EU and other parts of the world.

In addition, military conflicts, such as the invasion of Ukraine by Russia, can negatively impact global demand. In response to such conflicts, various governments can and have recently imposed export controls on certain products and financial and economic sanctions on certain industry sectors and parties, which actions can have a negative impact on our operations. Although our business has not been materially impacted to date by the ongoing invasion of Ukraine by Russia, it is impossible to predict the extent to which our operations, or those of our suppliers and customers, will be impacted in the short and long term, or the ways in which the conflict may impact our business. The extent and duration of the military action, sanctions and resulting market disruptions are difficult to predict, but could be substantial. Further escalation of geopolitical tensions related to the military conflict, including increased trade barriers or restrictions on global trade, could result in, among other things, cyberattacks, supply disruptions, lower consumer demand and changes to foreign exchange rates and financial markets. Any or all of these factors could disrupt our business directly and could disrupt the business of our customers, which could have an adverse effect on our business and results of operations. Any such disruptions may also magnify the impact of other risks described in this Form 10-K.

Competition and the impact of GPOs may reduce our margins and make it difficult for us to maintain our market share, growth rate and profitability.

The foodservice distribution industry is fragmented and highly competitive, with local, regional and multi-regional distributors and specialty competitors. Local and regional companies often align themselves with other smaller distributors through purchasing cooperatives and marketing groups, with the goal of enhancing their geographic reach, private label offerings, overall purchasing power, cost efficiencies and ability to meet customer distribution requirements. These suppliers may also rely on local presence as a source of competitive advantage, and they may have lower costs and other competitive advantages due to geographic proximity. Furthermore, barriers to entry by new competitors, or geographic or product line expansion by existing competitors, are low. Additionally, increased competition from non-traditional sources (such as club stores and commercial wholesale outlets with lower cost structures), online direct food wholesalers and cash and carry operations have served to further increase pressure on the industry's profit margins, and continued margin pressure within the industry may have a material adverse effect on our results of operations.

Moreover, some of our customers purchase their products from us through group purchasing organizations, or "GPOs," in an effort to lower the prices paid by these customers on their foodservice orders. GPOs have a relatively larger presence in the healthcare, lodging and foodservice management customer segments. If these GPOs are able to add a significant number of our customers as members, it may negatively affect our business, financial condition, or results of operations.

Finally, demand for food-away-from-home products is volatile and price sensitive, imposing limits on our customers' ability to absorb cost increases. New and increasing competitive sources may result in increased focus on pricing and on limiting price increases or may require increased discounting or other concessions. Such competition or other industry pressures may result in margin erosion and/or make it difficult for us to attract and retain customers.

If we are unable to effectively differentiate ourselves from our competitors, our results of operations could be adversely impacted. In addition, even if we are able to effectively differentiate ourselves, we may only be able to do so through increased expenditures or decreased prices, which could also adversely impact our results of operations.

Business and Operational Risks

Conditions beyond our control can interrupt our supplies, increase our product costs and impair our ability to deliver products and services to our customers.

We obtain substantially all of our foodservice and related products from third-party suppliers. Although our purchasing volume can provide benefits when dealing with suppliers, suppliers may not be able to provide the foodservice products and supplies that we need due to conditions outside of their control. We are also subject to delays caused by interruptions in production and increases in product costs based on conditions outside of our control. These conditions include shortages of qualified labor for our suppliers, work slowdowns, work interruptions, strikes or other job actions by employees of suppliers, short-term weather conditions or more prolonged climate change, crop and other agricultural conditions, water shortages, transportation interruptions (such as shortages of ocean cargo containers), unavailability of fuel or increases in fuel costs, product recalls, competitive demands, civil insurrection or social unrest, terrorist attacks or international hostilities (such as the invasion of Ukraine by Russia) and natural disasters, epidemics, pandemics (such as the COVID-19 pandemic) or other human or animal disease outbreaks or other catastrophic events (including, but not limited to, foodborne illnesses). Many of these conditions outside of our control could also impair our ability to provide our products and services to our customers or increase the cost of doing so. Our current operating environment continues to adjust in response to COVID-19, placing significant pressure on the food-away-from-home supply chain. Customer demand is currently outpacing available supply in certain categories. Certain suppliers are struggling to meet demand for our orders, which impairs our ability to deliver products and services to our customers. Prolonged future supply shortages could have an adverse effect on the company's financial condition and results of operations.

Further, increased frequency or duration of extreme weather conditions, which may be from climate change, could also impair production capabilities, disrupt our supply chain or adversely affect demand for our products. At any time, input costs could increase for a prolonged period for a large portion of the products that we sell. Additionally, we procure products from suppliers outside of the U.S., and we are subject to the risks associated with political or financial instability, military conflict, trade restrictions, tariffs, currency exchange rates, transport capacity and costs and other factors relating to foreign trade, including health and safety restrictions related to epidemics and pandemics (such as the COVID-19 pandemic), any or all of which could delay our receipt of products or increase our input costs.

In addition, as a foodservice distributor, it is necessary for us to maintain an inventory of products. Declines in product pricing levels between the time we purchase a product from our suppliers and the time we sell the product to our customers could reduce our margin on that inventory, adversely affecting our results of operations.

Adverse publicity about us or lack of confidence in our products could negatively impact our reputation and reduce earnings.

Maintaining a good reputation and public confidence in the safety of the products we distribute is critical to our business. Sysco's brand names, trademarks and logos and our reputation are powerful sales and marketing tools, and we devote significant resources to promoting and protecting them. Anything that damages our reputation or public confidence in our products, whether or not justified, could tarnish our reputation and diminish the value of our brand, which could adversely affect our results of operations, and require additional resources to rebuild our reputation and restore the value of our brand.

Reports, whether true or not, of foodborne illnesses or injuries caused by food tampering could also severely injure our reputation or reduce public confidence in our products. If patrons of our restaurant customers were to become ill from foodborne illnesses, our customers could be forced to temporarily close restaurant locations, which would have an adverse effect on our sales and profitability. In addition, adverse publicity about regulatory or legal action against us could damage our reputation and image, undermine our customers' confidence in us and reduce short-term or long-term demand for our products and services, even if the regulatory or legal action is unfounded or not material to our operations.

Our relationships with long-term customers may be materially diminished or terminated.

We have long-standing relationships and agreements with a number of our customers. Some of our customer agreements are terminable upon written notice by either us or the customer, which provides some customers with the opportunity to renegotiate their contracts with us on less favorable terms or to award more business to our competitors. Market competition, customer requirements, customer financial condition and customer consolidation through mergers or acquisitions also could adversely affect our ability to continue or expand these relationships. We may not be able to retain or renew existing agreements, maintain relationships with any of our customers on acceptable terms, or at all, or collect amounts that insolvent customers might owe us. The loss of one or more of our major customers could adversely affect our business, financial condition, and results of operations.

Our anticipated change to the mix of locally managed customers versus multi-unit customers could reduce our gross and operating margins.

Gross margin from our multi-unit customers is generally lower than that of our locally managed customers because we typically sell higher volumes of products to multi-unit customers and provide a relatively lower level of value-added services than we do to locally managed customers. If sales to our locally managed customers do not grow at the same (or a greater) rate as sales to our multi-unit customers, our operating margins will likely decline. Meanwhile, the COVID-19 pandemic generally has negatively affected multi-unit customers less than locally managed customers.

If our sales to multi-unit customers were to continue to increase at a faster pace of growth than sales to our locally managed customers, we will become more dependent on multi-unit customers, as they begin to represent a greater proportion of our total sales. Therefore, a future loss of sales to the larger of these multi-unit customers could have a material negative impact on our results of operations and financial condition. Additionally, as a result of our greater dependence on these customers, they could pressure us to lower our prices and/or offer expanded or additional services at the same prices. In that event, if we were unable to achieve additional cost savings to offset these price reductions and/or cost increases, our results of operations could be materially adversely affected. We may be unable to change our cost structure and pricing practices rapidly enough to successfully compete in such an environment.

Changes in consumer eating habits could materially and adversely affect our business, financial condition, or results of operations.

Changes in consumer eating habits (such as a decline in consuming food away from home, a decline in portion sizes, or a shift in preferences toward restaurants that are not our customers) could reduce demand for our products. Consumer eating habits could be affected by a number of factors, including changes in attitudes regarding diet and health (including shifting preferences for sustainable, organic and locally grown products, as well as alternative proteins) or new information regarding the health effects of consuming certain foods.

Changing consumer eating habits also occur due to generational shifts. Millennials, the largest demographic group in terms of spend, seek new and different, as well as more ethnic, menu options and menu innovation. If consumer eating habits change significantly, we may be required to modify or discontinue sales of certain items in our product portfolio, and we may experience higher costs and/or supply shortages associated with our efforts to accommodate those changes as our suppliers adapt to new eating preferences. Changing consumer eating habits may reduce the frequency with which consumers purchase meals outside of the home. Additionally, changes in consumer eating habits may result in the enactment or amendment of laws and regulations that impact the ingredients and nutritional content of our food products, or laws and regulations requiring us to disclose the nutritional content of our food products. Compliance with these laws and regulations, as well as others regarding the ingredients and nutritional content of our food products, may be costly and time-consuming. We may not be able to effectively respond to changes in consumer health perceptions or resulting new laws or regulations or to adapt our menu offerings to trends in eating habits.

In addition, in response to the COVID-19 pandemic and the related economic downturn, many consumers preferred to eat at home rather than consume food away from home. If these preferences return and consumers choose to avoid gathering in public places in large groups, the demand for our products and services could be adversely affected. Moreover, if governmental restrictions were to resume, it is unclear how quickly customers will return to their prior eating habits, which may be a function of continued concerns over safety or depressed consumer sentiment due to adverse economic conditions, including job losses.

Expanding into new markets and complementary lines of business presents unique challenges and may not be successful.

An element of our strategy includes further expansion of operations into new markets and the establishment of new procurement organizations. Our ability to successfully operate in these new markets may be adversely affected by political, economic and social conditions beyond our control, public health crises, epidemics and pandemics (such as the COVID-19 pandemic), local laws and customs, and legal and regulatory constraints, including compliance with applicable anti-corruption and currency laws and regulations, of the countries or regions in which we currently operate or intend to operate in the future. Risks inherent in such expansion also include, among others, the costs and difficulties of identifying and gaining access to local suppliers, suffering possible adverse tax consequences from changes in tax laws or the unfavorable resolution of tax assessments or audits, maintaining product quality and greater difficulty in enforcing intellectual property rights.

Our business strategy also includes the possibility of expansion into businesses that are closely related or complementary to, but not currently part of, our core foodservice distribution business. Our ability to successfully operate in these complementary business markets may be adversely affected by legal and regulatory constraints, including compliance with regulatory programs to which we become subject. Risks inherent in branching out into such complementary markets also include the costs and difficulties of managing operations outside of our core business, which may require additional skills and competencies, as well as difficulties in identifying and gaining access to suppliers or customers in new markets.

Changes in applicable tax laws or regulations and the resolution of tax disputes could negatively affect our financial results.

As a multinational corporation, we are subject to income taxes, as well as non-income-based taxes, in both the U.S. and various foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes and other tax liabilities. Changes in tax laws or tax rulings may have a significant adverse impact on our effective tax rate. For example, the U.S. and many countries where we do business are actively considering or have recently enacted changes in relevant tax, accounting and other laws, regulations and interpretations, including changes to tax laws applicable to corporate multinationals.

Further, in the ordinary course of a global business, there are many intercompany transactions and calculations where the ultimate tax determination could change if tax laws or tax rulings were to be modified. We are also subject to non-income-based taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes, in both the U.S. and various foreign jurisdictions. Although we believe that our income and non-income-based tax estimates are appropriate, there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our historical income tax provisions and accruals.

Given the unpredictability of possible further changes to the U.S. or foreign tax laws and regulations and their potential interdependency, it is very difficult to predict the cumulative effect of such tax laws and regulations on our results of operations and cash flow, but such laws and regulations (and changes thereto) could adversely impact our financial results.

If our products are alleged to have caused injury or illness, or to have failed to comply with governmental regulations, we may need to recall our products and may experience product liability claims.

We, like any other foodservice distributor, may be subject to product recalls, including voluntary recalls or withdrawals, if the products we distribute are alleged to have caused injury or illness, to have been mislabeled, misbranded, or adulterated or to otherwise have violated applicable governmental regulations. We may also choose to voluntarily recall or withdraw products that we determine do not satisfy our quality standards, in order to protect our brand and reputation. Any future product recall or withdrawal that results in substantial and unexpected expenditures, destruction of product inventory, damage to our reputation and/or lost sales due to the unavailability of the product for a period of time could materially adversely affect our results of operations and financial condition.

We also face the risk of exposure to product liability claims if the use of products sold by Sysco is alleged to have caused injury or illness. We cannot be sure that consumption of our products will not cause a health-related illness in the future or that we will not be subject to claims or lawsuits relating to such matters. Further, even if a product liability claim is unsuccessful or is not fully pursued, the negative publicity surrounding any assertion that our products caused illness or injury could adversely affect our reputation with existing and potential customers and our corporate and brand image. Umbrella liability insurance that we maintain for product liability claims may not continue to be available at a reasonable cost or, if available, may not be adequate to cover all of our liabilities. We generally seek contractual indemnification and insurance coverage from parties supplying our products, but this indemnification or insurance coverage is limited, as a practical matter, to the creditworthiness of the indemnifying party and the insured limits of any insurance provided by suppliers. If we do not have adequate insurance or contractual indemnification available, product liability relating to defective products could materially adversely affect our results of operations and financial condition.

If we fail to comply with requirements imposed by applicable law or other governmental regulations, we could become subject to lawsuits, investigations and other liabilities and restrictions on our operations that could significantly and adversely affect our business.

We are subject to regulation by various federal, state, provincial, regional and local governments in the countries in which we operate with respect to many aspects of our business, such as food safety and sanitation, ethical business practices, transportation, minimum wage, overtime, wage payment, wage and hour and employment discrimination, immigration, human health and safety, and due to the services we provide in connection with governmentally funded entitlement programs. For a detailed discussion of the laws and regulations to which our business is subject, please refer to "Business – Government Regulation" in Part I, Item 1 of this Annual Report on Form 10-K.

From time to time, both federal and state governmental agencies conduct audits of various aspects of our operations, as part of investigations of providers of services under governmental contracts, or otherwise. We also receive requests for information from governmental agencies in connection with these audits. While we attempt to comply with all applicable laws and regulations, we may not be in full compliance with all applicable laws and regulations or interpretations of these laws and regulations at all times; moreover, we may not be able to comply with all future laws, regulations or interpretations of these laws and regulations.

If we fail to comply with applicable laws and regulations or encounter disagreements with respect to our contracts subject to governmental regulations, including those referred to above, we may be subject to investigations, criminal sanctions or civil remedies, including fines, injunctions, prohibitions on exporting, or seizures or debarments from contracting with such government. The cost of compliance or the consequences of non-compliance, including debarments, could have an adverse effect on our results of operations. In addition, governmental units may make changes in the regulatory frameworks within which we operate that may require us to incur substantial increases in costs in order to comply with such laws and regulations.

We may incur significant costs to comply with environmental laws and regulations, and we may be subject to substantial fines, penalties or third-party claims for non-compliance.

Our operations are subject to various federal, state, provincial, regional and local laws, rules and regulations in the various countries in which we operate relating to the protection of the environment, including those governing:

- the discharge of pollutants into the air, soil, and water;
- the management and disposal of solid and hazardous materials and wastes;
- employee exposure to hazards in the workplace; and
- the investigation and remediation of contamination resulting from releases of petroleum products and other regulated materials.

In the course of our operations, we operate, maintain and fuel fleet vehicles; store fuel in on-site above and underground storage tanks; operate refrigeration systems; and use and dispose of hazardous substances and food wastes. We could incur substantial costs, including fines or penalties and third-party claims for property damage or personal injury, as a result of any violations of environmental or workplace safety laws and regulations or releases of regulated materials into the environment. In addition, we could incur substantial investigation, remediation or other costs related to environmental conditions at our currently or formerly owned or operated properties.

For example, most of our distribution facilities have ammonia-based refrigeration systems and tanks for the storage of diesel fuel and other petroleum products, which are subject to laws regulating such systems and storage tanks (including the investigation and remediation of soil and groundwater contamination associated with the use of underground storage tanks). Certain of these laws and regulations in the EU may impose liability for costs of investigation or remediation of contamination (which could be material), regardless of fault or the legality of the original disposal, even if such contamination was present prior to the commencement of our operations at the site and was not caused by our activities. In

addition, many of our facilities have propane and battery-powered forklifts. Proposed or recently enacted legal requirements, such as those requiring the phase-out of certain ozone-depleting substances, and proposals for the regulation of greenhouse gas emissions, may require us to upgrade or replace equipment, or may increase our transportation or other operating costs.

If we are unable to finance and integrate acquired businesses effectively, our earnings per share could be materially adversely affected.

Historically, a portion of our growth has come through acquisitions. If we are unable to integrate acquired businesses successfully or realize anticipated economic, operational and other benefits and synergies in a timely manner, our earnings per share may be materially adversely affected. For example, we encountered operational challenges in fiscal 2019 related to our efforts to integrate two businesses in France acquired in connection with the Brakes Group acquisition, which integration efforts have adversely affected our ability to drive growth in sales and will continue to be managed into fiscal 2023. Integration of an acquired business may be more difficult when we acquire a business in a market in which we have limited expertise, or with a culture different from Sysco's.

A significant expansion of our business and operations, in terms of geography or magnitude, could strain our administrative and operational resources. Significant acquisitions may also require the issuance of material additional amounts of debt or equity, which could materially alter our debt-to-equity ratio, increase our interest expense and decrease earnings per share, and make it difficult for us to obtain favorable financing for other acquisitions or capital investments. In addition, our failure to implement effective internal control over financial reporting and disclosure controls and procedures with respect to a significant acquired business could result in material weaknesses and/or a failure to file our periodic reports with the Securities and Exchange Commission on a timely basis.

We rely on technology in our business, and any cybersecurity incident, other technology disruption or delay in implementing new technology could negatively affect our business and our relationships with customers.

We use technology in substantially all aspects of our business operations, and our ability to serve customers most effectively depends on the reliability of our technology systems. We use software and other technology systems, among other things, to generate and select orders, to load and route trucks, to make purchases, to manage our warehouses and to monitor and manage our business on a day-to-day basis. We also use mobile devices, social networking and other online platforms to connect with our employees, suppliers, business partners and customers. Further, our business involves the storage and transmission of numerous classes of sensitive and/or confidential information and intellectual property, including customers' and suppliers' personal information, private information about employees and financial and strategic information about the company and our business partners. This sensitive and/or confidential information and intellectual property are stored on information technology systems controlled by us, as well as systems controlled by third parties, such as our service providers.

These technology systems and the operation thereof are vulnerable to disruption from circumstances beyond our control, including fire, natural disasters, power outages, systems failures, security breaches, espionage, cyber-attacks, viruses, theft and inadvertent release of information. We and our third-party providers experience cybersecurity incidents of varying degrees from time-to-time, including ransomware and phishing attacks, as well as distributed denial of service attacks and the theft of data. To date, these have not had a material impact on our financial condition, results of operations or liquidity; however, there is no assurance that there will not be a material adverse effect in the future, especially if the amount of insurance coverage we maintain is not sufficient to cover claims or liabilities relating to an incident.

Potential consequences of a future material cybersecurity incident include business disruption; disruption to systems; theft, destruction, loss, corruption, misappropriation or unauthorized release of sensitive and/or confidential information or intellectual property (including personal information in violation of one or more privacy laws); reputational and brand damage; and potential liability, including litigation or other legal actions against us or the imposition by governmental authorities of penalties, fines, fees or liabilities, which, in turn, could cause us to incur significantly increased cybersecurity protection and remediation costs and the loss of customers.

As the ongoing COVID-19 pandemic has resulted in many of our employees, contractors and other corporate partners working remotely, we must increasingly rely on information technology systems that are outside our direct control. These systems are potentially vulnerable to cyber-based attacks and security breaches. In addition, cyber criminals are increasing their attacks on individual employees with business email compromise scams designed to trick victims into transferring sensitive data or funds, or steal credentials that compromise information systems.

The actions and controls we have implemented and are implementing to date, or which we seek to cause or have caused third-party providers to implement, may be insufficient to protect our systems, information or other intellectual property. Further, we anticipate devoting significant additional resources to upgrade our security measures generally, including those we employ to protect personal information against these cybersecurity threats.

Further, as we pursue our strategy to grow through acquisitions and to pursue new initiatives that improve our operations and cost structure, we are also expanding and improving our information technologies, resulting in a larger technological presence and corresponding exposure to cybersecurity risk. Failure to adequately assess and identify cybersecurity risks associated with acquisitions and new initiatives would increase our vulnerability to such risks.

Sysco's efforts to prevent security breaches and cybersecurity incidents, and to implement effective disaster recovery plans, may not be entirely effective to insulate us from technology disruption that could result in adverse effects on our results of operations. Additionally, information technology systems continue to evolve and, in order to remain competitive, we must implement new technologies in a timely and efficient manner. Our failure to implement timely new technologies may adversely affect our competitiveness and, consequently, our results of operations.

Our failure to comply with data privacy regulations could adversely affect our business.

There are new and emerging data privacy laws, as well as frequent updates and changes to existing data privacy laws, in most jurisdictions in which Sysco operates. Given the complexity of these laws and the often-onerous requirements they place on businesses regarding handling personal data, it is important for Sysco to understand their impact and respond accordingly. Failure to comply with data privacy laws can result in substantial fines or penalties, legal liability and / or reputational damage. In the UK and Europe, the General Data Protection Regulation (GDPR), which came into effect in 2018, places stringent requirements on companies when handling personal data and there continues to be a growing trend of other countries adopting similar laws, including Canada. Since 2020, five US states (i.e., California, Virginia, Colorado, Utah and Connecticut) have enacted stringent consumer privacy laws. In January 2023, we expect significant changes to come into effect in California, which will further enhance and extend an individual's rights over their personal data and the obligations placed on companies that handle this data, with the adoption of the California Privacy Rights Act (CPRA). Most notably, it is expected that employee and business data will be brought into scope, which raises the compliance requirements for Sysco significantly, in terms of internal controls, processes and governance requirements. Continued state by state introduction of privacy laws could lead to significantly greater complexity in our compliance requirements globally, which could result in complaints from data subjects and/or action from regulators. If Sysco does not provide sufficient resources to ensure it is able to respond, adapt and implement the necessary requirements to respond to the various forthcoming changes, which could include federal data privacy requirements in the US, while continuing to maintain our compliance with global data privacy laws, this could adversely impact our reputation and Sysco could face exposure to fines levied by regulators, which could have a significant financial impact on our business.

Our level of indebtedness and the terms of our indebtedness could adversely affect our business and liquidity position.

As described in Note 12, "Debt and Other Financing Arrangements," in the Notes to Consolidated Financial Statements in Item 8, as of July 2, 2022, we had approximately $10.6 billion of total indebtedness. This amount included senior notes, and we have the ability to borrow under our revolving credit facility, which supports our U.S. commercial paper program.

Our level of indebtedness could have important consequences for us, including:

- limiting our ability to obtain additional financing, if needed, for working capital, capital expenditures, acquisitions, debt service requirements or other purposes;
- increasing our vulnerability to adverse economic, industry or competitive developments;
- limiting our flexibility in planning for, or reacting to, changes in our business and our industry; and
- placing us at a competitive disadvantage compared to our competitors that have less debt.

Our indebtedness may increase from time to time for various reasons, including fluctuations in operating results, working capital needs, capital expenditures, potential acquisitions, joint ventures and/or share repurchase programs. Our level of indebtedness and the ultimate cost of such indebtedness could have a negative impact on our liquidity, cost of future debt financing and financial results, and our credit ratings may be adversely affected as a result of the incurrence of additional indebtedness. A significant downgrade in our credit ratings or adverse conditions in the capital markets may increase the cost of borrowing for us or limit our access to capital. In the future, our cash flow and capital resources may not be sufficient for payments of interest on and principal of our debt, and any alternative financing measures available may not be successful and may not permit us to meet our scheduled debt service obligations.

We may be required to pay material amounts under multiemployer defined benefit pension plans.

We contribute to several multiemployer defined benefit pension plans based on obligations arising under collective bargaining agreements covering union-represented employees. In fiscal 2022, our total contributions to these plans were approximately $45.5 million. The costs of providing benefits through such plans have increased in recent years. The amount of any increase or decrease in our required contributions to these multiemployer plans will depend upon many factors, including collective bargaining negotiations, actions taken by trustees who manage the plans, government regulations, changes in the funded status of these plans and the potential payment of a withdrawal liability if we, for any reason, cease to have an ongoing obligation to contribute to a given plan. Based upon the information available to us from the administrators of these plans, none of these plans have assets sufficient to fully pay their liabilities, and therefore all such plans have unfunded vested benefits. Increases in the unfunded liabilities of these plans may result in increased future contribution obligations imposed on us and on other participating employers. Under federal law, significant underfunding experienced by a given plan generally results in increased contribution obligations in the form of surcharges and supplemental contribution obligations. Our risk of such increased payments may be greater if any of the participating employers in these underfunded plans withdraws from a given plan due to insolvency and is not able to contribute an amount sufficient to fund the unfunded liabilities associated with its participants in the plan. We could also be treated as partially withdrawing from participation in one of these plans if the number of our employees participating in a given plan is reduced to a certain percentage over a certain period of time, or if we cease to have an obligation to contribute under one or more, but fewer than all, of the collective bargaining agreements that require us to make contributions to a particular plan. Such reductions in the number of employees participating in these plans could occur as a result of changes in our business operations, such as facility closures or consolidations. Based on the latest information available from plan administrators, we estimate our share of the aggregate withdrawal liability on the multiemployer plans in which we participate could have been as much as $156.2 million as of August 13, 2022. A significant increase to funding requirements could adversely affect the company's financial condition, results of operations or cash flows.

Our funding requirements for our company-sponsored qualified pension plan may increase should financial markets experience future declines.

We had a sizable pension obligation of $3.5 billion, as compared to assets totaling $3.6 billion, as of July 2, 2022, both of which have sensitivity to financial market factors that could impact our funding requirements. See Note 14, "Company-Sponsored Employee Benefit Plans" in the Notes to Consolidated Financial Statements in Item 8 for a discussion of the funded status of the U.S. Retirement Plan. At the end of fiscal 2012, we decided to freeze future benefit accruals under the company-sponsored qualified pension plan (U.S. Retirement Plan) as of December 31, 2012 for all U.S.-based salaried and non-union hourly employees. Effective January 1, 2013, these employees were eligible for additional contributions under an enhanced, defined contribution plan.

The amount of our annual contribution to the U.S. Retirement Plan is dependent upon, among other things, the returns on the U.S. Retirement Plan's assets and discount rates used to calculate the plan's liability. In fiscal 2018, we made voluntary contributions of $380 million to the U.S. Retirement Plan, allowing us to set an investment strategy that more closely aligns the duration of the U.S. Retirement Plan's assets with the duration of its liabilities. As a result, our U.S. Retirement Plan holds a greater amount of investments in fixed income securities, but also holds equity securities. Fluctuations in asset values can cause the amount of our anticipated future contributions to the plan to increase. The projected liability of the U.S. Retirement Plan will be impacted by the fluctuations of interest rates on high quality bonds in the public markets as these are inputs in determining our minimum funding requirements.

Failure to successfully renegotiate union contracts could result in work stoppages.

As of July 2, 2022, we had approximately 71,000 employees, approximately 17% of whom were represented by unions, primarily the International Brotherhood of Teamsters and unions in France and Sweden. Approximately 9% of our union employees are covered by collective bargaining agreements that are subject to renegotiation in fiscal 2023. Failure to effectively renegotiate these contracts could result in work stoppages. We believe our operating sites have good relationships with their unions, but a work stoppage due to failure of multiple operating subsidiaries to renegotiate union contracts could have a material adverse effect on us.

Organization and Common Stock Risks

Our authorized preferred stock provides anti-takeover benefits that may not be viewed as beneficial to stockholders.

Under our Restated Certificate of Incorporation, Sysco's Board of Directors is authorized to issue up to 1,500,000 shares of preferred stock without stockholder approval. Issuance of these shares could make it more difficult for anyone to acquire Sysco without approval of the Board of Directors, depending on the rights and preferences of the stock issued. In addition, if anyone attempts to acquire Sysco without approval of the Board of Directors of Sysco, the existence of this undesignated preferred stock could allow the Board of Directors to adopt a shareholder rights plan without obtaining stockholder approval, which could result in substantial dilution to a potential acquirer. As a result, hostile takeover attempts that might result in an acquisition of Sysco, which could otherwise have been financially beneficial to our stockholders, could be deterred.

Our amended and restated bylaws provide that the Court of Chancery of the State of Delaware will be the exclusive forum for certain stockholder litigation matters, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or employees.

Our amended and restated bylaws provide that the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, the federal district court for the District of Delaware) is the exclusive forum for any derivative action or proceeding brought on our behalf, any action asserting a breach of fiduciary duty, any action asserting a claim against us arising pursuant to the Delaware General Corporation Law, our amended and restated certificate of incorporation or our amended and restated bylaws, or any action asserting a claim against us that is governed by the internal affairs doctrine, except for any action (A) as to which such court determines that there is an indispensable party not subject to the jurisdiction of such court (and the indispensable party does not consent to the personal jurisdiction of such court within ten days following such determination), (B) which is vested in the exclusive jurisdiction of a court or forum other than such court, or (C) for which such court does not have subject matter jurisdiction.

This provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and other employees. Alternatively, if a court were to find this provision in our amended and restated bylaws to be inapplicable or unenforceable in any action, we may incur additional costs associated with resolving such action in other jurisdictions, which could adversely affect our business, financial condition and results of operations.

We are currently constructing expansions or build-outs for various distribution facilities in the United States. The various operating sites under construction, in the aggregate, contributed 12% of fiscal 2022 sales.

As of July 2, 2022, our fleet of approximately 15,000 delivery vehicles consisted of tractor and trailer combinations, vans and panel trucks, most of which are either wholly or partially refrigerated for the transportation of frozen or perishable foods. We own approximately 94% of these vehicles and lease the remainder.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we may be party to legal proceedings that arise in the ordinary course of our business. We do not believe there are any pending legal proceedings that, individually or in the aggregate, will have a material adverse effect on the company's financial condition, results of operations or cash flows.

Environmental Matters

Item 103 of SEC Regulation S-K requires disclosure of certain environmental matters in which a governmental authority is a party to the proceedings and when such proceedings either (i) involve the potential for monetary sanctions that Sysco's management reasonably believes will exceed a specified threshold or (ii) are material to its business or financial condition.

Pursuant to recent SEC amendments to this item, Sysco has chosen a reporting threshold for such proceedings of $1 million. Applying this threshold, there are no environmental matters to disclose for this period, nor does the company expect a material adverse effect on its business or financial condition.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of Sysco's financial condition, results of operations and liquidity and capital resources for the fiscal years ended July 2, 2022 and July 3, 2021 should be read as a supplement to our Consolidated Financial Statements and the accompanying notes contained in Item 8 of this report, and in conjunction with the "Forward-looking Statements" section set forth in Part II and the "Risk Factors" section set forth in Item 1A of Part I. All discussion of changes in our results of operations from fiscal 2020 to fiscal 2021 has been omitted from this Form 10-K, but may be found in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" of our Form 10-K for the year ended July 3, 2021, filed with the Securities and Exchange Commission on August 30, 2021.

Overview

Sysco distributes food and related products to restaurants, healthcare and educational facilities, lodging establishments and other foodservice customers. Our primary operations are located in North America and Europe. Under the accounting provisions related to disclosures about segments of an enterprise, we have combined certain operations into three reportable segments. "Other" financial information is attributable to our other operations that do not meet the quantitative disclosure thresholds.

- ***U.S. Foodservice Operations*** – primarily includes (a) the company's U.S. Broadline operations, which distribute a full line of food products, including custom-cut meat, seafood, produce, specialty Italian, specialty imports and a wide variety of non-food products and (b) our U.S. Specialty operations, which include our FreshPoint fresh produce distribution business, our Specialty Meats and Seafood Group specialty protein operations, our growing Italian Specialty platform anchored by Greco & Sons, our Asian specialty distribution company and a number of other small specialty businesses that are not material to the operations of Sysco;
- ***International Foodservice Operations*** – includes operations outside of the United States (U.S.), which distribute a full line of food products and a wide variety of non-food products. The Americas primarily consists of operations in Canada, Bahamas, Mexico, Costa Rica and Panama, as well as our export operations that distribute to international customers. Our European operations primarily consist of operations in the United Kingdom (U.K.), France, Ireland and Sweden;

- ***SYGMA*** – our U.S. customized distribution operations serving quick-service chain restaurant customer locations; and
- ***Other***– primarily our hotel supply operations, Guest Worldwide.

We estimate that we serve about 17% of an approximately $300 billion annual foodservice market in the U.S. based on industry data obtained from Technomic, Inc. as of the end of calendar 2021. Technomic projects the market size to increase to approximately $345 billion by the end of calendar 2022. From time to time, Technomic may revise the methodology used to calculate the size of the foodservice market and, as a result, our percentage can change not only from our sales results, but also from such revisions. We also serve certain international geographies that vary in size and amount of market share.

According to industry sources, the foodservice, or food-away-from-home, market represents approximately 53% of the total dollars spent on food purchases made at the consumer level in the U.S. as of the end of calendar year 2021, which is consistent with pre-pandemic levels as of the end of calendar year 2019.

Highlights

Our fiscal 2022 results were strong, reflecting growth in volumes and sales, effective management of inflation and improved profitability. Our market share gains in the U.S. segments continued to accelerate through the fiscal year and demonstrated the impact of our Recipe for Growth strategy on our business, advancing our capabilities in supply chain and sales. As a result, Sysco achieved an all-time record for annual sales. Additionally, our teams made significant improvements in operating expense leverage, with lower business recovery costs, as we continue to emerge from the COVID-19 pandemic, and continued re-investments in our supply chain and operations productivity performance to drive profitable growth. See below for a comparison of our fiscal 2022 results to our fiscal 2021 results, both including and excluding Certain Items (as defined below).

Below is a comparison of results from fiscal 2022 to fiscal 2021:

- Sales:
  - increased 33.8%, or $17.3 billion, to $68.6 billion;
  - increased 37.2% or $18.7 billion on a comparable 52-week basis;
- Operating income:
  - increased 62.7%, or $901.8 million, to $2.3 billion;
  - adjusted operating income increased 80.3%, or $1.2 billion, to $2.6 billion;
- Net earnings:
  - increased 159.2%, or $834.6 million, to $1.4 billion;
  - adjusted net earnings increased 126.0%, or $932.6 million, to $1.7 billion;
- Basic earnings per share:
  - increased 158.3%, or $1.63, to $2.66 from the comparable prior year amount of $1.03 per share;
- Diluted earnings per share:
  - increased 158.8%, or $1.62, to $2.64 from the comparable prior year amount of $1.02 per share;
  - adjusted diluted earnings per share were $3.25 in fiscal 2022, a $1.81 increase from the comparable prior year amount of $1.44 per share.
- EBITDA:
  - increased 42.7%, or $940.5 million, to $3.1 billion; and
  - adjusted EBITDA increased 54.4%, or $1.2 billion, to $3.3 billion.

The discussion of our results includes certain non-GAAP financial measures, including EBITDA and adjusted EBITDA, that we believe provide important perspective with respect to underlying business trends. Other than free cash flow, any non-GAAP financial measures will be denoted as adjusted measures to remove the impact of (A) restructuring and transformational project costs consisting of (1) restructuring charges, (2) expenses associated with our various transformation initiatives and (3) facility closure and severance charges; acquisition-related costs consisting of: (1) intangible amortization expense and (2) acquisition costs and due diligence costs related to our acquisitions; and (B) the reduction of bad debt expense previously recognized in fiscal 2020 due to the impact of the COVID-19 pandemic on the collectability of our pre-pandemic trade receivable balances. Our results for fiscal 2022 were also impacted by (1) a write-down of COVID-related personal protection equipment inventory due to the reduction in the net realizable value of inventory; (2) debt extinguishment costs; and (3) the increase in reserves for uncertain tax positions. Our results for fiscal 2021 were also impacted by the reduction of bad debt expense previously recognized in fiscal 2020 due to the impact of the COVID-19 pandemic on the collectability of our pre-pandemic trade receivable balances, as well as non-operating gains and losses including (1) losses on the extinguishment of debt, (2) losses on the sale of businesses and (3) gains on the sale of property.

The fiscal 2022 and fiscal 2021 items discussed above are collectively referred to as "Certain Items." The results of our foreign operations can be impacted by changes in exchange rates applicable to converting from local currencies to U.S. dollars. We measure our total Sysco and our International Foodservice Operations results on a constant currency basis. Our discussion below of our results includes certain non-GAAP financial measures that we believe provide important perspective with respect to underlying business trends. Other than free cash flow, any non-GAAP financial measures will be denoted as adjusted measures and exclude the impact from Certain Items, and certain metrics are stated on a constant currency basis.

Management believes that adjusting its operating expenses, operating income, interest expense, other (income) expense, net, net earnings and diluted earnings per share to remove these Certain Items, provides an important perspective with respect to our underlying business trends and results and provides meaningful supplemental information to both management and investors that (1) is indicative of the performance of the company's underlying operations, (2) facilitates comparisons on a year-over-year basis and (3) removes those items that are difficult to predict and are often unanticipated and that, as a result, are difficult to include in analysts' financial models and our investors' expectations with any degree of specificity.

Sysco's fiscal year ends on the Saturday nearest to June 30th. This resulted in a 52-week year ended July 2, 2022 for fiscal 2022, a 53-week year ended July 3, 2021 for fiscal 2021 and a 52-week year ended June 27, 2020 for fiscal 2020. We will have a 52-week year ending July 1, 2023 for fiscal 2023. Because fiscal 2021 contained an additional week as compared to fiscal 2022, our Consolidated Results of Operations for fiscal 2022 are not directly comparable to the prior year. In some cases, our disclosure will include a fiscal 2022 comparison to fiscal 2021 on a 52-week year basis. Management believes that adjusting the fiscal 2021 Consolidated

Results of Operations for the estimated impact of the additional week provides more comparable financial results on a year-over-year basis. This is calculated by taking one-fourteenth of the total metric for the fourth quarter of fiscal 2021.

The company uses these non-GAAP measures when evaluating its financial results, as well as for internal planning and forecasting purposes. These financial measures should not be used as a substitute for GAAP measures in assessing the company's results of operations for periods presented. An analysis of any non-GAAP financial measure should be used in conjunction with results presented in accordance with GAAP. Any metric within this section referred to as "adjusted" will reflect the applicable impact of Certain Items. More information on the rationale for the use of these measures and reconciliations to GAAP numbers can be found under "Non-GAAP Reconciliations."

Key Performance Indicators

Sysco seeks to meet its strategic goals by continually measuring its success in its key performance metrics that drive stakeholder value through sales growth and capital allocation and deployment. We believe the following are our most significant performance metrics in our current business environment:

- Adjusted operating income growth (non-GAAP);
- Adjusted diluted earnings per share growth (non-GAAP);
- Adjusted EBITDA (non-GAAP);
- Case volume growth by customer type for U.S. Broadline operations;
- Sysco brand penetration for U.S. Broadline operations; and
- Free cash flow (non-GAAP).

We use these financial metrics and related computations, as well as sales and gross profit growth, to evaluate our business and to plan for near- and long-term operating and strategic decisions. We believe it is useful to provide investors with the same financial information that we use internally to make comparisons of our historical operating results, identify trends in our underlying operating results and evaluate our business.

Key Financial Definitions

- Sales – Sales is equal to gross sales, minus (1) sales returns and (2) sales incentives that we offer to certain customers, such as upfront monies and discounts. Our sales are driven by changes in case volumes, product inflation that is reflected in the pricing of our products and mix of products sold.
- Gross profit – Gross profit is equal to our net sales minus our cost of goods sold. Cost of goods sold primarily includes inventory costs (net of supplier consideration) and inbound freight. Cost of goods sold generally changes as we incur higher or lower costs from our suppliers and as our customer and product mix changes.

Adjusted Operating Income and Adjusted Diluted Earnings per Share Growth

Adjusted operating income represents our consolidated operating income, adjusted for the impact of Certain Items that we do not consider representative of our underlying performance. Adjusted diluted earnings per share represents our consolidated diluted earnings per share, adjusted for the impact of Certain Items that we do not consider representative of our underlying performance. Sysco's management considers growth in these metrics to be useful measures of operating efficiency and profitability, as they facilitate comparison of performance on a consistent basis from period to period by providing a measurement of recurring factors and trends affecting our business.

Adjusted EBITDA

EBITDA represents net earnings (loss) plus (1) interest expense, (2) income tax expense and benefit, (3) depreciation and (4) amortization. The net earnings (loss) component of our EBITDA calculation is impacted by Certain Items that we do not consider representative of our underlying performance. As a result, in the non-GAAP reconciliations below for each period presented, adjusted EBITDA is computed as EBITDA plus the impact of Certain Items, excluding Certain Items related to interest expense, income taxes, depreciation and amortization. Sysco's management considers growth in this metric to be a measure of overall financial performance that provides useful information to management and investors about the profitability of the business, as it facilitates comparison of performance on a consistent basis from period to period by providing a measurement of recurring factors and trends affecting our business. Additionally, it is a commonly used component metric used to inform on capital structure decisions.

Case Volume Growth by Customer Type for U.S. Broadline Operations

Case volume represents the volume of product sold to customers during a period of time, and improvements in this metric are a primary driver of Sysco's top line performance. We define a case, specifically for our U.S. Broadline operations, as the lowest level of packaged products that are sold from our warehouses, with one case potentially containing several pieces of a product packaged in bulk. Case size does not generally vary by location or from period to period, due to the design of our warehouses. Case volume growth is calculated by dividing the change in the volume of cases sold year-over-year by the volume of cases sold in the prior year. Sysco management considers case volume growth within its U.S. Broadline operations to be a measure that provides useful information to management and investors in evaluating sales performance and as an indicator of gross margin performance. Management monitors case volume growth by customer type, with bifurcation between local customers and national customers, as this provides a measure of gross profit performance due to the pricing strategies attached to each customer type. Local customers are primarily street customers, such as independent restaurants that do not have long-term contracts, or locally managed customers, such as local chain restaurants, while national customers are the multi-unit customers requiring national coverage from a customer-centric view and are managed centrally from the Corporate office. Sysco management seeks to drive higher case volume growth to local customers, which allows more favorable pricing terms for our U.S. Broadline operations and generates higher gross margins as a result. National customers benefit from purchasing

power, as they are able to negotiate pricing agreements across multiple businesses, reducing our gross profit potential, but reducing our overall cost per case, as national customers have bigger drop sizes. While overall case volume growth reflects a key component of sales growth, local customer case growth provides additional context around gross profit performance.

Sysco Brand Penetration for U.S. Broadline Operations

Sysco management considers Sysco brand penetration to be a measure that provides useful information to management and investors in evaluating the gross profit performance of the company's U.S. Broadline operations. Sysco offers an assortment of Sysco-branded products that can be differentiated from privately branded products, which enables us to achieve higher gross margin by administering and leveraging a consolidated product procurement program for quality food and non-food products. Due to cost efficiencies, Sysco-branded products generate a higher gross margin than sales from other privately branded products. We define Sysco brand penetration as the percentage of Sysco-branded case volume sold to U.S. Broadline customers over all cases sold to U.S. Broadline customers. This performance indicator, also measured at the customer type level, including local and national customers, is driven by growth in the distribution of branded products to more customers and more geographies, as well as increasing branded offerings through innovation and the launch of new products.

Free Cash Flow

Free cash flow represents net cash provided from operating activities, less purchases of plant and equipment, plus proceeds from sales of plant and equipment. Sysco management considers free cash flow to be a non-GAAP liquidity measure that provides useful information to management and investors about the amount of cash generated by the business after the purchases and sales of buildings, fleet, equipment and technology, which may potentially be used to pay for, among other things, strategic uses of cash, including dividend payments, share repurchases and acquisitions. However, free cash flow may not be available for discretionary expenditures, as it may be necessary that we use it to make mandatory debt service or other payments. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity. See "Liquidity and Capital Resources" for discussions of GAAP metrics, including net cash provided by operating activities and our reconciliation of this non-GAAP financial measure.

Trends

Economic and Industry Trends

The food-away-from-home sector experienced an overall recovery in fiscal 2022 as compared to fiscal 2021. In the third quarter of fiscal 2022, the company experienced disruptions from the Omicron variant of COVID-19, which negatively impacted consumer demand and our customers due to the reintroduction of significant restrictions on their businesses. We experienced a strong market rebound beginning in late February, which continued into the fourth quarter, and we achieved an all-time record for quarterly and annual sales at Sysco. While the company has experienced macroeconomic pressures from major waves of COVID-19, double-digit inflation, and the invasion of Ukraine by Russia impacting the food supply, we have delivered profitable growth. While we anticipate that recent macroeconomic pressures may continue to create challenges in fiscal 2023, the food away from home industry has demonstrated its resilience and importance over the past few years, and we expect top-line growth in fiscal 2023 of at least 10% over fiscal year 2022.

Sales and Gross Profit Trends

Our sales and gross profit performance can be influenced by multiple factors, including price, volume, customer mix, product mix and the impact of the COVID-19 pandemic. The biggest factor affecting performance in fiscal 2022 was volume growth, as we experienced strong results from both independent and chain customers, driven by a 10.3% improvement in local case volume and a 15.4% improvement in total case volume within our U.S. Broadline operations, in each instance as compared to fiscal 2021. Sysco continues to lead the industry in supporting our customers during this challenging supply chain period, including converting our supply chain to a full six-day work week. This growth enabled us to gain market share during fiscal 2022 at a rate of over 1.3 times the industry, which exceeded our stated goal for the year and contributed to Sysco achieving an all-time record for annual sales. That rate of growth is expected to accelerate across the three years of our long-range plan, and we intend to deliver 1.5 times the market growth by the end of our fiscal 2024.

Product cost inflation has also been a driver of our sales and gross profit performance. We experienced inflation in our U.S. Broadline operations, at a rate of 15.3% and 15.0% in the fourth quarter and fiscal 2022, respectively, primarily driven by inflation in the dairy, poultry and fresh produce categories. We have been successful in managing our inflation, resulting in an increase in gross profit dollars. Gross margin increased 10 basis points in the fourth quarter and decreased 29 basis points for fiscal 2022, as compared to the corresponding prior year periods, largely due to the impact of product cost inflation. We are expecting mid-single digit inflation for fiscal 2023 on an enterprise basis across all categories, with elevated rates in the first quarter that are expected to moderate over the course of the year; we are not planning for a deflationary environment, though some categories may be individually deflationary. We are continuing to take actions to mitigate the long-term effect of elevated inflation, including actively working to improve our cost of goods sold to Sysco, so that we can pass along value to our customers. However, the relative price of eating out has been less impacted by inflation than the cost of food at the grocery store, and we believe that the food away from home industry will prove resilient.

Operating Expense Trends

Total operating expenses increased 26.0% during fiscal 2022, as compared to fiscal 2021, driven by the variable costs associated with significantly increased volumes, our transformation initiatives under our Recipe for Growth strategy, investments in business recovery costs and expenses due to lower productivity resulting from newer associates. Our operating results in fiscal 2022 included $183 million of operating expense investments for our Recipe for Growth strategy, with supply chain investments ramping up significantly in the fourth quarter. We have made a purposeful response

to the COVID-19 generated labor and safety environment in which we are operating, with $193 million in business recovery operating investments, such as recruiting costs, hiring marketing, vaccination promotion, contract labor and sign-on and retention bonuses during fiscal 2022. During the fourth quarter, we returned to employment levels higher than fiscal 2019, but continued to experience overtime costs to address growing demand and lower productivity of the new staff. Productivity and overtime costs were approximately $40 million in the fourth quarter of fiscal 2022, which is higher than the approximately $30 million for these same costs in the third quarter of fiscal 2022. We expect elevated operating expenses during fiscal 2023, as we continue to deal with a hiring environment that is still recovering, productivity issues that we expect to improve over the course of this year and continued investments for our transformation, all partially offset by our cost-out efforts. We are making these necessary investments to ensure that we can serve our customers, which enables us to continue increasing market share, profitably, at the national and local level. Even with those significant business recovery and transformation operating expense investments, partially offset by the continued benefit of our cost-savings efforts, we leveraged our adjusted operating expense structure.

Comparisons to Fiscal 2019

In assessing our financial performance through the business recovery, Sysco's management compared our results in fiscal 2022 against our corresponding fiscal 2019 results.

Comparisons of results from fiscal 2022 to fiscal 2019 are presented below:

- Sales:
  - increased 14.2%, or $8.5 billion, as compared to fiscal 2019;
- Operating income:
  - increased 0.4%, or $8.9 million, as compared to fiscal 2019;
  - adjusted operating income decreased 3.7%, or $100.3 million, as compared to fiscal 2019;
- EBITDA:
  - increased 0.40%, or $13.1 million, as compared to fiscal 2019;
  - adjusted EBITDA decreased 0.7%, or $23.9 million, as compared to fiscal 2019;
- Diluted earnings per share:
  - decreased 17.5%, or $0.56, as compared to fiscal 2019; and
  - adjusted diluted earnings per share decreased 8.5%, or $0.30, as compared to fiscal 2019.

Key items impacting the comparability of Sysco's results in fiscal 2022 to fiscal 2019 included the impact of operation during COVID-19, particularly the Omicron variant, one-time and on-going expenses associated with the business recovery and the operating expense investments made in support of our Recipe for Growth strategy.

Mergers and Acquisitions

We continue to focus on mergers and acquisitions as a part of our growth strategy. We plan to reinforce our existing businesses, while cultivating new channels, new segments and new capabilities. We have completed the following acquisitions in fiscal 2022:

- In the first quarter of fiscal 2022, we acquired Greco and Sons, a leading independent specialty Italian distributor in the United States. The acquisition is operating as part of Sysco's U.S. Foodservice Segment.
- In the first quarter of fiscal 2022, we acquired a specialty food distributor in the United Kingdom.
- In the second quarter of fiscal 2022, we acquired Paragon Foodservice, a regional broadline fresh produce distributor in western Pennsylvania. The acquisition is operating as part of Sysco's U.S. Foodservice Segment.
- In the third quarter of fiscal 2022, we acquired The Coastal Companies, a leading fresh produce distributor and value-added processer on the East Coast. The acquisition is operating as part of Sysco's U.S. Foodservice Segment.

In fiscal 2022, U.S. Foodservice Operations and International Foodservice Operations represented approximately 70.7% and 17.2%, respectively, of Sysco's overall sales, compared to 69.6% and 16.3%, respectively, in fiscal 2021. In fiscal 2022 and fiscal 2021, U.S. Foodservice Operations represented approximately 96.5% and 107.9%, respectively, of the total segment operating income. This illustrates that these segments represent a substantial majority of our total segment results when compared to other reportable segments. See Note 21, "Business Segment Information," in the Notes to Consolidated Financial Statements in Item 8.

Cost of sales primarily includes our product costs, net of vendor consideration, and includes in-bound freight. Operating expenses include the costs of facilities, product handling, delivery, selling and general and administrative activities. Fuel surcharges are reflected within sales and gross profit; fuel costs are reflected within operating expenses. Along with sales, operating income is the most relevant measure for evaluating segment performance and allocating resources, as operating income includes cost of goods sold, as well as the costs to warehouse and deliver goods, which are significant and relevant costs when evaluating a distribution business.

Results of U.S. Foodservice Operations

In fiscal 2022, the U.S. Foodservice Operations operating results represented approximately 70.7% of Sysco's overall sales and 96.5% of the aggregated operating income of Sysco's reporting segments. Several factors contributed to these higher operating results as compared to the other operating segments. We have invested substantial amounts in assets, operating methods, technology and management expertise in this segment. The breadth of its sales force, geographic reach of its distribution area and its purchasing power enable this segment to generate its relatively stronger results of operations.

The following table sets forth a summary of the components of operating income and adjusted operating income expressed as a percentage increase or decrease over the prior year:

(In thousands)	2022	2021	Change in Dollars	% Change

Sales

The following table sets forth the percentage and dollar value increase or decrease in sales over the prior year in order to demonstrate the cause and magnitude of change.

(In millions)	Increase (Decrease) 2022	
Cause of change	**Percentage**	**Dollars**
Case volume[1],[4]	17.6%	$ 6,300.4
Inflation[2]	14.2	5,072.9
Acquisitions[3]	3.7	1,334.7
Other[4]	0.3	87.7
TOTAL CHANGE IN SALES	**35.8%**	**$12,795.7**

(1) Includes case volume of 15.4% for U.S. Broadline operations.
(2) Includes product cost inflation of 15.0% for U.S. Broadline operations.
(3) Includes the impact of our fiscal 2022 acquisitions.
(4) Case volume excludes the volume impact from our custom-cut meat and seafood subsidiaries that do not measure volume in cases. Any impact in volumes from these operations are included within "Other."

The primary driver of the sales increase in fiscal 2022 was the significant improvement in case volume in our U.S. Broadline operations as a result of two factors: (a) the ongoing business recovery from the COVID-19 pandemic and (b) the impact of our Recipe for Growth initiatives. Case volumes from our U.S. Broadline operations increased 15.4% in fiscal 2022, as compared to fiscal 2021 and 17.9% on a comparable 52-week basis. This included a 10.3% improvement in local customer case growth and a 22.0% increase in national customer case volume in fiscal 2022. The increases in U.S. Broadline case volumes represent organic growth.

Operating Income

The increase in operating income for fiscal 2022, as compared to fiscal 2021, was driven by gross profit dollar growth and partially offset by an increase in operating expenses.

Gross profit dollar growth was driven primarily by the improvement in local cases stemming from (a) the ongoing business recovery from the COVID-19 pandemic, (b) the impact of our Recipe for Growth initiatives, (c) management of higher inflation, and (d) optimization of our business processes and performance. The estimated change in product costs, an internal measure of inflation or deflation, for fiscal 2022 for our U.S. Broadline operations was inflation of 15.0%. For fiscal 2022, this change in product costs was primarily driven by inflation in the dairy, poultry and fresh produce categories. Gross margin, which is gross profit as a percentage of sales, was 18.95% in fiscal 2022, which was a decrease of 67 basis points compared to gross margin of 19.62% in fiscal 2021, primarily attributable to inflationary pressure.

The increase in operating expenses for fiscal 2022, as compared to fiscal 2021, was primarily driven by variable costs associated with increased volumes and largely from increased investments associated with the ongoing business recovery, including increases in costs for associates, such as recruiting costs, overtime costs, hiring costs, marketing, vaccination promotion, contract labor and sign-on and retention bonuses. We have also experienced an increase in operating expenses due to investments for our Recipe for Growth strategy in fiscal 2022. Additionally, we experienced a $115.0 million unfavorable comparison of bad debt expense in fiscal 2022, as compared to fiscal 2021, which included a net bad debt benefit due to the significant reduction of reserves on pre-pandemic receivables that were collected in fiscal 2021. Excluding the impact of these pre-pandemic receivables, our year-over-year change in bad debt expense was not material.

Results of International Foodservice Operations

In fiscal 2022, the International Foodservice Operations operating results represented approximately 17.2% of Sysco's overall sales.

The following table sets forth a summary of the components of operating income and adjusted operating income expressed as a percentage increase or decrease over the prior year:

Sales

The following table sets forth the percentage and dollar value increase or decrease in sales over the comparable prior year period in order to demonstrate the cause and magnitude of change.

(In millions)	Increase (Decrease) 2022	
Cause of change	**Percentage**	**Dollars**
Inflation	9.6%	$ 798.5
Foreign currency	(2.2)	(180.1)
Other[1]	33.8	2,818.4
TOTAL CHANGE IN SALES	**41.2%**	**$ 3,436.8**

(1) The impact of volumes as a component of sales growth from international operations are included within "Other." Volume in our foreign operations includes volume metrics that differ from country to country and cannot be aggregated on a consistent comparable basis.

Sales in fiscal 2022 were higher primarily due to the significant improvement in volume as a result of the business recovery from the COVID-19 pandemic and the easing of restrictions across our European, Canadian and Latin American businesses during the fiscal year. The impact of our Recipe for Growth initiatives also contributed to volume growth.

Operating Income

Our International Foodservice Operations segment returned to profitability in fiscal 2022. The $334.7 million increase in operating income for fiscal 2022, as compared to fiscal 2021, was primarily a result of an increased sales volumes attributable to the business recovery from the COVID-19 pandemic, along with specific efforts to optimize our gross profit, while effectively managing our operating expenses.

The increase in gross profit dollars in fiscal 2022, as compared to fiscal 2021, was attributable to the increase in sales volume and effectively managing inflation, along with specific efforts to optimize our gross profit dollars.

The increase in operating expenses for fiscal 2022, as compared to fiscal 2021, was primarily due to an increase in costs for associates, including overtime and hiring associates to manage the ongoing business recovery. Additionally, we had an unfavorable comparison of bad debt expense, as fiscal 2021 included a reduction of reserves on pre-pandemic receivables. Excluding the impact of these pre-pandemic receivables, our year-over-year change in bad debt expense was not material.

Results of SYGMA and Other Segment

For SYGMA, sales were 11.5% higher in fiscal 2022, as compared to fiscal 2021, primarily from an increase in case volume driven by the success of national and regional quick service restaurants, and inflation and fee increases, partially offset by a decrease in volume due to the planned exit of a large regional customer. Operating income decreased by $56.3 million in fiscal 2022, as compared to fiscal 2021, as our increased investments in business recovery staffing drove an increase in operating expenses in excess of our gross profit dollar growth from increased case volume. SYGMA operated at a loss for the first half of fiscal 2022, primarily due to higher than expected labor costs, but returned to profitability in the second half of the year.

For the operations that are grouped within our Other segment, operating income increased $17.8 million in fiscal 2022, as compared to fiscal 2021, primarily due to the recovery of our hospitality business, Guest Worldwide. Volume for this business has improved as hospitality occupancy rates have grown from prior year levels.

Global Support Center Expenses

Our Global Support Center generally includes all expenses of the corporate office and Sysco's shared service operations. These expenses increased $45.3 million in fiscal 2022, or 5.5%, as compared to fiscal 2021, primarily due to investments for our Recipe for Growth strategy, an increase in self-insurance reserves, acquisition and due diligence costs and higher associate-related expenses.

Included in Global Support Center expenses are Certain Items that totaled $146.8 million in fiscal 2022, as compared to $62.9 million in fiscal 2021. Certain Items impacting fiscal 2022 were primarily expenses associated with our business technology transformation initiatives and expenses associated with acquisitions. Certain Items impacting fiscal 2021 were primarily expenses associated with our business transformation initiatives.

Interest Expense

Interest expense decreased $256.5 million for fiscal 2022, as compared to fiscal 2021, primarily attributable to lower debt volume, partially offset by a loss on extinguishment of debt of $115.6 million for the redemption of $1.25 billion in combined aggregate principal amount of senior notes.

Net Earnings

Net earnings increased 159.2% in fiscal 2022, as compared to fiscal 2021, due primarily to the items noted above for operating income and interest expense, as well as items impacting our income taxes that are discussed in Note 19, "Income Taxes," in the Notes to Consolidated Financial Statements in Item 8. Adjusted net earnings, excluding Certain Items, increased 126.0% in fiscal 2022, primarily due to a significant increase in sales volume, partially offset by an unfavorable tax expense compared to the prior year.

Earnings Per Share

Basic earnings per share in fiscal 2022 were $2.66, a 158.3% increase from the comparable prior year period amount of $1.03 per share. Diluted earnings per share in fiscal 2022 were $2.64, a 158.8% increase from the comparable prior year period amount of $1.02 per share. Adjusted diluted earnings per share, excluding Certain Items (which is a non-GAAP financial measure for which a reconciliation is provided in "Non-GAAP Reconciliations" below), in fiscal 2022 were $3.25, a 125.7% increase from the comparable prior year period amount of $1.44 per share. These results were primarily attributable to the factors discussed above related to net earnings in fiscal 2022.

Non-GAAP Reconciliations

Our discussion of our results includes certain non-GAAP financial measures, such as EBITDA and adjusted EBITDA, that we believe provide important perspective with respect to underlying business trends. Other than free cash flow, any non-GAAP financial measures will be denoted as adjusted measures to remove the impact of (A) restructuring and transformational project costs consisting of: (1) restructuring charges, (2) expenses associated with our various transformation initiatives and (3) facility closure and severance charges; (B) acquisition-related costs consisting of: (1) intangible amortization expense and (2) acquisition costs and due diligence costs related to our acquisitions; and (C) the reduction of bad debt expense previously recognized in fiscal 2020 due to the impact of the COVID-19 pandemic on the collectability of our pre-pandemic trade receivable balances. Our results for fiscal 2022 were also impacted by: (1) a write-down of COVID-related personal protection equipment inventory due to the reduction in the net realizable value of inventory, (2) debt extinguishment costs and (3) the increase in reserves for uncertain tax positions. Our results for fiscal 2021 were also impacted by losses on the sale of businesses.

The results of our foreign operations can be impacted due to changes in exchange rates applicable in converting local currencies to U.S. dollars. We measure our total Sysco and our International Foodservice Operations results on a constant currency basis. Constant currency operating results are calculated by translating current-period local currency operating results with the currency exchange rates used to translate the financial statements in the comparable prior-year period to determine what the current-period U.S. dollar operating results would have been if the currency exchange rate had not changed from the comparable prior-year period.

Management believes that adjusting its operating expenses, operating income, net earnings and diluted earnings per share to remove these Certain Items and presenting its International Foodservice Operations results on a constant currency basis, provides an important perspective with respect to our underlying business trends and results and provides meaningful supplemental information to both management and investors that (1) is indicative of the performance of the company's underlying operations and (2) facilitates comparisons on a year-over-year basis.

Sysco has a history of growth through acquisitions and excludes from its non-GAAP financial measures the impact of acquisition-related intangible amortization, acquisition costs and due-diligence costs for those acquisitions. We believe this approach significantly enhances the comparability of Sysco's results for fiscal 2022 and fiscal 2021.

Set forth below is a reconciliation of sales, operating expenses, operating income, other (income) expense, net earnings and diluted earnings per share to adjusted results for these measures for the periods presented. Individual components of diluted earnings per share may not add up to the total presented due to rounding. Adjusted diluted earnings per share is calculated using adjusted net earnings divided by diluted shares outstanding.

For purposes of comparable items using a 52 week basis, items are mathematically calculated using the row labels as follows: A+B=C and E/D=F

(1) Represents a constant currency adjustment, which eliminates the impact of foreign currency fluctuations on the current year results.
(2) Represents a write-down of COVID-related personal protection equipment inventory due to the reduction in the net realizable value of inventory.
(3) Fiscal 2022 includes $61 million related to restructuring charges, severance and facility closure charges and $49 million related to various transformation initiative costs, primarily consisting of changes to our business technology strategy. Fiscal 2021 includes $72 million related to restructuring, severance and facility closure charges, and $56 million related to various transformation initiative costs, primarily consisting of changes to our business technology strategy.
(4) Fiscal 2022 includes $106 million of intangible amortization expense and $33 million in acquisition and due diligence costs. Fiscal 2021 represents intangible amortization expense.
(5) Fiscal 2022 and fiscal 2021 represent the reduction of bad debt charges previously taken on pre-pandemic trade receivable balances in fiscal 2020.
(6) The tax impact of adjustments for Certain Items is calculated by multiplying the pretax impact of each Certain Item by the statutory rates in effect for each jurisdiction where the Certain Item was incurred.
(7) Individual components of diluted earnings per share may not add up to the total presented due to rounding. Total diluted earnings per share is calculated using adjusted net earnings divided by diluted shares outstanding.
NM represents that the percentage change is not meaningful.

Liquidity and Capital Resources

Highlights

Below are comparisons of the cash flows from fiscal 2022 to fiscal 2021:

- Cash flows from operations were $1.8 billion in fiscal 2022, compared to $1.9 billion in fiscal 2021;
- Net capital expenditures totaled $608.7 million in fiscal 2022, compared to $411.5 million in fiscal 2021;
- Free cash flow was $1.2 billion in fiscal 2022, compared to $1.5 billion in fiscal 2021 (see "Cash Flows – Free Cash Flow – Non-GAAP Reconciliation" below for an explanation of this non-GAAP financial measure);
- Cash used for acquisition of businesses was $1.3 billion in fiscal 2022;
- There was no significant bank or commercial paper activity in fiscal 2022, compared to $826.2 million of bank and commercial paper repayments, net in fiscal 2021;
- Dividends paid were $958.9 million in fiscal 2022, compared to $917.6 million in fiscal 2021; and
- Cash paid for treasury stock repurchases was $499.8 million in fiscal 2022, compared to none in fiscal 2021.

We repaid senior notes in the amount of $1.7 billion and issued an aggregate of $1.3 billion in new senior notes in fiscal 2022.

As of July 2, 2022, there were no borrowings outstanding under our long-term revolving credit facility. As of August 9, 2022, the company has approximately $3.2 billion in cash and available liquidity.

In fiscal 2020, in order to ensure our liquidity in response to the COVID-19 pandemic, we significantly increased our cash balances using short and long-term borrowings and ended the year with $6.1 billion in cash. With an improved operating environment in fiscal 2021, we paid down $3.4 billion of debt and ended the year with $3.0 billion in cash. In fiscal 2022, we returned to more normal levels of cash, with $867.1 million on the balance sheet at the end of the fiscal year. As described above, our uses of cash during the year included business acquisitions, dividends, share repurchases and senior note redemptions.

Sources and Uses of Cash

Sysco generates cash in the U.S. and internationally. Sysco's strategic objectives include continuous investment in our business; these investments are funded primarily by cash from operations and, to a lesser extent, external borrowings. Traditionally, our operations have produced significant cash flow and, due to our strong financial position, we believe that we will continue to be able to effectively access capital markets, as needed. Cash generated from operations is generally allocated to:

- working capital-investments;
- capital investments in facilities, systems, fleet, other equipment and technology;
- acquisitions consistent with our growth strategy;
- debt repayments;
- cash dividends; and
- share repurchases.

Any remaining cash generated from operations may be invested in high-quality, short-term instruments. As a part of our ongoing strategic analysis, we regularly evaluate business opportunities, including potential acquisitions and sales of assets and businesses, and our overall capital structure. Any transactions resulting from these evaluations may materially impact our liquidity, borrowing capacity, leverage ratios and capital availability.

We continue to be in a strong financial position based on our balance sheet and operating cash flows; however, our liquidity and capital resources can be influenced by macro-economic trends and conditions that impact our results of operations. We believe our mechanisms to manage working capital, such as actively working with customers to receive payments on receivables, optimizing inventory levels and maximizing payment terms with vendors, have been sufficient to limit a significant unfavorable impact on our cash flows from operations. We believe these mechanisms will continue to mitigate any unfavorable impact on our cash flows from operations arising from macro-economic trends and conditions.

We extend credit terms to some of our customers based on our assessment of each customer's creditworthiness. We monitor each customer's account and will suspend shipments if necessary. In the ordinary course of business, customers periodically negotiate extended payment terms on trade accounts receivable. The company may utilize purchase arrangements with third-party financial institutions to transfer portions of our trade accounts receivable balance on a non-recourse basis in order to extend terms for the customer without negatively impacting our cash flow. The arrangements meet the requirements for the receivables transferred to be accounted for as sales. See Note 1, "Summary of Accounting Policies," in the Notes to Consolidated Financial Statements in Item 8 for additional information.

As of July 2, 2022, we had $867.1 million in cash and cash equivalents, approximately 49% of which was held by our international subsidiaries and generated from our earnings of international operations. If these earnings were transferred among countries or repatriated to the U.S., such amounts may be subject to withholding and additional foreign tax obligations. Additionally, Sysco Corporation has provided intercompany loans to certain of its international subsidiaries, and when interest and principal payments are made, some of this cash will move to the U.S.

Our wholly owned captive insurance subsidiary (the Captive) must maintain a sufficient level of liquidity to fund future reserve payments. As of July 2, 2022, the Captive held $119.9 million of fixed income marketable securities and $64.3 million of restricted cash and restricted cash equivalents in a restricted investment portfolio in order to meet solvency requirements. We purchased $19.3 million in marketable securities in fiscal 2022 and received $16.6 million in proceeds from the sale of marketable securities in that period.

Cash Requirements

The Company's cash requirements within the next twelve months include accounts payable and accrued liabilities, current maturities of long-term debt, other current liabilities, and purchase commitments and other obligations. We expect the cash required to meet these obligations to be primarily generated through a combination of cash from operations and access to capital from financial markets.

Our long-term cash requirements under our various contractual obligations and commitments include:

- ***Debt Obligations and Interest Payments*** – See Note 12, "Debt and Other Financing Arrangements," in the Notes to Consolidated Financial Statements in Item 8 for further detail of our debt and the timing of expected future principal and interest payments.
- ***Operating and Finance leases*** – See Note 13, "Leases," in the Notes to Consolidated Financial Statements in Item 8 for further detail of our obligations and the timing of expected future payments.
- ***Deferred Compensation*** – The estimate of the timing of future payments under the Executive Deferred Compensation Plan and Management Savings Plan involves the use of certain assumptions, including retirement ages and payout periods. See Note 14, "Company-Sponsored Employee Benefit Plans," in the Notes to Consolidated Financial Statements in Item 8 for further detail of our obligations and the timing of expected future payments.
- ***Purchase and Other Obligations*** – Purchase obligations include agreements for purchases of product in the normal course of business for which all significant terms have been confirmed, including minimum quantities resulting from our category management process. Such amounts are based on estimates. Purchase obligations also include amounts committed with various third-party service providers to provide information technology services for periods up to fiscal 2027. See discussion under Note 20, "Commitments and Contingencies," in the Notes to Consolidated Financial Statements in Item 8. Purchase obligations exclude full requirements electricity contracts where no stated minimum purchase volume is required.
- ***Other Liabilities*** – These include other long-term liabilities reflected in our Consolidated Balance Sheets as of July 2, 2022, including obligations associated with certain employee benefit programs, unrecognized tax benefits and various long-term liabilities, which have some inherent uncertainty in the timing of these payments.
- ***Contingent Consideration*** – Certain acquisitions involve contingent consideration, typically payable only if certain operating results are attained or certain outstanding contingencies are resolved. See Note 4, "Acquisitions," in the Notes to Consolidated Financial Statements in Item 8 for aggregate contingent consideration amounts outstanding as of July 2, 2022.

We believe the following sources will be sufficient to meet our anticipated cash requirements for at least the next twelve months, while maintaining sufficient liquidity for normal operating purposes:

- our cash flows from operations;
- the availability of additional capital under our existing commercial paper programs, supported by our revolving credit facility; and
- our ability to access capital from financial markets, including issuances of debt securities, either privately or under our shelf registration statement filed with the SEC.

Due to our strong financial position, we believe that we will continue to be able to effectively access the commercial paper market and long-term capital markets, if necessary.

Cash Flows

Operating Activities

We generated $1.8 billion in cash flows from operations in fiscal 2022, compared to cash flows from operations of $1.9 billion in fiscal 2021. In fiscal 2022, these amounts included year-over-year unfavorable comparisons on working capital due to investment in volume growth that resulted from business recovery and the Recipe for Growth as well as accrued income taxes, partially offset by higher operating results and a favorable comparison on accrued expenses.

Changes in working capital had a negative impact of $1.1 billion on cash flow from operations period-over-period. With rising sales and profitability, accounts receivable and inventory increased in fiscal 2022, partially offset by an increase in accounts payable.

Income taxes negatively impacted cash flow from operations, as our payments increased commensurate with increased earnings in fiscal 2022.

Accrued expenses was a positive comparison, primarily from favorable comparisons of accrued interest, accrued payroll, incentive payment accruals, and customer rebate payments resulting from an increase in volume purchase incentives earned by our customers, as sales volumes increased through fiscal 2022.

Investing Activities

Fiscal 2022 and Fiscal 2021 capital expenditures included:

- buildings and building improvements;
- investments in technology;
- warehouse equipment; and
- fleet replacements.

Our capital expenditures in fiscal 2022 were $162.1 million higher than in fiscal 2021, as we made investments to advance our Recipe for Growth strategy.

During fiscal 2022, we paid $1.3 billion, net of cash acquired, for acquisitions. There were no acquisitions made in fiscal 2021.

Free Cash Flow

Our free cash flow for fiscal 2022 decreased by $309.7 million, to $1.2 billion, as compared to fiscal 2021, principally as a result of a decrease in cash flows from operations due to investments in working capital and a year-over-year increase in capital expenditures.

Non-GAAP Reconciliation

Free cash flow should not be used as a substitute for the most comparable GAAP measure in assessing the company's liquidity for the periods presented. An analysis of any non-GAAP financial measure should be used in conjunction with results presented in accordance with GAAP. See "Key Performance Indicators" for further discussion regarding this non-GAAP financial measure. In the table that follows, free cash flow for each period presented is reconciled to net cash provided by operating activities.

(In thousands)	2022	2021	Change in Dollars	% Change
Net cash provided by operating activities (GAAP)	$ 1,791,286	$ 1,903,842	$ (112,556)	(5.9)%
Additions to plant and equipment	(632,802)	(470,676)	(162,126)	34.4
Proceeds from sales of plant and equipment	24,144	59,147	(35,003)	(59.2)
FREE CASH FLOW (NON-GAAP)	**$ 1,182,628**	**$ 1,492,313**	**$ (309,685)**	**(20.8)%**

Financing Activities

Equity Transactions

Proceeds from exercises of share-based compensation awards were $128.2 million and $130.4 million in fiscal 2022 and fiscal 2021, respectively. The level of option exercises, and thus proceeds, will vary from period to period and is largely dependent on movements in our stock price and the time remaining before option grants expire.

We have traditionally engaged in share repurchase programs to allow Sysco to continue offsetting dilution resulting from shares issued under the company's benefit plans and to make opportunistic repurchases. In May 2021, our Board of Directors approved a share repurchase program to authorize the repurchase of up to $5.0 billion of the company's common stock, which will remain available until fully utilized. We repurchased 6,698,991 shares for $499.8 million during fiscal 2022. As of July 2, 2022, we had a remaining authorization of approximately $4.5 billion. We repurchased 3,099,268 additional shares for $267.7 million under our authorization through August 9, 2022.

We have made dividend payments to our shareholders in each fiscal year since our company's inception. Dividends paid in fiscal 2022 were $958.9 million, or $1.88 per share, as compared to $917.6 million, or $1.80 per share, in fiscal 2021. In April 2022, we declared our regular quarterly dividend for the fourth quarter of fiscal 2022 of $0.49 per share, a $0.02 per share increase from the prior quarter, which was paid in July 2022.

In August 2021, we filed a universal shelf registration statement with the SEC under which we, as a well-known seasoned issuer, have the ability to issue and sell an indeterminate amount of various types of debt and equity securities. The specific terms of any securities we issue under this registration statement will be provided in the applicable prospectus supplements.

In November 2000, we filed with the SEC a shelf registration statement covering 30,000,000 shares of common stock to be offered from time to time in connection with acquisitions. As of August 9, 2022, 29,477,835 shares remained available for issuance under this registration statement.

Debt Activity and Borrowing Availability

Our debt activity, including issuances and repayments, and our borrowing availability is described in Note 12, "Debt and Other Financing Arrangements," in the Notes to Consolidated Financial Statements in Item 8. Our outstanding borrowings at July 2, 2022, and repayment activity since the end of fiscal 2022 are disclosed within those notes. Updated amounts at August 9, 2022, include:

- No outstanding borrowings from the credit facility supporting our U.S. commercial paper program; and
- $259.0 million outstanding borrowings under our U.S. commercial paper program.

Our aggregate commercial paper issuances and short-term bank borrowings had weighted average interest rates of 1.35% for fiscal 2022 and 0.97% for fiscal 2021.

In the next 12 months, $517.8 million of long-term debt will mature. We expect to repay these senior notes in the fourth quarter of fiscal 2023.

The availability of financing in the form of debt is influenced by many factors, including our profitability, free cash flows, debt levels, credit ratings, debt covenants and economic and market conditions. As of August 9, 2022, Moody's Investors Service has assigned us an unsecured debt credit rating of Baa1 and a ratings outlook of "stable." Standard & Poor's has assigned us an unsecured debt credit rating of BBB and a ratings outlook of "stable." Fitch Ratings Inc. has assigned us an unsecured debt credit rating of BBB and a ratings outlook of "negative." A significant downgrade in our credit ratings or adverse conditions in the capital markets may increase the cost of borrowing for us or limit our access to capital. To date, we have not experienced difficulty accessing the credit markets. As of August 9, 2022, the company had approximately $3.2 billion in cash and available liquidity.

On April 29, 2022, Sysco entered into a long-term revolving credit facility to replace its previous $2.0 billion facility. The new facility includes aggregate commitments of the lenders thereunder of $3.0 billion, with an option to increase such commitments to $4.0 billion. The new facility includes a covenant, among others, requiring Sysco to maintain a ratio of consolidated EBITDA to consolidated interest expense of 3.0 to 1.0 over four consecutive fiscal quarters. The new revolving credit facility expires on April 29, 2027. As of July 2, 2022, Sysco was in compliance with all of its debt covenants, and the company expects to remain in compliance through the next twelve months.

Guarantor Summarized Financial Information

On January 19, 2011, the wholly owned U.S. Broadline subsidiaries of Sysco Corporation, which distribute a full line of food products and a wide variety of non-food products, entered into full and unconditional guarantees of all outstanding senior notes and debentures of Sysco Corporation. A list of the current guarantors is included in Exhibit 22 to this Form 10-K. All subsequent issuances of senior notes and debentures in the U.S. and borrowings under the company's now $3.0 billion long-term revolving credit facility have also been guaranteed by these subsidiaries, as discussed in Note 12, "Debt and Other Financing Arrangements," in the Notes to Consolidated Financial Statements in Item 8. As of July 2, 2022, Sysco had a total of $10.0 billion in senior notes, debentures and borrowings under the long-term revolving credit facility that were guaranteed by these subsidiary guarantors. Our remaining consolidated subsidiaries (non-guarantor subsidiaries) are not obligated under the senior notes indenture, debentures indenture or our long-term revolving credit facility.

All subsidiary guarantors are 100% owned by the parent company, all guarantees are full and unconditional, and all guarantees are joint and several. The guarantees rank equally and ratably in right of payment with all other existing and future unsecured and unsubordinated indebtedness of the respective guarantors.

The assets of Sysco Corporation consist principally of the stock of its subsidiaries. Therefore, the rights of Sysco Corporation and the rights of its creditors to participate in the assets of any subsidiary upon liquidation, recapitalization or otherwise will be subject to the prior claims of that subsidiary's creditors, except to the extent that claims of Sysco Corporation itself and/or the claims of those creditors themselves may be recognized as creditor claims of the subsidiary. Furthermore, the ability of Sysco Corporation to service its indebtedness and other obligations is dependent upon the earnings and cash flow of its subsidiaries and the distribution or other payment to it of such earnings or cash flow. If any of Sysco Corporation's subsidiaries becomes insolvent, the direct creditors of that subsidiary will have a prior claim on its assets. Sysco Corporation's rights and the rights of its creditors, including the rights of a holder of senior notes as an owner of debt securities, will be subject to that prior claim, unless Sysco Corporation or such noteholder, if such noteholder's debt securities are guaranteed by such subsidiary, also is a direct creditor of that subsidiary.

The guarantee of any subsidiary guarantor with respect to a series of senior notes or debentures may be released under certain customary circumstances. If we exercise our defeasance option with respect to the senior notes or debentures of any series, then any subsidiary guarantor effectively will be released with respect to that series. Further, each subsidiary guarantee will remain in full force and effect until the earliest to occur of the date, if any, on which (1) the applicable subsidiary guarantor shall consolidate with or merge into Sysco Corporation or any successor of Sysco Corporation or (2) Sysco Corporation or any successor of Sysco Corporation consolidates with or merges into the applicable subsidiary guarantor.

Basis of Preparation of the Summarized Financial Information

The summarized financial information of Sysco Corporation (issuer), and certain wholly owned U.S. Broadline subsidiaries (guarantors) (together, the obligor group) is presented on a combined basis with intercompany balances and transactions between entities in the obligor group eliminated. Investments in and equity in the earnings of our non-guarantor subsidiaries, which are not members of the obligor group, have been excluded from the summarized financial information. The obligor group's amounts due to, amounts due from and transactions with non-guarantor subsidiaries have been presented in separate line items, if they are material to the obligor financials. The following table includes summarized financial information of the obligor group for the periods presented.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales and expenses in the accompanying financial statements. Significant accounting policies employed by Sysco are presented in the notes to the financial statements.

Critical accounting policies and estimates are those that are most important to the portrayal of our financial position and results of operations. These policies require our most subjective or complex judgments, often employing the use of estimates about the effect of matters that are inherently uncertain. We have reviewed with the Audit Committee of the Board of Directors the development and selection of the critical accounting policies and estimates and this related disclosure. Our most critical accounting policies and estimates pertain to the goodwill and intangible assets, allowance for doubtful accounts, income taxes, company-sponsored pension plans and inventory valuation.

Goodwill and Intangible Assets

We account for acquired businesses using the acquisition method of accounting, which requires that, once control of a business is obtained, 100% of the assets acquired and liabilities assumed are recorded at the date of acquisition at their respective fair values. We use multiple valuation methods to determine the fair value of assets acquired and liabilities assumed. For intangible assets, we generally use the income method, which uses a forecast of the expected future net cash flows associated with each asset. These cash flows are then adjusted to present value by applying an appropriate discount rate that reflects the risk factors associated with the cash flow streams. Some of the more significant estimates and assumptions inherent in the income method or other methods include the amount and timing of projected future cash flows and the discount rate selected to measure the risks inherent in the future cash flows. Determining the useful life of an intangible asset also requires judgment, as different types of intangible assets will have different useful lives. Any excess of the purchase price over the estimated fair values of the net assets acquired is recorded as goodwill. More information on our acquisitions can be found in Note 4, "Acquisitions," in the Notes to Consolidated Financial Statements in Item 8.

Annually in our fiscal fourth quarter, we assess the recoverability of goodwill and indefinite-lived intangibles by determining whether the fair values exceed the carrying values of these assets. Impairment reviews, outside our annual review time frame, are performed if events or circumstances occur that include changes in macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, other relevant entity-specific events, specific events affecting the reporting unit or sustained decrease in share price. Our testing may be performed utilizing either a qualitative or quantitative assessment; however, if a qualitative assessment is performed and we determine that the fair value of a reporting unit is more likely than not (*i.e.*, a likelihood of more than 50 percent) to be less than its carrying amount, a quantitative test is performed.

When using a quantitative test, we arrive at our estimates of fair value using a combination of discounted cash flow and earnings or revenue multiple models. The results from each of these models are then weighted and combined into a single estimate of fair value for each reporting unit. We use a higher weighting for our discounted cash flow valuation compared to the earnings multiple models because the forecasted operating results that serve as a basis for the analysis incorporate management's outlook and anticipated changes for the businesses consistent with a market participant. The primary assumptions used in these various models include estimated earnings multiples of comparable acquisitions in the industry, including control premiums, earnings or revenue multiples on acquisitions completed by Sysco in the past, future cash flow estimates of the reporting units, which are dependent on internal forecasts and projected growth rates, and weighted average cost of capital, along with working capital and capital expenditure requirements. When possible, we use observable market inputs in our models to arrive at the fair values of our reporting units.

Certain reporting units have a greater proportion of goodwill recorded to estimated fair value as compared to the U.S. Broadline, Canada Broadline or SYGMA reporting units. This is primarily due to these businesses having been more recently acquired, and as a result there has been less history of organic growth than in the U.S. Broadline, Canadian Broadline and SYGMA reporting units. As such, these reporting units have a greater risk of future impairment if their operations were to suffer a significant downturn. In the annual fiscal 2022 assessment, all reporting units were concluded to have a fair value that exceeded book value by at least 30%.

The company estimated the fair value of these reporting units using a combination of discounted cash flow and earnings or revenue multiple models. For the purposes of the discounted cash flow models, fair value was determined based on the present value of estimated future cash flows, discounted at an appropriate risk adjusted rate. The fair value conclusions as of July 2, 2022 for the reporting units are highly sensitive to changes in the assumptions used in the income approach, which include forecasted revenues, perpetual growth rates, and long-term

discount rates, among others, all of which require significant judgments by management. Fair value of the reporting unit is therefore determined using significant unobservable inputs, or level 3 in the fair value hierarchy. The company has used recent historical performance, current forecasted financial information, and broad-based industry and economic statistics as a basis to estimate the key assumptions utilized in the discounted cash flow model. These key assumptions are inherently uncertain and require a high degree of estimation and judgment and are subject to change based on future changes, industry and global economic and geo-political conditions, uncertainty around the ongoing impact of the COVID-19 pandemic, and the timing and success of the implementation of current strategic initiatives.

Income Taxes

The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. Our provision for income taxes primarily reflects a combination of income earned and taxed in the various U.S. federal and state, as well as foreign, jurisdictions. Tax law changes, increases or decreases in book versus tax basis differences, accruals or adjustments of accruals for unrecognized tax benefits or valuation allowances, and our change in the mix of earnings from these taxing jurisdictions all affect the overall effective tax rate. The impact of the recovery from the COVID-19 pandemic may change our mix of earnings by jurisdiction and has increased the risk that carryforward attributes, such as operating losses, may occur within certain of our jurisdictions that could lead to the recognition of valuation allowances against certain deferred tax assets in the future, if these losses are prolonged beyond our current expectations. This would negatively impact our income tax expense, net earnings, and balance sheet.

Our liability for unrecognized tax benefits contains uncertainties because management is required to make assumptions and to apply judgment in estimating the exposures associated with our various filing positions. We believe that the judgments and estimates discussed herein are reasonable; however, actual results could differ, and we may be exposed to losses or gains that could be material. To the extent we prevail in matters for which a liability has been established, or pay amounts in excess of recorded liabilities, our effective income tax rate in a given financial statement period could be materially affected. An unfavorable tax settlement generally would require use of our cash and may result in an increase in our effective income tax rate in the period of resolution. A favorable tax settlement may be recognized as a reduction in our effective income tax rate in the period of resolution.

Company-Sponsored Pension Plans

Amounts related to defined benefit plans recognized in the financial statements are determined on an actuarial basis. Two of the more critical assumptions in the actuarial calculations are the discount rate for determining the current value of plan benefits and the expected rate of return on plan assets. Our U.S. Retirement Plan is largely frozen and is only open to a small number of employees. Our SERP is frozen and is not open to any employees. None of these plans have a significant sensitivity to changes in discount rates specific to our results of operations, but such changes could impact our balance sheet due to a change in our funded status. Due to the low level of active employees in our retirement plans, our assumption for the rate of increase in future compensation is not a critical assumption.

The expected long-term rate of return on plan assets of the U.S. Retirement Plan is 4.50% for fiscal 2022, consistent with fiscal 2021. The expectations of future returns are derived from a mathematical asset model that incorporates assumptions as to the various asset class returns, reflecting a combination of historical performance analysis and the forward-looking views of the financial markets regarding the yield on bonds, historical returns of the major stock markets and returns on alternative investments. The rate of return assumption is reviewed annually and revised as deemed appropriate.

The expected return on plan assets impacts the recorded amount of net pension costs. The expected long-term rate of return on plan assets of the U.S. Retirement Plan is 4.50% for fiscal 2023, as our long-term rate of return remains the same as fiscal 2022. A 25 basis point increase (decrease) in the assumed rate of return in the Plan for fiscal 2023 would decrease (increase) Sysco's net company-sponsored pension costs for fiscal 2023 by approximately $9.0 million.

Pension accounting standards require the recognition of the funded status of our defined benefit plans in the statement of financial position, with a corresponding adjustment to accumulated other comprehensive income, net of tax. The amount reflected in accumulated other comprehensive loss related to the recognition of the funded status of our defined benefit plans as of July 2, 2022 was a charge, net of tax, of $1.0 billion, driven by an increase in the discount rates and a decline in expected return on assets. The amount reflected in accumulated other comprehensive loss related to the recognition of the funded status of our defined benefit plans as of July 3, 2021 was a charge, net of tax, of $1.1 billion.

Allowance for Doubtful Accounts

Sysco determines the past due status of trade receivables based on contractual terms with each customer and evaluates the collectability of accounts receivable to determine an appropriate allowance for credit losses on trade receivables. To calculate an allowance for credit losses, the company estimates uncollectible amounts based on historical loss experience, including those experienced during times of local and regional disasters, the COVID-19 pandemic, current conditions and collection rates, and expectations regarding future losses.

In the third and fourth quarters of fiscal 2020, the company experienced an increase in past due receivables and recognized additional bad debt charges on its trade receivables that were outstanding at the time the pandemic caused closures among our customers in mid-March 2020. These receivables were all created in fiscal 2020 and are referred to as pre-pandemic receivables. In fiscal 2022, we recorded a net credit to the provision for losses on receivables totaling $15.5 million, which reflects a benefit on the reduction of our allowance for pre-pandemic receivable balances, as we have made excellent progress on obtaining payments from our customers. We continue to work with our customers to collect past due balances, including through the use of payment plans. Our balance for the allowance of doubtful accounts as of July 2, 2022 was $70.8 million. Our judgment is required as to the impact of certain of these items and other factors as to ultimate realization of our accounts receivable.

Inventory Valuation

Inventories consisting primarily of finished goods include food and related products and lodging products held for sale and are valued at the lower of cost (first-in, first-out method) and net realizable value. Inventory balances are adjusted for slow-moving, excess, and obsolete inventories. Inventory valuation reserves require certain management estimates and judgments which may significantly affect the ending inventory valuation. We estimate our reserves based on the consideration of a variety of factors, including but not limited to, current economic conditions and business trends, seasonal demand, future merchandising strategies and the age of our products.

We have not made any material changes in the methodology used to establish our inventory valuation or the related reserves. We believe that we have sufficient current and historical knowledge to record reasonable estimates, and the risk of inventory obsolescence is largely mitigated because of the speed with which our inventory typically turns. However, these assumptions are inherently uncertain and require estimation and judgment and are subject to change. During fiscal year 2022, the change in our inventory valuation reserve was not material to our results of operations or balance sheet.

These statements are based on management's current expectations and estimates; actual results may differ materially due in part to the risk factors set forth below and those within Part I, Item 1A of this document:

- the impact and effects of public health crises, pandemics and epidemics, such as the recent outbreak of COVID-19, and the adverse impact thereof on our business, financial condition and results of operations;
- the risk that if sales from our locally managed customers do not grow at the same rate as sales from multi-unit customers, our gross margins may decline;
- periods of significant or prolonged inflation or deflation and their impact on our product costs and profitability generally;
- the risk that we are unlikely to be able to predict inflation over the long term, and lower inflation is likely to produce lower gross profit;
- the risk that our efforts to modify truck routing, including our small truck initiative, in order to reduce outbound transportation costs may be unsuccessful;
- the risk that we may not be able to accelerate and/or identify additional administrative cost savings in order to compensate for any gross profit or supply chain cost leverage challenges;
- risks related to unfavorable conditions in the Americas and Europe and the impact on our results of operations and financial condition;
- the risks related to our efforts to implement our transformation initiatives and meet our other long-term strategic objectives, including the risk that these efforts may not provide the expected benefits in our anticipated time frame, if at all, and may prove costlier than expected;
- the impact of unexpected future changes to our business initiatives based on management's subjective evaluation of our overall business needs;
- the risk that the actual costs of any business initiatives may be greater or less than currently expected;
- the risk that competition in our industry and the impact of GPOs may adversely impact our margins and our ability to retain customers and make it difficult for us to maintain our market share, growth rate and profitability;
- the risk that our relationships with long-term customers may be materially diminished or terminated;
- the risk that changes in consumer eating habits could materially and adversely affect our business, financial condition, or results of operations;
- the risk that changes in applicable tax laws or regulations and the resolution of tax disputes could negatively affect our financial results;
- the risk that we may not be able to fully compensate for increases in fuel costs, and forward purchase commitments intended to contain fuel costs could result in above market fuel costs;
- the risk of interruption of supplies and increase in product costs as a result of conditions beyond our control;
- the potential impact on our reputation and earnings of adverse publicity or lack of confidence in our products;
- risks related to unfavorable changes to the mix of locally managed customers versus corporate-managed customers;
- the risk that we may not realize anticipated benefits from our operating cost reduction efforts;
- difficulties in successfully expanding into international markets and complimentary lines of business;
- the potential impact of product liability claims;
- the risk that we fail to comply with requirements imposed by applicable law or government regulations;
- risks related to our ability to effectively finance and integrate acquired businesses;
- risks related to our access to borrowed funds in order to grow and any default by us under our indebtedness that could have a material adverse impact on cash flow and liquidity;
- our level of indebtedness and the terms of our indebtedness could adversely affect our business and liquidity position;
- the risk that the implementation of various initiatives, the timing and successful completion of acquisitions, construction schedules and the possibility that other cash requirements could result in delays or cancellations of capital spending;

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risks consist of interest rate risk, foreign currency exchange rate risk, fuel price risk and investment risk.

Interest Rate Risk

We do not utilize financial instruments for trading purposes. Our use of debt directly exposes us to interest rate risk. Floating rate debt, where the interest rate fluctuates periodically, exposes us to short-term changes in market interest rates. Fixed rate debt, where the interest rate is fixed over the life of the instrument, exposes us to changes in market interest rates reflected in the fair value of the debt and to the risk that we may need to refinance maturing debt with new debt at higher rates.

We manage our debt portfolio to achieve an overall desired position of fixed and floating rates and may employ interest rate swaps as a tool to achieve that position. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates and the creditworthiness of the counterparties in such transactions.

At July 2, 2022, there were no commercial paper issuances outstanding under our U.S. commercial paper program. Total debt as of July 2, 2022 was $10.6 billion, of which approximately 95% was at fixed rates of interest, including the impact of our interest rate swap agreements.

At July 3, 2021, there were no commercial paper issuances outstanding under our U.S. commercial paper program. Total debt as of July 3, 2021 was $11.1 billion, of which approximately 90% was at fixed rates of interest, including the impact of our interest rate swap agreements.

Details of our outstanding swap agreements as of July 2, 2022 are below:

Foreign Currency Exchange Rate Risk

The majority of our foreign subsidiaries use their local currency as their functional currency. To the extent that business transactions are not denominated in a foreign subsidiary's functional currency, we are exposed to foreign currency exchange rate risk. We will also incur gains and losses within our shareholders' equity due to the translation of our financial statements from foreign currencies into U.S. dollars. Our largest currency exposures are with Canadian dollars, British pound sterling and Euro currencies. Our income statement trends may be impacted by the translation of the income statements of our foreign subsidiaries into U.S. dollars. The exchange rates used to translate our foreign sales into U.S. dollars negatively affected sales by 0.3% in fiscal 2022 when compared to fiscal 2021. The exchange rate used to translate our foreign sales into U.S. dollars positively affected sales by 0.9% in fiscal 2021 when compared to fiscal 2020. The impact to our operating income, net earnings and earnings per share was not material in fiscal 2022 or fiscal 2021. A 10% unfavorable change in the fiscal 2022 weighted year-to-date exchange rate and the resulting impact on our financial statements would have negatively affected fiscal 2022 sales by 1.9% and would not have materially affected our operating income, net earnings and earnings per share. We do not routinely enter into material agreements to hedge foreign currency exchange rate risks.

Our investments and loans to our foreign operations created additional foreign currency exposure. In fiscal 2017, we designated €500 million of Euro notes issued in June 2016 as a hedge of a portion of our net investment in Euro-denominated foreign operations to reduce foreign currency risk associated with the investment in these operations. Changes in the value of these items resulting from fluctuations in the underlying exchange rates to U.S. Dollar exchange rates are recorded as foreign currency translation adjustments within Accumulated other comprehensive income (loss).

Fuel Price Risk

Due to the nature of our distribution business, we are exposed to potential volatility in fuel prices. The price and availability of diesel fuel fluctuates due to changes in production, seasonality and other market factors generally outside of our control. Increased fuel costs may have a negative impact on our results of operations in three areas. First, the high cost of fuel can negatively impact consumer confidence and discretionary spending and thus reduce the frequency and amount spent by consumers for food-away-from-home purchases. Second, the high cost of fuel can increase the price we pay for product purchases and we may not be able to pass these costs fully to our customers. Third, increased fuel costs impact the costs we incur to deliver product to our customers. Fuel costs related to outbound deliveries represented approximately 0.5% of sales during fiscal 2022, fiscal 2021 and fiscal 2020.

Our activities to mitigate fuel costs include routing optimization with the goal of reducing miles driven, improving fleet utilization by adjusting idling time and maximum speeds and using fuel surcharges that primarily track with the change in market prices of fuel. We use diesel fuel swap contracts to fix the price of a portion of our projected monthly diesel fuel requirements. As of July 2, 2022, we had diesel fuel swaps with a total notional amount of approximately 52 million gallons through June 2024. These swaps are expected to lock in the price of approximately 80% of our bulk fuel purchases for fiscal 2023, or 60% of our total projected fuel purchase needs for fiscal 2023. Our remaining fuel purchase needs will occur at market rates unless contracted for a fixed price or hedged at a later date. Using current, published quarterly market price projections for diesel and estimates of fuel consumption, a 10% unfavorable change in diesel prices from the market price would result in a potential increase of approximately $8.0 million in our fuel costs on our non-contracted volumes.

Investment Risk

Our U.S. Retirement Plan holds various investments, including public and private equity, fixed income securities and real estate funds. The amount of our annual contribution to the plan is dependent upon, among other things, the return on the plan's assets and discount rates used to calculate the plan's liability. Fluctuations in asset values can cause the amount of our anticipated future contributions to the plan to increase and can result in a reduction to shareholders' equity on our balance sheet as of fiscal year-end, which is when this plan's funded status is measured. Also, the projected liability of the plan will be impacted by the fluctuations of interest rates on high quality bonds in the public markets. To the extent the financial markets experience declines, our anticipated future contributions and funded status will be affected for future years. A 10% unfavorable change in the value of the investments held by our company-sponsored retirement plans at the plans' fiscal year end (December 31, 2021) would not have a material impact on our anticipated future contributions for fiscal 2023; however, such an unfavorable change would increase our pension expense for fiscal 2023 by $30.1 million and would reduce our shareholders' equity on our balance sheet as of July 2, 2022 by $363.3 million.

Report of Management on Internal Control Over Financial Reporting

The management of Sysco Corporation ("Sysco") is responsible for establishing and maintaining adequate internal control over financial reporting for the company. Sysco's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Sysco's management assessed the effectiveness of Sysco's internal control over financial reporting as of July 2, 2022. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework (2013)*. Based on this assessment, management concluded that, as of July 2, 2022, Sysco's internal control over financial reporting was effective based on those criteria.

Ernst & Young LLP, the independent registered public accounting firm that audited the company's consolidated financial statements included in this report, has issued an audit report on the effectiveness of Sysco's internal control over financial reporting as of July 2, 2022.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Sysco Corporation

Opinion on Internal Control over Financial Reporting

We have audited Sysco Corporation and its Consolidated Subsidiaries' (the "Company") internal control over financial reporting as of July 2, 2022, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Sysco Corporation and Consolidated Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of July 2, 2022, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the 2022 consolidated financial statements of the Company and our report dated August 25, 2022, expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Sysco Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Sysco Corporation and its Consolidated Subsidiaries (the "Company") as of July 2, 2022 and July 3, 2021, the related consolidated results of operations, statements of comprehensive income, changes in shareholders' equity and cash flows for each of the three years in the period ended July 2, 2022 and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at July 2, 2022 and July 3, 2021, and the results of its operations and its cash flows for each of the three years in the period ended July 2, 2022, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of July 2, 2022, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated August 25, 2022 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the account or disclosures to which it relates.

	Valuation of Goodwill
Description of the Matter	At July 2, 2022, the Company's goodwill was $4.5 billion. As discussed in Note 1 of the consolidated financial statements, goodwill is tested by the Company's management for impairment at least annually unless there are indications of impairment at other points throughout the fiscal year. Auditing management's impairment tests for goodwill is complex and highly judgmental due to the significant estimation required to determine the fair value of the reporting units. In particular, the fair value estimates of two reporting units were more sensitive to changes in significant assumptions including changes in projected cash flows, weighted average cost of capital, and terminal growth rates. All of these assumptions are sensitive to and affected by expected future market or economic conditions and company-specific qualitative factors.
How We Addressed the Matter in Our Audit	We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the Company's goodwill impairment review process, including controls over management's review of the significant assumptions described above. We also tested controls over management's review of the data used in their valuation models. To test the estimated fair value of the Company's reporting units, we performed audit procedures that included, among others, assessing methodologies and testing the significant assumptions discussed above and the underlying data used by the Company in its analysis. We compared projected cash flows to the Company's historical cash flows and other available industry information. We involved our valuation specialists to assist in reviewing the valuation methodology and testing the weighted average cost of capital and terminal growth rates. We assessed the historical accuracy of management's estimates and performed sensitivity analyses of significant assumptions to evaluate the changes in the fair value of the reporting units that would result from changes in the assumptions. In addition, we also tested management's reconciliation of the fair value of the reporting units to the market capitalization of the Company.

Ernst & Young LLP

We have served as the Company's auditor since 2002.

Notes to Consolidated Financial Statements

Unless this Form 10-K indicates otherwise or the context otherwise requires, the terms "we," "our," "us," "Sysco," or "the company" as used in this Form 10-K refer to Sysco Corporation together with its consolidated subsidiaries and divisions.

1. Summary of Accounting Policies

Business and Consolidation

Sysco Corporation, acting through its subsidiaries and divisions (Sysco or the company), is engaged in the marketing and distribution of a wide range of food and related products primarily to the foodservice or food-away-from-home industry. These services are performed for approximately 700,000 customers from 333 distribution facilities located throughout North America and Europe.

Sysco's fiscal year ends on the Saturday nearest to June 30th. This resulted in a 52-week year ended July 2, 2022 for fiscal 2022, a 53-week year ended July 3, 2021 for fiscal 2021 and a 52-week year ended June 27, 2020 for fiscal 2020. The company will have a 52-week year ending July 1, 2023 for fiscal 2023.

The accompanying financial statements include the accounts of Sysco and its consolidated subsidiaries. All significant intercompany transactions and account balances have been eliminated.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the reported amounts of assets, liabilities, sales and expenses. Actual results could differ from the estimates used.

Cash and Cash Equivalents

Cash includes cash equivalents such as cash deposits, time deposits, certificates of deposit, commercial paper, high-quality money market funds and all highly liquid instruments with original maturities of three months or less, which are recorded at fair value.

Accounts Receivable, Less Allowances

Accounts receivable consist primarily of trade receivables from customers and receivables from suppliers for marketing or incentive programs. Sysco determines the past due status of trade receivables based on contractual terms with each customer and evaluates the collectability of accounts receivable to determine an appropriate allowance for credit losses on trade receivables. To calculate an allowance for credit losses, the company estimates uncollectible amounts based on historical loss experience, including those experienced during times of local and regional disasters, current conditions and collection rates, and expectations regarding future losses. Allowances are recorded for all other receivables based on an analysis of historical trends of write-offs and recoveries.

The company utilizes arrangements to sell portions of its trade accounts receivable to third-party financial institutions on a non-recourse basis. The arrangements meet the requirements for the receivables transferred to be accounted for as sales. Proceeds from the sales are reported net of negotiated discount and are recorded as a reduction to accounts receivable outstanding in the company's consolidated balance sheets and as cash flows from operating activities in the company's consolidated statements of cash flows. Accounts receivable sold, without recourse, under these arrangements were $3.6 billion and $3.0 billion for the fiscal years ended July 2, 2022 and July 3, 2021, respectively.

In certain instances, Sysco has continuing involvement subsequent to the transfer, limited to providing certain servicing and collection actions on behalf of the purchasers of the designated trade receivables. The outstanding aggregate principal amount of receivables that has been derecognized and remain outstanding was $51.0 million and $40.7 million at July 2, 2022 and July 3, 2021, respectively. Sysco continues to service the receivables post-transfer on a non-recourse basis with no participating interest. Transfers under these arrangements are treated as a sale and are accounted for as a reduction in trade receivables because the agreements transfer effective control of the receivables to the buyer.

Inventories

Inventories consisting primarily of finished goods include food and related products and lodging products held for resale and are valued at the lower of cost (first-in, first-out method) and net realizable value. Elements of costs include the purchase price of the product and freight charges to deliver the product to the company's warehouses and are net of certain cash received from vendors (see "Vendor Consideration").

Inventory balances are adjusted for slow-moving, excess, and obsolete inventories. Inventory valuation reserves are estimated based on the consideration of a variety of factors, including but not limited to, current economic conditions and business trends, seasonal demand, future merchandising strategies and the age of our products.

Plant and Equipment

Capital additions, improvements and major replacements are classified as plant and equipment and are carried at cost. Depreciation is recorded using the straight-line method, which reduces the book value of each asset in equal amounts over its estimated useful life, and is included within operating expenses in the consolidated results of operations. Maintenance, repairs and minor replacements are charged to earnings when they are incurred. Upon the disposition of an asset, its accumulated depreciation is deducted from the original cost, and any gain or loss is reflected in current earnings.

Long-Lived Assets

Management reviews long-lived assets, including finite-lived intangible assets, for indicators of impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Cash flows expected to be generated by the related assets are estimated over the asset's useful life on an undiscounted basis. For assets held for use, Sysco groups assets and liabilities at the lowest level for which cash flows are separately identifiable. If the evaluation indicates that the carrying value of the asset may not be recoverable, the potential impairment is measured using fair value. Impairment losses for assets to be disposed

of, if any, are based on the estimated proceeds to be received, less costs of disposal.

Goodwill and Indefinite-Lived Intangibles

Goodwill represents the excess of cost over the fair value of net assets acquired. Goodwill and intangibles with indefinite lives are not amortized. Goodwill is assigned to the reporting units that are expected to benefit from the synergies of a business combination. The recoverability of goodwill and indefinite-lived intangibles is assessed annually, or more frequently as needed when events or changes have occurred that would suggest an impairment of carrying value, by determining whether the fair values of the applicable reporting units exceed their carrying values. This annual testing may be performed utilizing either a qualitative or quantitative assessment; however, if a qualitative assessment is performed and it is determined that the fair value of a reporting unit is more likely than not (i.e., a likelihood of more than 50 percent) to be less than its carrying amount, a quantitative test is performed.

For fiscal 2022, the company utilized a qualitative assessment for certain reporting units. For the remaining reporting units, Sysco performed a quantitative test using a combination of the income and market approaches. The evaluation of fair value requires the use of projections, estimates and assumptions as to the future performance of the operations in performing a discounted cash flow analysis, as well as assumptions regarding sales and earnings multiples that would be applied in comparable acquisitions.

In the annual fiscal 2022 assessment, all reporting units were concluded to have a fair value that exceeded book value by at least 30%.

Derivative Financial Instruments

All derivatives are recognized as assets or liabilities within the consolidated balance sheets at fair value at their gross values. Gains or losses on derivative financial instruments designated as fair value hedges are recognized immediately in the consolidated results of operations, along with the offsetting gain or loss related to the underlying hedged item.

Gains or losses on derivative financial instruments designated as cash flow hedges are recorded as a separate component of shareholders' equity from inception of the hedges and are reclassified to the consolidated results of operations in conjunction with the recognition of the underlying hedged item.

For net investment hedges, the remeasurement gain or loss is recorded in accumulated other comprehensive income and will be subsequently reclassified to net earnings when the hedged net investment is either sold or substantially liquidated.

Investments in Corporate-Owned Life Insurance

Investments in Corporate-Owned Life Insurance (COLI) policies are recorded at their cash surrender values as of each balance sheet date. Changes in the cash surrender value during the period are recorded as a gain or loss within operating expenses. Sysco has the ability and intent to hold certain of its COLI policies to maturity; therefore, the company does not record deferred tax balances related to cash surrender value gains or losses for these policies. The company invests in COLI policies relating to its executive deferred compensation plan and Supplemental Executive Retirement Plan (SERP). The total amounts related to the company's investments in COLI policies included in other assets in the consolidated balance sheets were $162.3 million and $173.0 million at July 2, 2022 and July 3, 2021, respectively.

Treasury Stock

The company records treasury stock purchases at cost. Shares removed from treasury are valued at cost using the average cost method.

Foreign Currency Translation

The assets and liabilities of all foreign subsidiaries are translated at current exchange rates. Related translation adjustments are recorded as a component of Accumulated other comprehensive income (loss) (AOCI).

Revenue Recognition

The company, in accordance with Accounting Standards Codification (ASC) Topic 606, recognizes revenues when the performance obligation is satisfied, which is the point at which control of the promised goods or services are transferred to its customers, in an amount that reflects the consideration Sysco expects to be entitled to receive in exchange for those goods or services. For the majority of Sysco's customer arrangements, control transfers to customers at a point-in-time when goods have been delivered, as that is generally when legal title, physical possession and risks and rewards of goods/services transfers to the customer. The timing of satisfaction of the performance obligation is not subject to significant judgment.

Sales tax collected from customers is not included in revenue, but rather recorded as a liability due to the respective taxing authorities. Shipping and handling costs include costs associated with the selection of products and delivery to customers and are included within operating expenses.

Product Sales Revenues

Sysco generates revenue primarily from the distribution and sale of food and related products to its customers. Substantially all revenue is recognized at the point in time in which the product is delivered to the customer. The company grants certain customers sales incentives, such as rebates or discounts, which are accounted for as variable consideration. The variable consideration is based on amounts known at the time the performance obligation is satisfied and, therefore, requires minimal judgment. The disclosure of disaggregated revenues are presented in Note 3, "Revenue."

Contract Balances

After completion of Sysco's performance obligations, the company has an unconditional right to consideration as outlined in its contracts with customers. We extend credit terms to some of our customers based on our assessment of each customer's creditworthiness. Customer receivables, which are included in accounts receivable, less allowances in the consolidated balance sheet, were $4.6 billion and $3.5 billion as of July 2, 2022 and July 3, 2021, respectively.

Sysco has certain customer contracts in which upfront monies are paid to its customers. These payments have become industry practice and are not related to financing of the customer's business. They are not associated with any distinct good or service to be received from the customer and, therefore, are treated as a reduction of transaction prices. All upfront payments are capitalized in other assets and amortized over the life of the contract or the expected life of the relationship with the customer on a straight-line basis. As of July 2, 2022, Sysco's contract assets were not significant. Sysco has no significant commissions paid that are directly attributable to obtaining a particular contract.

Vendor Consideration

Sysco recognizes consideration received from vendors as a reduction to cost of sales when the services performed in connection with the monies received are completed and when the related product has been sold by Sysco. In many instances, the vendor consideration is in the form of a specified amount per case or per pound. In these instances, Sysco will recognize the vendor consideration as a reduction of cost of sales when the product is sold.

Shipping and Handling Costs

Shipping and handling costs include costs associated with the selection of products and delivery to customers. Included in operating expenses are shipping and handling costs of approximately $3.9 billion, $3.1 billion and $3.0 billion in fiscal 2022, 2021 and 2020, respectively.

Insurance Program

Sysco maintains a self-insurance program covering portions of workers' compensation, general and vehicle liability and property insurance costs. The amounts in excess of the self-insured levels are fully insured by third party insurers. Sysco has a wholly owned captive insurance subsidiary (the Captive) with the primary purpose to enhance Sysco's risk financing strategies by providing Sysco the opportunity to negotiate insurance premiums in the non-retail insurance market. The Captive must maintain a sufficient level of cash to fund future reserve payments and secure the insurer's obligations for workers' compensation, general liability and auto liability programs. The Captive holds restricted assets in order to meet solvency requirements, including a restricted investment portfolio of marketable fixed income securities, which have been classified and accounted for as available-for-sale, and cash and restricted cash equivalents held in a cash deposit account. Further, Sysco has letters of credit available to collateralize the remaining liabilities not covered by restricted cash, restricted cash equivalents and marketable securities. The company also maintains a fully self-insured group medical program. Liabilities associated with these risks are estimated in part by considering historical claims experience, medical cost trends, demographic factors, severity factors and other actuarial assumptions.

Share-Based Compensation

Sysco recognizes expense for its share-based compensation based on the fair value of the awards that are granted. The fair value of performance share unit awards is determined based on the target number of shares of common stock and the company's stock price on the date of grant and subsequently adjusted based on actual and forecasted performance compared to planned targets. The fair value of stock options is estimated at the date of grant using the Black-Scholes option pricing model. Option pricing methods require the input of subjective assumptions, including the expected stock price volatility. The fair value of restricted stock and restricted stock unit awards are based on the company's stock price on the date of grant. Measured compensation cost is recognized ratably over the vesting period of the related share-based compensation award.

During the vesting period, Sysco reduces share-based compensation expense for estimated forfeitures, which is based on analysis of historical trends reviewed on an annual basis. Sysco's estimate of forfeitures is applied at the grant level. The estimate of forfeitures is trued up to actual forfeitures at the end of each vesting period.

Income Taxes

Sysco recognizes deferred tax assets and liabilities based on the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured pursuant to tax laws using rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The impact on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. The additional United States (U.S.) federal tax burden as a result of the global intangible low taxed income regime is accounted for as a periodic cost.

The determination of the company's provision for income taxes requires judgment, the use of estimates and the interpretation and application of complex tax laws. The company's provision for income taxes primarily reflects a combination of income earned and taxed in the various U.S. federal and state, as well as various foreign jurisdictions. Jurisdictional tax law changes, increases or decreases in permanent differences between book and tax items, accruals or adjustments of accruals for tax contingencies or valuation allowances, and the company's change in the mix of earnings from these taxing jurisdictions all affect the overall effective tax rate.

Acquisitions

Acquisitions of businesses are accounted for using the acquisition method of accounting, and the financial statements include the results of the acquired operations from the respective dates of acquisition.

The purchase price of the acquired entities is preliminarily allocated to the net assets acquired and liabilities assumed based on the estimated fair value at the dates of acquisition, with any excess of cost over the fair value of net assets acquired, including intangibles, recognized as goodwill. During the measurement period, up to twelve months from the date of acquisition, subsequent changes may be made to adjust the preliminarily amounts recognized at the acquisition date to their subsequently determined acquisition-date fair values.

Basis of Presentation

The financial statements include consolidated balance sheets, consolidated results of operations, consolidated statements of comprehensive income, changes in consolidated shareholders' equity and consolidated cash flows. In the opinion of management, all adjustments, which consist of normal recurring adjustments, except as otherwise disclosed, necessary to present fairly the financial position, results of operations, comprehensive income and cash flows for all periods presented have been made.

Sysco has interests in various jointly owned foodservice operations in Mexico, Panama and Sweden for which it consolidates the results of the operations; therefore, the financial position, results of operations and cash flows for these companies have been included in Sysco's consolidated financial statements. The value of the noncontrolling interest in each entity is considered redeemable due to certain features of the investment agreement and has, therefore, been presented as mezzanine equity, which is outside of permanent equity, in the consolidated balance sheets. The income attributable to the noncontrolling interest is located within Other expense (income), net, in the consolidated results of operations, as this amount is not material. The non-cash add back for the change in the value of the noncontrolling interest is located within Other non-cash items on the consolidated cash flows.

Supplemental Cash Flow Information

Within the Consolidated Statement of Cash Flows, certain items have been grouped as other financing activities. These primarily includes cash paid for shares withheld to cover taxes from share-based compensation and debt issuance costs.

The following table sets forth the company's reconciliation of cash, cash equivalents and restricted cash reported within the Consolidated Statement of Cash Flows that sum to the total of the same such amounts shown in the Consolidated Balance Sheets:

(In thousands)	Jul. 2, 2022	Jul. 3, 2021	Jun. 27, 2020
Cash and cash equivalents	$ 867,086	$ 3,007,123	$ 6,059,427

TOTAL CASH, CASH EQUIVALENTS AND RESTRICTED CASH SHOWN IN THE CONSOLIDATED STATEMENT OF CASH FLOWS	**$ 931,376**	**$3,037,100**	**$6,095,570**

(1) Restricted cash primarily represents cash and cash equivalents of the Captive, restricted for use to secure the insurer's obligations for workers' compensation, general liability and auto liability programs. Restricted cash is located within Other assets in each consolidated balance sheet.

2. New Accounting Standards

Government Assistance

In November 2021, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2021-10, "Government Assistance (Topic 832)," which requires business entities to make annual disclosures about transactions with a government that are accounted for by analogizing to a grant or contribution accounting model. For transactions in the scope of the new standard, business entities will need to provide information about the nature of the transaction, including significant terms and conditions, as well as the amounts and specific financial statement line items affected by the transaction. The new guidance is effective for all entities for annual reporting periods beginning after December 15, 2021; however, early adoption is permitted. The guidance may be applied either prospectively to all in-scope transactions that are reflected in the financial statements at the date of initial application and to new transactions that are entered into after the date of initial application, or retrospectively.

The company has substantially completed its assessment of the accounting required under Topic 832. Sysco does not expect that the implementation of the new standard will have a material effect on the company's financial statements. The company will adopt the standard for fiscal 2023 on a prospective basis.

4. Acquisitions

During fiscal 2022, the company paid cash of $1.3 billion for several acquisitions. Certain acquisitions involve contingent consideration that may include earnout agreements that are typically payable over periods of up to three years in the event that certain operating results are achieved. As of July 2, 2022, aggregate contingent consideration outstanding was $88.0 million, of which $87.0 million was recorded as earnout liabilities. Earnout liabilities are all measured using unobservable inputs (primarily forecasted future revenue streams for the acquisition) that are considered a Level 3 fair value measurement.

Greco and Sons

On August 12, 2021, Sysco consummated its acquisition of Greco and Sons (Greco), a leading independent Italian specialty distributor in the United States, operating out of 10 distribution centers and servicing 22 geographies nationwide. Greco imports and distributes a full line of food and non-food products and manufactures specialty meat products. The acquisition also includes Bellissimo Foods Company, which distributes a broad selection of Italian and Mediterranean ingredients, including a proprietary branded line of products that are sold exclusively through the Bellissimo Foods Company distribution network, serving independent pizza and Italian restaurants. The purpose of the acquisition is to strengthen Sysco's business within the Italian foodservice sector.

The purchase price was allocated based on the company's preliminary estimated fair value of the assets acquired and liabilities assumed, as follows:

(In millions)	Preliminary Purchase Price Allocation
Accounts receivable, net	$ 72
Inventories	79
Plant and equipment	76
Goodwill and other intangibles[1]	717
Operating lease right-of-use assets	95
Other assets	2
Total assets	1,041
Accounts payable	(73)
Accrued expenses	(18)
Deferred tax liabilities	(35)
Operating lease liabilities	(49)
Other liabilities	(105)
TOTAL CONSIDERATION	**$ 761**

(1) The excess purchase price of $717.5 million was assigned to goodwill and intangibles, a portion of which is deductible for income tax purposes. Goodwill of $492.0 million has been assigned to the U.S. Foodservice Operations reportable segment. Intangible assets include customer relationships of $116.0 million with a weighted average life of 8 years and trade names of $109.5 million with a weighted average life of 15 years. Amortization expense is being recognized on a straight-line basis and was $20.1 million for fiscal 2022.

The assets, liabilities and operating results of Greco are reflected in the company's consolidated financial statements in accordance with Accounting Standard Codification Topic No. 805, Business Combinations, commencing from the acquisition date. In certain circumstances, the purchase price allocations may be based upon preliminary estimates and assumptions. Accordingly, the allocations are subject to revision until Sysco receives final information and other analysis during the measurement period. These include items such as finalizing valuation of acquired tangible and intangible assets and related tax attributes.

Fiscal 2022 includes the results of operations of Greco for the period from August 12, 2021 to July 2, 2022. The results were not material to the consolidated results of the company for fiscal 2022.

5. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The accounting guidance includes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are as follows:

- Level 1 – Unadjusted quoted prices for identical assets or liabilities in active markets;
- Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability; and
- Level 3 – Unobservable inputs for the asset or liability, which include management's own assumption about the assumptions market participants would use in pricing the asset or liability, including assumptions about risk.

Sysco's policy is to invest in only high-quality investments. Cash equivalents primarily include cash deposits, time deposits, certificates of deposit, commercial paper, high-quality money market funds and all highly liquid instruments with original maturities of three months or less.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value:

- Cash deposits included in cash equivalents are valued at amortized cost, which approximates fair value. These are included within cash equivalents as a Level 1 measurement in the tables below.
- Time deposits and commercial paper included in cash equivalents are valued at amortized cost, which approximates fair value. These are included within cash equivalents as a Level 2 measurement in the tables below.
- Money market funds are valued at the closing price reported by the fund sponsor from an actively traded exchange. These are included within cash equivalents as Level 1 measurements in the tables below.
- Fixed income securities are valued using evaluated bid prices based on a compilation of observable market information or a broker quote in a non-active market. Inputs used vary by type of security, but include spreads, yields, rate benchmarks, rate of prepayment, cash flows, rating changes and collateral performance and type.
- The interest rate swap agreements are valued using a swap valuation model that utilizes an income approach using observable market inputs including interest rates, LIBOR swap rates and credit default swap rates.
- Foreign currency forwards are valued based on exchange rates quoted by domestic and foreign banks for similar instruments.
- Fuel swap contracts are valued based on observable market transactions of forward commodity prices.

The fair value of the company's marketable securities are all measured using inputs that are considered a Level 2 measurement, as they rely on quoted prices in markets that are not actively traded or observable inputs over the full term of the asset. The location and the fair value of the company's marketable securities in the consolidated balance sheet are disclosed in Note 6, "Marketable Securities." The fair value of the company's derivative instruments are all measured using inputs that are considered a Level 2 measurement, as they are not actively traded and are valued using pricing models that use observable market quotations. The location and the fair value of derivative assets and liabilities designated as hedges in the consolidated balance sheet are disclosed in Note 10, "Derivative Financial Instruments."

The following tables present the company's assets measured at fair value on a recurring basis as of July 2, 2022 and July 3, 2021:

The carrying values of accounts receivable and accounts payable approximated their respective fair values due to their short-term maturities. The fair value of Sysco's total debt is estimated based on the quoted market prices for the same or similar issues or on the current rates offered to the company for new debt with the same maturities as existing debt, and is considered a Level 2 measurement. The fair value of total debt was approximately $10.5 billion and $13.3 billion as of July 2, 2022 and July 3, 2021, respectively. The carrying value of total debt was $10.6 billion and $11.1 billion as of July 2, 2022 and July 3, 2021, respectively.

6. Marketable Securities

Sysco invests a portion of the assets held by our wholly owned captive insurance subsidiary in a restricted investment portfolio of marketable fixed income securities, which have been classified and accounted for as available-for-sale. The company includes fixed income securities maturing in less than twelve months within Prepaid expenses and other current assets and includes fixed income securities maturing in more than twelve months within Other assets in the accompanying Consolidated Balance Sheets. The company records the amounts at fair market value, which is determined using quoted market prices at the end of the reporting period.

ASC 326 requires Sysco to estimate lifetime expected credit losses for all available-for-sale debt securities in an unrealized loss position by assessing credit indicators, including credit ratings, for the applicable securities. If the assessment indicates that an expected credit loss exists, the company determines the portion of the unrealized loss attributable to credit deterioration and records an allowance for the expected credit loss through the consolidated results of operations. Unrealized gains and losses on marketable securities are recorded in Accumulated other comprehensive loss. The following table presents the company's available-for-sale marketable securities as of July 2, 2022 and July 3, 2021:

Within the table, maturities of fixed income securities have been allocated based upon timing of estimated cash flows. Actual maturities may differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties.

7. Allowance for Credit Losses on Trade Receivables

Sysco determines the past due status of trade receivables based on contractual terms with each customer and evaluates the collectability of accounts receivable to determine an appropriate allowance for credit losses on trade receivables. To calculate an allowance for credit losses, the company estimates uncollectible amounts based on historical loss experience, including those experienced during times of local and regional disasters, the COVID-19 pandemic, current conditions and collection rates, and expectations regarding future losses.

In the third and fourth quarters of fiscal 2020, the company experienced an increase in past due trade receivables and recognized additional bad debt charges as a result of closures among our customers. These receivables were all created in fiscal 2020 and are referred to as pre-pandemic receivables. In fiscal 2022 and fiscal 2021, conditions improved and the company's results reflect a benefit on the reduction of its allowance for pre-pandemic receivable balances in both years, as the company made progress on obtaining payments from its customers. Sysco continues to work with its customers to collect past due balances, including the use of payment plans. As a result, the company's allowance for credit losses has reduced accordingly, resulting in a $28.0 million and $184.8 million benefit on pre-pandemic receivables in fiscal 2022 and fiscal 2021, respectively.

A summary of the activity in the allowance for credit losses on trade receivables appears below:

10. Derivative Financial Instruments

Sysco uses derivative financial instruments to enact hedging strategies for risk mitigation purposes; however, the company does not use derivative financial instruments for trading or speculative purposes. Hedging strategies are used to manage interest rate risk, foreign currency risk and fuel price risk.

Hedging of interest rate risk

Sysco manages its debt portfolio with interest rate swaps from time to time to achieve an overall desired position of fixed and floating rates. In fiscal 2022, Sysco settled some of its previously held interest rate swap contracts for proceeds of $23.1 million, which had a notional value of $500 million, due to the redemption of the entire $500 million aggregate principal amount of Sysco's outstanding 3.550% Senior Notes due 2025 in December 2021.

Hedging of foreign currency risk

The company uses euro-bond denominated debt to hedge the foreign currency exposure of our net investment in certain foreign operations. Additionally, Sysco's operations in Europe have inventory purchases denominated in currencies other than their functional currency, such as the euro, U.S. dollar, Polish zloty and Danish krone. These inventory purchases give rise to foreign currency exposure between the functional currency of each entity and these currencies. The company enters into foreign currency forward swap contracts to sell the applicable entity's

functional currency and buy currencies matching the inventory purchase, which operate as cash flow hedges of the company's foreign currency-denominated inventory purchases.

Hedging of fuel price risk

Sysco uses fuel commodity swap contracts to hedge against the risk of the change in the price of diesel on anticipated future purchases. These swaps have been designated as cash flow hedges.

None of the company's hedging instruments contain credit-risk-related contingent features. Details of outstanding hedging instruments as of July 2, 2022 are presented below:

(1) Represents senior notes that are unsecured, are not subject to any sinking fund requirement and include a redemption provision that allows Sysco to retire the debentures and notes at any time prior to maturity at the greater of par plus accrued interest or an amount designed to ensure that the debenture and note holders are not penalized by the early redemption.

(2) Represents senior notes, debentures and borrowings under the company's long-term revolving credit facility that are guaranteed by certain wholly owned U.S. Broadline subsidiaries of Sysco Corporation as discussed in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources."

(3) This debenture is not subject to any sinking fund requirement and is no longer redeemable prior to maturity.

As of July 2, 2022, the principal and interest payments required to be made during the next five fiscal years on Sysco's senior notes and debentures are shown below:

The impact of our outstanding fixed-to-floating interest rate swap on the fixed rate debt interest payments is included as well based on the floating rates in effect as of July 2, 2022.

On April 29, 2022, Sysco entered into a long-term revolving credit facility to replace its previous $2.0 billion facility. The new facility includes aggregate commitments of the lenders thereunder of $3.0 billion, with an option to increase such commitments to $4.0 billion. The new facility includes a covenant requiring Sysco to maintain a ratio of consolidated EBITDA to consolidated interest expense of 3.0 to 1.0 over four consecutive fiscal quarters. The new revolving credit facility expires on April 29, 2027. As of July 2, 2022, there were no borrowings outstanding under this facility.

Sysco has a U.S. commercial paper program allowing the company to issue short-term unsecured notes in an aggregate amount not to exceed $2.0 billion. Any outstanding amounts are classified within long-term debt, as the program is supported by the long-term revolving credit facility. As of July 2, 2022, there were no commercial paper issuances outstanding under this program.

Purchases and redemptions of senior notes and debentures

In December 2021, the company accessed favorable credit markets and undertook a refinancing of previously outstanding senior notes to increase its weighted-average maturity profile and decrease its average interest rates on the company's debt portfolio. As part of the refinancing, on December 14, 2021, Sysco issued senior notes (the "Notes") totaling $1.25 billion. Details of the Notes are as follows:

Maturity Date	Par Value (in millions)	Coupon Rate	Pricing (percentage of par)
December 14, 2031 (the 2031 Notes)	$450	2.45%	99.578%
December 14, 2051 (the 2051 Notes)	800	3.15	99.308

The Notes initially are fully and unconditionally guaranteed by Sysco's direct and indirect wholly owned subsidiaries that guarantee Sysco's other senior notes issued under the indenture governing the Notes or any of Sysco's other indebtedness. Interest on the Notes is paid semi-annually in arrears on June 14 and December 14, beginning June 14, 2022. At Sysco's option, any or all of the Notes may be redeemed, in whole or in part, at any time prior to maturity. If Sysco elects to redeem (i) the 2031 Notes before the date that is three months prior to the maturity date, or (ii) the 2051 Notes before the date that is six months prior to the maturity date, Sysco will pay an amount equal to the greater of 100% of the principal amount of the Notes to be redeemed or the sum of the present values of the remaining scheduled payments of principal and interest on the Notes to be redeemed that would be due if such senior notes matured on the applicable date described above. If Sysco elects to redeem a series of Notes on or after the applicable date described in the preceding sentence, Sysco will pay an amount equal to 100% of the principal amount of the Notes to be redeemed. Sysco will pay accrued and unpaid interest on the Notes redeemed to the redemption date.

On December 14, 2021, Sysco redeemed $1.25 billion in combined aggregate principal amount of its 5.650% Senior Notes due 2025 (the "5.650% Notes") and 3.550% Senior Notes due 2025 (the "3.550% Notes"). Sysco used the net proceeds from the offering of the Notes, together with cash on hand, to fund the redemption of all of Sysco's outstanding 5.650% Notes and 3.550% Notes. The redemption price for the senior notes of each such series that were redeemed was the principal amount of such senior notes plus a "make-whole" amount determined in accordance with the indenture governing such senior notes and accrued and unpaid interest to the applicable redemption date. The redemption was considered to be a debt extinguishment. As such, Sysco recognized a loss on extinguishment of debt of $115.6 million, which is recorded as a component of interest expense in the accompanying consolidated results of operations. Of this loss, $132.7 million was attributable to the purchase premium paid to the noteholders, and $6.0 million was attributable to the write-off of unamortized debt issuance costs and debt discount associated with the redeemed notes, offset by a gain of $23.1 million attributable to the termination of interest rate swap agreements that were serving as a fair value hedge.

In June 2022, Sysco repaid 2.60% senior notes totaling $450 million at maturity using cash flow from operations.

As of July 2, 2022 and July 3, 2021, letters of credit outstanding were $202.9 million and $246.5 million, respectively.

13. Leases

Sysco leases certain of its distribution and warehouse facilities, office facilities, fleet vehicles, and office and warehouse equipment. The company determines if an arrangement is a lease at inception and recognizes a finance or operating lease liability and right-of-use (ROU) asset in the consolidated balance sheets if a lease exists. Lease liabilities are recognized based on the present value of future minimum lease payments over the lease term at the commencement date. If the borrowing rate implicit in the lease is not readily determinable, Sysco uses its incremental borrowing rate based on the information available at the commencement date in determining the present value of future payments.

The lease term is defined as the noncancelable period of the lease plus any options to extend or terminate the lease when it is reasonably certain that the company will exercise one of these options. Leases with an initial term of 12 months or less are not recorded in Sysco's consolidated balance sheets, and the company recognizes expense for these leases on a straight-line basis over the lease term. Variable lease payments that do not depend on an index or a rate, such as insurance and property taxes, are excluded from the measurement of the lease liability and are recognized as variable lease cost when the obligation for that payment is incurred. For leases in which the lease and non-lease components have been combined, the variable lease expense includes expenses such as common area maintenance, utilities, and repairs and maintenance. Sysco's leases do not contain significant residual value guarantees and do not impose significant restrictions or covenants.

14. Company-Sponsored Employee Benefit Plans

Sysco has company-sponsored defined benefit and defined contribution retirement plans for its employees. Also, the company provides certain health care benefits to eligible retirees and their dependents.

Defined Contribution Plans

The company operates a defined contribution 401(k) Plan as a Safe Harbor Plan, which is a plan that treats all employees' benefits equally within the plan, under Sections 401(k) and 401(m) of the Internal Revenue Code with respect to non-union employees and those union employees whose unions adopted the Safe Harbor Plan provisions. The company will make a non-elective contribution each pay period equal to 3% of a participant's compensation. Additionally, the company will make matching contributions of 50% of a participant's pretax contribution on the first 6% of the participant's compensation contributed by the participant. Certain employees are also eligible for a transition contribution, and the company may also make discretionary contributions. For union employees who are members of unions that did not adopt the Safe Harbor Plan provisions, the plan provides that under certain circumstances the company may make matching contributions of up to 50% of the first 6% of a participant's compensation.

The company also has a non-qualified, unfunded Management Savings Plan (MSP) available to key management personnel who are participants in the Management Incentive Plan (MIP). Participants may defer up to 50% of their annual salary and up to 90% of their annual bonus. The company will make a non-elective contribution each pay period equal to 3% of a participant's compensation. Additionally, the company will make matching contributions of 50% of a participant's pretax contribution on the first 6% of the participant's eligible compensation that is deferred. Certain employees are also eligible for a transition contribution, and the company may also make discretionary contributions. All company contributions to the MSP are limited by the amounts contributed by the company to the participant's 401(k) account. The company had deferred compensation obligations of $101.3 million as of July 2, 2022 and $107.7 million as of July 3, 2021 under the unfunded MSP and the company's executive deferred compensation plan, which is frozen to all participants of the plan. More than half of the July 2, 2022 obligations are due to be paid beyond fiscal 2026.

Sysco's expense related to its defined contribution plans was $145.5 million in fiscal 2022, $145.8 million in fiscal 2021, and $151.4 million in fiscal 2020.

Defined Benefit Plans

Sysco maintains various qualified pension plans that pay benefits to participating employees at retirement, using formulas based on a participant's years of service and compensation. The U.S. pension plan (U.S. Retirement Plan) is frozen for all U.S.-based salaried and non-union hourly employees, as these employees are eligible for benefits under the company's defined contribution 401(k) plan. Various defined benefit pension plans cover certain employees, primarily in the U.K., France and Sweden; however, the U.K. pension plan (U.K. Retirement Plan) is frozen to new plan participants and future accrual of benefits. The funding policy for each plan complies with the requirements of relevant governmental laws and regulations.

In addition to receiving benefits upon retirement under the company's U.S. Retirement Plan, certain key management personnel, who were participants in the MIP, are entitled to receive benefits under the Supplemental Executive Retirement Plan (SERP). This plan is a nonqualified, unfunded supplementary retirement plan and was amended to freeze benefits and stop future accruals effective June 29, 2013, to all participants.

The company also provides certain health care benefits to eligible retirees and their dependents. These health care benefits represent Sysco's unfunded other post-retirement medical plans. The plan had benefit obligations of $8.1 million as of July 2, 2022 and $10.2 million as of July 3, 2021.

Funded Status

Accumulated pension assets measured against the obligation for pension benefits represents the funded status of a given plan. The funded status of Sysco's company-sponsored defined benefit plans is presented in the table below. The caption "U.S. Pension Benefits" in the tables below includes both the U.S. Retirement Plan and the SERP. As Sysco's fiscal 2022 year end is July 2, 2022, the company utilized a practical expedient permitting Sysco to measure its defined benefit plan assets and obligations as of the month end closest to the fiscal year end, and has used June 30, 2022 as the measurement date of the plan assets and obligations disclosed herein.

These assets are not included as plan assets or in the funded status amounts in the tables above and below. The life insurance policies on the lives of the participants had carrying values of $92.6 million as of July 2, 2022 and $93.2 million as of July 3, 2021. Discount rate — SERP	4.84	2.91
Discount rate — U.K. Retirement Plan	3.65	1.90
Rate of compensation increase — U.S. Retirement Plan	3.00	2.56

As benefit accruals under the SERP and U.K. Retirement Plan are frozen, future pay is not projected in the determination of the benefit obligation as of July 2, 2022 or July 3, 2021.

Weighted-average assumptions used to determine net company-sponsored pension costs for each fiscal year were:

	2022	2021	2020
Discount rate — U.S. Retirement Plan	3.12%	2.94%	3.70%
Discount rate — SERP	2.91	2.91	3.62
Discount rate — U.K. Retirement Plan	1.90	1.60	2.30
Expected rate of return — U.S. Retirement Plan	4.50	4.75	5.00
Expected rate of return — U.K. Retirement Plan	3.30	2.55	4.55
Rate of compensation increase — U.S. Retirement Plan	2.56	2.56	2.56

For guidance in determining the discount rate for U.S. defined benefit plans, Sysco calculates the implied rate of return on a hypothetical portfolio of high-quality fixed-income investments for which the timing and amount of cash outflows approximates the estimated payouts of the company-sponsored pension plans. Sysco uses an annualized corporate bond yield curve to estimate the rate at which pension benefits could effectively be settled to estimate a discount rate for the U.K. Retirement Plan. The discount rate assumption is updated annually and revised as deemed appropriate. The discount rates to be used for the calculation of fiscal 2023 net company-sponsored benefit costs for the U.S. Retirement Plan and U.K. Retirement Plan are 4.91% and 3.65%, respectively. The discount rate to be used for the calculation of fiscal 2023 net company-sponsored benefit costs for the SERP is 4.84%.

The expected long-term rate of return on plan assets assumption for the retirement plans are net return on assets assumption, representing gross return on assets less asset management expenses. Specific to the U.S. Retirement Plan, administrative expenses are also excluded from the gross return on assets. The expected return for the U.S. Retirement Plan is derived from a mathematical asset model that incorporates assumptions as to the various asset class returns, reflecting a combination of rigorous historical performance analysis and the forward-looking views of the financial markets regarding the yield on bonds, the historical returns of the major stock markets and returns on alternative investments. The expected return for the U.K. Retirement Plan is derived from a long-term swap yield time horizon adjusted for the expected return based on the plan's current asset allocation and historical results. The rate of return assumption is reviewed annually and revised as deemed appropriate. The expected long-term rate of return to be used in the calculation of fiscal 2023 net company-sponsored benefit costs for the U.S. Retirement Plan and U.K. Retirement Plan are 4.50% and 4.65%, respectively.

Plan Assets

Investment Strategy

The company's overall strategic investment objectives for the U.S. Retirement Plan are to preserve capital for future benefit payments and to balance risk and return commensurate with ongoing changes in the valuation of plan liabilities using an investment strategy that closely aligns the duration of the U.S. Retirement Plan's assets with the duration of its liabilities. In order to accomplish these objectives, the company oversees the U.S. Retirement Plan's investment objectives and policy design, decides proper plan asset class strategies and structures, monitors the performance of plan investment managers and investment funds and determines the proper investment allocation of pension plan contributions. The strategy results in an asset portfolio that more closely matches the behavior of the liability, thereby reducing the volatility of the U.S. Retirement Plan's funded status. This structure ensures the U.S. Retirement Plan's investments are diversified within each asset class, in addition to being diversified across asset classes with the intent to build asset class portfolios that are structured without strategic bias for or against any subcategories within each asset class. The company has also created a set of investment guidelines for the U.S. Retirement Plan's investment managers to specify prohibited transactions, including borrowing of money except for real estate, private equity or hedge fund portfolios where leverage is a key component of the investment strategy and permitted in the investments' governing documents, the purchase of securities on margin unless fully collateralized by cash or cash equivalents or short sales, pledging, mortgaging or hypothecating of any securities, except for loans of securities that are fully collateralized, market timing transactions and the direct purchase of the securities of Sysco or the investment manager. The purchase or sale of derivatives for speculation or leverage is also prohibited; however, investment managers are allowed to use derivative securities so long as they do not increase the risk profile or leverage of the manager's portfolio. Such derivative securities have been used to prevent funded status changes due to interest rate changes.

The U.S. Retirement Plan's target and actual investment allocation as of July 2, 2022 is as follows:

	U.S. Retirement Plan	
	Target Asset Allocation	Actual Asset Allocation
Growth assets	30%	28%
Liability hedging assets	70	72
		100%

Sysco's U.S. Retirement Plan investment strategy is implemented through a combination of balanced and specialized investment managers, passive investment funds and actively managed investment funds. Growth assets include, but are not limited to, equities, alternatives, real estate, and growth fixed income intended to generate returns in excess of the liability growth rate. The Liability Hedging assets will be comprised primarily of fixed income investments, including interest rate and credit derivatives, intended to reduce funded status volatility due to changes in interest rates and credit spreads, while generating returns consistent with the projected liability growth rate. The U.S. Retirement Plan's portfolio includes investment funds which are selected based on each fund's stated investment strategy to align with Sysco's overall target mix of investments. Actual asset allocation is regularly reviewed and periodically rebalanced to the target allocation when considered appropriate.

The day-to-day management of the assets of the U.K. Retirement Plan has been delegated by the plan trustee to a fiduciary manager who decides the composition of the asset portfolio in line with the objectives of the plan's trustee and within specific investment guidelines agreed upon with the trustee. The primary objective for the U.K. Retirement Plan is to provide sufficient assets to pay benefits as they fall due. The current objective for the U.K. Retirement Plan is to achieve a return on plan assets of 2.1% in excess of the return on the liability benchmark over a rolling five-year period. The liability benchmark is the portfolio of gilts, which are bonds issued by the British government, that best matches the liability profile of the U.K. Retirement Plan. The investment objective includes a risk statement that targets a level of investment tracking error versus the liability benchmark to be below 10% per year. The actual tracking error targeted may fluctuate over time as the composition of the portfolio changes and the levels of risk in markets change. The U.K. Retirement Plan's Trustee and its Fiduciary Manager seek to achieve the Plan's investment objectives by investing in a suitably diversified mix of assets. The U.K. Retirement Plan uses derivatives such as forwards, futures, swaps and options for risk management and for the efficient implementation of the investment strategy.

The U.K. Retirement Plan's target investment allocation and actual investment allocation for fiscal 2022 is as follows:

	U.K. Retirement Plan	
	Target Asset Allocation	Actual Asset Allocation
Common contractual fund	40%	45%
Liability hedging assets	60	55
		100%

The actual asset allocation differed from the target asset allocation due to market conditions at the end of fiscal 2022, primarily the impact of UK bond yield changes.

The U.K. Retirement Plan's investment strategy is implemented primarily through a common contractual investment fund and liability hedging assets both managed by the solvency manager. The pooled investment fund consists of investment types including (1) equity investments covering a range of geographies and including private equity investments, (2) credit investments including global investment grade and high yield bonds, loans and other debt and derivative securities, (3) property investments including global direct or indirect real estate holdings, and (4) macro-oriented funds that seek to generate return by going long and short in a variety of markets and operate strategies which focus on markets rather than individual stocks and often use derivatives rather than physical assets. Actual asset allocation is regularly reviewed and periodically rebalanced to the target allocation when considered appropriate.

As discussed above, the retirement plans' investments in equities, debt instruments and alternative investments provide a range of returns and also expose the plan to investment risk. However, the investment policies put in place by the trustee and solvency manager ensure diversification of plan assets across issuers, industries and countries.

Fair Value of Plan Assets

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). See Note 5, "Fair Value Measurements," for a description of the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The following is a description of the valuation methodologies used for assets and liabilities held by Sysco's retirement plans measured at fair value.

Cash and cash equivalents: Valued at amortized cost, which approximates fair value due to the short-term maturities of these investments. Cash and cash equivalents is included as a Level 1 and Level 2 measurement in the table below.

Equity securities: Valued at the closing price reported on the exchange market. Equity securities valued at the closing price reported on the exchange market are classified as a Level 1 measurement in the table below. If a stock is not listed on a public exchange, such as an American Depository Receipt or some preferred stocks, the stock is valued using an evaluated bid price based on a compilation of observable market information. Equity securities not listed on a public exchange are classified as a Level 2 measurement in the table below.

Fixed income securities: Valued using evaluated bid prices based on a compilation of observable market information or a broker quote in a non-active market. All fixed income securities are included as a Level 2 measurement in the table below.

Investment funds: Represents collective trust and funds holding debt, equity, hedge funds, private equity funds, exchange-traded real estate securities, and common contractual funds which are valued at the net asset value (NAV) provided by the manager of each fund. The NAV is based on the fair value of the underlying securities within the fund. Non-exchange traded real estate funds are valued based on the proportionate interest held by the U.S. Retirement Plan, which is based on the valuations of the underlying real estate investments held by each fund. Each real estate investment is valued on the basis of a discounted cash flow approach. Inputs used include future rental receipts, expenses and residual values from a market participant view of the highest and best use of the real estate as rental property. The private equity funds are valued based on the proportionate interest held by the U.S. Retirement Plan, which is based on the valuations of the underlying private equity investments held by each fund. The hedge funds are valued based on the hedge funds' proportionate share of the net assets of the underlying private investment fund as determined by the underlying private investment fund's general partner. Indirectly held investments are valued utilizing the latest financial reports supplied by the fund's portfolio investments. Directly held investments are valued initially based on transaction price and are adjusted utilizing available market data and investment-specific factors, such as estimates of liquidation value, prices of recent transactions in the same or similar issuer, current operating performance and future expectations of the particular investment, changes in market outlook and the financing environment.

Derivatives: Valuation method varies by type of derivative security.

- Credit default and interest rate swaps: Valued using evaluated bid prices based on a compilation of observable market information. Inputs used for credit default swaps include spread curves and trade data about the credit quality of the counterparty. Inputs used for interest rate swaps include benchmark yields, swap curves, cash flow analysis, and interdealer broker rates. Credit default and interest rate swaps are included as a Level 2 measurement in the table below.
- Foreign currency contracts: Valued using a standardized interpolation model that utilizes the quoted prices for standard-length forward foreign currency contracts and adjusts to the remaining term outstanding on the contract being valued. Foreign currency contracts are included as a Level 2 measurement in the table below.
- Futures and option contracts: Valued at the closing price reported on the exchange market for exchange-traded futures and options. Over-the-counter options are valued using pricing models that are based on observable market information. Exchange-traded futures and options are included as a Level 1 measurement in the table below; over-the-counter options are included as a Level 2 measurement.

15. Multiemployer Employee Benefit Plans

Defined Benefit Pension Plans

Sysco currently participates in several different multiemployer defined benefit pension plans in the United States (U.S.) based on obligations arising under collective bargaining agreements covering union-represented employees. Expenses related to these plans are recognized at the time we make contributions to the plans. Sysco does not directly manage these multiemployer plans; pursuant to federal law, these plans are managed by boards of trustees, half of whom are appointed by the unions and the other half appointed by employers contributing to the plan. Some of Sysco's current employees in the U.S. are participants in such multiemployer plans as of July 2, 2022.

The risks of participating in these multiemployer plans are different from single-employer plans in the following respects:

- Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.
- If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.
- If Sysco chooses to stop participating in some of its multiemployer plans in the U.S., Sysco may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

Based upon the information available from plan administrators, management believes that all of these multiemployer plans are, to different degrees, underfunded. In addition, pension-related legislation in the U.S. requires underfunded pension plans to improve their funding ratios within prescribed intervals based on the level of their underfunding. As a result, Sysco expects its future contributions to these plans to increase. In addition, if a multiemployer defined benefit plan fails to satisfy certain minimum funding requirements, the Internal Revenue Service may impose a nondeductible excise tax of 5% on the amount of the accumulated funding deficiency for those employers contributing to the fund. However, under current law, this excise tax is unlikely to apply since multiemployer pension plans experiencing accumulated funding deficiencies are considered "critical" or "critical and declining," and the excise tax does not apply to pension plans in critical or critical and declining status. Under current law regarding multiemployer defined benefit plans, a plan's termination, Sysco's voluntary withdrawal, or the mass withdrawal of all contributing employers from any underfunded multiemployer defined benefit plan would require Sysco to make withdrawal liability payments to the plan for Sysco's allocated share of the multiemployer plan's unfunded vested benefit liabilities.

Plan Contributions

Sysco's contributions to multiemployer defined benefit pension plans were as follows for each fiscal year:

(In thousands)	2022	2021	2020
Individually significant plans	$ 35,103	$ 29,143	$ 31,683
All other plans	10,386	13,750	15,762
TOTAL CONTRIBUTIONS	**$ 45,489**	**$ 42,893**	**$ 47,445**

Individually Significant Plans

The following information relates to multiemployer defined benefit pension plans that Sysco has determined to be individually significant to the company. As noted below, the company has determined only one plan – the Western Conference of Teamsters Pension Plan – as currently being individually significant to the company. To determine individually significant plans, the company evaluated several factors, including Sysco's significance to the plan in terms of employees and contributions, the funded status of the plan and the size of the company's potential withdrawal liability if it were to voluntarily withdraw from the plan.

The following table provides information about the funded status of individually significant plans:

- The "EIN-PN" column provides the Employer Identification Number (EIN) and the three-digit plan number (PN).
- The "Pension Protection Act Zone Status" columns provide the two most recent Pension Protection Act zone statuses available from each plan. The zone status is based on information that the company received from the plan's administrators and is certified by each plan's actuary, together with information included in the annual return/reports filed by each plan with the U.S. Department of Labor. Among other factors, plans in the red zone are generally less than 65% funded, plans in the orange zone are both less than 80% funded and have an accumulated funding deficiency or are expected to have a deficiency in any of the next six plan years, plans in the yellow zone are less than 80% funded and plans in the green zone are at least 80% funded. The Multiemployer Protection Act of 2014 created a new zone called "critical and declining." Plans are generally considered "critical and declining" if they are projected to become insolvent within 15 years.
- The "FIP/RP Status" column indicates whether a financial improvement plan (FIP) for yellow/orange zone plans or a rehabilitation plan (RP) for red zone plans is pending or implemented in the current year or was put in place in a prior year. A status of "Pending" indicates a FIP/RP has been approved but actual period covered by the FIP/RP has not begun. A status of "Implemented" means the period covered by the FIP/RP began in the current year or is ongoing.
- The "Surcharge Imposed" column indicates whether a surcharge or supplemental contribution was paid during the most recent annual period presented for the company's contributions to each plan in the yellow, orange or red zone. If the company's current collective bargaining agreement (CBA) with a plan satisfies the requirements of a pending but not yet implemented FIP or RP, then the payment of surcharges or supplemental contributions is not required and "No" will be reflected in this column. If the company's current CBA with a plan does not yet satisfy the requirements of a pending but not yet implemented FIP or RP, then the payment of surcharges or supplemental contributions is required and "Yes" will be reflected in this column.

Pension Fund	EIN-PN	Pension Protection Act Zone Status As of 12/31/21	As of 12/31/20	FIP/RP Status	Surcharge Imposed	Expiration Date(s) of CBA(s)
Western Conference of Teamsters Pension Plan	91-6145047-001	Green	Green	N/A	N/A	7/3/2022 to 11/30/2027[1]

(1) Sysco is party to 24 CBAs that require contributions to the Western Conference of Teamsters Pension Trust. Each agreement covers anywhere from less than 1% to 19% of the total contributions Sysco is required to pay the fund.

The following table provides information about the company's contributions to individually significant plans:

- The "Sysco Contributions" columns provide contribution amounts based on Sysco's fiscal years, which may not coincide with the plans' fiscal years.
- The "Sysco 5% of Total Plan Contributions" columns indicate whether Sysco was listed on Schedule R of the plan's most recently filed Form 5500s as providing more than five percent of the total contributions to the plan, and the plan year-end is noted.

Pension Fund *(In thousands)*	Sysco Contributions 2022	2021	2020	Sysco 5% of Total Plan Contributions 2021	2020
Western Conference of Teamsters Pension Plan	$ 35,103	$ 29,143	$ 31,683	No	No

For the plan noted in the table above, minimum contributions outside of the agreed upon contractual rate are not required.

16. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share:

Dividends declared were $970.8 million, $933.4 million and $884.1 million in fiscal 2022, 2021 and 2020, respectively. Included in dividends declared for each year were dividends declared but not yet paid at year-end of approximately $249.2 million, $240.6 million and $228.7 million in fiscal 2022, 2021 and 2020, respectively.

17. Other Comprehensive Income

Comprehensive income is net earnings plus certain other items that are recorded directly to shareholders' equity, such as foreign currency translation adjustment, changes in marketable securities, amounts related to certain hedging arrangements and amounts related to pension and other postretirement plans. Comprehensive income was $1.0 billion, $1.1 billion and $104.3 million for fiscal 2022, 2021 and 2020, respectively.

A summary of the components of other comprehensive income (loss) and the related tax effects for each of the periods presented is as follows:

18. Share-Based Compensation

Sysco provides compensation benefits to employees under several share-based payment arrangements, including various long-term employee stock incentive plans and the 2015 Employee Stock Purchase Plan (ESPP).

Stock Incentive Plans

In November 2018, Sysco's Omnibus Incentive Plan (2018 Plan) was adopted and reserved up to 51,500,000 shares of Sysco common stock for share-based awards to employees, non-employee directors and key advisors. Of the 51,500,000 authorized shares, the full 51,500,000 shares may be issued as options or stock appreciation rights and up to 17,500,000 shares may be issued as restricted stock, restricted stock units or other types of stock-based awards. To date, Sysco has issued options, restricted stock units and performance share units under the 2018 Plan. Vesting requirements for awards under the 2018 Plan vary by individual grant and may include either time-based vesting or time-based vesting subject to acceleration based on performance criteria for fiscal periods of at least one year. The contractual life of all options granted under the 2018 Plan are and will be no greater than ten years. As of July 2, 2022, there were 41,785,243 remaining shares authorized and available for grant in total under the 2018 Plan, of which the full 41,785,243 shares may be issued as options or stock appreciation rights, or as a combination of up to 13,254,023 shares that may be issued as restricted stock, restricted stock units or other types of stock-based awards, with the remainder available for issuance as options or stock appreciation rights.

Sysco has also granted employee options under several previous employee stock option plans for which previously granted options remain outstanding as of July 2, 2022. No new options will be issued under any of the prior plans, as future grants to employees will be made through the 2018 Plan or subsequently adopted plans. Awards under these plans are subject to time-based vesting with vesting periods that vary by individual grant. The contractual life of all options granted under these plans is ten years. Sysco's policy is to utilize treasury stock for issuing shares upon share option exercise or share unit conversion.

Performance Share Units

During fiscal 2022 and 2021, 475,883 and 936,392 performance share units (PSUs), respectively, were granted to employees. Based on the jurisdiction in which the employee resides, some of these PSUs were granted with forfeitable dividend equivalents. The fair value of each PSU award granted with a dividend equivalent is based on the company's stock price as of the date of grant. For PSUs granted without dividend equivalents, the fair value was reduced by the present value of expected dividends during the vesting period. The weighted average grant-date fair value per performance share unit granted during fiscal 2022 and 2021 was $76.75 and $61.33, respectively. The PSUs will convert into shares of Sysco common stock at the end of the performance period based on actual performance targets achieved, as well as the market-based return of Sysco's common stock relative to that of the S&P 500 index companies.

Stock Options

Sysco's option awards are subject to graded vesting over a requisite service period with compensation cost recognized on a straight-line basis over the requisite service period over the duration of the award.

In addition, certain of Sysco's options provide that the options continue to vest as if the optionee continued as an employee or director if the optionee meets certain age and years of service thresholds upon retirement. In these cases, Sysco will recognize compensation cost for such awards over the period from the grant date to the date the employee or director first becomes eligible to retire with the options continuing to vest after retirement.

The fair value of each option award is estimated as of the date of grant using a Black-Scholes option pricing model. Expected dividend yield is estimated based on the historical pattern of dividends and the average stock price for the year preceding the option grant. Expected volatility is based on historical volatility of Sysco's stock, implied volatilities from traded options on Sysco's stock and other factors. The risk-free rate for the expected term of the option is based on the United States Treasury yield curve in effect at the time of grant. Sysco utilizes historical data to estimate option exercise and employee termination behavior within the valuation model; separate groups of employees that have similar historical exercise behavior are considered separately in determining the expected life of awards for valuation purposes.

The weighted average assumptions discussed above are noted in the table below for relevant periods as follows:

	2022	2021	2020
Dividend yield	2.5%	2.7%	2.4%
Expected volatility	30.1%	32.1%	18.3%
Risk-free interest rate	1.0%	0.5%	1.5%
Expected Life	6.6 years	7.0 years	7.0 years

The following summary presents information regarding outstanding options as of July 2, 2022 and changes during the fiscal year then ended with regard to options under all stock incentive plans:

	Shares Under Option	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)

Exercisable as of July 2, 2022	**6,542,396**	**$ 59.64**	**5.45**	**$ 174,535**

The total number of employee options granted was 1,224,150, 1,975,413 and 3,286,943 in fiscal years 2022, 2021 and 2020, respectively.

During fiscal 2022, 499,554 and 724,596 options were granted to 11 executive officers and 145 other key employees, respectively. During fiscal 2021, 706,229 and 1,269,184 options were granted to 13 executive officers and 117 other key employees, respectively. During fiscal 2020, 1,554,566 and 1,732,377 options were granted to 12 executive officers and 174 other key employees, respectively.

The weighted average grant date fair value of options granted in fiscal 2022, 2021 and 2020 was $17.39, $13.72 and $10.57, respectively. The total intrinsic value of options exercised during fiscal 2022, 2021 and 2020 was $5.1 million, $6.7 million and $11.6 million, respectively.

Restricted Stock Units

During fiscal 2022, 2021 and 2020, 758,934, 975,886 and 704,732 restricted stock units, respectively, were granted to employees, the majority of which will vest ratably over a three-year period. Some of these restricted stock units were granted with dividend equivalents. The fair value of each restricted stock unit award granted with a dividend equivalent is based on the company's stock price as of the date of grant. For restricted stock unit awards granted without dividend equivalents, the fair value was reduced by the present value of expected dividends as of the date of grant date during the vesting period. The weighted average grant date fair value per share of restricted stock units granted during fiscal 2022, 2021 and 2020 was $80.31, $66.55 and $71.01, respectively. The total fair value of restricted stock units vested during fiscal 2022, 2021 and 2020 was $41.6 million, $34.8 million and $30.4 million, respectively. The total intrinsic value of restricted stock units vested during fiscal 2022, 2021 and 2020 was $52.6 million, $42.6 million and $35.7 million, respectively.

Non-Employee Director Awards

During fiscal 2022, 2021 and 2020, 22,293, 28,419 and 27,431 restricted equity awards, respectively, were granted to non-employee directors (NEDs), which will vest over a one-year period. NEDs may elect to receive these awards in restricted stock shares that will vest at the end of the award stated vesting period or as deferred units that convert into shares of Sysco common stock on a date subsequent to the award stated vesting date selected by the NED. The fair value of the restricted awards is based on the company's stock price as of the date of grant. The weighted average grant date fair value of the shares granted during fiscal 2022, 2021 and 2020 was $74.93, $71.99 and $74.17, respectively. The total fair value of restricted stock shares vested and deferred units distributed during fiscal 2022, 2021 and 2020 was $1.7 million, $2.0 million and $2.0 million, respectively. Restricted stock shares are valued on their vesting date. Vested deferred units are valued on their subsequent conversion and distribution date.

NEDs may elect to receive up to 100% of their annual directors' fees in Sysco common stock on either an annual or deferred basis. As a result of such elections, a total of 6,002, 5,887 and 4,187 shares with a weighted-average grant date fair value of $78.35, $57.19 and $75.46 per share were issued in fiscal 2022, 2021 and 2020, respectively, in the form of fully vested common stock or deferred units. The total fair value of common stock issued as a result of election shares and deferred units distributed during fiscal 2022, 2021 and 2020 was $0.5 million, $0.3 million and $0.2 million, respectively. Common stock shares are valued on their vesting date. Vested deferred units are valued on their subsequent conversion and distribution date.

As of July 2, 2022, there were 100,272 fully vested deferred units outstanding that will convert into shares of Sysco common stock upon dates selected by the respective NED.

The total number of shares that may be sold pursuant to the ESPP may not exceed 79,000,000 shares, of which 3,251,703 remained available as of July 2, 2022.

The fair value of the stock purchase rights was calculated as the difference between the stock price at date of issuance and the employee purchase price.

The total share-based compensation cost included in operating expenses in the consolidated results of operations was $122.3 million, $95.8 million and $42.2 million for fiscal 2022, 2021 and 2020, respectively. The company's expense related to its PSUs increased, as the performance metrics are trending above target for awards not yet paid. The total income tax benefit for share-based compensation arrangements was $19.1 million, $17.8 million and $7.0 million for fiscal 2022, 2021 and 2020, respectively.

As of July 2, 2022, there was $111.5 million of total unrecognized share-based compensation cost, which is expected to be recognized over a weighted-average period of 1.9 years.

Cash received from option exercises and ESPP participation was $128.2 million, $130.4 million and $227.6 million during fiscal 2022, 2021 and 2020, respectively. The actual tax benefit realized for the tax deductions from option exercises totaled $12.9 million, $11.0 million and $25.4 million during fiscal 2022, 2021 and 2020, respectively.

19. Income Taxes

Income Tax Provisions

For financial reporting purposes, earnings (loss) before income taxes consists of the following:

(In thousands)	2022	2021	2020
U.S.	$ 1,642,376	$ 858,179	$ 742,332
Foreign	104,397	(273,451)	(448,948)
TOTAL	**$ 1,746,773**	**$ 584,728**	**$ 293,384**

The income tax provision for each fiscal year consists of the following:

(In thousands)	2022	2021	2020
U.S. federal income taxes	$ 353,825	$ 158,762	$ 128,576
State and local income taxes	45,502	17,808	8,529
Foreign income taxes	(11,322)	(116,051)	(59,196)
TOTAL	**$ 388,005**	**$ 60,519**	**$ 77,909**

The current and deferred components of the income tax provisions for each fiscal year are as follows:

(In thousands)	2022	2021	2020
Current	$ 452,459	$ 218,383	$ 269,226
Deferred	(64,454)	(157,864)	(191,317)
TOTAL	**$ 388,005**	**$ 60,519**	**$ 77,909**

The deferred tax provisions result from the effects of net changes during the year in deferred tax assets and liabilities arising from temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

Effective Tax Rates

Reconciliations of the statutory federal income tax rate to the effective income tax rates for each fiscal year are as follows:

	2022	2021	2020
U.S. statutory federal income tax rate	21.00%	21.00%	21.00%
State and local income taxes, net of any applicable federal income tax benefit	2.41	2.67	5.69
Foreign income taxes	(1.88)	(9.99)	(2.46)
Uncertain tax positions	0.83	(0.38)	(1.44)
Tax benefit of equity-based compensation	(0.16)	(1.07)	(9.77)
Nondeductible impairment charges	—	—	17.65
Other	0.01	(1.88)	(4.12)
EFFECTIVE INCOME TAX RATE	**22.21%**	**10.35%**	**26.55%**

The effective tax rate of 22.21% for fiscal 2022 was impacted by (1) state income tax expense of $42.2 million and (2) our foreign operations are subject to their earnings being taxed at rates different than our domestic tax rate, as well as credits, local permanent differences and other minimum taxes, which resulted in a net decrease in the effective tax rate.

The effective tax rate of 10.35% for fiscal 2021 was impacted by (1) the tax benefit resulting from the changes in tax law in the U.K. of $23.2 million, (2) the favorable impact of excess tax benefits of equity-based compensation that totaled $15.0 million, and (3) the $7.6 million tax benefit attributable to the sale of the stock of Cake Corporation.

The effective tax rate of 26.55% for fiscal 2020 was impacted by the tax benefits attributable to equity compensation exercises. Our foreign operations are subject to their earnings being taxed at rates different than our domestic tax rate, as well as credits, local permanent differences and other minimum taxes, which resulted in a net decrease in the effective tax rate. Nondeductible asset impairment charges have an unfavorable impact. Included within "Other" is the effect of certain non-deductible expenses in the U.S. jurisdiction as well as the impact of U.S. tax credits, return to accrual adjustments and U.S. taxes on foreign earnings.

Deferred Tax Assets and Liabilities

Significant components of Sysco's deferred tax assets and liabilities are as follows:

(In thousands)	Jul. 2, 2022	Jul. 3, 2021
Deferred tax assets:		
Net operating loss carryforwards	$ 652,807	$ 613,325
Pension	71,722	111,084
Receivables	43,108	53,688
Deferred compensation	27,984	28,978
Share-based compensation	30,395	26,498
Inventory	24,394	17,983
Operating lease liabilities	161,684	181,425
Other	89,143	115,428
Deferred tax assets before valuation allowances	1,101,237	1,148,409
Valuation allowances	(232,485)	(226,626)
Total deferred tax assets	868,752	921,783
Deferred tax liabilities:		
Goodwill and intangible assets	379,018	351,758
Excess tax depreciation and basis differences of assets	150,578	148,418
Operating lease assets	161,163	181,425
Other	50,560	34,725
Total deferred tax liabilities	741,319	716,326
TOTAL NET DEFERRED TAX ASSETS	**$ 127,433**	**$ 205,457**

The company's deferred tax asset for net operating loss carryforwards as of July 2, 2022 and July 3, 2021 consisted of state and foreign net operating tax loss carryforwards. The state net operating loss carryforwards outstanding as of July 2, 2022 expire in fiscal years 2023 through 2042, with some losses having unlimited carryforward periods. The foreign net operating loss carryforward periods vary by jurisdiction, from 17 years to unlimited.

The company assesses the recoverability of its deferred tax assets each period by considering whether it is more likely than not that all or a portion of the deferred tax assets will not be realized. The company considers all available evidence (both positive and negative) in determining whether a valuation allowance is required. As a result of the company's analysis, it was concluded that, as of July 2, 2022, a valuation allowance of $232.5 million should be established against the portion of the deferred tax asset attributable to certain foreign and U.S. state losses. The company will continue to monitor facts and circumstances in the reassessment of the likelihood that net operating loss carryforwards will be realized.

Uncertain Tax Positions

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits, excluding interest and penalties, is as follows:

(In thousands)	2022	2021
Unrecognized tax benefits at beginning of year	$ 20,400	$ 23,135
Additions (reductions) for tax positions related to prior years	12,000	(2,735)
UNRECOGNIZED TAX BENEFITS AT END OF YEAR	**$ 32,400**	**$ 20,400**

As of July 2, 2022, the gross amount of liability for accrued interest and penalties related to unrecognized tax benefits was $6.2 million. As of July 3, 2021, the gross amount of liability for accrued interest and penalties related to unrecognized tax benefits was $3.0 million. The expense recorded for interest and penalties related to unrecognized tax benefits was not material in any year presented. It is reasonably possible that the amount of the unrecognized tax benefit with respect to certain of the company's unrecognized tax positions will increase or decrease in the next twelve months. At this time, an estimate of the range of the reasonably possible change cannot be made.

If Sysco were to recognize all unrecognized tax benefits recorded as of July 2, 2022, approximately $32.3 million of the $32.4 million reserve would reduce the effective tax rate. If Sysco were to recognize all unrecognized tax benefits recorded as of July 3, 2021, approximately $20.3 million of the $20.4 million reserve would reduce the effective tax rate. It is reasonably possible that the amount of the unrecognized tax benefits with respect to certain of the company's unrecognized tax positions will increase or decrease in the next twelve months either because Sysco's positions are sustained on audit or because the company agrees to their disallowance. Items that may cause changes to unrecognized tax benefits primarily include the consideration of various filing requirements in various jurisdictions and the allocation of income and expense between tax jurisdictions. In addition, the amount of unrecognized tax benefits recognized within the next twelve months may decrease due to the expiration of the statute of limitations for certain years in various jurisdictions; however, it is possible that a jurisdiction may open an audit on one of these years prior to the statute of limitations expiring. Sysco anticipates an immaterial decrease to the reserve within twelve months as a result of lapse of statutes.

Sysco's federal tax returns for 2018 and subsequent tax years have statutes of limitations that remain open for audit. As of July 2, 2022, Sysco's tax returns in the majority of the state and local and material foreign jurisdictions are no longer subject to audit for the years before 2015.

Other

Sysco intends to indefinitely reinvest income of its foreign operations, and, as a result, no material accruals have been made with respect to the tax effects of unremitted earnings, including impacts of outside basis differences and withholding taxes. As a result of the U.S. Tax Cuts and Jobs Act, unremitted earnings prior to the effective date of the act have been subject to U.S. income tax. Any residual tax effects, including foreign withholding taxes, are immaterial to the financial statements.

The determination of the company's provision for income taxes requires judgment, the use of estimates and the interpretation and application of complex tax laws. The company's provision for income taxes reflects income earned and taxed in the various U.S. federal and state, as well as foreign jurisdictions. Tax law changes, increases or decreases in permanent book versus tax basis differences, accruals or adjustments of accruals for unrecognized tax benefits or valuation allowances, and the company's change in the mix of earnings from these taxing jurisdictions all affect the overall effective tax rate.

20. Commitments And Contingencies

Legal Proceedings

Sysco is engaged in various legal proceedings that have arisen but have not been fully adjudicated. The likelihood of loss for these legal proceedings, based on definitions within contingency accounting literature, ranges from remote to reasonably possible to probable. When probable and reasonably estimable, the losses have been accrued. Although the final results of legal proceedings cannot be predicted with certainty, based on estimates of the range of potential losses associated with these matters, management does not believe the ultimate resolution of these proceedings, either individually or in the aggregate, will have a material adverse effect upon the consolidated financial position or results of operations of the company.

The company is pursuing claims against a variety of vendors from which the company purchased products. These matters are at different stages of the litigation process. Amounts, if any, realized from the defendants would represent gain contingencies. We account for gain contingencies in accordance with the provisions of ASC 450, Contingencies, and therefore, we do not recognize income until realized.

To mitigate the risk of incurring significant legal fees on these claims without any ultimate gain, in calendar 2019 and 2020, the company entered into agreements with a third party whereby the company secured a minimum amount of cash proceeds from the third party in exchange for assigning to the third party the rights to a portion of the future litigation proceeds. In the meantime, the company must continue to pursue the specific vendor litigation, as identified in the agreements with the third party.

As part of these arrangements, cash proceeds received from the third party are included in "Other long-term liabilities." The portion of litigation proceeds in excess of the minimum that may be payable to the third party under each agreement represents a financial instrument that is measured at fair value each reporting period in accordance with the

provisions of ASC 820, Fair Value Measurements, with changes recorded in the consolidated results of operations.

Other Commitments

Sysco has committed to aggregate product purchases for resale in order to benefit from a centralized approach to purchasing. A majority of these agreements expire within one year; however, certain agreements have terms through fiscal 2027. These agreements commit the company to a minimum volume at various pricing terms, including fixed pricing, variable pricing or a combination thereof. Minimum amounts committed to as of July 2, 2022 totaled approximately $8.0 billion. Minimum amounts committed to by year are as follows:

(In thousands)	Amount
2023	$ 4,758,952
2024	2,222,345
2025	456,433
2026	373,722
2027	230,151

Sysco has contracts with various third-party service providers to receive information technology services. The services have been committed for periods up to fiscal 2027 and may be extended. As of July 2, 2022, the total remaining cost of the services over that period is expected to be approximately $346.5 million. A portion of this committed amount may be reduced by Sysco utilizing less than estimated resources and can be increased by Sysco utilizing more than estimated resources. Certain agreements allow adjustments for inflation. Sysco may also cancel a portion or all of the services provided subject to termination fees that decrease over time. If Sysco were to terminate all of the services in fiscal 2023, the estimated termination fees incurred in fiscal 2023 would be approximately $22.0 million.

None.

ITEM 9A. CONTROLS AND PROCEDURES

Sysco's management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of July 2, 2022. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding the required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Sysco's disclosure controls and procedures have been designed to provide reasonable assurance of achieving their objectives. Based on the evaluation of our disclosure controls and procedures as of July 2, 2022, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, Sysco's disclosure controls and procedures were effective at the reasonable assurance level.

Management's report on internal control over financial reporting is included in Item 8. Financial Statements and Supplementary Data of this Annual Report on Form 10-K.

RECONCILIATION OF GAAP MEASURES TO NON-GAAP MEASURES

We calculate the net debt to adjusted EBITDA leverage ratio as (i) total debt, computed as the sum of notes payable, current maturities of long-term debt and long-term debt, less (ii) cash and cash equivalents, and divided by (iii) adjusted EBITDA over the trailing twelve months, computed as EBITDA plus the impact of Certain Items, excluding Certain Items related to interest expense, income taxes, depreciation and amortization. Sysco considers the net debt to adjusted EBITDA leverage ratio to be a measure that provides useful information to management and investors in evaluating the company's ability to pay off debt and supports the company's credit rating. An analysis of any non-GAAP financial measure should be used in conjunction with results presented in accordance with GAAP.

Tab 4 – Scope of Service and Project Approach

a) **Understanding of the Nature of Scope of Services to be Provided**
Purchase Smaart GPS (PS), as noted in our Executive Summary, understands that the PBG is requesting K12 purchasing services through a qualified GPS/GPO, and distribution services via the awarded respondent's contracted distribution partner. Purchase Smaart, as your incumbent GPS, intends to provide those services in conjunction with Sysco, our chosen distribution partner. Throughout the term of the agreement, Purchase Smaart will provide the services in accordance with the requirements of the RFP. We are confident that despite some significant challenges faced upon implementation of our original emergent agreement, you will find those challenges are addressed in our response and that practical resolutions have been devised and will be employed, should we be awarded your business. Details of our approach for each specific operational area are included in the following sections.

In the hope that PS will be retained as your awarded provider for distribution and purchasing services, and understanding that time is of the essence, we have been working closely with Sysco to modify and extended our current agreement which will exceed your requirement for the awarded responder to hold a valid contract for a minimum of two (2) years of the initial awarded contract duration. Sysco will use 5 of its state of the art, Florida based Operating Sites to provide both storage and weekly delivery services to PBG members. (Details of these facilities and their capabilities are stated in subsequent sections.)

b) **Outline of Roles and Responsibilities**
Purchase Smaart GPS Assigned Personnel
Purchase Smaart GPS personnel have a combined total of over 130 years of experience in the foodservice industry. Of that total, over half of those years have been spent working directly within the K12 segment. PS has put together an outstanding team of professionals whose goal is to provide our PBG customers with the quality products and the outstanding services necessary for you to provide the nutritious meals our children need to help them be successful in school. Our Team's experience covers many areas, including distribution, contracting, product marketing, customer relations, and bid management. PS believes we have adequate staff to successfully manage this contract, if awarded to us. The Team, their job titles, and their experience are listed below:

Scott Rivera – Owner/President

Scott is charged with the overall administration of Purchase Smaart GPS operations. As such, he will be responsible for the efficient management of all requirements within the RFP. He will provide high-level liaison with PBG leadership as necessary, and work closely with Sysco's K12 management team to ensure channels of communication are open, and that any concerns are addressed and resolved quickly.

- Scott is a seasoned professional with nearly 30 years of experience with national broadline foodservice distribution and GPOs.
- Joining the industry in the national sales area, first with Sysco and then US Foods, Scott quickly grew in knowledge and responsibility. He easily grasped the nuances of national sales management and worked his way up through the ranks, ultimately becoming an Area VP of National Sales.
- Throughout his distribution tenure, Scott worked closely with GPOs. He acquired an extensive understanding of their operations while establishing and developing mutually beneficial, career spanning relationships. These qualities were quickly recognized by leadership and Scott was chosen to direct the national management of Navigator GPO, the industry's largest Long Term Care GPO.
- Looking for new challenges and already attracted by the GPO segment, Scott was hired by his former customer, Navigator, as Senior VP for Sales/Distribution Relations for their Manufacturer Vendor Incentive Program (MVIP) Rebates. He served in this capacity for 5+ years.
- While at Navigator, Scott recognized opportunities to improve and expand the MVIP for all stakeholders. He began to develop and refine the Purchase Smaart GPS model.
- In 2019, as President of Purchase Smaart, Scott negotiated a working agreement with Navigator to allow PS to operate their Manufacturer Vendor Incentive Program (MVIP) in the Non-Healthcare segment (PS/Navigator).
- In 2021, Scott oversaw the expansion of PS into the K-12 segment and currently provides procurement services to 29 Florida school districts.

Scott Euton – Manager, Business Development K12

Scott Euton oversees the day-to-day operations of Purchase Smaart's K12 segment. He is the primary contact for contracts, pricing, forecast management, and audits. He is the key Purchase Smaart contact for Sysco's Account Manager's and, as necessary, PBG members' Food and Nutrition staff. Other responsibilities will include the supervision of our enhanced processes for the management of the PBG's USDA donated funds. Item identification, commodity bank tracking, and routine auditing will be directed by Scott. General usage reporting is also among Scott's expanded responsibilities, and he will be implementing several new tools to assist the PBG in managing their operations.

- Scott Euton was asked to join Purchase Smaart in April 2022 to provide expertise, experience, and direction to the K12 segment.
- Scott brings 14+ years of K12 foodservice knowledge to Purchase Smaart's team.
- Just before joining PS, Scott served as a School Bid Sales Manager for US Foods for nearly 7 years.
- In that position, he was accountable for 32 school districts with annual sales totaling more than $130 million.
- Extremely adept at creating winning proposals, he led his team to a remarkable 99% success rate for bids submitted in the K12 segment.
- Scott identified shortfalls in K12 inventory management and developed a corporately recognized "best practice" forecasting/inventory control process for all K12 customers.
- Scott fully understands the business from a manufacturer's perspective as well. He worked as a K12 specialist for a nationwide foodservice broker for 6+ years. During that time, he represented many nationally recognized manufacturers and provided liaison to several broadline distributors on their behalf.

Robbi Ross – K-12 Coordinator

Robbi will be assisting Scott in the management of vendor contracts. Ensuring that PBG invoices accurately reflect contracted pricing, managing the semi-annual product pricing solicitations, and assisting Scott Euton with the management of PBG member districts.

- Robbi launched her foodservice career in August of 1994 when she accepted a position with the Affinity Group as a broker sales associate covering the state of Georgia. Her initial responsibilities were to develop and maintain operator sales for assigned major manufacturers.
- To drive those sales, she established strong relationships with her end users, and built equally strong partnerships with her customers' distributors. Her realization and understanding of the necessary balance between the needs and desires of each group, while still achieving her manufacturers' targets resulted in success and satisfaction to all.
- Her skill and achievements brought continued professional growth and she was promoted to Account Executive. In this capacity, she managed sales, reporting requirements, and conducted business reviews for her assigned principles.
- Robbi's talents and capabilities soon brought additional responsibilities in the segment of non-commercial sales. This market included colleges, universities, and K12.
- Her successful efforts in the non-commercial segment led to greater opportunities in K12 exclusively. In this area, she assumed accountability for the presentation of her manufacturer's products, drove menu placements, and once again developed strong relationships with both school district Directors and Team Members alike.
- Through her K12 experience, she discovered an affinity for bid management and joined the Bid Management Team where she was quickly promoted to Team Manager. In this

role, Robbi managed multiple clients across 9 states where she was accountable for both commercial and commodity bids, sales, and reporting requirements.

- In November of 2022, Robbi joined Purchase Smaart as the K-12 Coordinator and quickly made her mark, streamlining and improving our school support operations.

Austin Rivera – Director of Sales

Austin, although his title may lead one to believe he is primarily responsible for acquiring and maintaining our customer base (which he is), he has his hands in all aspects of Purchase Smaart, including K12. He is rapidly increasing his knowledge of this unique segment and is providing valuable behind-the-scenes input aimed at improving customer satisfaction. In addition, Austin manages the rebate portion of PS and is responsible for the timely and accurate delivery of earned rebates to all our customers.

- Much like his father, Austin brings extensive foodservice knowledge and experience to Purchase Smaart - 20+ years, in fact.
- His career began in restaurants where he worked in all areas of their operations, both in the front and in the back of the house.
- His leadership team quickly recognized his potential and placed him on a path to management.
- Austin's talents rapidly developed and were soon noticed by Nature's Table, a pioneer in fresh, healthy conscious dining.
- Nature's Table Franchise arm identified Austin as someone who would help lead them forward and asked him to be their Director of Operations. In that capacity, he successfully managed their 62 nationwide locations. Additionally, he was responsible for the effective opening of all new restaurants, the oversight of franchise compliance, and the administration of all vendor relationships.
- Austin also thoroughly understands and appreciates our manufacturer partners' businesses and their goals. As an Account Executive for a major regional food broker, he represented numerous manufacturers and oversaw distributor relationships. His talents, and his awareness of the subtleties of the business, allowed him to successfully balance the needs and desires of all parties.
- His knowledge and experience have been essential to the successful establishment of the many partnerships that benefit our members, our manufacturers, and Purchase Smaart.
- Austin's position as Director of Sales for Purchase Smaart has allowed him to use his abilities to effectively cultivate and manage all customer and distributor relationships for Purchase Smaart within the hospitality segment.

Despite the best efforts of all stakeholders in the supply chain, at some point, an out-of-stock situation will arise. For example, the product forecast was correctly designed in a collaborative effort between the District and Sysco. Based on that forecast, the product was ordered in sufficient quantities to meet the demands identified. The order was also placed in plenty of time to allow for its production and shipping to our facility. Despite these steps being taken correctly and in a timely manner, something may still happen to prevent enough product being available to satisfy your demand. Contributing factors could be a vendor shortage, or possibly a Member District experiencing an unexpected increase in participation or in the acceptance rate on the item. Regardless of the reason, to maintain your original menus as closely as possible, an acceptable substitute needs to be identified and shipped. Together with the Member District, we work through these issues using the following process:

- Your designated Sysco Operating Site receives your order within prescribed timeframes.
- 48 hours prior to the PBG's required shipping date, the orders are reviewed, and potential item shortages are identified.
- The "at risk" items are reviewed against any inbound purchase orders to determine if stock will be available prior to your required shipping date. If that is the case, the item is placed on the Out-of-Stock Report with the expected due date of the PO to inform the Member.
- Should adequate inventory not be available in time to meet the required delivery date, the item will be entered into the Out-of-Stock Report and a suitable substitute, if available, will also be entered to allow the review and approval of the ordering Member. This process will continue until all "at-risk" items have been addressed on the file and available options are addressed.
- Once the Report is completed by the Sysco AM, it will be sent to the appropriate person at the Member district and the subs either accepted or rejected by returning the Report via email to the AM. An example of the Out-of-Stock Report is included at the end of this section (**Attachment 4c-24**).
- Finally, for out-of-stock items and substitute situations, on the delivery invoice those items that are out of stock will have an annotation directly under the item reading "OUT STOCK". For those items where a substitute has been offered and accepted, the annotation will read "SUBSTITUTE", and appear directly under the out-of-stock item. A sample of an invoice with those annotations is included at the end of this section (**Attachment 4c-25**).

Inventory Management; continued
The final, and perhaps the most important part of Inventory Management revolves around the systems and procedures in place to ensure the integrity and safety of our food products.

Food Safety
Sysco takes food safety very seriously. For all the products we distribute, we practice safe handling, storage, and transportation. The implementation of Sysco's food safety policies and procedures is monitored both at the corporate level, and through Safety Directors assigned to each Operating Sites. Our food safety programs are consistent with the FDA requirements established in the Code of Federal Regulations (CFR) Title 21, Sections 110 and 123.

Sysco fully understands the critical importance of protecting the health and safety of our customers through the proper management of food safety. To that end, one of the ways that Sysco employs to help ensure they are doing everything they can to protect their products, is by taking the initiative to partner with Merieux NutriSciences to perform annual food safety inspections/audits. Merieux NutriSciences inspects our facilities to globally accepted standards established by British Retail Consortium Global Standard (BRCGS). BRCGS is a leader in setting food safety standards and developed the very first standards benchmarked by the Global Food Safety Initiative (GFSI). They are recognized the world over for their rigorous food safety certification programs. These audits and certifications help preserve the integrity of the food supply chain within each Sysco Operating Site. Copies of the most recent audits for each Operating Site are included in Tab 3c with our State Licenses, Business Tax Receipts, and Certifications.

To retain the high standards that Merieux NutriSciences inspects to during their audits, Sysco maintains a comprehensive system of programs and policies to ensure that the integrity of their products is protected at every key point in the food custody chain. Due to the proprietary nature of the Sysco Assurance Program, documents and records are available for review onsite only at Sysco Operating Sites. Documents and Records are not available for distribution. A detailed overview of the Sysco's Food Safety and Quality Programs is included under (**Attachment 4c-26**), following this section. Some of finer points of the program, however, are listed below:

Sysco Food Safety System Overview

Process Flow of Distribution Supply Chain

Receiving -> Put Away -> Storage -> Loading-> Delivery-> Returns

Hazard Analysis and Food Safety Preventive Controls Plan

Sysco Operating Sites have documented Hazard Analysis. The hazards include Biological, Chemical, (includes Allergens and Radiological), Physical Hazards and acts of Intentional Adulteration that may be of a food safety risk to various product groupings.

A comprehensive risk-based Food Safety Preventive Controls Plan, based on Hazard Analysis Critical Control Point (HACCP) principles, has been developed for product groupings where the likelihood and severity of each hazard is significant. The Food Safety Preventive Controls Plan is reviewed by the Global Support Center and Local Food Safety Teams annually, or as needed.

There are two Critical Control Points: RECEIVING and STORAGE.

Prerequisite Programs

Sysco Operating Sites have Prerequisite Programs in place that include Preventive Maintenance, Cross Contamination, Cross Contract (allergen), Non-Conforming Product, Pest Control, Sanitation, Temperature Control and Monitoring, Good Manufacturing Practices, Training, Recalls, and Customer complaints.

Preventive Maintenance

A Preventive Maintenance Program is in place at each Operating Site. The Preventive Maintenance Program covers the maintenance and repair of the facility, equipment, and transportation vehicles and trailers.

Cross Contamination Control

Sysco Operating Sites have written Cross Contamination requirements and procedures in place. These requirements and procedures define the control steps associates must follow to minimize the risk of cross contamination from Biological, Chemical, (non-allergenic), and Physical contaminants to food products.

Cross Contact (Allergen) Control

Sysco Operating Sites have written Cross Contact (Allergen) requirements and procedures in place. These requirements and procedures define control steps associates must follow to minimize the risk of allergen contamination to food products.

Non-Conforming Product

Sysco Operating Sites have requirements and procedures in place to address the handling of non-conforming, damaged, wasted, and returned products.

Pest Control

Sysco Operating Sites have a Pest Control Program in place. The Program defines the requirements for Integrated Pest Management (IPM) strategies to prevent contamination by insect/rodent infestation and/or harborage at the Operating Sites.

Third Party Licensed Pest Control Operators are contracted at each facility as part of the IPM program. Only approved pesticides for food facilities are utilized in designated areas.

Sanitation Controls

Sysco Operating Sites have written Sanitation Standard Operating Procedures and requirements in place for Facility and Vehicle Sanitation.

These written Sanitation Standard Operating Procedures and requirements define the ongoing responsibilities of Sysco's associates to ensure the Operating Sites are clean, sanitary, and in good repair.

Temperature Control and Monitoring

Sysco's Food Safety System includes an Integrated Cold chain Monitoring System that evaluates ambient air and/or direct product temperatures during Inbound Receiving, Storage, and Outbound Delivery activities. From receipt to storage to delivery, temperatures are monitored to ensure Food Safety.

The HACCP Plans define specific monitoring requirements that must be followed and documented during Receiving. Sysco Branded refrigerated raw ground beef, raw chicken, fresh seafood, and fresh produce are required to have a Time Temperature Recorder (TTR) with each inbound shipment. Radio Frequency (RF) enabled TTRs are used to automate the temperature data downloads and generate email notifications to better ensure this important information is gathered and reviewed by Operating Sites associates.

Refrigerated HACCP storage areas and loading docks are continuously monitored 24 hours a day/7 days a week. Automated email and cellular notifications occur when storage area air temperatures deviate from Warning and Critical alert limits. Storage temperature data is reviewed daily by a trained associate and verified weekly by a HACCP certified associate. Trailers for delivery are pre-cooled prior to loading and temperatures are continuously monitored by the driver throughout the delivery process. A selected number of delivery routes are monitored with RF TTRs daily to evaluate temperature control during the delivery process.

Good Manufacturing Practices

Written Good Manufacturing Practices (GMP) requirements are implemented at each Operating Site. These written GMP requirements address associate cleanliness/hygiene, hand washing, food and beverage consumption, tobacco usage, cuts, illness reporting, and proper food handling.

Training

All Operating Site personnel, including temporary personnel and contractors, are properly trained in all Food Safety procedures and requirements prior to beginning work.

Product Recall Program

Sysco Operating Sites have a Product Recall Program in place to ensure recalled products are removed from the marketplace in a timely manner. The Program defines the required activities for inventory management, customer communication, product recovery, and cost recovery.

The Recall/Traceability system's effectiveness is tested routinely through regular Recalls and Mock Recalls.

Customer Complaints

Sysco Operating Sites have procedures in place to address customer complaints that are Food Safety related.

Security Vulnerability Assessment and Food Defense

Sysco Operating Sites are registered as required by the Public Health Security and Bioterrorism Preparedness Act of 2002. Sysco Operating Sites have obtained their registration numbers as required by the U.S. Food and Drug Administration (FDA) as part of the Food Safety Modernization Act (FSMA).

A Vulnerability Assessment is performed annually using the Food Defense Plan Builder on the FDA website at FDA Food Defense Plan Builder. Each Operating Site has a site-specific Food Defense Plan which includes mitigation strategies for intentional adulteration. It is developed in conjunction with the applicable Regulatory requirements.

The following are some examples of security measures that Sysco utilizes. The security measures may vary from site to site.

- Alarm system
- Associate Background Checks
- Associate Access Badges
- Guard Building
- Secured Lots
- Gated Entrances
- Visitor Program
- Trailer Locks & Seals

Food Safety Modernization Act

Sysco Operating Sites have a Food Safety System in place that complies with all the rules defined in the Food Safety Modernization Act (FSMA). Each Operating Site has a Preventive Control Qualified Individual (PCQI) responsible for direct oversight of the Food Safety System.

A reanalysis of the Food Safety System is performed annually or more frequently as needed.

Documents and Records

Under subpart G of Title 21 of the Code of Federal Regulation, Part 117 – Current Good Manufacturing Practice, Hazard Analysis and Risk-based Preventive Controls for Human Food, food distributors are neither receiving facilities that are required to establish a supply-chain program, nor suppliers because such entities are not manufacturers/processors.

These products may be eligible for credit after confirming with the Sysco Operating Company, but are not allowed back into inventory if picked up after delivery

Chemicals

- Please treat chemical returns with extra attention. Federal HZMAT and OSHA regulations prohibit the transport of open-container chemicals, or chemical products not in the original packaging. Open/damaged chemical products or not in original packaging are non-returnable.
- A Sysco representative must inspect all chemical returns for damage and/or leakage before a pick up and return order can be processed.

Will Call

- Product picked up at Will Call can only be refused/returned at time of pick up. These items are not returnable once they have been signed for and are out of Sysco's control.

Special Order (Non-Stock) Items

- Special order items are products that we do not stock that were ordered especially for you. Because they can't be resold, they are not returnable except when damaged or of inferior quality at the time of delivery.

Drop Shipments

- Drop shipments are sent directly to you from our suppliers. Contact your Sysco representative about any unacceptable items within 48 hours of delivery.

Standing Order

- Is a pre-arranged process and agreement to always ship a defined product and quantity on every order, repetitive.

Auto-Ship

- Is a pre-arranged process and one-time agreement (customer) to ship a defined product and quantity on a defined ship date.

Restocking

- Any exceptions to these return guidelines may result in denial of credit or may be subject to a 20% restocking fee.

Recalls

Hand in hand with food safety and the prevention of issues with our food supply chain goes recalls. Unfortunately, even though we take every precaution available in the sourcing, manufacturing, shipping, and storing of our food products, the potential exists for something to go wrong. That something can be as minor as a packaging flaw with no impact on the integrity of the product, to a health hazard that demands immediate action. Sysco is fully aware of the criticality of the recall notification process and has partnered with BellTower Technologies to implement an automated notification system to alert customers of recalls and withdrawals. A summary of Sysco's recall process is below, with a detailed presentation included in **Attachment 4c-27** at the end of this section.

Communication:

- Instant Recall confirms notification of thousands of customers very quickly, escalating from e-mail, text messaging, fax, web portals, and automated phone calls to human follow-up phone calls, Certified Mail (US) or First-Class Mail (Canada) and initiates customer contact remediation activities.
- Instant Recall maintains documentation of customer contact, collects affected inventory counts from customers, and provides reports.
- Instant Recall tracks and records completion timings for key activities as well as the individual who enters the information.
- Instant Recall is leveraged for additional benefits such as facilitation of Reportable Food Registry (RFR) Reports, billing for Sites and customer credits.

Recall Process:

- Supplier contacts Sites and Sysco QA Regulatory and Technical Services (RTS)
- Sysco QA RTS supports recall action with e-mail notification from Sysco to Site
- Sites upload customer reports into Instant Recall
- Multi-Unit Account Corporate Contacts enrolled in HQ alerts are notified immediately via e-mail and text messaging, including a link to real-time view of their specific affected locations notification status.
- Instant Recall sends e-mail/fax and calls to affected customer locations. Customers may use a mobile-friendly MyInstantRecall web portal, or a toll-free hotline to confirm notification and report affected inventory for credit.
- For customers who do not confirm recall notification, Instant Recall conducts human follow-up calls.
- If a customer is unable to be contacted via automated or human follow-up calls, Sysco's Centralized Customer Care team will attempt further customer contact using alternate phone numbers and email addresses.
- Activities to correct customer contact information are completed if necessary.

- Certified Mail (US) or First-Class Mail (Canada) letters are used to notify affected customer locations not confirmed as notified via the other communication methods.
- Toll-free hotline and web portal are open for one week to allow customers to report affected inventory.
- QA RTS submits RFR reports on behalf of the Site.

Site responsibilities:

- Hold affected product from sale and distribution.
- Execute recall per recalling firm's instructions:
  - Contact customers, retrieve products, destroy/return products.
  - Document all communication with customers and regulatory agencies.
  - Document all product disposition (destruction/returns)
  - Account for costs related to recall incident.

d) **Other Information Pertinent to Purchase Smaart GPS and Sysco's Abilities to Perform the Services.**

Purchase Smaart has worked closely with our distribution partner, Sysco, to improve our abilities to assist PBG members in the management of their USDA commodity programs. Some of the steps we will implement are listed below:

- As mentioned under our Price Solicitation process, once PS has been notified by a PBG member of the items they wish to make eligible for NOI/FFS drawdowns, these items are entered into a "Commodity Item Addition Template" form. This form provides specific item information to Sysco whose Sysco Business Systems (SBS) team in turn enters it into their system. Completing this process in a timely manner helps to ensure the accurate identification of NOI/FFS products and facilitates the subsequent tracking of the bank balances. Once entered, at the beginning of the School Year (SY) and until the bank is exhausted or the SY ends, commodity drawdown information for eligible items invoiced to PBG district schools is automatically captured and transmitted to the appropriate commodity website daily for tracking. While this portion of the USDA program is not new, the awareness of its importance and the need for the accuracy of designated products has been heightened. Accurate identification of designated NOI/FFS items and their subsequent entry into Sysco's USDA tracking system will ensure a smooth start to your SY. Experience has placed both PS and Sysco in a much better position to manage this area. For your reference, a copy of the "Commodity Item Addition Template" form is included at the end of this section (**Attachment 4c-17**).
- PS has acquired more extensive access to the information contained in the commodity tracking websites. Previously, our ability to monitor drawdowns against commodity banks was limited and we were unable to audit their balances against invoices. Direct discussions with both sites have given PS the necessary access and consequently the

ability to perform the monthly audits of the commodity banks that will ensure postings are accurate, and accountability is maintained. An example of that audit file is included in **Attachment 4c-28** at the end of this section.

- Monthly audits will be shared with PBG members to allow them to reconcile their own internal files with those of PS/Sysco, and the tracking websites.
- Another tool available to the PBG will be a Commodity Balance/Utilization Report. This report provides added visibility of your USDA balances monthly and will indicate YTD totals as the SY unfolds. Each PBG district's assigned commodity balances will be listed by Material Numbers and show any carryover from the previous SY, allocations for the current SY, transfers that may have occurred (+/-), and the resulting available balances. In addition, the total of your YTD usage for each Material Number and the percentage of your balance used is displayed. This report, especially as balances are drawn down, gives the PBG considerable advance notice of the timing of the loss of NOI/FFS discounts allowing members to make any necessary adjustments to their menu design and product selections. An example of this report is included at the end of this Tab (**Attachment 4c-29**).

INSTRUCTIONS FOR COMPLETING
SYSCO OPERATOR NEGOTIATED SUPPLIER AGREEMENTS

GUIDANCE TAB

General information on program processes, do's and dont's for SYSCO to successfully implement. Please note: NO BRACKET PRICING; NO tie-ins to distributor purchasing patterns

TERMS TAB

Provides details on who, what, how long, and where to file billback claims

ITEMS TAB

One SUPC PER LINE. The script to load the pricing will not read multiple SUPCs within a single cell.
Pricing can be applied only on items for which an SUPC provided.
Each qualifying item must be listed BY SUPC -- Cannot say "All 6/5# Widgets $15.00"
Price/allowance must be given per CASE unless the product is catch weight.
- Catch Wt is "N" unless the *item weight varies by case* (example: 2/8-10# avg would be "Y"; 2/5# would be "N").

Do not put "/lb" or "/cs" in the pricing cells under "Contract $"; this interferes with the scripting program. The pricing unit is defined by the Catch Wt column.
For ZONE pricing OR for variable pricing from multiple ship points, insert additional columns for pricing so that all pricing for an item is on the same row.
If ZONE pricing is offered, a map or other clear Zone Definition must be provided.
Pricing offered must be based on the date Sysco sells the case to the account location.
Time frames when the Distributor must "buy-in" product inventory are not allowed.
MINIMUM ORDER QUANTITIES NOT ALLOWED. Pricing offered to the customer cannot be predicated on OpCo buying patterns.
The item lists may need to be re-sorted for a variety of reasons. Consequently, **customer pricing should be always e entered on this form as a fixed value and not a formula.**
Don't forget to include SYSCO Brand equivalents where applicable! Preferably both SYSCO Brand and supplier brands should be listed.
Change Codes fields should be completed only when revisions or renewals are made to an existing contract to identify the changes. They do not need to be completed on intial paperwork.

ELIGIBLE LOCATIONS LIST TAB

In the event that the supplier maintains a list of customer locations eligible for a program which may or may not match Sysco's list of customers attached to the account, or in the event that program eligibility is limited to specific sub-groups of customers within an account, the Eligible Locations List tab must be completed by either the customer or the supplier. **If this tab is not completed, it is understood by all parties that all account locations as defined by Sysco will be eligible for the program.**

OTHER NOTES

Correct SUPCs are critical. Programs are entered using a scripting process which reads the SUPC number and the price column only. If an SUPC is missing or incorrect, the customer's pricing on that item will also be missing or incorrect. **It will be the responsibility of the supplier to resolve directly with the customer any subsequent audit issues or requests for credits.**

Operator Negotiated Supplier Agreements

Details and Parameters
The supplier's verification and authorization of details noted on the attached form, signed by both customer and supplier, will allow SYSCO to qualify and promptly implement negotiated programs between operator and supplier. "Signing" will be authenticated by email sender ID whenever contracts are submited via email.

Operator should copy both SYSCO and the Supplier at the time of contract acceptance and submission via email. Supplier will be responsible to respond to the Operator and SYSCO in the event the final submitted contract has any pricing provision denoted in error.

Terms of Agreement
Effective terms of the agreement should be detailed on the Tab labeled "Terms".

Content of Agreement
Contract pricing details, including SKU's, rebate basis, and amounts should be detailed on the Tab labeled "Items". Suppliers are required to provide the SYSCO SUPC(s) assigned to their products. Additionally, a single deviated cost to the Operator will be accepted, not a variable cost based on Supplier's brackets. Deviation amount should be extended to a case value unless the item is variable catch weight. If the Supplier's pricing is zoned to regional areas, separate contracts should be issued for each zone. Zoned contracts will be implemented based on SYSCO distribution center located within the zone and not based on Operator locations within the zone. Zone definitions or maps must be provided along with this agreement document.

Distributor Performance Exemption
Supplier deviated pricing to an Operator should not be tied to Distributor Performance. Time frames when the Distributor must "buy-in" product inventory are not allowable. SYSCO will be exempt from minimum quantity requirements tied to Operator deviated pricing. Some distribution locations may serve as few as "1" operator location. The distributor maintains sole discretion regarding inventory level (daily sales on hand).

Submission Procedure
For all CMU type customer/supplier agreements, please submit the spreadsheet "contract" to our SBS Pricing & Agreements shared mailbox, DPMSupplierContracts@corp.sysco.com, by the 20th of the month prior to the 1st of the following month. Any customer/supplier "contracts" received after the 20th will be implemented with an effective date of 10 calendar days after the receipt date. For example, this means that any agreements that would need to be effective on May 1, 2021 need to be submitted to the SBS Pricing & Agreements team by April 20, 2021. Once reviewed and approved for implementation by a customer pricing specialist, the agreement information will be entered into the pricing system and made available to SYSCO's servicing operating companies.

For all other customer types, the same procedure applies except these "contracts" should be sent to each servicing Opco.

Late Submission Procedure and Expectation
The supplier will have sole responsibility to the customer for any discounts due to late submission. SYSCO operating companies will not perform retro processing for agreements received late.

Pricing Error Resolution
If SYSCO is required to credit customer units for pricing errors occurring at no fault of SYSCO, the Supplier will incur a charge of **$25.00** per credit memo issued to the Operator's unit locations. Billing of the service charge will be implemented by the individual SYSCO operating company.

THE SYSCO FOOD SAFETY PLEDGE

Sysco is the global leader in selling, marketing and distributing food products to restaurants, healthcare and educational facilities, lodging establishments and other customers who prepare meals away from home.

Sysco's purpose is to connect the world to share food and care for one another. One of the fundamentals to achieving our purpose is our complete commitment to provide safe, quality-assured products to our customers.

FOOD SAFETY IS EVERYONE'S PRIORITY

Our commitment to continuously improving our food- safety and quality-assurance practices can be traced back to the founding of Sysco Corporation. Since 1970, we have continued to build upon our founders' beliefs in first-rate quality and food-safety programs, as well as the safety of our people on the job. Today, our commitment has never been stronger.

Our Sysco Quality Assurance team is responsible for assuring we meet today's food safety and quality challenges in the foodservice distribution industry. We accomplish this through the diligent efforts of our full-time Quality Assurance team members and supportive quality experts located throughout the world.

We are actively involved in leading quality, food safety, regulatory and environmental initiatives. Sysco supports food safety and sustainability research, while team members serve on numerous advisory committees and participate in various food safety, regulatory, quality and environmental initiatives. We are committed to the belief that shared knowledge leads to continuous improvement in these areas and ultimately benefits all stakeholders in the foodservice industry, including consumers, our valued customers, and our supply chain.

DISTRIBUTION FOOD SAFETY

THE SYSCO APPROACH

Sysco's approach to food safety aligns with the purpose of our company:

CONNECTING THE WORLD TO SHARE FOOD AND CARE FOR ONE ANOTHER

This approach requires best in class food safety system. Sysco has implemented a comprehensive supply chain food safety system covering transport from the supplier, storage and handling at our sites through delivery to the end-customer.

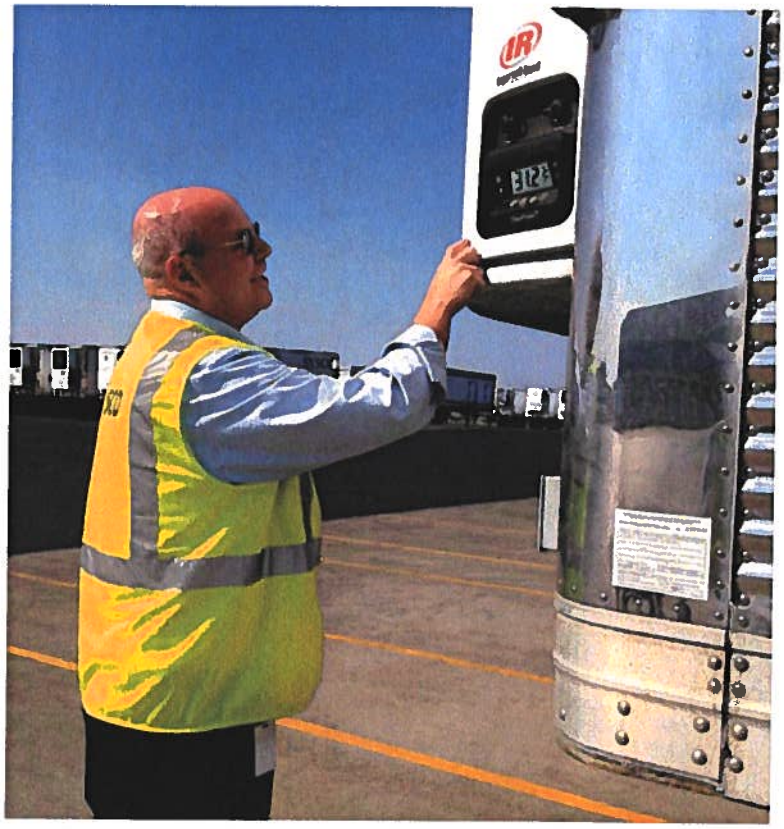
KEY COMPONENTS OF THE FOOD SAFETY SYSTEM:

1. **Comprehensive risk assessments and implementation of preventive controls**
2. **HACCP plans for potentially hazardous foods**
3. **Sourcing Sysco branded products from qualified suppliers who pass an approved third party food safety certification audit**
4. **Minimizing the possibility of cross-contamination during storage and transport**
5. **Establishing time and temperature control limits from the time products leave the supplier to the time they are delivered to the end-customer**
6. **Routine internal audits and third party food safety certification of our Food Safety Plan to assess compliance**

Sysco's Food Safety Plan covers all areas of food handling and transport, and function as the foundation for training programs focused on preventive controls, thereby instilling a food safety with defined accountabilities, to assure the safety of the food distributed by Sysco is maintained.

DISTRIBUTION FOOD SAFETY (DFS)

Food Safety is fundamental in supporting our Purpose of connecting the world to share food and care for one another. Our food safety system complies with applicable regulatory requirements and industry best practices, reflecting the competency of the company to our trading partners, suppliers and customers, to independent food safety certification authorities and regulators.



To ensure compliance with Sysco's food safety system in our Broadline and SYGMA Operating Sites, Food Safety Program Managers (FSPMs) are employed at the local sites. These FSPMs report directly to Sysco Global Support Center Food Safety Field Directors with a dotted lined to the Regional Presidents.

The FSPMs in the sites collaborate with other functions to ensure food safety tasks are trained and performed appropriately (Operations, Merchandising, Transportations, Sales, etc.). The importance of every associate doing their part in properly implementing our food safety system ensures that our customers and their patrons continue to receive safe products.

Sysco Operating Sites are certified per the Global Food Safety Initiative benchmarked criteria and are audited by accredited third party certification bodies. Our food safety system in conjunction with the FSPM oversight reflects Sysco's commitment to our purpose.

SYSCO TEMPERATURE CONTROLS

A key component of our food safety & quality management system is strict cold chain management. This ensures we minimize the potential for harmful pathogen growth in perishables and optimizes quality for our customers. To that end, many categories of foods are transported to our sites with Time Temperature Recorders (TTRS) on board which give insight into the transport conditions from supplier to Sysco.

The information is used to continuously improve supply chain temperatures, as well as ensure that transit temperatures maintain food safety prior to Sysco receiving the product. No refrigerated products are received by Sysco without thorough evaluation. Prior to Sysco receiving products from a supplier and placing them in inventory, the receiver checks the product temperature and evaluates the load to ensure it was handled properly.

The process for product flow from receiving, through storage, and loading onto delivery trucks is engineered to maintain product temperature as close to ideal as possible to maximize food safety and quality. Once on delivery trucks, temperature is maintained by a fleet of multi compartment refrigerated trailers. Drivers monitor temperature throughout the delivery to ensure food safety and product quality are maintained. The food safety system at Sysco is designed to exceed regulatory requirements, as well as our customers' expectations.

At Sysco, we know maintaining a food safe cold supply chain ensures we market great products with exceptional service, which earns our customer's trust.

PROCESSING FOOD SAEFTY & QUALITY

SAFE QUALITY FOODS

Sysco's Produce and Specialty Meat and Seafood processing facilities are dedicated to the highest standards of food safety and quality at their food processing facilities. To meet this commitment, Sysco has chosen the Safe Quality Foods (https://www.sqfi.com/) Global Food Safety Initiative (GFSI https://mygfsi.com) compliant food safety certification process. This process is designed to assess a myriad of different food safety requirements detailed in the comprehensive SQF Code for Food Processing and Animal Product Processing, both of which have over 100 pages of detailed program requirements. Compliance is measured through an extensive two-day audit of each facility by certified third party auditors. Additionally, Sysco's Specialty Meat and Seafood processing facilities go the extra mile and are certified for not only SQF Food Safety compliance but also Food Quality compliance which is above and beyond GFSI requirements.

The SQF requirements include a comprehensive evaluation of food safety risks including a functioning management commitment to food safety, a food safety culture assessment, food safety mitigation controls, including Hazard Analysis and Critical Control Point (HACCP) based food safety plans, Foreign Material Control Procedures, Allergen Control Program, Sanitation Standard Operating Procedures (SSOPs) including Environmental Monitoring, plant Good Manufacturing Practices (GMPs), Supplier Approval Programs, Product Development and Identity programs, Product Traceability and Recall programs, Pest Control program, Food Fraud control program, Food Defense control program, Food Quality program and many other detailed programs required for certification.

These comprehensive SQF required programs are routinely evaluated by the Sysco Food Processing facilities for continual improvement and updating with the latest technology and cutting edge processes. A key requirement of SQF certification is routine updating and trending of program results geared toward continual improvement.

Also a key SQF requirement and comprehensive part of the Sysco Food Processing facilities food safety and quality programs is continual monitoring of key metrics including temperature control, plant cleanliness and sanitation, good employee hygiene, food safety chemical control, product labeling, product identity, pest control and pest activity, food defense including security measure like controlled access and vulnerability assessments and many other programs.

Once these programs are monitored for program compliance, they are required to have the process verified by the Food Safety and Quality Assurance Lead or their trained designee, who visually verifies compliance with program requirements, including a verification signature, date and time on all monitoring documents. Variations from program requirements result in a detailed and documented Corrective Action and Preventative Action form and process that details the root cause of variations and actions taken to correct the deviation. Additionally, SQF requires a detailed validation of program controls. In other words, the SQF process requires detailed procedures for food safety and quality assurance compliance, record keeping to demonstrate compliance with observations of the monitoring to verify the process

is in control and measuring the process to validate it is controlling potential food safety or quality threats. This is all supplemented by trending data for continual improvement, program updates, food safety culture assessments and continual assessment of management commitment to the process.

In addition to the SQF process at Sysco's Food Processing Facilities, the FSQA staff is responsible for interacting with government regulators who are routinely assessing the facilities for compliance to applicable laws and regulations. This includes federal, state, provincial, county and even city authorities. For instance, Sysco's Specialty Meat companies in Canada and the US are not allowed to operate without federal inspectors from the USDA Food Safety Inspection Service or Canadian Food Inspection Agency (CFIA) in the plant on a daily basis. These federal regulators are constantly eyeing the process for regulatory compliance. Additionally, non meat facilities will have regular multi day inspections for regulatory compliance by federal regulators from the US Department of Health and Human Services Food and Drug Administration (FDA) or CFIA. This is supplemented by a variety of other regulators in the form of local health department inspections, weights and measures inspection and other food safety or product labeling regulators.

All of these requirements dictate a comprehensive FSQA organizational structure of highly skilled leaders and comprehensively trained FSQA floor and supervisory staff.

SUPPLIER APPROVAL

MANUFACTURERS MUST PASS A RIGOROUS QUALITY AND FOOD SAFETY ASSESSMENT BEFORE BECOMING SYSCO SUPPLIERS.

INITIAL FACILITY AUDIT (IFA)

Potential Sysco brand supplier facilities must pass an Initial Facility Audit (IFA) performed by a Sysco Quality Assurance team member.

Facilities are not approved to produce Sysco Brand without first passing a rigorous process of quality and food safety audits. Suppliers must demonstrate the capability of producing food products to our requirements. If the product evaluations and business analysis warrant proceeding through the approval process, a representative of Sysco Quality Assurance will conduct a comprehensive "desktop" virtual pre-audit review with the facility management personnel in order to determine if the facility will meet our food safety and quality expectations.

If Sysco Quality Assurance obtains facts to support that the facility is capable of meeting our requirements, an initial "On-Site" audit of the facility is conducted. The initial audit will verify the acceptability of the plant and grounds as well as validation of the food safety and quality assurance programs in place.

If approval of the facility is granted, the supplier and the Sysco Program Quality Manager will establish monitoring and verification procedures to ensure that the food safety and quality systems are maintained and the Sysco brand products are manufactured or packed according to the agreed specifications. The IFA requirement applies to all potential Sysco Brand food product manufacturers anywhere in the world.

Specialized supplier requirement programs to provide safe and wholesome products

10

Sysco Quality Assurance professionals visit Sysco Brand suppliers on a routine basis

Compliance with FDA, USDA FSIS and CFIA regulations and Industry Best Practices

GROUND BEEF AND VEAL SUPPLIER AUTHORIZATION

To mitigate the risk of E. coli O157:H7 in raw ground beef and veal products distributed through Sysco Operating Sites and/or Sysco Specialty Meat Group, Sysco has developed a specialized supplier requirement program.

Sysco has been very proactive in establishing food safety programs that provide our customers with safe and wholesome products. When purchasing raw ground products, Global Support Center QA, with the support of the SMS Beef Department and Operating Sites, has implemented enhanced food safety control requirements that exceed minimum regulatory requirements.

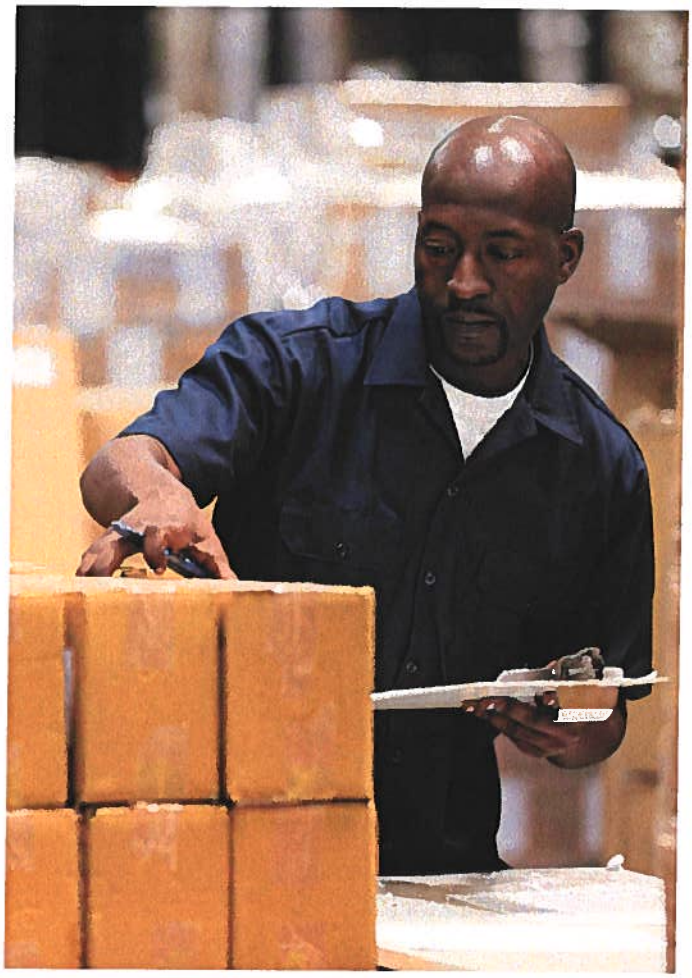
The product and process requirements are reviewed and updated as needed to improve Sysco's ability to provide safe food and to affirm compliance with USDA FSIS/CFIA regulations and industry best practices. The purpose of this process is to achieve a greater level of consistency between products and suppliers of this important product category.

Compliance with Sysco's Ground Beef Food Safety Program must be verified annually by an approved E. coli O157:H7 audit developed specifically for "Grinders." Any establishment not complying with the Sysco requirements is disqualified from the Sysco brand/Packer Label authorized supplier list and purchases of raw ground products produced at such establishment(s) is suspended until compliance is achieved.

If suppliers are not on the authorized list, then they cannot distribute through any Sysco operating site, including Broadline, or Specialty Meat Group. In addition, Sysco's QA personnel visit Sysco brand raw ground beef and veal suppliers on a routine basis

SUPPLIER APPROVAL

Sysco QA compiles program requirements on an on-going basis and posts the information via an electronic archive. Sysco Corporation and the SSMG monitor compliance on an ongoing basis. In the event a supplier or supplier location fails to comply, they are removed from the SSMG approved supplier list, and product shipments from those suppliers or individual supplier locations are not allowed to be received into inventory at SSMG establishments and may not be used for Whole Muscle Non-Intact (WMNI) beef production.



The SSMG Supplier Approval Program requirements include a rigorous set of food safety standards including an annual Independent Food Safety Audit (IFSA).

SYSCO SPECIALTY MEAT GROUP (SSMG) RAW MATERIALS SUPPLIER APPROVAL

To reduce risk of pathogenic E. coli 0157:H7 in whole muscle non-intact beef cuts, SSMGs only purchase raw materials from approved suppliers that have confirmed compliance to the Raw Materials Supplier Approval Program.

The SSMG Supplier Approval Program requirements include a rigorous set of food safety standards. These include:

- Annual Independent Food Safety Audit (IFSA) for all covered establishments.
- Annual E. coli O157:H7 assessment portion or addendum to the IFSA audit
- Ongoing Food Safety System Letter of Guarantee including verification and validation details of at least two hazard control point interventions.

SUPPLIER MONITORING

SUPPLIER FACILITY RISK RATING SYSTEM AND PLANT VISIT MATRIX

Sysco Quality Assurance has developed a Supplier Facility Risk Rating system and Plant Audit Matrix to manage internal, second party Sysco QA Plant Audits to supplier facilities approved to manufacture Sysco brand products. Facility risk ratings are based on numerous factors including but not limited to: the products with the most inherent food safety risk produced at each facility, the robustness and validity of the food safety processes in each facility, the scheme and results from certified third party food safety audits, the current and historical performance regarding food safety, regulatory, quality and/or social responsibility.

After each facility is assessed using decision making criteria, each facility is assigned a Risk Rating resulting in a Plant Visit Matrix used to assign the frequency of on-site Sysco QA Plant Audits.

Examples of high risk supplier facilities include those producing refrigerated Ready To Eat (RTE) Deli Meats, RTE Smoked Salmon, RTE Crustaceans, and RTE Produce. While lower risk examples include potentially hazardous foods that may support pathogen growth, but where the growth is limited due to inherent physiochemical properties, validated interventions or processes that reduce and inhibit the growth throughout the product's shelf life and facilities producing products that do not support the growth of food borne pathogens.

The Sysco Quality Assurance Plant Audit Matrix is updated as new facilities are approved and is reviewed annually to determine resource needs to complete essential travel and to assess any new information such as emerging food safety hazards or new validated intervention technologies.

SUPPLIER MONITORING

INDEPENDENT AUDIT PROGRAM (IAP)

Sysco Corporation maintains a strong commitment to food safety, product integrity, and provision of consistent quality products to our Sysco Operating Sites and their end user customers. In an effort to strengthen this commitment, there is the Sysco Independent Audit Program (IAP). All Sysco approved supplier locations and co-packing locations producing Sysco brand products are required to undergo a 3rd Party Food Safety certification audit each calendar year conducted by an accredited certification body using an audit standard benchmarked by the Global Food Safety Initiative (GFSI). Sysco QA reviews all audits to assure a minimum acceptable score is achieved and that all corrective actions are adequate and implemented in a timely manner. Audit documents are managed through a secure web-based system where companies can store, share, and manage audit documentation and communications with other companies they do business with.

GLOBAL FOOD SAFETY INITIATIVE (GFSI)
Since July 2017 Sysco has only accepted GFSI schemes.

GLOBAL FOOD SAFETY INITIATIVE (GFSI)

Sysco requires GFSI "benchmarked audit standards" to satisfy the requirements for independent food safety audits. The GFSI mission is to provide continuous improvement in food safety management systems to ensure confidence in the delivery of safe food to consumers worldwide. GFSI audit platforms are based on the food safety principles laid down by the Codex Alimentarius Commission (Codex), the National Advisory Committee on Microbiological Criteria for Foods (NACMCF), relevant ISO standards, and International Codes of Practice.

Sysco Brand requirements are comprehensive to include the entire manufacturing process for LM controls.

LISTERIA MONOCYTOGENES CONTROLS

Sysco's requirements for control of Listeria monocytogenes (LM) in various ready to eat products include internationally recognized best practices, many of which exceed those codified by regulations.

Listeriosis, a food borne disease caused by food products contaminated with Listeria monocytogenes, is an important public health issue. Listeriosis primarily affects persons of advanced age, pregnant women, newborns, and adults with weakened immune systems. However, persons without these risk factors can also be affected. The mortality rate for persons contracting Listeriosis is nearly 30%; therefore heightened controls for Ready to Eat products have been developed to reduce risk to our customers.

Sysco Brand requirements are comprehensive to include the entire manufacturing process, including environmental controls, and provide a set of minimum standards that all Sysco Brand suppliers must comply with thorough demonstration of equivalent practices for LM Control programs. Sysco Brand Deli Meats adhere to the highest food safety standards in the industry whereby the manufacturing processes must be equivalent to low risk as defined by the United States Department of Agriculture Food Safety Inspection Service and/or Canadian Food Inspection Agency and Health Canada.

FOOD SAFETY

Sysco Brand suppliers must have Hazard Analysis of Critical Control Point Food Safety Systems in place and such plans must include a hazard analysis for control of LM throughout the processing environment. Suppliers are required to scientifically validate that all LM interventions meet or exceed Sysco QA requirements. Comprehensive pre-requisite programs are required.

Examples of pre-requisite programs include Good Manufacturing Practices, Sanitation, Food Safety, Hold and Test, Comprehensive Pre Op and During Op Environmental Sampling, Root Cause Analysis with Corrective Action Plans, Laboratory Testing Methodology, Microbiological Interventions and Employee Training.

In addition to annual Third-Party Food Safety audits, Sysco QA personnel verify that all high risk RTE Sysco suppliers meet or exceed the minimum LM control requirements by conducting onsite plant visits.

ALLERGEN CONTROLS

Approximately 8% of the United States and Canadian citizens have been diagnosed with or experience some form of food allergies. Thousands are rushed to the hospital annually due to an allergic reaction to foods with allergens and hundreds die from it. Despite these statistics there is still no cure for food allergens. The best remedy is that those sensitive to allergens should abstain from foods containing allergens. Presently there are nine major allergens recognized in the US, which include Crustacean Shellfish, Eggs, Fish, Dairy, Peanuts, Soy, Tree Nuts, Wheat and Sesame. In Canada, along with the top nine, Mustard, and Sulphites are also recognized as hazards. In order to assist individuals in avoiding potentially fatal reactions due to food allergen consumption, the FDA has mandated that all food product labeling list the top nine US allergens in their ingredient legend. Canadian regulations require the same information on its labeling for its top 11 allergens and sensitive ingredients.

Sysco has developed guidelines for its branded suppliers in order to minimize the risks of cross contact and to ensure proper identification of all food products containing allergens. The Sysco guidelines are more far reaching than those required by the FDA for allergen control. These guidelines ensure suppliers take a systematic approach in its risk analysis of possible points of cross contact in their process, develop risk control measures, track allergen usage, and provide proactive identification of allergens in plain language.

Sysco provides detailed directives for its suppliers in the areas of packaging/specification development and review in addition to standard procedures employed during the processing of allergen- or sensitive-ingredient containing food items.

Approximately 8% of United States and Canadian citizens have been diagnosed with or experience some form of food allergies.

FOOD SAFETY

Examples of directives in these areas is the annual review of all packaging and specifications to ensure allergens have been declared. There should be a statement for allergens in plain language (such as "Contains Dairy"), required label checks during production runs, separation and segregation of allergens in storage and production, and required cleaning of the lines whenever a changeover occurs between an allergen and non-allergen food product. Updates to these guidelines and requirements are also provided to each supplier on a periodic basis when they experience change.

Additionally, mandated annual third party audits are conducted and any infractions are identified and reported to Sysco Global Support Center QA in an audit report. The Sysco Allergen Control Guidelines are also provided to all potential suppliers in an introduction packet. Suppliers incapable of meeting Sysco requirements are not approved.

FOREIGN MATERIAL CONTROLS AND METAL DETECTION GUIDELINES

Foreign materials in foods can cause injury. Sysco Brand suppliers must demonstrate effective procedures to prevent contamination of product with objects such as wood, glass, brittle plastic and metal. The foundation of this program is prevention of foreign material contamination. Strict raw material specifications, planned preventive maintenance programs, good engineering and application of effective Good Manufacturing Practices are examples of the preventive measures required of all suppliers. Sysco Brand suppliers must have approved foreign material detection systems on all lines, such as Filters, Magnets, Metal Detectors, and/or X-rays designed to mitigate risk of ferrous, non-ferrous, aluminum and stainless steel metals below limits established by regulatory agencies as choking hazards.

A Sysco QA Metal Detection Guidelines document is provided to all active suppliers and each potential new supplier. The document is designed to provide guidance to the standards Sysco expects from its suppliers.

LOW ACID CANNED FOODS

All approved Sysco suppliers of low acid canned foods have implemented processes specific to the product and method of operation to achieve commercial sterility. These processes are established by or are equivalent to a process developed by a competent processing authority. Commercial sterility of thermally processed low acid canned foods means the finished product is free of microorganisms of public health significance and those capable of reproducing in the food under ambient storage and distribution temperatures.

SYSCO BRAND SUPPLIERS MUST DEMONSTRATE EFFECTIVE PROCEDURES TO PREVENT CONTAMINATION OF PRODUCTS WITH OBJECTS THOSE LISTED ABOVE:

FOOD SAFETY

PRODUCE: GOOD AGRICULTURAL PRACTICES (GAP)

The Sysco/FreshPoint GAP Program is divided into two areas that improve food quality, food safety and traceability:

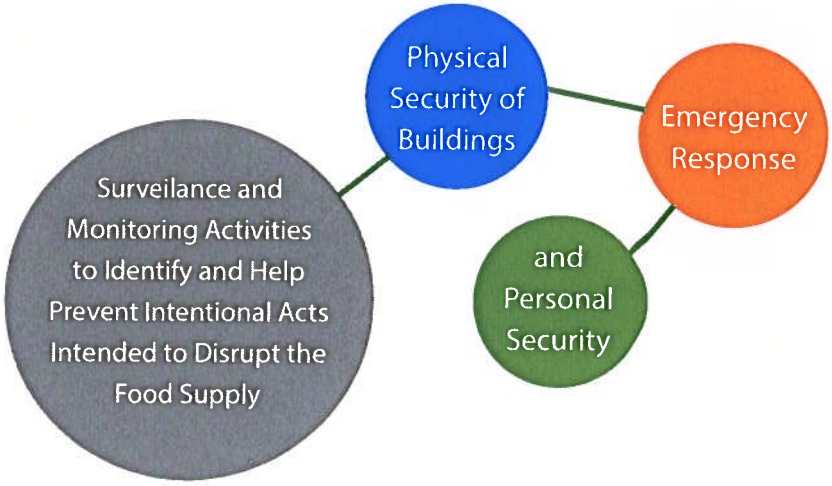
1. Good Agricultural Practices (GAP)
2. Harvest Crew Third Party Audits (GHP)

All Sysco/FreshPoint approved produce suppliers are required to comply with Sysco's Good Agricultural Practices Program. All supplier information and audits of GAP/GHP and GMP are housed in a secure database system. Suppliers upload third party GAP/GHP/GMP audits from all ranches/suppliers into the secured web-based system. The program identifies each supplier's role in the supply chain (e.g. grower-shipper, broker, processor, etc. outlining complete full traceability of the products sold and distributed onto Sysco/FreshPoint Operating Sites). The system further ensures that all Ready To Eat products and total number of farms/ranches being used to supply those products to Sysco/FreshPoint sites are accounted for and have been uploaded into the Good Agricultural Practices program.

Suppliers are required to have tracking systems in place that provide accurate and legible labeling of all cases/items/ packages so that complete and thorough traceability back to the actual field can be provided within minutes.The database monitors supplier audits, providing reminders of impending expiration dates, thus helping to assure continued compliance. Benefits of the database includes the ability to monitor third party auditor performance, expanding GPS capabilities, and the generation of GAP/GHP/GMP-compliant suppliers from whom our Operating Sites are authorized to purchase RTE produce products.

Sysco/FreshPoint supports and enforces all current requirements set forth by the California and Arizona Leafy Green Marketing Agreement, in addition to complying with all mandated programs of FSMA, USDA and FDA. We also focus on higher standards in the areas pertaining to water quality and ATP Bioluminescence Testing. The program must identify monitoring methods, sampling plan, frequency of tests performed, acceptable limits and corrective actions taken when limits are exceeded.

Additionally, Initial Audits of all potential suppliers of Sysco/FreshPoint brand field products include GAP/GHP assessments. These initial assessments are conducted by trained Sysco QA staff.



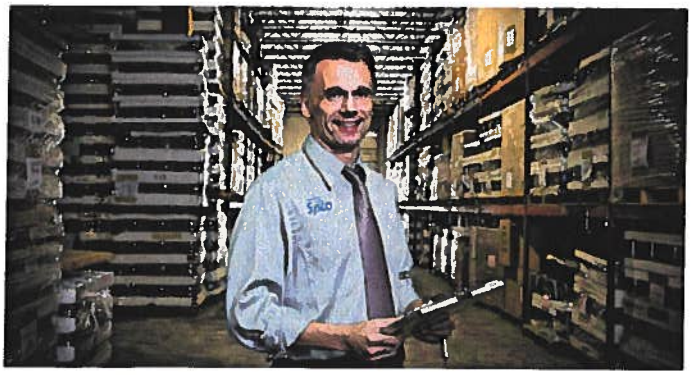
INTENTIONAL ADULTERATION - FOOD DEFENSE

Supplier and Operating Site controls

Sysco suppliers and Operating Sites are required to have demonstrated programs and procedures in place addressing:

Food Intentional Adulteration - Food Defense program compliance is verified by third-party audits and QA plant visits.

Branded supplier and Sysco operating site facilities have effective Intentional Adulteration - Food Defense programs that includes a food security team with defined roles and responsibilities. Each team conducts a unique security risk evaluation which helps the management team prioritize the preventive measures that have the greatest impact on reducing the risk of tampering or other malicious, criminal or terrorist actions against products. All aspects of facility operations are evaluated for vulnerability to sabotage. Ingredient and packaging suppliers must undergo food security evaluations at their facilities or distribution centers, and must have demonstrated procedures for the receipt of damaged goods including inspection and justification for product disposition.



Non-USDA facility manufacturing plant, warehouse or distribution centers are registered with the FDA under the Public Health Security and Bioterrorism Preparedness and Response Act of 2002. Sysco branded suppliers and Sysco Operating Sites have effective systems to control access to and from the plant grounds and the manufacturing and storage facilities. Access to sensitive areas is controlled during operations as well as during off hours.

Vehicles entering facility property park in areas visible to plant food security patrol individuals. Non- employee personnel have a designated waiting area that restricts non-employees from processing and/ or warehouse areas. Trucks and/or trailers are inspected by trained personnel before and after unloading. Non- traffic doors, dock doors, receiving pipes and hoses are secured at all times. Security processes are in place for issuing, tracking and retrieving keys, identification badges and passes for the building and secured areas. Only authorized personnel have access to the facility and their whereabouts are monitored at all times. In addition, facilities have a documented contractor program with procedures including; GMP, food safety and hygiene rules with training, restriction to defined work areas, options to inspect tool and lunch boxes and a sign in and out log. Regular patrol of outside grounds, outside buildings and roof tops are part of the security programs. Patrols are documented and suspicious activity investigated with law enforcement notified as deemed appropriate by the designated individuals.

QUALITY

INDIVIDUAL PRODUCT SPECIFICATIONS

Sysco QA manages a Product Specification Database, which describes the critical product attributes for each specific Sysco brand product. Suppliers create product specifications by entering data into the database, which triggers a workflow allowing Sysco Program Quality Manager (PQM) – Product team to review and either approve the specification, or send back to the supplier for additional data. Suppliers are required to submit supplier-specific product information into the Sysco product specification system for each item they produce under the Sysco Brand. Initiation of packaging and production of Sysco Brand products cannot commence until each specification is in QA Approved status.

All individual product specifications are reviewed by the Program Quality Manager – Product associate assigned to the category for content accuracy and to assure the data clearly aligns with the Sysco Brand strategies for points of differentiation and consistency within Sysco Brands. The specifications are not provided final approval until all criteria is met. The finished product specifications describe the product as sold and include key manufacturing procedures and key attributes of the product.

The supplier's product specification information is managed within the specification database for future use, and may be provided as requested by customers or Operating Sites.

Information contained in specs may include, but is not limited to, the following (as applicable):

01	Product Description
02	Ingredient Statement
03	Packaging and Code Dating
04	Raw Material Information
05	Unique Processing Procedures or other Point of Differentiation Information
06	Foreign Material Prevention Requirements

SYSCO PRODUCT EVALUATION CENTER (PEC)

The Sysco Product Evaluation Center (PEC), located at the Global Support Center in Houston, Texas, is used to evaluate new samples, current Sysco brand products and competitors' products. The center includes an advanced foodservice kitchen with workstations, a sensory panel area, and an auditorium with adjacent R&D kitchen. The PEC is a manifestation of Sysco's desire to meet customers' expectations and maintain a competitive edge in the industry.

Professionally evaluating products provides value to Sysco and its suppliers. Products are evaluated against agreed purchase specifications to measure supplier performance. The PEC is also utilized extensively by Sysco and supplier chefs to create and present new menu items for our valued customers. Supplier performance evaluations are an ongoing verification activity across all Sysco product categories. Additional evaluations are performed during plant audits and inside the PEC.

QA personnel issue reports after each evaluation and corrective action plans are developed as needed to improve the product and processes.

Examples of the foodservice equipment used in the P.E.C.: fryers, convection ovens, stoves, steam kettles, char-broiler, salamander, and steamers to prepare and evaluate a wide array of food categories that are distributed in the marketplace. The sensory panel area provides the company with an opportunity to gain consumer insight prior to the release of a new or improved product. The area includes eight individual sensory booths which allow internal, external, and expert participants to sample and evaluate single or multiple product attributes including visual, texture, taste, and aroma. The auditorium and R&D kitchen are available for food demonstrations and presentations.

FIELD TECHNICIANS

Sysco/FreshPoint branded approved suppliers have the responsibility of producing products that meet the mutually agreed upon Sysco/FreshPoint mandated specifications and must maintain effective QA/QC procedures to monitor and ensure specification compliance. The success of the program is dependent on sound production and quality assurance efforts by our select and valued suppliers. Sysco/FreshPoint QA works closely with its suppliers to define the monitoring requirements and reporting to ensure and demonstrate overall mandated compliance.

In conjunction with supplier monitoring, Sysco/FreshPoint QA utilizes experienced produce technicians who evaluate the quality and consistency of our Sysco/FreshPoint branded products in the fields, processing plants and coolers where the products are grown, harvested, cooled, processed and shipped. Commodities in the fields are inspected several times prior to getting the approval by our inspectors to harvest for Sysco/FreshPoint brand. This ensures the quality, yield and accuracy of the Sysco program. This process also establishes a cooperative QA supplier relationship every day.

POINT SOURCE INSPECTION PROGRAM (PSIP)

The implementation of the Point Source Inspection Program (PSIP) effectively changed the inspection methods associated with Sysco Brand imported products (import commodities and seafood) procured from many of our suppliers. Sysco QA worked closely with SMS and our approved import commodities and seafood suppliers in the establishment of inspection procedures for Sysco Brand products, resulting in a streamlined and more efficient inspection process. In the case of internationally based approved suppliers, the inspection of Sysco Brand products formerly occurred following their arrival in the United States. The determination that product failed to comply with Sysco Brand Product Quality Specifications following arrival in the United States added cost, supply disruptions and considerable inconvenience for all parties throughout the distribution chain. Sysco QA and SMS determined, with input from our valued import supplier base, that the inspection of Sysco Brand products had to be executed at the point of production, now known as PSIP. Sysco QA developed strategic alliances with offshore partners for the execution of sampling and quality evaluations at our approved supplier's processing facilities.

FIELD TECHNICIANS IN PLANT EVALUATION

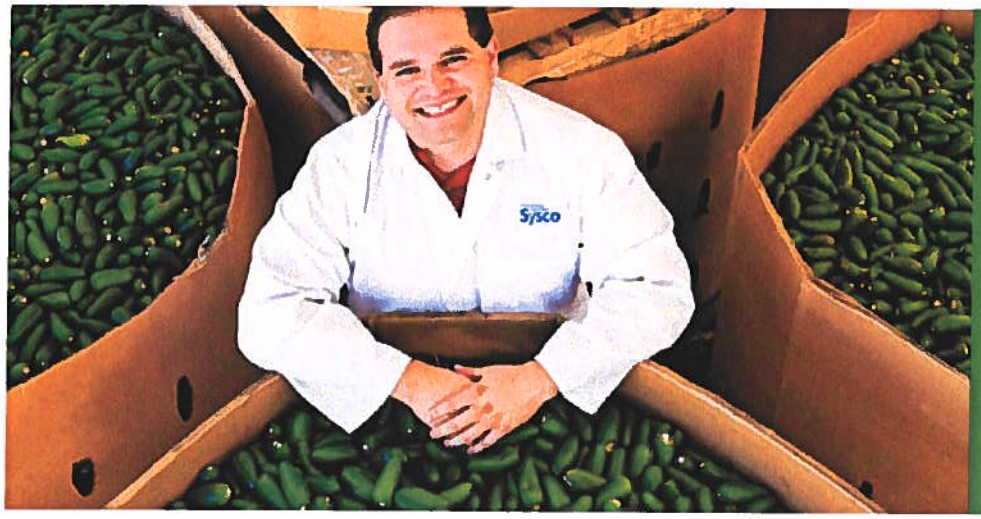
These efforts are coordinated by Sysco QA following receipt of a Sysco Brand production and shipping notification form. The sampling plans and evaluation requirements utilized by our partners are established and maintained by Sysco QA. The PSIP program includes procedures associated with third party analysis of products for contaminants, as directed by Sysco QA.

QUALITY

The implementation of the PSIP program does not relieve our approved suppliers from their responsibility of producing products that meet the mutually agreed upon Sysco specifications nor does it eliminate the supplier/importer responsibility for maintaining bona-fide, effective QA procedures to monitor and ensure specification compliance. The success of the program remains now, as it always has, dependent on sound production and quality assurance efforts by our valued suppliers.

The procedures outlined in the PSIP program are intended only as an additional "check" on the system. PSIP includes, at the direction of Sysco QA, routine audits of approved supplier's quality assurance programs and associated documentation. In-depth information pertaining to the PSIP program can be reviewed in the Standard Operating Procedure Guidelines for import and seafood products.

SYSCO BRAND PRODUCT DISCREPANCY NOTICE PROGRAM (PDN)



The Sysco QA department makes it a priority to ensure consistent quality products on a continuous basis to our Sysco Operating Sites and their customers. If an Operating Site receives a product that does not meet the Sysco brand standard of quality, or if a customer contacts an operating site with a product quality complaint, a Product Discrepancy Notice (PDN) form is completed to notify Sysco QA of the issue. Upon submission of the PDN, an email with the pertinent information is sent to the following parties: risk manager, senior claims manager, QA Vice President, and QA Directors. The PDN is then routed and assigned to the responsible Program Quality Manager (PQM) responsible for the product category. The PQM (Sysco Brand) pursues a thorough investigation of the product discrepancy, confirms any corrective actions taken by the supplier, reports results of investigation to the operating site and customer, and records the findings on the PDN form for aggregation of data.

If a customer contacts an Operating Site with a product quality complaint, a PDN form is completed and assigned to the responsible Program Quality Manager responsible for the product category.

PDN summary reports are reviewed by the Sysco QA management team in order to ensure that all discrepancies are resolved quickly, as well as to evaluate and address any trends that may be occurring. The PDN system helps Sysco QA to ensure customers are satisfied and are receiving consistent quality and value for products purchased from Sysco.

QUALITY

Sysco QA personnel are required to complete announced and unannounced plant visits to approved supplier locations.

SYSCO QA PLANT AUDITS - APPROVED SUPPLIERS

To help ensure the consistency, food safety, and quality of Sysco brand products, Sysco QA personnel are required to complete announced and unannounced plant audits of approved supplier locations that manufacture those Sysco brand based on risk and managed through a plant audit matrix. The plant audit are conducted by Sysco Program Quality Managers or Directors and involve: completion of physical inspection of the facility, review of the facility food safety and quality systems, management commitment and an in-depth review of specific supporting documents and process controls pertinent to key food safety programs.

The physical plant inspection includes examination of the manufacturing processes/equipment, foreign material control (metal detection, magnet traps, screens, filters, X-ray, etc.), temperatures (ambient and/or product), GMP (Good Manufacturing Practices) policies and procedures, verification of HACCP documentation (Critical Control Points), verification of corrective actions completed arising from deficiencies noted on third party audits, and product evaluations. Plant documentation review may include traceability (back to raw materials and through production and forward through distribution), pest control documentation, allergen program compliance, on-line finished product inspection documentation, environmental and microbial test results, HACCP related documents, validation and verification supporting documents for pre-requisite programs and other pertinent areas associated with required Sysco program(s) relevant to the individual category.

An audit could also be conducted for the purpose of addressing immediate food safety or quality issues. These may include: recent recalls, follow-up to a failed Independent Third Party Audit, product complaints, initial production runs, review of new technology implementation, and/or equipment replacement on lines producing Sysco brand items.

REGULATORY & TECHNICAL SERVICES

RECALL PROCEDURES

When manufacturers find a problem with the safety or quality of their products it is incumbent upon them to remove the product from the distribution system. As Sysco grows and becomes a bigger part of the distribution system, involvement in product recalls and withdrawals has grown as well.

A basic tenet of effective crisis management is efficient and comprehensive communication. Sysco Quality Assurance has taken the lead in this regard and has developed a recall communication system designed to notify all involved, in as rapid a manner as possible, of the details of any product recall/withdrawal situation, as well as any responsibilities they might have. Guidelines have been developed to facilitate communication between the recalling firm/supplier, Sysco Operating Sites, and affected customers involved. This plan minimizes disruption and describes step-by-step the procedure to follow in the event of a recall.

SEAFOOD HACCP

In accordance with Title 21 Code of Federal Regulations Part 123, the Seafood HACCP Regulation, Sysco seafood suppliers must have an adequate Hazard Analysis and, should any hazards be identified, a corresponding HACCP plan. The HACCP plan must follow the strategies outlined in the US Food & Drug Administration's Fish and Fishery Products Hazard and Control Guide for the specific type of seafood product and processing. The HACCP plan must be adequate to ensure control of all hazards associated with the specific product. Additionally, processors of raw molluscan shellfish must include in their HACCP plan the requirements as recommended by the National Shellfish Sanitation Program Model Ordinance. Likewise, Sysco Operating Sites that receive, store, and distribute Sysco seafood products have also conducted a Hazard Analysis and when hazards were found a corresponding HACCP plan is in place.

EDUCATION & DEVELOPMENT

EMPLOYEE TRAINING AND PROFESSIONAL MEMBERSHIPS

Sysco provides ongoing professional development training for all Quality Assurance associates through a number of resources including individual offsite technical training, webinars, in house group seminars and interactive web-based course work.

Sysco's QA Department, which includes a food safety team, is a valuable resource to support the Sysco Operating Sites and their customers with product expertise or knowledge on current technical and/or regulatory issues related to functional areas of Food Safety, FSMA, Seafood HACCP, Product Quality, Product Claims, Regulatory, Recall Communications, and Health/Nutrition. Sysco's QA Staff members have product expertise acquired from their formal education and ongoing skills development, as well as practical work experience in all of the food and related food service supply categories that Sysco markets. The organizational structure has been established based on product expertise, which enables Sysco to direct resources to address and support specific Operating site or Multi Unit Account Customer customer needs, including support during Regulatory Authority visits, Customer Audits, Sales Meetings, Sysco Techs, or Sysco Brand Advantage Evaluations. EXECUTIVE SUMMARY

FY22-220 - Turnkey Solution for Providing Substitute Teachers for BCPS

Board Meeting Date: April 7, 2026

Requested Action:
Approve additional Spending Authority of $5,200,000 for Request for Proposal (RFP) RFP-FY22-220, Turnkey Solution for Providing Substitutes for Teachers and Classroom Assistants, for the previously approved Agreement between The School Board of Broward County, Florida (SBBC), and Kelly Services, Inc., for the term July 1,2025, through June 30, 2026

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member:	
School Board Policy Requirement	• School Board Policy 4100.
Statutory Requirement	• Not Applicable
If the School Board votes "Yes"	• If the additional spending authority is approved, Kelly Services, Inc. will be authorized to continue providing substitute teachers and substitute teacher/classroom assistants through the remainder of the Agreement term, ensuring uninterrupted instructional coverage across the District.
If the School Board votes "No"	• If the additional spending authority is not approved, the District will be unable to authorize Kelly Services, Inc. to continue providing substitute teachers and substitute teacher/classroom assistants, and the schools will not have substitute teachers. Additionally, failure to approve the required spending authority would place the District at risk of being in breach of the Agreement.
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operation Services
Measurable Outcome(s)/Return on Investment	Maintaining a 97% fill rate allows continuity of teaching and learning, as well as minimizes the need to reassign teachers to cover absences when a substitute cannot be secured. According to the Education Professional Collective Bargaining Agreement, teachers who cover classes for absent colleagues without an available substitute receive additional compensation of $55.

	For example, • Elementary teachers who agree to take a portion of a class receive $55 a day. • Elementary teachers who agree to take an entire class receive an increased hourly rate of $55 per hour, up to 5 hours, totaling $275 a day. • High School teachers who agree to cover a class during their planning period (90 minutes) receive $82.50/period. (3 periods of coverage = $247.50) • Middle school teachers who agree to cover a class during their planning period (50 minutes) receive $55/period. (5 periods of coverage = $275) A daily Kelly substitute earns $141.00 per day. Using a Kelly substitute instead of paying a teacher to cover an absent colleague saves the District up to $134 per day. In addition, Kelly Services provides significant cost avoidance related to employer obligations, including FICA, workers' compensation, unemployment, liability coverage, equal employment opportunity claims, SBBC investigations, KRONOS/SAP licenses, recruiting and marketing, and payroll expenses.

Background/History
This item seeks approval for additional spending authority of $5,200,000 to support substitute teacher services for the remainder of FY26 under the District's agreement with Kelly Services.

On January 21, 2026, the School Board approved an increase in spending authority with the understanding that the District might return later in the fiscal year to request additional funds if necessary.

The District began utilizing Kelly Services on July 1, 2022, when the substitute fill rate was 46.5%. Currently, approximately 1,300 substitute requests are submitted daily, and the fill rate has increased to 97.3%, supported by a 65% expansion of the substitute pool. End-of-year surveys reflect 88% satisfaction among school-based administrators and office managers.

School Impact, Stakeholder Engagement, and Implementation Considerations

This section outlines how the proposed item will impact schools, including the selection and prioritization process where applicable, as well as stakeholder and end-user input. It also addresses technology and capital asset life cycles, replacement planning, and any additional operational details necessary to provide the Board with a comprehensive understanding of implementation.

Impact on Schools	Approving the additional spending authority ensures continuity of services, maintains contractual compliance, and supports consistent, reliable staffing across all schools. If the additional spending authority is not granted, the District will be in breach of contract, requiring sub-coordination services to shift to the Talent Management Department. This transition would significantly disrupt the substitute teacher coverage process and negatively impact day-to-day staffing stability at schools.
School Selection /Prioritization	All schools will be impacted equally.
Community/ Stakeholder Engagement	Not Applicable
End-User Input	Not Applicable
Technology/Capital Expected Lifecycle/Replacement Cycle	Not Applicable

It is the responsibility of all interested parties to ensure they have received all necessary documents, including Addenda and have included all necessary information within their response. SBBC is not responsible for Proposer's failure to obtain complete bidding documents from DemandStar. SBBC reserves the right to reject any bid as non-responsive for failure to include all necessary documents or required Addenda. For information regarding the above-referenced solicitation, contact the designated Purchasing Agent, as stated herein.

7.36 **PRICE REDUCTIONS:** If, from the date of proposal opening, the Awardee either bids the same products and/or services at a lower price than offered to SBBC or reduces the price of the proposed product or service, the lowest of these reduced prices will be extended to SBBC.

7.37 **LOBBYIST ACTIVITIES:** In accordance with SBBC Policy 1100B, as currently enacted or as amended from time to time, persons acting as lobbyists must state, at the beginning of their presentation, letter, telephone call, e-mail or facsimile transmission to School Board Members, Superintendent or Members of Senior Management, the group, association, organization or business interest she/he is representing.

a) A lobbyist is defined as a person who, for immediate or subsequent compensation (e.g., monetary profit/personal gain) represents a public or private group, association, organization or business interest and engages in efforts to influence School Board Members on matters within their official jurisdiction.
b) A lobbyist is not considered a person representing school-affiliated groups (e.g., PTA, DAC, Band Booster Associations, etc.) nor a public official acting in her/his official capacity.
c) Lobbyists shall annually (July 1) disclose in each instance and for each client prior to any lobbying activities, their identity and activities by completing the lobbyist statement form which can be obtained from Official School Board Records, School Board Member's Offices or the Superintendent's Office and will be recorded on the School Board of Broward County's website, https://www.browardschools.com/Page/35471

e) Senior-level employees (Pay Grade 30 and above) and/or School Board Members are prohibited from lobbying activities for one (1) year after resignation or retirement or expiration of their term of office.

7.38 **PUBLIC INSPECTION OF PROPOSALS:** Pursuant to Section 119.071 (1)(b), Florida Statutes, responses received as a result of this RFP shall be exempt from public inspection and copying until thirty (30) days after the opening of the proposals or until posting of the recommendation for intended award, whichever is earlier. If SBBC rejects all proposals and concurrently provides notice of its intent to reissue the competitive solicitation, the rejected proposals shall remain exempt from public inspection and copying until such time as SBBC posts notice of an intended decision concerning the reissued competitive solicitation or until SBBC withdraws the reissued competitive solicitation.

If a Proposer contends that any portion of its response to the RFP is confidential and exempt from public inspection and copying, it is the Proposer's responsibility to clearly label each such portion of its proposal as confidential and specify the applicable statutory exemption from public inspection and copying on such portion(s) of its proposal. Confidential or exempt portions of any proposal must also be submitted in a separate sealed envelope and marked as such. A failure by the Proposer to prepare and label the confidential or exempt portions of its proposal in the manner specified in this section of the RFP shall constitute a waiver by Proposer of any applicable exemptions from disclosure or any confidential status including ones that may be applicable to trade secrets under Florida law.

7.38 Continued…

SBBC will promptly provide a Proposer's contact person with written notice if a public records request has been made for any portions of Proposer's response to the RFP. SBBC will provide for the inspection or copying any non-exempt portions of any proposal in its possession in accordance with applicable law. If a Proposer wishes to preclude the inspection or copying of any non-exempt portions of its response to the RFP or if a dispute exists as to whether such portions are entitled to an exemption, the Proposer must obtain a protective order from a court of competent jurisdiction prohibiting the inspection or copying of the requested materials. The failure to timely initiate such legal proceedings shall constitute a waiver by the Proposer of any applicable exemption or confidential status of the requested materials.

By submitting a response to this RFP, the Proposer agrees to waive any cause of action or claim for damages it may have against SBBC for its release of records in response to a public record other than those that are prepared and labeled as confidential or exempt as described in this section. The Proposer agrees to hold SBBC harmless from any award to a plaintiff for damages, costs or attorney's fees based upon SBBC's non-disclosure of portions of Proposer's response that have been prepared and labeled as confidential or exempt from public inspection and further agrees to reimburse SBBC for any attorney's fees and costs it may incur in the defense of such nondisclosure.

7.39 **SBBC INFORMATION SECURITY GUIDELINES:** It is the responsibility of the Awardee to read and adhere to the SBBC Information Security Guidelines when using any device connected to the SBBC's network. Following the conclusion of the contract term, all of SBBC's confidential information must be removed from Awardee's equipment and all access privileges must be revoked. The final payment will be withheld until the Awardee has confirmed, in writing, that all SBBC's confidential information has been purged from any and all electronic technology devices that were used during this contract and were connected to the SBBC's network.

7.40 **SUPPLIER DIVERSITY OUTREACH PROGRAM (SDOP) PARTICIPATION:** SBBC has implemented a Supplier Diversity Outreach Program (SDOP) as part of the SBBC's competitive solicitation and contracting activity in accordance with School Board Policy 3330, Supplier Diversity Outreach Program. The purpose of the program is to utilize available small, minority, and women businesses within the Board's market area to compete for the award of SBBC construction and purchasing contracts. S/M/WBE vendors utilized for this contract must be certified by SBBC's Supplier Diversity Outreach Program Office prior to the submission of a bid proposal. **For information on S/M/WBE Certification, contact SBBC's Supplier Diversity Outreach Program at 754-321-0550 or https://www.browardschools.com/Domain/19315**

Such rights will be exercised with notice to the Awardee to determine compliance with and performance of the terms, conditions, and specifications on all matters, rights and duties, and obligations established by this agreement. Documents/records in any form shall be open to the District or State's representative and may include but are not limited to all correspondence, ordering, payment, inspection, and receiving records, contracts or sub-contracts that directly or indirectly pertain to the transactions between the District and the Awardee(s). (Section 6.0))

Items delivered, not conforming to RFP conditions or specifications, may be rejected and returned at the vendor's expense. Services not conforming to RFP specifications shall be corrected and performed again to meet the specifications of the RFP at the expense of the Awardee. Goods or services not delivered as per delivery date in RFP and/or Purchase Order may be rejected upon delivery and/or maybe purchased on the open market. Any increase in cost may be charged against the Awardee. Any violation of these stipulations may also result in:

c) All departments being advised not to do business with vendor.

7.43 **FORCE MAJEURE:** Neither party shall be obligated to perform any duty, requirement or obligation under this RFP if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and issuance or extension of existing government orders of the United States, the State of Florida , or local county and municipal governing bodies, or reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In no event shall lack of funds on the part of either party be deemed Force Majeure.

7.44 **TERMINATION:** This contract award may be terminated with or without cause by SBBC during the term hereof upon giving the other party thirty (30) days written notice that The School Board is terminating the contract award

7.45 **CONE OF SILENCE:** Any proposer, or lobbyist for a proposer, is prohibited from having any communications (except as provided in this rule) concerning any solicitation for a competitive procurement with any School Board member, the Superintendent, any Evaluation Committee Member, or any other School District employee after Procurement and Warehousing Services releases a solicitation to the General Public. All communications regarding this solicitation shall be directed to the designated Purchasing Agent unless so notified by Procurement and Warehousing Services. This "Cone of Silence" period shall go into effect and shall remain in effect from the time of the release of the solicitation until the contract is awarded by the School Board. Further, any vendor, its principals, or their lobbyists shall not offer campaign contributions to School Board Members or offer contributions to School Board Members for campaigns of other candidates for political office during the period in which the vendor is attempting to sell goods or services to the School Board. This period of limitation of offering campaign contributions shall commence at the time of the "cone of silence" period for any solicitation for a competitive procurement as described by School Board Policy 3320, Part II, Section GG as well as School Board Policy 1007, Section 5.4 – Campaign Contribution Fundraising. **Any vendor or lobbyist who violates this provision shall cause their Proposal (or that of their principal) to be considered non-responsive and therefore be ineligible for award.**

7.46 **TIE BID PROCEDURES:** When identical points are received from two (2) or more vendors and all other factors are equal in point value, priority for an award shall be given to vendors in the following sequence:

a) A business that certifies that it has implemented a drug-free workplace program shall be given preference in accordance with the provisions of Chapter 287.087, Florida Statutes, as currently enacted or as amended from time to time;

Included as a part of the RFP documents is a Form entitled **SWORN STATEMENT PURSUANT TO CHAPTER 287.087, FLORIDA STATUTES, AS CURRENTLY ENACTED OR AS AMENDED FROM TIME TO TIME, ON PREFERENCE TO BUSINESSES WITH DRUG-FREE WORKPLACE PROGRAMS.** This form will be used by the Proposer to certify that it has implemented a drug-free workplace program.

7.47 **CONFIDENTIAL RECORDS:** The Awardee acknowledges that certain information about the District's students is contained in records created, maintained or accessed by the Awardee and that this information is confidential and protected by the Family Educational Rights and Privacy Act of 1974 (FERPA) (20 U.S. C. 1232g), and/or the Health Insurance Portability and Accountability Act (HIPAA) (45 CFR parts 160-164) and related District policies, as amended from time to time, currently available at **www.browardschools.com/Page/37754.** The confidential information cannot be disclosed unless valid consent is obtained from the students or their legal guardians. Both parties agree to protect these records in compliance with FERPA, HIPAA, and the District's policy. To the extent permitted by law, nothing contained herein shall be construed as precluding either party from releasing such information to the other so that each can perform its respective responsibilities.

Awardee agrees that it may create, receive from or on behalf of the District, or have access to, records or record systems that are subject to FERPA and/or HIPAA (collectively, the "Confidential Records"). A breach of these confidentiality requirements shall constitute grounds for the District to terminate any Agreement with Awardee.

A participant may rely upon the certification of a prospective participant in a lower tier covered transaction that it and its principals are not debarred, suspended, proposed for debarment under 48 CFR part 9, subpart 9.4, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. Each participant shall require participants in lower tier covered transactions to include the certification for it and its principals in any bid submitted in connection with such lower tier covered transactions.

EXECUTIVE SUMMARY

RFP-FY23-050 - SAP Managed Hosting and Basis Services

Board Meeting Date: April 7, 2026

Requested Action:
Approve the First Amendment to the Agreement between The School Board of Broward County, Florida (SBBC), and Lemongrass Consulting (US), Inc. (Lemongrass) for a term that commences on May 18, 2026, and concludes on May 17, 2027, and the additional spending authority of $1,273,236.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member: District-wide	
School Board Policy Requirement	• Not Applicable
Statutory Requirement	• Not Applicable
If the School Board votes "Yes"	• If the School Board votes "Yes", SBBC will continue with its established cloud hosting and SAP Basis services provider, ensuring the stability, security, and reliability of critical ERP operations. This approval enables uninterrupted payroll processing for employees and vendors, continued support for human resources and financial systems, and sustained operational continuity across the District. Lemongrass's SAP Basis support provides continuous system monitoring, performance optimization, security oversight, and technical administration, allowing the District to proactively identify and resolve system issues before they impact operations. This ongoing support is essential to maintaining system availability, safeguarding sensitive data, and ensuring the District's core business functions operate reliably and efficiently.
If the School Board votes "No"	• If the School Board votes "No," SBBC will be without a critical cloud hosting and SAP Basis services provider. This would place essential ERP functions at immediate risk, including payroll processing for employees and vendors, human resources operations, and core financial activities. Without Lemongrass's SAP Basis support—which provides continuous system monitoring, performance management, security oversight, and technical

	administration—the District would lack the operational visibility and expertise necessary to promptly detect, respond to, and resolve system outages or performance degradation. This increased risk could result in delayed or missed payroll, disruption to financial and HR services, and significant impacts to District operations.
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations
Measurable Outcome(s)/Return on Investment	• Consistent attainment of service level agreements (SLAs), including timely incident response and resolution of critical issues. • Sustained 100% backup success. • Continued progress toward disaster recovery readiness. • The absence of major system disruptions associated with maintenance activities. • These outcomes reflect the effectiveness of the hosted environment and SAP Basis support in maintaining system availability, reducing operational risk, and ensuring reliable performance.

Background/History
The original agreement was approved by the School Board on January 24, 2023, to support the District's SAP Enterprise Resource Planning (ERP) environment following a strategic migration from the District's prior cloud hosting provider, Virtustream. This migration was necessitated by organizational changes resulting from Virtustream's acquisition by EMC Corporation and subsequent integration into Dell Technologies, prompting the District to transition to a cloud hosting model better aligned with long-term operational stability and support requirements.

Under the current agreement, Lemongrass Consulting (US), Inc. provides cloud hosting and SAP Basis services for the District's SAP Enterprise Central Component (ECC) and Business Warehouse (BW) systems. These services include continuous system monitoring, technical administration, and operational support essential to maintaining system availability, performance, and uninterrupted continuity of core business operations.

This Amended Agreement reflects both evolving operational needs and lessons learned from the initial term. Enhancements to the Scope of Services have been incorporated to support the District's HRConnect implementation, ensuring alignment with expanded system functionality and integration requirements.

Additionally, while cloud infrastructure costs associated with Amazon Web Services (AWS) were originally underestimated by the vendor, the District maintained adherence to the contracted pricing throughout the initial term. To provide greater transparency and flexibility moving forward, the revised agreement establishes a "not-to-exceed" monthly cost structure that more accurately reflects variable usage-based pricing while maintaining appropriate fiscal controls. Exhibit E details the cost differentials between the agreed-upon Lemongrass-to-SBBC pricing and the actual costs incurred between AWS and Lemongrass.

The parties acknowledge that they have sought and obtained whatever competent advice and counsel necessary for them to form a full and complete understanding of all rights and obligations herein and that the preparation of this Agreement has been their joint effort. The language agreed to herein expresses their mutual intent and the resulting document shall not, solely as a matter of judicial construction, be construed more severely against one of the parties than the other.

3.15 **Amendments**. No modification, amendment, or alteration in the terms or conditions contained herein is effective unless contained in a written document prepared with the same or similar formality as this Agreement and executed by each party hereto.

3.16 **Waiver**. The parties agree that each requirement, duty and obligation set forth herein is substantial and important to the formation of this Agreement and, therefore, is a material term hereof. Any party's failure to enforce any provision of this Agreement is not a waiver of such provision or modification of this Agreement unless the waiver is in writing and signed by the party waiving such provision. A written waiver is only effective as to the specific instance for which it is obtained and is not a continuing or future waiver.

3.17 **Force Majeure**. Neither party is obligated to perform any duty, requirement, or obligation under this Agreement if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and the issuance or extension of existing government orders of the United States, the State of Florida, or local county and municipal governing bodies, or by reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In no event shall a lack of funds on the part of either party be deemed Force Majeure.

3.18 **Rights and Remedies**. The duties and obligations imposed by this Agreement and the rights and remedies available thereunder are in addition to and not a limitation of any duties, obligations, rights and remedies otherwise imposed or available by law.

3.19 **Survival**. All representations and warranties made herein, indemnification obligations, obligations to reimburse SBBC, obligations to maintain and allow inspection and audit of records and property, obligations to maintain the confidentiality of records, reporting requirements, and obligations to return public funds survive the termination of this Agreement.

3.20 **Agreement Administration**. SBBC has delegated authority to the Superintendent of Schools or her/his designee to take any actions necessary to implement and administer this Agreement.

3.21 **Counterparts and Multiple Originals**. This Agreement may be executed in multiple originals, and may be executed in counterparts, each of which is an original, but all of which, taken together, shall constitute one and the same Agreement.

3.22 **Authority**. Each person signing this Agreement on behalf of either party individually warrants that he or she has full legal power to execute this Agreement on behalf of the party for whom he or she is signing, and to bind and obligate such party with respect to all provisions contained in this Agreement.

SECTION 3.0 – INTRODUCTION AND GENERAL INFORMATION

3.1 **INTRODUCTION:** The School Board of Broward County, Florida (hereinafter referred to as "SBBC" or "District"), desires to receive proposals from qualified proposers for SAP rehosting solution, for SAP certified managed hosting, migration services from the existing cloud platform, and certified SAP BASIS services to support the District's SAP Enterprise Resource Planning System (ERP), SAP Business Suite on HANA along with SAP-supported third-party add-on software and other enterprise software as used and/or selected by SBBC. See Section 8 of this RFP for Scope of Work and Performance Specifications. In addition, SBBC desires the Awardee to become a strategic partner that not only provides the prescribed services but can also assist in optimizing, modernizing, and expanding the systems in the future.

SBBC is the sixth-largest school district in the United States and second-largest in Florida. SBBC provides Pre-K through 12th grade education for residences of Broward County, Florida. For the 2020-2021 school year, SBBC has a student population of over 260,000 students, including both traditional and charter school students. There are 234 traditional and 92 charter schools in the District. SBBC serves a diverse population of students from 177 countries, speaking 151 languages. Broward County is in the greater Fort Lauderdale area with a population of over 1.8 million. For more information on SBBC, visit: http://browardschools.com.

The School Board of Broward County, Florida, Supplier Diversity Outreach Program, works to increase the participation of Small, Minority, and Women Business Enterprises (S/M/WBE). It is the intent of the Supplier Diversity Outreach Program to have a diverse group, as well as an equitable distribution of S/M/WBE's participating on any award of this Proposal. To be considered for the greatest amount of evaluation points for S/M/WBE participation, the Proposer must provide significant information on the specific certified S/M/WBE vendor(s) that will be used on any contract award for services described in this RFP. The Proposer should include the specific elements of work each S/M/WBE vendor(s) will be responsible for performing, the dollar value of the work, and the percentage of the total contract value. For a list of certified S/M/WBE's, refer to **Attachment A.**

3.2 **QUESTIONS & INTERPRETATIONS:** Any questions concerning any portion of this RFP must be submitted, in writing, to Luis E. Perez Procurement & Warehousing Services, via e-mail to luis.perez@browardschools.com Any questions which require a response which amends the RFP document in any manner will be answered via Addendum by the Procurement & Warehousing Services Department and provided to all Proposers. No information given in any other manner will be binding on SBBC.

Any questions concerning any condition or requirement of this RFP must be received in the Procurement & Warehousing Services Department, in writing, **on or before 5:00 p.m. ET** of the date listed in Section 2.0 Calendar. Questions received after this date and time may not be answered. Submit all questions to the attention of the individual stated above. If necessary, an Addendum will be issued. Any verbal or written information, which is obtained other than by information in this RFP document or by Addenda, shall not be binding on SBBC.

3.3 **CONTRACT TERM:** The purpose of this RFP is to establish a contract with an initial three (3) year term (not inclusive of implementation, migration, training etc. time, which will vary depending on the vendor recommended for award's proposal) commencing on approval by the School Board. Time needed for implementation, migration, training etc. will be in addition to the three (3) years so that the time period for the solution to be **"live"** is three (3) full years. The term of the contract may, by mutual agreement between SBBC and the Awardee, be extended for three additional one-year periods and, if needed, 180 days beyond the expiration date of the renewal period. Procurement & Warehousing Services Department, will, if considering renewing, request a letter of intent to renew from each Awardee, before the end of the current contract period. The Awardee will be notified when the recommendation has been acted upon by the School Board.

3.4 **PRICE ADJUSTMENTS:** Prices offered shall remain firm through the **first three (3) years of the contract** (subject to exceptions approved by the Director of Procurement, as stated in 3.5.1). A request for a price adjustment, with proper documentation justifying the adjustment, may be submitted, in writing, 30 days before the third-anniversary date of the contract. Price adjustment requests shall be evaluated on an annual basis thereafter. Unit price adjustments must have written

approval from SBBC before invoicing. Any unit price adjustment invoiced without written approval from SBBC shall not be paid, and the invoice returned to the Awardee for correction.

3.4.1 The Director, Procurement & Warehousing Services, may, in the Director's sole discretion on behalf of the SBBC, equitably adjust pricing if the pricing or availability of supplies is adversely affected by extreme and unforeseen volatility in the marketplace. Consideration for any pricing adjustment shall require vendor to provide irrefutable evidence that ALL the following circumstances exist:

a. The volatility is due to causes wholly beyond the vendor's control; and
b. The volatility affects the marketplace or industry, not just the vendor's source of supply; and
c. The effect on pricing or availability of supply is substantial; and
d. The volatility so affects the vendor that continued performance of the contract would result in a substantial loss.

Note: Any pricing adjustment must be confirmed in writing by the Director of Purchasing

3.5 **SUBMITTAL OF PROPOSAL:** Submit proposals in accordance with Section 5.0. Proposals should be organized and shall include the necessary information to be in full compliance with this Section. To facilitate the proposal evaluation process, special attention should be paid to organizing proposals in a manner consistent with Section 5.0. SBBC reserves the right to reject and not consider any proposal that is not submitted in accordance with Section 5.0, or that does not include any necessary information.

3.6 **EVALUATION & AWARD:** All proposals received must meet the Minimum Eligibility Requirements as stated in Section 4.1 of the RFP, to be further considered for evaluation. Failure to meet the Minimum Eligibility Requirements shall result in disqualification of the entire proposal and shall not be considered for further evaluation. Those proposals which meet the minimum requirements shall be further evaluated and scored by an Evaluation Committee. **General Condition 8.1, Liability, is NOT subject to negotiation and any proposal that fails to accept these conditions will be rejected as "non-responsive".**

All responsive proposals will be evaluated by the Evaluation Committee (hereinafter referred to as "Committee") based upon the information submitted by Proposers in response to Section 4.0 and 5.0. Based upon the evaluation of proposals, the Committee will recommend Proposer(s) to SBBC for an award. The number of firms to be recommended is solely at the discretion of the Committee.

[THIS SPACE IS INTENTIONALLY LEFT BLANK]

SECTION 4.0 – SCOPE OF WORK

4.1 **SCOPE OF WORK INTRODUCTION:** The scope of services & performance specifications listed are minimum requirements that meet the current business needs of SBBC's environment, and those that will provide new solutions in the future. By providing a proposal, Proposer agrees to comply with the minimum Scope of Services & Performance Specifications. Deviations to the Scope of Services must be fully stated in this section of your proposal, using a separate document using the same numbering scheme listed below to allow for accurate cross-referencing. Proposers are cautioned to read this section carefully and respond with full complete information that will assist the Evaluation Committee in evaluating proposal submitted. Complete the included Excel spreadsheet document **Attachment G (1) – SOW Checklist** to indicate your firms ability to meet the requirements of the scope of work. Include your completed Excel document as a .xls file in your flash drive and a printed copy of your original, hard-copy. If needed, Proposers should use additional documentation, taking care to label document according to the numbering scheme below to provide supplemental information, pictures, screen shots etc, but refrain from including promotional or advertising materials.

The technical specifications for specific services included in the RFP may be modified as needed by SBBC throughout the term of the contract as technology changes and SBBC's business and operational requirements shift. The Scope of Work and Performance Specifications listed below are mandatory requirements that Awardee is required to comply with in order to satisfy the terms and conditions of the RFP.

To be completed by **May 1, 2023** (SBBC may allow additional time, at their sole discretion), Awardee must provide rehosting solution by migrating SBBC's existing SAP systems from their current hosted environment to Awardee's hosted environment. SBBC seeks proposals from vendors having experience and qualifications in the area(s) identified in this solicitation. 6.3 **EVALUATION PROCESS:** The evaluation processes will be conducted in sequential steps as described below. Evaluation of proposals will be based on an average of the Committee Member's points (only for sections evaluated (scored) by the Committee).

Step 1: Minimum Eligibility: Each proposal will be evaluated by SBBC's Procurement & Warehouse Services Department to determine if the proposal meets the minimum eligibility requirements as listed above in Section 5.2 of this Bid. Proposals that fail to meet the minimum eligibility requirements as stated for the RFP will not be further evaluated nor be considered for award. The individual responsible for this portion of the evaluation is not a voting member of the RFP Evaluation Committee.

Step 2: RFP Evaluation Committee: This step evaluates the qualification, experience and the scope of work responses. The RFP Evaluation Committee will score the proposals on the basis of Proposer's Experience & Qualifications (Category A above) in accordance with Section 5.3.1 and Scope of Work in accordance with section 5.3.2 & 5.4.2. All required forms must be executed and submitted with your proposal in order to receive points. The individual responsible for this portion of the evaluation is not a voting member of the Committee.

Step 5: Score Computation: All scores will be calculated (Committee member scores will be averaged) and combined for a grand total.

6.4 **TIE SCORE:** If a tie score between two or more Proposers presents itself during the scoring of points, the decimal points to the right of the number will be extended until the tie is broken. Rounding of numbers will be applied where applicable. If the tie score cannot be broken and all other numerical factors are equal in point value then General Condition 8.55, Tie Bid Procedures shall apply.

6.5 **COMMITTEE QUESTIONS:** The Committee reserves the right to ask questions of a clarifying nature once proposals have been opened, require presentations from all Proposers, interview any or all Proposers that respond to the RFP, or make their recommendations based solely on the information contained in the proposals submitted. Each ranked responsive Proposer must be represented during its exempt negotiations session by an authorized representative possessing the authority to bind the Proposer to the changes made in their proposal. The Committee will recess the open public portion of the evaluation meeting and conduct the exempt negotiation session of the competitive selection process beginning with the highest-ranked responsive Proposer. In accordance with Section 286.0113(2), Florida Statutes, any negotiation session will be conducted to the exclusion of the other ranked responsive Proposers. The Committee may choose to conduct one (1) or more exempt negotiation session with a ranked responsive Proposer, the Committee shall reconvene the open public portion of the evaluation meeting and determine, by motion and a roll call vote, whether to recommend an award to one (1) or more ranked responsive Proposers; to declare an impasse with a ranked responsive Proposer; or to proceed with further negotiations with one (1) or more of the next highest-ranked responsive Proposers. The Committee may declare an impasse with a ranked responsive Proposer at any time; or to proceed with further negotiations with one or more of the next highest-ranked Proposer(s). If negotiations are not successful, the Committee reserves the right not to award a ranked Proposer if it is in the best interest to SBBC. The final scores are only a ranking of proposals for negotiation (i.e., the highest-ranked proposer will be the first to start the negotiations) and does not determine the actual award. The Committee determines the recommendation for award of the RFP.

6.7 **AWARD:** The number of proposer(s) to be recommended for an award is solely at the discretion of the Committee. These Proposer(s) must have complied with the terms, conditions, and specifications of the RFP. SBBC will not accept proposed terms and conditions that are different than those contained in this RFP, including pre-printed text contained on catalogs, price lists, other descriptive information submitted or any other materials. These orders will be made via phone or fax for direct delivery and billing to the requesting work location. Please note that credit card purchases will benefit all vendors by providing immediate payment (i.e., within 48-72 hours), thereby eliminating the need to submit an invoice to the District's Accounts Payable Department or reconcile receivable balances. For credit card purchases, all vendors must have the capability to accept fax orders, which must be confirmed by calling back the requesting work location to verify prices and obtain a credit card number. Only actual items shipped/delivered can be charged to the credit card account (i.e., no back-orders). All purchase deliveries must include a packing slip or receipt/invoice listing the items and prices of goods delivered. For security reasons, the credit card charge receipt showing the work location's credit card number cannot be attached to the packing slip or receipt/invoice submitted as part of the purchase delivery. Items delivered, not conforming to RFP conditions or specifications, may be rejected and returned at the vendor's expense. Any increase in cost may be charged against the Awardee. Any violation of these stipulations may also result in:

a) Cancellation and default of contract;

c) All departments being advised not to do business with vendor.

All communications regarding this solicitation shall be directed to the designated Purchasing Agent unless so notified by Procurement & Warehousing Services. This "Cone of Silence" period shall go into effect and shall remain in effect from the time of the release of the solicitation until the contract is awarded by the School Board. Further, any vendor, its principals, or their lobbyists shall not offer campaign contributions to School Board Members or offer contributions to School Board Members for campaigns of other candidates for political office during the period in which the vendor is attempting to sell goods or services to the School Board. This period of limitation of offering campaign contributions shall commence at the time of the "cone of silence" period for any solicitation for a competitive procurement as described by School Board Policy 3320, Part II, Section GG as well as School Board Policy 1007, Section 5.4 – Campaign Contribution Fundraising. **Any vendor or lobbyist who violates this provision shall cause their Proposal (or that of their principal) to be considered non-responsive and therefore be ineligible for award.**

SBBC reserves the right to reject any bid as non-responsive for failure to include all necessary documents or required Addenda. For information regarding the above-referenced solicitation, contact the designated Purchasing Agent, as stated herein.

8.53 PRICE REDUCTIONS: If, from the date of proposal opening, the Awardee either bids the same products and/or services at a lower price than offered to SBBC or reduces the price of the proposed product or service, the lowest of these reduced prices will be extended to SBBC.

8.54 LOBBYIST ACTIVITIES: In accordance with SBBC Policy 1100B, as currently enacted or as amended from time to time, persons acting as lobbyists must state, at the beginning of their presentation, letter, telephone call, e-mail or facsimile transmission to School Board Members, Superintendent or Members of Senior Management, the group, association, organization or business interest she/he is representing.

Awardee agrees that it may create, receive from or on behalf of the District, or have access to, records or record systems that are subject to FERPA and/or HIPAA (collectively, the "Confidential Records"). A breach of these confidentiality requirements shall constitute grounds for the District to terminate any Agreement with Awardee.

8.57 FORCE MAJEURE: Neither party shall be obligated to perform any duty, requirement or obligation under this Agreement if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and the issuance or extension of existing government orders of the United States, the State of Florida, or local county and municipal governing bodies, or by reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In the event that a vendor does not provide goods or services due to Force Majeure for a contract awarded through a competitive solicitation, SBBC reserves the right to avoid a disruption in the provision of such goods or services by purchasing them either from an alternate awardee or by obtaining pricing from at least two (2) prospective vendors.

8.60 CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY OR VOLUNTARY EXCLUSION – Lower Tier Covered Transactions: Executive Order 12549, as currently enacted or as amended from time to time, provides that, to the extent permitted by law, Executive departments and agencies shall participate in a government-wide system for non-procurement debarment and suspension. A person who is debarred or suspended shall be excluded from Federal financial and non-financial assistance and benefits under Federal programs and activities. Except as provided in § 85.200, Debarment or Suspension, § 85.201, Treatment of Title IV HEA participation, and § 85.215, Exception Provision, debarment or suspension of a participant in a program by one (1) agency shall have government-wide effect. A lower tier covered transaction is, in part, any transaction between a participant [SBBC] and a person other than a procurement contract for goods or services, regardless of type, under a primary covered transaction; and any procurement contract for goods or services between a participant and a person, regardless of type, expected to equal or exceed the Federal procurement small purchase threshold fixed at 10 U.S.C. 2304(g) and 41 U.S.C. 253(g) (currently $100,000) under a primary covered transaction; or any procurement contract for goods or services between a participant and a person under a covered transaction, regardless of amount, under which that person shall have a critical influence on or substantive control over that covered transaction. A participant may rely upon the certification of a prospective participant in a lower tier covered transaction that it and its principals are not debarred, suspended, proposed for debarment under 48 CFR part 9, subpart 9.4, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. Each participant shall require participants in lower tier covered transactions to include the certification for it and its principals in any bid submitted in connection with such lower tier covered transactions.

CERTIFICATION:

a) The prospective lower tier participant certifies, by submission of this RFP, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

b) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this bid.

Every time a proposal is submitted that includes a reference to this Form, a new Form is required. Any proposal that does not include this required Form shall not be evaluated and shall not be considered for award. **A signature is required on BOTH, the Debarment Form, AND the Required Response Form.** A signature on one document cannot be substituted for the signature required on the other document. **Failure to complete and sign both documents requiring signature shall result in rejection of the proposal submitted.**

8.61 PUBLIC INSPECTION OF PROPOSALS: Pursuant to Section 119.071 (1)(b), Florida Statutes, responses received as a result of this RFP shall be exempt from public inspection and copying until thirty (30) days after the opening of the proposals or until posting of the recommendation for intended award, whichever is earlier. If SBBC rejects all proposals and concurrently provides notice of its intent to reissue the competitive solicitation, the rejected proposals shall remain exempt from public inspection and copying until such time as SBBC posts notice of an intended decision concerning the reissued competitive solicitation or until SBBC withdraws the reissued competitive solicitation.

If a Proposer contends that any portion of its response to the RFP is confidential and exempt from public inspection and copying, it is the Proposer's responsibility to clearly label each such portion of its proposal as confidential and specify the applicable statutory exemption from public inspection and copying on such portion(s) of its proposal. Confidential or exempt portions of any proposal must also be submitted in a separate sealed envelope and marked as such. A failure by the Proposer to prepare and label the confidential or exempt portions of its proposal in the manner specified in this section of the RFP shall constitute a waiver by Proposer of any applicable exemptions from disclosure or any confidential status including ones that may be applicable to trade secrets under Florida law.

SBBC will promptly provide a Proposer's contact person with written notice if a public records request has been made for any portions of Proposer's response to the RFP. SBBC will provide for the inspection or copying any non-exempt portions of any proposal in its possession in accordance with applicable law. If a Proposer wishes to preclude the inspection or copying of any non-exempt portions of its response to the RFP or if a dispute exists as to whether such portions are entitled to an exemption, the Proposer must obtain a protective order from a court of competent jurisdiction prohibiting the inspection or copying of the requested materials. The failure to timely initiate such legal proceedings shall constitute a waiver by the Proposer of any applicable exemption or confidential status of the requested materials.

By submitting a response to this RFP, the Proposer agrees to waive any cause of action or claim for damages it may have against SBBC for its release of records in response to a public record other than those that are prepared and labeled as confidential or exempt as described in this section. The Proposer agrees to hold SBBC harmless from any award to a plaintiff for damages, costs or attorney's fees based upon SBBC's non-disclosure of portions of Proposer's response that have been prepared and labeled as confidential or exempt from public inspection and further agrees to reimburse SBBC for any attorney's fees and costs it may incur in the defense of such nondisclosure.

8.62 PUBLIC RECORDS: The following provisions are required by Section 119.0701, Florida Statutes, and may not be amended. Awardee(s) shall keep and maintain public records required by SBBC to perform the services required under this contract. Upon request from SBBC's custodian of public records, Awardee(s) shall provide SBBC with a copy of any requested public records or to allow the requested public records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law. Awardee(s) shall ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract's term and following completion of the contract if Awardee(s) does not transfer the public records to SBBC. Upon completion of the contract, Awardee(s) shall transfer, at no cost, to SBBC all public records in possession of Awardee(s) or keep and maintain public records required by SBBC to perform the services required under the contract. If Awardee(s) transfers all public records to SBBC upon completion of the contract, Awardee(s) shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. Termination pursuant to this section is not a breach of this RFP Agreement and may not be considered as such.

8.64 DEFAULT: The parties (SBBC and Awardee) agree that, if either party is in default of its obligations under this RFP, the non-defaulting party shall provide to the defaulting party (30) calendar days' written notice to cure the default. However, if said default cannot be cured within said thirty (30) calendar day period and the defaulting party is diligently attempting in good faith to cure same, the time period will be reasonably extended to allow the defaulting party additional cure time. Upon the occurrence of a default that is not cured during the applicable cure period, this RFP may be terminated by the non-defaulting party upon thirty (30) calendar days' notice. This remedy is not intended to be exclusive of any other remedy, and each and every such remedy is cumulative and in addition to every other remedy now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder precludes any other or future exercise thereof. 1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. Each participant may, but is not required to, check the Non-procurement List (Telephone Number).

2.16 **Nondiscrimination.**

(a) As a condition of entering into this Agreement, Insert Name represents and warrants that it will comply with the SBBC's Commercial Nondiscrimination Policy, as described under, Section D.1 of SBBC's Policy No. 3330 – Supplier Diversity Outreach Program.

(b) As part of such compliance, Insert Name shall not discriminate on the basis of race, color, religion, ancestry or national origin, sex, age, marital status, sexual orientation, or on the basis of disability or other unlawful forms of discrimination in the solicitation, selection, hiring, or commercial treatment of subcontractors, vendors, suppliers, or commercial customers, nor shall Insert Name retaliate against any person for reporting instances of such discrimination. Insert Name shall provide equal opportunity for subcontractors, vendors, and suppliers to participate in all of its public sector and private sector subcontracting and supply opportunities, provided that nothing contained in this clause shall prohibit or limit otherwise lawful efforts to remedy the effects of marketplace discrimination that have occurred or are occurring in the SBBC's relevant marketplace. Insert Name understands and agrees that a material violation of this clause is considered a material breach of this Agreement and may result in termination of this Agreement, disqualification of the company from participating in SBBC Agreements, or other sanctions. This clause is not enforceable by or for the benefit of, and creates no obligation to, any third-party.

2.17 **Certification Regarding Scrutinized Activities.** Section 287.135(2)(a), Florida Statutes, prohibits a company from bidding on, submitting a proposal for, or entering into or renewing an Agreement for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Florida Statutes, or is engaged in a boycott of Israel. Entering into this Agreement constitutes certification by Insert Name that it is not listed on any of the following: (a) the Scrutinized Companies that Boycott Israel List, (b) Scrutinized Companies with Activities in Sudan List, or (c) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Insert Name further certifies that it is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. Insert Name acknowledges that pursuant to Section 287.135, Florida Statutes, the submission of a false certification may subject it to civil penalties, attorney's fees, and/or costs. Insert Name further understands that any Agreement with SBBC for goods or services of any amount may be terminated at SBBC's option if Insert Name (a) is found to have submitted a false certification, (b) has been placed on the List of Scrutinized Companies that Boycott Israel, or (c) is engaged in a boycott of Israel. And, in addition to the foregoing, if the amount of the Agreement is one million dollars ($1,000,000) or more, the Agreement may be terminated at SBBC's option if Insert Name is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

2.18 **Annual Appropriation.** SBBC's performance and obligations under this Agreement is contingent upon an annual budgetary appropriation by its governing body. If SBBC does not allocate funds for the payment of services or products to be provided under this Agreement, this Agreement may be terminated by SBBC at the end of the period for which funds have been allocated. SBBC shall notify the other party at the earliest possible time before such termination. No penalty accrues to SBBC if this provision is exercised, and SBBC is not obligated or liable for any future payments due or any damages as a result of termination under this section.

2.19 **Excess Funds.** Any party receiving funds paid by SBBC under this Agreement agrees to promptly notify SBBC of any funds erroneously received from SBBC upon the discovery of such erroneous payment or overpayment. Any such excess funds shall be refunded to SBBC, together with any applicable statutory interest.

2.20 **Incorporation by Reference.** Exhibit[s] Insert appropriate Exhibit letters or numbers attached hereto and referenced herein are incorporated into this Agreement by reference.

2.21 **Proprietary Information.**

(a) Any documents or materials submitted to SBBC shall be open for inspection by any person in accordance with Section 119.07, Florida Statutes, except as otherwise exempted from disclosure by applicable law. A party contracting with SBBC must clearly mark, label, designate, or identify any portions of any documents or materials it provides to SBBC which are claimed to be confidential and exempt from public inspection, provided that the confidential or exempt portions of such documents or materials are clearly marked with specific citations of law that provide the asserted confidentiality or exemption. A contracting party's failure to identify any confidential or exempt portions of documents or materials or to specify the law establishing their confidential or exempt status is a waiver of confidential or exempt status for any such unidentified or unsupported portions of any documents or materials.

(b) If SBBC receives a public record request for documents or materials in its custody under this Agreement which have been properly marked as confidential or exempt, SBBC will notify the contracting party of the public records request. The notice shall state that the requested materials will be produced by SBBC to the requesting party within ten (10) calendar days of the date of the written notification, unless the contracting party has initiated an action at its sole cost and expense in a court of competent jurisdiction to preclude the release of the requested materials. The contracting party shall name the party requesting the documents or materials as a defendant and will not name SBBC as a party to the action, but will provide SBBC with notice of such proceedings. The contracting party agrees to indemnify SBBC for any costs, expenses, and attorney's fees SBBC may incur with regard to any legal proceedings and judgments that may arise from the request for the contracting party's public records that are subject to claims of confidential or exempt status. A failure to timely initiate the legal action required by this paragraph is a waiver of any claim that the requested information is confidential and exempt from public disclosure. The contracting party waives any cause of action against SBBC for the release of materials pursuant to a public records request except for any claims based upon the intentional or grossly negligent conduct of any employee of SBBC.

ARTICLE 3 – GENERAL CONDITIONS

3.01 **No Waiver of Sovereign Immunity.** Nothing herein is intended to serve as a waiver of sovereign immunity by any agency or political subdivision to which sovereign immunity may be applicable or of any rights or limits to liability existing under Section 768.28, Florida Statutes. This section survives the termination of all performance or obligations under this Agreement and is fully binding until such time as any proceeding brought on account of this Agreement is barred by any applicable statute of limitations.

3.02 **No Third-Party Beneficiaries.** The parties expressly acknowledge that it is not their intent to create or confer any rights or obligations under this Agreement in or upon any third person or entity. None of the parties intend to directly or substantially benefit a third-party by this Agreement. The parties agree that there are no third-party beneficiaries to this Agreement and that no third-

party is entitled to assert a claim against any of the parties based upon this Agreement. Nothing herein shall be construed as consent by an agency or political subdivision of the State of Florida to be sued by third parties in any matter arising out of any Agreement.

3.03 **Independent Contractor.** The parties to this Agreement are acting in the capacity of independent contractors and not as an officer, employee, or agent of one another. Neither party or its respective agents, employees, subcontractors, or assignees shall represent to others that it has the authority to bind the other party unless specifically authorized in writing to do so. No right to SBBC retirement, leave benefits, or any other benefits of SBBC employees exists as a result of the performance of any duties or responsibilities under this Agreement. However, if said default cannot be cured within said thirty (30) calendar day period and the defaulting party is diligently attempting in good faith to cure same, the time period will be reasonably extended to allow the defaulting party additional cure time. Upon the occurrence of a default that is not cured during the applicable cure period, this Agreement may be terminated by the non-defaulting party upon thirty (30) calendar days' notice. This remedy is not intended to be exclusive of any other remedy, and each and every such remedy is cumulative and in addition to every other remedy now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder precludes any other or future exercise thereof. Nothing in this section shall be construed to preclude termination for convenience pursuant to section 3.05.

3.05 **Termination.** This Agreement may be terminated with or without cause by SBBC during the term hereof upon thirty (30) calendar days' written notice to the other parties of its desire to terminate this Agreement. In the event of such termination, SBBC is entitled to a *pro rata* refund of any pre-paid amounts for any services scheduled to be delivered after the effective date of such termination. SBBC has no liability for any property left on SBBC's property by any party to this Agreement after the termination of this Agreement. Any party contracting with SBBC under this Agreement agrees that any of its property placed upon SBBC's facilities pursuant to this Agreement shall be removed within ten (10) business days following the termination, conclusion, or cancellation of this Agreement and that any such property remaining upon SBBC's facilities after that time shall be deemed to be abandoned, that title to such property shall pass to SBBC, and that SBBC may use or dispose of such property as SBBC deems fit and appropriate.

3.06 **Compliance with Laws.** Each party shall comply with all applicable federal, state and local laws, SBBC policies, codes, rules, and regulations in performing its duties, responsibilities, and obligations pursuant to this Agreement.

3.07 **Place of Performance.** All of SBBC's obligations under the terms of this Agreement are reasonably susceptible of being performed in Broward County, Florida and are payable and performable in Broward County, Florida.

3.08 **Governing Law and Venue.** This Agreement shall be interpreted and construed in accordance with and governed by the laws of the State of Florida. Any disputes, controversies, or legal problems arising out of this Agreement and any action involving the enforcement or interpretation of any rights hereunder shall be submitted exclusively to the jurisdiction of the State courts of the Seventeenth Judicial Circuit of Broward County, Florida or to the jurisdiction of the United States District Court for the Southern District of Florida. Each party agrees and admits that the state courts of the Seventeenth Judicial Circuit of Broward County, Florida or the United States District Court for the Southern District of Florida has jurisdiction over it for any dispute arising under this Agreement.

3.09 **Entirety of Agreement.** This document incorporates and includes all prior negotiations, correspondence, conversations, agreements, and understandings applicable to the matters contained herein and the parties agree that there are no commitments, agreements or understandings concerning the subject matter of this Agreement that are not contained in this document. Accordingly, the parties agree that no deviation from the terms hereof is predicated upon any prior representations or agreements, whether oral or written.

3.10 **Binding Effect.** This Agreement is binding upon and inures to the benefit of the parties hereto and their respective successors and assigns.

3.11 **Assignment.** Neither this Agreement nor any interest herein may be assigned, transferred, or encumbered by any party without the prior written consent of the other party. There shall be no partial assignment of interests under this Agreement including, without limitation, the partial assignment of any right to receive payments from SBBC.

3.12 **Captions.** The captions, section designations, section numbers, article numbers, titles, and headings appearing in this Agreement are inserted only as a matter of convenience, have no substantive meaning, and in no way define, limit, construe, or describe the scope or intent of such articles or sections of this Agreement, nor in any way affect this Agreement and shall not be construed to create a conflict with the provisions of this Agreement.

3.13 **Severability.** If any one or more of the sections, paragraphs, sentences, clauses, or provisions contained in this Agreement is held by a court of competent jurisdiction to be invalid, illegal, unlawful, unenforceable, or void in any respect, such does not affect the remaining portions of this Agreement and the same remain in full force and effect as if such invalid, illegal, unlawful, unenforceable, or void sections, paragraphs, sentences, clauses, or provisions had never been included.

The language agreed to herein expresses their mutual intent and the resulting document shall not, solely as a matter of judicial construction, be construed more severely against one of the parties than the other.

3.15 **Amendments.** No modification, amendment, or alteration in the terms or conditions contained herein is effective unless contained in a written document prepared with the same or similar formality as this Agreement and executed by each party hereto.

3.16 **Waiver.** The parties agree that each requirement, duty and obligation set forth herein is substantial and important to the formation of this Agreement and, therefore, is a material term hereof. Any party's failure to enforce any provision of this Agreement is not a waiver of such provision or modification of this Agreement unless the waiver is in writing and signed by the party waiving such provision. A written waiver is only effective as to the specific instance for which it is obtained and is not a continuing or future waiver.

3.17 **Force Majeure.** Neither party is obligated to perform any duty, requirement, or obligation under this Agreement if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and the issuance or extension of existing government orders of the United States, the State of Florida, or local county and municipal governing bodies, or by reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In no event shall a lack of funds on the part of either party be deemed Force Majeure.

3.18 **Rights and Remedies.** The duties and obligations imposed by this Agreement and the rights and remedies available thereunder are in addition to and not a limitation of any duties, obligations, rights and remedies otherwise imposed or available by law.

3.19 **Survival.** All representations and warranties made herein, indemnification obligations, obligations to reimburse SBBC, obligations to maintain and allow inspection and audit of records and property, obligations to maintain the confidentiality of records, reporting requirements, and obligations to return public funds survive the termination of this Agreement.

3.21 **Counterparts and Multiple Originals.** This Agreement may be executed in multiple originals, and may be executed in counterparts, each of which is an original, but all of which, taken together, shall constitute one and the same Agreement.

3.22 **Authority.** Each person signing this Agreement on behalf of either party individually warrants that he or she has full legal power to execute this Agreement on behalf of the party for whom he or she is signing, and to bind and obligate such party with respect to all provisions contained in this Agreement.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the Effective Date.

BID NAME: SAP Managed Hosting and BASIS Services

TO ALL BIDDERS:

Below are the responses to the questions received for the **RFP**.

QUESTIONS & ANSWERS

QUESTION #1: How much is the allotted budget for the contract resulting from this RFP?

ANSWER TO QUESTION #1: The budget for this bid/contract is not allocated yet.

QUESTION #2: Our firm received the RFP bid package on Demand Star and I had a quick question regarding the submittal process. When I am on Demand star and click on "required actions" there are no required actions. Are the proposals supposed to be electronically submitted, hand-delivered, or mailed? Please let me know how to proceed.

ANSWER TO QUESTION #2: The proposals need to be delivered by hand or by courier. Please, be aware of the deadline (November 3rd @ 2:00 PM) and the required originals and copies.

QUESTION #3: I had an opportunity to review the RFP documentation and I have a question. The question period ends on October 24th and the Proposals are due on November 3rd. This timeline allows SBBC to process and answer all questions in less than 9 business days. Will the BCPS team be responding to questions as you receive them? We want to ensure we can craft the most SBBC-appropriate response based on the questions & answers.

ANSWER TO QUESTION #3: Usually, the Request for Information (RFIs) or questions deadline is 10 calendar days before the bid opening and the Addendum with all responses is released at least 7 calendar days before the bid opening. We count calendar days, not business days. Yes, we will process and begin posting all responses as soon as they are received. We don't want to delay any response.

This concludes Addendum No. 01 for RFP FY23-050 – SAP Managed Hosting and BASIS Services
All other terms and conditions remain the same.

2.18 **Liability**. This section survives the termination of all performance or obligations under this Agreement and is fully binding until such time as any proceeding brought on account of this Agreement is barred by any applicable statute of limitations.

2.18.1 By SBBC. SBBC agrees to be fully responsible up to the limits of Section 768.28, Florida Statutes, for its acts of negligence, or its employees' acts of negligence when acting within the scope of their employment and agrees to be liable, up to the limits of Section 768.28, Florida Statutes, for any damages resulting from said negligence.

2.18.2 By LEMONGRASS. LEMONGRASS agrees to indemnify, hold harmless and defend SBBC and its officers and employees from any and all third party claims, actions and suits (collectively, "Third Party Claims") and any resulting judgments, costs and expenses (including, but not limited to, subject to Sections 2.18.6 and 2.18.7, reasonable attorney's fees, reasonable investigative and discovery costs and court costs incurred in enforcing this indemnity) from such Third Party Claims (collectively, "Losses"), that SBBC and its officers and employees may incur or become obligated to pay which arise from Third Party Claims alleging or arising from: (i) LEMONGRASS' gross negligence or willful misconduct; (ii) tangible property damage or bodily injury, including death, caused by LEMONGRASS negligence; (iii) breach of the Agreement by LEMONGRASS; and (iv) Third Party Claim that the Services or deliverables provided by LEMONGRASS infringe any copyright, trademark or patent or misappropriates any trade secret.

2.18.3 Intellectual Property. If the Services or deliverables are subject to a Third Party Claim of infringement or misappropriation, or if LEMONGRASS reasonably believes that the Services or deliverables may be subject to such a claim, LEMONGRASS shall: (i) replace the Services or deliverables with functional non-infringing equivalent; (ii) modify such Services or deliverables while retaining substantively equivalent functionality; or (iii) procure at no cost to Customer the right to continue to use such Services or deliverables. If, however, LEMONGRASS determines that none of the foregoing alternatives is commercially reasonable, LEMONGRASS may terminate SBBC's rights to the Services or deliverables and LEMONGRASS shall in addition to the indemnification hereunder refund to SBBC the fees paid for such

Services or deliverables. LEMONGRASS shall have no liability for any Third Party Claim of infringement or misappropriation and no obligation to defend and indemnify SBBC for any Third Party Claim to the extent that it results from: (i) modifications to the Services or deliverables by anyone other than LEMONGRASS or at LEMONGRASS' direction; (ii) combination of the Services or deliverables with SBBC's equipment or non-LEMONGRASS program or equipment; or (iii) Services performed or deliverables developed at the direction of SBBC, where SBBC specifies the means, manner or method of performing the Services or developing the deliverables and to the extent LEMONGRASS did not exercise its independent judgment and discretion in performing the Services or developing the deliverables

2.18.4 Breach of Confidentiality of Education and/or Employee Records**.** To the extent that LEMONGRASS, its officers, employees, agents, representatives, contractors, or subcontractors either intentionally or negligently violate the provisions of Sections 2.06, 2.07, or 2.08 of the Agreement, or Sections 1002.22, 1002.221, and 1002.222, Florida Statutes; the Family Educational Rights and Privacy Act, 20 U.S.C. § 1232g (FERPA) and its implementing regulations (34 C.F.R. Part 99), and any other state or federal law or regulation regarding the confidentiality of student information and records, LEMONGRASS shall, for itself, its officers, employees, agents, representatives, contractors, or subcontractors, fully indemnify and hold harmless SBBC and its officers and employees for any Third Party Claim alleging a violation of this section, including, without limitation, defending SBBC and its officers and employees against any complaint, administrative or judicial proceeding, payment of any penalty imposed upon SBBC, or payment of any and all costs, damages, judgments, or losses incurred by or imposed upon SBBC arising out of a breach of this covenant by LEMONGRASS, or an officer, employee, agent, representative, contractor, or sub-contractor of LEMONGRASS.

2.18.5 Mutual Limitation of Liability. Other than the fees paid by SBBC to LEMONGRASS hereunder, in no event shall either party be liable to the other party for indirect, incidental, special, consequential, or punitive damages, whether foreseeable or unforeseeable, of any kind whatsoever (including loss of business opportunities and/or lost revenues) arising from or relating to this Agreement or the use or non-use of the products and services, whether as a consequence of the termination or breach of the Agreement,

negligence, or otherwise. This Section shall not apply to either party's indemnification obligations under this Agreement, or to the extent prevented or restricted by mandatory applicable law (including without limitation in relation to fraud), that cannot be amended or excluded by contractual waiver, and, subject to the limitations set forth in Section 768.28, Florida Statutes, or any applicable statute of limitations.

2.18.6 Defense. When reasonably practicable, SBBC shall promptly notify LEMONGRASS in writing of any Third Party Claim. SBBC's omission to notify LEMONGRASS of a Third Party Claim shall not relieve LEMONGRASS of its obligations hereunder except to the extent that LEMONGRASS shall have been prejudiced by such failure. Upon receipt of such notice from SBBC, LEMONGRASS shall defend SBBC with counsel satisfactory to SBBC. SBBC shall reasonably cooperate with LEMONGRASS, upon LEMONGRASS' request and cost, to defend such Third Party Claim. SBBC may elect at any time to participate in the defense of any Third Party Claim with counsel of its choosing at its own expense.

2.18.7 SBBC's Consent to Settlement of Third Party Claim. LEMONGRASS shall not, without the prior written consent of SBBC: (i) agree to the settlement, compromise or discharge of such Third Party Claim unless, by its terms, such settlement, compromise or discharge actually, fully and finally discharges the SBBC from the full amount of liability in connection with such Third Party Claim; nor (ii) agree to the entry of any judgment or enter into any settlement that: (1) provides for injunctive or other non-monetary relief adversely affecting SBBC party, or (2) does not include as an unconditional term thereof the giving of a release for all liability with respect to such claim by each claimant or plaintiff to SBBC that is the subject of such Third Party Claim.

2.18.8 Exclusion from Security Incident**.** Notwithstanding anything to the contrary set out in this First Amendment, LEMONGRASS shall not be responsible under this First Amendment for, including any obligations to indemnify SBBC and its employees, (and its obligations shall not arise from), any IT Security Breach or any breach or disclosure of educational and/or employee records or other confidential information under this Agreement (collectively, a "Security Incident"), arising from unauthorized use of, access to or disclosure from SBBC owned and/or maintained systems, including but not limited to SBBC's environment or network, and to

SECTION 3.0 – INTRODUCTION AND GENERAL INFORMATION

3.1 **INTRODUCTION:** The School Board of Broward County, Florida (hereinafter referred to as "SBBC" or "District"), desires to receive proposals from qualified proposers for SAP rehosting solution, for SAP certified managed hosting, migration services from the existing cloud platform, and certified SAP BASIS services to support the District's SAP Enterprise Resource Planning System (ERP), SAP Business Suite on HANA along with SAP-supported third-party add-on software and other enterprise software as used and/or selected by SBBC. See Section 8 of this RFP for Scope of Work and Performance Specifications. In addition, SBBC desires the Awardee to become a strategic partner that not only provides the prescribed services but can also assist in optimizing, modernizing, and expanding the systems in the future.

SBBC is the sixth-largest school district in the United States and second-largest in Florida. SBBC provides Pre-K through 12th grade education for residences of Broward County, Florida. For the 2020-2021 school year, SBBC has a student population of over 260,000 students, including both traditional and charter school students. There are 234 traditional and 92 charter schools in the District. SBBC serves a diverse population of students from 177 countries, speaking 151 languages. Broward County is in the greater Fort Lauderdale area with a population of over 1.8 million. For more information on SBBC, visit: http://browardschools.com.

The School Board of Broward County, Florida, Supplier Diversity Outreach Program, works to increase the participation of Small, Minority, and Women Business Enterprises (S/M/WBE). It is the intent of the Supplier Diversity Outreach Program to have a diverse group, as well as an equitable distribution of S/M/WBE's participating on any award of this Proposal. To be considered for the greatest amount of evaluation points for S/M/WBE participation, the Proposer must provide significant information on the specific certified S/M/WBE vendor(s) that will be used on any contract award for services described in this RFP. The Proposer should include the specific elements of work each S/M/WBE vendor(s) will be responsible for performing, the dollar value of the work, and the percentage of the total contract value. For a list of certified S/M/WBE's, refer to **Attachment A.**

3.2 **QUESTIONS & INTERPRETATIONS:** Any questions concerning any portion of this RFP must be submitted, in writing, to Luis E. Perez Procurement & Warehousing Services, via e-mail to luis.perez@browardschools.com Any questions which require a response which amends the RFP document in any manner will be answered via Addendum by the Procurement & Warehousing Services Department and provided to all Proposers. No information given in any other manner will be binding on SBBC.

Any questions concerning any condition or requirement of this RFP must be received in the Procurement & Warehousing Services Department, in writing, **on or before 5:00 p.m. ET** of the date listed in Section 2.0 Calendar. Questions received after this date and time may not be answered. Submit all questions to the attention of the individual stated above. If necessary, an Addendum will be issued. Any verbal or written information, which is obtained other than by information in this RFP document or by Addenda, shall not be binding on SBBC.

3.3 **CONTRACT TERM:** The purpose of this RFP is to establish a contract with an initial three (3) year term (not inclusive of implementation, migration, training etc. time, which will vary depending on the vendor recommended for award's proposal) commencing on approval by the School Board. Time needed for implementation, migration, training etc. will be in addition to the three (3) years so that the time period for the solution to be **"live"** is three (3) full years. The term of the contract may, by mutual agreement between SBBC and the Awardee, be extended for three additional one-year periods and, if needed, 180 days beyond the expiration date of the renewal period. Procurement & Warehousing Services Department, will, if considering renewing, request a letter of intent to renew from each Awardee, before the end of the current contract period. The Awardee will be notified when the recommendation has been acted upon by the School Board.

3.4 **PRICE ADJUSTMENTS:** Prices offered shall remain firm through the **first three (3) years of the contract** (subject to exceptions approved by the Director of Procurement, as stated in 3.5.1). A request for a price adjustment, with proper documentation justifying the adjustment, may be submitted, in writing, 30 days before the third-anniversary date of the contract. Price adjustment requests shall be evaluated on an annual basis thereafter. Unit price adjustments must have written

approval from SBBC before invoicing. Any unit price adjustment invoiced without written approval from SBBC shall not be paid, and the invoice returned to the Awardee for correction.

3.4.1 The Director, Procurement & Warehousing Services, may, in the Director's sole discretion on behalf of the SBBC, equitably adjust pricing if the pricing or availability of supplies is adversely affected by extreme and unforeseen volatility in the marketplace. Consideration for any pricing adjustment shall require vendor to provide irrefutable evidence that ALL the following circumstances exist:

a. The volatility is due to causes wholly beyond the vendor's control; and
b. The volatility affects the marketplace or industry, not just the vendor's source of supply; and

Note: Any pricing adjustment must be confirmed in writing by the Director of Purchasing

3.5 **SUBMITTAL OF PROPOSAL:** Submit proposals in accordance with Section 5.0. Proposals should be organized and shall include the necessary information to be in full compliance with this Section. To facilitate the proposal evaluation process, special attention should be paid to organizing proposals in a manner consistent with Section 5.0. SBBC reserves the right to reject and not consider any proposal that is not submitted in accordance with Section 5.0, or that does not include any necessary information.

3.6 **EVALUATION & AWARD:** All proposals received must meet the Minimum Eligibility Requirements as stated in Section 4.1 of the RFP, to be further considered for evaluation. Failure to meet the Minimum Eligibility Requirements shall result in disqualification of the entire proposal and shall not be considered for further evaluation. Those proposals which meet the minimum requirements shall be further evaluated and scored by an Evaluation Committee. **General Condition 8.1, Liability, is NOT subject to negotiation and any proposal that fails to accept these conditions will be rejected as "non-responsive".**

All responsive proposals will be evaluated by the Evaluation Committee (hereinafter referred to as "Committee") based upon the information submitted by Proposers in response to Section 4.0 and 5.0. Based upon the evaluation of proposals, the Committee will recommend Proposer(s) to SBBC for an award. The number of firms to be recommended is solely at the discretion of the Committee.

Notices of protest, formal written protests, and the bonds required by SBBC Policy 3320, shall be filed at the office of the Director, Procurement & Warehousing Services, 7720 West Oakland Park Boulevard, Suite 323, Sunrise, Florida 33351-6704 (fax 754-321-0936). Fax filing will not be acceptable for the filing of bonds.

8.41 POSTING OF BID RECOMMENDATIONS/TABULATIONS: RFP Recommendations and Tabulations will be posted in Procurement and Warehousing Services and on www.demandstar.com on **November 22, 2022 (tentative) @ 5:00 PM** and will remain posted for 72 hours. Any change to the date and time established herein for the posting of RFP Recommendations/Tabulations shall be posted in Procurement & Warehousing Services and/or at www.demandstar.com (under the document section for this RFP). In the event the date and time of the posting of RFP Recommendations/Tabulations are changed, it is the responsibility of each Proposer to ascertain the revised date of the posting of RFP Recommendations/Tabulations. Any person desiring to protest the intended decision shall file a notice of protest, in writing, within 72 hours after the posting of the RFP tabulation and shall file a formal written protest within ten (10) calendar days after the date the notice of protest was filed. Saturdays, Sundays, state holidays and days during which the school district administration is closed shall be excluded in the computation of the 72 hours. If the tenth calendar day falls on a Saturday, Sunday, state holiday or day during which the school district administration is closed, the formal written protest must be received on or before 5:00 p.m. ET of the next calendar day that is not a Saturday or Sunday, state holiday or days during which the school district administration is closed. No submissions made after the Bid opening amending or supplementing the Bid shall be considered. Section 120.57(3)(b), Florida Statutes, as currently enacted or as amended from time to time, states that **"The formal written protest shall state with particularity the facts and law upon which the protest is based".** Any person who files an action protesting an intended decision shall post with SBBC, **at the time of filing the formal written protest,** a bond, payable to SBBC, in an amount equal to one percent (1%) of SBBC's estimate of the total volume of the contract. SBBC shall provide the estimated contract amount to the Proposer within 72 hours, excluding Saturdays, Sundays and other days during which SBBC administration is closed, of receipt of notice of intent to protest. The estimated contract amount is not subject to protest pursuant to Section 120.57(3), Florida Statutes. The bond shall be conditioned upon the payment of all costs which may be adjudged against the protestant in an Administrative Hearing in which the action is brought and in any subsequent appellate court proceeding. In lieu of a bond, SBBC may accept a cashier's check, official bank check or money order in the amount of the bond.

If, after completion of the Administrative Hearing process and any appellate court proceedings, SBBC prevails, SBBC shall recover all costs and charges which shall be included in the Final Order or judgment, including charges made by the Division of Administrative Hearings, but excluding attorney's fees. Upon payment of such costs and charges by the protestant, the bond shall be returned. If the protestant prevails, then the protestant shall recover from the School Board all costs and charges which shall be included in the Final Order or judgment, excluding attorney's fees. **All documentation necessary for the protest proceedings will be provided electronically by SBBC.**

Failure to file a notice of protest or to file a formal written protest within the time prescribed by Section 120.57(3), Florida Statutes, or a failure to post the bond or other security required by SBBC Policy 3320 within the time allowed for filing a bond, shall constitute a waiver of proceedings. The failure to post the bond required by SBBC Policy 3320, Part VIII, as currently enacted or as amended from time to time, shall constitute a waiver of proceedings. Notices of protests, formal written protests, and the bonds required by Policy 3320, shall be filed at the office of the Director, Procurement and Warehousing Services, 7720 West Oakland Park Boulevard, Suite 323, Sunrise, Florida 33351-6704 (fax 754-321-0936). Fax filing will not be acceptable for the filing of bonds.

8.42 AUDIT AND INSPECTION OF AWARDEE'S DOCUMENTS AND RECORDS: The District or its representative reserves the right to inspect and/or audit all the Awardee's documents and records as they pertain to the products and services delivered under this Agreement. Such rights will be exercised with notice to the Awardee to determine compliance with and performance of the terms, conditions, and specifications on all matters, rights and duties, and obligations established by this Agreement. Documents/records in any form shall be open to the District or State's representative and may include but are not limited to all correspondence, ordering, payment, inspection, and receiving records, contracts or sub-contracts that directly or indirectly pertain to the transactions between the District and the Awardee(s). (Section 7.0))

8.43 CREDIT CARDS: Individual schools and departments may place some orders and utilize, as the form of payment, a District-issued credit card to the extent authorized by the School Board. These orders will be made via phone or fax for direct delivery and billing to the requesting work location. Please note that credit card purchases will benefit all vendors by providing immediate payment (i.e., within 48-72 hours), thereby eliminating the need to submit an invoice to the District's Accounts Payable Department or reconcile receivable balances. For credit card purchases, all vendors must have the capability to accept fax orders, which must be confirmed by calling back the requesting work location to verify prices and obtain a credit card number. Only actual items shipped/delivered can be charged to the credit card account (i.e., no back-orders). All purchase deliveries must include a packing slip or receipt/invoice listing the items and prices of goods delivered. For security reasons, the credit card charge receipt showing the work location's credit card number cannot be attached to the packing slip or receipt/invoice submitted as part of the purchase delivery. District work locations may request that a vendor maintains secure records of the credit card account assigned an alias or password, to avoid divulging the actual credit card number upon every purchase.

8.44 NONCONFORMANCE TO CONTRACT CONDITIONS: Items or services offered may be tested for compliance with RFP conditions and specifications at any time. Items delivered, not conforming to RFP conditions or specifications, may be rejected and returned at the vendor's expense. Services not conforming to RFP specifications shall be corrected and performed again to meet the specifications of the RFP at the expense of the Awardee. Goods or services not delivered as per delivery date in RFP and/or Purchase Order may be rejected upon delivery and/or maybe purchased on the open market. Any increase in cost may be charged against the Awardee. Any violation of these stipulations may also result in:

a) Cancellation and default of contract;
b) For a period of two (2) years, any proposal submitted by vendor will not be considered and will not be recommended for award.
c) All departments being advised not to do business with vendor.

8.45 CONE OF SILENCE: Any proposer, or lobbyist for a proposer, is prohibited from having any communications (except as provided in this rule) concerning any solicitation for a competitive procurement with any School Board member, the Superintendent, any Evaluation Committee Member, or any other School District employee after Procurement and Warehousing Services releases a solicitation to the General Public. All communications regarding this solicitation shall be directed to the designated Purchasing Agent unless so notified by Procurement & Warehousing Services. This "Cone of Silence" period shall go into effect and shall remain in effect from the time of the release of the solicitation until the contract is awarded by the School Board. Further, any vendor, its principals, or their lobbyists shall not offer campaign contributions to School Board Members or offer contributions to School Board Members for campaigns of other candidates for political office during the period in which the vendor is attempting to sell goods or services to the School Board. This period of limitation of offering campaign contributions shall commence at the time of the "cone of silence" period for any solicitation for a competitive procurement as described by School Board Policy 3320, Part II, Section GG as well as School Board Policy 1007, Section 5.4 – Campaign Contribution Fundraising. **Any vendor or lobbyist who violates this provision shall cause their Proposal (or that of their principal) to be considered non-responsive and therefore be ineligible for award.**

8.46 TERMINATION: This contract award may be terminated with or without cause by SBBC during the term hereof upon giving the other party thirty (30) days written notice that The School Board is terminating the contract award

8.47 PACKING SLIPS: It will be the responsibility of the Awardee to attach all packing slips to the OUTSIDE of each shipment. The packing slip must reference the SBBC Purchase Order number/control number. Failure to provide a packing slip attached to the outside of shipment will result in refusal of shipment at the vendor's expense.

8.48 USE OF OTHER CONTRACTS: SBBC reserves the right to utilize any other SBBC contract, any State of Florida Contract, any contract awarded by any other city or county governmental agencies, other school boards, other community college/state university system cooperative bid agreement, or to directly negotiate/purchase per School Board policy and/or State Board Rule 6A-1.012, as currently enacted or as amended from time to time, in lieu of any offer received or award made as a result of this bid if it is in its best interest to do so.

8.49 PURCHASE BY OTHER PUBLIC AGENCIES: With the consent and agreement of the awarded contractor(s), purchases may be made under this RFP by other agencies. Such purchases shall be governed by the same terms and conditions as stated herein.

8.50 PUBLIC ENTITY CRIMES: Section 287.133(2)(a), Florida Statutes, as currently enacted or as amended from time to time, states that a person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a proposal on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017 for CATEGORY TWO [currently $25,000] for a period of 36 months from the date of being placed on the convicted vendor list.

8.51 SEVERABILITY: In case of any one (1) or more of the provisions contained in this RFP shall be for any reason be held to be invalid, illegal, unlawful, unenforceable or void in any respect, the invalidity, illegality, unenforceability or unlawful or void nature of that provision shall not affect any other provision, and this RFP shall be considered as if such invalid, unlawful, unenforceable or void provision had never been included herein.

8.52 DISTRIBUTION: DemandStar by Onvia, www.demandstar.com , is the official method approved by Procurement & Warehousing Services for the distribution of all competitive solicitations including ITBs and RFPs. It is the responsibility of all interested parties to ensure they have received all necessary documents, including Addenda and have included all necessary information within their response. SBBC is not responsible for Proposer's failure to obtain complete bidding documents from DemandStar. SBBC reserves the right to reject any bid as non-responsive for failure to include all necessary documents or required Addenda. For information regarding the above-referenced solicitation, contact the designated Purchasing Agent, as stated herein.

8.53 PRICE REDUCTIONS: If, from the date of proposal opening, the Awardee either bids the same products and/or services at a lower price than offered to SBBC or reduces the price of the proposed product or service, the lowest of these reduced prices will be extended to SBBC.

8.54 LOBBYIST ACTIVITIES: In accordance with SBBC Policy 1100B, as currently enacted or as amended from time to time, persons acting as lobbyists must state, at the beginning of their presentation, letter, telephone call, e-mail or facsimile transmission to School Board Members, Superintendent or Members of Senior Management, the group, association, organization or business interest she/he is representing.

a) A lobbyist is defined as a person who, for immediate or subsequent compensation (e.g., monetary profit/personal gain) represents a public or private group, association, organization or business interest and engages in efforts to influence School Board Members on matters within their official jurisdiction.
b) A lobbyist is not considered a person representing school-affiliated groups (e.g., PTA, DAC, Band Booster Associations, etc.) nor a public official acting in her/his official capacity.
c) Lobbyists shall annually (July 1) disclose in each instance and for each client prior to any lobbying activities, their identity and activities by completing the lobbyist statement form which can be obtained from Official School Board Records, School Board Member's Offices or the Superintendent's Office and will be recorded on the School Board of Broward County's website, www.browardschools.com.
d) The lobbyist must disclose any direct business association with any current elected or appointed official or employee of SBBC or any immediate family member of such elected or appointed official or employee of SBBC.
e) Senior-level employees (Pay Grade 30 and above) and/or School Board Members are prohibited from lobbying activities for one (1) year after resignation or retirement or expiration of their term of office.

8.55 TIE BID PROCEDURES: When identical points are received from two (2) or more vendors and all other factors are equal in point value, priority for an award shall be given to vendors in the following sequence:

a) A business that certifies that it has implemented a drug-free workplace program shall be given preference in accordance with the provisions of Chapter 287.087, Florida Statutes, as currently enacted or as amended from time to time;
b) The Broward County Certified Minority/Women Business Enterprise vendor;
c) The Palm Beach County or Miami-Dade County Certified Minority/Women Business Enterprise vendor;
d) The Florida Certified Minority/Women Business Enterprise vendor;
e) The Broward County vendor, other than a Minority/Women Business Enterprise vendor;
f) The Palm Beach County or Miami-Dade County vendor, other than a Minority/Women Business Enterprise vendor;
g) The Florida vendor, whose main office is in the State of Florida, other than a Minority/Women Business Enterprise vendor.
h) If the application of the above criteria does not indicate a priority for an award, the award will be decided by a coin toss. The coin toss shall be held publicly in Procurement & Warehousing Services, the tie low bid vendors invited to be present as witnesses.

Included as a part of the RFP documents is a Form entitled **SWORN STATEMENT PURSUANT TO CHAPTER 287.087, FLORIDA STATUTES, AS CURRENTLY ENACTED OR AS AMENDED FROM TIME TO TIME, ON PREFERENCE TO BUSINESSES WITH DRUG-FREE WORKPLACE PROGRAMS.** This form will be used by the Proposer to certify that it has implemented a drug-free workplace program.

8.56 CONFIDENTIAL RECORDS: The Awardee acknowledges that certain information about the District's students is contained in records created, maintained or accessed by the Awardee and that this information is confidential and protected by the Family Educational Rights and Privacy Act of 1974 (FERPA) (20 U.S. C. 1232g), and/or the Health Insurance Portability and Accountability Act (HIPAA) (45 CFR parts 160-164) and related District policies, as amended from time to time, currently available at www.browardschools.com. The confidential information cannot be disclosed unless valid consent is obtained from the students or their legal guardians. Both parties agree to protect these records in compliance with FERPA, HIPAA, and the District's policy. To the extent permitted by law, nothing contained herein shall be construed as precluding either party from releasing such information to the other so that each can perform its respective responsibilities.

Awardee agrees that it may create, receive from or on behalf of the District, or have access to, records or record systems that are subject to FERPA and/or HIPAA (collectively, the "Confidential Records"). Awardee represents, warrants, and agrees that it will: (1) hold the Confidential Records in strict confidence and will not use or disclose the Confidential Records except as (a) permitted or required by this Agreement, (b) required by law, or (c) otherwise authorized by the District in writing; (2) safeguard the Confidential Records according to commercially reasonable administrative, physical and technical standards as required by law; and (3) continually monitor its operations and take any and all action necessary to assure that the Confidential Records are safeguarded in accordance with the terms of this Agreement. At the request of the District, Awardee agrees to provide the District with a written summary of the procedures Awardee uses to safeguard the Confidential Records. A breach of these confidentiality requirements shall constitute grounds for the District to terminate any Agreement with Awardee.

8.57 FORCE MAJEURE: Neither party shall be obligated to perform any duty, requirement or obligation under this Agreement if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and the issuance or extension of existing government orders of the United States, the State of Florida, or local county and municipal governing bodies, or by reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In no event shall lack of funds on the part of either party be deemed Force Majeure. In the event that a vendor does not provide goods or services due to Force Majeure for a contract awarded through a competitive solicitation, SBBC reserves the right to avoid a disruption in the provision of such goods or services by purchasing them either from an alternate awardee or by obtaining pricing from at least two (2) prospective vendors.

8.58 GRATUITIES: Proposer(s) shall not offer any gratuities, favors, or anything of monetary value to any official, employee, or agent of SBBC; including any School Board Member, Superintendent of Schools and any Evaluation Committee Members, for the purpose of influencing consideration of their Proposal.

8.59 PREPARATION AND COST OF PROPOSAL: Proposer is solely responsible for any and all costs associated with responding to this RFP. SBBC will not reimburse any Proposer for any costs associated with the preparation and submittal of any Proposal, or for any travel and per diem costs that are incurred by any Proposer

8.60 CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY OR VOLUNTARY EXCLUSION – Lower Tier Covered Transactions: Executive Order 12549, as currently enacted or as amended from time to time, provides that, to the extent permitted by law, Executive departments and agencies shall participate in a government-wide system for non-procurement debarment and suspension. A person who is debarred or suspended shall be excluded from Federal financial and non-financial assistance and benefits under Federal programs and activities. Except as provided in § 85.200, Debarment or Suspension, § 85.201, Treatment of Title IV HEA participation, and § 85.215, Exception Provision, debarment or suspension of a participant in a program by one (1) agency shall have government-wide effect. A lower tier covered transaction is, in part, any transaction between a participant [SBBC] and a person other than a procurement contract for goods or services, regardless of type, under a primary covered transaction; and any procurement contract for goods or services between a participant and a person, regardless of type, expected to equal or exceed the Federal procurement small purchase threshold fixed at 10 U.S.C. 2304(g) and 41 U.S.C. 253(g) (currently $100,000) under a primary covered transaction; or any procurement contract for goods or services between a participant and a person under a covered transaction, regardless of amount, under which that person shall have a critical influence on or substantive control over that covered transaction. A participant may rely upon the certification of a prospective participant in a lower tier covered transaction that it and its principals are not debarred, suspended, proposed for debarment under 48 CFR part 9, subpart 9.4, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. Each participant shall require participants in lower tier covered transactions to include the certification for it and its principals in any bid submitted in connection with such lower tier covered transactions.

CERTIFICATION:

a) The prospective lower tier participant certifies, by submission of this RFP, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

b) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this bid.

Every time a proposal is submitted that includes a reference to this Form, a new Form is required. Any proposal that does not include this required Form shall not be evaluated and shall not be considered for award. **A signature is required on BOTH, the Debarment Form, AND the Required Response Form.** A signature on one document cannot be substituted for the signature required on the other document. **Failure to complete and sign both documents requiring signature shall result in rejection of the proposal submitted.**

8.61 PUBLIC INSPECTION OF PROPOSALS: Pursuant to Section 119.071 (1)(b), Florida Statutes, responses received as a result of this RFP shall be exempt from public inspection and copying until thirty (30) days after the opening of the proposals or until posting of the recommendation for intended award, whichever is earlier. If SBBC rejects all proposals and concurrently provides notice of its intent to reissue the competitive solicitation, the rejected proposals shall remain exempt from public inspection and copying until such time as SBBC posts notice of an intended decision concerning the reissued competitive solicitation or until SBBC withdraws the reissued competitive solicitation.

If a Proposer contends that any portion of its response to the RFP is confidential and exempt from public inspection and copying, it is the Proposer's responsibility to clearly label each such portion of its proposal as confidential and specify the applicable statutory exemption from public inspection and copying on such portion(s) of its proposal. Confidential or exempt portions of any proposal must also be submitted in a separate sealed envelope and marked as such. A failure by the Proposer to prepare and label the confidential or exempt portions of its proposal in the manner specified in this section of the RFP shall constitute a waiver by Proposer of any applicable exemptions from disclosure or any confidential status including ones that may be applicable to trade secrets under Florida law.

SBBC will promptly provide a Proposer's contact person with written notice if a public records request has been made for any portions of Proposer's response to the RFP. SBBC will provide for the inspection or copying any non-exempt portions of any proposal in its possession in accordance with applicable law. If a Proposer wishes to preclude the inspection or copying of any non-exempt portions of its response to the RFP or if a dispute exists as to whether such portions are entitled to an exemption, the Proposer must obtain a protective order from a court of competent jurisdiction prohibiting the inspection or copying of the requested materials. The failure to timely initiate such legal proceedings shall constitute a waiver by the Proposer of any applicable exemption or confidential status of the requested materials.

By submitting a response to this RFP, the Proposer agrees to waive any cause of action or claim for damages it may have against SBBC for its release of records in response to a public record other than those that are prepared and labeled as confidential or exempt as described in this section. The Proposer agrees to hold SBBC harmless from any award to a plaintiff for damages, costs or attorney's fees based upon SBBC's non-disclosure of portions of Proposer's response that have been prepared and labeled as confidential or exempt from public inspection and further agrees to reimburse SBBC for any attorney's fees and costs it may incur in the defense of such nondisclosure.

8.62 PUBLIC RECORDS: The following provisions are required by Section 119.0701, Florida Statutes, and may not be amended. Awardee(s) shall keep and maintain public records required by SBBC to perform the services required under this contract. Upon request from SBBC's custodian of public records, Awardee(s) shall provide SBBC with a copy of any requested public records or to allow the requested public records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law. Awardee(s) shall ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract's term and following completion of the contract if Awardee(s) does not transfer the public records to SBBC. Upon completion of the contract, Awardee(s) shall transfer, at no cost, to SBBC all public records in possession of Awardee(s) or keep and maintain public records required by SBBC to perform the services required under the contract. If Awardee(s) transfers all public records to SBBC upon completion of the contract, Awardee(s) shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If Awardee(s) keeps and maintains public records upon completion of the contract, Awardee(s) shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to SBBC, upon request from SBBC's custodian of public records, in a format that is compatible with SBBC's information technology systems.

IF A PARTY TO THIS RFP HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO ITS DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THE RFP, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 754-321-1900, RECORDREQUESTS@BROWARDSCHOOLS.COM, RISK MANAGEMENT DEPARTMENT, PUBLIC RECORDS DIVISION, 600 SOUTHEAST THIRD AVENUE, FORT LAUDERDALE, FLORIDA 33301.

8.63 E-VERIFY: Pursuant to Section 448.095, Florida Statutes, any party contracting with SBBC shall register with and use the E-Verify system to verify the work authorization for all employees hired during the course of this RFP Agreement. Any such party shall require any subcontractors used to perform the duties and responsibilities under this RFP Agreement to register with and use the E-Verify system to verify the work authorization for all employees subcontractor hires during the course of this RFP Agreement. If applicable, any such party must also obtain and retain an affidavit from a subcontractor stating that the subcontractor does not employ, contract with or subcontract with anyone who is not duly authorized to work in the United States. If SBBC has a good faith belief that any such party has knowingly violated Section 448.09(1), Florida Statutes, SBBC will immediately terminate the RFP Agreement. Termination pursuant to this section is not a breach of this RFP Agreement and may not be considered as such.

8.64 DEFAULT: The parties (SBBC and Awardee) agree that, if either party is in default of its obligations under this RFP, the non-defaulting party shall provide to the defaulting party (30) calendar days' written notice to cure the default. However, if said default cannot be cured within said thirty (30) calendar day period and the defaulting party is diligently attempting in good faith to cure same, the time period will be reasonably extended to allow the defaulting party additional cure time. Upon the occurrence of a default that is not cured during the applicable cure period, this RFP may be terminated by the non-defaulting party upon thirty (30) calendar days' notice. This remedy is not intended to be exclusive of any other remedy, and each and every such remedy is cumulative and in addition to every other remedy now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder precludes any other or future exercise thereof. Nothing in this section shall be construed to preclude termination for convenience pursuant to section 8.46. If the default is not cured by the Awardee the steps in section 8.44 shall be taken

INSTRUCTIONS FOR ATTACHMENT C - CERTIFICATION OF DEBARMENT

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion-Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Non-procurement List (Telephone Number).
8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntary excluded from participation in this transaction, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Insert Name understands and agrees that a material violation of this clause is considered a material breach of this Agreement and may result in termination of this Agreement, disqualification of the company from participating in SBBC Agreements, or other sanctions. This clause is not enforceable by or for the benefit of, and creates no obligation to, any third-party.

2.17 **Certification Regarding Scrutinized Activities.** Section 287.135(2)(a), Florida Statutes, prohibits a company from bidding on, submitting a proposal for, or entering into or renewing an Agreement for goods or services of any amount if, at the time of contracting or renewal, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, Florida Statutes, or is engaged in a boycott of Israel. Entering into this Agreement constitutes certification by Insert Name that it is not listed on any of the following: (a) the Scrutinized Companies that Boycott Israel List, (b) Scrutinized Companies with Activities in Sudan List, or (c) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. Insert Name further certifies that it is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. And, in addition to the foregoing, if the amount of the Agreement is one million dollars ($1,000,000) or more, the Agreement may be terminated at SBBC's option if Insert Name is found to have submitted a false certification, has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

2.18 **Annual Appropriation.** SBBC's performance and obligations under this Agreement is contingent upon an annual budgetary appropriation by its governing body. If SBBC does not allocate funds for the payment of services or products to be provided under this Agreement, this Agreement may be terminated by SBBC at the end of the period for which funds have been allocated. SBBC shall notify the other party at the earliest possible time before such termination. No penalty accrues to SBBC if this provision is exercised, and SBBC is not obligated or liable for any future payments due or any damages as a result of termination under this section.

2.19 **Excess Funds.** Any party receiving funds paid by SBBC under this Agreement agrees to promptly notify SBBC of any funds erroneously received from SBBC upon the discovery of such erroneous payment or overpayment. Any such excess funds shall be refunded to SBBC, together with any applicable statutory interest.

2.20 **Incorporation by Reference.** Exhibit[s] Insert appropriate Exhibit letters or numbers attached hereto and referenced herein are incorporated into this Agreement by reference.

2.21 **Proprietary Information.**

(a) Any documents or materials submitted to SBBC shall be open for inspection by any person in accordance with Section 119.07, Florida Statutes, except as otherwise exempted from disclosure by applicable law. A party contracting with SBBC must clearly mark, label, designate, or identify any portions of any documents or materials it provides to SBBC which are claimed to be confidential and exempt from public inspection, provided that the confidential or exempt portions of such documents or materials are clearly marked with specific citations of law that provide the asserted confidentiality or exemption. A contracting party's failure to identify any confidential or exempt portions of documents or materials or to specify the law establishing their confidential or exempt status is a waiver of confidential or exempt status for any such unidentified or unsupported portions of any documents or materials.

(b) If SBBC receives a public record request for documents or materials in its custody under this Agreement which have been properly marked as confidential or exempt, SBBC will notify the contracting party of the public records request. The notice shall state that the requested materials will be produced by SBBC to the requesting party within ten (10) calendar days of the date of the written notification, unless the contracting party has initiated an action at its sole cost and expense in a court of competent jurisdiction to preclude the release of the requested materials. The contracting party shall name the party requesting the documents or materials as a defendant and will not name SBBC as a party to the action, but will provide SBBC with notice of such proceedings. The contracting party agrees to indemnify SBBC for any costs, expenses, and attorney's fees SBBC may incur with regard to any legal proceedings and judgments that may arise from the request for the contracting party's public records that are subject to claims of confidential or exempt status. A failure to timely initiate the legal action required by this paragraph is a waiver of any claim that the requested information is confidential and exempt from public disclosure. The contracting party waives any cause of action against SBBC for the release of materials pursuant to a public records request except for any claims based upon the intentional or grossly negligent conduct of any employee of SBBC.

ARTICLE 3 – GENERAL CONDITIONS

3.01 **No Waiver of Sovereign Immunity.** Nothing herein is intended to serve as a waiver of sovereign immunity by any agency or political subdivision to which sovereign immunity may be applicable or of any rights or limits to liability existing under Section 768.28, Florida Statutes. This section survives the termination of all performance or obligations under this Agreement and is fully binding until such time as any proceeding brought on account of this Agreement is barred by any applicable statute of limitations.

3.02 **No Third-Party Beneficiaries.** The parties expressly acknowledge that it is not their intent to create or confer any rights or obligations under this Agreement in or upon any third person or entity. None of the parties intend to directly or substantially benefit a third-party by this Agreement. The parties agree that there are no third-party beneficiaries to this Agreement and that no third-

party is entitled to assert a claim against any of the parties based upon this Agreement. Nothing herein shall be construed as consent by an agency or political subdivision of the State of Florida to be sued by third parties in any matter arising out of any Agreement.

3.03 **Independent Contractor.** The parties to this Agreement are acting in the capacity of independent contractors and not as an officer, employee, or agent of one another. Neither party or its respective agents, employees, subcontractors, or assignees shall represent to others that it has the authority to bind the other party unless specifically authorized in writing to do so. No right to SBBC retirement, leave benefits, or any other benefits of SBBC employees exists as a result of the performance of any duties or responsibilities under this Agreement. SBBC is not responsible for Social Security, withholding taxes, contributions to unemployment compensation funds or insurance for the other party or the other party's officers, employees, agents, subcontractors, or assignees.

3.04 **Default.** The parties agree that, if either party is in default of its obligations under this Agreement, the non-defaulting party shall provide to the defaulting party (30) calendar days' written notice to cure the default. However, if said default cannot be cured within said thirty (30) calendar day period and the defaulting party is diligently attempting in good faith to cure same, the time period will be reasonably extended to allow the defaulting party additional cure time. Upon the occurrence of a default that is not cured during the applicable cure period, this Agreement may be terminated by the non-defaulting party upon thirty (30) calendar days' notice. This remedy is not intended to be exclusive of any other remedy, and each and every such remedy is cumulative and in addition to every other remedy now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder precludes any other or future exercise thereof. Nothing in this section shall be construed to preclude termination for convenience pursuant to section 3.05.

3.05 **Termination.** This Agreement may be terminated with or without cause by SBBC during the term hereof upon thirty (30) calendar days' written notice to the other parties of its desire to terminate this Agreement. In the event of such termination, SBBC is entitled to a *pro rata* refund of any pre-paid amounts for any services scheduled to be delivered after the effective date of such termination. SBBC has no liability for any property left on SBBC's property by any party to this Agreement after the termination of this Agreement. Any party contracting with SBBC under this Agreement agrees that any of its property placed upon SBBC's facilities pursuant to this Agreement shall be removed within ten (10) business days following the termination, conclusion, or cancellation of this Agreement and that any such property remaining upon SBBC's facilities after that time shall be deemed to be abandoned, that title to such property shall pass to SBBC, and that SBBC may use or dispose of such property as SBBC deems fit and appropriate.

3.06 **Compliance with Laws.** Each party shall comply with all applicable federal, state and local laws, SBBC policies, codes, rules, and regulations in performing its duties, responsibilities, and obligations pursuant to this Agreement.

3.07 **Place of Performance.** All of SBBC's obligations under the terms of this Agreement are reasonably susceptible of being performed in Broward County, Florida and are payable and performable in Broward County, Florida.

3.08 **Governing Law and Venue.** This Agreement shall be interpreted and construed in accordance with and governed by the laws of the State of Florida. Any disputes, controversies, or legal problems arising out of this Agreement and any action involving the enforcement or interpretation of any rights hereunder shall be submitted exclusively to the jurisdiction of the State courts of the Seventeenth Judicial Circuit of Broward County, Florida or to the jurisdiction of the United States District Court for the Southern District of Florida. Each party agrees and admits that the state courts of the Seventeenth Judicial Circuit of Broward County, Florida or the United States District Court for the Southern District of Florida has jurisdiction over it for any dispute arising under this Agreement.

3.09 **Entirety of Agreement.** This document incorporates and includes all prior negotiations, correspondence, conversations, agreements, and understandings applicable to the matters contained herein and the parties agree that there are no commitments, agreements or understandings concerning the subject matter of this Agreement that are not contained in this document. Accordingly, the parties agree that no deviation from the terms hereof is predicated upon any prior representations or agreements, whether oral or written.

3.10 **Binding Effect.** This Agreement is binding upon and inures to the benefit of the parties hereto and their respective successors and assigns.

3.11 **Assignment.** Neither this Agreement nor any interest herein may be assigned, transferred, or encumbered by any party without the prior written consent of the other party. There shall be no partial assignment of interests under this Agreement including, without limitation, the partial assignment of any right to receive payments from SBBC.

3.12 **Captions.** The captions, section designations, section numbers, article numbers, titles, and headings appearing in this Agreement are inserted only as a matter of convenience, have no substantive meaning, and in no way define, limit, construe, or describe the scope or intent of such articles or sections of this Agreement, nor in any way affect this Agreement and shall not be construed to create a conflict with the provisions of this Agreement.

3.13 **Severability.** If any one or more of the sections, paragraphs, sentences, clauses, or provisions contained in this Agreement is held by a court of competent jurisdiction to be invalid, illegal, unlawful, unenforceable, or void in any respect, such does not affect the remaining portions of this Agreement and the same remain in full force and effect as if such invalid, illegal, unlawful, unenforceable, or void sections, paragraphs, sentences, clauses, or provisions had never been included.

3.14 **Preparation of Agreement.** The parties acknowledge that they have sought and obtained whatever competent advice and counsel necessary for them to form a full and complete understanding of all rights and obligations herein and that the preparation of this Agreement has been their joint effort. The language agreed to herein expresses their mutual intent and the resulting document shall not, solely as a matter of judicial construction, be construed more severely against one of the parties than the other.

3.15 **Amendments.** No modification, amendment, or alteration in the terms or conditions contained herein is effective unless contained in a written document prepared with the same or similar formality as this Agreement and executed by each party hereto.

3.16 **Waiver.** The parties agree that each requirement, duty and obligation set forth herein is substantial and important to the formation of this Agreement and, therefore, is a material term hereof. Any party's failure to enforce any provision of this Agreement is not a waiver of such provision or modification of this Agreement unless the waiver is in writing and signed by the party waiving such provision. A written waiver is only effective as to the specific instance for which it is obtained and is not a continuing or future waiver.

3.17 **Force Majeure.** Neither party is obligated to perform any duty, requirement, or obligation under this Agreement if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and the issuance or extension of existing government orders of the United States, the State of Florida, or local county and municipal governing bodies, or by reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In no event shall a lack of funds on the part of either party be deemed Force Majeure.

3.18 **Rights and Remedies.** The duties and obligations imposed by this Agreement and the rights and remedies available thereunder are in addition to and not a limitation of any duties, obligations, rights and remedies otherwise imposed or available by law.

3.19 **Survival.** All representations and warranties made herein, indemnification obligations, obligations to reimburse SBBC, obligations to maintain and allow inspection and audit of records and property, obligations to maintain the confidentiality of records, reporting requirements, and obligations to return public funds survive the termination of this Agreement.

3.20 **Agreement Administration.** SBBC has delegated authority to the Superintendent of Schools or her/his designee to take any actions necessary to implement and administer this Agreement.

3.21 **Counterparts and Multiple Originals.** This Agreement may be executed in multiple originals, and may be executed in counterparts, each of which is an original, but all of which, taken together, shall constitute one and the same Agreement.

3.22 **Authority.** Each person signing this Agreement on behalf of either party individually warrants that he or she has full legal power to execute this Agreement on behalf of the party for whom he or she is signing, and to bind and obligate such party with respect to all provisions contained in this Agreement.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the Effective Date.

BID NAME: SAP Managed Hosting and BASIS Services

TO ALL BIDDERS:

Below are the responses to the questions received for the **RFP**.

QUESTIONS & ANSWERS

QUESTION #1: How much is the allotted budget for the contract resulting from this RFP?

ANSWER TO QUESTION #1: The budget for this bid/contract is not allocated yet.

QUESTION #2: Our firm received the RFP bid package on Demand Star and I had a quick question regarding the submittal process. When I am on Demand star and click on "required actions" there are no required actions. Are the proposals supposed to be electronically submitted, hand-delivered, or mailed? Please let me know how to proceed.

ANSWER TO QUESTION #2: The proposals need to be delivered by hand or by courier. Please, be aware of the deadline (November 3rd @ 2:00 PM) and the required originals and copies.

QUESTION #3: I had an opportunity to review the RFP documentation and I have a question. The question period ends on October 24th and the Proposals are due on November 3rd. This timeline allows SBBC to process and answer all questions in less than 9 business days. Will the BCPS team be responding to questions as you receive them? We want to ensure we can craft the most SBBC-appropriate response based on the questions & answers.

ANSWER TO QUESTION #3: Usually, the Request for Information (RFIs) or questions deadline is 10 calendar days before the bid opening and the Addendum with all responses is released at least 7 calendar days before the bid opening. We count calendar days, not business days. Yes, we will process and begin posting all responses as soon as they are received. We don't want to delay any response.

MONTHLY UTILIZATION REPORT (MUR)

REPORTING REQUIREMENTS

If awarded, the awardee shall login to the SDOP Management System (SMS) monthly to report payments made to the certified Small/Minority/Women Business Enterprise (S/M/WBE) subcontractor listed in the original proposal submitted.

If you are a S/M/WBE Prime self-performing, monthly payments received must be reported through the SDOP Management System (SMS).

Access the SMS: Your username is your email address. If you are S/M/WBE certified or currently a prime or subcontractor with a local public or county agency, your firm may already have an existing account.

Monthly Utilization Reports are due on the first of the month. After two weeks, the system will no longer be open – for that reporting period – and a request must be submitted to the EDDC Business Intelligence & Process Management Team at eddcbiteam@browardschools.com.

The Economic Development & Diversity Compliance department works to increase the participation of small, minority and women-owned business enterprises in construction and purchasing contracts. It is the intent of the School Board of Broward County to have a diverse group of vendors to participate in the procurement process. For information on how to become a certified supplier, visit the certification webpage.

You may also access the certified S/M/WBE directory at browardschools.com/SDOP.

EXECUTIVE SUMMARY

RFP-FY26-007 – Property and Casualty Insurance Brokerage Services

---

Board Meeting Date: April 7, 2026

Requested Action:
Approve First Amendment and Additional Spending Authority of $24,446,000 for the previously approved Agreement RFP-FY26-007 – Property and Casualty Insurance Brokerage Services between The School Board of Broward County, Florida (SBBC), and Risk Management Associates, Inc., to purchase Property and Casualty insurance coverages.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member:	
School Board Policy Requirement	• Not Applicable
Statutory Requirement	• 1001.42 (11) (d), Florida Statutes
If the School Board votes "Yes"	• Approval of this Spending Authority Request enables the District to purchase property and casualty insurance coverages, ensuring protection of District assets in the event of a catastrophic occurrence.
If the School Board votes "No"	• Failure to approve this spending authority request will result in no insurance coverage being purchased for the period May 15, 2026, through June 30, 2027, and the District's assets will not be protected in the event of a catastrophic occurrence.
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations
Measurable Outcome(s)/Return on Investment	• Should a property loss arise that exceeds SBBC's self-insured retention, Risk Management Associates, Inc. will work in collaboration with the District's Risk Management department and SBBC's insurance carriers to resolve property damage claims.

Background/History
Florida Statute/Florida Administrative Rule: School Districts are required to carry property insurance on all school buildings (except buildings with three (3) classrooms or less) and all school plants, including contents, boilers, and machinery, pursuant to provisions of section 1001.42 (11) (d), Florida Statutes.

Goals and Objectives: On each insurance renewal, the District focuses on minimizing market increases for Property and Casualty renewals. The District will attempt to maintain the same broad manuscript form with continued blanket coverage. We will target favorable coverage terms for this upcoming renewal period.

Risk Management continues to re-evaluate our insurance program on an annual basis with the goal of maintaining adequate coverage and saving money. After careful analysis of several policies, a $3,000,000 savings has been garnered. The District now self-insures excess workers' compensation, excess liability, as well as obtains and maintains coverage.

Insurance Market Conditions: The commercial insurance market outlook for 2026 reflects increased competition among insurance carriers with ample capacity. This trend is influenced by factors such as continued commercial real estate development and heightened regulatory compliance requirements. As competition intensifies, carriers are deploying larger limits and competing more aggressively for business.

Overall, current market trends suggest a favorable environment for commercial property insurance buyers, offering opportunities for strategic program placement, improved terms, increased limits, and more flexible program structures. However, careful risk evaluation remains essential to navigate this competitive landscape effectively.

District Risk Profile: The School Board of Broward County, Florida (SBBC) is considered a highly concentrated risk in South Florida due to exposure to wind and coastal flooding. Total insured values (TIV) currently exceed $10 billion and are exposed to hurricane-related events on an annual basis. Despite this exposure, carriers underwriting the account view SBBC as a favorable risk based on its limited loss history and rigid building codes.

Insurance Coverages/Premium Projections: The chart below summarizes insurance coverages, policy periods and estimated insurance premium costs for a one (1) year period. We are requesting spending authority for the first-year term in the amount of $24,446,000. We will request additional spending as required to cover the additional two years of insurance premiums.

Fiscal Year	Policy Period	Lines of Coverage	Estimated Cost
2026/2027	May 15, 2026, through May 14, 2027	Property & Terrorism Property	$23,900,000

Entering into this Agreement constitutes certification by VENDOR that it is not listed on any of the following: (a) the Scrutinized Companies that Boycott Israel List, (b) Scrutinized Companies with Activities in Sudan List, or (c) the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List. VENDOR further certifies that it is not engaged in a boycott of Israel or engaged in business operations in Cuba or Syria. VENDOR acknowledges that pursuant to Section 287.135, Florida Statutes, the submission of a false certification may subject it to civil penalties, attorney's fees, and/or costs. with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has been engaged in business operations in Cuba or Syria.

2.11 **Background Screening.** VENDOR shall comply with all requirements of Sections 1012.32, 1012.465, 1012.467, and 1012.468, Florida Statutes, and all of its personnel who (a) are to be permitted access to school grounds when students are present, (b) will have direct contact with students, or (c) have access or control of school funds, will successfully complete the background screening required by the referenced statutes and meet the standards established by the statutes. Personnel who are subject to background screening include all of VENDOR's non-exempt employees, representatives, agents, and sub-contractors performing duties under this Agreement who meet any of the three (3) descriptions listed above. This background screening will be conducted by SBBC in advance of VENDOR or its personnel providing any services under this Agreement. VENDOR shall bear the cost of acquiring the background screening required by Section 1012.32, Florida Statutes, and any fee imposed by the Florida Department of Law Enforcement (FDLE) to maintain the fingerprints provided with respect to VENDOR and its personnel. The parties agree that the failure of VENDOR to perform any of the duties described in this section shall constitute a material breach of this Agreement entitling SBBC to terminate this Agreement immediately for cause and with no opportunity required to permit VENDOR to cure such default and no further responsibilities or duties for SBBC to perform under this Agreement. VENDOR agrees to indemnify and hold harmless SBBC, its officers and employees from any liability in the form of physical or mental injury, death or property damage resulting from VENDOR's failure to comply with the requirements of this section or with Sections 1012.32, 1012.465, 1012.467, and 1012.468, Florida Statutes. SBBC issued identification badges must be worn at all times when on SBBC property or when performing services for SBBC and must be worn where they are visible and easily readable.

2.12 **Public Records.** The following provisions are required by Section 119.0701, Florida Statutes, and may not be amended. VENDOR shall keep and maintain public records required by SBBC to perform the services required under this Agreement. Upon request from SBBC's custodian of public records, VENDOR shall provide SBBC with a copy of any requested public records or to allow the requested public records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law. VENDOR shall ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Agreement's term and following completion of the Agreement if VENDOR does not transfer the public records to SBBC. Upon completion of the Agreement, VENDOR shall transfer, at no cost, to SBBC all public records in possession of VENDOR or keep and maintain public records required by SBBC to perform the services required under the Agreement. If VENDOR transfers all public records to SBBC upon completion of the Agreement, VENDOR shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If VENDOR keeps and maintains public records upon completion of the Agreement, VENDOR shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to SBBC, upon

request from SBBC's custodian of public records, in a format that is compatible with SBBC's information technology systems.

IF A PARTY TO THIS AGREEMENT HAS QUESTIONS REGARDING ITS DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THE AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 754-321-2300, OPTION 5, RECORDREQUESTS@BROWARDSCHOOLS.COM, LEGISLATIVE AFFAIRS, PUBLIC RECORDS DIVISION, 600 SOUTHEAST THIRD AVENUE, FORT LAUDERDALE, FLORIDA 33301.

2.13 **Proprietary Information**.

2.13.1 Any documents or materials submitted to SBBC shall be open for inspection by any person in accordance with Section 119.07, Florida Statutes, except as otherwise exempted from disclosure by applicable law. A party contracting with SBBC must clearly mark, label, designate, or identify any portions of any documents or materials it provides to SBBC which are claimed to be confidential and exempt from public inspection, provided that the confidential or exempt portions of such documents or materials are clearly marked with specific citations of law that provide the asserted confidentiality or exemption. A contracting party's failure to identify any confidential or exempt portions of documents or materials or to specify the law establishing their confidential or exempt status is a waiver of confidential or exempt status for any such unidentified or unsupported portions of any documents or materials.

2.13.2 If SBBC receives a public record request for documents or materials in its custody under this Agreement which have been properly marked as confidential or exempt, SBBC will notify the contracting party of the public records request. The notice shall state that the requested materials will be produced by SBBC to the requesting party within ten (10) calendar days of the date of the written notification, unless the contracting party has initiated an action at its sole cost and expense in a court of competent jurisdiction to preclude the release of the requested materials. The contracting party shall name the party requesting the documents or materials as a defendant and will not name SBBC as a party to the action, but will provide SBBC with notice of such proceedings. The contracting party agrees to indemnify SBBC for any costs, expenses, and attorney's fees SBBC may incur with regard to any legal proceedings and judgments that may arise from the request for the contracting party's public records that are subject to claims of confidential or exempt status. A failure to timely initiate the legal action required by this paragraph is a waiver of any claim that the requested information is confidential and exempt from public disclosure. The contracting party waives any cause of action against SBBC for the release of materials pursuant to a public records request except for any claims based upon the intentional or grossly negligent conduct of any employee of SBBC.

2.14 **Liability**. This section survives the termination of all performance or obligations under this Agreement and is fully binding until such time as any proceeding brought on account of this Agreement is barred by any applicable statute of limitations.

2.14.1 By SBBC. SBBC agrees to be fully responsible up to the limits of Section 768.28, Florida Statutes, for its acts of negligence, or its employees' acts of negligence when acting within the scope of their employment, up to the limits of Section 768.28, Florida Statutes, for any damages resulting from said negligence.

2.14.2 By VENDOR. VENDOR agrees to indemnify, hold harmless and defend SBBC, its agents, servants and employees from any and all third party claims, judgments, costs, and expenses including, but not limited to, reasonable attorney's fees, reasonable investigative and discovery costs, court costs, and all other sums which SBBC, its agents, servants, and employees may pay or become obligated to pay on account of any, all and every claim or demand, or assertion of liability, or any claim or action founded thereon, arising or alleged to have arisen out of or due to the products, goods, or services furnished by VENDOR, its agents, servants, or employees; the equipment of VENDOR, its agents, servants, or employees while such equipment is on premises owned or controlled by SBBC; or the negligence of VENDOR or the negligence of VENDOR's agents when acting within the scope of their employment, whether such claims, judgments, costs, and expenses are for damages, damage to property including SBBC's property, and injury or death of any person whether employed by VENDOR, SBBC, or otherwise.

2.15 **Insurance Requirements**. VENDOR shall comply with the following insurance requirements throughout the term of this Agreement:

Nothing herein is intended to serve as a waiver of sovereign immunity by any agency or political subdivision to which sovereign immunity may be applicable or of any rights or limits to liability existing under Section 768.28, Florida Statutes. This section survives the termination of all performance or obligations under this Agreement and is fully binding until such time as any proceeding brought on account of this Agreement is barred by any applicable statute of limitations.

3.2 **No Third-Party Beneficiaries**. The parties expressly acknowledge that it is not their intent to create or confer any rights or obligations under this Agreement in or upon any

third person or entity. None of the parties intend to directly or substantially benefit a third-party by this Agreement. The parties agree that there are no third-party beneficiaries to this Agreement and that no third-party is entitled to assert a claim against any of the parties based upon this Agreement. Nothing herein shall be construed as consent by an agency or political subdivision of the State of Florida to be sued by third parties in any matter arising out of any Agreement.

3.3 **Independent Contractor**. The parties to this Agreement are acting in the capacity of independent contractors and not as an officer, employee, or agent of one another. Neither party or its respective agents, employees, subcontractors, or assignees shall represent to others that it has the authority to bind the other party unless specifically authorized in writing to do so. No right to SBBC retirement, leave benefits, or any other benefits of SBBC employees exists as a result of the performance of any duties or responsibilities under this Agreement. The parties agree that, if either party is in default of its obligations under this Agreement, the non-defaulting party shall provide to the defaulting party (30) calendar days' written notice to cure the default. However, if said default cannot be cured within said thirty (30) calendar day period and the defaulting party is diligently attempting in good faith to cure same, the time period will be reasonably extended to allow the defaulting party additional cure time. Upon the occurrence of a default that is not cured during the applicable cure period, this Agreement may be terminated by the non-defaulting party upon thirty (30) calendar days' notice. This remedy is not intended to be exclusive of any other remedy, and each and every such remedy is cumulative and in addition to every other remedy now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder precludes any other or future exercise thereof. Nothing in this section shall be construed to preclude termination for convenience pursuant to section 3.5.

3.5 **Termination**. This Agreement may be terminated with or without cause by SBBC during the term hereof upon thirty (30) calendar days' written notice to the other parties of its desire to terminate this Agreement. In the event of such termination, SBBC is entitled to a *pro rata* refund of any pre-paid amounts for any services scheduled to be delivered after the effective date of such termination. SBBC has no liability for any property left on SBBC's property by any party to this Agreement after the termination of this Agreement. Any party contracting with SBBC under this Agreement agrees that any of its property placed upon SBBC's facilities pursuant to this Agreement shall be removed within ten (10) business days following the termination, conclusion, or cancellation of this Agreement and that any such property remaining upon SBBC's facilities after that time shall be deemed to be abandoned, that title to such property shall pass to SBBC, and that SBBC may use or dispose of such property as SBBC deems fit and appropriate.

3.6 **Compliance with Laws**. Each party shall comply with all applicable federal, state and local laws, SBBC policies, codes, rules, and regulations in performing its duties, responsibilities, and obligations pursuant to this Agreement.

3.8 **Governing Law and Venue**. This Agreement shall be interpreted and construed in accordance with and governed by the laws of the State of Florida. Any disputes, controversies, or legal problems arising out of this Agreement and any action involving the enforcement or interpretation of any rights hereunder shall be submitted exclusively to the jurisdiction of the State courts of the Seventeenth Judicial Circuit of Broward County, Florida or to the jurisdiction of the United States District Court for the Southern District of Florida. Each party agrees and admits that the state courts of the Seventeenth Judicial Circuit of Broward County, Florida or the United States District Court for the Southern District of Florida has jurisdiction over it for any dispute arising under this Agreement.

3.9 **Entirety of Agreement**. This document incorporates and includes all prior negotiations, correspondence, conversations, agreements, and understandings applicable to the matters contained herein and the parties agree that there are no commitments, agreements or understandings concerning the subject matter of this Agreement that are not contained in this document. Accordingly, the parties agree that no deviation from the terms hereof is predicated upon any prior representations or agreements, whether oral or written.

3.10 **Binding Effect**. This Agreement is binding upon and inures to the benefit of the parties hereto and their respective successors and assigns.

3.11 **Assignment**. Neither this Agreement nor any interest herein may be assigned, transferred, or encumbered by any party without the prior written consent of the other party. There shall be no partial assignment of interests under this Agreement including, without limitation, the partial assignment of any right to receive payments from SBBC.

3.12 **Captions**. The captions, section designations, section numbers, article numbers, titles, and headings appearing in this Agreement are inserted only as a matter of convenience, have no substantive meaning, and in no way define, limit, construe, or describe the scope or intent of such articles or sections of this Agreement, nor in any way affect this Agreement and shall not be construed to create a conflict with the provisions of this Agreement.

3.13 **Severability**. If any one or more of the sections, paragraphs, sentences, clauses, or provisions contained in this Agreement is held by a court of competent jurisdiction to be invalid, illegal, unlawful, unenforceable, or void in any respect, such does not affect the remaining portions of this Agreement and the same remain in full force and effect as if such invalid, illegal,

3.14 **Preparation of Agreement**. The parties acknowledge that they have sought and obtained whatever competent advice and counsel necessary for them to form a full and complete understanding of all rights and obligations herein and that the preparation of this Agreement has been their joint effort. The language agreed to herein expresses their mutual intent and the resulting document shall not, solely as a matter of judicial construction, be construed more severely against one of the parties than the other.

3.15 **Amendments**. No modification, amendment, or alteration in the terms or conditions contained herein is effective unless contained in a written document prepared with the same or similar formality as this Agreement and executed by each party hereto.

3.16 **Waiver**. The parties agree that each requirement, duty and obligation set forth herein is substantial and important to the formation of this Agreement and, therefore, is a material term hereof. Any party's failure to enforce any provision of this Agreement is not a waiver of such provision or modification of this Agreement unless the waiver is in writing and signed by the party waiving such provision. A written waiver is only effective as to the specific instance for which it is obtained and is not a continuing or future waiver.

3.17 **Force Majeure**. Neither party is obligated to perform any duty, requirement, or obligation under this Agreement if such performance is prevented by fire, hurricane, earthquake, explosion, wars, sabotage, accident, flood, acts of God, strikes, or other labor disputes, riot or civil commotions, epidemics, pandemics, government regulations, and the issuance or extension of existing government orders of the United States, the State of Florida, or local county and municipal governing bodies, or by reason of any other matter or condition beyond the control of either party, and which cannot be overcome by reasonable diligence and without unusual expense ("Force Majeure"). In no event shall a lack of funds on the part of either party be deemed Force Majeure.

3.18 **Rights and Remedies**. The duties and obligations imposed by this Agreement and the rights and remedies available thereunder are in addition to and not a limitation of any duties, obligations, rights and remedies otherwise imposed or available by law.

3.19 **Survival**. All representations and warranties made herein, indemnification obligations, obligations to reimburse SBBC, obligations to maintain and allow inspection and audit of records and property, obligations to maintain the confidentiality of records, reporting requirements, and obligations to return public funds survive the termination of this Agreement.

3.20 **Agreement Administration**. SBBC has delegated authority to the Superintendent of Schools or her/his designee to take any actions necessary to implement and administer this Agreement.

3.21 **Counterparts and Multiple Originals**. This Agreement may be executed in multiple originals, and may be executed in counterparts, each of which is an original, but all of which, taken together, shall constitute one and the same Agreement.

3.22 **Authority**. Each person signing this Agreement on behalf of either party individually warrants that he or she has full legal power to execute this Agreement on behalf of the party for whom he or she is signing, and to bind and obligate such party with respect to all provisions contained in this Agreement.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement upon the date of the last signature below.

As stated herein, the term of the contract may, by mutual agreement between SBBC and the Awardee, be extended for two additional one-year periods and, if needed, 180 days beyond the expiration date of the renewal period. SBBC and Awardee may, by mutual agreement, when exercising the option terms provided herein, extend the Agreement for a term period less than the full one (1) year option term. 6.7.2 SBBC also reserves the right to waive irregularities or technicalities in any proposal received if such action is in the best interest of SBBC. However, such a waiver shall in no way modify the RFP requirements or excuse the Proposer from full compliance with the RFP specifications and other contract requirements if the Proposer is awarded the contract.

6.7.3 **Rejection:** A proposal may be rejected if it does not conform to the rules or the requirements contained in this RFP. Examples of rejection include, but are not limited to, the following:

7.60 **CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY OR VOLUNTARY EXCLUSION – Lower Tier Covered Transactions:** Executive Order 12549, as currently enacted or as amended from time to time, provides that, to the

extent permitted by law, Executive departments and agencies shall participate in a government-wide system for non-procurement debarment and suspension. A person who is debarred or suspended shall be excluded from Federal financial and non-financial assistance and benefits under Federal programs and activities. Except as provided in § 85.200, Debarment or Suspension, § 85.201, Treatment of Title IV HEA participation, and § 85.215, Exception Provision, debarment or suspension of a participant in a program by one (1) agency shall have government-wide effect. A lower tier covered transaction is, in part, any transaction between a participant [SBBC] and a person other than a procurement contract for goods or services, regardless of type, under a primary covered transaction; and any procurement contract for goods or services between a participant and a person, regardless of type, expected to equal or exceed the Federal procurement small purchase threshold fixed at 10 U.S.C. 2304(g) and 41 U.S.C. 253(g) (currently $100,000) under a primary covered transaction; or any procurement contract for goods or services between a participant and a person under a covered transaction, regardless of amount, under which that person shall have a critical influence on or substantive control over that covered transaction. A participant may rely upon the certification of a prospective participant in a lower tier covered transaction that it and its principals are not debarred, suspended, proposed for debarment under 48 CFR part 9, subpart 9.4, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. Any proposal that does not include this required Form shall not be evaluated and shall not be considered for award. **A signature is required on BOTH, the Debarment Form, AND the Required Response Form.** A signature on one document cannot be substituted for the signature required on the other document. **Failure to complete and sign both documents requiring signature shall result in rejection of the proposal submitted.**

7.61 **PUBLIC INSPECTION OF PROPOSALS:** Pursuant to Section 119.071 (1)(b), Florida Statutes, responses received as a result of this RFP shall be exempt from public inspection and copying until thirty (30) days after the opening of the proposals or until posting of the recommendation for intended award, whichever is earlier. If SBBC rejects all proposals and concurrently provides notice of its intent to reissue the competitive solicitation, the rejected proposals shall remain exempt from public inspection and copying until such time as SBBC posts notice of an intended decision concerning the reissued competitive solicitation or until SBBC withdraws the reissued competitive solicitation.

If a Proposer contends that any portion of its response to the RFP is confidential and exempt from public inspection and copying, it is the Proposer's responsibility to clearly label each such portion of its proposal as confidential and specify the applicable statutory exemption from public inspection and copying on such portion(s) of its proposal. Confidential or exempt portions of any proposal must also be submitted in a separate sealed envelope and marked as such. A failure by the Proposer to prepare and label the confidential or exempt portions of its proposal in the manner specified in this section of the RFP shall constitute a waiver by Proposer of any applicable exemptions from disclosure or any confidential status including ones that may be applicable to trade secrets under Florida law.

SBBC will promptly provide a Proposer's contact person with written notice if a public records request has been made for any portions of Proposer's response to the RFP. SBBC will provide for the inspection or copying any non-exempt portions of any proposal in its possession in accordance with applicable law. If a Proposer wishes to preclude the inspection or copying of any non-exempt portions of its response to the RFP or if a dispute exists as to whether such portions are entitled to an exemption, the Proposer must obtain a protective order from a court of competent jurisdiction prohibiting the inspection or copying of the requested materials. The failure to timely initiate such legal proceedings shall constitute a waiver by the Proposer of any applicable exemption or confidential status of the requested materials.

By submitting a response to this RFP, the Proposer agrees to waive any cause of action or claim for damages it may have against SBBC for its release of records in response to a public record other than those that are prepared and labeled as confidential or exempt as described in this section. The Proposer agrees to hold SBBC harmless from any award to a plaintiff for damages, costs or attorney's fees based upon SBBC's non-disclosure of portions of Proposer's response that have been prepared and labeled as confidential or exempt from public inspection and further agrees to reimburse SBBC for any attorney's fees and costs it may incur in the defense of such nondisclosure.

7.62 **PUBLIC RECORDS:** The following provisions are required by Section 119.0701, Florida Statutes, and may not be amended. Termination pursuant to this section is not a breach of this RFP Agreement and may not be considered as such.

7.64 **DEFAULT**: The parties (SBBC and Awardee) agree that, if either party is in default of its obligations under this RFP, the non-defaulting party shall provide to the defaulting party (30) calendar days' written notice to cure the default. However, if said default cannot be cured within said thirty (30) calendar day period and the defaulting party is diligently attempting in good faith to cure same, the time period will be reasonably extended to allow the defaulting party additional cure time. 2.24.2 If SBBC receives a public record request for documents or materials in its custody under this Agreement which have been properly marked as confidential or exempt, SBBC will notify the contracting party of the public records request. The notice shall state that the requested materials will be produced by SBBC to the requesting party within ten (10) calendar days of the date of the written notification, unless the contracting party has initiated an action at its sole cost and expense in a court of competent jurisdiction to preclude the release of the requested materials. The contracting party shall name the party requesting the documents or materials as a defendant and will not name SBBC as a party to the action, but will provide SBBC with notice of such proceedings. The contracting party agrees to indemnify SBBC for any costs, expenses, and attorney's fees SBBC may incur with regard to any legal proceedings and judgments that may arise from the request for the contracting party's public records that are subject to claims of confidential or exempt status. A failure to timely initiate the legal action required by this paragraph is a waiver of any claim that the requested information is confidential and exempt from public disclosure. - The statutory requirements for selection of the Auditor;
- Establishment and composition of the Auditor Selection Committee (ASC);

- Term limits for the selected Auditor (not to exceed five consecutive years unless otherwise approved);

EXECUTIVE SUMMARY

Policy 1400.1 – Visits from Elected Officials, Dignitaries, and Campaign Activities on School Campuses/Facilities

Board Meeting Date: April 7, 2026

Requested Action: Approve the repeal of School Board Policy 1400.1 – Visits from Elected Officials, Dignitaries, and Campaign Activities on School Campuses and School Board Facilities.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member: District-wide	
School Board Policy Requirement	• Policy 1000- Rulemaking
Statutory Requirement	• N/A
If the School Board votes "Yes"	• If the School Board approves the repeal of Policy 1400.1, the District will eliminate a duplicative policy and consolidate related guidance within Policy 6020 – Visits to Schools. This action will streamline the District's policy framework by ensuring that procedures governing school visits, including visits by elected officials and other dignitaries, are addressed within one comprehensive policy. Consolidating these provisions will reduce the potential for inconsistent interpretation across policies, improve clarity for school administrators and staff responsible for coordinating campus visits, and enhance accessibility of District policies for employees and members of the public. The repeal will also support the District's broader Policy Modernization and Consolidation Project, which seeks to simplify the policy structure and remove outdated references to departments, processes, and practices that are no longer in use.

If the School Board votes "No"	• If the School Board does not approve the proposed repeal of Policy 1400.1, the policy will remain in effect alongside Policy 6020. Maintaining both policies may result in duplication of subject matter related to school visits and visitor conduct and could increase the potential for inconsistent interpretation or implementation across District schools and facilities. Retaining separate policies addressing similar topics may also reduce the overall clarity and accessibility of the District's policy framework..
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations
Measurable Outcome(s)/Return on Investment	• Consolidating related provisions within Policy 6020 will improve policy clarity, reduce administrative confusion, and strengthen consistency in how visitor procedures are implemented across the District. • The return on investment is realized through improved governance, streamlined policy administration, and enhanced accessibility of District policies for staff and the public.

Background/History

Policy 1400.1, Visits from Elected Officials, Dignitaries, and Campaign Activities on School Campuses and School Board Facilities, was originally adopted to provide guidance regarding visits by elected officials and other dignitaries to District schools and facilities, as well as to address restrictions related to campaign activities on school campuses.

As part of the District's ongoing Policy Modernization and Consolidation Project, staff conducted a review of existing policies to identify opportunities to eliminate duplication, remove outdated provisions, and improve the overall organization and accessibility of the District's policy framework. Through this review, staff determined that the subject matter addressed in Policy 1400.1 is now more appropriately governed within Policy 6020 – Visits to Schools, which establishes procedures for visits to District schools and facilities by parents, community members, elected officials, and other stakeholders.

Provisions addressing topics such as campaign activity restrictions on school campuses and the presence of media during visits have been incorporated into Policy 6020 to ensure that these expectations are addressed within a single, comprehensive policy governing school visits.

This policy completed Rule Development on March 3, 2026, School Board Workshop.

VISITS FROM ELECTED OFFICIALS, DIGNITARIES AND CAMPAIGN ACTIVITIES ON SCHOOL CAMPUSES AND SCHOOL BOARD FACILITIES

~~The School Board of Broward County is a favorite site for elected officials, visiting dignitaries and aspiring politicians. Policymakers are welcome to our school system, however, we must also protect the integrity of the learning environment.~~

~~AuthorityF.S. 230.22 (1) (2)~~
~~Policy Adopted 5/1/01~~

~~**RULES**~~

1. ~~All visits by elected officials or candidates for national office must be cleared by the Superintendent via the Department of Community Relations. This would include, but not be limited to, President, Vice President, Senators, House of Representatives -- or their respective spouses. Once cleared by the Superintendent, the Department of Community Relations will contact the appropriate Area/Associate Superintendent's office to coordinate the visit. Rules 5-8 should be followed.~~

2. ~~All visits by representatives of the United States executive branch must be cleared by the Superintendent via the Department of Community Relations. For example: Secretary of State, Secretary of Education, etc. Once cleared by the Superintendent, the Department of Community Relations will contact the appropriate Area/Associate Superintendent's office to coordinate the visit. Rules 5-8 should be followed.~~

3. ~~All visits by Florida government officials or their respective spouses must be cleared by the Superintendent via the Department of Community Relations. Once cleared by the Superintendent, the Department of Community Relations will contact the appropriate Area/Associate Superintendent's office to coordinate the visit. Rules 5-8 should be followed.~~

4. ~~All candidates and elected officials representing local constituencies or their respective spouses should follow rules 5-8. The Area Superintendent's' offices and Department of Community Relations should be notified immediately at the onset of planning.~~

5. ~~While elected officials are encouraged to visit, it is the intent of this policy to prohibit political activities and/or campaigning by candidates on school campuses or in School Board facilities. This includes the distribution of campaign materials, the display of campaign posters or other paraphernalia or the presence of a candidate on campus for campaign purposes. The only exception is when a recognized group rents a facility after school hours for such a purpose. On Election Day, however, the School Board follows the county election law referencing voting polls.~~

6. ~~Plan the visit carefully in terms of time and location so that there is as little disruption to student learning as possible.~~

All exceptions must be approved through the Superintendent's office.~~

~~8. Principals who have already had a dignitary visit during the current school year, should direct potential visitors to a school similar to theirs, rather than hosting another visit. Provide school names and principals' telephone numbers.~~

~~9. Information regarding public or elected officials' participation in high school graduation functions is addressed in Policy 5313 Protocol for High School Graduation and Senior Activities, Rules (1), (2) and (7).~~

EXECUTIVE SUMMARY

Policy 1430 – Process on the Inspection and Examination of Public Records

Board Meeting Date: April 7, 2026

Requested Action: Adopt the amendments to School Board Policy 1430 (formerly 1343) – Process on the Inspection and Examination of Public Records.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member: District-wide	
School Board Policy Requirement	• Policy 1000- Rulemaking
Statutory Requirement	• N/A
If the School Board votes "Yes"	• If the School Board approves the proposed revisions to Policy 1430, the District will benefit from clearer and more comprehensive procedures governing the inspection and examination of public records. The updated policy language will better align the District's internal procedures with Florida's Public Records Act and reflect current operational practices used to process public records requests. The revisions will provide clearer guidance to District staff responsible for locating, reviewing, redacting, and releasing records while improving transparency regarding applicable fees and processing procedures. Adoption of the revised policy will also strengthen the District's ability to manage complex or high-volume public records requests by clarifying the circumstances under which special service charges may be applied when requests require extensive staff time or technology resources.
If the School Board votes "No"	• If the School Board does not approve the proposed revisions to Policy 1430, the current policy language will remain in effect. While the existing policy will continue to govern the District's public records procedures, it may not fully reflect the District's current operational practices related to electronic record delivery, cost recovery procedures, or the

	clarification of extensive staff assistance thresholds. As a result, opportunities to strengthen clarity, improve administrative efficiency, and enhance transparency regarding the District's public records request process may not be realized.
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations
Measurable Outcome(s)/Return on Investment	• The clarified procedures for processing public records requests will support greater consistency across departments and improve the efficiency of the District's public records request process. The updated language regarding service charges and staff time thresholds will also provide clearer guidance for recovering costs associated with complex or resource-intensive requests. • The return on investment is realized through improved operational efficiency, strengthened compliance with Florida's Public Records Act, and enhanced transparency in how the District processes and responds to public records requests.

Background/History

Policy 1430 (formerly 1343), Process on the Inspection and Examination of Public Records, establishes the procedures governing the inspection, examination, duplication, and release of public records maintained by Broward County Public Schools. The policy reflects the District's commitment to transparency, accountability, and compliance with Florida's Public Records Act, Chapter 119, Florida Statutes. The proposed revisions modernize and clarify the District's procedures for responding to public records requests while maintaining compliance with applicable state laws governing public access to government records.

The proposed amendments clarify the responsibilities of District custodians in permitting the inspection and copying of public records under reasonable conditions and supervision. The revisions also update language to reflect current operational practices related to the electronic delivery of records, including the use of email, secure download links, or other electronic methods when appropriate.

Additionally, the policy updates fee provisions associated with the duplication of public records, including standard copying charges and circumstances under which the District may assess a reasonable service charge when requests require extensive use of staff time or information technology resources. The revisions further clarify how the District will determine when a request requires extensive staff assistance and provide additional guidance regarding the calculation of labor costs associated with processing complex requests.

The proposed language also expands clarification regarding the handling of confidential or exempt records under Florida and federal law. The policy specifies that certain records—including student education records protected under FERPA, security and emergency response plans, personal identifying information of certain protected employees, medical and mental health records, and active investigative records—may be confidential or exempt from disclosure. In such instances, the District will cite the applicable statutory exemption when responding to a request. These revisions are intended to improve clarity, strengthen compliance with state law, and provide greater transparency regarding the District's public records request process.

This policy completed Rule Development on March 3, 2026, School Board Workshop.

EXECUTIVE SUMMARY

Policy 1960 – Use of Federal Funds for Political Activities

Board Meeting Date: April 7, 2026

Requested Action: Adopt the amendments to School Board Policy 1960 (formerly 1004) – Use of Federal Funds for Political Activities.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member: District-wide	
School Board Policy Requirement	• Policy 1000- Rulemaking
Statutory Requirement	• N/A
If the School Board votes "Yes"	• If the School Board approves the proposed revisions to Policy 1960, the District will benefit from clearer guidance regarding the appropriate use of federal funds and the prohibition against using such funds for political activities. The updated policy language will help ensure that employees understand the limitations associated with federally funded resources and reinforce the District's responsibility to comply with federal and state requirements governing the use of public funds. Adoption of the revised policy will strengthen internal accountability, reduce the risk of misuse of federal funds, and support consistent application of federal funding requirements across the District.
If the School Board votes "No"	• If the School Board does not approve the proposed revisions to Policy 1960, the existing policy language will remain in effect. While the current policy already prohibits the use of federal funds for political activities, it may not provide the same level of clarity or detail regarding definitions, prohibited activities, and employee responsibilities. As a result, opportunities to strengthen internal safeguards and ensure clearer guidance regarding the use of federally funded resources may not be realized.
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations

Measurable Outcome(s)/Return on Investment	• The clarified procedures for processing public records requests will support greater consistency across departments and improve the efficiency of the District's public records request process. The updated language regarding service charges and staff time thresholds will also provide clearer guidance for recovering costs associated with complex or resource-intensive requests. • The return on investment is realized through improved operational efficiency, strengthened compliance with Florida's Public Records Act, and enhanced transparency in how the District processes and responds to public records requests.

Background/History

Policy 1960 (formerly 1004), Use of Federal Funds for Political Activities, establishes the District's expectations and requirements regarding the appropriate use of federal funds in compliance with applicable federal and state regulations. The policy reinforces the District's commitment to ensuring that all federal funds received by Broward County Public Schools are used exclusively for authorized educational purposes and are not expended for political activities. The proposed revisions modernize and clarify the policy language to better define prohibited activities and strengthen internal safeguards related to the use of federally funded resources.

The amendments provide clearer definitions for key terms, including federal funds, political activity, employee, and use of funds, to ensure consistent understanding and application across the District. The revised policy explicitly prohibits the use of federal funds for political activities such as lobbying, campaign contributions, or any activity intended to influence the outcome of an election or ballot initiative. The revisions also clarify that employees may not use time, equipment, facilities, or materials funded through federal sources for political purposes.

Additional language explains that federal funds may not be used to produce or distribute materials advocating for or against political candidates, parties, ballot measures, or legislation unrelated to program administration. At the same time, the policy clarifies that the District may continue to provide information regarding official School Board actions, respond to inquiries, or provide neutral informational materials in accordance with applicable law. These updates are intended to strengthen accountability, ensure compliance with federal regulations, and reinforce the District's commitment to maintaining neutrality in political matters.

This policy completed Rule Development on March 3, 2026, School Board Workshop.

EXECUTIVE SUMMARY

Policy 6020- Visits to Schools

Board Meeting Date: April 7, 2026

Requested Action: Adopt the amendments to School Board Policy 6020- Visits to Schools.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member: District-wide	
School Board Policy Requirement	• Policy 1000- Rulemaking
Statutory Requirement	• N/A
If the School Board votes "Yes"	• If the School Board approves the proposed revisions to Policy 6020, the District will benefit from clearer and more comprehensive guidance governing school visits and campus access procedures. School administrators will have strengthened policy direction for coordinating visits while maintaining campus safety and minimizing disruption to instructional time. The revised policy will better reflect the District's commitment to transparency and collaboration with families, community members, and elected officials. In addition, the clarified provisions regarding political activity, media presence, and visitor procedures will reduce ambiguity and support consistent enforcement across schools. Overall, adoption of the revised policy will enhance operational clarity and reinforce the District's commitment to maintaining safe and orderly learning environments.
If the School Board votes "No"	• If the School Board does not approve the proposed revisions to Policy 6020, the current policy language will remain in effect without the additional clarifications provided in the proposed amendments. Existing procedures regarding school visits will continue; however, opportunities to strengthen guidance related to elected official visits, visitor conduct expectations, media

	coordination, and campus access protocols will remain less defined within the policy framework. School administrators may continue to rely on existing practice or informal guidance in areas where the proposed revisions would otherwise provide clearer direction.
Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations
Measurable Outcome(s)/Return on Investment	• The updated language promotes greater consistency in how visitor procedures are implemented across school campuses and strengthens accountability through clear visitor sign-in and identification requirements. The revisions also support stronger relationships with families, community members, and elected officials by establishing transparent guidelines for school visits. • The return on investment is realized through improved operational clarity, strengthened safety practices, and enhanced public trust in the District's governance of campus access procedures.

Background/History

Policy 6020, Visits to Schools, establishes the procedures and expectations governing visitors to Broward County Public Schools campuses. The policy reflects the District's commitment to transparency, collaboration, and community engagement while ensuring that all school visits occur in a manner that protects students' safety and preserves instructional time. The proposed revisions expand and clarify the existing policy language to better articulate the District's expectations for visitors, strengthen campus safety protocols, and improve guidance for school administrators responsible for coordinating school visits.

The amendments introduce expanded introductory language emphasizing the importance of partnerships between schools, families, community members, and stakeholders in supporting student success. The revisions also clarify procedures for visitors entering school campuses, including the requirement to report to the single point of entry and follow established visitor management procedures.

Additional language provides clearer guidance regarding visits by municipal, local, state, and federal elected officials, including encouraging advance notice to allow school administration to coordinate logistics and safety protocols while maintaining flexibility for official visits. The revisions further reinforce requirements for visitors to sign in and sign out at the main office and wear identification badges while present on school premises. The proposed changes also strengthen language prohibiting political campaigning or campaign-related activity on school campuses and clarify expectations

regarding media presence during school visits, requiring that media interviews, photo opportunities, or press briefings occur off campus during the instructional day unless otherwise approved by the Superintendent. These updates are intended to strengthen safety procedures, improve clarity regarding visitor expectations, and support consistent implementation of campus access procedures across the District.

This policy completed Rule Development on March 3, 2026, School Board Workshop.

Board Meeting Date: April 7, 2026

Requested Action: Adopt the amendments to School Board Policy 1970 (formerly 6003) –Display of Flags and the State Motto.

General Information

The following information outlines the governing authority, districtwide implications, historical background, strategic alignment with the 2027 goals and guardrails, and the anticipated measurable outcomes and return on investment related to this agenda item.

District-zone Impact/Board Member: District-wide	
School Board Policy Requirement	• Policy 1000- Rulemaking
Statutory Requirement	• 4 U.S.C. §7; Sections 256.015 and 1003.44, Florida Statutes.
If the School Board votes "Yes"	• If the School Board approves the proposed revisions to Policy 1970, the District will benefit from expanded policy language governing the display of the United States flag, the State of Florida flag, and the State of Florida motto within District schools and facilities. The revised language will provide additional clarity for schools regarding how flags should be displayed on campuses and within classrooms, particularly in situations where multiple schools share a single property. Adoption of the revised policy will also reinforce statutory requirements regarding the display of the state motto within District buildings and ensure consistent implementation across schools and District facilities.
If the School Board votes "No"	• If the School Board does not approve the proposed revisions to Policy 1970, the current policy language will remain in effect. While the existing policy addresses the display of flags, it does not provide the same level of clarity regarding classroom flag requirements, shared campus flag display provisions, or placement expectations for the state motto within District facilities. As a result, opportunities to strengthen policy clarity and ensure consistent implementation across District schools and facilities may not be realized.

Alignment to the 2027 Strategic Goals and Guardrails	• Business Operations
Measurable Outcome(s)/Return on Investment	• The updated language promotes greater consistency in how statutory requirements related to the display of flags and the state motto are implemented across schools and District facilities. • The return on investment is realized through improved policy clarity, strengthened compliance with applicable laws, and more consistent implementation of requirements across the District.

Background/History

Policy 1970 (formerly 6003), Display of Flags and the State Motto, establishes requirements governing the display of the United States flag, the State of Florida flag, and the State of Florida's official motto, "In God We Trust," within Broward County Public Schools facilities. The policy reflects the District's commitment to complying with applicable federal and state laws governing patriotic observances and the display of official symbols in public schools.

The proposed revisions clarify and modernize the policy language to ensure consistency with current statutory requirements and operational practices across District schools and facilities. The amendments provide clearer direction regarding the display of the United States and Florida flags at District buildings and campuses, including circumstances where multiple schools or District facilities share the same property and may utilize a single flagstaff. The revisions also clarify classroom flag display requirements, including that the United States flag displayed in classrooms must meet specified size standards and be manufactured in the United States.

Additionally, the proposed language reinforces the requirement that the state motto, "In God We Trust," be displayed in a conspicuous location within each District building or school so that it is clearly visible to students, staff, and visitors during normal operations. These updates provide clearer guidance for schools while supporting the District's compliance with applicable state and federal laws.

Any language pertaining to the Pledge of Allegiance has been removed as this language already exists in the RIGHT TO FREE SPEECH, STUDENT PUBLICATIONS, AND DISTRIBUTION OF MATERIALS section of Policy 5090, Code of Student Conduct.

This policy completed Rule Development on March 3, 2026, School Board Workshop.
